* Season 5 has a single overarching plot which is divided into two connected but separate stories in each half of the season. In the first half, the SHIELD team find themselves in a
* Season 5 has a three-episode story arc focused on Archie disappearing on the way to an Army convention (turns out
* Season 5 has "Bloodlines", although that has the more serious subplot of Keith working with someone
* Season 5 has quite an elaborate one: it starts with Emir Bahaddin and The Mongols (The former being backed up by the latter during his tenure in Konya), and later
* Season 5 has the Underwoods resorting to every dirty trick they can come up with in order to win the election, as well as to counter a journalistic investigation into Frank's past misdeeds.
* Season 5 included Jeff doing a stand-up skit. Joel Mchale is a comedian himself.
* Season 5 in general is seen as a tough act to follow to Season 4, which was seen as
* Season 5 introduces Spin, who is changed from a man known only as Mr. Auerbach to a woman named Spencer Young.
* Season 5 introduces the Kingdom of Griffonstone, whose culture seems to be caught somewhere between the Urals and the Caucasian mountains (primarily Georgian, Armenian and Kazakh cultures) with a dash of Tibet and Mongolia to round out the society's remote mountainous flair.
* Season 5 is the last in the series to feature a dual narrative of the present and the past, culminating in the Season 5 finale, a recreation of the pilot's first scene. The season's running theme is Oliver's past ten years (the five years in hell, and the five years of his vigilantism in Star City) coming back to haunt him, the
* Season 5 meanwhile has the Knights Of Byzantium, whose purpose seems mainly to be to stall the Glory arc (which many considered overlong). Their execution, introduced mid-season in a burst of violence and disposed of just before the season's end, looks in retrospect very much like the writers were channelling this trope.
* Season 5 of Ben Rants gets this for flanderization (The flanderization began in Season 4, but got worse in Season 5), inconsistency, focus on jokes than the subject, and many opinion retcons.
* Season 5 or getting any closer to finding a way home has completely worn him down, and the second episode reveals that he's apparently contemplated seppuku at least once.
* Season 5, "Reckoning" - Clark telling Lana he's an alien, proposing to her, Lana's death and Lex seeing Clark using his powers is all undone by the end of the episode thanks to a crystal given to Clark by Jor-El.
* Season 5 reveals that there was a war between Mexico and Cuba during the global famine of Season 4. Apparently Cuba fired first by invading Mexico (though they claim that the "invaders" were actually starving refugees), which Mexico fought off before counter-invading and occupying Cuba. How this all ended isn't touched on, but Cuba is independent again in the present.
* Season 5 runner-up Alaska Thunderfuck had a very similar attitude about losing the crown to Jinkx Monsoon. When she went on to win
* Season 5: Salome and Bill. Although, by the finale, they both take the backseat to Lilith, who is the one manipulating them and controlling it all.
* Season 5's "Cape Feare" was the last episode by the original Simpsons writing team (e.g. Sam Simon, David Stern, Jeff Martin, Jon Vitti, Jay Kogen and Wallace

Wolodarsky), most of whom left the show afterwards.
* Season 5 (seemingly) broke this trend by being generally well-received, although its finale
* Season 5 seems to be set out to avert this with the first episode having Grumpy
* Season 5 sees the angel Castiel joining Team Free Will, making him the only nonhuman along with Sam, Dean, and their surrogate father Bobby.
* Season 5's finale has a similar tone, as the show's future was once again uncertain. With both Donald Glover and
* Season 5's "Getting Greg's Goat": All sorts of misunderstandings happen, and at one point several of the Bradys — at least Mike, and later Peter and Bobby — conclude that the fracas going on was Greg sleeping with a girl. Viewers were in the know all along: Greg was keeping the rival high school's goat in his room and was trying to keep it under wraps.
* Season 5's "Movie Tonight" did this both for Burghoff and for Loretta Swit, who sang "C'est Magnifique" during a break in the film screening. All the main characters got in on the "Father Mulcahy Soundalike Contest", something that the cast members had done at one point. (Burghoff was arguably the winner.)
* Season 5's "Tanks for the Memories" revisits Rainbow Dash's relationship with her pet tortoise, Tank, who hadn't received focus since his debut in Season 2's "May the Best Pet Win".
* Season 5: The first half of the season has Kara and the DEO going up against Malefic Jonzz, J'onn's
* Season 5: The flashbacks have Oliver travel to Russia, where he joins the Bratva in the pursuit of avenging a friend from the previous season, before setting up his return to Starling City (as seen in the pilot); the present has Oliver building a new team, which comes under siege from
* Season 5: The Legends have to hunt down the Encores, damned souls returned to life by Astra Louge to spread chaos on Earth. In the back half of the season, however, this shifts to hunting for the pieces of the Loom of Fate before it can be reunited by the Fates (to whom Astra was an
* Season 5: The Winx stopping Tritannus from polluting all the magic dimensions' oceans.
* Season 5 throws us another straight out aversion in Starlight Glimmer, who's the first major villain to be just another normal pony. A very skilled and smart pony, but at the time of her debut episode only influential enough to threaten one small village (which doesn't make her any less scary). In the Season 5 finale, however,
* Season 5 winner Chip was a huge proponent of this trope, especially when writing for the "Return of the Racers" blog for CBS.com. He constantly talked about how "alpha male" teams had a unfair advantage over all other teams, and how he and his wife never would have had a shot against one of these teams (even though they did beat the arguably stronger team of Colin & Christie). When he made a list of the strongest individual racers, the top 11 spots all went to men, with the top female racer being a physical trainer.
* Season 6 also played this for drama at one point, with Spike convincing the already severely depressive Buffy that she
* Season 6: A witch named Selena unlocks the Legendarium book and releases several fictional creatures, and the Winx must lock it for good.
* Season 6 deals with three different evil plans: Izel's plan to recreate the monoliths to bring her inter-dimensional race to Earth and give them physical bodies, Sarge's plan to kill Izel,
* Season 6' elimination of all three tap dancers. It's shocking because this was dubbed by the producers and judges as "Year Of The Tapper" and it came about because during the first two weeks of the show the audience wasn't even allowed to vote like they normally would have.
* Season 6 episode 4 began with Buffy wandering around a dark creepy area which turned out to be her basement and she's there to fix a leaky pipe.
* Season 6, episode 7, interestingly, begins with a cold open to avoid spoiling itself: the episode begins with the return of long-thought-dead Sandor Clegane, whose actor, Rory McCann, is listed in the opening credits. The opening was moved

back a bit as to not spoil the surprise.
* Season 6 features an episode where Sam and Dean drive a Mustang, Cuban is not communist and Jo and Ellen are still alive, with Ellen happily married to Bobby. It turns out that the
* Season 6 gives us a variation with Mia, a teen mom who becomes JT's new love interest after his brutal breakup with Liberty. JT and Liberty still harbored feelings for each other and JT was all set to confess his feelings, when he was fatally stabbed. Mia eventually admitted that she knew all along that JT still loved Liberty.
* Season 6 got hit with this even worse. While still considered a decent season by the fandom, it was criticized for the overarching plot of
* Season 6 had "The Trio" as actual villains and antagonists, but they were actually pretty harmless (or at least ineffective) for most of the season (right up until they are
* Season 6 has a handful of episodes that break the trend of a recurring villain pulling a
* Season 6 has Ted dating Zoe, the two constantly argue and fight over everything as well as Marshall and Lily, who are capable of meeting each other halfway and agreeing with things. An episode is dedicated to comparing his relationship: Ted and Zoe think that Marshall and Lily's relationship is lazy and stops them for growing while Lily and Marshall think that their relationship is exhausting and toxic. At the end of the episode, Ted confesses that a supportive relationship is better and realizes his relationship with Zoe is awful and taking a lot out of him.
* Season 6 has the long-haired, conventionally feminine Daya romantically involved with the short-haired pimp/drug dealer Daddy who is clearly a
* Season 6 in particular is widely disliked due to the sheer amount of episodes dealing with the
* Season 6 introduces Sarge, an alien who by a twisted series of coincidences became Coulson's lookalike without realizing it, along with a few of his memories. May spends part of the season desperately trying to bring out her lover's personality, but it isn't there. Sarge is NOT Coulson.
* Season 6 involves the Winchesters tracking down Monster Progenitors, known as "Alphas". Alphas do not typically have the weaknesses of their children, and may share some telepathic connection to them. The respective Alphas are in turn topped by
* Season 6, meanwhile, has a side arc involving series regular Brock Samson falling for a heroine named Warriana, who is an obvious parody of
* Season 6 of the show focuses on the build-up to the party primary elections to decide who each party's next candidate for President will be. A key running theme is the fractured bickering between the various factions of the Democratic party, represented by three major candidates for President, versus the Republicans unifying relatively quickly behind their candidate. It culminates in a chaotic convention wherein no candidate can get a clear majority over the others
* Season 6: Oliver must juggle being Mayor of Star City, a vigilante, and a father, while facing off with a
* Season 6 opens with Jessica Pare singing "Zou Bisou Bisou" in her native French Canadian while doing some Burlesque steps.
* Season 6 opts for a religion-centric plot, where a mysterious force dubbed the Doomsday Killer strikes in Miami and uses his victims' bodies to enact tableaus from the Book of Revelations. It also sees the
* Season 6 promoted Starlight Glimmer into one of the main characters, which furthered the
* Season 6 reveals that Piper and Leo's son Wyatt is destined to become the evilest male witch ever. This leads Gideon, headmaster of the Magic Academy, to try and prevent it by killing Wyatt as an infant. As it turns out, however, Wyatt will fight him off, but the psychological trauma of Gideon's attempts to kill him is exactly what turned Wyatt evil, to begin with. Leo ultimately breaks the cycle by
* Season 6 shows that Jackson is dating Ethan, meaning he was previously a closeted bisexual. His actor,

* Season 6 starts with two major storylines — Daisy and Simmons leading a team to search for Fitz in space as they're hunted by the Chronicoms, while the rest of SHIELD on Earth deal with an infestation of alien parasites called Shrike being hunted by commandos led by a mysterious doppelgänger of Coulson. These storylines are tied together in the back half of the season, as the Shrike's master Izel hijacks the return to Earth as part of her agenda.
* Season 6 subverted this trope somewhat, but "the mother of all monsters" is still pretty high-ranking. A corrupted angel ascends to becoming a
* Season 6, "Such Sweet Sorrow: Carol races through O'Hare Airport to catch a flight to Seattle in the hopes that it's not too late to reconcile with Doug. Luckily, it isn't.
* Season 6: The Anomaly goes crazy after Gabriel finally figures out how to interact with it. Diozya’s now-teenage daughter Hope suddenly appears and tells Octavia that her mother has been captured by "him" and stabs her, resulting in Octavia turning into mist and vanishing. Also, Octavia seems to be unsurprised by any of it despite not recalling any of her previous time in the Anomaly.
* Season 6: The first half of the season is built around Team Flash preparing for the Crisis, while also having to confront Ramsey Rosso, whose
* Season 6: Their wedding is interrupted by mysterious men who run Castle off the road, kidnap him for 2 months, then erase his memory of what happened.
* Season 6 The scavenger hunt managed to get the series its first Emmy for "Outstanding Creative Achievement in Interactive Media - Multiplatform Storytelling"
* Season 6 was even more of this. Between Seasons 5 and 6, "All this and Gargantua 2" was released, which
* Season 6 was the exception as the show mostly just stuck with the formula of the last four seasons.
* Season 6: Willow dealing with her addiction to magic, and Buffy trying to provide for Dawn while also getting tormented by the Trio, whose actions ultimately
* Season 7-9 Cyber criminal Christopher Pelant enters the scene. He frames Brennan for murder, sending her on the run for three months until she manages to clear her name. Then when Brennan is finally ready to propose, Pelant forces Booth to reject the proposal without explanation or he’ll kill 5 random people.
* Season 7A ends with Robert Morse singing and dancing to the old show tune "The Best Things in Life Are Free" as Don Draper's hallucination (or was it?) of the now-deceased Bert Cooper in the series' biggest (if not only)
* Season 7 also had James Vaughn, who had spent most of his run among the top contenders, before losing out in the final four against Cleen Rock One (the season's runner up)
* Season 7 continues the Chronicoms' plan of the previous season, with the aliens, now lead by Sybil, going back in time to prevent SHIELD from existing, so they can
* Season 7 did another scavenger hunt. The series got another Emmy for this.
* Season 7 did it again in Episode 10... the master list of every government official on Dubaku's payroll has been found and safely delivered to the FBI. Of course,
* Season 7 gives us Negan, Dwight, and Sherry. Dwight and Sherry were married, but after their attempt to flee went wrong, Sherry agreed to become Negan's wife in order to save Dwight's life. Unfortunately, Negan is an
* Season 7 had Jessie Smith, who got eliminated in sixth place, despite his decent run up until then. The fact that he got eliminated in a direct duel with Anthony Michaels, that season's Ink Master, took some of the edge off the elimination, but it was still unexpected. The fact that his Season 2 elimination was quite shocking as well, made this a case of history repeats.
* Season 7 has elite vampires called Turok-han. The first one to make an appearance is actually incredibly dangerous, but once a whole army of them are released at once, they
* Season 7 has had several notable faces (possibly to tie in with the series' 50th anniversary), including Ben Browder from
* Season 7 has interesting case, where Santos and Vinick face off for the

presidency. Although Santos and his campaign are the closest to being the "heroes," Vinick and his people are very well characterized and sympathetic. Vinick repeatedly shows himself to be an honorable person and politician, sometimes even more honorable than Santos (Santos and Russell both take an ethanol pledge that they know is ridiculous, Vinick refuses).
* Season 7 has Seaver get in trouble after she decides to go see someone who turns out to be the killer.
* Season 7 has such a thing narrowly avoided, as the heroes redeem the Pony of Shadows before he can plunge the world into darkness.
* Season 7 has "The Feud" where the paladins have to take part in a game show.
* Season 7 introduced the Leviathans as beings so powerful and dangerous that God locked them away in purgatory to stop them from killing angels. Though this is mostly an
* Season 7 introduces a custom stake-ended scythe that "feels right" in the hands of the Slayer. Faith wields it just as well as Buffy.
* Season 7 is all about the SHIELD team chasing the Chronicoms through time to try and prevent them from
* Season 7: Nerd-turned-villain Andrew fails to stab a pig for his ritual and has to buy the blood instead, so he tries to disguise the "squick" item by tacking on a regular
* Season 7 onward did this with the introduction of Poof, as changes include
* Season 7 opens with Jerry and George realizing that they're unfulfilled by their
* Season 7's "Showtime" shows that the main Scooby trio is apparently able to initiate contact even if Willow isn't actively using the ability, as
* Season 7's trailer makes it pretty obvious, to anybody who hasn't finished Season 6 yet, that
* Season 7 tells the various legends of the "Pillars of [Old] Equestria", the
* Season 7: The first portion of the season features Team Arrow trying to get Oliver out of prison (where he's been since
* Season 7: The Winx must protect the animals of the magic dimension.
* Season 7 would have been the last season if it weren't for the 2007-2008 writers' strike.
* Season 8 also brings in John Boyd as Arlo Glass, ostensibly a main character, as well. However, he never really gets a sizable subplot to deal with. Aside from some minor flirting with Dana at the start of the season, he remains a back-up CTU analyst who does little to serve the plot. He has comparatively minimal dialogue and most of his actions are things (mostly hacking and computer usage) that Chloe likely could have managed herself. Despite this, he is one of only four characters to appear in every episode of the season (the others being Jack, Chloe, and Cole), and the last line of the
* Season 8 competitor Nick Mitchell's on-stage persona Norman Gentle was as camp as could be, from his headband to his sparkly shirt. He tried to make up for his not-so-good singing with rather questionable stage antics, including what was described by Randy Jackson as "attempting to get to 2nd base with the show logo" the first week of the top 36.
* Season 8, Episode 17 - "Valentine's Day Massacre" (by a hotel guest when he is posing as a bellhop while trying to bypass security. In the end he gets past the guard by luring him to the same hotel guest) Season 10, Episode 06 - "The Weaker Sex" (twice by the same woman, the biker in the bar)
* Season 8 Episode 1 ("The Foundation") includes both "prefers the old name" and "ignorance" about the location, both with Burma/Myanmar.
* Season 8 episode "Avatar" has the characters inside a virtual reality showing up as video-game CGI on the screens.
* Season 8 featured some unusual stingers in four consecutive episodes — "The Thing That Couldn't Die", "The Undead", and "Terror from the Year 5000" (all featuring Pearl and Prof. Bobo visiting the Observer planet) all feature the Observers holding their brain pans up to the camera while a
* Season 8 gives us Dean and Castiel's adventures in Purgatory, a forested dimension where one doesn't sleep or eat and spends the whole time fighting

monsters. Their bodies and clothes are dirtied up and Castiel grows a beard, but they still look amazing and show no signs of actually being wounded in any way.
* Season 8 has "Day Forty Seven" and "Clear Day", though the latter has a serious subplot where Allura has hallucinations.
* Season 8 introduces CGI action sequences. The first moment of this comes as a surprise as the camera slowly moves away from the characters in the scene while the viewer thinks that they can't possibly do what the scene seems to be suggesting.
* Season 8 introduces Sandbar, Yona, Gallus, Silverstream, Ocellus and Smolder, who are children of multiple species.
* Season 8 is almost entirely built around the Mane Six opening and running a School of Friendship. Even episodes not directly involved in this tend to still reference it in some way.
* Season 8: Marriage hasn't stopped the trope. A hitherto unknown enemy related to Beckett's mother's murder surfaces, and she has separated from Castle to pursue her own private investigation into this. She's gotten multiple
* Season 8: Most of the shortened season is built around either the heroes preparing for the
* Season 8 of the revived series revolves around Missy, a female reincarnation of
* Season 8 opening credits sequence has Sabrina Le Beauf (Sondra) doing this to Geoffrey Owens (Elvin) to symbolize their characters' relationship. It's more lighthearted than most examples, especially because Owens is smiling as Le Beauf leads him along.
* Season 8's arc introduced the Master, who was a common villain in each serial and was captured by UNIT in the
* Season 8's "Dial Meg for Murder" sees Peter victimized twice — possibly a series record:
* Season 8: The Winx go on an intergalactic adventure to restore all stars to the galaxy.
* Season 8, which aired in 2011, had the best animation in the history of
* Season 9-10: Pelant is finally killed and the wedding happens. But Booth is caught in a conspiracy, with three heavily armed men attacking the couple, destroying their home and nearly killing Booth. Booth then gets arrested for murdering them. Brennan resorts to blackmail to get him out of prison and the murder of Lance Sweets nearly drives Booth rogue in his desperation for justice.
* Season 9 also had the elimination of Golden Skull Tattoo (Cleen Rock One and Aaron Is), while they were in the final five (due to something called "Thumb-gate"
* Season 9 and early season 10 of the comics also continue their relationship in this way. In season 9, Spike spends a good chunk of the story hunting after a demon looking for Buffy on his own, stating outright that he'd do anything for her. Later, when she begins to mistakenly believe
* season 9, Andrew uses Warren's lab to create another Buffy-bot and switches its consciousness with the real Buffy.
* Season 9 averts this by splitting the season between two separate storylines, one of which is pretty well all machinima and the other of which is entirely CGI. Monty Oum confirmed this was because trying to match the animated sequences with the "filmed" ones was nearly impossible.
* Season 9, Bonnie's original season, was also guilty of giving her a massive amount of screentime and letting her get away with things that she should not have gotten away with. However, this all served as a huge build-up to her getting a
* Season 9 deals with a final story arc where Celestia and Luna plan to retire and make Twilight their successor, and a legendary villain named Grogar assembles a
* Season 9, Episode 10: Agents York, Maine, and Wyoming had a three on one sparring match with Texas. York tries to coordinate his team, but Maine and Wyoming just keep ignoring him and charging forward, getting their asses kicked.
* Season 9, Episode 2: While infiltrating an enemy base, Agent South Dakota refuses to take a moment to activate her motion trackers, despite Agent North Dakota's insistence she do so, as it'll "Take too long". As such, she doesn't realize that a guard has spotted her from behind and the rest of the mission becomes a shoot-out. As such, South goes down a rank on the Freelancer Leaderboard.

* Season 9 has a milder form, Mac is sitting in the park with his arm around Christine, when his phone rings in the middle of a kiss. Still a type of intimacy, just not actual sex.
* Season 9 has an episode revolving around the Thinman, a strange ghostly being who has quite an internet presence but no apparent pre-death identity.
* Season 9 has another awkward one with them going undercover at a couples retreat right after Booth was forced by a villain to reject Brennan’s marriage proposal and she was still devastated because he couldn't say why.
* Season 9 has Celestia and Luna abdicate the throne in favor of Twilight Sparkle, thereby ending their time as Equestria's rulers and protectors.
* Season 9 has the highwayman Sam Swift delay his hanging by throwing puns at the watching crowd, assisted by the Doctor.
* Season 9 introduced supergates (really big stargate, needs a planet-mass black hole to power it) that were used to send ships from one galaxy to another quickly.
* Season 9 introduces Margot al-Harazi, who is British by birth but married an al-Qaeda operative and became radicalized by him. She serves as primary villain for the season when she hijacks drones in an attempt to assassinate the US President.
* Season 9; monster appears: "Buffy, it is time for you to pay ... your student loans."
* Season 9 of premiered on LeTV in China in 2015, followed by the premiere of Season 10 one year later, and then followed by season 11 another one year later, and so on. A few years later, seasons 9 and 10 premiered in Malaysia on Astro Xiao Tai Yang in 2020, followed by Season 11 in March of 2021.
* Season 9 reconned the Milky Way even being The Ancient's native galaxy and gave them the new backstory of being a science based splinter faction that fled an unknown galaxy to escape the fanatical religious sect. For the count that means The Ancients evacuated 3 GALAXIES, 4 if you count their ascension after returning to the Milky Way.
* Season 9 route after accidentally killing a human, also temporary-ish (though it's acknowledged in-universe that her actions, while she was a villain, went too far to just be forgiven and forgotten).
* Season 9's "Civilized Lies" had three guys mugging an off-duty cop. They all wore identical masks of their mentor's face to avoid identification.
* Seasonal Rot: Fans consider some of the later seasons to be lacking as more of them are produced.
* Seasonal Rot: The opinion that a series has declined in quality the longer it has lasted.
* Seasonal Rot: The opinion that a show has declined in quality because it's lasted too long.
* Season and based around the classic fairy tales played by Melmacians.
* Season Eighteen, the beginning of John Nathan-Turner's reign as executive producer, immediately distanced itself from the previous season (edited by
* Season Fifteen is about the Winchesters trying to figure out how to
* Season Finale a clone of the Doctor appears and Donna gets a copy of his mind, meaning there are now three Doctors running around.
* Season Finale, Burt lures a behemoth into a pit formed by two gates. The behemoth is trapped by the inner gate and gets its arm ripped off and bleeds out. Burt's response: "He's unarmed!"
* season finale cliffhanger. First minute of the next season? It's an Almost Kiss.
* Season Finale episodes. The writers often didn't know if the series would be picked back up for another season and would blow the entire SFX budget. Extreme examples are the season 6 finale destruction of Abydos by Anubis' super weapon, and the famous season 4 Sam Carter triggered super nova which decimated Apophis' fleet.
* Season Finale, Green Lantern used his ring to make a drill when he didn't quite agree with a spaceship hull.
* Season Finale, had the Kats use one of these against the alliance of Dark Kat, Dr. Viper, and the Metallikats.
* Season Finale has Grunkle Stan revealed to be the owner of Journal 1, and he uses all three journals to activate a mysterious portal in the hidden basement of the

Mystery Shack. The original airing punctuates this by having the character say that "Gravity Falls will return" over the end credits, though we don't discover the portal's purpose until "Not What He Seems" half a season later.
* season finale has the To Be Continued followed by "Come on, you knew this was coming."
* Season Finale. He has a change of heart and leaves her in the second season's opening two-parter.
* Season Finale, he is dropped with only a Handwave at the beginning of the next season.
* Season Finale, Inspector Brakenreid is surprised to learn that Detective Watts is homosexual. He is bewildered to discover he is literally the only person in his circle to be surprised, and even his wife (who usually comes across as having a very "proper" worldview and ignoring anything that doesn't fit) can't understand why he didn't think it was obvious. Watts remains in the closet, of course, because it's the 1900s.
* Season Finale is Dr Rosen announcing the existence of Alphas to the world.
* Season Finale, Jackie uses Shendu's own Dragon Talisman to blow a hole straight through his chest. Unfortunately, Shendu still has the Horse Talisman, allowing him to heal the damage in seconds.
* Season Finale, Numbah One has been turned into an adult by the Delightful Children From Down the Lane. After a fight for the age-changer between the rest of the Kids Next Door and the Delightful Children, Adult-One bursts in on the scene, and asks for it. When asked why, Mr. Uno responds he's an adult, and goody-goodies like the Delightful Children always obey adults.
* Season Finale "Sundown: Part 1" opens with the entire team being destroyed one by one by the Fatal Five. Then the simulation ends, and they prep to start again. Phantom Girl is not amused. "There's only so many times a girl can face her simulated doom in one day!"
* Season Finale that will save the world, only to discover that the button actually labeled "Save the World" was marked "Out of Order".
* Season Finale: The last episode of a specific season, (usually) concluding that season's story arc.
* Season Finale, the team has a big blow-up, leading to Paige, Sylvester, Toby and Happy leaving Scorpion and starting their own firm, Centipede Partners.
* Season Finale. Whilst attending a road traffic accident, the car she is sitting on explodes and chops her in half. She doesn't die until a few moments later, meaning she is painfully aware of what has happened.
* Season Five focuses on the team as a whole and their efforts to stop
* Season Five: Glory's apartment. Tough act to follow, those clandestine underground government labs.
* Season Five is devoted entirely to the Winchesters trying desperately to do this - perfectly understandable, since their destiny involves the two of them
* Season five opened with the deaths of Michelle Dessler and President Palmer.
* Season For Slaughter by David Gerrold, the action takes place on an airship (massive blimp) over the Amazon Jungle, which is now infested with aliens which will delight in eating everyone aboard. They discover that the airship has been infested with tiny little bugs letting the gas out of the blimp, so they are going down unless they lighten the load. They do so, by throwing everything possible overboard: sinks, beds, dressers, the carpet from the floors, refrigeration units from the kitchens, dining tables and chairs, literally everything that they don't need to stay in the air. It's not enough...
* Season Four: Damien Darhk, a contemporary and former rival of Ra's, whose skill as a combatant was actually just a bit below his. However, Darhk was more dangerous, as he had magic at his disposal, meaning that unless you were a meta, you were screwed. His goal was the most grandiose of all — nuking the world.
* Season Four has Clifford and Marlize DeVoe, also known as the Thinker and Mechanic. While both scheme against Team Flash, Clifford makes strategies while Marlize builds the inventions they rely on to keep up with the protagonists. Marlize specifically refers to herself as Clifford's "partner" as opposed to

"minion."
* Season four has Mike and Zoey, who save each other quite a bit throughout their time on the show.
* Season four has Min-Gi and Ryan. Min-Gi’s self confidence issues cause him to abandon his music dreams for university and a "safe" career in finance. Ryan tends to leap before he looks, which results in his career in music going nowhere. Both issues weigh heavily on their friendship.
* Season four has the attention split between the primary Ohio setting and some graduated students' lives in New York.
* Season Four in general plays with the idea that there might be a third Holmes brother, and at one point Mycroft has a significant phone conversation in which he refers to "Sherrinford". In old-school Conan Doyle
* Season Four is about Raven and her attempts to avert her destiny- opening a portal to allow her demonic father Trigon the chance to escape his
* Season four: Jake and Rosa are framed for bank robbery and *convicted*.
* Season four protagonists Ryan and Min-Gi are from the fictional town of Lake Powell, based on the real-life town of Powell River, British Columbia, where storyboard artist Ryan Pequin grew up, with extra research being done to make sure that the fictional town's appearance mirrored that his hometown during the 1980s.
* Season four shows George-Michael enter this category, with the narrator essentially saying that Lying is something that runs in the family.
* Season Fourteen has the Winchesters and their allies having to deal with the aftermath of Alternate!Michael possessing Dean in the previous season finale and attempting to conquer the prime universe. Meanwhile, there's also the matter of
* Season Nine ending, right before facing Zod and sending the Kandorians away in a a method that may result in him being banished to New Krypton with them. Lois asks 'the Blur' if he can ever forgive her for mistaking Zod for him and gets kissed, resulting in her figuring it out.
* Season Nine has multiple plot lines dealing with the fallout from the previous season —
* Season of Infamy, allowing him to finally die for good. Batman's long-time ally Alfred Pennyworth even attempts to offer the view that it wouldn't actually be murder, as Ra's has been alive for centuries and has already 'died' before, but ultimately acknowledges that it is Batman's decision what he should do at this point.
* Season of Miracles, a boy dozes off during church and mutters "Blue Kool-Aid" as he wakes up.
* Season of Miracles, Rafer's dad is played by Rusty Whitener, who wrote the screenplay and the original novel.
* Season of Miracles, the Hawks are full of bullies and use tactics such as insulting the Robins to distract them during a game. Their coach has a "win at all costs" mentality and encourages their behavior.
* Season of Miracles, Zack and his dad are both believers in this trope. When Zack says, "Third place feels like I... failed," his dad says, "Good! It's first place or nothing, son! That's the American way!"
* "Season of Mists" makes a specific point of describing the odd behavior of each of the Endless' shadows as they are introduced. Desire has two of them, Despair's has its own odor, Delirium's is tangible and changes shape on its own, Destiny doesn't have one, and Dream only has one when he remembers. Death's is not mentioned (although she is consistently the most human-like of the Endless), and Destruction is not present at the time. However, none of their shadows seem to be sentient, at least as far as we know (it would be entirely plausible, there's just no actual evidence for it).
* Season Of Mists storyline, Lord Kilderkin of Order manifests himself as the supreme icon of order — an empty cardboard box.
* Season of Mists the dead, apparently, including small animals and children.
* Season of Mystery: The Cherry Blossom Murders, this provides evidence of what (and who) the protagonist's husband had been looking into before his alleged suicide.

* Season of the Witch and the entire movie is the heroes helping them find it.
* Season of the Witch episode, Ringo tries to avoid having to comment on the writing of the film by saying this:
* Season of the Witch, everyone (except for an altar boy/Knight Wannabe and a girl that was possessed by a demon) dies rather horrible deaths.
* Season of the Witch takes place during the Black Death, though it misrepresents its symptoms as being more similar to leprosy (probably to increase its horror value) and ends on the revelation that it was created by a demon to raise an undead army.
* Season one also ended with multiple solo heroes being inducted into the Justice League, significantly increasing its size. Season two has many of the Young Justice characters having been promoted to the Justice League.
* season one design, which is markedly different from her appearance in other episodes, was that she lacked most of her magic at the time. She has said it was an on-the-spot explanation and that the writers could explain it some other way. No writer would try, with the IDW comics randomly using her original design at different points, and the show featuring Luna with little-to-no magic but keeping her redesign and ethereal mane.
* season one dub Tai (Taichi) says, "This would make one great story. Of course no one would ever believe it."
* Season One episode "Mr. Monk Meets Dale the Whale" has Monk investigate a murder supposedly committed by a mastermind known as Dale the Whale, who is physically incapable of committing the murder due to being morbidly obese.
* Season one episode "You Do It To Yourself" featured a professor shot dead in front of witnesses,
* Season one features a minor villain, Jeremy Downs, who was hunted by Dexter for killing a man. It's soon revealed that the reason Jeremy killed him was that he raped him, something Dexter was unaware of.
* Season one has Joyce fill the entire house with an absurd amount of lights - from standing lamps to Christmas lights - to make contact with Will in the Upside-Down. One of the walls is dedicated to one specific set of Christmas lights, each light corresponding to a letter of the alphabet, allowing Will to talk to her.
* Season One has the boys' search for their father, and the demon that killed their mother by extension.
* Season one has Tulip. Her issue is a general unwillingness to work through her feelings, preferring to bury them rather than accept imperfection and move on.
* Season One is about the Losties learning how to survive on the Island and dividing into two camps: one on the beach and one at the caves.
* Season one: Jake leaves on an undercover mission, and the risk this presents prompts him to finally admit his feelings to Amy. His undercover status is resolved fairly quickly the next season.
* season one: Lester Nygaard and Lorne Malvo spend the whole season diverting the authorities. A year after the case on their crimes closes, they run into each other again in Vegas and kick off a series of events that eventually leads to both of their downfalls.
* Season One: Malcolm Merlyn, the Dark Archer, who handed Oliver his ass every time they fought during that season. Later seasons revealed he was just an
* Season One's "Craving" has an overweight teen named Jodi go on a smoothie diet, only for her to inadvertently use vegetables grown in kryptonite-laden soil. The smoothies instantly reduce her weight by over a hundred pounds — but her newly enhanced metabolism constantly burns calories, making her perpetually hungry. Jodi is reduced to devouring the fattiest foods she can find non-stop, but it isn't enough, and she ends up
* Season one's "Lars and the Cool Kids" has Steven snapping at Lars and calling him out on how much of an ass he is after Lars insults his "weird mom". Steven tells him that his mother saw beauty in everything, including jerks like Lars.
* Season one's passenger, Tulip, is a white girl, while season two's is an
* Season one's "The Second David Job" opens with Nate held at gunpoint by the mark and asking if he's going to kill him

* Season One: The collapsed church beneath the Hellmouth. Doubles as a
* Season one was unusual as there are very few similarities between the two different sets, yet are mentioned to be the same house. The stage-left front door was used more often and shown a few times, and the stairs were upstage in the small hallway the front door was in. In the second set, the stairs were upstage-right in the living room. The kitchens were similar, but seemed to have been inverted, direction-wise. The original kitchen was smaller, but the backdoor is in pretty much the same place. The kitchen can be justified with an actual renovation.
* Seasons 10 and 11 are heavily shaped by this trope, this time with
* seasons 11 and 12 never actually lies to the Blood Gulch Crew, instead using half-truths.
* Seasons 1 through 3 are set in Minnesota, as the opening title cards make abundantly clear. These seasons were filmed in
* Seasons 25 and 26 had a story arc of "the Cartmel Masterplan", implying the Doctor had some great secret. The series was cancelled before this could conclude, but some elements made it into the Virgin New Adventures, which concluded the arc with
* Seasons 2 through the Joel episodes of season 5 would also have eyecatches featuring close-up shots of Gizmonic Institute.
* Seasons 3 and 4 are more action-packed, with darker arc-based storylines. These seasons best evoke
* Seasons 6 and 7 had various intros. The eight season brought back the original opening theme with occasional alterations in some episodes.
* Seasons 7 and 8 are something of a mixture of all the previous seasons, being darker in tone than 5 and 6 but still lighter than 3 and 4.
* Seasons 9 and 10 have Agent Carolina, with Agent Texas serving as the Tritagonist.
* Seasons 9 and 10 have gotten a case of this, specifically season 9. Instead of the usual 25 episodes, these seasons go for 50, with the misses outweighing the hits. Without the 3 month break between seasons like before, the jokes are less thought through and some episodes seem halfhazardly put together. Downplayed with season 10 as, despite similar problems as 9, the season got better and, as it was the last season of the show, it ended on a good note with its 300th episode.
* Seasons as based in weather can be very different and very weird in some parts of the world. The most common cycle besides the European 4-seasons system is a 2-season system, with a wet season and a dry season. This applies primarily to deserts and Southeast Asian countries.
* Season seven's "Field of Fire" has Ezri Dax refer to a bit character as "not the first drunken ensign I've escorted home".
* Season Seven's "Golden Hour" takes place in real time, covering one hour.
* Seasons in the series don't correspond to real life. Each season lasts for years and years on end, with no apparent set length, though it's mentioned that since dragons went extinct over a hundred years ago, summers have been progressively getting shorter and winters longer. At the start of the series, Westeros has been experiencing an unusually long summer (nearly a decade), but many people fear that it's a prelude to an even longer winter to come. Winter officially starts in the epilogue of
* "Seasons In the Sun," a No. 1 pop hit by Terry Jacks from the winter of 1974, is a lamentation of a young man dying and having to say goodbye to loved ones.
* Season six episode "Compromising Positions": The first victim of the killer's career was the man that impregnated his wife. When talking to the wife Reid shows her pictures of male murder victims and, despite Rossi and Hotch's skepticism, she turns on her husband when she sees the photo of the man who fathered her child.
* Season six episode "The Worms Crawl In, The Worms Crawl Out" a murdered professor is discovered to have had many affairs with
* Season six has a guy named Travis, who has a rather close relationship with his sister. A few lingering glances, asking her to stay home from work, and the
* Season six has an interesting variation. The bank Boyd is trying to rob has closed years ago and is now a pizzeria. However, the pizzeria is just a front for

Avery Markham, a notorious gangster, who uses the former bank's vault to store millions of dollars he made in the marijuana trade. Markham employs a group of
* Season six has the gigantic Temple be practically next to the barracks, judging by how quickly Kate and Sawyer can go from it to the latter.
* Season Six is devoted to Emma coming to terms with her duty as the Savior when she learns she is doomed to die in a
* Season Six Jack seems to have taken over Locke's role in this archetype.
* Season six's "Bart vs. Australia" — Bart is trying to get the toilet water to go counterclockwise and repeatedly flushes the toilet. Meanwhile, Homer is in the shower and keeps screaming "Hot-cold-hot-cold-Who's-doing-that?!"
* Seasons Of Fear, and the narrative follows him across the centuries in his efforts to defeat the Doctor and accomplish his goals - including the heartbreak and turn to misanthropy he undergoes along the way.
* "Seasons of Fear" has him undermining an invincible roman for thousands of years while he slowly goes insane from having the Doctor show up at his every moment of triumph to stop him until at the end, he is accidentally thrown back in time and his younger self is horrified and the entire story is rendered moot, the disaster dominoes coming from this being the distortion in time that allows beings made up of the erased possibilities and distortions of the timeline to invade the normal timeline and eventually breaks the universe that started with the first story in the series. Oops.
* Seasons three through five had Director Jenny Shepard and Special Agent Gibbs, who had formerly been lovers.
* Seasons with its season-changing gameplay. Every part of the world map is mapped differently for each of the four seasons. Spring makes big flowers grow that shoot you up cliffs, water dries up and vines grow up walls in the summer, leaves cover pits and mushrooms soften in the fall, and water freezes and snow piles up in the winter. Note that this is all the same land of Holodrum, just with the natural changes that the turning of the seasons would bring naturally (albeit radically accelerated), but from a gameplay perspective it fits the trope.
* Season ten episode "The Witness" has Charlie Senarak go after the man his wife was sleeping with. When he confronts the man, a struggle ensues, and Senarak kills the man. The man's half-brother, anti-government terrorist Mitchell Crossford, blackmails Senarak with this knowledge and tries to frame him for a sarin gas attack.
* Season, the slayers are being supported by donors, and the occasional bank robbery.
* Season Thirteen is focused on the Winchesters trying to teach the Nephilim, Jack, how to exist in the world without threatening it, while protecting him from Heaven and Hell, both of whom want him for their own goals, and hoping to use his power to rescue Mary from the apocalyptic
* season three against Narwhal. She succeeds in bringing them down with the help of Mr. Wrench but dies at the hands of a state trooper when she tries making a move against Emmit. Emmit also manages to avoid paying for his crimes for a majority of the season. After rebuilding his life over the course of five years, he's taken out by Mr. Wrench.
* Season three ends with them relatively evening the score, as Castle calls Beckett out on not talking about
* Season Three features Savitar, who spends most of his screen time bound to the Speed Force. He is so impossibly fast that only speedsters like the Flash can see the wisps of light he leaves behind. He can use the powers of the Philospher's Stone to invade the minds of others and pit the members of Team Flash against one another. Finally,
* Season three has Grace and Simon. Grace's pride is what led to her starting the Apex to begin with because she
* Season three has two of the Canadian drivers from previous seasons come to Alaska to drive on the Dalton Ice Road. One of them has driven trucks most his life but the truck he is driving has an unfamiliar transmission setup and in the beginning he keeps shifting to the wrong gear. Considering they are driving over

steep hills and along winding mountain roads covered in ice, shifting to the wrong gear could cause the truck to lose traction and go off the road. If that happens in the wrong spot, it can be deadly.
* Season Three reveals a lot about the Others, the Island's native inhabitants, and builds towards a confrontation between them and the Losties.
* Season Three starts off with no antagonist excluding Judge Gen, who is so
* Season three's "The San Lorenzo Job" begins with Nate being dragged before a corrupt European dictator and the season's
* Season ticket holders for major league sports teams can have arena giveaway items mailed to them; those with club seats at indoor arenas can have their food brought to them. Many teams also offer early arena entry, priority playoff seating, etc.
* Season Twelve has two main storylines. One is the Winchesters reluctantly working with, and later coming into conflict with, the
* Season twelve's "Tennis the Menace" — Bart turns on the kitchen faucet and Homer (once again in the shower) screams, and to tunes such as "Mary Had a Little Lamb".
* Season two also has Posca marrying Jocasta, courtesy of Atia's arrangements. Jocasta is upset and cries through the ceremony, but they end up becoming one of the most loving couples in the entire show.
* Season Two: Colin's expulsion was truly shocking, not only for the audience but for the other contestants.
* Season two episode "The Grand Experiment" has Sherlock hunting down a
* Season Two Episode Three introduces Reggie, whose missing arm proves that someone can be saved from a zombie bite if the amputation happens quickly enough.
* Season Two follows how all the people of Storybrooke cope with the curse being broken and their memories restored but still being trapped in the real world, which now has magic in it thanks to the machinations of Rumpelstiltskin. And
* Season Two had "Interdimensional Cable 2: Tempting Fate", where the framing narrative is that they watch TV in the waiting room of a hospital. Jerry gets a subplot where he must choose to give his penis to an alien
* Season Two has a running gag of Oz admiring Willow from afar, but the pair keep missing each other. They finally meet at the school's career fair, after their genius IQs land them in a VIP room with waiters and classical music.
* Season two, however, goes back to following the manga, and makes the anime-exclusive parts of season one (certain scenes from episodes 16-17, and everything after)
* Season Two introduces Lieutenant Commander Jet Reno, who mentions that her wife died during the war with the Klingons the previous season. Reno is played by
* Season Two is about finding the Hatch, pushing the button and the psychological effect of it; the Tailies, another group of plane survivors, are introduced.
* Season Two is a protracted inner struggle for Buffy, who can't bring herself to stake Angelus in their first encounter. She ends up having to send him to Hell to stop Acathla when he'd
* Season Two is essentially the same as the first season, save for the fact that they Brothers Winchester are now searching solely for the Yellow-Eyed Demon,
* Season Two: Mike Milligan is a lieutenant for the Kansas City Mafia, sent to assist his boss Joe Bulo with handling the Gearhardt crime family. After Bulo's decapitation, Milligan seizes the reins and wades into a full-scale war with the Gearhardts. After he wins, he seems poised to rise in the organization... which never happens. Milligan's only reward is a tiny office and a 9-to-5 job.
* season two offscreen before the events of season one. Hanzee Dent also double subverts this trope when he adopts a new name and cleans himself from any involvement in the Sioux Falls massacre, only for his new identity to be revealed as one of a mobster who was taken out by Lorne Malvo in the first season.
* Season Two: Slade Wilson, who was as skilled as Malcolm (if not more so) but was also empowered by the Mirakuru, which enhanced his speed and strength on top of driving him insane. Slade wished to destroy Star(ling) city as revenge for Oliver's role in Shado's death.

* Season Two: The factory for The Anointed One/Spike, and Crawford Street mansion for Angelus.
* Season two: Wuntch manages to get Holt transferred. This one takes a few episodes of season three to resolve.
* Season VIII ends with a sci-fi cliffhanger involving Rimmer kicking Death in the groin with the rest of his cast members are in a mirror universe, while the ship was being eaten slowly by a genetically engineered virus.
* Seastian Thor, one of the God Emperor's many saints, has the distinction of being one of the few examples of a
* Seastone chains Law all over the island, through multiple battles, until they finally get the key and Law can (somewhat) participate again.
* Sea Stories: Any story taking place with the ocean as its primary setting.
* Sea survival food rations. There's actually a practical reason why survival rations taste so bland: to ensure that you would only eat if you're actually starving.
* sea; that doesn't include all the water from streams and rivers that's continually flowing into it, so unless someone found a way to stop up all of those or separate their flows, he couldn't reasonably go through with his end of the deal.
* Seath the Scaleless is blind and immobile, only capable of pivoting on the spot, and has a huge blind spot that none of his attacks can reach on his left flank.
* Seath the Scaleless made a whole bunch of crystal golems. They have the apparent ability to create new crystal out of nothing, though it only lasts for about a second (still just long enough for them to form a giant mace and smash your skull in with it).
* Seattle area? The Tacoma Dome Holiday and Gift show, which takes place in mid-to-late October.
* Seattle are just as famous for their rapid-fire puns in their menu and advertising (company slogan "Keep Clam") as they are for the chowder. Such a tradition traces back to their company founder who crammed everything from his ad copy to his protest letters to City Hall with as many puns as he could manage.
* Seattle has a section designed for rummage sales, and another section for itinerant vendors ("day stalls"). The labyrinthine architecture of the Market also lends itself to having shops and stores that are easy to miss, especially in the "Down Under" section that specializes in curios.
* Seattle inverted this with a sort of Bottom Ten: "The Lame List, or what's weak this week!"
* Seattle, leading to a number of coffee brands with politics expressly positioned to the right of Black Rifle Coffee.
* Seattle Mariners baseball team, after the Mariner Moose had a nightmare about being replaced by a latte mascot, Jamie Moyer blames it on the nachos he ate before bed.
* Seattle Mariners baseball team, star player Edgar Martínez attached a Clapper to the stadium lights so that he could quickly turn them on and off for late-night practices. Predictably, this causes problems when the fans applaud at the game the next day.
* Seattle Mariners commercials liked to portray bald right fielder Jay Buhner this way, as a leader figure who's baldness makes him more imposing. However, that didn't stop his baldness from also being used as a joke from time to time. One ad had him distracting opposing players with sunlight reflected off his bald head.
* Seattle Mariners wore blue and gold, just as the former Seattle Pilots did.
* Seattle megachurch pastor Mark Driscoll and evangelical leader Al Mohler both
* Seattle or paint humorous political slogans on their backs (or elsewhere). The police used to try and arrest people for doing this, but so many were going for it (and it became such a tradition) that SPD no longer bothers.
* Seattle, sabotage to the fire alarm, broken elevators, several chandeliers being ripped down, and damage to the lobby artwork that reached five figures. It took almost twenty years for Bellevue to host another sci-fi convention.
* Seattle's Ballard Bridge has a pair of fenced-off stairways to nowhere on its

south end, near the Fisherman's Terminal. It is unknown whether they were actually used for anything.
* Seattle's Bumbershoot festival has become ridiculously expensive in recent years, with single-day tickets being $45 at the gate, and for the gold pass, prepare to shell out $300. Then there's the concessions and other fees inside.
* Seattle Seahawks do so, went to a press conference and answered every question with "I'm just here so I don't get fined."
* Seattle Seahawks, was once considered one of the more entertaining professional athletes to follow on social media. However, in the wake of the Orlando nightclub shooting in 2016, he was harassed by a number of homophobic Twitter users who chose to defend the shooter. Ryan was so disgusted by this that he withdrew from social media completely.
* Seattle Space Needle celebrated its fiftieth anniversary in 2012. As part of the celebration, the whole thing was painted the "only in the 60's" shade of "Galaxy Gold" paint that it was during the 1962 World's Fair.
* Seattle tolerance. So while Denny was plastered, Maynard started talking real estate. Denny recovered (and sobered up) to realize too late he had "paid" for Doc's services with what is now Pioneer Square!
* Seattle to live with her new boyfriend, a photographer named Ben Saunders. Diana is immediately charmed by Ben and tells April that he is a keeper. That night, Maia can't sleep because she had a vision that their family was going to grow. She tells Diana that she saw her in a wedding dress and that Ben was the groom. Diana is convinced that Maia is mistaken, in spite of her track record. The next time that she sees Ben, she tells him about Maia's vision so that they can avoid each other. However, Ben instead breaks up with April and he gently persuades Diana to admit that she is attracted to him. Several days later, they have a chance encounter at a supermarket which turns into a date of sorts. Ben kisses Diana goodbye. The next day, she goes to Ben's photography exhibit. Diana has decided to take a chance on him and they once again kiss. When she returns home, she tells April that she was working late but Maia can tell that she is lying. In "Terrible Swift Sword", Maia tells April the truth as she thought that it would make her feel better. It doesn't. April is devastated and later confides in Diana that she saw Ben as her one chance at a healthy, long-term relationship. She becomes depressed and calls herself a loser for always hooking up with the wrong type of guy (bar Ben).
* Seattle Vice(not the later intermission), audience members were invited to come onstage and dance with the cast.
* Seattle won the presidency, he used that space for a cheer celebrating Obama's victory.
* "Sea Tunt Part II" has Archer tickling Ray to get him to admit that he gave him mouth-to-mouth.
* Sea turtles' sexes are determined largely by the temperature the eggs are kept at. If the eggs are laid in a slightly warmer nest (say, one that gets direct sunlight on the beach), more female turtles will be produced. Cooler nests (say, one that is in the shade, further up the beach) produce males.
* Sea urchins have teeth arranged in a ring on their undersides, although they're blunt grinding teeth rather than pointed.
* seaweed possessing living seaweed fronds that binds itself to oceanic debris for form.
* Seaweed the Otter is depicted with seaweed in her paws, as if she were eating it. Sea otters eat largely eat marine invertebrates and fish. While sea otters do sometimes wrap themselves in seaweed, the purpose is to anchor themselves while they sleep.
* Sea-Wing is a submersible ambush jet fighter. Note that it can only attack air units while in the water and surface targets while airborne.
* Seawise Giant are physically possible to be built, but they would be too impractical and uneconomical to use.
* Seawise Giant floating liquified natural gas facility—a ship that serves as combination of a drilling rig and a refinery for natural gas. It measures 1,600 feet long and displaces 600,000 tons, and is capable of processing enough natural

gas in a year to power a city the size of Hong Kong.
* Seawitch the witches enter battle wearing nothing but very skimpy two-piece chainmail bikinis.
* Sea Wolf Roegadyn take the given name of their father as their surname, followed by a suffix denoting their gender: "-syn" for men and "-wyn" for women (Merlwyb Bloefhiswyn, for instance, can be read as "Merlwyb, Daughter of Bloefhis").
* Seawolf: SSN-21 fighting a naval campaign against Russia. Nuclear escalation doesn't occur until the final mission, and it occurs only if the player fails to destroy the enemy boomers.
* SeaWorld about the tribulations of captive orcas, which in turn led SeaWorld to start phasing out their famous Shamu shows due to both animal and human welfare concerns.
* SeaWorld, an entire land centered around penguins; which includes both a ride and a penguin exhibit.
* SeaWorld celebrated the 50th anniversary of its brand in 2014 across all three parks, by doing things such as bringing in new street entertainment.
* SeaWorld documentary released in 2020, elaborated upon this controversy, telling the story of how former Marineland trainer Phil Demers chronicled all the animal abuse that happened in the park.
* SeaWorld documentary that only worsened said controversy. Things have gotten slightly better following SeaWorld announcing the termination of the orca breeding programs, but some grievances still remain.
* SeaWorld has either the horror-oriented Howl-O-Scream, or the Halloween Spooktacular, which is a family-friendly event similar to what Disney has.
* SeaWorld parks. The original Shamu first appeared at SeaWorld San Diego in 1965. After her death in 1971, the name was given to multiple successors over time.
* Sea World released PR ads after they finally decided to end their orca breeding program, highlighting that they can't release their orcas into the wild because they wouldn't survive, but that they're phasing out performances and that this will be their last captive generation of orcas. They cite "changing times" and people's changing attitudes toward orcas, though really it was because ticket sales had plummeted after the tell-all documentary Black Fish was released.
* SeaWorld, that took travelers into the Bermuda Triangle and showed an image of the USS Cyclops (lost in the Triangle in 1918).
* Sea World where an orca attacked another orca during a show. The pictures are horrifying.
* Sebaceans are genetically engineered descendants of Ancient Astronauts
* Sebaceans look exactly like humans, but can't regulate their body temperature, when overheated they suffer from "heat delirium" including short-term memory loss and culminating in an irreversible coma, they also have a single "paraphoral nerve" instead of kidneys, and when pregnant can hold an embryo in stasis for up to seven years.
* Sebas, meant to serve as The Great Tomb of Nazarick's and its leader's last line of defense if the guardians failed.
* Sebastián Yatra isn’t a one-hit wonder, but his 2018 hit “Por Perro” features
* Sebastian. Almost always dressed in a snappy tail coat, and able to end someone's existence in several different ways. And the shinigamis, who wear it as their uniform.
* Sebastian and Anders himself can NEVER be on the same side. Either Anders dies, or Sebastian threatens to raze Kirkwall.
* Sebastian "Brother" Blood is an alderman who champions the lower classes and is popular enough to run for mayor with a good chance of winning. He's also a
* Sebastian Castellanos wears a long trench coat for the opening segment of
* Sebastian Darke: Prince of Fools, the evil King Septimus falls to his death from one of his castle towers.
* Sebastian freaks out upon discovering that Daigo has murdered two people. Fesxis 'helpfully' clarifies that it's only
* Sebastian gives Sieglinde lessons on how to act like a lady in Chapter 107

including teaching her how to curtsy.
* Sebastian has had plenty of moments where he gets one hell of a kick off of the suffering of his victims (particularly Grell) but he isn't sadistic 24/7. He can be somewhat caring when it comes to Ciel.
* Sebastian Hawkins was taught how to raise undead spirits prior to the story, and uses his powers to send several undead pirates to attack the protagonists.
* Sebastian himself "did it". The one who did the tricking? Another butler.
* Sebastian is a devilishly good looking man but he's also a demon and a cold, amoral one at that.
* Sebastian is a troubled loner who lives in his parents' basement. He doesn't get along with his stepfather Demetrius or his half-sister Maru. He smokes heavily and seems to have depression and social anxiety. If he moves in with the Farmer, he goes a good way to kicking his habit and his relationship with his mother Robin improves, though he is still estranged from Demetrius and Maru.
* Sebastian/Jonathan had these at birth. Jocelyn was so repulsed by him she refused to care for him.
* Sebastian Maniscalco once gave a hypothetical situation about the "poor bastard" who breaks into one of his friend's house, unaware that the owner is not only ex-military, but keeps a
* Sebastian Morgenstern are much stronger and faster than other shadowhunters.
* Sebastian's backstory) and comedic arc where the Capricorn Pirates look for a chef to join their crew.
* Sebastian Shaw and Emma Frost; his term of endearment for her is "love," and he calls her "the most exquisite thing I've ever seen in my life." There's also this line:
* Sebastian Shaw bursts into laughter and shouts stuff like "Wonderful!" and "Excellent!" when Erik Lehnsherr as a boy slaughters all of Shaw's men and trashes his office. Later, they meet when Erik is an adult, and Shaw honestly compliments him on how powerful he has become, even calling him his son.
* Sebastian Shaw. Later, he tells Xavier that he wants him by his side in the cause, but Xavier refuses.
* Sebastian Shaw, whose energy-absorbing powers keep him young... somehow.
* Sebastian's superpower also comes with an eldritch spirit that serves as his
* Sebastian sum just about everything that happened during the murder mystery arc and how it was to the Wordsmith Arther.
* Sebastian the Inquisitor and Mr. Morden are the best examples because the aliens they stayed with were far more "alien" to humans than Minbari were.
* Sebastian used to like Jae, a lesbian, though his feelings for her faded over time in a way that was unrelated to her sexuality. Jae, in turn, has a crush on Ivy, who for the moment seems to be straight.
* Sebastian Vettel grew up idolizing the legendary fellow German F1 driver Michael Schumacher. There is
* Sebas Tian who unlike the rest of his guardians, are not hostile to those considered weaker than themselves and are more often then not friendly to others, unless provoked. Sebas in fact is one of the few denizens of Nazarick with a Good Alignment, and Cocytus is the only Floor Guardian who does not have an Evil Alignment (his is Neutral on the side of Good).
* Sebastian will say, "A Phantomhive butler who can't [insert X task — usually an improbable one — here] isn't worth his salt." and "I am simply one
* Sebastien Loeb lost the 2005 Rally GB on purpose out of respect for
* secede from the Confederacy and go it alone as an independent country.
* Sechs Auf Einen Streich - a German series of fairytale adaptations which airs a new season every year during Christmastime. Has been running since 2007.
* Sechs taking on the Jovian seeded team by him/herself and putting up a fight (the first form of said "team" was about 500 meters wide, and got larger), Zazie and her relatively weak body (and
* Sechs was born/created less than two years before kicking major arse all around Jeru.
* SecNav contributed to her getting her position, but she doesn't like or accept

this.
* Second, a country can happily extradite you to another country even if the two don't actually have a treaty; treaties just make things easier and codified, and a government will extradite you anywhere if they feel it's in their interests to do so.
* Second Act: begins after 25% of the story has been told. Starts piling on the problems. Typically a story has been raising questions. At about 50% it begins to answer them.
* Second-Act Breakup breaks up in the middle of the story after a misunderstanding or some other kind of conflict.
* Second-Act Breakup, it is Moe, not Dani, that performs the grand romantic gesture that reconciles them.
* Second-Act Breakup temporarily breaks up in the middle of the story.
* Second addendum: the partner who is in love will demand fidelity from the other partner.
* Second, almost all of the named locations in the story have a name like, "Sparkle Slope" or, "Dangerous Drop".
* Second and worse, it's the rule to determine if a series is eligible to enter the contest or not. To summarize, at least 50% of your running time must have been between last year's July and the current year's June. In theory, it's to avoid having the same girls every year. However, in practice it means that girls from
* second anime series onwards, Lupin III and his associates go globetrotting.
* Second antagonists. The Jem'Hadar First is visibly angry that Sisko doesn't discipline Worf in this manner.
* Second Apocalypse a few epic battle sequences of holy wars, focusing on the gallantry, horror and ecstasy of zealous warriors slaughtering for their gods.
* Second Apocalypse. All births were stillborn while Mog-Pharau lived.
* Second Apocalypse, and almost slips from the ramparts. Kellhus finds himself "puzzled by a sudden shortness of breath. The fall would have been fatal."
* Second Apocalypse and even modify themselves so that they can use the natives' sorcery.
* Second Apocalypse and forget most of their lives. Those among them called Erratics can only remember something if it's associated with pain and suffering. They're driven to kill everything they love so that they can lock it in their minds.
* Second Apocalypse and magic to act as perfect spies and assassins. Their faces are made of "fingers" that can rearrange themselves to imitate any face. They're also superhumanly fast and strong.
* Second Apocalypse: As Aspect-Emperor, Kellhus wears two demon heads hanging from his girdle, which his followers call the Decapitants. The heads are still fully intact, and their expressions are always mindlessly animating.
* Second Apocalypse books are major stoics, literally. They were heavily based on the ideas of Greek Stoicism and the concept of the Sage. This contrasts with the Cishaurim, whose powers are derived from passion.
* Second Apocalypse, but has since been lost. It's implied to be some sort of energy beam weapon.
* Second Apocalypse character suffers the Circumfixion, in which he is lashed to a ring and hung upside down from a tree. Like Christianity's crucifix, the circumfix subsequently becomes a religious symbol.
* Second Apocalypse Cnaiur or if Moenghus is simply so masterful at manipulation that he is able to seduce a straight man in spite of extreme cultural bias against it.
* Second Apocalypse: Drusas Achamian, a sorcerer, and Krijates Xinemus, a marshal, bare a striking resemblance to each other, to the point that one of Xinemus's men could easily mistake Achamian for his superior officer. Achamian and Xinemus are old friends, having both served as tutors to Prince Nersei Proyas. They are also somewhat foils for one another.
* Second Apocalypse father's strength, speed and intellect. However, when he attacks a fellow Dunyain descendant, Maithanet, he gets his face crushed in,

causing Maithanet to sneer that he had "his mother's bones."
* Second Apocalypse has the Consult, a conspiracy of great sorcerers and generals who were persuaded to take the side of the Inchoroi against the Nonmen during the first Apocalypse. After their initial failure, they spent the next four thousand years lying low, waiting for their next opportunity.
* Second Apocalypse has the Mandate, a school of sorcery committed to preventing the second apocalypse. Because their ancient enemy is so long forgotten that it is considered a myth, the Mandate are something of a joke among the sorcerous schools, but then again they're the only ones who still know Gnostic magic, which is far more powerful than the Anagogic magic of the other schools.
* Second Apocalypse has the strategy board game of Benjuka, in which the rules are changed by the moves players make. Players frequently reference how the changing rules of Benjuka mirrors the complexity of real life.
* Second Apocalypse have very bright glowing eyes (and mouth) when they sing their spells. In cases where extreme power is invoked this extends to a whole-body glow.
* Second Apocalypse includes a map of Earwa, the continent upon which all the action takes place.
* Second Apocalypse. In one sequence, he recalls as a child being unable to comprehend how others were moved by the invisible strings of emotions and empathy.
* Second Apocalypse"). It's left ambiguous as to whether he completely lost his sanity or was actually channeling the god of war.
* Second Apocalypse, Kellhus discovers a "golden coffer" in Dagliash, set there as a trap. It even has a digital countdown, which bystanders see as animated symbols of light. It explodes in a mushroom cloud, killing a large portion of the army and inflicting radiation poisoning on another large portion.
* Second Apocalypse, literally no creature could be born living. No one knows what it looks like or what it even is. It is sealed in an enormous floating black obelisk in the center of a furious whirlwind. Needless to say, those who believe the stories of the Apocalypse are very keen on preventing it from being resurrected.
* Second Apocalypse more than his religious claims. Anyone who can kick that much ass is worthy of complete devotion.
* Second Apocalypse: One character has been raised by a sect of monks dedicated to pure logic. Among other things, he can read people's emotions and thoughts in their faces and can manipulate people to a high degree. Being a fantasy series, there are prophecies, but it is unclear if they really mean anything.
* Second Apocalypse. One of them saves Mimara's life twice, at great sacrifice to itself. She has no idea why it does so, whether it somehow gained a conscience or is just a tool for some deeper game the Consult is playing.
* Second Apocalypse only tangentially connected to the main plot of the Holy War, but played very straight in the second trilogy.
* Second Apocalypse, Sarl of the mercenary Skin Eaters company suffers a psychological break during a particularly brutal campaign. He becomes prone to cackling and shouting, "The slog of slogs, boys!" over the following weeks.
* Second Apocalypse-scalpers. Achamian quickly identifies him as one of those sort who begrudge every word. When Achamian tries to negotiate with him, Kosoter's sergeant Sarl pointedly speaks for him. Whenever Kosoter interjects in any circumstance, there's a palpable moment of panic from his men.
* Second Apocalypse scalps to turn in for an Imperial reward. They're considered quite unsavory, but they're helping wage a war of extermination for the survival of humanity.
* Second Apocalypse series have adhered to a breeding program for thousands of years to give them nearly superhuman mental and physical abilities. Their genes have become so exaggerated that they only rarely breed true. Insane or deformed children are traditionally discarded.
* Second Apocalypse: Serwe is almost superhumanly beautiful and is the least intelligent person in the series, falling utterly for Kellhus's manipulations without a moment's resistance.
* Second Apocalypse: Some people in the Scarlet Spires school of sorcery are

practiced in demon summoning. This is the only part of sorcery that the Scarlet Spires has over the Mandate's superior Gnostic sorcery. Iyokus is specialized in demon summoning. He admits that he's been curious for quite a while about how his summoning magic would stack up against a Mandate sorcerer.
* Second Apocalypse, the five tribes of man all have very specific physical traits that are rarely, if ever, deviated from: the Norsirai are pale, blond and blue-eyed; the Scylvendi have black hair and blue eyes; the Ketyai have dark hair, skin and eyes; and the Sotyothi are black-skinned and green-eyed.
* Second Apocalypse, the Holy War has very clear parallels to the Crusades, with the Inrithi as the Christians, the Fanim as the Muslims, and the holy city of Shimeh as Jerusalem.
* Second Apocalypse, the Inchoroi are an interstellar race of aliens who have mastered organic engineering, which they call Tekne. Calling themselves "a race of lovers", they've spent the last few eons pursuing depravities of the flesh. When they land on Earwa, a planet of sorcery, they modify themselves to be able to wield sorcery as well.
* Second Apocalypse: the Nonmen accepted immortality from the Inchoroi, but did not realize that their mortal brains would not be able to handle it. Thousands of years later, they all have a certain level of amnesia. Some of their number, called Erratics, have learned that they can only lock painful memories in their minds, so they go about murdering everyone they hold dear just so they can remember that the people existed at all.
* Second Apocalypse: the Nonmen, in their flawless, alien beauty, already tower over most humans. A certain number of them, simply called the Tall, tower over normal Nonmen. It's not clear how or why they came to be Tall, or exactly how tall they are, but they are big enough to make a normal Nonman look like a "statuette" and have skulls as large as a man's torso.
* Second Apocalypse: The one-eyed member of the Mutilated is instantly reduced to a "mucous rain" after mouthing off to Ajokli.
* Second Apocalypse: The price of joining the sorcerous school of the Mandate and gaining access to its founder's supercharged magic called the Gnosis is that all members have nightmares of the Apocalypse through the memories of its founder as a nightly reminder to prepare for the prophesied Second Apocalypse.
* Second Apocalypse. The two races eventually came to blows using their respective weapons, though a splinter sect of Nonmen did eventually teach the Inchoroi how to use sorcery as well.
* Second Apocalypse: The villains of the series are the Inchoroi, a race of intergalactic sex fiends who have mastery over organic technology. Opposing them in the modern age are the Inrithi, a culture of humans who are known for using heavy metal armor and weaponry in warfare.
* Second Apocalypse: users of magic who do not belong to a school of sorcery are called wizards. The schools kill them wherever they find them, so they tend to have very short lives.
* Second Apocalypse. When Esmenet is about to get stoned by some ignorant villagers, she's rescued by a dashing holy knight called Sarcellus. However, it turns out that Sarcellus is not at all what he appears to be.
* second appearance (in the Dalek Book) they were shown flying with transpolar discs.
* Second are Jump Gates and Jump Holes between systems. Jump Gates and Holes form the basis of interstellar faster-than-light travel in
* secondaries exists over whether or not her sniper and/or Medic abilities are under or over powered, and is a heated point of contention amongst the DB community; however, it's generally agreed upon that Sparks + another Medic make an amazing combo.
* Secondary Adaptation: The adaptation is given an adaptation of its own.
* Secondary character Erika was an amnesiac girl who barely remembered her name. She felt an odd, devastating inner emptiness, but in spite of it she thought she was a normal girl. And then
* Secondary characters also face this like Dragoon, Onion Kid (an in-series

newspaper suggested his named was "Rex Crockett," but
* Secondary Character Title (Caesar's only in three scenes; the protagonist is Brutus)
* Secondary Character Title, specifically those that deal with historical monarchs and rulers. Because of the Elizabethan era's rigid social hierarchy, characters of higher social status had to set themselves apart from the commoners by speaking in verse, and plays always had to be named for the character of the highest social ranking—even if they weren't actually the protagonist. For example:
* Secondary Color Nemesis: As a flipside to the heroes' primary colors, villains come in hues of green, purple, and orange.
* Secondary Color Nemesis: Secondary colors, like green and purple, are often associated with villains.
* Secondary Color Nemesis: Villains tend to have colors such as purple and green.
* Secondary Fire the target from firing, and can be used against any target.
* Secondary Sexual Characteristics: Elements of a creature's physiology that result from it being male or female.
* second, as a desperate last move grabbed a guy and forced his arm through the bars for Kitty to maul. She wasn't tempted.
* second attempt. On his first try he for some reason went with, "I love cake."
* Second Avenue Line to be a serious plus for buying a new apartment on the Upper East Side in Season 6 (1968). The Second Avenue Line only broke ground in 2007 and had its first stretch of three stations open in 2017, with most of the planned line still not anywhere close to completion as of 2020.
* Second Barrage speak English, i.e. Chaka to Revy). One wonders why they didn't just preserve the Japanese characters' Japanese audio through the entire arc.
* second best Pokryshkin also had the habit of "giving out" his victories to his wingmen and other younger pilots in his regiment in later years of WWII, as attested in their memoirs. It's thought that his real kill count is somewhere in the vicinity of ~120 victories. It should also be taken into account that unlike Hartmann with his "noob farming" tactics, the Soviets concentrated on fulfilling objectives and going for the head, that is, for the most skilled pilots, and Pokryshkin was widely described to be excellent at both.
* "Second Birth" by Obsidian Shell starts with "So cold... am I dying?"
* Second Bloom is not very social, is very good at art, loves bright colors, has a lisp, and is a little slow, but since this is the shinobi world, they don't identify it.
* second book. Eddie has been detained on suspicion of drug smuggling (of which he is, in fact, guilty). After a lengthy interrogation, he threatens to get his lawyer involved. One of the interrogators invokes the trope directly. Eddie inverts it by admitting that he doesn't currently have a lawyer but will be retaining one as soon as he's released.
* second book, he puts into motion the events of the rest of the series. Dumbledore was able to work backwards and figure out everything he didn’t know (that he’d made them in his young adult years, they were objects based around the Hogwarts founders, and since he’s not deaf that there were more) to ultimately take him down. When Ginny uses the diary to open the Chamber of Secrets, it also let them get basilisk venom which is one of the few things that can destroy horcuxes.
* Second Book of Bricks was bad, just that it was an awful song. This got the reply "I wrote it."
* Second, by Cate's own logic, little girls "aren't typically" slobs. So she's even acknowledging that there are little girls who
* Second case of the second game. A murder in which only two people are in a locked room that had witnesses standing in front of it. One of those people is murdered and the witnesses break into the room seconds later to find one of the people dead and the other wielding a pistol.
* Second Chance (1977) had the same type of board but used devils instead of Whammies.
* Second Chance (2016), and part of the reason Mary is willing to go so far to

fight her cancer is that she knows he'll shut down completely without her.
* Second Chance (2016): Arthur, a basic assistant intelligence Otto created. He controls their house, but little outside it.
* Second Chance (2016): Mary for her twin brother Otto. It's public knowledge that Otto is behind the technology of Looking Glass, but Mary is the CEO of the company.
* Second Chance (2016) than his own son, a 40-something single father of a teenage girl.
* Second Chance away from the "predicted" date. They also correctly predicted that Gaddafi would die from multiple gunshot wounds, although given that he was a dictator, that had a high chance of being true regardless.
* Second Chance Cat Mysteries for a one-room cabin that she and her college roommate lived in for their last year of college, and finally used the cabin as a down payment on her house.
* Second Chance Cat Mysteries" (with Mr. P. as their Bosley), and are surprisingly good at it. Neither Sarah (who tries to keep out of their detecting but winds up their "Charlie") or Charlotte's son Nick are exactly thrilled by this (in fact, Nick continually tells them to stay out of police business and asks Sarah to help shut them down), but the trio and Mr. P. just ignore anyone who tells them to stop. By the events of book 3, Nick's given up on trying, especially after he finds out Mr. P. has officially and legally become a registered private investigator.
* Second Chance. Even though it ran three years, it still has a following to this day.
* Second Chance has a man dying in a crash in 2011 and finding he's "not good enough for Heaven but not bad enough for Hell." To decide his eternal fate, he's sent back in time to 1987 and trying to keep his younger self from some major mistakes.
* Second Chances by d.notive. Basically, the whole album is about a police detective who accidentally travelled 30 years back in time and is going to use the opportunity to hunt down and prevent the maniac from murdering his younger sister this time. And this song clearly states his intentions regarding the man he's after, literally qouting the trope.
* "Second Chances" had 2 straight, 1 subversion, 1 aversion - It looked like Pat Monaghan from Train was the killer - it was his car that ran over the vic.
* Second Chances Series and the fic series deal with the aftermath of it.
* Second Chance taped three pilots in November 1976, which led to a short-lived run in 1977. The most notable difference is that there were no ways to get extra spins.
* "Second Chance": The alien tells a retired physicist that an asteroid is going to hit his home planet of Empyria. When the physicist asks him when the collision will occur, the alien says "In your time scale, 82 years".
* second chapter in the series features the Makron in the final level. While a fairly challenging boss in its own right, able to rapidly shoot its railgun and fire BFG blasts with impunity, any savvy players will have stockpiled a few quad damage and invulnerability bonuses. The game predicts this and strips your inventory of invulnerability bonuses before the fight, but it doesn't extend this to quad damages. Activate one, bring out the hyperblaster or chaingun, and the Makron doesn't stand a chance.
* Second Chronicles of Thomas Covenant, to speak, though even then he mostly just expresses quiet satisfaction that he's finally getting to do what he was built to do).
* Second Coming Attractions. Needless to say, he's ambivalent about telling anyone that he and his (unmarried) girlfriend are expecting a child.
* Second Coming: Benevolent being returns to change the world for the better.
* Second Coming is likened to this trope, particularly in the Parable of the Ten Virgins in Matthew chapter 25, who all waited at night for the Bridegroom to come to take them to the wedding feast, but only five of them were wise enough to bring oil with their lamps while the other five had to go and buy oil for themselves, thus costing them their opportunity to be part of the wedding feast.
* Second Coming, it is revealed that Jesus's message from the events of the New Testament have become nearly unrecognizable to due to the two-thousand years of

hearsay and political tampering, barely recognizing it when he finds a copy of it.
* Second Coming of Jesus Christ, as they consider the first major outpouring of the Spirit to be the "former rain".
* Second Coming, while discovering just how twisted his followers have become teaches him that humans aren't exactly perfect either.
* second commercial has the same boy walking downstairs as his grandparents are in the closet putting away some stuff that had fallen. He overhears them and then sees their wrinkled clothes and assuming the worst, runs away in fear. Later, he sees his grandparents coming out of the closet, but noticing their clothes are unwrinkled, assumes it was innocent. After he leaves, however, his grandfather winks at his grandmother, who giggles, implying it something more happened.
* second commercial, he mockingly plays with the toes of his dead victims while doing the "This little piggy..." tune.
* second Company did arm their ships defensively, but actually fighting wars was the province of the Royal Navy (though they did admittedly have a lot of pull with the government to get the Royal Navy to go where they wanted.)
* second company to use the trademarked line (after buying the trademark from the now defunct LifeCall.
* Second, courts are very privy to the concept of a sham marriage and will not accept a marriage which owes its entire existence to preventing one party or the other from testifying. In any event, getting married won't extend the privilege to conversations between the parties
* Second Cousin Odeon shifts everything upwards — instead of a antenna with a red ball on top of his head, he's got a long yellow neck and a red ball for a
* Second Cousin Slip looks exactly like the Dashing Prince, save for the fact that he's
* second cousins (which is what they were) Royal House in Europe is descended from them—usually many times over.
* Second, Dan Marino holds or has held almost every major NFL passing record, but only won the AFC Championship once in 1984 (his second season), and like McNabb he lost his only Super Bowl. His 8-10, .444 record in the postseason is the worst winning percentage of any QB with more than ten playoff appearances.
* second daughter Drizella, whom she thinks doesn't remember or love her.
* Second Dream quest, it springs back to life and rips the sword in half, forcing the Stalker to retreat.
* second Dr. Light, Kimiyo Hoshi. It was stated that Kimiyo's father had developed the Doctor Light suit with Finlay, before Arthur Light stole it in the first place.
* Second drummer Alan White quit music entirely after leaving the band, outside of a one-off gig with his brother Steve's band in 2008. Little has been heard from him since.
* Second, Dudley was the judge. Even if a serving police officer could act as a judge, there is no way the arresting police officer would be assigned to said case. And this wasn't the only potential conflict of interest in the participants in the court. The prosecutor was Inspector Fenwick, who was directly involved in the arrest, and was also the judge's immediate superior and the defense attorney's father. The judge had been openly courting the defense attorney for years. And the defense attorney was one of the regular victims of her client's crimes. Basically you have sufficient conflict of interest to draw the validity of the verdict into question by allowing any two of them to participate in the same trial.
* Second edition 40k had different rules for armor saves, with base armor and save modifiers. This means that the
* Second edition actually gave stats and experience point recommendations for depicting infants in several species, up to and including humanoids like orcs.
* Second Edition also had a suit of armor called the Black Prison. Crafted by a Demon Prince, it's incredibly powerful and makes the wearer no longer need to eat, sleep, or even breathe once they put it on. However, due to having been crafted by a Demon Prince it's also cursed- once donned it can't be removed as long as the wearer lives and and eventually it drives its wearer permanently insane, causing them to go on a murderous rampage until they're eventually killed. Oh, and just in

case someone had the bright idea of removing it by letting themselves be killed then raised from the dead? When you die in it your soul is automatically sent to the Demon Prince who crafted the armor, and he's not going to give back any souls he gets.
* Second Edition introduced a spell called Solipsism, which can create illusory objects that behave exactly like real ones — but only if you believe they are real. If you don't believe in it, you'll fall right through that bridge the cleric conjured. This is loosely based around the (
* Second Edition, its own product, makes everyone at least able to have a viable chance to attack an enemy with weapons. Additionally, Second Edition buffs cantrips to make them completely viable attacks. Coupled with how most full casters become Legendary in their attack proficiency, these cantrips become nearly as good as a tricked-out fighter's sword.
* Second Empire, Anzollo engages the Imperial Fleet in space, all the way knowing he can't hope to win against the vast invading army. He still racks kill after kill and delays them long enough to allow Xenol to finish putting Ziragalen's main fortress on full lockdown and preparing for the assault.
* Second Empire; Anzollo, knowing the Millennium Thargon has no hope of outrunning the attacking Dalek saucers, instead blows the gravity lenses of the Thargon to release a crippling gravity wave, which succeeds in tearing apart many of his pursuers.
* Second Empire commander fails to notice he's been led into a narrow gorge (filled with remote mines and snipers above) in his idiotic attempt to destroy the enemy leader personally.
* Second Empire for the whole space trip from Skaro to Ziragalen. "Daleks are nothing if not patient..." clearly doesn't apply to him.
* Second Empire, Grexzol uses this via his casing's antigravity projectors to utterly massacre a group of enemy Daleks.
* Second Empire of the Second Dalek Empire going against the slightly more evil First Dalek Empire.
* Second Empire to find his old platoon in its entirety had waited for the death of its last member to march into whatever afterlife awaits the Daleks. After a quick reprimand from his old officer, he's shunted into position, and the platoon marches into the light to the beat of his doddering chatter.
* Second Episode Introduction: An important character in the series who doesn't make their first appearance until the second episode or installment.
* Second Episode Introduction important but simply couldn't fit into the premiere debuts in the second episode.
* second episode, Jeff Davis and Chip Esten get into one of these while singing that little-known jazz ballad "Dust Storm". Near the end, Jeff puts his hand over Chip's mouth, then Chip grabs Jeff's microphone and sings the last line into two mics at once.
* Second Episode Morning: A character has to deal with the strange events that happened in the first episode.
* second episode of Michael Mann's short-lived TV series 'Crime Story' featured a paranoid schizophrenic serial killer who believed that he could send signals to aliens in outer space by, among other things, wearing TV antenna wire. The first scene of this episode shows the killer walking into a hair salon and asking "What's the frequency?" before killing the patrons
* second episode of the series and are generally considered the most stable couple of the show.
* second episode physical items are a sign of opulence. The everyday man can only purchase digital goods for his virtual avatar and the food is all grown in a lab. When the main character manages to become a famous TV star he splashes out and buys a real wooden penguin.
* second episode series, complete with actual importance to the story.
* Second Episode Substitute: A character featured in the pilot is replaced by a similar character for the rest of the series' run.
* second episode. To be fair, Arcueid's opponents use their supernatural powers as

well.
* Second Espada Baraggan Louisenbairn is the physically oldest-looking and one of the most powerful members of Aizen's Arrancar army. When Aizen and his cohorts are trapped by Yamamoto's fire during the assault on the fake Karakura Town, Baraggan takes command without any objects from his fellows (including the
* Second, even as Terumi simply created a new version of his arch-enemy Hakumen via fusing with his body to form his original-self in the flesh (who was actually a god that hated his parallel so much that he essentially ended up being evil), eventually everyone gets wise to his hate dependency, and manage to kill the bastard once and for all by shifting mankind's perception of him from a villain into a hero, thus robbing him of his power source and rendering him vulnerable.
* Second, fan fic shouldn't happen where he could see it. This would prevent anyone from claiming that he used any of their ideas in a later
* second felt they should separate and divorce. Well, everyone said she was an expy of Maris...
* second film. A few people mentioned that the monster had horrible breath, but after it roars in Captain Jack Sparrow's face, he simply shudders and mutters, "Not so bad."
* second film, Aladdin steals the ill-gotten loot of Abis Mal and rains it down all over Agrabah, which Abu objects to. He tells the monkey that the poor people need the treasure more than they do.
* second film and teams up with Camilla to stop the killer for once and for all. And they both end up surviving.
* second film fulfilled this role, having had his memory wiped and thereby needing reminding about the various duties and technologies of MIB.
* second film has Vigo disabling the team with a paralyzing (and painful) dose of negative slime, which he could dial up to a full Agony Beam. The slime lost its effect when New Year's struck and the slime heard the jubilant singing outside.
* second film is that not all parts grow back the same. In the animated series, Jeebs's brother shows up at one point and reveals that, in his family, blasting each other pretty much means "Hello", although it's usually Jeebs who gets blasted.
* second film they portrayed American-led special forces hunting Decepticons around the world with carte blanche international support.
* second film, we find that Mycroft apparently has a habit of wandering around his home stark naked. He has a cheerful conversation with a mortified Mary when she runs into him like this, while his servants, who obviously are accustomed to this, don't even bat an eye when they come in to serve breakfast.
* second film: when the Ghostbusters come to him proclaiming that the subway system is filled with anger-fueled ghost slime, his dismissal of them is not because he does not believe them, but because they aren't offering any realistic solutions (even within the context of their usual antics). Likewise, he only waits as long as he does to finally call on their services because he really would rather not have to.
* second film where they need to keep the canister of ooze out of Tetsu and the Foot Clan's hands.
* second film Zira ("Hate"), and Kovu's brother Nuka ("Stink"). There's also his sister Vitani, which is a portmanteau of "Vita" ("War") and "Shetani" ("Demon").
* Second Foundation: The 1958 cover from Digit Books shows a man in a spacesuit performing an EVA with two dart-like spaceships. His helmet is a big bubble, without any solar shielding.
* Second Foundation, there was a school with a policy of having students sign their reports by first initial followed by last name. This rule was given an exception in the case of a young Olynthus Dam.
* Second Foundation Trilogy as its wording is not to harm "humans," not other sentient life.
* Second Foundation, where a girl sneaks aboard a ship and hides there, like she read and saw a lot in popular culture. Then she realizes that the books failed to mention some things, and she cannot remain in her hiding place for long....
* second game has a more subdued example, as the third generation's hero (Grey) can

potentially be 1/4 Human, 1/4 Neocolom, and either 1/2 Oneltes or 1/2 Harpuia.
* second game has been able to do one of these as well. And it works, despite his rather slender build in comparison to most in here.
* second game has no issues with recoil, though seeing as he's spent most of his life abusing steroids, it's probably justified.
* second game. In later encounters, they alternate between using ranged weapons and charging at you to fight in melee, forcing you to also alternate between using cover and avoiding it.
* second game isn't dead yet? Because nobody's title changed to "God of All Overlords". Taro theorizes that Adell wasn't affected by Zenon's curse like everyone else for one simple reason: he's the Main Character.
* second game, moving faster, and killing your character just from touching him.
* second games, where several formations with different uses are available. Units will adhere to these formations to the best of their ability, ordered appropriately (strong melee in front, weak ranged in back, etc), until they engage the enemy. Played straight in the first game, before they had the things we take for granted today, like decent pathfinding and good mass-unit controls.
* second game that overtook the village. It also happens to be far and wide the most well-lit location in the game, so the player isn't forced to fumble around in the dark.
* second game, when Shepard views the Prothean data recordings detailing the fall of the Prothean settlement on Eden Prime, they simply tune out for a minute or so.
* second game, where some of the plot turns in the story and even whether several members of the supporting cast live or die may depend on what sort of relationship you have with them.
* Second Gear and Third Gear of himself. Fourth Gear just straight up exhausts him to the point he'll flop to the ground completely unable to move for about ten minutes and, even if it doesn't do that, it disables his ability to use haki for that period of time.
* Second Gen; as one of the oldest of the group, if not the oldest, he naturally fits into this role. It helps that he also has a very brotherly instinct towards his peers, especially the younger ones (like Kiragi and the Kanas), always doing his best to help them out whenever they need him.
* second generation as much as possible, can't help but smile when thinking about her.
* Second-generation capes, the children of first-generations, at first appear to have an "easier" time with triggers, such as from waking up alone after sleepwalking or due to a rough foul in a basketball game. In actuality, first-generation capes will tend to have dysfunctional family lives due to their trauma and powers which will in turn put their children under high levels of stress for most of their lives. Glory Girl, for example, was desperate to prove herself to her parents and triggered after the foul when she realized her parents
* Second Generation, each child's "fixed" parent is their father, which may explain why they often have closer relationships with their fathers.
* Second Generation group, is paired up with Morgan, the smallest of the boys. The same happens if she's romanced by a Male Avatar with the "early teens" build.
* Second Generation introduces Perish Song, which makes both the user and the target faint in three turns.
* Second Genesis, and so a few centuries of relativistic travel is not much of a burden.
* second girl that Willy fell for, she was also the first girl he met and befriended after his family moved into her town.
* Second Glance but with a young Christian wishing he wasn't a believer, rather than never having existed. So an angel makes it happen and walks him through a day in his life as a non-believer. The problem of living as an unbeliever while also witnessing a supernatural event and chatting with an agent of God isn't addressed.
* Second Glance movie with the main character who wishes he wasn't a believer getting to live one day of his high school life as if he never had been. While this is mostly a vehicle for the Aesop that non-Christians are all horrible shits who'll

just ruin their own happiness so your current unsatisfying life as a Christian is still better, there's a couple of whoppers that seem to have snuck in by accident. The worst one is when the main character finds out his parents are now divorced and his little sister was never born because, as an angel explains, the main character wasn't a believer and didn't pray for their marriage. The message to any teenagers in the audience whose parents are already divorced: "This is all your fault. Clearly you weren't right with God or it wouldn't have happened. Now you've essentially murdered your potential younger siblings."
* second guy appears to die. Eventually, one of them really does die, but only after knocking her up, leaving the runner-up to be the baby's father. By the halfway point of the movie, there was no way one could pretend to sympathize with the girl anymore; no matter which of her boyfriends died, she'd still have a spare. One newspaper review at the time summarized the film as:
* Secondhand Lions and a lecture called "what every boy needs to know about being a man".
* Secondhand Lions, both Hub and Garth are old men who had many adventures in their lives, but in the end, Garth is the more calm, bookish one who could sit back and relax while Hub was looking for adventure and had no trouble beating up five punks after getting out of the hospital.
* Secondhand Lions" By the end he has grown from his shy awkward self, to a self-confident young man determined to take charge of his own life.
* Secondhand Lions does this with a gang of thugs whom Hub beats up mere hours after getting out of the hospital for a heart attack. When he later comes by to collect the meat scraps, he invites them all to stay for dinner, serving steakes they've used.
* Secondhand Lions during Hub McCann's Crowning Badass Speech of Asskicking, when he single-handedly takes down the greasers who invade the diner, he rather pointedly mentions that he is a veteran:
* Secondhand Lions has the Bollywood-influenced Oujda harem girls during flashback scenes.
* Secondhand Lions. Pop quiz: You're an old guy who just got out of the hospital for a heart attack. You go to a diner for some grub and get harassed by knife-wielding delinquents. What do you do? Well, if you're Hub McCann, you start teaching them proper knife-handling technique before they cut their own fingers off...
* Secondhand Lions, the greedy relatives come to visit Uncle Hub in the hospital after he has a heart attack. A doctor tells them "he's gone." The relatives badly fake sympathy and ask where the body is. Turns out, Hub trashed the hospital room and checked himself out.
* Secondhand Lions uses the fight scene variant when Hubb is fighting a group of thugs in a diner (?).
* Secondhand Lions was going thru puberty during filming so they shot his scenes in sequence to make the occasional squeak and the gradual deeping of his voice work in-universe.
* Secondhand Lions: When Hub is harassed by a group of ne'er-do-well greasers in a tavern, he not only kicks their asses (FOUR to ONE) but takes them home with him and teaches them what it means to be a man. Bad. Ass.
* second happened, and everything went to an even deeper crapper than before, and The Imperium has been repeatedly described as 'rotting' or 'decaying' ever since.
* Second has him beat. Johnson's wife actually had to teach him to read. He went on to become a U.S. Senator, and given that the house of Congress was even more elite at the time than it is now, he obviously was a good study.
* second have introduced two new families of Rock-types that can only be obtained through reviving fossils.
* Second, he tries to invent a machine that stretches time to allow himself and the kids to do those weeks of research in under 24 hours. However, he shows it to the kids
* Second-highest on the list of top-scoring German "Experten" against Western Allies with 102 credited air victories was Adolf Galland, known to R.A.F. pilots as

"the Fighting Fob". Like Marseille, he came from a French Huguenot family. He started flying in the Condor Legion during the Spanish Civil War and finished the Second World War as commanding officer of the major German jet-fighter unit, the JV 44. Known for his love of cigars (there was a special holder in the cockpit) and for the Mickey Mouse emblem on his planes.
* Second highest scoring Finnish Air Force ace of WWII, Hans Wind (78 kills), scored "ace in a day" on five separate ocassions — and all within one month! The
* second if the latter walks free? (In context, this also amounts to "what is justice?" and "what does it really mean to be a lawyer?") As one player put it, "I have never been so paralyzed by a simple yes-or-no question in a video game."
* Second, in book 3, Grakker tells the story of how he met Snout and BKR, and explains that his cousin Rakfratz had put his name in as a candidate, and he was summoned to his homeworld's capital take the qualifying test. Said test has a point where, if you score above it, GP service is mandatory; Grakker scored over a hundred points above, and was thus drafted and shipped off to their training academy.
* second-in-command evil, and a hero who tries to use it for this purpose risks turning into a bloody, merciless warlord like Kas himself. The sword is also the only way to permanently destroy the hand and eye of Vecna.
* second-in-command. It was not by the actor's choice, though—it was a negotiation ploy on the part of his agent that backfired.
* Second, in the sequel, Mr. River tells Chapman that Jack O'Knaves will implant these in unwilling employees such as himself to prevent their flight.
* second intro that viewing it carries a risk of spontaneous chest-hair growth.
* Second is after Link finds and frees his Crimson Loftwing. Groose states that he's still going to win the race, and then expresses his
* Second is a human Ariel suddenly emerging from the middle of the ocean in an explosion of water droplets gasping for breath, backlit by the distant sunrise in a way that
* second" is a popular house rule that removes this clause; if the property owner suddenly remembers the oversight later, they are still owed rent.
* Second is the players who show great love for Bling as true Orokin descendants, buying a lot of
* second Italian dub, stating early in that Fritz is actually O'Malley under a pseudonym.
* second. It also turns out there was never any mechanical reason for the "one slayer" rule, it was just the wizards who first created the slayer line didn't think they could control more than one at a time.
* second It's speculated in-universe that particularly powerful parahumans had a second trigger event essentially at the same time as their first.
* second language are much more numerous). The population of China, and so the population of Mandarin speakers, is more than a billion, and yet Chinese-language media and general Chinese culture are far more obscure globally than even Japanese-language media (whose population is barely a tenth of China's and is aging and shrinking moreover), to say nothing of Western media.
* Second language speakers often retain the patterns of their native languages in the new language.
* Second-language speakers tend to sound this way to natives due to second-language learners being taught more formal varieties of the language in language classes.
* second largest one-day outdoor fish fry... or an even-larger fish fry, that happens to be indoors and/or doesn't last (only) one day...
* second. Later games justify it by having each Pokémart's available stock be dependent on how many badges the player has.
* "Second Law" My Ass!: Robots breaking the Second Law of Robotics and disobeying humans even though obeying them won't injure anyone.
* Second Law of Metafictional Thermodynamics: Works are likely to have more deaths if the author is less emotionally stable.

* Second League a rat gains superpowers from being bitten by a mutant superhero.
* Second League, She-Man (a good guy) and Ana (a villain) have near-identical scars on their faces.
* second legislative riot broke out in March 1989 when the opposition parties tried to stall a hearing on the state budget. During the fistfight, one legislator attempted to disrobe a female colleague, another had his sunglasses broken, while the budget bill itself was torn up.
* second letter to the Corinthians, Paul the apostle writes that he "knew a man" (whether he was referring to himself or somebody else, nobody knows) who was caught up to Paradise and heard things that it was not lawful for a man to utter.
* Second Lieutenant Jones joins Easy Company near the end of the war and desperately wants to get some combat experience. He eventually gets to participate in a night raid just before Easy Company is pulled from the line. And is subsequently
* Second Lieutenant William Calley, commanding officer of the platoon that perpetrated the
* Second Life are able to determine who is over and underage by their driver's license info.
* Second Life at his desk. Also, when he created Mega Desk while Jim was away on paternity leave, he dedicated one section for gaming between sales calls.
* Second Life fits this trope to a "T." Thanks to the sheer number of groups that one can join, such as gaming, roleplay, and every niche in between (and a good number of...explicit groups that will go unnamed), it has become a haven for people looking to find friends with common interests but are unable to due to their real-life circumstances.
* Second Life has a thriving furry community due to the ability to play as animal characters, both anthropomorphic and feral.
* Second Life only allows 3 characters per user, but clever people will avoid the extra fees and end up with hundreds of alts!
* Second Life refer to their "typists" (or similar terms), making a distinction between the character and the human playing him/her/it: e.g. "Sorry I have to go, but my typist is making me go to bed." The consistency with which this convention is applied varies greatly, with some always maintaining character and others using it as an occasional joke.
* Second Life's has an in-world currency, "Linden Dollars" (or Lindens, named for the developer Linden Labs), which can be freely converted to and from real-world currency. The exchange rate is adjustable, according to a supply-demand index called the "Lindex". Lindens are required to rent parcels of land and to upload textures, sounds, animations, and mesh models which you've created yourself, but mostly Lindens are exchanged among players in order to obtain clothing, hair, vehicles, houses, furnishings...whatever can be created in-world. It's perfectly possible to enjoy Second Life without Lindens, but most players eventually find something to spend money on.
* Second Life thus ranges from very well-done hair that doesn't flow, to somewhat crappy-looking hair that flows properly.
* Second Life to try and crash the sim. If someone manages to do it, they are asked how they did that.
* second list that charged your credit card every month for a different pill than the one mentioned in the commercial, you wouldn't remember why you were being charged for it and wouldn't bother to jump through the hoops necessary to unsubscribe.)
* Second Love between them has been enough for Sheridan to defy both death and torture and may in fact be responsible for winning two separate wars.
* Second Love, despite Jim's escalating health problems, until his death.
* Second Love for Regina. For all his interesting backstory, all his plots and storylines revolve around his relationship with Regina.
* Second Love, his wife Delmeza (whose own First Love is Ross) is one of the main conflicts of the show.
* Second Love in Arete's case, plus altering Mikoto and Sumeragi's personalities)

so he can have them as his brainwashed servants. Additionally, when King Garon died he replaced Garon's spirit with that of a monster servant with access to Garon's memories, and who Anankos can control as he pleases.
* Second Love: The character's first love didn't work out and now they have a new love.
* Second Love, which actually caused their break up, hinting Monica couldn't be with someone as stubborn and driven as she was. Her next and final boyfriend was Chandler who repeatedly demonstrated he was capable of stabilizing her.
* Second Love who used to be teased by his classmates for being too feminine.
* second Lupin III series. Only the first 26 episodes aired on TV, and the dub ended entirely after 79 out of the 155 episodes.
* Secondly, Columbo explains that the victim's shoes were tied with the big/top loop over the little toe, indicating that a right-handed person must have done up his shoes for him, because they would be doing their usual action backwards. The problem with this? The victim was clearly stated and shown to be left-handed, thus this supposed evidence doesn't contradict the notion that the victim tied his own shoelaces, because nothing would be "backwards" about the way his shoes were tied.
* Secondly, fans have noted that the third case in any given game usually tends to be the worst. Usually, it goes like this: the first case is a short and simple tutorial to get you into the mechanics, the second case introduces the actual plot and the major players, such as the prosecutor, and the fourth case serves as the climax and conclusion
* Secondly, he once imagined Turk being a father, and accidentally taking a pumpkin home instead of the kid. Eventually, the pumpkin graduates school, but falls and splatters open, then Turk's biological son gets hit by a car. When J.D. comes out of it, he calls Turk a terrible father.
* Secondly is the relationship between Setsuna and Konoka. It became as a princess/bodyguard type relationship before yuri subtext began to grow. Setsuna's angst over the matter became
* Secondly, she says that Voldemort possessed Quirrell as soon as the two met. Although the Dark Lord was certainly the boss of Quirrell from day one, he only began directly possessing him as a way to "keep a closer watch" after his failure to rob Gringotts Bank. Indeed, Quirrell and Harry couldn't have shaken hands earlier that day if the former was already possessed then.
* Secondly, Steve Rogers. During Project Rebirth, he has the serum and Vita-Rays pumped through his body — about half way through the procedure it becomes a lot more intense and he is heard screaming from within the pod. The scientists immediately get up to shut down the machine — but Steve yells at them to keep going despite the pain (becoming a
* Secondly, The C-Virus zombies are considerably smarter than the T-Virus ones. They can use tools such as melee weapons and guns (though not very well), and even climb over obstacles such as fences.
* Secondly, the love triangle itself drew plenty of scorn: A nurse in Hawaii falls in love with two fighter pilots. The first one apparently dies, so she goes to the other one. Then the first guy shows up alive, angst ensues, then the
* Secondly there are standing orders that the cockpit will rarely be opened during the flight and never during an attempted hijacking. Even if the cockpit is open someone will be posted on guard to prevent access.
* Secondly, there's Patrick, the owner of the museum. While undercover at the
* Secondly, when Will reveals himself as the son of Bootstrap Bill (meaning Barbossa explicitly needs him alive), he negotiates that in return for giving himself up, the crew will not be harmed, and Elizabeth goes free. The crew ends up imprisoned (no word on what the final plan for the crew was after the curse was broken), and Elizabeth was forced to walk the plank with Jack and marooned on a deserted island.
* Secondly you can always forcibly take over anyone foolish enough not to realize
* second, more successful, caesarean on April. Even his switch to firefighter didn't stop this, preforming an amputation at the end of Season 2.
* second most pressing reason for wanting him dead. Holtz is fully aware of Angel's

curse, but, unlike most other characters, he denies that this makes any ethical difference: "I will never agree that he has somehow been absolved from the past by the presence of his soul." Given his historical timeframe, this is pretty accurate for Holtz. Angel and Angelus are, essentially, the same being to him. That Angel feels bad is fine and good, but it's really up to God to forgive him if God feels Angel's suffered enough. Until then, Angelus has escaped mortal judgment time and again and is still an abomination.
* second movie Detective Matthews's son is taken hostage, but, in order to get him back, Matthew's is ordered not to steal/kill/etc. but... to do nothing. He fails miserably in one of the best twist endings ever.
* second movie, Doc expresses his frustration with "Sir Isaac H. Newton".
* second movie has her bashing bad guys over the head with firewood to get to Mulder.
* second movies Davy Jones crew also don't seem to need to eat. They might just eat fish but considering that decapitation won't kill them food is probably a non-issue.
* second movies, scenes with Jean and Scott together were carefully framed so that their legs and feet were not visible, because he was standing on boxes and she wasn't wearing shoes.
* second movie throws Fievel off the train. On a more lighthearted note, Fievel and Tiger happily exclaim each other's names when they reunite in the Indian camp.
* second Ms. Marvel, Kamala Khan, is a polymorph who's capable of this by issue #3.
* Second New Republic, which in itself is post-Endor Rebel Alliance) against the Confederacy, which is a group of worlds led by Corellia in an attempt to break away. It ends up shifting the power balance quite a bit; the Jedi Order even forms its own temporary government in order to end the conflict.
* second Ninja Turtles cartoon featured a five-part storyline where the Turtles were each trapped in a different alternate universe. The first four episodes all had the same beginning that took place from the perspective of a different turtle, and the rest of the episode showed that respective turtle's experience in the world he was trapped in. The fifth and final episode focused on the foursome getting back together.
* Second of all the trio that kidnap the clones - Jo, Bradley and Tina - are the ones that find out who Victor Gaughan is and that they were cloned. When the real Jon, Hannah and Rachel get kidnapped Jon says "Gaughan is going to clone us again" when he shouldn't have any idea who Gaughan is or that they've even been cloned in the first place. Later when the whole band meet Gaughan Rachel asks "are you the man who bought the knickers off the internet?" when again, she shouldn't know that. Though if you wanted to, you could suggest that the other three explained to them in the couple of minutes they left the cell to when they were captured again.
* second one where Biff killed Marty's father and married his mother, and ruled over a lawless city. When Marty discovers the root of the problem, he has to go back in time to destroy the almanac.
* Second Original Generation. Kyosuke will sometimes even mention changing up the pattern to confuse the enemy.
* Second, party nominations are usually handled by the primary system. Primaries are a relatively recent phenomenon (in 1968 only 13 states had them for both parties), and in certain races, it doesn't particularly matter whom you vote for; the party delegates have already decided who the nominee is going to be. This essentially allows the candidate to not participate in the primary and win the nomination anyway. At the highest level, in presidential elections, the public can vote in the primaries, but with different states voting at different times (and with the Democrats' former use of "superdelegates"), sometimes one gets the impression that the nominee is
* Second, Peggy says it's her turn again after Declan makes one throw. A frame of bowling consists of two attempts to knock down the pins unless you knock them all down on the first throw (for a strike).
* Second Person Attack - Someone attacks the victim through the POV of that victim
* Second-Person Narration — Poems to beloveds of various sorts are often

formatted this way.
* Second Person's "Wood", when the girl and monkey find themselves in a dark cave, eyes belonging to unknown creatures appear in the darkness around them. As the girl and monkey make their way forward by the light of a match, another pair of eyes appears behind them, soon revealed to belong to the dragon living there.
* Second Place Is for Losers: A person would rather win first place than be in second place.
* Second Place Is for Losers, China blatantly tried to fudge its 2020 Olympic medal count by including those won by Taiwan, Macao, and Hong Kong in the tally as a way to put themselves ahead of Team USA, who bagged 39 gold medals. This led to rounds of mockery on social media, what with people calling them insecure for coming in second at the medal count.
* Second Place Is for Losers: Coming only behind one person isn't good enough! It's actually bad, because being first is the most important thing about winning! So therefore, I should be first, behind no one else!
* Second Place Is for Winners: Hey, what's the big deal?! Why is the person who finished behind me considered the winner?! I came in first place! I should be the winner, not the other guy who came in second!
* second power (only the Elite-ranked Pacificators are allowed to carry liquid fuel with them).
* Second problem: working-age adults who are out of the labor force would be counted in the above definition. That definition would considered disabled, ill, or the unemployable to be unemployed even if they cannot work, as long as they want to work.
* Second PSA: if you have this problem a lot, there are ways to indicate to yourself that you've done it. There are many apps out there that will remind you to take medication until you mark that you've done it; as long as you remember to mark it as soon as you've taken your meds but not a moment before, it's fairly reliable. (For the technophobe, there's also the option of manually marking a paper calendar in a similar way.) Weekly pill organizers are also helpful for this, since as long as you stick to them, it's visibly obvious if you've taken a given medication/set of medications or not.
* Second Punic War. Despite the fact that much of Spartacus' army was comprised of slaves who knew little of fighting, they still brought their full force against Crassus, seeing no alternative. In the end, they lost, but it was a narrow defeat and had Spartacus won, he likely could have led his people to freedom.
* Second Punic War, mostly because Scipio had adapted to Hannibal's tactics of using light cavalry as flankers, and against his elephant charge, which the Romans swiftly brought down with the use of pilum. In the end, the fate of the Mediterranean was decided at that battle, and it was one of the largest territorial gains for the Republic, as well as a huge boon to Scipio's reputation.
* Second Punic War on our side". It took the invention of guerrilla warfare for the Romans to actually beat the Carthaginians. Also, the Romans constantly learned from their engagements with the Carthaginian ships, such that the effectiveness of Roman warships increased dramatically from the war's beginning to the war's end. The war dragged on for absolutely ages though, which meant that by the time it was over the Romans hated Carthage so much that they wiped it off the face of the earth. Normally of course, the Romans preferred to conquer cities more or less intact.
* Second Punic War on the Roman side. With Hannibal smashing one Roman army after another in Italy, Quintus Fabius Maximus came to lead a new Roman army to oppose the Carthaginians. Fabius used his army to shadow and harrass Hannibal, refusing the open battle Hannibal desired and all the while reducing Carthaginian morale, numbers, and supplies. However, this strategy was time consuming and the Romans wanted to smash Hannibal once and for all, so the Senate instead placed the aggressive Gaius Terentius Varro in charge. He gave Hannibal an open battle, outnumbering him nearly 2-1.... And had his army annihilated at the Battle of Cannae. In the end, Fabius was proven correct, since he knew that Hannibal would never have the manpower or resources to ever try and capture Rome, and knew Hannibal grossly underestimated Roman resolve.

* Second Punic War (used in combination with a shield) or a longer thrusting lance, depending on the individual cavalryman's preference (they had to buy their own equipment).
* Second Renaissance, but this later leads to the entire United States to annex all of the Anglosphere, leading to Britain, Ireland, Australia, and New Zealand to be annexed due to harsh climate change going on. Eventually the Third Mexican-American War, leads to a global devastating war that leads to the US not only annexing Mexico but all the damn world. Talk about a happy ending.....
* second round of the 1978 FIFA World Cup six goals in their first five games. Argentina won the match 6-0, prompting accusations of shenanigans (that the Peruvian goalie was born in Argentina, that Peru was dependent on grain sales from Argentina, etc.), though nothing was ever proven.
* second ruler of a powerful nation, allowing him to take over the role of the most visible villain. He holds the title for several books, but gets defeated by the midpoint of the series.
* Second, Sabo tears open the locked doors of Wapol's armory in a fit of rage.
* Seconds, after a quiet breakup, Max moved on but Katie still has feelings for him.
* Second, Sarah and Susan are discussing the implications of a Zelda-expy's
* Seconds before the keys are dropped into the fishbowl, a pair of Whos walk across the window, a man giving a woman a *ahem* "Reverse Piggy Backride".
* seconds, due to the Mursaats' ridiculously powerful Spectral Agony attack. It is only after you have your armor "Infused" with spells to neutralize that attack that you can fight them on equal terms.
* Second Season Downfall: A show's second season is so poorly received it doesn't get a third.
* Second Season Downfall - shows that don't have anything left by the second season
* second season entirely lacking in morals who thinks nothing of sacrificing lives for the sake of scientific experimentation and discovery. For that matter, this also describes Gordon himself. He's practically drooling with sadistic glee when they send Alyx through the teleporter, and when it proves to be so unstable that it causes a plug to get blown out of the wall socket, it only enhances his excitement. When Alyx actually makes it out of the other side of the teleporter unharmed, Gordon is utterly indifferent and even sounds a little bit disappointed.
* Second season episode "Arson & Old Lace" has an arsonist setting several raging fires in an office building. Massive amounts of flames rage in an empty office, where the arsonist has been knocked out by an explosion. Yet the flames very carefully don't touch her, nor does the massive fire & intense heat interfere with Frank and Joe dragging the woman out of the room. We're also shown many stock footage scenes of fire fighters battling out-of-control fire all over the walls, ceiling, and floor. On top of that, Joe detours to help a young child trapped in an office; flames come roaring in to cover the ceiling and trigger an explosion, yet Joe ducks behind a half-wall and, aside from a bit of soot-smudge, takes no damage from either fire nor explosion.
* second season episode had a 21st century astronaut that got accidentally abducted by aliens and when they couldn't return him home, made him a small reality where he could live out the rest of his days in the company of pseudo-humans based around a book as an attempt at apologizing for screwing him. Unfortunately, they based the reality off such a godawful book that the astronaut writes in his logbook "I hold no malice toward my benefactors. They could not possibly know the hell they have put me through, for it was such a badly written book, filled with endless cliché and shallow characters. I shall welcome death when it comes."
* second season finale", "I’ve always enjoyed the word 'defenestration'. Now I get to use it in casual conversation."
* second season has TK (Takeru in the Japanese version), who has written books based on their adventures in the Digital World.
* second season Interestingly, neither were supposed to survive the climactic showdown in Season 1.
* Second season slows it down so viewers can make some sense out of it.

* Second season: The Earth Alliance continues to descend into fascism and appeases the Centauri, Sheridan gets into trouble with the government by attacking a Centauri ship to defend a fugitive Narn one, the Centauri try to kill Sheridan, and the Vorlons and Shadows are outed in public.
* second serial was an early version of this trope. Only two actual moving Daleks are shown at any point, the rest are painted backdrops.
* Seconds From Disaster chain of errors and system failures that completely overwhelmed the existing failsafe mechanisms. Almost everything that possibly could have gone wrong, did.
* SecondsFromDisaster episode "Explosion on the North Sea," features a brief one for Bob Ballantine, one of the survivors interviewed in that episode.
* Seconds has an unseen narrator who narrates Kate's life, though Kate argues with it throughout the story like it's a real person. It's implied to be Kate's conscience.
* Seconds, has big, spiky, circular hair that's bigger than her head. In her more chibi moments, her entire head is just a bush of hair with eyes and a mouth.
* seconds hot, and can easily destroy dishes and the plastic interior of the microwave.
* Second Sight, all painful, especially if you are trying to do it stealthily and with no kills. Checkpoints are few and far between, the enemies are heavily armed soldiers that come in large groups and tend to spawn in behind you, the level is linear with very few hiding spots and full of water puddles that will make you leave footprints and give away your position if you are invisible, and you have to escort Jayne the whole way through, who, unlike the other escorts in the game, is completely unarmed. At least she doesn't have to be calmed down every time she is saved, unlike the previous escort mission with her.
* Second Sight has people staggering around for a few moments after being hit with tranquillizer darts, then reacting like they have been punched in the chest and falling over. Hitting them in the head takes them down instantly.
* Second Sight has this in its "Conspiracy" level, where you catch two NSE security guards playing this game.
* Second Sight. However, adults can spontaneously develop psychic powers as well, as is the case with the main character.
* Second Sight, mentions that doubt does tend to throw off the ability to manifest said powers... and the more doubters there are, the harder it is to manifest them. There's even a Merit, Anti-Psi, that allows a character to actively suppress psychic powers.
* Second Sight scenes, Grienko himself actually hands a huge ream of files to Vattic and talks of how they contain detailed and comprehensive notes on his methods at every stage of the process. Hanson had planned to kill Grienko AND the original test subjects, before heading back to the States and refining the processes.
* Second Sight takes place during a military excursion to Siberia, and consequently features combat amidst freezing cold and heavy snow.
* second sight was useful to him — and more, he let her die thinking she was dying to save him or be with him, only to be bound as a ghost by her love for him so he had an undying oracle he could exploit for eternity. Even in her rage Deionarra still loves the hero and is willing to go through her personal hell for him, and her last words to him are always, "I shall wait for you in death's halls, my love."
* Second Sight were meant to not only prove the reality of psychic warfare, but also to act as the first generation of psychic super-soldiers loyal to the Soviet Union. However, the project was a failure: more than half of the children who learned to use their powers successfully were hideously disfigured by their medication, and the others were judged far too disconnected from the outside world to be of any immediate military use.
* Second Sino-Japanese War and the GMD. After Germany recalled Falkenhausen, Soviet advisors took over until Operation Barbarossa occurred.
* Second Sino-Japanese War broke out in 1937, the Chinese air force was made up of

various biplanes, most prominently the Curtiss Model 68 Hawk III. Although it was outclassed by Japan's Mitsubishi A5M carrier fighter, it was fast and well-armed enough to deal heavy damage to ground and naval targets. Even when China received stronger and faster Polikarpov I-16s from the Soviet Union, nine survived to be used as night fighters in 1940 to defend the wartime capital of Chongqing from Japanese bombers.
* Second Sino-Japanese War had its share of battles in cities such as Shanghai, Nanking, Changsha, Changde, Wuhan and Taierzhuang.
* Second Sino-Japanese War involving fierce urban warfare before Shanghai finally fell. Then there was the entire war itself; the Japanese were confident that they could take all of China in three months, or at least force a surrender in that time. Instead, China held on for 8 years, tying down half of the Japanese Army until Japan's surrender following the atomic bombings of Hiroshima and Nagasaki and the prospect of a Soviet invasion of the home islands.
* Second Sino-Japanese War Tanks of the time could be disabled by pouring a flammable liquid over the (outside of) engine and setting it alight, so it was only a matter of time before someone got the bright idea of filling a bottle with petrol or spirits and putting a burning rag in the mouth. Even if the fire didn't spread into the tank itself and set its ammunition off, the fumes and smoke were would force the crew to choose between suffocating and bailing out.
* Second Sino-Japanese War. This was because many only had a handful of ammunition for their rifles and machine guns, with some getting no rifles at all (and having to use Japanese ones instead). Although warlord troops were infamous for retreating in fear, the "Big Sword" brigades of shock troops would frequently engage the Japanese in hand-to-hand combat, such as during the Battle of Taierzhuang. The Japanese were notably stunned by the Dadao's combat effectiveness, although this was because most warlord soldiers had plenty of experience using them to hack rival soldiers to death during the chaos-wracked China of the 1920s.
* Second Sino-Japanese War three Guomindang-aligned warlord-run regional governments ran official provincial drug monopolies and the other five tried to crack down on the trade (or was it the other way around?). This was because the Guomindang had teetered on the edge of total bankruptcy for about two years (1940-42) as the Soviets withdrew their economic and military aid, forcing them to give up most of the the taxation, administration, and conscription duties to the provincial warlords in order to cut their spending (this resulting in dramatically increased taxation and corruption). This desperate measure allowed them to survive for a time, but would have resulted in total collapse by the end of 1943 if it weren't for barely-adequate American loans which kept the central government afloat until the war's end.
* Second Sino-Japanese War trees on conquered territory, because the cherry blossoms would mark it as Japanese space.
* Seconds; one minute they are insulting each other's food and the next they are making out in the walk-in.
* Second Sons. (For the record, the author calls it medieval science fiction.)
* Second Sons series takes place on a planet with two suns. The driving event of the story is one sun eclipsing the other for a period of many years, allowing a corrupt cult to take over the world.
* Second Sons: The Ranadon star system orbits two suns, one a big red one seen at night and the other a little yellow one during the day, as seen from the planet Ranadon. Every so often the red sun goes wandering, causing an "Age of Shadows".
* Second Sons trilogy. He's a brilliant political genius with nerves of steel and any more would give away the plot of the last two books.
* Second Sons trilogy: Sort of when Dirk rescues Tia from a drunken sailor who thinks she is a prostitute (though her original plan was to get him into a more private place so she could beat him up, it doesn't quite work out that way). The resulting affair is very temporary, however.
* second Sound Stage's first season revolves around Fate's life before the events of the series.
* Second Spanish Republic as well as their own track record) who do the marketing.

* Seconds says that to his knowledge, it wasn't an assassination. The audience never finds out for sure either way.
* Second Stage Lensmen per parent, the extremely rare male birth doesn't count because they aren't "persons". Males are only allowed to live until puberty because Lyranian science hasn't (yet) come up with any other way for a person to become pregnant. Once a given male has serviced his quota of persons, he's promptly killed.
* Second Stage Lensmen with the "persons" of Lyrane II. They are all biologically female (but do not use the term "female"), and use "it" and "its" instead of "she" and "her". Meanwhile, the males (ratio of 1:100) are not considered persons, are implied to have zero intelligence, and are allowed to exist only for the continuation of the species via procreation. Until Kimball Kinnison shows up, the "persons" routinely kill any male humanoids who find their way to the planet and are not wearing thought shields. They are completely baffled by Illona Potter, because they cannot conceive of a female who is not a "person".
* Second Stage Turbine Blade. It also refers—as far as I can tell—to Coheed's arm blades and the fact that this is the second time that he's used them.
* Seconds that can alter the past as a thank you for giving her old clothes.
* Second String every playoff game the Buffalo Bills play comes down to the last play with just seconds on the clock.
* Second, stunned soldiers still need to be fed and hydrated, meaning that they are still a drain on the other side.
* Second Sun is Narm if you can't see what's going on in the dark. Better adjust your brightness settings up a little.
* second sunken continent, also identifying it with the Garden of Eden.
* Second Sunrise Over New Mombasa, were a series of conflicts involving the Inner Colonies nearly 200 years after the Interplanetary Wars.
* Seconds, upon discovering just how well the mushrooms work, Katie abuses them to hell in the following ways:
* Seconds, who shows no stereotypical gay characteristics; he's only known to be gay by mention of a boyfriend.
* Second Technician Arnold Judas Rimmer has traits of this in the first two seasons of
* second Teenage Mutant Ninja Turtles cartoon's adaptations of comic book stories are usually paced to correspond to their source material — one issue will almost always translate into one episode — two exceptions stand out. The first is the arc composed by the episodes "The Search for Splinter," "Turtles in Space," and "Secret Origins" multi-parters, which take five issues' worth of material and expands it into ten, while the second is its adaptation of "Sons of the Silent Age," which, after completing a mostly faithful adaptation of the comic book by the fifteen-minute mark, fills out the rest of the episode with a plot about preventing an uncared-for nuclear power plant from spilling radioactive material into the river which was the setting for the story.
* Second that's being emitted from a woman's head to portray her affection for a player character.
* Second, the Demon Aliph Soulstealer/Dark Pegasus was snubbed for a position of leadership in his family's city of Zinvth, so he
* Second, the experiment was volunteer so the guards were all college students who were interested in roleplaying as prison guards, selection bias.
* Second, the Grav-Caps, devices which can negate the affects of acceleration, but only for short bursts.
* Second, the managerial succession following the stepping-down of Arsene Wenger. Wenger was the manager who led them to these titles, and even managed a few FA Cup wins in his final seasons. However, each coach that has followed him has done worse, both highlighting just how excellent of a manager Wenger was, and causing the team to slip further and further away from success again. First, Unai Emery seemed to be getting Arsenal going in the right direction, with a 22-match unbeaten steak in all competitions. But then the team started to slip, before losing a Top 4 finish and getting embarrassed 4-1 in the Europa League final by rivals Chelsea. He

was sacked after a truly dismal start to the 2019/20 season. He was replaced by former captain and Manchester City assistant Mikel Arteta, who also seemed to start off on the right foot, getting Arsenal another FA Cup victory (going through Manchester City and Chelsea, no less). However, things turned sour when Arsenal yet again started off the season in horrid form, finding themselves in the lower half of the table heading into December, before the team turned it around, missing out on European football for the first time in literal decades. Where arsenal go from here remains to be seen, but it's clear there's still a lot of work to do to get them back into a successful state.
* Second the Milton Library Assistant can ask you that question in one of a few ways, and you are allowed to respond as you please.
* Second, there are a number of different ways to reach judgment without a jury in a common law system that are not the same but often confused on TV. Many of them only apply in civil trials, but some apply in the criminal field as well, and most of them amount to telling the plaintiff (or prosecutor) that they've done absolutely nothing that could possibly lead to them winning. For instance:
* Second, there is the father of the protagonist. Currently one of the greatest warriors in all the empire, and responsible for the death blow against
* Second, there was Takuma Saiou (Sartorius in the dub) in GX, a partial Expy of Dartz. Saiou was a psychic who was visited by an alien entity called the Light of Ruin (Light of Destruction in the dub), that caused his personality to
* Second, the subject must be able to hear Jesse. Jesse's recurring nemesis, Herr Starr, managed to escape Jesse's voice simply by covering his ears and repeating the word "no" over and over.
* second). This was most remarkable for the Indians getting to a 3-1 game lead, but having the Cubs surge to win the final 3 games of the Series in a row to take the championship. With the Cubs' century-plus-long curse and their "goat curse" out the window in November 2016, the Indians now have the drought weight on them.
* Second, those who know about the Warehouse but are not employed. This role is only given to the few
* "Second throat punch... absorb the blow! Groin punch-HIP BLOCK! ELBOW TO THE GUT!! Uh-oh! Up to the nose!"
* second time Brock suddenly loses control of himself and starts chasing after Ash with hearts in his eyes...
* second time that an older Paul had been covered up by a newer version.
* second time) to fake a plane crash off the southern coast of Spain and use a submarine to float a body dressed as a Royal Marine officer toward the shore. There, it was picked up by Spanish authorities, who allowed German agents to examine it. The body carried letters to British commanders warning that invading Sicily (the closest point to North Africa and stepping-stone to invading Italy) would be too obvious a move, and that Sardinia or Greece should be invaded instead. The German and Italian forces thus had to split their numbers to cover multiple locations, leaving Sicily undermanned. Operation Husky, the airborne and amphibious invasion of Sicily, commenced on 9 July 1943, and by 17 August the island was secure.
* Second to Cartman is Randy Marsh, who more and more regularly gets himself and often his family (or even the entire town, starting with joining the PC bro fraternity) involved in some narcissistic driven need for attention because he believes he's smarter than he actually is (more so in the last five years or so, as in early seasons he was often a voice of reason to the kids or situation, except in instances where being an idiot adult and ignoring the smarter child was funny, only being an outside witness to the events instead of the instigator).
* Second to him is the English hunter Clayton. He's muscular, big chined, and carries his gun with him almost everywhere he goes. Not to mention, he's voiced by
* Second-to-last line, actually – the narrative explains that their intended purpose was always only ever to
* Second towards Rory when he's been hit with the dissolving gas, and he's crumbling away into dust.
* Second Triumvirate. The Triumvirate has no territories it controls, just a

network of agents and blackened ruins where they have attacked. It is explicitly stated they don't care who rules as long as the Jedi are wiped out, since they would be unchallenged to do anything they want.
* Second, Twilight is also the Bearer of Magic, one of the six ponies who have, in the past two or three years alone, saved Equestria from Discord, Nightmare Moon, and Chrysalis. Kill her, and you practically guarantee that the next world-ending horror will find Equestria easy prey. And the thieves are almost certain to be killed if the world falls into eternal night or chaos or whatever the next cosmic horror might attempt.
* second). Ultimately, she is able to embrace it and, in the second film, has greater control and is in a relationship with the luckily fireproof Hellboy. Oddly, Hellboy has the fiery, impulsive, and chaotic personality, while Liz is comparatively stable and reserved.
* Second unlockable: The Auricom Prototype. It deals a decent amount of damage and doesn't get slowed down or wipes out when hit by a weapon. It can't pick up defensive weapons though and if you aren't careful, you won't notice when your craft is on low energy.
* second uprising of the Bolsheviks if whoever is in charge of Russia handles things poorly enough (in this timeline, the first uprising failed massively, which discredited Leninism as the chief ideology of the political left and syndicalism - which was successful in Britain, France and Italy, replaced it).
* Second Variety", the UN, losing a war with the Soviet Union sets up automated factories to produce "claws" — at first just mobile sawblades seeking warm bodies. Later the claws produce new, more effective designs which mimic human beings. The new varieties are able to infiltrate humanity, spreading paranoia as well as death. In a twist, the story concludes with the observation that some claws are developing weapons specifically to kill other claws.
* second video sees Rhonda travel to Bali on a holiday where she gets a foot massage. The lady recognises her and is immediately swarmed by onlookers who are told to leave.
* second video with Flutter, the fist thing she does is getting out of the bathtub.
* second walking staff. Jak and Daxter find this amusing; Kor does not.
* second wall built around his first wall before they could arrive, and repelled the relief force. The Gauls eventually had to surrender, because they couldn't overcome the incredibly complex and well-constructed Roman fortifications.
* second was awesome, but it's sad that he had to die in his first animated appearance...
* Second was the Twinboekun, made from Leet's robots in the battle between the gamer duo, Mouse Protector, and Lagann.
* second, weapons switching on its own ...) and usually take part in some ultimate challenge consisting of many rounds.
* Second, when Ellie Danville asks Jo about her birth mother. At first, Ellie wants to meet her so badly she skips school and takes the subway by herself to go upstate for a visit, but is interrupted by a murder on the train. Later, Jo gives her more information about her and offers to take Ellie there, but the girl changes her mind and they put the trip off yet again.
* Second, when Jerry is visiting Dorothy, he's talking with Ray, and Ray keeps pestering him to go to the zoo, at which point, Jerry, who's drunk, says, "The fucking zoo's closed," and immediately regrets it.
* Second Wind: A minor version of this occurs with great proficiency in Observation Haki, allowing someone focusing hard enough to read the emotions of others with extreme precision, to the point of understanding their thoughts. Luffy and Zoro, two who possess such a skill, have used it a few times to convey messages while in the presence of others.
* Second Wind. As far as we know, not even Mihawk can do that, having failed to cut "Diamond" Jozu during the Marineford War in the previous timeline. That alone proves that Zoro would've probably beaten Mihawk at the Baratie had he been at full strength.
* Second Wind: At the end of Chapter 4, Buggy has this thought during his last

second of consciousness after Zoro cuts him…successfully.
* Second Wind: Buggy gives one of these when Luffy proposes to do nothing while the former executes him.
* Second Wind Fan Fiction, Chapter 24 has Ace give this reaction when Luffy and Zoro tell him their secret:
* Second Wind: Implied to be the premise, and confirmed as such in Chapter 22: Luffy and Zoro make it to Raftel, but not before everyone else has been killed.
* Second Wind in canon, and it's spelled out by Ace in Chapter 24 as the only reason he believes that he and Zoro are from the future:
* Second Wind: Lost's author's note at the end of Chapter 26, in regards to Seal:
* Second Wind: Luffy and Zoro begin training the rest of the crew in Haki in Chapter 15, once they’ve entered the Grand Line. It’s not only strenuous, but somewhat demeaning.
* Second Wind's author tries to come up with a different witty disclaimer for every chapter. In Chapter 18, he says he’s running out of material.
* Second Wind: The only ones who know that Luffy and Zoro are time-travelers are people that they consider family.
* second, Winry, and Ed angrily takes the watch back and continues working.
* Second World War, AA guns of all types were successfully repurposed as ground weapons. In the case of larger, heavy anti-aircraft guns, it was found that their high muzzle velocity and heavy shell weights allowed them to punch through armour that earlier, specially-designed anti-tank guns (which were easier to handle but less powerful) could not penetrate. The German 88mm gun is the most famous example of this, in large part because its mountings actually made it a lot easier to use in this capacity, and because of its effectiveness against the heavy frontal armor of the British Churchill and Matilda II in North Africa and the Soviet KV-1 in the Eastern Front, all of which were generally impervious to other German anti-tank guns that were in use. This led to the development of the Tiger heavy tank, which mounted its own 88mm gun (though not one that was compatible with the anti-aircraft gun, contrary to popular belief). Similarly, light anti-aircraft autocannons, with their high muzzle velocities, rapid rates of fire, and ability to fire a variety of different projectiles, proved to be particularly effective against a wide range of ground targets.
* Second World War are framed by the conceit that Higgins himself has stumbled upon evidence of never-before-revealed plots from the war some 30 or so years later.
* Second World War Battle of Ortona, German forces were heavily entrenched in the houses of the town. Entering through the doors or windows was too dangerous, so the attacking Canadians simply blasted holes in the walls with their rocket launchers and anti-tank guns.
* Second Year Protagonist: The lead character who is a sophomore in high school.
* Secret Agent Barbie’s gadgets is her Pink Vision Goggles, which help her to see coded messages within her environment.
* Secret Agent Dingledorf And His Trusty Dog Splat, B.A.D.D. creates worms that everyone finds super tasty. After eating even one, people keep eating, and they may try to force holdouts to eat them too.
* Secret Agent Grandma... which turns out to contain all the cool video games from next year.
* Secret Agent has the question mark "powerup", which reverses the left and right controls for a while. "You feel a bit confused!"
* Secret Agent his superiors refuse to do anything to help the woman because "She doesn't exist".
* Secret Agent Man Originally, the song consisted of a single verse ("There's a man who leads a life of danger...") and chorus ("...they've given you a number/And taken away your name."); after the song proved surprisingly popular and fans began asking where they could buy the single, a longer version with two more verses was recorded and released.
* Secret Agent Men spoofs this type of organization, even calling its two separate sections "Cloak" (for overt, glamourous work) and "Dagger" (covert dangerous work, like special ops).

* Secret Agent Men, the other of whom was a Stale Beer spy from the start.
* Secret Agent Mummy, had several prominent positive aspects, and didn't cause trouble for the other gods.
* Secret Agents become referred to by codenames derived from Arthurian legend, so they might retain their names if they aren't ever called by their real ones. Chester King's closest counterpart is a man called Sir Giles in
* Secret agents carrying cyanide in hollowed-out teeth is pretty much urban legend; in fact, this would place agents at risk of killing themselves accidentally every time they ate or drank something.
* Secret Agent Super Dragon, another lame spy film on MST, Joel explains how all spies have to go through a training regimen that includes a class on "Post-kill puns".
* Secret agents would obviously be useless without a false name or, at the very least, a code to identify themselves to their handlers. However, many agents with Non-Official Cover use their real name, they just don't say they're spies.
* Secret Agent, who found Bond morally reprehensible because of his promiscuity. It was not that John Drake might not have a sex life when outside of his job, but when he was working his attitude towards women was strictly professional.
* Secretariat and became US Horse of the Year in each of the next three years.
* Secretariat), Man o' War was defeated only once in his career, by a horse named Upset.
* Secretariat only raced for two years during the prime of his career and lived out the rest of his life in retirement. He is still remembered as one of, if not the greatest racehorse who ever lived, set records that still stand to this day, and appears in the pedigree of many famous racehorses of this century.
* Secretariat, the 2010 biopic about the legendary record-smashing thoroughbred that swept the U.S. Triple Crown in 1973.
* secretaries/personal assistants/aides who do most of the essential paperwork and know what's really going on.
* Secret Army, both of Natalie Chantrens' love interests — Francois and Nick Bradley — died horrible deaths.
* Secret Army helping Allied airman return to Britain through Nazi-occupied Belgium. When Lisa Colbert first sets up Lifeline, she takes the codename "Yvette". In Season Two, Albert Foiret takes over Lifeline, but they decide to call him Yvette as well to mislead the Gestapo.
* Secret Army trying to keep one step ahead of Nazi-hunters in the years after 1945. It included a period in South America.
* Secret Army use a fake bicycle accident to make a German officer stop his vehicle so they can jump him. After they've dragged the body off into the woods an army motorcycle-sidecar drives up, and its occupants are highly suspicious at seeing an abandoned staff car...until a man comes out of the woods wearing an unbuttoned officer's uniform, his arm around a pretty Belgian girl. The Germans whistle and catcall, then roar off on their motorcycle. As there's some UST between the two characters there's an "you can stop kissing me, they've gone" moment too.
* Secret Art and knock it out in one hit, but that's still more than most would manage.
* Secret ArtNinjitsu techniques only a select few are privy in knowing.
* Secret Art. To balance this, its stats are lackluster and its abilities are merely okay.
* Secretary (2002): A comedy-drama about a young woman who takes a job as a secretary for a demanding lawyer and soon enters upon a BDSM relationship with him.
* secretary in Charming Disaster's "Secretary" is this to the unnamed businessman, who has an alcohol problem and is having issues with work—he would literally be unable to function without her help. This is not necessarily a good thing, as though he's falling in love with her he's still not sure a) that she's entirely human, or b) whether she has an ulterior motive.
* Secretary is a mixture between drama and Romantic Comedy, revolving around the BDSM version of this trope. The main storyline is about the main character wanting to be truly owned by her boss.

* Secretary of Education Laura Roslin, aboard a chartered space passenger liner, is in the cockpit as the pilots pick up an emergency broadcast,"
* Secretary of Evil: The character that runs logistics for the villains.
* Secretary of Evil: The character who runs logistics for a villainous group.
* Secretary of Evil: The villain's second-in-command in charge of logistics and planning.
* Secretary of State to use in your company name. A cowboy electrician company calling themselves "British Electric" found themselves in hot water because of this as well as their illegal business practices a few years ago.
* Secretary's character indulges herself while thinking of her sadomasochistic relationship with her boss.
* Secretary, the fiance's flaw goes beyond boring - he seems to genuinely just want to get married and start a family, and doesn't much seem to care with whom. Maggie is swept along due to an inability to say "no", plus the mixed messages she's receiving from her actual love interest. It's only when trying on the wedding dress that she realizes that she can never be satisfied with him. Her dumping of him is still quite the surprise for the oblivious guy, but at least she didn't wait until the altar.
* Secretary, where Lee and her boss Edward engage in a sadomasochistic relationship.
* secret, Asuka can't do anything but glare menacingly and curse under her breath while other girls try to steal her man.
* Secret Avengers arc. A mutant Senator with vaguely defined powers to "bring history to life", animates The Lincoln Memorial and exhibits from The Smithsonian to battle the invading enemies.
* Secret Avengers: The secret empire has built their underground teleporting city beneath Toledo, Ohio for two reasons: It has no subway systems and there is very little chance of any government or media attention.
* Secret Bar has Limbo being used as a tavern under New Orleans. They serve Regret, Loneliness, and Damnation. And cigarettes.
* "Secret Base ~Kimi ga Kureta Mono~" by ZONE was a major hit in Japan when it was released in 2001 and continues to be a popular summer song there. However, it's virtually unknown in the West and is easily overshadowed by the cover version
* Secret Boss as well, through seen by many as the hardest boss in the game, since that battle takes place in Cyberspace, you will have the abilities of all the Fusion Elves, meaning two health bars, secret Z-Saber moves, plus two extra Sub Tanks, making this less of a challenge than what it is supposed to be.
* Secret Boss He's actually so tough, he dwarfs the difficulty of Serpent in retrospect — although when you crank up the difficulty all the way, you can go ahead and consider Serpent a real threat all his own.
* secret, but the Boy Scouts of America uses an unusual handshake between members, with the first three fingers of the hand extended along the other person's wrist (the three fingers extended thing is based on the Scout Sign, a much more visible hand gesture associated with the Boy Scouts).
* "Secret" by The Pierces plays this up for drama. The singer seriously seems like she
* "Secret Cargo": Sabine's still gone. Agent Kallus is also nowhere to be seen, notable considering he had a major role last episode.
* Secret Character: A playable character in a video game who is a secret until they're unlocked.
* Secret Chaser: A character insistent on finding out another character's secret.
* Secret Chaser: A character who will do anything to uncover someone's secret identity.
* Secret Chaser: Someone constantly follows around the hero protecting their secret identity, trying to find it out.
* Secret Chiefs 3, a project helmed by Mr. Bungle guitarist Trey Spruance, eventually started crediting songs on their albums to seven different "satellite bands", each with their own loosely defined style. So far two "satelite bands" have had spinoff albums of their own - Ishraqiyun's

* Secret Circle of Secrets: A secret society of ominous hooded figures up to who knows what?
* Secret Circle of Secrets, a secret society with robes and masks that meet in secrecy to do evil things.
* Secret Circle of Secrets variety. They sacrifice young women to a trio of fallen angels who want to destroy all of humanity.
* Secret City; according to his own recollection, he is merely the first thing / being created. Assuming he's telling the truth, his creator, the one and only creator and keeper god of the universe, obviously also fits the trope.
* Secret City actually depend on modern technologies, and one of them is also one of the largest media and Internet companies, providing a full spectrum of services to the mages' populace.
* Secret City in one of the book, when he visits his current love, Susanna, after her retreat to nature because of old age. While he's sad, she claims, that she's happy, and that this situation allowed her to live 3 lifes - before, with and after him, which is even he cannot achieve.
* Secret City novels feature the Order and Monastery of Erli, where modern medical science intertwines with magic. While upholding true neutrality, a short story twists the image: Erli monks perform very dubious to outright illegal and immoral research.
* Secret City series of novels the eponymous Secret City is divided into 4 major factions: The Great Houses of Nav', Chud', Lyud' and the humans (sometimes referred as the House of Chel). Each faction has a unique magic Source. Great Houses contain multiple races with different rules, which merits a detailed listing:
* Secret City the event is never called by name, but explosion was caused by The Lesser Poseidon's Throne, humans' Source of mana, going critical after removal of controlling artefact. This was used to cover tracks of experimental world-hopping ritual from the Great Houses. Throne was presumed to be destroyed in the event, but actually it flew around a bit and then crash-landed, embedding itself in some random hill to be found by Soviets later.
* Secret City they hired best of the best for their divination department, so that they can exclude particular cases from their contracts or just refuse a particular client, because he will be eligible for payment later. Too bad for them, that Dark Court is even greedier and blocked all prediction spells concerning salesman, who participated in their scheme, which got his business damaged.
* Secret Contents of a Certain Government Warehouse (updated by Uncle Bear in 1999).
* Secret Diary of a Call Girl. Belle talks to the audience at least as much as she talks to anyone on-screen.
* Secret Diary: One character finds another character's secret diary and may be tempted to read it.
* Secret Diary that you can try to read, but you won't succeed. If he happens to catch you at it he'll admit that he can't always read it either.
* Secret Dreamer has the newly reformed pegasus knights, led by Cynthia and Severa.
* Secret Dreamer this trope in action between a severely wounded pegasus knight and her wingmate.
* Secret Empire by the statement "You thought this would be over after three issues, didn't you?"
* Secret Empire double agent. The entire plot was facilitated not by the insidious machinations of fascism, which supporters argue was the point of the story, but by the naive unilateral actions of someone that's essentially omnipotent. After Stevil destroyed Vegas, it was the only thing said warper didn't restore along with everything else, "as a lesson", something that doesn't apply to anyone but herself.
* Secret Empire has this habit of having a sudden twist at the end, with issues 3-5 particularly having a random hero being revealed as a HYDRA agent of some sort.
* Secret Empire introduced a planetary shield that was impenetrable and saturated the world with "grey particles" that blocked teleportation of any kind.
* Secret Empire was seemingly intended to help solidify Carol as an A-lister but resulted in her being far more widely disliked instead.

* Secret Files 2: Puritas Cordis lampshaded this. All the named characters who died appear in the ending... in pictures, wearing red shirts.
* Secret Files, Nina dreams about following an Arab merchant to his buyer's home in Florence so she can find out what's in the amphora he's selling, but keeps losing his trail, resulting in time being repeatedly rewound so she can perform the necessary actions to track him one screen further.
* Secret Final Campaign: Games with multiple character stories has one last story that is made available after beating the others.
* Secret Garden has an oft-parodied variant, where the male lead gets rid of the milk on the female's lips by kissing her.
* Secret Garden, Joo Won and Oska zoom past the "To Coastal Road" sign at high speed, causing it to flip around. This proves pivotal to the plot of the whole rest of the series, as it winds up causing Ra Im to take a wrong turn into the woods, eventually finding the mysterious house.
* Secret Garden, Ra-im works for the Action Sports Company as a stuntwoman, usually doing difficult action sequences. When male lead Joo-won falls for her her, he arranges for the department store that he owns to be used as a set for action movies, just so he can see her more often.
* Secret Girlfriend series, was that "you" were the main character: the camera would routinely switch to a first-person viewpoint and characters would address "you" to move the plot along, leaving the viewer to figure out what the response was by their reactions.
* Secret Girls was a web drama in the early 2010s as a collaboration between Ciao Comics (Shogakukan) and Fuji TV, where a group of five middle schoolers lead a double life of being the idol group Secret Girls. The actresses released music and performed as their characters in music festivals.
* Secret Government Warehouse: A covert government facility that secretly contains various objects they don't want anyone else to know about.
* Secret Government Warehouse). Now you too can be covertly poisoned by secret agents, an honor that used to be restricted to troublesome foreign leaders.
* Secret Government Warehouse: Where the government hides all the stuff the people are better off not knowing about.
* Secret Handshake: A secret, long, specific handshake between friends.
* Secret Handshake: The secret means of identifying people who are keeping a secret together.
* Secret Histories after killing his latest female victim, he holds William, the Drood family librarian at knifepoint. Reasoning that the Droods, being the most powerful family on Earth both magically and technologically, will have the secrets by which he could resurrect his victims and atone for his crimes within their library, he demands to be told how to restore a dead person to life. William tells him that the best they can do is commune with a person's ghost or raise them as a zombie. Truly bringing them back from the grave? "Only one man could ever do that I think that we can definitely agree that you're not him!"
* Secret Histories and ensuring that their more strong-willed members don't clutter up Drood Manor with ghosts.
* Secret Histories and even makes a brief appearance in the final book, when he's seen at a party necking with his lover.
* Secret Histories and then revives, rather than falls asleep and then awakens. He's gotten used to it.
* Secret Histories approve of Roger and Harry. Both Harry and Eddie assume it's because she's part of the conservative Drood old guard and therefore doesn't like that Harry's gay. Actually, she's fine with his sexuality; her real issue is that Roger's a half-demon... and also Harry's half-brother.
* Secret Histories has a secret chamber filled with his victims arranged for a tea party.
* Secret Histories, has a variant that plays out among spies held together in a group by the terms of their mission, rather than by geographic isolation.
* Secret Histories is broken, and an ordinary butterfly carries on its way.
* Secret Histories is one example. So are many of Eddie Drood's gadgets. Many other

factions use technology enhanced by magic OR magic standardized by technology.
* Secret Histories like this trope, up to and including stealth, sensory enhancements, safe-cracking and computer-hacking capacity, self-sustained oxygen supply, and near-instantaneous deployment.
* Secret Histories series have tried other types of leadership over the centuries, but keep defaulting to an autocratic Matriarch when such social experiments go wrong. Other positions of authority within the family's ranks are gender-neutral, and that of Serjeant-At-Arms seems geared for hefty, intimidating men.
* Secret Histories series, Jack and Weezy come upon a set of bear traps illegally set in the Pine Barrens, and they spring them with sticks before tossing the traps into a nearby pond. This has later plot implications.
* Secret Histories, the eponymous casino holds a high stakes poker game for the express purpose of wagering misappropriated souls. The protagonists infiltrate the game in order to rescue the souls and destroy the casino.
* Secret Histories: The Karma Catechist is a living database of every spell, ritual and magical concept conceivable in his universe.
* Secret Histories to work just fine, right up until the concept of phlogiston was disproven.
* Secret Hitler, the majority of Fascist wins come not from passing six Fascist policies, but from getting Hitler elected Chancellor after three Fascist policies are enacted. As such, this is basically required of the Hitler player - pass yourself off as a perfectly normal, cooperative Liberal up until the third Fascist policy is on the table, then begin angling for the Chancellorship.
* Secret identities are a big deal to the hero community; after all, who needs that much pressure every minute of the day? The government initiates the "Superhero Relocation Program", giving the Supers new identities to protect them from the public, who are
* Secret Identities secret because if one of them revealed the other's identity, the other would return the favor.
* "Secret Identities". The incident convinces "Claire" that creating a secret identity was a mistake, so she drops her disguise on the spot and takes off.
* Secret Identity: An alternate identity that is used to hide a secret double life.
* Secret Identity and many (not all) of its variants, the hero is a servant at the court, and disguises himself in armor before fighting in the tourney or battle.
* Secret Identity: An ostensibly normal person who is the true identity of a costumed superhero/supervillain.
* Secret Identity Apathy: The villains aren't interested at all in learning the hero's secret identity.
* Secret Identity Apathy: The villains do not care about the true identity of the hero who's always thwarting them.
* Secret Identity Apathy: The villains don't care about the true identity of the hero they're fighting.
* Secret Identity Change Trick: A character must improvise a way to get out of sight to change into their superhero identity.
* Secret Identity Change Trick: A person with a superhero identity must improvise a way to get out of sight to change identities.
* Secret Identity excuse for showing up, saving the day, and moving on without asking a single question.
* Secret Identity Identity: A person with a secret identity is conflicted over which persona is their real self.
* Secret Identity Identity: A person with two separate identities feels conflicted over which one is their true self.
* Secret Identity Identity: It's called into question on whether the alias or the secret identity is the real person.
* Secret Identity Identity: It's called into question on whether the hero regards their super identity or their secret identity as their true self.
* Secret Identity Identity: It's called into question on whether the person regards their super identity or their secret identity as their true self.
* Secret Identity if a masked intruder suddenly appeared in your bedroom, attacking

Dave with hair spray and a tennis racket until he's able to take off his mask.
* Secret Identity: Many superheroes and supervillains keep their real names and personal lives secret from the general public.
* Secret Identity of Speedy (Oliver's sister) and the Black Canary (Oliver's ex-fiancee) isn't hard to work out from that.
* Secret Identity Ra's Al Ghul, a vital clue that the Riddler used a pit without permission, and he would have his League of Assassins kill the Riddler no matter where he is. More recently, the Riddler has developed a mental block preventing him from remembering this.
* Secret Identity. They might still be vilified in the histories, but the heroes will remember their name with honor.
* Secret Identity Vocal Shift: A character changes their voice while in costume.
* Secret Identity Vocal Shift: A character's voice changes when they assume their superhero/supervillain identity.
* Secret Identity Vocal Shift: Changing the sound of your voice in order to protect your secret identity.
* Secret, if you let the Fettucini Flying Brothers argue over who gets to go in the cannon:
* Secret Ingredient: The mysterious something added to food to make it special.
* Secret Invasion and somehow immune to the ritual the Skrulls were using that allowed them to evade detection.
* Secret Invasion got stranded in New York City at the very moment that the Skrulls were gathering for their final push against Earth's superheroes, and Xavin, being an apostate, and thus a very high-value target for the fanatical Skrulls, tried to abandon the team, including their fiancee Karolina, in the hopes that the Skrulls would rather chase after an apostate than waste a bunch of Earthlings. After the team caught up to Xavin, Karolina gave them an earful.
* "Secret Invasion" has Nick Fury's eye patch covering the wrong eye in the final scene.
* Secret Invasion, John the Skrull's comrades acknowledge that this was the only proper way for him to go.
* Secret Invasion loses the Extremis inside him which allowed to basically "be one" with his armor, and even has to start using inferior models of his Iron Man suit.
* Secret Invasion, multiple characters who had been replaced by Skrulls were recovered and returned to Earth. And, yes, in a throw-away gag, Elvis was amongst them.
* Secret Invasion parody of same. "He loves you." "Who, Northstar? I know, it's just—HEY!"
* Secret Invasion Partway through, as Ms. Marvel and the Initiative are fighting Skrulls, Nick Fury and his Secret Warriors pop in to kick Skrull ass, and rescue the Initiative kids. And then Fury leaves Carol to be mobbed by Skrulls, thinking she's one of them (she isn't, by the way).
* Secret Invasion stories, which proved that the gods of certain alien cultures were every bit as real as the Asgardians and Olympians, although most of them were dead in the aftermath of the former and before the start of the latter.
* Secret Invasion storyline, the Inhuman Queen Medusa needs an alliance with Ronan, the ruler of the Kree Empire. He demands Medusa's sister Crystal as his bride. Over Crystal's objections, Medusa agrees.
* Secret Invasion the Skrulls plan to set up local Governors. Moonstone claims to be one, asking the Skrulls for control of South America if she helps them. However, this is a trick.
* Secret Invasion This wouldn't feel as bad if not for Disney XD taking inexplicably long breaks in between certain episodes, or the possibility that this arc contains more filler than any from the first season. Disney's DVDs arrange the episodes in production order. Because of this, the Avengers discover eight episodes in that an alien lives among them and take another five to find out who exactly the alien replaced. The viewer doesn't get to see what happened to the victim until after they notice a member has been replaced.
* Secret Invasion turned out to be bad when, in the course of a team-up, Clint

realizes the Bobbi who he reunited with was the Skrull and the real Bobbi still considers them divorced.
* Secret Invasion, whose eyes were shown glowing. This was obviously meant to imply that she (and by extension, one of her parents) might be a Skrull, but was really just an indication that she'd inherited superpowers from her parents.
* secret. It's revealed in Season 3 that Jaime, Cersei, Joffrey, Tywin, and Tyrion are also aware of Renly's sexual orientation. The Tyrells are a very powerful family that can easily shift the balance of power in the kingdom, so anyone with any political savvy avoids discussing Loras Tyrell's sexual preferences. Joffrey makes a massive political faux pas when he publicly brings up Renly's homosexuality. Everyone knows about it, but only someone as thoughtless as Joffrey would bring it up in the presence of the Tyrells.
* Secret Keeper: A character whom the hero has allowed to know their secret identity.
* Secret Keeper: A friend the hero has allowed to be aware of their secret identity.
* Secret Keeper, and Paris is annoyed when she finds out that Rory's friend Lane knows about them.
* Secret Keeper: A person whom the superhero has allowed to know their true identity.
* Secret Keeper issue, and his wife and father-in-law both run interference.
* Secret Keeper — A sidekick who knows a big secret about the hero.
* Secret Legacy, it also appears that Annie is destined to acquire Surma's role in the Court, as well as her powers.
* Secret Legacy: The hero's parents turn out to be special and they take after them.
* Secret Level: A bonus level of a video game that is hidden and not needed to beat the game.
* Secret Little Haven style that emulates 90s OSes and Web 1.0 websites.
* Secret Little Haven (transgender female main character, transgender female supporting characters, LGBT youth, coming out story, transphobia)
* secret love of Nightfall and the jerkass of the duo and Barbara being made the nicer one of the duo and more submissive and softhearted by comparison.
* secretly abducting their crew members and using their brains to augment its abilities. Apparently destroyed, it is seen at the end to be reassembling itself.
* secretly being female. The actress/prostitute Fiona, hired briefly to act the part of the maid Violet doesn't really have, uses her knowledge of Violet's dual identity to extract information on one of Violet's friends, whom she wants to seduce and settle down with. Since Fiona and said friend both end up genuinely happy together, Violet doesn't particularly resent this.
* secretly-competent version of Dan Quayle is an Evil Vice President variation.
* Secretly Dying: A character hides the fact that they have a terminal illness or lethal wound.
* Secretly Dying: A person's days are numbered, but no one finds out until after they die.
* Secretly-Gay Activity: A character with a same-sex attraction uses an "innocent" activity to pretend that the attraction is platonic.
* Secretly-Gay Activity: Disguising flirtation (or sex) with the same sex with a perfectly "innocent" activity.
* secretly given him a drug). After a very tiring day, he relaxes in front of the TV, only to find it's showing an ad for Loch Lomond whiskey.
* secretly in his back pocket It's lampshaded by Karen when she visits Fisk with the intention of provoking him into sending Dex after her.
* (secretly knowing it was the guy's last night on this mortal coil) goodbye, and go for it with Jack.
* secretly manipulating the heroes, but it will only work if they think they've escaped on their own.
* secretly marries Henry Percy. It is implied that this early loss is what drives Anne to be as cold and ambitious as she is for the remainder of the book, and that

she never is quite over it.
* secretly self-conscious nature, and Ichimatsu is seen burying it underground to keep the others from finding it.
* Secretly Selfish: Even if you're pursuing an altruistic goal, you may yet have a selfish ulterior motive.
* Secretly Selfish: Hides a selfish motive underneath an altrustic exterior.
* Secretly Selfish: You have selfish motives behind your acts of altruism.
* secretly testing them is also the three brothers' father and the White Mare's former partner. The film doesn't explain why he took on all these personas and neglected/hindered his family if they all had the same goal.
* Secretly Wealthy: A character hides the fact that they're fabulously wealthy.
* Secretly Wealthy: A character is rich, but doesn't let other people know it.
* Secretly Wealthy: A person is actually rich, but keeps their opulence a secret.
* Secretly Wealthy: A rich person pretends to be poorer than they actually are.
* Secretly Wealthy: A wealthy person makes others assume that they are middle-class or poor.
* Secretly Wealthy the whole time and using a fake last name so none of her coworkers would realize that she was actually a member of the extremely rich Tunt family. The thugs are trying to torture Pam into giving them information, but nothing they do fazes her for a second, and when one of them is repeatedly punching her in the face, she makes fun of his form and tells him to see if "your daddy will give you a roll of nickels."
* Secret Magic Control Agency: Ilvira force-feeds the king cookies laced with a potion, so that he falls in love with her and makes her his queen.
* Secret Magic Control Agency: In reference to the original Hansel and Gretel tale, one of the magical gadgets that the SMCA gives the siblings is a set of small stones that can be dropped while travelling, and later activated so they shine a beacon of light into the sky allowing the user to retrace their steps. Hansel is seen dropping the stones at various points during the film.
* Secret Magic Control Agency: The SMCA's headquarters are located in a massive cavern beneath a hair salon. Bridges connect different areas and there are hot air balloons seen inside.
* Secret Magic Control Agency, with Gretel wearing a dress in the same blue colour, and Hansel donning a magenta jacket.
* "secret menu", though they are all still variants of their burgers and fries.
* Secret Millionaires Club and learn from their business abilities as well.
* Secret Missing Episodes members by having the requirement be that the viewer must be a ridiculous age or have done some unrealistic accomplishment.
* Secret Mission: When the holodeck is lit on the right ramp and the display says "Holodeck 3 Ready", pull the phaser trigger three times. This starts a 20 second frenzy where every target is worth a weird number of points.
* Secret Mountain Fort Awesome was based on, with the Disgustoids only having a brief appearance and were seemingly mindless monsters.
* Secret of Cerulean Sand, which Captain Marsenay and Barsac eventually use to their advantage in order to infiltrate Neo City.
* Secret of Evermore, a prehistoric-styled jungle, contains a "Mammoth Graveyard" that serves as a battle arena. Sticking out of the unpleasant muck are the remains of woolly mammoths; giant tusks frame the path to the next area.
* Secret of Evermore came with a poster of two drawings that would seem to be ancient maps from the prehistoric and Roman areas of the game, plus a more straightforward map of the overworld.
* Secret of Evermore: Had alchemy, in what was essentially a VR simulation.
* Secret of Evermore had the Bugmuck, a swamp home to a gigantic (like the size of a small village!) bug carcass and bone dragons.
* Secret of Evermore has patches of quicksand fade in and out of existence in one of the areas. Stumbling into one sends you back to the start of the area.
* Secret of Evermore has whirlpools in a sandy area just before the Bugmuck. Which suck you down and then.. spit you back up somewhere else. Weird.
* Secret of Evermore in his unaltered form chuckling with the words "The End?" A

Sequel was never made.
* Secret of Evermore, is revealed to have been the one behind his disappearance, and also those of several of his contacts.
* Secret of Evermore. It's all an alternate reality invented by a professor who then got sucked inside, along with his friends, granddaughter, and robotic butler. It's implied that they could have left at any time, they merely chose not to. What's odd is that time seems to stand still while inside Evermore; all the important NPCs have spent thirty real-world years and don't look any older.
* Secret of Evermore reached the region, several characters returning from the latter series in cameos appeared there first.
* Secret of Evermore remained behind, later joined by the real Bluegarden and Tinker after she escaped from prison. Once the twin is defeated, the situation gets flipped with the populace relocating to Ebon Keep again.
* Secret of Evermore's Nobilia market blatantly uses this, though it's entirely optional. It's even pretty complex, with multiple traders giving the same item for different exchanges, but the rewards you can get through it are items that permanently boost your abilities, so it's worth your time and resources.
* Secret of Evermore: The Antiqua region is a mash-up of not only Ancient Greek and Ancient Rome, but also of Ancient Egypt with a dash each of pirates, Arabic culture, and Ancient China. Given the region was created from the thoughts of the curator of a history museum, there's a mingling of so many radically different cultures and time periods into one idealized place.
* Secret of Evermore the hero, causing the floor to give way and damage the castle foundations to the point of total collapse.
* Secret of Evermore, the hero learns that he's destroyed the balance between good and evil and that he needs to get himself and the others that came from his home universe out of the world of Evermore before it collapses.
* Secret of Evermore, the Omnitopia biome uses "credits" as its currency instead of paper money, though the whole game technically doesn't use paper money since Talons, Jewels and Gold are not paper either.
* Secret of Evermore. The only reason to buy it rather than just run across the desert is that the conman throws in a rare charm item as a bonus.
* Secret of Evermore, there are several man eating plants. They drag you in, hit a few times, and spit you out. The first two varieties aren't that dangerous. The third delivers instant kills regardless of level if it's awake. Luckily you can just turn out the lights.
* Secret of Evermore: The Sting spell summons a small swarm of bees on a foe for a non-elemental attack. It's fairly average strength-wise, but it's notable for its alchemist being fairly well hidden in a desert.
* Secret of Evermore; thirty real-world years have passed, but none of the four humans who went inside of the virtual reality are even a day older.
* Secret of Mana — only the Sprite gets dark magic, and only the girl gets Light. Naturally, the Girl has an empty space where dark magic would be; likewise the Sprite for light magic.
* Secret of Mana actually is spherical. It rotates normally on the X-axis, but if you fly along the Y-axis long enough, you'll eventually see some of the countries scrolling by upside-down. Interestingly, this makes it harder to navigate since most players aren't used to viewing game worlds that way.
* Secret of Mana and turns into the Frost Gigas. After they win, he returns to normal.
* Secret of Mana before revealing that he was the person they were looking for all along.
* Secret of Mana: Books that attack (largely via casting magic) are a recurring enemy. They also have the rare chance of displaying a naughty centerfold!
* Secret of Mana, both the girl and the sprite learn a few nature-based spells from Dryad, the Tree Spirit.
* Secret of Mana), but his defenses are not impenetrable to normal weapons when charged to sufficient levels.
* Secret of Mana - for a 16-bit pixellated fellow he's shockingly eerie, too.

* Secret of Mana had you collect eight orbs each for your eight weapons. Once hammered into place by a trusty dwarf, you could then proceed to ... wait a bit longer for your strongest charge attack (it also increases the base attack of the weapon).
* Secret of Mana has an empire simply called the Empire that wants to harness the power of the Mana Fortress. A group in one of its towns was formed to work against it.
* Secret of Mana has animated books that flutter around. They also flip their pages to cast spells.
* Secret of Mana. However, if the player is wiped out in this fight (you do have to try to lose), the party is just kicked out of the area with Randi being revived.
* Secret of Mana. However, soon after that, he is told by Jema that he is too young to be a hero, and he was only able to remove the sword because the power of Mana is weakening. Much later in the game, it turns out that he was definitely the Chosen One all along.
* Secret of Mana is a whip. Bit weak, but it's required to move around certain areas by swinging across gaps.
* Secret of Mana. (Making things really lame for Angela, whose story revolves around her learning to use magic.)
* Secret of Mana of 99 plus the limited inventory forces you to be judicious in using their magic, but one can easily just go through a dungeon using it sparingly, and then waste the boss in under half a minute with a barrage of spells.
* Secret of Mana, one of the towns has a house with a pair of married children.
* Secret of Mana pose when they heal themselves. If that's not enough, zombie enemies sometimes moonwalk.
* Secret of Mana, Purim's reason for joining the party is to rescue Dyluck.
* Secret of Mana Theater occasionally appears in the special episodes of the series.
* Secret Of Mana Theatre, Fawn and Seth use this ploy to sneak into Elinee's castle. At first the guards refuse to let them in until told the flowers being delivered are from them.
* Secret of Mana: The Emperor and his subordinates are being manipulated by Thanatos, an ancient sorcerer who hopes to create a "new, peaceful world". Due to his own body's deterioration, Thanatos is in need of a suitable body to possess.
* Secret of Mana, the hero gets banned from his hometown after pulling out the Mana Sword because the village elder fears that it will bring monsters to their village. It's possible to get back in using a glitch; if you do, none of the townspeople other than the one guarding the entrance seem particularly upset at you, likely because the programmers didn't give them any new dialogue.
* Secret of Mana, the hero gets captured by goblins who put him in a cooking pot, and stays there until the heroine rescues him.
* Secret of Mana, when the children of the world stop believing in him, Santa tries to use the Mana Seed of Fire to grow a wonderous Christmas Tree that will make them believe, and help him to spread the true meaning of Christmas™ across the world. This... does not quite work. The seed's power warps him into the hateful Frost Gigas, and the heroes have to fight him to break the curse. Yes, you read that paragraph right. That all happens.
* Secret of Mana where you get rescued from dying in the desert by the Tasnican Republic sandship and subsequently enslaved by the obnoxious bratty commander when the Boy and the Sprite find the Girl, the commander is trying to make her serve him, but she's not being very cooperative.
* Secret of My Excess": Rarity has one upon first hearing Spike intends to eat the Fire Ruby.
* Secret of My Excess", Rarity once again nearly falls to her doom, this time along with Spike after he, in his giant form capturing Rarity with his tail, returns to his original form. They are saved by Rainbow Dash and Fluttershy.
* "Secret of My Excess". Season 4 has Rarity addressing Spike even more affectionately as "Spikey-boo", "Spikey-poo", and "Precious Scales".
* Secret of My Excess": Spike gives a fire ruby that he had planned to eat on his

birthday to Rarity as a gift. At the end of the episode, Rarity shows Spike the jewel in order to snap him out of his rampage.
* Secret of my Excess-style, and is rampaging through Ponyville) for ruining her new cape:
* Secret of My Excess." That's one of the risks when you give a checkup to a dragon...
* "Secret of My Excess" was originally "Giving Dangerously" and then "Attack of the 50 Foot Dragon".
* "Secret of My Excess": While fending off a rampaging dragon, they get captured in a water tower. They're freed after the crisis has passed, adopt a heroic pose, then fly off without a word.
* Secret Of The Ooze, Tatsu immediately does this once his Foot Squad has obtained the last remaining mutagen canister before the Turtles could leave with it.
* Secret of the Slavers' Stockade open a door they get a shock from a stuffed bear.
* Secret of the Stars, the new enemies encountered include the Echo Cat and the Pumpking. The Pumpking is a short, corpulent fellow with a kabocha jack o'lantern for a head. Its English name "Pumpking" is a freeform translation of "カボチャ大王" or "(Great) King Kabocha". Echo Cats have the ability to summon Pumpkings either as aid or to fuse with. The fused form replaces the Echo Cat's head with the kabocha head to form King Cat, in Japanese "ドラネコ大王" or "(Great) King Tabby Cat".
* Secret of the Tripower. Constantly taking pictures of girls when they're together.
* Secret Origins of the Phantom Stranger that he is the Wandering Jew of Christian myth.
* Secret Origins suggests "The Avengers" as a possible name for the group, he gets this response:
* SECRET" or similar. Generally it's because they're decommissioned and living a new life as tourist attractions, but it's still entertainingly surreal.
* Secret Other Family: A character has another family that's unbeknownst to their other one.
* Secret Other Family: A character has more than one family and hides them from one another.
* Secret Other Family: A mistress plus kids—a whole second family.
* Secret Passage in the attic that looks like a tea party to disguise her seance setup.
* Secret Path (2016) is walking along the train tracks trying to get home.
* Secret Path (2016) life, mostly from his time in the residential school.
* Secret Path (2016) that the Cecilia Jeffrey Indian Residential School was this. Such hints include a girl being pulled away screaming and in tears by the arm, and one of the priest's entering the student sleeping quarters at night.
* Secret Path: A hidden path that bypasses obstacles by taking a route not many know.
* Secret Path: When characters use a secret route to get somewhere, often to get around obstacles or avoid being seen.
* Secret Police: A covert intelligence/law-enforcement agency that is responsible for monitoring and suppressing political dissent.
* Secret Police: A covert law enforcement agency serving an oppressive government, with the aim of violently suppressing any opposition.
* Secret Police. Alleged issues include spying on citizens, separation of families at the border, wrongful deportations, sexual abuse of women, and snatching people off the streets and into unmarked vans during the George Floyd protests. How much truth there is to these accusations remains hotly-debated.
* Secret Police and Assassin's Guild. Becoming Empress has not diminished her ability at her former job.
* Secret Police and occasionally used paramilitaries of various affiliations to get things done.
* Secret Police called the Cable Street Particulars, now reinvented as the Watch's

investigative and undercover arm.
* Secret Police, curious miners, teachers that question official versions of history, and powerful officials' mistresses. When the Survey Corps gets a little too close to the truth, they launch an extermination campaign against them by framing them for murdering civilians, smearing their already-poor reputation through propaganda, destroying their hideouts, arresting any of them that can be found, and sending out specialized units to kill them on sight, leading to a large civil war.
* Secret Police), however, is hinted to be far more complex than that. Depending on which theory you buy, he may be preparing to designate himself Dany's successor or become a full-blown Starscream.
* Secret Police on another major disaster and it's left unclear whether the cycle will continue.
* Secret Police, that spy on and arrest people that go against the government.
* Secret Police). The word "Okhrana" is a contraction of the latter, however in Russia proper, the most known contraction was the much less flattering "Okhranka" ("bad guarding" or "stupid guarding", formed with a colloquial and disrespectful suffix).
* Secret Police to return control of Cardassia to civilian authorities.
* Secret Police to the mix, as is implies that the agents could be absolutely anyone, no matter their age or social status.
* Secret Police traditionally comes and "disappears" people, since there aren't as many potential witnesses.
* Secret Police, verbally and physically abuses his gentle wife Rosemary. In the most chilling of several such instances, he wakes his wife up during the night, pointing a gun at her. After several tense beat panels, he pulls the trigger... and the gun goes click. He then tells her that although he didn't have the gun loaded, he implies that one day soon it will be loaded as he leaves the room.
* Secret Police: You never saw them, they didn't arrest you, and that isn't your tongue they just cut off.
* secret rebel army which eventually rises up to help liberate the country.
* Secret Relationship: A couple keeps their romantic relationship a secret from others for some reason.
* Secret Relationship: Characters are in a relationship that they don't want their friends and family to know about.
* Secret Relationship: They're in a romantic relationship, but pretend they're not to everyone else.
* Secret Relationship: Two characters in a romantic relationship keep it a secret from everyone.
* Secret Relationship: Two characters keep their relationships a secret from everyone else.
* Secret Relationship, which needs to be kept on the down-low because of City Manager Chris Traeger's policy against superiors dating subordinates.
* secret rituals — only a skillful mason would be taught them, so knowledge proved his skill. (The true origin of the Freemasons.)
* Secrets always taking Polaroids of the room beforehand so everything could be replaced exactly where it was after the search.
* Secrets & Lies: Cynthia thinks that Maurice and Monica don't have children because Monica doesn't want any while Maurice does. Going by the way she tries to cut her mother off when she confronts Monica, Roxanne has probably already cottoned on to the real reason.
* Secrets & Lies told each of the actors what his/her part in the story was and they each developed their own characters. As filming progressed the actors were hearing the secrets for the very first time.
* Secrets & Lies transforms lead investigator Ian Cornielle into Andrea Cornell.
* Secrets and Pies": In one scene, the bubbles from Pinkie's bubble pipe are used to wipe the screen.
* Secret Santa: Erik uses his expense account to watch lots of pay-per-view porn.

* Secret Santa has you playing as Krampus, stealing kids and punching obstacles in your way.
* Secret Santa Lynn is forced to dress up in a Miss. Clause uniform in order to make Mizuki (the child that she is babysitting ©Rokku-D) believe in Santa once more. However, in order to make her believe that she is the real Miss. Clause she has to go down the chimney which, Lynn did not realize that the fire place was still somewhat active which resulted in her falling butt first into the burning wood leading for her butt to be burning.
* Secret Scottish weddings did it for similar reasons as outlined above, but unfortunately the "keep it out of the papers" thing didn't happen and when he got back his new in-laws had already learned of the match and were pissed.
* Secret Secret-Keeper about these idiots), Alix quickly realizes that Lila claiming to be Ladybug's best friend is a lie—after all, Marinette has been leading the charge against Lila from the start. Likewise, this is implied to be how Chloe realized Lila was a liar.
* Secret Secret-Keeper: A character knows another person's secret, but doesn't let the other person know that they are aware of the secret.
* Secret Secret-Keeper for Valerie Gray being a ghost hunter...up until the end of Season 2, when he exposes her to her father to prevent her from taking his place in piloting an experimental power suit.
* Secret Secret-Keeper: Someone finds out the hero's secret identity, but doesn't let the hero know that they are aware of their secret identity.
* Secret Secret-Keeper: The person who is keeping your secrets that you don't even know about.
* Secret Secret-Keeper until season three. Before Jazz, we also get multimillionaire supervillain Vlad Masters/Vlad Plasmius; a nearly unspoken agreement has them keeping each other's identities secret.
* Secret Service is set entirely in Washington D.C., which is apparently just filled with secret agents, Soviet spies, and shootouts between the two.
* Secret Service of the Imperial Court, gets warned by a minister on his dictatorial policies right in his face. Not impressed, the Eunuch responds by delivering a slap across the minister's face... that results in the latter getting Slapped Across the Room. Landing with enough impact to actually kill him.
* Secret Service shows three Soviet MIGs shooting at American fighter jets escorting Air Force One.
* Secret Service, the agents in the Capitol Building shootout are all wearing this.
* Secret Shop: A business that is hidden away from customers who aren't actively seeking it out.
* Secret Shop: A shop whose business model somehow revolves around having great stuff and telling next to no one about it.
* Secret shoppers routinely employ this, to make sure that store clerks are providing decent service and to make sure that they aren't breaking any laws (e.g. selling alcohol/tobacco to minors). In some cases, young adults will even be employed to persistently insist on being sold alcohol/tobacco without a photo ID — to see if the cashier, eventually, caves in. Some do take it a bit too far, though — and will persist until the cashier threatens to call security (or even the police).
* Secrets. In this 1933 movie, John and his ranch hand are riding through Vasquez Rocks when they see Houser the cattle rustler passing the other way with John's cattle. The cattle are passing right in front of the pointy rocks when they're seen in close-up.
* Secret Six all the time. In fact, the roster of the Six themselves read as a veritable carnival of killers:
* Secret Six and belief that a surprise headshot is the kindest way to kill someone, it's not a terribly unreasonable demand.
* Secret Six) and expressing his displeasure towards the poachers that killed some lions. Seeing as this involves teaming up with the surviving lions and forcing the poachers to walk blindfolded through a field of their own traps, he is indeed scary enough to qualify for this trope. In a later issue he beats up some guards at a zoo

while starkers.
* Secret Six and Jeanette were meeting with the client at the edge of a cliff. When the client appears, his personal female killer grabs Deadshot by the throat and holds him over the cliff. Meanwhile the client's personal assistant monologues about how the best way to control someone is the death threat, and to prove his point, asks Deadshot what he thinks, knowing that his slightest whim can mean his death. Deadshot responds that he wasn't listening because he was too busy having sexual fantasies.
* Secret Six, and the last scene is of Bane, battered and alone, being hauled off to Arkham Asylum.
* Secret Six, any time Scandal gets removed from leadership, the team tends to fall apart.
* Secret Six as a way to get Catman to defend her from Deadshot and the others. In every following interaction between Cheshire and the Six, she's tried to manipulate and/or kill them.
* Secret Six, a slave trader who was building what he hoped would be the world's biggest and only prison.
* Secret Six: Black Alice and Ragdoll. Black Alice's attraction to Ragdoll and the lengths she goes to start a relationship with him squicks out everyone on the team. Including Ragdoll.
* Secret Six, but he simply takes it and replies, "I had those removed for getting in the way." Catman compliments him on how devoted he is to being a freak.
* Secret Six. Cheshire throws up, while Psycho asks for more, and Vandal Savage delivers the immortal line:
* Secret Six features a conversation between Catman and Deadshot in which they refer to "Norms," people who possess a normal sense of morality (conscience) as opposed to their own semi-to-full sociopathy. Since the main cast of the series is entirely composed of supervillains with an extremely... warped view of morality... this is a rather chilling use of the trope.
* Secret Six finish the job with a machete in the dad's stomach, though.
* Secret Six free card (as well as the heads of the people hiding it). Junior's henchmen were shocked at the amount:
* Secret Six had its lead, Scandal Savage, marry both her love interests: an exotic dancer named Liana, and a New God named Knockout. Yes, you read that right, it ended with a polygamous lesbian marriage.
* Secret Six happily accepts the description "the bent little castrated horndog" and delights in his ability to make absolutely any word or phrase sound unsavory, from "to my batpole!" to "cheese-stuffed manicotti". Black Alice is the first person in-universe to find Ragdoll hot; even Ragdoll was squicked out by this.
* Secret Six, he could see that she was brimming with love. She claimed to be his biggest fan, gushed about his past work, and even offered to return his original violin.
* Secret Six. He does anything a member of the Secret Six says while lamenting that he is not worthy to shine their shoes
* Secret Six, he enlists Scandal as a wingman (or wingwoman in this case) to make sure that things don't get out of hand.
* Secret Six in order to defend her, leaving Deadshot visibly frightened.
* Secret Six is a hideously disfigured, sadistic, and murderous crime boss. Junior, in addition to countless other crimes, has, by her own admission, "forced relations, men and women" and shows no sign of ever stopping her depravities.
* Secret Six is incapable of speech and uses a notepad to talk to her teammates, with phonetic spelling. It's played as equal parts heartwarmingly silly and heart-wrenchingly tragic.
* Secret Six is Scandal Savage and Jeannette, who were a couple when they were imprisoned in a gulag together but didn't work out in the long run for unspecified reasons. Even though they're no longer an item they clearly care for each other a great deal and have no apparent resentment or hard feelings over their breakup, and encourage each other to pursue new relationships. It's safe to say they consider each other their best friend.

* Secret Six, Junior disfigured her own body as a result of the sexual abuse from her father, the first Ragdoll.
* Secret Six, Mad Hatter punishes an underling by forcing him to drink tea... directly from the scalding-hot teapot.
* Secret Six: Most of the Six had unusual/horrendous upbringings, and as such have no gauge for what is "normal". Upon discovering the body of an assassin that one of their friends has just tortured to death:
* Secret Six notably quit the Six rather than going on a mission to Hell.
* Secret Six: Scandal Savage bites off an enemy's ear in battle; when the enemy cries out for its return, Scandal nonchalantly replies, "Sorry, I've swallowed it."
* Secret Six (second version, after the 60's originals but before the anti-villain incarnations)story from the late 80's in Action Comics Weekly (briefly an anthology series) had a corporation set a very corrosive cloud of acid rain over a small town, hoping to sell people protection from this 'new threat' later on. In the opener, the rain begins to fall; two teen girls part ways and try to make it home. One clearly does not. She passes out on the sidewalk, and the next panel shows she has been skeletonized; the next panel shows she is gone entirely, and the plot tells that the whole town was lost, though if everyone met her exact fate is never revealed.
* Secret Six straddled the line, focusing on a team of villains who were initially bootstrapped together by a mysterious backer, but banded together while taking "gray jobs" to make money.
* Secret Six: The first time Jeanette died was by way of decapitation, and any injuries to her neck causes her to panic as a result.
* Secret Six, the main reason Jeanette is attracted to Deadshot is his insanely high body count.
* Secret Six the mind-control effect. This stimulated his pleasure centers and led to him becoming a "hat addict" (and even crazier than he was originally).
* Secret Six, the rest of the Six hire a stripper dressed as Scandal Savage's dead girlfriend Knockout to hide in a cake and give her a lap dance on her birthday to cheer her up, but Scandal is too drunk to really realize what's going on (plus Knockout seems to possess the stripper for a moment to tell her to be happy). However, later Scandal meets Liana (the stripper) in a supermarket and they start dating.
* Secret Six. Yes, they usually have very bright and distinctive outfits, but when they go on night or stealth missions, the colouration changes accordingly.
* Secrets" Jack and Sam are each awarded the Air Medal for destroying two of Apophis's motherships that tried to invade Earth at the season 1/season 2 changeover. (Daniel and Teal'c were there, too, but they're civilians and aren't eligible.) The cover story is that they got the medal for their work in "deep-space satellite telemetry" (which Sam's father Gen. Jacob Carter rightly calls BS on, seeing as how the Air Medal is awarded for air missions in combat zones).
* Secret Smile, a couple (one of them being the lead singer) accidentally elicits this while escaping the paparazzi as a pesky reporter and various movie studio patrons the pair barges in on give chase.
* Secret Snack Stash: Hiding (usually unhealthy) food to be eaten at a later point.
* Secret Society Group Picture: The members of a (not so) secret society all posed for a group photo that provides damning evidence of their existence.
* Secret Society of Super Villains is basically a supervillain trade union, especially in its incarnation as "The Society".
* Secrets of a Successful Marriage", Homer tries to invoke this trope but messes up when he wants to talk about his private life without upsetting Marge.
* Secrets of a Successful Marriage. When Chief Wiggum shows up, saying "All right, Simpson! You were warned about teasing the order box!", Homer high-tails it out of there, prompting the cashier to say "Hey, I need closure on that anecdote.".
* Secrets of da Vinci: The Forbidden Manuscript, protagonist Valdo goes overnight — almost literally — from undertaking a simple errand for an unknown employer to being suspected of treason. His only hope of avoiding execution is to solve da Vinci's mystery and throw himself on the King's mercy.

* Secrets of da Vinci: The Forbidden Manuscript, though it's not clear for most of the game whether he's the good kind or the bad kind.
* Secrets of Dripping Fang toys with this idea without taking the full plunge. The orphan protagonists' father is resurrected as a vampire who becomes incredibly conflicted between his newfound need for blood and his love for his children. Some time after his attempted blood bank robbery but before his humorously failed suicide, he contemplates the pros and cons of turning his kids into vampires. On the one hand, they would live forever, never have to grow up, and would be able to spend eternity with their dad. On the other hand, killing his own kids would be a completely terrible thing to do. For extra laughs, the blurbs on the back cover of the books usually refer to him as 'Vampire Dad.' (Unfortunately the kids just call him regular 'Dad.')
* Secrets Of Piron - Ran for 39 episodes from 1960-61 and is currently presumed missing.
* Secrets of Rætikon resembles a gigantic owl. It's so large that its wingspan is enough to break apart the walls of the cave it was housed within.
* Secrets Of Sex wearing very tight and fanservice-y leather catsuit breaks into house, deliberately gets caught by its owner, seduces him with her sexy looks, sleeps with him, and then robs his house with him being unable to call the police because if he does, his wife will know he cheated on her with the burglar.
* Secrets Of The Clans, the third book of the spin-offs, in Germany. There are no known plans for translating the other five field guides into German.
* Secrets of the Fire Sea has a virtual example: the Joshua Egg, a mathematical puzzle left as a clue to the Conquests' researches. Every layer of equations that is solved reveals a document and the next, smaller "Egg" inside.
* Secrets of the Furious Five, Crane gives a variation on this when the instructor at the kung fu academy makes fun of his "skinny legs": "Yeah... my skinny legs. First time that's ever been mentioned..."
* Secrets of the Furious Five situation that many fans like to imagine them having a romantic relationship while they are at it.
* Secrets Of The Masters, Master Storming Ox is revealed to defeat his opponents by spotting their weak spots.
* Secrets of the Soul, all members of the Interstellar Alliance are supposed to be sharing medical information. The Hyach are holding out on Dr. Franklin. He discovers there was once another sentient species on their planet, the Hyach-do. There was some interbreeding. The Hyach passed religious laws that prohibited the interbreeding and eventually wiped out the Hyach-do. After they became an interstellar race, the Hyach censored this part of their history from official documents. Over time their birthrate slowed. Dr. Franklin discovered that the Hyach needed a genetic component from the Hyach-do. By committing genocide, the Hyach may have eliminated their own race also. It isn't revealed if the Alliance found a solution for them.
* Secrets of the Synod Horrenda introduces an undead monster called the Nightrager, which drives nearby creatures into a homicidal frenzy.
* Secrets of the Third Reich wargame by Westwind Productions, which has, amongst other things, mecha, powered armour, and vampires. To say nothing of the werewolves.
* Secrets quests rumored to only be attainable while in ghost form. While some easily-found quests do require you to be a ghost, and a GM has given a cryptic response suggesting that those are not the only quests of that type, no such hidden quest has yet been found. This is related to a rumor that you can stay in ghost form and revive at any graveyard with a Spirit Healer; this mechanic existed very early in the game's history but was removed shortly after launch. Now you resurrect at the same graveyard at which your ghost spawned.
* Secret Squirrel and Morocco Mole competed in a race against an arrogant rooster, Hot Rodney. The rooster won the race, but Secret and Morocco got the last laugh.
* Secret Squirrel (at least in the original series) would always dismay his boss by never leaving through the door.
* Secret Squirrel, a villain makes voodoo dolls of several people, including

Secret, and torments them. Secret asks what personal possession of his that his doll has. The villain says his hair, and Secret checks his tail and is annoyed and surprised to find a bald spot. Secret then makes a voodoo doll of the villain, leading to this hilarious exchange:
* Secret Squirrel cartoon is bald: Yellow Pinkie, Dr. Dangit, Double-Ex, Scuba Duba, and Hy Spy.
* Secret Squirrel, episode "Hot Rodney": Secret Squirrel, in his race car, is in an elevator rushing to save Morocco Mole on the roof of a building. Some "Ipanema"-style music plays as another passenger looks on uncomfortably.
* Secret Squirrel ever since the both of them were fetuses. Scirocco (the evil one) said it begun when their parents met.
* Secret Squirrel, Secret is assigned to bring in Won Ton, a rampaging panda, without hurting him as he's an endangered species. Secret decides to try psychoanalysis, but it doesn't work—Won Ton shoves him in the filing cabinet.
* Secret Squirrel: Secret Squirrel is under orders to apprehend a rampaging panda named Won Ton, but cannot harm him because he's an endangered species. When all else fails, Secret proceeds to keep Won Ton under his "protection," and at the same time causing Won Ton to beat himself silly while trying to attack Secret. Won Ton is finally placed in our hero's protective custody for "endangering an endangered species."
* Secret Squirrel show featured Squiddly Diddly doing a high dive, but the tank he's diving into has a shark in it. Squiddly uses his tentacles to helicopter himself back up to the diving board.
* Secret Squirrel takes an elevator in his car to the top floor of a building to rescue Morocco Mole (1993 episode "Hot Rodney"). During the elevator ride, which is accompanied by Muzak, a passenger wonders what the heck is going on.
* Secret Squirrel. The existence of quarks is no longer even vaguely controversial nowadays.
* Secret Squirrel The supervillain turned off every single light in the world and covered it in absolute darkness. Then Squirrel thinks of an idea to get a bulb on his head so he can have some light.
* Secret Stab Wound in a joust; said knight abruptly fell dead during the ensuing swordfight.
* secret strawberry, the strawberry will temporarily detach from you so you can pick it up later.
* secret subway system under Moscow, where it is allegedly has vaults full of pristine military equipment.
* Secret Sufferer was. At over double the length of the aforementioned stories, at 51, even two updates a weekday for a week only just made a dent.
* Secret Sunshine (not Satsuki). Of course, Ryuuko isn't sure as to how to respond to the idea.
* Secret Team" has Steven, Pearl, and Amethyst creating a team in order to hide something from Garnet. After they destroyed all the monsters Pearl and Amethyst decide to never discuss it again, though Steven is attached to the concept of their "secret team" and ends up telling Garnet the secret.
* Secret TestAlternatively, or additionally, seeing which of your enemies reacts as if in possession of a piece of false information determines which of them is the mole's boss, if that is unknown.
* Secret Test of Character and deciding it wasn't enough to keep him from helping people as Robin as he'd been trained for.
* Secret Test of Character. For example, perhaps the king wants a very particular type of man to marry his daughter, and the man who tries to murder the (perfectly nice, intelligent, reasonable) dragon will fail, while the one who offers it some of his lunch will pass.
* Secret Test of Character on her by offering her the chance to have a child, and she refuses, on the grounds that she can't offer the first of her species' second generation a stable home like it deserves.
* Secret Test of Character, reveals his Ishvalan ancestry to Ed and accuses him of the crimes the Amestrians committed to the Ishvalans. Ed, who was a child during

the war and is only half-Amestrian, counters that Ishvalans burnt his hometown and killed Winry's parents, which surprises Miles, who said he usually got pity as an answer to that question.
* Secret Test of Character: The actual test is a secret to prove what's in their heart.
* Secret Test of Character. The point was the workout of chasing Korin around and also learning to read one's opponent and predict his movements.
* Secret Test of Character. With that said, a pitch for a revival series surfaced in the 2010s that heavily implies the GKND, including 74.239 and Infinity, is actually malevolent, calling into question how true anything they say is.
* Secret Test of Thieving Skill: A character has another character steal something in order to test their stealing abilities.
* Secret Test of whether such personnel would in fact carry out their orders in a crisis.
* secret tests of character, since merely winning all of your fights will not guarantee a rank up.
* Secret."); the Fettucini Brothers indulge in this a bit as well ("Slacker!" "Weasel!" "Ruffian!" "Fop!").
* Secret Treehouse fanfic community) often refer themselves as "Treehousians."
* Secret tunnels were built by east Berliners under the Berlin Wall in various escape attempts.
* secret underground Nazi rocket base! — the camp was a particularly brutal one, where one in three workers (about 20,000 in total) died... largely pointlessly, since it turns out untrained, starving and unenthusiastic slave workers aren't very good at making hi-tech stuff. In fact, more people died constructing and working in these factories than were killed by the weapons they manufactured.
* Secret Underground Passage: A hidden path often located under old houses, or in bad guy lairs.
* "Secret Valentines" aired on October 12th, 1998, four months before Valentine's Day.
* Secret Vampire sneak into the cemetery the night after her funeral and dig up her coffin to let her out (which realistically takes a while, even with James being a vampire).
* Secret War: A covert conflict that's being fought behind a masquerade between the belligerents.
* Secret War legs especially in later art. Makes sense as he's an elite assassin.
* Secret Warriors has Daisy Johnson recruiting superpowered people that the government and other superheroes and villains don't know about. One of them is Yo-Yo Rodriguez, who Daisy meets after she firsts uses superspeed. She freaks out at Daisy, asking if she's a mutant. Daisy says no. Yo-Yo is relieved, but is quick to try to say this line, but Daisy beats her to it. Even funnier because mutants have long been a metaphor for gay people.
* Secret Warriors, the power coming from his eyes actually escapes, and he has trails of purple energy around his eyes. This occasionally scares people before he starts using his power, such as when he uses them on Norman Osborn.
* Secret Wars (1984). "... and there isn't an Emory board for a million light years!"
* Secret Wars (1984), and Titania having a phobia about facing the web-slinger that lasted for years.
* Secret Wars (1984), believing that the mortal would not be able to harm her, only to be knocked out with a single blow.
* Secret Wars (1984), define terrorism as "what the big army calls the little army."
* Secret Wars (1984) he gave new villainess Titania, or when he gets the Alien Costume.
* Secret Wars (1984) just ignores all the other combatants and spends the entire series working out a way to take on the Beyonder himself.
* Secret Wars (1984), the Beyonder destroys everything in a galaxy except for one

star.
* Secret Wars (1984) the first symbiote to land on Earth, nor was Peter Parker the first human to bond with one. Additionally, All-Black the Necrosword, the shapeshifting weapon wielded by Gorr the God Butcher, was revealed to be the very first symbiote.
* Secret Wars (1984), when Doctor Doom gains the power of The Beyonder. Doom cannot even sleep for fear of accidentally destroying the universe.
* Secret Wars (1984) where they return to Earth to fight the Sentinels that have now taken it over. Unlike either of the above two, though, it's never been revisited.
* Secret Wars (2015) and a single surviving world's only sun is actually Johnny Storm, the Human Torch. Some inhabitants of the Battleworld however, retain some memory of how the world was before and total absence of stars is one of the things that tip them off. Within Battleworld, though, the explanation is that Doom himself plucked them out of the sky to turn them into Mjolnirs for the Thors.
* Secret Wars (2015) Avengers roster, and aside from being handicapped by a brain-damaged and amnesiac host, spoke for itself.
* Secret Wars (2015), Doom actually winds up genuinely going straight (to the bafflement of just about everyone in the Marvel Universe), abdicating his rule of Latveria and (among other things) slowly winding up Tony Stark. After Stark is critically injured, he takes up the Iron Man mantle as the 'Infamous Iron Man', with a sleek silver-grey copy of Tony's latest armour with green eye-lights and his signature dark green cloak.
* Secret Wars (2015) Doom and this goes double if you are one of the Barons. If you're not struck down by Doom himself, it's either his Thors or one of the heroes unwittingly putting a stop to their mad plans.
* Secret Wars (2015) gets himself captured and reveals what Doom did to Grimm:
* Secret Wars (2015) in Battleworld to protect its people against the realms of New Xandar, Deadlands and Perfection, which are considered the most dangerous of all territories in the world, being populated by the Annihilation Wave, Zombies and Ultron Sentinels.
* Secret Wars (2015) is causing, it remains to be seen if we'll have a new, entirely renumbered Multiverse (most cross-media franchises not counting).
* Secret Wars (2015)! Much of this owed to the fact that Marvel, being overzealous in protecting from leaks, hadn't told the writers what Cyclops did aside from it apparently being really, really bad. Writers naturally assumed it had to be something seriously awful, hence the comparisons to Hitler, when the actual bad thing turned out to be kind of neutral.
* Secret Wars (2015) series, features only one member of the original cast, and has a very different plot.
* Secret Wars (2015) series "Star-Lord & Kitty Pryde", there's an implication that the Kitty Pryde in that series (from the Age of Apocalypse region) had a one night stand with Gambit the Collector, as Gambit keeps trying to get Kitty to talk about "the night they spent together in New Avalon". At one point Kitty even refers to it as "one night and a mistake", however by the end of the story Kitty reveals that the event of that night was actually Gambit stealing a sword that Kitty was keeping safe. It's never confirmed whether this happened as a regular burglary or if he stole it after they had sex.
* Secret Wars (2015) series (which is the official ending to Jonathan Hickman's run), however, ends with this trope pretty much in full display. With the multiverse destroyed, Reed Richards and his family (wife Sue Storm, son Franklin and daughter Valeria) take it upon themselves to remake the multiverse, creating entire universes from scratch, completely alone. The story pretty much acknowledges this is playing God, but argues that Reed and his family are the best people for the job.
* Secret Wars (2015) storyline "E is for Extinction", creating babies with the perfect X-Gene activated is something of a chic thing. However, it's not perfect — a baby born with one ability would end up with a completely different and unknown secondary mutation, so you could have a baby with hyper intelligence, who

ended up as a bag of skin later on in life.
* Secret Wars (2015), then the Thors come in and kill literally everyone still left standing.
* Secret Wars (2015) universe. The multiverse was restored at the end of the story, and only a handful of people (Dr. Doom, a pair who were with him and the people in the ships) remember Battleworld, the destruction and recreation of the universe. Everybody else remember the incursion, and that it ended; surely thinking that the Avengers simply saved the day somehow.
* Secret Wars (2015), we see Doctor Doom's masked visage in the glowing-white aftermath. Doom, who was outside the multiverse, confronting the Beyonders.
* Secret Wars (2015), where the Ultimate universe version of Reed Richards travels there and declares it as the main hub of the multiverse.
* Secret Wars (2015), which is made up of Shiklah, Werewolf by Night, N'Kantu the Living Mummy, the Invisible Man, Frankenstein's Monster, Man-Thing, and Marcus the minotaur with a symbiote trying to overthrow Dracula.
* Secret Wars (2015) would continue, more or less confirmed that the "new" Marvel Universe was essentially the same one as the old one.
* Secret Wars and clarifies that she's bisexual ("Anyway, I date boys too!"), but Jubilee's orientation hasn't been stated. The final issue has Jubilee kissing Frostbite, one of her female teammates.
* Secret Wars and Devil Dinosaur traveling through a Hulk-populated wasteland.
* Secret Wars became the new Thor after lifting Mjolnir. To avoid having two Thors in the cast, the show had Jane take on the name Thunderstrike after being given an enchanted mace by Odin (allowing the original Thor to keep Mjolnir).
* Secret Wars, Doom has Ultron disintegrate Kang as punishment for betrayal. Kang says, "You'll need me later, you fool! Don't — arrrgh!" After obtaining the Beyonder's powers, Doom restores Kang, who says, "— you realize that Kang is essential to... your... plans... Where am I?"
* Secret Wars II. After some experimentation, he settles on a superficially modified version of Captain America's body.
* Secret Wars II: During the second crossover, the Beyonder killed her, but was convinced that life was meaningless without death, and restored her to existence.
* Secret Wars II. Molecule Man later restores the stars, but it seems unlikely that he could have resurrected all the aliens presumably killed when their planets got blown up.
* Secret Wars II series, the energy of the Beyonder is shunted out of our universe and becomes a Big Bang, thus creating a new universe.
* Secret Wars, including Wolverine, all on his own. (Though in this case it should be noted that Spider-Man didn't actually "defeat" people like Colossus and Rogue, just tangled them up in webbing long enough for him to escape.)
* Secret Wars Kit is now grown up and a member of the Thor Corps. Kit sums it up by saying she used to idolize Captain Marvel as a child, and now has the power to fly and fight alongside her.
* Secret War: Spies, Codes and Guerillas 1939-1945 contains an inversion: he is generally unimpressed by the wartime spooks but describes the British secret services as "the least ineffective in the world."
* Secret Wars revolves around the A.I.M. corporation assembling and sponsoring their own team of Avengers.
* Secret Wars which had the remnants of the destroyed main and Ultimate Marvel universes fused together into one planet ruled over by Doctor Doom.
* Secret Wars who had spent most of the series to this point getting swatted around by lesser villains.
* Secret War to the heroes that took part in it after their victory. The idea was to keep the whole thing under wraps, but the heroes started to remember it, which caused problems.
* secret was presented with a parade of over 800 warships (ranging from battleships to tiny minesweepers) that were assembled for the Normandy invasion a month later.
* Secret Weapon: A hidden weapon typically revealed during or near the climax of the story.

* Secret Weapons" is a completely self-contained mini-arc where the only main character to be present is R2, with everyone else being a crew of naturally kid-appealing droids and their commander.
* Secret Weapons Over Normandy, at least in the dambusting mission, which is of reasonable difficulty. Later missions tread a jot into Airstrike Impossible territory, though.
* Secret Weapons Over Normandy features the Gold Guy come under attack by a German fighter plane, and then rescued by an American fighter, before wiping his brow in relief and projecting the arc.
* Secret X: If the contestant is wrong on both small item prices, meaning no extra Xs to go with the first one they receive, at least 2 Xs are needed to be able to make a tic-tac-toe with the Secret X in the middle column.
* Secret, yet retains much of his secret agent training. Lampshaded when he wonders to his associate why he memorized the license plates of the cars in a parking lot, and why he analyzed the combat capacity of diner patrons.
* Secta, to help them defeat Los Perros Del Ma. Once they finally did though, those same former Secta members, along with Bizarros member Escoria, violently turned on Cibernético. In the end the remaning Bizarros had to take on Perro Aguayo Jr and the first person to usurp Cibernético's position in La Secta, El Mesías, as members for help.
* Sectaurs: Warriors of Symbion was a line of action figures with an insectoid theme. They received a
* Section 31 creates a disease and uses Odo as a carrier to spread it to the Founders.
* Section 31 (Federation), a black ops agency so secret it doesn't even have a headquarters. Most of the Federation doesn't know exists. Those that do turn a blind eye to its existence. Its status as an actual government
* Section 31 is even more notable in that while all other said governments at least tacitly acknowledge their prospective organization's existence, even Section 31's name means little to nothing, as it could more technically be called
* Section 31 officer Sloan's preferred method of meeting/recruiting Bashir seems to be waiting in a chair by Bashir's bed, in the dark, until he wakes up.
* Section 31: Rogue, Chairos IV is tidally locked, giving rise to a species that is noted for being extremely robust.
* Section 31: Rogue, is tidally locked, with endless day or night depending, naturally, on which side you're on. Life exists on the twilight band.
* Section 31, the Tal-Shiar and the Obsidian Order are the cloak and dagger organizations of the Federation, Romulans and Cardassian. One episode of
* Section 31 (which may or may not exist) are this to the Federation. They do all the horrific, underhanded things Federation ideals forbid but are necessary to its survival. If it exists, it may have been deliberately set up by the Federation at its founding to be this. Or it may not. The details are a little vague.
* section 335.1 of the California Code of Civil Procedure establishes a two-year statute of limitations on actions for wrongful death in negligence, as in this case. The other problem is that even if the plaintiffs could still bring the suit, they would have to do so under the law as it was in 1940, and back then, California, like most states, still had a contributory negligence standard, not a comparative fault standard. In this case, the decedent's brother admitted that he was also partially responsible; since contributory negligence is a complete defense, it means that Rogers cannot be held liable at all.
* Section 4 also defines that "inability to discharge the powers and duties of the office of President" clause. Previously, there was no protocol for declaring the President to be incapacitated.
* Section 6, Subsection Delta contains the dress code, of which the only rule mentioned is that Rangers can't have nose rings.
* Section 6, Subsection Gamma: No Ranger is allowed to go into action without backup. (In the pilot movie, Buzz insists that he doesn't have to follow this rule because
* Section 8 assault, and after the battle lands to extract the infantry. It also

ferries in heavy armors and heavy tanks requisitioned by the player.
* Section 8 features the ability to instantly kill opposing players by dropping onto them from orbit when you spawn.
* Section 8 from 15000 feet in the air to the ground. In ten seconds. Among other things.
* Section 8 has shields which operate as an regenerating extra layer of health. However, these also are bypassed at close range, allowing for direct damage to armour, which needs to be repaired. Since the game allows the player to customize these attributes (among others), careful consideration must be made to whether one will be doing a lot of close combat or not.
* Section 8 that'a designed for dropping onto a planet from orbit, is built to withstand full-auto gauss rifle rounds, runs as fast as a speeding car, and (later on) is equipped with a jetpack.
* Section 8, you think "You know what? I don't need airbrakes." As awesome as it looks, it does leave you immobile for a second while your character and his armour recovers from the landing, which isn't always a good thing in a multiplayer shooter.
* Section P, Kate Five is killed by her nemesis Ohmega, and remains dead for a while, even as her lover Centennia mourns her. Eventually, her symbiote revives her and she returns to life.
* sections and memories of the original sophont, and 2. the sophonts involved were all kidnapped over a long period of time, although the perpetrator is still at large.
* Sections of the sixth film that take place in England were filmed in Norway and Western Ireland.
* Sectopod is equipped with an energy shield which is resistant to plasma weapons, and since it is usually encountered lategame when plasma weapons replace laser weapons, this can be a problem.
* Sectopods, the aliens' most powerful unit in terms of firepower and toughness across the series, is a bulky bipedal mecha-like construct. Despite the name,
* Sector Chief Andrew F. Gooley holds the unenviable position of direct superior to the
* Sector General are described as looking like prunes floating in bottles of liquid. To compensate for their lack of physical anatomy, they have ludicrously powerful telepathy and telekinesis.
* Sector General books, a stricken ship from a newly discovered race (called, oddly, the Ians) is discovered to be from another galaxy.
* Sector General books, which strictly speaking isn't confined to a single galaxy.
* Sector General details the events aboard inflatable life pods after an interplanetary liner suffers a reactor failure en route to Ganymede.
* Sector General do this on purpose. The euphemism of choice is "made a sound that did not translate." Alternatively, the untranslatable sounds could simply be non-verbal vocalisations (such as laughter, sighing etc). Considering how literal the translation computer seems to be (in one book, the heroine is worried because an Earth-human has threatened to use her intestines for hosiery supports; her friend, who is used to dealing with Earth-humans, explains that they often make meaningless comments like this and she shouldn't worry), it is more likely that expletives that have a literal meaning would simply be translated literally (for example, Earth-human expletives might be rendered 'Faeces!' or 'Mating!'), and no species other than that of the speaker would understand why they were supposed to be rude.
* Sector General has adjustable artificial gravity, which helps the doctors configure the various wards to an environment most suited for the species of patient in them.
* Sector General initially find them creepy and assume that they must be evil.
* Sector General is completely averted in favour of whatever the author mind could conceive. The effects budget is not an issue in novels.
* Sector General, meaning no contact before the discovery of FTL, but seemed to be much more reasonable with it, as they violated it four times during the series. Once was because of a pandemic (although, through no fault of the person in charge,

the cure resulted in a genocide), once was because of an environmental disaster, once was because the civilization was killing off another intelligent being on the planet (as well as itself), and once because the species involved were physically incapable of spaceflight, due to an inherent psychological problem.
* Sector General much less be able to move, in 1G conditions (if the belt failed it'd die of shock within minutes, assuming its exoskeleton didn't collapse first).
* Sector General natural weaponry, a nearby Sommaradvan is the only person who might be able to touch them intimately without being stung to death or impaled.
* Sector General novels, a Maintenance trainee gets lost in the service tunnels; because she's being tested on her navigational abilities, she's not allowed to get directions from anyone. Two other Maintenance workers notice her problem and, without acknowledging her, make several casual comments to each other that happen to include helpful directional information.
* Sector General novels are (mostly) set aboard the eponymous galactic hospital space station.
* Sector General. One of the Monitors explains to the viewpoint character, a surgeon, that Earth decided to have a war, which is apparently something the galactic government lets happen every so often in "Normals" so aggressive tendencies can work themselves out. They go so far as to provide a suitable uninhabited planet and place restrictions on what weapons are allowed. (The reason Sector General is taking in wounded is that this one got out of control.)
* Sector General series, a 384-story structure in outer space that houses such things as humans, giant furry caterpillars, six-legged elephant-things with their symbionts, 60-foot eels, telepathic gestalt intelligences, shapeshifters, superheated and cryonic beings and ones that metabolize hard radiation — to say nothing of the patients — all working together to make it a smashing hospital, though apparently finding suitable seating in the oxygen-nitrogen dining halls is a pain.
* Sector General series by James White, set on a space-station hospital, has so many races, they have a four-letter coding system to classify them rather than just list a few (or a few dozen). Even at that, humans have to share the code "DBDG" with two other (vaguely human-looking) species. There are well over fifteen species with at least minor speaking roles.
* Sector General series, described in the short story "Tableau", the famous Orligian war memorial depicts the greatest victory of the Orligian-Human war: not a battle, but the aftermath of one, and its sole survivors, an Orligian and a Human, whose decision to start a conversation instead of finish each other off was the beginning of the end of the war. The first version of the memorial was not a statue, but the actual starship wreckage containing the actual grievously-injured bodies of Grawlya-Ki and MacEwan, preserved in stasis until medical science advanced enough that both their lives could be saved.
* Sector General series, humanity has telepathic potential... in its evolutionary history. Human development took some steps toward it, but never got all the way and the capacity is now atrophied and useless. When some characters get contacted through it, the feeling is compared to having a wire brush taken to one's brain.
* Sector General series includes a story about the war that led to the series proper, as the humans and aliens were fighting close-up due to the alien Shield, which caused anything that would explode to do so at the edge, where energy beams would also dissipate. The humans managing to duplicate the Shield, left both species fighting in visual range, under the shields, with machine-guns, kinetic kill rockets and railguns.
* Sector General series. One weapon system consists of using a tractor beam and a pressor beam on the same target.
* Sector General series, with the FROB Hudlar (homeworld in excess of 3G, body plan more or less spherical with six prehensile tentacles) and FGLI Tralthan (homeworld 2G, rather like a hexapedal elephant, can easily be killed by a fall).
* Sector General: The cafeteria in the titular giant hospital station serves all the innumerable oxygen-breathing species. One is strongly advised to keep one's eyes on one's own plate.

* Sector General, the protagonist becomes the official chaplain to a hospital serving multiple alien lifeforms with multiple religions, despite himself being an agnostic.
* Sector General, the Sector General staff dose themselves repeatedly with stimulant injections to stay on duty through the waves of casualties brought in as a result of the Etlan police action.
* Sector General, to be sure, but at the end of they day they're still Gardai in space, and proud of it. (The Etlan War, for example, is described as a particularly widespread riot in Monitor Corps official documentation, and nobody ever uses lethal force. Ever.)
* Sector General translate as "human". As this is utterly useless to the medically-oriented protagonists, they frequently have to insist that their patients use the hospital's four-letter code description for different species.
* Sector Seven from the live-action movie and associated side-stories. We could tell you more, but A, that would be spoilers and B, we'd have to kill you. This site has no budget, and assassins are expensive. Save us the trouble.
* Sectors. They were implemented into the game to give players a way out of micromanaging dozens of planets at once, but the AI's
* secular liberals.) The organization did get pretty popular, having members from many other parts of Germany, and earning the hatred of the Catholic Church. However, it was banned by the Bavarian government and disbanded in 1785. According to the conspiracy theories, this was just the beginning: The Illuminati actually left Bavaria for Scotland, infiltrated the Masons, founded America, and now control the entire world from a smoke-filled room. This includes TV Tropes.
* Secular states in the Middle East have had a long history of military coups to protect against Islamist encroachments. Turkey has had multiple successful and attempted coup d'états since the founding of the Republic, and the Egyptian military has also stepped in several times to remove the monarchy (1952), and later, Mohammad Morsi's regime (2013). Saddam Hussein executed a self-coup in Iraq with military help in 1979, already being Prime Minister before he usurped the Presidency. Depressingly, the typical result is a
* Securing a high reward for their actions, and then forcibly shaking down their "customers" for even more afterward.
* securing real talent and a strong head coach. This change came about right when Lakers star Kobe Bryant began to decline and his team fell out of contention, and with the Clippers becoming regular playoff contenders, they began selling out.
* Security, attempts to implement this kind of thing have been largely unsuccessful, as the recoil from firing the gun tends to quickly ruin the delicate electronics required (and firearm users need their weapons to be reliable at all times.)
* Security Blanket: An item that leaves its owner feeling vulnerable if bereft of it.
* Security Cling: Grabbing onto another person in response to something scary or distressing.
* Security Cling: Help! I have to grab onto my partner because I'm so scared!
* Security firm Blackwater (currently Academi) tried doing this, and now its members have been accused of overstepping their authority in Iraq.
* Security guards will often have either a giant key ring or a single key designed to operate every door in a specific area, as will janitors, maintenance people, housekeeping, etc. With keycard systems of the sort found in offices and hotels now, it's slightly more involved - the lock system is told to accept certain cards as being able to open any lock, but as soon as one is reported missing, it will be disabled on the system and no longer open anything - at least if the place is competently run.
* Security Officein post-war Poland) but was able to escape using his disguise skills.
* Security Officer: Detective Joe Miller shares this role, especially in escaping Eros.
* Security Officer Felix (played by G.W. Bailey) cries this at the end of

* Security Officer (Is the primary source for combat detail: security, surveillance and
* Security Officer: Shadowman or Gyroman can move over hazardous areas; they scout areas, looking for key items to get to help the team.
* Security Officer: William Booth, though his main job on the ship seems to be being wrong about people.
* Security! (Worm), it literally takes him no more than a few days to fix Earth Bet.
* sedes stercoraria — according to that story, the cardinals took this precaution against a recurrence.
* Sedgwick Speech if he doesn't avoid Fritz's attack and get out of the salon.
* Sedna, sea-goddess of the Inuit, was thrown from her father's boat and had her fingers chopped off when she tried to cling to it. Her severed digits became the seals and whales upon which traditional Arctic natives have long depended for survival, and the loss didn't stop Sedna from becoming divine ruler of the sea and all that lives there.
* Sedna, the Inuit sea goddess. There are many versions of the story of how she came to rule over the sea, but all the versions involve her father
* sedoretu—if you concentrate. Le Guin was the daughter of an anthropologist and it shows.
* sedoretu. No-one in any of the O stories is even tempted to do it. "Mountain Ways," one of the O stories, makes it clear that everyone is supposed to be bisexual. It's considered odd and shameful for someone to only like one gender.
* seduced by Zeus unless Castor went with him, presenting the Gods with a tricky conundrum. Long story short, the brothers became the constellation Gemini.
* Seduced in the Sleepless City, the heroine is a reporter and writer for a women's magazine who becomes involved with a group of A-list celebrities and falls for one of them. How much of an obstacle the difference in their social class is varies from route to route, but it usually at least complicates matters.
* Seduce Me: In any of the boys' routes (James, Erik, Sam, Damien, Matthew), it'll come to a head when Diana makes an offer for them to return to the Demon World with her and leave Mika (the default name for the player) behind. To get the good ending, Mika interrupts to say she loves the demon in question. Said love will be returned if enough of the right options are picked. In this case, the sex that follows is entirely optional and won't affect the happy ending.
* Seduce Me (Otome) are shown to have very sensitive horns that act as a general erogenous zone, though this only comes up in the sequel. Animal demons, like the cat girl Eric is seen flirting with, are also shown to have unique erogenous zones, presumably based on their individual animals.
* Seduce Me: Since incubi and succubi can feed off of more types of romance than sex in this universe, the love interests are able to pursue different kinds of relationships with the heroine while still remaining nourished. Some routes even have them continue to live with her, no sex involved. A played straight example of the trope, however, may be seen in Erik, who is the most overtly flirty of the incubus brothers but becomes a gentleman for Mika when trying to court her.
* Seduce Me, the female protagonist can pass over the obvious five incubi love interests in favor of wooing one of her female friends (Suzu or Naomi) or the succubus Diana.
* Seduction Lyric: A speech intended to get someone into bed, in the form of a song or poem.
* Seduction Lyric wrote some overtly seductive poems, and the trope may well go back further.
* Seduction Of The Innocent. Comics weren't quite as innocent at the time as what survived into subsequent decades. Wertham was definitely playing it up, but the material is stuff even today's parents wouldn't want their younger children reading.
* Seduction of the Innocent the green light to experiment, as they were hurting in the wake of this turn in the medium. (Which in turn led to the Marvel Age.) All of this led to the terms "comic book character" and "superhero" being almost

interchangeable in the North American market.
* Seduction-Proof Marriage: A marriage where the couple are so faithful to each other that no seducers can steal them away from each other.
* Seduction-Proof Marriage: A married person refuses to cheat on their spouse no matter how much they may be tempted to do so.
* Seduction-Proof Marriage: Someone becomes immune to seduction due to their marriage.
* Seduction-Proof Marriage: When two people are so in love and committed to each other, no seducers can steal them away from each other.
* Seductive Spider: Spider-based characters are figures of attraction and fanservice.
* Sedusa at the end of "Something's A Ms." when the Girls and Ms. Bellum shave her head.
* Sedusa has black hair with red-maroon highlights. Her outfit consists of dark red long gloves-mittens and thigh-high boots, leotard, red fishnet stockings, and black pantyhose which she wears under the fishnets.
* (see above), didn’t turn out to be that great an idea. A brief scenario suggestion in the book does actually find a situation in which torpedo rams could be useful.
* Seeadler could possibly be a real German warship and not a practical joke.
* see aliens who imply they took it, but both times it was different aliens and they had a different excuse. Francine and D.W. also both accuse Arthur of stealing it, but D.W. is four years old and both like to tease Arthur.
* See also Doctor Silas Merlot. When Dr. Beetle is killed, Merlot attempts to pose the suggestion to Baron Wulfenbach that no one need know that the well-respected Beetle is kaputski. Unfortunately, the Baron is a little smarter and a bit more principled than most overlords; he despises traitors, and not just because a man willing to change sides that easily certainly can't be trusted to stay loyal to you. Merlot's punishment? He has to run Beetleburg, after the populace has been made aware that Dr. Beetle's death was the direct result of Merlot's petulant theatrics. He doesn't learn, either.
* See also Esper, part of the Shards of Alara block. Every creature in Esper has some amount of aether-infused metal grafted onto their body. This is okay unless they replace their whole body, after which they become twisted fiends called aether-liches.
* See also Frazzle, with his largely immobile big-fanged mouth, heavy dark eyebrows, and devil horns. In his case it's harder to believe the effect isn't intentional.
* See also her chant when she goes on strike in "Get the F Off My Lawn":
* See also Isaiah 14:12 — "How art thou fallen from heaven, star of Morning, son of the Dawn! How art thou cut down to the ground, who laid the nations low!"
* See also "Love the Way You Lie Part 2," which is largely the same song, but told more from the opposing point of view.
* See also Saint Nicholas, patron of children, brides, pawnbrokers, and thieves.
* See also Saul, who alternates between preaching and flirting with every woman he sees. He even straight out tells Ellen, another priest, that he's loose and may do "undesirable things" to her, but she thinks he's better than that. (His other female supports, like Cecilia, tend to see through his religious charade easily though.) But when he gets serious, well,
* See also Spock, with his Vulcan harp, not to mention all of the human high culture he seems to be an expert in. Like recognizing
* See also the double-layer spacedust repelling field the ships use to enable them to move at relativistic speeds without having to worry about running into much.
* See also the extended, Kafka-esque union/guild sequence in the film
* See also the myth of Perseus' birth. See, the oracle at Delphi told King Acrisius that his grandson would kill him, so he decided to prevent his daughter Danae from ever bearing a son by locking her up in a brass tower, where her weeping drew the attention of Zeus and he sired a child with her. Once Acrisius found out, he locked them up in a coffin and floated it out to sea in the hopes that they

would drown
* See also the planet of Solaris VII, which is known across the galaxy for commercial
* See also the two-way radio watches of Midnight, Dick Tracy, and Doc Savage (who debuted after Dick Tracy but used a radio watch before the other two).
* See also urchin roe sushi, which has the added bonus of having a consistency not unlike phlegm (which most of us
* "See a man about a dog" - an old excuse to where he's leaving without any apparent reason
* See Amid the Winter Snow by Peter Fenton invokes Krampus as the alias name of the elf blackmailing Santa Claus.
* see and hear him. Melinda sighs "I was figuring out how to tell you" and nods to the woman's corpse as during her rampage, she accidentally electrocuted herself.
* "See?" - A verbal tic actor Edward G. Robinson used. When characters in Looney Tunes use it, it's usually in a police or gangster context.
* SEED also feature the Eternal, the ship that Lacus Clyne captains and houses the METEORs when not in use, which has missile launchers for most of its weaponry. Though the exact number of launchers isn't given, going by what is seen on screen it has at least 74. As a result, almost every shot of the ship firing its weapons is an MMM.
* SEED, a similar scene happened with Amuro, too. In the TV series, he had a special heat-deflecting coating he had to put on mid-reentry, while in the movie the Gundam survives by holding its riot shield in front of it and venting its entire supply of engine coolant into it. Amuro fares much better than Kira, however.
* Seed, by Runestone Game Development, was a cel-shaded, "role play-centric" sci-fi MMO, set in a terraforming colony, focusing on cooperative projects, politics and crafting. It was cancelled in 2006 shortly after beta.
* SEED Destiny: no matter how opportune the moment is for a enemy to simply destroy the Core Splendor or the Flyers while they combine (especially considering the Core Splendor jettisons its missile packs, the only means by which the Impulse can defend its flyers pre-combination), they never do. Especially egregious when the Impulse's sudden appearance and subsequent transformation can stun an Alliance mobile armor and its three pilots into panicked staring for about forty seconds, and, later, Kira Yamato.
* SEED Destiny where, in the middle of a attack against an enemy mobile suit, Shinn's Impulse Gundam briefly becomes Kira's Strike Gundam from the previous series.
* SEED he wore the red "elite" uniform and pilot suit; his now wearing the same uniform as ordinary grunts implies that he was demoted as punishment for having defected during the previous war). On the Orb side Kira, Athrun and Cagalli have a specially colored Orb pilot suit and Mwu gets one with the same markings as his old EA Hawk suit. And Andrew Waltfeld gets a tiger striped pilot suit of undetermined design.
* Seeding of a Ghost: The protagonist's wife cheats on him with a nasty playboy, so the protagonist purchases a "demon foetus" to exact revenge only for the foetus to go out of control and on an uncontrollable killing spree.
* Seedless grapes and domestic bananas are in fact no longer able to reproduce sexually, having adapted to being cloned by humans instead. Going back to the original point that spawned all this talk of cloned plants,
* Seed of Chucky, John Waters's character dies when Glen accidentally scares him, causing him to back up into a shelf in his red room, sending photo developing chemicals crashing down on him and melting his face. It's even more egregious in that the photo developing process uses very weak acids, most commonly a citric acid or diluted vinegar. No chemicals used in small-scale photography are corrosive (although some can be quite toxic).
* Seed of Chucky, though Glen(da) isn't really into it like his/her parents are.
* Seedship: You can find a metal poor planet while looking for a new home for humanity. If you settle on such a planet, the human colony will eventually suffer

technological recession to either medieval, industrial or atomic (only if you managed to enrich scientific database of your seedship before or settled on a planet with high-tech ruins) level of technology. The colony may avoid that recession if planet has a metal-rich moon, in which case, they'll build a rocket and mine metals from the moon.
* Seeds of Dissent. The ship's doctor is Constantin Amoros, who shares a bloodline with Bashir, and therefore has a similar appearance. Early DS9 planning documents called Dr Bashir "Dr Julian Amoros".
* Seeds of Yesterday, Bart takes advantage of a window that overlooks his swimming pool to watch his adopted sister Cindy swim and sunbathe. She tauntingly waves to him when she catches him.
* Seeds of Yesterday. Bart thinks he's successfully seduced brother Jory's wife Melodie away from him following the latter being left paralyzed after an accident, but eventually comes to realize he's only a substitute.
* Seeds of Yesterday, Cathy is worried to notice younger son Bart repeatedly doing this to brother Jory's wife Melodie; her worry is justified. Later, she observes her son Jory doing this to the hired nurse Toni.
* Seeds of Yesterday: Cathy more or less walks in on her son Bart and daughter-in-law (married to Cathy's other son) Melodie—she sees her walking out of Bart's room wearing a negligee, making it pretty obvious what's happened, and her husband/brother Chris admits to having seen the two making out. Later, Cathy and Bart walk in on her daughter Cindy and one of her boyfriends going at it.
* Seeds of Yesterday, Chris ties his tie, and then promptly asks Cathy to redo it for him.
* Seed's success once even started talks that the Cosmic Era timeline could become the new Universal Century in terms of production of sequels and side-stories. However,
* Seeds with Leuce and Minthe before, but Persephone is the first woman he loves for real. Unfortunately this means he often acts like a lovesick teenager and do stupid thing in order to keep her by his side.
* SEED, the other side of the war has near total dominance in space and quite likely did something similar earlier in the war.
* SEED. The ZAFT military lets its best soldiers wear red suits and get away with almost anything.
* SEED were able to take stock footage to new levels. The system they used allowed for taking footage from one scene and digitally replacing the mecha in it with different mecha. Thus, stock footage could be created that used the same animation, but depicted different machines. The animators took advantage of this at nearly every opportunity, sometimes resulting in entire battle scenes that are almost frame for frame identical.
* See Here, Private Hargrove, (1942) it is frequently an object of punishment. The book's setting was before the U.S. entered WWII.
* see here. There's a second one that accuses Stephen Harper of giving live grenades to children.
* see how he did it: After the kids were unable to take a bath due to the water heater being broken, Homer attempts to fix it with a crowbar, thus causing the water heater to explode in a geyser.
* seeing a cutscene of the guilty party incriminating himself (most often the first case in a game), but obviously the characters don't know until the end of the case.
* Seeing all of the marks on the wall made by the thumbtacks Alexander Mahone, the FBI agent put in charge of capturing the escapees, realizes the depth of Michael's plan to get Lincoln out of Fox River. Mahone would later recreate Michael's plans on his basement wall in an attempt to get one step ahead of Michael and catch him. Mahone's was much of a Room Full of Crazy situation as he became obsessed with catching Michael.
* Seeing a marketing opportunity, a foot deodorant company decided to put up signs telling people to vote for a can of their foot powder instead of the candidates. The voters elected the can of foot powder.
* Seeing as Avis took the quote out of its context themselves, it is an example.

However, there was a comparison once upon a time: Avis was the second-largest car rental company behind Hertz. When that fact was mentioned to then-CEO Robert Townsend, he said,
* Seeing as how it takes place in the offices of a fashion magazine, the male characters of
* Seeing as Kemi is old enough to have three grown children, grandchildren and a deceased husband, she's likely much older than Chukwuemeka. Kemi mentions that Chukwuemeka's mother Ogeche objects to the age difference, further corroborating this.
* Seeing as Romo has rather piercing eyes, it's clear he does this for effect (along with everything else he does).
* Seeing as she bursts into a bunch of crabs a few seconds later, it's safe to say that the laws of physics don't apply to her.
* Seeing as she's a psychic child prodigy raised from infancy as a secret government scientific experiment to develop a perfect human weapon, Eleven does not exactly have a strong grasp of social cues or appropriate social behaviour... as witnessed in the second episode when, after being offered a clean change of clothes by Mike, Lucas and Dustin, she prepares to strip off in front of them much to their mortification. She gradually gets a bit better, however. It should also be noted that several of the previously mentioned boys, being rather dorky social outcasts, also have their moments of poor or inappropriate social behaviour without the benefit of this excuse (particularly Dustin).
* Seeing as they were revealed to be a sort of "Wish granter" of sorts. This may have something to do with it.
* seeing a tape she made as a child (which she can't remember) and not having a home anymore clearly affected her deeply. The last we see of her is her crying her eyes out after Spike has gone to fight Vicious.
* Seeing Clearly, Anzu Anzai is first introduced as this trope by answering "You may" when Kyoko asks for her name, along with being hypersensitive to being laughed at. Other examples include answering with a Witch's labyrinth when Homura asks where she came from, responding with "My butt has nothing to do with it" when Kyoko asks her if her butt's still sore from her laughing at her before, and telling a freshly contracted Hitomi to stop laughing "at her" and adding that she doesn't like jokes when Hitomi giggles nervously at something Anzu says and says "You must be joking."
* seeing cute animals surround her playing in his head. This could also be happening because keeping the knife in is preventing his body from healing the brain damage and making him hallucinate.
* seeing Cyrano deal with the bore, De Valvert mentions Cyrano's nose.
* Seeing Double had clones of S Club and various other celebrities that were artificially aged so they could take their places, but kept in a childlike state.
* Seeing Fate Averruncus display anything other than that look of utter calm on his face is so rare as to be unheard of. Even when he's caught completely off-guard (does not happen often) or is losing a fight (happens even less often), his face betrays only the slightest hint of surprise or annoyance.
* seeing how long they could stay in the water without reverting to mermaid form.
* Seeing how the series had never killed any major characters outside of flashbacks until that point, and that the Marineford Arc was all about saving Ace, it was pretty sudden when they were finally free and running away that
* seeing King Dedede being assisted by Luigi and Ness, both of whom Wario had previously turned into trophies.
* Seeing Misato’s fridge stocked with beer and junk food bothered Shinji so that he threw the junk food away and blamed it on the penguin.
* seeing multiples of everything to just pass out all the way and get rid of inebriation the dwarfishly hard way.
* "Seeing Red" also parodies this when Terrence is trying to think of a way to beat up Mac and Bloo:
* Seeing Red". Warren runs into Buffy's lawn, shoots a few times with a gun, and Buffy and Tara are both hit, which sends Willow on a revenge spree.

* Seeing something startling in a particular truck, Fall Swanhilde in
* Seeing stars whizz past a moving craft in pretty much every work involving space travel. At best they'd appear to be moving past very very slowly, unlike the way they move in fiction which seems to imply they are tiny and much closer. Most viewers and creators realize this, but it's done to show movement and to make said movement appear faster and less boring.
* Seeing that glaring loophole for what Angels are allowed to do and not do,
* seeing that he's distracted, decides to kick him in the nuts. He immediately collapses, and begs Kim to use her healing magic on "Little Black Star".
* Seeing that he's half-demon and can pretty much reincarnate at will, this tactic is pretty cheap.
* Seeing that the Yakuza of Tokyo had been recently eradicated, a group of South American criminals tried to fill the vacuum and get rid of the chief of the police by taking in hostage a group of middle school students from Mitakihara that included
* seeing the Diamonds on Earth notably startles the Off Colors thanks to her yell of fright.
* Seeing the difference between a person and the role they act or are forced into
* Seeing the moment. In this case, as it turned out, it was partly because he was inhabiting the goddess Sif's body, but the trickster god has used shapeshifting and illusion for similar effect on other occasions.
* Seeing the monster also leads to Durbin's line, "We need to get bigger guns!", which under the circumstances was a very rational reaction.
* seeing the opportunities to being paid as many times as possible for the jobs he's already doing.
* Seeing the Pattern. Although Lickity Split was already attracted to Pinkie Pie, Pinkamina doesn't begin returning his feelings until after she saves his life a couple of times.
* Seeing the Pattern, due to Pinkamina only receiving her final clue to the victim's identity on the day they are fated to die.
* seeing the photorealistic closeup, Patrick and SpongeBob are so terrified they think it's a monster. (Fun fact: the close-up is of a horsefly, not a butterfly.)
* Seeing the true form of the Greek Gods was said to have this effect on mortals, with one of the more famous cases being when Semele, a human princess, was tricked by Hera into convincing Zeus to reveal his true form to her since he had been coming to her in the night in disguise. When he finally relented and threw off his disguise, she was incinerated instantly. Thankfully, her demigod fetus was immortal so Zeus was able to take it and
* Seeing the vocal chemistry of Caruso and Farrar in his first decade or so as General Manager of the Metropolitan Opera, Giulio Gatti-Casazza
* Seeing Things camp. It had a single fantastic element: Toronto Gazette reporter Louis Ciccone suddenly starts manifesting precognitive flashes, which allow him to uncover and solve the show's typical mystery-of-the-week mysteries. However, in one very out-of-character episode, a mysterious, befuddled old man found wandering the streets of Toronto and claiming to be an alien actually turns out to BE an alien, complete with anti-gravity levitation powers and a laser battle with hostile reptilian aliens in a Toronto park.
* seeing Thor fly is to drain a tankard of ale with such gusto that it's noted Robert is probably looking down on him from the Seven Heavens with pride.
* Seeing Through Another's Eyes lets them experience another person's senses.
* Seeing Through Another's Eyes - The guest is using the senses of the host.
* See: In Season 1, Tamacti Jun plants a stiletto in both of the inner ears of an old man from a village he burned down in his search for Jerlamarel and his children.
* see, in this world, even liquids are programmable). But as it happened, transforming this stuff into actual living beings had the nasty side effect of erasing this crucial part of their memory — the part that also told them not to try and take over the universe.
* See it in action here. series — a good quarter of the final bosses will

stop and stare at your fishing pole/bug net.
* "See Jimmy Run" again with Carl after Sheen suggests they run away screaming at the top of their lungs.
* seek an honourable and violent death in all but name, right doon to th'accent.
* Seeker Bears. After his mother died and his sister was presumed dead as well, Taqqiq stopped worshipping the Spirits.
* Seeker Bears, but they use different terms for the seasons depending on the species. Polar bears have Snow-Sky, Snow-Melt, and Burn-Sky. Black bears and grizzly bears may share Cold-Earth, Fish-Leap, and Leaf-Time.
* Seeker Bears, different bears refer to humans as different things. Polar bears call them "no-claws", black bears call them "flatfaces", and grizzly bears call them "smoothpelts". Humans are usually referred to as "flatfaces".
* Seeker Bears has all of the main characters. They're a group of bear cubs who, by the end of the second book, are all on an environmental-themed journey together. They're noted to still be too young to even be away from their mothers.
* Seeker Bears has "flat-faces"/"no-claws"/"smooth-pelts" for humans (depending on the species saying it), "firebeasts" for vehicles, "BlackPath" for roads, and "death sticks" for guns.
* Seeker Bears in the second book and contemplates suicide. With her mother dead and her brother assumed dead, she loses her will because she's much too young to be on her own yet. Fortunately, she doubts whether her brother is actually dead or not and continues looking for him. He turns out to be alright.
* Seeker Bears measure months in moons. Bears use different terms for the seasons depending on the species: Polar bears have Snow-Sky, Snow-Melt, and Burn-Sky. Black bears and grizzly bears share Cold-Earth, Fish-Leap, and Leaf-Time.
* Seeker Bears series centers around four bear cubs of different species (polar bear, black bear, and grizzly bear) as they travel together. Only one of them, Lusa the black bear, has a grasp on humans (and even it's limited) because she was born in a zoo.
* Seeker Bears since male bears will sometimes kill a female's cubs to mate with said female.
* Seeker Bears, Toklo's rival, tells him that weak bears should be killed or else the healthier bears would die as well.
* Seekers Giselda's mother died when she was rather young. The reason hasn't been explained yet, just that Takchi took care of her like a brother through it.
* Seeker's Mask) flops onto her lap, causing her to think that she needs a bigger lap or a smaller cat.
* Seekers of the Sky and the Russian Khanate (it's mentioned that this world had it own version of the Napoleonic Wars). There are also mentions of occasional conflicts between the State's American colonies and the Aztec Empire. There is also the war that brought the British Isles under the State's control.
* Seekers of the Sky doesn't exist (to say otherwise is heresy of the highest order). Thomas Aquinas is considered a heretic. Killing is not a violation of the "thou shalt not kill" commandment unless it's done 12 times (with a few exceptions) thanks to a literal interpretation of the Redeemer's words.
* Seekers of the Sky duology, the State (the Europe-spanning empire) had Praetorian Legions as elite troops. Several such legions are mentioned with the Grey Vests being the most badass (they all had guns, a rarity in this world). Their counterparts in the Russian Khanate are the Semetskiy Guards. Nothing is known of the counterparts in the third power, China.
* Seekers of the Sky, Earth itself was miraculously stripped of most of its minable iron in the backstory, leading to a civilization that is still struggling with industrialization around 2000 and where bronze swords are still common weapons.
* Seekers of the Sky has the State and the Russian Khanate as unique names, but there are also three mentioned empires: the Chinese Empire, the Ottoman Empire, and the Aztec Empire.
* Seekers of the Sky's doppelganger), a reformed thief, who has discovered that he can cure cancer with a touch and a prayer. He truly believes that it's a divine miracle. Anyone who observes him, though, knows that he's simply using the Word.

However, the fact that he's using it to put cancerous cells into the Cold is no less miraculous.
* Seekers of the Sky, the Roman Empire never falls in this setting and evolves into something simply called "the State". It controls most of Europe and has colonies in Africa and the Americas.
* Seekers of the Sky, when two characters try to speak privately in Gallic, while Peter is giving them a tour of the city, only for Peter to ask in the same language if they'd like him to step away for a minute.
* Seekers of the Sky), which is repeatedly alluded to in the present-day narration but revealed only in small heaps across two books.
* Seekers of Truth), and Specter and Shade have consistent outfits mainly because their abilities help protect them from temperature extremes.
* Seekers of Truth; being blond himself, the author wanted to make a blond woman the most intelligent member of the team.
* Seekers of Truth follow this convention, partly to avoid ghettoizing the story, and partly... well, because it's not easy to find a spandex tailor that won't talk.
* Seekers of Truth got her start this way. Her end would have closely followed her start if not for the intervention of the Wizard.
* Seekers of Truth is part of a a line of magicians, descending from the real-life Maskelyne family. Jasper Maskelyne, his non-fictional grandfather, worked with the British Army against the Nazis, and his grand-father John was an avid debunker of fraudulent mystics and the like.
* Seekers of Truth is the scion of a line of magicians who have real powers that they use for the betterment of humanity, as well as to enhance their stage show.
* Seekers of Truth, Natalie Beckett aka Golem. Fairly attractive if you can ignore the stone skin. Apparently her boyfriend, Timothy Landerman aka Echidna, can. It helps that he's a venomous lobster-man.
* Seekers of Truth. When he's really bringing his A game, no one near him can detect anything that he doesn't want them to.
* Seekers: "She-bear" is not an actual term for female bears. Female bears are called "sows".
* Seekers: the animals have names from human languages (such as Tobi and Kallik) and characters keep the same name their entire life.
* Seeking a Friend for the End of the World. Camden, New Jersey, is shown to be a pleasant built-up suburbia. In reality it's far closer to the stereotype. Especially ironic, considering the film shows other areas in riots over the world ending.
* Seeking a Friend for the End of the World takes place in the two weeks leading up to an asteroid impact that will end all life on Earth.
* Seeking evidence for a belief one already holds, or eagerly accepting it, while disregarding or downplaying contradictory evidence. Often known by the ironic name "Proof by Selected Instances".
* seeking fame, inspired by Jacket's vigilante actions in the first game.
* Seeking Fame: One reason for people with "fame" as a goal is to become known to other people even after their death.
* Seeking Justice play Will, a man's whose wife Laura is beaten and raped. When he's in the hospital, a man approaches him offering his help to eliminate her attacker without Laura having to endure testifying even assuming that the man is caught. Will reluctantly agrees, in exchange for later doing the deed himself, so the rapist is shot. However, he can't murder the target (a child molester, they say), trying to warn the guy. This instead ends in the man's death accidentally. It's revealed that an entire group of vigilantes are operating in the city, and the man who he was ordered to kill is actually a reporter who had been looking into them (they murdered a whistleblower earlier too). It turns out they've become corrupted by their leader, who has them kill anybody he dislikes or endangers the group, not just real criminals. Even some local cops and reporters are a part of the group, explaining why they haven't been caught.
* Seeking Mister Eaten's Name disturbing things about that quest. Also, demons will serve you human flesh at their parties, but what else is new?

* Seeking Sato fanfic, lacks any villains besides unpleasant businessmen Asami has to deal with.
* Seeking the Intangible: Someone thinks an intangible thing or concept (such as a voice or a sense of humour) is missing and searches for it like you might search for your hat.
* Seeking the Intangible: You fail to realise that intangible/abstract things can't be sought for.
* Seeking the Missing, Finding the Dead: The search for a missing person ends with the discovery that the person in question has died.
* seeking to ban imports of British confectionery into the USA. Hersheys has the license to locally manufacture Cadburys products in the USA, however it does so to American production standards. Hershey's chose to restrict its import instead of sucking up to the Cadburys fandom. Expat Brits in the USA weren't happy.
* Seeking to understand a musical clue, Claire seeks a nun who turns out to know a young composer named Bach. She relates his music is "good but not the type to stand the test of time."
* Seeking Who He May Devour, it seems that Soliman and the Veilleux really want to do that to him.
* seek out battles, which was centuries ago when there were a lot more Dragons and a lot less Chaos, so perhaps the most powerful ones were tougher than their contemporary Daemons.
* Seeks Another's Resurrection: After Osiris got chopped up into bits and scattered all over the world by Set, Isis tracked down all the missing pieces and put them back together again.
* Seeks Another's Resurrection: One character seeks to resurrect another character who has died.
* seek to eliminate other villains which interfere in their schemes...which Sasuke is doing.
* Seel and Dewgong resemble seals with large protruding teeth and single horns on their heads, reminiscent of the tusks of a walrus and the tusk of a narwhal. Dewgong's tail also slightly resembles that of a mermaid.
* Seele is very prone to panicking when things don't seem to go exactly as the scrolls describe, which is just about every single time something a major event in the series occurs.
* SEELE kidnaps Gendo. While one of their members is torturing him, he mocks him quoting the line verbatim:
* SEELE, they recite various ritualistic phrases together, and refer to the process as the Red Earth Ceremony.
* "seelie" step for step. Strange lights in the night sky? Seelies. Missing time? Kidnapped by seelies. Encounters with odd humanoids? Seelies.
* see — with no penalty to their hit roll. This is due to a combination of being controlled by a psychic hive mind and the fact that their missiles are alive.
* see me?" and "Should I use my invisibility to fight crime or for evil?"
* seemed. Additionally, the victim's best friend immediately realised what had happened and it was up to Conan and Kogoro to prove it at the other girl's request.
* seemed normal, until one of them encounters a traffic officer, who shoots Phoebe in the stomach because of a minor parking violation. Death or limb-removal is the only punishment for any "crime," up to and including being a potty-mouth.
* seemed to do their job. They were also the most visible portion of the KGB, wearing dress uniforms in their marches around Red Square.
* seem. However, when the Moriarty character returns in a later episode, Data successfully deduces his deception and saves the day.
* seem impossible and require at least two people. Chuck responds by writing down some things he did, one of which makes Miriam's eyes widen and results in this exchange:
* seeming, especially with how losing her affected him for a long time, and Martha had been in love with him but he, being the Doctor, either didn't notice or chose to ignore it — in part due to him still pining for Rose — and she eventually left because she realized he wasn't capable of returning her feelings.)

* seemingly abandoned spaceship is intercut with flashing images which, at first, look like closeups of human faces with far too much red...and are revealed immediately afterwards to be from a photo of the crew celebrating a birthday party against a red backdrop.
* seemingly angelic victim It turns out that she runs the gamut from taunting people to outright blackmailing them (which is what finally gets her killed).
* Seemingly averted in "How Sagwa Got Her Colors". Sagwa accidentally gets ink on the magistrate's rules and worries she'll get in trouble for it, but the magistrate ends up liking the new rule and praises her. Her mother, however, seems to feel less positive.
* Seemingly averted though in the distant past, with neither Princess Platinum nor Princess Amore displaying any ability or inclination towards combat.
* seemingly disturbing entrance, where he is a stand-up comedian who is sick of being inside a chocolate candy, and his jokes are intentionally unfunny, yet they can be jeered or cheered.
* seemingly eaten by the wolf in "Peter and the Wolf", the others imagine him waving goodbye as he is about to cross the gates to Heaven.
* Seemingly every person of higher rank in the Imperium of Man, Chaos, or other factions in the
* Seemingly, every teen-aged boy in Quahog will sleep with any teen-aged girl... except Meg Griffin, who is portrayed as so hideously ugly that boys will go out of their way
* Seemingly half of all hip-hop/rap songs (at least) are about the rap scene, other rappers, how hard it is to be a rapper, etc.
* Seemingly Hopeless Boss Fight: A boss fight initially appears impossible to win, but a cutscene later the player has no problem taking down the boss.
* seemingly indestructible and is immune to the sleeping darts of Ana.
* seemingly killed alluded to repeatedly in the first season), and Black Mask's False Face Society.
* seemingly kills Professor Farnsworth and neither she nor anyone else cares in the slightest.
* seemingly mortally injured at the end of the Inquisitor Ingrid arc, Mord grows increasingly insistent that she will not die.
* Seemingly, Mr Moore from Royal Republic's 'Underwear'. "I can see your underwear/from down here!"
* Seemingly parodied with William de Worde, who transplants this trope into the world of
* seemingly perfect one. His real situation is much worse: he's cocooned by giant spiders and slowly being eaten, and as a result of his failure everyone presumably dies.
* Seemingly played straight but ultimately averted with The Darkness in the three-part special. It eats planets, but it's just defending itself because the denizens of the planets he's passing by freak out and attack it for looking menacing, when it's all sorted out, it spits out everything/everyone it and its termi-errr, eliminators ate.
* Seemingly Profound Fool: A person is thought to be a genius but isn't.
* Seemingly Profound Fool: Everyone thinks this guy is a genius, but he's really a dumbass or just a naïve fool.
* seemingly random falling object knocking her out cold. Uiharu and Saten immediately start panicking and babbling to no one in particular about buying the manga and its accessories.
* seeminglyreaction to an opponent's strike, which may be used for the opposite effect.
* Seemingly subverted when Ichigo fights Renji the first time. While Renji pauses to gloat about how much more powerful he is than Ichigo, Ichigo strikes. Of course, then it's Ichigo's turn to stop and gloat.
* Seemingly to make a version appropriate for younger viewers, 1991 saw the release of
* Seemingly very few on the Internet know that there was an original

* Seemingly-Wholesome '50s Girl: A love interest who looks pure and wholesome on the outside, but has some dangerous or unchaste practices when no one's watching.
* Seemingly-Wholesome '50s Girl: By day, teenagers and young women of the suburbs are sweethearts. By night, they go wild.
* "See Mr. Peanutbutter Run" (the fourth season premiere) is notable because it doesn't feature BoJack
* Seems a bit fast though: if the average human lifespan on all of earth is say 50 years, than the population would grow with a staggering 2% a year. This trope only a problem in the long term. (Though in its defense, the show mostly shows us overpopulation in hospitals, which would happen far earlier than overpopulation of Earth.)
* seems, and in one case, thinking humans made themselves look more "familiar" so as not to freak the angara out.
* seems do it, despite being anything but a killer to this point, and warns him so hopefully he won't do it.
* seems just a tail short from being a catgirl give her a tail and cat ears.
* seems just because he knew giving up the information said hellgod was looking for would hurt Buffy profoundly.
* seems like it exists, like it's just right there when you look at it, and it's between two other identical houses, so it would make more sense for it to be there than not, but...
* Seems Like Old Times, the main character Nick, chased by the police for a crime he was forced to commit and seeking help from his ex-wife, has to hide under a bed when the ex-wife's husband comes to confront her about the recent strange occurrences. He'd do just fine if the husband didn't stand on his fingers.
* Seems like we'll never find out now what was going on with that damn spy pen in
* Seems more prevalent for only Akane to misunderstand or for her to instigate the misunderstanding in the anime. In the manga, it's other people just as often, especially in the Hinako introduction arc.
* seems not to be bother, as they were bust with a friendly game of arm wresting.
* seems senile. She's being shunted back and forth between two different time periods at random moments. She gets confused as to what time period she's in and whether she's talking to Adora or Mara. Her disorientation at being toggled between two different time periods can be interpreted as an allegory for dementia.
* seems slower. Another experiment claims that details are not perceived quicker in high-adrenaline mode. Although they used details not too related to the perceived danger source.
* seems ("They're Chewy!"). They are actually named for a milk company which has nothing to do with Alaska.
* , seems to be about a clumsy father and someone, unable to take it anymore, requesting him to go away:
* seems to be a cliché evil overlord Bond villain at first. By contrast, Allysion and most of the Angels are quite genre blind, with the notable exception of the very savvy Jesus.
* Seems to be a cyclical thing for the show. Near the end of Season 7, secondary characters began to return or get introduced, and Season 8 continued to build up the character count. Probably in preparation to
* Seems to be a favorite of his, as he employs the trope yet again in
* Seems to be a lesson most of the Brady kids need to learn at some point. After being complimented and given advice by Major League pitcher, Don Drysdale, Greg began thinking he was ready to go play professionally. His attitude and poor performance got him kicked out of a game, and he felt stupid afterwards.
* Seems to be a major factor in Faith's decision to turn evil. Despite being a Slayer just like Buffy, Faith often felt like she was the backup and that she didn't matter as much as the other slayer. This, coupled with her low self-esteem and the fact she was blamed for a lot of mistakes (which in retrospect where just as much Buffy's mistakes as they were her own) caused her to snap and join the Mayor's side. In contrast, the Mayor often treated her with respect, gave her a nice apartment and shiny new toys, and often praised her abilities as being better

than Buffy's. Despite the fact that the Scoobies probably didn't intentionally snub her, their relationship wasn't nearly as strong with her as it was with Buffy, which does make it understandable why she would feel this way.
* Seems to be an actual mystic rule binding the Maiden, the Mother, and the Crone in
* Seems to be happening in Chapter 4 between Cailin and Whitney in their shared quest to find out the fate of Whitney's
* Seems to be part of the Quincy honour code that Ishida lives by. He fights a shinigami vice-captain to protect Rukia, despite having professed to hate her only a few days beforehand and gets outraged at Mayuri's treatment of his daughter Nemu despite the fact that Nemu attacked him. It's lampshaded by Mayuri himself.
* Seems to be played straight with his father, though. Goujin got the idea to learn it after his father told him about a hissatsu he heard about from the mainland which he thinks is named "Fire Lemonade", but a hissatsu with this name didn't exist at that time.
* Seems to be the explanation for the successes of, if not Scarlett, then at least for Harold and Clancy in
* Seems to be the main theme of "She's Like the Wind" by Patrick Swayze.
* Seems to be the normal outfit of Asari Commandoes. "Commando leathers" are mentioned a few times in explicitly fetishistic context.
* Seems to be the way for society in general as by the 29th century, where "You can go to hell" is a complete
* seems to have been intended as a command to kill all military prisoners (which was bad enough), but by the time Nanking fell the normal Japanese commander was prostrate from sickness, and his replacement took a rather more free-wheeling interpretation of the command.
* seems to have completely understood the telepathic message and leans over to whisper something to her mother... who then discreetly passes Robin a tampon. Lily then looks over with a very self-pleased "you're welcome".
* seems to hold himself together much better than the other two spies even after The Reveal
* Seems to run in the family; a comic released prior to his (and the Soldier's) update reveals that both the RED Demoman's parents are blind, a result of the family profession being demolitions.
* seem that the first digit may indicate galaxy, since every Milky Way address seems to begin with "P," while every Pegasus address seems to begin with "M" (in spite of common sense suggesting it should be the other way around).
* seem to be a troll, and may just be some kind of animal serving as a figurehead.
* seem to come from her being like this to all of Equestria. She seems genuinely sad that the ponies who ended up in Ravnica have gone native, but that doesn't stop her from considering mindwiping and kidnapping them back, or in the case of Applejack and Rainbow Dash, killing them and lying to their friends. Feather theorises that the reason Celestia is doing this is to uphold the status quo.
* seem to fall in love every time they meet, despite their memories constantly being wiped, no matter what personality each of them have been imprinted with. Even in their blank state, they gravitate toward one another.
* seem to have nothing to do with each other. The whole story-pair is probably best summed up by this quote:
* seem to often forget all their training at the drop of a hat an assortment of random fighters manage to form a very tight and cohesive formation, and even adapt it at a second's notice with no prior drilling!
* seem to take this to extremes spring to mind; it's been hypothesised that they were formed from reading out the results of a game of Scrabble. Jeff Mangum claims there's a deep, long story behind the name "Neutral Milk Hotel" but he doesn't want to tell anyone due to its personal nature.
* Seen again at the end of "And Then There Were Fewer" when Stephanie's body falls from the trunk of his car.
* Seen again in "Devil's Due", when Data plays Scrooge in a holographic recreation of

* Seen again when Millenium begins its invasion of London. The troops, being
* Seen again with Spike in "Dragon Quest" when he decided to join the Great Dragon Migration.
* Seen also in the Draper children. Sally is aggressive, sometimes a tomboy and sometimes a bully. Bobby is sensitive and quiet.
* Seen and Not Heard: Bet's rabbi is forthright while advising her, even if it comes across as harsh.
* seen and not heard in the Nelvana series, but gets her first (and only) speaking appearance in "Home Sweet Homeless" when she receives a fountain (unknowingly from No Heart) which floods the Care Bear Cousins out of their home.
* Seen and Not Heard: In the prologue, Bet's dinner with her family ends up turning into an argument.
* Seen and Not Heard: One of the pieces of advice Bet's rabbi gives her: "... what keeps you on the good side of the world is doing good for the world despite how it’s treating you. And if you can’t do good, just don’t do harm."
* seen as bad. God may "punish" an angel by turning her into mundane human.
* Seen at the start of the movie when two hookers Caleb and his friend are given have puncture marks on their necks to show the two are unwittingly making out with undead women. Curiously, the first one has a dry and partially healed one, indicating she was turned a long while ago while the second's marks are red and swollen, showing she's a recent victim.
* seen complex and controversial topic, if a school performs poorly then parents who both value their children's education and have the resources and the time to try and get them into a better school will do so, leaving the school with the students whose parents can't or won't send them somewhere else or who have been kicked out of some other establishment for bad behavior. A similar phenomenon can happen to the staff as morale falters and it becomes harder to attract talented and motivated people to a school where their efforts will often go unappreciated. The resulting positive feedback loop can carry on for decades if drastic action isn't taken. Experiments with tying funding into attendance and/or exam performance in some countries haven't helped.
* Seen during the pageant in the episode "Hearth's Warming Eve". After the three bickering rulers of the earth pony, pegasus, and unicorn tribes get stranded in a cave during a blizzard, the rulers start arguing over who gets what part of the cave, with the pegasus leader eventually starting them on drawing lines in the dirt.
* Seen frequently in shopping malls, which often cover up vacant storefronts with temporary walls. This is more obvious when a department store vacates a mall, often resulting in a hallway that abruptly dead-ends in a wall. In some cases, the vacant anchor is even torn down, creating a more glaring vacancy.
* Seen here burying dinosaur bones to confuse the minds of men in this ironic Teach the Controversy
* seen here, the titular character and his dog are trapped in their house by a tiger. They start piling up chairs and such in front of the door to keep the tiger out—but the tiger simply ties a rock on a rope to make it sound like he's still pounding on the front door, climbs in a window, and watches them continue building the barricade without even noticing him for a while, even handing the dog a few items to add to it before they realize he's inside with them.
* seen how ordinary guns are abundant, damage a lot more and don't drain all your energy in four shots).
* Seen in a chemistry text: "Electrons leave the left." The initial "e" in "electron" has the same weight as "the".
* Seen in a comic, where the title character makes a gravy boat, but after being mocked, turns to his friends for help, ending up with something resembling a jet pack crossed with a water gun. Fortunately, he decided to go back to his original design before it was too late.
* Seen in an Easter egg in "50 emails", with Old Timey Strong Bad receiving a "Supra Modern Telegram" with a variation on the "How do you type with boxing gloves on?"

* Seen in an episode where Danny is surrounded by them when he falls for
* Seen in earlier X-Men teams, too, where the physical mutations seemed to pop up only in male characters —
* Seen in episode 2, when Ryosuke tries to stop Lisara and her cousin, Quele, from fighting. He unintentionally ends up with one hand on each of their breasts, but
* seen in gameplay is a nigh-on mythical treasure, totally unheard of.
* seen in the Comic-Con trailer Hawkgirl, Apache Chief, Black Vulcan, Samurai, the Wonder Twins Jayna and Zan, and Gleek.
* Seen in the episode "Cry Ed". After failing to win sympathy through feigned injury, Eddy decides to get injured for real, and tries to get Edd to punch him in the face. Completely ignoring much protest from Edd, Ed decides to save him the trouble and
* Seen in the first episode. The room is covered in covers from Castle's books, drawings of the death scenes, and pictures of the victims and Castle himself. The owner and maintainer of the Room Of Crazy
* seen in the games themselves treatment. However, the lore behind each gives them significant cultural characterization as well. To note:
* Seen in the multipart episode "Notes From The Underground" in the 2003
* Seen in the police interview with Texas serial killer Steven Hobbs on the episode "Predator" of
* Seen in the segment "A Noun is a Person, Place, or Thing" as the narrator engages in some
* Seen It All: A character has been through enough experiences that there is no circumstance too weird for them.
* Seen It All during their adventures with the Doctor, so know when a situation has arisen that requires their unique talents. People who've been shown to have the TARDIS phone number or some other means of contacting the Doctor include the Brigadier, Winston Churchill, Martha Jones, and the Pond family.
* Seen-It-All Suicide: Character commits suicide because they think they've experienced everything they can.
* Seen-It-All Suicide, which is problematic when the whole gag is its flippancy.
* Seen It All", where the Tenth Doctor acknowledged trying to look old and important when he was young.
* Seen it a million times: An exceptionally strong character will grip the hand or wrist of another character and apply pressure enough to cause pain, while exhibiting no outward signs of effort. Extreme examples will cause the gripee's knees to buckle in pain. Often used by the
* See No Evil 2: Tamara, who is fascinated by death and serial killers, leaves the party with Carter to go look at Jacob's body in the morgue. The experience of being in a room with the body of a real murderer arouses her and she and Carter begin to have sex. Jacob suddenly awakens, and kills Carter while Tamara escapes.
* See No Evil 2, there is absolutely no explanation given as to how Jacob Goodnight managed to survive the original film. For one, although nigh-indestructible murderers are common in slashers, Jacob was very clearly portrayed in the first movie as a normal human being who just happened to be of hulking size - though he did live after getting shot in the head, there actually is a slim chance for a regular person to survive such an injury. Second, the end of the film practically goes out of its way to ensure the audience that he died, as he's not only stabbed in the eye, but he falls several stories and his heart is outright shown to have been punctured, which is completely guaranteed to kill anyone. One could say that a sequel was not anticipated at the time, but with the long gap between releases, it would've been easy to retcon Jacob as some sort of undead creature. Yet, the only line in the sequel alluding to his survival was that he "somehow faked his death", even though the original film blatantly showed this to not be the case, and given that it takes place right after the first, this makes even less sense.
* See No Evil, and she uses her son as the vehicle for dispensing her twisted brand of justice.
* See No Evil: Flies have made a nest inside the main antagonist's head and one always appears before he attacks.

* See No Evil. Former CIA agent Robert Baer tells how he was attached to a special unit, authorised by the President to track down terrorists. The unit failed because the CIA station heads kept refusing to share information with it, so they spent all their time running about trying to develop their own sources instead of doing the job they'd been created for.
* See No Evil, he advised the female interviewer, who claimed to have endured light hazing from her mostly-male counterparts, to try:
* See No Evil, Hear No Evil: Dave is trying to use a knife to threaten a burglar and, unable to hear the cops behind him, assumes the burglar is responding to his threats.
* See No Evil, Hear No EvilIf it isn't visible, it isn't audible either.
* See No Evil, Hear No Evil to be a cop and tries this. The driver of the car demands to see a badge. The bad guy just gives up and produces his gun instead. The driver gives up his car, complete with a whimpered "Please don't kill me."
* See No Evil serial killer with a penchant for ripping out people's eyes.
* Seen on a Japan Airlines animated pre-flight safety message detailing the impact of altitude on the effects of alcohol. Where the guy got the lampshade from at 30,000 feet is anyone's guess.
* Seen once with Marge, and implied that she has several inner voices, each one residing higher up in her beehive. The one on top simply says "Why are you asking me, I'm just hair; your head stopped eighteen inches ago."
* Seen on slot machines in Canadian bars: "Before you lose everything, call:" with the number for a gambling addiction hotline.
* Seen on some of the 'case cards' which the player can gather in the third installment of
* seen on the Internet, cats are utterly terrified of cucumbers, them thinking it is a poisonous snake that has somehow snuck up on them.
* Seen the 2013 ad for draft king sweepstakes? No idea how they got that past the radar! The guy says very clearly "Derek Bradley went from a guy with holes in his underpants, to bikini models in them!"
* Seen through Western eyes, this is one of the defining characteristics of
* seen to be believed. (It starts with a woman talking about Bounce dryer bars before the Old Spice Man suddenly interrupts the advertisement.)
* seen trashing cars early on, it turns out a non-evil alien was framed and not actually the Monster of the Week person who died earlier in the episode... and we have him committing an act that would realistically have a body count in the several hundred! Nobody commenting on it makes it worse, really.
* Seen used in the concert film "Good To See You Again, Alice Cooper" with magician James Randi working it and holding up Alice's severed head (in reality, a prop head).
* seen what happened to them. Paige calls back that no, she hasn't. Cut to her and Jason, eating cookies while wearing blindfolds and Jason saying that he had been wondering why they had to wear them.
* seen...while also being trained in secret by Shiva Wu-San? That's one scary 12-year-old.
* Seen with the season 6 episode "Give Peace a Chance" and the season 11 episode "The Distance". The focus of both episodes is a Shepherd operating on a challenging, previously thought to be an inoperable tumor. In the former, it's Derek; in the latter, it's his sister Amelia.
* Seeq designs) aren't too far behind either, being appreciated by porcine fans.
* SEER - A series of animated films based on the Chinese MMORPG of the same name. 6 films since 2011.
* Seer at that) or Ygethmor (a title which belonged to several people).
* Seer) doesn't respect her, as McGonagall makes no secret of the fact that she thinks Trelawney is a total fraud. It eventually turns out that Dumbledore wanted to get rid of the Dinivation classes a long time ago, but the Board of Governors and parents kept demanding it stay on the curriculum; he only relented when he hired Trelawney because he needed an excuse to keep her safe at Hogwarts to protect her from Voldemort since she was the one who made the prediction about his defeat.

Furthermore, it's implied that being a true Seer is something that you can't actually teach— even the far more competent Firenze basically says that it takes years to master; besides, most of the time, it doesn't even work, and most don't see much. You either have the gift or you don't.
* Seere, an innocent young boy, gave up his "time" in forging a pact with Golem, turning him into
* see right on the other side of a knee-high box but have to find a level passage around.
* Seersa look mostly like anthropomorphic foxes with feline coat patterns (jaguar rosettes for instance).
* Seers: A person who recieves visions of important stuff. The future, usually.
* Seers. Interestingly, they use French for this particular ability, several times.
* Seers of the Throne, but that this rulership is for the Sleepers' own good — they're supposed to guide Sleepers towards enlightenment and generally rule well. Seers don't believe that control over Sleepers has any real responsibilities apart from not spooking the herd, and abuse both mystical and manipulative power for personal gain on a grimly regular basis.
* Seers of the Throne of a surveillance state. If you're being watched, you're being judged. If you're being judged, you won't take risks. If you don't take risks, you don't Awaken.
* SEER spawned six animated films and a television cartoon with 10+ seasons in its wake.
* sees a girl named Oana early on but doesn't actually speak to her until one hour into the ninety-minute runtime. They have one conversation, she helps some monks heal him post-battle, and then they’re apparently an item.
* sees Buffy swap places with Sarah Michelle Gellar for a single day, with the interesting twist that Sarah is 'ahead' of the show; from Buffy's perspective, she's just dealt with the events of "Bad Eggs" while Sarah is filming "Bewitched, Bewildered and Bothered". Fortunately, when the two switch back the following day, Buffy has acquired a video of "Ted", "Bad Eggs", "Surprise" and "Innocence" and seen a script for "Passions", allowing her to prevent Angel losing his soul and get Jenny to look into ways to bind it properly.
* See sex as a means to the end of becoming mothers (or manipulating men), or
* SEES is the protagonist's "in" with several girls considered highly desirable by the rest of the school.
* sees Liaoyuan Huo reaching out for him... and when he's executed via sword and then a mass of impaling with spears, the final page of the chapter is just covered in spears and Xiao Meng's hand.
* sees Milhouse wiggling his eyebrows. Jump cut to Milhouse being wheeled out of the school on a gurney with everyone in the school watching.
* See something at the start of the stage that looks innocent and adorable?
* see sounds as multicolored lights about it for no readily apparent reason.
* see sounds, or taste or hear colors. Synesthesia can also be temporarily induced by psychedelic drugs.
* sees Regular Homer in the mirror and asks Marge if she bought the mirror in such a store.
* sees Spike and Giles join forces to scare the living daylights out of Dawn's date.
* sees the Strawhats end up on an island where a man has to offer some heirloom item to the girl then ask for her family to come get her for the wedding preparation. Zoro inadvertantly fulfills both conditions when he helps some fruit merchant girl, giving her a dropped necklace - he thought it was hers - and asking if she needs someone to come for her - as, does she need a doctor. The whole village immediately starts the wedding preparation and poor Zoro almost finds himself married. Fortunately - for him - Luffy disagrees as the wedding would mean Zoro wouldn't be able to adventure with the Strawhats anymore.
* S.E.E.S., whose only criteria for joining was having the potential to summon a Persona.
* Seetee Ship that can be mined (albeit with much danger) helps change things.

* See the Beauty Man Garden busboy (or at least dishwasher) uniforms from
* See the Cat: Three Stories About a Dog features a dog named Max who has this. The book is split into three stories. The first story involves the dog railing against the text of the story, which describes in increasing detail a cat, even though there is no cat to be seen. He is then embarrassed when said cat appears at the end of the story. The second story involves a snake who is going to bite him, until he writes in the word "not" so that it reads "The mad snake is not going to bite the dog." In the third story, the narration states that he must run and jump and spin and fly in order to avoid having a hippo sit on him. He flat-out refuses, as he only wants to take a nap, and says he will leave, and if he does that, then nobody will want to read the book and it'll get thrown away.
* see the djinnis in a similar manner without such contacts, or see the aura of magical creatures, which becomes a rather important plot point.
* "See the Funny Little Clown" by Bobby Goldsboro is literally about this, with the same "I am Pagliacci!" twist at the end.
* see the future as compensation. In other versions, it was Zeus who cursed him for proving him wrong and Hera who blessed him.
* see the future, letting him be right where he needs to be to sucker-punch Hiro.
* "See the Invisible", "Touch the Untouchable", "Break the Unbreakable", "Fight the Power".
* see them except as a radar signature, and still potentially nail the kill.
* see them, which means you must gun for the fighters on manual rather than relying on the guidance/lead reticule. Of course, you can still hit them with your main guns and unguided secondary weaponry such as rockets.
* Seether (originally, but they have been based out of the US for the vast majority of their career)
* See "The Stork Job" for one of many incidents of this leading to hilarity:
* See the title on the right book on the second shelf in the second panel
* See the Whites of Their Eyes: In fiction, if you can't see them, you can't target them.
* see they should have opened fire if the Austro-Hungarians attacked with mist (precisely the reason Cadorna wanted a fighting retreat). When the Austro-Hungarians attacked with misty weather as part of the Caporetto offensive they captured the artillery, making the defeat much worse (the main breakthrough happening at Caporetto, hence the name of the battle), but Badoglio was not sacked, and in fact entered the staff of Cadorna's replacement Armando Diaz, thanks to his friendship with the king and his prime minister.
* See this article. And yes, the pioneers of cake icing through 3d printing are a big part of this program.
* see this channel is to have Cox service already, so what's the point?
* (see this page for the common answers), with the most common retort to it being, "If you know [insert TV drama here] is fake, why do you watch it?"
* See Through relationship on one such island after downing each other in the middle of combat.
* See "Treehouse of Horror III" where a Krusty doll tries to kill Homer because someone set it to evil.
* SeeU by SBS Artech has cat-ear speakers mounted to her head as part of her costume.
* Se Eu Fosse Você 2). Particularly funny because the male lead, Tony Ramos, is known in Brazil for his dense body hair, to the point where his name became another term for "hairy male".
* See WaterThe camera (and audience) can see clearly underwater; therefore, so can the characters.
* "See Ya Later, Gladiator" reuses the exact same clip of Daffy walking to a window twice. Mind you: he was in a completely different
* See You in Hell: According to the Roman biographer Suetonius, a certain actor implied this in a farce during Emperor Nero's bloody reign.
* See You in Hell: When I die, I'll go to hell and wait for you there!
* See You in November the death was "suicide while the balance of their mind was

disturbed." Later a member of the Rhodesian negotiating team falls out the window while in England, and after the coroner gives this verdict despite no apparent signs of depression, he wonders if this trope was in play.
* See You Later, (which is told entirely through dialogue), he noted that it's up to the reader to decide if Stephanie's words to Tim were genuine hope or denial in the face of despair. It's also not evident or clarified which one said "I love you" first.
* "See You There" involves a birthday party with just a few hijinks by the end.
* See You Yesterday: A pair of police officers shoot Claudette's brother due to being mistaken for robbers.
* See You Yesterday: Calvin is this to Claudette till the day he gets shot dead by police. For example, protecting her from a rude ex-boyfriend.
* See You Yesterday: Claudette and Sebastian being able to get into time travel makes them two of these.
* See You Yesterday: Claudette and Sebastian struggle to convince her brother and his friend that they're here to stop one of them from getting killed... It doesn't work.
* See You Yesterday Claudette is seen running with her time machine on her back trying yet again to save her brother from getting murdered by cops without anyone else dying. Whether she succeeds this time or another isn't shown.
* See You Yesterday: One is held for Claudette's brother after he gets killed by police, then for Sebastian when he gets killed by the robbers do to him and her interfering with the time that day.
* See You Yesterday style when Claudette runs to try once again to save her brother from being murdered by cops.
* See You Yesterday: The whole point of the time travel is to stop Claudette's brother from being murdered by police due to being mistaken for a robber.
* "Se faire des couilles en or" ("to make oneself golden cojones") means getting filthy rich in a short time.
* Seffie acknowledges that she is doomed to an arranged marriage, and is doing her best to arrange one with Gil.
* Seffie does a variant. She encourages her cousin Tarvek to pursue Agatha because this will result in leaving Gil alone, where he will be more amenable to a political marriage with her. She loves him, but is aware he'll probably never love her back; a coldly logical marriage, in her mind, is better than nothing.
* Sega 2nd stage is set on a train which not surprisingly forces the heroes on top of the train in few occasions
* Sega 3D Classics Collection, as they're exclusive to the compilation.
* SEGA A for a second so that you don't perform such actions by mistake.
* Sega All-Stars Racing get squished, hit with flying boxing gloves, or hit with missiles.
* Sega also owns a patent on using an on-screen arrow to tell the player which direction to go (and it was valid enough to sue the makers of
* Sega, and he's named it as a masterpiece and the one game he wishes he had developed.
* Sega and raunchy jokes, you'd think they would have embraced this coincidence with open arms.
* Sega and the Genesis, and even many of Sega's other major Genesis games aren't well known.
* Sega, a pinball game with a skiing theme, was released just before the 1972 Winter Olympics in Sapporo, Japan.
* Sega arcade game has the options of fully automatic shifting, F1-style sequential paddles, or fully manual 6-speed stick and clutch. This to accommodate the fact the F355 (and its Spider model) were built in two distinct drive-train configurations, one with a manual transmission and another with a sequential transmission, denoted by the F1 in its name.
* Sega. As the creators also liked that character, they turned it into Dr. Ivo "Eggman" Robotnik.
* Sega, but in contrast to Mario's strategic, defensive platforming, Sonic's

gameplay usually leans more towards fast-paced action, heavily streamlined platforming romps with rollercoaster/pinball-like physics and level design that emphasized maintaining speed and precision timing more than anything else, with the occasional slower platforming, combat, puzzles and mini-games sandwiched in.
* Sega came a year after. After that, a lot of their games are ported to Windows roughly 6 months to a year after their initial platform release.
* Sega CD adaptation of the first film has Reese killing the Terminator and surviving. Subverted in the Sega Genesis version, where he likewise still kills the T-800, but the text in the ending still mentions that he died.
* Sega CD features this if you beat the game with a stellar time. The faster you do it, the more blooper clips you get to hear.
* Sega CD includes a weird bonus cinema scene in which Taito's in-house band Zuntata puts on a concert playing the first stage theme, which somehow becomes the inspiration for the game's plot. Oddly, this is voiced in English with Japanese subtitles, despite the Sega CD port being released in Japan only.
* Sega CD, where you have to play on hard to see all the levels (the first episode and the 5-part Green With Evil storyline), but hard mode doesn't show you what you need to press or when.
* Sega Channel split the game into two "parts", since there was not enough space in the Sega Channel adapter to fit the entire game. The first part featured the first four zones (Green Grove through Diamond Dust), and the second part featured the remaining levels (Volcano Valley through Panic Puppet, plus the final boss).
* Sega claims that they still hold the patent for real-time view angle change as seen in
* Sega consoles: the Sega Genesis's stylized typeface, the Saturn orb, and the Dreamcast spiral.
* Sega Dreamcast at a taco shop in the NFL 2K commercial, and lots more.
* Sega Dreamcast, for a two-night period from select Hollywood Video locations.
* Sega Dreamcast games fell victim to this, save for the first game, whose cutscenes were made of live-action footage instead. The only thing that ever flowed in the early games was Claire Redfield's ponytail.
* Sega Dreamcast progressed in parallel and had moved far along enough to be released as a product.
* Sega Dreamcast, the Dreamcast left a lasting impact on the gaming scene as a whole.
* Sega Dreamcast. This didn't come without a cost, however, as the GameCube version has noticeably lower audio quality than the Dreamcast version.
* Sega Dreamcast to walk by, distracting the player and causing Sonic to faceplant on the ground, losing rings in the process.
* SEGA force in Japanese pinball. As time went on though, the machines broke down and no one knew how to repair them with SEGA providing no real support. By 1976, SEGA's pinball sales plummeted and it had to leave the market two years later with thousands of broken, unplayable pinball machines in its wake.
* Segagaga and was developed mostly in secret over two years. When its sale was approved, Sega gave him a $200 marketing budget, of which half was used by Okano to buy himself a wrestling mask. Appearing at games stores in disguise, he was able to get enough buzz going to spur online orders and eventually a retail release.
* Sega games seeing a large rise in popularity on both sides of the Pacific.
* Sega Genesis eat the hundreds of dinosaurs and armed guards she kills trying to get to Grant, but no. Maybe the raptor has a thing against paleontologists (though there is mentioned in the narrative that the Raptor is trying to follow Grant to get off the island, rather than kill him).
* Sega Genesis game. In the "Castle" level, you (the player) find two of your fellow 'Busters under the spell of a Possessor. When fully exorcised, the Green Ghost that you have to trap escapes from the Ghostbuster's mouth.
* Sega Genesis games under the Treco label, possibly for the same reason.
* Sega Genesis's "Smooth Criminal," "Beat It", "Another Part of Me", "Billie Jean", and "Bad" as stage themes.
* Sega Genesis uses a variant of this: the newspaper simply fades in, but the

effect is the same. The headline is always "GHOST COPS BUST ___ STREET SPOOK."
* Sega Genesis with improved graphics, a choice between three cars, and additional tracks.
* Sega has a Heroic Mode for each of the trilogy's main characters: Luke, Leia, Han, R2-D2 and C-3PO, Chewbacca, and Obi-Wan.
* Sega has also stated that once they couldn't afford to make consoles anymore they preferred making games for the
* Sega have a very bad habit of doing this with localized games in order to buff up their financial years.
* Sega Heroes are better rewarded. If you dare to try PvP against a paying user, expect the game to be tilted heavily against you. Survival mode is just as bad- you’d better be grinding before you take on survival mode because the game will tilt the board against your favor if you don’t grind.
* Sega, if you start X-Wing Multiball but drain two balls without even one attempt at shooting for the Jackpot, the ramp and the X-Wing saucer will light for 15 seconds; hit either one, and the game will automatically launch a ball to resume multiball.
* Sega in part because Sega reverted to "kiddier" advertisements while Playstation geared itself as a more mature-oriented console.
* Sega, it uses a generic skiing theme instead. The only nod to the Games is on the backglass, where a woman is prominently featured holding a flaming torch.
* Sega. Like a lot of elements in the series, this is deliberate parody of this trope.
* Sega" marketing campaign. As a result, Nintendo became labeled as a "kiddy" brand, while Sega would be positioned as the brand for teens and young adults: a stigma that would stick with Nintendo long after Sega left the hardware market, with Sony and Microsoft taking their place as the "adult" consoles.
* Sega Master System, Dr. Alan Grant can somehow grab ceilings and move around.
* Sega Master System for the western market. Sega later released an updated Mark III model in Japan based on the Master System redesign, but with an integrated FM sound module (which the western models did not have). The module could even be purchased separately for those who already have the original Mark III.
* Sega Master System has all the hardware of the SG-1000 and can boot SG-1000 ROMs even though the system and games were never released outside of Japan or New Zealand and that the feature was only officially supported in the Sega Mark III. The only thing preventing you from playing SG-1000 games is that the cartridges don't fit in the cartridge slot.
* Sega—has become the catch-all term for claw machines in general.
* Sega means to procrastinate or do something slowly in Swedish slang as well as tough in terms of food. SEGA must have had a hard time convincing people that the blast-processing really worked quickly and that Sonic was actually fast.
* Sega of America and developed by Novotrade International/Appaloosa Interactive (Hungary, though they later opened an American branch office).
* Sega of Japan and Sega of America both have creative control over how Sonic is portrayed, meaning that throughout the '90s, the
* Sega often neglects to establish creative ownership when they license Sonic to be adapted into shows, films and comics, meaning they do not own any concepts introduced in them. For example, despite
* Sega Pinball are off-model to various degrees, due to licensing issues.
* Sega Pinball begins with James Bond walking in front of the display, then turning to shoot at the player. If you pull the trigger to fire first, various silly animations appear.
* Sega Pinball, failing the "Xenia Encounter" has the villainess crush a Naval Captain until his head pops off.
* Sega Pinball for the "Moon's Gravity" Mission, where the player can slingshot a pinball around the Moon up and over it (actually done via a magnet).
* Sega Pinball has the "Eject or Die", a magnetic ball saver that captures pinballs which drain down the outlanes. It flings the ball back onto the playfield, and you have six seconds to shoot the Eject Target, or lose the ball outright.

* Sega Pinball lets the player choose the game theme from either the movie soundtrack or Edgar Winter's rock anthem "Frankenstein".
* Sega Pinball. Not only are you awarded points for nuking planets, the game even has lanes labeled "Nuke", "Double Nuke", and "Super Nuke".
* Sega Pinball the resurrected Elizabeth is shown framed by fire on the playfield.
* Sega Pinball uses different colors to identify the various Bugs that need to be destroyed on each planet — yellow for Warriors, blue for Plasma Bugs, green for Hoppers, and red for Tankers.
* Sega Pinball When the Mission Officer briefs you before attacking a planet, press both flipper buttons to make him explode.
* Sega-produced. As to why Japanese developers were able to adapt the H-D franchise better than studios from the very country where the Motor Company originated, or elsewhere, that's a mystery.
* Sega ran a campaign of "pirate TV" ads advertised by sticking flyers on billboards, because flyposting and pirate transmissions are cool and edgy. But also illegal, so they put up their own billboards for fictional products and flyposted them.
* Sega Saturn commercials, the Cones resemble Klansmen with their white outfits and pointy hats.
* Sega Saturn launch ad, "Theater of the Eye". Famous for scaring people away from buying a Saturn rather than making people want to buy one.
* Sega Saturn to launch. In addition, the early launch was limited to select retailers, which led the ones who weren't included refusing to carry any Sega products for the next few years.
* Sega Saturn to Mikage. (The latter is, somewhat remarkably, still in the game.)
* Sega saw the greatest success among all of these titles, spawning five major installments and garnering a dedicated fanbase due to its complex gameplay and perfect balance.
* Sega's consoles developed during the 1990s had planet-based code names:
* SEGA, similar to the slot machine example in the "In General" folder above.
* SegaSonic the Hedgehog, failing to escape from Eggman's Tower in time will cause a Game Over with no option to continue.
* SegaSonic the Hedgehog. They eventually evade it and land on one end of a giant seesaw. The boulder then lands on the other end, launching them into the air.
* Sega Superstars crossover games avoid the words "Death" and "Zombie" all the time, so they refer to the series as "Curien Mansion" or abbreviate them as "HOTD". The zombies are called "Monsters" and "Experiments" by the race commentator and the profile of the two playable characters, Zobio and Zobiko, classify their species as "Ex-Humans".
* Sega Superstars flying around the track based on the game named after them, and so on).
* Sega Superstars. Most children will be asking their parents, "Daddy, who's the guy with the headphones and goggles? Who's the pink-haired girl? Who's the guy on the motorcycle?" And so on.
* Sega system. Rather than scrap the project and do something else, Sega pretty much forced the company into completing the game to fulfill their obligation to Nintendo. The fact that the game was Big Red Button's first (and at the current, only) game which would be savaged by critics and games didn't help matters.
* Segata Sanshiro. Among Segata's accomplishments includes catching an ICBM midflight, halting its progress and then jumping off a plate glass window without breaking it.
* Segata Sanshiro, and Segata would become a much more awesome person in his later commercials.
* Segata Sanshiro: Anyone who crosses with him will be treated with this, especially in his early runs:
* Segata Sanshiro, but not before he was given his own action figure, music video, and video game. "Segata Sanshiro~! Segata Sanshiro~! Sega Saturn shiro~!"
* Segata Sanshiro has been known to beat up teenagers who don't play enough Sega Saturn, though he draws the line at harming younger kids.

* Segata Sanshiro knocks Chuck Norris into the sun. Being Chuck Norris, he comes out the other side completely unharmed.
* SEGATA SANSHIRO. Never has so much preposterone been contained inside an advertising mascot.
* SEGATA! SANSHIRO! SEGATA! SANSHIRO!. And yet in both America and Japan, he was critically praised.
* Segata Sanshiro, wherein he races across an ice rink against an ice skater, but is later found desperately warming his feet up.
* Sega, they remedied this by replacing the reset button with a rapid-fire button.
* Sega Toys marketed an MP3 speaker in Japan called the iDog which was marketed by Tiger Electronics in America. The line was later updated to include the iCat, the iFish, the iCy Penguin, and the iTurtle.
* Sega, usage of this song was licensed, but a later version uses an originally-composed tune.
* Sega Visions... and then waking up to discover it had all been a pizza-fueled dream.
* Sega, which even had enhanced music for the Japan-exclusive FM Sound Unit, and did receive later Japanese releases through ports to other console systems.
* Segment Displays Wiki: Numeric and alphanumeric segment displays, such as those on digital clocks, calculators and media players.
* Segmented. Each segment consists of a level or group of levels. Instead of playing the entire game in one sitting, the player is allowed to get the best time possible for each segment, retrying each segment as much as desired.
* Segment names are often double entendres implying that host Jon Stewart is doing something extremely lewd. Stewart will always protest the names as he sees them.
* segment on the Steele dossier the country" - "PEOTUS", one may note, stands for "president-elect of the United States", but in this case, there's a clear second meaning. There are a few scattered puns elsewhere in the video as well.)
* Segments have taken place on the deck of an aircraft carrier at least twice.
* Segment spin-offs — a recurring segment from the show becomes the main attraction.
* Segment "The Crate". While at a party, Professor Northrup fantasizes about killing his wife Wilma by shooting her. The assembled guests applaud him, then Wilma yells at him and he snaps out of it. He does it again when he imagines strangling her.
* Segment "The Lonesome Death of Jordy Verrill". After finding a meteor, Jordy's has fantasies about selling it to a scientist for a lot of money, and later one about the scientist refusing to pay any money for it because Jordy broke it in half after pouring water on it.
* segued into featured "Tainted Love" as a standalone track; modern reissues add both the standalone version of "Where Did Our Love Go?" and the combined 12" mix as bonus tracks.
* "Segue" means to transition without interruption. "Segway" is the two-wheeled vehicle you ride around in.
* Segue without a beat from a horrific or bizarre story to a "lighter side" one. Especially if we only hear the wrap-up of the horror story. (As in, "... which if true, means death for us all. And now, 'Kent's People!'")
* Segunda Espada Baraggan Louisenbairn, who sports a very huge axe for a weapon/Zanpakutou. After activating his Resurrección, he has an even bigger axe called Gran Caida which he wielded even as a Vasto Lorde.
* Segway PT weighs about eighty pounds. When it was first introduced, many people didn't know what it was, and had to ask.
* Sehnsucht) — while Noriko is the one who brings in more people into their ever-growing circle of friends, the reason they all stay is for Tsuna.
* Sehnsucht. While Noriko is the one who brings people into their group, the ultimate reason they all stay is for Tsuna.
* Seibu Kaihatsu (mainly published DVD strip mahjong games under the CATS label in their last several years)
* Seidou Takizawa is quite vocal about his desire to get promoted, and this is one

reason he frequently clashes with his rival, Akira Mado. At one point, they get into a drunken argument concerning whether being promotion-focused is bad or not. But when push comes to shove, he
* Seifer, the cocky jerk anti-villain, will wave his Gunblade around at the first opportunity he gets and is always pointing at people with it. We're talking cutscenes, not battle here, mind you.
* Seiga Kaku, Yoshika Miyako, tend to lean heavily into this trope. In some works the two are depicted as having known each other since before Yoshika's demise, with Seiga keeping her reanimated corpse due to being unable to let go. In others they're depicted as never having met prior to Yoshika's resurrection but Seiga loving her "cute puppet" for the brainless, decaying, hollowed mockery of life that she is anyway.
* Seiga spends most of her time floating around people who interest her or working on bizarre scams.
* Seige subline, which featured a new type of Deluxe class toy: the Weaponizer. Weaponizers are Deluxe-sized figures whose bodies are actually made up of weapons and other accessories- they can be taken apart and plugged into 5mm ports on other figures to give them a massive amount of firepower.
* Sei gets a fan club the very same day he transfers to the school, with members from the other clubs instantly switching to his.
* Seigikan, like Ryuk, can't be seen by anyone other than the humans who touch their Death Note. This includes surveillance equipment:
* Seigikan when L wants to search Light's room he has Mogi call the Yagami house pretending to be a telemarketer. Light finds this blatantly obvious scheme to be an insult to his intelligence.
* Seigi no Mikata has Sumiko wanting to go on vacation. The whole charade begins with a new employee asking her to reserve a seat for the flower viewing and gives her a branch of cherry blossoms. On her way home, a woman asks her to lend her the branch to show to her bed-ridden relative — Sumiko gives her the branch and receives a bag full of organic vegetables. She leaves the vegetables with a colleague of hers, receiving tickets to a play for helping her colleague to get her picky kids to eat vegetables. When trying to cash the ticket in, she's approached by men who want to buy the ticket off of her for a famous woman to view the play and the woman gives her a rare, limited edition bag. Said bag later gets given to the vice president of Sumiko's company because a friend of hers wanted to buy such a bag, but it was sold out and gives Sumiko tickets and a reservation for a 10-Day Luxury Trip abroad.
* Seigi no Mikata plays this for laughs when a co-worker asks Makiko to reserve a spot for the office-outing's flower viewing in the park. She keeps a spot free by drawing a chalk outline beneath a tree and most people run away screaming from the location.
* Seigi pretends to be Richard's boyfriend (against Richard's wishes!) in
* Seiichirou Kitano or they knock themselves out accidentally. And everyone believes Kitano has defeated them, even when he himself doesn't realize that he's in a middle of a fight.
* Seija also gets this, as her nature is to be contrary to everybody else — she
* Seija Kijin canonically likes pissing people off and hatches elaborate schemes to overthrow the social order. Fanworks tend to dial down the scale of what she does, resulting in this trope.
* Seiji ends up participating in a women's wrestling match. Unfortunately, his shorts get pulled off at the least convenient time...
* Seiji is a doe-eyed pretty boy with a gentle smile and slim body. It makes his
* Seiji is forced to crossdress in an attempt to catch a molester on a train. Naturally, some acquaintances from school see him, and decide that he's hot.
* Seiji is the only companion who only has one possible death. He's possessed by Kubitarou, lured to her haunting spot, and decapitated there, after which she sticks a sapling through his head and leaves it for Akira to find.
* Seiji Shishikura is a pretty extreme glass cannon. His power, "Meatball," allows

him to
* Seiji shows a surprisingly devious streak despite her bubbly personality; she subtly threatened her manager to cover for her when she sneaks out at night, she knows secret routes to skirt around police, and she's fine with sneaking into prohibited areas or bluffing her way into them.
* Seijun Suzuki made several increasingly surreal, stylish, over-the-top yakuza films in the 1960s.
* Seijun Suzuki. Supposedly none of the actresses Nikkatsu had on contract were willing to show full frontal nudity on camera so they hired a burlesque performer named Mariko Ogawa for this, her only film role.
* Seijun Tombo's fanfics depict Professor Oak as a former Pokémon Champion.
* Seijuu/Genjuu: "Sacred beast" or "Phantom beast". A powerful class of seirei which includes distinct species like
* Seijuurou Akashi purposefully scores an own goal when playing against Shutoku to make his team get serious, as he thought they had gotten too relaxed after initially getting a large lead on their opponents, resulting in Shutoku overtaking them. He then promises that if they lose the game, he will pay for the own goal by quitting the team and ripping out his eyes.
* Seijuu Sentai Gingaman a motif rather than explicit power over fire.)
* Seijuu Sentai Gingaman as "Captain Mutiny" and "Swabbies", but only for an arc instead of being the main villains (The rest were given no connection to Mutiny's crew).
* Sei Juushi Bismarck. In the former, of the four main characters (Shinji Hikari, Bill Wilcox, Richard Lancelot and Marianne Louvre) only Shinji is explicitly described as being a member of the Federation military, and in the first episode he's wanted for desertion. Bill is a bounty hunter, Marianne a civilian and Richard is simply described as an intelligence agent. In the latter, of the four mains (Fireball, Colt, Saber Rider and April Eagle) only Saber is an actual Star Sheriff while April plays more of a support role. Fireball and Colt are a professional racer and a bounty hunter respectively, and are recruited into the Star Sheriffs in the first episode.
* Seika becomes very upset when she ties with Asuka in the Miss Duel Academy pageant because Judai didn't cast his vote. After a fair amount of negotiation, Judai decides to duel Asuka, and while she loses, which would result in Seika's victory, Seika realizes that the entire school is on Asuka's side and reluctantly withdraws. She decides to rededicate herself to dueling after that and faces Judai in the quarterfinals of the school tournament, but loses. When he tells her dueling is supposed to be fun, she
* Seikai no Monshou) and its sequels use "plane space", a two-dimensional hyperspace in which the spaceships must be inside an artificially-generated 3-dimensional rolling space-time bubble to exist normally. The spin and tilt of the bubble determine its speed and direction. The planar universe is accessed via gates (saudec) that, when they are closed, can be moved and appear to be indefinitely energy-releasing particles (uanon) which were used to propel human spaceships before their other capacities were discovered.
* Seiken Densetsu 3 was subject to this a lot a while ago. The character class of Rogue is too often misspelled as Rouge. Eventually it became a running gag to completely ignore the misspelling and assume that anyone asking about the Rouge job was referring to the super secret, all-powerful (and non-existent) job of another character completely.
* Seiketsu no Hagurama prince who, contrary to his intentions to use his machines for peaceful purposes, were being used to eradicate the remaining red-blooded people by his father.
* Seiketsu No Hagurama whom he thought were being used for peaceful purposes (but were actually used to eradicate the remaining red-blooded people by his father and king).
* Seikima II (and to a lesser extent most of the band's members). All we know about his true identity is his birthday, where he was born, where he attended school and university, and that his elder sister, Yumiko Kogure, is a former Tokyo

Broadcasting System newscaster... and that's basically it.
* Seiklus, atop the tree in the first area you can get snatched by a large eagle who will then drop you off at the rim of volcano.
* Seiko Kimura is the former SHSL Pharmacist who, despite being part of the radical faction of the Future Foundation, is willing to treat her ideological rivals wounds. Despite her creepy appearance and demeanor, she is actually a very caring person with zero self-esteem who simply wants to be useful to everyone. While she does end up chasing and trying to kill her former friends Ruruka and Sonosuke, it's out of long-repressed anger at Ruruka's apparent "betrayal" in high school and how she used her throughout their friendship, and Seiko ends up giving up without harming them. As the third sleeping phase approaches she curls up in a hallway and thinks about how all she wanted was to have one true friend. She had actually loved Ruruka dearly and still wished that they could somehow make up. As she is knocked out by the sleeping drug, the last thing that she thinks about is the deaths of
* Seikon no Qwaser, Tomo tries to squeeze her massive breasts into a maid outfit. All the buttons pop off and hit Miyuri right in the face.
* Seiko Spring Drive is a hybrid mechanical, electric and magnetic watch movement that provides a really cool solution to... no actual problem that can't be solved cheaper by a conventional quartz watch.
* Seilah of Tatarus is in charge of the technology that gives her guildmates
* Seinarukana storming numerous final strongholds of whichever enemies you find on the world you happen to be on.
* seinähullu (literally "wall-crazy") implies this trope. The incurably insane children were chained on the wall for life lest they cause any troubles to other family members.
* Seinen Kakumei Utena, Touga's Movie-canon childhood gets deeply explored.
* Seinen Kakumei Utena: Utena actually met both Touga and Saionji two years before the night of her parents’ funeral, back then she was a spoiled rotten little girly girl, and the boys victims of horrifying abuses. Unbeknown to her, she subsequently got herself periodically stalked by a jealous and obsessed Touga for years afterwards.
* Seinen somehow manages to cling to every inch of his heart-shaped rear end.
* Seinen university teaching assistant that falls in love with his smell. It progresses from there...
* Seinfeld about how his poor management decisions have run the team into the ground. Mr. Steinbrenner responds with an emphatic "Hire this man!"
* Seinfeld above; they ruled that double-dipping didn't add all that many mouth-germs to a dip since because it is lost in the bacterial noise in the food itself.
* Seinfeld accent (which sounds nothing like Finnish). The Israeli-British Brian George also plays the Pakistani restaurant owner Babu Bhat.
* Seinfeld, a friend of Jerry overhears him tell Elaine that she should "just kill" Suzie. The thing is, Suzie isn't a real person, just someone Elaine made up at work because of reasons. Killing her off would just be an attempt to get out of her self-made web of lies.
* Seinfeld after it, however, was completely made up of small details and barely had anything else, which is why it is awesome.
* Seinfeld, a Kenny Rogers chicken restaurant is built across the street from Jerry & Kramer's apartment building. The restaurant's neon sign shines directly into Kramer's window at all times, filling his entire apartment with bright red light and making him unable to sleep.
* Seinfeld almost avoided this when Jerry and George got their sitcom pilot based on themselves, but they didn't get the green light until they added the guy-sentenced-to-be-his-butler-because-he-had-no-auto-insurance, so Jerry has an indentured butler.
* Seinfeld, and acts nice accordingly. She's puzzled by this attitude, even though as Jerry notes, their friendship started the exact same way.
* Seinfeld, and as she's unlocking her door, he asks if she ever pretends there's an axe murderer after her to see how fast she can do it.

* Seinfeld and he hates them. This offends an old Polish woman, since she had a beloved pony growing up, and pretty much everyone around her did as well. The woman dies the next day, despite reportedly being in good health for her age, causing Jerry to worry that his pony remark was what did her in.
* Seinfeld!" And in the same episode, Jerry tells a joke about dentists and gets accused of being an "anti-dentite". When the dentist mentioned above talks about how his people have been persecuted, Jerry asks "The Jews?", to which he responds, "No, dentists!"
* Seinfeld, and Kramer ends up being bitten by the old man Jerry is assigned to. The old man's teeth get flung across the room, then ground up in the garbage disposal when George tries to turn on a light to look for them.
* Seinfeld and the fact that the kind of humor just did not catch on well. In its initial run, it only lasted one season.
* Seinfeld, and they just go on with the rest of their conversation like nothing happened.
* Seinfeld angrily declaring, "Well, I think one of us should leave!" to Jerry while he's at Jerry's apartment. The two then stare at each other for a moment of uncomfortable silence before the scene cuts away.
* Seinfeld. Another example of parents so bad that they still embarrass their grown-up son.
* Seinfeld anymore, and her boyfriend, Ray, who won't drop the Shakespearean act — at least not until Kramer threatens him.
* Seinfeld arcade cabinet across a busy street. (Complete with overhead camera and sound effects). But he fails to consider that unlike a frog, the cabinet can't jump, and so the curb at the other end of the street seals the cabinet's fate.
* Seinfeld). As a matter of fact, in the ending, he has to go into traction because his muscles have atrophied that much, making the slip and fall he got a lot more painful than it normally would be. So the moral of the story is "Never name a season after yourself; it will only end in tragedy."
* Seinfeld: a series of comic mishaps involving being dressed in his riding clothes, accidentally spilling ink on himself (and scratching under his nose), and so on leave Elaine's boss looking just like Hitler. Just before he goes into a meeting to discuss the "invasion" (merger) of Poland Springs.
* Seinfeld, as Estelle is pulling the car into the garage, where it belongs. But seeing as how Frank has set up his office in there to sell computers, it has the same effect.
* Seinfeld as for the rest of the episode whenever the doll is around George hears the nagging voice of his mother in his head and starts to believe the doll is speaking to him.
* Seinfeld - "A show about nothing" not only sums up Absurdism, but is also an excellent modern example.
* Seinfeld, a slow-witted, self-centered, ugly failure who repulses women and can't get them to go out with him... except for, oh, the forty or fifty gorgeous women he dated over the course of the show. He even got a model whom he suspected was bulimic. Depending on the episode, he would either complain about his lack of a love life, or about how often his life life would go wrong (which it did). His most common romantic plot would have him saying or doing something that repulsed the woman he was seeing, or lamenting how his present relationship is going sour, or trying to avoid the advances of a woman he does not want, or broke up with. He winds up getting engaged to the attractive daughter of a rich, Upper East Side, WASPy, old money couple- Susan Ross. Even if they were evenly-matched looks-wise, it's completely far-fetched status, class and money-wise.
* Seinfeld: At a vacation house in the Hamptons, Jerry's girlfriend goes to sneak some leftover lobster, though it goes against her religion. Fortunately for her, Kramer anticipated it, and is waiting there to intervene. Unfortunately for her, the next morning George laces her eggs with lobster out of vengeance for her telling his girlfriend about his "shrinkage".
* Seinfeld, back from her maternity leave), resulting in a genuinely enthusiastic several minutes while she and the guys scream and laugh and hug each other.

* Seinfeld, because they're too afraid to do it themselves. After being brutally attacked, Kramer's Tony is smashed to pieces.
* Seinfeld (birthday variant): One hundred eighty-two dollars exactly (plus a terribly worded card). Elaine says: "What are you, my uncle?" Earlier in the episode, Jerry told George to only spend half as much on his gift since Jerry and Elaine are back in a relationship, so George gives her ninety-one dollars. (Kramer, miraculously, gives her not only the unusual gift she wanted but a poetic and thoughtful card.)
* Seinfeld, but George, irritated by Donald's taunting and condescension, refuses to give him credit for the answer, justifying it by saying the card says "the Moops" instead of "the Moors". Donald points out that this is a misprint, but George refuses to budge, and the confrontation soon turns physical.
* Seinfeld by none other than George, who actually enjoys getting pitied, often even using it to get things he wants out of people.
* Seinfeld, called "The Finale," was notorious for ending the show by having the main cast being put on trial, convicted, and imprisoned for everything that happened on the show.
* Seinfeld came in for some controversy with one of these when Elaine's boss J. Peterman talked about an employee with an addiction to opium ("the yam-yam"): "He's back on the horse, Elaine. Smack. White palace. The Chinaman's nightcap." The last-named euphemism was edited out in syndication after complaints from the Asian-American community.
* Seinfeld cast and crew just as much with his offscreen behavior (he stole a butcher knife from the set and hid it under his jacket), which is why the character never appeared again.
* Seinfeld claims to be excellent at keeping secrets by "locking them in the vault." Unfortunately, Jerry — and everyone else — knows that the "key" to the vault is schnapps; one drink and she's blabbing.
* Seinfeld. Coca-Cola had one with lines of text that referred to "in-jokes" in the series (e.g., "...and start double dipping"). No punchline, no real connection to Coke, just a bunch of random references. Picture a person who randomly quotes cartoons and comedy skits with no context. This was the ad equivalent.
* Seinfeld, Cosmo Kramer is very expressive with his hands, tends to wobble his head in all directions when worked up, often slides across the floor when entering rooms, and is prone to exaggerated pratfalls.
* Seinfeld couldn't speak to one another without shouting and seemed to genuinely hate each other. It's not really explained why they stay together at all, and when they separate, nobody is the least bit surprised. Like Bob and Midge above, they could also be seen as a Deconstruction of this trope as Jerry theorized that if they had divorced when George was a kid, he "could have been normal" instead of the neurotic, self-loathing, slow-witted, brain-damaged, impulsive and insecure little man he is on the show. George himself seems to agree with Jerry's theory, saying that he's the product of his parents staying together.
* Seinfeld dedicated to the problems caused by oversized parking garages, impossible-to-find parking spaces, and infuriating subway systems).
* Seinfeld: Despite the show's explicit aversion of morals ("No hugging, no learning"), the show does deliver Aesops, even if incidentally.
* Seinfeld did this occasionally in later seasons, such as with the phrase "anti-dentite". This was mostly from the writers realizing what a cultural phenomenon their show was and how often they were creating memes accidentally.
* Seinfeld doesn't really have a designated job, but he is regularly seen taking on odd jobs or getting caught up in various get rich quick schemes. A last-season episode revealed that he has technically been on strike from his bagel store job for the entire run of the show, and he managed to get himself fired immediately after going back.
* Seinfeld: Dolores rhyming with a part of the female anatomy, or anything else, depends on regional pronunciation.
* Seinfeld during a plane crash, only to quickly backpedal once they survive (Elaine claims she was about to say "I've always loved U...nited Airlines").

* Seinfeld, Elaine asks this question to an emotionally wrecked Jerry.
* Seinfeld, Elaine becomes the beard for a gay man that she ends up falling for.
* Seinfeld: Elaine briefly dates an NBC executive. He becomes obsessed with her and refuses to take "No, I'm not interested in a relationship with you." for an answer and spends several episodes harassing her with constant phone calls. It gets bad enough that she won't even come to the taping of Jerry's show because she doesn't want to run into the guy.
* Seinfeld: Elaine doesn't give the bag porter a large enough tip, so he ships her baggage to Honolulu instead of New York out of spite.
* Seinfeld, Elaine eats a slice of cake from her boss J. Peterman's minifridge. Turns out the cake was a piece of wedding cake from a British royal wedding in 1936 and that it cost $29,000. When he finds out, she's afraid he'll punish her somehow. His response:
* Seinfeld, Elaine is in bed with Jerry, and during their post-coital conversation, George comes out from under the covers, as does Kramer. Fortunately for her, it turned out to be a dream.
* Seinfeld, Elaine is pretending to live in a building so that she can get Chinese food delivered. To that end, she hides out in the janitor's closet to eat her meal. On one occasion, when she comes out of the room, she runs into the superintendent, who demands to know why she was in there. After a few seconds of incoherent babbling while she tries to come up with a decent excuse, Elaine proceeds to look her straight in the eye and declare, "I wasn't in there".
* Seinfeld, Elaine pulls this after finding out a friend is getting divorced (though she's not angry so much as excited to be able to seduce the friend's now-ex).
* Seinfeld. Elaine's handsome outdoorsy boyfriend takes a big fall while rock climbing with George and Kramer - by the looks of the bandages, he landed square on his face. He's not terribly upset, but Elaine (who had emphatically denied the attraction wasn't all physical) pointedly asks him if he recalls the doctors mentioning "horrible scars" or "radical reconstructive surgery".
* Seinfeld, Elaine skips the boss's dinner party or whatever event and tells him she has to visit her father in the hospital. She is, in fact, going to the Yankees game with George and Kramer. When Kramer is hit by a foul ball, their picture is snapped and appears in the sports section the next day, which, of course, Elaine's boss never fails to read.
* Seinfeld: Elaine thinks the Korean women are making fun of her, which of course they are. She brings George's father, who secretly speaks Korean, to eavesdrop on their chatter, but his short temper leads him to blow his cover quickly.
* Seinfeld, entitled "The Wallet", Elaine refers to her psychotherapist boyfriend as a "Svengali" because he wields a powerful mental influence over her. She mispronounces the word as 'svenjolly', causing Jerry and George to mock her.
* Seinfeld episode, Elaine's boss has a cold. Having left his handkerchief in Elaine's office, he sneezes into his hand and is unable to shake the hand of a Japanese businessman when he sneezes, explaining that he can't because of the germs. The Japanese men assume he is implying that they might be diseased and cancel their business dealings.
* Seinfeld episode features Jerry lamenting the slow death of "Golden Boy", his best shirt, slowly fading to the point of being unwearable due to overwashing.
* Seinfeld episode finds Jerry and George having the exact same conversation that they were having at the beginning of the show's very first episode.
* Seinfeld episode had Elaine temporarily taking over J. Peterman's role. She uses the expense account to buy George a sable hat. He, of course, loses the hat and when it's found out that she needs to replace it, she can't because it costs $10,000. She opts to buy a cheaply made squirrel hat of the same kind to try and replace it.
* Seinfeld episode had Jerry getting increasingly frustrated that his Girlfriend of the Week refused to taste a piece of apple pie and wouldn't tell him why. Despite many efforts, he never learns why she turned down the pie, declaring the mystery "one for the ages."

* Seinfeld episode has Jerry annoyed that his current girlfriend keeps doing this, especially since whatever she says is NOT what he was going to say.
* Seinfeld episode in which George wanted Bozo the Clown for his girlfriend's son's birthday party. But how many people know that the phrase refers to a specific, original, historical Bozo the Clown dating back to 1946? Even by the time when the Seinfeld episode aired in 1994, Bozo was 50 years old, and some of the episode's humor revolved around the character's obscurity.
* Seinfeld episode, Kramer is paid to stand in police lineups to fill empty spots. This backfires when a hobo who is angry at Kramer identifies him as the guy who did it. In fairness, the way the officer running the lineup posed the question ("Do you recognise any of these men?") could leave Homeless Guy's motives for pointing at Kramer, whom he did in fact recognise, open to interpretation.
* Seinfeld episodes. Also Joe Pesci will say things that sound funny for a nickel. After he laughs Peter throws a coin at the village warriors — "Here's a dime. Kill Pesci."
* Seinfeld episode, "The Baby Shower", when Kramer hooks Jerry up with illegal free cable, Jerry has a nightmare where the government arrests him and shoots him multiple times. This is one of the points of the series that the cast clearly does not remember fondly, because it was out-of-character for a show that was supposed to be about nothing.
* Seinfeld episode "The Betrayal", we get a flashback to Jerry and Kramer's first meeting, where the former calls the latter "Kessler" before being corrected. Kessler was the character's original name in the pilot episode.
* Seinfeld episode, "The Bottle Deposit," where Kramer and Newman - driving a mail truck full of bags of empty soda cans and bottles to turn them in for refunds - find Tony the mechanic driving Jerry's stolen car. They tail him, but he seems to be slipping away, so to gain speed, Kramer decides to lighten the truck by dumping out all their bags of cans and bottles, much to Newman's horror. Finally, Kramer still feels they're too heavy, so he manages to kick Newman out of the truck and press on; then, he gains speed.
* Seinfeld episode "The Burning" is dedicated to Lloyd Bridges, who played elderly fitness nut Izzy Mandelbaum in two prior episodes.
* Seinfeld episode, The Chaperone, Jerry dates Miss Rhode Island, who is competing in the Miss America pageant in Atlantic City, and Kramer becomes her mentor. He gives surprisingly good advice, given that he's watched every Miss America pageant since he was six years old.
* Seinfeld episode "The Comeback". He then does the thing of setting up the original scenario (which entails George flying from NYC to Akron, Ohio) so that Riley will repeat his insult. Unfortunately, Riley doesn't suffer from this:
* Seinfeld episode "The Face Painter" is entirely about this trope. After discussing how big a step the "I Love You" declaration is, George goes ahead anyway and says it to his date. The next day, the following conversation takes place:
* Seinfeld episode "The Glasses", George is sold a pair of women's glasses made by Gloria Vanderbilt.
* Seinfeld episode "The Heart Attack", Jerry's stance toward "alternative medicine" is made clear when he thinks "you're not a doctor, but you play one in real life".
* Seinfeld episode "The Invitations," Jerry falls madly in love with a woman who saved him from being hit by a car. Kramer is skeptical.
* Seinfeld episode "The Jimmy", Jerry wakes up from a dental appointment during which he was unconscious from nitrous oxide to find his shirt untucked and his (male) dentist and (female) hygienist are getting dressed. It's never firmly established whether Jerry was hallucinating the incident or not, or whether his shirt was untucked before getting the knock-out gas, but the situation, including the uncertainty, is played for laughs when he describes the experience to Elaine. Her remark is "So your dentist and hygienist violated you while you were unconscious. So what?" despite the fact that Jerry is obviously deeply disturbed by the incident.
* Seinfeld episode "The Maid", Jerry starts sleeping with the new maid he had hired. Unfortunately, this distracts the maid from doing any cleaning in the house

at all and Jerry starts to think that he is paying a whore which the rest of the gang makes fun of. After he accidentally offends the maid with this statement, the maid breaks up with him and quits her job.
* Seinfeld episode "The Mango" has mango fruit be the cure for George and Jerry.
* Seinfeld episode "The Movie" most of the episode involves Jerry, George, Kramer and Elaine searching vainly for each other so they can meet to see a movie, and constantly missing each other by a few seconds. In the end, no one gets to see the full movie that they wanted to see.
* Seinfeld episode, The Opera, Elane creeps into the apartment of "Crazy" Joe Davola. a potentially murderous psycho who she's been dating and is, unbeknownst to her, stalking Jerry. She sees photos of her on the wall taken with a telephoto lens, and Davola invites her into his dark room. It is a surprisingly tense scene.
* Seinfeld episode "The Pez Dispenser". At the end, George asks Jerry, "What's a three-letter word for candy?" Jerry says, "Sorry, I don't know."
* Seinfeld episode "The Phone Message" revolves around an angry message George left on his date's phone while she was out of town, and his attempts, using Jerry as a decoy, to sneak into her living room and change the cassette before she hears it. She reveals later that she had had her friend play her the messages and took George's tirade as a dry joke, their successful effort to switch tapes a waste of time.
* Seinfeld episode "The Puerto Rican Day", where a parade is obstructing the traffic, and Elaine tries to go through underneath a viewing stand, leading a group of people. An elderly priest can't keep up:
* Seinfeld episode "The Sniffing Accountant", Jerry describes his shirt as "half silk, half cotton, half linen".
* Seinfeld episode "The Suicide". the foreign woman Jerry is seeing asks him who the Stooges are and he promises her that he will "show her the Stooges".
* Seinfeld episode "The Wallet", when Kramer lights a Cuban using Jerry's stove, he also lights his hair on fire. It takes him a good ten seconds before he screams.
* Seinfeld episode was. He replied that he didn't have one saying "They're all my babies. I love each one. Comedy is really a survival art. It's like asking 'What's your favorite breath of air?' 'Whatever keeps me going to the next one.'"
* Seinfeld episode where George got a toupee that went all over the place. Both he and Kramer thought it looked great, Jerry referred to it as George's 'hair hat', while Elaine took matters into her own hands...
* Seinfeld episode, where Kramer sees a tour bus passing by and pretends to mug George in order to get a horrified reaction from them.
* Seinfeld, Estelle Costanza complains about everything, which leads to arguments with her Roman Catholic husband Frank who complains just as much. Helen Seinfeld complains about Jerry's career as a comedian, thinking that there isn't much money in it (despite plenty of evidence to the contrary). As a consequence, she constantly sends his gifts back and he in turn will not accept money from them.
* Seinfeld. Estelle Costanza fits the trope too, though her real life surname is Harris.
* Seinfeld example, there was another episode where Kramer couldn't sleep in his apartment so he stays over at Jerry's. After lamenting that he can't fit on Jerry's couch, he sleeps in Jerry's bed with him, much to Jerry's annoyance.
* Seinfeld example when Jerry and George go see Kramer's holistic healer buddy Tor Eckman.
* Seinfeld exchange between Kramer and Elaine on the episode titled "The Millenneum":
* Seinfeld featured a montage of various bizarre noises made by all four main characters (surprisingly, Kramer really doesn't get more time here than anyone else).
* Seinfeld finds this out the hard way. When he notices that his girlfriend enjoys being naked in his apartment, he tries to be naked too, but the girlfriend finds it disgusting. Later, he and George are told this by Elaine:
* Seinfeld for everything when Jerry is around (because he and and his wife refuse to believe Jerry isn't broke). Jerry himself is actually a subversion; he's

immensely generous with his money and often givens thoughtful and expensive gifts. It's one of the character's few redeeming traits.
* Seinfeld for syndication on TBS with episodes being sped up approximately 7.5% to fit in two more minutes of commercials.
* Seinfeld found out Larry based him on himself and started playing the character as an exaggerated version of Larry.
* Seinfeld, Frank Costanza sees someone choking at a singles event he cooked for and is reminded of an incident during the Korean War where he was responsible for his troopmates getting food poisoning. Frank flips out and tries to stop everyone from eating, overturning the food table in the process.
* Seinfeld from Elaine, George finds he can no longer even sit in a car with her without feelings of The Urge. In fact, by the end of the episode, all of the male characters are enamored with Elaine after hearing the tape.
* Seinfeld - George admits to having privacy issues after getting a massage from a man, to where he can't use a urinal; he's a "stall guy". Kramer finds this funny.
* Seinfeld, George and Jerry pretend to be "O'Brien" and "Murphy" so that they can get a limo from the airport. On the way there, they pick up two fans of O'Brien, and find out that O'Brien is actually the Neo-Nazi leader of the Aryan Union, who believes that Jews are trying to take over the world using blacks to push drugs.
* Seinfeld, George builds an elaborate sleeping space under his desk. Later, Steinbrenner (his boss) comes looking for him and, not seeing him sleeping under the desk, spends the afternoon waiting for George to "come back." George eventually gets out of it by calling in a bomb threat. Later in the episode (after George is out), Steinbrenner hears George's ticking alarm clock in the desk and calls the bomb squad.
* Seinfeld - George buys a fedora at a flea market and waxes nostalgic for the days when men wore hats - "It must've been a bald paradise!". Naturally he meets an attractive woman and has to face the prospect of removing it...
* Seinfeld: George Costanza refuses to carry a pen around with him because he's afraid that it might accidentally puncture his scrotum.
* Seinfeld, George dates a woman who looks like Jerry. George tries to come up with things that the relationship can be 'about' so as not to deal with the idea that he might harbour homosexual feelings for Jerry. The woman gets gum in her hair and cuts it out, making her hair short like Jerry's. George runs away screaming. Later, at the coffee shop, George and Jerry are talking about the incident and George says 'We must never ever speak of this'. Afterwards Jerry awkwardly asks George if he wants to go and see a movie. George refuses, instead saying that he's 'going to take a few days off', which Jerry agrees is probably for the best.
* Seinfeld: George gets all anxious and upset after he gets a massage from a male therapist...when someone mentions Evander Holyfield and how he's a good-looking man, George gets worse...then more so seeing a poster of Holyfield.
* Seinfeld: George goes climbing with Elaine's boyfriend (who he has a mancrush on) and ends up breaking the poor guy's face.
* Seinfeld, George is excited to be showing up to a fancy party with a date wearing one of these.
* Seinfeld George loses his glasses. He thinks he can see just fine (especially when squinting), but he ends up mistaking a police officer petting her horse for Jerry's cousin making out with Jerry's girlfriend. It's also revealed that he once mistook mailboxes for raccoons. Oddly enough, he was also able to spot a dime on the floor from the other side of the room.
* Seinfeld, George needs to be fired from the Yankees to get a more lucrative title with the Mets, but is actively praised for wearing/damaging Babe Ruth's clothes and 'streaking' during a ballgame in a flesh-colored body suit. In the end, he finally manages to do something that would have gotten him fired, except that Mr. Wilhelm barges in at the last second to take credit for it and get himself fired because he was up for the same Mets job.
* Seinfeld, George plots an elaborate setup to prove a mechanic stole his Twix bar. It's ruined when he leaves the room...
* Seinfeld, George's boss Steinbrenner is eccentric enough to fire people for

almost no reason.
* Seinfeld, George's dad gets fed up with the commercialization of Christmas that he invents a new holiday called "Festivus". It includes a father-son wrestling match and an airing of grievances with other family members.
* Seinfeld, George's desperation not to spend time with his once-potential parents-in-law at a function they have arranged sees him concoct a story about owning a luxurious house in the Hamptons which he is spending time at, and ends with him driving them all the way to the Hamptons to keep the lie going. When he breaks down and admits the truth, they confirm they knew all along, but let him suffer through keeping up the charade because they don't like him very much.
* Seinfeld - George served scrambled eggs secretly laced with lobster to Jerry's girlfriend, revealing it after she ate... many people would love this combination (she did until she knew what it was), but she followed a kosher diet. This was his revenge for her telling his girlfriend about his "shrinkage".
* Seinfeld George's fiancee is accidentally poisoned by the cheap glue on the wedding invitation envelopes, because George was too stingy to pay for better ones (and too lazy to seal any invitations himself). And Susan herself for some reason didn't use a sponge rather than lick the envelopes herself—-poison or not, those seals taste terrible.
* Seinfeld George's mother rejects the advice of Jerry's girlfriend Donna Chang because she finds out (having previously talked to the woman only on the phone) that Donna is not Chinese. "I don't want to take the advice of some girl from Long Island!" she shouts.
* Seinfeld) George spends the rest of the episode contriving excuses to walk in on her naked to even the score.
* Seinfeld: George's wallet. The "mint" is a phone tab from an ad (a strip of paper just big enough to fit a phone number).
* Seinfeld", George's workplace despises him so much that they are trying to get him to quit, because they can't fire him due to the contract he signed. One day he shows up to work and finds the door to his office boarded up. After climbing into his office through the air ducts, he phones his boss's secretary.
* Seinfeld, George thinks that the word "puke" is funny. "That's a funny word. Puke. Puke! Don't have to think about that."
* Seinfeld, George tried this to get out of the planned marriage with Susan. It doesn't work, either.
* Seinfeld: George uses porn as part of his computer sales pitch in The Serenity Now.
* Seinfeld had fun with Elaine and David Puddy, as well as George with Susan.
* Seinfeld had George eating very sloppily on the Jumbotron, and the commentators mock him for not using a napkin.
* Seinfeld had Jerry deal with an entire family of guys who tended to pick up a television set too heavy for them. At the end of the episode, Jerry easily picks up the back-killing television TV and moves it.
* Seinfeld had plenty examples of this trope, for instance, George needing a car battery to power up an arcade game (long story), Kramer's friend carrying said battery in the night and Jerry having to remain with a girlfriend he loathed because he heard news of a serial beheader and mistook Kramer's friend with the battery for the psycho carrying a head.
* Seinfeld had the double-or-nothing variation when Elaine kept betting Jerry that she was broken up for good with Puddy. Several rebounds later, she gives up, stops betting, and Puddy breaks up with her.
* Seinfeld had the similar scenario of Frank Costanza's war story: He was the cook for his unit, but the shipment of food he received was expired. In his hubris, he thought he could compensate for this with just the right seasoning, but he "overseasoned" and made the food too spicy, causing the troops to get sick. He was so scarred by this that he vowed never to cook again.
* Seinfeld had this in retrospect. In Improv comedy club, a friend of Jerry's was on the softball team. They won a game and Kramer convinced him to pour a cooler full of Gatorade over the coach's head. The coach ended up dying of exposure and

the friend developed a drug problem out of guilt.
* Seinfeld has an inversion: Jerry would not let one of his own neighbors into his apartment building.
* Seinfeld has a slightly modernized version with an electronic organizer and a tape recorder instead of kitchen appliances. Both items turn out to be defective.
* Seinfeld has Jerry and Kramer swap apartments. Thanks to a "Kenny Roger's Roasters" sign which shines into Kramer's window, this happens to Jerry:
* Seinfeld has Kramer as a Communist Santa. Your mileage may vary on whether that was bad or not.
* Seinfeld has Kramer's alter-ego H.E. Pennypacker: wealthy industrialist, philanthropist, and bicyclist.
* Seinfeld has so far only aired on the Canal Sony pay TV channel (Amazon Prime Video keeps the original Mexican dub).
* Seinfeld has "The Apology" in which George doesn't get an apology he insists on from a guy going through AA. He talks to the guy's sponsor, who then takes George to Rageaholics Anonymous so he can get help. George resists this and confronts the man again, driving HIM to go Rageaholics. Meanwhile, there was Germaphobes Anonymous in that episode that Puddy used to go to and eventually Puddy, Elaine and Elaine's germaphobe coworker all end up at-because Kramer made a salad for them while showering.
* Seinfeld. He comes up with surprisingly brilliant schemes, but for the purposes of completely pointless things. One can only wonder how successful he'd be if he put the effort into work that he puts into avoiding work.
* Seinfeld, he innocently asks a mailman for directions to the nearest Chinese restaurant. He doesn't have a clear view of the man's face at that moment. Jerry doesn't realize until it's too late that the mailman is a Chinese-American, who takes great offense at the request.
* Seinfeld; he picks a bad student after several — as he puts it — "annoying little overachievers".
* Seinfeld!" Her appearance in a later episode confirms that this last guess was correct.
* Seinfeld He stands in the doorway for a few seconds, then backs out again.
* Seinfeld. His trademark entry was averted in a couple of episodes. In one, Jerry's apartment is robbed while he's away, so he starts locking the door at all times. At one point there's a loud thump on his front door. When he opens it, Kramer is on the floor, holding his head. In another episode, Jerry has a woman in the apartment, and again, has the door locked, leading to another loud thump on the door.
* Seinfeld. How smart did he get, you may ask? Well, after identifying a waitress's accent as Portuguese, he immediately starts speaking fluently in Portuguese to her. When Elaine asks him where the hell he learned Portuguese, he shrugs and says that his cleaning lady is Portuguese, so he must have just picked it up from her. Unfortunately for him, despite his desire to remain celibate and stay a genius forever, the Portuguese ends up being his undoing when it helps him seduce the waitress. After doing some quick calculations and determining that this was a once-in-a-lifetime opportunity, he has sex with her and immediately reverts back to his normal intelligence, presumably losing his ability to speak Portuguese.
* Seinfeld in an attempt to get his parents mad after they started neglecting him.
* Seinfeld includes most of its memorable minor and recurring characters in the finale.
* Seinfeld: In one episode, Elaine dates a man who is 66. Though she gets teased over it a bit, Elaine seems to be happy with this. However, he then has a stroke and nearly dies, convincing her to break up with him. The way she does this though is to suddenly spring it just as she's been feeding him.
* Seinfeld. In one episode George accidentally got his coworker fired and then got his position. Kramer promised a little kid a Yankees baseball player would catch a fly ball in his hat, Elaine ruined her friendship with her cousin, several New-Yorkers missed their wake-up calls, and Seinfeld broke up with the aforementioned cousin due to her bad cooking. The trigger event was Jerry eating a grapefruit.

* Seinfeld instead of an apple and tries to play it off as a conscious decision.
* Seinfeld, instead of separating, they're about to spend a year together in the same tiny cell (yeah, don't ask):
* Seinfeld, in that they are no longer interested in each other sexually but still hang out with each other because they don't have many other friends.
* Seinfeld in the background and so out of focus that Jerry has to squint to see them.
* Seinfeld: In "The Conversion", the writers didn't know that the Latvian Orthodox Church was a real religion, since they were trying to make up a fictional one. They ended up receiving many thank-you letters from the church for bringing attention to the denomination.
* Seinfeld: in the episode "The Junk Mail," Jerry searches through an old VHS tape and finds out Elaine's latest boyfriend once appeared as "the Wiz" in a kitschy commercial for the Nobody Beats The Wiz chain of electronics stores.
* Seinfeld: In the final episode, NBC bigwigs have rekindled their interest in Jerry's pilot.
* Seinfeld In "The Library," Jerry claims that he did return a decades-overdue library book, saying the event is burned into his memory because he was on a great date at the time. It turns out that he actually returned a different book with a similar title.
* Seinfeld: In "The Old Man," George was attracted to the titular old man's housekeeper specifically for this reason. After all, if she can't understand anything he says, then he can't screw things up with her by saying something stupid.
* Seinfeld: In "The Pledge Drive", Jerry hosts a pledge drive at WNET Channel 13, and then has Kramer take over while he searches for his missing Nana.
* Seinfeld: In "The Wallet", Jerry throws away a watch given to him by his parents because he didn't like, but it was later found by Jerry's uncle Leo who takes it for himself. This follows up to its continuation episode "The Watch" where Jerry is having dinner with his parents and Leo. Leo proceeds to show off his new watch and says "What kind of idiot would throw away a perfectly good watch?'
* Seinfeld involves Jerry tiptoeing around these while dating a Native American woman, avoiding common phrases with Native roots ("scalping" for tickets, "reservations" regarding a restaurant) to not offend her, after accidentally doing so after buying a fake statue of a stereotypical Native man. Eventually he manages to accuse her of being an "Indian giver" without actually using the word, and their relationship dissolves.
* Seinfeld in which Elaine allows herself to be mistaken for a building janitor because she's hiding out there in order to have Chinese food delivered.
* Seinfeld, is a Broadway veteran and a very talented singer who had to be recorded singing twice as he sounded too good the first time.
* Seinfeld is a good example of a grown-up sitcom that's at this level.
* Seinfeld is built around this trope: George, with a piece of pulp in his eye, gets one of his co-workers fired and accidentally sells George Steinbrenner's birthday card to a sports memorabilia shop by way of some badly-timed winks.
* Seinfeld is excused since the title character is a neat freak, but it would have felt out of place otherwise, considering how "ordinary" the people are.
* Seinfeld is nowadays the only one still completely in the show's shadow.
* Seinfeld isn't in "The Seinfeld Chronicles" (the pilot), which was shot before she was cast, and due to her pregnancy midway through the series is also absent from both parts of "The Trip". In fact, only one cast member appears in every episode— no prizes for guessing who).
* Seinfeld is the embodiment of this trope, to the point that Jerry immediately seeks him out for help when he needs to pass a lie detector test.
* "Seinfeld" Is Unfunny: A work that was innovative at the time nowadays comes off as uninspired and unremarkable.
* "Seinfeld" Is Unfunny: A work that was seen as revolutionary at the time is now viewed as derivative due to its innovations not being innovative anymore.
* "Seinfeld" Is Unfunny got a score of 20% on Sega16), led quickly to the death of

the genre. Nowadays, admitting to wanting live-action in a video game is like saying that you want your game to be horrible. This still does not prevent the medium from having its own age ghettoes, as seen below.
* "Seinfeld" Is Unfunny: Groundbreaking and popular thing fades into irrelevance due to many imitators or improving technology.
* "Seinfeld" Is Unfunny: It's literally "(an) old hat", not something that was once considered trendsetting before it loses that appeal after being imitated so often.
* "Seinfeld" Is Unfunny (something is copied so much that the original work doesn't seem as original anymore)
* Seinfeld itself and Jerry and George are based on the show's creators.
* Seinfeld Jackie Chiles (an obvious parody of Johnnie Cochran) in at least three cases of this. Every time, he wound up humiliated due to Kramer acting stupid and ignoring his legal advice.
* Seinfeld: Jerry and George are seen playing softball in two episodes, where the plot surrounds this event.
* Seinfeld: Jerry and George had been pushing for a long time to get their "show about nothing" approved by NBC. Finally, their first episode is aired and is successful. However, at the same time, the head executive who had approved the show goes AWOL and is replaced by a vindictive woman who cancels the show out of spite.
* Seinfeld, Jerry attributes the popularity of salsa to people thinking it's fun to say.
* Seinfeld, Jerry buys a "European men's carry-all" from the J. Peterman catalogue — but essentially, it's a purse.
* Seinfeld, Jerry feels uncomfortable with his girlfriend's tendency to walk around his apartment naked—especially when he sees her do a "full-body flex on a pickle jar."
* Seinfeld. Jerry, George, and Elaine have all routinely dated people only to break up with them over one minor character flaw or another.
* Seinfeld, Jerry had a girlfriend whose stepmother was obsessed over her stepdaughter's speed dial, and she did not want to lose her spot to Jerry. Jerry's girlfriend finds out about her stepmother's plans, and throughout the rest of the episode, the two women take the speed dial more and more seriously.
* Seinfeld: Jerry has a favorite yellow t-shirt named Golden Boy. When it's washed in the wrong cycle and ruined, Jerry mourns its loss and passes the "favorite t-shirt" title to Golden Boy's "son", Baby Blue.
* Seinfeld, Jerry is dating a girl who is gorgeous and sexy, but not very bright. His conflict over this manifests itself in a scene where his brain (Jerry in a brain-shaped hat) and his penis (Jerry in a flesh-toned military helmet) face each other off in a chess game until one folds.
* Seinfeld Jerry is dating a woman whose boss turns out to be his old rival in high school Duncan Meyer. Duncan hates Jerry because he was a legend as the "fastest kid in school" after winning a track race in the ninth grade. Jerry won due to a head start that nobody but George saw. Only Duncan suspected he cheated. Jerry gets George to pretend he hasn't seen him since high school to convince his girlfriend and Duncan that he saw Jerry win the race fairly. When George "runs in" to them at the diner he says he remembers that race well since he claims it was the same day he lost his virginity to Miss Stafford the "voluptuous" homeroom teacher: "I was in detention and she came up behind me while I was erasing the blackboard..." Jerry then stops him and gets him back to talking about the race.
* Seinfeld - Jerry is excited over the prospect of meeting and dating a Donna Chang, then is upset when he finds she's a white girl who appropriated a Chinese name.
* Seinfeld, Jerry is making idle chit chat with his masseuse and mentions a recent child abduction in Pennsylvania, then begins rambling about how you just never know who could be some nutjob looking to hurt you or your kid, even pointing out how he could very well be such a person. The woman gets so freaked out that she refuses to continue having him as a client. When he shows up at the office to apologize and explain, the woman flips out even more and screams at her visiting son to run into her office and lock the door.

* Seinfeld, Jerry jokes during one of his stand-up bits that this is why superheroes have secret identities: not wanting to face complaints after doing this (or potential lawsuits).
* Seinfeld - Jerry's dad Morty, as president of his condo board, gets a roast in his honor, but he's so sore with his emcee friend over Jerry and the 'astronaut's pen' that he pushes the whole affair into an ugly brawl.
* Seinfeld: Jerry Seinfeld had a bit about horseback riding: the "U-shaped" horses he usually gets have names like "Almost Dead" and "Glue Stick."
* Seinfeld, Jerry (Seinfeld) jokes about his current girlfriend's belly as if it speaks in a funny voice. She tells him he has to choose between the joke or her. He chooses the joke, only to find out his friends think the voice is 'played out'. He quickly reconciles with the girlfriend.
* Seinfeld: Jerry's girlfriend, Donna Chang (who changed her last name from "Changstein" and is from Long Island and very occidental), says "ridicurous".
* Seinfeld, Jerry's girlfriend forces him to read scripts with her as she horribly overacts, and representations of his brain and penis engage in a chess match to see whether or not he'll dump her.
* Seinfeld Jerry was in a footrace in high school and had gotten away with literally jumping the gun, taking a 10 yard lead before the race started, and for some reason nobody noticed except George. Many years later, a guy he beat comes back for a do-over.
* Seinfeld: Kramer always entered Jerry's apartment with a dramatic slide - but it was postal employee Newman who had a recurring Ham whenever he entered a scene.
* Seinfeld: Kramer and Newman are prone to these, alone or working as a team.
* Seinfeld. Kramer can't get the part to play himself. (It is implied this happened to the guy he's based on.)
* Seinfeld: Kramer, George, and Elaine are all drop-in characters because they tend to arrive at Jerry's apartment unannounced. Kramer is the best fit because he lives across the hall and doesn't even need to be buzzed up. He simply bursts through the door without warning. In one episode, Jerry actually had the door locked for an unrelated reason, leading to a loud crash as Kramer tried to perform his trademark slide.
* Seinfeld. Kramer is more likely to have a "money making scheme of the week" though.
* Seinfeld, Kramer mistakenly thinks a friend is pregnant and even after she states that she isn't, he still is not entirely convinced.
* Seinfeld. Kramer rages war with the cable company, after they made him wait all day for an appointment years before. When the cable guy phone's Kramer to access his apartment, Kramer excuses himself and puts him on hold — complete with a tape recorder playing elevator music. Fade to the cable guy at the payphone, checking his watch, when Kramer finally rides by in a taxi to taunt.
* Seinfeld, Kramer sees a cop wearing an eyepatch and, thinking it looks cool, decides to start wearing one as well. His trademark klutziness exacerbates thanks to his now-limited field of vision, but he doesn't seem to care.
* Seinfeld, Kramer yells at Jerry about him wanting to reclaim a phone number of a woman he was trying to stop seeing. Kramer storms out and slams the door and a beat later he comes back in to grab the cereal and milk he was borrowing off of Jerry's counter. Then he leaves again.
* Seinfeld. Later on, his suspicions are confirmed. In another episode, the same dentist inflicts pain on Jerry after finding out Jerry was telling "anti-dentite" jokes (You know what the difference is between a dentist and sadist? Newer magazines.)
* Seinfeld led many to believe that she had broken the curse, at least for herself.
* Seinfeld me the name of the movie you want to see!" At the end of the episode, the Moviefone guy arrives to take revenge for the stolen business.
* Seinfeld Neuman is a postal worker. In a scheme to get Neuman out of his apartment via a transfer to Hawaii, Jerry dons Neuman's old uniform to deliver his unused mail. The joke is that the scheme backfires because Jerry is better at it than Neuman - all of the mail was delivered on time, something no mailman has ever

done.
* Seinfeld, Newman gets ticketed for speeding. He makes up a story about having to save a friend from taking his own life because he couldn't become a banker and tries to get Kramer to follow along with it.
* Seinfeld: "no learning" was one of the rules of the show, after all.
* Seinfeld, of all shows, has Elaine’s boss J. Peterman briefly become one in the episode “The Chicken Roaster”—- he goes missing in Myanmar, and when Elaine tracks him down on behalf of the company, he’s living in the jungle as a “poet warlord” who orders around the natives and asks Elaine if she’s an assassin.
* Seinfeld often consequences to Larry David's actions. The humor is also subtler and less slapsticky, the situations and how they play out are a bit more realistic, etc.
* Seinfeld once dated a woman who appeared emotionally normal in most ways, but never laughed. Needless to say, as a comedian this bothered him. At one point he even tells her a joke, and she responds in a dead monotone that "That's very funny."
* Seinfeld. Once he shows up after losing his "credentials", the next day the same building is devoid of anything but a meat-packing plant.
* Seinfeld: One episode has Jerry dating a woman with an annoying laugh, and he can't bear to tell her. It's compared to "Elmer Fudd sitting on a juicer."
* Seinfeld: One episode, this happens to Elaine with her keyring, causing Jerry to ask if she's working as a medieval jailer.
* Seinfeld on George as retribution for Susan's death if the gang is found not guilty.
* Seinfeld". On one occasion he was called "Gary Seinfield" by someone who had just been told his name literally one second ago.
* Seinfeld plots, many of which were B movies like "Sack Lunch", "Checkmate", and "Prognosis Negative".
* Seinfeld references the Cuban hijacker trope with Dominican characters that are repeatedly mistaken for Cubans.
* Seinfeld referred to this in his act (in a two part episode). See above.
* Seinfeld, resulting in him forbidding Jerry from seeing his daughter ever again. Naturally, Jerry is pretty ticked off at Newman the next time they cross paths.
* Seinfeld returns to work at the J. Peterman Catalog at one point, wearing George's Yankees jacket, after Elaine warned her to stay away from him on the grounds that he's "a bad seed".
* Seinfeld seasons to become a hit. It's highly unlikely that a show would be allowed to stay on the air that long without becoming a hit if it were to debut now.
* Seinfeld's half-sister Lauren Bowles made occasional appearances as a waitress in the coffee shop that the characters frequent.
* Seinfeld shares her pro-choice views because "He's so good-looking."
* Seinfeld?", she turned to him and said "I'm not doing this". The script was thrown out and "The Phone Message" was written in two days to take its place.
* Seinfeld since the Jerry, Kramer and Elaine put a lot of emphasis on how others perceive them and will lie to make themselves look better.
* Seinfeld situations in the show are the result of them actively looking for reasons to end promising relationships.
* Seinfeld's main characters come up with their own lexicon of terms that may or may not be shared by other characters.
* Seinfeld so much that she submits her own idea. When her boss sees her published cartoon, he soon identifies the punchline as "a Ziggy", stolen from the newspaper comic of the same name.
* Seinfeld. So the four main characters being sent to prison resulted in fans being unhappy.
* Seinfeld sound rather jarringly fake compared to the audience response in the rest of the show, presumably because they got a handful of actors in to play the standup patrons. Could also be that it was the "warm-up" to the show, shown before

the start.
* Seinfeld spawned one of these. Apparently, Jerry Seinfeld and several writers went to the restaurant of the man (Al Yeganeh) that the character had been based on. He recognized them and launched into a rant about how the episode had "ruined his life" and demanded an apology. Seinfeld stood up and gave, to quote, "the most sarcastic, insincere apology" he'd ever heard. Yeganeh then yelled "No soup for you!" and threw them out of the restaurant.
* Seinfeld special for that year). It wasn't until season three that it showed any promise at all, and season four that it was legitimately successful.
* Seinfeld "Spongeworthy." This gets a callback in the final episode when the pharmacist is called to testify against her and her need for birth control is made to make her sound like a loose woman rather than one taking responsibility for her reproductive health.
* Seinfeld started to use cold opens as opposed to Jerry's stand-up routines around season 8.
* Seinfeld starts causing havoc at the Old Mill Restaurant, Kramer is told to alert the police. He finds a pair of beat cops but is out of breath from running, thus suffers a coughing fit while trying to explain the situation.
* Seinfeld's "The Maestro" he drinks enough cafe lattes to talk a mile a minute and jitter as he walks.
* Seinfeld's "The Yada Yada", Jerry's love interest Beth (Debra Messing) appears to agree with him on the superfluity of dentists... only to add that dentists were worse than "the blacks and the Jews". Afterwards, when Elaine asks Jerry where Beth is, he answers "she went to get her head shaven".
* Seinfeld: Subverted. In the episode "The Soup", George flirts with a Monk's waitress, Kelly, and both playfully banter with each other. At Jerry's goading, George takes Kelly out for a walk. He mentions how he likes the word "manure", which wrecks his chances with Kelly as she makes a casual mention she has a boyfriend. The next time they meet, the banter is replaced with a cold and distant formality, which makes George too uncomfortable to enter Monk's. He attempts to get her fired, but that backfires when George gets banned from the restaurant.
* Seinfeld subverts this. The plane malfunctioning with the main cast in it certainly sounds like this trope, but it lasts for all of a minute (with the characters continuing to say funny things, even) before going right back to the show's usual pure comedy.
* Seinfeld supposed to be rather unattractive and date above their level.
* Seinfeld that was scripted but never filmed (does that count?) had Kramer change his name to a bar code tattooed to his butt.
* Seinfeld The episode "The Library" has Elaine, George, and Jerry discussing the wedgie. At the end, George is given an atomic wedgie by an old gym teacher-who he had gotten fired for giving him a wedgie in high school.
* Seinfeld, the events brought up as evidence against the gang are referenced as happening on the original air dates.
* Seinfeld (the last three were with the same woman). Sometimes it worked, but more often than not, it backfired.
* Seinfeld; the original ending called for them to drive away but be unable to find the exit.
* Seinfeld: The plane's going down, the series is ending, and Jerry and Elaine are about to reveal their true feelings for each other... when the plane levels off. They make a safe landing, the confessions go unsaid, and the series ends in a completely different manner.
* Seinfeld: The series finale involves the cast being brought to trail for violating the "Good Samaritan Law" when they fail to help a man being mugged. In real life, the Good Samaritan Law protects people from being charged when they do try to help someone is danger. The trial is also filled with various examples, such as the judge allowing witnesses that have no relevance simply because the prosecution already paid for their travel expenses. Also, the maximum punishment for such a violation would be a $300 fine, not a one-year prison sentence, especially since there was a cop standing close by and not doing anything to help

and even testifying to that effect. Even their fictional version of the law is stated to only require offering aid "when it is reasonable to do so" - any lawyer worth a damn could easily argue that there is nothing remotely reasonable about requiring random civilians to intervene against a potentially armed criminal.
* Seinfeld: The show's comedy is largely based on the characters having in-depth conversations about trivial topics and daily minutiae. This is partly why it eventually dubbed itself "a show about nothing".
* Seinfeld: "The Subway" Though all four characters ride the subway during this episode, Elaine is the only one unlucky enough to be on one that stalls, delaying her arrival at a lesbian wedding.
* Seinfeld this in the episode "The Calzone", where Jerry's girlfriend has this quality and he takes advantage of it.
* Seinfeld!" This situation was reused and played for laughs each time.
* Seinfeld, this was one of the ideas Jerry and George pitched to NBC for Jerry's sitcom pilot. After hitting Jerry's car, a man has no insurance or ability to pay for the damages, so a judge sentences him to be Jerry's butler. The network executives like this ridiculous premise much more than "a show about nothing."
* Seinfeld, though we don't know if he succeeded in sleeping with her.
* Seinfeld, to avoid harassment by a street gang George claims to be a former member. They don't believe him so to "prove it" he has to mug somebody on the street. Jerry's parents walk by and George tries to get them to pretend he's robbing them but they dismiss him.
* Seinfeld top, and because it's clearly the place trying to get rid of its wasted food by pawning it off on the needy.
* Seinfeld to promote his coffee table book about coffee tables. He kisses Kathie Lee Gifford on the lips. When the three of them share a drink of coffee, Kramer burns his mouth on the coffee, making him spit all over Kathie Lee's dress.
* Seinfeld, to which her expression clearly indicates that this is the weirdest example she's ever heard.
* Seinfeld trivia and confesses, and we never find out whether he was beating the machine or not.
* Seinfeld (unusually for this trope, the journey in the ambulance is used for several more gags).
* Seinfeld uses them regularly, often because the studio audience won't stop laughing.
* Seinfeld uses this trope, having Jerry and Elaine set up George and one of Elaine's friends (who, naturally is never heard from again).
* Seinfeld version is relatively tame compared to the real man who has been known to use profanities such as calling a female reporter a "bitch" on camera in one instance.
* Seinfeld version of her gang of guy friends: one member who is strangely like Jerry, one strangely like George, and one strangely like Kramer (as well as a mailman strangely like Newman). The twist, however, is that these counterparts, though definitely reminiscent of the originals, are actually more "normal" than the regular gang.
* Seinfeld, walked away from the series after its seventh season, Seinfeld was promoted to executive producer.
* Seinfeld was an artist on Seinfeld, there were remarks that it was probably why their work was expensive.
* Seinfeld was on the air has seen an episode in syndication at least once, but that's not necessarily "The Soup Nazi". However, everyone can state the basic premise of the episode or quote the character's famous catchphrase.
* Seinfeld we also have the "maroon Golf" Jerry ("black Saab") blocked in traffic and who paid him back.
* Seinfeld wearing a large fuzzy hat, and walking with a cane, tries to remove a prostitute from doing business in his car. A cop mistakes him for a pimp, and he's arrested.
* Seinfeld. When George and Jerry accidentally injure Midler in a celebrity softball game, forcing Jerry's girlfriend into the role, New Yorkers accuse Jerry

of injuring her intentionally.
* Seinfeld: When George Costanza criticized George Steinbrenner's decisions to his face, Costanza wound up working for the Yankees for a season.
* Seinfeld: When George's fiancée Susan dies, he is more relieved than anything else. This is later used as evidence against him at the trial in the series finale.
* Seinfeld, when George tries leaving his keys and then his hat at a woman's apartment so as to have an excuse to call her again.
* Seinfeld when Jerry and George film the pilot for their show. It looks like they're struggling and it's going absolutely nowhere, but they successfully make a pilot. The show doesn't get picked up, but not because of any problem with the show itself; it gets canceled because their main supporter, the president of the network, becomes lovesick for Elaine and runs off to join Greenpeace.
* Seinfeld, when Jerry asks George "Is there any Tampax in your house?". When George reluctantly replies "Yes", Jerry declares, "You've got yourself a girlfriend".
* Seinfeld, when Jerry returns a valuable earring he found in his dry cleaning. It turns out that the dry cleaner's wife has been frantic over this missing earring, and to reward him for the kindness, he promises Jerry free dry cleaning from that day forward. Of course, the trope is then played with because Jerry's friends keep asking him to get their stuff cleaned for them.
* Seinfeld, when Jerry's car is stolen and a similar model turns up torn apart in a garage.
* Seinfeld when one of Elaine's boyfriends is in the hospital. George mistakenly calls it the "Clara Nightingale Syndrome", confusing Florence Nightingale with Clara Barton.
* Seinfeld, when one of Elaine's coworkers believes that Elaine's name is actually Suzi, and complains about her to Elaine's boss. Her boss, of course, believes that Suzi must be a separate person entirely. When this woman (in the presence of Elaine's boss) demands to confront both Elaine and Suzi at the same time, Elaine manages to talk her way out of the situation while simultaneously maintaining the illusion that she is Suzi (to her co-worker) and that Suzi is someone else (to her boss).
* Seinfeld when one of Elaine's co-workers keeps calling her Susie, and due to an elaborate chain of events everyone is convinced Susie is a real person. Elaine "kills her" by telling her co-workers Susie killed herself, and there is somehow a funeral at the end.
* Seinfeld when talking to a therapist after headway is being made on he and Jerry's show for NBC but feels in his gut that something will go wrong, claiming that "God would never let me be successful." When the therapist says that she thought he didn't believe in God, he replies "I do for the bad things." Throughout the rest of the episode, he continues to repeat such sentiments.
* Seinfeld when the latter pursues Jerry's girlfriend, revealing a rarely seen poetic side. The scheme nearly derails when she mentions junk mail, and, fed by Newman, Kramer launches into a rant that so-called junk mail takes as just manpower to deliver as "precious little greeting cards."
* Seinfeld where George hired the best freelance electrician around to wire a battery to a Frogger arcade machine he bought so he could keep his high score. The electrician was disappointed that it wasn't a heist, though George said if he wanted to he could steal the necessary tools.
* Seinfeld, where George's girlfriend refuses to accept their break-up. Both she and Jerry compare this to launching missiles from a submarine (Jerry says it's not the same, but George's girlfriend says it is).
* Seinfeld, where Jerry Seinfeld played a fictionalized version of himself, there was a plotline, where he was involved in the creation of a TV series in which he starred as a fictionalized version of himself.
* Seinfeld where Newman interrogates Jerry, but sits himself under the hot lamp instead of Jerry. Newman gushes sweat while Jerry sits comfortably and sips a refreshing soda.

* Seinfeld, where the most trivial things affect condo board politics.
* Seinfeld, whether it be Jerry and his virgin girlfriend or Elaine encountering JFK Jr. at the place she works out at.
* Seinfeld: Whether or not Elaine was dating Puddy or not would depend entirely on what works for the episode. Their unstable relationship was lampshaded often.
* Seinfeld, which would intercut Jerry's stand up comedy routines with the sitcom action. Usually the routines commented on the events in the sitcom portion of the show, but occasionally characters from the sitcom portion would appear in the stand-up crowd sequences. These stand-up sequences were later demoted to bookending each episode and eventually dropped altogether.
* Seinfeld while George puts his head on the table while groaning "Make it stop..."
* Seinfeld whose last name is Chang. Mrs. Costanza later rejects the advice because she was under the impression that Chang was Chinese, but she isn't. (It was shortened from Changstien.)
* Seinfeld with another man, not simple attraction to them. However, the only gym teacher actually physically seen in the series was a vicious bully, but not a pervert.
* Seinfeld with hilarious results. When George stops having sex in "The Abstinence," his IQ goes off the chart now that his brain is free to focus on things other than getting laid, and he even gives New York Yankees home run hitting champs Derek Jeter and Bernie Williams advice on how to use physics to improve their game. However, when Elaine sees what happened to George and decides to give up sex to help her boyfriend pass the medical board, her IQ drops dramatically.
* Seinfeld with his woman incredibly quickly. Subverted when the bride walks down the altar and whispers to Kramer that she wanted him all along, while Kramer's date is so in love with Mickey that she can't bear to watch him marry someone else and runs out of the church in tears.
* Seinfeld with the nearest people they can find on the plane ride home. Elaine has to wake up her seatmate for this purpose, and Puddy, seated on the other side of her, nicknames him "Vegetable Lasagna," which they call him for the rest of the episode, even after he offers them his real name (Magnus).
* Seinfeld with The Non-Fat Yogurt episode after Jerry drops an F-bomb and the store owner's kid starts repeating it.
* Seinfeld would often state in response to criticism of the show, "If you don't like it, please don't watch."
* Seirei Gensouki: Spirit Chronicles: Lucius Orgueil and his mercenary group, the Heavenly Lions, are a bunch of sadists who like to use their power to torment those weaker than them, even when they're not getting paid for it. While on the payroll of Proxian agent Reiss, they attack various royals from other countries and enjoy the chaos they cause in their operations.
* Seireitei has a really high wall around it, so the heroes have to be shot into it by cannon. This wall isn't the only thing protecting the Seireitei. There's also a forcefield of sorts protecting it from above. The reason it has to be a
* Seiren, which started out as video games that were later adapted into anime.
* Seirin High's Basketball Club has six benchwarmers, but they fall into two categories. The three second year benchwarmers, Mitobe, Koganei and Tsuchida are the overshadowed players, who aren't bad as players, but they are not central to Seirin's strategy. However, due to Kuroko's nature as a
* Seiros has been massaging the truth of the War Of Heroes and Crests to protect the last few Nabateans. To make matters worse, the only other source of information on events back then, "those who slither in the dark", do the same, but they're intentionally deceptive.
* Seishirou, falling in love with the protagonist and being masculine and stylish.
* Seishirou, one can take the obvious guess along with everyone else.
* Seishirou/Subaru being a tender-hearted, gentle young man who is utterly destroyed by Seishirou's dark intent. Often taken to extremes in fanfiction.
* Sei Shonagon. A lady-in-waiting of Empress Sadako, her real name is not known for certain, but most scholars believe it is Kiyohara Nagiko.
* Seishoujo Senshi Saint Valkyrie recognizes that Ai Hayama is Valkyrie Ai, despite

her frantic protestations to the contrary.
* Seishun Kouryakuhon manga focusing on the four main characters' journey to high school graduation.
* Seis Manos, the show suffered from very low viewership and conversations with the showrunners (particularly during a 2020 New York Comic Con panel) seem to indicate that the one season is all that will be made.
* Seismitoad in Generation V is very middle of the road, with a decent typing but a somewhat lack of moves, and almost all of its stats are close together.
* Seitdem holt der Teufel keine Schneider mehr, es gehe, wie es wöll.
* Seitokai Yakuindomo, and then remembers a rumour that they become bigger if you massage them. So she starts to rub her breasts over her shirt when Takatoshi walks in. It's quite awkward, but then Shino tries to save face. How? By declaring that she's 'just sexually frustrated'. Takatoshi mutters that that isn't a very good excuse.
* Seitokai Yakuindomo are female examples. No wonder Takatoshi is always exasperated and ready to answer them when one of the three comes with a perverted thought.
* Seitokai Yakuindomo becomes his in-law and uses it as an excuse to get closer to him.
* Seitokai Yakuindomo ears when Shino says something more perverted than usual.
* Seitokai Yakuindomo gag of Shino announcing a new (often weird or nonsensical) Ousai Academy Student Council Rule.
* Seitokai Yakuindomo, had it's movie released on July 21, 2017 because it's a pun on "masturbation" in Japanese.
* Seitokai Yakuindomo has Suzu's mom claim that this is the secret to her home cooking.
* Seitokai Yakuindomo, is shanghaied onto the student council on the first day of school.
* Seitokai Yakuindomo, it seems Shino's guess is true for a large part of the remaining 27 guys.
* Seitokai Yakuindomo. It's quite awkward, but then Shino tries to save face. How? By declaring that she's 'just sexually frustrated'. Takatoshi mutters that that isn't a very good excuse.
* Seitokai Yakuindomo moment when Suzu is shocked after walking in to see Aria and Shino tugging on Tsuda's arms and shouting "Mine!". They were actually fighting over which one of them Tsuda would help carry heavy stuff for first.
* Seitokai Yakuindomo movie does this twice. When Shino is being interviewed at the beginning, the last part of her speech that the audience hears is "Are you aware of the meaning of cherry blossoms?", which the first line of the second season's opening. Then in the post-credits scene, she's seen standing under a cherry blossom tree in the exact same pose as the second season's credits.
* Seitokai Yakuindomo: On chapter 443, Uomi comes to Takatoshi's house after buying some groceries and asks him to open the door for her, leaving some bags outside. Moments later Kotomi asks him to do the same, as she ran naked from the shower to get a shampoo that Uomi had left in the bags outside.
* Seitokai Yakuindomo. She has nearly taken advantage of him when she locked him up together with her in a room.
* Seitokai Yakuindomo, so this trait is commonplace—especially given the examples do maintain an exterior of propriety for an efficient student council.
* Seitokai Yakuindomo. When Tsuda compliments the miso soup dinner the three student council girls make for him and his sister, they stare at him expectantly after mentioning which part of the soup they prepared individually.
* Seitokai Yakuindomo with Suzu. Often lampshaded with an arrow labeled "Suzu is down here."
* "Seito Sakakibara" (his real identity is sealed) was a fourteen-year old
* Seiya and Saori after jumping off a cliff together to escape from Shaina and Jamian. Saori nearly kiss an unconscious Seiya, but is interrupted by an
* Seiya is caught without Cloth, but Misty allows him to put on his to prove that he, the strongest Silver Saint along Shaina, has nothing to fear from a Bronze

Saint.
* Seiya's long lost sister, but the lowest ranked saints manage to block it (at great damage). It's implied that the nearly godly main characters would be immune, what with divine blood protection.
* Seiyu's Life! first shows up in Episode 5, she looks like she just got out of bed. The dissonance between that look and how she looks in public appearances is enough for Ichigo to have to call her Hoi Yurie just to process it.
* Seiyu's Life! has a plushie of Korori, the main character from her favorite childhood anime, whom she treats as a source of advice and comfort and occasionally voices him. Korori also acts as the series mascot and narrator, providing information about the voice acting industry for the audience.
* Seiyu's Life! has this a lot. Episode 1 involves a traditional anime voice acting, while in episode 7, Futaba tries her hand on dubbing a foreign movie—apparently ADR is not necessarily used in Japanese dubbing of foreign films.
* Seiyu's Life! present. And like Korori, the two of them act as the shows series mascot and explain to the audience the industry's inner working.
* Seiyu's Life! were all voiced by relatively new voice actresses since the characters are also rather new to the industry (well, Futaba and Ichigo are).
* Seiyuu CRUSH! despite the fact that he'd referred to the box as "my things" just a minute earlier.
* seiyuus languages and those are Japanese, German, English, Spanish, and Latin.
* "Seize vital regions, seize vital regions... CRUSH PRUSSIA, CRUSH PRUSSIA!!" Really, people, don't mess with Austria unless you want his girlfriend/wife Hungary to pound you.
* Seizure response dog and diabetic alert dogs are trained to predict upcoming attacks and warn their owners. Even untrained dogs are told to be sensitive for sudden changes and attempt to protect humans from harm — barking, forcing them to lay down or even bite their hands, forcing them to drop sharp objects like knives and scissors before the seizure begins.
* Seizure where a conservative U.S. senator suffering from Parkinson's disease is undergoing a therapy (which he was about to ban in the first place) in which a patient with an incurable disease is returned to health through the injection of cloned stem cells. He wants the stem cells injected into his brain to come from the Shroud of Turin. Afterwards, he indeed experiences some messianic visions but it turns out that they were temporal lobe epilepsy-seizures caused by dislocated injection, not by the origin of cells. So, no copy of Jesus in this book, only His cells.
* Sejuani and the Winters' Claw favour enormous boars. Some of Sejuani's alternate skins have other steeds, such as
* Sekai and his friends make final adjustments to all three units so that their polycaps were made to be compatible with each others frames, allowing them to swap out parts with one another. Minato states that they practically had to rebuild them to make this work
* Sekai De Ichiban Tsuyoku Naritai episode 11, Sakura pins her opponent, and the referee just stands there gawking until Sakura reminds her that she's supposed to count the pinfall. The commentator even mentions that if she'd started counting immediately, the match may well have been over.
* Sekai helps Makoto and Kotonoha hook up and puts a lot more effort into it than you would expect. Then she gives herself a reward for her efforts by surprise-kissing Makoto. This does
* Sekai-ichi Hatsukoi has Hiyori from the spin-off novel "Yokozawa Takafumi no Baai". Multiple characters, but especially Yokozawa himself point out several times that she is pretty mature for a ten year old. Justified since her dad is busy with work and a total clutz at home, so she is mostly responsible for the household. She has instances where she is a normal kid though (even though she greatly dislikes when people point it out).
* Sekai-ichi Hatsukoi is a mangaka infamous among the editors for his last-minute work. In general, the editors in this series spend their lives running after their

procrastinating charges to get manuscripts on time.
* Sekai-ichi Hatsukoi over Onodera, although it tends to be more subtle than most examples of this trope.
* Sekai-ichi Hatsukoi: Takano and Onodera are a boss and an employee. Much of the plot revolves around getting Ondera to admit he loves Takano
* Sekai-ichi Hatsukoi when a character tries to get rid of his crush on a random guy.
* Sekai-ichi Hatsukoi where the main character works under his high school crush at his new job. Played with in that he does not even recognize that person.
* Sekai-ichi Hatsukoi Yes, Ritsu has a lot of blank spots in his memory... and Masamune was probably justified when he called him a bastard for not remembering.
* Sekai is the one who gets broken, then pushes Kotonoha in front of a train, and Makoto ends up with Kotonoha's torn-off arm in his hand when he fails to save her. (The original version of this ending came from the PS2 port, and a new version was made for the HQ remake.
* Sekai Ninja Sen Jiraiya(hence the title of the series, "Jiraiya: War of the World Ninjas").
* Sekainohate de Aimashou. Despite a brief initial attempt to pass as a boy, it's pretty much all skirts and dresses from then on, and everybody seems to accept it without comment.
* Sekainohate de Aimashou: Prince Emilio has several brothers. Each rules a fiefdom in his own right and all of them are either jockeying for the imperial throne or trying to protect themselves from the others who are jockeying for the throne. It's essentially sibling rivalry raised to the level of a cold war.
* Sekai seduces Makoto because of her own unrequited feelings for him,
* Sekai tries to push Kotonoha in front of a train, falls on the tracks, and both
* Sekhmet. And instead of dung, they prefer to eat buildings, essentially making them living siege weapons.
* Sekhmet, Henrik, Nathanael, and Cassandra never speak. Though Cassandra growls and Nathaniel squeaks.
* Sekhmet series. It follows the adventures of Kalima, a kanji princess as she is chosen to be Bastet's champion and her friends.
* Sekhmet, the fierce warrior aspect of the Eye of Ra, who was depicted as a human woman with the head of a lioness. In later era, she and Bastet were conflated, with Bastet and Sekhmet serving the gentler and vengeful side, respectively, of the same feline goddess.
* Sekhmet. They work for whoever pays well enough but came to Earth to steal... something.
* Sekibanki wears a red cape and mantle large enough to obscure the tenuous connection between her head and neck.
* Sekien no Inganock: 41 Creatures who brought doom to Inganock, 41 Kikai standing behind someone's back and 41 people disappearing every year.
* Sekien no Inganock is eligible for a mercy kill, but tends to only pick the truly hopeless.
* Sekien no Inganock, who sports the standard (if somewhat ragged) ears and tail, along with some massive claws and a golden, slitted right eye. (Her left is still a normal blue.) Her personality can be rather cat-like at times.
* Sekirei after a failed attempt to kill the one responsible. After Minato saves him, Homura accepts his feelings for him and that his body will continue to change, though unlike most examples Homura's gender-identity ultimately remains the same as before.
* Sekirei and are referred to as marriages or engagements by the Sekirei.
* Sekirei are as well. The actual trope winds up averted as Minato very much seeks to avoid favortism, and the Sekirei he's winged generally respect this, though they can ruffle each others feathers from time to time.
* Sekirei began turning into a woman. It's not clear if the transformation was complete by the time he was finally "winged", but the character now has breasts as well as more feminine features, and is pretty annoyed and uncomfortable with the whole situation. Poor, guy/girl.

* Sekirei, Benitsubasa calls the Izumo Inn and demands to speak to the "big-breasted woman". Among the 108 Sekirei, there's maybe ten who don't fit that description and half those are men or children.
* Sekirei, but over time Musubi lost her camera time edge and was often paired off with Tsukiumi during any scenes showing her, allowing the other girls their chance to shine. This has helped the balance greatly.
* Sekirei does this occasionally, providing intel and support for Minato. However, she is also capable of jumping into the fray and fighting, with a motorcycle and rocket launcher, if needed.
* Sekirei does this to greet back Minato one day. Miya immediately forbids it.
* Sekirei faces this problem twice in the OVA in the second season. Both times something happens that destroys the rooms, so the problem resolves itself.
* Sekirei female characters. The writer, Sakurako Gokurakuin, is a woman.
* Sekirei has the protagonist Minato himself who cannot do well under pressure. But give him time to think and he aces through tests and is actually quite competent in making up plans.
* Sekirei have a form of this. A special power-up and attack available only when their Ashakabi kiss them of all things.
* Sekirei. Illicit relationships are strictly forbidden at Izumo Inn and it would be such a shame for him to end up homeless~
* Sekirei, in the third episode of the anime's second season, to members of the disciplinary squad, launched by Kazehana.
* Sekirei is extremely intelligent but not a fighter like most other Sekireis.
* Sekirei is often pushed around by his mother and sister. However, he stands up for his friends when it counts.
* Sekirei: Kusano has this as her power. She even carries around a little potted plant with her at all times and can use said plant to snag people with vines.
* Sekirei: MBI owns one that can attack any single target in Tokyo. Matsu reveals its existence by attacking Musubi with it. Musubi manages to escape with minor clothing damage. The neighborhood she was in (she was buying groceries on Miya's behalf) wasn't quite so lucky.
* Sekirei, Minato feels at ease after having a private talk with Tsukiumi about her not losing a fight, which he had with Musubi in an earlier episode. He then wonders out loud if they're not the same despite their differences. He opens the door slightly, and sees Musubi standing by the door. He nonchalantly closes it for a few moments, then opens it again, and after she says something to him, he screams, wondering if Musubi just heard what he said comparing the two girls.
* Sekirei. Minato in particular takes things in stride, and actively seeks any way he can help the girls out, whether it's providing emotional support, doing the laundry, or acting as the strategist.
* Sekirei, Minato is trapped by many other Ashikabi and Sekirei who were sent an email by the Game Master who said if anyone stops Minato from reaching the MBI building, they'd be excused from his earlier rule where an Ashikabi with no wins would lose their Sekirei. A biker Ashikabi arrives late to the situation and immediately starts talking trash to them. Then they end up fighting each other instead, allowing Minato and his group to escape.
* Sekirei: Minato often ends up doing this for the Sekirei he eventually becomes their Ashikbabi for. This helps win over many of them, such as Musubi, his first Sekirei, Kusano, and later Tsukiumi.
* Sekirei: Minato's first encounter with Musubi happens when she literally falls out of the sky onto him, boobs-first to the face.
* Sekirei, Minato's had a few issues with this. He was kicked out of his old apartment because the landlord saw him and Musubi there and jumped to the conclusion in the trope description. Later, at his new place of living, after gathering four Sekirei of his own, he sleeps in the same room as all of them (same bed, too). So everyone gets shuffled off to different rooms in the Izumo mansion.
* Sekirei, Miya often threatens to do this to Seo, especially if he refuses to help the main characters. She will also sometimes use this threat on Matsu when the latter is getting a little too friendly with Minato, and by extension, Minato, even

though he's completely innocent in those cases.
* Sekirei Musubi that Minato starts to encounter more of them in particular the five others who bond with him. It's even noted that a Ashikabi like Minato becomes more magnetic to Sekirei as they wing more particularly with strong bonds.
* Sekirei, neither of them knows that the other is involved. It gets particularly frustrating because Yukari's Sekirei is an older brother to one of Minato's, and is devoted to finding her.
* Sekirei: Out of Minato's Sekirei, Matsu is clearly the one with the strongest libido and biggest urges to seduce him, and the only reason she hasn't taken his virginity yet is because she's been threatened by Miya to get kicked out of the Izumo Inn if she engages in that kind of behavior. Despite being acknowledged as the most perverted, she's still a kind and caring person at heart and people genuinely like her.
* Sekirei partners, called Ashikabi. Beyond sensing the emotions of their partner, it's been shown that an Ashikabi can sense when their Sekirei is terminated in battle.
* Sekirei plan exists is because someone got the bright idea of a Pokémon-style game.
* Sekirei protagonist Minato Sahashi gaining the affections of 6 Sekirei. Of them, 4 are very beautiful and buxom women who are all in love with him and consider him their husband. By the series end, he is considered married to everyone in his harem.
* Sekirei. Rather than allow this to consume him or damage their relationships, he resolves to become someone worthy of their love and trust, someone that will believe in himself enough to fully return their feelings. He declares this to them and asks them to wait for him until then.
* Sekirei: Seo has 4 sons (two sets of twins) with Hibiki and Hikari a year after the series ends, all who have the mother's electric powers.
* Sekirei, the CEO uses a robotic dummy to give a message at the end of the third match. The message ends with the dummy saying that it will self-destruct in ten seconds... But Homura, who hates the CEO, blows it up before the countdown even starts.
* Sekirei trope upon the epiloque with him loving and treating everyone in his harem equal. Even more is that all his Sekirei all love him unconditionally and are happy to share him as their husband.
* Sekirei, with their friendship centered around their promise to become the strongest Sekirei and one day face each other in the final battle of the Sekirei Plan.
* Sekiro. In this case if you win a slightly different cutscenes plays were Wolf almost beats the boss but then a ninja distracts him leading to the same outcome as if you lost normally.
* Sekiro: Shadows Die Twice After a few seconds, however, the boss gets back up, retrieving his head with one hand and the sword with his other, becoming the Headless Ape.
* Sekiro: Shadows Die Twice (a mythical organ located in the anus that contains the human soul).
* Sekiro: Shadows Die Twice, and the game's plot is driven by various groups seeking said immortality.
* Sekiro: Shadows Die Twice as completely immortal, which is translated into gameplay into being the single most durable enemy in the game. Even several Deathblows, it's only after they're slashed at the throat with the Mortal Blade, the only weapon that can harm immortals, that the the immortality is severed and they go down for good.
* Sekiro: Shadows Die Twice: Besides the actual bosses and minibosses, a number of standard enemies are also more than capable of holding their own against our shinobi protagonist Wolf:
* Sekiro: Shadows Die Twice child survived), deliberately infesting themselves with centipedes (even more heretical considering that centipedes represent the poison of hatred in Buddhism)...the Seekers will do anything and cross any moral line if it

means they can live forever.
* Sekiro: Shadows Die Twice, creating a large cloud of red mist that temporarily blinds all nearby enemies, allowing him to either escape or commence backstabbing.
* Sekiro: Shadows Die Twice during his second and third phases will sometimes pull a gun on you while still carrying a big-ass spear in his other hand.
* Sekiro: Shadows Die Twice has one for Ashina, the fictional region of Japan the game takes place in, which you can access from the fast travel screen. While it's completely unnecessary for actual in-game exploration, it's lavishly drawn and shows you where exotic places such as Mibu Village and the Fountainhead Palace are in relation to the rest of the world.
* Sekiro: Shadows Die Twice, he will beg for mercy. Hesitate to strike him, and he'll pounce on you while mocking your gullibility. Attack him while he's still talking, and he'll compliment you for seeing through the bluff.
* Sekiro: Shadows Die Twice: Sekiro has been blessed by his lord, the Divine Heir, with the Dragon's Heritage, which allows him to revive himself after being killed. However, if he runs out of his own life force (which takes only one or two resurrections) he will unconsciously begin drawing on the life force of other people, infecting them with a sickness called Dragonrot. In addition, some enemies in the game are infested with giant centipedes that prevent their bodies from dying, no matter the harm done to them. If killed, they just get back up a short while later.
* Sekiro: Shadows Die Twice starts his boss fight by screaming at the top of his lungs.
* Sekiro: Shadows Die Twice which is counter-intuitive to traditional shinobi attire and his philosophy in life is based around protecting and serving a master (though this is more due to the machinations of his adopted father Owl).
* Sekiro: Shadows Die Twice, who have been transformed into somewhat carp-like beings with blue skin. They come in two main flavors: the squishy Palace Nobles, who look more like mutant space aliens than humans and can inflict debilitating status effects with their magic flutes, and the much tougher Okami Warriors, who are still mostly humanoid and have a fighting style that resembles a ceremonial dance.
* Sekiro: Shadows Die Twice Wolf has his left arm cut off at the beginning of the game and has a bone prosthetic attached to the stump that functions exactly as the lost limb and also has a grappling hook and a variety of shinobi tools installed in it, such as a flamethrower, a spring-loaded spear and so on.
* Sekiro's toughest mooks, but the Lone Shadow shinobi are particularly dangerous, as even the non-miniboss ones will quickly (and literally) kick your ass if you haven't gotten the hang of dodging and deflecting attacks with sharp precision.
* Selaginella Lepidophylla: Amethyst discusses marinating something in soap as part of her meal.
* Selar and Burgoyne: She's an aloof Vulcan, s/he's from a hedonistic race of hermaphrodites.
* Selasi of Series 7 gained a reputation for always being chilled even if his time management was all over the place. How much time he spent lying on the floor became something of a running gag.
* Selby crashes in Britain saw express passenger trains derailed and several passengers killed or badly injured in the ensuing wrecks.
* Seldom-Seen Species: A work features an animal whose species rarely appears in fiction.
* Seldom-Seen Species: Some species are more seldom seen in the media of some cultures and in some time periods than others.
* Selected Ambient Works 85-92 is considered a milestone of electronic music and by far his most popular and critically acclaimed album.
* Selected wildlife includes the Catachan Devil (a centipede with jaws the size of a tank), Blood Wasps (insects that can eat a man alive), and the Catachan Barking Toad, a grouchy amphibian who responds to any disturbance by exploding, taking anything within a kilometer with it. It's been suggested in-universe the worse ones evolved from Tyranid organisms that lost contact with the

* selecting a window by clicking on it does NOT bring it to the foreground automatically. command to close the shell window.
* Selecting the proper caliber of gun is extremely important depending on the type of target. The lightest caliber bullets are only effective for target practice or extremely close range. Some of the most tragic police shootouts have occurred because law enforcement had underpowered weapons against criminals with body armor. For example,
* Selecting the type and level of penetration a bullet can achieve is extremely important depending on the type of target. The lightest bullets tend to only be effective for target practice or extremely close range. Some of the most tragic police shootouts (for example, the
* Selective Condemnation will be accused of "slaughtering many people." Even though, by the time you reach that point in the game, your party has probably slaughtered more bodies than all of the villains combined.
* Selective Enforcement: A rule is only enforced at random, which can result in people not being punished for breaking it when they really should be and harshly punishing offenders who otherwise didn't do anything wrong.
* Selective Enforcement: Law enforcement will ignore someone doing something major but will punish someone doing something minor.
* Selective Enforcement: Only enforcing a rule when you feel like it/for certain people.
* Selective Enforcement: This person did something bad. We don't care. When YOU do something bad, we're more than willing to punish you!
* Selective Enforcement: Where one person does something immoral and doesn't get in trouble but the opposite happens when someone else does it.
* Selective Gravity, gravity only affects specific objects, while others just float unsupported.
* Selective Localisation: When a localization doesn't account for differences in dialects of the same language.
* Selectively black out bits of the caption until it says something completely irrelevant
* Selective Memory has important information the player has no access to.
* Selective Obliviousness: A character chooses to remain oblivious of something in spite of seeing evidence of it.
* Selective Obliviousness: A character intentionally ignores anything they wish to remain unaware of...
* Selective Obliviousness: Deliberately choosing to remain ignorant of something in spite of witnessing evidence of it on more than one occasion.
* Selective Obliviousness. Needless to say, Moka and the others have openly called her insane on multiple occasions.
* Selective Obliviousness to maintain a level head in a very fraught and dark investigation but causes him to miss subtle but vital clues until it's too late.
* Selective Obliviousness: When a character refuses to comprehend a particular fact that could harm their hypocritical filter if that is the reason.
* selective presentation position that the station (which had rebelled against the dictatorship back home) was under malign alien influence.
* select mode screen If you do nothing, Regis will make a comment once every few seconds, growing increasingly impatient each time, before he finally throws in the towel and quits the game for you, kicking you back to your desktop.
* selector infected WIXOSS and its sequels. The plot is original, but was made to promote the Wixoss card game from which it derives several characters. Various prequel manga were made before and after the series debuted that take place in the same continuity.
* selector infected WIXOSS themes that make you wonder why little girls would buy such a depressing product.
* selects leaders based on skill with single combat and in-Clan politicking and leadership ability. The Smoke Jaguars exemplified this weakness: Their leadership was so focused on fighting that they neglected every other aspect of their Clan. Lincoln Osis, the final Khan of the Clan, was a skilled tactician but an

incompetent strategist. His total neglect of his Clan's industrial production or logistics meant that his Clan was never able to recover from the damage inflicted during the Clans' invasion of the Inner Sphere and when the Inner Sphere decided to attack the Smoke Jaguars several years later, the Clan was completely wiped out.
* Selena Gomez and Madison Pettit have also found their fair share of success with the Disney Channel machine, though not to the same extent. Everyone else completely faded into obscurity, as they mostly hired local kids from the Dallas-Fort Worth area who never pursued long-term acting careers.
* Selena Gomez and the Scene's "Love You Like A Love Song" deserve mention simply for lampshading the oversaturation.
* Selena Gomez, a silly catchy love song which gets stuck in your head because it's lyrics are about a person who's just like a catchy love song which gets stuck in your head.
* Selena Gomez-biggest song from the project, is better-known than "Who Says".
* Selena Gomez due to harassment and some unspecified personal problems, including checking into a rehab center in 2014. The following year she announced that the reason she’d gone into a treatment facility was that she had lupus and needed chemotherapy. She spent most of 2016 again in treatment before she received a kidney transplant from a friend. Now that she’s had a transplant and is healthy again, she’s somewhat come back to social media but not so much as she was back in her teen star days.
* Selena Gomez, has a song titled this, about trying to hide magical feelings for someone new, but not being able to do so.
* Selena Gomez has a video where she is in a karaoke bar, with her singing in and out of the bar's TV.
* Selena Gomez He replied, almost crying, "Yes, I do believe it's real." She smiled and said, "That's all that matters."
* Selena Gomez (Mendler and Sulkin played prominent roles in the show, so their careers were helped more than those of Thorne and Irigoyen).
* Selena Gomez related examples, comparing a love interest to an ear worm. Of course, both are relentlessly catchy in their own right.
* Selena Gomez's video, she at first sings with a karaoke video in the background showing some fantasy boyfriends in different costumes. At the end, said fantasy boyfriends show up inside the karaoke lounge, still wearing their costumes.
* Selena Gomez than him as she is much more famous than he is - "Firestone" and "Stole The Show", conversely, use little-known vocalists and are still known primarily as Kygo's songs.
* Selena Gomez, who said that the name of her band The Scene was a pisstake before they released a note of music.
* Selena had a song named "Carcacha" (Mexican word to refer to a run-down car, is somewhat offensive), the lyrics are entirely about a girl's boyfriend's car, which is the quintessence of the trope.
* Selena instead of his daughter, since he was the one who fired her for stealing.
* Selena: Made in 1997, a good chunk of the film takes place from 1981-1989.
* Selena Mead has a variant: When spy Simon Mead is murdered, his teammates disguise the death as a car accident.
* Selena, people (including their own parents) disapprove of the relationship.
* Selena. She's a belly dancer, her artwork is darker then the other characters but her model isn't much darker then anyone else in the game, and her Japanese name (Sheila) isn't much help. Her child with Luke in the latter game also has a darker skin tone then the other children. Although visiting her home island and meeting her parents Samson and Sue, it is heavily hinted that she's Pacific Islander in descent, often speculated to be closely related to the Okinawan people.
* Selena: The beginning of the romance between Selena and Chris occurs when she asks him if he can dance and he says "Yeah, I put on my white shoes and black jacket and dance like John Travolta." She takes it seriously, prompting him to say he was just kidding.
* Selena was fatally shot in the back by Yolanda Saldívar, an assistant who was also the manager of her fan club.

* Selena was Rebecca Lee Mesa's first and only acting role as the 9-year-old version of the title character.
* Selena with some of her Spanish hits and previously unreleased tidbits), but still became a household name in the US in part because of her folk hero status in the Mexican-American community, and due to the success of the 1997 biopic. Selena's also credited with bringing Tex-Mex music, the genre that launched her career, to mainstream attention, and opening the door for the "Latino Invasion" in entertainment during the late '90s. Her cultural impact, especially the way in which her death galvanized Mexican-Americans as consumers and later on, as voters and shapers of mainstream American culture, is the stuff of numerous sociology papers, and even a college textbook has been written about her cultural legacy. And that's just in the English-speaking world.
* Seleneans are able to link their brains together through specialized spines that permit them to alter each others' brain chemistry as a means of communication.
* Selene boasts of being able to reconstitute herself from dust ala Maestro above. She's done it a few times, but even she has her limits, as Warpath was once able to kill her in a way she wasn't able to regenerate from without outside assistance.
* Selene is noted as having already been old when Atlantis fell some 17,000 years ago.
* selenium is discovered by Julianne Moore taking off her jacket, revealing her periodic table of elements t-shirt.
* self-absorbed, and falls back on the familiar tactic of throwing a fit until she gets her way even when it won't work.
* self-absorbed by congratulating themselves for their sheer magnanimity, or, worse, as a bargaining chip or to have something to hold over the other person in the future.
* self-abusive, so he finds it overbearing and stifling and constantly complains about it to his friends. One of Dad's favourite ways of spreading the encouragement is through leaving John little printed notes.
* Self-Adaptation: The adaptation is created by the same person who made the original work.
* Self-Adaptation: The adaptation is made by the same person who created the original work.
* self-aggrandizing weasels narrow, e.g., custom lair construction; tailored supersuits for villains; themed super-vehicle customization; etc.), and would be a force to reckon with if they could stop their in-fighting for more than a few minutes at a time, but they never do.
* Self-appendectomies have also been performed in isolated places and with improvised tools, for example by a Russian doctor in Antarctica and an Australian soldier in the Philippines during WWII.
* Self-Applied Nickname: A character adopts a nickname and insists that others refer to him by it.
* Self-Applied Nickname: A character refers to him/herself by his/her own nickname.
* Self-Backing Vocalist for an impromptu live performance. When asked how she sang both parts at the same time, the answer is "Magic!"
* Self-Botched Catchphrase: Characters accidentally says their catchphrase wrongly.
* self-castration in order to prevent sexual lust, having as much 100,000 members in the early 20th century, but disappearing after heavy persecution from both Imperial and Soviet governments. In Delta Green however, they are still active and actually worship Shub-Niggurath.
* Self-Checkout Unlimited: The Moksha ending, where you essentially become one with everything, but you lose all sense of self and have to wait (possibly forever) for the rest of humanity to catch up.
* Self-Contained Demo: A video game demo that uses original levels instead of reusing levels from the final product.
* Self-contained in regards to energy, amenities and waste reclamation.
* Self-Damaging Attack Backfire: Your attack ends up hurting you instead.
* Self-Defeating Prophecy: A prophecy that would come true if it weren't for its own existence.

* Self Defense (gay supporting character; subject matter includes homophobia)
* Self Defense Milo. This puts Alex in a very awkward position, since he can't violate Milo's privacy by telling Lucy that Milo is gay, and can't violate Lucy's by telling Milo about the crush.
* Self Defense that occurred two years earlier, during which the city - though mainly the area in the vicinity of the main police station - descended into a state of semi-anarchy for 42 days as the police board argued with the city council over union demands while leaving the streets totally unpatrolled.
* self-deluding in "Fishsticks" was based on people the creators know in the entertainment industry, where they honestly believe they came up with ideas despite putting little to no effort into them.
* Self Demonstrating: A style of writing that attempts to demonstrate the concept illustrated, as opposed to just describing it. Because these can easily become incoherent, difficult to read, or just plain weird, we ask that you first write an ordinary version, and then put the silly bits in the SelfDemonstrating/ namespace.
* self deprecatiing joke when Marge talks about shows getting stale and repetitive and Smithers bursts in to announce, "Maggie shot Mr. Burns again!" Followed by, yes, the sound of crickets chirping.
* self-deprecating extent), types and talks like this — though of course, she talks like this to the extent that a German learning English can talk like this. When asked who she is in the very first chapter by oghond (who has never seen her face or heard her voice before), she responds thusly:
* Self-Deprecating Humor, Stephan Pastis always draws himself as pudgy, even though the real-life Pastis is actually quite fit.
* Self-Deprecation about his weight than his more regal counterpart in the play.
* Self-Deprecation and frequently shrugs off most compliments due to his insecurity.
* Self-Deprecation and writing themselves as hating each other, and each one has a fanbase of some size.
* Self-Deprecation, he discredited his "Card Games on Motorcycles" meme by having Lector destroy it in order to demonstrate Jinzo's special ability. Lector then laughs and says "I've been waiting a whole year for that!"
* Self-Deprecation: The Man/Woman of the Hour is the last to go; they often roast themselves as well as the people who roasted him/her.
* Self-Deprecation variant in the "Ming Dynasty Astronaut" episode, after numerous failed attempts to build working black powder rockets:
* Self-Deprecation when he claims Canadians are stupid. Why? Because they descended from the British. And why are the British stupid? Because they came to Canada and decided "Hey, let's live here in this lifeless frozen wasteland while sending our criminals to Australia!"
* Self-Deprecation, which he predicts will "fly off the shelves". The real "VB" (or Virtual Boy) was one of the biggest game console flops in history and lasted less than eight months on the market.
* Self Description draws diagrams about the amount of black on the comic strip itself (including the diagrams).
* self-destructed because it had ran out of ammo at the critical moment), but at the price of becoming too massive to fly.
* self-destructing spaceship has hitched a lift with the four survivors.
* Self-Destruction of the Ultimate Warrior in around 90 seconds, and HHH never got a return match.
* Self-Destructive Charge: Character moves to attack even while they're dying.
* Self-Destructive Charge: Sometimes actions can take the place of the Rousing Speech.
* Self-Destruct Mechanism (1971), which is disarmed with 8 seconds to spare.
* Self-Destruct Mechanism, and not a silent self-destruction sequence.
* Self-Destruct Mechanism, DM triumphantly declares "Just in the nick of time!"... and realises there's still five seconds on the clock. So he waits four seconds, triumphantly declares "Just in the nick of time!", and hits the button with a second left on the clock.

* Self-Destruct Mechanism is used in this way by invaders in the virtual reality game.
* Self-Destruct Mechanism page, many arcade games between the 1980s and 2000s deployed suicide batteries. The data on the ROM are encrypted, and the suicide battery is wired up to protect the decryption key stored on volatile RAM. If the battery drains, the key is lost forever. However, arcade machines made after 2009 employed time-bombed dongles and expiry dates hardcoded into the game itself.
* self-destruct mechanism. Similarly, the ON/OFF switch will not clearly be labelled as such.
* Self-Destruct Mechanism. Though it varies: in "Menace", Hammond and Carter turn it on and off with keys. In "Lockdown", O'Neill and Kearney turn it on with keys. In "Lockdown" and "Avatar", Carter turns it off in the control room by tapping the computer a bit.
* Self-Destruct Mechanism, which involves turning off the cooling units of the ship's reactor. The ship's systems are automatically venting in an effort to cool itself.
* self-detonating his Tallgeese, before OZ got a chance to destroy it.
* Self-diagnosing a stroke is considered good practice by most doctors. Since a stroke will almost always knock you out and there are very few, if any, external symptoms, having someone tell the paramedics or doctors that you had a stroke can save them a lot of time, and save your life. FAST is generally the easiest to remember: Face (half of your face just stops working, and it looks weird), Arms (you can't keep your arms level with each other), Speech (you slur your words as if drunk) and Time (it all happens very quickly).
* Self-Discipline, Desaad makes one request to Vandal Savage: None of the metahumans are to be harmed. Both these things would hold great significance down the line for villains and heroes alike.
* Self-Disposing Villain (he accidentally blows himself up while guarding the ship's armoury), saving Jim from having to kill him in self-defense as in the novel.
* Self-Disposing Villain: The villain kills themselves, thus sparing you from killing them yourself.
* Self-Disposing Villain: Villain gets themselves killed after the hero thwarts their plan.
* Self-Duplication: A character has the superpower to make copies of themselves at will.
* self-esteem issues progresses and she integrates into Grayson society, she grows it out.
* self-explanatory Liver-And-Onions Truck. And kids are hiding from the truck, implying they'll get the treats whether they like it or not.
* Self-Fanservice: An image mocking the phenomenon, not a straight example.
* Self-Fanservice: Fan art depicts characters as being more attractive than how they actually appear in the work.
* Self-Fanservice: Fan art depicts characters as more attractive than how they are actually depicted in the original work.
* Self Fulfilling Prophecies that fool his victims into making them come true. Yuma manages to defeat him by defying his prediction.
* Self-Fulfilling Prophecy. He most likely would have won decades before the series began, if he'd just ignored the prediction of a witch most considered a whack job.
* Self-Fulfilling Prophecy: It's common for guys and girls in the business to be told they won't succeed or they can't draw for whatever reason, so they don't get booked in on going programs or get to have matches, so they don't get over. Sometimes the bookers will throw them a bone and say, "Okay, prove to us you can be a hit with fans," and throw them into a match with no build up and no significance, often against someone it's clear they won't beat (like a midcard champion) so the crowd has no reason to care about the match and will go dead during it, making the bookers think they were right and the wrestler will never be hot, proving they shouldn't get a push, and because the wrestler doesn't get a push they can't get the fans' interest, meaning it's extremely hard for them to break out of this

cycle. Aside from happening with individual wrestlers, this same effect can also happen with entire divisions and styles of wrestling - such as Cruiserweight divisions, Women's divisions, or lucha-style wrestling in the USA.
* Self-Fulfilling Prophecy: Many tragic heroes unwittingly bring about the very events that they were trying to avert.
* Self-Fulfilling Prophecy: The Greek god Cronos, whose brutal efforts to prevent his children from overthrowing him directly motivated them to do exactly that. Oedipus, fleeing his adoptive parents to avoid killing Dad and marrying Mom, came to Thebes where his real parents lived.
* Self-Fulfilling Prophecy, this creates a rather interesting sociological phenomenon. Namely, someone thinks that they'll be bad at something (painting, getting a promotion, carrying on a conversation...anything, really), so they actively avoid doing it, thus ensuring that they'll be bad at it. This can even extend so far as to putting more effort into avoiding the perceived failure than it would have taken to learn the skill or succeed at the task, or, put simply, if they'd have put the same amount of effort into actually doing the task as they did in trying to avoid doing it, they'd spectacularly succeed.
* Self-Fulfilling Prophecy: Trying to defy a prophecy actually makes it come true.
* Self-Fulfilling Prophecy when gun owners buy up entire ammunition inventories out of fear that they're going to be banned, thereby causing the very shortages/outages they're afraid of.
* Self-Harm: Deliberately injuring oneself, for example by cutting, as a result of having serious emotional or mental problems.
* Self-harmers often use similar excuses - scratches from their cat or dog seem to be a popular excuse. Because of this, people whose wounds really do come from their pets may be suspected of self-harm.
* Self-Harm is feeling like they deserve it for some misdeed, or they suffer from self-loathing or cripplingly low self-esteem that causes them to think they deserve pain. Getting over this feeling a big step on the path to recovery.
* Self-Help" contains a few examples of second-person narration. Stories like "How to be an Other Woman" and "How to Talk to Your Mother" exemplify the second-person style.
* Selfie and it mostly done low to fairly okay in the ratings before it got moved to Friday night for its fifth season; the show would later air in the summer for its final two seasons.
* Selfie and was the most popular of the three romantic sitcoms ABC pumped out that season, it (along with the other two rom-coms) was cancelled after season one.
* Selfie at times (he wears bow ties, for one thing.) In one episode he mentions his categorization system for his clothes.
* Selfie, Bryn and Henry have a passive-aggressive exchange after Henry rejects the advances of Bryn's friend, Wren. He says thank you and she says "I meant that as a burn." "So did I." "'Thank you' was your burn?" Then, at the end of the episode,
* "#SELFIE" by the Chainsmokers. You can't make more engineered than that: the word was already (and still is) a trendy word before the song existed.
* Selfie: During "With a Little Yelp From My Friends", Saperstein is holding a meeting asking everyone to look around and say what they see. They give innocuous answers, except for one blind man who says "Dark? Eternal night?" The meeting moves right along, but Henry gives the blind guy a glance, and then another one, obviously surprised.
* Selfie, Eliza is hit by a car and then falls down a manhole. When Henry comes to visit her, she says she's okay — and then lists her terrible injuries.
* Selfie, Eliza mentions a co-worker, Joan, might not like her because of what happened with the gizpacho. Henry asks what happened with the gizpacho, and she mentions how she came early to work, fresh from Soul Cycle, very hungry. She started wolfing down gizpacho (labeled Joan) when a woman walks in. Eliza looks at her and says, "Don't tell Joan." The woman replies "I am Joan."
* Selfie, Eliza (whose apartment and general life can charitably be called a mess) is amazed when Henry helps her organize her budget with colorful files in a bright pink cabinet, comparing it to a magic rainbow. Henry, being his usual serious self,

reminds her there is no magic.
* Selfie episode has Charmonique's son start playing K-pop when Henry comes in. Henry immediately takes offense to the boy assuming that all Koreans must like K-pop...before breaking out into dance.
* Selfie Fiend: Selfies have existed for decades but became popularized with the rise of social media in the 2000s.
* Selfie, hard-working Henry becomes a little upset when he gets an 89 performance evaluation, which he compares to a B, saying he's never gotten one in his whole life.
* Selfie, Henry Higgs is very straight-forward in his assessment of Eliza. He calls her vapid, self-obsessed, and a narcissist, and openly states he doesn't like her. And that's just their first meeting. When seeing her dressed to be his date to a wedding he's visibly impressed by her looks-but instead says she's wearing too much fragrance. And later says it was a mistake to help her, and that she's a lost cause.
* Selfie Henry Higgs, who takes it upon himself to make Eliza into a better person.
* Selfie Henry says Eliza is most likely his plus one, as they were both invited to Saperstein's summer house for a possible promotion. Eliza takes great offense at this saying she's "VIP bitches", and rattles off a list of places she was not a plus one to-this goes on from their initial conversation at the office to when they pull up to the summer house, most likely at least one day later. Of course, it turns out she is in fact his plus one, but for a good reason (Saperstein knows Henry is better with Eliza around)
* Selfie, main character Eliza has slept with at least two of her co-workers, one of whom was married, and then another one the next episode (though its implied some time has passed). Henry frowns on this, and worries her coworkers will think Eliza is a slut.
* Selfie, main characters Eliza and Henry are separated by a generation-their official ages are unspoken (the actors are some 16 years apart), but Eliza is most likely in her mid to late twenties, with Henry being at least ten years older than that. In one episode, she calls him a Baby Boomer, and he points out that he falls squarely within the parameters of Generation X, while Eliza is a Millenial. He expresses distaste with a lot of her generation's traits, and she points out their differing views on sex (which he refers to as "being intimate", she laughs at him for this).
* Selfie relationship of Eliza and Henry. Eliza asks Henry to go out to get a drink (planning on setting him up with someone else) and coworker Larry says she wants Henry. Henry says they're like brother and sister, then he realizes that isn't true and says they're "like cousins." While Eliza and Henry have a close, supportive friendship like brothers and sisters, they also have sexual chemistry, unlike brothers and sisters (most of them).
* Selfie, self-obsessed Eliza has her neighbor Bryn, who she calls a "hipster-crite." Bryn dresses in floral prints, runs a book club (in Eliza's words, it's for "adult virgins"), her friends have names like Eyelet and Thistle, makes her own pop tarts, and tends to look down on Eliza (but then again, a lot of other people think she's too shallow/self-centered). Bryn and her girls seem to be a bit romantic at heart, as Bryn audibly gasps when she thinks Henry has come to her apartment for Eliza as a "Jerry Maguire moment"
* Selfie's Henry dates a girl he's alike with in almost every way — except while he's slightly taller than average (Cho stands at 5'10"), she's positively tiny, not even making it to 5 feet of height, with nearly a full foot difference between them.
* Selfie, she's very into casual sex, and talks about it quite frequently, which is kind of a problem, as Henry points out she needs to have meaningful relationships.
* Selfie version of Henry (who is a little older than junior employees like Freddy and Eliza), as a child vitamin Henry worked on is about to be phased out.
* Selfie, when Eliza decides to return Henry's coat by removing it in front of him...with very little underneath and then asking him to spend the night.
* Selfie who doesn't seem that interested in women. When meeting an ex-girlfriend,

she says she moved on once she realized he'd never care about her the way he cared about work.
* Self-immolation also happened in protests against the Chinese government's suppression of Falun Gong.
* Self-Immolation in a suicide attempt. He is rushed to the hospital, but his injuries are so severe it is left up in the air whether he will live to stand trial.
* Self-Immolation variety and ran down a hill, causing a random stargazer to go up in flames, though the suicide attempt failed and the woman lived.
* Self-Immolation which is what the warrior caste was arguing to return to as a pretext for starting the war.
* Self: "I'm not in it for my reputation. Or yours. If push comes to shove, I'm going to save my own hide."
* Self-important, often striding into the spotlight regardless of how appropriate that would be to the situation they're in
* Self-Imposed Challenge. Clothing is purely for decoration. They were also prevented from playing two of the puzzles — gunnery and navigation. This has obviously changed, but even back then, there was still a 'free' server that used a rudimentary version of the system detailed above.
* Self-Imposed Challenge even have a mode that allows you to use both guns with one credit.
* Self-Imposed Challenge for the Shaper class, and later Lifecrafter and Shock Trooper classes, because Shaping skills are their specialty. Without creating mons, the benefits of Shaping specialization can be focused on healing and defensive buffing, but the build doesn't leave much in the way of direct damage ability.
* Self-Imposed Challenge: Gamers choose to impose weird rules upon themselves while playing.
* Self-Imposed Challenge generations long, one for each letter of the alphabet.
* Self-Imposed Challenge. He still swings it around as if it were made of bamboo.
* Self-Imposed Challenge in which the player doesn't use the Junction system. One person doing the challenge reflected on how, after learning that the Guardian Forces caused memory loss, the heroes acknowledged that they only got this far because they used them, and pointed out that this was not the case.
* Self-Imposed Challenge playthroughs (such as releasing any Pokémon that faints, only using Pokémon obtained via online trades, or specializing in a certain type) are popular among players, and anyone who wants to try any of these challenges in addition to a normal run will inevitably have to create an alt to do this.
* Self-Imposed Challenge that has a chance of dropping epic level gear.
* Self-Imposed Exile: A character exiles themselves, usually out of shame.
* Self-Induced Allergic Reaction: Someone exposes himself to what triggers his allergy so that he'll have an allergic reaction.
* Self-Inflicted Hell: A character suffers in the afterlife only because they believe they deserve it.
* Self-Inflicted Hell: The afterlife is whatever you think it will be.
* Self-Inflicted Hell: The damned torture themselves. The demons just let them do it.
* Self-Inflicted Hell: Whatever you expect to happen when you die is exactly what you get
* self-inflicted round of tourneys, the 'Venusfahren', whilst wearing a blonde wig and an oversized woman's dress over his armor. Fortunately for the tattered remains of Ulrich's dignity, that one worked.
* Self-injurers will often use whatever they can find to harm, if their regular razors or knives are missing.
* Self-Insert. As a result, he's quite irritated when a lord flees with everything he can rather than admit his wife sold off several of the prince's spyglasses to pay for her lavish tastes.
* Self-Insert Fic and possessor of the Orange Lantern Ring was possessed and looking for the League of Shadows, his eyes being everywhere accidentally caught

Beatriz da Costa in the shower. He didn't originally remember, but Ophidian did and "helpfully" reminded him.
* Self-Insert Fic: Author Avatar as an original character added to an existing canon
* Self-Insert Fic that Luffy would reach that goal, future knowledge be damned.
* Self-Insert Fic: The author inserts himself or herself into the fic.
* Self-Insert grumbles to himself about how annoying Summer Rose and her big silver eyes are becoming when he remembers both that 1) Silver Eyed Warriors are supposed to be near mythical warriors capable of killing Grimm with a look, 2) Everyone he's met from Summer's village has silver eyes.
* Self-Insert is dependent on much Avarice he feels: meaning it gets more powerful the more he wants something or how it can benefit him. If it doesn't benefit him or he only wants to help, the ring won't work. If he doesn't want it or outright hates it, he risks the ring destroying it.
* Self-Insert is well aware of this despite being the driving force behind a lot of the decisions made she has Ao who is older and more established in the shinobi world present them in her stead while pretending to be a timid and damaged little girl.
* Self-Insert. It's also noted she lacks information because the events in Kirigakure are not very well documented at all in the Naruto universe and most of the underlying problems were started decades ago and have been perpetuated since then. This changes however once they catch up the the beginning of the series (the first eighty chapters or so take place starting five years before the start of the main series).
* Self-Insert on level four, Saldeath comments on his ability. This time, he's not even surprised.
* self-insert She's of the opinion that if explosives can't solve your problems, you're not using enough of them.
* selfish jerks who don't even realize the trouble he goes through to help them.
* selfish "old you." Of course, it doesn't (usually) involve taking on a new name.
* Selfish to keep yourself alive, or vent some of it to get a crucial speed boost past your erstwhile shipmates.
* Self/Less: After being put in the body of a younger man, Damien's montage of learning to adjust to the new body is intercut with a scene of him slowly walking to a mirror and admiring his new, youthful appearance.
* Self/Less, after undergoing shedding and waking up in the new body, Damien starts experiencing hallucinations of a woman and a child. Albright explains that the hallucinations are probably just a combination of Damien getting used to the new body and having past memories getting jumbled. The Latino woman he's seen is probably a woman he used to date and forgot. Damien points out that he never said the woman was Latino.
* Self/Less: A rich, dying old man's mind is moved into a young body that was artificially grown for that purpose. Except that it wasn't, so he commits Grand Theft Me unknowingly and has to deal with the consequences when he finds out the truth.
* Self/Less, but she seems to think he's a complete stranger until he turns around and she sees his face.
* "Selfless, Cold and Composed" is a more somber form of breakup song. And it sort of inverts the "I'm ruining your stuff" category- though there's no mention of cheating, it's about
* Selfless for the episode that her hair in the show (the little braid at the side of her head) was her "wedding hair".
* Selflessness.. Yet they are often willing to sacrifice their popularity and even their life for the greater good.
* Selfless" when Xander objects to Buffy planning to kill Anya, despite the fact that Anya brutally murdered several humans; Buffy herself believes that Xander's lingering feelings for Anya are clouding his judgement:
* Selfless Wish: Having a possible opportunity to get something for yourself and using it for others instead.

* Selfless Wish: Someone forfeits their wish on behalf of someone else.
* Self-Made Man and the wealthy head of a major auto corporation until he foolishly trusted Homer to design a car for "the average American". The end result was such a farce it drove Herb's already-troubled company out of business. By the time we see Herb again in "Brother, Can You Spare Two Dimes?", he's literally living as a hobo.
* Self-Made Man: A person who started out poor became rich through a lifetime of hard work.
* Self-Made Man: A wealthy person started out dirt-poor and achieved their wealth through a lifetime of hard work.
* Self-Made Man Sir Richard Carlisle runs into Lord Grantham's sister on the Abbey grounds:
* Self-Made Myth: A character lies to become a well-known mythical feature.
* Self-Made Orphan: A character killing their own parents is considered to be heinous most of the time.
* Self-Made Orphan by tracking down and murdering his muggle father and paternal grandparents (and framing his maternal uncle for the deed).
* Self-Made Orphan. Here, neither he and Bruce like each other. He later returns when Bruce is in his jerkass playboy phase, and they get along quite well.
* Self-Made Superpowers: A scientifically-gifted character gives themselves innate powers on purpose.
* Self-Made Superpowers: Scientifically gifted characters give themselves natural powers with intention.
* self-mortification. they wore rough twine under their clothing, put thorns in their shoes and inflicted pain and suffering on themselves in a variety of ways. They were ten, nine, and seven years old at the time.
* Self-Mutilation Demonstration: Someone proves they can heal themselves or are immortal by injuring themselves.
* Self-Offense: A character attacks an unknown potential assailant out of fear, anxiety, or paranoia, then discovers they've hurt an ally by mistake.
* Self-Offense: A character detects someone approaching and, thinking it's a bad guy, attacks. Of course, it turns out they just attacked their ally.
* Self-Offense: An attempt at Self Defense goes horribly wrong and gets the wrong guy.
* Self-Offense: You hurt your buddies because you failed to recognize they weren't your enemies.
* Self-Parody. At another ill-timed moment, she launches into another explanation of why she hates President's Day: because she was molested as a little girl by a guy dressed as Abraham Lincoln. Billy ends up dragging her off-camera.
* Self-Parody (like an episode of a TV show that makes fun of its own tropes and clichés).
* Self-Parody's usage of this for comedy. Prince Charming has married and divorced both Snow White and Cinderella. However, he needs to marry a princess in order to succeed his dying father. When a princess is kidnapped, he goes to rescue her; but before he can, his past lovers come and throw him out a window. His wimpy brother Prince Trembling must disguise himself as Charming to rescue the princess while his brother recovers.
* Self-Poisoning Gambit: A character deliberately gets themselves poisoned as part of their plan.
* Self-Portrait with Wings except when she's skating. Fortunately, she finds a way to get rid of them.
* Self-proclaimed "alternative historians" who advocate the hypothesis of a global diaspora from
* self-proclaimed genius (the muscles don't swell up so much, the hand don't explode, and the muscles stay expanded and increase his strength for the entire fight).
* self-proclaimed implies she is mentally traumatized, so it's less that she's stupid and more that she's genuinely mentally unwell. Although it's probably fair to say she wasn't sensible, to begin with, given the strong hints she's related to Amelia and Prince Philionel, who are... definitely flaky.

* Self-Proclaimed Love Interest: A character who claims to be/thinks they're someone's love interest.
* self-proclaimed robot god. As a Magnus in charge of recycling, an act that entails crushing something down to transform into something else, he's justifiably feared by other robots. Due to being capable of also meltdowns, he's also got the capabilities to be feared by non-robotic beings as well.
* Self-proclaimed "Super Lawyer" Kitaoka Shuuichi (secretly Kamen Rider Zolda) from
* self-propelled anti-aircraft gun. An APC with a minigun, how cool is that?
* Self-published author Jacqueline Howett had a spectacular meltdown on "Big Al's Books and Pals" after he criticized the numerous grammatical and spelling errors in his review of her e-book,
* Self-Punishment Over Failure: You punish yourself for failing at something.
* Self-Recovery Surprise: Someone hurts a villain, who reveals that they have healing powers.
* Self-Referential Humor features a cameo by director Wes Craven as a crusty janitor called Fred, who wears a battered fedora and red/green striped sweater.
* Self-Referential Track Placement: If a song has a number in its title, expect it to be placed at the same number in the album tracklist.
* Self-Referential Track Placement — A song's title alludes to its placement in the album tracklist.
* self-replicating robots is defeated when the heroes destroy the titular dark heart commanding them.
* Selfridge is threatening Quaritch with termination, claiming that "one phone call" to the home office is enough to get rid of him. This implies that the call would be instant and not take 4.3 years in either direction.
* self-sealing fuel tanks in a dogfight, but unable to outrun them and thus very vulnerable to high-speed power dives.
* self-serving cowardice sense; on one occasion a dissolute Sikh queen prefaced an engagement with him by ordering 'Rai and The Python' to stand ready as her second course; once she was done with Flashman she gasped to her attendants instructions to stand these two gentlemen down for the night, and tell them not to bother coming in too early tomorrow either.
* Self-Serving Memory: A character flashes back to an event, only for the flashback to be quite different from what actually happened, usually to make that character look better.
* Self-Serving Memory: A person remembers past events as how they believed them to happen as opposed to how the events really occurred.
* Self-Serving Memory is a very real phenomenon, and it can be easy to convince a witness that they saw something when they didn't, especially if what you're saying to them "sounds about right."
* Self-Serving Memory remember these events... so here's a personal account that shows my own actions in the best light possible.
* Self's "No B-sides": The back story is that Matt Mahaffey of Self was streaming one B-side (more accurately "outtake") from forthcoming album
* Self-Surgery: Someone ends up having to perform surgery on themselves.
* Self-Titled Album and Equal Vision wanted more creative control on their next album. We Came As Romans quickly jumped ship to Sharptone and never looked back.
* Self-Titled Album, and happens to be two minutes and two seconds in length.
* Self-Titled Album, in whose liner notes doing this was explicitly stated as being a specific goal of the album; the album also uses binaural beats and other techniques with this in mind).
* Self-Titled Album is abundant. The band's name (and hence the album's name) is twelve letters long, and a chromatic scale contains twelve notes.
* Self-Titled Album — An album with the same name as its artist.
* self-titled game as well, where he ended up challenging Sonic as earned to being his rival than boasted highly about his own strength after he defeated him, and even laughing about it.
* self-titled - the label it was recorded for, DreamWorks Records, technically no

longer exists.
* Selina Kyle, and dresses the part too. She's clever, elusive, pulls of heists wearing a mask that resembles cat ears, and is associated with black cats in particular. She also literally keeps cats around her apartment like a old lady.
* Selina Kyle claims that he has always envisioned Catwoman as an "old-school femme fatale".
* Selina Kyle is absolutely terrified when the Joker appears in front on her.
* Selina Kyle, willing to do anything to protect him even if they're arguing - just ask Jerome Valeska.
* Selina Meyer herself, although in a variation, this is more about political donations rather than personal wealth: she is already loaded. Her team even comes up with
* Selina's Big Score. Selina, a straight example of this trope herself, had pulled off a multimillion-dollar heist, and gave a good portion of the money to her recently-deceased friend's mother and young daughter, knowing full well Gotham's social services are a joke.
* Selina takes another fall later in the movie after her first battle with Batman as Catwoman. She lands in a dump truck filled with sand. ("Saved by kitty litter...")
* Seliph and Princess Julia seem instantly attracted to each other upon meeting, but it turns out that
* Seliph's fury against Manfroy is extremely relatable to the players, who wants to sock him in the face for just about every tragedy that transpired because of his design.
* Selkie and has successfully strong-armed several schools in the past to drop all punishments.
* Selkie does not like to wear shoes (due to having very long webbed feet). She changes her mind after getting shoes custom-made to fit her.
* Selkie falls into this with his son, and had successfully sued his former school when he'd gotten suspended for his behavior. It took video footage of him threatening to beat up a teacher for Trunchbull to see the truth.
* Selkie, Heather steals Selkie's shirt while she flushes out her gills and pulls it out to show her friends. Keisha grabs it and says she's gonna tell on her, but Mrs. Afkhami and Jess just so happen to walk in at that exact same time and see that she's holding it, leading them to think that she stole it despite her, Amanda, and even Heather herself confessing that the latter had stolen it. Keisha's only proven innocent when Georgie tells Jess that Heather really did steal Selkie's shirt.
* Selkies and Wereseals: A magical seal than can turn into a human after shedding its seal skin.
* Selkies and Wereseals: Mythological creatures that can become human by removing their seal skin and return to seal form by putting the skin back on.
* Selkies have the ability to change from seals into humans, then back again with the use of their coats.
* Selkie. She then throws it back in such a way that it bounces off both bullies' heads and lands neatly in Moonsong's hands. Selkie's father Todd assumes it was an accident.
* selkies sometimes featured this. A selkie, in mythology, is a seal that can remove its seal skin revealing itself to be a beautiful woman underneath. In the old legends, men would find a selkie woman sunbathing without her skin. By stealing the skin and hiding it, they can get the selkie woman to marry them, have kids, and live happily for years. However, if the woman finds the skin, she'll take it and go off into the sea, never to return again. This myth is surprisingly prevalent among cultures. Swan-women and celestial maidens could also be wooed by stealing their magical garments, and would likewise flee if they recovered them.
* Selkie the title character is assaulted at school and suspended for fighting when she kicked the bully in self-defense. The bully, on the other hand, wasn't punished, due to the school's principal being entirely cowed by the bully's parents.

* Selkie, this is Jamie's reaction after he first turns into a seal and finds out why. He comes to accept it by the end of the movie, backing out of a ritual that would have turned him permanently human.
* Sella, one of Illya's maids, was merely suspicious and critical towards Shiro but did at least treat him fairly. That was all thrown out the window in this spin-off she becomes outright abusive towards him. To wit, she once viciously beat him up all because
* Sellers' claim that he existed as only what others wanted him to be was based on feeling his real self wasn't sufficiently able to make others or himself happy (and a desire to protect his privacy). In any case, his fascination with being others and never himself was what caused him to identify so much with Chance the Gardener in the novel
* Sellers of leather product often advertise their products as having "genuine leather." It's easy to believe that genuine leather is a mark of quality indicating the product is made from real leather. However, genuine leather is a specific grade of leather, and it's actually the lowest quality of all animal leathers, apart from bonded leather. They make it by artificially finishing the top of low-quality leather to make it look and feel like high-quality leather.
* sell him into slavery. In an odd twist, this later saves their lives when he (as second-in-command in Egypt) saves them all from a famine.
* selling advanced technology, but not giving it away for free. Thus there is an inevitable situation of haves and have-nots where people with no money and nothing to trade do not end up with cool technology, much as is the case in the real world with many impoverished countries. More tightly-controlled societies, such as the fascist Coalition States, also deliberately and actively work to limit how much technology anybody has (including their own member states) so as to maintain control. Lazlo would doubtless share more if they could, but they are already on the CS list of potential war targets and cannot be very missionary in spreading their way of life beyond their borders.
* , selling all new sauces including one that literally just digs a hole for you to die in.
* selling damped paper and calling it LSD at school, thinking that couldn't possibly end wrong. Unfortunately, one kid jumped off a building under the impression that he was high, and the police went up to her and arrested her for fraud sale.
* Selling DVDs, T-shirts, posters, and premium subscriptions was essentially how
* selling here — Winchester isn't known as one to back down or apologize — and Klinger later reveals his knowledge to Winchester by bringing him the leftovers from the Christmas party and saying it was an anonymous donation.
* selling him out for cinnamon., leaving the luckless hippogriff screaming his head off at the 'nonsensical-ness'.
* selling monkeys in comic books - this could not be a good idea at any level.
* Selling their hair to a wig shop after going to Vegas and losing everything.
* selling was the right to have him attend a church of the winner's choice for a year. The soul thing was a gimmick.
* Sellotape (clear adhesive tape): Used in the UK, as well as in many former UK territories.
* Sellotape in the UK and Scotch tape in North America, to the point where the BBC have finally ruled that
* Sellsails are mercenary sailors in it mainly for the loot: buccaneers, basically. Salladhor Saan is a notable example, a wealthy pirate who hires out his fleet to Stannis Baratheon. The Iron Isles, the Sisters and the Stepstones have a semi-steady side-gig of selling the use of whole flotillas or fleets. When they aren't going full-pirate, that is.
* sells everything manages to sell a fishing rod, a boat, and a car that was big enough to carry it to one person over the course of a single day. When his boss asks him how he managed to pull this off, the salesman replies: "He came in to buy some tampons for his wife. I told him 'Your weekend's shot, you may as well go fishing.'"

* sell the sword. The obvious choice is Rochy since he pays the most, but there is unique dialogue for selling the sword in the Parcelyte guild shop or even in Tia's shop in Elcid.
* sell too many of them to the Druuge as slaves. There is an optional sidequest where you can save the Shofixti race, who have ridiculously fast reproduction rate, thus creating an effectively endless pool of volunteer, bushido-following, loyal and eager to sacrifice themselves for you recruits, resulting your crew cost to be reduced to lowest possible.
* Selma Blair, possibly justified by the fact that her character tends to blow things up when she gets too emotional. Liz also spends a significant part of the film pretty heavily medicated.
* Selma Diamond as Bailiff Selma Hacker and her replacement Bailiff Florence Kleiner played by Florence Halop.
* Selma got the surname "Terwilliger" from Sideshow Bob, who tried to kill her for money and would have gotten away with that if not for
* Selma has claimed that she has a lucrative hobby filing 'nuisance lawsuits'.
* Selma: Made in 2014, set during the Selma to Montgomery marches in 1965.
* Selma's Choice". Bart also scares Lisa into thinking the corpse is still talking.
* "Selma's Choice" Bart and Lisa try to get Selma off a bench and ride a rollercoaster.
* Selma, who at the time was passionately in love with Sideshow Bob, almost declaring the wedding is off because he hates Macgyver.
* Selonians are a species of anthropomorphic eusocial otters; the bulk of the species are sterile females, clustering around the few fertile females, who keep small harems of males. The "queens" direct the dens as a whole, but it is the sterile females who are responsible for the day to day running of things. Meanwhile, males are held in scornful disregard as being of little use other than breeding stock, though a small group of "breeder's rights" activists did eventually come into being.
* Selonians have one fertile female and a handful of males per 1,000 births. They're subterranean mammals; the queen and the males — presumably not from the same colony — basically do little but breed while the rest of the colony runs civilization. A little like naked mole rats. Humans and Selonians can apparently be allergic to each other. Or at least Corran and that one Selonian were.
* Selphie do this to infiltrate the Galbadian missile base; hijinks ensue.
* Selphie tilts her head to the side several times, tends to dance in place, pumps her fist in the air and will occasionally pull up one leg, then the other, like she's checking the bottom of her shoes. She will also throw her arms down to her sides when arguing, and trust her to immediately lay down on the nearest bed available, spreading her arms wide like she owns the place.
* Selton Mello is a strange case of this, as he was a dubber in the 80s, broke off as an actor in the 90s, and then in the early 2000s was brought in for two Disney protagonists as a celebrity dubber, Kuzco in
* Seltzer and Friedberg and that if the audience can't tell you're doing it on purpose, it can still be judged as having failed.
* Seltzer and Friedberg didn't recoup its budget and their more recent films have had only a limited theatrical release before going to home media.
* Seltzer and Friedberg focused on contemporary trends that inevitably made the movie look dated a few months after it came out. This frequently manifested in them parodying just the trailers of films, since at the time of shooting they weren't actually out yet
* Seltzer and Friedberg, motherfucker! Apply directly to your motherfucking forehead!"
* Seltzer and Friedberg. Not so much their humor, as the concept of their careers.
* Selyse Baratheon is overjoyed by the human sacrifice of her own brother for nonconformity because his sins have been "burned away." Watch her facial expression closely when Mance Rayder is being burned alive. She gleefully smiles.
* Semantic Superpower: A power based more on interpretation than anything more

logical.
* ''Semazen'', the Sufi meditation practice that involves spinning oneself around as an imitation of the planets.
* Semblance, her eyes turn red and flames burst forth from her golden hair. Characters in-universe learn to recognise very quickly what her eye colour change means and to either try to calm the situation down or go into battle mode themselves.
* Semblance. Her first onscreen use is to literally pull a whole truck with supplies into the palm of her hand.
* Semblance is activated, her blows can render boulders into ash and break a stadium designed to take insane amounts of punishment.
* semblance, Mettle, is literally the ability to devote his entire being to a decision once he has made it. The downsides of this trope are thoroughly demonstrated during volumes seven and eight, where his actions to save Atlas include abandoning, threatening, and alienating many of the heroes and innocent people supposedly under his care.
* Semblances are single, unique superpowers every Huntsman has the potential to unlock. Examples include Ruby's
* Semblance to forge glass weapons instantaneously out of the dust in the air, making this a subversion.
* Semblance to make them think she is Weiss Schnee, the only person she knew they would not harm, and orders them to take her to safety. Unfortunately for her, they call Weiss' sister Winter, who orders them to take "Weiss" home to Atlas, thousands of miles from where Emerald wanted to go. The real Weiss (who was actually kidnapped, albeit by her own father) is rather confused when she returns home to find that all the servants are talking about how she returned a few days ago. When Weiss confronts Emerald, Emerald throws herself on Weiss' mercy. Weiss recruits her as a minion and the two of them are easily able to put Weiss in a much better position in the family than she was before.
* Seme manga, though no one particular title has hit it big as an example yet. But if you browse a lot of BL manga, you'll see a lot of them.
* semen. Martha describes the horror of entering the guest's room every day, swearing that she wasn't going to do it...only to find herself physically incapable of resisting, and sometimes "coming to" in the middle of the process. Before beginning this part of the tale, Martha describes the compulsion using this trope, and a terrified Darcy reminisces about her own desire for rind of pork during her pregnancy.
* seme, Ryuuichi Asami, is a yakuza leader. The series also features members of both his group and of rival organizations.
* Semi-automatic pistols are traditionally used for duels on Manticore due to the fact that they are less lethal than pulsers. Pulsers themselves are miniature mass accelerators, using gravitic acceleration to fire physical rounds. Honor herself practices frequently with a (reproduction) Colt M1911A1 .45 automatic, simply because she enjoys the challenge of hitting a target with a weapon that doesn't do half the work with advanced sensors, etc. In one case this "saved the day", when she was able to sneak her .45 into a hostage situation because it had no electronics or energy cell that would trigger inboard sensors keyed to look for weapons that had both- like pulsers.
* Semi-averted because hyperventilating would increase the temperature of the bubble, and the rise in temperature would cause the bubble to rise.
* Semi-averted because shooting guns inside a ship does bad things to delicate electronics, so melee is used in order to have a usable ship after boarding.
* Semi-averted by the series of nerve agents. While they are a chemical weapon, their gaseous form is invisible to the naked eye. If there is a high enough concentration that you can actually see the nerve agents, you are probably too busy dying in a horribly painful manner to care.
* Semi-averted. The badass "Monster Maroon" jacket and department-colored turtleneck combo is a million steps up from TMP's Starfleet pastel pajamas.
* Semi-canon as they are, a novel based on the series reveals that he actually

married a time-displaced Catherine Sakai, and thus their children were more human than Minbari, which explains their being ostracized by Minbari culture-at-large, though by the present time the human DNA in their descendants was negligible after interbreeding with other Minbari.
* semi-canon, though Italy is not exactly one head shorter than Germany. In fact, Japan's height deficiency compared to Germany is much more pronounced.
* "Semi-cide" aka the first case of the whole series features a dude called Frank, who got accidentally cut into two while working on his car in a parking lot in Las Vegas while a huge truck was around and then hit his lower half. Made worse by how
* Semi-Divine children. Interestingly, they're not together, as Blackrose cannot stand Blackthorn (though Blackthorn still loves her). Instead, they're the matriarch/patriarch of their respective Courts, the Spring and Summer Courts.
* Semi-Divine sons inherited some facet of his power from him, to varying degrees.
* Semi-example: Shirley Jones, who is/was David Cassidy's stepmother, played his mother in
* semi-failed and the second, although successful, was the last moment of the movie) and wasn't even something the humans were aware of. Grace was aware of the neural network and some of its potential and tried to bring it up, but Selfridge just shut her down without bothering to listen.
* Semi-fictional, as the drummer gets fed up of not doing anything and starts pounding away, and the singer joins in screaming the first words that come into his head.
* Semi-intelligent aliens have shown up twice in the fiction- once as a minor incident in the early novel Sword and Dagger with a primate-like species known as the pinkies that may or may not have had tool using ability, and once as a major plot point of Far Country, with a species of intelligent birdlike aliens that had Stone Age technology.
* Semi-inverted, but with the same intent in the Battle of Luthien during
* Semi-Lampshaded films as Luke's younger brother. Obviously, this goes nowhere. ("At least they sent back my Darth Jason prototype action figure.")
* Seminar, a group of four acquaintances and wannabe writers hire a famous writer turned editor to give them a series of lessons on how to be better writers. However, most only see it (or even getting a particular book published) as a career stepping stone, and only one, Martin, feels he's truly doing it for the art. However, this is also a transparent excuse for Martin to feel self-righteous and look down his nose at others.
* Semiosis by the humans who first colonize the planet Pax; they consider religion an "Earthly irrationality" and deliberately avoid teaching their descendants about it.
* Semiosis follows the growth of a human colony on the extrasolar planet Pax over seven generations, starting with its founding.
* Semiosis helps a murder investigation by growing fruit that disinhibit the eater, encouraging them to speak truthfully about whatever's on their mind. Tatiana can resist the urge somewhat because she knows about it, whereas the others are unaware that they're being drugged.
* Semiosis: Pax has two moons, one with a fast retrograde orbit, and plenty of floating vegetation in its lower atmosphere.
* Semiosis: Pax's gravity is 20% higher than Earth's, so the human colonists' descendants grow up to be over a foot shorter and more sturdily built. The Pacifists come to see Earthling proportions as strange and spindly as early as the second generation.
* Semiosis Stevland had formed a symbiosis with the Glassmaker aliens, who then disappeared and abandoned him to starve. This leaves Stevland slow to trust the human colonists who come to the planet; when the Glassmakers are rediscovered, Stevland is initially opposed to opening any contact with them.
* Semiosis Stevland's consciousness is distributed among acres of roots and stems, and he is aware of virtually everything happening in his domain.
* Semiosis Stevland's control over his biological processes allows him to do things like partition off aspects of his consciousness and literally grow a sense of

humour.
* Semiosis Stevland, when it learns human language) use Earth names for Pax's flora and fauna, even though the "cats" and "lions" are more kangaroo-like and the trees might have plastic bark.
* Semiosis: The human colonists on Pax move into the ruins of a town built by disappeared aliens, whom they call Glassmakers. A century later they learn that a small remnant of Glassmakers survive as nomads, crippled by long-term malnutrition and the breakdown of their social structure. The colonists take great pains to bring them into their community and help them recover.
* Semiosis. Their descendants have only their stories about how awful things were before their departure and don't know or particularly care whether humanity survived on Earth.
* Semiosis: The second and third generations of human colonists on the planet Pax have high rates of sterility among the men as their bodies adapt to local conditions. It's not severe enough to threaten the colony, but Higgins has conflicted feelings about being effectively put to stud as a fertile man.
* Semiosis who chooses to live in a mutualistic relationship with human colonists. Late in the book, his narration reveals that most bamboo are brutal warmongers and he made a deliberate choice to break from that mold.
* Semi-Pro: Few things are more emblematic of the '70s than white guys with afros playing ABA basketball.
* Semi-Pro is a former one-hit wonder who used the money from his song "Love Me Sexy" to buy an ABA team.
* Semi-Pro: The trainer for that bear was killed by said bear later that year. And the bear got put down.
* Semi-Pro to this trope, with some of the funniest moments in the movie also being the ones that could just as easily have gotten by in a PG-13 comedy.
* Semi real-life, with another type of vermin rather than a mouse: the late
* Semi-related: series creator Rebecca Sugar did a short piece years prior called
* Semi-related, unpopular example: Pinkamena Diane Pie from the infamous
* Semi-similarly, the end of Vicious Rumors' album "Digital Dictator" contains a very obvious backwards message which reverses to play "Be nice to your mom and dad. Don't abuse. Don't blow your brains out on drugs. Rock your brains out. By the way, you're ruining your needle."
* Semisonic began as an informal side project for Dan Wilson and John Munson of the cult band Trip Shakespeare. Hugely popular in their hometown of Minneapolis, Trip Shakespeare couldn't translate that success to the rest of the country and eventually broke up. Wilson and Munson focused their attention on Semisonic, and had a
* Semi-subversion in that Close's character was up against Bill Fichtner for the job. The twist was that the White House staff found a way to
* Semi-subversion. Though it's unlikely, he acknowledges, to happen any time soon.
* Semi-subverted due to the fact that while it's possible to break out of the ice, the ice has the power to erode life.
* Semitic languages; none of them ever speak with a Scottish or Welsh accent at all.
* Semi-United States so far introduced in the Discworld include Elevensee
* Semi-used with Kellen and Vestakia—the fact that she looks like a Demon may repel others in-universe, but the reader is more likely to see her as a
* Sempai/Kohai: The Japanese equivalent of upperclassman and underclassman.
* sempai of Kazuya's group of friends, is generally called "Sasa-pai," a play on his name and the sempai homorific.
* Semper Ad Meliora, this seems to be a running theme with Lelouch and his followers.
* Semper Fidelis. Motto of serveral military and non-military organizations around the world. Meaning "Always Faithful." Not only that, but military units are often analogized as a family, with the commanding officer filling the role of a traditional father or head of the household, and the senior NCO as the mother. The rest of the unit, of course, is like their numerous children, brothers and sisters

who sometimes bicker amongst each other, but trust in one another like a family.
* Sempiternal produced their first #1 with "Throne", which is easily their signature.
* Sempiternal's fourth single "Can You Feel My Heart" blew up on TikTok, causing the streams of said song to skyrocket. It is now the band's most-streamed song on Spotify, outpacing even "Throne". "Throne" can probably still be considered the band's signature but "Can You Feel My Heart" is easily their second-best-known song.
* Sena also parodies this in non-football situation. During a football (soccer) kick-off match, due to his inability to kick, he instead ran around the ball at high speeds to confuse the goalie... but he got tired, had to catch his breath, and the goal didn't make it in. In another chapter, during a sumo match against Monta, he rushed around the ring, but lost when his foot just barely stepped out of the ring.
* Sena is picked up as a runningback for the Deimon Devil Bats after Hiruma sees Sena fleeing from the
* Sena not only faces off against another real Eyeshield 21, he eventually becomes the real deal himself.
* Sena's Considering this is a manga about football, it's kinda expected.
* Sena's legs were already pushed past their limits (to the point his legs were burning up so much that stream was literally coming out of his legs) at keeping up with Agon and he continued on to play throughout the entire again despite the pain.
* Senate". He also mentions that his opponent was found matriculating in Harvard, habitually indulged in celibacy before marriage, practiced nepotism with his niece in Washington, had a sister who was a thespian in New York, and vacillated on the Senate floor.
* Senate House, the administrative centre of the University of London, was said to have inspired the Ministry of Truth in
* "Senate Murders". Senator Onoconda Farr dies and is found by the inspector to have been poisoned. Bail Organa and Padmé Amidala investigate against the inspector's advice, and at one point they accuse the Kaminoan senator of being responsible because Ono was one of the opponents of a bill to create more clone soldiers. Though she's not the nicest senator and did benefit from the death, she vehemently denies the murder.
* "Senate Spy": After Padmé steals the data disk containing the plans for the Separatists' new droid foundry, Rush Clovis abruptly returns with the drink she asked him to get. After giving him a hug to hide the disk in her hand, Anakin comes in response to the signal she sent him. Padmé gets him to take the data disk by waving it in her hand while saying "I've been waiting all night for this moment", which Clovis interprets as a romantic overture.
* "Senate Spy", "Duchess of Mandalore", "Pursuit Of Peace", "Senate Murders", the Season 4 Obi-Wan undercover-arc, the Season 5 Fugitive Ahsoka-arc, and the Season 6 Fives-arc are
* Sena to a "human degree" from time to time. While never running at "super speed," he's able to run 40 yards in 4.2 seconds (exceptional even for an
* Senator Everett McKinley and recorded a single featuring two covers of the Troggs' "Wild Thing", with the Kennedy impression on one side and the Dirksen impression on the other. With the Bobby version getting lead billing, "Wild Thing" also went top 40.
* Senatorial candidates had their fair share of ridiculous attack ads as well. Elizabeth Dole's "Kay Hagan took godless money—what did she promise in return" ad backfired (in large part because Hagan's background — she was, among other things, a former Sunday school teacher — very clearly refuted the ad's implications, and it ended up making Dole herself look bad) and led to North Carolina becoming the first state to have two female Senators from different political parties, and the first time since the 50s that no Bush or Dole has been in the government.
* Senator John Dean's seminal dubstep/dubhop song, "Can't Live Without Em," a staple of the new genre.

* Senator Kinsey also counts. In his first appearance he tries to get the Stargate Program shut down, under the guise that it's a money pit and exposes the Earth to unnecessary dangers. While he's right, the fact that he's trying to take on a more advanced race with regular weapons and believes God wouldn't let them lose is what cements him as this trope. Later on, he's shown to be working with a
* Senator Mon Mothma and Senator Mina Bonteri are both close friends of Padmé and voiced by
* Senator Robert Kelly; he died in a completely unrelated accident, and Mystique only stole his identity after the fact).
* Senator Steven Armstrong. He takes off the jacket before the first part of the fight, and midway through, he takes off the shirt.
* Senator Tammy Duckworth (D-IL) brought her newborn daughter, Maile, to the Senate floor to cast a vote.
* Sena toughens up defensively, enough to shake off linebackers trying to tackle him.
* Sena was very fast before the series began to avoid getting beat up by bigger kids. Hiruma recruits him to become the runningback for the football team, promising that if he was fast enough, he wouldn't get tackled. Later in the series,
* Senbei himself becomes one after he creates a time-stopping device, causing mischief all over the village.
* Senbei is often her primary target, but she would prank some others as well.
* Senbei Norimaki often changes from a fat, short, ugly man into a tall, handsome, muscular one... and then back in a matter of seconds. "He's like
* Senbei (short, fat, and schlubby) does manage to win over Midori (the beautiful
* Sendai after he defeats her in combat. She isn't very happy about it, but goes through with it anyway.
* Sendai Girl's Pro Wrestling's 2015 celebration show for the 20 year career of Meiko Satomura, featured a glaring mismatch pitting Sakura Hirota against
* Send a new soldier away to find a container of coolant for a machine that is air cooled. (See the '71 Beetle example below).
* Sendhil Ramamurthy during some episode commentaries, to the point where it's pretty obvious he only WISHES he had control over the scripts. In fact, Mohinder's storyline would probably get a lot more entertaining if he did.
* Sendhil Ramamurthy in an episode commentary when they talk about how some characters tend to have "standard lines" that they say a lot. When asked what his own character's standard line is, he replies (paraphrased), "Who killed my father? My father's dead! Someone murdered my father! And variations thereof."
* send him to hunt a dragon. On his scouting mission to the continent of Assail, he fought his way through hordes of its inhabitants just to be able to leave it again.
* Send his Griffin to steal Excalibur from Camelot (until the Griffin lost it due to the intervention of Ayden), and bond it to his hand.
* Sending a misbehaving child to bed without supper was a popular disciplinary action for many parents. Nowadays, denying a child
* Sending an army of disposable, soulless robots to rule over Boston with an iron fist? Smart. Sending dopplegangers to murder and replace parts of families just to get a few measly parts and intel? PR went down the drain when they did enough of this to turn the Commonwealth into pure trigger-happy paranoia.
* sending an infant into the cruel wilderness of Krypton, getting it killed, harvesting its DNA, cloning it so that it kept the memory of how it was killed.)
* sending Doombots to test and assess the Avengers, notes, just because the heroes hold this attitude does not mean it is a good thing. For one thing, a lot of the villains hold it too.
* Sending in more experienced/skilled/powerful teams would have drawn too much attention. Indeed, the better-suited teams may be deliberately deployed elsewhere to distract from them.
* Sending Stuff to Save the Show: Viewers are unpleased that a series has been cancelled and proceed to fight back at the network's decision.
* Sending them off to supply for a spool of "Bore Wire". There's no such thing as bore wire.

* sending Uriah out to be killed", David's righteous outrage at the cruelty of this horrible guy Nathan's just told him about is an example of moral myopia.
* "Send in Stewie, Please" garnered similar reactions. Critics loved the episode, and Gary Janetti was nominated for a Writers Guild of America Award for the episode's script (though he didn't win). Among the fanbase, the episode is highly polarizing.
* Send in the Clones. One of the R&D devices the Troubleshooters must test is a belt device that generates a force field around the wearer. One of its limitations is that it has to be plugged in to work, which will severely limit the user's mobility.
* Send in the Clones: The original guy was so great that we made many copies of him!
* Send in the Search Team: Something has gone wrong at an unknown location, and a seach party is gathered to find out what happened.
* send Obliviators to the people being told). Harry himself doesn't have a Secret Keeper in this trope's sense, which is a key reason why he's so miserable every summer with the Dursleys (who know what he is, but won't let him speak of it). Hermione's parents, being supportive of her gifts and hence exceptions to the "no parents" rule, are her summertime Secret Keepers, which spares her from feeling as isolated while she's away from school.
* Sendokai Champions), with the winner team having their dimension spared from the conquest.
* Sends a broadcast that announces his return to the galaxy which serves no real purpose other than removing the element of surprise.
* sends his son to work with Tekfur Ares to attack the Kayis, then decides to get personally involved after hearing about said son’s death, showing no compunction or sympathy for Ertugrul the whole way through.
* sends mere mortals to the moon), Chuvalo complained to the referee after the fight was stopped.
* sends Peter's ex-girlfriend Gretchen an old love letter from Peter this ignites her romantic passion towards Peter and when she learns of Lois she attempts to shoot her dead.
* sends Temari several pornographic novelty hand fans rigged with a glitter bomb after the Sand-Sound Invasion, including a dozen roses and a Valentine's special after the clerk suggests it. It's made even worse by the fact Sakura's the one who broke Temari's original fan in the first place.
* sends up the image of her recognize Swift's tendency for crash-and-burn romance ("Style," "Wildest Dreams") or blame herself for relationship foul-ups ("I Wish You Would").
* send them 5 seconds into the future. You cannot detect something that is not here yet. It even works with whole planets, as done with earth itself.
* send waves of cannon fodder at the robots until their kill limit maxed out.
* Send (which is almost all of them) do so during lovemaking. It's referenced in a way that implies they consider that kind of mind-to-mind intimacy during sex to be a given.
* send you home empty-handed), they would tolerate the current contestant getting hints of varying subtlety from the celebrities still waiting their turn. This ensured that the contestant's chosen charity would at least get something, and made for some funny moments.
* Senet a game called "The Royal Game of Ur", and while it is very old, Senet still predates it by about 900 years or so.
* Senet: The oldest known board game, dating as far back as predynastic Egypt. The rules aren't known with any certainty, but
* Sengoku and company must deal with a hostage situation in one of these in the first episode of
* Sengoku Basara 3/Samurai Heroes, he hires her again, saying there's still work to be done.
* Sengoku Basara 4 and decides to defy Heaven's Mandate by abdicating, leaving Japan without a ruler and everything up for grabs. What results is the chaos of the

Sengoku Period.
* Sengoku Basara 4, this leads to breaking out a moment of button mashing later (assuming you don't just swat them away before they can even land on you).
* Sengoku Basara acts like this toward his young master Yukimura, being his friend and advisor and protecting him in dangerous situations. He also acts as emotional support and makes sure he toes the line.
* Sengoku Basara, after losing her mind. It's never made entirely clear whether she's dead or not, but she already looks the part, with white skin and long black hair. The way she totters around, swaying eerily, singing and moaning in that ghastly way and crushing victims with her demonic powers while giggling childishly is pure horror.
* Sengoku Basara and Mitsunari's slender legs, especially during fight scenes.
* Sengoku Basara) and one where characters crash a battle between Kenshin and Shingen. The third has certain campaigns ending with the characters intruding in on the Battle of Sekigahara and wiping out both Ieyasu and Mitsunari's army.
* Sengoku Basara and starts beating everyone to a pulp, it's understandable that Ieyasu thought he was an enemy. As it turns out, he just wanted to deliver a message.
* Sengoku Basara, can fulfil most of the above roles, but is closest to Type B. She commonly carries around magnums, a shotgun, a tommy gun and a heat-seeking rocket launcher (detonation charges or air support optional) and uses a combination of them to blow her enemies to bits.
* Sengoku Basara constantly makes jokes about the ancient Hojo Ujimasa's bad back.
* Sengoku Basara doesn't respond, but it's clear by the look in his eyes that his actions were done out of a deep love and sense of duty towards Masamune. Kojuro then borrows Masamune's swords, promising to rescue the kidnapped men himself.
* Sengoku Basara embedded in it, and it's actually called "War Fan Axe" (Gunpaiono) in the original Japanese series.
* Sengoku Basara falls for Fuuma, a legendary ninja who never speaks and disappears every time she tries to confess. She doesn't even know his name, yet she keeps running after him despite him showing no interest whatsoever and being way out of her reach.
* Sengoku Basara for every "crime" he encounters, such as, for instance, telling him "no".
* Sengoku Basara games and their anime adaptation. He's not directly referred to as Bishamonten in these, but he is known as "the War God of Echigo."
* Sengoku Basara has a giant pile of skulls in his throne room. His throne, which has a skull motif, is sitting right on top of it. He even uses them as drinking cups.
* Sengoku Basara has a similar "static effect" sometimes when she speaks, in a reference to this phenomenon.
* Sengoku Basara has Honda Tadakatsu who uses a launch sequence reminiscent to that of Gundam despite being in the Sengoku era and just wearing very heavy armor with jet packs and treads.
* Sengoku Basara has Mori Motonari, who never seems to get tired of telling people how futile their attempts to either foil or understand his plans are, or how worthless and idiotic they are compared to him. And, while his demeanour is usually cold, he can become rather smug when proved right (as he always is).
* Sengoku Basara her cloth ribbons through this kind of method, as she is a sorceress.
* Sengoku Basara. Hideyoshi is the type to surround three armies at war, and demand ALL of their surrenders at once in a loud voice and with an even louder fist. He then goes ahead and obliges some hotblooded heroes. He also parts the seas. Mitsunari really likes shouting about what he is going to do to his enemies, specifically those who side with Ieyasu. Mitsunari does not say "Ieyasu!" He says, "IEEEYAAAAAAAAAAAAAAAAAASU!!!!!!!!"
* Sengoku Basara, Hisahide kidnaps some Date men to force Masamune to give up his six swords. Despite being badly injured earlier and against Kojiro's insistence, Masamune is determined to rescue his men, on the grounds that the Date army can't

afford to lose anyone.
* Sengoku Basara. However, once you get past this he's actually a fairly honest, charming, and good-hearted guy who values things like friendship and keeping promises, and overall one of the most honourable characters around.
* Sengoku Basara. If you flee up to a certain point after capturing a certain base, he will bust another wall to get you while avoiding stepping on his boss' image made appear by capturing the aforementioned base.
* Sengoku Basara In all honesty, though, most notable women from that period in Japan weren't self-made, being the wives or daughters of influential men.
* Sengoku Basara, including enemy mooks with a named squad leader, and won't even damage enemy bosses if they show up to the boss fight.
* Sengoku Basara in the fourth game, telling him that he must rid himself of his feelings for Oichi and end her if he ever wishes to become an equal to him and Nobunaga.
* Sengoku Basara involves screaming loud enough to set his foot on fire and then kicking his opponent in the face with it.
* Sengoku Basara is a towering guy comparable to a gorilla. Obviously, he is one of the more ruthless leaders of the game.
* Sengoku Basara is a young miko who had a sheltered upbringing due to being an oracle. Because of this, she is quite naive and unable to realize when someone is trying to manipulate her.
* Sengoku Basara is so strong, a strong enough swing from his big freaking ax has enough force to summon a giant, mook-destroying tornado on the battlefield.
* Sengoku Basara It is every bit as awesome to see (and dangerous to fight) as it sounds.
* Sengoku Basara: Keiji Maeda's hair, even when tied in a ponytail, reaches his lower back. Oichi's also reaches her hips.
* Sengoku Basara, Keiji proclaims his undying love for Magoichi immediately after she delivers a flying kick to his face. Magoichi ignores this until he starts following her everywhere.
* Sengoku Basara maiming soldiers with oversized cutlery. Each game has his set of joke items, making this option possible.
* Sengoku Basara, many people went on to play the games simply so they could hear more.
* Sengoku Basara, Matsunaga Hisahide has the unique ability to walk rather than run. In the story mode of the fourth game, both he and Nobunaga menacingly stroll to battles rather than riding horses or even running.
* Sengoku Basara, Matsunaga uses purple poison gas in order to take down Kojuro. In contrast the gas Sasuke uses as an antidote is green.
* Sengoku Basara of the third game. Rather than having a bodyguard, the player can bring in another playable character who they can swap with.
* Sengoku Basara: one of his special attacks has him pulling out a hymnal and perform a little singing so off-tune and horrible it severely damages enemies caught in the attack, as well as smashing vehicles and damageable items.
* Sengoku Basara: One of Motonari Mori's skills is to create a circular green barrier. Enemies would get knocked back if they run (or get knocked toward) said barrier, dealing some damage; one common tactic of using it is to place another barrier at a distance in front of the first one, knock some enemies to one barrier and watch as the barriers deflect the enemies towards each other while dealing constant damage.
* Sengoku Basara". Otherwise, Kojuro comes up with most of the Date army's strategies, and Motonari is more known for his genius than for his fighting skills.
* Sengoku Basara: Played for laughs when Shingen punches Yukimura, who flies through a screen door, across a courtyard, smashes through a stone lantern and into a stone wall, which crumbles a bit from the impact. Sasuke comments mildly that this would kill a normal man. Yukimura, however, comes running right back into Shingen's fist so he can do it all over again, although he's in a slightly rotated position when he hits the wall the second time.
* Sengoku Basara, since Nobunaga is always often the villain. Strangely, even

Nobunaga is also villainous here.
* Sengoku Basara, summoning the Oda Mon as beacons with pillars of lights coming from the sky.
* Sengoku Basara that just focuses on his job and has no need for words. The creators lampshade this, using a gust of wind and the sound of a shuriken as his voice sample, and having him communicate exclusively in ellipses.
* Sengoku Basara the instant you touch him. Since it's impossible to defend and this will down your character for 10 seconds or more, it's best to just avoid him or use a ranged attack if you have one.
* Sengoku Basara (though none of the women are less badass as a result).
* Sengoku Basara (though only because Yukimura wasn't quite paying attention).
* Sengoku Basara to an incredibly muscular and rather attractive adult in the third game. Particularly unusual in that almost none of the other characters mention this transformation.
* Sengoku Basara to any opponent. Many of the characters in the game revere him for his skills and seek lessons from him, for good reason
* Sengoku Basara Toshiie Maeda and his wife Matsu. When one rescues the other from Yukimura at one point, they get so romantic he becomes embarrassed and wonders if he should leave them alone and come back later.
* Sengoku Basara version is no slouch, fighting with 6 swords at once when he gets serious.
* Sengoku Basara -voiced villain. All historically accurate, of course.
* Sengoku Basara wears a brown duster that sweeps to the ground. It's utterly anachronistic, but hey, what's history when compared to badassery, right? And he's so badass that they made him playable in the expansion pack.
* Sengoku Basara wears one, though it doesn't obscure his face. Considering his look and moveset is based on boxing, it could be due to this.
* Sengoku Basara whenever Tsuruhime tries to confess to Kotaro. Or just around Tsuruhime in general.
* Sengoku Basara, which also causes the colour of everything around him to turn negative.
* Sengoku Basara which defies all the laws of physics by staying on her.
* Sengoku Basara who could unfailingly kick his ass every single time if sufficiently motivated.
* Sengoku Basara who dual-wields handcannons based on the foreign missionaries of Japan and whose goal seems to be the conversion of all of Japan (or whatever indeterminate country Devil Kings is supposedly in).
* Sengoku Basara who lives in the forest due to his dislike of other samurai. His powers include dropping huge tree limbs on his opponent.
* Sengoku Basara, who regards all his men (and indeed his opponents' men) as disposable...and for that matter uses the term "sacrificial pawn" far more than any decent commander should.
* Sengoku Basara) you'll hear him shouting "WHYYY?" at the sky. Rendered in Japanese as "NAZE JAAAA?"
* Sengoku Collection go home. However, there are several, like Ieyasu, who prefer this world and willingly hand their treasures over.
* Sengoku Collection, the documentary filmmaker Morse does this after interviewing Bokuden and others, turning public opinion against the various samurai girls.
* Sengoku Collection, Tsunehisa Amago wears a blue shirt as part of her uniform to day care like all the other children, only hers features detached sleeves.
* Sengoku Jidai. Their leader, Ii Naomasa, received a bullet wound at Sekigahara, possibly due to the conspicuousness of his red armor making him an easier target.
* Sengoku Jidai who commanded the Eastern Army. When the battle was joined, Kikkawa refused to participate with his forces. Not only that but by virtue of being the vanguard of forces stationed on Mount Taiguu, Kikkawa blocked the road of the forces stationed there and prevented Mori and others, totaling 33,000 men (over 1/3 of the 82,000-man army) from participating and attacking the rear of the Eastern Army. This resulted in the defeat of the Western Army. And Tokugawa Ieyasu stripped the Mori of two-thirds of their lands, anyway.

* Sengoku Jieitai 1549) features failed experiment which leads to time travel of a wounded samurai to our times and a group of soldiers to the year 1549. When the second group of soldiers goes to 1549 in a search and rescue mission they discover, among other things, a refinery.
* Sengoku Komachi Kurou Tan, Shizuko faces some early problems as the men in the village she is appointed to lead initially object to the idea of following a girl's orders, but quickly change their tune when her methods bear fruit. Some of Nobunaga's vassals also express their displeasure with her (whether it's making use of her ideas or bringing her to the battlefield) until Nobunaga gets angry with them over the matter.
* Sengoku Komachi Kurou Tan: Tadakatsu Honda first falls in love with the heroine, Shizuko, after she gives him some new onigiri samples while he's being detained for trespassing in her territory.
* Sengoku literally pulls this after hearing that the Government wants to
* Sengoku Night Blood Mitsuhide was the one who betrayed him, leading to his death.
* Sengoku Period reflect this by depicting Kenshin as apparently male but beautiful and androgynous.
* Sengoku Period's forces of 2500 men, against Imagawa Yoshimoto's forces of 25000 to 40000 men. The Oda forces took advantage of the rainstorm to launch an ambush straight to Yoshimoto's head, killing him and sending his other men to chaos and not only did the Oda scored their greatest victory, but the Imagawa fell to ruin, and the name 'Oda Nobunaga' became known as one of the most fearsome warlords in the era, instead of just 'The Fool of Owari'.
* Sengoku Period. With just his trusted men, Sanada broke through the Tokugawa defense line, taking as many men as he could until he nearly was able to lop off Ieyasu's head, but at that point, fatigue caught up to him and he succumbed to his injuries, or some of Tokugawa's men struck back before he could take another step. Either way, Yukimura died, but not after he made one hell of a Last Stand that Tokugawa praised his burning warrior spirit, dubbing him 'Japan's #1 Soldier'.
* Sengoku Rance, as well as the other games in the series, love this trope. As the relationship goes up, characters get stronger, to put it in a simple way.
* Sengoku Rance is he jokes that he's going to take Kou's virginity... and Nobunga is suddenly fine with it.
* Sengoku Rance, Rance calls his... the "Hyper Weapon". He sings about it in an occasion.
* Sengoku Rance with detailed New Game+ options. Completing each of Sengoku Rance's main endings and accomplishing several bonus objectives unlocks a permanent bonus point pool for a save file. These bonus points can be spent for powerful items, special generals, and assorted goodies on future playthroughs.
* Sengoku retires after the stress of the job of Fleet Admiral gets to him, especially after the Five Elder Stars cover up the escape of extremely dangerous criminals. He recommends Aokiji for the job, but other officials elect Akainu
* Sengoku that the series came into its own with multiple unique playable characters, refined combat, and an improved stylized art style.
* Sengoku (their parents went to high school together) and have zero sexual tension. It's even suggested that they were bathing together as late as their first year of high school.
* Sengoku Youko Jinun went for a monster-hunting assignment. His report is instead about how cute the girl he met in the village is, and the part with the monster is simply "I defeated it". His colleagues are dumbfounded since he's usually a serious, no-nonsense person.
* Sengoku Youko, Raidou marries an ex-palace attendant and start a family with her.
* Senilo. ("How did you get free?!" "I haven't the foggiest. Where are we?")
* Senior British Correspondent John Oliver became quite upset with grassroots movements comparing their struggle against the government to that of the Colonial Revolutionaries against the British Empire. After all, the British had been real bastards at the time; by comparison, the modern American government were a bunch of pansies.
* Senior Council's magical attacks. The water purified and distilled the magic,

nullifying the attacks. He would also simply be untouched as the magic that wasn't destroyed missed him or blipped out when it was a foot from him and then started up again behind him.
* Senior Creep: Elderly person with a detestable appearance and/or personality.
* Senior editors Charlie Kadau and Joe Raiola frequently write gags together.
* Senior Inspector Chin Hon-to has to calm his subordinates in the SDU when To Tin-yu and his girlfriend, Yiu Mei-ling, killed Yau Chun Hin in "King of Thieves Returns" for ruining the latter's face. Inspector Chin reminds his men that if they
* Seniority—The group has known this person for a long time. They might have even genuinely liked him or her at one point, but years of maturity and development (either by the disliked "friend" or by the others) resulted in this member no longer fitting in. However, the group keeps them around anyway due to either obligation, loyalty or familiarity.
* Senior Mage Specialist (senior enlisted/warrant officer; usually people who are considered OCS material but cannot be released from their unit to undertake officer training, or have refused a commission)
* Senior Magic Knight: This rank is further divided into 5 classes, with the 5th class being the lowest.
* Senior Master Sergeant, making him the senior non-commissioned officer at Cheyenne Mountain. His shoulder stripes change each time to match his new rank. Despite his rank, O'Neill usually referred to him by his first name, and Mitchell called him "Sarge". Either is inappropriate, but accurate of the treatment of non-coms by officers.
* Senior members of the Adeptus Mechanicus (who can, in terms of humanity, can only generously be described as cyborgs) think they are. Though,
* Senior Partners and arguably orchestrate every major event in the entire series that isn't covered by the Powers, we never once see them.
* Seniors and Gays", the eponymous group abbreviates themselves to "SSCCaTaG". Marge forms her own protest group, the even longer PPASSCCaTaG: "Proud Parents Against Singles, Seniors, Childless Couples, and Teens, and Gays".
* Senior Waystar executive Karl Mueller is past middle age and is said to frequent brothels whenever he goes on business trips. He protests that his wife understands that he's a "libertine."
* Senior Year Struggles: A senior has problems related to growing up and ending their schooling years.
* Senior Year Struggles: Facing the future in one's last year of school.
* Senior Year Struggles: Stress and angst about facing your future as a senior student.
* Senketsu is also an example as it starts with little idea of its own capabilities other than its need to be worn by Ryuko and all of its subsequent power upgrades come as
* Senketsu learns that he's an alien, which he doesn't really mind. However, what triggers the
* Senketsu separates her from Shinra-Koketsu... It gets answered in #25.
* Senki Zesshou Symphogear 13-episode seasons mostly on the back on music sales.
* Senki Zesshou Symphogear, after which she declares that her blades are now wings that take flight towards their dreams.
* Senki Zesshou Symphogear and it can alter its size. The cape is also a manifestation of her inner weakness and it deflects attacks.
* Senki Zesshou Symphogear are holding her back from fighting properly. Her solution? Stomping her feet so hard that they break.
* Senki Zesshou Symphogear beats all six main characters by himself during a training session. That includes catching a barrage of missiles from Chris's Megadeth Party with his bare hands and then he throws them back at her all at once. (The strange part is that she fires 24 missiles at him, he catches eight and then throws twelve back at her and they ended up being 17.)
* Senki Zesshou Symphogear. Chris is introduced as a mostly clothed villain with a visor (she still has underboob showing, though.) In the episode where she begins her heel/face turn, she switches it out for a cleavage, shoulder, and thigh

exposing costume.
* Senki Zesshou Symphogear, Chris Yukine switches from crossbows to double revolvers for Ichaival's base attacks.
* Senki Zesshou Symphogear gets her own Symphogear which is purple. She has the largest arsenal and she is way stronger than other Symphogear users.
* Senki Zesshou Symphogear G extend the latter pair and it introduces Kirika and Shirabe.
* Senki Zesshou Symphogear has a waist-length side ponytail. Maria Cadenzavna Eve's hair on the other hand probably reaches her hips. The hair of Chris Yukine reaches her thighs, and Saint-Germain's hair is probably as long as Maria's but even thicker.
* Senki Zesshou Symphogear have a habit of engaging in this with each other.
* Senki Zesshou Symphogear (Hibiki's voice actress), the feeling is mutual.
* Senki Zesshou Symphogear in only the first season, the second season deals almost entirely with the fallout of her scheme and the leftovers from her research, and the next three seasons deal with the Pavarian Illuminati, who have had contact of their own with her. More importantly, she created the Symphogears that give the heroes their powers; without her, none of the villains would be effectively opposed at all.
* Senki Zesshou Symphogear. Normally, young people don't sing enka when they casually hang out with friends...
* Senki Zesshou Symphogear on top of not wanting to drive herself (more) insane.
* Senki Zesshou Symphogear, showing that Hibiki views Miku in a romantic manner.
* Senki Zesshou Symphogear: The Noble Red are a trio of villains whose bodies and powers are references to Frankenstein's monster, werewolves and vampires.
* Senki Zesshou Symphogear, the Symphogears are falling back to Earth after being stranded on the Moon. Hibiki decides the team needs to use the Ex-Drive to survive, but Chris warns they don't have the energy to pull it off. Thankfully, the team is able to pull it off and arrive in time for the final fight.
* Senki Zesshou Symphogear. The visual style and typeface vary by attacker.
* Senki Zesshou Symphogear this trope entirely. The titular Symphogears are entirely recognizable, and their identities are mostly protected by a combination of mandatory evacuation of civilians and the NDAs handed out to witnesses after every battle.
* Senki Zesshou Symphogear, Tsubasa jumping off of motorcycles into battle is enough of a running joke that she "leaves the image of buying an endless supply of bikes to jump off of", in the OVA.
* Senki Zesshou Symphogear. Using this skill allows the user to unleash the full power of their Symphogear, but at the cost of intense backlash damage onto their own body, which can even be fatal.
* Senki Zesshou Symphogear: WXD Unlimited, this trope is in full effect.
* Senku's hair sticks straight up (aside from the bangs) and appears to be roughly the same size as the entire rest of his head. It's also off-white, except for the green tips (which some fans have joked makes him look like a leek), unusual in a series where most characters have natural hair colors.
* Sen, Momo and Ai Channel. The same clip is then shown at the end, but with the spoilers uncensored.
* Senna energetically drags him onto a flight to Paris and seduces him — but she has no respect at all for his brand of savviness.
* Senna has her astrally-projected form take the form of a military-looking man when communicating with her followers, wisely suspecting they would find that more authoritative than a pretty sixteen-year-old girl. When she actually brings them to Everworld she eventually creates the illusion of herself as a pseudo-Valkyrie for the same reason.
* Senna of the first movie is horrified when she learns herself to be nothing more than the merged memories of the Blanks. The trope is zigzagged as she refuses to accept that she never actually existed and her dying request is that Ichigo take her to her grave, which is proof of her existence. Even though the grave does not exist, Ichigo chooses to tell her it does so she can die happy having never

accepted the truth about herself.
* Senna, trapped in the lantern of the spectral torturer Thresh, ended up
* Sennentuntschi" abuse her. And while the doll itself isn't alive at that time, their treatment of their "mountain wife" speaks volumes of their attitudes towards women if they think they can get away with it.
* Sennentuntschi is occasionally described as being put together in a way that resembles a scarecrow's construction. She's a doll who takes vengeance on the men that abused her.
* Sennentuntschi" is that one of the perpetrators gets flayed alive. Then his skin is spread out over the roof of the mountain cabin.
* Sennentuntschi, the herdsmen that may leave are instructed not to look back. There doesn't seem to be a reason for this other than to buy the doll time. Equally so, there aren't any consequences to the herdsmen when they do look back other than that they might wish they hadn't.
* Sennentuntschi" wanted a mountain wife, so they made themselves one of straw and cloth and treated it as they'd apparently treat a woman if she were alone up in the mountains with them. Then the doll comes to life and plays her assigned part. What the herdsmen failed to take into account is that they might be held responsible for their actions.
* Sennentuntschi" what with the un-Christian-like behavior of the herdsmen, but some versions call special attention to it. In "Die Unze", a priest needs to get involved to banish the doll. In "Die Schintemunt-Alm", it's the fact that the men don't respect food as God's gift by play-feeding a doll that causes it to come to life. In "Die Puppe auf Klariden", the leader likens his creation of the doll to God's creation of humans and declares it not that big a deal.
* Sennett Forell, one of the richest of the Association of Independent Traders, is known to be a distant relative of Hober Mallow, from "
* Senor Cardgage also seems to be prone to this, as well as using the wrong pronouns.
* Senor Cardgage has been a mortgage consultant, a used car salesman, an "Intregway" seller, author of "The Homeless Romantic", a movie theater usher, and (probably creepiest of all) a daycare owner.
* Senorial Day cuts between two different Parody Commercials, both focusing on the "holiday sales events" of car (?) dealerships.
* "Senorial Day" had Senor Cardgage advertising the "Senorial Day Tent Event Suprasale". Meanwhile, Bubs had his own super-cheesy ad for "Bubs-otathon", which he promoted with a series of horrible puns, such as dressing like John McEnroe and calling his competition a "total
* "Senor Mortgage" had Senor Cardgage running a financial services company, offering to help viewers "get a leg up on the pile" with the aid of "one of our handsome-talking experts".
* Senor Senior, Sr., having taken up supervillainy as a hobby fit for an
* Senpai Club has Kurokawa blackmailing Teacher-sensei into going on a Christmas date with her. It ends with Teacher-sensei running away after punching Kurokawa due to her kissing her.
* Senpai Club is an American who has a strong accent, wears star spangled attire, eats McDonald's-esque food for lunch, and is incredibly loud.
* Senpai Club: "My name is Tsumiki Domen. I'm 15-years-old. My birthday is February 14! Beef bowls are my favorite food, and my blood type is A!" All in the first few seconds of the series.
* Senpai Club. She literally always has her panties showing and her breasts are prone to jiggling.
* Senpai Club's opening song nonsensically boasts, "LIGHT CHOCOLATE LOVE LIFE."
* Senpai Club. The Senpais in the club are Hero-senpai, Bowl Cut-senpai, Gang Leader-senpai, Rock n Roll-senpai, and Lady-senpai. Lady-senpai is, as her name suggests, a girl and not a boy.
* Senpai himself might become one of these if he finds out Yandere-chan killed his childhood friend and/or younger sister.
* Senpai is customizable, so it's up to the player whether he does or not.

Yandere-chan, who normally plays this straight, with her black hair and eyes, can avert this as well if the player changes her hairstyle.
* Senran Kagura 2.0 by bashing the game during its localization announcement. And what do the people that actually played it say? It's a pretty damn good brawler with a surprisingly engaging story.
* Senran Kagura accent in English). This tends to make her peers write her off as a dumbass, or at least not as attentive as a Shinobi should be. In reality, Shiki is perhaps the most well-adjusted and people-smart student featured, and tends to be extremely quick on the uptake.
* Senran Kagura, but this hasn't hurt the franchise's rising popularity in the slightest, with many fanservice-centric spinoffs. The series being actually good if you get past the aggressive fanservice doesn't hurt, either.
* Senran Kagura, even if they're done by swords, knives, hammers, guns, or even explosives.
* Senran Kagura, followed by Murasaki's Root of Calamity activating, which is an excellent way to get yourself killed.
* Senran Kagura for her, getting beat up by the culprit and realising that the culprit is going after her best friend Miyabi next.
* Senran Kagura games are about four schools (well, three schools and one band of runaway ninja) competing to out-ninja the others, so there is a lot of this trope going around.
* Senran Kagura has Katsuragi try and pull this with the nearly-all-female cast. Ikaruga's goal is to try and stop her.
* Senran Kagura has Miyabi and Imu, but 21 and having to repeat their senior year. An odd example, because they had already graduated from a Shinobi school, but after an incident left Miyabi catatonic for years and Imu taking leave of her duties to care for her, the two are so rusty they need to retrain to re-earn their rank.
* Senran Kagura he is, having well-endowed young ladies cooking gorgeous food is right up his alley.
* Senran Kagura). Katsuragi sees no reason to believe that she isn't being serious and quickly backs off.
* Senran Kagura manga shows injuries for comedic effect, with no lasting injuries aside from some temporary bandages.
* Senran Kagura off her game, Miyabi takes a Katsuragi-related boot to the head, resulting in this gem:
* Senran Kagura OVA where 25 minutes in, all of the female characters power up to "Super Frantic Mode" and the energy shreds their clothing but they don't seem too fussed about it. They then attack a faceless mob shortly before also having to attack a naked Ryouna because she drank an enlarging potion she thought was a stamina drink. Also, Ryouna happens to be masochistic.
* Senran Kagura permits bladed weapons and brutal punches as melee attacks in an explicitly bloodless water-gun tournament, the reflex to use weapons at close range is too powerful to be outlawed.
* Senran Kagura students almost have an advantage in climbing the ranks, and in their story mode it's shown their squadmates just see it as something they have to put up with.
* Senran Kagura-style spin-off of the sidescrolling beat em' up main series. It sold over twice as much as the first game in the first week and almost twice as much as the second.
* Senran Kagura: The animosity between the so-called "good" and "evil" shinobi is more of a gray vs gray conflict, as both sides face a moral dilemma that arises when they realize that the other side isn't much different from them and that they could be friends if not for this conflict. Both good and evil shinobi are essentially mercenaries, the only difference being that the "good" ones side with the country while the "evil" ones take orders from pretty much anyone. There's also the monstrous Yoma, who are born from the blood, rage, and misery that arises in the two sides' battles; both sides aim to destroy the Yoma when they show up.
* Senran Kagura, the Gessen girls' themes are arrangements of classical music:
* Senran Kagura. This locks her out of the path towards becoming a good shinobi due

to the fact that committing a crime before admission to a shinobi school is an automatic disqualification. Her parents abandoned her because of that.
* Senran Kagura, when Miyabi and Homura are discussing what it means to be evil to them, Miyabi's answer boils down to being evil so that good has something to strive being stronger than, so that when true evil emerges, they are strong enough to face it.
* Senran Kagura), who call themselves the "I ❤ Miyabi Militia" and is the circle of fangirls that Miyabi has to constantly deal with.
* Senran Kagura, who uses a Kusari-gama... very poorly. Most of his attacks involve him falling over, getting tied up by the chains and accidentally hitting himself.
* Senran Kagura writes online under the alias of Futsure, which is her name in English (Future), pronounced in Japanese.
* Senran Kagura, you have to defeat the boss with all five of your other characters in succession, without losing.
* Senran Kagura. You would think that with all of her flipping around, her nipples would pop out any second, or at least she'd suffer an areola slip, but somehow her top always stays in place.
* Senritsu's original design was this, though once she got a speaking role she got a facelift to
* Senryu Girl but not limited to appreciating nature). She is joined by Kino, who sketches her own dialog and reaction faces.
* Senryu Girl: Non-verbal Nanako will do this to get her point across when she needs to go.
* Sensacional Carlitos has a pretty short beard but makes up for it by shaving
* Sensacional de Luchas will make the wrestlers into superheroes outside of the ring.
* Sensaciones Sonicas (Known as Suite Sync de Mexico until the mid 00's. Mexico City)
* sensationalism and exploitation, Oates said that the story was never meant to be taken as anything but fiction, and that she writes however she's inspired to, news being an important source of ideas for her.
* Sensationalist headlines claiming we are in danger from "poop bacteria" found in beards or Starbucks coffee. Said bacteria are fecal coliforms which really can be found, well, just about anywhere...
* Sensational She-Hulk and strips naked in front of all of them, defiantly putting her hands on her hips. All the agents are shown to enjoy the show, until "Dum Dum" Dugan comes in and is furious at their perverted behavior.
* Sensational She-Hulk being used to provide a new mode of transportation for Chondu the Mystic's head. It turned out to be a cloned body, though. They couldn't find a saw that was able to cut She-Hulk's hair, let alone through her neck.
* Sensational She-Hulk: Captain Rectitude's costume contains circuitry that allows him to fire purple energy beams from the heart-shaped emblem on his chest.
* Sensational She-Hulk: The subplot of issue #10 revolves around Jen prosecuting a police officer who stole money from drug dealers and giving it to victims of crime. One reporter points out that some people see the officer as a hero.
* Sensational She-Hulk visits the set of a movie being made about her. Several people mistake her for an aspiring actress or stunt double, and criticize her "costume" and "make up".
* Sensational Sherri could challenge for the belt, more than a few seem to have taken the WWF's example.
* Sensation Comics #6, Baroness Paula von Gunther tricks a prison guard into leaning towards her to light her cigarette. As he does so, she grabs his pistol from his holster with her manacled hands and shoots him.
* Sensation Comics #94 Steve Trevor is carrying Wonder Woman in his arms in a bridal carry across a river, though in practice Diana carries Steve far more often than he carries her.
* Sensation Comics and ends up mistaken for the real thing when she's spotted helping a drugged Steve escape.
* Sensation Comics and Marcia, one of the Holliday Girls, by strapping them to a

table under a slowly lowering swinging blade. Wonder Woman quickly escapes and rescues Marcia.
* Sensation Comics) are often referred to as the "Three Pretty Girls," and two of them are so clueless their grandmother left their inheritance to their sister figuring it would do them more good in her hands.
* Sensation Comics but ending up in a time and place so thematically appropriate was rare.
* Sensation Comics could be brought back to themselves by having a wrist wrapped in her lasso or through her own very mild telepathic abilities.
* Sensation Comics: Diana leaps to save a baby that fell out an upper story window, without changing out of her Diana Prince outfit which causes her some concern that her secret identity may be ruined.
* Sensation Comics: Di will frequently break down doors the criminals are hiding behind. On at least one occasion the door was a vault door, which she found punny and easy to twist out of its frame.
* Sensation Comics dream and the parents never realized it wasn't real it helps things anyway.
* Sensation Comics: Dr. Pat has to perform an emergency tracheotomy on a collapsed young mine worker who fell down a pit in the mine, which is where she got stuck starting his treatment.
* Sensation Comics: Dr. Pat very consciously placed her career above any romantic frivolities after leaving her fiance who wanted her to quit and become a housewife upon marrying him. Her happiness with her work and steadfast refusal to get entangled in romance comes up fairly often:
* Sensation Comics: Dr. Stanton glowers at everyone constantly when separated from Mona Blue, and when he's together with her he still doesn't seem to know how to smile, though he doesn't glower at her and can sort of stop glowering at patients when she's around.
* Sensation Comics, Etta Candy, Bobby Strong and Glamora Treat's campsite gets surrounded in the dark which is shown as many sets of eyes gazing at them from the darkness as they grab whatever is nearby to act as weapons.
* Sensation Comics feature are a violent militia that lynches immigrants, legal or otherwise, and those who employ or try to stand up for them.
* Sensation Comics feature Ely Duel is the chief of county detectives while also making money as the masked criminal head of the Crime Combine. He uses his position to make arrests and get away with shooting those who are in his way.
* Sensation Comics feature intelligence officer Tommy West is interviewing an archeologist who claims to have information about an Imperial Japanese plot, and the archeologist gets shot just as he's about to name the collaborator.
* Sensation Comics feature "In the Clutches of Nero" is about an anthropologist from Holliday College going to a recently discovered jungle island with three of his students and trying to learn about the natives there, who prove to be quite hostile.
* Sensation Comics feature "In the Clutches of Nero" the ruler of the recently discovered civilization on a jungle island who calls himself Emperor Nero is a overweight man, though his slim wife seems to be to one actually running things behind his back.
* Sensation Comics Featuring Wonder Woman and is mostly set in the desert. The small town being visited is dry and hot with sparse vegetation.
* Sensation Comics Featuring Wonder Woman: Diana ditched her guards Techne and Epistime first thing, in order to go out on her adventure in the wider world.
* Sensation Comics Featuring Wonder Woman: Diana shouts, "Thank you Athens!" during her concert in "Bullets and Bracelets".
* Sensation Comics Featuring Wonder Woman: Diana shows up with an actual cavalry contingent of Amazons to save the day when Oracle calls her to help Gotham after the Bat-Rogues have, for once, actually properly teamed up and managed to take down Batman, Nightwing and Robin in an explosion, overwhelm the not badly wounded Bat-Fam members, and are quickly turning Gotham into a living hell.
* Sensation Comics Featuring Wonder Woman: Di has to deal with a creepy fan in

"Bullets and Bracelets," a story in which she spreads her message of peace, love, and acceptance more through music rather than punching villains in the face. She's still an Amazon, so when he pulls a gun on her she folds it in half.
* Sensation Comics Featuring Wonder Woman doll. When she gets in trouble and is sent to clean up what she's done she gets distracted and continues playing. Her sister is still upset but decides to join in the game as she'd kept the dolls for sentimental value and no longer played with them anyway.
* Sensation Comics Featuring Wonder Woman enough time to rescue the remaining crew.
* Sensation Comics Featuring Wonder Woman: Epistime and Techne are diametrically different and are paired as Diana's personal guards while she is growing up. Epistime is tall, patient and graceful while Techine is short, tacturn and abrupt. They argue nearly constantly but seem to like each other regardless, and they are both excellent fighters.
* Sensation Comics Featuring Wonder Woman: Epistime and Techne are very different personalities who are paired together as partners as guards and who find ways to insult each other with almost every sentence they speak unless there's need to act serious.
* Sensation Comics Featuring Wonder Woman: In "Attack of the 500 Foot Wonder Woman" Diana gets grown to an enormous size and has to try and not destroy the city around her while fighting the shapeshifter in the form of an enormous Thanagarian monster that's attacking the city.
* Sensation Comics Featuring Wonder Woman: In "Gothamazon" Diana briefly imagines killing or maiming the assembled irritating Bat-Rogues she's fighting. Obviously she chooses a less violent path, though given she wraps most of them in her lasso which forces them to face their greatest fears and changes them permanently some of them may have preferred the maiming.
* Sensation Comics Featuring Wonder Woman: In "Not Included" Diana and Barda fight through and tear apart a bunch of gorilla guard robots.
* Sensation Comics Featuring Wonder Woman in some way, even if she's only a comic book character within the 'verse of the tale.
* Sensation Comics Featuring Wonder Woman: In "Wonder World" Diana first meets Riley when Riley is beneath a pier trying to stop crying and put on a happy face to rejoin her friends for her birthday gathering.
* Sensation Comics Featuring Wonder Woman: In "Wonder World" Techne knocks down Diana's door when she and her partner Epistime go to fetch her after everyone assumes Diana has been sulking in her room all day and Diana doesn't respond to Epistime.
* Sensation Comics Featuring Wonder Woman: In "Wonder World" the brash Amazon guard Techne has an eyepatch over her left eye, and a scar running across her forehead slips beneath it at an angle that would hit her eye.
* Sensation Comics Featuring Wonder Woman: In "Wonder World" the bully says he'll give Diana the shirt off his back if she beats him in addition to letting Riley and her friends play "Dance Dance Retribution" which the bully has been monopolizing for the evening. After he gets distracted and falls, and angrily gives her his shirt as per their accord, he goes and finds a cop and tells the officer that Diana attacked him and stole his shirt.
* Sensation Comics Featuring Wonder Woman is fighting Diana and gets the upper hand, which the queen's time seeing device gave her enough insight on in order for her to aid her daughter.
* Sensation Comics Featuring Wonder Woman lodging a spear in her shoulder is to yank it out and use it against the villain.
* Sensation Comics Featuring Wonder Woman: The annoyance of having interviewers attempt to reinforce this trope in real life by asking women about their beauty regimes and their male coworkers about their work (usually seen with actors) is discussed in "Venus Rising":
* Sensation Comics Featuring Wonder Woman: The captain in "Rescue Angel" is only known by his call sign and the main character Lt. Angel Santiago gains hers, Wonder Woman, over the course of the tale.
* Sensation Comics Featuring Wonder Woman: The main character of "Rescue Angel"

earns the call sign "Wonder Woman" for her refusal to leave any men behind after her convoy gets ambushed and insistence on pulling guys out of the line of fire even after she's hit.
* Sensation Comics Featuring Wonder Woman: The main character of "Rescue Angel" is on her first deployment and gets a little ribbing by the guys for her awe at the beauty of the Middle East.
* Sensation Comics Featuring Wonder Woman where she pictures killing or maiming the murderous and irritating Bat-Rogues she's fighting and pictures splitting Two-Face in two with a sword, right down the middle.
* Sensation Comics Featuring Wonder Woman: While utterly demolishing about twenty of the soldiers Ares has just grown from the dirt Diana growls:
* Sensation Comics Featuring Wonder Woman: "Wonder World" features a version having more to do with awe and a desire for friendship when 15 year old Diana fresh into the wider world inserts herself into Riley's birthday gathering to deal with some bullies. One of Riley's other friends asks her where she found Diana and Riley responds that she doesn't really know but she's keeping her.
* Sensation Comics from a photograph in a newspaper, and Steve and Diana find another military man that looks just like Steve for the lady.
* Sensation Comics gives up and sits down on a table it flips open the hidden door to some stairs which lead underground.
* Sensation Comics: In the Christmas feature Wonder Woman rescues some kids and their widowed mother from their abusive uncle/brother-in-law that the mother is so worried is going to step things up and kill her family she's waiting in the dark with a bat to attack anyone who comes through the door.
* Sensation Comics iterations were reduced to twins, changed to redheads and the traditionally smart one became the clueless one while the other became the smart one.
* Sensation Comics: Joel Heyday's mobster affiliates can't tell his triplet nieces apart, so kidnap two of them while trying to nab Tillie, who Joel intends to have write up a will bequeathing him the majority of what his mother is leaving to her in his will before murdering Tillie and his mother. As the other two have seen his accomplices he decides they have to kill the whole lot.
* Sensation Comics learns of an unscrupulous crime boss known only as "Shark" forcing boys to steal for him and he tries to burn down his hideout with his unwilling accomplices tied up inside to hide any evidence that he was tied to the thefts.
* Sensation Comics: Mala ends up in New York for most of a day, and is terribly confused. She picks up a car and throws the driver out thinking he was trying to threaten her by driving, is disgusted by posters for war films and despite being fully willing to submit to the local law keepers is convinced to lead a jail break by two career criminals.
* Sensation Comics meet a poor boy and are concerned about his home life due to some things he says, when Diana looks into it she discovers that not only is the uncle he and his sister and mother live with so incredibly abusive their mother is terrified that he's going to kill the kids, he's also running a huge racketeering ring from his basement and plotting the armed robbery of a bunch of gold.
* Sensation Comics: Mimi Mendez's weapon of choice is a massive amount of throwing knives, which she enjoys tossing near her prisoners until she gets bored of them and lands one in their eye or heart.
* Sensation Comics modified her costume a little to look more Christmassy and added a red cape with white fluffy trim and then went to a tenement in a downtrodden neighborhood with a sack full of toys and gave cool quality toys to all the children there. She also fought a gangster who was abusing his niece and nephew she came across in the building.
* Sensation Comics: One of Dr. Pat's schoolmates received a letter from his fiance informing him that she couldn't wait for him to be out of med school and their relationship was over. She eventually changed her mind but the experience left him permanently bitter and mistrustful.
* Sensation Comics rescue the Holliday Girls from the things when they end up

trapped in the basement while looking into the suspicious character who owns the place.
* Sensation Comics's current captors, who follow a woman claiming to be the descendant of Helen of Troy. They bring it in and set it alight thinking someone's hidden in it but Di was using it as a decoy while she broke the prisoners free.
* Sensation Comics takes place in the far-flung future year of 2150, where humans have colonized most of the solar system and possess personal voice activated jets capable of spaceflight instead of cars. Regular news seems to have been superseded by live vlogs, as the main character does her newscasts by just leaving her camera-like device worn about her neck on and broadcasting while investigating things and going on adventures.
* Sensation Comics: The Heyday triplets are all identical, which comes in handy when their criminal older brother kidnaps them and tries to force them to sign legal documents signing over their inheritances, so they pretend to be each other. They also do this at Holliday College for fun, which frustrates their professors and has caused the other Holliday Girls to make them wear nametags.
* Sensation Comics the one whose been stealing things before she even knows what the leprechauns have done, so when the police arrive they find her with a huge pile of stolen goods and arrest her for the thefts.
* Sensation Comics there was a man badgering her about becoming her sponsor. She turned him down at first and then played along just long enough to expose the scam he was trying to run.
* Sensation Comics: Two of the Heyday triplets, all three of whom are identical attractive blonde women, are acknowledged to be reckless, foolish, and dangerously impulsive to the point that their grandmother leaves her estate only to the one of them who doesn't fit here, as she feels Tillie will take care of her sisters with the money and that the other two will be better off that way than if she'd actually given them the money themselves.
* Sensation Comics until she was in a position she couldn't easily escape with her children.
* Sensation Comics visits a newly discovered island that is home to a lost Roman colony founded by a son of Nero, and still ruled by his descendant, that has its own legions.
* Sensation Comics", went out of her way to ensure she was kidnapped as well.
* Sensation Comics: When she first appears, Byrna is acting as a secretary at the Fair Weather Valley town meeting and voices her disgust at how childish the less likable people are acting. Then she's revealed as the "Snowman" who is tormenting the town.
* Sensation Comics: When the Blue Boys run away out of boredom they pack their belongings in handkerchiefs tied to sticks.
* Sensation Comics: Wonder Woman climbs to the outside of a commercial flight to leap over to her invisible plane at one point. At another, as Diana Prince, she ends up riding on the outside of a sabotaged plane while regaining partial control of it to crash land it in a way where it won't raise suspicion that the human Diana Prince survived the crash. (This was in the Golden Age before she'd been upgraded with the power of flight by later writers.)
* Sensation Comics, Wonder Woman says there's an entire kink subculture consisting of men and women who want to be punched or smacked by her. She then relates a story about how she once agreed to punch a rich guy for ten million dollars, and then used the money to fund daycare centers in low-income communities.
* Sense8 actor for God's sake) his boyfriend Hernando is more befitting of this trope.
* Sense8, a new species with the ability to sense each others' thoughts and emotions.
* Sense8: Bug first met Nomi before she transitioned. When he meets up with her again he accidentally calls her "Mike" a few times out of habit. Nomi's girlfriend Amanita gets a little defensive but it's clear he's not being malicious and apologizes each time. By the second season he's consistently referring to her as "Nomi" without a single mistake.

* Sense8, but an awful lot of fans watched it because it was a show conceived by two trans women that had prominent LBGT characters and a positive attitude towards polyamory.
* Sense8 caused a bit of an uproar when it was rated by Common Sense Media for ages 14 and up, despite its strong language and quite graphic sex. After a few days, the review was changed to a 17+ age recommendation.
* Sense8 for Lito. When she finds out the truth about his sexuality, she is ecstatic at getting to watch him and his lover Hernando get it on.
* Sense8 has a jigsaw-puzzle plot for the entirety of Season 1, and parts of Season 2 as well.
* Sense8 has is their ability to lie, and they probably wiped most sensates out in the past (like the Neanderthals).
* Sense8 inverts this with one of the main characters, Sun, a champion kickboxer. She lost her virginity to a male fighter she defeated at a tournament, and the first time she and her love interest Munn had sex was after she beat him in a sparring session.
* Sense8 is about eight very different people from around the world who have a telepathic link to each other. They can access each other's skills and knowledge to overcome obstacles. As such, they frequently find themselves in situations where they need someone else's skills to resolve.
* Sense8: Justified. Kala shoots at the fuel tank of a car, but it doesn't explode — Wolfgang even sighs that cars don't explode like in movies. She was only shooting at it to get the gasoline to trickle down towards them, which she then lit on fire...causing the car to blow up.
* Sense8. Kala sheepishly tells the auntie she already knows all about that because she has access to the internet.
* Sense8 launches one against BPO, blowing up the building with him inside.
* Sense8, Lito is filming a shoot-'em-up scene while tuned in to Will, who is doing a firearms training drill, which really dials up the intensity for Lito.
* Sense8: Mahendra hates Indian food, almost gets assassinated due to his efforts to ban Hindu ceremonial rites, and is never seen wearing traditional Indian garments. One of the Hindus who had a hand in his assassination attempt says Mahendra wants India to be like America.
* Sense8: Max Riemelt, who played Wolfgang, played the character again in the German dub of the series.
* Sense8 protagonists of the series were all born on August 8, 1988 i.e. 8/8/88.
* Sense8 (queer ensemble cast, main characters include a gay man and a transgender lesbian, all main characters are varying degrees of pansexual, supporting characters include a gay man and a queer woman; subject matter includes pansexuality, polyamory, homophobia, transphobia, LGBT acceptance, queer male romance, and queer female romance)
* Sense8, several months went by without any word of whether there would be a second season, causing a hugely worried fanbase as Netflix tends to share news of renewals within a week or two of the release of its new shows. In fact, the announcement was simply being held back until August 8th, the birthday of all the show's protagonists, with their actors releasing a video singing Happy Birthday and casually revealing the renewal at the end.
* Sense8, she knew that, and was waiting for the gas to leak down to where they were. She then sets fire to the gasoline trail, making the car explode.
* Sense8: Sun Bak makes use of one of these in season two while on the run after breaking out of prison. When Lito asks why, she points out the signs guaranteeing clients' privacy and anonynmity which makes it an ideal place to hide out.
* Sense8 tropes, as she's only going through with it because she knows he's a perfect match and doesn't want to disappoint her family.
* Sense8, which played a large part in it being cancelled after two seasons.
* Sense8: Wolfgang used a guy this way during a gunfight. Sun later does the same with one of her brother's goons.
* Sense8. You can probably guess what number it is. Eight main characters, in eight different locations, all born on August 8th... etc.

* Sense: A Cyberpunk Ghost Story where you star as Mei, a young woman on a date in Neo Hong Kong (actually Seattle) that ends up trapped in a haunted apartment building where she can see the ghosts with her malfunctioning cybernetic eyes.
* Sense and Sensibility (abandoned the last girl he slept with and dumps one of the heroines for someone richer).
* Sense and Sensibility also includes him and his first love being separated by an arranged marriage.
* Sense and Sensibility and Sea Monsters, Brandon was simply much older, so this trope doesn't apply there.)
* Sense and Sensibility as he was ready to propose when his aunt discovered that he'd seduced and abandoned their neighbor's foster daughter and subsequently disinherited him.
* Sense and Sensibility. Austen's sympathies are clearly more with the former; Marianne's strong sensibility is tested throughout the novel, and she is eventually forced to learn to be more like her sister.
* Sense and Sensibility, Colonel Brandon first sees Marianne while she's playing a harpsichord and singing, visibly falling in love with her in that instant.
* Sense and Sensibility Colonel Brandon's child, but a few characters believe that she is and that this trope is the reason. He elects not to correct them about it, to protect Eliza's memory, though he does confide the whole story to Elinor.
* Sense and Sensibility, Colonel Brandon's first love was his cousin Eliza Williams. They planned to elope, but his father stopped them and forced Eliza to marry Colonel Brandon's older brother. In the present, Eliza's namesake daughter (and Brandon's ward) is commonly believed to be Brandon's natural daughter.
* Sense and Sensibility, Colonel Brandon's generosity and a reconciliation with Edward's mother are needed for Edward and Elinor to marry.
* Sense and Sensibility: Discussed a lot when Colonel Brandon falls in love with Marianne Dashwood. He is 35 and she is 17, and she thinks that he's old enough to be her father. Her sister Elinor thinks that it is a significant gap, but says a woman of 27 and a man of 35 might be quite happy together. Near the end of the novel, Colonel is still very much in love with her, and the narrator says he had "little to do but to calculate the disproportion between thirty-six and seventeen".
* Sense and Sensibility, Edward Ferrars's family ships him with wealthy Miss Morton and they are against him courting Elinor Dashwood. Edward is however secretly engaged to a much poorer and less genteel woman, Lucy Steele, which is even worse for them and poor Edward is disinherited.
* Sense and Sensibility ends with a double wedding for the Dashwood sisters.
* Sense and Sensibility, family friend Mrs. Jennings breaks out a fine old wine that her late husband used to treat his gout. Elinor claims the glass for herself as Marianne is already asleep—having spent the day being horrified by the news of Willoughby and trying to console her sister, Elinor figures she might as well test its restorative claims on herself.
* Sense and Sensibility. He carries her home in the rain after she sprains her ankle, kickstarting their passionate romance. Later, of course, he turns out to be a cad.
* Sense and Sensibility, her mother and sisters look at each other, gobsmacked for a moment, and then hurriedly vacate the room.
* Sense and Sensibility him, but figures that a genteel man without money is still a catch.
* Sense and Sensibility. Later, Col. Brandon does the same thing when she collapses in the rain.
* Sense and Sensibility, Marianne eventually marries him, and the narrator wryly notes that they're a happy couple even though he wears a flannel waistcoat.
* Sense and Sensibility, observes that both of Mrs. Jennings's daughters seem to be in completely ill-suited marriages. Mary (Lady Middleton) is vapid and society-oriented, with no sense of humor, and she's married to the cheerful and down-to-earth Sir John. Meanwhile, Charlotte is empty-headed and good-humored, and her husband Mr. Palmer is a snob who wants to be better than everyone. Despite this, however, both marriages appear to be fairly happy; Mr. Palmer is much nicer to his

wife in private than in public, and the Middletons are never shown to have any particular quarrels.
* Sense and Sensibility rests on this concept — Edward formed a secret engagement with Lucy when they were teenagers; now that he's grown up and met Elinor, he's no longer in love with Lucy, but as long as she wants to go through with the engagement, he's bound to it. (It takes being disinherited in favor of his brother, prompting Lucy to dump him for said now-richer brother, to set him free.)
* Sense and Sensibility seems to prefer spending more time on the conflict arising from bad relationships than on the good relationships.
* Sense and Sensibility. She is one of the best mothers in Jane Austen's books, but she never realizes that Elinor, her eldest daughter who isn't as passionate as her and her younger daughter, can suffer as deeply as them, and acts much more constructively as the author quickly notes before explicitly writing that the favorite is Marianne, not Elinor. It reinforces Elinor's isolation in a painful situation out of which she pulls herself alone.
* Sense and Sensibility sisters Elinor and Marianne Dashwood eventually marry Edward Ferrars and Colonel Brandon, who by that time have been introduced and become good friends due to their similar temperaments and educations.
* Sense and Sensibility the day after they run into each other at a ball in London, after he's made assiduous efforts to avoid her in town. He tries to play it off that the feelings were all on Marianne's end and he was very sorry but he'd long been in love with Miss Grey (a very wealthy heiress). Nobody buys it.
* Sense and Sensibility. Though he and his rich wife are said to not always be unhappy together, Willougby still compares any up-and-coming belles unfavorably to the now Mrs. Brandon.
* Sense and Sensibility. To her credit, near the end she gets a clue and fears that "she had been unjust, inattentive, nay, almost unkind to her Elinor."
* Sense and Sensibility to marry so young, but not considered immoral or illegal.
* Sense and Sensibility, who often talks about a certain Doctor as her beau.)
* Sense and Sensibility, Willoughby carries Marianne home after she twists her ankle while running home because of the rain, thus sparking their romance.
* Sense and Sensibility: With Marianne choosing between Brandon (the Gentleman) and Willoughby (the Scoundrel)
* "Sense and Sensitivity Kate's eyes flick downward to check out Angel's body and she mutters "Way ahead of you."
* Sense Freak, comment that his food tasted red. Jake corrects him with "It's cherry flavored."
* Sense Freak, has a tendency to get bizarre obsessions with certain foods, often combining them in weird ways, because of the time he spent locked in a sanatorium with very bland food. In season four, he discovers molecular gastronomy and starts doing things like liquefying meat and suspending in in algae.
* Sense Freaks when a Slaaneshi cultist appears to orgasm from being bisected.
* Sense Freak: When a non-human becomes human, they will go wild over senses humans take for granted.
* Sensei and Ninomiya-kun with horrible acting, and yet the protagonists seem to like it.
* Sensei for Scoundrels: Mentors another into becoming a better person with shady, unorthodox, and usually amoral methods.
* sense if you think enough about them, and while you wouldn't be able to find any of the Seven going off their posters (including the girls), it's for a new reason in each case.
* Sensei Greg, on the other hand, is almost universally agreed by the
* sense ill intent somehow, it is not explicitly shown that he can detect malicious ki/energy/intent.
* Sensei Lock On. Fast forward ten years, Yamato is twenty and in university, Kyouko is thirty-three, and he proposes to her. They settle as boyfriend and girlfriend and much of the series' events is Kyouko fretting about the age gap, particularly since she tends to enter "teacher mode" when interacting with him, while simultaneously being charmed by his sincerity.

* Sensei Lock On has had a tendency to attract these, with boys in the elementary school she teaches at actively trying to flirt with her or otherwise vie for her attention. The very first of these boys, Kazuki Yamato, fell for her on her first day teaching his class. He re-enters her life when he turns twenty and convinces the now thirty-three year old Kyouko to become his girlfriend.
* Sensei/Modern Lit. All the other characters are anthropomorphized guns.
* Sensei Wa Koi O Oshierarenai student. Despite this they deeply love each other and have been dating since before the start of the series.
* sense ki; Krillin affectionately refers to it as his "Stealth Mode".
* Senseless are the result of the main character's senses either going into hyperdrive or completely shutting off, leaving him with things like floppy limbs and inability to speak properly.
* senseless bravado by it. Consider that when Balian threatens to burn the entire city to the ground, Saladin grins and whispers, "I wonder if it would not be better if you did."
* Senseless Phagia, the doctor who performed the eye transplant on Anderton left him a sandwich and milk in the fridge... while also leaving rotten similars as well (after all, Anderton's temporarily blind and was responsible for his arrest). Guess which he goes for?
* Senseless Violins that shows a ninja assassinating his target with a poison dart blown out of a flute.
* Sense Loss Sadness: An individual loses sensation and laments being unable to feel it anymore.
* sense of hope and wonder who seeks to consume all life in the galaxy.
* sense of taste, to be absolutely astounding. Apparently, cinnamon buns are one of humanity's best inventions ever.
* senses Peter's and Raven's imminent executions at Apocalypse's hands one when Moira tells him he can't sacrifice himself for them without dooming the world as well.
* senses them to be afflicted by an oftentimes permanent type of insanity (phobias, feelings of being consumed by insects, etc).
* Sensha Otoko: A True Tank Story but is usually referred to with male pronouns, is a girl and Gilgamesh's love interest.
* Senshi's as well. He used to be part of a group that got almost entirely killed off by a griffin. One of the other survivors claimed to have killed the griffin, and Senshi was hungry enough to eat it. Later, he started questioning whether it was actually griffin meat or if it came from the corpse of another recently-killed party member. As such, the idea of eating griffin meat terrifies Senshi in the present, since confirming what it tastes like would show him the truth of what happened years ago. When the party does.
* Sensible Heroes, Skimpy Villains: Good guys dress modestly while villains wear revealing clothes.
* Sensible Heroes, Skimpy Villains (when the villains are more stripperiffic than the heroes)
* sensing impending deaths and precognition in predicting how a person is going to die, which just motivates him to spread joy and comfort to the dead however he can.
* Sensitive Guy and Manly Man: A friendship between a guy who is feminine and a guy who is masculine.
* Sensitive Guy and Manly Man: Another way a Sensitive Guy can be identified is through comparison to a Manly male character.
* Sensitive Guy and Manly Man. Eric is meek and sensitive and becomes a confectioner. Otto is tough and more austere and becomes a military officer.
* Sensitive Guy to Crews' Manly Man, with detailed descriptions of wonderful dates in exotic locations and everything your man could do for you if he used Old Spice and not a "lady-scented body wash".
* Sensitive Pornograph: Mizuho's violent reactions to Meguro's offers for friendship, or compliments about cuteness don't slow Meguro down a bit from falling for him. Notable Meguro never raises his fist against Mizuho, accepting his frequent beatings with giddy happiness.

* sensitive to touch, and can casually lose limbs to easily re-attach or regrow with magic (the later taking a lot longer and using more energy).
* Sensitivity Training: A school that sensitize people to their attitudes and behaviors that may unwittingly cause offense to others.
* Sensitivity Training. Companies that are able to show that employees were told what not to do (and yet did it anyway) in a sexual harassment or hostile work environment lawsuit will be better protected than those who didn't.
* Sensitivity Training: Undergoing being taught how to be more politically correct.
* Sensodyne Iso-active. It says right there in the name of the thing that it is
* Sensor Autodog. It looks like a dog and is used by the Science Police to hunt criminals by scent.
* Sensorites communicate with each-other this way if they're not close to each other.
* sensors, thus avoiding the "flying blind" problem noted above for craft attempting to be stealthy by not using active sensors.
* Sensor Suspense — Since radiation is usually invisible, the sound of a Geiger counter or similar instrument is frequently used to indicate its presence.
* Sensory Abuse videos that utilize it use it as a substitute for jokes, sometimes to the point of having the entire video being nothing but it.
* Sensory Overload, all of which she just couldn't take in at once, and eventually broke into a furious craze, attacking her partners and running off into the wilderness. Thankfully, Axonn was there to cleanse her mind with his healing powers.
* sensory overload, which can affect any of the five senses. While the vast majority of sensory abuse these people undergo is unintentional, a very sadistic person could use it for deliberate torture.
* Sensory seekers derive pleasure from the visual, audible, and tactile aspects of the game. They enjoy art, miniatures, battlemaps, and all the things that you can see or feel or hear. They tend to find games done purely in the mind, without props of any kind, unsatisfying.
* "Sensual Impressions" by the German group Joy Unlimited is basically an extended flute solo with pianissimo organ/cymbal backing, save for two instances of fortissimo "scare chords" which are TERRIFYING when listening to the piece for the first time.
* Sensual Phrase, both Sakuya and Aine are like this for each other, though Sakuya is more extreme about it.
* Sensual Phrase has Atsuro in a relationship with his sister Yuka. Their exposed relationship even causes a scandal, but Atsuro casually reveals to the press that they are stepsiblings.
* Sensual Phrase, who was this close to rape his girlfriend Aine when at his worst.
* Sensual Slavs: Eastern European women are stereotyped as being beautiful in a very seductive way.
* Sensual Slavs: Slavic woman using her sex appeal to seduce, manipulate, distract or beguile a non-Slavic character.
* Sensual Trigger has this in chapter 2, where Akira considers his work more important than his girlfriend, Rariko. This makes her upset, but by the end of the chapter, they start working together.
* Sensui is very fond of insane laughter in all of his personalities. His true personality has him laughing maniacally while causing powerful and violent tremors all around him.
* Sensui recalls thus during his fight, mentioning playing an RPG where he maxed out his character before facing the final boss: he's so over-equipped that the boss can barely scratch him, but his attacks have long since hit the Damage
* Sensui Shinobu is occasionally criticized as this, given that after all of Yusuke's efforts to defeat him he's still a
* sent a device to convince Christopher Columbus to travel to the New World instead of leading a final, victorious crusade to capture Jerusalem for Christianity
* sent adrift to live with foreigners. Given that his creators Jerry Siegel and Joe Shuster were both Jewish, this might not be too far off. (For what it's worth,

Siegel and Shuster said he was inspired by Samson, among other sources.)
* sent Aedith to find a "hinge clacker" to keep her little clanks a secret. She succeeds in retrieving one, and Agatha admits she didn't need it after all.
* Sentai: A Japanese-style multicolored team of superheroes, with a focus on working together.
* Sentai by having cheaper versions of the trinkets available as Gashapon prizes, but if you want the high-end ones, well, better crack open that wallet...
* Sentai conventions, but this doesn't stop them from being a highly brutal and militaristic organization that once led an entire empire of evil, unlike the law-allied Impel Down.
* sentaification (Moon had a mask for a chapter, Jupiter had a belt, etc).
* Sentai Filmworks, though unlike most of these examples, the winners at least had to record an audition in person.
* Sentai of Yamato Kinjo, Kyoryu Blue, his counterpart from Kyoryuger.
* Sentai or making fun of it unless the producers want viewers to cry foul.
* Sentai, otherwise Tokyo would be gone while the second base was launching.
* Sentai rarely bothers with Secret Identities except when the Rangers are still in school such as
* Sentai School, Ken takes note that everyone, even from different countries, seems to speak the same language.
* Sentai series that sent them throughout the galaxy (though they did spend extended stretches of the show on Earth).
* Sentai so they had to fill in the blanks in their report with examples from a sentai tv-series.
* Sentai that weakened when hearing beautiful singing. The group reappears in a later episode to appease a nature spirit haunting a hotel. When that attempt fails, the G3 Princesses were succeeded by the G5 Princes, the Go-on boys forming their own idol group. With spotlights and glitter and cheesy outfits.
* Sentai themed unit each member is naturally associated with their own colour (red, blue, green, yellow, and black), so as a whole they tend to be associated with multicolour rainbows.
* Sentai, which refered to something like "Cute techniques" where female characters beauty is weaponized. Often, just a sexy wink from the Pink member is too much for the Mooks to handle and they fall straight over.
* Sentaro and Kaoru constantly bicker in exaggerated manners, even though they actually get along pretty well, as stated by Ritsuko. Kaoru throws a
* Sentaro thought that Kaoru was an angel who've come to take him away in his nap, not helped by how Kaoru has been known as having a 'pretty face' according to Ritsuko (which she corrected into 'handsome' right away).
* sent a walking physical god running in fear of its destruction after a shapeshifting battle.
* sent back in time, confirming Jake's suspicions that he's still being controlled by Temrash 114.
* sent back in time. One of her options is invariably to screw with Lelouch for fun. When determining what to do about his plan to deflect her suspicion of him, one of her ideas is to go along but also flirt with him and see what happens.
* Sentenced's "The Suicider" is about an immortal/undead man who now only finds pleasure in killing other people, feeling reborn every time he kills someone.
* Sentenced to Down Under for some, the idea of being legally sentenced to live there as punishment generally doesn't stay in the public consciousness outside of historical knowledge.
* Sentenced to Down Under: Specific to 1800s England; a person's punishment is being sent to Australia.
* Sentenced to Prism, one young lady acting as a walking billboard sports clothing that flashes advertisements on it and occasionally turns transparent on parts of her body. The protagonists muse that the really titillating spots are never going to turn transparent, but people will keep staring at the ads just in case...
* Sentenced to Prism , rich colouration, lots of armour, a casual approach to being on land or underwater (the inhabitants consider water 'thick air') and so forth.

* Sentencing their immediate descendants to the horrors of disease, famine, dying in childbirth, and lack of long term protection from the environment
* Sententing her (and her sister) to death was enough to cause a Civil War in the Soul Society.
* sent him to ''high school'', even though mentally he was no younger than the original.
* Sentient A.I. Warning Signs: A joke article for common signs of AI's becoming sentient.
* sentient and escapes her mouth, never returning until he gets in trouble with the law. By the end of the episode, Chicken's wattle tries to escape after coming to life and detaching from Chicken, but Chicken stomps on him before he can get away.
* sentient car, that's saying something. All we have to get attached to is his personality.
* Sentient Cosmic Force: A sentient Background Magic Field of universal scale.
* Sentient Cosmic Force) that can't, by any realistic stretch of the imagination, be considered a character.
* Sentient Cosmic Force where another conflict with Ultron involving too much time travel led to another crash. This time the effects were further reaching, where instead multiple people in parallel universes were struck dead and others still were permanently shuffled around the multiverse.
* sentient entirely revolves around the crew's attachment to Vic as a character "within" the simulation.
* sentient from the Archbishop for killing Quasimodo's mother on the steps of Notre Dame.
* sentient galaxy a huge powerup. Also there were some smaller living (but not sentient) galaxies, artificially made by some uberpowerful race as bioweapons. Supes, again, kept one as a pet.
* sentient house as the episode closes out with the House implying that it'll kill again.
* sentient mountain range created by the Lizardmen to protect them from a Dark Elf invasion.
* Sentient Phlebotinum. It can take on many shapes, but its natural form is a silvery liquid.
* Sentients, kicking off the Old War. It's implied that the Sentients realized that the Orokin were so rotten that they'd basically ruin the Tau System as well, and they wanted to strike first to prevent that from happening.
* Sentients. Thanks to this, they also have a unique "autopilot" mode.
* sentient trees whose sap the Argonians drink to grow. The Hist began to change the Argonians around the time of the Oblivion Crisis, making them stronger and more aggressive to prepare for the coming chaos and wars.
* Sentient Weapon Túrin Turambar used in all his greatest and most tragic acts, culminating with the slaying of Glaurung (father of dragons), and his own suicide shortly after. And Túrin will use it to kill Morgoth during Dagor Dagorath, the Final Battle.
* Señor Barriga and Ñoño's voice actor Mario Vilela died in 2005. Gustavo Berriel also took over both roles.
* Señorella and the Glass Huarache, Format Films, and Seven Arts.
* Señorita Pineapple, in part due to those companies including the likes of the United Fruit Company.
* Señor Senior Junior is the most buff-looking of the regular villains but doesn't get into fights. Maybe he doesn't want to mess up his hair.
* Señor Senior, Junior's laugh (despite his father's best efforts to teach him a proper
* Señor Senior Junior would rather party and break into show biz rather than
* Señor Wooly subverts this in the song "Billy la Bufanda". It looks like Billy the scarf can see, move, eat, etc., but it's always revealed that he's just an ordinary scarf who can't do any of these things.
* Sentimental Graffiti, each of the girls is introduced to the player in this

manner.
* Sentimental Graffiti: Emiru's manic-ness made her a social outcast with everyone except the protagonist.
* Sentimental Graffiti keeps track of two affection values: how much the girl likes him in general (the size of the heart) and how much she wants to see him (how fast it's beating).
* Sentimental Graffiti met the girls he did because his father was in the military and moved him around a lot as a result.
* Sentimental Journey - Kaho's episode ends with her handing off a bento box to her (female) best friend who's moving away.
* Sentimental Music Cue: You can tell that the conflict is going to be resolved when sentimental music plays.
* Sentimental Sacrifice: Having to destroy something you love for a greater good.
* Sentimental Shabbiness: It may not look like treasure, but the reason it's so beat-up is because it was loved!
* Sentimental Shooting takes this one step further: Finish a stage (any stage) without using your time freeze and without losing a life, and a bonus boss would appear to blow you to smithereens. Level boss stages are the only exception to this rule.
* Sentiment for the secession of majority Francophone Quebec from Canada ebbs and wanes, culminating in a referendum in 1995 where secession lost by a small margin.
* sent in because the Big Bad , Snake is regarded as a legendary soldier for his exploits in the 8-bit era.
* Sentinel: Descendants In Time has the Tastans, whos tombs have holographic AIs guarding them, and recreations of places the deceased was most attached to in life.
* Sentinelese any contact with the outside world, even resorting to violence sometimes. Nowadays Indian authorities just leave them alone and look around so that everyone else does the same. That's actually putting it pretty mildly; they attack anyone nearing their island, even helicopters, on sight except for one incident where the visitors threw them some fish.
* Sentinelese, island-dwellers (in the Bay of Bengal) who are one of the Earth's last uncontacted primitive races, are protected by one of these. Besides the hostility of the Sentinelese themselves, their borders are guarded by the Indian military, and visitors are turned away.
* Sentinel fanfiction to speculate that this or that historical figure may have been a Sentinel or a Guide.
* Sentinel genocide just because people were tired about writing about Genosha. That said, later plots and character arcs went on to subvert the trope by incorporating the destruction of Genosha as a plot point in various ways (survivor's guilt, monstrosities operating out of the ruins, etc).
* Sentinel Knight didn't anticipate so many different factions going after the crown at the same time? he probably only expected only one group to do it.
* Sentinel Prime, and the former's executions of the latter occurs on the La Salle Street Bridge in Chicago.
* Sentinel Prime initially appears to be this to the other Autobots and their human allies, until he
* Sentinel Returns you actually had an ability which caused a random teleportation, using it caused you to appear on free square on the levels map that was either the same or lower altitude than your current but always a random location. It could actually end you up in a pit with no chance to get out so this REALLY was random.
* Sentinels come in five different variants—hovering drones, quadrapedal robots, massive bipedal walkers, automated fighter craft, and gargantuan battleships.
* Sentinel ships are an EU greatly enlarged version of the lambda shuttle seen in the movie built as drop ships, one is actually seen in one of the Episode V remastered editions.
* Sentinels of the Multiverse. After all, both visible light and radio waves are more or less the same thing.
* Sentinels of the Multiverse, a much more weary demeanour and a garage and

retooled into older, grimmer, much less funky kung fu hero Mr Fixer.
* Sentinels of the Multiverse), and Hermetic (a blood magic alchemist whose "bloodstone" eventually gives him a horrible experience).
* Sentinels of the Multiverse and keeping things that fire can destroy near his arms isn't such a good idea.
* Sentinels of the Multiverse), and Luminary's base variant (because that's just Baron Blade making common cause with the heroes) - represent characters who are actively harmful and dangerous, but are handled as heroes because they're still technically on the side of justice.
* Sentinels of the Multiverse, and the theme tempts you to play the two together - something that is widely considered one of the hardest setups in the game.
* Sentinels of the Multiverse at gunpoint to remind him that he's supposed to be rooting for the team Setback is on.
* Sentinels of the Multiverse a Wild West sheriff until Western comics stopped selling, and he disappeared into publishing limbo until much later writers dug up his back issues and made him a time traveller.
* Sentinels of the Multiverse bad guys are generally not nice people, a couple are sad figures to a degree:
* Sentinels of the Multiverse, Baron Blade has a card called Repair Nanites that is a set of these. He later uses them to fake his death.
* Sentinels of the Multiverse Baron Blade was. Case in point, his deck's special keyword is "Doomsday Device," and among them is an orbital death ray.
* Sentinels of the Multiverse, Battle-Forged the Viking warrior has a heat axe, Siege-Breaker the knight uses a power halberd, Final Breath the ronin has a sword imbued with poison somehow, and Trueshot the Amazon archer fires energised arrows from her bow, and La Capitan herself is shown in some card art using a lightning cutlass.
* Sentinels of the Multiverse, became the last of his kind during a catastrophe on his home planet. When he was approached by the being known as the Terminarch, he accepted her offer of immortality to preserve his race's memory.
* Sentinels of the Multiverse, being an Expy of The Flash, is a super speedster scientist. Gameplay wise, her Super Speed means her deck has quite a few cards that grant her extra card plays so she can get a bunch of bursts in her trash to unleash as many Lightspeed Assults as possible (going by the card art, it is Tachyon simply punching the target repeatedly)
* Sentinels of the Multiverse, being a sheriff from the wild west who slipped through time to the distant future, carries his trusty six-gun. Though he also uses a variety of futuristic weapons given to him by a futuristic AI, his revolver is his most reliable weapon, as nearly every card he has lets him do damage with it as a bonus to whatever other action it does.
* Sentinels of the Multiverse, being inspired by superhero comics, has its share of these, both in civilian identities and in codenames.
* Sentinels of the Multiverse builds Drones to fight the heroes, while the hero Unity creates mechanical golems that do her fighting for her.
* Sentinels of the Multiverse, Citizens Hammer and Anvil were promoted from minions in Citizen Dawn's deck to having their own deck for villain team-up games, in which state they are considerably more obnoxious than they were in Dawn's.
* Sentinels of the Multiverse comments (only one other hero, the Argent Adept, has recorded sound effects, and most of those are musical instruments), and his on-turn background picture will occasionally point into your hand and say "PLAY THAT ONE".
* Sentinels of the Multiverse delivering a eulogy...while a shadowy figure overlooks the scene from the background. Sure enough, Blade returns as a villain in both main future timelines.
* Sentinels of the Multiverse due to having only reached Earth fairly recently.
* Sentinels of the Multiverse, due to the way his keywords and the keywords on the Mordengrad deck interact.
* Sentinels of the Multiverse environment has one of these, allowing whatever villain deck you're playing against to draw more cards, representing the heroes running into one such bar and finding a whole lot of trouble.

* Sentinels of the Multiverse extended; they immediately pointed to a Guise cosplayer in the crowd and say "well, there he is".
* Sentinels of the Multiverse features a few ways to cause the players to get a Non-Standard Game Over (the standard way of winning is to reduce the Villain to 0 HP)
* Sentinels of the Multiverse features decks for the villains that summon mooks to help the villain do their dirty work. Depending on who the players are fighting against, the number of mooks in the deck vary from few in number to half of the deck. Villains who rely on theirs mooks as a part of their deck's strategy include Baron Blade, Citizen Dawn, Grand Warlord Voss, the Dreamer, Omnitron, La Captian, the Chairman, the Matriarch, and Gloomweaver.
* Sentinels of the Multiverse features homages to several well-known comic book characters, like Legacy (Superman), the Wraith (a female Batman), Tempest (Aquaman with hints of the Martian Manhunter) and Ra (Thor).
* Sentinels of the Multiverse for drone factories or enormous railguns, so it has to make do with what it can fit on a humanoid form.
* Sentinels of the Multiverse had his cybernetic augmentation sponsored by Revocorp. Since Revocorp are bad guys, they naturally put in an override to have him do their bidding rather than what he actually wanted to do. In his personal arc, he eventually broke away from Revocorp and became more heroic.
* Sentinels of the Multiverse has a collection of powers that have been genetically passed down through his family for generations, with each new Legacy having additional powers the last one didn't have. The current Legacy, Paul Parsons VIII, is the 9th member of his family to have superpowers, though the superhero name and identity "Legacy" only dates back to the early 1900's (making that one either the grandfather or great-grandfather of the current one). Paul's daughter, Felicia, eventually develops powers and takes up the mantle of Legacy herself.
* Sentinels of the Multiverse has a few plot points involving the Bad Future. Visionary came from the Bad Future to the past in order to prevent it, while Iron Legacy (from another, separate future) is what Legacy would become if Young Legacy was killed by Baron Blade. Chrono-Ranger was just a lawman from 1883 who was sent to a third, distant Bad Future where humanity was wiped out whose goal is to time travel and kill the monsters of the past before they take over the future. The last one is the only ine that is actually a bad future of this specific timeline. The others were alternate timelines. However, since chrono-ranger has been altering the past this one is also quickly becoming an alternate timeline.
* Sentinels of the Multiverse has Akash'Buta who might as well be Gaia herself despite not actually being the earth but just a very powerful void spirit who's gone a little crazy. This quote from the Argent Adept sums it up nicely.
* Sentinels of the Multiverse has, among many other cryptids, a "New Jersey Devil."
* Sentinels of the Multiverse has Gene-Bound Ion-Lancer and L'Epeiste, minions who work for Grand Warlord Voss and La Capitan respectively, each wield one. Ion-Lancer's grants him immunity to energy damage and damages the hero with the least HP, while L'Epeiste's lets him deal damage to the healthiest hero equal to the number of Equipments and ongoings the heroes have.
* Sentinels of the Multiverse has Graham Pike, also known as the The Chairman. He is the undisputed kingpin of the Rook City crime circles. Gameplay wise, his deck features many Underboss and Thug minions to attack and disrupt the heroes while he and his right hand assassin The Operative penalize the heroes for fighting back.
* Sentinels of the Multiverse has Madam Mittermeier's Fantastical Festival of Conundrums and Curiosities, which has such attractive attractions as a carousel with undead-looking horses, a mirror maze that shows your alternate selves, and the charmingly named Wheel of Misfortune. It periodically hosts supervillain fights, which probably is not helping the unstable midway.
* Sentinels of the Multiverse has this in spades, with 36 playable heroes, 47 villains, and more than a dozen minor characters who are either cards in someone else's deck or not seen in the card game.
* Sentinels of the Multiverse he can lay down once he arms up, that's not hyperbole.

* Sentinels of the Multiverse he launched his big apocalyptic attack in the OblivAeon expansion.
* Sentinels of the Multiverse. Her deck relies on getting around her mechanical golem's restriction of being unplayable during her turns play phase by using her base power or equipment.
* Sentinels of the Multiverse - he's just a guy who catches people for money. Notably, when his target is incapacitated, he'll bail on the spot in order to get them back to his client, incapacitating himself automatically - although, since his incapacitated effect is pretty nasty, this may not increase the heroes' lifespan much.
* Sentinels of the Multiverse holding back, coming from a universe where he lost everything to supervillains and deciding that the only way to protect the world is to utterly dominate it and crush all resistance. As a result, he deals colossal, continuous damage to the player heroes, often to the point that he'll knock out some weaker heroes by the start of the second turn.
* Sentinels of the Multiverse in the original card game, capable of dealing huge amounts of damage by placing cards under it each turn, then discarding them all for a massive blow. In Sentinel Tactics, Omni-Cannon is not a BFG, it is THE BFG, being arguably the hardest power in the game to activate, but using 10 dice for its base damage, compared to the maximum of six that any other attack had in the original set. In both cases, the cannon is almost as big as the rest of his suit is.
* Sentinels of the Multiverse is about generosity and the rewards of giving...so he turns to several other characters and generously extends them the opportunity to experience said rewards by giving him stuff.
* Sentinels of the Multiverse is a powerful mage with glowing white hair. The card "Regression Darts" reveals that the white hair actually stems directly from the magic; when her connection to magic is cut off by those darts, it turns brown.
* Sentinels of the Multiverse is a serviceman working with the latest in a long line of armored suits built by the US military. According to his backstory, he's the first one to actually work as a superhero, all previous uses of the armor being in military combat actions.
* Sentinels of the Multiverse is tank damage and heal and buff allies to considerable degrees. Tempest's base power (which deals one point of projectile damage to all opponents) becomes terrifying when he's getting +2 to it from Legacy's ongoing effects and power use, enabling him to sweep, for example, several of Grand Warlord Voss' Gene-Bound troops off the board in one hail of death.
* Sentinels of the Multiverse is, well, let's just say he's a horrible person and a vicious serial killer and leave it at that. We don't need to go into the messier details. Besides, they're all in the nightmare fuel and character sheet pages anyway.
* Sentinels of the Multiverse lore podcast), one of the hosts will make a dreadful pun or overplayed reference, and the other will sigh, put down their notes, and a slamming-door sound effect will play.
* Sentinels of the Multiverse luck to have it actually work and not mutate him horribly or kill him... meaning that he now has the strength and durability to survive an extended career of pratfalls onto marauding war engines, falling off roofs while fighting rat monsters, and otherwise putting his foot in it. In play, Setback tends to have turns of little achievement or even hurting himself or emptying his pool by random chance...and other turns where he hits harder than almost any other hero, bounces from near-death to full health instantly, draws a giant hand of cards or gives everyone a round of free power uses.
* Sentinels of the Multiverse, Luminary, a heroic version of the mad scientist villain Baron Blade, has this as part of his playstyle. His deck contains three cards marked as Device, Doomsday - Explosive Reconstructor, Orbital Death-Laser, and Terralunar Translocator - that can be activated if he has a certain number of cards in his trash.
* Sentinels of the Multiverse makes up for being blind since birth but is occasionally vulnerable to stuff that screws with it, such as the malign presence of the Chairman during a fight.

* Sentinels of the Multiverse means that despite his significant story influence, all he gets is an environment deck and a guest spot as a minion card.
* Sentinels of the Multiverse Miss Information wins. The fact that she's basically taunting you doesn't help.
* Sentinels of the Multiverse more powerful, able to pull off insane out of turn combos with massive damage output in the right hands.
* Sentinels of the Multiverse named after a pair of Handelabra employees known for the appropriate playstyle: calculating optimisation for John, raw destructive power for Jeremy.
* Sentinels of the Multiverse: Neither Fanatic nor the Argent Adept ever smile in their card art.
* Sentinels of the Multiverse of the moon down and drops them on OblivAeon's forces.
* Sentinels of the Multiverse. On each turn afterward, he does one hero damage equal to however many cards are in his trash, and can burn through several cards a round — in a game where hero HP tops out at 34, he can be deadly when not taken down quick.
* Sentinels of the Multiverse on their side against villains, but nobody's in a hurry to let her deal with a bank robbery).
* Sentinels of the Multiverse. Others are just standard crazy-talk: "CAN'T FEEL MY EYES", "NO NO NO NO NO", a crude scrawl of Legacy's symbol, etc.
* Sentinels of the Multiverse parodies this with Guise's incap art, which features him being crushed under his incap abilities, one of which is a huge wall of text. It even has him saying "Too much text." His foil incap art, meanwhile, has him on a typewriter, writing out his own incap abilities, including the huge wall of text one.
* Sentinels of the Multiverse powerset: Regular Legacy, his daughter Young Legacy, and his father Greatest Legacy. And just to round it out, have them all fight Iron Legacy!
* Sentinels of the Multiverse Psychic damage (as having his hairdo screwed up wrecks his morale).
* Sentinels of the Multiverse quite a bit. Every playable hero character has a Villain nemesis (though there are some cards in villain and environment decks that have nemesis icons). Damage one deals to their nemesis is increased by one. For some pairs, this is one sided, such as the Argent Adept, a support hero who has few attacking powers, and his nemesis Akash'Bhuta, who has several ways to deal damage though her Limbs.
* Sentinels of the Multiverse, regular militaries are unable to do anything to stop the more powerful, overt villains like Baron Blade, Citizen Dawn, or Grand Warlord Voss, so it falls to the heroes to defeat them. In the case of Warlord Voss, if he has more than ten minions on the field by the start of his turn, he wins automatically as his armies overrun Earth.
* Sentinels Of The Multiverse respectively, each with their own hazards and pitfalls for everyone. Megalopolis is a straightforward bright city that at the worst suffers the occasional alien invasion while Rook City is a gloomy locale stagnating under mob rule, corrupt police officers, and plague rats.
* Sentinels of the Multiverse, serving as the initial impetus for Legacy to unite Bunker, Absolute Zero, Tachyon and the Wraith to form the Freedom Five...while still being low-difficulty. In the digital version, he's the villain in the tutorial. Akash'bhuta plays a similar role for the Prime Wardens.
* Sentinels of the Multiverse: Setback, a hero who has powers based around luck manipulation, has a card called Plucky Break. In the art of this card he’s doing exactly this, bending down to pick up a penny and accidentally avoiding a lightning strike in the process.
* Sentinels of the Multiverse, Setback wears a full spandex suit while his villainous ex Kismet prefers a bare midriff, and Bunker wears a mech suit while Fright Train goes shirtless. Averted with Ra and the Ennead, however, since neither Ra nor his archfoes reliably wear much (in Ra's defence, shirts are flammable), and with Tachyon and Friction, who wear basically the same suit (although Tachyon has

at least one more sensible variant). Inverted with Expatriette and Citizen Dawn, though, since the former has at least one outfit with a bare midriff while Dawn is generally shown in a full top
* Sentinels of the Multiverse, several of the heroes have low HP, numerous self-damaging effects, and low or action-intensive damage resistance, but can dish out staggering amounts of damage.
* Sentinels of the Multiverse Spite, and Highbrow's villain origin involved Parse killing a different supervillain and her mutant brain was created in the aftereffects.
* Sentinels of the Multiverse that can pump out enough dakka to match an entire battalion.
* Sentinels of the Multiverse that made it go berserk and try to destroy humanity...again.
* Sentinels of the Multiverse: The Environment deck can lead to various critters finishing off the supervillain you're fighting. For example, if you can get the villain down to 1-2HP, they can be considered the "target with the lowest HP" for the Chupacabra in the Final Wasteland or the Raptor Packs in Insula Primalis. Chomp.
* Sentinels of the Multiverse, the hosts read out a letter about the proper pronunciation of the Bowie knife, which is named after James Bowie (pronounced Boo-ee) as opposed to David Bowie (Bow-ee). This leads to a lengthy gag where Christopher pretends to think that James Bow-ee named it after David Boo-ee, a pop star that he knew about because he could see the future.
* Sentinels of the Multiverse, the universe's preeminent hero, is delivering a eulogy.
* Sentinels of the Multiverse: The villain Ambuscade spends his time trying to hunt immortal Maori superhero Haka. Haka himself seems more bemused by this than anything else, at one point foiling Ambuscade through wacky hijinks without even realising he was there.
* Sentinels of the Multiverse, the villainous AI Omnitron — after a century of defeats at the hands of the heroes — surmises that their success comes from their emotions, and creates a new, tenth iteration with an empathy chip. Omnitron-X then realizes the depth of suffering he's caused and goes back in time to destroy his previous versions as atonement.
* Sentinels of the Multiverse: This is part of Fright Train's backstory. A marine under Lt. Vance, Graves was wounded in the line of duty just like Vance. Unlike Vance who was fast tracked to man an experiment battle armor and become the superhero Bunker, Graves was given an honorable discharge, something he felt was in error. Some gene therapy and experimental steroids later, he's become Fright Train.
* Sentinels of the Multiverse to technically meet the requirements of his challenge, such as a subway token for a "rune of transportation".
* Sentinels of the Multiverse to two different significant villains, they get one asking about "the Otterative" and Christopher Badell is almost incoherent at the thought of what the Otterative must look like for at least twenty seconds.
* Sentinels of the Multiverse, which has a jokey expansion using Sentinels characters, she gets paid in food, "a decision the League regrets".
* Sentinels of the Multiverse who fights the "Angel of the Lord," Fanatic. And then, in his episode, we discover that he's not actually devil spawn and is instead cultivating all the over the top devil stuff to troll Fanatic by being her idealized villain. Eventually, he just throws all this out the window and just keeps spouting BS lies while Fanatic keeps killing him; claiming to be an alien who's come to take her back to their home planet, for example, or that this is all a coma dream and he's her brother who's trying to get her to wake up.
* Sentinels of the Multiverse with two men (Argent Adept and Anubis) and three women (Visionary, Arataki, and Fanatic).
* Sentinel storyline "Here Comes Tomorrow" had a one word vocabulary. That word was "DESTROY."
* Sentinel the Space Bridge warps our laws of physics, though. Plus, they wouldn't care about damage to the Earth anyway, and the heroes were too busy trying to win

the war to focus on that.
* Sentinel Worlds I: Future Magic, an old 80s RPG for the Commodore 64 and PC: The reward you get for defeating the final boss is — wait for it — it returns you to the DOS prompt! Ah, sweet, sweet victory....
* Sentinel Worlds I: Future Magic who keep attacking civilian freighters. Along the way, you may get into space dogfights, explore strange planets in an all-terrain vehicle, and blast away enemies on-foot with lasers and other futuristic guns.
* sent in, she keeps trying to stay calm, stoic, and in control like normal before giving up and instead laughs until she starts crying.
* Sent Into Hiding: A character whose very existence is kept secret in-universe.
* Sent Into Hiding: A person is kept hidden, and thus secret, from the rest of society.
* Sent Into Hiding, the temple doesn't want too many people among commoners to know. However, between Myne's family, Lutz and the fact that Myne is still doing business with Benno's store all while knowing a couple members of his family, the number of people who are aware of her new job reaches double digits without much effort. Thanks to Myne involving High Priest Ferdinand in a conflict between Lutz and his parents, Lutz's parents end up being aware she's spending time in the temple and are told to pretend they didn't see her there.
* Sen to Chihiro no Kamikakushi ("Chihiro's Journey"). It has a nice double meaning for those who already watched the movie.
* sent off to get them killed off means that Schaefer tends to go to them first if there is a genuine need for a group of inquisitors with a record for pulling off suicide missions.
* Sento himself gets hit with this briefly when all of Katsuragi's memories come back and all of his own disappear, so Katsuragi is essentially resurrected in his place. He eventually recedes to the subconscious and leaves Sento as the dominant personality because his final plan requires an emotional drive to active that he doesn't have.
* Sento. It doesn't matter if your insult is valid. It's the intent that counts. Only he can call him out on his crap because he aims for Sento to realize the pitfalls of his logic/actions/whatever, not to hurt him.
* Sentomaru uses a large Battle Axe which makes him resemble the folk hero Kintaro more, though he usually attacks with Sumo moves.
* Sentou Yousei Yukikaze above received much of its military advisors from) and recorded actual jet noises as they took off. Several officers from the JASDF also provided technical assistance on making sure the aerial lingo was accurate.
* Sentou Yousei Yukikaze and because all of the aircraft carried a finite and generally realistic number of missiles individually.
* Sentou Yousei Yukikaze back to their homeworld of Faery, where the JAM took such heavy losses they could never attempt to invade again. Humanity then began their own invasion of Faery. However, after 33 years of conflict, the goals of the invasion have become muddled and confused and the war has become a string of pointless battles where humans win against the JAM, the JAM adapt, new tactics are created, rinse and repeat. In the original novel, pundits and politicians back on Earth are becoming irritated with the Faery Air Force being a constant drain on funds, but have no idea what to do with them. And so the war continues for no reason.
* Sentou Yousei Yukikaze be remotely accurate is all pure speculation. It also does not help that they may or may not even have physical bodies, as the only thing the FAF has seen of them are their aircraft and the makeshift "runways" they use to launch from.
* Sentou Yousei Yukikaze has a spin-off in which the various fighter aircraft in the story are represented by cute girls.
* Sentou Yousei Yukikaze is green-tinged, with a double star system as its sun.
* Sentou Yousei Yukikaze, Jack puts his fist through a glass window when he learns that his CO willingly put Rei's life at risk.
* Sentou Yousei Yukikaze, JAM prevented humans from perceiving machines. Rei realized this when he heard the noise cancellation system emitting anti-phase

engine noise.
* Sentou Yousei Yukikaze than any RIO. The novel's translation changes the title from RIO to EWO (electronic warfare officer).
* Sentou Yousei Yukikaze, which is invisible to both the naked eye and regular radar.
* Sentou Yousei Yukikaze, which is where most of the FAF's forces live. It's got what you'd expect of a normal airbase "town", including shopping malls, convenience stores, public transport, and of course housing. It's implied that similar underground cities were built under the other 5 major FAF airbases.
* Sentry Busters, which specifically target Sentry Guns, run up to them, and explode them (along with anybody in the radius).
* Sentry Gun, restricted (well, without GM fiat) by Progress Level and how much it increases the base weapon's price.
* sent Skips to the moon, and Rigby attempts to dope punch him, but fails because he's too weak to send the message. Mordecai responds by dope punching him back.
* sent to die to help out actual trained guardsmen. Not that volunteers aren't commonplace, like most of the Imperium it depends on the world.
* sent to his family, who kept it in a jar. After the parents both died in an accident, the older brother held onto it.
* sent to the 4077th, and spent most of the rest of the show trying to pull strings and get back to a nice safe clean Tokyo hospital.
* sent to the Circle. A letter she writes to her sibling says that she's teaching younger mages, and one of them in particular looks up to her in this manner.
* sent to you can't sentence someone to death and then reduce the sentence for "merciful" reasons. At times, this happened simply to empty out their prisons, as they couldn't even hang people fast enough. This was far too often simply a slower death sentence—a huge percentage of enlisted soldiers died of diseases without ever even getting to see a battle, the mortality rates on both naval ships and especially transport vessels to Australia were horrible, and Australia itself was no picnic. Lots of people died in prison from "gaol fever" as well, before ever getting hanged. Therefore, even non-capital sentences could mean death functionally.
* Sent up, and mildly subverted in that only every other channel is showing the news and covering the story, while the other channels conveniently fill in the blanks in the sentences with unrelated statements. Eg:
* Senyuu., which Ruki accidentally uses to summon a host of demons when she mistakes it for a popcorn pot.
* Senzu Beans usually becomes this. Krillin becomes this in the start of the Android Saga due to having a whole bag of them.
* Senzus to eat while living there. This is backed up by Kami telling Mr. Popo it was hard to find food when he first arrived on Earth, before Demon King Piccolo split from him.
* Seo and the twins Hikari and Hibiki seem to have gone with this option, as have Sanada and his
* Seo has been mentioned to frequently go to family restaurants with Waka, and has invited him to the movies and an amusement park. Many of their classmates have also begun to suspect that there's something between them. Due to the ...
* Seok-woo to a point, since he manages to survive several close encounters with zombies despite being only a scrawny fund manager.
* Seonam Girls High School Investigators is about a group of teenage girls who solve crimes. Same goes for the series of novels that inspired the show.
* Seongmok is a serious and stony-faced boy who barely speaks at all, allowing his partner Dongha to fill up the space with his constant chatter.
* Seongmok is as sturdy as he is powerful, but has trouble keeping up with quicker opponents. Gerard reasons that the best way to fight him is to stay at range and hit fast when he gets close- however, he hits a snag when Seongmok easily absorbs his blows and counterattacks with greater force.
* Seongmok, one half of the Mok-ha Duo, always has a deep-set frown, marking him as the serious one. This is in contrast to his partner, Dongha, who is a

* Seo Taiji and Boys itself is an example, as they wrote the book that every Korean idol group would follow in the years to come — while only recording four albums from 1992 to '95 before Taiji went solo. Notably, one of the members of Seo Taiji and Boys, Yang Hyun-suk, went on to found YG Entertainment, one of the "Big Three" K-pop record labels.
* Seoul became the temporary capital of South Korea. It was pretty clear that the North would have wanted to capture the city for themselves since it was the political and cultural center of the peninsula for centuries, if it weren't for the armistice.
* Seoul yet again after decades later the Manchu invasions of Korea happened.
* Seo, who has tons of admirers who have never seen her face, was born on Tanabata (7/7) which celebrates two deities who are star-crossed lovers.
* Separate, but Identical news programs on different stations exclusively about crimes/murders/road-accidents, competing for the same time slot at lunchtime.
* Separated at Birth — Two (often but not always identical) twins are, well, separated at birth.
* Separated at Birth: America and Drakia. The US too owns most of the North American continent.
* Separated at Birth: America and Drakia, trying to assimilate every culture it comes into contact to into Anglo-American culture. Drakia, of course, tries to enslave everyone instead.
* Separated at Birth and lived very different lives, not to mention Wallace being the only one to inherit a degree of their father's condition... which only makes it stranger that this is what the team considers incontrovertible proof (Hotch even claims that the fingerprints can be faked, but apparently slightly twitching one's finger can't).
* Separated-at-Birth Casting: Actors who are not related, but look like they can be.
* Separated-at-Birth Casting: Two actors cast as relatives look a lot alike, despite not actually being related.
* Separated at Birth: Siblings (usually twins) get separated at birth and meet for the first time later in life.
* Separated at Birth: Two normally unrelated characters are revealed to be twin siblings raised apart from each other.
* Separated by a Common Language: American English and British English have certain differences in the terms used.
* Separated by a Common Language: Varying dialects of the same language, for example American English versus British English, may require separate localizations.
* Separated by a Common Language was not so lucky, and since 'bender' is used constantly in both versions, it can be quite amusing for British audiences. Interestingly, "bender" has a slightly less commonly used slang meaning for American audiences, which refers to a prolonged period of excessive alcohol (or other drugs) use combined with undesirable behaviour: eg. "to go on a three-day bender" would mean to stay obnoxiously drunk for three days straight. Not as funny as the British version, but still worth a chuckle.
* Separated by the Wall: A physical barrier to represent an emotional one.
* Separated by the Wall: Lovers meet up at a barricade that is separating them from each other.
* Separated from the Adults go on an adventure while still being fairly believable.
* Separately, Doctor Strange has mentioned that he studied there several times, suggesting that there was a
* Separately, her own biggest hit, 1983's "Total Eclipse of the Heart", was briefly overshadowed in the 1990s by a very successful dance cover by Nicki French. Nowadays French's version is mostly forgotten, however.
* separate, or such is the implication. Naturally, Meryl Silverburgh is surprised when Snake turns out to be rather coarse, rude and disdaining of her combat ability, as well as rather unhappy that he's involved in the mission to begin with.
* separate people. Per the chorus: "Illusion never changed / Into something real."

* separates himself into two (although he does have a butt and belly button). This also extends to the White Zetsu clones, which means the Allied Shinobi Forces are facing an army of 100,000 naked men.
* Separate Simpsons Geography Thing page should tell you all you need to know.
* separate Sonja's consciousness from Aden's body and return her to her own. This is also the point when the player can choose to continue playing as Aden or choose to play as Sonja from now on, and doing the latter means she will inherit all the levels the player has achieved with Aden. Except when it comes to his cooking level. Should his cooking level be below 40, Sonja will immediately jump to that level, referring to her cooking experience.
* separate species. Shiny variants avert this, though (except for Shiny Nidoqueen, which is greenish).
* Separate Tables involves Charles and Jean, a young dating couple who are staying at the hotel and, because they aren't married, have to deal with disapproving looks and gossip from the likes of mean Mrs. Railton-Bell. Charles for his part is a medical student who is cramming for an anatomy exam, while Jean keeps pestering him for sex.
* Separate Tables. She tells Sylvia what to do, what to eat, and what to think. She won't let Sybil get a job and she's determined to stop any hint of romance between Sybil and Major Pollock.
* Separate Tables, when in reality he never rose above the rank of Lieutenant and was a supply officer far away from any combat theater. See also the original play listed under Theatre below.
* Separate Tables who was caught hitting on women in darkened theaters. After Major Pollock comes down for breakfast, Sibyl's mom makes a show of leaving the hotel dining room, and demands Sibyl leave with her—but for the first time, Sibyl defies "Mummy", remaining at her seat and insisting on welcoming Major Pollock for breakfast.
* Separate Vocations" spoofs this when Bart is about to be run down by a car. After the break, the action returns with the announcement of "Act II: Death drives a stick" and Snake repeats his cry of "See you in hell, punk!"
* Separate Vocations Wiggum gives a pre-arrest one-liner to an unconscious thug named Snake.
* Separation: Most storyline NPCs are only meant to be interacted with one time each, leading to several duplicates of characters like Giorno and Bruno being scattered around the map (each representing a different stage in the plot). This causes one glaring inconsistency near the end, where Bruno reveals that
* separation of powers jurors can be said to be found in the general population and reflect what the "guy on the street" thinks.
* S. Epatha Merkerson, then was cast as Lt. Anita Van Buren beginning in season four.
* Sephiran. Can't be talked out of fighting the heroes, yet is happy upon defeat.
* Sephiran/Lehran. Or the end of the first game, depending on what tone you attribute to his last piece of dialogue.
* Sephiria Arks briefly demonstrates this to avoid a bunch of rapidly fired arrows at point-blank range.
* Sephiria, who has an unrequited crush on Caleb, chokes on her wine when Drake refers to Cornelia as the girl Caleb loves.
* Sephiroth, after listening to his recordings of Aerith's therapy and hearing how the One-Winged Angel kept returning and wearing down AVALANCHE until he beat them, finds the hardest liquor he has, lamenting that his Mako enhancements don't allow him feel more than a slight burn down his throat.
* Sephiroth also killed Cloud's mother, though it goes unmentioned in the original game, with Cloud being simply unable to describe to his friends what he saw in his burning house, though he is seen collapsing with grief in the flashback. Cloud does get to avenge his mother and Tifa's father as well as
* Sephiroth can actually fly, and Cloud was always, somehow, lifted by the strength of Sephiroth's blows. Justified since Sephiroth has enough
* Sephiroth clones, Cloud included, were subjected to Mako and Jenova cell

treatments similar to SOLDIERs. However, since they weren't screened for mental stability like normal SOLDIER candidates, Sephiroth Clones generally suffer severe personality breakdowns and become vulnerable to Sephiroth's mental control. They're frequently seen hunched in black robes, muttering disjointed phrases related to Reunion, Jenova, and Sephiroth.
* Sephiroth: Despite his more pronounced affability to Cloud in this version, Sephiroth does something in the remake that he didn't originally: he personally murdered Cloud's mother and uses it to torment him, telling him about how she begged him to spare her son and how he killed her with his own blade. In the original, she was another casualty of his burning of Nibelheim, and her death wasn't brought up again. He also mocks Cloud every time he fails to reinforce Cloud's frustration at the world over having no control over the direction of his own life to motivate Cloud into accomplishing his goals.
* Sephiroth differences between the two, before pausing, saying he's not qualified because he's just the guy who wanted to make a fun party game, and can leave the technical talk to the people who play in tournaments.
* Sephiroth form, can inflict multiple status changes on your entire party in one attack, including Toad.
* Sephiroth has a distinctive laugh where he will slump his shoulders & laugh with such force that he started to shake, a laugh he shares with his father, Hojo. He would also raise and spread his arms, and look up at the sky while giving speeches.
* Sephiroth has a mole on his left upper lip that draws attention to his
* Sephiroth is still handsome but legitimately monstrous, with a much more creepy and heavy-set appearance, with a mad stare,
* Sephiroth is the designated pretty boy, with silver hair extending down past his waist and two long forelocks framing his face.
* Sephiroth receives a magical dagger that can cut through any substance as a present from Yuffie in
* Sephiroth's Masamune is often portrayed as being absurdly sharp, often accompanied with
* Sephiroth's swordsmanship and overall prowess stands out even among the series' characters, which include several notable swordsmen. In one of
* Sephiroth takes homes the gold for speed, he liberally employs the
* Sephiroth that in the adventure mode's story erased the entire universe and captured the other fighters. In gameplay, Sephiroth doesn't have an easier time taking down Galeem than anyone else.
* Sephiroth was strongly implied to have suffered through this when his friends had died (or in the case of
* Sephiroth (who is not a reliable source) states that humans are descended from Cetra who abandoned their nomadic urge to 'settle the Planet, then move on', instead choosing to settle down. It is unclear whether he means that humans abandoned a hunter-gatherer lifestyle to focus on establishing settlements, as happened in the history of the human race in reality, or whether he means that the Cetra were nomadic
* Sepia, there are also four roles and two people. He's a young man; she's a prostitute who is nearly out of debt. As it happens, she's been writing him anonymous love letters, and he's been seeing her while wearing a mask to be with her. So, to recap, young man, prostitute, letter writer, man in mask. At the end of the story, he says next time he'll go without the mask.
* Seppuku, chopping off the samurai's head to finish him off after the initial self-disembowelment. This was so their suffering would be brief and to prevent the shame of showing pain.
* Seppuku: The ancient Japanese rite of committing suicide via stabbing one's stomach, as a means of atonement.
* Sept 15 2013 strip has Garfield watching a program and this comes up:
* Sept (7) is a collection of stories with wildly different themes, stories, artists and writers, with the only link being that they feature 7 protagonists. And when we say wildly different, here's a few:

* Septa Mordane is much less stern towards the Stark girls, and any time she reprimands them it's
* Septa Mordane's execution was not shown. Her severed head on the other hand...
* Septa Mordane was portrayed as stern and stodgy in the books, whereas in the TV show she's a more warmhearted and pleasant person, and more-or-less saved Sansa's life with her little
* Septarians was reduced to a hand and when we next see him he's gone up to his elbow.
* September 11, 2001 was an unseasonably warm and sunny Tuesday in many parts of the US. Numerous articles about the tragedy have discussed the contrast between the glorious late summer day and the carnage that unfolded. The attack itself took place between 8:46 and 10:28 AM.
* September 12, 1956: A cow-milking demonstration went wrong when the cow they brought in
* September 1930 cover with a glass sphere on their heads fighting humans without any helmet.
* September 1931 cover that are wearing clear helmets with full range of vision while fighting in space.
* September 1939 cover (but without fins). The foreground is the inside of a similar-looking ship, with curved windows and glasses, rounded edges everywhere (including the lever handles).
* September 1 is the first day of term at Hogwarts, so it's a date of much significance in the fandom, leading many to celebrate with rereads of the books, rewatches of the movies, fanart, and the like.
* September 1st, 2000: U.S. Presidential Election season draws near. In today's
* September 2016 has an arc involving a hacked payment processing machine at a brothel, "fining" cheap patrons and announcing their purchase history was now posted on the Internet. Even fans felt this may be "too extreme", so it was soon retconned into "random messages" inserted into the payment program.
* September 9, 1965 saw the city of New Orleans receive catastrophic damage from
* September: Anything having to do with kids going back to school (pencils, apples, rulers, blackboards, etc.). Or falling autumn leaves.
* September frightens November with a story about how a mother once wished her daughter into a raven.
* Septen speak in a very cryptic language portrayed in the textboxes as a bunch of symbols.
* Septerra Core, and she's so hot that total strangers will give her money or items.
* Septerra Core. Certain monsters — especially Thunder Cats (which, in spite of vaguely feline gait and ecosystem role, look more like stone rhinos) and various things marked as spiders and beetles which look very little like their Earth equivalents.
* Septerra Core. He built several robots of different types out of rubbish thrown down from Terra 1.
* Septerra Core: Helgaks is a domesticated species of animals that have certain aptitude to flying. Technologically superior race of "the Chosen" has battle fleets of ships which are essentially grown out of helgaks.
* Septerra Core, much of the Chosen's technology seems based on this. Their ships, armor, and even some weapons are grown from the bodies of specially cultivated Helgak, a highly diverse species native to the planet. The ships are partially alive in some cases. Maya's gun also has some organic components, which enables her weapon to actually grow its own ammunition, ostensibly granting it unlimited bullets.
* Septerra Core spell, the other causing numerous status effects). All summons conjure beings from the in-game mythology.
* Septerra Core splits your 9 characters into 3 teams in the final dungeon, without letting you choose team members. Conveniently, the characters that hate each other are together, which can make combats much more difficult due to in-fighting. This is also the only time in the game where you can have a party without the main

character, Maya.
* Septerra Core subverts the trope somewhat in that the prophesied date on which all of the planet's layers go into a position that allows access to the core is still many years away. Drama is provided by the antagonist destroying layers and messing with the planet's clockwork so that he can access the core during his lifetime.
* Septerra Core technology, magic fueled by the planet itself, genetic engineering and a pantheon of gods.
* Septerra Core. That said, most of Shell 7 is covered with bioluminescent plants/fungi, serving as the primary source of light IN that layer.
* Septerra Core. The Holy Guard of the Seven Winds, an order of paladin-type fighters from Shell Three.
* Septerra Core, the nation of Ankara uses this method to destroy its Shell 5 rival Janam, slamming the continent into the base of Shell 3.
* Septerra Core. The Resource Wars, the most recent of the wars between Ankara and Jinam. Also the war between Chosen factions that devastated Maya's hometown.
* Septerra Core. They even return after he fires them. He'd still rather have actual hands, though.
* Septerra Core was immune to insta-kill attacks and only flinched on high-power attacks. However, using the cloak spell prevented him from landing his one-hit party-kill attack against any party member.
* Septerra Core with hard exoskeletons. Despite their fearsome appearance, they aren't crazy or evil.
* Septerra Core you may lead lead Grubb and Led to start a romantic relationship witch each other, which rewards both of them with unique special attack.
* Septim propaganda to make them supportive of the Cyrodiilic empire. Other sources state that they were among the many human tribes native to Tamriel. In either case, they are definitely the precursors of the Imperials and Bretons, with the Nibenese Imperials as their closest living relatives.
* Septimus Heap after surreptitously climbing aboard the ship under the cover of the darkness.
* Septimus Heap, a ghost must remain in the place they died for a year and a day. Many other deadlines last a year and a day as well.
* Septimus Heap, all main characters and most of the side characters are white, though Hotep-Ra is depicted as being black.
* Septimus Heap are carnivorous (or man-eating). Other animals almost never mentioned.
* Septimus Heap are shown to have amazingly little concern for their children, barely ever helping when they are in trouble.
* Septimus Heap, both the bridge to the House of Foryx as well as the House itself are guarded by a Toll-Man and a DoorKeeper respectively.
* Septimus Heap: Boy 412, falls asleep in a heap of snow outside of the Wizard Tower, wakes up in the rooms of the ExtraOrdinary Wizard up in the tower.
* Septimus Heap, but they are infested with ghosts, wraiths, an enormous serpent, and all manner of evil stuff.
* Septimus Heap can be seen as this, since he's just lost his dragon and the control over the Darke Domaine and has barely anything to lose.
* Septimus Heap dead person in the Septimus-verse comes back as a ghost; it's just how things work there. Exceptions include:
* Septimus Heap doesn't exactly approve of being pitied by Hildegarde after her mother Sarah was trapped in the Darke Domaine. In fact, she runs away just to get rid of her.
* Septimus Heap does this to verify everything she hears, to the point that she doesn't trust anything that she hasn't eavesdropped upon.
* Septimus Heap: DomDaniel is referred to as a necromancer, but none of his abilities match the epithet.
* Septimus Heap, dragons are familiars to their Imprintors (i.e hatchers), as is the case with Septimus and Spit Fyre.
* Septimus Heap features first Septimus, then Nicko and Snorri in Queen

Etheldredda's Time and afterwards Marcellus Pye in Jenna's Time.
* Septimus Heap, for ostensibly no reason other than to disregard her warnings about a building danger in the Palace.
* Septimus Heap has always been ruled by Queens, but the world shows no signs of being anything but a gender-equal setting.
* Septimus Heap has an Observatory with a huge screen that displays a view of the countryside, including the Castle, and can be modified to see smaller objects.
* Septimus Heap has Zelda. All of her dishes are perfectly edible, if rather odd-sounding.
* Septimus Heap have the ability of talking. This leads to the establishment of the Message Rat Service.
* Septimus Heap is a very good example of this. He spends much time every day to talk to the unconscious Syrah.
* Septimus Heap is breaking out DomDaniel to take over the Wizard Tower and give him the ExtraOrdinary Apprenticeship.
* Septimus Heap is mentioned to be strong enough to tackle virtually anybody, but when he tries to attack Queen Etheldredda, she just swats him out of the way.
* Septimus Heap is set in a future so far that technology and magic are the same.
* Septimus Heap is this thanks to his Young Army days to the point that he becomes ExtraOrdinary Apprentice at the age of 10.
* Septimus Heap: Jenna isn't all too thrilled at hearing Septimus's detailed explanation of what the "Deadly Stinking Black Slush" is.
* Septimus Heap, Marcellus Pye is this owing to his old age of 500 years.
* Septimus Heap: Marcia Overstrand has virtually no life outside of her work as the ExtraOrdinary Wizard.
* Septimus Heap: Merrin Meredith does this to drown out the irritating wail of a Swamp Wraith.
* Septimus Heap often gets criticized for this, having an habit of not understanding the seriousness of a situation.
* Septimus Heap powers. Let's just say that if it has to do with magic and/or wizards, and it isn't somehow related to the number 7, it's because it's related to the number 49 (7x7)
* Septimus Heap: Septimus and Jenna are both 10 year old by the first book.
* Septimus Heap: Septimus and Simon, about the ExtraOrdinary Apprenticeship.
* Septimus Heap, Septimus is so suddenly woken up by Jenna that he does not notice the bunk above and bangs his head on it.
* Septimus Heap: Septimus is thrown over the edge into the Abyss surrounding the House of Foryx, but manages to grab a bridge stanchion. He is eventually pulled back up by Jenna.
* Septimus Heap, Septimus thinks that the ghost of Alther Mella would feel that flying through the heavy wind was like being Passed Through by pixies with boots on, though "How Alther knew what being Passed Through by pixies with boots on was like, Septimus had no idea."
* Septimus Heap series is either somehow related to the number seven (often the result of adding the numbers together), or an homage to something or other. There's even a list at the end of the first book.
* Septimus Heap series Marcia Overstrand, the ExtraOrdinary Wizard, is always dressed in her bright purple official wizard robes. Her shoemaker keeps a special purple snake to make her shoes out of its skin, much to his dismay.
* Septimus Heap series, several spells have suspicious names, such as one called "flashlight".
* Septimus Heap. She is usually the one who cares about people and prevents the others from ignoring them in their actions.
* Septimus Heap, Silas and Sarah Heap dream of Nicko and Snorri as the latter are walking across a snow-covered forest ... 500 years before then.
* Septimus Heap, since DomDaniel actually survives his jump from the Wizard Tower.
* Septimus Heap: Since ghosts can only go to places they visited in life, Alther cannot spy on the evil cabal's innermost workings since they meet in a converted former lady's room.

* Septimus Heap, since while the DoorKeeper of the House of Foryx doesn't allow Jenna and Beetle to enter even after they have resolved the puzzle that is The Right of The Riddle, they eventually get into the house with violence.
* Septimus Heap spell without its charm in order to escape from Dungeon Number One, and succeeds at it.
* Septimus Heap: Syrah Syara's diary ends with her reminding herself who she is while succumbing to the Syren's possession.
* Septimus Heap, the bank of Fog surrounding the House of Foryx conceals an Abyss.
* Septimus Heap, the fifth book mentions that people in the past traveled to the Moon.
* Septimus Heap: The Glasses for time-travelling were built without any backups, and the plans were destroyed to prevent replication. This not only caused the first prototypes to malfunction, it also prevented the repair of the main Glass.
* Septimus Heap: The painting of Queen Etheldredda, while not being a literal Soul Jar, serves this purpose for her and its destruction in the BoneFyre causes her ghost to disappear.
* Septimus Heap: The Palace is inhabited by mostly benign ghosts and has a generally run-down appearance, also because the Heap family is too small for it.
* Septimus Heap. The Task of Keeper's Apprentices entails cutting off part of these tentacles.
* Septimus Heap, this is about the reaction of DomDaniel when he sees Princess Jenna on top of the Dragon Boat's head when the Dragon Boat is attacking him.
* Septimus Heap, to the point that even the protagonists find it creepy.
* Septimus Heap. Unlike most man-eating trees, they hunt by grabbing their victims and draining them of their blood.
* Septimus Heap, we are introduced to Silas and see through his perspective frequently, and it seems as though he is going to be one of the main characters. But virtually all viewpoint character besides Jenna, Septimus, Nicko, and Simon are swept away for the vast majority of the series and only get a few scenes at most per book mentioning what they're up to.
* Septimus Heap: When Sally Mullin sees Silas and Marcia fleeing from the Custodians she thinks they are eloping. Sally also thinks Jenna was conceived by Sarah in an affair because Jenna doesn't look like Silas or Sarah (Jenna is actually secretly adopted).
* Septimus Heap, where Jenna is spooked by Septimus's face being illuminated by his Dragon Ring he's holding below his chin.
* Septimus Heap who slept past wake-up time are usually awakened this way and forced to sleep in the wet bed afterwards.
* Septimus Heap, Wizardry is color-coded: Purple is used by the ExtraOrdinary Wizards and their Apprentices, while bright green is associated with other Magyk.
* Septimus's thumb starts to inflate like a balloon after he's bitten by a spider in the Wizard Tower Library.
* Septon Jonothor eventually breaks with the Great Sept, unwilling to keep enforcing dogma over what he views as basic morality. Other septons in Essos soon follow his lead, creating a schism in the Faith.
* Septuplets, a sitcom/drama hybrid about 16-year-old septuplets who run an upscale beachfront hotel with their parents.
* Septycal Gorge (no longer a member because they effectively can't play live at all)
* Sepulchre: Leonie is naive and idealistic, something the villain uses to his advantage. It is also used as a reason why other characters keep secrets from her. Unfortunately, this is just playing into the villain's hands.
* Sepultura's "Ratamahatta" features creepy stop-motion animation and a plot that has something to do with voodoo zombies.
* Sequel Adaptation Iconic Villain: In an adapted work, an iconic villain from the source material is saved for the sequel.
* sequel adds the baby dragons (Scuttleclaws) who love to play and don't listen to anyone.
* Sequel: An installment of the series that takes place after previously released

installments.
* sequel because Juggernaut is too dangerous to fight on his own. Despite Cable's gun from the future do no real damage to Juggernaut, everyone still resorts to using small arms against him, even though they never work.
* sequel clear that you do not, under any circumstances, disappoint him. Not only does he have some of his henchdogs rip Nero's front paws off, he proceeds to urinate on the dog's face as he dies.
* sequel contains a similar point where Urist unleashes another tirade against some other elves. The fact that Urist seems to be on a hair trigger and can spew these insults/threats at the drop of a hat is pretty impressive.
* Sequel Displacement: The sequel is better known to audiences than the original.
* Sequel Displacement: When the original installment of a series is less known than the most popular one.
* sequel does the same ending again but this time an unknown mutant is watching them using a government laptop and surveillance equipment, and the mutant watching it closes the laptop in frustration.
* sequel duology starts with Supreme Commander Pellaeon testing a computer that's designed to read enemy movements and predict what they'll do next, the idea being that the computer would get hooked up to the turbolasers and they could finally get some use out of cloaking. Unfortunately, though not at all to his surprise, the Predictor isn't as good as advertised, though later he is able to use it to determine something about another set of attackers.
* Sequel Episodes on an island due to Homer crashing their plane on the way to their gig in Hollywood.
* Sequel Episode, "The Awkwardness", Gumball runs into Hot Dog Guy again when both of them are on the way to the store and their memories of "The Hug" come flooding right back.
* Sequel Episode to "Kamp Krusty" 24 seasons ago, joked about another followup called "Kamp Krustiest", 24 seasons later.
* Sequel Escalation: Attempts to make a sequel to have elements of the previous installment, but more of them.
* Sequel Escalation for help which don't kill anyone alone — unless the crate falls on someone.
* Sequel Escalation riders on Leviathans. Also, with Kingfisher modules, all dreadnoughts can carry some riders, though the dedicated carriers naturally do better.
* Sequel First: A sequel is localized before the work it was originally based on.
* Sequel First: A sequel is released in a foreign market before the first installment.
* Sequel Gap: A fairly long time passes between when an installment comes out and when its sequel does.
* Sequel Gap: There's a significant amount of time between the current installment and the last.
* sequel gives us an even larger and more advanced mothership that can actually land on a planet (taking up much of the Atlantic Ocean), drill to its core with a giant laser, and suck out the core. Oh, and its sheer gravity sucks up all the buildings in the area.
* sequel has this as one of the optional endings. Lose the final battle on purpose to see it.
* sequel heal all allies. There are others with this Modus Operandi, as well.
* Sequel Hook: A hint at a future installment. May or may not be fulfilled.
* Sequel Hook are not truly dead, but, in fact, possibly more powerful than ever.
* Sequel Hook!"), but all it does is prompt Stan to ask what the hell that has to do with anything.
* Sequel Hook ending makes no indication that Earth is doomed. The Super Mothership that arrives is so massive it appears to have more gravity than the moon, and when it lands on the surface of the Earth it covers roughly 1/4 of the surface. An object with that much mass that close to Earth would effect its orbit and fracture the crust. To say nothing of having rammed the moon on the way in, likely knocking

it out of orbit, or the mile wide hole it vaporized through the crust (and probably enough water to lower sea levels hundreds of feet) to within mere feet of the mantle.
* Sequel Hook episode "Trove". Morse is sure he's forgotten something. We're then shown a shot of what it was: A notebook was stolen from the crime scene after the police arrived, implying that the criminals can pull strings within the police force.
* Sequel Hook given that the storyline is continued in "The Origin of Species".
* Sequel Hook novel) with the last one taking the time to reference the other three.
* Sequel Hooks ends with a wolf spirit of some kind escaping its imprisonment and possessing Uncle's new intern, and Jackie chasing it as it races off into the night.
* Sequel Hook: The film ends by hinting towards the possibility of a sequel.
* sequel? If you had trouble beating the last boss of the game, then The Crimson King will wreck you without mercy.
* Sequel in Another Medium of this movie is followed up on in a TV show. Can apply for all mediums, of course.
* Sequel in Another Medium: The story of the original work is continued or expanded on in a different medium than that of the original.
* sequel is this, as part of his motivation is to save his crew. He even calls them his family
* Sequelitis: As the number of franchise installments goes up, the quality of them goes down.
* Sequelitis: Fans consider later installments of the franchise to become more inferior as more are produced.
* Sequelitis: The opinion that a film series has too many sequels, particularly because of the later installments declining in quality.
* Sequelitis, which ignores all of the preceding films with the exception of the original.
* Sequel Logo in Ruins: The logo for a future title is more ruined than the original.
* Sequel Non-Entity: A character can't make it for a sequel for a quick, justified reason
* Sequel Non-Entity - I hope the character who disappeared wasn't your favorite.
* Sequel Non-Entity must have happened to them to prevent their appearance in the sequel.
* Sequel Non-Entity, was never brought over from the ENCOM servers to begin with, etc.
* sequel of the remake has the specialist class, which has one ability branch that is outright called battle medic, which has several abilities to improve healing.
* Sequelphobic: When an announced sequel is not welcome, despite its actual quality.
* sequel, Raiden's fight with a pair of ninjas looks less like fighting and more like rhythmic gymnastics given the constant flips and twirls while both parties are over ten feet from each other.
* Sequel Reset: The resolution from the first story is undone for the sequel.
* sequel, Sara comments she was visiting Laurel's grave, and bumped into Ray who was visiting his fiancee's grave. Visiting both graves together became a ritual for them, and how their romance eventually started.
* Sequel Series about the hook, with a character asking a now elderly Katara about it and her explanation being cut off.
* Sequel Series ahead of modern robotics. X's systems are copied and reproduced as closely as possible, resulting in mass-production of Reploids ("Replica Androids"). Unlike their robot ancestors, Reploids are entirely capable of free will (which is why Dr. Light sealed X away for a time: he wanted to ensure his systems were free of errors that may affect his judgement) and some suffer faults and turn "Maverick". Repeated incidents results in the formation of the Maverick Hunters, who stop Maverick incidents before they get out of hand. The true 'war' of this

series kicks in when the leader of the Maverick Hunters, Sigma, is infected by the last creation of Dr. Wily: Zero. Zero carried Dr. Wily's other legacy; a virus that corrupts and destroys whatever it infects. Sigma infects several high-ranking Hunters and turns the Mavericks from isolated incidents into a fully organized force that aims to wipe out humanity for the advancement of the Reploid race, thus starting the "Maverick Wars". An interesting trait about this series is that every human views the Reploids free will as a glitch or misconception (as opposed to the intended result the Light was after) and there are strong hints that humans would brand disobedient machines 'Maverick' just to have them disposed of.
* Sequel Series, and a whole host of returning and new characters and an ever expanding list of absurd superpowers.
* Sequel Series, and by accepting yourself, flaws and all, you can drive it back and regain your senses. This is no easy matter, though, particularly since the Fog makes rational thought increasingly difficult.
* Sequel Series and his Equalists arrive at Tarrlok's hideout, and the ensuing confrontation allows Korra a chance to escape.
* Sequel Series, and the boat Korra travels on. Fortunately, the CG is very good and actually blends pretty well with the hand-drawn animation, so, while noticeable, the effect is not jarring.
* Sequel Series, and Zaheer loses all earthly attachments consequently.
* Sequel Series: A new series that takes place after the events of the original.
* Sequel Series: A series that takes place after or before the original.
* Sequel Series, as such vengefulness is against Air Nomad morality... and then praises him for his good technique while doing so.
* Sequel Series. Bolin, Meelo and Ikki's faces are especially hilarious.
* Sequel Series, but he's also a very capable scientist and engineer, and quite capable of building what he needs on the fly.
* Sequel Series, Camp Jupiter has Lares. Minor household Gods that are also quite common in Rome.
* Sequel Series confirm it, but they share an awkward look with each other.
* Sequel Series, Dr. Cain is the only human seen onscreen. Compared with the Classic games however, humans are frequently referenced and implied to be dying out due to the numerous rebellions by Sigma and Reploids (advanced robots capable of free thought) going Maverick (Reploids gone insane due to an error in their programming or simply declared as threats to society). Ironic in that it's the Maverick Hunter's prime mission to protect what remains of the human population and X and Zero fight for this goal, but their society is never seen.
* Sequel Series each consist of a Firebender, Waterbender and Earthbender. (Compare the police force, which used to be entirely Earthbenders, but is now more diverse).
* Sequel Series early artwork for Kya showed that she was supposed to have dreadlocks. In the final product she just has straight hair because it was easier to animate.
* Sequel Series Equalists. Nevertheless, there's still plenty of room for bending-based technology; power plants in Republic City are staffed by Firebenders using lightning to help power the electrical grid, and battleship cannons are primarily used to increase the power of bending attacks.
* Sequel Series eventually established this as the reason for his relatively short lifetime.
* Sequel Series follows up on this; the first chapter involves phone apps that let you quick-cast spells as a plot point.
* Sequel Series harder than it sounds). Mettai have no equivalent of Weavers- but they can also do things Qirsi can't, like summon animals from the earth, so it all evens out.
* Sequel Series has King Midas's house, which is filled with golden statues. Take a wild guess how they were made.
* sequel series has one mark considering herself an art expert and tastemaker because of a single year she spent at the Royal College of Art. It quickly becomes clear she couldn't tell a Rembrandt from a Monet if you put labels on them.
* Sequel Series has the titular Avatar Korra be an Arrogant Kung Fu Girl. Over four

seasons, this flaw and many others are broken down.
* Sequel Series has this effect, though by the looks of it, his grip is so strong he can even prevent people moving their eyes when he's really concentrating.
* Sequel Series have never gone anywhere because she doesn't want to actually commit to anybody but Mark, so she tries to finally move on and look for a relationship that will involve more than sex.
* Sequel Series, however, a new colony of Sky Bison has been found, which gives hope that the species can be repopulated.
* Sequel Series in this series, are happy to escape with what they have, plus their lives.
* Sequel Series is about Cory and Topanga's daughter Riley facing the same life challenges that her father did when he was her age.
* Sequel Series just to make himself a hero. His obsession drives him as far as targeting non-bending civilians to get his message across and threaten anyone who refuses to support him.
* Sequel Series Korra doesn't hesitate to say she was taught to heal by "Katara, the best there is."
* Sequel Series, Korra is for all intents and purposes a big sister to Tenzin's kids and she truly loves them but like all little siblings, they get on her nerves and embarrass her.
* Sequel Series, Kuvira puts all non-Earthbenders, as well as bandits and those that disagree with her, into "reeducation camps".
* Sequel Series lacking in as a sheltered teenager who had yet to meet a problem she couldn't easily solve via a physical altercation.
* Sequel Series, Modo's nephew Rimfire is given a redesign. While still having orange lightning-shaped highlights in his hair, he has a different hairstyle and his hair and fur colors are changed from black and greyish-brown respectively to completely pale brown.
* Sequel Series of how their show's fandom operates, this is almost undoubtedly intentional. In fact in the Book 4 commentary, they told people to write fanfic about Mako's relationship with Zuko's granddaughter because they couldn't fit her into the show.
* sequel series or even intelligent, just so chaotic that it seriously screws up any other EM waves (as well as biological systems) in high concentrations.
* Sequel Series, Shawn and Topanga refer to each other as "Mr. and Mrs. Cory" and Cory says that he's happy to be with his "favorite person in the world... and his wife."
* Sequel Series shows the dark side of Airbending that fans have speculated about since the original show: using it to asphyxiate someone by bending the air out of their lungs.
* Sequel Series, the anime started by covering the events before that, focusing on Boruto's early days as a student of the ninja academy, all to allow for more time for the manga to advance. The show doesn't reach the events of the manga's first chapter until around the 50th episode.
* Sequel Series the last thing we see of Iroh is him literally hanging off the statue of Aang by a piece of cloth. Seeing as how he shows up in the show again, somehow he managed to get down without falling to his death, it's just never shown.
* Sequel Series the swamp is where the new Avatar, Korra, finds that same Earthbending teacher her previous incarnation befriended now living there as a hermit.
* Sequel Series. The third was in Episode 22, due to the episode's unique ending that replaced the normal credits animation.
* Sequel Series, the titular protagonist only has to learn one element at the beginning of the series so her mentors don’t play too big of a role. Katara was her Waterbending teacher and a grandmother figure to her and gives her her blessing to go off to Republic City in the first episode. Her and Aang’s son Tenzin is her Airbending teacher with whom she lives for most of the series. He’s an uncle figure to her and plays this trope more closely than his mother.
* Sequel Series, the two team pets tradition continues with Pabu, the fire ferret

(red panda/ferret hybrid) and Korra's polarbear-dog, Naga. Naga can't fly, but she's at least as dangerous in combat as Appa was.
* Sequel Series the United Republic's citizens descended from, plus the usual societal advantages benders benefit from. By Book Two, Republic City's government has been replaced by a democratic republic with an elected president.
* Sequel Series: The window to Riley's bedroom might as well be a second door.
* Sequel Series true that the sun is a big ball of gas that the Earth goes around.
* Sequel Series was not actually the last Sky Bison, though he seems to have been the last of his particular subspecies.
* Sequel Series when Mako is trying to tell a despondent Korra how much she still means to him even after Amon has taken most of her bending.
* Sequel Series, when she ordered Tenzin to go on without her as she attacked the airships, leaving her to go down with them. In a double subversion, she fails to take down the second one, although she manages to stop their pursuit of Tenzin and his family.
* Sequel Series, where each of the main antagonists stands for an ideal, but takes said ideal too far, resulting in them becoming the villain.
* Sequel Series, where juvenile delinquents from across the country visit various prisons.
* Sequel Series, where Robin attempts to outwit Terra by using a smoke bomb, but it only lasts for a half-second and Robin remains in the same position.
* Sequel Series, where there is in fact an Earth Queen. The conqueror who takes over after she's assassinated is female as well. Ironically, both of these characters are evil, though in different ways.
* Sequel Series with the White Lotus serving in such a role for Korra as she's not yet mastered all the elements. This is dispensed with quickly, though the White Lotus does stay on to protect the world's only family of airbenders, as well as resuming their other responsibilities, such as protecting the world from dangerous criminals and promoting the public welfare.
* sequel, she rescues the Hawke family from the massacre of Lothering in exchange for a simple delivery to an area close by the city they already decided to escape to.
* Sequels: In the first game, depending on your chosen character, you can escape with the helicopter pilot, Brad, and optionally the other player character and a partner dictated by the plot — Barry for Jill, and Rebecca for Chris. Later games make it clear that all five characters survive the Mansion Incident, although Rebecca has never resurfaced outside of prequels and guest appearances in non-canon minigames.
* Sequel Snark: A movie jokes about the idea of the film getting a sequel.
* Sequel Snark, specifically in the "Jump Street Generations" segment.
* sequels. Not only are they actual starfish (well, starfish-like) but they speak with colors that come out of their 'heads' in a little fountain, and working out a way to translate them into speech is a major plot point — and turns out to be both very difficult and remarkably ineffective, due to the fact that they not only use a number of colors that people cannot see but also have a number of terminologies that simply do not translate at all.
* Sequel Song. The motivation to get Johnny back from Judy is as follows:
* sequels which fans do not regard as part of the series isn't in play, the installment generally has a fair share of defenders.
* sequel take them seriously, but he also doesn't even bother trying to prove them wrong or compete with them. He instead chooses to sit on the sidelines and watch as they tear each other apart.
* sequel, the Earth's entire satellite network was destroyed, so when they're anticipating a full-scale attack on Area 51, they use an antique radar that was going to be sent to the Smithsonian for display in order to detect the incoming fleet.
* sequel. There is a minute gap between the shield and the artillery barrel, so he holds out his hat to see just how sharp Moran's shot is, and gets a hole in it for his trouble.

* sequel, there is a scene in which a villain takes over the War Machine armor and attacks the president on Air Force One. At one point, he slams a secret service agent into the ceiling and then smashes him through a desk.
* sequel, they're shown engaging in bondage and roleplay, only to be interrupted by their daughter.
* sequel to Knights of the Old Republic (before it was rather aggressively scaled back) called for both Light and Dark Side players to suffer from this, as various party members either turned against you, sacrificed themselves, or were simply incapacitated by the Sith academy's hazards.
* sequel trilogy had been planned for over a decade, but it had to wait for a plot that all the major players (Spielberg, Lucas, and Harrison Ford) felt was worthy of the title character.
* sequel was able to stay in the Dahl military as long as he could, as his wife was his commanding officer. Eventually, however, his antics went a mite too far (specifically, leveling a building filled with terrorists, as well as a dignitary he was supposed to protect) and his wife made him go AWOL, as well as more or less divorcing him.
* sequel, we find out that Prime Green Arrow has decided to stay in the Regime/Insurgency universe (his double was killed by Regime Superman prior to the original game).
* sequel, when Harry makes them new bodies, Luna requests hers be over seven feet tall so she can be taller than Harry for once. Like Adrastia, many remark on her beauty, though she's considered less intimidating than the former.
* sequel. When Hinata protests that he's not the culprit, Komaeda not only agrees, but even explains why. It can be inferred that the only the reason Komaeda (who knows for a fact that Hinata is innocent and almost certainly already knows who the true culprit is) brings the subject up is to get it out of the way before the culprit tries to throw suspicion onto Hinata.
* sequel, where in addition to the above uses, it now highlights hiding spots, reveals secret glyphs, and plot-relevant NPC's you need to tail leave a glowy trail.
* sequel, which upholds this trope — Travis keeps all his beam katanas on his belt at all times in the sequel, most likely due to the above incident.
* sequel. While many people (over 3 billion = half the population of the world at the time) were killed during the attacks on cities, those cities were eventually rebuilt (except Vegas, which became a memorial). Two decades later, not only has humanity rebuilt, but we also have several bases throughout the Solar System. As pointed out by a number of people doing basic calculations, the more likely result of losing most major cities and half the population (especially in the industrial countries) would be a complete collapse of global society and the inability to restore it for centuries, if ever. People would be struggling to survive in a post-apocalyptic world instead of rebuilding everything as it was and building bases on the Moon.
* sequel who travel in a butterfly/manta ray style space ship that shifts between pastel, Easter egg colors of pink, blue, yellow, etc. When a character asks if these aliens might be hostile, Zenon replies, with no irony and a completely straight face, "Nobody could have a ship that beautiful and be evil." She was right; they were good aliens who saved their lives and repaired the space station.
* Sequence Breaking allows you to reach the Castle of Ordeals much earlier than thought possible, as well as get the airship very early. This has led to the Level 11 Class Change, which is only possible by running from all battles and fighting only the mandatory fights before Class Changing.
* Sequence Breaking and later 2D games (run until you get "charged", and then thrust in a chosen direction, jumping extremely high and possibly breaking some walls) are perfect translations of dungeon bypass.
* Sequence Breaking: Skipping parts of the game can sometimes cut down on run time dramatically.
* Sequences in the game include outrunning a tidal wave on a tricycle, riding giant bees, and a stage literally called

* Sequencing DeceptionThe work implies that two scenes happen simultaneously or one after the other, but the true order is completely different than we thought
* Sequencing Deception: Two events happened a lot further apart than the sequencing would apply.
* Sequential Art. After having received a letter by Julchen (the object of affection) encouraging him, he enters her house at night. She intentionally misled him however, and he ends up in the room of her aunt, who is NOT pleased. (Neither is he, but for other reasons.) Confusion ensues.
* Sequential Art as they're trying to play a 8-bits game for nostalgia value.
* Sequential Art: A supplemental Q&A with the characters has Scarlet talk about the time she used Art's marker pens.
* Sequential Art: At one point Kat and Vanity are below a mansion. Kat follows Vanity who insists there's an opening nearby and keeps marching as if possessed. Kat manages to pan her flashlight to her left just long enough to notice a decent collection of skulls.
* Sequential Art because it's either the only way he can survive when these problems pop up, or one of his friends gets involved and he has to go and help. He would call the police, but he knows they would never believe the story (he gets involved in some weird shit).
* Sequential Art But subverted a moment later: "Well stop rubbing your arse against me!"
* Sequential Art. Considering that Roger's very anatomy is female, as opposed to just having feminine facial features, it isn't clear whether he just looks like a woman or whether he actually is transgender. His wife, Jessica, is an inversion since she looks like a stereotypical overweight, bearded biker dude.
* Sequential Art explain that "retardium" is generated by willfully ignorant people, and exists in another dimension as a physical material. This material can be harnessed to sustain the aliens, who operate a reality television show to keep these people glued to their sets, generating plenty of retardium. The mechanics are spelled out beginning with strip #871.
* Sequential Art goes to kill a spider in the bathroom using aerosol deodorant and a cigarette lighter. He succeeds in torching the entire bathroom and singeing himself as well in strip #9. However, Pip only supplied the ignition source; moments before, Scarlet had used an aerosol can to drive that same spider out of the attic and into the bathroom in strip #462.
* Sequential Art has an interesting page... it starts on the page after the last one you read every time you go to it. This makes it much easier to get through the 1100+ strips in an Archive Trawl instead of one big Archive Binge.
* Sequential Art has four Squirrel Girls, who were subjects of a secret lab experiment. Their names all translate to a mix of letters and numbers, which are also color coded. Scarlet = 5C4R137, Jade = J4D3, Amber = 4M83R, Violet = V10L37.
* Sequential Art have been shown here and there throughout the series to have mutual interest in each other, but both seem unaware of this and too hesitant to do anything about it. Every time it gets brought up it feels like it's about to go somewhere, then doesn't.
* Sequential Art her old arch-enemy Hilary affably hanging out with her roommate.
* Sequential Art how one can return "a raisin-filled ball of foul-tasting hatred". Seems to be a natural solution, this.
* Sequential Art interface with true computer AI. They still have free will, if somewhat brainwashed.
* Sequential Art Jack launched an orbital laser cannon and used it to destroy a couple buildings, then Art accidentally made it target the tank Jack was driving, and (intentionally) pinned him to it. Later OZBASIC attempted to upload into that satellite.
* Sequential Art, Kat finds that she's been sleeping with her head in Art's lap... with her mouth in a particular spot. She's initially angry at him, thinking he was aware until Pip lets it slip that he wasn't. But before that, she's off to go brush.
* Sequential Art loses the ability to use any piece of technology, once he's told

that "artists radiate an anti-technology energy... and the effect gets 100 times worse when the artist knows of the energy's existence."
* Sequential Art of her to commit that image to paper, it only made her want to see it more. In a panic, he sketches out a more-tasteful-but-still-sexy design for her which she loves, but she still coyly calls him a coward for not drawing the original thought. She also likes to needle him about his more erotic illustration work and the stash of porn on his computer.
* Sequential Art: Pip "borrows" a few really, really big guns from the denizens living in their basement — only to discover that they have a range of about four centimeters. He even lampshades it.
* Sequential Art, saying that its her fault that Kat was taken, and that she's scared and doesn't know what to do. In what is probably the only display of genuine affection he has shown to Scarlet thus far, Pip says that Quinten must pay for making Scarlet cry.
* Sequential Art strip #299 recounts how Joviel Jakovitch was hanged for high treason. His corpse cast no shadow. Later, his autonomous shadow led a revolt of the shadow-men, which obliterated Pypingrad. He and his minions subsequently migrated to the UK.
* Sequential Art Thus calling into question whether or not the first time was real or not.
* Sequential Art with.) However, armor and swords cost money, which is earned by obtaining treasures. Pip lampshades his dilemma, then solves it by killing grasshoppers to level up.
* Sequential shifters comes in two flavors: press up to shift up and press down to shift down or press up to shift down and press down to shift up. Motorcycles are almost always the former (racers do the opposite). Cars will zig-zag.
* Sequential Symptom Syndrome: A character displays symptoms as they're listed.
* Sequential Symptom Syndrome: Someone recites the symptoms of a malady while someone else shows them in the order they're being recited.
* Sequinox accepts the offer to join the Sky Queen and end up taking over the world.
* Sequinox. According to Sargas' character notes, he has a little garden that he tends to despite also being an omnicidal star.
* Sequinox, and by extension, the Sky Queen who commands them, simply want to eliminate all life in the universe. And have very nearly succeeded.
* Sequinox arc 2 land the girls in a cowboy dimension, Chell gets two revolvers that shoot fireballs.
* Sequinox are shadowy beings that serve Scorpius, but have almost no peronsality and only exist as cannon fodder for the Sequinox girls to attack before getting to the Stars themselves.
* Sequinox, but Sid claims to have come from a town where the only thing they celebrated was surviving the winter, and it's very possible she has killed someone.
* Sequinox can control earth, and buries the school in dirt in episodes 3 and 4 to prevent any students from escaping.
* Sequinox can control heat and has a flaming sword. The stars Antares and Scorpio also have fire powers.
* Sequinox can disarm a smoke alarm using a rug, a knife, and duct tape. Her mother's a little concerned at how she already knows this when she's only a teenager.
* Sequinox can dish out a decent level of damage, but has next to no defence and therefore has to hide behind her Scorpie minions.
* Sequinox can provide plenty of support, and eventually learns some defensive techniques, but he's not nearly the fighter that the Sequinox girls are.
* Sequinox can summon large waves thanks to her beach theme, usually in the form of her Misirlou Beach Blast attack. In the monster world from the Gemini Arc, Winter's ice powers are replaced by murky seawater.
* Sequinox characters have them. Yukiko, aka Yuki aka Winter, contains "Yuki", the Japanese word for snow. Hannah, aka Spring's name is phonetically the same as "Hana", meaning blossom in Japanese. And of course her last name is also Flowers.

* Sequinox costumes rather than their usual outfits. Notably, any instance of a rose on their costumes has been replaced by a cutout of a star - as in, the symbol of the Stars that they've been fighting.
* Sequinox covered in Scorpie goo, before getting it washed off by Summer's special attack. She considers both equally bad.
* Sequinox doesn't like being called by her full name, Rachel. So of course her high-school nemesis Hannah calls her that whenever she wants to get a rise out of her.
* Sequinox doesn't often hang out with the rest of the team willingly since they're all less popular than her, and when they force themselves into her social circle she doesn’t have a choice but to grin and bear them. However by the end of the first arc she's come to appreciate them, even if she doesn't often let it show.
* Sequinox episode “Inferno" is set during Halloween, with the main fight occurring in the middle of everyone trick-or-treating.
* Sequinox episode "Inferno" are bad, but the way that Sid is killed takes the cake for the worst one. She is crushed underneath Chell's body, who is being used as a make-shift weapon by Scorpius.
* Sequinox girls are sent to in the Gemini Arc is based on Venice Carnivale, where everyone is wearing feathered masks like Vivaldi's.
* Sequinox girls face, Antares, is cute, small, pink, and also almost destroys them.
* Sequinox goes out of her way to mess with Hannah, whether it be forcing her to hang out with "unpopular" kids or creeping up behind her while she's meeting with Ethan's mom.
* Sequinox has a habit of going off on strange and often creepy tangents, and jumping to precisely the wrong conclusion when presented with any situation. She did roll in dirt and fake blood for her werewolf halloween costume, and demanded to hide in a doghouse to transform despite the team already being hidden from public eye.
* Sequinox has figured out who the Sequinox members are and subtly lets them know he'll keep their alibi.
* Sequinox has one between each pair of episodes during which the team fights low-level mooks, while the episodes themselves focus on bigger battles with stars and constellations.
* Sequinox has their own variant with elements of their theme incorporated, but are always nebulous starry humanoids without any features
* Sequinox has the team fighting the stars of one constellation, with the constellation attacking them once they've defeated the other stars. The first arc has them face Antares, Sargas, Shaula, and their leader Scorpius.
* Sequinox has this in her outfit. It's also present in Chell and Hannah's gym outfits (Syd mentions it looks like they're trying to have an ab contest).
* Sequinox have the power to clap the heroes into other dimensions, and uses this power to constantly keep them off-balance.
* Sequinox. He bullies Caiden in the prequel comic, and his nasty personality carries over to the noir world in episode 11.
* Sequinox in "a font". Because they're in a television show, with a budget and made by people.
* Sequinox in the middle of his opening monologue about how it's nice to be humanized despite being an undying star. He finishes the monologue before even noticing.
* Sequinox is able to consume anything inorganic because it's not part of the Earth. Technically this means it's supposed to eat trash, but in the end it eats basically anything put in front of it except for food. And Tootsie Rolls.
* Sequinox is a nightmare behind the wheel. Though she at least insists on everyone wearing a seatbelt, at the same time she believes traffic signs are more of a suggestion. Yuki will do whatever she can to avoid driving in the same car as her. On the upside, the Chell Danielson Guarantee is that you'll always arrive somewhere on time, no matter how late you leave.
* Sequinox is not very bright, which is unfortunate because it's supposed to be the

girls' mentor. It can vaguely remember some things, but most of the time when they ask it questions about Gaea, their powers, or the Stars, Tellie just shrugs and says "I don't know". And then probably eats a dinner plate.
* Sequinox is the most physically combative of the team, and she's also a delightful teenage girl.
* Sequinox. It slowly regains memories, usually right after they could have been useful.
* Sequinox land the girls in a 1950's-themed world in episode 10, Shannon describes it as the 50s that the 80s remember, with no racism or bigotry and only the aesthetic remaining.
* Sequinox monsters—though they're not responsible for the kidnapping.
* Sequinox occurring rather than actual damage to their ship, to Gemini and the Gemmies looking like people in bad costumes.
* Sequinox, several stars come off like this. Part of it comes off as them trying to awkwardly work human concepts into their conversations despite not understanding how any of them work. Antares is happy that she gets to talk to people instead of just destroying the planet right off the bat. Sargas is very polite when he tells the students of Vertumnus to turn over the Sequinox girls or else he'll kill everyone.
* Sequinox She even does her eyeliner with a knife! And her mom is the same way.
* Sequinox, Sid cites the title of that and the previous episode during her internal monologue.
* Sequinox starts out very cold and snooty towards the other girls, especially Chel, but over time she warms up to them. Slightly.
* Sequinox-style 70s sci-fi set. Yes, it's specifically designed to resemble a shoddy, dated, tv serial.
* Sequinox team lands in an 80s prom world at the end of episode 15, with gaudy fashions to match.
* Sequinox that is one of the stars with bright red skin standing around amongst a group of human newsies in episode 12.
* Sequinox, this happens to Chell when she feels anxious, because she's usually super-chill and doesn't normally feel anxiety. She needs Yuki to calm her down.
* Sequinox, this is what you should expect from a bunch of teen magical girls. They tend to mock and insult the stars they fight against, even if it's not the best idea and the stars have already stated they're here to kill them.
* Sequinox, this joke is made when Spring and Antares both show up wielding whips.
* Sequinox, Vivaldi and Chell have a robotic arm and leg, respectively, in the post-apocalyptic world.
* Sequinox, Vivaldi shows up to power up the Sequinox girls as they're being beaten down by Antares in their first fight.
* Sequinox wears a pair when she drives. Tellie gains a pair when its near her as well. Sid has a pair of aviators that she shares with her player Cassidy.
* Sequinox wears a Venetian mask with a large plume of read feathers coming out of it.
* Sequinox when they first properly meet. Mainly because she listened to him talk about what it's like being a star while the others either hid or tried to hit him with chairs and doors.
* Sequinox, which features the Sequinox team getting thrown into various multiple alternate worlds. Early on she declares that all the worlds they're going to are "fake" simply to avoid thinking too hard about it. Ultimately subverted, however, as the girls do start taking steps to not make things difficult when their alternates are brought back into their own worlds and actively ensure that their allies understand the situation in places where their lack of knowledge has major impacts upon the world.
* Sequinox wields a whip made of vines and flowers. Antares also has a whip.
* Sequinox with her gloves. Spring gains this power in the gothic horror world from the Gemini Arc.
* Sequinox world, the girls spot foot soldiers from stars that they'd yet to fight. In the Sitcom world they also see the stars themselves, but since it's only in a

title sequence they go too fast to get any details on them.
* Sequinox world which is also based on Victorian England. The group has trouble figuring out how things worked "back in the now".
* Sequoyah as well as many of the Cherokee was amazed at the "talking leaves" that Europeans had; that is, writing.
* SERA 00 features many girls who were fans of idols or SERA00 before becoming members.
* SERA 00 Harley Breeze manages to keep all details of her past completely hidden not only from her fans, but also from her fellow members of the titular group.
* SERA 00 has Alura Land, usually called Luraland. She loses her voice extremely easily, so in order to conserve her voice, she never speaks. Instead, she writes on a tablet and uses sign language to communicate, only using her voice to sing.
* Sera and a more level-headed Inquisitor are a lesbian version of this trope.
* Serafina has the title character and her male friend perform a duet they had been planning for the entire movie for a school concert. The problem is, by this point, their school has been burned down by the white police, so they're performing for an invisible audience in the rubble.
* Ser Alliser Thorne bullies his recruits and encourages bullying among them, though he claims this is necessary to toughen them up.
* Ser Alliser Thorne is the member of the Night's Watch in charge of training new recruits. He gives insulting nicknames to his recruits, for instance "Ser Piggy" for fat Samwell Tarly and "Lord Snow" for the highborn
* Ser Alton Lannister is a huge fan of Ser Jaime Lannister. He states that the one day he squired for Jaime was the best day of his life. Jaime, in turn, confesses to Alton he's an Ascended Fanboy of
* Sera-Lys McArthur (Kodie) and Meeghan Fairbrother (Owen) are Indigenous Canadian as well.
* Sera Myu: A planet called Vulcan is said to be on the other side of the sun.
* Sera Myu has Bloody Dracul Vampir, daughter of the Vampire Count Dracul and Le Fay, a human woman.
* Sera Myu musicals. Sailor Astarte, Space Knight, Lemures Baba, a whole bunch of new Shadow Galactica members...it'd take too long to name every new character introduced.
* Sera Myu show, there's a gag where one of Queen Beryl's henchwomen mocks her for "Wearing the same dress for 20 years".
* Sera Myu used the plot of Galaxia resurrecting Queen Beryl quite a few times. Sometimes she was with the Shitenou, sometimes not. Once she was resurrected with the Amazon Trio instead. Also, many plots were pulled from the Anime or Manga, but this is to be expected.
* Sera Myu, when Rubeus is introducing the evil Droid copies of the senshi, he says that the Droid copy of Sailor Moon was a failure. Coming onto stage last, it's shorter than any of the other senshi or Droids, flails about erratically when it moves, and behaves generally immature when facing off against Sailor Moon.
* Sera Myu. Yamato left the role after five years, with her last musical having Mamoru going to Harvard as a plot point, which makes him a college student played by a 40-year-old actress.
* "Ser" and "Sera" are the Komarran descendant of "mister" and "miss" in the
* Seraphic Blue inverts this. Vene, the main party member, is still struggling with nihilism and barely survives a rare disease in the ending while the other party members seem to have found far more peace of mind.
* Seraphim are described as having to constantly conceal their true forms with their wings, lest they incinerate anything that gazes upon them.
* Seraphim Call makes good use of this format, devoting one episode to each of its 11 central characters and having them all meet in the last one.
* Seraphim Call passes out whenever confronted by men (even over the vidphone). It is so bad that she lives in isolation, and wears a special suit that inflates as a cushion whenever she is passing out.
* Seraphim have also been mentioned, though none have appeared in the story. Rumisiel describes them as beings of pure flame with six wings, and even more

powerful than a Cherubim. When he talked to Vashiel about a Cherubim appearing on Earth, the one thing they instantly agreed on was "Could be worse. Could be a Seraph."
* seraphim women with many of them unwilling. These women are so abused by him that he has to post guards to prevent them from killing themselves to get away from him. With even some of his own guards disgusted at his horrific lust.
* Seraphina. But when Comonot, the dragon general himself, transforms for the first time in forty years, he is fascinated and confused by all human emotions, not just love, and demands that Seraphina explain his feelings to him.
* Seraphina dragons' muscles are soft, and their wings incapable of flight, for the first few minutes after transformation.
* Seraphina dragons must stay in their saarantras around human territories.
* Seraphina, Goreddi Princess Glisselda is giggly, silly, spoiled, scarily misinformed about the dragons her country is no longer at war with...and a highly capable leader when it comes to the crunch.
* Seraphina has various saints collectively known as Allsaints, who reside in Heaven. They are patrons of particular skills, jobs or traits, and generally infants are granted a saint to be their patron, similar to Christian saints. Allsaints are worshipped in churches and prominent saints have cathedrals. Because there is no higher power as in God for Christianity, Allsaints are pretty much on equal footing.
* Seraphina: Revolves around the tenuous, uneasy alliance between dragons and humans.
* Seraphina, Seraphina suspects that Viridius, the elderly court composer, and his protégé Lars have this sort of relationship, and it’s ambiguous for a good part of the novel. Lars is definitely an adult and at least older than Seraphina, but the age difference is at least several decades.
* Seraphina: Staying true to the Western European feel of the setting, first cousins Prince Lucian and Princess Glisselda of Goredd are engaged.
* Seraphina, though she can no longer experience the emotion, Linn still remembers her love for Claude once returning to dragon form, and wants it back.
* Seraphina. While the details are left ambigious, they seem to end in a stable polyamorous relationship, and the companion novel implies that Glisselda will raise Seraphina and Lucian's child as her own child by Lucian.
* Seraph of the End a couple times. There's even fanart of Mika dressed as a prince carrying Yuu who's dressed as a princess.
* Seraph of the End acts perverted towards her but when Goshi tells her Guren wants to see her in a swimsuit (actually Goshi wants to see her in a swimsuit and he knows Guren is indifferent towards perverted things and is more focused on gaining power and fighting vampires) she cries out "How dare you ask for something so lewd!" She then blushes and asks Guren "Do you mean it?" as if considering it.
* Seraph of the End and playing mind games with those he likes, unfortunately for Krul, Mika, and Yuu.
* Seraph of the End, a power-hungry sadist with a disturbing fixation on children.
* Seraph of the End appears to be one for Kururu. He waxes poetically about how beautiful she is and how much he loves her even after she cuts his arm off and expresses her contempt for him.
* Seraph of the End are widely agreed to be of better quality than the main manga. The fact that Takaya Kagami is already an author helps immensely.
* Seraph of the End "Awah! What's with that cute reaction?" while blushing and saying he thinks he knows now why Mika is so attached to Yuu.
* Seraph of the End. Crowley notes in the novels that Ferid has the kind of beauty that corrupts people and tells the group in the manga that he feels bad for them (because Ferid wants to be their friend) as he's exhausting with all his antics and mind games.
* Seraph of the End example can be found in chapter 46 with Yuu and Mika. When Crowley comes to start trouble Mika tries to encourage Yuu to run because he doesn't want Yuu to become livestock again. Yuu says he won't because he'll fight fate this time and last time Mika became a vampire when he abandoned the others.

Mika says that was his fault but Yuu disagrees and says it wasn't and says he'll fight together with Mika and they'll both leave with the others. Mika grabs Yuu's sleeve from behind and says Yuu's plan would just end up with the same result as his past one, with Yuu's family killed. Yuu is insistent that Mika gave them a future. He asks for Mika's help and Mika agrees with his plan despite his hesitance.
* Seraph of the End for dramatic purposes involving both being orphans with the rest of the orphans who they considered family being killed before their eyes by the vampires that enslaved them. They cling to the other's memory to use as a source of strength in order to find the other again. However, both can get pretty unhinged when it comes to the other possibly being separated from them again.
* Seraph of the End forms a contract with, has made it clear that should Yuu's will waver, then Ashuramaru will happily take over his body.
* Seraph of the End has a lot of homoerotic subtext, mostly between Mika and Yuu in all its adaptations.
* Seraph of the End has the centuries-old vampire Ferid fixate on him at age 16.
* Seraph of the End headbutt while holding each others faces in both hands in the opening.
* Seraph of the End. He's an effeminate vampire but he has a horrible personality that leads people of both genders to be wary of him, and for good reason. In an omake, Crowley, the one person who can stand him, willingly kisses him while both are at work and requests they go in the back to continue where they left off.
* Seraph of the End Kimizuki. When Yoichi asks him why his face is all bruised up Yuu responds that he walked into a telephone pole.
* Seraph of the End. Krul saved his life by forcing him to drink her blood mouth-to-mouth and only shows her affectionate side towards him. She even risked her life and position to keep him and his fellow Hyakuya orphans safe, until Ferid massacred most of them. Likewise, Krul is the only vampire Mika cares for.
* Seraph of the End Mikeala blames himself for the death of his "family" as it was his naive plan that ended up getting them all killed. Alternatively Yuu also blames himself for the same incident, though not to as much extent.
* Seraph of the End novels when Ferid jokes as he approaches a prostitute's corpse that he finally gets his chance to copulate with a corpse. He sticks his fingers into a prostitute's neck wound which Crowley finds lewd but then he reveals he was just reaching in her neck for a needle which they can use as evidence in their investigation into the murder.
* Seraph of the End Omake 1 for season two, when Mika asks Krul to tell him why she wants the Seraph of the End, she whispers into his ear. However, she's literally just saying "whisper, whisper", making Mika asks her to repeat herself. About the third time he asks her to repeat, she whispers, "About Yuuichiro, actually—" Followed by a long censored beep. Whatever it was she said, it caused Mika to have a fully red face and then promptly pass out while his soul happily ascends to heaven. Krul is amused.
* Seraph of the End repeatedly make jokes about this towards each other.
* Seraph of the End: Shinoa loves riling up other people, especially Mitsuba and Yuu. She gets called out on this by Guren, who tells her that continuing this behavior for her own amusement will get someone killed.
* Seraph of the End) that he's justified in taking Yuu back because the humans are using him. He mellows out considerably while showing mild feelings implied to be jealousy as well as protectiveness whenever Yuu initially brings up anything in regards to his new family and later Guren. There's also the times Shinoa (who has a crush on Yuu) holds Yuu in an intimate manner or gets close to Yuu to which Mika looks incensed at and yells at her.
* Seraph of the End: Vampire Reign: Earth's population is decimated by a virus, and the survivors are attacked by monsters or enslaved by vampires. Elite members of the army are able to make contracts with demons to earn phlebotinum weapons which are the only things capable of killing vampires.
* Seraph of the End. When he makes comments that suggest he means to make Krul submit to him or that he wants to suck Yuu's blood he usually follows it up with

"It was just a joke."
* Seraph of the End when we find out that Yoichi may have a secret affection for her as well.
* Seraph of the End, whose physical abilities can't be matched by any human fighters, even those armed with the most powerful demon weapons. Therefore, they have to resort to teamwork and tactics in order to defeat lower-ranking Progenitors. Fighting higher-ranking ones is practically suicidal in most cases.
* Seraph of the End with Mika and Yuu occasionally acting like this to each other.
* Seraph of the End with Yuu and is depicted as being a very loyal and caring friend. He also has stalker tendencies towards Yuu in the Serapuchi comic and he's portrayed sympathetically with many fans hoping they get together.
* Seraph of the End: Yuu in the beginning when he shoots Ferid in revenge for him killing his family.
* Seraph (semi-retired warriors, act as gatekeepers to Heaven and headquarters command staff)
* Ser Arthur Dayne sword Dawn. Jaime Lannister tells Ser Loras Tyrell, "I served with Ser Arthur Dayne, the Sword of the Morning, who could have slain [all six of the other current Kingsguard] with his left hand while taking a piss with his right."
* Ser Arthur Dayne, the Sword of Morning, was this as well. Eddard Stark considers him to be the best knight he ever met, and everyone recognizes him as the greatest knight of his time. Jaime idolized him in his youth and considers the day he witnessed Arthur's fight against the
* Seras and Alucard's guns qualify as well, having been named after Baron Vladimir Harkonnen from
* Seras Victoria burns herself when handling silver bullets in the second episode of the anime. Later in the same episode, she jokes about burning herself with silverware. It's not clear if this is the case in the manga as well since she always handles her silver bullets while wearing gloves.
* Seras Victoria gets it later on when she becomes a true vampire and regenerates her eyes. The effect is enough to terrify a horde of Nazi vampires. They're right to be frightened, considering
* Seras Victoria is offered her freedom by Alucard, but refuses to leave her vampire master.
* Seras Victoria manages to pull this off very well. Her standard persona is a
* Seras Victoria, meanwhile, is a solid Vaporizer. The Harkonnen (her
* Ser), a title indicating that one is a knight. Clegane is likely referred to as this as a courtesy after being appointed to the Kingsguard, for which knighthood is typically required, though he has steadfastly refused to be knighted and holds much contempt for knighthood after seeing many knights, particularly his brother Ser Gregor, butcher the innocent when they're supposed to be symbols of honor and glory.
* Sera will bluntly turn down a male Inquisitor and then change the subject. If she is flirted with again after she and the Inquisitor become friends, she more tactfully says that the two of them are too much alike because they both like girls.
* Sera will give a nickname to a female Inquisitor who romances her. If she's not romanced, in her diary she dubs
* Seraxa turns this back on Jake in book 2, calling him He Who Needs A Haircut.
* Ser Barristan finds himself pondering all the various kings and princes who acted on their own feelings and unwittingly brought misery upon the realm. He also reveals The Mad King would have rather wed
* Ser Barristan Selmy begins training a couple dozen squires in Meereen, all of whom used to be slaves in the city that were freed when Daenerys took the city. He ends up knighting a couple near the end of
* Ser Barristan Selmy, hoping to put Daenerys Targaryen off the idea of carrying on with the sellsword Daario Naharis and commit to her
* Ser Barristan Selmy is the last living member of King Aerys' old Kingsguard, if you leave Jaime Lannister out of the count, and can easily defeat younger

adversaries.
* Ser Barristan Selmy, Lord Commander of Robert Baratheon's Kingsguard, is near the age of 60 and generally held as the last representative of a bygone age of chivalry and heroes. He's quick enough to kill two guardsmen without a weapon and is also no slouch with a quarterstaff. According to
* Ser Barristan Selmy - one of the most morally upstanding characters - eventually discards his sword in favor of an epic staff, befitting his transition from general badass to
* Ser Barristan Selmy's age grants him a wealth of experiences unmatched by almost anyone living.
* Ser Barristan Selmy storms off in defiance at being forcibly retired in "The Pointy End", but reappears to join Daenerys in "Valar Dohaeris".
* Serbian ballad "Wise girl outwits Marko" ("Devojka nadmudrila Marka") is about a poor girl who is asked to be a wife of three folk heroes, Marko Kraljević, duke Janko and Ustupčić Pavle. They all come to her house on the same day to get married, followed by thousand wedding guests each. Marko comes with a test: each hero would put a blanket in front on himself and put his golden signet ring and a golden apple on it. Whoever's ring or apple the girl picks up she will marry. The girl doesn't touch anything and tells the following "Goodbrother Marko, Godfather Janko, The apple is a child's play, the golden ring is a sign of a hero. I will go with Ustupčić Pavle." Marko gets angry, because she didn't choose him and he had failed to trick her. He reveals that if she so much as touched an apple or a ring, he would have cut her head off, because she would have revealed herself as greedy and foolish wife.
* Serbian Epic Poetry, duels often start with both combatants using spears, then they go through maces and swords in some order, before ending up using their bare hands (and, on at least one occasion, teeth).
* Serbian noise musician Dead Body Collection adopts this as part of his stage act.
* Serbia's 2010 entry, Milan Stanković, is a man, but from the way he carried himself and dressed for the show, many were also confused.
* ser bonita (to be pretty at the moment, by dressing up for example).
* Serdar Somuncu, he has nothing but scorn for Turkish nationalism (even going so far as making deprecating jokes about Atatürk, a major no-no for patriotic Turks), thinks immigrants who wish to replicate their religious or family life from back in Eastern Anatolia are idiots and gave up his Turkish citizenship as a young man. Part of his comedy is him playing with being "hyper-integrated" and still being perceived as "dangerous" or "foreign".
* Serdar Somuncu type comedy (he started by doing dramatic readings of Hitler's Mein Kampf) makes him a frequent guest on both comedy shows and serious political Talk Shows - especially when Turkey is in the news.
* Ser Davos Seaworth, a common smuggler raised above his station that's so loyal to his king that he makes a point of avoiding the ass-kissing behavior others display. His boss appreciates this so much he's repeatedly
* Ser Davos Seaworth grew up in Flea Bottom as the son of a crabber and was a smuggler. However, Stannis knighted him as a reward for smuggling food into Storm's End, then later gave him other titles like Hand of the King. In the TV series, Stannis tells him, "You'll be the first crabber's son to ever be the Hand of the King." All this before he even learns how to read.
* Ser Dontos, whom he used as a catspaw in order to smuggle Sansa Stark out of Kings Landing, and his accomplice in Jon Arryn's murder, Lysa Tully.
* ser draws its distinction in definition from meaning something more like "to be a certain way at a specific time." In other words, "ser buena" most means "to be good inherently," whereas the most literal translation for "estar buena" could be "to be good for the moment" and not necessarily as a regular thing. This suggests that Spanish-speaking cultures are probably at least somewhat aware of beauty's tendency to be fleeting and superficial, and have therefore linked it to temporary and superficial goodness in their language. The connection—however tenuous—between being physically attractive and being morally upright is

still there, however.
* "Serebii" (real name Joe Merrick, ironically provided by a page about him on rival
* Seregios flies in at high speed, with your only warning being the whistling its
* Serena and Ruri duel against Yuya, who was entering his Awakened state after a villain threatened Yuzu. Serena and Ruri's monsters actually back away and whimper in fear of Yuya. Yuya unleashes Odd-Eyes Raging Dragon, who viciously destroys every other card on the field and attacks the girls with an inferno.
* Serena Bishop, introduced as a 15-year-old in October 2003 even though her father David had been last seen in May 1988, still single.
* Serena Blandish, Constance Collier had to make a dramatic entrance with two colossal greyhounds. Perhaps unwisely, Miss Collier and the dogs waited to make their entrance immediately behind the doors through which they were going to enter. When their cue came, the doors were flung open and the hounds, accustomed to starting races in this manner, tore off across the stage (dragging their holder behind them) and out through the fireplace, allowing Collier only a split second to duck to avoid decapitation!
* Serena can be this if you choose to invest in Spears, but in Part 2 she can also be this
* Serena Deeb had her head shaved bald on her Smackdown debut when she joined
* Serena Deeb was abruptly released from WWE while in the middle of a red-hot storyline. The reason was that the company was annoyed at her being seen drinking and getting rowdy in public - when she was supposed to be playing a Straight Edge character on TV.
* Serena, despite her limited progression as a battler and her lateness to discover a goal, has sparsely failed in
* Serenade Your Lover, who arranged the Tina Turner cover himself after Daniel Levy wrote it into the script, is a musician himself.
* Serena discovers the ability to become completely undetectable when in a "bad situation."
* Serena is set in the Smoky Mountains, but was filmed in the Czech Republic.
* Serena is this to Iris, who is one of the least popular female companions to date. While Serena is not without her detractors for her
* Serena Joy's pre-Gilead profession is changed from ultra-conservative televangelist to
* Serena lying that it's homework — which Haruna is still excited to see as Serena's notoriously lazy.
* Serena refuses to leave the log cabin for various reasons throughout the game.
* Serena/Sailor Moon herself was recast with Terri Hawkes after Tracey Moore had originated the role for the first 11 episodes, however Tracey returned for Episodes 15 and 21 because the dub was recorded out of order.
* Serena's Eevee wore a ring of flowers on her head. When she evolved she became a Sylveon, which is usually male but has a very pink and frilly design that makes it look effeminate.
* Serena uses a Lunalight deck which contains female Beast-Warrior-Type monsters. Her deck shares some parallels to
* Serena will change according to what/how much the protagonist has remembered. There's also a framed poem on the wall that will change depending on the current tone of what he's discovered.
* Serena Williams has been stuck at number #2 in total Grand Slams (only one behind Margaret Court) since she beat her sister, Venus, for the Australian Open in January 2017. She was unknowingly about
* Serena Williams shows up briefly on a party, and then in the White House, as herself.
* Serena Williams went into the 2015 US Open having won the last four tennis majors and being the overwhelming favorite to complete a calendar-year Grand Slam (i.e. winning all four tennis majors in a single year). Everything seemed to align for her in the semifinals with her opponent being 43th-ranked Roberta Vinci who had a 0-4 record against her and Flavia Pennetta taking out 2nd-seeded Simona Halep in

the other semifinal...then Vinci
* Serendipitous Fate exchange with Marinette when she asks what he's thinking about.
* Serendipitous Survival: Luck keeps you from being where you would have died.
* Serendipity: Dean and Courtney, according to Jonathan, though they eventually split up. Dean tries to fix things up, though.
* Serendipity for no particular reason by testing how badly fate wants them to be together (The answer: Fate wants them to get together REALLY badly).
* Serendipity. It was in fact marketed with this tag line: "Destiny with a sense of humor."
* Serendipity, Jonathan and Sara meet each other only briefly before they're separated for six years and become engaged to other people. Despite all this, they clearly keep holding out hope of finding each other again and ultimately break up with their spouses-to-be. For someone they had about fifteen minutes of interaction with many years ago.
* Serendipity, Jonathan seems to be fairly uninterested in his own wedding, enough so to be running after some other woman in the crucial days before. Even after he thought he lost Sara, he realizes that he doesn't love Halley.
* Serendipity, Jonathan Trager and Sara Thomas meet in Bloomingdale's after grabbing the same pair of gloves as a Christmas gift for their respective partners but end up falling for each other.
* Serendipity Next Door in which all of the prospective love interests live in the same apartment building as the protagonist. One of them, Masaomi, occupies the apartment immediately next door to hers.
* Serendipity Next Door Masaomi in her rush to get to work, and then meets Izumi later the same day when her bicycle tire goes flat in the middle of a downpour, prompting him to offer her an umbrella and let her leave the bike overnight at the pet store where he works rather than have to wrestle it home in the rain. Subsequently, she discovers that both men live in her apartment building - Masaomi next door, Izumi right across the hall.
* Serendipity Next Door not only has no sense of direction, he can't even read a map to save his life. The protagonist has to guide him from their apartment building to a nearby convenience store on several occasions, as without someone to show him the way he tends to end up wandering helplessly around outside the building trying to figure out which way to hold the map.
* Serendipity Next Door. The other residents of the building mostly seem to ignore this preference.
* Serendipity Next Door, the protagonist is rushing to work on her bicycle when she accidentally collides with Masaomi, getting her breakfast all over his shirt in the process. Only later that day does she discover that the guy she plowed into was not only her neighbor, but actually a famous musician.
* Serendipity: Sara believed that destiny should determine whether or not she and Jonathan should be together. At first...
* Serendipity: Sara's best friend Eve knew Halley in college. Unbeknownst to to Sara and Eve, Halley is going to marry Johnathan (Both Sara and Johnathan fell in love with each other the only night they met together a few years back).
* Serendipity: The leads Jonathan and Sara meet five days before Christmas. It's winter again when they find each other at the end after years of separation. It snows when they are together at the skating rink.
* Serendipity, the leads meet one another for one night, get separated, and then found each other again.
* Serendipity the Pink Dragon, humans are the main threat to the island (except Bobby).
* Serendipity. The two romantic leads have just met when they both try to grab a pair of gloves off a display stand in a store at Christmas. While they're trying to decide who should get them another man comes in and picks them up. They tell him to stop, saying that the gloves were a very important gift for someone.
* Serendipity works on a similar principle, where the generated ethnicity has one hair color (or a narrow range) and one (or at most two) eye colors, in addition to

skin tone and quirks of physique. A milder version of this trope.
* Serendipity Writes the Plot: The ending was improvised because Stanley's daughter was actually on the set that day and he wanted her to be happy.
* Serendipity Writes the Plot: The work's decisions are because they had to work around limitations.
* Serendipity Writes the Plot: Where a real-life production difficulty affects a work's storyline.
* Serengeti: Kali is exiled in the first episode for having cubs with a male from outside of the pride.
* Serenio is described as attractive and quite tall, reaching Jondalar's chin (Jondalar is 6'6").
* Serenissimi (apparently it didn't occur to them that the police would wiretap the phones of a group of convicted terrorists).
* Serenity action sequence they brought him (namely, the Maidenhead incident where River's assassin programming was triggered).
* Serenity actually do have Plot Armor in the form of Passive Joss, which is a form of involuntary luck that sometimes stops them being hit by throwing freak events in the way.
* Serenity. After the Operative has several of the Serenity crew's havens destroyed he talks to Captain Mal on the Wave (FTL radio). During the conversation Mal tells the Operative they won't be talking long enough for a Wave trace (which would allow the Operative to locate them) and turns off the communications device.
* Serenity a junker — Alliance ships are the junk vessels to her because of their (dangerous) lack of engineering logic.
* Serenity and Endymion, both royalty as it turns out. While it seems that Endymion is supposed to be the knight, in practice they flip back on forth on who is being protected, and who is kicking butt to protect the other.
* Serenity as disguise. The late Shepherd Book had the "honour" of being the centre on Serenity's nose. It worked, as they went through the Reavers' territory and back, and survived.
* Serenity. (As far as anyone knows, the bars themselves are harmless.)
* Serenity. As the final fight is approaching, Simon gives a solemn confession to Kaylee (that he regretted never having sex with her), which seems like it would lead to one last kiss. Rather than responding with a kiss, she cocks her gun and excitedly declares "To Hell with this! I'm gonna live!"
* Serenity at various pre-screenings held across the U.S. were at the forefront of keeping the spoilers (and THE spoiler) under wraps in an odd form of self-policing.
* Serenity, Badger and his men show up to lock down the rest of the crew and keep them from doing anything disruptive (that could harm Badger's "standing in the community"). The crew spend most of the rest of the episode cooking up an elaborate plan to distract and overpower Badger and his men in order to ride off and rescue Mal. They're just about to swing into action...when Mal shows up, having successfully gotten out of the situation on his own.
* Serenity: Better Days miniseries involves the crew raiding a buried money cache that turns out to be several thousand times more valuable than they thought.
* Serenity, but he makes sure to paralyse his victims first so that he can kill them immediately after his speech.
* Serenity but no real stand-out moment. This was fixed in a comic series that takes place before the movie, just to twist the knife.
* Serenity, but once Mal gets the opportunity to fight dirty, he lands a few good hits. It doesn't do much, and it's only Inara's flashbang disguised as incense going off in the nick of time that stops the Operative from killing them.
* Serenity, but then he's not so much walking the fine line between genius and madness as playing jump-rope with it.
* Serenity by shooting him. The villain then stands up (not being an idiot, he saw that coming and wore body armor) and resumes.
* Serenity by Simon saying "Eta kuram na smekh," Russian for "That's for hens to laugh at" (i.e. "That's ridiculous.").
* Serenity, causing Mal to ask if he's made him angry (referring to their

conversation in the Companion training house). Luckily for Mal it appears to have been a stun gun.
* Serenity comics that are set after the movie, due to her husband Wash dying in the film.
* Serenity confirms that the ships fighting were technically in the atmosphere of the nearest planet.
* Serenity death. Ultimately she ignores them, and leaves cover to shoot the Reavers at point blank range and fight them hand to hand. This results in both the others being able to provide less adequate cover fire (out of fear they'll hit her) and her being injured. Jayne is then forced to leave cover to drag her to safety, further limiting how much cover fire is provided.
* Serenity decidedly loopy and out of the fight after a few minutes. It probably helps that she was hit right in the neck.
* Serenity did cameo in the R.Tam Sessions, a short film that served as promotional material that depicted River Tam at the Academy undergoing interviews by a faceless "counselor" played by Whedon. She eventually stabs him in the throat, leading to some jokes that River finally got revenge for all the other characters Joss has killed or tortured over the years.
* Serenity does this nicely, as exemplified by this round of dialog, as the crew is starting to question what they are doing in the face of a much greater threat than normal:
* Serenity: Early in the movie, the Reavers are shown doing this to the town that the titular ship's crew are busy swindling.
* Serenity features a spectacular and noisy battle between an Alliance fleet and a Reaver fleet, which actually took place in the upper atmosphere of Mr. Universe's planet.
* Serenity franchise takes place, they don't have the manpower to provide effective security everywhere. On a lot of the more sparsely populated planets and moons they contract out to private companies.
* Serenity has a four-part chain of opening sequences, before finally getting to a title card - that fades into the insignia on the titular vessel's side.
* Serenity has Miranda, a planet that was a failed attempt at creating a utopia by dosing the population with a chemical designed to curb their violent impulses with the ultimate aim of doing this to every world. The result is a ghost planet filled with abandoned buildings, the corpses of people who became so docile because of the aforementioned chemical that they laid down and died, and those who had the exact opposite reaction to the chemical, becoming the cannibalistic and psychopathically violent Reavers.
* Serenity has to make a dead-stick crash landing at Mr. Universe's complex.
* Serenity: He doesn't witness it, but Mal is nonetheless horrified by Kaylee's description of her, um, dry spell:
* Serenity, he drops the calm, soft-spoken demeanor that he has exhibited throughout the movie and screams in terror:
* Serenity herself are referred to as pirates on occasion. And for good reason, as they commit several acts which can definitely be defined as piracy during the course of the series.
* Serenity his presence to Inara by coming to the convent she's in, slipping up next to her as she kneels in front of a Buddha, and asking it for things, ala a child's letter to Santa Claus:
* Serenity: 'I don't know what an "ion cloud" is, we just made that up but I would have sold all my knowledge of science to get that scene.' (paraphrased)
* Serenity" if he fails to save Kaylee, who is laid up with a nasty gunshot wound after being accidentally shot by the Fed trying to bring Simon in, since Simon had refused to treat her unless Mal got them away from the Feds:
* Serenity improvising a line that was so like what Whedon would write that fans were convinced it had to have been scripted.
* Serenity Inara wields a bow that has lights on it. The RPG explains that her weapon is more properly termed a "bolt-thrower", a bow upgraded with Alliance technology to where it fires arrows with nearly the force of a bullet.

* Serenity in the balls is because she's already been hammered plenty of times prior to the movie, and, well, she doesn't even have a set to be kicked in anyway.
* Serenity In the movie alone, each member shows just how badass he/she can be... although Book's moment of awesome badassery happens off screen.
* Serenity, in which the staging of a scene shows River framed by a swing engulfed in flames.
* Serenity is boarded by a bounty hunter looking for River. The hunter's ship could actually be seen in the background in the previous episode, although its significance wasn't immediately apparent.
* Serenity is certain death, the assumption being the victim isn't going to get picked up. The book jokes that if a player insists on damage measurement for being spaced, the GM should pick up every die on the table, roll them, and count the results as wounds.
* Serenity is damaged and Mal needs his pilot Wash on the bridge. Wash's wife Zoe was seriously hurt in the accident and Wash wants to be with her.
* Serenity is Russian for "That is laughter for chickens" or, more literally, "this is for the chickens to laugh at", an idiom meaning "That's ridiculous."
* Serenity. It's a variant on this in that the only "authority figures" around had the report buried, since they were responsible for the whole thing, but Mal is determined to get the message out in order to speak for the people who died there and strike a serious blow against the Alliance.
* Serenity, it's so utterly horrifying you start to understand why he doesn't do it more often.
* Serenity it's the "No more running. I aim to misbehave" speech. Simon and Jayne even share a drink during it.
* Serenity (it was technically in the upper atmosphere of Mr. Universe's moon).
* Serenity kick off the grand finale by firing a harpoon right through one of the heroes.
* Serenity later in the film is also unusually luminescent but otherwise free of artifacts.
* Serenity: Leaves on the Wind cut through Denon's entire head, front to back.
* Serenity: Leaves on the Wind didn't take. The camp doesn't need walls—anybody who runs away will die in the desert—and the guards are purely symbolic and don't bother intervening in inmate brawls.
* Serenity: Leaves on the Wind, this time with River manning the Firefly's controls to rescue Zoe from an Alliance supermax prison.
* Serenity: Leaves on the Wind through Denon's entire head, front to back.
* Serenity: Leaves on the Wind" who threatened to rape Kaylee. As before he captures most of the crew, but then:
* Serenity, Mal attempts to call the Operative out on his ideal of creating a perfect world. The Operative fully admits that he has no place in the world he is trying to build.
* Serenity melee destruction in order to make it more difficult for her to remain in hiding.
* Serenity moment, as Summer Glau really was capable of doing this. The only reason the beam on her right foot exists is because she was slightly too short for the width of the corridor, so the beams were used to narrow the distance.
* Serenity, Mr Universe is married (for all we know, this might be legally binding) to a "Pleasurebot". Well, he calls it that; it appears to be an inanimate sex doll with a tape recorder installed.
* Serenity. Near as an attentive viewer can determine, Operatives are given functional carte blanche in the service of the Alliance.
* Serenity. Of course, it's worth noting that this was probably more of a reprieve for the troops.
* Serenity opens with one of these. "This is the captain. We have a little problem with our entry sequence, so we may experience some slight turbulence and then... explode."
* Serenity parking a Chimera APC in the hold of Inquisitor Vail's shuttle as it was about to take off, with bare inches to spare between the front glacis of the tank

and the back wall of the hold.
* Serenity pulled off the post office version, hitting a trade station and making off with, ironically enough, the pay for the security guards who were supposed to stop them. Mal mentions that the crime won't be investigated too heavily since it's out in the boondocks and the company will hush it up — if they let it get out that they couldn't protect their own wages, they sure as hell won't get any customers lining up for security contracts.
* Serenity resembled nautical vessels more, but that's likely because they're meant to operate in atmospheres as well as space.
* Serenity: River's psychic powers let her detect the incoming Reaver ship as it's descending through the atmosphere.
* Serenity: River's rampage in the Maidenhead bar is definitely one of these.
* Serenity: River Tam has been programmed to go on a killing spree when a subliminal signal, hidden in a Fruity-Oaty Bar commercial, is played.
* Serenity: River Tam. She's a teenage girl and a genius skilled in everything, and she's also a psychic. She's messed up because the Alliance played with her brain and turned her into a super soldier.
* Serenity Role Playing Game has two perks of this nature, "Friends in High Places" (for connections in society's elite) and "Friends in Low Places" (for criminal underworld connections). You can roll a die to get your contacts to help with problems, difficulty dependent on the magnitude of the request (e.g. a small loan is an easy roll, getting the Feds to back off is harder).
* Serenity Rose, important characters have coloured hair in the otherwise mostly black-and-white comic. Furthermore, sorcery is generally coloured to show that it is abnormal to the world around it and also to help identify who made it.
* Serenity Rose of many of the soldiers sent to stop it. Another witch, who never consciously used his powers at all, supposedly created 100 giant fire-breathing metal horses to crush Napoleon's army. He was of course burned alive, being a witch in the 19th century and all.
* Serenity Rose. They also may be immortal, or at least can live for hundreds of years. Witches are extremely rare, and of the 50ish in the world some don't even use their powers; "good Christians simply don't do such things, you know."
* Serenity RPG, a male character who takes the "Non-Fightin' Type" complication will be this by definition.
* Serenity RPG assumes that characters can perform the basic operations of any vehicle, but more complex operations require a proficiency skill for that type of vehicle. Taking a ground-car down the street to a store? Yes. Getting a freighter through a pitched space battle unscathed? No.
* Serenity RPG has characters buy their skills as they go, the justification being that we find some new facet of the character's backstory at that point.
* Serenity RPG has this as the character trait "Things Don't Go Smooth". As a Minor Complication, once per session the GM can make you re-roll and take the lower of the two rolls. As a Major Complication, the GM can do this twice per session. Worth mentioning: Malcolm Reynolds' character sheet has the Major version.
* Serenity sequel comic, Mal is held up and told to drop his gun. He does, but before it hits the ground he kicks it into the face of his attacker, and it turns into a shoot-out.
* Serenity series) has a scene where a frustrated Kaylee gripes that "going on a year now, I ain't had nothin' twixt my nethers weren't run on batteries!" Much to the dismay of most of the crew, who were standing near her when she mentioned this:
* Serenity shows the crew finding a World War II era German Flak 30/38 20mm anti-aircraft gun and strapping it to the ship's hull to pass as reavers
* Serenity, Simon is shot in the stomach while trying to assess an injury Kaylee has just taken. As Inara tries to stem the blood flow, he dictates the medication he and Kaylee will both need for their respective injuries.
* Serenity-skilled killer who seems to favor his long blade as more of a personal style choice that anything else.
* Serenity: Smugglers Fanty and Mingo do this when meeting people, probably to throw them off guard. Mal isn't fooled. According to him "Fanty's prettier".

* Serenity's "pulse beacon" and launch missiles. Mal responds by tossing him the beacon in question.
* Serenity's relations with the public this usually means hurting people... or on the rare occasions when things down't go off the rails, standing around looking hard and deterring anyone from starting trouble.
* Serenity starts with Simon breaking his sister out of the Alliance research facility where she was being experimented on. On viewing a recording of it, the Operative and the lead researcher discuss Simon's motives and the fact that he pretty much threw his life away to do it. The scientist thinks it's insane, but the Operative points out that he's motivated by love, which makes him even more dangerous.
* Serenity: "Start with the part where Jayne gets knocked out by a 90 pound girl, cause I don't think that's ever gettin' old."
* Serenity's very own invocation of this trope - a disposable can of junk designed to send out a fake distress call if the crew need to create a diversion.
* Serenity tabletop RPG, it's established that while gold isn't worthless, it's not worth a whole lot either. Platinum is the currency of real business; gold and silver are pocket change.
* Serenity: The crew is being chased by a Reaver ship through a giant space battle. After some technical difficulties they manage to make a rough landing. Wash starts to repeat his signature line for the movie, congratulating himself on landing with no power to speak of, when a huge metal spike crashes through the cockpit window and takes Wash right through the heart, killing him instantly. Turns out he didn't lose the Reavers, which are still after them and the crew is still utterly screwed.
* Serenity the crew is robbing a bank and there's a brief shot of Zoe shooting a security camera as they walk in guns drawn.
* Serenity the flawed nature of humanity is one of the central themes of the series.
* Serenity the government-contracted security firm on a rim planet, knowing that they'll face minimal problems from the Feds later because the security company will never admit to letting their own payroll get stolen from them.
* Serenity. The Operative bugs out from an exploding Alliance ship using a one-person version.
* Serenity, the Operative didn't really need to come after Mal on his own, even if his Alliance support had their hands full fighting the Reavers. And yet, after failing to blow Serenity out of the sky due to said Reavers' arrival, he insisted on following Mal through an obstacle course with his sword.
* Serenity, The Operative embeds a coded signal in a Fruity Oaty Bar commercial in order to trigger River Tam, so he can discover her location.
* Serenity, the Operative is a secret government agent who represents the Alliance's interests and carries out their plans to use extreme measures to create a better world. The government elite who give him his orders remain unseen, so he's the closest to an overarching villain in the movie and presents the biggest threat to the heroes.
* Serenity, the Operative is sent after River because she picked up the secret of Miranda, which has been buried for twelve years, from the heads of top members of the Alliance's Parliament who came to the Academy to see her. The nature of the secret in question means that Parliament wants more than anything to keep it buried, even if it means River must die.
* Serenity: The Reavers. Actually, it was BECAUSE their minds were warped that their bodies are so messed up (self-mutilation).
* Serenity, there's a hidden button leading to a clip about and showing the Fruity Oaty Bars ad.
* Serenity, the ship gets a Reaver makeover so it can pass through Reaver-infested space. In this case it works, until they deliberately blow their cover to draw the Reavers after them.
* Serenity, the ship is disguised as a Reaver ship by covering it with bones, blood, and corpses.
* Serenity - they became hyper-violent and very aggressive, becoming the Reavers.

* Serenity, the younger sister of Joey Wheeler, ends up going blind after her eye surgery turned out to be a failure
* Serenity. This happens twice between Captain Mal and River Tam: the first time in the bar after River has demonstrated her martial arts abilities, and the second after River escapes custody and goes to the bridge.
* Serenity to paint him as a pervert) to discredit the message (Mr. Universe was already dead by the Alliance's hand when the message was sent; Mal just used his equipment).
* Serenity to "say something Mal would say." The result was the perfectly in-character line, "Faster! Faster! Faster would be better!"
* Serenity to she could have escaped at any point. She instead stayed there because the rest of the crew were terrified of her.
* Serenity uses his version of the Vulcan Neck Pinch, the subject is paralized, but able to move his eyes enough to watch himself fall on the sword the Operative is holding. Not cool, dude.
* Serenity was deliberately filmed using old camera lenses to give it a more old-time Western feel.
* Serenity ways that he could still be alive (being impaled through the chest with a giant wooden harpoon being a fairly definitive death) as pressuring the filmmakers to go back and change the movie's final sequence to have Wash survive somehow ("he can just be trapped offscreen during the final battle!"), as though it would have been possible/cost-effective to bring back the entire cast and crew, remake the final thirty minutes of the movie, and have it ready for the movie's September release, which at that point was three months away.
* Serenity when a guard at the bank the crew is robbing asks for a password. Jayne fires his machine gun.
* Serenity. When Inara contacts Mal about her "local trouble," she mentions that it's cool where she is, since Autumn is starting at her location on the Companion planet.
* Serenity when she collapses in the streets of Miranda, screaming a frantic prayer in Chinese.
* Serenity. When the unnamed female scientist on the video is attacked by a Reaver, it drags her down out of sight and we hear her screams as it rapes/kills/eats her.
* Serenity, where Inara appears to do little during the Mal/Operative fight (after her initial attempts to help Mal ended up with the Operative casually tossing her aside), only to be revealed that her earlier "praying for Mal" by lighting incense was actually arming a flashbang.
* Serenity where Simon briefly suspects that the mysterious "Miranda" could be an alternate personality of River (as it turns out, Miranda isn't a person at all). A couple of seconds after he raises the possibility, both of them burst out laughing at how ridiculous and cliched it would be.
* Serenity, where the female crew gets banged up pretty badly, though mostly in areas away from their faces.
* Serenity, who he put in an inescapable death trap. Then he let some of them live.
* SERE School, for survival, evasion, resistance, and escape, is given to military members who might be taken prisoner by enemy forces. Most people who go through it regard it as the worst part of training they experience. There are three levels of SERE training conducted depending on an individual's military occupation, rank, and probability of capture. Most of the training that takes place in at the highest levels of training is classified, and those who go through it aren't always fond of discussing it. It is commonly told that graduates are given a rabbit to kill and eat during exercises. Other exotic foods are on the menu as well. If you can catch 'em.
* SERE training operates on the theory that the only realistic way to prepare people to endure torture is to torture them for real. For obvious reasons they avoid using methods that inflict permanent physical or psychological damage, but that still leaves a tremendous amount of room in which to be
* Sergals are such a popular species that they have gain a small amount of attention even outside of the furry fandom. They originated from the Vilous

setting, created by a pair of Japanese furry artists. Sergals have traits of sharks, wolves, and raptors. The Vilous setting has other races but none of them are anywhere close to the popularity of sergals.
* Sergeant Adib Julian and Company Sergeant Major Eva Kosutic in the
* Sergeant Aethelstan Harlech fits the core of this trope while subverting a lot of the expectations. He's loyal to his men and they to him, and he's always in the mud and blood with them, but he is
* Sergeant Agun Soric, a suspected psyker being revealed to have had his one remaining eye sewn shut and his ears removed to make room for a cybernetic augmentation designed to improve his powers after being discovered by the Inquisition..
* Sergeant Avery Jr. Johnson was one for the entirety of the war. Assigned to train a squad of the planet Harvest’s colonial militia shortly before first contact, Johnson was able to escape the planet with a handful of his militiamen before the covenant glassed it, with the soldiers under his command, notably one Wallace Jenkins, enlisting in the UNSC Marine Corps.
* sergeant bitch to you", which seems to just be for the sake of the punchline.
* Sergeant Colon also talks about his time in the armies. He mentions one commander who made them form up in arrows to march on the enemy, as that's how they were depicted in his books.
* Sergeant Colon and Nobby Nobbs are benign versions of this trope. Colon is the sort who will clamp the wheels of a bunch of horse carts next to a restaurant on trumped-up parking violations, in hopes that its owner will offer him a meal to deal with the problem, and maybe give some useful information while Colon eats. Nobbs is prone to petty theft of anything lying around, but a decent person aside from that — as Vimes notes, Nobby has "a criminal mind, not a criminal soul." These attitudes wouldn't be tolerated in the modern Watch, but Vimes keeps Colon and Nobbs on for a number of reasons: their experience and knowledge of the city and ability to read it is second only to that of Vimes himself (and possibly Carrot), their use as teachers for young Watchmen, their long service and old friendship, and above all, a shared inexplicable knack for stumbling across vital and useful information.
* Sergeant David Bleak in the midst of an enemy ambush. Staff Sergent Bleak's actions were heroic enough to earn the Medal of Honor, the US military's highest honor for valor.
* Sergeant Detritus, a troll on the A-M City Watch, "treats humour as a human aberration" to be overcome by talking slowly and patiently.
* Sergeant Detritus in the City Watch, who is implied to be in charge of training the watchmen by shouting. A lot. And when a troll that other trolls don't mess with yells, you and everyone within a few blocks listen... but again, he's just doing his job. Vimes reflects you need someone like Detritus yelling at coppers about honor and serving the public trust for a few weeks before you hand them over to the street monsters who teach the dirty tricks.
* Sergeant Detritus's sidearm of choice, the Piecemaker, is noted to have this sort of effect on the target. As a (very large) troll he uses a converted and tuned up siege crossbow instead of a normal one. A crossbow which used to fire one large blunt arrow, intended more for general demolition and knocking down doors than anti-personnel uses. Since then it has been modified to fire about a hundred arrows bound in one sheath - with the obvious intention of firing them all at once at a target. However, it's explained that the various forces involved when firing it have caused the arrows themselves to be more or less irrelevant to the whole situation. Pulling the trigger simply results in the target being hit by an expanding cloud of flaming wooden splinters. In short, the weapon could be loaded with pretty much anything and it would still cause its targets to evaporate into fine red mist. Due to its extremely wide kill zone - it has been known to destroy things directly above Detritus even when firing forwards - it's advised the only safe place when he is around is behind him.
* Sergeant García and Corporal Reyes once exchange shut-up kicks with each other when either of them is about to let slip to Don Alexandro that they know what

happened to Don Diego (whom they knocked out and sequestrated to save him from fighting in a duel).
* Sergeant Grant is shot in the head by a drunken replacement in "Points." He survives because they were able to rustle up a brain surgeon from one of the local German hospitals.
* Sergeant Gravis gets bisected through the lungs by a Hive Tyrant's bonesword.
* Sergeant Jackrum of the Borogravian army has fought in every single war for forty years. The Sergeant knows everyone. Everyone knows the Sergeant. The Sergeant's reputation is such that generals will leave at the Sergeant's request.
* Sergeant Johnson very effective soldiers, but just not quite good enough to prevent the Insurrection from spreading, not to mention that far too many of them started to experience severe degenerative side effects from the augmentations, both mental and physical.
* Sergeant Johnson was likely intended as a redshirt until Bungie realized how much the fans liked him.
* Sergeant Lejaune. In his case, he is a villain and indifferent to "doing it for their own good".
* Sergeant Lustig started off as the "the upper ranks don't care about us rank and file!" sort of soldier. He was given a
* Sergeant Major (or his battalion staff equivalent, the Command Sergeant Major) is the
* Sergeant Merryl has Dame Carruthers, whom he finds too old to be attractive.
* Sergeant Norman Jackson, an engineer aboard an Avro Lancaster bomber, was already wounded when he crawled out of the cockpit and over to the wing to put out an engine fire, knowing full well he could not get back in afterwards and would have to jump. His parachute opened on the way out and he kept on going. He lost the extinguisher and kept on going. Finally, he fell off, and narrowly survived the fall in a damaged parachute. He was awarded the Victoria Cross because, while he didn't succeed in saving the aircraft, it wasn't for lack of trying.
* Sergeant Ocho is a deeply screwed up and angry Broken Soldier, hiding his PTSD behind a wall of bitterness.
* Sergeant Rita Torres shows her tender side when interacting with the Martian Exoscouts (who were abandoned on Mars since the war outbreak) in the second season.
* Sergeant Rock character trying to sneak a radio-detonated bomb into his backpack. After some argument the bomb stays, given that the Chtorrans kill by eating you alive.
* Sergeant Rock: Harsh on his subordinates and not particularly likable, but all of his men respect him.
* Sergeant Rock types can become Limited Duty Officers or Warrant Officers, where they have technical expertise and an officer's authority. Warrants have a greater focus on their technical expertise of the two groups.
* Sergeant Rock when he wants to, he gets the job done one way or the other.
* Sergeant Schlock. And to be fair, they're not that far off, and when pitted in a who-eats-who duel against the actual stuff he was evenly matched.
* Sergeant Schlock is a Carboscilicate Amorph, who is frequently confused with a pile of crap (much to his annoyance). In addition to him falling in love with the human Admiral Breya Andreyasn, there was also a running joke about him having a
* Sergeant Schulz (the rank given is Hauptfeldtwebel, the equivalent of NATO E-8, or U.S. Army Senior Master Sergeant) from
* Sergeant Simony is a ballsy enough atheist to tell the Great God Om, to his face, "This doesn't change anything, you know! Don't think you can get 'round me by existing!" For his part, Om quite
* Sergeant Simpson, starts using them and is nearly killed by the side effects.
* Sergeant Solhammond Lanzerel is tough, brave, disciplined and of course, not afraid to his hands dirty. He's also got no tolerance whatsoever for baneblooded buggers who are likely to get him or his men killed.
* Sergeant Talon and most of the other generic sergeants have shoulderboards with one gold stripe apiece, almost identical to that of Lt. Commander Steel. The only real difference is that Steel's stripes are on the edges of his shoulderboards,

while the sergeants' are in the middle.
* Sergeant Where's Mine has is no medals and a lot of bad memories from being shot at or having to do questionable things.
* Sergeant who somehow manages to survive the game, making your life a living hell the entire time.
* Sergeant Yakov Pavlov and his platoon, trapped behind enemy lines in a half-collapsed apartment building in Stalingrad,. Badass...
* Sergeant York and how he was a pacifist due to his interpretation of the Bible, and so attempted to resist being drafted. But he gets drafted anyway, as the church he followed was so remote that the draft board couldn't prove it even existed for the purposes of a Conscientious Objector exemption. As a country boy from the Appalachian Mountains, he was extremely effective at killing Germans and became a famous American hero, and the most decorated American soldier of WWI.
* Sergeant York and is not only in one piece but completely free of blood.
* Sergeant York was deliberately produced with this trope in mind, as producer Jesse Lasky saw the need for a message film to move the American public from its then-overwhelming isolationism and apathy.
* Sergeant York, when York captures several German soldiers, one of them manages to keep hold of one of his grenades and throws it after giving up, killing York's best friend Pusher.
* Sergeant York. York is telling the other troops that when you're hunting turkeys when they're in flocks, you always shoot the ones at the back of the flock, and then work your way forward.
* Serge Gainsbourg version of the French national anthem called "Aux Armes" ("To Arms").
* Serge Gainsbourg wrote a whole song around this idea: "En relisant ta lettre" ("Rereading your letter").
* Sergei Bazhaev because he's set to make lots of money selling him spent nuclear fuel rods. After he gets captured by CTU and sees his deal has fallen through, he actually tries (unsuccessfully) to help Jack recover the rods.
* Sergei Dragunov has several scars, his most notable being the one that runs through his lips and down his chin. He also sports one across his nose, and, if one opts to make him shirtless via customization in
* Sergei Eisenstein's films are made of this trope. The best example would have to be the film
* Sergei Korolev (the head of the Soviet space program during much of the
* Sergei Prokofiev. Also known for his piano works, motor rhythms, and dissonance.
* Sergei Prokofiev, by claiming that they were really mocking Stalin all along. It's a total change of tactic, as in earlier decades, his political works presented problems for his popularity in the West, where critics were keen to dismiss him as a Soviet propagandist.
* Sergei Prokofiev's "The Love of Three Oranges" (best known for the march which was used as the theme for
* Sergei's official profile lists his hobby as "singing", and word is he has quite the singer's voice.
* Serge Storms books. Some notable examples include having one's circulation cut off by excessively shrunk blue jeans, getting blown up by an exploding Thanksgiving turkey, and being flogged to death with a water wiggle.
* Sergey Brin, one of the founders of Google, has provided funding for research into the production of synthetic beef. Why? Because he knows that the natural, traditional method of producing beef will no longer be adequate within the next several decades. This means that the worst-case scenario for the beef industry may become inevitable: demand outstripping production, which in turn leads to worldwide shortages of natural beef. In short, beef foods, such as the hamburger and the steak, will spiral downwards into extinction. Or more likely, beef will go back to being an expensive food like it was prior to the US's ramping up of cattle production with lots of government subsidies after World War 2.
* Sergey Lukyanenko afted watching the video. A special group of people are able to exit the "deep" at will. These so-called "Divers" can also see security holes and

backwoods as... holes and doors. The trilogy also features a "super-Diver" with the ability to see how things really are and affect them (e.g. walking through a solid object after realizing it's only a computer-generated model).
* Sergey Lukyanenko, all parallel worlds have a numerical designation, the origin of which is not known. Our world is Earth 2. Many of the mentioned worlds have proper names, although the numerical designation is used most often. For example, our world is sometimes called Demos, due to the prevalence of democracy. It was initially assumed that there are only about two dozen parallel worlds. However, the number is later revealed to be at least double that (possibly, infinite) with Earth 46.
* Sergey Lukyanenko (alternate Paris). The State controls most of Europe and has colonies in Africa and the Americas. Several vassal nations serve as the buffer zone between the State and its on-and-off enemy the Russian Khanate (Russia never threw off the Mongol yoke and becomes a mix of both cultures). The Chinese Empire is the most advanced nation in the world and controls most of Asia. The Ottoman Empire is the weakest of the major powers. Smaller nations are mentioned, such as the Aztec Empire that constantly clashes with the State's colonies in America, and Judea, which is a tiny vassal nation of the Ottomans.
* Sergey Lukyanenko and how one "highway" goes right through a big hole in a skyscraper. He shudders of humans one day trusting building supports and drivers that much.
* Sergey Lukyanenko and it seems that Cyberspace itself is preventing him from exiting by all manners of freak accidents and coincidences.
* Sergey Lukyanenko) and stored in massive databanks to download into the mind of a newly-cloned body whenever the previous one dies. Grey is one of the early adopters of aTan (number 89, actually). By the time the novels take place, he is over 200 years old.
* Sergey Lukyanenko. And Ukraine can apparently fight Russia to a standstill and afford aircraft carriers. But daily life is still exactly the same. Russian roads are still shitty (it's a main plot point in the first part of the book). People still drive regular cars. It is, however, mentioned that highly-advanced technology does exist. The aliens just won't let us have it.
* Sergey Lukyanenko appearance. Underneath, though, they eventually start looking like dried-up husks who would crumble to dust if their magic access is cut off.
* Sergey Lukyanenko). Arguably, they did more damage to the enemy than the regular forces.
* Sergey Lukyanenko art. They especially love landscapes drawn by human artists. Any landscapes. There is a huge team of artists on Earth that essentially draws the same trees in the forest, over and over and over. They try to actually put some artistic inspiration into it, but it's actually not necessary, since the aliens in question appreciate more the paint's structure, the brush strokes and so on. Selling those landscapes is a large part of Earth's income (But then again, humanity is like Indians in this setting)
* Sergey Lukyanenko, as a note Kay finds dating back to the war still refers to the planet as Earth.
* Sergey Lukyanenko but ordinary people keep getting sent there and are given enough funds to purchase a small ship and start their career in space. Occasionally, the Platform undergoes attacks by a race known only as the Bugs. No matter their clan affiliation or criminal status, all gather to defend the station.
* Sergey Lukyanenko commander has a human shuttle outfitted with advanced plasma drives, a human pilot grimly explains that there is no way Earth science can replicate the device for at least a century.
* Sergey Lukyanenko duology has the Conclave, the Star Shadow, the briefly-mentioned Crystal Alliance, and the Trade League.
* Sergey Lukyanenko, eating the kind of space food that hasn't changed since mid-20th century.
* Sergey Lukyanenko either from space or another dimension (its true nature is never explained). He already possesses superhuman abilities while in VR, namely the ability to leave VR at will (normal humans can't do that) and to literally "see"

holes and backdoors in code. The new abilities include making him immune to viral weapons used by the virtual cops, flying, and hacking into any system he wishes with a thought. His most amazing ability allows him to enter the virtual world without the aid of a computer or a phone line.
* Sergey Lukyanenko, even space station bulkheads. Melting walls with your entire armor drains the power supply, though. Apparently, any powered armor can be quickly put on and taken off without any special tools.
* Sergey Lukyanenko example below). This turns into the Prostration ritual, during which he visits all the planets in his domain and prostrates and prays after leaving his shuttle. Once, though, he forgets to do that and then simply declares that he is changing the ritual.
* Sergey Lukyanenko fleet (the Extinguisher creates a "tunnel" of sorts through the core of the star as a side effect of the explosion). Many of the smaller ships with inadequate shielding are still lost. The Bugs then communicate with the Seekers and force them to return to Platform Space by threatening Earth with an Extinguisher. One of the Seekers notes that astronauts back on Earth will be pissed at the loss of Rigel, which is used in Space navigation, but another person points out that Earth won't know about it for another 800 years, since Rigel is that far away.
* Sergey Lukyanenko for a few months where he or she is introduced to the world of Others, taught some basic spells, and explained the rules. After that, the Other has the option to either return to civilian life or join the Watch. It's also possible but rare for an uninitiated Other to refuse initiation and remain a human. One of the unfortunate duties of the Night Watch is handing out licenses to vampires and werewolves. Basically, a license allows a vampire or a werewolf to hunt (frequently, kill) a human. Licenses are usually based on a lottery, although Others (including known uninitiated Others) and their close friends/family are exempt. Any vampire/werewolf caught hunting without a license can be executed on the spot, although the preferred method is to arrest them and give them to the Inquisition for trial (the punishment is usually death anyway).
* Sergey Lukyanenko, has a small blurb at the end to that effect. Really, the author could've easily changed the races and planet names in the final draft, and the novel would lose absolutely nothing.
* Sergey Lukyanenko has technology allowing people to be resurrected upon death. The "cheap" part is averted, though, as not everyone is able to afford even one resurrection. Basically, when a person first buys the aTan resurrection, he or she undergoes an excruciating molecular scan in order to store the body template in the database. At the same time, a neural net is implanted into the brain in order to transmit the person's memories back to aTan. Most people think that the neural net works only at the moment of death, sending a massive dump of information back, also signaling death. However, in reality, the net is working constantly, and the end of transmission is considered death by aTan. If the recently deceased paid for his or her resurrection (always in advance), the body is replicated from the template at the nearest aTan facility with the memories then downloaded into the new brain. Another fact that most people don't know is that creating two identical bodies and implanting the same set of memories into them will result in only one of them becoming fully self-aware. The other one will be without will (i.e., he/she will perform basic vital functions but be unable to make decisions). Thus aTan proved then existence of the human soul.
* Sergey Lukyanenko have artificial gravity on their ships. When a Russian "Buran" shuttle is docked to a Geometer ship, the latter's computer extends the ship's AG field to the shuttle. When the protagonist then gets into a fight with a more seasoned cosmonaut, he has the advantage, as he'd gotten used to AG, while the other man fights as one would in zero-g (e.g. hit and lightly push off to float to the ceiling).
* Sergey Lukyanenko. However, there are indications that the Empire is already showing signs of decay. Few in the outer fringes even know the name of the current Emperor.
* Sergey Lukyanenko. However, they are never activated inside a planet's atmosphere. This is because they transport a large sphere around them. Suddenly

removing a chunk of an atmosphere has consequences for the planet below.
* Sergey Lukyanenko, hurricanes) and that this act alone (not to mention the hijacking) guarantees them life in prison.
* Sergey Lukyanenko. If anything, they figure that this will only hasten our demise. The novel ends with one of the protagonists determined to prove them wrong.
* Sergey Lukyanenko, if not weeks. At the end of the story, they leave but let the humans keep their ships, which are obsolete by then, in the hopes of jump-starting our progress.
* Sergey Lukyanenko inhabitants living in twelve enclosed and self-sufficient Cities, where their lives are closely watched and regulated by the aptly-named Watchers. Children are raised by Watchers and frequently moved to other Cities once they reach adulthood, sex partners are selected by the computer, complete social equality is the goal of every Equal (the term is itself an honorific). No one lives past 60, as the Watchers kill them. There are Outsiders, people who live in the radioactive wasteland and occasionally raid the Cities for new recruits and supplies. The protagonist meets Outsiders and a former Equal and decides to help them against the oppressive rule of the Watchers. He finds out that there is a secret Thirteenth City, a pristine forest used as a retreat by the Watchers, while everyone else lives in squalor. However, when he finally reaches it, he finds out that the current social state is the only one possible on this planet. The forest can only hold a few thousand Watchers. The Cities can support millions, although supplies are low. Also, Watchers are selected from children with a sufficiently high IQ in order to understand the necessity of their actions and are themselves subject to the 60-max rule. The astronaut pledges to tell his people about this and get help for their dying world.
* Sergey Lukyanenko in order to see if they would make good allies to humans, is repulsed by this practice and resolves himself to avoid this fate for Earth (especially since Earth is already more primitive than they are). It's stated that they have already successfully integrated two alien races, native to their star system, into their culture, which also served to perfect their methods.
* Sergey Lukyanenko involves a girl who ends up accidentally duplicating herself with the Gates. By the same token, each time the protagonist manages to find a copy of her, she ends up dying, except this time there doesn't appear to be an original version.
* Sergey Lukyanenko is a toroid designed to be able to rotate for this purpose, unlike the other Earth defense stations. It's mentioned to be both a convenience and an inconvenience. It's nice to be able to walk aboard the station, but the rotation must be stopped if lasers are to be used for combat, as it's difficult to aim this way.
* Sergey Lukyanenko is behind all this, but how this is done is not described. However, shortly before the end of the second novel, the protagonist claims that all this has to do with advanced knowledge of quantum physics. Why do functionals have these abilities? They "borrow" them from a parallel version of themselves that exists in a world where this is natural.
* Sergey Lukyanenko is impossible. In wartime, gliders may be used to drop bombs.
* Sergey Lukyanenko is moving in for the kill. Also, physical time travel is possible as well.
* Sergey Lukyanenko. It also probably helps that she has a degree in psychology.
* Sergey Lukyanenko. It's also possible, but highly illegal, to record and look through a person's memories like an audio-visual film.
* Sergey Lukyanenko. It's initially assumed that there are about a dozen worlds, but it's later revealed that the number is much higher, possible infinite.
* Sergey Lukyanenko. Later on, though, it's revealed that the Conclave only controls a small part of the galaxy. There are other powers in the galaxy, but none can truly be called a superpower. For as far as Earth is concerned, the Conclave definitely fits.
* Sergey Lukyanenko, many parents choose to "specialize" their children before they're born, if they can afford it. The children grow up normal, but at puberty their bodies and minds undergo changes that irreversibly determine their life path.

Furthermore, they don't care because every Spesh loves his or her job. They're programmed to love it. These modifications range from enhanced logical reasoning for detectives to extra joints for fighters, not to mention enhanced reflexes and strength. Also, starship pilots, detectives, and tax inspectors are incapable of love, as it clouds judgment. On the other hand, hetaeras (call girls) are conditioned to fall in love with their clients and be unable to fall out of love until their client reciprocates. There is plenty of distrust between the Speshs and the Naturals, even though everyone has some sort of gene therapy done on them as a fetus, like corrected eyesight and fixed genetic defects. Some jobs simply cannot be done by Naturals, like power specialists who are genetically-modified to handle high doses of radiation (mostly by shielding it with their skin and long hair).
* Sergey Lukyanenko named Ahhar is, at one point, calls himself Shivukim Ahhar, although Shivukim could be a Bulrathi title or honorific. The cyborg Andrey never reveals his last name; presumably, he feels he no longer needs one, as he is not human anymore.
* Sergey Lukyanenko of their findings. Needless to say, the Patriarch immediately gives full blessing to aTan. After all, it's not every day that someone proves the existence of the soul.
* Sergey Lukyanenko. On a less funny note, good luck finding spinach after the war.
* Sergey Lukyanenko on the planet Heraldica are shown to engage in an old-fashioned horse-mounted hunt, except they're hunting their genetically-engineered servants, who obey their every wish. When they catch up to a peasant girl, they stun her and then proceed to gang-rape her while the others cheer them on. After the act, she gets up, gets dressed, and walks back to the village as if nothing happened.
* Sergey Lukyanenko part of dropping out of hyperspace instead of simply a step that a crewmember might one day forget to do.
* Sergey Lukyanenko princess from planet Tar) but still feels weird when he sees three young people (one of them barely 13) having sex in the woods. When he confronts an older man with this, the man explains that they are all legally considered adults (even the 13-year-old who has passed his self-sufficiency test) and, thus, are granted all possible rights. The older man points out that freedom must not be limited by any one person's morals or it's not freedom at all. So, if three consenting adults want to have wild sex in the woods, they can do that.
* Sergey Lukyanenko princess wife, but both of them are from the late 20th century.
* Sergey Lukyanenko. Pyotr realizes that, if the Conclave goes to war with the Geometers, they will probably end up destroying their homeworld, but the surviving Geometers will continue to conduct hit-and-run attacks against Conclave worlds, releasing deadly plagues where they can.
* Sergey Lukyanenko repairs the damage. The protagonist habitually carries a machete along with his sidearm and has grown adept at cleanly removing Risen heads with a single blow.
* Sergey Lukyanenko scout of the super-advanced Geometer civilization.
* Sergey Lukyanenko sends a fleet to pacify the colony, which engages the fleet sent by the Alkari in the vicinity of the planet. This vicious battle results in debris continuing to fall from orbit for decades. Not that the colonists mind, as nearly all of them were massacred by mercenary squads sent ahead of the Imperial fleet as punishment.
* Sergey Lukyanenko ship, a Moon-sized sphere, patroling their ancient borders (which now belong to younger races). Subverted in that this ship is a relic of bygone times. The Taii ship is escorted by a tiny human destroyer that can incinerate the giant sphere with a single volley.
* Sergey Lukyanenko ship-of-the-line and realizes its wooden hull is gold-plated. He muses that they could've afforded to iron-plate it, but it would just rust. Apparently, steel was never invented in that world, and no one ever mentions aluminium, despite its potential for use in aircraft; a Bayer-equivalent process is also never mentioned.
* Sergey Lukyanenko short story called an excerpt of the aforementioned novel, but still.
* Sergey Lukyanenko shows how easily Others can be killed using remote-controlled

guns, which don't have an aura and have no malice. Luckily, the Others have a host of mind-manipulation spells that they're normally not allowed to use but can break them out in an emergency.
* Sergey Lukyanenko soldiers (at least, until they start using those same weapons and techniques themselves).
* Sergey Lukyanenko, Staff Sergeant Dima Pastukhov of the Moscow Police considers himself an honest cop, by Russian standards. Granted, he'll occasionally accept a small bribe (e.g. more change than what he paid) from a cafe owner when stopping by for lunch or rough up a drunk or two when they get rowdy and refuse to go to a sobering-up station. However, he will also chase down any perp without a second thought, won't harass store owners, and will let those who are only a little drunk go home (provided they don't drive). However, he avoids the Others like the plague, having been accidentally granted the ability to see them by Anton's carelessness in the first novel (he's one of the two cops he tells to go get drunk on his first case, nearly costing them their careers).
* Sergey Lukyanenko starts with the main character being killed by an algopistol, a weapon that causes all nerves in his body to simultaneously transmit extreme pain signals to the brain. Normally, the person dies of shock. It is unclear if the main character died from shock or from bleeding out, as his thrashing caused him to cut him his body on some super-thin webbing. He gets better.
* Sergey Lukyanenko. Suddenly finding himself completely immersed in the game and being unable to exit until he beat it in one sitting.
* Sergey Lukyanenko that cannot be stopped by conventional means (steel weapons simply pass through the water, while rusting and crumbling). It's not a surprise that the Water Clan is the most powerful at the time the story takes place. They also use it for peaceful means, especially in their capital city of Hundred Fields, which is full of beautiful fountains, canals, and water mirrors.
* Sergey Lukyanenko that spinach was absolutely essential to human metabolism. The Meklar devoted large amounts of resources to develop a species-crossing retrovirus lethal to spinach and to deploy bomber fleets all across human space. Devastating losses in those fleets and the utter failure of the plan shocked the Meklar into a peace treaty, though.
* Sergey Lukyanenko. The aThan corporation then checks if the resurrection has been paid for (by the customer, their employer, the army etc.) and if so, replicates a new body, usually at the nearest aThan facility, while adding the memories as accumulated since the last resurrection. These terms and conditions are in fact mostly lies:
* Sergey Lukyanenko, the Isles of Sorrow are a penal colony where the condemned mine iron for the rest of their lives (usually, pretty short thanks to the conditions).
* Sergey Lukyanenko: The protagonist sees lasers on the screen. He then realizes that it must be the ship's computer helpfully adding the lines on the viewscreen in order to provide a visual, as laser beams move too fast to see.
* Sergey Lukyanenko, there is a martial art called yu-dao that can only be used by fighter-speshes, due to the fact that it requires superhuman strength, speed, endurance, and reflexes, not to mention the ability to bend joints in ways most people can't. A sixth-level defense stance is described in the follow manner: "Legs forward, as though they had been broken and twisted at the knee, torso leaning backward, left hand, palm open toward Alex, at her face, and right arm thrust forward."
* Sergey Lukyanenko, the science fiction writer Yaroslav Zarov is a clear avatar of Lukyanenko. Several of Zarov's novels appear to be novels that Lukyanenko wrote himself. Additionally, Lukyanenko would later use Yaroslav Zarov as his pen name for some published works.
* Sergey Lukyanenko). They're small snakes about a foot and a half in length, who burrow into a person between the shoulderblades and merge with that person. The Darlok's mind takes over the host's, destroying the personality, leaving only echoes. It's possible for a Darlok parasite to change hosts, although it requires a controlled environment. When Darlok spies are discovered, they typically commit

suicide while shouting "Darlok!" After death, the symbiote decays in a matter of hours, and the host's brain decays with it, making autopsy useless. For centuries, they have managed to keep their true nature a secret. After the Empire finally discovers the truth, human security forces start scanning the upper back of anyone passing through a checkpoint for the presence of alien tissue.
* Sergey Lukyanenko. They see humans as mentally deficient, which is why no one has bothered to conquer us (would you harm a kid who suffers from Down Syndrome)?
* Sergey Lukyanenko). This also crosses over into Commensalism and Reverse Parasitism.
* Sergey Lukyanenko. This is because some joker successfully feeds them false information about human dietary needs, claiming that spinach is vital to humans. They spend countless resources creating the virus and then lose many ships trying to seed human worlds with it. After they eventually realize that humans aren't dropping like flies, the shock is so great that they immediately sue for peace. They could've just as easily tailored the virus to kill humans. Of course, from then on, spinach can only be grown in self-contained greenhouses.
* Sergey Lukyanenko, three alien ships arrive to Earth and demand that humans move as many as they can into the polar regions, so that the aliens can settle most of Earth. The main character is a diplomat sent to negotiate with the alien representative, who turns out to be a pretty decent guy, regretful of having to do this. However, their homeworld is threatened by a black hole, and habitable planets are rare. In the end, though, the alien gladly informs the diplomat that they managed to terraform Venus and stop the black hole, all within a few weeks of arriving to Earth. He also remembers his grandfather who discovered the wheel. Furthermore, he offers to give their ships to humans, as they are now obsolete, and explains that the reason humans were never conquered by another race is because their "so pathetic."
* Sergey Lukyanenko thus humans are much better prepared to accept others' quirks and work around them.
* Sergey Lukyanenko to be adopted by unsuspecting parents. She then plots a rebellion, which would result in her ruling with her clones. Her plan fails but Garlitski's succeeds.
* Sergey Lukyanenko. To his horror, he found himself walking the corridors, shooting weapons, fighting monsters. No matter what he tried, he could not get himself to "awaken". After many hours of playing, he finally beat the game, at which point his subconsciousness allowed him to "exit". He found a nearly-broken keyboard and his own bloody hands (his own blood).
* Sergey Lukyanenko to it, or simply putting your hands into containers filled with a gelatinous liquid called the "colloid actuator", which allows for a "meld" between the pilot and the craft.
* Sergey Lukyanenko to kill themselves immediately (they will be resurrected on the nearest colony). Despite himself having aTan, Lemak chooses to stay with the ship and those members of the crew who don't have it, although he cries as the ship is passing into the unknown future.
* Sergey Lukyanenko trilogy, quark bombs are relatively small spheres. One is fully capable of starting a process of total subatomic fission that is impossible to stop and consumes a planet in a matter of minutes. Even small chunks of the planet can re-start the process on another world if they happen to make it that far. Luckily, the bomb has to be delivered by ship, as teleportation renders it inert. After only two uses, it was banned by the entire galaxy. The only safe way to dispose of the bomb is to take it to a very remote area of space and blow it up.
* Sergey Lukyanenko weapon coupled with him being covered in razor-sharp fix-spray (he cut his own body to pieces by jerking and spasming from the induced pain).
* Sergey Lukyanenko, we have the Galactic Conclave, the Star Shadow, the Trade League, and the (once mentioned) Crystal Alliance.
* Sergey Lukyanenko when Anton's had his mind swapped with Olga. He can't tell Svetlana what's happened until they reach her warded apartment... after she's had a very private conversation with "Olga" about Anton.
* Sergey Lukyanenko, where a large percentage of humans have been modified by in

utero gene therapy to a pre-selected Specification. During puberty, the Specs undergo a metamorphosis during which their bodies and minds change to better suit their future career. This is considered normal, although the Naturals (who only undergo the very basic gene therapy to correct common birth defects) tend not to like Specs much, which is reciprocated by the Specs. Interestingly, in his foreword, the author is the one who expresses this trope's views by pointing out that this effectively keeps people confined to their roles without the possibility of any mobility. In Lukyanekno's opinion, this is already happening, to an extent, without any genetic modifications. Rich people's children get better care and education than poor people's children and frequently end up in the same careers are their parents.
* Sergey Lukyanenko, where the Internet is barely used thanks to the development of cheap and easy VR (using 28.8k dial-up modems), which gave rise to the Deep. The big computer companies banded together to create Deeptown, a large virtual city where people interact with one another, work, and, pretty much, live. Since that takes away much of the Internet's appeal, it's only really used to get factual information that can't be easily obtained in the Deep. Note: The author is an avid FidoNet user, and the series is likely inspired by this.
* Sergey Lukyanenko. While parents can buy their unborn children whatever specification they can afford, in practice, most parents usually go with their own spec for their kid. This is because each Spesh loves his or her job implicitly. There is plenty of bad blood between Speshes and Naturals (the un-modified). There is also a planet called Heraldica, populated by the descendants of aristocrats and the Speshed servants. And yes, the servants love their jobs and turn their children into servants as well. The nobles often have hunting games, chasing servants, shooting them with stun guns, and then raping them.
* Sergey Lukyanenko, who have managed to combine both technologies into a highly-efficient method of interstellar travel to the point where moving entire star systems isn't that big a deal.
* Sergey Lukyanenko who have replaced most of their organs with mechanical parts, including integrated weapons (plasma cannons and stunners in the chest plates). They are also superb unarmed combatants, given their machine-like reflexes. Their leader is known as the Perfect One, presumably because he replaced as much of his body as he could. A human sect views the Meklar as the most perfect beings in the universe and attempts to cyborgify themselves.
* Sergey Lukyanenko with a combined directed microwave attack. It was previously mentioned that anyone who slights a native can be fried to a crisp using their biological ability to emit directed microwaves. It's just that nobody thought that they could do that to a massive warship.
* Sergey Lukyanenko with Tommy now having grown up (he was only 14 in the first book).
* Sergey Lukyanenko work because the pilots believe them to work. This is also why humans are the only ones who retain their sanity when using it - because this should not be possible. The protagonist even recalls that the jumper was invented by a bunch of underfunded Russian researchers, and the scientific basis for the device was added as an afterthought and seems tacked-on. Also, every jumper works exactly the same, no matter the design or power. Kinda makes sense since astronauts have to believe they'll succeed in order not to die.
* Sergey Taboritsky of Komi is an absolutely screwed-up monarch-theocracy where Taboritsky rules as a regent preparing the nation for the return of Alexei Romanov
* Sergey Volnov trilogy, the formerly-dominant humans are now relegated to second-class citizens after the success of the alien rebellion against the tyrannical rule of the EarthStella Empire. Once reverently called "Earthers", humans are now derogatorily called "Zems" (from Russian "Zemlya", meaning "Earth").
* Sergio Aragonés depict people's shadows acting out their secret fantasies.
* Sergio Aragonés Destroys DC to find the "most disgusting, loathsome villain of all DC history".
* Sergio Aragonés feature this. One notable example is from "A MAD Look at Racism", where at a restaurant, a black man is treated poorly by the head waiter,

ignoring him in favor of white patrons, placing him at terrible tables, etc. The waiter gets his comeuppance when he later finds out that the black man was a food critic for a local newspaper, who proceeded to give a scathing review to the restaurant.
* Sergio Aragonés had an 18-month gap between issues 7 (January 2012) and 8 (June 2013). This was due to Sergio Aragones needing an operation, which set everything back.
* Sergio Aragonés has a bunch of hockey-playing kids inviting a man with a hockey mask and a duffel bag to play with them. He reaches into his duffel bag and pulls out a chainsaw.
* Sergio Aragonés, Sergio says that the title would continue with another publisher. Said continuation has yet to come.
* Sergio Aragonés will seldom show anything more than someone clutching their abdomen while (black) blood oozes between their fingers.
* Sergio Di Zio (mainly live-action, but also has a number of voice acting roles)
* Sergio for making the circus close since Sergio was the main star. Natalia and the troupe do find a new job at a night club, but still.
* Sergio Garcia once hit a tee shot that ended up stuck in a tree, about 10-12 feet off the ground. After he climbed the tree to find his ball, he had his caddy hand him his club (the announcers suggested that he use a
* Sergio has just gotten a new job at his firm, but it is the work of ten people, and he becomes stressed out and overworked. His neighbors are noisy and pesky and loud. He doesn’t really love his girlfriend as much as he wants, and instead fantasizes on his high school crush.
* Sergio Leone and Trick Shot, often being the first and the last to fire in most given situations.
* Sergio Leone, but Tonino Valerii directed. That said, Leone did direct some scenes uncredited. After the film's release, it was promoted as a Sergio Leone film, much to the frustration of both men.
* Sergio Leone is a straight example, being a Union soldier, and a total thug.
* Sergio Leone is supposed to reflect the process of death, slow-paced with breaths of amazing (usually duels).
* Sergio Leone switches between ever-closer and increasingly rapid shots of the three main characters, including shots that only include their eyes, making for an incredible tension that's abruptly released when one of them finally shoots.
* Sergio Leone to the big screen - during which time he directed two other films and produced several others.
* Sergio Ramos has scored so many goals in the last play that the fans and the press jokingly call the extra time after minute 90 "Noventa y Ramos" (
* Ser Gregor “The Mountain” Clegane is the strongest man in the Seven Kingdoms and is deadly, bloodthirsty, and widely feared for it by other heavy hitters. He is notorious for raping and killing Elia Martell and her children during the Sack of King’s Landing. He’s also responsible for maiming and killing Ser Beric Dondarrion though
* Ser Gregor Clegane, brewed poison, and implemented the construction of ballistae on an near-industrial scale.
* Ser Gregor Clegane-like behavior and concealing armor make him very close to a medieval fantasy version of the trope.
* Ser Gregor Clegane, upon losing a joust to Ser Loras, decapitates his own horse and then proceeds to attack the now-unarmed Loras. Right in front of the king and all the joust spectators.
* Ser Gregor Clegane when he's fatally poisoned by Oberyn Martell, and his physical resilience keeps him alive and in agony for weeks.
* Ser Gregor "The Mountain" Clegane is the strongest knight of the Seven Kingdoms who committed a lot of atrocities during the Sack of King's Landing such as raping and killing Elia Martell and her children and is responsible for burning half of Sandor's face. He also brutally kills Elia's younger brother, Oberyn, while smugly admitting his past crimes. Though Oberyn's poison renders him comatose, he comes backs as a

* Ser Harys Swyft, compared to the contributions of the other bannermen Tywin is discussing strategy with; he makes not a peep during the whole time he is one-screen.
* Serial became a meme among fans (though the archived versions now include ads for Audible instead).
* Serial despite it hurting his case and his chances at parole implies that this trope is in effect.
* Serial Escalation A consistent escalation in whatever the heck a work is doing.
* Serial Escalation: It's common to engage in this to ramp up the shock factor even more.
* Serial Escalation of mass-produced ships in this weight class to fight an intergalactic war.
* Serial Escalation (she ate a spider to catch the fly, a mouse to catch the spider, etc.), until finally dying from eating a horse.
* Serial Escalation was adapted three times in Latin America—once each in Argentina, Mexico and Brazil. The latter two count as this.
* Serial Escalation with Harpuia who is capable of super sonic flight.
* Serial Experiments Lain. Alice is so freaked out by this point that her sanity takes a sharp nosedive and she hits Lain out of fear while tears stream down her face.
* Serial Experiments Lain are made by Tachibana General Labs (Tachibana translates to Mandarin Orange). Of course, there are also some non-disguised references to Apple computers, such as a (small) picture of an iMac with an Apple advertising slogan.
* Serial Experiments Lain as a mystical experience, without any technological peripherals connecting people to the virtual reality; the only "scientific" explanation given to the out of body experiences is the Earth's electromagnetic Schumann Resonance, which in the story can link human brains and computer equipment together without anyone noticing.
* Serial Experiments Lain focuses on a strange, distorted and malevolent version of the internet called The Wired.
* Serial Experiments Lain game, the latter of which involves reading case files on Lain's 'progress' throughout laboratory tests. Also, each episode of the show can be seen as Lain experimenting with something new, progressing serially from the simple (trying out a new computer) to the mindblowingly, cosmically profound. Metatextually, the episodes can be seen as a series of experiments with storytelling technique, each one trying something different.
* Serial Experiments Lain Gradually becomes less straight over the course of the series as we learn that there is a possibility that Chisa really did emigrate to the wired and Lain is far more than the awkward middle school girl she appears to be.
* Serial Experiments Lain has The Wired, which may or may not be alive. Or another dimension. The anime takes place in "the present day" and "present time" and was created at a time when the internet was already clearly named and defined.
* Serial Experiments Lain, heightened senses, and delusional thoughts. It also seems to physically link the user into the Wired, and susceptible to its more esoteric phenomena.
* Serial Experiments Lain is also fond of this, the whole show sweats with creepiness even in the most casual scenes.
* Serial Experiments Lain is this, with long, dark hair and pale skin. This complexion, combined with his slightly feminine face and use of female speech, makes him all the creepier.
* Serial Experiments Lain, Lain disappears from the Earth after deleting her memory from everybody's minds. Also, Eiri Masami.
* Serial Experiments Lain: Lain's friendship with Alice breaks down when one of the Lains spreads rumors around school that she likes to fantasize about a certain teacher while "playing with herself".
* Serial Experiments Lain: Lain talks in a halted staccato, doesn't seem to understand basic social conventions, and spends most of her time on a cyberpunk

version of the internet.
* Serial Experiments Lain may or may not be God. We're not quite sure. At any rate, even if she's not God, her power level makes the whole point kinda moot.
* Serial Experiments Lain or something else you'd find in the pink aisle.
* Serial Experiments Lain physically represents the Internet as another layer of reality. Unlike other shows which would display a friendly, clean cyberworld, this one portrays it as disorienting and bizarre. Add in hallucinations and the blending of the real world and the Wired (Internet) and several scenes get quite intensely strange. Even the more mundane stuff has a surprisingly unsettling atmosphere.
* Serial Experiments Lain's CRT monitors, 90s-like GUIs and BeOS. Also notable is the Dreamcast-like console seen in the OP animation, and the many computers that seem to be running some version of NeXTSTEP, the direct predecessor to OSX. Lain doesn't take place in the future, however, but in "Present day, present time! Hahahahaha!", ie. some kind of alternate reality that may or may not be turned into the world that we know at the end of the show.
* Serial Experiments Lain seem to actually exist, though in manner slightly different than the legends would indicate.
* Serial Experiments Lain seem to be really, really, really fond of each other... sometimes to romantic levels.
* Serial Experiments Lain: she plugs herself to her Navi by sticking electrodes on her body and plugging them into the USB ports.
* Serial Experiments Lain. Showing Lain on the street outside her house where the shadows aren't quite right.
* Serial Experiments Lain. Since Lain is the viewpoint character for most of the series, the effect isn't quite as strong as it could be; the viewers get frontline seats to her internal turmoil, and she's far less aloof when she's alone with her thoughts, which is quite often.
* Serial Experiments Lain, the internet is referred to as "the Wired" and computers are "navi".
* Serial Experiments Lain, the machine/drug Accela does exactly what it sounds like—it accelerates the brain. By 12 times.
* Serial Experiments Lain: The powerlines make an ominous humming sound, made creepier by the implication that Lain is the only one who hears it.
* Serial Experiments Lain, true to its indie nature, is a thirteen-episode series.
* Serial Experiments Lain used "Duvet", by British rock band Boa, for its opening theme.
* Serial Experiments Lain was initially rated 16+ in Quebec for horror while all previous volumes had been rated G. When rereleased in a complete collection, it was downgraded to 13+.
* Serial Experiments Lain when the eponymous character realizes in what is one perhaps the most dramatic and mind-bending reveal in a series full of dramatic and mind bending conspiracies that she is in fact a program engineered to be the god of the new world created when the Internet/Wired overtakes reality.
* Serial Experiments Lain, with the Roswell Incident as its subject. It also talks about how if nobody remembers something, then it never actually happened.
* Serial Homewrecker: A character who seeks out romantic or sexual partners who are already in relationships.
* Serial Homewrecker: Person with an attraction to people who are already spoken for.
* Serial Homewrecker: Promiscuous women who especially look for married men to corrupt away from their families are very common antagonists. And among the most likely to die horribly.
* Serial, in a transparent attempt to get listeners. It worked beyond the creators' wildest dreams.
* Serial Killer: A murderer who gradually kills a series of individual people, one after another.
* Serial Killer: A murderer who gradually kills multiple individual victims, one after another.
* Serial Killer: A murderer who has made a sick hobby of killing a series of

individual people, one after another.
* Serial Killer: A murderer who makes a habit of gradually killing individual victims, one after another.
* Serial Killer, and a group of federal agents all assigned to take him down.
* Serial Killer (and rapist and torturer) Ripley and an owl he sees outside his window, with the owl's menace and predatory nature initially reminding Ripley comfortingly of himself (once the metaphor is extended, it gets... less comforting).
* Serial Killer, and that Charlie had actually killed him that night during the contest, helping to bring a feared criminal to justice. Charlie leaves with a sense of anguish and plans to re-enter the competition next year and wish for Calypso to take away his suffering.
* Serial Killer and used to carry out his crimes. The daughter, Koharu, ends up exposing their crimes when her guilt becomes too much to bear.
* serial killer!", another referring to the shapeliness of cut-off human legs. It's more disturbing in him then it is in Abby - in fact, in McGee's book the character "Pimmy Jalmer" was a necrophiliac.
* Serial Killer, as his power is to put people into a peaceful sleep/killing painlessly, but he's still a skin-crawlingly creepy psycho.
* Serial Killer. Averted when Garrett finds another solution that prevents the curse from jumping into a nearby potential host when its bearer is killed.
* Serial Killer begins with a haunting, hollow rendition of "Taps" that fades into the sounds of distant radio chatter, machine-gun fire and screams (Pike was a Vietnam Vet before taking up his gruesome hobby).
* Serial Killer begs for forgiveness. Also, Future!Hiro's string "map" of cause-and-effect in Isaac's apartment.
* Serial Killer bent on revenge against alchemists. He can tear apart the alchemic makeup of his victims with an alchemic circle tattoo on his arm, often leaving bloody mess in his wake. The only real reason for him to kill the alchemists in such a bloody way, instead of disintegrating them completely, and leaving no evidence behind, is the fear factor.
* Serial Killer but upon his arrest, the media went with the longer form of his first name for some reason.
* Serial Killer by Nigel McCrery places her victims around her dining table and leaves them there for years.
* Serial killer Carl Panzram to his executioner: "Hurry up, you Hoosier bastard! I could kill ten men while you were fooling around."
* Serial Killer checked in there at the time of her disappearance? Or was it the result of her mental illness?
* Serial Killer claimed that, while he buried his victims, he was not responsible for their deaths, they alone were. They should have tried harder to escape, and because they did not, they obviously did not want to live and let themselves die, so all the alleged victims were not murdered, but actually committed suicide.
* Serial killer Cletus Kasady was originally sentenced to Ryker's Island, but after becoming
* Serial Killer Craig Price murdered the Heaton family, the police determined that the killer cut his hand in the process. Price's injury was noticed, he claimed it was the result of drunken vandalism. The police quickly saw through the story due to a lack of a vandalism report and broken glass on the street the alleged vandalism occurred on. He later admitted the crimes as including the detail about cutting himself in the process.
* Serial killer David Berkowitz, aka Son of Sam, claimed "I didn't want to hurt them. I only wanted to kill them."
* Serial Killer episode "Dying To Live" murders people with a rare blood type in order to help people with that blood type in need of organs.
* Serial Killer. Even then, she still refused to believe that his killing spree began when he was a teenager (an 8-year-old girl from neighborhood disappeared and was never seen again), insisting that he was a normal boy at the time.
* Serial Killer faux-Nietzschean stuff thrown in, it depicts murder as an artistic/

creative act, and encourages practitioners to "find their voice," by coming up with their own signature murder style.
* Serial Killer from the original show's episode "Mayhem" identified and apprehended after the episode's other villains implicate the serial killer in their crimes, leading to a renewed hunt for him.
* Serial Killer George Marks, he snarks about how happy Jefferies seemed upon leaving a realtor's office (he had just discovered some very incriminating evidence), thus revealing that he's been observing the team's investigation.
* Serial Killer Gerald Parker, who earned the nickname "the Bedroom Basher" due to this habit.
* Serial Killer has an apartment filled with the decapitated and limbless bodies of his victims. The Investigators going through the mess describe it as the worst case they've ever seen, horrifying even by the standards of most Ghouls.
* serial killer has an unkempt beard and mullet that give him a feral appearance.
* Serial Killer Herbert Mullin was convinced he needed to make blood sacrifices to nature, or else it would destroy California with earthquakes. He even killed some of his victims because they were "polluting".
* Serial Killer, his victims were people he either felt had wronged him personally (such as selling him drugs) or who annoyed him somehow (such as four teenage boys he told not to sit on the grass who were doing so), and one reason the prosecutors argued he was not insane is that once he killed a woman and her children seemingly just because they could link him to other murders. He also entertained any number of paranoid conspiracy theories and afterwards gave all kinds of bizarre excuses for the murders (he once claimed that his first victim, a homeless man, was Jonah from the Bible and that he had telepathically requested he be murdered), all of which makes it unlikely that "preventing earthquakes" was his sole motive if he really believed it at all.
* Serial Killer. However, it's eventually revealed that the rumour was mistaken, and the actual Kubitarou is a young woman who's not acting out malevolence (though she is still responsible for the decapitation of various innocent animals and people).
* Serial Killer: If the character goes around murdering people constantly, no one in their right mind would say they're a good person.
* Serial Killer in attempts to create zombies. The process killed everyone he tried it on, though, which was probably the best possible outcome in that situation.
* Serial Killer in the 20th century has either been a host of the Boogeyman, or a member of the cult worshiping it.
* Serial Killer is caught, be it Ed Gein or Jeffrey Dahmer, these jokes get told.
* Serial Killer is forced to kill a man and swap faces with him after being discovered by the heroes. He is then forced to live his victim's life in order to lay low.
* Serial killer Israel Keyes used the same trick to try and extort a ransom out of a girl's family even after he killed her and left her frozen body in a shed in his backyard, with the gruesome addition that he sewed her eyes open to make her look alive.
* Serial Killer is well-known amongst the fandom for her smile. One Ask even involved specifically asking her to smile.
* Serial Killer Jeffrey Dahmer kept the body parts of his victims in various places in his apartment, including, infamously, a severed head that one of the arresting officers found in his refrigerator.
* Serial killer Joel Rifkin initially drew the attention of a patrolman for driving without a license plate. When he was stopped (after a high-speed chase), police found the body of a dead prostitute in the trunk. Rifkin was eventually convicted of 17 murders.
* Serial Killer John Wayne Gacy's last words before facing execution were "Kiss my ass! You'll never find the rest!"
* Serial Killer kidnapped approximately 6 women and imprisoned them in his basement, wanting his own personal harem. Aside from keeping them chained together, he threatened to harm the others should one try to escape, killing at least two who

did. One finally escaped after currying enough favor with him to convince him to release her in the belief that she was going to acquire another woman for him. Instead, she went straight to the police. Heidnik was one of the inspirations for the "Buffalo Bill" character from the "Lambs" example cited in "Film".
* Serial Killer kidnapped several women and tortured them to death in a secluded location he called his "Toy Box."
* Serial-Killer Killer: A character who murders only people who have killed others.
* Serial-Killer Killer: A serial kill who murders other serial killers.
* Serial-Killer Killer, collects blood slides. He starts cutting his victims' faces and dropping their blood on the slide as part of his ritual early in his "career". He's forced to dispose of his box several times, but he just starts over.
* Serial-Killer Killer leaves a smiley face on all of his victims. It's how he got his nickname, since the smile and the eyes were close enough to be mistaken for the Pi symbol (π) when viewed upside-down.
* Serial-Killer Killer really blindsides you when in a resolution of a case, the already-apprehended killer's wife, upon learning where her husband got her all the jewelry, tries to cut off her fingers to remove a ring she fails to tear off normally when she starts discarding her husband's gifts.
* Serial-Killer Killer who is under federal investigation. He talks to Sergeant Doakes, currently off duty, who suspected there was something off with him since the beginning. Dexter opens up and says that his father (who committed suicide after training Dexter and witnessing his son having dragged home his victim) killed the wrong person. Dexter doesn't consider suicide as a way out for himself, though, thinking it's pathetic.
* Serial killer, Mary Ann Cotton, killed 20 of her husbands and offspring in County Durham in the 1800s. She had her own nursery tune, sung after her hanging in 1873:
* Serial Killer. Most experts reject him as a possible suspect since he was imprisoned in Illinois at the time the murders took place.
* Serial Killer murders a wealthy man's daughter, the man offers Simone $1,000,000 to kill him instead of arresting him. Simone doesn't do it but also doesn't report the illegal solicitation of a contract, giving the man some slack over his grief. Later, after the killer is arrested, it is all but stated that the wealthy man pays another man whose daughter was also murdered by the same serial killer (and who was an expert sniper during the Vietnam War) to murder him. The assassin confesses and is willing to pay the penalty but refuses to implicate the wealthy man, who is now paying for the murderer's wife's dialysis at a private clinic.
* Serial Killer named Jinsaku Hino, when they normally deal with espers and sorcerers.
* Serial Killer outside the house who our matricidal "heroine" can't simply call the police about.
* Serial Killer parent everyday, and has fought huge beasts with Eridan together to feed it.
* Serial Killer put on a kid's show. But her monstrous sadism and bitter rivalry with Arcee make her beloved by quite a few.
* Serial Killer reveals that he's very much alive and made it to Johto.
* Serial Killer Richard Chase was delusional enough to believe that if he didn't eat people's organs and drink their blood, he would die.
* Serial Killer Richard Ramirez had his trial interrupted when one of the jurors was murdered. The other jurors were terrified, believing that Ramirez had somehow arranged for it to happen. It was later determined that the juror had been shot by her boyfriend for reasons unrelated to the trial.
* serial killer Robert Maudsley. Peterson was a carnival strongman prior to his sentence and is still a mountain of a man even though he's pushing seventy. He requested to have his cell changed because Maudsley freaked him out.
* Serial Killer Robert Quarles committed his first murder at fourteen, executing his sexually abusive, drug-addict father on orders from mobster Theo Tonin. As an adult he seems to view this as the point at which his life effectively ended, turning him into the monstrosity he is now.

* Serial Killer Ryan Chamberlain escaped from prison and took his twin brother's place in Port Charles society so that he could continue to stalk Felicia Jones, who he was obsessed with. In both cases, Kevin managed to alert people by discussing events that Ryan couldn't have known about.
* Serial Killer: Several of the more infamous ones (Ted Bundy, David Berkowitz, John Wayne Gacy, BTK, The Zodiac Killer, The Yorkshire Ripper, etc.) became active during the decade.
* Serial Killer. She'd been friends with him during his Pacific Northwest slew of murders, though she didn't know what he was up to. For years after publishing this book, she received letters from women certain that they had had a near-miss with Bundy (and Rule was sure that a good chunk of these stories were accurate), expressing this sentiment.
* Serial Killer. She ended up suicidal and tried to abort her son. Lieutenant Tillman has petitioned to adopt the child (it's unknown whether his wife knew about the affair or if they even stayed together).
* Serial Killer, since there's so many scars on his body, and if you know about his comic book origin...
* Serial Killer. Since Windhelm is located in the northern reaches of Skyrim however, Windhelm trades the usual rainfall for heavy snow instead.
* serial killer' so Dean pretends they'll have a 'friendly' word with the IRS if they get some cooperation.
* Serial Killer, so his still being in prison 2032 actually fits. However, the real Dahmer was killed by a fellow inmate roughly a year after the movie was released.
* Serial Killers, their methods, motivations, and appearances all vary drastically. They're only able to function as a group due to Jack Slash constantly manipulating the members and their lack of teamwork results in them crumbling the moment they face actual opposition.
* serial killers uses brains as plant food for his favorite flowers... by cutting open their skulls and using them as flower pots. While they're still alive.
* Serial Killer talks about people begging to be murdered, but in his case it's ambiguous whether he's speaking literally or metaphorically.
* Serial killer Ted Bundy acted as his own attorney in his 1980 trial. The judge complimented him on doing a good job, in fact, and commented that Bundy might have made a good attorney. Even so, he wasn't good enough to keep himself out of the electric chair (Bundy had represented himself while on trial in Colorado earlier, and escaped by jumping out of a law library window where he had been allowed access to research his case).
* Serial Killer Ted Bundy proposed to his girlfriend Carol Boone while questioning her during one of his murder trials (he was acting as his own attorney). She accepted and he declared "Then I hereby marry you", taking advantage of an obscure, bizarre, but still valid Florida law that allowed two people to wed in this fashion.
* Serial Killer Ted Bundy's Pacific Northwest murders was his abduction of two women from Washington's Lake Sammamish State Park on a beautiful, 90-degree day.
* Serial Killer that Pacino's father was not able to capture - which would have led to Pacino's father's suicide.
* Serial Killer that subjected their bodies to various conditions (such implanting a septic organ in a man, tying the entrails of another into a bow-tie knot, implanting a radioactive isotope in another man's brain, etc) that would eventually kill them.
* Serial Killer that used them to carry out his crimes. He fully intended to have them take the fall for it, should the crimes ever be exposed. Even so, Koharu loved her adoptive father very much and struggled with guilt over helping in his crimes.
* Serial Killer: The one doing all the killing, it wouldn’t be a slasher work without one.
* Serial Killer: There's a murderer on the loose, and people are dying one by one. Can the heroes stop the killer before they strike again?
* Serial Killer Vigilante archetype has an ability, "Charming", which functions as a mundane effect equivalent to a charm hex to avoid suspicion in people — but

not animals. A knight or inquisitor may be fooled by the vigilante's cool nature, but her horse won't be.
* Serial Killer was absolutely adorable. Because of the blind boy (whose mother he'd killed), he saw what he'd become and hated it. At least that's what the end of the episode implied. He'd left a note at the murder which read "Please stop me" even prior to this as well. Clearly, he wasn't doing this out of desire, but from a psychological compulsion.
* Serial Killer was caught because his car got a parking ticket, which gave the police a vital clue to find him.
* Serial Killer wears a white porcelain mask to hide his identity during his assaults.
* Serial Killer when he dresses in uniform and enters a police station. It turns out the police station is an abandoned building due for demolition and the killer is a madman who thinks he's a cop.
* Serial Killer whom he plans to have disappear so no one will ever know what happened to them. The police rescue the children and find stacked on pallets a drum of sodium hydroxide for each child, with the paperwork already filled out to have them shipped to India for disposal.
* Serial Killer with victims from all over the city. The detectives who handled the case of the Brooklyn girl outright refuse to cooperate because of the underhanded way Benson and Stabler got their files until the latter pair remind them that yet another little girl is going to die if they don't help.
* Serial Killer. With your help, she can finally catch up to her and finish the job.
* Serial Killing 4 Dummys, Amil uses a homemade shaped charge to blow open the doors to the school. However, he has forgotten how he wired the bomb, and spends a few minutes trying to remember which wire connects to which. He eventually connects two wires and, instead of starting the timer, immediately detonates the bomb.
* Serial Killing 4 Dummys, Grimaldi threatens Casey by declaring he will "rip your heart out, show it to you, and use it as a sock puppet!" Given the circumstances, it is not clear if he is indulging in hyperbole.
* Serial Killing 4 Dummys in an exercise machine hooked up to a circular saw above her head. She has to hold up a weighted bar with her legs. As her legs tire and the bar drops, the saw edges closer to her head.
* Serial Killing 4 Dummys, the biology teacher is eating a ham sandwich while watching his students dissect fetal pigs.
* Serial Killing 4 Dummys: When Casey prepares to go and kill his neighbor's dog, there is a scene of him gearing up and hanging the power tools he bought all over himself.
* Serial Killing 4 Dummys where he brutally murders whatever person is currently annoying him.
* Serial Killings, Specific Target: A murderer covers up the murder by killing other people with similar traits as the initial victim.
* Serial Killings, Specific Target: A murderer who only really wants to kill a specific individual, but they try to hide their motives by murdering several other people to make it look like the work of a serial/spree killer.
* Serial Killings, Specific Target kill additional victims to disguise the motive for their intended victim's murder and make it look like the work of any of the other types of serial killers described above.
* Serial Mom: Catching Scotty at a local club, Hammerjack's, Beverly sets Scotty aflame onstage in front of a deranged crowd during the set of an all-female band called Camel Lips.
* Serial Mom for screams of terror. While his parents are being murdered, no less.
* Serial Numbers Filed Off) that "Jeff-inspired" stories were banned on Creepypasta Wiki.
* Serial Peacemaker a professional mercenary and thus is very pragmatic about such things.
* Serial Prostheses: A character has their body parts progressively replaced by prosthetics.

* Serial Prostheses: A character keeps losing limbs and getting more prosthetics.
* Serial Rapist: A character who rapes numerous individuals. For obvious reasons, it's a big MEH crossing.
* serial rapist and two of her friends. Carpenter got away while he left crucial evidence behind, such as his police-issue flashlight. Hubbard was hunted down, identified and convicted of the rapes, getting 56 years in prison. Carpenter was largely responsible for this, as she held onto the flashlight and turned it over to the police, something many not have known about the actress.
* Serial Rapist: A rapist who sexually assaults a series of individual victims.
* Serial Rapist: A sick pervert who has made a hobby out of molesting and raping people.
* Serial Rapist: A sick pervert who makes a habit of sexually assaulting individual victims, one after another.
* Serial Rapist Dick Reed is set free because a technician at the crime lab fouled up the protocols on a DNA test.
* Serial Rapist Jack Jones confessed in a letter that he was responsible.
* Serial Rapist of a son, by Senator Roark himself in revenge for what he did to said son, with the added bastard move of blackmailing him into taking the fall by threatening Nancy's life, resulting in him spending eight long years in prison.
* Serial Rapist: Someone who regularly engages in sexual violence as a sick hobby.
* Serial Rapist). The girl's brother was in the Marines, had someone cover for him when he went out for the night, and burned the rapist alive.
* Serial Rapist who pretends to be a police officer to get close to his victims . He even hangs out in cop bars. It also means that when he drags away one of his victims, no bystander thinks anything wrong is happening. The squad initially think he's a real cop before they recognize he's a fake. When they do work this out, there's talk about the dangers of informing the press. Namely, real police will have a harder time doing their jobs, particularly pulling people over for traffic violations (his MO).
* Serial Romeo: He repeatedly falls for every girl he meets, insisting that she's the one for him.
* Serial Spouse: A character who has been divorced again and again and again.
* serial tax evader who has abused every trick in the book to avoid giving the government a single coin.
* Serial Tweaker: A style of editing where someone makes a long series of minor edits to the same page, typically to resolve an issue with one of their own edits. It can fill the page history up with tiny edits and is thus considered undesirable.
* Series 10: The mid-season "Monks Trilogy" starts with "Extremis", a
* Series 10 was pushed back to Spring 2017 from the originally planned Fall 2016 by
* Series 1 (1992-1993) and 2 (1994-1995) to series 3 (2003-05) — 8 years.
* Series 11 had a specially-made trailer highlighting its guest stars, who included
* Series 12 finale "Skipper" sees Rimmer use a dimensional skipper to visit various alternate
* Series/13ReasonsWhy, Hannah feels this way about Clay and Tyler feels this way about Alex
* Series 13's "Cars For Teenagers" challenge, parking quietly at night. Hammond and Jeremy elected to push their cars into position. James, on the other hand, was doomed before he started...
* Series 1 has "Bad Wolf", in various forms, following Rose and the Doctor around space and time. They're
* Series 1 — to become heir to the throne, or at least get noticed by his father.
* Series 2 continually said that Rose was going to die, and Rose (narrating) introduces the final
* Series 2, episode 4: Margaret Cabourn-Smith gets grumpy about the fact that her only role in the last sketch is as an owl.
* Series 2 led to the speculation that Moriarty faked his own death and that he'd

return sometime in the future.
* Series 2 — not as clear as other seasons, but apparently to marry Queenie and become the richest and most powerful man in England.
* Series 3 has Mary Morstan, Charles Augustus Magnussen, and Sherlock and John's friendship becoming closer than ever.
* Series 3 of the trading cards spoils a lot of events (big and small) from the fifth season. Along with the card for Bulk Biceps stating that he has a part-time job at the Ponyville Day Spa (proven to be true in
* Series 4 does something similar with its final three episodes — "Turn Left" has a standalone plot and is a separate story officially but leads directly into "The Stolen Earth", which is a two-part story with "Journey's End".
* Series 4 — the clearest example of this, Captain Blackadder's endless attempts to get out of the trenches before he dies.
* Series 5 has Rory to Eleven and Amy. He's a bit character when he first appears, but eventually becomes a companion midway through it.
* Series 5 has Rory, who dies and gets erased from existence. He still manages to come
* Series 6 had a conspiracy thriller, a madcap pirate romp, a fantasy laden with horrors, a sinister clone saga, a
* Series 6 introduced the Silents, whose gimmick is that people forget they ever saw them the second they're not looking directly at them.
* Series 6's Ian rarely messed up and managed to win Star Baker three times in a row. He ultimately didn't win in the final, however.
* Series 7B had to contend with the aftermath of old companions leaving, the Doctor possibly leaving his travels, the Doctor possibly being on his very last incarnation, meaning a way had to be found for their life to be extended to allow a new incarnation to replace Matt Smith,
* Series 7 had the concept that 'every episode was a different genre of blockbuster movie' with movie posters for each story. In 7A, there's: a conspiracy thriller, an
* Series 7: The Contenders: Brooke Smith pushes this trope to its logical extreme in the dark comedy in which unwilling contestants in a reality TV show are forced to hunt down and kill each other. Smith plays Dawn, the heavily pregnant reigning champion, waddling her way between hits.
* Series 7: The Contenders Dawn garroting a victim from a past series this way.
* Series 8, despite having a brand-new Doctor played by a charismatic and well-liked
* Series 8 establishes Danny Pink as a love interest for Clara Oswald after the Twelfth Doctor, having regenerated into an older form, basically pushes her away and puts an end to the romance that had been brewing with the Eleventh (acknowledging that the Eleventh thought of himself as her boyfriend). This evolves into a somewhat bizarre
* Series 8 was essentially a variation on this: an elderly Doctor in his fifties, his two first companions being teachers from Coal Hill School (kinda), and a new regeneration cycle were all elements from the very beginning.
* Series 9 contains the example of Ashildr, a Viking girl who was given immortality by the Doctor. At first, she becomes a
* Series 9: "Face the Raven" was written as a standalone story — and is often listed as such — but becomes the opening salvo of a three-part finale in the final 10 minutes, which see the Doctor captured and handed over to a mysterious enemy and Clara, his beloved companion,
* Series 9 has Clara Oswald's lifeforce/soul ripped from her body at the end of
* Series 9 in 2015 ended on an open-ended fugitive arc, with the newly immortal Clara Oswald last seen on the run from the Time Lords.
* Series 9 in 2015 had some doozies, including: an issue of the official
* Series/9ss episode"Buck, Actually", a woman feeling ignored by her husband goes to great extremes on top of a freeway overpass to get his attention. When the husband showed up to prove his love to his wife he plays the song "In Your Eyes" by holding his phone above his head next to a cop cars' speaker system.

* series adaptation of; however, series-specific, Father Mulcahy was played by George Morgan in the pilot episode, before being replaced by William Christopher for the series proper - it's easy to forget Morgan as Mulcahy in the pilot, because Mulcahy never spoke in that episode. Ironically, Christopher had originally tested for the part, but instead of doing a table reading, ad-libbed much of his dialogue, which was unprofessional, and the part went to Morgan instead. Afterward, the producers decided Christopher's quirky personality was a better fit for Mulcahy, so they brought him back, on the condition that he would stick with the script.
* Series Addams Family. May be the maker as well. They're creepy and spooky and altogether ooky but generally loving and benevolent.
* series. After attaining godhood, Naruto and Xanna appear mostly the same as before, though with horns like Kaguya and Xanna's hair turns from red to white while Naruto is permanently in sage mode. In later stories, Naruto makes clear that neither of them are remotely bound to their physical form and simply use them to enjoy mortal pleasures such as food, sleep, cuddling, and sex.
* series all about an old friend of his who learned how to grow money trees, and soon owned a thousand forests of them.
* Series author Elizabeth George was openly displeased about the casting choice for Barbara Havers of
* Series background lore tells of a woman named Lamae Beolfag, chronicled in the book
* series: Bon Bon, a female pony, was given a very gruff masculine voice for the latter half of the series. Prior to that, what few noises she made were provided by miscellaneous audio clips.
* Series/Bull has the titular character getting jury duty. He rants as it's a waste of time since he owns a law counsulting firm, he gets excused quickly. Turns out, this time he had to stay.
* Series/Bunkd: In "Inn Trouble", after seeing Finn licking the "dirt" off of his arm, Gwen reaches over and puts her finger into the "blood" on his elbow and tastes it, recognizing it as raspberry jam. Lampshaded by Destiny who asked her what if it had been blood.
* series by Daniel Potter has The Veil, a force put in place by The Fey that prevents normal people from seeing the supernatural. It eventually becomes a major plot point. If the supernatural gets too obvious in an area, then The Veil will destroy that place and pass it off as a volcanic eruption, or an accidental nuclear explosion, or some other disaster.
* Series canon states that the very act of choosing a Slipstream path by an organic being makes their choice the correct one (kind of like the "Observer Effect" fallacy sometimes used to link Quantum Mechanics to pseudoscience), explaining why organics are so "good" at it and AIs can't do it.
* Series "Captain Scarlet & The Mysterons": At the end of EVERY EPISODE. But he Always Gets Better.
* Series/Chucklevision has the Chuckle Brothers tasked with protecting such a vase. Surprisingly, the vase actually survives the events of the episode, and instead, the ending of the episode involves it getting put into a cloning machine, and Paul and Barry find themselves having to smash all the cloned vases in order to preserve the vase’s uniqueness, as it’s meant to be the only one of it’s kind in the world.
* Series co-creator Ben Lifson gets in on the fun in #3 as the voice of a pompous prosecutor.
* Series co-developer Francisco Angones has said that Webby will not get into a relationship with any of Donald's nephews or vice versa. They're just really good friends who treat her like the fourth triplet on their adventures.
* Series composer Nobuo Uematsu likewise considerer the OST to be his greatest work, and the one he had the most fun with.
* Series composers Nick Balaban and Michael Rubin voiced Mr. Salt and Mailbox, respectively.
* Series Continuity Error: Events in a story that contradict previous explicitly established canon.

* Series Continuity Error, it was originally a hint to the planned reveal that it wasn't the real Michael, but a copycat killer.
* Series Continuity Error: The series at one point makes a very noticeable continuity error that is too glaring to overlook or excuse.
* Series Continuity Error: The work has several blatant inconsistencies regarding canon.
* Series Continuity Error when he tried to behave, though these events are moved to a later episode in the show. While they were still treated as wrong in both works, and apologised when called out on it by Skarloey, there was at least some founded explanation for their hatred of Sir Handel originally.
* Series creator J Michael Straczinski longer than that definition, to create an effect without "actually" brainwashing people. Other countries have stricter laws, requiring that segment to be cut out entirely for broadcasts in those countries. Ironically, studies have shown that subliminal advertising has no effect at all.
* series creator Reinhold Weege, the character was already called Harry, already a magician, and already a devoted Mel Tormé fan before Anderson was cast.
* Series creator Satoshi Tajiri's favorite Pokémon are Poliwag and Poliwhirl.
* Series creators Carter Bays and Craig Thomas appear in a late first-season episode of
* Series Creator Stephen Hillenburg has a vocal cameo in the film as the voice of a live-action baby who says, "SpongeBob!"
* Series creator Stephen Hillenburg was the original voice of Potty the Parrot. Executive producer Paul Tibbitt eventually took over after Hillenburg left the series.
* series details Matt and Karen's reconciliation in a series of snapshots. This includes having to work through Matt's unreliability during the trial, as well as explain why Matt swung from extremes like a pendulum as a result of Elektra.
* Series director Mic Graves' name has been seen on everything from books and logos to TV appearances (cf. "The Signal" where half of Gumball's face is cut off with a clip from a talk show called The Jack Dingle Show that has the topic "Mic Graves Ate My Hamster").
* Series director Peter Avanzino has described H.G. Blob as "a pain in the ass to draw."
* Series/Enlisted as he gradually decompressed the stress of years of combat. While his brothers celebrated the anniversary of a particularly close call, Pete had a breakdown because others did not survive that battle.
* series fanart involving a female Meowstic abusing her Espurr child (and Meowstic husband) in over-the-top-ways.
* Series Fauxnale, Kim is under attack by giant robots, calls Wade, and he's got another one destroying his room. Earlier in the film, Kim takes a call from her friend Monique for some high school gossip while flying down a street in central Tokyo on a grapple line attached to Shego's fighter jet.
* Series Fauxnales that completed the character arcs that were this trope.
* Series Fauxnale: The viewers think this episode is the end of the show, but it isn't.
* series feature genetically engineered humans capable of interfacing directly with computers.
* Series Finale, an alternate ending was filmed in which the main characters are found not guilty and do not go to prison.
* Series Finale and was advertised as "Starcrossed: The Movie". When it was released in the UK, the cover of the DVD indicated that this is exactly what had been released there as well; but nope, it had all three episodes UNEDITED, playing in a continuous manner.
* Series Finale, appropriatedly titled "The Doomsday Project", was the culmination of the show's climatic story arc. The titular device was a gigantic tower-like machine that produced UFO-like pods and dispursed them around Mobius in order to subjugate the remaining pockets of resistance on the planet.
* Series Finale as a whole. Q gives Picard a few hints, but by and large, Picard is

left to figure out the cause of the anomaly and what to do about it.
* Series Finale, Captain Picard is living in three alternate timelines, one in his past, one in his present, and one in his future, at the same time, and has to use information gathered in certain timelines to aid others.
* Series Finale comes within a hair's breadth of being named after this trope: "De Patre Vostro" (About Your Father...).
* Series Finale, features a subplot where Ms. Barch mistakes Mr. O'Neill's attempts at sympathy regarding her ex-husband as a marriage proposal.
* Series Finale is on his way to attack him and the rest of the Kids Next Door, when saying goodbye to Numbuh 5, he gives her his Sunglasses and promotes her as the NEW Numbuh 1 of the Team.
* Series Finale mentioned that she was supposed to be in the epilogue but they can't bring about her emotional state which led to rumors that she went insane after learning about McGillis's fate and Gaelio's role in it.
* Series Finale of Kryptonite, but in this case the Ectoranium is as much of a danger to humans as ghosts since it's a large asteroid that got knocked off course towards Earth.
* Series Finale revealed that The Mother had died six years before Ted began telling the story.
* Series Finale saying about humanity. Q begins to whisper something in his ear, then changes his mind, smiling broadly and bidding Picard farewell.
* Series Finale taken to the extreme. To hammer the point home, the penultimate scene shows the main characters gathered around a television set watching news anchor Howard Handupme deliver the final forecast: "And taking a look at the long-range forecast: continued snow, darkness, and extreme cold. This is Howard Handupme. Goodnight... goodbye." We then cut to the family's home being gradually covered with snow...
* Series Finale. The detectives come across a website of someone boasting they're going to shoot up and blow up a school while showing off enough ammo and explosives to make their threat credible. The scramble is to try to find the perp before he can carry out his boast. In the end, a school shooting does occur, but the shooter is overpowered before he can kill anybody. Also, at her retirement party, Van Buren learns that her cancer tests have come back negative, and happily introduces everybody to her fiancée.
* Series Finale, the equivalent of Artie at the future version of the Warehouse, is played by executive producer Jack Kenny, who also directed the episode.
* Series Finale. Their final scene has Drakken's flower wrapping them together and the two sharing a shy smile, but it isn't made clear what their current relationship is.
* Series/Firefly where Malcolm Reynolds is an Independent (Browncoat) trying to call for reinforcements, who pull out at the last moment because the Alliance had just sent in forces so large that they would most likely have annihilated both the ground troops and the cavalry.
* series follow (non-consecutive) generations of the Blackadder dynasty.
* Series Franchise: Franchises that have several distinct series and adaptations under their umbrella.
* Series Goal The only ones in on it are Wormwood and his parents. Averted as of Season 4 once the family finds out the truth.
* Series Goal was to see Arthur reinstate magic back into the kingdom. He dies before this ever happens, and though the episode (sans coda) ends with the image of Guinevere taking the throne after having realized that Merlin has magic, we're given no indication whatsoever about how her reign went, whether Merlin returns to Camelot, or how the magic issue is resolved.
* series, have had both art director Ko Takeuchi and series producer/creator Tsunku♂ express thanks and fondness for their fans' dedication to the franchise.
* Series Hiatus: A series goes on a break from releasing new episodes.
* series, Laurel brings her past self, Diggle, Tommy, Roy, and Thea 16 years into the future. She then shows them the first two years of Oliver's exile, the first

two years of his return (both are shown as videos made by downloading memories), and finally tells them details that happened after and as a result of the events of those early years. This is done in the hope that this knowledge will allow them to prevent the worst of the tragedies that await them. The third installment, deals with them having been sent back to their original time and starting to attempt to do exactly that.
* Series/Lovesick, Dylan plans a surprise party for his parent's anniversary. While waiting to surprise them, the parents come into the house and begin talking in detail about their excitement to have sex. Dylan immediately jumps up to stop them from talking.
* Series Mascot: A character used in advertising to represent a series or company. For marketing reasons, this character will often be cute.
* Series Mascot: An iconic character (usually good guys) chosen to represent a fictional universe or media franchise.
* Series Mascot but those are set on alternate Earths, making her appearance more plausible, if still token).
* Series Mascot in-part due to its popularity amongst furries. It's often accused by people who dislike it as being "furbait".
* Series Mascot: Most good guys serve as iconic characters chosen to represent a fictional universe or media franchise.
* Series Mascot Pikachu, all because it's incredibly lonely and wants to be as loved as the little electric mouse itself. Fans immediately adored the poor little ghost, and pictures of it sitting there just wanting to be loved and accepted have flourished.
* Series Mascot, was born on November 23rd, which is when the first Tamagotchi toys were originally released in Japan in 1996.
* series of ads coming in to complain about not being on their 8 meats pizza.
* series of ads, in tuxedos, facing each other across a stage and giving dramatic recitations of mundane text-message, Facebook and phone exchanges.
* series of adverts. They are notorious in fandom for the final advert, which depicted the relationship between the two characters as overtly romantic.
* series of bizarre exchanges, trading Captain Sisko's desk for an induction modulator from the USS Musashi, for a phaser emitter, which is finally traded for a graviton stabilizer.
* Series of iPhone commercials featuring celebrities asking Siri questions, playing broad caricatures of themselves:
* Series of Let's Plays. Want to experience Nakar's wonderful tales about the exploits of
* series of manoeuvres which are as fun as the credits themselves. There are also silly "intermissions" to watch between each set of names.
* series of novels by Donald E. Westlake. Dortmunder has an uncanny ability to snatch defeat from the jaws of victory by having the most unlikely things go wrong. He actually feels uneasy if everything is going too well on a job.
* series of old jokes with *NIX commands giving "meaningful answers". One of them is
* series of the same name, frequently gets drunk at restaurants and parties, resulting in slurred speech, falling over, and vomiting.
* series of TV ads for Dutch insurance Centraal Beheer use this trope as well, ending in the phrase "Even Apeldoorn bellen" ("I should call Apeldoorn" — the place where Centraal Beheer is headquartered.)
* Series of Unfortunate Events book is based on pretending he's doing this for authenticity.
* Series One plays it straight, with Baron Stellos sending out a new Hollow Heart minion each chapter or few chapters.
* series. On the commentary, Joss Whedon says he wanted the central planet settlements to look 'genuinely Utopian rather than just tall'. Thus the design of the cities notably omit crystalline spires.
* Series producer and co-director Kerry Shawcross also serves as the voice of Team SSSN member Neptune Vasilias.

* Series' recurring character Jiub has a gruesome scar over his eye that looks very much like an "evil" scar. Played straight initially, as he was a
* Series/Rome have friendly comparisons. Likely due to being made by mainly the same people.
* Series/Sharpe episode Sharpe's Battle, Sergeant Harper gets one when he comes across a deserter who had killed one of his men.
* Series/Skam The relationship between Noora and Wilhelm was catalysed by Noora telling the penetrator off for how he treats girls.
* Series/Skins. His whole character revolves around seducing Girls and a Boy for no other reason than boredom.
* series takes place over a period of six months or so, each book encompasses a variable period, ranging from a few to forty-eight hours, and only rarely more. These are always exceedingly eventful hours. Most of the unmentioned time seems to be spent in transit from one place to another.
* Series/Taskmaster: the dom/sub sexual tension between the Taskmaster and his assistant is quite intentional and played up more and more starting from series 3. By series 6 they've kissed on screen. They've also discussed it outside the show.
* Series that end abruptly or unsatisfactorily, as Henry Jenkins cites in
* series the animals and plants have mutated into huge monsters, and the predators among them frequently hunt humans as well. It's probably easier to list the animals (and even plants) that humans.
* Series/The Bill second spin-off series M.I.T (Murder Investigation Team) features ITV News presenter Trevor McDonald. The story was about the murder of Sgt. Matt Boyden. This show is a
* series, the Marquis de Carabas keeps "a piece of his life" in a box in case he is ever killed. He is.
* Series/The Vietnam War: A 10-part American television documentary series about the Vietnam War written by Geoffrey C. Ward and directed by Ken Burns and Lynn Novick. The first episode premiered on PBS on September 17, 2017.
* Series Three downplays it. The various Fallen Star prisoners often serve as enemies for the Rangers to fight and are treated like this, but they are given much less focus than the Hollow Hearts were, and are less frequent.
* series to fill in with fan characters, a vaguely-described laboratory for them to be born in, and a universe for them to explore. They made sure to take advantage of this.
* series, Tony Stark and Loki end up bonding over always being compared to someone else (Captain America and Thor respectively) and being unable to measure up despite being vastly superior in other, arguably more useful, ways (technology and magic). Furthermore, both were outcasts of their groups (Avengers and Asgard), seemingly unloved by their fathers, and had loving mothers who were brutally murdered.
* Series Two averts it entirely, instead putting the focus on the five
* Series VII also features Chris Barrie commenting on episodes he doesn't appear in (his character left in episode 2 but appeared in flashbacks in two more episodes after that) and for one episode he basically complains how boring it is, and the rest of the cast agree.
* Series/Weeds When Doug assures Andy that a raw egg mixed with a Clamato and some crushed Oreos will fix him right up after a rough night drinking.
* Series wide, she can never seem to keep track of what "normal" people do or act like no matter how many times the team try and explain it to her. She eventually
* Series/Wings, Lowell has spent months building a perfect scale model of a blimp, which actually flies under remote control. Of course, Joe tries flying it in his office, and it is smashed by someone opening the door into it.
* Series writer Doug Lawrence (better known as Mr. Lawrence) provides the voice of the villainous Plankton. Stephen Hillenburg had created Plankton as a potential villain for the show in 1997 but later feared that Plankton's plans would get repetitive and decided he would be better off as a one-time character. Doug Lawrence loved the character and used both his writing skills and his voice to prove that Plankton could work as a major antagonist. If it weren't for Lawrence's dual role as both the voice and writer for Plankton, his character would likely

never have become a major player in the show.
* Series writer Miles Luna provides the voice of Jaune Arc and the barking sounds for Ruby's pet corgi Zwei (but he voices the latter
* Series X, in keeping with Rimmer's luck, introduces his perfect match - one of the greatest erroneous reasoners in the known Universe - and promptly chucks her out of an airlock.
* Serignapatham and rescue intelligence agent Colonel McCandless. To prove his loyalty to the Sultan of Tippo, Sharpe is given a loaded musket and told to kill McCandless. Naturally, the musket doesn't fire properly. Sharpe later tells Lawford that he knew the gunpowder used to prime the musket was bad before he fired. However, he makes it perfectly clear later, that if the powder had been good he would have shot McCandless anyways to keep his cover.
* Ser Ilyn Payne serves as the Queen's Justice (read, headsman). He had his tongue cut out by the Mad King Aerys II Targaryen for suggesting that Tywin Lannister was the true power behind Westeros, and this made him a grim man in personality, who seems to deeply enjoy his work, beheading criminals for the King. At the end of the first book,
* Serina: All life on Serina is descended from Earth organisms, but that doesn't stop one clade of birds from evolving this.
* Serina are a species of highly-derived avians whose life cycle simulates the entire evolutionary history of life on earth. They hatch from eggs laid in water into a swimming tadpole-like form, and gradually grow into amphibian-like, reptile-like, and dinosaur-like juvenile forms before becoming arboreal gliders that eventually take to the sky as adults. The adult form, spending its entire life on the wing, lays its eggs by skimming over bodies of water to start the cycle anew.
* Serina being made in the assertion that their three-legged gait made them more efficient to the other quadrupedal bird-descendants they preyed upon (which is clearly a very unlikely case.)
* Serina can have wingspans of thirty feet or more. The archangel family in particular reaches the size of a small plane.
* Serina: Downplayed. The moon's oceans are largely similar to the ones of earth but a vast amount of phytoplankton in the water gives it a greenish tint. There's also the fact that when compared to earth, more of serina's oceans consist of shallow seas which allows a greater abundance of aquatic plant life and by extension, a more diverse array of animal life.
* Serina has the Polymorph Bird, a species with males coming in four different varieties: the large, aggressive Keepers, the smaller, monogamous Ardors, the deceptive, female-mimicking Tramps and the homosexual Bachelors. It's stated that without the other morphs none of them would be able to reproduce: the Tramps require Keepers to trick, for example, otherwise their entire mating strategy would be rendered useless. Even the male-to-male bonding Bachelors play an important role: they steal and adopt the eggs of other heterosexual pairs, which in turn lay replacements, thus actually increasing the fecundity of a population whenever they're around.
* Serina have six limbs. Curiously, they descended from the three-legged tribbets (terrestrial fish), but two fingers on each arm and two toes on the single hind limb became larger to aid in climbing trees, eventually developing their own fingers and becoming six functional limbs.
* Serina moon where a number of plants, algae, microscopic organisms and invertebrates were introduced, but only 8 vertebrates: 7 tiny fish (guppies, mollies, swordtails and platies) and only one tetrapod: the domestic canary. Over millions of generations, the canaries produce a bizarre array of species, resembling dinosaurs, mammals, reptiles and eventually even resembling insects and fish, while the guppies colonize the land and become analogues of amphibians, reptiles and mammals.
* Serina of different birds, such as the falocnaries and the sparrowgulls, and others take on forms such as the deer-like serezelles, the primate-like ornkeys and the aquatic fish-like eargills.
* Serina: The Kyran Islands were an isolated group of islands that where home to

various species of small burrowing birds called snuffles that hid from large predatory birds by hiding underground, but when the islands became connected to the mainland it allowed the small, mammal-like tribbetheres to enter the region, and unlike the native flightless birds they were able to follow the snuffles into their homes and eventually hunt them into extinction.
* Serina: The snuffalo are a species of large, flightless birds that walk tripedally, using their huge bills as a third leg. They rest its blunt tip on the ground when at rest in order to support their massive heads, and when walking they press it down in front of themselves and then use their huge neck muscles to pull themselves towards the spot where it's planted.
* Serina: The titular moon orbits a blue gas giant which is constantly visible in the sky. It also reflects much more light than our moon, making nights much brighter there then on Earth.
* Serina: The tribbets are tripedal terrestrial descendants of guppies that modified their tails and pectoral fins into three walking limbs. Beyond that, the various tribbet lineages develop a number of very unusual limb arrangements.
* Serina was seeded with select species by "mysterious creators", who then left them to evolve without intervention.
* Serina: While some of the creatures of the titular terraformed moon have developed bizarre bodies and behaviors many of the more abundant species have stuck to more basic lifestyles.
* Serina without physically meeting them and they may even feel sorrow if something were to happen to a Gravedigger that they've drawing with for years but they'll still attack each other if they were to ever personally meet.
* Serin's Izuki Shun is this as well. Among the point guards of the national-level teams, he's physically the weakest by a sizeable margin. However, his Eagle Eye, polished fundamentals (particularly passing and stealing), and his ability to read plays and predict upwards of three to four moves ahead allows him to go toe-to-toe with players like
* Serious Business a metagame. It is a phenomenon noted in Game Theory. Essentially, in many situations, there is usually a best choice and strategy. And more often than not, the only thing that can beat this is no plan at all as part of making a good choice in a game is based on what you know the other person to be doing. This is especially notable in games where patterns play a heavy part of the game like poker. The unseen corollary then becomes to switch to tactics that are particularly effective against new players.
* Serious Business and always gets upset when somebody else does his job.
* Serious Business, because of their tasty-but-illegal-due-to-bird-flu-meat. That or their superior cock-fighting skills in the case of Poyo!
* Serious Business clearly state without shame that the Davidic line (including none other than Jesus Christ) came from the Moabites through Ruth.
* Serious Business, fanatical approach to war. The Chaos Gods in particular take the conflict in the galaxy seriously since it is, in many ways, what fuels their very existence.
* Serious Business fort, which in turn becomes a massive school-wide pillow fight that is treated by the combatants (and a documentary crew filming a record of an attempt to break a Guinness World Record) as if it were an unseen chapter of the American Civil War.
* Serious Business, immediately stopped the game. Considering the size of the players in the modern game (supposedly 14-year-old players have been known to comfortably top six feet and be similarly wide), it was far too dangerous.
* Serious Business in New Zealand that at the 2013 New Zealand sportsperson of the year ("Halberg") awards, the host introduced Prime Minister John Key and national rugby team coach Steve Hansen as "the man with the most important job in the country, and the Prime Minister."
* Serious Business in this book — it's even mentioned that he took the title from another kid some time ago.
* Serious Business. In this light, Russians views themselves as the sophisticated Elves versus the crass, building-obsessed American Dwarves.

* Serious Business it was, accidental knockouts weren't really rare and were seen as okay to happen; the wrestlers were instructed to protect themselves at all times, and if they didn't, the price was simply a match ended before it was planned.
* Serious Business. Look instead for the USDA sticker and classification in the US (Grade A/B Light/Medium/Dark Amber).
* Serious Business. Many of the larger breeders treat their cocks in the same manner as professional athletes with facilities for exercise and sparring, as well as experts on hand for proper nutrition and veterinary care. The country also usually hosts the World Slasher Cup, basically the World Cup of cockfighting, on a biannual basis.
* Serious Business: Popular entertainment increasingly reflected contemporary social issues in the wake of Trump's election, primarily for him being seen as a threat to civil liberties and multiculturalism, but also the fact many voted for Donald as a way of "flipping the bird" at a seemingly progressive cultural establishment.
* Serious Business: Something insignificant is treated as if it's a big deal.
* Serious Business that people would occasionally bet themselves into slavery.
* Serious Business: The act isn’t technically a crime, but the blowback is just about as harsh.
* Serious Business. The only alternative to being a Slayer is being a submarine crewman: Dwarfs hate and fear water with unrivaled fervor. The majority choose to become Slayers. Yeah.
* Serious Business: Treats an activity as though it had much more importance than most people would give it.
* Serious Business version of "I love you") instead of the more common "suki" (the more informal version, and the one most likely to be used).
* Serious Business was usually had — may actually have been the result of this. Rather than it being a 'get the women out of the way' time, it's now speculated that the custom arose because after an hour or so at the table, most of the women would need to relieve themselves, but would be too embarrassed to leave individually lest anyone guess what they'd gone for.
* Serious Business when it's not just infuriatingly annoying, especially to her fellow Glee Clubbers who just seem visibly tired of her antics at times.
* Serious Business when Khal Drogo announces that he plans to cross it.
* Serious Business, with at least one instance of a wrestler losing a court case because he would not break kayfabe, even under oath.
* Serious Business. Yeah. Could be a nod to the stereotypical player of the game or the name of the sport's most famous invitational side.
* Serious coffee enthusiasts have started using popcorn poppers to roast their own beans.
* Serious controversy has been raised over the question of what happens when people are too tightly packed to move, or rendered immobile by injury (Both are likely scenarios in riots and firefights), especially since the long-term effects are largely unknown, but probably not good.
* serious damage; so we don't see Marion do this, but we do see Ally doing this to herself unconsciously as she tells the traumatic story.
* serious, dramatic example. The title character dies before he can win the battle, so they just put his body in armor, put him on a horse, and set the horse running so he can inspire the troops to victory... and he still ends up mowing down several enemies. This is based on a legend about the real medieval Spanish leader, Rodrigo Díaz de Vivar, El Cid. See "Real Life" for more details.
* Serious example would be in Water 7 where, Sanji kicked Luffy across the room when his captain was on the verge of telling Usopp to leave the crew during their argument.
* Serious fight scenes are interspersed throughout but there is always witty dialogue to accompany them. Characters are really good at ruining serious moods.
* Serious herself is on amicable terms with her ex Twilight, even joking that they had had breakup sex before breaking up.

* seriously, and often he will go out of his way to tease her or mock her, therefore unleashing her violent side.
* seriously, aren't they? She clinically calls this "blackcock fever". She also dealt with a case where a zookeeper with an inferiority complex chose to measure his erection against the length of a poisonous Black Mamba. This did not end well.
* seriously attempted to stop him (as opposed to punishing the mortal women or the children he'd fathered with them); Zeus thwarted her and punished Hera. Plato, incidentally, thought such stories were blasphemous for portraying the gods as petty, immoral jerks, and wanted to ban them.
* seriously by insiders, pets ARE family and privileges allowed to older school students.
* seriously compared, too expensive for the average blue-collar contractor or farmer (the original market for pickup trucks) to purchase new.
* seriously criticized for various reasons many of whom are fans of the Water Tribes.
* seriously doubt fanfic writers' ability to write a story in that universe as well as the author can.
* Seriously. From Kaiba onwards, it's hard to find a rival, antagonist, or villain who is willing to describe the little guy with an adjective better than "worthless", despite the fact that, time and time again, it and its many variations have protected its owners from monsters with godlike powers, saving them and the world as a whole from certain doom each time. (The worst part about this is, some of these folks use monsters that are, if you compare the numbers, even weaker than a Kuriboh, showing incredible hypocrisy in their words.)
* Seriously Funny. He talks about when he gets in a fight with his wife and storms out the house, only to run back in to get his keys and wallet. Or even worse, pack his son's baby bag so he can go with him.
* seriously hard tank. In fact, it had some of the best turret armor in the cold war period....This truly was a camper tank. Especially since, well, teapot.
* Seriously, have someone put you in cuffs for 20+ minutes and try not to do this afterward. It's impossible.
* Seriously... look at all the caps we've put on this page alone. We had way too much fun doing this...
* seriously pissed that he destroyed evidence by erasing part of what the victim wrote. Of course, Sophie may have simply said that to get Langdon to stop arguing and get moving.
* seriously scary when out of control, his actions being the only thing in the games that actually seem to frighten Haseo.
* seriously screwed up, largely due to the trauma and guilt he carries from the Time War.
* seriously screwed up the Commonwealth military once peace was over, infusing it with a lot of politicking that has lead to the richest nation having the least effective military. Due to a top-level political marriage with the the far more more militarily apt Federated Suns, the Lyran armed forces eventually got a good shakedown from their new countrymen and became a much more effective force.
* Seriously Scruffy: Can't strike a balance between work and looking after themselves.
* Seriously Scruffy: When a character doesn't go out and interact with people enough to warrant being clean shaven.
* seriously suggested this principle could have computational uses that may suggest more significant effects.
* seriously; the society does not see you as a real man until you have the certificate proving the completion of your dues.
* Seriously, though, ordinary secret organizations and their activities are not sufficient to constitute a Masquerade. A legitimate masquerade requires the existence of a "real" world that is VASTLY different from surface-level reality, inhabited by aliens, vampires, wizards, or other supernatural beings that need to keep their existence a secret. The hackers and cryptographers who work for the NSA aren't exactly supernatural, though they do know about your recent search for

* "(Seriously, we could have died. We probably still will. Faeries are tricky.)"
* Seriously Weird: Harris Pembleton, a new arrival from England, becomes a magnet for all that is weird after he disrespects Steve, the Ruler of The Weird Dimension.
* Seriously Weird: In "Ghost Train", a ghost transforms the diner into the runaway train he died on, with Harris and his friends still inside and hurtling towards certain doom.
* Seriously Weird: In "Harris and the Mermaid", Harris foolishly challenges Wayne to a swimming race, oblivious of the fact that he doesn't know how to swim.
* Seriously Weird: In order to get more slaves for building a pyramid in "When Pyramids Were Square", an ancient Egyptian sorcerer travels to the future and offers Harris a secret ingredient that will make his new soft drink irresistible - and highly addictive.
* Seriously Weird: In "When Yoghurt Attacks", Harris has a yoghurt which goes weird. The yoghurt then starts attacking people and hamsters. Harris's friends think that the attacks are done by Harris 'coz hes always in the place where the attacks are. They soon find out that it is the yoghurt doing the attacking and they kill it by blending it and putting it in the microwave.
* Seriously, Who Farted?!! about how he ended up giving $300 (mostly in small bills) to a monkey in Las Vegas who gives high fives. He was drunk at the time but still...
* Serious programmers tend to start lists numbering from 0. This is because the array indices of most programming languages start from 0, and computers usually count from 0 as well.
* Serious Rainbow (except when she found out she could have had C-cups).
* Serious Sam 2, numerous floating islands are found in the Ellenier chapter.
* Serious Sam 2 one ups this by having a fairy tale-themed planet. Naturally, new members of Mental's Alliance consisted of anything which can cast magic and shoot a machinegun.
* Serious Sam 3: BFE mission, Lani makes a joke about fat people and is blown up seconds later. He calmly admits that was karma.
* Serious Sam 3: BFE modern Egypt setting. The additions of modern shooters conventions like sprinting, reloading and aiming down sights is also contentious.
* Serious Sam 3: BFE, when a beheaded rocketeer's heart is removed with a melee kill, it still beats a couple of times.
* Serious Sam 3 included a extra enemy that was literally invincible, an undead red scorpion man. Players on the forums pleading for tips on how to beat this thing (proving they had a pirated copy) sure made fools of themselves.
* Serious Sam 3, seeing as that game is a prequel to the First and Second Encounters.
* Serious Sam adds a few normal enemies that also require explosives to kill - fortunately, at least one type is usually encountered around the same time the player finds crates of infinite C4 charges.
* Serious Sam after Mental destroys the Earth by crashing the Moon into it.
* Serious Sam, after seeing at least two choppers get shot down, (one of which he was ON at the time), Sam decides he's not going to get on any more choppers.
* Serious Sam and any version of Serious Sam 2, both of which have a more cartoony art style than the rest of the series. His chin's size and squareness toned down in the more realistic games in the series, though it could still qualify as a more grounded example.
* Serious Sam. And if there's any doubt, the tagline for the third game is "No Cover, All Man"
* Serious Sam, complete with the final boss music from that game playing. Shoot out the speakers and the music stops.
* Serious Sam cutscene, the hero tries to give a rousing speech, but an enemy mook messing with the microphone cable manages to time his disruptions of the speech so that it turns into one of these. It still works.
* Serious Sam games, a dying Biomechanoid will reflexively fire off one last laser bolt (minor) or rocket (major) as it slumps to the ground.
* Serious Sam Go far enough into the area, or pick up the powerups, and mooks start

teleporting in en masse.
* Serious Sam has an AI surgically implanted in the titular character's brain, which allows for later downloading of things such as maps and guides.
* Serious Sam has gone this route - competitive multiplayer is now free to play, with the actual singleplayer/co-op game available as the "Campaign DLC".
* Serious Sam has them, mostly in planet Kleer. Most of them are found in the aptly named Boneyard level.
* Serious Sam have quite a lot of these; whenever the player enters a new wide area, there is a lengthy cutscene that has the camera explore every nook and cranny of the area, usually also drawing attention to important artifacts and useful items that might be around.
* Serious Sam III: BFE: You go inside a pyramid where everything is crumbling and yet there are still levers that activate falling ceilings. Could be justified in that there might be some Sirian technology behind the scenes holding everything together.
* Serious Sam II start playing around with his loudspeakers, making it sound nihilistic at best. After a moment of silence, a sing child starts clapping anyway, soon followed by everyone else, before taking off in their planes.
* Serious Sam, interestingly, features these. Behind a lightly colored spot on a wall, you could expect to find a secret by moving to it or shooting at it.
* Serious Sam is a large futuristic pyramid on treads and plenty of weapons and reinforcements.
* Serious Sam it screams, continuously, from the moment it's created until it dies. It gets quite unnerving. Or annoying, rather.
* Serious Sam: Next Encounter. Good thing the player has plenty of weapons... Worth knowing is that the game is officially disregarded as non-canon.
* Serious Sam regarding the Scythian Witch-Harpy, which appear to be humanoid women with bird wings and feet. The creature's data file indicates that its breasts are actually non-functional, and are merely a false facade (a form of evolved predatory mimicry) used to attract primate prey for the harpy to kill and eat.
* Serious Sam: Sam doesn't wear the standard military uniform the redshirts do. Instead, he opts for an ordinary t-shirt and jeans.
* Serious Sam sees Sam wonder where he can find the imprisoned Simba shaman right outside a building with a huge neon side that reads "Lucky's imprisoned Simba shamans".
* Serious Sam send Planar Shockwaves of various sizes along the surface they explode on.
* Serious Sam series are monsters without a head, containing a big eye and mouth on its torso.
* Serious Sam serious the game is, this quote from the man himself: "Now I'm seriously serious!"
* Serious Sam starts out rather slowly with most of the enemies coming one by one. A pistol and a single shotgun are your only ranged weapons near the beginning. Taking cover is also necessary despite what the game's slogan is due to a lot of enemies having hitscan weapons. Near the end of the third level, first big battles start to happen and the pace of the game picks up a lot, and from there builds up to series standard in pretty short order. The lack of ranged weapons can be averted by finding secrets. Find the right ones and by the time you reach those first big battles you already have both shotguns, an assault rifle, and the laser gun; this still leaves you with little ammo for them until the point you normally acquire them, though.
* Serious Sam that wouldn't rely on enemy resources for reloads, and picked .45 Schofield ammo as the best thing they could give him.)
* Serious Sam: The First Encounter (though he functions the same way).
* Serious Sam: The Floaters, Spawners, Rollers, Rhino Cybertoys, Rocket Turrets, Fatso Fighter Planes, Seagull Bombers, and Giant Cyborg Spiders which are usually mixed in with the various other enemy types, primarily zombies, aliens, and bio-machines.
* Serious Sam There are suicide bombers that run at the player yelling despite

being headless.
* Serious Sam: The Second Encounter are supposed to take place in South or Central America, on our Earth, in the Mayan age. However, as you near the end of this set, the sky goes completely dark, and a bit later on the night-time sky is blue-purple and... is that a nebula? Cool and beautiful but quite bizarre.
* Serious Sam: The Second Encounter remakes, this cutscene was removed, leaving almost no explanation for why the ship Sam was taking into space is now on fire and half-embedded into a cliff in ancient South America.
* Serious Sam Ugh-Zan III. The "Super 8" DLC includes that model alongside 7 new ones.
* Serious Sam, where the literal dragon, after kidnapping the hilariously ugly princess, decided to surrender her to Sam without a fight; he refuses, and they fight over who has to take her. Sam wins and agrees to take her if he can also take the magic artifact he was after.
* Serious Sam who will charge at Sam and scream until they explode either from charging into Sam or getting blown the hell up. If you have a big enough space, it is possible to have the Kamikaze keep chasing you and screaming all throughout.
* Serious Sam (with more anatomically accurate carnage), and, should you feel inclined to, you can carve up corpses with your knife.
* Serious Sam, with the Great Pyramid serving as a communications device to summon a starship once the player takes the Sun Orb to it.
* Serious's parents had been this to each other until her mother's death, having only divorced when Serious's father realized he was gay.
* Serious Steven", the Crystal Gems fall out through a ceiling at the end of a tunnel, all landing gracefully except for Steven, who falls flat on his face.
* serious threat to warrant a file that begins with "SCP-682 must be destroyed as soon as possible."
* Serious training scenarios for emergency responders (military or civilian) will sometimes use professional makeup artists so the "victims" will have very realistic looking injuries. It's one thing to practice moving someone and pretend they have a broken leg; it's quite another when you see a realistic-looking bone sticking out of what looks like ripped-open flesh from a compound fracture and the victim making an ear-piercing scream if you accidentally touch the wound, combined with litres of realistic blood all over the place.
* serious villain Scourge. Sideways does it voluntarily, his zigzagged departures often ending in this.
* serious... when he opens his eyes and he calmly states he is not getting married to a tomboy.
* "Ser" is also used (in the same way, gender-neutral form of "sir") in the
* Serithtial from the Curse of the Crimson Throne adventure path is by default a bastard sword, though it can reshape itself into a bladed weapon more favored by its user. It was used to defeat the dragon warlord Kazavon, only to be lost in his castle of Scarwall when his slayers were killed by orcs and the castle was enveloped by a curse. The sword is dedicated to fighting servants of the evil god Zon-Kuthon (of whom Kazavon was a champion) and is instrumental in overcoming the adventure path's
* Serizawa's partner Vivienne Graham has no illusions about how dangerous some of the Kaiju she studies can be, but it gets showcased in the
* Ser Jaime and Tyrion of the wealthy and powerful House Lannister get by on Tywin's and Cersei's reputation as well as their family's gold. Subverted in "Walk of Punishment" when Jaime tries to bribe Locke into releasing him. Locke gives Jaime a well-deserved
* Ser Jaime Lannister finds ruling and scheming extremely boring and generally prefers to solve his problems with violence. When that is not an option, however, he can be quite clever. That he is
* Ser Jaime Lannister (who is both shorter and considered to be way prettier than her) thinks Brienne of Tarth is far too masculine-looking for a woman. She's very tall, wears her hair short, dresses in men's clothing and armor, and even bows rather than curtsies.

* serjeant for the same thing). No member of the British upper class would be caught dead being referred to as a servant in any way.
* Ser Jorah Mormont fled into exile to avoid punishment from Eddard Stark for selling some poachers into slavery.
* Ser Jorah Mormont fled Westeros to avoid punishment for selling slaves. Later, he is also banished from Meereen and Daenerys' side when Daenerys discovers from Barristan that he was initially spying on her for Robert Baratheon.
* Ser Jorah Mormont may be the son and heir-apparent of a lord, but his father's the lord of a remote, barren island in the
* Ser Jorah urges Daenerys to look away when it’s obvious her brother Viserys is about to die a
* Ser Jory is killed when he tries to back out of the joining, after watching Daveth die, though it probably didn't help that he pulled a sword on Duncan. However, Duncan does warn, "
* Serkis Folk: Animated characters are brought to life from computer-generated models controlled by people in costumes.
* Serkis Folk: Animating characters by filming computer-animated models controlled by actors in suits.
* Ser Loras Tyrell and Brienne of Tarth swear vengeance against Stannis Baratheon after
* Ser Loras Tyrell fits into Effeminate or Non-Masculine Appearance and Typically Feminine Interests (e.g. his enthusiasm for fashion).
* Ser Loras Tyrell, following King Renly Baratheon's death. "When the sun has set, no candle can replace it."
* Ser Loras Tyrell has even more glorious armor, with small flowery patterns covering every inch of it. Makes sense, given that he's as
* Ser Loras Tyrell is regarded as one of the most good-looking men in the Seven Kingdoms.
* Ser Loras Tyrell (see Literature above) literally has the shiniest armor in Westeros, at least in the first season, and apart from some
* Ser Loras Tyrell's face shows great anticipation and excitement as King Renly Baratheon removes his shirt in "
* Ser Meryn Trant uses his position as Kingsguard to abuse his power and hurt weak children as opposed to saving them. It's actually part of his fetish to beat little girls.
* Serpamia Flare. A bit of a literal demonstration of this trope in the names; Cain has great trouble talking about his brother in Chapter Two and refers to him in the past tense, while Abel expresses extreme distaste/anger at the mere suggestion that Cain may be involved with a situation at hand at the end of Chapter Two. They seem to have some past issues, though a hint in Chapter Three suggests the two brothers weren't always on bad terms.
* Serpamia Flare, Cain has his clothes stolen by monkeys while he's bathing in a hot spring. He eventually gets them back, but not before chasing them while naked and having his party members sympathetic to him, which understandably annoys Cain.
* Serpamia Flare, Cain reveals in Chapter Three that he bears the mark of banishment from his hometown, the Holy Capital.
* Serpci, an Egyptian pharaoh Boss Ghost, folds her arms as if she's going back into her sarcophagus once she realizes she can't escape her capture.
* Serpentera Rangers from retrieving the Sword of Light. Unfortunately for Zedd, and fortunately for the universe at large, Serpentera was never able to build up anywhere near that kind of power again.
* Serpent,, he also had contingencies in place for the Chinese-controlled Pacifica, plus Quebec separating from Canada and the Maritime Provinces, cut off from the rest of the country, joining the remainder of the USA.
* Serpentina, one of the characters introduced in the first issue of
* Serpent. In this version, the sinking was deliberate on the part of the Stockholm's helmsman. It isn't explained why until later.
* Serpent of Immortality: Snakes symbolize immortality, regeneration and rebirth.
* Serpent of Immortality, where the magical plant which grants eternal life and

youth is stolen by a snake, making it immortal. Gilgamesh didn't get a chance to eat the plant and had to go home mortal.
* Serpentor, in the cartoons, is noted to be even worse at this. He can snatch defeat out of the jaws of victory. To date, he has launched an armed invasion of Washington DC, crowning himself the king of a "1000 year reign" but makes absolutely zero preparations to hold on to the advantage he gained by the element of surprise and is deposed
* Serpent's Reach: The Majat homeworld is Alpha Hydri III (although the Majat call it Cerdin).
* "Serpent's Venom" features an interesting variation, with a space mine with an access panel designed like a combination lock. The scene goes all out with this trope, including a "No, Wait!", uncertainty over the correct code,
* Serpentwar Saga. His favorite gig was to threaten recruits. Given that his recruits were taken exclusively from people who had been sentenced to death or several years of hard labor, he really did have the authority to do it, too.
* Serpentwar Saga. Pug, Nakor and Miranda have finally tracked down the legendary wizard Macros the Black in their quest to get his aid in dealing with the Serpent Queen. Miranda (whose background has been a total mystery up to that point) addressed Macros as Daddy and then says
* serpentwithfeet, moniker for African-American musician Josiah Wise, is gay.
* Serph has two retractable blades protruding out of his forearms. At least they look to be part of his actual anatomy in that form.
* Serpico, as it's based on real events, documents Frank Serpico's role in the exposure of widespread corruption within the NYPD rank and file.
* Serpico brought up the deep corruptions within the New York Police Department.
* Serpico commission to supervise the police, because Internal Affairs has proven ineffective, and corruption is rampant in the NYPD.
* Serpico discovers that this trope has become corrupted over time — despite receiving a meal allowance, police officers still expect free meals. Serpico notices the free meal is often leftovers or something that isn't selling well, so he starts paying for his meal. This so alarms the cafe owner that he chases Serpico down the street with his money. After some argument, they agree that Serpico will pay cost only while leaving a large tip for the waitress. He then finds the staff treating him with a lot more appreciation.
* Serpico does this again in a second battle with Guts, choosing a room filled with pillars to stop his large sword. Guts cuts through them anyways.
* Serpico. Frank Serpico's colleagues are implied to have set him up to get shot in the face. One of Serpico's clean colleagues even warns him of the danger he's facing confronting the NYPD corruption:
* Serpico is able to get a rapist to name the other members of his gang, and tries to give this information to the detectives but the detective investigating the case has the day off and no-one else is interested, so Serpico ends up arresting the others himself. The detectives are embarrassed and their lieutenant threaten to have him brought up on departmental charges for not filling out his notebook properly (which he hadn't had time to do) unless he gives them the case. By the time Serpico's own lieutenant finds out about this it's too late to do anything about it.
* Serpico is definitely this towards his salf-sister Farnese) since he has devoted his entire life to her and really doesn’t appreciate Guts flipping Farnese’s world on its head. Serpico has fought Guts three times over Farnese and he even admits to Guts he wanted to kill him out of jealousy for giving purpose to her life. Thankfully Serpico mellows out and thanks Guts.
* Serpico. One of Serpico's fellow officers pleads with him to drop his corruption allegations because his life will be in danger. "They don't even have to shoot you. They just have to not be there when you need them." This is played out when Serpico is caught by a closing door during a drug bust, and his police colleagues don't do anything until after he's shot.
* Serpico. Serpico is even less impressed when he looks up the man's record and finds that he served time for the murder of a police officer. The other officers

can only say, "Well how were we supposed to know?"
* Serra died of plague some years ago and Illyrio still keeps a locket with her picture inside.
* Serra's Realm, now destroyed, was also known for its floating landscapes, but they moved in predictable patterns rather than Zendikar's "slam into each other at random" approach.
* SERRAted Edge and theorizes he may have started a rash of accordion thefts by convincing them of the magical nature of the instrument. Part of the reason they go insane is because they think Tannim is thinking about alchemical terms (and they can't figure out what the terms mean because he really isn't).
* Serrated Edge, so the forged license not being in any official databases is a moot point. Besides, all three protagonists are deliberately living "off the record" to hide from enemies.
* SERRATed Edge trying to figure out what the hell Tannim was thinking about.
* Serrator, due to being such a badass villain, always wiping the floor with the Rangers. His sophisticated, teacher-like demeanor also highlights his coolness. The only thing that matches Serrator's awesomeness is his sadism and evil.
* Ser Rodrik goes down literally spitting on Theon for his betrayal. And considering what Theon goes through later, with a
* Ser Ruth, another Grey Warden, turns herself in to the Inquisition after
* Ser Stafford Lannister, as with most Lannister commanders not named Tywin. Even though the Lannister forces had surrounding Oxcross completely under lockdown, they failed to account for the Stark direwolves, allowing Robb to get the jump on him and his men with the help of Grey Wind. In the books, Tyrion thinks very little of his uncle, and most are well aware that his son Daven would make a far better commander.
* Ser Stafford Lannister doesn't even get any screen time before being killed. The same is true of the books, as he's only mentioned briefly before and after the battle.
* Serta commercial, and wondering what they have on the couple next door.
* Servalan predicts that the crew of the Liberator will end up this way after Blake's departure and she's not entirely wrong — episodes like "The Harvest of Kairos", "Games" and "Gold" basically involve our anti-heroes attempting
* Servamp. A literal necessity in the creation of a subclass, which are vampires made by servamps through feeding a dying human their blood.
* Servamp are made of this. They cannot swim in running water, cannot separate from their eve or both will eventually die, cannot touch holy water without collapsing, will be weakened to the point of personality changes if their contract item breaks and turn into an animal immediately when exposed to sunlight.
* servant, is a conniving manipulator who eschews hair of any sort and is notably bald even in thousand year old murals depicting his younger days when he led the rebellion against the vampires who ruled over humanity in the past.
* "Servant of Evil". In the end, when the sister's castle was about to fall to an army after her head, the brother switches places with her, allowing himself to be executed in her place.
* Servant of the People: In season 3, Ukraine collapses into 28 separate states. The President's task is to try to put the country back together without repeating past mistakes.
* Servant of the People, ran for the actual Ukrainian presidency in 2019 and won in a landslide. He even ran under the "Servant of the People" party!
* Servant of the People starts with a history teacher learning he has been elected to be president of the country. While the episode itself follows him around on his first day, it is peppered with flashbacks that explain how such a situation came to be.
* Servant of the People, the president Vasiliy, a former history teacher, frequently imagines receiving advice from historical figures when he is in a dilemma.
* Servant of the People who always jumps on an occasion to discredit the new president.

* Servant Of Two Masters has Beatrice, who sometimes wore men's clothing, disguise herself as her brother.
* Servant Ruler is Saint Martha. Shirou comments that Martha looks like an older version of Sakura.
* Servants and Devils also have their psychological quirks—with Servant races having forged for one specific purpose and devils being desire incarnate, bound by many names they slowly learn to slough away, becoming more powerful and changing personality as they do so.
* Servants are partially shaped by what people believe about them in legends.
* Servants, being spirits of mythical heroes summoned in the modern day, are supplied with all the knowledge they need to function in the modern day upon their summoning so that they won't suffer from things like culture shock. Amongst this knowledge is the ability to speak any human language, allowing Servants to communicate with their Masters as well as other Servants no matter the language spoken (most often Japanese, because the Holy Grail War takes place in a Japanese city). In a drama CD taking place during
* Servants of Darkness, proving an accused woman's innocence by exposing the evil fey creature which is truly to blame for the misfortunes plaguing a Tepestani village. This is referenced in the 3e sourcebook covering the Tepest region, which reveals that the head of the Tepestani Inquisition was actually shaken so much that he has since tried to stamp down the anti-fey and anti-witch hysteria that his organization is building its power around.
* Servants of God the Hero wears a brown cape while Griffin and Ravinale guards wear white ones.
* Servants of Remnant: In "Released to Remnant", Artoria Pendragon battles a Goliath Grimm and destroys it after a bit of struggle. While she is catching her breath, a herd of Goliaths approach her, so she decides to escape.
* Servants of Remnant: In the story "A Sun for the Schnee", shortly after Karna saves Willow Schnee and her family from the White Fang, her husband Jacques has him arrested. Fortunately, James Ironwood lets him go after seeing that he has done nothing wrong and saved them.
* Servants of Remnant: Jason and Okita Souji are transported to the snowy region Solitas and start suffering from the cold. Jason gives Okita the Golden Fleece and she wraps it around herself.
* servants, they eventually got fed up with not fighting the Astartes and turned on one another, leaving the Black Templars to pick up the pieces.
* servants, though quite behind Sebastian, are still very lethal. We have Mey-Rin, who is an excellent case of Crouching Moron, Hidden Badass.
* servants which at least leaves them with a human appearance and semi-intact — though severely altered — mind, or force them through her Nutron Machine which leaves them far less intact and almost mindless outside of obeying her commands.
* Servant × Service and a dark aura emanating from her while relaying a message to Jyoji via Yutaka that dragging a female (i.e. Lucy) into a date is awful.
* Servant × Service, (As Hasebe mentions) but she's determined to find the civil servant who approved that name, and give him the business first.
* Servant × Service, his stuffed bunny avatar notwithstanding, speaks nicely towards his subordinates, invites them for merrymaking and leaves his desk often just to see life at work in his subordinates' shoes.
* Servant × Service. In fact her job choice has to do with this trope; she's legally a temp so she needs not to have fixed hours.
* Servant × Service in front of Lucy, making the latter to believe Yutaka is indeed a female for a few seconds!
* Servant × Service is dead set on preventing Yutaka and Lucy from getting together. Some of Lucy's hesitation on dating Yutaka originates from Chihaya making him sound more devious than he really is. This is mostly because she wants to cosplay Lucy and erroneously believes that so does he.
* Servant × Service spent a year as a ronin under this definition. This is

why she's the oldest of all the newbies.
* Servant × Service surrounding a ward office. Its author Karino Takatsu worked in one before becoming a manga artist.
* Servant × Service that he had to resort to working via a remote controlled bunny....
* Servant × Service, this is the reason why Lucy rejected Yutaka's offer to start dating. Initially, Yutaka was oblivious to it, and upon discovering it, he was quite happy &#65533; it means there's still a chance he can change her mind.
* Servant × Service, together with that of Miyoshi and Ichimiya to a lesser extent, caused his soul to exit from his body multiple times!
* Servant × Service when she thinks about the prospects of marrying.
* Servant × Service (with the exception of Touko, who's studying at home) in various places.
* Served as a funny moment during the "Improbable Mission" sketch on
* served Hokuto and blow up Tsukune's house just to torment him; they would have killed his mom in doing so if Gin hadn't gotten her out in time. While they're often acting under Hokuto's orders, there's no doubt that they enjoy doing committing acts of evil for the sake of it, and their brief revival via Babylon in Act V proves once and for all that even without Hokuto, they enjoy committing acts of wanton mass murder and city-wide destruction simply as a matter of course.
* serve raw oysters instead of cake. The children all come down with food poisoning. Including, at first glance, Lisa (a vegetarian). However, it's a subversion in that she only pretended to be sick so she wouldn't have to stay at the disaster of a party.
* Server Crash, a 4chan-made pen and paper game, is about all of humanity being trapped in cyberspace forever.
* Servers of games where you are kicked from hacking by moderators and administrators
* serves as a funny contrast to his small size. Except in the Japanese dub, where he has a cutesy, high-pitched voice.
* serves as this for Ty, Buzz, Warp and Rocket during their days at the Space Ranger Academy.
* serves as this to Mousse when he accidentally saves her from falling off a roof.
* Serviço Nacional de Informações, National Information Service) that existed from 1964 until 1990. The new name was created to distance themselves from the old image of an agency that focused on political repression and to emphasize the new focus on intelligence and data gathering.
* Service Academies, and not requiring prior enlisted service such as other commissioning programs such as Officer Candidate School.
* Service Games was originally founded as an American company, but after it opened its Japanese offices in the early 1950's, they would eventually be referred to as
* Serviceman 3rd Class (Private 2nd Class) — corresponds to the NATO OR-1/2
* Service Sector Stereotypes: Customer service jobs can be very tedious at best, humiliating at worst.
* service Telemóvel" was used to name the carrier on TMN's cell phones instead of the more usual "P TMN".
* service terms for Amazon's free game engine Lumberyard include a paragraph which notes that the engine is "not intended for use with life-critical or safety-critical systems, such as use in operation of medical equipment, automated transportation systems, autonomous vehicles, aircraft or air traffic control, nuclear facilities, manned spacecraft, or military use in connection with live combat", but with one exception:
* Service with a Smile, but everyone tells the police that Jaune unlocked his Aura on his own because it's technically illegal to unlock someone's Aura outside of very specific circumstances.
* Service with a Smile. Dejected, he opens a coffee shop. Despite his haunt being popular among the huntsmen and huntresses of Beacon and Vale's criminal underworld, Jaune's biggest threat is competition from a large coffee chain, and in one chapter he gets robbed and pummeled to a pulp by a bunch of common thieves.

* Service with a Smile doesn't cotton on to the fact Roman and Neo are criminals until they outright tell him. Likewise, he doesn't learn Cinder, Emerald, and Mercury are as well until Roman tells him.
* Service with a Smile. Later when he has a date with Miltia, his friends can give him proper advice because none of them (except maybe Yang and Coco) have been on dates before.
* Service with a Smile: Militia will stomp on anyone who tries to make Jaune miserable.
* Service with a Smile novels, the false threat of this is used to extract money. The Duke of Dunstable wants to derail his son's wedding, but Uncle Fred warns that simply bullying the son into to backing out (as would be Dunstable's first instinct) might result in a breach of promise lawsuit. Dunstable therefore pays the fiancee a substantial sum of money to go quietly. In fact, Uncle Fred knows perfectly well that both parties want out of the engagement anyway - they each have other spouses in mind, being stopped by (among other things) a lack of money. Dunstable certainly wouldn't help with that problem voluntarily, but by pretending that the fiancee needs paying off when she's actually quite pleased, Uncle Fred gets the money out of him anyway.
* Service with a Smile rigidly follows the belief that when you go to work, you leave your problems and prejudice at the door. Despite his racism against Faunus like Velvet, he treats her like any other coworker while they're working for Jaune. He later admits to hating children, but as Jaune points out, Russel still smiles and tells them jokes when they come in.
* Service with a Smile: Russel Thrush is a downplayed example. In his street clothes, he looks like a delinquent, but in his work uniform of slacks and dress shirt, even his mohawk merely makes him look "adorably wild" rather than thuggish.
* Service with a Smile were sent by his corporate rival Cafe Prime. Given that the robbers went out of their way to cause as much property damage as possible and didn't even check his apartment above the store for more money, it's pretty obvious they were hired to cause him financial trouble.
* Service with a Smile were you thinking!?" Jaune's father sheepishly says that the men of their family have submissive genes.
* Service with a Smile with power on par with the governments. When Jacques Schnee finds out about the insult, he just muses that utterly destroying them might be fun, and orders it done with as much attention as he might spare for ordering dinner.
* Servile Snarker: A servant who isn't above making remarks at their boss's expense.
* Servile Snarker in dealing with Bruce and more flippant to Gordon, and promo materials even state this Alfred came from the East End, a rough neighborhood.
* Servile Snarker: The servant isn't above making remarks at their master's expense.
* Serving Crazy With Curry presents two more modern approaches to this trope- a) the protagonist's older sister asks her parents to arrange a match when she becomes disenchanted with dating (the resulting match is less than successful), and b) the protagonist's grandmother decides to help her by finding some appropriate Indian men to present to her.
* serving in Afghanistan. There are several other special forces groups that do the same thing as PJ's, and they are often in their respective country's air force. A couple examples are Israel's unit 669 and Brazil's Para-SAR.
* Serving or having served there for an extended period (more than a year).
* Serving Sara, the main character needs to get into a building with a security guard at a desk in the lobby. Admittedly, this isn't exactly airtight security, but his method of distraction is worth this entry. The character is looking at a tow truck whose driver is changing a flat tire. Cut to the lobby of the building, and a flaming tire rolls right past the guard.
* Servis Station, Jordan the cook (played by famous Yugoslav comedian Midorag Petrović Čkalja) attempts to kiss Mara the future wife of Servis Station manager Raka (played by another famous comedian Mija Aleksić) while she was

washing laundry on the lake. When Mara pushes him and he falls in the water and she tries to run away, Jordan grabs her leg and begins to tickle her foot. Jordan clumsily falls into the lake again as Mara mocks him while running away.
* Servitors, cybernetic automatons used in all aspects of Imperial function, from scribes to maintenance workers to gun platforms. Their personalities and higher mental functions are completely wiped and their bodies are cybernetically rebuilt to whatever function they are meant for. They are usually vat-grown, but criminals, heretics, and failed Space Marine candidates can also face servitor conversion. The Imperium considers fully artificial AI heresy of the highest order, and requires all robotic lackeys of relatively high sophistication to be biologically human, supplemented by cybernetic augmentation. This taboo on A.I. (which stands for "Abominable Intelligence") stems from the
* Servitors). What exactly is and isn't allowed with regard to AIs seems to vary wildly between the branches of the Adeptus Mechanicus, the Imperial Clergy and the game designers. Every machine is expected to have a machine spirit which can be placated by offerings and prayer and some machine spirits are certainly more than superstition (advanced tanks like the Land Raider have at least an expert system), yet strong AI is definitely out of the question. Although, if the comic Damnation is to be believed, even a simple bolt pistol's Machine Spirit is intelligent enough to worry about whether it has failed its "master".
* Servitors, which the Imperium uses in place of robots for heavy lifting and menial labor, are created by lobotomizing a human and grafting them into the machine they are to control. Robots and true AI have been banned by the Imperium for
* Servitude, Godfrey passes out drunk and awakens with Josh hovering over him. He thinks Josh to be Jesus.
* Ser Willem Bootle’s attempt to pay back his debt to Collyns winds up being for naught, as Collyns had been executed as an associate of
* Seryu and numerous armaments that she had willfully implanted in her body. She is fanatically dedicated to killing criminals in the name of "justice."
* Sesame Beginnings demographic (ie the under-2s), starring Baby Big Bird, Baby Cookie Monster, Baby Elmo and Baby Prairie Dawn.
* Sesame characters) being retired or reduced to bit parts for many years.
* Sesame Songs Home Video, which were similar in format to the former series, only focusing on songs from the series. The releases came with a song lyrics poster.
* Sesame Street (2001), where Elmo learns about how an orchestra works from Big Bird and a bird orchestra.
* Sesame Street: 20 Years and Counting was dedicated to longtime series composer Joe Raposo and closed with a performance with his most famous song, "Sing".
* Sesame Street, Abby, Blogg, and Gonnigan are turned into fishes to look for Blogg's Slime ball collection when he accidentally drops it in the ocean. To light up a dark part of the ocean, Blogg claps against an electric eel, even saying The Clapper's slogan while he does it.
* Sesame Street: Abby Cadabby. Her faith in Oscar the Grouch's heart is unshakable.
* Sesame Street, a big party is planned at Hooper's Store to celebrate its grand re-opening. Snuffy gets stuck in the front door when he tries to go inside the store, so everyone else has to get in through the back door so they can push him out.
* Sesame Street: A classic Ernie and Bert skit "Ernie's Short Story" — which is the alphabet — comically twists this. After Ernie gives his usual over-the-top performance of it (a standard opening, followed by "the sad part," "the exciting part" and "the big finish") ... he leaves viewers "hanging" by stopping after "Y" and when Bert presses Ernie for the obvious conclusion ("Z"), Ernie says, "Wha? And give away the ending?" before giving his trademark giggle and Bert being frustrated.
* Sesame Street - a dangerous moral when trying to get kids to report child abuse to an authority like a teacher or the police. As a result, Snuffy was revealed to the adults, and to drive the point home, the adults even apologized to Big Bird for not believing him. However played straight in Abby's Flying Fairy School with Ms.

Sparklenose. For each crisis of the day, Ms. Sparklenose's guidance to her preschool-age students is always some variation of her telling them to solve the problem themselves.
* Sesame Street added an autistic character named Julia. Despite her displaying some stereotypical mannerisms of autistic people, she was universally praised by almost everyone, including Autistic people. It helps that her performer is the mother of an autistic child.
* Sesame Street, a green Anything Muppet guy (sometimes identified as Lefty) keeps approaching Ernie with offers to sell him letters of the alphabet, among other things. The most famous short is called "Would You Like to Buy an 'O'?"
* Sesame Street) airing after local versions have ended or other package programs. A few examples:
* Sesame Street (airing separately in the UK) are among the most notable.
* Sesame Street: A late-1970s sketch had Kermit the Frog going to a t-shirt store to pick up a custom-made t-shirt with his name on it. When he sees the printed name "Kermit the Gorf", he believes it to be a mistake, only for a monster with that name to come in and claim the shirt. The same thing happens with monsters called "Kermit the Forg" and "Kermit the Grof". The one for him? Not ready yet.
* Sesame Street. Almost an opposite of the trope, as her singing is a lot more prominent.
* Sesame Street alphabet segment utilizes different art styles and writing techniques.
* Sesame Street also has Elmo on the cover, though the special is about Oscar, and Elmo only appears in flashback clips.
* Sesame Street. Also, Oscar the Grouch, and the other Grouches by extension, in a different sense from the Count's.
* Sesame Street, and an episode was produced explaining his death in-universe as well. The cast was so emotional, they were unable to do a second take without breaking down.
* Sesame Street, and another Muppet (Big Bird/Herry) gets jealous of all the pampering they're receiving and wants to be sick too. But then he does get sick too and learns that it's no fun.
* Sesame Street and causes one of the coconuts from it to fall and hit him on the head.
* Sesame Street, and it turns out the spider just wants to be friends.
* Sesame Street and other big prime time shows. As a matter of fact, the puppets that evolved into Grover and Cookie Monster made their earliest appearances on Sullivan's show.
* Sesame Street and try to figure out what it is. Incredibly, the two lovebirds never notice the incessantly yip-yipping aliens right in front of them.
* Sesame Street and whenever someone said the word "zero" he would rush off to change with an excuse like "I have to go answer my television" or "I think I left the cat on."
* Sesame Street, and you've probably heard of his daughter - Holly Robinson-Peete. Hal Miller took over from 1972-74.
* Sesame Street are main characters, and unlike their portrayal as antagonists in the fairy tale, here they're just a normal family that happens to be comprised of anthropomorphic bears.
* Sesame Street are usually handled this way. The Muppeters just have their character enter into a dialogue with a child about a certain topic, and the production team keeps what they can use.
* Sesame Street: Around the mid-1980s, Oscar the Grouch owned a "grouch computer." The buzzword back then was "friendly computer," which simply meant easy to use; of course, with Oscar involved, the "friendly greetings" were replaced by "grouch" ones. Other Sesame Street residents (notably, Luis and Maria) also owned a computer. All segments with computers were used to teach basic computer skills and workings of computers. And of course, these were computers that were state-of-the-art for the era, at a time when they were far less common.
* Sesame Street, As Big Bird whines and complains about the death of Mr. Hooper

that who would take over Hooper's Store. And David replies "Big Bird, I am going to take care of the store. Mr. Hooper left it to me. I will make you your birdseed milkshakes, and we will tell you stories and see you are okay."
* Sesame Street: As Ernie prepares slices of pie for both himself and Bert, he gives Bert a tiny sliver, and himself a large slice.
* Sesame Street asking for a big, bigger, and biggest balloon (popping the first two he's offered); the biggest balloon causes him to fly up into the sky, but it gets popped by an equally big bird soon after.
* Sesame Street: A solid 5; the show premiered in 1969 and has shown no signs of stopping since, having thoroughly engrained itself into pop culture as an icon of children's television.
* Sesame Street. As such, he will also sometimes refer to someone he's talking to directly in the third person, for example, "Elmo thinks Abby could ask Julia to play again" instead of "I think you could ask Julia to play again."
* Sesame Street as the monster in Ernie's lie with a second piece of cake.
* Sesame Street. At first, everything is fine... until Oscar notices a single bird flying a little too close for his tastes...
* Sesame Street because it was "the least bad title" they could think of.
* Sesame Street) before (or even instead of) ever seeing the original Chaplin movies. Either that, or they saw the original TV and print ads for the IBM PS1 computer, which adopted Chaplin as an unofficial spokesperson (four years after his death!) in 1981.
* Sesame Street, being only six years old, and living on his own, several of the adults on the show act as a parental figure for him, notably Gordon, Susan, and Maria. This gets lampshaded in one episode when Big Bird has to check into the hospital, and the receptionist asks Maria if she's his mother. She replies, "Not exactly... kind of... yes."
* Sesame Street: Believe it or not, Elmo qualifies as "Military Kid". A series of videos produced to help children whose parents are deployed established that Elmo's dad Louie is "away helping people", with the implication that he's in the military.
* Sesame Street: Bert is Ernie's best friend, but when Ernie sings, Bert often doesn't like the songs due to them getting in the way of what he's doing. He'll often learn to like them halfway through, though and may even dance or join in. This will usually be punctuated with him noting that the song is admittedly "kind of kickin'".
* Sesame Street: Betty Lou (never as prominent a character on the show as in the tie-in storybooks, but still present) is a little Anything Muppet girl with long braided pigtails.
* Sesame Street, Big Bird needs to find a camel. That's all he knows. Naturally, there are no camels in China, so he goes sightseeing in a sculpture garden...
* Sesame Street bit features the Ten Little Greeblies, who one by one meet tragic fates, including "Four Little Greeblies, Swimming in the Sea, One Forgot How! and then there were three..."
* Sesame Street book "Elmo's Good Night Stories". Elmo's mother sings him a bedtime song during the chapter "Elmo's Lullaby". The next day, Elmo wants to sing it to his friends, but he can't remember the lyrics or the tune, so he loudly sings about shaking your fingers and your toes. Ernie even notes that it's more of an energetic song than a lullaby.
* Sesame Street. Brian Williams (who suddenly had Mine-Itis) takes Oscar's reward away.
* Sesame Street, but as a canonically separate character (Bip Bippadotta rather than Mahna Mahna).
* Sesame Street, but Ernie keeps bothering Bert and the other moviegoers by eating his snacks loudly. At one point, Ernie drinks a can of soda noisily through a straw, which causes Bert to lose his temper and yell at him to be quiet, at which point the usher enters and throws Bert out.
* Sesame Street by Cookie Monster known as "Cookiegate". Kermit was there too, acting as Cookie's lawyer (for some reason).
* Sesame Street carrying the London Log, and the London Hog. Then the fog clears

up, so they all dance the London Clog.
* Sesame Street cartoon featured a kid sure that there was an alligator in his room, but his mother couldn't find it. It turned out to be his dog having some fun with a flashlight.
* Sesame Street characters, performed some of them and even directed some shorts for it, he didn't actually create the show or direct any whole episodes.
* Sesame Street Christmas record (not sure if it was recorded from an actual episode, but if it was it must have aired a while ago) includes a skit in which Bert is very excited to hear that he has the lead role in the Christmas pageant, only to discover that he's playing a Christmas tree.
* Sesame Street: Countdown, the sixth level takes place in a western town.
* "Sesame Street" Cred: A celebrity has a guest role on a children's television show.
* "Sesame Street" Cred: Well-known actors and bands appear on a children's program.
* Sesame Street Day, established in New York City to acknowledge the show's anniversary.
* Sesame Street debuted on November 10, 1969, and has run to this day, with more than 4,500 episodes so far.
* Sesame Street depicts a number and animals on each page. The one for the number 10 shows "10 friendly dogs" and depicts Ernie being dragged along by those dogs and shouting "Whoa! Slow down, you guys! What's the rush?"
* Sesame Street director Lisa Simon died on April 4, 2015, the day of her 64th birthday.
* Sesame Street, during a "News Flash" segment involving Old King Cole:
* Sesame Street each), but the vendor makes the mistake of filling the order backward. After Ernie complains, the vendor tells him to eat the stack-o-flavors "standing on his head".
* Sesame Street: "Elmo's Potty Time" is mainly educational, but there are a few joke moments, like a giant primate needing to pee and chasing a giant toilet, jokes during a song about toilet paper being made (such as when a large toilet roll is being seen in the manufacturing process, asking, "If the roll ran out, would we hire a truck?!") and kids shouting synonyms for pee and poop, the peeing part ending in a shout of "I REALLY NEED TO URINATE!".
* Sesame Street, Elmo, Telly and Abby Cadabby enter Abby's tablet computer and become CGI versions of themselves. At the end it's inverted, when the antagonist of the computer game follows them back to Sesame Street, and becomes a Muppet.
* Sesame Street episode about Up and Down, Mr. Noodle falls onto both sides of this trope when Elmo asks him how he goes up and down on a seesaw. He first places an ant on one end of the seesaw, and when he gets on the other end, he launches the ant into the air (when he lands, the ant says he's okay). Mr. Noodle then gets Snuffy to push one end of the seesaw with his snuffle while he sits on the other end. At the end of his segment, Mr. Noodle is launched into the air by Snuffy.
* Sesame Street episode, Bert is away and Ernie pretends he's at home because he's lonely.
* Sesame Street episode spoofs this in classic Grouch fashion: Oscar's mother washes his mouth out with ice cream as punishment for saying "please."
* Sesame Street episode where the letter T goes missing, which results in a "trash" sign now reading "rash" and Telly's name being written as "Elly" (which isn't a name, but is close to the girl's name Ellie).
* Sesame Street, Ernie is using a video camera to record things on the street. Bert says no-one will want to see Sesame Street on television.
* Sesame Street, Ernie or Bert can expect any of the lovable monsters to drop in for a chat and an exercise or lesson.
* Sesame Street ever did; explaining Mr. Hooper's absence was a debate behind the scenes, but the decision to truthfully explain his death to children in the manner of which they did, and the genuine emotion on the set the day of taping, made this Sesame's finest moment in Spinney's memory.
* Sesame Street. "Extra! Extra! Four people fooled!" Then Ernie buys the newspaper, discovers there's no such article, and the newsboy shouts, "Extra, Extra! Five

people fooled!" This joke is sometimes used by other children's media.
* Sesame Street features a blue Big Bird called Pino, who started out being played by a man. When he retired a woman got the role, there was actually some debate among the creators about whether they should make the bird a pink girl and rename her Pina. In the end they chose gender confusion over gender bending.
* Sesame Street film insert about a rolling ball kinetic sculpture on the number 3 has two endings. One has a kid cranking a sand-machine, the other has three cherries on sundae (Jim Henson's daughter played the girl who tasted the cherry on her sundae ice cream).
* Sesame Street finally got a comic book adaptation in the second quarter of 2013.
* Sesame Street) flee from what the shadows suggest is a giant boulder... but, upon their safely getting outside, turns out to be merely the treasure — which is the size of an actual head of cabbage. Big Bird turns to the camera and notes "Gee, I thought it would be bigger."
* Sesame Street for 50 years. When he retired, he was 84, making him the oldest example of this trope.
* Sesame Street: For allegedly being the smartest girl in the world, Alice Braithwaite Goodyshoes gets it coming in spades.
* Sesame Street for many of the first generation of Muppeteers, the former also launched the careers of several of the newer Muppeteers.
* Sesame Street from 2011 has Baby Bear embarrassed to be playing with a baby doll and hiding it from Telly when he comes to play. When Telly discovers the doll and realizes it's Baby Bear's, the bear runs away in panic and explains his situation to Gordon, who tells him it's no problem if he's playing with what's usually considered a girl's toy.
* Sesame Street from a fruit bat into a generic Monster is that she was flying through a windy cave and her wing flaps fell off. She never even felt it.
* Sesame Street game show sketch "The Triangle Is Right" after Carl Mericana answers "A Circle".
* Sesame Street had a closing credit sequence in which Barkley the dog played hide-and-seek with a large group of children, who hid behind a tree too narrow to conceal them all.
* Sesame Street had a skit once where Ernie decided to rhyme any word Bert would say. Bert, getting supremely annoyed at one point yells out "HIPPOPOTAMUS!" Ernie pauses for a moment before replying with the completely made-up "ripotatapus."
* Sesame Street had Ernie going over to his neighbor Herbert Birdsfoot to borrow his vacuum, and starting to muse on how Herbert usually takes a bath about this time. He worries about Herbert getting mad over having to get out of the bath and answer the door, and probably bad-mouthing him to his friends, etc. By the time Herbert does answer the door, completely dressed, dry, and in a good mood, Ernie's too worked up to notice.
* Sesame Street had Oscar the Grouch creating such a device for opening his trash can lid. An animated short also displayed the alphabet using one of these.
* Sesame Street had Oscar trying to get the theme song out of his head.
* Sesame Street had Placido Flamingo accompanied by an orchestra of animal noises.
* Sesame Street had slapstick and word-play for the kids, with parody as the Parental Bonus. And occasionally even some wordplay that was clearly not for the kids:
* Sesame Street had two different episodes where every instance of a certain letter vanished from street. In Episode 3907, all the letter T's run away from the Street until the gang are able to entice them back. A year later in 2001, Episode 3972 had Mumford make all the letter S's vanish from the street.
* Sesame Street, Harvey Kneeslapper once had a bucket of confetti triggered by a rope. A series of subversions followed.
* Sesame Street has a Muppet kid named Alex who has a father in jail. Older characters explain what incarceration is, saying when somebody violates the law (a grownup rule), they have to go to jail or prison.
* Sesame Street has an episode in the 1990's where Baby Bear got a new tie from his aunt. After it blows away in the wind and lands in the mud, Baby Bear washes it

only for it to shrink down to finger size, leaving him to spend the rest of the episode's plot trying to find a way to fix it.
* Sesame Street has an ice cream company called "Bad Humor", run by grouches. They sell ice cream flavors that appeal exclusively to grouches, such as chocolate-covered pickle and spinach vanilla crunch, and will not stop ringing their bell until someone buys their ice cream.
* Sesame Street has a scientist character named Dr. Nobel Price, who keeps inventing things that had already been invented. Some of his most notable creations include foot-snuggies (socks) and the speaking stick (a microphone), and he discovers an animal that he calls the Great Poonga-Poonga (which turns out to be a rabbit).
* Sesame Street has been notorious for this since Elmo was made the central character of the show. One big example of the show's love of this trope being the infamous Tickle-Me-Elmo.
* Sesame Street has Ernie alone in the apartment while Bert's away visiting his brother. Ernie makes two calls of this type, first to say he's thirsty and then — after getting a drink of water per Bert's suggestion — to tell him he can't sleep. An unheard Bert suggests counting sheep, which Ernie proceeds to do... out loud, with Bert still on the line.
* Sesame Street has RNN where the R stands for Ridiculous. Hence the name, Monty reports this with he wonders to do and Big Bird can't seem to define.
* Sesame Street has several instances of the characters hearing the score.
* Sesame Street has skits about Baby Bear's living drawing Hero Guy. In one of them, they jump into their picture of a boat but Baby Bear has forgotten to draw the sea. However, this makes them so sad that together, they cry enough to make the ocean.
* Sesame Street has the iconic green street sign with a yellow outline surrounding it.
* Sesame Street have appeared in a number of direct-to-video productions:
* Sesame Street). He also works as a dance instructor, under the name Prince Cha-Cha-Charming.
* Sesame Street" He did have a more sinister one when he started out, though.
* Sesame Street. He finally encounters a tall man hidign behind a yo-yo who tells him that to get back home, "Try to remember everything you passed, but make the first thing the last." In other words, go back the way he came, seeing the same weird things but in the opposite order.
* Sesame Street He requires crossers to answer questions about shapes (and sometimes to play a tune) before they can pass him and cross.
* Sesame Street He tries to play it off, admonishing the reader for being scared, then walks away feeling embarrassed.
* Sesame Street. He was perceived by the vast majority of the adult cast as a figment of Big Bird's imagination until extreme steps were taken to forcibly prevent him from once again fulfilling this trope by leaving the room just as the gathered adults were supposed to meet him. Behind the scenes, the evident reason for his final unveiling to the adult cast was due to fears about young viewers learning the wrong lesson about attempting to tell the truth.
* Sesame Street. His foreign counterparts also play the trope straight, including:
* Sesame Street. His most well-known position was as a waiter at Charlie's Restaurant, opposite the Blue Man, and even these expanded into a wider variety of spots — as a hot dog vendor, a taxi driver, elevator operator, etc. — all thoroughly incapable of satisfying his one recurring customer.
* Sesame Street history done in a single take because the cast was too emotionally wrecked to do more takes. It speaks volumes that the single take captured genuine emotion and showed that grown-ups, too, can feel sad and cry when people they love die, which played a huge role in keeping the scene at one take... and also played a major role in the scene's critical acclaim.
* Sesame Street, however, he found some success recording albums of kids' songs.
* Sesame Street". However, it was reused for a few episodes in season 40 alongside the normal-sized Zoe.

* Sesame Street: Human characters Maria and David were hooked up until the mid-1980s.
* Sesame Street indeed. Hilariously, it first popped up during a scene that Cookie Monster was in, which may have momentarily confused the show's young viewers.
* Sesame Street: In episode 3990, Elmo reads to María a story he wrote and illustrated about an imagined trip to a planet with two suns in its sky.
* Sesame Street: In Episode 4007, Grover runs a popcorn stand, and has difficulty getting the popcorn to pop. Emily suggests that Grover turn the machine on, and when Grover does, the popcorn begins to pop faster than he can fill the boxes, eventually engulfing him. After Bob shuts the machine off, several chickens dig into the popcorn to free Grover.
* Sesame Street in German TV, "because there were no poor children in Germany, who would play on dirty streets."
* Sesame Street. In recent years, a handful such as Henson's Guy Smiley have been recast to new performers and make sporadic new appearances.
* Sesame Street insert, balloons shaped like the letters from A to Z were popped by a speeding bird.
* Sesame Street insists on avoiding the use of contractions because he is obsessed with doing everything right, according to his original performer, Frank Oz.
* Sesame Street interrupting the series for a "fast-breaking news story," usually involving a fairy tale or nursery rhyme spoof (that doesn't go as planned, in most cases.) They were a regular part of the series until the late '90s, when they began appearing less and less, before disappearing from the show completely after 2001.
* Sesame Street (in the 70's), the adults show the kids how to make masks out of paper grocery bags. Mr. Hooper is given one that actually looks a bit like him and he goes outside wearing it. Big Bird sees him and asks him if he got a haircut.
* Sesame Street is adapted internationally this way with dubbing, either alone or combined with original live-action footage. The Israeli and American teams also collaborated to produce a series about Western Jewish culture.
* Sesame Street is a list of all of the puppets that have been recycled.
* Sesame Street is a very compassionate and kind-hearted veterinarian.
* Sesame Street is dedicated to two mannequins in a store window. One's male and the other female, but both are dandy-looking. They give a little performance in synchronized tap dancing.
* Sesame Street is distributed to Sesame Workshop and is used to fund the show and other Sesame Workshop projects.
* Sesame Street is literally based on this; how many pre-schoolers have heard of London's exceedingly upmarket Dorchester Hotel?
* Sesame Street is particularly noticeable at the beginning of the song.
* Sesame Street is prepubescent, but has pigtails (complete with hairbows), eyelashes, and a blue gingham dress to clue viewers in that she's a girl.
* Sesame Street is probably a Manic Pixie Dream Sheep. She is always bopping Murray and dragging him off to various schools. However this could be a subversion, as Murray has always been just as energetic as Ovejita is.
* Sesame Street is probably the longest Edutainment Show that's still currently running.
* Sesame Street is set in New York, in an unnamed borough (probably Brooklyn or Queens).
* Sesame Street is usually only seen from the waist up on the show, various merchandise of him, as well as his illustrated appearances depict him wearing only a pair of red and white striped pants.
* Sesame Street is well known for treating their characters outside of the show as actually what they are and not as puppets...unless it involves dealing with something controversial. After gay marriage was legalized in California, someone posted a petition online suggesting they have Bert & Ernie get married to teach tolerance about same-sex marriage. Sesame Workshop refused, citing that Bert & Ernie are only puppets, and therefore, have no gender.
* Sesame Street itself is now under fire from some quarters for allegedly being subversive and immoral.

* Sesame Street. It takes them four tries to find a channel they like, but they do it - one that sounds suspiciously like static.
* Sesame Street; it was once quipped that the show "entertains parents so much they force the kids to watch."
* Sesame Street, Jim Henson, Frank Oz, and Caroll Spinney were the only regular Muppet performers (occasionally they would be assisted by John Lovelady or Danny Seagren).
* Sesame Street just a year later, and his actor Northern Calloway died soon afterward.
* Sesame Street keeps his job as waiter at Charlie's even though he constantly gets his customer's order wrong, though Grover means well. Of course, Charlie's Restaurant is one of the few places Grover is shown to be employed at regularly (he also worked at the Mail-It Shop during its brief run, but seems to have been more competent in that job).
* Sesame Street laughing when Kermit tells Grover to pick up the piano.
* Sesame Street Live license, and the loss of their Sesame Street license to rival producer Feld Entertainment.
* Sesame Street-long tribute to Muppet performer Jerry Nelson by means of honoring his most prominent character, Count von Count.
* Sesame Street, many female Muppets were voiced by males. One main example was Gladys the Cow, performed by Richard Hunt. Additionally, Hunt and Jerry Nelson and Frank Oz did many other incidental/one-time female characters, many of Oz's female characters sounding almost exactly like Miss Piggy.
* Sesame Street — not because of any lack of quality, but because it has an active, loving adult/teen fanbase that rarely has anything bad to say about the show, and viral segments from the show tend to be universally praised. This can baffle people who don't really see the appeal in a show that is (and always will be) an educational program for very young children.
* Sesame Street. Miles was adopted in 1985, while Gabi was born in 1989, but they both graduated from high school in 2006.
* Sesame Street, more or less. Played straight, as a teaching routine; viewers were asked, in this game of same and different, to identify the odd item out of a group of (typically) four, such as three boxes having different breeds of cats, and the fourth having a dog. At times, actions were depicted and the object was to pick the box with a different type of action (such as three kids dancing or sports activity, while the fourth kid is engaged in a sedentary activity such as reading). The song that played during all this was "One Of These Things," with the lyrics sometimes varied due to the subject.
* Sesame Street Muppet sketch, Ernie has just come out of the bath, but he has forgotten something. As Bert tries to guess what Ernie forgot, Ernie realizes that he forgot to turn off the bathtub faucet. At the end of the sketch, the apartment has filled with water.
* Sesame Street News Flash segments involving Santa Claus, airing at different times of the year. The first of them, which also involves the Easter Bunny and a witch, first aired in January, while the second, which has Kermit watching for Santa to come down the chimney, first aired in April 1989 (and was actually taped on December 20, 1988, just five days before Christmas).
* Sesame Street newspaper comic strip of the early 1970s had a variation on the "bacon and eggs" archetype: A little girl says, "If I had more light ... I could read a book ... if I had a book ... if I could read."
* Sesame Street of a rock band playing in a dark alley), someone is dropped like this to go with the lyrics, "And don't walk under a fallin' piano."
* Sesame Street of Julia Louis-Dreyfus cursing in front of Elmo and Zoe.
* Sesame Street often pre-screens episodes with focus groups of children, to make sure they grasp a message or educational concept before the episode is approved for airing. However, the kids in the test audiences were so emotionally distraught over the episode that it never saw the light of day on PBS, and to this day, remains unaired.
* Sesame Street often uses this trope for comedic effect to teach simple concepts

and moral lessons. One well-remembered example was "Cookie Monster at the Library," where Cookie repeatedly asks the librarian for a box of cookies (after giving the title or subject of a book). Cookie eventually gets it and asks for a book about cookies, but then causes the librarian to faint dead away when he asks for a glass of milk to go with it.
* Sesame Street Old School: Volume 3 features a commentary on episode 1316 by Sonia Manzano.
* Sesame Street: One sketch involves Kermit having Cookie Monster guess what's in a mystery box with three clues (it's something you eat, it's round, and it's orange). He guesses "cookie" each time and gives up afterward.
* Sesame Street, one sketch with Bert and Ernie shows Ernie unable to sleep, so Bert tells him to count sheep, but Ernie finds it dull and tries to count something else, finally deciding on balloons. An imaginary balloon appears and grows to a huge size before finally exploding and rocking the room, startling Bert awake, screaming.
* Sesame Street: One skit has Grover trying to deliver a singing telegram to Mr. Johnson, but accidentally sings the wrong ones.
* Sesame Street on lists of the greatest TV shows of all time. Though they are predominantly live-action with puppets (see the "Puppet Shows" folder above for stereotypes about this), they have broken the stigmas attached to shows aimed at preschoolers and are heavily respected as television classics in their own right. Animated series aimed at the same audience rarely get such respect.
* Sesame Street, Oscar and Telly try to reach China by digging, and succeed. Big Bird, however, takes the plane.
* Sesame Street owes its success to "entertaining the parents so much they forced the kids to watch."
* Sesame Street page, human characters age but Muppets stay the same unless a plot point is needed. It's especially noticeable in a wedding anniversary episode where Elmo speaks as if he wasn't at the wedding, but in the actual episode he's clearly in the scene.
* Sesame Street, playing the role throughout the first years of her life until a professional child actress replaced her.
* Sesame Street plays with this: Mr. Johnson complains about a fly in his soup, but Grover looks under the soup, next to the soup and on the soup without seeing a fly.
* Sesame Street: Plush dolls, targeted to infants and babies, have been sold of Ernie, Bert, Cookie Monster, Prairie Dawn, Big Bird and Elmo. Picture books for babies and toddlers, depicting the Muppet characters as babies, have also been sold.
* Sesame Street Presents: Follow That Bird advertising it as the "Sleaze Bros. Funfair". Just as the camera pans past, the "F" slowly falls off.
* Sesame Street Presents: Follow That Bird. Big Bird even knew that this would not be a walk in the park.
* Sesame Street Presents: Follow That Bird, Big Bird is in the back of a truck, in a giant cage, doing about 30 on the interstate. Gordon and Susan have followed him in a Volkswagen Beetle that's had the trunk cover chewed off by Cookie Monster (keep in mind, Volkswagen Beetles have the trunk in the front of the car). Despite the vehement protestations of driver Susan, Gordon leaves the inside of the vehicle through a Cookie Monster-created hole in the roof and tries to get Big Bird to jump from the cage into the hood.
* Sesame Street Presents: Follow That Bird, both of the Sleaze Brothers talk in their sleep.
* Sesame Street Presents: Follow That Bird, Gordon goes through the hole in the roof and onto the hood of the car that Cookie Monster had eaten to instruct Big Bird to jump off the moving truck.
* Sesame Street Presents: Follow That Bird in a completely deadpan tone. It then cuts to Kermit the Frog reporting on the scene, and things just get more Kent Brockman-esque from there...
* Sesame Street Presents: Follow That Bird inverts this when Oscar and Maria stop for dinner at the Don't Drop Inn; amid all the chattering that goes on in the

diner, one grouch patron can be heard yelling, "Hey, waitress! There's no fly in my soup!" "It's comin'!" the waitress yells back.
* Sesame Street prior to retiring; he did the voices for his characters on the set and it aired four months after his death, but his vocals went unused in the final cut.
* Sesame Street produced and shown to children in early 1969. The biggest difference between these and what would eventually air is that the Muppets are kept separate from the humans, but since kids paid more attention to the Muppet and animated segments, they were integrated into the street once the show got off the ground, arguably for the better.
* Sesame Street routine in which Ernie, fed up with Cookie Monster stealing his cookies all the time, acquires a safe in which to put the cookies. When Cookie Monster comes by, he realizes that he cannot open the safe, so he just eats the safe.
* Sesame Street runs while somebody is walking him, that somebody often gets pulled along.
* Sesame Street's 50th Anniversary Celebration). They have yet to find a new performer for Murray (with some sources saying that Sesame Workshop has no plans to recast Murray).
* Sesame Street satellites set to kind of creepy music, that featured an android that looked kind of like a skeleton, and even had a clear casing so the inside could be seen.
* Sesame Street says that Zoe, a Monster added in the 80s-90s, was designed specifically to be marketable—her orange fur was chosen to complement the red Elmo, etc—while most of the other characters before were designed more organically. This has made her controversial among Sesame Street Muppeteers. Abby Cadabby, the newest female Muppet, was created in the more traditional matter.
* Sesame Street's Count von Count and Harry Belafonte are stranded on a tiny island. But as long as The Count has a plethora of coconuts, he's good to go, and Harry seems content to sing about him.
* Sesame Street, seeing a monster in the mirror is not a cause for freaking out but an occasion to sing "Wubba wubba wubba wubba woo woo woo." After all, "That monster in the mirror, he just might be you."
* Sesame Street segment "Elmo's World", Elmo's TV tunes in to these kinds of channels to teach kids.
* Sesame Street segment has a side table drawer, window shade, computer and TV that prance around and interact with Elmo.
* Sesame Street segments, both classic and contemporary, tend to follow a basic plot formula, usually with little or no variation, though there are often exceptions:
* Sesame Street: Several characters have affectionate nicknames for one another.
* Sesame Street, she's so terrified she falls back in her chair (and her scream raises in pitch to reflect that.)
* Sesame Street shorts featuring chorus girls doing Busby Berkeley Numbers while teaching the kids at home about numbers.
* Sesame Street sketch, a boy tries to catch fish, but instead pulls up letters in conveniently alphabetical order. Though he initially assumes that he won't be able to eat them, he ends up using them for soup.
* Sesame Street sketch, Cookie Monster goes on a cookie binge and falls asleep. In his dream, he is confronted with a former monster who loved cookies so much that he literally became a Monster Cookie.
* Sesame Street sketch, Ernie pours himself a glass of milk while hanging upside down, ignoring Bert's warnings that the milk would spill.
* Sesame Street sketch, Ernie wants to borrow a vacuum cleaner from Herbert Birdsfoot, but goes through this while imagining Herbert's possible reaction to the request. When they finally meet:
* Sesame Street sketches featuring Grover as a waiter or similar service employee, attempting to serve a fussy customer (portrayed by the ubiquitous "Fat Blue" Muppet, here known as Mr. Johnson). The early skits played the trope straight, but

as time went on the conflict began to center more around Grover's confusion or incompetence as opposed to the customer's unreasonableness.
* Sesame Street sketch had Cookie Monster sleeping over with Ernie and having a nightmare about singing cookies.
* Sesame Street skit, Cookie Monster sleeps over at Ernie and Bert's house (Bert is absent because he's visiting his grandmother, so Cookie Monster gets his bed). After the lights are turned out at bedtime, he gets scared of what he thinks is a monster in the corner of the room. It turns out to be a rumpled blanket on a toy chest.
* Sesame Street skit has Kermit offer Cookie Monster a cookie if he can guess what's in the box. Cookie Monster shotguns off a long list of guesses, none of which could fit in the box.
* Sesame Street skits try to explain the absence of main characters. One "Ask Oscar" segment has Bob fill in for Telly, who is said to be at the dentist. Another features a grouchy Linda filling in for Oscar.
* Sesame Street: Slight play on the formula — Commander Chiphead (played by David Hyde Pierce) has Cookie Monster recite the Cookie Connoisseurs Club oath.
* Sesame Street's "Monster in the Mirror," Grover and other Halloween-dressed Sesame Street monsters race through a whole lot of colored doors during the a-cappella chorus.
* Sesame Street: Some of the non-humans have normal names (Oscar, Elmo, etc) while others have made-up names (Narf, Count von Count, etc).
* Sesame Street, some townspeople in a saloon try to determine if Cookie Monster is "The Great Cookie Thief" by comparing his appearance to a wanted poster. He initially manages to fool them by drawing a mustache on the poster while they aren't looking, but his identity ultimately discovered when stolen cookies fall out of his hat.
* Sesame Street song "All Dressed Up", some children arrive wearing their winter clothes in the wrong places: One girl has a galosh on her head and a scarf on her nose, another has gloves on her ears and a coat on her face, and a boy has earmuffs around his waist and a hat on his hands. Bert bluntly tells them to go away and put their clothes in the right places.
* Sesame Street song "I Don't Want to Live on the Moon" in a verse about living in the sea: "I might stay for a day there, if I had my wish, but there's not much to do when your friends are all fish."
* Sesame Street song "I Love My Hair" was written after head writer Joey Mazzarino and his wife adopted a little girl from Ethiopia. They were concerned that questions would be raised about white parents raising a black child.
* Sesame Street song "The Letter N" by Nick Normal and the Nickmatics, Nick enters a fancy restaurant under the impression it's his favourite pizzaria.
* Sesame Street song, "Who Are the People in Your Neighborhood", the song was written very early in the show's history, and dropped when the original television show format was abandoned in favor of a stage production.
* Sesame Street special, "Sesame Street All-Star 25th Birthday: Stars and Street Forever!", Benny Rabbit is the only citizen of Sesame Street who supports Ronald Grump's plan to turn the neighborhood into the Grump Tower, as he wants to work as the tower's doorman. However, when Grump reveals that he was planning to build a robotic doorman for the project, Benny quickly joins the rest of Sesame Street to stop Grump's plan.
* Sesame Street's rising star, was to Christmas 1996 what Furby was to 1998.
* Sesame Street states that "C is for cheetah running underneath the moon". Cheetahs are diurnal.
* Sesame Street states the writers chose not to reveal how he died because explaining that he was old and ill could have increased children's fears about death). Several fans have concluded that he faked his death so he could live out his retirement in peace.
* Sesame Street, straight-laced and uptight Bert clearly loves Ernie because of his free-spirited nature.
* Sesame Street string is for, and Ernie says it is to remind him he has a string

on the next finger. This proceeds through all of Ernie's fingers until they reach the last one. When a very exasperated Bert asks him what that string is for, Ernie says it is to remind him to buy more string.
* Sesame Street, such as firing older cast members and reducing the overall number of characters. However, the network is merely acting as a second home and financial backer for the series, and has no creative input.
* Sesame Street: Super Grover enters to his customary fanfare, announcing that someone is here to save the day. Rosita asks who. Cue deflation.
* Sesame Street takes this trope to its logical extreme, with Luis and Maria discussing their relationship with other characters - especially Muppets - as the events described in the rhyme play out and it actually evolves to the point of their getting married and having a baby together.
* Sesame Street talking about how we use our hands to communicate ("Hand Talk") involved a man hailing a taxi, only to have it drive right by, with a waving fake hand in the back.
* Sesame Street: Telly Monster belongs to the "Triangle Lovers' Club", who do in fact wear silly hats like beanies and fezzes. Their leader is the Grand High Triangle Lover.
* Sesame Street, Telly names his hamster Chuckie, but she turns out to be a girl, so he renames her Chuckie Sue.
* Sesame Street, that it's all right to miss him, and that even though life will never be quite the same when someone beloved dies, it will be okay. In tribute to him, the portrait Big Bird was going to give him still hangs in his nest to this day, nearly 40 years later. It even survived the hurricane that destroyed Big Bird's nest in 2001.
* Sesame Street that Karli's mother goes to an addiction support group where they "all sit in a circle" and help each other.
* Sesame Street, the brand name on many products, from electronics to diapers, is Nologo, which is of course a gag on the fact the brand exists so as not to show actual logos.
* Sesame Street: The Count loves counting flowers because he then gets to count the sneezes that they trigger in him.
* Sesame Street, The Count would famously laugh in a somewhat sinister fashion after counting things out, accompanied by thunder and lightning. "I will now count these letters to myself! One! Two! Three! Four! Five! Five letters! Ah ha ha!" It was originally a lot more maniacal, but was toned down to avoid frightening children away from learning to count.
* Sesame Street: The "Elmo's Potty Time" episode had a song about how "accidents happen and that's OK".
* Sesame Street. The gag repeats twice as Kermit the Forg and Kermit the Grof both show up to collect their custom T-shirts.
* Sesame Street, the initial focus is on Elmo learning what death means and then feeling sad that his Uncle Jack is never coming back. But soon the spotlight shifts to Elmo's cousin Jesse, Uncle Jack's daughter, dealing with the loss of her father.
* Sesame Street: "The King Who Ate Only Chicken" ends with the king calling an impromptu dance to celebrate his introduction to complete meals.
* Sesame Street, the letters H, E, L, and P are stranded on an island and miss two opportunities to be rescued by being in the wrong order.
* Sesame Street: The other Muppet show has Bert being the Straight Man to Ernie's Wise Guy.
* Sesame Street. The plot is that Grover knows he's in a book, has seen the title, and is scared of the monster and wants to keep the reader from bringing him closer to it.
* Sesame Street there were instances where ordinary humans and the Muppets were in perfectly equal standing. (As in, a humanoid muppet and a real human were both "human")
* Sesame Street, the "Sesame Street News" skits usually began with reporter Kermit the Frog addressing an off-screen producer or stage hand before realizing he was on the air.

* Sesame Street: The shifty salesman Lefty tries to sell Ernie an empty box, telling him that at least it doesn't have worms in it and that he could put jellybeans or a pet mouse in it. But Ernie doesn't have any money on him, prompting Lefty to walk away in disgust. Immediately afterward, Bert comes by with a box full of donuts — and Ernie promptly dumps out the donuts and takes the box, saying that now he'll be ready when jellybeans start raining from the sky.
* Sesame Street: The special "When Families Grieve" shows Elmo's whole family dealing with the death of his Uncle Jack, but in particular highlights Jack's daughter Jesse dealing with the loss of her dad.
* Sesame Street. The storybook version this was adapted from has him instead wish for progressively larger containers — first a dish, then a box, then a truck. As with the TV version, since he can't wish for cookies anymore, he just eats the truck, and the genie is appropriately weirded out.
* Sesame Street, the train prop used in "The Ballad of Casey McPhee" would be re-used in the "Beat the Time" skit with Cookie Monster.
* Sesame Street, the Western town of Sniddlers Gulch is terrorized by Cowboy X, a huge bruiser who rides around town using an ink stamp to mark random things with a letter X. One small boy finally tries asking Cowboy X not to do that. Cowboy X actually agrees to stop. In a subversion, he immediately changes his name to Cowboy O, and rides around town stamping things with the letter O. In a double subversion, the people of Sniddlers Gulch are satisfied with this.
* Sesame Street they usually talk about how they're someone's meal or how healthy they are for you. Heck, the song, "I am Chicken" contains the following lyrics, sung by chickens, no less:
* Sesame Street. This happens over a year, to the point where Grover resorts to selling coathangers. Not to mention all the businesses on Sesame Street have closed down due to everyone running out of money and businesses not being allowed to open. Elmo knows that things are bad when the Fix-it shop closes down for good, with Luis hammering the wooden boards and Maria admitting she doesn't know what they'll do.
* Sesame Street: Though some characters' ages are known (Big Bird is six and Elmo is three for instance), some are not. Ernie and Bert for instance live by themselves but are quite naive, seemingly lack jobs, play with toys, and take naps. The Grouches seem like adults but their ages are unknown, Ingrid and Humphrey have a baby so they must be adults, but their exact ages are unknown, Grover has jobs but sometimes acts immature, Telly acts like a six-year-old but goes to daycare, Snuffy sometimes acts six (like his pal Big Bird) and sometimes like an adult, and Cookie Monster seems sort of like a kid sometimes and an adult other times.
* Sesame Street to talk with a telephone. On the "bright" side, they repeated attempts with more than one Terran dictionary.
* Sesame Street to the people who think that the Muppets are named after the characters from the movie, which the creators deny.
* Sesame Street used cold opens during the 1990s (during seasons 23-29 from 1991-1998). Afterwards, all episodes since season 35 feature recurring pre-title segments which serve the same function.
* Sesame Street was brought to you today by the letters __ and __, and the number __." The letters and number are those which were most prominently featured in the episode.
* Sesame Street was initially played as more of a dimwitted country hick during his first few seasons. Then his puppeteer, Carroll Spinney, got the idea of portraying the character as a six-year-old kid, making him more inexperienced, curious, and naïve rather than just dumb. The producers let him go with it, leaving many to feel that this was when the character really took off.
* Sesame Street" We immediately hear the delivery truck squeal to a stop outside.
* Sesame Street. When Elmo hears her say the movie's title, he assumes she actually is moving there.
* Sesame Street whenever she sneezed, due to her dust allergy. To turn back, the students had to say, "Gezundenschniffle".
* Sesame Street, when Kermit the Frog reported from the throne room of Old King Cole.

* Sesame Street when Richard Hunt tossed him a red Muppet named Elmo and told him "Give it a voice, Clash." The rest is history.
* Sesame Street, where Ernie brings a piano into the bathroom while Bert is taking a bath and invites the rest of the street gang over.
* Sesame Street where he was a reporter, often reporting on fairy tales and nursery rhymes and the like. A lot of the humour came from Kermit trying to maintain composure through all the ridiculousness around him.
* Sesame Street where he was introducing Kermit the Frog to an actual bullfrog. During the scene, the frog ended up peeing on Jim Henson's head, but the crew didn't seem to notice so no one called cut, and they had to keep going as Jim dealt with frog urine on the top of his head. When the scene finally ended, he and Bob both burst out laughing.
* Sesame Street where Oscar's mother comes to visit and every time she heard him say "please" (a word that grouches never say) she would wash his mouth out with ice cream.
* Sesame Street where technology is defined as "a tool that helps you do something". A manual wheelchair is presented as an example of technology in the cold open along with a smartphone and flashlight. During the Word of the Day segment, a backpack is presented as another example of technology, along with a laptop, a tablet, an eReader, and another smartphone.
* Sesame Street Whether or not Grover is taking his order, he has bad luck at restaurants.
* Sesame Street (which teaches English to foreigners, starting with Taiwanese and Chinese), is portrayed by Roger Bart (who was 37 at the time of first airing) of all people.
* Sesame Street, which was about to be released on DVD (with Sesame Workshop's blessing) by Lionsgate.
* Sesame Street. While explaining Mr. Hooper's death, and what it means, to Big Bird, the adult characters share stories through tears about who he was and what he meant to them.
* Sesame Street, who simply dubbed his voice) as a white-hatted baker attempting to descend a staircase with a given number of cakes, pies, puddings, etc., then tripping and falling to the bottom in a messy heap.
* Sesame Street will occasionally change its theme song to reflect music trends of the time:
* Sesame Street, with other puppeteers having taken over the majority of his characters prior to his death. Afterwards, Matt Vogel took over the characters that Jerry was still voicing, including the Count.
* Sesame Street) would be edited to make room for commercials (those shows were originally broadcast on the commercial-free PBS).
* Sesame Street would frequently send reporter Kermit the Frog to cover the re-enactment of some classic fairy tale or nursery rhyme; these would never go as planned.
* Sesame Street writer and puppeteer Joey Mazzarino (most famous for performing Murray Monster) left the show after its 46th season, unsatisfied with the changes that the show was going through.
* Sesame Tree "kids around the world" segment and Muppet sketch. Potto gets a phone call from Hilda leading to a segment about how the kids at the school she's visiting deal with the problem. They realise they can now solve their problem, and answer the question.
* Sesame Workshop allows Troubles (and thus the audience) to see how a character is really feeling.
* Sesame Workshop and their other franchises to Fisher-Price. However, in the 90s, they change their mind and switched to Playskool. Then in the mid-2000s, somehow decided to switch back to Fisher-Price for a while, before switching back to Playskool again.
* Sesamstrasse, Caroll Spinney made an appearance as Big Bird (known as Bibo in Germany) and recited all of his lines phonetically in German. Otherwise, Wolfgang Draeger dubs Big Bird into German when he appears in American segments.

* Sesamstrasse instead of a typical "major" German city like Berlin or Munich.
* Sesquipedalian Loquaciousness and her skill with her claws has been described as surgical in precision.
* Sesquipedalian Loquaciousness. At one point he uses the word "sidacious", then covers the receiver with his hand and admits to B.J. and Klinger that he just made it up.
* Sesquipedalian Loquaciousness: A trope discussing the apparent use of a lengthy lexicon by the excessively verbose.
* Sesquipedalian Loquaciousness because their language is too elevated.
* Sesquipedalian Loquaciousness for a German learning English. It's her sophisticated manner of speaking that allows oghond to realize who it is.
* Sesquipedalian Loquaciousness found it all quite simple and easily explained everything, to the jaw-drop of everyone else.)
* Sesquipedalian Loquaciousness is a multifaceted and indubitably verbose entry concerning an infamous phenomenon well-documented among editors and fictional characters alike.
* Sesquipedalian Loquaciousness: Using advanced vocabulary to portray your high intellect.
* Sesquipedalian Loquaciousness. While occasionally words might pop up that aren't commonly used anymore, most silent films were very visually-driven, kept the dialog very simple, and only used word cards to move the plot along. (Which is probably what you'd *want* out of a silent movie, come to think of it.)
* Sesquipedalian Smith: A character has a fancy first name and a mundane surname.
* Sesquipedalian Smith: Someone has a long given name and short surname.
* Sesshomaru can also transform. You can usually see him in his human-like form, but a few times he turns into a huge, white demon dog. He is much stronger in this form, but even in his human form he is already one of the strongest youkai.
* Sesshomaru started as a villain trying to kill his own half-brother
* Sesshoumaru (accompanied by his servant Jaken) wanders the land on a quest to become as strong as possible.
* Sesshoumaru has the ability to instantly master any weapon, especially swords. He even knows how to master swords he hasn't even touched (such as Inuyasha's Dragon-Scale Tessaiga). However, when Tenseiga gained the Meidou Zangetsuha power, Sesshoumaru struggled to master the ability. When he did finally master the ability (after a humiliating encounter with an old enemy of his father), he realized that he wasn't meant to keep the power and passed it on to Inuyasha instead. It was the only sword power in the entire story that required a compassionate heart to master instead of fighting/weapon skill or instinct, and the lesson for Sesshoumaru was that he should never wield a sword without feeling fear at the possibility of losing loved ones or without feeling compassion for even his enemies.
* Sesshoumaru has to learn the same lesson. In his case, he is forced to inherit
* Sesshoumaru is one of the most powerful characters in the series, but he has been in mortal situations a few times requiring to be saved by his sword's barrier a couple of times and by his younger brother Inuyasha in others. One of the worst happens towards the end when
* Sesshoumaru's preferred mount for his followers is something that can only be described as a two-headed
* Session 9, appropriately enough for a film set in a real abandoned mental hospital.
* Session 9. The movie ends with an aerial shot of the months-later condemned hospital as the final session tape plays.
* "Session Moth" Martina. The character debuted as a valet in OTT to a tag team The Lads From The Flats. Her popularity skyrocketed and she eclipsed the team, breaking out on her own as one of the flagship faces of the promotion. Of course she did still have a pre-existing fanbase from her days as Kazza G but still.
* Sessions revolved around the main character's embarrassment over masturbating, and his fear of being caught as an adolescent.
* Sessue Hayakawa, a prominent Japanese-American actor from the early 20th century, was cast to play several different ethnicities.

* Sessue Hayakawa was early Hollywood's go-to guy for any ethnic minority. He was offered roles as Asians, Native Americans, and Arabs.
* set alight what's going on over the phone. Naturally, Lumpy (who is on the other end) can't understand him.
* Set a Mook to Kill a Mook: Games that offer some way to control, trick, or override enemies and make them attack other enemies.
* Set a Mook to Kill a Mook: Making your enemies fight each other as a gameplay mechanic, either through trickery or possession.
* Set are invulnerable to any weapon not granted holy power, and even then, they self-regenerate too quickly for Jack's holy sword to do much to them. The three of them are also very fast, relentless, and strong. They are one of the few villains that Jack is completely powerless against and, like with Exdor's robots, require help from a god, though this time around, Jack knows it and spends much of the battle (though it's more like a pursuit, as Jack soon learns he's no match for the Minions) searching for a way to summon Ra and banish the Minions.
* Seta Sojiro also has a small one. This was intentional, as Kenshin was
* set at a university, the show was filmed in California at Pepperdine University.
* Set a year (Ground Zeroes) and ten year (The Phantom Pain) after Peace Walker, has Snake and his operatives equipped with an iDroid, a smartphone-esque device with projection instead of screen, with user interface that more like 2015 instead of 1984. This is jarring because the immediate chronological game, the first Metal Gear, has basically contemporary technology, with Solid Snake simply equipped with a radio transceiver.
* Set during the same day as "Army of Ghosts", the online, extra scene for "
* Seteth and Flayn are actually Saint Cichol and Saint Cethleann. It isn't as obvious in Seteth's case, but Flayn is quite bad at keeping the secret, particularly when she takes exception to the way people talk about Cethleann. Both Seteth and Flayn have Major Crests of Cichol and Cethleann, whereas Ferdinand and Linhardt only have Minor Crests. In addition to the fact that the holidays celibrating the Saints outright take place on the same day as the pairs' birthdays, something the game will remind you of whenever said birthdays roll around.
* Seteth is rather hostile to those who show interest in his younger sister Flayn, even friendship.
* Seteth's quests for Byleth have been edited into all kinds of silly requests. His voice actor, Mark Whitten,
* Set "Future Sight" introduced a cycle of five legacy characters, each holding the title of a former legend from
* Seth and Jon switch bodies, Jon (in Seth's body) says the F-bomb to make Anna believe that he's not actually Seth.
* Seth Angus Billy Cletus Bubba Jamie Clement Callum Cowie, a hillbilly pedophile given superpowers by the world's richest nations and hired to take out
* Seth claims to not care about Ryan and his family anymore, as they try to persuade him to come back to Newport at the beginning of Season 2. They manage to reconcile quickly.
* Seth gets impaled on the horns of a Power Ram in the fight with Robo-Wolf.
* Seth Gilliam auditioned for the role of Stringer Bell before being cast as Ellis Carver.
* Seth Green dyed his red hair both brown and blond at several points in the show. It became a quirk of his character's.
* Seth Green has shown up as himself several times, mostly to annoy Eric that he (maybe) dated Sloan before E did.
* Seth Green In "Something, Something, Something Darkside" Chris proclaims he won't let it get to him.
* Seth Green make blink-and-you'll-miss-it cameos when Tony is leaving the Stark Expo early on.
* Seth Green pilot, Joker, but because of how distinguished his acting career is compared to Keener's, it's a much rarer occurrence.
* Seth Green serves as this in several missions. The sequel also has EDI.
* Seth Green sounds nothing like Chris Griffin or Neil Goldman (his two main

voices) so he has to be asked to drop into character. Mike Henry (Cleveland Brown, Herbert) does his voices without being asked.
* Seth Green Vice President Keith Crofford to come on the show at the end of a season and cancel it for sucking.
* Seth himself is also an Extreme Doormat, especially to his wife, Misty.
* Seth Inspector Alan Banks thinks that what Seth did was understandable because "he had been pushed far beyond breaking point."
* Seth In The City, is very good with technology and yet usually gets no higher than C's in school.
* Seth in the Pokécity pass the inspection line, such as salami from 1999 (the episode was released in 2019).
* Seth in the Pokécity. The first four episodes are still readily available on Poké Town, though.
* Seth is not as hammy as his rival, but its there. He'll describe his actions in bellowing bravado rather often.
* Seth Lloyd, a professor of mechanical engineering at MIT, once remarked,
* Seth MacFarlane aired in April 2019 to celebrate the 20th anniversary of the show.
* Seth MacFarlane and threatened never to speak to MacFarlane again if the scene wasn't pulled from reruns.
* Seth MacFarlane because he found the character annoying and unfunny.
* Seth MacFarlane during a car chase seen that turns in to a parody of age of sail ship to ship battles.
* Seth Macfarlane episode "Pulling Double Booty" has Rachel's Hailey dating Stan's body double Bill voiced by Seth.
* Seth MacFarlane happen just by describing it and then having a cutaway of it happening.
* Seth MacFarlane. He is automatically blamed for those just because the two of them are friends despite the fact that MacFarlane has nothing to do with those projects. Instead, it's Hartman and Fred Seibert (the latter which never seems to get any sort of hate despite being the producer of those shows). And of course, there's the cash grabs and merchandising that the studio does and not him.
* Seth MacFarlane in DVD commentaries has termed this the 'moment of shit', and as such has subverted it quite a few times in
* Seth MacFarlane is also a jazz/swing singer. He has a particularly strong reputation for it in the UK, where he's not only toured but performed several times at the very prestigious BBC Proms and had his own TV and radio specials.
* Seth MacFarlane"-ness, has admitted more than once to be proud of the hate mail he gets.
* Seth Mac Farlanes Cavalcade Of Cartoon Comedy special that aired on FOX.
* Seth MacFarlane spouting phrases such as "The cat is the devil" in Spanish, over and over again.
* Seth MacFarlane (the last show to air on the block) ended with the homes of all three casts having been ripped free by the hurricane and resulting flooding and dumped in the same place.
* Seth MacFarlane to the franchise. Despite mixed critical reception, its ratings were enough to help it land a second season.
* Seth MacFarlane writer Mike Barker were frustrated following the results of the 2004 election and, rather than complain on end, vented their feelings into something funny. Though ironically, the show actually moved away from political humor after about only a season.
* Seth Meyers where he mentions that someone developed an app that lets users know when a McDonald's ice cream machine is broken:
* Seth Rogen and doesn't see anything wrong with that. In addition, all of his plans are utterly stupid, and Kato (his sidekick) is the smarter one. The duo even gets into a fight over it and split up for a while. He's so dumb that as he sits there piecing together the villains' plan (after it has basically been spelled out for him), the villain asks if he's ok because apparently, he was just staring into space with a pained look on his face for a good 30 seconds.

* Seth Rogen, was based on Rogen himself. Writer Will Reiser is good friends with Rogen and he was the person who took care of Reiser while he battled cancer. Much of the screenplay is based on their relationship.
* Seth Rollins became this in 2015, as WWE World Heavyweight Champion no less. He's hated by every other main-eventer on the show, gets his ass kicked and pinned on RAW way more than he should, and gets humiliated rather frequently. However, considering how much of a
* Seth Rollins earned the nickname "Crossfit Jesus" among internet wrestling fans during his 2015 championship run.
* Seth Rollins. Every other feud Ambrose has had over the last year since then is at most is minor distractions — Ambrose makes it very clear that once said distractions are gone, Rollins is his next target. Even his desire to win the WWE World Heavyweight Championship from Seth is more like another way to stick it to his rival, with the added boon of winning the most prized championship in sports entertainment.
* Seth Rollins. Fans did not react well to this, and the quality of the programming having tanked around this time did not help matters.
* Seth Rollins for cashing in his money at the Bank against him to win the WWE World Heavyweight Champion though he himself did the same in Wrestlemania XXXI.
* Seth Rollins gave in to all his demands, Seth decided to stomp on Edge's neck anyway. Fortunately, Cena was fast enough to stop him.
* Seth Rollins in June 2021, not long after they became first-time parents.
* Seth Rollins is in the Authority, he acts as if he is such a big shot but he rarely wins a match without back up from J&J security and Kane and will normally runs away if the tables are turn,
* Seth Rollins. It didn't help that their interactions during said build-up had them appear very stilted.
* Seth Rollins. Member of The Shield. Became WWE's top heel in 2014 and won the WWE World Heavyweight Championship in 2015.
* Seth Rollins (naturally a brunette, but used to dye the hair on one side of his head blond)
* Seth Rollins once had to roll under the ring and pee into a water bottle in the middle of a match.
* Seth Rollins rather than stubbornly staying the course as they would normally do.
* Seth Rollins (who is often labeled a boring invincible hero) clean to win the title back (though he ended up losing it to Dean Ambrose minutes later thanks to Money in the Bank). Later, he was made the very first pick in the 2016 Draft. As the Monday Night Messiah he continues to do things "for the greater good" and generally wins his feuds.
* Seth. Specifically, his creepy, unintelligible breathy mumble of a voice and constant swearing under his breath.
* Seti has a verse in "All I Ever Wanted" where he explains his actions regarding the massacre of the Hebrew babies, and while in the film he was somewhat regretful but dismissed the victims as "only slaves", here he definitively states that his actions, while necessary and part of his responsibility as Pharaoh, also "scarred his soul" and were not what he wanted.
* Set in a future where this trope is used to remedy all manner of injuries. Apparently replacing damaged organs with real ones is preferable since they require no expensive and time-consuming maintenance (
* Set in a school for the children of superheroes and supervillains,
* set in a separate alternate universe where Sheppard is a CSI-style detective in Las Vegas hunting down a rogue Wraith that somehow got to Earth. However, before the Wraith dies, it transmits a signal throughout the Multiverse shouting Earth's location. The Alternate!Woolsey's response to this is that it's pointless to worry about saving every possible universe and is sufficiently pleased to have prevented the invasion in his own. Unfortunately for the primary versions of the cast, the message makes it to their universe, setting up the finale.
* set in the 1970s with Pierre Chang later in the season that this scene is revisited.

* set in your office, allows you to, among other things, do this for lots of points.
* Set is portrayed as this to a degree in later versions of the mythology, though contrary to popular opinion he
* Set is the God of Evil for the Heliopolitan (ie. Egyptian) pantheon, based on the mythological Set but, in-universe, taking the name of the Elder God for its badass connotations. Like Set and Loki, he uses magic and soul-stealing to enhance his powers, to the point he now rivals Odin, arguably the most powerful god in any pantheon.
* Set It Off are committing bank robberies for various reasons, but most come down to a combination of having enough money to get out of the projects and to get revenge on a banking system that has failed them.
* Set It Off (four African-American women go on a bank-robbing spree, there is a lesbian character amongst the main cast)
* Set It Off has a song called "Wolf In Sheep's Clothing", which talks about someone who manipulates people and poses as a nice person.
* Set It Off shows us the end of the world from two different perspectives.
* Set It Off's "Wolf in Sheep's Clothing" has twisted parts of "Jack Be Nimble", "Baa Baa Black Sheep", "Jack and Jill", and a bit from "Jack and the Beanstalk".
IE:
* Set It Up. A few minutes later, a guy comes out of Duncan's room promising to call him.
* Set It Up. Charlie begins a mad dash to the airport, before realizing to his surprise that he actually has several hours to get there. Cut to him casually giving tourism advice to a stranger at a food cart before realizing that he spent too much time and now has to rush after all. And all of this is not to get back with a love interest, but to break up another couple. Also lampshaded by a genre savvy bystander who mistakenly believes the situation to be the trope played straight.
* Set It Up: Suze is of the Bland Perfection type. She's a fairly successful model, but she and Charlie don't have any meaningful emotional connection, and Charlie doesn't seem torn up about dumping her.
* Set It Up to two tough New York executives, conspire to set their bosses up to make their work life less stressful. Things get hairy when Harper and Charlie discover that Charlie's boss, Rick, is cheating on Harper's boss, Kirsten, with his ex. Eventually, Charlie personally sabotages Rick and Kirsten's relationship when he realizes that by allowing their relationship to continue, he is compromising his own ethics.
* Set List' set. He responded with "He's a Grand Inquisitor. She's a Jewish schoolgirl!"
* Seto Kaiba counts as this, mostly in the Toei series and the original manga. Kids adore him and he does everything he can to give to them. However, when Yugi and his friends come into his life, he develops a homicidal rage towards them. He gets better, though.
* Seto Kaiba has Revolver, who may be the closest rival to Kaiba himself thus far, with a luxurious seaside house, the coat, a cold stoic demeanor, is a skilled hacker, is obsessed with Playmaker, has a deck that revolves around dragons, and is easily the best duelist thus far in LINK VRAINS besides Playmaker himself.
* Seto Kaiba in the Death T arc, forcing Yugi and friends to compete in a multitude of deadly games because an earlier match with Dark Yugi ended in a Penalty Game that left Kaiba sleepless for months.
* Seto Kaiba of all people gives one when he and Mokuba are flying off to America near the end of the Battle City arc.
* Seto Kaiba's rivalry with Yugi all comes down to one loss from a guy who
* Seton Academy: Join the Pack! example. She constantly proposes sex as stress relief to all of her fellow students, no matter the gender. This is actually in keeping with her species, as Bonobos also have sex for stress relief in real life.
* Seton Academy: Join the Pack!, is shown sporting too-long brick-like teeth whenever she's scheming something... which is all the time.

* Seton Academy: Join the Pack!, much to everyone else's disgust. At a later point in the series, Yukari befriends a group of rabbits, who have similar dietary habits.
* Seton Academy: Join the Pack!: Pan Saruhara cheats in a race by throwing down a banana peel to make her oppenents slip.
* Seton Academy: Join the Pack! picks up a kitchen counter with the intent of crushing her with it.
* set on fire by her abusive ex-husband, just weeks after a judge refused to uphold her restraining order against him. Miraculously, she survived, though she was left badly scarred and with permanent impairments from her injuries.
* set on fire without any hint of pain. Considering how the most useful way of finding spies is to set them on fire, it might just be commonplace to him by now.
* Set Pattern — the computer actually makes no decisions; all enemies will make the same moves every time regardless of what the player does. Most of the enemies in (simple)
* "Set phasers to stun." Though they also have a "kill" setting, the good guys rarely ever used it. This meant some of the rare fights with good guys opposing good guys ended with only minor scrapes and bruises.
* Set races, respectively, with Chthon going out of his way to corrupt and re-engineer some of Oshtur's (or attempting to, with varying levels of success).
* Set Right What Once Went Wrong: Altering the past to prevent bad things from ever occurring.
* Set Right What Once Went Wrong. It was true: Everybody did die, but in the dark future that wouldn't come to pass if our heroes in the present succeeded.
* Set Right What Once Went Wrong moment, right before revealing the product that they're selling/promoting.
* Set Right What Once Went Wrong. Of course even if time travel does get invented, let's not demand perfection.
* Set Right What Once Went Wrong of the current Nonary Game when Zero isn't running the show.
* Set Right What Once Went Wrong that allows them to enter the setting of one or more previously completely mundane, non-magical books. The conflict often centers on how their interference threatens to screw up the plot, and they have to get the original story back on track to resolve the "right" way.
* Set Right What Once Went Wrong, the screen fades until all that can be seen are his eyes.
* Set Right What Once Went Wrong: Using time travel to prevent bad things from happening.
* Set Right What Once Went Wrong, which includes a description of the distinction between the two.
* set sheet was found, but Geno was nowhere to be seen, debunking the rumor.
* sets: his sisters Victoria and Brittany, and Cameron and Cody, two MLG players Trent hired to be his bodyguards.
* sets in motion. A bomber that got separated from its formation while on a mission over Europe needs to dump its payload to lighten the plane enough that they can stretch their fuel to make it back to England. They choose the first thing they see that looks anything like a legitimate target, which turned out to be one of Hitler's secret bases for high-level conferences - while the Fuhrer was holding one of said conferences. This results in Hitler's demise and Himmler taking control of Nazi Germany.
* sets the thugs on fire while rambling about being an anime hero and wanting a harem ending.
* Setsuko Hara in which she played a young woman who is so devoted to taking care of her widower father that she has to be cajoled into getting married.
* Setsuko Hara. She quit acting the year of Ozu's death, and lived the entirety of her life in seclusion thereafter, refusing all interviews and photographs; even her death was only publicly reported almost three months later.
* Setsumi's last words from the original game are identical to the last thing Himeko said to Setsumi in

* Setsuna also cleaned up nicely in that same ball. Seeing him in a black suit was a very,
* Setsuna also tries to pull this, feeling that she doesn't belong now that Negi and Co. know
* Setsuna and Konoka's Pactio kiss was pretty damn long, too. So much that Setsuna almost suffocated from this kiss. (One doesn't know about Chachamaru, since she is a robot.)
* Setsuna and Lasse start off piloting the GN-Armour Type-E against Alejandro's Alvatore, then the main bodies of those two are destroyed, leaving Setsuna's Gundam Exia that was inside the GN-Armour against the Alvalon that was inside the Alvatore, which Setsuna defeats by throwing six of swords at it. Then Graham Aker comes in a custom "GN-Flag", and they fight with Exia's one last weapon - his GN Sword/Rifle - against Graham's beam saber. By the end of the fight, neither machine is destroyed, but both of them are essentially floating wrecks with Exia's cockpit simply torn open.
* Setsuna and proposes that it's about time they have a True Pactio (read: sex).
* Setsuna does this all the time with Konoka, including on most promotional artwork. It underscores their
* Setsuna from the same game also has a tendency of doing this. She even manages to surprise Kaze, another ninja, with how quietly she sneaks up on him.
* Setsuna gets pretty hammy in the final episodes, too: "Gundam Exia. Setsuna F. Seiei. SLASHING THROUGH THE FUTURE!". Then Exia body-slams the O Gundam into an asteroid.
* Setsuna has her sword for her main hand and sixteen daggers for her off hand. Kaede often has a knife in both hands. Rakan's
* Setsuna is a half-demon who hunts demons. They brought it upon themselves by kicking her out for her albinism.
* Setsuna Meioh/Sailor Pluto, at least in her modern day incarnation. She just appeared from nowhere, no explanation given on how someone specifically from the future can have a secret identity in the modern day. The manga explains that, after she died, Neo Queen Serenity made her reincarnate in the past as a reward for her services, but that makes one wonder
* Setsuna/Pluto fits this role as a mediator between the idealistic Inner Senshi and the pragmatic Outer Senshi.
* Setsuna quite literally dropping in from out of nowhere, in the process hacking off the arm of the person who was about to kill Nodoka
* Setsuna's Cosmo Entelechia a.k.a. the world she wants the most: she fantasizes about Konoka cooking for her in this, which shocks Negi and embarrasses Poyo when they find out..
* Setsuna. She strives to maintain her cold, levelheaded swordswoman persona, but what she really wants more than anything is to
* Setsuna's worried denial that her outing with Konoka is Not a Date, despite everyone, including Konoka, treating it like one.
* Setsuna when she gets all gooey over Negi's new level in badass, and it resembles nothing so much as somebody catching themselves fantasizing about a friend's significant other.
* set ten years ahead in a Bad Future Season two slowly sets the stage up for this to become a reality, with the series finale fully filling in the picture "Epitah One" sketched out.
* set - the assault and its aftermath might well be events unrecorded by history (especially given its unreliability back in the 1940s-50s, including the lack of advanced technology to record such events as faithfully as in the present). But who can say for certain?
* "Set the Fire to the Third Bar." The male singer appears to be a criminal of some sort and can sense the female singer behind the two-way glass. They put their hands up towards the end of the video. He's still there pressing his hand and forehead against the glass after she finally walks out.
* "Set the Night to Music" is best known as a U.S. top-10 duet by Roberta Flack with Maxi Priest in 1991. Not many people know now that it was first recorded four

years earlier by
* Set the World on Fire: Small area or big, the world is scoured by flames.
* Setting an imprisoned pal of Raynor's free in exchange for her death (even after seeing her restored to human-ish form);
* Setting aside that the movie kind of sucked, this is revealed in one scene to be a recent switch — as in, probably in the last couple years. The characters need decoys, so they pull out the old latex costumes, which, aside from being terrifying and obvious fakes, don't look too much different from the holodisguises the characters are using right now.
* Setting aside the scene where it cleaves a cliff face in two, never to display that kind of power again, there are two battles where the Masamune displays power that it was said to have in cutscenes and dialogue. In the battle against Magus, the sword, which was said to be one of the few weapons that would allow them to defeat Magus, bypasses Magus's
* setting have to be considered pretty bold even when they're part of a large fleet. Rogue Traders also do plenty of exploring in the effort to open up new markets. In fact, the first edition of Warhammer 40K was titled "Rogue Trader" and explicitly described them as fitting this trope.
* setting is named Marquis De Singe ('singe' being French for 'monkey', which Guybrush lampshades by calling him "De Monkey" in the fourth chapter).
* Setting people on fire who are already aggressive towards you will often result in them running blindly in your direction and setting you on fire as well before you can back away, due to the short throwing arc of your matches. The random pathing of a burning NPC makes it even harder to avoid getting caught on fire by a passing burning protestor.
* setting the enemy's flesh on fire and then letting them burn to death, not great for PR. So while it's possible laser rifles will be fielded in the near future, it will take a much longer time before they can truly replace conventional firearms.
* setting the last surviving Queen free to let them repopulate, or wiping them out entirely
* Setting tropes that aren't necessarily specific to games but are used in games to the degree they are pretty much stock elements, or without which many games would be unrecognizable/unplayable.
* Setting up a meeting with Steed and Mrs. Peel to tell them some bit of vital information was a surefire way to die in
* Setting up and spotting small-scale Xanatos Gambits up is a useful skill in
* Setting up a new computer and/or reinstalling an operating system can be like this. You need to download and install the drivers for all of your hardware, which often includes the network adapters you need to connect to the Internet. Usually the solution is to have another computer on hand that you can use to download the drivers and then copy them onto a USB drive.
* setting up a sting on an actual criminal... and also implicating that criminal in all of Westen's crimes.
* Setting Update (2011). After running into each other during a battle, Coriolanus and Aufidius put down their assault rifles so as to duel each other with knives, replacing the swordfighting of the original play.
* Setting Update: Changing the setting to a different place and/or time from the original in order to fit contemporary themes.
* Setting Update of ocean maps: planets are big round "islands", with space docks and space turrets built on the edge (so no space and water on the same map). Space ships are divided into space fighters, space corvettes, space battleships and space carriers, who can all fire at space targets, but only battleships and fighters can fire at ground buildings, and only fighters can enter the planet to shoot ground and air units (the battleship's Devastating Beam Of Death can shoot ground units but takes a while to recharge).
* Setting Update: Same story, different era. Usually by moving an older source material to the present time of the adaptation.
* Setting Update). When she's finally introduced in season 2, she is a feminist (who takes Offred to feminist rallies as a child), but not an extremist like her

book counterpart.
* Settled for Gay: A girl settles down with a gay man because she can't connect emotionally with a straight man.
* Settled for Gay: A straight girl hooks up with their gay male friend due to having no other love interest.
* Settled for Gay: Hooking up with a gay man due to him being the only one available to you.
* "Settle for Her", available in full on the album, would have been in the final episode of season 3, featuring Nathaniel singing about how he should stick with his girlfriend despite his feelings for Rebecca. It was presumably cut for time given how rushed the episode still ended up.
* "Settle for Me" wants, but that she should settle for him anyway. "I know I'm only second place in this game. / But like 2% milk / Or Seitan beef / I almost taste the same!"
* Settle for Sibling: The character doesn't get to be with their love interest, so they decide to get with their love interest's sibling instead.
* Settle for Sibling: When you can't win someone's love, hook up with their sibling instead.
* Settlers of Catan. Germany has a long history of producing high-quality titles in this genre and this type of game is sometimes called a "German-Style Game" as a result.
* Settlers of Catan is well known for getting people who thought they outgrew board games back into them.
* Settling Accounts: In at the Death CSA president. He has explicit orders not to shake the man's hand.
* Settling Accounts who to say the least, aren't very nice. What do you expect from SS expies?
* Settling the Frontier: Foreign migrants leave their homelands to try and colonize another region that is remote and inhospitable.
* Settling the Frontier: Standard Western plot involving people establishing a colony or settlement in a previously unknown land.
* Sett, meanwhile, was the child of a Noxian human and an Ionian Vastaya. His dad left him at a young age, leaving him to take care of his mother on his own—which led to him first entering and then becoming the boss of an underground Ionian fight pit.
* Sett på maken. The second episode was scrapped due to the very poor reception of the first. The series was supposed to return after a few weeks, but nothing ever materialized.
* Sett på maken was also very poorly received, suffered from low ratings, and was caught up in a scandal due to the poor working conditions on set. Together these two flops caused the company to go bankrupt.
* Set up a group of people armed and shooting to kill to guard the teleport's destination, so that anybody who uses it is met with a swift death.
* "Set-Up" begins with Castle being half-led, half-dragged by two guys in hazmat suits who refuse to answer his questions about "how serious it is". He's left with a silent, stricken-looking Beckett, and then the episode goes back thirty-six hours.
* set up Carl doing it deliberately later in the movie, but the filmmakers couldn't find a place to fit it in.
* "Setup"/"Countdown," when the Department of Homeland Security pulls rank once the case involves possible radiation and foreign terrorism. The DHS agent in charge, while a hard-ass, is actually a reasonable guy; the fact that Castle
* Setup for Humiliation - Here the "date" is a setup for public humiliation by Bob and his friends.
* set up this dynamic between the protagonist and his love interest, with one rare twist: she's a local prostitute and he's a foreign volunteer fighting in her country's civil war.
* Set was often in conflict with the other gods, up to killing Osiris and driving Isis and Horus into exile. Horus would eventually return to drive Set off and

reclaim Osiris' throne.
* Set Wrong What Was Once Made Right is to go back again and undo all those changes you worked so hard to make.
* Set Wrong What Was Once Made Right, or something else terrible) has to go back and undo that change.
* SEUM: Speedrunners From Hell, if you keep dying a lot on a single level, Marty may end up yelling "Damn you, Pine Studioooo!".
* Seungri for the use of the word "crack", which was later changed to "clap".
* Seussical character, and country music child star Billy Gillman played Jojo for a time as well as Teen pop star Aaron carter.
* Seussical gets a lover interest in Gertrude McFuzz, a character from another of Seuss' books.
* Seussical, much of the Cat in the Hat's dialogue has "ad lib." written all over it.
* Seussical says she fell for Horton upon noticing his "kind and powerful heart".
* Seven (1979), Cowboy is trying to work out how to deal with Kimo's bulletproof limo when he spots a couple of kids pitching horseshoes in the park. A light bulb goes off and exclaims "That's it! Horseshoes!", much to Jenny's confusion.
* Seven (1979), Drew snatches a trail bike off some random guy who is picking up his mail to chase after the assassin who tried to shoot him at the airport. At least he shoves a handful of cash into the guy's hand before he takes it, which is just as well, as Drew winds up setting fire to the bike to create a signal fire to attract Alexa's attention.
* Seven (1979), Drew uses the Professor's sex doll to make it look there are two people in his car, and throw the Kahuna's men off his trail. Skater is shocked when he shoots 'her' with a shotgun and 'she' explodes.
* Seven (1979) gunslingers and definitely fits the mold. Primarily a Trick Shot from the one serious example of his gunplay seen in the film, where he shoots and kills Butterfly with a single shot at extreme long range under extremely challenging conditions (his target was in the ocean; moving on a surfboard at the time).
* Seven (1979), however, that he seems to have a reasonable success rate as a pickup artist.
* Seven (1979) in the beach carpark, she stops a passing family of Japanese tourists for help. While the father is trying to get someone to call an ambulance, his wife and two children are busy taking photos of Cowboy's body.
* Seven (1979), martial artist Ed Parker plays a martial artist named Ed Parker. It's not clear if he is supposed to be playing himself, or a different character who happens to have the same name.
* Seven (1979), the Professor deliberately uses this to get through airport security. When he opens his bag, an inflatable sex doll automatically inflates. Security are so busy laughing at this that they wave him through without checking the rest of his gear.
* Seven (1979). The Professor plants an inflatable sex doll in his luggage, which then inflates when customs opens his bag. Everyone is so embarrassed that they just wave him through without spotting the weapon components he had hidden in his luggage.
* Seven (1979), the Professor takes out his target from eight miles away by sitting on the balcony of his hotel room and calculating timing, temperature, humidity, wind speed and direction, and a host of other variables, and then clicking the trigger of his customized gas gun.
* Seven (1979), two of Kimo's hitmen pose as police officers and guide the senator's car into an ambush, and then kill the senator's driver afterwards.
* Seven (1979): When the Kahuna's faithful driver Charlie is wounded during their getaway, the Kahuna shoots him and shoves him off the side of the boat.
* Seven (1979), who uses herself as bait to lure the Hermit into a position where she can kill him.
* Seven Ancient Wonders, including the Great Pyramid standing in for Mount Doom.
* Seven Ancient Wonders, part of the plot is about an oracle's daughter being

brought up by a team of commandos, so they implement a swear jar, but only when they swear around her - so she starts following them around, yelling out "Swear jar!" when they curse. The jar is almost always full.
* Seven Ancient Wonders. The rooms quickly fill up with quicksand, and were designed to be disorientating to make it harder to find the correct door.
* Seven and Snake both do this (with the same reactions as the above) in the Chapel. Snake is forced to stay behind, but has a trump card anyway.
* seven) because her beauty was so great he wanted to marry her – her brothers Castor and Pollux got her back, though.
* Seven Black Emperors: He is currently about as powerful as the other six combined and is building his power further in preparation for a new war.
* Seven Brides for Seven Brothers about it and he never really expected anyone to believe it was an accident.
* Seven Brides for Seven Brothers), and hear a baby crying in the cabin (actually the daughter of the only married couple). When asked whose the child is, all the girls respond, "Mine!"—leaving the fathers no choice but to "force" all the couples to marry.
* Seven Brides for Seven Brothers Milly is pleased to note how handsome her six new brothers-in-law are after she forces them to wash and shave in exchange for breakfast.
* Seven Brides for Seven Brothers putting them all through the wringer for what they did...)
* Seven Brides for Seven Brothers, the newly married Milly flips the table her uncivilized brothers-in-law are sitting at after witnessing their disgusting table manners.
* Seven Brides for Seven Brothers, which they misinterpret as "sobbin' women." However, they do want to "make them sobbin' women smile" as well as end up marrying them.
* Seven Brothers, during the days when the brothers are already enjoying plenty of bull meat, they agree that the losers in their disc-hitting game will have to eat ten pounds more.
* Seven Brothers in the nightly woods, they want to banish it, and Simeoni whispers some exorcising words into Juhani's ear to shout. When Simeoni says that the troll shows no reaction, Juhani repeats that too, though stops halfway as he catches on.
* Seven Brothers, the brothers are threatened with this, after breaking the church warden's window and insulting the vicar.
* Seven Brothers, the church warden hopes to make the brothers learn their ABC books quicker this way.
* Seven Brothers, where the titular siblings are mocked in a song which ends by calling the youngest brother Eero, who's always lagging behind, the tip of their tail.
* Seven), Cavil having left one last Seven alive as an immature infant with blocked memories and shot it into space after hunting and sadistically murdering the last dozen or so Sevens in the original batch.
* Seven Chances ends with him being chased by hundreds of women wanting to marry him.
* seven children born to Charity Carpenter, only Molly has shown any magical skill (although she has enough to be considered a true wizard).
* seven coups, some simultaneous in his name and Rome's coffers were empty due Nero's antics. On the other hand he could have paid them from his own pocket, as Otho did), and after Otho's death they joined forces with Vespasianus, helping him win, in retaliation for Otho's defeater Vitellius firing them all.
* "Seven Day Fool" is better remembered as a Jully Black song than a
* Seven Days (2007): Happens to Yuzuru and Seryou on their date in Volume 1.
* Seven Days (2007). Yuzuru borrows his date-of-the-week Seryou's lap for a nap at school. Seryou is flustered but he doesn't really mind.
* Seven Days actor Sam Whipple died of cancer at the age of 41, and so at the beginning of the third and final season of the show, his character, Dr. John Ballard, suddenly retired to a tropical island he had won in a poker game, thus

keeping the character alive within the fictional universe even though the actor himself died.
* Seven Days an NSA office is bombed with one female agent named Rebecca vanishes and is considered the suspect. Sent back, Frank arrests her but the place is bombed a day earlier. Soon on the run, Frank and Rebecca must face a traitor within the NSA. After he's defeated, Rebecca vanishes again. Back at the base, Frank learns the "Rebecca" is actually a deep cover Russian agent, which was the reason she fled in the first timeline. She does leave behind a goodbye video to Frank in her true accent that still thanks him for his help and he has to accept it.
* Seven Days, a scientist discovers a cure for cancer by seeing some water on her morning jog. The discovery is apparently averted when Frank goes back and interrupts her right before she sees the water — but she discovers it anyway after receiving a similar Eureka Moment from some coffee Frank gives her.
* Seven Days a Skeptic, you're on a spaceship. Help is coming in 7 days and the escape pods aren't an option.
* Seven Days crash, the Soviet program got theirs from a crash in Siberia.
* Seven Days deals with an AI developed by two scientists (whom the AI calls "Mom and Dad"), which rapidly "matures" from the equivalent of childhood to adulthood, going as far as changing its avatar from a young girl to a woman. Then she starts doing what she thinks best for humanity and killing those who tried to stop her, and plot happens.
* Seven Days, Donovan has a grenade explode just inches away from his face. It incapacitates him at the time, but he is later shown completely recovered, claiming that he had his vest on and that the grenade just knocked the wind out of him.
* Seven Days episode "Pinball Wizard", Parker uses his newly acquired "Platinum Card" first to rent a Porsche and then to break into a girl's apartment.
* Seven Days follows this format, focusing on news stories that happened in the last week. The amount of points awarded per round tends to reference recent news stories, often at impressively different scales (Team one, you can have the number of women that claim to have slept with Tiger Woods; Team Two, you can have the cost of repairing Qantas' air fleet. Team Two wins!).
* Seven Days from breaking up on re-entry and contaminating the atmosphere. While he's aboard the station, one of the compartments is punctured, resulting in an astronaut being thrown towards the small hole and plugging it in. Parker and the other astronaut try to save him, only for him to tell them to get out and seal him in, as his body is the only thing temporarily keeping the air from rushing out, and he can already feel the hole expanding.
* Seven Days had the Devil show up disguised as a chrononaut from further in the future, tricking the team into assassinating a diplomat and provoking an international crisis that would result in nuclear war. His identity is revealed when Parker stops him, provoking a rant at how Parker and the team keep screwing up the plans he makes for human misery.
* Seven Days has a villain who has converted his asylum into a cult dedicated to preserving the balance with astrology. He thinks that this is tipped in favor of Good, so naturally he has guys committing random crimes to even things out. He's in the asylum for a reason.
* Seven days in a week. Which is, in turn, caused by the presence of seven celestial objects regularly visible from Earth — the sun, moon and five planets.
* Seven Days in May back the film, to the point of vacating the White House whenever they wanted to film there. It says something about the truths of the film that the President's backing wasn't enough to get the Pentagon to back it (and he's their commander!).
* Seven Days in May Chairman of the Joint Chiefs of Staff, with the plot being it getting discovered and then the President's men trying to prevent it.
* Seven Days in May him into resigning. In the end the President refuses to use such an underhanded method. Fortunately, a missing piece of evidence turns up at the last minute, and Scott is forced to resign when all his co-conspirators abandon him. And in the novel, two of Lyman's allies use the letters to force Scott to

abandon politics forever.
* Seven Days in May takes place after a long conventional war in Iran.
* Seven Days in May. The US President believes the Chairman of the Joint Chiefs of Staff is plotting a military coup under cover of a mobilisation exercise to be held in seven days. Because the general is highly popular, the President can't dismiss him without proof, so his staff have that long to find evidence of the conspiracy.
* Seven Days in Sunny June for quite some time, and now Sunset Shimmer and her friends and family are major pieces in their game.
* Seven Days in Sunny June. When a homeless and remorseful Sunset is taken in by human Twilight's family, the two of them eventually grow very close and even occasionally sleep in the same bed (but don't do anything past platonic cuddling).
* Seven Days: In "The Football", the title item—a briefcase containing the items the POTUS needs to authorize a nuclear attack—is stolen. A sequence of missile launches and counterattacks begins, the situation that Parker needs to go back in time to avert.
* Seven Days is entirely about this trope: a time machine allows a government agent to go seven days back in time in order to prevent the catastrophe of the week from taking place. Most episodes only deal with the time span of a week, due to the limitations of the time machine. However, several episodes involve the arrival of more advanced time machines from years in the future. In the first case, a time travel tries to stop a woman from developing a cure for cancer, which is going to mutate and start a pandemic. He succeeds but is killed himself. In another, a man arrives, claiming that a Muslim religious leader is secretly a radical, who will start the bloodiest religious war in history. It turns out the time traveler is himself a radical (or, possibly, someone not even human), who intends to kick-start just such a war by killing the imam.
* Seven Days is hybrid technology. Its fuel source is pure Imported Alien Phlebotinum.
* Seven Days, it is not unusual for most of the main cast to have killed each other before a Backstep.
* Seven Days like Frank - turns out Cleary intentionally asked to be a desk jockey so that he could spend more time with Frank's ex-wife and son.
* Seven Days, Parker was mistaken for a butler by the princess. Insulted, he took her glass and threw it away.
* Seven Days Rhapsody has the Goddess's Teardrop animated in CG; it doesn't even try to blend in and looks ridiclously 3D and shiny compared to the rest of the standard animation.
* Seven Days Survivor explicitly includes a dedicated healer (Either himself or Yukari) on the team when Midori is in play simply to keep her up.
* Seven Days the perp of the week/damsel in distress tries to make Parker think she's done this by leaving the window open while hiding in the shower with the curtain closed; but Parker just turns on the cold water in the shower, making her yelp.
* Seven Days, this is Parker's favorite method of dispatching a bad guy, usually with his legs. Notably, he does it to a terrorist in the pilot. Then, sometime later, he does it to the terrorist's brother, who has come for revenge.
* Seven Days to a Brand-New Me, Maddy is floored when she learns that her crush Adam has liked her all along, even before she underwent a makeover to get him to notice her. Adam, however, is the one who actually says a variation of this trope sentence out loud despite being the one who looks like a "Greek God" (in Maddy's words), mainly because of his painful shyness caused by a stuttering problem.
* Seven Days To Live, the main character attempts at one point to defend herself from her (driven insane by the movie's evil house) husband by stabbing him in the midsection with a screwdriver. Later in the movie, he has her tied up and gagged and one of the things he tells her during his mad ramblings is, "Look at this. You ruined my favourite shirt and a perfectly good kidney."
* Seven Days) uses a shot of missiles striking the White House. That was in the pilot episode, and things only get more dangerous from there.
* Seven Days, whenever Parker travels back in time, his younger self, the sphere,

and one trip's worth of their alien fuel source vanishes.
* Seven Days. When his buddy gets hit, Parker rips his shirt to make a tourniquet. When he closes in on the bad guys, his shirt is tattered enough to show off Parker's impressive muscles.
* Seven Days when Parker goes back in time, the Parker from the time he goes back to disappears from existence (as does the time machine itself and anything else inside it).
* Seven Days when traveling back, the good guys didn't contact the bombers until they were past the official point of no return. They had to put the commander's pregnant wife on the phone to convince him.
* Seven Days, where chrononauts for Project Backstep have a serial number tattoo to confirm their identity upon arrival.
* Seven Deadly Sins: A Christian classic interpretation of sin being composed of seven (sometimes eight) fundamental ones, each of which stands in for a character flaw.
* Seven Deadly Sins appears above them in mid-air upside down and rips their heads clean off in a single move.
* Seven Deadly Sins given form. Which explains why he refers to them as "my avarice" or "my wrath", etc.
* Seven Deadly Sins in the form of seven small crystal orbs. The person infected with the Wrath orb became violent and uncontrollable.
* Seven Deadly Sins. Naturally, Wrath is essentially June in RM's body.
* Seven Deadly Sins Series which is from her servant's point of view, and shows more to the story. Be warned, its a bit of a tearjerker.
* Seven Deadly Sins: Seven vices that are believed to be very sinful (Greed, lust, pride, envy, wrath, gluttony and sloth).
* Seven Deadly Sins. That set comes from later saints and Church Fathers (and originally, there were 25 of them.)
* Seven Deadly Sins. The victims they possess are compelled to indulge in whatever sin the demon represents.
* Seven Deadly Sins, this trope is among the most popular interpretations of what defines the Sin of Sloth; in this form, Sloth is about having potential, skill, talent what have you, but failing to utilize that potential, skill or talent just because you don't feel like it.
* seven deadly sins wrath is seen as the 3rd deadliest sin with the other two being Envy and Pride. To avoid the sin of wrath, people are encouraged to forgive their abusers or move on from their rage by allowing God to sort out their grievances or sense of injustice.
* Seven Dirty Words: George Carlin's list of words you can't say on television.
* Seven Dirty Words — which seven words in particular depend on where you live.
* Sevendust's highest charting song on the rock charts was "Unraveling" in 2010, a song that's all but forgotten compared to the likes of "Denial", "Black", "Driven", and "Enemy".
* Seven Earth-like (at least in terms of size and mass) planets are known to orbit the faint, nearby, star
* Seven, Ed kills Mr. Lee by sliding him along his conference table and out the window of his penthouse: without opening it first.
* Seveneves) and genetic engineering is also more advanced (but plausibly so) than what we have but all of those things could be realized within a decade or so. The last third contains far more speculative space tech but nothing that would violate known physical laws.
* Seveneves detail the end of the world — to wit, the moon explodes, then bits of it sterilize the surface — while the third part details humanity's descendants returning to the Earth to re-terraform it.
* Seveneves, where humans five thousand years in the future have evolved to live underwater, underground and on the moon and are drastically different from contemporary humanity.
* Seven Forges, Andover Lashk is required to forge his own weapon in order to

become an ambassador to the Sa'ba Taalor. Being a former blacksmith's apprentice rather than a warrior, he forges a customized hammer.
* "Seven" (from back when they were called Vagiant) is all about this trope, as quoted on the quotes page.
* seven genders: Three "Fathers", a Mother, two "Hosts"(see the Shirren above, but for two different stages in the baby's growth), and what is essentially a "Supervisor" who somehow facilitates everything and somehow gets their DNA in the mix. Maraquoi tend to lean towards pacifism, given how easy it would be for a war to screw over their reproductive cycle.
* seven hours ranting at a member of parliament before realizing the man was dead.
* Seven Hundred Elves descend on a lonely farmer's house with the intent of causing chaos and running him off their land.
* Seven in Heaven is based around this going horribly wrong. In the 'traveling to nightmarish alternate universes' kind of way.
* Seven is a strange borderline case since she was born as the human Annika Hanson, assimilated, and then severed from the Collective.
* Seven is the atomic number of nitrogen, which makes up the majority of Earth's atmosphere.
* Seven is the most likely roll of a pair of standard six-sided dice. In craps, you can win by rolling a seven (or eleven) first, and lose by getting seven on any subsequent roll. The fact that seven is the most likely sum for the outcome of rolling two dice (with a probability of 1/6) is likely the origin of the whole "seven is a lucky number" superstition.
* Seven Kennings series, it's taken up to eleven in level of danger. The nation of Forn have a plant named the bantil plant. It's a flower with a maw instead. It grows incredibly fast, it's higly aggressive. Worst parts? The seeds have hooks, grows incredibly fast and can grow by feeding on an host blood. If it wasn't enough, their vines are lined with them, a simple brush spells danger. They are even a danger to those blessed with powers of plants. Even with their immunity, they'll take a bite before they release they "are off-limits".
* Seven Keys, an ABC game show from the early 60s, pitted a single contestant trying run a board of 75 squares to acquire one of seven keys to open a vault full of prizes. Running the board seven straight times wins everything automatically while failing at any time during the run causes all acquired keys to be forfeited.
* Seven Keys, as the contestant lost all accumulated keys and a chance at the large bonus prize.
* Seven Kingdoms also have a wealth of diplomacy options with other kingdoms. Unfortunately, the AI tends to be on the aggressive side and will become a sworn enemy if you do as much as build a fort in reach of one of its cities. Or reject their request to declare war on another AI kingdom that probably hasn't done much worse than that to anger them. However, there is still a benefit in forging alliances, and breaking them damages a kingdom's reputation. A surefire way to set their relationship value to 0 and thereby declaring a war themselves? Capturing their fort with spies, it doesn't matter if beforehand you're best buds for life, do it and they declare hatred on you. The second game makes these values visible in the Kingdom tab, so you can adjust fairly.
* Seven Kingdoms, mostly by killing enemies, and it's required to breed more.
* Seven Kingdoms offers various victory condition aside of fighting other faction until there is one last kingdom standing such as gaining certain Economic or Population score or battling Frythans instead of the other kingdoms, having the greatest Frythan Battling score before a certain year passed. But even if those conditions were disabled and you absolutely have to be the last kingdom standing, there are other ways than just rushing to your enemy's well-fortified base and suffering the loss of reputation and fine soldiers. Such as:
* Seven Kingdoms: The Princess Problem "Glitter" during their first meeting. It takes a specific and pointed request from her to get him to even once call her by her actual name, and then he only does so to prove that he's serious about her.
* Seven Kingdoms: The Princess Problem is shy, inexperienced, and utterly sweet-natured. The player character may also fall into this trope if she has high levels

of Romanticism, Compassion, and Humility combined with low levels in things like Self-Defense, Manipulation, and Autonomy. As both she and Penelope are delegates representing their kingdoms at an international summit filled with political intrigue, this is not entirely a good thing.
* Seven Kingdoms: The Princess Problem make the participants miserable.
* Seven Kingdoms: The Princess Problem refer to themselves, and are referred to by the game's creator, as "the Adorable Army."
* Seven Kingdoms: The Princess Problem run along these lines. Prince Zarad of Corval is intrigued by a lady who won't fall for his charm; Prince Jarrod of Revaire isn't accustomed to being stood up to. In both cases, the best way to get the prince's attention is to challenge him and refuse to play his game.
* Seven Kingdoms: The Princess Problem, someone puts a thorn under your horse's saddle blanket to agitate it into running away with you. It's obvious that it's an attempt to kill you in a way that looks like an unfortunate accident, and if you're playing on Challenge Mode and don't have the necessary self-preservation skills or someone who cares about you looking out for your safety, it can succeed.
* Seven Kingdoms: The Princess Problem tracks four possible relationship values: Friendship, Romance, Rivalry, and Respect, each influenced by your actions and behavior toward a given character. Not all of the characters you can interact with have sliders for all four values... although the presence or absence of the Romance slider shouldn't always be taken at face value.
* Seven levels of post-soak damage is enough incapacitate heroic mortals and Exalts who don't have increased numbers of health levels. This takes about 18 dice of damage, which is laughably easy to get. Luckily, Exalts have many ways of defending themselves, but if a big attack gets through they go splat.
* Seven Little Monsters, Four tries his hardest to get a sheriff's badge from a prize machine, only for it to keep giving him princess crowns.
* Seven Little Monsters: In "I'm Telling", One gets on her brothers and sister's nerves when she tattles on them during a backyard campout. Near the end of the episode, One catches Four wearing a pair of boxer shorts on his head, which makes the other monsters laugh. One thinks about telling Mom, but decides against it. To get back on her brothers and sister's good sides, One puts a pair of panties on her head.
* Seven Lucky Gods in Japan, Benzaiten is the sole goddess. Some versions, however, up the number of female deities to three.
* seven main divinities of Medicine, four of them invoked in the Hippocratic Oath as witnesses:
* Seven Men of Gascony. She is one of the most interesting characters of the book.
* Seven Men of Gascony though it is more fun to think that he had a lover in the past and never got over her.
* Seven Men of Gascony until they died in combat or otherwise. Not brutal but kind of squicky. It is less disturbing when it is understood that this was to announce to other soldiers that she had the squad's protection in a camp full of young men who were accustomed to violence and seldom saw a woman.
* Seven Minute Lull: At a party, someone will either say something rude and/or strange, resulting in everyone going quiet, or they'll speak louder than some music which is playing, resulting in the music stopping.
* Seven Minutes in Heaven", jumps back in time to Fisk's arrival at prison. We are shown how Fisk is passing his time as he plots the demise of a rival kingpin within the prison and (as later revealed in season 3) waits for his long-term manipulation of Ray Nadeem to pay off, buys the loyalty of a few inmates, and arranges for his messasge to passed on to Frank. This nine minute prologue ends with the last shot of the previous episode, and establishes that Fisk seeks to use Frank to get rid of Dutton.
* Seven Minutes in Heaven", Wilson Fisk needs to get rid of Dutton, the guy who runs the prison's underground economy. So he tricks Frank Castle into entering Dutton's cellblock. After Frank kills Dutton, Fisk locks him in, and releases all the prisoners who are quick to get revenge on him for killing their boss. He ends up having to go down a corridor, stabbing his way out with a shiv.

* Seven Minutes to talk about himself to the program's host, Dick Drake.
* Seven Missionaries: 7 monks (one prideful, one envious, one furious, one lustful, one lazy, one avaricious, one gluttonous) are sent to convert the Vikings after word of their un-monastic lifestyle gets out.
* Seven Mortal Sins, after a heartwarming moment where Lucifer allows Leviathan to share her bed, the next morning, Levi wet it, angering Lucifer.
* Seven Mortal Sins, all the angel and devil characters like Lucifer and Michael are female.
* Seven Mortal Sins and she has no choice but to obey Lucifer. To demonstrate what happens if she defies her, Lucifer squeezes the heart, crippling Maria with pain.
* Seven Mortal Sins: Asmodeus becomes intrigued by both Maria Totsuka and Lucifer when they display immunity to her lust inducing powers. She kidnaps them and attempts to sexually torment them until they give in to lust and agree to become her slaves, but that doesn't work either. She then starts genuinely respecting them.
* Seven Mortal Sins demonic children on her own. She runs numerous business schemes to amass wealth, and is first encountered running a scam where her human followers are hypnotized into babysitting her children.
* Seven Mortal Sins: In episode 2, after booking a hotel room, Leviathan jumps into the pool in her clothes while Lucifer strips before entering. Leviathan then strips after Lucifer comments that swimming in your clothes is rude. Lucifer then orders her human servant Maria Totsuka to join them, and uses magic to force her to strip and enter the pool when Maria is too embarrassed.
* Seven Mortal Sins is much more dynamic and fluid than any other scene in the episode.
* Seven Mortal Sins: Lucifer and Leviathan break into Astaroth's apartment to challenge her to a fight. Astaroth says their surprise entrance made her wet herself.
* Seven Mortal Sins, Lucifer's body freezes when she lands in Cocytus. Later in the series, Astaroth and Leviathan suffer a similar fate. None of them is bothered in the slightest by it, and once they are thawed out they act as if nothing happened. Justified since they are supernatural Demon Lords.
* Seven Mortal Sins: Mammon, as it turns out, is not only a powerful Demon Lord....but a mother doing everything for the sake of her children.
* Seven Mortal Sins, Maria is immortal and ageless, but Lucifer can torture her by squeezing it.
* Seven Mortal Sins was a figurine line first before it became an anime, and its purpose is to flesh out the characters' backstory.
* Seven Mortal Sins, when Lucifer gets hospitalized, her enemy Belial disguises herself as a nurse and subjects Lucifer to a humiliating and extremely painful suppository.
* Seven non-superpowered Leaguers against the unstoppable, invulnerable, General Eiling in "Patriot Act" (the "Seven Soldiers of Victory" episode) on
* seven of can assume. Any non-boss enemy on the receiving end of this laser is all but assured to be reduced to ash. Beyond that, whipping it out on the aforementioned Savior is one of the easiest ways to instantly incapacitate it so that Dante can go in for the kill. Have fun.
* Seven of Nine (a human ex-Borg) and Raffi Musiker (a human) play the Vulcan game kal-toh.
* Seven of Nine as a Borg Queen declares that "Annika still has work to do," which could either be Seven speaking in the third person, or the micro Collective releasing her deliberately for some purpose.
* Seven of Nine gets distracted from her duties by a holographic Chakotay in "
* Seven of Nine has a particular way of looking around and she strides when she walks (striding is common for Star Trek characters, but especially Seven of Nine). She also uses the
* Seven of Nine once brought Neelix back from the freakin' dead after
* Seven of Nine, so the latter can't even move without constant robot noises.
* Seven Of Nine was voiced by Gabriela Gomez, who voiced her with a more calm and

less militaristic tone, while also making her sound a lot younger, which her made her sound more
* Seven of Nine, who, while more of a scientist, is still relied upon to perform mechanical tasks on many occasions.
* Seven of Nine will arc her ocular implant when the occasion requires. Of course, said implant is
* Seven of One, with Clive Dunn replacing Barker in the lead role). The other four remain as one-shot episodes.
* Seven of Seven. This is probably intentional (at least the surname, the name Nana is a pun on the show's title).
* seven of the Primevals infiltrated the GGG's Orbit Base through a 0.02mm hole in their force field.
* Seven Periods with Mr Gormsby-dependent joke when Gormsby calls himself an "utter relief teacher". Since what New Zealanders call a "relief teacher" is a "substitute teacher" in North America and a "supply teacher" or "cover teacher" in Britain, the joke is lost.
* Seven Periods with Mr Gormsby In another episode, we get this lovely gem when a student admits to firebombing another teachers car (Note that Steve, the teacher, is quite toxic to everyone, especially 5-F students and Gormsby does not hide his contempt for Steve):
* Seven Periods with Mr Gormsby (making them appear in reverse order). But it's enough to make most watchers from a military background flinch.
* Seven Pillars of Wisdom in 1927 to clear his considerable debts and obtain relative financial security after his first failed attempt to join the Royal Air Force as an enlisted man.
* Seven Pillars of Wisdom T.E. Lawrence recounts the Arab chieftain Auda abu Tayi being grazed by a dozen Turkish bullets, with his binoculars smashed and robes perforated, without serious injury. Auda additionally claimed to have been wounded 23 times in battle.
* Seven positions on the Small Council: Hand of the King, Grand Maester, Master of Coin, Master of Ships, Master of Whisperers, Master of Laws, and Lord Commander of the Kingsguard.
* Seven Psychopaths: An assortment of mental patients is put together to kill Hitler.
* Seven Psychopaths and ends up meeting said psychopaths. At one point the writer says he wants his movie to be a set up for a revenge story in the first half and then have the characters go off into the desert and talk the meaning of life for the second half. He says this as he and his friends are driving out into the desert to escape one of the psychopaths.
* Seven Psychopaths, Billy fits the role of the Lancer to Marty. Marty and Billy are almost perfect foils for eachother, since they have different opinions on Marty's alcoholism, Marty's girlfriends, and lifestyle. Marty has the Badass power (Billy says that Marty is the "best writer of his generation"), and Billy dies for the cause.
* Seven Psychopaths: Myra, when Charlie is about to shoot her and asks where her husband is.
* Seven Psychopaths, two hitmen are discussing various topics. Suddenly, a man in a mask walks up and blows both of their heads off - introducing us to the first psychopath, the Jack of Diamonds.
* Seven Psychopaths, two mob hitmen are discussing violent criminals and eye removal, all while someone in the shot's background is walking towards them. Eventually, it becomes more apparent that the figure is heading towards them. Cue the Jack of Diamonds shooting them both in the back of the head.
* Seven Psychopaths We get a montage of their past antics, including invoking this trope to lead the Texarkana Moonlight Murderer (see below under Real Life) into a trap.
* Seven Psychopaths who can impersonate anybody in a situation where the position of "most important man in Germany" has suddenly been rendered vacant.
* seven representatives from the Tontatta Kingdom, Happo Navy, and various other

crews and countries come together to form the Straw Hat Grand Fleet.
* Seven Samurai 20 XX: The third chapter features a whole, confusing city to explore, and before the series of events leading to the last boss fight that will end the level, you can encounter a series of unique NPC which can be challenged and fought as bosses in various parts of the city, namely Pyro (a guitarrist with a garish green outfit and pink afro), Morozumi (a sexy black woman covered in bandages and using kunai), Tsubaki Dayu (a graceful masked woman warrior), Gotehnmaru (a warrior in a nice suit), Oniwaka (a massive man in a kendo suit), Ushiwaka (A ninja-like swordsman) and finally Brahman (a magician-like fighter who can turn invisible). Defeating them has no impact on the plot, but once you finish the game they unlock the Arena Mode where you can fight against all previous bosses.
* Seven Samurai are the best swordsmen of the seven, slaying many bandits.
* Seven Samurai as ronin Kambei Shimada, who is first seen shaving his head as part of a ploy to rescue a child. In his era, it would have been considered dishonorable for someone of the samurai class to shave his head, even to save a peasant. His baldness shows that he places morality above his social standing. Even so, he's clearly a little uncomfortable being bald, and spends the rest of the film absently rubbing his stubbled scalp.
* Seven Samurai for film and katana examples in particular. The peasants who died in the fight have spears stuck in theirs.
* Seven Samurai has him rescuing a child from a hostage situation by cutting off his topknot and having monks shave his head and lend him some robes. In his guise as a monk, he brings food so that the hostage-taker will lower his guard, and then rushes in and kills the hostage-taker and saves the child.
* Seven Samurai is a joker and a clown who likes to tease people sometimes. He's particularly fond of picking on Kikuchiyo. He is the one who coined "Kikuchiyo" as the samurai wannabe's new permanent name, as a reminder of the drunken scene that the man made the night before the samurai left for the village.
* Seven Samurai. Kikuchiyo is a boisterous and energetic wannabe samurai who likes to show off, and the wittier and more reserved Heihachi is Kikuchiyo's most outspoken critic who laughs at and makes fun of him constantly.
* Seven Samurai, Kikuchiyo steals the armor of a dead bandit to try and steal a musket from the group.
* Seven Samurai manages to shoot and kill two of the remaining heroes before being killed himself.
* Seven Samurai — Contained a lot of film firsts, such as recruiting a group of quirky heroes to achieve a goal and introducing the main protagonist in a way unrelated to the plot. Sometimes is considered to be the first modern action movie or first modern epic movie.
* Seven Samurai name (Or, rather, two girls' names rolled into one.) The name sticks anyway.
* Seven Samurai, the seventh ronin, played by Toshiro Mifune, actually comes from a peasant background. He hates peasants for being victims and samurai for being bullies.
* Seven Samurai. The villagers in both films expect the raping part, going as far as to hide the women away from the village.
* Seven Samurai was hired to be the moral support of the samurai. However, over the course of the film, Kikuchiyo upstages this role more and more.
* Seven Samurai who lacks martial experience, but fights with engineering tech instead.
* Seven Samurai, with Katsuhiro tagging along with the much older samurai. Of course, Kikuchiyo is the real odd one out of that group.
* Sevenshot Kid both refuse to let go of the mysteries they encounter even though they know how dangerous it is getting.
* Sevenshot Kid fit this thanks to surviving multiple encounters with the supernatural.
* Sevenshot Kid. Usually it serves as a prelude to something horrible.
* Seven Simeons: a Russian fairy tale about seven brothers, each being an expert in

his chosen trade.
* seven since she joins just three episodes before the four-part series finale.
* Seven Soldiers #0 featured a team of largely new, never-before-seen heroes assembled to fight a huge threat. After all the characterization that 24 pages could take, they were all slaughtered. Surprisingly, this has some bearing on the plot of the miniseries that follow — for instance, the Bulleteer was the missing member of the doomed team, and does some research into what went wrong.
* Seven Soldiers back to raze human civilization and plunder its profits whenever humanity reaches a certain tech level.
* Seven Soldiers, being a maxi-series with time-travelling villains, has several examples:
* Seven Soldiers: Both Shining Knights of the Seven Soldiers of Victory. One, Sir Justin, a knight of King Arthur, was given by Merlin a suit of magical armor that would protect him from all harm, and a magical sword that would cut through anything. Merlin also gave Justin’s horse wings and the ability to fly. Justin was frozen for centuries and revived in the 1940s, where he applies his honor as a knight to fighting crime in the present day.
* Seven Soldiers), but all they do with such technology is continue plundering other time periods for more.
* Seven Soldiers: Good thing Green Arrow's sidekick Speedy picked up that time travel device, or else the entire team would have remained in the past at the siege of Troy, where Dr. Doome tried to trap them. Score one for the sidekick.
* Seven Soldiers nearly gets burned by the women of Limbo Town after trying to warn them of the impending invasion by Melmoth, because the Croatoans have long been taught that there is no world beyond theirs.
* Seven Soldiers, Neh-Buh-Loh was charged with killing Misty Kilgore and bringing her brain back to Queen Gloriana. Unable to do it, he instead brought stole the brain of a telepath and offered that to Gloriana instead.
* Seven Soldiers of Victory, in Klarion's puritan underground town, the risen dead are used as a workforce known as "Grundys". And yes, they are indeed similar to Solomon Grundy.
* Seven Soldiers; others being "Castle of the Mound" and "Castle of the Zodiac".
* Seven Soldiers, Shiloh Norman reveals that he can't actually understand what his Mother Box says, but he tries to talk to it anyway to keep himself calm.
* Seven Soldiers, The Manhattan Guardian was sponsored by a newspaper. A notable case in that the heroism was the primary reason why he was hired, rather than for advertising or public relations purposes.
* Seven Soldiers, where it's a major plot point that the titular team has an eighth member.
* Seven Soldiers, who abandoned the colony in shame after most of their women were raped by Melmoth and gave birth to half-Sheeda children.
* Seven Soldiers with the Sheeda; while they've been plundering the Earth for hundreds of thousands of years, they are actually time-travelers from one million years into our future.
* Seven Sorcerers... exactly once in the beginning when Nin, fresh from the normal world, asks for a pause to relieve herself. Afterwards, one could think humans in Drift don't have to use toilets. (Magical being get a pass as they are literally based on imagination).
* Seven Sorcerers series. After all is said and done, Nin regards Scerridge (who started all this by kidnapping her brother and then her) as her close friend, doesn't hold any grudge against other (former) enemies, and seems completely non-traumatised by the whole experience.
* Seven Spears of Shizugatake level to possibly make Ishida Mitsunari (main protagonist of the latter game) look good. Koei truly hates Masanori.
* Seven Stars: In the chapter "The Mummy's Heart", Charles discusses his case with a colleague over a friendly glass of brandy. When he mentions the involvement of the notorious sorcerer Declan Mountmain, he prompts a spit-take from his colleague.
* Seven Stars renders its possessor immune to bullets, among other effects. The details vary from wielder to wielder: one manifests glowing armor, and proves to be

vulnerable to being shot in the face when she opens the visor; another looks no different, but when he's shot in the face the bullet simply passes through without leaving any damage (though his face does ripple for a moment like water when something is dropped in).
* Seven Star Stamps for it. To quote: "There is no denying that Daisy is fairest of all! There's no need to fight." She almost succeeds in charming the two game hosts for it.
* Seven Stars that was buried in the tomb in an attempt to keep it from doing any more harm.
* Seven Stars: The chapter "The Dog Story", told from the viewpoint of a private detective in a cyberpunk future (the distant future year of 2026), has a lot of invented slang.
* Seven Stars the stair carpet, and Richard hastens to take up the carpeting while Catriona's gaze keeps it pinned; otherwise, the flat invader would be "free" to move all over the carpet-covered upper floor without being seen.
* Seven Stars, the villainous Bennett Mountmain shoots Geneviève in the chest with a silver bullet. He apparently misses the heart, and she survives, but it's several decades before she fully recovers.
* Seven Stars, who went on to become a notorious occultist in real life and an obstacle to Beauregard's successor Edwin in "Angel Down, Sussex".
* Seven Surrenders. The chapter details, from Sniper's point of view, what happened to it during it's disappearance at the end of book one.
* seven Sutherland sisters, who traveled as a sideshow act with the Barnum & Bailey Circus, had 37 feet of hair between them, and sparked a fad for long hair in the late 19th and early 20th centuries. (Their father played on their fame to sell patent medicine hair tonic.)
* seven swords, but with only two arms it can't use them all at once).
* Seven Swords has a sliding blade that can extend from either side of the hilt; The Shooting Stars are two swords which can be attached to each other and used as a flail-whip...thing.
* Seven Swordsmen of the Mist. Also, the ninja academy graduates each year are assigned to numbered squads. Guess which squad the main character ended up in.
* Seven Swords, used by one of Fire-Wind's Lieutenants. The same villain who uses the weapon can be seen carrying half a dozen severed heads with him.
* Seventeen Again, played by Tia Mowry. The rascalized grandma, naturally, is then played by Tamera Mowry, Tia's twin sister. (And just for kicks, the granddaughter's younger brother is played by...the twins' younger brother Tahj.)
* seventeen characters up there, and that's not including the "Old Heterodynes" (included on the page for generic backstory) and the author-insert bit characters. Ten pages of comic. Seventeen characters.
* seventeen Colombian politicians were killed, most of them Supreme Court Justices.
* seventeen different points about the gun's various improvements. In addition, if you call Sigint with other weapons equipped, there will be a detailed discussion about them. Snake has a few...colorful words for the prototype XM16E1 assault rifle, which hadn't been introduced at that point in history, and his suggested improvements are the same ones brought up by Vietnam soldiers and later incorporated into the weapon.
* "Seventeen" has also been adapted into musical prose, always spoken recitation. Even though he was almost 60 when he recorded it, country music legend Red Sovine comes up with a convincing interpretation of the teenager who now
* seventeen languages: Telugu (his mother tongue), Hindi, Urdu, Oriya, Marathi, Bengali, Gujarati, Tamil, English, French, Arabic, Spanish, German, Greek, Latin, Sanskrit, and Persian.
* Seventeen magazine had a full-page ad sponsored by a tobacco company explaining that smoking was a grown-up decision, and not one to be made until you were old enough and mature enough to understand what you were doing. In the meantime, enjoy just being a kid!
* Seventeen Moments of Spring and rising to the rank of colonel in SS intelligence.
* Seventeen Moments of Spring. He infiltrated the Nazis in the 1930s and is a high-

ranking security official who interacts regularly with top German leaders.
* Seventeen Moments of Spring. He is later cornered by Nazi counter-intelligence agents and proceeds to take the pill... and jump out the window for good measure.
* Seventeen Moments of Spring. He is serving undercover in Nazi Germany as SS Colonel Max von Stirlitz. His "real" name as NKVD agent is Maxim Isayev. His original name is Vsevolod Vladimirov.
* Seventeen Moments of Spring inside Nazi Germany. Kathe is nine months pregnant. Stirlitz is worried that she'll start screaming out in Russian when she's in labor. Sure enough, she does. The German nurses call the Gestapo.
* Seventeen Moments of Spring: Kat is a wanted criminal at large in Berlin after escaping her Nazi jailers. She finds herself in a police station in episode 11 trying to get a call to her spymaster, Stirlitz. She is horrified to see a wanted poster of her on a desk at the station half-buried under desk litter.
* Seventeen Moments of Spring nature of the series, and about half of them are feghoots. Unfortunately, almost none of the puns translate well into English. Some of them just might work in translation. An example:
* Seventeen Moments of Spring's voice that narrates the inner dialogue of the characters. In the jokes, however, the stern voice tells hilarious puns instead of superlogical trains of thought. Here is a typical example:
* Seventeen Moments of Spring. The series, while showing film clips of the Russian victory in Berlin, the Red Square victory parade, and the Nuremberg trials, makes a point of not revealing what happens to Stirlitz. The last scene has Stirlitz stopping his car on the way back to Berlin, stepping outside, and taking a moment to contemplate. The narration informs the viewer that with six weeks left in the war, Stirlitz is going back to Berlin, and back to work.
* Seventeen Moments of Spring was recently re-released in color. This led to a few new Stirlitz jokes, centered on colors. Here's one.
* Seventeen-year-old Shinichi Kudo turned seven-year-old Conan Edogawa finds this a serious problem in nearly every episode as no one will take his deductions seriously. Then again, he still makes the best of the situation by constantly exploiting his ability to be underestimated by the culprits. As the series has progressed, there are a growing number adults who recognize Conan's intelligence and take his deductions seriously without his having to go through a conduit like Kogoro Mouri or Professor Agasa.
* seventh book offscreen, particularly during the climactic Battle of Hogwarts.
* Seventh Doctor's, especially in the Expanded Universe, as she came from a rotten home life, and her mental health was a bit of a mess.
* Seventh Endmost Vision by utilizing a "Disc Swap" page between Acts 1 and 2, claiming Disc 1 is complete and Disc 2 must be loaded. The author's notes indicated they found the idea funny and had to use it.
* Seventh Endmost Vision see on the War's aftereffects rather than something inherent to the company.
* Seven. There are seven members of the Senior Council and Seven Laws of Magic. Harry Dresden was also
* Seventh Heaven MAXION started publishing its albums on DLSite and MelonbooksDL in early 2016, but there are still eleven albums it never got around to re-releasing. Additionally, the offered downloads are lossy.
* Seventh Horcrux. Despite this, Hermione doesn't understand why Harry thinks she's evil, and usually takes offense to the accusations.
* Seventh Horcrux, it's very hard by the end to see what stuff he actually even realizes he doesn't know about.
* Seventh Horcrux over not getting the job of DADA teacher. After waking up in an alley with a Daily Prophet reporter asking him why he killed six Ministry wizards while calling himself "The Dark Lord Voldemort," he decided to just roll with it. The Dark Mark was originally a cool tattoo, which he took a few months to figure out how to recreate.
* Seventh Horcrux plays this for humor when Harry (with Voldemort's mind) enters the Triwizard Tournament. As he is far stronger than any other competitor, he could win conventionally with ease. However, he's so competitive and jerkish that he

insists on cheating or attacking the other Champions, leading to him scoring awfully.
* Seventh Horcrux tendencies and paranoia regarding actually loyal individuals, nearly all of his top brass are Order of the Phoenix plants, with only Lucius being mostly loyal.
* seventh Pokémon movie, which is an equivalent expression to "Soul Mate" but literally means "Twin Soul". It supposedly refers to the existence of two Deoxys.
* Seventh problem: much like the U-3, it cannot count some forms of underemployment. If a cardiologist has to wait tables to make ends meet, they are significantly underemployed.
* seventh Shippuden movie attempts to do this to Naruto because he's his rival for Hinata's love.
* Seventh Son (2015): Bony Lizzie looks to be about the same age as her daughter Alice (the actresses are only seven years apart). Probably she remains physically young due to magic, as she's a witch.
* Seventh Son (2015): In the film, witches are not the same species as humans, although they look the same and can have children with them.
* Seventh Son (2015): Tom wanders the woods and comes across a pond where Alice is swimming naked. She tells him to turn around, and when he does, a few seconds later she is out of the water and wearing a dress, presumably summoned by her magic.
* Seventh Son, a "Blood Moon" that appears every century empowers dark-magic using witches, allowing their queen to escape her imprisonment.
* Seventh Son. A suspected case of this turns out to actually be a powerful witch possessing a little girl in order to draw out her old adversary. She drops the facade quickly.
* Seventh Son features an evil witch queen who was sealed in a pit until a Blood Moon re-empowered her and allowed her to escape.
* Seventh Son is set about a century after a war waged by evil witches on humanity, which the world is said to still be recovering from.
* Seventh Son: The reason Tom agrees to be Master Gregory's apprentice is because he has seen visions of him and knows it is his destiny.
* Seventh Tower, Crow is sent to rescue Tal from the nighmare chamber, the inworld version of an interrogation room in which the interrogator Fashneck (Who is a deformed, sadistic bastard) mind rapes his victims to obtain whathever information he desires with the use of a prision-like device that keeps the prisioner within an spherical prison. By the time Crow reaches the chamber, he finds Fashneck dead, the sphere-prison cell wide open, and bits and pieces of the shadowlike creatures that once served as prison guards. He even mentions to Tal then that he "rescued himself"
* seventies at the time). He seems to have grown out of it as his canon love interest Rachel is two years younger than him.
* seven times unskilled could have never gotten so strong. A flashback to his fight with Mr. Satan, which was before Babidi empowered him, showed that he was so unskilled that when Mr. Satan dodges his punch, it causes him to lose his balance and fall over.
* Seventybroad, George gets kicked out of his college dorm thanks to the viral video he made and being in trouble with the police. He's not even given enough time to collect all of his things, and must sneak back into the school to get them. He winds up sleeping in his car from then on.
* Seventy Maxims Of Maximally Effective Mercenaries is even about them: Maxim 24: Any sufficiently advanced technology is indistinguishable from a really big gun.
* seventy rockets and still managed to keep going. American M1 Abrams MBTs have been able to take multiple hits from their own gun in a number of friendly fire cases and are so difficult to destroy by their crews that it will often require the insides to be stuffed full of C4 to blow them apart.
* seventy rockets and still managed to keep going. American M1 Abrams MBTs have been able to take multiple hits from their own gun in a number of friendly fire cases and are so difficult to destroy by their crews that it will often require the

insides to be stuffed full of C4 to blow them apart. At least once, a crew had to abandon their tank and their fellow soldiers attempted to destroy it to prevent it from falling into enemy hands — an effort that proved to be entirely unsuccessful. Eventually, they gave up and the tank was later towed back to base to be restored to working condition.
* seventy-six missiles at once unmatched almost anywhere else in the franchise.
* seventy-two years) shocks a Japanese tourist by conversing with him in almost disturbingly fluent Japanese. When asked, he claims that he learned it from reading raw manga (well, and Yagumo taught him some 19th century Japanese, but that's besides the point).
* seventy years before the decriminalization of homosexuality in Canada.
* seven unsuccessful blows to try and remove the head; he had to finish off the job with a knife. One account states that at one point the executioner threw down his axe and offered a large sum of money to anyone in the crowd willing to take over the job. Another account says that the watching crowd was so horrified (and the half-dead Duke was so annoyed) that the headsman had to be escorted out with armed guards at the ready as the mob was threatening to beat him to death.
* Seven Up! series. Further installments have aired in 1970 and every seven years since.
* Seven Warlords of the Sea CP9 probably counts as a straighter example, and they're actual assassins as opposed to the Warlords...
* Seven Warlords, volunteered to become a human weapon for the World Government.
* Sevenwaters, one of the Painted Man's men had this as his backstory - captured by Vikings as a way to supplement their losses, freed by the Painted Man who asked the chained slaves to row them to Ulster, after which they could either go free with a bit of gold or stay with him.
* Sevenwaters Trilogy the Sevenwaters clan are in touch with nature and nature spirits, while the Northwoods are stodgy folk, and more settled in mentality.
* Seven Ways from Sundown, a pair of bounty hunters attempt to steal Flood out of Seven's custody in order to claim the bounty for themselves.
* Seven Ways from Sundown bills Texas Ranger Seven as a "One-man posse!", and outlaw Joe Flood as a "one-man riot!". This is a pretty accurate summation of the film.
* Seven Ways from Sundown: Henessey is a grizzled old sergeant of the Texas Rangers who takes the rookie Seven under his wing and does his best to teach him, guide him and keep him alive.
* Seven Ways from Sundown: Seven Jones is a still wet behind the ears rookie who arrives in Buckley to take up his first posting as a Texas Ranger. He is inexperienced and smaller than all of the other Rangers, and has never handled a six shooter. Then he and the unit's Sergeant Rock are sent out to bring the territory's most infamous outlaw, by themselves...
* Seven Ways from Sundown Seven Jones on their own to bring in Joe Flood, the most dangerous outlaw in the territory. Herley does this because he hopes Flood will kill the pair of them, thus allowing Herley to keep secret the fact that it was his cowardice which led to the death of Seven's brother at Flood's hands.
* Seven Ways from Sundown, the townsfolk of Beeker's Crossing decided to tar and feather Seven when he rides into town (on some extremely spurious logic), but are dissuaded when Seven draws his rifle.
* Seven Ways from Sundown: When Flood tries to escape, he punches Seven in the head and knocks him out, only for Seven to wake a minute or so later and clock Flood with a lump of wood. When Flood wakes up, he compliments Seven; saying the last man he hit like that was out for three hours.
* Seven Wild Sisters at a crossroads made by deer paths. Bess remembers the trope but not in time to get away.
* Seven Wonders of the Ancient World, only the Great Pyramid of Egypt is still with us, and even then most of its outer limestone has been looted or eroded. The others had all been destroyed by the year 1500:
* seven years, all "Smart" AIs will eventually accumulate so much information that they basically think themselves to death; during this terminal phase, the AI falls

into a state of "rampancy" in which it develops both "delusions of godlike power" and utter contempt for its mentally inferior makers.
* Seven Years Awesome Luck as familiars, since they're more intelligent. They can also form bonds with regular animals, but the level of control needed to make them useful tends to burn out the animals' minds.
* Seven Years Awesome Luck, but of particular note is Denneka being pregnant, with the possibility that the baby may inherit cat traits from its father.
* Seven Years Awesome Luck cope well, and insists on him staying dressed if he wants to stick around.
* Seven Years Awesome Luck: Trick is new to town after seven years as a cat, so he doesn't know anyone but his mother and little brother, and isn't especially close to even them. Denneka grew up there, but is a social outcast. Naturally, they latch onto each other.
* Seven Years Awesome Luck: Trick's years as a cat have left him with no understanding of figurative speech. When asked by a schoolyard bully what he sees in Denneka, for example, he truthfully replies that she lets him sleep with her — because he's literally slept in her bed (as a cat, and then as a boy who identifies as a cat and whom she isn't sure what to do with). Naturally, this results in rumours spreading like wildfire until a teacher questions Trick further and demonstrates to the class just how literal-minded he is.
* Seven Years Awesome Luck, Trick witnessed a corpse being added to someone else's grave while he was still a cat, but didn't understand nor much care about its significance. When he later passes the information on, though, it starts attracting unwanted attention.
* Seven Years Bad Luck, in which Max's servant is trying to hide the fact that he's broken his master's mirror.
* seven years later's match with Foley, the vote was whether Carlito would face Cactus Jack, Dude Love, or Mankind. Mankind won the vote and the match.
* seven years old in fact, after her parents were murdered and while her mother's corpse was being raped, she charged out of the closet that her mother had hid her in, picked up a fork, and stabbed him in the eye with it. She was then shot, but she survived.
* Seven Years' War. Although the British successfully forced the French to secede the Great Lakes and northern territories, it also became saddled with debt that lead to the British government imposing taxes on its subjects. Some of these colonists in America would then revolt to protest the taxation, leading to another war for Britain to fight.
* Seven Years' War barely a decade later, therefore directly leading to the creation of the independent United States (officers on both sides, including the aforementioned George Washington, first gained experience in the French and Indian War). However even in the Americas it's been greatly overshadowed by the War for Independence and remains an obscure and little-mentioned piece of American history.
* Seven Years' War hadn't paid the debts off by the time of the Revolution, nearly fifty years later.
* Seven Years' War (renamed Bergen-Enkheim in 1936 and now part of Frankfurt) in southern Hesse to Bergen near Celle (site of the infamous concentration camp of Bergen-Belsen) in northern Lower Saxony.
* Seven Years' War. So that basically means that we had nine world wars! So we're pretty much worried of getting a World War X.
* Several abilities will nullify damage of a particular attack type (often while granting a corresponding buff) - Flash Fire, for instance, nullifies all Fire-type damage, while Volt Absorb, Lightning Rod, and Motor Drive all will nullify lightning attacks.
* Several Abomination units have a Scourge Hook ability, that allows them to reel enemies in with their hooks. Abominations in
* Several actors have not just guested, but starred in more than one of Bambu Producciones' shows. A nonexclusive list includes:
* Several actresses dye their hair black when audition for roles in the historical drama

* Several, actually. Apparently, all known races use the same exact design for their space stations, right down to the color scheme.
* Several actual species of giant scorpions have been found in the Paleozoic fossil record.
* Several additional waves of attackers from Midway itself were also just about wiped out by the Japanese. Something like seven separate attacks suffered atrocious losses. The only result was to disorganize the Japanese forces to the extent that the final attacks were outstandingly effective. One of the best books about the battle was named
* Several ads for Clorox Bleach have gone in this vein, "for life's bleachable moments". One includes a young boy trying to get his dad's attention,
* Several ads for the 2012 Ford Focus are used worldwide, made possible by the fact that the car differs between world markets mainly in powertrain options, with few external trim differences.
* Several AI of varying levels of intelligence and sentience exist in
* Several air forces (US and UK come to mind) would hand their pilots a shot of whiskey after returning from a mission during
* several, all by Fedallah, but the one that sticks out most poignantly is him saying, "I go before thee, my captain." No, Ahab, that doesn't mean you're invincible while Fedallah's alive, it just means he'll die before you.
* Several Allied fighter planes during World War II were equipped with War Emergency Power (WEP) for particularly desperate situations; WEP was engaged, usually, by pushing the throttle lever past a certain point, which was marked off by a wire stretched across the assembly to stop the pilot from accidentally activating it. It would give the pilot a much-needed boost on the battlefield and improve performance, but would also push the engine past the redline and inflict some fairly major damage to the engine's internals. Mechanics checking the planes after they return to base would always check this wire, and if they found it to be broken, they knew that the engine would need to be pulled out and completely rebuilt.
* Several alternatives promote "a more healthy and realistic" body image than
* Several American films about the American-Japanese battles in the Philippines, either the Japanese conquest of the islands in 1941-42 or the American return and re-conquest of the islands in 1944-45.
* Several American sitcoms are set in a rose colored idea of two decades ago:
* Several American TV affiliates also refused to carry the show initially, though they quickly reversed their position when it took off. So while it got a lot of free press, the show still suffered for the backlash early on.
* . Several ancient cultures believed that if a woman slept with different men during or shortly before her pregnancy, that each of these men counted as a father.
* several and you couldn't save) was not, as all you got was the handy but rather underpowered Guardian Frame.
* Several animal hybrids exist that have had only one known representative, such as Motty the half-African/half-Asian elephant calf (deceased) born at Chester Zoo. Most such hybrids arise in captivity, as species that interbreed in the wild tend to do so more frequently than this trope demands.
* Several animals produce toxins that could qualify as this. It should be noted that most of these critters are bright and colorful, which in nature means:
* Several animated shows have taught children how to perform the Heimlich Maneuver, which is not only useful but potentially life-saving. Kids have saved lives from seeing the technique on
* Several animated skits had a superhero who taught about teeth called "Captain Super Ultra Mega Smile Man". The boy Bobby kept forgetting his
* Several animators, including Yasuhiro Takemoto, the director of the anime adaptation of
* Several anime shows have gotten vindicated through premiering and rerunning on other countries' TV networks.
* Several appendectomies were performed on board US submarines during World War II by pharmacist's mates with improvised tools and textbooks.

* Several apps for Apple's iOS devices turn it into a functional Pokédex, and do just about everything but talk. And in fact, even that problem was removed when Wolfram Alpha, an information search engine used by the iOS's Siri, added in Pokédex data to its database. So you can indeed ask Siri how tall Xerneas is, and get an answer.
* Several aquatic or amphibious animals such as fish and turtles catch prey this way. By opening their mouth very quickly they create a vacuum that sucks water in, along with any small fishes that get too close.
* Several arcs focus on characters with these powers (typically as the main antagonists), and the
* Several are mentioned in "Draft Dodger Rag" which provides the page quote: aside from homosexuality and sicknesses, the narrator also mentions his "poor old invalid aunt", that he's "addicted to a thousand drugs" and that he's working at a defense plant.
* Several are seen amongst Arthur's army at the end of the movie, probably to be used against the Castle Argh.
* Several Arrancar in Aizen's army are, namely Tier Harribel, who is the Third and
* Several Asian police departments held out even longer before making the switch. It wasn't until 2016 when law enforcement in Macau switched to the Glock 17 as their standard sidearm. In 2017, the Singapore Police Force started evaluations for a replacement for their Taurus 85 .38 Special snubnose revolver. While they first tested the
* Several attempts to stop the villain Juggernaut. On one occasion he took a pair of katanas
* Several Augments are recurring characters. Due to the ban, it's a black market technology, often resulting in unstable individuals. Julian Bashir is one of the only people this technology has worked on without serious drawbacks.
* several autocannons and is one of the most cost-effective anti-aircraft units around. They also have Saber platforms, which are cheaper and can be deployed as part of infantry platoons, but aren't as tough and can't move.
* several Azurite soldiers died while begging the elf to save them tragic consequences.
* Several background characters were named after their actors, such as Paul Wilson as Paul, Paul Vaughn as a different Paul, Thomas Babson as Tom,
* Several background ponies are given mention, including Berry Punch and a certain grey Pegasus who asks for muffins.
* Several baseball players have struggled with "the yips", the inability to do the one they've done since early childhood, throw a baseball:
* several basic questions about the nature of life and the universe, essentially saying that they were the wrong questions.
* Several books are told from alien points of view. Some are just from the perspective of Ax, the team's
* Several books from the apocrypha were originally written in Hebrew, but then lost over time as they did not form part of the Jewish
* Several books later, Tyrion is on the lam and has travelled to an entirely different continent, where he convinces his travel buddies to let him stop off at a brothel. While there, he happens to bump into Jorah Mormont, the dismissed-but-still-loyal knight of Daenerys's court, who are enemies to the Lannisters. Jorah was only there for the same reason as Tyrion himself: he was going through depression and needed a quick lay.
* Several books reference the ancient Morporkian general Tacticus, who was so shrewd and successful that the word 'tactics' was coined after him. This refers to the actual Roman historian Tacitus, while several of his exploits resemble those of other famous Classical tacticians such as Caesar and Alexander.
* Several Borg-focused episodes had them assimilating low-tech worlds just to swell their numbers. What makes it this trope is that cloning technology has been frequently shown in the franchise to be widespread and very cheap (to the point that
* Several boxers. In fact, this may be fairly common at the lower levels, where

the pay isn't as good and so most boxers have full-time jobs.
* Several brands of gasoline have contained trademarked additives over the years, such as Shell's "Platformate" or Chevron's "Techroline" (later "Techron"). As with Retsyn in Certs, no other gasoline could claim to have these additives,
* Several brands of peanut butter also promote themselves as being "vegan." If you're asking yourself whether there are a lot of animal byproduct peanut butters on the market, well, no. These products can be marketed as "organic", and have been in the past, but not everyone knows or trusts that word.
* Several British roads have a similar but rather more understated sign, saying "__ killed, __ injured this year. Drive Carefully."
* Several British Royal and Noble families who on the losing end of a power struggle, most famously the Stuarts and their "Jacobite" supporters.
* Several buildings at Central State Hospital, in Milledgeville, Georgia are now closed. These are photos of the interior of the Walker Building, closed in 1973:
* several), but historians theorize that they were part of a mass migrations of peoples caused by some unknown disturbance.
* Several cable channels in the U.S. and U.K. (Encore, AMC, and Sky among them) have aired 24 hours of
* Several cantina franchises, such as the Cabo Cantina in Southern California, sell ridiculously oversize margaritas. Cabo Cantinas sell 36 oz "Mega Margs", large enough for several people but single patrons can attempt to drink it themselves.
* Several cards are based on Witcher potions and can be used on any unit, even though anyone without Witcher mutations would die if they drank one.
* Several cards reward you for doing this in specific ways, including
* Several cartels in Mexico and South America have been reported doing this. There's several grisly photos of it on the internet. Viewer discretion is definitely advised.
* Several cases have at least a murder suspect looking like this and acting like a snarky
* Several cases over the course of the 20th Century involved Construction Workers and rebar invoking this trope. Amazingly, one such incident in the Nineties had the victim survive despite having had at least three go through him, making him far luckier than the last case, who had taken a pair straight through the heart...
* Several cats help keep forbidden relationships hidden. Fireheart and Mistyfoot do this for Graystripe and Silverstream's relationship, and
* Several characters also use them to fuel particularly high-energy consumption attacks that would otherwise leave the ninja dead from rapid malnutrition. For example, Chouji has a three-pill provision
* Several characters are described as attractive. Frostfur has a "beautiful white coat", Fireheart is a "handsome ginger tom", Brindleface is a "pretty tabby", etc.
* Several characters are the slaves of other characters, with none of this being looked at oddly or negatively. In fact, the receiving of a girl's first slave is treated more like getting a new pet than anything else, with the mother telling the girls to "take care of them" and that it's a "big responsibility". However, in actual practice, the situation often seems to be "slavery" in name only. Given the general treatment of women during that time period, being a slave to an Amazon was probably a reasonably sweet deal.
* Several characters birthed from the /tg/ boards were later immortalized via a single reference in canon books, such as Adept Grendel, a non-combat character from a group of fans'
* Several characters commenting on the relationship acknowledge that regardless of their former friendship, Suzaku truly is Lelouch's greatest enemy, even more so than his father. In fact, the narrative and the wiki suggest that they were
* Several characters do this, since it's trivial for Lego minifigures. This actually comes up at one point where Emmet uses his spinning head to act as a wheel's axle.
* Several characters from shows for very young kids are given this treatment as
* Several characters from the comic book can also be seen in the Weapon X scenes: Quicksilver, Banshee, and Toad, specifically. Others are harder to distinguish on

sight.
* Several characters have bad pasts and end up in prison but for some prison is a place where they actually heal. In Soso's case, she was close to suicide until Poussey saved her and developed a genuine friendship with her. In Poussey's case she was becoming an alcoholic to stave off emotional pain, and once she becomes close to Soso it seems to stop. Their relationship is very sweet and heartwarming and fans find themselves rooting for the two. It's made that much sadder when
* Several characters have bluntly called Mira dumb. For example, in response to her getting a cold, Mikage actually says she's "a genius in being stupid" to her face, due to her subverting
* Several characters have demonstrated the power to read minds by touching another person's forehead, including Goku and Lord Slug.
* Several characters have gotten goofy eyes at some point, but most often, it's Kylie.
* Several characters have numbers that are associated with them, usually showing up in their typing quirks: Sollux with 2, Vriska with 8, Nepeta with 33, Karkat
* Several characters have parentages that are confirmed by the writers but aren't mentioned in the text. This leads to oddities with canon, such as Sandstorm not reacting to her father Redtail's death in
* Several characters, including Franky and Sogeking, had noteworthy musical entrances. The hammiest of them has to be Mr 2 Bon Kurei, who
* Several characters, including Kain himself, were transformed into vampires—thus ending their human lives. As the
* Several characters in Harry Turtledove's various series spend time in one PoW camp or another. Often, the viewpoint character from a losing side (Japanese in End of The Beginning, Confederate States Army in
* Several characters in the MK franchise are more powerful in gameplay terms than they are in actual Kombat. The biggest offender, by far, is probably the evil Elder God Shinnok, who in some end scenes was shown to be literally capable of killing Kombatants with only a look or even "a mere thought", is declared in the 10th game to be
* Several characters in the Punk Hazard arc have their hearts removed by Trafalgar Law, leaving a fist-sized square-shaped hole in their chests. The only reason they don't immediately keel over and die is because of Law's Devil Fruit power sustaining the heart and its functions.
* Several characters (mostly those with great spiritual power) can see Amaterasu's true form in
* Several characters soil themselves at the mere mention of Tyrant Overlord Baal in
* Several characters specifically invoke this trope, such as Luffy gaining power from an afro or Garp bursting through a wall because it's cooler than using the door.
* Several characters state that "Muggle-born" witches and wizards like Hermione are more common than Squibs in the
* Several characters such as Nana even lampshade his piss poor luck when it comes to over the top ecchi scenarios. Momo calls Rito's
* Several characters suspect love motivated Aurora and Mab's actions and are visibly disturbed by the notion. Maeve in particular implies that it is very dangerous for powerful magical beings of the Never Never to be in love. It twists their worldview and throws them completely out of their comfort zone.
* Several characters think the Scratch is a rift that sends Jack Noir to an
* Several characters treat Devil Fruits as nothing more than myths, but the vast majority of the most famous people in the world have eaten a Devil Fruit, which makes it hard to believe that their existence would be in dispute.
* Several characters will comment that outlanders are not well liked by the native Dunmer. This supposedly includes foreign-born Dunmer. However, a Dunmer
* several cheers and slipped in a "Sieg!" The audience members that were adults during Nazi Germany responded with "Heil!", much to his disbelief.
* Several Chicago local newspeople cameoed as themselves during the run of

* Several Christian faiths believe this is the case. The only reason God gives commandments is because He knows those courses of action inevitably lead to misery and destruction whether the law's enforcers ever catch up with you or not, and these inevitable consequences of your actions
* Several Citi Double Card commercials show first dates with both sides being brutally honest and cheerful about it (he says he will send a vague and confusing text a few days after the date, and she replies that she'll wait a few more days before replying; both agree that they'll never see each other again). The commercial implies that a more honest world would be a better place.
* Several citizens are shown worshiping Superman after his rescues, which he is obviously uncomfortable with. Some naysayers instead call him a "False God" or "Antichrist". Bruce Wayne has a vision of a
* Several civilian women react to dead bodies and other gruesome sights by screaming uselessly on
* Several classes also have talents that increase damage dealt to targets that are low on health.
* Several classes use some summoned allies that can't be fully controlled, and losing them generally means greatly losing impact on battles until they can be summoned again (Rangers and Mesmers are dependent on their pet/illusions to function, Necromancers, Guardians and Engineers need to fill a skill slot with each extra minion/spirit weapon/turret they use which means less skills available). Against bosses with strong AOE attacks that players can dodge but AI-controlled units can't, most of the time these units take greatly reduced damage or are sometimes immune to them (notable in Fractals where only players are subject to agony). Speaking of Fractals, Subject 6 is a special case : it periodically takes a defensive stance that blocks all incoming attacks and after taking 20 hits, every subsequent hit causes an explosion that damages everyone and can cause team wipes. Uncontrollable
* Several classical civilizations, such as the Greeks, Romans, and Egyptians, used and kept closely guarded technology used in temples to trick worshipers into thinking it was the gods' doing.
* Several classic tabletop wargames, notably Simulations Publications Inc,
* Several classroom scenes take a less uncanny, yet still budget route by replacing the students, when not the main focus of a scene, with brightly-colored cloud-like shapes.
* Several colleges use live animals as mascots in addition to the fake ones:
* Several Colonials take this as a sign when Earth is asked to bring its ‘world animal’ and ‘world bird’ with them; the owl chosen to represent Earth eats all twelve of the signature birds of the other colonies when it’s put in a cage with them (the Colonies’ world birds all being songbirds rather than predators), and the wolves chosen as Earth’s world animal are slaughtered as a symbolic early stage of the war.
* Several colony ships were built and launched after the Nanodisaster in
* Several comedy scenarios including a recreation of battlefield chaos, a
* Several comic book writers remain employed despite the low quality of their work and unprofessional conduct towards fans.
* Several commentators are worried that the United States is heading towards one as well, in reaction to President
* Several commercials for cleansers, plumbing services, or household repair have depicted toddlers flushing their toys down the toilet. The resulting blockage and/or flood are generally implied by blocked-plumbing sounds, not shown.
* Several commercials for Reeses Peanut Butter Cups from the 1980s, show somebody discovering how great chocolate and peanut butter taste together, but the discovery being disregarded for some reason:
* Several companies have produced DVDs designed to deteriorate between 8 and 48 hours after being removed from their packaging, which were basically intended as a way to rent movies without the customer having to return them and the company being worried that you'd steal the movie. They never took off, due to environmental concerns about the waste from the useless plastic discs as well as not offering

much more in the way of practicality compared to standard DVD rental services.
* Several companies with multiple retail locations have a phone tree set up with each store in a given area responsible for calling one other pre-designated store, so that (for instance) if an unsuccessful shoplifter successfully flees
* Several conquering kings (or wannabe conquerors/kings) were merely boys when they led their armies into war. Examples include
* Several COs, including Kanbei and Colin, are treated as flawed at best as commanders in cutscenes and in-story, with Kanbei being a borderline
* Several countries and their respective branches of service, including for example the
* Several countries backed efforts to establish a southern Slavic state (Yugoslavia) purely because it would weaken the Austro-Hungarian Empire or allow a pretext for war.
* Several countries in Faerun outlaw the worship of Talos (not to be confused with the Elder Scrolls deity), the god of storms, destruction and natural disasters.
* Several countries mistranslated "hedgehog" as "porcupine" (though, ironically, Sonic being a porcupine would make Robotnik's "rodent" assessment accurate).
* Several creatures (exactly which depends on the edition) have the ability to change into other forms. Some of these, such as that of several dragon types, are generic enough in what those alternate forms can be that it is possible to shift gender with them — of course, it usually comes with the requirement to change into a different kind of creature as well.
* Several critics have argued against the idea that Toni Morrison's Pulitzer Prize-winning
* Several critics have argued that the character has become this to the writers even more so than to the reader. Hence why the franchise has gone through so many eras where the character
* Several Cuban baseball players have defected from their home country in order to play professionally in the United States, something which picked up in
* Several Daedric artifacts are acquired by doing some extremely unsavory and "doomy" things. One can
* Several days after Jodie Troutman announced that she was pulling the plug on
* several days after Randy Sr's world championship fight. He didn't die in the ring per se, but the fight with Miyata Sr. caused his death nonetheless.
* Several deleted scenes further develop Jim and Janice's relationship and have Susan show a warmer side during her birthday party. Many fans wish they'd remained in the movie for the sake of better
* Several demons and magical creatures, such as Dwarves and Leprechauns, possess super speed. some magical beings naturally have superspeed.
* Several details on the Enterprise were changed from the way the ship originally
* Several dialects of French, notably Cajun, call ladybugs "vaches du Bon Dieu", "the Good Lord's cows." Similarly mantises are "chevaux de diable", "the devil's horses".
* Several different forms of these are costume options. These range from a face-type (which predates costume auras) with solid-color eyes, to Electric Eyes, Fiery Eyes, Smoky Eyes, Sparkly Eyes, and more.
* Several different Goa'uld take a crack at Earth, although Anubis nearly succeeds a couple of times. But none of them top Major Samantha Carter using a Stargate to blow up a sun and wipe out a solar system, complete with (almost all of) Apophis' fleet.
* Several different kinds of features are named after deities of happiness; craters and "large ringed features" are named after deities of wisdom;
* Several different processes of color photography were invented during and even
* Several direct-to-video Disney movies released between 1998 and 2003 are based on TV shows and aren't sequels but really random episode compilations with linking material.
* several disguises on top of each other, and still no one could figure out who he was.
* Several Disney movies have some, which either end up in their own special

promotional comic book/mini-series, or simply in the pages of
* Several Doctors get nicknames based on the character concepts going around the production office when discussing how the new Doctor should be played:
* several dozen of them, some in entirely different families. The sea bass served at one restaurant might be as closely related to the sea bass served at another restaurant as a cow is to a giraffe, hippopotamus, or a whale.
* Several dozen Pinkie Pies come together... to prepare the jaunting base for a Hearth's Warming party.
* Several duets for Abner and Daisy Mae were cut; of these, "I Wish It Could Be Otherwise" was used in the movie version, and "It's a Nuisance Having You Around" was recorded by Rosemary Clooney.
* Several dungeons, such as the National Archives, the Antagonizer's Lair, and Olney Powerworks, have a hidden back door that you can use to skip all the monsters and traps and go straight to the boss/Macguffin item/mission objective.
* Several DVDs of the films contain Easter Eggs, including bloopers and the like, and are often revealed by inputting "1138". In the DVD for
* Several earlier stories in continuity actually justify the trope; once various world governments were made aware of what was happening, it rapidly dawned on them that they couldn't do anything to stop the Change and that
* Several Ecclesiarchal artifacts (usually the bones or personal effects of a dead saint) can bestow this upon its bearer provided that the bearer is faithful enough. Whether this is a direct result of the bearer's beliefs or if it's just some hidden piece of tech that the bearer is unaware of varies depending on the author. Unsurprisingly, the Adepta Sororitas are deeply tied to the Ecclesiarchy, which sometimes accounts for the "miracles" that happen. In one case the belief was strong enough that it rendered anything within the artifact's range of influence to be
* Several editions have included large, flightless, predatory birds called Axe Beaks, of which the original description in the 1st Edition
* Several editions of the contest have unique quirks that never spread to subsequent editions:
* Several employees and customers at the water park are horrified to see Rasputia in a bikini (especially because her belly is so large that it completely covers her hips, making her look naked).
* Several entries in the Expanded Universe are direct sequels to TV episodes. In particular, the
* Several episodes dealt with other officers who, in one way or another, are ill-suited, bad or otherwise incompetent. All of the episodes point to
* Several episodes deal with the concept of a Harsesis: a child of two Goa'uld-implanted humans. Such a child would be a human with the complete genetic memory of both Goa'uld lines, and a major threat to Goa'uld domination. One episode has Shifu, a Harsesis, explain the need to keep that part of him suppressed. He causes Daniel to mentaly live out a scenario where he gets some of these memories and slowly turns evil.
* Several episodes dedicated to Worf's family, their disgrace, and Worf's childhood among humans.
* Several episodes end with the Meaningful Funeral of the Victim of the Week. “The Patriot in Purgatory” is a particularly good one, with a man who died on 9/11.
* Several episodes have been withheld from all syndication rerun packages since 1971, mostly for heavy black stereotyping. The banned list includes the following shorts:
* Several episodes make reference to "spinning tops of doom", which are... well, pretty scary for spinning tops, but also apparently an extremely desirable evil gadget. Somewhat ironic as they were invented by the main character's sidekick.
* Several episodes mention that spacing is the preferred method of execution for treason and mutiny in the Earth Alliance military; one character is threatened with spacing after it is discovered that he
* Several episodes of have the Janitor pretending to be a doctor. Every time he

dons the name "Dr. Ján Ĩtor."
* Several episodes of SG-1 make it clear that some reverse engineered alien technology has been making its way into the commercial sector, via the SGC and the Trust composed of rogue-NID agents and corrupt businessmen. One episode featured a prototype particle cannon being "developed" by the US military. In the 8th Season finale
* Several episodes of the revived series mention the Shadow Proclamation, which covers several scenarios (besides the ones we haven't seen yet). Convention 15 deals with the cessation of hostile activities while parley is taken. Article 57 prohibits the destruction of a Level 5 planet if no laws were broken.
* Several episodes open on Shintaro and Ayano sitting in a world full of clockwork gears, talking vaguely about how he's 'forgotten it all again' and how she will 'tell him the story, one more time'. The cold open in this case works so well in part
* Several episodes reference then-popular dance moves like twerking (which also appears in
* several episodes that hadn't been aired on American Nickelodeon at the time of its release, like "My Two Krabses", "Bubble Bass's Tab" and "Kooky Cooks".
* Several episodes would have the plot of two pen pals meeting in person with one wrestling with revealing the truth behind their bragging.
* Several Esoteric groups most commonly of the Left Hand Path variety do believe that a person can attain literal godness by reaching the highest extremes of Spiritual individuality, self-liberation and self-realization. This is mostly common among the variants of Theistic Luciferianism, Dragon Rouge, Temple of Set and some variants of Theistic Satanism, which is basically a re-interpretation of very old Gnostic, Rosicrucian, Alchimic, Buddhist, Taoist and Esoteric concepts mixed with some Jungian psychology (particularly the idea of Self and Individuation) and Crowleyan Thelema (which is what Crowley meant with “every man and every woman is a star” and “you should talk to your Holy Guardian Angel” (the Self). Basically what it says is that by using different Esoteric methods a person may liberated it true Self (whether is the mind, consciousness, spirit, soul, monad, etc. depends on the writer) to attain complete liberation from the boundaries of the physical and causal world, becoming basically acausal and thus eternal. Similar, as mentioned before, to the concept of illumination from Buddhism, Taoism, Western Esotericism and Gnosticism with the difference that this doctrines generally see the process to attain illumination to be done by devotion, discipline, self-sacrifice and general goodness whilst LHP practitioners tend to be more selfish and conceited in their pursuit, disregarding things like good or evil, compassion or self-sacrifice apart from the needed for self-discipline. Others are just
* Several European monarchies (e.g., Sweden and Belgium) now allow the firstborn to inherit regardless of gender, and others are considering the change.
* Several evangelical Christian youth groups leaders to be a funny but important teaching tool, despite the fact the movie was intended to mock this very demographic.
* Several events were added to the game to drive home the fact that Garrosh has gone beyond the pale. During the Darkspear Rebellion, the player sees trolls being caged, executed, and burned in piles while orcs laugh. Early in the Siege of Orgrimmar a cinematic shows the destruction of the Vale of Eternal Blossoms, a holy place to the Pandaren, due to Garrosh's actions.
* Several Exalted types are quite literally transhuman. The Alchemicals start as cyborgs with human souls, and eventually turn into giant robots and even living cities as their permanent Essence rating increases. The Infernals have the ability to become like their
* Several examples, but Rossini was particularly well known for lifting music from one of his operas to another. It was acceptable at the time, as long as the two works didn't premiere in the same town.
* Several examples having to do with slang terms referencing homosexuality:
* Several examples of people being killed or maimed by zoo animals through blatant

stupidity have made it into the
* Several examples of this are featured in the "Superhero Sex Scenes" sketches on Mikey Mason's album
* Several examples with the Scooby Gang, most notably in the episode "Hush", which came complete with the lights turned down and an audiovisual presentation... but no spoken dialogue since their voices had all been stolen.
* Several exceptions ran through Buffy on the 'not interacting with each other.' Most notably a werewolf hunter was eaten by a vampire, a demon-god was attacked by an
* Several face creams have been advertised as "inspired by" genetics or "gene science" as they sometimes put it, but don't
* Several facts from the religious texts the story originated from were changed/omitted for the movie to make the protagonists more sympathetic to a modern audience (e.g. in the movie, Moses killing a slave master is accidental, according to the religious texts Moses did it deliberately).
* Several famous examples happened in tours of the British and Irish Lions:
* Several famous naval officers had once been this, naturally enough.
* Several fan-created maps were also added to the official list of maps.
* Several fanfic attempts (or at least attempted) a Magical girl crossover style in the form of
* Several fans call Gendry "Gendry Waters" given that "Waters" is the surname for high born bastards in the Crownlands. However, the surnames are for
* Several fans didn't like the reveal that Lusamine, the main antagonist of
* Several fans find the reveal in the "Beginnings" two-parter that the Avatar Spirit is Raava, a
* Several fans think that about Jon Snow, who was stabbed by the Night Watch in the finale to the fifth season. The fact that his actor is returning, and that a poster for the sixth season shows his face helps the theory out.
* Several fan works portrayed Octavia Melody and Vinyl Scratch/DJ-PON3 as roommates. The
* Several female characters are pregnant or have already given birth by the ending of
* Several female characters, most notably Susan Stern and Dayna Jurgens, share this origin story in
* Several fighter aircraft, like the F4F Wildcat, the F6F Hellcat, and the A-10 Warthog, are renowned for their toughness and embody this trope. During the Pacific War, the Wildcat was feared by Japanese pilots for its ability to absorb hundreds and hundreds of rounds and still stay in the fight.
* several fights alongisde the main protagonist. "W-W-W-W-W-WHAAAAAAAAAAAAAAAAAAAAAAA!?"
* Several films that were rated PG-13 (or even PG) in theaters have carried a TV-MA rating for uncut evening showings on
* Several films use the word "hell" metaphorically to mean a very horrible place or situation in two
* Several film versions of the Bluebeard legend show the room in which the preserved bodies of the titular character's wives are kept. For instance and in a modern twist, in the 1971 version starring
* Several Final Fantasy mainstays appear, including Cloud, and their hair is as anime as ever.
* Several finishing moves have become synonymous with the wrestlers who used them.
* Several finishing moves have been copied so often that they are no longer associated with a single wrestler, although sometimes little variations are added just to appear different.
* Several finishing moves have more to do with character development than actual utility. The
* Several flavors of this trope (alien abductee, Satanic cult victim, militia gun nut) appear in the
* Several folk songs are about being sent to Australia, such as "The Black Velvet Band".

* Several followers of the Lying Darkness wear such masks to denote their status as one of
* Several football players begin to suffer a meltdown thanks to the heat, until Boomer Esasion passes them all bottles of Pepsi. As they chug, the melting is not just stopped, but
* . Several foreign leaders are convinced to make political deals that benefit the kitsune nation with sex and Naruto makes a fair bit of money selling (fake) pictures of Tsunade bathing to the Raikage and Tsuchikage. However, in the latter case, both buy the pictures because they realize the implications of someone successfully spying on the Hokage in her own home.
* Several forensic pathologists have admitted to having lunch in the autopsy room in their memoirs.
* Several from the 1996 contest, particularly its rebranding as "Eurosong," its unique relegation system (every country interested in competing could submit an entry, which were then judged by jurors from each country to determine which 22 countries would join hosts Norway - an idea that backfired when one of the relegated countries was frequent participant and major EBU financial contributor Germany), having politicians from each country wish their representatives luck, presenting the songs in a "letterboxed" format before the contest switched to widescreen in 2005, presenting the votes from a virtual "blue room," and the only instance to date of a country's spokesperson appearing onstage to deliver her country's votes (fittingly, Norway's). Most of these novelties would disappear the following year, and it's the only contest since the very first in 1956 to not feature a German entry.
* Several games feature a limited-use item capable of reviving a dead character—and given that the series uses
* Several games have enemies who are palette swaps of each other, though
* Several games in the franchise have one boss who possesses an item or skill that nullifies effective damage against them:
* Several games in the Japan-created franchise, including all the main-line Genesis / Mega Drive games, were released in North America before Japan. Justified since the series was created specifically to appeal to Western fans, and also because
* Several games in the series include the Oghma Infinium, an artifact of the
* Several games in the series let you use a bible as a rotating subweapon. Yes, you're throwing The Book at them.
* Several games take place in a nation called "United Federation", which is America in all but name, complete with their president living in a White House-like building.
* Several generations prior, Steadman was able to hit a moving target at the bottom of a very deep ravine, in the middle of the night.
* several God complexes, where Commodus enters Rome along a long road in the middle of a large open space so that crowds can cheer him. Neither the road nor the open space existed until Mussolini's regime.
* Several Greek films set during WWII present Nazis that fall under this trope. In most cases the German officers are presented as a combination of the
* Several Greek gods act like this. Most notably, Apollo is this to Artemis, although she can't really call him her annoying
* Several happen for Candace and Jeremy, mostly due to Candace's status as the resident
* Several Hardmode enemies can inflict confusion, which reverses the controls of your left and right buttons.
* several has some truly Nightmare Fuel looking facial scarring after a missile-massage, and Major Bludd is now sporting a big nasty one across his face after an explosion. Possibly subverted by Snake Eyes, who is extremely heroic, but whose unmasked face managed to unnerve an entire biker gang.
* Several helmets from the film were worn by the gorilla SWAT team in the final scene of
* Several heritage railways in the UK provide a useful public transport service

using antique equipment — often because the heritage railway uses a line that was closed down with no decent transport alternative in the area.
* Several highly climatic and emotional scenes on the SMP have taken place near some fairly vulgar or hilarious structures, including and not limited to a floating sign that said the word "CRY"
* several him some. In the last episode it appeared, it became clear that the book wasn't malignant, it was just sick of having to grant spells to someone who only used them for selfish reasons.
* several historical errors, but Doenitz made sure it never got to the order stage.
* Several historical figures in Japan have become deified as kamis (Shinto gods).
* several hits, so he lost his bet and has to give the Slayer free reign over where he goes.
* Several hobbyists build these things in their garages. For example,
* Several Hogwarts classmates are Muggle-borns, such as Justin Finch-Fletchley of Hufflepuff, who relates that he was "
* Several Hong Kong actors have moved on from otherwise lighthearted comedies to full-blown critical acclaim in this manner. Case in point, the two leads of
* several hours via (what else?) nanoprobes. Apparently, the technology must only work on main cast members. Only that one time...
* Several human worlds are at least partially terraformed to make them inhabitable, though their technology has its limits. After the end of the Human-Covenant War, humanity has been actively (re-)terraforming glassed worlds to make them livable again; this can be seen in both
* Several (if not most) of the various Links tend to fall under this as well. For example, Link from
* Several "imprints" on the superhero fiction newsgroup rec.arts.comics.creative, notably the
* Several improvised battle contraptions like remote turrets, drones, and even homemade
* Several in "Calling Doctor Amelia Bedelia" that eventually lead to the people getting
* Several incidents essentially happened because someone with too much power got bored, most obviously Tenshi in
* Several independent shipowners, most notably Celina and Valantin, make their living through piracy. Valantin, however, is in an entirely different league from other pirates, being the most famous and feared Zero-G Dog in the known universe.
* Several Indo-European dawn goddesses, such as the Hindu Ushas and baltic Aushrine, a function that was probably inherited by the common Proto-Indo-European goddess from which they descend,
* Several infamous "Draft Busts" are often referenced when a recently-drafted player fails to meet expectations.
* Several in-game skits lampshades the implied attraction between them, such as when Yuri and Karol discuss how Rita always
* Several inmates at Nazi concentration camps wrote and buried diaries to let the world know what happened.
* Several insects reproduce in this way, planting their eggs inside another arthropod.
* Several Inugami Circus Dan videos depict the members working in offices, sitting in cafes, meeting old friends and generally going about their business like ordinary people whilst wearing their trademark white and black face paint. None of the extras notice, let alone comment on it. Particularly noticeable example from about 1:34 in
* Several IP addresses are reserved for special uses. For example, no external address can have an IP of 127.0.0.1 as this is for loopback testing. The 192.168.x.x range is for local private networks, as are any addresses within 172.16.x.x through 172.31.x.x and 10.x.x.x (respectively, 256 class C subnets, 16 class B, and 1 class A).
* several, Iris’s hair often comes off looking even more thick than what it normally does in the anime.

* Several Italian fairy tales have this, ranging from going to war, saving a prince dressed as a doctor, escaping from villains, or simply because they feel like it / a magic pony told 'em to. Examples: "Fantaghiro the Beautiful", "The Dragon and Enchanted Filly", "The First Sword and the Last Broom", "Wormwood", "The King of Spain and the English Milord", "The Great Narbone", "The Parrot", "The Canary Prince"...
* Several Italian folk tales have a version of this, often with the heroine as the testee. In one such case, a woman was imprisoned by her lover's ogress mother, who insisted she complete impossible tasks under pain of death (the mother wanted the excuse to kill her so she could marry her son to a princess.) The woman would attempt the task, realize she was going to fail, and have a handsome youth appear to her and offer to complete the task in exchange for a kiss. The woman refuses each time—if he were her lover, a thousand kisses, but he is not and will not get one— and the youth completes the tasks for her anyway, finally revealing that he is her lover after the last task. He gets the thousand kisses.
* Several Italian restaurants have their restroom signs, quite naturally, written in Italian. It's incredibly easy to misread the Italian word "uomini" as "women", but if you do that,
* Several Italian schools of the late-medieval/early-Renaissance teach dual-wielding sideswords. Florentinian schools were particularly famous for it, though the style shows up in Bologna and Milan as well.
* Several Japanese fables work with the assumption that sex had for honest reasons will always produce tears. There is often a character who is dishonest and hides a container of water in their sleeve to create the illusion of tears.
* Several Japanese officers who fought on Guadalcanal went further, calling themselves and their men 'teppodama', literally "bullets" in being
* Several Japanese promotions have titles that only make sense if you're familiar with the promotion's history. AtoZ was intentionally named this way, for example. Some are a combination of poor
* Several Japanese promotions, possibly due to poor understanding of English:
* Several jokes over the years have taken a short break from a silly situation to mine Lisa's developing major depressive disorder for comedy. Usually, it's quickly acknowledged and followed by an awkward
* Several jokes were made about the standard work week being nine hours long, based on the popular conception of the time that technology would allow people to work far less. Not only has the exact opposite happened, but cell phones and email have allowed bosses to contact employees 24/7, meaning that the separation between work and leisure has become blurred.
* Several kinds of giant spiders figure prominently as enemies in Act 3 (Kurast) of
* Several knights of the nobility, like Sir Mikhail Pantielle and Grave Levantine, are this by reputation only.
* Several lack eyes, since they'd be useless in a pitch black environment and would therefore only serve as a waste of resources and vulnerable entry point for parasites and pathogens. Some are also socketless.
* several large monsters are unable to be captured for various reasons and is forced to be slain by the hunter.
* Several layers of petticoats, sleeves, or other parts of the dress.
* Several legendary creatures decide get together to beat the shit out of each other in a wrestling-style tournament in
* Several levels have a "normal" solution which is also the hardest / most labor-intensive solution
* Several level up missions require the usage of modifiers such as Hidden and Sudden to complete. However—and this is where the game's
* Several living cities crawl, float, or fly across the landscape of the Liminal Shore. The Windborne City of Nera is a flying example and always on the move, stretching across the sky in a vast train visible from a few hundred miles away on the surface. It follows a migratory path that sees it encircle the entire globe of the Liminal Shore every thirty to fifty days, generally speaking.

* Several locations and objects create a connection to the supernatural world including The Palmer House, 2240 Sycamore, Glastonbury Circle, Jack Rabbit Palace, and The Dutchman.
* Several long distance coach companies pull the following trick. Prices start from £1 when there are exactly 4 seats (or even just 1) are at that price, the rest are more expensive, possibly even more expensive than non-budget lines.
* Several major air strikes by USAAF B-17s against targets in central and southern Germany without friendly fighter escorts. The first Schweinfurt-Regensburg raid, for instance cost 60 bombers shot down, another 60 damaged beyond repair, and over 1,000 casualties, without doing enough damage to the target (a ball-bearing manufacturing plant). Missions against Stuttgart and Bremen had a similar butcher’s bill for equally-disappointing results. In the face of unsustainable losses, the 8th Air Force had to limit its bombing missions to occupied France and the Low Countries where Allied fighters could protect the heavies in the fall of 1943 until the long-range P-51 Mustang became available.
* Several male characters in initially thought that Freddie would be this for them.
* Several married authors (such as the above listed and DJ MacHale) often have their spouses read their material as beta readers and for creative advice. In several instances, this pays off well.
* Several Marvel characters introduced during the Silver Age have the same name and different origin from a Golden Age Timely Comics character, including the Vision and Black Widow, and Lo-Zar instead of Ka-Zar.
* Several Marvel villains fit this trope. Shuma-Gorath is an even more powerful demon than Dormammu, and all the Hel Lords those two are above are still this in their home turf, as is virtually any demon or evil Death God with their own realm. Doctor Doom qualifies for this trope, as does Loki and other arch-villains whenever they gain territory, or world domination as they often do for a time.
* Several mass-changing characters actually need to absorb mass from outside themselves; Stronghold of
* Several members of Organization XIII, most noticeably Xigbar ("I lost...
* Several members of Team Aqua and Magma have been drastically redesigned as seen in
* Several members of the Burning Legion are as well, being corrupted creatures from other planets that build mechanical portals, forges, and
* Several members of the cast and crew ended up as defendants for crimes against humanity by the Allies after the war. Though most of them were acquitted, they were forbidden to work in the film industry for several years.
* Several members of the Global Defense Force like Captain Gordon and Stacker Pentecost constantly remark that they don't trust magic.
* Several members of the Iron Horde join up with the Alliance/Horde after Gul'dan takes over as they want nothing to do with what he's up to.
* Several members of the Joes sport facial hair (not just the ones who have Navy backgrounds), even though this has been against military regulations for some time. (Blame the action figure line, who did it as a selling point.) On the other hand, there are various exceptions on grooming standards for real-life special forces, too.
* Several members of the Konoha 12 are promoted to jonin after their remarkable performance during the Gedo Mazo's attack. The Raikage himself hands them their new flak jackets.
* Several members of the Meek have these and will take them if necessary in the third installment of the
* Several members of the notorious Thuggee cult in India (who killed their victims via strangulation) who were sentenced to die by hanging, actually leapt from the scaffold after the noose had been fitted around their necks, not only to show defiance but to prove, at least symbolically, that they were masters of killing by such a method.
* several members of the Order of the Phoenix go to question the Dursleys and Alastor Moody asks if they're going to play "good Auror/bad Auror."

* Several members of the Separatist movement, including the Trade Federation and the Intergalactic Banking Clan, are
* Several members of the Separatists were this, such as the Trade Federation run by the Neimoidians and the Banking Clan run by the Muunilinst. In the case of the Trade Federation, there used to be non-Neimoidian members of its executive. They were killed in a plot by Darth Sidious to put the Neimoidians (who were weak and easy to control) in power.
* Several Mementos targets' Shadows will ask if they're terrible people after being defeated. You can say yes.
* Several mercenary companies that join in the siege on Meereen feature this. One company is made up of mercenaries who wear all their worldly wealth in clothing and armor, and as such are usually too overburdened to fight properly.
* Several Mesoamerican cultures played a game of sport similar to soccer using human skulls as the ball.
* Several Mexican singers who perform in the narcocorrido ("drug ballad") style of Norteno music have met
* Several military combat ground vehicles of all shapes and sizes can be stolen surprisingly easily, up to and including some types of Tanks, simply because in a lot of cases they don't even need keys to start up. (Luckily, the ammunition for their guns is a different story.) This is supposedly for combat readiness: you do not want the combat vehicle's driver to be searching for the correct unlocking mechanism when the enemy's right at the gates.
* Several minor antagonists are fanfic magnets due to their short appearances in the original series, such as Diaspro, Chimera, Countess Cassandra, Dark Bloom, Mitzi, and Lucy. Though the most explored are Diaspro and Dark Bloom. Diaspro since she has been systematically mistreated and humiliated since season one. And Dark Bloom because of her being the fandom's favorite.
* Several minor characters also answer the criteria - Melissa and Veronica Hastings (it's a family thing) ,Shana Fring and Dr. Sullivan.
* Several minor characters from Balian's village in France were also cut or
* Several minor characters wrote similar memoirs to Cain (that is similar to his "official" memoirs, not the candid ones that the stories consist of). Most notably
* Several minor Greek gods, called daimones, are largely abstract personifications of concepts such as fear, strife, mercy, hubris, insolence, battle-cries, tumult, and good reputation. Thanatos (death), Nyx (night), and Hypnos (sleep/dreams) are referred to as being the living representations of what they champion, they're forces older than even the titans, and feared as such, even by the Olympians. The oldest gods are the Protogenoi ("firstborn"). They represent love (Eros), Nature (Physis), Darkness (Erebus & Nyx), Time (Chronos, not to be confused with Kronos), Fate (Ananke), Tartarus, and the earth (Gaea).
* Several mobile games tend to release in a method called "soft launch", which often times release the game in specific regions, most commonly Australia & Canada. Examples include
* Several mobs in the game have a "Pain Spike" ability, which inflicts instant damage on a target, but that damage wears off over time.
* Several modders took this to heart and played with it in the most interesting ways. Some mods have frigates ditch the 2-D adherence and circle the target at a spherical, instead of a ring trajectory. This gives a very interesting battle as when the other, more stationary battleships are pounding away head-to-head, some annoying frigates are either taking potshots from up, down, or behind, or a hard-to-catch mezzer is running around in spheres, effectively
* Several modern productions cut the song "Ugg-a-Wugg" as some have deemed it offensive to Native Americans.
* Several mods were developed by dev team members themselves and came bundled with the original game, including
* Several monsters indicate that they gained their powers and transformations by doing one thing obsessively, such as eating huge amounts of crab and turning into a crab monster. Interestingly, this is technically what Saitama did; obsessively strength training every single day without fail for three years straight turned him

into the strongest man alive.
* Several monsters wield sizable axes, including but not limited to Axe Raider, Axe Dragonute, Tiger Axe, Battle Ox, Rabid Horseman, and Giant Axe Mummy.
* Several months later, Nagisa uses the exact same technique on Kayano to distract her from the destructive influence of her tentacles. He only lands 15 hits, but it's more than enough to distract her long enough for Koro-sensei to remove her tentacles.
* Several Montreal Canadiens teams accomplished similar feats in several decades.
* Several mooks try this on a young lady... which leads to the reveal that this young lady, is, in fact,
* Several more of the guests, with journalist Jessica Fox added to the list at the end of the film, turn out to be this in the sequel
* Several more people end up learning the secret during season 3. The first is Sister Maggie (who is
* Several moves have been used as finishers by some wrestlers, and part of the 5 Moves of Doom of other wrestlers, sometimes in the same federation simultaneously.
* Several movies based on children's books wind up getting adapted into children's books again. Examples include
* Several movies by German comedian Didi Hallervorden, often containing "Didi" in the title
* Several movies have used the same basic plot, wherein a womanizing playboy dies and
* Several multiplayer maps take place in Alaska and other cold places.
* Several mundane poisons can be delivered in gaseous form, such as Burnt Othur Fumes and Insanity Mist, which attack the body and mind respectively.
* Several narrator sequences and in one case an entire episode ("A Story About You") of
* Several nations that were invaded by Germany in WWII had governments-in-exile, often headquartered in London.
* Several nations today are composed of many disparate parts, often unified more for the convenience of colonizers or past empires than any strong shared history. This is basically the norm for the Americas, Africa, and a large chunk of Asia. Not only were large sections carved out by the colonizers, as mentioned above, a lot of them have then gone on to gobble up more territory after gaining independence and nearly all have tried to.
* Several NES ports of arcade games were ported twice, usually for different regions:
* Several nods were given to errors in the books that became well-known in the fandom:
* Several Norwegian Cruise Line ships, thanks to a licensing deal with [DreamWorks] Animation, staged a
* Several notable bands who are known as extremely talented have had teen members, Primus among them.
* Several notional battle armor designs also straddle the line due to their sheer size (an "assault" class suit masses two metric tons) or quadrupedal configuration which the pilots sit or lie in.
* Several novels clarify that the military mindset of Ankh-Morpork has historically
* Several NPCs will tell you that this is how the original Ellys Idaho (whom your character is a clone of) defeated the Survivalists: he loaded a battleship with nukes and piloted it into the crust of Ganyma, killing everyone on the planet at the cost of his own life.
* Several of Alexander's various relatives got cut. He had a brother named James who's not so much as mentioned. They got separated as children and James didn't follow him to America so he wasn't a big part of his life. One of his close friends, Edwards Stevens, is speculated to have been his half brother but neither he nor his (potentially their) father Thomas made the cut.
* Several of Buffy's dreams in Seasons 3 and 4 only make sense after Season 5. She dreams of Tara warning her to "Be back before dawn", and Faith telling her "Little

sis coming; so much to do before she gets here", both referring to her sister Dawn, who is
* Several of Christie's female characters echo her personality and journey in life. For example Jackie from
* Several of Cubone's Pokédex entries state that it wears the skull of its mother. Every Cubone encountered has a skull on its face, which means that EVERY SINGLE Cubone commits matricide (or its mother just dies) shortly after birth and each female Marowak/Cubone can only have one child. The species should have either died out or have rapidly dwindling numbers at this point. However, worth noting is that when breeding Cubones, you can get as many of them as you want from one mother, and they will all already have skull helmets. Additionally, in
* Several of Danny Phantom's enemies have red eyes, including his arch-rival, Vlad Plasmius (whose eyes are blue in human form and completely red and pupil-less in ghost-form), and his
* Several of F. Paul Wilson's stories or novels feature folk who were born soon after an influx of 'Otherness' into our world. Some are grotesque
* Several of his Pokémon have nicknames that include the number 69: he has used a Cosmoem named "69MillionKG", a Drampa named "69 Years Old", a Duralodon named "69 Floors" and a Solrock named "69 Degrees".
* Several of his suggestions are so abhorrent the heroes do the opposite even if they were originally going to do something similar: Grey Worm orders the Lannister prisoners spared after the Wolf starts butchering them one by one, Daenerys spares a group of Dothraki she'd sentenced to death earlier when the Wolf asks how gruesome she wants their demise to be, and Tyrion decides to spare Bronn's life (despite having barely avoided an assassination attempt) due to the Wolf urging him to kill Bronn.
* Several of horror writer Gemma Files' short stories are written using this tense, including "Rose-Sick", "Bottle of Smoke", and "Slick Black Bones and Soft Black Stars", although the latter two do in fact turn out to have named, gender-specific protagonists.
* Several of Jinnai Tomonori's comedy sketches start with him buying one of these products, such as a "Santendo Desu" because the
* Several of Kryska's battle quotes reference this trope, particularly the ones that play when she successfully hits an enemy unit.
* Several of Las Plaguas were inserted at adult size into the mouth of the victims in
* Several of Nanoha's other characters have Wave Motion Guns of their own; Fate and Hayate in particular have their respective attacks "Plasma Zanber Breaker" and "Ragnarok", and the original Reinforce had a virtual arsenal of these attacks, some of them copied from the heroines. Hayate probably still has most of them.
* Several of Numeroff's other books follow the same pattern, either with the same mouse (
* Several of Phil Hendrie's radio characters are admittedly based on celebrities; the borderline-pedophile James McQuarters, for instance, is based on
* Several of Sarge's plans start and finish with him shooting Grif. Slightly fewer start and finish with him directing someone else to shoot Grif.
* Several of Sinclair Lewis's novels take place in the fictional state of Winnemac (surrounded by Michigan, Ohio, Illinois, and Indiana).
* Several of Tarnum's quests force him to confront the fallout of his own past tyranny, such as a Barbarian cult that worshipped a distorted image of Tarnum himself as the Barbarian Tyrant and freeing the people whom he enslaved in the past (setting them up as a
* Several of Team Urameshi's old opponents from the Dark Tournament (Chu, Rinku, Jin, Toya, Suzuki, Shishiwakamaru) ally with Kurama and undergo
* Several of the 2000s Disney Movies, formerly considered to be part of the
* Several of the 2018 game's factions have access to equipment, such as the
* Several of the achievements are earned for doing things that would rarely come naturally to the average player. For instance, the "Why The Hell Did I Bring This" achievement is rewarded for bringing the car muffler to Stonehenge, where it is of

no use to the player and takes up equipment space that could be used for another, much more useful item. Its icon even shows the Scholar staring at the muffler in bemusement. Alternately, randomly casting magic is a bad idea in this game, as a failed spell will cause damage to your character's already limited and fragile
* Several of the alien names are confirmed to be nicknames given to them by soldiers, which stuck.
* Several of the alternate Caves from the Perpetual Testing Initiative implied that many more of this happened in alternate universes, usually involving alternate versions of the pre-recorded messages in the main game, such as Mantis-men overrunning Aperature, a sentient cloud siphoning off people's skins and a space prison escape. Lampshaded with the Sick Boy, who Cave Prime specifically mentioned had died to eliminate any ambiguity on your end. Most of these end up saving Cave Prime's universe by solving his money problem
* Several of the answers from these rounds were later released in book form.
* Several of the apostles according to tradition. Peter was crucified
* Several of the auctions have been won by a guy named Wil Shipley, who writes software for Macs, or to put it another way,
* Several of the aversions have been fixed over the years. Horde warlocks no longer have to journey through a level 40 zone at level 20 to quest for their succubus minion. Night Elf characters once had to go through a level 30 zone if they wanted to visit the other capital cities. Now the boat goes right there. On one PvP server - where player-killing between factions is automatically on and can't be disabled in contested zones - an enterprising PvP nut called Angwe camped the port and enjoyed ganking lowbies (read: killing players many levels lower than himself). The responses to his antics were lovingly detailed on a website when Angwe then made an Alliance character on the same server to listen to the howls of rage. This was all totally within the game's rules, though.
* Several of the Cambridge Five in the UK could be classed as this, but the most infamous would probably be Kim Philby who, as a long-term spy for the Soviet Union within MI6, at one point became head of Section IX: tasked with counter-espionage against the USSR; at another point he was MI6's liasion with the CIA. This had a direct effect on the psychology of the CIA, with agency chief James Jesus Angleton, already a suspicious man, becoming
* Several of the Careers' attacks on tributes, including the Alliance of the Mockingjays and the District 7/8 Alliance.
* Several of the cats destined to become medicine cats are serious as kits and begin training when they are still young, taking their duty very seriously. Pebble Heart from the Dawn of the Clans arc, for instance: even his adopted father Gray Wing would listen to him for advice.
* Several of the characters are like this, though of the more down-to-earth variety. The lot of them are college otaku, obsessed with video games, doujinshi, anime, and manga. As the story runs down to the end, one gets a job as a game designer, another as an assistant editor for a manga magazine, and a third as a manga author and artist, and a fourth is going to design school. They are all, also, quite
* Several of the characters have a tendency to behave this way around cute toys, animals or babies, particularly Doc herself and Lambie. Though both are professionals and can put it aside to get to work.
* Several of the commanders of the Army of the Potomac (the same army raised and trained by McClellan) also turned out to be this. General Joseph Hooker, for example, boasted that he would bring victory, but was manhandled by Robert E Lee. One of the things that allegedly made Ulysses S Grant popular with the rank-and-file is that he
* Several of the crime novels of PD James describe female characters as "hatless", which sounds an odd thing to remark on in a novel with a modern setting. However, James was born in 1920 and has been writing since the days when it was more remarkable for a woman's outfit
* Several of the detectives are also examples. Legal professionals who read their reports often gripe about their terrible spelling and grammar. Jimmy McNulty is the

most prominent example. He's not particularly educated or well versed in academic subjects, but he's a brilliant detective and always sees himself as the smartest man in the room. After a disastrous date with a political strategist who is unimpressed by his blue collar lifestyle, he bristles, "I'm the smartest asshole in three districts and she looks at me like I'm some stupid fuck..."
* Several of the Disney shorts were spoofing then-popular genre fiction.
* Several of the Domain Control abilities belonging to the Knights of the Ring in
* several of the easy-come-easy-go kingdoms on the Western Continent. In the case of the Empire of Blood, at least, they're doing all the real ruling for the Empress, an unusually thick (in more ways than one) red dragon. But it's even deeper than that: Their four old adventuring buddies are behind the thrones of two other empires, using manipulation and war politics to ensure their anonymous power no matter who's nominally in charge - and the figurehead changes regularly.
* Several of the elevator conversations consist of Wrex asking various squadmates who would win in a fight between Shepard and themselves. Shepard is, naturally, standing right in front of them, but doesn't say a word.
* Several of the faces the devil or B.L. Zeebub as he calls himself makes in "
* Several of the first seven books' plots deal with attempts by Alliance proxies to overthrow the governments of pro-Cinnabar planets and having to be stopped by RCN forces under Daniel Leary. In one case it costs the RCN an entire battle group after Alliance-backed rebels gain control of anti-ship missile batteries defending a harbor.
* Several of the fractured dimensions include characters who died in the prequel to be alive in this dimension.
* Several of the games have been broken so severely that entire segments of the game can now be completely skipped.
* Several of the girls pee their panties during fights, and some of them actually consider it an achievement to make their opponent wet herself. This actually became a plot point at one time as Tanfuko could tell his plan to weaken Kan’u was working because of the liquid coming down between her legs.
* Several of the Great Houses are distinguished by their hair colour; Baratheons are jet black, Lannisters blonde, Tullys redheaded, Tyrells brunettes, etc. These seem to get passed down through at least dozens of generations. The genetics are so reliable that it becomes a crucial plot point.
* Several of the guns didn't come out for a few years after the setting. A lot of this can be handwaved as being MSF developed tech.
* Several of the heroes in the game have subtle design influences that call back to their mythological inspirations. Achilles (and his Myrmidons) wears a helmet with cheek-guards resembling ant mandibles, a reference to the mythical origin of the Myrmidons being transformed from ants.
* Several of the images of Triple Techs in the gallery of the DS version also spoil the fact that Magus joins the party.
* Several of their shorts, such as "Makin' Em Move", "The Fatal Note" and "Fiddlin' Fun", have shots where the backgrounds are animated in three dimensional perspective.
* Several of the legendary rocket weapons can do this, as well as any rocket launcher with the burst, spread, or helix modifiers. Combine this with a mod that provides
* Several of the Legendary Warriors including one of the villains have stylized Kanji for their respective
* Several of the Legions changed their colour schemes during or even before the Heresy: the red and gold Thousand Sons to blue and yellow, the slate-grey Word Bearers to dull red, the white-grey Luna Wolves to grey-green (the Luna Wolves also name-changed to the Sons of Horus) and so on. Sometimes, still-loyal members of predominantly traitorous Legions pop up in fiction set during the Heresy wearing their loyalist uniforms, or otherwise identifying with the still-loyal version of the Legion (such as Iacton Qruze calling himself a "Luna Wolf" once Horus went off the deep end and Qruze stopped using the term "Sons of Horus"). The Sons of Horus, after Horus died at Terra, reformed under First Captain Abaddon to the Black Legion

and changed the colors fully to represent their dedication to Chaos fully, also accepting Astartes made from the Gene-seed of other traitor Primarchs, traitors from loyalist legions and mortal or Astartes Imperial traitors after the heresy (they also recruit from non-Imperial humans living in the Eye of Terror), with some Sons of Horus warbands still wearing the old colors (Abaddon forced most of the Legion to his reform and presumably tolerates these few warbands so long as they acknowledge him as Warmaster and as a means to reliably acquire Horus derived Gene-seed as the modern Black Legion has Gene seed from basically everyone except the Lost Legions).
* Several of the longtime wikis take very long to be read in their entirety, and few (if any) have actually attempted that.
* Several of the Mages' Guild Hall leaders are implied to have been assigned as such so that they aren't around the Arcane University. Of particular note is Jeanne Frasoric, the young leader of the Bruma Mages' Guild who is outright called incompetent by her colleagues, and is even noted by
* Several of the main characters are gender bent by their "Exemplar" mutant power, which involves
* Several of the main characters are trapped on an out-of-control solar powered monorail train. Suddenly, there's an
* Several of the main characters were portrayed as pilots of some skill. Sinclair, Sheridan, Ivanova, and Garibaldi all had
* Several of the male cast grew beards during the same gap between seasons to reflect the conditions on New Caprica and the Cylon Occupation.
* Several of the male characters, including Radicles, Mr. Gar, and K.O. himself to a more minor degree, have huge, muscular upper bodies with spindly legs. There's even some female characters who qualify for this trope, such as Punching Trudy.
* Several of the "Meet the Team" sketches also wander into this trope's territory, such as "Meet the Sandvich," from which the first of the two page quotes were taken. What makes the deaths even funnier is that the characters all look like they're from a
* Several of them have been prone to making requests... with length requirements. On official DVD releases:
* Several of the Midwestern states have variants on it. Simply replace "Koskenkorva" with "keg" and "Eurovision" with "Super Bowl" (if you're in Michigan, Minnesota, or Ohio) or "World Series" (Illinois
* Several of the more spectacular American/Canadian football trick plays rely on the opposing team failing to notice one player on the other team doing something oddly: why is that player hunched over in the middle of the field, not moving, as if he were bent over concealing a football, while the play has moved over to the sidelines?
* Several of the most famous hockey players in NHL history have done this, most notably Gordie Howe and Mario Lemieux.
* Several of the movies have inspired the CIA to create real life gadgets based on the ones seen in said movies.
* Several of the older Numbers act as big sisters for they younger ones, more specifically: Due for Quattro, Tre for Sette, Cinque for all of the ones that make a
* Several of the other new Exalted introduced in 3e also get retconned into Creation's history along with the Liminals, such as the Exigents and the Spoken.
* Several of the people who participated in the making of the Broadway version of
* Several of the Primarchs who betrayed the Emperor during the Horus Heresy had legitimate reasons to be pissed off at the Emperor: Angron, the savage berserker, who was whisked away to serve as a weapon in another's war while the people he cared about were left to die; Perturabo, the coldly calculating besieger who was willing to sacrifice any number of warriors for victory, who spent a century and a half trudging through the endless hell of sieges while all the other Legions got the glory and looked down on him; and Lorgar, the high priest of a
* Several of the primary architects of the Modern DCU are fans of the Silver and Bronze Ages and slowly brought aspects of those eras back into the zeitgeist,

retconning just about everything that happened in the DCU since
* Several of the retcons and continuity changes were handwaved in "So Long and Thanks for the Smoothies" by
* Several of the "Sand Snakes" (bastard daughters of Prince Oberyn Martell) have signature weapons:
* Several of the short stories collected in "Welcome to the Monkey House" by
* Several of the sidequests you get from Scooter have optional objectives of collecting dirty magazines for him.
* Several of the students, including Carmilla, Tennyo, Bladedancer, Razorback, and Screech, were forced to kill some of the attacking Chessmen and Tiger Guards during the Halloween Invasion of 2006. The trauma of this (and the attack in general) would reverberate across the school for months.
* Several of the Sylvester McCoy-era stories include homoerotic subtext between many of the minor characters as part of the series' turn towards the political during this time, although it generally didn't directly involve the main cast. In particular, "
* Several of the tests that Richard has to face. Justified, since the Wizards from the Great War knew that Subtractive Magic was locked away from future generations in the Temple of the Winds before War Wizards started to die out.
* Several of the tie-ins deal with the profiling aspect more explicitly.
* Several of the traumatic things that Thor went through also happened to Loki, with a few additional things:
* Several of the Tyrells also have this trait, the eldest son and heir Willas being a noted scholar (to make up for his crippled leg), and Margaery having no small amount of her own political nous.
* Several of the Ultra Beasts are object-like beings which appear to be naturally occurring life-forms in their native environments: Xurkitree is many electrical cables and lights arranged in a vaguely humanoid shape with no face, Celesteela is a
* Several of the undead who joined the Argent Crusade seem to feel this way about the Forsaken, most notably Leonid Barthalomew.
* Several of the UnSubs use revolvers, The Reaper being one of the more notable ones. The BAU believes the UnSubs favor them because it ensures they won't leave bullet casings behind.
* Several of the warframes, but Mag is probably the archetypical example, since she's one of the starting 'frames. She has very low health and armor, paired with only moderate shields.
* Several of the women, particularly Henrietta and Siesta, utilize this trope in an attempt to seduce Saito.
* Several of the X-Men are depicted as teenagers. Granted, the original five in 616 (
* Several of Walt Disney World's theme park projects were scuttled due to external factors, and instead of dismantling the sites for good, the corporation often chose to vacate without removing the original architecture. As a result, the various sites have become favored sites for urban explorers to discover and document:
* Several of Weevil Underwood's monsters, most notably Perfectly Ultimate Great Moth and Insect Queen, are textbook examples of this trope. Naturally,
* Several oil companies (BP, Chevron, ExxonMobil) have recently been running ads noting their innovation in alternative sources of energy. Of course, the vast majority of consumers don't buy anything besides oil (well, gasoline, an oil product) from them.
* Several old lift alignments can be found at Breckenridge Ski Resort in Colorado are still easy to find.
* several on Catachan, every last plant is toxic, and even the ones that can't directly kill humans worm their way through concrete, to the point where there are no permanent settlements on Catachan, everything has to be rebuilt every few years. It's possible the jungle itself is sentient and hates humanity.
* Several one-off characters who develop crushes on Ash aren't happy to see Misty, May, or Dawn travelling with him.

* Several one-off villains were also ersatzen; Wheelchair-bound mastermind Leadside was based on
* Several or all of the main characters will be involved as well as several minor characters and background characters at once to show how everything is united in a common goal.
* Several other characters are like this as well, especially the calm and mature (if originally single-minded)
* Several other characters do it too: Miranda to Spock in "Is There In Truth No Beauty?", T'Pau to Spock in "Amok Time".
* Several other characters have also displayed this ability, which seems to be fairly standard, though no others appear to have mastered it to the extent of leaving afterimages.
* Several other characters serve as a foil to Hamlet as well. Before they engage in the climactic swordfight, Hamlet describes himself as a foil to Laertes ("I'll be your foil, Laertes: in mine ignorance your skill shall, like a star i' the darkest night,stick fiery off indeed."). Of course, it is in fact the other way around, and Laertes can tell that Hamlet is mocking him. This passage may be the
* Several other characters that appear throughout the story are also unaware of the secret war between the Assassins and Templars—in
* Several other characters use the word "shisno" as well. Sometimes as a slur, and sometimes in the context of "ah, shit".
* Several other classes have alignment restrictions as well, although they aren't as stringent in that it takes a full-on alignment change to break this Code, not just a single act. Also, they don't lose their existing powers, they just can't advance any further in the class they've broken the Code of.
* Several other classic-Who races that'd been fairly lame from the moment of introduction, such as the Silurians, Ice Warriors, and Zygons, have likewise been re-vamped into something much more formidable by the revived series, making them scarier in some cases and more tragic or multifaceted in others.
* Several other comic relief characters, namely Clare, Phineas, Leelee and Jenji (who ordinarily would have been minor characters) were also given way more story focus and significance than the other four rangers ever got, especially Madison. It's not that their characters or storylines are particularly disliked (at least not to the extent that Nick is), but rather that the remaining four rangers - the characters in
* Several other COs also hit this formula of having minimal drawbacks and small advantages that affect all troops. Hawke, for instance, can be seen as an evil version of Andy, with a universal small boost on the attack strength of all his units and powers that heal his troops while draining his enemies (he is balanced compared to Andy, as he doesn't heal for as much and his power charges slower). That said, the nature of the game means that even characters who seem to be generalists have places they do well or poorly in; for instance, Andy is a natural counter to characters like Olaf, Drake, and Hawke, which have mass-damage powers.
* Several other endings also end with the entire area being blown in a giant anti matter explosion. The true ending also reveals that all the other endings that seemed to end relatively bloodlessly actually ended in disaster once the camera stopped rolling; they are also canon despite being alternate endings. The backstory also has a kill em all for almost the entire planet! Luna's ending is also noteworthy, while not as big a blood bath as Clover's, it still manages to kill as many people over a longer, but still relatively short, amount of time. One character even manages to die twice.
* Several other episodes begin with a bizarre scene shot in close-up so you can just get the barest idea of what's going on. Then the last scene shows you the whole thing. And of course, the king of them all is the burned,
* Several other gags involve such a chain reaction spewing; one even dragged it out to an
* Several other guys take a less-pronounced interest in the heroine specifically because of her assertive, willful personality. Masamune states on several routes that he finds the challenge of winning the heart of a spirited woman like her to be

attractive, and Shingen responds to her defiantly telling him on his own route that she'll make his life as miserable as possible by saying that he likes her even better as a "war goddess".
* Several other major characters also resent this trope. Honor fights several times what she feels is favorable treatment to suit her ambition. Her rank is usually thrust upon her after arguing she not only deserves it but is obligated to take it to better serve
* Several other major policemen would fill this roll to Kogoro and Conan.
* Several other packagers offered similar "kitchen sinks" as legit prizes—either stand-alone or part of a "home remodeling" prize package. (Such as
* Several other plants have numbers, such as Salusa Secundus, Wallach IX and IV Anbus (pronounced as "four-anbus").
* Several other Pokemon also don't like being touched on the hair or the head in Pokemon Amie/Refresh.
* Several other Scourge units (the more intelligible ones, at least) do the same.
* Several other series have since driven their total number of heroes up past six with One-Shots,
* Several other SG teams were this, particularly SG-11 who were wiped out at least
* Several other ships seemed to have biological properties: the Soul Hunter ships, and the Berserker Probe both looked very similar to Vorlon ships. There were also some subversions: the Minbari built their ships to look organic but didn't actually have biotech spacecraft until the alliance with the Vorlons produced the hybrid mechanical-biological Whitestars. Minbari always had advanced crystal tech, but that's a
* Several other spoofs appear also, one set in the 'Camelot' era where everyone has American accents, and then 'They all come home' which is a parody of
* Several other tag teams, while not related at all, real or kayfabe, are inseparable in the minds of fans because they never found or sought individual success. They fought together through thick and thin.
* Several other Thieves Guild quests involve stealing items from authority figures to be used by Guild leadership in this fashion, including a pornographic book and a business ledger showing corruption.
* several other things was hated for its over-reliance on popular trends, especially compared to the first three films: the plot centers around Greg becoming a meme, he's shown to be a fan of an obnoxious let's player named Digby, and there are plenty of social media references tossed in.
* Several other times in the movie, Rodan and Ghidorah are attacked by equally ineffective weapons. However, in these cases they are fully aware it won't do any damage, and it's just being used to distract them.
* Several other Titans appear in minor roles in this film, also being Mix-and-Match Critters as well, namely:
* Several other Wallendas had died during a performance before Karl's accident. In 1962, a performance of their famed pyramid stunt resulted in an accident that killed three family members and caused life-long injuries to two more. Karl's sister-in-law died from an in-performance fall in Nebraska the next year. Karl's son-in-law died in a rigging-related accident in 1972.
* Several other worlds at least have a viable atmosphere, but most don't. Many maps take place entirely inside ships or bases because of this. It also can be hard to tell whether a planet has actually been terraformed or if there is just a smaller technological solution. The great sky-bases on Jupiter and Saturn are open air, but they are probably contained in bubbles of normal air rather than making entire gas giants breathable.
* Several pages on Priceline.com are written in first person in the voice of Shatner's "Priceline Negotiator" persona. The "terms and conditions" link at the bottom of the page is introduced with the text: "I'm not a lawyer (I
* Several participants on the Discord server easily guessed that Umeko was the fourth culprit. She took the longest to clear the maze inside the amusement park, giving her time to carry out the murder and attempted murder on the Ferris wheel.

Before the trial begins, she asks Nao, the protagonist, if he sympathizes with the past culprits, likely to see if he sympathizes with her. The fact that she had just started a relationship with Nao also helps, since
* Several parts of the aquatic fight against Adiane where a homage to the fight against the aquatic angel from the eighth episode of
* Several parts of the game can be skipped if the player knows the passwords to certain locked doors: The MJ12 base underneath UNATCO can be skipped entirely if the player knows the code to the exit door. The game doesn't account for this.
* Several people ask the current prophet for a sign that God exists in
* Several people comment on how quick Tiza is to jump to Nolien's defense, be it combat or a more social situation. Her response is always something like, "
* Several people committed a suicide by self-immolation as a protest against Soviet occupation of Czechoslovakia:
* Several people connected with NASA confirmed that, had he not died in the Apollo 1 fire, Gus Grissom would've been the first person to walk on the Moon. Besides being the Apollo astronaut with the most seniority, the symbolic value of having one of the original Mercury astronauts take the first steps was also a consideration.
* Several people have accused the Salvadoran Vaggie to be a racist stereotype of angry Latinas. The creator of
* Several people have claimed that the last female Heterodyne, Euphrosynia, looked quite a bit like her ten-times-great-niece Agatha.
* Several people have gotten arrested for shining their bright green laser pointers into the nighttime sky and dazzling or temporarily blinding pilots overhead. Particularly if the plane is taking off or landing. There was serious talk of outright banning the sale of laser pointers in Britain after someone used the same trick to make an oncoming car swerve off the road and hit a tree, and in Spain using them against pilots or drivers supposes a fine of up to €600,000.
* Several people in the world (Chinese-born or of Chinese ancestry) named "Long Wang" (it means "Dragon King" in Mandarin Chinese, and the 'a' in "Wang" is pronounced like 'ar' in a non-rhotic accent).
* Several people involved in or even distantly connected with the July 20 plot who were not arrested and/or executed killed themselves, some by cyanide capsules, such as Field Marshal von Kluge (who was merely aware of the plot, not an active participant).
* Several people mention that Sanada Yukimura has the potential to be
* Several people outside of Japan compare MAD Videos and other similar videos mostly found on Nico Nico Douga (NND) to
* Several people thought that China was a girl, him with his ponytail and all. Well, it's not that hard to believe
* Several people who survived the deadly shooting at the 2017 Route 91 Harvest festival in Las Vegas were also present at a country-themed bar in Thousand Oaks, California that was shot up about a year later. At least one of those unlucky people was killed in that shooting.
* Several PG-13 films released in New Zealand have been slapped with an R13 rating due to differences and treatment of violence and sex.
* Several pick up lines, including this one: "I'm like DNA helicase - I unzip your genes."
* Several pictures of Roman Empire show that he has several idiot hairs and that they may have been passed on to his descendants (Both Italy brothers, Greece, and possibly Egypt.)
* Several pilots in the movie also had small logos painted under the cockpits to tie in with their
* Several pirates of the Worst Generation could easily turn up as antagonists in the future, but the biggest one is
* Several planets have been placed into time loops by the Time Lords, including the War Lords' planet at the climax of The War Games, the Vardan homeworld in The Invasion of Time and Planet 5 in the Image of the Fendahl
* Several planets in the Taurus Reach during the 2260s, due to the use of Shedai

technology by Federation and Klingon researchers. Some planets were destroyed accidentally as a result of inept use of
* Several players had their careers ruined after getting hit in the head while up to bat. A few examples resulted in their immediate retirement.
* Several Pokédex entries in the first two generations reference cut elements that were removed during development. For example Ledyba is the "Five Star Pokémon" because it originally had a star pattern on its back, Umbreon's entries mention poison because it originally was a Poison-type rather than a Dark-type, and mentions of Vulpix being born with one tail, apart from being a reference to the mythology which inspired the Pokémon in question, were also there because Vulpix originally had a pre-evolution with three tails.
* Several Pokémon revealed long after the announcement trailer, such as Inteleon, Obstagoon, and Toxtricity, have already proved to be popular with the furry fanbase once their designs were revealed. Gigantamax Inteleon only further stoked the proverbial fires.
* Several police officers were named after their voice actors. Detective Wataru Takagi is named after
* Several political analysts see the traditional anti-American feeling prevalent in South America as a form of this trope. While not denying the controversial policies applied in the region, and the justified hate several citizens of certain countries have against USA, the truth is that more often than not the countries that obsess the most against the USA tend to be the ones who have had the least direct American intervention during their history. Most Americans don't even know about it.
* Several political parties in Belgium want to split the country up between Dutch-speaking Flanders and Francophone Wallonia. Flemish nationalist party N-VA (the New Flemish Alliance) became the largest party in Parliament in the 2010 elections, leading to
* several ponies are chosen for the difficult task of keeping ponies alive
* Several prime-time cartoons from 1960s have cold openings. These include
* Several producers of amplifiers and other audio equipment have calibrated the dials on their products to go
* Several professional golfers who have risen from obscurity and win (or even just nearly win) a major championship have had difficulty sustaining that success in smaller-level tournaments afterward. Among the notable champions on this list are Steve Jones (1996 U.S. Open), Shaun Micheel (2003 PGA Championship) and Hilary Lunke (2003 U.S. Women's Open, her only
* Several provinces in the Philippines are already preemptively banning
* several psychiatrists' approvals) following a lengthy evaluation period before the surgery can be performed. This is nominally intended as a means of enforcing this trope, making sure that the person is likely to be happy after the procedure, rather than come to regret it. In practice, this is often regarded as an institutional method to make them occur as little as possible. In an inversion of this trope, the difficulties in getting a sex change are a leading cause of suicide among trans people.
* Several publishers specializing in localizing visual novels, notably MangaGamer and Sekai Project, have used
* Several Pull-Ups commercials have depicted boys wearing blue shirts and girls wearing pink shirts.
* Several "Punching Bag" characters have been made to simply beat up. Sandbag from
* Several quests in the game also allow you to bring up your title if you've become the faction leader of a certain faction (by completing the relevant
* Several races also have specialized ships related to their form of
* Several readers have noted that a certain Black Court vampire mage has not been seen or heard from since Harry gave her a brief rundown of all the things he could do to make her unlife Hell, should she try to target his friends ever again.
* Several real-world snipers have admitted to attempting to cultivate this image. Because of the stress and stigma associated with snipers, a friendly demeanor and jovial attitude allows for an emotional release on the part of the sniper, while

also endearing them to non-military personnel.
* Several religions do promote an empirical worldview: you have to experience the divine before you can call yourself spiritual.
* Several religions keep a whole collection and record of these things. The most famous ones are
* Several remixes of "Run Rabbit Run" by Massive are more popular than the original.
* Several riffs, and someone would react to one of the small filler headlines instead of the big one about the monster/criminal/etc. "New petitions against tax!" "My God!"
* Several robots in Descent I and II are called spiders because they have some kind of legs for picking up rubble. However they only remotely resemble spiders.
* Several romanceable characters in the game are, or are revealed to be
* Several RPG-based comics seem to use a combination of Fighter and Gourry as a template: Hero of
* Several Russian officials caught a lot of flak when a group of students revealed that they had broken into a Russian nuclear facility with almost zero effort. Once they got past the fences, they had free run of the place and took photos of everything they came across. Apparently there were no guards stationed at the facility or they all just decided to go on break.
* Several scares (or otherwise eerie, suspenseful scenes) in the Korean horror-drama
* Several scenes later, it's repeated when O'Conner calls for police back-up and an ambulance after rescuing Vince. Dom, who had
* Several scenes throughout the series note that soldiers are increasingly being trained to fight in Virtual Reality without any real battlefield experience. MGS2's
* Several scholars of Greek Tragedy have claimed this to be the case for the
* Several sculptures by Kevin Francis Gray are of metallic human figures with their faces hidden by waves of what might be cloth, or might simply not have faces at all. In particular, "Face Off", "Pearly Girl & Pearly Boy", and "Hold Tight" give off this impression.
* Several season one episodes involve a fictionalized version of the talks on Iran's nuclear program that were being conducted by the Obama administration in real life at the time.
* Several seasons earlier, Mark had pulled Doug into an empty trauma room to confide that he was nervous about his upcoming date, the first since his divorce. Later in the episode, the ER staff is gathered in the same room, watching a trauma that was taped so that staff could review and improve their techniques. When Kerry rewinds the tape, she comes across the conversation between Mark and Doug, which was recorded because neither man was even aware of the camera's presence, much less that it was on—and the
* Several seasons later, Noah Wyle was opposed to plans for this between his character John Carter and his medical student Lucy Knight, feeling that such unethical behavior was uncharacteristic of Carter.
* Several security personnel opt out when ordered to join Night Watch or resign. Similarly, a few of the security members who
* several segments of Kyril's journey in Yharnam, and his final parting words before meeting Gehrman under the great tree.
* Several segments of the titular play of Robert W. Chambers' short story collection
* Several short works by Hugo-winner Ted Chiang follow this formula, including one in which the tower of Babel does in fact reach the sky (Tower of Babylon), and another exploring the ultimate consequences in a world where the
* Several shots of open space feature the bright, iridescent colors seen in colorized satellite images. The author notes that space doesn't work that way, but people were so used to the idea of colorful space objects that recording devices and windows have special filters that mimic the effect.
* Several shows are "sponsored" by made-up brands and products, including Arachno-Spores, Thompson's Teeth and Glagnar's Human Rinds.

* Several sidestories have bad guys as the protagonists. These include the Dakim, Sabrina and Twenty Gyarados Bill Gaidens, and the Cipher and Guzma Interludes.
* Several similar comparisons could be made to other girls in the touhou fame (Youmu, a samurai whose boss forces her to use her skills as a gardener and ocasionally as a cook while her boss is a whimsical
* Several skylanders put hats on in different ways. Some skylanders that already wear hats will actually swap them out with another one if you equip it.
* Several slogans from old radio commercials live on as catch phrases in
* Several songs in country music actually lampshade the phenomenon. The most famous is Barbara Mandrell's "I Was Country When Country Wasn't Cool". Alan Jackson's "Gone Country" has undertones of this as well.
* Several species are still early in their development when they became part of the Republic or the Empire. The Tusken Raiders are comparable to Bedouin nomads but have access to laser rifles, the Gungans have force field generators but deploy them on animal mounts, etc.
* Several species of sharks have existed virtually unchanged for tens of millions of years, which makes sense considering the environments they live in generally don't change that much.
* Several spinoffs ship Yoshi and Birdo together simply because they're similar-looking creatures of opposite genders, and there aren't many others to ship Yoshi with.
* Several sports teams such as the Memphis (originally Vancouver) Grizzlies (basketball), the Chicago Cubs (baseball), the Chicago Bears (football), and the Boston Bruins (hockey).
* Several Stadia (and parallels) often are beneficiaries of this sort of clause, likely because the leagues want to keep playing at iconic venues and the changes would require those venues to be either completely demolished or significantly altered.
* Several star systems are strategically important because you need to travel through them on your way from one slipstream to another. Just the place to lay in ambush, or place a BFG
* Several Star Trek episodes have used the word "teradyne" as a unit of computer processing power. "Dyne" in the Trek universe seems to mean "a small amount of whatever it is we're talking about right now." Additionally, an episode of
* Several stations were built without exits and any decorations, and when line extensions these were on opened, trains wouldn't stop there. One of them, Spartak on line 7, was completed and opened in 2014. Troitse-Lykovo on the northwestern part of line 3 is responsible for creating the longest (over 6 km/4 miles) ride between stations in the whole system. It's visible from the trains as a somewhat wider, more lit tunnel.
* Several status effects are designed to weaken armored and shielded enemies. Heat damage isn't strong against any kind of armor, but its status effect halves the enemy's armor value while they're burning. Slash damage is actually resisted by armor, but its status deals damage over time that completely ignores the enemy's armor. The corrosive status effect reduces enemy armor by anywhere from 16-80% depending on the number of stacks. Magnetic damage already deals heavy damage to shields, but its status effect multiplies damage of all types that an enemy takes to their shields.
* Several stories, especially "Frontier In Space", in which the Master is trying to start a war between the Earth and Draconian Empires
* Several stories have subverted this by pointing out that this Earth is the most important one in the Multiverse. The numbering might be an intentional way of disguising its importance.
* Several stories in the Future History 'verse refer to the "Wet Firecracker War", particularly in
* Several stories — or the narration between the stories - in the
* Several stories of the late 1960s and early 1970s have the characters encounter hippies and/or delve in on the then current generation gap and the issue of wearing
* Several storylines have revolved around ancient alien artifacts like these,

usually with highly explosive consequences. Lampshaded in the title of the 16th book, "Big Dumb Objects", and its summary:
* Several stricter or looser, but genuinely Soviet cases occur in Radio Yerevan routines, for example:
* Several Stride commercials use this, with Stride executives or something else suddenly appearing and attacking people for not spitting out their gum, since it's "ridiculously long lasting."
* Several students' powers also have set time limits. Kirishima can't maintain his
* Several studies has shown that intelligent people tend to underestimate their intelligence and unskilled people overestimate theirs: the
* Several sub-species of humans with specialized adaptations were created during the First Age. Some, like the winged Air People, were essentially art projects created by the more powerful and bored of the Solar Exalted, while other races were created to be slaves or soldiers of various types.
* Several superpowered aliens have this origin too, such as the Heralds of Galactus.
* Several supplements have expanded on these rules to specifically model this trope, and explain the rationale for it in drama/action/comedy. GURPS also includes psionics rules, including powers similar to this that allow a precognitive character to retcon a
* Several supporting DC Comics characters vanished after the New 52 Reboot. Over a year later after the reboot, and it was still unclear whether characters like Spoiler, Renee Montoya, and Cassandra Cain were still alive or ever existed. Fortunately, they did later return.
* Several support sets (used by Defenders, Controllers, Corruptors, and Masterminds) have pets, including Dark Miasma (Dark Servant), Traps (Seeker Drones, Force Field Generators, Acid Mortars, and Triage Beacons), and Storm Summoning (Tornado and Lightning Storm).
* Several SWAT teams throughout the world employ or have employed female operators.
* Several takes on this to help him fight the army of demons his kingdom faced.
* Several texture hacks for the first three games exist, such as night versions of various levels from the second game.
* several than the competition, and is an exclusive for a console that has been struggling to find a market.
* several. The civilians wanted to see an A-Lister, but when the chips were down, the Heroes did their damnedest outmatched or not.
* Several "The Last Mountain Man" novels ("Code of the Mountain Man", "Trek of the Mountain Man", "Honor of the Mountain Man", and "Triumph of the Mountain Man", "Assault of the Mountain Man") feature bounty hunters pursuing the Smoke Jensen under the belief that he's a a wanted fugitive. Almost to a man, their portrayed as being amoral ambushers without the courage to face him in person, or (in later books after the charges are dropped and the wanted posters recalled) the integrity to check up on whether the man their trying to kill is actually wanted (given how most in most of those books their going after him because of outdated wanted posters or phony ones forged by his enemies). Some flat-out don't care when they find out he isn't wanted by the law anymore, due to the promise of money form somewhere else and/or a simple desire to earn some
* several theories for why only clock faces do this, but none of them are definitive.
* several. The Vampire Killer is weaker than the Royal Sword, but it's a lot faster and has the quite-useful Holy elemental affinity.
* Several things in "Reign Storm", such as the fate of Pariah Dark and the deal Vlad struck with Fright Knight.
* several threats against the protagonist's virginity's shines the brightest:
* Several thrillers starting in the late 1970s had a hypothetical third world war between NATO and the Warsaw Pact. All of them ended with either no or extremely limited nuclear exchanges, ending with a
* Several thunder gods fall into this trope. Thor, Perun, and Susanoo-no-Mikoto

fit the mold very well. Zeus is a Boisterous Bruiser who got married, but never quite settled down—his idea of subtlety is turning his paramour into a conspicuous white heifer. Thunder gods that are also the head of their pantheon tend to have been Boisterous Bruisers before they obtained some kind of (frequently literal) font of wisdom.
* several times are extreme examples. The basking shark is best known for possessing a gigantic mouth for sifting through the water for plankton.
* several times, as part of an attempt to break the loyalist Primarch.
* Several times during Series 9, the Twelfth Doctor addresses "it never gets easier" with regards to losing people, to the point where, in "The Girl Who Died" and the finale, he makes reckless, universe-threatening decisions.
* several times during the ride (given his inability to steer straight), but in one of those times, the glove missed him and hit Kotori. (Despite this, it still deducted points from Yuma.)
* several times. Felicia is taking a piss in the car's radiator to give it some needed fluid — a car comes by and one of the kids in the back takes a picture which ends up on Pissingladies.com. Ian gets a boner at an abstinence rally and people video and post it. Etc.
* several times he heard about Icarax. Luckily for him, Icarax just settles for roughing him up before telling him to go back to Karda Nui and tell the others he's coming.
* Several times in "Backwards", on the planet where time runs in reverse. For example, Lister lands on the planet with a black eye and bruised ribs, and doesn't know why until the bar-room brawl (or tidy) breaks out (during which his injuries get healed).
* Several times in predator encounters, enemies that should notice Batman don't, either because he's too far away, or in the middle of a special takedown.
* several times older than the universe itself, at long last finally broke down... and was promptly put back together again because his owners, i.e., Zaphod and the gang, were — due to time travel — alive at the time he broke, which of course went against the Sirius Cybernetics Corporation's lifetime warranty.
* Several times sending impostors to take his place in interviews...and once even
* several times the size of an average man when they settled the land. There was also a race of Giants native to Elsweyr, who were said to have built the Halls of Colossus, but who disappeared sometime prior to the 3rd Era.
* Several times through the series and movies, Spock is accused of lying, only to reply that he "exaggerated", or "implied" or in some other way
* Several times, when Buffy is out of commission it is up to Xander Harris to save the day, despite having no special powers himself. Including but not limited to
* Several times, when jobber Iron Mike Sharpe would be on the verge of winning a match, he would pull a foreign object out his trunks and put it in his arm brace. He would then set up his opponent for a clothesline, who would duck under and hit their finisher on Mike.
* Several times with Dwight and Angela in later seasons. S4/5: Dwight —> Angela. S6/7: Angela —> Dwight. S9: Dwight —> Angela then Angela —> Dwight.
* Several times with just glasses and a different hairdo. When Captain Marvel ends up visiting, she's equally shocked that no one recognizes her outside her uniform, despite lacking a mask of any kind.
* Several titles take place in the same universe with similar past events.
* Several towns and regions of Japan have picked up on this and commissioned anime specifically to attract visitors.
* Several tracks utilize toy instruments; the "Pale Realm" level music includes the chorus of an old children's song. ("My Grandfather's Clock", according to
* Several TV quiz shows in the 1950s practiced a similar Masquerade to
* Several types of Exalted can learn Charms that replace the need to eat. Also, all Alchemical Exalted are capable of going without food indefinitely by living off of ambient
* Several types of insects who follow the light-source (for an example, flies and

bees) are known to repeatedly run into glass and they can even starve to death trying to fly through it even if there is an obvious way out of the house.
* Several types of naval craft effectively serve this purpose in wartime, most famously the Aircraft carrier. In fact, in many languages, such as Chinese and Japanese, the corresponding word for "mothership" refers to an aircraft carrier.
* Several UK adverts for Alpecin Caffeine Shampoo (a shampoo made to prevent hair loss) proclaims itself as "German Engineering For Your Hair", and tells you pretty much nothing about what it is (beyond being
* Several units specialize in taking down enemy vehicles, such as Ork Tankbustas, who achieve their kills through heavy use of bombs and rocketry, and Eldar Fire Dragons, who instead utilize powerful plasma cutters to slice through vehicular armor.
* Several UNIT stories produced in both the 70s and the 80s also mention the "end of the Cold War" but still have a USSR. This combines The Great Politics Mess-Up with the UNIT dating mess-up, since UNIT stories were notoriously vague and contradictory as to whether they were
* Several universes where Tedd and Elliot are opposite genders result in this happening. For example, Beta Tedd and Beta Elliot (Ellen) are in a relationship. In a non-canon story where Tedd is female due to some reality-warping mishap (which retcons that she always
* Several U.S. communities have attempted to pass legislation against using social media to organize flash mobs, not seeming to understand the whole "freedom of assembly" clause in the Constitution.
* Several variations of service members trying to get out of the military happens in
* Several varieties of bear appear in the wilds of Solstheim, added by the
* Several versions of "Stagolee" involve the title character shooting Billy DeLions because the latter stole (or won) Stagolee's Stetson.
* Several versions of the opening credits include a swarm of bats emerging from a spooky house's attic window or front door.
* Several versions of this trope turned up over the years in the pages of
* Several veterans of the Boer War wanted to fight in World War II, being turned away because they were too old. There was one case where the man in question dyed his hair—but the heat made the dye run, revealing his gray hair and thus his age.
* Several video game companies have done this as a result of mergers/buyouts, including
* Several viewers thought that Tyrion had romantic feelings for Sansa in Season 8, and some felt Sansa may even have reciprocated them to a degree. Tyrion expresses admiration for Sansa and states they "should've stayed married", to which Sansa says it wouldn't work "because of the dragon queen" without giving any other explanation. Sansa also makes a point of telling him that of all the men she was betrothed/married to, he was the best. And then there's their emotionally charged moment while they're hiding in the crypts and could be killed at any moment. It doesn't help that Tyrion previously admitted to finding Sansa attractive but refused to act on it on moral principle. However, given Tyrion's later confession that he's in love with Daenerys, the writers apparently didn't intend for him to have romantic interest in Sansa.
* Several villains are quite fond of using this trope when they're defeated, such as Vile in
* Several villains whose comics incarnations were essentially doing things
* Several viruses do this to their host cells, though others simply lyse out of the host
* Several Voyages to Remote Nations of the World by Lemuel Gulliver are also parodying other works. His Laputa and Balnibari are much more directly mocking Francis Bacon's New Atlantis. And, strangely, the ideas of each of the 4 places he goes may have been taken from an old Japanese story, or collection of stories, that talked about tiny people, giants, and horses. Whether this is truth or an extraordinary coincidence unclear, but considering how Japan is the only place

Gulliver goes to that Swift treats with any kind of reality (in addition to being the only real place Gulliver goes, and the only place where he doesn't learn the language) there may be something to it.
* Several Voyages to Remote Nations of the World by Lemuel GulliverMost of these versions cut out the second two books altogether (and occasionally don't even get as far as Brobdignag), which are where it starts descending from political satire into a satire of progress and human nature. It's pretty easy, after all, to make a land of tiny people and a land of giants into kids' fare, much harder to turn a land of sapient horses and feral, evil, raping and squabbling humans into kid friendly material.
* several ways); 3) the previous two are avoided and the crown of the tree has come to rest, but the botched hinge remains like a tensed spring ready to go off as soon as it's released, and it is tricky to cut off this last part in such a way that the snapping back of the tension doesn't drop or throw the trunk in a dangerous way.
* several ways to reproduce it, the question is which (if any) they actually used. For instance, Greek fire is described so many different ways in different sources that a leading theory is that it was a general term for incendiary weapons, not a single recipe.
* Several weapons also deal bonus damage to shields, barriers, armor, or any combination of the above. The most notable is perhaps the N7 Typhoon, a graduate of the University of
* Several websites are now able to detect if the user has adblocking software installed. Some merely add a message intended to guilt-trip you into turning it off, while others are more intrusive. Some take it to absolutely ridiculous levels; Blip.tv, for example, rapidly gained infamy for making you stare at a static message for
* Several websites exist for the sole purpose of cataloging unusual crimes and stupid criminals.
* Several websites of song lyrics file Bluth film lyrics under Disney films instead.
* Several websites specialize in fetish videos involving women either stumbling or being forced into quicksand or mud and struggling (and failing) to get out, or sensually playing in and letting themselves sink into the murk. Since a lot of the "quicksand pits" are artificial mudholes a fair bit of disbelief suspension is required, though natural muddy areas and silty riverbanks are used a bit as well (the models still have to force themselves deeper to give the illusion of being sucked down).
* Several websites state that the original game features two secret dinosaurs, the
* Several wendigo, portrayed as lanky and pale humanoids with elk skulls for heads, appear in
* several, where he's a prison guard who is disgusted that Hope's execution via electric chair has been called off.
* several who ship Colossus and Angel Dust together, mainly due to the brief moment where Colossus calls Angel beautiful.
* Several Williams/Bally games in the 1990s would feature a hidden "DOHO" in the dot matrix graphic artwork. "DOHO" was a reference to
* Several women's auxiliaries were formed to support the war efforts of different nations during WWII as well. In the US, these units usually served in various roles stateside to free up fighting men for the front lines. Women's Airforce Service Pilots, or WASPs, often flew ferrying flights, flying unarmed fighter planes from the US to combat theaters, or piloted transport planes carrying troops and supplies. It wasn't until the 1970s that these women's auxiliaries were granted status as military veterans and allowed to collect veterans' benefits.
* Several works of fiction that featured black presidents in a contemporary setting were often ridiculed for being unrealistic or overly optimistic about attitudes towards race.
* several Xavier Institute students give Harry a group hug after he tells them about his abused childhood.
* Several years after he said this, Greg cleared up any remaining questions by

declaring that most sentient
* Several years ago, Hidenori Kusaka and Satoshi Yamamoto worked on a short
* Several years back, there was an ad campaign for Beggin' Strips dog treats that had several people giving the treats to their pets. As their dogs cutely ate them, they basically dissolved into baby-talk and cute overload.
* Several years back there was a slew of "combined armed forces" recruitment ads for the US military, with the slogan "Army, Navy, Airforce, Marines, what a great place to start!". The message of which was apparently, "We don't care which service you join, just join one." In these commercials, the soldiers were seen driving tanks and shooting rifles and running through the woods, the airmen were seen flying (or repairing) jets, the sailors were working with electronics onboard ships, and the marines... were standing in formation,
* Several years later, Moffat brought River back for a romantic storyline, "The Husbands of River Song" that aired three weeks after an epically romantic storyline involving the Doctor and companion Clara Oswald reached a bittersweet conclusion. Fans on both sides (River and Clara) were not happy at being trolled like this.
* Several years later, Norway saw another ginormous tourism boom thanks in part to Disney once again. More specifically, the absolute sensation that is
* Several years later, two side-story novels were written to explain the nature of the "complicated" problem, followed by
* Several years on, Ian ended up overseeing the official reboot, which was slightly different to his proposal above, with a corebook outlining a contemporary setting for Talents (renamed from Daredevils), and
* several years younger than the other girls. Of course, this is only from the perspective of her older sister, as Jamie turns in a decidedly average tryout—and the above mentioned Missy gives a way, way better audition.
* Severance: A group of maddened, blood-thirsty ex-mercenaries roam the woods of Hungary... and the first victims to cross their path are office drones from an Anglo-American PMC on a company outing.
* Severance: Andy gets caught in one of these and loses his foot when his co-workers try to free him.
* Severance are a sales team out on a team building weekend in the Hungarian wilderness.
* Severance are snagged by snares during the course of this black comedy movie.
* Severance: Blade of Darkness allows you to dismember opponents and then use their arms as weapons. Zombies don't have to die before their arms come off, so you can actually kill them with their own arm. Not as effective as regular weapons due to the lack of special attacks, but still potentially useful if you somehow find yourself without a real weapon. You can also throw heads, although they do very little damage.
* Severance: Blade of Darkness, Naglfar and Tukaram, can use these. The latter is all about the two-handed axes: the former, being a dwarf, sticks with the one-handed ones.
* Severance consists entirely of vignettes presenting the imagined last thoughts of decapitation victims throughout history (including a few non-humans and the occasional fictional character). Very weird, quite fascinating.
* Severance is a not-too-serious slasher flick about a bunch of British corporate drones on a trip in Hungary who come across bloodthirsty psychopathic former soldiers.
* Severance is a short story collection in which each short story is told from the point of view of a beheading victim in their last minute or so of life.
* Severance Package takes place mostly on one floor of an office building. It's revealed that the financial services firm where the main character works is really a cover branch for the CIA, and they're being shut down — the hard way. The people are given a choice: drink poisoned mimosas for a peaceful death, or be shot in the back of the head. The elevators have been disabled and the exit doors rigged with gas so no one can leave. Then the real fun begins ...
* Severance tells a story of group of co-workers who go to a remote mountain forest in Hungary, where they become victims of murderous attacks.

* Severance: Two characters discuss decapitation as a possible death and how long the head can remain aware even after it's severed. Guess how one of them dies. No, go on, guess...
* Severance when a weapons merchant fires a missile at attacking soldiers, only for the missile to arc up into the air and shoot down a passing airliner. Oops!
* Severance wonders what it is like to be beheaded. He gets his wish, and the last sight of his body stumbling around raises a smile.
* severe case of this when, for once, he's trying to be nice to Akane and speak from his heart, and he's utterly frustrated that he can't say a single word.
* Severe clothing damage, including naked victims, is common enough in high-explosive detonations that first responders can usually tell if they're dealing with a criminal bombing or genuine accident. It's also quite common for people in car accidents, either crashes or being run over, to lose their clothes from a severe impact. Many of the graphic images of victims available on the internet show them with their pants or shirts half-gone.
* Severed does not encounter Isaac Clarke at any point in either of the first two games, despite having her incredibly important storyline due to her immunity to the effects of the Marker and managing to survive both of the Necromorph outbreaks Isaac was present for.
* Severed Dreams" was infused with her Croatian actress Mira Furlan's own considerable fury with the European powers who failed to help as the Balkans went to hell.
* Severed fingers and iron nails are featured prominently on any version of the Cursed Videotape in
* severed head and bloodstained coat, and is ready to leave immediately.
* Severed Head Sports: Playing a ball game with a severed head being used for the ball.
* Severed Head Sports, throw and kick their head around to add further insult to injury.
* Severed Head Sports: Using severed heads as pieces in sport activities.
* severed Ouranos' genitals and threw them into the sea, and Aphrodite sprouted full-formed from the sea foam.
* Severe emotional trauma can stunt magic in otherwise capable wizards or witches. Neville, who grew up with a strict grandmother and no parents, was long feared to be a Squib until someone had the bright idea to throw him from a high place and he bounced back.
* severe lightweight, using the partisan press, although the video does point out his enemies exploiting it.
* severely compulsed human in order to create a threshold to keep out unfriendly vampires.
* severely damaging her mental health. The implication is the decreased avoid chance effect is because she gets so distracted watching Alm that it allows an opening for the enemy to attack. That, or she's so focused on killing the enemy to impress Alm that she disregards her own safety.
* severely overpowered in the early game, with spells like White Wind, Death Claw, and others - and while the Red Mage starts and finishes weak, their ultimate ability, Dualcast, synergizes with other classes to provide a boatload of pain... if you want to grind long enough to get it.
* severely restricted (about 800 to 6,240 dollars at 2018). No wonder that many places restrict the use of these computers due to their high price, and the fact that Macs are integrated computers, the only way to fix or replace one is to take it with the manufacturer, at a very steep cost, while for a IBM-compatible PC the price of repairing one is relatively low, for reasons more than obvious.
* severely weakened by keeping his Sharingan activated permanently, he is said to have less than average power/endurance, which his partner Kisame Hoshikagi hints at by reminding Itachi that he shouldn't use his exceptional ocular powers more than a few times a day, lest he be completely drained. What Itachi lacks in quantitative power, he more than makes up for in qualitative.
* severe OCD. One folkloric method of dealing with Vampires was to drop thousands

of grains of rice in their coffin, the theory being they'd be compelled to count them all when they awake, wasting the whole night instead of getting up and terrorizing people.
* severe on their psyches. Any one who enters that monstrosity is doomed to a life of depravity and madness.
* Severe thunderstorms definitely qualify, because of three major threats they often contain:
* "Severe Weather Appreciation Week". It would also be an in-universe example but somehow, some ponies just don't get it:
* Severe winter weather conditions are what prevent the antitoxin cure for diphtheria from reaching Nome, Alaska by sea and air in
* Severin Cocorico carries around a riding crop which he apparently uses in dangerous situations. Otherwise, it's a prop. Unlike some other attorneys with whips, he much prefers verbal takedowns to anything as unlawful as
* sever the connection between the universes. Second, they could have done that at any time — they just weren't thrilled about the side effects, so they wait on doing it until it becomes clear that it's the only viable option.
* Severus Snape appears to be this, controlling Hogwarts on the behalf of the Death Eaters. Subverted when he was revealed to be a reverse mole.
* Severus Snape by protecting Harry from harm and working as a double agent for both the Death Eaters and the Order.
* Severus Snape is a sly, abusive teacher who has a clear affinity for the Dark Arts throughout
* Severus Snape is really unpopular in the books among his peers and students, but he's easily one of the most popular characters in the fandom. So popular, in fact, that in a poll that ran after the seventh book came out he was voted the best character in the entire
* Severus Snape is sarcastic, mean, and downright abusive towards some of his students but
* Severus Snape is so good with the magical skill of Occlumency (hiding his thoughts) that he is able to play
* Severus Snape is the poster boy for this trope. His true allegiance is revealed only after
* Severus Snape's, to the point that his Patronus remains a doe (the same as hers) for the rest of his life.
* Severus Snape, while an unmistakable genius in the field of potion-making, is decidedly less qualified as a teacher. He consistently plays favorites with the Slytherin students and bullies and degrades any other students, particularly Hermione Granger and Neville Longbottom (who is legitimately terrified of Snape). And at the
* Severus wasn't their only victim. Harry Potter and the Half-Blood Prince revealed that the Marauders got detentions for several acts of bullying and general mischief. One incident involved being one of them being apprehended and using an illegal hex on some one-note student. There's also Sirius trying to lure Severus to Werewolf Remus during a full moon with full knowledge of what Remus could have done to him.
* Sever your leg please, it's the greatest day!" to "I'll chop off yer legs!"
* Sev'ral Timez, due to their isolated upbringing, find regular objects astounding.
* Sev Trek acts that real terrorists do like deliberately targeting civilians or moderate Bajorans. When asked how they managed to throw the Cardassians off their planet; "I wrote strongly worded letters of complaint!"
* Sev Trek. However the duplicated crew are not evil, they're just more interesting.
* Sev Trek parody strip has Saruman giving the line, "Do you know how the orcs came to be?" The winning punchline was the orc replying, "Oh no, not the Talk!"
* Sev Trek: Pus in Boots, all of which fall off whenever the ship goes to warp.
* Sev Trek: Pus in Boots, Captain Jetlag Pinchhard pulls across a seatbelt. Later when the Enterforaprize rams another ship airbags inflate from the consoles, but

one of those ensigns who are always standing around at the back of the bridge goes flying through the air.
* Sev Trek: Pus in Boots) had a phoney blooper reel in the credits involving the CGI actors.
* Sev Trek: Pus in Boots. One dying ensign laments the fact that he would have been promoted to lieutenant in a few days, therefore becoming immune. Ensigns mentioned by name include Ens. Insignificant, Ens. Expendable, Ens. Cadaver, Ens. Bitpart, Ens. Anonymous, Ens. Disposable, Ens. Speakingpart, Ens. Deadmeat, Ens. Extra, Ens. Deathwish, Ens. Cannonfodder, Ens. Menial, Ens. Shortlived and Ens. Walkonpart.
* Sev Trek: Pus in Boots. The pimple grows to enormous size before detaching as a shapeshifting creature that rampages across the ship, causing the death of numerous ensigns.
* Sev Trek: Pus in Boots). The ship goes to Red Alert, but it's so loud no-one can hear the captain's orders. But they only did it to make Lt. Barf happy anyway.
* sew buttons on her eyes so that she'll be a well behaved "little doll".
* Sewerage consists of pipes and ditches ("sewers"), and associated storage tanks and pumphouses. Sewage is the stuff carried by those sewers.
* Sewer, Gas & Electric acted out this trope during the American Civil War.
* Sewer, Gas & Electric, but thanks to a conservative-hyped law banning federal funding of anything possibly usable as a sex toy, an artificial penis wasn't included.
* Sewer, Gas & Electric Civil War veteran, and is over 170 years old. No special reason; she's just a tough ol' broad who never got around to dying.
* Sewer, Gas & Electric, Harry Gant's mother is a tall, husky construction forewoman, while his father is a short, rather frail history buff.
* Sewer, Gas & Electric has numerous accoutrements not normally expected on an undersea vessel, including a ship-wide network of hamster tubes and an arboretum full of endangered plant life.
* Sewer, Gas & Electric. He's kidnapped, dressed like a bum, has an explosive collar fitted around his neck, and left in a train station with a cup full of pencils to try to earn enough cash to unlock the collar before it blows. To ensure he can't explain the situation, his tongue is stapled so he can't speak coherently.
* Sewer, Gas & Electric sign of African ancestry; nonetheless, his "one drop"-caliber bigotry led him to design the plague to spare anyone with green eyes like him, for fear it would latch onto that "one drop" and kill him too.
* Sewer, Gas & Electric to write a novel from the perspective of cetaceans, to be titled "No Opposable Thumbs". Subverted in that he never got very far in the writing, due to a chronic inability to restrain his use of adjectives.
* Sewer, Gas & Electric with an all-aboriginal cast who play black space colonists who'd survived the plague by being on Mars at the time.
* Sewer, Gas and Electric refuses to let his company's robots be used for militaristic purposes, even going so far as not to sell them to the army as menial support personnel. Subverted in that this is only partially due to his pacifism: he also doesn't think military hardware is a "neat" enough idea to hold his attention (which is roughly that of an eight-year-old).
* Sewer Gator: Alligators that have been flushed down the toilet and end up living in the sewers down below the streets.
* Sewer Gator on the TV to prevent Timmy from watching any violent programming. Timmy isn't happy, especially when his friends mock him the next day for not having watched it. However, he does get to watch the documentary later on after wishing his parents would care less.
* "Sewer Or Later" seems to have been an excuse to use the phrase "poo-gas" as much as possible.
* Sewer Shark, stood in limbo until they were released for the Sega CD in 1992.
* sewn into in order to get the right fit. This fact is often credited as being one of the reasons doctors were unable to save his life after he was shot in 1914.
* Sewn-on ranks normally have most of the threads cut prior to the soldier reporting to the commander for a demotion. This allows the commander to quickly and dramatically tear off the rank insignia to reinforce the psychological impact of

the action. Or for the commander to take a razor to the threads in front of their supervisor and anyone else present. Given the cost and time of properly setting up dress uniforms, this has a fairly significant impact.
* Sewol ferry disaster, leaving behind a note saying that he took full responsibility as he should have been the one to die in their stead, and for his ashes to be scattered at the site of the accident to join the lost children.
* Sex–Face Turn: The villain reforms after having sex with the hero.
* Sex&Drugs&Rock&Roll bombing at the box office, he doesn't have any projects slated for the future, when it comes to either acting or producing.
* Sex&Drugs&Rock&Roll) wants to open the casket of a former back up singer of her dad's band to see her ashes.
* Sex And Death 101 takes the low-key yearning route after Miranda told him that she wasn't interested. When he makes a move and she turns him down, he complains that he has done so many things for her since she said that. She immediately points out the problems with this trope.
* Sex And Fury (aka: "Furyo Anego Den - Inoshika Ocho" (Story of a Bad Elder Sister - A Deer Amongst Wild Boars (There needs to be a trope for movies with more flowery international titles, there really does.)) Ocho is attacked by Yakuza while in a bathtub. She fights her way out into a snowy garden in spectacularly bloody fashion without donning her clothes.
* Sex and sexually transmitted diseases are routinely the cause of a number of horrific medical cases, up to and including heart failure, car crashes, paralysis, life-threatening pre-teen pregnancies, and even African Sleeping Sickness.
* Sex and the City 2, when the ladies are in Abu Dhabi in need of a dire situation to get to the airport to return to New York City, Carrie Bradshaw manages to get a taxi driver's attention by lifting up her burka and flirtatiously showing some leg.
* Sex and the City Alexandr is one of the best examples of this trope, going from an amazing, sweet, and sensitive guy to a jerk who ignores Carrie and proves to be completely self-absorbed before leaving for Paris.
* Sex and the City, an Australian gay guy explains that he's in an open relationship with his partner, the rules for pickups being "no last names, blow-jobs only" on the basis that it's "unrealistic" to expect monogamy from a gay guy.
* Sex and the City are, ahem, fairly well-traveled, it's Samantha Jones who best exemplifies the trope. In fact, when she went to get an STD test, the doctor asked her how many partners she'd had. Long pause... "I'm counting." Long pause... "This year?"
* Sex and the City, as Charlotte and her lawyer battle her ex's overbearing mother and her lawyer regarding the divorce settlement, a telegram from said ex arrives. Aside from insisting that Charlotte is to have whatever she wants, the "stops" that come at the end of each sentence—in particular, the final line, "Seriously, mother", make it sound more like he's demanding that his mother lay off.
* Sex and the City, as Charlotte's discomfort and reaction to the messy embarrassing accident in her pants causes Carrie to pull herself out of her depression.
* Sex and the City, as her motivations are lust rather than being a "bad girl".
* Sex and the City being in it for the sake of marriage as both he and she first believed.
* Sex and the City birth control (due to breaking up with Steve) that causes embarrassment at her gynecologist.
* Sex and the City, Brady sees Harry and Charlotte having sex. Charlotte freaks out and calls Miranda, panicking and convinced that she has damaged the boy for life. Miranda is amused and explains to Charlotte that being a toddler, he doesn't even know where his nose is, let alone what sex is.
* Sex and the City: Carrie apologizes to Big's trophy-wife for having an affair with Big, to which she reples "I'm sorry too: I'm sorry you cheated with my husband, ran around behind my back, and caused me to fall and break my tooth, requiring 27 stitches and hours of painful surgery."
* Sex and the City: Carrie is at a cheap motel, waiting for her married lover to secure a room for their liaison. Another man talks to her, mentioning that he's

seen her at the motel before, and asks her "How much?", having assumed she's an escort.
* Sex and the City - Carrie is a writer; Samantha is a PR person; Charlotte runs an art gallery. As a subversion, Miranda is a lawyer, yet she doesn't have to give up her career for a man.
* Sex and the City- Carrie is friends with a man who makes a long term "art project" of sleeping with models and filming it without their knowledge. When Samantha is hepped to this, and said friend shows interest in her, she assumes he thinks he's a model. When they finally do have sex, she asks where the camera is and even though he explains he only does it for models, he agrees to give Samantha the same treatment.
* Sex and the City. Carrie, Samantha, and Miranda all hook up with ex-boyfriends, to varying degrees of success.
* Sex and the City, Carries grabs this many times over the course of the show:
* Sex and the City, Carrie's rugged puppy Aidan seems to have inspired a resurgence in that name (and its variant Aiden).
* Sex and the City, Charlotte, who is the character who's the most excited about the idea of marriage and family, turns out to have trouble conceiving. Miranda, who's more lukewarm on the subject, suffers an unplanned pregnancy. What's more, Miranda had a lazy ovary and the man who impregnated her had lost one testicle to cancer!
* Sex and the City dates a male version for a while. Raymond is a charming, upbeat jazz musician, but Carrie eventually learns that he can't focus on anything for very long (as if he had a form of ADHD) and doesn't have much depth beyond his love of music.
* Sex and the City does one of these when she "fakes a sonogram" (i.e., fakes wild excitement during a sonogram of a child about which she's not quite happy, yet).
* Sex and the City ends with Carrie getting splashed by a passing bus. Then the audience is introduced to her character on the bus’ ad with a sultry photo of her captioned “Sex and the City: Carrie Bradshaw knows good sex.”.
* Sex and the City episode also involved Miranda getting set up on a blind date with an actual lesbian woman named Sydney. Although she naturally had to turn her down and explain the situation, they ended up friends. Later in the episode Miranda pretended they were together to get her boss's notice. And ends up kissing the blind date in the elevator to check if she herself might be gay without knowing. Interestingly enough, the actress who plays Miranda is now, after being with men all her life and having two children, married to a woman and has come out as being bisexual.
* Sex and the City featured this theme in several episodes. When the four of them are some of the only single women at a wedding, Carrie says they look as if they're witches.
* Sex and the City film, Samantha sees Dante taking an outdoor shower completely naked, when he notices her.
* Sex and the City had a gender swapped "My Brother Is Off Limits"-plot regarding Samantha and Charlotte's brother. Samantha of course blatantly disregarded this. What does that tell us?
* Sex and the City, Harry buys Charlotte some ice cream for dessert and she eats it while they walk on the street. She offers him a bit on a spoon and he later takes another bite from the cup.
* Sex and the City has a few of these featured, complete with men in gold Speedoes dancing in cages.
* Sex and the City has Carrie Bradshaw, who is depicted as incredibly sexy and sought-after by men, and many of her friends are envious of her looks at times. Additionally, many of the men on the show are described as attractive.
* Sex and the City he'd never been comfortable with in the first place.
* Sex and the City, in both of the ways described above. One scene showed the same bland guy being dumped by a series of women using the exact same lines.
* Sex and the City involved Samantha experiencing loud neighbors who had vocal sex every night immediately after the late news. After she 'joins in' with her own

noises, she receives a note from them inviting her to join them in person. Though she is originally keen on the idea of a threesome with the couple who seem to enjoy sex so much, she soon realizes that the couple are overweight and unattractive, so she just tells them to keep it down in future.
* Sex and the City is delighted to learn what a WASP is and that she is one.
* Sex and the City is glaring—throughout their on-again, off-again relationship, any pursuing behavior of Carrie's was viewed as pitiful and worthy of ridicule and ended with her being dumped, whereas Big's harassment and essentially forcing himself on her is portrayed as sexy and romantic and results in him getting her back.
* Sex and the City is set in a theme park version of Abu Dhabi, which was actually filmed in Morocco.
* Sex and the City lovingly lingers over his body and even gives us a brief cock shot.
* Sex and the City man and they both react to a mouse in a similar way.
* Sex and the City men who watch it for the fashion, during its prime it also had a very large contingent of straight male fans, as it featured a ton of female skin and enough of the male perspective (at times) to occupy straight men's interest.
* Sex and the City. Mid-coitus, the company responds to a call, leaving Samantha exposed with the bay door open and the inside doors locked.
* Sex and the City: Miranda and Steve share an incredibly awkward elevator ride with Miranda's ex Robert who is also a fellow tenant. Seeing as Steve just moved in, they discuss afterward who gets "custody" of the elevator.
* Sex and the City Miranda worries Robert is more interested in a cheerleader for the Knicks. He isn't.
* Sex and the City. Most egregiously, they'd both expressed annoyance when Charlotte tried to pair them up back in Season 4.
* Sex and the City movie Charlotte's oldest daughter Lily was played by Alexandra and Parker Fong, in the sequel Charlotte and Harry's biological daughter Rose was played by two sets of twins.
* Sex and the City need a big ol' drink." The Amish couple looks at her. "Sorry."
* Sex and the City). Not until she walks in on them having sex does it finally dawn on her how out of line her behavior is.
* Sex and the City: One of Samantha's Guys of the Week would refuse to have sex while his basketball team was playing. Sam tried to indulge his fandom, but when he turned out to have a team for every season, she walked away.
* Sex and the City, one of the few cases where it is an ongoing issue rather than a one-episode gag. Also when Samantha has sex with a party guest when she sees that her boyfriend Richard won't commit to monogamy, he goes soft inside her and while he's blabbering that this has never happened before, this is the first time that she actually doesn't care that it happened.
* Sex and the City, one of the more memorable instances being Charlotte's "addiction" to the Rabbit vibrator, necessitating an "intervention" by her friends.
* Sex and the City or digitally-enhanced darkness, and aired late at night; the other, a heavily-edited one for regular daytime syndication that cut out all nude scenes and removed/redubbed the bulk of the sexually explicit content and lines. With TBS no longer airing the show, the second bowdlerized version has become the default syndicated version, as seen on E!
* Sex and the City, Samantha does this at a breast cancer charity dinner.
* Sex and the City Samantha), though by the series end they were all in steady relationships, all of which reflected the serious character growth they had undergone during the course of the series, except Carrie's.
* Sex and the City; second time was with Richard who she finds herself actually wanting a monogamous relationship with (she complains to her friends "I think I caught monogamy! I must've gotten it from YOU people!"); and finally with Smith who broke through more of her emotional barriers than any other guy she fell in love with.
* Sex and the City seemed to intentionally avert this trope in the casting of Mikhail Baryshnikov (as Aleksandr Petrovsky, or "The Russian"). Baryshnikov is

frequently cited as one of the greatest ballet dancers of the age, yet never once is his character given an opportunity to dance. In fact, in the one scene most likely to feature him dancing, it's quickly cut off before he takes his first steps.
* Sex and the City sees Samantha dating a man in his 70's. He's wealthy and fairly kind to her, so at first she doesn't mind the age gap. One night, she sees his shrivelled behind, and leaves in horror.
* Sex and the City She once went through a man's apartment because she couldn't find any character flaws in him and started obsessing over what he was hiding - he promptly dumped her because she was too crazy for him.
* Sex and the City signed up for real phone numbers to use onscreen so they could avert this trope.
* Sex and the City star Carrie is constantly taking back Mr. Big no matter how many times he bails on her or is an ass to her. In this case, it is presented more that she has a constant lust and chemistry with him that she knows rationally will not end well. Carrie's friends even call her out on it when she gets back with him the second time.
* Sex and the City, statuesque Samantha briefly dates an investment banker who's barely above 1.5 meters in height. She is pleased by his performance in the bedroom, likening him to a "horny smurf." While she initially wants to break up with him when she discovers that he buys his clothes at the children's department (they're cheaper and they fit him better), his sense of humor manages to save the day.
* Sex and the City Steve looked like he would be this for Miranda, and they even broke up for a while. But in the end, his sheer averageness was just the kind of stability she needed.
* Sex and the City. The City is exactly that. Its French title is even "Sexe à New York".
* Sex and the City to Miranda after overcoming all of her attempts at pushing him away.
* Sex and the City to second husband Harry (who was her divorce lawyer from her first marriage).
* Sex and the City, Trey and Charlotte were having problems in bed, and their therapist suggested that they name their genitals so they could talk about it. Charlotte named hers "Rebecca" and Trey named his "Schooner".
* Sex and the City up for a blind date with Charlotte, who is — but the date quickly goes downhill when he expresses a preference for garish pottery.
* Sex and the City want in a man, and therefore she felt free to be as aggressive as possible during the divorce. Harry turned out to be her true love.
* Sex and the City wants to get enlargement surgery. She is told during the pre-op examination she has breast cancer.
* Sex and the City was pregnant during season five, which the producers tried to cover up using body-doubles, and otherwise using suddenly baggy clothes and avoidance-shots of her normally lean body.
* Sex and the City when Carrie tries to go on actual dates with her "fuck buddy," convinced that their great sex has to mean a great emotional connection as well. It doesn't.
* Sex and the City, where they have a rather tense on-again, off-again relationship throughout most of the series precisely because their personalities clash too much. Even after they eventually marry, by the time of the movie (4 years after the end of the series), they have an equally strained marriage where every effort he makes to get her to relax is met with irritation.
* Sex and the City. Whilst they are channel hopping, they spin through several "Fat guy, skinny wife" shows before hitting upon a "Ugly guy, skinny wife" show.
* Sex and the City with Carrie's inability to pronounce Aleksandr's name. He finally says "Call me 'Bob.'"
* Sex and the Single Girl as a heavily fictionalized version of Brown.
* Sex and the Single Girl) who wrote a book about the emancipation of single women.
* Sexaphone music when he's about to get intimate with Lois), but when Peter goes

for a bus ride he ends up annoying a fellow passenger.
* sex, beer, or most likely, both, especially if it's an ad for the latter.
* Sexbot and is unclear if he was actually raped or was at least somewhat consensual.
* Sex Bot and then abandoning it to "die" raises plenty of questions about his character, but he ultimately decides that he wants a woman that he can respect and interact with. In his later appearances in Season 6, he is a misogynistic bastard who tries to brainwash, and eventually kills, his ex-girlfriend because she would not submit to his desires.
* Sex Bot. And they've been accused of sexual harassment more than once — Howard practically lived at the H.R. office before getting into a steady relationship. But they almost never face discipline for it. The only time they did was when Sheldon got himself fired (and was unhireable anywhere else because of his massive ego), but he got the job back because his mom traded the boss some sexual favors.
* Sexbot: A robot designed to be capable of humans having sex with it.
* Sex Bot, he says that it's every guy's dream. Faced by the disapproving looks of the female Scoobies, he says there's too many girls in their group. "I miss Oz. He'd get it. He wouldn't have said anything, but he'd get it."
* Sexbots are one of the many types of robots made by the major corporation in
* SexBots counts as sex). Since they become "imprinted" on the first man they have sex with, Julia decides to wait for her chosen "owner" to come of age.
* Sex Bot that Spike has programmed to fulfill his desire for Buffy, gives them information on her relationship with Spike.
* Sex by Proxy: Two characters have sex, and a third is having it with them psychically or something.
* Sex Changes Everything: Two characters who were ship teased finally get together only for their relationship with each other to start changing for the worse.
* Sex columnist Dan Savage's parents got married like this. They were pregnant with Savage's oldest brother, and quickly planned a wedding—even borrowing a dress—so that his mother could walk down the aisle before the baby bump started to show.
* Sex columnist Dan Savage will occasionally respond to hate mail simply with grammar corrections. He's also inclined to correct his own errors in his blog when pointed out.
* Sex Criminals. A few months after this, Suzie finally snaps and takes the opportunity to angrily scream out her feelings at her time-frozen mother. The narrating older Suzie notes this isn't the last time this has happened.
* Sex Criminals - a superpower that only activates when they orgasm, which kind of necessitates this type of relationship.
* Sex Criminals, in middle-school Suzie was a 'good girl' and Rachel was a 'dirty girl', with Rachel even disparagingly calling Suzie "slut" on at least one occasion. Sixteen years later, they're roommates.
* Sex Criminals, middle-school girl Suzie tries to get some information from her alcoholic mother, only to get shot down rather brutally.
* Sex Criminals they have a healthy sex life, since literally all of his friends' parents have broken up due to infidelity.
* Sex Criminals. They use this ability to rob banks so that they can use the money to save a library.
* Sex Drive, because both of her friends (who are male) are too nervous to do so.
* Sex Drive had an interesting take on this. On the unrated DVD, the writers appeared before the film, and explained that they were forced to make the DVD, even though they had no real "unrated" content. Therefore, they simply added gratuitous shots of naked men and women at random throughout the film, as well as adding some extra takes. They then explained that if you hadn't seen the original, you should watch that version first, as that was the version that they had wanted to make.
* Sex Drive has nude actresses (and a couple of actors) digitally superimposed throughout the film. The creators show up at the beginning saying that you should watch the regular version first.

* Sex Drive has protagonist Ian and his longtime friend Felicia falling in love with one another as they drive to the home of "Ms. Tasty" with whom Ian is supposed to have sex.
* Sex Drive is basically made of this trope, with more than half the characters spending more than half the movie lying, and frantically stacking lies on top of lies.
* Sex Drive Lance lets the gas station attendant he met less than an hour previously handcuff him to the bed in her trailer. She asks if he wants to try the "rolling brownout." He quickly agrees, then asks: "Wait, brown?" he is next seen running naked out of the cornfield, carrying the headboard which he is still attached to.
* Sex Drive works at a bizarre, Mexican-themed donut kiosk in the mall. Part of the job included a huge, slightly racist mascot costume. His close friends didn't hold it against him, but the punk kids at the mall would take advantage of his limited vision in the suit to stick a dildo onto the front of his costume as he wandered around.
* Sex, Drugs & Violence (in the future) by Nero Manson depicts the gradual transformation of a present day just like ours into a cyberpunk dystopia with all the trappings, which itself eventually begins to shift into a post-cyberpunk society.
* Sex, Drugs and Rock & RollAll the fixings for a non-parent approved party breakfast.
* Sex, Drugs and Rock & Roll: At least as far back as ancient Egypt.
* Sex, Drugs and Rock & Roll is still a frequent trope there if you look beyond the "official", and alcohol abuse and smoking are quite open there.
* Sex, Drugs and Rock & Roll music) made the trope less relevant for said genres.
* Sex, Drugs and Rock & Roll. She once forgot Twilight Sparkle's name, twice, in a conversation lasting less than a minute. She doesn't know what cutie marks are—even though they're a central concept of Equestrian society, and even though she joined a club specifically about cutie marks.
* Sex, Drugs and Rock & Roll: The introduction of the combined oral contraceptive pill (often known as just "the Pill", to give some idea of its impact) made it easier for women to not get pregnant, thus paving the way for the Sexual Revolution.
* Sex, Drugs and Rock & Roll: The three popular ingredients of a rock star.
* Sex Drugs And Violence In The Future is set in a world where North Korea launched nuclear missiles in 2013 at the peak of the international tension, triggering a World War that "officially" lasts until 2027.
* Sex ed classes taught by guest speakers sometimes have a guest speaker that's quite obviously pregnant, and they're sometimes quite young (sometimes even in high school). However, instead of the intended "That could be me!", it tends to become "why is this hypocrite telling
* Sex Education, Adam smashes Aimee's grandmother's urn on her new boyfriend's head. She's royally pissed at him for this.
* Sex Education), Eric (black/gay best friend), and Maeve (white girl).
* Sex Education Eric teaches oral sex techniques to a group of girls, using bananas as props. One of them gags and then vomits on Eric's clothes,causing him and the others to vomit too.
* Sex Education is this in S2, although it's not certain that she's dyed her hair brown to change it to a new colour, or if she re-dyed it to her natural colour.
* Sex Education, though, just an emancipated minor living in near-poverty, who really needs money.
* Sex Education: What we see of the school's sex-ed class consists of the students fumbling to put a condom onto a prosthetic penis. It leaves the students woefully unequipped for the ups and downs of real-life sex, which is why the awkward and virginal Otis — who was raised by a sex therapist — starts making money from giving sex advice to his classmates.
* Sex Ed with their kids, and if sex-ed is not taught in school, then they will go

to the internet, where boys will learn that its perfectly ok to treat girls like objects, and girls will learn that its perfectly okay to be treated as an object.
* Sex Equals Love: Characters who are in a sexual relationship but not in love will fall in love eventually.
* Sex for Product: An ad which says that you'll get laid if you buy it.
* Sex for Product marketing scheme to their line of body wash, you get this.
* Sex for Product, since these spots feature really hot women seemingly having orgasms while eating the candy.
* Sex for Product: The ad convinces the viewer that they'll be more successful with the gender they are attracted to if they use this product.
* Sex for Services: a trade between sexual favors for non-sexual favors.
* Sex for Solace: A character has sex with another character because they're grieving.
* Sexfriend Mina seduces her virgin friend Takabe purely for fun. They start engaging in fiery sex as often as they can, yet still keep their relationship casual, even though Takabe realizes he wants more than just Mina's body.
* Sex Gates implications of homosexuals lining up for their Gender Bender or women eager for the chance to be the "superior" sex, may be less amusing.
* Sex God: S/he will give you mind-blowing ecstasy, perhaps even without going all the way.
* Sex House out there was the one to set situations up, which leads to him wondering why they only cast one gay guy, and protesting by drawing Mohammed on his head (meaning they have to censor him).
* Sexier Alter Ego: A character creates a beautiful alter-ego to make up for their ugliness.
* Sexier Alter Ego: A person's costumed persona has better luck getting dates than their civilian identity.
* Sexier Alter Ego: Transform into a more attractive or otherwise sexually appealing form.
* sexiest dancer match, judged Kimura as boring and Negra as so bad she tagged out. Christi Jaynes decided to try her own dance and inadvertently got Kimura to stop putting off the wrestling match when she invaded their personal space.
* Sexify: A Polish TV series about a tech student who develops an app meant to make sex more enjoyable for women.
* Sexiled and is able to grab Katherine and put a knife at her throat, coldly telling her she can either forfeit or die. Sure enough, Katherine's fright is so great that she actually wets herself in front of the entire audience.
* Sexiled in which it was revealed that the the entrance exam results of female applicants has been automatically lowered for several years in an attempt to keep the ratio of women in each class of students below 30 percent. In particular, Alisa's subplot involving the Magic Academy is pretty nakedly a reference to this.
* Sexiled is based on a scandal where Tokyo Medical University was caught docking the grades of female students.
* Sexiled: My Sexist Party Leader Kicked Me Out So I Teamed Up With A Mythical Sorceress!
* Sexiled: My Sexist Party Leader Kicked Me Out So I Teamed Up With A Mythical Sorceress! is the story of Tanya Artemiciov being kicked out of her adventuring party because her leader thinks she needs to start thinking about marrying and having children. While "venting" (casting Explosion spells in the nearby wasteland while cussing her head off) she accidentally awakens Laplace, the legendary Sorceress, and the two decide to team up so Tanya can have her revenge... all while Laplace and Tanya grow closer.
* Sexiled: Somebody is not allowed to enter a room because people are doing it in there.
* Sexiled: You get barred from entering a room while others are having sex.
* Sexily Modest: A look intended to convey modesty actually ends up being more alluring.
* Sex immediately induces reproduction; there is no gestation period.
* Sex in a Shared Room: At least two people have sex in a room while another

person/viewer is there — willingly or unwillingly.
* Sex in a Shared Room) but in its darkest form, it might involve having sex in front of someone who has no choice but to watch and/or can't consent.
* sex is allegedly part of human nature, romantic love is a necessary and must always be accompanied with sex. ("You must find a partner who will love you and have sex with them, even when you don't want to, because that would make your partner happy!")
* Sex Is Cool: Appeared in the 1970s at the peak of the "sexual revolution" to be annihilated by the following decade with the AIDS scare. Open sexuality returned with a bang (no pun intended) in the 90s and 00s, but overuse of the trope has led to another bust during the 2010s.
* Sex Is Evil, and I Am Horny: A character who thinks sex is a sin but has a sexuality.
* Sex Is Evil, and I Am Horny: Always present when the scenario involves religion.
* Sex Is Evil, and I Am Horny and who believes that anyone he sexually desires is to blame for having seduced him.
* Sex Is Evil, and I Am Horny — a character being destructive because his sexual urges clash with his internalized sexual taboos.
* Sex Is Evil, and I Am Horny or no longer virgins since such women are whores by definition.
* Sex Is Evil, and I Am Horny satisfy our libido! It shall be your punishment for being a slut!
* Sex Is Evil: How dare you have sex for any purpose other than procreation! It's not just not our taste, it's disgusting and evil and unclean!
* Sex Is Interesting, or that you can't have a full life without having sex.
* Sexism and gender stereotypes are played with in the weird little German-UK SF series from the 1970s,
* sexist Doctor and mined for its own emotional storylines when his companions try to connect with him.
* Sexist Used Car Salesman: A man sells a used car to a woman they think doesn't know anything about cars.
* Sex Is Violence: Several prehistoric cave paintings in France and Spain show hunters killing their prey while sporting erections.
* Sex Is Zero: A South Korean gross-out/sex comedy roughly equivalent to "American Pie." It has been suggested that they were trying to get at something along the lines of "free love," but you really can't be sure.
* sexless, and jokes to this extent have been made on the show. A disproportionate amount of this came from fans latching onto the Fourth Doctor's notorious "You're a beautiful woman... probably" line in "City of Death", which in context seems more likely to be deliberate mockery of the Countess's villainous attempts to distract him with sexiness than actual asexual innocence.
* Sexless Marriage: A married couple who don't have sex (which is usually seen as a bad thing).
* Sex, Lies, And Diamonds portrays the Crystal Gems and Blue and Yellow Diamond as groomers and sexually abuse Steven.
* sex, lies, and videotape prestigious festivals to showcase your ambitious independent movie.
* sex, lies, and videotape. The story starts off with Ann Bishop Mullany having never had an orgasm with her current partner.
* Sex/Life: After Cooper beats him up, Devon uses it to blackmail him into getting what he wants at work.
* Sex/Life: Billie and her friend Sasha are both black-haired psychologists with all the intelligence you would expect.
* Sex/Life: Billie is played by Sarah Shahi, who's of Iranian and Spanish descent. Though the actor who plays Billie's dad appears vaguely Middle Eastern and also has an accent, while her character's mother's White, what ethnicity she (or he) was meant to be isn't clear. Their last name, Mann, is no help.
* Sex/Life: Billie (portrayed by Sarah Shahi, who's 5'3) only comes up to Brad's chin. Cooper is only slightly closer to her.

* Sex/Life: Brad and Billie used to be an item, and meeting him again while having troubles in her marriage re-ignites her attraction to him.
* Sex/Life: Brad becomes this for Billie, whose interest in him is purely sexual.
* Sex/Life: Cooper takes Billie to a client's pool, where they start having sex but then get caught as said client isn't on vacation like he'd believed.
* Sex/Life: In a flashback, Billie strips naked and goes into a rooftop pool with Brad (who's also nude).
* Sex/Life. Later, he invites her in when their marriage has grown better, and she goes happily.
* Sex/Life: Sasha is in a relationship with Brad like this when the series starts, which Billie finds out by walking in to find him in Sasha's apartment (to her dismay, as she has a resurgent attraction for him).
* Sex/Life: The swingers' party Billie and Cooper attend has many minor characters in little clothing or none, plus several having sex.
* Sex Magic. Because he created the curse Vald is fighting, he's able to use the connection between them to paralyze Vald and then magically compel him to experience arousal as he's being groped and taunted.
* Sex Miseducation Class: Incompetent or bad sex ed classes, usually humorous in nature.
* Sex Miseducation Class: Sex ed classes are bad, useless, or incompetent.
* Sexmission don't really have a choice. Once the Pill wears off, their sexual drive returns and there aren't any men around to hook up with. Come to think of it, if they were aware of Max and Albert, they still wouldn't know what to do with them, since there haven't been any men around for generations.
* sex. Mistress Denna, the main torturer in the first book, tells the protagonist she has never had intercourse without it.
* Sex Note be such corruption in his department! Also, like in canon, some people hail Light's alter ego as a savior but since he's not ruling by fear there are even more public dissenters calling Kougoukan's works the work of the devil.
* Sex offender Victor Paul Gitano is directly described as such by his former therapist.
* sex offenses with young men related to his attempts to bribe one of the victims into keeping silent.
* Sexophone: A saxophone solo is used to illustrate sensual or romantic scenes or characters.
* Sexophone: Saxophone music means that someone finds a character hot.
* Sex Pistols, after which he became pretty much one of the most iconic punk musicians of all time.
* Sex Pistols had meningitis as a child, which affected his eyesight. That classic stare? That's him trying to focus.
* Sex Pistols in and you're somewhere in the right ballpark. If you're on acid.
* Sex Pistols is a fierce attack on the British royals, with the immortal line: "There is no future and England's dreaming!"
* Sex Pistols released four singles during their career as an active band, with extremely varied B-sides.
* Sex Pistols's "I Don't Want to Talk About It" (no pun intended) was number one that week. However, well-founded allegations persist that the charts were doctored by BBC and recording company executives, fearful for their chances of retiring with knighthoods.
* Sex Pistols... They mocked the idea by making it a song about a submarine ("I'm on a submarine mission for you, baby"). Although it still had an awful lot of double-entendre lines about "going down"...
* Sex Pistols way many people still see them as the embodiment of punk.
* Sexplanations, a sex-positive education channel hosted by Dr. Lindsey Doe.
* Sexplanations) is one of the nicest and most open-hearted people on the site. She even has compassion for pedophiles as long as they haven't actually hurt a kid and want to change themselves, as they can't control how they feel.
* Sexposition: Making exposition more interesting by combining it with a sex scene.
* Sex scenes can be explicit, but don't have to be. Usually, the eroticism is more

subtle, simulated and actually filmed with some effort and passion, making it romantic for some couples to watch.
* sex scene with Kaji is depicted from an angle that only shows the dresser in the bedroom. The long silent periods make this particularly uncomfortable.
* Sex Sells: The idea of using sex as a selling point pretty much disappeared in Western media (particularly in English-speaking countries) during the 2010s given the increasing demand for more socially-positive archetypes. In a matter of a few years, such selling points as the Formula One's "grid girls" and the Reef beach pageants were no more, while mainstream fashion adopted more conservative outfits, the same for comic books and video games, whose heroines were infamous for their skimpy clothes.
* Sex Sent Me To The ER: since the events were not filmed, they are recreated, usually in a humorous fashion
* Sex Shifters. It's so prevalent that there is a saying in some parts of Africa to this day; "to have the anus of a hyena" is used to refer to someone who easily gets sex.
* sex simply because there's nothing else to do. Worse, she has no means of communicating with the alien, so never discovers if the act has any meaning for it; or even if she's having sex with a sentient alien at all and not just their equivalent of the houseplant.
* Sex Slave, also interrogating and torturing them for information on her whereabouts.
* Sex Slave, and it's implied it would have escalated into full-on rape if Yuno hadn't intervened.
* Sex Slave: A person is enslaved for the purpose of forcing sex upon them, or for selling them into forced prostitution.
* Sex Slave: A person is enslaved for the purpose of having sex with them against their will.
* Sex Slave: a slave whose main service is sexual labor (not technically a prostitute, as prostitute is defined by being paid).
* Sex Slave going to rape her, showing that he's a nicer guy than the rest.
* Sex Slave. However, when Eleena was injured, and another Sith pointed out that she could be used as a weakness against him, Malgus murdered his "wife" in her sickbed without much consideration.
* Sex Slave in the beginning, she gradually develops genuine feelings for him and consents by Vol.7. Mio has even offered herself to him several times, entirely of her own volition.
* Sex Slave, only for it to turn out the survivor was Cathak Drogath, a Dragon-Blooded. The last panel shows the fishdog with a new black eye and issuing the latest of several apologies, with the Drogath standing on his back and the sea god nowhere in sight.
* Sex Slaves aspect to the whole thing even though they were not related.
* Sex Slaves, as the pops that own them get +10 happiness. Even when they are enslaved by another species.
* Sex Slaves, but when they're no longer useful for the purposes of breeding, they are milked to provide sustenance for the War Boys.
* Sex Slaves by Ariel Castro. Although a third woman was found with them, it wasn't Ashley Summers but Michelle Knight. Castro denied he had any other victims, and the three survivors had never seen any others. While an ominous inscription saying RIP was found scrawled in the basement where the women had often been held, it was already there when Michelle was first captured, over eight years before Ashley went missing. Ultimately, nothing was ever found to suggest that Ashley Summers was a victim of Castro's.
* sex slaves Hercules is actually Diana's father but her birth was delayed due to her mother's immortality.
* Sex Slave: Someone is enslaved for the purpose of forcing sex upon them, or for selling them into forced prostitution.
* Sex Slave: Someone (usually a woman or child) is forced to prostitute themselves to satisfy the lust of their masters.

* sex slaves who were smuggled in from Eastern Europe and the Balkan region. They soon arrest her pimp, an Albanian human trafficker.
* Sex Slave: The abductee is captured for the purpose of being forced to have sex with their kidnapper, or to be sold into involuntary prostitution.
* Sex Slave, the first thing he thinks is happening is that Simon was smuggling her to be sold to "some Border-world baron."
* Sex Slave to him, to the point of making them go through a fake wedding, complete with dress.
* Sextette That's my motto", "It's queer to me," he's a "man's man" and that as a coxswain he "coxed the entire crew."
* SEX, the female assassin Yuki also goes by only one name (and is often referred to as Female Yuki).
* Sexton Blake's adventures ran from the 1890s to the 1970s. They feature the usual signs of the sliding timescale, particularly due to the presence of Tinker, Blake's younger sidekick.
* Sexton sets up some marbles as a trap for his and Death/Didi's captor in
* Sex Tourism: Can veer into sexual abuse if a foreign pervert travels to another country with the intention of finding young, underage prostitutes to spend time with.
* Sextra Credit: A student and a teacher do it to up the student's grades.
* Sextra Credit: A student bribes their teacher into improving their grade by having sex with them.
* sexual assault trial. Given that the assault occurred during the '90s, it could not be charged in of itself, though it was used to establish a pattern for the charge of predatory sexual assault. After the jury deliberated for several days, they ultimately decided to acquit Weinstein of such charges, in favor of convicting him of lesser offenses.
* "Sexual" by Amber seems to be about something like this: a girl is
* Sexual Extortion: Disallowing something from another person until they consent to sex.
* Sexual Extortion— Withholding something from a target until they agree to sex.
* Sexual Harassment Panda" , Johhny Cochran implores the jury to "look at the silly monkey" during his closing argument. The jury (minus the one whose head explodes) rule in favor of his client.
* "Sexual Harassment Panda" played Stan's trial for sexually harassing Cartman in this fashion (it was probably meant as a commentary on a real-life case of a grade-schooler being charged with sexual harassment for kissing a girl in his class).
* Sexuality and Perversion: Spotted hyenas were originally believed to be
* Sexualization: The related ideas that sex is the sum total of queer people's identities, and that all they think about and/or do involves sex.
* Sexual Karma: Good people will be rewarded with sex and bad people will be punished with rape.
* Sexual Karma: Your actions affect your sex life (for example, doing a good deed will result in you getting laid with an attractive member of the gender you're attracted to).
* sexually assault Asuna towards Asuna and is ecstatic when Asuna attempts to reassure Kirito, saying nothing Sugou does will really hurt her.
* sexually attracted to her... and let's not even start on the fact that Uvanov is a white man and Zilda is a black woman...
* sexually frustrated, masturbating is portrayed as a shameful last resort for losers who can't get laid. Except for those depicting doing it as one part of a sexual encounter itself, of course.
* sexual-magnetism virus (via in-vitro fertilization), which probably trumps any genetic relationship concerns.
* Sexual Predators are killers who lure victims to their death with promises of sex or intimacy, or simply chatting the victim up. May drug their victims to make it easier. Usually Lust killers, but other motives are suspected in certain cases.
* Sexual Sadists are lust killers who torture their victims before killing them;

the torture is usually more important than the actual murder. The torture may be psychological and can last for a matter of seconds or minutes, or it can last for hours or days, depending on the offender.
* sexual tension between Lelouch and Kallen. That also came to a halt when Lelouch willingly pushed her away so she wouldn't get involved in his final plan.
* sexual tension between the two, it'll almost definitely be that couple.
* sex up the widow upon hallucinating her scantily clad and wearing a "Pigs Welcome" sign. After he apologizes to everyone and runs off, Bernice fears there's something wrong with him, whereupon Duckman says, "Seemed perfectly normal to me."
* Sex Warrior Pudding, which is even more confusing, though less frightening. On the other hand, it becomes more understandable considering that "Pudding" here is a name.
* sex with children, and saying that while they believe in free speech, he should go fuck himself.
* Sex with the Ex: A character has sex with their ex-significant other.
* Sex with the Ex: In cases where one or both exes have new relationships but still sleep together.
* Sex with the Ex: Two people who are no longer a couple but still have sex.
* Sex worker rights organizations resent the view that they are all victims who need to be rescued, feeling this actually makes things worse for them in a lot of cases.
* Sex workers (escorts, strippers, and porn stars) often get breast augmentation because it's been proven that large-breasted women make more money in that line of work.
* sexy assassin wearing revealing, provocative leather outfits, and is a whip-toting combatant.
* Sexy Beast in London. Things get messy, forcing Gal to go to London to do the job against his wishes. In the end, the chief London gangster finds out what happened in Spain and banishes Gal from London as punishment. Gal can now return to Spain and be left alone, which is what he wanted all along.
* Sexy Beast, the main character has a nightmare that a giant rabbit with a gun is coming to kill him.
* Sexy Beast, though the main character spends most of his energies trying to avoid participation in the caper.
* Sexy Beast, when Sheriff Thompson and Liv Baker have to interview a stoner kid at the school, Thompson suggests that they play good cop / bad cop but then tells Baker to "stand guard" outside. He then enters the classroom and plays both roles himself in a bizarrely amusing sequence that ends with Thompson telling Baker that he couldn't break the kid and that the kid could work for the CIA.
* Sexy, beautiful male and female singers date back to the earliest days. The De Rezske brothers were both considered extremely attractive
* Sexy Candy Striper" Halloween costumes are still marketed to adults, right alongside the "Sexy Nurse," "Sexy Fireman," and "Sexy Ladybug" costumes.
* Sexy Cat Person: Characters who are anthropomorphic cats, cat/human hybrids, or simply have a cat theme, will often be very sexy.
* Sexy Cat Person goddess associated with love and fertility, is usually depicted with the head of a cat (a lioness in earlier depictions, a housecat starting around the Late Period).
* Sexy Chat Win. Ironically, he himself misspells the word "sentence" while correcting the other person's grammar.
* Sexy Chick/Bitch is one of the better examples, where the singer explicitly states "I'm trying to find the words to describe this girl without being disrespectful."
* Sexy Coat Flashing: Someone flirts by revealing that they're wearing nothing (or, if she's a woman, sometimes a bra) underneath their coat.
* Sexy CPR way to allegedly teach CPR. Her technique isn't so bad, but still.
* Sexy Dimorphism: Female members of fantasy races will be sexy by human standards.
* Sexy Dimorphism: In reality, a non-human species most likely would not inexplicably have the female sex appear near-identical to attractive human women,

despite the other sex being monstrous.
* Sexy Dimorphism, in which the female members of a nonhuman species are much more attractive/less monstrous, I.E. more human looking, than the males;
* Sexy Discretion Shot: Believe it or not, some romance novels actually skim over the sex (if sex is included at all).
* Sexy Discretion Shot is definitely "they did", but we still don't get to see it.
* Sexy Discretion Shot's "heavenly" sex with Grace, we cut to him lying in bed in the morning, with mattress cover on the floor, the mattress itself dislodged, the pillows stuffed down the back, and the duvet sloppily placed to cover Bruce's groin.
* Sexy Discretion Shot: The scene cuts away when two characters are about to have sex.
* Sexy Discretion Shot: Two characters have sex, but you don't see it happen.
* Sexy Figure Gesture: One character describes the sexiness of another by using their hands.
* Sexy Jesters who may belong to a clown species in the hopes that he won't destroy their planet.
* Sexy Juliette The Huntress debuted at age 15 and was considered one of the better wrestlers of the Caribbean before she turned sixteen, earning a contract with the International Wrestling Association and program with Amazona, a rookie of 17 at the time who was getting over surprisingly quickly.
* Sexy Little Things include a gigantic woman bursting through a wall, her head almost as tall as the wall itself.
* Sexy Losers about the tragic love life of the letters F, A and P. To quote: Y?
* Sexy Losers. According to his blog, the author was deeply offended to discover this entry, and promises not to do it again. But incest and necrophilia are still A-okay!
* Sexy Losers a few times, as when a character who appeared to have semen on her face turned out to have just eaten a vanilla popsicle. (Yes, this strip is NSFW.)
* Sexy Losers, again by the nature of the beast. (Mike's still a pervert. He's just not interested in sex with anyone but himself.)
* Sexy Losers... and it breaks inside her. She then doesn't have the heart to clean out the ashes.
* Sexy Losers had an entire storyline, "Mike's Left Hand", where the title character was a shameless, guiltless chronic masturbator. He even wrote books and taught classes on how to masturbate. His sister was later shown to be exactly the same way. Mike's roommate, unable to avoid him, steadily went insane (though he eventually recovered).
* Sexy Losers has a blind girlfriend. It's generally played for laughs, as he met her while helping the blind because they wouldn't realize that he had no pants on and was constantly masturbating around them.
* Sexy Losers into being a fan of zombies, amputees, and flesh wounds. Other characters of the webcomic apply too.
* Sexy Losers involved Shiunji, a necrophiliac, a corpse whose head fell off, and what he did to its neck. The comic's subtitle read "I am certain that at some point in the future, I will be prosecuted for this comic in a court of law."
* Sexy Losers, Mark and (chronic masturbator) Mike have this early exchange:
* Sexy Losers, Mike and his sister Michelle are both completely unfazed by anyone walking in on them in the act. The humour comes from the reaction of Mike's housemate Mark.
* Sexy Losers. She's an animated corpse; the eyepatch covers the eye she accidentally shot herself through (she was toweling her hair and blindly picked up what she thought was her hairdryer; unfortunately, she kept her gun next to her hairdryer for some reason...).
* Sexy Losers. To quote the article "It was the highest scoring entry on the List of Potentially Offensive Webcomics, having been awarded six "toilets" out of a possible five (not a typo)."
* Sexy Losers version of that same story with a father and daughter, and all of a sudden it went from funny to seriously creepy.

* Sexy not to feel like you are ready for sex. Everyone develops at a different pace. (As of "The First Time" he's gotten over it.)
* Sexy Parodius. However, the most blatant example was Kaori, the "final boss" of the game: an absolutely titanic, completely naked woman, covered only by a bedsheet, huge enough to completely crush the main villain of the game under her butt by accident.
* Sexy Priest Melissandre). Their youngest brother Renly also had Margaery and Brienne as the only female members during his campaign for the throne (Catelyn doesn't count since she's there to negotiate an alliance).
* Sexy Santa Dress playing a love-starved Mrs. Claus who takes out her sexual aggression on Weekend Update anchor Dennis Miller while singing "Santa, Please Skip Christmas This Year." Miller's response after the performance: "Suddenly, I'm sitting here with a candy cane."
* Sexy Scandinavian stereotype and every girl on the team was blonde, busty, and beautiful. In reality, the team was made up entirely of American models wearing platinum blonde wigs.
* Sexy Secretary and to avoid the complications that come with divorce:
* Sexy Secretary out to coffee? Or do you just shoot the occasional glance and go to your meeting? Where does it go from there? Do they say yes? How do you do in the meeting?
* Sexy Secretary vibe, although she's actually an "entertainment manager".
* Sexy Shirt Switch: A person wears their lover's shirt to indicate that they've had sex.
* Sexy Silhouette scene in each one tends to be her key attractant. The Warner Siblings themselves are a more minor example.
* Sexy Silhouette: Using a curvaceous woman's silhouette to imply nudity.
* Sexy Soaked Shirt has a central scene in which the twin daughters of Messer Neri degli Uberti, dressed demurely in white dresses, go fully clothed into their father's fishing pool to catch fish for a banquet her father is hosting for the King of Naples and his court. The king and his courtiers were charmed by the girls when they walked in from the house, but absolutely captivated once they emerged from the water:
* Sexy Star may have one of the best reasons of anyone on this page for having X-Pac Heat with the fans, due to the
* Sexy Stewardess on his flights, and having to work with only gays, grannies, and overweight folks. Unknowingly, he had turned on the mike, broadcasting to everyone in Texas airspace, but didn't even stop when an air traffic controller tried to butt in.
* Sexy Surfacing Shot: A character surfacing or climbing out from a body of water being played for Fanservice.
* sexy surprise in his bedroom just as he arrives home with another woman he'd been set up with. Awkwardness ensues, and eventually Monica figures out it can't work.
* Sexy to promote the Celibacy Club, under the mistaken belief that it was about having dessert in the middle of the day.
* Sexy Whatever Outfit: A sexy Halloween costume modeled on something that isn't sexy on its own.
* Sexy Words in order to craft the ultimate pick-up line. It was "Hi, I'm Mel Gibson. Did a dingo dog go by here with my shirt?"
* Seyfert galaxies are the least luminous type, but that's very relative; they're defined as galaxies with AGNs where the rest of the galaxy is still detectable - the nucleus is still emitting energy on the level of entire galaxies. Some of these are close enough to be the strongest radio sources in Earth's sky.
* Seymour and Audrey being eaten, and Audrey II sprouts ending up sold en masse. It doesn't turn out well.
* Seymour, an ultra-religious character who goes around chiding people for not being pious enough. God
* Seymour can't come back from the Farplane afterward, and the targets in question are usually rather hostile about the prospect.
* Seymour Cray was a star employee of Control Data Corporation during the

mainframe computer era - until management turned down his proposal for a next-generation super-computer. Cray quit and formed his namesake super-computer company, which Control Data - at the time one of '
* Seymour goals. He definitely turns into a monster, it just so happens that he kinda already was one.
* Seymour Goes to Hollywood forbade placing Dizzy in the modern world.
* Seymour Goes to Hollywood games. So with 12 weeks to go until release, the character was given a more distinctive design, thus giving birth to Seymour.
* Seymour), he's not really compelling villain material. Enter Seymour, with the most lines and screen presence of all the antagonistic cast, engaged in a plan whose effects drive a great deal of the story.
* Seymour Simmons moves through a variety of jobs over the course of the
* Seymour Skinner is this trope personified. When Bart forgets his field trip permission slip, he has Bart lick envelopes all day and suggests to make a game out of it by counting how many he can lick in an hour and then try to beat that record. It's so dull that it makes
* Seymour the Fractal Cat) by a sentient computer network, all as part of their somewhat quirky plan for world domination.
* Seymour, when defeated for the final time, could only utter a low-pitched "No..." upon defeat.
* SF&F artists and illustrators love the concept. This may reflect the contents of the books they illustrate
* SF Debris, although what he mainly seems to be caustic towards is poor writing and idiocy. When he reviews something that is actually good, Chuck tends to lapse into impassioned monologues about why the work is so good. Even in otherwise terrible works, he takes time aside to point out things that are done well.
* SF Debris and bans the crew from ever speaking of her again (to resolve an issue with the Doctor's programming).
* SF Debris, and probably God knows how-many-other systems critical to safely launching a ship 70'000 lightyears.
* SFDebris as the paranoia of a Vulcan-hating conspiracy nut. Archer's dislike of Vulcans on his show was well-known, as it was Vulcans who denied his late father the privilege of seeing his revolutionary warp engine in action. But Chuck's parody literally wears tinfoil to protect his brain from mind-melds.
* SF Debris: "But I'm no [career]/not a [career], I'm just a viewer with an opinion."
* SF Debris, but still doesn't shy away from how dangerous such an action was.
* SF Debris, discussing the changes in the Baron's character from the book:
* SF Debris episode "Body and Soul" a 6, he says he knows he's pissing off a lot of people right now, but with comedy episodes the one true criteria is if you find them funny, and he just doesn't, even with Jeri Ryan's great performance as the Doctor controlling Seven's body.
* SF Debris episode "Elogim", mainly to warn viewers that he's going to be using a lot of profanity to describe how terrible the episode is.
* SF Debris episode, "Flashback". "What kind of cook thinks that increased heat equals less cooking time? A bad one!"
* SF Debris episode "In the Pale Moonlight" by playing the clip of Senator Vreenak saying "It's a FAAAAAAAAAKE!", then saying "There, you got that out of your system?"
* SF Debris episodes before branching out into other SF/Fantasy works.
* SF Debris episode where T'Pol says Archer lost a Klingon prisoner and Archer responds that he didn't lose him, he was taken, prompts him to comment thusly:
* SF Debris. For example, his reaction to Neelix's transplant incompatibility in "Phage":
* SF Debris has a simple rule: Only she gets to make the lives of her crew a living hell. Anyone else trying to get in on it is in serious trouble, except possibly Neelix and that's because she gets to torment him too.
* SF Debris has called the show a "political Rorschach test" thanks to him consistently getting mail from people of all political leanings accusing him of

making propaganda for the other side, usually about the same episodes.
* SF Debris, he correctly uses it in place of the Latin Z when calling Wesley a "spaz — S, P, A, three, spaz!".
* SF Debris. Her exploits have included breeding hives of flying tarantulas with a taste for eyeballs, building an emotion bomb, creating a "rape gorilla", rigging the consoles to electrify their users for her own amusement, sending redshirts to their deaths because they serve Mexican food at the funerals, and the creation of something only known as "Kes-kotay".
* SF Debris, he says he literally facepalmed when Deanna Troi counselled Reginald Barkley on his phobia.
* SF Debris, including sexually-charged references to katanas, cherry blossoms, several foodstuffs and Toyota.
* SF Debris. In the first two minutes he parodies this, by stating that those who will be offended that he tears this episode a new one are not the intended audience—mocking writer Matthew Graham's shrugging off the criticism of the episode itself. He then discusses the flaws of this attempted deflection of criticism, and points out that his own children (the purported target audience, as opposed to traditional Whovians) didn't like the episode, finding it boring.
* SF Debris is another online personality who doesn't show his face, even after a decade of reviewing. That said, he is active on Twitter and does interact with others.
* SF Debris is that, following Starfleet adopting a more military stance in the later days of the shows, the lower decks of the ships are filled with scared and angry scientists who joined up in more science and exploration focused times to study alien botany or similar, only to find themselves serving on what are essentially warships.
* SF Debris of Janeway by portraying her as a demented supervillain who views her crew as entertainment dispensers—even inventing a holiday, "Condescending Bitch Day", which happens every day and involves selecting someone to torment—and is planning to take over the entire Alpha Quadrant when she gets back. Chuck Sonnenberg has even joked that Janeway is his favourite villain.
* SF Debris often points out violations, typically phrasing it as "All I ask is that you be consistent with your nonsense."
* SFDebris once Starfleet re-militarizes during TNG. They're trained to measure soil toxicity, not kick-box with Borg.
* SF Debris, particularly in terms of the dividing line between homage and ripoff.
* SF Debris pilot episode when the FBI section chief asks how a case involving the paranormal would be prosecuted.
* SF Debris's attempt at a progressive bisexual character has resulted on the player being sent into the Deep Roads in the company of Harvey Weinstein.
* SF Debris: take a shot for every severed head and for every naked girl. One head fallen off was presented as this trope: "Here's a souvenir for some lucky fan!"
* SF Debris! That's like trying to wrestle a greased pig, only without the dignity."
* SF Debris, the "greatest movie ever made" which he expects will win him several Oscars.
* SF Debris the guilty, the latter in particular being protected from getting more than they deserve. Otherwise, people would be saying that Willis' death from a drug overdose was well-deserved because he cheated to get his scholarship, or (by Wonder Woman's example), whoever Willis hedged out with his use of performance-enhancing drugs should break into the hospital and beat him up for cheating.
* SF Debris", there's a shot of one of the space hippies from "The Way To Eden".
* SF Debris: the review of "The Defector" includes a quote from Shakespeare that has been edited to include the phrase "pimp hand".
* SF Debris to be a sacred masterpiece, who promptly started making accusations about the level of education that he had (or hadn't) received.
* SF Debris, to praising the episode "Human Error" for being less awful than "Unimatrix Zero".
* SF Debris tropes and characters to their extremes. These range from running gags

in fandom, such as Janeway's coffee obsession or Troi's bad piloting skills, to total re-imaginings such as:
* SF Debris was a part of her plan to take over the entire Alpha Quadrant.
* SF Debris, which made her statement to Lorca seem rather hypocritical to viewers versed in international law.
* SF Debris without doing this. Though he tries. Oh God does he try. ("Parturition")
* SF Debris, with people shot point-blank center-of-mass and yet are fine.
* Sfeer Theory is a subdued version of this, stemming from the society he lives in and his personality. Ironically, since he's so quiet, his campier mannerisms are even more noticeable.
* SF/Fantasy writer Lucius Shepard has a series of stories about people living in towns on and around the body of a gigantic dragon — who isn't
* 's final words to Raven (a natural death at the age of 211, with her living three centuries more) are "How do you keep a beautiful half-demon in suspense"?
* SFV punch to the back like it’s nothing. The shock of it is enough to snap Ryu out of the murderous intent.
* SFW: Safe For Work. Generally used to inform the web user who may be wary about clicking on a link that it is safe.
* SFX on the cover and having the 'F' obscured led to that issue being put with the "gay interest" magazines in his local newsagents.
* SG-11 seem to be hit the worst by this, having their entire team wiped out at least
* SG-1 also had the Asgard use a time-dilation field as a trap for the Replicators, drawing them all to one planet with the intention of freezing time there until they could find a more permanent solution. Unfortunately in the time before the device activated the Reps were able to reverse it's operation, speeding up time massively inside the field and giving them subjective centuries to
* SG-1 began with people on other planets speaking different languages, mostly based on old Earth cultures. By the second episode they realized it wouldn't work with only one main character (Jackson) able to speak to the people, so it was changed.
* SG-1. Being made up of a sort of alien lego, they aren't particularly chitinous or drooling, but they are as implacable and tenacious as anything else on this page. Their default form looks like a large spider. Later in the series they develop humanoid variants, but still use insectoid forms for most combat and work.
* SG-1... but if Daniel says he sees something no-one else can, he must be crazy! It didn't help Daniel thought he was going crazy, too.
* SG-1, considering that in the U.S. Military, all aerospace operations (presumably including space fleets) are operated by the Air Force.
* SG-1, Earth had picked up a few dozen from uninhabited worlds to make a bridge between galaxies, then just left them there when the project fell through. They took one as a replacement when their gate blew up.
* SG-1-ed Prior uses his power to cure it (and is immediately killed by the Ori for his treachery).
* SG-1 encountered a planet where the population was inside a greenhouse-like building. They were all hooked up to a Matrix-like simulation to preserve them indefinitely while their planet repaired itself from an extreme industrial disaster. The computer/caretaker that was also in charge of helping repair and maintain the outside environment kept telling them that it wasn't safe to leave yet, as it believed that they would simply destroy the environment yet again if set loose in the real world.
* SG-1 encounters a world where specialist children called "Urrone" learn a subject for ten years, and then "graduate", sharing their knowledge with the rest of their people. That's pretty much their whole purpose in society
* SG-1 example occurs in "Citizen Joe" in which Joe Spencer seems incapable of telling a simple joke.
* SG-1 gate, the chevrons light up, and the gate can be dialed like a rotary phone.
* SG-1 have also shown some Goa'uld posing as Greek Titans and Oriental gods, as

well as Mayan crystal skulls as alien communication devices, and Aztec having their own alien descendants and ancestors. For example, the Mesoamerican deity Quetzalcoatl is an
* SG-1 is a cover-up for military-exercise-nearly-turned-WWIII. They also lie that governments have been breaching the disarmament of space. To normal journalists, governments trying to cover up major screw up by alien invasion sounds more possible than the other way around.
* SG-1 is actually able to exploit this aversion to their (mild) advantage. There's a swarm of replicators, but they only have to destroy one of them- only one replicator is made from futuristic space-metal, and if they can kill it the others will just rust away. If it gets away, though...
* SG-1 one of the main characters, so he gets some character development and Dr. Kavanagh is introduced to take over the "recurring jerk scientist" role.
* SG-1 said in an interview. When asked if he could play any other role in the show, who would it be, he replied, "I'd be my own damn role. I have the best chair on the set."
* SG-1 talking about Sam. "I care about her... a lot more than I'm supposed to."
* SG-1 themselves are seen as the Higher Tech Species at times, especially when they came across the
* SG-1 to an enemy ship, with an absolutely incredulous reaction from the other side; it probably didn't work because a "Great and Powerful" Goa'uld wouldn't be flying around in a transport ship.
* SG-1 would hinge on some pop culture reference to inevitably be lost on alien team members Teal'c, Vala, Ronon, and Teyla. But subverted toward the end of the series as the aliens — especially Teal'c — became more familiar with Earth culture.
* Sganarelle has trouble presenting a persuasive argument several times over the course of Moliere's
* SGC Generals spend much of their screen time at paper-laden desks. Colonel O'Neill achieves promotion to brigadier general so his actor Richard Dean Anderson could spend less time on camera and more with his family.
* Sgt. Avery Johnson is at least almost 70-years-old in the main trilogy, and has survived about half-a-century's worth of constant frontline combat fighting Insurrectionists, Covenant, and Flood.
* Sgt. Baker (played by Kenneth Washington) was a better fit when he took Kinchloe's place, having previously been the one black guy in the mob of line-less background prisoners. However, it is still notable that most of Kinchloe's spotlight episodes are the only ones to feature a black
* Sgt Bilko Bilko is awakened by Reveille and starts ordering his men to battle stations, then, "What's that music?"
* Sgt Bilko has a note at the end of the film which gratefully acknowledges the total lack of cooperation from the Army.
* Sgt Bilko has done this so many times that his girlfriend's wedding dress is getting worn out.
* Sgt. Bilko, so firing the gun launched the tank uncontrollably in the opposite direction. They faked it with some fireworks.
* Sgt Bilko's title character utters a variation of the Trope Name upon learning the new recruit to his motorpool division actually is a trained mechanic. "A real live wrench-turner in the motorpool? It's so crazy it just might work!"
* Sgt. Bilko this stock question, to which Bilko responds "'Permission?!' What are we, in Russia? Say anything you want." Even so, Wally continues to ask permission throughout the film.
* Sgt. Bilko, we get Bilko sitting behind his desk in the motor pool, in front of a huge no smoking sign. "We have rules!" (lights match on sign) "Rules and regulations!" (lights cigar with match, takes puff).
* Sgt. Bothari, who's taken into the Vorkosigan household as a sworn retainer after being discharged from the military on grounds of being totally bugfrak insane; he's large, paranoid-schizophrenic, sexually odd,
* Sgt. Craig Pittman was a wrestling soldier. At one point, another soldier that

he left for dead in Vietnam came back for revenge under the name Cobra.
* Sgt. Detritus says he has his badge carved into his arm (presumably to highlight his commitment to the force and not as a rule for trolls) and anyone is welcome to try and take it off him if they like.
* Sgt. Doakes discussed this with Dexter, telling him that lots of cops deal with the stress of the job with either booze or drugs and that lots of them became addicts.
* Sgt. Frog: About half the time, when it's not parodied to hell and back.
* Sgt. Frog Abridged, they simply left her dead. However Narusasu returned to the US in June 2013, so Momoka once again has the chance to return.
* Sgt. Frog, Alisa Southerncross does this to two pursuers by turning her headband (actually a part of her amorphous alien adoptive father) into a cluster of snakes (a clear reference to the Gorgon, which another character recognizes).
* Sgt. Frog, and an episode of the flash series features a Space Zoo with various Space creatures, and a dangerous Space Cerberus.
* Sgt. Frog and turning it into a tourist trap to help fund the invasion. He tests out his scheme on Fuyuki and Momoka, who happen to be in the same building on a ghost-hunting expedition, by throwing a set of seven (actually five) "school haunting" cliches at them.
* Sgt. Frogangale, or Gungal. As with Dangale in the show, Gungal models are actually sought after collector's items because they're so rare.
* Sgt. Frog anime (or at least the Funimation dub) had one episode titled "Blood Violence Death Kill! Rated R."
* Sgt. Frog anime updated the manga's setting from 1999 to 2004. And the English dub of the anime updated it from 2004 to 2009. Notably, this changes Angol Mois' time for waking up from right on schedule to five to ten years late.
* Sgt. Frog: Anything past the touching Season 1 finale can be viewed as this, and makes it apparent that Keroro will never have any form of happiness.
* Sgt. Frog, apparently unaware that she's still wearing them and they've just been pushed up onto her forehead.
* Sgt. Frog: A recurring plot element involves the Keronians creating video games that are a bit TOO interactive.
* Sgt. Frog attempt to create an anime movie. The characters were little better than doodles, nothing moves and the voice acting has nothing to sync to. Only the (pirated) backgrounds looks good.
* Sgt. Frog. A yukata-clad ghost lives in the Hinata family's basement, Fuyuki is a big fan of the occult, and episodes of the manga and anime center around spooky story contests among the main characters and their friends.
* Sgt. Frog, because they refer to Earth as "Pekopon". In the manga it was "Pokopen", a rather nasty Japanese word for the Chinese, which was changed for obvious reasons.
* Sgt. Frog. Both of them seek love from someone else but fail, and both have split personalities.
* Sgt. Frog by what eventually turns out to be a ghost, she runs into Fuyuki's room without any clothes. Fuyuki yells at her to put some clothes on and calm down.
* Sgt. Frog captions), in early episodes it was not uncommon for Mister Caption to start snarking even when there was no text on-screen at all.
* Sgt. Frog characters like Momoka sometimes come up) flying across or spinning on the screen. It changes sometimes according to episode, such as when Taruru appeared, his symbol was used in one of these wipes.
* Sgt. Frog close with his sergeant Keroro, and he'll usually drop the act and fly into a rage.
* Sgt. Frog drain all information from the internet and single-handedly take over earth, but he seems more interested in causing mischief and making softcore porn.
* Sgt. Frog drops him down a trapdoor into a dungeon for sticking Keroro and Angol Moa in the same cell.
* Sgt. Frog episode 9, Fuyuki theorizes that the reason Mutsumi, one of Natsumi's classmates, wants to come over is that he's secretly a MIB and wants to capture the aliens (Keroro and friends).

* Sgt. Frog: Especially in the English dub, but there's hardly much of one in the original, either.
* Sgt. Frog explanation, but when told by Natsumi to "use words real people understand," he gets down to the point: if they don't destroy all the clones, then the Kero Ball will overload and all the Keroros, including the original, will disappear.
* Sgt. Frog features Giroro and his brother Garuru butting heads with a giant killer space yam.
* Sgt. Frog features the Hinata house going into Lockdown...because Keroro has a cavity. A cavity caused by tiny aliens, but still...
* Sgt. Frog fell for Natsumi after she navigated his booby traps, dodged his missile fire, and smacked him out the window with her school bag. He declares his love just before he loses consciousness.
* Sgt. Frog follows the journey of a lone grain of rice from rice paddy to rice bowl. The rice grain is overjoyed to finally fulfill its destiny as it is picked up by the chopsticks… only to be dropped and forgotten. By an unlucky chain of events, the rice grain is stuck outside and can only sob over its wasted existence. Until Giroro's cat spots it and eats it. The rice grain happily ascends into heaven as it is eaten.
* Sgt. Frog frequently ran ahead of the manga (particularly in more recent years) a number of episodes and plots are present in the former that are not in the latter, such Karara's repeated appearances to marry one of the members of the platoon and the timer counting down to the invasion in season 3.
* Sgt. Frog, Fuyuki and Natsumi learn that the reason their mom was able to get their house for such a great price was because the spare room in the basement (which in this episode becomes Sergeant Keroro's quarters) is haunted by a mysterious ghost girl. This fact doesn't bother Keroro, mainly because he doesn't know about her.
* Sgt. Frog, Fuyuki reads a New Year's card addressed to Aki saying "May your panties be of snakeskin," and regrets doing so.
* Sgt. Frog: Garuru's sniper rifle is at least 5 times larger than himself.
* Sgt. Frog had a Halloween episode where a mysterious girl who had apparently been adopted by a demon-like alien kidnapped Fuyuki.
* Sgt. Frog had an episode where Keroro plots to take over the world at Christmas while everyone's guard is down, but everyone drops out one by one. Eventually he goes to help Kogoro by dressing up as Santa and giving away Christmas presents (so as to get onto Santa's good list and to get a present for Christmas).
* Sgt. Frog had "Recycle and don't pollute the ocean, or the creatures that live in it will eat you alive."
* Sgt. Frog has a joke about this in a flashback to when Koyuki first met Dororo; Koyuki's dog Zeroyasha found him caught in a bear trap and barked to get her attention. She was momentarily concerned it was "another kid stuck in a well."
* Sgt. Frog has a long straight scar diagonally over his left eye. His eye is perfectly fine though.
* Sgt. Frog has Giroro and his elder brother Garuru which is the most popular Giroro-oriented ship aside from Gironatsu and Girokuru for the Japanese fandom especially. This is most likely due to the lengths Garuru goes to ensure Giroro remains on his mission as well as Giroro's admiration for him/frantic, embarrassed reactions when he's near. The Hinata family is shipped together sometimes as well.
* Sgt. Frog has the home base of the Keroro Platoon which is built under the Hinata household, much to the chagrin of Natsumi and Fuyuki.
* Sgt. Frog has the Keronians' "mixed life-form space okonomiyaki". We never find out exactly what goes into it, but it has an alarming tendency to try and escape the frying pan and/or attack the diner.
* Sgt. Frog): "How dare you compare me to that overeating ectoplasmic idiot?!" Evidently, Pekopon (Earth) is an entertainment Mecca and produces most of the galaxy's highest rated TV shows.
* Sgt. Frog implying that as kids, Keroro made a prank long-distance call on Dororo's family's phone line that left them with a "frighteningly high" phone bill.

* Sgt. Frog: In an early episode, Momoko does this to Fuyuki repeatedly in failed attempts to confess her love to him.
* Sgt. Frog, in any gags that involve Angol Mois assuming her true form and her Armageddon powers.
* Sgt. Frog Incidentally, Keroro usually appears disguised as a woman.
* Sgt. Frog including Keroro, Tamama, Giroro, Kululu, Dororo and every other that shows up over the course of the series. There's also pop-star alien girl Sumumo who isn't Keronian but might as well be.
* Sgt. Frog: In episode 12-B of the English dub, Kululu accidentally calls Giroro "Giro" — which was his name in the preliminary dub (of that same episode no less)
* Sgt. Frog: In Episode 197, Keroro gets a virus called the Space Drill, that causes him to sprout a drill in the middle of his forehead and dig holes. The whole episode becomes a lot more awkward when it is revealed the virus is spread by anally drilling unsuspecting victims.
* Sgt. Frog. In one chapter of the manga, Keroro's penalty for submitting a late invasion progress report is being ordered to eat a bowl of shaved ice with his ears.
* Sgt. Frog in order to get an excuse to talk to him. A flashback chapter in the manga shows this is, in fact, how Fuyuki and Momoka originally met.
* Sgt. Frog: In several later episodes, Koyuki just disappears. When she doesn't have a speaking role, she often isn't even drawn among the students in Natsumi's class.
* Sgt. Frog in the English dub, where Keroro tells Mutsumi that he's in charge of "non-copyright-infringing birthday song composition".
* Sgt. Frog: In the episode where the cast enters a comedy contest, Keroro wants Natsumi to enter it for him to win some knockoff Gunpla. In his usual visualized fantasy he imagines the Gunpla finally being his, only to have it stomped under Natsumi's foot.
* Sgt. Frog: In the manga when one of Tamama's attempts to discredit Mois not only ends in failure but results in Mois trying to console him without knowing what she is consoling him about.
* Sgt. Frog in the third movie - both items are lost at different points, but recovered from the wreckage during the end credits.
* Sgt. Frog introduced the Flash Spoon, a device that could make its user grow to enormous size. In the first half of episode 57, Keroro uses it to one-up Viper the Elder when the villain grows to giant size in a last-ditch effort at beating the Keroro Platoon. In the second half of the episode, a trip to the Nishizawa Group's private island (while waiting for the effects of the Flash Spoon on Keroro to wear off) results in a cuttlefish, a crab, and a turtle being turned into giant monsters by the spoon, while the rest of the cast also grows in an effort to stop them (except Dororo, who doesn't get his hands on the Flash Spoon until the batteries have run out).
* Sgt. Frog invokes and parodies this during Kogoro's transformation sequence. Tamama argues that it's the perfect time to attack him, but Keroro convinces him to not do so, telling him that it would be rude.
* Sgt. Frog, is a Gundam otaku. It's one of the reasons why he doesn't blow up the Earth when he gets the oppurtunity to do so.
* Sgt. Frog is an amphibious battle-suit based on Keronian physiology, and in another, they mistake a bowling alley for a military training center.
* Sgt. Frog is caught by a snare in the first episode, set by the titular character. She's rescued by her brother a few moments later.
* Sgt. Frog. It also happens to Keroro in episode 3 when he uses the "Space Plant Dreaming Alpha" to generate some pleasing hallucinations. The latter is lampshaded in the dub, when Tamama remarks that one of the side effects of the plant is "pigment loss".
* Sgt. Frog: It's hinted in one arc of the manga (the World's Tiniest Invasion: Lost Episode) that humans have an absurd level of mental potential, and that Keroro's contact with them has put his own potential far beyond that of the average

Keroronian, which still leaves him far below a human's level.
* Sgt. Frog: It's used a lot in the anime for background Keronians, which generally share a few sets of generic designs (eyes with small irises, star emblems, hats similar to Keroro's or Kururu's, headphones included.
* Sgt. Frog: Katoyama Kiko, a human mecha designer who joined the Keron Army for a while, and also Mois' friends, girls with similar missions to judge and destroy planets, like Maya, Luz, and New, who appear in one story of the last season of the original anime, were all created by Mine Yoshizaki but have made no appearances in the manga at all, not even in small cameos.
* Sgt. Frog: Keronians like humidity, but too much makes them... drunk?
* Sgt. Frog. Keroro and other keronians/aliens (like mois) speak perfect Japanese/English. When asked about this by Fuyuki he counters by saying that Japanese/English sounds like Keronian.
* Sgt. Frog, Keroro attempts to make a traditional New Year's soup by combining a bunch of different recipes, but the resulting concoction turns Angol Mois into a smiling maniac who forces the soup down everyone else's throats, even when it proves nearly-lethal to Keronians.
* Sgt. Frog. Keroro, drunk on humidity, orders the destruction of all Pekoponians:
* Sgt. Frog, Keroro falls into icy water and starts to drown. In a display of friendship, Fuyuki forfeits a match to jump in and save him. However, previous episodes have made it plain that Fuyuki can't swim, and when Keroro points this out, he starts to flounder, even shouting out the trope's name verbatim.
* Sgt. Frog, Keroro leaves a robotic copy of himself to head the invasion so he can go to the amusement park and see the Java Risers live show. After discovering the robot, Giroro presses Tamama to tell him where Keroro went. Tamama replies by saying that he'll never tell them that Keroro's at the amusement park. Later in the episode, Tamama finds a candy house and assumes it's a gift from Keroro for keeping his secret. This adds on to an already-established gag of Tamama not being able to keep secrets.
* Sgt. Frog: Keroro's ceiling fan. Pretty much any episode heavily featuring Keroro's childhood will have said scenes completely in CGI, especially in later seasons. This also includes movie shorts.
* Sgt. Frog, Keroro sneaks into Fuyuki's room at night in order to steal the Kero Ball out of its hiding place in Fuyuki's desk drawer. He panics when he hears Fuyuki shout "Sergeant, don't do that!", but it turns out Fuyuki is just talking in his sleep. He follows it up with "The sponge cake comes first, then the telephone..." and goes back to sleep.
* Sgt. Frog, Keroro, Tamama, and Giroro play shiritori in the episode where they visit Grandma Hinata at her house in the country.
* Sgt. Frog, Kogoro keeps forgetting Dororo's name and guessing wrong. He thinks he's called "Terere" in the original and either "Domomo", "Dimimi", or "Dolo" in the dub.
* Sgt. Frog: Kululu, who gets inexplicably high pitched when he gets particularly excited about something (usually terrible or destructive), which actually makes him even creepier.
* Sgt. Frog manga was much closer to a PG-13 rating, but the anime was toned down to be more child-friendly. FUNimation's take on it might be trying to restore its original age rating to appeal to the manga's more diehard fans.
* Sgt. Frog mission is a completely different style of play from the others.
* Sgt. Frog more faithful to the Japanese script than Funimation's dub. As a result, there are a few script purists who prefer it. A few clips of the Animax dub can be found online, for those curious enough to sample it.
* Sgt. Frog movie has Keroro whipping out the Kero Ball to salvage an emergency, then hitting a button, only for a boxing glove to come out of it and right into his own face.
* Sgt. Frog, Ms. Furbottom loves Giroro, Giroro loves Natsumi, and Natsumi loves Ms. Furbottom's regular cat form.
* Sgt. Frog on herself, she transforms into one of two different forms: her manga human form has her appear with cat ears, while her anime human form gives her a

tail.
* Sgt. Frog - Only 78 episodes were dubbed before it was put on hiatus, probably due to the show's length being difficult to support on a home video exclusive release (however a preview for ep. 79 is still included, which means it could probably resume one day). The dub had already come out of an earlier hiatus at episode 51. FUNimation technically has the license to the first 104 episodes, but there's still no word on whether or not they will dub episodes 79-104. The Animax dub has over 100 episodes dubbed.
* Sgt. Frog only covered the first 78 episodes, barely 20% of the series. This is likely due to poor DVD sales.
* Sgt. Frog platoon's deep sea expedition takes a surprising turn when their submarine is surrounded by mysterious, unseen shapes that command them to leave. Keroro reaches for the intercom button, but accidentally launches the torpedoes instead and hits one of the entities dead-on. The whole crew understandably panics, especially when the sub's sensors reveal that the entity was completely unharmed.
* Sgt. Frog: Pointing out the fact that Keroro made a doomsday device in front of the Hinatas at a time like this isn't really helping your cause, Mirara.
* Sgt. Frog prop made of plastic and mounted under his chair... with a pretty powerful spring.
* Sgt. Frog, rival assassin Zoruru has some beef with Dororo, but Dororo doesn't remember him.
* Sgt. Frog: Sergeant Major Kururu has a mischievous streak a mile long, and seems more interested in amusing himself than completing the invasion of Earth. However, he's still a (technically senior) member of the Keroro Platoon and the group's "ideas" guy.
* Sgt. Frog: Several events in later episodes routinely reunite at least one member of each alien race shown in the series up to that point, although most only return as background cameos.
* Sgt. Frog's father causes quite a scramble, until he leaves much sooner than expected when the weather doesn't agree with him.
* Sgt. Frog's first season the eyecatch is Keroro holding a sign... with the word eyecatch in giant letters in the background. In season 2, he crashes into the camera while swinging.
* Sgt. Frog shown in America, but it's highly likely that most viewers never saw it.
* Sgt. Frog, some fans insist that all that hair is fake (because they're technically "frogs" and thus hairless).
* Sgt. Frog story.) In the English dub, it's explicitly referred to as the 'Keronian Purple Mercy Lotus-Eating Lotus'.
* Sgt. Frog suck my thumb!") and a reference to the infamous "Japanese golfer" joke ("What do you mean, it's the wrong hole?").
* Sgt. Frog take notice of how he hates the show, and is only doing the job due to being in debt from too much gambling.
* Sgt. Frog: Tamama has farts vastly more potent then a normal Keronian, which he is quite proud of, and uses them as an attack on a few occasions. He also can use them to increase his swimming speed.
* Sgt. Frog than frogs. Could be a result of stylized art (look at the humans in the series) rather than them not looking like frogs.
* Sgt. Frog. Thanks to a little accident with a growth ray, the poor girl ends up traumatized.
* Sgt. Frog that earned them Bandai as its merchandising arm. The KeroPla line of plastic models features Keronian characters and mecha all compatible with existing Gundam models.
* Sgt. Frog: The chapter that introduces Aki Hinata, Fuyuki and Natsumi's mother, features her effortlessly judo-throwing a guy who tries to grope her on the subway.
* Sgt. Frog: The dub of episode 18 has Koyuki attempting and failing to tell the joke.
* Sgt. Frog. The Keronians are somehow even sillier-looking when drawn in the style of Naoki Urasawa.

* Sgt. Frog, the Keronians test out their new security system on Momoka's mother Ouka, who wants to get her hands on Keroro for some reason. The first obstacle is a series of electronic locks on the mini-fridge that serves as the main entrance to the lair. What does Ouka do? Rip the door off its hinges.
* Sgt. Frog... then a button tears off her skirt as she's getting dressed. Cue Keroro discovering Natsumi doing aerobics in her room with the heater turned up.
* Sgt. Frog, then land wherever he liked (usually the Hinata house) whereupon his limbs, then the rest of him would emerge from it.
* Sgt. Frog, the other characters find Kululu's "Ku-ku-ku!" laugh annoying. Every time he laughs, the others know he's causing mischief.
* Sgt. Frog: The "segmented endings" variant. They aren't alternate takes, just more and more complete versions of the series. The show's 7th season aired in different timeslots, with different running times in different timeslots. In order to satisfy people who couldn't watch the longer version of the show, the last 3 episodes of the series all ended up being different types of ending stories.
* Sgt. Frog, the snowball fight between Giroro and Paul was at least one of these in the dub.
* Sgt. Frog. The 'stache is particularly touched upon in the English dub, but even in the original form, his badass status was apparent.
* Sgt. Frog: The successful invasion of Pekopon (i.e. earth) would pretty much end the series...
* Sgt. Frog They don't actually touch the food produced for some time, though.
* Sgt. Frog). This character goes on to appear onscreen several times, including one scene in the third movie where he's enthusiastically sketching Dark Keroro's flying fortress.
* Sgt. Frog this is parodied/lampshaded with the Mob alien race, who gather in large ominous crowds.
* Sgt. Frog this trope, for readers who hadn't understood the point of the story.
* Sgt. Frog, though, and he's so terrifying, the manga can't even show his face.
* Sgt. Frog to Keroro's father that the frogs have succeeded in their invasion of Earth... but they never get the chance, as he leaves right after he gets there.
* Sgt. Frog transformation and special-attack scenes, the costume, and a cute personality, but she's the Lord of Terror from the prophecies of Nostradamus who came to destroy the world with the "Lucifer Spear".
* Sgt. Frog, usually featuring every minor recurring character. It gets a bit cramped.
* Sgt. Frog: Watching a TV show in S1E7. It is a parody of several anime. When the hero "explodes with the power of love" to save his girlfriend, Keroro remarks offside "Interesting how his love for his GIRLFRIEND causes him to explode in a flaming rainbow..."
* Sgt. Frog when Giroro meets Natsumi for the second time, he gives her a baked sweet potato he just cooked up. It's apparently so delicious Natsumi decides not to kick him out of the Hinata's Back yard.
* Sgt. Frog, when the other characters are making dinner, Keroro and Tamama are told to go play video games, then to make sandcastles.
* Sgt. Frog, which has had several episodes in which characters play various sports against each other. These include a soccer episode, a swimming episode, a tennis episode, and an Olympic-style winter sports episode.
* Sgt. Frog, while the world is still frozen in time after a failed take over of Earth, Fuyuki and Keroro do this to Kogoro.
* Sgt. Frog who appears sporadically throughout the series. She turns out to be really a very nice person. Also, she kinda sucks at haunting.
* Sgt. Frog whose design was simply another classic monster with a frill added — Godzilla.
* Sgt. Frog, who's something of a genius in geography and the paranormal. Not Keroro, Fuyuki.
* Sgt. Frog, with the hopes of recruiting some of the transformed animals as soldiers for his invasion.
* Sgt. Frog with their Earthling hosts, and their various inept attempts to

"invade" the Earth.
* Sgt. Fury and his Howling Commandos. After the war, he became a senator for Texas.
* Sgt. Fury and His Howling Commandos in battle against the titular characters.
* Sgt. Jay Landsman is the supervisor of the Homicide unit. He is named after a real guy, who was a subject in David Simon's book
* Sgt Joe Friday and his various partners turn up in just about every police division, from Bunco to Citizens Complaints, on
* Sgt. John Benton of UNIT, a recurring character during the Second, Third, and Fourth Doctor eras, was played by John Levene, although Benton's first name was not given on screen and only revealed in expanded universe material.
* Sgt. Kabukiman N.Y.P.D.; even later, he learns he can fly, but due to not being used to it, he throws up, and it lands on an asshole lawyer below him.
* Sgt. Kabukiman N.Y.P.D. that's more of a parody of superheroes than tokusatsu, but still involves a man (specifically a white American cop) turning into the titular Kabukiman to fight crime.
* Sgt. Kabukiman N.Y.P.D., which was supposed to get one called "Operation: Alien."
* Sgt. Keroro uses the Kero Ball in episode 2 to drop a veritable rain of washtubs on Momoka in order to stop her from throwing dodgeballs at Tamama. In a later episode, Keroro gets a washtub dropped on him as one of the punishments for not focusing on his report assignments.
* Sgt Lena Mae Basilone, was killed in action at Iwo Jima. The two never had any children, and when she passed away in 1999, the obituary pointed out that she still wore the wedding ring from when they were married.
* Sgt. Major John "Fucking" Sixta has more power than either of them — and uses it to continually insist on personal grooming standards while allowing the company to abandon their ammo supply truck in enemy territory. In the final episode, Sixta
* Sgt. Murtaugh, driving his wife's station wagon, chasing the South Africans in the opening sequence of
* Sgt. Parks does this for Sally Modesto when he learns she was indeed the biological mother of his adopted daughter, Gadget, after Sally was forced to help a gangster in a scheme against Parks.
* Sgt. Pepper's Lonely Hearts Club Band. As the Fembots sing his song Mustard first says accusingly "A DIRTY OLD MAN?" then proudly "Yesssss! A Dirrrty Old Mannnnnn!"
* Sgt. Pepper's Lonely Hearts Club Band" concludes with all four of the Beatles striking the piano in a final E major chord that runs 45 seconds. Music critic Greil Marcus called it "an ending that will never be matched."
* Sgt. Pepper's Lonely Hearts Club Band, designed by Michael Cooper: a large collage of celebrity and more obscure photo cut-outs and wax statues together in an iconic background.
* Sgt. Pepper's Lonely Hearts Club Band has all four of the Beatles striking a final chord on a piano that lasts 45 seconds.
* Sgt. Pepper's Lonely Hearts Club Band. In fact, from about late-1966 onwards McCartney was the creative powerhouse of the Beatles, as he was the one coming up with all the ideas; Lennon, although he certainly wrote some fantastic songs during this time, spend most of the period drifting away from the Beatles and getting deeper into drugs, which in general sapped his creative instincts.
* Sgt. Pepper's Lonely Hearts Club Band — which, while also well-acclaimed, tends to be the subject of more criticism due to its disparate sound and length. For his part, Ringo Starr mainly remembers the sessions as him not having much to do since many of the songs didn't require him to drum on them. Paul McCartney seems to view the album quite fondly (perhaps because he was the driving force behind it).
* Sgt. Pepper's Lonely Hearts Club Band of Heartland USA. When they're stolen and scattered, the town decays into a sleazy shadow of its original self.
* Sgt. Pepper's Lonely Hearts Club Band. Sadly, Brian Epstein passes away towards the end of the year, gradually leading to...
* Sgt. Pepper's Lonely Hearts Club Band: Sgt. Pepper suffers a heart attack while

playing his cornet at the end of the prologue montage, explaining how Mr. Kite came to possess the band's instruments.
* Sgt. Pepper's Lonely Hearts Club Band than to engage in a faux-lightsaber duel with Billy Shears.
* Sgt. Pepper's Lonely Hearts Club Band, that has nowadays completely faded away in obscurity.
* Sgt. Pepper's Lonely Hearts Club Band the protagonists receive a telegram from BD Hoffler, president of Big Deal Records STOP
* Sgt. Pepper's Lonely Hearts Club Band threatened to walk out. "There's no fucking way that Steven is gonna get directly offed by Frampton," commented Joe Perry. "It's gotta be an accident, the way it was in the original script we fucking agreed to." They finally agreed to a compromise, with Tyler's character being accidentally pushed to his death by Sandy Farina.
* Sgt. Pepper's references to older Beatles songs. "I thought I'd confuse people who read great depths into lyrics," he later admitted.
* Sgt. Rock… which rather begs the question; how was it Sgt Rock was still around in 1974 when he appeared in "The Brave and The Bold", teaming up with Batman in pursuit of a villain who Batman thought was The Devil and Rock was convinced was… HITLER!
* Sgt. Rock adversary "The Iron Major," had his right hand replaced with one of solid iron.
* Sgt. Rock, as this is reportedly not an uncommon practice in times of war. It's also appeared in war fiction quite a few times, so maybe the "Nicknamer sergeant" should be considered a subtrope of the Nicknamer.
* Sgt. Rock comics use a tree to launch himself over a gunner's nest so he can grenade it.
* Sgt. Rock. First appeared in April, 1959. His series was set in World War II.
* Sgt. Rock gives every member of Easy Company a nickname, which is the only thing they're called from that point on. He does this as a coping mechanism, since Easy loses men often — it helps soften the blow to think of the dead guy as Cowboy as opposed to remembering his name and thinking about his family.
* Sgt. Rock GN, and in the story itself Wildman instructs some new privates to do this for a fallen comrade.
* Sgt. Rock had one small team of US commandos pretty much holding up the Allied war effort.
* Sgt. Rock had this as a regular theme. The most brutal punishment he could think of for one recurring German officer whom he defeated in personal combat was to let him live: "You'll suffer through this war like I have to."
* Sgt. Rock has pulled training duty stateside, but is so committed to Easy Company that he insists on rejoining them on his furloughs.
* Sgt. Rock, in just about every variation. However, since life's never easy in Easy Company, they don't have what you'd call a stellar track record for survival.
* Sgt. Rock, of course, started out as a buck private, and while many of his actions were considered worthy of promotion, Easy Company's TO was apparently full. Until a certain battle, whereupon as fatalities accumulated, he was promoted to PFC, Corporal, and finally Sergeant in short order. Not how he would have preferred to earn his stripes, to say the least.
* Sgt. Rock's Easy Company is an antisocial Native American who tends to eschew teamwork in favor of working alone.
* Sgt. Rock surrender. He further argues that the Germans could have just been faking surrender and that if he hadn't cut them down, they could have wiped out all of Easy Company. Sarge lets the matter drop after that, but things get worse as Johnny Doe grows bolder and bolder in his vigilantism.
* Sgt. Savage and his Screaming Eagles has the title character, who was experimented on by the Nazis and then cryogenically frozen until found by the G.I. Joe team.
* Sgt. Savage and his Screaming Eagles that had VTOL capabilities and autopilot (and a minigun that wouldn't be out of place in a Warthog anti-tank plane) and the "Blitz" tank, a Sherman upgraded with a plasma cannon as a main gun).

* Sgt. Savage and his Screaming Eagles. They soon went back to the original 1982 premise, upon which every subsequent adaptation has been based.
* Sgt. Schlock had one... (too bad his gun's auto-targeting software wasn't smart enough for the rotating reference frame):
* Sgt. Slaughter (65 years old, seems to have retired for good in 2014)
* Sgt. Slaughter, but has told stories supposedly "in character" about being infantry in Vietnam, and is used for appearances at veteran benefit events alongside WWE's actual former Marines, Jackson Ryker and Lacey Evans.
* Sgt. Slaughter. For many years, his character was a former Marine Corps drill sergeant who was drummed out for being too harsh on his troops (needless to say, he was usually a heel).
* Sgt. Slaughter is what made him tremendously popular not just in the states, but in places like Latin America. He is the second most beloved face in the brand's history only beneath Hogan, for that matter.
* Sgt. Slaughter, practically from the beginning of his career he distinguished himself for being this.
* Sgt. Slaughter. Throughout the night, they became more and more antagonistic to each other, only to reveal that they'd been pulling one over on Slaughter the whole time. When the match started, Triple H pushed down Shawn and (eventually) gave him a big, clearly non-connecting splash and got the pin. Afterwards, Triple H gave an over-the-top emotional speech, and Shawn in turn was inconsolable for all of a minute or so.
* Sgt. Slaughter using a series of ultra cheesy "Winning America back" vignettes.
* Sgt. Slaughter (who called his the "Million Dollar Dream") while they were both active in the WWF.
* Sgt. Slaughter would often have two main events: Slaughter's title defense would go on mid-way through the card so they could get him out of there before he would literally get killed! (A more standard "send the crowd home happy" main event would soothe some of the anger).
* Sgt. Smiles, marine recruiter. teach you to program computers. teach you all the skills you need. you can die with dignity
* Sgt Spook: The titular character is the ghost of a police officer who is able to interact with his medium — an orphan boy, of course — and solve crimes. These crimes vary from bank robbers and gangsters to supernatural romps.
* Sgt. Stubby: An American Hero: The titular dog actually knows how to salute to his superiors and does it a few times in the film. It's based on the real life Stubby knowing the same command.
* Sgt. Stubby: An American Hero, the titular dog, Sergeant Stubby, appears to be a Boxer as opposed to a mixed "bully" breed in real-life.
* Sgt. Trevor Gibson in "Sleeper Under the Hill" turns out to be involved in the killings and does his best to throw Barnaby and Jones off the trail. He ultimately falls victim to his partner in crime.
* Sh15uya centres on a group of fifteen-year-olds trapped in a virtual replica of Shibuya.
* Shōgi (aka "Japanese Chess") allows you to bring back captured pieces on your side as early as your next turn. This is said to be inspired by the actions of mercenaries who would switch sides when captured, rather than be executed.
* Shōgi, captured pieces are truly captured, not outright killed.
* Shōgi, remember that it's possible to have your captured pieces used against you.
* Shōgi shogi rival, who also happens to have a hospitalized wife and young child.
* Shōgi, when a player's piece is captured by the opponent, the opponent can release it back onto the board, except now the piece is on their side. The original owner can then capture it back and make it their piece to put on the field once again. There is no limit to the number of times this can be done per piece, except for the King, the capture or checkmate of whom triggers victory for the attacker.
* Shōgi, when the Horse piece promotes, it moves like a Gold General (i.e. one square at a time in any direction except diagonally backward).

* Shōjo Demographic (Works whose intended viewing demographic is pre-teen and teenage girls.)
* Shōjo. Only, since it's Ai Yazawa, the characters' motivations for maturing and growing are mainly their dreams and aspirations of becoming graphic artists and fashion designers.
* Shōnen Demographic (Works whose intended viewing demographic is pre-teen and teenage boys.)
* Shōnen fight scenes than an actual card game with defined rules. Cards were allowed to have creative or bizarre interactions resulting in complex cause and effects that often had some degree of logic behind them, but would never exist in a real card game. While some stranger interactions were eventually implemented in one way or another, many one off interactions are simply ignored for the rest of the series and in the game.
* Shōnen in which most of the crowds on the stands were just a bunch of colorful blob-like beings... in 3D.
* Shōnen) is obsessed with Sasuke, particularly while they're still in the Academy. The competition over Sasuke has had such results as ending friendships, causing fights in classrooms, and trampling innocent bystanders.
* Shōnen Magazine, but none of them would ever admit any of this.
* Shōnen. One scene from the latter happens during the big Naruto vs. Sasuke fight. Naruto, having previously collapsed, is covered in the Kyuubi's chakra. He stands up and delivers a solid punch right in the middle of Sasuke's face, sending him tumbling several meters through the air.
* Shōnen series, and it's something of a meme within the community.
* Shōnen theme park versions read more like above, though they'll put more emphasis on the action than the fanservice.
* Shōnen, they aired two episodes daily, and another two on Wednesdays (since the channel was only on the air from 8 PM to 2 AM, that's a lot). The lack of variety in their anime series is seen as one of the reasons why the channel was terminated.
* Shūmatsu Nani Shitemasu ka? Isogashii Desu ka? Sukutte Moratte Ii Desu ka? -> "SukaSuka"
* Shaak Ti and two other Jedi use trains both for evasion and for dividing-and-conquering during their flight/fight against Grievous's Magnaguards in the
* Shaak Ti is a downplayed example, coming primarily from her inexperience with both romance and jealousy.
* Shabby Heroes, Well-Dressed Villains (the heroes are gritty, and the villains are shiny)
* Shaberu! DS Cooking Navi a few months before the sequel was localized.
* Shabnam Masood didn't return for her brother's wedding. This was lampshaded though.
* Shackled. In a writer as intensely vivid and descriptive as Garton, this episode makes amongst the most squirm-producing reading one is likely to encounter.
* shackled prisoners did, and probably had to do it more than once while travelling the world.
* Shackle Seat Trap: A normal-looking seat is actually a trap and shackles down whoever is sitting upon it.
* Shackles, one of the Nameless Detective novels by Bill Prizoni, Nameless employs a variant. Shackled in a cabin, Nameless starves himself till he can slip his hands out through the manacles, tearing off some skin in the process.
* Shackleton. Shackleton picks up a plate with a penguin photo, groans, chucks it aside and says "No more penguins."
* Shackleton, the only source of possible help for 5,000 miles in any direction.
* Shackleton" The third interviewee also seems dubious as he was inspired by a dream to join the expedition, but as he's an experienced sea captain they can make better use of him.
* Shackleton won't last past Christmas. Another says that might be too optimistic, but that it will surely be over by the time they get back from the Antarctic. Two years later when Shackleton finally reaches the settlement in South Georgia he asks

who won, only to be informed that the war is still going on and millions have died in it.
* Shack Tactical, but at the same time he also toys with Scotty mercilessly to get him to say the most ridiculously unintelligible things.
* Shack Tactical. Kevb0 is often the first man out leading the very point of these charges, even when he's playing the platoon commander... which often means that he's the first or one of the first men to be cut down by enemy defenses.
* Shack Tactical. The group has over a dozen channels, providing different points of view from each player.
* Shaco is based around tricking enemies with cloaking and a controllable copy of himself.
* Shaco, LeBlanc and Neeko can all create duplicates of themselves to mislead enemies and make them waste abilities on the fake (and, for Shaco, to increase damage output). However, duplicates are controlled by the AI, so they behave slightly differently to humans such as not prioritising Shaco's Backstab passive
* Shada", all of the humanoid guest characters look like the actors who voiced them in the webcast rather than the actors who appeared in the unfinished live-action version. This was because some of the animation was done by rotoscoping to save money.
* Shada", an ancient and incredibly rude Gallifreyan symbol, which is actually just the British V-sign.
* Shada" and shoehorns the Eighth Doctor into the story, but the novelisation presents it with the Fourth Doctor as originally intended. Then a reconstruction came out which fills in all the unfilmed scenes with animated content voiced by the original cast, and this serves as the official version of the story.
* Shada", Clare is searching Prof. Chronotis' study and discovers the controls to his TARDIS by leaning on a bookshelf.
* "Shada" Dudley Simpson's scores for the show. Barring the HD animation used to fill in the material that was never taped, the results are an accurate approximation of what the serial would've been like had it made it to air at the start of 1980 as intended.
* "Shada" her desire to love and trust the Doctor and do everything he says drive her to start solving the mystery herself, leading to her accidentally launching the TARDIS of a retired Time Lord.
* Shada". In 1992, the completed footage was released on VHS, with Tom Baker narrating the unfilmed parts in-character as the Doctor. In 2003, a modified version of the story was used as the basis of an audio drama starring the Eighth Doctor. In 2012, an official novelization of the script was released. Finally, the original story was completed as originally intended in 2017, thirty-seven years after the intended broadcast date, with the unfilmed parts animated and all the surviving actors reprising their roles.
* "Shada", in reference to this. Of course, being a novelisation, we just see some handwritten squiggles (apparently Old High Gallifreyan writing), one of which looks a bit like the joined-up Venus and Mars symbol sometimes used to represent sex.
* Shadamy Comic is female, but she's a Shadow Chao so she looks just like her male owner.
* Shadamy Comic: When it's revealed that Infinite is pretending to be Sonic, "Sonic" gains glowing red eyes.
* Shada of Fourth Doctor stories ("Androids of Tara", "The Power of Kroll" and "The Creature from the Pit"), and after each reel he comments on the quality of the story, acting and special effects, calling the first "not exactly a bad video text, just a bland one", and eventually rating the Doctor a "1 out of 10 Time Lord on 2 out of 10 planets" (in a manner similar to how fans rank their favorite Doctors and show eras).
* Shada, see the woman, leave, and then a beat later burst into the room in the exact same way as before as if the first time hadn't happened. Sadly the serial wasn't finished, but the book adaptation made a point of preserving this gag.
* "Shada", when the somewhat doddery old Professor Chronotis turns out to be the notorious Time Lord renegade Salyavin.

* Shadazzle: After growing accustomed to the polite and posh Fred Flagglebush, we are suddenly introduced to his drinking, swearing, porn-watching twin brother, George.
* Shadazz/Radiation split EP, and in the encore of their sets in 2009 with "Ghost Rider".
* Shaddap You Face by Joe Dolce features the line: "Mama used to say don't stay out-a late with the bad-a boys, always shoot-a pool, Giuseppe going to flunk-a school."
* Shaddock is also a name for the pummelo, the grapefruit's larger cousin.
* Shade are so murderous as to be willing to sacrifice even their own lives if it means being able to kill even a single non-corrupted person.
* Shade managed to achieve his battle form after going through Doom Raizer's experiments, but Springer managed to achieve his battle form naturally.
* Shade of the evening — a psychotropic drug used by warlocks. It turns the user's lips blue.
* Shaderunners is based on a fantasy version of Prohibition where booze is swapped in for color.
* Shades, a career criminal, spends his entire time while under arrest requesting a lawyer. Inspector Ridley continues to question him without a lawyer present, even though his testimony would be invalid at this point. Despite her best efforts to intimidate him with the
* Shades are humanoids whose essence has been blended with "shadowstuff", giving them some aspects of this trope.
* Shades are standard issue for people working in the Secret Service and other bodyquard services, allegedly because they conceal what the wearer is looking at. This can help keep potential troublemakers in line, since they can't be sure that sunglassed muscleman isn't staring directly at them. Larger, square ones can also have a one-way mirror formed into the glass/plastic as well which allows them to look behind without having to turn around.
* Shade's Children by Garth Nix, Ella isn't described as being particularly small, but she certainly would seem so next to her teammate Drum, who was dosed with steroids as a child. One scene implied that her armpits were about level with his waist. Interestingly, Ella is almost certainly the elder.
* Shade's Children by Garth Nix. Except here the world is run by evil overlords who chop up anyone over 14 for body parts. When they took over, though, everyone over 14 instantly disappeared and beyond this being the fault of the overlords it's never completely explained.
* Shade's Children. Those who survived the Change got them too; there are multiple characters (one during the main story and at least one more in flashback) shown to have Change Talents who were definitely born before it.
* Shades of Blue: Two cops are in a room talking, one big tough guy and the other a blonde woman. Another cop arrives.
* Shades of Death Road in rural Warren County where legend has it that, among lots of other haunted stuff, a girl died in a car crash after being stood up for her senior prom. The crash is traditionally said to have been caused by a deer, and now drivers will see a girl in a prom dress on the side of the road. If they don't stop to pick her up they will crash themselves on the winding road, most likely because of a deer.
* Shades of Grey: Chromatacians have to deal with some fairly unusual pest animals, such as bouncing goats (kangaroo-goat hybrids that frequently bounce over stockwalls to raid farms and gardens) and ripping turtles (turtle-shaped robots built by the Previous to harvest scrap metal, which can and will tear their way into buildings to harvest metallic objects).
* Shades of Grey, is remembered as a messianic figure who supposedly laid down the rules that Chromatacian society slavishly follows (which themselves resemble a boarding school rulebook more than anything else).
* Shades of Grey: Society in Chromatacia is strictly divided by what colors you can see — people who can't see any are the bottom of the social latter and basically slaves, Reds are the lowest rung of actual society, Oranges to Greens

form the middle class, Blues are generally wealthy and well-off, Purples form the ruling class and the rare Ultraviolets are treated almost as nobility.
* Shades of Grey: Some of Chromatacia's creatures are hybrids of two or more real-life species, such as ratfinks (rodents with lizard scales and claws), bouncing goats (goat front/top half, kangaroo bottom/hind half) and rhinosauruses (sauropods with rhino heads).
* Shades of Grey. The caste society in the novel is stratified by color; what color you can see and how much of it indicates your social standing and a host of other factors. Oh, and it's genetic.
* Shades of Grey, the state of Chromatacia is governed by Munsell's Rules, which also specify what does and does not exist. If you see something with your own eyes, something that should not exist according to Munsell, then you just pretend you didn't see it. If you absolutely must refer to it (say, to warn others about speaking of it) then you call it "apocryphal". The town of East Carmine has an apocryphal man. He regularly steals food from others' houses in broad daylight, and no one will stop him for fear of breaking the rules by acknowledging his existence.
* Shades of Grey, to "run with scissors" is a set expression for "doing something incredibly dangerous."
* Shades of Grey use different colours as recreational drugs. "Lime" is seen as a gateway drug, while "Lincoln" is more dangerous.
* Shades of Magic. Alucard was born into a powerful noble family, but after an intense argument he decided to run away from his abusive father. Since he had no money, he decided to become a pirate. This went great for a while, but he was eventually arrested and thrown in prison. Because of his influental family the king decided to free him and offer him a job as privateer.
* Shades of Magic book, after spending the majority of the book either just missing each other or in disguise.
* Shades of Magic book, Kell goes off on Lila for collapsing during a tournament battle after not heeding his warnings about over-using her powers. Kell's brother Rhy later tells Lila that Kell would only react that strongly towards people he loves.
* Shades of Magic Osaron, is left in an eternal twilight where dust hangs forever in the air and everything that remains is transmuted into black glass.
* Shades of Magic that wants to devour their entire world. For bonus points, the invading forces would have actually made the entity stronger and accelerated its spread.
* Shades of Magic. The same happens to people who are being infected and overwhelmed by a sentient magical effect, in which case they have much more immediate problems.
* Shades of Reason in this fashion after the latter loses their duel for authority.
* Shades of this in the portrayal of "The Night Watcher", Raphael's vigilante persona in
* shades the entire Armacham force policing Fairport wears balaclavas, even their helicopter pilots.
* Shades-wearing secret agent Bryce Larkin tries to give his sunglasses to Chuck, claiming that he should have them if he's going to be a real spy. In reality, he's imprinted an update to the Intersect within them.
* Shade the Changing Girl poetry, she's inspired to steal the Madness Vest and use it to travel there.
* Shade, the Changing Man, an androgynous pretty boy who incited emotion to the psychotic degree in everyone around him, but never expressed anything. He didn't even speak until Shade cracked into his inner world, and found nothing.
* Shade, the Changing Man fairy tales they grew up with. When Shade arrives and enters a fairy ring, his madness amplifies the effect across the entire country, with results deadly and deranging. The madstorm also wipes out the entire film production, to the relief of the surviving actors.
* Shade, the Changing Man had decided to cancel, Lenny is describing Shade to her father.
* Shade, the Changing Man had to take over the body of a drowning woman in order to

stay alive himself. Overnight, it reverted to female form and could not be changed back until he found the person responsible for the woman's death. Even after solving that mystery, his female features would re-emerge from time to time until he abandoned the body to fight death on its own terrain.
* Shade, the Changing Man: Hotel Shade has this quality, as lampshaded by Kathy and Lenny before they knew they were doomed to fight madness there. It didn't help that the first living tenant was a serial torture-killer, or the second one appeared to be a raving lunatic (he explained that he was a writer; they weren't reassured.) Corpses animated from the nearby graveyard, because that was the only way the Angels could communicate with Shade, but no one had any idea what was animating the hotel staff.
* Shade, the Changing Man. It appears from time to time, still beating, moving under its own power, and even has internal monologues.
* Shade, the Changing Man. It made for an anticlimactic ending, as Shade's personality had come full circle to the socially awkward idealist he was at the beginning, the final page left hanging on his clumsy attempts to reconcile with a woman who no longer had a history with him.
* Shade, the Changing Man perspectives and critiques of America were based on his own as a UK expatriate.
* Shade, the Changing Man, Shade is forced to kill an enemy that can't be reasoned with or contained.
* Shade, the Changing Man: Shade reflected Milligan's own sense of cultural alienation in America.
* Shade, the Changing Man, Shade traps a Celestial in a statue of the mythical Pandora (with box), and she comes to life. Kathy and Lenny find "Pandora's" box and give in to temptation by opening it. The box is empty, but it turns "Pandora" into dust.
* Shade, the Changing Man that he had masculinity issues with his image.
* Shade, the Changing Man: The Area of Madness and the larger Area it is part of appears anywhere from vaguely surreal to incomprehensibly psychedelic, filled with creatures hostile to life, limb, and/or sensibilities, and more could be generated simply by entering the Area. Shade can create more localized versions around himself, but his apartment in the crack in the sidewalk of Times Square was the largest and most stable.
* Shade, the Changing Man their personality traits away as he wrote about them until the original person was left empty and depressed to the point of suicide.
* Shade, the Changing Man when Lenny says this to Lily, who's trying to escape a burning building.
* Shade, the Shade was selected to receive his powers by the Celtic goddess Scathach for reasons he doesn't divulge, but still remains ageless, nigh-unkillable, and astonishingly powerful. In addition, he doesn't even have blood anymore, just a sort of black liquid "shadowstuff" that fills his veins. And he can't even be killed, his body will just be sent back to the same realm his powers come from until he gains enough strength to reconstitute himself.
* Shadier companies or people tend to have mottos in Latin printed somewhere as bonus gags for those who know a little about the language; for example, a nobleman's family motto being "Honi soit qui pense" (Shame on those who think).
* Shadoe Stevens played this for laughs; the disclaimer portion of a faux infomercial ad included the phrase, "offer not available in Squid Valley, void where inflatable".
* Shadoe Stevens) would smash up electronics with a comically-large sledgehammer, with the slogan "Federated smashes prices!"
* Shad. One of his few positive comments is that the film "made [him] feel positive emotions… twice."
* SHADO operatives communicate through one between their Earth HQ and their moonbase.
* Shadow", a civilian contractor onboard an nuclear attack submarine (SSN) holds the sub ransom, through his lap top computer, with which he supposedly can activate charges or to have them explode automatically unless he stays online.

* Shadow/Amy comes down to this. Amy reminds Shadow of Maria, which is a major factor in his
* Shadow and Bone as abominations, and the Drüskelle are specifically tasked with seeking them out and killing them
* Shadow and Bone: As in the books, Etherealki Grisha can manipulate the classical elements. Squallers can control the air, Inferni can control fire, and Tidemakers can control water. In the Materialki order, Durasts can manipulate glass, steel, wood, plants, stone, or anything solid on a molecular level.
* Shadow and Bone featured an adorable goat named Milo in its first season. According to Kit Young (Jesper), who interacted the most with Milo, the goats that played Milo constantly screamed and pooped, and at one point practically headbutted him into a wall.
* Shadow and Bone features the Barrel, specifically West Stave (where the pleasure houses are). Little of it is seen, but two different pleasure houses (The Menagerie and the Emerald Palace) are shown. It is presumably more of a Type 1, with a lot of laughter... though there are armed guards (usually belonging to the gangs who own the houses) guarding the doors.
* Shadow and Bone: Grisha in Ravka are recruited into the Second Army at ten, as soon as they are tested or identified as Grisha. There, they stay in the luxurious Little Palace to train before going out with the First Army (made up of normal people). In other places, the Grisha are killed (like Fjerda) or end up taking shady jobs (like Kerch).
* Shadow and Bone have ruled together, as equals, but Kirigan just wants to use her as his weapon.
* Shadow and Bone, Kaz's "lynx flush" strategy is named so because according to him, lynxes are pack hunters who will clear a path for the prey. In real life, while lynxes sometimes hunt in packs, they are usually solitary animals. It is a cool name, though.
* Shadow and Bone's Jesper exhibits traits of all types excepting The Woo:
* Shadow and Bone taunts his romantic rival Mal with this possibility: as the Sun Summoner, Alina will almost surely outlive Mal by a long time, and he has the patience to wait years until Mal is old or dead and Alina's anger towards Kirigan has faded.
* Shadow and Bone: The offensive application of Heartrender abilities — they can control opponents' circulation to incapacitate them.
* Shadow and Bone with the Shadow Fold, a colossal wall of unnatural darkness filled with flying monsters, but the only way to cross alive is to avoid showing a light which draws the monsters.
* Shadow and Rose, a romanced Cullen tells the Inquisitor the same thing at the Winter Palace ball, and his explanation is almost word-for-word the same one as in the fic.
* Shadow and Rose describes herself as having been this before the story began.
* Shadow and Rose from a different point of view, this is actually an attempt by the author to recreate the fact that only three companions can fight alongside the player character at any given time while having the reduced number still make sense from a narrative point of view.
* Shadow and Rose notes, "I probably shouldn't watch her sleep. It's kind of creepy."
* Shadow and Rose, when Alistair and his companions rescue Brother Genitivi from Haven, they're lucky enough to find a boat tied up on the dock that they can steal to get the injured monk away from the pursuing mob.
* Shadow And Steel remixes, has a stinger where the Song of Time is played, and the album is rewound to the beginning before it restarts with the drum intro to the first track. The effect is spoiled a little with the special version Kickstarter backers received, which includes a bonus track after the original final track.
* Shadow Archetype and genuinely feels responsible for her plights, causing others to want to look out for her even if she deems it unnecessary. But Heather is very vocal in feeling persecuted and unloved, blaming her problems on mean girls at school and her mother, which causes people to be stingier with their sympathy for

her.
* Shadow Archetype: The character who possesses a trait the hero hates about himself.
* Shadow Archetype the Water Temple's sub-boss is Link's Living Shadow.
* Shadow Archetype: When the rival is a more unscrupulous version of the other guy.
* Shadow Archetype would be if they lack the proper qualities of a pure hero.
* Shadow as the First Coming of Christ - a virgin birth long ago, immortal, brought down from an untainted place to live among men, persecuted throughout his life while giving out wisdom beyond his years, and finally wrongly accused and made a scapegoat of for humans fouling up; he is betrayed by all he cares for and put into stasis for what might be forever, despite all he's done for us. He's held in stasis in the Crucifix position.
* Shadowbane are responsible for (they made pacts with demons, worshiped the Beast Lords, and even waged war against the All-Father, slew the Archon of Peace with Shadowbane (when ended very badly for them), created the art of Necromancy, bread minotaurs from human slaves) it's pretty easy to understand why the Temple of the Cleansing Flame wants to burn them at the stake.
* Shadowbane: One of the "seven races of man" is the Indyu: "dark as the Northmen are fair", and "magic runs in their veins".
* Shadow Baofu has an attack that hides your party's status windows for a few turns.
* Shadowbeat, provided game rules for playing non-criminals such as rockers, reporters, and professional athletes. The section on reporters not only provided rules for faking still or video evidence in support of your stories, but also the odds of such bogus pics being identified as fake when they're submitted to the newsnets.
* Shadowbinders, Grandma comes to visit and brings an exciting new video game for little brother Michael, while protagonist Mia gets some items belonging to her late grandfather - a weird box and a journal she can't read (it's in French). Subverted in that, while Michael clearly thinks that Mia's gift is lame and his is awesome, Mia is delighted by what she receives; she loves antiques and unusual objects. The box turns out to contain a magic ring that launches her into her adventure.
* Shadowblade can become a Jack of One Stat with his ultimate, which lets him changes his primary attribute, letting him be a
* Shadowbolts in Loyalty 3 only ends because Gilda is enraged by Spike's presence and leaves to plot a new strategy.
* Shadow Boxers being delusional when he claims that he successfully infiltrated the robot base when he mentions that Gray Mann was raised by eagles, a fact known only to her and the Administrator.
* Shadowboxer. Vickie's hair is cut while she's on the run but she wears a blonde wig instead of dyeing. And after a few years have passed, she stops wearing the wig and her hair has grown back.
* Shadowboy, Doctor Omicron keeps at least a handful of bots around for general utility. He treats them as completely expendable.
* Shadowboy, Doctor Omicron's heavy black labcoat pulls double duty as one. Being worn over a life support suit, it confers no functional benefit, but he keeps it for style.
* Shadowboy, Icerazor's sword is among the few things reliably able to carve through force fields and psychic constructs, making steel (galvanized pipe, Omicron bots) mundane in comparison.
* Shadowboy, Jack wears one, though the wind doesn't always cooperate.
* Shadowboy, the Community Fund acquires the last surviving launch facility from the decomissioned Gruefield Missile base to convert into a base for the team.
* Shadowbridge, it's a morality story warning of a wicked whore who had broken many taboos on the island she's from - including riding one of the island's sacred krakens while nude. She tries to leave the island, but the kraken brings her back where the islanders stone her and the kraken and then they drown her in its ink as a purity rite. Leodora is horrified by this tale and vows never to perform it. The story is a combination of what happened that led to the fleeing of Leodora and

years earlier - her mother Leonara, that's been corrupted by her uncle's sick fantasies and had some details altered. Leodora sadly notes that now she's become a character in a tale, just like the ones she tells.
* Shadowbridge she knows as she goes on her own quest to find her mother and stop the evil Lord Tophet.
* Shadowbridge that hadn't been used in 3 generations. Leodora is first to be dunked in the sea until everything from the stomach, bowels and bladder is voided out. Then a sharp stick is to be slowly pushed up her ass until it's all along her spine. She'll then be cooked over an open fire, then chopped up and sprinkled in the sea.
* Shadowbridge, the world is filled with incredibly long bridges, divided into spans. Each span has its own language, but visitors will magically find themselves fluent in it a few minutes after entering.
* Shadowbringers, amaro who live a long time become known as tupaq amaro, able to speak in human languages. They were granted sapience by mages in ancient times to better serve them, but the enchantment went dormant over the ages, reverting them to mere animals; however, every once in a while an amaro reawakens their intelligence.
* Shadowbringers, and then they finally transform into a winged monstrosity with a vaguely human looking face.
* Shadowbringers as a Pixie, try to cut your hair would probably end... poorly.
* Shadowbringers, drowning people and attacking other fae for their own amusement. When the player needs to borrow an important relic from them, the Fuath won’t give it up unless the player entertains them by fighting through their illusory, monster-infested domain to reach the relic. When the player succeeds, the Fuath give up the relic as promised but try to drown them anyway.
* Shadowbringers explains that time on each shard flows differently compared to time's flow on the Source. The Crystal Exarch explains that an hour on the Source is a whole year on the First. When you complete the story and return to the Source to meet up with Tataru, she looks at you and is confused on how you came back so quickly after leaving for the First just a few minutes ago.
* Shadowbringers, introduces counterparts for the Hydaelyn races with their own names: Hyur are Humes once more, Elezen are Elves, Miqo'te are Mystel, Roegadyn are Gladjent, Au Ra are Drahn, Lalafell are Dwarves (and classified as a beast tribe in the First), Viera are Viis, and Hrothgar are Ronso.
* Shadowbringers, like Elves for Elezen or Humes for Hyur), and the various regions of Norvrandt are similar to those of Eorzea (the Black Shroud and the Rak'tika Greatwood, Kholusia and La Noscea, etc.).
* Shadowbringers (minus the darker skin) as the central protagonist, which would later be officially named 2P.
* Shadowbringers - the theme for the titular expansion - is a bait-and-switch for the Warrior of Light themselves. While most of the song details the struggles and fate of the First, a constant refrain of 'One Brings Shadow, One Brings the Light' eventually culminates in the song closing with 'I am Shadow, I Am The Light.' Notably, the trailer this song debuted to has the iconic Warrior of Light struggling across the apocalyptic wasteland of the First, seemingly broken and all hope lost, and the final line is said as the Warrior becomes a Dark Knight to slay a Sin Eater, indicating his transformation to the Warrior of Darkness.
* Shadow buys a "Pee-Oh-Ess" 1983 Chevy Nova for $450. It "had almost a quarter of a million miles on the clock, and smelled faintly of bourbon, tobacco, and more strongly of something that reminded Shadow of bananas." It goes, and that's about all you can say for it.
* Shadow Caster, morphs into a feline as his first alternate form, with all the stat and power boosts one would expect.
* Shadowcaster (though if you use it in response to an attack against you the attack still has a 50% chance to hit).
* Shadowcasting: A form of magic that is fuelled by the shadow plane. It resembles Arcane magic at early levels, but later on, you can use the mysteries (their equivalent of spells) as spell-like or supernatural abilities, which are less

limited.
* Shadowcat also speaks a wide number of languages. Kitty herself knows fluent royal and standard Shi'ar and has some moderate knowledge of Gaelic, Hebrew, and German. When Illyana Rasputin came to stay with the team, Xavier telepathically taught them all fluent Russian, and when the team went to Japan for Wolverine's wedding to Mariko Yashida, he likewise taught them Japanese.
* Shadowcat's pet dragon Lockheed knows more languages than Beast, even though everyone treats him as a quote-unquote "
* Shadowchasers: Ascension, a minor villain named Victor used a deck that included an Xyz Monster based on the character; Ophelia was the only one who recognized the reference, leading to this exchange:
* Shadowchasers: Ascension from wine glasses, the equivalent of fine wine to the aristocracy of Hell.
* Shadowchasers: Ascension who notices that the whole story is off and manages to put two and two together.
* Shadowchasers at this point, here.) The fic also mentions a few other bars that cater to specific races, like the Meat Locker, a nightclub for orcs, bugbears, goblins, and gnolls, which other races were "discouraged" from going to.
* Shadowchasers: Conspiracy, an important character actually works at a Pandora's Box, and doesn't exactly like it, calling the place a "grease pit" (although she does appreciate the employee discount). It's implied that she's doing it to earn money while focusing on an important plot-related task.
* Shadowchasers: Conspiracy, Eden claims to have been mentored by many historic figures over the century, including Lao Tzu, Aristotle, Baruch Spinoza, and John Locke. ("... and that was just philosophy," she adds. "You'd be surprised how easy it was to convince all the great geniuses in history to share what they know.")
* Shadowchasers: Conspiracy isn't shown, but when the scene shifts back, Aysis is cowering, sobbing, and telling the now coldly-stoic Dolores everything.)
* Shadowchasers: Conspiracy scenario is (with rather graphic accuracy) simply to scare an infected victim into taking it seriously when she doubts how dangerous it is.
* Shadowchasers: Conspiracy. Sheva still intended to kill him, but stopped because another villain was watching, and Francis was disgusted at what happened when he woke up.
* Shadowchasers, has spawned several continuing fanfics on fanfiction.net.
* Shadowchasers Series, Ace's real name is Alice, but she hates it, partly because she is a major tomboy and thinks Alice sounds like a sissy name. She also dislikes the Alice in Wonderland story. Only people really close to her get to call her Alice.
* Shadowchasers Series fanfics have these a lot. The series features an organization that is spread out globally, and members of the local group featured in one story often show up in another, from time to time.
* Shadowchasers Series is occasionally found on both genders. This is actually brought up in one chapter of the second fic, where it states a female ophidia's mammaries are non-functional, and if they ever nursed their young, it was millennia ago.
* Shadowchasers Series series has some potent potables that are not meant to be drunk by humans.
* Shadowchasers Series, that is likely true.) He mostly ignores it these days.
* Shadowchasers Series where he mistook the female minotaur Terra Ironhoof for male and got beaten up for it.
* Shadowchasers: Soulscape In this case, he represents what Hebi-Na once was, the cruelty that she once showed towards others, and is the cast-off evil that Hebi-Na has been trying to purge from herself.
* Shadowchasers: Torment plots to kill him to usurp his powers to become a god himself, only to realize, too later, he’s in far over his head.
* Shadowchasers Twice Told Tales that he admits should not be taken fully at face-value, claiming it contains many scenes where the contexts are probably either misinterpreted and/or incomplete.

* Shadow Children Jen's chatroom pals Yolanda, Pat and Sean all showed a little reluctance at attending Jen's rally and it's unknown if they did attend and die with everyone else or just kept their heads down afterwards, although the fact that none of them answered when Luke checked Jen's chatroom afterwards implies the former.
* Shadow Children: Mr. Talbot is a high ranking government agent who secretly leads some sort of organized resistance, and usually helps out the kids. Another revolutionary shows up repeatedly to aid the heroes in book 5 and 6 rescuing them in the former and executing a gambit in the latter. We don't know what his name is, but he goes by Nedley and later Mike, and is implied to be working behind the scenes as a government officer.
* Shadow Children: The third child of a couple must die or go to jail!
* ShadowClan cats are dark colours like brown, gray, and black. ShadowClan produces a lot of melanistic cats as well. They frequently have faint stripes and spots, while white markings are very rare and mainly limited to their paws.
* Shadow Clone Jutsu and his performance convinces Iruka to let him graduate, but Mizuki is a low-level chuunin acting alone, and ultimately an obstacle easily overcome by an academy student.
* Shadow Command EB-1C Vampires have just successfully attacked a laser cannon when Russian missiles speed in and splash them before countermeasures can be taken.
* Shadow Company begins with your employer abandoning your mercenary group in the middle of enemy territory after a mission goes awry.
* Shadow Complex, and PC that features enhanced visuals and new content.
* Shadow Complex, at the end of the game the Commander will threaten Jason, saying that his evil organisation will kill him, his loved ones, and everyone he holds dear just before getting shot in the head.
* Shadow Complex carries over player level and their perks between playthroughs, meaning a player at Level 50 can benefit from having an extra 100 Health, a complete map with the collectibles visible (save for Insane mode), and unlimited Grenades, Foam, and Missiles. Collecting all of the Gold Bars will also permantly allow access to a secret room with golden versions of every weapon in the game for subseqent playthroughs; the remastered version also adds in a golden Omega Armor.
* Shadow Complex has an achievement named after this, awarded to you if you get 50 headshots.
* Shadow Complex have a combination of "armored super-soldier" and "Nazi" that includes armbands with their logo on it.
* Shadow Complex, Jason can acquire a wrist-mounted Hookshot, which allows him to not only latch onto most walls and ceilings, it can also be used to yank certain objects away.
* Shadow Complex. The main character Jason Flemming eventually gets a hold of the prototype and upgrades its capabilities.
* Shadow Complex was announced and given out for free for a limited time through the Epic Games Store for PC.
* Shadow Complex you can make your way back to the Jeep which brought you to the area to start with...and just leave.
* Shadow Crystal Mage also falls into this, having fifty-six stories, only sixteen of which are labeled as finished, and of the remaining forty, thirty have been updated over the past year.
* Shadow Dancer: The Secret of Shinobi at the end of Stage 3 takes place atop the Statue of Liberty.
* Shadow Demons crossover are two-dimensional silhouettes of the Monitor, and their merest touch can be deadly.
* Shadow Dictator been any who have tried, given how valuable Sigil is, but she's crushed all challenges thus far.
* Shadow Discretion Shot - Alluding to something bad or unpleasant by showing it in shadow
* Shadow Discretion Shot (from this scene, it can be noticed what kind of maniac Fidget is and what is he capable of doing when he has a motive).
* Shadow Discretion Shot - Something bad is happening, but we don't see it, we only

see a shadow of it.
* Shadow Dragon, all characters who could have been the sacrifice are alive and well, but Frey's Support conversations specifically mention that he was indeed the canonical sacrifice, but was merely wounded and left for dead rather than killed.
* Shadow Dragon and the Blade of Light, Arran is with Marth's knights from the start and Samson isn't seen until much later in the game, where he doesn't seem to know Marth personally and doesn't hesitate to attack him, which means recruiting Arran was likely canon.
* Shadow Dragon and the Blade of Light explore the more tragic aspects of this trope:
* Shadow Dragon and the Blade of Light, he is widely regarded as the most powerful warrior alive.
* Shadow ends up buying another vehicle that is badly painted a very ugly shade of purple. It's described as a color that a person would only choose while under the influence of many drugs.
* Shadow Era also has several cards that can damage the user. Some items (such as Rusty Sword) damage the user when destroyed, while others can constantly drain from your health for some benefit (like Enraged which allows the player to draw an extra card at the cost of one health a turn).
* Shadow Era can cast some trap cards, such as "Spike Trap" that either harm or kill any monster summoned after it is cast.
* Shadow Era is a CCG that allows you to buy crystals that are used to buy starter decks/booster packs. You can buy all the cards with an in-game currency, and you slowly gain crystals via play.
* Shadoweyes: A non-fanservice take. Every time Scout turns into Shadoweyes or gets in a fight, clothing gets appropriately torn up. That’s probably why the Shadoweyes "costume" is so simple—so it can be easily replaced.
* Shadowfang Keep is almost quaint by how small and cramped it is compared to other examples in the game. It also demonstrates why this trope is employed so much; due to how small some areas are, it's possible for the larger player characters like Tauren and Draenei to get stuck in the level geometry.
* Shadowfax is the fastest horse in Middle Earth to point where he makes the literal wind look slow. Riding Shadowfax Gandalf reached the Shire from Isengard only a couple days after Frodo left Hobbiton.
* Shadow Fields (Dark Eldar) are energy sinks which absorb incoming attacks completely, providing excellent protection, though they can be overwhelmed by attacks that transfer more energy into them than the Shadow Field can absorb.
* Shadow Fight 2: Partly due to the fact that the game has no multiplayer mode, double-KOs with the AI are counted as a loss for the human player.
* Shadowfist, called "Kar Fai's Last Stand". The flavor text says it best:
* Shadow Fox comic, Ghost Wolf is this to the titular heroine, as he was involved in a drive-by shooting that led to the death of her younger brother, which in turn prompted her to become a masked vigilante.
* Shadow Futaba but dresses in a skimpy pharoh garb due to the level's Ancient Egyptian themes.
* Shadow Gale and Pfle have known each other since they were young children. Shadow Gale is Pfle's servant, but the two are very close, and Pfle cherishes Shadow Gale dearly. Shadow Gale has issues with Pfle's pranks and willingness to do dark deeds, but she still cares for her and wishes she'll become a better person.
* Shadow Gallery has a two-part (three planned) multi-disc epic with
* Shadow Games is about Dash Rendar acting as bodyguard to a galactic pop star.
* Shadow Games they all picked up local languages in a few weeks from their guides.
* Shadowgate has two torches you needed to keep lit. If they go out, you'll stumble around in darkness until you fall and die, even in areas outside or areas that have some other source of light. The remake is a bit more sensible about this; if your torches go out, you can stay in any area that already has a light source and not die, but moving into any dark area beyond that without relighting the torches will kill you.
* Shadowgate, if you run out of torches or forget to light a new one, you lose.

* Shadowgate. One mirror cuts you to ribbons if you break it. The other two don't, but while one merely lets you walk through unharmed, the other opens a magic portal to space, sucking you through and killing you.
* Shadowgate used it as well when you hit something, giving you a view-covering "POW!"
* Shadowgate, which brings, "The Reaper Man stands below, waiting to catch you" instead.
* Shadow gets this treatment quite often in fanfic. When he's not being a
* Shadowgirls Chrissy, even though he still loves Charon to some extent, and Charon becomes the town bicycle.
* Shadowgirls has the Shadowchild figure and most recently the Merv Hat.
* Shadowgirls is treated like dirt by just about everyone at school because of the circumstances surrounding her birth. Fans of the book, however, want to give her a hug whenever she's feeling down.
* Shadow Girls is very uncomfortable when her daughter Rebecka finally gets around to asking because she doesn't know and that can only serve to remind Becca of her reputation as the bastard daughter of the town slut.
* Shadowgirls: Regular and Artist Edition. The latter comes with a sketch card and a page of original artwork.
* Shadowgirls. Robert chooses to be sacrificed, while his allies die in battle.
* Shadow Girls, set in Innsmouth and literally billed as "H.P. Lovecraft meets the Gilmore Girls" by its creators
* Shadow Grail has Adalaide Lake, a water witch and a close friend of the protagonist
* shadow has horns when angered. It's heavily implied an actual Seraph finally defeats him.
* Shadow" has Meg being revealed as a villain and the brothers finally reuniting with John, albeit briefly.
* Shadow Hearts. Abandoned when the child's soul passed on, it now despises all humans with an anger born of deep sadness.
* Shadow Hearts actually actively parodies this with his Grand Papillion identity—in which he wears a large butterfly mask, but rather than magnifying his powers, it magnifies his tendency towards over-the-top posing and silly heroic pronouncements.
* Shadow Hearts attacks you at one point. This is Lucia and Carla's pet, Andre... but they don't mind you beating up their cat because, frankly, the cat didn't have a reason to hurt you and you were just defending yourself.
* Shadow Hearts: Beating the game allows you to keep your Harmonixer forms from the very beginning....even the ultimately powerful Seraphic Radiance. Only problem is obtaining enough SP to do so.
* Shadow Hearts being able to summon monsters, to Mata Hari being pulled into a quest to save the world from evil sorcerers.
* Shadow Hearts), but under the right circumstances the protagonist can actually force an apology from four of them. Sanity loss isn't even permanent or damaging for the protagonists.
* Shadow Hearts claims that his scheme will prevent the horrors he has foreseen, warning the heroes that standing against him will allow humanity to unleash many horrors in the coming century. They ultimately resolve to face whatever is coming, with the first game concluding on a note about the start of the War.
* Shadow Hearts, considering his bright red-blue costume (with a glowing deely-bopper antennae on the headpiece), and his habit of trying to hide... by holding up an American flag in front of himself. Did we mention he also works for the CIA?
* Shadow Hearts: Covenant are discussing losing something important to them with sad music in the background. It's about a porno mag.
* Shadow Hearts: Covenant, has ley lines serve as a very minor piece of the plot on the second disc.
* Shadow Hearts: Covenant If you follow its advice, your characters get lost in the forest forever (complete with a creepy message) and thus, Game Over.
* Shadow Hearts: Covenant: In order to hide behind walls, the wolf gets up on its

hind legs and peers around the corner.
* Shadow Hearts: Covenant, is a wolf who occasionally shows himself to be at least as smart as the main cast, plus a fair bit more savvy. Like Snoopy, he doesn't actually talk — except in a sidequest of his where he converses with other wolves.
* Shadow Hearts: Covenant is described by her own teacher Carla as "slow".
* Shadow Hearts: Covenant, it takes you about five or six hours and a couple dungeons to travel from the game's real starting place in the Ardennes Forest to the first major destination, Wales, as the party travels through Paris and then has to find a ship willing to travel to Britain during the height of World War One. From Wales, the party instantly and effortlessly travels to its next destination... Florence, Italy.
* Shadow Hearts: Covenant, Joachim has a damage-or-OHKO attack that launches an enemy high into the sky. The player will know it succeeded if the enemy creates a twinkle.
* Shadow Hearts: Covenant, Karin was consistently hostile to Anti-Hero Yuri Hyuga, and once gave him a slapping. In one particular dungeon, she begins to hallucinate and Yuri slaps her out of it. She immediately starts acting gushy and switches to permanent Tsundere mode.
* Shadow Hearts: Covenant, one of the villains is giving a monologue about how the party is doomed, etc. However, he's doing this while sitting on a floating pillow, leading to the party discussing how the pillow floats. When he finishes, Yuri has only one question: "Where can I get one of those pillows?"
* Shadow Hearts: Covenant. See her starry-eyed expression at the end of the Man Festival.
* Shadow Hearts: Covenant sends Yuri back to the beginning of the first game looking exactly like he did in the original's opening cinematic, but apparently with all his memories of the future, while the other heroes are shuffled through time the regular way.
* Shadow Hearts: Covenant that was once a stereotypical Dwarf but his hatred of humankind warped him into a creature resembling a bug-eyed alien of some sorts.
* Shadow Hearts: Covenant universe is vastly different from ours, giving her at least a chance at not getting put against the wall in 1917...
* Shadow Hearts: Covenant, unless the player makes a wrong trade and ends up with worthless junk (or a small fortune in cash).
* Shadow Hearts exorcist. It takes them a very long time to admit it, but they're pretty head-over-heels for each other.
* Shadow Hearts features this in Joachim Valentine, who first appears as the masked Grand Papillion. One of his special abilities is that every now and then he'll don the mask in a fight and receive a massive stat boost.
* Shadow Hearts: From the New World, and Johnny will simply kick in the doors it was locking.
* Shadow Hearts: From the New World bust into Al Capone's prison cell they find that it's well-furnished and quite comfy, as a nod to the Real Life situation mentioned below.
* Shadow Hearts: From the New World is some ridiculous object attached to a sword hilt. His ultimate weapon is literally a giant shish-kebob.
* Shadow Hearts: From the New World. It does no damage, but it drains Stock from an enemy and gives it to him.
* Shadow Hearts: From the New World. Surprisingly; he implies that a lot of the cases are simply helping someone track down missing pets, and takes a case offered by Gilbert simply because he wants more excitement in his life.
* Shadow Hearts: From The New World takes place shortly before the Crash, but doesn't really deal with it.
* Shadow Hearts game, the God of Death embodied as Fox Face doggedly hunts Yuri through half the game, apparently having a major grudge against him that is never spelled out, beyond wanting to help the monsters killed by Yuri take their revenge. Implied to be one of the innumerable lesser death gods as common in Japanese mythology, as opposed to the ultimate personification of Death as in Western

mythology.
* Shadow Hearts has a great example of this when you look at Yuri and Alice's relationship.
* Shadow Hearts has a lengthy sidequest you aren't given a warning the cutoff is coming and the Seraphic Radiance sidequest isn't hinted at anywhere. Come the sequel and you find out that the characters in-universe canonically got the bad ending.
* Shadow Hearts has a name which is also a capsule description of them. Not an actual name from the game, but an example of what this means would be "Nervous Man Monterey".
* Shadow Hearts has a rare double-subversion of this trope: Yuri, upon meeting Ishimura, who was planning on adding a new front to the war, and thus more suffering (A rather slimy fellow). As Yuri was about to attack Ishimura, he was confronted by the guy's grandson. Instead of backing down, he pushes the kid aside, and brutally kicked the old man repeatedly, but the subversion gets subverted when he breaks down and is unable to kill him.
* Shadow Hearts has Fox Face, referred to variously as "Grim Reaper" and "God of Death". As a more traditional Japanese version of Death, he can be defeated, banished, and eventually destroyed.
* Shadow Hearts has the problem of the translators turning all R's into L's, and all B's into V's. There's a character called Halley - didn't it occur to anyone on the translation team that his name might be Harry?
* Shadow Hearts. In the third game, Roswell is where the heroes find septucentenarian Roger Bacon and vampire Hilda Valentine, having crashed when their flying machine ran out of gas.
* Shadow Hearts is a megaperv toward Alice after they first meet, contemplating molesting her in her sleep, and telling monsters that literally want to eat them "If anyone's going to eat her, it's me!" He knocks it off when he starts to genuinely care for her.
* Shadow Hearts is likely as or more naive than the male lead, although he's too crazy to show it.
* Shadow Hearts is playable only briefly, but manages to annihilate a squadron of thugs due to his souped-up stats. He then proceeds to save an old man and befriend a child.
* Shadow Hearts is set in the mid-twenties, and one plot thread involves the Chicago mob war.
* Shadow Hearts is to call it to Earth so that it will lay waste to the planet.
* Shadow Hearts, it gets worse and worse as the games come out, and by the time we reach From the New World, we have South American Ninja, aliens, a giant talking cat who is a gangster, and the main character dressed like a teenager from the 90s... in what is supposed to be the 1920s.
* Shadow Hearts: Johnny Garland has one, but it's less a laser blade and more pure evil channeled into his knife.
* Shadow Hearts, large snails that feed on human blood, Megafilaria and Gigafilaria (magic-powered leech-like creatures) and Gatorback/Scorplinus (heavily-armoured scorpions).
* Shadow Hearts, little he does is overtly homosexual, with the exception of a couple comments he makes throughout the game.
* Shadow Hearts makes sure to retain the beard even after transforming into a horrible demonic sin against nature.
* Shadow Hearts most likely went off of the good ending to ''SH2'', though this is up for debate.
* Shadow Hearts: New World, your guitar-playing bard can eventually pick up a spell that costs 750 mana — more than you're likely to have until well beyond the end game and as you get this around the 98% completion milestone, you're almost done anyway. Granted, the effect is bad-ass (Third Key effects on all party members for a round), but it's instantly dispelled by bosses, who are pretty much all that's left by then.
* Shadow Hearts. One of them makes outfits for dolls, and the other sells items

(and often likes to comment on the [male] main character's appearance), but only if you collect naked men trading cards to get his "creative juices" flowing.
* Shadow Hearts onto his shoulder and releases about twenty missiles, which rain down on the enemy.
* Shadow Hearts on using his power. The sequel repeats this pattern, with another epiphany.
* Shadow Hearts sees Rasputin doing this with the Sapientes Gladio airship. Yuri responds by becoming Amon and blowing the ship to pieces.
* Shadow Hearts series all myths are true, though very often in ridiculous, bizarre and over the top ways.
* Shadow Hearts series (at least in the second game). Your characters have "affinity" for one another, which affects how close they stand together in battle.
* Shadow Hearts series. Harmonixers, such as Yuri, can transform without using up their turn... you can even revert to human from a demonic form, transform into a DIFFERENT demon, peruse its attacks and decide that none of them are any good, revert again, pick a third demon-form, and THEN unleash one of its attacks — all while the monsters are patiently waiting for you to just get it over with already...
* Shadow Hearts series has, in its first game, Koudelka, a scene between the titular heroine and Edward getting drunk and telling each other their stories. It takes a sad turn when they reveal each other's pasts.
* Shadow Hearts series uses this literally as his ultimate weapon. It's acquired after his sidequest, where it's revealed that his dead daughter's soul lies within his puppet, saving him from a demon. The string manifests as their filial love; Her devotion to her father, and his to his daughter. (For reference, he attacks with the puppet, and puppet strings are the weapons, adding attack power and the like.)
* Shadow Hearts set on kick-starting Judgment Day. Because he sees his end goal as basicly being able to undo all the damage he does along the way and then some, he remains polite, friendly and jovial the whole time. He steps over bodies, donates tomes-of-eldrich lore to mad-men, and practices necromantic rites with a pleasant pasted on smile and kind tone as is usually reserved for the average tea-party.
* Shadow Hearts suffers from this after being revived with the power of Malice.
* Shadow Hearts: The first game has kappa as enemies. It notes their hunger for human flesh, a characteristic often absent from modern works.
* Shadow Hearts. The heroes on the other-hand don't seem to care and just aim to beat the snot out of the primordial space titan that has come down to bring about the Apocalypses.
* Shadow Hearts, the party is briefly trapped in a village haunted by an onryo named Li Li.
* Shadow Hearts trouble in the area is being caused by the mayor of nearby Bistriz.
* Shadow Hearts upgrades Joachim's Grand Papillion form into the Great Question... which is functionally identical to the Grand Papillion, although noticeably more powerful.
* Shadow Hearts upon you which can either add fake segments to the ring, remove the segments altogether, make the ring spin either faster, slower, in the opposite direction or erratically, or simply shrink the ring so small that you can barely see it (made easier if you have a mahoosive television, incidentally). There are also some accessories that do the same, but with good tradeoffs. One removes the visual indicator of where you're supposed to hit, but doubles the amount of damage you do. It's not too hard to learn where to press X, so it's a fairly good accessory to use. Another (not present in the first game) triples your damage, but you not only can't see the hit segments but also can't see the needle showing where you're even hitting. Needless to say, this is much harder to use properly.
* Shadow Hearts were played for laughs… including featuring a character who was so incredibly unworldly that he didn't realize what was happening and thus didn't object. It's even treated as a joke when the "treatment" is given to a fourteen-year-old boy.
* Shadow Hearts?" When Orobas asks what she means, she demands to know what he's going to do with the world once he conquers it. Orobas stammers for a bit, and then

mutters that he'll have to think about it... at which point Anastasia tells the party to just beat him down.
* Shadow Hearts, with the added twist of the individual paths being tailored to exploit the weaknesses of each group. For example, the group which includes your most potent mage has to traverse an anti-magic dungeon.
* Shadow Hearts, Yuri reattaches his severed arm, exhibiting a remarkable regenerative ability that is never alluded to again.
* Shadow Hunter. But experienced players knowing he is experienced knowing he knows they know he is experienced will see right through this charade, but an experienced player who knows he plays with experienced players who know he is experienced and that he knows they know...
* shadowhunter. In addition to their preferred weapon, they also carry seraph blades, but often they also have throwing knives or other secondary weapons with them. Isabelle Lightwood takes it to the extreme. Nephilim are trained to be able to fight unarmed in an emergency.
* Shadowhunter Peril. A memorable moment is when she is in the middle of a battle with Taylor. She's trying to kill Taylor...while at the same time commenting on her hair and asking if her questions annoy her.
* Shadowhunter Peril and raining a fiery storm down upon the Big Bad's capital city. Currently they're in the middle of the final battle, so there's no way of knowing who's going to win, especially with Lilith and Valentine still alive.
* Shadowhunter Peril has Veronica Carter, who drives like a total maniac...and her vehicle of choice is a TANK. She enjoys blowing stuff up with it as well as driving, although it did come in handy during the Assault on Alicante arc, where she distracted a horde of demons, by shooting tank shells at them. Still, Ethan is scared of driving with her, and Umbra manages to find an excuse not to go with her.
* Shadowhunter Peril He's currently king of the Infernal Worlds, so where that leaves Lucifer in the hierarchy is unknown.
* Shadowhunter Peril. He's the only character in the series to be an Ushubaen, a human with demonic energy flowing through his body, yet still manages to retain a soul that prevents him from imploding with the force of a small bomb. He is powerful enough to fight and actually injure Puriel, and angel of the Almighty himself. Nuriel, another angel, states that he once fought another Ushubaen with two of his brother angels, and that the Ushubaen completely curb-stomped the first angel to death, then killed the other one and severely wounding Nuriel before it was brought down. And since Ushubaens never stop growing in power, it's certainly possible Oblivion will grow to become an omnipotent evil being of destruction, considering how young and powerful he already is...
* Shadowhunter Peril, through a technicality, falls under this category. When she originally existed in Fan Fiction, Veronica was a psychotic vampire who had bullied her three siblings into working for her in her quest for total destruction of everything, murdered her rebellious little brother's best and only friend, killed and drained blood from the bodies of humans well after she was full satisfying her thirst, and went on a celebratory trek across of vandalism across the country after she killed her own army and attacked the opposing one (her idea of vandalism is burning everything she sees). Her reasoning for all this is because she "was just bored".
* Shadowhunter Peril wears a long, badass, black duster. Simple yet elegant, but it got destroyed in a fight with Lilith. However, he easily replaced it.
* Shadowhunters, Alec's crush on Jace was common knowledge to pretty much everyone, even before Alec was ready to admit it to himself.
* Shadowhunters all look similar enough it's very believable they're relatives.
* Shadowhunters, angelic Runes are utilized by the titular Shadowhunters to perform feats of magic and physical enhancement.
* Shadowhunters are effectively a human sub-species gifted with angelic blood and paranormal abilities for the purpose of protecting the world from demonic invasion.
* Shadowhunters, at which point he gets a giant goofy smile, blushes, stammers, and then immediately flees.
* Shadowhunters can have a variety of this with vampires, warlocks and other

supernatural characters.
* shadowhunters can move fast. In fact, both have a fighting style, which has speed as an essential part.
* Shadowhunters, Clary and Simon are each other's closest friends and confidantes.
* Shadowhunters Clary travels to an alternate universe where Shadowhunters defeated demons hundreds of years ago, causing there to be no need for them, while downworlders went into hiding to blend in with Mundane's. Clary and all her Shadowhunter friends ended up growing up with Mundane lives.
* Shadowhunters comfortable in her body. Partway through season 1 however, pressure from her family to adopt a more responsible role as a diplomat and leader cause her to adopt a more conservative look.
* Shadowhunters effects of an actual vampire's bite, but is less intense yet longer-lasting.
* Shadowhunters episode "Of Men and Angels". When Magnus is running out of strength to continue healing Luke, he asks Alec for help. Alec replies by holding out his hand and telling him to take his strength, whatever he needs to keep going.
* shadowhunter, Simon is transformed back into a human, and a short time later he becomes a shadowhunter.
* Shadowhunters. In the books, the Shadowhunters used ancient magic and tools to track demons. In the show, the Institute is shown having lots of high-tech machinery and security systems to do the tracking.
* Shadowhunters is set in New York but is filmed exclusively in Toronto.
* Shadowhunters — Magnus and Alec act as the Team Dad couple to the rest of the characters, Magnus is most notably a father-figure to Raphael and Simon.
* Shadowhunters saw his audition and said he'd be a better fit for Alec Lightwood (who is still a major character in the series).
* Shadowhunters, Simon and Raphael rarely get along, and Simon hates being a vampire, but the second a werewolf shoves Simon, Raphael and the other vampires immediately jump to his defense.
* Shadowhunters. Supposedly he has had 17,000 relationships over the last few centuries, and he's openly a bisexual man.
* Shadowhunters: The Ravener demons are shapeshifters who also have jaws that split open in four different directions like petals, with stingers.
* Shadowhunters. The series indeed has vampires, warlocks, werewolves, and countless demons.
* Shadowhunters, when Isabelle lends Clary a rather low-cut dress to wear at a party, her comment to Clary has some of this:
* Shadow in season 3. He helps Sonic and his friends out when they need it, but he remains distant and is not an actual member of the team and sometimes ends up in conflict with them due to his extreme measures.
* Shadow in the Cloud: Williams, the Maori pilot who stands out in the otherwise all-White crew.
* Shadow: It's never made clear if Ziyu had Jingzhou's mother killed and sent assassins after him to tie up loss ends, or if the king of Pei did it so that he could have one of his own men save Jingzhou and turn him against Ziyu.
* Shadowjack Watches Sailor Moon for Usagi exiles Mamoru to the couch. This confuses him as they are neither sleeping nor even living together yet. Though in the end he decides to go along with it anyway.
* Shadowjack Watches Sailor Moon has a frustrated Rei trying to get clarity on her dreams from the sacred flames. Instead what she gets is this.
* Shadowjack Watches Sailor Moon has Future Ami explain why she thinks this is so to past Ami.
* Shadow Keep: The Search, you... keep on playing. You can explore a bit, look around all the various maps, etc. If you'd already defeated all the monsters, there's nothing else to do. If you quit the game, you're called a coward and a knave — even if you've already defeated the Shadow King!
* Shadow Kiss, Brandon Lazar and Brett Ozera explained their torture wounds by claiming they fell.
* Shadow Kiss of them, at least, since a huge plot point of their relationship is

that it's forbidden.
* Shadow, Knuckles eventually ends up having this relationship with Sonic over time. Their usual spats lack any real malice and are treated more like playful teasing.
* Shadow Kraata, colored purple, represent the "highest" and most dangerous form of the evolution of Kraata slugs.
* Shadow Kunikazu in particular is a much more sympathetic character.
* Shadow Lake will briefly wake up and attack the Master Detective before collapsing again right before hitting her.
* Shadowland Power-Man tie-in, Victor Alvarez the new Power-Man is confronted by his mother about where he's getting all of the extra money he's been providing to help pay the bills since she found out he actually quit his old job working at a pizza parlor (and the money he's been bringing in is too much to be explained by a job like that anyway). She accuses him of drug dealing, not knowing he's been earning money as a superhero for hire.
* Shadowlands agrees to marry Joy in a civil ceremony so she can stay in England, as a personal favor. He eventually falls in love with her, and they have an actual wedding.
* Shadowlands are created whenever there's a massive act of slaughter in a concentrated area. They're half-open gates to the Underworld that open all the way when night falls, and are often populated by hungry ghosts and zombies.
* Shadowlands are mindless creatures which emerge from the In-Between to devour anima. When there aren't easy sources to consume, they'll devour the fabric of the afterlives themselves, causing entire portions of the realms to break off and drift into the In-Between.
* Shadowlands at the time, turned both the company and their flagship game into a laughing stock.
* Shadowlands: Both Jack and Joy were in or near middle aged at the time of their marriage.
* Shadowlands combines Joy Gresham's two sons into one. This is also done for the film version; the original teleplay kept both sons.
* Shadowlands. He merely served as a regent during Classic because the aforementioned Anduin was too young to rule.
* Shadowlands Kyrestia the Firstborne, the Archon of Bastion, who is normally friendly and thus unattackable. Turned out that she had a special on-death text prompt and trigger that kills the entire party, which led to speculation that keeping her alive was originally part of the objective of the boss encounter she appears in.
* Shadowlands sees Sylvanas Windrunner get her comeuppance for her many crimes, as the Jailer leaves her to be captured by the Alliance and Horde after her final defeat.
* Shadowlands, the story of C. S. Lewis's marriage to Joy Davidman Gresham, ending with her death. True in broad outline, but the film deletes one of Joy's two real-life sons. On Lewis and Joy's vacation in Ireland, he drives a car, while in real life Lewis notoriously never learned to drive. The film omits a major experience they shared, a trip to Greece after Joy's cancer returned. As a minor point, Lewis's brother Warren is shown as present at Lewis's first meeting with Joy; he wasn't. Most importantly, Lewis was far from the ivory-tower bachelor professor, ignorant of both women and suffering, portrayed in the movie. His mother died of cancer when he was a boy, and he was wounded in World War I. Until shortly before he began corresponding with Joy, he and his brother shared a bustling household with the widowed Mrs. Jane Moore, whom Lewis considered his foster mother, and her daughter.
* Shadowleague books, Aliana convinces Galveron that this might be true, in which case he would be most fit to be leader.
* Shadowleague books- he has the personality of a bad rainstorm, whereas she is never seen to frown.
* Shadowleague books, pokes fun at this trope on occasion, saying that the only truth in it lies in the fact that men think it's true, and thus avoid strong women

because they don't want to be looked down on.
* Shadowleague—the hundreds of different sentient creatures throw them off.
* Shadowleague who died of the invading vampire-creatures, the plague or various other causes throughout the upheaval up until the main characters fix most of it.
* Shadow leeches, on the other hand, are more difficult to describe... they look like
* Shadow Link holds this attitude toward Princess Zelda at one point, in the manga adaptation of
* Shadowlords, has the option of starting a rather interesting romance with him.
* Shadowlugia249 (infamous in the fanfiction mocking community) seems to follow a very strict formula in many of his stories: loner protagonist hates his life, buys a toy in the form of an animal from a video game and gets transformed into said character by magic. After his transformation said loner is always happier with his life. This is a more jarring example, especially to those outside the small niche he's aiming these fics at.
* Shadowlurker meme, a.k.a Horrifying House Guest, Never Alone or Uninvited Guest, the advice animal version of this.
* Shadow Madness had a disembodied telekinetic head by the name of Xero von Moon. He was kept alive (and presumably afloat and able to speak) by a thin metal ring at his neck, and fought primarily with kinetic bolts (though he could resort to a headbutt).
* Shadow Man contained some genuinely creepy music and sound effects throughout, but none more so than the theme to the area called the "Playrooms". Here, a decidedly on-key music box plays along with the background noises of giggling children, horrified screams, and the bone-chilling sounds of someone being ripped apart with power tools.
* Shadow Man features the Dullahan as one of the Grigori Sephiroth, and his head detaches and flies about the arena while his invulnerable body chases the player. Oh, and Shadow Man calls him an asshole.
* Shadow Man from the comic series and games, would be an example here. He's explicitly a zombie through voodoo, though only at night, or in Deadside. Otherwise, he's a living human.
* Shadowman has the Cadeux, 100 of which can be traded for a life bar extension.
* Shadowman. How a gun that shoots spirit energy can damage a rock in the first place is a different mystery.
* Shadow Man is a vast zombie-ridden wasteland with sprawling rivers of blood where everyone goes when they die.
* Shadow Man: One level is through a crashed and bashed subway system in order to get to Jack The Ripper. No, really.
* Shadowman the main character is tasked with tracking down and killing five serial killers and take away the dark souls that empower them. Three of them are in the same prison, and have started a riot. Because the lockdown prevents the player character from exploring the whole prison, he must use portals in Deadside to access different parts of the prison.
* Shadow mastiffs are evil canines from the Plane of Shadow, capable of terrorizing their prey with their howls, or disappearing completely into patches of shadow from which to stalk their victims.
* Shadow may be even more obvious in fact. He's almost as strong as Knuckles, as fast as Sonic thanks to his
* Shadow, meanwhile has hoverjet-equipped white and red shoes that look
* Shadow Men both wear these in one scene, apparently just so artist Andrew West could have their enormous monitor reflected in the shades.
* Shadow-Mirror organization: They actively seek to use endless cycles of war to rapidly advance Human knowledge.
* Shadow Mirror's Soulgain is referred to as Mustache Man (or White Wrath in the English version, despite it being blue), while Zweizergain is referred to as Horned Man. The Shura gods Ialdaboth and Valefor are both referred to as "the haired one" by the EFA until Folka joins and tells everyone their actual names. Meanwhile the Shura refer to Compatible Kaiser as the "Red Demon".

* Shadowmoor's cinders, fire elementals left bitter and hateful by their smothered flames, posses some knightly cards as well. Examples include the
* Shadowmoor while the plane is in its peaceful, pastoral Lorwyn phase.
* Shadow Moses Project in Unreal Engine 4. After hopes that the project would be officially supported, the project was cancelled in 2016 due to a cease and desist.
* Shadow n Essence. An interesting idea, but nothing really came of it.
* Shadow. Not necessarily lost, but has no contacts with other planets, reverted to feudalism and a bicycle is the most complex device they can make. The planet is tidally locked and the only habitable area is a former island arc and a continental slope in a dried ocean, which means very steep mountains. The only reliable fast transport are the local giant "eagles", which led to formation of military aristocracy of people small enough to ride them.
* Shadownova, a group of normal humans (and a few Espers) who have decided they want complete control over everyone outside their own group.
* Shadownova and is extremely angsty and emotionally vulnerable most of the time.
* Shadownova are described as Espers. While this implies psychic powers, only a few of them really fit the description of a psychic.
* Shadownova is suddenly stabbed in the neck by Cam, even though he was bleeding to death anyway, interrupting his last words to Iris.
* Shadownova: the crowd's lack of features is a representation of how Iris sees them.
* Shadownova the Everto do this a lot. One attack on a group of people who can see through the masquerade sets the entire plot in motion. Cameron, one of the Everto, then tries to make Iris, the only survivor, feel like it's her fault everyone had to be killed because she could see through the masquerade even though the ability to do so is completely involuntary.
* Shadow of a Doubt that her husband Gordon had an interesting idea for a novel that she thought would make a good movie. His idea, called "Uncle Charlie," was based on the true story of Earle Leonard Nelson, a mass murderer of the 1920s known as "the Gorilla Man".
* Shadow of Another Hero, Link looks identical to a boy that Zelda once knew, except that the current Link has green eyes.
* Shadow of Another Hero: Link wonders if Dark Link is his shadow or whether he's the remains of a previous Link.
* Shadow of Another Hero, Zelda goes into a crying fit after learning that she has been asleep for roughly 700 years.
* Shadow of Atlantis and later for the 32X, was ultimately canceled in 1997.
* Shadow of Chernobyl has Spetsnaz special forces soldiers and Military Stalkers, who have the two best non-exosuit armors in the game.
* Shadow of Chernobyl, when you enter the Yantar factory complex, you'll come under the effects of Lab X-16's psy-emissions. Your screen will get a whitish-yellowish tint, a strange sound will play every few seconds, and all other sounds (including your own gunfire) will be a little drowned out. The effect is lessened if you have the calibrated psy-protection helmet— it's more pronounced if you have the non-adjusted helmet, and it's even worse if you don't have the helmet at all. Additionally, staying near a Controller or Psy Dog for too long will cause blurred and double vision as you are influenced by their psy-fields.
* Shadow of Destiny, Eike Kusch, a de-aged immortal bishounen with recurring permanent amnesia, gets together and lives happily ever after with his biological daughter Dana, who was switched with another child as an infant in medieval Germany, and brought to the present day as a baby by the manipulative djinn Homunculus, in one hell of an insanely convoluted backstory. Neither of them apparently know they are actually blood-related, and it is unclear whether or not Eike still has eternal youth.
* Shadow of Destiny has fairly limited facial animations, so most of the characters look like this at some point, but Eike spends virtually the entire game in a state of Dull Surprise. It doesn't help that his English voice is fairly monotone.
* Shadow of Destiny: In this game the protagonist Eike Kusch gains the ability to travel through time.In the second chapter he meets a friend who owns a museum

Eckhart Brum whose cat has just had a large litter of kittens.In a later chapter Eike travels to 1902 and meets Eckhart's grandfather Alfred Brum.Alfred has a daughter Sibylla who is lonely and Eike decides to give her kitten.Eike returns to the present and then gives Sibylla one of Eckhart's kittens which will inevitably become its own ancestor.
* Shadow of Destiny more times before he can discover who is trying to kill him and why.
* Shadow of Destiny. The whole premise is that the main character is trying to change history so that he doesn't die; being killed results in living through the events prior to his death again until he gets it right and survives. Amusingly, in one part of the game it's possible to go through the same conversation for a third time, which results in the main character pre-empting what he knows the NPC he's talking with is about to say.
* Shadow of Destiny uses San Dimas Time; since the time in the present is counting down to the time of your inevitable death, it puts a time limit on all the puzzles you need to solve in the past, even this doesn't make much sense.
* Shadow of Destiny, with Eike and Dana living happily ever after, despite secretly being biologically father-and-daughter, in Ending E.
* Shadow of Doubt movie. Salli complains that such a creature shouldn't be able to move, and Ali responds that the aliens who made it, "... laugh at the Square-Cube Law!"
* Shadow of Freedom, and aren't designed to withstand the bona-fide antitank weapons.
* Shadow of Freedom because the Manticorans, upon finding this out, will either stretch themselves thin out of an obligation to help people who genuinely thought they were receiving Manticoran aid, or leave them to their fate and look like they stirred up rebellions and hung them out to dry. The fact that they do in fact provide significant (but typically insufficient) material aid to the rebels also serves to further inflame relations between the Manties and the Sollies, as the Solarians believe the Manticorans are helping the numerous uprisings.
* Shadow of Freedom raises the stakes with this conversation between Sir Aivars Terekhov and Brigadier Yucel:
* Shadow of Her Own: While talking to Lena, Scrooge McDuck revealed that he blames himself because Magica De Spell created Lena to use against him and abuse her because he accidentally turned Magica's brother Poe De Spell into a non-sapient crow and did nothing to help him. In tears, he hugs and apologizes to her for all the abuse she suffered under Magica because of his pride in refusing to see what his villains could do. Lena assured Scrooge that the abuse she suffered under Magica was not his fault and thanked him for all he did to help her.
* Shadow of Israphel served as the cameraman at the time, and thus the awesomeness was not seen. Subsequently, the fight had to be reshot and took considerably longer.
* Shadow of Israphel they're being voiced), leaving several characters with either incredibly out of place voices or voices that change with every appearance.
* Shadow of Revan between the Republic and Empire is over and the romance must end, either because you're forced to go back to being enemies or that everyone will be busy with other things.
* Shadow of Revan introduces the first full same-gender romance options in SIS agent Theron Shan and sith lord Lana Beniko, both of whom can be romanced regardless of gender or faction.
* Shadow of Rome: The player has the ability to scare opponents into peeing themselves. In fact, it's one of the game's side goals.
* Shadow of Saganami. In a mild divergence from trope the majority of their instruction comes from officers, such as Lt. Hearns, with the wise old senior NCOs only making cameos. Hearns herself also qualifies, as she's incredibly junior to be their Officer Candidate Training Officer, having only a couple of years on them.
* Shadow of the Bear is a philosophically-inclined collector of art and literature.
* Shadow of the Beast, despite its high-fantasy theme, has airships floating across the sky for no clear reason.

* Shadow of the Beast is set in a Roger Dean-inspired fantasy world called Karamoon, which features sword-wielding orcs, medieval architecture, goblins, morningstars, mechanical claws, jetpacks, and (in the third game) robots.
* Shadow of the Beast, which gave him a breastplate). In the third game he is fully human and wearing modern clothes, but still shirtless (the opening depicts him with a shirt, but his in-game sprites are clearly lacking).
* Shadow of the Colossus , a blogger reporting on giant monsters found around the world. The campaign featured videos - both amateur and professional - of five of the Colossi being unearthed.
* Shadow of the Colossus, all of the music is orchestrated. It also only starts playing when you encounter the Colossi.
* Shadow of the Colossus are created from the earth itself. Their hairy bodies are actually composed of dead grass, and once they're defeated, they crumble into dirt and mold themselves into the ground.
* Shadow of the Colossus because of the rather low placing of the weak spot.
* Shadow of the Colossus, could be counted. If she's hit with an exploding arrow, falls from a low cliff (which could permanently cripple a real horse), or gets shot by Basaran, the most she'll do is limp for a while — and she'll even stop early if you jump on her back.
* Shadow of the Colossus featured sixteen colossi that are not named in-game. Eventually names started to pop-up with sources claiming to be from either Dengeki or Famitsu, which are usually Word Of God sources for Japanese games. Fumito Ueda eventually stated in the official artbook that none of the colossi have names — only nicknames given by the staff during development.
* Shadow of the Colossus features a huge assortment of weapons and items, all of which can only be acquired after you've beaten the game. They can't be used in the Time Attack mode, but have some use in a second playthrough. The exception is the Sword of the Sun, which enables you to use a light beam anywhere. In this game, light beams direct you to the next Colossus or, if you're in battle, its weak points. By this stage of the game, you'll have fought all of them at least twice and know where their weak points are on both difficulty levels.
* Shadow of the Colossus for the entire "fight", only trying to shake you off if stabbed.
* Shadow of the Colossus has this as a main gameplay mechanic, where Wander's Sword is used to locate the next enemy, as well as its weak points.
* Shadow of the Colossus? Indeed, director Fumito Ueda is on the record as wanting each player to form their own story, and boy has the fandom taken him up on that.
* Shadow of the Colossus in the artbook, it's the longest colossus at 200 meters (656 ft.) long.
* Shadow of the Colossus is a case of this, but then again, there is never any doubt that the Colossi would leave you (and the rest of the world) alone. You are the one going into their lairs and stabbing them in the head or armpit because of a deal with an ancient, morally ambiguous entity.
* Shadow of the Colossus is very short, roughly 7 hours but only if it's your second (and so on) playthrough. Because in your first one you probably didn't know how to kill the Colossus, so one battle could easily spanned for 1-2 hours. It is after all, also a puzzle game.
* Shadow of the Colossus, Malus is described as being "similar to a lighthouse. What with its seaside location, glowing bangles and probably being able to sink an entire fleet of ships."
* Shadow of the Colossus: Mono was apparently sacrificed due to a cursed fate shortly before the story starts.
* Shadow of the Colossus. Plus some help from a horse that's apparently Made of Adamantium.
* Shadow of the Colossus reasons, since their world has obvious supernatural elements incorporated into it.
* Shadow of the Colossus runs at maximum speed for as long as you want her to (unless you run her into a wall or cliff, in which case she'll halt), requires no care, is incredibly stoic around the giant monstrosities that are the colossi, and

when she's thrown around by them she never gets injured for more than a few seconds.
* Shadow of the Colossus. She's got the birds and fawn and everything. Even the squirrel looking up at her.
* Shadow of the Colossus takes this as a primary theme. You have to kill Colossi to advance the story, but it's heavily implied that at least some of them are perfectly peaceful and they don't deserve to die.
* Shadow of the Colossus, there are two colossi that swim through sand. One essentially behaves like a large sand dwelling snake, whereas the other one actually flies, but when first encountered, is living in the sand, and breeches like a whale.
* Shadow of the Colossus unlocks a Hard Mode, as well as Time Attack options. Successfully completing Time Attacks allows you to gain magical items in what is normally an item-less game. Your stats will also carry over, and you'll need to beat the game multiple times if you want to build up the strength to climb the shrine to the top.
* Shadow of the Colossus via this method, with the creatures often having more than one, being in really hard to reach places, or requiring a lesser weakness be exploited before the real one opens up. Finding the weak point is fairly straight forward. Staying on the thing long enough to damage it while it bucks about trying to throw you off it? Less so.
* Shadow of the Colossus vomit since it seems to be gaseous, but the general effect is the same.
* Shadow of the Colossus, Wander can climb mountain-high monsters and still be unable to scale a few mountains in the valley with relatively gentle slopes.
* Shadow of the Colossus, Wander will get progressively dirty and bloodied through the game, as expected of someone who fights walking mountains. He won't immediately show it though, as his appearance only updates after a colossus dies and the respective cutscene plays out.
* Shadow of the Comet had a envelope which contained some of Bolskines letters and a report from the mental institution he was committed to, detailing his mental health decline.
* Shadow of the Comet, the player gets to read a few pages of the Necronomicon, although he's been warned that it would drive him crazy. (he can't move forwards in the plot without doing so) Apparently, it's safe to read it as long as you don't take it away from the room it was stored in.
* "Shadow of the Condor". When Bandit first meets Baron von Freulich he growls at him. Later von Freulich tries to murder Race Bannon.
* Shadow of the Conqueror after the mission by giving him Blackheart's ship and considerable fortune.
* Shadow of the Conqueror, Ahrek prompts him to make a joke of his own. Daylen responds with this:
* Shadow of the Conqueror also attained the same rank, with the golden mark to prove it.
* Shadow of the Conqueror also doubles the user's speed as a secondary effect.
* Shadow of the Conqueror, and not the least bit shy about letting the world know how they feel in the most bombastic manner possible.
* Shadow of the Conqueror being linked to the person who provided the blood.
* Shadow of the Conqueror, but women are the heads of every household and a singular queen is the ultimate ruler.
* Shadow of the Conqueror by giving the most infamous and feared pirate in its setting the name "Blackheart."
* Shadow of the Conqueror. By the end, he knew that wasn't true, and that he'd become a compulsive rapist of young women in every way, racking up over four hundred victims.
* Shadow of the Conqueror, can achieve the same effect with a steel warsword.
* Shadow of the Conqueror can become Lightbinders, fearing that the individual nations will form their own armies of Lightbinders if they figure out the secret to the Vigil. When Daylen gains those powers by accident, they immediately start

hunting him down to force him to join their ranks.
* Shadow of the Conquerorcontinents floating above Tellos, so relative to Tellos, those fit this trope.
* Shadow of the Conqueror could bring to his forces by inventing new engines of war. Even in the present day, he remains the most skilled sunsmith who ever lived, creating things that other engineers regard as impossible wonders.
* Shadow of the Conqueror dead. Daylen recognizes this, which is one reason why he absolutely refuses to kill them.
* Shadow of the Conqueror ended up pregnant. His "contraceptive measures," however, failed spectacularly, resulting in dozens or hundreds of bastards.
* Shadow of the Conqueror. For bonus points, he then throws said rapist straight through a brick wall and out into empty air to plummet to the street below.
* Shadow of the Conqueror, Hamahra was ruled by an aristocracy evil enough to murder Daylen's entire family after he started a revolution against them.
* Shadow of the Conqueror. He immediately wishes that he didn't have this image in his head.
* Shadow of the Conqueror, he's brought aerial destruction like nothing his world has ever seen, as well.
* Shadow of the Conqueror, he takes the opportunity to tell him and everyone else that he's a chronic liar who tells millions of lies.
* Shadow of the Conqueror in order to defeat Dayless and destroy the Dawn Empire.
* Shadow of the Conqueror is to get back home to reunite with his beloved sword.
* Shadow of the Conqueror makes him instantly regret this, and he apologizes by the next page.
* Shadow of the Conqueror out once and for all. The problem was that he tried to do so via militaristic expansion, hence his title, "the Conqueror."
* Shadow of the Conqueror possess this ability, which they can also use on themselves in a pinch. This and their religious nature makes them basically a stand-in for D&D-style clerics.
* Shadow of the Conqueror shortly after he gets his powers, starts slaughtering criminals as his first act of fighting evil. While there is a law in place to clear people of killing rapists and murderers that they catch in the act, he eventually is forced to turn himself and be interrogated to determine if he was truly justified or just committing murder.
* Shadow of the Conqueror starting with every single aristocrat in Hamahra, then every noble in the neighboring countries, and then anyone who spoke out against the Empire or Emperor Dayless.
* Shadow of the Conqueror. The de facto religion of Hamahra, Lightseeking, seems to be based on this.
* Shadow of the Conqueror. The results are ... messy, to say the least.
* Shadow of the Conqueror: The sky is bathed in eternal light and it never becomes night. When there is a night, the night lasts for decades and monsters called Shade come out.
* Shadow of the Conqueror turning any human caught in it for 24 hours or longer into a mindless creature of pure evil called a Shade.
* Shadow of the Conqueror who only stays alive because he believes it's the Light's will, is happy to accept.
* Shadow of the Conqueror wreak havoc on the younger and less hardened people unfortunate enough to be on board.
* Shadow of the Dragon at Sakura's school, is stated in chapter 19 to have raped at least seven girls.
* Shadow of the Dragon: n chapter 13, it's established that Sakura, Tomoyo, Rika, Naoko, and Chiharu's mothers are similar to their daughters, albeit with slight differences:
* Shadow of the Dragon to destroy Sakura's reputation. One of said boys, Renji, who was one of Reiko's one-night stands in life, knew enough about Reiko to realize it was her: as he puts it, Sakura doesn't play with her hair, insult people, or speak crudely, and couldn't have known the room they did it in was private, all of which Reiko did.

* Shadow of the Dragon who has been causing trouble at the school for a ''very long time) until after she discovers he's been arrested for trying to rape Tomoyo. Of course, this is at least in part because she never returned any of the school's calls or showed up at any parent-teacher conferences.
* Shadow of the Hegemon: Peter and his parents take Bean and Carlotta to Leblon, a real-life Brazilian restaurant in Greensboro that Card often raves about in his review columns. Apparently, he thinks it's so good that it'll survive about a century of the Formic wars and chaos and still exist in essentially the same form!
* Shadow of the Mithril Mountains, Duviel — the Elven queen — describes her race as a withering one.
* Shadow of the Raven's "Annabel Lee" is played on a music box, though the result is more melancholy than scary.
* Shadow of the Templar. In "High Fidelity", Simon admits to his team and to his boss the nature of his relationship with Jeremy.
* Shadow of the Templar, Jeremy Archer has a nifty pair of goggles that have a lot of technology suited for a thief.
* Shadow of the Templar), Jeremy is all too happy to encourage Simon to do so.
* Shadow of the Templar Jeremy is captured and handcuffed by Team Templar. When the team decides that it's safe to release Jeremy from the cuffs, he casually tosses them away before they can even reach for the key.
* Shadow of the Templar, Jeremy, normally calm and emotionally unaffected, suddenly kisses Simon passionately and seems to be about to tell him something important. Of course, they're interrupted before he can get it out.
* Shadow of the Templar makes their current relationship a helluva complicated one.
* Shadow of the Templar, Sandra's jealousy of Mike's relationship with Diana is one of the major things that lead to them becoming a couple at the end of the third book.
* Shadow of the Templars edition attempts to pad this out a little by having Nico's inner monologues during her segments say she's comforted by having George working with her, but since these segments are bolted on to the existing plot she still doesn't act any nicer to George during the bulk of the game.
* Shadow of the Templar, Simon and Jeremy are a perfect example. Despite spending years in an exclusive Secret Relationship and risking their lives for each other multiple times, they are apparently incapable of expressing their feelings for each other. Jeremy just acts like a Tease, and Simon hesitates to even think of Jeremy as his friend.
* Shadow of the Templar's Jeremy Archer gets annoyed with Simon when the FBI agent jokingly calls him Jeremiah. Turns out Jeremy's birth name was Jeremiah Harbottle, a name he gave up when he gave up his life on the streets and became a high level thief.
* Shadow of the Templar straight when the FBI calls him up for help in catching a thief with an identical M.O. and a murderous streak.
* Shadow of the Templar, takes out his jealousy of Jeremy's ex-boyfriend on Jeremy.
* Shadow of the Templar, their general rule of thumb seems to be that "standard procedure" is a good Plan B. All the same, they have a reputation for getting things done.
* Shadow of the Thin Man. Although it's with a horse race. Nick and Nora Charles are looking forward to a relaxing day at a racetrack, but when a jockey accused of throwing a race is found shot to death, Police Lieutenant Abrams requests Nick's help.
* Shadow of the Thin Man, detective Nick Charles slams the phone down without saying goodbye.
* Shadow of the Thin Man, Nick and Nora attend a wrestling match. When the man running it says that they are in for a great match, Nick quips "How do you know? Were you at the rehearsal?". Later on they leave while the fight is still going on, with one wrestler in a painful looking hold and groaning with discomfort. As she passes the ring, Nora tells him that she hopes he gets out of it okay. The wrestler stops groaning and thanks her for her concern in a perfectly normal tone of voice.
* Shadow of the Thin Man; they will tell the press that the same person who killed

the jockey killed the journalist, and the murderer will put forward a suspect to take the fall for both crimes.
* Shadow of the Tomb Raider, Lara lampshades an ancient blade trap that lines an entire wall still being in good working order, but in other locations, the traps/set-pieces collapse just as Lara interacts with them, or were triggered long ago and are now locked in position.
* Shadow of the Tomb Raider through its ear and into its brain, killing it instantly.
* Shadow Of The Valley. Light makes her start killing criminals when she's twelve.
* Shadow of the Vampire, and later says the saddest part of the book is when this fog is lifted for Dracula when he's seen preparing a meal for his guest Jonathan Harker.
* Shadow of the Vampire and that the deaths on camera would be very real as well.
* Shadow of the Vampire him!"), demanding that Schrek not eat the rest of the crew. Schrek then muses, "I don't think we need the writer..."
* Shadow of the Vampire in order to study for his role 'playing' a vampire and is saddened by the scene where Dracula leaves a meal for Jonathon Harker. Schreck then remembers when he used to have servants to do such tasks for him, which reminds him of when he had a wife, family, estates, etc, whereas now he's just a scavenger living in a ruined castle.
* Shadow of the Vampire, was a real vampire who Murnau knowingly allowed to eat his way through the cast and crew.
* Shadow of the Warrior. The former are fairly weak on their own, but are always found assisting other monsters in battle, making it easier for their allies to take you out, and the latter are fairly menacing when cloaked, but drop quickly once uncloaked.
* Shadow of the Wool Ball and its sequel, can be recognized as female because she has visible eyelashes and long hair.
* Shadow of the Wool Ball features an entire planet inhabited by evil cats who invade the peaceful hedgehog planet.
* Shadow of the Wool Ball. In the sequel, it turns out his underlings somehow managed to piece his head back together and he's alive, although with a disfigured face.
* Shadow of the Wool Ball: The end cutscene of every level shows the protagonist running away as the facility blows up. The ending likewise shows the hero and his girlfriend cheerfully running away from a final giant explosion.
* Shadow of the Wool Ball: The episode 2 boss is shown in his introductory cutscene chugging from a bottle, then lets out a loud, echoing burp, followed by a fart.
* Shadow of the Wool Ball: The scrawny-looking wizard cats are among some of the weaker enemies in the game, health-wise. Except for the black-robed wizards, who are beefier and notably tougher.
* Shadow of the Wool Ball: The titular planet, true to its name, apparently resembles a giant ball of wool (with drooping loose bits of tread) when observed from a distance.
* Shadow of Ullanor, the third and final Imperial assault on Ullanor begins with the Adeptus Mechanicus using their reverse-engineered Ork gravitic weapon to throw a few asteroids at the planet. One is converted to hold the rebuilt Imperial Fists Chapter and deliver them (mostly) safely to the surface.
* Shadow on the Sand, followed by the Lorestones in the Magnakai series. Each one Lone Wolf finds allow him to learn a new Magnakai skill by the next book.
* Shadow on the Sand Lone Wolf is confronted with Sharnazim, the elite warriors of Vassagonia, during a trip to their capital.
* Shadow Ops and was forcibly recruited into the US military's Supernatural Operations Corps. Britton's military training gives him an edge over the other members of his "coven" (supernatural squad), and after witnessing the excesses and violence and hypocrisy of the SOC, he falls back to his military upbringing and sense of honor and duty and finally rebels.
* Shadow Ops, hydromancers can control water. They can also either heat up or cool down water, allowing them to generate ice or steam as needed, which makes them

useful as medics for burn victims, or as breachers for knocking down doors or walls.
* Shadow Ops: Latents don't really have a choice about this trope. Those who manifest powers are required to turn themselves in, and doing so almost invariably leads to either military service or a degrading suppression program. Those who do not (or those who manifest Prohibited forms of magic—no, you don't get to choose what you get) are labeled outlaw "Selfers" and either killed or effectively enslaved in secret bases. Those who do wind up in the military are treated as special forces, artillery or support, depending on their powers and strength.
* Shadow Ops, one of the things all Talented can do is "suppress" the Talent of another. It simply involves hurling your power at the other, and the most powerful won't be able to use magic. Most SOC Talents of questionable training or loyalty have a "Suppression Lance", a group of powerful but untrained Talents, assigned to them to restrain the Talent should they go rogue.
* Shadow Ops Oscar Britton learn to integrate his portal-opening abilities with MCMAP. The portals can cut things (open portal, jam something half-way through, close portal, snip) and also enable him to strike from literally anywhere.
* Shadow Ops, protagonist Britton discovers that this is one of the deadlier applications of his inherent gate magic. The gates he can create instantly slice through any material when opening or closing, and Britton puts it to devastating use once he learns how to rapidly open and close them.
* Shadow Over Mystara from the first game that they "stole" to allow the party to access the final leg of stages.
* Shadowpact, Doctor Gotham's introduction has him levitating a bus full of school children as insurance against the heroes doing anything stupid.
* Shadowpact. In their first battle, Strega easily defeats her thanks to superior power and experience. However, Enchantress knew that she was outmatched and wasn't even trying to win the fight at all. Rather, she was studying Strega's attacks to analyze her spells and figure out how to undo the barrier Strega had placed on the town.
* Shadowpact is revealed to be an unknowing revival of an ancient order that appears once every few years, in different forms, with different purposes but under the same name. It is revealed, by the Phantom Stranger, that the Shadowpact always fails.
* Shadowpact, it is implied that the ancient entity (who later takes the name "Dr. Gotham", after the city that's been built over him) sleeping beneath Gotham City for untold ages has been influencing the dark trend of everything in the city.
* Shadowpact, Kid Karnevil was booted out of Hell for being too enthusiastic and continually offering the demons tips on how to better torture people.
* Shadowpact. The sword gave eternal youth, the ability to compel the truth from someone, cut through almost anything, warned its wielder of danger and could split into three swords that shot out at victims.
* Shadow People claims to be a dramatisation of real-life events, and periodically shows "archival footage" alongside the "dramatised" film.
* Shadow People depicts a sleep study conducted during the 1970s in which patients report seeing shadowy intruders before dying in their sleep. The movie follows a radio host and CDC investigator who research the story, and the story is claimed to be "based on true events".
* shadow people entails humanoid shadows appearing in the periphery of some people's vision, only to disappear when confronted, while others are seen straight on as they walk around and are often described as being extremely black or even "blacker than black". There are many explanations, both scientific and pseudoscientific, for this phenomenon, but little agreement over the true causes.
* Shadow PinAn effective attack that goes for a non-vulnerable (borderline improbable) area.
* Shadow Play – Part 1", when Twilight points out that she made more cardboard dioramas of Ponehenge than the one she just vanished, the view moves to them... just as they crumble under their own weight.
* Shadow Play – Part 2": Star Swirl the Bearded creates a white dome of force

over the whole group when confronted with the Pony of Shadows at the start of the climax. The villain doesn't do anything about it at first, too busy gloating, but then his dark magic slams against the shield, first cracking it and then blasting it to pieces.
* Shadow Play", Adam Grant doesn't die from his dreams of being executed but the fear and pain that come along with the whole thing feel very real to him, no matter how many times they happen.
* Shadow Play that she was written this way being "It seemed fun and subversive at the time" suggests that the writers have gotten tired of, and no longer endorse, the show's pro-redemption themes and messages.
* Shadow Play. The timing of the execution is due to the fact that all he knows about executions is what he sees in the movies, where prisoners are usually executed at midnight.
* "Shadow Play" uses it when Jonas Quinn's mentor scientist visits the insurgents' headquarters, bristling with activity, to hide the fact that
* Shadow Police books, work like this. Even with the Sight, it's hard to sort out the real practitioners from the wannabes, and even harder to get a toehold in the community.
* Shadow Police discovers that under the rule of the Smiling Man, Hell is a facsimile of Victorian era London.
* Shadow Police. Now they're Occult Detectives, though most of their fellow police don't know that.
* Shadow Police, Occult London is made up of what London believes about itself. The intensity and nature of Londoners' beliefs is purposefully manipulated in the series.
* Shadow Police partner. Sarah Quill is a hugely important rock for James Quill, but the horrifying nature of Occult London and Quill's own despair are putting her under strain, too.
* Shadow Police, Quill is being pursued by the Ripper. Neil Gaiman arrives to pick him up in a car and spirit him away. However, he is actually there to deliver Quill into an ambush.
* Shadow Police, Sefton makes a hallucinatory journey to visit the Rat King. When he wakes up, he finds that he is lying in the street near a bus shelter and that he has peed over himself.
* Shadow Police, the Circle of Hands includes a symbolic witch-burning as part of the ceremony to open their conference. This shows that they understand very little about the actual supernatural world, and are running mostly on partly-remembered rituals and traditions.
* Shadow Police, this is what the Smiling Man would like the heroes to believe (or, more specifically, that there is a Hell but no Heaven). Whether this is actually true, or just a ploy to cause them to give in to despair remains to be seen.
* Shadow Puppets to lead a resistance movement in India against the Chinese occupation. After a long sequence of everything going right for her against rivals she knows are better than she is, she becomes convinced that she really is either divine or favored by the gods, and carelessly leads her army into an obvious trap.
* Shadow Queen. However, she eventually discovers that should she or anyone working for her (whether the 'anyone' in question wants to or not) defeats the three heirs of the heroes in a fair contest, the curse will be broken. However, should a heir of the Three Heroes defeat her, the Queen will die.
* Shadow Raiders, a mysterious race created world engines (if not the planets themselves). This allowed the natives to not get consumed by the Beast Planet. One has to wonder who they were and why they did it.
* Shadow Raiders being a living organism. In fact, the latter is implied to actually be smarter than the Bone soldiers wearing it, and it is capable of taking over if the wearer loses consciousness.
* Shadow Raiders. Blokk was overt and militaristic, Lamprey used subtle political manipulations to destroy target worlds from within. Eventually, Blokk was killed in battle and Lamprey may have survived the season 2 battle. Being just parts of The Beast, they can just be replace.

* Shadow Raiders clearly recognized that the Beast Planet was a threat to all life in the galaxy and wanted to make sure that inhabited worlds could escape it.
* Shadow Raiders cultural, personality and agenda clashes within his shaky team.
* Shadow Raiders duology, about werewolf soldiers falling in love with human women in post- Civil War America.
* Shadow Raiders episode "J'accuse" a chalk outline is shown at a murder scene, causing Prince Pyrus to comment that he thought they only did that in holo-films.
* Shadow Raiders feature a handful of planets with engines designed by an unknown precursor race. In fact, the toyline it's loosely based on was called "War Planets".
* Shadow Raiders features an example. A race of humanoids apparently uses a race of furry, wookiee-like creatures as draft animals. The main characters assume the smaller humanoids are the dominant species, when in fact it is the "draft animals" who are both smarter, and telepathic. Though the smaller humanoids also believe themselves the dominant species; the big hairy telepaths are humoring them.
* Shadow Raiders. First, a giant metal hatch on the Beast Planet would open and a truly massive claw would come out. That claw would then reach out and grab the planet to be eaten, then pull the planet back inside the Beast Planet, before the hatch would close.
* Shadow Raiders (for the moment) but other civilizations are completely screwed.
* Shadow Raiders gives a rousing speach before the assembled forces of The Allaince before their battle against planet Remora, the Beast Planets envoy, including the iconic 'Band of Brothers' line from Henry V.
* Shadow Raiders hair, nor wear billowy clothes. Only the reptiles of Bone have moving membranes/ridges on their backs, which do move along with them. A few rare scenes features static fabrics in the throne room of planet Fire.
* Shadow Raiders hundreds die on a regular basis but the Beast dogs' weapons vaporize them so there's no blood. And the dogs themselves explode when destroyed. Though, when characters are killed with different weapons that leave bodies there's no blood either.
* Shadow Raiders—stone creatures that look almost exactly like blue or green-skinned humans.
* Shadow Raiders. Prince Pyrus tends to do this, but he mainly uses it to get around the highly xenophobic policies of his planet, which tend to get in the way of the Alliance.
* Shadow Raiders so the population hurriedly evacuates to Planet Rock's Battle Moons. Prince Pyrus waiting until everyone else was off before leaving himself, except the Vizier who volunteered to stay behind and try to ram the planet into the Beast.
* Shadow Raiders the four planets of the Cluster — Fire, Ice, Rock and Bone — each have one resource that the others need, although at the start of the series they've been raiding each other for years instead of trading.
* Shadow Raiders the spaceships used by the Beasts are made entirely of null matter.
* Shadow Realm. Seconds later Yami uses Mind Crush, either to destroy him or banish him to the Shadow Realm for eternity.
* Shadow Realms features the "worlds just work differently" type. On Embra, magic is much stronger than on Earth, not just for native residents but for magic-users who were born on Earth and therefore never had the right environment to fully develop their powers. However, a lot of Earth technology doesn't work (guns being a notable exception). Since Embra has been recruiting from Earth to help defend against a third party, people seem to be figuring out how to use magic and technology alongside each other as best the conditions will allow, and one of the player classes is skilled at channelling magic through Earth weaponry.
* Shadow Realms has people from Earth being able to travel to a world "where the magic, legends and monsters that inspired our myths are real". People from that world visited Earth long enough to inspire stories, but didn't want to stay, since Earth's low-magic environment isn't very hospitable to them (it's compared to visiting the moon).

* Shadow Realms, the Radiant Empires were prosperous, scholarly, and perfectly peaceful for thousands of years - quite an achievement on their particular world, which had previously seen multiple civilizations rise to glory before annihilating themselves in the kind of magical apocalypse made easy by that world's magic-rich environment. However, they were left unprepared for the invasion of the game's main villains, and have had to recruit help from Earth.
* Shadowrun 4th and 5th editions, one of the "archetypes" (example characters) is the Occult Investigator.
* Shadowrun 4th Edition handbook advocates gamemasters using this trope:
* Shadowrun 4th Edition has this, with more rules on Mix-and-Match Critters given in Running Wild. This includes critters who are dangerously magical, technomantic, or cybered.
* Shadowrun adventures usually have this trope as well. Even if Mr. Johnson stiffs them on their pay and dead enemies have no money, PCs can at least loot and fence the enemies' equipment. Note that, because of the nature of the setting, this extends to their opponents bodies (and not just cybernetics).
* Shadowrun a joke, if not a deliberate Lampshading of early Shadowrun writers' own tendency to trace far too much of real-world past history to the meddlings of immortal elves and/or dragons.
* Shadowrun allows characters to purchase Cool Shades. The real fun comes when you start putting visual enhancements on them.
* Shadowrun allows for this sort of thing, particularly with characters loaded up with cybernetic enhancements.
* Shadowrun; all set up in the decaying shell of an abandoned, actual mall located in the Puyallup Barrens. It gets raided regularly by the police/Lone Star, but it's mentioned in supplemental materials that these raids are almost perfunctory, and the mall always reopens the next day.
* Shadowrun also had this in its novel line, though it also featured some made-up profanity to make up for it. Like Battletech, it now has much more adult language allowed in the novel line.
* Shadowrun also has a phenomenon called "background count," in which the mana of a place can be warped by events that take place there. This doesn't exactly make the area alive, but it has an impact on anyone who visits.
* Shadowrun: Among the numerous kinds of insect spirits infesting the ruins of Chicago, mantis spirits are notable for preying primarily on other insect spirits. They'll still go after humans and metahumans, especially if they interfere with the mantis spirits' own plans and hunts, but their favored food source are their fellow extradimensional invaders.
* Shadowrun and most people have at least some. Not the magic uses though; cyberware still messes up magic.
* Shadowrun) and Seven-7, a fictional gas that can penetrate normal chemsuit protection.
* Shadowrun and Shapeshifters (who are intelligent animals able to take human shape) being the most common.
* Shadowrun and various magical threats (spells, monsters, etc.) they're reporting on.
* Shadowrun anthology, attacks by street gangs leave Wolf and a woman he's escorting without transportation. They enter an all-night pizza shop to catch their breath, and Wolf has a quick word with the employees. Next scene, they're arriving safely at their destination, where Wolf hands over both the woman and some pizzas from the delivery van he'd bribed the shop's staff into lending them.
* Shadowrun: Anyone looking at a flash-pak grenade when it's active gets an eyeful of bright, randomly strobing light for a few seconds.
* Shadowrun are hired by a Lone Star detective to prevent this from occurring.
* Shadowrun are now roughly as powerful as human hackers in the Matrix (to the point where they are options for player characters).
* Shadowrun are overseen mostly by private megacorporations, such as Austin-based Lone Star and the Knight Errant division of Ares Macrotechnology.
* Shadowrun, Ares Macrotechnology maintains a number of tactical military units

dedicated to finding and eradicating bug spirit nests.
* Shadowrun are so powerful they have sovereignty and can enforce their own laws. It's pretty common for employment to be mandatory for life, with imprisonment, death, or other punishments as a penalty for trying to quit. Extracting a (willing or unwilling) target to work for a new employer is a common and lucrative job for shadowrunners.
* Shadowrun (Ares Predator). In theory, this is balanced by the smaller ammo capacity.
* Shadowrun as part of his cover identity, to enhance his credibility with the Cutters street gang he's infiltrated. This backfires when he loses contact with his handler and needs to get word to authorities quickly, as he's afraid any other cop he contacts may retaliate against him as soon as they look up his "criminal history".
* Shadowrun a spy's entire upper body, obscuring evidence of his identity while partially subverting this trope.
* Shadowrun. A standard lunch costs $40-60 UCAS dollars. However, in the standard currency of the setting, the Nuyen, that's only 10-15¥.
* Shadowrun as the Turks once more stand before the gates of Vienna. Two cities get nuked: Damascus and Tripolis (if memory serves).
* Shadowrun: Astral perception makes the perceiver vulnerable to astral beings. In a location where the spirits are hostile, or intended to be part of the security, viewing them will likewise draw their attention.
* Shadowrun, as your body has to readjust to parts of it no longer being 'your own'. In all editions, Essence loss stunts one's ability to do magic, and depending on editions other aspects (like your ability to fit in socially or emphatise with other people or alienation issues, as well as risk of a rare mental disorder called 'cyberpsychosis') will also start plaguing a low Essence character. Hitting 0 Essence is fatal, making overuse of cybertechnology a Very Bad Thing. Fortunately, once a piece of cyberware has been installed, the Essence loss means the body has 'coped' with the original loss and thus new 'ware can be installed in its place without further loss of Essence (unless the new piece costs additional Essence on top of the original), meaning replacements and upgrades aren't a one-way street to an early grave.
* Shadowrun at some point inbetween 4th and 5th edition got hitched and had a son. Slightly subverted as they continue to interact with other runners online and are even implied to be continuing to run.
* Shadowrun Awakened (magical) creatures have a variety of allergies appropriate to their monster type, including sunlight (banshee, barghest, ghoul, vampire, wendigo), silver (shapeshifter e.g. werewolves) and pollutants (unicorn).
* Shadowrun: Awakened plants don't turn carnivorous very often, but some such variants do occur and can be very dangerous.
* Shadowrun: Awakening, the process by which magic transforms mundane creatures into variedly magical versions of themselves, affected common rats same as every other animal. The resulting devil rats are hairless, resistant to most poisons and capable of controlling normal rats, although their sensitivity to sunlight keeps them confined to the sewers and nighttime forays. Demon rats are a further variant that mutated from devil rats during the Year of the Comet, and additionally possess fur, short horns and corrosive saliva. They also have opposable thumbs and are smart enough to open latches and simple doors. Some are even capable of regeneration.
* Shadowrun, Aztlan (AKA The Country Formerly Known As Mexico) invaded and conquered parts of California and Texas (both of which had split off from the U.S.).
* Shadowrun, Aztlan (formerly known as Mexico) invaded both the southern part of California Free State and the Confederated American States, though they were able to minimize the territorial losses. California was also briefly under the control of a rogue Japanese general.
* Shadowrun, because the game borrowed a lot of other things from that novel. It also had the Program JackBeNimble, which "saved" copies of the brains of people

killed in the Crash 2.0
* Shadowrun before his body ends at the neck. The doctor gives him a refund, however.
* Shadowrun before their time, regardless of what the rules and dice would otherwise say.
* Shadowrun both subverts this trope and plays it straight. There are separate skills for different kinds of vehicles. It's easier to fly a plane if you don't know how to fly a plane but do know how to drive; it's much easier if you actually have some flying experience. But then, from 3rd edition, "for convenience, Shadowrun assumes that characters can automatically accomplish basic vehicle maneuvers, such as... taking the old helicopter for a little sightseeing hop." So apparently your characters do have a universal driver's license but then forget everything when asked to do something more challenging than moving and stopping.
* Shadowrun both used metres for ranges and kilogrammes for encumberance purposes.
* Shadowrun, but even then we're talking "skilled surgeon or engineer in a small but vital field" rather than outright aristocracy. Since being a skilled mage (requiring high Magic and Attributes/Skills) and having lots of money (high Resources) tends to collide in the Priority System, player character mages tend to down-prioritize the latter at character creation.
* Shadowrun, but then an insane AI decided to use them to perform medical experiments on the unwilling inhabitants. In the latest version, one of the selling points of the new robot assistants is that they are deliberately crippled to be slower than a person and mechanically incapable of restraining a human.
* Shadowrun by combining multiple levels of Mobility Upgrade, Strength Upgrade, and Hydraulic Jacks on a suit of milspec or modern Samurai armor, but your GM will not be pleased.
* Shadowrun called Narcojet delivers a tremendous amount of stun damage immediately after injection; only a very robust or lucky target will still be standing after getting shot up with it. The description states that the drug has no side effects.
* Shadowrun came up with the idea of having the company that hired the shadowrunners pay them in corporate scrip or company stock instead of real money. There are legitimate reasons to do this. However, they apparently didn't consider that if the shadowrunners were caught after being paid, their having the company's scrip or stock would be a dead giveaway that that company was behind the shadowrun.
* Shadowrun can do themselves serious injury by overusing their powers. Any spell cast requires the mage to roll against Drain. If they fail the roll, they take stun damage equal to the effective level of the spell, which can straight up knock them out if the spell was really powerful. However, if the mage uses a spell with a power level greater than their Magic stat, the Drain roll, if failed, deals physical damage, which can kill. Since the Magic stat only goes up to 6, and spell power can go up to 10...
* Shadowrun can have a tracking RFID chip, so tag erasers are a very common piece of gear amongst runners. The signature characters relate tales of how a single errant RFID chip can compromise a mission and make it a point to blast everything and everyone they acquire with a tag eraser.
* Shadowrun can kill a dragon and sometimes not even then, so even national governments and megacorps tread carefully when a dragon's involved.
* Shadowrun can learn a spell called Alter Memory, which allows them to do exactly that: alter a single memory, including suppressing it entirely, although the subject can recover it either through willpower or magical help. The government of Tír Tairngire cultivates a fruit called laésal, which can be processed into laés, a drug that can erase up to twelve hours of memory upon consumption and that erasure is complete; it actually "formats" the physical storage of short-term memory in the brain. Leäl is a street drug derivative commonly used as a date-rape drug that removes up to two hours of memory. Cutting cocaine with leäl creates "pixie dust." Snorting it grants increased Charisma, Perception, and High Pain Tolerance, but also shreds your nasal cavities; fortunately, it removes the last few minutes of memory so you won't recall the agony.

* Shadowrun causes the projection to be torn asunder, killing the mage in the process. Magical beings like faeries, vampires, spirits and dragons usually die shortly after leaving the atmosphere.
* Shadowrun causing its residents' collective despair to pool and attracting the Yama Kings to feast on all the bad vibes.
* Shadowrun: Certain Awakened creatures have thermographic (infrared) vision, including dwarves, trolls, dragons, vampires, centaurs, cerberus hounds and fomorians.
* Shadowrun champion Svetlana Jurjewa is known for her tactic of opening her top and flashing her breasts at members of the other team in order to distract them while one of her teammates makes a play. It's technically against the rules but so popular with viewers that she (and other female players who started copying her) are allowed to do it anyway.
* Shadowrun characters can cultivate connections that vary in function, influence, and loyalty. Being a 'connection horse' is a popular way to make a socially-oriented character extra useful: having a ton of loyal friends in high places makes running the shadows fairly easy at times.
* Shadowrun) chips/programs, which come in varieties ranging from "pornography" to "emotional overload" to "deliberate synthesia".
* Shadowrun: Chupacabras, also called blood dogs, are mutated, mange-ridded canids with long, grooved fangs that allow them to drink blood. Their mutation is imperfect and they can't actually feed efficiently enough to avoid starving to death, making them perpetually hungry and thus highly aggressive.
* Shadowrun clones getting their asses kicked by librarians or teenage wizards disabling angry natives with butterscotch syrup.
* Shadowrun, CNN itself became NN (NewsNet) when it was re-organized in accordance with Ted Turner's will.
* Shadowrun: Cognitive Fragmentation Disorder is the clinical term for infection by a nanovirus that overwrites the host's personality with its own. 100% infectious on contact and completely incurable.
* Shadowrun Companion: The Home Ground edge gives a character a bonus on using skills on his home turf. This could include the building where the character lives or a computer system with which a decker is very familiar.
* Shadowrun Corporate Sins is a competent and powerful magician he is almost completely useless regarding technology but refuses to admit it.
* Shadowrun Corporate Sins. Nonetheless, he and Cromwell do reconcile once he explains that as rough as he may have treated Cromwell he was doing what he thought was best and Cromwell admits that he probably wouldn't have survived Yomi without him.
* Shadowrun Corporate Sins universe. One of the PCs, Cromwell is a physical adept.
* Shadowrun corporation sacrifices people in magical rituals to increase profit — but since it's on their turf, it's not illegal. It's also a bit of a dirty secret.
* Shadowrun corporations: Mitsuhama was a Yakuza front company that, by happenstance, began making more money legitimately than by organized crime.
* Shadowrun cortex bombs are an occasional hazard of getting cyberware from an untrustworthy surgeon. They come in three yields, one that just destroys an implant they’re attached to, one that blows up your head, and one that’s basically an internal grenade.
* Shadowrun covered them in depth and even had rules for a 'Runner who was a Made Man.
* Shadowrun cyborgs are brains in jars that are plugged into modified drones. Brains scooped from healthy adults have a tendency to go mad from the radical shift in perception and the effects of all the drugs pumped into them, so the corps that make cyborgs prefer to use the brains of either clones or children.
* Shadowrun dead just before succumbing to all the wounds taken during the final climactic battle, making it literal plot armor... it protects the plot, even if it doesn't manage to protect the character.
* Shadowrun Decker is incredibly useful whenever faced with a problematic computer

system, but generally finds it hard to kill things without other tools. On the other hand, adepts and more militarily-focused characters are quite good at killing things, but will usually find said abilities less than useful when the prebuilt campaign assumes some non-combat personnel.
* Shadowrun deliberately became a vampire in order to hunt them on their own terms.
* Shadowrun did leave a reward in his Will if someone could create things like that.
* Shadowrun different personalities as different personality "strains" fight for dominance.
* Shadowrun does this. Almost all the game products are set ~62 years after their publication dates.
* Shadowrun does this on purpose, allowing game masters to run self-written adventures that "fill in the blanks" and tie-into the game's lore.
* Shadowrun. Dogs and cats can always identify them no matter what shape they've taken: the dogs bark furiously at them and the cats hiss angrily.
* Shadowrun: Dragonfall DLC received the Director's Cut for free (the DLC version is no longer available).
* Shadowrun: Dragonfall, if you accept a particular assassination job, choose to spare the target, then have a change of heart and kill him anyway when the client's goons show up to check on you, you'll receive your payment along with a note from the client that your performance was "satisfactory"... and that you shouldn't expect to receive any more contracts from them.
* Shadowrun: Dragonfall, the player, regardless of their gender, can say that they had once been in a relationship with Monika.
* Shadowrun - dual-wielding guns is possible, but offers such penalties to hit (splitting of dice pools, penalties for offhand firing, recoil, environmental factors, etc.) that it's just not worth it. Someone with godly skill (a Gunslinger Adept or a tooled-up-to-the-max Street Samurai) might be still effective with such an arrangement, but not as much as just using one firearm at a time.
* Shadowrun due to the nature of the players' work (performing dirty, deniable jobs for mega-corp agents known collectively as 'Mr. Johnson'). Most Johnsons refrain from tying up loose ends by killing the runners they hire because it's bad for future business to get a reputation for not being true to the deal. Mr. Js with hot heads, personal dirty laundry involved or just ignorant of the code of conduct in the shadows still sometimes try it. The Runner's Handbook splatbook notes that while a Johnson may screw himself out of future deals by wasting a couple runners, it's not really much of a comfort to the poor sods he killed now is it?
* Shadowrun engage in a variety of hiring shadowrunners to do their dirty deeds ranging from small things like stealing the lunch orders of the rival's corporate meeting to ordering the murder of a rival CEO.
* Shadowrun, especially if they also happen to be a dragon.) After a few good missions, they grow to be respected, if not feared, though the folks hiring them will often still send them on suicide missions.
* Shadowrun. Essence Loss is very bad for mages since it limits their ability to do magic, and too much Essence loss causes emotional problems, dissociative mental issues and eventually death.
* Shadowrun establishes that in certain parts of Seattle, "driving while meta" is enough to get you pulled over.
* Shadowrun eventually ending up at Catalyst Game Labs, though, ties to Thera and the Horrors had to be downplayed. However, recent editions have turned back to the idea of "Terrors" from the Fourth World returning, and even referenced the bridge they were building on the Metaplanes to cross over in earlier editions.
* Shadowrun, every few years they would need to reboot the game to keep ahead of growing technology. For the hacker type class, the original series had deckers that would have to literally plug a wire into the back of their head to go virtual. Later on, everyone has augmented-reality goggles or a wi-fi computer in their head. Many fans, however, are not as happy with this change however, as the zeerust present in the original gave it its cyberpunk charm.
* Shadowrun examples include Earth Spirit, Earth-based spells, and Sand-based

spells.
* Shadowrun executive's daughter is programmed to kill her father as soon as they're alone together. Worse, she's programmed to do so with a concealed bone spur that can't be detected on scans... and that's designed to slit her own arteries as it emerges, causing her to bleed to death and thus be unable to explain what happened to her.
* Shadowrun (FASA's premier RPG survived the downfall of its parent company and just celebrated its 20th Anniversary)
* Shadowrun favoring rebellious oppressed groups, and other such things. This allows Megacorporations to assume more power than national entities.
* Shadowrun features a number of age rejuvenation treatments. Leonization, the most expensive, restores physical age to approximately 21, a life span extension is a one-time procedure that adds 10 years to your life, while physical vigor simply counters the physical side effects of aging.
* Shadowrun features a widespread acceptance of Augmented Reality, because it's a) the way the future seems to be leaning right now and b) it's finally a plausible way to get Hacker characters out into the field rather than essentially running two separate game sessions for them and the rest of the group.
* Shadowrun features grappling hook guns, along with rules for use as weapons (dealing stun damage) and implantation as cyberware.
* Shadowrun fell in love with Queen Thayla and refused to leave her, even though his presence was destroying her land. She eventually decided to leave with him to save her people from destruction.
* Shadowrun. Figures such as Elizabeth I and (yet again) Leonardo da Vinci were revealed to have been immortal elves, left over from the Fourth World and killing time while awaiting the next Awakening of magic.
* Shadowrun; following the Second Crash, the Fading stopped, and those with the power rechristened themselves technomancers. Also the Matrix became wireless.
* Shadowrun for flavor. The only significant change since then is that the "punk" part is less prominent.
* Shadowrun (fourth edition, at least), there are numerous magical traditions based on assorted religious and philosophical beliefs, but all are equally capable paths to studying magic. In addition, spirits take on the shape of whatever the caster believes they should take the shape of; a spirit of fire can look like everything from a triumphant archangel to a happy little puff of flame depending on who summons it.
* Shadowrun. Fourth edition retained the slang but also added in actual foul language. Various regional slangs are also implied to exist: "Ruhrdeutsch" (Ruhr valley German) is a bizarre mix of current Westphalian German, Future Slang English and Japanese.
* Shadowrun game is almost killed on a delivery run in the intro of the game and part of the plot revolves around the information he's supposed to deliver.
* Shadowrun game rules. Subverted in that, while it's set in a convenience store and lots of food gets blown to bits or tossed around, the scenario assumes that everybody's shooting guns.
* Shadowrun had monomolecular whips which were often as dangerous to the user as they were to the enemy, but its Crowning Moment of Awesome has to be the monomolecular Axe, an axe with a monofilament edge capable of cutting through virtually anything. It tended to lose its edge quickly, though.
* Shadowrun had rules for suppressive fire (anyone in the target area who emerges from cover gets hit).
* Shadowrun had several Awakened (creatures descended from natural animals mutated by magic) canine monsters.
* Shadowrun has a claim to this trope via cyberware and drones. A character can install numerous holsters or integral weapons into their person, allowing a character to, at any moment, pull a heavy caliber pistol out of their arse. That last gets used as an example because one character completely derailed a GM's story by pulling a gun out of his ass to shoot the guy holding him hostage. GM was a good sport about it, though.

* Shadowrun has a coalition of Native American tribes led by Daniel Howling Coyote, incensed by their being forced into concentration camps, using the return of magic to start a guerrilla war with the USA in 2016. This results in nearly half the former US breaking away to form the Native American Nations two years later. The remaining states merge with what's left of Canada in 2030 to form the United Canadian and American States or UCAS, but the combined nation is still so weak they let Hawaii, California, and the new Confederacy go without a fight.
* Shadowrun has a framing story that involves a badly injured runner being transformed into a "cyberzombie" (i.e. being loaded up with enough cybernetics to kill him, with only incredibly powerful magics actually keeping his soul bound to his body). Game stats for the transformation, and for a ton of cybernetic gear, are given between paragraphs of his descriptions of the horrors of the transformation.
* Shadowrun has a magical drug designed to do this, Laes. It's actually illegal to have because it's so powerful. Want to kidnap someone, torture them for information, heal them up, and then make them forget everything in the last 12 hours? Done.
* Shadowrun has, among other things, Tir Ghosts, Aztechnology's Leopard Guards, Ares Firewatch Teams, and Renraku's Red Samurai.
* Shadowrun has a number of examples of this trope. The best is probably in "It's All Done With Mirrors", when a junkyard is attacked with "more ordnance.. ..than was used in all fifty-seven James Bond movies combined."
* Shadowrun has a similar amendment, as VP Kyle Haeffner assumed the presidency in the wake of President Dunkelzahn's assassination. Nadja Daviar, Dunkelzahn's former spokesperson, was picked as the new VP by Haeffner and confirmed as such by Congress.
* Shadowrun has been described thusly: "Say your mission was to get a can of coke from a vending machine. Step four can be 'pull out rocket launcher' and nobody will blink."
* Shadowrun has both "Urban Brawl" (essentially paintball or airsoft sans paint and soft) and "Combat Biker" (motorcycle polo with guns). American football is also implied to be a good deal bloodier, as players are all cyber-enhanced for increased performance.
* Shadowrun has carromeleg, an elven martial art similar to capoeira, with whirling, dance-like movements.
* Shadowrun has catgirls/catboys thanks to a spike in the mana levels when Halley's Comet swung around, triggering a wave of random genetic mutations. Most of the resulting "changelings" received random and often disfiguring mutations, but a number of cat-people also turned up. It's also possible to receive cosmetic surgery to turn oneself into this trope.
* Shadowrun has "cranial bombs", explosive devices implanted in the human skull. Depending on size, they can do anything from just making the head explode to cleaning out a room.
* Shadowrun has everything from Sasquatch to both Western and Eastern Dragons reappearing after 2012. And pretty much every tradition of magic actually works now and summons different spirits ranging from angels to kami to nature spirits.
* Shadowrun has had at least two AIs that started like this. In fact, the Renraku Arcology: Shutdown book provided rules for expert systems becoming sentient, which may as well have been a link to this page.
* Shadowrun has huge lists of electronic and breaking-and-entering equipment which can lead to this situation as easily as D&D. Luckily, the Reactive Myomer Pack now exists - a backpack made of smart materials that can shift the desired item to the top quickly on receipt of a wireless command.
* Shadowrun has light enhancing and thermographic options available for goggles and sunglasses. And also cybereyes that can be given the same enhancements. Though most metahumans already have the natural ability to see into one of those spectrums.
* Shadowrun has Parazoology and Parabotany, the scientific study of Awakened (magical) animals and plants, respectively.
* Shadowrun has players generally fitting very specific niches. If the group's only decker (hacker and cyberoperations specialist) gets killed, the group is mostly

frozen out of that entire aspect of the game. So the runners will probably go looking for a decker in need of employment. There happens to be a player in need of a player character right there, so...
* Shadowrun has quite a few family-friendly swears as part of its future slang. "Drek" is the common equivalent of "shit," whereas "frag" is the common equivalent of "fuck" - though, given the tendencies of most shadowrunners, it's used more to refer to death than sex ("he got fragged").
* Shadowrun has Riggers who pilot drones through a wireless VR interface, and Pilot programs for autonomous drones. Due to stealth concerns, PCs usually don't use them nearly as much as corporate security, of course.
* Shadowrun has Skillsofts, chips that can be inserted into implanted slots in the head to give characters skills.
* Shadowrun has the Allergy disadvantage, which comes in three grades, depending on the effect of contact with the substance: mildly annoying, exceptionally discomforting, and physically harmful. Shapeshifters automatically have Severe Allergies, typically to silver, vampires have Severe Allergies to sunlight and Moderate Allergies to garlic, etc. The really silly thing is that the rulebook has some recommendations for allergies, which include seawater and oil.
* Shadowrun has the Centurion Laser Axe, although it's never made quite clear how the laser beam follows the arced blade... All the rules state is that it can lose its focus when hitting hard materials like heavy armor.
* Shadowrun has the datajack, a port or wire usually somewhere on the side of the head to hook up to a computer. A cyberpunk character who can't "jack in" with a port in their head is not trying hard enough.
* Shadowrun has the flaws Ork and Elf Poser. Said Posers often make up or even have surgery in order to fit in with said races, but end up offending the respective races for their often stereotypical portrayals, thus the social penalties when dealing with said races.
* Shadowrun has Toxic Water Spirits, water spirits who were perverted by pollution.
* Shadowrun have a particularly brutal version of this. The gang is known for being exclusive to orks and trolls because their initiation is for the gang to surround a new recruit and mercilessly pummel them for several minutes. Fighting back or attempting to defend one's self in any way is strictly forbidden. Metahumans of other types just aren't tough enough to take that kind of punishment, and even trolls are regularly killed by it. It's pretty much guaranteed that anyone who actually lives through it will suffer injuries so severe that they need cyberware replacements.
* Shadowrun have learned that children make the best candidates. HMHVV-infected are cannibalistic so it's assumed that they'll eventually eat children. Mr. Johnson may want your group to kidnap, hurt, or kill a target child for reasons he's unwilling to divulge.
* Shadowrun. Having good contacts is key to survival if you don't wanna die or get arrested by Lone Star. Your contacts come in various ranks, which vary depending on the edition.
* Shadowrun, hermetic mages must spend several hours scribing hermetic circles for advanced magic such as sendings or summoning spiritual allies or elementals. Shamans, who are essentially the same but summon nature spirits, not elementals, do not need circles; instead, they rely on spirit lodges for their magic.
* Shadowrun, hilarious jokes, and multiple campaigns' worth of intriguing plot hooks.
* Shadowrun: Hong Kong features this as an option for avoiding a fight: the player relays lines for a less socially inclined teammate to give to security personnel to bluff them. When an impatient person steps up wanting to use the system used for relaying those lines the player must choose dialogue options to placate both him and a manager who has confronted the teammate, as the teammate is still repeating the player's dialogue verbatim.
* Shadowrun: Hong Kong is utterly awestruck by the sight of the Yama King, Quian Ya, and can only marvel at how magnificent the Queen of a Thousand Teeth is. This coming from a guy who's utterly terrified of the Triad boss you spend the whole

campaign working for.
* Shadowrun: Hong Kong thing that prevents humanity from reaching its true potential is its capacity for emotions.
* Shadowrun: Hong Kong when someone confronts you (for hogging a computer kiosk) at the same time that she's being confronted (for being in a restricted area), and you have to come up with lines that work in both contexts.
* Shadowrun. How that magic expresses (Shamanic, hermetic or whatever) however doesn't seem to be.
* Shadowrun. HVAC (Heating, Ventilation and Air Conditioning) systems have ductwork that can be used by shadowrunners to infiltrate corporate buildings. Knight Errant Security recommends that the ducts be made too small to allow entry by intruders.
* Shadowrun. If the fuel tank is broken by an attack it will explode in a ball of fire, probably killing the user and endangering everyone nearby.
* Shadowrun (if you didn't know, don't care, or were one of those who maybe should have been scoured.)
* Shadowrun. If your team has no mage or phys adept to banish or magically beat them into submission, your sammie isn't going to cut it against them. Similarly, if an opposing decker gets ahold of traffic control for your self-driving car via the Matrix, that car isn't going to help you chase down that escaping enemy any time soon.
* Shadowrun in 2011. Though in their case the dichotomy was more a matter of infrastructure than ideology, the fledgling Native American Nations didn't have many factories or supply lines, while the US Army didn't know what to do with magic yet. By the game setting (2050s-2070s) almost every faction uses a mix of magic and technology.
* Shadowrun In Asia they're called "dragon lines." Places where they cross (and greatly increase ambient mana) are called "power sites."
* Shadowrun includes a stat known as Edge which is summed up as "luck, or that certain something that makes a Runner more than just a mook." Once per point per session/adventure a Runner's player can opt to spend Edge and add a number of dice equal to their Edge stat to the dice pool. And when Edge is spent, the Rule of Sixes applies, allowing for "exploding crits" and vastly more "hits" than usual. And since humans get extra Edge at creation, one can easily create a normal human without cyberware or magic that can compete with the most minmaxed Troll Sammie or Elven Adept. ("Okay, you spend a point of Edge, roll... reroll the sixes... reroll THOSE sixes... reroll... ah hah... okay, yeah. Congratulations, you just destroyed the battle tank drone possessed by an evil spirit with one shot from your light pistol.")
* Shadowrun includes full descriptions of the new Sixth World sports of Combat Biker and Urban Brawl, as well as information about how cyberware has revolutionized boxing, baseball, basketball, and (especially!) American football.
* Shadowrun includes Native Americans being put in 're-education' camps. The re-emergence of magic let them escape and reclaim half of North America.
* Shadowrun. In early editions the Detective archetype character would not touch magic, though his cases often involved it.
* Shadowrun infectees; and the Seattle Underground, settled by orks and trolls following anti-metahuman pogroms. When a rogue Japanese general took over the California Free State, he also enforced metahuman segregation and forcibly relocated the metahuman citizens of San Francisco and Sacramento to hastily-made ghettoes outside of the cities proper.
* Shadowrun: in remote drones for aerial surveillance, in huge "cargolifters" for inexpensive bulk transport, and in luxurious cruise ships for the ultra-rich. The finale of the first Shadowrun book takes place at an airfield where a yakuza boss has just flown in on a zeppelin.
* Shadowrun: Insect spirits are incorporeal entities that possess people and turn their hosts into a human (or dwarf, elf, ork or troll)-sized mixture of humanoid and arthropod.
* Shadowrun insistence that shadowrunners don't have this and the ones that so much as try either live very short lives or are long dead (understandably, this is an

item they backpedaled on come Fifth Ed.).
* Shadowrun in such a way that the words are required… but the requirement is for the same "whatever you made up" words as before.
* Shadowrun in that instead of being able to switch between various off-the-shelf drone models, he instead has a custom drone called Koschei that can be modified in capability as the game goes on.
* Shadowrun: In the backstory, several religious groups came out against the rise of magic (including the return of metahumans and the Awakened to the world) without actually being or becoming Anti-Magical Factions.
* Shadowrun. In the title country (the country formerly known as Ireland) Junior Minister Patrick Flanagan was videotaped having sex with his curvaceous redheaded secretary in his office.
* Shadowrun is a moan or a groan such as one made by someone in fear, pain or despair.
* Shadowrun is big enough, you are your own nation. This has essentially dismantled the concept of the 20th century nation state, with the surviving governments being at best second-tier to moneyed interests that make Standard Oil look like some five-year-old kid's sidewalk lemonade stand.
* Shadowrun is conspiring with racist gangs to drive out or kill elves living in a particular neighborhood. The twist is that he's not trying to buy the elves' property cheap, but to change the demographics of the neighborhood, so it'll be the ideal location for test-marketing his company's products. Same methods, different profit motive.
* Shadowrun is named this. In exchange for swearing a fanatical loyalty to your faction, to the point that betraying them in any way is unthinkable, a character receives the ability to ignore damage penalties in combat.
* Shadowrun is not our future but rather the future of the mid 1980s. Which actually explains quite a bit, including the bulk of much of the computer equipment in the game in comparison to modern computers and the like.
* Shadowrun is one of these. Trenchcoat and fedora, too. And a .38 revolver. Just ignore the fact that he's an ork... or embrace it, actually.
* Shadowrun is only at the start of one rising cycle. A second rise in magic came with the passing of Halley's Comet in 2061, causing further mutations among humanity and plant and animal life and allowing more powerful spirits into the world, and it's implied that there's more likely to come in the future.
* Shadowrun is so convincing players tend to start using it in everyday conversations.
* Shadowrun. It gets activated ("Oops." "What do you mean, "Oops."?") during a surgical procedure, and you have a relatively short amount of time to get it deactivated. The surgeon does refund your money, though.
* Shadowrun, joining the military is one of the few legal ways to get a valid (national) SIN. As the SINless are usually treated as "probationary citizens" without any actual rights or legal protections, this possibility can be very tempting, although having a valid SIN also means the government that issued it knows intimate facts about the holder.
* Shadowrun Kane mentions in the discussion around one gun that he uses it to shoot people evacuating the ships he sinks.
* Shadowrun, laser weapons exist, and can penetrate armor better than their kinetic brethren, but several factors keep them from being used that much. They're expensive as hell, their ammo is expensive as hell, they're very hard to find, let alone get your hands on, and they can be quite unreliable in a pitched firefight. For those reasons, most runners tend to stick with cheaper, more reliable weapons.
* Shadowrun like a simple robbery due to cover-up efforts by the perpetrators.
* Shadowrun: London sprawl is commonly referred to as "The Smoke". Thanks to the relaxed environmental standards and the massive factory smoke provided by both London and Birmingham, the fog is back with a vengeance.
* Shadowrun-machine guns to the list of available guns, which are exactly what they sound in terms of downrange dakka dispatching.
* Shadowrun magazine #6, a dwarf does this with a concussion grenade while fighting

a gang of zombies. This is averted in the game itself: modern grenades are radio signal-activated and no longer have physical pins.
* Shadowrun, magic flows and ebbs. At its peak, the nature of reality becomes thin enough for the Horrors to come through, and they do. The indigenous population of Earth must then hide, if they do not want to be eaten. Several supplementary sources suggest that if metahumanity can develop its technology level to be as powerful as its magic at its peak, then the Horrors could be defeated once and for all.
* Shadowrun, magicians can use Astral Perceiving to see a person's true aura.
* Shadowrun, many people have some degree of mechanical alteration — cybereyes are the most common bit of cyberware in the world. Mages on the other hand can't use them with out messing up their Essence/magic. Also, the metahuman races are humans who have been altered by the return of magic.
* Shadowrun, meaning a hard cap that prevents you from replacing everything. (At least, with off-the-shelf stuff.)
* Shadowrun measures the size of computer memory in "megapulses". That might be for the better, as when science fiction gives measurements for computer performance using proper units, it tends to get superceded by real-world technology way too soon.
* Shadowrun: Megacorps are a major part of the setting, and in some cases have outright displaced national governments as major power players in the global stage. They typically have worldwide reach and fingers in almost every pie, although most tend to specialize to some degree — most 'corps focus on things like informatics, biotech, armaments and so on. They're ranked from "A", which are merely multinational in scope; to "AA", which start to fit the trope due to the sheer size of their assets and extensiveness of their presence across the world economy (some may even rival AAA-rated corps), earn the highly coveted privilege of extraterritoriality, and gain the title of "megacorp"; and finally "AAA", also known as "Prime Megacorps", which are truly global giants with enough economic power, clout and military capability to push around most national governments, and of which there are currently only ten (originally eight). Megacorps are rarely monolithic entities, however — all, but especially the largest, end up being complex systems of shell companies, fronts, subsidiaries, branches of branches of branches, leased territories and independent companies controlled through majority shareholding, all operating around a more or less compact central core.
* Shadowrun mentions a gay bar in Seattle that's a popular runner spot. One of the commentators then discusses a gay orc fixer he knows who likes to bring clients there (and gets disappointed if they don't look shocked). Notably, the second floor of the bar is an S&M club that caters to any orientation.
* Shadowrun: Metahumans (elves, dwarves, orks, and trolls) are classified as subspecies of humanity, which is perfectly logical since the races can all interbreed and the metahuman strains in fact came into existence when very startled human parents started having clearly inhuman babies. There are also the metavariants, which are further subspecies of the main metahuman subspecies — for instance, gnomes are a metavariant of dwarf, dryads are a metavariant of elf, giants and minotaurs are variants of trolls and satyrs a strain of orks. Baseline humanity has one metavariant of its own, the nartaki, who are distinguished by having red, blue or yellow skin and four arms.
* Shadowrun monster-book, attached in-character comments by shadowrunners include remarks by someone the SPCA would probably burn at the stake. He claims to make a living by trapping Weres (sapient, regenerating animals which can take on human form) and repeatedly skinning them, then selling the pelts. Live-butchering a type of giant regenerating shark for meat was also mentioned.
* Shadowrun. Most cyberware is powered by the owner's bioelectric energy.
* Shadowrun, movie studios like to hire mages to handle special effects since it's considerably cheaper than CGI or practical effects when you have a guy who can craft believable illusions on command.
* Shadowrun needs something of questionable legality done, so they send a mid-level employee to hire some "deniable assets" (in other words, Shadowrunners). Said

employee always uses the name "Mr. (or Mrs.) Johnson" and bears no obvious connection to his or her employer. Should the runners be caught, the corporation can wash their hands of it, as there's no visible sign of them doing the hiring. (At least, not immediately visible - any good Runner team will have hacked into the Johnson's commlink and picked up the details during negotiations.)
* Shadowrun: no resurrections, no time travel, and no teleportation. Furthermore, if you do not Awaken naturally, there is (practically) no chance that you ever will. There are several different flavors of magic-user.
* Shadowrun novel ponders the question how this would work in a world where trolls (9-foot-tall metahumans) exist. Their suggestion: Trolls are allowed if they bring a customer along who isn't a troll.
* Shadowrun novels, when an ex-government assassin gets mentally caught up in his training, and starts barking out code names for maneuvers to his teammates... who are street-thugs with no clue what he's talking about.
* Shadowrun: Nuclear plant accidents, industrial pollution and side effects of the return of magic have caused massive environmental damage.
* Shadowrun of a combat specialist, a hacker, a con man, and a mage planning an elaborate theft of a highly guarded target from a corporation, on the behest of a mysterious paymaster.
* Shadowrun offers hand razors, which are small blades implanted under the nails, hand blades, which extend along the outside of the palm and little finder, and spurs, which extend beyond the hand and can reach sword-like sizes. All self-respecting street samurai will have at least one implanted weapon.
* Shadowrun. Often the PCs will be hired to do so. Or stop someone else from doing so. Or to get back at someone who did so...
* Shadowrun, of the flaws you can take, a few of them are Ork and Elf poser, which makes you the fantasy equivalent.
* Shadowrun. One illustration had a billboard for Project Hope, with a happy family and the words "The Bravest Future". Under the billboard some Project Hope goons are giving a man a bloody beating.
* Shadowrun one million Rubles if they join forces and let the Russians keep the ship once the PCs get the information they are after. Even though there was no published New-Yen to Ruble exchange rate, the players all assumed it was a Funny Money offer and declined the alliance.
* Shadowrun: One of Harlequin's aliases is "Last knight of the Crying Spire".
* Shadowrun. One of the short stories has a video reporter tagging along on a mission to bring badly needed medical supplies to an underground group that's suffering from disease.
* Shadowrun: One sourcebook contains a section on "Armor and Clothing". The first sub-section in the next page is "Armored Clothing".
* Shadowrun on the SNES offers a completely pointless challenge: The two women runners the player can encounter also happen to be the only runners with any relevance to the plot, and may be made into permanent party members. The challenge then becomes to keep both of their squishy spellcaster asses alive for the rest of the game.
* Shadowrun, or at least it did in Fourth Edition; most nanotech-built structures inexplicably collapsed at the end of Fourth Edition's metaplot, from guns to aircraft to entire office towers. Explained in Fifth Edition: artificial intelligences being held captive in the Matrix are using nanotech to break out. If they write themselves into a metahuman, they can take over the body; if they write themselves into an office tower, their efforts tend to cause it to collapse.
* Shadowrun, paper has mostly been replaced with credits in the form of the everpresent Matrix and commlinks. However, physical cash is still used occasionally, as are certified credsticks, which are like flashdrives that contain a certain amount of money.
* Shadowrun. People with the ability to use magic are extremely rare. Schools, corporations and magical groups regularly test citizens (particularly children) for magical talent.
* Shadowrun: Physical Adepts channel magic into their physical abilities rather

than cast spells.
* Shadowrun Plan 9 has had so many sex change operations, switching back and forth from male to female, that they claim they can't remember what they started out as anymore.
* Shadowrun planning to build a Space Elevator atop Mt. Kilimanjaro, over objections of some of the most powerful nature spirits in Africa. As of the 2070s(4th edition), the Kilimanjaro Mass Driver is up and functioning, though the spirits haven't stopped fighting over the territory.
* Shadowrun, plus is full of its own quirkiness. It's not the easiest setting to initially buy into.
* Shadowrun powerhouses could finance its reconstruction in a matter of a couple of decades.
* Shadowrun powermongers, who hold non-immortal elves in nearly as much contempt as humans. Ironically, ordinary elves who just want to get on with their lives find both the "wannabes" and the nobles every bit as distasteful as other humans do.
* Shadowrun, protagonist Dirk Montgomery loses his arm when it gets burned by the magic spell of the wasp spirit queen. Luckily for him, he gets a cyber arm installed for free as a reward for taking out the insect spirit hive.
* Shadowrun: Proteus Corp built a number of "arkoblocks" (floating arcologies) off the coast of Japan.
* Shadowrun rapid healing abilities. Thus, the one throwing fireballs and healing spells gets the first clip emptied into him.
* Shadowrun (read: Cyborg). Technology and magic are however mostly separate, and except for the intrusive implants, do not impede one another. A mage can still use computers and guns fine. At the same time, more technologically complex objects are harder to cast magic upon.
* Shadowrun recoil penalties are applied any time a player wants to shoot more than one bullet in a turn.
* Shadowrun Returns. All your other party members are disgusted and want it dead.
* Shadowrun Returns also uses a simpler version of the original, where you can't install more cyberware than you can afford in Essence. NPCs in a campaign might react to you having implants, but the player is never forced to act in a particular way.
* Shadowrun Returns Altug sells real Turkish coffee for 50 nuyen a pop at his café, as opposed to soykaf at 5 nuyen. He explains that it is a special blend which even in a time when "real" coffee was everywhere would be considered a rare delicacy.
* Shadowrun Returns and agree to help accelerate his plan, which has the unintended consequence of removing the barriers protecting earth from the Lovecraftian Horrors lurking in the metaplanes.
* Shadowrun Returns and they're as smart as anyone else. Right below that is the character build, which shows a maximum Intelligence stat for Trolls that's lower than that of Humans, or Elves, say.
* Shadowrun Returns. As atonement for being made to kill her mother by a cult.
* Shadowrun Returns), both to attract customers and to seem less threatening. In private, his accent and speech patterns in German change quite remarkably.
* Shadowrun Returns claims that transplants harvested from dead bodies are becoming a dying business because grown transplants are just cheaper. Dresden still has business because the company he works for, Organ Grinders, also functions as a morgue.
* Shadowrun Returns dialogue choices allow you to roleplay this way, and the game encourages it by having some times when the only way to get payment for services awarded is to directly ask for it.
* Shadowrun Returns: Dragonfall, the trope winds up generally being subverted.
* Shadowrun Returns explains that you are currently living in an apartment that has four walls, a roof and isn't on fire. Also there are no cockroaches because they have higher standards.
* Shadowrun Returns, for good reason: The plot starts when the victim of a serial killer contacts the player through one of these.

* Shadowrun Returns Green Winters leaves behind a video diary on a series of DVDs, a medium which in the Shadowrun-verse is completely and utterly outdated. Finding a DVD-player, a screen that has the right ports to accept input from a DVD-player and someone who knows how to restore badly degraded DVDs becomes a major part of the plot.
* Shadowrun Returns "Gun Show" gets stuck to Duncan for the rest of the game.
* Shadowrun Returns) her being an eight-foot wall of horns, tusks, muscles and killer instinct.
* Shadowrun Returns Hong Kong, the player can accidentally eat some meta-human flesh in Gaichu's hide out. Or drink blood when sampling the "red wine" in a vampire's apartment. You can even get an achievement for doing both. Hilariously, if Duncan is the party either time, he berates the player for being so stupid as to eat random food on a mission. The narration comments that as long as you don't know what it is, Gaichu's people sashimi is actually pretty damn good, and you can talk him into giving you the recipe.
* Shadowrun Returns-inspired code he was raised to follow. He has even honed his swordsmanship to an even higher level than before, since ghoulhood made him even faster and stronger than he was before, but also cost him his eyesight.
* Shadowrun Returns, interrogating the spirits of murder victims is a routine procedure for the police. Although the dead do have hazy memories, they often offer unique insight that living investigators usually miss.
* Shadowrun Returns is a brunette elf with a master's degree in computer science. She writes IC programs (as in, those extremely expensive one-time computer superviruses that act as overpowered virtual reality spirit summons) when she's bored. She acts as your decker after you rescue her from a cult. And in Shadowrun canon, she eventually becomes the CEO of a Big Eight Megacorporation.
* Shadowrun Returns is an extremely by-the-book ex-soldier. This gets her into hot water when she forgets the "ex-" part, and that her new team consists of one hacker and professional anarchist, an ex-cultist on the verge of cyberpsychosis and a street-fighting shaman, all of whom have not only never even read the book, but think the book is best used as toilet paper on general principles.
* Shadowrun Returns is a subversion. At the beginning of the game Monika dies, and her death becomes key in averting a potentially world-ending plot, and in her home, the Kreuzbazar, people gush about how great she was and all the good things she did. However, as soon as you start digging, the cracks begin to appear. While she did do a great deal of good, her advice got Simmy Kim addicted to BTL sims, she never even took notice of Sam Beckenbauer's charity, seemingly because of anti-ork prejudice, and for all her claims of being an anarchist she essentially ran Kreuzbazar as her own little kingdom and clamped down hard on dissent.
* Shadowrun Returns, it somehow gets aboard your ship, taking residence in Gobbet's cabin. Even she of the bottomless iron stomach is creeped out by this.
* Shadowrun Returns: Racter mentions that he speaks 15 languages. However, he is only literate in twelve of them, and, much to his chagrin, never got the hang of Arabic. He gets bonus points for having done it all the old-fashioned way, without datajacks and linguasofts.
* Shadowrun Returns says Gobbet's favorite brand of cup noodle smells like insect repellent, and the Shadowland boards are full of horror stories about people who made the mistake of taking her restaurant recommendations. It comes with being a shaman with rat as her totem; she can eat things that would actually sicken most metahumans.
* Shadowrun Returns (specifically, Hong Kong) has Ku Feng, a vampire. As the game is set in Hong Kong, upon encountering her, your character has the option of snarkily pointing out that she should be hopping, not walking.
* Shadowrun Returns still wears his Red Samurai armour, which makes sense since he's already on their 'kill' list anyway for being a ghoul and the armour is one of the best available in the Sixth World.
* Shadowrun Returns. The backgrounds are standard 2D artwork. The advantage here is there is no need to store animation frames for all the possible weapon/armour/implant combos in all the required actions and poses. It also allows

implants to be represented easily by re-texturing parts of the character.
* Shadowrun Returns when you compare an assault rifle wielding Street Samurai to a Mage or Shaman. This is due to the fact the Street Samurai's weapons (guns in particular) and weapon skills will always out damage the Mage's spells (some of the Mage's spells have at least a turn for cooldown).
* Shadowrun Returns with you to the deckers' convention will lead to at least two comments on his 'cosplay', one noting that his (authentic) Red Samurai armour is the wrong shade of red and the other geeking out over Gaichû's 'commitment' by making his Red Samurai 'replica' out of actual metal instead of just going with cardboard or styrofoam.
* Shadowrun: Rockworms are about as close as Earth life can get to this even under the influence of magic. They still retain carbon-based DNA — silicon atoms are far too large to fit within its structure — but utilize silicon in most other systems, require carbon only in trace amounts and get along by eating silicate minerals as their chief food source.
* Shadowrun: Rockworms are Awakened earthworms about two meters long, with three-lobed jaws, lots of strong, sharp teeth and corrosive saliva. They use these to bore tunnels through solid rock, digging extensive tunnel systems. They don't prey on other animals, but their tunnel systems can and will cause large collapses when they grow too big — and they're just as happy eating the concrete in dams, highway supports and buildings as they are eating rock.
* Shadowrun RPG offers these as a type of cyberware. The end of the gun is in the palm, and locking one's hand back links it to the rest of the gun barrel. Rarely used as typically not worth the cost or essence, it does allow one to use their hand though. There was also a picture of a character with the more traditional gun as a hand in the older Critter's book.
* Shadowrun RPG where the police (Lone Star) are a dangerous paramilitary unit that all player characters should try to avoid. Although, in some campaigns (fortunately, not in any of the official campaigns) they still become bunglers when the player characters are around.
* Shadowrun, runners can make good money off pirate radio operators, underground rebellions, or rival governments/corporations from missions involving digging up and airing some corp or government's secret dirty laundry.
* Shadowrun: Runners sometimes get hired to do a courier job. One memorable one was to deliver a dragon's egg. Some characters can even be specialized in the job, with headware designed to carry data that can only be extracted by someone with the proper key.
* Shadowrun's actual Chunky Salsa Rule is a little more forgiving than most. Noting that a typical troll PC who sticks his head in a tank's main gun barrel will die around 100 rounds after it fires, the rule allows the process of dying from wounds to start further along if the attack had a Power greater than 1.5 times the victim's Body. In the given example this rule would most likely result in near-instant death.
* Shadowrun's buildings, right before kicking them right out of his territory. Many of his attacks also happened to pinpoint several corrupt corporations, as though he'd planned it all along.
* Shadowrun's DocWagon High Threat Response Teams are Combat Medics For Hire. In many cities they or their competitors are the only ambulances in operation. Notably, DocWagon does not care whether or not the patient has a SIN — the SINless just have to pay for at least the basic contract (5000 Nuyen per year) in advance.
* Shadowrun section) and still omnipresent on the streets in 2080. It's not nearly as flashy or fancy as the Alpha, but costs less than half on the black market, is street legal with a license in the UCAS, and is the go-to automatic for gangers and aspiring Shadowrunners on a budget.
* Shadowrun setting may or may not be wiped out by the Horrors, depending on how soon they break through into reality and whether technology gives more of an advantage to them or us. Oh, and whether or not your game master acknowledges that Earthdawn ever happened.

* Shadowrun, several of the characters' tracks are opposed to each other.
* Shadowrun several times. Their last kick at the can contributed to Crash 2.0, which involved EMP bombs (to cripple the Matrix) and conventional nuclear weapons (to crack open major fault lines). Although the cult's leadership was all killed and most of their activities terminated with extreme prejudice, Winternight continues to taint people's views of Norse magical traditions.
* Shadowrun shortly before the start of the Sixth World. They're essentially a global, tens-of-millions-strong demographic of regular, everyday people with dwarfism and pointy ears, though not without a few quirks:
* Shadowrun. Skilled counterspellers usually throw more dice against spells than their casters can throw to cast them, making magic somewhat pointless against them.
* Shadowrun, "slave chips" can be used to paralyze a subject (usually a prisoner) or overwrite his personality with a new subservient one, for example to turn someone into a sex slave.
* Shadowrun's mega-badass Kid Stealth was given cement overshoes and tossed into Puget Sound by his enemies. An implanted air tank kept him from drowning long enough to tie ligatures around both legs, then blow them off at the knee with plastic explosives. (He got better... legs, that is.)
* Shadowrun, so instead of forging axes underneath mountains, said dwarves are more likely to use cybernetic interfaces to pilot unmanned combat drones.
* Shadowrun. Some magicians in the Sixth World participate in formal magical duels with their opponents. One of the major magical groups, the Illuminates of the New Dawn, has a set of rules similar to the old rules for dueling with weapons. They include the challenged party being allowed to determine the terms of the duel, the dueling area being warded to prevent the spells from affecting bystanders, and the presence of seconds and a judge to keep things orderly. The opposing magicians are sworn to accept the outcome of the duel, such as resolving the dispute between them.
* Shadowrun. Some of the elves in the game are immortal and have lived thousands of years, since the previous age of magic, but this is not generally known. Several supplements provided evidence of their great age.
* Shadowrun sometimes used this with electronic form letters. The computer sending the letter decides which phrase to use depending on the recipient's status.
* Shadowrun sourcebook, iconic character, Hatchetman, is telling of his slow evolution from street punk to cyber samurai. At one point, he comments on how he used to snicker at older streetsams who would normally stand with their backs to the wall for being paranoid, only to get the "wired reflexes" mods himself, and finding himself doing the same thing to keep himself from reflexively striking somebody coming up behind him. He isn't paranoid of being hurt, but of hurting an innocent.
* Shadowrun sourcebook, one bit of shadowtalk appended to the description of Berlin refers to a restaurant that reputedly plays this trope straight. Another shadowtalker immediately posts to deny the place even exists, however.
* Shadowrun sourcebooks are quite clear that story-wise, the powers of magic-users and technomancers are as different as night and day. Gameplay-wise, however, technomancers practically are magic-users whose powers affect the Matrix instead of the real world. The 5e sourcebook "Kill Code" even outright stated that a technomancer weaving a Complex Form or compiling a Sprite resembles a magic-user casting a spell or summoning a Spirit more than it does resemble a decker using a program or starting an agent.
* Shadowrun sourcebooks, mostly that rioting football crowds are a very convenient way for runners to cover up other crimes.
* Shadowrun sourcebooks, where a running discussion of the main text, in electronic discussion forum format and complete with the occasional off-topic digression, will appear in the margins or along the bottoms of a book's pages.
* Shadowrun. So your team's Medic got shot first, followed soon after by you? Sucks to be you. Hope you have an account with Medics-for-Hire, such as DocWagon. Conversely, you managed to drop their Medic. Nice work. Hear that siren in the distance? He had a DocWagon High Threat Response contract. They like to fly in with

assault helicopters and extract their clients under cover from heavy weapons fire... better finish what you're doing, right quick.
* Shadowrun, spent decades working to unleash The Horrors upon Earth. The fact that their ravenous hordes trampled him into paste when they finally broke loose may have alerted him that he was playing out this trope all along.
* Shadowrun: spilling a human's blood to enhance spellcasting and summon Blood Spirits. Extremely evil, restricted to Non Player Characters.
* Shadowrun's popular music is heavily based on '80s-style pop and hair metal, only with the volume turned way up, as befits a game first released in 1989. Oddly, they've stuck with the same aesthetic all the way through 4 editions, the last one released in 2005.
* Shadowrun's rockworm, an Awakened concrete-eating giant earthworm, is depicted with this sort of mouth.
* Shadowrun: Stink makes it more difficult for anyone in the area of effect to succeed in their actions.
* Shadowrun Storytime contract HMHVV. Geppetto acknowledges the risk and accepts it. Dr. John has him infected with a different strain first so he turns into a banshee instead of a ghoul, something that can still pass for metahuman.
* Shadowrun. Strains I and II merely glow in the presence of mana and dual-natured creatures, while FAB3 actively seeks out and consumes mana. Like all bioweapons, it went after more than just its intended target and devastated the ghouls of Cabrini Green and active mages. Pockets of FAB3 are scattered throughout Chicago, waiting for a nice juicy mage, spirit, or paracritter to walk by and announce its presence to them.
* Shadowrun subversive program and airs only on pirate stations. This is also a common trope associated with Mr. Johnsons, many a runner has done a job for bad boss taking out his competition or silencing a complainer.
* Shadowrun subverts this. The Shadowrunner team is hired by a corp to put something nasty in a rival corp's soda in order to make it taste bad. The runners find out that the substance in question would have led to the mass poisoning of many of the orks and trolls it was supposed to be marketed to, and the culprit is their employer's human assistant, who it turns out is part of the human-supremacist hate group Humanis, who engineered this scheme to ruin the reps of both his boss and the group's fixer.
* Shadowrun supplement Bug City. After insect spirits are discovered infesting Chicago and possessing its citizens, most of the city is sealed off to prevent them from escaping.
* Shadowrun supplement called "Better Living (and Dying) Through Chemistry", The Awakened (magical) version of peyote allows the user to astrally perceive and project as if they were a mage, and gives bonuses for the use of magical skills, thus allowing them to act as if they understood magic better.
* Shadowrun supplement, call girls had bar codes tattooed on them, presumably to make it easier to scan them and total up the client's bill.
* Shadowrun supplement has one runner describe how to make one and what to store in one. For one a Revolver with a dry lubricant. Mainly because a revolver doesn't need a much maintenance and a dry lube won't dry out and need to be replaced.
* Shadowrun take no damage from non-magical attacks if the damage isn't enough to punch through the Hardened Armor granted by the power (twice the creature's Magic attribute). If the creature has the Allergy negative quality, weapons made from that allergen bypass its immunity.
* Shadowrun: Technomancers are a relatively recent phenomenon, and as such most of them are teenagers or even younger. Certain parties, such as Horizon Corp, are terrified about how their powers will only get stronger as they age.
* Shadowrun tends to turn into this. Corps hire runners to do their dirty work and even if a lot of runners shun wetwork (outright assassination contracts), they aren't above sabotage, bombings, espionage, theft, and occasionally offing some security guards if things get messy. As a result, runners tend to be grey-area men and women working for bad people against other bad people. Other teams of runners rarely cooperate past a pulling a big job together and many will betray each other

for the sake of a bigger cut. To quote one book's fluff:
* Shadowrun territory but failing to annex either. Of course since Califonia is an independent nation and Texas is part of the CAS, this may be a subversion.
* Shadowrun that allows direct control of a Smartlinked gun in order to fully utilize its features as without it, the gun will either not function at all or operate as a regular firearm without any bonuses in accuracy or the ability to take advantage of its other features. Unfortunately they tend to leave the user vulnerable to hacking, especially as AR hacking became available.
* Shadowrun that any attempt to describe you falls into this trope. Even a facial recognition AI has trouble distinguishing you from the millions of other people in its databanks - at best, it comes up with "a human/elf/dwarf/troll/ork" and gives up.
* Shadowrun that bears their name. Shiawase (the corporation) prides itself on its 'corporate family' image, where employees are born, baptised, married and buried under the aegis of the corporation and considered 'part of the family'. Naturally, this means it's the mega most prone to infighting, as family members (both literal and figurative) struggle over their shared fortunes. Shadowrunners can make good money exploiting this tendency.
* Shadowrun that control the world's food supply would want to make it as difficult as possible for people to get their meals from sources they don't control.
* Shadowrun that crashed the Matrix and seriously damaged its infrastructure.
* Shadowrun that his regular heart is too weak to continue sustaining him.
* Shadowrun that reveals a major conspiracy to take control of the entire Internet.
* Shadowrun the Atlantean Foundation has a treasure trove of ancient magical artifacts obtained from archeological digs all over the world. It keeps them in various well-guarded sites in North America and Europe.
* Shadowrun the bugs' nest, preventing its full impact from reducing Chicago to a radioactive ruin. You gotta give props to FASA: it takes nerve to nuke your game company's own hometown. Their own headquarters, as a matter of fact.
* Shadowrun: The "Cognitive Fragmentation Disorder" seems to work this way, with the new AI building technological parts out of nanites in the host.
* Shadowrun. The consigliere of the Mafia Finnigan family of Seattle is Albert "Uncle Al" Cavalieri.
* Shadowrun the electronically recorded memories of a dead Street Samurai are reviewed and commented upon by fellow Shadowrunners. One fellow he'd worked with was known for keeping a cloth bag filled with stray cats; in a fight he would grab one by the tail, whirl it around, then hurl it at someone's face. One of the Runners comments on how this bit of animal cruelty is the most disgusting thing he'd ever heard of and he wanted nothing to do with a psycho like that. Then the memory log notes the crazy cat guy's specialty: the Cat-astrophe, where he attaches a bomb to the cat first. The same Runner responds, "okay, I take it back. That's just awesome."
* Shadowrun: The elven nation of Tir Tairngire banned the Universal Brotherhood cult within its borders. They had good reason to: the organization in question is devoted to converting human beings into insect spirits. Aztlan revoked the Roman Catholic Church's tax-exempt status in 2027 and then outlawed it in 2041, in order to promote Aztechnology's Aztec revival religion. Yes, they banned Catholicism in what used to be Mexico. This has gone over as well as expected.
* Shadowrun. The game treats being SINless as the "natural state" of a Shadowrunner as every Player Character starts Creation as SINless, with SINs as a disadvantage (you have to pay taxes, information about you are in the system and so on) with some advantages (you have an actual SIN you don't need to worry about being fake, and can easily use the advantages of the Government and Megacorps).
* Shadowrun, the in-character "shadowtalk" interspersed through the sourcebooks occasionally contains remarks like "I've never once had a real steak". Everyone but the ultra-rich evidently lives on cultured fungal protein and krill. Synthetic leather and tobacco products are also standard, as is "soycaf" instead of coffee.
* Shadowrun, the Jackpointer known as Mika was this during his conscription. It should be pointed out that his skill as a scrounger got him his nickname, which

means "Intelligent Raccoon" in Lakota.
* Shadowrun: the Mealtime Killer, the Emerald City Ripper, the Mayan Cutter and his copycats, and the "We are Free" killer(s) are just a few.
* Shadowrun: The nation of Aztlan (and the Mega Corp Aztechnology) brought back the custom of human sacrifice practiced by their Aztec ancestors. This was done in an attempt to summon the Eldritch Abomination Horrors to Earth much earlier than they normally would have returned.
* Shadowrun: The new metahuman breeds formed from humanity with the return of magic are, besides humanity itself, dwarves (short and stout, and good with technology), elves (long-lived, magical and reclusive, and often disdainful of other metahumans), and orks and trolls usually scorned and discriminated against by others, forcing them onto the fringes of society, but who tend to get along well with each other as a result. There are also variants of the main metahuman breeds, such as gnomes, nymphs, and giants; the ancient, powerful and arrogant dragons; and a number of less prominent species derived from Awakened animals, such as centaurs.
* Shadowrun, the passing of Halley's Comet in 2061 greatly increased the magic level on Earth, which caused SURGE (Sudden Recessive Gene Expression) mutations in (meta)humans, animals and plants, the re-appearance of the dragon Ghostwalker and natural disasters in the Asia that brought down the Japanese Empire.
* Shadowrun, the PC's player can invoke the Hand Of God, having the GM save the PC via some form of Deus ex Machina. There's a catch, of course: it has a hefty experience-point cost, and it can only be used once per character.
* Shadowrun, the player can get breast implants of varying sizes. Gamemasters are encouraged to use discretion in determining actual in-game effects.
* Shadowrun, the player characters are specialized criminals for hire, living double lives on the wrong side of the law. The mega-corporations often use them as deniable/disposable assets for espionage and sabotage against each other, as well as "extraction" (kidnapping) and "wetwork" (assassination). Played especially straight with the 4th Edition supplement book Vice, which is unsurprisingly all about all the various forms of crime a runner can commit and the various criminal elements in the world that runners can work with, including rules for how to play a high-rolling Made Man.
* Shadowrun, the player characters can interact with police from a variety of jurisdictions. The UCAS (i.e. the streets) were patrolled by Lonestar (motto: Blam! Blam! "Freeze!" Blam!) until 4th edition, when Knight Errant won the Seattle law enforcement contract; they can be just as brutal, are a subsidiary of Ares Macrotechnology (i.e. the biggest developer of weaponry in the world), and are eager to prove they're more capable and less corrupt than Lonestar (who still run the prisons, and a lot of laid-off Lonestar cops are now working on the other side of the law as Shadowrunners). Each Megacorporation has its own private security force as well — and since corporations make their own law, to them Miranda is just the name of a Hispanic guy. A run against Aztechnology may put you up against Leopard guards (whose brutality is just to tenderize you before the ritual blood sacrifice), while Mitsuhama Computer Technologies pioneered the concept of "Zero Zero" security. "Zero penetration, zero survival."
* Shadowrun, the powerful artefact that allows magic to return to the world is located in Santos, Brazil. Cyberpunk shooting ensues.
* Shadowrun, the Puyallup Barrens in the Seattle metropolitan area has an abandoned shopping mall called the Crime Mall, which is currently used as a front for many black market dealers. Now consider that the real life town that the Barrens is based on is named after a Native American tribe whose term literally means "the generous people" in their dialect. Given the location of the Crime Mall in that particular town, the name couldn't be any more coincidentally accurate.
* Shadowrun, there are parts of the world that do away with the "secret" part and openly serve metahuman meat to ghouls... with varying degrees of freshness.
* Shadowrun. These are meant for the runner who either doesn't have the cash for or doesn't want to deal with the Essence loss imposed by cyberware.
* Shadowrun, the Tailored Pheromones bioware is an alteration to the recipient's sweat glands that causes them to release pheromones. The pheromones only affect

normal humans and metahumans (i.e. elves, orks, trolls and dwarves). The game effect is to provide a bonus to the user's Charisma and Social Skill use.
* Shadowrun, the TerraFirst! attack on Shiawase's private nuclear power plant was one of these, with the real TerraFirst!'s headquarters bombed to destroy evidence that they weren't really responsible.
* Shadowrun, the titular Shadowrunners, find employment as those proxies.
* Shadowrun. The two had fought several times in the past but were on quite good terms — they even took to betting on where would be the next place they'd face each other again. This is in stark contrast to the undying, spiteful enmity between people like Neon Samurai and Nightfire.
* Shadowrun, the undercover cop protagonist mouths off to the war chief of the street gang he's infiltrated, and nearly falls prey to this trope the next time he's sent on an errand for the gang. He lampshades the analogy between his predicament and Uriah's.
* Shadowrun: The Wild Hunt is a collection of powerful spirits that appear as a pack of black hounds accompanied by at least one hooded and antlered hunter, either when summoned by a secret ritual known to few to hunt down someone or cause mayhem, or spontaneously, nearly always set to avenge some injustice committed against the natural world. On the bright side, if one can avoid their pursuit during the night on which they appear, by sunrise he may consider himself safe.
* Shadowrun: The world in the 2060s, after decades of rampant urban growth, commercial exploitation and reckless pollution, is one severely depleted of resources and wild land and thoroughly tainted with toxicity and contaminants of every material and spiritual sort. Consequently, nature and what defenders it still has have become… aggressive in their methods.
* Shadowrun, they're also designed to not explode if they miss their target.
* Shadowrun. This is, of course, perfectly normal within the confines of the Tabletop Game.
* Shadowrun. Though any character with a high Charisma and Social Skills like Etiquette, Interrogation, Leadership and Negotiation can do in a pinch.
* Shadowrun though since the girls are artificially made happy so least they don't have to suffer...
* Shadowrun. To avoid this, the Scramble program and the file can be downloaded as a package, and the Scramble program can be defeated later on the decker's own cyberdeck.
* Shadowrun to collate psychological, professional and relationship-based profiles on targets. Profilers gain bonuses to social skill rolls when interacting with anyone they've profiled, but gain penalties to social skill caps when forced into deep interactions with people they don't know or have failed to profile.
* Shadowrun to get all their contestants this way, although it's an open secret that some are simply shanghaied onto the programs.
* Shadowrun to go into such areas then, either, it's just not instant suicide at that point.
* Shadowrun to meet in that same desert and blow the hell out of each other in front of cameras. Un-officially...
* Shadowrun to survive, but Essence Drain only works when the victim and predator are connected on a deep, emotional level. It just so happens that for most vampires, the easiest emotion to connect with your victim is "fear", and drinking someone's blood while they're watching helps tremendously.
* Shadowrun to the D20 system had a game balance error that allowed a starting Elf character with a halfway decent Intelligence to read and write every language ever spoken in the history of the human race (as well as Sperethiel (Elvish) and Or'zet (Orkish)).
* Shadowrun tuchas. One of the major events of the metaplot had the Matrix crashing, which resulted in people either dying or suffering irreparable brain damage when their cyberpersonas were cut off from their bodies. Considering the fact that deckers directly connect their brains to the Matrix, this is at least somewhat more acceptable than other reasons.
* Shadowrun universe books feature direct applications of 3.3 - magically active

beings gradually lose their magic with increasing degree of cybernetics.
* Shadowrun universe, mages have to learn and cast a more difficult (reflected in drain rating) version of illusions if they wish them to fool electronic sensors too. (Cybereyes don't count because they are bought by the owner's essence.)
* Shadowrun universe, people infected by a certain magical virus turn into ghouls, who must eat metahuman flesh in order to survive. One of the bequests in the will of the dragon Dunkelzahn was to give 2 million nuyen to anyone who developed artificial metahuman flesh that could satisfy a ghoul's hunger.
* Shadowrun universe, the Incubus is a large octopus-like creature that has magical powers that can make it appear as a desirable person to its prey. The critter's actual form isn't changed, only how others perceive it. One runner describes an encounter with it at the docks in the middle of the night, where his partner saw a beautiful naked woman and as he approached it, it attacked him and revealed itself as an Incubus.
* Shadowrun uses a two stat wound tracking system - lethal and nonlethal damage. Characters accumulate ever greater penalties to all actions as those tracks fill up.
* Shadowrun Verse's metaplot called for a nuke to be set off to destroy a massive bug-spirit infestation, then-publishers FASA situated both the spirit-hive and ground zero for the nuclear blast in their own Chicago office.
* Shadowrun Verse, to try and handwave why babies all over the world were suddenly being born as elves and dwarves. The term lasted until dragons started showing up in the skies again and the effect tapered off once magic stopped spiking and the number of metahumans had reached sustainable levels.
* Shadowrun video-games feature a Matrix that can be entered by characters.
* Shadowrun Virus). They're around 2.5 meters high, weigh 130 kilograms, and look like a sasquatch with white fur. They have magical powers, and mentally influence their victims into becoming cannibals.
* Shadowrun waging a covert war against each other, with the titular Shadowrunners being the deniable assets that the corps call upon to do their dirty work.
* Shadowrun was retconned to be implemented after the Crash of 2029 destroyed the internet. In 2064 another Crash destroyed the wired Matrix and a wireless mesh Matrix was built.
* Shadowrun was when three "Hellions" — heavily modified cyborgs — appeared in one of the novels. Each had a triple-barreled machine gun incorporated into one arm.
* Shadowrun, we have Deus, the A.I. that goes haywire and locks down the Renraku Arcology, then uses it as a corral of test subjects for creating an organic body for himself.
* Shadowrun. When an insect spirit possesses a human being it overwrites and destroys the human's personality with its own. If the spirit achieves a "Good Merge" it can keep the original personality's memories and use them to impersonate the victim.
* Shadowrun when it flies to the rescue, never mind how long took to get the summons underway!
* Shadowrun. When the magic returned to the world some humans gained the ability to use it. Most countries recruit and train hermetic mages and nature shamans to help in warfare. Several countries, such as the UCAS (United Canadian and American States), Native American nations and the elven nations (Tir Tairngire and Tir na Nog) are particularly well-known for their combat mages/shamans.
* Shadowrun (which counts in-game as an addiction) or eat metahuman flesh for sustenance (which doesn't, beyond how we're all addicted to having to eat). Either way, it usually leads to this, though in theory it's possible for the second type to survive without harming anyone (by eating medical waste and raiding cemeteries). Most sufferers aren't that lucky, however. One group of ghouls in Chicago discovered that, while they tasted disgusting, Insect Spirits were apparently close enough to humans that they could survive by eating them and went into the extermination business.
* Shadowrun, which is set even farther in the future (2050s onwards). Obvious in

the drawings of female corporate characters wearing their powersuits, with shoulder pads and big, angular accessories.
* Shadowrun who caught his bullet, and then simply flicked it back with enough force to hospitalize the bounty hunter. While players who roll up an adept have access to an ability to catch "slow" projectiles like arrows and shuriken, bullets are outside their capability; and while they can also specialize in throwing weapons, few can actually fling with enough force to neutralize a hardened opponent with one shot.
* Shadowrun, who had been using his bequest from Dunkelzahn's will to attack Novatech.
* Shadowrun whose traits emerge in response to the increased background magic level) existing alongside cyborgs, and spellcasters intermingling with drone-controlling hackers.
* Shadowrun will usually end up becoming this once they survive their first few 'runs together.
* Shadowrun Winternight also planned their attack to happen when Novatech made its initial public offering, resulting in an event known as Crash 2.0, destroying the wired Matrix.
* Shadowrun with in-house security, which makes the public police look professional by comparison.
* Shadowrun world of the latest edition, it also has the advantage of having no wireless capability, meaning it can't be bricked or worse by an enemy decker.
* Shadowrun: Wraiths can cause uncontrollable aggression in those near them.
* Shadowrun, yet the vast majority of player groups will include one. This means that any antagonists the players fight against must be prepared to face a mage, no matter how unlikely this was - imagine every club bouncer being ready for Muhammad Ali or Floyd Mayweather to show up - or the mage will win easily.)
* Shadow Sae, due to their distorted desires and thoughts corrupting their mind.
* Shadow Sae, the rest of her Palace isn't as blatantly rigged as it is in the game. Her boss battle is even fought fair and square, skipping the opening phase with the rigged roulette wheel. However, this does cause some of her speeches about how everything is rigged in her favor to ring somewhat hollow.
* Shadows: After being deflowered by Tony and then being dumped by Tony, formerly innocent Lelia adopts a more assertive, sexually adventurous persona. She does this enough on her date with Davey that Davey finally says "Where I come from, the men do the asking. The girls just go 'yes' or 'no'."
* Shadows Awakening after defeating Wong and killed Jackie, Uncle and Viper, and then took over the world.
* Shadows Awakening as the main threat — launches a full-scale assault on San Francisco in order to lure out the heroes for one final confrontation.
* Shadows Awakening ends with the heroes being forced to retreat and escape.
* Shadows Awakening has in common is that they all want to rule the world.
* Shadows Awakening: The Shadowkhan tribe that Jade learns to create is composed entirely of kunoichi (female ninja).
* Shadows Awakening: When describing the Queen's dress, the story notes that it's too revealing for a prepubescent girl. The Queen herself doesn't seem to find a problem with it.
* Shadow saying things that sound true, Saki only felt pity for Yosuke at best and had a secret boyfriend he didn't know about.
* Shadows. Big heads, big, wide eyes, and so little and huggable looking. A lot of the smaller Heartless fall into this category. They are so huggable you can almost ignore the fact that if you get within an arms' reach they will plunge whatever limbs they have inside your chest and rip your heart out.
* Shadow's cellmate Low Key tells the story of Johnny Larch, an inmate who tried to fly away after getting paroled, but since he refused to allow an airport worker to "disrespect" him by not accepting his expired drivers licence as an ID, he ended up thrown out of the airport, and soon back in prison. In prison, "not taking disrespect" is a survival mechanism, but it can get you into lots of trouble on the outside. Shadow comments that perhaps

* Shadow's End, the governing planet of an entire solar system is a City Planet.
* Shadows Fall, the animated scarecrow Jack Fetch is the intimidating, unstoppable minion of Old Father Time, who sends Jack to wreck havoc on the invading Warriors of the Cross. He can't speak, but is strong enough to tip over a tank, and swiftly regenerates if burned, cut to pieces, or even blown up.
* Shadows Fall, while no strangers to power ballads ("The Art of Balance", "What Drives the Weak", "Inspiration on Demand", etc.), had never made one that was quite as modern rock-oriented as "Another Hero Lost". It was an obvious bid at widespread radio play; while it did accomplish that, it also pissed off dedicated fans (who hated it for being such an obvious radio song) and alienated non-fans who latched onto it (as the parent album was far heavier than that song). The band quickly turned against it and stopped playing it live around the end of 2008 and never brought it back.
* Shadows for Silence in the Forests of Hell, but people who are treated late are left with characteristic patches of withered flesh. Downplayed in that the Shades don't seem to care either way, but the living see it as a sign of ill fortune and tend to ostracize people who are so marked.
* Shadows for Silence in the Forests of Hell". Don't kindle flame, don't shed the blood of another, don't run at night. Breaking them sends the shades that inhabit the Forests into a homicidal rage.
* Shadows for Silence in the Forests of Hell; running is the least dangerous, bleeding through accidents is safe, killing in ways that don't shed blood is safe, and lighting a fire using another flame is also safe. Silence's inn has a fireplace that hasn't gone out since it was lit.
* Shadows for Silence in the Forests of Hell, shedding blood in anger will draw the wrath of the shades like nothing else. An accidental bump or nosebleed doesn't count, but blood shed in anger, exposed to the air, will enrage every shade in the vicinity. First, they will hunt down and kill whoever shed the blood, then, being enraged, they'll kill anyone else that happens to be nearby.
* Shadows for Silence in the Forests of Hell. Silence's husband was named William.
* Shadows for Silence in the Forests of Hell, the shades normally drift away from humans and are mostly harmless unless you manage to walk right into one despite them drifting away. But break the Simple Rules (don't move too fast at night, don't kindle fire, and never draw blood), and their eyes light up red as they enrage. If that happens, if there is a nearby safe place enclosed by silver, run there. Otherwise, your ass is toast.
* Shadows for Silence in the Forests of Hell: When the sun is up, the shades can still be enraged by kindling flame or shedding blood but will ignore fast movement. As such, it's much safer to move around by day.
* shadows from his body. But he can only project them where ordinary shadows could be cast; complete darkness renders him unable to attack and bright lights can cut off his tentacles. Granted, he is still near immortal even when he can't attack; in a way he is both the most powerful and the most vulnerable homunculus.
* Shadowside have this premise, and most of the subtropes are covered.
* Shadowside not only covers the basis of this, but almost all of the subtropes are at least partially true of it.
* Shadowside, the world switched over from 2007 AD to 00 AED, "Years After Evos Dawn".
* Shadows. In an implied inversion of this trope, several characters, however, noted that the Vorlons sometimes use more primitive technology to hide how advanced they really are.
* Shadows in the Glass. Matt shows up and overpowers Hoffman, but is unable to get anything out of Blake before he dies. Hoffman, wracked with guilt over the incident, is scooped up by Leland Owlsley and hidden away as a bargaining chip. When Fisk learns of Hoffman's location, he sends a team of corrupt cops to kill Hoffman, but Matt manages to stop them.
* Shadows In The Moonlight, with the victims coming alive now and again.
* Shadows In Zamboula, Conan is thoroughly warned about staying with Aram Baksh, where he hired a room.

* Shadow Sirens, Marilyn lands in the middle and is neutral (though loyal to the baddies), and Beldam is ugly and fully evil.
* Shadows. It didn't last very long and was soon replaced by the strip it had itself replaced.
* Shadow Skill, Elle is about to run into a building where a fight is taking place, and one of their fire attacks bursts through the door and incinerates her. Elle is left charred black and mad that her hair was ruined.
* Shadows Linger It appears to be made of black stone, but during one foray into it, Shed gets a better look and sees corpses frozen into the stone.
* Shadow Snark, the titular character has no way to gauge his normality.
* Shadow Snark when Uma, Pinkie Pie, and Shadow try to poke each other with sticks. It eventually becomes a deconstruction when they end up trying cool sword fighting moves and have to ask their opponents to stage it.
* Shadows of Amn by the Runehammer, which grants a maximum +5 THACO, more damage, a ridiculous amount of bonus damage to undead enemies and several enchantments that can be cast once per day. It also sets the wielder's strength stat to 25, which is the absolute maximum possible. Only dragons and other godlike beings have this amount of strength.
* Shadows of Amn first surfaces. You can even rub it in her face later on.
* Shadows of Amn is more insane than evil, but it sure does enjoy killing...
* Shadows of Amn is still a vaguely powerful wizard, but this is nothing compared to his absolutely overwhelming power in the game. Besides, his personality goes from chilling monster to, well, like the most generic villain stereotype but with less personality. We're not even told what he looks like, probably because his game outfit was so weird.
* Shadows of Doom this may happen to any random kid around Elminster... and how it feels:
* Shadows of Dreams days arrives to a small human colony, having spent the intervening century or so at relativistic speeds (its hyperdrive was damaged in the previous battle). Since the crew isn't aware that the war is long over and that the rest of their race have isolated their area of space and refuse to interact with outsiders, they intend to complete their original mission: to capture the military outpost that used to be where the colony is now. The colony has almost no means of defending itself, especially from the most advanced race in the galaxy. Later on, though, the protagonist realizes that the crew must be aware of how much time has passed and that their orders no longer make sense. And yet they fully intend to continue, possibly as a sort-of last hurrah (plus, the fact that there's a human colony there likely means that their side didn't win).
* Shadows of Dreams power armor. It's mentioned that back during the Vague War, three Psilon marines in armor managed to completely level the city of Vilnius when they managed to breathe through to Terra.
* Shadows of Dreams. The latter is not revealed until the end of the short story, though.
* Shadows of Dreams, when a Psilon battleship decelerates from near-light speeds near a small human colony, believing that Psilons and humans are still at war.
* Shadows of Europe out of a friend of his, causing them to be aged until they became old-aged in seconds.
* Shadows of Forgotten Ancestors: Ivan and the rest of the Hutsul men carry their shepherd's axes everywhere. They have small double-blades and long handles, making them useful as walking sticks, wood choppers and weapons.
* Shadows of Forgotten Ancestors: Palahna shacks up with a sorcerer, with the apparent intention of getting him to kill Ivan to spare her of their loveless marriage.
* Shadows of Forgotten Ancestors walking nearby and begins to smile. She reaches out to touch him, and he screams, dying. Whether he's happily reunited at last with Marichka is up to the viewer.
* Shadows of Giants, an Oodako stalks a giant squid, only to be caught and eaten by Godzilla.
* Shadows of Giants: Rainbow Dash bursts into tears when she is turned into a human

since she doesn't have wings. When she calms down, she tells her friends not to tell anyone that she cried.
* Shadows Of Mordor, one possibility is to steal the clothes left by some Orcs who have gone swimming. It doesn't work, though.
* Shadows of Self asks weaponsmith Ranette to make one for him. The first version is simply an iron hook on a rope, but since Wax is able to Push on any metals, sending them flying away from the centre of his body, it works very well. The second version is even more complicated, because the hooks are hidden within a metal sphere and can be activated and retracted remotely.
* Shadows of Self created from various places underground, personally cultivated so that no one who lived there would ever have to live in darkness again.
* Shadows of the Apt and the rising, technologically oriented Apt ones, especially between the Moth-kinden and the short, stocky Beetle-kinden.
* Shadows of the Apt has the magical and highly traditional Inapt races (Romantic) and the forward-minded, technologically-oriented Apt races (Enlightenment).
* Shadows of the Apt. In the first book, they have crossbows, slow flying machines, and crude gunpowder weapons. By the end snapbows (armour piercing, fast reloading guns based off of compressed air), fast and deadly ornithopters and fixed wing bombers, super heavy computer controlled artillery and spider tanks have completely changed military tactics. There are also radar analogues and lightning based super weapons.
* Shadows of the Apt. It's hinged, so there's even more mobility than the standard Blade Below the shoulder.
* Shadows of the Apt often grow barbs down their forearms with their Art. They're most often used as a secondary weapon, though, adding one more way for them to kill you.
* Shadows of the Apt. Particularly cold-blooded in that they found her side innocent and show no remorse.
* Shadows of the Apt series giant insects basically fill the niche in the ecosystem that mammals do in our world.
* Shadows of the Apt series, the magically focused Inapt races can't even use a key in a lock or fire a crossbow, while the technologically adept Apt races are incapable of perceiving magic. They can perceive its effects, but insist that it's all just trickery.
* Shadows of the Apt series who have a culturally symbiotic relationship with their Proud Scholar kin of Collegium. The Fly-kinden also have elements of this.
* Shadows of the Apt- so far we have (in no particular order) the Hive, the Gears, the Barbs and a couple of others I can't remember right now.
* Shadows of the Apt, The Ant and Wasp-kinden are more Proud Soldier Guys.
* Shadows of the Apt, the magically-oriented Inapt kinden have been fading for several centuries, giving way to the technologically-oriented Apt kinden.
* Shadows of the Apt thing about blood, and huge quantities turn up in some prophecies.
* Shadows of the Apt (though people have no trouble with the couplings themselves), derogatory terms include "halfway" and "piebald". "Halfbreed" is occasionally used with some venom, too, although it seems to be the generally-accepted term.
* Shadows of the Apt, Tisamon. Even though he thought she betrayed all of them. Sometime after he learns they had a child — once he calmed down — he gives her a sword he had intended for her mother and had been carrying around for seventeen years.
* Shadows Of The Azure: Happens to Eiji for Naoto, and in the past it's implied that he also got one with Amane, the trope is then passed on to Gan for that occasion. And previously, Carl also got the same reaction when Naoto blatantly declared her gender.
* Shadows of the Damned brings us: "My name is Garcia Hotspur, hunter of demons, my wrath is your hell!"
* Shadows of the Damned drifts toward this frequently, with content that's as disturbing as it is nonsensical. Somewhere between goats being a source of light and finding out strawberries are made of ground-up tongues, you either learn to

just roll with it, or give up.
* Shadows of the Damned. For mortals, it exists just beyond the sound-barrier on the Highway to the Underworld. The city includes plazas and living spaces, theaters, wood-lands and swamps, old cemeteries, blood-filled sewers, a library and Flemming's castle at its center.
* Shadows of the Damned has Garcia getting knocked into a billboard by a giant demon, with his face sticking through the other side in an embarrassing position (like from between the buttocks of a demoness call-girl).
* Shadows of the Damned is a professional Demon Hunter on a quest to save his girlfriend Paula from Fleming, Lord of Demons.
* Shadows of the Damned — The game takes place in hell. A very fleshy, organ-splattered hell.
* Shadows of the Empire affect her so strongly Leia can't resist, it's all to the best.
* Shadows of the Empire and tells him sycophantic nothings, although it always pronounces his name "Sheezor", much to his annoyance.
* Shadows of the Empire and then, when she tells him he won fairly and should kill her, says,
* Shadows of the Empire. Annoyed, Lando takes some to show them what they're missing; "the expression on his face went from irritated to amazed, slid to horror, then right into disgust". He decides that it was overspiced, and they're just going to open a packet of beans for dinner.
* Shadows of the Empire, as a flesh-eating bacteria had escaped from a research facility on the planet (one established by Vader himself) and wiping out the city and the surrounding region was the best way to prevent the contagion from spreading and wiping out all life on Falleen.
* Shadows of the Empire before the film's initial theatrical cut, in December 1976, though this can be excused as part of the promotion of a product whose success was not at all assured.
* Shadows of the Empire: Black Sun bribes a Rebel to assassinate Luke, and makes it appear the payment came from the Empire. Luke is skeptical though, knowing Vader wants him to stay alive.
* Shadows of the Empire comics. Most sensors short of a full medical scan are fooled into thinking she's an ordinary human. Which is rather the point, since she's also an assassin droid.
* Shadows of the Empire) from orbit. Xizor erased all record of this, but Vader's spies find out about this near the end of the novel.
* Shadows of the Empire gave the Rebels their Death Star info (with Palp's blessing).
* Shadows of the Empire: Guri sometimes serves as this for Xizor, in addition to his personal assistant and assassin.
* Shadows of the Empire. He also says females have the same ability, with it being very difficult for male Falleen (or presumably those of other species) to resist when they "blossom".
* Shadows of the Empire, Lando spends an hour making Giju stew but apparently uses too much Boonta-spice. Luke compares it to "old boot plastic and fertilizer drenched in pond scum".
* Shadows of the Empire (N64), you 'can' shoot them to death in this one, but it took forever.
* Shadows of the Empire Sourcebook and order an immediate orbital bombardment with turbolasers.
* Shadows of the Empire, the 'Easy' and 'Medium' modes end with Luke and Leia reunited at the rebel outpost, believing Dash to be dead after Xizor's skyhook blew, followed by a black screen that asks the question: "Did Dash really die?", urging the player to proceed to the next difficulty mode. At the end of the 'Hard' and 'Jedi', modes, the outpost aftermath scene is followed by a surprise scene that lets the player know that Dash survived. As the Outrider flies through a hyperspace vacuum, Dash exclaims that their escape (a well-timed jump into hyperspace right as the skyhook blew up) was "one for the books". When his droid co-pilot, Leebo, asks

Dash why he doesn't want everyone to know that they survived, Dash justifies keeping it secret because 1) Dash was never hired for the last job, so there's no sense sticking around waiting to get paid; and 2) Xizor's thugs would normally be out looking for him due to his hand in killing their boss, but if everybody already thinks he's dead, they're not going to be looking very hard. Dash punctuates the ending with the casual remark: "Besides, it's better to be remembered as a martyr and still be alive, right?", and the Outrider flies away.
* Shadows of the Empire: The Empire plays this role at the end of the story, just as it looks like the rebels are about to be obliterated by Xizor's forces.
* Shadows of the Empire, then to a first-person rail-shooter in its final stage, similar to the old arcade game.
* Shadows of the Empire to Xizor, whose entire family was wiped out as collateral damage in one of Vader's operations.
* Shadows of the Empire trying to escape from the Empire in an asteroid field, but Dash leaves the piloting to Meebo, so the player really doesn't even have to think twice about them.
* Shadows of the Empire, whose armor is plated with black chrome to camouflage it in space.
* Shadows of the Empire, with just one Human and every Vigo besides that from a different unique species.
* Shadows of the Empire: Xizor recalls how one of his mistresses wouldn't break it off when he wanted to, with her ending up "accidentally" buried in concrete by a construction droid.
* Shadows of the Limelight, many of the domains are elemental powers like water, light, shadow, wood, metal, and sound.
* Shadows Of The Past are along the lines of "Break up with Will or die."
* Shadows Of The Past says that while he doesn't hate humans like the rest of the Decepticons, he really doesn't care all that much about them outside of his immediate Earth family.
* Shadows of Undrentide J'Nah was planning on using to kill him, there are a number of ways to negotiate with him, not the least of which being striking up a friendship with the kobold he trained as a bard —— Deekin, who eventually becomes a companion option.
* Shadows of Valentia. In her madness, she blasts Alm with an Aura spell, and while he's noticeably harmed he just gets back up and continues fighting. In the actual map, Alm has very low resistance, and depending on his Speed rolls, Delthea might be able to do double attacks on him. This means if Delthea ever attacked him in-game he'd die immediately.
* Shadows of Yog-Sothoth, adventure "The Rise of R'lyeh". If the spell that's being used to raise R'lyeh is cast in reverse, it will cause R'lyeh to sink again.
* Shadows of Yog-Sothoth that the camera lenses they discover later are important.
* Shadows of Yog-Sothoth. The Lords of the Silver Twilight try to raise the island of R'lyeh to the surface and free Cthulhu so he can take over (and destroy) the world.
* Shadows of Yog-Sothoth - The rise of R'lyeh and release of Cthulhu. 'Nuff said.
* Shadow Song revolves around the friendship of Avrum Feldman and Bobo Murphy, who met when they were 68 and 17 respectively. Avrum shares a similar friendship with Bobo's love interest, who was also 17 when she met him.
* Shadow Song, the deceased Avrum Feldman may be seen as this to the protagonist, "Bobo" Murphy. While he was a friend, the older Avrum is also shown to be a manipulator whose influence over Bobo's relationships stems from his desire to live vicariously through him and see his unfulfilled romantic fantasies play out for someone else.
* Shadows on Mercury. In short, the only thing the heroes ended up doing is calling for help and creating a distraction.
* Shadows Over Baker Street investigating various Lovecraftian mysteries.
* Shadows Over Innistrad is defeated because she let herself be. The process in which she aided her own defeat left the planeswalker Tamiyo traumatised.
* Shadows Over Innistrad thing in the countless universes he still loves.

* Shadow's own game. You can switch Shadow's allegiance at any time, even during a mission. Sometimes your allegiance will be changed for you if you accidentally collide with a different Mission Character.
* Shadowspawn series, the title beings are the basis for just about every legend of magic or monsters (especially vampires and werecreatures) there is.
* Shadowspawn, the title beings are the basic for just about every legend of magic or monsters there is, especially vampires and werecritters.
* "Shadow" spells are a type of semi-real illusion. Some of these mimic other spells. The mimicry version are higher level, and act less real. If someone successfully
* Shadow spirits are only banished from the physical world and forced into brief dormancy if "killed", unless their bodies are destroyed while they have no
* Shadow Stalker also has a violent temper, both in costume and in her civilian identity.
* Shadow Star. A boy who's in a coma but can still use his Dragon uses it to impersonate a friend and tell his young aunt that neither of them ever really liked her. His reasoning is that it'll help her overcome her incestuous crush on him and find new friends as well as soften the blow when he fakes his death to go into the sea with his Dragon and become one of the Virgins.
* Shadow Star, aptly named Push Dagger, is also shaped like a giant knife.
* Shadow Star hissy fit after being told off by his old crush Jyun. Eventually, Kyouji, who had been comatose for years, dies, and Shouko is all alone… until she sees him after he turned into a... "Virgin Princess" and vows to keep on loving him.
* Shadow Star in love with his best friend Takeo to the point of wishing he could bear his child makes it darkly amusing.
* Shadow Star is a positive cause for celebration. All the main characters died, thousands of Japanese died, some 33 thousand other universes and Earths were destroyed, and the game goes on with a new set of players as if nothing has happened... Yay?
* Shadow Star itself is rarely discussed, probably since there aren't a lot of people who have actually read it.
* Shadows: The Horror Movie Heroes - driven by his curiosity regarding Shinsou's brainwashing, he manages to find out which school he went to and track down where he lives less than a day after meeting him.
* Shadows: The Horror Movie Heroes provides a rare human example early in Chapter 2 - Shinsou ends up scared after seeing a human-shaped shadow in his window, only to discover it to just be Izuku, who he'd met earlier that day.
* Shadowstone Park: He's a paraplegic cat who can see ghosts! He's a pelican with great abs! They solve murders!
* Shadow's voice tends to be low and booming with the exception of his voice actors David Humprey and Kirk Thorton.
* Shadows was Sicilian, playing a light-skinned black woman. Her lover freaks when he meets her much darker-skinned brother and learns the truth.
* Shadow Tactics: Blades of the Shogun is an expect firearms craftsman with a deadly precision on the sniper rifle. He's also a jolly old man.
* Shadow Tactics: Blades of the Shogun was working so hard to try and destroy the Shogun's peace.
* Shadow Teddie's repressed nihilistic feelings and hidden existential dread. His most powerful (well, it would be if it wasn't telegraphed) attack is even called "Nihil Hand".
* Shadow the cascade and fight carnivorous fish, including a miniboss, all the way down, taking a few minutes to do so.
* Shadow the Hedgehog and it ends with a satisfying conclusion to Shadow's story.
* Shadow the Hedgehog and the Black Arms from taking over the world. The subordinate responds in this way, but the Commander insists on using it anyway out of necessity.
* Shadow the Hedgehog are palette swaps of one another. There's a gold-striped Shadow that's a palette swap of the regular Shadow, and the "Metal Shadow" models

are also palette swaps.
* Shadow the Hedgehog are set in the Internet and the computer network in Eggman's base.
* Shadow the Hedgehog. Black Doom reveals that it would be a waste if the planet's population destroyed itself, so he planned to save them...by capturing them all and bringing them to the Black Comet where they will become livestock to be bred and fed upon. Starting with Sonic, his friends and Eggman.
* Shadow the Hedgehog. "Broken" was scrapped because they could not find the artists name to credit them. "Broken" was the original Neutral-Hero theme but was replaced with "Chosen One" while "Who I Am" was the games theme before being changed for "I Am All Of Me". "Who I Am" still sounds glaringly like it's about Shadow, with lyrics like "This is who I am/Not a shadow of who I want to be" and "You have made me/You can't change me/You don't know me/This is who I am".
* Shadow the Hedgehog, but Shadow is rather annoyed about it. However, he reciprocates in the Pure Hero — Dark ending, where he decides that he is the most powerful hedgehog in the world.
* Shadow the Hedgehog by the band's producer prevented Sega from using "Who I Am" by Magna-Fi, leading to "I am... All of Me" by Crush 40 becoming the game's theme at the last minute.
* Shadow the Hedgehog Eggman) sound like they're having fun whereas Shadow is taking the races seriously (and may not even fully comprehend the silliness going on around him).
* Shadow the Hedgehog endings that must be seen before the final stage opens up, some of which are pretty tough to reach unless you come through a certain penultimate stage.
* Shadow the Hedgehog factions will attack you regardless of whose side you're on, and yet their respective partner characters will yell at you for attacking their side.
* Shadow the Hedgehog form, Devil Doom, states this when Super Shadow defeats him. Black Doom had it coming anyway.
* Shadow the Hedgehog for the DAMN fourth Chaos Emerald and to FIND THE COMPUTER ROOM!
* Shadow the Hedgehog got a T rating from the ESRB. But the E10+ rating was rolled out during production, and SEGA saw an opportunity to increase sales. They made minor changes (cleaning up the language and turning the alien's blood to green, for example), and was able to tone it down enough to get an E10+ after resubmitting it.
* Shadow the Hedgehog had Cosmic Fall. You spend the entire level jumping from falling platforms.
* Shadow the Hedgehog has ten different endings, and each of them are bad or good in their own way. However, even if you make Shadow be purely evil, the Last Story segment is considered canon, where Shadow sides with the forces of good.
* Shadow the Hedgehog has two levels that take place in Shadow's memories, trying to help people aboard the space colony ARK, which went out of commission fifty years ago.
* Shadow the Hedgehog he doesn't have to deal with smegma. Arin reveals that he does not know what smegma is or at least misunderstands what it is. Dan explains it to him and Arin immediately replies that he wishes he could "unlearn" it.
* Shadow the Hedgehog. He helps out every now and then, but he's a pretty standoffish individual, even to his own friends. He lampshades this in
* Shadow the Hedgehog, he's annoyed at how much fun his blue counterpart is having.
* Shadow the Hedgehog inspired vacuum-gun that simply sucks up everything in it's path and rewards you with either one or three extra lives when it's full depending on it's level.
* Shadow the Hedgehog is a haunted castle owned by Dr. Eggman. Shadow can either choose to help Amy rescue Cream and Cheese, who are trapped inside the castle, or help Eggman defend the castle from the Black Arms by lighting the giant lanterns.
* Shadow the Hedgehog is a inversion. He uses "damn" and "hell" in every other sentence.
* Shadow the Hedgehog is an Eggman robot called the Egg Dealer, which selects its

attacks slot-machine style... a fact that can easily be turned against it.
* Shadow the Hedgehog is another serious offender. If only you could fly and deflect bullets in the game as well as in the cutscenes...
* Shadow the Hedgehog. It was built by Eggman with rings stolen through his evil schemes, to finance his evil schemes, which is also a little scary because it shows Eggman's settling in for the long haul with his own business.
* Shadow the Hedgehog levels, these levels all take place onboard the ARK.
* Shadow the Hedgehog. Nearly all endings in the game are subject to this trope, as only the full Hero ending and Last Story is considered canon by Sega.
* Shadow the Hedgehog, one that no-one is sure that he's left yet. While the concept was sound, the execution just wasn't.
* Shadow the Hedgehog, Shadow states that he plans to use the Chaos emeralds to conquer the universe.
* Shadow the Hedgehog's intro cutscene showing Shadow doing Chaos Control quickly, then punching an alien. Rinse and repeat for 10 to 20 seconds. That part of the cutscene does look pretty cool, and has no effect on any aspect of the game at all, so the use of chaos control here is justified by this rule (Normally, you need a Chaos Emerald and charge up the chaos control to do it, you cannot do it instantly).
* Shadow the Hedgehog soldier will say "Where's my bike? Does anyone know where it is?".
* Shadow the Hedgehog's one time foe, Black Doom, is an alien conqueror with the ability to tap into the powers of the mystical Chaos Emeralds and use Chaos Control.
* Shadow the Hedgehog story, swearing, and gun use, as the game was intended for older fans. The recent introduction of the E10+ rating gave SEGA an easy out after a backlash to the reveal. The blood color of the alien enemies were changed to green and human enemies merely get incapacitated without bleeding. The game ends the flashback of Maria being shot as soon as we hear the gunshot, the intro cut out a scene where a soldier was shot, and the swearing was cut to down to a load of forced "damns."
* Shadow the Hedgehog This transcends even human technology; flat holographic screens broadcasting the message appear inside the extraworldly Black Comet.
* Shadow the Hedgehog, though the all-out assault on Earth had been planned out at least fifty years prior. The purpose, however, is not so much to conquer or destroy as it is to obtain the Chaos Emeralds.
* Shadow the Hedgehog to be his favorites to work on and play respectively.
* Shadow the Hedgehog to meet that rating. To this day, however, there are still quite a few people who are surprised that it didn't get a T rating.
* Shadow the Hedgehog. Unless he's angry, because then he becomes a raging psychopath.
* Shadow the Hedgehog way to the ARK, so I guess that means we're going too!"
* Shadow the Hedgehog, when you fall from the sky, through a sky scraper, and then onto the streets.
* Shadow the Hedgehog, you can find "samurai swords" in special weapon boxes. Although they are close-range melee weapons as compared with the guns, they are still extremely powerful and can destroy almost any robot or thing with one swing, as well as shoot out shockwaves.
* Shadow. There are a few moves that automatically kill an enemy if he has less than 10 hit points left after the move connects, but obviously these are weaker than a move that simply deals 10 more damage and can be used at any time.
* Shadow Thief was weak against bright lights in his first appearance. In his second appearance, he comments light hasn't worked on him in months.
* Shadowthrone's cloak is described as looking like a living shadow, making the rather scrawny and bent Shadowthrone into an imposing figure. Considering that he is the God of Shadow and Illusion, it fits.
* Shadow Unit died of starvation over the course of burning a single person to death, her own body cannibalized by her powers to fuel the fire.
* Shadow Unit episode, the gamma, whose manifestation involves causing real bullet

wounds with a broken, unloaded gun, gives herself away by being the only person to have heard a gunshot at the death of her latest victim.
* Shadow Unit powers, which lets her work her Techno Wizardry even faster.
* Shadowverse: According to the flavor text, Harnessed Flame killed her own mother in the belief that it would protect Harnessed Glass, who in turn froze their father to protect Flame.
* Shadowverse a flashback reveals that Nicola Adel has died and revived several times, with his body feeling increasingly alien each time.
* Shadowverse appears in "Duelist of Eternity", still watching over the Morning Star.
* Shadowverse collab events when the imperial soldiers have the misfortune of trying to take down Mordecai, a powerful undying warrior.
* Shadowverse, effects that banish not only get rid of the affected cards but also prevent Last Word abilities from being triggered (which normally do so when the card is destroyed) and also prevents the cards from being converted into shadows. Havencraft has the most cards involved with this.
* Shadowverse: has Arisa. Many of the "uh" and "oof" sounds she makes upon being hit sound less like she's hurt and more like's she's disinterestedly mocking you for dealing so little damage.
* Shadowverse: Interestingly enough, Erika's sword resembles a katana, even though the kingdom she serves is European centric.
* Shadowverse: Like other Visual Novel-type narratives of Cygames such as Granblue, the movement of characters during dialogue is represented by static images moving around, shaking, or suddenly jumping. There are also cases when a character is mentioned to be lying or sitting down, with their static portraits simply adjusted downwards. The greatest offender would probably be the depiction of combat, where the two character portraits simply "bump" each other, while animated strikes and special effects are included whenever they connect attacks.
* Shadowverse — Marlone Median is clearly shocked when Luna refers to him as an "old man".
* Shadowverse, most of Eleanor's dialogue are paragraphs, and she speaks so fast that Isabelle mentions her ears bending from listening to her.
* Shadowverse, Nicola Adel's lack of passion in anything prevents him from going all out with his inhuman strength. Urias attempts to break him out of this trope so that he can fight at full power.
* Shadowverse) rather than outright magic, with a lot of machines and automatons among his followers. However, they still seem to incorporate magic into their operation, particularly the creepy soul-powered puppets.
* Shadowverse, this appears at the end of every leaders' arcs. Mostly when additional chapters are stated to be added in the future.
* Shadowverse, various legendary followers enter the battlefield with an elaborate and flashy animation. Bahamut takes the cake as its entry is also punctuated with the destruction of everything else already in play.
* Shadowverse, which can more or less be seen as a parody of this trope.
* Shadowverse, who is considered to have one of the deepest voices of Swordcraft followers and is pretty badass for a 5 play point follower.
* Shadow vs. Ryūko Matoi got a win in Death Battle, but he had to kill his favourite anime character to do it, which the hosts lampshade.
* Shadow: War of Succession has the allegedly Russian agent Sasha "No von vill stand in my vay!" Romanoff.
* Shadow: War of Succession, Riggs's (very spammable) "Hellfire" attack sends flaming clawed hands at his opponent.
* Shadow Warrior (1997) has Lo Wang quitting Zilla Enterprises after learning of his employer's plans to rule Japan using creatures summoned from the dark side. Master Zilla decides to use said monsters to kill Wang. Much ninja asskicking ensues.
* Shadow Warrior (1997), it soon becomes a quest to avenge Wang's master, who is killed by Zilla's men.
* Shadow Warrior (2013) inside. They were originally viewed as an abomination but

eventually deemed necessary to recover the Nobitsura Kage.
* Shadow Warrior (2013), when a single shuriken is enough to cause a car to smoke, catch fire, and explode like a pipe bomb about three seconds after being struck.
* Shadow Warrior 2 has a quite '80s aesthetic to the cyberpunk part of the setting. There's one major mission where you have to stop a paparazzo from releasing sex tapes of Ameonna by destroying vending machines selling VHS tapes, which would definitely not be enough in this Internet-connected age.
* Shadow Warrior, and he proves to be quite the amiable and chatty fellow.
* Shadow Warrior as examples. His demon companion Hoji notes that Travis Bickle is far from heroic, but Wang ignores this.
* Shadow Warrior attempting to use a non-functioning vehicle will result in Lo Wang remarking, "Huh? Must be American made!"
* "Shadow Warrior": General Grievous is captured by the Gungan army, and Anakin is captured by Count Dooku, roughly simultaneously. A prisoner swap is subsequently arranged where both of them are returned to their respective sides.
* Shadow Warrior, if Lo Wang is falling from a dangerous height, he will scream all the way down. Find a pit deep enough and he will actually pause for breath and then continue shouting.
* Shadow Warrior, one of the 'weapons' you could acquire — the final one, in fact — was the still-beating heart of a type of demon. By squeezing the heart, you could summon a demon to fight for you. Nifty.
* Shadow Warrior remake, you can use a Demon Heart, which you can get off dead demons, as a one-shot weapon that kills every lesser enemy in front of you.
* Shadow Warrior Rippers, gorilla-like monsters who love to rip you to shreds with their claws, rip out your heart while killing you. You still see it beating in their hands as you lie dead.
* Shadow Warrior the Nobitsura Kage, the only weapon that can kill the immortal Ancients who rule the demons.
* Shadow Warrior, they rule the villages and other areas that are not run by Zilla or overrun by demons, and Lo Wang clashes swords with them on more than a few occasions.
* Shadow War side quest, Talia’s body is in the morgue at the beginning but not the end. It’s possible that the League of Assassins revived her via the Lazarus Pit but there’s never a definitive answer given.
* Shadow Watch is notably quieter and more laconic than the other team members.
* Shadow Weaver has to put a lot more work into keeping Adora on her side than Catra, with quite disturbing results.
* Shadow Weaver to get away from Shadow Weaver as attempts to put her back in Adora's shadow, while Glimmer in season 4 takes Adora's actions as attempts to usurp her authority.
* Shadow, where Sam gets deep, bleeding claw marks down his face. Come the next episode (apparently a couple of days later by the way they're talking), he doesn't have a scratch.
* Shadow Whispering: Mike Bailey, whom ends up becoming far more interested in Veronica than Ashley.
* Shadow Wolf Mysteries: Bane of the Family and then placing a bullet mold on the other half of the scale so that the melted silver can run down into it. Quite a bit of work considering actually shooting the werewolf takes up maybe five seconds of the forty-second ending.
* Shadow World unit says Syron make them from hollowed carcasses of old Skwahl.
* Shadow Wraith casts you as a digital copy of a murdered scientist's mind, automatically activated upon his killing to avenge your own death from inside cyberspace.
* ShadrachASMR, he has eaten bananas dosed in spaghetti sauce, bratwurst wrapped in a tortilla topped with spaghetti sauce, cherries mixed with mayonnaise and cheddar cheese, chocolate-covered mushrooms, mustard flavored sardine and Pringles Sandwich, pickles in marshmallows (Not ON them, but IN them!). Reportedly Shadrach has expressed interest in trying steak in Spaghetti-Os and squid burgers.
* Shadwell, in his own peculiar way, is also a conspiracy theorist, albeit one

more focused on witches and other supernatural phenomena.
* "Shady" Slater is just settling into mining an asteroid when the "Phantom Fleet" is mobilised in
* Shady's Poopong: 22nd Anniversary Edition has this in reverse; The Announcer calls everyone in the credits idiots, and then segregates himself from the others saying "plus your suave announcer".
* Shady's Poopong of the game's creator and a tester on the first game, who died in 2008.
* Shae becomes this in Season 3, starting in "Dark Wings, Dark Words" but especially as Tyrion's wedding draws near, interrogating Tyrion brutally about his interest in and history with other women (Sansa and Ros, respectively). This is despite the fact that Tyrion has shown nothing but despair over his marriage to Sansa, viewing her more as someone he must protect, and Ros is now dead.
* Shae mentions in "What Is Dead May Never Die" that every man she cooks for compliments what a good whore she is.
* Shaenor with its 26 Romulan passengers was the last vessel assimilated by the Artifact because no one outside the Tal Shiar has access to that information.
* Shae, Tyrion Lannister's prostitute mistress, eventually abandons him in favor of his father, Tywin. She is barely out of her teenage years, while he is nearly sixty.
* Shae who's more than happy to accuse him of crimes he didn't commit for the promise of riches and status.
* Shaft (2000), a black man named Trey was dining in a mainly "upper class" restaurant and was racially harassed by a Jerkass white diner named Wade. After ignoring the first few public insults, Trey walks over to Wade's table, cuts two holes in his cloth napkin, and puts it on top of Wade's head, where it resembles a KKK hood, to the laughter of some of the onlookers.
* Shaft (2000) features the son of Jackson's character, John Shaft Jr.
* Shaft (2019)'s Shaft's father, instead of his uncle like in the 2000 film. Jackson is only 7 years younger than Roundtree.
* "Shafted", a bossy office manager is cut in half while trying to escape a malfunctioning elevator.
* Shaft in 2019, with both older Shafts appearing and introducing a third-generation Shaft.
* Shaft Lt. Androzzi to let him know how many are there and where to send the cops, pretending to be talking to one of his girlfriends.
* Shaft made back its budget many times over and earned excellent reviews, despite having a black lead and a mostly Black cast.
* Shaft opens with John Shaft flipping the bird at a cab driver who's honking his horn at him and yelling "Up yours! Get out of the way!"
* Shaft, the title character gets shot once in the shoulder at close range by a machine gun and hits the floor, apparently unconscious. After minimal medical attention, it doesn't seem to take long for him to get back in action.
* Shaft was a model whose acting experience was limited to commercials.
* Shaft: Who's the black private dick, that's a sex machine to all the chicks?
* Shagga fights with an axe in each hand and acquires three axes from the Lannister armory before a battle. Tyrion explains that Shagga believes that two axes are better than one, and three are better than two.
* Shagga of the Stone Crows might be Tyrion's ally, but he's still a murderous savage with a bushy beard to boot.
* Shaggy’s evil mirror clone is definitely NOT de-fanged. Especially when he traps the real Shaggy in the mirror and the girls had been hypnotized by Revolta, with Elsa revealing Revolta’s plan to turn the girls evil permanently at midnight. It’s up to Scrappy to save Shaggy (in a rather comical way).
* Shaggy actually says this a lot in order to not look like a coward, even though they already know he is.
* Shaggy & Scooby-Doo Get a Clue! episode "High Society Scooby", Agents 1 and 2 drive an ice cream truck to lure Scooby and Shaggy into a trap.
* Shaggy & Scooby-Doo Get a Clue! episode "Operation Dog and Hippie Boy", the

evil hippie robot Groovy Don carries a laser beam firing guitar.
* Shaggy & Scooby-Doo Get a Clue! episode "Scooby Dudes" has Scooby paint the words "Kick Me" on Dr. Phibes' back after eating a super speed Scooby Snack.
* Shaggy & Scooby-Doo Get a Clue! has Dr. Phibes plot to throw a group of octuplets who are more beautiful than him into the sun using a rocket.
* Shaggy & Scooby-Doo Get a Clue!: In "More Fondue for Scooby-Doo", there's a gag where Misty Swiss has snow fall on her and it forms the shape of a fire hydrant, afterwards Misty Swiss's dog Carla attempts to pee on her
* Shaggy & Scooby-Doo Get a Clue!, is frequently irritated by his henchmen's bumbling.
* Shaggy & Scooby-Doo Get a Clue!: Scooby-Doo change into whatever shape a situation calls for after eating the special Scooby Snacks that Shaggy's reclusive uncle Albert had been developing. Once it metabolizes and he burps, Scooby returns to normal.
* Shaggy & Scooby-Doo Get a Clue!, Shaggy and Scooby's robot butler Robi had a tendency to not understand figures of speech due to his faulty programming. For example, when told to lie low and keep it cool in "Party Arty", he misinterprets these instructions as meaning he must lie down as low as possible and cover himself in ice cubes.
* Shaggy & Scooby-Doo Get a Clue!: The first episode, "Shags to Riches," had Shaggy inheriting his missing Uncle Albert's estate.
* Shaggy and Scooby are trapped in a cabin with the only door locked and the key on the outside (and no manual lock on the inside), so naturally, the two of them HAVE to break out some other way. Shaggy chooses to leap through the window—in order to grab the key, unlock the door, jump back through the window he busted, and open the now-unlocked front door.
* Shaggy Dog Stories has been seen running a trap store, a video rentals store, a pet shop, and an 'Authentic Italian Cuisine' stall.
* "Shaggy Dog" Story: An adventure that is rendered moot when it ends.
* "Shaggy Dog" Story" by informing the audience that "this song is called 'Alice's Restaurant.' It's about Alice, and the restaurant, but 'Alice's Restaurant' is not the name of the restaurant, that's just the name of the song. And that's why I call the song 'Alice's Restaurant.'"
* "Shaggy Dog" Story, even if the given movie doesn't have a planned sequel yet.
* "Shaggy Dog" Story: The story ends with the protagonist's efforts turning out to be pointless.
* "Shaggy Dog" Story: When the character's actions are rendered moot at the end. Sometimes done to maintain the status quo, but other times it's just played for drama or as a joke.
* "Shaggy Dog" Story: With the "decadent aristocrats" angle pretty well discredited, the joke has become this, with the punchline serving as a weak bit of irony.
* "Shaggy Frog" Story: A character attempts to prove a point by telling a story, only for the story to end up spiraling into incomprehensible nonsense and the intended moral being forgotten.
* Shaggy is not a one-hit wonder by himself, but both of his #1 hits feature one-hit wonders:
* Shaggy knows to look for Daphne's soul in the pit after he's found Fred and Velma's. The reason is that he was originally going to stumble upon Daphne's soul being extracted from her body and a monster inhabiting it. This scene too was deleted.
* Shaggy, Scooby and Velma (all in suits of armor) slide down a banister to escape the headless spectre of the episode "Haunted House Hang-Up."
* Shaggy's song "It Wasn't Me", about a man caught in flagrante delicto by his girlfriend, has a Blatant Lie as its title. The advice given is lie blatantly; just issue a flat denial ignoring any evidence to the contrary:
* Shaggy the Handler: An old steam train's whistle sounds just similar enough to an incoming artillery shell to send the title character diving for cover, kicking off the plot of the second story in the trilogy.

* Shaggy the Handler: Fred, Daphne, and Velma all have fathers who are veterans (likely WWII veterans). Their experience with their fathers helps them understand why Shaggy won't talk about his past in Vietnam.
* Shaggy the Handler. When he hears a whistle, he flashes back to Vietnam and panics.
* Shaggy the Handler, with several of his quirks being related to his time as a soldier.
* Shaggy was stripped of all his hippie during the 80s, but got it back in the 90s.
* Sha Gojyo and Son Goku do this constantly throughout the different anime series in
* Shah Ismail I. It was believed by contemporary scholars that if he had won, the Turks would have been unable of conquering Mecca and Medina from the Mamluks and emerging as a caliphate of their own right. As Venetian ambassador Caterino Zeno claims:
* Shahnameh, prince Zaal falls in love with princess Rudabah and she becomes pregnant. Her father is understandably furious and declares war on Zaal's father. Zaal approaches the emperor and proves his worth to him, so the emperor orders both belligerent to stand down and celebrate the marriage. Zaal and Rudabah have a son named Rostam, who became one of the greatest Iranian heroes.
* Shaidar Haran, a Myrddraal that acts as the Dark One's avatar, and later an incubator of sorts.
* Shaidar Haran, a unique Shadowspawn avatar of the Dark One, touches the high-ranking Darkfriend Alviarin to mark her as under his protection. She finds the experience slightly traumatic, though it leaves no visible sign.
* Shailene Woodley. Both joked about this while accepting their MTV Movie Award for Best Onscreen Kiss in 2015.
* Shailene Woodley to take the role of Peter? By saying he'd get to punch her in the face.
* 's hairstyle, although Komaki has darker hair and much larger breasts. It's implied that Teru also momentarily mistook Awai for someone else when they first met, although Awai's boasting seemed to convince Teru that she wasn't who she was thinking of.
* Shakara advanced armor that is powered by the spiritual energy of the dead Shakara.
* Shakara. After getting too snarky with a much bigger alien, his head is immediately crushed.
* Shakara, but others like the Psicos revel in bullying other species by lording their vast psychic powers over them.
* Shakara: Earth is blown up on the very first page, which then follows battles between various aliens. Plenty of other planets get blown up throughout the comic as well.
* Shakara. He then drops the forcefield of the room-with-a-spaceview that they're in, causing the scientist's head to explode immediately.
* Shakara himself uses a World Engine to transform an entire planet into a giant rocket, using it to blast through an alien fleet.
* Shakara: In the epilogue Eva Procopio is last seen after she got married and had a baby.
* Shakara in time. He uses a World Engine in his possession to turn an entire planet into a spaceship, destroying the entire enemy fleet in one go.
* Shakara of the Shakara Federation is later revealed to be ruling The Hierarchy from behind the scenes.
* Shakara that is used as a killing ground by The Hierarchy, as it fights off every intruder by warping the environment to produce things like lighting strikes and earthquakes.
* Shakara: The boss of an intergalactic slave auction is a giant spinal cord and brain stem in a glass.
* Shakara, their commander orders the creature responsible found. He knows that they're already doomed because the planet is about to explode anyway, he just wants

the consolation of killing him first.
* Shakara: The Overlord is rather amused that the alien tribe he just exterminated had used the Shakaran artifact he was looking for as a place to commit ritual sacrifice in the hopes of warding him off (believing the Overlord to be an angry god), and covered it with a mountain of skulls.
* Shakara: The Psico Hierarchy travel around in living ships shaped like floating brains.
* Shakara to destroy Cinnibar Breneka and the universe returning to a state of relative peace, the last pages show a new yellow-colored Shakara crash-landing on a planet in another reality.
* Shakara to different factions who want to kill each other without having to destroy their own infrastructure.
* Shakara to go out of retirement to destroy Shakara, Valentine lampshades it, noting that he's heard that line a million times before.
* Shakara uses 'frukk' on occasion, in exactly the way it sounds like it should.
* Shakara when the alliance that funded her plunged it back into an age of chaos and tyranny.
* Shakara whose behavior is much like real dinosaurs: the carnivores are happy to eat their opponents, for instance.
* Shaka, were put to death more quickly and less painfully. Only one man was spared because Shaka remembered him being nice to his mother.
* Shaka Zulu, he's still disturbingly cheerful as he talks about his opponent getting betrayed and stabbed and his troops dismembered.
* Shaka Zulu in reference to the sound it made when he plunged it into opposing soldiers. He eventually earned a promotion to a commander by defeating a famous warrior of the Butelezi tribe in a one-on-one duel and then leading the rest of the army to victory and would define his reforms to the Zulu military doctrine later.
* Shaka Zulu in the late 18th-early 19th centuries. His conquest of one tribe would drive the survivors further away from him, towards the territory of another tribe; sometimes they would clash violently, other times the influx of refugees would simply strain the resources of the native tribe. Either way, the result was that the region ahead of him was pre-weakened by the time Shaka actually arrived. The havoc of the events known as the Mfecane continued for some time after the death of Shaka and would not end until the 1840s.
* Shaka Zulu is said to have condemned several people from his birth village to this, as punishment for having abused him and his mother when he was young.
* Shaka Zulu: Shaka, as portrayed by Henry Cele, possesses a very powerful, commanding voice.
* Shaka Zulu, the British Colonial Office is faced with the prospect that the Zulu army sweeping across Southern Africa may continue on to the Cape Colony. Various solutions to defend the Colony are rejected — mercenaries are unreliable, raising troops in Britain will take too long, taking experienced troops from India risks losing that colony as well. Lord Bathurst comes up with the idea of sending just one man, Francis Farewell (though he does have several men with him), to arrange trade talks with the hope of deliberately obfuscating the situation and thus play for time.
* Shaka Zulu. The young Shaka complains that his army sandals impede him on the battlefield, and demonstrates his lack of need for them by grinding out a flaming stick with his foot while sneering contemptuously. When he's put in charge of training an army, he makes them go barefoot too, running them for miles until they have callused soles like he does.
* Shake & Bake had commercials like this as part of a series on this theme.
* shake and bake. However, the presence of the hornets has made it difficult to import more productive European honeybees to East Asia.
* Shakedown: Hawaii. After faking gameplay footage by mashing buttons and unintentional spit take from the employee who performed said footage (a car thief from a showroom), it's revealed that those cameras were marked as "Live Streaming" cameras, and the commercial footage got leaked onto the internet, putting the cola company in hot water, especially since the CEO, one of the playable characters,

invested the entire brand's budget on the commercial.
* Shakedown Shenanigans, and flash-boils after breaking against the hull.
* Shakedown Shenanigans" Eleya accuses Vice Admiral Harnett from Starfleet Science to his face of being the second version after he calls her crazy. She rattles off that he's the author of 32 peer-reviewed papers and a 2392 Nobel Prize for Physics laureate, then asks him if he's ever fired his service weapon outside the range.
* Shakedown Shenanigans's construction (she's primarily a line battleship to replace combat losses) but doesn't play a role in the plot.
* Shakedown Shenanigans, the firepower, range, and speed have been increased, and the ship carries quantum torpedoes instead of photons.
* Shakedown Shenanigans to, not because she's the only ship available (in the Vulcan system, almost as much a crossroads as Sol).
* Shake Hands with the Devil Dallaire's entire team, save the Bangladeshis.
* "Shake It Off" is a horn-driven, Motown-like song with a tongue-in-cheek cheerleader chant in the middle and not a hint of country elements; even "Trouble" had acoustic guitar strumming in the verses. It was even different from much of its parent album,
* Shake It shows off a number of different groups of dancers showing off their moves both singularly and together while the band plays.
* Shake it Up admits that she never wanted any part of the show nor to become a Disney actress, but her parents forced her to audition because they were financially struggling at the time.
* Shake it Up: After Flynn passes out from an energy drink-induced sugar rush, Ty draws a moustache and a goatee on him and also writes "I Love Ty".
* Shake it Up, and apparently he was well received, as he has since sang backup for costar Caroline Sunshine in the music video "Roam".
* Shake it Up, CeCe and Rocky believe that Gunther is moving back to the old country after taking bad advise on the girls' newest webshow when they overhear him telling Tinka that he bought a plane ticket and Tinka was very sad about it. It turns out they misunderstood the conversation because the plane ticket is really to visit a sequence convention across town and Gunther and Tinka's cousin is actually the one who moved back to the old country.
* Shake it Up, CeCe gets a job in the mall as Santa's Helper after wasting the money for her mother's Christmas present.
* Shake it Up, despite the latter being billed as a recurring character.
* Shake it Up: Deuce Martinez is a main character and good friend of the protagonists who can sell anything to anybody.
* Shake it Up episode "Sweat It Up", Georgea goes on a date with CeCe's gym teacher, Coach Lessor. CeCe is disgusted by this at first, but then sees it as a saving grace when Lessor considers letting CeCe off the hook for faking an injury earlier in the episode. It ends up backfiring, however, when the date goes very badly making Lessor even harsher on CeCe than before.
* Shake it Up: Eventually subverted. Rocky and Ty Blue seem to be ambiguously brown for the entire first season (both of their actors are mixed race), until their mother is revealed to be black and their father is revealed to be mixed.
* Shake it Up: Flynn says this to Deuce when the latter growls in his face while in their zombie costumes.
* Shake it Up, Georgia and Jeremy realize they aren't ready to get married and break off their engagement at the altar.
* Shake it Up has a random dress code change, which makes some people angry, especially CeCe, who rebels by wearing bright accessories, which lands her detention.
* Shake it Up has the episode "Opposites Attract It Up" where Rocky and Ty play Cyrano for CeCe and her nerdy boyfriend James respectively, with Rocky coaching CeCe on how to be smart and Ty coaching James on how to be cool.
* Shake it Up: In Brain It Up, Rocky has a dance-off with CeCe. Even though it is a dream sequence, it is still awesome to see all the dance moves that are shown in the dance-off. The coach appears in the dream sequence before the winner gets decided though.

* Shake it Up: In the episode "Oui Oui it Up," Rocky and Cece get in an argument on a farm and they both fall into a giant pit of liquid pig poop
* Shake it Up is particularly adamant that everyone likes her, and spends an entire episode trying to win the favor of the cantankerous old witch Mrs. Locassio.
* Shake it Up live in the same apartment building. As such, Rocky usually enters via the fire escape.
* Shake it Up named Savannah who is conning him for the money he is gathering during the Cash Tornado tournament and Rocky dresses up Ty as a famous billionaire to expose her true colors. When Deuce sees Savannah flirting with Ty, he gets jealous to the point where he rips the tornado ball out of place rolling whilst still inside it like a hamster wheel trying to run Ty over.
* Shake it Up on his blog. They invite him and his girlfriend to Krusty's Pizza and perform a flash mob. The reviewer's girlfriend finds in her pizza the ring Deuce meant to give to Dina on their anniversary and excitedly says yes.
* Shake it Up show elements of this, especially in the episodes "Model It Up" and "Break It Up".
* Shake it Up stuck dancing on the wing of an airborne plane. In a later episode, Rocky expresses to Cece that she is not happy about it.
* Shake it Up, the girls open bank accounts in order to manage their income from as dancers on Shake It Up Chicago. Now wielding debit cards, they find it surprisingly easy to lose track of how much they've been spending, and find themselves holding a check they can't pay at an expensive Italian restaurant.
* Shake it Up When asked for a translation, Gunther remarks that he doesn't feel comfortable repeating what she said in mixed company.
* Shake it Up when she joins his karate class, even taking the time to apologize to Rocky while switching hands to keep holding him back. Made even funnier when she lets go and Henry keeps running until he falls over Flynn.
* Shake It Up! which featured Miley and Lilly. The finale was loaded with it, so much if one watched that episode alone, and missed the scene where their boyfriends show up, they might think were in a relationship
* shake Nobby until he gives it back., when Moist von Lipwig learns that the City Watch also serve as bank security, he reflects that the money might be safe, but the coffee and pens almost certainly aren't.
* Shaken or stirred?" and Bond replies "Do I look like I give a damn?"
* Shaken-Unfairly by the tribe soothsayer, who ends up giving us the page quote.
* Shake Rattle And Roll 13, a Philippine equivalent to the Fair Folk. They appear as pale humanoids with long, white hair, and dress like tribal warriors.
* shaker. This, of course, beans "Sea Bass", a very large and angry gentleman.
* shakes off Discord's influence when she's reminded of how much her friendship with the other five means to her, bringing them back to normal.
* Shake Someone, Objects Fall: A comedic trope in which simply shaking someone causes everything they have on them to come falling out.
* Shakespearan range from "historically accurate portrayal of spousal cruelty with Petruchio as heartless abuser and Kate as brainwashed victim" to "unconventional comedic love story with Kate as pre-feminist spitfire and Petruchio as her intellectual equal." No one seems to agree on what exactly the main couple's relationship entails.
* Shakespeare adaptations often make the cast younger than they are in the original play:
* Shakespeare all have fathers (Polonius, Lear, and Shylock respectively), but no mention is ever made of their mothers.
* Shakespeare & Hathaway - Private Investigators, although so far the evidence for his sexual orientation is only second-hand.
* Shakespeare & Hathaway - Private Investigators as background to a case. She starts showing Frank relevant episodes and explaining the plot. He is initially dismissive but quickly gets hooked.
* Shakespeare & Hathaway - Private Investigators hacker Frank sometimes employs) is shown waking up next to the high-class girl he had been trying to pull at the ball the previous night. However, the true reveal occurs when the girls ex-

boyfriend rises from the other side of Spider; equally naked and looking thoroughly confused as to what is going on.
* Shakespeare & Hathaway - Private Investigators: In "Ill Met by Moonlight", the hostess of a fancy charity ball has her drink spiked. This causes the alcohol to have a much greater effect than it normally would have and makes her roaringly drunk on a single glass of champagne, with the criminals using her drunken antics as a distraction.
* Shakespeare & Hathaway - Private Investigators: In "O Brave New World", Luella Shakespeare is framed for the murder of her new husband. She teams up with private investigator Frank Hathaway to clear her name and ends up becoming his new partner.
* Shakespeare & Hathaway - Private Investigators: In "O Brave New World", when the hotel staff are being interviewed after the murder, one of the waitresses complains that a pair of shoes have been stolen from her locker. Guess what later becomes the vital clue Frank uses to crack the case?
* Shakespeare & Hathaway - Private Investigators: In "The Chameleon's Dish", Frank and Lou go to silent retreat to keep their surveillance on their client for a weekend, only to find their client has booked them in as newlyweds.
* Shakespeare & Hathaway - Private Investigators in "The Chameleon's Dish" is a school counselor who was having an affair with one of her students.
* Shakespeare & Hathaway - Private Investigators: In "The Fairest Show Means Most Deceit", the team discover that one of their suspects has been visiting a transvestite bar. Sebastian goes in undercover to gain the man's confidence. Averts most of the trope, as the bar is just an ordinary pub whose clientele happens to be men dressed as women.
* Shakespeare & Hathaway - Private Investigators: In "The Rascal Cook", the killer flees from Frank and Lou by jumping into a swan pedal boat and pedaling out on to the Avon River. Frank and Lou commandeer another pedal boat and pursue.
* Shakespeare & Hathaway - Private Investigators, in which the two words are homophones.
* Shakespeare & Hathaway - Private Investigators, Sebastian is a RADA-trained actor who is working as Frank's receptionist and secretary while keeping his acting dreams alive by appearing as a spear-carrier in plays and doing bit parts in commercials.
* Shakespeare And Smythe and a friend solving mysteries which bear strong parallels to Shakespeare's.
* Shakespearean geography and history is often all over the place. For example the only way his "seacoast of Bohemia" is anything other than
* Shakespearean, his greatest villainess. The roguish buffoon Falstaff was so popular that Shakespeare gave him his own spin-off comedy in which he is the protagonist. (By royal command, no less - Queen Elizabeth turned out to be one of Falstaff's admirers.)
* Shakespeare", Hawkeye mutters, "I can't stand a guy who butchers Shakespeare."
* Shakespeare himself applies as an exception. Literary scholars love his whole work: comedies, tragedies, histories, romances... everything. And everything has been on stage ever since he wrote it.
* Shakespeare includes this trope fairly often, which isn't that surprising as he lived during a time when child mortality was fairly common:
* Shakespeare in Love and Viola (playing Juliet) is accused of being a woman. The Queen takes the stage to look at Viola, who goes for a curtsy, but the Queen flicks her eyes wordlessly and Viola bows (as a man would) instead.
* Shakespeare in Love, but everything resolves itself for a stunning success.
* Shakespeare in Love greeted this way (the applause is picked up quicker than in most examples, but it audibly starts with a single, hesitant person).
* Shakespeare in Love: Shakespeare's been suffering from impotence in conjunction with his writer's block. After he meets Viola, both end.
* Shakespeare in Love shows our actor friends a-whoring and a-wasting in houses of ill repute.
* Shakespeare in Love subverts this trope by way of Sonnet 130 (see in Literature,

below) when Shakespeare tells Thomas Kent (actually Shakespeare's love Viola in disguise) about how the woman he loves has eyes like the sun, lips red as coral, a voice like music, etc. "Thomas" responds that he'd hate to be Shakespeare's lady because no real woman could actually live up to that.
* Shakespeare in Love variations on his romantic comedies in recent years:
* Shakespeare in Love where Will is trying to work out how the story will end.
* "Shakespeare in the original German" goes back at least to 1941 when it was used in Leslie Howard's
* Shakespeare, in which the heroine's twin brother, unlike in life, turns out to be alive after all.
* Shakespeare is made howlingly funnier for most viewers without a special affinity to archaic language in the Reduced Shakespeare Company's
* Shakespeare! It helps that contemporary English pronunciation was closer to current day American pronunciation.
* Shakespeare, it's no surprise that one of Ahab's crew members makes a similar prophecy concerning Ahab's death.
* Shakespeare loved this trope — it's a rare protagonist who doesn't freeze everyone else in place so they can talk to the audience. The talks range from quick asides to full on soliloquies. Special mention should be given to the prologue to
* Shakespeare of the characters in any of these plays live happily ever after. Oh Monzaemon, you really know how to work a crowd.
* Shakespeare of this trope. Although whether it's done well or poorly depends on who you ask, which play you're talking about, or both.
* Shakespeare. Or maybe — just maybe — he's an intolerant redneck who has a problem working under a black man and a teetotaller, and suspects both of nailing his wife, like he says in the play. Or, he's in love with Othello.
* Shakespeare, Petruchio finds Katherine's shrewishness, wit, and stubbornness not only impressively equal to his own but a sporting challenge to overcome.
* Shakespeare played a version of the trope more for laughs in the lead male characters of
* Shakespeare Re-told take Claude back after he humiliates her in front of her friends and family.
* Shakespeare Re Told, the prophecy is that Macbeth will be killed "when pigs fly". Cue a visit, near the end, from the Police Helicopter Squad.
* Shakespeare's 20th Sonnet lovingly describes the many wonderful attributes the object of his affection — before revealing that the person in question is a young man. A young man who is perfection incarnate, except for his penis.
* Shakespeare's also occurs, as the script repeatedly comments on magic being the solution to inconsistencies in the plot.
* Shakespeare's. But it certainly shows up in villainous contexts as well.
* Shakespeare's comedies frequently have characters who end up this way when the characters pair off at the end, sometimes because they're failed suitors to one of the paired-off characters, and other times it's hard to escape the conclusion that they're in love with a character of their own gender. Examples include Antonio in
* Shakespeare's. First telling the crowd "I come to bury Caesar, not to praise him", he then proceeds to praise Caesar and turn his audience into an angry mob.
* Shakespeare's got several of these. They're sometimes classed as "the problem plays," because it's hard to figure out what to do with them.
* Shakespeare's most poignant use of this trope may have occurred in
* Shakespeare speaks in an archaic way, including using the outdated first-person pronoun "wagahai" to refer to himself in the Japanese version. In the English version, it dips into
* Shakespeare - "spear-shaker". There also was Nicholas Breakspear, later Pope Adrian IV.
* Shakespeare's plays by his "clown" characters (played by comic actors who were presumably able to do multiple voices):
* Shakespeare's Scribe, though as to be expected with such an old reference, Widge has to explain to the reader what it is.
* Shakespeare's. Soon, the Roman populace is whipped into a frenzy of love for

Caesar; the conspirators are next kicked out of Rome, which eventually leads to a civil war that ends in their defeat. This is all a subtle scheme on Mark Antony's part to seize power for himself and his own allies; by making it seem like he's simply following the crowd's will, he's able to endear himself to them and gain their unwavering support.
* Shakespeare's Spy, Widge's voice starts to crack due to puberty. He notes that he's entering puberty pretty late, due to poor feeding in his previous homes contrasted by the better treatment of the troupe. He's rather unhappy to find it means he won't be able to play girls onstage anymore, as they were the parts he'd been accustomed to.
* Shakespeare's, the courtier Oswald arrives at an inn to find the ostler (who runs the stables) strangely rude and uncooperative. (The ostler is his enemy, the Earl of Kent, in disguise.) Oswald makes the mistake of getting drawn in, and is subjected to a hailstorm of Shakespearean cruelty:
* Shakespeare, suddenly repenting everything and restoring the Duke to his throne.
* Shakespeare's will portray the titular character as one of these—despite his ruthlessness and willingness to kill everyone who might keep him from the throne, Richard is really just an emotionally stunted man who is jealous of his more popular brothers and wants to play with their toy (the "toy" being the throne of England).
* Shakespeare unless it's in the original Klingon. Shakespeare Was A Klingon Spy?
* Shakespeare Unwrapped color codes the sisters. Goneril, the oldest and most power-hungry, wears a purple sash around her dress.
* Shakespeare was fond of this one. Envy is the primary motivation driving many of his characters, including Claudio in
* Shakespeare was in love with this trope. It seems like half his tragedies involve somebody getting poisoned with "the deadliest poison known to man".
* Shakespeare was using a traditional Christian theatre character called a Vice, who was always scheming and bragging to the audience. (Obviously it was a coveted role.)
* Shakespeare Without the Boring Bits from the point of view of Macbeth in this manner. "Call me Mac."
* Shakespeare, young tearaway Prince Hal and Falstaff take turns playing the role of Hal's father, the titular king, asking him to account for his dissolute ways. It begins comically, but takes a bitter turn...
* Shakes the Clown begins with the title clown passed out drunk in the bathroom, woken up when a kid pees in his face (but he was aiming for the toilet.)
* Shakes the Clown in this movie) before realizing who it is - and even then, they remain disgusted, with one of them remarking that he suddenly understands "all those times he would just sit there saying nothing." But Shakes finally manages to persuade his friends that he's still a clown.
* Shakes the Clown, Shakes is forced to perform at children's birthday parties (which he hates) because he doesn't have a TV show.
* Shaking a Rattle of Youth normally reduces the user's age by 10 years. However, each use has a 10% chance of instantly doubling the user's age, which could possibly cause the user's death from old age.
* Shaking Her Hair Loose: A woman dramatically removes a hair-tie, -stick, or -clip
* Shaking Her Hair Loose: Showing the long hair after being hidden in a conservative style.
* Shaking the Rump' infamous performance at the 2013 VMAs helped turn "twerk" into a household word.
* Shaking the Rump: Quite common in many hip hop music videos at that time.
* Shakira, being a trained belly-dancer, does this in the "Hips Don't Lie" music video to show off her amazingly toned abs.
* Shakira collaboration "Beautiful Liar" which is only remembered today by their fanbases.
* Shakira in 2001, where she sported her blonde hair, which she has nowadays.
* Shakira is not a one-hit wonder, but some of her collaborators have been:
* Shakira's "Don't Bother", she sends her boyfriend's Ford Mustang to the crusher.

* Shakira's "Objection (Tango)", there is a sequence where Shakira is in the car looking for her wayward lover. Her eyes are illuminated by the reflection from her rear-view mirror.
* Shakira went unnoticed in public for a couple of months by wearing modest clothing, going by her middle name and wearing a baseball cap.
* Shakira, whose father was Lebanese-Colombian and whose name is Arabic.
* Shakkanakhu = satrap. provincial governor, etc. Generally translated count in Third Imperium
* Shakma are playing a puzzle-oriented LARP before the eponymous killer baboon makes itself known.
* Shakugan no Shana, actually has three eyes, but her normal right eye is covered by an eyepatch. This only makes her look even more badass.
* Shakugan no Shana aims a gun at Shana's head. Before he can pull the trigger, Shana throws a shard of glass that severs his fingers and makes him drop the gun.
* Shakugan no Shana and pure. When the villains captured Yuji and had Hecate drain his power, Sydonay protested because she started moaning in pleasure. Later, when Hecate and his leader Snake of the Festival (in Yuji's body) were gone for a while, Bel Peol had to assure him that they weren't having sex behind his back.
* Shakugan no Shana, and sometimes trademark spells and Treasure Tools.
* Shakugan no Shana and turns into a Flame Haze, they do not look any older. Khamsin is a Flame Haze that looked like a child for over 3000 years.
* Shakugan no Shana: Eita Tanaka eventually chooses normal life over supporting the Flame Haze after he very nearly loses the girl he loves due to the fighting. He even returns the seal that prevents him from being frozen when someone casts a seal. Most ultimately support his decision, though close friend Keisaku argues with him over it briefly.
* Shakugan no Shana episode 9 ("The Poolside of Love and Desire") is a breather after the defeat of the first major villain and the fierce fight between Shana and Margery Daw.
* Shakugan no Shana fall under this trope. Shana's hair is nearly as long as her body.
* Shakugan no Shana fame is shown as being hypercompetent at both, which is in part justified by her being a superhuman.
* Shakugan no Shana Final that appeared out of nowhere. Many of these characters should have appeared or at least been mentioned in seasons 1 and 2, but the short stories they debuted in were never adapted to the anime.
* Shakugan no Shana happens on the roof of an abandoned department store.
* Shakugan no Shana has matching red hair and eyes in her Flame Haze form.
* Shakugan no Shana has something of an affinity for birds, getting easily distracted by them, and they tend to love her back.
* Shakugan no Shana has this in Yuji. As a Torch, he's technically already dead, and, under ordinary circumstances, would inevitably be doomed to burn out and fade from existence. However, he's also a Mystes, and happens to have the artifact Reiji Maigo sealed within him, which replenishes his power of existence every midnight. As such, as long as he doesn't use up all of his existence in a day, he can lend his power to Shana, and, later, cast his own unrestricted spells, using his very existence.
* Shakugan no Shana has Yuuji in this scenario with Shana (magical) and Kazumi (normal).
* Shakugan no Shana: Hayato Ike often helps Kazumi Yoshida to hook up and show her affection toward Yuji. When he chastises Yuji for leading her on, Yuji confronts Ike about his own feelings for her. It took him until the second season for Hayato to realize it and tries to do anything for himself, for the sake of his feeling toward Kazumi.
* Shakugan no Shana. He even gets a new hairdo aside from a black armor.
* Shakugan no Shana, he is more concerned of people he will leave behind and relieved no one will be sad because they will forget about him. Shana, Alastor, and Lammie compliment him for staying sane from the revelation.
* Shakugan no Shana. His physical humanoid form is only a small part of his actual

body, so he's able to recover and regenerate from any attack.
* Shakugan no Shana: "I am a Flame Haze, one who swore and chose to protect the balance of the world!"
* Shakugan no Shana, meaning that, even if his real self is dead, his Torch still carries on.
* Shakugan no Shana out or just being there in that unfortunate moment, in which Shana realized her exposed body and proceeds to beat him up for looking at the wrong direction. Rather than accidental, they just realize it after the battle is over.
* Shakugan no Shana Pheles to their location. The effort makes Yoshida woozy and she falls over, but Pheles catches her and holds her like this.
* Shakugan no Shana, ranting that it is not the kind of kissing Chigusa taught her about.
* Shakugan no Shana, saying it is worthless to him now. This bites him in the ass when Shana picks up Blutsauger and continues the fight.
* Shakugan no Shana's declaration of love at the climax of the first season.
* Shakugan no Shana several times. For the second season, they usually reflected the events or characters of that episode. The ''Shana-tan' DVD specials had eyecatches between each short skit.
* Shakugan no Shana: Shana doesn't just strip in front of Yuji. This is significant because as a Torch, Yuji would be considered a mere "thing" and not a person.
* Shakugan no Shana: Shana's katana and Yuji's flame ring have limited power-canceling abilities; the former is also indestructible, and the latter only cancels fire/heat.
* Shakugan no Shana, Shana wins a costume contest and is told to give a speech. She attempts to use this to declare her love for Yuji, but Pheles suddenly attacks the event with a tornado.
* Shakugan no Shana spelled Wilhelmina, an actual Dutch name with historical significance, as Wirhelmina.
* Shakugan no Shana's second season finale takes place during Christmas Eve.
* Shakugan no Shana: Subverted with Margery Daw and Marcosius. Margery regularly abuses Marcosius, who has the form of a book.
* Shakugan no Shana the barrier, but it certainly makes a good imitation.
* Shakugan no Shana. The battle in Misaki City that takes place not long afterwards definitely qualifies as well.
* Shakugan no Shana, the Crimson Denizen Annaberg expresses his amazement at human ingenuity and inventions. Unfortunately, he likes to destroy things to force the humans to rebuild them bigger and better. He marvels at the construction of the Empire State Building, then tries to blow it up before he is stopped by Margery and Yuri.
* Shakugan no Shana travel all over the world to hunt evil demons. However, it is not unusual for them to settle temporarily in larger cities.
* Shakugan no Shana was also named after one of these; in fact her spells use rather obscure and creepy ones as incantations.
* Shakugan no Shana, when Domino's transformation takes so long that by the time she is finished, Shana and Margery have escaped.
* Shakugan no Shana which has a backstory for the characters in the backstory. To elaborate, Shana's remembering her past and three other characters are remembering their collective past in the backstory.
* Shakugan no Shana, who grows flame wings during her second fight with Margery Daw.
* Shakugan no Shana, who helps Yuji discover that he bears the spiritual treasure Reiji Maigo.
* Shakugan no Shana, Yoshida's sandals break. She discards them and keeps running.
* shakuhashi uses her flute both as a close combat weapon and an improvised boat paddle.
* Shakushi clearly see their surroundings while moving at insane speed.
* Shaky P.O.V. Cam - Using the camera to represent the POV of some fast moving object or creature

* Shalikashvili was ethnically Georgian—i.e., from a country part of the Soviet Union at the time of his birth (his parents were nobility exiled from the country by
* Shalise, the holographic projection of the police clone training ship. She tells the clones that she's been "endowed with a feminine personality" while she caresses her considerable bust.
* Shalise, the sinister female personality of the police clone training ship in
* Shallan Davar is a scholar and thus isn't exactly prepared for physically fighting the coming
* Shallan has this reaction to the chasmfiends, house-sized crustaceans that
* Shallan successfully uses a boy's or a man's disguise several times in order to gather information or pass unnoticed through war camps. Nobody ever notices, but then she is a mistress of illusion.
* Shall I Repeat That?: When, at the end of a long set of text or dialogue tree, the person with whom you are speaking asks to start the entire conversation over.
* Shallow Grave Alex, Juliet, and David do this to decide which one of them will be responsible for dismembering Hugo's body.
* Shallow Grave there is a perfectly normal laughing doll. It still manages to get a creepy scene.
* Shallow Grave, where three roommates interview potential lodgers. The interviewees are regular people, while the roommates take the opportunity to grill them with sadistic and bizarre questions.
* Shallow Hal) and sees women as attractive based on their "inner beauty". As a result, the disability part is hidden (particularly in the case of disfigurements) and the "hottie" part an illusion.
* Shallow Hal begins with the death of Hal's father while deliriously preaching about titties.
* Shallow Hal brags that he is "bigger", Hal takes about 8 seconds to respond "Yeah, bigger than a mouse's". Jason calls him out on taking too long; that's why it's called a "quip", not a "slowp".
* Shallow Hal child burn victims in the hospital ward. It also holds true for the outwardly-hot woman his friend is dating, who appears as a not-traditionally-attractive old crone to Hal, because that's what she looks like inside. When the POV switches to another character, we see the "ugly" outward appearances through their eyes.
* Shallow Hal, Hal tries this with Rosemary, but she's too heavy for him. She carries him instead.
* Shallow Hal Hal typically goes after beautiful but vacuous women but after he's hypnotized into perceiving women based on their inner beauty instead of their outer appearance, he falls for a kind but morbidly obese woman since he sees her as slim and beautiful.
* Shallow Hal is hypnotized to see a person's inner self. This means that every woman worth hitting on also looks like a supermodel.
* Shallow Hal. It's not the fantasy mismatch of the truly ordinary-in-every-way guy with the beautiful woman.
* Shallow Hal, Mauricio sees Hal dancing with three unattractive women in a dance bar and decides to "rescue" him:
* Shallow Hal of a best friend is shown to be less attractive than him.
* Shallow Hal parodied this, having the overweight girl drink the entire milkshake in about two seconds.
* Shallow Hal: Played with. Hal does accept an invitation to dinner with former flame Jill (with her romantic intentions fully visible) while he and Rosemary are estranged, but still together. But when Jill turns up the gas and propositions Hal, he (after some consideration) refuses, finally realizing that he really wants to be with his "Rosie", regardless of her looks. But this realization comes to late, as Rosemary sees the two holding hands...
* Shallow Hal: Rosemary cuts off a "sliver" of a cake that's about as big as the whole cake, and walks off munching on it like a Pringles chip.
* Shallow Hal was dubbed in Czech twice. The first dub was made in 2002. The second

dub was made by Studio Audiotech for TV Nova in 2006.
* Shallow Hal when one of the characters brags about the size of his anatomy. Hal takes about ten seconds to come up with the weak retort "yeah, bigger than a mouse's".
* Shallow News Site Satire: Said news sites came into vogue in the 2010s.
* Shallow Parody: A parody, often a mean-spirited one, that isn't really an accurate portrayal of the work being spoofed.
* Shallow Parody of this other project/production that we only have a partial and generic knowledge of!
* Shallow Parody: Setzer and Friedberg had their parody films in their heyday at this time, and even then the criticisms of their shallowness was around.
* Shallow Parody, where a work is spoofed for qualities that it doesn't actually have or are grossly inflated.
* Shalltear (a vampire) was programmed as a necrophile who happens to think
* Shalltear has a mouth like this with a single row of sharp fangs and a long protruding tongue. One bandit even calls her a lamprey.
* Shalltear when hit by fire and pretending to be damaged by holy (and used a skill that makes it look like the holy attacks did more damage).
* Shall We Dance?, a ballet dancer. He does this by sneaking into Peter's hotel suite with a wax dummy of Linda (made for one of her stage shows), photographing a scene that appears to be Linda in a nightgown hovering over her sleeping husband, and then sending the photographs to the newspapers.
* Shall We Dance? bored with his life and having a mid-life crisis, he isn't cheating on her, he's taking dance lessons. However, the wife is still concerned about the possibility of him having an affair with one of the dance instructors.
* Shall We Dance? greatly increased both the popularity and respectability of ballroom dancing in Japan. As the movie shows, it was a furtive practice prior to the movie, as it was regarded as disreputable.
* Shall We Dance? Jim. Eventually, the only way out Linda can see is to ask Peter to marry her just so they can then have a public divorce and quell the rumors once and for all.
* Shall We Dance, the 2004 American remake of the 1996 Japanese movie. Neither is related to the 1937 movie musical of the same title.
* Shall We Date?: Angel or Devil, four of the love interests are demons and soul reapers.
* Shall We Date?: Blood In Roses have this happen to them when they're about to drink a person's blood. If the vampire has made someone their belonging, their eyes will also turn red when they command the belonging to do something.
* Shall We Date? female protagonist and more diverse and interesting cast of guys.
* Shall We Date? franchise has a lot of these in all of their games. It makes sense; they make otome and other female-oriented games.
* Shall We Date?: My Fairy Tales feature this. However, for the best results, make sure you get the Sweet Ending.
* Shall We Date?: Ninja Assassin's family in Edo (the old Tokyo) and her swearing revenge. She hears of a vigilante group that can carry revenges and looks for them, and after witnessing one of their assassinations, they accept her request and take her in.
* Shall We Date?: Ninja Shadow and falls for Saori because he's impressed by her pluck) and Hijikata, who perfectly defines his type in the following words:
* Shall We Date?: Ninja Shadow Both brothers have their separate routes.
* Shall We Date?: Ninja Shadow group. Her potential love interests tend to find out early or midway through their respective routes and keep her secret.
* Shall We Date?: Ninja Shadow), her skill at the kitchen is near unrivaled.
* Shall We Date?: Ninja Shadow, Shintaro tends to be this. Twofold, even!:
* Shall We Date?: Ninja Shadow: that way, charas that are seen in the background of each path at first gain their own romance routes. The strategy includes four "release series", each one featuring three prospect boyfriends (or five, in the last batch) whose quests are released gradually as months pass:
* Shall We Date?: Ninja Shadow they believe she's a girly-looking young man.

* Shall We Date?: Ninja Shadow through the paths. Pretty much all the guys she can romance are excellent fighters, so towards the end of each path she and her beau will be this to one or another degree.
* Shall We Date?: Ninja Shadow) was specifically formed to deal with such horrible things.
* Shall We Date?: Ninja Shadow (who, like Nobuyoshi, has no set release at the moment)
* Shall We Date?: Obey Me!. A lot of people play both games, and a lot of players of just one are friendly with someone who plays the other or both.
* Shall We Date?: Obey Me! are angels and demons who are thousands of years old.
* Shall We Date?: Obey Me! are demons, who are at least a few centuries older than you, the human protagonist.
* Shall We Date?: Obey Me!, Mammon is constantly picked on and belittled by his brothers for being a greedy and "scummy" demon. In one of his side stories, he runs away after they assume he was trying to steal Beelzebub's wallet. When he doesn't return after a few days, his brothers become concerned and a couple promise to go looking for him. When they find out that he has returned, they and he are glad to see each other.
* Shall We Date?: Obey Me! whether a blood tie would stop him is up for debate.
* Shall We Date? players play all the games in the franchise, but some don't. Even those that don't are usually very friendly with those who play different games in the franchise.
* Shall We Date? series features this for the heroine. The amount of guys that pursue her will vary from each route and each novel.
* Shall We Date? series is this. You can pay for coins (the premium game currency), which can get you premium items that allow you to access extra stories and/or CGs or allow you to go through the main story without waiting. Coins can also be earned for free, but it's very tedious, and you'll eventually just run out of free offers.
* Shall We Date, which functions similarly in terms of progression. However, rather than free offers being limited, it separates currencies into "diamonds" and "coins", with the former being much slower to earn freely and used to access more features.
* Shall We Date?: Wizardess Heart to be the antagonist of Elias and Yukiya's routes in the "Tower of Sorrow" arc, or why Klaus speaks so derisively of legendary magical beast tamer Serge Durandal in his own route in the "Spring of Unicorns" arc — by playing through all three routes of the arc.
* Shalnark. He sees the people he manipulates as toys and expresses childlike disappointment when they get killed.
* Shamal is in the same position as Yuuno, only she does have a powerful Device backing her up. She debatably has the most impressive record in the series at standoff combat, nearly paralyzing Nanoha from at least a half-mile away, and in every battle she's had a part in her opponents did not know she was there until attacked. Her skills with barrier, portal, and teleportation magic have endless tactical application that the series never explores, from making people run into instant magical walls at several times the speed of sound to portaling them off somewhere unpleasant. Yuuno would be capable of the same tricks if he had a copy of her Device.
* Shamal when she was spying on the heroines. She was immediately recognized by the first person who knew her.
* Shaman Blues after a ghost-banishment he describes in detail during his shower.
* Shaman Blues animator who tries to invoke this - she creates golem after golem, hoping that one of them will prove to be her perfect love.
* Shaman Blues are full of ley lines, which can be tapped for free magic power and provide "highways" for ghosts to move along without wasting precious energy. They can also, unfortunately, be poisoned by large amounts of black magic in the area, influencing magical creatures around them.
* Shaman Blues are sacrifices, which eventually escalate into human ones. The villain is suspected of having performed those, as the heroes find twelve skeletons in her basement.

* Shaman Blues, as noted by everyone who rides in it with him. Among others, it lacks a hand brake, two windows, the inside light, seat covers (Witkacy uses blankets), and a working ventillation system, and it's considered too dangerous for any company to insure it. He defends it vehemently, though, and appears to be right, as it never fails (though sometimes takes several times to start up).
* Shaman Blues, at the end of the first part of the story Konstancja sends a girl to Witkacy's house. Incredulous, he's quick to figure out the kid is his teenage daughter, and the tyke herself quickly confirms it.
* Shaman Blues, blood is the carrier of magic, so sacrifices are made to obtain the power hidden within it.
* Shaman Blues, cemetaries are usually an inversion, as oft rituals spoken on them make them anathema to most ghosts. However, Katia and Witkacy do visit one that neatly fits the bill, complete with being a source of weird magic energy and having power-mad ghosts invading it slowly.
* Shaman Blues. Despite years having passed since Konstancja and Witkacy had their falling-out, he's still angry at her, and she still doesn't feel comfortable coming to him for help. He even points out that she shouldn't expect this trope to occur, seeing how she pretty much abandoned him.
* Shaman Blues dies just a few hours after the wraith that kept him alive is sent away. Justified, as he's under constant medical care even when it's still around.
* Shaman Blues few people with abilities that let them deal with often-malicious ghosts, the Council that hires him seems to think that he doesn't need to be paid and the satisfaction from being a hero is enough for him to live on.
* Shaman Blues: Gardiasz has recently started to act like this towards his "agents" (magicals dealing with afterlife), keeping close tabs on them and constantly telling Witkacy not to do anything high-profile.
* Shaman Blues, ghosts who have amassed enough emotional energy can influence the physical world in this fashion.
* Shaman Blues", ghosts with formidable power, but next to no intelligence. The wraiths are sort of "next to" the entire system, due to their predatory nature.
* Shaman Blues is a necromancer—though the formal name is "death warden"—although rather than raise the dead, she spends most of her working hours putting them back in their graves.
* Shaman Blues, Konstancja is forced to go to her ex, Witkacy, for help, so they end up cooperating. Witkacy is not very happy about it.
* Shaman Blues — in an old case, a man suspected for multiple child murder was lynched by a mob of victims' parents. He was innocent, and only became suspected because he was a foreigner.
* Shaman Blues, people sensitive to supernatural, such as Konstancja or Witkacy, can feel ghost's presence as sudden drop in temperature.
* Shaman Blues, the gutted ghosts first show that they are a formidable threat when they come too close to Witkacy's car, shattering the windows with their mere presence.
* Shaman Blues, the murderer strangles children, because it'll give them immortality, either as human or as a wraith.
* Shaman Blues: The Old Ones have a giant cat that loves to toy with Witkacy's soul before playing with it as if it was its chew toy.
* Shaman Blues, the spirits following Gardiasz seem to have this status. They never speak, Witkacy has no idea who they are and why they're following the lord of the afterlife, and the one time he asked, his relations with Gardiasz soured permanently.
* Shaman Blues: The villain has all the walls in her house painted black, and no windows to shine light into. And that's not to mention all this dried blood from the sacrifices.
* Shaman Blues, the wraith's mother clearly favored her older son, eventually putting the Curse of Cain — which makes all bad befall the then-would-be wraith and all good fall to the boy — on the two of them. The wraith's mocking way of telling the story suggests that this was just the cherry on top of other signs pointing at whom mother loved more.

* Shaman Blues, to provide protection and weaken supernatural forces or outright keep them out.
* Shaman Blues - when Konstancja asks Witkacy why he hadn't cut her out of their picture together, he answers that if he'd done so, he couldn't've found a frame that the picture would fit to.
* Shaman Blues, when Konstancja knock on Witkacy's door, he's just finishing taking a shower, so he opens the door with only a towel to protect his modesty. She notices the fact.
* Shaman Blues, when the Old Ones see Vulture basically blow the afterlife's door wide open to rescue Witkacy, they wisely decide to give up on attempting to claim their "prize" and retreat.
* Shaman Blues, while never mentioned in entirety, is about victims of a brutal series of child murders.
* Shaman Blues with Konstancja, whose looks and behaviour quickly make Witkacy start to call her this way in his head. She's beautiful, with black hair and long legs, she's his ex and is troubled by a matter she can't take to the police.
* Shaman Blues, Witkacy crushes the glass he's holding in his hands when Vulture starts making unseemly suggestions towards romancing fifteen-years-old Wiktoria.
* Shaman Blues, Witkacy's house slowly turns into this when Vulture starts to live in it. It takes only two days for the living room to turn into a total mess.
* Shaman Blues, Witkacy spots that something doesn't quite match in Tadeusz Dzwon's story by the man's brief terror at the very mention of his sister, putting the detective on fast track to figuring out the murderer.
* Shaman Blues, wraiths have focus objects which they're bound to and which they must follow, although they have quite a leeway in how far they can stray from them.
* Sham and Buchi, after witnessing the fantastic Curb-Stomp Battle that decimates their crew in seconds, promptly throw themselves at Zoro’s feet and surrender.
* Shaman. Despite the chart peaks, "Love" isn't nearly as remembered as "Why", and doesn't get nearly the same amount of recurrent airplay.
* Shamanic Princess are sort-of Battle Butlers to the summoners Lena and Tiara, respectively.
* Shamanic Princess can actually generate their own tall, thin objects to stand on whenever required. It's a handy backup for situations when a nice moon-silhouetted church steeple isn't available.
* Shamanic Princess, Graham remains viciously protective of Tiara, but now, Tiara would be just as fierce in protecting him as well. When Graham got attacked by a Ryami, and advanced Mihan demon, an enraged Tiara switched to her demon form and struck at the Ryami without warning, and then she killed it.
* Shamanic Princess, has several cryptic conversations with her missing best friend Sara in her dreams.
* Shamanic Princess making the transition to rooftop combat irresistibly easy.
* Shamanism and ancestor worship is practiced by the Hyrkanians, much like the Central Asian Mongolic tribes.
* Shaman King’s 2021 anime seems to follow this line of adaptation compared to the 2001 anime thus far. The first 8 chapters are compressed into 2 episodes as opposed to 4 like the original anime, leaving out or speeding through many details. As a whole it seems to be going this route with 52 episodes as opposed to the originals 64. Keep in mind, the original anime DID heavily deter from the manga not long into its run though so how the new anime handles the source from here on out has yet to be seen.
* Shaman King also does mention about all prophets/chosen people in different cultures as being Shaman Kings from previous tournaments, although they only imply that with the most known ones, Jesus and Buddha. Some spirits used by shamans seem to be portrayed as Gods, too, like Shamash, and the Sphynx.
* Shaman King, Chocolove, is rather famous for his puns so horribly obvious that the others tend to freeze in awe for a few seconds before continuing the conversation, often turning completely white in the process (in the anime, at least). Other times he just gets attacked by someone, usually Ren.
* Shaman King, Dr. Faust VIII does this with a ludicrous degree of precision during

his fight with Yoh, calmly informing him of the name and number of the bones he breaks with his attacks. It's all part of his plan to get Yoh to drop his concentration so he can lose the fight, and it very nearly works.
* Shaman King: Flowers follows Yoh's son, Hana, as well as the next generation of Shamans.
* Shaman King, God is also known as the Great Spirit, the ultimate spirit who can only be channeled by the victor of the Shaman Fight. This being the case, it's implied that Jesus was the victor of his era's Shaman Fight. As was Buddha. And the fact that the shaman fight occurs "Every 500 Years" infers that, so was Mohammad (and so was Buddha, if you work it backwards).
* Shaman King has Faust VIII, who starts out with only really awesome but technically possible medical knowledge and a complete lack of squeamishness, but ends up being able to magically regrow limbs.
* Shaman King has formed a squad of followers specifically to assist him in winning the Shaman Fight by force so he can become Shaman King and create a kingdom consisting of shamans and shamans alone. His younger brother Yoh and his friends, and the X-Laws, fight against that.
* Shaman King has the name Hao, which is strangely similar to "How" (the stereotypical greeting used by the natives of North American in fiction).
* Shaman King has Yoh's father, who tends to say "It matters not who has the most furyoku, but who uses it properly". He can defeat his overpowered son and friends with his technique alone, but then again, Yoh and friends don't seem to understand that in the anime.
* Shaman King. He is a samurai who died during the Muromachi period 600 years ago and is now Yoh's guardian ghost and best friend.
* Shaman King. His regular rebirth through conception is treated as an Anti-Christ thing by his clan. They have a special 'kill the infant' thing around the time of the Shaman Fight because one of them will be him.
* Shaman King, HoroHoro's battle outfit is just shorts and a long, sleeveless, unbuttonable coat, but he tends to spend a lot of time sporting only bandages and his boxers. When he's not having a bath with all the other guys wearing only a towel. On another hand, Ren is a repeat offender (bathes completely naked even with other people), Hao is shirtless under his poncho and Yoh's uniform shirt is always unbuttoned, but they're not as bad/good.
* Shaman King In the anime, Horohoro meets a young shaman who is using his powers to scare away humans to prevent ther destruction of the forest. When things result in violence, Horo shows him a better way.
* Shaman King is called a dowser, a shaman who's spirit specializes in finding people/things. In fact his whole bloodline has that specialty, which makes them particularly notable as detectives. In the manga and the anime, he's shown using a pendant as his spirit medium and weapon in his quest to find and exact revenge on villian Hao.
* Shaman King is practically Jesus Christ in human form. He is extremely kind, has a heart of pure gold, believes in the goodness of everyone, and always puts EVERYONE above himself, even his enemies. His example is so strong that he literally changes practically every villain in the show, no matter how evil, into a good guy.
* Shaman King leaves no bodies, but it also leaves no doubt that the victims are dead.
* Shaman King left her and a penniless musician with similar abilities comforted her. That guy was Mikihisa, and she would marry him.
* Shaman King may seem like a cold-hearted, hard training thoughtless bitch at first, she undoubtedly has her kinder and more caring side to her that begins showing later on in the series.
* Shaman King — until Lee Pai long is released from his mind control, develops real feelings for her and they both turn good, becoming an example of Bright Lady and White Knight.
* Shaman King Not actually evil, but as you go through the cave, it starts to steal your senses.

* Shaman King of bruises during the fight, Yoh decides that he doesn't want to partner with the ghost of a boxing champ anymore.
* Shaman King, Oyamada Manta's father is about his height (in the neighborhood of 80 centimeters tall); his mother, on the other hand, is of normal height (and noticeably better-looking)
* Shaman King, Rio and Horohoro play I Spy whist Lyserg leads the gang through the desert.
* Shaman King's Great Spirit is "God" and is every spirit manifested into a giant pillar of light.
* Shaman King shoots up rigid whenever it would be thought that he'd get an erection. (Induced, at one point, by an 11-year-old girl...)
* Shaman King, since they're trying to see as much as possible to find the right path to their destination, even though the experience is horrific to both the living and the spirits.
* Shaman King Since they still hadn’t reached that point in the manga.
* Shaman King, since "yo" means "I" in Spanish. The Mexican dub left the name, but pronounced it "I-oh" ("ee-oh")...and since there are people who mispronounce "yo" as "ió"...
* Shaman King, so it seems less like shock and more like disappointment.
* Shaman King somewhat fails, Harusame remains a sword of unparalleled power.
* Shaman King, soul is divided into spirit, mind/will, and heart as three major components. That is not to say body doesn't have a role too, but it's not as important as the other three (being a physical component instead of a spiritual one).
* Shaman King the night before Yoh left for America, which led to their son's birth.
* Shaman King, the sword Amidamaru used in life, made by his best friend Mosuke.
* Shaman King. Though at least Anna shows her love regularly by running at heel to Yoh's help.
* Shaman King to an extent. While Hao has a very good reason to keep Yoh alive, he doesn't seem to kill quite as many people as he threatens to.
* Shaman King: When the zombie of Pyron, a martial arts actor, is released from control of Ren's sister Jun, Yoh's friends decided to call upon the spirit of Pyron's old master, Shamon, who was 96 when he died, to try and becalm the raging spirit of Pyron. When Shamon possessed Yoh, he quickly assumed a stooped stance, and didn't do anything... until Pyron tried to hit him.
* Shaman King (who essentially gains the powers of God)...so he can relax and do nothing for the rest of his life. He essentially is willing to work his ass off so that he will eventually never have to do anything again.
* Shaman King, Yoh tells Hao that he's not afraid of him, because Hao will only kill him once he's reached his full potential.
* Shaman King, Zombies, Skeletons, Mesopotamian Gods, Demons, Animals... Oh, and normal human ghosts as well.
* Shaman of the Undead, a circle is sometimes used by the shaman to talk with the ghost, although it's not necessary. On the other hand, necromancers and demon-binders need circles to do their jobs.
* Shaman of the Undead, all mirrors are the gates to the various hells, so demons (or people who walk between mirrors) can and do pull this off sometimes.
* Shaman of the Undead, but WON hires some of them so that they can interrogate people who are already dead, such as murder victims. Still, necromancers are rather disliked among wizards.
* Shaman of the Undead by dying two years before meeting her student. She hangs around as a ghost, although Ida only learns about it when she sees Tekla pass through a solid wall.
* Shaman of the Undead. For example, you can speak telepathically to somebody if you see him, but you can also use a photograph, because a photo is a perfect copy of a person. Also, demon hunters used to fight with enchanted swords, but now they've switched to enchanted guns.
* Shaman of the Undead gift, they're never heard from again — either they

understood that she's different, or they don't want to have anything to do with her.
* Shaman of the Undead has an entire police department, called obviously Department of Possessions and Hauntings, whose striking arm are demon slayers in case a necromancer hunt or exorcism goes awry. Out of characters in-story, Brittle is a prime example, mixing being paid, protecting the helpless and revenge.
* Shaman of the Undead has two rather benign examples - the house where Ida lives and trains is partly alive-ish (it's complex) and haunted by her aunt Tekla, and the house she moves to later is inhibited by three ghosts that are rather curious than malevolent and prove helpful in solving the case.
* Shaman of the Undead hells (plural) are lands on the other side of the mirror that are ruled by powerful demons. Only demons and people who died possessed go there after death, and sufficiently skilled mirror walker can destroy the whole thing if she knows how.
* Shaman of the Undead is also intangible when he's personifying Ida's dreams.
* Shaman of the Undead. It's case no 2 and 4, as most black wizards believe that they can control the demon. Sometimes happens as a side effect, when you're unlucky enough to stand too close when barrier between the worlds is ripped open.
* Shaman of the Undead, mostly because of her connections to dead painter and terrifying lord of demons.
* Shaman of the Undead psychology. Problem 2, she has no magical gift whatsoever.
* Shaman of the Undead so that Ida can be on time to lead the ghost to the Land of the Dead.
* Shaman of the Undead telling them what to do. Some normal people, such as police officers, are in the know, though, so that WON (magical police) can focus on work instead of cover-ups and fending off curious muggles.
* Shaman of the Undead, the eponymous character has an Inner Eye which, if untrained, emits what ghosts describe as blinding light, beckoning them to her and causing her much trouble before she learns how to take it under control.
* Shaman of the Undead the world in mirrors looks like oddly-colored, distorted and creepy-ish version of our own. Creepiness mostly comes from the fact that the demons and other unpleasantries are visible there.
* Shaman of the Undead, they are either souls of dead people who haven't went to the Land Of The Dead yet or came back at call, or souls that came (or were pushed) out of their still living bodies. They can be destroyed, tainted by black magic or turned into demons, and can shatter if tainted too much.
* Shamans do not belong to a specific religious organisation but rather follow the spirits of the land directly.
* Shamans of various traditions and cultures the world over wear masks of animals or spirits in ceremonies in order to assume the aspects, powers and identities associated with the animal or spirit.
* Shaman's Tears #8; giving him a gun and a single bullet to make things 'sporting'.
* Shaman's Tears comic introduced Bar Sinister (who later got their own short-lived series), a group of genetically engineered, super powered human/animal hybrids.
* Shaman's Tears for various crimes because the victims (genetically engineered lifeforms) are not technically human. So he instead arrests him for violating the Endangered Species Act after he realizes one of the genetically engineered constructs was created using the DNA of a black-footed ferret.
* Shaman's Tears, Joshua Brand and Jon Sable find a cannibal larder full of the remains of missing homeless people in the lair of the Nesting Ones in the sewers under New York City.
* Shaman's Tears: Not a werewolf but another form of transformation. When Jon Sable is tracking Joshua Brand through the sewers, he is confused when Joshua's footprints change from boots to moccasins. This is because Joshua has magically transformed into his costumed identity.
* Shaman's Tears, Thom Broadarrow is exposed to the Circle Sea mutagenic compound and is transformed into a composite of a dozen different creatures found in his taxidermy shop.

* shaman. This fact isn't brought up so much, because combining the two aptitudes leads to questions of why he has not whooped most of evil's ass by now.
* Shaman used this trope extensively, with the twist that any spirits generated by such power of belief weren't considered "real" by deities, or at least, not as "real" as the deities themselves.
* Shamara, a Herm Rakshani, winds up fertile with any biped feline species thanks to a different Deity. Possibly the same one responsible for hir being born a herm in the first place (hir parents lost a boy and a girl child in an accident, apparently some Deity thought it would be amusing to replace them both in one), possibly another one.
* Shambling Towards Hiroshima, it is mentioned that the Nazis also were trying to breed giant fire-breathing reptiles, but thankfully they were unable to do so.
* shame and degradation she had to endure forced her to retire 20 years prior to the start of the series. But after learning her daughter had taken up her mantel, Athena dons her cape again to protect Clara, from the shadows.
* Shame) barges in, catches him, and leaves in an instant. At first, Sissy thought it was humorous but Brandon proceeds to tackle her onto his couch and verbally abuse her, scaring her in the process. It's one of the darkest parts of the whole movie.
* Shame behavior. Got enthusiastic reviews by many renowned film critics, including Roger Ebert.
* Shamed by a Mob: A large group of characters will show extreme disgust towards the one crossing the line. Conversely, a mob shaming someone runs the risk of crossing this is the shaming goes to the extremes.
* Shamed by a Mob: When a group reviles a character for doing something bad.
* shamefully singled out for the most mundane things and then tortured relentlessly for just existing
* Shameful Strip: Can lead to sexual assault, doesn't always, but is still inappropriate.
* Shame gave birth to him, but since the other two went through sympathetic pregnancies, all three of them nursed him, and none of them ever divulges which the "real" mother was; they are all considered equally his mothers.
* Shame If Something Happened. However, the orders on both occasions were "leave the offending party alone, and see if you can find a workaround in this morass." The people they're sort-of threatening never notice.
* Shame If Something Happened: It would be a shame if something horrible happen to you if you cross me.
* Shameless Fanservice Girl: A character who goes naked because they don't care at all about the nudity taboo or anyone who'd be offended by seeing them nude.
* Shameless Fanservice Girl: A character who goes naked because they don't give a damn about the nudity taboo.
* Shameless Fanservice Girl doesn't care if you're uncomfortable with her lack of clothes or penchant for skimpy outfits. She'll bare her figure anyway.
* Shameless Fanservice Girl witch who defected from her mother (and queen) after spending her childhood literally locked in a cage like a bird.
* Shameless) feature this in the middle of the ending credits, usually showing a short funny scene concerning one character's storyline from that episode.
* Shameless Frank's arc in season two had him romantically involved with Dottie "Butter face" Coronis — or, rather, the insurance money he might collect if and when she passed away.
* Shameless, Gallaghercest is rather popular. Fiona/Lip is probably the most popular ship, helped by how they are, in-universe, the parental figures of their four younger siblings, being that their mother has been gone for some time and they eventually kick their deadbeat father out of the house. Although each has a respective love interest, Fiona quickly loses interest in hers and she tends to be heavily disapproving of Lip's love interests in what could easily be interpreted as jealousy.
* Shamelessly Slutty School Teacher is about a high school history teacher and her attempts to seduce a rather dim male student.

* shameless ripoff features an even more blatant parody of Scientology: the Church of Philosotology, run by an "R. Lon Hibbard", whose beliefs are almost carbon copies of various Scientology tenets. They also run the Forgive and Forget stations, which let you lose any unwanted heat from police or gangs, for a price (in true Scientology tradition).
* Shameless Self-Promotion. At one point, the ride train crashes through a billboard reading "SEND MONEY TO UNIVERSAL STUDIOS."
* Shameless, so when she does have sex it's in awkward, semi-public locations.
* Shameless (UK), Frank Gallagher becomes one when he discovers he can claim extra benefits as long as he is on jury service. From that point onward, he tries to drag the deliberation out for as long as possible, continually reversing his opinion whenever he cleverly convinces everyone to see things his way.
* Shameless (UK): In episode 8x14, a coffin is carried through the estate, supposedly with Paddy inside, but it turns out this was Paddy's way of smuggling guns to the rest of the Maguires.
* Shameless (UK): the Maguires use an ice cream van as a front for dealing drugs and give Frank a job on it. ("If someone asks for a smartie... give them a pill. If someone asks for a polo... give them a pill.") Backfires somewhat when Frank takes some himself and ends up giving pills to an old woman who wanted some actual smarties.
* Shameless (UK), used chillingly when Paddy is held captive like this and forced to take heroin and comedically in the US version when Frank is viciously insulted by the three firemen who come to cut him loose.
* Shameless (UK) was very sad and touching for the characters. It was most apparent in the parts that showed the main characters in black and white against a plain white background, showing their inner thoughts.
* Shameless (US), all of the characters despise the police, usually because it runs the risk of interrupting some sort of scam they're running, but also because the police are presented as corrupt at best.
* Shameless (US), but dealing with someone like her in real life would be exhausting.
* Shameless (US), Carl convinces a female camp counselor to expose her breasts to the other boys in the camp. It is a camp for kids dealing with cancer, so it is not hard for him to play on her sympathy and convince her to give the boys their 'wish'.
* Shameless (US) features a sculpted SPAM turkey for the Thanksgiving episode.
* Shameless (US), Fiona gets a low-paying job at a supermarket, and soon learns that most of her co-workers have been pressured into having sexual relations with the boss, Bobby. When she gets them all together to talk about it, some of them even defend it.
* Shameless (US) Fiona is arrested for child endangerment for accidentally allowing her younger brother Liam to get into some cocaine she had out in the open. Her somewhat overworked lawyer tells her that it would be best to plea bargain, as she's a first time offender, it's a fairly open-and-shut case, and at worst she'd probably only get 1-3 months in jail. Fiona, however, is resistant to plead guilty as the entire affair was an accident, and has to be persuaded to accept the plea deal (she ends up not having to actually serve any time, and is instead given probation).
* Shameless (US), Fiona meets Jimmy/Steve at a club when a man she was dancing with steals her purse; he swoops in to try to and stop him, but ends up crashing into a waitress and having a bunch of drinks fall on top of him. The thief gets away, but Fiona thanks him for trying to save it and the two hit it off from there.
* Shameless (US), Frank is talking with Liam at the front door of Faye's house, and when he's done, he exits through the window.
* Shameless (US), Frank meets Faye, an attractive rich woman and follows her to her mansion. Faye ties Frank up and demands he tell her how he told the cops back in 1993 that Faye's fiancee was his crack dealer, sending him to jail for a crime that never even happened. But Faye's revenge is marred by how Frank is such a massive drunk/addict that even when shown videotape of the trial, he can't recall any of

this.
* Shameless (US): Frank's lawyer can be found pouring water on stairs leading to train stations. When the water freezes and someone slips on the ice, he is right there to offer his services to sue the city.
* Shameless (US). He's too good at sex? He's too generous and philanthropic? He always has the moral high ground in every episode and that's annoying?
* Shameless (US). In the end, they put it to a vote and decide against turning in their manager. To make things worse, the other cashiers turn on Fiona after learning she hasn't performed oral sex on their manager, feeling that she's not pulling her weight.
* Shameless (US) introduces Etta, the elderly owner of Fiona's laundromat who, due to dementia, is prone to eating cat food.
* Shameless (US). Jimmy is handsome and from an affluent family and Estefania is smoking hot so most people would not see anything suspicious about them getting married. However, they both happen to be in love with other people so upon arriving in the US they go their separate ways. Estefania lives in luxury with her boyfriend and Jimmy moves in with Fiona. When he finds out, Estefania's father is not happy because this arrangement is bound to arouse suspicions from immigration. To correct the situation, he has Estefania's boyfriend killed and threatens to do the same to Jimmy if he fails to convince people that he and Estefania are really married.
* Shameless (US). Liam, the black child of the Gallagher clan, manages to get into a private school where he's pretty much the only black kid in the class. It soon turns out that much of Liam's day is being pulled out of the classroom to be in the playground when prospective parents pass by so he can be an example of the school's "openness and diversity."
* Shameless (US): Lip and Brad are brought in to see the most powerful mobster in Chicago and fear that they are going to be killed. However, the mobster just needs some skilled mechanics to fix his kid's birthday present: a kid-size car powered by an electric motor. The assembly instructions were apparently incomprehensible. Lip and Brad successfully assemble the car and seem to be off the hook. However, Lip tells Brad that they better get out of there quickly because he found some left over parts that he really hopes are not vital to something like the brakes.
* Shameless (US), Lip begins having an affair with a professor of his, and it's stated he's not the first student she's had relations with in the past. It doesn't end well at all for either of them when it's discovered by the school board.
* Shameless (US), Lip discovers that his college registration has been cancelled because he did not know that he had to renew his government grant. The necessary papers were sent to him by registered mail but the family member who signed for them just put the envelope away and never bothered telling Lip that he had mail. Lip is livid because without the grant he had to go into debt to pay his tuition. He immediately goes to the post office and has all his mail forwarded to a PO box so this never happens again.
* Shameless (US) plays him so well that it's hard not to feel invested in him.
* Shameless (US) social services do exist but they seem to have largely given up on the Gallagher family. The parents consist of an absentee mother and an alcoholic father, and the kids have been taken away by child services in the past. However, it never seemed to stick and now Fiona makes sure that they stay under Child Services' radar.
* Shameless (US) tendencies. His girlfriend Mandy knows that if he goes away to college, their relationship will not survive. However, she does not want to trap Lip in a life of poverty so she goes out of her way to motivate him to apply to colleges and even sends out applications without his knowledge.
* Shameless (US) (the American version), Lip discovers a porn stash behind his brother Ian's dresser. Although the folder is covered with pictures of semi-dressed women, Lip discovers it's actually full of gay porn. Although Ian doesn't immediately come out to his brother when confronted with it, by the end of the episode they're joking about who they've gotten blowjobs from.
* Shameless (US) (the pawnbroker supports a 2 state solution), Frank gets annoyed when the pawnbroker won't raise his offered price, saying that he's "Jewing him

down" incorrectly.
* Shameless (US), Veronica gets into a fight with Kevin's wife for not only being a bitch who made Kevin believe that her nephew could potentially be their son, but also so Veronica could get her to sign the divorce papers.
* Shameless (US) (while surrounded by baby stuff no less), Fiona doesn't feel the same anymore.
* Shame on You based on her own experiences of growing up in a religious cult, reported by some sources to be the St James School of The School Of Economic Science.
* shame that when he was younger and suffered an injury in the training ring grievous enough to require medical attention, his family had the incident and the resulting trip to the physician hushed up out of fear of what it would do to his reputation if word got out.
* Shame. The main character is a sex addict who looks at and saves porn even on his work computer, which causes a virus to enter the system.
* Shame there's no such thing as a Liquorice Swordfish... The only candy he doesn't like is Bertie Bott's Every Flavour Beans. (He always has terrible luck with them.)
* Shame to satisfy his needs. And none of it ever gives him happiness.
* Shame were partially or largely ad-libbed, including Brandon and Marianne's date, leading to an endearingly awkward and realistic conversation.
* Shaming the Mob. When an angry lynch mob shows up to kill his black client in the middle of the night, Atticus is waiting for them so he can try to argue some sense, but he fails and they threaten to go through him if he won't step aside. Fortunately, his daughter Scout snuck out and followed him that night. Her sudden appearance and apparent innocent lack of understanding of the situation (greeting the men warmly and asking about how their kids are doing since school ended for the summer) takes all the steam out of them and they are too ashamed to carry out their violent intentions. As Atticus puts it later, she reminded them they were (good) men and not a mob.
* Shamir is the only member of the Knights of Seiros who is not a devoted follower, being a mercenary from Dagda. If she’s not recruited, she’ll need to be killed in chapter 15 of the
* Shamo has its protagonist Ryo Narushima in this category for give or take the first 3 volumes of the manga. After that, well...Let's just say he adapts to his surroundings a tad too well.
* Shampoo also brainwashes Akane into glomping Ryoga during the "waterproof soap" episode in the manga, leading the poor guy to believe she reciprocates his
* Shampoo also regularly dual-wields chúi, large Chinese maces. These demonstrate her prodigious strength, as they are known to be unbelievably heavy and unwieldy, yet she swings them around like they were nothing.
* Shampoo and the rest of her Amazon tribe. If an outsider male defeats a female Amazon, then she has to marry him (the outsider male has no say in the matter).
* Shampoo), and they're sitting next to each other at a table. The other person sitting next to her offers to give Jackie anything she wants, and she tells him, "I want to suck (George's) cock." George immediately spits his drink all over himself.
* Shampoo exhibits traits especially in the anime. She was quick to defend Ranma from Mousse when he tried to curse him with Jusenkyo water and was willing to go against her sister amazons when they tried to threaten Ranma. When the Jusenkyo Enforcers were torturing Ranma and Genma, Shampoo jumps in and attacks them despite being in cat form at the time. In the movie, Shampoo saves Ranma and Lychee from Monlon, telling them to go on ahead and leave Monlon to her.
* Shampoo fits this well, even to Ranma (hint: she's in Japan for losing against Ranma and the gap just keeps getting bigger). Also she isn't above using cheats like the Super Soba and drugs and
* Shampoo: Given she stated "obstacles are for killing" when Ranma tried to prevent her from attacking Akane for Ranma's hand in her first story, it's understandable that she gets hit with this trope the most — in canon and in fanon. Fanon usually overstates her actually
* Shampoo is the only girl besides his fiancee that Ranma has ever shown explicit

attraction, even when she was trying to murder him, and admits she can be much nicer... Except Shampoo made a horrible first impression with the whole "trying to murder him" thing and
* Shampoo: Jackie must choose between the rich Lester and the blue-collar hairdresser George.
* Shampoo. Mousse, meanwhile, seesaws between subverting this trope and playing it straight with his duck curse; while it is much smaller, weaker and can't use his physical attacks, it can fly and he's still capable of throwing barrages of knives, darts and bombs in it.
* Shampoo once offered Ranma a packet of bath powder that would nullify his curse in exchange for a date. She learns soon after that the powder works only once, but leaves that part out when Ranma finally gets the powder.
* Shampoo takes place over the course of one day, with some footage of the next day.
* Shampoo tends to burst through walls in her appearances. When asked why she doesn't use the door, she replies "
* Shampoo uses a technique on Akane to erase all memories of Ranma. She remembers every other person and thing, even when not knowing Ranma means she wouldn't know how she became familiar with them. Apparently, Ranma's father is living with her for no discernible reason. Shampoo's amnesia technique has the added benefit of preventing the victim from ever relearning the suppressed memory, so every time Ranma was re-introduced to Akane she'd forget the latest introduction as soon as he left her line of sight.
* Shamuhaza somehow managing to discover some of the School of Mensis's research.
* "Shamu" is a name given to several different orcas who are the stars of their respective daily shows in
* Shamus Young. Young's comic went 144 episodes. Darths ran through the first two trilogies (with no plans to stop) with over 1500 pages!
* Shana and Wilhelmina storm Seireiden in the first season finale to rescue Yuji.
* Shana becomes increasingly powerful when Yuji is near her, leading to her ability to fly using flame wings. This a cross between Yuji's status as a container for the Midnight-Lost-Child and
* Shana Festa. Due to the website's expansive following, she's been credited with helping break women horror authors out of the "paranormal romance ghetto" so to speak.
* Shanalua Mullen has a young sister with an unspecified illness that requires hospitalization and very expensive care, so she takes a very lucrative offer to spy on her own comrades for Vagan.
* Shandor's cult has a distinctive motif that looks like a gaping-mouthed face (think comedy/tragedy masks). This extends to the machinery on Shandor Island and the Cultist ghosts.
* Shandra's severe embarrassment when Grobnar inadvertently reveals her extreme concern for the PC's fate before said duel also probably qualifies her for this.
* Shandra: The Jungle Girl, Ian Abercrombie works for (or possibly heads) something called the Department of Species Control. Exactly what this department does isn't clear, but as he is seeking to develop assassins who are living biological weapons, it seems safe to assume it isn't anything good.
* Shandra: The Jungle Girl incredibly valuable, Karen is able to waltz through an empty lab and into her cell without being challenged, and (seemingly) without the door even being locked from the outside: despite the fact that other characters had be shown needing keys to access it earlier.
* Shandra: The Jungle Girl is a rare case of jungle princess as antagonist, with the heroes initially setting out to capture.
* Shandra: The Jungle Girl. It is not clear how much this is under her control.
* Shandra: The Jungle Girl Karen sets a snare for Shandra; using Cord as bait. It works. Antonio tries something similar earlier, but fails miserably.
* Shane, after the rancher and Shane win a fist fight with a dozen of the cattle baron's thugs the rancher says they'll pay for the damage, him and Shane.
* Shane Battier of the Miami Heat is one of the elite defenders of the NBA because

of this.
* Shane Black after having taken a two-year break from writing, triggered in part by the end of a relationship.
* Shane Black also didn’t want to sink $200 million into a movie of their most popular Marvel character dealing with such a heavy topic.
* Shane Black. It was announced in 2014, filmed the following year, and released in 2016.
* Shane Black this trope. A few of his films he has written are set during the Christmas season or alludes to it.
* Shane Carwin is a full-time mechanical engineer and showed up to work as usual at 9:00 a.m. on March 29, 2010... two days
* Shane Casey reappears to threaten Danny after falling from a lighthouse.
* Shane Casey trying to prove his that his older brother Ian was innocent of the robbery that got him arrested and subsequently committed suicide over, and kill those he blamed for it. Following Danny proving that Ian really did commit the robbery and arresting him, Shane developed an obsessive hatred for Danny. Masterminding a breakout years later right before he was executed Shane went on a killing spree, first poisoning his would be executioner and shooting his accomplice. Several days later after being arrested, Shane strangled a guard with his handcuffs and escaping killed his former cell-mate and accomplice, before trying to kill Danny.
* Shane Clarke/Red Wind Ranger, Pua Magasiva, unexpectedly died on May 11, 2019 when he was just 38 years old. Much like with Trini above, it's unknown if this also marks the death of Shane in-universe as well, but it means we most likely will never see him on-screen again.
* Shane Davis is knee deep in this trope. After he told the others that he had never finished watching
* Shane Dawson, a YouTube comedian and personality, came out as bisexual in 2015.
* Shane Dawson has Shane be tortured by being forced to copulate with a woman whose genitalia is made out of teeth.
* Shane Dawson: Shanaynay's interview with Lucas Cruikshank gives us this:
* Shane Dawson: Sketch comedy, acting as all his characters. Also known for conspiracy videos.
* Shane Douglas" promo, but he maintains that he does think Flair was a good wrestler and wishes he was the elder statesman of the business he initially thought he was.
* Shane Douglas so much: his total disrespect for women and drunken antics in front of children.
* Shane Douglas was billed as "Troy Orndorff," Paul Orndorff's "nephew."
* Shane ends with Joey calling out to the titular gunslinger as he rides off into the sunset:
* Shane has no luck with this kind of thing. In another episode, the Strike Team had to find out which stripper at a club was luring johns into the alley and then robbing them with her boyfriend. When Vic tries it, he gets a blow job. When Shane tries it, he gets a tire iron to the head.
* Shane Helms (better known to WWE fans as Gregory Helms aka The Hurricane) (later known as the Prince of Punk) and Evan Karagias. Their gimmick? A wrestling boy band who, in all fairness, sang their own theme song.
* Shane in "TS-19" until her resistance makes him stop and think about what he was doing.
* Shane McMahon a Spot Monkey well into his 50s and after a 17-year hiatus, and he has received multiple concussions and injuries for still retaining his high-flying moveset.
* Shane McMahon by headbutting his father so hard that he bled and giving him a frog splash. Cut to February of 2019 and guess who Vince claims is deserving of an impromptu WWE championship opportunity?
* Shane McMahon: Debuted as an on-screen character in 1999, though he had been an anonymous ref going back to 1990.
* Shane McMahon gesture, twice. The Undertaker looked kindly on Shane, in sharp

contrast to the "I'll do what I have to do" demeanor before the fight, and calmly patted Shane on the cheek before finally finishing the match.
* Shane McMahon. He's considered the craziest badass of the McMahon family for a reason.
* Shane McMahon: Made his triumphant return to WWE in 2016 after leaving the company in 2009.
* Shane McMahon's voice has deepened during his seven year hiatus from WWE.
* Shane McMahon The WWE had teased a special guest, but no one pegged Shane O'Mac coming back.
* Shane McMahon were feuding with each other, all of whom were with the WWE at the start of the arc.
* Shane McMahon when he faced Mideon and Viscera in a handicap casket match. Triple H had put Mideon in the casket and thought he had won, but Shane, who had been assaulted by Triple H not long ago, clarified the ruling that he had to put BOTH Mideon (nearly 300lbs) and Viscera (nearly 500lbs) in the casket at the same time. Obviously, Triple H didn't stand a chance.
* Shane McMahon while Rodney and Pete Gas (later joined by Joey Abs) would hang around WWE for a couple years, albeit as comedy jobbers.
* . Shane replies that when he first saw the Power Rangers on TV, he was a kid and thought it was a weird tv show.
* Shane's barfight retribution of Calloway's earlier public humiliation. Shane wailed the tar out of his attacker and others in the bad guy Ryder's employ. Out of respect, Calloway quit Ryker and warned Shane of a bushwhacking plan using a hired killer.
* Shane Stevens called "the finest novels ever written about the dark side of the American dream." He has said of himself that, "I am very secretive...I never give interviews, stay in shadow, travel by night."
* Shane Strickland and ACH's dance off prior to their match at the International Wrestling Cartel's Twelfth Super Indy Tournament.
* Shane that it was Levy playing the character until he actually saw the man backstage and recognized him. This is why Raven never got pushed while working for WWE.
* Shane that the shot was fatal, it's probably the most common interpretation of the ending.
* Shane, the eponymous gunfighter is a firm believer in carrying one gun as sufficient for his needs and proves it in how quickly he kills a sinister gunfighter who carries two.
* Shane, the villainous gun-for-hire Stark Wilson uses two pistols, but the eponymous character belittles that, saying that one pistol is all a person needs.
* Shane Walsh, his old police partner and the most short-lived of his lancers.
* Shane, who tell Amy who's confused about her gender preference that while gay men are sexually aggressive and only looking to hook up most lesbians want to bond and nest build. Averted with another gay character who wants a monogamous relationship with Shane.
* Shang-Chi and the Legend of the Ten Rings - a fitting way to introduce the MCU's first headlining Chinese hero.
* Shang-Chi and the Legend of the Ten Rings and received acclaim from critics and fans, with some hailing it as one of the MCU's best origin stories.
* Shang-Chi and the Legend of the Ten Rings has two pendants owned by Shang-Chi and his sister Xialing be set in a dragon statue that unlocks a map made of water.
* Shang-Chi and the Legend of the Ten Rings has Wong use a hologram to conduct an examination of the Ten Rings devices.
* Shang-Chi and the Legend of the Ten Rings, including both the title character and the Mandarin, came from leaked Lego kits and Marvel Legends action figures that were produced as tie-ins.
* Shang-Chi and the Legend of the Ten Rings reveals the Mandarin to be in fact the real greatest human warrior, even exceeding Captain America and Bucky Barnes. The leader of the highly dangerus and covert Ten Rings, he's had decades of experience and training and known for having participated in many world-changing events and

killed many and hailed as a great warrior king. He trained Shang-Chi into becoming a fighter on the same level of Captain America and proved easily superior to him in skill. While it's ambigiuos who would have won their final fight after Shang-Chi matures his fighting skill and masters the fighting style of Ta Lo, as Wenwu was holding back and Shang-Chi ended up willingly throwing the fight in a standstill after taking the Rings and seeing his father still ready to fight, after Wenwu gives his life to save his son, currently, the title of the most skilled warrior on Earth falls to Shang-Chi.
* Shang-Chi and the Legend of the Ten Rings starts in an unspecified year when Xu Wenwu finds the titular rings, followed him through history and ends with a scene in 1996 when he finds a village and fights its protector, with whom he would eventually father the eponymous character and his sister. The films then skips to the present day, albeit with several flashbacks to important parts of Shang-Chi's past.
* Shang-Chi and the Legend of the Ten Rings was the first Asian-led MCU film with a mostly Chinese cast and helmed by a Japanese-American director. Overseas Chinese viewers in particular watched the movie precisely because it was made by East Asians.
* Shang-Chi and the Legend of the Ten Rings went by Shaun while hiding from his dad. Katy mocks this, pointing out easily his father must have found him.
* Shang-Chi and the Legend of the Ten Rings who had no problem with trying to murder his children to prolong his own life.
* Shang-Chi and the Legend of the Ten Rings Xialing. Leiko Wu and Clive Reston are also absent.
* Shang-Chi, arrived and had his troops slaughter the gangster's henchmen. Just before departing, Fu Manchu stated that he intervened because only he may decide when and how Shang-Chi will perish.
* Shang-Chi comic book, but had to replace Kwai Chang with an original character after learning that the show was made by Warner Brothers, the parent company of DC, Marvel’s biggest rival.
* Shang Chi, Master of Kung Fu, a character created to cash in on the success of the martial arts films of the 1970s who also happens to be related to old
* Shang-Chi stories being in the public domain while others aren't, and the copyright varies from country to country.
* Shang-Chi, where the title character, Fu Manchu's son, fights against his father's villainy.
* Shangela in All Stars 3. Again, like with Shea, she had the most wins and a lot of fan support leading up to the finale episode. Then the jury twist was introduced, where all the eliminated queens would vote for the top two. Shangela didn't make the cut, with the fans ending up completely outraged as a result.
* Shanghai Baby by Zhou Weihui, the main character, a Shanghai woman in her 20s, is in a relationship with a caring but sexually impotent Chinese man, and has a steamy affair with a Western expatriate. The latter is depicted as a tall, blond, sexually aggressive German.
* Shanghaied!. Cue the two of them running through a live-action background, cringing and flinching as they get doused with perfume samples.
* Shanghai Girls, becomes extremely patriotic, even converting to Christianity and frowning on traditional Chinese ancestor worship. Her sister May assimilates even more into American culture, although Pearl's husband and father-in-law never quite fit in.
* Shanghai Girls , Pearl speaks English perfectly, but reverts to this trope because tourists tip better when she speaks stereotypically.
* Shanghai Girls, sisters Pearl and May plan to move to Hong Kong after all of their money is lost in a bet, instead of marrying their husbands who have moved to America. However, extenuating circumstances lead to Pearl and May going to America instead so they can live with their husbands and become citizens.
* Shanghai Girls,the Louie family is investigated for being Communist sympathizers. This happens because they are Chinese immigrants (only Pearl's daughter Joy was born in America) and because Joy is a member of a Communist organization at her

college.
* Shanghai Grand, had sliced his chest open and is ready to feed him to a hungry boa constrictor.
* Shanghai Grand: In the first shootout, an unfortunate mook falls into a set of rotating gears on a ship and gets messily ripped into half by the waist.
* Shanghai Grand: The fate of a triad boss who tries intimidating the two protagonists at the end of the first act, where he ultimately gets flung through a restaurant's third floor window.
* Shanghai Grand via machine-guns, which is perfectly masked by the fireworks going off and the cheering crowd outside.
* Shanghai Knights, Chon's sister attempts to escape from jail this way.
* Shanghai Knights) dual-wields a rapier and a saber against Jackie Chan (who just has the rapier).
* Shanghai Knights ends with a battle inside Big Ben. (Or rather, inside the clock tower of the Palace of Westminster, where the bell named Big Ben is.)
* Shanghai Knights for both combatants: Chon Wang, although trained in martial arts, does not know how to handle a sword, and Rathebone (specifically stated to be a master swordsman) is using overly flashy techniques to toy with and humiliate Chon, knowing that he doesn't have the skills to recognize and attack the openings Rathebone is presenting him with. Bonus points for Rathebone being named after Errol Flynn's iconic swordplay opponent.
* Shanghai Knights is in the walls, using the old gag where they look out the pictures through the eyeballs to watch what's going on. In a couple shots, the eyes look like they could really be the eyes in the painting moving.
* Shanghai Knights, on the idea of the then-new "moving pictures", even going so far as to suggest, "You could do your own stunts!" In a subversion, Chon nods and replies:
* Shanghai Knights) that they go to California to act in "moving pictures", particularly kung-fu action films.
* Shanghai Knights: The titular characters meet a little boy in 19th-century London who introduces himself as Charlie Chaplin. Near the end of the film, he travels along with them to the United States and puts a fake Chaplinesque moustache under his nose.
* Shanghai Knights, where Chon Lin is said to have "picked the lock using a deck of rather risqué playing cards. Then scaled the walls with a mop, a fork, and various pilfered undergarments."
* Shanghai Noon, after Obelix doesn't understand a detailed plan, Asterix replaces it with "we fight, get the gold and go away" (to which Obelix replies "This one I understand!").
* Shanghai Noon, a runaway train explodes when it runs into the END OF THE LINE barrier. The director admitted that the explosion could not be logically explained.
* Shanghai Noon, Chon Wang ends up accidentally married (from his POV) to the Sioux chief's daughter (who knew exactly what she was doing). She follows him around for the rest of the movie, periodically saving his ass, only to end up trading him in for Roy at the end.
* Shanghai Noon, in which Owen Wilson's gunslinger character grabs the villain's cool top-breaking revolvers, but can't seem to figure them out. When Jackie Chan's character asks what's wrong, Wilson protests, "These guns are really weird!"
* Shanghai Noon Owen Wilson's character Roy O'Bannon calls his penis "Little Roy".
* Shanghai Noon: Princess Pei Pei is taken to America by a man named Calvin Andrews in order to escape her arranged marriage to a fat slob. In reality, Andrew is working for Imperial defector Lo Fong, who ransoms the princess for 100,000 pieces of gold and forces her to work on his railroad.
* Shanghai Noon: Roy O'Bannon in the movie's final firefight, walks away with the priest robes he was wearing looking like Swiss cheese, but no a scratch on him, briefly leading him to believe that he was invincible. Course, at the end he reveals his name to really be Wyatt Earp, so he may be onto something there.
* Shanghai Noon - stare blankly and Owen reluctantly agrees to "wing it."
* Shanghai Noon, when Jackie Chan and Owen Wilson introduce themselves:

* Shanghai Noon when Jackie Chan's character (who speaks English) is trying to get directions from a couple Indians (who don't):
* Shanghai Noon, when they finally decide to work together, Roy offers Wang a cowboy handshake, spitting on his hand before offering it. Wang, confused and a bit grossed, spits on Roy's hand before shaking it, rather than his own.
* Shanghai Noon, where having defeated the main villains in a showdown inside a church, the heroes discover that Roy's old friends, a gang of bandits, are waiting just outside for them. With no apparent way out, and only a recently-established precedent for the grace of God to go on, they steel one another for the task, say their goodbyes, and charge out the front door...where they find that the bandits have surrendered without a fight to an Indian tribe from earlier in the movie.
* Shanghai Noon, where Roy and Falling Leaves have broken up, and he develops an attraction to Wang's sister Lin.
* Shanghai Noon, who reveals where the guards are going, which explains how they show up there in the end.
* Shanghai, or their predecessors, were founded that way during the first half of the 20th century:
* Shanghai Surprise and problems soon arose: the exposure produced by such a hot tabloid couple served as catnip to Chinese gangsters, who sabotaged equipment and even extorted money from Madonna and Penn before they'd allow them back on set. Penn, like clockwork, went berserk every time a paparazzo snapped a picture of him, culminating in an assault charge. Eventually, Penn and Madonna stopped cooperating altogether, causing the budget to balloon as directors and actors were replaced on Penn's decree, and the couple was labeled as poison.
* Shanghai Surprise, when Sean Penn visits a famous courtesan, a servant offers him a plate of candies that will "assist him." When Sean argues that he needs no assistance, the servant girl sails into a hilarious rundown of the courtesan's expert maneuvers — immediately upon which Sean starts wolfing down the candies.
* Shanghai Tower is probably as close as we're going to get in the near future. It's a single structure designed to contain apartments, offices, parks, shops, and its own life-support system (a countermeasure against Shanghai smog, primarily). It won't be completely self-sufficient, but as far as the residents are concerned it will be pretty close.
* Shangra-La Plaza, featured employees, customers and family members singing about their lives and times at an outside strip mall with stores like a donut shop. Starring Broadway's Terrance Mann as a grease monkey in the mall's garage.
* Shangri-La has two female-looking transgender characters obviously voiced by males.
* Shang Tsung. Though the protagonist Liu Kang is also Asian (Chinese, specifically.)
* Shang Tsung was the best warrior for 9 generations (450 years), but was defeated by the ancient Kung Lao before he could achieve Mortal Kombat. Kung Lao and then Goro repeated this feat, before Goro was finally defeated by Liu Kang.
* Shania Twain album in 2002. It turned out this was because she lost her voice due to stress in her personal life. After undergoing therapy, she regained it and reemerged with a hugely successful Las Vegas residency.
* Shania Twain, are two of the best-selling country albums of all time by a female artist, and both were loaded with extremely popular singles.
* Shania Twain had to help support her family when she was a teenager, after growing up very poor. She had to live out of her car when trying to break into the music business.
* Shania Twain has this as one of her trademarks in almost every music video.
* Shania Twain is about the plight of a woman very much in love with her crazy jealous boyfriend, who interrogates her for making phone calls, talking to other men, or even painting her nails.
* Shania Twain is hunted by a giant robot in "I'm Gonna Getcha Good!".
* Shania Twain red (rock/pop), green (country), and blue (world music.) The red and green are fairly similar, but the blue version is similar to popular Eastern music,

unlike any previous releases.
* Shania Twain saying the name of a popular DJ on the station over "Brad Pitt" on the radio edit of "That Don't Impress Me Much". Dismissing some radio DJ in Nowheresville, USA is much less effective in the song than, say, a millionaire actor.
* Shania Twain. Several other iconic songs didn't even get to #1 at all, including "Whose Bed Have Your Boots Been Under?", "From This Moment On", "Man! I Feel Like a Woman!", and "That Don't Impress Me Much" — all crossover singles that were far more enduring than the likes of "You Win My Love", "No One Needs to Know", or "Honey, I'm Home", which hit #1 on the airplay charts but had exactly zero crossover.
* Shania Twain's "From This Moment On" was originally a duet with Bryan White, but was turned into a solo song for the pop remix due to White not being very well-known outside of country. Due to the crossover appeal of the solo version, the Bryan White version has largely been pushed aside except for the occasional country music station.
* Shania Twain's "(If You're Not in It for Love) I'm Outta Here!" ends with her sighing, stomping away, and slamming a door.
* Shania Twain's "I'm Jealous", where she confesses to being jealous of, amongst other things, the wind, sun and rain touching her guy.
* Shanks All of them are extremely powerful pirates with a massive amount of islands under their dominions and a lot of soldiers and resources available.
* Shanks and his crew showed up, he pulled a 180 and opted to back off and call it a wrap rather than deal with someone on par with the dude who just crippled them in the first place.
* Shanks has three vertical scars over his left eye from a fight with
* Shanks. He is the series' first introduced example of a 'real' pirate, and his crew kill a bunch of bandits in the early chapters to establish that they aren't joking around. Shanks, however, is a deeply honourable figure. When Kaido, one of the Four Emperors alongside Shanks, Big Mom, and Whitebeard, attempts to take advantage of Whitebeard being distracted by Ace's pending execution to attack him, Shanks intervenes on Whitebeard's behalf and stops Kaido, then shows up to stop the war after
* Shanks. He takes his arm being bitten off very well, being mainly glad that Luffy is safe.
* Shanks is the nicest of the Four Emperors, and also the prettiest. Whitebeard is second-nicest, and while he's not handsome like Shanks is, he's at least human-looking. Big Mom is cruel and psychotically unstable, and she's
* Shanks says that the three scars on his left eye, made years ago by Blackbeard, have started to ache at the same time that Ace is dueling with Blackbeard on Banaro Island.
* Shank uses two knives as his main melee weapons, if you couldn't tell by his name.
* Shannara about anything it touches, and the jet black Sword of Leah, which, having been dipped in the Hadeshorn, can now cut and parry magic as though it were iron and steel.
* Shannara, Allanon's magic ages him substantially. Luckily he can recharge, which also handily explains why he's never around except when adventuring needs to be done.
* Shannara, and includes robots and mad computers, but also elves and magic. Generally sold as fantasy.
* Shannara, and still manages to be one of the worst places you could ever go.
* Shannara books mention the First War of the Races. It's only mentioned briefly as being a huge war where the rebel Druids and the race of Man fought the Druids and the other races (Elf, Dwarf, Gnome and Troll). Men were defeated, but the war had far-reaching consequences. However, none of the books at present actually tell the story of the war itself such as what caused it, the major battles and so on.
* Shannara coming back. It only took several false starts, several almost apocalypses, and one actual apocalypse.

* Shannara finally forces him to acknowledge that he was dead, animated only by his own willpower.
* Shannara get his hands on the Sword, Dall managed to convince Par that he couldn't use it.
* Shannara is a prominent example), and the main line marries an elf, though the resulting children, Redden and Railing, still consider themselves mostly human.
* Shannara. Many books and centuries later, things have improved, but it is still the single greatest threat to the other lands outside of the Demons, and is certainly the most persistent.
* Shannara or another - if, e.g., the Sword of Shannara goes missing, you can't just forge a new one to replace it.
* Shannara quartet, then spends the next several centuries fighting to keep them. A proudly racist state that believes wholeheartedly in the superiority of humanity, The Federation are used as dupes by The Shadowen, The Morgawr, various Demon lords, and every other supernatural villain coming down the pike.
* Shannara's armies get out through a single five mile wide gap in the natural defenses, very well guarded.
* Shannara Series has an interesting take on this; as the series is set in the future, it's our current civilisation which is the precursor civilisation.
* Shannara series has maps, which show places destroyed in earlier books or, in one of the prequels, a place that didn't exist then.
* Shannara series has this with a long gone and nearly forgotten age of mythical creatures before the advent of man. The only remnants of it are the elves, Elfstones, and a magic tree that keeps demons sealed within another dimension.
* Shannara series. The elves there are the only sapient race not descended from humanity, and really are older and more naturally magical than humanity or the other races. Interestingly, though, they had, well before the beginning of the first series, forgotten their heritage and the vast bulk of their magical abilities. That is not to say that there were no arrogant elves, but the primary victims of their arrogance were other elves. The elves as a people had no particular sense of superiority, even during periods when they were among the best organized and most powerful factions.
* Shannara series, this was shown to be World War III, taking place sometime in the early 22nd century. Although supernatural forces were pulling the strings, nuclear and chemical weapons, deployed in several steps, were responsible for wiping out the vast majority of humanity.
* Shannara series, where it is made very clear over and over that magic is highly unstable and unpredictable, prone to shifting over time from one form to another. Even well-known and fairly well understood magics can occasionally have unforseen effects.
* Shannara that can detect magic use throughout the Four Lands not only in the present, but in the recent past as well.
* Shannara that survived the end of said era, designed to guard its knowledge.
* Shannara: The Trolls, Dwarves, and Gnomes are humans mutated by the consequences of nuclear war. Elves are commonly believed to be the same, but are actually descended from real faeries.
* Shannara, they are claustrophobic and dislike going underground. They actually appropriate the typical elven skill in that they are skilled woodsmen, and their crafts are mostly carved from wood rather than stone, and are famous for their gardens and dams.
* Shannara video game adaptation. For RPG elements, it wasn't too awful, just badly cliched, but the gameplay mechanics — especially the combat engine — sucked horribly.
* Shannara, Walker Boh's right arm is petrified, and he has to smash it off to prevent the rest of his body from being petrified as well.
* Shannara was the last descendant of the great elven king Jerle Shannara. This was engineered—as Jerle had lived 500 years before and had three kids (plus two adoptive heirs), there were originally quite a few descendants of the Shannara line, but the Warlock Lord, knowing that they were the only people capable of

wielding the only weapon that could kill him, made a point of hunting down and killing as many of them as he could find.
* Shannara who captured magic users of the Shannara world to recharge its batteries, evil lizard-men, warlocks, witches, werebeasts, shapeshifters, and then the Demons trapped in the Forbidding since Faerie, which consist of every other mythological creature that has ever been conceived.
* Shanna the She-Devil: She is tall and has a muscular yet voluptuous body. Having men going ga-ga over her looks is not unusual in the comics (and in the Frank Cho miniseries, said men don't even try to conceal their perverseness... until Shanna finally learns this is not supposed to be done to a woman and nearly kills one of them in retaliation).
* Shanna the She-Devil. The similarity between her name and Sheena's is entirely coincidental, of course.
* Shannen Doherty a convenient excuse for why Patty might have kept her a secret...
* Shannen Doherty didn't get along with TW King and wanted him off the show. Another said that he wanted to pursue other projects. A third camp says that he wanted more screen time but writers had no ideas for him.
* Shannen Doherty for Prue's unavailability is that her death is still too recent for her sisters. For the several years worth of time the rest of the shows takes place over. The comic continuation, of course, has no actor availability problem, so Prue is able to appear as a spirit advisor.
* Shannen Doherty is naturally black-haired, and was asked to bleach it blonde so that all three Heathers would be blondes. She refused, and they compromised by having her become a redhead.
* Shannen Doherty is striking — they even have the same smile. Jennifer Rhodes, who plays the grandmother Penny, also looks incredibly like Doherty.
* Shannen Doherty — impulsively chopping all her hair off while shooting was ongoing. This was reportedly the last straw when it came to her diva behaviour and got her fired from the series.
* Shannen Doherty says "Ms Hellfire", "Which Prue Is It Anyway?" and "All Hell Breaks Loose".
* Shannon apparently dies in "Hearts and Minds", but the sequence is shown to have been a drug-fueled hallucination by her brother Boone.
* Shannon Beiste. Her comebacks are actually so lame that they leave her rival Sue speechless.
* Shannon Hale, Princess Anidori is recognised as from the country of Kildenree because of her yellow hair, and is called "the Yellow Lady" by her friends. The country of Bayern, where she was hiding, apparently has no blonde people.
* Shannon Hale. Since only her countrymen (read: the traitors that want to KILL her) have blond hair, she tries to dye her butt-length yellow locks. Subverted in that she can't find enough brown dye, as it's uncommon in Bayern, and settles for wearing a scarf and only dying her eyebrows.
* Shannon Hale's novels all are very lovingly crafted. However, this often results in a slow beginning.
* Shannon Hale was originally from, but decides that it was because Mount Eskel "needed an academy more than a princess".
* Shannon Kook (born and raised in South Africa, dual citizen with Canada)
* Shannon Moore, became his distaff counterpart, showing a similar xenophillia for Japanese culture that he had developed while running with Tokyo Gurentai and painting her face in a similar manner to his.
* Shannon Moore: Had a stint in TNA from 2010 to 2012. Now wrestles indies.
* Shannon Moore, whose real name is Shannon Spruill, on the roster at the same time.
* Shannon, safely docked in Boston Harbor, captained by James Lawrence.
* Shannon Teverius is also stated to look uncannily like his mother — a double-edged sword, as she was a ravishing beauty but also a notorious traitor to the realm. This leads to an awful lot of people distrusting him, and even his own siblings quietly expecting him to do something treasonous, which is a little unfair — he's not

* Shannon Teverius is arguably an even more straightforward example, possessing all of Felix's stereotypically camp traits minus the physical bravery and badassery. This trope is averted by other prominent gay characters, however, such as
* Shannon was one of the main characters in season 1 only to get shot a few episodes early on in season 2.
* Shannon went undercover in several roles that required her to sing, which allowed Jane Badler to showcase her talent as a singer.
* Shan'rekk too doesn't get a proper introduction when he first appears, although in his case it's plainly visible that he's important, or at least
* Shantae after the fifth boss, with her companions noting that stopping evil five times in one day is a personal best for her.
* Shantae after they had been mutated into human-sized werebats by the Pirate Master's Dark Magic.
* Shantae, and generally written off as nothing but an idiotic screw-up and pervert. Out of universe, he is loved for being a loyal friend to Shantae, his antics being seen as hilarious and he is even a popular ship partner for Shantae.
* Shantae and the Pirate's Curse" as well as the achievements gained by defeating it once ("Graet Job") and doing so with no damage ("Prefectionist").
* Shantae and the Pirate's Curse could both be found deep in Mud Bog Island.
* Shantae and the Pirate's Curse heroine Genie who can’t easily hold a pencil between her bosoms. Even the ancient statues you find on islands depict highly endowed women.
* Shantae and the Pirate's Curse, sucking up a cloud of ham stink and releasing it in front of a sleeping dragon will awaken the latter and make it drool continuously, creating a waterfall and filling up a small dried-up lake below.
* Shantae and the Pirate's Curse. To make up for this, failure only sends them back to the beginning of the current screen, each room serving as a checkpoint. Also, dying doesn't subtract any health or use any Auto-Potions.
* Shantae at one point chronicled the events of Shantae trying to cover herself after somebody stole her clothes while she was swimming. It turned out that Bolo buried Shantae's clothes because he saw them lying on the ground and thought she had melted.
* Shantae: Being a He-Man spoof, Bran-Son naturally delivers one of these.
* Shantae, Bolo unintentionally traps the residents of Sequin Land Palace inside when he's hired to work around the palace and accidentally installs the door lock backwards, upside down, and inside out. Near the end of the game, Bolo saves Sequin Land Palace by unintentionally causing the Palace Disruptor Cannon to miss when he's hired to work on the Targeting Module, and accidentally installs the main circuit panel backwards, upside down, and inside out.
* Shantae can fight baddies by detaching one of her legs and whacking them with it. She can also throw her head, and have her body teleport right under her head and reattach with her head.
* Shantae, fire magic has a side-effect of setting most enemies ablaze. Enemies on fire will then continuously receive damage until they're dead.
* Shantae for a more "kiddie" series, but the difficulty of the gameplay has stayed low, leaving it underwhelming for adults.
* Shantae game had that little clown who likes to watch cute girls dancing, especially when there are many of them. Once Shantae manages to meet his request, he will proceed to get so excited that he rockets into the air, opening the path to the room behind him.
* Shantae game had these in the desert area near Oasis Town. They're long, durable, and look menacing with their mandibles and single eye, but they're mostly harmless since they just sit there in their hole in the sand.
* Shantae: Half-Genie Hero features a magic carpet race level where the player flies over the clouds. Falling during the race will not send Shantae back to a checkpoint, instead subtracting a small amount of health and sending her right back up (while holding her butt with a shocked expression on her face).
* Shantae harbours a secret admiration for the titular heroine and genuinely wants

to be friends with her, but never gets around to admitting it.
* Shantae has Giga Mermaid who is giant-sized, in contrast to the other mermaids which are the same size as humans.
* Shantae has Shantae adjusting to life as a non-genie, and fighting to get her magic back.
* Shantae, Hypno Baron summons a "creature of unspeakable horror" to ominous music... only for this trope to take place when the creature turns out to be Squid Baron.
* Shantae include humanoid monsters seemingly made of a tar-like substance which can merge in the ceiling/floors at will. A land-bound variation include a mass composed of female bodies clustered in a dogpile which attacks by clawing Shantae (if she's next to them) or by turnng into large jaws to bite her (if she's above).
* Shantae in combat, she can also transform into different animals by performing dances.
* Shantae is used by Shantae in this manner, letting her glide over large chasms or float around with the help of some updrafts.
* Shantae. It turned out that Bolo buried Shantae's clothes because he saw them lying on the ground and thought she had melted.
* Shantae jingle. Now you need to head back to Scuttle Town and see a doctor for a quick check-up. And naturally, for being a good patient, he gives you a lollipop.
* Shantae. Naturally, Shantae has to take it out near the end of the game.
* Shantae plays this straight. While performing a dance, everything in the background (including the enemies) will pause.
* Shantae plays with this. While no female main character wears completely sensible clothing, they tend to cover more skin then the villainous Risky Boots.
* Shantae popularity. Despite all this, based on his dramatic speech, his identity still manages to be a secret to most of his allies and enemies.
* Shantae series have an attack where they blow a kiss and little hearts float above them, damaging Shantae if she touches the hearts while jumping over them.
* Shantae series. In the first game, they would suddenly ambush your character while she walks past a corn field. In the sequels, they gain variations that breath out poison mist or throw pumpkin bombs.
* Shantae, she mentions that she especially wants to be friends with Shantae, but she always seems to drive her away.
* Shantae size after stripping Shantae of her pirate equipment, which leads to the True Ending.
* Shantae steals four elemental stones and Uncle Mimic's steam engine in order to create a steam-powered Doomsday machine.
* Shantae's title character has purple hair and she is a very powerful fighter, with both her transformations and said hair at her disposal.
* Shantae, suffered a similar fate and it wouldn't be until the third game that the series found financial success.
* Shantae that it was posted by an intern without approval, that Shantae as a character was never designed with the intention of portraying her as a minor, and that they never intended to do anything with Shantae's fanservicey elements that would make them or other people uncomfortable.
* Shantae, the eponymous young heroine loses some health and bounces back onto stage if she falls off during the Magic Carpet Race, holding on to her hurting butt.
* Shantae the tank's own projectiles back to it in order to destroy it.
* Shantae to having eaten an entire tub of cookie-dough ice cream before bed.
* Shantae to suck up Dark Magic, different kinds of smells, and various items dropped around the area.
* Shantae version was released, and the Steam Profile wallpaper that features them included their names.
* Shantae, was shown off, almost every fan called that the supposed Half-Genie Zombie, Fillin the Blank, was Rottytops. It doesn't help that WayForward didn't bother to try hiding it. Very few zombie girls even appear in the series prior to that point (let alone with green hair), Fillin isn't on the main art cover with the

other half-genies, her stitches and ears are conspicuously hidden, and Shantae herself already deduced it when Harmony informed her of Fillin using a different alias (Ima Goodgirl).
* Shantae when the Ammo Baron performs his invasion, with plenty of soldiers, Gatling guns, missiles, and mines to go around.
* Shantae, where the overworld map bears some geographical and topographical similaries to real life Turkey and certain locations, such as Cape Crustacian and Hypno Baron's Castle being located in roughly the same places as the Island of Bozcaada and the ruins of Troy, respectively.
* Shantae) who look completely normal aside from the green skin and stitches.
* Shantae who was the Scourge of Sequin Land before the genies sealed him in the past. In addition to being inherent to the Pirate Master, Dark Magic could also be created from Light Magic if the latter was used for evil.
* Shantaniqua Nykole Scott, the teen mom who tried to smother her son to "make her life easier."
* Shantelle Malawaski, best known for her work in various independents as Shantelle Taylor and in
* Shantelle Taylor (real name: Shantelle Larissa Malawski), a Canadian of Polish descent, was originally meant to debut in WWE's Cruiserweight division under a mask and body suit as a supposed Japanese competitor and
* Shan Yu is very likely to be the first Disney villain you fight. Although being a skilled and powerful swordsman puts him slightly above Clayton's level, he still ranks the lowest in comparison to the more supernatural Disney/original villains you fight in the other worlds.
* Shaojie Zhang one-shots a Sectoid with a pistol in his introduction scene. Then he throws away the gun to join the X-COM squad as an unarmed VIP who needs to be escorted to safety.
* Shao Kahn is another male example. The guy has the physique of a bodybuilder and normally wears little else than a loincloth, boots, shoulderpads, and a harness. He also normally wears a full-faced helmet,
* Shao Khan offers him to join him and conquer realms. Nobb demands him to name
* Shaolin Cowboy attached a chainsaw to the end of a stick to create a polearm. He used this polearm to fight against a shark which held a head in its mouth. The head held a knife between its teeth.
* Shaolin Mantis is killed when the hero brutally rips open his stomach and pulls out his guts, all over the place, but we as the audience only sees the shadow of that scene reflected on a white wall.
* Shaolin Martial Arts he gives to the Shaolin practitoners consists of him standing upright as his challengers throws punches at him, only to realize in horror that all their punches have no effect.
* Shaolin Martial Arts which sends him flying across a hall. In his death throes, he alternates between clutching at his bleeding eyes and his squished balls.
* Shaolin Martial Arts Wing Chun student kills a Shaolin student in a supposedly friendly contest, resulting in both sides repeatedly challenging each other, with a dozen deaths before the film ends.
* Shaolin Prince, after the titular Prince had killed the main villain and avenged his family's death, he actually relinquishes his throne to his younger brother instead, deciding that he's better off spending the rest of his life in the Shaolin temple where he was adopted and raised by the monks, and to become the new head abbot of the temple.
* Shaolin Soccer: After humiliating a bunch of toughs with his kung fu soccer prowess, the main character is confronted by a scrawny nerd who sketches out a kata while farting. The main character just tells him that he's pathetic and walks away, which reduces the nerd to tears.
* Shaolin Soccer a martial art, not just something old folks do in parks on Sunday mornings.)
* Shaolin Soccer, an all-female soccer team practically flies across the soccer field the way Sing and the others do, prompting this exchange:
* Shaolin Soccer" as opposed to the heroic Shaolin monks, who use their spiritual

martial arts.
* Shaolin Soccer as the underdogs. In spite of their martial prowess, they all became real losers in the real world, and have no experience playing soccer before the film begins.
* Shaolin Soccer did this by putting Kung Fu in soccer. In short, a bunch of superhumans playing soccer, and using Tai Chi as the stronger goalkeeper shot, blowing away all 11 players plus the goal post.
* Shaolin Soccer in slow motion like a badass longcoat would in such a scene.
* Shaolin Soccer in the beginning and is now working as an errand boy for his teammate now chairman who caused his injury. Also, the former Shaolin monks except one are working for a meager living.
* Shaolin Soccer just before facing their opponents in the semi-finals.
* Shaolin Soccer lookalike, wear the tracksuit and imitate some of his mannerisms.
* Shaolin Soccer; she starts off as rather plain with acne and when she tries to doll herself up she looks even worse. She's at her most attractive when she shaves her head to pass herself off as a boy, and it's her martial arts/goalie skills that ultimately win over the male lead.
* Shaolin Soccer shows up when they reach the point where they are one player short, and she and the main character combine their Kung Fu to make the ultimate shot and win the game.
* Shaolin Soccer shreds the opposing goalie's clothes clean off his body.
* Shaolin Soccer soccer superstar until the teammate he's been lording it over hires people to cripple the star.
* Shaolin Soccer, the eldest of the Shaolin monks is "Iron Head", who has a seemingly impervious cranium. His abusive boss repeatedly breaks bottles over his head to chastise his poor performance, with no effect.
* Shaolin Soccer: The monks are all creeped out by Mui's new, bizarre look and make jokes that she's a ghost. When Mui's overbearing boss arrives and insults her appearance, the monks all rush to her defense and castigate the employer, saying that she looks beautiful.
* Shaolin Soccer: The movie is about super-powerful but down-in-the-dumps kung fu practitioners trying to find a good use for their abilities. They end up becoming a soccer team under a former soccer player, Hung, and they use their powerful kung fu techniques to dominate the local soccer tournament.
* Shaolin Soccer, this was what Team Evil was going for in the title match against the Shaolin monks - rather than try to score goals, they would injure enough players to force them to forfeit by not fielding enough players.
* Shaolin Soccer when Sing demonstrates his kicking ability by kicking a beer can towards the sky later to be seen again on impact.
* Shaolin Soccer, when the replacement goalie makes a dramatic entrance and walks into the goal post... of the opposing team.
* Shaolin Wuzang, Tang sometimes slashes opponents with his sword, only to have them fall down afterward as if unconscious.
* Shao Ning makes a truly terrible attempt to disguise herself as a man while attending Qingming Academy. She doesn't even bother to remove her make-up.
* shaped into a patty. That was then cooked and served to food critics and chefs. They admitted that, while it was nowhere near as good as real beef, it still tasted a lot better than a soy fake. The biggest problem cited was the lack of fat within the "meat."
* shaped like a cross between an antique bee skep and a hornet nest like in many cartoons or illustrations portray beehives as being inside trees.
* Shaped Like Itself: Describing something as being like itself (e.g. a house-shaped house).
* Shaped Like Itself: Describing something as being like itself (e.g. a house shaped like a house, bread that tastes like bread, silk that feels like silk).
* Shaped Like Itself: Describing something as being like itself (e.g. a house shaped like a house, orange-flavored oranges).
* Shaped Like Itself: Describing something as being like itself (e.g. an elephant-shaped elephant, oatmeal that tastes like oatmeal, etc).

* Shaped Like Itself in St. Louis, after all), made up like an old-time carnival and no doubt lacking the safety or health issues that the original may have had.
* Shaped Like Itself: Literally no one cares about analogies. It is what it is.
* Shaped Like Itself — it has the body of a Gyarados and the face/head of a Zapdos.
* Shaped Like Itself: Something is described as being like itself (e.g. a house shaped like a house, a dog that smells like a dog).
* Shaped Like What It Sells: A shop's storefront or whole building is shaped to advertise the product it sells.
* shape). Engineers have known what the right shape for an airliner is since the 1950s or 1960s. Most of what's changed is underneath the shiny aluminium (or now, less-shiny composite) skin. (This may be changing, though; a $1.5 billion NASA program to design the airliner after the next saw every designer involved submitting a flying wing or blended-wing aircraft, rather than the venerable ME-262 profile.)
* Shape Quest follow this, specifically when they are forced to use physical combat against one another.
* shapers (they chop off the originals in a religious ceremony) that are equipped with various tools such as blades, pincers, and exotic sensory apparatuses to help in their work.
* shapeshifter animal", turns into "legal tender" to buy something but finds he can't change back and gets blown away, and gains the ability to turn into "almost anyone"—as in, he can turn into about half a person.
* Shapeshifter Baggage: Some forms are smaller/larger or lighter/heavier than others.
* Shapeshifter Baggage: The image is parodying the trope by showing an aversion, in which a giant shapeshifting monster is unable to shrink down to the small size of an actual human baby.
* Shapeshifter Default Form form falls over and the "original" chunk of biomass that is her plops out looking just the same. It's difficult to rule it one way or the other as it's never fully explained in the game.
* Shapeshifter Default Form. Its inner mouth is used to suck out people's emotions.
* Shapeshifter Default Form: Whatever form they're usually seen in when not actively using their powers.
* Shapeshifter Guilt Trip: A shape-shifter manipulates someone into sparing them by taking on the form of a person their attacker cares about.
* Shapeshifter Guilt Trip during battle, to mentally break the opponent down.
* Shapeshifter Identity Crisis: Mental instability causing you to transform into whatever identity/persona is currently dominant in your mind.
* Shape Shifter Identity Crisis: When a character that can shapeshift loses their sense of self and thus also control of their abilities
* shapeshifter in "Monster Movie" also gets some pretty great moments. Particularly the bit with the delivery guy.
* Shapeshifter Mode Locked as a hawk in the first book, and by the third he's already starting to forget what he looked like as a human. Fortunately this is alleviated a little by his human friends, as well as the fact that he eventually regains his human form, albeit only for two hours at a time. However, even late in the series, Tobias thinks and acts like a hawk, even when in human form. One of his tells others mention is that he always squints as though he can barely see the world around him.
* Shapeshifter on set, so the ones that do tend to turn into only one or two different animals (just use the same trained one). Characters who turn into something monstrous tend to spend as much time as possible as a human. The shapeshifting effect itself may be obscured or offscreen, and when it isn't, it will usually be a quick "morph" effect.
* Shapeshifter planetary population). Her only response to being told "That's going to take some time." is "Then I suggest you begin at once." Fortunately, our heroes manage to prevent it being completed (in part because most of the guards at Dominion HQ were sent out to kill Cardassians), but over eight hundred million are

still killed during the attempted genocide.
* Shapeshifters also tend to mate with human partners. A male shapeshifter has sex with a human woman, and the child is born a shapeshifter with little control over their abilities during their childhood. In some cases, the shapeshifter may even
* Shapeshifters, and then retaining their youthful appearance for the remainder of their lives.
* shape shifters but as shapeshifters can appear completely human if they have a human form among their personal cache of possible forms.
* Shapeshifter shed their nails allongside skin and hair when they're shedding an old form to don a new one, something we see up close in the monster's
* "Shape-Shifters" is an action oriented military story with werewolves and little to no comedy.
* shapeshifters like Jimmy T., who can voluntarily change form in a short period, or those who transform involuntarily more or less instantaneously at varying times, such as Reach, Chimera, Fling, or Heyoka.
* Shapeshifter Swan Song: Become ALL of the things!... one after another. In rapid succession.
* Shapeshifter Swan Song: Shape-shifter takes on various forms as they die.
* Shapeshifter Swan Song: Uncontrolled transformations triggered by a critical (or fatal) injury to the shapeshifter.
* Shapeshifter Weapon: A shape-shifter creates a weapon by turning themselves or part of their body into one.
* Shapeshifter Weapon. As it puts it (as it turns its limbs into a sword and a snake), it's not human, so why should it limit himself by fighting like one?
* Shapeshifter Weapon that also improves the wielder's leadership abilities.
* Shapeshifter Weapon: Using your shapeshifter powers to create weapons from your own body.
* shapeshifter, who ends up permanently taking the form of a catgirl complete with ears, paws, tail, and a fur dress.
* shapeshifter, with a multitude of forms and identities, some of which are specifically assumed to be comforting to others.
* Shapeshifting aliens are a recurring menace, though they don't need to kill someone to take their shape, they often do to avoid complications. The alien bounty hunter is probably the most notable example.
* Shapeshifting, and often ply their powers for fun and profit (whether good or evil), or simply to trick or play practical jokes on normal folks.
* Shapeshifting Bahamut, and those canaries were all great wyrm gold dragons in disguise.
* Shapeshifting Excludes Clothing: A shape-shifter who loses their clothes when assuming a form that their clothes cannot fit.
* Shapeshifting Excludes Clothing: You may have changed, but your clothing sure didn't.
* Shapeshifting Failure: When shapeshifting doesn't quite work properly.
* Shapeshifting Heals Wounds: Going from one shape to another fixes the damage taken by one form (although it may still be there on returning to the original form).
* Shapeshifting into a humanoid form (usually human or elf) is a common ability among dragons in the series. Some demons can do this too.
* shapeshifting into The Beast, then yes, all the Titans had an Evil Costume at some point or another.
* Shapeshifting Lover, if male, may be hideous before the change, and a hideous old woman may be enchanted and truly young and beautiful.
* Shapeshifting — which, incidentally, is also how diseases spread.
* shapeshifting powers may also have been an attempt to avert this, allowing the character to be present even when Quinto was unavailable.
* Shapeshifting Seducer: Shapeshifter trying to get in your bed? It'll just turn into the most desirable person you've ever seen.
* Shapeshifting Seducer with Alcmene, mother of Heracles. But he has also gone after mortal women as a bull, a swan, and a "shower of gold."

* Shapeshifting seems to have been Zeus' standard means of seducing mortals. Hercules' mother, for instance, thought she was sleeping with her husband. That's an example of his most
* Shapeshifting Squick folklore who seduced men, then turned back into foxes after a one night stand.
* shapeshifting within the fandom tends to resemble the dragon form he has in the show.
* Shapey Puppington has all the hallmarks of developmental disability. He is
* Sha Po Lang (known in the US as "Killzone") kicks off with the murder of a witness ordered by a Triad crimelord so that his testimony could not be given and the crimelord would be set free. This sets four cops against him, all with their own reasons for wanting to take him down.
* Shaq and Kobe's Lakers, particularly the 2001 team. The Lakers were Badass with 3 straight titles, but the personality clashes between Kobe and Shaq didn't exactly make for a good working environment.
* Shaq Attaq shows Shaquille O'Neal as 30 times larger than the other players, effortlessly crossing the court in two strides while holding a minuscule basketball between his thumb and forefinger. Needless to say, the Square/Cube Law doesn't even get a passing glance.
* Shaq Attaq than everyone else, crossing the court in two strides while holding a minuscule basketball between his thumb and forefinger.
* Shaq, on a commercial for his show "Upload." After making the joke that the clips on the show would be "funnier than his free-throw percentage" (accompanied by a clip of him missing an actual free throw), he deadpans to the camera, "Who wrote that?"
* Shaq), one of the best players in NBA history, had an infamously poor free throw percentage. The best way to keep Shaq from steamrolling you was to intentionally foul him, forcing him to shoot free throws that he'll probably miss. This tactic became known as "Hack-a-Shaq." Interestingly, Shaq was a consistently decent-to-good free throw shooter in practice throughout his career; something about the pressure of being put on the spot in a game situation always threw him for a loop.
* Shaquille O'Neal and Kobe Bryant spent 8 years together on the Los Angeles Lakers knowing they each would be more likely to win with the other around, but finally, in 2004, the team fell apart in the Finals largely due to their feud and it was obvious one or the other had to go. Both men did end up winning a title or two afterward though. After both men retired from the NBA, they made an effort to mend fences and were on good terms until Bryant was tragically killed in a helicopter crash. O'Neal was devastated by the tragedy and served as one of the speakers during Bryant's public memorial service.
* Shaquille O'Neal anyone? Within his first four years in the NBA, Shaq released two rap albums, starred in two movies, had his own video game, and appeared in commercials endorsing Pepsi, Taco Bell and more. Years later, he would go on to do even more endorsements, get his own reality TV show, release a couple more albums, and make cameos in video games. Shaq has been everywhere, and this isn't even getting into his basketball career.
* Shaquille O'Neal. He and his team show up and were apparently tech-based superheroes when they weren't working at being the best in basketball
* Shaquille O'Neal is widely recognized as one of the best centers in the history of professional basketball who often used his size (over 7 feet tall and over 300 pounds) to overpower opponents on the court. As of May 2012, it's now Dr. Shaquille O'Neal, as Shaq has earned a doctorate in education, which he earned with a cumulative GPA of 3.8. He also attended film school, and is currently attending law school, simply because he thinks it's fun. Shaq may be the only man in the world with a PhD, a platinum album and an Olympic gold medal. Shaq is also a savvy businessman, having made large of sums in real estate, and was one of the original investors in both Google and Vitamin Water, both of which became enormous successes.
* Shaquille O'Neal, largely because they couldn't find a stuntman to match his size.

* Shaquille O'Neal. Or, for that matter, basically any woman who stands next to him.
* Shaquille O'Neal, though has dabbled in acting, rapping, and broadcasting)
* "Sharada" by Skye Sweetnam is about a girl who acts out-of-the-norm and constantly has her head in the clouds:
* Shara is another empire nearly as big as Seanchan on the opposite side of the world; it's mostly alluded to throughout the series without really being described, but
* Sharamudoi: Masculine names end with an -o or a -do according to which half of the tribe its bearer belongs to. Feminine names end with an -io.
* Sharan is described as sounding like "all the music was gone from her voice."
* Sharashka, his FOXHOUND codename is "Revolver Ocelot", and when he's supposedly possessed by Liquid Snake's spirit, he changes it to Liquid Ocelot.
* sharashka meaning saber. It still doesn't explain how the 'l' got in there.
* Sharashkas, special prisons in the Soviet Union's Gulag System. As seen in
* Shara, Yu's mother reveals to her that she's actually her aunt, and adopted her as a baby from her sister-in-law. Yu takes it in stride and keeps thinking of her aunt as her real mother.
* Sharaz Jek and Morgus are almost Shakespearean in their furious ranting and scheming asides, respectively.
* Shard abilities that are required to move through the castle (such as Craftwork's hand) consume very little mana on use, so a player won't find themselves stuck. Other abilities, such as inverting or traveling underwater, don't require mana at all.
* Shard: Aero and the other inhabitants of Totum are residents of the distant past, who find themselves in the present day of Remnant. They manage to adapt relatively well, all things considered.
* Shardblade becomes a landed noble, regardless of birth. In fact it's suggested that having Shardblades or Plate is how the noble houses came about in the first place.
* Shardblades, or at least the dead ones. Surgebinders can hear them screaming in agony when they touch them, because they are stuck at the moment when they were "killed" to keep themselves solid. They have to be revived every time they are summoned, which is why they need ten heartbeats.
* Shard: Even in the face of all of Remnant's technological advancements, Aero ishighly amused by an ordinary swivel chair, gleefully spinning on it and declaring it, "[...] the greatest thing of all time." To be fair, he does admit that such things as air conditioning and indoor plumbing are more impressive.
* Shardik features a bear which is believed to personify the power of God. Whether or not this is true, the bear only ever seems to maul the bad guys.
* Shardiks. Start something with them, and you may find an interstellar war coming at you. Start an interstellar war with their friends, and you may find your species extinct.
* Shard: In the prologue, Rize tells Aero point-blank that he doesn't believe in souls, despite it being established in-universe that a person's Aura is the manifestation of their soul.
* Shardlake series by C J Sansom has the lawyer Matthew Shardlake solve mysteries in the Tudor court of Henry VIII.
* Shardlight since they believe it would piss off the Reaper by messing up his plans.
* Shard never actually died; she was transported to the distant past and ended up in Totum.
* Shardra, the iconic shaman, is a trans woman more interested in history than anything else who has been
* Shards of a Broken Crown, Tomas, Pug, Miranda, and Nakor need to get to the enemy stronghold. Standing in their way is the second-largest army in the world. Being the most powerful warrior and the three most powerful magicians in the world, they walk through men and fortifications almost as if they weren't there: arrows bounce off of magical shields, soldiers get pushed out of the way by waves of energy,

barred doors are pushed open as if they were unlatched, and so on.
* Shards of Alara based on the acquisition of sigils, which are marks of great valor and honorable conduct.
* Shards of Alara. Grixis is similar to Old Phyrexia: cut off from green and white mana, the sources of life, it's a dying world infested with armies of the living dead, which fight furiously over the limited (and dwindling) supplies of life force, and even that apparently tastes like stale water or air. Jund is a world cut off from blue and white mana, the sources of order, and is a wild, volcanically active jungle filled with canyons, with dragons and similar beasties on the top of the food chain, and everything trying to kill you on the way up or down. On the bright side, the life magic is strong enough and the food chain is so horrifyingly efficient that there are no undead.
* Shards of Alara plane plays host to such a plight. In a world bereft of white and green mana, the last traces of humanity are left to fight a hopeless battle against demons, necromancers, and armies of undead.
* Shards of Alara set employs a rigid caste system based on the acquisition of sigils, marks of great valor. While it is possible to move up depending on how many sigils one obtains, it's still monumentally difficult. The lack of black and red mana — meaning virtually no magic can cause unnatural deaths or aimless destruction, but at the same time no magic that supports ambition, desire, or emotional contentment — doesn't help.
* Shards of Alara. The Tarkirian clan known as the Temur Frontier has a similar effect, although it's tuned down to just 4 power instead of 5 and doesn't seem to consist largely of adding keywords to giant monsters.
* Shards of a Memory, Shredder had convinced Karai that Tang Shen would have killed her at infancy rather than "stay" with her and Oroku Saki.
* Shards of a Memory: When they were younger, Leonardo fell sick. Struggling to vent his feeling of worry over his brother constructively, Raphael would snap at Donnie and Mikey, later taking it out on a practice dummy under Shard's instruction until Leo got better.
* Shards of Honor: Aral takes a "little blue pill" from his first aid kit to keep him on his feet while recapturing his ship from the mutineers who had tried to kill him, and seized control of it.
* Shards of Honor, Cordelia and Aral Vorkosigan's first meeting is laced with these. An unexpected meeting between his squad and her survey team turned into a firefight, which would be bad enough on its own (the Betans were unarmed non-combatants), but by the time they catch up with the Barrayaran forces a few days later, they are in the process of torturing a mute, brain-damaged Betan prisoner to death.
* Shards of Honor. Cordelia attempts to order him to attention so she can give him a sedative. It doesn't go well.
* Shards of Honor, Cordelia gets captured by the Barrayarans near the end of the 120 Days War and interned in a POW camp while the negotiations happen for her and the other prisoners to be repatriated. She hears some nasty stories about what it was like earlier in the war, but her own time there is fairly uneventful because the end of the war comes with a new commander who is serious about treating prisoners properly, who winnows out the guards who were mistreating prisoners and has the former camp commander executed for letting things get out of hand.
* Shards of Honor, Ezar hangs on just long enough to see Aral confirmed as Regent, after which he finally succumbs to his long illness.)
* Shards of Honor focuses on a shuttle crew recovering bodies in Escobar orbit after the big battle.
* Shards of Honor, Konstantin Bothari is a mentally ill soldier with a troubled past, and used as a torturer/rapist by a sadistic admiral. Cordelia (as a prisoner of war) observes that "there are two victims in this room".
* Shards of Honor, the Barrayarans cover their retreat from Escobar by having a ship self-destruct in the middle of a wormhole, making the wormhole unusable for weeks afterward.
* Shards of the Exalted Dream known as a Godcannon. Its minimum strength

requirement of 2 means that with a little bit of strength-boosting, you can dual-wield guns with 4-foot barrels and firing chambers the size of a torso.
* Shards of the Exalted Dream social or mental stats, and the general assumption is that any NPC of significance is going to be a black belt.
* Shards of the Exalted. It's full of ghosts, and feeds on a mixture of fear and wreckage.
* Shards of the Exalted of Hannibal Lecter, revels in this trope. When people come in to ask him questions about Primordial metaphysics (which, when you're engaged in reshaping one into a war engine, is sort of a big deal), he tends to provide less unpleasant unforeseen consequences when advising people who discuss philosophy with him or sing him an aria from the latest opera.
* Shards that are in finite supply (such as boss attacks and the Silver Knight familiar) cannot be sold.
* "Shards To a Whole", including some mild bondage and cosplay. At one point Tony DiNozzo sees them in action and freaks out.
* Shard when he and his wife suddenly passed away in January 2017 from carbon monoxide poisoning.
* Share Bear's, it was changed to two lollipops, so as not to encourage kids to spread germs.
* shared an anecdote. Erickson considered writing a clarification, but decided he'd rather be mistaken for gay than mistaken for a homophobe.
* Shared Continuity — more common nowadays, this spinoff generally carries no characters over from the show that spawned it, though both are in the
* Shared Dream, the Magi are all warned in a dream about Herod's malicious intentions while they're traveling to meet the baby Jesus.
* Shared Dream: Two or more characters share the same dream or nightmare.
* Shared Family Quirks: Family members tend to have similar behavioral traits.
* Shared Mass Hallucination: Another semi-plausible explanation designed to cover-up a strange event.
* Shared Universe: A single setting where different stories, from different authors, all take place.
* Shared Universe debuted the following year, making them the first American series with a shared continuity.
* Shared Universe, especially title character Ed Crankshaft, who is hospital-bound and near death.
* Shared Universe in comics by Image while the artists cannot use the Image characters while doing their comics in another studio.
* Shared Universe. It is music-themed, and features Cadance as the princess (after both Celestia and Luna were corrupted), Octavia as her student, and Vinyl, Fluttershy, Lyra, and two background ponies as the other Element Bearers.
* Shared Universe Merovingen Nights books where the setting is Merovin, a former Union colony that was abandoned to an alien species, the Sharrh. There was an evacuation, but some of the colonists hid from it and somehow survived the planetary bombardment the Sharrh performed to ensure no human presence remained. The Sharrh haven't tried to colonize Merovin themselves, so the descendants of those recalcitrant colonists are still there at a medieval stage of technology, cut off from the rest of human civilization.
* Shared Universe: Multiple works of fiction are set in the same overall continuity, which allows for occasional (fully canon) crossovers.
* Shared Universes focuses primarily on the villains. And then, a lot of the heroes aren't all that heroic....
* Shared Universe would probably not take off (both Kirby and Ditko being too individualistic in style to really cohere together without Lee). None of the key creator's solo efforts (Lee's, Kirby's, Ditko's) matched the impact of their "Marvel Method" collaborations.
* share Hayate with Hinagiku... or is that share Hinagiku with Hayate?
* Share My Story: It's bad enough that Clara cheated on the protagonist with Brandon, but at school, everyone laughs at him over what happened and, to add insult to injury, Clara and Brandon kiss in front of him during class time.

* Share My Story: It's implied that Brandon only got together with Clara to spite the protagonist.
* Share My Story. When Clara tells the protagonist that she got with Brandon behind his back and they are in a relationship now, she is in tears. However, that does not stop her from kissing Brandon in front of him.
* Share Phrase: Multiple characters, or even all of them, share a catchphrase.
* SharePhrases to do with technology: "[rank]'s log" (or "[rank] [name], personal log"), "Computer, locate [person]" (to which the computer responds, "[person] is (located) in/on [area]", "There is no [name] aboard [ship name]", or "[person] is not onboard [ship name]"), "[name] to [name]", "[name] here", and "[food/beverage]. [adjective]" (when using the replicator).
* Sharers are meant to use their power for healing, but the potential to use it for the opposite also exists.
* shares a first name clique... and nothing else. She does wear a skirt, but she gender-neutralizes it with her very masculine boots, coat, and hat. She has pigtails though, so she's not completely neutralized.
* Shares From Your Aunt, as well as many other news outlets and social media users.
* shares her red hair, tanned complexion and facial structure with her father Shanks. However, her most striking feature — her yellow eyes — immediately let Garp identify her as Mihawk's niece.
* shares the name of the most famous Pony until G4. But he's not called "prince" for nothing.
* shares traits with both of his parents, such as a passion for sewing from his father Kanji and detective reasoning along with a strong sense of justice from his mother Naoto, and was training to become a detective like her before being charged for assault.
* shares with Kanaya; the contents of daveisafunnyguy.txt are not shown, but Kanaya assures us that she is Laughing Pretty Hard At All That.
* share their art sharing site Pawoo), no doubt you will find them there within a week or two.
* Share the Male Pain: When a guy gets hit in the privates, it makes other men's privates hurt in sympathy.
* Shareware: A game that can be played to a certain extent without purchasing it. Buying the game will allow the player to play it to completion, instantly picking up exactly where they left off upon purchase without the need to install anything.
* Shareware: A popular form of game distribution, especially during the 1990s.
* , shareware "Scientific Romance Role Playing Game" by Marcus L. Rowland — as the name says, it's designed for this sort of adventures.
* Shareware still need to be unlocked by later infusions of cash. Some companies (particularly Ripened Peach) are supplementing this with (again) ongoing content releases, not to mention user-built stuff.
* Sharik from Russian fairytales. His sister was abducted by a dragon, and her other brothers went to him first, trying to get her back. Said dragon lives in a big house that awes the brothers, serves them "food" of brass and iron which they can't eat naturally and "offers" them to give the sister back if they manage to destroy a huge log without either axe or fire. Which they can't, naturally, so
* Shari Lewis sketch has Lamb Chop with breasts made out of ping-pong balls; in an outtake one pops out and rolls away; the resulting horrified expression on the puppet is priceless.
* Sharing a Body and that they clearly had some kind of pre-arranged agreement to meet in Mistral should something happen to Ozpin, using the cane as a means to identify Ozpin's new host body.
* Sharing a Body with a human from Earth, is very impressed with her host's magic tricks.
* Sharing a common console can also bring together third-party fanbases as well. Chances are that most
* Sharing a pizza-sauce recipe with the woman who later became Mama Celeste;
* Sharin no Kuni all three heroines have a unique nickname for the protagonist, Morita Kenichi. Touka always calls him by his full name, "Morita Kenichi". Sacchi

calls him "Moriken", a mashing of his first and last name. Natsumi calls him "Ken-chan" because they are affectionate childhood friends.
* Sharin no Kuni and shows little if any overt interest in any females on top of it.
* Sharin no Kuni is like this depending on who he's talking to. He more or less leaves Natsumi alone, but Kyouko points out fairly early that he's going to keep messing with Touka as long as she keeps reacting. This trope probably also applies to Isono.
* Sharin no Kuni. She's actually nearly at genius-level IQ but you wouldn't know that from looking at her.
* Sharin no Kuni, since the setting has existing laws which can impose a literal prohibition of falling in love, to which she is subject.
* Sharin no Kuni sort of game, though, there is no sex scene for this.
* Sharis, Tillfur and Noct are a platonic example. They first met due to connections between their parents, and grew so close that in the present they're collectively known as the Triad and can always be found together.
* Shark as much of a dick as some of the defense attorneys he went up against.
* Shark Attack 3: Megalodon's infamous adlib "what do you say I take you home and eat your pussy?".
* Shark Attack 3: Megalodon, the main character invites a woman over for one of these.
* Shark Attack: A freak record of shark attacks are plaguing a South African fishing town. It does vary it a bit, showing other species such as Tiger Sharks and Makos besides the familiar Great White.
* Shark Attack: It turns out that the mayor is responsible for the surge in shark attacks (who were spiked with hormones that made them more aggressive), as he intends to drive down real estate prices so he could buy out the whole town.
* Shark Attack: The bad guys murder a researcher who was digging up too much information on them by throwing him into a lake with a bunch of hungry sharks.
* Shark Boys are pink. But if you're color blind, Shark Girls also have pig tails.
* Shark Boy when he was called up by WCW. He had a toothed mask and would get stuck to those he bit.
* shark characteristics and worship Sekolah, the god of sharks. The sahuagin's most hated enemies are the sea elves, either despite or because of a strange connection between the races - about 1 in 100 sahuagin is born a mutant called a malenti, and appears indistinguishable from a sea elf. Those malenti that aren't eaten by their parents are raised to be infiltrators that work to undermine sea elf communities before an attack.
* Sharkenstein: After a female farmer finds Sharkenstein attacking her cattle, she chases it off with a shotgun. In her next scene, she's shown to have gathered a bunch of people together to hunt it down. They don't seem to question her telling them that they're going after a shark monster.
* Sharkenstein: After Duke, Coop, and Madge get away from Sharkenstein on the dock, one of them flips it off.
* Sharkenstein: After Sharkenstein and Duke are blown up in the lighthouse, Madge declares the nightmare will never be over, walks back to the dock, and has a seat in a chair. Then Sharkenstein leaps out of the water right at her.
* Sharkenstein Frankenstein movie in existence. She also knows that the original novel ended differently from the movie.
* Sharkenstein into Sharkenstein after he takes the latter's brain out.
* Sharkenstein shark out of the body parts of several different sharks, and planned to put the brain and heart in it. His ultimate end goal was to create an army of Frankensharks to sic upon the world.
* Shark episode featured a serial killer named Wayne Callison dismissing his lawyer and making his own defense against five murder charges and an attempted murder. Prosecutor Sebastian Stark feared having no lawyer would help Callison look innocent.
* Sharkey's Shootout against Jeanette Lee, which features a four-ball multiball called "The Web".

* Sharkey's Shootout has a nickname, either as an identifier or reflecting their specialty:
* Shark Fin of Doom: A shark's dorsal fin sticking above the water as an iconic image.
* Shark has elements of this. He's a very successful lawyer, but the mock courtroom in his basement is stocked with items from both famous trials and famous movies about trials.
* Shark is especially fond of doing this to his underlings in the Prosecutor's office, usually keeping the same tone of voice for both the important and non-important instructions.
* Shark Island by Chris Jameson, a team of scientists mucks about with acoustic signals to control seal patterns, which also happens to make the great white sharks in the area become highly aggressive killing machines.
* Shark, Jessica's old friend Laura Fields, a medical examiner she's worked with for years, gives her word on who killed a reporter. The problem is, the supposedly sure suspect has an airtight alibi. Another M.E. says there's something wrong with this report as it turns out the reporter had been investigating a man in prison who's long claimed innocence in a murder where Fields was the M.E. It turns out Laura killed the reporter herself before she could expose that Fields had faked the evidence in that earlier case. Jessica is hurt by this but still wants to back Laura as making a mistake...until, at the trial, Laura throws Jessica under the bus by claiming that not only was she fully aware of this when prosecuting the man but even encouraged Laura to lie about it so Jessica could get the win. Jessica is rocked by how her "friend" is ready to ruin Jessica's career just to save herself.
* Sharknado 2: The Second One lost her head and nearly killed the protagonists.
* Sharknado 2: The Second One. They got stuff for weapons in Times Square, the Statue of Liberty got her head knocked off, and Fin ate a slice of New York pizza at the end.
* Sharknado 2: The Second One, while everybody is running for their lives, a snobby rich guy drops his briefcase and doubles back for it, despite the others telling him to leave it. As a result, he gets crushed by the falling Statue of Liberty's head.
* Sharknado 3: Oh Hell No!, when Fin, Nova, and Lucas try to enter a military base, Fin introduces himself as Fin Shepard, a personal friend of the Commanding Officer and the hero who saved the day against the previous two sharknadoes. The guard says, "And I'm the Easter Bunny!" Fortunately, the Commanding Officer shows up.
* Sharknado 5: Global Swarming, the guards in London remain stoic and don't move during a Sharknado. Fin yells at them that protecting the Queen is their job, which finally gets them to move and gun down several sharks.
* Sharknado 5: Global Swarming, who explains that after fighting and surviving on his own for years, he's found a way to time travel to assist Fin.
* Sharknado. After a little scrape with a sky-fallen shark, the heroes' gas tank ruptures; the protagonists immediately bail out, and sure enough the car explodes with no further provocation. Nothing's around to actually spark the fuel, and the engine's stalled, but none of that matters. Gasoline = explosion.
* Sharknado and its sequels. Frequently pieces of people are chomped off (heads are a particular favorite), but several times people are swallowed whole. In a few cases, they even survive the experience.
* Sharknado), and while it's not clear, it seems Nova is going to hook up with their son Matt, who is closer to her age.
* Sharknado between Nova and Matt, even though she had been infatuated with his father, Fin, up until meeting him. She's probably closer to Matt in age.
* Sharknado hit the following movies, with bigger Sharknados that get "enhanced" with environmental effects (including nuclear radiation) and even are used for time travel!
* Sharknado, no-one being chased by the rolling dismounted Ferris wheel thinks to run sideways.
* Sharknado that no one will be afraid of the dark, or water, or wind, as a result of it.

* Sharknado: The 4th Awakens to revive Fin. They at least position the sharks where you are supposed to place the paddles, and Gilbert performs CPR in between each shock.
* Sharknado used a lot of stock footage from shark documentaries that is hilariously out of place, like showing footage of a shark in a wide open ocean when the heroes are fighting sharks in waist-deep water. Also, a montage of the gang driving through a flooding LA is cut with stock footage of monsoon-devastated Asian countries.
* Sharknado uses this trope to come up with what may be the first shark movie fatality caused by a whale shark.
* Shark Night A group of college students spends a weekend at a lake which has inexplicably become home to various man-eating species of sharks. The kicker? The sharks were supplied by a couple of rednecks who want to cash in on the Discovery Channel's Shark Week craze...by feeding college students to the sharks, and recording video footage of the attacks to post online, sell to various channels, etc.
* Shark Night, Sheriff Sabin tries to lower Nick into one of these. Nick sets him on fire and he falls in instead. The fire gets put out, but he's devoured by a sand shark.
* Shark Night: The main villains are making these by feeding people to sharks with Frickin' Video Cameras strapped to them.
* Shark Pool: A body of water filled with any variety of unpleasant creatures, including but not limited to sharks
* Shark Pool (who died in 15 BC) had his slaves fed to lampreys when they displeased him.
* Shark: Pretty much every main character is an example. Bonus points for doing this whole hitting different age groups.
* Sharks and other fish are often drawn with some of their fins missing. Usually only the pectoral, dorsal, and caudal (tail) fins are shown while the pelvic, adipose, and anal fins are left out.
* Sharks and rays are highly intelligent, on the level of most mammals, including coordination and tool usage:
* Sharks and rays' Pelagic language is based on scent and pheromones. Only pisceans and scream dragons are capable of learning it.
* Sharks are, of course, some of Ecco's natural enemies, and tough ones, to boot. One of the crazier levels from the first game is Open Ocean: you, a lone little dolphin, vs. about a million sharks, with nowhere to hide. The Open Ocean is cold and dangerous.
* Sharks are well known for their ability to follow even the tiniest traces of blood in the water over miles. However, they can not smell blood that is dropped into the water any distance away until the currents create a trail the shark can actually pick up and follow.
* "Sharks. Assassins. Nuclear Bombs. Alex Rider’s in deep water." —
* sharks, dolphins, and platypuses are able to detect the electrical energy generated by the nervous system of living animals using their ampullae of Lorenzini, effectively functioning as a "life-detector".
* Sharks don't roar. And they would never slam their noses into glass hard enough to break it, since their noses are extremely sensitive.
* Shark! Shark!. Its weak point is its tail, which the fish can attack repeatedly until the shark goes belly up.
* Sharks have a similar weakness: if you manage to flip one upside down, it will enter a state of "tonic immobility" and become paralyzed. Some orcas managed to figure this out to hunt sharks, as long as the sharks are small enough to be flipped over, leaving them helpless as the orca kills it, then the pod feasts on its nutritious flesh, especially the liver. Many sharks also must constantly swim forward to bring more water into their gills. If they're unable to do so for any reason, they'll drown.
* Sharks infamously go into feeding frenzies, often triggered by finding large concentrations of prey animals and/or smelling blood.

* Sharks. It is believed that some great whites still swimming the seas today are centuries old. A great white shark is believed to keep growing until it's killed, and since any that die of old age are likely to get eaten before humans can look at them
* Shark's killer Wayne Callison just used his garage. The only inconvenience that caused was having to park his car in the driveway. Disposing of the bodies was slightly more problematic, but only slightly.
* Sharks such as oceanic whitetips are infamous for this, as are piranhas in a feeding frenzy. To be fair, their reputation for this far exceeds the reality, although both really will attack wounded prey
* Sharks. They evolved during the Ordovician Period, sometime between 455-425 million years ago. That means they've lived through all five of the Earth's mass extinctions, including the aptly named Great Dying, which saw 95% of all other marine life wiped out. In fact, they seem to have only gotten
* Sharks. They've survived since the Silurian period of Earth's history (which was 443.4–419.2 million years ago) and are still kicking today. For reference, they have so far survived four
* Shark Tale actually does a decent job as the voice as opposed to just acting like himself into a microphone like the rest of the cast did) and have stated that he should've been the protagonist.
* Shark Tale also suffers from this problem, with the plot being about a car-washer who gets praised as a hero for supposedly killing a member of the mafia and having little to do with the characters being fish in an underwater city. Except for providing a source of puns, that is.
* Shark Tale are Angie's favorite, and Oscar gives them to her on a daily basis at their work at the Whale Wash.
* Shark Tale are played by actors who never did voice acting before. You can even say that one of these are the ONLY time they acted.
* Shark Tale as the characters. The first dub, with regular voice actors, was originally aired at the Venice Movie Festival in 2004. TV airings randomly switch between the two dubs.
* Shark Tale, a worm is cast into the sea as bait. Its cheeks flap rapidly until it lands in the ocean.
* Shark Tale con-fish with a desire to be rich and famous and a tendence to make impulsive and selfish decisions, but still does anything to make his wrong deeds right again for his friends.
* Shark Tale continues the trend with its piscatorial metropolis. Sharks are the mafia, the protagonist works at a whale wash, and news is covered by Katie Current.
* Shark Tale despite (or perhaps even because of) constantly abusing Oscar during their short-lived relationship.
* Shark Tale does it when seahorse Lucky Day trips and loses the race.
* Shark Tale: During Frankie's funeral, the elderly leopard shark Don Feinberg tells Don Lino that he has some news. Feinberg farts, and a big green bubble pops under the orca behind him, who faints. Lino then gets up from his chair and decides to talk with Feinberg by the window.
* Shark Tale ended up to be the worst reviewed Dreamworks movie of all time, but ended up as a box office success.
* Shark Tale Features a subversion of this trope though, a vegetarian shark who actually gets nauseated at the very taste of a fish.
* Shark Tale followed suit, with errors such as Oscar's mouth, eyes and fins moving without his body or face, or the jellyfish's tentacles being as straight as dry spaghetti.
* Shark Tale has "Coral Cola", Newsreef (Newsweek), Kelpy Kreme Donuts (Krispy Kreme), and "Gup" (Gap).
* Shark Tale has Lenny the shark pretend to be a dolphin so that he can live his life as a vegetarian, and be accepted by the fish. Dolphins eat fish as well.
* Shark Tale has Lola's paradoxical line, "Deep down, I'm really superficial."
* Shark Tale in the whale wash he works at, only to realize he trapped Lenny by mistake. Once Oscar realizes this, where else should Lino appear?

* Shark Tale, Lenny lets it slip to Sykes that Oscar is a phony. Sykes is horrified to discover this (earlier, Sykes joyfully told Lino, the head shark, to shut up), and begs Oscar to say he is a real Sharkslayer. Oscar admits he isn't, then realizes that the sharks don't know he's a fraud and gets the idea to keep his charade long enough to rescue Angie.
* Shark Tale — and indeed, not even caring about her well-being in general for most of the film. Fast forward to the film's climax, he suddenly does care about Angie in a romantic light and the two share a kiss, as if the writers felt it was mandatory for them to become a couple.
* Shark Tale: one of the jellies finally gets the Whale Wash slogan correct just as he spots Don Lino chasing Oscar headed straight towards them.
* Shark Tale: There are billboards for Coral Cola and Gup, among others. Some are so close that they actually required permission from the real companies, turning parody into product placement.
* Shark Tale to consume them, such objects do have a tendency of ending up in their stomach.
* Shark Tale underwater setting is a sushi bar. It then cuts to the inside as the music stops, showing that it's completely devoid of customers and the owner is frustrated.
* Shark Tale: When after spending most of the movie as Oscar the "Sharkslayer's" manager, and making lots of money off of it, Sykes is horrified to discover that Oscar is a phony, particularly after...
* Shark Tale when Oscar and Lenny were faking a fight, Lenny got carried away and accidentally trapped Oscar in his teeth. When Lenny said he was sorry, Oscar used this as an example of what 'Sorry' really is to him.
* Shark Tale with Ernie, Bernie and Oscar. They end up doing it twice in a row.
* Shark Tank had lawyers compete for celebrity clients. One prospective client prompted Alan Dershowitz to say "You're everything I want in a client. You're famous, you're definitely guilty, end of list."
* Shark Tank" one of the Tol Barad Peninsula daily quests, players are sent to fight a shark named Tank. Tank has over 450,000 HP and as possibly the strongest quest boss in Tol Barad, generally requires a group of two or three people to kill. If players have the "Captain P. Harris" or "Boosting Morale" quests, they will also have to avoid him while going after the captain or the rum, and the questgiver admits to being scared of the shark in the latter.
* Shark Tank) uses shark imagery to represent how ruthless the investors are.
* Shark (the show with James Woods) has this happen regularly, or at least has attempts to plea bargain.
* SHARK!". This provides context of what the shark has just taken a great big chomp out of without stating it directly.
* Sharktopus: In the beginning of the movie, a beach girl is attacked by a shark while swimming off the shoreline, but the Sharktopus saves her by devouring it.
* Sharktopus, when the killer shark-octopus hybrid has been attacking and killing boatloads of people throughout the film, but is suddenly very reluctant when faced with the hero Andy at the end to actually eat him. Then, when he kills the sharktopus by throwing a bomb into its gullet, the resulting explosion doesn't even graze him.
* Shark vs. or a bad Christian flick, it's a giant shark fighting something else equally nasty.
* Shark Wars, a book series by E. J. Altbacker is about a shark named Gray and his fellow shark friends as they defend their home waters from their enemies.
* Shark was once a defense attorney . However, after one of his clients who he managed to get acquitted went on to kill his wife shortly after, Stark switched teams and becomes a prosecutor.
* Sharkwater. Two days later, his body was found about 300 feet from where he went missing.
* Shark Week, one of the eight captives, Roger, is killed within minutes of arriving on the island. The audience never even learns what his role in the death of Tiburon's son was.

* Shark Week specials, Rob Riggle presents himself as a shark expert. Real shark experts note Riggle has no idea what he's talking about yet his utter confidence in his "expert knowledge" lightens up his specials.
* Shark Week, Tiburon makes his captives progress through a series of shark pools, each containing a different type of shark.
* Shark Week, Tiburon's henchman inject the people they abduct with some drug that knocks them out instantly.
* Shark, whenever James Woods finds out that he's prosecuting an innocent person, he stops until the police can find a more likely candidate.
* Sharkwire Online was a Nintendo 64 device that allowed the user to visit a special Sharkwire website, even without having an internet connection. There were plans for a Playstation version but it never came out.
* Sharky And George, and they were great. This being a cartoon, they had underwater equivalents of most overland things and even an aeroplane (a whale that everyone sat inside).
* Sharky And George parody, they observe that a plate of food's still hot, so everyone must have left recently.
* Sharky's Machine. Notable in Real Life for the record-setting high-fall stunt performed by "King of the Stuntmen" Dar Robinson.
* Sharlin class cruisers (otherwise known as Minbari War Cruisers) appeared to be commanded verbally. This is a very odd choice for a warship.
* Sharlin-class war cruisers are about the same size as a star destroyer, though that's in height, not length (they're taller than they are long).
* Sharlto Copley and had no plans of acting in the film (at the time, Copley had no interest in acting). Director Neill Blomkamp ended up casting him as Wikus since he fit the role the best.
* Sharon Apple made to sound weird and future-y, and have aged considerably well.
* Sharona's Voices have perfect recall and can send and receieve telepathic messages to each other, including sensory information - sight, sound, smell, and touch, but can't read minds. On the other hand, Sifters can't send messages, but they can tell when other people are lying or telling the truth.
* Sharon Carter, described as looking (when undercover) as like the prettier type of PE teacher and attracting fairly blatant stares. She also fights like a brawler, clearly having the muscles to back it up.
* Sharon Carter wearing a black and white combat uniform and wielding a pair of batons. This was apparently based on an earlier draft of the screenplay where she took part in the airport battle as part of Team Cap, something that doesn't happen in the finished film.
* Sharon Creech. Technically, she's sent to live with relatives... who run a boarding school. (She attends the school, but gets a special exception to stay with her relatives instead of living at the school.)
* Sharon Farber's "Trans Dimensional Imports" (1980). Contact between universes is difficult because the necessary equipment has to be operating in both at the same time, but one scientist has succeeded in contacting her alternate self. They've build a minor business, trading literary works that exist in one world but not the other. With expanded bandwidth, they're considering other art forms. E.g. in one universe,
* Sharon Green, given sufficient practice. Most people had a couple of basic forms, with full-range shifting or something close to it showing up more often in nobles and prostitutes. While you could change your size and shape, however, your mass remained exactly the same.
* Sharon had backup while they were on television. On the bright side, he managed to embarrass Sharon, and the three of them embarrassed Ozzy and Jack, too.
* Sharon Lee, an artist allows a vampire to turn her in the hope that immortality will mean having more time to perfect her art, but discovers too late that anybody who becomes a vampire always loses their creative ability.
* Sharon Lee has worked several positions in academia over the years, including administrative aide to a dean. This might help to explain why a number of
* Sharon, Lois, and Bram's Elephant Show episode "Curio Shoppe". The titular shop

sells magical antiques that let the trio live out their daydreams. When they go back to show Eric Nagler, the shop is gone.
* Sharon, Lois and Bram. The connection between the song and the group was so strong that their second TV show, as well as a skating rink in Canada, were both named after the song.
* Sharon passed by writing down what you'd have to do in order to pull off a similar feat, using 20-year-old equipment.
* Sharon Small when she performed the classic Irish ballad "Carrickfergus".
* Sharon Stone) puts on her "flashiest streetwalking outfit" for a stakeout on Hollywood Boulevard.
* Sharon Stone took to Twitter to complain that she had been kicked off Bumble. There had been multiple flags on her account because nobody would believe Sharon Stone was on a dating app.
* Sharo's brain breaks just a bit when she sees Rize wearing Chino's junior high uniform in episode 3. For the time it takes Cocoa and Chino to take their bath, Sharo does nothing but sit, stare at Rize and squeal.
* Sharpay Evans. She seemed to have turned "good" at the end of the first film, but in the second she is even worse than before. In the third, she is "in it to win it". While she was scheming some more in her spinoff, she turned out to have been played herself.
* Sharpay's Fabulous Adventure had one where Ryan Evans, absent for the whole movie despite it being set where he goes to school, turns up to explain that he was on tour with a show, congratulate Sharpay on becoming a star, and get stuck in her foldout bed. For some reason this didn't make it onto the DVD.
* Sharp Claws, with one triumphantly holding up its former leader's belt for Fox to see.
* Sharp-Dressed Man: For the men, cavalier gear in the first half of the 17th century, and the coat-waistcoat-and-breech ensemble topped with perwigs in the second half were the dictates in fashion.
* Sharp-Dressed Man he is in the present, was a long-haired hippie. He's mocked considerably for it.
* Sharp-Dressed Man song is hilariously overdressed (he's wearing a formal top hat during the day, an autumn coat over a summer suit, and he's either wearing a diamond ring and gloves at the same time or just carrying the gloves for show) and doesn't look sharp in the slighest.
* Sharp-Dressed Man: You can never be a true Edwardian man without those slim, sharp dapper suits to contrast with your elegant pastel-hued lady. Except possibly during the evening - unless you were a military man who had a fancy dress uniform, the comparatively sober black evening dress suit, with white tie and tails, was the order of the day. The well-dressed gentleman by evening wasn't supposed to steal the show from the gorgeously dressed lady he was escorting!
* Sharpe, a bunch of drunken redcoats are seen sleeping with some local women who have turned to prostitution. Later in the book, Sharpe has an argument with the Spanish officer he's teamed up with while fondling a prostitute. He doesn't sleep with her.
* Sharpe, a charming, elegant, and well-educated gentleman (who only joined the army because he killed a man in a duel). The title character is often pointed out to not be a gentleman, though an officer, although his conduct towards women is usually better than most of his well-born peers
* Sharpe actually gets into trouble in one book because some of the items he and his men took technically did not qualify as legitimate military plunder under the conventions of the time. For political reasons the army cannot just tell the lawyers to go to hell so he is
* Sharpe, after the title character's sword is broken and he is grievously wounded, Harper convinces a priest (who was quite a swordsman, in his day) to give him one of the priest's collection of old swords, so he can fix it up into a proper replacement.
* Sharpe: Also ran like this, with a really noticeable time skip between the most recent installments.

* Sharpe. Although written during the War of Spanish Succession, they are fortuitously fitting for Sharpe's career, which also took him "to Flanders, Portugal and Spain" (well, actually Waterloo is in Brabant, but that's close enough to Flanders).
* Sharpe and alternately begs for his mother and the company sergeant.
* Sharpe and Harper, though Sharpe is somewhat less refined than most officers.
* Sharpe and the Chosen Men did this at least twice. Once with the youngest of their number groaning on a stretcher while the French-speaker shouted about cholera, once with Harper covered in blood from a pulled tooth and pretending to be mortally wounded until the time came to attack.
* Sharpe, and why he never has one of his own men flogged once he becomes an officer.
* Sharpe: An small army of these crops up, made up from soldiers of all sides including Sharpe's nemesis Obadaiah Hakeswill.
* Sharpe as it was very heavy, very slow to reload and it would even often injure the operator by breaking or dislocating their shoulder; Harper never experiences this issue).
* Sharpe: As mentioned in the Film section, Sharpe receives his dying captain's old cavalry troopers sword (bear in mind both are infantrymen and it is 35 inches long) in Sharpe's Rifles.
* Sharpe). At the Retreat to Corunna, the British expeditionary force retreated from the superior French army, giving battle before Corunna long enough for them to escape. Later, British troops retreated from another large French force by delaying them long enough to build the Lines of Torres Vedras, a massive series of fortifications protecting the Portuguese capital of Lisbon. The French were left facing an impenetrable city and a huge army to try and feed with a country whose crops and livestock had deliberately been destroyed.
* Sharpe, being charged by a mounted French Trooper and not having time to load his rifle properly, Harper opts to discharge his ramrod along with the ball. The ramrod goes straight through the Trooper's throat at exactly the Adam's Apple. It is rather disturbing to watch.
* Sharpe books gets a new girlfriend frequently. They always leave, either by running away with his money, dying, or otherwise being written out.
* Sharpe books were full of these. Some of them learned their lesson (kind of), some of them just ceased to be Sharpe's problem, and some were mercilessly bayoneted by their own troops.
* Sharpe. By the end he is so covered in enemy blood his men don't recognize him.
* Sharpe. Calvet proves to be no different from Sharpe, who also rose from humble beginnings, and even collaborates with him on occasion.
* Sharpe: Comes up once or twice, set as it is in the Napoleonic Wars. Sharpe himself removes a man's shattered arm with a sword (it's easier to stop the bleeding from one large wound than lots of little ones) and Harper pulls out one of his own teeth with pliers.
* Sharpe does this with a picklock, which he then uses to bust out of jail. He actually does it "onscreen" too (though not explicitly), making this "Chekhov's Buttscratch".
* Sharpe, except when he smiles. Which isn't often, and then he looks kind and charming. Since he normally looks like some ancient God of War in mid-battle, this is an improvement. It is worth noting that he is always described as roguishly handsome, it's just that he looks kind when he smiles.
* Sharpe, Hakeswill orchestrates it so that Sharpe and Harper, on a mission to ransom a general's kidnapped wife, attack and almost kill a pair of Frenchmen... who are there for exactly the same reason, but for the French officer's wife. Fortunately, Sharpe realizes what's going on before anything irreversible happens.
* Sharpe: Harris speaks fluent Spanish - handy, considering the characters spend most of the series in Spain. He is also fluent in French (also important as they fight French), Latin and Greek, and has an at least working knowledge of Portuguese. But he's still a competent soldier though.
* Sharpe has Sharpe being ordered by the enemy commander to shoot Harper while

they're masquerading as turncoats. It's more a test of Sharpe's skill than loyalty though, since the commander wants to see if he knows that the powder is too damp to fire.
* Sharpe has "Sweet" William Frederickson, who has a full range of evil scars — hideously disfigured, missing one eye, one ear, most of his teeth and several fingers... Although he is in fact a good guy, very nearly as badass as the titular hero (who has a classic "Good guy" neat scar on one cheek.)
* Sharpe. He deliberately cultivates his fearsome appearance to instill fear in his enemies, removes his false teeth and glass eye before going into combat (much to the disgust of people around him), and collects teeth from dead Frenchmen to make himself a set of dentures.
* Sharpe, he leaves Hakeswill under the foot of an elephant trained for executions.
* Sharpe Henry Simmerson gets rightfully chewed out for his disastrous incompetence by the Duke of Wellington, he makes a poorly-veiled threat regarding his connections. Wellington immediately shuts him down.
* Sharpe. He seems to enjoy the company of his unit and breaks into song at every opportunity. And he can take a man down at eight hundred yards with a flintlock rifle. To a lesser extent, this is true of the entire rifle unit, who are all a pretty fun bunch of guys.
* Sharpe. He sees her shiver in her sleep and so quietly drapes his uniform coat over her. She doesn't wake, but smiles and snuggles down into it.
* Sharpe he's passing out promotions like candy (there are a LOT of vacancies).
* Sharpe himself fulfills this role for a couple of his commanders, notably McCandless, Lawford and Wellington himself.
* Sharpe himself was The Neidermeyer for a while after he first became an officer. And yes,
* Sharpe in a cell in India) he never shows any interest until he gains a commission and gets married. After that, however, he becomes a voracious, if somewhat eclectic, reader.
* Sharpe is a similar example—if he'd been killed in India, Britain would probably have lost the Napoleonic Wars. Some things Sharpe is responsible for: the assassination of Tipu Sultan; saving the Duke of Wellington's life; the capture of Gawilghur; stopping an Indo-French treaty (by murdering an accredited diplomat no less) to force Britain out of India; capturing the Danish fleet at Copenhagen; securing funding for the Lines of Torres Vedras; the explosion at Almeida; covering up a scandal involving the Peer's brother and the British ambassador to Spain; leading the Forlorn Hope at Badajoz; shooting the Prince of Orange at the Battle of Waterloo; helping the Chilean Revolution to succeed.
* Sharpe) just in time to break the siege, give Sharpe a chance to defeat the villain and generally save the day.
* Sharpe mean that for much of the series, he struggles to get a full promotion beyond Lieutenant, rather than being brevetted as a Captain (hell, even Wellington, who finds Sharpe useful and respects both his abilities and the debt he owes, is infuriated by his inability to have Sharpe's promotion beyond Lieutenant stick). By the end of the series, set in 1815 at the Battle of Waterloo, Sharpe had been promoted all the way up to Lieutenant-Colonel.
* Sharpe. Naturally, Sharpe gets to use the thing a few times himself.
* sharpened senses for supernatural threats (at one point every single aristocrat in Cedric's army at once), but it is most likely innate and never called this.
* Sharpened to a Single Atom, but don't last as long, since obsidian is basically an exotic form of glass, and as such, breaks pretty easily.
* Sharpe novels, Teresa distracts a group of Frenchmen who are searching for Sharpe's men by taking off all her clothes and going for a run. As luck would have it, Sharpe is the only man present who has a telescope.
* Sharpe novels, with command friction between Sharpe and a naval officer who only outranks him when on the ship.
* Sharpen Your Teeth, who didn't want the side project to be compared to his other band and also didn't want to have to do interviews about the record.
* Sharpe Obadiah Hakeswill keeps trying to kill Sharpe. He has a picture of his

dead mother inside his hat. "Mother, spread your wings and lift me high!" is his catchphrase. He once justifies an act of rape by saying, "Mother, you always wanted me to be happy." His mother helped to save him from the gallows, so he does have a point.
* Sharpe officers. While not technically a colonel, Sharpe often fulfills a Colonel's duties as his regiment tends to go through colonels like disposable cups.
* Sharpe of skirmisher riflemen on detached duty from the 95th Rifles (previously Prince Consort's Own), a reconnaissance unit using skirmisher tactics, camouflage and advanced weaponry, hence, the closest thing to special forces in the Napoleonic Era. They are generally portrayed as highly superior to regular rank-and-file infantrymen of the British Army, who are hardly able to achieve anything without the help of the protagonists.
* Sharpe, particularly with the great Spanish fortress cities of Ciudad Rodrigo and Badajoz. The novels add some more, like the sieges of Seringapatam and Gawilghur in India.
* Sharpe retconned the character as having spent a large part of his teenage years in Yorkshire to explain his accent.
* Sharpe. Richard often removes his shirt to display his flogging scars and show enlisted soldiers that he understands what they're going through.
* Sharpe, Richard Sharpe gets involved in a pistol duel at dawn. He lets his opponent shoot first, and miss. The opponent and the witness beg Sharpe to show mercy, and eventually, after much consideration, Sharpe does: he shoots his opponent in the arse instead.
* Sharpe: Richard Sharpe gives up his baby daughter to her uncle after her mother dies so she'll have a proper family.
* Sharpe: Richard Sharpe has three rules for the men who serve under him: 1) Don't get drunk without permission. 2) Don't steal unless it is from the enemy or you are starving. 3) When it is time to fight, fight like bastards.
* Sharpe: Richard Sharpe is made The Captain of the South Essex light company in the first novel (well, the first one in writing order). He ends up as acting battalion commander on several occasions (the closest equivalent to commanding a ship) and briefly acting brigade commander (roughly equivalent to a commodore), although much of his time in senior ranks (he rises to lieutenant-colonel) is spent in staff posts. It probably helps that the South Essex gets through a lot of colonels (two killed, one injured, three relieved of command).
* Sharpe, Richard Sharpe spends some time eking out on half pay during the truce with France. He tries to make a fair go of it after Waterloo and the end of his formal military service but realises he is not cut out for civilian status. Like so many career soldiers cast out of rapidly shrinking armies after June 1815, he travels to South America to re-enlist in the wars of national independence going on there.
* Sharpe: Richard Sharpe uses his Baker rifle to devastating effects. He also carries a 1798 pattern cavalry sword, which is essentially a sharpened club with a knuckleduster attached.
* Sharper Than A Serpent's Tooth and sent to slaughter the living reference this trope, debating whether or not they should eat brains and, if so, whether condiments will be required.
* Sharpes Battle, the seventh movie in a historical action series starring Sean Bean, this happens to the youngest member of the riflemen, a character who had been around since the first movie. Why couldn't they have used a red shirt?!
* Sharpe's Challenge. Sharpe and his Lancer, Sergeant Harper, are the Fake Defectors. Sharpe is ordered to kill Harper using a musket he just loaded, but at the last moment he realises (from the smell) that the powder is bad and the shot won't fire, so he goes along with it.
* Sharpe's Enemy, Sharpe is informed that A: a major was killed and B: he was rather obviously shot in the back. Sharpe asks if the man was unpopular and when informed that he was widely hated, he simply shrugs and notes, "It happens."
* Sharpe. Senior officers love him (except the ones with real integrity and/or insight into what he actually is) because he defers to them completely and whips

soldiers into terrified obedience. Everyone who knows what he's really like loathes him.
* Sharpe series is a brutal, corrupt British sergeant who uses his position to elicit sexual favors from the wives of soldiers he has lined up for flogging. He also preys on any women he can find when he can, becoming the leader of a group of brigands who favor pillaging and raping their way across Spain.
* Sharpe series is missing an eye (and his two front teeth). When he enters combat, he removes his eyepatch and false teeth to frighten the enemy.
* Sharpe series is often seen singing or playing music. John Tams who plays Hagman is also a folk musician and composer. He also co-authored music score for the series.
* Sharpe series is well educated, has a deep knowledge of classical literature, is fluent in several modern and ancient languages, and was even employed as a private teacher before joining the Rifles. He also masks it quite well under his mischievous and hedonistic persona.
* Sharpe-series, Lieutenants Berry and Gibbons, both of whom were malicious, sadistic and dumb as rocks, after his first wife's divorce attorneys.
* Sharpe series, new recruits are promised a reward of 7 pounds, a considerable sum in the early nineteenth century, only to be either tricked or coerced into signing a document which declares them to have spent it on uniform and supplies.
* Sharpe series, Sharpe's enemy Sergeant Hakeswill is one, but does not have any of the positive aspects. Sharpe himself also sometimes acts like one, very easily forgetting he's an officer when training the men, as he was actually promoted from the ranks.
* Sharpe series, the units involved in the battles tend to be rather small. This isn't a big issue when Sharpe and his riflemen are on some cloak and dagger mission, but in large set-piece battles that historically involved tens of thousands of men on each side (such as Talavera, Salamanca, and especially Waterloo) it's underwhelming. When you know from the books that a French "column" was a brick of soldiers forty or eighty files wide, the sight of fifteen extras in three files is ridiculous, no matter how enthusiastically they chant "Vive l'empereur!"
* Sharpe series; they usually show contempt for the title character, an infantry officer who worked his way up from being a common soldier.
* Sharpe, Sharpe and Lawford are infiltrating the enemy by pretending to be deserters. To prove they're truly deserters, Sharpe's ordered to fire on a captured British prisoner (the same one they are supposed to be rescuing). He does so without hesitation because he knew the gun had no powder. Although he later assures him that he still would have done it without hesitation even if the gun had been loaded.
* Sharpe Sharpe was given the choice between a cool sword that was more like a work of art, a symphony designed to kill, and a mass-produced heavy cavalry sabre that had been customised with love by his friend Patrick Harper. Guess which one he chose.
* Sharpe, Sharpe wears his usual uniform despite being repeatedly ordered to change into a newer one. Carried over in the TV adaptation.
* Sharpe's Honour, a real incident where the retreating French baggage train was captured by British soldiers, and Sharpe and Harper (taking the place of some unknown soldiers) captured the Marshal of Vitoria's royal baton and King Joseph Bonaparte's royal jakespot.
* Sharpe sometimes steps into this role, usually when he either manipulates ineffective superiors into taking the action he wants or when he simply decides the superior in question isn't up to the job and "promotes" himself.
* Sharpe's Rifles series were filmed in either Ukraine or Turkey. Presumably labour is cheaper there.
* Sharpe's Sword skills in doctoring a dying man, complete with mournful flute music - and the bad guy stitching up his own wound.
* Sharpe's Tiger, Richard Sharpe is court-martialed after being goaded into striking the malevolent Sergeant Hakeswill. He's sentenced to two thousand lashes,

effectively a painful death sentence, but the flogging is interrupted after 200.
* Sharpe's Tiger Sharpe shoots the Tippoo Sultan in the head and then starts looting his dying body — but decides not to take the man's jewel-encrusted sword, instead placing it in his hand.
* Sharpe's Trafalgar, the eponymous hero proves his Badass nature by deliberately snapping the neck of a man blackmailing his lover. He does note it took a lot of effort.
* Sharpe: Subverted for laughs. In reference to a stuck-up lieutenant under Sharpe's command:
* Sharpe's Waterloo killed. Later, Sharpe apologises to the member of the Prince of Orange's staff who'd finally snapped and told Sharpe (who had himself walked off in disgust) about what Orange had done... because it wasn't a kill shot.
* Sharpe that Sharpe was the sole survivor of an attack on an East India Company outpost in India.
* Sharpe the TV series suffers from this, owing to the small budget the show had. Most episodes retains the named officers from the books, but didn't have the money for a full battalion. So often 5 or 6 officers would be leading only 30 or so men.
* Sharpe Though rules were a bit lax back then, he still gets in trouble for breaking them at times.
* Sharpe, when a villainous Frenchman tells his more noble countryman he won't plead for the release of his English wife. Sharpe promptly walks over and helps the English wife mount a horse behind her husband.
* Sharpe: With a few exceptions, most aristocrats Richard Sharpe spends any time with tend to suck.
* Shar picks up The Talk rather earlier than her parents intended, using her mind-reading powers.
* Sharpie (permanent marker). And an even older brand, Magic Marker — in North America and
* Sharp Objects: As part of its central style, the show frequently intercuts brief images to show what Camilla is remembering or imagining. The show opens with Camille imagining Marian and her younger self sneaking into her apartment and touching her hand as she sleeps.
* Sharp Objects, Marian was one of the sweetest little girls in Wind Gap, and dies tragically in childhood. The trauma of her early death is acutely felt by her family and loved ones decades later.
* Sharptone Records (a subdivision of Nuclear Blast that focuses on metalcore and post-hardcore) has made quite a name for themselves saving artists hosed by their previous labels.
* Sharp-tongued Lily Savage was always entirely separate from her actor Paul O'Grady, and he usually speaks of her as if she's a completely different person. For example, when he gets people asking him to perform as Lily again, his usual reply is "She's gone off to join the convent."
* Sharptooth, but his motivations are never made clear. Though it should be noted that this only applies to his movie incarnation; the novelization shows his point of view and it is clearly, unquestionably malicious.
* Sharptooth so to speak, but it still sends him into murderous rage nonetheless.
* Sharp X68000 that simply don't transition to Western keyboards at all...
* shashka, and being made of Asgardian steel, it cuts through almost everything. Its rather... strange reforging makes it even more lethal.
* shashka. When two or more dancers are incorporating mock-fighting into the dance, this definitely looks like Flynning from the outside.
* Shas', originally artificers, now also merchants and bankers of the Secret City: all members can use magic, but most will resort to artifacts. Shas naturally use the Nav's Source, but can craft artifacts for all Sources and races. Normal mammal reproduction, Shas half-bloods aren't known.
* Shasta habitually eavesdropped on Arsheesh though, which ups his odds.
* Shasta McNasty centers around roommates Scott, Dennis and Randy being Cindy Margolis' peeping Toms.
* Shasta, the boy of the title, runs away from an abusive caretaker who was going

to sell him into slavery. Not technically a stepparent, but very similar.
* Sha: The Catholic Church is portrayed like this, since it was apparently run by demons posing as humans who used the Inquisition as a pretext to wipe out their enemies.
* Shathra is an embodiment of the spider-wasp, so she naturally preys on spider-themed beings. She can inject venom that paralyzes Spider-Man and others like him. Spider-Man's webbing is also useless against her because she has claws and is strong enough to effortlessly tear through his webs.
* Shatner claims in his memoirs that Hunter was manipulated into leaving by his girlfriend at the time, who was always on set complaining about how dumb the show made him look. The producers didn't like that situation much either, or by some accounts, they were planning to recast Pike anyway.
* Shatnerquake, hellbent on killing the real Shatner attending the con.
* Shatnerverse novel "The Return," Captain Picard and Dr. Crusher explore a Borg hypercube (tesseract) space station that is dimensionally transcendent.
* Shatnerverse, the mirror Kirk explains how he eliminated his universe's Pavel Chekov after he found out that he had plotted to assassinate him. He threw him into an agony booth, set it to medium intensity, as a "showcase of [his] leniency". He described it thusly: "Think of a dull toothache throughout your body, in every part. Bearable, but most uncomfortable. And then I kept Pavel in it. It took thirteen days for him to die." (Preserver, 2000)
* Shatranj Persian chess, and the direct ancestor to western chess. As pointed out above, Shatranj is the root of the western branch of the Chaturanga family, which originated in India.
* shatter a wall of ice. She does manage to pull off a flawless singing performance at the talent show afterwards.
* Shatterbelt, by the time Tracy figures out what her premonitions have been warning her about, she has just half an hour to act. She manages to save the visitors to Mr. Bailey's mine and the people in St. Bernard's Park before the earthquake hits.
* Shatterbird's power is to control glass. She can cause serious citywide devastation by using her powers to shatter all the glass in her range, but her powers give her no defensive buffs aside from using glass as makeshift armor, unlike most of he other Slaughterhouse 9 members, who generally survive joining by having something up their sleeves to protect them when pissed-off heroes inevitably land hits.
* Shattered Angels, a modified cello that provides fire support during the final showdown.
* shattered, being turned into a mannequin and burned alive, melting as if made of wax, drowning in the clutches of a giant octopus; being cut in half by a giant pair of scissors (pictured above), being beheaded by a falling decorative sword, being sliced and diced by a spectral meat cleaver, aging to a pile of dust and simply being reduced to a skeleton in the blink of an eye while being center of attention on a crowded airplane.
* Shattered Continent: An out-of-date one is found in the sub-levels of an abandoned military base, which was being used to track the spread of nuclear fallout from the bombing of Konigsberg.
* Shattered Continent features these extensively, due to the abundance of things on Neue Erde that a center-mass hit will only slow down.
* Shattered Continent: The collective kingdoms and nations of Neue Erde have never gleaned an objective for the demonic invasions. Every 2 or 3 decades they kick in the doors and make a mess, but no one has anything other than theories about the 'why'.
* Shattered Continent to deal with them, but the zed word is not used.
* Shattered Dreams, a small-press RPG from the late 90s, was all about this trope.
* Shattered Dreams claimed that Hitler wasn't initially evil, but was driven mad by Vacyge who'd invaded his nightmares.
* Shattered Dreams is all about Dreamland adventures and battling its monsters that prey on dreamers.

* Shattered Empire using Battle Droids left over from the Clone Wars and Orcs of all things.
* "Shattered Eyes". Naruto gets a good laugh out of it, but Sasuke is far less amused for obvious reasons.
* Shattered Galaxy it. This means that only subscribers can use certain units, as well as the "gold" versions of weapons, which are somewhat (but not game-breakingly) better than their regular equivalents.
* Shattered Galaxy will usually have attacks dedicated to anti-air or anti-ground. There exist "versatile" units and weapons that can attack both, but they are generally considered to be unfit for either role, and therefore only good for beginners who have yet to learn the system.
* Shattered Glass, Amy tries writing funnier stories to emulate rising star Stephen Glass. When Caitlin asks her if she really wants a bunch of editors blowing smoke up her ass, she gets a blunt yes in response.
* Shattered Glass and actually did the things attributed to him in the surprisingly accurate film.
* Shattered Glass depicts how Stephen Glass was found out to have fabricated several of his article in The New Republic, with Glass as the main character. Chuck Lane, the editor of the magazine, is the one who unraveled the web of lies bit by bit over the course of the movie. Not only is he the antagonist to Glass, the other journalists at the magazine don't like Lane much either and they refuse to believe that what he's saying about Glass is true.
* Shattered Glass have happened (supposedly it happened this way in real life as well).
* Shattered Glass: Made in 2003, story starts off in the middle of the decade concluding in Stephen Glass' fall from glory in 1998.
* Shattered Glass reporters who was responsible for first exposing Glass's fabrication — and someone who would know a little something about the Internet back then — was incredulous that this could be the website of a supposedly big-time software company.
* Shattered Glass Rook probably hews closest to the Kent Brockman model. Being a mirror-universe Autobot, he's actively psychotic and offered highly propagandistic reports where he expresses his disgust at the dastardly Decepticons saving orphanages. He also frequently cuts to reporter Punch giving exposes on the deeds of himself in a
* Shattered Glass, Stephen Glass views himself as an intrepid reporter and would love nothing more than for everyone else to think of him as one as well. He's nothing of the kind. However, Adam Penenberg, the journalist who exposed Glass, very much is. Chuck Lane is another genuine example, his thorough investigation of the story Penenberg pokes holes in is what ultimately brings Stephen down.
* Shattered Glass: When people start poking holes in Stephen Glass's made-up articles that he can no longer cover up, he contrives to make it seem like he was simply negligent in fact-checking. When more concrete evidence of his active deceit comes up, he again makes it seem like he was trying to hide his negligence and not his complete and total fabrication of his articles.
* Shattered Grid event, the remaining Rangers split into two teams to try and deal with Drakkon and his army. One group goes to take down a tower that allows Drakkon's Ranger Sentries to use the stolen Ranger powers across the multiverse, while the second group storms the moon base in Drakkon's universe to rescue Rangers that have been captured.
* shattered him into millions of pieces that they are the one true Deceiver and started fighting amongst each other.
* Shattered Horizon allows players to switch off the non-essential systems of their suits to avoid giving off light, showing up on radar, or being affected by EMP grenades. However, doing so disables the suit's thrusters, HUD, and audio simulation, so if you're spotted you're pretty much a sitting duck until you can get it switched back on.
* Shattered Hourglass can interact with the lifeforce of a dying person, or reach into one's memories to access the past itself.

* Shattered Image crossover made the split official. But Image partners still occasionally "borrowed" each others' characters, so the sub-universes still interacted. As new, non-partner creators become more prominent in Image Comics, they started building universes of their own, and they occasionally used the Image partners' characters. For example:
* shattered like panes of glass is frequently used as a cue that they're up to something and sets up the aforementioned dental horror gags as comeuppance.
* "Shattered", Mace sent Anakin away no more than a minute before Ahsoka appeared.
* Shattered Pixel Dungeon: There are two wands (Transfusion and Prismatic Light) that operate differently when used on, to quote the latter's description, "demonic and undead" enemies. Apparently that description matches the mad prisoners and guards of the second stage, and the not-explicitly-undead Dwarves of the fourth.
* Shattered Reflection, has a strong physique thanks to her time as a mercenary but still retains an air of femininity. It has gained her a not-small following of admirers within the army.
* Shattered Reflection none of the Shepherds save Chrom ever offer them the approval they've earned, with the rest either being blatant and unironic racists, or just showing utter indifference to their efforts and the troubles they're going through. They have, for the most part, just gotten used to it.
* Shattered Skies: The Morning Lights characters, hailing from each of the five universes.
* Shattered Skies: The Morning Lights, claiming to be the ultimate source of all evil and darkness.
* Shattered Skies: The Morning Lights of the battle of good versus evil.
* Shattered Skies: The Morning Lights, uniting magical girls from across the spectrum to fight a war for the sake of all existence.
* Shattered Sky find significantly large traces of her blood and fur where it happened (identified by scent), and it was safe to assume that she had been killed. Also, Twigpaw would've died of her injuries if not for her getting rescued by a human veterinarian.
* Shattered Sky has given the cryptic advice that in order to defeat the villain, "the Clans must remember their names". Everyone's a bit baffled at what this means, but then Alderheart happens to walk past Hawkwing telling his daughters about SkyClan's history and how they certainly live up to their name due to their attack-from-above techniques. Alderheart realizes that this means that each Clan must use their own unique battle strategies to fight Darktail.
* Shattered Sky, one of the Vectors travels this way, taking a host body and forcing it to commit suicide so that it can travel to its next host (the Vectors require host bodies in our world, and will die if disembodied for too long), who then repeats the process until the Vector has reached its destination.
* Shattered Sky So, don't use your magical powers to bring back the dead.
* Shattered Soldier fight with the "Relic of Moirai", then if you manage to achieve and maintain an S ranking through there, you get to fight his Very Definitely Final Form.
* Shattered Star are also assumed to have gone on to confront Alaznist and become trapped in Crystillian.
* Shattered Starlight features an ex-magical girl trying to live her life after the breakup of her team.
* Shattered Twilight: Played with; in the backstory (before the Shattering), the god of night was a benevolent and powerful ally in holding evil at bay. In the current age, however, his total disappearance during or after the Shattering has made night incredibly dangerous. The setting also has a strong association between darkness and demons, which are portrayed as writhing, moving darkness.
* Shattered Twilight, the eponymous wife uses a sacrifice of her own blood as part of a ritual to summon a demon.
* Shattered Twilight 'verse, the demon-hunting Purgatori are equipped with "silvered" maces.
* Shattered Union has players reunite USA with max of 42 units. They are, however, explicitly battalions and divisions of units represented by a single one on the

screen. 42 battalions to a combat front isn't that bad, especially since you'd likely be working with relatively low budgets.
* Shattered Union having a staggeringly unpopular first term, only to win re-election in a blatant sham election, which prompts a domestic terror plot that kills him and most of the government with a nuclear weapon on his inauguration day. Things spiral further out of control and the US splits into six warring states - Pacifica, the Great Plains Republic, the Texas Republic, the Confederacy, the California Commonwealth, and the New England Alliance vying for control of the US, while the Russians and European Union both offer aid to the belligerents and seek to produce an outcome that benefits them.
* Shattered Union: In the intro, a news reporter is presenting a report from Washington DC when when the city is nuked.
* Shattered Union, the European Union expeditionary force seizes the ruins of the city and the surrounding Chesapeake Bay region in order to restore order. You yourself, of course, can fight in and around the city.
* Shattered Union to stop the civil war are made up of units from various European countries under a single command structure.
* Shattered Union, when a domestic terrorist attack obliterates Washington, D.C., with a nuclear device during the Presidential Inauguration, killing, pretty much, the entire federal government. This results in, first, Texas and then other states seceding and creating their own mini-republics. Of course, even before that, the President was extremely unpopular and has, pretty much, violated the Constitution by forcing the Supreme Court to declare all the other candidates unfit during his re-election. When riots started in the West Coast, he declared martial law.
* Shattered Union. Whether the player creates one of these or returns the nation to her glory days depends on how he or she conducts the war (sparing cities and avoiding the use of WMDs tends to avoid this trope).
* Shattered was the lover, and the dead man was the husband. He looks like the husband now because after the car accident, the doctors repaired his face to look like the photos of the husband that they believed he was.
* Shattered when you have sharp metal plates and the Force for removing clone trooper heads.
* Shattered where the killers dumped a body in a chemical vat - if they'd not been in such a hurry, they might have seen the sign saying Formaldehyde.
* Shattered World: A planet broken into pieces and floating in space / the void but still inhabited.
* Shattered World Crisis wants to be the one in charge of when and how the world is put back together.
* Shattered World. Outside the titular Citadel, there are lots of jagged rocks, strong winds unsuited for jetpacks and sulfur-stenched lava.
* Shattered World Saga sees the Freedom Fighters carry out a two-pronged attack, on both the Death Egg and Eggman Land.
* Shattered World Saga was this, with the Freedom Fighters travelling across the shattered planet to help people and to find the Chaos Emeralds so they can fix the world.
* Shatterhand. Angel, a subsidiary of Bandai, agreed to cover the publishing costs for Natsume under the condition that they could modify the game to promote one of Toei's superheroes.
* Shatterhand are Greek letters. Collecting three assembles a hovering droid equipped with a weapon determined by the letters combined. Some mount laser cannons or flamethrowers, others swing swords or throw grenades. All of them will block bullets and can be grabbed by the player, either to lift the hero into the air or for him to fling at enemies, although they can only withstand so much damage before disintegrating.
* Shatterhand loses his hands against the bad guys, and his new fits allow him to take them on.
* Shatterhand, you're a dude in shades and a vest who runs around punching robots to death.
* Shatterheart After a lot of trauma and mending of bridges, he does eventually

become genuine friends with Kurogane and Fai in his own right.
* Shatterheart after he gets jumped by a gang on his way home and after the disastrous chess finals.
* Shatterheart and Kurogane has to learn that he's a separate person from the boy he first knew.
* Shatterheart being tortured to death, causing a screaming panic attack.
* Shatterheart. By the time he comes to terms with his love for Kurogane, he can't do anything about it as Kurogane has already gotten together with Syaoran and he has to watch them became lovers.
* Shatterheart confront Syaoran's kidnapper who immediately denies his involvement. Even though he is literally standing over Syaoran's injured body and about to pour bleach in the boy's eyes.
* Shatterheart eventually become close friends and form an agreement to start having a sexual relationship. Kurogane does this to comfort Syaoran and initially believes that Syaoran understood that the relationship was temporary. It hits a snag when Syaoran starts to believe that Kurogane has feelings for him, which Kurogane tries to nip in the bud to no avail.
* Shatterheart. He backs off when he sees that Syaoran is terrified of him.
* Shatterheart, he is tolerated at best hated at worst by the rest of the group due to misplaced blame.
* Shatterheart, Jet is about to pour bleach down Syaoran's eyes when Kurogane and Fai break down the door and beat the snot out of Jet and his gang.
* Shatterheart relationship, Kurogane breaks it off because he doesn't feel that way. Kurogane, to his horror, ends up developing feelings for Syaoran regardless. Justified because they had already formed intense emotional bonds before and after they started to sleep together.
* Shatterheart Sakura, but eventually moves on and fall in love with Kurogane.
* Shatterheart, the group has to race to Shirasagi Castle to get him medical treatment.
* Shatterheart to pick a fight and won't listen to reason. Kurogane tells him he picked the right choice.
* Shatterheart when he becomes too attached and Syaoran is more miserable than before.
* Shatterheart, when Kurogane tries grabbing Syaoran to force him out of his room he triggers a screaming panic attack in Syaoran, who had been kidnapped and nearly tortured to death.
* Shatterheart: When Syaoran looks at the mannequins in the clothing store.
* shattering of their idealized fantasy" has been coined, named for the particular frequency of the effect in those from places where France is heavily romanticized like East Asia facing the reality of a historic and lovely but ultimately mundane city. Other places that tend to trigger the effect include Rome, London, New York, and Jerusalem.
* shattering stone walls. But, of course, any unarmed character can beat Kunō with their pinky finger.
* Shattering the Illusion: A character is under an illusion, but then the illusion breaks.
* Shatter Me Castle creates Omega Point, an underground city where people with gifts gather to plan a rebellion against the oppressive Reestablishment.
* Shatter Me who he and Juliette have no choice but to take on the run with them to stop Warner from harming him.
* Shatterpoint, albeit for a radio transmission rather than a phone call, with Mace Windu trying to keep the villain talking while his aide triangulates the signal source. However, because the villain is very clever and Mace is only slightly less clever, he immediately knows that the apparent origin is a ruse — but that still helps him because only two installations in city have the hardware necessary to spoof the signal.
* Shatterpoint features a De-Orbiting Kinetic Anti-emplacement Weapon, or DOKAW, that essentially drops a chunk of metal from orbit at 30,000 kilometers per hour.
* shatterpoint Force ability, Mace can see the weaknesses of nearly anything in

life. These two things are what allow him to defeat Sidious.
* Shatterpoint had DOKAWs, De-Orbiting Kinetic Anti-emplacement Weapons, described as 200-ton metal rods with thrusters on them. They were lethal, if somewhat less than accurate.
* Shatterpoint. "I don't like Windu... he has the same look cleaning his weapons as he does using them."
* Shatterpoint: Mace Windu is cornered by a pair of militia in a public shower and beats the crap out of them. As if you'd expect less of him.
* Shatterpoint. Mace Windu is cornered by some Mooks in what is effectively a locker room... who notice to their slight shock that, unlike most people would when confronted naked, he doesn't even flinch. Windu, being the badass that he is, proceeds to beat the shit out of the thugs.
* Shatterpoint to worry much about his clones. Later, he uses one of the gunships as a distraction to take the enemy spaceport, by claiming that it's heavily damaged from the battle and leaking radiation, and needs to reach port to protect civilians from a possible explosion. The entire city is so enthralled by this drama that no one notices the clone ships sneaking up on the spaceport until it's too late.
* shatters the cupcake he's stuck in by jumping out of Sugar Rush's castle. There are two large double-door-style windows on either side and he instead plunges straight through the sugarcube/brick wall.
* Shatter The Illusion—if the creature is targeted by some effect, the illusion breaks and the creature dies.
* Shaun Cassidy, half-brother to David. His singing career never quite got in the way of solving mysteries.
* Shaunee, the only black member of the "nerd heard" (and the only black lead for the first several books) and who we're constantly reminded is black.
* Shaunette Renée Wilson (born in Guyana but raised in NY from age 2)
* Shaun implies that this would have been his fate if the templars instead of the assassins had found him first when Desmond asks him how he joined the assassins in
* Shaun interviews Mick Onk to try and figure out the symbolism of carrying a puppet of Tony Abbott wearing a blindfold at a protest of Abbott's climate change policy (or lack thereof).
* Shaun Micallef. Perhaps the most noteworthy use was on "Micallef Tonight" when he called up the Channel 9 switchboard live on air to complain about the quality of his own programme (shortly before it was cancelled).
* Shaun Micallef's Mad as Hell: After reading a story about robots taking over any job involving repetition, Shaun repeats the phrase "Any job involving repetition" multiple times, then looks and the auto-cue and reads "Turns to follow camera".
* Shaun Micallef's Mad as Hell!", a line that was later used by Cormann himself to refer to Opposition Leader Bill Shorten.)
* Shaun Micallef's Mad as Hell. And then Scooby-Doo appears and is likewise told to get lost.
* Shaun Micallef's Mad as Hell discusses this in a sketch where Peter Pan and Tinker Bell show up in the studio audience and explain this rule to Shaun (in reference to a slightly bizarre statement from Prime Minister Scott Morrison about believing in miracles). While most of the audience claim to believe in fairies, Shaun can't suspend his disbelief that far and apparently kills Tink by pointing out that she's obviously just Christie being filmed in front of a bluescreen and badly superimposed. And indeed, when Tink collapses in pain, Peter runs down onto the set and reveals that Christie and the bluescreen in question had been in plain view the whole time.
* Shaun Micallef's Mad as Hell formats before interviewing a pair of contestants in bizarre costumes. At no point is the actual game seen (or even explained).
* Shaun Micallef's Mad as Hell has a Micallef Tonight sign hanging in the background from Shaun's early 2000s show of the same name, apparently recovered from a dumpster during the clean out at the GTV-9 studios in Willoughby prior to it closing.
* Shaun Micallef's Mad as Hell: Inverted when Shaun fails to pause while commenting on Nationals leader Barnaby Joyce's current troubles:

* Shaun Micallef's Mad as Hell likes to portray Australia as being a country of minor importance which is lucky to get invited to major global events, sometimes portraying Australia as a woman desperately trying to win a date from a man out of her league or just a general suck up (like in the segment "whose bottom should we be kissing now?") looking for bigger more powerful nations to align themselves with.
* Shaun Micallef's Mad as Hell: Shaun uses a clip of Finance Minister Mathias Cormann trying to explain "in plain English" what the fuel excise indexation means.
* Shaun Micallef's Mad as Hell, when Heinrich McNg explains why Senator Jackie Lambie was banned from attending party meetings that she hadn't been coming to anyway.
* Shaun of the Dead a girlfriend and a steady job. Ed, on the other hand, lives on Shaun's couch, plays video games all day, sells marijuana, can't be trusted to write down phone messages, and is prone to silent but deadly flatulence to break the tension of emotional moments.
* Shaun of the Dead), all talking about the dead coming back from the grave.
* Shaun of the Dead also used amputees for several of the zombies, most notably a one-armed bridegroom, and a legless zombie Shaun and Ed accidentally run over.
* Shaun of the Dead and his at-that-point dormant potential and leadership qualities, as numerous times he notices something very odd and seems be just on the verge of working out exactly what’s going on... only for something to distract him before it clicks and make him lose his train of thought. The first morning after the apocalypse is in full-swing, the protagonist takes a casual stroll down a street littered with zombies to the corner shop for coffee and walks back without noticing a thing.
* Shaun of the Dead and it is intentionally vague to which one is the true cause. In the denouement, a news anchor starts saying that scientists have now determined the cause to be... and is cut off when someone changes the channel.
* Shaun of the Dead and Nick Frost refer to the character by the actor's full name while delivering their dialogue.
* Shaun of the Dead as a monologue over hilarious footage of him carrying out each act, calmly and with panache. As Ed reminds him about something else Shaun amends his previous plan to accomodate it. From then on they, of course, have trouble each step along the way.
* Shaun of the Dead: Before he can apologize to Shaun for a rude comment after Shaun has just had to execute his zombified mother, David is torn apart by zombies reaching through the Winchester's glass windows. Attempting to pull him back in, his girlfriend ends up ripping off his leg and then uses said leg to beat her way into the zombie horde to rescue him.
* Shaun of the Dead by attaching four pieces of paper to Pete's back, reading "I / AM / A / PRICK".
* Shaun of the Dead by being brought together. They range from simple letter substitution (What the funk?) to the downright bizarre (You stupid barstool). And the outright hilarious (peas and rice!).
* Shaun of the Dead commentary, Edgar Wright claims that his brother once shot him in the leg with an air rifle.
* Shaun of the Dead does this in the opening scene. Shaun and Daisy are introduced arguing at a table in a pub. Daisy complains that Shaun spends all his time hanging with his loser friend... who is revealed to be standing right beside them and listening in. Shaun counters that he doesn't want to spend time with Daisy's boring friends... who are revealed to be sitting at the same table with them and hearing every word.
* Shaun of the Dead during a scene in which Shaun and Ed come up with increasingly truncated plans on how to rescue Shaun's mother.
* Shaun of the Dead. During Queen's "Don't Stop Me Now" scene, Diane 'helps' Shaun fend off a zombie bartender by throwing darts, with mixed success.
* Shaun of the Dead, Ed ends up in the basement of a bar that is burning down on top of him, mortally wounded by a zombie with only two bullets left in his gun. As Shaun and Liz make their tearful farewell...

* Shaun of the Dead (even though Shaun doesn't seem to notice anyway).
* Shaun of the Dead" explained how Mary, the zombie girl who Shaun and Ed find in their garden, and other side-characters became zombies. The story now appears on the film's DVD as an extra feature.
* Shaun of the Dead: features a running argument between Ed and Shaun on whether or not The Winchester's namesake gun (mounted over the bar) has been deactivated:
* Shaun of the Dead features numerous commentaries, including one with zombies.
* Shaun of the Dead films, where the military just comes in and mows down the zombies in less than a day, with complete ease and not so much as a single casualty. They rescue the protagonists and peace is quickly restored.
* Shaun of the Dead has David apologize while moving back towards a window... cue the zombies breaking through the barricade and pulling him away to be eaten.
* Shaun of the Dead has Shaun and Ed searching their roommate Pete's bedroom for his car keys, at which point Ed would come across a stash of fat girl porn. This was a call-back to another cut scene in which Pete mentioned he did many things he wasn't proud of, including sleeping with a fat girl.
* Shaun of the Dead his best friend, who has been bitten and opts to hold off the zombie hordes) are saved by the cavalry in the form of the British Army who proceed to avert the standard zombie movie cliche and absolutely slaughter the zombies.
* Shaun of the Dead. In the end, it turns out to be more complicated than this given that he's still hung up on his ex.
* Shaun of the Dead inverts this when Shaun hatches his plan to gather his friends and head to the Winchester. He goes to get Pete who earlier said he'd been attacked by someone on the street. He finds that Pete has become a zombie and tries to talk him down, mentioning his plans and meekly asking "Join us?"
* Shaun of the Dead is a "romantic comedy with zombies". (A "Rom-Zom-Com", if you will.)
* Shaun of the Dead is a "silent but deadly" variant: "I'll stop doing it when you stop laughing."
* Shaun of the Dead is billed as "a romantic comedy with zombies" for this reason.
* Shaun of the Dead is played almost entirely for laughs. The only real horror comes from when the zombies make their true presence known.
* Shaun of the Dead It takes an axe or something to stop Freddie Mercury.
* Shaun of the Dead may... well, we never know WHAT they are because the only explanation for events in the film is cut off mid-sentence. Assuming they're true undead zombies we get one woman on a talk show admitting she's still in love with, and regularly having sex with, her zombie husband.
* Shaun of the Dead — around the place. Shaun's equally oblivious both times.
* Shaun of the Dead. Nick Frost genuinely did believe that dogs can't look up.
* Shaun of the Dead. No one, except for Shaun, gets really bloody and dirty until the end. Even then, Liz is still better off than Shaun.
* Shaun of the Dead: Once they finally get refuge in the local pub, they are quickly besieged by zombies. As Shaun and the others try to keep the zombies at bay with a rifle, Shaun's mother admits to Liz (Shaun's ex, although his mother isn't aware of the breakup) that she was bitten by a zombie earlier in the movie, dooming her to death and resurrection. She dies in Shaun's arms as he begs her not to leave him. This is followed by a genuinely tense Mexican standoff over what to do with Shaun's mother - David reckons they have to shoot her, Shaun and Ed are hysterically protective, Liz reluctantly sides with David (calling him a "twat" in the process) - which is punctuated with some of the movie's funniest dialogue.
* Shaun of the Dead opens on one. The first shot is Shaun staring vacantly into the camera. Then it pulls out, revealing that he's actually listening to his girlfriend, Liz, talking about Shaun's friend, Ed. Then it pulls out a bit more, revealing that Ed is playing at an arcade machine right next to them, just ignoring her constant insults. Then it pulls out just a bit more to show that Liz' friends are also there, being completely ignored in favour of insulting Ed.
* Shaun of the Dead series. It memorably subverts the "apocalypse" part by having the military seep through and restore order within a day. It's not even clear if any country but Britain was affected.

* Shaun of the Dead Shaun and Ed encounter a zombie woman in their yard, they only realize she's a zombie after they knock her onto a pipe impaling her through the midsection, she then gets up and pulls it out of her and we get a view of them looking through the hole.
* Shaun of the Dead, Shaun and Liz have a frank discussion about Shaun's unbearable roommate, who, as it turns out, is cheerfully standing within earshot. They go on to discuss Liz's friends, who are then revealed to be sitting right next to them. ("No offense!").
* Shaun of the Dead, Shaun comes home and asks his friend Ed if they've had any calls. Ed answers that Shaun's girlfriend Liz phoned to make sure that Shaun had made plans to eat out, before adding "...then your mum phoned to ask if I wanted to eat her out."
* Shaun of the Dead shows the proper zombie apocalypse kicking off in the morning as Shaun wakes up with a hangover. In his half-asleep daze, he fails to notice the corpses everywhere and the zombies hunting the living as he goes to the store and returns to his apartment. Most of the action following this happens in broad daylight.
* Shaun of the Dead's Krishnan Guru-Murthy as Shaun is flicking through the channels as the outbreak hits.
* Shaun of the Dead smashes the window of The Winchester to get in (causing security problems later) before Shaun has a chance to tell him there's another, unlocked door round the back.
* Shaun of the Dead so straight at times in the second half. The filmmakers insisted that the film was not intended to be a parody, but a real zombie movie that also had a lot of humor.
* Shaun of the Dead starts off with seven characters in the group, which dwindles down to two in the end (and one friendly zombie). Extra materials do show one other character survived and that she maintains 'Christmas card contact' with the main characters.
* Shaun of the Dead). The second time, the cheerful music on the radio that usually greets him is suddenly cut off and replaced by a rather frantic-voiced man urgently broadcasting a news update that Shaun might want to pay attention to... except the radio station is Indian and, unfortunately for Shaun, the news update is in unsubtitled, untranslated Hindi.
* Shaun of the Dead. They don't even think the zombie in the backyard is an undead cannibal until they see the news.
* Shaun of the Dead) the zombies break through and pull him out to eat him.
* Shaun of the Dead: This is exactly Shaun's plan. The "plan" being rounding up his friends and family, going to the local pub, and waiting there until it all blows over. Suffice to say, it doesn't exactly work.
* Shaun of the Dead to defeat the zombies. However, we only see a brief glimpse of them as the plot follows Shaun's trip to the pub.
* Shaun of the Dead upon arriving at the pub Shaun goes to the back room to fix the fuses and get power to the TV. When he flicks one of the switches it turns on the light outside the door next to him, illuminating a pack of zombies just outside. He rapidly turns it back off and goes back to the main room.
* Shaun of the Dead uses this twice, once using Shaun's uptight flatmate complaining about his habits, and again, with a zombie attack by the same roommate.
* Shaun of the Dead when Ed attempts to cheer Shaun up at the Winchester with plans of binge drinking, he is actually summarizing the events of the next day.
* Shaun of the Dead when he frantically tries to leave the pub after failing to kill Shaun.
* Shaun of the Dead when he takes a trivial phone call on his mobile and puts everyone at risk:
* Shaun of the Dead when, in order to actually make the standoff 'fair', a character from one side hands a weapon to a character on the other side.
* Shaun of the Dead when Shaun is tearfully trying to tell his (clueless) mother Barbara that her husband Phillip had died. The group is riding in the car, Phillip and Shaun are in the back seat while Barbara is in the front and Ed is driving.

Shaun orders Ed to stop the car, which he does jerking the wheel and slamming the brakes. Ed's behavior triggers the below discussion:
* Shaun of the Dead, where a character asks if anyone has any experience with guns. Ed raises his hand, and when asked about what his gun experience is, Shaun mentions that Ed shot his sister in the leg with an air rifle.
* Shaun of the Dead, where Ed describes the pub regulars in an effort to cheer Shaun up. There are several different takes of the scene where he describes the old woman as an ex-pornstar, all apparently unscripted. Simon Pegg's laughter is genuine as a result of this.
* Shaun Ryder alludes to the conspiracy theories in the lyrics to Black Grape's "Reverend Black Grape".
* Shaun, the director of The Institute, is a 60-year-old man dying from cancer. Assuming you haven't killed him, in your final encounter with him, he's on his deathbed and only has enough time to give you some parting words.
* Shaun the fact that Japanese pilots late in the war were mostly reduced to suicide attacks due to limited resources and the depletion of their well trained pilots is brought up while discussing the many factors that led up to the decision to drop nuclear bombs on two cities.
* Shaun the Sheep, a live show mainly consisting of the characters dancing to music.
* Shaun the Sheep both the Farmer and the sheep seem to like low-budget horror films.
* Shaun the Sheep cartoon features this occurring twice. It leads to Shaun and the other competitors exhausted from their false starts...excluding Shirley who was the only one not to start too early, thus is not exhausted and finishes first!
* Shaun the Sheep episode "Fossils", Bitzer digs up a dinosaur skeleton while looking for his bone. He tries to bite one of the bones, but doesn't like the taste. Later, the completed skeleton is stolen by a pair of stray dogs.
* Shaun the Sheep episode that aired in the late 2000s, by which time people were buying MP3 players and throwing out their CD players.
* Shaun the Sheep gets put on a weight loss program and becomes as skinny as Shaun, but then she falls into a pie truck, eats the pies and goes back to normal size.
* Shaun the Sheep has one episode where he tries to get Timmy off a tightrope by swinging on a trapeze. His attempts are accompanied by a drumroll and cymbal clash, which we then see is being played by one of the sheep.
* Shaun the Sheep has the TV especial "Championsheeps" in which the entire farm made their own Olympics with each animal species like a team, made in 2012 for that year's London Olympics.
* Shaun the Sheephe uses this to steal birdseed from the bird feed as Blitzer is trying to fill it, then play a bunch of pranks on Blitzer and the flock.
* Shaun the Sheep in "Ewe've Been Framed". His tractor needs oil. His cow does not. Her look says it all, even if it happens off-camera.
* Shaun the Sheep in his spin-off series. His schemes often involve screwing the Farmer or Bitzer in some way, but he has no harmful intent and occasionally tries to do nice things for them to compensate. Usually the rest of the flock get in on this too.
* Shaun the Sheep is a Fox that constantly tries to eat the weakest members of the farm, like the chickens of Timmy the lamb.
* Shaun the Sheep is clearly the main antagonist of the second season, though not evil, more like a prick, as the show is very light-hearted.
* Shaun the Sheep is sometimes shown to have all kinds of things hidden in her wool- a hammer and nails, large stacks of money, and even a car tire.
* Shaun the Sheep, it's not surprising. She also makes for a useful trampoline.
* Shaun the Sheep Movie. He looks and acts pathetic, but once he starts using an electronic grabber to chase Shaun and the Flock, is really business. It gets worse when he uses a tractor to trap them in a shed and throw them in a Quarry.
* Shaun the Sheep Movie, there is a sign that says "No Dogs Allowed" at the enterance of the hospital in the Big City, which is a problem for Bitzer the sheepdog as he wants to rescue his owner. So, Bitzer wears surgeon outfit in order

to enter the hospital, but unfortunately, he was eventually caught.
* Shaun the Sheep movie, the rooster crows through a megaphone and winces from the feedback.
* Shaun the Sheep opens with a teenaged Farmer bottle-feeding Shaun the lamb, while Blitzer the puppy runs up to play with them.
* Shaun the Sheep, Shaun and Bitzer hide behind a very narrow tree while trailing a fox who raided the henhouse.
* Shaun the Sheep sheep on the side, and disappears into the sheep's thick wool. Shaun reaches in to retrieve it, and finds two other items before the cabbage.
* Shaun the Sheep: Shirley is a big sheep that tends to stand in one place, eating whatever she has in front of her, oblivious to anything that happens around. One "incident" that comes to mind is other sheep putting her in front of the barn door to trap their owner inside. Also, they used her as a trampoline at one point.
* Shaun the Sheep: The Farmer can't see a thing without his glasses. In one episode, his lenses get scratched up so he's blind even with his glasses, something the sheep take advantage of to perform all sorts of un-sheeplike behavior in front of him without having to worry about getting caught.
* Shaun the Sheep, the farmer slams Blitzer with the front door when he opens it. The precise effect changes for each season.
* Shaun the Sheep the Farmer uses his house as an outdoor-indoor obstacle course, complete with tripping over the gutter and crashing into his furniture and cat!
* Shaun the Sheep The rotund Shirley bowls over the rest of the flock in "Shirley Whirley".
* Shaun the Sheep, Trumper tries to explain to the Farmer about his intention after almost succeding in throwing Shaun to the quarry. This only ends up as a distraction as the Bull of the farm pushes Trumper on the other edge of the quarry.
* Shaun the Sheep with Timmy the lamb as the protagonist of a show for toddlers.
* Shaun, the team bury him as well; we don't see the burial actually happen, but Rudy does ask to borrow Seth's car so the body can be safely transported.
* Shave And A Haircut: A common musical sting with a five-and-two beat pattern
* Shave And A Haircut", no Toon can resistance finishing with "Two Bits!"
* Shave And A Haircut: That little tune that plays at the end of songs that goes "Dun dun dun dun dun... DUN DUN!".
* shaving arriving, in case they don't like the one the barber gives them. This is in contrast to male recruits, who are expected to get them there and then.
* "Shaving Cream" by Benny Bell repeatedly sets up each verse for a Last-Second Word Swap with the same substitution:
* Shaw Brothers, but the setting has been updated from feudal Japan to Ming Dynasty China.
* Shaw Brothers ends with the titular character, a girl with supernatural ice powers, giving up her life so that she turns into an ice statue.
* Shaw Brothers features a ninja. Early in the film, the Japanese wife (Yuko Mizuno) of the kung fu hero (played by Gordon Liu) gives him a demonstration of ninjutsu. He is not impressed. Later, the hero fights the wife's old boyfriend, an actual ninja (Yasuaki Kurata) and out-tricks him at his own game. In both cases, the ninjutsu is based more on movies (Japanese ones rather than American ones): sneak attacks, hokey peasant disguises, gunpowder, etc., but does involve some real weapons. Even the costume is based on Japanese theater. The film subverts several ninja conventions: one, the ninja is portrayed as a man of skill and honor; two, the ninja is not out to kill anyone; three, his allegiance lies with his martial arts teacher, not a feudal lord.
* Shaw Brothers for examples. That clumsy, harmless-looking waiter who gets bullied by punks in a tavern? He's actually an expert swordsman and killing machine who can take names by the dozens when push comes to shove.
* Shaw Brothers, sees Jin Liang, the main character, being betrayed by his older sworn brother and becoming a wanted man. In order to evade authorities, he's forced to put a burning hot sword upon the left side of his face, and the aftermath isn't pretty at all.
* Shaw Brothers trapped on top of a three-story tower. Enemy mooks tries to force

Kou-ying into crashing by pushing the ladder over, and Kou-ying barely escapes with his life in the process.
* Shaw Brothers who failed to outlive the credits in more than twelve of the various films in which they're the heroes.
* Shaw faked a fight with several Ring agents and has actually been working with them. In fact Chuck and Morgan both show significant multiple-genre awareness throughout the series.
* Shaw has an undisclosed Axis II personality disorder that is mentioned several times throughout the show. It is described as not lack of emotion, but as if the emotions are there, but just turned way down like on an old radio machine. The symptoms most closely match Schizoid Personality Disorder, but she still shows attachment to co-workers, and through a simulation that takes place inside her head, the viewers are shown the depth of her emotions for her love interest, Root.
* Shaw Industries was run by the evil mutant Sebastian Shaw, and was a major US and international military contractor. Ironically, Shaw built at least one series of the mutant-hunting
* Shaw is believed to have died Reese actually does attempt to train Finch. In this case, Finch refuses.
* Shaw is set up as a recurring character at the end of season 5, only to be killed off in the first episode of season 6 because
* Shawna are occasionally this, most likely attributed to Shawna's slowly growing insanity.
* Shawn and Gus help a man freed from prison find out who committed the crime he was imprisoned for in the
* Shawn and Topanga have a similar tiff over Cory later in the series, during which Topanga insinuates that Cory loves Shawn more than he loves her and makes numerous quips painting Shawn as a homewrecker, while Shawn is jealous and hurt that Cory consistently blows off their friendship to be with Topanga. It's eventually resolved when Shawn concedes defeat, while Topanga realizes that she and Cory work
* Shawn and Topanga kissed for a film project and Cory was extremely jealous. Angela (Shawn's girlfriend) tried to convince him it didn't mean anything, but ended up having to throw him down on the bed and lay one on him to show him that it's different with someone other than your one true love.
* Shawn attempts to confess to Juliet for the first time. He mentions the kids who would flip the box to get it immediately or the ones who went through bowl after bowl until it happened on its own (along with a humorous third one of a kid who would eat anything, including the prize.)
* Shawn becomes this in later seasons. Intellectually he's on par with Topanga, enjoys poetry, and knows about the placebo effect. He also rarely does his assignments on time, unless it's something he really cares about. It's also heavily implied that much of Shawn's "laziness" stems from him
* Shawn Daivari/Khosrow Daivari/Daivari/Sheik Abdul Bashir (Shawn Daivari)
* Shawn Daivari/Khosrow Daivari/Daivari/Sheik Abdul Bashir. Wrestled for Ring of Honor, Lucha Underground and others.
* Shawn-Douglas Brady (born onscreen in 1987), Belle Black (born in 1993), and Philip Kiriakis (born in 1995) suddenly became high-school classmates in 1999. Shawn was aged up relatively slightly, while Belle went upstairs as a little girl one day and came down a teenager the next. Philip was basically fresh off a storyline where his embryo was stolen from his parents and implanted in another woman.
* Shawnee chief Tecumseh resisted the westward expansion of the United States and died in 1813 fighting as an ally to the British in the
* Shawn ends his high school relationship with Angela in freshman year because he wants this.
* Shawn finds a body under a bed in the British ambassador's compound (because he hid from security next to it), but by the time he gets SBPD to legally enter, the body has been moved.
* Shawn Harrison, who played Waldo, got to show off his tap dancing skills in one

episode.
* Shawn has the ability to heal others. In "Becoming", he uses his powers to awaken his cousin Kyle from his coma. He can heal someone who is on the verge of death but he can only bring a dead person back to life for a very brief period, usually less than a minute.
* Shawn Lane: Guitar genius whose style is difficult to pinpoint, but he's often classified as Jazz fusion.
* Shawn Mendes - "Treat You Better" is about a man who thinks he can be a better boyfriend to a woman than her current, possibly abusive, one.
* Shawn Michaels accusing Shawn Michaels of being a fornicator who was trying to make Diana break her marital vows. So, this wasn't an example on screen but off screen, Stu Hart did not like how it made Diana look, making it this trope retroactively.
* Shawn Michaels, and more. Also, Michaels was hailed for changing his attitude, more accepting and giving the rub to others. He finally retired in 2010 but his comeback established his legacy from a one-time great to one of the true icons of the entire business.
* Shawn Michaels and return in 2002 that he mellowed out and became a decent person.
* Shawn Michaels at the close of the show when he came out to hug Shawn.
* Shawn Michaels a year later. Seemingly retired in 1998, he came back to the ring in 2002.
* Shawn Michaels betrayed Chris Jericho by savagely beating him down and smashing him through a glass object. If Kevin's still wrestling in five years or so…
* Shawn Michaels but the director refused. Shawn ended up cutting his hair anyway later on.
* Shawn Michaels didn't lose his smile, but was rather "looking for the smile that [I] lost."
* Shawn Michaels feud, round two, with both men doing all kinds of bodily harm to each other in a high-profile Unsanctioned Match. An especially gratifying subversion came in that match when Jericho had Michaels in the Walls of Jericho, his signature submission hold. Michaels fought for the ropes and finally grabbed them, which in a normal wrestling match would mean that Jericho would have to break the hold. Usually, even in hardcore matches where people smash each other up with weapon after weapon and disqualification isn't even a possibility, the wrestlers still abide by rope breaks for some infuriating reason. However, here... Jericho just didn't release the hold. That is, until Michaels grabbed a fire extinguisher from under the ring and decked him with it.
* Shawn Michaels got out of hand, the entire locker room ran to stop the fight… this was the reaction to everyone who saw it, especially when Taker jumped into the crowd.
* Shawn Michaels, gradually becoming a nice guy who would try to help younger wrestlers.
* Shawn Michaels had a Hall of Fame career despite being a full head shorter than most of his opponents thanks to his tremendous ability in all aspects of being a great wrestler.
* Shawn Michaels, has his own sequence: Manhattan drop, flying forearm, scoopslam, elbowdrop from the top rope, Superkick (aka Sweet Chin Music). He originally had another move after the Superkick, a spinning side suplex called the Teardrop.
* Shawn Michaels he had on today's spot monkeys, being a great practitioner of high-level spots himself.
* Shawn Michaels, Hennig loved to use padlocks and would lock people's bags to overhead pipes, or put locks on people's glasses.
* Shawn Michaels, he would rejoin DX. However, he would find himself set up by them to be assaulted by the Corporation. X-Pac even mentions, "What goes around, comes around."
* Shawn Michaels himself in the first ever Elimination Chamber to win the World Heavyweight title.
* Shawn Michaels, implying Vince was genuinely demonic even if he didn't know it.

The religion basically declared that Vince was a god who could do whatever he wanted, and in order to "convert" to it employees were forced to literally kiss his ass on live television.
* Shawn Michaels in 1997, as Michaels put Hart into Hart's own submission move, Vince called for the bell, costing Hart the match. Whether or not the real-life screwjob was justified or not is still a contentious issue among wrestling fans, even today.
* Shawn Michaels in 2008, where of the three only Batista was really a face (Shawn eventually turned face after Batista left the feud and Jericho beat up his wife).
* Shawn Michaels in 2011. Re-formed D-Generation X (with Triple H) for a one-off appearance at the WWE Crown Jewel event in Saudi Arabia in 2018.
* Shawn Michaels Inevitably, yes, HBK turned on Cena. Shawn even lampshaded it during the 2013 Slammy Awards when he won the Double-Cross of the Year award, finding it strange that despite the number of times he's betrayed someone over his storied career, only three years after retirement does he actually win an award for it.
* Shawn Michaels in order to show his son (who was 2 at the time) what his dad used to do before he was born (up to that point Shawn had been retired from ring action due to a serious back injury suffered at the 1998 Royal Rumble). You can see him wave into the camera as he enters the ring, presumably to his son who was watching from home. It was intended to be a one-off but afterwards, he found his back was able to handle the rigors of wrestling once more and continued his career all the way up to 2010's WrestleMania XXV
* Shawn Michaels in their Hell in a Cell match, were Shawn was the guest referee. During the match, Undertaker told Shawn not to stop the match no matter what. This was after 'Taker had taken a few chair shots to the back and Triple H had just gotten the same in return. Shawn was sitting in the corner of the ring having a nervous breakdown while Undertaker and Triple H were trying to get to their feet after a two count had occurred.
* Shawn Michaels lost the tag titles as Degeneration-X during the build-up to Michaels versus Undertaker at Wrestlemania 26. Michaels tagged in on an unaware Triple H, who turned to argue with him over it. The opponents charged into them, rolling up Michaels and knocking Triple H into a position where he couldn't break the sudden pin. Other examples include managers or teammates who attack their ally's opponent in a match, causing the opponent to win by disqualification.
* Shawn Michaels made this joke about Gene Snitsky, though it was more so "you need to brush your teeth".
* Shawn Michaels originally looked like he was going to avoid this. He retired in 2010 just before his 45th birthday. However, in 2018 he made his in-ring return at age 53 in WWE's Crown Jewel event in Saudi Arabia. Only time will tell if this was a one-off match or if he'll return for special matches in the future.
* Shawn Michaels. Shawn would routinely mock Bret's homeland of Canada, while Bret made racist remarks about Shawn using Mexican-style wrestling. While Bret had the crowd behind him during the actual match because it was Canada, he was still in storyline a mean and humourless Heel. It's interesting considering it was Face vs. Face last time.
* Shawn Michaels's Sweet Chin Music, which became his finisher after he dropped the teardrop suplex from that position.
* Shawn Michaels's team finisher was for Shawn to do a splash from Diesel's shoulders. This was done to mock the team they were feuding with, the Headshrinkers, whose finisher was a splash from the top rope.
* Shawn Michaels that he was severely injured, Jannetty had no choice but to roll him into the middle of the ring for Shawn's finishing move, a flying elbow off the top rope. Luckily, Austin would later get his revenge by A) not becoming a paraplegic and B) winning a $26.7 million lawsuit against the WWF.
* Shawn Michaels, The Showstopper, The Headliner, The Main Event, and The Icon. He often made a habit of introducing himself with all of his nicknames.
* Shawn Michaels usually has one on his gear with a crack down the middle, because he's the heartbreak kid.

* Shawn Michaels, Vince was loaded onto a stretcher and wheeled away. Vince defiantly flipped Shawn off right before he disappeared.
* Shawn Michaels was blatantly marketed at female fans, to the point of doing a spread in Playgirl. Of course, the result was the male fans turning against him in a way that makes the current reaction to John Cena seem positively tame, culminating in Madison Square Garden rabidly cheering Sid of all wrestlers at Survivor Series 1996. In the pre-Attitude era, that type of fan revolt was shocking. Many male fans take great pleasure in the stunned reaction of a female fan in the front row of that match when Sid pins Michaels clean in the middle as MSG erupts in cheers.
* Shawn Michaels, who was slightly small for a wrestler and adopted a somewhat effeminate ring persona for his "Sexy Boy" character, had a deep, gravelly voice like an Old West mountain man (the result of his childhood in Arizona and Texas). In the later years of his career, he grew a beard and began dressing and acting more like how he actually sounded.
* Shawn Michaels will "Tune Up The Band" — a long, drawn out, ring stomp — before attempting his "Sweet Chin Music" superkick.)
* Shawn Michaels would later ask this in 2007 after a particularly confusing DX promo. Trips retorted with something along the lines of "I don't know, they're all on strike!" Ironically, the WWE isn't unionized, so it couldn't actually go on strike.
* Shawn Michaels XXVI, his career. He regained his sanity at this point.
* Shawn Mullins' "Lullaby" mentions as much about the woman who's the subject of the song.
* Shawn Ogg (Lancre's standing army; except when he's lying down) in
* Shawn Ogg of Lancre is, among other things, the captain of the guard, its standing army
* Shawn says he's selling tickets for the Policemen's Ball. Lassiter says "We don't have balls." Shawn says "There is absolutely nothing I can say to that."
* Shawn's childhood sweetheart, Abigail Lytar, who rapidly became a classic false lead. Although she didn't wind up with Shawn, the writers did a good job of presenting Abigail as a likable, good person who actually went very well with her boyfriend. Eventually, though, they broke up on fairly friendly terms.
* Shawn's dad Henry, being a former cop until Season 5, had all kinds of friends on the force, through which he would track Shawn's case and sometimes provide useful leads/background information. Now that he's back on the force as the SBPD external liaison, these don't come into play as often.
* Shawn's. However, before the guys leave she looks at Shawn and Gus's friend and draws the Death Tarot card. Said friend is dead by the next commercial break.
* Shawn's mother Hope Brady was SORAS'd herself, being born onscreen in 1974 but aged up several years in the 1980s.
* Shawn spending more time with Cory than with her, and Shawn trying and failing to resist the temptation to meet up with Cory, voicing highly romanticized descriptions of how it feels to be separated from him. Obviously, Shawn winds up dumping his girlfriend for Cory in the end.
* Shawn takes up this role for a while when Corey and Topanga broke up, with a lot of people commenting he took the breakup harder than they did, and being the number one champion of the get-back-together cause.
* Shawn used Hunter's sledgehammer in tribute the night after New Year's Revolution '07. Hunter had just torn his
* Shaw's Nightmare has a weapon where you launch hen grenades that explode upon impact. Also the Flying Baby and Plopper in the second game when they die.
* Shayera Hol, AkA Hawkgirl was considered this after it was discovered she was
* Shayera Hol (Hawkgirl), from the planet Thanagar, was deliberately given a Latino voice actor as well.
* Shaye Saint John. She originally came from a film by Eric Fournier, made popular by
* Shayla The Pink Mouse to be unknowingly picked up by gay men who thought she was a man until they got her to bed.

* Shayna Baszler: Debuted in 2015. Joined NXT in 2017 and became its first two-time Women's Champion in 2018.
* Shayna Baszler, former MMA fighter who is signed to WWE, is bisexual.
* Shayne thought they were dealing with gangster kids instead of moderately misbehaved Mormons.
* Shays' Rebellion who'd been sentenced to death, though John Bly and Charles Rose were still hanged for looting.
* Sha Yu is "Blood in the water," which is shorthand for "I'm about to pull a flanking maneuver at top speed, followed by a couple minutes of sustained laser fire, followed by almost melting. Cover me."
* Shay Van Buren is prone to of this due to the fact that she's deaf in her right ear after being hit there by a hacky sack in the Third Grade. To the point where it almost seems like "What?" is her
* Shazaam: The Lazy Genie isn't as destructive as some of the others on this page, but he does waste his "master's" wishes in trivial and embarrassing ways.
* Shazam! (2012) reboot of the character, this version of Billy Batson is far less of a jerk. He still has a chip on his shoulder and is quite sarcastic, but it's greatly toned down this time.
* Shazam! (2012): The Wizard is last seen collapsed on the floor of the Rock of Eternity, weak and dying. The story never answers whether he actually is dead.
* SHAZAM! (2019), after the siblings get teleported into a strip club, Mary covers Darla's eyes.
* SHAZAM! (2019), and Billy spends much of the movie fooling around with his new powers, only truly becoming a hero when his foster family is endangered. The implication that no one could ever pass the test says a lot about humanity.
* SHAZAM! (2019) and rejected to wield his powers because he was tempted by the Seven Deadly Sins, and was subsequently blamed for a car accident he had no control over thanks to the Wizard's rejection.
* SHAZAM! (2019): As part of a scheme to allow them both to skip school, Billy turns into his Shazam form and dons a trenchcoat over his superhero suit to pretend he's the father of Freddy so he can take him outside. Despite Billy's bumbling attitude as an adult, it works.
* SHAZAM! (2019), as Shazam and Sivana hover over the streets of Philadelphia facing each other... several hundred feet apart:
* SHAZAM! (2019), Billy has his compass from the fair, while Doctor Sivana has his magic eight ball. Both of them feel they can't turn to adults for help and instead seek guidance from their trinkets.
* SHAZAM! (2019), Billy initially uses his powers to goof off and become famous. However, Freddy eventually calls him out on his selfish behavior, causing him to realize he needs to accept responsibility to become a real hero.
* SHAZAM! (2019): Billy shares his powers with his foster siblings, allowing them all to team up against Sivana and the Seven Sins.
* SHAZAM! (2019) does this with the main protagonist and the main antagonist:
* SHAZAM! (2019): Dr. Sivana's big brother liked to beat him up. Sivana's father didn't step in because he felt Sivana needed to learn to solve his own problems. This, combined with being rejected by Shazam to receive magic, set Sivana on the path of vengeance.
* SHAZAM! (2019): Dr. Sivana's goals don't seem to extend past merely gaining power for the sake of it, and petty revenge against his family. The Seven Sins, meanwhile, are helping him in this so they can use him as an avatar to spread chaos around the world.
* SHAZAM! (2019): Dr. Sivana, who has gained superpowers, grabs Billy Batson and holds his head underwater, preventing him from transforming since he can't say Shazam. To save him, Mary tries to shoot Sivana in the eye. Sivana instinctively catches the bullet, but he lets go of Billy to do it, allowing Billy to surface and transform.
* SHAZAM! (2019). Fortunately, the headshots do nothing but tickle a bit.
* SHAZAM! (2019) had the Wizard make magical displays of characters/events as part of his expositions to young Thad and Billy Batson.

* SHAZAM! (2019) has the school bullies give Freddy a hanging wedgie from a locker.
* SHAZAM! (2019). He leaves the meeting on neutral terms but it's clear as he is walking away that he is on the verge of tears. He's then immediately pulled into a fight with Sivana without further time to process what had happened.
* SHAZAM! (2019): Made and set in 2019, flashback to the protagonist's childhood set in 2008.
* SHAZAM! (2019) — which grabs the attention of Billy since he understands how that feels.
* SHAZAM! (2019): Much of the film is about the protagonist searching for his biological mother and learning to accept his foster family.
* SHAZAM! (2019), only for having Shazam and Dr. Sivana clashing outside his window making a huge BOOM. Which causes him to drop the dolls in amazement.
* SHAZAM! (2019) opens on a flashback to young Thaddeus Sivana in 1974 traveling to the family's cabin in his father's Cadillac, which was a 1980 model at the earliest.
* SHAZAM! (2019) pitch meeting, when talking about Billy beating up the bullies who are attacking his foster brother Freddie.
* SHAZAM! (2019), regardless of whether Billy is truly fit for the position.
* SHAZAM! (2019): Shazam and Freddy see a mugger trying to pull a woman's purse away from her, so Shazam runs up at super speed and tackles the man. Then he finds out that a second before he did that, the woman had already sprayed mace into the man's eyes.
* SHAZAM! (2019) takes place in December and is Christmas-themed, but it was released in April.
* SHAZAM! (2019) the robbers to keep shooting him. Which they duly do until they run out of bullets.
* SHAZAM! (2019): the statue of William Penn atop Philadelphia City Hall is smashed in the climactic battle, and the statue's head falls onto the "LOVE" sculpture in John F Kennedy Plaza.
* SHAZAM! (2019), the wizard Shazam tells Billy that Zeus, Atlas, Achilles, Hercules, and Mercury are some of the beings providing him power. The first three are Greek figures, while the latter two are Roman figures (their Greek equivalents would be Heracles and Hermes).
* SHAZAM! (2019)" to Billy and Freddie's absolute glee. They even ask the robbers to shoot him a bunch of times to confirm it.
* SHAZAM! (2019) to the hero... who is hovering some distance away above a busy city street:
* SHAZAM! (2019), when Billy and the foster kids hide themselves among the attendees at the festival, Silvana calls them out for endangering innocent people.
* SHAZAM! (2019) when Darla in her adult form tells him very earnestly that she's been a very good girl this year.
* Shazam!. After a copyright lawsuit led to his original publisher folding their comics division at the end of 1953, he didn't appear in print again until 1973 at which point the Captain Marvel trademark had been lost.
* SHAZAM! after loosing Shazam, who transforms back into Billy Batson, in the middle of the panicked crowd at the mall where they first fought, Sivana is able to track him down when he sees Freddy, another boy living in Billy's foster home, looking for Billy as a news clip plays of him arguing with Shazam.
* Shazam! also qualifies, depending on how young she's depicted as being.
* Shazam! and Captain Marvel, Jr. have just gotten the hint that Mary's mother does not approve of their relationship getting more serious. Not knowing what else do, they kiss in midair.
* Shazam! and Captain Marvel, Jr. try to sneak into the place, and they suffer the same fate.
* Shazam and Freddy figure out through trial and error that the former is
* Shazam! and villain duo Black Beauty and Illyria exchange insults and taunts at the beginning of their battle.
* Shazam! angrily'', Susan reminds him it is not his decision. Jim tries to talk her out of it again, but he wisely ends up relenting.

* Shazam!, a rocket powered by Doctor Sivana's warpdrive can cover the distance from Earth to Venus in a matter of hours.
* Shazam! as the deuteragonist, and Captain Marvel Jr. as the tritagonist.
* SHAZAM! as the foster care counselor, thus putting that film into the DCEU as well.
* Shazam!, Beautia Sivana lunges at her sister Georgia and starts hair-pulling as soon as they meet.
* Shazam!, Billy and his Mentor "travelled the highways and byways of the land on a neverending mission."
* Shazam!, Billy Batson's broadcast career went from radio to TV and finally to podcasting (that last also a turn towards realism due to the much lower barrier to entry) and Freddy Freeman's mobility aids have come in for some updates.
* Shazam, Billy Batson spends much of the film and his life prior to its events searching for his mother, who was separated from him when he was a young child and whom he assumes loves him more than the adoptive family he has been living with since then. When he finally tracks her down, it turns out she's a pathetic bum who willingly abandoned him upon seeing him being found by authorities who would take him into foster care when he was initially lost, due to being unable to support him and unwilling to try.
* Shazam!, Billy gets unusually angry at Mary and Freddy because they look more concerned with their relationship's issues than with investigating whatever Doctor Sivana is currently up, so he decides to fly to Venus and attack Sivana's base without their help. He gets beaten and captured.
* Shazam!, Billy, Mary and Freddy stopped getting old when they became the Marvel Family fifteen years before. Freddy and Mary are going to ask for their aging back, even if it means relinquishing their powers, in order to get married, and Freddy is willing to change jobs so Mary's mother doesn't cut her out of the family fortune. Billy frowns and bluntly states they are making it sound like they care more for being rich than for being heroes. Mary gets angry but Freddy admits that Billy has a point.
* Shazam! but ended up being bought out by DC after a massive lawsuit. They (as well as Fawcett's other heroes) are currently part of the DCU.
* SHAZAM!... but Shazam can't hear one word of his "big evil-guy speech" because he's too far away and there's too much background noise.
* Shazam! calls out his namesake word to take out the Paradooms attacking him.
* Shazam!, Captain Marvel, and flies up to open the parachute pack himself.
* Shazam! Captain Marvel had one of the earliest such arcs in the 1940s when he took on the Monster Society of Evil that ended with him discovering that its leader is the worm Mr. Mind.
* Shazam!: Captain Marvel has a really special cape of his own: it's relatively short and looks great slung over a shoulder, displaying its markings.
* Shazam!: Captain Marvel, Jr. fought a villain named Greybeard a couple of times. Sentenced to 99 years in prison when he was a young man, Greybeard served his entire sentence. On his release, he became a supervillain, basing his crimes around the theme of age, to take revenge on a world that had passed him by.
* Shazam!: Captain Marvel, Jr. had a foe called Greybeard. As a young man, he was sentenced to 99 years in prison, to which he sarcastically told the judge how considerate he was to not make it a life sentence. However, he served out his entire sentence and, once free, began a crime spree based on the theme of old age.
* Shazam!: Captain Marvel's worst enemy (not his most frequent — that'd be Dr. Sivana) has always been Mr. Mind, a tiny caterpillar-like alien with enormous psychic powers.
* Shazam! comics, where Mary's magic word is explicitly said to refer to female mythological figures rather than the male ones who empower Billy and Freddy, but one of her powers is "the fleetness of Zephyrus".
* Shazam! did. Their eternal youth creeps their friends and co-workers out, has negatively affected their social life (Billy lost his girlfriend because of it), and clued Edith Bromfield in on her daughter Mary's secret identity.
* Shazam!, Doctor Sivana douses Red Crusher with a growth serum which turns him

into a fifty-foot giant, and then he sends the mace-wielding human soldier out to rampage through North America.
* Shazam!, Doctor Sivana intends to take over the world to take revenge on everybody who ignored him or put him down.
* Shazam!, Doctor Sivana intends to use his strength-augmenting disks to rip Captain Marvel's head from his shoulders.
* Shazam!. Doctor Sivana is prone to cackle madly. It is so annoying of a noise everyone wants to punch him just to shut him up.
* Shazam!, Dr. Sivana angrily shouts his daughter to shut up when she points out how badly his master plan has failed.
* SHAZAM!: Dr. Sivana ends up in prison after being depowered, though Mr. Mind has plans and talks to him about them in his cell.
* Shazam!, Dr. Sivana grumbles that his subordinates are unable to think for themselves or do anything without his input.
* Shazam!, Dr. Sivana's compound is located on the middle of a Venusian jungle. It looks like "a cross between two movie genres, the science fiction epic and the gangster film."
* Shazam!, Dr. Sivana's eldest son figures out his father's descent into villainy was a combination of his wife's death and being turned down by everyone when he tried to make money legitimately.
* Shazam!, Dr. Sivana slaps the back of his son's head when Thaddeus Jr. whines that they will be done if Sivana's contingency plan fails.
* Shazam!, Dr. Sivana takes over every tv screen in the world to claim credit for Mister Atom and Red Crusher's hyper-destructive rampage across North America, and announce he is about to televise the execution of the Marvel Family and their allies. Following which, he will begin his conquest of Earth.
* Shazam! franchise, Captain Marvel Jr. stood out boldly with his gold-on-blue costume with red cape compared to the rest of the Marvel Family's gold-on-red motif and white cape.
* Shazam!: Freddy, in the New 52 reboot. Not only is it near-character assassination compared to his Golden Age self but he's not even good at it (having sold a forged doctor's note for a gynecological disease to a boy).
* Shazam! get along with their older siblings. After Thaddeus kidnaps both Magnificus and Beautia at guntpoing, Georgia asks her father permission to kill her sister, getting actually upset when Doctor Sivana forbids it.
* Shazam! has him following his favourite radio broadcasts to Earth then vowing to conquer the planet when he finds out that Edgar Bergen's dummy, Charlie McCarthy isn't real.
* Shazam!, he and his "siblings" Nabu the Mystic, Amethyst of Gemworld and Lady Terataya (who created Dove of Hawk and Dove) and etc. are Lords of Order. These were incarnations of the concept of Order in the universe and one of the major sources of magic powering the universe. The above mentioned individuals were Lords of Order who empowered superheroes or was a hero themselves. Their counterparts are the Lords of Chaos that represent chaos in the universe.
* Shazam!, her first enemy was a guy named Dr Savant, leader of the Objective Order, fanatical scientists who destroyed the Rock of Eternity because magic "just doesn't make sense".
* Shazam!, Ibac and the Acrobat gang up on Captain Marvel and manage to make him pass out. In the wake of his victory, the Acrobat is going to kick Marvel's head, but Ibac stops him. It looks like he is showing respect towards a downed adversary... until it's stated he simply doesn't want Acrobat to rouse Marvel by accident.
* Shazam! is, if anything, even milder than Supes himself under most writers, justified in that the Big Red Cheese's alter ego is a kid several years too young to drive.
* Shazam!, is the most powerful sorcerer in the DCU and can go toe to toe with gods in a fight.
* Shazam!. It is stated there should not be plastic masks capable of deceiving the human eye... but Doctor Sivana has somehow succeeded into creating them.

* Shazam!, it was a fairly safe bet that they were new to the vast majority of readers.
* Shazam!, Joyce Albright designs two superhero costumes resembling her husband's, Captain Midnight, but hers is clearly modeled after a female outfit.
* Shazam!, Jr.-, but Mary has noticed her mother is reluctant to let them get married. Mary doesn't want to think badly of her mother, so she wonders if Edith's balking out because her snobby business associates would not think highly of someone who lets her daughter marry a newsboy. Compounding the issue, Freddy is perfectly willing to elope, but Mary wants it to be a proper ceremony... which her mother would have to pay for, since they cannot afford it.
* Shazam!, Jr.- talk about Mary's mother knowing her secret identity and discuss the troubles caused by their agelessness over burgers in a diner. To their credit, they speak as ambiguously as possible.
* Shazam! mad scientist while still being a threat, Mind for being the Marvel Family's most ruthless and terrifying villain.
* Shazam!: Mary Marvel wears a skirt instead of tights for her uniform.
* Shazam! (minus the "Jr"). He's now known as Shazam, having taken over for Billy Batson, who took over for the Wizard Shazam as guardian of The Rock of Ages.
* Shazam!: Mister Mind, an evil telepathic space-worm from the planet Venus.
* Shazam never crosses their minds) becomes a viral sensation as a result.
* Shazam! often played this role to Billy, Freddy, and Mary. For a while in the 1970s, Uncle Dudley grew a mustache and, at Shazam's behest, started calling himself Billy's mentor, in order to tie into the then-current Shazam TV series (see Live-Action Television section).
* Shazam! on adult reporter Helen Fidelity (who isn't interested for obvious reasons), and Helen has an EXTREME attraction to Billy's magic-induced grown up alter ego, Captain Marvel.
* SHAZAM! on Douban and almost $300 million at the Chinese box office.
* Shazam!, Phantom Eagle finds size-changing magic more difficult to believe that all other instances of magic that he has witnessed.
* Shazam! powers is one of the world's strongest heroes. Artist Mike Raboy used to draw young Mr. Freeman as a Dickensian waif — he based his appearance on Freddie Bartholomew — whichever form he was in.
* Shazam!'s explanation for the franchise's legally stipulated 20-year absence from publication was that the main characters had spent that time in suspended animation thanks to one of Sivana's gadgets. Early on, Billy went to a teen dance and found the styles of clothing, dance and music of the early 1970s jarring compared to what he had been used to in the early '50s.
* Shazam's go to approach if the situation doesn't call for immediate violence, and he's often successful at it.
* Shazam!. She thinks it's gross, but he's so happy to have tracked her down that he's just amused by the whole thing.
* Shazam's powers give him some control over machines with a chance of breaking them. He can use his lightning to charge phones and raid ATMs and vending machines.
* Shazam! story, Captain Marvel travels to the very distant future of 81,953, where evolved rats rule the world and capture humans in man-traps. The humans are the remnants of those that remained when the rest of humanity left Earth for the stars, and they want to take back their world from the rats. But the rats are revealed to be a peaceful people who re-educate the humans they capture, teaching them to abhor violence and cruelty and giving them positions of trust among them when they are ready, and use the man-traps as a means of defense against the humans that are still trying to kill them. The humans of the future Earth turn out to be the real villains of this tale when they steal a nitrogen shell from the rats that would wipe out the entire Earth and try to set the weapon off just to get rid of the rats, which Captain Marvel has to stop before dealing with them.
* Shazam!, Taia likes watching wrestling, among other reasons, because she likes the sight of sweaty, half-naked, brawny men.
* Shazam!, the fact that he's (apparently) based on Billy's own personality means that he freaks out and runs away.

* Shazam!: The New Beginning: Billy after his first encounter with Shazam, when he was transformed back to his original self from being Captain Marvel, thought the whole meeting was just a dream when he was left standing at the entrance of the subway station... until he calls out Shazam's name again and realizes that it wasn't.
* Shazam!: The New Beginning: Billy Batson's parents died due to Sivana having somebody sabotage the car so that it would crash and cause an accident.
* Shazam!, the reporter that Captain Marvel goes to for help takes a very obvious look at his crotch while standing right in front of him.
* Shazam!, the threesome and Uncle Dudley were transported into the "Fourth Dimension". The Marvel family spent most of the episode unable to summon their powers, leaving them mostly helpless against the dimension's monsters and villains, until they realized they had to speak their magic words backwards. It was also an example of "Your Science Is No Good Here", as Dr. Sivana's shrink ray worked backwards as well.
* Shazam!. The villain known as Acrobat is not good at making overdramatic speeches and he lacks the power to back his threats, so nobody takes him seriously.
* Shazam -the wizard- was born eons ago. His power made the first super-hero and virtually immortal, until he asked for the gift of aging.
* Shazam!. They sometimes join other teams individually, however, usually fitting into this trope when they do. The problem with teaming them up with, say, Superman and not feeling redundant is addressed by emphasizing the magical, god-based nature of their powers. For instance, Superman is vulnerable to magic based attacks and is impressed how Captain Marvel is far more resistant.
* SHAZAM! to see if he's really bulletproof, or if it's just the superhero suit. Billy enthusiastically agrees, and then objects as he belatedly realizes the problem with this idea. (Fortunately, it turns out that he's invulnerable all over.)
* Shazam!, two old, giant-sized enemies of Captain Marvel, Mister Atom and Red Crusher, are rampaging through America after crushing the combined power of Canadian and USA land forces. The President sends the Air Force out, but he is painfully aware that if an aerial bombardment does not work, and the Marvel Family fails to appear, he might have to drop a nuke.
* Shazam! villain Doctor Sivana, who declared himself "Rightful Ruler of the Universe".
* Shazam! villain Dr. Sivana (who predates Luthor by a couple of months) is another bald mad scientist, who is also diminutive, gangly, ugly, and wears coke-bottle glasses. He has a thing for talking worms.
* SHAZAM!: When Billy Batson is taken in by foster parents Victor and Rosa Vasquez, they already have five happily adopted foster kids. Billy at first isn't interested in having a meaningful relationship with the family, but eventually defrosts, and he becomes this as well by the end of the film.
* Shazam! when the Squad of Justice makes it to Venus and Bulletman gets ambushed by a giant frog. Bulletman gets rid of the monstrous amphibian, but not before its tongue drips viscous slobber all over his face.
* Shazam!), while the adult Superman became more wise and mature with age.
* Shazam! who walks with the aid of a cane, and whose disability only mildly impairs him.
* Shaz Domino also incessantly brags about his powers before Ichigo blasts him away.
* Shazzan, Chuck and Nancy each wore half of the ring. To summon Shazzan, they put the ring together and said "Shazzan!"
* Shazzan has the titular genie that can be summoned when the two kid protagonists joined their halves of the magic ring in which he was sealed. Shazzan was very powerful and easily stomped every foe the kids faced, but he could not send them home. Only Shazzan's true master, the Wizard of the Seventh Mountain, could do that. Aladdin and the Genie of the Lamp also appeared twice in the series.
* Shazzan: The eponymous character is a giant genie summoned by magic rings.
* Shazzan the equation it's completely useless to Mercurad. Mercurad then asks for

the power of a genie. Shazzan complies, but then mentions that all genies have masters. Mercurad's master will be his own monstrous gatekeeper. Mercurad immediately rescinds his desire to be a genie at this point. Finally, Mercurad decides that a simple payment will be enough: a loaf of bread, a piece of cheese, and some fresh water. Shazzan grants this wish with no problems at all.
* Shazzan themed world, trying to find the true owner of the rings so they would be returned home.
* Shazza, who gets ripped in half and carried off still screaming by a swarm of juvenile Bioraptors.
* She’s lost most of her colleagues. Yet even after all that Jill is still wilful as ever and just tells Chris to hurry up and save the world immediately after he brings her back to normal. Oh and last we hear from her? She’s stuck in hospital naturally recovering but still wants to get back in the field as soon as possible.
* she’s smart enough to fool half the Straw Hats but becomes emotionally volatile when her plan is foiled and she falls in love with Sanji.
* She absolutely did. It was all part of her plan to turn the whole town into loyal vampire thralls.
* she accidentally causes a psychic simulation to go awry, ultimately putting the rest of the team into a coma speculates that she could be one of the most powerful Martian psychics ever, perhaps even stronger than him.
* she accidentally rewound her father out of existence with it. This caused her distraught mother to disown her, leading to her ending up under Kai Chisaki's "care"
* She, a Chinese by Guo Xiaolu follows a disaffected young Chinese woman from rural Sichuan to Chongqing, and from there to London.
* Shea Couleé and winning the fifth season of the All Stars spin-off. They identify as non-binary and use singular pronouns out of drag and she/her pronouns in drag.
* Shea Couleé in Season 9. With four wins, Shea looked like the clear choice for the crown, that is until the lip-sync for the crown finale twist was introduced. Shea was put against her best friend Sasha Velour, and Sasha ended up completely demolishing her with a cascade of rose petals falling from her wig.
* she actually doesn't understand the concept of death or the consequences of her naive but dangerous actions.
* She actually got a job with a dance troupe in Tokyo but the point stands.
* She actually has a new daughter every couple of decades for the single purpose of stealing their bodies when her own grows too old
* (she actually isn't, and was chasing the bomb owner to stop the bomb from exploding) they've been chasing the whole episode knows how to defuse it.
* She actually murders a man in cold blood after disarming him, after he made the mistake of taunting her that he knows that Chuck is the Intersect and will tell his bosses. Chuck witnesses the murder, which doesn't make things better between them.
* She actually wrote the killer's name, Leon, upside-down and backwards; the diagonal stroke in the N was mistaken for a smudge. Further complicated by the fact that the investigators are Japanese high school students who aren't as familiar with English, though apparently Japanese players caught on quickly. Furthermore, since the cast is on a Last-Name Basis
* She adds a mustache. Kennedy begins to feel attracted to her. As Kennedy's adoptive parents are a gay couple, he has a lot of soul-searching done.
* She: After Ustane starts a relationship with Leo, whom Ayesha wants for herself, Ayesha has her executed.
* She, along with a house of other pregnant women she invited over, also starts craving watermelon. When Jesse points out that watermelon is out of season, and he'd probably have to go to Mexico to get one, Becky responds with "You've got a car."
* She already had a lot of tattoos. The spiderweb is not real, although she hates it with a passion because of how sticky it gets.
* She also applied her knowledge to other tasks, such as constructing a spaceship

from plywood,
* She also became distracted by bunnies in the field when she was trying to give her mission briefing in the sniper bonus mission.
* She also blasts anyone who dares to badmouth Urkel, despite the fact that she herself can't stand him most of the time.
* She also blasts it out this way against a Russian mercenary at a convenience store in the
* She also can't wrap her mind around the notion that Marinette's kindness
* She also claims to speak the language of whales, which just involves speaking
* She also considers the original experiment to fall in this category.
* She also did this once before by accident, on Haji. He's exactly the same as before. In fact, the reason he needed this trope is the same kind behavior afterward
* She also does another one in "Animaestro", while she and Marinette were planning to split Kagami and Adrien at the movies.
* She also does a series on creative recipes made by people experiencing extreme poverty or food shortages, including
* She also does it during the pre-fight banter with other characters in
* She also does this with the snakes she controls instead of herself: if she can get something into an entry point to your body she can send in hundreds of snakes which let her track you wherever you are and can rip you to pieces whenever she tells them to.
* She also dubs Chell "Strength" (a card usually depicting a woman grabbing a lion by the mouth) and GLaDOS "The Empress".
* She also expressed her disgust at detractor blog YogPetShame accusing her of being thin-skinned and giving totally unwarranted relationship advice.
* She also flies into impassioned rages at the drop of a hat. I.E. The very next strip.
* She also forgets her promise to appear on her best friend’s TV show once the Jerk Jock invites her to a party on the same night. What’s more is that she doesn’t even say she’s canceling, she just forgets about it, despite remembering to cancel a date with the nice guy also previously scheduled that night.
* She also forgets that as a beastkin she has super-senses, until after the battle when she realizes
* She also gets kidnapped by Zaheer and his gang in "The Terror Within" after she and Naga were tranqulized with shirshu darts. If it weren't for
* She also gives an interesting twist to why Sidhe lifestyles are so extravagant and decadent; they are completely incapable of
* She also gives it to herself in "Cat Fingers": Pearl blames her for Steven's predicament and later claims that the moral of the episode is never to listen to Amethyst. Both times Amethyst replies "That's fair."
* She also had a brief fling with Imp y Celyn, who was chosen and empowered by the Music With Rocks In.
* She also has a mushroom allergy. In one episode, this just caused her to comically swell up at an inopportune time. In another, it gave her random, incomprehensible visions, such as her father and brother dressed up as sailors and digging for gold on the moon.
* She also has an actual whip for more extreme measures, such as the time he tried to molest her in her sleep.
* She also has a nasty habit of making characters change position by rotating their models, which tends to make them look more like mannequins than people. The most infamous example is when Sokka and Zuko carry Aang off after a sparring session, but it also makes the Toph/Aang sex scene unintentionally hilarious when you realize that the characters are in the
* She also has shades of one when training the pegasi in "Hurricane Fluttershy", complete with the same whistle and cap she wore in "May the Best Pet Win" but she's a lot more lenient here. Particularly
* She also has talked about working or planning to work on a story from Renesmee's

point of view, a story from Leah's point of view, a mermaid story, a ghost story, and a time travel story. There's no sign of any of these. Nor of her
* She also has the privilege of being a VIP of two fandoms — while she is mostly known for her
* She also includes occasional bonus chapters, many of which were adapted into the first anime, including Jean Havoc and Armstrong's little sister, Ed vs Roy in an alchemy battle, and Izumi's backstory.
* She also invokes this trope when the Titans throw her a birthday party
* she also lies to you constantly, manipulating you (and everybody else) to achieve her Machiavellian purposes. Eventually, she reveals herself as the Big Bad.
* She also mentions one day when the horse she was on had an audibly bad case of gas, and a shot involving a dog that was fascinated by the camera and kept staring directly into the lens. The people who were offscreen in each shot had to all wave dog treats at it to distract it.
* She also mistook the Palace of Versailles for the White House and was surprised the Louvre was an art museum and not a shopping mall, despite claiming to be
* She also nicknames them "Mystery Twins". Dipper initially dislikes it, but it soon grows on him.
* She also picks up on his unusual scent, which is why she's later shown asking her scanner about his species and disbelieving the result.
* She also plays this trope literally—in one of the fighting game spinoffs, she's surprised to learn there are people beyond the barrier who
* She also play this trope on short clips (e.g. Sadness cries a lot of tears after Joy shows a flower to her.).
* She also presents an alternative theory right there in her comment: "Either she
* She also quite enjoys nursing Angel back to health and in the Season 8 Comics we discover one of Buffy's sexual fantasies involves Angel and Spike chained to her, with Buffy dressed in a
* She also sang. Read those lyrics again, people... it's not about missing someone who's died. It's about missing someone who's broken your heart and does not care about you anymore and wishing they'd reconsider.
* She also says it was unfair for Carolina to request for two A.I. after giving up her originally assigned A.I., especially to the agents who were due to get them next.
* She also says that in professional games, it's much more common for the losing team to catch the Snitch—
* She also says this to him when she arrives at his lab for a date and sees Jimmy dressed up nicely for the occasion.
* She also seems to be attracted to Modern Scott, but he quickly says it can't ever happen.
* She also seems to be on her way to fulfilling her own personal interpretation of the part regarding her children - "gold shall be their crowns, and gold shall be their shrouds". She sees it as "they'll be crowned, then they'll die and then you'll be left with your life wrecked and you'll die" — even though there are other interpretations. They're all born blond — aka "golden-haired" (which is a bit odd for Baratheons), hence... they may not necessarily need to actively rule anything (with her as the puppetmaster of their lives) to meet the "golden crown" conditions — but,
* She also seems to grieve as she devours Carlos' remains after his failed murder/suicide attempt kills him alone. The poison he uses, though, greatly weakens the demon of Gluttony, thereby allowing Banica to later resist and commit Autocanibalism.
* She also seems to only be able to communicate in run-on sentences. In the end, you discover that the commercial is an advertisement for Taco Bell's "Smother Burrito".
* She also sets up a huge one for Celestia during the Summer Sun Celebration, which she repurposes for
* She also shot herself plenty of times, like to convince a mind-altering
* She also sports one for a substantial chunk of Act 6 Intermission 5, creeping

John out immensely. This latter instance has become
* She also stopped learning the alphabet because she'd mix up 'm' and 'n' and didn't want to continue until she didn't replace them with each other.
* She also takes her recovering alcoholic former boyfriend out to dinner before his wedding. He orders salmon and seems to be getting rather tipsy somehow. Seems the sauce contains whiskey, the alcohol of which would normally burn away while cooking. However, he unknowingly ordered the sauce
* She also thinks her father is creepy because he checks in on her at night, despite the fact that a) he's her father, b) he's a police officer, c) she endangered her life numerous times and his worrying is entirely reasonable, and d) her vampire boyfriend has been watching her sleep before they even started dating and
* She also tries to keep her pregnancy a secret from her husband with a weary "We've beaten worse odds before."
* She also tries to subvert human culture to more closely resemble her species', but it fails miserably because of basic biological differences (
* She also turns into a dolphin and mates with other dolphins at one point.
* She also uses gaslighting and confusing wording to try to get her children to fight over her affections. It works perfectly on Buster and pretty well on Leslie, but Michael and GOB rarely bother with her.
* She also uses it on Sai to spy on Danzo with both being none the wiser about it.
* She also uses that conceit, from time to time, to poke fun at literary clichés of her time, by saying things to the effect of "If this were a common story,
* She also very briefly notes on seeing Legend (who dresses in the archetypal superhero spandex) for the first time that he has a "perfect" body that is well worth a second look.
* She also voiced Sun-Hwa Kwon, a native Korean, in the Japanese dub of
* She also wore a Napanee Home Hardware t-shirt, a hardware store from her tiny Ontario hometown, for an appearance on
* She also wore the old Ms. Marvel costume for a very short time during the
* She always performs her Fatality, which shows her killing your character and rewinding time to bring them back to life... only to do it again and again, ad infinitum, until you do something in the menu.
* she always seems to look after them deferred leadership of the All Womens Team to, implying she may regard Chizuru this way as well.
* She & Him namechecks Orpheus, and the chorus cheerfully urges the listener against this trope, as "all you'll ever get is the dust from the steps before".
* Sheamus, a fellow recipient of fan disinterest. This sorta got the good heat back on Reigns, but only in the sense that they preferred him to Sheamus, not actually liking him. And as if to rub it in the face of the fans that Reigns was the next big thing, he was given a stable of his own to combat Sheamus' League of Nations, called The Roman Empire, featuring The Usos and Dean Ambrose as Reigns' lackeys. When Reigns eventually won the feud with Sheamus, the negative reactions came right back.
* Sheamus and Rusev all have the same start-stop push issue stemming from "accents".
* Sheamus and said he was on pins and needles waiting for another swing at the world title.
* Sheamus has recently strung together a finishing series. Forearm shots to the chest of an opponent trapped in the ropes to a running knee lift followed by a diving shoulder block, a Brogue Kick usually finishes after that, and if they kick out he'll use the High Cross Powerbomb.
* Sheamus in decending order. Sheamus first appeared on TV as a (supposed) jobber before plowing through on his way to being a monster heel.
* Sheamus O'Shaunessy, the ginger brawler of the Global Pro Wrestling Alliance...but don't let him hear you call him ginger, unless you want to brawl.
* Sheamus. Suddenly cue large amounts of threads bashing him for not looking old enough or some even complaining about how weak his kicks were. Oh boy.

* Sheamus: Won his first WWE Championship at the very end of the previous decade, so most of his accomplishments were in this decade. Largely became a base breaker over time.
* Sheamus won their feud and beat him for the World Heavyweight Title. Granted he didn't take too kindly to Big Show's insults and attacked Big Show for that.
* she, an already unpleasant person, descends over the Moral Event Horizon.
* She and Adam are attacking a Schnee supply train. Adam orders her to destroy the train. When she points out that will kill the humans on it, Adam doesn't care. Blake turns her back on Adam and decouples the train (saving the humans), abandoning the mission and severing her ties to the White Fang.
* She and Henry sabotage the engine and then bail out of the rocket through the foreward left vent. While the sabotage is successful, Charles ends up going to the wrong vent and fails to save Henry and Ellie.
* She And Him of the 2000's on the ukulele, accompanied by M. Ward on guitar. They play jaunty indie pop.
* she and Lynn end up sitting side by side, sharing the food and the show.
* she and Oliver learn Sara is alive in the first place. The three then have a long overdue talk, while Ted looks on, openly amused at the family drama.
* She and Teen Angel have a moment when he catches her when she's falling.
* She and Teen Hank kiss. She instigated it on top of that. The events of
* She and Teen Scott were in love until they got to the future. Now she's not so sure she wants him anymore given what she knows about who/what he grows up to be, while he's still smitten, thinking that their eventual wedding is "proof" they're supposed to be together.
* she and the Twelfth Doctor will have to go back to the nineties to make arrangements for an alliance with the Silurians living underneath America to help them fight off the current invasion.
* she apparently can't comprehend how they could be so happy all the time.
* She apparently continued training off-screen, because by season two she could even
* She appeared in all her radiant beauty at the top of the stair; he couldn't help but stare at her.
* Shear Madness allows audience members to question all the suspects and vote on the identity of the murderer. The audience is always "correct" - That is, the play has multiple endings and whoever the audience chooses always turns out to have been the killer.
* Shear Madness, a murder occurs off-stage. In the second act, audience members are allowed to question all of the characters in the play and try to figure out who the murderer is. The ending of the play changes based on what the audience decides.
* Shear Madness": Jessica's cousin Ann loses her groom shortly before the wedding when someone stabs him in the cellar. To make matters worse, this same thing has happened before, and the last time, her brother got accused of it, so she has to deal with the possibility of losing him too.
* Shear Madness; the characters are aware of and interact with the audience throughout the play, and suggest audience members' theories to the group.
* Shear Menace: When the Improbable Weapon is a pair of scissors, grass shears, and other similar cutting devices.
* she arrived at the battle too late to save anyone but Undine, who was at death's door and trying to give Tessa a rousing speech to stay strong escapades.
* Shear the sheep, then weave the wool into sheer stockings (good luck with that).
* she, as he rejects the unnaturally beautiful Sirens in one episode, and at the same time hates their supernatural singing, while he's previously states he loves his wife's singing, despite her gruff and shrill voice. And to be fair, his wife makes up for it with her personality... as long as she's in a good mood.
* Sheatheria, a bizarre alien planet that defies the laws of physics: it has an equatorial ice cap separating the north and south hemispheres, and is three times bigger than Earth but is less dense and thus has the same gravity. On the planet, various Earth lifeforms, from different geological eras from the Cambrian to the Permian to the Mesozoic to the Cenozoic, are introduced at intervals, and evolve

alongside other creatures they never coexisted with during their time period.
* Sheathes their sword and sheath, using the latter as a defensive or support tool.
* she attempted to interfere in the investigation. Harding was arrested, charged with $160,000 fine, and banned from figure skating for life.
* She avoids that dilemma by asking those in favor of letting her pass out ballots to say "yes". The proposal is approved with unanimity.
* Sheba and her father Commander Cain share a very strong bond in the
* Sheba, Baby plays yet another ordinary citizen going vigilante to avenge a loved one.
* Sheba, Baby whose father is murdered by gangsters trying to take over his business.
* she barely notices that her hand is dangling by a thread from her wrist and shows far more reaction to state of her companions, one of whom has the top half of her head blown clean off. Again, likely justified by shock.
* Sheba son of Bicri had his head thrown over a town wall in 2 Samuel 20.
* She became the spectacularly nightmarish Princess Mombi in the movie
* She becomes all the more dangerous (and this is saying a lot) after she and Chuck became the
* She Becomes a Tree at the main characters' company wears matching clothes — a plaid vest and skirt, a white button-down shirt and a neckerchief. Kisaki, however, wears a black jacket over her vest and doesn't seem to wear the neckerchief.
* She Becomes a Tree Kisaki and asks her out to lunch, Kisaki remembers Chishiro from when their boss introduced Chishiro to the rest of the company. In truth, they met each other much longer ago; when they were children, Kisaki used her tree body parts to retrieve Chishiro's shoes for her.
* She becomes extremely close with Thomas Theisman, to the point of being
* She becomes one of the reasons that Hera is successfully convinced to divorce Zeus.
* She becomes this for Kallen, due to the latter being Arcee's partner. She's gone out of her way to try and kill the red-head both for fun, and for revenge for the many times she's been shown up by Kallen.
* she becomes very worried that she doesn't love Riki, she just thinks she does because she's so broken and insecure that she'd be reacting this way to anyone who showed genuine affection towards her. Riki says that he doesn't care and loves her anyway.
* she began to warm up to her in later episodes, saw Akko as nothing but an reckless and naive nuisance.
* She begins as a sweet, demure girl who mostly uses her magic for healing. After meeting Asta, she's inspired to become stronger. By the time of the Royal Knights Tournament, she's learned Attack spells and become much more confident and headstrong, giving orders in battle which even pleasantly surprises Asta.
* She Blinded Me With Science video complained of random strangers coming up to him and shouting "SCIENCE!" at him.
* She brings fried tofu on ramen for her lunch. She offers some to both the
* She broke into Seiji's apartment and found the head, so Seiji tried to kill her. She survived, and Namie gave her Magic Plastic Surgery.
* she but it would certainly make Ron be less of an asshole than portrayed.
* She, but whether it's truly benevolent, or a god, or even cognizant isn't yet clear.
* Sheb Wooley: The eponymous monster in "The Purple People Eater" only eats
* She can also use the same special as a powerful attack, and her snapback move to knock the current enemy away and bring their teammate in uses her defib paddles, too.
* She can, as there are some tools that are used by people with little or no use of their fingers to pick up objects like CDs and DVDs, and with keyboards, she can hold a chopstick in her paws. There are some quadriplegics who type that way.
* She can die given sufficient damage. In one episode, her body is pulverized by a claymore mine. Luckily, this episode has a

* she can grant wishes to anyone she wants even if they aren't aware of her existence, which is how Jaune received the amulet at the start of the story.
* She can refer to this trope when you meet her, too. "Here for a Blood Bath?"
* She can see perfectly fine without them. Actually, she asks Shiki at one point if he has a glasses fetish and wants her to continue wearing them while she
* she can try and date Bob instead and ranks lower than him in the same Chain of Command.
* she can't understand a word of it. while chasing Peter through Musutafu.
* She caused an uproar in the press when was seen drinking, which would've been shocking if not for the fact that she was in her mid 20's at the time. Then again, some states still had alcohol prohibition laws on the books, so this is also a case of
* she chooses to save the prince, who's nearby, rather than try to grab her brother and be caught in a tidal wave them, and the Queen can stuff it.
* she chose a suitor, he turned out to be an assassin. The fact that Adolin is a prince certainly doesn't hurt.
* SheChotic: After Maxine's alter ego vanishes and she confesses to the crimes, it's revealed that her half-sister is starting a different scheme, against her this time.
* she chucked it onto one of her own acquaintances. According to the last verse, the candle was "...passed to every single woman, and most gays", providing them all with "the gift of having a gift to give away."
* she claimed she was the last Waterbender of the South Pole, thus protecting her daughter.
* she claims she is attracted to my power and good looks and will gladly betray her companions if I just let her in on my plans.
* She Cleans Up Nicely: An unattractive character who dresses up for a party looks beautiful.
* She Cleans Up Nicely: character is dolled up to look sexy vs. character looking sexy even without fancy clothes.
* She Cleans Up Nicely. The rest of the wives are likewise put into very flattering sundresses.
* She clearly wants more than just "cross swords" with him. Unfortunately for her, Guybrush is devoted to Elaine and is completely oblivious to Morgan's advances.
* She comes with a baby penguin that can be found in an egg in her tummy.
* She completely falls into this trope by the end of Season 5 when she plans to frame Howard and destroy his career to get the money from the Sandpiper case.
* she confesses her feelings to Negi, when Asakura, trying to learn more about the spoilered incident, asks if she slept with Negi.
* She confronts and reconciles with her father in Avatar: The Last Airbender – The Rift
* She constantly criticized, mocked, and looked down on her elder daughter Kazue's choices and deemed everything she did not good enough. For example, she criticise her for getting married to Minegishi, for divorcing him, and she mocks her again when she
* . She continues to have this reaction throughout the entire scene, which is written from her point of view.
* She continues to make similar jokes in the third game, until Shepard eventually asks her to stop. She muses that her timing sub-routine needs to be adjusted.
* she convinces both Parian and Flechette to defect to the Undersiders. She also uses tactics from other corrupters such as Jack Slash and Tattletale.
* She could be considered this to Isabella (helping her sometimes in later seasons and special), even though they aren't actually related.
* She Couldn't Say No (1940)) representing opposing sides in a modern-day breach of promise suit.
* she creates a gelatinous creature that emits pheromones causing the guys to see it as a room of naked women, with whom they have sex.
* She-Creature, a mermaid kills an entire crew of men out at sea, letting the only female on the ship live.

* she cursed everyone into being whatever their costumes made them look like.
* she cursed her more magically-talented sister Eda the night before a witch's duel for a spot in the Emperor's Coven. Lilith used the curse to take away some of Eda's power, thinking it would last for one day. When the time came for the duel, Eda stepped down before the duel started and let Lilith have the spot, knowing how much she wanted it. To make things worse, when the curse kicked in, Lilith realized that not only did it cause Eda to transform into an owl beast, but that the curse was permanent. Eda ends up as a social outcast and a pariah, kicked out of the Boiling Isles by everyone who saw her transform. Lilith's desperation to have Eda join the Emperor's Coven and get the curse removed in the story proper is spurned on by Lilith's guilt that she basically cursed her own sister and ruined her life for no reason.
* Shed 17 fan film has this trope as an explanation for how the trains (and other vehicles) become sentient.
* Shed 17. It eventually turns out that Thomas was cloned and converted dozens of times until the result was perfect, whereas the others were just sent out after the first attempt.
* She Daisey has a song called "A Night to Remember" He has an affair, she finds out and kills them both. The chorus states that the couple "promised him/her forever, 'till death due us part."
* SHeDAISY seems to be best known for their 1999 debut "Little Good-Byes", plus their comeback songs "Come Home Soon" and "Don't Worry 'bout a Thing" in 2004-05. However, none of these is their highest peak; instead, that honor goes to the lesser-known "I Will... But" in 2000.
* SHeDAISY's song "Lucky 4 You" uses multiple personalities in an almost comedic sense.
* she'd always be under Ino's shadow, and when they both started crushing on Sasuke she broke it off. After their fight in the Chuunin exams, however, they more or less mend their bonds.
* she'd be the bait (and feels a lot safer with her as backup rather than the other way around).
* She decided to follow in Lita's footsteps and leave wrestling over the negative reactions. After a wellness policy violation in August 2016, she never returned to the ring, opted not to return to
* She delivers a mind hug to both Maka and Stein at one point in the anime, when both are overcome with Madness. She follows this up with a literal Cooldown Hug
* She demanded she thanked him for lowering his fever from almost a hundred to 37.
* she demands that everyone else leave to avoid the explosion to save her.
* she, despite having built his whole life around trying (he sleeps with Leela, who he thinks is an alien, but she later turns out to be a human mutant).
* she developed early with her (at the time), notes that aging had basically perfected what was already there.
* She-Devil, and grounds for expulsion. Ruth frames Mrs. Fisher for it so she gets kicked out and has to live with Mary Fisher permanently as part of her revenge plan.
* She-Devil dramas and longed to do a comedy. It was her first out and out comedy.
* she'd have become possessed by the will of her ancestor, forced to abandon any quest of killing titans, and probably would have erased the memories of anyone who knew about her powers to ensure the cycle continued. Historia, and allowed her to become a hero of her own.
* Shed His original good personality later is restored, but he remains trapped in his lizard form with the guilt of what he did.
* She did actually tell Mac during their cell phone call that she wanted to go back and help other people. Mac told her to stay out where it was safe, and then the call was cut off. So, it's possible she died going back to help others.
* She did again with her wedding dress when the wedding ceremony with
* She did lock the door occasionally, but only for gags (though I believe one had Barbra Jean refusing to give up).
* She did NOT take it well when he announced he was leaving, and threatened to

curse him.
* she didn't get much screentime or character development probably also qualifies due to her precognitive powers giving her a wealth of knowledge to draw from, and she's expressly described as "not much older" than the little kids playing in her hometown.
* She didn't have much luck with cute mons besides her partner... until Lenora's Lillipup showed up, all too happy to be played with before battle. Even Ash fell victim to the little puppy!
* She didn't know what records were; unfortunately, neither did the clerk at the electronics store. The antiques dealer needed a hint. introduced him to them.
* she didn't spend the night at all, he hallucinated everything. The moment when he realizes that it was all in his head is terrifying and sad.
* She didn't voice the title character (although had the show been renewed she would have); but Roseanne was the executive producer, and she
* she died under another name (Rachel Newman) despite her faking her death with that one, so Eric doesn't know.
* She dies during the influenza epidemic, but not before seeing her fiancé kissing another woman and insisting that she wants him to be happy
* She Dies Tomorrow: The lead character is named Amy and looks quite a bit like a younger Amy Seimetz, the writer/director.
* She Dies Tomorrow: We never find out why a growing number of people believe that they'll die tomorrow. In the morning of the day, a wide range of people await their perceived imminent demise, but the film ends before anything happens or is revealed.
* Shed-inducing Sweet Kiss). As soon as she goes down, you've already won.
* Shedinja is immune to 13 of the 18 attacking types, thanks to "Wonder Guard." However, it will always get knocked out quickly when hit by an attack of those 5 that can hit it because it has just one hit point at any level. Several forms of indirect damage will also defeat it, like switching in when the widely used Stealth Rock is up. Oddly, this leads to Shedinja being used in both the lowest and highest tiers in competitive battling. Those 5 types and Stealth Rock (especially in overused) are much more common in the middle and low tiers. However, in the lowest tier it actually has stats that don't completely suck compared to other Pokémon.
* Shedinja is the discarded exoskeleton of a Nincada after it evolves into Ninjask. Exactly
* Shedinja. "It is believed that this Pokémon will steal the spirit of anyone peering into its hollow body from its back." Add to this that in the games, you view your Pokémon from the back...
* she dislikes her transformed appearance, but mostly because the few seconds it would take her to properly release it would give Spitfire the necessary time to hit her with a powerful and possibly fatal attack with all the fire she's shooting everywhere.
* She'd murdered the wife for sleeping with her husband, then set up the lord, later murdering her husband due to his getting suspicious..
* She does die in the anime, but eventually revives along everyone else
* She does follow it up with the real Aesop, which she just happened to know already - that hard work is better than cheating and taking shortcuts. She also says that she
* She does have her limits, refusing to perform an experiment that might destabilize the universe, but before that, she had destabilized the climate of an entire planet and was perfectly willing to open the door for an invading army, just because she might get the chance to learn from them.
* She does have some justification for this. Part of it is because she's naive enough to literally not understand what she's doing wrong, and part of it is because her mission (tracking down Roa) is just that important. While most examples of her bad behavior from original visual novel (and corresponding manga/anime) can explained by naivety or desperation, later works portray her as
* She does hit a wall at one point. In the episode "Fatal," she bemoans the fact

that there's no database of people who wear hats.
* She does, however, later try to encourage him to turn back into Fourarms...
* She does it again in a later episode, when discussing a nightmare in which she
* She does it again (just with the word "ally" instead of "boyfriend") when
* She does it again later in the second half of the season. Her seemingly harmless drawings of "stars" turn out to be
* She does it again two seasons later in "Atonement." This time the gown is even more revealing, and Sheridan — who is deeply and openly in love with her by that point — has an even more pronounced reaction.
* She does it again when Gamagoori gets knocked out protecting her, making an otherwise dramatic scene fairly
* She does it when revealing to Winn that she has superpowers, only to have to adjust her glasses
* She does not die as both Tom and Richard expected but she is rendered completely powerless.
* She does not survive long enough for it to become embarrassing, but Angie has the word 'WHORE' tattooed on her forehead by Jack as punishment for her infidelity in
* She doesn't approve of him participating in breastplate raids at her school, especially since the guys at Apollo treat it as a game
* She doesn't care for the bullshit Ian's group tries to feed to the Brazilians.
* she doesn't even know what the word "death" means also plays with it.
* She doesn't get that the Fiddle Game con they're running in "The Studio Job" has Eliot as the fiddle until halfway through the episode.
* She doesn't know at the time that he was poisoned just moments ago and has passed away in his sleep — it was his request that he spend his last moments with her.
* she doesn't know it regarding the kid, but she's actually protecting her love interest...
* She doesn't play it completely straight, though. When she turns, she has to relearn her Fiery Jinx spell by leveling up - though when she does relearn it, it's still several times stronger.
* She doesn't restrict it to her friends either. It's one thing for an AI designed for electronic warfare to fight back against someone trying to hack her systems. It's another that she does so by overloading their servers with porn.
* She does (or at least did - her continuity is a moving target) lose her powers when she changes back to her secret identity, thanks to a spell cast by her
* She does seem to rarely but significantly show remorse for her killings at times though, notably before her Start of Darkness
* She does still get occasional moments of this with other team mates however, especially to Fluttershy. When Gilda revealed her true colors and turned on Pinkie, she stood up for her (and all her other friends) as well.
* She does the same thing about sex and wanting to become a vampire. It would be decent of her to respect Edward's desire not to have sex before marriage and stop constantly pushing him because he did explain that it was important to him. If the genders were reversed and
* She does this any time she has to dress nice, like the time she and her princess lookalike have to
* She does this for the dead woman's brother, not for the woman's own sake.
* She does this in another episode when she learns about the 8th graders' terrible behavior. She's drinking from the water fountain and upon hearing the announcement that the 7th graders are ahead in a good behavior contest, she spits out the water onto the wall and comments that that was perfect timing. Some versions have it as a
* She does this on-stage, as would most stand-up comedians who do voices. However, she regularly mocks it too. Also, the only voices she can really do are
* She does this sort of thing again later during the fight on and around the Nazi plane. A German pilot is about to shoot Indy when he's hit over the back of the head, and we see Marion Ravenwood lifting some airplane wheel chocks triumphantly.
* she does this to Shinji. She appears for an instant to say goodbye, Shinji looks

away for one second, and when he looks back she has faded.
* she does want friends, but she's understandably wary of being taken advantage of, and is thus slow to trust others.
* She dropped a piece of her currant bun into the river, where it was swept away by the current.
* She drowns, out of the way while the vampires are distracted by fighting her.
* she'd spent the entire party whining about how inconsiderate everyone else was being), and because Ishigami's present to her (a foreign board game, which is her hobby) was very well thought-out.
* Shed the Family Name: A character changes their family name in order to disassociate themself from a hated family member.
* Shedu and Lammasu: Bulls or lions with human heads and bird wings, originally from Mesopotamian myth.
* Shedu and Lammasu: Creature from Assyrian mythology with a bull's or lion's body, a man's head, and eagle's wings.
* Shedu and Lammasu — lion or bull body, human head with horns, bird wings.
* Sheeda maxi-series, hailing from an extremely distant future that's utterly devoid of resources, are incapable of creating anything themselves, and thus survive by travelling back in time and "harrowing" past civilizations.
* She either has two, one left-hand drive and one right-hand drive, or an animator
* Sheela Peryroyl is a halfling goddess of nature, agriculture, weather, song, dance, beauty and romantic love.
* Sheele's first shown assassination has her cutting a housemistress
* Sheena (2000). He usually ends up offering her his own clothes for her to cover up, which she does with annoyance.
* Sheena (2000), Matt Cutter usually is with a shirt either not completely on all the way, a workout shirt, and no shirt at all, as it is often rendered by circumstance.
* Sheena Easton. (Although it may be more a description than an actual proper name.)
* Sheena Easton's song "9 to 5" was renamed "Morning Train (9 to 5)" to avoid confusion with
* Sheena Easton: "Telefone (Long Distance Love Affair)" where the singer longs to call her boyfriend though long distance but he doesn't reply.
* Sheena faces this in her scene at the Altamira suite, when she suggests she and Lloyd come back there sometime. Lloyd says he thinks everybody might enjoy that, much to her frustration.
* Sheena. He wouldn't even reach her shoulder if his head wasn't so weirdly shaped!
* Sheena loses the ability to use the various guardian summons that made her boss battles so difficult. It's implied in one cutscene that she had a very limited number of those guardians, and has used them all up by the time she joins the party permanently.
* Sheen also gains this power (and low bladder control) when he becomes "Vibrating Lad" in
* Sheena often featured the heroine dispatching bad guys this way, usually after morphing into a monster.
* Sheena puts a hand on her hip when speaking a lot and she's also fond of
* Sheena, Queen of the Jungle. And the 1940s comic book that inspired them all.
* Sheena, Queen of the Jungle contains an episode in which the title character faces off against some mindless people who walk like the dead. When her love-interest/straight man refers to them as "zombies", Sheena and her African matron are alternately shocked and amused; apparently "zombie" is some sort of sexual term in the tribe's language.
* Sheena, Queen of the Jungle, spent most of his time having to be rescued by Sheena.
* Sheena, the soldiers' helicopter repeatedly tries to strafe a grazing herd of antelope, but apparently fails to hit anything.
* Sheena use a UR-416 armored car as one of their main vehicles. Subverted in that it gets taken out by an elephant, who easily overturns it during the climax.

* She ended her days as a permanently moored floating petroleum storage. Her draught and beam (68.8 m) were simply too much for passing the important channels, canals and waterways and calling important ports, making her economically unfeasible.
* She ended up having this again in season 4, thanks to Red Daughter, who has her appearance.
* She ends up being this for Euphemia and Cornelia as well. She hates Euphemia's idealism,
* she ends up falling in love with him), not to mention he's much older than the teenage Lu.
* she ends up getting the role by default due to being only the one who showed up.
* She ends up going through with it anyways, but only to prevent the current Arc Villain
* She ends up missing Ariel's head by inches and quickly gives up, deciding to wish Ariel luck in dealing with the Sarghress clan's coup.
* She ends up needing a version of The Talk herself, with her only knowledge of sex coming from her medical books. Despite being a 30-something woman, she's still a virgin and nervous about her impending wedding night. Luckily, her friend Dorothy is there to offer her advice.
* she ends up saving the protagonist from a horrific death trap. This leads to him proposing to her.
* She ends up showing that one other juror was actually having an improper relationship with a witness in the case.
* Sheen has just been conked on the head, and Carl asks "How many fingers am I holding up?" Sheen replies "November?" before passing out.
* Sheen series: A sentient robot designed to appeal to protagonist Stile's personal tastes without being blatant enough to make him suspicious that she was a robot. (He figures it out anyway.)
* Sheen's more recent issues make this a very cyclical ordeal. His current series,
* she enters the Best Young Flier Competition alongside Rainbow Dash as a last-minute contestant, and pulls an Icarus
* Sheen, the sidekick of Jimmy Neutron, has already been held back twice according to "Jet Fusion".
* Sheen?" was an informal trivia game where participants would try to guess whose mouth a crazy quote came out of. It was popular in the year 2011, when both men were front page news due to the former having an extremely well-publicized battle with both addiction and CBS' higher-ups and the latter engaging in very brutal attempts to suppress dissent, leading to more attention given to self-aggrandizing, delusional, and just plain bizarre statements they'd made. Nowadays, few people talk about or even remember these weird comments, and so the game has faded into obscurity.
* Sheep & Wolves briefly inflates like a balloon after downing several magic potions in desperation to turn back to normal. Almost immediately after, though, he deflates and is sent flying upward before falling back to the ground.
* Sheep, Dog 'n' Wolf, although mostly just for the characters and some of the objects.
* Sheep, Dog 'n' Wolf: Daffy Duck arrives in a limousine during the intro.
* Sheep, Dog 'n' Wolf enabled you to post an order for an item in a certain mailbox, only for it to arrive by air mail seconds later. Sometimes next to the mailbox, other times in ridiculously out of the way places.
* Sheep, Dog 'n' Wolf, it's just the game that renders him mute. All we ever hear from him in the game is some grunts and heavy breathing.
* Sheep, Dog 'n' Wolf, just when both you and Ralph think he won and finally got himself a sheep, not only did it turn out that it was actually Sam disguised as a sheep, preparing to punch Ralph once more, but it also all turns out to be just a dream, and he has to return to the routine of unsuccessfully trying to steal sheep from Sam. He's visibly unhappy about it.
* Sheep, Dog 'n' Wolf, Level 8 and the second secret level have a time-travel gimmick. Using a special watch item will teleport you back to an ancient version of

the mountain forest, where you can plant seeds that grow into climbable trees or move boulders that become rocks you can hide behind once you return to the present. Just look out for the lava and dragons.
* Sheep, Dog 'n' Wolf: On level 4, you get a magic flute. This flute allows you to hypnotize Sam the Sheepdog, lure him under a falling rock, and steal a sheep before he can react. On level 5, you also get a magic flute. However, when you try to use it on Sam again, you discover that Sam learned from the previous incident and got himself some earplugs. Cue you getting punched all the way back to the starting location. After that, Sam sets up some mines, and starts walking around as opposed to standing in a fixed spot. Even if you already know about this, you still have to do it to be able to advance through the level.
* Sheep, Dog 'n' Wolf, Ralph Wolf uses a magic flute to hypnotize Sam Sheepdog and lure him away from the flock of sheep. It works so well, it's available to use in the next level. However, it's revealed that it won't work anymore as Sam now has earplugs.
* Sheep, Dog 'n' Wolf stepping on a button when they see one, just to see what happens.
* Sheep, Dog 'n' Wolf technically possible to get past the mine field without the use of the metal detector. Since the metal detector is needed for obtaining the gold coins to lure Yosemite Sam into the jail later on in the level, there is a second metal detector in the jail.
* Sheep, Dog 'n' Wolf, the player (as Ralph Wolf) could hide in a bush to sneak past Sam the Sheepdog. If you weren't careful a sheep would eat your disguise.
* Sheep-goat chimeras can actually live and they indeed look like both sheep and goat. This is because they're actually two embryos fused together — one from a sheep, one from a goat.
* Sheep in Sheep's Clothing: A nice person is suspected to be not as good as it seems, but it turns out that their supposed moments of meanness were themselves covers to hide how honest the person truly is.
* Sheep in Sheep's Clothing: People suspect I'm pretending to be nice. They're actually wrong.
* Sheep in Sheep's Clothing: Suspected of being not as nice as you seem, but you are as you say you are.
* Sheep in Sheep's Clothing: There's no need to be suspicious. This is a genuine nice person you see.
* Sheep in Sheep's Clothing: They're genuinely nice and lovable as they appear, despite being suspected otherwise.
* Sheep in the Big City, a recurring character is the show's writer, who happens to be an obese bald man in his underwear, who is most commonly shown in an asylum on a tire swing.
* Sheep in the Big City, a segment known as "Touched by a Ninja" involves said Ninja touching a guy continuously until it transforms into this trope.
* Sheep in the Big City because he looked like a sheep when he was born.
* Sheep in the Big City does this during a scene involving General Specific in a cafe.
* Sheep in the Big City episode "Baah-dern Times" begins with Sheep's grandfather trying to run away from a man resembling a bearded Farmer John when the man sees his body as a lamb chop and tries to eat him.
* Sheep in the Big City episode "Baah-dern Times" had Lisa Rental sing a musical number about how she'd like to grow up to be a bureaucrat because she'd be paid to make things frustrating and miserable for other people.
* Sheep in the Big City episode "Beauty and the Bleats" has Sheep encounter a genie who gives him three wishes. After using them up and being trapped in a humanoid form, Sheep gets his chance to trick the genie into giving him three more wishes when he discovers that the genie is distracted by luminous objects and uses a giant torch to lure him into being trapped inside a lamp again before freeing him from the lamp once more so that he'll have to grant him three wishes again.
* Sheep in the Big City episode "Can't Live Without Ewe" at one point has Sheep attempt to remedy his loneliness by having conversations with a giant dust bunny.

* Sheep in the Big City episode "Can't Live Without Ewe" at one point has the narrator Ben Plotz ask Sheep if he's trying to tell him Timmy's stuck in a well. Sheep bleats in confusion, causing the narrator reply that he was reading the wrong script.
* Sheep in the Big City episode "Daddy Shearest" has Private Public's father General Public humiliate his son by showing embarrassing childhood pictures to General Specific. We don't actually see any of the pictures, but one of them is described as depicting Private Public having spots on his butt.
* Sheep in the Big City episode "Flock, Up in the Sky" has Sheep get unwanted protection from the X Agent, who goes so far as to attack people unprovoked just for getting within ten feet of Sheep.
* Sheep in the Big City episode "Here Goes Mutton" has Farmer John get knocked out and say "Can I please be excused from the table, mommy?"
* Sheep in the Big City episode "Oh, the Ewemanity" involved Sheep becoming gigantic after getting hit with a growth ray. General Specific at one point accidentally makes himself taller with the same growth ray due to thinking he can shrink Sheep to normal size by aiming the ray backwards.
* Sheep in the Big City every time...except when he returns for the last time, and just walks through the door, even though this time the camera anticipated him smashing through the ceiling and has to pan down.
* Sheep in the Big City exaggerated this to absurd lengths in a cutaway gag, with a list of terms and conditions that ran for at least a minute. And the prize was a single can of Shrimp Cola.
* Sheep in the Big City from 2000 to 2002, suffered this quite a lot throughout its run. The first nine episodes aired at 9:30 PM on the "Cartoon Cartoon Friday's" block. However, the last four episodes of the first season were delayed several months to Sunday evenings for no given reason. The show was initially cancelled after the first season because of low ratings. However, it was at the last minute greenlit for a second season, which began airing with the same Sunday evening time slot, later changing to Sundays at 9 PM. Inevitably, the ratings became even worse, and after the second season, the show was gone.
* Sheep in the Big City, General Specific's handwriting is implied to be this. Farmer John claims that it "looks like a chicken walked in ink."
* Sheep in the Big City had Private Public serve as second-in-command to General Specific, when in real life private is the lowest military rank possible aside from a recruit rank.
* Sheep in the Big City had two anchors, one of whom would give "unrelated" stories that were obviously related, once repeating the same story.
* Sheep in the Big City has a scene where Sheep swings on a thread and hits a wall. The scene cuts from sheep jumping off a building before cutting to a low-quality clip of stuntman in a sheep suit hitting the wall and falling painfully to the ground.
* Sheep in the Big City has a variant with the show's narrator Ben Plotz, whose name rhymes with that of his voice actor Ken Schatz.
* Sheep in the Big City has exactly one Sheep living among humans in the Big City. Sheep has already adjusted; Sheep works at odd jobs and makes human friends. The Big City is now a familiar home. Sheep would have a good life there, except for a few sheep haters, and a secret military organization that wants to put Sheep in a sheep-powered ray gun.
* Sheep in the Big City has Sheep become a presenter, abandoning his friends. His friends then come in his big public performance, holding signs say that they will love him even if he doesn't love them back.
* Sheep in the Big City), he also tends to be easily manipulated and deceived by General Specific and Private Public whenever they try to capture Sheep.
* Sheep in the Big City hinted at this in the episode "Beauty and the Bleats", where Lady Richington attends an anti-sheep party and states that she's impressed with an off-screen sheep piñata being realistic. A man tells her that it isn't a piñata, implying that the guests are actually brutalizing a live sheep to the point that its guts splatter out.

* Sheep in the Big City, however, this narrator was actually given a backstory (his name was Ben Plotz) and was frequently shown onscreen, recording his narration in a studio booth.
* Sheep in the Big City is a bratty little girl obsessed with making Sheep her pet. When she doesn't get her way, she gets furious and whiny.
* Sheep in the Big City just an empty, muddy field strewn with trash and broken glass, with the marketing being based on that you're supposed to tailor your own experience at the park - in other words, just running around using your imagination.
* Sheep in the Big City, literally called The Plot Device, which is a robot that can cause nearly anything to happen to advance the plot.
* Sheep in the Big City (one game they lost twice) and their strategy seems to mostly consist of running away screaming from the other team. The sports anchor even calls them "the worst team in the history of the sport". It then averts this trope when, even with Farmer John on the team, they STILL get their asses kicked until the end when Farmer John has to save Sheep again, and even then they only manage to score a point.
* Sheep in the Big City out of nowhere, encircling him and bumbling incoherently in propeller hats and diapers.
* Sheep in the Big City seem to hear him, has been fired, physically attacked...the list goes on.
* Sheep in the Big City, Sheep is shown standing on top of a human pyramid, but he is soon chased off by Lady Richington, who winds up taking his place at the top of the pyramid causing people witnessing this to cheer.
* Sheep in the Big City sketch, there's "Dinky: The Superiest Turtle in the Universe!." "He's slightly faster then most turtles, but still relatively slow."
* Sheep in the Big City sometimes uses gags involving Sheep's wool being treated like clothing. Examples include Sheep dropping off his wool at the dry cleaner's in the pilot episode and Sheep occasionally covering himself in embarrassment when his wool unravels.
* Sheep in the Big City spoofed this in the season one finale "To Sheep, Perchance to Dream", where the episode's twist ending reveals that Sheep was the real villain all along and that he intended to use the show's narrator Ben Plotz in a narrator-powered ray gun. This is completely disregarded in the second season.
* Sheep in the Big City: The Narrator would frequently complain about cliched or particularly weird plot twists.
* Sheep in the Big City, the Ranting Swede would sometimes have his rant revolve around misinterpreting a figure of speech, like assuming "Suit yourself" is an instruction to make a suit for himself and taking it literally when someone asked him how he managed to juggle his job, his house, and his family.
* Sheep in the Big City: This is frequently the case between the Angry Scientist and General Specific.
* Sheep in the Big City to General Specific and revealing that Private Public constantly wet himself until he was 17.
* Sheep in the Big City was blatantly periodic and continual. Not only did it happen in every episode, but it also happened every five minutes.
* Sheep in the Big City was initially cancelled after the first season finished airing in the summer of 2001, but popular demand led to a second season being ordered in the fall. The series was cancelled again after the second season in 2002, this time for real.
* Sheep in the Big City was voiced by creator Mo Willems. Writer Joey Mazzarino also voiced some minor characters such as General Specific's cousin General Outrageous.
* Sheep in the Big City when Sheep sees Swanky the Poodle for the first time. He then wipes away the fog on a glass screen in front of her.
* Sheep in the Big City wherein General Specific, Private Public, and the Angry Scientist were babies.
* Sheep in the Big City, with an advertisement for the Les is More Electronics Warehouse, with a proprietor named Les Wiggles who may have been genuinely insane:

selling an elephant for sixteen cents, but a battery for $42,000 and a piece of wire for a million dollars and five cents.
* Sheep in the Big City would do this frequently, most often with the Oxymoron company. One memorable Oxymoron ad featured the typical Housewife asking the enthusiastic seller what he was doing in her kitchen, and threatening to call the police on him. Another fake ad parodied Olive Garden's "When you're here, you're family" slogan with a restaurant that treated customers as real family ("You never call, I haven't heard from you in weeks! Why would you do this to us?").
* Sheep in Wolf's Clothing: Someone who's part-way transforming into a monster/zombie/robot/whatever will resist being on their side, and will help their human friends.
* Sheep in Wolf's Clothing: This human-turned-monster still have their human mind, enough for them to help their fellow humans.
* Sheep in Wolf's ClothingWhen they use their transformation to aid their fellow humans.
* "Sheep may safely graze" is the most famous movement of Bach's secular
* Sheep's Clothing, Doc is able to have a fairly calm conversation about his new-found belief in vampires maybe an hour after he gets his proof in the form of one of them almost tearing his throat out. Justified here in that he is still in shock and probably a little drunk.
* Sheep's Clothing, Doc Meadows's first hint of badassery comes in his narration just before he kicks a man in the knee, as he describes what tendons and ligaments will be damaged as the joint breaks.
* Sheep's Clothing Doc's narration mentions obliquely that he pisses himself while a vampiress is attacking him.
* Sheep's Clothing, half-skinwalker gunslinger Wolf Cowrie is stabbed with a silver dagger and the point broken off in him. While it isn't immediately fatal, it cripples him badly and likely would have killed him had a local doctor not been able to get the piece out.
* Sheep's Clothing, two close encounters with vampires in 24 hours drive Dic Meadows to whiskey to calm his nerves.
* sheer audacity was subjected to ducking, and likely would have drowned were it not for having learned to escape restraints during 'a wet weekend with Houdini'.
* sheer awesome more control than the average night goblin has over their squig. The Lizardmen have a wide variety of dinosaurs, ranging from the vaguely raptor-ish Cold Ones to a few heavily armoured ones that make good artillery platforms to the mighty Stegadons and the Carnosaurs that provide steeds to particularly deadly Saurus Oldbloods.
* sheer difficulty, one of its attacks has the thing vomit a massive wave of acid.
* SHEER EAR-SHATTERING VOLUME can reach ridiculous (but hilarious) levels.
* sheer ferocity. It got to the point where they had to enclose him with an electric fence.
* Sheer Force is this in the form of ability. Pokemon with this ability can't use any additional effects their moves might have but such moves get an increase in power to compensate.
* Sheer Heart Attack, a nearly indestructible tank that will always track the hottest object near it, and will not stop until it's target has been destroyed.
* Sheer mathematics mean they have to be lucky. If 99% of the population dies, anyone who survives will be lucky; anyone who survives and does well will have to be
* sheer numbers, and whatever unique adaptations evolution granted to their species!
* sheer persistence. Probably the most famous examples were one she dragged out for about 3 days, and her first duel where she embedded herself in briars, leaving herself exposed to the Russian winter for hours on end until her opponent grew impatient.
* sheer stupidity as an answer. In one mystery, he was on his way to a BBQ when the host was found murdered. His neighbor came over, saying he heard his wife scream in horror, and during the interrogation, spotted the wife's pearl earring in the grill

and reached his hand in to retrieve it. The detective told him that he obviously planted the earring because, despite having just arrived, he knew that the coals were cool enough to plunge his hand into them. Apart from the fact that coal visibly whitens when heated and that people can sense heat when standing next to hot coals, does he ever consider the fact that the guy could have just been an idiot?
* sheet music, since the Ocarina is a full-featured instrument, not a prefabricated spellbook.
* Sheet of Glass example mentioned above. In this case, the car hits the glass, but simply knocks it down flat on the ground and drives over it. The workers then pick the glass back up noting "Wow, tough glass."
* Sheet of Glass is an obstacle that commonly, but never seriously, appears in chase scenes.
* Sheet of Glass that two guys decided to hold laying flat instead of vertically. A legless student then takes his severed legs and runs off.
* Sheetz convenience stores have a fast food counter that sells "Bagelz" and "Wrapz".
* Sheetz EX: Saladz & Wrapz. As well as including the letters SH. EX: Shmuffin or Shwings.
* Sheeva gets in on the act in the 2011 reboot. One of her fatalities is tearing her opponents arms out of the socket,
* Sheeva's, she rips off her opponent's arms, slaps him or her around with them before kicking the body down, and then flexes while using the arms to sarcastically applaud.
* Sheeva, while she is still very muscular, her outfit is a practical and regal set of armor that shows off a lot less skin.
* She even completely forgets Renji and everything else after she suddenly collapses and sleeps for more than 13 hours, causing her to wake up with no memory of her accident and have to find out everything about her life up until that point all over again, which wasn't the first time this had happened.
* She even gets the spell named after her: "Callahan's Unfavorable Instigation." Even the name is pure awesomeness.
* She even has her own webpage and a good balance of male and female fans! Her good looks and comical personality wouldn't be enough to explain this ordinarily, but it may be a
* She even mentions how guns detach one from the act of killing. Though, as a sniper, it's the exact opposite of detachment.
* She even protects and guards A_J, her primary rival, when it would have been incredibly easy to leave her alone in the wilderness or just plain shoot her.
* she even tried trapping him in a loop with her in order to make him forget Mai.
* She eventually does try and tell him midway through Season 2, but isn't believed...at least not until he sees her undeniably futuristic gun, at which point he's willing to listen to what she has to say. She still keeps it a secret from her superior though, and consequently
* she eventually forces him to sleep on the sofa. After Niles has recovered from the following breakdown, which sees him strip naked in public, he takes great delight in telling his ex to get stuffed, but he then gets carried away and tells the rest of his family that they've been as much help to him in this extremely difficult time as a hole in his head. (Although one could argue they were asking for it)
* She eventually forgets almost everything from her life at the Agency, including her handler once she's near death.
* She eventually gets the kids to go with her by, after nearly giving up, meekly offering "Haagen-dazs?" Later, she reacts to getting caught by exclaiming, "Oh, shiny tomato!"
* She eventually outgrows this, starting with toning down her obnoxious behavior, dropping most of her grudge against Emu and taking nicer approach towards Taiga. Her most important step out of MPDG territory comes in #27, when she becomes Rider Player Nico so she could complete Kamen Rider Chronicle and save the players who

had Game Over. It doesn't not change her being a negative example. Her intentions have a good side to them and are somewhat justified, but they still cause some grand chaos. note
* She eventually resorted to looking into the future to find her destined matesprit. She soon regretted it (and stopped looking into the future) since
* She eventually stops holding him to it once it's made clear that Kyo loves Tohru and not her.
* She even wears a nurse outfit, for crying out loud... however, she's VERY good at what she does.
* Sheev Palpatine is a member of House Palpatine, one of Naboo's noble houses, though their title is never given. He actually got into politics partly because he was too far down in the line of succession line to have any real hope of becoming the heir, which actually was pretty common for younger sons of nobility in nations like Great Britain.
* Sheev Palpatine on his return, simply attributing it to "dark magic" and "secrets of the Sith" before shrugging and moving on to how to deal with him.
* S/he explicitly says this when they are trying to escape from a Reaper Destroyer on Rannoch, also reasoning that leaving it alive would keep the geth under Reaper control. S/he then proceeds to face the 160m tall Reaper on foot.
* She expresses attraction to men and has a boyfriend over the course of the novel, but the main plot follows her "friendship break-up" with her
* she expresses regret at having to take Stitch in after he's shown to have calmed down and matured somewhat, and seems rather satisfied when Lilo provides a loophole.
* She fakes being in danger after Suzaku catches her falling, to get him to spend the day with her.
* She falls in love with Javier Giscard because of their shared belief in the old Republic of Haven, igniting a love affair that will quite simply blaze for the rest of her life...
* She falls into another one when Criss lets it slip that her world was consumed by darkness, though this time it's played for laughs.
* she falls off a cliff, tells Kyo to go on without her, he gives her a kiss (she's unconscious by then), but she gets better fortunately.
* She feels that the class of learning about A.I. was fundamentally pointless for her seeing how she wasn't given any A.I. And it was later proven that South was deliberately withheld from getting an A.I., making her point even more valid.
* she feels that their desire for order is becoming more important than the desire for justice and serving the people.
* She Fell Among Thieves that the building she was found in was set up to be her tomb. It's an austere construction, but that's not surprising given what the circumstances must have been like when it was built.
* She Fell Among Thieves. The men mistake the solid white material for marble.
* , she figures out most of what's wrong with it and later replaces it's engine herself while advising him to get new shocks installed. All despite only having a freshman level education.
* She finally ended the hiatus in July 2015, though with a catch: the series is now on a quarterly release schedule instead of monthly. On the plus side, a new anime adaptation aired in summer 2016 that continued where the 2008 series left off.
* She finally lets it down in "Shield with a Twist", after 568 episodes.
* She finally resorts to trying to appeal to the golem with a combination of
* She finds out her boyfriend is a double agent, then sees him get killed, then he packs his suitcase and moves into her brain. Later she finds out that
* She finds out late in book 1 that it was a present from family friend Mr. Tamerow, who thought the monsters were just plush toys.
* she finds out that Rosemary is posing around as her, which is troublesome since Nadja is actually from the very noble Preminger family and
* she finds the dead dog hanging in the shower and a lipstick note on the mirror: "People can lick too."

* She fled Greece and was living in Seattle, where she regularly bathed in a pool to maintain her powers. However, it also affected the goggles of a school swimming team who used the pool, allowing them to see the future. This results in one of the students winning a trip to Greece. The student then added water from Mount Parnassus to the pool which meant the next time the Oracle bathed she was marked for death, living only so long as she stayed wet. She created Baird's prophecy and planned to use the power of the broken destiny to free herself. When Baird escapes her prophecy the assassin turned on the Oracle who had dried off.
* She forms the basis for the mindset of walking around naked in her natural form in
* She-Fu: Action Girls tend to use lots of flips and cartwheels in fight scenes.
* She-Fu: In reality, such techniques are highly impractical in combat.
* She gained weight again, by putting on 50 pounds in order to play a new mother in
* she gave Davy Jones the condition that if he did the job of the Captain of the Flying Dutchman.
* She genuinely wants to do what's best for her people, but her obsession with controlling everything causes her to turn into a villain.
* She gets another one in the episode "Steve Moscow". This time, the reason is more understandable (the lazy Russian mold removers were driving her crazy), and Doug makes a very good comeback: "Wow. Either you're mad about something else or I think I want a divorce."
* She gets a rather rude awakening from this mindset when Joffrey chops her father's head off after promising to be merciful.
* She gets a slightly better look at it from Doctor Bowman, who expresses pride in her ability to handle things he can't for complicated reasons. Then he drops a
* She gets boos just for getting tagged into a match. She got a lot of exposure in the ring and on
* She gets chucked out of the place and arrives home to hear news that a department store Santa had a heart attack and had to be rushed to hospital after a little girl caused a disturbance earlier on.
* she gets curb stomped and starting an argument that culminates with her running away — and encountering the titular Train.
* She gets irritable (as much as she can, anyway) if he dodges. Probably because that generally involves her crashing into trees instead.
* she gets kidnapped one night and almost doesn't make it home for curfew, her sister is mistaken for her, and lacks the red armband
* She gets much more love in filler episodes, as her many normal weapons are summoned from
* she gets promoted to a position where it would be improper to continue it.
* She gets stabbed before Naruto can respond or let her confession truly sink in.
* she giggles. Tommy then gasps, hides his diaper behind his back, and blushes.
* "She Glows in the Dark" by The Bagazoid Brothers, a novelty song about a girl from Three Mile Island "who looks just like her mom but has more radiation than a nuclear bomb", and with the unforgettable line, "It's nice to have a lover who can be your night light!" This was a limited release from a radio station, on "WEBN Album Project 5" (Cincinnati, 1980), but you can hear it at
* Shego apparently has a degree in teaching but (when she's not committing crimes
* Shego began dressing in a Teacher uniform after being hit by the Moodulator.
* Shego does this all the time. It's not so much "getting distracted" as "not listening in the first place".
* she goes blind in the second game, but gets better after her Face–Heel Turn
* Shego invokes a variation on the theme when Drakken vents about a run of bad luck (even by his standards) in his confrontations with Kim:
* Shego's given name is never shown. Her surname is "Go" (as shown by her grandmother and by Shego herself when she becomes a teacher) however no one even implies the first names of anyone in her family (Hego, the Wego twins, and Mego). "Shego" at least started out as a Secret Identity back when she was a superhero however it's unknown if she still keeps up the secret identity or if she just still

uses the name.
* Shego's mockery of her evil employer Dr. Drakken often gives him inspiration for his next plot to
* Shego's youngest brother, the Wego twins, add onto her vague age by being vaguely aged themselves. They seem around the same age as Tim and Jim, if not a bit older, yet have apparently been superheroes for a while. They also received their powers at the same time as the rest of their family.
* She got a taste of this when she panned almost the entirety of the
* she got back up from a kick from Brinne (who beat The Hound) quickly winning the latter's respect.
* She got pregnant, and Diamond Tiara - who was subsequently raised by Filthy and Spoiled, though with the promise that if she found out about her birth mom and wanted to rejoin her, she could - was the result.
* She got seriously injured when Shizuo had a psychotic breakdown while trying to protect her from thugs, and several years after that, he still considers the terrible incident as his greatest failure.
* Shego was also a former Kid Hero. Her brothers are now mostly adults, but the twins (Wego) don't seem much older than Kim's little brothers.
* she gradually gains the confidence to be herself around people other than Chie. Contrasting this earlier was after saving Yukiko and seeing her open more to the others, Yosuke notes he wants to know more of her like this as a person.
* she had been hiding there from her tormentor, classmate Olive Hornby, when she died. Initially after her death Myrtle followed Olive everywhere until the Ministry of Magic forced her to stop, at which point she returned to the toilet and stayed there.
* she had been under quarantine ever since Shinji and Asuka got her out of Unit-03.
* She had her sights set on King Arthur before Puriel took him out of play.
* she had no one but her daughter to "compete" with for Shinji's affection.
* she hadn't had sex in five years, he immediately told the rest of the gang, much to her annoyance.
* she had proof that another teacher was using drugs and forcing a student to bring them to him. When she called him out on it, he simply snapped and chased her to the streets before finally killing her.
* she had spiked the wine with a sleeping draught to knock them out so she can just walk right into their lair and recover the stolen goods. Tressa's dialogue and private chuckling make it clear that she thoroughly enjoys messing with the pirates, but things don't go entirely to plan as one of them wakes up just in time to catch Tressa in their lair, leaving her with no choice but to fight him and his partner.
* she had to eat the stuff herself in the past, so Stephanie steps in... for a fee. Near the end of the episode, the amount of times Stephanie steps in to feed or change the babies ends up causing Kimmy to lose the entirety of the money she was promised for babysitting to Stephanie.
* She Had To Go And Lose It At The Astor" heavily suggests that "it" is the subject's virginity.
* she handles it a lot better than she does in the anime, quickly getting over it instead of sulking and nearly quitting kendo. She even ends up losing a second match against basically one of the kendo elite, and then her final match with fated rival.
* She harasses and pulls off cruel pranks on her younger brother Theodore, which include things such as force-feeding him dog food and soybean powder. Gets taken
* She harshly scolds Ozpin for his habits of telling lies and half-truths, yet she willingly lied about what happened in the Haven Vault and most likely hasn't told anyone that Raven is the Spring Maiden.
* she has a good reason for hiding it, is surprised at how quickly she jumps at the opportunity.
* She has another near-miss kiss with Yuuichi in a later episode, except
* she has a panic attack after Misha goads Hisao into admitting that he and Lilly

were planning on surprising her.
* she has a sentient and borderline omniscient supercomputer doing the aiming for her. She's just pointing the guns where she's told to.
* she has by far the greatest reserves of sheer mental force, alongside the Galactic Coordinator and the Patrol's two senior Admirals (among others).
* She has called Vernon Dursley, Harry's abusive uncle, her least favorite character, however. Notably, he does not get any
* she has had training in dealing with exactly this kind of situation...
* she has her month-old baby taken to be made into a human weapon stories and minisodes which attempt to plug the gaps.
* she has made the claim that most people who see a female named "Cherry" immediately assume she's a stripper or a porn star.
* She has nobody to blame but herself, but something similar happens to Pam in a later episode. While she is going to art school in New York, she works at a nearby Dunder Mifflin branch. On Halloween, she assumes everyone will dress up since that's what they do at the Scranton branch so she dresses up as Charlie Chaplin. When she realizes her mistake, she tries to reduce her humiliation by at least removing her hat but
* she has no idea. Both cases are just friendly jabs at the fandom, with the latter being a "as long as they enjoy the work" reassurance.
* "She Hasn't Always Been This Way" by Doc Walker combines this trope with
* She has scored a whopping eleven #1 hits on the pop songs chart (including hits such as "Rude Boy" and "We Found Love"), but surprisingly none of them were her signature "Umbrella", which fell just short at #2.
* she has the island destroyed. Even her own children are not exempt from her rage as she killed her own son Moscato when he tried to get her to calm down during one of her sugar rampages.
* She has the power to fly faster than light, fire energy blasts that can destroy a planet, change her shape to dodge attacks, and immunity to all weapons that haven't been made specifically to kill her, and even those don't work fast enough to actually do more than contain or hurt her... And they know it. For obvious reasons, even Lower Caste Evronians (almost completely emotionless) fear her to the point that the threat of being assigned to the Anti-Xadhoom Force is a powerful motivator.
* she has to accept that there's no way to save him, and the party needs to perform a Mercy Kill and try to fight Eizen before talking Edna into it, she'll get angry at Sorey, and won't fight.
* She has two tics in correspondence to anger: the aforementioned face scrunching, and
* She/he/it returns again in South Park's 200th episode disguised again as Jennifer Lopez, aiding a group of celebrities led by
* She helps save "Green Face"'s first performance by getting the audience to clap along to Sakura and Saki's (also improv) rap battle, adding her own cheers and hollers as well.
* she, he only seems to have positive self-esteem when he's going through something hellish for day-saving reasons— otherwise he's pretty insecure. Which is probably why he doesn't try harder to get some other authority figure to intervene—that and his justified conviction that no one ever comes to save him from abuse.
* She herself has trained under several in the comics, most notably Wildcat, though she's also studied in East-Asia and was briefly trained by Lady Shiva.
* She-Hulk) a light beer. Val's reaction after a swig? "It tastes like my horse crawled into my mouth and died." It doesn't stop her from asking for "more of this swill" later, though.
* She-Hulk also had this pulled on her; the villain behind it was Warlord Krang. Waitaminute...
* She-Hulk always seems to end up naked one way or another. Like the time her Skrull partner tries teleporting her to their ship, but only teleporting her clothes, leaving She-Hulk naked in the middle of a crowd.

* She-Hulk: Apparently deadly radiation can turn you into a 6'7" green supermodel who can bench a train. She-Hulk didn't directly get her powers from radiation but rather a blood transfusion from Bruce Banner, her cousin...
* She-Hulk. A purple and white one is her most common attire unless she's in a courtroom.
* She-Hulk. Bonus points because every one of them has a different drink they were spitting out.
* She-Hulk comic, She-Hulk meets an old boyfriend who introduced her to his new girlfriend who looked just like She-Hulk only not so green. The two women glared at each other.
* She-Hulk, Daniel Jermain became "Danger Man" when a workplace accident at Roxxon Industries transformed him into an atomic superhuman. The interesting part is that he has no desire to be a superhero or villain. Daniel just wants Jennifer to help him sue Roxxon because of all of the hassle his new powers have brought into his life.
* She-Hulk. Despite her injuries being so severe that she would've died without Bruce's intervention, there's no blood or burn marks anywhere on her body.
* She-Hulk essentially Roofieman. The resolution of that arc is that he never knowingly used his powers to that extent on anyone who wasn't already up for casual sex, but that Thanos had injured him so that he temporarily lost conscious control of them.
* She-Hulk for a time during the Dan Slott run, specialised in dealing with superhero-related and supernatural cases (although they represented aliens and underground civilizations, too). The later Charles Soule-written run had Jennifer operating as a solo practitioner, with many of her cases involving superpeople.
* She-Hulk fought him, then sent him to space... well, Mole Man sent him to space. On a geyser. He last appeared in a She-Hulk issue, being arrested by Cop Rocks in Space.
* She-Hulk graphic novel (this was before she turned to surreal meta-comedy) the Cockroach Horde gets around by infesting human bodies.
* She-Hulk has her get defeated in embarrassing fashion by Spidey, and she fears he'll do it again every time she sees him. She gets over it when she realizes she's been in a battle with a disguised Spidey.
* She-Hulk have a clause in their contracts that requires their employers to provide hazard pay if circumstances require them to fight, because they do not have combat training and any injuries they suffer could result in accelerated blood loss.
* She-Hulk He's a very muscular man, but can only lift a thousandth of what She-Hulk can (and is one head shorter).
* She-Hulk included Pug sharing an apartment with Jennifer, however this is purely one sided, and extremely awkward for him when she invites overnight guests.
* She-Hulk is drawn in accidentally, followed within minutes by the Fantastic Four. Inside the dome, the FF discover a futuristic city peopled by strangely evolved people, many of whom have super-powers similar to their own.
* She-Hulk is seven feet tall, and a good majority of that height is in her gorgeous green gams.
* She-Hulk) is used when Balthazar prevents the sinking of the Titanic.
* She-Hulk is usually flattered by people who call her The Jade Giantess or The Glorious Green Glamazon. However, calling her "Shulkie" is a good way to get a fat lip (or worse).
* She-Hulk. It's not difficult to see the parallels to someone who was born a specific gender but found they were much happier as the opposite, and then had to deal with the fallout of that decision in their personal life.
* She-Hulk (Jen Walters, that is) can usually use her powers at will, but she has been stuck before in her Hulk form due to subconscious unwillingness to change back, and in her human form when she was too scared to become She Hulk again. If you make her angry enough, she can also turn into a Savage She Hulk that is very reminiscent of her cousin's form.
* She-Hulk (Kurtzberg). Of the senior partners, Holliway was the only one we ever

saw.
* She-Hulk, leaving her naked in front of a cheering crowd. Jazinda did eventually manage to fully teleport Jen out of the situation.
* She Hulk, leaving Jen naked trying to cover herself in front of a cheering crowd.
* She-Hulk. Like Knight Man and Dr. Rocket—not that you'd have heard of them.
* She-Hulk likes to play with this one too, with Jennifer Walters (AKA the She-Hulk) being a lawyer for a firm that specializes in superhero cases.
* She-Hulk once had a job working at a law firm that catered to people with superpowers, and employed a lot of them. Real law firms wish they could hire a shapeshifter to deliver subpoenas!
* She-Hulk once had a skrull for a companion that swallowed a magic gem that gave her
* She-Hulk). Really, she has ended up being taller than every man she dated seriously.
* She-Hulk's ability to know she's a fictional character (which in some Marvel reference works is actually listed as one of her powers) still resurfaces from time to time.
* She-Hulk's disbarment in her late-2000s series, she became a Bounty Hunter employed by a bail bonds company owned by her former law firm.
* She-Hulk series had Southpaw/Sasha Martin, a 5'5" (1,65 meters), 110 pound (50 kilos) weakling teenage girl. With a MASSIVE mecha-hand on her left hand which gave her enough strength to crush IronClad from the U-Foes' arm into scrap!
* She-Hulk. She-Hulk, herself, vehemently denied doing the deed with Juggernaut. Turns out it was a (very pleased-with-herself) double from an alternate Earth that nailed him.
* She-Hulk. She-Hulk knew that she was in a comic book and took advantage of the fact. In one issue, she escapes from a trap by ripping a hole in the page, walking across two pages of ads, and ripping her way back into the story at a later point.
* She-Hulk's son claiming political asylum after a fight with his dad.
* She-Hulk, starts complaining about how wimpy the cartoon is, only for She-Hulk to slap a hand over his mouth.
* She-Hulk starts working as a bounty hunter enforcing supervillain court dates, she typically tells people she's with the FBI. Most don't think to ask, and it actually stands for Freeman Bonding Incorporated.
* She-Hulk story from the '90s was based on the idea that the existence of aliens was not public knowledge, even after several alien invasions, Galactus standing on the Baxter Building more than once, Skrulls on TV, etc., etc.
* She-Hulk. The poor guy doesn't have a face, so he communicates with a chalkboard he has hanging from his neck — even, at one point, after it had been broken in two!
* She-Hulk, the title character visits a prison where supervillains are shrunk down before they are incarcerated. She starts cooing when she sees the tiny Wrecking Crew.
* She-Hulk. This proved to be a stupid move on his part since She-Hulk immediately pointed out that he was standing in ankle-deep water, and he promptly turned into water by reflex and flowed own a nearby drain.
* She-Hulk utters a string of g-rated "profanities" such as "ear wipe", "dog shingles", "death pokes" and "pig strings".
* She-Hulk was fired from a law firm for crushing the copier while making photocopies of her butt. She asks how they knew it was her. Turns out it was a color copier.
* She-Hulk, where "Jennifer Walters showed that she really knows how to expertly use her mouth to bypass legal boundaries".
* She-Hulk, where obscure Golden Age hero the Challenger shows up at the offices of Goodman, Lieber, Kutzberg and Holliway after being flung into the present day to see if there's any way he can, like, get his stuff and his house back. Stu Cicero tries to assist him in figuring this out, saying that thankfully Captain America's predicament provides ample precedent to work with. The same series also features Matthew Hawk being brought into the modern day and discovering that his license to

practice law expired over a century ago, and the law has changed so much since then that he has difficulty passing the bar exam.
* She-Hulk where she ends up in a teddy during the fight. When asked afterwards what the hell made the teddy indestructible, she pointed out the "APPROVED BY THE COMICS CODE AUTHORITY" label on them.
* She-Hulk, where wolves are quite reasonable mounts. She-Hulk tries this and of course horribly slays the poor beastie.
* She-Hulk worked as one for a time, alongside the undying Skrull Jazinda.
* She ignores the warnings and ends up discovering a cave pool where "Rebecca" has become a host for a monster that kills and inhabits people's bodies, and has been looking for other victims for her children to inhabit.
* Sheik Abdul Bashir, and the other half's in a reasonably Democratic part of Iowa) lustily boos. He then attacks/defaces/tears up the ad. Crowd cheers him well into his match. Oops.
* Sheik Abdul Bashir, a tribal knife and a kendo stick before warning Bashir to never get in the way of his "Nation Of Violence" again.
* Sheik considers Samus her mutual because they're both so similar. Samus has
* Sheik gets an odd variant of this in fan-works. Sheik in canon is a
* Sheikh Mansour in 2008, having been thrashed in almost every visit since.
* Sheikh, Rattle and Roll, Prince Araby, Sinbad, Ali Baba and the Faulty Thieves flee from the palace guards and find themselves in the harem. They are immediately swarmed by the man-starved harem girls.
* Sheik Rattle And Roll being unionised. In a scene set in a harem, they discover that the harem girls and eunuchs are also unionised, leading to an exchange of cards for the Amalgamated Thieves and Rogues Union, the Amalgamated Harem Girls and Dockers, and Amalgamated Eunuchs and Bacon Slicers (at which point every male character on stage crosses their legs. It's that kind of play).
* Sheik, Rattle and Roll has the Forty Thieves being unionized. In a scene set in a harem, they discover that the harem girls and eunuchs are also unionized, leading to an exchange of cards for the Amalgamated Thieves and Rogues Union, the Amalgamated Harem Girls and Dockers, and Amalgamated Eunuchs and Bacon Slicers (at which point every male character on stage crosses their legs. It's that kind of play).
* Sheik, Rattle and Roll, the Forty Thieves have been unionized and get union mandated beaks. One of these occurs during the middle of a sword fight. The fight goes on around them as the non-unionized combatants keep fighting each other.
* Sheik, Rattle and Roll, there is a running joke involving the a character called the Lost Legionnaire attempting to sing his signature song "I'm Wandering" and continually being interrupted after the first line. He eventually gets to sing the whole thing towards the end of Act 2.
* Sheik, Rattle and Roll. They immediately exchange cards for the Amalgamated Thieves and Rogues union, the Amalgamated Harem Girls and Dockers, and the Amalgamated Eunuchs and Bacon Slicers. At this point, every male on stage winces and crosses his leg.
* Sheik, Rattle n' Roll, the vizier orders his two henchmen to fight the invading heroes. One of them grabs his leg and yells "Ow! My gamy leg!". The other one clutches his head and yells "Ow! My dandruff!".
* Sheik/Zelda is popular despite Sheik literally being Zelda crossdressing (
* Sheila Broflovskii speaks this way, though the accent is a little more subdued in later seasons.
* Sheila Harrison, the elder sister of a girl gang-raped and left for dead at a fraternity party, started targeting not only her sister's rapist but also their college football coach who bribed a medical examiner to get them off the hook.
* Sheila herself was a victim of this. Enraged when her husband James dumps her for Sheila, Maggie begins piping recordings into Sheila's home of her many victims.
* Sheila later accuses Calvin of trying to cause this in "The Alien Huntress".
* Sheila resents her mother for abandoning her to stay with her father in the Warlock Realm. She goes as far as to throw the birthday cake her mother made for her on the floor. They eventually reconcile, however, after which she calls her

mother reliable.
* Sheila's death into her chest "as his big sister". This makes him laugh, as he thought she was younger. However, his laughter quickly turns to tears and Yaeko immediately holds him close.
* Sheila, the older sister and guardian of rape victim Lauren, goes into
* Sheila the tank (later transfered into various other vehicles and structures) from
* Sheila the Thief raising her little brother even before ending up in the Realm.
* she intentionally does it out of self-defense when Jaune violently grabs her arm and almost uses his Force Drain on her.
* she is abducted by aliens and forced to choose saving her town at the cost of her own existence, or letting it happen to the tune of 13,000 people affected. She chooses to save the town and is erased, but the actual consequences for this action were already seen. The real final chapter defies this, as it focuses on a school play, but the wording intentionally makes it look like a dramatic followup to the penultimate chapter.
* she is actually a Cat. Who is about 300 years old. And is also immortal. That should pretty much explain it.
* she is actually in love with Damian years before the marriage arrangement
* She is a fake and was never sexually harassed by the defendant, as she had told Harvey. The opposing lawyer hired her to tell Harvey a bunch of lies, and then on the stand, she would tell the truth, embarrass Harvey, and torpedo his case.
* She is aged up from ~5 years old in the book to around 11 in the movie. This does not lessen the
* She Is All Grown Up: A woman's puberty experience contributes to her presence at a reunion.
* She Is All Grown Up, with the guy in the song realising that his friend's little sister—who had crushed on him when she was much younger—is now very attractive and, in the words of the song, "outta my life, outta my reach..."
* She is also cited as saying that Ivypool and Bumblestripe would hook up, when she actually told a fan that they could support whatever shipping they wanted to.
* she is also one with Ray and her father, as a the daughter of Valvatine, similar to the role of Palpatine's son and being the family member Valvatine atempted to turn to his side, like Ray
* She is also the inventor of metalbending, a skill previously thought to be impossible. And to top it all off, she's blind and uses Earthbending as a way for her to "see".
* She is among the people who end up brainwashed by the new religion of "potato-ism" in "The Greatest Story Ever Sold". It isn't until her son Robbie is sentenced to burning at the stake for challenging potato-ism that she comes to her senses.
* she is a psychopathic serial killer, killing everyone she believes she stands in the way of her and Yukiteru.
* She is asked to tone down her children's songs and maybe write about farm animals and things like that. She comes out with, "Oh, the cow in the meadow goes, 'Moo'/Oh, the cow in the meadow goes, 'Moo'/Then the farmer hits him on the head and grinds them up/And that's how we get hamburgers/Now chicken!"
* She is busted back down to Ensign at the end of the episode for insulting an Admiral.
* She is completely correct in saying that the phallophobic Yuki is a lousy girlfriend for Gary or any other man, she is very happy to show Gary just how much better off he is dating someone who doesn't regularly kick him in the crotch, and she even tries to offer him good advice (which he, as ever, ignores) when dumping him.
* she is completely oblivious. Not only that, but she sees him as nothing more than her friend and treats him as such.
* She is contrasted with two of the series' Archangels, to show how much more she
* She is even a double... "Protester", since she is also half krogan. Although she does seem pretty violent sometimes, she is often shown as being not, too, as in the example above.

* she is far more capable of getting things done than any of her brothers.
* . She is greatly confused when she answers her door and Felicity can only stare at her in shock and alarm:
* She is Jasmine Masters and she has something to say! The unquestionable meme queen of
* she is killed and resurrected as a zombie. She is hellbent on making the Freys and Lannisters suffer for having killed her, her son, and her house, even if they are only tangentially connected. She even orders the execution of Brienne of Tarth, who once swore an oath to her, because she refuses to kill Jaime Lannister.
* She is later reincarnated and is able to become a warrior as Cinderheart.
* She Is Not My Girlfriend: A character insists that another character is definitely not their significant other, though they usually will be soon enough.
* She Is Not My Girlfriend. And she's none too pleased to hear what you just said.
* She Is Not My Girlfriend moment between Hook and Tinkerbell (yes, really). When Emma asks if they were ever involved, Tink denies it while Hook implies it. The matter is never approached again.
* She Is Not My Girlfriend the twins offscreen, with Miko describing the match as "Robot Pro Wrestling".
* she isn't angry that Akane pretended not to know about their Forgotten First Meeting
* She isn't disgusted. She chooses Jordan in the end, but she was more tender with him in that moment than she was with anyone else in the whole series.
* SHE isn't enough for you, look at his expression. Either he loves his work, or he loves her bones.
* She isn't one anymore, but in her original few appearances, Zoe from
* She isn't wrong that Monarch is losing the legal battle with the government to prevent the military attempting to kill the Titans before she intiates her plot, with public opinion massively favoring the government's plan. See
* she is promoted to the Management position and becomes a Director like Oprah.
* She is purportedly a manuscript which was written by Holly, one of the protagonists of the story. He passed it to Haggard and asked him to publish it because he was about to leave on a dangerous mission and wanted the story to be told.
* she is revealed as a con artist and a murderer, she is applying bright red lipstick.
* She is shown doing so from time to time. Example: once during the Rukia rescue arc, Ishida saw her crying, and she explained she was just looking at the sun, proceeding to compare the sensation to many other unrelated things - in order, sneezing, feeling like going to the bathroom while in a bookstore and feeling the gums bleeding while biting on an apple.
* she is significantly kinder to him than everyone else is because she views him as a kindred spirit and wants to guide him down the right path.
* (she is starting one with Ray) is doomed to end in tragedy. The older "Kendra" is living alone, just waiting to die and meet "Carter" in her next life.
* She is the Element of Generosity for a reason. She will freely give her time and services to her friends, but has realistic struggles due to being a bit of a
* She Is the King – though it is possible a handful of female pharaohs predated even her... by up to a thousand years or more.
* She Is the King: A female ruler is addressed with a title that typically goes to men.
* She Is the King: A woman who reigns under a masculine title like "Mister" or "King".
* She is then accosted by a student who makes a horrifically rude comment about her race.
* She Is The One at least edible, often delicious, though she has had some rare failures. A few examples of her weirdness are spaghetti tacos, pizza gumbo, and sandwiches with bacon, strips of fried chicken, lettuce, small slices of tomato, and strawberry jelly.
* She Is The One: Jack and Kayla really, truly love each other, but that alone

isn't enough in the face of real life. They both have to work hard to keep their relationship going, sometimes with each other. . . and sometimes against each other. Most of the story's dramatic tension comes from them just trying to juggle their relationship and the demands of high school and then college.
* She Is The One, Kayla Hannigan, and their trials and tribulations through high school and college.
* She is the strongest, especially after draining her husband and second vampire Enkil. She can fly, hypnotize hundreds of humans at a time, incinerate almost any vampire she sees, and track any of her progeny, which she uses to kill off the majority of the world's vampires.
* She is tricked into attacking Mercury unprovoked after defeating him in the finals. This results in a huge negative public backlash against Beacon which attracts vast hordes of Grimm that the military struggles to contain. This is the beginning of Cinder's plan to turn people against their governments, kingdoms against each other and start the process of destroying the Huntsmen Academies.
* She is trying to find a way to give up her immortality and die with her husband.
* She is usually driven by personal motives rather than any kind of altruistic ideals.
* Sheitan, as time tick down to something nasty scheduled to occur at midnight.
* Sheitan combines anarchic, knockabout comedy with nerve-shredding suspense, jet-black humour and bloody horror.
* Sheitan: Eve's father owned a doll store, and the house contains a dollmaker's workshop full of partially-built dolls and doll parts, and his collections of antique marionettes and giant dolls in the attic. All of this is quite creepy. Additionally, Marie is sneaking around the house assembling a doll with a broken head that she keeps attaching human parts to.
* Sheitan, Eve starts off thinking Bart's name is Marc, and introduces him to Joseph as 'Marc'. Bart corrects her, and she starts calling by his correct name, but it takes longer for it to sink in for Joseph who keeps calling him 'Marc' for sometime.
* Sheitan is actually the dream, just before he wakes up back in the country house.
* Sheitan, it is hard to see why Bart's friends hang out with him. He is whiny and obnoxious, won't take any kind of hint, starts trouble that Ladj and Thai have to bail him out of, and has bad breath. He even hits on their girlfriends. Ladj and Thai constantly insult him and, in the dream he has while unconscious, they both abandon him and tell him he's on his own.
* Sheitan, Joseph comes across as this when he refers to Thai as a 'chink' and Yasmine as a 'camel driver', as he appears to be a well-meaning yokel who doesn't know any better. Later, Jasmine seems to treating him calling her 'little camel driver' as a term of affection. However, when he refers to Ladj as 'nigger' and 'coon' during the drunken Christmas dinner, it becomes apparent that his political incorrectness might not be as innocent as it first seemed.
* Sheitan, Joseph—the caretaker of Eve's country house—initially comes across as a slightly dim-witted and eccentric farmer. Slowly, the visitors discover that Joseph is a devil worshiper, and he has something sinister planned for them.
* Sheitan: Joseph takes the visitors to a local hot spring. Although they keep their underwear on, a grroup of locals arrive and strip of naked before joining them.
* Sheitan starts on the evening of Dec. 23 and ends on midnight Christmas Eve.
* Sheitan: The boys flee the house and pile into Ladj's car. However, while Ladj is trying to start it, the enraged Joseph (who they thought they had left unconscious inside) jumps through one of the ground floor windows—curtains, glass and all—and comes charging towards them.
* Sheitan: The boys think they are safe as the start to pull away from the manor in Ladj's car. However, Joseph appears running beside the car, smashes one of the windows with his bare hands, then lunges in and starts strangling Bart.
* Sheitan, the city boys Bart, Ladj, and Thai are only interested in getting into the panties of Eve and Yasmine. Their obsession blinds them to all of the weird events going on around them until it is far too late.

* She joins a minor political party for a cushy job as a party functionary. She winds up as Chancellor.
* She keeps her emotionless demeanor when her daughters are subjected to cruel trainings or rituals
* she kills dozens or possibly hundreds of people indiscriminately, including one scene where she gets in a firefight in a crowded street full of civilians. She has to defend herself with automatic weapons fire and admits that she has no idea what she's shooting at. She almost never sets out to murder people (with two prominent exceptions
* she kills him with a Terragene crystal, then shoots herself with his gun. And then on top of that, she has a couple of her lackeys hijack a Quinjet and open fire on the Inhumans' compound, making it appear as if S.H.I.E.L.D. is trying to kill them all. to start the war that they feel is inevitable anyway.
* She kisses him just before they're going to have their memories wiped. He is surprised but does not seem displeased, and tries to say or do something
* She KNEW that they would fight over who would get to use the portal to leave, and uses the infighting to escape through the portal before they can.
* She knows, or at least suspects, that they're fated to have kids together. Too bad about the "ectobiological cloning Dirk in turn has a crush on Jake, who is still figuring out whether he's straight or bisexual. Later, Dirk tells Jane with uncharacteristic sincerity that he truly wishes he could reciprocate Roxy's feelings because it would make things much easier for everyone involved, but his love for her is completely platonic.
* she lacks social skills and covers herself in public) it's the only way she can tell.
* She later becomes immortal by replacing Eternity, aka The Nameless One in Ink.
* She later becomes one for Suzaku due to her slaughtering people in the ghettos for fun, insulting his ideals, and kidnapping and nearly killing Euphemia. The grudge has become so deep and personal, that Suzaku, who believes in
* She later confesses that this is because when she was a child, she secretly thought that her father was a "bad man" and would take her mother away, leading to her quietly hating him, though she knew there's no reason for it. It's also a little more understandable when recalling that Katsuya died when Tohru was a little child, whereas Kyouko (who raised Tohru on her own after this) died just before the story started.
* She later demonstrates this both of her actual little brothers, especially Steve 'Stevie' Danvers in
* She later discovered it was easier to manipulate objects without her giant talons.
* She later ends up on the receiving end when Elyon nearly kills her in a fit of rage (note that
* She later explains to Ed that while a rank and file soldier can get away with firing wildly at the enemy hoping they hit something, Hawkeye sees as a sniper every person she shoots at, and whoever she shoots at dies.
* she later gains more resemblance to Darth Vader after becoming an Impure Lord
* She later gets a battle suit. Among its features are: defensive shields, self-repair, the ability to
* She later gladly accepts a dark power up from sorcerer Hector Hunt, gaining magical abilities and a desperation to show she can be useful. She's even willing to stay in Hector's realm to gain more power and potentially become a villain, but is sent home where in a fit of anger she gravely injures her father. Officially becoming her family's Black Sheep
* She later interrogates the recently deceased Wilknison as well. Mercifully, it's much less violent, likely because he's an aspect of a dream world.
* She later kills Kanaya and B1 Rose (and also Aranea, but she's a villain rather than a hero), though the former two deaths get retconned like the rest of "Game Over", and in the final battle, apparently kills at least Kanaya and Rose again (though they are revived by Jane), and possibly Jane as well (who is also healed).
* She later repeats this line to Grace about Alcoholics Anonymous, again

referencing the Moonies, but this time adding "the homosexuals or the elderly."
* She later said that Hogwarts rules are a simplified form of the professional game. However, this is basically just a
* She later starts training a religious apprentice, Willowshine, who knows that Mothwing's an atheist and interprets mystical dreams and omens for her. Mothwing did originally believe in StarClan and see them, but her brother (an evil, manipulative bastard) convinced her that they weren't, and after he dies, she can't quite bring herself to trust in them again. Essentially, she
* She later tries to make a same choice when Bow and Adora try to rescue her from
* Shelby as a waitress. And then she drives Sam to tears by having the entire school ruthlessly chant "diner girl" at her. She even continues to have them harass her as she's crying in the hallway.
* Shelby once identified a kidnapping suspect by breaking his alibi; he'd claimed he was at the movies around 8 or so but his ticket stub was for a 5:15. The suspect got irritated that she was going through his things and it was pointed out the evidence was not sufficient to point to his guilt—then he's identified based on his strange habit of drumming his fingers on his briefcase, making the same drumming sound as heard over the kidnapper's ransom call.
* Shelby's Cobra for the respective cars, either by itself like the Cobra 427 or in conjunction with Ford in the case of the GT500 Mustang models.
* Shelbyville also has a statue of their founder, Shelbyville Manhattan, along with two women, possibly his cousins.
* Shelbyville counterparts) shake their fists at the fleeing Springfieldianites.
* Shel can invoke this to Becca if the player chooses. This may work against her in the long run.
* Sheldon also creates a fake dating profile for Penny in hopes that she'll find a boyfriend and stop pestering him for video gaming advice.
* Sheldon asked for a lick of Booker's ice cream. It took a few seconds for Booker to realize Sheldon couldn't lick through his shell.
* Sheldon breaks off having sex with Grace when he hears of a possible dangerous asteroid.
* Sheldon considers his field, Theoretical Physics, to be the apex of all sciences and anything not in the physics area is pointless. This includes a hard science like Engineering, but it's even worse if you don't have a Ph.D. on top of it (ie Howard).
* Sheldon Cooper almost always honestly reacts to every question, even if it hurts the person's feelings. One such example is when Penny tells him and Leonard that in spite of the way her old boyfriend treated her part of her still loves him and asks them if she's crazy, Sheldon bluntly replies "Yes!" Though, in Sheldon's case, it's less of a case of
* Sheldon Cooper initially seems to be asexual, showing no interest at all in women or men and seeming to have a merely clinical view of sex. Even when he meets Amy and begins a relationship with her, sex seems to be of no interest to him whatsoever. However, after several years of dating Amy, he begins to enjoy kissing her and eventually chooses to have sex with her. He still shows no sexual interest in anybody else, making Amy the only person to arouse him at all.
* Sheldon Cooper nervous. The next morning, he rewords the title of the trope in his own Sheldon-esque way.
* Sheldon Cooper reportedly speaks English, Klingon, Swedish, Finnish and Mandarin (very badly). Justified as he finds learning a language a more palatable activity than, to say, speaking to people.
* Sheldon Cooper's answers to the standard Rorschach inkblot test are "A) A bat, B) A bat, C) A bat, and D) My father killing my mother with a hypodermic needle."
* Sheldon Cooper seems very keen on the Singularity in one episode of
* Sheldon Cooper tends to utilise this trope, often getting whatever he wants, how and when he wants it, no matter how unreasonable, merely by being extremely difficult. Lampshaded in "
* Sheldon, dealing with the problem of how to attract more girls to science-based university courses, having correctly devised that you need to begin in middle

schools to get girls studying sciences, goes to do an Internet search on available resources. Raj, Leonard and Howard have to scream "No, Sheldon!", as he enters the search term "how can I get twelve year old girls excited?"
* Sheldon doesn't like her because she's mean to him and challenged the
* Sheldon even talks like this when he's speaking to Penny about simple everyday things; he usually ends up having to put things in
* Sheldon, Flaco is a former cosmonaut, a gold medalist in the modern pentathlon, read several hundred books over the course of one summer, and — according to one strip — will eventually become an admiral in the Bulgarian navy. Did we mention that he's a foot-tall lizard who talks in squeaking sounds?
* Sheldon gives a drunken acceptance speech for an award banquet. The video is up on YouTube and goes viral.
* Sheldon has a crush on his friend Jenny and it's pretty clearly shown to be an extension of his general love of machines.
* Sheldon has a long list of arch nemeses so old he keeps it on a floppy disc.
* Sheldon has the TV asking Gramp a bunch of questions about his feet - if they're dry all the time, if his toenails are all wonky, if his feet have developed the look and feel of a rhino's hide. Then...
* Sheldon has tripped on the hallway stairs and crashed out of view on at least two occasions. Once when jogging with Penny (and implicitly falling on top of her), another when rushing to get his old Apple I to show Steve Wozniak.
* Sheldon Hawkes in "Raising Shane". Serial killer Shane Casey paid a guy to dress like Hawkes and rob a bar, then the money was planted in Hawkes' own hoodie.
* "Sheldon... if you were a robot, and I knew and you didn't, would you want me to tell you?" The following philosophical discussion lasted a full minute.
* Sheldon invented a bizarre chess variant by trying to invent a three-way chess game
* Sheldon is clearly Mary Cooper's favorite child. Mary dotes on Sheldon even in his adulthood and doesn't speak very highly of George Jr. or Missy, referring to them as "dumb as soup". The prequel
* Sheldon is on the receiving end when Amy tries to seduce him by creating an association between her and his favorite childhood memories. She serves him
* Sheldon is socially challenged, has fairly monotonous speech, and exhibits heavily ritualized behavior.
* Sheldon: One of Sheldon's early experiments resulted in his pet duck Arthur gaining human intelligence and the ability to speak.
* Sheldon pays a surprise visit to his mother. He glances through the front window and sees, as he puts it, "Mommy with a naked man and trying to be a mommy again."
* Sheldon's grandfather goes from canola oil to Montana mountain goats.
* Sheldon, Sheldon starts seeing candy everywhere. He imagines a coffee table as a peanut butter cup, a lamp as a piece of candy corn, and Arthur as a gigantic marshmallow Peep. In the next strip...
* Sheldon's mom has shades of this trope, but she's generally the favorite parent of the group. She comes from rural Texas and tends to make
* Sheldon's mom is a religious fanatic in the present, but freely admits to Penny "When I was your age, you could have me for a car ride and a bottle of strawberry wine."
* Sheldon's mother and to a lesser extent, Howard's mother, play these to the group, including Penny. Sheldon's mother is the one of the few forces that can get Sheldon back to reason while the rest of the group respect and like her for her kindness. Howard's mother is a stereotypical Jewish mom, but she does dote on her son and his friends on occasion. Tearfully lampshaded
* Sheldon's mother, by contrast, is a classic Christian fundamentalist at the opposite end of the spectrum. However, as opposed to most Christian versions of this trope, his mother is
* Sheldon's mother, too, in her own way. She's the sweetest, kindest, most caring person on the planet—but she lives so much in her own little bubble that she doesn't realize how offensive the things she says are. (To her credit, when the offensiveness of something she says is pointed out to her, she'll try to avoid

saying it, although it is clear she doesn't quite understand why.)
* Sheldon's parents, the overweight George Cooper and the thinner, more attractive Mary. It helps that Mary isn't drop-dead gorgeous, but definitely someone you wouldn't necessarily expect to be married to someone like George. However, he was said to be a fit, leather-jacketed motorcycle-riding wild guy when he was younger. We also know from
* Sheldon's the dress on Amy, which causes Amy to fall in love with the dress all over again.
* Sheldon strip has Arthur saying that Gramp's corned beef tastes like "hate".
* Sheldon struggles with committing to Amy and then from there moving forward in their relationship. In his case, the issue stems from having previously thought of himself as a
* Sheldon The Tiny Dinosaur dinosaur who wears an acorn cap as a pretend turtle shell. His best friend an equally diminutive baby seahorse, and he has a plushie that is really a fluffy cotton ball with eyes. #cute is one of the comics' staple descriptors, for good reasons.
* Sheldon The Tiny Dinosaur version of him exists, but it's coloured blue, and wears a peanut shell instead of an acorn cap.
* Sheldon" to win a bet. He succeeds largely by throwing around huge piles of cash to TV and music executives.
* Sheldon tries to get Leonard's app development team to name the app after himself, twice. The first time Sheldon uses
* Sheldon uses sulfuric acid from a recyclable battery to weaken a bar of a cell he and an inmate are locked into during the prison riot in "Redemptio."
* Sheldon was mortified when Penny found out that his "Meemaw" (Grandma) called him "Moonpie". Only his Meemaw is allowed to call him that.
* Sheldon was very similar in personality to Leonard, just more neurotic and once had sex with Gilda. The series made him asexual,
* she leaves for Scotland, never to return. Hisao feels that his relationship with her was completely pointless.
* She left everyone slackjawed, near the end of the Venus Arc, by physically ripping apart one of Martha Minerva's dimensional barriers. A feat that
* She left Lilo at home alone by accident — Cobra doesn't know that Nani went to pick Lilo up from hula class, but Lilo decided to walk herself home and locked herself in — left the stove on, and has been falling behind on household chores because she's too busy working to pay off all of the bills using her meager wages. Lilo also exhibits a lot of
* Shelfwarmer: A toy that, for whatever reason, ends up under-selling or over-distributed, resulting in large numbers of unsold toys taking up space on retail shelves. Inspired by the sports term "benchwarmer."
* she, like her mother, are actually descendants of a Fire Elemental/Human pairing, and thus have a bit of supernatural fire burning inside them. can cause Annie's temper to 'flare' with REMARKABLE speed.
* She likes this so much, she becomes part human herself with that cocoon thing, and then
* Shellac's "Prayer to God", which is about a person begging God to kill his ex and her lover. The narrator pleads for a delicate, painless death for her, but asks for an unsympathetic murder of the other guy.
* Shella, who can actually see instant-kill points on the human body and has such tight control over his muscles that he can apply precise pressure to a postal scale to within hundredths of an ounce.
* Shell Backpack: Antropomorphic shelled animals, like turtles and snails, wear clothes that expose their shells.
* Shell Bullet Alter, including some spots of pure black where his skin seems to be simply gone. After gaining the power of the Other Side, he loses the ability to use his right eye if he's not at least in the Shell Bullet's second form and regularly comments on his arm hurting when not using his Alter. By the end of the series, parts of his hair are the same bright orange as his Alter and he's gained more lines on his face.

* she'll die if she tries to dematerialize. Then she finds a note from the Time Lords, saying that, off the record, she'll be fine and they'll turn a blind eye on her "escape." But just as she's taking off, it occurs to her, and the audience, that they might have lied to get her out of the way. And then the audio ends. Just like that.
* Shelldon, from afar, says that he did well and makes him proud, having apparently heard of his actions in freeing a group of fish during the episode.
* Shelldon - very much on the "pro-social values" end of the spectrum. The premiere episode, "Crabby's School Daze," actually focuses on Shelldon helping an adult friend, Crabby, to get his G.E.D. (adult diploma.)
* Shelley, Amy and Desmond visit Atlantis in one of the last chapters of
* Shelley de Killer a de Killer assassination, not to mention actually broke his arm in the process. This really struck a chord with de Killer, who is usually able to kill his targets without getting a scratch on him, and he wanted to help get justice for such a skilled opponent.
* Shelley Duvall hasn't made a movie since 2003. She is said to be highly reclusive and odd, even going so far as to in 2007 go to a hardware store complaining she needed materials to keep the "aliens" away. However, she did give an interview in 2010 saying that she wasn't reclusive, she just wanted time off after working for so long, and noting that she still gets script offers and a return to acting wasn't out of the question.
* Shelley Winters said that this was "the most thoughtful and reserved performance I ever gave".
* "shell fragment" moment, doesn't actually seem to mind, only remarking to B.J. that he really wants to earn one himself.
* Shell Game: A game that involves finding a small item underneath a shell that is shuffled among other identical shells.
* Shell Game: If the contestant is wrong on all four higher-lower pricing questions, meaning no chips on the table; they had to have at least one correct to place a chip beside the shell they thought concealed the ball.
* Shell Game: Two or more identical things are shown, one is significant, and we initially know which it is until the objects get mixed.
* Shelling of Mainila started the Winter War between the Soviet Union and Finland. The event was semi-officially admitted as a false flag by the Soviet and Russian leaders from the '70s to the '90s, but under Vladimir Putin, the Russian official stance has reverted to Stalin's version of events.
* Shellington is bisexual; in school, he crushed on a boy named Glenn, but ultimately he ends up with
* Shell of the Last Kappa. Admittedly its Anti-Magic effect is more absorption than cancelling, but it does let you stop fireballs dead.
* Shellshock 2: Blood Trails by releasing it as a plague which affects both sides.
* Shellshock 2, so there are certainly a lot of nasty things lurking in the jungle, but it isn't really the jungle's fault. All the unpleasant stuff is ultimately of human origin, including the zombie plague.
* Shellshock) constantly kills POWs in cutscenes and helps the South Vietnamese commissar torture people.
* shellshocked from Alma's mental effects, and a single shot to the head drops him.
* Shell-Shocked Veteran, and has flashbacks to his Vietnam service triggered by otherwise ordinary events. This song was written back in 1982, when PTSD was still rather misunderstood, and was called "Vietnam Syndrome" after the experiences of veterans returning home from the war over there.
* Shell-Shocked Veteran: A war veteran is severely traumatized by the horrors they witnessed during the war they fought in.
* Shell-Shocked Veteran: A war veteran is traumatized by the horrific things they witnessed in the war they fought in.
* Shell-Shocked Veteran: A war veteran who is deeply traumatized by the horrors they witnessed in the war.
* Shell-Shocked Veteran for her to like, and she hadn't understood why until then.
* Shell-Shocked Veteran: Male characters who've succumbed to emotional trauma

related to war are now characterized in a neutral way, rather than condemned as malingerers. In other words, taking emotional damage in war can be seen as a reflection on how awful war is rather than how weak the man is.
* Shell-Shocked Veteran: The plight of soldiers returning from Iraq and Afghanistan lacking proper mental health support got a lot of attention.
* Shell-Shocked Veteran trope, which uses the same metaphor to describe something different.)
* Shell Shock features the platoon's new meat getting a chilling introduction to warfare.
* Shellshock Nam 67 also features mooks and even the main character being easily dismembered and/or decapitated by machine guns or sniper rifles.
* Shell Shock. Sergeant Armor isn't very old, but he's got all the bad temper, PTSD, and sadism that comes from a long time at war.
* Shell-Shock Silence: Silence (possibly with the exception of a high-pitched hum) plays after an explosion.
* Shell-Shock Silence, the hero watches fellow comrades on fire during the battle at Omaha Beach.
* Shell Shock, the captain orders his troops to do this to a large group of freshly captured POW's. It's as much for revenge as it is a sign for just how fucked up things are.
* Shell Shock, the sergeant is implied to be quite attractive, especially because he looks good in uniform.
* Shell Slugs can only be damaged either by Burrowing underneath them or flipping them over with the Spirit Hammer.
* she'll still find the strength to fight you with even stronger moves than before in her last moments. However, if you don't finish her off then and there, and just let her keep attacking, her moves will gradually slow down and become weaker, with her entire body dissolving
* Shells time for herself and whoever she sees fit to include. Which basically amounts to the same thing.
* Shells", Wesley did this again. While Angel is monologuing about how they're the good guys so they have to protect any member of humanity, Wesley kills Knox.
* Shelly Berman was good at this sort of thing. His most famous bit was
* Shelly de Killer has stitches going straight down the center of his face.
* Shelly De Killer, the notorious assassin, sends out pink calling cards and openly wears a pink coat while posing as an ice cream salesman.
* Shelly Du Vall naturally adopted the traditional long golden hair when she played Rapunzel in an episode of
* Shelly Gibson, who played Chaplain Claire McCabe in the Season Six episodes "Heaven's Skate" and "Split Decision", was the then wife of the producer and writer Channing Gibson.
* Shelly is just great at getting arch nemeses. There is also Leslie Winkle: who "made Sheldon Cooper cry like a little girl?".
* Shelly Marsh. Near the end of the episode, she sticks up for him when he nearly gets in trouble for what his clone did, only to beat him up moments later.
* Shelob is described as only desiring "death for all others, mind and body, and for herself, a glut of life, alone, swollen till the mountains could no longer hold her up and the darkness could not contain her."
* She loses her cool and punches the wall when the Wolkenritter find out that Hayate's illness is life-threatening.
* she loved him from the first time she saw him and interrupts her with:
* She Lover of Death, are two completely separate mysteries being investigated by Fandorin in Moscow at the same time. Each book contains a few passing references to Fandorin's other case.
* She loves ice cream too; in one summer strip, she buys the entire inventory of an ice cream truck.
* She Loves Me, Amalia Balash falls in love through correspondence with Georg Nowack in which they address each other only as "Dear Friend," not knowing that he also works for Maraczek's Parfumerie. Actually, at the time of their first date, he

no longer works there, having quit because he found her too frustrating to work with.
* She Loves Me falls for her pen pal "Dear Friend" for how well-read and cultured he is, despite not knowing what he looks like.
* She Loves Me, Georg improvises a story about there being a fly in Amalia's wine to get her out of trouble with the headwaiter after she screams.
* She Loves Me, Georg quits working for Maraczek in the middle of the first act after venting his frustrations on Amalia. By the start of the second act, he's back.
* She Loves Me, Georg talks about "Dear Friend" as a chance acquaintance of his when consoling Amalia after the Cafe Imperiale fiasco.
* She Loves Me has chatter about cosmetics humorously mangled by interruptions.
* She Loves The Moon, and graffiti, as it was drawn on the sidewalks of San Francisco.
* Shel Silverstein, a clown tries really hard to make people laugh, but to no avail. However, when he finally gets fed up and tells his audience how depressed he is, they finally start laughing.
* Shel Silverstein also sounds a lot less strange if the Z is pronounced as "zee".
* Shel Silverstein cover, the narrator's father names him Sue so that he'll grow up tough. It works, but the narrator still resents the name and at the end of the song vows that when he has a son of his own he'll name him "anything but Sue."
* Shel Silverstein describes a list of misfortunes that befell the narrator, who kept escaping only to get into worse and worse danger until an eagle drops him in a boiling lake a thousand miles wide... "And you'll never guess what I did then— I DIED!"
* Shel Silverstein had already released his own version of "A Boy Named Sue" before Cash recorded it.
* Shel Silverstein has a spoken-word recording that invokes the non-fridge version of this trope: "Sarah Cynthia Sylvia Stout Would Not Take the Garbage Out".
* Shel Silverstein. He also wrote novelty songs such as: "The Great Smoke Off", "The Cover of Rolling Stone", "A Boy Named Sue" and its sequel "The Father of a Boy Named Sue". He was also a regular at the Playboy Mansion.
* Shel Silverstein he made a great chain of deals because he has a bigger number of coins to count at the end, but his father knows better.
* Shel Silverstein, illustrated with increasingly large fish in the act of eating one another, mentions how in the end only the biggest fish of all gets fat — and don't you know any people like this?
* Shel Silverstein) is a parody of teen breakup songs where a boy pleads over the phone to be allowed to speak to Sylvia, only to be stymied by her mother.
* Shel Silverstein, is simply the grass- and tree-covered scalp of a very large, hungry child sitting on the sea floor.
* Shel Silverstein-penned "Marie Laveau". While somewhat well known, it isn't quite as famous as "Detroit City" or "500 Miles Away from Home", which are also his highest hits on the Hot 100 (barring the bizarre case of "All American Boy", which was erroneously credited to Bill Parsons). It also came much later in his career than those songs.
* Shel Silverstein poem "Always Sprinkle Pepper in Your Hair" refers to a tactic for keeping yourself literally too spicy for a hag to make into soup: "She'll pick you up and sniff you, and then she'll sneeze 'Achooo,' and say, 'My tot, you're much too hot, I fear you'll never do'."
* Shel Silverstein's "Hungry Mungry" is about a boy whose ravenous appetite works up to and beyond this level.
* Shel Silverstein's poem "Jimmy Jet" entails a boy watching TV and becoming a TV set.
* Shel Silverstein's poem "Monsters I've Met", the narrator encounters various monsters— a vampire, a ghost, and a devil— none of whom mean him any harm, and only want his help with various everyday tasks.
* Shel Silverstein's songs about a girl who is forever claimig "Ladies first!" ends with a jungle trip captured by cannibals. And when deciding who gets eaten, well...

* Shel Silverstein. The story goes that a young boy encounters a goblin that grants him one wish. The boy, in his greed, wishes for two wishes, which he gets, surprisingly enough. So with each wish, he wishes for two more wishes, giving him four wishes. And with each of those wishes, he wishes for two more, giving him eight. This goes on for some time, until the boy dies, presumably from old age. All that's left of him is a humongous pile of unused wishes. The narrator of the story then invites the reader to take a few, and warns the reader not to "waste your wishes on wishing."
* Shel Silverstein warning about the biting ducks waiting in the room at the bottom of the stairs. The trope is even lampshaded when Burt, the owner of the staircase, points out that the fact that someone should duck their head in a low-hanging doorway is obvious, and that the sign is to warn people of what they can't see.
* Shel Silverstein wrote "Father of a Boy Named Sue", which claims the confrontation didn't go exactly the way Sue suggested in Silverstein's earlier song.
* Shelter, a 2007 movie about a young man who had to bury his college dream for family obligations finding comfort and relationship during his time surfing with his best friend's big brother.
* Shelter: After getting kissed by Shaun, his best friend's older brother, Zach spends a bit of time in upset and confused brooding, but once he realizes that it's what he wants, he's actually quite eager to be with Shaun.
* Sheltered Aristocrat: An aristocrat that has spent so long—probably since childhood—being around nothing but other aristocrats and their luxuries that they don't know how life really works.
* Sheltered Aristocrata prince who has no idea how to take care of himself or interact with people outside of his social class
* Sheltered Aristocrat route revolves around pushing him out of his contemptuous comfort zone, revealing his more vulnerable and passionate side.
* Sheltered, you have to help a family of four (five if you let them have a pet) survive in the aftermath of a nuclear war by helping them to maintain their fallout shelter.
* Shelter is a short survival/adventure game played from the POV of a mother badger, struggling to feed her just-weaned offspring and shepherd them to safety across challenging terrain.
* Shelter, Jeanne is concerned because her brother Zach has been surfing with Shaun, who's gay. She talks to Zach about it, saying: "I don't think that he's the best guy to be hanging out with all day half naked, if you know what I mean."
* "Shelter" loops a distorted sample of a nuclear bomb explosion throughout the song, following the intro that repeats the voice clip "The atom bomb explodes again!" many times.
* Shelter (romance film between two gay men set in California, USA; subject matter includes coming out, homophobia, and queer male romance)
* shelters, food banks, clinics, and vigilante neighborhood patrols in poverty-stricken areas, and has become quite popular even with the mundane communities.
* Shelter the moon) on a collision course with Earth. The implications are Earth either was destroyed or, at the very least, humanity was decimated by the incredible impact. All that is left is Rin and her memories.
* Shelter You play a mother badger leading her five cubs on a journey to a new home. Starvation, rushing rapids, or predators can very easily claim them, quickly and totally unceremoniously.
* Shelter, you play as a mother badger who guides her children around, forages for food for them, and avoids predators. It's not fast-paced enough to be action or mundane enough for simulation; most accurately, it's an atmospheric adventure.
* Shelton Benjamin, but otherwise was better off with a manager... and Lesnar was worse than Benjamin, aside from a UFC press conference where he finally managed to cut a decent promo at the one time management didn't actually want it.
* Shelton Benjamin in college and served as his tag team partner in the Minnesota Stretching Crew, instead saying Benjamin had been Lesnar's roommate before doing away with any personal connection between them altogether. Though they eventually

started acknowledging reality again on their website.
* Shelton Benjamin: Left WWE in 2010, debuted for ROH that same year and for NJPW in 2012, returned to WWE in 2017.
* Shelton Benjamin's "feud" with Maven. Shelton immediately hits the move and pins Maven, rinse and repeat.
* Shelton is also the only avatar still alive by the end of the simulation in
* Shelton Klutzberry, another character vocally based on Jerry Lewis, says this sort of thing in
* Shelyn seems to be this as well. It seems par for the course for a god of love, art, and beauty, but her brother Dou-Bral was one too. After leaving to explore the far reaches of the cosmos, Dou-Bral returned twisted and evil as the sadistic god of pain and darkness Zon-Kuthon. He and Shelyn battled, and during the fight, she realized that his glaive was whispering to him. Wresting it away from him did not undo his corruption, but he did cease his attack and has refused to harm his sister ever since. Shelyn kept the glaive, and has endured its maddening whispers for countless centuries, but remains as pure-hearted as ever.
* She makes a more dramatic version of this choice in the season one finale, as she
* She makes no secret of the fact that she's a villain, and enjoys it.
* she manages to befriend Kamen, who'd previously written her off as not worth her time, by virtue of being there for Kamen when she's grieving for Momoko's death.
* She manages to get rid of them, but he still had all of his scans on an SD card.
* she may be bisexual, drunk and desperate). Zii's opinion on the matter is different.
* She may not have ultimately been in love with him, but Katniss experienced a version of this in
* Shemesh had an episode where Marcus opened a modeling agency to attract beautiful women so the place would be cooler. The first woman to show up is beautiful... except for her big nose. While Shemesh tries to turn her down, the word 'af' (Hebrew for nose, among other things) is heard about 7 times in 20-30 seconds of conversation.
* 'She' might also count. Frank Ocean's vocals in the chorus make it sound like a slow jam, but Tyler's rap is about stalking the object of his affections:
* She might have "Even in Winter, the cold isn’t always bitter, and not every day is cruel."
* she might have to kill her if she turns evil. Kennedy retorts, "Bite me!" Willow says, "I will… I mean I do mean it."
* she might never get there Essentially she forgot what was important to her or what's real and replaced it with meaningless fancies. C.S. Lewis left it up to our own interpretation of Susan's personality whether she would find her way again.
* she might not be as important as she is in the story if she wasn't Ari's half-sister and handler in Mossad.
* Shemikia Copeland's "Who Stole My Radio?" discusses the general decline of radio-music quality.
* She murdered her husband. There's an implication that she's the Thieves Guild Master and has been playing a long con on both brothers.
* She must be either taller than most men in her setting or stand at
* She must either be considered attractive in-universe or be accompanied by
* Shenandoah had a hard time holding a lead singer after Marty Raybon left. However, one of the replacements was Jimmy Yeary, who sounded uncannily like Raybon.
* Shenandoah's "Ghost in This House" has the narrator comparing himself to a ghost who makes his presence scarcely known in the house. The second verse reveals that he perceives his lover identically.
* Shenandoah) visits his wife's grave and delivers an emotional speech to her headstone - "I don't even know what to say to you any more, Martha. There's not much I can tell you about this war. It's like all wars, I guess. The undertakers are winning..." The speech was actually released as a single due to popular demand.
* Shen and Sika's sled is pulled by the titular pugs (sixty-six in all).

* Shen decides that he and the pugs will live with Sika and her mother.
* Shendu and Daloan Wong would often use their magic to do this when they were about to be caught by Jackie and company or the authorities. The authorities would be shocked when the smoke cleared and they were suddenly holding empty air instead of the bad guys.
* Shendu apparently had the tongue of the slave girl who scrubs his scales in the bath removed so she wouldn't make noise while doing her job.
* she needs the extra wages to pay "apology money" to the greedy relatives of one of her students, who are using the student's death to extort money out of her. The anime omits her entire backstory, and thus her reason for going to all this trouble
* She never did say what that spell was that Dumbledore was trying to cast on Voldemort during their duel that made Voldy's eyes narrow suspiciously. And now we may very well never find out.
* she never had a single wild take, most likely because she expected nothing less from Luffy.
* She never says she'll walk them TO see her lover, just "if" she could. She could walk the thousand miles after.
* She never shies away from excessive violence to achieve her goals — and her enemies use the same brutal methods, as well.
* Sheng Long himself has skirted this trope a few times over the years. He was almost included in the video game version of
* Shen Gong Wu is the Fountain of Hui, which bestows any and all information upon the user. By itself, it only provides random knowledge (and a really bad migraine), but when paired with the Eagle Scope, one can sort through all the junk and find whatever specific bit of info they're looking for.
* Shenhua, a Chinese assassin in the employ of the Kan Yi Fan Triad, favors a pair of kukris with the handles tied together with a length of rope. In her first appearance she beheads a pair of Abu Sayyaf
* Shenmue about a Saturn ISO with the beta on the internet and some few people that claims they have this beta, but nothing confirmed until now.
* Shenmue and its sequels are about Ryo Hazuki trying to get revenge on Lan Di, the man who killed his father. Everyone calls him out on it, either for putting himself in danger or for ignoring everything else.
* Shenmue, and spans more than just one chapter. It still reuses the same engine as the original game, albeit with all new locations, characters and music, along with a few tweaks to improve the pacing and refine the gameplay.
* Shenmue console at the last minute, giving Sega extra time to make an English dub for the game in the process. Europe ended up receiving both, the Dreamcast version with Japanese voices and the Xbox version with the English voices.
* Shenmue. Eventually, a Kickstarter was announced for Shenmue III, which was funded within 12 hours, guaranteeing that the series would finally see its conclusion- or not, as that game ended on yet another cliffhanger.
* Shenmue had generated considerable hype for the console, and is widely considered the best game on it, but its huge budget eventually led to it becoming a financial failure despite solid sales.
* Shenmue. He carries a bell, greets with "Merry Christmas" and everything.
* Shenmue III. Not only was the game widely derided for its shoddy technical quality and archaic game design decisions, but it ended the story on yet another cliffhanger, with no certainty of a fourth game ever coming out.
* Shenmue II port was released in its place a year later. Europe got both the Dreamcast version (which kept the Japanese voice acting and added subtitles) and the Xbox port.
* Shenmue II, Ren attacks Dou Niu with a few kicks to the side, and Dou Niu then grabs Ren's leg with one hand. Ren then begins to punch Dou Niu in the chest, at which point Dou Niu grabs Ren by the neck with his other hand. Dou Niu never flinches though the whole thing.
* Shenmue. Imagine that, the storybook romance between a cold piece of emotionless machinery, and a forklift."
* Shenmue-inspired setting and its fighting game-esque combat system with a steep

skill ceiling are noted as its strong points. But ultimately its popularity is considered to come from the fact it was (and largely still is) a game unlike any other, for good or ill.
* Shenmue Online MMORPG was planned, but the game appears to have been cancelled, with no mention of it even as a third mainline game was able to be created almost two decades later.
* Shenmue: Ryo is looking for the leader of a Shaolin monastery and is told by a girl that he should look around the place for clues to understand the monks' beliefs and that only then will the master reveal himself. After that nonsense an old man shows up; Ryo assuming this must be the master tries to talk to him shushing the girl but in the process it turns out that the girl is the actual master and the old guy is just the janitor.
* Shenmue: "Sailors, Well, I always see them near bars. Well, you know what I mean. I just see them hanging out. Most of them are pretty big, so you can't miss them. Umm, I heard that there's a bar where sailors hang out, but I don't know the place because I never wanted to go to such a bar, you know. It's best to stick to your regular drinking hole, if you know what I mean." I am very afraid that I do know what you mean, Komine.
* Shenmue seems to be self-serving (killing Iwao as payback may have been a convenient double-whammy).
* Shenmue. The town is full of buildings you can enter and characters you can talk to, but only a handful of them are important in any way.
* Shenmue third installment still emphasizes realism, but that explicitly supernatural elements will be part of the story going forward.
* Shenmue. This was condensed down into 25 chapters, with each game having multiple chapters (for instance, the first game was chapter 1, the second game had chapters 3-5, the 2nd chapter being an unshown part between the two games). The third game was released in 2019 and series creator Yu Suzuki has stated that he hopes to make a fourth game, but is unknown when it would be released.
* Shenmue told by the teacher (who is, of course, the master he's looking for) that he remains too impulsive, and he needs the grace and clarity of mind to catch a falling leaf. For several days.
* Shenmue took this to a whole new level, with plenty of areas, businesses, and rooms to explore, side activities to partake in, and unique NPCs that each have their own schedule and routine for the day (e.g. Noticed the same guy working at both the convenience store and at the harbor? It's not because the devs got lazy; that guy is a college student working two jobs to make ends meet). None of this was necessary to make progress, but it helped to establish the setting as a larger world that protagonist Ryo happens to be a part of, rather than having the setting tailored around him and his quest.
* Shenmue was neither of those, thus the sequel suffered from horrible sales, and it ended on an unresolved cliffhanger that was never resolved due to Yu Suzuki leaving Sega, and Sega not having enough of a budget to make a third game due to losing so much money on both games. Suzuki had to rely on Kickstarter to get the third game off the ground.
* Shenmue, when Ryo is invited to stay with Master Tao (Xiuying). He's quick to point out that she has only one bed, and she's even quicker in pointing out that he'll be taking the couch.
* Shenmue, which especially applies for those not familiar with Japanese.
* Shenny her kids was okay if she could use the experience to write parenting books and push them to the tops of their fields as adults.
* She normally shoots once to incapacitate and kill, dealing with her missions calmly and coolly. At least, until she meets the guy who shot Togusa and damaged her body. Then she got scary.
* She now has her own game. Interestingly, however, she's depicted as being a lot less powerful than fans assume and even somewhat below her
* Shen Qi De Mao Zi for the Famicom, but it's a turn-based RPG for some reason.
* Shen Qingqiu tries to fight off Mobei Jun to prevent him kidnapping his apprentice and is impaled in the chest with an icicle for his trouble. He managed

to be saved thanks to the quick intervention of several medical cultivators
* Shenron also appears to have omnipotent knowledge he's more than willing to share to help grant a wish with the intended effect. When the heroes are discussing whether they should just wish to kill the Saiyans before they arrive, he interrupts to say he can't do it as they exceed his power. The Saiyans were arriving from space and Shenron had never left Earth or even heard of them, yet he instinctively knows that this wish won't work.
* Shenron and Porunga also cease to exist (and their respective Dragon Balls turn to stone) if their creator dies, though the connection can be passed on before the creator dies (and the dragon can even be recreated after if the original materials are found). For Shenron, that's Kami, later replaced by Dende after Kami fuses with Piccolo. For Porunga, that's Grand Elder Guru, later replaced by Elder Moori after Guru passes away.
* Shen Yuan transmigrates into the body of the villainous rival of a harem novel he was reading in
* Shenzeng when he saw, in real life, a man slipping on a banana peel and he was surprised because it was just like in "comics".
* Shenzhen I/O printed out and organized in a custom binder, with several other goodies such as a secret letter and a business card for the company you work for in the game. Even if you didn't buy this version, you're still encouraged to do this with the digital version of said manual having instructions on how to print and organize it in your own binder.
* Shenzhou is facing off against the combined fleet of all the Klingon Houses, a dozen or so other Starfleet vessels arrive to reinforce her and to make the Klingons think twice about doing something violent. On the DVD, the scene is even called "The Cavalry Arrives". Subverted in that this is exactly what T'Kuvma was hoping for, as his plan is to start a shooting war with the Federation in order to unite the disparate Houses under a single banner.
* Shenzi, Banzai, and Ed overhear this and aren't pleased, to say the least.
* Shenzi, Ed, and Banzai at first seem like Wile E. Coyote-esque villains who always fail every time, but at the end of the film, they all show their true dangerous selves when they
* "She Of Little Faith" had an entire beginning where Homer teaches Bart and Milhouse how to launch a model rocket — with explosive results.
* She often calls Steven "Ste-Man". Greg calls Steven "Shtewball", and Mayor Dewey calls him "Carwash-Kid".
* Sheogorath. They too have a caste system with an eight-tier hierarchy, ascending from lowest to highest in rank as follows: Auren, Auredel, Aurmok, Aurmokel, Aurig, Malaurig, Pelaurig, and Aurmazl. An individual's strength and discipline determine their place in this system.
* She once proposed that reports of an "evil monkey" attacking a high school
* She. One of the dancers apparently decided to up the Fanservice factor by going with pasties over her nipples rather than any kind of bra.
* she. Only a partial example, since Wesley was a mentor to Buffy, not her (and not a very good one), though he was presumably employed by the school in some capacity to justify him hanging out in the library.
* She only begins noticing other people after she temporarily loses interest in him.
* She only has the sword during her duel in the third arc, however; if you think of the sword/dagger combo as representing Touga and herself, then it makes sense as her relying purely on her own strength in that fight.
