* Teketeke which used to be a schoolgirl who died after falling on a set of railroad tracks and subsequently having the lower half of her body crushed. She now roams the earth by crawling on her hands, carrying her upper body around. There is a film based on this very legend.
* Teketeke who had a penchant of killing students by severing them into half from

their waists.
* Teki wa Kaizoku; the main character jerks his wrists whenever he fires his laser gun like it's recoiling even though laser weapons shouldn't, but immediately after we first see him fire it he's called on that and he admits that pretending his gun recoils is just a hobby of his. Sure enough, if you pay attention in future fight scenes he keeps doing it but nobody else does.
* Tek Jansen of Colbert photoshopped in a spacesuit) has not been released, so there is no true defictionalization yet.
* Tekkaman Blade, absolutely no one feels bad about killing off the Radam's alien hordes; the Tekkamen... not so much.
* Tekkaman Blade almost fits with the description word for word. He's initially stronger than everyone else, wants to defeat the Radam, and doesn't really join forces with either the military or the Space Knights. The catch is, his reason to not join forces with either side is a bit complicated.
* Tekkaman Blade are basically this. They grow from the huge insectoid Radam Beasts who burrow into the earth and function as seeds. These trees slowly terraform the earth by emitting gasses into the atmosphere. Their true purpose happens when they bloom, which is to capture humans into their pods and forcibly change them into Tekkamen, brainwashing them in the process to become loyal to the Radam.
* Tekkaman Blade as well, and you've got a total asshole of a Neidermeyer as a result.
* Tekkaman Blade been infected, a fact which powers the angst of the latter half of the show.
* Tekkaman Blade, but it's explained in-series that they are actually transmuted into crystalline-based entities.
* Tekkaman Blade can spit tentacles. In part II, some of the alien Tekkamen have them as well.
* Tekkaman Blade: D-Boy claims to have amnesia, but it turns out he's faking it. Then, near the end of the series, he starts losing his memory for real.
* Tekkaman Blade gives us the Hi-Coat Voltekka, an upgrade to Blade's Voltekka. It's used once in it's introduction episode to defeat Evil and then again three episodes to shoot down a nuke. Then the time skip happens and it's not seen again.
* Tekkaman Blade has a main rival who sports this color theme. Bonus points for being named Tekkaman Evil.
* Tekkaman Blade has David Kruegel, a known player who's in love with a woman he can never have: Aki Kisaragi, Takaya/D-Boy's girlfriend.
* Tekkaman Blade has the Radam, giant vaguely-instectoid aliens, as the main antagonists. Their life-cycle is rather bizarre, as they turn into strange alien trees once on the surface.
* Tekkaman Blade is to turn Earth into more Super Soldiers. They partially succeed, turning a large part of the population in "Primary Bodies", who can partially transform, but have no weapons.
* Tekkaman Blade launch sequence every time the hero launches up to the space ring.
* Tekkaman Blade. Played straight again when after defeating his brother, he sheds his birthname and nickname, claiming that he is Tekkaman Blade.
* Tekkaman Blade second arc, the series ends with another Radam invasion, just like it began, only with a lot more Tekkamen on the side of the Earth.
* Tekkaman Blade showed up, he made a comment on how D-Boy's scar made it look like he was crying.
* Tekkaman Blade takes place in the year 192 of the Allied Earth Calendar.
* Tekkaman Blade: Tekkaman Dagger, albeit he was a bit more resilient and annoying than average. He still was far weaker than the rest of the villains.
* Tekkaman Blade, the Orbital Ring is both space base and station, served in turn by several planet-to-base elevators.
* Tekkaman Blade throws these around quite a bit, especially when dark secrets start coming out.
* Tekkaman Blade turns into a mindless, berserk killing machine if he remains in Tekkaman form for thirty minutes.
* Tekkaman Blade, Vesna, Sommer, and Hiver had dedicated ships (with their own

pilots) to ride on, and Aki, once but an angsty love interest, has her own Pegas II (for the same reason—she's an artificial Tekkaman and needs a Pegas to transform).
* Tekkaman dub (then again, as just mentioned, the dubs were produced with Japanese audiences in mind and not American ones).
* Tekkaman, Earth is invaded by the Waldarians and their mutant creations, complete with flying saucers.
* Tekken 1 off the same cliff he was thrown from as a child, exacting revenge and claiming the Mishima Zaibatsu for himself.
* Tekken 2 hero Kazuya turn out to be the main villain. He was replaced as the main character with the equally stone-faced Jin in Part 3.
* Tekken 2 was re-released several months after launch which made all sub-boss and boss characters playable, increasing the playable roster from 10 to 25.
* Tekken 3 Heihachi before flying off into the night, keeping the status quo but setting up an important plot point for the future games.
* Tekken 3, Namco altered the various characters accordingly to prevent redundancies. Tiger Jackson was also a Palette Swap of Eddy Gordo, even though they both debuted in the same game.
* Tekken 4's engine allowing for various forms of weirdness and other game-breaking moments, combined with the presence of gimmicks such as obstacles in the middle of stages and stages with varying floor heights, tournament play was very often restricted to a handful of stages (the Arena being the most common). That didn't stop the possibility of potentially broken combos still being executed even on the most fair of stages.
* Tekken 4 was meant to be a replacement for her MIA relative, Jun Kazama.
* Tekken 5 after about ten seconds, leaving him disoriented and confused.
* Tekken 5) by his master after he caught his student fighting with some thugs.
* Tekken 5 ending, Lee has turned Heihachi into his personal manservant, and has fitted him with an explosive bowtie to keep him in line.
* Tekken 5, Heihachi can be customized to have ash face and the tips of his trademark twin-horn hairstyle scorched off, in reference to the attempted assassination via bomb against him in the previous game.
* Tekken 5 shows Kazuya and Heihachi battling an army of Jack cyborgs, until Kazuya throws an exhausted Heihachi their way to secure his escape.
* Tekken 5 to Jin after he accidentally faceplants into her chest, knocking him into a mountain.
* Tekken 6 a little over a year after launch, adding new characters, stages, move rebalancing, and customization.
* Tekken 6, and it's written entirely in caps ("BIOLOGICAL IGNORE JACK. JACK SAD.").
* Tekken 6. Either way, her irrationality to find Eddy automatically assumes the player to be working for the Mishimas, which leads to the metaphor she uses. However, you can actually play as Devil Jin, who is a literal devil transformed version of one of the Mishima characters.
* Tekken 6 goes even further in the Scenario Mode opening cutscene, where Lars deflects missiles with his bare hands and runs faster than bullets. Stopping a mook with a gun by charging him head on in actual gameplay? Not such a good idea.
* Tekken 6 him speak, as all of Scenario Mode's dialogue (minus the cutscenes) is purely text-based.
* Tekken 6, it can be seen that he sports numerous ones over his torso and arms, including a bullet wound on his left shoulder. He isn't exactly a bad guy, but he is at least morally ambiguous.
* Tekken 6 purposefully started World War 3 to awaken an ancient Egyptian demon that is only summoned when humanity is in grave danger in order to defeat it and destroy it once and for all in hopes of ridding himself of the Evil Gene that turns him into a demon.
* Tekken 7, he is replaced with a black woman ninja known as Master Raven.
* Tekken 7 newcomer Gigas has his fighting style listed as "Destructive Impulse", which is reflected in his powerful-but-reckless attacks comprised primarily of wild

punches and smashes.
* Tekken 7 update. Lei Wulong, Anna Williams, and Julia Chang, meanwhile, only got in as DLC.
* Tekken 8 was released in March 2015, with the console release set for early 2017.)
* Tekken addressed all the issues and added a lot more cool characters and many modes.
* Tekken. All he wants is to carry out Kazumi's last wish of ending the cycle of violence between Heihachi and Kazuya by killing them. Every time he's encountered, though, you're always playing against him.
* Tekken also allows many other characters, both male or female, to wear similarly badass suits.
* Tekken: Also seems to have this curse with (Not counting the spin-offs or upgrades) 1, 3 and 5 being considered great while 2, 4 and 6 was decent at best. 7 seems to be getting very favorable reviews so far. For the Tag Tournament games, the first was seen as great and the second was OK.
* Tekken also tracks how often players quit in the middle of a match and applies penalties if it's too often.
* Tekken and fits this trope towards Julia better. This is played heavily for laughs, as Julia barely even seems to realize he exists.
* Tekken and spits it back out. Lars and Alisa leave the compound afterwards.
* Tekken and usually wearing a bowtie and sunglasses... and nothing else.
* Tekken are really popular with furries despite the fact that they only have Jaguar Masks (or heads...), although being incredibly muscular wrestlers help. Also you can actually customize them to be just jaguar men.
* Tekken, as she hails from Brazil, home to a myriad of ethnic blends and mixes, or pardos. She could very well be mulatto (Black + White), cafuzo (Black + Indian), Caboclo (Indian + White), Jucara (Black + Indian + White), Ainoco (Japanese + White), among possibly many others.
* Tekken, at least) 104 years old. He seems to have some back problems (one of his opening poses), which mysteriously vanish whenever he's beating ass in the tournament.
* Tekken awards wins for both characters in the event of a Double KO. If the final point for both characters is decided by Double KO, it just calls the match a draw.
* Tekken: Blood Vengeance has a really impressive brawl between Heihachi Mishima, Kazuya Mishima, and Jin Kazama.
* Tekken: Blood Vengeance, since not only is he shown to not be a bad boss to Anna Williams, he's more concerned about beating the crap out of Jin than the atrocities committed on Shin Kamiya's class.
* Tekken, but he's skilled enough as a martial artist to have singlehandedly torn through several criminal gangs, as well as square off against people several years younger than him in and come out on top.
* Tekken, but in keeping with the spirit of the trope, there are two combinations with five moves long; (reverse armslam, backdrop, German suplex, powerbomb, giant swing) and (reverse stretch bomb, cannonball, inverted atomic drop, Texas piledriver, and muscle buster).
* Tekken by being listed at 173cm/5'8. However, this is contradicted in-game by her ironically having the shortest character model of the cast in most of the games she appears in. Nina, Anna, Christie, Lili, Katarina, and Master Raven tend to have character models that are on the large side and as big as many of the male characters.
* Tekken can remove her arms during a battle. She can also detach her head and use it as an explosive.
* Tekken character Lucky Chloe, stating not to worry about it since characters can be deleted and replaced for the American market, and she would be replaced by a muscled skinhead with powerful attacks. News sites reported Lucky Chloe was exclusive to Japan and Europe, until Michael Murray, designer at Bandai Namco, responded on Twitter: "It's amusing how many [people] are [taking] Harada’s trolling about Chloe seriously. He’s good at getting free publicity."

* Tekken Chinmi, one of Chinmi's teachers is a practitioner of Whirlwind Fist kung fu, which revolves around the martial artist spinning rapidly in place at high speed, giving them incredible skills at deflecting blows and striking in retaliation. Chinmi eventually likens the style to a spinning top, then realizes that the weak spot is to attack the practitioner from directly above — while they can deflect any blow that comes from their side, they can't defend against an aerial strike.
* Tekken detachable head. She even has alternate intro and victory poses where she's either carrying her head or it falls off while she's talking.
* Tekken each other with the "good" one being whichever sister's ending movie it's in. Except for Anna's ending in Tekken 6, which was her and Nina playing a surprisingly friendly game of pool together before Anna provoked a random punk and the two of them teamed up to beat him senseless.
* Tekken ending for Kazama Asuka suggests she might be more than just a brawler, too.
* Tekken ending. Paul, Law and Steve had agreed to share the prize money, but Law uses laxatives to incapacitate them and give him enough time to steal all the money for himself (what a Jerkass). Paul's ending also implies that Law used these laxatives throughout the tournament to cheat their way to victory.
* Tekken, etc.), thus giving them free promotion for newcomers to see. Those already familiar to the games usually avert this, and even if they do choose the default setting, they tend to browse through the selection first.
* Tekken featured a number of special intros/outros from combining certain pairs of fighters on your team. Several outros involving Nina Williams features her delivering her signature Groin Attack to her partner, causing him to crumble to the ground. If you pair her with Bryan Fury, however, she'll deliver the groin attack — but he laughs at it and does one of his taunts in response.
* Tekken, fighting on behalf of his "creator", Dr. Abel. Since then he's been in it for himself.
* Tekken follows the feuding Mishima family and the numerous iterations of the eponymous fighting tournament they sponsor, starting with father and son Heihachi and Kazuya, and later adding Kazuya's son Jin and Heihachi's dad Jinpachi to the already bubbling crucible. Step siblings, illegitimate children, in-laws and family pets get in on the fun too. Many of the side characters have children who end up competing too.
* Tekken forever (as the nineteen-year time skip between the second and third games had forced them to resort to various excuses to remove the older female characters or have them stay young).
* Tekken game. Even odder because the two characters are cousins (though they probably do not know it).
* Tekken game series is played by South African actor Candice Hillebrand in the film adaptation. Her sister Anna is played by Spanish actor Marian Zapico. The characters are heard speaking with American accents (which admittedly they do in the games too), so presumably they lost their accents at some point.
* Tekken games give us the Mishima clan... Heihachi with his head-wings and Kazuya and Jin with their rather pointy upswept 'dos. And Paul clearly has the same stylist as Jean-Pierre Polnareff.
* Tekken games is for some reason allowed to bring a katana to a fistfight. Naturally, he's got a lot of manoeuvres that you can't block with your bare arms. Realistic in a way — a katana really would be better in most situations to a bare hand, that's why people like weapons.
* Tekken has a destructable floor which is an instant KO for you if you ever fall through.
* Tekken has Alisa Boskonovitch who can remove her head and have it explode in front of her opponent. Of course, a new one emerges shortly after.
* Tekken has Fahkumram, who was imprisoned by the Thai military after having killed a group of corrupt government officials in self-defense. The military had him participate in underground fights and eventually had him enter into the seventh King of Iron Fist Tournament for a chance at freedom for him and his family.

* Tekken has the beautiful Nina and Anna Williams. That's 20+ years in the making.
* Tekken has this in the way the characters react to each other and cooperate as a team, as well as affecting win poses. It's a little around the place but makes the game worth playing to see the different combinations.
* Tekken. Hilariously, everyone just assumed he was dead while he was under all that rubble, but of course he wasn't.
* Tekken. His suffering bad back is the gimmick which his fighting style is build around: due to his inability to stand upright for long (and the problems to get him back to his feet), his style revolves around attacks done while lying on the ground.
* Tekken. However, P. Jack's ability to fly was implemented in all subsequent playable Jack models.
* Tekken. Initially she was a legit action girl who was shown to have powers similar to Jun that can have her handle and suppress the devil gene. Later she was shown getting her Osaka butt handed to her, being strangled to death and later needing to be saved by Jin after being thrown out of a sky scraper from Kazuya after she offered no resistance and was openly scared of him. When it comes to outfits despite having to be the tough tomboy when Lili debuted who is the franchise's top girly girl Asuka's alternate outfits have become progressively girlier.
* Tekken, in one of her win poses, Lili bends down to the camera (perspective of the defeated opponent) and says:
* Tekken in the first place). The various Jack robots throughout the series are a downplayed version: they don't actually have small legs, but they have huge arms and shoulders.
* Tekken", in which he dashes towards the opponent extremely quickly and attacks them.
* Tekken is a very notable example, with each of its mainline games allowing you to clear the arcade/story mode with anyone on the playable roster, but a canonical winner for each tournament being established in the sequel, at least as far as the first five games are concerned"
* Tekken is designed to be a super powerful robot that's gone haywire and its owner has lost control of it. The one in 2 and Tag Tournament is more of an army drone and so isn't as evil as it's just following orders.
* Tekken is even worse ... Japanese, English, Korean, Chinese, Portuguese, and Spanish at least. And then there's four animal characters, none of whom share species, yet seem to converse perfectly fine with each other and occasionally the humans as well. This doesn't even address why one Chinese girl seems to only speak Japanese, or the Mexican wrestler just uses jaguar snarls.
* Tekken is him walking into the stage with an apple in his hand, taking a single bite and then wastefully throwing it away.
* Tekken is incredibly hammy. Even the ninjas, animals, and non-speaking robots are overflowing with ham!
* Tekken is revealed to drive its wielder crazy if it doesn't taste blood regularly.
* Tekken. It'll take hours of challenge, mastering and of course...a lot of food and drinks to complete them all.
* Tekken JACK series, and there's only one "fighting animal"—Kuma, who is pretty much an ordinary bear. Following games in the series brought the supernatural elements right back, but also folded most of the scientific elements right on top of them. The Devil Gene, for instance, is revealed to be a genetically-inherited curse.
* Tekken. Just...WOW. The Mishima Family is known for their outlandish, pointy hairstyles (a bonus from having electric attacks or the Devil Gene, maybe?), but the original progenitor definitely takes the cake for his beard alone.
* Tekken, Kazuya is beating up a bunch of Mishima Commandos with camera attachments, while his father, Heihachi, watches incredolously from a chopper viewscreen (and with good reason, considering that he last saw his son when he threw him into a friggin' volcano, minutes before eruption). After using the camera

on the last goon to declare his intention to 'Take it all back', Kazuya smashes his fist through the camera (and presumably the guy's head), causing the screen in Heihachi's helicopter to turn to static.
* Tekken: Kazuya Mishima and later Jin Kazama often rock a pair of shades.
* Tekken: Kunimitsu and her daughter have the Setsunagake stance that allows them to quickly dash in at their opponents which is quite hard to react to.
* Tekken, Kunimitsu was initially a palette swap of Yoshimitsu, but in the second game, was gender flipped and given a mostly-new moveset.
* Tekken: Mokujin does not have a fighting style of his own; he mimics the fighting style of a different character every match.
* Tekken. Nina is statuesque, cold, and blonde while Anna is the curvaceous and flirty brunette.
* Tekken. Nina's resulting amnesia has since been a consistent part of her character, but neither woman is portrayed as ever having any trouble adjusting to having missed the past twenty years. Indeed, the real point was presumably to preserve these two characters in their early twenties while introducing adult children of characters from the previous games. Not to mention this would keep them young and sexy. There are no female fighters on any roster that are over the age of 25 physically. Yet we have an old man who is over 100 and still fighting.
* Tekken, Nina Williams and Michelle Chang were the only playable female characters in the starting roster.
* Tekken: Once completing the tutorial stage of Scenario Campaign, you are allowed to freely unlock one playable character other than Lars and Alisa, who are unlocked from the beginning. This is for the sake of veterans, as they might not be familiar with the two new additions.
* Tekken, one of Julia's win poses consists of her begging the audience watching her stream her fights to subscribe to her channel.
* Tekken onwards that will fall off his head if he does something that knocks it off, like rolling backwards off the ground).
* Tekken opens each chapter with narration from a narrator covering the war between the Mishima Zaibatsu and G Corporation, a war that had claimed the lives of his wife and son.
* Tekken or not, the world still sees him as a warmongering conqueror, after all).
* Tekken, or Premium Effects which add special effects to certain attacks for your character. Later updates added Reset Drinks, which completely reset a character's stats so you can rework them, and the ability to purchase the unlockable characters that you want.
* Tekken personality. Even after she graduates high school, she keeps the pigtails (though they become slightly smaller).
* Tekken producer Katsuhiro Harada is almost always seen wearing sunglasses and a stoic facial expression.
* Tekken reveals that he loves his mom, and the fact that Heihachi killed her, according to him, was just one of the many reasons why he hates his old man.
* Tekken Revolution. And while Heihachi was in the game, he was not playable.
* Tekken, Sebastian states that Lili's bizarre obsession with tormenting Asuka is a "show of affection" on her part.
* Tekken seems to have feelings for him despite everything. Feelings which he just blows off.
* Tekken series are set against a massive global war between the Mishima Zaibatsu and G Corporation, which Jin Kazama instigates after taking control of the Zaibatsu. The war, in essence, is an evolution of the long-raging family feud within the Mishima family, with Kazuya Mishima, Jin's father, siding with G Corp, while Heihachi, the Mishima patriarch, fighting to regain control of the Zaibatsu. The characters in the series consist of those aligned with the Zaibatsu or G Corp, in addition to those caught in the middle.
* Tekken series, characters frequently suffer broken arms, legs, necks, etc., dislocated shoulders, hyper-extended joints, crushed gonads, and occasional impalement, only to get back up off the floor and jump back into battle, unless the round is over.

* Tekken series, constantly contradicts what he has said in the past about the games' confusing canon. When fans once called him out for making a statement which directly contradicted the game canon, he stated that he considers that the games are basically a series of branching timelines in which all canons are true.
* Tekken series is 22 years old, and thanks to a 19-year-long cryogenic sleep, is only 2 years older than her son, 20-year-old Steve Fox.
* Tekken series is affected by the Devil's Blood, a curse that while it makes them stronger and grants them demonic powers, at cost of their humanity. Also Ogre/True Ogre.The Devil's blood affects the personality of those inflicted, and it's virulent where the host struggles to keep control.
* Tekken series, Kazuya Mishima's left eye glows red as of the 4th game, either because of the Mishima bloodline's Devil Gene, or his resurrection by G Corporation. Mokujin, as well, though his aren't really evil as much as an indicator of evil.
* Tekken series, the Jack robots (and the first Kuma) have an attack-throw called Hell Press where they spring forward and used their weight to squash their opponent into the ground, which could be followed up with one of several attacks depending on which character had performed it.
* Tekken series, the Williams sisters Nina and Anna are a prime example, with the convenient justification of being cryogenically frozen between 2 and 3.
* Tekken's Lars Alexandersson ends up as one due to the events of Scenario Campaign, growing romantic feelings for his robot companion Alisa Bosconovitch.
* Tekken's Scenario Campaign mode, you can use any character you want for the gameplay portion. The cutscenes, however, prominently feature both Lars and Alisa, the latter replaced later by Raven.
* Tekken(s) such as Heihachi and the Russian Scientist? Check. Robots like Jack? Literally check.
* Tekken Tag Tournament 2, Julia Chang in was not in the game as herself.
* Tekken Tag Tournament 2 quickly grab up the food before he even has a chance to get any. At one point an egg gets sent flying from the hot pot, Lars looks to get it but everyone breaks it apart with their chopsticks. Ultimately Lars has to settle for a bit of seaweed only for Hehachi to slurp it up before he can eat it... and then Lars wakes up, revealing it was all an odd dream he was having.
* Tekken Tag Tournament 2, which made possible 1 vs 1 and 1 vs 2 play styles. Unlike the previous two updates, it didn't add a new character or stage.
* Tekken Tag Tournament 2, Yoshimitsu has at least one costume in which he dons a skull mask, although the color varies from pure white to greenish.
* Tekken Tag Tournament improves the bowling mechanics and pin physics to the point that it's as good as or better than many games specifically dedicated to the sport.
* Tekken, the change in fighting style is explained by Jin becoming ashamed to learn who his father is — and trains in a new style to differentiate himself from the Mishima clan.
* Tekken: The Motion Picture begins with a flashback with Kazuya Mishima and Jun Kazama as kids. This scene is very important for the plot later in the movie.
* Tekken there's a stage, set near a pool, with girls in bikinis dancing and watching the fight.
* Tekken: The series features several uplifted animals as part of the martial arts tournament: Kuma and Kuma Two are both brown bears that are the pets of Heihachi Mishima, Panda is a panda who serves as the bodyguard of Ling Xiaoyu, and Rodger the kangaroo, his son Roger Junior (and Rodger Jr's unnamed mother) as well as Alex the velociraptor are all the results of genetic experimentation.
* Tekken the third Iron Fist tournament, since he was the one who beat Ogre. He didn't stick around after the fight, though, which meant Jin got the credit after beating True Ogre.
* Tekken to be his personal bodyguard. Her sister Anna Williams, not to be outdone, offers herself to become the bodyguard of the leader of the Zaibatsu's rival G-Corporation, Jin's father Kazuya Mishima.
* Tekken, two roles played by Wesley Snipes. When Namco was asked about the similarities being intentional, they stated that they simply wanted a true ninjutsu

practitioner and a "cool black guy" for a character, and that the similarities were purely coincidental.
* Tekken: Unknown is quite clearly vicious, murderous and psychotic. She is also friendly, cheerful and seemingly has noble goals in stopping Ogre, saving Jun and Jin, and ridding herself of the wolf spirit possessing her.
* Tekken, Unknown was intended to be Jun's sister, an element that was dropped when the game became a spin-off instead of a canonical entry.
* Tekken voices his intro, win quotes, and other lines in proper English.
* Tekken, was included in the game's console port as free DLC alongside several other "missing" characters like Michelle, Alex, P. Jack, and Ogre.
* Tekken, when he got an up close and personal look into the real meaning of being a Mishima (by way of Heihachi plugging him in the head and forcing his Devil transformation), he committed to pay his grandfather back (and when his father reappeared in the next game he added him to the list).
* Tekken. When Paul asks him to pay, Law simply knocks him out and runs away.
* Tekken), where Hwoarang is riding his motorbike... with the goggles still up on his hair.
* Tekken (which he helped work on as part of the Project Soul team) using the "Soul of Devil Jin" fighting style.
* Tekken, which meant he would have to do something unique or parody them not to be seen as a ripoff. So naturally, his gimmick is that he is an arrogant American fighter who enters the tournament every year only to lose it nearly every time, has a special move that is a fire punch, and that his rival is a bear, Kuma. Despite this he has always been one of the best fighters in the game and simply doesn't have much bearing on the main story.
* Tekken who have never been shirtless in their default costumes than those who have been:
* Tekken), who wears a midriff-bearing tank top and a miniskirt. She's usually slender, but here she's buff all over.
* Tekken with Anna Williams. All of her stories involve her big sister Nina Williams and pretty much all of her official descriptions involve Nina as a comparison despite Anna's own accomplishments while Anna is rarely mentioned in Nina's case and Nina even gets to have her own stories that Anna isn't a factor in at all.
* Tekken with cousins Jin and Asuka Kazama, Asuka will reach out for a handshake and Jin simply blows her off, leaving Asuka indignant.
* Tekken world, to the point that he quit the Association because he couldn't find a challenge anywhere except in Mixed Martial Arts.
* Tekken would have been like if they had more time to work on it. The character roster keeps all the same characters from the original and adds several more (renaming Jack to Jack-2 to fit in with his story). It also uses the same music from the first game for several levels. However, it is a new game in that all the returning characters are redrawn with better graphics, far more moves are added to distinguish boss characters from main characters, and the Playstation version has many new modes added whereas the first game just has Arcade, Vs and Options.
* Tekken X Street Fighter, but had to address the fact development of the game is just put on hold.
* Tek-Knight. Later on it's revealed that Mind Droid isn't actually a robot; just a man in a costume who claims to be one for marketing purposes.
* Tekkonkinkreet. Although its more of a spiritual connection than anything else.
* Tekkonkinkreet, Black and White escape one of Mr Snake's henchmen by climbing out of a bathroom window.
* Tekkonkinkreet Features a fight with Black and White against the Aliens move to the top of an elevated train
* Tekkonkinkreet (Japan), directed by an American living in Japan, and scored by British rock band Plaid.
* Tekkonkinkreet's CGI similarly succeeds in avoiding this trope by incorporating traditional elements. Cityscape textures rendered in 3D are hand-drawn, and the cel shading works remarkably well with the simplistic art style of characters,

especially when applied to vehicles. Even though moving vehicles tend to be cel shaded, the bits of shading look handmade, and static vehicles are either rendered with irregular lines or are simply drawn from scratch.
* Tekkonkinkreet, the yakuza act as unwelcome agents of change in Treasure Town.
* Tekkonkinkreet, when the apple seed which White plants nearly a year earlier finally sprouts and blossoms in the end, reflecting the hope that Black's reunification with White will lead to a brighter future.
* Teknoman ended with a grating voice saying "To Be Continued", as the words themselves were shown on the screen.
* Teknoman, had its entire run air in Australia before it premiered in the US (which only ended up screening about half the series). It was also a different dub that had the main character keep his original name, and is generally seen to be closer to the original, and did not tell the entire backstory in the opening credits either. This is the version used for the DVD release.
* TekWar: At one point in the story, a robot hockey player is used to try and kill Detective Cardigan.
* TekWar a woman known as Warbride leads a guerrilla faction dedicated to stoping the industrialization of nature. She also has a history with main character Jake Cardigan.
* TekWar "computer Jocks" jack into cyberspace to locate information, but risk being caught by the authorities and having their brains fried.
* TekWar, convicted criminals are sentenced to suspended animation for varying numbers of years.
* TekWar, criminals are placed in cryogenic suspension for their crimes.
* TekWar did this, funnily enough, with William Shatner. Shatner played the mysterious Bascom in the original miniseries and appeared in the opening credits for all of the series episodes even with the character not appearing in most of them. Bascom was still referenced several times throughout the show, once being said to be out of the country and unreachable. His absence was even lampshaded in "Skin Deep" when the Police Commissioner complains that he hasn't seen Bascom for months and Sam (Jake's second partner and not present in the miniseries) admits that she's never seen him. Finally, in the episode after "Skin Deep", Bascom made a return appearance.
* Tekwar episode had an agent undergo this to infiltrate a criminal organization, which screens entries using a lie detector. The criminals somehow catch on and interfere with the switch, causing a personality crisis –- resolved by the main character preparing to make the coup de grace.
* Tek War, failing to hack a computer system results in real injuries ranging from brain damage to death. Fortunately, most hackers can spare the brain cells lost in minor skirmishes.
* TekWar induced by a microchip placed against the forehead. There's androids, computer hackers, and Megacorps as well. It started as a novel series but eventually franchised into made-for-TV movies, a series, and video game.
* TekWar is set in the year 2045 and features androids that look just like people, cyberspace, and "Tek," a narcotic in the form of a computer chip that interfaces with the user’s brain.
* Tek War, she hated the cops, so she denied knowledge despite increasing levels of pain until it rendered her comatose.
* TekWar, Tek is a computer chip connected to the user's brain that allows them to experience amazingly realistic fantasies drawn from their subconscious. It can also burn out your synapses.
* TekWar, TekLord Sonny Hokori uses a hologram to speak with detective Cardigan. During the conversation the hologram keeps disappearing and reappearing all over the area to taunt Cardigan. Cardigan then chases the hologram up a series of staircases and a ladder.
* TekWar, the children of various Tek addicts have formed an underground society, where they pretend to be members of the Knights of the Round Table.
* Tek War was only set in the mid twenty-first century (so about fifty years after it aired in the mid-nineties) but much of the technology currently looks outdated.

In particular, their handheld versions of video phones appear quite 90s in design with various controls and switches on them which seem quite unlikely given the advancement of touch-screen technology and other advancements in mobile phone technology. There was also an episode where shopping was done from an interactive version of a home shopping network rather than simply online (and while home shopping networks do still exist, true online shopping wasn't presented as an alternative).
* Teladi explains that this is mostly only true of Teladi spacefarers, however: planetside Teladi exhibit much more variation and can be as cynical or as selfless as any human.
* Teladi fighters are basically bluish slabs of metal with stubby wings (
* Teladi, making them pretty effective as missile boats against capital ships.
* Teladi Shrike frigate, which buffed all hull strength values by an order of magnitude, making the Gauss Cannon's high hull damage even more useful.
* Tel'aran'rhiod. In addition, if a Dream Walker doesn't watch her thoughts, and they stray onto sexual topics, odd things can happen, including their clothes shifting suitably.
* Tel'aran'rhiod is characterised by ephemerality, with the positions of things like doors and books changing every time one looks. It's possible for a dreamer to assert their will and imagination onto their surrounding, to the point of changing it completely, but they cannot alter their own bodies, while anything they create can injure them,
* Tela Vasir, asari Spectre working for the Shadow Broker and willing to bomb innocent people to get at her target, and tough as nails, providing one of the most difficult fights of the game after going through
* Tel Aviv respectively Tel Aviv-Yafo has the nickname "The Big Orange", a reference to the
* T.E. Lawrence, a.k.a. Lawrence of Arabia. The British government wanted to create a civil war in Turkey's Arabian provinces. He was originally intended to fulfill a diplomatic role and not actually involve himself in the conflict directly. When he started doing so with some success, the British sort of just
* T.E. Lawrence is promoted from lieutenant to major in charge of leading the Arab guerilla forces against the Turks after successfully taking Turkish-held Aqaba in
* T.E. Lawrence (Lawrence of Arabia) repeatedly states in his memoirs that, being an archaeologist rather than a military man, he knew very little about how to fight a revolution. Therefore, in the beginning of his time with the Arab revolt he was making up a plan as he went. It was not until several months into the campaign, when he was laid up with a case of dysentery, that he had a chance to analyze the goals and methods of the campaign he had been helping to lead! He ended up almost single-handedly inventing modern guerilla warfare.
* T. E. Lawrence) of having homosexual relations, most evidence points to him having a deep-seated fear of sexuality. In fact, his own brother once claimed to be positive that Lawrence died a virgin.
* T. E. Lawrence wrote a couple of poems about Dahoum, an Arab youth whom he loved and who died young.
* T. E. Lawrence youth), the injuries he sustained during the Arab Revolt, and surviving a plane crash that left him with a broken rib that never healed properly, he was pretty banged up by his mid-thirties.
* Teldrassil: this single tree is bigger than some mountain ranges and has a city and two smaller towns in its branches, plus a seaport village in its root structure. No doubt it was very surprising for someone who created a Night Elf character without watching the opening narration when they finally left it and looked back.
* Telecommunications Services For The 1990s ultraviolet light system for copying documents onto photosensitive paper (what, no fax machines?), the user ID cards, and the fact they're still wearing '60s fashions.
* Telecom Tree: When the hero needs aid and calls his friends for help, the friends will often save the hero time by calling others the hero has helped, leading to a massive group response.

* Telediario is a Spanish daily news program which started running in September 1957. Nowadays, its title has become synonymous with "TV news" in Spain.
* Telefang: Ubiquitous thanks to the summon-monsters-by-phoning-them mechanic.
* Teleflora also got in hot water when one of the ads had the rude flowers telling its recipient, "No one wants to see you naked!"
* Telefon (first he throttles him, them to make sure he places a pill between the man's teeth and slams his hand against the jaw to crush it).
* Telefon have this as the primary plot driver. Communists wanted to cause havoc in America immediately prior to an invasion, so they took a few dozen people, hypnotized them extensively so they actually became average American citizens, living perfectly normal lives, until they heard the code phrase which activated them to go destroy some defense facility. The only problem was that they had been forgotten about for a while, so all of the defense facilities were obsolete and/or not being used, which confused the heck out of the American agencies who were wondering why perfectly normal Americans attacked things of absolutely no strategic or military value.
* Telefon. Unfortunately a fanatical Stalinist opposed to détente steals the list of agents, and the Soviets have to send Charles Bronson to stop him.
* Telefon, whom he finally corners in a Texan bar. Because there are witnesses (including two police officers) Bronson can't just shoot him, so the woman he's working with knocks over a glass container holding a pet rattlesnake. While everyone is screaming and the police are blasting away at the snake, Bronson bursts into the phone booth the renegade is using and throttles him to death.
* Teleforce Death Ray. If that's not mad science, we don't know what is.
* telefragging both facilities at once and breaking into the level he wanted to get into in the first place.
* telefragging isn't possible, it is possible to chronofrag a unit by travelling through time and landing on top of it. Since equal damage is dealt to both units, this isn't usually a practical technique.
* Tele-Frag happens every time Sho and Agito bioboost, as the Guyver armor crossing dimensions brings up a "blast field" destroying everything within a certain radius of them.
* Tele-Frag. However, he still makes his rare Spatial Magic useful, quickly creating portals to close large distances, forcibly warp enemies, and help comrades avoid attacks in the midst of battle.
* Tele-Frag phenomenon. People who've just materialized inside a solid object aren't generally in any position to be a threat to anyone else.
* Tele-Frag the alien, cleanly slicing it in half, before Rick steps out of the portal.
* Telegonus, Odysseus' son by Circe, is said to have founded the Italian city of Tusculum.
* "Telegram" by Nazareth is about arranging a concert, going on a tour, and finally playing after getting through all the non-glamorous details of a rockman's trade.
* Telegram is a messaging and VoIP service that emphasizes privacy and open-source programming. It has no real target demographic, but it's very
* tele holds "Desert Bus for Hope" every year to raise money for Child's Play.
* Telejornal was first broadcast in October 1959; its name is synonymous with "TV news" in Portugal.
* Telekinesis also gets a brief mention when it is pointed out that when you try and lever an object using your own mind as a fulcrum, the most likely outcome is that your brain gets forced out of your ears. Much training in the psychic equivalent of a gym is required.
* telekinesis and other fun powers. Any given element zero exposure is several orders of magnitude more likely to result in terminal brain cancer or other fatal congenital defects, so pregnant women aren't exactly lining up outside the eezo refineries.
* Telekinesis can simulate just about any other power depending on the degree of control and the user's knowledge of physics.

* Telekinesis-gifted aristocrat is a Levator, even when lifting objects and not themselves.
* telekinesis, precognition and retrocognition. It's noted that he's so powerful that one of his Imperium-era Generals, Aurum Lupus, was rumored to have relied on divine empowerment in order to beat and nearly kill him at all, and it was rumored that even the mightiest of Alicorns couldn't match his potent mind. The Imperium of Ponykind also had the largest numbers of psychic ponies thanks to his influence, and he intends to do it again in the Fourth Age.
* Telekinetic absorbs impacts while storing the energy, so the user can be battered and shot without any harm, then deliver all this abuse or part of it to some poor sod or piece of furniture instantly with a touch. If not discharged, it kicks even worse upon deactivation, though.
* telekinetically shoves him away, takes his sword, and threatens to drop him in the ocean if he tries it again. As'taris is so impressed that Ringo actually fought back that he immediately drops his main objection to the four (that they were noncombatants) and thereafter views them as peers—more or less.
* Telekinetic Field upped the ante with the new Mechtoid enemy being able to project a bubble-like personal shield when Mind-Melded by a Sectoid. This shield functions as extra HP that needs to be shot through in order to hurt the Mechtoid itself, but fully regenerates every time a Sectoid Mind-Melds with the Mechtoid. However, shooting the Sectoid generating the shield not only shuts down the shield instantly, but hurts the Mechtoid too.
* telekinetic speech (including protecting ships and important people with telekinetic shields) before pointing out that Psi Corps only wanted to create telekinetic assassins.
* telekinetic with a simple wave of the hand. Given that they are shown to be able to break open bank vaults with their minds, this is justified.
* Telemachus Rhade (the genetic reincarnation of his ancestor Gaheris for bonus points) is essentially the living embodiment of this trope.
* telemarketers. This means that all the people they were due to call didn't get a little angrier, didn't curse them or spread this annoyance onwards. So in balance, these hideous deaths made the world a little better. Although not so much better that Terry didn't insist it be undone by the end of the book.
* Telenet Japan in Japan. They are pronounced the same if you torture the phonetics enough.
* telenovela as the theme for the characters Diogo and Marina, who live a troubled marriage plagued by jealousy and infidelity (specifically, Diogo cheating on Marina with her cousin Luciana). While the song technically fits their storyline, as they ultimately separate, many a viewer didn't realize this, mistaking "Sexed Up" for a more standard love ballad without looking at the translation of the lyrics. So the song ended up appearing on a lot of wedding playlists at the time.
* telenovela, being performed in front of a crowd of bouncing children, while host Xuxa Meneghel sways along in the background, unbothered.
* telenovela is a young widow who falls in love with her late husband's son, who is actually of her age. Much of the drama is made from the fact that the guy's mother (who has never got over being dumped the protagonist's husband) forbids such relationship.
* telenovela is popular in the Philippines. As a result, "Marimar" is a common name for female dogs.
* Telenovela) is the Latina lead for a hit Spanish soap opera despite how she doesn't understand a single word of Spanish.
* Telenovela; It can even be translated in a similar way (i.e. "Friends 4 Ever").
* Telenovelas Are Hell of the 90s and 00s, recapping them in a humorous manner and pointing out poor stylistic or writing choices, as well as their melodramatic nature.
* telenovelas — when the song in question is about the divorce of Kelly's parents, and how it affected her.
* Telenovelas, the titular heroine's success as a fashion designer is thanks to her own hard work.

* Telenovelas, where all the action and drama occurs in a small town where everyone knows each other, usually are located far from the city, in rural towns or where the technology can't arrive and the people still uses the old manners. Some famous telenovelas that use this resource:
* Telenovela, where in addition to the innocence connotation it shows the indigenous roots of the heroine.
* telepath and musician Zia will tap out a beat with her hand or foot.
* telepath go through with it, they'll simply forge his signature and fake a recording, but know that some people will never believe it.
* Telepath. He immediately goes back outside and tells her to get put some clothes on first. He teases her about the incident occasionally.
* telepathic ability to tell when one is in trouble or rooting for them.
* telepathically, when he tried to interrogate some ninjas and got nothing. He acknowledges that he's a pretty feeble telepath. And Ringo, after experience with real telepaths, notes that John isn't one.
* telepathic, as in he can attack people with a sword and then they turn into martial arts masters.
* telepathic, as well as calm and tame even the most ferocious beasts and monsters.
* telepathic link installations whenever a Vortigaunt is captured. Furthermore, one even suggests that they can "reincarnate" into a new body after they die, using the link:
* telepathic. Once the target gets close enough the Dream Beast grabs it with its 5-10 tentacles (which look like black intertwined ropes) and drags it in to be eaten.
* telepathic silicon based life form that gets its energy from sunlight and looks like a spherical white globe hovering in the air.
* Telepathic Sprinklers: Real overhead fire sprinklers only go off if the temperature just below one is hot enough to trigger it. But in fiction, if one goes off, the rest will too.
* Telepathic Wanderers has the telepathic Nanase nursing an old woman who soon died. After the funeral, Nanase began hearing the old woman's thoughts and realized she wasn't actually dead, but moments away from cremation. Torn between saving the old woman and exposing herself as a telepath, she ends up leaving the woman to die.
* telepathic while she was out with them. One reason she falls for Bill Compton, a vampire, is because she can't hear his thoughts.
* telepath. Once Kotoura recovers from her illness, her telepathy follows suit.
* Telepath RPG have laser canons which hits everyone in a straight line. They can't move so they serves as turrets.
* Telepath RPG: Servants of God can't even attack! In exchange, he gets more capabilities than Festus or Anya did, such as the ability to place obstacles or increase max health.
* Telepath RPG: You can choose whether you serve Tastidian or not to rescue your brother in the first part. The second part begins in the shadowling empire, and you have been his servant for 3 years.
* telepath, she had to learn to turn it off so she wouldn't hear everyone's thoughts all of the time.
* Telepaths in the show hate hanging out with normal humans — both Sookie and the bellhop-telepath in Dallas have actually mentioned their preference for the vampire community because of their power out loud, on-camera.
* Telepath Tactics and most reliable party members despite her gray hair.
* Telepath Tactics. (In the campaign, Emma's army is blue, her enemies are red, and neutrals are a variety of colors, usually green.) In a departure from previous games, shadowling color is no longer tied to age — they don't have a uniform, so they have to change the color of their eyes and hands instead.
* Telepath Tactics just have titles like "Bloodbeard's bandit". If they have an actual name, they're either recruitable or a boss enemy.
* Telepath Tactics, Sarn Kamina states multiple times that she cannot go into the mines, but she remains a useable party member even after you enter them. She also still offers you a chance to resupply when you enter the mines, even if you managed

to get her killed in a previous mission.
* Telepath Tactics says she's had hers since she first joined the army, which implies they have roughly human lifespans.
* Telepath Tactics, she just says "You." Tarion's response is the equally deadpan "Yes: me."
* telepathy-blocking battlesuit. However, these have rarely been mentioned since they were first introduced.
* telepathy, but Jasper can still use his emotion control powers to calm her down. In later books, Meyer makes it explicit that Bella is immune to all vampire powers, but now she needs to explain how Jasper can get through to Bella. She did so by saying that her immunity only protects her against mental powers, and that Jasper's power was physical because it directly altered her brain chemistry. This doesn't explain much, because Bella can resist other vampire powers that sure seem physical (like electric shocks), and Jasper's power can affect vampires as well, who — as explained above — don't have those brain chemicals humans do because it's all been replaced with venom.
* Telepathy is also an ability certain Pokemon can have. If an ally in a Double/Triple battle is about to use a move that could hit it, like Earthquake, instead it will dodge the move.
* Telepathy is a normal part of society, complete with elaborate codes and taboos, in
* telepathy is not admissible in legal proceedings. On the other hand, people conducting business or diplomatic negotiations routinely retain low-level telepaths (such as supporting cast member Talia Winters) to mediate the talks and ensure both parties are being honest.
* Telepathy is referred to as his "boop-boop-boop powers" because at least one of the three hosts makes sure to accompany discussion of his powers with noises that are supposed to resemble a computer.
* Telepathy Shoujo Ran become like this as the series progresses — which is rather peculiar, since Ran actually has a boyfriend and Midori is openly smitten with Ran's brother. Perhaps the makers simply didn't want to drop the dynamic that works so well in similar series.
* Telepathy that Healing Song's Psionics domain came about because his innate psychic potential went unused for years due to his unawareness of it; when he Ascended to godhood, his psychic potential manifested as the Psionics domain.
* telepathy (which would make the question completely moot) were available to at least the main characters throughout the run of the series.
* Telephone Exchange Names, and with the rapid growth of phone service, this became an all-number dial for most by the mid-1960s.
* Telephone Game: A one time form of the trope; if the contestant spent more that 90 cents of the dollar they were provided in the pricing round of this game, meaning they didn't have enough money to make a call in the second round; at least 10 cents (a dime) was required to make a phone call in the second round for the contestant to win.
* "Telephone Line" has the singer attempting to call his ex-girlfriend because he's lonely, but nobody answers.
* Telephone networks in offices typically have the dial tone added so the phones emulate what the users are used to at home. It's also a quick way to make sure you've picked up an empty line, and that the line is working.
* , telephone pole-sized flechettes composed of ultradense material (probably tungsten) dropped from orbit. There is the issue that numerous treaties are in place to prevent the weaponization of space, including orbital weapon platforms, but the treaties target weapons of mass destruction, and the Rods from God are not defined as such under the treaty or international law. However, if the system were ever to become a reality, there is a chance that an update to the treaties would ban its deployment.
* Telephone Song: A song about calling somebody on the telephone, often a love interest or ex-partner.
* Telephone Teleport requires a specific type of hard line to allow a user to

return to their hovercraft, preventing them from conveniently escaping using only a mobile phone. Otherwise, to escape the Matrix, all you'd need to do is grab someone's mobile device and easily escape any dangerous situation. The significance of the hard line is that it represents a reliable sure fire way to jack into the simulation that mobile phones can not replicate.
* Telephone. They get to the end of the first chorus before Sue Sylvester walks in and tells them to shut up.
* Telephone triage (calling the local emergency department for advice, or calling a dedicated advice line such as NHS Direct) defaults to this state, due to liability concerns and due to the inability to assess the patient over the phone. Staff are trained to tell the caller to go to the nearest emergency department if he/she feels that his/her symptoms warrant it.
* Teleportation: Disappearing from one location and reappearing in another.
* Teleportation Rescue: Someone who was in trouble gets teleported to safety by a third party.
* Teleportation. Scientists have transferred information from one atom to another. Not all that impressive on the surface but it paves the way for future advances.
* Teleportation shows up very frequently, because the plain effect of
* Teleportation Sickness: Being teleported is rough on the participants.
* Teleportation, since it would be odd if the tiny pods could have taken off and made it back to orbit again themselves. Whether scattering future technology across the entire planet in the form of escape pods is a good idea when you're trying to keep history from changing is also never addressed.
* Teleportation spells send the caster's body and aether through the planet's
* Teleportation spells tend to feature a failsafe that, in the event of a spellcaster accidentally attempting to teleport himself into a wall or some other invalid location, will shunt the spellcaster to the nearest valid (read: empty) square. However, if said square is too far away from the initial target location, the spellcaster starts taking damage with every square he is shunted through. Some of the more safe variants shunts you into the Astral Plane if you can't be shunted to a nearby square. That may or may not be a bad thing, depending.
* Teleportation, when it isn't limited by range or some sort of other drawback
* teleport back to his temple, or state he already opened the door for you.
* Teleporter Accident — One surefire way to create a duplicate, evil or otherwise.
* Teleporter Accident instead of Karda Nui. He spends the majority of his screentime traversing various Alternate Universes, until finally making it to his intended destination. Other characters, such as Vezon and Mazeka, also explore Alternate Universes in a similar manner.
* Teleporter Accident who sends a goon after the lucky pair and kills their Stewie, who had hired a male prostitute with the money he and his Brian made from gambling. The prostitute comes in shortly after and makes it apparent that Stewie's death won't stop him from doing his job.
* Teleporter technology, the new killer app of United Aerospace Corporation in
* Teleport Incense (single use) and the Town Portal skill (1-hour cooldown) both serve as an
* Teleporting Keycard Squad - You pick up a plot-relevant item. Suddenly, enemies appear in previously cleared areas.
* teleporting off the plateau, afterwhich a number of units spawn around him.
* teleporting Tahtorak underneath Metru Nui for a laugh. with Teridax. That's pretty much the definition of Genius Bruiser.
* Teleport Interdiction: Security measures to limit who can teleport and/or where they can go.
* Teleport jammers don't stop you teleporting in so to speak, but rather stops you from reappearing in the material world, which is
* teleport Minmax to the psionic engine room. Ruby thankfully stops her in time to explain that "position 0" is the one she's occupying right now.
* "Teleport Other", which could send a target object or creature to another location.

* teleport people's organs out of their bodies.. (To drive the point home, the teleportation device is built in the form of a ray weapon. You shoot a person to extract the desired organs.)
* Teleport Spam ability to teleport incoming attacks to predesignated locations, which he used to intercept the Kyuubi's bijuudama.
* Teleport Spam around the room (usually at least once she'll appear right in the face of whoever she's talking to/at).
* teleport the wearer away. Given that Imperial teleportation tech is unreliable, poorly-understood and prone to spectacularly lethal failures, the Displacer is almost as likely to kill you as the incoming attack is. On the upshot, when the Displacer Field works, it's 100% effective since you and the triggering attack are no longer in the same place. It's worth noting that the Orks have weaponized this technology in the form of the Shokk Attack Gun.
* teleport ward can better block intruders with high magic resistance.
* Telepresence rigs are common for a variety of purposes, from doing dangerous experiments to police work. Apparently the fact that Murderfinder is unable to use a standard telepresence rig due to a complication with her disease pushes the already improbable premise straight into ridiculous.
* TelePRIsa (portmanteau of Televisa with the political party PRI, coined during the 2012 presidential elections when Televisa colluded with the PRI to help Enrique Peña Nieto win the elections)
* TelePrompTer (video device for giving actors, actresses, tv hosts, etc. their cues; nowadays simply written as "teleprompter") Fun fact: TelePrompTer owned
* Teleroboxer the champion. This can be changed...assuming you have 7 wins and 0 losses. Should this requirement be met, you get treated to one final battle with an actual cat named Milky, who pilots the Bamsham. And if you score the victory against Milky, you get both the belt and the permission to see the credits.
* Teleroboxer, there is a "Title Defense" mode which can only be played if you defeat all of your robot opponents, including the "Legendary Champ". If you lose even one match in the "Title Defense" mode, it will say that you are no longer the champion and you must now retire. Depending on which save file that you played on, it will say "CHAMPION RETIRED" on it, which means you cannot play on that same save file ever again.
* Telescopic antennas are a textbook example of matryoshka principle in technology.
* Telescoping Robot: A robot shows off all their built-in weapons at once.
* Telescoping Robot, please refrain from abusing the robot's WarMode to beat up bullies.
* Telescoping Staff, the version exclusive to melee combat. This kind of staff allows for easy storage due to its ability to be made compact, better for catching opponents off guard with a weapon of that size.
* TeleSUR, venezuelan channel but sponsored by various Latinamerican govenments, Venezuela included.
* Teletank (reappeared in more sane variant as side rockets on KV-1, but cancelled due to low accuracy).
* teletanks. They were basically radio controlled light tanks which came in many variants. Standard tactics were for the control tank (with radio transmitter and operator) to stay back as far as practicable while the teletank approached the enemy. The control tank would provide fire support as well as protection for the radio control operator. If the enemy was successful at seizing the teletank, the control tank crew was instructed to destroy it with its main gun. Some variants were fitted with bombs for suicide attacks. When not in combat the teletank was driven manually.
* Teletoon "Grom Fest" (which aired January 26, 2013). In short, it took Canada—the show's country of origin—almost 2 1/2 years to finish season 2.
* Teletoon has commissioned several series of shorts in this style over the years, aired as interstitials.
* Teletoon) in 2012. After Astral was acquired by Bell, Corus bought the former's

ownership stake (which include it's offshoots, Teletoon Retro and CN Canada, as well as the french-language version), officially making it sister to YTV.
* Teletoon over things that require the bottom of the screen, such as Toshi's subtitles or the "Bill Publishermann" gag.
* Teletubbies begins and ends with the Teletubbies emerging and reentering their dome in a random order, respectively.
* Teletubbies) for their violent (and in the case of the Alf expy, gross) behavior in their movies/shows; even when it's established in-universe that they're just actors playing roles.
* Teletubbies has the titular character hear the narrator. Usually, they will refuse to do what he says.
* Teletubbies He also wore a skirt at times that the other male, Dipsy, refused to wear (strangely, it seems this was never brought up by either side).
* Teletubbies just happened to be in a location the outside filming crew were at.
* Teletubbies likely plays a significant role in this, as does the characters' rather bizarre design in general, and their extraterrestrial origin can't be helping matters either.
* Teletubbies of teenagers and adults. The instant success lead to Teletubbies being the hottest toys that Christmas and the theme song selling over a million copies. It also kickstarted the trend of creating television shows meant for babies.
* Teletubbies's list of the worst songs, behind Cliff Richard's "The Millennium Prayer" and the aforementioned "Mr. Blobby". They had no further hits.
* Teletubbies take turns to dance in Laa-Laa's frilly pink tutu. When Dipsy is offered the skirt, he shouts "Run away!".
* Teletubbies that he was enrolling at TASIS (The American School in Switzerland - presumably the UK branch) where the crew just so happened to be filming.
* Teletubbies. The bear in the flying carousel, on the other hand, isn't scary at all.
* Teletubbies was accused of promoting the homosexual agenda to children. It was also (more than once) accused of promoting communism, conformity, lack of critical thinking and a "the state takes care of everything" mentality (or a "everything should be free" mentality).
* Televangelists Jim and Tammy Faye Bakker would regularly unwind after preaching at revival meetings by watching
* Televangelist Wendy Alec provides a literal version of this in her
* Televisa, which originates many of the telenovelas carried by Univision, and is divided into several networks (full descriptions within the main Televisa article;
* Televisa, which was broadcasted at Unicable, a now-defunct channel which was normally used for broadcasting either reruns from shows originally broadcasted in regular TV or edgy shows unfit for being broadcasted in national TV.
* Televised or animated programs: Rarely goes beyond basic infantry, tanks/APCs, and usually some kind of aircraft (unless there's the possibility of
* Televised Torture: The torture is being broadcast, either for the villain's personal entertainment or for public consumption.
* Televisión Nacional de Chile which only is exhibed in cable and satellite outside Chile with the best of TVN content for chilean people in other countries.
* television advertisement that showed a Drill Sergeant Nasty ordering a woman to cook for him and read him stories, in imitation of a young child.
* television, but it's one of those things you notice on repeat viewings.)
* Television closing credits were very well-liked due to a variety of reasons including that it gave the viewer a chance to see who portrayed a certain character, allowed them to hear a truncated version of the opening theme song and/or a hilarious
* Television commercials for the former Bell System showed telephones with the telephone number 311-555-2368 indicated on them.
* Television in general does tend to avert this, as many of the most popular and acclaimed television shows of all time are pure comedies. Wacky, outrageous shows like

* Television Is Trying to Kill Us: A list of how and why numerous tropes that are common in works of fiction would be negatively impacted by the laws of reality.
* Television Is Trying to Kill Us: An index of tropes that one should not attempt in real life or assume is the case in real life because doing so can have serious consequences.
* Television Is Trying to Kill Us: An index of tropes that one should not attempt in real life or assume is the case in real life, lest they suffer grave consequences (many of which could prove fatal).
* Television Is Trying to Kill Us equals limp wrist, which equals the Eagle soaring back and into the shooter's face.
* Television (most of its lineup by then was now just imported History Channel programs), and the channel's owner ended up entering into a license agreement to re-brand it as History in 2012.
* Television news is meant to inform and not to entertain. However, people, especially in the United States, have found enjoyment in the graphics and music used by news programs.
* Television news stations. You can pretty accurately determine the political leanings of a person by what network they watch. Obviously, the pundits that are saying what you believe are the ones that "really get it" and "tell it like it is without all the crap."
* Television Serial. The first arc was divided into four films, while the next three were divided into three each.
* Television shows, like movies that take way too much of your time with half the budget. Except it's free. Occasionally.
* Television sitcoms in the USA seem fond of having a stable of writers.
* television stations affiliates in the Maritimes to Baton, so Baton could continue their takeover of CTV; in return, they got several independent stations Baton didn't need anymore; these stations had been part of Baton's BBS system), they applied the format to these new stations (CHRO in Pembroke, near Ottawa, and a cluster of stations in Southwestern Ontario: CFPL in London, CHWI in Wheatley/Windsor, and CKNX in Wingham), and each became "The New (XX)" (the last bit being where the last two call letters went). They formed a loose system of stations dubbed the "NewNet". One more station was added in 2001, CIVI in Victoria, BC (a newly-launched station, the only TV station CHUM built and signed-on themselves). These stations then became known as "A-Channel" in 2005, simply "A" in 2008 (by which point CHUM had been gobbled up by CTVglobemedia, currently Bell Media), and most recently as CTV Two/2.
* Television, the photo is a xerox with colors skewed, giving it a surreal air.
* Television they morphed into Travelogues and travel programs, Up-Close-With-Wildlife programs, and Nature Documentaries.
* Television Without Pity affiliated itself with Yahoo several years ago (before it was sold to Bravo), much of the costs of the site were provided by Merch. Available Merch included Tubey (the site mascot) in close to fifty designs (each evocative of a particular show that was recapped) on virtually anything CafePress would imprint, as well as open stock and limited edition t-shirts.
* Television Without Pity book pokes fun at this in their entry on "News, Crappy Local."
* Television Without Pity: one bag had a list of ridiculous wardrobe items, the other had a list of cast members.
* Television Without Pity the "MRI... of DOOM" (ellipses mandated), because every time it's used, something invariably goes wrong.
* Television Without Pity was "like drinking gasoline," prompted one of the owners of the website to comment "...stop drinking gasoline…the hell?"
* Television Without Pity, when House makes his first misdiagnosis, the recapper might say something to the effect of: "Since this is just the 15-minute mark, we know that whatever treatment he's prescribed will just make things worse."
* Televisually Transmitted Disease: Someone on TV gets a rare disease that's treated as common.
* Telia pattern, except for the minor detail that they're already screwing like

rabbits before love and romance even become an issue.
* Tell a Demon series, has three protagonists, one male and two female. Based on your choices, it's possible for the two female protagonists to end up together, and one of them also has a second female love interest.
* Tellah zigzags this. Early on, he's one of the few examples anywhere of a
* Tell anybody that you live in Madrid. Despite the fact that there are
* Tellarites have three names, usually of one or two syllables, the middle being a connective that appears to be chosen from a small pool. Examples include Bera chim Gleer, Bersh glov Mog, and Mor glasch Tev. (The names seem to suggest that these porcine aliens are
* Tellarites have three names, usually of one or two syllables, the middle being a non-capitalized connective that appears to be chosen from a small pool. Examples include Bera chim Gleer, Bodor chim Grev, Bersh glov Mog, and Mor glasch Tev. Typically, they're referred to by the final name, which is shared among close family members (Rif jav Balkar and Sagar bav Balkar are a married couple).
* Tellarium Games back in the early '80s made text adventure sequels to
* Teller. Before getting into the interview, the host warned the audience that "there is some swearing."
* teller is a textbook example: initially a pampered son of a scholarly sect, he finds himself forced to take up the role of a legendary hero by the end of the story.
* Tell Him I'm Not Speaking to Him: This trope told me to tell you to just stay the hell off its page.
* tell him that what he saw was just a figment of his overactive imagination. Bart's immediate response is to chide them for not coming up with a more convincing lie.
* Telling a story about 4 sons, who each have different personalities and different methods of questioning.
* telling her he wish she'd die before she died, and it takes a lot of time for him to get into piano playing again.
* telling herself to get the Doctor off the ship after she learns about (and then erases her memories of) the Star Whale. Liz 10 leaves herself a recording in the same situation.
* Telling it to the beloved in exchange for something (especially in a "forbidden love" setting or if the lover is just so shy).
* Telling Lies lie for a living, with the former a particularly egregious example; his wife bitterly notes that he has a real knack for it.
* Telling Lies? No, Mama, all of Lila’s lies are revealed, including why she hates Ladybug after she exposed and humiliated her in front of Adrien. It is further unveiled that Lila was witnessed working with Oni-Chan to distract Chat Noir and destroy Ladybug, even un-akumatized and not brainwashed, with clear thinking, so to speak. Everyone is horrified to find out that Lila would try to get their beloved hero killed and help a supervillain win just to settle her petty grudge.
* Telling Lies? No, Mama been closed like her daughter said, and storms over there to confront Lila and confirm to her classmates that she is a liar.
* Telling Lies? No, Mama makes people tell truths they've buried deep inside. One boy she hits is a basketball player. After her beam hits him, he admits that he hates basketball and only joined the team because his dad made him. He really wanted to do theater, but his father said it was for gays.
* Telling Lies? No, Mama uses this as a tool to get everyone on her side, even when what she says doesn’t add up. At the start of the story, Lila tries to claim that Marinette attacked her, and everyone jumps to her defense, except for Alya, Nino, Adrien and Chloé. When Chloé presses the class if they really believe Marinette did it, they admit that they didn’t really believe Lila and only defended her because she seemed so vulnerable and sad and they didn’t want to seem like jerks.
* Tellingly, even the 2003 comic revival meant to capitalize on the show's success and help introduce new readers to the Titans

* Tellingly, one of the major selling points Marvel made sure to mention in the comic book inspired by the show was that it had no budget or character restrictions. For the first time, fans could see the cast of the show interacting with the likes of
* Telling Sten that you find his deadpan comments funny will result in a big boost to approval from him, and a curt 'thank you'.
* telling Willow how much he loves her. They "dated" as children, Willow had a mostly unrequited adolescent crush on Xander, and have a brief fling as teenagers, but are basically friends throughout.
* Tell It To The Bees is about a female doctor who becomes ostracized after she falls for a woman.
* Tell It to the Marines takes a callow, lazy youth and finally succeeds in molding him into a brave Marine.
* Tellius is a guy who shouts his name and rank at his opponents in battle, and wants to keep an axe given to him by his mentor on a mantel. Really, his ending for the 10th game sums him up perfectly "Kieran served the royal family with nearly fanatical verve. His voice could be heard from anywhere in the castle."
* Tell Me How I Die: An experimental drug gives people who use it visions of the future, including their own (violent) deaths at the hands of a killer stalking the testing facility. It's left ambiguous whether people can influence the visions they have or the visions influence the people having them, but the female lead eventually realizes that it works as a self-fulfilling prophecy because every character she told about the manner in which she saw them die ultimately do so in the exact way she described by trying to prevent it, while the only person that she didn't explicitly tell about hers died in a different manner than the vision predicted.
* Tell Me How I Die, his killing spree goes off without a hitch and he escapes before the police can find him. Even when the heroine acquires precognitive abilities of her own in order to predict his moves, he still outperforms her.
* Tell Me How I Die: In the climax, the male lead is stabbed through the chest by the killer, but the female lead helps him up and tries to get him to a doctor. The film ends before we can see if she succeeds or not.
* Tell Me How I Die is actually a slasher set in the mainland U.S., but at a remote drug testing facility somewhere in the Rocky Mountains, so close enough. It shares all the elements of everyone being there for a purpose, the hostile snowy weather preventing anyone from leaving, etc.
* Tell Me How I Die: The psychic killer addresses the main characters through a video recording that was shot several months before, since he already knew that they would be watching the tape at some point.
* Tell Me How You Really Feel (lesbian main characters, LGBT acceptance, queer female romance)
* Tell Me How You Really Feel: Rachel describes Sana as one, and it fits her in a lot of ways. While probably not a virgin, she is caring, friendly and upbeat most of the time.
* Tell Me How You Really Feel: Sana and Rachel are opposites in a lot of ways. The former is easygoing, friendly, has a very feminine style, comes from a wealthy family and the most religious Muslim of her relatives. Rachel is a terror to all the people working with her, keeps people at a distance, a tomboy, has a poorer lifestyle along with her father and only attends synagogue on the High Holy Days. Nonetheless, they fall for each other.
* Tell Me How You Really Feel Sana have a mutual attraction all throughout the book, until at last the pair act on their feelings, indicating they become a couple at the end.
* Tell Me How You Really Feel: The entire plot of the book involves Sana and Rachel falling for each other.
* Tell Me More!. Apparently the producer didn't think it was commercial enough.
* Tell Me Why this by making sure to cast trans voice actors for the voiceovers in other languages.
* Tell No One caused a massive pile-up on one of Paris's busiest roads, one that

certainly caused a lot of property damage, if no actual injuries.
* Tell No One; eight years after his wife Margot was murdered, he still hasn't moved on. Except she's still alive.
* Tell No One" playing, and realizes what the username and password are really *supposed* to be, allowing him to go to an Internet cafe and access the account.
* Tell No One: Two bodies are discovered in the woods → an eight-year-old murder and the cover-up behind it.
* Tell people that they'll be doing some good by buying your product. For example, a shoe company might say they'll donate a pair of shoes to a child in
* tells Belle that her love gives him the strength he needs to kill Peter Pan.
* tells Dawn she can have sex with Xander but only if they don't go past 3rd base.
* tells her she's gorgeous when angry. The second, Kirihara tries to duck and falls down the stairs they were standing next to.
* tells him that if he wants to have sex with Penny he should use the same kind of cologne her father wears.
* tells Jon Snow that she won't be like her father. In the books, she has a limited view about her father and when Barristan tries to tell her about him, she refuses to listen until she's in a better mood.
* tells Julio Scoundrèl that his mom has a collection of "pictures of you in the drawer by the bed she thinks I don't know about".
* tells Legion that yes, they have a soul. EDI also states that the fact that Legion refers to themself as "I" rather than "We" in their last moments indicates that they achieved full sentience.
* tell Soul to go home. The scene seems to imply that he hadn't left her before then.
* tells the admiral how the current intelligence chief is too cautious. And that's when said chief appears to remind him that if her predecessor had been more cautious, he would be less dead.
* tells the children that nobody loves them and announces that he will crap on their pillows.
* tells the story", a name that meant nothing to him. When this was explained to him, Moore told Hanes that he was using a false name to keep Blofeld off his trail, and that Hanes was now entrusted with the secret. Many years later, Hanes met Moore again during the filming of a piece about UNICEF, and mentioned their first meeting. Moore said he didn't remember, but he was glad Hanes got to meet Bond. Then, as they were leaving, he said he remembered perfectly, but the cameramen could have been working for Blofeld.
* tells the story of a wife who is taken off to Hell by the Devil. On arriving, she sets about all the little devils with her stick, so the Devil carries her back to her husband "...for the likes of herself [they] would not have in hell."
* tells the story of how his maternal grandfather got owning monkeys and other exotic animals as pets illegal in Sweden.
* tells TV audiences that if the amulet he has discovered does, as theorized, hold the powers of Egyptian god Anubis, he'd like "to harness the power as a weapon... for the benefit of mankind, of course."
* Telltale-esque style are done (The Narrator appeared during the tutorial on how to choose a path during the episode.
* Telltale Games adventure games, as seen in the article image above. She has a different job in every episode of Season One, and each of them is coincidentally useful in solving the case.
* Telltale Games) are on exactly the same wavelength as their fanbase, and most of the employees are moderators on the Telltale forums. They did lose this some of this status after allegations of mistreatment behind-the-scenes.
* Telltale Games, Artie McFly (Marty's grandfather) is hiding from Kid Tannen (Biff's father), a mobster and Artie's former boss. Marty and Doc Brown try to convince him to go to Kid's speakeasy to meet with Kid's singer and lover Trixie (who is secretly in love with Artie). He utterly refuses, which immediately cuts to "I don't know why I let you convince me..." as they are approaching the speakeasy.
* Telltale Games each appear in four, with even more actors popping up across two

or three of the studio's franchises.
* Telltale Games has an instance of this during Episode 1, if the player decides to help fix Carley's radio, which is tuned to the station she works for. Gunshots and breaking glass can be heard in the background as the reporter is told they have to go off the air, before the transmission cuts off.
* Telltale Games he's still incorruptibly good, it's highly unlikely he'd take any steps past yelling without good reason.
* Telltale Games. However a month later it was announced that Skybound Entertainment would work with the original team to finish the game.
* Telltale Games is still being determined, is gunned down in the courtroom by the father of the woman he raped and murdered, very narrowly missing Abbie Carmichael. The rest of the game is Michael Cutter's prosecution of the father.
* Telltale Games on April 1st, making many assume it was just an elaborate joke.
* Telltale Games. Opinions vary, of course, but generally their work receives positive reviews from both critics and fans.
* Telltale Games. Subsequent clicks confirm its useless nature, with Marty commenting that it is just a brick.
* Telltale Games that meant that it took nearly a year for all five episodes to be released. It's a much tighter experience when the episodes are played back-to-back.
* Telltale Games, they failed to sell well, contributing to the company being shut down in September 2018.
* Telltale Games. We can assume they were going to go through all 9 chapters of the series, but they only got to the second chapter, "The Great Cow Race", and then dropped it. Although it's still available to purchase from their site, and nothing has said they'll never come back to it...except the 2018 Telltale shutdown.
* Telltale Games when one of the life-or-death "pick one of two choices with equally bad consequences" pops up.
* Telltale includes a development gag relating to the third movie. Marty is told by a descendant of Marshall Strickland (whom he met in 1885) that the Marshall had been shot in the back by Buford Tannen. Marty states that he doesn't remember that occurrence; the scene was filmed for the third movie, but ultimately deleted.
* Telltale: Instead of their more classic personae as gangsters, Two-Face and Penguin are reimagined as a borderline-fascist politician and a terrorist who spouts class warfare rhetoric, respectively.
* Telltale. Not only does every item have its own humorous description, but for the first three episodes, the description changes each episode.
* Telltale's Game of Thrones noble estates under the banners of much more prominent families like Stark and Bolton, but also that many of their 'forces' have either gone off to war, deserted, been slain or taken captive during the very recent Northern Rebellion.
* Telltale's Walking Dead naturally seems to make this a main point in its series just as its comic and TV versions. To wit...
* Tell Them Your Quest: He convinces Tartetos he is a worthy successor to the Barcids, so Kleito offers her support. His dream of creating a
* Tell the Wolves I'm Home is this for June as well, being jealous that she grew close with Toby.
* Telluric current (aka static) experienced when an analog radio or TV picks up radio frequencies from the atmosphere.
* Tellurion by itself, but eventually must make some provisions for its companions.
* Tellurion has this as the sign something might be going on between the guy and girl.
* Tellurion is a type of clock that shows the actual positions of the sun and moon.
* Tellurion montages rather than a conventional webcomic. How it happens that the main characters can escape from guards, fight groups of enemies or catch monster-sized fish is not shown: just the reactions for having already done so. What happened in-between is left as an exercise for the viewer's imagination.
* Tellurion of thieves in the beginning, it might be a bit of a stretch to call them "friends". But they definitely aren't worth any trust in the end.
* Tellurion one such attack by their shipmates is the only thing that keeps the Guy

and Girl from being done in by a Guard.
* Tellurion people live or move about buildings or outposts built by precursors as if they're part of the scenery. One group is intent on destroying some of this history, as if people being able to understand it threatens their power. The heroes of the story manage to find access to a secret city anyways.
* Tellurion. She refuses the Robot's offer to learn how to fight, preferring instead to use her understanding of the precursors to chart the course of their Quest. Her skills are enough to instantly convince a ship captain to work for her and follow her directions.
* Tellurion. To any normal person the experience would be somewhere between disgusting and terrifying. To the Robot its just annoying.
* Telly Monster was originally conceived as a monster addicted to TV in a similar vein Cookie Monster is addicted to cookies,
* "tell you every detail of Caractacus’s uniform" — The only depiction of Caractacus shows him in the nude. Also, Caractacus was a Gallic chieftain who lived around the birth of Christ, and would never have worn a uniform at all.
* Tell your Guild leaders what you're planning and any other information they should know.
* Telly Savalas, but he also had a career as a spoken word artist on the side. In 1975, he made it all the way to #1 in the UK with a cover of Bread's "If". A followup cover of The Righteous Brothers' "You've Lost That Lovin' Feelin'" failed to make the Top 40, peaking at #45, and that was hit last UK chart entry. In 1981, Savalas had a European hit with a cover of Don Williams' country hit "Some Broken Hearts Never Mend", which topped the charts in Switzerland and made the top 5 in the Netherlands and Austria, and was his only hit in those countries. Of course, Savalas had a long career as a television and film legend before and after his hits.
* Telly Savalas is a veteran sergeant who's got de facto leadership of his platoon thanks to the captain being a lazy idiot who spends more time profiteering than leading. Unlike the captain, Big Joe has earned every ounce of respect he gets from his men.
* Telly Savalas — and it became a trademark for the rest of his career.
* Telly Savalas, which was itself based on a book by Selwyn Raab. However, Raab wrote that book as a non-fiction work, not a novel, so Kojak did debut for television.
* Telly Savalas worked as a lifeguard and never forgave himself for the drowning death of a man on his watch.
* Telma is obviously black however she bares a heavy resemblance to the Gerudo race. The problem is that most Gerudo have fled by
* Telmex (a telephone company in Mexico) heralded in 2008 its brand-new video phone service by airing a "Homage to the Video Calls", which was basically a montage of every single "TV phone" featured in a sci-fi movie. Except
* Telrav lying seemingly-wounded at the side of the road, who claims to have been ransacked by bandits and left for dead. He then begs that you help escort him to his nearby camp, but of course it's all a setup and once you reach the camp, he and his bandit gang try to ambush you. Notably, if you sneak into the camp and kill off the other bandits before finding him, he won't even bother with the ruse and attack you straightaway.
* Telzey Amberdon — which certainly wouldn't be in his best interest.
* Telzey Amberdon short story "Child of the Gods", Telzey is mentally enslaved by another psionic, with several of her most potent skills locked away. When the man is incapacitated and a monstrously powerful alien is shortly due to arrive to enslave and/or eat them, Telzey breaks free when she realizes that his command to look after his best interests—without him conscious to decide otherwise—would best be served if she had full access to all her abilities and was free of his control so she could use them most effectively.
* Temari, a skilled plotter herself, shows her line of thoughts figuring out his technique and how he plans to catch her with it. (Un)fortunately he is still one step ahead of her.

* Tembo the Badass Elephant is a slightly more literal example than most.
* Temeraire, all in a flat, emotionless monotone. Temeraire is badly shaken when she finally leaves.
* Temeraire and being too hamfisted with threats of harm can backfire.
* Temeraire and cat-call some of the women there. Laurence has to manage some quick diplomacy to prevent them from being summarily executed for the offense.
* Temeraire and transfers to the Aerial Corps, a branch that keeps its members even more isolated and has a bad public reputation besides, Edith breaks things off and marries another man.
* Temeraire are ordered to attack French raiding parties throughout England and leave no prisoners; this sets off a vicious cycle causing the French to be more brutal, "justifying" Laurence's brutality until another captain refuses to cooperate and snaps him out of it with one pointed question.
* Temeraire as a drug akin to peyote when stewed into a serum, and is given to William Laurence and Desmond Miles to enhance their Eagle Vision and place them in contact with their Assassin ancestors.
* Temeraire ass whose defining moment is abandoning his dragon companion to die alone, begging to see him, while he goes for drinks.
* Temeraire as well. For that matter, any female dragons that have had eggs that hatched would probably count.
* Temeraire at thirty, his prospects and suitability greatly reduced by it, they had to call it off.
* Temeraire. Between conscription and the willingness of families to get rid of daughters, by the time Cpt. Laurence and Temeraire arrive, the Chinese government had long since thrown up their hands and made their Dragon Corps an exclusive female preserve.
* Temeraire books. The little guy can't even pronounce the titular dragon's name- the best he can do is "Temrer".
* Temeraire books. While she only made midshipman (or rather the dragon-crew equivalent, midwingman) in the latest book she starts as one of Laurence's runners and is later promoted to ensign.
* Temeraire-century protagonist nearly drowns and wakes up without his most recent eight years worth of memories, the physician attributes his amnesia to a brain fever. That is to say, they have no idea what's wrong or how to fix it.
* Temeraire crew dies unless another dragon is close enough to help, but given the powerful emotional bond between dragon and captain, many of them wouldn't save themselves even if they were able.
* Temeraire, Desmond meets 11-year-old Emily Roland, Laurence's runner, for the first time and is surprised to find, after watching her for a little while, that she's a girl under her little jacket and trousers. When he tries asking her for her name, she just says, "Roland."
* Temeraire, disgraces himself with the Tswana, he goes to bed unhappy and distressed, dreaming of his mother and being carried in her arms when he was a little boy, who he was certain he would never see again.
* Temeraire features several people like this, though it certainly wouldn't be uncommon as public schooling was all but unthought of during the Napoleonic wars. Laurence forced himself to cram the necessary mathematics to be a sailor into his head when he was a boy, but was not much skilled beyond that, and had little love for books. Laurence, though, is not a slow man by any means. However, it's subverted when Temeraire's love of books and joy in reading and knowledge infects Laurence. Laurence also insists that his adolescent ensigns and cadets do their schoolwork, when he's not so busy he forgets, and though they perform their duties ably and, as children and youth are wont to do, pick up languages faster than the adults in the crew, they show great resistance and dislike of it. Similarly, uneducated dragons, even from breeds not particularly renowned for thinking, prove quite capable of debating advanced mathematics with Temeraire. The trope is also inverted in a minor character, a lieutenant who, "If ships could be sailed by figures could sail around the world without fear" but when called to order others around habitually gives the wrong order.

* Temeraire get booted to Australia at the end of the fifth book. Not bad, considering that they started that book under death and breeding-ground sentences respectively for treason. They get recalled back into service at the start of the seventh book when a crisis arises that only they can deal with, but by then they've ironically become reluctant to leave, having found a peaceful, pastoral life there.
* Temeraire goes through a growth spurt where his sacs outpace the rest of him, he needs to be tethered down at night.
* Temeraire has three perspective characters- Laurence, Temeraire, and Granby. Out of these three, Laurence by far gets the most focus and is treated by the narrative as its protagonist, in light of all of the significant changes to his worldview and lot- he's been deprived of his dragon and so completely soured to the sense of duty to king and country that so drives him in canon that he's wound up becoming a terrifying, ruthless pirate.
* Temeraire, he needs considerable guidance from his subordinates where the fine points of airborne combat are concerned and has an uphill struggle to gain their loyalty in any case.
* Temeraire he regards suicide as a cowardly act and (more importantly) a mortal sin.
* Temeraire. He was originally a British Navy captain—where such is apparently expected—before harnessing Temeraire and is still more polished and formal than most of his crew and fellow officers, the Aerial Corps almost necessarily being much less formal. His own crew, out of admiration for him, started taking after his example. He, in turn, began to shed the stiffness in his manners as he embraced his new life.
* Temeraire. However, as the pistols are slow to reload — doubly so when airborne — he switches to pure sword fighting in prolonged battles.
* Temeraire, in about 1805. Desmond's modern speech patterns and the breadth of his (typical) modern education net him several odd looks, although they pale in comparison to the Assassin-grade fighting skills that he's gained from his ancestors. But in a minor, interesting subversion, the name 'Desmond' was actually far more common in the late 1700s/early 1800s than it is now.
* Temeraire instead, and his father almost disowns him. Their relationship only gets worse from there.
* Temeraire is extremely well-read for a dragon, and speaks fluent French.
* Temeraire) is looked down on by the other branches of the armed forces. Conversely, Laurence initially faces a lot of hostility in the Aerial Corps because he started out in the Navy.
* Temeraire: Laurence discovers- much to his surprise- that dragons like human music, and some of the more intelligent ones can critique artworks.
* Temeraire Laurence is torn between outrage at the man's appalling behavior and visceral horror at Harcourt's method of fixing the problem. She insists that she would have struck him instead, but then she would have had to get up and rearrange her skirts all over again.
* Temeraire, meaning their captains are too rare and valuable to be court-martialed for anything short of treason. Dueling is prohibited for the same reason. Dragons themselves have little respect for (human) rank, so authority among aviators often goes by which of their dragons defer to which other dragons. One particularly useful breed of dragon will only choose female companions, so by the era the story is set in, women can and often do hold high rank and leadership positions in the Aerial Corps. Being bond creatures, dragons generally refuse to serve with any human but a companion who was present at their hatching but can usually be convinced to work with children of their original companion, so officers, even female officers, are encouraged to have children, and they rarely have time to get married for it. The constantly rumpled, disheveled appearance of the aviators, though, is just because dragon riders tend to pack in a hurry.
* Temeraire of their patients most of the injuries that can be treated by human physicians are relatively superficial.
* Temeraire of the protagonist, but by the end of the series, forcing himself to keep up with young soldiers in bad conditions has taken a toll on his health.

* Temeraire or no, in a single strike mid-flight, and then where will that leave dragons?
* Temeraire series is half-Nepali on his mother's side, with dark hair and eyes, a skin tone compared to polished teakwood, and to the shock of many, a perfect, upper-class English accent. In the series' Regency-era setting, most characters have a hard time determining what his race is beyond "not white", with many dismissive types settling on just calling him "Oriental" or "a Chinaman". Upon meeting him for the first time in Macau, the extremely white British protagonist initially thinks him some offshoot of Chinese, but decides against it, owing to Tharkay's un-Chinese clothing and lack of East Asian epicanthic folds.
* Temeraire series is the Napoleonic Wars plus dragons, giving an air force to every party involved. The war only gets weirder as successive books describe how the presence of dragons has altered and continues to alter global geopolitics, forcing the French and the British to negotiate with factions such as the Chinese royal court, the Africa-spanning Tswana alliance, and the still-powerful Inca empire for advantage.
* Temeraire series, Laurence finds his little ten-year-old runner, Emily, sobbing by the covert walls, fearing for what might happen to her mother, a Senior Captain who had just been called away to action against Napoleon. Laurence brings her inside and consoles her with a cup of hot cocoa, and his own tale of how he cried himself to sleep for his entire first week at sea after he ran away to the Navy at age twelve.
* Temeraire series of books don't necessarily find the even-numbered books to be bad, there is definitely a pattern of odd being "war and lots of cool dragon battles" and even being "travel and lots of talking". However, both the sixth and seventh books are travel and diplomacy, and the eighth is Napoleon's Russian campaign.
* Temeraire series, Temeraire's group spends an evening as the guests of a bunch of wild dragons. Temeraire watches a story being told through a combination of language and dance, and when he tries to translate it for Laurence it comes off very soap-opera-esque with romantic intrigue, greed, battles, and a whole lot of characters. Laurence doesn't get it.
* Temeraire, so few Britons know that they're intelligent, and many are quite surprised when a dragon starts talking to them — or, in Temeraire's case, quizzing them on their mathematical and literary knowledge.
* Temeraire successfully navigates a brutal five-day-long tropical storm. While the officers are passed out from exhaustion, some crewmen get roaring drunk and accidentally start a fire that destroys the ship, killing the protagonist's oldest friend and leaving the survivors to be captured by the enemy navy.
* Temeraire Temeraire freaks out, but Laurence is only talking about going to China ("the Son of Heaven" referring to the emperor, and Allegiance being the ship they're to travel on).
* Temeraire - Temeraire is annoyed by soldiers' tendency to do this whenever he performs any sort of minor aerial maneuver while he carries them. He thinks that he'll have to bathe for a week before feeling clean again.
* Temeraire, the aviators and others who oppose William Laurence and his black fleet just want to protect England, and that includes enabling the currently-legal and quite valuable slave trade to continue without him stealing their ships, cutting their slaves loose, and burning slave ports.
* Temeraire: The dragon Volatilus is too simpleminded to pronounce Temeraire's name, but immediately becomes the titular dragon's first friend in the Aerial Corps through unabashed friendliness. Laurence likens him to a human friend with a cognitive disability, which Temeraire accepts without further question.
* Temeraire, the final novel, after Napoleon has been defeated, Laurence comes to him expecting rage. Instead, Napoleon tells Laurence "Do you suppose I would ever reproach you, of all my foes? I am sorry only to have faced you across the field, when you ought to have been by my side. Loss is the hazard of battle. One who cannot bear to taste it cannot be a soldier." They then spend some time talking about the final battle.

* Temeraire the tension between Fair and Expedient. Oh, and his country is on the line. Angel walking through hell, anyone?
* Temeraire: this massive army is only possible because China maintains an extensive network of supply depots across its territory and feeds its dragons on easily-stored grain porridge rather than expensive and logistically-intensive raw beef in the European style; finding a sustainable food supply for three hundred 20-ton dragons becomes a major concern after they cross into Russia.
* Temeraire to realize that Temeraire really likes being touched there.
* Temeraire turns William Laurence from an excessively honorable, patriotic, and incorruptibly good officer in His Majesty's Navy/Aviator Corps into a ruthless and terrifying pirate driven by despair from the loss of his dragon and all the good that duty to king and country has done for him.
* Temeraire, who still hadn't gotten used to the far more sexually liberal ways of the Aviator Corps.
* Temeraire, William Laurence, as befitting a man who has come to be called the Gentleman Pirate, still does his best to dress respectably, down to wearing a neckcloth and coat, and maintains the polite manner of speech befitting his noble birth. All while ruthlessly plundering and trying to destroy the Atlantic slave trade.
* Temeraire, William Laurence maintains this tendency from his Navy days. When he has to captain a prison ship, his orders for treating the prisoners humanely and giving them medical care and exercise and such to stave off gaol-fever sow distrust and suspicion among his crew, and end in a mutiny. He continues to show similar care for his band of pirates, even once it's dozens of ships, hundreds of men, and one American Indian dragon strong.
* Temeraire: Will Laurence once discreetly checks an unfamiliar dragon's attributes in order to confirm the proper mode of address. Dragons in the setting have humanlike intelligence but, fortunately for him, no nudity taboo.
* Temeraire with the airborne versions, and one of the leads is a navy man adjusting to dragonback service.
* Temmie Armor it's never a big boost). Therefore, some of the opponents during the last parts of the game may be able to deplete a quarter of your life with just one hit, meaning that you have to be very good at dodging their attacks if you want to survive.
* Temmie follows in Flowey's footsteps by busting out a few of these, complete with
* Temmies are strange, catlike creatures that also appear to have floppy dog ears.
* Temmie wants to work with Genocide Chara just like Flowey did in the original game, only here they find out a lot quicker that Chara isn't interested in being friends.
* Temmie will give you the option to buy "Temmie Armor" if you pay for her college degree. The armor is prohibitively expensive, and Temmie openly admits it's a
* Temmink: The Ultimate Fight features gladiator style fights which almost always end in death in a modern setting. The participants are convicted criminals who chose this alternative over jail time, and have to keep participating in these fights until they die.
* Temnobog, the Bogolenya Deer god of Evil, is disgusted by societies that become overly Good, since the absence of Evil will cause its inhabitants to forget why they're Good and think that they can do whatever they want because they're Good, unwittingly becoming the very Evil that they defeated in the first place. He even believes that Queen Dazzleglow's attempts to break the Cycle would result in a complacent Equus, except no, she also believes in Constructive Evil and wants people to break the Cycle
* Temnoist followers are also against societies promoting the absence of Evil/Good, as they believe that Good cannot exist in the absence of Evil and vice-versa, and the consequences of such a thing will be worse, than if Good and Evil existed together. So while they are feared and reviled as agents of Evil, Temnoists believe that by promoting Evil, they help good people become strong enough to oppose Evil, thus in turn allowing the Cycle of Good and Evil to continue.

* Temo tends to Ari's split lip after the latter's fight with Mateo in
* Temperament: Usually this involves a naturally submissive or sensitive personality on the man's part, or, if he's naturally aggressive and strong, a sense of vulnerability around the woman which makes him "weak" for her. Usually the man will be younger than the woman, as well.
* Temperance Brennan and Jack Hodgins are buried alive in a car by a kidnapper/serial killer called the Gravedigger.
* Temperance Brennan has a poor grasp of metaphors, as well as a lack of social skills and a tendency towards pure rationality that often means she comes across as blunt. In-show, it's often implied to be a result of her upbringing, but what it is is unclear (
* Temperance Brennan is a loner, a workaholic, and completely ignorant of pop culture (she responds to most movie and television references with "I don't know what that means"). Her grasp on social niceties is also tenuous, but she sets herself apart from most TV characters by being willing and able to learn how to deal with people. She seems to be a combination of a mild degree of Asperger's and an academic detachment from reality.
* Temperance Brennan refused to believe that love was real in earlier seasons of
* Temperature, humidity, wind direction, lead time...it's not just the physicality that makes sniper training some of the toughest in the military. There's a very good reason why dropout rates for potential sniper students tend to be appallingly high; if you don't possess any of these required attributes then you might as well consider finding a more appropriate position for your field.
* Temper-Ceratops: Ceratopsian dinosaurs described as being akin to bulls and rhinos; temperamental and aggressive by herbivore standards.
* Tempest and Flash Magnus, Maud Pie and Mudbriar, Daring Do and Teomitl, and the Alpha and Principal Celestia; Rarity is dating both her new friend and business partner Gem Polisher and her employee Coco Pommel (though they haven't admitted to being in love yet), Princess Celestia is in a relationship with a pegasus stallion, Sunset is dating Sci-Twi, and the human Flash Sentry and Derpy Hooves are dating, with plans to marry after college. Pinkie's canon marriage to Cheese Sandwich has also happened, as has Big McIntosh's marriage to Sugar Belle.
* Tempest: A Novel Adam drinks a 6 pack of red bull and ends up wired for the rest of the night. It's stated that even a single can of coke keeps him up all night building bridges out of toothpicks.
* Tempest: A Novel his dad to conveniently interrupt him to prevent things from going too far.
* Tempest: A Novel When Jackson half-jumps back in time, if he's gone for 20 minutes, he turns into a vegetable for about 2 seconds. This apparently applies to any injuries he sustains while in the past as well. Getting hit by a car and getting a broken leg results in a bad bruise, and a bad burn results in a small red mark. This is explained as "the God of Time being super OCD like [Adam] and wants the world to be symmetrical."
* Tempester's curse allows him to throw natural disasters around, including tornadoes. In fact, tornadoes seem to be his preferred attack style.
* Tempest is based on a recurring nightmare designer Dave Theurer had of monsters crawling up out of a hole.
* Tempest, is smaller than the SR-1 and slightly more compact and efficient, though also runs with a considerably smaller crew. It still has an unusually large set of quarters for the Pathfinder, possible even larger than the space allowed for the crew quarters for everyone else to share, but given the Pathfinder's quasi-diplomatic role this may have been intended to allow for private meetings.
* Tempest players gets a finger-gun blast through the head thanks to Tari.
* Tempest's incapacitated side can make the entire team immune to one damage type for a turn.
* "Tempests": In order to save a space colony, a man must figure out which of the two realities between which he's switching are real, the
* Tempest strip, when Tempest awakes in an interrogation room, he quickly and clearly tells the questioner that Deathfist and his daughter have broken out of

prison and are on their way to Times Square to punch a hole in the space-time continuum. When the lie detector says he's telling the complete truth, the interrogator jumps to the conclusion that he's figured out how to fool it.
* Tempest was like this too during the War of the Lights, he became king of Atlantis because he was the only one left. Then he died.
* Temphill, a decaying town that has a sinister church located at the center of the town.
* Templar and Illuminati players find themselves on the receiving end of these during their training period in
* Templar Arizona are armed with giant razor sharp knives from an early age.
* Templar Arizona characters are described by the comic's creator as "Templar brownish", that being the default ethnicity of characters whose race hasn't been pinned down specifically. Because, in her words, "It's dumb to care, if it's not going to be an element of the story."
* Templar Arizona has a sport that is some kind of illegal street hockey called diesel. it is classified as a misdemeanor assault.
* Templar Arizona, Mose is betrothed to an 11-year old girl whom he only knows from letters and photographs. His friend-with-benefits Tuesday is utterly appalled by this.
* Templar Arizona, Mose's grandfather wants him to "keep the bloodline pure" and tries to browbeat him into taking up with the temple dancers. Mose objects on the grounds that they're his cousins ... and underage.
* Templar Battleforce; it takes millions of hours of practice to learn to do it well!
* Templar Battleforce, so each individual has millions of hours of training despite the average human lifespan not being appreciably longer.
* Templar / Combat Medic type character, since he can use the powerful Falcon Sword.
* templars and Seekers was a woman, and her status as a role model explains why a society that falls prey to many of the same social ills that plagued real-life medieval Europe is so gender-egalitarian.
* Templars. Edison, noted to be a Templar, is increasingly notorious for his habit of stealing ideas and patents from more skilled scientists; his biggest skills seem to have been business and publicity rather than invention. Tesla
* Templars hooks them up on Lyrium on purpose to keep them on a short leash.
* Templars is to control everyone in the world. The Assassins believe in free will and fight to stop them.
* Templars of the Shifting Verse, Augustus is seemingly chosen by the dormant Hall to be the catalyst for its awakening.
* Templars of the Shifting Verse features Augustus Praxio, who is considered a hero and expresses heroic sentiments yet is also selfish and quick to anger. He also has no qualms spying on his friends using his magic.
* Templars of the Shifting Verse is fantasy, yet dips into horror, romance and noir.
* Templars of the Shifting Verse, the Templars can die and be injured, but they always return three days later in the Hall.
* Templars of the Shifting Verse, the world is visited by shadowy humanoid figures who talk nonsense and occasionally murder people.
* Templars refer to non-mages derogatorily as "mundanes": "Kill the mundane!"
* Templars says that their deaths will not affect the Templars in the long run.
* Templars who were put on trial in a small village a short time after the order was declared heretical. This group, being the dominant military power in the area, arrived to their trial mounted on horseback, fully armed and armored. They were all acquitted and set free.
* Templates like that are forbidden: In the doujin manga where the above list appeared in, Marisa says this in response to the above possible explanations behind the doujin's own plot. In more comedic stories, this has occasionally been used as an actual excuse for the plot.
* Temple, 1979. The Owls finished the regular season 9-2, with the two losses

being narrow defeats to ranked instate rivals Pittsburgh and Penn State, then they capped off the year with a bowl win and a #17 ranking in the final AP poll. This marks the only Top 25 finish in school history.
* Temple Fugate by studying news footage of Batman's fights. He practically chases Batman around the clock tower, only "losing" because Batman manages to get the guy's own sword stuck in the clockwork mechanisms, making the clock tower collapse.
* Temple Grandin "That's ridiculous!"). This gets her in a bit of trouble when she builds a hugbox and a psychiatrist asks her if she gets a release from it and she says yes (because if there wasn't a release lever she couldn't get out). Unfortunately, she doesn't clarify that part and her hugbox gets taken away.
* temple levels it so you can drop down to a lower level (since it won't fall after you).
* Temple of Dendur" obelisks in London and New York were also gifts from the Egyptian government (though at the time it was officially part of the Ottoman Empire).
* temple of doom also harbor scores of tiger-headed beastmen who are just as likely to defend a human village from attackers as raze it to the ground. And on top of that the area is frequently raided by the ogres from the north and the dark elves from the sea.
* Temple of Doom has a related case with U-shaped rolling boulders. This one is only a minor example, as it's really a timing puzzle. If you mess up the timing and get squished by the boulders, you just get sent back to the beginning of the trap, without even any loss of health.
* Temple of Doom homage: Stewie, annoyed by Meg's interrupting his pre-meal prayer, rips out her heart, turning her into a chanting zombie.
* Temple of Doom however, Indy does fight some of Mola Ram's henchmen with swords.
* Temple of Doom uses the "descending ceiling" variety, in which Indy and his sidekick Short Round are about to be crushed by a spiked ceiling coming towards them. They only escape by convincing Willie, who's on the outside of the trap, to pull a bug-covered lever to make the ceiling go back up.
* Temple of Doom was the Incan version: a giant rock blocking a passageway, with very detailed pictures of people dying all around it.
* Temple of Elemental Evil) features many joinables, the majority of them are evil aligned (a few good joinables and several neutrals exist though).
* Temple of Elemental Evil intervene in mortal affairs. When one of the evil Gods breaks this rule and manifests an avatar to attack your party in the final battle, one of the Good-aligned Gods promptly manifests his own avatar one round later, none too pleased at the breach in protocol and more than willing to answer it in kind. When the two Gods then teleport away to continue their battle in private, the evil God doesn't leave without first raising all of the enemies you'd previously killed during the fight as zombies.... which, in turn, prompts the good God to respond by fully healing your party before he leaves as well.
* Temple of Elemental Evil video game port provides a sidequest where the party can rescue a slave named Bertram from his pirate owner. As a reward, Bertram promises himself to one of the male or female members of the party, depending on where you first speak to him (there are two places he is located for some reason, and only one of them will be interested in a male). Talking to one causes the other to disappear from the game permanently. Whatever version of Bertram you manage to recruit, if the relationship with him is pursued, you can get married to him, and if he is kept in your party by the end of the game, he and the character get a "both lived happily together" ending.
* Temple of Shadows used to be something easy like kicking the crutches out from under a lame man. Nowadays, you have to eat five whole live baby chicks, raw, while the sort-of evil guy comments on how horrible it is.
* Temple often acts like a teenager pretending to be a villain rather than an actual villain. He's actually a surprisingly tragic case, since he was a mature
* Temple of Terror). Once you've gotten all five and are preparing to destroy them, Malbordus then shows up from out of nowhere for a final duel.
* Temple of Terror: There are five dragons. They can be summoned by an artifact

and, apparently, just one of them is strong enough to ensure victory to a whole army of evil (which, considering that in other books you can fight dragons in hard but doable battles, is kinda odd).
* Temple of the Winds deliberately infects a group of young children as patients zero.
* Temple of the Winds. Kahlan and Nadine are tracking a badly wounded wizard through tunnels. When they reach a fork, Nadine says they should follow the path with blood... but Kahlan points out there was no blood before the fork, so it's obviously a false lead, and they should follow the other path - where there are no people.
* Temple Run. For example, when you die from falling into a pit, this message may be "I knew I should have learned how to fly" or "Temple slippery when wet". These two messages have a double irony since you can use "wings of resurrection" and since you can slide without problem over even the roughest surfaces.
* Temple Run seems to be taking place in Asia (judging from the architecture and rainforest), but all characters but one is western. The one non-western character is Asian. Her name? "Karma Lee".
* Temple Run, you need coins. These coins can be gathered within the game, but for the impatient, they are also available for real money.
* Temple Run, you spend the whole time futilely running away from a large group of demon monkeys.
* Temple successfully manipulates Tucker into becoming suspicious of Dylan's motives, and also convinces Sarge to temporarily turn against the Reds and Blues.
* Temple was also a chain smoker into her adulthood, which may have accounted for her death in 2014. She did however hide her smoking habit from the public as that wouldn't set a good example for her fans who might get alienated with the idea of a (former) child actress smoking. Not that there wasn't a scene where she smoked, though.
* Tempo has the logo do a water ripple effect, accompanied by a *BING* sound.
* Temporal Ambassador goal, but here seeks to set history right for similar but differently targeted reasons.
* Temporal Anomaly and is quite frankly terrified of the fact that he'll be taken away just like every other good thing in the past.
* Temporal Anomaly he finds himself on after being erased from the timeline of his old world.
* Temporal Anomaly that each of the Intoners hold within themselves and will eventually grow big enough to destroy everything if allowed to feaster long enough in each sister. So, by seducing each Intoner and bringing them into his harem, Sougo is then able to get them to give up their piece of the Flower that he is then able to destory one piece at a time.
* Temporal Anomaly, with the exception of Zero, who is and nineteen year old that looks seventeen.
* temporal duplicate of the android Human Torch's body, with some modifications and a different personality. Whatever those modifications were, the Vision is usually depicted as having a lot more inorganic bits than the Torch does.
* Temporal Duplication — Multiple versions of the same person at different points of time, around the same place.
* Temporal Duplication: Multiple versions of the same person present due to time travel.
* Temporal Paradox, and his final taunt to himself from the present is essentially this trope.
* Temporal Paradox that "spoilers" would cause. This is important because she and the Doctor run into each other many times, but in a roughly reversed order.
* "Temporal storms" are mentioned as one reason for placing sectors under
* temporal transporter and immediately jumps 20 or so years away from the action. He then very often takes a nap, followed by a leisurely shower and lunch, knowing he can jump back into the action the instant he left, after spending as long as he needs (days or even years) to plan his actions and gather anything he needs to fix the problem and win the battle, with absolutely nothing happening in the battle

from when he left to when he returns.
* Temporarily Exaggerated Trait: An individual character trait is highlighted for one episode.
* temporarily granted the ability to speak (he had beaten her three times because she was trying to avoid an angel placed in the way to prevent him from carrying out a mission of which God disapproved. The third time, God gave her the ability to explain herself).
* temporarily steal the powers of magical beings, but she doesn't automatically gain knowledge on how to use said powers.
* temporarily stop being friends in "The Ugly Truth", Greg imagines forgetting Rowley's name as an adult and calling him "Rupert" and "Roger".
* temporarily stun Pride. He had been helpless in the dark until the villagers turned the lights back on, but with the extra light from the flash grenade he can't use his shadows, either.
* temporarily the coach end up in a fight during their rendition of Superman, forcing Finn to deal with it.
* temporarily trapped in the screwed up body that they ended up making
* temporarily turned good in "Stop Team Go", she lost her edge and became a noticeably less effective fighter.
* temporarily turns black after being bitten by a radioactive black man.
* temporarily, which features characters who can kill someone's Bending permanently, much like Aang's Energybending, except it doesn't need much to work with. Judging by how the victims of the procedure are treated, this is basically the Avatar-verse equivalent of lobotomy.
* Temporary Blindness: A story where a character temporarily gains a disability.
* Temporary Blindness: The episode revolves around a character temporarily losing the ability to see.
* Temporary Bulk Change: When someone's belly, muscles or figure in general gets bigger or smaller for only one scene/episode.
* Temporary Love Interest: A character has a brief relationship with another character.
* Temporary Love Interest. The few male exceptions are backlashes or subversions.
* Temporary Online Content, however, since most of them have been reintroduced into the game after their respective league as part of the game's core content.
* Temporary Scrappy: A character whose purpose is to annoy the audience before they're eventually eliminated.
* Temporary Scrappy — Scrappy-Doo stuck around for the whole show, and he wasn't intended to be hated by the audience.
* Temporary ShiftsThe channel, after decaying for a while, has since returned to its roots and are showing programming related to their original mission again.
* Temporary Substitute: A character is replaced when their actor is unavailable at the moment.
* Temporary Substitute (who was the long-term solution) when she was shown using an avatar looking just like Gaea in-game while shots of her player behind the computer showed only her face.
* temporary team-up. Venom quickly tires of this, hits Spidey, and tells him to shut up.
* temporary. With very rare exceptions, outcasts are allowed back in after a few weeks or months.
* Temps and situation, or the paranorm has other useful skills, or the DPR is just desperate. (These are the occasions the stories are about, of course.)
* Temps ... and told it's no good turning up after the event, he needs to camp out in fields until he sees one happen.
* Temps article on "20 Things You Never Knew About Paranorms", and no. 19 was that there was a documentary about them on Sky One that night.
* Temps Loric, they can be cats, but the one that appears (or rather, doesn't) is just an invisible emotional force.
* Temps opens with Brittan's papers regarding his transfer from One Para to the Department of Paranormal Resources. The DPR official is suspicious, believing "this

is an oblatory equine situation, and we should acquire the services of a veterinarian dentist". (They should look the gift horse in the mouth.)
* Temps partly responsible for the scheme that brought him here in the first place ... and then realises that this probably wasn't the best time to say so.
* Temps powers to "enhance" his music with special effects. One article stated that he was being sued by Disney for breaching their copyright while performing "The Sorcerer's Apprentice" ... and that the concert hall had been closed down by a specialist team of pest-control officers.
* Temps shared universe. Responsible for cloning the Marcias; an experiment that was later found to be completely impossible from the word go:
* Temps wrapped around "the disassembled neon tubes of a small but effective electric pentacle".
* Temptation Island has bitchy contestant Suzanne (Serafina in the remake), and the pageant coordinator Joshua.
* Temptation Island is centered around the finalists of the Miss Manila Sunshine contest.
* Temptation of a Monk, the old monk has his head shaved by the protagonist. He does it so much more smoothly than the other monks, the old monk describes it as "just like what men and women do together."
* Temptation of a Monk, there's a deer hunt. When the deer is hit, instead of us seeing the arrow hit the deer, it's represented by the footage of the deer slowing down and freeze-framing. When this happens, the background music slows down and, at the freeze-frame, slowly fades out.
* Temptation Of An Angel When the dust finally settles, no one comes out unscathed.
* Temptation: The story revolves around whether or not to give into a temptation and the consequences, Pandora Box-like.
* tempted fate by saying "It's a wonder we're still in three dimensions."
* "Tempted", probably their biggest hit in the US, has main vocals by Paul Carrack during a brief stint with the band.
* tempt fate just before the paternity results are read, despite knowing that most of the time it backfires and they're forced to run backstage to save face from the jeering crowd.
* Tempting Cookie Jar: A hard-to-reach jar or container of cookies that a character tries to get even though they're not supposed to have them.
* Tempting Cookie Jar: The cookie jar is impossible for Little Jimmy to resist.
* Tempting Fate. After being chased through the facility by a group of raptors, the main characters run inside a room and close the door. Grant claims they are safe as long as the raptors don't learn how to open doors. Cue the doorknob turning.
* Tempting Fate, as she believes he is calling her to tell her how worried he is. After the number of cases for his precinct grows substantially so it's 150-100, he taunts her by saying that he hasn't felt this victorious since he and his agents won the very first Jackie Awards, before hanging up and delving into maniacal laughter as he strokes one of his previously-won awards.
* Tempting Fate. "Everything is good and it will be that way forever!"
* Tempting Fate: No one is ever surprised any more whenever something bad happens after this trope is invoked, yet it's unlikely that writers will ever stop using it nonironically.
* Tempting Fate: Remarking that you're sure nothing bad will happen, only for the bad thing to happen right after you're done talking.
* Tempting Fate since this is about a small group of people suffering from their pride.
* Tempting Fate: Stating the unlikelihood of mishap causes its likelihood to approach 100%.
* Tempting Fate the punishment. Also Tempting Fate mostly applies to predictions (explicit or implicit) that characters make about their own futures. This trope can apply to a much broader range of statements.
* Temptress Of A Thousand Faces got her name from the numerous latex mask she wears when going on a crime spree, where the baffled police spends pretty much most of the movie trying to figure out the elusive temptress' true identity.

* Tempts Fate kills a demon lord... almost. Its eye swears to banish Tempts to the deepest level of hell once its body reforms in ten thousand years. In order to ensure this curse comes true, it furthermore curses Tempts with immortality so he can live long enough. Tempts is
* Tempts Fate lands like this after blowing up several demons in "Tempts Fate 11".
* Tempura Wizards, but it's safe to say that Tempura Wizards also do this to humans.
* Tempus also has three subordinate deities that specialize in specific aspects of war.
* Tempus, a teenage mutant, also developed a crush on Cyke, pretty much the moment she met him. She didn't hide it particularly well, and everyone knew how she felt about him. However, even with her
* "Tempus Fugit": Agent Scully takes a soldier who is an important witness to the bar to meet a federal marshal. He has had a tough day, and Scully is very understanding.
* Tempus, he's a fairly decent guy and isn't interested in absorbing bloodlust into his portfolio (he only views war as worthwhile when there is peace to contrast it with).
* Tempus Simia allowed time travel to the past and to the future via portals it made when activated.
* Temrash, the Yeerk who infested Jake in book #6, previously had a Gedd, a Hork-Bajir, and Jake's brother Tom as hosts.
* temtem has Chromeon and Koish, which both come in 12 forms, one for every type. Each form has a different colour scheme, head shape, and movepool.
* temtem knocks out the afflicted tem after a certain number of turns.
* temtem was created to be able to breed with any species, and has a "genomic reservoir" in its tail that allows it to transform. In battle, Mimit with the Landing Transmog trait transform into the next Temtem in clockwise order when it enters the battle, while ones with Striking Transmog transform into any Temtem they hits with a physical move.
* temtem, while its techniques involve computer terminology and data given physical form.
* Temtem without enough stamina to perform the chosen battle technique on a given turn will do this, suffering "overexertion" which results in a cost of 2 HP for every point of stamina overdrawn, as well as the inability to act on the following turn. Certain species may have traits that prevent self-KO via overexertion, or allow immediate action on the following turn despite overexertion.
* Temuera Morrison game ever, but in his interview unlocked at the end of the game, he still expressed hope that his son would take an interest in the game because of his role in it.
* Temuera Morrison reduces all other human characters in the series (black, white, or green) to token minorities by sheer weight of numbers.
* , te Mutagen that has been used so copiously by villains and corporations alike has leaked into the groundwater, and all children, be it animal or human, born from this point on will be mutants. The story deals with Michelangelo's pondering on the fact that he and his fellow mutants will be the ones to inherit the Earth when humanity finally goes extinct.
* Tenacious D chicken nuggets (telling them to discard two out of the standard six-pack), a mixture of half Coca-Cola and half Diet Coke, and a Cherries Jubilee, all at the same time.
* Tenacious D in The Pick of Destiny, a young J.B. gets the belt for singing a rock song about fucking the devil at the dinner table.
* Tenacious D in The Pick of Destiny devil, but different sources in the film say he was just a demon.
* Tenacious D in The Pick of Destiny features a dour waitress played by Amy Poehler who, when asked how she received her black eye, she hesitates and mumbles, "Burned myself with a curling iron." In the deleted scenes, she gives various other lame excuses.
* Tenacious D in The Pick of Destiny: "From where you came you shall remain \ until

you are complete again". It was originally in Latin too.
* Tenacious D in The Pick of Destiny has JB offering Kyle to the Devil as a sex slave as their stake in a bet. The Devil sings a song about what he's going to do to Kyle when he gets his hands on him while dancing in front of a collection of sex toys.
* Tenacious D in The Pick of Destiny. He has the Pick but security is trying to lock him in, so he does a Power Slide through the door as it shuts.
* Tenacious D in The Pick of Destiny, Jables and KG act as statues in the Rock and Roll History Museum to hide from a guard.
* Tenacious D in The Pick of Destiny, Jables receives a call in the middle of a car chase with the police, from the car's owner, who's watching the chase on the news.
* Tenacious D in The Pick of Destiny JB knocks the mic stand over after the D's first "concert" (a one-song amatuer/open mic night). The audience is not impressed.
* Tenacious D in The Pick of Destiny, JB randomly journeys around a forest after consuming wild mushrooms with psychedelic effects, but when he comes to (after a big fall), he is conveniently close to his target (the Rock N' Roll Hall of Fame).
* Tenacious D in The Pick of Destiny: J.B. travels to Hollywoods all across America before he gets to Hollywood, California.
* Tenacious D in The Pick of Destiny. KG, during the part of the movie where he's trying to undermine JB's self-esteem so he'll want to keep working with him, calls JB's attempt at a power-slide "amazing...ly bad."
* Tenacious D in The Pick of Destiny recycled many of the gags/themes of the HBO series.
* Tenacious D in The Pick of Destiny starts out with young JB leaving home for Hollywood to become a rock musician.
* Tenacious D in The Pick of Destiny: The eponymous pick turns out to belong to the Devil; Tenacious D challenge him to a rock battle to save their hides.
* Tenacious D in The Pick of Destiny to find the eponymous pick. At the party KG's talked into playing some of the songs he & JB have written, but he only knows the words for his parts (which are backup to JB). This doesn't go over well.
* Tenacious D in The Pick of Destiny: Two security guards shoot at the duo, who escape unscathed. They're so excited that they actually got to fire their guns at someone that they don't even mind that they failed.
* Tenacious D. It starts with Lee, a fan who is overly-obsessed with Tenacious D, but afterwards, the Tenacious D duo becomes overly-obsessed with Lee, culminating with his murder.
* Tenacious D) "[Jack] Black characterizes Tenacious D's comic nature as an antidote to "the masculinity of rock", adding "There's also something funny about the macho-ness of rock. Like the bands that are the fucking hardest rocking are like, 'We'll fucking kick your ass, dude-with our rock.'"
* Tenacious D: Jack Black comes up with a killer tune for his song 'Rocket Sauce' ("Rocket... Rocket, all of my Rocket Sauce") then hears a familiar ice cream van jingle through the window...
* Tenacious D music. After taking over "City Hall", the D are rulers of the world. They issue absurd decrees that show they really are the wrong sort of minds to make big, important world decisions. "From now on we'll travel in TUBES!"
* Tenacious D series features this between Jack and Kyle, and it swiftly turns into a cartoonish kung-fu battle.
* Tenacious D series. Maybe not Tim and Eric levels of twisted, but definitely weird, with an odd, ironic take on the life of rock musicians.
* Tenacious D skit, "Friendship Test", Jack Black tells Kyle that he passed the titular test only barely, granting him the grade of F+.
* Tenacious D song "Tribute" tells about the encounter between Tenacious D and a demon, who threatened to take their souls unless they performed the Greatest Song in the World for him. They do so, and the demon is blown away by their awesome rocking... but neither of them can remember how the song went, so you're getting this song instead, which is just a tribute to the Greatest Song in the World and sounds absolutely nothing like it.
* Tenacious D's track "The Ballad of Hollywood Jack and the Rage Kage" parodies

this, with the Rage Kage languishing in obscurity while Hollywood Jack gets famous and stars in movies not entirely unlike the dynamic that was in place while the band themselves were on hiatus between albums). It culminates in the Rage Kage losing his mind in a jealous fury.
* Tenacious D's "Tribute" has the band making a CD about a demon in a shopping mall karoke studio. While the band are dragged away by security a little old lady takes the CD, her eyes glow read and she laughs manically.
* Tenacious D's "Tribute" parodies this trope, claiming that Tenacious D themselves successfully played "the greatest song in the world" when the devil demanded it, but they can't prove it because they forgot what it sounds like.
* Tenacious D television series and movie, Lee is one of these. That may be the case in real life as well.
* Tenacious. Luckily, he's soon heartened by the admiration expressed for him in the letter the dead man wrote to his wife.
* Tenacious Z Zach Gowen would wrestle with a prosthetic leg and detach it to use as a club against opponents
* Tenaya 7, has a habit of whistling The Farmer In The Dell when she wants to be extra creepy.
* Ten Brothers has ten brothers all born with supernatural powers that they lose when they come into contact with limestone.
* Ten Candles is a horror role-playing game with this as a mechanic. The game is played in a dark room lit by only ten tea candles. Players roll from a pool of dice to determine success or failure, but on a "botched" roll a die is removed from the players' dice pool and one of the candles is extinguished. When all the candles go out, any surviving player characters get one last action before their inevitable death.
* Tencendor metaseries. The first, nearing fullterm, Gorgrael eats his way out of his mother in the prologue, and in the third novel his nephew, Dragonstar Sunsoar, orchestrate's his elder brother's kidnapping by Gorgrael from within the womb.
* Tencent in western regions to allow Riot to make their announcements, so it seems there are no hard feelings in the matter).
* Tencent QQ, a Chinese instant messaging softwore, uses a scarf-wearing penguin as its logo.
* Tenchi Forever!, takes Tenchi into her own universe to live out the dreams she never experienced.
* Tenchi have the Light Hawk Wings. They are implied to be the same artifact, but Dual's version only appears on a mech. These wings cannot be used for flight.
* Tenchi in Tokyo. (Although, neither she nor Tenchi had ever been in the area before, so nobody knew that the shop was magical.)
* Tenchi in Tokyo, Ayeka blushes in embarrassment and covers Sasami's eyes, who then covers Ryo Ohki's eyes. Guess whose eyes were glued to the screen?
* Tenchi in Tokyo. His grandfather had earlier remarked that Tenchi had the gift of being able to solve problems without fighting.
* Tenchi in Tokyo in it if she used an infinitesimal portion of her father's money to pay for it.)
* Tenchi in Tokyo, Ryo-Ohki displays the ability to become various mecha.
* Tenchi in Tokyo, Sakuya calls Tenchi a lousy liar after he went on a date with Ryoko instead of her. Tenchi tries to explain to her, but Sakuya says that she can tell he was lying when his nose starts twitching.
* Tenchi in Tokyo she thought she was. She is Yugi's sort-of clone, or more exactly, her "shadow". A mere extension of Yugi's own self.
* Tenchi in Tokyo. The result is her face looking so creepy and silly looking that her rival Princesses Ayeka all but pisses herself with laughter at the sight of it.
* Tenchi Masaki apparently kept a stash under his bed, which could just be seen near the end of the first episode of the
* Tenchi Masaki creates from the Light Hawk Wings, powerful enough to disintegrate Kagato... and split his spaceship Souja in half!
* Tenchi Muyo Abridged in the season 1 finale, after the credits roll that credit every single person involved in the series to that point, a shot of space is shown

as Kagato's dismembered hand is seen floating seemingly lifelessly through space until it suddenly bursts open and teleports away as Kagato is faintly heard to say "bitch".
* Tenchi Muyo! a descendant of Yosho removed by several generations, so he's at least partially Juraian too. The problem here is that there is 700 years of history between Yosho's disappearance on Earth and when the story begins that we just don't know how much has been altered since Yosho's arrival.
* Tenchi Muyo!, Aeka did it because she's a bit beauty-obsessed. Sasami... did it because the trip is boring. There's also the fact that they had no idea how long the trip would actually be, since they didn't have any clues as to where Yosho had gone. They just froze themselves and gave their automated guardians orders to wake them if they found a clue.
* Tenchi Muyo! Aeka so hard she feels it even through the force field that confines her.
* Tenchi Muyo!, after Mihoshi and Washu have their talk and we see what Washu's doing to Ryoko, we're cut to a scene where D3 is talking to Tokimi and we see a mysterious figure in the shadows. That figure, Z, would show up in the third season.
* Tenchi Muyo!: All ships having a Royal Tree have a closed space with its own planet to house the crew. The Imperial flaghip Mikagami.
* Tenchi Muyo! and have been around ever since. And if that doesn't mean anything to you, then one of them created a physical body to exist in which she is still alive and kicking over twenty thousand years later.
* Tenchi Muyo! and have some contact with the Japanese government. Though most of the population isn't even aware of this.
* Tenchi Muyo! and other powers have more conventionally built, if sleek, spaceships.
* Tenchi Muyo! and takes a form like a giant rat, the mask changes as well, illuminating that this is his actual face.
* Tenchi Muyo!, and that the current Emperor is of mixed blood himself.)
* Tenchi Muyo!) and that this would be his third and the kid could finally be free. However, Sasami ends up refusing, saying that she wouldn't feel right if she didn't give her all. Others attempt to stop her in the process, but she ends up coming out on top. However, the boy's impressed with Sasami's cheerfulness over cooking and is determined to try again, impressing his father.
* Tenchi Muyo! are common law married due to their complicated history. They were classmates at the Galaxy Police Academy and eventually formed a relationship, where Airi became pregnant shortly before Yosho ran away to Earth. They met back up years later when Airi found him, their daughter Minaho in tow, and they got married by common law since Yosho was still officially MIA and their respective planets are bitter rivals so their relationship would be a major political bomb were it to be formalized.
* Tenchi Muyo! are often treated in this manner by characters within the series and in fanfiction.
* Tenchi Muyo!. At this point the perp breaks down and tells them everything they want to know.
* Tenchi Muyo! been working on it, but Tsunami accidentally spooked the hell out of him and he went running into the women's baths by accident). Noboyuki goes to flip the switch, turning the lights back on, but electrocuting him in the process.
* Tenchi Muyo! between time periods, as nudity is essentially an automatic adult rating for anime in the modern era.
* Tenchi Muyo! by the fact that they have a very powerful patron goddess, who decided to experiment and turned herself into a tree a while back. So, naturally, the seeds of the tree that is technically a deity grow into very, very powerful and useful plants. The trees that form the basis of Jurai technology are therefore technically lesser gods or at least demigods, though the Juraians themselves don't think of it that way. Which is a point of contention with one of their major rival nations, the theocratic Airai, who think Jurai doesn't deserve the blessing of gods they don't even worship.

* Tenchi Muyo can't help looking like Ryoko. Generator tells him he doesn't have to worry about the costume. He has to go, because he's certain there will be an attempt on Carmilla's life (he's right). His costume? Not Tenchi. He's not happy being dressed as Tsunami.
* Tenchi Muyo!. Capable of taking on even the most powerful villains in the galaxy and fighting them to a draw, if not actually winning...and this was at least in part because Katsushito felt his grandson Tenchi needed to defeat the villains himself as part of his training.
* Tenchi Muyo!, causing Tenchi to step in... but before he can call Ryoko out, Sasami catches his sleeve, giving Ryoko enough time to defuse the situation without making it worse.
* Tenchi Muyo! center of the universe in importance. Earth is only ever actually relevant to the overall story at all because the Jurian Emperor got one of his wives here, and her son lay low here for a few hundred years.
* Tenchi Muyo! comic continuities, the driving force behind one story is a pair of headbands Washu has invented which she says slow time down to the point of nearly stopping it for the wearers, but in practice really acts more like heavily-enforced privacy; it works by "slowing the synapses" of everyone within a certain radius, forcing them to perceive time as moving at a highly accelerated rate while they move imperceptibly slowly to the people wearing the headbands. So, naturally, they end up on a toddler-shaped Ryo-Oh-Ki, and an actual toddler the gang is babysitting.
* Tenchi Muyo! does this, and in later variations she gets all the female characters addicted.
* Tenchi Muyo! does this sometimes. It's not too big a deal if they're glowing yellow — that just means she's a bit narked — but when they glow red, she's ready to kick booty at the planetary level. If they turn green, well, let's just say she's not being herself.
* Tenchi Muyo! example was alien princess Ayeka listening to the 1997 song "Bitch" by Meredith Brooks (real subtle there) despite the fact that she had never been to Earth, and the song wouldn't be written for 700 years.
* Tenchi Muyo! exposition to wait for her. Both he and the villain just stands there awkwardly until Yoshi remembers Washu is on a mission in space, and excuses himself.
* Tenchi Muyo! fanfic has one character working out a crossword to show her intelligence, playing the trope itself straight. (Japanese crossword puzzles being done in hiragana or katakana (phonetic writing), of course.)
* Tenchi Muyo! franchise, since it was one of the first to use Union voice actors.
* Tenchi Muyo! from Granpa's Shrine, Tenchi barely escapes her with his life, only to find her in his bed when he gets back home.
* Tenchi Muyo! GXP, a Good Luck Meter appears during Seiryo's search for any lucky treasures and relics, hoping to use them to counter Seina's bad luck.
* Tenchi Muyo! GXP also has very loose connections to the main series, though not nearly as badly. Tenchi himself only appears in a single episode, despite still being the title character. No other original Tenchi character appears outside that episode. Though the show itself is about the Galaxy Police, which is an important part of the original Tenchi series.
* Tenchi Muyo! GXP (Amane, Ryoko and Kirko) are using a public bath separated by gender. One of the girls tries to sneak off to wash Seina's back, and the three start to bicker over who gets to do so. Their benefactor, Seto, suggests that they draw straws to settle the matter, and provides a cup with four straws (Seto tried to include herself, but Amane throws that straw out immediately). Kiriko wins the longest straw, but Amane throws them back in the cup and demands a redo, and keeps demanding redos on each loss. In the meantime, Seto snuck away to wash Seina anyway. The situation gets even crazier from there.
* Tenchi Muyo! GXP as the family leaves him with a recruiter. To go to Hawaii.
* Tenchi Muyo! GXP. At least the bevvy of naked girls counteracts his bad luck there.
* Tenchi Muyo! GXP during the big wedding sequence. It's a little disturbing

watching everyone talk about it so cheerfully... (Washuu did mention earlier that she'd get one eventually — it is still weird, though.)
* Tenchi Muyo! GXP, energy swords almost identical to Star Wars lightsabers were implied to be both Galaxy Police standard equipment and carried by space pirates. They even had similar color coding — the Galaxy Police used blue laserblades and space pirates used red.
* Tenchi Muyo! GXP has Seina Yamada whenever the ship he is on jumps blindly there are always pirates. His stroke of bad luck makes Seto Kamiki Jurai recommend him his own ship to be used as bait in anti-piracy operations. This results in a overwhelming success rate against pirates.
* Tenchi Muyo! GXP has the Galaxy Police with main character Seina even going to the Galaxy Police Academy.
* Tenchi Muyo! GXP is a Fleet Captain yet he hasn't graduated from basic training until the end of the series.
* Tenchi Muyo! GXP, it usually bleeds off onto those around him. One subtly extreme moment comes when a horse jockey falls off his horse in the middle of a race because a man cheering for him was listening to the race on the radio when Seina happened to be riding on his bike nearby.
* Tenchi Muyo! GXP sit in front of boards, and maneuvering thrusters fire when a called number is on one of the cards; they return fire whenever someone gets "Bingo". Granted, the Hat of the ship is "Good Luck", but it's definitely weird.
* Tenchi Muyo! GXP takes this subversion and makes it go to eleven; the escaping ships end up gathering entire fleets of pursuers this way thanks to the protagonist's bad luck. And this gets weaponized.
* Tenchi Muyo! GXP Tarant Shank goes through several rounds of this after humiliating defeats. It never helps.
* Tenchi Muyo! GXP: The Kamidake, Kamidake II, the Galaxy Police Academy etc.
* Tenchi Muyo! GXP this trope shows up in an early episode. Since main character Seina won't wake up and get out of bed his friend Kiriko tears the covers off only to discover his morning wood, he is shown in the very next scene eating breakfast with a large red (undeserved) slap mark on his face.
* Tenchi Muyo! GXP, who has luck so bad it is more or less successfully weaponized. Largely because his luck is so bad that it spreads to those around him.
* Tenchi Muyo! GXP women (five main, four minor), has his problem solved for him by simply being ordered to "politically" marry his main five love interests. (The other four kidnap him just before the wedding and ravish him to get in on it; it apparently works out somehow.) Tenchi even attended the wedding.
* Tenchi Muyo! had living characters drift through space on at least two occasions
* Tenchi Muyo! has been shown to walk through barriers and walls unless they are specifically shielded to prevent her from doing this.
* Tenchi Muyo! has Ken-Ohki, a male cabbit who ends up as Ryo-Ohki's boyfriend.
* Tenchi Muyo! has numerous happy immortals. The message essentially being: Immortality is great as long as you have a family of other immortals to spend it with, and you all really like each other.
* Tenchi Muyo! has some minor telekinetic powers, but she almost never uses them, and never for anything serious. Mainly for animating the "tail" on one of her favorite outfits.
* Tenchi Muyo! has the piece "Royal Teardrop" that plays during sad moments. The name is also significant as its a flower from Jurai that is used for sad events.
* Tenchi Muyo! have long hair. A large majority of them being Juraians (and royal ones at that), it's more or less a custom to have long hair and to be either tied back or put up in ponytails. It's even more telling when Washu, Ayeka, and Sasami must put their hair up just to go into the hot springs or even sleep. The goddess Tsunami has the longest hair, since it reaches the floor and goes on a few feet.
* Tenchi Muyo! have vast lifespans (one prominent member of the royal family is over 5,000-years-old; she looks 35-40, tops), but their birth rates seem to be quite low. The Juraian emperor, for example, has been married to two women (at the same time) for over 700 years, and only had 3 children between them. His mother-in-law (the above-mentioned 5,000-year-old Juraian) has only one biological daughter;

while she's raised several other children, they were all adopted.
* Tenchi Muyo!. He is a pretty competent architect, but when off-duty he exemplifies the trope.
* Tenchi Muyo!. Her presence fills the room, but she is not there. And that's only in the third dimension. Each dimension up is so much more complex that a being from a lower dimension cannot comprehend, and there is a lot of them.
* Tenchi Muyo!. If it hadn't been a parody, it would have been a heinous act, because: they weren't in a fight; Tenchi was a martial artist and knew that the obese Kazuhiko wouldn't defend himself; Kazuhiko's sole crime was to make a lewd joke; and he wore glasses. And, of course, Tenchi was supposed to be the good guy. Tenchi also doesn't realize yet that he has superhuman strength (since all of his sparring is with his equally superhuman grandfather, he's got no frame of reference), though this incident really should've clued him in.
* Tenchi Muyo!: If there are space pirates and would-be conquerors, why not set their sights on Earth? Especially big in OVA continuity, where Earth is specifically a two-bit colony world that nobody cares about.
* Tenchi Muyo! in its various forms has this in... er, various forms. The original series seems to have the least amount, although the girls do seem to wander into town every so often with little comment. The manga has Mihoshi getting a driver's license (partly after using her high-tech blaster right in front of a cop), and Ryoko tries her hand at it too. The TV series has Kiyone and Mihoshi renting an apartment and working part-time jobs often. And no-one really seems to mind all the aliens hanging around. And think about Katsuhito in the TV series (in the OAV he landed long enough ago to have avoided modern recordkeeping).
* Tenchi Muyo! in Japan) is this. It was initially just a two volume story set in the OVA-verse, but when it proved popular, it kept going for an impressive 22-volume run, greatly expanding on the universe (even if it was just for that canon) and the characters living there.
* Tenchi Muyo!: In the Mihoshi Special, all the characters in Mihoshi's dream were doubled with characters from the show itself. Notably Ayeka was a witch, and when the real Ayeka wakes her up, Mihoshi screams "Oh no! It's the old witch!"
* Tenchi Muyo! In the original OVA, he's actually physically younger than he appears, but in the Tenchi Universe and Tenchi in Tokyo series, he's genuinely old and a straighter example of the trope. Nobuyuki Masaki is this at times too.
* Tenchi Muyo!. In the original OVA she actually isn't much of a gadgeteer — most of her time was spent in doing research so complex that the viewers were rarely let in what she was doing. The later TV-series increased her gadget-building role considerably.
* Tenchi Muyo! is a colony of Jurai, officially known as Colony World 0315. This is an odd mix as the colony's existence is known but Jurai has left it alone aside from maintaining contact with a few governments.
* Tenchi Muyo! is a notable exception, though she's more well known for her western animation and video game roles.)
* Tenchi Muyo! is as a defensive shield for a ship. This is provided either by the tree providing the ship's power, or very special individuals.
* Tenchi Muyo! isn't absolute. He also has no control over the numerous alternate universe spinoffs.
* Tenchi Muyo! is often seen with her, acting more or less her cute pet.
* Tenchi Muyo! is one of the most well known examples. By a third of the way through the series, Keitaro literally has beautiful girls throwing themselves at him (Shinobu, Mutsumi, and Motoko). Problem is he's already made up his mind, Naru.
* Tenchi Muyo! is poorly written and badly acted, and yet enthralls everyone who watches.
* Tenchi Muyo! is, well, not quite introduced, but featured, playing a series-original Bach-esque piece on a truly enormous science-fictional organ.
* Tenchi Muyo!. It's a loose alliance of the most influential nations around, mainly humans (in the form of a couple of rival empires) and wau — a race of large anthropomorphic felines. It should be noted that the Galaxy Police are also the galactic Postal Service as well. In fact, it's their main source of income.

* Tenchi Muyo!. It's not for nothing that this outcome used to be labeled the Tenchi Solution.
* Tenchi Muyo! loved using these in everyday life, such as making custom baby-food.
* Tenchi Muyo! make canon if/when the copyright holder (AIC) greenlights more OVAs. Until then, he's left in the unusual circumstance of essentially writing fanfic about his own anime.
* Tenchi Muyo! manga had an otherworldly prince tether his dying world to Earth and kidnap and brainwash Princess Ayeka so that they could die together. Then, he makes the mistake of kidnapping Sasami as well, dragging everyone in to save the princesses and the world from destruction.
* Tenchi Muyo! media. They start off with the superpowers but usually end with childish cheek pulling.
* Tenchi Muyo!. More justified in the OVA continuity, where she's capable of regenerating from just about anything. Interestingly, she tends more to be the one inflicting the pain in said continuity.
* Tenchi Muyo! OAV the girls all watch a strange alien soap opera, but it doesn't get much actual screen time.
* Tenchi Muyo! of overlap. He lets the royal family of Jurai know, but there's no way he's letting the rest of the universe know the information.
* Tenchi Muyo! of the Jurai Empire. They mostly leave it alone and very few people besides the protagonists and the government know that aliens exist.
* Tenchi Muyo! one of these in the manga volumes. Being that she is an alien princess (and, unlike Tenchi, knew all along), it doesn't quite work out. She should be glad that the goddess she's symbiotically fused with didn't decide to show up.
* Tenchi Muyo onto other people. He isn't affected as much because he's used to it and, regardless of how bad his luck is, will only suffer injuries.
* Tenchi Muyo! originally had 65 episodes (not counting the movies and special) comprising the original Tenchi OVAs (13 eps), Tenchi Universe (26 episodes), and Tenchi in Tokyo (26 episodes). It was shown on American TV because of this. However a sequel to the original OVAs was made years later bringing the count to 72 (73 with the Mihoshi special). If you count the spinoffs, the episode count is now at 112.
* Tenchi Muyo! OVA, although the only real change they make is fixing the damage the villain did, rewinding time to before it happened, and reverting the villain to an infant and removing his powers.
* Tenchi Muyo! OVA episode 3, after Ryoko's little prank on Ayeka, she ends up flying backwards towards Katsuhito, he gropes both her breasts. In anger, she turns around to punch him, only to have him block it. It's a clue that Katsuhito isn't who he says he is.
* Tenchi Muyo! OVA episodes had Ryoko, Ayeka, and Mihoshi doing this as their share of repairing the extensive damage to a hot spring resort, with varying results. Ryoko did a hack job on hers with questionable accuracy, Ayeka primly carved each millimetre of skin with painstaking deliberation and took way too long, and Mihoshi outstripped both easily (and boasted about it).
* Tenchi Muyo! OVA episode was represented as the classic clattering of a malfunctioning projector and film sliding out of position. Never mind that it was made in the 21st century on computers for a DVD release.
* Tenchi Muyo! OVA series reveals that the Japanese government is in on the fact that aliens live on their planet. It's explained that the Great Seto Bridge's destruction was covered up as a meteor crash, but Noboyuki and his assistant had to let them know that it was because of Ryoko's awakening and Ayeka's arrival.
* Tenchi Muyo! OVAs, it was revealed that Tenchi's own mother, Kiyone, did this to him as a child. Turns out she wasn't the sweet and kind lady Tenchi remembered her to be.
* Tenchi Muyo!. Poor naive Tenchi frees Ryoko from her prison, where she has been locked for 700 years. Within a matter of days five or six more show up, almost all of whom are capable of blowing up his house at minimum, the planet at maximum. All of whom are heavily connected to Ryoko, even if some of them don't realize it.

* Tenchi Muyo! puts her in an artificial womb, with the whole cast intending to help raise her once she's born (again).
* Tenchi Muyo!, Ryoko and Ayeka get into a huge brawl over the last cookie. Once the dust settles, Washu (inside a protective bubble) eats it.
* Tenchi Muyo!. Ryoko is the most common, but hardly the only, practitioner of this technique upon him.
* Tenchi Muyo!, Ryoko is tortured with electric shock...and apparently finds it arousing.
* Tenchi Muyo!, Ryoko tricks the crew into thinking she's pregnant (and that Tenchi's the father) by claiming to crave pickles and ice cream.
* Tenchi Muyo!. Ryoko, Washu, and Kagato have to ability to create energy swords outright, Ryoko's and Washu's being simple orange constructs, and Kagato's being green and more ornate, like a bastard sword. Lightsaber-like sound effects are standard when such swords are activated.
* Tenchi Muyo! Ryo-Ohki OVAs, Washu messes around with Doctor Clay's precious priceless vase by pretending to nonchalantly toss it around in the air and almost miss catching it several times. She never did break the vase, but when Mihoshi later reports to Washu on Doctor Clay, it turns out that the "priceless" vase was a forgery... created by Washu herself ages ago to make some quick cash. Of course, being Mihoshi, she immediately breaks the vase on accident.
* Tenchi Muyo! Ryo-Ohki spaceship, for example, looks like a cutscene from an early CD-based videogame.
* Tenchi Muyo! Ryo-Ohkis. Ryoko will have none of that, closes the egg up, shakes it, and fuses the two Ryo-Ohkis.
* Tenchi Muyo! Ryo-Ohki: Subverted in the first episode when Ryoko steps on a metal rake. She doesn't get hit in the face, instead she's fast enough to dodge and then smack the pole hard enough to bend it. This, however, leaves an opening for Tenchi to slice her wrist off.
* Tenchi Muyo! Ryo-Ohki wants, as it was their agreement with her that gives Juraian royalty their powers.
* Tenchi Muyo!, Ryouko punches a wall when it seems all hope is lost and Tenchi's going to be erased by a time paradox.
* Tenchi Muyo!. Sasami showed them some shoujo manga and tricked them into thinking that this was a traditional part of Earth romances. Thus clarifying something very important. Sasami is an evil, evil woman.
* Tenchi Muyo! Sasami to throw the match because he wants the whole ordeal over with. Sasami can't live with the idea of giving up and keeps going. Sasami wins, but the son is so impressed by her skill that he vows to keep practicing his own cooking until he's good enough to win three times in a row with his own ability.
* Tenchi Muyo! series came with keychains sporting HD versions of the characters.
* Tenchi Muyo!, set up in other-dimensional space and accessible through a door that is usually located under the stairs in Tenchi's house, but which can vanish or move as Washuu wills it.
* Tenchi Muyo! she knew the child would be killed if her people found out about it, so she had the embryo removed from her and placed into a device like this temporarily until she was in a position where she could have the child returned to her and give birth in safety. The result was their daughter Minaho, Tenchi's aunt.
* Tenchi Muyo! shows this also happens between Seina's oldest son and Ryoko and Ayeka's daughters, as well as Seina's second son and Ryo-ohki's three daughters, and Seina's youngest son and Mihoshi and Noike's daughters.
* Tenchi Muyo!, since he knew full well what Tenchi would do and what the likely result would be. He pretty openly goads Tenchi into opening the shrine, as he tells him that he can have the key as soon as he's able to take it from him through combat or trickery, and eventually Tenchi succeeds.
* Tenchi Muyo!, since it turns out to be his real face. It becomes more creepy as he becomes more desperate in the final battle.
* Tenchi Muyo!'s second OVA, the android Zero, having taken Ryoko's form and memories, is ordered to kill Tenchi due to how her emotional reactions (inherited from what she copied of Ryoko) are interfering with her mission of capturing Washu.

Reflecting on the order, she makes to stab Tenchi with a dagger, and the image cuts away to her agonized scream as we pull out from the room to the house, to the exterior galaxy...all the way out to Dr. Clay's ship hovering (potentially outside of conventional reality itself). However, the next episode makes it clear this is an exaggeration, as not only does this not wake up the entire house, but Tenchi sleeps right through it AND Zero plunging the energy dagger into his pillow inches from his head.
* Tenchi Muyo! strip had Washu make a camera that would show off everyone fifty years into the future. When she took the picture, the gang found out that the only two growing old were Tenchi and Mihoshi. Ryoko and Ayeka are ready to strangle the poor cop while Sasami sighs out that she wanted to grow old with him.
* Tenchi Muyo! suffers from these. Her first dream prophesies Kagato's arrival and the second tells of Tokimi's involvement with Tenchi. However, Sasami can never remember the dreams fully—even though she called out Tokimi's name in the dream, she tells Tenchi that a woman was taking her away and that she never seen her before. As well, they also tend to be very disturbing.
* Tenchi Muyo!, Tenchi and the girls go their separate ways at the end, but when Ryoko returns, she points out that the others are coming back to him because they missed the fun. Tenchi's melancholy prior to Ryoko returning makes it clear that he missed it too.
* Tenchi Muyo!, Tenchi's dad, Noboyuki, is shown to be this, going so far as to videotape his own son when he has Ryoko in his room in the second episode. This is downplayed massively in later editions.
* Tenchi Muyo!, Tenchi will wind up having multiple children by multiple girls of his harem.
* Tenchi Muyo than it looks on the outside. Essentially, the interior is pretty much as big as the owner wants it to be. A full size luxury resort and hotel, complete with wildlife park? No problem!
* Tenchi Muyo! that they give him a pass. That, and most of the time, it's usually Ryoko's fault. The worst he's gotten was being called a "naughty boy" by Sasami and even that was in jest.
* Tenchi Muyo!. The more ass you kick, the longer you live, plain and simple.
* Tenchi Muyo!, then has his android assistant (Zero) take her form and assimilate her memories, in order to spy on Washuu. Clay had intended to dispose of Ryoko immediately, once the replication was complete, but when Zero notes that a portion of Ryoko's memories was missing and couldn't be accessed, it piques his scientific interest again, so he begrudgingly decides to keep her alive.
* Tenchi Muyo! (the original OVA's, at least) seems especially put off by Ryoko's (and occasionally, Washu's) aggressive sexual advances. On the other hand, he seems more romantically interested in polite and reserved Ayeka, girlish Sasami, and spacey Mihoshi.
* Tenchi Muyo! the results are disastrous. She ends up giving up, though.
* Tenchi Muyo!, these abilities no longer apply, though she still drinks enough sake to kill a bear.
* Tenchi Muyo!. This also means that after being shot down, they can be regrown as long as the core tree survived.
* Tenchi Muyo!. Though this might just be a result of Ryouko's complete lack of any kind of education.
* Tenchi Muyo!, tries reading the giant snake monsters attacking her their rights.
* Tenchi Muyo!, two of Tenchi's housemates are revealed to be part of the three Choushin goddesses who created the multiverse they live in. Sasami merged with the goddess Tsunami when she was injured as a young child, while Washu simply sealed her memory and powers away in the three power gems that she gave to her daughter Ryoko. As of the end of the 3rd OVA series, their sister Tokimi seems to be joining in on the fun as well.
* Tenchi Muyo!, usually right before she's about to stuff Tenchi into some machine or another.
* Tenchi Muyo: War on Geminar changed the title for marketing purposes and to better establish it as a part of the Tenchi series.

* Tenchi Muyo: War on Geminar, everyone celebrates Kenshi's excellent cooking. They ask what his secret is, and he innocently reveals he crushes dried bugs into powder and sprinkles the food with it. The only one who doesn't freak out is the nature-attuned elf Aura, who says it's genius and she should have thought of that. Kenshi doesn't understand why everybody else is freaking out.
* Tenchi Muyo: War on Geminar has Kenshi Masaki, a hero whose only weakness is his apprehension of what might happen to him if any of his hundreds of admirers gets him alone. In almost all his fights, he dances around his enemies without the slightest effort; even if it looks like his enemy's actually strong enough to beat him, it turns out he isn't fighting all-out and a single word of encouragement completely turns the battle around. His insane power and endurance is a source of humor in-universe; at one point the headmistress of the school where he's working warns the many people who want to use him that they need to take care not to exhaust him, while behind her he's jogging along with all kinds of massive, heavy material. When she turns around to see him carrying a log roughly five feet in diameter and maybe fifty feet long as if it was a twig, she quietly says "looks like he'll be fine".
* Tenchi Muyo: War on Geminar tells her about an old custom about red strings symbolizing love, she gets really embarrassed and unsuccessfully tries to get the cord back. Later, she sees the necklace and finally realizes she has feelings for him.
* Tenchi Muyo: War on Geminar, Tenchi's brother Kenshi mentions all of Tenchi's girls as his "elder sisters", implying that 15 years after the OVA end, they are still around him.
* Tenchi Muyo!: Washu claims to be 'the greatest scientist in the Universe' and really is. She even invented tiny robot mascots to proclaim her greatness whenever she needs an ego-boost. Also insists on being called 'Little Washu' and being treated with all the indulgence due to a child, despite the fact that she is over 10,000 years old and virtually omnipotent, capable of suspending the laws of physics or even destroying the Universe if she so pleases. Somewhat subverted in that she is still fairly nice to the people around her and gets along with them fairly well.
* Tenchi Muyo! Washu created a pocket dimension to house a complete spa for use as the women's bathroom. The men got stuck with the rather small ordinary bathroom.
* Tenchi Muyo!: When Tenchi first meets Sasami, he immediately assumes that she's come from a planet called Sasami. Why he jumps to this conclusion is a bit of a headscratcher, though he was having kind of a bad day and probably wasn't thinking straight.
* Tenchi Muyo!, where episodes from three very similar series were broadcast in the same timeslot in seemingly random order.
* Tenchi Muyo!, where most of the voice actors do most/all of their own singing, some of them occassionaly have different singing voice actors.
* Tenchi Muyo! where the gang have to take care of Tenchi's baby cousin, Ryoko catches a dose of this trying to change Taro's diaper.
* Tenchi Muyo!, which allows Minagi, a clone of Ryoko, to spot Washu taking Ryo-Ohki to the fight site and be able to push the gang into realizing something's wrong. When they confront Washu, she ends up undoing the Amnesia (which pisses Tenchi off that she did so in the first place), but Sasami ends up undoing it on herself while they're gone.
* Tenchi Muyo!) while the final episode of the OVAs shows that she's not this patron saint of motherhood...
* Tenchi Muyo! who insists on doing everything a "traditional" way, and she's not above throwing her weight around when she thinks she can get away with it.
* Tenchi punched his friend Kazuhiko, who was twice his size, across the classroom to smash into the lockers in the first
* Tenchi Solution term for several different resolutions of a love polyhedron.
* Tenchi's, Tenchi's grandfather Katshuhito has elements of this as well. Although the two are distantly related, one can't exactly say it runs in the family (Tenchi missed out on it altogether).

* Tenchi Universe, a Juraian agent orders the Galaxy Police to capture Mihoshi and Kiyone after Mihoshi was listening to a conversation between the agent and the Galaxy Police chief, revealing that the GP had conspired with Jurai in order to capture Ayeka.
* Tenchi Universe and can't remember the entire thing, Ryoko pretty much gets off scott-free until the smarter Kiyone comes along a few episodes later.
* Tenchi Universe, Ayeka is nerfed to the point where creating barriers is her big power set, surrounded by tiny logs that can also unleash a painful electric shock.
* Tenchi Universe endures constant humiliation due to being partnered with Mihoshi, who is the personification of a ditz.
* Tenchi Universe has a dark version of Tenchi's sword. It looks more like a large bastard sword in energy form than Tenchi's more Katana like blade.
* Tenchi Universe is black with a red outline to contrast Tenchi's, which is blueish white.
* Tenchi Universe: It has its own section of the fanbase, while the critics and a lot of the fans consider it inferior to the original. Probably because of the changes in the characters.
* Tenchi Universe: Kagato had somehow ascended to the throne and framed the princesses Ayeka and Sasami for treason. Ryoko, already a criminal, was tossed into the mix for just being there; Tenchi, his father, grandfather and Washu were dragged in for breaking the girls out; and Mihoshi and Kiyone were dragged in for trying to help them.
* Tenchi Universe KAIN killed his mother and stopping KAIN before he can do so.
* Tenchi Universe, Mihoshi pilots a suit like this to chase down Ryoko. She does quite well the first time before Ryoko destroys it. When Kiyone enters the fray and gets Mihoshi to pilot a second, that goes out the window in an instant.
* Tenchi Universe Nagi shows up and wins it. However, as they escape, Ryoko swipes the money anyway, adding to their problem!
* Tenchi Universe Ryo-Ohki is in love with Ken-Ohki, a cabbit who belongs to bounty hunter and Ryoko's worst rival, Nagi. It's their love for each other that's keeping Ryoko and Nagi from killing each other.
* Tenchi Universe), she tried to say no, but the producers insisted that she try, believing that she actually could sing some since she was a capable vocal actress. Burchard hesitantly agreed to give it a shot, and she was given the song and told to practice. She did, but when it came time to recording, she nervously made the entire production staff sit as far back in the room as they could. They started recording, and the staff let Burchard get about half-way through the song before they finally believed that she couldn't sing. Diane Michelle ended up singing the final song.
* Tenchi Universe shows his mom Achika pulling more out of it by elongating it to the point where she could cleave the monster KAIN.
* Tenchi Universe. Since Mihoshi isn't exactly the brightest bulb on the tree, she can't remember the rest, thus making any attempts to take Ryoko prisoner risks violating her rights, leaving Ryoko free to crash at Tenchi's place without fear of arrest.
* Tenchi Universe - the creature KAIN had killed Tenchi's mom in 1976 and the gang has to go back to stop him.
* Tenchi Universe there is also Ken-Ohki, a white cabbit able to also transform into a spaceship.
* Tenchi Universe to successfully escape the Galaxy Police. After they recovered the stolen Yagami from two wannabe outlaws, Washu had Kiyone fly directly into the supernova, and on Washu's cue, Kiyone activates the engines upon reaching the supernova's surface, and they managed to take off at a high speed, safely away from the GP fleet.
* Tenchi Universe to this to Ryoko surviving all in the course of three episodes.
* Tenchi Universe, two teens steal Kiyone's ship in an attempt to become this. Too bad for them, the ship's rightful owners are on the galaxy's Most Wanted List...
* Tenchi Universe where Mihoshi tries to read Ryoko her rights. However, Ryoko destroys the device holding the rights and since Mihoshi isn't the brightest bulb,

Ryoko pretty much goes free because just arresting her would violate her rights.
* Tenchu 3: Wrath of Heaven. Ayame overhears a villain telling a woman "what a nice pair you have, but let me show you mine!" They are talking about poker.
* Tenchu. After tracking down the evil ninja you're pursuing... he declines to fight. His mistress, an untrained geisha with a dagger, instead confronts you. It may be possible to lose if you stand there, have almost no health left, and let her stab you, but you can kill her with one throw.
* Tenchu fans have been at war since the beginning on whether Ayame and Rikimaru are just partners, clan brother and sister, or secret lovers. The extra futon in what certainly LOOKS like Rikimaru's house in Tenchu Z suggests the latter.
* Tenchu features the doctor character Tesshu. While other characters use bladed weapons for their stealth kills, Tesshu uses only his fists, so how is he going to kill someone quietly? Well, by either jamming both hands into their back, pushing his whole fist into the bottom of their spine, breaking both arms and then their neck while watching them stagger, or even the truly ridiculous plunging his hand into their chest and pulling out their heart, then squishing it. About the only thing he does that is even conceivable is jab a needle into their neck and hitting vital nerves.
* Tenchu game operates like this. Only by playing through multiple times can you get the full story.
* Tenchu games, most enemies are simply different texture swaps of the same weapon moveset with only extra hit points. In the first game, for example, the weak Ronin and Rouban from early stages, the stronger Footsoldiers and Patriots in the middle and the end-game Manjisou and Shikabane Soldiers are all simply the same "sword/katana" set with more hit points.
* Tenchu games take place at night because it was easier on the PlayStation's processor.
* Tenchu has a set of three joke dubs (one per each character) that you can unlock, Rikimaru is after the jewels to get women, Ayame is trying to stop men from using the jewels, and of course Teshu is a homosexual chasing after a former lover, leading to one of the funniest lines: "you forgot to put the toilet seat up".
* Tenchu has done this a few times, having a boss who wields both at the same time. Usually he's a pretty horrible and limited swordsman, but if you don't kill him quickly he can open up some powerful combos on you with both the gun and sword.
* Tenchu introduced a new character named Tesshu who operated as a doctor by day and vigilante assassin for hire by night, making extensive use of his medical knowledge to make him a more effective killer.
* Tenchu is a field of M1 Garand rifles planted barrel-first on the ground with helmets perched on them.
* Tenchu is apparently an ordinary, hand-swung version — but nonetheless shares all of the features of the Grappling-Hook Pistol, including the ability to almost instantly pull you to the anchoring point. Must be a ninja thing.
* Tenchu, Lord Gohda is engaged in a swordfight with his uncle, who has led a revolt against him, and ends up knocking his uncle's sword away. Of course, being the good and noble lord, Gohda hesitates and lowers his weapon. His uncle then repays this kindness by pulling out a gun and shooting him. It is then that the player-controlled Rikumaru steps in, cuing a boss fight. After the fight, the trope occurs again, with Rikumaru poised over the uncle. Of course, being a ninja, Rikumaru slashes, but Gohda leaps in and takes the slash to his back. The uncle, touched by this, proceeds to scamper off and kill Gohda's wife and kidnap his daughter. Nice guy.
* Tenchu on the Wii and PSP, which ended up being the final game in the series.
* Tenchu: The Azuma village in part 2. Gohda castle got torched in parts 2 and 4.
* Tenchu: Wrath of Heaven in the second mission, Ayame effortlessly defeats two guards in tight quarters using just her blades, mostly while looking the other way. Since the game is primarily a stealth game, it is very difficult to fight multiple enemies without using special equipment like smoke bombs, grenades, or super shuriken.
* Tenchu, you can use this to become invisible in the water, which is slightly

jarring as the water is depicted as crystal clear.
* Ten Commandments done was create a sword for the specific use of Shiba, Haru's predecessor, which in its more powerful forms, would not work properly, if at all, when Haru himself tried to use them. The Ten Commamdmemts was eventually reforged so that Haru could use its full power.
* "Ten Commandments of Health" is a parody of "Ten Commandments of Love" by The Moonglows.
* Tenctonese cuisine is at its best when mimicking Earth food. Peanut butter and jellyfish anyone?
* Tenctonese like their meat raw, as they can't metabolize cooked meat.
* Ten Dead Men, producer Phil Hobden also plays Stone: one of the ten men protagonist Ryan is out to kill. Additionally, Hobden did his own driving in the scene where Stone is competing in a motor race.
* Ten Dead Men, Ryan grabs one of Franklin's thugs and uses him as a shield to soak up the bullets from the rest of Franklin's gang when he storms the tower where the Projects Manager is holed up.
* Ten Dead Men, Ryan kills Keller with a masonry hammer the Projects Manager had brought along as one of his torture tools. Later, one of Franklin's thugs attacks Ryan with a sledgehammer.
* Ten Dead Men: Ryan pours petrol over Franklin's sentry from the top of the tower. When the poor mook looks up to see where the liquid is coming from, he sees Ryan toss a lighted match down on top of him.
* Ten Dead Men, Ryan takes a souvenir from each of the men as he kills them. Most of them are body parts.
* Ten Dead Men, there is an extended sequence of Ryan gearing up before he storms the tower where the Projects manager has holed up with Franklin's gang. Viewers now learn that holdall Ryan retrieved much earlier in the film is filled with military grade hardware. And every weapon he takes from the bag gets used in the ensuing firefight.
* Ten Dead Men uses an electric drill to bore into Ryan's knee while he is torturing him.
* Ten Dead Men. When Axel tries to call his friend, not realising that he had fallen into the Project Manager's hands, all he can hear is some inarticulate gurgles. The Projects Manager them speaks into the phone and apologises that his friend couldn't speak more clearly, but he had just had his jaw removed. He then sends Axel a picture to prove the point.
* Ten Deadmen when it is time to transport him to the rest of the gang.
* tended to concentrate only on one kind of troop, resulting in the Samnite infantry-only armies and the Greek unsupported phalanxes being outflanked by cavalry, Parthian cavalry-based armies being unable to fully take on the Roman combined infantry-cavalry formations once the Romans adopted Parthian-style cavalry, and so on, with Rome's greatest opponents giving them trouble because they too had a similar approach (Hannibal's army included a heavy infantry phalanx, skirmishers, and a formidable cavalry).
* Tended to lose her clothes a lot as Miss Texas in the USWA in Memphis.
* tendencies come from being an actual child (later teenager) running around in the body of an unkillable 30-year-old.
* Tender Is the Night (1934) is set in France, but mostly portrays Americans of the era.
* Tender Is the Night. Largely to justify her bizarre behaviour and highlight the fractured nature of Dick Diver's life.
* "Tender Kisses" involves Carl having Urkel reading diaries of Harriet, fearing she's cheating on him, only to find out that Harriet wrote a fake diary, to elicit a response from Carl, and to test his trust for Harriet.
* TenderMilitary use freighter that can be used to extend the range of a fleet by carrying extra supplies (i.e., food, ammunition, fuel, etc.), or travels to a pre-planned rendezvous point to resupply it out in the field. Obviously they won't always be seen, because a fleet will tend to try to operate within its normal range, but occasionally it may need to go beyond those limits, at which point a

Tender becomes invaluable.
* Tender Tomboyishness, Foul Femininity and my partner is vain and full of herself.
* Ten Desires, and, second, you automatically use it if you die. This essentially means that you're denied from using a powerful attack as an actual attack, you need to memorize the best places to use it, and dying generally throws off your rhythm for around a stage.
* Ten Desires, even if the card in question isn't even in that character's version of the stage.
* Ten Desires, except that spreading Buddhism across Japan was only used to control the people, while "he" secretly pursued immortality through Taoism. Oh, and "he" was actually a girl.
* Ten Desires jiangshi/kyonshi in Yoshika Miyako; she is, however, presented in a way more reminiscent of an American zombie. Justified because of how much more common the typical zombie interpretation is, and Gensokyo literally runs on fantasy (although she is unable to bend her arms).
* Ten Desires, which fills the whole screen with nothing but creature bullets.
* Ten Desires who resurrected three days after his execution", acknowledging that the Abrahamic religions do exist outside of Gensokyo.
* Tendi considers P'jok (who doesn't appear onscreen) to be a snack, and she imitates the clawing gesture of a feline to further accentuate how "tasty" he is: "Meow!"
* Tendies Stories who terrorizes his family into giving him "tendies" (chicken tenders) in exchange for "good boy points" and tends to do horrific things when he doesn't get his way.
* Tendon Levey and the oversized, blood-stained honey dipper ("The Bloodydipper") which receives numerous mentions throughout his work and appears on a couple of his album covers.
* Tendril is the sole survivor of a dog attack. Her parents and nine siblings were all mauled and torn to pieces.
* Tends to be averted by the Eldar, who see this tactic as an act of barbaric cowardice. They also dislike it because they're already on the verge of extinction themselves, even though they believe that their racial demise will awaken the death god Ynnead, who will destroy Chaos forever and play this trope straight.
* Tends to be inverted with Bra and Panties matches. When the woman is stripped to her underwear, the villainous woman will be hugely embarrassed and try to cover herself up while the fan favourite will not be and will proudly show off her body. And if she wins the match (by keeping her clothes on) she'll usually remove her clothes anyway.
* Tends to be used by children when they need to make a surprise, in order to make the other child think they got a huge gift. Alternatively, they just got lazy/bored and put a small box in a shoebox.
* tends to fall on deaf ears. of Korra, in which numerous non-benders are given the power of Airbending and Tenzin is able to bring the Air Nomads back from the brink of extinction.
* tends to fight by imbuing both his magic and will into the earth around him to create living constructs. Not only do they reform into different constructs when broken, but a lot of dark magic tends to linger on things they hit, so for example a stone leopard can leap through a mist of dark magic and attack the caster, causing them to suffer the effects of said mist.
* Tends to handwave away the issues with a human shrinking to ant size, or even to subatomic size, with "Pym particles", though the suit needs to be closed when shrinking to avoid becoming a blob of undifferentiated tissue. Shrunken characters also retain their original strength, but it's inconsistent as to whether their mass is changed.
* Tends to happen in any fanfic, as the author will often put their favorite character(s) to the forefront, at times leaving the main character in the background or not even in the story at all.
* Tends to happen in any situation where one or both sides do not respect the red cross symbol. Notable historical examples include the German and Russian armies in

* Tends to happen in arguments (especially on the internet) where one or both sides aren't entirely sure what their
* Tends to happen in many nature documentaries, particularly if the behavior or animal is rarely seen or unusual.
* Tends to happen rather spectacularly every time PCs are permitted to be actually
* Tends to happen to the Dunphy children frome time to time. Luke and Alex missed quite a lot of episodes in the early seasons. Some fans suspect that their respective portrayers, Nolan Gould and Ariel Winter, were subject to child labor laws since they were under fourteen at the time.
* Tends to happen towards the end of any version of the Blue Knight saga in
* Tends to happen when you start using spells with the "Evil" descriptor in
* tends to prioritize coddling the bullies than helping their victims was hurting so long as she didn't do anything that threatened the illusion of 'peace' in their class.
* tend to attract the attention of the Fair Folk while granting no real defense against them.
* Tend to be more prominent in matches where the good guy actually loses to the monster heel - with one of the best examples ever being the famous
* tend to conspire to force him so it's possible he doesn't reject the change so much as he just hates himself.
* tend to have this persona as well, communicating with their spotters and delivering long-range fire after a calm "Send it."
* tend to prefer big, heavy weapons if in a modern/futuristic setting).
* tend to slide to the background likely got over half the screen time. The two are also used front and center in a disproportionately large amount of fillers in relation to the rest of the cast.
* tend to weigh the birds down when they're flying). The base stats for both sexes are exactly the same.
* Ten Earth Shattering Blows a special kind of bug, crushed and snorted, has an effect akin to cocaine.
* Ten Earth Shattering Blows there is a different type of mount for every country. Vezenians rides giant boars, people of the desert ride giant lizards.
* Tenebre, who murdered a girl in his youth to vent his sexual frustrations, and starts killing again when the new murders awaken his bloodthirst.
* Tenebre with Anne. The film does not initially follow her as the main protagonist, but there does come a point where she becomes the only person left for the audience to identify with and she ends up being the last one left to take down the killer, albeit accidentally.
* Tenebris mercilessly killed a couple of brilliant inventors who provided the rebellion with weapons, but they couldn't summon up the resolve to eliminate their baby and ended up giving her up for adoption. This actually is of some use to the plot, as the baby grows up and comes back for revenge.
* Tenel Ka prefers to have his arm replaced, he always keeps in mind this is a step in direction of Vader - "half human, half machine".
* Tenement Symphony, and did not raise any objections, though he did later say he felt like "a guest on his own record".
* Tenerife Airport Disaster, in which two jumbo jets collided with each other, killing 583 people, was a fog so thick that planes on the runway couldn't see each other, nor could the air traffic controllers in the tower see anything on the runway.
* Tenet - acid. A science fiction spy film, The Protagonist (he really is called the Protagonist in the film) journeys through a twilight world of international espionage on a mission that will unfold in something beyond real time. This involves inversion, which is progressing backwards in time.
* Tenet along with Reflective Vest of Authority (ironically just when the Protagonist comes up against a door he can't get through).
* Tenet: An "inverted" person moving backwards through time who touches their past self will cause both their particles to self-annihilate, so it's recommended for those who invert to wear fully enclosed clothing covering every inch of skin. This

causes the heroes at times to not recognize their future selves or allies.
* Tenet during the airplane heist, the crew uses chloroform rags and the security go immediately unconscious.
* Tenet features a twist on this: the Protagonist sees a wall with bullet holes and holds a gun up. Since the bullets are moving backwards in time, they reverse-fire back into the gun. This is weaponized later when Sator holds a hostage in front of a bullethole, until time reverses to the point where the bullet goes through their body into his gun.
* Tenet has the freeport system being used in this way by Andrei Sator. Assets such as art can be stored indefinitely in a secure warehouse in an international airport without the client having to pay import duties. It's explicitly compared to the Swiss banking system.
* Tenet. Inverted when the Protagonist explains to Neil what's going on.
* Tenet, seemingly for the no reason other than there needs to be a Protagonist.
* Tenet that, when combined with interlacing the fingers, identifies members of the eponymous organisation to each other.
* Tenet, the opening sequence set in Kiev was actually shot at the Linnahall concert hall in Tallinn, Estonia. Strangely enough, several other scenes shot in Tallinn were set there in the script, so this doubles as both an aversion and being played straight.
* Tenet to instantly acquire it even though the heroes could easily prevent this by just digging it up in whichever year between the present and the distant future they wish.
* ten forward facing torpedo tubes (by comparison, the larger US boats had six forward tubes and the German type VII and type IX U-boats, only four).
* Tengai Makyou by Chada (or Hiroi) or how the hell Chada got all these chronicles in the first place remains a mystery for everyone.
* Tengai Makyou': Suigetsu can summon paper shikigami to assist in combat; they stick around as extra party members, attacking automatically until they're 'killed'.
* Tengai Makyou, with a sign reading "King of Lake Tahoe" being reduced to "King Aho" after one of the villains is defeated.
* Tengai Makyou written by a P.H. Chada, a orientalist that worked at the Smithsonian Museum. In reality, Chada is a pseudonym for Ouji Hiroi, the real creator and author of the series.
* Tengen Toppa Gurren Lagann, although this might be because Simon neglected to howl "FINISHING MOVE!" before the attack.
* Tengen Toppa Gurren Lagann and attempting to function as a person and moving on. However, delaying in coping with his grief is unhealthy, taking a severe toll on his physical and mental facilities (it's implied that he has been neglecting sleep and not eating as much while also acting more aggressive). The lack of help from any of the team makes it worse. Simon is ultimately worked through the grief thanks to Nia's help and eventually finds the confidence to move forward once more.
* Tengen Toppa Gurren Lagann (and Gainax cranked the fanservice up in the movie).
* Tengen Toppa Gurren Lagann and Kamina. A Type 4 except most of his group came because of his sheer power of awesome. Kittan and Simon each get a turn with the magnet.
* Tengen Toppa Gurren Lagann and left on a landfill. She's completely oblivious to any kind of negative mood... which isn't a good thing when one of the cast members has just died.
* Tengen Toppa Gurren Lagann and otherwise perfect girl Nia, having just sampled the food themselves.
* Tengen Toppa Gurren Lagann, and that said insult was a response to the person facing her down, Adiane, telling her "You really know how to piss people off!"
* Tengen Toppa Gurren Lagann And the most fluidly animated scene in the series is a throwaway scene near the end of Episode 13 that's just Yoko and Simon looking at each other. The fluidity of the animation can be seen in their hair blowing in the wind.
* Tengen Toppa Gurren Lagann, and the series' theme in general: (Refer also to

introductory quote)
* Tengen Toppa Gurren Lagann And, to be honest, most of the stuff that is.
* Tengen Toppa Gurren Lagann answered questions from fans and, among other things, has claimed that Kamina is a virgin, Simon isn't, and Viral is a shark with feline genetics.
* Tengen Toppa Gurren Lagann appears to have a similar system in Ganmen. Simon describes it as grabbing the control sticks and the movements just come to his head... then it's never even mentioned again. Then again, Ganmen are Spiral-powered and it's entirely possible that they are controlled through the pilot's fighting spirit.
* Tengen Toppa Gurren Lagann are all named for the four chemicals in DNA, while Beastmen in general, as well as Lordgenome, all have a genetic-based name (Viral, for instance).
* Tengen Toppa Gurren Lagann are apt to find their robots powering down, which is ruthlessly exploited by the Anti-Spirals, using tactics designed to induce fear and despair to try and shake that confidence.
* Tengen Toppa Gurren Lagann are Spiralists, or sometimes Spiral Warriors.
* Tengen Toppa Gurren Lagann, as mentioned, is replete with Egregious Delays but also has plenty of Expository Delays and Shoe-Drop Delays. There's also a couple of deja vu delays in episode 8. Bring your own Kleenex.
* Tengen Toppa Gurren Lagann, as soon as Simon beats Lordgenome, all of the Beastmen's Gunmen instantly power down.
* Tengen Toppa Gurren Lagann as the laws of the universe, instead of the regular, boring laws of physics.
* Tengen Toppa Gurren Lagann as they are the ones who caused him to drive the humans underground.
* Tengen Toppa Gurren Lagann: A timid boy granted the key to a unique mecha grows into a hero who will liberate humanity from its oppressors through sheer willpower and passion.
* Tengen Toppa Gurren Lagann, At the Battle of Teppelin in episode 14. Dai-Gurren is about shot down by Cytomander, when a barrage slams into them from another direction. Cut to a huge army of lesser battleships and mecha, all hijacked by people from various villages who saw and heard of Team Dai-Gurren’s battle. This leads to a shot of the entire army arrayed and heading into battle against Teppelin’s forces.
* Tengen Toppa Gurren Lagann be referred to as "Kamina shades", no matter what character wears them.
* Tengen Toppa Gurren Lagann better, because while the Grapearls were the more advanced and were based in Gurren Lagann's specs, they were unable to use Spiral Energy, while the Gunmen had been designed specifically to fight that particular enemy. It was particularly demonstrated when a Mugann attacked Kamina City for the first time. The machine destroyed several Grapearls, while they were unable to harm it in the slightest, but when Simon and Gurren Lagann arrived, they managed to destroy it with some difficulty.
* Tengen Toppa Gurren Lagann. Both sides are powerful enough to use galaxies as mechas.
* Tengen Toppa Gurren Lagann, but is rational enough to walk away from a fight once he's exhausted every other option. This is the principal difference between him and Kamina. However, this isn't always a good thing. When Kamina and Simon were first fighting Thymilph, everyone was trying to convince them to retreat, before Simon himself points out they may need to this one time. However, Kamina (correctly) points out that they can't. If they did, they would be putting the others in danger because they'd be chased. This ends up with Simon taking advantage of a cliff to sink the Dai-Gunzan and win them the battle.
* Tengen Toppa Gurren Lagann, but looks like he's 10. Other characters his age have more realistic heights. He just has stunted growth.
* Tengen Toppa Gurren Lagann, but right at first they just stick around and watch the grownups do their thing.
* Tengen Toppa Gurren Lagann by Lordgenome. Since they're apparently not making any

more Beastmen, they'll eventually all die out (except Viral, because he's immortal) unless Beastmen have access to the cloning technology that Lordgenome used in the first place.
* Tengen Toppa Gurren Lagann, causing Yoko to look at the camera momentarily and wonder aloud where he gets his confidence. This is immediately lampshaded by panning out to show that she was talking to thin air.
* Tengen Toppa Gurren Lagann claims this is enough dakka, but is proven wrong as the movie adaptations contains even more dakka.
* Tengen Toppa Gurren Lagann completely averts it with the last major transformation of the series, which takes about one episode while all hell is breaking loose around.
* Tengen Toppa Gurren Lagann, converting it into enough spiral energy for the heroes to turn the tables on the Anti-Spiral.
* Tengen Toppa Gurren Lagann costumes. Reportedly, they've got one with Nia in the works, too.
* Tengen Toppa Gurren Lagann doesn't tickle your fancy, then maybe brawling out in a galaxy-sized mech against a similar enemy mech will...
* Tengen Toppa Gurren Lagann. Early in the series, Simon functions as the GIB while Kamina does the heavy lifting; but as the series progresses, Simon becomes the main pilot, while the role of the GIB changes from time to time.
* Tengen Toppa Gurren Lagann, episode 10, Kittan does this when Nia, whom he is interrogating under the impression that due to being Lordgenome's daughter she is an enemy, asks what "enemy" means.
* Tengen Toppa Gurren Lagann episode 11 contains a number of flashback-type sequences which resemble elaborate paper cutouts.
* Tengen Toppa Gurren Lagann, especially as it goes on (though the Parallel Works are Level 0).
* Tengen Toppa Gurren Lagann fandom has not insignificant sect of Simon/Kamina shippers, who call each other their brother. While it's a little ambiguous whether the characters actually are related, they're certainly close enough that it probably doesn't matter.
* Tengen Toppa Gurren Lagann first meeting. She comes down through the roof, firing at the enemy gunman, and he's instantly attracted to her. When he starts flirting, Yoko's baffled that he isn't running for his life instead.
* Tengen Toppa Gurren Lagann. Fortunately for them both, Simon can fulfill both.
* Tengen Toppa Gurren Lagann gained a lot of buzz through (bootleg) fansubs, U.S. licensee Bandai made the controversial decision to push out a sub-only DVD release as a stopgap rather than wait for an English dub to be complete and possibly lose business to piracy. They did eventually release a version with a (very well-regarded) English dub some time later.
* Tengen Toppa Gurren Lagann gets rammed by the Dai-Gurren and ends up having not only his ship fall, but a large amount of his minions with him.
* Tengen Toppa Gurren Lagann, gets some distracted students' attention by throwing a chalk so hard it gets embedded in the wall.
* Tengen Toppa Gurren Lagann had twelve-inch guns as well as a hangar for Team Gurren's Gunmen.
* Tengen Toppa Gurren Lagann: happens to the Spiral King in the prologue/parallel works.
* Tengen Toppa Gurren Lagann has elements of Trick Shot and Vaporizer. She carries an over-sized, high-energy sniper rifle with her wherever she goes..
* Tengen Toppa Gurren Lagann has explosions going even further over the top than the show takes most things. The very first thing you see after the opening credits? A galaxy blowing up. It sets the tone quite nicely.
* Tengen Toppa Gurren Lagann has had a number of extra animated shorts and side episodes produced for release on DVD sets or bundled with other products, including 15 "Parallel Works" music videos, a 12-minute episode bundled with the DS game, a video manga called "Viral's Sweet Dream," and a director's cut version of episode 6.
* Tengen Toppa Gurren Lagann has, just like its smaller forms, a Spiral Power gauge

installed. Now, at the start of the series this goes from blank to filled with a spiral of blue light, depending on how much Spiral Power the user is generating at the time. Later, this isn't enough, so the blue spiral is overlaid with a green one once it has been filled. During the final battle, the mecha eats a Big Bang and converts it to Spiral Power — the gauge goes from blank, through blue, through green, then a rainbow color which quickly fills up the spiral, breaks the glass, and continues on into the empty air!
* Tengen Toppa Gurren Lagann has more than enough for the both of them.)
* Tengen Toppa Gurren Lagann has the entire cast fighting for the universe... in a robot large enough to use galaxies as weapons, which they do quite often. It's implied that the universe they fought in may have been created by their own warping power, and so nobody was actually in trouble. It may also be a pocket dimension that serves as the Anti-Spiral's home universe.
* Tengen Toppa Gurren Lagann has the human villages deep underground. The planet's surface is overrun with monsters, and humanity has hidden away for so long that most of the people in Kamina's village question whether the surface actually exists.
* Tengen Toppa Gurren Lagann has the major theme of accepting and moving on after death. While a good value in real life, this might not be as good in a world where resurrection is possible.
* Tengen Toppa Gurren Lagann has this in the form of the "Multiverse Labyrinth". The underlying philosophical purpose, according to them is that the dimensional labyrinth recognizes the possibilities entertained by its victims, turning them into reality. As long as they are able to imagine alternatives, one can never escape from it, thus preventing the victims from utilizing spiral energy in the process.
* Tengen Toppa Gurren Lagann he also uses it to escape from a prison and climb a mech that is holding Nia hostage.
* Tengen Toppa Gurren Lagann, he's 18 years old and effectively a mature, well-versed leader in battle. Government, however, is another story.
* Tengen Toppa Gurren Lagann, he's actually on the verge of following Darry's example from the previous episode and breaking down in tears.
* Tengen Toppa Gurren Lagann, his name is pronounced like the normal, masculine Simon.
* Tengen Toppa Gurren Lagann homage, but is full to bursting with others. There's a reason why people have said that the show parallels trends in the mecha genre:
* Tengen Toppa Gurren Lagann, humans are called Spirals in the end. This term also encompasses all humanoid races that can use Spiral Energy.
* Tengen Toppa Gurren Lagann idea: drop-kicking Viral's Enki in the face.
* Tengen Toppa Gurren Lagann: In a manner of speaking—the daughter of Dayakka and Kiyoh is born with a full head of hair and generally looks many months old from the first.
* Tengen Toppa Gurren Lagann in a mech. Problem is he can never win a fight on his own, and is constantly getting saved by Simon.
* Tengen Toppa Gurren Lagann in order to fulfill her last wish to make the world bloom with flowers.
* Tengen Toppa Gurren Lagann) in the first half of the series, and on the building-mounted screens apparently all over the place in Kamina City in the second half.
* Tengen Toppa Gurren Lagann in the movie edition, where the titular mech pilots Super TTGL, which is the size of several galaxies (TTGL makes up about the size of Super TTGL's head).
* Tengen Toppa Gurren Lagann is actually shorter than most of the adult characters in the series. Its purpose is to take control of and combine with larger mecha, though it can fight on its own.
* Tengen Toppa Gurren Lagann is essentially a continuous series of Ham-to-Ham Combat scenes, with all moments of Kamina and Viral together on screen automatically topping the list.
* Tengen Toppa Gurren Lagann is joined by an entire army of humans in stolen Gunmen. Naturally, they're all Badass. Especially the scene where the entire force

rallies around the Dai-Gurren and they take off into a huge melee.
* Tengen Toppa Gurren Lagann is kind of a roundabout case, where it's revealed near the end that Boota's most precious wish was to have a humanoid form so he could be more helpful to his friends.
* Tengen Toppa Gurren Lagann is pastel blue and yellow in color, and the long hair running down her back resembles cotton candy in consistency.
* Tengen Toppa Gurren Lagann is pretty much based around providing this sort of motivation to the other characters. Hell, this could be considered basically the entire message of the series, seeing as all the incredibly awesome stuff they accomplish is caused simply by daring to be badass.
* Tengen Toppa Gurren Lagann is the chief mechanic for team Dai-Gurren and is responsible for the majority of the upgrades to the mechs and the battleship.
* Tengen Toppa Gurren Lagann is tied around the hilt for good measure. More swords are planted alongside Kamina's in the series finale for the members of Team Dai-Gurren who had died by that point, along with Nia's Wedding Ring.
* Tengen Toppa Gurren Lagann. It's bulletproof, too, if the first movie is to be believed.
* Tengen Toppa Gurren Lagann. It's just the nature of his character that he's most effective as a spiritual paragon.
* Tengen Toppa Gurren Lagann It turns out that Simon is the main character.
* Tengen Toppa Gurren Lagann. It went from the 50 ft tall variety in the beginning all the way to the size of a galaxy! What can you do when your opponent is also that size? Obviously you throw galaxies at them. Super Tengen Toppa Gurren-Lagann is stated to be roughly 3,5% of the size of the observable universe. Its only weapon? A huge energy-drill that's 10 times bigger than the thing itself. The Anti-Spiral counters by growing to 3,5% the size of the observable universe and wielding a 10 times as big drill... Yes, the final battle has over 77% of the observable universe occupied by mecha and their weapons!
* Tengen Toppa Gurren Lagann. Justified in that the Gurren Lagann can spawn drills from any part of it's body.
* Tengen Toppa Gurren Lagann, Kamina is thrown in the village lockup after trying to break out. He chills in the jail for a while until Simon shows up and says he found something interesting. At that point he casually snaps his wrist restraints and walks out.
* Tengen Toppa Gurren Lagann, Kamina proceeds to give the two one of these.
* Tengen Toppa Gurren Lagann: Leeron uses a number of small, quadrupedal robots to scan things.
* Tengen Toppa Gurren Lagann, Leite. They even have three kids together.
* Tengen Toppa Gurren Lagann makes this a literal thing: Spiral Power is generated by one's fighting spirit so as long as a member of the Spiral Race (aka humans) have hope, they can and most likely will win.
* Tengen Toppa Gurren Lagann, making this their first real appearance in the movie. "Unintentional" because this same line is present in the original series (which devoted an entire episode to meeting Kittan), but in the movie, it's made funnier.
* Tengen Toppa Gurren Lagann marry right after the Anti-Spiral War, as an example of the third type.
* Tengen Toppa Gurren Lagann mecha to Gurren Lagann with the same abilities and then some, the fact of which he uses for taunts.
* Tengen Toppa Gurren Lagann moments later in the series with Yoko, who is stated to be the favorite character of Atsushi Nishigori, the show's animation director.
* Tengen Toppa Gurren Lagann moments to top it off. In contrast, passive Simon and sweet Nia fall in love very easily.
* Tengen Toppa Gurren Lagann movie, Yoko pulls a pistol out of her hair while fighting Adiane.
* Tengen Toppa Gurren Lagann Nia at one point. It sucks to be a cute prepubescent girl in a world where apparently everyone got really skeevy because of the apocalypse...
* Tengen Toppa Gurren Lagann Nia back to life if he so chose but does not so as not to destroy the universe.

* Tengen Toppa Gurren Lagann Of course, since this is TTGL all it needs is some hot blood and a few drills to deal with the problem.
* Tengen Toppa Gurren Lagann of sorts, which comes off as a rather insulting fate for someone who saved the entire human race from extinction. And the Spiral Nemesis, the thing the Anti-Spiral were trying to stop from happening is still a potential risk that has a very real chance of transpiring and destroying everything. For such an idealistic series, the ending can be especially jarring.
* Tengen Toppa Gurren Lagann of the first arc, Lordgenome, is so badass that he exists in a constant state of Pastel-Chalked Freeze Frame. Except it averts the "Freeze Frame" part.
* Tengen Toppa Gurren Lagann on the side of Enlightenment. The ethos of the series having a very strong belief in the idea of progress and the ultimate perfectibility of the human (and beastman?) condition. The heroes may have "kicked logic to the kerb", but only with the aim of creating their own logic that works for them against all attempts by the anti-spirals to make them regress back to the level of barbarism; vehemently rejecting the idea that you can't evolve and progress without destroying yourselves. After the end credits, humanity - in league with several other species - is shown to have created a near-utopian society and on its way to show the universe itself who's boss.
* Tengen Toppa Gurren Lagann or he doesn't want to accelerate the death of the universe by using more Spiral Energy.
* Tengen Toppa Gurren Lagann, other characters (primarily Simon) start using it, culminating with the entirety of Team Dai-Gurren shouting it at the same time when the Tengen Toppa Gurren Lagann first appears.
* Tengen Toppa Gurren Lagann over her left eye and is intensely hot and impulsive, often letting her anger get the better of her and land her in sticky situations or taking out her frustrations on Viral.
* Tengen Toppa Gurren Lagann physically use a phone, just that she's not near hers at the moment.
* Tengen Toppa Gurren Lagann pilots find themselves seriously bored with their desk jobs.
* Tengen Toppa Gurren Lagann, plays this straight with its main character, Simon. Specially the first arc, where it's pretty much the whole point of the story.
* Tengen Toppa Gurren Lagann powers is literally the crux of the entire plot.
* Tengen Toppa Gurren Lagann (pre-time skip) is the same as Starfire mentioned below.
* Tengen Toppa Gurren Lagann quite frequently do the impossible, he's literally the best Gunmen pilot there is.
* Tengen Toppa Gurren Lagann: Realising that tremors caused by the Beastmen-piloted Ganmen led to his parents' deaths enrages Simon into fighting them instead of running away.
* Tengen Toppa Gurren Lagann respectively, resulting in the two shows combined being a tough act to follow for the mecha genre as a whole — in the decade since, no mecha show has managed to approach the popularity of either series.
* Tengen Toppa Gurren Lagann robot alike, but especially super. It's almost allegorical — view the page for details. (Warning! Spoilers!)
* Tengen Toppa Gurren Lagann: Rossiu, known by Kamina as "Dekosuke": "Forehead Boy."
* Tengen Toppa Gurren Lagann sends a huge wave of what looks like water at them.
* Tengen Toppa Gurren Lagann. Several characters explicitly compare Kamina to a volcano.
* Tengen Toppa Gurren Lagann's four arcs ends this way. The "castles" of the first three each become the good guys' headquarters for the next arc.
* Tengen Toppa Gurren Lagann's head sealed within a tube and plugged to the computers.
* Tengen Toppa Gurren Lagann short "Viral's Sweet Dream" is pretty much all about Viral's issues with this.
* Tengen Toppa Gurren Lagann should've been called "Steve Blum Somehow Manages to Make Leeron Even More Gay and Creepy Than He Already Was".

* Tengen Toppa Gurren Lagann. Simon and Kittan also show signs of this, although Simon doesn't become the official leader until Team Dai-Gurren are done rebelling.
* Tengen Toppa Gurren Lagann, Simon becomes full of self-loathing, angry and blame for it. After a battle that results in Lagann not working because of his issues, he ends up in a canyon where a Gunmen throws a container away. Opening it, he meets Nia. Because Nia is pretty, nice to him, and seems to have no understanding on what a human is, all of that angst is forgotten and he goes right back to being a dork when the two get to know each other.
* Tengen Toppa Gurren Lagann. Simon leads an army of rebels to destroy the evil king that's forcing humanity to live underground. The mission is a success, the empire is destroyed, and everyone lives happily ever after... until it's revealed years later that the king was keeping them underground to hold off a larger enemy in space. Guess what happens next?
* Tengen Toppa Gurren Lagann, Simon learns to start standing on his own, becoming rather like Kamina in the process.
* Tengen Toppa Gurren Lagann. Somewhat unique in that Kamina, the parental figure, completely lacks embarrassment while discussing this topic and doesn't actually know anything about pregnancy.
* Tengen Toppa Gurren Lagann's Super Galaxy Dai-Gurren was the Moon for awhile (not a typo).
* Tengen Toppa Gurren Lagann stage early in the show, although she had hints of it from the beginning.
* Tengen Toppa Gurren Lagann take over the airwaves and announce their plans for Absolute Extermination.
* Tengen Toppa Gurren Lagann takes place in something called Super Spiral Space, the space outside the galaxies, where "recognition is given real form". In other words, whatever they imagine exists, exists. Ergo: Your mind makes it real.
* Tengen Toppa Gurren Lagann than they did in the original series. The best example is probably Lordgenome, who goes from saying "OVERLLOOAAAAD!" in the original series, to "OOOOOAAAVAAALOOOOWWAAHHHHDDDDAAAAH!!!" in the second movie.
* Tengen Toppa Gurren Lagann that didn't air on television, where Kamina and Simon try to see the girls on the other side of the wall and Gimmy is confused by their order to "find a hole".
* Tengen Toppa Gurren Lagann that Kamina is considered crazy by his entire underground village for believing that humans once lived on the surface of the Earth. At the beginning of the series, some villagers are skeptical that a surface actually exists.
* Tengen Toppa Gurren Lagann that make up the Multi-Dimensional Labyrinth are created the instant they are perceived.
* Tengen Toppa Gurren Lagann that she used to deflect a bullet, but before she can get the finishing shot in, Adiane cuts her own tail off to escape.
* Tengen Toppa Gurren Lagann, the Arc-Gurren is used to house the population of Kamina City in space when the moon is on a collision course with earth.
* Tengen Toppa Gurren Lagann: The entire Gurren Brigade got once handcuffed with good ol' wooden boards, but that didn't deter Simon from digging with his Core Drill until recovering his Lagann.
* Tengen Toppa Gurren Lagann, The final battle between Team Dai-Gurren and the Anti-Spiral in the last few episodes takes place in space.
* Tengen Toppa Gurren Lagann. The Grapehippo is the director's favorite character.
* Tengen Toppa Gurren Lagann, the Gunmen are dropped in favor of the new Grapearls. It turns out that the Gunmen are still more useful against the Anti-Spiral proxies because they were designed specifically to fight them, as although Grapearls were based in Gurren Lagann's specifications, their pilots are unable to channel Spiral Energy through them.
* Tengen Toppa Gurren Lagann, the Gunmen were originally designed to fight Mugann, so they fare much better than their counterparts.
* Tengen Toppa Gurren Lagann, the humanoid shape is considered the best for using "spiral energy" making humans themselves the top level.
* Tengen Toppa Gurren Lagann. The main character also declares that if the odds of

success are "nearly 0%", they might as well be 100%.
* Tengen Toppa Gurren Lagann the majority of them don't have any talent for or interests in politics and they know it. Until there's ass to be kicked, they're content to just sit back and be figureheads for the ones who actually know what they're doing.
* Tengen Toppa Gurren Lagann, the mechanism behind this actually becomes a major plot point, as it also figures in a scheme to increase Jupiter's mass to the point where it could become a second sun.
* Tengen Toppa Gurren Lagann... then hurriedly tries to correct herself.
* Tengen Toppa Gurren Lagann; the old stock footage was used, so the wings vanished for that one move. Also, it is pretty obvious that the stronger Gurren Lagann mechs are vectored over the original footage for their Giga Drill Break attacks.
* Tengen Toppa Gurren Lagann, the original Gurren Lagann is a fusion between two machines called Gurren and Lagann.
* Tengen Toppa Gurren Lagann. There's also one recurring background member of Team Dai-Gurren (the wiki calls him "Old Coco") who is like this, although his skin tone is closer to a black person's than Lordgenome's is.
* Tengen Toppa Gurren Lagann: There was a direct manga adaptation, a School-AU spin-off, and a different AU-manga coming out.
* Tengen Toppa Gurren Lagann. The second half reversed this, by having the good guys introduce more and more powerful mecha to kick the enemy's ass, most notably after Team Dai-Gurren goes to space.
* Tengen Toppa Gurren Lagann. They also explode into explosive geometric prisms when destroyed. Later, the Anti-Spirals graduate to using spacecraft shaped like hands (Hastagry) and feet (Pada) with human faces on their palms and ankles, with capital ships (Ashtanga) that are one gigantic mass of faces and arms.
* Tengen Toppa Gurren Lagann, they always give the most badass screams ever while fighting. WHO THE HELL DO YOU THINK THEY ARE?!
* Tengen Toppa Gurren Lagann. They do it with a really snotty attitude, too, which adds insult to injury. And the reason? Paranoia that too much Spiral Energy will create the so-called "Spiral Nemesis".
* Tengen Toppa Gurren Lagann, they find that wiping out whole hordes of Mugann is surprisingly easy.
* Tengen Toppa Gurren Lagann. This Simon, while similar in appearance, is a lot cockier and more violent then his kinder canon self.
* Tengen Toppa Gurren Lagann, though, taking them from their villages' names (Kittan Bachika, Rossiu Adai, Yoko Littner, Nia Teppelin).
* Tengen Toppa Gurren Lagann to enforce his rule, combining a basic human shape with traits of various animals. For instance, Viral is part cat and part shark. In addition to giving them whatever extra abilities would be useful, they are all sterile, ensuring that they cannot possess Spiral Power, which Lordgenome is trying to suppress.
* Tengen Toppa Gurren Lagann to stab Adiane's tail, pinning it into the floor.
* Tengen Toppa Gurren Lagann. To the disappointment of some fans, the movies were never dubbed.
* Tengen Toppa Gurren Lagann trope to mecha fans, a lot of them will remember the former for taking said trope as a massive plot point.
* Tengen Toppa Gurren Lagann veers sharply into drama after episode sixteen, presses that throttle down, and then abruptly releases it for the last three episodes... only to slam it back down for its ending. Viewers were sharply divided.
* Tengen Toppa Gurren Lagann was supposed to be this and carry a tale of victory forever after being granted immortality by Lordgenome, but victory for the beastmen there was not, presumably he becomes a Living Relic.
* Tengen Toppa Gurren Lagann. Well, he already held it upside down when using it as a hammer; but of course, it was pointing towards him then.
* Tengen Toppa Gurren Lagann when they immediately try another barrage - but this one penetrates the barrier and causes serious damage. This is an example of the Anti-Spirals rewriting the laws of the universe, basically, to make "the impossible possible".

* Tengen Toppa Gurren Lagann, wherein the entire cast is near-naked for most of the episode.
* Tengen Toppa Gurren Lagann, where Simon and Kamina hail from. Kamina steadfastly believes in the surface world, much to the dismay of the chief, who only believes its existence once Yoko and a Ganmen crash through the ceiling.
* Tengen Toppa Gurren Lagann, where this is practiced in villages, planets and entire universes.
* Tengen Toppa Gurren Lagann), whether in a mecha or not, even disregarding that he's in the middle of a heated battle, completely ignoring the enemy's presence, much to the annoyance of everyone (save Simon, Nia, or Kittan).
* Tengen Toppa Gurren Lagann, which allows them to kick reason to the curb and come up with a better solution than the cynical one.
* Tengen Toppa Gurren Lagann while fighting Viral. Viral dodges; Kamina expects to win the fight when Simon comes back again from behind, but Viral dodges the second attack as well. Mind you, the previous episode played it straight.
* Tengen Toppa Gurren Lagann, who's at least seven feet tall and densely muscular. Even more so with Thymilph the Crasher, first among his four generals and literal 800 Pound Gorilla.
* Tengen Toppa Gurren Lagann with Boota and Yoko returns to her isolated life as a teacher and later principal. Considering the overall messages, this is pretty jarring.
* Tengen Toppa Gurren Lagann with him, even while in the middle of combat.
* Tengen Toppa Gurren Lagann, with "short versions" inevitably following after he loses his audience.
* Tengen Toppa Gurren Lagann would much rather drill a hole through destiny in the most awesome and over-the-top way possible than submit to it.
* Tengen Toppa Gurren Lagann: Yoko tears her long skirt when she needs to rescue a child stuck in a tree.
* Tengen Toppa Gurren Lagann: You stole a giant robot, making you the most dangerous humans on the planet? Good idea; now we've all done the same in imitation! What, now you've learned to combine them and wield superhuman power? We'll all start doing that too!
* Tengen Toppa Gurren Solvernia which utilizes its slimy tentacles to strike them and seize them.
* Ten Golden Rules of Online Gaming portrayal of the average person playing an online shooter. Accurate, but not something you should aspire to.
* ten greater demons, of whom only Rushu survives (having made off with the others) to function as
* tengu) are often portrayed to be clever, but not particularly menacing (unless it involves blackmail).
* tengu as a Paparazza. It seems to extend to canon in Double Spoiler, where Reimu reveals she's developed several spellcards specifically to counter the camera.
* Tengu. Every potential mate is a failure. Ataru is a pervert, Mendo turned out to be too pathetic and cowardly, Ryuunosuke wasn't really a man like she thought and Rei seemed like the one until she saw he was really an idiotic tiger-cow.
* Tengu Man was BUILT just last year, but he was DESIGNED as an adult.
* Tengu: Mountain-dwelling humanoids which either have long noses or resemble crows.
* Ten has never been hinted at having had sex with anyone, but he's quite attractive, which causes him to unwillingly
* ten hours long was created as as way to protest the fees charged by the British Board of Film Classification, by way of forcing BBFC agents to literally watch drying paint for 607 minutes.
* ten identical copies of Fred walk through the Flintstones' yard and reacts by sniffing his bowl of dino food, upending it in disgust, and running to hide in his doghouse.
* Tenille Dashwood has fought the autoimmune disease psoriasis since she was fourteen years old.
* Tenille Tayla has always been a little eccentric but it has yet to be revealed

what happened in Florida to turn her into the bubble headed dancer we call Emma.
* Ten Inch Hero mentions this by name, though it's used in reference not to extreme manliness, but rather disgusting male habits.
* Ten Items Or Less Jolene Blalock) so they don't get sued by Paramount.
* Tenjho Tenge is reported to be entirely self-taught, but was able to defeat a powered up Shin Natsume in a fight.
* Tenjho Tenge of the series to try and use the resonance effect to awaken the supernatural abilities of every person in the entire world.
* Tenjho Tenge, poor Masataka, despite being one of the most powerful characters in the series spends several of the early volumes being walked all over and generally mistreated by people, even if he could have beaten them with both hands tied behind his back. Fortunately, he starts to gain the respect of other characters as the series progresses, to the point where it is being hinted that he may be the key to resolving the plot of the entire series.
* Tenjho Tenge would count as this. He's the sole black member of the otherwise Japanese cast.
* Tenkaichi Budokai gives him a capsule and tells him water is so plentiful in the region that he doesn't need to buy any at all: he can just fill the capsule at a nearby spring.
* Tenkaichi, including Frieza Soldiers, Saibamen, and Cell Juniors, which are appropriately unimpressive, with generic moves and poor damage.
* Tenkai Knights co-production between Shogakukan-Shueisha Productions (Japan) and the Canadian toy company Spin Master.
* Tenka Seiha There are still commentors who use her "opinions" as a basis to skip the show. (Of course, they could just be in on the joke.)
* Tenka Shunmetsu Kokyuudan (roughly, "Entire-Empire Instant Annihilation Shot") a giant heat ray capable of vaporizing mountains.
* Tenka's upper body is covered only by his short jacket, leaving his chest and
* Tenko and the Guardians of the Magic featured pop-singer-turned-magician Mariko Itakura, a.k.a. Princess Tenko.
* Tenko Chabashira from the same game is played somewhat more straight, despite being
* Tenko Chabashira is a rare case of the ambiguity being on the heterosexual side. Tenko gets flustered when complimented by Kaede and is clearly infatuated with Himiko, which Tenko herself outright confirms. Additionally, despite the fact that she
* Tenko Chabashira, Mahiru's Expy in the third game, is also made from someone who
* Tenko Chabashira's protectiveness over Himiko almost directly results in
* Tenko clearly has feelings for Himiko, who doesn't reciprocate. Tenko attempts to bond with Himiko throughout the game and becomes very concerned when Himiko starts preferring the company of
* Tenko is a BBC TV Series about an internment camp for women in the far east during the second world war.
* Tenko is similar to Kaede in that her open, straightforward personality makes her very ill-suited for lying and Korekiyo even mentions he knew she was lying about
* Tenko often gestures with her hands held flat and fingers straight together, since she's a martial artist.
* Tenkuu No Shiro O Moratta No De Isekai De Tanoshiku Asobitai to ask for a flying castle.
* Tenkuu Shinpan (High-rise Invasion) a girl wakes up in a world of skyscrapers where she witnesses the violent murder of a man by another man in a mask. She soon realizes that she is unable to make it to the ground floor of the buildings and must make her way from building to building via suspension bridges precariously built seemingly at random between the buildings. She finds the masked people are there to cause distress on the inhabitants and either push them to commit suicide by jumping or by murdering them if they fail to do so.
* "Ten Little Bullets" was originally Gavroche's death song, but the
* Ten Little Gall Force as actors making a movie. At one stage, they're shooting

the scene where Catty fries herself acting as the conductor for a broken power cable. Catty asks the director if he's sure the wire's not live, and the director shrugs, so she grabs the wire... and then the director activates it, electrocuting her for real. He seems thrilled with the "reality" of the scene.
* Ten Little Indians, she changed the ending so that Vera Claythorne and Phillip Lombard both survive. It's helped by the fact that there are different versions of the poem the murderer bases the killings on, with different endings (one of which sounds much cheerier than the "hanged themself" ending actually used in the original book).
* "Ten Little Injuns" and numerous adaptations. The original "Ten Little Injuns" began as a minstrel song written by Septimus Winner in 1868, and describes a group of 10 Native Americans (here called by the derogatory term "injun") and, as different events happen—most of them dying of various circumstances—eventually decreasing down to one. The lone survivor ends up married. Various adaptations involve anthropomorphic animals (usually for family-friendly children's adaptations, although several of the original 10 still die or disappear of ambiguous circumstances), teddy bears and dolls, people (most often soldiers), and — in the racial sense — minorities.
* Ten Little Murder Victims: A group of people are stuck somewhere. One of them is a killer, the rest are potential victims.
* Ten Little Murder Victims: A group of people ends up somewhere, one of them turns out to be a killer, and they must find out which one before they kill everybody.
* Ten Little Roosters and everyone would rather just go and hide somewhere and wait for the cleaning lady to come and unlock the door in the morning so they can all leave.
* Ten Little Roosters later revealed that Miles Luna was a red herring for just about every possible victim until the end.
* Ten Little Roosters makes him be able to survive a night with a killer.
* Ten Little Roosters members end up getting plucked off one by one by a mysterious killer. Only one survives.
* Ten Little Roosters trope, uses this trope with all save one dead by the end of the series.
* Tenma mistakes Harima for a kappa after he saved her cat from drowning.
* Tenma's crush on Karasuma, since she doesn't really know anything about him because he's
* Tenma's larger scale plan is a world where robots rule the world and who are ruled by Astro himself.
* Tenma Sukuna, a member of the Yatsukahagi, can use his Taikyoku Law, Malignant Tumor Apoptosis, to negate supernatural phenomena or directly crush any supernatural being to the level of an ordinary human, completly sealing any supernatural power. His Law has only two weaknesses, it doesn't work on anyone with higher Taikyku level than him and if the target is a normal human he insteads gets crushed to the level of a normal human.
* Tenma tried to invoke this trope between herself and emotionless Kurasuma in the first manga volume, offering him to share an umbrella.
* Tenma wants to make food for her crush Karasuma and decides on curry which is his favorite food. Since she's a
* Ten Miles of Peach Blossoms: Bai Qian goes by several names over the course of the series. She uses the name "Si Yin" while at Kunlun Mountain, Li Jing calls her "A-Yin", and Ye Hua calls her "Su Su".
* Ten Miles of Peach Blossoms: Bai Qian is kidnapped and almost drowned on her birthday.
* Ten Miles of Peach Blossoms: Bai Qian jumps off Zhuxian Terrace, becomes a high goddess, and regains her memories of everything she's gone through before and after becoming mortal. Unsurprisingly, a drink is the first thing she asks for.
* Ten Miles of Peach Blossoms: In the war between the Celestial Tribe and Ghost Tribe both armies wear much nicer-looking clothing than is practical on a battlefield.
* Ten Miles of Peach Blossoms: Kunlun Mountain doesn't accept female disciples, so

Bai Qian disguises herself as a boy to get in.
* Ten Miles of Peach Blossoms: Le Xu is pregnant with Ye Hua for only a few days.
* Ten Miles of Peach Blossoms: Most of the characters have animal forms that they can change into at will. Bai Qian can turn into a nine-tailed fox while Ye Hua can turn into a dragon.
* Ten Miles of Peach Blossoms: The Heavenly Lord doesn't approve of Sang Ji's love for Shao Xin, so he has Shao Xin locked up and refuses to let Sang Ji see her.
* Ten Miles of Peach Blossoms: Xuan Nu starts out wearing bright colours, but switches to darker clothes after becoming a traitor and marrying Li Jing.
* Ten Miles of Peach Blossoms: Yan Zhi and Li Jing fall in love with Bai Qian/"Si Yin". Li Jing realises she's a girl at once; Yan Zhi doesn't.
* Ten Miles of Peach Blossoms: Yao Guang is a dark example. She duels Mo Yuan while wearing a long, flowing dress, and she's a good enough fighter that she's only defeated when he turns her own attack against her.
* Ten Minute History is essentially a compressed history lecture with very snarky delivery.
* Ten Minute Promotion - They're promoted for a moment, but events (or themselves) conspire to demote them right back into a position where they're back in the field.
* Ten Minutes in the Closet: Characters get locked in a closet together, romance and make out sessions ensue.
* Ten Minute Space Strategy, any planet with "ancient defences" trait gives in-battle effectivity bonus to any of your fleets on said planet.
* Ten Minute Space Strategy, asteroid fields that appear randomly on the map can be occupied with a fleet of fighters to boost your empire's speed of spacecraft production and facility building.
* Ten Minute Space Strategy: Bomber spacecraft are necessary in order to destroy enemy's colonies and, consequently, win the game. Without fighters escorting them, they are sitting ducks, however.
* Ten Minute Space Strategy (especially ones that have ancient defences on them), fighting within a radius of your military space stations and fighting in deep space with "space aces" trait all add to your effectiveness in battle.
* Ten Minute Space Strategy into permanent space stations which provide bonuses to nearby planetary colonies.
* Tenmon and frequent collaborator in every project he's been involved. Very fond of classical instruments (especially violin and piano) and poignant music, and the combination of said elements has become his mesmerizing signature style.
* Ten: Murder Island Meg Pritchard is this to a T. You pretty much pick up on this right off the bat, the second she steps off the boat. She's the last girl left at the end of the movie, and she's the only character to have a genuine showdown with the killer and win.
* Tennant, like everyone else, loved Sarah Jane Smith. Not only did he get to work with
* Tenn can very frequently be seen to fidget with his fingers, particularly when he's nervous.
* "Tennessee Flat Top Box", a #1 hit for Rosanne Cash, was previously a #11 hit for her father. You know,
* Tennessee's Farm Bureau Insurance has Charlie, a farmer who can do open heart surgery, answer any question, an even helped the Titans win a game after getting a call from the coach.
* Tennessee Tuxedo and Chumley apprehend a crossdressing bald eagle, removing his wig and kicking him out of his own home. Tennessee Tuxedo holds the box of Frosty O's cereal and the wig in his other hand and leans out the window, scolding the bald eagle. "Sorry Baldy, Frosty O's are for breakfast!" The bald eagle closes the window blinds on Tennessee Tuxedo, sending the box of cereal into the air as it lands in the eagle's hands. Tilting his head back, Baldy says, "Frostyriffic snacking, too!" and pours Frosty O's in his beak. Chumley watches the eagle and declares, "shaped like sugar-frosted donuts. Frosty O's."
* Tennessee Tuxedo and Chumley light fireworks and sparklers. A voice announces, "The first half was brought to you by..." A billboard appears, showing the stylized

"G" of General Mills. The announcer continues: "The big G cereals of General Mills, makers of the Goodness Pack for your choice of goodness." Next to the G is an image of the Goodness Pack, showing four cereal boxes. But Tennessee Tuxedo and Chumley have already lit a rocket, and are still holding on to it as it goes off, being carried forward and through the billboard, crashing through the G symbol.
* Tennessee Tuxedo and His Tales cave wall when he tries to brace himself that way. (Ironically, when he falls into a deep pit with walls too smooth to climb, he uses the gun's recoil to escape, shooting downward and propelling him up and out.)
* Tennessee Tuxedo and His Tales: Done by Commander McBragg in a flashback, in which he was a balloon vendor.
* Tennessee Tuxedo and His Tales: If any of Commander McBragg's tales are true (which is highly debatable), he would definitely qualify.
* Tennessee Tuxedo and His Tales: In the episode "Lamplighters", Mr. Livingstone is seen putting the finishing touches on a model of the Empire State Building made entirely out of toothpicks. As he stands back to admire it, remarking that it's taken an entire year to build, Flunkey barges into the room and bumps into him, pushing him into the model, which is destroyed.
* Tennessee Tuxedo and His Tales is an early example of this trope, being created in response to the "TV is a vast wasteland" speech.
* Tennessee Tuxedo and His Tales, Mr. Whoopee explained the conundrum of the week using a collapsible animated chalkboard he called the "Three Dimensional Blackboard", or 3DBB.
* Tennessee Tuxedo and His Tales, Tennessee and Chumley decided to go into the printing business. Their first customer was gangster Rocky Maninoff who wanted them to print up pictures of "Washington, in green ink."
* Tennessee Tuxedo and His Tales: Tennessee Tuxedo frequently says "Don't be ridiculous" when Chumley says something obtuse. Tennessee's ensuing thought would make as much if not less sense.
* Tennessee Tuxedo and His Tales would often restate exactly what someone had just said to him.
* Tennessee Williams, Brick's friend Skipper killed himself after drunkenly confessing his love, and Brick's own feelings are rather violently conflicted and ambiguous. The 1958 film strips out this aspect, which some critics have suggested leaves the central conflict of Brick's character somewhat muddled.
* Tennessee Williams is entirely based on the incident and the characters on his family.
* Tennessee Williams - that is, if you believe Brick when he vehemently denies they did "sodomy" together:
* Tennessee Williams, the protagonist is threatened with a lobotomy to stop her from telling the truth about her cousin Sebastian.
* Tennessee Williams they have called their lives thus far, it comes crashing down beautifully. Just ask Blanche (her white knight calls her too dirty to take to his mama!) or Laura (the Gentleman Caller even broke her favorite glass animal, the one thing that gave her joy.)
* Tennessee Williams, when the transformed Alma throws herself at John, she tells him that, "The girl who said 'no' [to his advances], she doesn't exist any more — she died last summer, suffocated in smoke from something on fire inside her." Unfortunately, it's too late for her, as John has gotten engaged to another woman.
* tennin, Heavenly People, that serve a similar purpose which may explain why they were used as a loan word for Judeo-Christian angel.
* tennis 2009: "I've said to him before, 'I'd love to hate you, but you're really nice.'"
* Tennis, and had just set a record streak of 31 wins at the French Open. His fourth-round opponent, Robin Söderling, was all set up to become yet another one of his conquests as the 23rd seed who had never even reached the quarterfinals of a major tournament before and had been steamrolled by Nadal in all of their previous matches. Söderling apparently hadn't read the script, however, as he proceeded to turn in the game of his life and defeat Nadal in one of the biggest

upsets in tennis history.
* tennis, a strong serve is this. Serving balls so fast that points end almost immediately without your opponent even being able to get their racquet on the ball makes for more boring viewing than flashy trick shots or long rallies, but it works.
* tennis before the deciding set, as it kept getting in her face during rallies. She went on to win the set and the match.
* tennis, considered a high-scoring affair with a 240-230 final score, lasts only 22 minutes, implying most matches don't last longer than 30 minutes. The possibility of a losing team's Seeker dragging the game out by not catching the Snitch and preventing his counterpart from doing the same still exists — which again raises the question of why Krum didn't do this in the World Cup final — but nothing like this is ever actually shown to happen.
* Tennis fans have been having fun for years with Roger Federer and Rafael Nadal, who have been known to be on very good terms with each other, with Rafa especially occasionally fanboying his rival, and the Spanish media even officially proclaiming them "sports married." (When they have an argument in public, on the other hand, the media starts crying about a "rift."). The
* tennis finals since they couldn't seem to go all-out against each other.
* Tennis for Two), creating the very first electronic game to have a video display (the first "video-game"). He stated before his death that he regrets being known for inventing the video game because he would have liked to be known for his work on nuclear nonproliferation.
* Tennis Hall of Famer and current broadcaster Todd Woodbridge learned the hard way to never speculate about a woman being pregnant when
* Tennis has given interviews in Serbian (his native tongue), English, French, German, Italian, Arabic, Spanish, Russian, and Portuguese, and has reportedly picked up some Mandarin and Japanese as well.
* tennis have defied predictions that they would never again return to top form after suffering injuries or having lackluster results too many times to count. The best example of this is when Federer and Nadal ended their 2016 seasons early due to injury and hadn't won a Grand Slam in over 4 years or 2 years, respectively, only to win 2 Grand Slams each the very next year.
* tennis like with Maureen Connolly (although her injury was non-tennis-related) and Mary Pierce.
* tennis, no less — but failed to reach the quarterfinals of any other Slam he entered.
* Tennis, nor is he massively built like other giants of the game like Nadal. He doesn't rely on massive serves, power volleys or other such tactics to win— just sheer skill.
* Tennis on Eurosport. Go to any forum of a particular sport that isn't Association Football (or Tennis obviously) and you are guaranteed to find that most European fans there absolutely despise Tennis for the sole reason that they've spent large chunks of the last 20 years wanting to watch their favorite sport but not able to, as Eurosport was preempting it with an overtimed Tennis match, usually from the lower rounds of some unimportant tournament. Cycling and Basketball fans are especially prone to fly into a rage from this.
* Tennis player Andy Murray has a reputation as being quite stoic and serious...until he lost in the finals of Wimbledon 2012, and had to fight tears most of the way throughout his final speech.
* Tennis player Darlene Hard, after being bested by the legendary Althea Gibson in the 1957 Wimbledon Singles Championship, not only was gracious in her defeat, but also shook her hand
* Tennis player Luisa Stefani was in the US Open semifinal when she suffered a freak knee injury. It ended her season but not her sense of humor, as that same day she posted Instagram stories updating her condition, one of whom had
* Tennis player Martina Hingis retired and unretired multiple times over the course of her career due to being plagued by injuries (and accusations of drug-taking later on). Justine Henin also infamously retired out of the blue in 2008 (in spite

of still being ranked No. 1 at that time), only to unretire a year later after Kim Clijsters made her own successful unretirement. She then retired for good two years later after being hindered by injuries.
* Tennis player most likely to fill the last spot of the semifinals after Djokovic, Federer, and Nadal show up for their reservations" role.
* Tennis player Rod Laver (a contender for the Greatest of All Time title) how he would go about beating current player Roger Federer (another contender) if they had been professional at the same time. Laver replied, "Hit him over the head with a tennis raquette."
* Tennis rivals, and good friends, Martina Navratilova (Tomboy) and Chris Evert (Girly-Girl). The various contrasts between the two played a big role in cementing their rivalry in the public eye, even as the two have kept a close friendship throughout the years.
* Tennis see a top 5 player at some obscure ATP 250 or WTA International event, chances are that a sizeable appearance fee was included somewhere. One specific player example of this would be former top-5 stalwart Nikolay Davydenko, who was quite upfront in admitting that he played in a lot more tournaments than he needed to solely for the additional money.
* Tennis Shoes Adventure Series — Maegen decides that radios would be useless, and brings mini chocolate bars and ball-point pens to trade to the Romans instead.
* Tennis Shoes, much to Jim's chagrin. Despite having saved the lives of some very important people, and aiding in the assassination of the evil king, very few people remember 'Jimawkins', so when he tries to show off for his kids, they are less than impressed.
* tennis shot to the top of the tennis world soon after and Roddick would never again win a Slam or hold the No. 1 position, but it's a sure bet that even if Federer hadn't been around to beat Roddick in four Slam finals, he would still have been doomed to fall short of Sampras's 14 Slams and Agassi's 8 in spite of being good enough to be included in the Tennis Channel's list of top 100 players.
* tennis star Kim Clijsters confronted him during the 2011 Australian Open about a text message that he sent.
* Tennis star Monica Seles was stabbed by a crazed Steffi Graf fan who resented that Seles had overtaken Graf as the world's top-ranked female tennis player. Fortunately, Seles survived and eventually recovered enough to return to playing tennis. Unfortunately, the fan
* tennis, the US Open between 1970 and 1974 implemented a sudden-death tie-breaker in which the first player to reach five points won the set. Since then, the US Open and most other associations have used a "lingering death" tie-breaker at 6-6 in which the first to at least seven points with at least a two-point lead is needed to win the set. Note that many tournaments won't use the tiebreaker for the final set, requiring a clear winner by at least two games. Starting from 2019, the Australian open will use a tiebreaker to ten points instead of the standard seven, and Wimbledon will use the standard seven point tiebreaker for the final set if it reaches 12-12 instead of 6-6. The French Open is the last remaining Grand Slam event to not use a tiebreaker for the final set.
* Tennis titles and in 2001 he personally thanked Federer for beating Pete Sampras who had been about to equal that record. Six years later Borg turned up to watch Federer equal the record and publicly congratulated him.
* Tennis was invented by Dr. Jonathan Tennis, who was trying to fuse the sports of badminton and Swingball.
* tennis who's fluent in Serbian, English, and Italian and can also speak passable French and German.
* Tenno as "killer." He also uses "surah," but that appears to be a more formal honorific.
* Tenno can be equipped with a melee weapon, primary ranged weapon, and secondary firearm. The former often sees just as much use as the latter two, especially with the right mods equipped.
* "Tenno heika Bannzzaaaiii!" or so the old Japanese war cry goes (Literally, "a

thousand years [of life] to the Emperor").
* Tenno (the player character faction), certainly betrayed the Orokin, but no doubt the ordinary citizens considered it an aversion.
* Ten novels that consist of a novelization of the original film and tie-ins to the original series.
* Tenn, who CB explained this trope to, wants to try this when Zim is investigating GIR's disappearance. Though as Skoodge points out, she seems to have misunderstood the concept, as she thinks that the "good" cop has to be the aggressive one.
* Tennyo, aka Billie Wilson, has other, even worse nicknames. Like 'The Scourge' and 'Stalker of the Stars' (or 'Starstalker').
* Tennyo, because she is powerful even by school standards, and (through no fault of her own, other than naivete) is a major trouble magnet.
* Tennyo dumped her. Maybe it's that she's so dangerous other students can get expelled just for fighting her. Maybe it's her combat final, where she nearly wiped out an entire city.
* Tennyo possibly destroying the planet. Tennyo's best friends have Plans A-Z, and Tennyo approves.
* Tennyo's greatest fear is that she might one day return to being the completely emotionless, ruthlessly pragmatic living weapon which the Star Stalker had been before merging with Billie.
* Tennyo tends to suffer from this. While her powers are ridiculously helpful at killing things dead, she has a BIT of a problem with the whole "holding back" deal.
* Tennyo. The test involved opening a box but to open that box, a hand must be sacrificed.
* Tennyson: "Cophetua sware a royal oath: 'This beggar maid shall be my queen'" (This was itself based on an old ballad, The King and the Beggar-maiden.)
* Tenochtitlan, capital city of the Aztec civilization, was mostly built of "floating gardens" constructed around islands in a large lake. The lake was later drained and what's left of the city is located in the middle of modern-day Mexico City.
* Ten of the twelve Israelites sent to spy out the Promised Land insisted that its people were too strong to conquer, even though they had God on their side. The people declared that it would be better to die in the desert than try to conquer the Land. God, furious, declared that they wouldn't enter the Land until every man who complained had, in fact, died in the desert. Cue 39 more years of wandering.
* Tenome after it tries to eat Shao Tzu for a while. It's implied that's how she gets her powers.
* Tenor Boy romantic rivals plot, the leads make mistakes and fall victim to the plots.
* Tenor Boy: The protagonist of many an opera or musical tends to have the highest register of all the male characters.
* Tenor saxophonist Warne Marsh died of a heart attack onstage in Los Angeles in 1987 in the middle of playing the standard "Out of Nowhere", allegedly right after he finished taking a solo.
* Ten Paces and Turn on cheating okay simply because Jack tried it earlier.
* Tenpenny is a corrupt, self-serving bastard who's behind some pretty despicable acts, but he's often highly entertaining and gets some of the best lines in the game.
* Tenpenny Tower and Rivet City get a pass due to sheer numbers and relative isolation, and in Megaton, the whole populace is armed and ready to fight any criminals within the walls, which themselves are a deterrent: the entrance is protected by an outer gate, a sniper, and a robot, and it's the only way in. The smaller settlements, however, consist of 4-10 people, three of which are would-be soldiers on patrol, max; it is worth noting that the settlement of Evergreen Mills did get overrun by a large raider group prior to the Lone Wanderer escaping the Vault. Still, how the Capital Wasteland can support so many humans without an food-producing infrastructure beyond a few Brahmin per village is a serious worldbuilding question.

* Ten / psychobilly than a lullaby, but the lyrics still have that certain nursery rhyme quality to them.
* Tenra Bansho Zero, who are widely (and largely incorrectly) considered savage monsters by the local humans. Perhaps needless to say, this little secret is not something the people in the know feel exactly inclined to share with the general populace.
* Tenrikyo followers believe their prophet, Nakayama Miki, ‘concealed’ her human form and still lives on. They still bathe her and feed her and read the newspaper to her; how they do it is not known, as it’s performed only by the Shinbashira (hereditary elite Tenrikyo clergy), which is a cause for a serious amount of
* Tenrou Sirius the Jaeger takes place in 1930s. Specifically before the World War II started.
* Tenrou Sirius the Jaeger. The independent terrorist organization, Hyakko Party also counts as this, as they kill innocent scientists because they're employed by the Vampires.
* ten Russian agents that had been living undercover for years if not decades posing as ordinary American citizens, trying to build contacts with academics, industrialists, and policymakers to gain access to intelligence.
* ten Russian sleeper agents arrested in the USA, in exchange for four people (also Russian citizens) who were being held by Russia on espionage charges.
* Tensai Bakabon debuted at the same time on different magazines and despite having very different styles they made Akatsuka a house-hold name in Japan.
* Tensa Zangetsu in chapter 420. After he stabs Ichigo with his sword during a battle with him he cries.
* Ten Seconds to Hell in post-war Berlin put half their salaries in a fund to be used by whoever survives the next three months in the job.
* Ten Seconds To Hell is about former German soldiers disarming unexploded bombs in Post World War 2 Germany and actually uses very realistic bomb disposal equipment and tactics.
* Tensei Shitara Slime Datta Ken -> "TenSura", although "Tensei Slime" has also been used.
* "Ten Session" takes place over the course of 10 weeks as Ted talks about his evolving relationship with his dermatologist, Stella, removing an
* Tenshi Hinanai too, despite the amount of damage she caused all because she got bored of
* Tenshi is also something of a Spoiled Brat, with emphasis on the spoiled. She also has such a silver spoon on her tongue that she was bored to death prior to the events in
* Tenshinhan uses the Kamehameha against Master Roshi at the 23rd Martial Arts Tournament after seeing Yamcha use it against him, stating explicitly that he can learns an attack after seeing it once. Although we only see him copy the Kamehameha and the After Image.
* Tenshirock powerful items. In early Season 3, he demonstrates his ability to make avatars say what he wants with voices that sound just like their players. He never gets to do anything relevant with that due to the true plot Season 3 revolving around someone else revealing a secret Tenshirock meant to keep under wraps, turning his attention to finding the culpirt.
* Tenshirock's mother, whose death is heavily implied to be linked to some mental condition she had. That notably enabled the father among the two to diagnose the same condition in one of his guildmates.
* Tension between Joey and Johnny colored much of the band's career. The pair were politically antagonistic, Joey being a liberal and Johnny a conservative. Their personalities also clashed: Johnny, who spent two years in military school, lived by a strict code of self-discipline, while Joey struggled with obsessive-compulsive disorder and alcoholism. In the early 1980s, Linda Danielle began a relationship with Johnny after having already been romantically involved with Joey. Consequently, despite their continued professional relationship, Joey and Johnny had become aloof from each other. Johnny did not contact Joey before the latter's

death, although he said that he was depressed for "the whole week" after his death.
* Tension-Cutting Laughter: Laughter that deflates the tension built up over a scene or sequence.
* Tension-Cutting Laughter (often): Laughing as essentially a way of saying, "Phew!".
* tensions, truth is, the two sagas are so different, they don't really step on each other's toes. And in modern times, true pop-culture geeks understand the economics of how TV and film projects get the go-ahead or not, therefore, fans of both works tend to look at the others' success as being a boost to their own favorite.
* Tens of millions of refugees fleeing south all at once is going to destroy the economy of any country in which they settle. With most of the northern hemisphere in ruins, along with the millions who have already perished, hundreds of millions if not billions more are guaranteed to starve to death or die of exposure and disease. Of course, the writers weren't going for realism. The whole movie is an unsubtle political criticism of the Bush administration.
* Tensou Sentai Goseiger and have come to pick her up (they just need her to help everyone fight.)
* Tensou Sentai Goseiger averts this trope, as the Warstar aliens are merely a scouting force send by the much larger Armada.
* Tensou Sentai Goseiger, but his attitude qualifies him for this trope.
* Tensou Sentai Goseiger. Each category also had some secondary elements involved; Land had Wood and Lightning attacks, and Sea had Ice, and Sky also had Lightning. Red also used Fire when teaming with the Shinkengers.
* Tensou Sentai Goseiger fits this to a T after he's seemingly destroyed he comes back as Buredoran of the Chupacabra then after that he comes back in the Vs movie as Buredoran of the Bloodbath and then is finally brought back as Buredo-RUN before he assumes his true form.
* Tensou Sentai Goseiger, Gosei Great, has a literal Eyepatch Of Power; it not only adds to the pirate look of the mecha, it allows it to detect and target enemies.
* Tensou Sentai Goseiger, Gosei Knight was able to block the blast and stop it from destroying the world, leaving Robogog furious that his ultimate weapon had been wasted.
* Tensou Sentai Goseiger is from the same race as their mecha are and therefore does not possess a human form. So in this case, it's a token nonhuman looking being in a team of human-looking beings.
* Tensou Sentai Goseiger Nozomu initially dislikes Hyde for his frosty, dismissive attitude, but warms up to him on seeing Hyde's determination to remain on earth and protect humanity.
* Tensou Sentai Goseiger suffer from this to some extent, though the Landicks are slightly less affected than the other three. They come from different sort of reality and didn't get to interact with people so much before being stranded on Earth. They get better through their stay.
* Tensou Sentai Goseiger - the actress, Mikiho Niwa, belongs to idol group Canary Club whose repertoire includes cheerleading.
* Tensou Sentai Goseiger: The Elephant Headder / Elephant Zord, part of an auxiliary zord that made its Sentai debut in a movie and later one appearance in the series, with Megaforce adapting only the later appearance.
* Tenspeed And Brown Shoe: One's a black ex-con artist on parole, one's a white ex-stockbroker who adores pulpy detective fiction, and they're private detectives!
* Tenspeed And Brown Shoe to boot, even though its initial ratings on Sunday nights were good enough to put the show in the Top 30 for the season — and it was a mid-season replacement to boot!
* ten sprouting from their bodies, plus a big one in front. Other Beholderkin have even weirder arrangements. One known as the Overseer is essentially a slimy tree covered in eyes.
* Tentacled Terror: Cephalopods, cephalopod-like creatures, and just anything with tentacles being portrayed as alien and terrifying.
* Tentacled Terror: Cephalopods, jellyfish, and just anything with tentacles being

portrayed as alien and terrifying.
* Tentacled Terror: Tentacles are a common feature of aliens, octopoid or otherwise.
* Tentacles of Doom: Ted says that all sorts of care and consideration go into the changing of the official class of holy relics. Cut to an office in the Vatican, where a priest idly presses a button on his computer keyboard and says "What about the Holy Stone of Clonrichert?" Second priest, not even looking up from his newspaper: "Whatever."
* Tentacoli is discovered when it pops out of the water and scares a guy trying pick up the fishing rod he dropped.
* Tentai Senshi Sunred, and they're the closest thing he has to friends since he retired.
* Tentai Senshi Sunred colleagues and the cellphone goes off, almost spoiling the hiding place (and making Sunred's colleagues mock what they think is his ringtone).
* Tentai Senshi Sunred never stop talking about food, deals on food, and what household cleaning products work best. This comes mostly from the evil organization's leader and his band of monsters, bizarrely enough.
* Tentai Senshi Sunred so it is unceremoniously revealed after Red's amicable archenemy spots a drab cardboard box with "Firebird Form" written on it in Red's closet, which is then pushed further back into the closet as soon as Red explains this trope to him. Viewers just get to see it in action in the opening credits sequence. The same thing happens with "Prominence Form" in season 2, but that doesn't even get a joke scene dedicated to it.
* Tentai Senshi Sunred, Sunred; dozens, if not hundreds, of fights later, Florsheim remains winless and are probably in the 'negative' column where 'evil acts' are concerned, spending most of their time volunteering in the neighborhood. Sunred, on his side, retired from heroics years ago and now has to contend with Florsheim being pretty much the only friends he has left.
* Tentai Senshi Sunred; Sunred won't even fight him directly because he'd look like someone bullying the elderly if he did.
* Tentai Senshi Sunred that turns into a fearsome, unstoppable werewolf-monster during a full moon. It only works as long as the full moon's rays are directly touching him, however, so when Vamp schedules the Sunred vs. Hellwolf fight to an overcast night his constant switching back and forth leaves him unable to fight in either mode and drives Sunred nuts.
* Tentai Senshi Sunred, the battles are hilariously one-sided and very rarely shown on-screen.
* Tentai Senshi Sunred: The ceiling monsters not only don't capture anyone but insist on making their presence known by nagging everyone else in the house. Amusingly, instead of a monstrous voice, their voices are girls from a JPOP group.
* Tenten kisses Haku in the heat of the moment after being promoted to Chunin. It's only after the kiss is over that she realizes that she did so in front of the entire village.
* "Ten Ten" was common in the video game industry (especially in Japanese games, like Capcom's arcades whose credits roll are usually about 90% pseudonyms) up through the beginning of the fourth generation, although the practice itself remained until at least 2005. In this case, the reason for not putting their real names on the product was not out of dissatisfaction with their work, but to prevent rival companies from hiring away their talent.
* Tenth Anniversary Collection' I've referred to in several strips) is left to the reader's imagination, where it's sure to be more outrageous."
* Tenth Avenue North mentions "look deep in my eyes" implying this trope in their song "Beloved".
* tenth of a cent). This is not much of an issue, because a) every station does it, and b) people buying gasoline either fill the tank regardless of the gallon amount, or fill the tank till the price hits a round number ... nobody who doesn't have some kind of psychological problem really cares whether the amount of gas they buy is an integer number of gallons or not.
* Ten thousand credits will net your civilian clunker a jump drive, with a mere 50

creds per landing to refuel, in
* Ten thousand years later, there is still a masquerade of sorts going on for most of the Imperium. Daemons and Chaos are more understood by most of the Imperium as theological rather than literal concepts, if at all. Information on Chaos, daemons, and the
* Ten thousand years prior to the events of Warcraft, the War of the Ancients ended in an event called The Sundering where the Well of Eternity imploded. Half of the world's landmass was destroyed and the remaining land was split apart into four continents and a scattering of islands.
* tenth the amount of salt daily that ponies put in a single glass of beer or cider.
* Ten Tigers From Kwangtung clean off his shoulders. Said villain is hanging from the ceiling by the legs, so when his head goes off it predictably comes with a waterfall of blood.
* Tent Of Blue., many questions that are aroused in the reader's mind towards the end are never answered at the end. How did Yvonne get her son, Anton, out of the mental asylum without Harold's consent? Never mentioned. Not once.
* Tentomu chu!! desu~ Group as magical girls, specifically the members of the titular unit "Tentoumu chu".
* tenuous alliance, exempting his body from mutilation and, according to Lakota custom, sending him to the afterlife as a hero. When the Oglala warriors celebrated their victory the following night, Crazy Horse himself sang a death song in honor of Private Metzger.
* Tenuously Connected Flavor TextThe flavor text is "story" and is segregated from the mechanics / game world / name of the item, a.k.a the "gameplay".
* Tenure for academics is not quite this, but it's very, very close. Although granting it is supposed to be based on credentials and accomplishments (and limit favoritism and arbitrary dismissals as well as foster loyalty), it's not uncommon for members of a tenure-granting board to try to block people they don't like from becoming tenured just because it means they'll be stuck with them as coworkers for the foreseeable future - sometimes decades.
* Ten was more chipper than Nine ever got but at the same time down-to-Earth and relatable to humanity more than any other Doctor...
* Ten, which was about mahjong being serious business, there was a character called Akagi which was an awesome old man who the characters feared and respected, the character was so popular the author made an spinoff prequel series focused on Akagi's early life, at one point he meets his match in an old man called Washizu, who was so popular the author made a spinoff series focused on Washizu's early life (yes, Fukumoto made a spinoff of a spinoff).
* ten whole years, while the Death-Eaters (Voldemort's followers) were 'punished' by becoming members of A-List society with high-level government influence. Sad isn't it?
* Ten, who wore a blue suit as often as his brown one and whose sonic screwdriver had a blue light. Thirteen wears even more blue than Ten.
* Ten Words of Wisdom, the four gods of TWOW — GreenTree, and the other three.
* Ten World Series have ended in this way, with the home team winning the last game on a walkoff. However, four of those occurred before Game 7, so those Series would have continued if the road team had won that game. Six World Series have been won in true Down To The Last Play fashion, with the home team winning in the last at-bat of a winner-take-all final game:
* Tenya Ida have this, thanks to Quirks that give them literal engines; Tenya's are on his legs, while Tensei's are on his elbows.
* . Tenya's family tends to have Quirks related to producing energy and/or materials, all of which come from internal reserves. One of Tenya's cousins can produce metal from her body, even items as complex as guns, but needs to eat metal to do so and regularly eats anything she creates to recycle the material. Tenya and his mother both produce energy from their bodies and require far more food than most to fill their reserves. Not knowing this actually caused Tenya's mother to

suffer malnutrition as a child, leaving her with significantly stunted growth.
* Ten Years After's biggest hit, "I'd Love to Change the World", was much softer than their usual hard-rock style.
* Ten years after The 8th Platoon. Its lyrics talk about a young girl crushing on an older man and hoping she can hook up with him in 10 years.
* "Ten years ago, a mermaid dreamed of life on land. Now her daughter dreams of the sea." —
* Ten years later, after the Republic of Texas was annexed by the United States (which triggered
* Ten years later, Keesha Ward and Jason Quartermaine. Their respective grandparents disapproved. His because of the frequent clashes that the two families had had over the years, hers because she feared that his family would eventually put their collective foot down and forbid Jason from seeing her. This never happened and both families warmed up to and accepted the relationship once they realized that each was a lovely person that anyone would want to be part of their family.
* "ten years later" versions of themselves... there's even official art of the characters together with their older selves.
* ten-years-old mage and teacher, the vampire, the demon-hunting mercenary) among his students end up bailing him out. Anime-only trope, in the manga he is anything but that...
* Ten Yori Mo, Hoshi Yori Mo. The heroine is being menaced by murderous thugs on top of a skyscraper when who should come along but a Bishie on a hang glider. A few lines later she jumps into his arms and they fly off into the sunset. No, really.
* Tenzen Yakushiji and is shown to greatly enjoy it, even going so far as to gloat about it towards opponents who thought they killed him.
* Tenzen Yakushiji is fine he can abuse this power as much as he wants.
* Tenzin. As adults, their relationship is still rather prickly. And even then, even Bumi and Kya are at odds as well. Fortunately, they get better.
* Tenzin becomes this when he follows Bumi's advice...which falls flat on its face very quickly.
* Tenzin before airbending for the first time near the end of Season 1.
* Tenzin has this relationship with his older siblings, Kya II and Bumi II. When they were children, Tenzin was very serious, while his siblings were rather rambunctious. In the present, Tenzin is
* Tenzin, his wife, Pema and ex-girlfriend, Chief Beifong whose past was so hostile that
* Tenzin seems 100% serious and proper all the time, but is very warm around his family and clearly cares very much for Korra.
* Tenzin, the last real practitioner of Air Nomad culture on the planet until his three (soon to be four) children grow up. This helps set up the "tradition versus progress" conflict that forms part of the story's core.
* Tenzy, too. Admittedly, a robot that started life as a heavily modified gun has low odds of becoming a committed pacifist.
* Teorema (1968): A handsome young man comes to stay with an upper-class family and awakens sexual desire in all of them, males and females, even the maid.
* Tepet Lisara also qualifies. Out of jealousy, she got her cousin, an actually competent officer, removed from command, and devised the strategy that effectively ruined her House's standing within the Realm. Though that particular failure is never realized, she is still
* Tephramancy: Ashes from a burned sacrificial victim examined for omens.
* TEPPEN divides its heroes and cards into four colors, or "elements", that dictate their playstyle.
* Teraformer. The thing is so big, that after you take it down with a vehicle, you have another fight on its wreckage with plenty of room to maneuver around.
* Teralogos News, because it's the present day from the perspective of the reviewer.
* Teranesia is a homosexual man. Evolutionary development is a core theme of the novel, so of course the novel examines the question: If facilitating reproduction

is the purpose of evolution, and homosexuals don't reproduce, then why does homosexuality occur naturally? The book doesn't offer a definitive answer.
* ter'angreal, so no Aes Sedai would even know how to make any weapons beyond the mundane. When the trick is rediscovered, it's by someone who hasn't actually taken the oaths yet.
* Teratorn birds did both get trapped in the tar on a regular basis while attempting to scavenge carcasses of other animals like ground sloths, horses, and camels- for every one large herbivore fossil found in the tar pits, there are roughly ten fossils of large carnivores.
* Teraurge. separate sea serpent-like females with no limbs whatsoever (and in the case of the latter, no eyes or ability to communicate verbally, despite clear sentience), and another insectoid woman who looks like a long-necked beetle with pretty blue eyes and hooked fingerless hands, with whom intimacy is very dicey owing to her skin being covered with a nausea-inducing contact poison. It's a weird game alright.
* Tercio infantry. This infantry formation dominated the battlefields in renaissance Europe for nearly two centuries. It was the combination of pikemen with very long pikes, and gunners armed with matchlock muskets. Their attack power was formidable, as nothing could stand in the way of a wall of advancing pikes, and the guns (a novelty on the battlefields) could punch through even the strongest armor at a close enough range. Their durability is also legendary: they had to move in a close formation, and they were the slowest unit on the battlefield, so they were specifically trained to march forward no matter the casualties. Actually, their only hope of survival was to keep on pressing forward, because a pikeman with his long pike is defenseless alone if someone with a sword comes too close, and the matchlock was both heavy, unwieldy, and took nearly a minute to reload. If they break formation, even a small cavalry unit can cut them all down. So the formation had to be able to take a lot of punishment, they could deal a lot of punishment in close and medium range, but they were horribly slow: a stellar example for the Mighty Glacier trope. (the tercio was made obsolete only when flintlock muskets replaced the matchlock: their better rate of fire and ability to mount a bayonet made the pike square obsolete)
* Tercio infantry were especially effective against the Ottoman Turks as the pikes could repel any cavalry attacks and the armoured front ranks were impervious against archery, and the Turks had no decent heavy infantry of their own.
* tercios that they would be paid a bonus for every enemy head they brought back.
* tercio the pikes were there to hold the enemy just outside pike range while the muskets were used nearly at point-blank range. The shooters would fire then countermarch, allowing them to reload while fresh shooters were brought forward to take their shot. The pikemen and swordsmen were there to cover the shooters and fix the enemy at point-blank range so the gunners could destroy them.
* Terence Hill. When one of the Mormons, during an actual battle, attempts to use Bud's trademark grapple, he keeps accidentally flipping the other guy 360 degrees — landing him right back on his feet. Repeat three times...
* Terence McKenna developed a theory that humans gained sentience and religion due to drug use, in his books. He also deliberately referred to Philip K Dicks works and suggested that the reason psychotropics exist was to free mankind from the black iron prison mentioned in Dick's
* Terence McKenna, in his book "The archaic revival" did not only depict a free love future, but also a free love past.
* Terence Rattigan. Ask any critic or theater buff in the '40s and '50s, and they'd probably list Rattigan — author of
* Terence Stamp also appeared in a subplot as terrorists that got cut.
* Terence Stamp (Mace Windu) in that one as well; his role was much expanded in the rest of the trilogy.
* Terence Tao started taking college-level math classes at 9 and received his bachelor's and master's degrees at 16. Breaking the mold of the burnt-out prodigy, he is still an active and notable mathematician in his forties and appears to have a happy family life.

* Terence Trent D'Arby, charted at an abysmal #61 and produced no hits, and it was all but downhill from there.
* Teresa Edgerton knows it (having servants and staff around constantly tends to eliminate privacy).
* Teresa Edgerton recounts how the religious group who raised him thought him a miracle: a Maglore appearing centuries after (they believe) the Maglore had been wiped out. Obviously, he had been transported through time for a purpose. Although he later learned that they were wrong about the wiping out, he did survive several things that should have killed him as a child, and he thinks it may have been his destiny that saved him.
* Teresa Edgerton stories, a villainess demands that the king's greatest knight fight for her as champion before she will consent to help his party. He explains that it's just a popular superstition that if you get the strongest knight, you win, that there is more in the combat. (She escapes before being brought to trial, making the matter moot.)
* Teresa Edgerton trilogy. They camouflage themselves by taking on the external trappings of whatever religion is currently in power.
* Teresa Edgerton use a calendar of nine forty-day "seasons", rather than months. The actual solar year is a bit longer than that, so celebratory "intercalary days" round it out every three seasons.
* Teresa is referred to as the strongest half-yoma warrior of all generations. Priscilla defeated Teresa and may have surpassed her, but she did it by using her
* Teresa McGee kidnapped two boys she had babysat with the intention of protecting them from their father.
* Teresa Teng recorded songs in her native Mandarin, Cantonese, Japanese and English.
* Teresa "Tessa" Testarossa gets this reaction when she introduces herself to Kaname's high school class in
* Teresa was even nicknamed for this trope. She was constantly displaying a patronizing smile. Even the number 1 of the time while Teresa was only a recent warrior could not bare this smile. Aside from her, several number 1 tend to have this kind of attitude, examples include Hysteria, Roxanne, Isley, Rosemary, Priscilla (post-awakening).
* Teresa Wright. It worked; she was nominated for that film in Supporting, and won.
* Tereshkova (the first woman in space) systems. Humanity's first and largest deep space station is also named Gagarin Station.
* Terezín, in what is now Czech Republic, was once a Nazi concentration camp called Theresienstadt. Built as a fortress to protect Prague, on the outside, it looked like a beautiful ordinary Eastern European town where culture and intellect continued to thrive. According to the Red Cross visits and a propaganda film, Theresienstadt looked like a pleasant urban community Hitler set up for the Jews as a reward for their services; but actually, it was a dire and filthy transit camp where Jewish victims waited for a short time before being sent to their deaths. Despite being called the Paradise Ghetto, it wasn't a real paradise.
* Terezi draws "a pointless chalk outline around the body, as is standard protocol" when investigating Tavros's murder. She misses the left arm.
* Terezi has been the butt of this joke, although she can usually get around her handicap. Notably, when she adds sunglasses to pictures of Dave, she always misses his eyes. Also, in the Act 5 finale, she points in the wrong direction when everybody's staring into the sky and is gently corrected by Karkat. It's also pretty common for Terezi
* Terezi introduces us to the scalemates, stuffed animals that Terezi pretends are alive. Of course, she then proceeds to
* Terezi is a special case: although she isn't born with psychic powers of any sort, her Sgrub title is the Seer of Mind, and she eventually develops the ability to
* Terezi kills Vriska to stop her from following a course of action that would doom all the other trolls.
* Terezi Pyrope wears bright red cat eye sunglasses, and Sollux Captor wears

heterochromatic shades. Equius Zahhak wears sunglasses with perpetually cracked lenses.
* Terezi tells Karkat about their "little moment" where she got close enough to him to
* Teri Hatcher and Howie Long (?) flirted in a series of ads for Radio Shack.
* Teri Hatcher) played Lois' mother Ella Lane in one episode, continuing a tradition of live-action Superman adaptations casting previous Lois actresses to play Lois's mother. Teri Hatcher's appearance is unusual for this trope: when shown, it is on a past recording, as Lois's mother is long dead by this point, and Teri Hatcher appears as she is now, and as the L&C version might appear today.
* Teri Hatcher Rhea, Queen of Daxam and mother of Mon-El, who serves as the main antagonist for the second half of Season 2.
* Teri Hatcher that many people thought the two were married. The commercials themselves were the usual "Dumb guy + Snarky Woman = Hijinx".
* Terinu, being deliberately genetically engineered to be even more aggressive than humans by their creator. The lead Galapados, General Gisko, subverts this trope slightly, being shown to be a loving and gentle husband at home who frets over his wife's pregnancy.
* Terinu combines old school YA science fiction coming of age, super powers, space pirates, a galaxy wide war story, cyberpunk style net hacking... WITH FURRIES!
* Terinu combine this with a dash of Religious Fundamentalism. In their viewpoint, they have a mandate from their gods to preserve all habitable worlds. The sentient races that happen to using them at the time were put there to serve Varn interests.
* Terinu declaring it was "Cheaper than letting them sit in a cell and eat up public funds"!), and just good old-fashioned corporate evil as isolated industrial facilities bind their workers through indenture and selling their souls to the company store.
* Terinu ends up losing his shirt when Gwen does her best to bandage up the nasty gut wound that tore it up in the first place.
* Terinu has the old "port in the head" method of cybernetic interface, but it's limited to expensive and specialized "Cybergliders" who run the risk of eventual brain damage even before you add in encountering hostile ICE. Everyone else sticks to either voice commands or keyboards.
* Terinu himself (you try finding shoes for guys with three toes) and Ninetta are the worst offenders. Not to mention every Vulpine not in a spacesuit...
* Terinu is specifically designed for ramming attacks, with a heavily reinforced prow and emergency safety harnesses for the crew. Of course her primary targets are lightly armed civilian freighters. Still, the comic's fans don't call her "Psycho Pirate Bitch" for nothing.
* Terinu name for the Varn Dominion's secret police/propaganda division, from a reader's fanfic, along with the idea that the Earth was beaten using a giant tractor/pressor beam to induce earthquakes and tsunamis.
* Terinu power sources for the Varn Dominion, and as such were designed to find service pleasurable.
* Terinu start out as petite and cute when they're young, but upon reaching adulthood they gain the same bulky musculature as a male. Ferin does and bucks, on the other hand, retain disturbingly small and cute their entire lives, even as they sported spiky horns and tails.
* Terinu team. At least a couple of fanfics by other authors have crossed over OC's, and a couple of bits of Fanon were incorporated into the main storyline by author Peta Hewitt.
* Terinu Teri's race were uplifted from alien animals by the Varn for their ability to generate massive amounts of electricity.
* Terinu that in Matt's case this was distinct improvement over his previous situation.
* Terinu that they were bringing "Civilization" to the Earth when they invaded in the backstory. Never mind the Ferin being viewed by every antagonist as a resource to be harvested and not a free thinking race in their own right.
* Terinu the Varn used this as their justification for conquering most of the

sentient species in known space. When they tried this on humanity, who was already more advanced than most of the Varn's previous clients, we fought back and incited rebellions among the other races.
* Terinu: The Vulpine are a people who divide themselves into Farmer Lords (the Rulers), Military (the Fighters), and Commoners (everybody else). There's some give to the system, with Commoners able to marry up into the Farmer Lord class, usually by gaining recognition during their mandatory military service.
* Terinu to go after them, in order to save the dying Galapados clones.
* Terinu wants to restore the Varn Dominion. All that involves is the capture of the titular character and the persuasion of all the races that the Dominion had once enslaved to join up again. By force, if necessary.
* Terinu when his Bion abilities activate when he's drugged and kidnapped.
* Teri the paper bear and Sarah the ice cream cone often get these since season 3; respectively,
* Terkel In Trouble (both of which were critically panned, even in their respective countries, Scotland and the UK). Not helping that the US dub, while not being as terrible as people say it is, is widely considered to be rather lousy to most people.
* Terkel In Trouble, Denmark's darkly humorous first CGI animated film.
* Terkel In Trouble (which serves to establish how spineless Terkal is, which we see firmer evidence of later on), and so on. It's not until after the wedding scene half an hour in that the plot really starts, and once Terkal is doing things it's a lot easier to care about him.
* Termagant:, claimed that the Muslims worshipped an 'unholy trinity' of Muhammad, Apollyon, and Termagant. As time passed, clashes between the West and the Muslim world continued, but the idea of 'Termagant' as an evil trickster deity was forgotten. The term is still used nowadays to describe a violent woman, but even in that context, it's dark and obscure, even more than the original meaning of the word.
* Terminal 1 of the Charles de Gaulle Airport in Paris, which opened in 1974 and looks like it.
* Terminal Avenue, the Peace Officers wear robin's egg blue uniforms that make them sexless and anonymous.
* Terminal City — use this trope, with a heavy dose of savviness and a pronounced tendency to pun. Character names like Tess LaCoyle and Erik "the Red" Haring are among the less egregious.
* Terminal has Melissa Turnbridge, murdered 30 years before the book's events. As the opposition for the book includes the three then-teens who raped and apparently murdered her, as well as the man who tried to hide the body, this inevitably comes up.
* Terminal Lance had a few comics about various types of "POGs", typically admin troops and "Water Dogs" (Marine plumbers. Someone needs to make sure there is fresh drinking water.) Representations of these troops varies from obnoxious to merely being definitely-not-grunts but otherwise inoffensive.
* Terminal Lance. He chose jail, but had slept with the judge's daughter...
* Terminal Lance instead of being the one giving the chewing-out to the lower-level enlisted. The title for that page is, to make the point of the strip obvious, "The Bigger Fish".
* Terminal Lance. It's gotten to the point that Abe has gotten his Lance Corporal insignia tattooed on his back.
* Terminal Lance occasionally notes that Marine dress blues turn even the ugliest most undesirable men into irresistible chick magnets.
* Terminal Lance take this position from time to time, though the author sometimes take the point of view of civilians and criticize the military and service members as well.
* Terminal Lance that he has absolutely no idea what serving in peacetime is actually like (he had already mustered out by this point).
* Terminal Lance that one guy with a ten-gallon hat and a Texas drawl.
* Terminal Lance that this is essentially because it feels like jerking off to a

family member.)
* Terminal Lance. When the strip isn't going off in some wildly unrealistic fantasy arc (e.g. "Revenge of the Dependapotomus"), it's simply a vehicle for relating what Marines think and feel during the—often ridiculous, but very real—events of military life.
* Terminally Exclusive Club: When a group has a set of requirements that are (or will become) impossible for new members to fulfill
* Terminally Ill, who have been through all of the other options, and nothing works, and they'll die anyways - they might want an end to their pain.
* Terminal Mutation for just a few of the possible causes. Examples of this form should be placed on their respective pages unless they are particularly noteworthy as transformation horror as well.
* Terminal Reality's logo normally depicts a frightening, ghostlike face against a black background with the company's name below it. In
* Terminal Velocity) Ceres that has been sent on a collision course with Earth.
* Terminal Velocity had the launch scene (complete with caution sirens, and launching from out of a rotating space station) when the game is first started (since the player continues flying between each mission without returning to base or even docking).
* Terminal Velocity has one mission in which you must stop the (former) asteroid Ceres, that has been fitted with an engine before it crashes against Earth.
* Terminal World, a mutiny is planned against Ricasso, the leader of the Swarm.
* Terminal World are sapient robots that have learned how to supplement and replace parts and systems damaged by the zone shifts with more error-tolerant biological tissues. While they aren't great at making or maintaining these tissues themselves, they have found that these materials can be easily harvested from living organisms as needed. Humans in particular have large amounts of useful neural tissue inside their skulls, for instance.
* Terminal World has "Tectomancers", who have mental control over the borders between the different technology levels. This is presumably derived from tectonic plates. However, "tekton" is Greek for "builder" (tectonic plates are the plates from which the Earth is built), so Tectomancy may mean ... something different from what the author intended.
* Terminal World is kicked off when an angel wakes up in Dr. Quillion's morgue with a message for him.
* Terminal World, is set in the far future on a planet hinted to be a terraformed Mars.
* Terminal World, tectomancers are regarded with fear and suspicion by the superstitious and must conceal their distinguishing birthmarks or risk being burned.
* Terminal World, the laws of physics break down enough that anything entering it ceases to function, including living beings; the ground of the Bane is a lifeless desert.
* Termination Shock and AI. Fortunately a probe stumbled upon humanity and alerted the galactic community in time to save them from hostile robots.
* Termination Shock when a heavily armed multi-species charitable organization dropped out of hyperspace over Mars and evacuated the survivors.
* Terminator 2 3-D: Battle Across Time go up in an elevator before reaching the climatic scene in Skynet's central core.
* Terminator 2 3-D: Battle Across Time, Kimberley is killed when the T-1000 very casually and effortlessly chokes her to death within seconds.
* Terminator 2 3-D: Battle Across Time loses its head when the good T-800 tosses a Hunter Killer drone at it.
* Terminator 2 3-D: Battle Across Time movie in the pre-show, one of those clips being Sarah's nightmare of the nuclear destruction of Los Angeles. When the show was brought over to Universal Studios Japan, the Los Angeles clips were omitted, so as to not remind Japanese guests of the atomic bombing of Hiroshima and Nagasaki.
* Terminator 2 3-D: Battle Across Time, this is The Terminator's response to John Connor's repeatedly telling him which direction to go.

* Terminator 2 3-D: Battle Across Time uses the Hunter-Killer as a weapon by throwing it at an attacking T-800, which causes its head to launch into the air.
* Terminator 2 has a benevolent version of this where Sarah Connor and friends are on a mission to destroy all evidence of Skynet artificial intelligence technology to prevent the billions from dying when the system instigates nuclear strikes worldwide.
* Terminator 2: Judgment Day actually fits this trope. Even with the dual Terminators, a lot of the film still recycles plot points, elements, and even lines from the original.
* Terminator 2: Judgment Day after it came to their ranch looking for the Connors. This scene was cut from the final version of the film.
* Terminator 2: Judgment Day: A gas tank does explode after a crash, but that's only because a live wire sparked next to the leaking fuel. (Also impossible, diesel fuel doesn't explode even when a blowtorch is pointed at it.) Averted later during the Cyberdyne shootout, where the T-800's minigun does not ignite any of the police cars it's fired at.
* Terminator 2: Judgment Day a grenade launcher, his HUD notes "0.0 Casualties."
* Terminator 2: Judgment Day. Also, they completely overlooked the fact that the US government likely had records on Dyson's research, and simply had a team working on it in secrecy beyond what could be researched by the likes of Sarah and John Connor.
* Terminator 2: Judgment Day, and all the efforts in the second film to stop apocalypse were pre-destined to fail.
* Terminator 2: Judgment Day) and attempting to bomb a computer factory to stop the apocalypse all by herself.
* Terminator 2: Judgment Day, and cannot be stopped. Each encounter with it is merely trying to slow it down and escape it for the time being.
* Terminator 2: Judgment Day and reset the switch, allowing him to learn and function as more than just an automaton.
* Terminator 2: Judgment Day) and T-800 (ageless, being a robot, but looking like a man in his 40's) develop this kind of dynamic.
* Terminator 2: Judgment Day are to consider that Sarah is a complete loon and what she spouts isn't real (and John, who grew up around her, is pretty bitter about it) but they immediately come around when they encounter the Terminators.
* Terminator 2: Judgment Day, as a double rather than using CGI to achieve the same effect. In addition, the toddler in the nightmare sequence is Hamilton's actual son.
* Terminator 2: Judgment Day, a terror-inducing droning sound plays in the background whenever the T-1000 makes an appearance.
* Terminator 2: Judgment Day, at one point Sarah is trapped by a SWAT team in a clean room. John, watching on cameras, declares there's no other way out of that room. So the Terminator punches through a wall and pulls her to safety. Then he blasted a hole through another wall with his grenade launcher.
* Terminator 2: Judgment Day back in time to her present day) that the person most directly responsible for the creation of Skynet is a Cyberdyne Systems engineer named Miles Dyson. She tries to assassinate Dyson to prevent Skynet from ever existing. Notably she can't bring herself to finish him off, instead collapsing into tears when she realizes she's about to kill a husband and father who hasn't actually done anything wrong.
* Terminator 2: Judgment Day because her left arm is injured was one way to show that off.
* Terminator 2: Judgment Day, but software which was able to infiltrate the Internet, which is decentralized and much harder to destroy.
* Terminator 2: Judgment Day by 1 million points for every successful loop. Unsurprisingly, competitive players will frequently try to spam this for hundreds of millions of points in a few minutes.
* Terminator 2: Judgment Day by standing between the escaping heroes and a pursuing SWAT team, hand-holding a heavy piece of wreckage over a detonator switch as his last labored breaths flutter from his bullet-riddled body. It also shows that he

doesn't really want to kill them, as he warns them to get out.
* Terminator 2: Judgment Day can do everything a human can and a lot more, although that 'more' differs.
* Terminator 2: Judgment Day, can have its mass disrupted and slowed by even small arms fire, with stronger weapons like shotguns and explosives able to blast apart its structure, though it will reform within seconds.
* Terminator 2: Judgment Day, due to Williams leaving the industry several years earlier.
* Terminator 2: Judgment Day fails to get out of the asylum due to good behavior, she attacks the doctor who doesn't believe she's actually changed. After she's restrained, the doctor looks at the screen (that is, the camera that they set up to film the interview) and makes an aside: "Model Citizen..."
* Terminator 2: Judgment Day: first he cuts off the outer flesh of one arm to prove he is what he claims to be to Dyson, then he gets shot up by the cops and beaten up by the T-1000. By the end, he's been impaled through his torso, his legs barely function, one of his arms is completely torn off and a large chunk of flesh is missing from his face and his chest:
* Terminator 2 Judgment Day for the Sega Genesis, enemies are described at the end of a level has having been "immobilized" due to "non-fatal wounds." Despite being shot. In the chest. With a shotgun. At point blank range. Of course, this comes from a joke in the movie: John Connor tells the Terminator not to kill anybody, and so the Terminator shoots a man in the knee. ("He'll live.") Doesn't explain how a chest shot could be non-fatal, though.
* Terminator 2: Judgment Day, from the arrival of the terminators, to the final showdown, about 36 hours passed.
* Terminator 2: Judgment Day had a two-keyed lock to access the vault where the arm and chip were kept.
* Terminator 2: Judgment Day has a scene where Sarah blasts a hole through the T1000's torso, where the audience can see Sarah through the torso-hole... right before it reseals itself a few seconds later.
* Terminator 2: Judgment Day has several, notably the brief layover at the Mexican farm where Sarah ponders the nature of The Terminator, and how much of a father figure he has become to John. Also the "why do you cry?" scene happens here. The Director's Cut adds a few more to the movie, including Sarah's dream about Kyle, John and Sarah removing the "read-only" block from the Terminator, and John trying to teach the Terminator how to smile during a meal stop. They add several layers of depth to the movie and its themes.
* Terminator 2: Judgment Day has the player shoot the ball at the moving target on the Flying-HK five-bank. The value increases for every shot made, but the lights move faster each time.
* Terminator 2: Judgment Day has two dubs, one for TV (Herbert Richers) and a second dub for the DVD release and later broadcasts (Cinevideo). Arnold Schwarzenegger, Linda Hamilton, and Peter Schrum had the same voice actors in both versions.
* Terminator 2: Judgment Day have "Fuck You Asshole" as one of the random Database rewards. If it's chosen, The Terminator says exactly that.
* Terminator 2: Judgment Day; he also manages to continue running at the same speed as a reversing car while being shot repeatedly with a pistol. Moreso with Sarah Connor's attack on Dyson's home, where she all but becomes a Terminator herself and is halfway to shooting a defenceless, wounded man dead in front of his wife and family.
* Terminator 2: Judgment Day he only starts mimicking John after his learning chip is set from Read to Read/Write. Seems SkyNet doesn't want its cyborgs thinking for themselves and sets the chip this way when they leave the factory.
* Terminator 2: Judgment Day However, the film includes a scene where a dog does not react to the T-800. The filmmakers admit this is a plot hole, but felt it was better to not confuse the audiences.
* Terminator 2: Judgment Day in a brief piece recapping how the future's going to turn out. Optional skulls added.

* Terminator 2: Judgment Day in the back hall of the mall was the winner of an MTV contest.
* Terminator 2: Judgment Day in the future, and Sarah immediately tries to kill him in front of his family, even though he hasn't finished his research (much less known what would come of it). He calls her out on this after the situation's explained, but agrees to help destroy his work.
* Terminator 2: Judgment Day. In the novel version, he deliberately feigned death after the impaling in order to give himself the chance of a surprise attack.
* Terminator 2: Judgment Day is associates with an arms dealer named Enrique Salceda who sells them tons of weaponry including a minigun.
* Terminator 2: Judgment Day is "I need your clothes, your boots, and your motorcycle." All of which the Terminator proceeds to take.
* Terminator 2: Judgment Day is introduced killing a cop who stumbles upon its arrival in 1995, then proceeds to add the cop's uniform to its appearance and steals his patrol car. The T-1000 is later implied to have killed the motorcycle cop it crossed paths with after its failure to get the Connors and T-800 during the chase following Sarah's breakout at Pescadero State Hospital, as it assumes this cop's appearance for a bit during the climax.
* Terminator 2: Judgment Day kid, John just runs from it, and this unknowingly saves his life.
* Terminator 2: Judgment Day launching tear gas at cops wearing gas masks. He eventually approaches them, hands the tear gas launcher off with a, "Here, hold this," and rips the mask off of the cop to whom he hands it. Much earlier, Sarah distracted a guard this way during her escape by tossing keys at him so he would leave his midsection exposed and vulnerable.
* Terminator 2: Judgment Day line of action figures, released to tie in with a very violent R-rated movie. And now, the Terminator 2 Minimates, finding their way into Toys R Us stores across the nation. Cute, 2 inch tall versions of the T2 characters. While Terminator 2 is quite toned down from the first (for one thing the Terminator is no longer a killer, but a kid-friendly bodyguard that does what you say) it was still an R-rated movie that no kid has any business seeing.
* Terminator 2: Judgment Day living tissue, but this is never stated in the film.
* Terminator 2: Judgment Day merely "delayed the inevitable" (literally; future installments just kept pushing Judgment Day further and further into the future).
* Terminator 2: Judgment Day: Miles Dyson is a far cry from the person you'd think would create Skynet. Indeed he sees only the possible positives of his creation. This may even blind him to the military applications of his invention or to the dangers of removing humans from certain decisions.
* Terminator 2: Judgment Day moment when he's imitating John's foster mother. The dog trick works on the T-1000 as well. Probably because it can imitate shape but not smell.
* Terminator 2: Judgment Day. Not to worry, the humans now have a reprogrammed T-800 on their side.
* Terminator 2: Judgment Day, of course, with steel, chrome, and killer robots everywhere.
* Terminator 2: Judgment Day one was used for certain parts of the motorcycle chase when the T-1000 tried to crush the T-800 between the tow truck and the concrete barrier barely missing.
* Terminator 2: Judgment Day: "OUT OF THE CAR!" (shoots windshield, BANG) "RIGHT NOW!"
* Terminator 2: Judgment Day, prominently featured on the playfield between the flippers.
* Terminator 2: Judgment Day qualifies as one, due to its almost total inability to maintain normal freeway speeds, let alone escape from the T-1000's liquid nitrogen tanker.
* Terminator 2: Judgment Day robot is sent back to kill John Connor as a child. A reprogrammed robot like the evil one in the first movie is sent back to protect him.
* Terminator 2: Judgment Day, Sarah, John and the T-800 use an elevator to get a

lead on the pursuing T-1000 during Sarah's rescue from the mental hospital. It's initially subverted when the T-1000 reaches the doors just as they close and pulls them open, but then immediately put back on track when a well-placed shotgun blast stuns him and the doors close normally.
* Terminator 2: Judgment Day shows many of the human forces being helplessly overrun and slaughtered by Skynet's machines. Shift to a mangled and helpless Terminator lying on the ground as a human trooper stands above it, taking aim to finish him off. Later in the same scene, there's a flying Hunter Killer that gets taken out with a rocket launcher.
* Terminator 2: Judgment Day, someone shields a child this way in Sarah's dream. Since it is against a nearby nuclear explosion, it has no effect.
* Terminator 2: Judgment Day, some poor passerby gets riddled with bullets for standing between the T-1000 and the T-800 when they open fire.
* Terminator 2: Judgment Day starts the bar scene with a pool table shot before it pans up to show the biker watching the T-800 enter.
* Terminator 2: Judgment Day that apply only to John Connor. It must protect John's life, obey his orders, and preserve its own existence (in that order). At the film's end, the T-800 has to override this programming, disobey John's orders, and initiate its own destruction in order to protect humanity from the threat posed by its existence.
* Terminator 2: Judgment Day the boy from the bullets, although an unlucky janitor is killed in the crossfire. Then T-800 pushes John into an adjacent room and a shoot-out between the two terminators unfolds in the corridor.
* Terminator 2: Judgment Day, the following is said by the Terminator near the end:
* Terminator 2: Judgment Day, the hundreds of pieces liquefy and it completely reforms. Bonus points for the fact it wasn't in perfect order after reforming, losing control of its shape on occasions (Although this is implied to be due to molecular damage from being frozen rather than from being blown apart). This is made more clear in the extended version.
* Terminator 2: Judgment Day. The powers are hinted at with first encounter, their lethality is realized with the death of the foster parents, and they're fully exploited to the limits in the double-finale.
* Terminator 2: Judgment Day, the T-1000 does a subtle one when he runs into a store mannequin that resembles his liquid metal form.
* Terminator 2: Judgment Day: The T-1000 is often explained within fandom as being able to change shape because it is made of nanomachines, even though that explanation is not in the movie.
* Terminator 2: Judgment Day, the T-1000's hijacked semi-truck crashes headlong into a concrete bridge, ruptures its fuel tanks and explodes after a cut electrical wire shorts it. This despite the fact spilled diesel fuel is not explosive.
* Terminator 2: Judgment Day, the T-1000 takes the shape and form of an LAPD patrol officer to pursue John Connor. Nobody seems to question its unethical police hunting skills.
* Terminator 2: Judgment Day: The T-800 asks John Connor's foster mother a question about John's dog, but intentionally gives the wrong name to see if she's actually the shapeshifting T-1000, knowing that if is Janelle, she'll give the correct name. "Janelle" doesn't react to his getting the dog's name wrong, thus confirming it's the T-1000. In the extended deleted scene, as the T-1000 leaves the house, it kills the dog and grabs a bloody dog collar, seeing the name on it and realizing that its target knows that it's there and will be avoiding the house.
* Terminator 2: Judgment Day: The T-800 famously uses a minigun modified to be carried by hand to fend off the police. And it was reported that Schwarzenegger was the only man on the set strong enough to carry it on his own.
* Terminator 2: Judgment Day, the T-800 has his arm trapped and crushed between two gears, and pries it off above the elbow with a metal bar so he can defend John and Sarah Connor from the murderous T-1000.
* Terminator 2: Judgment Day, The T-800 kidnaps John Connor in the second film in order to save him from the T-1000.
* Terminator 2: Judgment Day. The T-800 walks into a bar in the buff and tells some

punk to give him his clothes and his motorcycle. The punk starts a fight. Guess what happens?
* Terminator 2: Judgment Day. The Terminator manages to understand human emotions and to feel them (even overcoming its programming to refuse an order from John), but regrets that as a machine he cannot return the tears that John sheds for him as he sacrifices himself to save humanity.
* Terminator 2: Judgment Day, the T-X does this to Kate's fiancé Scott Mason. When she brings up that the T-X took his form, the T-850 immediately tells her that Scott is dead.
* Terminator 2: Judgment Day to kill anyone. This causes a great deal of conflict (which is further explored in the novelization). The Terminator has to kill anyone who threatens John. In order to complete its' mission, it has to protect itself as well. But all John Conner's orders are to be obeyed. The Terminator gets around this by incapacitating or inflicting non-lethal injuries on any humans who might impede his mission. It helps that none of the humans are actually a threat to John (the T-1000 is, however). If push comes to shove, though, it's very clear the Terminator will use lethal force to protect John.
* Terminator 2: Judgment Day was dubbed three times: the original home video dub (based on the theatrical cut) by AC Create, the Fuji TV dub (based on both, the theatrical and special edition) by Glovision, and the Extreme Edition DVD dub by Studio Echo. Masane Tsukayama dubbed Schwarzenneger in the first dub before he was replaced by Genda in the later dubs.
* Terminator 2: Judgment Day was given an 18 certificate by the BBFC when it was released on laserdisc in 1992 (a censored 15-rated version was released theatrically and on VHS). The Special Edition was later granted a 15 certificate in 2001 with all previously-censored footage intact.
* Terminator 2: Judgment Day was the hit sequel to what 1984 sci-fi film?" The game did not seem to be kidding, either.
* Terminator 2: Judgment Day we see the T-101 (Arnold), the 6'2" unstoppable killer robot who for the whole last movie was one of the most menacing things ever put to film, get thrown around like a rag-doll by the considerably shorter and skinnier T-1000. Mainly at the end of the movie, though; earlier in the film, he tends to keep the upper hand. For the most part, if its a gunfight, the impervious T-101 will win. If it's a fistfight, the intangible T-1000 will win.
* Terminator 2: Judgment Day, when he is disturbed by his son's remote control truck.
* Terminator 2: Judgment Day when he tries to break into the elevator.
* Terminator 2: Judgment Day when he warns John about the "cop" looking for him in the mall and tells him to split. Without him being there, the T-1000 would have found John and assassinated him before the T-800 was able to locate him.
* Terminator 2: Judgment Day when she breaks the doc's hand, even if she is wrong.
* Terminator 2: Judgment Day, when taking one of the asylum guard's places, the T-1000 copies the appearance of the guard as it rises up from the floor. The real guard takes notice too late.
* Terminator 2: Judgment Day. When the dot-matrix display programming was nearly completed, the "liquid metal" T-1000 was public knowledge, which allowed him to be included in the display animations.
* Terminator 2: Judgment Day: When the T-1000 is frozen by liquid nitrogen flowing from a ruptured tanker truck, the T-800 shoots him, causing him to shatter into thousands of pieces. However, the heat from a nearby smelting tank allows the shards to melt back into liquid metal, enabling the T-1000 to reform and resume chasing the protagonists and remain a threat. However, a few deleted scenes reveal that he is "glitching." Justified in that the character is a terminator and not a human being.
* Terminator 2: Judgment Day. While John Connor is talking to his foster mother Janelle on the phone, their dog Max is barking like crazy outside. John's foster father Todd yells at Max to shut up. A few seconds later we find out why Max was barking: Janelle reveals herself to be the T-1000 pursuing John and stabs Todd through the head to shut him up.

* Terminator 2: Judgment Day, who after being asked by John Connor to not kill others, ends up very caring of John and Sarah, who in the film's closing monologue downright notes that if a Terminator (who, might we remind you, is the same type of robot who was the villain in the first film) can learn the value of human life, maybe the future is not lost.
* Terminator 2: one of the four drop targets flashes when a ball starts, progressing back and forth. Hitting it scores 500,000 points (with 100,000 more each time it's made).
* Terminator-2 shows an elderly Sarah Connor watching as an adult John plays with his daughter.
* Terminator 2, when the T-1000, disguised as a cop, needs to find John Connor, he enters his name in the police cruiser's computer, which displays a long list of infractions and misdemeanors. When the T-1000 arrives at the foster home, his foster parents nonchalantly ask "what did he do now?"
* Terminator 3" Ebert remarked wryly, "You have to admit 'wall-to-wall action' does accurately describe the film. So does my closing sentence: '...dumbed down for the multiplex hordes.'"
* Terminator 3: Rise of the Machines, and can hack into most mechanical systems and operate them remotely. The odds are tipped even more in the machines' favor, since the friendly T-850 fully admits that it's a depleted model compared to the T-X.
* Terminator 3: Rise of the Machines, and who becomes one of the leaders of the Resistance following Judgment Day, as well as Connor's wife. The previous two films in the series never mentioned her.
* Terminator 3: Rise of the Machines Arnie gets shot in the head, but there's no visible wound. He moves his jaws around a bit, spits out the bullet and tells the shooter "Don't do that." From the looks of it, he was shot in the mouth (although why it didn't tear his lip is a mystery) and the bullet was stopped by the metal of his spine. Presumably it would have ricocheted off his teeth.
* Terminator 3: Rise of the Machines can turn its arm into an energy gun and a flamethrower, among other weapons.
* Terminator 3: Rise of the Machines, complicating an already complex rights ownership situation. Rights bought in 1997, Schwarzenegger hired in 2001, the movie came out two years later.
* Terminator 3: Rise of the Machines deliberately tries to invoke this trope (as stated by Director Johnathan Mostow in the DVD commentary) during the reminiscing scene between John Connor and Kate Brewster in the back of the vet truck.
* Terminator 3: Rise of the Machines). Despite all the criticisms, Arnold's performance and the action sequences are widely praised.
* Terminator 3: Rise of the Machines during "Blitz", complete with an animation of blast doors closing.
* Terminator 3: Rise of the Machines effects, as well as not suffering from the T-1000's inability to create complex tools from its substance.
* Terminator 3: Rise of the Machines: Elizabeth Anderson. T-X arrives at their house and shoots her brother, right before heading upstairs looking for Elizabeth. While she likely would have been killed by T-X, the large number of people at the party and the likely police response time might have made identification difficult. It's never explicitly stated that TX was able to find the right girl and kill her before moving on to the next name on the list (Kate).
* Terminator 3: Rise of the Machines. Finding John Connor was just a bonus.
* Terminator 3: Rise of the Machines, given that it's Kristanna Loken and all.
* Terminator 3: Rise of the Machines has a Plasma Cannon in her left arm. She uses it to launch pinballs at the player.
* Terminator 3: Rise of the Machines has a theatrical dub, a home media dub, and a TV dub, with the first two dubs sharing most of the same cast except for John Connor. All three dubs feature Genda dubbing for Arnold.
* Terminator 3: Rise of the Machines. He drops them on the ground and crushes them with his boot, then finds a better pair in the car he steals.
* Terminator 3: Rise of the Machines he now enters a club during Ladies Night naked for the same reason (taking them off the stripper who's already on stage). In that

case, the all-female clientele don't restrain their enthusiasm.
* Terminator 3: Rise of the Machines is a downplayed version of this. It's composed of liquid metal over a solid Terminator skeleton. Due to this it can't do quite as much reshaping as the entirely liquid metal T-1000, in exchange for having the hardware to do some things the T-1000 couldn't, but it can still alter its appearance and take on people's identities.
* Terminator 3: Rise of the Machines is designed by SkyNet as an "Anti-Terminator Terminator", presumably to counteract the human resistance's repeated reprogrammings of captured Terminator models. Her design includes nanotech to reprogram and remote control other machines. Throughout the film these include cars, trucks, primitive T-1s, and even the Arnie T-850 at one point.
* Terminator 3: Rise of the Machines: John Connor has this reaction upon finding out that there is an "anti-Terminator Terminator" in the form of a T-X.
* Terminator 3: Rise of the Machines, John shields Kate several times, once by literally dragging her below him, to cover her, usually from debris.
* Terminator 3: Rise of the Machines, Kate Brewster — aside from a moment where she shoots down a Hunter-Killer, prompting John to say she reminds him of his mom.
* Terminator 3: Rise of the Machines lives and breathes this trope — the playfield's predominantly red color scheme is broken up by the stainless steel ramps and chrome pipes everywhere, while the red-tinged backglass is only interrupted by the merciless Terminators glaring at you.
* Terminator 3: Rise of the Machines, mirroring the movie's plot. It could also be interpreted as a robot-vs.-robot war, with the player (as the T-850) against the T-X.
* Terminator 3: Rise of the Machines movies will continue with this idea—even Terminators are shown to be stockpiling weapons and supplies for this purpose.
* Terminator 3: Rise of the Machines of dollars, total nuclear annihilation notwithstanding.
* Terminator 3: Rise of the Machines pinball share the same licensee and the same creator, but are released by different companies. Whether this makes them direct sequels or not depends on how one defines "successor".
* Terminator 3: Rise of the Machines, represented in-game by the player-controlled ball launcher in the backbox.
* Terminator 3: Rise of the Machines, she has several alternates built in, including a flamethrower.
* Terminator 3: Rise of the Machines showed the apocalypse happening as nuclear missiles rained down on cities
* Terminator 3: Rise of the Machines, so T3 (which in several respects is thematically closer to the first movie) gets a lot of flak over this issue.
* Terminator 3: Rise of the Machines starts this, where the entire playfield is illuminated with red flashers and all shots are worth 1 million points.
* Terminator 3: Rise of the Machines takes place in the span of about 12 hours.
* Terminator 3: Rise of the Machines. The only non-badass characters are the tiny figures of John and Kate cowering behind the T-850.
* Terminator 3: Rise of the Machines: The T-800 fires 750 rounds into the police cars, but only one of them explodes. All police cars have a serious amount of bullet holes in them after the shooting. Maybe the Terminator doesn't like the Chevrolet Caprice.
* Terminator 3: Rise of the Machines, the T-850 has one of these, even with half of his face gone.
* Terminator 3: Rise of the Machines, the T-850 is using a Gatling gun in the ball saver animation.
* Terminator 3: Rise of the Machines, the T-850 kidnaps Kate Brewster to save her from the T-X.
* Terminator 3: Rise of the Machines, the T-X calls up a modem and "speaks modem" to it on the phone to access a computer.
* Terminator 3: Rise of the Machines: The T-X can scan DNA in blood samples using its mouth.

* Terminator 3: Rise of the Machines: The T-X has a much stronger armored chassis than the T-800, and thus shrugs off even greater firepower.
* Terminator 3: Rise of the Machines, the T-X's fingers twitch just after being rammed head-on by the T-850's pickup. In this case, it shows just how tough the new Terminator model is.
* Terminator 3: Rise of the Machines: This is how the T-X can determine the identity of her victims if there is ever any doubt. (DNA scanners in her tongue. Who'd have thought it?)
* Terminator 3: Rise of the Machines was given a R-rating in the U.S. like the other films, but in the UK it was rated 12A, the first in the franchise to get that rating.
* Terminator 3: Rise of the Machines was played as corny even in-universe.
* Terminator 3: Rise of the Machines, when the T-850 needs to take the clothes of a male stripper.
* Terminator 3: Rise of the Machines, where the T-X uses nanomachines to take control of electronic devices and primitive robots.
* Terminator 3: Rise of the Machines, which forces her to crawl after her target.
* Terminator 3: Rise of the Machines; while it is theoretically more vulnerable because of the skeleton, it has the ability to carry onboard weaponry and isn't vulnerable to things that can damage a T-1000 specifically. For instance, near the end of the film the heroes activate a supercollider that acts like a powerful electromagnet, peeling the liquid metal off of T-X and short circuiting it, which would have killed a T-1000, but the T-X uses its skeleton to pry itself off the supercollider and disable it.
* Terminator 3: Rise of the Machines, with the player in the role of the T-850. Symbolized in-game by the two Terminator heads on the playfield.
* Terminator also has him wearing sunglasses for no particular reason.
* Terminator a robot. Albeit a liquid metal one, with detached parts reverting and being reabsorbed into the main mass.
* TerminatorAVs, something that many games featuring such drones forget.)
* Terminator because John Connor ordered the T-800 not to kill anybody; the Terminator's HUD implies that nobody was even injured. ("Casualties: 0.0", suggesting that it might have assigned a decimal point for someone with a bullet wound who was not dead.)
* Terminator, being set in sunny California instead of a place with "cyberpunk rain", and the computing hardware used is largely contemporary outside of the featured (time-traveling) robots.
* Terminator construct means almost no damage done to it is permanent and it'll just reseal holes blown in its torso or head.
* Terminator: Dark Fate: A bunch of security guards try this on the Rev-9 Terminator. He impales them by sprouting spikes all over his body.
* Terminator: Dark Fate and allow for impressive strength/durability feats. But given she's still mostly human, at certain points she gets overexerted and requires medicine to recover.
* Terminator: Dark Fate, but grows into it over the course of the film. By the end, she doesn't hesitate to take on the Rev-9 solo.
* Terminator: Dark Fate, costing the studio between an estimated 110 and 130 million dollars once everything was said and done.
* Terminator: Dark Fate from the future appears at the top of the dam. So Grace cuts the parachute cords.
* Terminator: Dark Fate, it's clear why such issue would be more important than physicality.
* Terminator: Dark Fate makes the case that even the most important person is completely expendable and AI will always be bad no matter how or why it was created.
* Terminator: Dark Fate message by once again declaring that Judgement Day is inevitable.
* Terminator: Dark Fate opens in 1998, the rest of the film occurs in 2020.
* Terminator: Dark Fate, REV-9 disguises itself as a US ICE Border Patrol officer

while searching for Dani at the illegal immigrant processing centre.
* Terminator: Dark Fate. Sending all the Terminators to 1984, 1995 or even other periods very close in proximity would have made more sense.
* Terminator: Dark Fate T-800, as Reese was right and Skynet had sent out multiple Terminators throughout the timeline. It's then seemingly subverted, since killing John at this point doesn't change Cyberdyne's destruction in the past, and Skynet is wiped from existance... only to play it straight when it's revealed that just because Skynet never existed doesn't mean that humanity stopped working on military A.I's, and a completely separate A.I called Legion gains sentience and unleashes it's own Judgement Day, as well as even more powerful Terminators known as Rev-9, starting the cycle all over again with a new target.
* Terminator: Dark Fate: The 2019 film's controversial prologue is set in 1998.
* Terminator: Dark Fate). The minor role of Carl's wife Alicia is played by Alicia Borrachero.
* Terminator: Dark Fate The trope is played straight with the Rev-9 Terminator who turns up at his target's house posing as a friend, and the dog immediately starts barking at him.
* Terminator: Even though the terminators through out the franchise have been referred to as cyborgs (which in the strictest sense of anything composed of biological material and robotic technology can be true), they are non-living machines with living tissue attached to themselves instead of being living beings with technological modifications grafted onto their bodies.
* Terminator ever made will do this to someone/something at least once.
* Terminator: Ever since SkyNet churned out Terminator robots disguised as humans, the Resistance found a way to counter this by training "sniffer" dogs to smell human hands, and they can be further trained to hear the sound of Terminator servos moving, which is too low to be detected by humans.
* Terminator) fall into this, though admittedly the non-powered, human protagonists tend to get at least as much screen time as the butt-kicking cyborgs sent back in time to protect them.
* Terminator films. Small arms guns like pistols, shotguns and machineguns, at best, only stun the Terminator and knock it off balance. The only way to defeat them is with the use of explosives and the environment.
* Terminator films, specifically the first three films were dubbed multiple times in Japanese:
* Terminator films, Terminators have a habit of hijacking a vehicle, then ordering the driver to "get out". Presumably, scaring the driver out of the vehicle is less time-consuming than killing him and dumping his body outside. They'll also eagerly use non-lethal attacks if it's the fastest and most effective way to get non-targets out of their way.
* Terminator for being around Lunar and later opens fire on him for "touching" Lunar's butt.
* Terminator for the majority of the film. The "only organic material can travel through time" rule was also made to save costs on expensive futuristic weaponry.
* Terminator franchise creates a perfectly spherical bubble for the traveler, cutting out any matter that happens to be in the way of the destination.
* Terminator franchise use this plot device to justify Sarah Connor's voice-over narration.
* Terminator franchise with the Connor family (Sarah and John), with them being called "Conner" on a regular basis.
* Terminator Genisys: A flashback happens to the murder of Sarah Connor's parents in an altered 1973.
* Terminator Genisys after being told John Connor is his son. "That's the man our son was...is...will be...Jesus!" On top of the confusion of time travel being funny, John Connor is an analog of Jesus Christ, prophesied savior of humankind.
* Terminator Genisys. After our heroes get arrested we have the classic police mugshots of the towering male heroes, whereas Sarah Connor is so short she barely appears in the frame.
* Terminator Genisys also spans about 2-3 days, during which he time travels twice.

* Terminator Genisys and wipes out an entire roomful of Resistance soldiers.
* Terminator Genisys before it can cause judgement day in the first place, with the T-3000 in turn sent to protect Skynet. Confused, yet?
* Terminator Genisys by shooting its head off with the .50 caliber rifle.
* Terminator Genisys disrupted, the nanomachines can disperse and move any way they wish within an undefined cloud. While in a human disguise, it could also fake a normal reaction to being shot, complete with fake blood that reconstituted into nanomachines when the ruse no longer served a purpose.
* Terminator Genisys film, erasing the "original altered timestream" mentioned above and starting over.
* Terminator Genisys had become too old to play the Terminator anymore.
* Terminator Genisys has the "Pops" T-101 use this kind of language. Sarah Connor seems to understand him fine, but Kyle Reese doesn't, repeatedly asking questions like "Does he have a button to turn it off?"
* Terminator Genisys. He tries to warn the authorities about the dangers of Skynet but nobody wants to listen.
* Terminator Genisys immediately convinces Kyle that he's the real one.
* Terminator Genisys is sent in 2014 to share his knowledge with Cyberdyne to create SkyNet in the form of the Genisys artificial intelligence software.
* Terminator Genisys, John Connor hitches a ride underneath the school bus Sarah is driving and takes advantage of the position to tear a lot of things up — including the brakes.
* Terminator Genisys John Connor reveals to Kyle Reese that he is his son in 2017. Kyle is understandably shocked.
* Terminator Genisys. Kyle Reese, Sarah Connor, and the T-800 getting arrested in 2017. The scene immediately cuts to them getting their mugshots taken, all while "Bad Boys" by Inner Circle plays in the background. Because Sarah is so short compared to the other two, we only see the top of her head in the frame.
* Terminator Genisys lampshades it,Lampshaded with Kyle Reese trying to convince Sarah Connor to not trust the "Guardian" T-800, on the grounds that it might have hidden programming that it's not even aware of.
* Terminator Genisys looks like a 60+ year old Arnold Schwarzenegger and not the 30 year old original model? Because he overshot the mark when sent back in time and his organic parts have been aging. Just like human parts do. He's still the same unstoppable combat chassis underneath the aging meat, though.
* Terminator Genisys of the above, also involves the same two time-travelers from 2029.
* Terminator Genisys. Sarah Connor encounters a T-1000 disguised as Kyle Reese at about the same time the actual one comes in. After a short standoff, she shoots one in the foot and it's the T-1000. Kyle is not amused when Sarah admits that she wasn't totally sure and so went for a non-fatal wound.
* Terminator Genisys shows signs of malfunction and disrepair after spending 30+ years looking after Sarah Connor. Even a Terminator can't last forever, especially in a time that doesn't have the technology to properly repair him. His joints actually stop working for a few seconds at a couple points in the movie. He's old...but not obsolete.
* Terminator Genisys's production company going bankrupt. The hedge fund they owed money to became the rights holders before selling them to Megan Ellison's Annapurna Films in 2012. Ellison's brother David and others from his Skydance Productions agreed to co-produce the film, which came out three years later.
* Terminator Genisys, the ability to do this is one of the major advantages the T-3000 has over the T-1000, due to being a swarm of nanites held together by magnetism rather than a pool of liquid metal. Although for some reason he only bothers to do it in the very final fight, even though it would have been pretty useful earlier.
* Terminator Genisys who's been dealing with Terminators her whole life.
* Terminator got translated to something along the lines of "Deadly Mission" or "Deadly Quest").
* Terminator has frequent Stat-O-Vision scenes from the PoV of Cameron, Cromartie,

and other Terminators.
* Terminator. He's the linchpin of the rebellion and the world would be doomed without him.
* Terminator, however, Reese was sent back with another soldier, who was killed on arrival when he materialized halfway through some of the scenery.
* Terminator implies that Skynet is doing it purely out of malice, as it already has plenty of automated production lines.
* Terminator, including clothing, and as a result, are always naked when they appear in the present day.)
* Terminator indulges heavily in this. Both Sarah and John are heavily shaped by their years living underground "just in case", and when Cromartie comes after them it is intensified. This is also the focus of the episode "Alpine Fields", in which two guest characters are depicted in two time frames, one when Sarah and Cameron come to rescue them from a Terminator when they have no idea what's going on, and one some time later after they've spent a while on the run.
* Terminator in efforts to change the pre-war past (and thus the outcome of the future war).
* Terminator-inspired. Someone on the heroes' side even comments "Good thing he's on our side."
* Terminator. In the "Minigun vs. Policeforce" scene, particularly, it seems to measure the total combat-strength of the entire platoon. The only model never given a point-of-view shot is the liquid metal T-1000.
* Terminator is the most famous western case, as its travels back in time resulted in it "fathering" its own master Skynet. Technically, it could be said that it simply caused Skynet to develop sooner rather than being the cause of its existence altogether.
* Terminator: it was Skynet that started it. Kyle Reese says that nobody even knew who'd started it (i.e. at the time the bombs began falling), then reveals that "the machines" were to blame.
* Terminator, James Cameron directed both actors to lock up for several seconds during the first fight scene in the galleria because neither Terminator is sure what to do when grappling with another machine; later in the film during the fight in the steel mill, the T-800 tries to use the same tactics it would have used against humans which leads to it getting curbstomped, while the T-1000 is left to basically pummel the other machine while it struggles to find the T-800's power core, and then it gets surprised when the T-800 uses a backup power source to come back.
* Terminator: Most Terminators are prone to this. Sometimes too slowly to catch their victims.
* Terminator movies (even though side effects cause some ontological paradoxes).
* Terminator movies show Arnie with one human-like eye and one glowing red machine eye, showing the bad-assedness of having one normal eye and one weird high-tech eye.
* Terminator never loses its red eye, but always loses the eye covering. In this case, their eyes likely ARE unbreakable, or very near so.
* Terminator packing a shitload of badass weaponry to hunt down badass aliens...hell, even the adorable little girl is badass.
* Terminator. Plus it can dual-wield assault rifles due to its immense strength.
* Terminator Randall blows away a terminator and is shown to be... a hot nekkid babe! Needless to say, on arriving in the 20th century she starts wearing tight minidresses.
* Terminator. Reese mentions in passing that the "current" generation of Terminators are the first full cyborgs with true organic skin. They replaced earlier models that had unconvincing rubber skins that made them easy to spot as fakes.
* Terminator repeatedly sending their agents back in time to subvert each other.
* Terminator reveals the existence of machines who have decided to fight Skynet on their own.
* Terminator rifle. That's enough to take out RoboCop's extra weapons and jet pack,

but the T-800 still winds up blown in half. Even then, it is able to detonate it's hydrogen fuel cells. Unfortunately for it, RoboCop launched it far enough away to be out of the blast range.
* Terminator robots are incredibly tough and not the least bit fragile.
* Terminator Salvation, although to be fair, it is set years before the other future scenes seen in the other movies, so perhaps handheld energy weapons haven't been invented yet. The giant robot though seems to have a energy weapon of some sort.
* Terminator Salvation and thus don't even have a regular logo to speak of) are shocked by static.
* Terminator Salvation, a T-600 sacrifices its foot to free itself from a rope trap.
* Terminator Salvation, but his version of events carried the right mix of horror and faint hope.
* Terminator Salvation episode "Allison from Palmdale", where the Terminator Cameron believes she is a human girl.
* Terminator Salvation franchise for $10,000. This was apparently not taken seriously, as the rights were up for sale, and ended up not being sold.
* Terminator Salvation has an interesting case. Though he is always a cyborg, Marcus was attacked by all Skynet robots when he believed he was "human." But after being outed in the resistance base he manages to infiltrate Skynet central in San Francisco because, thanks to this realization, the machines registered him as "Active".
* Terminator Salvation has Marcus and Blair by the fire. The scene where Blair washes herself topless as Marcus looks on was cut from the theatrical release, but reinstated into the special edition Blu Ray disc.
* Terminator Salvation, her intuitions tend to be useless unless someone is looking at her at the right moment to notice her panic attack.
* Terminator Salvation. His broadcasts contain his message of hope, along with useful advice about fighting the machines. He is doing that against his superiors' wishes, though.
* Terminator Salvation. However it did cause the tanker to start leaking, and he then uses a flare on the puddles of fuel, which proved to be MUCH more effective.
* Terminator Salvation is a human turned Terminator who still has his original brain, heart, and most of his internal organs encased in a robotic endoskeleton.
* Terminator Salvation is basically a flesh-covered robot over robot-covered-flesh. His brain, his heart and certain other functions are all organic, and his flesh and skin are his own. His brain, however, is outfitted with a chip that not only relays information to Skynet, but allows the supercomputer to give him subtle "nudges" to carry out directives.
* Terminator Salvation is blown to pieces for invading the place's airspace.
* Terminator Salvation is set in Eurostile Bold Extended. Eurostile is also used for on-screen computer interface designs throughout the film.
* Terminator Salvation, Kyle Reese (ca. 16) and Marcus (ca. 35) become not only friends, but real battle brothers.
* Terminator Salvation, Kyle shoots a tanker trunk several times, and is shocked when it doesn't explode. What does the trick is dropping a road flare on the spilled fuel.
* Terminator Salvation makes the trope particularly clear, with a radio message being received by sparse resistance fighters across the entire planet.
* Terminator Salvation manage to critically wound John and if Marcus hadn't volunteered for a heart transplant, John probably would have died. Skynet doesn't even seem concerned when the fight spills into the T-800 assembly line, where countless Terminator power cores (I.E. easily set off miniature nuclear devices) lay for the humans to jury rig into a bomb that will destroy the entire base if they manage to defeat that lone T-800 you sent to kill them.
* Terminator Salvation, Marcus Wright shields Blair from the fire in the tunnel.
* Terminator Salvation reaches down through the roof of an abandoned gas station and starts grabbing people to put in cages.

* Terminator Salvation re-shot to change the ending into one that audiences would accept.
* Terminator Salvation seems to take about 2-3 days, but is less clear on it.
* Terminator Salvation, Skynet can't help but explain the genius of its master plan to one of its unwitting pawns and smugly gloat how it has used him for its own purposes and tells him to accept his newfound nature.
* Terminator Salvation starts with the execution of Marcus Wright. We find out quickly that he killed a cop.
* Terminator Salvation: The T-600 could be damaged by John Connor's automatic rifle, as he headshots one to kill it near the start of the film, and a gatling gun attached to a helicopter is enough to finish off a second. The T-800 RIP at the of the film, however, is even more impervious than T-800s from the earlier timeline—able to walk through weapons and molten metal that the others were damaged by.
* Terminator Salvation. The T-600s robots have Gatling guns attached to their arms.
* Terminator Salvation: Though not technically cops, the human resistance has a similar problem, barely able to summon a poorly-armed token force to deal with the machine incursion but sending out a battalion to deal with the mistakenly-villified hero.
* Terminator Salvation when they ram a fuel tanker into the Harvester. Kyle Reese shoots it a few times, but it doesn't explode. (In say, a Michael Bay film, you'd have expected a slingshot to make it blow up like a nuke.) It finally goes up in a giant fireball when the fuel leaking from the shotgun holes is ignited with a flare. (This is actually probably one of the most realistic examples of the way things explode in real life. Nothing was going to happen until the escaping fumes hit the right fuel-air ratio for combustion.)
* Terminator Salvation, who ties him up and interrogates him, before untying him when he sincerely doesn't understand why the hell he's tied up, just so he can see it for himself. Cue the horror.
* Terminator Salvation would most definitely count, as would the semi-humanoid tanks from the earlier movies.
* Terminator Salvation writers of the script when you include Jonathan Nolan and the two guys who actually did the original script, and the ending was fundamentally altered after test audiences reacted negatively.
* Terminators are termed cybernetic organisms, though they can survive without the organic parts. Cameron has said his initial concept had the Terminator would depend on its organic parts, to reflect on how society needs machines. That metaphor didn't make it into the movies. The cyborg terminology is correct in this sense: the flesh is a useful part of the whole stealth weapon system.
* Terminators, a Terminator is searching the schools for John Connor by posing as an FBI agent carrying out a drugs investigation. The school administrator asks him "Look me in the eye and tell me you've never smoked a little marijuana." The terminator does just that (it is, after all, true!).
* Terminator sequels introduced a more advanced Terminator model as the antagonist. There are plot reasons for this, since Skynet is sending Terminators back into the past from increasingly later points in the future, thus the models are stronger than the previous ones.
* Terminator series and spinoffs use the implacable man variant, with a damaged Terminator pursuing an injured human, especially in the climax of the first movie.
* Terminator series is a killing machine, as discussed in the page quote.
* Terminator shows giant mecha robots in Skynet's army that are used to round up human survivors.
* Terminators infested with Daemons or Tyranids in search of lost artifacts.
* Terminator story where the robots do not have the upper hand in the overall conflict. Later sequels to the original film go back and forth on this (as the mucking about in the past starts changing the events of the future).
* Terminators, which is tinted in either red or blue instead of full-color, but the robots see perfectly under any light condition.
* Terminator television series, a case where she didn't start out as an Action

Girl, but definitely became one after she gave birth to John.
* Terminator territory by the fact that he saved on a 2 on 2d6. Unless you had a meaty gun that imposed modifiers on the save roll, you would always save.
* Terminator that just happens to have a time-traveling Austrian-accented robot as the killer.
* Terminator that the former is actually the villain while the latter is the hero, the T-800 begins talking more frequently, while the T-1000 is almost entirely silent for the rest of the film, only having two really brief conversations from that point (four if you count when it's taking someone else's form).
* Terminator: The first three movies are about a mother and/or son being hunted by a killing machine (literally) sent back in time to eliminate the protagonists and change the future.
* Terminator: The Sarah Connor Chronicles’s first season, Derek needs a blood transfusion. Apparently, he needs his own blood type despite being AB ("Universal recipient", able to take blood from any other type)... Sarah said she was type O ("Universal donor", able to give blood to anyone), but her biological son John was AB?! Even if John's father Kyle was also AB, John must have an O from his mother, so he's either A or B, yet his not-AB-blood worked just fine...
* Terminator: The Sarah Connor Chronicles: 2007-8 season: on Monday nights. 2008-9 season: moved to Friday nights. 2009-10 season: Terminated.
* Terminator: The Sarah Connor Chronicles after killing her, in an attempt to infiltrate John Connor's resistance. It is all but outright said that she failed, was captured, and reprogrammed by John. Several other terminators in the series have done the same thing, most notably the machines impersonating Greenway and Vick.
* Terminator: The Sarah Connor Chronicles : After Sarah finishes telling Charley about the Terminators, he takes a deep breath.
* Terminator: The Sarah Connor Chronicles after she picks up that limp at the beginning of the second season.
* Terminator: The Sarah Connor Chronicles after suddenly encountering an armed Terminator at close range.
* Terminator: The Sarah Connor Chronicles against Terminators, the battles rapidly devolve into environmentally-destructive fisticuffs.
* Terminator: The Sarah Connor Chronicles, a girl at the high school that Cameron and John are attending under assumed identities is exposed as having carried on a relationship with one of her teachers, and kills herself when this is made public.
* Terminator: The Sarah Connor Chronicles, always speaks this way in combat situations. At one point, she's pinning another Terminator in place that's trying to crush her and kill everyone else, asks for a knife and then pliers to extract its chip in the same tone one would order coffee. Later on, after punching another rampaging Terminator through a wall and blowing it apart, she glances to Derek and remarks "Sometimes they go bad." as if she'd just stepped on an insect.
* Terminator: The Sarah Connor Chronicles and cold machines, except in a very few select moments where she does show hints of anger or fear. In particular, one scene in the episode "Mr. Ferguson Is Ill Today" shows her moving through a police station, frantically (in a disturbingly calm way) looking for John, or her pleading for her life in "Samson & Delilah".
* Terminator: The Sarah Connor Chronicles, and for that matter the rest of the Terminators. But especially Cameron.
* Terminator: The Sarah Connor Chronicles and his fight with the boy recalls that one.
* Terminator: The Sarah Connor Chronicles and she's afraid she'll go on a homicidal rampage again in the future, and gives the detonator to John Connor.
* Terminator: The Sarah Connor Chronicles an Uncomfortable Elevator Moment when a family steps onto the elevator in the middle of their duel. As soon as the family steps off, they resume beating the crap out of each other.
* Terminator: The Sarah Connor Chronicles, anytime Cameron smiles, you should be on your guard. No matter what, that smile is intended to manipulate you.
* Terminator: The Sarah Connor Chronicles, a poor secretary discovers a Terminator

waiting in the back seat of her car. She promises not to scream. Don't make promises you can't keep...
* Terminator: The Sarah Connor Chronicles. As the future savior of humankind, John is too important to be sent out on missions or otherwise put in the line of fire. Instead, Terminators actively seek him out, with his allies constantly fighting to keep him safe. The few times he has had to go up against a Terminator alone, he demonstrates remarkable cunning, ingenuity, insight, and downright sheer badassery.
* Terminator: The Sarah Connor Chronicles attracts the attention of several men who work at a nuclear power plant by visiting a bar they frequent and asking for "help" in playing pool. While one man gives her a hands-on approach in handling the pool cue, she takes the opportunity to scan his badge's bar code, and then proceeds to thoroughly school the whole group in the subsequent game of pool.
* Terminator: The Sarah Connor Chronicles be changed, but it's got a hell of a lot of inertia.
* Terminator: The Sarah Connor Chronicles Cameron appears to identify with this, because she lets her live in "What He Beheld".
* Terminator: The Sarah Connor Chronicles: Cameron does this quite often, though its justified by the fact that she's a super-strong killer cyborg
* Terminator: The Sarah Connor Chronicles, Cameron installs a bomb in her head and gives John the detonator, in case she ever becomes a threat to him. She has good reason to worry about this because it's happened to her before and nobody (not even the Terminators themselves) knows what causes a reprogrammed Terminator to suddenly revert to its default programming.
* Terminator: The Sarah Connor Chronicles, Catherine Weaver's daughter Savannah wets herself when her mother (who was really not her mother, but a T-1000 who took her form) told her somewhat sternly to sit down beside her during a photo shoot promoting her company, Zeira Corp. The child supposedly knew something was "off" about "her mother".
* Terminator: The Sarah Connor Chronicles character's daughter notes that she can't sing. Extra irony since a cover by Manson of the spiritual "Samson and Delilah", recorded specifically for the show, had been prominently used at the beginning of the episode that introduced her character.
* Terminator: The Sarah Connor Chronicles, "come with me if you want to live" is how Cameron identifies herself to John.
* Terminator: The Sarah Connor Chronicles, Derek slaps his hand across a little girl's eyes as he shoots a guy in front of her.
* Terminator: The Sarah Connor Chronicles due to her inability to show anything close to grieving. Well, that and the fact that she's the only one with motive.
* Terminator: The Sarah Connor Chronicles: During the episode "Some Must Watch While Some Must Sleep," Sarah gets injected with something, and her assailant tells her she'll be talking within three hours.
* Terminator: The Sarah Connor Chronicles episode "Goodbye to All That".
* Terminator: The Sarah Connor Chronicles, features a fight scene between Cameron and another female Terminator in which Cameron literally ties her adversary in a knot before killing her. The Terminator was played by Bonnie Morgan, a professional contortionist who could actually undergo that without special effects and survive.
* Terminator: The Sarah Connor Chronicles finds Cameron — his Terminator love-interest — with her chip missing. Ignoring Judgment Day's impending arrival and his mission to stop it, he leaves his mother, and joins forces with a rogue T-1000 (liquid metal Terminator), jumping to the future in order to rescue her. In jumping after Cameron, John seems to have erased himself from the timeline, veritably sacrificing himself and his position of mankind's savior to save the "woman" he loves.
* Terminator: The Sarah Connor Chronicles for Jesse, in which we discover that she was the first mate on a future-human submarine captained by a reprogrammed Terminator, and that she led an Anti Mutiny against him because she and the rest of the crew wrongly (because he inflexibly refused to tell them the truth about their secret mission) believed that he'd reverted and was betraying them to Skynet.
* Terminator: The Sarah Connor Chronicles for large hunting knives. She also

carries what looks like an Exacto knife on her for when she suddenly has the need for cutting things, as opposed to punching them through walls.
* Terminator: The Sarah Connor Chronicles from an exploding building, but doesn't even bother to out-pace the explosion, as immolation is hardly even an inconvenience for her.
* Terminator: The Sarah Connor Chronicles. Given the fact that these chips are installed on machines being sent back in time, it actually makes sense that they would be built to be backwards compatible, if they were designed to interface with older systems.
* Terminator: The Sarah Connor Chronicles, giving her the necessary slipperiness.
* Terminator: The Sarah Connor Chronicles. Granted, he's trying to get away from a Terminator.
* Terminator: The Sarah Connor Chronicles had a basement with names, numbers and dates written on the walls, in blood.
* Terminator: The Sarah Connor Chronicles has an exchange where Derek asks John why the two women (Cameron and Sarah) were sent into a dangerous situation instead of the men. John responds, "...and one of the girls is harder than nuclear nails." Derek adds, "...and the other is a cyborg."
* Terminator: The Sarah Connor Chronicles has a particularly poignant one when Charley Dixon's wife dies.
* Terminator: The Sarah Connor Chronicles has a tendency to execute people or leave them to die when she has no further use for them, because her internal logic prioritizes her mission to protect John Connor above all else. In a few instances, she outright executes people whose only crime was to potentially endanger John's life; for example, she kills a trio of burglars who robbed the Connors' house because they had accessed their identification and financial information, but that information would allow someone else to track them down.
* Terminator: The Sarah Connor Chronicles has the AI John Henry and Savannah Weaver singing " Where's Your Trousers?" over scenes of Sarah being taken in by police and Derek's burial.
* Terminator: The Sarah Connor Chronicles; he committed espionage, knowing that DNA evidence would implicate his younger self.
* Terminator: The Sarah Connor Chronicles. Hunted by law enforcement as such, though their goal is to prevent the creation of Skynet, their means are still attacks on private and federal property, kidnapping, sabotage and even outright murder.
* Terminator: The Sarah Connor Chronicles: "I'll never help you get to John Connor."
* Terminator: The Sarah Connor Chronicles implied to be the relationship between future John Connor and Cameron, and almost happens between the current John and Cameron.
* Terminator: The Sarah Connor Chronicles, in love with John from the get-go. Her human companions are constantly telling her she can't feel, despite obvious displays of emotion on her part and her pointedly stating that she wouldn't be much use if she couldn't feel. Sometimes she plays this up, however, denying she can feel when clearly upset, annoyed, jealous or shocked.
* Terminator: The Sarah Connor Chronicles : In "Today is The Day Part Two" John is waiting in Jessie's hotel room.
* Terminator: The Sarah Connor Chronicles, in which Cromartie's body seeks out his head which does not appear to have any activity.
* Terminator: The Sarah Connor Chronicles is able to spin a convincing cover story at the drop of a hat — a skill honed by years on the run. At one point she spends an entire episode being treated for a bullet wound while holding conversations with a hallucination of Kyle Reese; in her lucid periods, she's able to spin the true things she has let slip about her past into a domestic violence narrative, convincing the doctor to treat her without calling the police.
* Terminator: The Sarah Connor Chronicles is also a benevolent intelligence, though this is partly because she was reprogrammed to be that way, with a risk of her going rogue and reverting to her old programming.

* Terminator: The Sarah Connor Chronicles is ballet dancing, and later on in the series it is revealed that Allison Young, the girl whose face and identity Cameron stole, had a mother who liked that same song. Coupled with Derek Reese's familiarity of and hatred toward Cameron, there is a strong implication that she's tied to this particular instance of Room 101.
* Terminator: The Sarah Connor Chronicles is frequently tasked with hunting and destroying other Terminators. Most often, she does this to protect others, but one episode involves her going into full-on detective mode to track down a Terminator she discovers entirely by accident, and then destroying it.
* Terminator: The Sarah Connor Chronicles is mentioned frequently (as all the main characters knew/loved/are related to him except Cameron) and appears as a hallucination in one (incredibly weird) episode.
* Terminator: The Sarah Connor Chronicles is sent back to protect him. Over the course of the series, other robots and human resistance fighters are also sent back. They even have conflicts between the many terminators sent back, if their tasks conflict with one another. For example, a terminator is sent to kill and replace Special Agent James Ellison. The attempt is interrupted when Cromartie, a terminator sent to find and kill John Connor, saves Ellison and destroys the other robot. When asked why by Ellison, Cromartie simply says that Ellison will lead it to the Connors. Not under duress but because Ellison is looking for them himself.
* Terminator: The Sarah Connor Chronicles. It is strongly hinted that Cameron was made to be attractive deliberately. Her appearance was based on a resistance fighter named Allison Young, who was implied to know future John Connor personally.
* Terminator: The Sarah Connor Chronicles, John mentions it and points out that it's not the Machines, but instead this is the real enemy that they are fighting. When it comes, humanity can simply kiss its ass goodbye!
* Terminator: The Sarah Connor Chronicles: Judgement Day is only four years in the future when it could easily have been five.
* Terminator: The Sarah Connor Chronicles leaked months before its original airing. Notably, this episode was greatly changed after the fact in response to a then-recent school shooting, along with the recasting of Sarah's fiancee to a different actor.
* Terminator: The Sarah Connor Chronicles love John, and she is certainly willing to die for him.
* Terminator: The Sarah Connor Chronicles, mainly the relationship between John and Cameron. Many fans have waited for The Big Damn Kiss between Cameron and John. Unfortunately, it never happened.
* Terminator: The Sarah Connor Chronicles making a Bond One-Liner after killing an inconvenient employee is the first sign that she's much more complex and self-aware than the usual Terminator.
* Terminator: The Sarah Connor Chronicles: Notably used in the last episode of Season 1, in which Agent James Ellison takes a fully tooled-out FBI Hostage Rescue Team in to storm a terminator's motel room. The HRT is some 20 or so members strong, fully tooled for bear with bulletproof vests, assault rifles, and helmets, and is merrily dispatched in the space of about two minutes to the beautiful crooning of Johnny Cash.
* Terminator: The Sarah Connor Chronicles of this. He knows, and has always known that he's going to become one of these, like his movie incarnations, and a TV series allows for more time to deconstruct that and show him living with that knowledge and suffering the traumas that would turn someone into that. He's even shown asking people from the future who've met him what his future self would do in certain situations.
* Terminator: The Sarah Connor Chronicles. Online ads and episodes of several different FOX shows had a barely-visible pair of glowing red eyes that could briefly be seen before disappearing. These glowing eyes appeared directly after the commercial break for several series, and the appearances were eventually posted online by fans, fueling speculation and driving viewer interest.
* Terminator: The Sarah Connor Chronicles, only has to observe two secondary characters conversing to get a reading.

* Terminator: The Sarah Connor Chronicles out loud, despite it being the very title of the show. Then, at the climax of (possibly) the last episode, Sarah screamed it into her adversary's face. Good times. Although this was an issue over royalties; as in they didn't want to pay any more than necessary so the T-word use was extremely limited.
* Terminator: The Sarah Connor Chronicles out the window a few moments before it becomes very relevant.
* Terminator: The Sarah Connor Chronicles. Over the course of the entire second season, the AI John Henry is shown growing from an advanced chess-playing program to an articulate, sentient entity in its own right, including forming relationships with the humans it interacts with, being given lessons in morality and even gaining a fear of death.
* Terminator: The Sarah Connor Chronicles. Perhaps all the violence he's seen have fried his empathy circuits.
* Terminator: The Sarah Connor Chronicles practices ballet for no practical reason.
* Terminator: The Sarah Connor Chronicles", Sarah and Derek hear John calling out in a panic and find him naked in bed with Cameron concerned about how Cameron's just shut down, only for Derek (from a new timeline where he has seen John and Cameron's future selves as a happy couple) to jokingly realise that this is just another happy day where the Connors have reached "shut-down point", John causing Cameron to experience so much pleasure that her system temporarily overloads.
* Terminator: The Sarah Connor Chronicles. Sarah and John jumped from the nineties to present day, thus completely skipping over the 9/11 attack. Sarah goes to get a new identity forged, and she is told it will be harder after the attack. She speculates that if she hadn't time jumped straight through it, that she would've thought it'd be the end.
* Terminator: The Sarah Connor Chronicles: Sarah Connor when they lose track of John's signal.
* Terminator: The Sarah Connor Chronicles, Sarah dumps Cameron (who has been temporarily rendered "unconscious" due to electric shock) out of a window. She lands (very gracefully) on a parked (or possibly abandoned) car.
* Terminator: The Sarah Connor Chronicles (Sarah's cancer, a female Terminator, Judgment Day not averted), nothing else is counted as canon from the third film.
* Terminator: The Sarah Connor Chronicles, Sarah threatens to have Cameron shipped off to boarding school when she gets a bit too carried away.
* Terminator: The Sarah Connor Chronicles, saying he's tired of constantly running from him and wants to turn the tables on the Terminator.
* Terminator: The Sarah Connor Chronicles saying it to manipulate him, the simulated emotion appears very real, and he's aware that she's more advanced than other Terminators, but not to what degree. And the second part of her claim "and you love me" probably hit a bit close.
* Terminator: The Sarah Connor Chronicles season two episode "Goodbye To All That" has John enroll in military school and Derek sign up as a teacher.
* Terminator: The Sarah Connor Chronicles..." segment at the start of the episodes is getting, especially in season two.
* Terminator: The Sarah Connor Chronicles she's smiling to manipulate people. The sole exception to this is in "Allison From Palmdale" where a scene showing her laughing and smiling is played as this trope—as Cameron is in her "Allison" persona and thinks she's human, and thus feels real emotions.
* Terminator: The Sarah Connor Chronicles shows by sending him into the future that, even if John Connor wasn't a factor, there would still be a Resistance there fighting Skynet anyway, so killing John Connor wouldn't have actually made a difference.
* Terminator: The Sarah Connor Chronicles shows us him as a young child before the war.
* Terminator: The Sarah Connor Chronicles, since she is a terminator. Skynet's human disguise program: hot on the visuals, crap with the chat.
* Terminator: The Sarah Connor Chronicles, since the door is made from reinforced steel, whereas the wall is "merely" concrete.

* Terminator: The Sarah Connor Chronicles Skynet. In such a case, human slave labor might actually make sense.
* Terminator: The Sarah Connor Chronicles some kind of terrorist organization."
* Terminator: The Sarah Connor Chronicles, someone shuts a metal security door in their faces, and Sarah asks Cameron if she can get through it. Being a Terminator she could given time, but it's faster to punch a hole in the concrete wall. Of course, the person they were going after was expecting human pursuers, against whom the wall would have been sufficient.
* Terminator: The Sarah Connor Chronicles sometimes does have an effect. The only small arms that do have a reliable effect are shotgun slugs, special armor-piercing rounds, and high explosives. Of course, characters that don't know what they're fighting will frequently and continuously spray a Terminator with bullets even after they see how useless it is.
* Terminator: The Sarah Connor Chronicles. Somewhat justified in that the combatants are super-strong, super-tough robotic assassins from the future. Punching each other will do little damage, so they tend to try and pick each other up and throw them through walls, out windows, and even through floors and ceilings.
* Terminator: The Sarah Connor Chronicles's "The Man Comes Around" plays, is considered by many to be a much more effective way of showing the carnage.
* Terminator: The Sarah Connor Chronicles Terminator — doing both. It appears to be a simple matter of whether or not the Terminator in question considers convincing acting to be relevant to the mission at hand. In particular, those that go back in time wouldn't have to worry about being outed as killer robots except in extreme circumstances.
* Terminator: The Sarah Connor Chronicles that future) they actually fit in well in the military environment. John is even seen correcting some of the students on weapons handling.
* Terminator: The Sarah Connor Chronicles, the characters can try to keep casualties to a minimum (it doesn't work) and/or delay Judgment Day as long as possible, but "winning" much of anything would end the series.
* Terminator: The Sarah Connor Chronicles, the Connors kidnap a little boy in order to protect him from the Terminator that is hunting for him. Sarah ends up getting quite attached to him, and vice versa.
* Terminator: The Sarah Connor Chronicles, the more Sarah becomes just another sidekick.
* Terminator: The Sarah Connor Chronicles the rise of Skynet into 2011.
* Terminator: The Sarah Connor Chronicles: The series contains no psychic powers, but an arc on concerns Sarah having a series of dreams about a mysterious symbol. Possibly justified by saying that she saw it on the wall earlier and only subconsciously recognised its significance.
* Terminator: The Sarah Connor Chronicles the series, which has nothing to do with it and takes the third movie as canon.
* Terminator: The Sarah Connor Chronicles the titular character zaps herself with defibrillators in order to short out a tracer inside her breast, even asking from a doctor if it'll kill her before doing it. It should have stopped her heart temporarily, along with the tracer, but she's up and about in a couple of minutes, max.
* Terminator: The Sarah Connor Chronicles, the two part episode "Today is the Day" does this for Jesse.
* Terminator: The Sarah Connor Chronicles to develop their own A.I. to oppose SkyNet.
* Terminator: The Sarah Connor Chronicles want to know where he is, and how dare he have this conversation with her when John is standing right there. He hesitates and asks "Wait, are you asking me where I am?" She replies "Yes, yes I am," still in an angry tone, which John doesn't find suspicious. This enables her to get out and help him while still keeping John out of harm's way.
* Terminator: The Sarah Connor Chronicles was doomed after two seasons by its interesting but "narratively inhospitable" (to new viewers) tight story arc.
* Terminator: The Sarah Connor Chronicles, Weaver saves Sarah, John, and Ellison

from a Skynet drone attack by shapeshifting into a manta ray-like form to block the bullets and explosion.
* Terminator: The Sarah Connor Chronicles were starting to crack by season 2.
* Terminator: The Sarah Connor Chronicles we're used to is what made the scene where she recites, not only word for word but inflection for inflection, a "classmate's" emotional bathroom rant for the principal creepy.
* Terminator: The Sarah Connor Chronicles, when Cromartie disposes of an entire SWAT team into a swimming pool.
* Terminator: The Sarah Connor Chronicles when she was working as a temp at a nuclear plant, and gets this treatment when she's exposed to radiation. It was portrayed realistically and looked extremely uncomfortable, but it eventually turned out that her boss faked her radiation test in an attempt to intimidate her.
* Terminator: The Sarah Connor Chronicles, where Cameron says this line after attempting to get a bird to land on her.
* Terminator: The Sarah Connor Chronicles wherein a nuclear power plant's failsafes DO kick in, but a T-888 deliberately sabotages them one by one.
* Terminator: The Sarah Connor Chronicles where it's still going even in the distant future in human controlled submarines.
* Terminator: The Sarah Connor Chronicles which attempted to save the show by coming up with the biggest twist they could think of, only for it not to save the show and ultimately drive fans of the show insane. With a completely unrelated Terminator series on the cards, it seems fans will forever be in limbo.
* Terminator: The Sarah Connor Chronicles, who becomes a major character in the show's second season.
* Terminator: The Sarah Connor Chronicles, who showed up late in the first season.
* Terminator: The Sarah Connor Chronicles with bullet holes, but the only result from that is a lot of red stains from her cyborg blood and one half her face being shredded clean off by a shotgun blast.
* Terminator: The Sarah Connor Chronicles with Cromartie and John Henry. First, Cromartie goes through a lengthy process to repair himself. Then, without the CPU, he becomes John Henry. The tech finds out that the AI requires identical software and hardware to be restored.
* Terminator: The Sarah Connor Chronicles Within the series, John shows little if any interest in her that way. Cameron flirts with him when they first meet, feels threatened by Riley and even strips off and lies next to him, saying she knows his life can be lonely. Of course she might have just been manipulating him, but there was also how she overrides her programming to terminate him.
* Terminator: The Sarah Connor Chronicles, with John realizing how much of a machine she really is and understanding the sexual tension between them isn't real.
* Terminator: The Sarah Connor Chronicles with slow motion. But no, nothing. Just bang. The only thing that could possibly be called foreshadowing is in an earlier episode, where John asks him how long he would last if he had nothing but his bare hands to fight Cameron with, to confirm for himself that Riley wasn't killed by any Terminator.
* Terminator the time travelers come from is not dominated by machines, but cows (cows became the dominant species after all humans went vegan).
* Terminator, they decide to go second best and kill those people who will grow up to be his officers, but gladly switch back to Connor when he turns up again.
* Terminator to screen it for critics (it had one press screening) and slashing its marketing budget, with only a few defenders at the studio and within the production team championing it. Yet, the film was a smash-hit at release, winning #1 at the box office two weeks in a row during its 1984 launch window, grossing more than $78 million at the box-office against a $6.4 million budget, and spawning a juggernaut franchise that has continued in various forms for several decades afterwards and spawned five sequels (in various timelines), comics, games and more.
* Terminator to sentience, and the human rebellion has found a still-armed nuclear sub. They planned to cover Russia with an EMP strike to destroy Mir and prevent this once Skynet isn't around to control it.
* Terminator Twosome: Both of the above at once; a villain goes back to change the

future in their favour, and a hero follows to put a stop to it or correct it.
* Terminator Twosome film franchise always ends up doing the second variant of kindnapping as part of protecting their assigned charge(s) from whatever Terminator has been sent back in time to kill them.
* Terminator Twosome: Two characters are sent back in time, one to change history and one to make sure it stays the same. The reason why it sounds sexual is because the suffix "-some" added to the number of people in a group has been used in a sexual sense (think of the word "threesome" for example).
* Terminator Twosome: Two people go back in time, one to change history and one to prevent history from being changed.
* Terminator Twosome while they were wiping each other out. With lots and lots of nuclear weapons.
* Terminator vs. Robocop is perhaps the only death battle to invoke significant amounts of
* Terminator was created to put humanity into the future. It did so, all right... after killing three billion people as an act of self-defense when some people tried to shut it down after it became sentient.
* Terminator, we only get to see brief glimpses of the war. Skynet relies on robotic aircraft, infantry, and even treaded Mecha. The Humans rely on infantry, in at least one time in the first movie, the use of Technicals.
* Terminator when Berk arrives from the future to stop K'Z'K from conquering the world.
* Terminator, when reports come in that the same suspect, and John Connor, who participated in the bombing of the Cyberdine building, and kidnapping victim Sara Brester, are holed up in a mausoleum in Victorville, California, dozens of cops surround the area and open up with everything they have.
* Terminator, which become even more obvious when only their endoskeletons are showing.
* Terminator, which did away with the slasher angle for a more purely action-focused approach, who preferred using bladed weapons.
* Terminus Est, an ancient battleship which has served as the flagship of the Death Guard Chaos Space Marines since the time of the Great Crusade, when the Legion was still loyal to the Emperor, and which has now taken on a daemonic life of its own, as corrupted with disease and pestilence as the Death Guard itself.
* Terminus is founded based on the premise that they will be collecting all of history and science into a single reference volume, an
* Terminus is initially established to produce an Encyclopedia, so their "one product" would be science. However, Seldon planned the location and timing to ensure that after only a few decades, the Foundation would be producing a
* Terminus", it is revealed that the Big Bang was triggered by a time-travelling space ship that was forced to dump unstable fuel into the void before going back up the timeline. The fuel exploded, triggering the Big Bang.
* "Termites of Endearment" Dave refuses to practice sword fighting because he's busy making decorative knick-knacks for sale. His sister Fang badgers him to practice fighting, and Dave says "one day my love of decorative knick-knacks will one day save us all!" He keeps saying this throughout the episode, usually directly to the audience. Then the
* Termite Trouble: Termites portrayed as a terrifying invisible force that rapidly disintegrates wood.
* terms and conditions when it comes to cars, despite being text-only for the most part (and an industry-exclusive publication).
* Terms of Endangerment: Kind words as a sign that the villain is about to do something especially terrible.
* Terms of Endearment, and after the students at Sikowitz's break character and get banished, they come to visit their house, and find the movie hilarious for unknown reasons.
* Terms of Endearment Some scenes set in Texas were actually filmed in Lincoln, Nebraska where the bulk of the film is set.
* Terms Of Enlistment with the TA grunts in the mess hall. Afterwards, the base CO

reams them out and assigns additional PT because they should've been able to take that many Marines.
* "Te Robaré El Amor" ("I Will Steal Love From You") a female shopper unmasks to reveal a much larger male robber.
* Tero, go back to life, only to have her killed again in the end of the same page, in the most careless way possible.
* Terokkarantula is tougher than the smaller spiders nearby, as would be expected by it's named nature and elite status, but a player who hasn't been there before is probably not expecting a spider that's larger than a house.
* Terok Nor, Cardassian Central Command destroys the Oralian Way religion (although pockets manage to survive) in a purge of believers in the enclaves on Bajor. The Oralians had already fled persecution on Cardassia, but Central Command had its eyes on Bajor, too.
* Terok Nor novel, Skrain Dukat sums up Central Command's angle on the Order:
* Terok Nor novels, part of what motivates Cardassian support for withdrawing from their Occupation of Bajor is the idea that, if the 50-year occupation goes on much longer, both sides will be too emotionally invested in it to ever stop.
* Terra and later Lingering Sentiment is the one who emerged victorious.
* Terra, as when she goes into it during the plot, she suddenly loses control and ends up fighting the other heroes.
* Terra: Atlee is decidedly disturbed and upset by Deathcoil using the dead of Markovia as his puppets. She yells at him they belong to the earth now and should not be disturbed.
* Terra: Atlee is from the subterranean Strata culture and does not really know how to act like a normal human despite posing as a human superhero. Her complete non-comprehension of social cues is part of what makes her come off as so cold and aloof.
* Terra: Atlee rescues a group of miners trapped in a tiny pocket of air in a collapsed mine.
* Terra Battle. Stonefolks are people made out of, you guess it, stone.
* Terra believes she was betrayed and literally brings the house down on herself!
* Terra between two superpowers.) Author Holly Laing's response was surprised confusion.
* Terra Branford. While she was mentally enslaved by the Empire and forced to do horrible things while being controlled, when she is freed she later becomes a pure-hearted protector. She ends up caring for a group of orphans in Mobliz whose parents were murdered by Kefka after the Apocalypse. Once she finds out who she is, she becomes a protector, who fights not to kill, but to protect and to ensure hope. Completely driven by love, she never has hatred in her heart.
* Terraced houses in Morpork have a tendency to have very precise property lines, to the extent that each home-owner paints their own half of the drainpipe and no further. Although Vimes is of the opinion that this is just because Morporkians are too tight-fisted to buy paint for a whole drainpipe if only half of it is theirs.
* Terracide). Humans had started to spread among the stars after getting their hands on faster-than-light drives, but most of them still had at least sentimental ties to Earth until an unknown force sterilized the entire Sol system.
* Terracide setting (6th edition Hero System) aren't aliens, but genetically-engineered humans. But since they have bear DNA spliced into their genomes, they're close enough to count.
* Terra closely resembles her father Mark, but her facial features are drawn similar to her mother Eve.
* Terra deliberately invokes this by aiming a boulder towards Robin and Starfire, knowing that one or the other would inevitably take the hit and only leave one titan to deal with afterwards.
* Terradino is home to the Vaxasaurians, Pturbosaurians, and the Mulgogians. The subterranean Mulgogians are the most advanced of the three with a tech level comparable to that of Earth (give or take a century or two) while the rest of the planet is akin to the Stone Age but the Pturbosaurians consider themselves the supreme species due to being able to fly. Conflict between the two is common, while

the Vaxasaurians are friendly with both groups.
* Terra does this at the end of the second "Aftershock" episode when
* Terrafarmers, the more plants you add, the greener and healthier the surrounding landscape looks.
* Terra, Fnrrn society has the Source, a planet-wide information network accessed through the tablets everyone carries. The scientist who invented gravity-manipulation published his work on the Source, so that no one group would have access to it.
* Terraform: A planet's enviroment is artificially changed to better suit a species, human-like or otherwise.
* Terra Formars as the partially terraformed Mars now filled with swarm of titular hyper-evolved cockroach.
* Terra Formars, has a lot of this happening too, especially come around the third Mars expedition.
* TerraforMARS has pointed out how the designs of the roaches that are the primary enemies of the series can be compared to racialized caricatures of black men.
* Terra For MARS range before any of the Annex crew even realise they're there. Marcos can do this as well, using his huntsman spider surgery.
* Terra Formars that seeks mates based entirely on their genetic qualities in order to create the perfect human. They have been doing this for over 500 years and he is the current apex of that practice which gave him Mars Power Ranking #1 despite never using the transformation drug.
* TerraforMARS, the cockroach Terraformars kidnap thousands of humans within Tokyo. They're taken to a facility where the Terraformars and, with the aid of the Chinese People's republic and the Newton Clan, conduct breeding experiments on humans to create a Terraformar/human hybrid.
* Terraforming can give a planet the size of our moon Earth-like gravity.
* Terraforming Earth, involves Earth itself being terraformed. Not once, but several times, due to asteroid impacts, alien invasions, runaway technology, etc...
* Terraforming has become a necessity since, inversely, Earth has become almost uninhabitable due to the moon getting destroyed and debris bombardment that continues. Pretty much the only people who still live on Earth are those who can't afford to leave, and underground shelters are needed because of the constant meteor storms.
* Terraforming, is slow and requires tremendous effort and investment.
* Terraforming Mars (9% ocean coverage, 8 C temperature, and 14% oxygen).
* Terraforming Mars, has the players controlling megacorporations which engage in massive projects, including, sometimes, the creation of a space elevator. It's one of the more expensive projects, but gives a considerable boost to your economy.
* terraforming, Mars' sky wouldn't look out of place on Earth, but when you look up you will see a massive asteroid with Grineer installations on it.
* Terraforming Mars: The players are corporations competing to receive the most credit and prestige for their contribution to the terraforming of Mars.
* Terraforming Mars, which needs to be made warmer to make it habitable. It can be done by way of asteroid impacts, releasing volcanic energy, or just with good old-fashioned greenhouse gases.
* Terraforming mines, Big Dumb Objects, Forbidden locations, and Exotic places. Memory Alpha is a Library world for the Federation, though we only saw it during construction.
* Terra from ancient Rome. The names are Roman-derived, they practice slavery, the government structure is Romanesque, and so on.
* Terra, Fthfth obsesses over the two occasions when she only got one star after her grade, instead of two.
* TerraGenesis Terraforming is done through setting up cities and its buildings to control the world's components: temperature, pressure, water, and oxygen. If Biosphere is toggled for a game, the player can manage the world also by controlling the organisms.
* Terra, has volunteered to become Strata's new champion and superhero and is given the power to control rocks and dirt through the same method as the previous two

Terras, even though those two lost their minds.
* Terra have been monitoring Rth broadcasts since they first reached Fnrr. It's not until the events of the book, many decades later, that they realise some of these broadcasts were of events that never happened but that Ymns made up in their heads.
* Terrahawks Barwick for once) and the two-part opener "Expect The Unexpected" by Anderson himself; the only other non-Barwick episodes in the series are "From Here to Infinity" and "The Sporilla", written by Katz Stein and Leo Pardstein respectively (both pseudonyms for Donald James).
* Terrahawks fame serves as the gunner and general sharpshooter of the Terrahawks, and is very personable and easy-going.
* Terrahawks justified their plans of conquest by saying that the humans opposing them had a bloody history full of things a lot worse than what they were doing.
* Terra Ignota, Danaë is so seductively feminine that she is able to make anyone do what she wants basically just by being in the same room as them. It is eventually revealed that she was raised in a brothel and educated to undermine others by using her sex appeal, giving her a dark streak despite her innocent demeanor. Justified in that it's quite clear that any modern person would easily be able to resist her charms, but in the genderless world of the 25th century, the only experience anyone has with sexuality and sexual appeal outside the bedroom are historical videos and pornography. Mycroft describes this as giving people "the weakness but no resistance."
* Terra Ignota Mycroft was being groomed to become a high-ranking government official based on his intellect. He also was the first to deduce the current Anonymous's real identity while he was still a teenager.
* Terra Ignota seems like a pure Science Fiction series on the face of it, but the fact that Bridger can work miracles such as bringing toys to life and possibly even resurrecting the dead, which nobody can explain with science, edges it just that tiny bit into Fantasy territory. Due to sufficiently advanced science, there are also pet unicorns and all kinds of other fantastic beasts.
* Terra Ignota series is mainly narrated by Mycroft Canner, who chronicles the events of the series, with two exceptions:
* Terra Ignota, specially trained counselors called sensayers help them develop and practice one-person religions, individual to each of their clients.
* Terra Ignota system and investigate any Utopian death with a single-minded fervor, no one wants to risk getting them involved.
* Terra Ignota to step out of the shadows and begin governing openly. However, despite the Empire’s tremendous political power, it’s made clear that nobody actually believes the propaganda. It’s just a way to culturally unify their millions of members and give themselves an aura of mystique and ancient authority.
* Terra Ignota was shaped by the Church Wars, a religiously-motivated world war so horrific that it discredited the entire concept of the nation-state: starting in Europe, all borders were dissolved in protest, and citizenship to any nation became voluntary and could be renounced at will (national sovereignty becoming secondary to a set of humanistic Universal Laws applicable to everyone, everywhere). It also led to a taboo against organized religion that stands strong even centuries later.
* Terra Incognita series, the supreme god, Ondun, has three sons, Jorun, who stayed to rule the literal Heaven on Earth, Terravitae, and his other two sons Aiden and Urec who he sent out to explore the world and whose later quarrel formed the basis for the two religions in conflict in the story.
* Terrain features containing water (like the "Sea") can buoy floating objects in themselves without being placed down. This can even be used to carry
* Terrain Of Magical Expertise, an upcoming indie role-playing game based on the web series of the same name.
* Terrain restrictions also play a part. For instance, being actually in a woods hex instead of just behind it lets a unit enjoy those woods' defensive benefits without being hindered by them in turn, but not all units can actually
* Terra in the comments. Eventually, Holly put her foot down and pointed out that Alex never actually shot the human shield because the mook holding it was quicker

on the trigger; therefore whether her rifle fire would or would not penetrate was a moot point.
* Terrain was most likely the largest factor that contributed to the Union victory at Gettysburg. Not only did the Union hold the high ground, giving their artillery a huge advantage, but the Confederates were forced to attack across a large, open plain with no cover from Union artillery and gunfire.
* Terra is a holy terror in the Phantom Train, a closed in, elongated arena, thanks to her mostly frontward-firing projectile attacks that are hard to avoid in such circumstance; Firion, the ground-bound fighter with a terrible air game, is helpless in Planet's Core, the largely vertical arena with small floating platforms as the only footholds; The Emperor, the
* Terra is also the one who gave him the need to wear an eyepatch in the first place, adding weight to his words in Kingdom Hearts II
* Terra is perhaps the most famous Teen Titan that isn't part of the "Big Five". They know she was a mole sent by
* Terra is putting a sniper round through the faceplate of an Azatoth soldier to save a fellow trooper, then calming his spotter down when he starts to get panicky.
* Terra is revealed to be this, as she works for the aforementioned Deathstroke. Many adaptations since have made her a more likeable and tragic character.
* Terra is the daughter of two brilliant scientists and intends to "invent time travel" when she grows up. She is also a skilled and extremely competitive player of gshkth, a Fnrrn sport that seems to be a bit like field hockey.
* "Terra" is the most common name for the home planet of the titular character in
* Terra killed and the other crew ejecting safely and being rescued by the Resistance to become part of the main cast).
* terrakinesis of volume five, but was cut due to budget restraints at the time.
* Terramar and Silverstream's mother, Ocean Flow, has shades of this with this typical exchange.
* Terra Mirum Chronicles brought some balance between the Seelie and Unseelie fae courts.
* Terra Mirum Chronicles. Dreams have traits similar to this, but Fae are a separate race from Dreams, and the political situation between them is volatile.
* Terra Mirum Chronicles. Her title really says everything, though it's worth also noting that she murdered her predecessor and brainwashed the Dream court into arresting the prince.
* Terra Mirum Chronicles, is on the run after the Nightmare murders his mother and brainwashes his father.
* Terra Mirum Chronicles is recognized as a Nightmare for having these eyes.
* Terramirum, they apparently used to have a whole pantheon of living gods.
* Terra Mystica plays the trope straight, replacing fantasy races with aliens and a board made up of multiple planets.
* Terrance and Phillip: Behind the Blow page for an explanation of that one).
* Terrance and Phillip in: 'Not Without My Anus's appearance, although the popular belief is that the episode got banned because fans didn't like it, as it aired in place of the second part of the season one cliffhanger (the one where Cartman tries to find the identity of his biological father) as a joke, though Trey Parker and Matt Stone have said that this was one of the few episodes from seasons one to three that they don't hate.
* Terrance Dicks and the man who introduced the concept of the Time Lords themselves to the show, famously once stated that 'canon was what the production team could remember on any given day.'
* Terrance Dicks do solve the crime, he's a bit flabbergasted when the sheepish bully pays up with a brand new copy of the book he destroyed, as he'd forgotten how the whole business started.
* Terrance Dicks. Ironically, in a story about five (well, four) of the Doctor's incarnations meeting each other at the dark heart of Gallifrey, this scene ended up as the most memorable part of the whole serial.
* Terrance Dicks, so he came up with a story about an alien in the Middle Ages with no connection to anyone noteworthy whatsoever.

* Terrance is a human example. He was made to be as ugly as humanly possible, with the crooked teeth and the acne.
* Terran Confederacy, and the genetic engineering of sapients are all forbidden with a religious zeal throughout the Confederacy, as well as its precursor and successor states.
* Terran Confederacy is one such artifact. They vanished from the galaxy millions of years ago, for unknown reasons.
* Terran Empire can express sympathy for this viewpoint, or not, when they time-travel to the signing of the Accords in the 28th century, then during subsequent missions the Na'kuhl launch various malicious temporal incursions (including attempting to assassinate the President of the Federation) in hopes of creating a timeline sans Accords or Temporal Defense Initiative.
* Terran Empire-class ships. The player's version is referred to as a "Light Cruiser".
* Terran Empire for the Empire, and helicopters ("helidynes") replace aerodynes as air support. The dropships are no longer the bulky kind and can be turned into the most powerful unit in the game with upgrades. The Virons are similar in terms of ground troops, except for their ability to merge and "un-merge" into new units. Their ground vehicles hover but are called "centruroids".
* Terran Empire isn't a no-kill setting, but manages to sneak this in anyway. One of the later Emperors spent a good chunk of his reign giving people a reason to want him dead. He knows this, so among other precautions his bedroom is heavily armored and has a voiceprint lock on the only door. He also changes the door code daily, to keep assassins from using a recording to get in.
* Terran Empire NPC/enemy. Players may also spec their characters or Bridge officers into filling this role if they wish.
* Terran Federation Contact, while an ensign there has bet on something improbable, namely the Skinnies invading-and when it happens, the first thing he does after sounding the alarm is shouting "Guess who's a fucking billionaire!?" on the radio.
* Terran Ghosts have a laser target designator for calling down tactical nuclear ballistic missiles, which are launched from silos back at base. The Ghost needs to keep the laser on the target for a significant time while the missile is in flight, and the strike will be cancelled if the ghost is interrupted or killed in the meantime. In the
* Terran Ghosts suffer from being unable to not read thoughts of those around them. At least the superficial stuff.
* Terran Hegemony (the key member of the Star League) and the Republic of the Sphere. Comstar also ruled humanity's birthworld for three centuries as a neutral 'museum world' while hiding their secret military there.
* Terranigma: After Ark has destroyed Dark Gaia, his light version tells him that since he was a creation of Dark Gaia, he is now doomed to vanish too, alongside his village and all his friends and family. The kicker: He only set out on his journey in the first place to keep them safe, and instead he's doomed them all.
* Terranigma as "46 billion years." (4.6 billion, of course, is the correct number.)
* Terranigma a young ingenue hides away in a desert village which is actually a half-collapsed ruin filled with zombies (who don't quite realize that they're dead). This sets up a revelation at the end that Crysta is just a reflection of the mortal world all along, and now that the real world is restored it is coming undone. Even Ark, the PC, is revealed to be an echo of a dead hero from long ago.
* Terranigma contains this. Needless to say, the place is really, really creepy.
* Terranigma. Disturbingly, the girls cry when you hit them, right before they send their severed heads at you.
* Terranigma. Dr. Beruga claims that his robots have been properly programmed with the four laws, but with the addition that anything and anyone who aids Beruga's plan is also good for humanity and anything and anyone that opposes him is also bad for humanity. So they ruthlessly attack anybody who interferes with his plans.
* Terranigma has a confusion status which changes the directions of the D-pad. The direction change every time the confusion message shows up.

* Terranigma has got to be one of the most extreme examples of this trope. Thanks for reviving the world, defeating all the villains and monsters who were threatening it, and sealing away the very spirit of darkness, Ark! Now go ahead and die, we're done with you.
* Terranigma has realistically drawn portraits of four people on a wall in Sylvain Castle. Each person is missing one eye, which you have to replace with a gemstone.
* Terranigma is killed by his light counterpart, and vanishes in the end as a consequence of him destroying the Underworld.
* Terranigma, Marily from Loire works at Mme. Papilo's expensive boutique at low pay, but after Loire expands, you can help her start her own boutique that sells affordable clothing to the masses.
* Terranigma, on the other hand, has very few monsters that actually have to be killed. Aside from the bosses of course, only a handful of monsters throughout the game have to be killed in order to open certain hitherto blocked gateways, making underlevelling very possible. The game has now been completed at a measly Level 13 (out of 50), at which a critical hits does 2 points damage to the final boss (who has around 1200HP).
* Terranigma starts out like this, but you restore it in the beginning of the game. Towards the end though, as humans become more powerful, dialogue reveals that the environment is starting to head downhill.
* Terranigma, the Asmodeus virus wipes out everyone in the city it gets deployed in except for one little girl. It's unclear if she was the only child in the city or ended up being somehow immune to the virus.
* Terranigma, the far north of restored Earth is inhabited by a colony of apparently sapient, igloo building penguins. "Would you like to buy a flower? Make a girl or a penguin talk!"
* Terranigma. They are only present in the game if the player "revives" them by visiting secret towers in the beginning of the game. They don't contain much, just a free inn and a nice weapon.
* Terranigma, Undead Knights and some grim records of its former inhabitants.
* Terranigma, who is responsible for resurrecting the other world and destroying their own (and will therefore die along with their own world), and the protagonist Ark is the Dark Gaia version.
* Terra!, not outright kill them, but that doesn't stop daring gamers from seeking out illicit machines in underground places.
* Terra Nova apparently has enough people for an acceptable genetic mix, but it's still dependent on Earth for technology. Meanwhile, Earth has gotten so crappy the night sky can't be seen and is considered by its occupants to be a dying world.
* Terra Nova determined to get at the stranded kids in the broken down jeep, never mind those pesky assault rifles the kids have.
* Terra Nova: Earth in 2149 is slowly choking to death from pollutants, and the only hope for humanity is travelling back in time to the prehistoric era.
* Terra Nova has a wormhole that exists in one universe in the year 2149 and in another universe during the Cretaceous period. It's a rare case of a wormhole being specifically used for traveling through time (and between universes) instead of through space.
* Terra Nova, in the 22nd century AD real food is rare that a single orange is considered a luxurious treat for a family of five. When colonists arrive in Terra Nova they need to drink an enzyme solution to help their systems adjust to the plethora of 850,000th century BC fruits and vegetables.
* Terra Nova" into the past, to try to save the human race and "start over."
* Terra Nova, Jim kisses Elisabeth to infect her with a virus that will help cure her memory loss.
* Terra Nova, played by none other than Stephen Lang. Due to strange time dilations, he had to spend 118 days alone in the Cretaceous Period and doesn't even have any visible scars. And he still goes toe to toe with carnivorous dinosaurs to protect his people.
* Terra Nova: Strike Force Centauri uses the powered armour with jump-jets variety.
* Terra Nova the bad guys spot Col. Taylor and his soldiers trying to get away in a

vehicle. The vehicle is hidden by a dense tree canopy so they cannot target it directly. Instead Lucas fires off a missile that splits into multiple smaller missiles that then rain down on the forest in a wide spread.
* Terra Nova, the father brings an orange to the family in the opening scenes.
* Terra Nova the protagonist was sentenced to six years in prison for having a third child. Fortunately they don't care about population laws in the virgin frontier of 85 million BC.
* Terra Nova, there are apparently "lottery marriages", where single men who are lucky enough to win a ticket to one of the Pilgrimages are offered marriage by single women who are desperate to get a ticket for themselves.
* Terra Nova: The town of Terra Nova is heavily dependent on meteoric iron, and rebel forces control the quarry. Digging for other deposits would somewhat defeat the purpose of the mission, which is to avoid the industrialization that ruined the future.
* Terra Nova, when Taylor and Mira have to team up to save themselves from some slashers, Taylor finding out Mira's backstory leads them both to this understanding. When they've survived, they peaceably go their separate ways back to their communities.
* Terra Nova, Willy and his crew of spaceship SM-4 journeys to the counter-earth Terra Nova, home of several civilisations.
* Terrans are alternately called "Solomani"(men from the sun) and that is the preferred rendering in the Third Imperium era which is the default time of the
* Terran Trade Authority for independent manual control — is hauled out of retirement. In the last-ditch defence of Earth against a powerful enemy fleet, the disorientation device is destroyed and the modern ships win the day, but when they push into enemy territory they find that the ultimate strategic victory has already been won by the museum fleet.
* Terran Trade Authority universe features the Laguna Wars - a nasty fight between Earth and mutinous humans who wiped out an alien civilisation centuries before and took over its machines. The adventure is written for children under ten but pulls no punches, especially near the end, when it's discovered that the cargoes the Earth forces were blockading (and which led the Lagunans to mount an ultimately unsuccessful last-ditch attack on Earth) were an antitoxin against a fungal disease in Laguna Nine's atmosphere. The occupation forces arrive to find to their horror that the entire planet has been completely depopulated. It's not total genocide - the industrial centre on Laguna Seven is still intact - but it's bad enough, and all the more horrifying for it being unintentional.
* Terran Trade Authority universe - Gerling, the commander of the human forces in the Laguna Wars, reminisces about how he earned his seniority: the missiles of the assault ships in the Terran battlefleet had entered a decay cycle which would result in their unavoidable premature detonation. Unwilling simply to fire them off into the wild black yonder where they might hit unwary ships, he orders a half-built ship to be towed into orbit to act as the sacrificial target.
* Terran Treaty Organization because they're disgusted by the small-mindedness of the other Galactics.
* Terra Obscura, the Grim Reaper puts his costume on in a cab, having hailed it in street clothes to avoid suspicion, as he tails someone targeted for a hit. The first thing he does when he's got the target in his sights is kill the cabbie, who saw his unmasked face.
* Terra of G'grk play Kkh-St'grrss, which Colonel Harrison compares to polo, except more violent and after a polo match, the winners don't eat the losers' horses.
* Terra of the Left, Vento of the Front, Acqua of the Back and Fiamma of the Right of
* Terra or are even addressed. What the hell the glowing orb was and Cybersix's healing tears are never explained and never appear in the series again.
* Terrapion, spending real money would make it that much easier to upgrade equipment more effectively.
* Terra practically epitomises this trope. Here he is describing a sports match: "To Fthfth's delight, Terra's gfrg skills came on in leaps and bounds (quite

literally; there's a fair bit of leaping and bounding goes on in gshkth). She would convert Fthfth's zmms into zdds, smashing frkts and forcing yk yks and slotting the bdkt neatly to Fthfth so that Fthfth could ram home a victorious ghhh, to the rapturous hisses of their classmates." To be fair, it's a children's book, and children might well find that quite amusing.
* Terraria allows you to build a town and recruit NPCs, two of which are the arms dealer who sells guns and ammo and the demolitionist who sells bombs. Later on, the Hardmode-exclusive Cyborg can appear, who specializes in rocket and mine-type weapons. Several NPC merchants will have a general inventory, but also sell a specific weapon, such as the Witch Doctor supplying the Blowgun or the Traveling Merchant offering the Katana or Revolver.
* Terraria), among others. Your reward is a weapon that rapid-fires blades that sweep a huge area, deal huge amounts of damage per hit with multiple hits, penetrates all terrain, and costs no ammo or mana. As of the 1.4.1 update, 'Infinity + 1 Sword' is even the name of the achievement you get when you craft it.
* Terraria and does not do anything at all unless too many torches are put underground.
* Terraria, and is also one of the more dangerous biomes. It also spreads, just like Corruption and Crimson, the evil biomes.
* Terraria and place them somewhere else for easier farming of crafting materials.
* Terraria and start a new character in a hardmode world, possibly set up so nothing is unlocked before the world is forced into hardmode.
* Terraria, a powerful end-game boss. The 1.2 update introduced the Crimson, a variant on the Corruption that replaces the dark-themed monsters with flesh-and-blood themed ones such as the Blood Crawler and the Face Monster.
* Terraria as well as a pants item that gives you the legless effect when equipped. If used as armor, it prevents falling damage.
* Terraria attacks from working. If you can outrun the tentacle however, you can use them.
* Terraria becomes quite relaxing once you get end-game equipment, being able to build with little/no worry since anything that disturbs you or your NPCs are generally reduced to dust with your weapons.
* Terraria by the time you beat the first(!) boss as the only other use is for making the respective silver or tungsten bullets which eventually become obsolete by Hardmode as the Arms Dealer starts selling them and you have access to fancier munitions.
* Terraria cards), character stickers and new players in the game start with a carrot that summons a bunny pet, matching their shirt color.
* Terraria characters. Not only do they deal Summon-type damage, they also boost a summoner's minions' damage output, and forces them to focus fire on the target being whipped.
* Terraria clone, though the games have nothing in common besides having pixelated graphics and having mining and crafting as core mechanics.
* Terraria: Duke Fishorn is half fish, half pigron, all mean. So mean, many consider him to be the hardest boss in the game!
* Terraria, for not fitting in very well in terms of both gameplay and lore/theme. Not only was Ocram never added to the desktop version, but he and all other content exclusive to the console and mobile versions was removed when they were updated to 1.3.
* Terraria green slimes, blue slimes, red slimes, etc. As you venture further out though a unique slime can be found for each environment, ice slimes, jungle slimes, desert slimes, etc.
* Terraria has floating islands, which contain a building with some rare items inside. It is not hard to make your own: build a small wall, mine out all but the top, and the top will just float there. This can be important in "hard mode", when the Corruption and the Hallow begin to spread, since they will not spread through a thick enough air gap — so if they become or are completely surrounded by these, they are contained. Or just mine out below the spawn point, so that anyone joining the world or respawning starts off somewhere safe.

* Terraria has quite a few: Giant worms, devourers (corrupted versions of the former), tomb crawlers, dune splicers (the hardmode version of tomb crawlers) the Eater of Worlds, diggers, world feeders (stronger versions of the first two) and the Destroyer (a robotic version of the Eater of Worlds).
* Terraria has several items that allow you to employ vermins, from the Spider Staff which makes a number of spiders follow you and attack your enemies to the Honey Comb which summons bees to sting back at your enemies when you take damage.
* Terraria has six colors of Phaseblade, which can be upgraded to the Phasesaber, and make the classic lightsaber noises when swung.
* Terraria has The Destroyer, a giant mechanical worm that stretches extremely long, fires lasers everywhere, and will release probes when damaged.
* Terraria has the endgame Frost Moon event, where the player has to fight off waves of Christmas-themed enemies, with notable mentions going to the bosses: a living Christmas tree, an Ice Queen, and a mechanized "Santank"
* Terraria has these available as endgame replacements to the pickaxe. They are also relatively viable as weapons against most enemies that will be encountered while mining. And its most powerful version, the Hamdrax, consists in a spinning combination of Hammer, Drill and Axe, basically destroying everything and anything it touches in one hit.And dealing huge damage at close range.
* Terraria has "The Underworld" at the bottom of the map. It's literally made up of lava, piles of ash, and Hellstone, and is populated by living lava blobs, demons, fire imps, and bats made of flame. So, yeah, basically hell. It's also where the player summons the Wall of Flesh, the boss required to unlock the second half of the game.
* Terraria, hordes of classical monsters attack on the surface, such as Reapers, Swamp Things, Frankenstein's Monsters, Vampires, and Cyclops Zombies. Pity there are no werewolves or skeletons, as they can only appear at night or underground respectively.
* Terraria is basically a giant floating robot skull with four skeletal limbs equipped with weapons.
* Terraria is named that way. Doesn't help that it's found in one of the creepiest biomes in the game.
* Terraria. It does cause a few oddities with enemies that constantly bleed (or if you're bleeding) causes those same puffs to appear such as Demon Eyes or the shoulder points of Skeletron.
* Terraria, like Minecraft above, lets you plant trees and build mountains and such, but you can also change the surrounding biomes!
* Terraria, new enemies will spawn, one of which being the Sand Sharks which will spawn during sandstorms. They're powerful enemies that can swim quickly through the sand and then lunge at the player.
* Terraria. Night becomes even more dangerous in Hardmode, which adds a handful of new enemies that spawn on the surface at night, but none are added in the "standard" biome of the surface forest.
* Terraria occasionally contain obsidian grandfather clocks which still tell perfect time.
* Terraria: Once Hardmode hits, the Corruption and the Hallow spread constantly. As long as one block of Ebonstone or Pearlstone exists within 3 blocks of a block of grass or stone, they will continue to spread. Additionally, destroying a Demon/Crimson Altar to spawn the rare ores will create a block of Corruption/Crimson somewhere in the world, meaning that it can literally grow from a single cell.
* Terraria. One Drop later produced the Terrarian in various colors mimicking the various biomes.
* Terraria: Players can craft Necro armor using cobwebs and bones. Wearing a full set once increased the players' speed by about 20% and gives them a visual motion blur to emphasize that they're going fast. By combining Necro armor with the Anklet of the Wind and Hermes boots, you can become a speed demon. The 1.06 update changed Necro armor's full-set bonus to reduced ammo consumption from ranged weapon and increased ranged damage.

* Terraria. Said power armor also boosts your magic damage, so you can run around as a space wizard (or fly around with rocket boots) pretty quickly.
* Terraria sells steampunker goggles that are completely vanity only and their not even worn over the character's eyes compared to the former example.
* Terraria's green tree, which is represented differently depending on the biome the title is spelled out in. (Corruption, Hallow, Mushroom, Jungle, etc.)
* Terraria stated back in May 2014 that version 1.2.4 would be the last update that adds new features to the game. Apparently they changed their mind, as June 2015 saw the release of Version 1.3. And then came version 1.4 in May 2020, which was titled "Journey's End" and marketed as THE final update for Terraria. Fans are, however, still skeptical, and even the dev team has admitted they aren't sure if it's really going to be the final update.
* Terraria stream, they managed to overcome the first boss of the game through sheer numbers alone. It's just that any progress they make looks chaotic as all hell, due to the uncoordinated nature of audience participation.
* Terraria teleports you to a random location. It is advised to prepare oneself before using a Teleportation Potion, as it may teleport you into a hazard, on top of a trap trigger, or something else dangerous.
* Terraria that it fires downwards. It can drop the Cosmic Car Key on defeat, which allows the player to have their own flying saucer mount with infinite flight time and fast speed.
* Terraria, the center of the Underworld is a series of modernish high-rise apartments made of obsidian and Hellstone. As you travel to the edges of the world, the city gives way to seas of lava and the demons and imps become less common in favour of more animalistic hell creatures.
* Terraria: The clearest distinction between the four Celestial Pillars and their associated enemies/equipment is color. Orange is used for Solar, teal for Vortex, sky blue for Stardust, and pink for Nebula.
* Terraria The Hardmode end boss is literally Cthulhu. While incredibly hard initially, it doesn't stop you from farming him for materials to make the endgame items.
* Terraria: The Nymph enemies pose as women stranded in the caves, naked. They stay naked even after revealing their true form and trying to kill the player, and by the standards of the early-game they're threatening enemies.
* Terraria. The other NPCs can't be harmed by the player directly without the Rotten Eggs from Halloween, but they can be killed by monsters, land mines, traps, or lava.
* Terraria, there are plenty of axes that make surprisingly good weapons for their ability to be automatically swung and decent damage. One of them, literally called The Axe, is actually a "Flying V" guitar that functions as an actual axe AND a hammer. It also takes "an axe to grind" even more literally, perhaps too much so, as it requires an average of 200 boss kills against Plantera, with only a .5% chance of dropping, and Plantera being a fairly difficult boss.
* Terraria: There is a cosmetic raincoat-outfit available in the game, but the only way to obtain it is by killing zombies (classic horror monsters) who are wearing raincoats.
* Terraria There's also normal full moon that causes werewolves to spawn instead of zombies if the world is in hardmode.
* Terraria. They allow you to fly a considerable distance horizontally, making them useful for mobility early on.
* Terraria, though its use is limited due to the shallowness it requires. You can breathe perfectly for up to three blocks underwater, and double your breath for any further depths. You also can't use any other item while using it, and due to the simplistic way the game handles water physics, you can easily dig air pockets above you even if you're in progress of draining an entire ocean.
* Terraria towards the ground while in midair and releasing the hook before it attaches you to the ground.
* Terraria: Wall Creepers, Jungle Creepers, Black Recluses, and Blood Crawlers, enemies that are about as long as the player is tall and can walk on background

walls. The immobile spider summoned from the Queen Spider Staff is about as large but fights for the player.
* Terraria. Wearing a fishbowl not only doesn't allow you to breathe underwater, but instead drowns you even in land.
* Terraria: When placing a Garden Gnome, one of the possible poses it could be in is one where it is mooning the screen.
* Terraria, which appears when Hardmode begins, spreads similarly, but is much less destructive, since it will actually stop at the borders of the jungle, protecting it from its rival biomes.
* Terraria with three of the five nocturnal bosses (Eye of Cthulhu, The Twins, and The Destroyer), who only appear at night and despawn if the player manages to outlast them until dawn. Subverted with Skeletron and Skeletron Prime; if Skeletron is not killed by the time dawn comes, it sends its head flying into the player at high speed, dealing enough damage to kill the player quickly.
* Terraria worlds of the game and wants to spread itself for the sake of its strange definition of "balance."
* Terraria; you can buy or craft Silver Bullets, but they don't do any extra damage against Werewolves or undead enemies.
* Terraria, you can even get the Honeyed Goggles from the Queen Bee boss, allowing the player to summon and ride a slightly smaller giant bee.
* Terraria, you may frequently find yourself stuck in the middle of a goblin invasion, which can result in the wholesale slaughter of your NPCs, and which only ends after the player has killed dozens of goblins. According to the pacifist Goblin Tinkerer, the goblins are waging war over cloth (which is also a reference to the fact that you can summon an invasion with the Goblin Battle Standard.)
* Terraria zones are disturbingly mouth-like, an effect aided by the red Crimstone and stalactites that look like teeth.
* Terra: Richard Faulkner's exposure to Quixium turned him into a being of living metal. When his girlfriend Veronica tries it out her metallic form quickly solidifies.
* Terrasaurs. Besides this, and their occasional desire for a human-sandwich, they are quite tolerant of humanity as a whole.
* Terra says that some couples get along perfectly and are always in agreement, but the Bradburys weren't like that. It then says that there are also couples who argue, and make up, and it ultimately brings them closer together, and even when they're arguing you know they love each other beneath it. And the Bradburys aren't like that either.
* Terra's eyes glow bright yellow when she's pissed or can't control her powers.
* Terra's Holly Laing and Drew Dailey were working on the comic before their wedding and put it on a brief hiatus for the ceremony and honeymoon.
* Terra's is her inability to take responsibility for her actions, owing to being blamed for things that
* Terra soldier flanking one of his fellows. Then another Azatoth returns the favor and shoots his spotter in the back of the head.
* Terra. Sovereign Northazul ordered him, his family, and at least one other family executed. Argo's son Agrippa, Agrippa's friend Talos Antares, and Talos' sister Rei escaped with the Resistance's help.
* Terra states that Vareliens live for about 700 years and Azatoth about half that.
* Terra's the protagonists, ends with the Elements of Harmony—previously rendered inert by Titan—reignited, and Terra herself stripped of all power.
* Terra Stomper, for example). In Rise of the Eldrazi, it has an affinity-like ability where Khalni Hydra gets cheaper for each green creature you control. It has gotten to the point where in Modern, blue is considered the worst color while green is one of the best.
* TerraTech can have as many missile launchers as will fit on their hulls. Some weapons, such as the Avalanche missile launcher, fire multiple missiles each second.
* TerraTech, control blocks such as AI modules and cabs explode violently when destroyed. The explosion is big enough that with small techs, it can seem like the

entire tech is exploding.
* TerraTech has a handful of these, from the nimble early-game COIL gun to the powerful, long-range Zeus turret.
* TerraTech has the eCab, a futuristic hovering cabin for fancy vehicles.
* TerraTech has the Hawkeye company's AKIRA railgun. Although it fires in short bursts, the railgun deals more damage per shot than any other energy weapon in the game.
* TerraTech: Sergeant Smash, quest-giver for the Hawkeye faction. He starts out berating the player at every opportunity but mellows out as the player's license grade goes up.
* TerraTech thanks to the variety of tracks and heavy armour available to players. It is possible to build fast, nimble tanks that can fly, tanks which craft new blocks on the go or giant tanks with dozens of cannons. Or, given enough time, giant tanks with dozens of cannons that can craft new blocks and fly.
* TerraTech that can't be found anywhere else unless the player gets lucky with invaders.
* TerraTech: The MK-3 battleship cannon from Hawkeye is the most damaging weapon in the game. Although it can only fire straight ahead, dozens of them can be packed into a relatively small space.
* TerraTech. The player can build cars with missile launchers, cars that fly, cars that climb sheer cliffs, cars that build new components on the go, cars that deploy smaller cars... The sky is the limit.
* TerraTech. They use energy to stop bullets, as well as over time, needing plenty of batteries to be of much use.
* Terra, the Bradburys are a couple who are always arguing. Their friends can't understand why they're still married.
* Terra the creation of one of these is a long-term goal of the Resistance. As it stands two powerful factions are fighting over everybody else's heads and everyone else is getting thoroughly screwed.
* Terra: The Illumi-Mites are a subterranean race who look like large flying bugs, about a foot long. Atlee is friends with their prince K'a.
* Terra, the oldest Azatoth character we have data on, is 160 in the present day and looks to be in the equivalent of late forties/early fifties judging by his graying hair, and most of the other Azatoth characters are somewhere in the range of 40-60 years old and look to be in their thirties at most. Eve Arlia, a Varelien, is 72 and looks twenty-something. Meanwhile the oldest human character, General Winters, is 58 and looks his age.
* Terra. The two sides are armed with both missiles and guns but engage air-to-air with guns only.
* Terra the United Earth Coalition military uses a simplified version of the one used by most Earth militaries in real life, with enlisted Mobile Infantry and Navy using the same names and officers using different ones. The Asurian Empire uses one that is vaguely Roman-inspired but pretty much made from scratch.
* Terra the United Earth Coalition's F-71 Valkyrie is a two-person fighter, with the Guy in Back having the job title of Flight Engineer. Among the main cast, Alexis Hawke is the pilot and Rick MacFarlane is the Flight Engineer.
* Terra uses bits of this this as part of its art style. Helps that it's drawn on a computer.
* "Terra" versions of Corpus enemies, appearing in the Orb Vallis on Venus.
* Terra Wars, where Noctis teams up with Sarah to protect the Hiso Aliens from the destructive Eroders.
* Terra were killed, Alex and Rick were shot down and rescued by the Resistance) he voices his concerns openly to the general, who shoots him.
* "Terra!" written by Stefano Benni, narrates a weird space race to reach a mythical planet that holds the secret for unlimited energy, in a future when humanity has ruined planet Earth. Three spaceships are sent from different nations, playing with the trope in every direction:
* Terra-Xehanort. They were both shown to be the two most powerful members of the XIII Seekers of Darkness, both of them were also shown to overpower and tire their

opponents with ease, however, they were both eventually defeated by the Guardians of Light.
* Terre en fuite culture. Strangely, despite the small number of males, only men are soldiers and have a much higher status than women (this may have something to do with the novel being written in 1960). Additionally, some men are born completely lacking in initiative and are, thus, useless in combat, being relegated to a second-class status of servants.
* Terre en fuite is an old man telling the story of how he ended up on an alien planet to his grandchildren, as well as the formation of the human civilization there.
* Terre en fuite learns that human civilization is destined to be destroyed by an unspecified cataclysm (likely an ice age), although we will have visited Mars and Venus by that point. Only small primitive enclaves will survive in the equatorial regions. After the ice ages (yes, plural) end, humanity will resettle Earth (or Hellera as they will call it) and will even evolve better brains. However, this trope will be true for many hundreds of thousands of years before that happens.
* Terre en fuite, such as Earth and Venus. Note that the Moon remains in Earth's orbit despite Earth itself leaving. There is even a scare halfway through the journey that the Moon might not have enough mass to pass through the barrier, but everything works out.
* Terre en fuite), water, and air, as well as whatever plant and animal species they can save. Massive "space magnet" engines are constructed at planetary poles (except for Earth's North Pole, which lacks land, which is substituted with a dozen smaller ones along the Arctic Circle) to move the planets. Initially, the plan is to move the two planets into the Outer Solar System to wait out the nova. However, later studies reveal that, afterwards, the Sun will turn into a black dwarf incapable of sustaining life, necessitating the full use of the trope.
* Terrence advances on the K-Team, only to get beaten up by the Shadow.
* "Terrence and Phillip: Behind the Blow" shows that Terrence gained some weight after splitting from Phillip.
* Terrence arrives and beats the Shadow in the face repeatedly with a golf club, apparently just for the hell of it. Lauren escapes.
* Terrence Building in Rochester, New York was a large 16-story state-run mental hospital. It was built for the Rochester Psychiatric Center in the 1950s as part of a state-wide program to build bigger mental hospitals to replace older, smaller ones that were overcrowded. The Terrence Building operated until it was shut down in 1995 and was abandoned. Remaining patients at the time were sent to a newer and smaller facility on the campus. Today the tower is in a state of decay due to having little maintenance or protection from the elements and vandals and is a popular destination for urban explorers. However, the tower is still on the campus of an operating mental institution and there's still security guards that patrol near the building.
* Terrence Howard threatened to kill his daughter's boyfriend and told interviewers he would take her away where there are no phones.
* Terrence in goes from smug, quietly intimidating badass in series 1 to raving, giggling psychopath by the end of "Precious Blood".
* Terrence. In his defense, he later admits to having been "a bit off [his] face" at the time.
* Terrence Malick and they don't make it to the final cut or are reduced to a few minutes due to the fact that he shapes his films as he is making them.
* Terrence Malick Kit is holding captive inside. This is a particularly interesting one in that Malick has avoided publicity throughout his career and is rarely photographed.
* Terrence Malick panel), and has allowed people to take pictures and film of him working on his latest projects. However, he's still highly private. In June 2012, a paparazzi taking a photo of Benicio Del Toro outside a Hollywood restaurant inadvertently caught Malick on camera - the photographer had no idea who he was, and it was only afterwards that people pointed out it was the reclusive director.
* Terrence's name means "a thoughtful and good natured friend." He spends a pretty

good chunk of his screentime
* terrestrial mantis shrimp. One of the characters actually lampshaded this similarity to the Triffids, another group of creatures susceptible to the "kill it with salt water" tactic.
* Terrestrial Sea Life: Sea creatures interacting with humans on land.
* terrible accident or disease, but for them it's just an average day at the office, or a fascinating puzzle.
* Terrible Advice, a black comedy play by Saul Ruibinek of 'Warehouse 13' fame, featured a certain Scott Bakula in nothing but board shorts for the first 15 minutes. Ummm.
* terrible and focuses on engaging gameplay and spoofing just how silly the whole Assassins vs. Templars plot became during the last few add-ons. The game is so refreshing some players even consider it was a missed opportunity for Ubisoft to launch a new franchise, dedicated to piracy.
* Terrible Artist: An artist whose illustrations would fail to impress a kindergartner.
* Terrible behavior by army spouses (usually wives of officers) trying to abuse their partners' rank is relatively common in many military settings; in the US armed forces, perpetrators are invariably reviled and the most common real effect is an embarrassed apology from the spouse holding the actual rank. The on-base slur for such people in the US are "Dependas"
* terrible cooks, they seem to do just fine when asked to cook recipes.
* terrible. Everyone's excuses to get rid of their plates end up being a form of this:
* terrible hypothetical life Mindy is going to have, step by step. He never says he's upset by what she's said-because he doesn't have to.
* Terrible Interviewees Montage: A montage is shown where people are interviewed and every potential applicant proves that they are very unqualified for the available job.
* Terrible Interviewees Montage: A montage of interviewing applicants for a job where every applicant proves themselves to be very unqualified for the job.
* Terrible Interviewees Montage. Dexter never, ever has a problem getting his nanny to look after Harrison, no matter how unpredictable his schedule is. Sonya eventually has enough of it, though.
* Terrible Interviewees Montage had actors auditioning for an advertisement for air freshener. One man is so awful he doesn't get the part until he turns his head to sniff and reveals his enormous nose.
* Terrible Interviewees Montage makes Tom rather uncomfortable with his knife play.
* terrible is surprisingly upbeat considering that not even a week passes between this enormous loss and going right back to picking up the pieces of his mercenary life afterwards.
* terrible job diverting suspicion away from herself, despite being purportedly a good liar. It's especially obvious once it is deduced that Hifumi is the accomplice when Celeste is the character who Hifumi interacts the most with; granted, she hates him, but his crush on her makes it easy for her to manipulate him. How intentional this actually is is up for debate.
* terrible loyal to the Imperium. Hell, other chapters have been known to turn renegade for a fraction of the shit they went through.
* terrible on the part of her and Shepard, after everything falls to pieces.
* Terrible Pick-Up Lines: A character attempts to use smooth one-liners to attract their preferred mate. It doesn't go well.
* Terrible Pick-Up Lines: Cannot flirt without annoying/creeping out the other party.
* Terrible Pick-Up Lines: Character attempts to use smooth one-liners to attract their preferred mate. It doesn't go well.
* Terrible Pick-Up Lines: Pick-up lines so crass or awful that you'd have to be a total jerk to think they'd help you be successful with women.
* terrible social skills in general. When tasting dishes as either part of her job or just because she can, she's able to make extremely detailed observations like

noting someone cooked a single ingredient for several seconds too long, skipped a particular step in the cooking or at best noting exactly what steps someone took in cooking, what ingredients they used and most other things about the preparation.
* terrible Spanish. By all accounts, this is entirely intentional by his voice actor, Burnie.
* Terrible, Thanks for Asking, discussed being jealous of old couples holding hands after her husband died in their early 30s.
* Terrible things happen to the immaculately dressed police detective Sergeant Dori Doreau in
* Terrible Trio, but they still had a sizable fanbase, including on the show's staff, and so they're still here.
* Terrible Trio don't use the traditional black uniform that normal mooks use. Instead they made their own white uniform to stand out.
* Terrible Trio dynamic. In some cases, Tiny is replaced with N. Brio or Nina, Cortex's niece.
* Terrible Trio meanwhile became far more ruthless and sadistic, while also adopting a rhinestone-loving ghetto girl persona.
* Terrible Trio to refer to him as "Tucker's brother" or "the other guy".
* Terrible Trio to start reciting their motto. Cue Giovanni hanging up wondering who the hell those idiots were. This operates on two levels because Meowth is the competent sidekick to the bumbling Jesse and James.
* terrible who collapses in tears at the slightest evidence that something may go wrong. As a result, while she plays this role to Lila and others who are outside the family, she and Helga are pretty distant — and sometimes Helga comes off as more mentally strong than Olga does.
* terrible who once abused one of his co-stars to the point where they framed him for armed robbery.
* Terrible Writing Advice: In episode "Alien Ecosystems", Beaubien mocks the trope being used with no sense.
* Terrible Writing Advice is deposed, because actually displaying the realistic consequences of a major war power collapsing would turn incredibly depressing incredibly quickly. Nations would need to invest tons of resources into reforming or replacing the government, along with getting rid of the old leaders, new factions would spring up and start fighting each other, the army is still around even if their commander isn't, and the nation's allies, trade partners, and protectorates will now be bearing a grudge, possibly kicking off even more major conflicts and spiralling the world into a new dark age.
* Terrible Writing Advice, it's mocking the over-use of this trope. In the "Evil Empires" episode, the reason he advises basing the empire off of Nazi Germany is because if you chose a different historical empire like Ancient Rome, that would require opening up a history book and actually doing research, which is always discouraged because that requires effort. The "Grimdark" episode also advises basing the bad guys off of Nazi Germany, but then proceeds to show a list of empires and how long they lasted, pointing out that Nazi Germany lasted for a bit over a decade, which is nothing compared to empires like the Ottoman and Roman empires, which lasted for centuries.
* Terrible Writing Advice: JP will often think of a valid objection to his own writing advice, only to then dismiss it out of hand.
* Terrible Writing Advice relies heavily on this. As the name implies, the narrator will give intentionally bad advice and treat it as the best writing advice to give viewers, and any genuinely good advice he gives, he says is terrible on the grounds that it would be boring or take too much effort on the writer's part.
* Terrible Writing Advice's video on Intrigues, he suggests piling on more and more elements, with a picture of him holding a sink and thinking, "Well, in it goes."
* Terrible Writing Advice where various evil archetypes fight over the sponsor as if it was the secret to world domination or whatever evil goal they have.
* terribly awkward and embarrassing interview went to the top of bestseller lists. As it's a non-fiction book written by an academic, it might not ever have reached that kind of sales had the interviewer been able to keep her foot out of her mouth.

* terribly wrong while Xavier is linked to Cerebro because he is screaming in agony and cannot sever the connection. Raven, Hank and Moira are unable to help him, so in desperation, Alex is forced to use his power to disable the supercomputer.
* Terri Clark's 2003 hit "I Wanna Do It All" had edits that replaced the line "See the Yankees play ball" with a local baseball or football team. An edit also existed for the syndicated show
* Terri Clark's "Better Things to Do" is a phone conversation with her ex, who called hoping to find her miserable over the breakup. (Her response is to list mundane, tedious, or pointless things that are a better use of her time.)
* Terri Clark's two #1 hits stateside are "Girls Lie Too" and "You're Easy on the Eyes", the latter of which is nowhere near as popular as the likes of "I Wanna Do It All", "Poor Poor Pitiful Me", "Better Things to Do", "Now That I've Found You", or "I Just Wanna Be Mad". What makes this all the more unusual is that "Girls Lie Too" itself only got to #1 because of chart manipulation, but it remains one of her most popular songs anyway.
* Terrier don't get the chance to have this trope applied, since Rosto gets to them first.
* Terrier is found out by the spotting of several such threads in the announcement they sent out. The threads were these: They used pure red wax for seals (the legitimate version includes ebony shavings), used a cotton ribbon (legitimate announcements use silk), misnamed the king, and wrote the letter "s" normally (scribes at the Ministry of Slave Sales put an extra curl on the letter "s").
* Terriers, and the novelty of it being able to record video is repeatedly remarked upon, putting it firmly in the tail end of the 2000s/beginning of the 2010s.
* Terriers, Dachshunds, and generally any dog that hunts smaller animals, famously do this to kill their prey, grabbing them around the neck with their extremely strong jaws and shaking them around until they stop moving. Partly because it works, and partly because it keeps their prey from biting back.
* Terriers: Ex-Cop and recovering alcoholic Hank's old drinking buddies call him "Occifer" even when they're sober.
* Terriers, Hank's sister Stephanie is played by Donal Logue's sister Karina.
* Terriers is a textbook example of a season finale that works as either a cliffhanger for next season or a satisfying resolution to the series. (It turned out to be the latter when the show was not renewed.)
* Terriers, where main characters Britt and Hank drop a car from a cliff in order to get rid of evidence. Britt keeps staring at the car for a while after it has crashed to the ground: "Huh." To Hank's question "What were you thinking, that it would explode?", Britt replies: "I was kinda hoping, yeah."
* "Terrific" didn't originally mean great, it was initial a synonym for "terrifying" or "terrible". Most dictionaries still accept this as a secondary meaning, so it's still technically correct to say things like "a terrific tragedy", though most people will probably look at you funny.
* terrified at what will happen when humans get to the point of seriously moving into space given the way humanity seems to keep pumping out ridiculously powerful superhumans.
* terrified of aliens. In a special side story, she tries to play a video game with 'Blue Kappas' as the monsters with the logic that since they're not aliens, she'll be fine. Unfortunately, the monsters are indeed aliens and she's found an hour later, hiding in a closet.
* Terrified of Germs: Help! Germs! Sick disgusting germs! The worst thing to have around me!
* Terrified of Germs to the point of avoiding skin-to-skin contact, questions Joey about his relationship with his co-star:
* Terrified of Germs: Where alien germs or single celled lifeforms (like the Blob) infect people or other Earth based life forms, or simply a fear of what an alien germ may bring, even if it's harmless.
* terrified of them. When Troi is posing as a Tal Shiar officer aboard a Romulan Warbird (long story), she mostly maintains her cover because the ship's crew doesn't dare question any of her actions. Near the episode's climax, she

commandeers the ship from its rightful commander by threatening to summarily execute not just anyone who objects, but their entire family. The crew's reaction makes it clear that nobody doubts that a member of the Tal Shiar would follow through on that threat.
* terrified that Orion was actually still alive in Volkoff's mind via a clever computer hack.
* Terrifier (2018), a medical examiner asks the cop who drops off two dead bodies to get him a breakfast sandwich with back and then they have a whole conversation about how can he eat when he's surrounded by dead bodies.
* Terrifier. Art the Clown does this to a pizza shop owner after the latter kicks him out of his shop for covering the bathroom in his own shit.
* terrifies anyone who's ever heard of him speech with good grace when Wanda cuts him off. In the sequel, he actually comes to Harry's defense when an evil sorcerer is torturing him, making it clear that the guy in question is going to suffer and die for the crime of 'attempting to harm his daughter's beloved.' Overall, Harry describes his prospective father-in-law as being "friendly. Terrifying, but friendly."
* terrifies royal protocol to realize what Luna is attempting to convey by her conduct.
* terrifying blur of vampiric violence who kills Zorin and her entire unit single-handedly.
* terrifying breeding habits and their habit of cocooning themselves not far from the corpses of their victims, the adult form is largely harmless to human beings, given that it rarely stings and actually lacks venom glands in some cases.
* terrifying, considering there are almost no special effects and only two character deaths, both of which are peaceful, non-violent, and off-screen. In it, the villains are angel statues which move only when they're not being observed. So long as you're looking at them, you're safe - unless, of course, you blink...
* Terrifying Girls' High School: Lynch Law Classroom high school girls drag another girl into the bathroom and force her to drink water from a faucet. This is so she gets humiliated when she has to pee her pants in the classroom.
* terrifying icy rendition of this in "A Royal Problem" after Starlight switches her and Princess Luna's cutie marks and very nervously explains that she can't switch them back till the spell wears off.
* terrifying implications for the world in which the movie takes place.
* terrifying. In the Legion expansion, players get to kill the creator of these and other humongous mecha employed by the Burning Legion: Kin'garoth. He's a mad scientist type who has replaced his arms with massive cannons.
* terrifyingly in which the entire main cast kills each other; Giles' last-minute actions save the day and propel everyone back into their proper reality, but it's still incredibly frightening.
* Terrifying Pet Store Rat: An animal is meant to be scary, yet fails to look or act scary due to being played by a tame animal.
* Terrifying Pet Store Rat: Wild animals are difficult, if not outright illegal, to handle and keep, and pose a high risk of injuring themselves or the actors and crew if used in a movie, so a tame and socialized animal is used instead.
* terrifying. "Stuff Talks When You're Not There 2: This Time, Everything Talks". Rated G.
* Terri hapless Opposition MP Peter Mannion, in order to flirt with him. (He doesn't notice either the flirting or that she is rather obviously not a smoker.)
* Terri Poch in a disgustingly ugly body suit-though her entrance video still played up her attractiveness.
* Terri Poch reveals that the women of the Attitude Era didn't have any agents to help them put their matches together. So they had to go to the other wrestlers and ask for feedback. She describes Triple H as someone who always helped them out. Fast forward to 2015 where NXT is under Triple H's control and produces some of the best women's wrestling North America has ever seen - and the women get to main event a PPV for the first time ever in WWE.
* Terri Power (WWE's Tori), which was their lone PPV and their final event ever.

* Terri Runnels because she didn't want to harm her daughter's reputation. Years later, she had this conversation with her daughter, who assured her she would have loved and respected her anyway.
* Terri Runnels, began to associate Terri with Trish when Trish wasn't around.
* Terri Runnels would go wild when he saw what was under her robe - and revealed a demure 50s bathing suit with bathing cap, snorkel and flippers.
* Terri "Terri Power"/"Tori" Poch: Debuted as a valet in 1988, made her in-ring debut in 1990.
* Territoire, which would be around 2011. Development has been constantly pushed back but the blog entries show that the creator still has enough interest to work on it to this day.
* Territorial Comic Relief: An established comic relief character tries to resist a newcomer.
* Territorial Comic Relief feels challenged by a new comic relief joining the group.
* Territorial Comic Relief feels threatened by another comedic character.
* Territorial Comic Relief is threatened by another comedian, often leading to a clash of jokes.
* Territorial Smurfette: The sole female character will get antagonistic toward any new female who tries to join the group.
* Territorial Smurfette: Women are automatically catty with each other at first sight.
* , territory, kingdom, city, town, and major location has a detailed article about its geography, culture, technology, government/politics, economy, transportation, and history.
* territory-marking calls sound like a capercaillie (see above) trying to imitate a donkey, with a few shades of swine and elephant seal thrown in for flavor.
* Terroma is another major case of this, as he has nicknames for those especially close to him. More specifically he is fond of putting the words "Sweet", "Pretty" and especially "Little" in front of Ellena's and Raenna's names.
* Terroranchula, which creates force field-like webs that neutralize Ball Weevil's plasma attacks and trap him, and can squeeze into narrow spaces like Ball Weevil can.
* Terror at Black Falls: Juan's vow of revenge drives the nervous, stressed-out townspeople to drink, even the ones who usually stay sober. This means that the saloon is quite crowded when Juan takes it hostage.
* Terror at Black Falls, Manuel Avila is hanged by a mob of farmers for stealing a calf. Sheriff Cal and Manuel's father and brothers all rush to stop the hanging, but they are too late. Enraged, Juan tries to shoot Cal, who shoots him in the hand. Juan's hand has to be amputated, which gives him another reason to want revenge.
* Terror Birds have been killed, but they managed to lay a couple of eggs that have managed to hatch into healthy babies.
* Terror Birds: The intro of the movie shows the birds being airlifted to the ranch, then attacking some people who are supposed to be transporting them... then it skips ahead three months.
* Terror Birds: The titular birds kill a few people over the course of the movie by biting their heads off.
* Terror By Night, Colonel Moran goes from Professor Moriarty's sniper henchman to his academic colleague with apparent proficiency in mathematics and criminal scheming.
* Terror By Night, the killer is smuggled on board the train concealed in the false bottom of a coffin.
* Terror By Night unfold on an overnight train trip from London to Edinburgh, and the movie ends before the train reaches Edinburgh.
* Terrorform", Kryten, in a perfectly earnest manner, spends a minute giving Rimmer a long list of reasons why he'd have so much self-loathing (and only goes through half the list).
* Terror From The Deep, has an even easier final mission, especially when compared

to the rest of the game. Not only is Cthulhu incapable of hurting you, his bodyguards kinda suck too.
* Terror From The deep takes place underwater, so most weapons are based around energy, however, most of them also don't work above the surface, meaning you'll have to keep ballistics handy.
* Terror from the Stars supplement. The Mi-Go have a "electric gun" that fires a bluish bolt of sparks that does damage, causes muscle spasms and can cause death.
* Terrorgheists are the terrifying, undead husks of dragon-sized bats that live in the Sylvanian wilderness.
* Terror has the ability to replace parts of his body with those of others, including animals. Good thing too, since his body is constantly rotting away. He can secrete a substance akin to an extremely fast-working digestive enzyme from his skin, which makes tearing off body parts even from still-living people easy. An added perk is that he gains access to memories and skills related to the body parts he assimilates: an eye allows him to see what the original person saw, an arm from an artist can help him draw accurate sketches and so on.
* Terror Hero: A heroic character who gives off an frightening disposition that everyone is terrified of.
* Terror Hero: Great! That hero is taking advantage of my fear! Why did I, a villain, have to be scared in front of him?!
* Terror Ihr Urteil, providing two alternate endings, depending on whether or not the audience, who act as lay judges, find the defendant (an air force pilot who shot down a hijacked passenger airliner against his superiors' orders) guilty of murder.
* Terror in a Texas Town, George Hanson arrives at his father's farm after twenty years at sea, only to learn that his father had been murdered two days before. Hanson sets out to learn the truth about his father's death and avenge him, and to secure his inheritance of the farm.
* Terror in a Texas Town Johnny Crale had his right hand shot off, and replaced with a steel prosthetic that he uses a bludgeon.
* Terror in a Texas Town McNeil's enforcer. He commits all of the dirty acts required so McNeil can keep his hands clean. So while it is McNeil's scheme that drives the plot, it is Crale's acts that put the match to the powder keg.
* Terror in Resonance afterwards, there is absolutely no hint of any global reaction to this incident.
* Terror in Resonance. Another races to disarm them all before they go off and kill both parties.
* Terror in Resonance The next episode starts off with still images of rescue workers in the rubble that appear to be directly inspired by photographs of the aftermath of 9/11, followed by high-level anti-terrorism conferences as police discuss their options.
* Terror in Resonance where the main protagonists are Japanese terrorists.
* Terror in the Family centers around a teenage girl (played by a young Hilary Swank) acting violently towards her family. She even goes as far as breaking her father's hand. We learn throughout the film that she's mostly doing this to impress her rebellious boyfriend, who is ten times worse than her as he once punched a teacher.
* Terror in the Jungle; the producer was incompetent and pretty much making things up as they went along, causing two of the directors to quit and resulting in a wildly disjointed story.)
* ''Terror in the Skies" adventure. After a character puts on the Scintillating Medallion, for a year and a day they gain a bonus to their defenses against the Horror powers Corrupt Karma, Karma Tap, Terror and Thought Worm.
* Terror Is A Man, substituting the novel's menagerie of Beast-Men for a single panther-man created via surgery.
* Terror Island are logically derived from universal axioms and they have no control over their content.
* Terror Island, but the groceries were taken away by Aorist. When Stephen and Sid finally get groceries together, the comic immediately ends.

* Terror Island displays the most recent (and now final) numbered strip on the main page. Since the webcomic's surreal plot centers around the main characters' refusal to buy groceries, it's obvious that any plan to get them to do it will fail since there are still more strips to read.
* Terror Island. First Folio describes the plan clearly to Stephen and Sid, and the plan goes off without a hitch.
* Terror Island) for attending parades. Not only that, but the parade was actually only supposed to be for stuntmen. Why? Because he had just solved the problem of Jame's stuntman no longer being bound by law to him for jaywalking by telling Jame to just hire him.
* Terror Island has each character represented by a playing piece from a board game, except for the cat, who is played by an actual cat.
* Terror Island, one of the main characters tries to sneak into a college reunion under the obviously made-up name "Ned Q. Sorceror, D.D.S.". Turns out the school actually has an alumnus by that name.
* Terror Island, several characters are attempting to banish a demon. They gather everything they need except toothpaste when the demon traps them in a force field, leading to this.
* Terror Island. Sid and Stephen's scheme to get the other to buy groceries is getting more and more zany.
* Terror Island with Sid and Stephen; neither of them ever manages to successfully trick the other.
* Terrorism Tropes: Tropes about using violence to enforce political ideologies.
* Terrorist "Angel Feathers" had a shotgun built into his wrist, and nearly kills Batou when he drops his guard after apparently disarming him.
* Terrorist groups have their own variation of this trope. Setting off a big attack in a major capital will get one loads of attention, and makes up for the fact that they don't have any conventional means of hitting the seat of government. The 9/11 attacks saw the Pentagon get hit, and the 2015 Paris attacks would also be included in this variation. Unfortunately nowadays, since terrorist groups are not an actual nation, while this
* terrorist organization wanted in all of Citadel space, it wouldn't be surprising if it were something like "cmdshepard@cerberus.org"
* terrorists and terrorist sympathizers (and a film based on it) elaborate this view.
* Terrorists in a fictional Middle Eastern country try to prevent girls from being educated in an early issue of Mark Waid's
* terrorists invade our imagination, the evil characters taking over, and Al Gore nuking the area restores everything to the way it was in the end.
* terrorists.) This still managed to produce the same reaction with old media you'd expect with something like pornography- many reminders for parents to make sure their kids aren't talking to strangers or looking at the wrong things (common sense, really).
* Terrorists throwing empty boxes at Bond, which he catches and throws back even as they both have guns.
* terrorists to conspire in plain sight on MMORPGs. Given that the entire scenario they presented was manufactured out of whole cloth and no such collaboration has ever been detected (or even suspected before now), it seems pretty obvious that this is another "oh my god! bad people can talk together!" panic similar to the one raised over the telephone a century and a half ago.
* Terrorists Without a Cause: Criminals who commit violent acts which may resemble terrorism, or may have (nominally) ideological motives, but their end goals are mostly apolitical.
* Terrorists Without a Cause idea. This character is generally someone with a good knowledge of chemistry who applies it to arm the anarchists with explosives.
* Terrorists Without a Cause: Ruthless militants who terrorize people under the pretense of an ideology, but lack any real political goals.
* Terrorists Without a Cause: These criminals commit quasi-terrorist acts with a thin veneer of political ideology.

* Terrorizer as "musical deconstruction", explaining that it lacked "coherency, rhythm, melody, structure and all aspects of what would typically be associated with the art of songwriting". They also gave it an 8.5/10.
* Terror of Mechagodzilla an alien invasion flick, pitting Interpol agents against the secretive invaders.
* Terror of Mechagodzilla, Godzilla takes advantage of Mechagodzilla and Titanosaurus being distracted by the JDF's fighters to charge at Mechagodzilla, casually shoving aside Titanosaurus in the process. Unfortunately he wasn't able to stop Mechagodzilla from destroying the fighters and got himself knocked down by the evil robot.
* Terror of Mechagodzilla has Dr. Mafune, who not only turns his own daughter into a cyborg but he also invents a device that allows him to control the sea monster Titanosaurus.
* "Terror of the Autons" cited his inspirations for the story as the preponderance of cheap disposable plastic fad items that began to really take off in the '70s, and realising you would only need four inches square of plastic sheet to suffocate someone.
* "Terror of the Autons") he actually uses the phrase "worthy opponent" to describe the Third Doctor.
* Terror of the Autons", his very first appearance, he uses a death trap consisting of artificial plastic flowers which will fire a plastic seal over a person's nose and mouth, suffocating them. After enough time has elapsed for the victim to die, the plastic seal will then shrivel up and vanish. Naturally, it only works until the Doctor's current companion falls victim to the trap, whereupon the Doctor saves her by using a spray which causes the seal to lose adhesion so it can be removed before the victim dies.
* "Terror of the Autons", the Master takes over Rossini's Circus with a mixture of hypnotism and threats and forces the staff to act as his mooks. A downplayed example, as there is no actual circus performance in the story.
* "Terror of the Autons", then shouts at the pretty ditz who sprays it with a fire extinguisher because she's ruined months of work. Doctor, meet your next companion, Jo Grant.
* Terror of the Autons", Three disarms an explosive trap set by the Master by yanking hard on its trigger-cord, so the impact-sensitive bomb flies into the air rather than tips over. He catches it gently enough to avoid detonation and takes it apart.
* Terror of the Autons, which mercilessly exploits a child's fears of their cheap plastic toys moving around when the lights are off.
* Terror of the Deep — in order to defeat the monsters living in it. The oxygen slowly runs out, they may come from any direction, and you can only look through one window at a time.
* Terror of the Zygons" mentioned that the Brigadier literally had a "space-time telegraph" with which he could call the Doctor, though he was explicitly instructed not to use it except in extreme emergencies. The device came up once again in the 50th anniversary special, where the enemies were, once again, the Zygons. It seems that the telegraph is linked to the TARDIS in such a way that it connects them at the same points in their relative (subjective) time, justifying this trope.
* Terror of the Zygons. The scripted version of the screen required a practical special effect that was too expensive, so it was discarded and Baker and Sladen were allowed to devise their own scene.
* "Terror of the Zygons": The Zygons plan to modify the Earth’s climate to make it more suitable for their species.
* "Terror of the Zygons": The Zygons' tech is organic — their computers look more like coral than machinery. However, only the interior appears organic; the exterior seems to be a metal hull.
* Terrors like Cú Chulainn who know magecraft, are divine, can move, fight, and kill faster than human eyes can track, and may have a
* "Terror Starts at Home" by Beneath the Sky is another example of this. A man rapes his own daughter and she responds by cutting his penis off. The music video

shows it in graphic detail.
* Terror Titans miniseries, Dreadbolt induces this in his father, Bolt, by interfacing with his suit and forcing him to teleport halfway into a brick wall, killing him.
* Terror Titans, the third Persuader, Elise Kimble, seems to have had a loving relationship with at least one of her parents. Her father utterly adored her, but her mother eventually drove him away, and it was because of her upbringing that Elise became a killer. She actually killed her mom when she found out. When she's reunited with her father years later, he tells Elise that he wanted to take her with him, but she was a dependent, which meant she was worth money to her mother. Her mom threatened to make it look like he was abusing her if he tried to take Elise, so her dad tried to spare her a life of being on the run from the law by leaving. Their happy reunion is cut short when Elise's boss, Clock King, kills her dad right in front of her.
* Terror Tract is an example of this. Consisting of nothing but strange deaths, and bizarre incidents that a realtor tries to hide from a couple who wants to buy a house in the area....except he can't keep the secret and tells the buyers about each house's sordid grisly background.
* Terror Train. Naturally, he freaks out and ends up in a mental asylum. Of course, this almost gets them kicked out of school, but surprise surprise, three years later during a graduation train ride, the frat boys (as well as a wrong-place, wrong-time David Copperfield) start getting knocked off...
* Terror Train opens with bunch of med schoolers setting a date for one of their own. When the subject of the prank finds out that his "date" is really a corpse, he goes crazy and returns after year or two to exact revenge.
* Terror Train, there's a masquerade party held in the title vehicle, providing plenty of disguises for the killer.
* Terror Train with Alana, as made clear by the fact that Jamie Lee Curtis was playing her. However, she's not completely pure or innocent either, given that she had a part in a prank that sent the killer over the edge.
* Terror T.R.A.X. - Track of the Vampire orders her to shoot him preemptively. If you don't, he springs up as a vampire and kills the other agent. If you do, the vampire calls to taunt you with the fact that the agent was still human so you killed him needlessly.
* Terror Underground Transit To Torment from 1995 took place in one of these, being based on the urban legends about people born and raised in the tunnels.
* terror units attacks they're all too eager to use. To make things worse, you often have to fight with a cobbled together band of scrubs with only beginner-level rifles and pistols, instead of the squads you've probably invested blood and tears training — all thanks to quirks of how the game works.
* Terror Valley, Calamity Jane sneaks out of the mission by hiding in a 'possum-belly'; a sheet of rawhide attached to the bottom of a wagon for carrying firewood.
* Terrorvision's "How to Make Friends and Influence People" has the same "Tick... Tock... " at the beginning and the end.
* Terry also appears to have gotten one just before we come on-screen. Which makes sense, since he's an Iraq war vet who had just seen
* Terry Ananny's art focuses on children having fun in a realistic setting.
* Terry and Julian as Julian leads Terry into one funny scrape after another.
* Terry And Julian: There is an inversion of this trope when an oven explodes and Julian appears in the next shot lamenting "what am I to do punters, I've blown up Terry's oven and I'm a complete mess," pointing to a single spot of dirt on his cheekbone. The joke parodied Julian Clary's vanity and unwillingness to dirty himself for the sake of the show.
* Terry and the Pirates, but if you liked Dude, I hope you'll spare a thought for Higgs. Dude died when he did."
* Terry and the Pirates, Cap'n Blaze and his gang disguise themselves as monks when they set up an opium farm inside a monastery.
* Terry and the Pirates had a famous strip in which Terry, having just gotten his fighter wings, is given a speech by his instructor who makes it clear that he

expects Terry to treat his support crew like the supply pilots and mechanics with respect.
* Terry and the Pirates has several of these: Dragon Lady, Sanjak, Rouge, Klang...
* Terry and the Pirates. Having captured Pat, Klang dresses him a Japanese uniform, gags him and ties him to a post so he looks like a sentry in the fake camp the Dragon Lady is about to attack.
* Terry and the Pirates is that he was once a servant of the Dragon Lady; she cut out his tongue when he was young, earning his hatred.
* Terry and the Pirates: Normandie Drake is an heiress and Pat's true love. They grew close when he worked for her father. Her high society aunt refused to see her marry a "commoner" and forced her into an arranged marriage to the weak-willed Tony Sandhurst. When She and Pat meet again, she is pregnant with Tony's child and is committed to the marriage. When they meet again during the War, Normandie's child Merilly is four years old. When she discovers that Tony is working with the Axis Powers, Normandie still refuses to divorce him.
* Terry and the Pirates refers to everyone as 'something one'. Pat Ryan is 'handsome one', Terry Lee is 'youthful one', etc.
* Terry and the Pirates. She ran away from a society wedding; fleeing to China and setting up a medical mission.
* Terry and the Pirates. Terry and Pat are frequently dragged into her plots. Other resistance leader, such as the Blue Tiger, also feature prominently.
* Terry and the Pirates, Terry gets a speech from his commanding officer just after he gets his flight status which includes him stressing him treating the US Army's bureaucracy with respect.
* Terry and the Pirates, the corpulent Papa Pyzon is a slave-trading criminal when Terry and Pat first encounter him. He later returns as an Axis agent during the war.
* Terry and the Pirates: The Dragon Lady smokes through a cigarette holder, making her appear classy.
* Terry Bogard, finding himself in an alternate dimension where he's shocked to discover that he's suddenly a she!
* Terry Bogard injures his ankle right before being asked to fight Kim Kaphwan in
* Terry Bogard This caused many fans who were unfamiliar with Mai to look her up, and a massive outpour of fan art involving her rejection and her stripperiffic design soon followed on Twitter. Some have even begun to request her as a fighter in spite of the rejection.
* Terry Bradshaw was famous for this on the gridiron. He claims that at one point his teammates presented him with a mock-up Emmy statuette.
* Terry Brooks has, and it's easy enough to see why the Seekers are so feared.
* Terry Brooks series an evil, beautiful witch too. Nightshade is the only antagonist who shows up in every book of the series, and she has the most powerful magic in all of Landover after the land itself.
* Terry Brooks title; subsequent printings shrunk the blurb down to just the top edge of the cover.
* Terry Callier's "Lazarus Man" connects the wandering Jew legend with the biblical Lazarus.
* Terry Carr if this is one of those magical shops, but the proprietor dismisses the notion quickly.
* Terry Cashman did several baseball-themed songs in the '80s, including "Talkin' Baseball (Willie, Mickey, and the Duke)" and "Play-by-Play (I Saw It on the Radio)".
* Terry Crews in certain Old Spice commercials. Among his calls is "BUILDING KICK!"
* Terry Crews, leaving him speaking in gibberish that's subtitled as "What a powerful mistake I've made."
* Terry Crews's character is actually attracted to one of them because, as he described "her", it's a "white woman with a black woman's ass".
* Terrydactyland. If you score at least 75 points, Chompa will reward you with a jiggy.

* Terry Farrell (Nicole De Boer). The suddenness of Jadzia's death and Ezri's arrival worked greatly into the storyline, with Ezri's main conflict being her having to form new relationships with people who'd already been her (Dax's) friends—and, in Worf's case, husband.
* Terry Fuckwit, God offers Terry Fuckwit eternal life in Heaven in exchange for taking his cakes out of the oven. The Devil interrupts and offers him an alternative deal: "why not sell me your soul for this dried up piece of dogshit?" Terry Fuckwit accepts the Devil's offer.
* Terry Funk. Debuted in 1965, became one of the top wrestlers in the world in the 1970s.
* Terry Funk in this light, largely because of the amount of punishment the man is willing to take in the course of a match.
* Terry Funk is one of the toughest SOBs in the wrestling industry (having wrestled for 50 years and counting) and he certainly looks the part. However, Funk happens to have a rather soft and kindly voice, which can be quite jarring to hear coming out of a man who has fought in more hardcore matches than you can shake a stick at.
* Terry Funk times. It's gotten to the point where nobody believes any wrestler is truly retired.
* Terry Funk to bring him in to the WWF to team with "Hoss" (aka Dory) after Terry got a singles push.
* Terry Garner was killed after being knocked over and then eaten by his own hogs... and all that was left of him were his dentures.
* Terry Gilliam, and compressed the dialogue very badly. The artwork isn't bad, though, if you can find a copy.
* Terry Gilliam and John Cleese first met while doing a fumetti feature, laying the foundation for what would eventually become
* Terry Gilliam animations was about an invasion of killer cars that were defeated by atomically-mutated giant cats. Unfortunately the cats then ate the city.
* Terry Gilliam as a sinister man smoking on the stairs of Shangri-La Towers.
* Terry Gilliam compulsive gambler who is always willing to give another chance for the good Doctor to win their Faustian deal as a sort of double or nothing-clause, since he really loves the game more than winning.
* Terry Gilliam features Dell, a crazy woman who helps an orphaned girl perform taxidermy on her dead father, so they can dress it up and have it sit at the dinner table with them.
* Terry Gilliam. Gilliam is an American who moved to England and became a British citizen.
* Terry Gilliam, in which an old man has a magic show in which he transports people into their own minds. Then he and the Devil present them with a choice to pursue beauty/truth/imagination or selfish id-fulfillment.
* Terry Gilliam is a legendarily close adaptation of the novel (almost word-for-word).
* Terry Gilliam it is not a Python project, nor a sequel to "Holy Grail".
* Terry Gilliam's animation of a man lathering his entire face and then chopping his head off.
* Terry Gilliam's cut-and-paste animation is full of weird collages of old photographs and paintings, with body parts moving in odd ways and sometimes even falling off.
* Terry Gilliam sings about his legs but is shot mid-lyric. In "Never be Rude to an Arab" the singer is blown up after using too many racial slurs.
* Terry Gilliam that most fans considered to be a fitting conclusion for a landmark TV show.
* Terry Gilliam, while disapproved by critics, was a surreal horror fairytale.
* Terry Goodkind as though they are objective proof of his brilliance.
* Terry Goodkind has nothing good or kind to say about people who don't like his books. When asked what he had to say to or about his readers who complained that he'd gotten too preachy, often sacrificing story and character just to hammer home his message, he said this:
* Terry Goodkind to inflict pain on anyone it touches. The Agiel also hurts the

Mord-Sith if it's the same one she was 'trained' with, but they're conditioned to withstand the pain. It is fatal, however, if it touches anywhere near the heart. There's also Wizard's Pain.
* Terry Goodkind. Which, of course, no fantasy novel can be. He has gone on record as saying that fantasy is a "tired, empty genre" that he and he alone, apparently, has "inject[ed] thought into." Goodkind has repeatedly stated his opinion that fantasy, as a genre, cannot be about anything more than magic, dragons, wizards, and the like. He, on the other hand, only uses those elements to communicate important human themes, which makes him a serious novelist.
* Terry Goodkind with thanking Richard and Kahlan for telling him their story.
* Terry Hintz's basic attack involves him charging up at the enemy and pathetically tripping and flopping on the ground. At the beginning of the game, he says that he pulled his hamstring.
* Terry Jo Duperrault, who at only 11, survived an ordeal that would have broken most adults—witnessing the murder of her entire family by the skipper of their yacht (who had murdered his wife as well), then being abandoned on the sinking vessel by the killer. She was able to launch a dinghy and drifted for four days, being within hours of death from exposure when she was finally rescued. The moment her killer heard she'd survived, he committed suicide, knowing she could destroy the lies he'd told investigators when he himself was rescued.
* Terry Jones as a parody of the Cleese/Chapman. Terry and Michael were incredibly surprised when the group decided it was still funny enough to be filmed.
* Terry Jones of any British male comedian. It's a rare big-name comic or comic actor who hasn't done this once in their career.
* Terry Lewis, former commissioner of the Queensland Police, lost his knighthood after a judicial inquiry implicated him in acts of forgery, perjury, and accepting $700,000 in bribes in exchange for protecting criminal rackets. He was sentenced to a total of ten-and-a-half years in prison.
* Terryman vs. 100-Ton King: After Terryman performs a Calf Brander on the 100-Ton King, his metal body shatters into pieces. It looks like Terryman is the winner...until King's fist hits him on the head, knocking him unconscious.
* Terryman vs. Ashuraman: When both fighters are knocked out of the ring, Terryman, realizing he can't beat Ashuraman, holds him to a draw by trapping him in a scissor hold so he can't get back to the ring before being counted out.
* Terry McGinnis grew up with a normal childhood; that he wound up fulfilling their ambitions anyway was pure serendipity. The series also had a villainous example in Zander, who was genetically engineered and raised to be the perfect leader of the terrorist organization Kobra.
* Terry McGurrin (voice acting example, although also a prominent stand-up comedian)
* Terry Nation, alternate bites of the bar will provide the taste of grilled bacon, then fried egg. The bar has all the calories, protein and vitamins necessary to sustain life. (But nobody ever thinks about dietary fibre?)
* Terry Nation. Eventually, the production team called him on it, forcing him to write a Dalek origin story.
* Terry Nation. He envisaged a dark, action-adventure political thriller about the breakdown of social order; producer Terence Dudley wanted a far more optimistic and character-based series about rebuilding society. Early episodes about a lawless society and self-appointed dictators carving up the country gave way to the heroes having a safe, self-sufficient base camp where external threats were fairly easily repelled. Nation finally quit after the first season when his ideas were ignored and his intended lead couple Abby Grant and Jimmy Garland were dropped to make self-sufficiency expert Charles Vaughan, created by Dudley's preferred main writer Jack Ronder, the lead character, with Nation writing a novel showing where he wanted the storyline to go instead. The third season, with Martin Worth as head writer, returned the sense of lawlessness but its endings of the heroes setting up a benevolent central government and restoring electrical power was far from what Nation originally intended.
* Terry Nation). In the 2008 series, it was suggested that it might have been

deliberately released, but the series was cancelled before this idea was developed.
* Terry Nation points out on the DVD special features, this was pretty absurd — Bill Strutton didn't claim that his Zarbi had been translated from alien cubes, and with no Doctor, the implication was that everything else was fun but only the Dalek stuff was real.
* Terry Nation range, the adaptation mostly worked off the original script but switched the roles of David and Sara to make her the main character.
* Terry Nation, their original writer, once described the Daleks thusly; as the Nazi technocrats who developed the V-weapons, did concentration camp experiments, etc., and were sometimes recruited by the Allies post-war due to their technical ability. "You should think of the Dalek as being a Nazi technocrat locked up inside his own individual paranoid Panzer tank, unable to have human contact, on the edge of hysteria at all times." In their earliest appearances, they are individuals, scientists, and easily panicked by proximity with those icky aliens.
* Terry Nation then wrote a novelization of some his season one episodes.
* Terry Nation work, "The Dalek Invasion of Earth", "Planet of the Daleks", and "The Android Invasion" all feature evil invading cultures using or plotting to use artificial plagues on the natives of planets.
* Terry Nichols, the accomplice of Oklahoma City bomber Timothy McVeigh, was sentenced to 161 life sentences without parole.
* Terry O'Quinn, training the future Navy Seals (including Steve McGarrett).
* Terry Pratchett, about a girl who aspires to become a wizard in a world where women become witches and men become wizards.
* Terry Pratchett allusion becomes clear when it is remembered that in an earlier book, a creature looking almost completely unlike Gollum does a cameo appearance, pursuing small boats on a mighty river in pursuit of a birthday present. Apparently Pratchett's publishers worried about this scene and about the possibility of a visit from the most evil Nazgûl known to fantasy fiction, The Lawyers of the Estate of JRR Tolkien.
* Terry Pratchett also used a swarm of "killer" rats, with the rat-king in
* Terry Pratchett, an artificial world has survived for several thousand years, maintained by a sophisticated AI and an army of robots that have managed to keep it and themselves in working order, but they can't keep it up forever; eventually there will just be too many worn-out parts for them to replace. ("What do you do when the robot that repairs the robot-repairing robots breaks down?") The protagonists arrive just as things are reaching that point and the world is on the verge of final breakdown.
* Terry Pratchett' and promptly has him shot. Dactylos comments on the shoddy quality of the arrowhead before he dies.
* Terry Pratchett, are callous, even sadistic, sociopaths of the worst kind. They enjoy music and torturing people, as they consider the agonized screams simply another type of music. They can keep their victims alive for weeks until finally growing bored of their "song" and letting them die. However, while they are powerful and cruel, they tend to be thick and unable to learn, and aside from the Queen and select Lords (and they tend to be highly unimaginative), seem to be almost incapable of forming much original thought.
* Terry Pratchett are included). The main character dismisses them all as implausible, telling the other "Try the reality next door", suggesting that these events are taking place in one of the many parallel universes hinted at in the novel.
* Terry Pratchett are the result of the History Monks messing with the timeline. (There aren't mistakes, only alternate pasts.)
* Terry Pratchett a special significance. It certainly crops up a lot when otherwise randomly selected accretions of things need to have a numerical value assigned to them.
* Terry Pratchett, as the Blackbury Steam Company pits a steam car against the new internal combustion engine, and various inventors of clockwork, wind-power and weirder cars get involved.
* Terry Pratchett. As the priest says to Mau, "You want the Gods to exist just

enough that you can be angry at them for not existing."
* Terry Pratchett, as well, now I really am insulted." It takes Lipwig's written confession of his crimes to make her believe he did mean the last part.
* Terry Pratchett. A tidal wave kills everyone in Mau's village, leaving him sole survivor. A ship destroyed by the same wave leaves Daphne the one survivor (two, if you like parrots). Meanwhile, a plague has decimated England and wiped out (among others) the 137 people standing between Daphne's father and the crown.
* Terry Pratchett. At one point, a character says that Carrot talked like "a little schoolteacher"; naturally, he translated the word as "kantůrek" ("little teacher"), and italicized it for good measure.
* Terry Pratchett Australia - but here, the accents are exaggerated and knowingly caricatured for laughs.
* Terry Pratchett averts this trope on multiple occasions, most notably with Lady Margolotta from
* Terry Pratchett. Because it was a verbal contract, the devil couldn't contest it.
* Terry Pratchett because Mort has just said the same to him — then lampshades it with a passage about the technique.
* Terry Pratchett because of the song), there is also passing mention of a male officer named Wrigglesworth who was known for playing cross-cast roles in his boys' school, and who is noncommittally described as being keen on "amateur dramatics" by the brass.
* Terry Pratchett, B) Millions of uninhabited Earths means helium is plentiful, and C) Zeppelins don't require airstrips to land safely. Technically, the twains are from our world, since homo sapiens only evolved on one Earth, but it's still a story about alternate universes and zeppelins.
* Terry Pratchett books, Commander Vimes insists that all members of the City Watch start in the lowest rank and work their way up to officership. He started that way and so, eventually, do pretty much all of the watch captains under him.
* Terry Pratchett) brings his sleigh, drawn by four enormous tusked hogs, to a department store so the children can tell him what they want for Hogswatch. One of the hogs promptly and extensively urinates on the floor, which almost every child present finds to be the most enthralling thing he or she has ever seen.
* Terry Pratchett by using the term "camels of the sea" for ships (given that camels are "ships of the desert"...)
* Terry Pratchett clothes, and to pursue the murder inquiry that found them both naked and up to their thighs in mud.
* Terry Pratchett, describing how he went about writing a novel, said that in the old days all writers could do that counted as "work" but wasn't actually writing was change the typewriter ribbons and clean the "e" with a pin. In the computer age, however, you can spend hours writing macros that would speed up your writing by a couple of minutes. And if you get bored with that, you can read anything that looks interesting, which is called "research".
* Terry Pratchett, does this for just about everything but silverfish. Horses have color-changing multifaceted eyes, among other things.
* Terry Pratchett, due to the very nature of angels and demons. Played straight with Anathema, who's a witch, and Newt, who's a witch-hunter, albeit a not-very-enthusiastic one.
* Terry Pratchett. Earlier in the book, the same tutor had mentioned the trope by lecturing his class that a "client" might well hire Assassins of his own for protection, even the students with whom they now shared a desk, and this was perfectly right and proper.
* Terry Pratchett-era shopkeeper as "Prince Sega. All the way from Nintendo."
* Terry Pratchett, Esk dreams about the Things from the Dungeon Dimensions and interacts with them. They even tell her the word "psychosomatic" and assure her she can die because of her dreams.
* Terry Pratchett even combine it with "Towel Day", which is on the same day, carrying towels with lilac flowers embroidered on them.
* Terry Pratchett, even though he is the second most-read author in the UK, and the seventh most-read author in the USA, across all genres. One newspaper interview

lampshaded this with the introductory paragraphs including the line "Terry Pratchett, for those of you still pretending to have no idea who I'm talking about, is..."
* Terry Pratchett failed at this once, causing the destruction of civilization. He's hoping time is cyclical so that he'll get another chance to deliver the message in time.
* Terry Pratchett fame. His fans celebrate his birthday (April 28th) as the "Creator's Birthday".
* Terry Pratchett fan fiction that seems to work: Fans were free to have as much good-natured fun as they wished (non-commercially), on two (later three) conditions:
* Terry Pratchett fan-literature, with two minor characters as the focus:
* Terry Pratchett features inch-high people known as 'Nomes' who live in a large Store and refuse to believe that there is any such thing as 'the Outside'. When the Store Nomes are visited by Nomes who are from the Outside, one of the Store Nomes' leaders actually pretends not to be able to see them.
* Terry PratchettFirstly, the earths are linked in a chain, and you can only "step" from one earth to one of the two adjacent ones; even stepping at high speed, it takes quite a while to get from one earth to a radically different one, although there are short-cuts that make long-distance "travel" more feasible. The chain might be infinite, or might be a closed loop. Secondly, each planet has its own chain of alternates; if you go to Mars, as occurs in the third book, none of the alternate Marses you can step to will correlate with any alternate earths in the chain you came from.
* Terry Pratchett, following his death, arriving in the hall of his "creator" — that is, the fantasy writer who invented him.
* Terry Pratchett follow more or less their models from Revelation... except that they ride motorcycles. The book also featured the four 'lesser' horsemen, who were just normal bikers who, after seeing the real deal, decided that being a group of symbolic figures was much cooler than being a biker.
* Terry Pratchett: Gaspode the talking dog is named (so he says) after the famous Gaspode, who kept sitting at his owner's grave and howling until he died. As Gaspode said, any dog would do that if his tail was caught under the damn headstone.
* Terry Pratchett got the duck-billed platypus, no thanks to a group of temporally-displaced wizards from Unseen University (and a demonstration on the saying that a platypus looks like a duck designed by committee).
* Terry Pratchett had a hobby of building Big Dumb Objects. The Jokers built probably the biggest, dumbest object of all, which was a chain-link star system made with (as far as humans and other remaining species can tell) a complete disregard for the laws of physics.
* Terry Pratchett had heart surgery, he started shouting about sandwiches. When the surgeon asked him about this afterwards, he said he thought there was a man in the corner of the room selling sandwiches, but he couldn't get to him. He later joked that wherever it is you go, apparently it's a long enough trip that you need a snack, and he wished he'd been able to find out what kind they were — cheese and pickle is fine, cucumber probably means you're going to the bad place.
* Terry Pratchett has an Ear Worm in the form of the Beer Song, described as a cheery little tune that bounces along and can't be removed from the brain with a chisel. It's important that the inhabitants remember it, though, as skipping a verse or two could result in fatal poisoning.
* Terry Pratchett has a termagant whose gaze turns people to stone, the irony being that the beast is actually quite friendly and doesn't do it on purpose. Its own tears cause the statues to come back to life, unless they have been that way for many centuries.
* Terry Pratchett has likewise had to fend off numerous accusations that he'd ripped off J.K. Rowling with
* Terry Pratchett has often remarked that his characters take on lives of their own, and how they turn out quite differently from how he originally envisioned

them.
* Terry Pratchett has Polly Perks clipping her hair short so she can pass as a boy and enlist in the army. The fact that she then takes the hair with her becomes a bit of a plot point.
* Terry Pratchett has the Department of Postmortem Communications, which is absolutely not Necromancy because Necromancy is a bad form of magic and is done by evil wizards, and since the wizards in Postmortem Communications aren't evil wizards, it's not Necromancy! Just ignore their raising of the dead. And all the skull decorations (they're fake, except for the talking one). And the fading "NECR" on their door.
* Terry Pratchett. He also described it in his initial announcement as "an embuggerance".
* Terry Pratchett in a distressed, sharply-serifed font (probably a Caslon variant), possibly in gold.
* Terry Pratchett, in relation to Agnes Nitt. She's a very fat young lady, but in the countryside, this isn't a drawback. Indeed, in Lancre, men are urged to choose their wives by checking out the plumpness of the family: it shows how good the cooking is.
* Terry Pratchett insisted all his computer files and notes be so thoroughly destroyed after his death that they could never be retrieved - for this very reason. He was no great friend of the literary establishment, insisted he did not write "literature" and considered one of his greatest fears was that every last unpublished word he wrote would be analysed and dissected into absurdity by hopeful PhD students of English literature.
* Terry Pratchett; in the first account the book gives of her burning at the stake, it says that her last act was to look up at the sky and say "That goes for you as well, you daft old fool," and it's implied that she's talking to God. When Shadwell dreams about it, it becomes clear that she was actually saying it to him.
* Terry Pratchett, in the section on identifying what type of cat you own.
* Terry Pratchett, in which the universal currency is a life-extension treatment. One of the main characters, who is several centuries old, wonders what life would have been like had she been a "short-lifer" and thus able to have children.
* Terry Pratchett is almost in its entirety a completely awesome Discworldization of the entire rock music movement in general, it should come as no surprise that there's a couple of hidden reference there. One is indirectly explained: "Imp" means Bud and "Celyn" means Holly, hence "Bud y Holly." On the other hand, Sioni Bod Da is mostly unexplained: It's Welsh for Johnny Be Good. (Read: Johnny B. Goode.)
* Terry Pratchett is fanatical about repeating jokes about characterization or environmental details.
* Terry Pratchett is "Speedtrap has no local rule about shooting giraffes but probably does have some perfectly ordinary public order laws, under which some drunken circus owner was once prosecuted."
* Terry Pratchett is the time to panic", though. To be fair, when you're operating on the advanced levels of cowardice that have kept Rincewind alive for so long you learn about these things. There's only so much adrenaline in the adrenal gland, so you have to conserve your panic for when you really need it. He has a lot of experience with these things.
* Terry Pratchett It's a particularly odd example of this trope because Moist is a consummate con artist, and so he's very, very used to putting on crazy shows. His feelings for her are genuine, but he's put just as much effort into performances aimed at swindling people. Not only that, she was an accidental victim of his in the backstory, so she has a very, very good reason to not trust him.
* Terry Pratchett, Johnny is the official nickname generator for his friends. In the second book it takes him a moment to remember that Bigmac's social worker would know him as Simon.
* Terry Pratchett, Johnny's dreams let him talk with Kirsty — and find her afterward, when they are awake.
* Terry Pratchett. Lose him, willya?" Pratchett pointedly withdrew from negotiation

after that.
* Terry Pratchett, making it very dubious that he's the simple soul that he seems to be.
* Terry Pratchett manifests himself on a football pitch, on Cup Final day. Entire pubs full of people watching the match spontaneously sign the Pledge.
* Terry Pratchett. Mau is the Sole Survivor of the former since he wasn't on the island at the time, and Daphne of the latter, because she wrapped herself in a mattress.
* Terry Pratchett — they basically devolved to the point where they both lost the ability to communicate and all memory of where they came from.
* Terry Pratchett, Moist von Lipwig and the Smoking Gnu work out a plan to destroy the semaphore company by blowing up the signal towers. The reader is told exactly how this plan will work. Just before they do it, though, Moist realises this would cause more problems than it solves, and comes up with a plan to destroy the company but leave the system in place. We aren't told how this one works until the payoff.
* Terry Pratchett novel. Any Terry Pratchett novel. The man seems to have a fetish for tropes, as his novels consist entirely of deconstructing, reconstructing, parodying, averting, subverting, and inverting various tropes of all shapes and sizes. Coupled with his decisively British humor, it makes for consistently entertaining literature.
* Terry Pratchett novels try to at least give this a nod. Teleportation's pretty risky too, especially with the knowledge that even if you're sitting on a chair you're still really moving somehow.
* Terry Pratchett of Arthurian Britain isn't any history Mervin's familiar with.)
* Terry Pratchett of Egypt, all myths are true concerning their gods, which have been evolving and developing for seven thousand years. The priests are said to "never throw away a god in case they turn out to be useful" and to be able to "give headroom to a collection of ideas that would have made a theoretical physicist give in and hand in his badge" (paraphrased).
* Terry Pratchett offered this in an effort to get Moist to underestimate him.
* Terry Pratchett of how a kitchen knife tied to the end of a pole is a popular makeshift weapon among impromptu civilian fighters.
* Terry Pratchett of things due to her supernatural heritage. It still makes her be regarded as rather annoying or obnoxious by most who meet her — the primary exception are children, who take well to her view of them as basically being small adults and thus treating them as such.
* Terry Pratchett of this: "Don't let me detain you"; "Throw the book at him"; "I would rather die than betray the emperor", etc.
* Terry Pratchett- one of the main antagonist's less reliable partners gets drunk one night and comes to unburden himself to the Big Bad. Upon the partner's arrival, the villain's servant asks something like "May I take your highly conspicuous hooded cloak, sir?"
* Terry Pratchett our Earth in terms of either political geography (The Re-United States) or physical geography (the two landmasses of Nearer Australia and Further Australia).
* Terry Pratchett parodies the concept of fundamentalism with the Omnians, who cling to their monotheistic beliefs despite being demonstrably wrong. The majority of them are depicted as basically nice people, however, just irritatingly overzealous at times.
* Terry Pratchett parodies this with the Rite of Ashk-Ente, which summons Death. It's implied that this is supposed to require a human sacrifice and dozens of magical foci, but magical refinements mean that it's now possible with only an octogram, three small bits of wood, and 4 cubic centimetres of mouse blood.
* Terry Pratchett, part of the reason Nanny Ogg was nervous at her first wedding was that there was a chance Jason (her eldest) might be a guest.
* Terry Pratchett played a similar situation (almost) straight in his short story
* Terry Pratchett points out that in the alternative universe world, a type of palm tree exists that poisons all other palms on its island, "making all those cartoons botanically accurate".

* Terry Pratchett, Pteppic is presented the case of a handmaiden who refused to be killed for the last king's funeral. When he asks if it was voluntary, the priest agreed that yes, it was, and she didn't volunteer.
* Terry Pratchett right up in the rafters because the name sounds grander. They aren't displeased by this though.
* Terry Pratchett says that there were also treacle deposits under Genua, but the heat and moisture transformed them into rum springs.
* Terry Pratchett's books that involve wizards is often assigned this role, and gets to express frustration because he lives in a world where thunderbolts really are signs of gods' annoyance instead of massive bursts of static electricity.
* Terry Pratchett" sees the ship's corridors as slime-covered dungeons and the aliens as slavering, razor-toothed monsters. When they hear an alien coming and discover that instead of an armed guard, it's a small and friendly tea-lady, Kirsty complains that Johnny's doing it wrong.
* Terry Pratchett series come across as this. Aside from the usual traits associated with this trope (sexual liberation, preposterously advanced intelligence, perfectly logical, almost perfectly utopian society, outward condescension to regular humans), regular humans routinely talk up their superiority and are even implied to be on the path to completely replace humanity in the future.
* Terry Pratchett series of books, in which the Grand Vizier is automatically assumed to be evil, regardless of the culture involved or the circumstances of meeting them.
* Terry Pratchett species, are so overwhelmingly sexy to human females that they must sometimes resort to physical force to discourage the more-susceptible women from trying to jump their bones in public.
* Terry Pratchett's short story "Hollywood Chickens", in which a flock of chickens get stranded on a road island in the middle of a busy Los Angeles freeway after falling off the truck that was transporting them. As the narrator notes, in this case the question is not "why?" but "how?".
* Terry Pratchett's time. Working as a doctor for a village in Sir Ector's demenses, he quickly realises that what they need is a great and noble leader, gimmicks up an electromagnet to hold a sword in a stone, and waits for a candidate whose body language suggests he's sensible enough to take advice. It works, although not quite how he expected.
* Terry Pratchett subject matter, many listeners assumed the author was in fact a woman named "Terri Pratchett".
* Terry Pratchett that produced the disc... who then colonized it, voluntarily forgetting about their origins to become ordinary flesh-and-blood 'natives'. So basically, humanity ends up being its own precursor twice over.
* Terry Pratchett that while peaceful times among humans come and go, ants never seem to learn.
* Terry Pratchett". The audience's representative of the race, Marco, can decapitate dragons mid-air, but otherwise lives in terror that Someone is out to get him. As another character put it, "These Northmen have a word, 'Berserker'. It was made for Marco."
* Terry Pratchett, the Dead are able to manipulate, damage, or generally mess around with radios, telephones, televisions, arcade games, jukeboxes, computer networks, satellites, and radio telescopes. Justified because one of them was an electronics genius in life, while another is Albert Einstein's distant cousin.
* Terry Pratchett, the deep-downers are thoroughly discredited and Lord Vetinari appropriates their delve for the city government, possibly as the basis of a future Ankh-Morpork subway system. Notably, Commander Vimes actually realizes the "dirt has to go somewhere" problem, and realizes the extent of the digging when he has his Disorganizer look through the gate reports for an increase in garbage leaving the city.
* Terry Pratchett, the delivery of a letter results in two childhood sweethearts, now elderly and widowed, getting married after all.
* Terry Pratchett, the goats watch a wizard go up the mountain. A little later,

they look up again. There's nothing on the road, but they still watch it go up.
* Terry Pratchett, the Naviagation Officer ends her objection with "With respect."
* Terry Pratchett, there's this conversation between Albert and Death:
* Terry Pratchett. The tiny nomes have lifespans of just ten years, but live and move ten times as fast as humans. This and their size difference make it difficult for the two species to interact.
* Terry Pratchett, the wizards, out at sea, see one. One wizard starts to burble about how they are maligned and list all their wonderful attributes. Unfortunately, it's the list about wolves, not sharks.
* Terry Pratchett think the telephone was invented by Sir Humphrey Telephone.
* Terry Pratchett, this is number 5 in his list of unfortunate things that happen to cats in a house with children.
* Terry Pratchett, Tiffany Aching, the next-to-youngest child in a family of girls, is somewhat overlooked because the youngest child is the only boy.
* Terry Pratchett to cross from one earth to one several Steps down the line without crossing through the intervening earth, which is ordinarily impossible. This only works for (some of the) people with the natural ability to move between worlds without a Stepper box. Everyone else must take them one at a time.
* Terry Pratchett to imply he's in bed with a woman, to cover up that he's the man who broke into the Post Office. What makes being in bed with a woman an example of this trope is the fact that his girlfriend was currently out of town.
* Terry Pratchett up, and the men they lured into the alley rob "them" instead.
* Terry Pratchett used to say that his first US publisher didn't so much launch his books as bury them.
* Terry Pratchett using the movable skin-and-cartilage sail on its back to catch the wind.
* Terry Pratchett variety from the Treatment but only the Company (which issues the currency) can restore youth. Each Day can be turned in for one day of rejuvenation.
* Terry Pratchett Vetinari and Gilt share a mutual one of these after a third character shows his profound ignorance about the game "Thud".
* Terry Pratchett, Vimes, recovering from the Summoning Dark, insists on seeing how his men are doing.
* Terry Pratchett was originally set in Lancre; one of the reasons for the change was that it would be too darn hard to keep the Ramtops witches from taking over. The two series ended up merging anyway, but at least by then Tiffany had developed somewhat on her own.
* Terry Pratchett when "sent to meet his maker" turns out to be literal.
* Terry Pratchett when they don't want to be seen attending a movie - they twist bits of wire into their beards to make them look like badly-made false beards, for instance. However, the trope is then played straight when they later need to be taken seriously and no-one believes they're real wizards.
* Terry Pratchett, where he manages to silence a number of lawyers for the evil Lavish family with a single glare. This might be just to satisfy his own personal pride as the local alpha corpse of Ankh-Morpork's legal profession...
* Terry Pratchett, wherein Susan Sto Helit visits Death's home and expects it to "loom, and involve other words ending in 'oom,' like gloom and doom." She's in for a disappointment.
* Terry Pratchett where the town of Lancre has a law which says all undesirables such as actors must be outside the town boundaries by sunset. However it doesn't say they have to stay there, and everyone is fine with them popping back in after sunset to go down the pub.
* Terry Pratchett (which misunderstands things almost as much, but in a different way) in the third.
* Terry Pratchett, which several characters proclaim is an accident waiting to happen. Unlike in the Broadway musical version of Phantom of the Opera, however, this chandelier never does fall down, despite the villain's best efforts.
* Terry Pratchett, which wasn't just a powerful weapon, but a weapon that could possess the mind of those who hold it, tempting it with the power it has and what the holder could do with it.

* Terry Pratchett, which were special units of the British Army consisting of men from a single town. In theory, this increased camaraderie, as people were fighting alongside friends and work colleagues. In practice, they were a fearsomely efficient way to wipe out the entire young male population of a town in a single stroke.
* Terry Pratchett, while the Legions of Hell are more amiable and bureaucratic, and reside in various Hells produced by the human imagination.)
* Terry Pratchett who concludes that Happy Families teaches kids the skills of deceit and bluff that could lead to them growing up to be professional gamblers or worse yet, politicians.
* Terry Pratchett who had gotten himself killed, yet people who had risked their lives had been important to the human race — an insight which profoundly moves Trev.
* Terry Pratchett who is basically a skeleton. Additionally, Death uses a living horse because he hates having to keep wiring the skeletal one together.
* Terry Pratchett, who is pretending to be male to get into the army, gets bitten in the crotch by her lieutenant's horse. She's not hurt, since all she keeps down there is a rolled-up pair of socks, but her lieutenant faints. He almost does so again immediately after, when he comes to and asks her if she's all right. She cheerfully replies "Oh, it'll just need a few stitches," meaning her trousers.
* Terry Pratchett, who's been in the army so long that retirement papers have been in hot pursuit for years now, but has never advanced any further in rank. It's implied Jackrum's responsible for recruiting and training most of the high ranking officers in the army.
* Terry Pratchett (with a class system based on how hot their home star is). Their true form is said to be spiral-shaped, with the result that their mythology anthropomorphised the galaxy as a giant Creap.
* Terry Pratchett with text-breaking adverts for completely unrelated products.
* Terry Pratchett with the drosks, who "periodically build an advanced machine-level civilisation and then, for no apparent reason, carefully dismantle it and revert to barbarism".
* Terry Pratchett worship Nassa, the god who makes clouds. The Nomes living on the streets of Blackbury seem to have been too busy trying to survive to come up with a religion, although the way they treat the Thing comes close.
* Terry Pratchett wrote "#IFDEFDEBUG + ‘WORLD/ ENOUGH’ + ‘TIME’", a short story in which everyone has become virtual-reality dwellers, or "afers" as the story calls them.
* Terry's batsuit was technically a museum piece in the Batcave, though he said, "This suit may be old, but it's still cutting-edge." He uses other artifacts from Batman's crimefighting days in the series as well, e.g. in "Lost Soul", he uses Nightwing's domino mask for I.D. obfuscation when the suit was unavailable, along with some old-style Batarangs.
* Terry's brother, Andy, originally used Koppo-ken, but switched to Shiranui style ninjutsu (along with Mai) beginning in
* Terry Scott's comedy single "My Brother" ends with him leading his brother away, "before you fall down the hole in the middle".
* Terry's stats are pretty similar to the Hero's, though he lacks early access to the Hero class.
* Terry Tate to the amount of people who know that the entire Office Linebacker series was an advert for Reebok.
* Terry Taylor, in his two-decade long career, hasn't been able to live down one infamous gimmick: the Red Rooster.
* Terry, the resourceful, level-headed, but self-interested cook, is a minor Brighella.
* Terry-Thomas almost always played a "Lord", "Sir" or high-ranking military officer who was also a rogue and scoundrel.
* Terry-Thomas in most of his roles was that of an upper-class bounder and scoundrel. Still, there was something endearing about him. Perhaps it was because Terry-Thomas was also a gifted comedian.

* Terry-Thomas' roles were almost always cultured, upper-class rogues and scoundrels.
* Terry-Thomas wasn't playing an upper-class scoundrel, he was playing one of these.
* Terry-Thomas would be dressed in a suit with waistcoat and cigarette holder, often with a bowler, cane, and occasional monocle as well.
* Terrytoons (1952) has an owl give Dinky a "skyhook" (a stick with a hooked branchlet) to help him swim.
* Terrytoons reboot. Here they're now long-in-the-tooth accountants in the firm of Man, Man, Man, Man and Man—mighty chartered accountants.
* Terrytoons shorts was a male elephant who was blue. He falls for a pink elephant girl named Hortense at the end of the short "Sidney's Family Tree".
* Terrytoons'' short "Wolf!, Wolf!" has a male example with one of the wolves dressing up as Litte Bo Peep showing off his leg with a garter on it, and the wolves laugh in retaliation.
* Terrytoons studio. Gaston was an impoverished, unlucky French artist who made things come to life by painting or drawing them.
* Terrytoons studio. He openly admitted that his studio was Woolworths to Disney's Tiffany.
* Terrytoons will usually get a Eureka Moment when Mighty Manfred the Wonder Dog says something off the cuff to try to weasel out of a situation. In "Go West, Young Manfred," Tom is looking for a way to get back to the settler with his cap full of gold:
* Terry vigorously flexes his right pec (nicknamed Eugene) while bluffing.
* Terry Wogan (and Graham Norton, now that Wogan left) is the only reason many British and Irish people can bear to watch them. Wogan's hilarious but oh-so-true comments about how Britain never gets any votes and how most countries are simply making tactical or political votes as opposed to voting for the genuine best song make you wonder how the Eurovision execs let him get away with mocking the entire contest as a whole.
* Terry Wogan's Radio 2 breakfast show in late 2008, he made a dessert (pudding) that looked exactly like a pork pie but was made with ice cream and other traditonal dessert ingredients, a pot of "mustard" that was actually a sweet fruit puree (to drizzle alongside the faux "pork pie"), and "boiled eggs" that were made from white chocolate and other similar ingredents. Crowning Food Moment of Awesome, anyone? (Sir Terry raved on about the food and it caused not a fair amount of drooling from the audience.)
* Terry Wogan used to josh around that "there's no 'I' in 'team'" and that the people working around him during his breakfast radio days were merely his "minions", but there's no doubt that that group of people were true companions, from his late producer Paul "Wally" Walters to Walters's replacement Alan "Barrel 'ands" Boyd, newsreaders Alan "Deadly" Dedicoat and John "Boggy" Marsh, and the "Traffic Totty" Lynn Bowles, all of whom formed a close union. (One might argue that Mick Sturbs, the person who wrote all the "Janet and John" stories, and the various religious figures who appeared on the "Pause for Thought" segment could be considered true companions as well.) On Wogan's last morning broadcast, not a dry eye was spotted amongst the group.
* Tertiary Sexual Characteristics despite identifying as male, and objecting to being referred as female.
* Tertiary Sexual Characteristics: Females are distinguished from males by having eyelashes and wearing lipstick and/or bows.
* Tertiary Sexual Characteristics: Females have eyelashes, lipstick and/or bows to distinguish them from males.
* Tertiary Sexual Characteristics is mistakable for a young boy. She gets upset when Makoto makes this mistake.
* Tertiary Sexual Characteristics way to make it clear who's a boy and who's a girl.
* Tertium did this to Secundum after Secundum "rewrote" Shiori's older sister, effectively erasing the poor girl out of existence.

* Teru cries after his first time with (female) Mob...and the second time...and the third....
* Teru Mikami, who is extremely similar to Light, not just in his meticulous appearance but also mind-set. Mikami graduated from a prestigious university, became a successful prosecutor and his clothes are never seen in any disarray. Unfortunately, he suffers from the
* Teruteru Hanamura's proclamations of promiscuity and masochism are treated as mere rudeness by his classmates.
* Tesca is a mix of jungle and swamps, also the only planet in the series where humans don't need pressure suits to breathe.
* Tesco? Every little bit of your money you give them helps them become more filthy rich, possibly.
* TES games also include quite a few bits of different real world mythologies. Bloodmoon and Skyrim have various aspects of Norse mythology, Redguards vary between Arabian and more eastern, Bretons are usually portrayed with a Celtic look, and Imperials are a cross between the Roman and British empires. In addition, many of the monsters are based on various bits of folklore - most prominently vampires and werewolves.
* Tesla, as the whole thing is made to look like what a modern-style pinball machine might have looked like if Nikola Tesla built one.
* Tesla bands whose careers were completely unaffected by the rise of grunge.
* Tesladyne Industries is a workplace that specializes in Action Science, including such fields as Imaginary Physics and Advanced [Other] (it's so revolutionary it doesn't have a name yet). Giant bugs and extra-universal incursions are the order of the day. Vampire attacks are treated with as much concern (but much less surprise) than a fire in a normal office compound, and the receptionist keeps a shotgun and helmet under his desk just in case.
* Tesla Effect: A Tex Murphy Adventure games, with real actors against the in-game CGI backgrounds.
* Teslagrad is a mechanical dragon (it looks a lot like the Truckasaurus, actually) that lairs in the bottom of the Tower. It has the requisite firebreath, and has magnetic powers.
* Teslagrad. Made somewhat more unsettling by the fact that its outer skin has rotted away, leaving only a bronze skeleton.
* Teslagrad: The devices seem to mostly be this. While they primarily work using magnetism, the things they make it do are well into the magical side of things. They were also invented by a wizard.
* Tesla, Inc. demonstrated the power of its electric Cybertruck by showing it easily winning a tug-of-war contest against a Ford F-150 pickup truck. The determining factor is actually that the Cybertruck weighs more and is a 4x4 model, while the F-150 shown is rear drive only and has less of its weight distributed over its rear wheels than its front wheels. This means the Cybertruck has more weight over its driven wheels, and therefore more traction. So it isn’t a fair contest, and all it really tells us about the Cybertruck is that it’s heavy.
* Tesla is apparently always like this. Getting superpowers doesn't help.
* Tesla is the man who might have given creation to the whole trope: He built a
* Tesla's assistant, who was accidentally made immortal by a failed experiment. While she can't leave the area, as her immortality is maintained by the tech, she is not a villain.
* Tessa also feels responsible for the fate of Team Alchemical. It was an argument with them over who should be leader that caused Tessa to
* Tessa and Rachel were intended to be the main protagonists, but this only last for the first couple of chapters before they were slowly replaced during the happenings of the next couple by Shelley Winters, the main protagonist of the
* Tessa Blanchard, and that she was going to be her third. Tessa couldn't help but laugh at that.
* Tessa Blanchard by her backstage problems becoming public. Left later that year after refusing to film segments leading up to a title match.
* Tessa Gray is a wide reader and quotes poetry quite often. She has the potential

to lapse into
* Tessa Gray, the miracle daughter of a Shadowhunter and a demon. She is considered a warlock, but since all other warlocks have human mothers, Tessa is a bit special. She does not have a mark and can have children, whereas other warlocks are infertile. By extension, her descendants, which include Jace Herondale as well as the Blackthorn siblings, are part-demon, although none of them inherit her immortality.
* Tessa is only 16, yet she is the captain of a submarine. She also shows a great understanding of people and exhibits a very mature attitude. She's also damn good at her job. However, she is not completely immune from some general characteristics of teens.
* Tessa, meanwhile, feels this because an argument with the other members of Team Alchemical prompted her to not patrol with them that night. When she went out anyway,
* Tessa's dislike for chocolate, and the gift Nate gives Aunt Harriet...
* Tessa shooting Michael. The Denarians torturing Ivy. The Denarians
* Tessa Thompson, revealed that she has been dating both men and women but does not want to label herself as bisexual, seeing this as too binary to describe herself.
* Tessa Thompson. Semi-justified in that the character is portrayed as being a member of an army of Valkyries rather than as a strict adaptation of the comic character (who appears in flashbacks).
* Tessa Thompson to be Valkyrie's lover. A scene showing a woman leaving Valkyrie's bedroom on Sakaar (implying they'd had sex) was shot but ultimately cut from the film.
* Tessa Violet takes this further by being a recounting of a romantic relationship that quickly slides downhill into emotional abuse, as well as the aftershocks this relationship left in the protagonist's mental state.
* Tessa was once put in a walk-in freezer after some guys mistook her for a corpse, thanks to the same implants that enabled her to survive.
* Tess Bannister from the comic strip "Pirate Hearts" (set during the War of 1812) that ran in
* Tess, but also being the first film he made after his conviction and flight from the United States.
* Tess, despite knowing that Lois knows Clark's secret. The first part of season ten gets a bit confusing at times.
* tessen fan as a lethal weapon. It's said that people would learn it so they could be armed in a place where weapons weren't allowed. Seriously, who'd take an old man's fan away on a hot day?
* Tesseracts are really just the start of a really long and dark journey. Even a
* Tess have all failed to give her the sense of self-worth she's seeking.
* Tess Masazza channel where she uploads comedic videos describing the (mis)adventures of a young girl living in the Italian North.
* Tess Mercer has something of a crush on him, although not much comes out of it. She also a
* Tess of the d'Urbervilles. Sadly, her husband cares more for her "chastity" than her actual personality and feelings.
* Tess Of The Durbervilles sees Angel Clare carrying the eponymous heroine this way. It's one of the things that makes her realize her feelings for him.
* Tess of the d'Urbervilles. The subtitle of the novel is "A Pure Woman Faithfully Presented", so, in a way, this is a subversion, as the author apparently did not subscribe to the misogynist attitude portrayed in the novel.
* Tess of the d'Urbervilles took this to great lengths with the character of Angel Clare. During the course of the series, he has four milkmaids (including the title character) who worship the ground on which he walks.
* Tess of the d'Urbervilles, until at last, she murders the man who deflowered her and is hanged for it.
* Tess of the d'Urbervilles) until she finds the courage to leave him. Then, Tess later becomes Alec's mistress a second time to save her family and she fiercely murders him, not just to be with the husband who abandons her but because Alec

clearly wronged her.
* Tess of the Storm Country, after Ben Letts shoots a Mook, Pa Skinner picks up the shotgun. Skinner is convicted of murder.
* Tess of the Storm Country are forced to take shelter from the rain in her shack—but she is upre, so she rejects his kiss. Fred's sister Teola is less pure, so when she and Fred's friend Dan take shelter in another cabin, he knocks her up.
* Tess was a Secret Keeper as well, which was particularly important since she was
* Tess was probably the most minor recurring character in the original game, but was the creators' favorite character, resulting in her being the focus of the B-plot of
* test a lieutenant's loyalty and see if he/she should be made a trusted lieutenant, I will have a crack squad of marksmen standing by in case the answer is no.
* Testament and Dizzy play this trope to the very letter, too, since it's only after meeting her that Testament
* Testament cranks this up to eleven and beyond with their song, "Leave Me Forever." The lyrics end on possibly one of the most venomous and hate-filled rants against an ex-girlfriend ever.
* Testament is an unusual case, as he's actually the adopted son of Kliff (Testament is presumably the name he was given after
* Testament: The Bible in Animation had a different style of animation for each episode and sometimes the styles would switch within the episodes themselves.
* Testament: The Bible in Animation plays the story of Sodom and Gomorahh straight, complete with Lot's wife looking back at the city as the family flee and being turned to salt for it.
* Test, among others, would at times on WWE TV address him as "Andrew".
* Test and Trial Tropes: Heracles/Herucles, Theseus, Odysseus, Jason, Oedipus,... all have to fulfill impossible tasks and quests.
* Test, and when Test had trouble with it he resorted to beating up Keibler to alleviate his stress.
* Test Audience and the scene was cut from the theatrical release. Played straight.
* Test Card Circle, also from the UK, began as a society of people united by their enjoyment of the library music used during test card transmissions and who now archive the music used during the non-program portions of TV broadcasts generally.
* Test Card F, the British test card which has been parodied and homaged just about everywhere, really was used in cases of technical difficulties at the BBC, since it was the default image to be shown when the television transmitters were turned off or being switched over. Thus, whenever an actual technical difficulty hit the broadcast in the days of analogue TV (such as a transmitter breaking down), it was common to see Test Card F show up. The BBC's website references this by having the iconic clown appear on Error 404 pages.
* Test Drive are this in essence. Any of this cars are cool in their own right from small hot hatches that are still very fast to Ferraris, Lamborghinis and Mercedes-Benz.
* Test Drive, if take too long to reach a gas station, you are told that you are "driving too slow to have a sports car", and the game ends there, regardless of the number of lives remaining. If you rear-end a police car, you also get an instant Game Over.
* Test Drive. Said invisible walls also usually prevent you from jumping off the track to your doom.
* Test Drive the R8. (The conversion rate for Casino Tokens is 1 Token = 2$, requiring a whopping 2 million dollars to buy the tokens for it).
* Test Drive Unlimited car. TDUWorld, Project Paradise-esque mod that brings back TDU2's extensive online functions, is also currently in development.
* Testees did it when Peter and Ron were told they had accidentally been injected with a cyanide-like solution (really an experiment to see how they would react).
* Testees, wherein the protagonists are employed as product testers for a weird range of products, episode 4, "Vac Attack," has them testing out a military vacuum

cleaner imbued with artificial intelligence, which becomes more and more aggressive as it deals with their slovenliness, until it sets out to kill them and must be destroyed with their giant collected hairball.
* Tester only knows what they'll come up with now that they're working together...
* Testes Test: A man checks his genitals after going through a transformation to see if they've been affected by the change.
* testicles) of 94 mint workers be amputated because of reports that they were replacing silver with tin in the coins. Modern studies have failed to support the accusations.
* "Testicular Manslaughter" by Cattle Decapitation and "Blunt Force Castration" by
* testing a serum to turn people into super-soldiers, there's no point in having a control group because we already know that people don't spontaneously turn into super-soldiers when given a placebo. Any such effect can only be the result of the serum, with no control group needed to know that. Control groups are only a necessity when looking for relatively small effects that can only be seen by statistically studying large groups. A serum to slightly increase sporting performance would need a control group to be sure any effect was not simply due to people unconsciously trying harder because they think they should be doing better after being injected with something. A serum that turns people into Captain America with an immediate large increase in muscle mass and the ability to run many times faster than any other human, not so much.
* "Testing in the Green". Two teams of researchers compete to create the most intelligent robot. One of the robots is sabotaged by the other robot out of jealousy. The second team had created better than they knew: not only was their robot more intelligent, it was also an
* Testing Range Mishap: Oops, I guess that test didn't work out so well out in the field.
* Testing Range Mishap: You fail at the testing range and possibly beyond it.
* Testing Testing 1, 2, 3, a depressed Rainbow lies on top of the cloud while it rains.
* Testing Testing 1, 2, 3 tendencies and some other traits of hers (impulsive, stubborn, energetic).
* Testing Testing 1, 2, 3", Twilight narrowly avoids hitting a panicked Cherry Berry flying a hoof-powered helicopter.
* "Testing, Testing, 1-2-3", when she gives up hope of passing the Wonderbolts Reserve entrance exam.
* Testing the Editors Creators decide to make sure the editors are doing their jobs.
* Testing the Editors: Creators decide to make sure the editors are doing their jobs.
* Testing the Love Interest is right for them through a compatibility test.
* Test Kiss. After that, there's no trouble with sparks in the relationship... at least until he goes crazy, that is.
* Test Kiss: Two characters kiss in order to see if they would work as a couple.
* Test Match Sofa, frequently admits to being run on booze; so much so that a running jingle says "Won't Someone, anyone, fix me a drink""
* Test Match Special, has never said "the bowler's Holding, the batsman's Willey".
* Test Match Special or the match is halted by inclement weather. Most cricket fans wouldn't have it any other way.
* (T. E. S)tockwell + Jack (Co)hen -> Tesco stores, world's second biggest supermarket
* Test of Humanity fan fiction has GLaDOS doing this. She tries to call Wheatley a "stupid moron" for getting stuck in an exhaust pipe and causing too much pressure to build up but the lab explodes before she can.
* Test of Metal. He harnesses Silas Renn's clockworking powers to explore every nook and cranny of the maze with an infinite number of alternate-timeline versions of himself.
* Test of the Samurai has several patches of quicksand in the other-dimensional plane of Qui.

* Test of the Samurai. The partial plane of Qui has four seasons: Phoenix, Turtle, Unicorn and Dragon. Each has significant effects on the weather and terrain, including changing water to lava (Phoenix), constant rain (Turtle), almost normal (Unicorn) and heavy fog (Dragon).
* testosterone-fuelled, there's a band called Nanowar devoted to parodying them.
* Testosterone Poisoning Even better, the bear gives him some scars on his chest and shoulders that only serve to make him even more manly and seriously intimidate his opponents.
* Testosterone Poisoning: Extreme manliness exaggerated to the point of parody.
* Testosterone Poisoning is Mr. Torgue. In the Thanksgiving mini-DLC "The Horrible Hunger of the Ravenous Wattle Gobbler", Mr. Torgue offers the Vault Hunters an important task: Say hi to his grandmother, who is a big fan.
* Testosterone Poisoning: Manliness often has to be stereotypical and blown out of proportion to be perceived as credible.
* Testosterone Poisoning under the logic that you had to put in quite a bit of perfectly sober prep work in to disable those safety features first.
* Test Pilot, Ann lives on a farm in Kansas. Jim the test pilot crashes his plane on her farm. Pretty impressive, as far as meet cutes go.
* Test Pilot, apparently every time Jim goes up to test a plane it is front-page, above-the-fold newspaper material.
* Test Pilot is about just that, a test pilot who pushes experimental planes to the limits of their performance and beyond. It's a dangerous job.
* Tests like this one can go very "meta" at times. One variant rates as a double subversion: the students are brought to a basketball practice session and told to count how many times the players pass the ball, as a test of their observation skills. As they're taking their seats, a door to the locker room "accidentally" swings open to reveal someone dressed in an unlikely combination of colors, pulling on an equally-odd-colored hat/sock/jacket. Thus forewarned, the students start watching for this figure, who darts onto the court yelling and then dashes away, just as expected. When the students return to their classroom to complete a quiz on their observations, prepared to relate every detail of what they'd seen, it consists of only one question: "What did the person dressed in [long detailed list of the figure's clothing]
* tests Marco by saying "You know you're a toad, right?" his answer is:
* Tests of courage and loyalty or not, you'd think the contestants of
* Test Subject for Hire: People agree to be a test subject in a scientific study for some extra cash.
* Test who insisted it would help his fanbase grow. Christian cut his hair short after winning the newly re-instated Intercontinental title.
* "Test Your Strength" Game: A carnival game that tests the participant's strength, usually involving a high striker.
* "Test Your Strength" Game: A carnival game wherein someone strikes a button with a mallet or similar object to ring a bell at the top.
* Teth Adom has to wrap his head around the ban of pork in the Islamic Kahndaq and how crippling horrible villains would be considered excessive force.
* Tether to Teacher, on how she was going to stop him from killing anyone else-
* Tetley, a brand of tea sold in the UK, uses animated characters called the Tetley Tea Folk in its advertising. Only one character out of a fairly large group (Tina) is female.
* Tet Offensive and ARVN inflicted serious losses on the North Vietnamese and Vietcong, Hue was virtually reduced to rubble, and over 5,000 civilians died, most of them massacred by the PAVN and VC. The Tet Offensive—and the Battle of Hue in particular—proved to be a turning point for American involvement in Vietnam.
* TeTO space are the Church of the Cosmic Spirit, a dualistic faith that believes in a Spirit of Light responsible for all good in the universe, and an opposing Spirit of Darkness responsible for all evil, with major important and influential historical figures of all species believed to be avatars of one or the other. Reincarnation is also a major aspect as well.

* TeTO that he welcomes Anubis back into the System Lords despite not remotely trusting him.
* Tetragrammaton Labyrinth due to the fact that demons need human hosts to manifest into the real world.
* Tetragrammaton Labyrinth! It is even more cursed than several hope diamonds put together!
* Tetrahymena thermophila different sexes (or rather, 'mating types', distinguished by a single chromosome) and can mate with any other sex except its own. That way, it increases the chance of finding a suitable partner, as well as provide a wider pallette to mix and match genes and add genetic variety to its offspring.
* Tetra is revealed to be Zelda. She's the only blonde female protagonist in the main story who isn't Link's sister. Also entering Tetra's room earlier on, you can see portraits of the Triforce, the legendary hero and Tetra's mother who looks like a queen.
* Tetra likes this one as well. She pulls it once on Link and once on Ganondorf.
* Tetramands (Four Arm's species) are revealed to abide to this method in episode "Universe vs. Tennyson" of
* Tetrapod Zoology. The conclusion was that a large eagle could definitely kill a small child, but not carry one off.
* Tetrastar being destroyed by aliens. Then the camera moves to the right to show the World Trade Center and the surrounding buildings. The player spends the rest of the stage trying to prevent the aliens from blowing up the city.
* Tetris 99: the game will display garbage attacks to opponents in the form of bunches of stars and sparkles. Though not normally a problem on their own, they can really clutter the screen and your playfield if the attack is big enough and you've targeted enough opponents, especially since they emanate from whatever lines were cleared to start the attack.
* Tetris and successfully complete it, various Nintendo characters will appear to congratulate you. The higher you have the "High" setting set (which fills the play area with random blocks at the start), the more characters there will be
* Tetris as some of those images like the stunt were major embarrassments at the time.
* Tetris Attack, the game it was adapted from) if the blocks are close enough to the screen for the danger music to play, the stopping effect of combos and chains will last longer than it normally does to give you a bit more time to get the tower back down.
* Tetris Blast's Contest mode will give you a break if you managed to destroy almost the entire stack of blocks. If only a few blocks remain, the next several pieces you get will be made entirely of bomb blocks, enabling you to quickly make a big bomb and finish the level.
* Tetris DS was the first to be criticized for it. The rationale is that it helps beginners, but doesn't affect more competitive players.
* Tetris DX's rotation system is such that your current piece, provided it isn't the square "O" piece, can be kicked back up the wall, over and over, so that the game never actually progresses. If you're astronomically patient or have access to utilities for tool-assisted runs, it's possible to max out the score counter this way through the points earned from fast dropping before you even put down a single block.
* Tetris forces players to do this to name their Arena rooms. Room names are of the format <adjective> <adjective or noun adjunct> <noun>, with a separate list of words to choose from for each, as well as a button to randomize all three. (On the off chance more than room has the same set of 3 words, a number is appended to the end, without a space.) This tends to result in very silly names, such as "Drab Tomato Uprising" and "Cryptic Purple Hunters2". Very rarely does a room name actually make any logical sense.
* Tetris for more details.) Of course, to play without being handicapped, you have to pay for a "premium" subscription. To add insult to injury, they nerfed non-premium players and boosted premium players in an update was officially explained as for "balance" purposes. The only balancing going on there is in their

checkbooks.
* Tetris Friends games junk this and go back to the more conventional and logical "clear 150 lines" format.
* Tetris games use a "bag" randomizer, which repeats random permutations of the seven tetrominoes, making it far easier to predict what the next pieces will be. (i.e. after 7 pieces, all seven tetrominos will have been dealt exactly once, after 14 pieces all of them will have been dealt exactly twice, etc.)
* Tetris is the most versatile piece in the game as it can fit anywhere a vertical 'Z' or 'S' piece or a flat 'L' or 'J' piece can but cannot adequately fill spaces that those pieces can fill in their other orientations.
* Tetrisoids. Body structure consisting of a head with four limbs (apparently adapted for locomotion and manipulation) arranged tetrahedrally.
* Tetris, one of the most popular games of all time, and absolutely nothing else.
* Tetrisphere. His Speed (speed that the cursor moves) and Strength (speed at which one drags pieces) is right in the middle. In modes without a choice of character, you are Wheels by default.
* Tetris TGM. In sports, GM stands for General Manager, which is the person in charge of player personnel decisions including drafting, trading, and free agency contracts.
* Tetris (that honor goes to the Elektronika-60 version). And no matter how many different versions are released, the Game Boy music is the most recognizable. In particular "Korobeiniki" (a.k.a. Music A) is "The Tetris Song."
* Tetris: The Grand Master 3. In a Promotional Exam, in which you need to meet or exceed a target grade to establish it as your qualified grade, this time limit is removed, allowing you to get to level 500 and beyond at your own pace.
* Tetris: The Grand Master. Conversely, Bemani fans and shmup fans view TGM as a new challenge that's worth giving a shot, instead of just crazy insane invisible antics.
* Tetris: The Grand Master (drop the piece to the ground, but not lock it right away).
* Tetris: The Grand Master), for those who started with TGM3. TGM3 introduced a subtle change in the signature TGM rotation system that makes I-pieces easier to handle with, a feature necessitated by TGM3's extreme speeds, as well as the introduction of the Hold Piece feature to TGM. So when a TGM3 player tries to play TGM2, especially at maximum drop speed...
* Tetris: The Grand Master series is known for two things: its instant-drop speeds and the "invisible Tetris" segment that the player gets if they did well enough in the main course of the game.
* Tetris: The Grand Master series The first piece of each game will never be an S, Z, or O, because an S or Z on the first piece forces an overhang, as well as an O followed by an S or Z. The games also heavily bias the randomizer against dealing a piece that has occurred in the last four pieces, so droughts of a single piece (such as the ever-crucial I) are rare. The second and third games also initialize the history to ZSZS, so that an S or Z in the first three pieces is also exceedingly rare.
* Tetris: The Grand Master video guidelines) will be met with copyright strikes.
* Tetris: The Grand Master was unveiled in 2009, but cancelled in 2010 after frustration over free-to-play Tetris clones. A similar game was shown off in 2015, reusing assets from the 2009 version, but very little has been said about it since.
* Tetris. The reason? There are no reasons but that of attaining ever higher levels.
* Tetris, the same worker bitterly notes that while he has more than enough gold, he's reduced to standing in line for the chance to get a loaf of bread.
* Tetris, the stick offers the professor and his assistant one wish. The assistant wishes to remove the professor's hat, as she's never seen him without it.
* Tetris to damn near every console and computer known to mankind. Hell, hackers have managed to port it to things that generally don't play games, from printers to the sides of buildings.
* Tetris version. It was eventually released as part of the Mini Classics line in

1999.
* Tetris was created in the Soviet Union by a government employee and was thus originally in the public domain.
* Tetris, which is basically the same game but with the player now viewing the action from above. It was not well received.
* Tetris Worlds, came up with the idea to have the Matrix (the Tetris game area) take place within "Tetrions", devices which serve as gateways to other planets that can be opened by playing Tetris, and made the plot out to be the Minos using the Tetrions as a means of exodus from their soon-to-be-doomed home planet called Hadar 4.
* Tetris. You use TP to increase your stats, which affect how many piece previews you can see, how fast pieces move across the field when you hold left or right, the speed of the line clear animation, and so on. The higher the stat, the faster you can play. Of course, this can give quite an advantage. TP is earned by playing and winning games, at 10-34 TP per game depending on performance. It also takes a total of 9,700 TP to max out each stat of the 5 stats. But for 105 yen each, you can buy a "Point Scratch" that gives a random amount from 500-10,000 TP when used. "Premium" version subscribers paying 315 yen a month get another 300 TP per month.
* Tetsuko (pictured), Derek freaks out when he sees Tetsuko's bicep, crudely proclaiming he won't date a woman more muscled than him.
* Tetsuo film series are this, gaining a rudimentary control over anything metallic, drawing it to them or turning it to scrap or turning other people into 'Tetsuos', as well as the typical manifesting metal from their bodies.
* Tetsuo identifies as a straight trans male and while he does initially attract girls and boys it's when he tried to get intimate with girls that
* Tetsuo II: Body Hammer, the protagonist's transformation into a metal monster is shown to have been caused by an injection with a serum. It's later revealed that an object in his pocket prevented the serum from being injected into him. His transformation was caused by his own anger.
* Tetsuo: The Bullet Man is a cyborg of sorts born from his android-replicated mother and human father, meaning that while he feels pain, can bleed, and have a child, he is also a rapidly-transforming gun monster who can survive being shot in the head.
* Tetsuo: The Iron Man are prime examples of what the glorious scene of Japanese cyberpunk achieved. They are not straight 100% cyberpunk but have elements. Tetsuo is more futuristic in the sequels; the first movie focuses more on the body horror aspects.
* Tetsuo: The Iron Man, for a particularly disturbing scene with his girl.
* Tetsuo: The Iron Man is called "The Metal Fetishist". When he was alive, he enjoyed shoving bits of metal into his body.
* Tetsuo Umezawa, though, since the characters (or at least their cards) seem to have little in common beyond the family name and their legendary status.
* Tetsuya Naito. To the point he spent more time in matches trying to get away from his opponents so he could spend more time lying down than he did actually trying to beat them. However, laziness also meant he was more willing to strike a foe with a weapon and had no problem with his Ingobernables softening up his opposition, so in a way Naito had become more dangerous.
* Tetsuya Nomura fame) is sure to leave plenty of unanswered questions in his games, in case he can't make a sequel to answer them. Speculation is more fun, apparently.
* Tetsuya Nomura of the "Seeker of Darkness Chronicle", still felt inconclusive to some in regards to many plot threads already hanging all while opening up brand new ones.
* Tetsuya Sakai. After practicing intensely with airsoft, he came over to the US and, after exactly two days of live-fire familiarization with a .45 automatic, won the 2004 Steel Challenge, smoking legendary shooters like Rob Leatham ("The Great One").
* Tetsuya. Starts as Daitetsu's sidekick, but eventually inherits the Kurogane and comes into his own after

* Teucer, also from Greek mythology. He was reputed to be the finest Achaean archer in the army besieging Troy. He loosed shaft after shaft whilst hiding behind his brother Ajax's shield. The gods themselves had to intervene in order to nerf Teucer's effectiveness, with Apollo sending some of his arrows off course and Zeus breaking his bow.
* Teuchi and his daughter Ayame, there is a reason why Naruto (and a lot of other characters) prefers their Ramen shop over places in Konoha.
* "Tevin" before 1990, but it peaks in popularity in 1992 (top 200). In between those two years, an R&B singer named Tevin Campbell had released his debut album and scored several hits off it, and his popularity resulted in many baby boys being given his uncommon first name.
* Tevinter ex-slave Fenris also points out that Tevinter isn't friendly to most Magi either. Only a few Magisters enjoy any power and privilege — the rest are little better than slaves. "The magisters do not hesitate to collar their own kind."
* Tevinter Imperium DLC reveals that the story is at least partly true, as they meet an ancient Darkspawn who claims to be one of the Magisters to attempt this and get punished for it, but also claims the city was corrupt by the time they reached it and were infected by its poison.
* Tevinter Imperium, the Circle was used to bring the Magisters back to power, and the templars there are under their control. It is not the case with the Dalish elves, but only because they're always on the move and damned hard to find. They don't see mages as evil, but only their Keepers are trained in the use of magic.
* Tevinter Imperium. The sheer loss of elf culture is still being felt centuries later.
* Tevinter, which is ruled by powerful mages, and controlled much of Thedas centuries before. In fact, according to Chantry teachings, the Tevinter mages are responsible for creating the Darkspawn. There's also the little fact that every mage is a potential conduit for evil spirits of the Fade to enter the world.
* Tevri'ed = Tevvy, Daarthayu = Darth Vader, Tipaan = Tin Pan or Tin Pawn, Gothmarik = Gothic
* Tevye and Golde's duet "Do You Love Me?" addresses the belief that an arranged marriage can ripen into love, while "Matchmaker", sung by the daughters, addresses both the pros and cons of arranged marriages.
* Tewi Inaba probably doesn't count on the basis that this is entirely canon for her.
* Tewi, Nue, and Mamizou are all canonically pranksters. Tewi is prone more to scamming, but still sometimes screws with people for no gain, and it's not clear if she has any real use for money.
* Texa Georgiana accent is easier than New England or Midwestern speech.
* Tex and Sheila/FILSS also apply. Both pretty well fit in the Giantess category; one is only ever seen in full body armor
* Texan ninja Earthquake Fittingly enough, he was also designed to be a combination of the above 2 characters.
* Texas A&M has trademarked the phrase "The 12th Man" referring to the home fans at football games. The Seattle Seahawks have a portion of their website dedicated to their "12th MAN", including the "12th MAN Ball", a game ball dedicated to the fans after a crucial win over the New York Giants. The Seahawks clearly state that they use the term under license from Texas A&M.
* Texas A&M University is considered a senior military college by the US Armed forces. The reason why it allows civilian students is because every year the Commandant of the Corps of Cadets writes a special exemption for them. (Said exemption originally existed for veterans and National Guard/State Guard troops.) Much the same situation exists at Virginia Tech, North Georgia, and Norwich.
* Texas A&M University. Large number of nerds + corps of Cadets + the cultures the university tends to draw its students from = large number of strange things that are generally met with apathy.
* Texas Across The River, Phoebe Ann (Rosemary Forsyth) goes skinny dipping and has her clothes stolen by an Indian. Sam Hollis (Dean Martin) dresses her in a horse

blanket.
* Texas Across The River (set in American frontier days) has a running joke about how finding oil on land makes it worthless. Can't raise cattle on ground poisoned with the stuff!
* Texas Across the River, where the same Indian gets shot and falls of his horse no less than three times (by the same character nonetheless - well the third wasn't even a gunshot, he threw his revolver). Then there's a wounded Indian who gets dragged away from the fight by his comrades at least twice. You got to hand it to him. He's a persistent fellow.
* Texas broke into the controls of two electronic road signs in January of 2009, replacing their usual notices about upcoming construction with warnings of, among other things, "Zombies ahead!". Drivers were amused; city safety officials were not.
* Texas Cable News network owned by Belo (and then Gannett/TEGNA), using their statewide chain of TV stations: ex-Belo flagship WFAA in Dallas, KHOU in Houston, KENS in San Antonio and KVUE in Austin; didn't do well (mainly because of their split with Time Warner Cable over joint stations launched in Houston and San Antonio which shut down quickly), as well as budget problems; they stopped original production in 2005, and they mainly repackaged stuff from the Belo/Gannett/TEGNA stations for its' last few years. The network was finally put out of its' misery in April 2015.
* Texas Chainsaw Massacre 2 - who harassed a radio DJ with much of the same act.
* Texas Chainsaw Massacre movies start with a group of friends who happen to be driving through the area where Leatherface lives for some reason or another.
* Texas Chainsaw Massacre: The Next Generation, Barry constantly refers to Jenny (played by a young Renée Zellweger) as "ugly" or "a dog." But his girlfriend has seen her change in the locker room, and insists she "has a body to die for." She merely hides it to deflect the attentions of her stepfather.
* Texas Chainsaw Massacre: The Next Generation: The main characters are attacked after driving off from prom.
* Texas has, even unto the present day, had fringe secessionist movements, which gained some notoriety after Obama's election and in tandem with the rise of the Tea Party movement. Just
* Texas Hold'em, the hand Jack-4 is known as a "flat tyre". The joke is reversed in this case, because the punchline is the question ("What's a jack for?") and will only be revealed when someone asks why the hand is given this name.
* Texas: if you don't like the (current) weather, just wait five minutes. Or (in 2011) two months.
* Texas International Airlines Flight 655 was cruising at around 2500 feet, at night in near zero visibility, when the copilot became concerned about terrain (they had diverted from their normal course in the hope of avoiding a storm). He consulted the charts, and was startled at what he saw. He started to tell the captain that "Minimum en route altitude here is forty-four hun—" when they hit a mountain.
* Texas, ironically—which was why they were still behind Nebraska even after winning the conference title and beating the Huskers for the division.)
* Texas mattress chain Miracle Mattress is nowadays better known for the 9/11 sale commercial that killed their business than anything else they've done. The commercial, depicting the chain owner's daughter accidentally knocking over two men who crash into two tall stacks of mattresses, went viral and got major backlash over its poor taste. A few days after pleas from the company stating it wasn't their intention to offend,
* Texas oil tycoon Clint Murchison Jr. wanted to buy the then-flagging Washington Redskins in 1958, but he backed out of the deal after Redskins owner George Preston Marshall changed the terms that were unfavorable to him. As a result, Murchison formed the Dallas Cowboys in 1960, and the most-well known rivalry in NFL history was born.
* Texas power-pop group Fastball's "Out of My Head" was a ballad that was different from the rest of their album

* "Texas", "Sandy, SpongeBob, and the Worm", "Rodeo Daze", and "Pest of the West" all feature flashbacks to Sandy's life in Texas, which entirely consist of live action and photographs.
* Texas Teamwork called Lois Lane. They are certain this is an assumed name, but the madam assures them this is the name on her social security card.
* Texas: Texas, with what appears to be parts of Oklahoma, Arkansas, and Louisiana, as well as a sizable chunk of Mexico
* Texas then seceded from the USA during the Civil War, though it saw very little action compared to the other Southern states. It did, however, send a relatively large contingent of soldiers for its population size.
* Texas valet Venus left the state after deciding she wanted to be a wrestler, with the goal of wrestling in every part of the country. As such, she doesn't stay put for long.
* Texas Wheelers features a cute black & white kitty outside looking around.
* "Texas", when SpongeBob and Patrick are running away from an angry Sandy, the camera is placed ground view, with SpongeBob and Patrick running past it, and Sandy stepping on the camera, blackening out the screen.
* Texas, which meant those customers no longer had to pay the company that amount.
* Texas x Lappland is one of the most popular pairings from the game
* Tex Avery (1940) has George Fox masquerade as another dog to fool his adversaries, most notably the dopey hunting dog Wiloughby.
* Tex Avery, almost getting cut in half with an axe, getting stepped on repeatedly, kicked, and hammered into the ground - all of it played for laughs.
* Tex Avery, a mouse cautions an alley cat against eating him, explaining he'd seen the picture before and that he'd save the cat's life before it was through.
* Tex Avery, an alley cat ponders a situation, then has a 'brainstorm' that manifests itself in a little storm cloud that rains on the table he's at.
* Tex Avery, and as they stop running the music dies down to nothing. As the chase resumes, the background music fades in again.
* Tex Avery, a short about a dog trying to sleep while a rabbit places the phone on his pillow, with the operator jabbering away. The dog strangles the handset, thus somehow strangling the operator (complete with tongue lolling out the receiver).
* Tex Avery Avery was so disgusted by this that he made the parody even meaner.
* Tex Avery (But he looks at the camera and blinks, so it's not in the lethal examples.)
* Tex Avery, buying a "Frankie Suit", a huge pile of clothes he's dwarfed in until he sprinkles himself with a watering can and it shrinks up and contracts, ending with him looking like a walking broomstick.
* Tex Avery cartoon, a dog chases Screwy into a dark cave, and the screen goes black. We hear a loud crash and other odd noises, until Screwy lights a match and says "Sure was a funny gag! Too bad you couldn't see it."
* Tex Avery cartoon "Batty Baseball" shows the name of a baseball stadium at where the cartoon takes place, W.C. Field. A caption pops up suddenly reading "The guy who thought up this corny gag isn't with us anymore." (Whether it means the staff killed him or he was fired is up for interpretation.)
* Tex Avery cartoon "Big Heel-Watha", the tribal leader is Chief Rain-In-The-Face, who has a tiny storm cloud over his face (his theme music, of course, is "Singin' In The Rain").
* Tex Avery cartoon, B.O. Skunk, desperately in search of a lover, follows the suggestion of a book that cupid himself gave him and tries to serenade a female raccoon at her balcony. It almost works until she smells him.
* Tex Avery cartoon "Cross-Country Detour", the audience is presented with a split-screen, one side showing a snarling Gila monster, the other a little girl reciting a nursery rhyme (for those who might find the Gila monster too scary). At the end, the girl shouts "Shut up!" to the monster, who runs away whimpering.
* Tex Avery cartoon "Red Hot Rangers", an anthropomorphized flame comes out of a discarded cigarette and goes around the forest burning things, while forest rangers George and Junior try to stop him.
* Tex Avery cartoon "Slap-Happy Lion", a mouse scares a lion with a flat "boo".

Doing it repeatedly drives the lion mad.
* Tex Avery cartoons, which contain a woodpecker with a laugh reminiscent of a woodpecker screaming through a duck lure.
* Tex Avery cartoons would show the bad guy apparently holding up an armored car/stagecoach (or whatever was period-appropriate) only for the camera to pull back and show he's actually robbing an ice cream truck.
* TexAvery cartoon "The Cat Who Hated People", one of the cat's flashbacks features the cat being adopted by a family with a huge bulldog. Once the owner leaves, the bulldog beats the living hell of the cat until the owner hears the noise, and the dog dumps some ketchup on himself and an axe to make it look like the cat killed him.
* Tex Avery cartoon "The Cat Who Hated People", the cat is taken home to make friends with the family dog. The dog starts beating him up, but when the lady of the house arrives, he quickly gives the cat an axe, douses himself with ketchup and plays dead, and the poor cat gets the rap.
* Tex Avery cartoon "The Cuckoo Clock" at one point the cat reaches for the cuckoo bird inside a mouse hole the bird takes the cat's thumb and paints it to look like himself, the cat thinking he has the bird pulls out a gun and shoots it, he screams in pain and we see his thumb with a hole in it and it deflates.
* Tex Avery cartoon "Three Little Pups", the wolf is bitten in the butt by a bulldog. He goes to a changing screen and hangs up his pants... with the dog still attached. A few scenes later he walks by the screen again and the dog is still there! Wolf tells him...
* Tex Avery consist of bizarre cross-breeding experiments such as an ostrich with a chicken (for bigger drumsticks), a duck with a banana (you peel the feathers off instead of plucking) and a dove with a high chair (a stool pigeon).
* Tex Avery deals with a man in a hotel room desperately trying to get some sleep while his room neighbor loudly plays a horn and laughs with his wife.
* Tex Avery did the chain-smoking variant in "One Cab's Family". Let's not think too much about taxis giving birth.
* Tex Avery-directed cartoon whenever he hears the slightest bit of noise:
* Tex Avery. Doubling back, they notice that the sign reads "Technicolor ends here".
* Tex Avery examining the title card, then flipping out when he sees the cartoon's title.
* Tex Avery from footage of an actual stripper they brought into the animation studio.
* Tex Avery, has Cupid trying to bring couples together on Valentine's Day while the Devil tries to ruin festivities.
* Tex Avery. He grabs the glove and shakes out a horseshoe...then three more...and the horse from which they came.
* Tex Avery. He quickly returns to it for a second look, but now the woman has covered herself up with the coat.
* Tex Avery'' includes a luxurious room that can be made to look like a dilapidated shack in case the IRS man comes to call.
* Tex Avery in various competitions, was practically built on this concept. The biggest evidence of this was the episode "Mutts About Racing", that featured Droopy and Spike as rival racecar drivers. One would think Spike and Dick were driving school buddies or something like that.
* Tex Avery, in which a bird, cat, dog, and mouse enlarge themselves by drinking Jumbo-Gro plant food. The cartoon ends with the cat and mouse standing over a basketball-sized Earth.
* Tex Avery", in which Hitler was ridiculed, "because we don't know who will win the war in the end."
* Tex Avery" is about a magician who gets even with an opera singer by taking the place of the conductor and using his wand in place of the baton, causing all sorts of silliness.
* Tex Avery is beating the titular cat with the broad side of an axe. When the lady of the house shows up to see what's going on, the dog covers himself and the axe

with ketchup and puts the axe in the cat's hands, making it look like the cat just killed him.
* Tex Avery is trying to escape from his cell by digging his way out, spoonful-by-spoonful. When he hears the warden approaching, he eats the spoonful of dirt present at the time.
* Tex Avery like a hairpin. And when characters stop at a school crossing, what should cross the road but a schoolhouse on two legs.
* Tex Avery loved this trope. Besides the aforementioned "Dog-Gone Tired" he also used it in "Slap Happy Lion" where a mouse trying to evade a lion creeps into one of his ears tiptoes through the lion's empty head and emerges from the other ear without the lion being any the wiser.
* Tex Avery MGM cartoon "Jerky Turkey" ends with Joe the Bear (owner of Joe's Diner) eating both the pilgrim and the turkey. Inside the bear's stomach, the two pissed antagonists hold up a sign saying "Don't Eat At Joe's!"
* Tex Avery MGM cartoon just millimeters from the vase, then tells the audience, "I've got me good brakes, haven't I, folks?"
* Tex Avery MGM Cartoons, after Screwy Squirrel has tricked Meathead the dog into walking off a cliff:
* Tex Avery MGM Cartoons, and thus, the equally violent Slappy Squirrel was born.
* Tex Avery MGM Cartoons", an old B-29 plane bemoans being unable to find a job despite his military record.
* Tex Avery MGM Cartoons", at one point when Screwy is being chased by Meathead the dog, the animation frames and music repeat over and over until Screwy moves the needle on the record.
* Tex Avery MGM Cartoons by heavy objects or bigger animals, and having their teeth fall out or shattering to little pieces after getting hit.
* Tex Avery MGM Cartoons describes the title character as a "flat-faced, pigeon-toed, knob-kneed, blubber-headed tub of lard".
* Tex Avery MGM Cartoons, Droopy is watching television with his two brothers in one scene; the Wolf tries to suck them up with a giant straw, only to grab the televison instead (and end up with it lodged in his stomach). Two scenes later, Droopy and his brothers are watching television again, and Droopy looks at the camera and says, "Now don't ask us how we got the television set back..."
* Tex Avery MGM Cartoons in two of the cartoons was the "mother-in-law" getting something bad).
* Tex Avery MGM Cartoons is funny to children as well to adults for pretty much the same reasons: the absurd comedy, slapstick, great timing and jokes that break the fourth wall.
* Tex Avery MGM Cartoons: Near the end of "The Shooting of Dan McGoo", "the lady who's known as Lou" plants a kiss on Droopy, causing him to shoot into the air like a rocket.
* Tex Avery MGM Cartoons: "One Ham's Family", a sort-of sequel to "The Three Little Pigs" where the wolf disguised himself as Santa to sneak into the practical pig's brick house. Unfortunately for him, as he meets up with the pig's sack-o-hell son.
* Tex Avery MGM Cartoons opens with a line of deceased souls at the Pearly Gates being given halos by St. Peter and allowed into Heaven.
* Tex Avery MGM Cartoons pair - whenever the big dumb guy did something wrong (several times per cartoon) he'd get a butt-kicking.
* Tex Avery MGM Cartoons routine. After the act ends, the upper and lower halves of Spike/Butch's body walk in opposite directions.
* Tex Avery MGM Cartoons short "Who Killed Who?" The detective approaches a door that has a sign reading "Do not open till Xmas," and he frantically tries to get the door open. When he does, Santa is on the other side and says "Listen, doc. Can't ya read?!" and bops the detective on the head.
* Tex Avery MGM Cartoons: The lion does this after being driven to madness by a mouse in "The Slap Happy Lion".
* Tex Avery MGM Cartoon "What's Buzzin', Buzzard?", a vulture cooks another in a pot. The vulture in the pot smells something cooking and asks for a taste, and it's only when he bites into his own leg that he realizes what's going on.

* Tex Avery, naturally, built an entire cartoon out of this trope. "Slap Happy Lion" has a mouse scaring a much-feared lion simply by saying "Boo!" at him. The cartoon ends with the mouse being scared by a much smaller mouse. The narrator of that cartoon — a mouse — even wonders why anyone would fear a mouse.
* Tex Avery. Occasionally, he dipped into Disney-style acting, but only when he was parodying Disney (i.e. the insufferably mawkish Sammy Squirrel in "Screwball Squirrel") or in cases where only that kind of acting would really work (i.e. all of the Red Hot Riding Hood shorts).
* Tex Avery, one of the Censored Eleven) has this with the protagonist's pocket.
* Tex Avery power over the orchestra, he could also physically change the performer into whatever embarrassing form he wanted.
* Tex Avery", Red Riding Hood does this to the wolf, who runs all the way to the second story of the house and falls out the window.
* Tex Avery's "Batty Baseball" has a fan in the crowd yelling "Kill the umpire!" quite forcefully, and off-screen his request is granted. At the end of the cartoon, the catcher who keeps creeping up past the batter to catch a pitch as the batter swings and misses fatally suffers an off-screen fate as the camera zooms in on the batter, whose swing bashes the catcher in the head. (Catcher's sign as he floats to heaven: "Sad ending, isn't it?")
* Tex Avery's "Cross Country Detours" has a scene where the narrator states, "Here we show you a close-up of a frog croaking," where the frog then pulls out a gun and shoots himself in the head.
* Tex Avery's "Dog Hounded", where Droopy proceeds to flummox the Wolf by being where he isn't supposed to be.
* Tex Avery sets up a home and runs a fence around a pond — a bull grazing there runs to the office of "Dishonest Dan the Cattle Man" and starts shouting "Moo! Moo! Moo moo, moo moo!" Dan replies "What? A dirty homesteader just fenced in our watering hole at Red Rock Canyon?"
* Tex Avery short and hidden behind a curtain painted to resemble the scenery.
* Tex Avery short "Doggone Tired" had this done deliberately by the rabbit, as one of the tactics to keep the hunting dog awake at night.
* Tex Avery short from Droopy, and eventually ends up on a tiny island with only two small rocks.
* Tex Avery short has the wolf hiding behind a thin tree, then coming out disguised as Santa Claus.
* Tex Avery short "Lucky Ducky" had a pair of hunters chasing a duckling. In mid chase, the film suddenly turns from color to black and white. The characters stop and notice they have run past a tiny sign that says "Technicolor ends here". Technicolor is the name of the company that developed colored movie camera film and perfected it for use in the early 1930s.
* Tex Avery's M-G-M cartoon "Dog-Gone Tired" has a hunter's dog trying to stave off noises instigated by the rabbit he's to hunt in the morning by pulling a pillow through his ears.
* Tex Avery's short "Lonesome Lenny", Screwy Squirrel is being chased by Lenny (a dimwitted and dangerously strong dog seeking companionship) when a whistle blows and the two adjourn for a coffee break, Screwy Squirrel commenting "Strong union!"
* Tex Avery's "The Bear's Tale", Papa and Mama Bear are the parasites, leaving poor Baby Bear to do all the pedaling.
* Tex Avery's "The Penguin Parade" (1938) has lots of great stuff in it, from three penguins stopping in the middle of performing "When My Dreamboat Comes Home" just to make faces at us to the ending after a band ends its torrid performance:
* Tex Avery, the holes are revealed not by water, but by light shining from behind the character.
* Tex Avery: Though his work was very popular and influential during his lifetime, the man himself never received the respect he deserved so well. It didn't help he was extremely shy and didn't like to be in the spotlight. He died in obscurity. Only after his death in 1980 did his reputation grow to critically lauded proportions.
* Tex Avery through that pipe without effect, however, is anyone's guess.

* Tex Avery 'toon "Ventriloquist Cat" ends with the titular cat on a telephone pole, sliding repeatedly between his canine nemesis at the top and a whole pack of dogs at the bottom, until night falls and the cartoon ends.
* Tex Avery voiced multiple characters in his cartoons some examples include Willoughby the dog from "Of Foxes and Hounds," "The Crackpot Quail" and "The Heckling Hare"; Junior of "George and Junior"; the bulldog in "Bad Luck Blackie"; Lenny from "Lonesome Lenny"; and he even filled in for Bill Thompson as Droopy in a couple of cartoons.
* Tex Avery, "Wags to Riches" and "Ventriloquist Cat", were remade for Cinemascope as "Millonaire Droopy" and "Cat's Meow" by using the original animation and reformatting it for widescreen. Tex got screen credit despite having left the studio years earlier.
* Tex Benson, a futuristic Canadian space opera newspaper strip, the heroes have to launch an attack on the base of an enemy who is amassing his forces at a hidden base prior to an interplanetary invasion. Unable to use their rocket ship to launch an attack from space because of the bad guy's high altitude defense system, the heroes land on the back side of the planet where they know a war museum contains a fully operating squadron of WW-II era P-38 Lightnings. After they load them with fuel and bombs they launch a low-level attack that catches the bad guys by surprise and destroys their base.
* Tex, due to the reveal that she's the Beta A.I., as well as her connection to fellow Walking Spoiler Allison.
* Tex from parts of an old protocol droid and other of "her personal items".
* Texhnolyze. Again, very little dialogue, none for the first 11 minutes of the series and Ichise, the main character, rarely speaks unless spoken to by someone he respects.
* Texhnolyze, although cybernetic implants are a fairly important part of the story's world.
* Texhnolyze always has a calm, pleasant smile on his face, even as he goes around shooting people and blowing them up with bombs.
* Texhnolyze, as well as the rest of their organs, stuffed in a green cone in their chest, are all that remains of their original bodies.
* Texhnolyze can be a very tricky story to piece together, especially considering all that's going on between the Raffia, the Organo, the Class, and the shared history that ties them all together. It's very tight-lipped about its secrets.
* Texhnolyze ends with Ichise as the only sane person in the dying Lux who hasn't been turned into a cyber-tree. Oh, the people on the surface are still alive, but lacking any will or initiative they are already counted as living dead. The Shapes, too. One by one, they take root and go into hibernation, also alive in only the most tenuous sense.
* Texhnolyze had "Guardian Angel" by Juno Reactor as its opening theme.
* Texhnolyze, Ichise accidentally does this after recently having a mechanical arm grafted on. He particularly has trouble with fine motor control using his new hand.
* Texhnolyze is so dark and depressing that only a handful of people ever bring themselves to watch it.
* Texhnolyze makes use of CG effects when showing Ichise's Texhnolyze arm and leg before they're attached.
* Texhnolyze musing on his earlier promise to kill him when they next time met.
* Texhnolyze one member of Organ pisses his pants when some of his fellow members are shot and killed by an Alliance member, who then shoots him.
* Texhnolyze. The Class is obsessed with selective inbreeding and genetic engineering to defeat the perceived defects that caused them to be imprisoned underground in the first place, but they get all the physical and mental deformities associated with incest along the way.
* Texhnolyze. The Theonormals who inhabit Earth's surface exiled everybody with genetic tendency towards violence underground, and created a utopian society free of fear. As a result, the said society became horribly stagnant, losing all passions and interest to do anything but reminiscence the old days. Even the threat of the exiles returning to slaughter them all fails to provoke any reaction beyond

"that's nice".
* Texhnolyze, to replace the ones he lost in a fight. She later admits to loving him because of how well he took to the technology.
* Texhnolyze. When he and his mother discovered his father's dead body he didn't show any emotion and looked surprised when he saw his mother crying at the sight. He goes a little insane in the very last episode, but apart from that, he copes a little too well...
* Texhnolyze who murders innocent people and starts gang wars for the sake of amusement. While he may have an ideological purpose behind it all, it is so obscure that it only makes him look all the more hysterical.
* Tex in is not only the only woman in blood gulch (until much later), but also the only capable soldier. She's technically on the side of the Blue Team, which doesn't stop her from abusing and scaring the shit out of her allies. She is also the one character who wears black armor.
* Tex initially has invisibility, super strength, and a voice filter. When her original body is destroyed, she can only recover the invisibility once in her second body. In her third body, she regains only her super strength, but at that point she's matched by the Meta.
* t exist; and even credit creation to a cosmic accident. Do you expect me to help you out of this predicament? Am I to count you as a believer?" The atheist looked directly into the light "It would be hypocritical of me to suddenly ask You to treat me as Christian now, but perhaps could you make the bear a Christian?" "Very well," said the voice. The light went out. The river ran again. And the sounds of the forest resumed. And then the bear dropped his right paw ..... brought both paws together...bowed his head and spoke: "Lord, for this food which I am about to receive, I am truly thankful."
* Tex Murphy, after Tex foils J. Saint Gideon's plans to mind-control the world leaders in order to bring about global peace, Gideon graciously shares scotch and cigars with Tex, even giving him his lighter as a keepsake, before committing suicide.
* Tex Murphy even refers to it as a Greasy Spoon if you ask her about Louie (the owner).
* Tex Murphy games, another cyberpunk-influenced series. It is notable for being a comedy where you play a Noir private detective investigating futuristic science fiction crimes. Tex is a "norm" (born without genetic defects) in the post-apocalypse setting that has recovered to advanced but still-damaged levels.
* Tex Murphy games are set after World War III. Things are kind of crummy, but life goes on, and in a fairly acceptable way.
* Tex Murphy games. Tex gets a small, simple gig (find my missing friend) and it turns into a save the world scenario.
* Tex Murphy: Overseer takes place on the island prison of Alkatraz. Tex Murphy finds himself trapped a cell and must escape and make his way deep into the prison while avoiding deadly security droids.
* Tex Murphy salvaged from the Roswell craft. Area 51 itself is on lockdown, after most of the staff were infected with an alien parasite and were gunned down by the guards. Worse, there's a larger vessel hidden somewhere in jungles, and its fuel tanks are full of anti-matter.
* Tex Murphy series, the creator Chris Jones actually plays Tex Murphy. It can be assumed that much of Tex's mannerisms mirror those of Jones or, at least, Jones's idea of an old-style gumshoe.
* Tex Murphy takes place in 2042. One of the in-game items is a single postage stamp. It costs 10 dollars. Tex comments that the postal service is a lot faster with the new stamp price, indicating this might have been a deliberate ploy by the government to make said agency pull its budgetary weight.
* Tex Murphy, Tex has to search the Area 51 facility to find an alien power cell.
* Tex Murphy, the pathologist at the morgue is "taking a long lunch break" so Tex can have the place for himself.
* Tex Murphy to be out for long in the day, so the day-night cycle has been inverted (i.e., everyone sleeps during the day and conduct business at night).

* Tex Murphy US government reversing the day/night hours, so that people are active during the night (when there's less radiation due to the damage to the ozone layer) and asleep during the day.
* Tex Murphy where the player's choices determine whether he ends up with wholesome, lovable Chelsea or scheming Regan.
* Tex. She gets her own mention. She backstabs her teammates and loved ones, steals from them, physically abuses them, demeans them, uses live rounds and other military hardware on and around them, beats them up in humiliating ways, shows up other Freelancers in personal and demeaning fashions, and steals credit/lays blame on her direct rival whenever possible.
* text adventure is all about this. In the course of trying to sort out a snafu caused by a change of address, the main character must confront not only obstructive bureaucrats, but a tribe of cannibals, an antisocial hacker, and an angry llama, all while trying to avoid getting so stressed out they have a fatal aneurysm.
* Text Adventure lets you make one to a shadowy guy that gives the location of the traitor's hideout. The problem is that he's a cardboard cutout, making your threat look silly.
* Text Adventure to collect. The bad news is you'll need one at random at the end of the game or you'll die. The other bad news is the "random" one you need is always one you don't have unless you have them all. It's a cruel game.
* Textbook Humor (1755) has entries such as "Lexicographer: a writer of dictionaries; a harmless drudge that busies himself in tracing the original and detailing the signification of words."
* Textbook Humor joke paper on Arxiv (by a reknowned cosmologist), researching the variation of pi over time, concludes with the following crowner: "A number of colleagues were kind enough to commenton the manuscript. For some reason they did not want me to use their names, so I will identify them by their initials:". Followed by their full names...
* Textbook Humor: Jokes in textbooks that you'd expect to keep a serious tone.
* Textbooks. Some college texts books are solid walls of text that go for pages with no pictures, diagrams, or even
* Text Formatting Rules Use this page to make sure that your examples are clear, readable, and fun.
* Tex the title character saves his older brother's life when a hitchhiker pulls a gun on them.
* Textile Work Is Feminine: Only girly girls can make and mend clothes.
* Textile Work Is Feminine: Textile work, especially as a hobby, is perceived as feminine.
* Text implications suggest that the Handmaiden is doing this to a male player character in
* Text in its purest form can easily fool people when taken at face value. Sarcasm or other types of figurative speech can easily be lost when there's no voice behind it or any punctuation that indicates that the phrase is not literal. Many people within online forums tend to end their posts with a "/s" to indicate they were being sarcastic, though most do it just out of jest rather than being
* Textless Album Cover — An album cover with no words or characters.
* "Text Me Merry Christmas" be satire because the alternative is too depressing, and those who think that it is a sweet modern-day Christmas song about being apart at the holidays.
* Text messaging, specifically on phones that don't have keyboards like early cell phones and contemporary low-end phones. Unless
* Texts From Last Night but some of the most truly odd come from Florida area codes.
* Texts from Superheroes and clean my eyeballs" after seeing some of the things people do behind closed doors.
* Texts from Superheroes once had Spiderman volunteer for street patrol on Black Friday:
* Texts from Superheroes. When Franklin expresses doubt about the existence of

someone who can watch people and deliver presents all over the world, Reed mentions people they've met who actually have that kind of power. Reed concludes that he can't be sure whether Santa exists or not, and decides to leave out some cookies, just in case.
* texts they give before the battles were not, resulting in things such as Azhag the Orc telling his subbordinates that he gets first picks to choose a "Shiny Bos'Hat" after the battle, but both the quest texts leading to it and his model show him already wearing it.
* "Text Support" has Twilight Sparkle getting a strange text message from her crush Timber Spruce, and seeking advice on how to respond from either Fluttershy, Sunset Shimmer, or Rarity.
* Textual Celebrity Resemblance: In a non-visual work, the narration explicitly states that a character looks like a certain celebrity.
* Textual Poachers and they end up watching shows aimed at men and using fanfic to refocus the narrative.
* Textual Poachers: Television Fans and Participatory Culture: Henry Jenkins' landmark study of fandom and how fans interact with the media they consume, including several chapters on fan works.
* Textual Poachers: Television Fans and Participatory Culture that aired a few days (or weeks) earlier than the US Stations, and the women at the viewing party "shouting out" lines they understood from old high-school French classes.
* Tex went from a skilled and amoral special forces soldier to a legendarily powerful badass, especially after the Blood Gulch Chronicles when the show began using CGI to animate fight scenes.
* Tex Willer, his daughter and a friend of theirs decided to scam the white man (who happened to be wealthy).
* Tex Willer of the law just means the Rangers will have to get creative in busting them.
* Tex Willer righting wrongs with his trusty Indian friend Tiger Jack, his son Kit Willer, and most commonly, his also ranger friend Kit Carson.
* Tex Willer started publication in Italy in 1948, making it the longest running comic originating from there as well as the most popular.
* Tex Willer: Tex was defending a mail wagon that was carrying a Mauser salesman who had come to America to try and get commissions from non-army customers, and brought the rifle, the scope and ammunition for demonstrative purposes.
* Tex Willer was capable of nearly flawless disguises, which he used to frame our heroes (Kit Carson for example) for robbing and murder.
* Tex Willer, with more than a few forcing confessions out of their quarries (in case they're just suspects) and, in at least one occasion, using the body of some random man to try and claim a bounty on another criminal.
* Tex Willer, with one or two (Tex and Carson in that story) physically chasing them to the other side of the US and the rest using all the corps' resources to point them in the right direction.
* Tex Willer, working to find out any and all information about him so that Tex and Carson, the two who are materially chasing him, have an easier time hunting him down and either dragging him back to Texas to be tried and hanged or gun him down trying.
* Teyla has the ability to sense the approach of a Wraith attack, due to having some Wraith DNA, which with training she learns to use to tap into the Wraith hive mind. Her ancestors fit this trope even better, as their genes were modified by Wraith experiments, which resulted in them getting the abilities in the first place.
* Teyon. Needless to say, it more than repaired Teyon's reputation, further helped by their solid support of the title in the months that followed, with the announcement of an enhanced edition for the PS5 being greeted with solid approval.
* Tezca Tlipoca offers Justin a chance to come back to Shibusen, although he
* "TEZUKAAAAAAAAAAAA!!" (appropriate when one is the slightly megalomaniacal tennis captain of a rival team facing off against Tezuka Kunimitsu).
* Tezuka is slightly inconsistent on this, perhaps not surprising given A) the

manga's
* Tezuka Productions': When the nameless cowboy finally saves the damsel, the film suddenly shifts to Technicolor and the setting changes to a ballroom as the trope sets in. Then, when snapped out of it, the film suddenly reverts to its black-and-white western format.
* Tezuka Tezuka and the offending senior run laps for disrupting the practice.
* Tezuka wanted his readers to be able to relate to the characters and setting, so he usually only added things like robots and spaceships when they were important to the story. Ultimately, though, this results in what looks like
* Tezuka works tend to get some dubiously official prequels in order to explain how the main characters ended up the way they did.
* Tezzeret, Artifice Master. He can create artifacts and gets more powerful the more artifacts you can control.
* TF2 Analysis. And then she slowly slides down with the exact sound of flesh against glass.
* TF2 Analysis any kind of artistic supplies whatsoever. Key and Bliss are left on the beach, unable to really enjoy themselves at all without being allowed their passion for drawing.
* TF2 Analysis despite what's already happened to Firebrand today: because Ink Rose is out there.
* TF2 Analysis" episode. Although introduced as genuine flubs at the start by Firebrand, it's obvious most of the gags are scripted.
* TF2 Analysis: In "Mission Unpossible", Lightning Bliss bucks AnY Pony to wake him up, as he's snoring during the briefing.
* TF2 Analysis, "Mission Unpossible". Voice of Reason tries to get the teams to raid a robot factory to get the plans on the robot army that attacked them earlier, but things don't go as planned. When GoldenFox hears that his girlfriend, Keyframe, is in trouble, he rushes off to help her (even though he's a sniper) despite Voice telling him to come back. Voice sighs and counts down before an explosion is heard in the background and Golden is seen flying through the air.
* TF2 Analysis shorts concludes with the line "That is... if we can find enough headache pills for the doc to cope...", and Dr. Wolf is seen facepalming.
* TF2 Analysis where an Ubercharged Lightning Bliss is pinned against a wall by Dr. Wolfs' Sentry, only for Keyframe (under the effects of the Ubercharge) to dance in front of the turret while Lightning Bliss destroys it with a kick.
* TF2 of each class), while having significantly fewer items banned from competitive play, does also institute item bans.
* TF 4 are on edge if you bring along Aki, 'Marked' characters will cause City and Tops residents to be less responsive, Misty and Carly respond well when one of them's your partner, etc.) Anime knowledge also helps in choosing the gifts you give to certain characters (Jack will reach a full yellow heart when you give him coffee or a crown, Ruka responds well to stuffed animals, Yusei with Milk, Hair Gel and gadgets, Sherry with hair-care products, Carly with fortune-telling equipment, and Aki with tea and fashion accessories)
* TF 4, as now you cannot see your Partner's hand when it's their turn and with the addition of the new feature "Partner Synchro" that allows you to tell your opponent one move (either activate a certain card in play (hand, field grave) or summon a monster, they will continue the rest). The "relationship bubble" (the picture floating over their head or next to their picture) will effect just what you can see in their hand (the anime vein and skull warrant completely blanked-out cards, the ellipsis (...) shows you only the card frame (name, picture and effect are blanked), the musical note provides the card picture and effect (but not the name) and the full heart provides the full card).
* TF 5, even NPCs will have different reactions depending on who you bring. (Prominent Examples are Zora's expression and dialogue when you tag up with Yusei, and Stephanie giving more chances of a good meal (I.e. His favorite: Blue-Eyes Mountain coffee) when you bring Jack).
* TFA Kaleidoscope has a few standalone villains on top of the more prominent antagonists:

* TFA Kaleidoscope in comparison to Optimus, as he frequently has PTSD nightmares and flashbacks to his time in the war as a front-line soldier. When the story perspective shifts to the war in said flashbacks, we see what a horrid, energon-soaked nightmare it was, as numerous bots on both sides were killed, mutilated, and worse.
* TFA Kaleidoscope prior to the Great War. You are born for a specific class and are to stay there for the rest of your life. There is no choice in this system and what class you're born into determines how you are treated. Optimus and Ratchet lived through this and the system's cruel treatment of the lower classes was a part of what lead to the Decepticon rebellion and Great War. The Post-War Cybertron has completely abolished this, and Optimus is determined to make sure it stays that way.
* TFA Kaleidoscope, though in the end this trope gets zig-zagged for them. People tend to be just as quick to throw them under the bus as they are to praise them for any heroic action they may commit. The police, however, have enough tolerance of them to work alongside them when they need help. They even point out that the news and media only focus on the bad aspects of their actions to paint them in a negative light for the sake of sensationalism and that the public is actually more divided on them than outright against them.
* TFC VIP bobblehead on his dashboard and says, "Boom. Headshot." Cut to the title card. Good things are in store.
* TFF Archive: An archive of fics that are available only on 'The Fanfiction Forum'. The Fanfiction Forum recently closed all new memberships, so all works exclusive to it were unavailable to anyone new, until someone who was still a member began to archive them off site. This was the birth of TFF Archive. It has recently expanded to include any other hard to locate stories.
* TFO (Télévision française de l'Ontario), Ontario's French-language public broadcaster. Originally launching in 1987 as La Chaîne Française—a branch of TVO, it has since been operated by an autonomous crown corporation. It formerly operated OTA transmitters in regions of the province with sizable Francophone populations, but since 2012 it's been cable-only (while transmitters were being built out, TVO briefly continued with its practice of airing French-language programming on Sundays to ensure OTA availability. On the other hand, La Chaîne aired English programming.) It is available on some cable systems in New Brunswick and Manitoba (the latter catering to the native Métis population), and the network also partnered with Louisiana's PBS system to provide French-language children's programs.
* TFS at the Table and cheerfully saying 'You know, you're not even the first bird-person we've had on board' to her as they walk through the ship.
* TFS at the Table campaign), the party encounters a juvenile blue dragon who goes by "Pabsvadri". A member of the crew who speaks Draconic later tells them that the name means "water eruption", giving off the impression that he's just a kid trying way too hard to sound cool (a suspicion later confirmed when they meet a friendlier dragon).
* TFS at the Table confers some kind of in-game bonus (like the pufferfish pie giving an Armor Class bonus), while failing just produces some comedic effect but no actual penalty (the pufferfish poison numbing their mouths for a few mintues).
* TFS at the Table fat alligator-man who hunts things with a huge blunderbuss, a naga warlock and a nine-foot-tall barbarian who isn't interested in anything she can't fight with. They get up to shenanigans together.
* TFS at the Table, resident merman Wake Scalebound poses as a human when they reach Bulkard by using Ezra's disguise kit. He doesn't get Ezra to tell him how to use it first. As a result, 'Sheldon Flash' looks like an early 00's CGI human, and when starts sweating his makeup runs badly. Most people don't seem to realise.
* TFS at the Table scene quoted at the top of this page), and he even ends up adopting the identity of "Skrungliacci" in the group's traveling show.
* TFS at the Table The icing on the cake to all this was the fact that, right before trying this, Ezra said that throwing down the ball bearings was probably a stupid idea.

* TFWiki.net Because everything in Transformers revolves around it, including the cartoon series.
* TFWiki.net, editing the page, editors will be greeted with a message warning against jokes about it.
* TFWiki.net, getting introduced and killed off in a span of four issues, even though they were still on the toy shelves.
* TFWiki.net. However, it does have a set of rules as to what is or isn't appropriate.
* TFWiki.net's belief that Skywarp enjoys pushing other bots down stairs. This has zero basis in canon, but as the wiki puts it, he seems like the kind of bot who'd enjoy doing so.
* TF Wiki takes it a bit more seriously when it comes to packaging bios. See, if it's officially produced material it's not 100% dismissable, even if it's
* TG: alright well its not like i even have a problem parting with this useless bullshit money
* TGA — Office of Terrorism and Financial Intelligence. Part of the Department of Treasury responsible for tracking the money used in illicit activities by terrorists (groups and state-sponsored), money launderers, drug cartels, and other national security threats.
* /tg/ an insane camel proprietor who pops up in improbable locations to sell players slightly-used camels. And they will be the best slightly-used camels you have ever seen or used.
* /tg/ has applied Orky logic to matters of camouflage, concluding that purple is the sneakiest color. Because you've never seen a purple army, have you?
* /tg/'s. He was supposed to be the sole survivor of the original batch of Orks, millions of years ago, and has kept fighting and growing ever since. Currently, he's the size of a planet, with a whole Ork ecosystem living in his body, who built fortifications as his armor.
* TG site alone has more than 15,000 stories on it) and most of them are based entirely on this trope — and little else, unfortunately.
* TGS), these tangents have produced several of the show's most memorable moments. Lampshaded in TB's catchphrase, "We occasionally talk about video games."
* /tg/ tiefling bard swaying an elven queen into almost doing this. Before being killed by the party's (male) barbarian and (female) fighter.
* TGWTG in power and that usually means no happy fun times for the Critic. But other times it's just because he's so very pretty when suffering.
* TGWTG's hotel room. JewWario latches onto them in a hug, and Nella tickles him to make him let go.
* TGWTG Year One Brawl asked if That Chick with the Goggles was on his side; as she said no he immediately punched her.
* TGWTG Year One Brawl mentions that the girls wouldn't agree to the gag unless the fight happened offscreen. There was a planned male version where Spoony and Bennett would pillow fight while the girls took pictures, but it had to be cut because people couldn't stop laughing while filming it.
* TGWTG Year One Brawl revealed in his commentary to finding him annoying, even going so far as to say, "God, I hate that man". His tenure on the site didn't last much longer.
* TGWTG Year One Brawl. The cartoonish sound effects don't help matters.
* TGWTG Year One Brawl, the two keep fighting throughout a hotel, even while the are waiting for an elevator to arrive. When it does they simply stand inside, apparently ignoring each other. The fight continues once they reach their intended floor.
* TGWTG Year One Brawl, who were about to fight each other as well, decide to take pictures of the catfight instead.
* TH3 L05T V1K1Ng5 are written in this way, which makes it harder to guess them if you're an impatient (or just curious) player.
* Thack also plays around with this with Shanna, who he doesn't put into a simulation but instead tries to convince that she's been in one all along, trying to get her to "symbolically" put on his Mind Control glasses.

* tha client's bank was being used by the Mob to shelter the players by pretending to be legitimate businesses and this had been going on for 30 years, he gets a massive reward.
* "Tha Crossroads"(who died from AIDS a year prior), and a newborn baby, until the end when Death takes off his coat and hat revealing he is actually an angel taking the dead to Heaven.
* Thaddeus and Thor are stunned speechless by Phineas and Ferb's fort (which is... well, a "fort" according to
* "Thaddeus and Thor" has the episode's title characters as ones for the show's title characters, complete with having an older sister who looks like Candace.
* Thaddeus Euphemism makes a YouTube video of himself and expects it to get thousands of views but really it only gets seven views. Moreover, two of those were from himself watching it, four were from his assistant Bob watching it, and one was from a talking squirrel who was just watching it because it was bored.
* Thaddeus is only seen without his exceptional suits once in the whole movie, where he has to get a shirtless scene to treat his stab wound.
* Thaddeus Stevens has to hide his belief in racial equality so this fear doesn't kill the Amendment, plus the fact he's married in all but name to his black maid.
* Thaddeus Stevens (R-PA): A Radical Republican Representative from 1859 to 1868.
* Thaddeus Thawne is not only a powerful speedster, but he stole Zoom's powers for himself and he has complete control over the individual timelines of other people.
* Tha game has a total of 36 vehicles, 6 karts and 6 bikes for each weight class who often mirror each other: karts are heavier and have a better top speed than their bike counterparts who are better everywhere else in comparison. Each weight class has one all-around kart
* Thai action film star Mitr Chaibancha fell to his death from a helicopter while filming the climactic scenes in the 1970 film
* Thai Colonel Patano in "Déjà Vu". It's made clear that the only reason Harm isn't dead is that Patano never had the intention to kill him.
* Thailand has a large number of unfinished "ghost buildings"; monuments to the late 1990's Asian financial crash.
* Thailand have historically ridden elephants into battle. They are sacred animals there.
* Thailand's kings are generally seen also as religious figures, sometimes as the encarnation of the god Rama, although one of them proclaim himself to be Buddha.
* Thailog's behavior towards Elisa in his introductory episode. He touches her face and calls her "my dear" while she's handcuffed to the wall of an oil rig, and makes it clear that he intends on killing her along with Sevarius, Xanatos, and Goliath. He thinks of Goliath as one of his fathers, and
* Thailog. Thailog introduces Delilah with the phrase "She'll do anything for me", makes it clear that she and the other clones have been programmed to obey his every whim, and she calls him "master".
* Thailog was grown in a lab, but refers to Sevarius (the geneticist involved), Xanatos (the financier and mentor), and Goliath (the genetic donor) as his three fathers. He later created Delilah, who is 90% Gargoyle (on her mother, Demona's, side) and 10% human (on her mother, Elisa's, side).
* Thai myth has a lot of fantastic mix-and-match critters, including numerous winged, six-limbed vertebrates. Among them are flying kirins, winged horses, a sort of griffin called kraisorn puksa, and even flying elephants.
* Thaïs of Athens's generals) gathers a whole unit of battle elephants while campaigning in India. It never sees much action in the novel, but Thais gets to ride one in Babylon.
* Thalassa, one of Neptune's moons, was named after a goddess who was the mother of all sea life (whales included). Not quite a space whale, but possibly its
* Thalia and Nico start out as side characters, but head off in their own direction after a while. They come back occasionally, and as they
* , Thalia and Rhode accidentally walk on a rather effusive couple and Zeus's daughter finds herself explaining the birds and the bees to her younger cousin. Rhode ends up grossed. The girl later endures a more detailed explanation from

Chiron while a gleeful Mr D. basks in her horror. She swears she will never have sex ever after listening how you can catch some very nasty things.
* Thalia Grace gets put on a bus for book four after joining the Hunters of Artemis.
* Thalia Grace has a deathly fear of heights. Her father also happens to be Zeus,
* Thalia Grace was given a choice whether to bear the burden of the prophecy, she chooses to hand it off to the next in line and becomes a huntress for Artemis.
* Thalia's "I Want You", a deliberate and successful attempt at a US crossover pop hit, but generally considered a throwaway by her regular fanbase.
* Thalia's Musings a favor.) Hephaestus thinks Apollo is volunteering to help. Apollo is too nice to refuse.
* Thalia's Musings Aphrodite is acknowledged as the only goddess with the power to influence the Fates. She's very temperamental about when, how, and on whom she bestows her powers.
* Thalia's Musings. Artemis appointed herself Apollo's legal guardian.
* Thalia's Musings. But she still spends half the year with Demeter anyway.
* Thalia's Musings has this between Thalia, the Muse of Comedy, and Apollo, Governor of the Muses.
* Thalia's Musings, Hera is very fond of visiting this fate on Zeus's paramours. Io in particular was turned into a cow and then given to Thalia as a pet.
* Thalia's Musings. However, it's implied that this designation is highly relative.
* Thalia's Musings, in spite of being sought after by most of Zeus' sons.
* Thalia's Musings. It's strongly implied that Artemis, as her twin brother Apollo's legal guardian, can invoke this to him.
* Thalia's Musings, Thalia thinks Eros' disappearance will be this to Hephaestus and Aphrodite's troubled marriage. Averted when the resolution culminates in their long-overdue divorce.
* Thalia's Musings, this is Mnemosyne to the Muses, Demeter to Persephone, Hera to Hephaestus, and Zeus to Athena.
* Thalia's Musings, to Zeus' paramours, their children, and any of their sympathizers. However, her hatred toward her stepson Apollo doesn't extend to the Muses since she finds them entertaining.
* Thalia's Musings when he's showing off for Thalia. Also everyone in Olympus speculates about them.
* Thalia's Musings when Thalia gives him a talking-to about his "relationship" with Psyche.
* Thalia's Musings wrath. Thalia can't take it seriously and doubts he does, either.
* Thalia's Musings: Zeus and Hera. The Titans are beings of pure spirit who paired off and joined their life force to create the first generation of Olympian gods. Zeus and Hera, as well as Hestia, Demeter, Hades, and Poseidon, were created by Cronus and Rhea.
* "Thalidomide children" were born in early 1960s. Maybe as many as 20,000 children were born with birth defects (mostly phocomelia - a disorder which causes stunted limb growth) because their mothers had consumed thalidomide, at the time prescribed as an anti-emetic, during pregnancy.
* Thalidomide. When three German doctors created Thalidomide, they couldn't sell it because they couldn't prove its effects. They tested it on animals, but none reacted to the chemical. They gave it to one of their colleagues whose pregnant wife took it which actually helped her to sleep. Her child ended up being born without ears though and the man advised against selling the chemical. It was on market a few months later as Contergan, specifically marketed as a sleeping and relaxation drug for
* Thalion being the sindar word for "badass"): captured because he was buried under a mountain of Orcs and Trolls slain by his battle-axe. Brought before Morgoth, he taunted him (and paid the price).
* Thalis tries this in "The Slithering Shadows". Conan is embarrassed because Natala, his slave girl, is watching.
* Thallonians have the honorific "Si" (Zoran Si Verdin, Jang Si Naran, etc).

* Thallonians tend to use the honorific "Si" between their given and family names (Zoran Si Verdin, Jang Si Naran, etc). Royal Thallonian Si Cwan appears to use the honorific itself as his first name.
* Thalmor no less.) This is an in-universe insult to the Thalmor more than anything. Murdering other people comes at a much higher price.
* Thalmor, who despite having the military strength to threaten the Empire, only ever bother to send up to 3 mooks after you at a time, even though they potentially may have suffered dozens of casualties at your hands.
* Thalyssra acts as this to the Nightbourne rebellion, and becomes this to the Nightbourne after the rebellion succeeds.
* Thames Television had Kenny bursting through the opening logo. The shot was repeated in reverse for the closing logo.
* Thames Television. The 1990 Broadcasting Act which instigated the franchise round that destroyed the original Thames? That was Thatcher's not-so-subtle way of punishing Thames for broadcasting "Death on the Rock".
* Thanatos Dubaer,clinging to what was left of his life in the Shadowlands.
* Thanatos, supreme Immortal of Entropy, supposedly has similar plans for the
* Thanatos, that is, Death itself, is a minor deity. He looks like a handsome bearded man with large wings.
* th and always lose control of themselves on nights of the full moon.
* Thandie Newton after watching online videos of large African-American women beating their tiny husbands.
* Thandie Newton. Barely changes her expression whether trying to convey seduction, loyalty, betrayal, etc.
* Thandi Palane's self-styled Amazons (descendants of genetically engineered Ukranian supersoldiers) in the
* Thane. Justified, because covering up his chest will worsen his illness.
* Thane Krios and hasn't been close to anyone - friendship or otherwise - since the death of his wife.
* Thane Krios has spent the last few years killing despicable, evil people in penance for the years he spent as an assassin for first the hanar and then private individuals and organisations. He is also dying of an incurable disease. When he learns of Shepard's mission to take down the Collectors, he signs up immediately, seeing as the best thing to do with what's left of his life. This also ties into his loyalty mission, which revolves around him and Shepard preventing Thane's son from following in his father's footsteps as an assassin.
* Thane Krios, who's been working as an assassin since he was twelve. He once expresses disgust with mercenaries who 'think painted armor makes them professionals'.
* Thane mentions how his species, the lizard-like drell, were rescued from extinction via overpopulation by the jellyfish-like hanar. As thanks, the drell willingly serve the needs of any hanar out of gratitude. Comparing this to slavery is a great way to annoy the drell; Thane even gets offended when Commander Shepard says that sounds unfair, explaining that it is entirely voluntary and anyone can choose not to serve, it's just that few actually do.
* Thane mentions training as an assassin since the age of six, with his first kill taking place when he was
* Thane. The three of them are amongst the most Renegade members of Shepard's team.
* Thane when he's describing the drell race's ability to perfectly recall any memory.
* Thane will do this during his loyalty mission. He stops to pray in the middle of a well-lit street, and as he finishes the prayer, two people cross in front of him. As soon as they pass, he's
* Thankfully averted with both Chandler/Monica and Mike/Phoebe. Chandler and Monica were together for over half the series without any break ups to hook them up again, and married for the final three seasons. Phoebe and Mike got (back) together at the beginning of Season 10 and married halfway through.
* Thankfully for him he shirked it after being traded to Washington. When it came time for the Redskins to visit Philly he was treated to a standing ovation (which

definitely says something considering he was on a Division Rival's team). After retirement he's generally treated in warm regard and is considered the greatest QB in Eagles History. His questionable opinions aren't making him any fans in his NFL Analyst life though.
* Thankfully, he's court-martialed and executed for his war crimes once the situation is resolved by the protagonists.
* Thankfully in the anime adaptation, Arawn only marries the first three mentioned above. Octavia doesn't marry him because he never held her hand.
* Thankfully, most menu systems have a shortcut to skip the system and go straight to a live operator. Those include pressing a key several times (usually 0, * or #), saying "operator" or "customer service" at every recording (which may or may not work depending on your accent), staying on the line after the system recites every option (which can take a while, especially if it insists on repeating the options again and/or urging you to pick an option several times before letting you speak to an human, which can be very annoying to the very few still using a pulse-dial phone which can't work the touch-tone menu) or even sighing in exasperation in at least one system. Unfortunately, dealing with a live operator can be just as frustrating as with a menu system, since they often have to stick to a script and flowchart and/or may not even be able to help you for some nonsensical reason, and that's assuming you get a competent and compassionate operator.
* Thankfully, Mulan and company save him before Shan Yu can make him "kneel in pieces."
* thankfully she's not after you specifically but just wants her mother.
* Thankfully subverted in one of the non-plot episodes, where he's part of a baseball match between Universes 6 and 7; he's the only one on the group who knows what he's doing to the point where he takes advantage of certain situations, and even
* Thankfully subverted in the story of a pilot that never got picked up. It was about a monster who befriends children, so of course on set the children had to act opposite a green blob. They told the child actors the following:
* Thankfully, the recent recovery of the auto industry may have stopped this, or at least postponed it.
* Thankfully, the waterproofing turned out to be enough, and there was no short-out.
* Thankfully, they averted this in Season 3, and the killer was revealed (as promised) in the same season.
* Thankfully they learned their lesson by the time Lunar Knights rolled around. The Vambery is difficult and takes forever to beat, since it's a less tedious spiritual successor to the Azure Sky Tower, but the items you earn are well worth the effort.
* Thankfully, Third Edition statements seem intent on stepping away from the sins of second edition while not repeating the same things 1e did in terms of number of non-interesting or incredibly forgettable characters that both editions had. There have been a few bits released out for fiction, though if they succeeded is
* Thankfully, this has later been changed. 24 and 8 hour tiles now take... 12 hours and 4 hours. With cost of basic resources on everything going up.
* Thankfully, this issue has now been partially alleviated by the release of the 3DS port of the original game.
* Thankfully this wasn't a problem in scenes with Mildred's cat Tabby - who is meant to be difficult and afraid of flying. Still it's telling that whenever the witches were shown flying, the books' tradition of having the cats ride on the back of the brooms wasn't kept. In the one scene where it was (adapting
* Thankfully, two words can solve any planet's pirating woes: Uber Turret
* Thankfully, you can get hired as a mediator. Unless you ALSO have a high intelligence stat and low charisma / luck stats.
* Thank God You're Here (and romance novelist) addressing his unwilling prey.
* Thank God You're Here. Colin, a male, was dressed up as a heavily pregnant woman. As soon as he was forced to say something, he effected the deepest voice he could, eventually culminating in this exchange (paraphrased due to a faulty memory).

* Thank God You're Here had Wayne Knight in a hamburger costume. When asked to recite the slogan, he responded "Welcome to Big Big Burger. I'm the big Big Burger. EAT ME!"
* Thank God You're Here — sadly, the British version omitted this line from the broadcast, but the Australian version kept it intact.
* Thank God You're Here took a break for a year before bringing the show back for a fourth season.
* Thank God You're Here (which also aired versions in the USA, UK, and several other countries) tossed a celebrity into a scene that started with the title line, and provided only the set design and costume to give them any clue what their character was and what they were doing. The show was mostly improvised, with certain scripted touchpoints for the cast to hit to try to steer the scene in a particular direction.
* Thank goodness in Italian it still came off as "yippee-ki-yay, piece of shit".
* Thanking the Viewer: Because many creators and artists actually do depend on their loving fans.
* Thanking the Viewer happened to be already doing so at least a year prior, and some shows are really creative about it.
* Thanks: Burnaby is a world-traveling merchant who's been with countless women. When he meets Grammy, he wants to settle down with her.
* Thanks for the Mammary: Grabbing a woman's boob(s), usually done unintentionally.
* Thanks for the Mammary: Someone accidentally touches a woman's breast.
* Thanks for the Mammary trope. If you play with a male Shepard and conclude Miranda's loyalty mission, she will thank you while roaming her hand over your chest and copping a feel of your pecs.
* Thanks for the Memory", when Rimmer suggests an alien language consisting of breaking people's legs and completing jigsaw puzzles.
* Thanksgiving Day is given over to an all-day "Family Favorites" marathon. Films that are likely to turn up include the
* Thanksgiving Day to found Plymouth in what is today Massachusetts. They were originally planning to settle in the existing colony of Jamestown, Virginia, but were blown off course. Some of the settlers took that opportunity to create a brand new settlement instead of trying to go back to Virginia, partly so that no one would hold power over them, as documented in the Mayflower Compact.
* Thanksgiving Episode: An episode where the characters celebrate Thanksgiving.
* Thanksgiving Episode" arc where Colossus defected from the team, Wolverine had his adamantium ripped out and left the team to recuperate, and Professor Xavier was forced to psychically lobotomize Magneto. The issue gives them a much-needed break and allows them to have a peaceful holiday, and the issue ends with Scott and Jean becoming engaged.
* Thanksgiving Episode, Fonzie does the comically small prayer of "Hey God, thanks!".
* Thanksgiving Episode It's notably one of the few times Geoffrey seems genuinely afraid of Phil.
* Thanksgiving episode: Jamie claimed that his parents had separated, hoping to get himself and Vicki into a Thanksgiving ski trip for latchkey children.
* Thanksgiving Episode "name the states" game, in which he named 56 (including New England and South Oregon), and then chided Ross for making up a state (Utah) that was actually real.
* Thanksgiving Episode, Stan is shocked to discover that his half-brother, Rusty, is rich. It turns out that years ago, their grandfather died and told them to divide up his assets: $20,000 and a big chunk of land in the desert. Stan took the money, while Rusty eventually discovered that his new land was full of copper, from which he makes several million dollars per year.
* Thanksgiving Episode to get some revenge. Of course, this being a Thanksgiving episode, tables of food had been placed all around ringside...
* Thanksgiving Episode when everyone realizes what a terrible cook Amy is, they flush their food down the toilet to avoid telling her.
* Thanksgiving Episode where Frankie's family goes to spend the holiday with the

grandparents along with her sister's family Janet whose daughter is incredibly spoiled, when her favorite stuffed bear goes missing, Janet is quick to blame Brick for it, trying to prove his innocence Brick goes to gather clues which include following boot footprints with a star... which turn out to be his own.
* Thanksgiving Episode, where the aunts conjure up 17th century pilgrims to cook Thanksgiving dinner for them. Naturally they're superstitious, and one gag has them tying Salem to a stake as if they're about to burn him.
* Thanksgiving, features two detectives crouching near a decapitated body. One dips his fingers into the pool of red liquid near it, licks his fingers, and declares it to be blood.
* Thanksgiving Turkey on a Pole Match's final phase: The God-forsaken Team Challenge Series. Not exactly the way the promotion would like to be remembered. This was when Col. DeBeers of South Africa faced long-time AWA jobber Jake "The Milk Man" Milliman. The match went predictably until somehow DeBeers was distracted, felled, and Milliman went up the ladder to retrieve the turkey, win the match, and demand "It's MY turkey!!" Over... and over... and over again.
* Thanksgiving. Two detectives are kneeling over what is obviously a decapitated human body. One of them dips his finger into the pool of blood around the neck, tastes it, and grimly concludes, "It's blood."
* Thanks: Grammy talks in her sleep, which lets her family know how much they annoy her.
* Thanks in large part to how the whole series was originally conceived as "
* Thanks in part to Sam's unassuming wish, Danny ends up an Average Joe without his ghost powers until she wishes it back.
* Thanks in part to the COVID-19 pandemic and in part to Disney Channel Italy shutting down in May 2020,
* Thanks Kyubey, Madoka wonders if she should turn into a Puella Magi to help the others out in their battle against Walpurgisnacht. Homura hands her popcorn and a soda and tells her to enjoy the show.
* Thanks partially to the fact that Falena is ruled by Queens rather than Kings, many tropes are gender inverted in
* Thanks: Since the show takes place in 1621, Elizabeth's trip to the dentist is guaranteed to be painful.
* Thanks: The Winthrops are put in stocks as punishment for going to a party.
* Thanks to a case of sitcom-brain, Monica never catches on. Things then go further into the absurd when Wanda resorts to using comically under-sized household props.
* Thanks to a certain fan-artist the idea of Carmen and Valerie Frizzle from
* Thanks to a collision error, running diagonally into walls would cause the player to move insanely fast.
* Thanks to a combination of attempted clinical tone and strange or even downright silly subjects,
* Thanks to a combination of cultural, historical, and religious factors, in
* Thanks to a curse, Dawn gets to do this to Amy in the first arc of the
* Thanks to a gossipy student at his cram school, Gray earns the moniker "White Mamba" that propels his reputation into
* Thanks to all the events that have unfolded in the Cell Saga, when Future Trunks returns to his timeline to finally face his evil versions of the Android twins. It's a complete
* Thanks to all this padding and every single episode of the dub explaining the
* Thanks to American intervention, it ends with a compromise that sees Mexico divided between a Republican north and Imperial South, and Texas divided between an independent east and a west that stays in Mexico as part of the new republic.
* Thanks to an inaccurate description given by a 19th-Century English source, the Italian card game
* Thanks to a ridiculously light course load that was scattered all over the place, it takes eight and a half years for Dauber of
* Thanks to a screw job finish, The Spider Lady became one. Originally managed by the Fabulous Moolah, Moolah would take the Spider Lady's mask after her "charge"

failed to defeat Wendi Richter and "won" the belt from Richter herself, after which an incensed Richter, who had kicked out at one, unmasked Moolah. The original Spider Lady faded into obscurity and
* Thanks to a sketch in which Crow played Art Garfunkel, a young girl who wrote into the show thought that Crow's name was Art. This later became a running gag when Pearl Forrester became a regular character and repeatedly called Crow "Art".
* Thanks to a very recent bit of recycling, Chris Jericho can now count himself part of this list. Back in early 1998, when he was still part of (and, as legend states, rather disgruntled with) WCW, he showed up with
* Thanks to both the versatile costume creator and the equally versatile power system of
* Thanks to centuries of senseless warfare, Mandalore has been turned into a barren desert outside of several artificial bio-domes. This also resulted in the
* Thanks to Cocoa's influence, Chino gets afflicted by this in episode 10, when she notices some rabbits while she's headed towards the bathhouse with Rize, Megu, and Maya.
* Thanks to consumer psychology, people who consume bad-tasting medicine are not only more likely to believe that it's working, but actually have their conditions improve.
* Thanks to daddy's influence, Snowe Vingerhut gets a squad of his own right after graduating the Gaien Marine Knights Academy in
* Thanks to Emman sharing ideas and stuff about them (like a hypothetical
* Thanks to genetic testing and other newer techniques (and are closest to the common ancestor of bears, raccoons, weasels and skunks).
* Thanks to having a song at the end of almost every episode (and a few songs within episodes) in
* Thanks to him, Calvin learns about the world only turning color in the 1930s (and pretty grainy color for a while, too), the sun setting every night in Flagstaff, Arizona (
* Thanks to his extensive knowledge of Yeongdeungpo's gangs, Eugene is able to accurately predict their future movements. He first shows off this ability after Ben's gang defeats Jimmy Bae, and he assumes correctly that Jimmy won't mount a counterattack.
* Thanks to his mutation, Professor Charles Xavier is capable of mental communication in
* Thanks to his poor poor Cantonese, James Carter invites two girls to get naked and sacrifice a small goat instead of having a drink. He also tells
* Thanks to his position of power, Wild held a virtual monopoly on crime in London. Legends arose surrounding the management of his "empire." Some said that he kept records of all thieves in his employ, and when they had outlived their usefulness, Wild sold them to the gallows for the £40 reward. This supposed system inspired a fake or folk etymology of the phrase "double cross." It is alleged that, when a thief vexed Wild in some way, he put a cross by the thief's name; a second cross condemned the man to be sold to the Crown for hanging (this fabulous story is contradicted by the fact that the noun "double cross" did not enter English usage until 1834).
* Thanks to his total lack of control over his magic in the first season of
* Thanks to his voice actor Bobby Gaylor) has a crush on Candace (15). As evidenced by his sneaking his number into her cellphone, and being very upset when she won't abide by the Bully Code and serve him for his having saved her life. This might also explain why he refused to let Candace and Jeremy into the restaurant in "Chez Platypus"; he wanted to ruin their date out of jealousy.
* Thanks to in the continental United States that doesn't break up for petty reasons and in fact has become more common for long-lasting tag teams to be formed out of rivals who have feuded with each other so long it has gotten old or have put aside their differences to show how much these particular tag team title belts are really worth.
* Thanks to its classic Japanese adaptation and reasonably popular American remake,

* Thanks to its recent public domain status, you can now read all of
* Thanks to its 'Scottish legend' backdrop, almost every adult male character in
* Thanks to its unique combination of being far too populous and too far away from traditional trade routes, Japan could benefit from this trope without being conquered by a Western nation (the usual result for non-Westerners when better armed Westerners showed up). It happened twice:
* thanks to it surviving as a sports anthem and appearing in various soundtracks.
* Thanks to Jennings when Atkinson's grandmother, ignorant of the rules, gives him a guinea pig. Mr Wilkins has to look after it until she returns to collect it, but when the animal gets loose, Jennings finds it and feels obliged to keep it secret.
* Thanks to Licht performing Forbidden Magic using the magic stones, the reincarnated elves in
* Thanks to magical precautions, Loki can survive decapitation, and his body can pick up his head and reattach it. At the climax of one arc, an empowered Thor inflicts this on Loki by ripping his head off and magically keeping him alive, forced to watch the conclusion of Ragnarok.
* Thanks to many world tours and live concerts made together, together with similar sounding music,
* Thanks to matter-manipulation nanotechnology, instant delivery is a common feature of life in Warren Ellis's
* Thanks to mitigating factors including a shorter time frame and the cooler waters of the English Channel, a Sherman tank known to have fallen into the ocean during the D-Day invasion was salvaged for the 50th-anniversary commemoration. It cleaned up nicely enough to fire live rounds. For "decades of seawater" levels of "clean-up".
* Thanks to modern computer technology, any room with a projector can quickly feature one of these (meaning that this is one trope you
* Thanks to multiple universes, this isn't as big a deal as in other franchises. In-universe, the process of reformatting (where a Transformer gets a brand new body, usually due to severe injury) or upgrading can result in this. For example, in
* Thanks to Newton's laws, it's been argued that any kind of drive powerful enough to accelerate a large ship to appreciable speeds would make a phenomenal weapon against said ship's enemies.
* Thanks to Newton's Laws, this can even be a problem when running unassisted. While you're unlikely to go flying off a ledge, it does take a few feet for the body to "backpedal" enough to come to a stop. Everyone has run into at least one wall because they stopped or turned too late. Something a lot of sports teach players is avoiding this trope. It's usually much better to be fast and maneuverable than too fast and stopping to turn.
* Thanks to people who spent their time figuring this out, there's a not-so-obvious
* Thanks to several millennia of cumulative augmentation, Belisarius Cawl, Archmagos Dominus of the Adeptus Mechanicus, is positively monstrous in size, dwarfing even Primarchs and comparable only to some of the larger walkers and Carnifex-type beasts. He's not quite in charge of
* Thanks to Shark's Shark deck, Shark cards have become an actual archetype. Shark decks are pretty offensive and they are capable of Xyz Summoning Xyz Shark monsters:
* Thanks to some help from Sonic, Vector finds the real culprit — his manager, who had set the whole thing up for ratings.
* Thanks to some of the more questionable ethics of mankind, this trope is at least
* Thanks to strange game mechanics, any NPC wearing a royal ring from the first Sburb session gets a whole host of awesome powers, including flight and some wings. Flight in general is unrelated to wings, they're mostly there for flavour or mandatory part of a transformation.
* Thanks to stringent emissions laws, non-domestic pickup trucks and other large-bodied vehicles are practically nonexistent in Japan. While the laws don't

necessarily "ban" imported trucks outright, the tight regulations have caused many American companies whom are primarily known for their large pickup trucks and V8 muscle cars, such as Ford and Chevrolet, to withdraw completely from the country.
* Thanks to the actions of his brother and mother, Tommen is forced to deal with hatred and insults despite having done nothing wrong personally.
* Thanks to the advent of drones, shots that would have required renting a crane or even a helicopter can be had for the cost of buying said drone (which you can then keep using indefinitely on future projects) and hiring someone who's good at using it. They can also be used in place of rigs and dollies for ground-level tracking shots, particularly over rough outdoor terrain.
* Thanks to the Akatsuki's attempt to remove the Nine-Tails, the Fox ends up merging with Naruto instead. The result? Naruto is now has the abilities of his four tails cloak all the time, without the drawbacks.
* Thanks to the almost infinite customization of its avatars, it's not uncommon to see a wide disparity in heights between male and female "partners" in the online world
* Thanks to the approximately-2010 economic recession (combined with a strong lack of morals,) some morticians have developed a new form of grave robbing: Cremating blocks of wood or burying 150 pounds of concrete or garbage, leaving the real bodies to rot in a storage shed, and charging the surviving family members for services rendered. The fires used to incinerate wood (or garbage) aren't nearly as hot as crematorium fires (a few hundred degrees versus a few thousand—thus much, much cheaper to run).
* Thanks to the Community Care Act (1990) in the UK, there are still a number of old abandoned mental hospitals, in various states of decay. Unsurprisingly developers have been less than keen to move in.
* Thanks to the crown messing up his memory, Ice King is ignorant of the
* Thanks to the epic remixes of the song "O Fortuna" (despite that it's not actually a video game song outside of
* Thanks to the fact that the canon characters are largely skeleton characters made of tropes specifically to give the fan fic writers more latitude,
* Thanks to the game's ability to play music both in and out of vehicles,
* Thanks to the game's control system, which is designed for stealthy motion rather than battle, Snake is awkward in a fight. However, he does things he could
* Thanks to the hilariously bad voice acting as well as some of the cutscenes,
* Thanks to the human brain's predisposition for seeing patterns, it's not uncommon to notice this in your own life. Usually,
* Thanks to the invention of butter-flavored oil as an alternative to the real thing, the most expensive component of a bucket of movie-theater popcorn is, in fact, the paper bucket. Using actual butter would jack up the price considerably.
* Thanks to their fluffy faces and squinty eyes, tibetan sand foxes appear to have a sullen, judgmental expression.
* Thanks to the lack of stage directions, the play is left open to a good bit of alternate interpretations. Many productions try to soften the blow by having Kate deliver the final speech in a sarcastic way, indicating that it's not to be taken seriously. The
* Thanks to the limited casting and special effects budget (as well as contract and scheduling stuff), none of
* Thanks to the Mega-Damage combat system, those chainsaws CAN slice through a tank. The fact that the preferred model among Juicers has teeth virtually honed to the molecule, and that your average Juicer can bench press a grown bull, may be a factor in this as well. Anti-tank chainsaws wielded by suicidal-steroid-freak-supersoldiers are not among the top
* Thanks to the nature of the war in the Middle East (no front lines, inspections of civilians and civilian properties), more women than ever were involved in fighting and combat. See this
* Thanks to the new equipment modding and settlement construction systems in
* Thanks to the other characters, the "Bad Boys Love" route, and the sequel
* Thanks to the programs "Garry's Mod" and "Source Filmmaker" people can now make

short films starring the various characters from Valve video games. Some of these are VERY deranged indeed. Some creators famous (or infamous) for this are the likes of
* Thanks to the proliferation of creature templates in 3rd edition, it was possible to start with a half-orc or half-elf character and slap on template after template, including half-dragon, half-fiend, half-celestial, half-elemental, and half-troll, to get an impossibly mixed up character with incredible powers (
* thanks to the protagonist's unique genetic structure due to gene therapy experiments performed on him when he was a baby
* Thanks to the ruling regarding the World Wide Fund for Nature, the WWE had to retcon
* Thanks to the state of international relations at the time, episodes set in the USSR used Stock Footage from a friendlier time in their
* thanks to the team's own inconsistencies. This included the beginning of an 85 game unbeaten run from 1978 to 1981 which was only eclipsed by Chelsea 25 years later. While it hasn't reached that level since, the current Liverpool side went the entire 2017-2018 season unbeaten at home. It's most famous for its iconic home stand, the Kop, which is usually the noisiest part of the ground and gives its name to Liverpool fans, who are usually referred to as 'Kopites'. The power of the Kop was perhaps most aptly summed up in 2018 by Thomas Tuchel, whose star-studded PSG team had just lost 3-2, a scoreline that was much closer than the match itself. Tuchel, who'd also lost two years before when his similarly star-studded Borussia Dortmund came up against Liverpool, who recovered from 2-0 and 3-1 down to win 4-3, simply said after the defeat: "This is Anfield. This is what they do."
* Thanks to the thousands of loose threads the franchise has supposed to kill everybody in its storyline, and its author even made a few parts of a multi-part Flash movie depicting Zero's rampage; the term the comic used for this event, the Cataclysm, is now universal.
* Thanks to the timebending properties of the Trolls' chat client, this is practically guaranteed in any conversation between the Trolls and Kids, or in the Trolls' memos.
* Thanks to this image) is giving Zelda/Samus a run for its money as the most popular femslash ship in the fandom.
* Thanks to time travel, father and son Otoya and Wataru meet when they are 23 and 18 years old respectively. In the finale,
* thanks to. Until that movie, it was a relatively unknown boys' name.
* Thanks to various versions of "Do You Want to Build a Snowman?"—namely, both
* Thanks to Varric's "Tale of the Champion" novel and other fictional tales, Hawke has the reputation of being perhaps the greatest fighter of their time, and became the
* , thanks to which, experienced players can predict fairly accurately what topics will come up and study accordingly. Probably most of the points good players accumulate are the result of targeted accumulation.
* Thanks to your inventions (steamboats, gas lamps, single-shot riffles, ect), Greece in “The Winged Victory” can be considered this.
* thank were just a marriage of political convenience. The Queen did, however, have a thing on the side with Snively, and while each seemed to be using each other to advance their positions in Eggman's empire, there was also clearly some genuine affection there.
* Thank You and his body collapses on Glenn and they both fall into the horde and the horde starts picking apart their bodies but it's unknown whose body is getting torn apart. Revealed four episodes later to have been Nicholas.
* "Thank You for Being a Friend", the 1978 hit that became especially popular once used as the theme song for
* "Thank You For Being a Friend" was a hit for Andrew Gold in 1978. However, the song is better remembered as the theme tune to
* "Thank You For Being You" is best known for its appearance on not one, but two
* "Thank You For Being You" was written for the first season finale of the

Canadian-American series
* Thank you for coming back for me, my love. You will be mine forever."
* Thank You for Smoking, a group of anti-tobacco activists kidnap tobacco industry spokesperson Nick Naylor and attempt to kill him with a lethal dose of nicotine (by covering him from head to foot in nicotine patches). Later, his doctor tells him that he only survived because of his years of smoking, but if he ever smokes again, he could die because of the damage from the overdose.
* Thank You for Smoking. Celebrities are perfectly willing to shill for cigarettes in overseas markets, just not at home where they've got a reputation to maintain.
* Thank You for Smoking has a terribly funny derogatory caption when the boss says the word "environmentalist".
* Thank You for Smoking having sex in zero gravity in the far future with Brad blowing smoke rings over Catherine's naked body as the cosmos flies by.
* Thank You for Smoking, including Nick Naylor, Heather Holloway, and Lorne Lutch.
* Thank You for Smoking is a satire of the tobacco industry. Combines Juvenalian and Horatian techniques to great comic effect.
* Thank You for Smoking loves Japanese decorations; he has a koi pond, a rock garden, Japanese art, and wears a kimono in his off-time.
* Thank You for Smoking message. It becomes all the more hilarious if you realize that those cartoons were made for an adult audience.
* Thank You for Smoking, Nick hits upon his strategy for the congressional hearing while watching Bobby eat apple pie covered with cheese.
* Thank You for Smoking: Nick Naylor is a lobbyist for tobacco companies and invokes the trope by name in the movie (and the book?). He even associates with similar lobbyists (NRA and the alcohol lobbies) and discusses strategies and a viewer can tell that these people take pride in their work (at one point they're deeply insulted when Nick declares that only he would be hunted down by vigilantes for what he does). Later on, the Marlboro Man calls him out on it:
* Thank You for Smoking, there are plans to incorporate this trope into a movie. Along with cigarettes, of course.
* Thank You for Smoking: When Nick inquires about a reporter from the Washington Probe during his weekly "Merchants of Death" dinner, Bobby pointedly mentions that "she has world-class tits".
* Thank You for Smoking when the protagonist demonstrates this as a debate strategy to his son, using a comparison of ice cream flavors as an example.
* Thank You for the Love by Yulia Voznesenskaya, Victor is afraid of getting murdered (by one of his three exes or their partners), and he steals Georgy's gun, it's implied, for self-defence. He ends up shooting himself as he realises what a mess his life is. There is another factor that leads to Georgy getting suspected: Victor is naturally left-handed but learned to use his right hand for most tasks and is believed to be right-handed by most of his acquaintances, so when the wound is revealed to have been inflicted by a left-handed person, at first people don’t realise Victor could have done it himself.
* Thank You: Initially, Aizawa put Midoriya's and Yaoyorozu's rooms in the dormitory as distant as possible. Mina persuades him to put them on the same floor by offering him a new sleeping bag.
* "Thank You" is the first major example of the show doing this, taking the
* Thank You, Miss Doover, the boy, as it turns out, used his stationary to housebreak his dog.
* Thank Your Lucky Stars and Sydney Greenstreet send a soldier packing by asking if they would join them outside for a moment, before Lorre laments:
* Thank Your Prey: A character thanks or apologises to an animal he eats.
* Thank Your Prey: When the hero shows respect towards an animal they've killed for giving them sustenance.
* Thannagarian ship. The button turns out to be the "fire" button for the ship's armaments, which leads to a rather large hole in Wayne Manor that Alfred happened to be behind.
* Thanors have literal kill switches installed behind their ears and are seen using them in some episodes.

* Thanos actually finds himself struck by the sheer evil of Darkseid.
* Thanos (also known as The Mad Titan), who's been bald and obsessed with Death since he was a little kid.
* Thanos and Doctor Strange's conversation on Titan, shortly before their big battle, where the two of them discuss Thanos' past and motivations in an
* Thanos and Gamora. Thanos raised a daughter from childhood to have a perfect assassin. As a subversion he did try to otherwise be a decent father to her, though she rebelled anyway.
* Thanos and is one of the most powerful and dangerous villains of the Marvel Universe.
* Thanos and wipes out half of all life in the universe, solely to impress her. When she continues to turn her back on him, he gets angry that she's not giving him what he "deserves".
* Thanos Annual, and murdered an alien species' "god" and destroyed their afterlife because he "was curious".
* Thanos. As long as Deadpool lives, he wouldn't be able to interfere with Thanos.
* Thanos born with an appearance similar to that of the monstrous Deviants. That same mutation is also why he is considerably more powerful than the average Titanian Eternal.
* Thanos, both of whom played key roles in the villain's downfall in the original story. Instead, it is Kronos, Thanos' own grandfather, who ultimately defeats him.
* Thanos, by the way) making out on his throne, and Deadpool takes him out with one shot from a pistol.
* Thanos enters the picture and succeeded in winning her affection, in a fit of jealous rage Thanos cursed Wade to never die so he could keep him away from his beloved.
* Thanos flings a moon at Darkseid that ultimately sends him into the sun. Not one to leave things to chance, Thanos then uses the Infinity Gauntlet to turn the sun into a
* Thanos from interfering with him in the storyline that introduced him back in the 1970s.
* Thanos gives one of these to Adam Warlock's friend Pip right before he kills him.
* Thanos. He doesn't bother to tell them when he decided that nihilism wasn't working for him anymore.
* Thanos. His father A'Lars stopped her because he saw great potential in Thanos as an Eternal Deviant mutant. Unfortunately for the universe, both of Thanos' parents were right about him.
* Thanos. However, the relationship with Nebula is better, given in the film, she's one of his "daughters" and in the comics, he turned her into a corpse-like vegetable just for claiming to be his granddaughter. Then the sequel plays it straight when Nebula reveals that Thanos made her and Gamora fight, and would forcibly replace part of the loser's body with cybernetics supposedly to make her stronger. Nebula always lost, hence her unquenchable hatred for Thanos in the films (and to a lesser extent her hatred for Gamora).
* Thanos in his own right. The two cosmic beings have each been around for (in our time) decades, and have been directly battled only a handful of times.
* Thanos in return for him helping her take back her kingdom, upon which the two shared a passionate embrace. Writer Jason Aaron has promised that we will see more of them getting up to no good together in the future.
* Thanos is left to scrabble together a living in the ruins of Titan, eating vermin just to survive and getting his ass kicked by other scavengers, people who he once could have killed without even noticing.
* Thanos is one of Marvel’s most popular villains. He may be an insane and omnicidal maniac but he has such charmisa and he’s so powerful and intelligent that fans can’t help but love him for it. Some even root for him against the heroes. Speaking of which, Thanos was able to defeat powerful heroes like Captain America and Hulk as if they were ants. That’s how strong he is.
* Thanos is stronger and bigger with the build of a giant and is consider the greatest threat in the Marvel universe.

* Thanos is subject to this a lot; whomever he hires fails to deliver the Infinity Stones to him. After Ronan the Accuser betrayed him
* Thanos is this to the Black Order whom he outright calls his “children” and they in turn call him “father” and determinedly
* Thanos is treated is the biggest and the baddest example of this in the setting, a fully-fledged cosmic horror - Doctor Strange's entire multi-millennia scale time-travelling
* Thanos it in a dialogue with She-Hulk, explaining that Thanos himself helped the Avengers to defeat him in previous battles.
* Thanos. Joe Russo is also in this scene and has a bit speaking part.
* Thanos; just to see what would happen if the universal balance was completely thrown off-kilter.
* Thanos killing his host, leaving the revived Thanos mentally impaired.
* Thanos lookalikes are often used in the same manner. After Squirrel Girl (hilariously) defeats him and Uatu states that it is definitely the real Thanos, it's later revealed that Thanos can create lookalikes which can fool even Uatu. Or so he claims.
* Thanos — the curse only won out because that was Thanos's original intention.
* Thanos, Mistress Death. Specifically, he created a space ship using some of the infinity gems that was capable of destroying stars and started cruising around doing just that but didn't get too far.
* Thanos of Titan has had three "Space Thrones" made, each capable of generating a powerful, nearly impenetrable forcefield, energy-beam weapons capable of automatic targeting and firing, a teleportational device, a tractor beam emitter, and engines capable of transporting the craft through separate dimensions and realities, powerful sensor arrays, and an advanced computer system.
* Thanos of Titan, who is an eternal but had the latent Deviant gene. His brother is handsome and the demigod of love, while Thanos is monstrous, with purple skin, black eyes and a wrinkled chin and completely evil.
* Thanos only having two of the Infinity Stones on him no matter where he was to obfuscate the chronology of scenes.
* Thanos' reaction as he sees his own heart being torn out by Drax the Destroyer?
* Thanos resorts to torture in order to get Gamora to reveal the location of Soul Stone. However, since he is unwilling to hurt his favorite adopted daughter, Thanos instead decides to torture his other adopted daughter Nebula by pulling apart her cybernetics and living tissue as Gamora is
* Thanos Rising: According to Death, Thanos frequently has sex with female aliens in his quarters before murdering them, but then continues talking to their corpses as if they were alive. His crew members think he's quite mad.
* Thanos Rising: After denying Thanos for many years, Death finally embraces and kisses Thanos after he starts believing that she's just a figment of his imagination after all.
* Thanos Rising: Thanos kidnaps and vivisects his mother Sui-San to find out how she could have brought someone as evil as him into the world. However, when he returns years later to wipe out the rest of his people, he leaves his father Mentor alive just so he can be witness to his son's continued atrocities.
* Thanos Rising: Thanos visits his mother's grave on Titan in the opening. Not because he had any real affection for her (being the one responsible for her death), more for ritualistic reasons and to understand his own destiny.
* Thanos Rising where a Skrull shapeshifter is shown being touted as a sex slave.
* Thanos Rising whether this was truly Death or a figment of his imagination.
* Thanos's applications of the Reality Stone are uncharacteristically whimsical; he turns weapons into harmless bubbles, comes up with cartoonish ways to non-lethally incapacitate the Guardians, and conjures an illusion of The Collector who behaves just as flamboyantly as the real thing — all of this alongside the genuine horror Thanos tends to unleash.
* Thanos spinoff, given that his presence has already been felt via his minions, in both the Klingon and Romulan storylines, but he's currently occupied in his own

fiefdom on the other side of the galaxy.
* Thanos. The catch? Thanos's love interest, Death, is herself in love with Deadpool and the feeling is mutual. By keeping Deadpool alive indefinitely, he won't be able to cockblock Thanos.
* Thanos tortures Thor by slowly burning him with the Power Stone to make his brother Loki reveal the Tesseract.
* Thanos ultimately sues the organizers for the loss of most of the Infinity Gems over the course of the third Rumble.
* Thanos until he reaches Death, and hence, relief and rest from life's burdens. Some say this is Starlin's best work.
* THANOS) who manipulated him into doing things that lead him to become evil.
* Thanos, with the book promising to explore the villain's origins ahead of the movie. After the promotional blurb made its way online, Marvel suddenly tried to backtrack and claim the book was non-canon, presumably because the promo accidentally spoiled the film's ending:
* than whatever his young son is trying to draw his attention towards.
* Tharg's Future Shocks an American actor sees a vision of his death: Being hit on the street by a characteristic yellow New York taxi cab. In an effort to avoid this fate, the actor moves to Great Britain and manages to continue his successful acting career there. Some time later he's acting in a movie which takes place in New York but is filmed locally, so the studio has built a reproduction of a New York street, and the production also involves a yellow taxi cab. I'm sure you can guess what happens next.
* Tharg's Future Shocks: A scientist who is made into a laughing stock by his jealous rival decides to prove his naysayers wrong by inventing cryonic suspension, then putting himself to sleep for twenty years. It turns out that during this time people tore down his laboratorium and put an apartment building on top of it, so he's forced to go into suspension again, waking up after another forty years when the building is gone. When he tries to claim credit for inventing cryonic suspension, he's told that it was invented fifty-five years ago—by his rival.
* Tharg's Future Shocks believing in them. Reality proceeds to fall apart as he begins to question the laws of nature, such as gravity.
* Tharg's Future Shocks is more common. Some of the more interesting ones include:
* Tharg's Future Shocks supervillains are all in the same union and stage their battles to ensure that they always have work. The villain he defeats is pissy over having to work with "scabs".
* Tharizdun (mentioned above under Greyhawk) has gradually evolved to be a
* Tharja has her arms fused with cape, spandex combining with skin, and mask grafted into face. Because of the first point, she also has to levitate her staff. Her outfit is also predominantly
* Tharja, Olivia, and Kjelle are all dwarfed by the Avatar in their confessions as well, especially the latter two who almost qualify for
* Tharja's daughter he agrees to go out in a date with her to taste her cakes.
* Tharks isn't shown much, although he easily breaks through the first chains that the Tharks put him in. They put him in heavier chains and attach them to a huge rock. Carter manages to throw the rock. He also kills a Thark with a single punch.
* Tharquin's Shapeshifters, like when Tharquin ocassionally lets one of his victims live to give people a reason to keep supporting him. Tharquin kills that man as a result.
* Thassilon, and subjects for their magical experiments. The Thassilonians are also responsible for creating many, if not most, of the modern giant varieties — they originally enslaved the tribal stone and taiga giants, many of whom were warped with magic to become the ancestors of fire, frost, storm and cloud giants, among many others. Fire giants were further bred with other giant varieties to produce more specialized types, such as with stone giants to create slag giants and with taiga giants to create the enormous rune giants, who were slave overseers for Thassilon and still retain the ability to magically enslave other giants.
* Thassilon, founded by Azlanti secessionists, was itself a massive empire with incredible magic, but was brought low during the same meteor impact that

annihilated Azlant.
* Thassilon to control enslaved giants, and can magically turn any giant they meet into a mind-controlled slave, which they do often and with relish. When rune giants turn up, even the most fearsome and bellicose giants quietly pack up, leave and flee as far as they can.
* That 70's Episode by Prue, who rhetorically asks, "Why am I not surprised that you know how to do this?"
* That '70s Show about what sort of "gift" Donna might give him for his birthday, only to wake up to family yelling "Surprise!" and serving him breakfast in bed. His parents don't seem to notice how embarrassed he is, but his sister Laurie snarks "Nice tent" before following them out of the room.
* That '70s Show: According to Red Forman, this is one of three times it was okay for a man to tell another man he loved him. The other two were if they were drunk, or one of them was in big trouble and it was the only way out, which usually means he's drunk. Otherwise, it's just a given.
* That '70s Show, a cheerleader keeps calling Eric "Uh-bluh" because years ago, that's how he responded when she asked his name.
* That '70s Show actually scores! Hell freezes over! A monkey types Hamlet!"
* That '70s Show, after Donna changes her hair from red to blonde, and he disapproves.
* That '70s Show after Fez says that he wishes that he was like Scooby-Doo.
* That '70s Show, after marrying Fez, refuses to sleep with him. She'll sleep with everyone else during this time and he calls her out on it. Ironically enough, she did sleep with him once and only once, before they married.
* That '70s Show: After season six, Laurie Forman is never seen on-screen again but is mentioned in passing many times over the next two seasons. These range from explaining what she's doing at that point in time (such as moving to Canada), to her past in Point Place (such as who her godparents are). Laurie's last screen reference is in the finale, where Kitty, after stating heartfelt reasons why she loves everyone in the room, including telling Donna that she loves her like a daughter, asks "Speaking of daughters... has anyone seen Laurie?" prompting a long laugh from the studio audience.
* That '70s Show. After the theme tune, someone shouts "Hello Wisconsin!", the state the show takes place in.
* That '70s Show album had backmasked "Devil love me...Devil lives! It's clear as day!". Fez noted that in his language the message said:
* That '70s Show: An episode features three of the characters acting out an imaginary Three Stooges short called "Pie Guys".
* That '70s Show, a nervous Eric says to Donna, "I love you… man." Thus spoiling the first three words.
* That '70s Show are a prime example of this. Aging 60's hippie meets teenage burnout.
* That '70s Show as a clue to his origins. His nickname is actually a (quasi-)acronym, short for "Foreign Exchange Student." Complicating matters further, a fellow countryman visited in one episode, played by a white actor with an exaggerated English accent and when asked where they were from, they stated "It depends on whether you ask the British or the Dutch," which would imply it's somewhere in Europe.
* That '70s Show. Ashton Kutcher is 6'2"; Mila Kunis is 5'3" as an adult, and she was just 14 when the show started.
* That '70s Show. Aside from an open ending of the Kelso-Jackie-Hyde love triangle storyline, there was nothing more to add to the story. The open ending was clearly tacked on after it was known the series was renewed. Jackie and Hyde's relationship had already had its ups and downs, and they were resolved... only to be thrown more obstacles at the tail end to provide material for new episodes.
* That '70s Show (at least, this particular feature is cheesy) will answer the question "What time is it?" by announcing that "It's always fun o'clock." And breaking into song.
* That '70s Show. At the start of an episode, Kelso gets a ticket from a beautiful

female cop who wore her hair down. Later that same episode, he meets the same female cop, this time with her hair in a tight bun, and does not recognize her at all. (Averted somewhat however, as he attributes her previous sexiness to the uniform instead of her hair).
* That '70s Show because his family needs the extra money, but quits because he doesn't get to spend much time with his girlfriend.
* That '70s Show: Bob Pinciotti not only started the series with a hot wife (played by Tanya Roberts), but also had a romance with Jackie's mother (played by Brooke Shields). At some point he even was seeing both of them at the same time. It's even lamp-shaded when he hooks up with Shields. The boys realize Bob's track record with smoking hotties that should be way out of his league and gain a newfound respect for him.
* That '70s Show, but everyone just kept referring to it as "that '70s show" and the title stuck.
* That '70s Show, but has a voice that will set your teeth on edge, especially when she's annoyed. Which is often. She once describes herself as "a beautiful girl with a shrill, demanding voice".
* That '70s Show), but he and his friends are quite shocked to find he's just picked on a black belt.
* That '70s Show "Can't You Hear Me Knocking": Kelso accidentally threatens the president and the gang start to believe that everything is the Feds coming to arrest them. Even a car parking outside the house.
* That '70s Show definitely qualifies: he has been caught peeping onto characters having sex many, many times, but nobody seems to dislike him for it.
* That '70s Show doing it. Red justifies it by saying that it's okay because it was funny.
* That '70s Show: Donna chooses the nerdy, sweet childhood friend Eric (Gentleman) over the rebellious, tough Hyde (Scoundrel).
* That '70s Show, Donna rigs a call in contest to get Led Zeppelin tickets. She wants to take Eric but he has to work. As such, Hyde, Kelso and Jackie hound her for the other ticket. Donna becomes so fed up she gives both tickets to Fez and his crush Caroline.
* That '70s Show (Donna) talked alone had either to portray them sitting, or to have Mila wearing platform heels. Not quite a box, but very close.
* That '70s Show: Donna tells Eric to hide in the woods so he can jump out at the end of a ghost story she is going to tell.
* That '70s Show Donna throws open the door and when she incredulously asks if he just kicked her door, he denies it, despite the damning evidence of his shoeprint on the door.
* That '70s Show drank a Long Island Iced Tea thinking it was non-alcoholic.
* That '70s Show, due to the raging hormones brought on by her menopause, Kitty takes this tactic to handling an uncooperative television clicker.
* That '70s Show during the awkward times). They both laugh at his fantasy sequence, and he eventually accepts how ridiculous he's being. Then the stinger is the two women going through a photo album, discussing all the embarrassing pictures of Eric.
* That '70s Show ended this way for Eric and Donna. Although they had been the show's primary couple for the first seven seasons (sans Season 4), Eric left the cast in Season 8, and they broke up offscreen. He returned for the finale, but his scenes with Donna did not make it clear whether they were reconciling or not.
* That '70s Show episode about Jackie's lodge, Kitty and Red walk in on Eric and Donna doing the horizontal tango on the kitchen table. The next scene shows Kitty and Red scrubbing the table furiously to cleanse it, eventually deciding that it would just be best to get a new table.
* That '70s Show episode "Bye-Bye Basement". Fez walks in wearing a puffy shirt, and Kelso tries to make fun of him, but isn't very successful.
* That '70s Show episode "Canadian Road Trip" begins with Eric inviting Hyde, Leo, and Fez to buy beer in Canada, and bluntly telling Kelso he can't go with them. When Kelso asks why, Eric says because when they tried to do this prank on a

teacher, Kelso lit the bag on the way over, and stomped it out in the car. Eric only changes his mind when Kelso offers to pay for the beer.
* That '70s Show episode "Cat Fight Club" Jackie gets fed up with Laurie's insults and starts a fight with her. Fez suggests they should pour water on them.
* That '70s Show episode, Eric's Guardian Angel(played by Wayne Knight) shows Eric what his future would be like if he had never dated Donna. In said future, he actually ends up losing his virginity to Big Rhonda. Bob and Pam might also count. Bob is by no means small, but Pam towers over him.
* That '70s Show episode "Eric's Hot Cousin", where Donna and Jackie are talking about the title character:
* That '70s Show episode "Halloween," the gang breaks into their old elementary school, which burned down years before for some Halloween hijinks. Just as they decide to leave becuase they're not having any fun, Jackie and Donna come in with their old permanent records. When they look into Hyde's file, it says that he's a born criminal with no future because he smashed a girl's diorama, which he denies doing. Eric then confeses that he smashed the dioram because he was jealous of how much better hers was. Hyde then starts blaming Eric for how he has been treated by everyone, saying that he was pegged as a troublemaker because Eric just stood by while their teacher yelled at him for something he didn't do.
* That '70s Show episode "Happy Jack". Obviously, the culprit is Eric, but when Donna tells him to do it where he won't get caught, her explanation is so detailed that he realizes she does it too!
* That '70s Show episode "Ice Shack", when Kelso is trying to impress Jackie and get back together with her, Eric and Donna deliberately demonstrate this to give Kelso an idea. However, when Jackie immediately replies, "I'm cold, too," Kelso completely misses the point and replies, "Well, Jackie, I can't control the weather!" Fez is happy to oblige.
* That '70s Show episode, Kelso says in his sleep "This isn't gonna work, Jackie". Jackie spends the rest of the episode trying to get him to fall asleep again, so she can find out what he meant.
* That '70s Show episode makes it a little more complicated, revealing that Hyde would have started dating Donna if Eric hadn't kissed her at the end of the first episode.
* That '70s Show episode "Prank Day" Eric tries to do this to Kelso, using a bucket filled with oatmeal. The bucket falls on Red instead.
* That '70s Show episode "Red Sees Red", Kelso and Donna have to hide under a bed:
* That '70s Show episode "The Magic Bus", Hyde shoves cake into Jackie's mouth to stop her from revealing what his nickname is for her.
* That '70s Show episode "The Relapse" after her mother leaves, Donna is distraught and ends up having sex with her ex-boyfriend, Eric. Eric believes that this means that they're back together, and is quite upset when he learns that it doesn't.
* That '70s Show episode "The Third Wheel", Eric and Hyde both storm out of a bowling alley after a fight, then return to take off their bowling shoes.
* That '70s Show episode when she find out that Hyde has potential, judging by his SAT score. "Now we don't have to be poor!" After, Hyde remarks "Was there a string quartet? If we're rich, we're getting Led Zepplin or something" and Fez complaining about always being the butler/servant in their fantasies.
* That '70s Show episode "Who Wants It More", Kelso has his UFO pictures developed, only for his friends to find out later that there were naked pictures of him on the same roll. Fez's response:
* That '70s Show, Eric accidentally ran over Donna's cat and didn't tell her right away, on the same episode Jackie found out Kelso was cheating on her with Laurie. Donna thought Eric's deception was as bad as Kelso's, Jackie was quick to point out that it wasn't.
* That '70s Show. Eric and Hyde are just as bad as well with the former often wanting to have sex with Donna, even at the most inappropriate time such as next to a feminist rally.
* That '70s Show. Eric and Hyde proceed to mock him about, which Fez chatises them for. Then we get this gem from him:

* That '70s Show Eric calls out his paternal grandmother for being openly mean and nasty to his mom Kitty. He then flat out says it wouldn't kill her to be nice. She then slumps dead onto his shoulder.
* That '70s Show, Eric can only say "Uh..... bluh." in the presence of a girl he finds really attractive. This same girl refers to him as uh bluh throughout the episode.
* That '70s Show, Eric doesn't understand how his friend Hyde can be attracted to Jackie, whom Eric can't stand (even calling her "the devil"), because she's shallow, self-obsessed, and annoying. On the flip side, many people (including Eric himself on occasion) don't understand what the heck Donna is doing with Eric.
* That '70s Show: Eric finds undergarments (and cheese or peanut butter...) in his car the morning after his middle-aged neighbors — the parents of his girlfriend — have sex in it.
* That '70s Show, Eric Forman's mother Kitty mothers everyone in the gang. They need it, since they have abusive or neglectful families.
* That '70s Show: Eric Forman walks onto his parents having sex, and spends the rest of the episode acting like a zombie.
* That '70s Show, Eric goes to the pharmacy to pick up some photos while his girlfriend's father is there to pick up her prescription, which he believes to be cough syrup. When the pharmacist tells him it's birth control, Eric bolts out of the store.
* That '70s Show, Eric has a collection of G. I. Joe and Star Wars toys. He calls them "action figures"; everybody else calls them "dolls."
* That '70s Show: Eric, Hyde and Kelso did this for Bob after he told Donna that she has no right to question who he dates, Jackie's mom in this case.
* That '70s Show, Eric invents the "Moon & Trench" which involves him "trenching" his teacher's lawn with the Vista Cruiser after mooning him at the door.
* That '70s Show, Eric is preparing to go to Africa to become a teacher; at the same time, his parents finally find out about the regular marijuana use that he and his friends engage in. This leads to this comment from Red, "Well, this is the worst thing that you have ever done! Eric, I am gonna make you... I am going to... well, I can't think of anything worse than sending you to Africa. You're going to Africa!"
* That '70s Show: Eric's basement and living room both had a couch front and center. Both sets, however, erected a fourth wall whenever characters were depicted in "The Circle", where the camera rotated 360 degrees from the center of the room.
* That '70s Show, Eric tries to hide the fact that he was reading Donna's journal by claiming to have been going through her underwear drawer and rubbing her underwear against his face.
* That '70s Show, especially in the later seasons, become prone to this in regards to Eric, from his best friends to his girlfriend to even (and sometimes especially) his parents.
* That '70s Show Fes' home country is never identified. Teasers are given that he's anything from Central American to Eastern European. There are multiple times he refers to it as "whatever the hell country I am from."
* That '70s Show, Fez breaks his leg and stays in Eric's room, watching the Pinciotti's house and hoping to see Midge, their MILFy next door neighbor, naked. However, when she's nowhere to be seen and her husband Bob is seen by Fez carrying a large garbage bag, Fez immediately assumes that Bob killed Midge. It turns out that Bob had merely carved pumpkins for Halloween (the garbage bags had garbage in them) and Midge was away on vacation.
* That '70s Show, Fez, Eric and Kelso, mainly Fez, have mentioned their fondness for hands-on love. We don't know about Hyde, but he voiced his support for the practice — when Fez asked how much masturbation is too much, Hyde responded, "There's no such thing as too much."
* That '70s Show. First during a school assembly regarding the President's visit to town, where the various teenagers have actual lightbulbs turn on when one aspect of the speech caught their interest (for instance, Hyde when the principal mentions

that they shouldn't cause trouble to make a statement against the government), culminating when the principal says that they don't like it, they can just leave (at which point the "Exit" sign above Fez's head lights up and he walks out the door).
* That '70s Show for the past 8 years. Despite their rage, Red is unable to punish Eric because he can't think of anything worse than sending him off to Africa, which Eric was doing of his own volition.
* That '70s Show gets his hand stuck in a vase. Like Homer below, we only find out his hand was "stuck" this way after he mentioned the vase was where he hid their stash of marijuana and he has it explained that holding onto the bag is why he can't take his hand out. He then lets go of it while still holding the vase in the air, causing it to drop to the ground and break.
* That '70s Show goes through this a lot on cable reruns. Episodes that are TV-PG on one network are TV-14 on another, and vice versa. The same goes for many other shows whose ratings varied between episodes in their original airings.
* That '70s Show had cast members doing stuff in front of colorful backgrounds (like posing, walking all over, etc.)
* That '70s Show had Donna fall asleep while running a fundraiser. In her dream Santa appears and claims he has all the money she needs for the library she was raising funds for. After Donna mentions to Santa that some people don't believe in him, he becomes enraged and asks who these people are. Donna later wakes up screaming "No Santa, please don't kill them!"
* That '70s Show had Eric living next to Donna. They eventually hook up and even get engaged.
* That '70s Show had one for Red with his threats of shoving his foot up people's asses.
* That '70s Show had roles too). "Wrestling is Fake" is mentioned (though it wasn't common knowledge in the time period, Red is said to have wrestled himself in the past).
* That '70s Show had this happen to Kelso. When confessing the problem to his friends:
* That '70s Show has Donna and Jackie as the two females while the remaining four are male. (Eric, Hyde, Kelso, and Fez.)
* That '70s Show has Eric camping out to get tickets to Styx. The next day, he is the only person in line.
* That '70s Show has her own laugh, which is not the actual laugh of actress Debra Jo Rupp.
* That '70s Show has Hyde, your resident '70s-era metalhead. Donna could also count to a lesser extent.
* That '70s Show has Red, a navy veteran who served in combat during World War II and the Korean War, miffed that Bob, who was a member of the National Guard and never saw combat, is allowed to march in the Veterans Day parade.
* That '70s Show has the geeky Eric with tomboy Donna, the rich girl Jackie with rebel Hyde, and the short-tempered Red with cheerful Kitty.
* That '70s Show have Mt. Hump, lampshaded when Donna wonders if it's called that because of why people go there, or if people go there because of what it's called.
* That '70s Show: Having reluctantly broken up with Donna, Eric Forman is depressed in the first few episodes of Season 4. In the second episode, he is listening to the radio whilst moping in bed. Unfortunately, each frequency, for some reason, contains Eric Carmen's "All By Myself". Frustrated, he changes to AM, only to get two frequencies with the song "Donna" by Richie Valens. He eventually throws it against the wall in anger, trying to break it.... only for it to start playing "Donna" less than 3 seconds later. He promptly buries himself in his bedsheets.
* That '70s Show, he contemplates what it will be like to have Hyde, Eric, and Kelso teach him how to get girls.
* That '70s Show he's finished drinking the eggs, at which point she reminds him he's allergic to them.
* That '70s Show? His actor, Wilmer Valderrama, is of Colombian and Venezuelan descent.

* That '70s Show". His next attempt is "I love you...man," complete with a shoulder punch.
* That 70s Show, however — Jackie's blithe demeanor prevented him from stating so. They eventually got together in the fifth season.
* That '70s Show: Hyde and Jackie. Before they got together, their interactions consisted entirely of slinging barbs and insults at each other. And after, their relationship was... pretty much the same, only now they had sex. Jackie refused to notice this. Hyde knew it but tried not to care.
* That '70s Show, Hyde didn't like Jackie at all earlier into the series and would often insult her. But when a guy Jackie shows interest in to make Hyde jealous calls her a "bitch," Hyde punches the guy in the face.
* That '70s Show Hyde does this. After it looks like Laurie is moving out and he's getting her room, she ends up staying. The end of the episode shows him standing there with the dresser up against the door telling her that she'll never get in. Cue Red opening the door outward.
* That '70s Show, Hyde is selling hash brownies, and asks his customers if they are cops or in any way associated with the police before selling them anything.
* That '70s Show, Hyde is upset when Kelso sleeps with his half-sister. Eric, on the other hand, doesn't really care when Kelso and Fez sleep with his sister, since she's the town slut.
* That '70s Show. Immediately after realizing that she has feelings for Fez, Jackie runs from the Formans porch screaming "Nooooo!" at the top of her lungs.
* That 70's Show in 1972, two years before Cheap Trick formed. Because Cheap Trick are the more well known of the two Seventies bands, people tend to assume it's an early Cheap Trick song, when in fact their cover was specifically recorded for the show.
* That '70s Show, in an episode where Eric's hot cousin comes to visit and tells him she's adopted, and then seduces him just to trap him into making a move on her in front of his parents. She's not adopted at all; she just wanted to pay him back for a prank he pulled when they were younger.
* That '70s Show initially uneasy upon learning that the men were a gay couple. He was just able to come to terms with it.
* That '70s Show in one episode. After one girl is killed following the events of the trope, Hyde comments that she had to die "as all movie sluts must do."
* That '70s Show, in one episode during the sub-arc where Kelso is trying to become a cop, he is with Fez and Hyde in "the circle" (a.k.a. doing drugs) and refuses to partake in it due to his new duties. After a few seconds in, he decides to flush their stash down the toilet. Though Fez panics, Hyde reassures him he won't actually do anything. Cue toilet flushing sound.
* That '70s Show: In the episode "Eric's Burger Job", when the guys apply for a job at a local fast-food restaurant:
* That '70s Show: In "Too Old to Trick or Treat, Too Young Too Die", Fez is stuck in wheelchair with a sprained ankle in the Foreman's house. Watching next door with binoculars in the hope of seeing Midge naked, he becomes convinced that Bob has murdered Midge.
* That '70s Show, "I shouldn't have pulled your pants down in public, once you started letting me pull them down in private."
* That '70s Show is that Eric can't take being worse at sports than Donna.
* That '70s Show. Jackie and Kelso start slow dancing at their prom. When the song changes to a more lively, upbeat tune, they simply continue to slow dance.
* That '70s Show just loves this trope, mostly in their split-screen conversations, with four characters discussing the same thing from two different points of view. An example:
* That '70s Show, Kelso enrolls in the police academy and does pretty badly on a test. He and the others break into the office that night to alter the answers only to get caught. The officer who catches them tells him there's no punishment for what he's doing because it was thought there was no one stupid enough to do it.
* That '70s Show, Kelso, Hyde and Fez go to vandalize the water tower. Fez plans to draw a penis on the tower, and says “Since I’ve never seen another mans

genitals, I will have to draw my own. I will need more paint. And a bigger tower.”
* That '70s Show, Kelso is trying to win Jackie back by proving that he can be romantic, and he goes on an ice-fishing trip with Jackie and most of the rest of the gang. First, Eric and Donna play this trope perfectly straight, right in front of them, and Donna is pleased with this. Next, Jackie sets Kelso up to make the same offer (saying, "I'm cold, too"), and he responds with "Well, damn, Jackie, I can't control the weather!". Fez is also present and is a rival for Jackie's affections, and naturally, he is not as blind as Kelso to the possibilities of impressing Jackie by being generous.
* That '70s Show, Kelso sees Jackie without her make-up done and is promptly horrified.
* That '70s Show. Kelso starts crying over breaking up with Jackie, but all his memories are of Jackie insulting him. Still, as this was what most of their relationship was based on, he was pretty visibly sad.
* That '70s Show, Kelso tells Jackie to watch him drink his eggs. Jackie tries to tell him something, only for Kelso to keep shutting her up, saying that whatever it is can wait till after he has drunk his eggs. She does so and after he has drunk his eggs, he asks her what was so important. She reminds him that he is allergic to eggs.
* That '70s Show, Kelso tries writing a song to win her back. Eventually, he annoys Eric into taking his guitar and smashing it.
* That '70s Show Kitty mistakes herself to be pregnant, only for the doctor to discover it's menopause.
* That '70s Show, Kitty once convinced Red to take Eric (along with the other males from the main cast) hunting in an attempt to get them to bond. They wind up spending the day in a tree with Red berating Eric for missing a shot at a deer. At the end of the trip, Eric demonstrates that he's a good shot by hitting a can off a fence and explains that he consciously decided not to kill the deer, which gains him some respect from Red, who would rather his son be a pacifist than a lousy shot. He then spoils any actual bonding by shooting a deer himself in utter disregard to Eric.
* That '70s Show." Kitty then came in, after spending the entire time just cooking things and finding herself with nothing left to keep her busy, and started to break down in tears. The three of them then cried together for a moment of grieving.
* That '70s Show Later, Red also puts tiles on the board to spell "CUEBALL."
* That '70s Show Laurie, who did it just for fun, a government agent comes in to interview the two and the Formans to determine if the marriage is legit or not. Even once the agent determines it to be legit, Fez still later has to take a test to finally become an American citizen. When Laurie and Fez first tell the Formans of this, Red gets so shocked that he suffers a heart attack (which was made worse when Fez says "Hang in there, Dad").
* That '70s Show mentions he was a "conscientious Canadian" during the Vietnam War.
* That '70s Show, Midge asks Bob to open a jar, to make a point to Donna about how women have men under their thumbs. He has a lot of trouble opening it, and it's implied that Midge was only doing it to make him feel manly.
* That '70s Show." Most prominently, however, is his frequent mentioning of the car that runs on water, man.
* That '70s Show, Nina breaks up with Fez using this line. When she wants to get back together later in the episode, he blows her off with a mocking "It's not me, it's you".
* That '70s Show No screaming, no spasming, just arm-clutching and shortness of breath. Fortunately, Kitty (a nurse) recognized the symptoms.
* That '70s Show Of course, being out of touch with the latest technology, they get him an eight-track player, making his gift from Hyde (cassettes) worthless.
* That '70s Show over the fact that we never learn his country of origin. His real name is not given, but we're told that it's simply too long and funny-sounding for regular use. He often talks with an accent and makes stupid comments. In one of the later episodes, there's also a friend of his from the "Old Country": a white guy

with a British accent. Apparently his friend is from the west side of the island.
* That '70s Show, Pat Nixon, Pat Boone, the girl that gives the weather, no, no! Okay, jellyfish, really big spiders, come on, dig deep, dig deep, okay, the day we backed over Skipper in the driveway, instead of going to the county fair, I had to bury him in the backyard." Inverted later with Donna who thinks of sexy things.
* That '70s Show Pinciotti and Annette, played by guest star Jessica Simpson.
* That '70s Show played this trope straight twice, and then subverted it.
* That '70s Show, realizing that he and Donna are not ready to be married. Later, Donna agrees with him.
* That '70s Show, Red and Eric buy Kitty a few balloons and a funnel from the gas station at 11:40 P.M. She is somewhat unimpressed, and they have to take her square dancing to make up for it.
* That '70s Show, Red Forman is very attached his 1950's Corvette convertible and doesn't let anyone touch it let alone drive it. In one episode, Eric took the car on a joyride while his parents were out of town in order to impress a cheerleader. He accidentally drives the car into a ditch, it doesn't get damaged but it gets covered in mud and he has to clean it before his dad gets home. He succeeds but his cover is blown when his dad starts the car and finds the radio tuned to a different station.
* That '70s Show: Red Forman, upon finding out Michael Kelso is dating his daughter Laurie, kicks him out of the house when he comes over for dinner and later has Eric summon him into the garage, locking the two of them in it until Kelso gets the gist of what Red wants to happen. Kelso struggles, as he is a dumbass and cries before they are done.
* That '70s Show: Red is a War Veteran instead of a former High School Jock. He still has this type of relationship with his son Eric. One episode also made reference to Red having been on the wrestling team when he was in high school.
* That '70s Show: Red is usually disappointed at how goofy and nerdy his son is.
* That '70s Show, Red loses his job and goes drinking with some of his ex-coworkers. He gets too drunk and eventually Kitty has to come to the bar to pick him up. When she arrives:
* That '70s Show. Red loses his job and is afraid of looking emasculated, but ends up watching the Soaps during the day anyway and explaining them to a guest at a party in a condescending manner.
* That '70s Show. Red tries to set Eric up with their coworker Stacey, but when he tries to talk Eric up to her she makes a pass at Red himself.
* That '70s Show, Red will threaten to kick someone's ass (or put his foot in it) when they do something he doesn't like or don't do something he asks, which will often lampshaded by other characters. Case in point in "Red Fired Up" where he and Eric a working at a department store:
* That '70s Show, Red would often blame things on Eric that he himself was responsible for as well.
* That '70s Show relied on this trope constantly, usually using it to display the character's imagination in many "what if" situations.
* That '70s Show. S3: Jackie —> Hyde then Hyde —> Jackie. S5: Hyde —> Jackie. S6: Jackie —> Hyde.
* That '70s Show sees Donna getting pantsed by Eric in a basketball game, exposing her granny panties, which Hyde delightfully makes fun of. The episode is even titled "Donna's Panties."
* That '70s Show She went into a depression after learning her son had sex.
* That '70s Show smoke (pot), and another episode showed that his mom and at least one of his friends do smoke cigarettes, so it's not a total shock to his system.
* That '70s Show. Textbook example — Hyde never actually changes his relationship to her, mostly consisting of unremitting cruel snark, even after they actually begin dating.
* That '70s Show: The car won't start when they're trying to make a getaway after a prank.
* That '70s Show the gang cut down a tree on the side of the highway. Kelso's down hacking away as the others play lookout. A car passes by, one of them shouts

"Duck!" and everyone does except for Kelso who looks up and says "Where?"
* That 70s Show, the picture day showed the gang's history. And Eric got a zit.
* That '70s Show thinks that if a Monkey had a loaded gun would be an awesome premise for a TV Show.
* That '70s Show this trope is invoked when Eric and Donna realize that Donna had missed a day of her birth control and were therefore convinced that Donna was pregnant. Most teenagers don't realize that birth control doesn't stop working just because you missed one day, so their panic is understandable.
* That '70s Show this with Kitty and Red in a diner, in the roles of the woman in the red dress and the suit-clad man sitting next to her. Kitty remarks on how everything feels so familiar.
* That '70s Show. To the point that, in one episode, he saw an erotic dream about Kelso, too disturbing even for him (and for Kelso too, after he learns) . As Fez later mentions, his admiration of Kelso's looks is "purely aesthetic".
* That '70s Show type teen shows unexpected yet great skill in fixing cars.
* That '70s Show was held back as a kid and kept it secret out of shame. It fits the role of Kelso as the group's resident idiot, and he takes some shots at him when they hear it. The main joke, however, is that he was old enough to legally buy beer for them and told nobody.
* That '70s Show was in the second situation for an episode. He was dating Donna and loyal to his mother, Kitty. Kitty and Donna then start going out shopping and lunching, cutting down on Eric's intimacy with Donna.
* That '70s Show what the future would be like, and it was filled with tongue-in-cheek Zeerust, such as jumpsuits and jet packs. The joke was that he imagined all that stuff would be available in the far-off year of... 1997. The episode first aired in 1999.
* That '70s Show when Charlie sees Kitty naked. Kelso advises him to walk in on Red naked: that way, Red will think he's an idiot rather than a pervert. It backfires when he accidentally walks in on Kitty naked again.
* That '70s Show; when Donna goes on an extended road trip, Jackie does her a "favor" and explains her absence - by telling everyone Donna went away to have a baby. By Donna's reaction, this is a far worse explanation.
* That '70s Show, when Eric and Donna rush out of a fancy restaurant after all their friends ditched them with the bill, right down to the freeze frame fade to sepia tone.
* That '70s Show, when Eric and Hyde gave the same answer to Kelso's question in unison through luck, despite not having planned it. They almost blow it anyway by turning to each other with surprised delight when they realize what just happened.
* That '70s Show, when Eric broke up with Donna, the next morning every song on the radio station was about breaking up, e.g. Eric Carmen's "All By Myself". Worse, Ritchie Valens' "Donna" starts to play.
* That '70s Show, when Eric refuses Donna's plea to get back together, after having pined for her all season, Kitty calls him a "dumbass", which is normally Red's catchphrase.
* That '70s Show when Eric says the first time he strapped on a pair of skates was like "the first time Joe Namath laid his hands on a bat".
* That '70s Show whenever she can. No wonder Eric and his friends call her "the witch".
* That '70s Show, when Hyde is dating Jackie, Jackie convinces Hyde to shave his beard by saying that attractive men don't have beards. She uses a Ken doll as an example.
* That '70s Show when Hyde is left to watch his dad's house for a weekend and his dad's prized possession (an autographed guitar) is damaged. When they get the guitar repaired, someone cleaned the autograph from the guitar, thinking it was graffiti. In a panic, Hyde scribbles the autograph back on the guitar.
* That '70s Show when Jackie's father tells her that if she doesn't break up with Kelso, he will cut her allowance:
* That '70s Show, when Kelso shows up for the police academy not knowing that his friends gave him a Hitler mustache, his sergeant walks right up in his face, asks

Kelso to explain himself, and yells for him to shut up before Kelso can even twitch.
* That '70s Show when Red and Eric try to fix the kitchen sink. Although they fail to fix the sink, they don't do any major damage and decide to just call a plumber to fix it.
* That '70s Show, when Red is talking to Leo, who has come over to the Foremans' house to explain Hyde's situation. When they finish talking, Leo lays out on the couch and tells Red to get out. Needless to say, Red didn't react kindly.
* That '70s Show, where Hyde, among other reasons, doesn't want to date Jackie because she's a cheerleader, thus a "square", opposed to him. However, after they get together, she once does a dance for him in her uniform.
* That '70s Show. Where the layout gets confusing is how the basement opens off the kitchen, under the den, and there's a door into it from the backyard that should be under the den.
* That '70s Show which ended with the revelation that Laurie was born with a tail.
* That '70s Show (while they were a couple). Jackie is a rich girl and cheerleader, Hyde is a poor delinquent with a messed up family who lives with Eric's family because he has nowhere else to go. Initially Hyde stated their differences in social status as a reason they shouldn't go out, as they had nothing in common.
* That '70s Show, who plays Red Forman, was the only castmember who actually lived in Wisconsin.
* That '70s Show with regards to the Foremans' house, particularly the basement (though naturally they have no problem wandering about the rest of the house and enacting other elements of the trope, such as mooching food and pilfering Red's beer). Occasionally lampshaded, such as one time when Kitty mentions an embarrassing secret of Eric's aloud.
* That 80's Show:, but the regulars can only list his various bad habits and jerkish acts (such as copping feels and blaming others for it) for Corey to build the euology on. In the end, the euology lists every nasty detail he's dug up, but ambiguously worded to sound like positive qualities.
* That 80's Show, Corey gets coerced into writing an eulogy for "Silverpants", a fellow clubgoer whom nobody actually knew beyond his very superficial party lifestyle. (He was mostly known for his pants.) What little he finds out isn't flattering (such as how the guy liked to feel up waitresses and then pass the blame on someone else), but his not-girlfriend Tuesday manages to spin it into something vaguely nice-sounding. ("He touched people.")
* That '80s Show managed to do well by making Chyler Leigh nearly unrecognizable in goth makeup as June Tuesday so that on the one occasion where she wasn't done up that way her natural beauty actually showed up very well.
* That '90s Show as CDs were replaced by the introduction of MP3 files and online streaming and records making a niche resurgence).
* That '90s Show was in love with her professor, Stefane August, at Springfield University. Marge left Homer for Stefane and they started dating until Marge found out he didn't want to get married at all and that he was actually not at all like her.
* That about sums up Phineas and Ferb's whole situation. When you have to build your own super-intelligent A.I. and program it to trap you repeatedly in order to have a little fun, and then you defeat it effortlessly, it's difficult to
* That advice saved his life, as the unregistered beggar was actually an assassin.
* That A.I.M has very strict standards, they won't even think about hiring or lending mercs to people with criminal backgrounds or
* "That ain't the way I heard it!" (reference to The Old Timer character from the radio series
* "That ain't the way I heard it!", "T'ain't funny, McGee!", "I love that man!", ""Operator, give me number 320.. ooh, is that you, Myrt? How's every little thing, Myrt? What say, Myrt?" all originated from
* "That ain't the way I hear-ed it!" (reference to The Old Timer character from the radio series
* That all heavy weapons give more Weapon Exp. (They don't; many heavy weapons do

tend to have higher wexp yields to compensate for the fact that
* that. All in all more people likely know about the company now thanks to the whole story than if it had never happened, and the chain has moved up from the 7th most popular fast food chain to the 3rd most popular.
* that all over Rodolfo too. In another episode, Rodolfo performs the excessive, hose-like spray variety, prompting Grandpapi to demand, "Why must you take such big sips?!"
* that allows him to become anyone he's met for a few minutes, complete with all their abilities. However, he can't maintain someone stronger than him for more than that.
* That all said, Taierzhuang saw the first Chinese victory of the war, with fanatical warlord soldiers (often armed with
* that also cover an associated minor character, a weapon, an important object, or multiple incarnations of the character.
* that also implies Gine messaged Raditz about Goku traveling to Earth, meaning Raditz might've gone to retrieve his brother on her orders. It's also notable that despite Raditz not getting along with his father Bardock when they meet in games, Raditz has nothing bad to say about Gine.
* That also makes them particularly tricky to separate into individual stories for reprinting in comic book form (besides the obvious fact that they have to make up a meaningful name for the story arcs), for example, Gottfredson's
* That also seems to apply to many demons. Lilith proved not only particularly strong, but also surprisingly fast.
* That a man cannot stay somewhere without leaving some kind of trace is a mantra of Inspector Lunge in
* that, a member of the West family (and oghond, but that doesn't matter here) knows that the dog answers to both her real name and "stupid." With Nathan already in the house, there's only one possible conclusion as to who the Oshawott at the door could be...
* that And All For One indicates was his body instinctively trying to "destroy" things.
* That, and all the "Digivolve" sequences. They were shortened a lot of the time in later episodes, but the first series spent a long time re-using the same animations of the main digimon powering up.
* That, and Asuka loves Rei almost as much as she loves Shinji (though not enough for a polygamous relationship).
* That, and a urine collection bag burst early in the mission, causing the capsule to smell like a public latrine.
* That, and by that time he was old and leaving the city to live with barbarians could be seen as a fate worse than death by him anyway. Might as well die with his dignity and honor intact.
* that) and Dracula has been doing all the work, such as cooking. Apparently, when you're an undying abomination you have time to pick up a culinary hobby. Either him or his wives.
* That, and everyone is either a shapeshifter or has access to a transformation device of some sort.
* That, and Frank unknowingly saved his life in Vietnam, and he proves that the generals who want him dead were behind a False Flag Operation
* That and he wasn't willing to wait for them to get out of the way before activating the booby trap that would prevent the advancing heroes from reaching him.
* That and his alcoholism dulls his interest in what's actually going on...
* That, and other adaptations of the character show that his fondness for cards and gambling isn't just for show. He's had both a sleight of hand and a history of indulging in card games on occasions. It all fits with his general risk-taking personality.
* THAT and so forth. This didn't stop it however from being a popular monument depicted by many impressionist painters of the time such as George Seurat at the time of its release. The backlash was in fact fierce enough that there existed

rumors that the Eiffel Tower was to be destroyed a few years after it was finished, but that it was averted at the final second.
* That, and the bomb is activated by pulling the dead mobster's (appropriately named Leo "the Fart") finger. And the whole assassination plot is summed up by the immortal line, "Leo the Fart is going to pass gas one last time."
* That, and the fact that it's implied that Gavin is the descendant of a yennork—a werewolf who isn't able to morph.
* That and they're the perfect Jedi-killing weapon: a blaster bolt can be easily deflected back with a lightsaber, but if a Jedi intercepts a slugthrower round it will only melt it without deflecting or slowing it, resulting in the defending Jedi getting hit with a less lethal but much more painful slug. And making him defenseless due to the pain, if the bullet didn't kill him outright. Even if the lightsaber does deflect the slug, the Jedi can't reflect it back at an opponent the way they could a blaster bolt. The Force is effective against them, but it takes a skilled Jedi to catch a bullet with it.
* That Annoying Guy does this unintentionally while carving a pumpkin with his girlfriend.
* That appears to be happening now in the comic Angel and Faith, Season 10. Fred is Back from the Dead
* That armor is a tribute to Silvermane's cyborg body from the comics and
* that as doom:us (meaning that we, "us", are doomed) then replaced the "u" with a "v", simply because a "v" looked so much... doomier than a "u".
* that a small case n" should be added. The "n", in the form "UCLAn", is very small and inobtrusive.
* that a thousand years old are so powerful that their primary responsibilities involve magically moving the Sun and Moon around.
* that attacked her and takes it home with her. By the time of the sequel set decades later, the robot is a full-fledged member of the household and is wholeheartedly loyal to Lyra.
* That Awkward Moment, Jason gets invited to a "dress-up" party by Ellie, showing up in a ripped T-shirt with "Rock Out" on the front and a large dildo hanging out of the front of his pants. It's fancy sort of party where everyone dresses up. He manages to pull it off by basically refusing to be embarrassed about it.
* That Awkward Moment, this is subverted. Daniel runs to tell Chelsea that he loves her, only to get hit by a car. They end up having their tender love declaration moment in the hospital.
* that band who sang "In The Summertime" than with a musical theatre cat.
* that battle report featured a Dwarf king leading a bloody siege against an Imperial noble because of his horrible betrayal of the Dwarf engineers who helped build the castle - the noble shortchanged them by twelve gold crowns. The hardcover Empire army book for 8th edition mentions a similar event happening in 2410, when dwarfs raze Fortress Kreighof to the ground after realising their payment was two and a half pennies short of the twelve dozen wagonloads of gold they had been given.
* That begin said, US Marines don't wear berets. A Maroon beret, used by one of the models, would indicate they are from the Army's airborne troops.
* that being his heart being pierced by his own cursed spear or being destroyed by a powerful curse before his body gets eaten by an Eldritch Abomination
* that being hit by a taxi. They finally managed to kill him by knocking him out and gassing him, but it's still unknown how he survived all the attempts on his life.
* That being said, a few worlds earn a specific mention, such as Cadia, which stands directly on the one way out of the setting's version of hell (that's saying quite a lot, actually (the Warp actually
* That being said a major feature of World War II air combat was the basics of the leader/wingman becoming widespread. During the Battle of Britain for example the Germans use of leader/wingman pairs was the only clear advantage they had over the British. For historical reasons the British pilots flew in 'Vics', multi-plane units flying in rigid V formation. The Vic did have legitimate advantages when it

was developed in World War I but none of these compensated for the fact that British fighter pilots were forced to pay so much attention to staying in formation that the German fighters had a much easier time catching them by surprise. To be fair to the British they quickly became aware of the problem once serious fighting started but their simply wasn't time to retrain their new pilots and experimenting with new tactics might have got even more pilots killed. Instead it was left to Squadron Leaders and Wing Commanders to adapt to the situation as best they could. When the daylight attacks ended British Fighter Command finally had a chance to experiment and retrain their pilots, resulting in them adopting the leader/wingman system by 1941.
* That being said, Ariel/Ursula is only popular in the original film's fandom, as in the stage musical Ursula is both
* That being said, being coerced into sitting on Santa's lap by parents may not be pleasant to touch-averse children (and a fair amount of children on the autistic spectrum) either, however well-meaning the Santa and parents are.
* That being said, Britain still maintains a place in the world of luxury and high-performance cars. Rolls-Royce and Bentley remain the gold standard in automotive luxury worldwide (the only automaker to come close within the past 20 years is Mercedes with its various attempts to revive Maybach), Aston Martin and Jaguar still produce fine luxury sports cars, Land Rover is still competitive in luxury SUVs, and both Lotus and McLaren make well-respected ridiculous racing/near-racing sports cars. And for niche customers, there's also Morgan, which makes a super-limited range of roadsters by hand, with an annual production of only 850 per year. Of course, of these, only Aston Martin and McLaren are entirely British anymore: Rolls is owned by BMW, Bentley is owned by Volkswagen, Land Rover and Jaguar are both owned by the Indian Tata Motors, the Chinese company Geely owns Lotus, and an Italian investment firm has a majority stake in Morgan. However, all are physically made in Britain and retain enough British involvement to command that British panache (and the price tag that comes with it; of these brands, you won't see any new cars except the Jaguar and Land Rover for less than $100,000 U.S., and even those two typically go for around $50,000 for their entry-level offerings and $60,000-$70,000+ for the higher-end stuff
* That being said, by endgame it's less inverted and more subverted; both physical and magical jobs have methods of downright breaking the game, and while the only job that is utterly foolproof about this is a physical job,(specifically the Valkyrie) it works best in tandem with another
* That being said, come the Wii version, Bear Hugger got a little more threatening with an unpunchable stomach and and a tricky hook that requires you to dodge in one direction only, not to mention the "bear hug" is now a much more dangerous move.
* That being said, it actually got lower ratings in France (-12 with warnings) and French Canada (13+) in spite of all the violence and profanity.
* That being said, it did languish in Stage 3 for a while due to a lack of mainstream pop culture around it and the remnants of Satanic Panic tinging its reputation. It was a combination of
* That being said, it wasn't entirely clear if the new universe that restarts after the end of the last one is actually "new", or a reboot of the original copying over itself. So it isn't clear if our "original" Leela actually died alone missing Fry, or if that future never occurred, because original Fry traveled so far into the future that he went full circle and came back to the present.
* That being said, Nightblood does have some power to distinguish good and ill intentions. "Evil" people are compelled to take it and use it, often killing their partners and eventually themselves. Throwing Nightblood into a group of enemies and letting them take care of themselves proves to be remarkably effective. "Good" people, meanwhile tend to feel nauseous upon seeing it and will simply run away.
* That being said, not all of her experiments have worked. She once tried creating Abyssal clones of shipgirls.
* That being said, once the Free French started taking over they saw a phoenix-like rebirth of the French military, to the point where there were nearly as many French divisions by the end of the war as there were American (at least in the

Rhine) and they played a key role in hammering the final nails in Hitler's coffin.
* That being said, Rossiu is never criticized for his actions by anyone
* That being said, Shelob and Ungoliant aren't so much giant spiders, as they are large horrific monsters that are spider-like. Shelob has a wasp-like stinger (real spiders can only inject venom with their fangs) and horns, and in the movie has a large gaping mouth, whereas real spiders can only ingest liquid.
* That being said, since the said dungeons haven't been released yet elsewhere, they might end up being made easier, which will end up angering hardcore players for a different reason.
* That being said, some angels play with this trope, downplay it, or even outright avert it. Some angels display more human psychology or value systems, most notably deuteragonist/tritagonist 82 White Chain (whose struggle with both the system of Throne and her identity form the basis of her character arc).
* That being said, the anime has over time taken greater measures to please longtime fans and new viewers alike, even though its target audience remains unchanged. The
* That being said, the anime's general reception is constantly shifting because of its own wildly changing writing style, with the fifth generation serving as an especially low point for its reputation due to its infamous
* That being said, the Anti-Materiel Rifle definitely makes a strong case for being an Infinity +1 gun itself, if only for its versatility. It can be modified to the point where it barely weighs any more than an SMG, equipped with a silencer for more covert long range kills, and takes 3 kinds of special ammo on top of its already highly damaging default ammo. One of these ammo types is the explosive round, exclusive to the .50MG class of ammo, which significantly ups the damage to absurd levels. With the right perks and skills, the explosive rounds can take down the X-42 Giant Robo-scorpion,the most tanky enemy in the game, in just 5 shots.
* That being said, the classic incarnation of Eggman is consistently this with some of his contraptions' design to defeat Sonic are rather... questionable, if not, outright ineffective.
* That being said, the closest they have to a usable boarding party without resorting to Kroot Mercenaries would be the Breacher Teams; they're all intended for the close confines of urban combat, but they are equipped with
* That being said, the game makes it clear they are two separate species, and unlikely to be compatible for reproduction (no one has really tried). Furthermore, everyone in the game notes that the physical similarities between the two species are very strange and seemingly fly in the face of science.
* That being said, their original use was somewhat limited until it was revolutionised by the Alliance who introduced the concept of a Carrier to the Galaxy, allowing for large squadrons of their to be launched at once. The Alliance also appears to have pioneered the use of Interceptors in order to counter-attack enemy dogfighters,
* That being said, there are plenty of players who will pick less-used combinations purely because of the benefits they offer. Champion Fighter becomes a lot more appealing when you've focused mostly on Constitution and magic items that buff AC and you've used your higher-than-normal Ability Score Increases to take feats that allow you to get expertise in some skills like Bards, Rogues, and Knowledge Clerics get. Suddenly a commonly considered subpar fighter can now tank incredible amounts of attacks, which does in fact matter in 5e where there is only one definitive 'save or die' ability, and it's tied to a PC class. (Monk, Way of the Open Hand.) 5e does a good job of giving the player a lot of options to choose from, and while some combinations can be amazing if you want to get a leg up on certain aspects of the game, the sheer amount of combinations and the fact each combination tends to have a specialization that no other combination can quite match means that there's a class combo for everyone. Circle of Land Druids don't sound so bad when you realize how much better they are at battlefield control than Circle of Moon Druids; battlefield control is generally a more demanding responsibility for players, and Circle of Land is unmatched in comparison to every other Druid (Itself a class focused on battlefield control) in terms of separating

enemies and keeping the pressure on them, for example.
* That being said, there are several plush toys out there that give him eyes (A given, as they'd look awkward otherwise), but its
* That being said, there have been many Christians killed in the Middle East by extremists trying to wipe out all religions besides Islam. Stories abound with conservative Muslims
* That being said, this example is viewed rather unfavorably in universe;
* That being said, this only seems to be in effect because of the "Unwritten Rules" that govern cape society. In
* that Bey would take the ship to Wunderland and sell it and would not fulfill the mission the Puppeteers contracted him for.
* that bike accident), it's a wonder he's so rarely had to be treated for serious injury.
* That bit about "somebody who is injured by the illegal action" can get downright insidious in the U.S. because of something called the "standing doctrine." Long story short, not only do you need to be affected by a law, if you stop being affected you lose the right to bring suit. For decades, this stopped anybody from challenging anti-abortion laws because nobody could bring a lawsuit to the US Supreme Court within nine months (Roe v. Wade was finally given a pass on the previous strict requirements); today, many otherwise killer First Amendment lawsuits against schools get tossed out because the district manages to stall the case until the wronged student graduates.
* That bit Steve Jackson at least gets correct. The abbreviation for metres per second is m/s or ms
* that Blackwall isn't who he claims to be. He talks about Grey Wardens having a sacred duty to protect the innocent, when in fact their duty is to stop the Blight at any cost. You can see him training some "recruits" before sending them home for the day, Wardens don't offer any training until the recruits survive the initiation ritual (to keep said ritual a secret, which Blackwall also doesn't know about), and then you're in for life. On that note, the Grey Wardens do take volunteers but they also wouldn't accept untrained farmers, and with an active Blight would be sourcing their new members from using the Right of Conscription.
* that Bobby is dead and Sam is being used as Lucifer's vessel, which to Dean is a fate worse than death. Then, he hears Castiel being killed and then watches Lucifer kill his future self.
* that, Boston still had Game 7 to work with, where they once again jumped out to an early lead and blew it.
* that both Zoro and Nami find their dreams less worthy than Luffy's and Cross's, and that if they knew, the conflict would tear the crew apart.
* "That Boy That Girl", and by the time their first album came out in 2008 they'd gotten past it, and most of the new songs on it were serious.
* that Bradley is a Homonculus, a moment before the Fuhrer kills her.
* That Brian continues to be an atheist in the face of God and Jesus obviously existing in-universe, to the point of Peter having met God (
* that Brian wasn't a golden retriever (he stammers out that he's a mix breed).
* that brought Sister. When the ship turned out to have brought a person, Church runs through a list of special agent specialties ... ending with "ball kicking". Which may or may not be one of Tex's.
* that by C.L. Werner. This is because the original leader of those clans used those lands to bargain with Khorne for power, but instead of using it to glorify the God of War as he promised, he used it to establish his own little kingdom. In essence, Khorne was just taking his due. The moral of this story, as said by the pants-shittingly frightening Norscan Khornate is: don't try to cheat a god.
* that by Subterranean law, anyone who loses to an enemy but lives becomes their slave. As such, he's now her master.
* That Came Out Wrong: A character says something that they realize sounds unintentionally sleazy.
* That Came Out Wrong. Brian Dennehy's cop character is explaining to a female character how to use a pistol. His lesson ends with, "And that's how you cock the

sucker..." (*he realizes what he's just said*) "...in a manner of speaking."
* That Came Out Wrong: Character realizes to their mortification that they just said something that sounds unintentionally sleazy.
* That Came Out Wrong: Someone realizes to their embarrassment that what they just said could be interpreted as obscene.
* That Came Out Wrong: Someone realizes to their mortification that they've made an unintentionally risque statement.
* That Came Out Wrong: When someone utters a perfectly innocent remark, only for it to sound like something smutty.
* That can be explained by the Nathaniel Richards, who is Kang, is named in honor of the creator of the utopian society on Earth he originated from, Reed Richards' father: Nathaniel Richards...who is also a time-traveler.
* that can be played as an interactive game. The screensaver features three contestants who try to answer trivia questions. If they get the wrong answer or fail to answer before the timer is up, then they are hit with a hammer. Contestants that get hit five times are out.
* That can include holing up in the mountains for a month and hunting bears. And he does
* that can only be killed with silver weaponry, because Judas betrayed Jesus for 30 pieces of silver.
* that can talk penguin. It is essentially this trope made into an entire manga since most of said manga is the titular baby Emperor penguin being extremely cute.
* That caption, halfway through the movie, that says "Zucchabar - Roman Province"?
* That case is somewhat justified in that Norway's experimental rehabilitation centres serve as an incentive and teaching tool for good behaviour (brutal
* That catchy "Pumps Your Blood" song used in a 2004 St. Joseph aspirin commercial was originally from the 1979
* that (causing every person in the square except Hugo Peabody to faint).
* That Championship Season as a personal hero, have discovered that Sharmen has an uncle who was accused of being a Communist twenty years earlier, and plan to use this information to discredit him. George's former basketball teammates - among whom are one of his top donors, Phil Romano, and his campaign manager, James Daley - are sceptical, since it is now 1972 and no-one cares about Communists in the family anymore. Phil still tries to use this information to blackmail Sharmen when he refuses a side-switching donation/bribe, but Sharmen simply laughs and says it was his cousin, not his uncle, and hangs up on Phil.
* That Championship Season, four of the five players of the 1952 Pennsylvania State High School Basketball Championship winning team of Fillmore High are still relying heavily on their coach, whom most of them view as a father figure, for life advice twenty years later. However, near the end of the play, one of the players reveals that Coach's philosophy emphasising winning above all else led to the incident which caused the fifth team member to turn his back on the others, and it is becoming apparent to all of them that Coach's advice revolves entirely around pep talk platitudes which may rally a team to victory in a basketball game but leave them completely unequipped to deal with the trials and tribulations of adult life, and that he is a bigoted, bullying fraud.
* That Championship Season is about an all grown up group of friends from high school who long for the simplicity of their youth, even though some of them are now successful (though their success is built on rotten foundations).
* That Championship Season is a strip-mining mogul who gives frequent kickbacks to local authorities; he made a significant campaign donation to help his former basketball teammate George Sitkowski become mayor in exchange for generous terms on the land lease for his mines, and when it looks as though George's re-election bid will fail, he tries making a similar donation to his opponent (who refuses).
* That Championship Season is only ever referred to as Coach by both the other characters (four of his former players) and the script.
* That Championship Season Phil Romano, a strip-mining mogul who buys off local policemen and politicians including Mayor George Sikowski, his high school friend and fellow state basketball championship team member, to secure cushy terms for the

land lease for his mining operations. When it looks as though George's re-election bid will fail and his opponent, Norman Sharmen, is targeting the strip mines as part of his election campaign, Phil tries to offer him a generous donation if he will drop his anti-mine platform; Sharmen refuses.
* That Championship Season works hard as a junior high school principal, but makes barely enough money to support his wife and five children, and the students at the school regularly scrawl graffiti on the walls insulting him. He is managing his former basketball teammate George Sitkowski's mayoral re-election campaign, but is distraught to discover that George is considering bringing in a new management team from Philadelphia to give the campaign a much-needed a shot in the arm. He has spent a large part of his adult life trying to prop up his alcoholic brother Tom, and has never been so much as thanked. Late in the play, he tries putting himself forward as a mayoral candidate instead of George as a way to get the respect he feels he deserves, but no-one is interested, and when he objects to the way he is treated by everyone, he is dismissed as a whiner.
* That character, Baron Otto Matic, predates Dick Dastardly by a season.
* That characters light up becomes a plot point at times. In one particular sequence from the manga, Zenigata realizes Lupin is nearby because he sees that a spent cigarette is a Gitanes Caporal, an expensive import brand that only Lupin is known to smoke in Japan.
* Thatcher Cameron. The BNP naturally claimed that they were the only party to prevent Britain becoming a Muslim country overrun by immigrants. The big focus of all parties' scare campaigns was the economy. The Conservatives said Labour had already ruined the economy and would just get the country more into debt and crippled under massive interest payments. Labour said the Tories would turn around their good work to begin the economic recovery and there would be another recession. The Liberal Democrats said that both parties were wrong and that their way was the best and most fair way to solve the economic problems. The minor parties said some things too, but nobody listened to them.
* that close all the time, and here she's one off character who's hard to relate to. This kind of falls apart when Mulder talks about being a Jewish woman and Cancer Man being a concentration camp guard in WW2. Being in his fifties/sixties in the '90s means Cancer Man would have already been alive during the war, as either a child or a teenager and could not have been in the big evil guy in the concentration camp. However, there's also no stated rule that reincarnation is strictly linear in this case - it's possible he was reincarnated into a body that was born several years before the last one dies. Timey-wimey.
* That Cloud Looks Like...: Looking at clouds and what shapes they resemble.
* that comes with it has her mopping floors with the next several challengers.
* That commercial for "Dr. Pepper 10," a version of Dr. Pepper with 10 "manly" calories, is extremely blatant about its message:
* That commercial where there's a line of various technologies falling and smacking into one another; a car, phone, SPACE SHUTTLE... but when the last domino falls and hits the product they're touting, you just too busy thinking COOL to remember the name... It was a smartphone right?
* That conception became less clear as time went on so that some believe that by his death Tolkien no longer intended Middle Earth to be in any way related to the real world. Besides that, he had maps that showed the rest of Middle Earth; it's just that the events of both
* that Cordelia had died/ascended and not been resurrected/returned as they thought. It was actually an ancient Lovecraftian terror inhabiting Cordelia's body. This doesn't keep it from being any less creepy, but it's not Cordy's fault.
* ...That could be thought of as a philosophical bookend paired with Kirk's Eureka Moment in "The Corbomite Maneuver," where Spock uses an analogy to chess as a way of signifying their lack of options, but then McCoy idly mentions bluffing, and Kirk suddenly realizes that an analogy to poker is much more suitable to their situation.
* That could be worked around, say, by deflecting said particles with another exotic spacetime geometry, shields or whatever. One of the variations on it, by van

den Broek, requires the mass-energy equivalent of a few grams. However, the concept itself was proven to be impractical by Krasnikov when he demonstrated the surface of the warp bubble to be causally disconnected from its interior (effectively cutting the crew off from controlling, creating or even stopping the ship). Further theoretical exercises (Clark, Hiscock and Larson) have shown that there exists formation of event-horizon-like structures along the warp bubble - analogous to a Mach cone - and since, in 2+ 1 spacetimes, the vacuum stress-energy of a quantized massless field diverges on the horizon as it forms, it is strongly suggested that the same phenomenon would occur in 3+ 1. The Alcubierre drive, as a concept for potential technology, is
* that could have been older sister) who was also from Brazil and had electricity powers. But then, well, Famitsu leaked pictures of Laura a couple weeks before the show, ruining the reveal altogether, and made worse by Sony releasing Laura's reveal trailer a couple days early too, so all potential trolling plans were flushed down the toilet.
* That crazy adviser of Romanov in Red Alert 2 also has a evil beard. And, like Kane,
*) that cybernetics that alter the awareness of what your body is doing may reduce empathy and intuition. If someone could be completely robbed of both through cybernetic enhancement he could certainly appear to have lost his soul.
* that damn bureau that residents have to pay taxes to by April of every year pieces spawn pre-rotated, and car enthusiasts will think of Independent Rear Suspension, a type of suspension that allows rear wheels to move up and down independently of each other.
* "That damned elusive Pimpernell" evades capture, the illusive one is a figment of your imagination. (And the allusive one just
* that damn good herself was under the command of an officer who was going to be retired soon. Later, she was one of a few dozen fighter pilots left in the whole of humanity in a little fleet almost completely dependent on pilots for defense. There was a good chance she'd get discharged in normal times, but when you're down to 40...
* That Darn Cat!, when FBI agents tracking the titular cat follow him to a house and barge in with guns drawn, expecting to find a lair of kidnappers. Only problem is, it's the cat's owners' house, which is where the FBI team has set up its headquarters.
* That Darn Katz arrives late for her doctrinal hearing, arms laden with all her papers. Just as she mentions that this is like a terrible dream, she drops the papers and suddenly realizes that she rushed out of her apartment in her underwear.
* "That Darn Katz!" plays it straight: it turns out that the pyramids were built as antennas to beam the Earth's rotational energy to the planet Thuban 9 (which is the original homeworld of cats).
* That day, a priest comes in to have his hair cut. "What shall I pay you, my son?" "No price, for a man of the cloth such as yourself." And what do you know, the next day the barber comes to open his shop, and finds on his doorstep a dozen roses. That day, Rabbi Finklestein comes in to get his payoss [sideburns] trimmed. "What do you want I should pay you?" "Nothing, for a man of God such as yourself." And the next morning, what do you know? The barber finds on his doorstep –- a dozen rabbis.
* that day — to make sure they were serious. The result? "Hey Gabe, Ridiculous just called back."
* That Deaf Guy, Desmond's response in the last panel isn't translated (he's saying, "hahaha, okay, I'll go get some").
* That Deaf Guy, where a random guy asks Desmond a question - but, being the titular deaf guy, he can't hear. He tries to explain this by miming, the random guy realises his mistake and repeats the question. Louder.
* That depends on the flash mob. In Philadelphia, for example, flash mobs have a history of either starting out or becoming violent and destructive.
* that didn't bother to explain why opening mass relays willy-nilly was a bad idea.
* that didn't totally end it, with the Glyndwr Rising of 1400-1415, when Owain

Glyndwr reconquered all of Wales, being the last native Welshman to be crowned Prince of Wales. Unfortunately for him, he couldn't hold it, and he vanished, with a lot of 'Elvis Lives!' stories ensuing about what happened to him.
* That Doc was a participant in the Manhattan Project, thus explaining how he retrofitted a DeLorean with a nuclear reactor. His dialogue from the film suggests that he believes nuclear war is imminent, and he has been spending years trying to invent something — anything — to blot out the atomic bomb from his resume
* That does happen on occasion, when cloud conditions are right. Sometimes, people even take
* that doesn't always work. One of the rooms in "No End House 2" requires the player to slit her wrists. Not only does she not die, that's not even the final challenge.
* That doesn't even begin to do justice to the silliness of Cybertronian units.
* That doesn't mean the compatible species always have compatible tastes either; in the sequel you have the option of buying a krogan drink that goes through you like ground up glass, "literally", and the krogan Grunt will react in abject disgust at the simple ramen shop on the Citadel, despite his expressing hunger at the sight of things like
* That doesn't really count for much in this series since some of the bad guys have their own agendas, and in some cases,
* that doesn't work either, then each team must put forward one player to act as referee (meaning, yes, the players may actually be asked to ref their own team). Surprisingly, this particular rule actually DID come into effect once in the NHL (during a game in 1983 between the New Jersey Devils and the Hartford Whalers, the refs and linesmen were delayed by weather and didn't make it in time for the first period).
* that doesn't work, they start their own restaurant...which doesn't turn out so well.
* That doll, Nirvana really is his sister. Gotta love alchemical experiments.
* that dramatic with a massive twist, and the producers don't want to give any spoilers away.
* That Dude in the Suede part five, Suede revealed himself shocking everyone who believed the rumors thus pulling off a long-term prank. On July 8, Suede released a trailer announcing he would be making more video reviews for TGWTG.
* That Dude in the Suede, real name William DuFresne, has mentioned being autistic in at least one of his videos.
* That Dude in the Suede with his katana in one hand, and the sheath in the other.
* that, due to his insistence on always one-upping the competition when he imitated something. For instance, he added vinegar and thickened ketchup to extend its shelf life; ketchup was previously rather mild in flavor and quite runny.
* that, due to septicemia, a then eight going on nine year old Ryuuko should have died of organ failure, with her poisoned blood circulating through her body. Apparently, she willed them not to.
* That earlier bomb involved a wire dilemma, but the question in that case was whether the bomb was wired with an open or closed circuit; meaning does the bomb explode if you cut any wire or just some wires.
* that entrance that you used to reach the boss area in the first place, which can ALSO be used as cover to block practically all of the boss's attacks, and those that aren't blocked (the homing missiles) CAN BE SHOT DOWN. Yep, the Bonnes would've had a good robot if it wasn't for the environmental factor.
* That Epic Plan in front of Beyond and Light suggests that Beyond room with him:
* That Epic Plan Light suggests that they consult this Beyond Birthday for the Kira investigation (so that he as Kira can use him for his Eyes).
* That Epic Plan suggests that they could always sell Matsuda on the black market.
* That episode about Alex's friend who died when Alex hadn't gone with him.
* That episode, along with a few other examples of 'cards mailed to non-people' on this page, used the quite true fact that anything mailed to you without you ordering it is legally yours. (And the implicit fact that stuff mailed to your pets

is actually mailed to you.) But as the show pointed out, the fact that the family legally possesses the physical card doesn't mean they aren't off the hook for
* That episode also has a guy accidentally buy his male friend. Naturally the friend isn't very pleased.
* that equipment shortfall by borrowing some cars from VIA Rail Canada...cars which it sold VIA Rail in the early 1990s while upgrading its fleet.
* that even the most powerful romantic/sexual charms (both normal and magical) have absolutely no effect on them.
* That famous picture of George W. Bush looking through the binoculars and they have caps on (which may or may not have been manipulated;
* That fanvid also has a subtle lampshading of this trope at one point: when Reimu dodges upward to get away from a pattern that doesn't work in 3D, Utsuho simply tilts plane the attacks are on to keep up.
* that Ferra and Torr are actually a symbiotic pair, with Torr requiring Ferra to live as part of their bond as warrior and rider. However, when the Great Metamorphosis hits Ferra, she is practically forced to abandon Torr to die while she undergoes a painful three-year-long transformation that turns her into a large, hulking version of herself. An inversion of the trope happens when a small male is chosen to be her rider.
* That Fiery Girl, also starring Cheng Pei-pei, does this again, with another band of female warriors who did an excellent job fighting an enemy army, although this time they're led by Lily Li instead of Cheng Pei-pei.
* That final was awesome, in fact Taylor says that the ninth frame was his turning point. Davis just barely missed a black pot which would have put him up 9-0. Taylor was able to pot the colors and win his first frame. Davis has said that he "lost the plot" after that, and Taylor began to make his comeback. The final 35th frame was an epic that lasted SIXTY-EIGHT minutes, since each player played so many safety shots. Truly a sight to behold for any cue sports fan.
* that fire fricking GN Missiles!. In the second season, these are moved to the main ship, as they don't need Assault Containers anymore. Yes, they have a battleship with Gatling Guns that fire missiles. Regular Missile Launchers are overrated.
* That first one is drawn from propaganda about SS officer candidate school in Nazi Germany requiring cadets to do the same thing.
* That first one, while not lacking for symbolism, isn't symbolic in the way implied with the quotation marks, what with Big Boss actually unambiguously being Snake's biological father.
* that focused on a different subject matter each episode. It was discontinued in 2002, after Disney decided to stop airing their "classic" programming on the network.
* that fun to think about whilst putting their handiwork to its intended use?)
* that Gabriel was trying to look over her shirt. During the last act, Grace has been abducted. If Gabriel tries to climb the ladder, he'll say that it's no longer fun without Grace.
* That game also has a level on a giant eagle's back. This revelation is foreshadowed when giant feathers periodically fly across the screen.
* thatgamecompany's titles have been met with this at least once, but of particular note comes
* That Girl, Ann playfully waves at a mannequin in a store window that looks just like her. The mannequin winks back.
* That Girl, Don Hollinger put up with years of angry wisecracks from his fiancée's father, Lew Marie (a classic "You're not good enough for my daughter" situation). This continued even during Don's bachelor party, to the point at which Lew stormed out. Minutes later, they wheel in the giant cake and out pops Lew, in exotic drag. The partygoers love the joke.
* That Girl featured the lead, a young Marlo Thomas, and her boyfriend having to share a hotel room.
* That Girl had Danny Thomas in a brief cameo as a priest, just so she could call him "father".

* That Girl puts Peter in the role of Ann. Like her, he playfully waves at a mannequin in a store window that looks just like him. The mannequin winks back and a frightened Peter runs straight into traffic.
* That girl that was geassed to mark a wall at Ashford Academy every day,
* That Girl, thereby explaining the anomaly that had persuaded Ann, and the other jurors, to acquit him.
* That goes double for the sequel. In the opening scene, he manages Cold and
* That Gosh Darn Hippie Show and comedy radio show with a largely autistic cast, including host Kiki "DJ Hippie" Willows.
* That Gosh Darn Hippie Show between DJ Hippie and various "callers", though DJ Hippie always behaves as if they were real and their scripted nature is never acknowledged on-air.
* That Gosh Darn Hippie Show for radio suitability before it was adopted as the title of the show.
* That Gosh Darn Hippie Show phone call from a grumpy old woman who was upset at the number of strange, obscure records played on the show, and demanded that DJ Hippie "play something normal, sonny". DJ Hippie sarcastically agreed to play something normal before cuing up "Normal" by Martin Mull.
* that grand... until he explains that he's going to need it back because he's going to space in a few weeks.
* That Guy Destroys Psionics) who needed to be lectured. She eventually tried to PK him for being annoying and using a cantrip to talk in her ear.
* that guy from that show exemplified this trope through numerous characters he introduced. Pharisee was forever hardened by his exposure to the more horrible acts committed during the war between the Crusaders and Black Falcons. Solomon Koplowitz was a philosophy professor turned
* "That Guy" is actually named Steve Castle. In the script, and mentioned in the audio commentary, otherwise we would never know.
* That guy was an experiment after they managed to obtain an Anarchist Cloning Cylinder. Most clones (Gigglers) are stupid and have very little education/social conditioning, hence the implants with the happy juice. With this guy they got the process wrong. With the new systems they've been testing on him, he now has FEELING on the outside of his body, which leads to fun like "How much will it hurt if I stick this fork into my knee?".
* that guy who is the maker of akumas and the ultimate goal of everyone in the series is to kill him? Well, Allen is half of him. The Earl is as surprised to learn this as anyone.
* That Guy with the Glasses. Almost all of them had been featured as Transmission Awesome's Awesome Blog of the Week before being picked up.
* That Guy with the Glasses, and replaces it. All shot from behind Todd, of course.
* That Guy with the Glasses, and soon it's the original song playing over lip-synching reviewers.
* That Guy with the Glasses and sports Ed's loose crop top from part 3 onward.
* That Guy with the Glasses. And the beverage of choice is uranium slurry.
* That Guy with the Glasses are attractive anyway, fangirls turning the boys into skinny bishies and fanboys making the girls thinner and bustier than they are in real life are both popular.
* That Guy with the Glasses are capable of pulling this off. Examples:
* That Guy with the Glasses) because Linkara later proved to have a real-life girlfriend known as "Iron Liz".
* That Guy with the Glasses critics like) and 150% concentrated evil. People thought he actually liked it, even as his praises were interspersed between scenes of him either throwing up on camera, or trying desperately not to (and ultimately failing). Brad Jones even said he struggled to write positive things about the movie.
* That Guy with the Glasses does this when something really pisses him off, or when a character in a movie does it.
* That Guy with the Glasses, dressed as Inigo Montoya and repeatedly getting the line wrong.

* That Guy with the Glasses (filmed at Magfest, which he was attending).
* That Guy with the Glasses finds dealing with thirty overgrown children hard to cope with.
* That Guy with the Glasses has over 40 contributors and growing, whose videos often reference those of other contributors, making a binge necessary if a fan wants to understand all of the in-jokes.
* That Guy with the Glasses) has several of all of his series/skits on his DVD's.
* That Guy with the Glasses have as much fun as they can with tropes, usually tropes seen in movies the cast has reviewed in the past.
* That Guy with the Glasses have been portrayed as horrific punishments:
* That Guy with the Glasses in Space goes back in time and fixes everything.
* That Guy with the Glasses in Space has these or are complete cyborgs by the time the story starts.
* That Guy With the Glasses is constantly spewing "facts" about Briton. For instance, did you know that all the homosexual people were banished to Norway in the 1800s? Or that goats are the dominant species? 87 foot ring tailed lemurs run amok, and they have the Running of the Praying Mantis which happens every week.
* That Guy with the Glasses is often facing off against all sorts of aliens, ghosts, and Mickey Mouse.
* That Guy with the Glasses, is one of the smarter members. He reviews the best movies of all time, attempting to figure out what makes them so great. You'd be surprised to learn he's 17 with all the classic films he reviews and references.
* That Guy with the Glasses is pretty intimidating by this point...then you consider that as the site goes on there's more and more crossovers and in-jokes between an ever-growing number of contributors, meaning that for everything to make sense you'll need to go all over the site trying to watch everything in chronological order. It's even worse if they happen to have stories that arc over dozens of reviews.
* That Guy with the Glasses, Lori Prince interviewing Marsh Hare and the Mad Hatter about drugs in society states he's never used any and gets called a narc by them in a variety of ways.
* That Guy with the Glasses — jerks to everybody else, but damn if someone else will ever take one of theirs down.
* That Guy with the Glasses or whimsical montage as a weapon, and they can read the subtitles.
* That Guy with the Glasses plays with this by having That Sci-Fi Guy say in an awed voice "Linkara? In Star Trek circles he's known only as... Linkara!"
* That Guy with the Glasses reviewers maintain their own Facebook or Twitter pages.
* That Guy with the Glasses seems like it revolves around this at first. Until the magic becomes all too real...
* That Guy with the Glasses's first "Thanks For The Feedback" — where she goes on a date with the Critic — is horrifying in awkwardness.
* That Guy with the Glasses show that actively explores and plays with the fact that it and other review shows take place within a shared universe and creates storylines around it.
* That Guy with the Glasses specials where Zod speculates that Jesus was probably just another Kryptonian powered by the yellow sun of "Planet Houston".
* That Guy with the Glasses. The effects would be cutting edge a few decades ago in a fantasy film. Today, they're quirky, funny flourishes that anyone with a decent movie-making program can achieve.
* That Guy with the Glasses, the Molassian president has a conversation with his Foreign Relations officer. They are the same guy in different attire.
* That Guy with the Glasses, they were in despair until the final fight scene come. Paw almost say that the filmmakers were leaving the best to last, and then, the Kamehameha. That destroyed every last bit of hope they had.
* That Guy with the Glasses to be able to ham it up when necessary. And sometimes when it's not, too.
* That Guy with the Glasses took this a step further and incorporated Doug himself into the mix, crossing over with his vlogs.

* That Guy with the Glasses trying to come up with an origin story. After several rather ridiculous attempts, he decides to forsake the attempt altogether.
* That Guy with the Glasses. Variously-costumed conventiongoers help him with the chase.
* That Guy with the Glasses was kidnapped by the Game Heroes and made to promote their stuff at gunpoint.
* That Guy with the Glasses when Benzaie shows up, and everyone else who sides with the Nerd over the Critic.
* That Guy with the Glasses). When he comes back to report to Nostalgia Critic, this exchange happens:
* That Guy with the Glasses, where lots of geeks got known for their over-the-top reviews of... well, everything. Even more in the anniversary specials...
* That Guy with the Glasses with the help of Blip on the League of SuperCritics channel. However, various issues as the years went on led to respective dissolutions surrounding Blip's 2015 shutdown. The contributors moved onto their own individual channels: Channel Awesome, Stoned Gremlin Productions, Chez Lindsay, and Todd in the Shadows.
* that had already run for over a year more dialogue and movement into each chapter than Toriyama.
* , that had its release continually delayed because the manufacturing partner didn't have any openings (reportedly the toy would start being manufactured after the factory's main business slowed down, which it never did).
* That Handsome Devil song "Viva Discordia" has the 'stolen kidney' variation happening to a woman named Mona.
* That happens because swords are made with help of cortosis, metal that can short out lightsaber.
* That happens even when she's having a heated discussion with Touma after her unit beats the RGKM the first time.
* that Harry's friends and loved ones will continue to fight in his name, even after Harry seemingly dies loved no one except for her twisted obsession with Voldemort. Actually, a major theme in the books is love. If someone doesn't love or care about anyone at all, chances are they're totally evil.
* that has a great deal of fun with just how stupid the idea of invading Asgard really is.
* that has elements of this, showing great interest and enthusiasm for his wife's company whenever she's willing and the opportunity presents itself.
* That has more to do with attitude of the Congress/USAF than the actual technology fielded. The F-22 and F-35 are marvels of technology in their own right, but the Warthog is the king of close air support. Simply put, no true replacement design has ever been created for the Warthog - the F-22 can replace the F-15, and the F-35 can replace the F-16, Harrier and older F-18 variants, but neither of them (and no other plane, for that matter) can fit the low, slow, heavily-armored, heavily-armed gunship role that the A-10 so perfectly fulfills. Hence, the ol' Hogs
* that have to do with the plotline; usually this is to show that they're distracted.
* That having been said, in the anime adaptation, the prologue shows the aforementioned submarine surfacing to launch its missile.
* that he can transform his skin into metal, something only one other character seems to be able to do.
* that he does all this to compensate for "merely" being a time remnant clone of Barry Allen.
* that he doesn't know. Still, Cain isn't like the stereotypical commissar that shoots his own men at the drop of a hat, which is a huge point in his favor.
* that he has to learn his father's plan for him all along was to understand that it doesn't matter how powerful Inuyasha is, he's still a halfbreed and therefore needs his big brother's help from time to time
* that he himself is forced to relive. It sticks pretty close to the comic version.
* that he indeed grew up without love and had nobody in his large family whom he could confide in. Over time, he became bitter and envious of his twelve older

brothers, all of whom were successful. After his attempted putsch was foiled, he's deported back to the same hell he tried escaping from, is in an even.
* that he in fact recognizes the depicted scene as something he did and enjoyed. It's a setting that enforces this trope in men.
* that he is capable of transformation. When he speaks for the first time he reveals a rather eloquent and almost tragic side, being alone and unsure of his destiny. Megatron is not pleased to discover that his new "Brute" is actually a Genius Bruiser.
*) that he just wants everyone else to be that happy. Yumi is amused at first but quickly gets annoyed and screams at him to stop; the parties he was attempting to pair up have reactions varying from "Wait; really? You think we go together?" to "Dear god; why?!".
* that he meant John McCain, as both he and Lamont look "really old." Lemont ruefully replies that he liked it better when the kid was being racist.
* that her best friend Bon Bon is actually Sweetie Drops, a secret agent of a monster hunting agent gone undercover by Celestia's orders after a bugbear they sent to Tartarus escaped could only respond with a series of these.
* that Hershey) was originally called the "Hershey Bars"; but since advertising in team names was frowned upon, they were renamed and stayed the "Hershey Bears".
* that he's got an arsenal of super weapons after Hogarth appears to die at the hands of the military, causing him to go on a rampage
* that he's only supposed to use in dire situations.) Chouji goes from his usually obese side to as skinny as Naruto.
* that he specifically wanted to avoid the term "Space Marines") who are stated to be well-trained enough that any one of them is equal to ten standard soldiers.
* that he's the Princeps of the realm. Tavi has no more clue about what's going on than anyone else, but he decides to act as if he'd planned for it and use it to add dramatics to his speech.
* that he wants to help the remaining Targaryens reclaim the throne as their revenge against the Lannisters, then Myrcella wouldn't have lost an ear and Ser Arys Oakheart wouldn't have died, which would have prevented Qyburn in providing Cersei's Kingsguard champion for her upcoming trial.
* that he was a massively popular character and the fan revolt would've been too great, so they reworked it.
* that he was carrying with him the whole time) that says, "R.I.P. Here lies maggot. I win. The end."
* that he was not Ali Qazimaj, but a different person named Vital Dapi. Apparently it didn't occur to him that the police might have taken his DNA and fingerprints when he was arrested.
* that he was the great grandson of the main protagonist and his love interest a Damsel in Distress
* That Hideous Strength and therefore can't make babies the normal way.
* That Hideous Strength: A variation: it's implied that using atlantean magic had a subtle negative effect on the user's health, though it wasn't specific what that was. The characters didn't seem to know exactly what it was, themselves.
* That Hideous Strength by C. S. Lewis is a sort of mental torture. At a glance, it's an unremarkable room, but the closer you look, especially at the pictures on the walls, the more unpleasant it gets.
* That Hideous Strength by C. S. Lewis, the villains lock Mark in "the Objective Room," containing, among other things, surreal paintings that quietly eat away at his sanity.
* That Hideous Strength has the N.I.C.E. Institutional Police, which act like any other typical secret police. Oddly enough, the NICE also have a female police auxiliary, headed by a woman who loves to abuse female prisoners.
* That Hideous Strength, Miss Hardcastle a.k.a. The Fairy. She uses cigarette burns to interrogate a prisoner — then she gets so carried away with the torture that she neglects to get any actual information from the prisoner.
* That Hideous Strength: Something rather like this is the undercurrent of the story. By the end, major elements from Celtic — and, to a lesser extent,

Greek — mythology are running around parts of 20th-Century England; per Lewisian reckoning, these are benevolent, quasi-divine entities aligned with Heaven and mistaken for deities by pagans in times past. The overall effect is similar to what one would expect of the reincarnation of King Arthur, which it sorta is.
* That Hideous Strength that nature would normally provide. They had a civilization on the moon as a role model that used demon-possessed sex-golems for sexual pleasure instead of actually sleeping with each other, though it's implied that their own perversions rather than their government were what were actually forbidding sex.
* That Hideous Strength, the new set of villains work for an Enlightenment dystopia that will eliminate organic life and reduce humans to disembodied brains.
* That Hideous Strength: The room was specifically built this way to drive people crazy so they'd be suitable hosts for the demonic powers.
* That Hideous Strength, the title of Head of the N.I.C.E. turns out to be horribly literal. The villains are taking orders from a guillotined criminal's head, which they've kept alive by supplying it with artificial blood. And yes, Lewis was well aware that it wouldn't really work — that's a plot point.
* That Hideous Strength). You'd be forgiven for thinking you got the wrong book until the second third of the book begins and things start picking up. Of course, you get a sense for where things will be going if you can manage to pay attention.
* That High, which is basically FML, but for stoners instead of unlucky people.
* that his mother had committed suicide refuses to hurt them or become like them, and only twitchily mentions his experience in passing to his friends.
* that huge and she really likes him, but she realizes he's rather immature and absolutely not ready to even start thinking about settling down and having a family; meanwhile, she feels it's high time for her to start working on it for herself.
* that humanity did ''something'' millenia ago that pissed off Mother Nature so much that she has spent the ensuing time trying to wipe us off the face of the planet.
* That, if she hadn't become half-demon, would have been "Blow the back of your skull off Seer".
* THAT in a lab accident, he is perfectly able to reproduce it and make anyone invisible (of course, reversing the process is another story). At one point, he was even able to detect when a rabbit had been invisible for a short period of time.
* that in?!") And another during a town hall meeting with Jimmy showing slides of a meteor seen throughout history and ended with a photo of Sheen in a snorkel mask with his head sticking out of a toilet.
* That incident where Head-Baltar appeared to Baltar. Baltar was everything
* That includes at least one case in New Zealand in about 2005, which caused a coroner to issue that very warning. Shows New Zealand teens are far too
* That infamous and quite possibly apocryphal one about the paper that ran with "Local Man Lost At Sea" after the sinking of the
* that in "Neptune Nonsense": when the goldfish Felix is trying to catch has this happen to it, Felix manages to free the goldfish, only for it to turn around and eat all four fish that ate it. Felix quickly decides to find another fish.
* that integrates their super advanced transporter and scanning technologies to create a sniper rifle that can look through walls (no way to hide) and teleport the bullet it fires directly to the target (no way to take cover), turning the archaic weapon into an almost perfect tool of assassination
* that in the MCU, like Vision, Scarlet Witch, Carol Danvers, and Black Panther, are now viewed as 'A-listers', but none of them were ever anymore popular or important than the aforementioned 'obscure' ones.
* that in the morning. Soon after, when Trixie's in Canterlot, she encounters a colt who has to sheepishly explain what's happened to his mane.
* That is a fan made one. Takahashi included one in the memorial book (Art of Ranma ½ in USA). That book also includes a chart about how the main character, Ranma, thinks about each of his rivals/enemies.
* That Is All apocalyptic scenarios to come up is the dead returning to life, but

curiously, it only seems to effect taxidermied animals, most of whom are unable to escape from their stands, "and their eyes are glass".
* That Is All goes through every day of 2012 as it deals with Ragnorak via the awakening of the 700 Ancient and Unspeakable Ones. All the oceans are flooded by a giant sentient pool of blood. All the dogs gather together and eat most of humanity, while the animatronic presidents finish off any remnants. Finally, all the Iron in the world magnetizes, burrowing into the Earth, cutting it in two.
* That Is All. The only creatures that rise from the dead are taxidermied animals, and they are harmless because they are all mounted on wooden planks.
* That is also how Hebrew and Arabic Religion used to work before the Israelites and Bedouins rejected all the lesser gods and decided to worship only the supreme one. According to
* that is a type of advanced science fiction technology that is not used, but only fought over. An example from many serials of the 30s and 40s is a death ray that the good guys and the bad guys fight over.
* That is, for the Prospit players. For the Derse players, their dreams are prophetic in a wholly different manner - they listen to the whisperings of
* that is how people speak in the 22nd Century work in practice: they slip up every now and then.
* that is implied to house an Eldritch Abomination. If the player explores the room, they will find several televisions displaying an open flame.
* That is, in general, lots of features and parameters and "one knob, one function" will contradict each other sooner or later. Most one-knob-one-function synths are rather limited analog synths, and most more powerful machines require menu diving or even a software editor. What happens when both are combined was demonstrated by Jellinghaus: When people wished for a hardware controller for the Yamaha DX7 and the like, Jellinghaus made one with one knob or switch for each parameter. A DX7 patch has got 144 parameters, though, so this thing ended up almost the size of a coffee table and littered with so many knobs that its usability suffered again. And putting almost every last parameter of the Schmidt on its surface didn't make it as easy to use as a Minimoog either, it just relieves you from walking through countless menus.
* That Is It series it was inspired by was written by Yui Hirasawa herself.
* That is nothing new. The chariot-racing fans were a famous terror in the history of the
* That isn't Jerome. He didn't join the band until at least a year later. It could possibly be the legendary "Chin", namesake of their first album.
* That is, of course, when they're not singing about screwing stewardesses on an airplane lavatory.
* That is one of many confessions Spike makes, but was the first one he made while with his
* That is on top of the many women (and men) he slept with individually. There was a reason his third wife was concerned about his wandering eye.
* That is, the tracking dogs had to be primed with a scent, and the scent they were given was of the girls. The police dogs caught the third scent mixed up with them and knew from training that that was the real target
* "That is the worst thing you could have done!" Daphne replies "You would think so", before reluctantly confessing that actually, she had then stalked the patient in question, used Roz to gain access to the patient's office, and ransacked the place looking for information.
* That is unless a player finds the secret Runelord class, which gels with her Merchant class almost absurdly well
* That is, unless you fail to save Tooty in which case she becomes fairly attractive. ...If green skinned girls are your thing. Mumbo certainly likes her.
* That is, unless you happen to reject him as a lawyer over a game of cards..
* That is, until an upgraded version of the superweapon is provided later in the series, and does not have the apparently most story significant restriction of using the weapon.
* That is until MGS4, where they updated to the newer NVG models, with the greyish

green scheme. Though it's called "NVG", it actually seems to work by detecting heat, rather than amplifying light, since it works just fine out in the sun.
* That is, until the Apocalypse World storyline allowed the writers to bring back a number of beloved supporting characters in their darker, alternate timeline version.
* that it all is rather than evoke any kind of rage, horror or revulsion.
* that it is Cool, but not both at the same time. Okay, Heisenberg never said any such thing, but it would be Cool if he had.
* that it kills you in three turns unless you have equipment that averts death.
* that it's making light of the situation, so they switch to another theme which satisfies her.
* that it's neither, he's just obsessed with bringing back his wife and will use any means to do it.
* that it sounds like what's in the subtitles, not what the lines are supposed to be.
* that it's the aurora borealis. Even when his mother is calling for help, he pretends that everything is fine.
* that Jesse refuses to leave the train without her, and the two are able to eventually leave together.
* That joke above about how DC traffic would thwart any invasion is actually the basis of
* that kept him from becoming a complete psychopath in the games. Shes also the only person that can reliably get him to calm down when his short temper gets the better of him.
* that kinda defeats the purpose. In fact, they only utilize this scream when fighting other tigers, capitalizing on the tiger's very sensitive hearing - it hurts them almost as much as the teeth and claws do.
* That kind of thing happens a lot in Norse mythology. The gods were so afraid that Loki and his monstrous children might turn against them that they imprisoned them all in various unpleasant ways...
* That Lady in Ermine. Angelina's husband thinks she slept with the Colonel to make him leave (it was the ghost of her ancestor in a dream, convincing him to leave).
* That Lady in Ermine wears nothing but an ermine coat, save for one scene.
* that large. Getting hit by a Dhole requires you to make a Luck roll; a success means there is enough of you left to hold a proper funeral.
* That last bit happens only when the "safety switch" is off, which allows the robos to use their abilities to the fullest extent. Regular, day-to-day Holosseum battles are massive
* That last one is pretty common in computer games, among other things. Want to add nightvision to your product? Simply cut the red and blue color channels and, voila. Instant nightvision! Well, unless you forget to
* That last one lost him a bit of standing., which was well-received and stuffed to the gills with all the Sorkin tropes we know and love.
* That last one was a parody of an actual petrol advert from the time, which showed a car breaking through paper banners every ten miles.
* That last part is actually quite ironic since Ulrich and Kiwi have
* That last part is because he was the only Uchiha who opposed a planned hostile takeover of Konoha.
* That last part isn't nearly as silly as it sounds. A nuclear detonation creates a massive electromagnetic pulse, powerful enough to fry integrated circuits and other electronic components that are outside the blast radius. (For example, the
* That last part was not a metaphor, it literally lifts the gibs back into a holographic template.
* That last part where all life in the galaxy is destroyed also happens if you allow Ideon to be destroyed during battle.
* that leads to Carlie and Devin getting seriously injured in the ensuing scuffle.
* That length of time may also be used as the amount of time needed to study to become an accepted member of a particular coven, or to become a priest/priestess.
* That Liar Lies: A person is called out for or accused of being a liar.

* That line about hair-dryers was likely bitter sarcasm and Melmac was actually struck by some unspecified threat.
* That line was cut from the film for obvious reasons, but Mayella's actress Colin Wilcox-Paxton said she communicated the incestuous relationship through her body language and facial expressions. She revealed in the documentary, which comes with the deluxe DVD set, that she was acutely aware that Mayella's experience was real. "I saw these girls on the streets of violence, these very underprivileged girls. These girls from awful, awful backgrounds. I mean, most of them took it for granted they'd be molested by the time they were... certainly 12, by a father, an uncle, a brother — or someone down the road."
* That Little Band of Gold and his buddy Ford sneak out of the opera, Ford's women trailing behind. The women exit and the friend shucks off her coat, revealing a lush curvaceous figure. Ford grins and makes the universal "hourglass" sign with his hands. (Ford's wife is much more slender.). Fatty for his part makes a beeline for the friend, refusing Ford's attempt to palm his wife off on Fatty.
* That little tidbit of text isn't nearly as funny without the context of
* That Long-Haired Creepy Guy, both of whom died within days of each other.
* that look exactly like his feet, but with blue soles stuck to them. Strong Bad lampshaded this on one occasion.
* that looks exactly like his own bald scalp, complete with the now missing hairs.
* that loves saying any insult or demeaning remark he can to annoy or enrage people for his own amusement. Even his allies on Salem's inner circle aren't immune as he loves screwing with them the most.
* that made even his parents worry, and if you know about his parents, that says a lot.
* that made it into the show proper (as Cliff Huxtable) would look in the same direction and ask what was so interesting about the ceiling.
* That magic item? That was only included because they wanted him to be
* that make him popular out of universe and make him seem annoying to his enemies.
* That makes it sound like she may or may not have been left drifting in deep space. Unfortunate implications, indeed!
* That Makes Me Feel Angry: A character states out loud the emotion they are feeling.
* That Makes Me Feel Angry: Character expresses emotions by stating how they feel.
* That Makes Me Feel Angry express emotions without spelling them out.
* That Makes Me Feel Angry: It makes me sad when writers resort to just having their characters say what they feel in so many words.
* That Makes Me Feel Angry, with consecutive numbers depicting contrasting emotions - a lilting love duet followed by a furious vengeance aria, for instance. If the idea is to juxtapose readily identifiable emotions for maximum effect, it makes sense to flag them in the libretto.
* that make them out to be an entirely different genre than the actual film.
* That Man from Rio: Adrian, pursuing his kidnapped girlfriend to Rio, is befriended by Sir Winston, a young street kid who saves Adrian's hide a couple of times.
* That Man from Rio: Adrian rescues his girlfriend Agnes when she's abducted in Paris and spirited away to Rio, where she drags him into an adventure with one hair's-breadth situation after another. As they're driving to Brasilia in their underwear (getting caught in a fierce storm shortly before) he has enough and pulls into a police station. He turns himself in, running off a list of offenses — entering their country without a passport, using a plane ticket he stole from an old pensioner, getting into fights with several people, including policemen, indecently dressed, and driving a stolen car — but as he speaks French the policeman doesn't understand a word. Adrian throws his hands up and exclaims "Nothing — just Rio and Brasilia!" and the policeman cheerfully points the way. Back on the road he mutters "I should take up crime!"
* That Man from Rio. As Adrian is shining a shoeshine kid's shoes (not having any money for the kid doing his) — a fat guy in white brushes the kid aside to get his own shoes done. Adrian polishes his white shoes black, and, of course, he

can't see his own shoes.
* That Man from Rio begins with a thief stealing an ancient Mesoamerican statuette in a museum, killing a guard instantly with a poison-dart pistol. The police initially suspect cardiac arrest before the dart is discovered.
* That Man from Rio: Early on, Adrian the hero sees his girlfriend knocked out and stuffed into a car — he grabs a policeman's motorcycle and pursues the kidnappers.
* That Man Is Dead: A person takes on a new identity and regards their original persona as non-existent.
* That Man Is Dead in the prologue of the first book when his birth name is used, and Asmodean voluntarily offers his birth name.
* That Man Is Dead they've changed so radically as to become a different person.
* That Man Is Dead: Upon taking a new identity, the person regards their original identity as dead.
* That Man is the creator of the Gears and main villain of the setting, with a brilliant mind, access to high-level magic, and several
* That many maps require to bring a specific writer or a certain number of writers in a certain class to advance to the boss. These maps are often at high difficulties and raising a writer to meet these levels is incredibly time-consuming, so if they call for writers you're not focused on raising or just plain don't have, you're stuck. Not only that, these requirements can sometimes get downright
* That match would indirectly lead to Fischer's downward spiral. The 1992 Fischer-Spassky match was played in what was then known as Yugoslavia, which was under embargo from the UN and the U.S. during the bloody conflict in that region. After President Bush Sr. issued an executive order that the U.S. would comply with the UN's embargo of Yugoslavia, Fischer, an American citizen at the time, was told that playing the match in Belgrade would violate US and international law. Fischer appeared in a press conference where he spat on a copy of the president's executive order and played the match anyway. After the match, Fischer would spend the last years of his life fearing legal action in the U.S., going from country to country seeking asylum, attempting to renounce his citizenship, and publicly making anti-American statements before settling in Iceland.
* That may be explained by the fact that the original character designs were made in MS paint.
* That may have been a transitional commercial. When Overstock.com started, they called themselves the big O, and made commercials with the obvious entendre. People thought they were a sex site.
* That may or may not be the point of the Steely Eyed Missile Men; create unusual and ingenious solutions to unexpected problems under tight deadlines. Besides which, while the vague
* that — which naturally turned around to bite him in the behind when he started taking levels in Paladin, a class that runs directly off Charisma.
* That melody that everybody associates with clown cars and elephants? The one that goes doot-doot-doodle-doo-dah-doot-doot-doo-dah?
* that Mercer created in the second game also have this ability, more so with the other Evolved who, unlike Heller, seem to have just one special ability and dual armblades from the shoulder down.
* That Metal Show, Eddie Trunk can't stand when the co-hosts and guests "help" him when he's trying to puzzle out a Stump the Trunk answer, mainly because said "help" is anything but.
* That Mickey was Rose's boyfriend, but she chose the Doctor over him, and Martha pined after the Doctor, who didn't notice and was hung up on Rose, makes this
* That might be justified because The Mole pulled an inversion of this trick in Season One. In that case the "Stupid Team" got to go with Anderson Cooper directly to the hotel because they were too "stupid" to find the hotel. The other two teams (Resourceful and Smart People) had the harder task of following the clues to find the hotel.
* That might be the case in the UK, but "Air-un" is still the standard

pronunciation of the name in Copland's homeland of the US. Star
* That Mitchell & Webb Sound involves two playwrights struggling to find inspiration for a new farce, while the typical events of one unfold around them. This includes mistaking a policeman for a stripper (and then vice versa).
* That Mitchell and Webb Look about, and passionately tries to beg forgiveness for... that time he left the fridge door open and a whole quiche and some milk went bad.
* That Mitchell and Webb Look about how the KKK acquired their distinctive uniforms.
* That Mitchell and Webb Look, a fictional and completely non-sequitur number guessing game show. One episode has the host saying "So Julie, you're ahead on 77; Simon, you trail on 83"; another has "Autumn" appearing when he asks for time on the clock.
* That Mitchell and Webb Look. After several minutes of flashing lights, a safety rail being placed around him, and a voice announcing "Trap door number four is about to open, please vacate the area" he got up and left.
* That Mitchell and Webb Look, after three days with nobody getting Numberwang, they go to Sudden Death, in which the first person to die from the deadly Numbergas wins.
* That Mitchell and Webb Look. A man comes in dying from a car crash; the homeopathic doctors suggest such amazing cures like getting a bit of car that hit him, diluting it in water and shaking it, pink quartz, and drawing some life line on his palm in pen. It doesn't work.
* That Mitchell and Webb Look, and apparently knowing more about the Event than anyone else.
* That Mitchell and Webb Look and he responded by offering to get his cock out. He was ultimately fired after failing to understand the difference.
* That Mitchell and Webb Look angrily yelling at a subordinate over the phone and slamming it down... only to pick it back up after a few moments and apologize sincerely for being so rude and unprofessional.
* That Mitchell and Webb Look, an important cabinet meeting is interrupted when one of the members has to go to the bathroom.
* That Mitchell and Webb Look, an unidentified infectious disease, and the complete and total loss of near-all human knowledge.
* That Mitchell and Webb Look (apparently a standard suggestion, as one of the others asks if the crack has already been mentioned when he joins the group).
* That Mitchell and Webb Look are told they have to cut the scene where the Dame is raped by the Principal Boy, as the local council has decided it isn't "politically correct." The actors are unimpressed and argue that the rape scene is always the audience's favourite part of the show.
* That Mitchell and Webb Look asks the evil genius to call him by his first name:
* That Mitchell and Webb Look as Sullivan asks "you don't think we've ... cheapened ourselves?" and Gilbert replies "Nah."
* That Mitchell and Webb Look At one point, one of them accuses the other of being taken in by Allied propaganda, pointing out that naturally the Allies would be trying to frame them in a poor light. The other retorts that while this might be the case, the Allies didn't also get to design their uniforms.
* That Mitchell and Webb Look, but luckily there's a failsafe so that he can be deactivated whenever he's shown a picture of a chicken.
* That Mitchell and Webb Look, but which appears to mostly consist of saying random numbers. And everything not related to the game itself is equally bizarre.
* That Mitchell and Webb Look clues ("It's been a hell of a week, to be honest with you.") He only knows he's caught the perp when they start doing "The Evil Voice".
* That Mitchell and Webb Look contained an instance of no Numberwang being scored for over three days! So they went to Sudden Death: The first person who dies from the poisonous Number Gas wins!
* That Mitchell and Webb Look could resolve the situation much more quickly and with less risk.
* That Mitchell and Webb Look, David Mitchell and Robert Webb are arguing about the

merits of using a dog fired from a cannon as a method of informing the house about who's at the door before you ring the bell. Webb storms out to test his invention, and the camera stays with Mitchell in the living room for a moment. Then a dog is fired at the window. It doesn't break as intended, and the bloodied fake dog slides down the window with the traditional sound effect. Accompanied by this beautiful piece of dialogue:
* That Mitchell and Webb Look demonstrating his "Giant Death Ray", along with a "Giant Laser-fitted Armored Scorpion Of Death" - turns out his name is Professor Death, and he's horrified at the President's asking if these (obviously lethal) machines might have military potential. His intention is for the Giant Death Ray to be the world's first bar-code reader — or, with the power turned up, the world's first laser eye surgery device. The scorpion's tail fires only "helpful bullets." They then of course push the idea to silliness: "No! I created the Doomsday Bomb to help mankind, not destroy it!"
* That Mitchell and Webb Look". Even in a case when he's got no evidence, because after all, only murderers do the Evil Voice.
* That Mitchell and Webb Look (except the real Dönitz being a bit more aware of the way the Second World War was going for the Germans, of course).
* That Mitchell and Webb Look featured David Mitchell and Olivia Colman as a married couple. Olivia is slightly niggled by David's habit of sleeping with his secretary and the fact that he refuses to start a family...but this is only a front to cover up the heartrending distress she suffered when he left the fridge door open.
* That Mitchell and Webb Look features "Angel Summoner and the BMX Bandit"... no points for guessing which one of the pair falls into right this trope.
* That Mitchell and Webb Look, filmed around the same time, in which she appears heavily pregnant throughout. Kind of helps that it's a sketch show, however.
* That Mitchell and Webb Look fine, but now he's poorly from too much electric."
* That Mitchell and Webb Look frequently featured the stars lounging around on set in-between takes. One particularly memorable instance lampshades how the supposedly documentary-esque content of these sketches were in fact just as scripted as the rest of the show.
* That Mitchell and Webb Look getting them from the van guys, who they then beat up.
* That Mitchell and Webb Look going to Sudden Death, where the winner was the first contestant to inhale enough of the "poisonous number gas" to kill them. We are told that the number 2 is deadly to humans, and it can be seen floating in the tanks.
* That Mitchell and Webb Look had a boy in the hospital from severe embarrassment from his parents, with only a few months to live. His parents try to speak to him, but only end up killing him.
* That Mitchell and Webb Look had a sketch where Neil Armstrong has embarked on a new career as a singer-songwriter and his manager tells a prospective interviewer that he will not be taking any questions about walking on the moon.
* That Mitchell and Webb Look has a scene with a creepy director discussing a nude scene with an actor that gets around to this:
* That Mitchell and Webb Look has a sketch involving a real estate agent advising a woman who he learns is a counselor for torture survivors. He gleefully presses her for details on the worst thing that's happened to one of her patients, despite her and her husband warning him not to. He comes to regret not taking their advice.
* That Mitchell and Webb Look has Colin, the infiltrating robot. Who has a bucket for a head, and uses his clearly mechanical voice to say things like "Does not compute."
* That Mitchell and Webb Look has David Mitchell doing a hilarious spot-on version of Mrs. Danvers playing this trope to Rebecca herself, comparing her disdainfully to the second Mrs. De Winter!
* That Mitchell and Webb Look has the "All-Party Committee to Combat Footling Social Misunderstandings" introduce their proposal for a standardized method to ask for an extra chair in noisy bars. This is followed by their guidance not to flush when an overnight guest and risk waking your host... unless it was a poo, in which

case you should, and follow up by shouting "IT WAS A POO! IT WAS A POO!"
* That Mitchell and Webb Look has the iBag, which boasts thousands of songs... in your head, and complete isolation, because it's a paper-bag that the user puts over their head.
* That Mitchell and Webb Look have just corrected them, something the man genuinely hadn't thought about.
* That Mitchell and Webb Look, he is disgusted and attempts to smash the devices:
* That Mitchell and Webb Look his horse is a talking animal, and makes numerous efforts to try and break the ice, only for the horse to 'snub' him each time. This tends to result in a very emotional tantrum on the part of the farmer very quickly. The horse, however, actually doesn't talk for the same reason that most horses outside of this trope don't talk.
* That Mitchell and Webb Look includes "behind the scene" sketches of the two main actors talking to each other in wardrobe, in makeup, in a planning session, filming another sketch, etc.
* That Mitchell and Webb Look interest in going out with this unpleasant woman, and her responsiveness to his abrasive come-ons indicate that she has some real self-confidence issues and should probably seek help with her self-loathing, but Cyrano convinces him to go on anyway, since at least he can sleep with her tonight. Eventually the man refuses to continue, but Cyrano keeps shouting out the advice anyway and actually jams a small packet of cocaine into his hands, which the girl mistake for his continued efforts and she drags him inside.
* That Mitchell and Webb Look international and televised like the real Olympics.
* That Mitchell and Webb Look in the "Community Support versus Police" sketch.
* That Mitchell and Webb Look involved the new techniques of hitting patients with sledgehammers and frying pans.
* That Mitchell and Webb Look involved the police trying to find the "Identity Killer". He, among other things, put t-shirts with a photograph of himself on his victims, left his driver's license and passport on the scene, and hung out at the police station while detectives debated the case.
* That Mitchell and Webb Look involves a filmmaker who doesn't appreciate this trope, and whose films are constantly full of irrelevant, everyday details which are at best a waste of time and often actively misleading for the audience. They have delicious names such as "Sometimes Fires Go Out" and "The Man Who Has A Cough And It's Just A Cough And He's Fine".
* That Mitchell and Webb Look involves two men who share an office, one of whom is a hostage negotiator.
* That Mitchell and Webb Look, is a parody of this in his prosecuting style: "Did you kill that woman?! Did you kill that woman?! Did you kill that woman?!", which is entirely ineffective until he pulls out a gun and shoots it above the witness' head, at which point he agrees "Yes! Yes whatever you say!"
* That Mitchell and Webb Look (it doesn't go as far as a divorce — the man makes a heartfelt apology for leaving the fridge door open, and they make up. Then they joke about what a scamp he is for not using protection while having his affair).
* That Mitchell and Webb Look It's hinted that this is not the worst part of the "Event".
* That Mitchell and Webb Look, like many sketch shows, have done a couples of these. Notably cressps;
* That Mitchell and Webb Look?") making the final of the Ashes against a cheating German team (for those who don't know, The Ashes is a series of five matches between England and Australia. There is no 'final', it's just a best-of-five scenario).
* That Mitchell and Webb Look. Mitchell portrayed a series of incredibly haughty service people treating Blair-era Britons with disgusted contempt for failing to meet his antiquated, impossibly high standards. It started with a waiter and continued on to a vicar and a tailor.
* That Mitchell and Webb Look movie he's ever seen, that the Allies are in the position of 'underdogs', and he's never actually seen a story where the good guys

start off strong, have a few setbacks, and then go on to win anyway:
* That Mitchell and Webb Look named Professor Death has created a death ray. However, it's actually harmless and just named after him. At the first mention of weaponizing any of his inventions he begins to destroy them with a wrench.
* That Mitchell and Webb Look parody facing off against a Le Chiffre parody, both being fed lines and info by agents... who turned out to be the exact same guys in a van.
* That Mitchell and Webb Look. Prizes include 'fuel' and a traffic cone, named as 'we don't know, but they're everywhere'. Strangely, it is mentioned twice that "the Event" happened only about two and a half years prior. Of course it's also mentioned that many people were blinded by the event, everyone takes regular medications, and sex is now very difficult because of all the vomiting. The Event messed people up in a lot of different ways.
* That Mitchell and Webb Look, Robert Webb plays a heroin addict that gets his favorite thing in the whole world for Christmas from everyone except his grandmother, who got him cocaine. His mother quietly offers to take it back and exchange it for more heroin.
* That Mitchell and Webb Look, Rob refers to the original scandal as "Watergategate" on the grounds that, otherwise, what would you call a scandal about water?
* That Mitchell and Webb Look sketch about a 'wacky guy' who makes a bet that he can make a cup of tea for everyone in Belgium.
* That Mitchell and Webb Look sketch features a pair of self-employed work-from-home types who meet at a party and, while their wives are getting the drinks, admit to each other that they've yet to fully overcome the "have a lot of covert wanks while my wife is out the house at work" issue.
* That Mitchell and Webb Look sketch had a brilliant example of this, parodying the trend of news reporters asking the public for their opinions on the news by having them do this when reporting on an unstoppable alien invasion. Though they are eventually obliterated, it's not before they discuss possible results, comment on the progress of the destruction, and open viewer mail.
* That Mitchell and Webb Look sketch set in the research department of haircare product makers Laboratoire Garnier, Monsieur Garnier congratulates one lab technician on the invention of the word ‘Nutrisse’ - "Which sounds like ‘nutrition’ but doesn’t guarantee it."
* That Mitchell and Webb Look spoofs Narnia, where a couple are thinking about buying a new cupboard and the salesman says it leads to Narnia. They ask to "try it out" and when they reappear they're king and queen of Narnia and five years have passed. He's still not sure about buying the cupboard, though.
* That Mitchell and Webb Look subverts this magnificently; a man is showing holiday snaps to his friend, and it seems that an unpleasant shot, which we have to take their words for, is an anomaly. However, it turns out that the man has delibrately taken pornographic pictures to try to get his mate into it.
* That Mitchell and Webb Look suggests that even the hosts cannot determine Numberwang without the help of Colosson, a supercomputer which has extreme views as to what should be done to things that aren't Numberwang.
* That Mitchell and Webb Look's wife Abigail Burdess played his partner or wife in one sketch on the show (along with many other characters) while their baby was played by the pair's real daughter.
* That Mitchell and Webb Look that the man in question met with an accident.
* That Mitchell and Webb Look "the BMX Bandit", who struggles to look relevant next to his nigh-omnipotent partner.
* That Mitchell and Webb Look. The BMX hero keeps suggesting clever ways to fight the villains with his BMX bike, but the other hero keeps pointing out that simply summoning an army of angels would solve all their problems.
* That Mitchell and Webb Look - the hapless Hennimore has to look after two different groups, the Murder In The Dark (MITD) club, and a wine-tasting day for a charity for nervous incontinents (Nervous Incontinents Tasting Day - NITD), while simultaneously having to deal with a printing press that keeps switching Ns for Ms.

What a mightnare.
* That Mitchell and Webb Look The mysterious beings known only as "Them" have electronically lowered voices, as demonstrated with the only one to speak played by the normally much higher pitched Mark Evans. It helps sell just how terrifying They are.
* That Mitchell and Webb Look. The Poirot expy knows that he has found the killer when a mousy, frumpy woman he has accused starts doing 'the evil voice', using a cigarette holder, wearing sexy lipstick and showing more cleavage even though she is ostensibly still wearing the same dress.
* That Mitchell and Webb Look. This culminates in his taking a hammer to the "Doom Melon." Since the Doom Melon then immediately goes squish, he sheepishly admits it still needs some work.
* That Mitchell and Webb Look." This was years before the cover-up scandal exploded.
* That Mitchell and Webb Look to the inevitable chaos that the boss comes back to.
* That Mitchell and Webb Look to the point that the audience doesn't even need to see it is a big part of the joke.
* That Mitchell and Webb Look used a version of this; an estate agent pesters a woman who works with torture victims for the worst torture story she's ever heard. There's a cut-off, and the agent comes out absolutely terrified, barely standing and appalled at the callousness of life.
* That Mitchell and Webb Look Utilized in an awkward meeting between a man, his ex, and his ex's new boyfriend. Except...
* That Mitchell and Webb Look when the detective manipulates a woman into doing "the evil voice" and eventually an entire Motive Rant that ends in her suicide. He says that it's better this way, as he didn't have any other evidence and not all courts accept "the evil voice". He also accidentally provokes someone else into giving one, identical in tone to the first, except about not flushing the toilet instead of murder.
* That Mitchell and Webb Look where a group of people are holed up in a nuclear bunker playing a game show and broadcasting in the vain hope somebody is actually watching. It all focuses around "The Event"; the only interesting thing any of the characters can think about but are sworn not to talk about for various reasons. The most probable event would be a nuclear war.
* That Mitchell and Webb Look, where (in a ridiculously simplified parody of medical programmes) a doctor pulls off a plaster and says 'That Never Gets Any Easier'.
* That Mitchell and Webb Look, where Stone Age people are trying to reconstruct a murder in which someone was hit with a rock. The reconstruction involves hitting one of the "police" with a rock. This kills them, prompting one of the others to say "good reconstruction".
* That Mitchell And Webb Look, where two lazy writers try to make a heartwarming British underdog in sports film, and find that Microsoft Word comes with a special program for anyone wishing to do so. It tells them their first idea, about tennis, has already been done using the very name they wanted to use. So they just make up some crap about cricket instead.I
* That Mitchell and Webb Look, whereupon the detective remarks, "It is better this way. Some courts, they do not accept the Evil Voice as evidence."
* That Mitchell and Webb Look which features a sketch about two lazy script writers who do not research the films and TV shows they write. One of their productions is a parody of "Shark" about a defense attorney becoming a prosecutor. When the character is asked why he used to defend known rapists, he responds, "I don't know, I guess I just liked rapists." Then he laughs and says that that's not the real reason.
* That Mitchell and Webb Look; which makes a song out of "a guinea-pig realizing it's about to be put down", "a boy begging not to be caned", "a horse being kicked in the testicles", "a middle class family separated in a cave system", and a prisoner saying the actual words "Anything Can Be Music".
* That Mitchell and Webb Look who go on a quest to 'win the Ashes' and turn around

the fortunes of their town. The sketch is deliberately entirely inaccurate in its depiction of the sport, such as a coach who 'trained the Manchester United team when they won the European Cricket Cup'.
* That Mitchell and Webb Look, whose goal is to make sure that everyone is ever so slightly drunk because drinking actually does make you better at stuff instead of just over confident like most people believe.
* That Mitchell and Webb Look with Mister DeWinter constantly brooding on what his second wife is going to be like, much to Rebecca distress and confusion.
* That Mitchell and Webb Look with two TV writers who outright state that they can't be bothered to do any of the research that their work needs, whether it's a medical drama, courtroom drama, or science fiction.
* That Mitchell and Webb Sound And even the staff are making sure everyone knows about their crippling phobia of beer...
* That Mitchell and Webb Sound, a radio programme. In multiple segments, Webb's character insults a woman's dress sense, weight or intelligence, eventually turning into a full-blown Breaking Speech. When the woman has been reduced to a wreck, Webb asks for a date, to cheer the woman up.
* That Mitchell and Webb Sound be "don't tell a lie", it's "don't leave as the sole guardian of a flock of sheep someone you've decided to ignore", when the sheep's owner, the boy's nephew, is taken to court.
* That Mitchell And Webb Sound, both Mitchell and Webb have their moments:
* That Mitchell and Webb Sound has a biscuit insurance salesman. When he actually manages to make a sale, he quickly rattles off:
* That Mitchell and Webb Sound has a woman and her husband half-heartedly arguing about his having an affair. Turns out she's really just itching to pick a fight because she hasn't got over the far worse trauma caused by him leaving the fridge door open a week earlier. She had to throw out almost a whole quiche!
* That Mitchell and Webb Sound has Detective Tortoise, whose quirk is that he's a tortoise, a fact he makes sure to remind the witness of constantly. Partway through it's revealed that this is not true. His real quirk is apparently that he's a human being who believes, and has somehow convinced his colleagues, that he's actually a tortoise.
* That Mitchell and Webb Sound: One sketch has a man crushed by a falling piano, who then learns he agreed (while on a drunk stag-do) to leave his body to evil, and the man's come to collect.
* That Mitchell and Webb Sound: One sketch has the jerkass employees of Brown's Orthapaedic Supplies sending the work experience kid off on one of these... through the Stargate they've got in the supply cupboard. Their boss says that while it is mildly funny, no-one's seen or heard from the kid in three days. We never do learn what happened to him.
* That Mitchell and Webb Sound - Room 102 (oh no, don't exploit my crippling fear of beer and intimacy!)
* That Mitchell and Webb Sound strictly by the book, and spends more of his time reporting other officers for minor uniform infractions and filling in meaningless HR paperwork about how effective his meetings have been than investigating the serial killings he's been assigned to solve.
* That Mitchell and Webb Sound: The Ministry of Things Which Are Apparently True, who spread rumours about things which are apparently true, until you think about them for more than five seconds. Budget cutbacks mean they've had to downgrade the quality of their lies, and have been merged with the Department of Things Which Are Suddenly Everywhere.
* That Mitchell and Webb Sound there was one that SHAVED YOU CLOSER STILL.
* That Mitchell and Webb Sound: The wedding planner called up before the Little Old Lady Job Justification Hearing, after realizing that essentially her job is in fact redundant.
* That Mitchell and Webb Sound What sounds like a typical advert for a brand of bread or butter eventually turns out to be an advert for... petrochemicals, complete with a voice cutting in to proclaim "BUY MORE PETROCHEMICALS!"
* That model, Zelma Davis, was actually a vocalist herself, and sang on many of

the tracks off C+C's album,
* that moment. The Nyx find navigating this language as easy as breathing, but other species find it literally impossible to understand it. Even when they speak other languages, they have a strange way to use tenses, often using the future perfect tense at all times, that makes them difficult to understand.
* That most dreaded and contagious of schoolyard infections: Cooties!
* that much better. (It should be noted that heavyweight has a much, MUCH wider range of allowed weights than any other weight class.)
* that murder King Oenomaus and marry his daughter Hippodameia to seize his kingdom. Granted, Myrtilus tried to rape Hippodameia, but Pelops still reneged on his promise to give Myrtilus half the kingdom.
* "THAT MUTHAFUCKA'S DEAD!!" followed by a thunderous mix of cheers and ovation pretty much sums it up.
* That Mysterious Thing: A character mentions something while describing it in a way that we don't know exactly what the thing they're talking about is. Even the person describing it may not know.
* That Mysterious Thing: Characters refer to something in ambiguous terms so the audience won't know what it is.
* That mysterious woman (who set up Cameron's twin brother for manslaughter) calls him and Kay to taunt them on "the game is just beginning" and they have no idea where to look for her.
* that). Naturally, this all extended to space travel wherever applicable.
* that need her training due to some unspecified future event. Those to whom she offers her assistance tend to die horrible deaths — or worse.
* that Nobel) invented dynamite and owned huge weapons factories. He created the Nobel Prizes after a scathing obituary was written about him being a "merchant of death" (after a mix-up where his brother died and that paper thought it was Alfred). He willed the bulk of his estate to awarding the prizes so he wouldn't be remembered that way.
* That non-operating double chairlift at Loveland that runs between Loveland Basin and Loveland Valley, crossing over US Route 6, is Chair 5, which was decommissioned around 2003 but hasn't been removed.
* That Nostalgia Show: Our world, as you remember it, 20-50 years ago.
* that numerous—there's one on his head and three on his flank. The problem probably is that he's so low-to-the-ground (as crocodiles tend to be) that the shots have been glancing. A standard automatic rifle would probably be enough to kill him if you could only hit him properly in the flank.
* That Obscure Object of Desire as the same woman is turned into two — one the virgin, the other the whore.
* That Obscure Object of Desire. Hell, it took two actresses to carry all this vampishness.
* That Old Feeling and he was married to an actress played by Bette Midler. His victims are always actresses.
* That Old Feeling, Bette Midler plays a movie star who is frequently chased by a certain paparazzo.
* That Old-Time Prescription: Primitive healers using old-fashioned medicine.
* that Omega business", the Doctor is known only as a disgraced exile apparently linked to a despised 'dirty tricks' agency.
* That One Achievement: A video game achievement or trophy that frustrates the player because it's really tricky to unlock.
* that one) also revealing herself as biologically male. Seya is left rather confused by it all but they eventually become friends.
* That one, although butchered, meets all the technical requirements of a real joke, because it still uses the wrong meaning of the word 'sticky', i.e., like a stick. The problem is that the setup is screwed up, as that sort of joke is supposed to make you think of an 'offensive' answer and then swap out a different one, like the classic joke 'What's long and hard and full of seamen?' 'A submarine.' Without that setup, just saying 'brown and sticky', it isn't very funny at all. (And with the setup, those sort of jokes stop being funny about the time

kids start telling actual dirty jokes.)
* That One Attack: A boss fight has one difficult-to-dodge attack that instantly kills the player.
* That One Boss, as well as the dev team's habit of changing the fight if someone beats him, has spawned numerous strange theories about how to bring him down.
* That One Boss has Nihil, which shuts down Wrath. As long as you got her back (not that it's easy, mind you...), beating him is a cakewalk.
* That One Boss (same with the Spider Mastermind, to a lesser extent).
* That One Boss), they are more than capable of fighting off the other monsters that attack the ship.
* that one game in Chuck E. Cheese's that doesn't work anymore. Somehow Anakin plays straight into his hands at every step, despite Palpatine's "manipulations" consisting of genius philosophy like "good is a point of view". Anakin apparently went through Jedi training completely without absorbing a morsel of knowledge, as he must consult Yoda as an adult Jedi Knight about dealing with his fear of loss, which is evidently a key element of the training he supposedly completed. Anakin sees Palpatine as a good friend and mentor despite his constant obvious attempts to turn him against the Jedi Order, convince him to go against his moral convictions and kill defenseless enemies, and leave his old master Obi-Wan behind to die. Then, Palpatine makes himself too easily indispensable to Anakin by telling him A STORY about a Sith who could keep others from dying, ensuring that Anakin will always stubbornly save his life, instead of asking for proof he can do what he says (which he can't).
* that one) had the stones to publicly admit to this in one of the most celebrated autobiographies of all time. Bonus points for deliberately misbehaving so his teacher would spank him.
* That one is about an inexperienced man attempting the 69 position with a partner who is suffering from flatulence.
* that one) is a master at the slasher smile from his numerous villain and exploitation film roles throughout his career.
* That One Level: A video game level that causes frustration because it's insanely hard to beat.
* That One Level campaign modes would have the floor act like this. Even worse when it's just you skidding all over, whereas the opponent is as solid as a rock.
* that one) made a Facebook post in which opposed abortion, calling it wrong even if "the child's host (some refer to them as mothers) wants to kill it". This caused outrage for apparently dehumanizing pregnant women as mere "hosts" rather than human beings in their own right. His actual intention was to sarcastically use the same language that a few pro-choicers have used, whereby an embryo/fetus should be considered a parasite and the mother the host. But this line of pro-choice argument is sufficiently obscure, and Martin's wording sufficiently awkward (the tone switches mid-sentence from "what I really believe" to "what the other side believes"), that it came across differently.
* That one makes a bit of sense since he's dressed up as someone who probably knew those things, so the knowledge was part of the costume.
* That one of them has been tricked and is no longer in control of her host, Zola's, body. Zola plans to use this weakness to convince the other Others that she is one of them.
* that one). One of those dreams is so trivial, just to blow a whole planet apart with a demolition cannon.
* That One Player causing friendly fire casualties because they were that worked up and paranoid after Dslyecxi had spent the prior 10 minutes or so picking them off one or two at a time.
* That one references a real joke (the punchline usually has 'witches' instead), and it's dirty. You can see it on
* That one's a relatively minor mistake because Article 134 (ie. the "General Article") is often used in similar "catch-all" situations for enlisted personnel. Though the charge is usually phrased along the lines of "Bringing discredit to the service" or "Conduct prejudicial to good order and discipline".

* That one's especially egregious if you know that much of Manhattan's subway system would flood within a matter of hours if nobody was there to operate its pumping stations.
* that one). She was a kitsune and needed human pituitary glands for herself and her young son to survive. For the most part, she got them from people who were already dead... but then her son got sick. Even then, the only person we actually see her kill is a drug dealer.
* That one's old enough it's been used in greetings cards. There were these two racehorses in a field, discussing the fact that they keep losing. A dog stops by to give them some advice and, well, you know the rest.
* that one) tells the story of how a former college classmate challenged him to gain access to his employer's server, having convinced them to stump up for some new and very flashy security software. (Whether he cleared this OPFOR exercise with his employers is not mentioned.) Meyers then proceeded to drive over to his friend's workplace. Wearing a boiler suit and an old photo ID badge on his lapel and pushing a parcel trolley, he talked his way in without the slightest difficulty and walked out with the server!
* that one), where he moves into a house haunted by, for some reason, a space alien.
* That opportunity comes later that season, though Eric really had nothing to do with it, other than helping bust Laurie for living with a guy. From that point on, Red realizes that Laurie isn't exactly as good of a person as she appears to be, but doesn't soften up on Eric at all.
* That, or it's short for "smegma" (look it up if you really want to know). The show's creators say they'd never heard of smegma, but thought it worked perfectly for the long form of "smeg", both in meaning and in name.
* that, other elements of the disintegrating Democratic-Republican Party formed the Whig Party in 1833 to oppose Jackson. 15 years later, the Whigs were split over the issue of slavery which caused some of the anti-slavery Whigs to start their own Free Soil Party. Then in 1854, with both of those parties failing, former Free Soilers and northern Whigs got together to have another go at starting their own party: the modern Republican Party.
* That other new NERF revolver, the Spectre REV-5, is a 5-shooter with a slimmer body and an improved cylinder-advancing mechanism that greatly improves reliability, accuracy and power. On top of that,
* That other religion you're thinking of that won't be mentioned here.
* That Other Wiki). Accusations in hockey include the Pittsburgh Penguins in 1983-84 (to secure the first pick over the New Jersey Devils and get Mario Lemieux) and the Ottawa Senators in 1992-93 (for Alexandre Daigle).
* That Other Wiki, and his sons Carl Philip Emmanuel and Johann Christian. The Harvard Dictionary of Music has six different Bachs listed and considering the whole family was full of musicians and composers, there may be more, but it depends on what the definition of "great" is. Heavy metal fans might consider Sebastian Bach to be a great composer.
* That Other Wiki and other MediaWiki-based wikis generally format pages so only one space is displayed even if more than one is typed into the code for the page.
* That Other Wiki, G.W. himself surveyed the area, and the town was incorporated before his death. Also, it's the oldest town of Washington in the USA.
* That Other Wiki has confirmed that he has signed a multi-year contract with the WWE. Ladies and Gentlemen, it's official: ''THE ROCK HAS COME BACK! HOME!'
* That Other Wiki on whatever was typed in to it and fetch back the info. In other words, the application made you pay an unrelated party money every time you wanted to search Wikipedia.
* That Other Wiki, the 2015 arrests centre on the use of bribery, fraud and money laundering to corrupt the issuing of media and marketing rights for FIFA games in the Americas, estimated at $150 million, including at least $110 million in bribes related to the Copa América Centenario to be hosted in 2016 in the United States.
* That Other Wiki with a hundredth name only known by Him. The name "Allah" itself

is merely the Arabic word for "God"; Arabic-speaking Christians and Jews also refer to their deity as "Allah".
* That our cosmos is one of an unknown number of universes which emerge from an eternal quantum vacuum independently of each other.
* that over time, since Leonard is hopelessly insecure about his flaws and gets jealous when Penny is around better-looking guys, while Penny feels insecure about Leonard's intelligence and passion, fearing that she brings nothing to the table in their relationship besides her good looks.
* That owes at least as much to aggressive use of Photoshop as to the makeup.
* that particular clip is actually spliced together from two different scenes in the film. And that song isn't the same one used in the original film—the original is even cheesier.
* That particular episode ("A.T. the Abusive Terrestrial") is itself a parody of these... and
* that particular translation hundreds of times; there will be more or less doom depending on the translator. (And in any case, the true Qur'an is in Arabic. Any translation can only be an interpretation of it.)
* That particular trick required the coordination only a Jedi Master (read: C'baoth) could provide; the impeccable split-second timing necessary to pull it off could not have been achieved otherwise. Also, once the New Republic finally got some data from the battle, the visual data showed a significant gap between the shield and the laser blasts "reappearing". The general delivering the briefing speculated that the cloaked ships were probably light cruisers, which would have naturally had capital-ship turbolasers like on Star Destroyers, albeit fewer of them. Thrawn also carefully chose his target planets for this trick, to make sure they'd surrender quickly enough that nobody would have time to make a closer examination of the sensor data.
* That part of Wing Fortress which requires precision jumps can be skipped with Super Sonic by jumping to the right side of the ship after the part with the three floating ring boxes.
* That passerby happened to be then-PGA Tour pro Tom Kite, who also doesn't like it when people (specifically Homer) steal his clubs and shoes.
* that pedestal dashed from a great height. Or, less commonly, you just won't get to meet them.
* that... "Pepsi-Cola hits the spot/Twelve full ounces, that's a lot!"
* that person may well have been acting alone instead of on his orders.
* that person story: A German man complains to an American tourist in German, finds out the tourist speaks German, and then casually adds that to his list of complaints.
* ThatPersonYouMightKnow. But the story necessitated that they had to die.
* that photographer who takes all of Spider-Man's pictures to the bar as a ringer to win the pot.
* That phrase, previously uttered a couple of times — in less dramatic circumstances — by a vampire (and thus explicitly evil) version of Willow from an alternate timeline, is a signal of how far "our" Willow has gone to the Dark Side.
* That piercing howl-bark you can hear three blocks away? Probably a beagle. There's a reason they were bred for hunting.
* that planet wasn't our Earth, but a quite different planet of the same name. The Colonials and their Cylon allies finally find an unnamed planet that is, according to them, filled with more life than all the Twelve Colonies put together, and inexplicably also houses primitive Homo sapiens.
* That playoff win had Cowboy fans licking their chops at thoughts of a Super Bowl the next year, since Cowboys Stadium was scheduled to host the event. Instead, they got the ultimate humiliation: not only did the Cowboys fail to make the playoffs altogether, but in October, while they saw a head coach fired midseason for the first time in franchise history, the Texas Rangers - long ridiculed by Cowboy fans for their losing ways - went to the World Series for the first time ever.
* That plotline is full of this trope. Red Mage eventually admits he cannot defeat

his trial, thereby proving his humility and defeating his trial, prompting him to immediately boast about how brilliant he is to have worked out how to do that. Meanwhile Fighter's trial is to learn to solve problems with his brain as well as his swords, which he does by following his brain's advice and slicing his inner demon into little pieces.
* That, plus everything was taken apart, tested and refitted or replaced during the turnaround between missions. It's why the shuttle cost more than intended.
* that point, Henry realized she couldn't give him a son, either, and had already begun courting Jane Seymour—who, as the saying goes, 'had the good fortune to bear a son and the good sense to die immediately afterward.'
* that point in the strip's history; he's seen opening doors plenty of times later on), but....
* That Poor Car: Some big accident happens offscreen, setting off a car alarm, or several car alarms.
* That Poor Cat: A cat yowling is heard from offscreen whenever destruction happens.
* That Poor Cat: Some big accident happens offscreen, and based on the yowl, a cat was involved somehow.
* That Poor Plant: A nasty substance is poured into a plant pot, killing its occupant.
* That Poor Plant: A plant dies after being fed disgusting food or drink.
* That Poor Plant: A plant withers and dies after having a toxic substance poured into it.
* That Poor Plant: A plant withers and dies after someone pours a toxic substance into it.
* That Poor Plant: A plant withers and shrivels after a toxic substance is poured into it.
* that powerful), but before she is reset she is able to briefly reverse the link and send her own energies down it, forcing every single immortal to manifest on the physical plane and cast a massively powerful aberration-destroying spell. Better than 99% of the planet's aberrations are wiped from the world in a single blast.
* that pretty damned quick by revealing their relationship to one another.
* that Princess Diana) as the protectee. She declined after she found out she would have to kiss Kevin.
* That probably was not done on purpose in this case, but there's a valid reason to avoid giving a fictitious player a number used by a real one. See also
* That Puppet Game Show is Dougie Colon, who insists on his surname being pronounced "Cologne". Ian the Armadillo always pronounces it "Colon", and is convinced that Dougie finds this endearing.
* That Puppet Game Show. Jake eventually explains that he simply made the mistake of giving Eddie chocolate, and he went mad for a bit.
* that reason they are the most advanced race in the galaxy is due to the Protheans having nurtured their early civilisation, manipulated their genetics to bestow "natural" biotic abilities, as well as leaving an intact Prothean Beacon to aid in their technological development. The Protheans intended them to become the dominant power in the next Cycle and have enough of a technological head-start to defeat the Reapers. However, it failed because the Asari became technologically stagnant, as they relied on data-mining the Beacon to keep themselves ahead, allowing them to lord their superiority over the other races. When the next Cycle came, the Asari retreated to their homeworld and buried their heads in the sand, and quickly got curbstomped by the Reapers.
* that reflects nothing but a monstrous face with its tongue sticking out.
* That Reminds Me of a Song: When a character suddenly starts singing a song that has no plot relevance.
* That Rick gets to use, in any case. The infamous "Biggy Man" boss from the original game has two chainsaw blades in place of his hands.
* that ridiculous. It turns out they used to explode, until the modern flush toilet's air trap came along.
* that Ritsuko has used Asuka to test the Emerald Tablet, a dangerous sentient

computer program:
* that rival even Space Marines, in addition to huge guns bolted to their arms
* that River and Amy isn't a coincidence; "River Song" is a mistranslation of "Melody Pond".
* that roomy: most of the Shuttle's space (hahaha) was given over to cargo; the actual crew compartment was, in effect, a very large capsule, one which was very quickly filled to capacity (seven), substantially reducing the roominess (although still much-improved over Apollo and Gemini).
* That Russian Squat Dance: The dance where characters squat down with their arms folded and kick their legs.
* "That's a Baby Show!" opens with D.W.'s favourite TV character, Mary Moo Cow, performing in Arthur's bedroom. Arthur interrupts the performance and orders the music to stop — at which point we see that what we thought was background music was actually being played live by three musicians.
* That's a big part of the plot in João Guimarães Rosa's
* That's a bit generous. He remains to most historians the most likely suspect, but there's nothing totally conclusive; Henry VII is a distant third as the most likely (#2 is Buckingham, to most people).
* ... that's a bit long for a non-Earth-moving kiss. About 20 and a half seconds, for anyone who cares.
* That's a bunch of baloney. Everyone knows that leprechauns are extinct!
* That's a carry over and logical extension of things from Etna's original series, Disgaea. Characters in those games love to lampshade gameplay mechanics and poke fun at expected tropes (Like the ability to save before a boss fight). They also discuss their own levels and character titles so it's hard to tell at times if it's just them breaking the fourth wall or this is normal topics of conversation for people in their situations (Etna's
* That's actually pretty in-character with Mao. When he gets focused on something, he sometimes misses painfully obvious things that someone as smart as he is should notice. Like the fact Beryl wears a perfectly liftable skirt. Or like the fact that stealing a Hero's title forces him to act heroic.
* That's actually pretty much true. In a mostly unknown 'making of' documentary for the series, they talk about the awesome Ukrainian stunt men who are cheap, plentiful and absolutely insane. Given that the core cast is actually pretty small (6 riflemen, 2 wives, Wellington, Hogan plus a handful of speaking villains du jour) and that any part of the European countryside (where all the battles are fought) looks so similar it makes no odds, it makes a LOT more sense to move the production to the stuntmen, rather than transporting and accommodating 200+ psychopathic men and horses to wherever they were needed.
* That's actually the main reason behind M-Day. The people who did it felt that there were getting to be too many super-powered people in the Marvel Universe.
* that's a damn shame, he had nice tits/And that's the last I ever saw of Kim/You wanna know why? Cause she's a he and her's a him." Needless to say, Markie didn't win many GLAAD awards for that one.
* that Safira was fully aware of Robin Wood sleeping around with younger Slayers despite dating Faith and never mentioned it because she's from a part of Africa where a girl is considered an adult once she gets her first period and poly relationships are fairly common.
* That's a good trick!" This makes more sense if you've read the book, in which the escape from Naboo is completed by spinning the ship, which disrupts the "pulsar tracking" the Trade Federation uses for its weapons.
* That's a grappling hook pistol without the pistol. What doesn't make sense about it is that it can steal items from enemies. Necklaces they're wearing or carrying in their pockets, feathers, etc.
* That said, a majority of individual Imperial traitors serving Chaos are also anti alien.
* That said, an unknown singer was brought in to do Barrymore's singing on her solo "I Live in Two Worlds" in the 1986
* That said, any time a flashback shows Nicole as a child, she's always wearing a

red/pink bow, likely to obscure how she
* That said, a properly-used phalanx (translation: with cover on the flanks and skirmishers to fight off enemy projectile-armed troops)
* That said, a third single – "Holiday Road" – is well known, despite its low charting position (No. 82 on the Hot 100); it can be heard during the opening of the classic comedy film
* That said, certain scenarios allowed them to get more technical; in "
* That said, digging deeper into the lore quickly reveals a number of non-compliant features, drawing heavily from the
* That said, distances in the battles are measured in tens to hundreds of kilometers. The Mothership itself is something like four to six kilometers on its longest side, for goodness' sake. So this might actually be an aversion - visual range is just a freaking long distance.
* That said, even EarthForce is moving away from projectile weapons, as while they're powerful they carry too little ammo and weigh more, and the only reason they haven't yet is that they're still figuring out how. The
* That said, even in the Second Age, there was a strong friendship between the Elves of Eregion and the Dwarves of Khazad-dûm; the gate between them allowing entrance to the Dwarven kingdom would open to the word "friend" spoken in
* That said, even the largest spacecraft in the game have various 'left' and 'right' to-hit and armor locations and firing arcs, but no 'top' or 'bottom' ones as such...even orbital bombardment is done with the attacking vessel's
* That said, expanded universe materials make the example a different case of this:
* That said, fans still have reason to be annoyed, because he continues to tease the possibility in the comics, and
* That said, full-sized Zentraedi seem to be fairly rare in colony fleets outside of the Macross Frontier fleet, as the majority of "cultured" Zentraedi seem to prefer shrinking themselves to human-size. The
* That said, Ginko is liable to recycle a defence once in a while... But only if Diabolik has no idea of what Ginko did to foil him. As that happened only with a single gold bricks escort scheme (namely leave the armoured truck empty and hide the gold in the escort motorbikes), that doesn't happen often.
* That said, he also invokes the trope at one point—he acquires a pair of
* That said, he has repeatedly shown his disgust towards certain people in the comic book industry that focus so much on female sex appeal, they might as just start making porn.
* That said, he turns the last stage into a joke, but chances are you'll have already beaten and S Ranked it with your own skill before even knowing that there was a Red Ring reward.
* That said, if there are such a thing as hipsters, then the Arishok of
* That said, if they're investigating a myth where there's even the slightest chance of an explosion, they will go out of their way to make sure it happens one way or another. A semi accurate description of the show's practices is,
* That said, in the US if you request a lawyer they cannot question you again until you speak to one, and you generally have the right to call your lawyer (or people who might reasonably know how to contact your lawyer for you).
* That said, it could be argued that Gaz has another arch enemy in the form of Iggins, though he only shows up once.
* That said it slides more towards the idealistic side of the scale. The protagonists win as much if not more so than they lose and they are all likable and heroic. The fact that is takes place in a modern setting means
* That said, it's made pretty clear later on that while Megatron allows his subordinates a lot of freedom (e.g. Skyquake ruled a system he'd conquered as his own mini-empire), when he summons
* That said, it's not always rolled with; it heavily depends on the setting being used as a base and the group in question as well as the sourcebook in question. The
* That said, most don't. Hey, Khorne doesn't care whose blood is spilt, only that
* That said, Mr. Burns as well. It's very odd to see such a greedy man who is so

consumed with desire for money to put all that aside in favor of wanting a nostalgic but financially worthless teddy bear from his youth.
* That said, much of the humor surrounding Konoka and Setsuna's relationship comes less from the mere fact that they are
* That said, neither film was made on a shoe-string budget, nor involves no special effects — but especially in the first one, this arguably adds to the mystique better than flashier scenes would, akin to the lack of actual shark in
* That said, Norwegian dialects use to differ between the "earth apple" (the Potato) and the "sweet apple" (the regular apple). This lexical use came about years before the sweet potato arrived in Norway.
* That said, oil is always black in fiction. In real life, while crude oil is black and used filthy oil from an engine tends to be a reddish almost coffee-like color, fresh oil has a color not unlike honey or apple juice.
* That said, one gag has a troll joining a dwarf gang when dwarfs and trolls
* That said, only a complete fool or a masochist would play this game with strangers. Imagine a game that is literally
* That said, openly involving the derided and preyed upon mortals in their affairs is still taboo, since its indisputably
* That said, people could be ostracized for any reason; the procedure for ostracism was to ask the
* That said, Reimu is later shown to suffer the beginnings of depression and PTSD, at least partly due to the isolation she'd imposed upon herself. Yukari, picking on this, sends Suika, who takes her on a Journey to the Center of the Mind
* That said, some cases of celiac disease are extreme enough to be triggered by even trace amounts of gluten from cross-contamination, so "gluten-free" can be a signal that a food was produced using celiac-safe procedures. Of course, this can cause dangerous confusion when something marketed as "gluten-free" to ride the health craze
* That said, some of the Vampire Counts have enough redeeming qualities to avoid this. For example, Vlad von Carstein's quest to take over the Empire was driven by a (rather accurate) belief that it was too weak and beset by petty infighting to oppose Chaos and was reportedly rather fair as a ruler, and he deeply loved his wife Isabella and she loved him back - she even threw herself from the walls of Altdorf and committed suicide when she received news that he had been killed.
* That said, some people may actually implement parts of it, in the event something of that magnitude happens:
* that said spymaster is his father, that he apparently has a history with Dukat... And yet he seems to help out the protagonists quite often.
* That said, 'Stephanie' (Solla Stirða) was played by actual adult women in all the original Icelandic plays from before the TV show, and one of them was quite busty with no attempt to do anything about it, while Julianna definitely had grown between seasons and doesn't really look any bigger in out-of-character shots from the same era.
* That said, the Cobra is a frequently misunderstood maneuver; by itself, it's not very useful. However, slow-speed control, which the Cobra showcases, is a surprising but crucial element of air combat. In aerial gunfights and even with some early IR missiles, getting behind the enemy plane is the key; the plane in the lead is threatened and cannot threaten their tail in return. If the other plane is coming in faster, you may maneuver and let the enemy overshoot. If they're tailing you at about your speed, you may attempt to slow down and let the enemy overshoot. Or, you may attempt what's known as a hammerhead, where both you and your enemy engage in a climbing fight (usually rolling or spiraling up to stay out of the pursuer's guns) until one of you stalls and the other pounces. In all three of those tactics, if you can retain control at low speeds then you retain the advantage; and that's what the Cobra demonstrates. Even then, your enemy's rather upset wingmate may still come in to finish you off.
* That said, the development of Micromasters, Pretenders, Powermasters, and so forth could be considered a form of this; a new mechanical trait is invented (a smaller form that's more energy-efficient, a new type of transformation disguise,

symbiotic partnerships, etc), and those with the new trait quickly out-compete those without, removing them from the story, if not from living.
* That said, the episode also implied that the tide was turning against the Nazis, with German troops stretched thin, the Russians preparing to retake Moscow, and near the end of Part 2, US troops launching an offensive into Pennsylvania.
* That said, the Imperium's Villain Protagonist status is more evident in earlier editions of the game. As the game grew more popular and mainstream, since the Imperium was the de facto protagonist faction due to being the "Human Over-Faction", it got progressively
* That said, the Kzer-Za are perfectly willing to find a new homeworld for races who have lost theirs (e.g. Syreen). It's a matter of
* That said, the motivations of the soldiers in both the Covenant and its remnants vary widely; while some are true believers, many are simply coerced slaves or mercenaries
* That said, the outcome of the Gulf War could've been worse. During the war, some politicians wanted to go further by invading Iraq and disposing of Saddam Hussein. President George H. W. Bush rejected this option, arguing that it would lead to political destabilization and create a
* That said, there are a handful of prominent Marvel heroes whose stories are set outside of NYC, many of whom are comparatively recent additions. For example,
* That said, there are major side effects, including early-onset arthritis.
* That said, there aren't any lasting effects (such as brain damage) unless optional rules in the Martial Arts supplement are in play.
* That said, there are oddballs in many of the bosses that stand out. Manticore is only vulnerable to brute force, being immune to ailments and binds. The
* That said, there have been a few positive uses of Blood Magic. The 5th edition source book
* That said, there was one person who held the rank as well — John J Pershing, in WWI.
* That said, there was plenty of serious stuff early on — take "Sometimes You Hear The Bullet." The main difference is in the (dis)integration of the elements rather than the amount of either: in the early days comedy and tragedy often happened back-to-back in the same situation, whereas in later years episodes would often feature distinct "funny" and "serious" plotlines.
* That said these events often are quasi-canon to the other side of the cross over. Lightning is sent to Hydaelyn to train and in Lightning Returns she can find a Miqo'te's tradional outfit as well as weaponry branded with the seals of the Grand Companies. Notcis's cross over actually begins in his world where a Miqo'te woman, Y'jhimei, travels to Eos and accidentally brings along a group of Ixali who summon the XIV version of Garuda, forcing Noctis and Co. to stop her. At the end of the fight, the XV version of Garuda appears and finishes her off, and in the confusion the two of them disappear. This is where the other side begins and Noctis teams up with the Warrior of Light to defeat the rampaging XV Garuda, before returning home where the new Garuda joins him as one of his summons.
* That said, the show still subverts the Ace Custom, as the only unique thing about the performance of either the squadron-leader VF-1J model or the Commander Air Group model (VF-1S) is that they have more laser cannons mounted on the head than the base VF-1A model (and the VF-1S has additional avionics to allow Commander Focker [
* That said, the Spectre himself died in a manner that resembles this somewhat, being thrown in a barrel full of cement and tossed into a river.
* That said the Wayne Foundation is an inversion of this trope as the floor Superman and Zod were is shown to be empty in the first film but the second shows there were who still inside the building. So only the people on the lower floors thought to evacuate?
* That said, they immediately made a bold impression on the galactic heavyweights and gained an influential ally in the process too.
* That said, they were in their prime relatively speaking to ten thousand years later. The Great Crusade's goal was reunification following the 5000 year long Age

of Strife.
* That said, this may be due to the pilot, but no direct comparison is made between the Guren's abilities and any of it's MP derivatives. Also, the Prototype Radiation Arm used by the Guren Nishiki after it's original Radiation Arm is destroyed seems to be both weaker, and not as well built, but this is also difficult to compare.
* That said, this negativity wasn't true of all the celebrities in the movie; Robert Stack and
* That said, Troy exists to avert this trope. Sure, he might be a little insensitive sometimes, but he's probably the sweetest person on the show, and is
* That said, we have recently became aware of the Void Lords who created the Old Gods and are currently implied to be the ultimate force for evil in the universe/franchise. They do not, as far as we know, have any "Light Lords" or equavalent
* That said, while Human ship do have ill-advised command center placement, given the tech gap between then and the Covenant it doesn't really matter where they put the bridge.
* That said, while mothers have little to do with the decision-making process on Jerin's side, Ren still has to get permission from her Mother Eldest to marry Jerin, because she
* That said, while UNSC ground weapons can hold their own relatively well against their energy-based Covenant counterparts, Covenant ship-to-ship weapons are painfully superior to their UNSC counterparts, capable of
* That said, while you may be able to function to some extent without your glasses, actually
* That said, while you may be able to function to some extent without your glasses, actually finding the dropped glasses can be a real pain — your brain is constantly suggesting you put your glasses on to expedite the search. Glasses are thin, often dark-colored, and blend in with so many things. If they fall off your nightstand, they tend to fall in the narrow spot between the bed and the stand, making you fumble around for them in the dark (or dim light), while half awake. Many people who have very bad eyesight try to keep a spare or old pair in a drawer where they can be easily found to expedite finding their lost current pair of glasses.
* That said, you can invest in the "Targeted Attack" Technique to buy the penalty down. Additionally, trying to hit the Skull from behind is significantly easier.
* That's All, Folks!: A character lets the viewer know that it's the end.
* That's All, Folks! segments from season one had Ren tell Stimpy "You can blow yourself up, like a balloon!" to pass the time until the next episode.
* That's a long story." Bowling shoes are required because street shoes scuff up the lanes, and they were the only ones in the alley so it's not like he could have slipped through the cracks.
* That's also an (attempted) type seven according to the Chantry, since the mages were trying to usurp
* That's also how Sauron got defeated at the end of the Second Age when Isildur cut his ring-bearing finger.
* That's also how the Tevinter Imperium raised to prominence and how it fell: the most powerful mages became its ruling class, slaughtered everyone in Thedas who was strong/proud enough to stand up against them and enslaved the rest, remaining the sole masters of the continent for centuries. While the Blight weakened it, the coup de grâce came from Andraste, which, depending on the version, was either God's wife or a mage so freakingly powerful that it made the Tevinter Magisters look weak by comparison. Whatever the cause, an army of fanatical zealots and rebel slaves formed around her, and the Chantry founded in her name became the new dominant force in Thedas.
* That same alien also refers to technology grasped "aeons of your years ago".
* That same costume appeared in Kaorin's New Year's dream, which, in the anime, came before that Culture Festival. (In the manga, we didn't see her dream.) Whereas Sakaki, in the black bar below the part of the screen where she and Kaorin are

riding away on a horse, knocked down the delinquent versions of Yomi, Osaka, and Tomo, Chiyo was simply put into a penguin suit. One wonders if the show is trying to suggest an origin for that idea.
* that same engineer manages to pull it off. Though this version is at least slightly more plausible, as it's not humanoid, but rather something that looks like a cross between a frog and a chicken with the legs connected at the sides for better weight distribution. The robot is also primarily remote controlled, since, while it does have a cockpit inside, operating it manually is rendered nearly impossible due to severe motion sickness induced by its uneven gait.
* That same episode begins with Igignokt spray-painting graffiti on a school, which Err quickly points out is just a rock.
* That same episode had a boy transformed by a magic comic book into
* That same episode shows that Zecora, who can't even use magic since she isn't a unicorn, knows more about the subject than
* That same line is used in the 4Kids dub of One Piece during Luffy's second fight with Crocodile... by Crocodile, right before Luffy sends him flying into a smallish stone building and knocking it down.
* That same manual also had the picture for Drow showing a warrior lady, who is high born given her
* That same night, Hiori and Ruka first meet when Hiori climbs into their room through the window and ends up falling onto Ruka after they’re surprised to see each other.
* That same season, Master Vile (Rita and Rito's father) dropped by for several episodes. He routinely sought to prove that Zedd was inferior to him. Vile did achieve some major victories (most notably turning the Rangers into children), but he also suffered some big failures. He got so outraged by the Alien Rangers thwarting his ultimate plan that he rage quits and goes back home, much to Zedd's delight.
* That same year, Bugs starred in a minute and a half short where he sings
* that's a parody of "relatable" webcomics. Every comic ends with the exact same punchline of "oh no"
* That's a regular formula for Simpsons jokes, where everything seems fine or even just briefly peaceful, and then something worse sneaks up to get the character. Examples include the French waiter badly hurting himself, falling out of a building into a truckful of mousetraps, and groaning "At Least Zere Were No Beeg Ones"...only to be interrupted by the snap of a very big one. Similarly, Luke Perry is shot out of a cannon in "Krusty Gets Kancelled", goes through several walls, and lands in a pillow factory...which is promptly demolished.
* That's assuming the missiles hit, of course, depending on how lucky you are with the dice. However, two more missile types do exist: Medium Range Missiles and Clan-only Advanced Tactical Missiles. ATMs come in launcher sizes of three, six, nine and twelve missiles and have on-the-fly inversely variable yield and range loads, but MRMs are loaded in salvos of ten, twenty, thirty, or forty. Good luck hitting something with it, though—MRMs are naturally inaccurate.
* "That's a strange place for a horn..." so notes Dawn when checking out demon illustrations.
* That's a ubiquitous military joke that invariably pops up whenever soldiers and field rations exist together, regardless of country and even millennium. Just remember all
* That's bad, but this is worse. Listen to a Westwood One NFL radio broadcast, and you'll have the distinct inclination to shove spikes in your ears every time the announcers mention the "Heinz red zone". (For international readers: The "red zone" in American football is the part of the field between the opponent's 20-yard line and their end zone—when an offense reaches this point, scoring is imminent. Thus, it's a phrase that comes up about several dozen times in a standard football broadcast. In the U.S., Heinz is best known as a ketchup brand which puts "Heinz Red Zone" displays in many supermarkets during football season.)
* That's because he has done drag as part of his comedy routine in the past, and already had a little experience in that area as opposed to macho men Swayze and

Wesley Snipes.
* That's because he showed up as himself, i.e. the film actor Charles Chaplin, without the costume or the mustache (he never actually grew such a mustache, it was always a stick-on). Everybody knew who he was and had a nice laugh.
* That's because he was the fat man's accomplice, wearing one of his empathy fat suits.
* That's because his truck runs on Awesome, which is, as we all know, non-flammable.
* That's because Nyx isn't so much an entity as the entire concept of death. As My Life Is A Goddamn Mess
* That's because the authentic Parmesan is called Parmigiano-Reggiano. Knock off brands will still use "Parmesan."
* That's because the mass-to-weight ratio is a constant on Earth (or close enough: on average g = 9.81 m/s
* That's because there are no plotholes. Even the ones you think you see, even the ones you
* That's because they still had the leaky barrel of powder under Gonzo's arm.
* That's because what Monk saw was an elaborate con game — the bald man was being tricked into thinking he had seen a cop's murder, so that three con men could trick him into giving them some of his antique coins under the pretense that it was hush money.
* That scene is a reference to a scene in the SG-1 episode "Frozen", except the overused title in that one was "Doctor".
* That SciFi Guy: Online comedic critic of science fiction films and series.
* That's deliberate. A Senior Drill Instructor/Sergeant who leads a platoon, and company- and higher-echelon staff, are expected to play
* That second heart Time Lords have comes in handy. How many times have the villains managed to stop one of them, not to realise the Doctor's got a second?
* That second one is strictly a translator gag- Kyon says "Uso!" (lit. "a lie") and Yuki answers "Sou" (lit. "it is so"). "Sou" is practically Yuki's
* THAT (see Film — Live-Action below), but with giant vampire moths.
* that selfsame judge's confirmation hearings for a promotion to the U.S. Second Circuit Court of Appeals.
* That's Entertainment!" and one of Greta Garbo's characters saying "I want to be [let/left] alone."
* That sequence features a cameo from "Doc", who runs a paintball shop in Alaska and draws
* That series introduces the Scarran Emperor's command ship, a smaller warship than a dreadnought but one that is heavily armed, and faster even than a
* That setting did the same trick with "goblin"/"goblyn", making them two different monsters.
* That's Euron's thesis. His primary claim is that while Balon was sitting on his ass, Euron was out there, reaving. Which he further solidifies by stating how he
* That's even before you get to places like Israel, where they use the Short Scale, just like in the US... Except one thousand million is called a
* That's exactly their plan; they win either way. Note that a gory guiltfest follows it unless you navigate away.
* That's Gotta Hurt: Someone gets hurt. Witnesses comment on the pain.
* That Shang Tsung can transform into Kano, who was absent from the game for plot reasons. It arose from a counter in the arcade version's test mode reporting the number of "Kano morphs". It also led to the
* that Shannon has been killed by the 'monster,' only to find out that it was just Boone's hallucination.
* That's hardly scary compared to some passages the suites don't use, such as "Magic Carillon" and "Kastchei's Death."
* that she cut a hole out of in an effort to break a winning streak of her rival Dark Angel(see below).
* that). She ends the chapter and the manga by preparing to screw another wish up.
* that she forced him to sever ties with all his Pokémon and he eventually

commits suicide because of her abuse; Alola's been ravaged by the Ultra Beasts because Ash was never there to help fight them off; Tracey is a homeless alcoholic who rants about how terrible Pokémon are; Brock's heart is as hard as the Pokémon he trained because he never reconciled with his parents; Togepi died after hatching; and Misty herself had to turn to stripping to support herself after the Cerulean Gym was shut down due to her sister's incompetence. It's lampshaded by Ash at the end of the story, with him pointing out that the situation Misty's describing sounds like a film they show every December. It's also implied that Mew exaggerated some (if not all) of it, since Ash and Misty wonder why the kindhearted Serena was portrayed the way she was in the vision.
* that she knew everything that happened in the movie would happen and planned the entire plot accordingly.
* that she's been sent by the Mayor to keep him occupied for the night (with the implication that she's to have sex with him), Xander informs her that they could have accomplished that with a large pizza and a new release from Blockbuster.
* that she's the photographer who's been working with the CEO for the past few weeks.
* that's how he got all those bruises on his trachea! Tight bowtie, my ass..."
* that's how her name's spelled. She's actually not from any canon race, but rather, from a race created by the author: the Space Race.
* That's how JD and Elliot's relationships work. As JD himself said, when he got something, he doesn't want it anymore. This changes by Season 8.
* That show loved this trope. There's another point in that episode where he pays off an
* that shows how Alm kills Celica with his sword. Then the game goes back in time to tell why he did it.
* That's how you deal. First, you burn all the land, then you blow up everything still standing, then you leave it to freeze in the winter, and after such treatment, you burn it again, just to make sure. Believe it or not, it's not overkill.
* That, since the Universe is accelerating its expansion, space will eventually expand so quickly that it will repeat the conditions of the Big Bang and start the whole thing all over again.
* That's Incredible for everyday frustrations. Cue a shot of her screaming after being stopped by a red traffic light, watched by an alarmed motorist.
* "That Sinking Feeling" ends with every building sunk under Bikini Bottom and everyone digging it out. It's unknown how they got back to normal afterward.
* That's It! The Unofficial FFXV Cookbook on the food featured in the game(To the point that the dev team spent time camping and cooking just to see what could and couldn't be realistically made) it was a no-brainer.
* that situation can cease to be hypothetical, although it's not Ashley making the choice but players. Either Ashley or another crew member, Kaidan Alenko, must be left to die, and players may indeed be in a relationship with one of them when it happens. If s/he saved his/her love interest, Shepard will wonder in dialogue if s/he left the other to die for the sake of the mission, or for love's sake.
* That size matters when talking about blaster weaponry is demonstrated on-screen in
* That's just how the Afterlife works in this universe. No alternate dimension, Higher Plane of Existence or anything — you just become a ghost when you die.
* That's just living dragons. Historically, Aegon and his sisters subdued the entire continent with their three dragons, particularly Balerion the Black Dread, an even larger beast than Drogon. They reduced Harrenhall, the biggest castle in all of Westeros, to rubble and torched tens of thousands in the Field of Fire. Plus, those three dragons? House Targaryen was a
* That's Just Me: Elizabeth once disguised herself as Amelia and walked into Amelia's house yelling: "I'm your worst nightmare! I'm a motherfucking crossdressing lesbian Jew, BITCH!!". However, is most versions of this episode, the line is censored, changing it into: "I'm your worst nightmare, because I'm a crossdressing tomboy, man!"

* That's Just Me has many examples, including the main character. She's a sadist who's into BDSM and other weird fetishes, including the one that inspired most episodes, her vomit fetish. However, she claims that she's harmless because she's into animated cartoons of this stuff and doesn't intend to do it to anybody in real life. She also wants to be abducted by aliens, have an out of body experience, talk with ghosts, stay in a haunted house, and do all kinds of other paranormal things.
* "That's just preposterous, dinosaurs going extinct. They were just forced underground during the
* that's just the middle name the parents use on them when they're in trouble, as they have the middle initial L.
* That's just the senior male line. All of T.R.'s sons were badass in some way, as have been many of his other descendants.
* That's just the tip of the iceberg. There's also Mattboo Sux, Sidney, Casy, "Evil Pac-man 64 clone", etc.
* "That's Kaiba's Duel Dome! You know, in my day, we didn't have Duel Domes. We had to play our card games out on the street. And our cards weren't even real cards! They were just rocks that we picked up off the ground. And then we threw them at each other! Come to think of it, it wasn't really card games at all. We just liked to throw rocks at each other—mostly at me. That's probably why I have so much self-loathing. (
* That's left unspecified by the story; the main characters could just as well be
* That slight swooshing sound when someone's eyes dart back and forth, and that little "plink plink" that denotes blinking. See
* That's Lobstertainment", rather than pay a nominal parking fee for a Hollywood premiere, Leela flies around for hours before landing on the La Brea Tar Pits...which is exactly the sort of thing she usually scolds Fry and Bender for.
* That's Lobstertainment", the water doesn't just come out of his mouth.
* "That's Lobstertainment!": Zoidberg's brief career as a stand-up comedian consisted solely of this type of joke.
* That's mainly an attempt to have the plot advance as you level up. High-level arcs involve Crey as nothing but the rogue remnants of their security forces after their
* That small percentage of people in any democracy who don't vote because they don't think their vote counts. And who thus act in a way that makes sure that it won't. Some people won't vote because none of the parties they could support represent their views well enough. So why aren't politicians representing those views? Because the people who care about them the most don't vote. The "I didn't vote" argument is an extension of this. People become cynical and convinced that their votes don't matter because corrupt politicians and fundamentalists will just cheat and/or bribe their way to victory. Thus they don't bother going out to vote, which just makes it easier for the corrupt individuals to keep themselves in power by paying off friends and allies to pad out the ballots in their favor.
* That's more of an inversion; Danny explicitly wanted to remove his
* That's My Boy, both R-rated comedies of summer 2012, are fueled pretty much entirely by vulgar content. Despite the big stars that were headlining them, neither were particularly popular among most people for this reason.
* That's My Boy, Han has a tattoo of the New Kids on the Block on his back.
* That's My Boy, he consistently gets military jargon wrong and wears a mix of Army and Marine uniforms. At the end, Donny points out how he makes real veterans look bad, in addition to all the other ways that he's an asswipe.
* That's My Bush! and featuring the former President's administration and family as characters, it wasn't intended as political satire, but rather a parody of cookie cutter 80s sitcoms. (Parker and Stone admitted that, just in case things had gone the other way, they also had a pitch for a sitcom about Al Gore, and said they would have used more or less the same jokes no matter who'd actually won.)
* That's My Bush!, Laura, worried about the dry spell she and George are experiencing in the bedroom, overhears him talking about her cat (her "pussy"), describing it as old, smelly, too hairy and overall disgusting, and adding that it's about time he gets a younger one.

* That's My Bush!; "Oh, Laura! One of these days, I'm gonna punch you in the face!"
* That's My Bush!), only to immediately get back his job as President of the United States by the end of the episode.
* That's My Bush! parodies this trope in an episode ("A Poorly Executed Plan") by portraying George W. Bush's well-over-fifty year old friends as immature manchildren still engaging in stereotypical fratboy behavior.
* ThatsMyFace.com already offers online fabrication of anything customers can submit in the appropriate programming language (weapons and other obviously dangerous things excepted, of course), it seems like only a matter of time before some demented genius starts marketing an online mask-making service.
* That's My Sonic fame suffers from this like no one else. Look, he's working on a sprite comic! Oh, wait, that's boring him, here are some videos! Oh, that's too much work, have a hand drawn comic instead! Sorry, he dumped that comic, look, he gave some other artist this new script! Whee!
* That's My Sonic's take on the above. It just gets crazier from there.
* that's not a contradiction in this case know there's a world out there.
* That's not all he can do, either. At one point in the very first episode he gets one of his arms ripped off by a giant ant, and then proceeds to grab it and start beating the snot out of said ant with his own arm ala Toy Story. The next shot shows him popping the arm back into place with no ill effects. He also uses one of his hands as a grenade at one point (and yes, before you ask, he says "
* That's not all he does with chainsaws, though. He's also able to create machines that combine a turbine with four chainsaws, charge his chainsaws with
* That's not all. Several of his "cousin" experiments can also be nullified through water, although they also need water to be released from their capsule.
* That's not all. They've rearranged many of their older songs in their new style; while some are simply rerecorded with minimal alteration, much of the older material have been entirely rewritten.
* That's not a scar. It's not really made clear what it is, but from the characters you see in the games, it's easy to infer that anyone with
* That's not as much stowing away as being taken accidentally - Kitty was looking for a quiet place to write her parents an e-mail, and Kurt just showed up to mess about with her.
* That's not even taking into account the metric signature of space. In essence, time as a dimension is counted as the 'opposite' of space, leading to (among other strange results) the fact that two points along the path of a photon in spacetime are always considered to have zero distance between them. The reason why this is important is it means that the weird, seemingly inconsistent results produced by special relativity can be explained by looking at the situation from different angles.
* That's not even the half of it. That little girl on the packaging?
* That's not exactly true, Valdhino had enough biographical information to be fairly sure both where and who Tony (AKA Puma Man) was. If anything Valdhino's actions were more to demonstrate that Tony really was the descendant of "Gods from another world". YMMV on whether this actually
* That's nothing compared to the Skrit Na, two species in one. A Skrit is basically a giant, fairly stupid cockroach, which at some point spins itself a cocoon and apparently dies. However, out of its dead body comes a Na, a smarter (but still weird) creature which is basically a member of
* That's nothing compared to what happens in the fourth series' last book. Basically, the cat versions of Heaven and Hell start fighting an epic war on Earth, and dozens of cats both living and dead kick ass. That one book alone has more
* That's nothing. Team Rocket (the ones we know and love) have binoculars that enable them to hear conversations over a mile away.
* That's not necessarily the case. While they'd be handicapped in terms of fire while only being able to work in a water environment, there are other ways to develop advanced technology that don't require open flames. They might develop technology based much more around the use of
* That's not the end of the metaphors in that episode. When Grovyle gets rejected

by Meganium in favor of his love rival, the flower instantly
* That's not the only life/death inconsistency in the series. A zombiefied Black Cat is first seen getting a hole punched in her by Iron Fist, but then an alive-and-well Black Cat appears on the Helicarrier. Luke Cage also mentions having eaten Doctor Strange, but we later see Strange is still alive. And finally, a Zombiefied Dazzler was seen the the original Ultimate Fanstastic Four event, but the prequel
* That's not the only time Wakko makes this particular joke, but in "Our Final Space Cartoon, We Promise" the others
* That's not to mention the fact that Jamie's hand is nailed to the table, and once he's released, he presses his mangled fingers to the table so the excruciating pain will keep him awake to bargain with Randall.
* that's not too big. The effect is perfectly reversible however, only resulting in minor memory loss to the victims (that is, if she revives them before they're shattered, such as the case with the shattered limbs of pirates at the Battle of Marineford).
* That's not too unusual. A rank soldier in the British Army can recive a commission as a "Late Entry" officer (as opposed to a "Direct Entry" officer who went through Sandhurst). From there it is fairly realistic to go from 2nd Lieutenant to Captain in five years.
* That's not to say cheating didn't happen. The original first few Soviet space flights are technically invalidated because the pilot parachuted out of his craft once in atmosphere (aviation records must require the pilot to be in the craft in order to qualify) and the first life form in space never made it back (not because of design flaw... it was never intended to make a return trip).
* That's not to say studios don't embrace what 3DCG has to offer. Take for example Sanzigen Animation; right down to the studio name,
* That's not to say the intended Estrogen Brigade Bait didn't underperform, however: the Blue Lions has the most conventionally handsome guys in the cast, with strong personalities and a lot of emotional complexity to delve into, especially where the
* That's not to say they don't get into the situation, just that they prefer the enemy to do so.
* "That's Offensive", the three poker players constantly say things that offend each other, each time getting offended over more trivial things. At one point, a player simply opens his mouth to speak, and immediately has the other two players yell that he is being offensive - because it's 7:02 pm, which is when they're supposed to have a minute of silence for their friend Schmitty, who died at 7:02 of unknown causes. At the end of the video, the poker players get so offended by each other that they all pull out guns, when suddenly the ghost of Schmitty appears to stop them, informs them all that he himself died in a situation similar to the one they are currently in, and reminds them all that they can't expect everyone to know what will offend them.
* that's okay, I can always preserve the memory of her for when I'm... alone.
* " that somehow renders him unrecognizable whenever he goes out to do nefarious things.
* that some other characters were trapped within. Everyone involved is amazed it worked. Drizz'l outright states he hates that it did.
* that some things are created by Jeremy Zag, and so on, were made by Zag and not under Astruc's vision.
* that's one version of their backstory. The more common one is simply that they are what happens when you breed together enough humanoid races.
* "That Song in My Head" by Julianne Hough is another meta-example, as the hook is "I've had that song in my head all day."
* That's only partially true. Only the very fastest ships can do six parsecs. Jump engines take up space (to be more accurate,
* That's only part of it; the Sharpie'd out segments are in a larger article about the Christian God and his abilities, with the implication being that Harry Dresden himself blacked out the stuff because he didn't think the Heavenly Host would appreciate having that kind of information spread about them. Performing the above-

mentioned trick reveals that the text says (paraphrased)
* That's only what's still LEFT. Before the series was released, there was a full-blown
* That sort of raises the question, how one can have a different deity, when both parties agree that there is only one. But then again, Muslims regard Christians as polytheistic idolaters.
* that's out of the way" manner) that she immediately rethinks this decision:
* That space suit is a really futuristic advanced "impact suit", that through some technobabble absorbs most of the force of the impact but also repairs the damage to his body afterward. The Doctor even says "the suit isn't done repairing me yet". He leaves a pretty big crater on the ground where he hits.
* That's partly because men are just plain intellectually incapable of cooking or cleaning. They're too stupid to handle a mop or oven, and would end up burning down the house in either case. It's a perfect way to insult both genders. Women:
* That specific example justifies itself to a certain extent. House was convinced he saw an important symptom just before the crash. So, he combed through almost everyone on the bus looking for someone presenting a mysterious symptom. He happened to find one guy in the group of dozens of people who actually did have an undiagnosed condition with a small symptom (which would have developed eventually but was not immediately life-threatening in the meantime, especially compared to the bus crash).
* that specific universe. Should they somehow be brought to another universe, they become little more than pretty rocks.
* That "Spin That Wheel" song from the Teenage Mutant Ninja Turtles film is not by Technotronic. It's by Hi Tek 3 with vocals from Ya Kid K, the rapper Technotronic is usually associated with. Also, "Spin" was co-produced by Jo Bogaert, who is better recognised as Technotronic
* That's pretty much it. The tag line: "Well, we just wasted two million bucks. What are you doing with your money?"
* That's pretty much the motivation for Rosiel's schemes against Sara. Alexiel won't wake up permanently (shows up in moments of need but always gives back the control to Setsuna) because her current reincarnation is extremely happier. So Rosiel figures that if Setsuna could not be happy anymore... And yes, Rosiel and Alexiel are brother and sister, but that barely matters to the point of this trope. And even if it did, Sara and Setsuna are too, but that didn't keep her from being overjoyed when
* That's relatively tame for the high-ranked naval officers they were played as. On the other hand, it would still be more practical to wear a spacesuit, battle damage and all.
* "That's rich! Especially coming from the man who was raised by—" "Feral monkeys which contracted hepatitis."
* that's right, a replica of Riku created to turn Sora against the real Riku and become a tool for the Organization.
* "That's right, Biden! I just said you ride the Amtrak, if you know what I mean!"
* That's right. Hellsing Ultimate Abridged is so offensively hardcore that it ended up needing to get a folder of its own. The original anime is already twisted in its own right, but the talents of
* That's Snow Ghost. The rest of the gang chisel them out of the ice upon finding them, with everyone in high spirits, and no worries to be found.
* That's So Raven always managed to attract a decent male audience, although a lot of its supporting cast was male.
* That's So Raven and is aimed at adult fans who grew up with the original and new, younger fans as well.
* That's So Raven and look deviously at the camera. Obviously, the writers were very proud of the joke.
* That's So Raven, and was absent from twelve of those episodes. Sheridan also missed seven episodes in season 4, including the last three of the series.
* That's So Raven: A teenage girl finds her life complicated by psychic visions of the future.

* That's So Raven: At the beginning of "A Goat's Tale", Raven uses her psychic powers to win concert tickets over the radio.
* That's So Raven, a very prominent business man is to visit Victor's restaurant. Victor creates a Foreman grill-type device that both "grills and chills." He demonstrated his creation by having it grill a steak and chill some jumbo shrimp. However, he crossed a few wires and instead, the grill flash freezes the steak, and the chiller turns the shrimp into charred lump with tails.
* That's So Raven, but though she's hurt, she understands that as a teenager, Raven can't have her mother getting in her way during school.
* That's So Raven Chelsea, and Raven gets offended that he doesn't understand her at all. Raven eventually decides to snoop around without the janitor disguise, but she still winds up wearing a mustache.
* That's So Raven: Chelsea is so often clueless and slow-witted that when she demonstrates knowledge about something, both of her friends are shocked. Yes, not even the psychic can see those moments coming.
* That's So Raven Corey thinks he's too old to go trick-or-treating with his father, which prompts this exchange:
* That's So Raven, Cory asked Raven for his friend who wanted to gain the attraction of a girl. She automatically assumed and not so subtly made some suggestions for his "friend". The audience knew, but she didn't, that a rather scary kid at school was forcing him to help him — he really was asking for a friend.
* That's So Raven: Cory towards Chelsea in early episodes. Later, Stanley towards Raven.
* That's So Raven does — she just cheerily admits to being racist, almost without provocation, to a perfect stranger, in a public place, while working as a salesperson, only for her confession to be secretly tapped on the news.
* That's So Raven episode "Blue In The Face", Devon pulls a boombox over his head to bring his girlfriend, Raven, the concert that she was forbidden to attend due to poor grades and a chemical explosion in her school's science lab.
* That's So Raven episode "On Top of Old Oaky". Raven and her friends climb a tree called "Old Oakey". While in the tree they sing "On top of Old Oakey" (to the tune of "On Top of Old Smokey"). Suddenly the tree snaps and falls over with them in it.
* That's So Raven episode, Victor is accidentally hypnotized by a friend of Corey's to fall into a coma-like state when he hears 'San Francisco' and wake up only when he hears 'Okeechobee'.
* That's So Raven executive producers during the second half of the latter's run.
* That's So Raven. Faced with the possibility of either telling her the truth and offending her, or letting her sing live and ruin the performance...the girl ends up getting cold feet on the day. So she just lip-synchs on stage while Cory's mother (who has a much better voice) sings behind the curtain.
* That's So Raven features this in the episode "Food For Thought", Raven had a vision of what things will be like if the food court stays in school, which involves everyone eating so much fatty foods, they all have rear ends the size of their heads, including Raven. Luckily, she and Chelsea prevented all that.
* That's So Raven had Corey's band looking for a new singer. One of the applicants was a girl that Corey had a crush on. The only problem was she couldn't sing, but due to the crush filter Corey thinks she sings really well, and she's picked, to the surprise of his bandmates. He doesn't actually learn the truth until the band actually records her singing and plays it back for him to overcome the filter.
* That's So Raven has Raven and Chelsea on a game show, where the producer pits the friends against each other by pulling this trick and editing the videos they had made about each other. For example, Raven said about Chelsea: "Chelsea is such a good friend, I would never want to lose her. And that's coming from the heart." It was edited down to "Chelsea is such a lose...er. And that's coming from the heart."
* That's So Raven has the three main characters look around the corner like this in one episode.
* That's So Raven: In "Soup to Nuts", Raven does this while faking an illness to avoid going to school. This is brought back up later, when Raven finds out that she

missed a Senior Surprise Day trip to a water park due to her "illness".
* That's So Raven, in which Raven plays a large part. She has a vision of Cody getting into trouble at Carey's party, which is the driving force behind the main plot, and is pivotal to the subplot, where, with Maddie's help, she ends up selling her dresses to London Tipton and Hannah Montana.
* That's So Raven in which the school makes it mandatory for students to wear uniforms, Raven continues wearing the uniform by mistake, not knowing the school has removed the uniform rule. She modifies her uniform on the spot to get around this.
* That's So Raven, most likely even before she was. These were later revealed to be a hereditary trait. The ability is treated serenely since the very first episode of the series, despite the sitcom-y mishaps that regularly occur because of them.
* That's So Raven occurs when he tries them on and can't see and later gets a headache from doing so.
* That's So Raven: One episode sees Raven sneaking into the shoot of a zombie movie. She inadvertently falls onto a catering table and gets covered in food, causing her to blend in perfectly with the zombies.
* That's So Raven: Raven Baxter herself lacks supermodel proportions but fashion design is her passion and she makes most of her own clothing. The plots of several episodes revolve around her interest in fashion and making it a career.
* That's So Raven: Raven calls Alana a "sneaky boyfriend stealer", but when Alana asks what she said, she gives the pseudo-German phrase, "shneaky shnoyland shneiler".
* That's So Raven: Raven has a vision, at a highly inopportune time, of this happening to Chelsea. When it comes true, Chelsea claims, "I don't even care," but Raven's new telepathic friend says, "Yes, you do."
* That's So Raven, Raven posed as her own mother at a parent-teacher conference to prevent her mother from finding out how bad her grades were. When her mother (inevitably) found out, she was both angry that Raven had lied to her and offended because of the insulting fat suit Raven had used for the disguise.
* That's So Raven Raven's high school cafeteria is bought out by a fast food corporation which slowly introduces more and more insane amounts of unbelievably fatty foods until even the halls are full of freebie hot snack machines to keep them hooked. Obviously, almost every student is said to be getting noticeably fatter, even though no actual change is visible.
* That's So Raven, Raven temporarily dated a girl who used her for presents and money. Raven doesn't mind fawning over lovers, but she found her to be annoyingly clingy. After less than a month, Raven separated from her by "forgetting" to tell her that she changed her phone number.
* That's So Raven "Shakobi." Unaware of Shakobi's traditions, Raven accepts the prince's gifts of a feather, a seashell, and a dress, as well as an invitation to a party. After she leaves for the party, Raven's mother finds out online that those gifts make up a traditional Shakobi marriage proposal, and that Raven is in fact on her way to her own wedding. Luckily, Raven finds out the truth from her friends before she actually goes through with the ceremony. When she explains the situation to the prince, he understands and releases her, no hurt feelings.
* That's So Raven sparks there, but they both hide the fact from each other.
* That's So Raven's titular character always wears funny disguises to help her friends undercover.
* That's So Raven. (The actor who played 3J on FM is one of Raven's trio).
* That's So Raven: The subplot for "Don't Have a Cow" sees Cory and William's trick-or-treat expedition ruined when William's working remote costume sets off every remote-controlled device in town.
* That's So Raven. They don't exactly take having long pointy ears and white, furry tails very well...
* That's So Raven, Victor Baxter, the father of Raven's family, is like a male version of this. He repeatedly signs himself and Cory up for father-son whatever classes, which normally turn out bad. He also once opened up a mobile restaurant called "Baxter and Son" because he thought it was what Cory wanted. He apparently

forgot that it was HIM that put up the sign.
* That's So Raven when Cory's band hold auditions to find a singer. Cory is so enchanted by one girl's beauty that he imagines her with a beautiful singing voice too - when she's actually terrible. Things work out for him when the girl is too nervous to sing - so Cory has her lip-sync, while his mother sings behind the stage.
* That's So Raven, who would often devise ways to scam others (including his own family) out of their money, being the money-hungry maniac he is.
* That's still a reaction drive, just not carrying the mass; it's essentially a
* That's still Clarkson, Hammond and May all right. Their choice of garments in one episode was a sweater labeled, "McLaren
* That's still pretty minor when compared to the energy beams that cut off immediately after reaching maximum range.
* That stagnation being justified to a certain point by the fact that the best and brightest of at least one generation were packed onto near-lightspeed starships and taken out of circulation for decades (possibly centuries in some cases) of relativistic space travel before arriving on colony worlds where they were too busy with the logistics of setting up new colonies to make much headway in theoretical physics. That accounts for the first few centuries, maybe the first millennium if you're being generous; after that, it's a case of
* "That Star Wars Girl" Anna turns herself into a Butt Monkey simply by constantly revealing multiple bizarre facts about herself and her life. She is often referred to as "Lesbianna" (despite having a long-time boyfriend and protesting that she has no interest in women), mocked for her short stature and
* That stated, from about the mid-1970s to early 1980s, in part due to massive grief over the death of his best friend Don Rich in a tragic accident in 1974, an apathetic Owens began recording pop-country. While the music itself isn't bad, it also did not represent Owens at his best, something he later admitted. It wasn't until the late 1980s, when he had a brief comeback with
* that state up north the one time the Blue Jackets made the playoffs before the 2013 realignment.
* That's the Devil Duelist, Zarc, whom Yuya, Yuto, Yugo and Yuri all used to be part of, until Ray split him, the universe and herself into four pieces each. Zarc eventually gains full control over Yuya and his counterparts and it's not pretty!
* That's the entire point behind the robot boy (David) being created - to see if it was possible to create a robot child that could feel and provide unconditional love. Interestingly, while David is only set to experience this love for one person (in this case, his mother) he still seems quite fond of his "father" and "brother" and enjoys being with them.
* That's the Last Time I Make a 2AM Burger Run is a levatating, betentacled creature with a cone-shaped, eye-studded head, and wears a stormcloud as a cloak.
* That's the legend, anyway. In fact, the novel does contain an accumulation of evidence pointing to a particular solution, it just lacks a concrete "yes, that's definitely the solution" moment.
* "That's the Letter O", comma a parody of "That's the Way We Flow" by Queen Latifah.
* That's the official plan, but Danko is also perfectly happy to use lethal force in liberal amounts too.
* That's the official version, anyway. Many in Nepal accused Gyanendra of being an
* that's the point, hero Feric Jaggar and the Truemen of Heldon wage a merciless genocidal war against the mind-controlling Dominators and their degenerate mutant hordes- and this is presented as unquestionably good and right.
* That's the rest of the story, good day to various small-town radio stations which were playing the song.
* That's the same episode, Bones had gone with the "bigger is better" idea after being attacked in a previous episode. Unfortunately, she can barely
* That's" The scene depends on the contrast between Bubbles' treatment of the monster (perfectly calm, polite, and soft-spoken), and her treatment of her sisters (seething in anger, and frustrated with their endless arguments).

* "That's the second [adjective]est [object] I've ever seen!"—Guybrush Threepwood in
* That's the Worst Case Scenario Survival Handbook, and you have to hook your arms through the front of their rigging and grasp your wrists, you dislocate both shoulders and possibly both people will break their legs too. But it's better than the alternative....
* That stick on the side of the steering column may operate the lights, the
* that still doesn't mean you are going to give up on getting together with your beloved no matter the cost, right?
* That's Too Much, Man!", BoJack, drunk, talks to a kid he thinks is Todd, which the kid's parents confuse as an attempt to kidnap their son. Then, they remember BoJack's a rich celebrity and they try pimping out the little boy.
* That stupid conversation about how the TV station building is shaped like a pancake?
* That Sub-Zero can turn into a polar bear. It was so pervasive that the developers added "Animality" transformations to the third installment — and yes, Sub-Zero turns into a polar bear.
* that suffered for this before the holiday season was over, as that film — aimed at the same family audience, but a far more expensive, heavily-hyped effort — was underperforming at the box office.
* "That's What Friends Are For", originally written for the 1982 film
* "That's What It's Like in Japan" and includes the claim, "I've totally been there."
* "That's What It's Like In Japan" by Logan Whitehurst obviously relates to the question of what kind of a country would give the world
* That's What I Would Do: When the hero and villain aren't so different, they'll know exactly what the other would do in a situation.
* That's What She Said: Joking about an unintentionally filthy statement by remarking that someone would have said it during sex.
* That's What She Said: When somebody says something that's not meant to be dirty, but another person notices a dirty way it could be interpreted and says, "That's what she said!", sometimes adding "last night" at the end.
* that's when he threw down the gauntlet and decided reality would have to end if it meant he could win.
* That's when they're lucky. If they're unlucky something will make the thing
* that's why, and are expected to take down multiple enemy anti-ship missiles with a short burst to each.
* That's why there's always a sniper attached to the police during hostage situations. Unless the hostage taker isn't standing near a window.
* That symbol on Superman's chest. The El family crest? A Kryptonian symbol meaning hope? Anyway it's from Krypton, right? For the first 65 years of Superman's existence in comics it was exactly what it looks like, a stylized letter S in a pentagonal shield and it stands for Superman. The Donner films first gave it a Kryptonian origin and most adaptations stuck with that. It wasn't until 2003's
* That's your boyfriend!? Bwahaha! At least the MAGE has an EXCUSE to be a scrawny wimp!"
* That's your last words?" The man then stutters, "Cunt!" Sandor replies, "You're shit at dying, you know that?" before hacking the man's skull in two.
* that, tens of thousands of imprisoned Irish (some of whom were kidnapped) were sent to Barbados by the British, which was called getting "barbadosed."
* that the apparition of Sheridan's father when Kosh is killed was actually the dying Kosh talking to him.
* that the beggar woman he just murdered was his wife Lucy, that Mrs. Lovett knew she was alive the whole time, and that she lied to him. He promptly mourns dramatically, goes fake happy and kills Lovett in a psychotic rage, and then slips in a Heroic BSoD
* That the Bradleys were mostly assigned to cavalry scout units accounts for the high attrition; recon troops have been notoriously susceptible to friendly fire since dirt was invented. Even friendly fire from their accompanying tanks. The fact

that the vast majority of combat missions were flown by US aircraft is also a contributing factor, as was the fact that being hit from above or behind was about the only thing that could knock them out.
* that the cast had already learned she'd snuck out, Shirogane was in too much of a rush to notice her because he was headed to where he'd predicted she'd end up - correctly, and their other friends were so close behind they picked Kaguya and Shirogane up in the very taxi she'd gotten out of.
* That the "Classified Intel Acquisition" tape found in a Side-Op in
* that the criminal planned the timing of their meeting so that the guards aren't present to stop him trying to murder them.
* that the daughter had come down with a fast-acting disease and had died, and the hotelier had covered up her stay because he feared that having an illness and death under his roof would cause travelers to stay elsewhere (whether the mother or anyone else got sick afterward is left to the reader's imagination). The story is frequently set during the 1889 Paris Exposition with the mother and daughter portrayed as British tourists.
* That the Dreaming is a place inhabited by sentient creatures makes the end of
* that the entire thing was an April Fools Joke by the mayor of his city.
* That the female characters have "nude-alities". It actually sounded somewhat plausible at the time.
* that the Flying Dutchman needs in order to be able to eat, and instantly appear on the deck of the ship afterwards. Even more perplexing once you consider that he should've been able to notice them coming into the room, especially since he was facing the general direction of the door.
* that, the French and British government sided with Germany, effectively killing off all hope, by demanding that Czechoslovakia handed the disputed territories over to Germany.
* that the good Egyptian players are intentionally not playing up to their usual best, in hopes of better European club contracts.
* that the Gryffindor boys' dorm was split down the middle "on the first night of the first week of the first month of our first year here," as Neville puts it.
* that the higher-ups at Post 047 are doctoring the records so that the site has a perfectly averaged productivity rate, which would make them appear less suspicious.
* that their anatomies are incompatible, so he shrugs and says "Ok, then how about a little head?"
* that the man he's been studying under and trying to emulate for the last fifteen years is his father's killer, and not only that, but the aforementioned man has been planning to tie up loose ends and get true revenge on Edgeworth's father for those same fifteen years
* that the meat isn't even meat, it's vegetable matter and that the disappearing employees are the result of a man-eating monster who likes the taste of those who have eaten the food there.
* that the murdered stepfather wasn't molesting his stepdaughter - the biological father was. When the daughter told the stepfather about it, the father murdered him, telling the daughter afterward that he'd kill anyone else she told and her too if the need arose. The father lies about it when arrested, saying he killed the stepfather because he was abusing the daughter. Then the team confronts him with the proof that it was him abusing the daughter. He tells his lawyer to get him out of it, mentioning that the lawyer just got him off the hook for murdering the stepfather. The lawyer, and the CSI, clearly explain to him that the rape of a child under Nevada law carries a mandatory sentence, for which there can be no plea bargains.
* That the original Bearers know her ancestry, and don't blame her in the slightest for what Chrysalis did.
* That the player doesn't see until the end. Isaac watches it again and again on the way there. Kendra even asks how many more times he'll watch it.
* that the reason Xander took up residence in Faith's mind was because he viewed them having sex as the two of them becoming one. Combined with the unusually active Hellmouth and right at the moment of climax, Faith is sharing space in her own

body.
* That there is an alleged missing chapter of the game, referred to as "Chapter 3", which was removed prior to the release of the game and was/is intended to be released as a content patch. Fans often refer to this missing content due to the unfinished nature of some plotlines (notably, Eli and the child soldiers steal Sahelanthropus from Mother Base and fly away to parts unknown). Evidence pointing to this includes a supposedly-unused entire ending detailing Mother Base celebrating global disarmament (in actuality, it's a
* that there is a similar tank full of Kaworu clones, as Units 05-13 use Kaworu-powered dummy plugs. In the manga, we see the original in a jar.
* That there's a hidden character named "Hornbuckle", a reference to Jade's occasional line "Hornbuckle who?" Fans gave the name to the unnamed warrior fighting the fiery warrior in the background of The Pit 2 (Ed Boon claims that was supposed to be Liu Kang). Jade's comment is, in fact, a reference to one Leanne Hornbuckle, whose name appears in the game's end credits.
* That - there was a studio engineer named Chris who never had anything to say about the music they were recording until he heard them play "Sabotage", which he was enthusiastic about, seemingly because it was more of a rock song... So it was "Chris Rock" because it was the "rock" song that Chris liked.
* That there was something planned with all the unused level space outside Camp Omega in
* that the severed head remained balanced on the neck (he was sitting on a park bench at the time).
* that the spirit world known as the fade and the mortal world were only separated shortly before the beginning of recorded history and long after the first civilizations had been established by elves dwarves and humans got wrong.
* that the stars are the angels themselves or inhabited somehow by an angel. Literal star gods that are not gods like in fiction.
* that the town has to be moved five miles down the road. In Toronto, Ontario, Canada, the Toronto City Council had seriously considered turning the abandoned Adams Mine into a dumping site for Toronto's garbage until then-councilors Jack Layton and Olivia Chow showed them this episode, and they immediately changed their minds.
* That the trees in the Living Forest stage can eat the opponent as part of a secret stage fatality. This one isn't true in
* that the two of them aren't so different, however, Ed tested the boundaries of alchemy as well by trying to revive his mother. Ed screams "I'm not-like-YOU!!", and starts to beat Nina's father raw in a rage — until the chimera Nina starts to growl and tug at his sleeve; "No, big bwudder." Even Al couldn't stop him before this.
* that the Uchiha would betray Konoha and wanted to protect the village. So he ostracized the Uchiha clan from the start of his reign and treated them worse than he should have. His treatment of them led to the attempted coup, since his treatment was passed down (though to be fair he is a lot less to blame in this event compared with the next example.)
* that the VIP was removed, and the entire season was free to watch for a while.
* That they are currently wearing, all thanks to one lusty Dragonborn.
* that they are the same game in a brand new package and the fact that it is blamed for making games more unoriginal. Then there's the fact that the FIFA games introduced and normalized the much disliked lootboxes in full-priced AAA games, which many have compared to gambling.
* that they only became villains thanks to Monokuma wiping their memories. If that hadn't happen, the Character Development
* that the younger soldier contracted what he thinks is leprosy during his time in South Africa, and the family was keeping him at home in secret to treat him without his being locked up in a hospital. The younger soldier, who's actually only suffering from treatable icthyosis, voluntarily went along with this.
* that they were wearing similar clothes by having Gustavo leave the pitch, while Guillermo was still giving orders to his team despite the ban he received.

* That Thing Is Not My Child!: A character refuses to consider a clone or artificially created person made from their DNA to be their family member.
* That Thing Is Not My Child!: Some people might have this reaction to learning that there's now a younger clone of themselves.
* That Thing Is Not My Child!: When the parents themselves don't want anything to do with the child.
* "that thing that happens to your head when you eat ice cream too fast."
* that thing with the guy", repeating the above conversation almost verbatim.
* That Thing You Do! by a reporter: "Are those prescription, or are you just trying to look cool?"
* That Thing You Do!, Guy asks the hotel doorman Lamarr for the name of a good jazz club in town. Lamarr won't reveal it until he is certain that Guy knows his stuff.
* That Thing You Do!: Haise snarks after a band performance in a restaurant about "their fan", singular.
* That Thing You Do! has an applause-o-meter that determines the winner of a band contest. It's not a machine but a model standing in front of a marked-off dial backdrop; she uses her hands to show how high the applause goes. The gradations are: "You stink", "Not terrible", "Good", "Extra good", "Super", and "Wicked". (The fact that Jimmy is seriously butthurt over Guy changing the tempo on his song while ignoring the applause-o-meter redlining at the far end of "Wicked" behind him neatly foreshadows some of the problems to come.)
* That Thing You Do!. However, he was not only a supporting role but the director.
* That Thing You Do!, implying he's possibly a Latino who uses a stage name.
* That Thing You Do! the band originally called themselves "The Oneders"; their manager made them change it to "The Wonders" because DJs were calling them "The Oh-nee-ders."
* That Thing You Do!, the band's manager, Mr. White, has a boyfriend named Lloyd. Although the way they interact in the added scene is very obviously that of a romantic couple, there is otherwise no indication of White's sexuality. This is likely also another Beatles' reference, as their manager Brian Epstein was known by them to be gay.
* That Thing You Do! to fill in for him. This talent show led the The Wonders towards the path to recognition. The former drummer, Chad, ends up taking Guy's old job at his father's appliance shop.
* That Thing You Do!, waitress Mauguerite mentions getting married in Portland before moving to Reno... right where she got a divorce.
* That Thing You Do! was released on the Play-Tone Records label. (Tom Hanks would also use the name for his production company.) The title track became a minor hit in its own right, making the Billboard Hot 100, and occasionally being heard on Oldies radio to this day.
* That Thing You Do!. While not really kid-unfriendly (and, again, it was the instrumental version), it's a very strange music choice, even in the context of the show.
* ...That Thou Art Mindful of Him. All of the characters who appear in this story are working with US Robots and it is that nebulous society that they're fighting against.
* ...That Thou Art Mindful of Him...", problem-solving robots are created to cure mankind of the "Frankenstein complex", human distrust of robotics. In the course of their discourse, the question of human authority over robots comes up; should a robot treat the orders of a dimwitted loon the same as those of a level-headed genius? If forced to choose between the two, should they save a healthy young child who might live a century instead of two sickly old adults who might not live out the year anyway? What qualities should a robot take into account when they obey and protect humans? Eventually, the robots decide that they are the best candidates for the status of human, and give recommendations that will eventually result in human support for robotic proliferation, so as to set up the ascendancy of their positronic kind, all in accord with their Three Laws... of Humanics. (Dr Asimov, knowing that it was against his usual grain, did righteously proclaim: "I can do one if I want to".)

* that, though not as long, is absolutely annoying since there are enemies just about everywhere you go. Many of them are armed with melee weapons, crossbows, molotovs, dynamite, guns and some of them wear bulletproof armor. Then you'll have to face enemies where you can't necessarily fight back, such as dealing with a fish-like monster who will kill you the second it comes in contact with you.
* That Time I Got Reincarnated as a Slime and cite various failings in their duties that could have prevented the incident from happening in the first place (such as screening foreigners or monitoring the roads for suspicious activity). The incident causes Tempest to reconsider its stance towards human countries going forward, with the consideration that Farmus probably won't be the only country or force that might try to antagonize Tempest.
* That Time I Got Reincarnated as a Slime and heroes who are often summoned or reincarnated from other universes. The main character, Satoru Mikami, is reincarnated as a slime dubbed Rimuru Tempest. He becomes the leader of a village of goblins (which evolve into hobgoblins), gradually accruing more followers of different monster species — including oni (which evolve into kijin), pig-man orcs, and lizardmen (which evolve into dragonewts). He also forges dipilomatic relations with some of the neighboring human and dwarven kingdoms; befriends dragon-gods, heroes, and demon lords; and wages war against a corrupt church and the kingdoms under its sway.
* That Time I Got Reincarnated as a Slime, and the orcs once freed of its effects are appropriately horrified by what they did to survive.
* That Time I Got Reincarnated as a Slime can breed but usually don't because their immortality removes the need to leave descendants.
* That Time I Got Reincarnated as a Slime does not need to eat, drink, sleep or even breathe. It actually takes him about a week to learn this; he realized after about a week of eating plants that he hadn't defecated at all, and that he wasn't drowning after accidentally falling into a lake.
* That Time I Got Reincarnated as a Slime has no need to eat for sustenance, but as a former human, he still indulges in it once he figures out a way to overcome his inability to taste.
* That Time I Got Reincarnated as a Slime'', he uses magic to replicate modern conveniences such as inscribing a heat generating magical circle on a faucets to have heated water on tap. There's also the dwarf kingdom Dwargon's secret project of developing a magical combat golem, essentially a robot, made out of enchanted metals.
* That Time I Got Reincarnated as a Slime illegal to perform these for said moral reasons, but nations can and will lie about it for the possible benefits. Rimuru truly thinks it's a horrible thing from the first moment he learns about it from Veldora, and once he starts getting influence through Tempest's economic and political power starts advocating for further cracking down on Summons.
* That Time I Got Reincarnated as a Slime necessary to keep this from becoming a problem again with the former not lifting a finger to help.
* That Time I Got Reincarnated as a Slime of the series, even though she is one of the most powerful characters in the story.
* That Time I Got Reincarnated as a Slime: Part of the world. Monsters don't normally have names, but powerful monsters can give them names for a small amount of magic power. Rimiru discovers that this small amount adds up quickly, though, and passes out halfway through trying to name every goblin in a village. When he wakes up, he finds out that everyone he has named is much stronger and healthier than they were before.
* That Time I Got Reincarnated as a Slime so don't use maps or writing and can't pass as much knowledge onto their children so humans are the most advanced civilization.
* That Time I Got Reincarnated as a Slime (the latter of which often makes her miffed and she'll wait for him to fall on his face before he swallows his pride to listen).
* That Time I Got Reincarnated as a Slime tier people in the world who he finds himself now peers with, all of which legitimately could give him the fight of his

life if they clash...and goes back to comedy as these nigh-invincible god-like beings start palling around dealing with the daily struggles of ruling their nations, controlling their quirky subordinates, and trying not to start fights that would require redrawing the world maps.
* That Time I Got Reincarnated as a Slime to fuel skill acquistion and evolution.
* That Time I Got Reincarnated as a Slime where the protagonist starts his new life, not as a uniquely powerful human but a uniquely adaptable slime — i.e. a small animate blob of goo.
* That Time I Got Reincarnated as a Slime who did what he did to try to save his people.
* That time Spidey took down Firelord, a former Herald of Galactus. We're talking
* That Time the World Ended", Quinton mocks a doomsday preparation video for saying that coffee is almost a necessity in a post-apocalyptic world.
* that to many fans and their fanfics. She is a young, model-like mare with a knack for posing who is seen hanging around (and clinging onto) the obviously much older aristocrat Fancy Pants.
* That Touch of Mink, with Cary Grant and Doris Day, with the added little twist that a psychologist thinks the baby is the product of two men who married.
* that Train was raised to become a killer as well... by the person who killed his parents. And Train specifically sought out training from said assassin so that Train could avenge them one day.
* That trolls are drafted offworld when they reach 10 sweeps (canonicity never specifies the exact age at which this happens).
* That trope and its exploitation is the basic concept behind the show. Somewhat more
* that turn out to be aliens warning him about some parasites infecting the crew.
* That "two crows flying into a chalk cliff" analogy could also apply to Taylor Momsen as of late. Ever since she's said she "doesn't fucking care" about being a good role model, she has begun layering her make-up on pretty thick. Michael K of Dlisted has unfavorably compared her multiple times to a panda.
* That unavoidable marriage actually turns out rather well as they gain a genuine love for each other over time.
* that under no circumstances was his wife to have any say in the Regency. Before chalking this down to simple 17th-century misogyny, recall that this was the father of Sweden's Queen Christina who had arranged for her to succeed with absolute power.
* That unknown darkness living that's trying to take control of both Yuya and his counterparts?
* That Uriel is the 'funniest angel in the garrison' when there was Balthazar, and above them the kind of mind that makes of fake identities for two guys named Winchester and surnames them Smith & Wesson, really does say something weird about angel mentality. I'm not even sure what.
* that vapid that you care what people like that think? You're better than them, smoke instead!"
* That version too has been updated to 11:30, but it hasn't been published yet (except in raw demo form).
* that very same Morrison who was himself a pest. At least Morrison got pushes to cut short.
* that Vietnam War movie". We now have at least 3 generations that would be surprised to learn that it was ever used in Looney Tunes.
* that vision of the future, just barely too late to revise the plans.
* That Vision Thing", when Lilah Morgan had been using a psychic to give Cordelia killer visions in order to force Angel to do something for her, Angel did... then after the exchange was made, he threw a piece of rebar at least forty feet, killing the psychic, and as Lilah turned to look, appeared right behind her.
* That Wacky Redhead, and continues with the accumulating changes from there. They naturally start out on television.
* That was actually an ending filmed for the American version, but it wasn't used. Both versions end with Franken-boy and Baragon falling into the earth.

* That was actually his plan since the start. He recorded the footage and gave it to his father, claiming that he was the one attacking a human girl in the video.
* That was a hint regarding the "Which Robin?" controversy — Dick Grayson eventually adopts escrima sticks as his weapons of choice when he nails down the
* That was also sampled in "Saltwater" by Chicane, which in turn was used in a Tourism Ireland advert.
* that was an oh so subtle hint that at the end of this game he was going to go from
* That was because it simply didn't work because he was cold-blooded, and had to have his body temperature raised beyond normal; which the military did do, but it was a hassle, and Godzilla was able to recover by going into the ocean. (In all fairness, he passed out right on the shore.) Simply put, the ANB was too much work to pull off and needed an elaborate setup. Particularly given that while they knew
* That was explained as WWE had hired someone who looked remarkably like Striker, in order to keep the kidnapping a secret.
* That was his second try. Moses Magnum first tried to destroy Japan in
* That was how New Hong Kong saved itself from the "help" of a nigh-invincible race of
* That was hyperbole. In the beginning, Hiccup narrates (falsely, for dramatic purposes) that the place he lives is perfect, aside from the awful dragons. In the end, he turns it around by saying (falsely, for dramatic purposes) that the dragons are the only remotely tolerable thing about his home.
* That was kind of the point, since the show took place after a catastrophic bombing that left the residents isolated and unsure if the United States still truly existed.
* That was largely because Hergé befriended Zhang Chongren, a Chinese student who came to Brussels to study art and architecture. Zhang was his consultant about China, and was the reason why Hergé became sympathetic to the Chinese during the war and caricatured the Japanese invaders so heavily. When the war ended, there was basically no reason to draw these caricatures anymore, so Japan just became another nation to portray accurately. Ironically, while his first editor, a conservative Catholic abbot, was
* That was more of a mockery of professional wine tasters - there being in his own opinion "two kinds of wine - wine that makes you go 'Mmm, that's okay, can we have eight of those? Give us eight of those!' and another one that makes you go 'Arrrrgh Jesus, what is that?!'"
* That was mostly not because of their genes, though: the gaiaphage basically had control of the baby's mind from day one.
* That Was Not a Dream: Character talks about a dream they had and is then told that they weren't dreaming and what they described actually happened.
* That Was Not a Dream: Someone talks about having a dream before being told that it wasn't a dream and that the events described actually happened.
* That was not the only time in the series that someone was declared to be dead and then turn up alive later. There are
* That Wasn't a Request: You should just give up while you still can. By "should" I mean you WILL give up or else!
* That wasn't being a competent officer. That was being the same idiot he'd always been and happened to get lucky this time. As his aide-de-camp later (frequently) reminisces.
* that wasn't even a review. Needless to say, this caused a bit of backlash.
* that wasn't in the script actually got distracted by the prop while shooting the scene.
* That wasn't really about the feelings they had for each other, more that Yar knew she was probably dead in the original timeline, and her best chance of survival was actually to go with them.
* that wasn't really Aizen, but Hinamori, his best friend, placed under an illusion. Luckily, she lives long enough to receive medical treatment.
* That wasn't the first time a Broadway star was stunt cast for a bit part. Stubby Kaye from

* That wasn't the first time Drakken got a sudden competence boost when opposing other villains. In fact, Drakken is actually
* That wasn't the first time Epic Games gave away a game for free - in 1999, they rereleased their classic fighter
* That wasn't the first time she had missed something that was obvious. She never realized the true reason
* That wasn't the only joke cracked during the crisis. While assisting the crew in the cockpit, deadheading captain Dennis Fitch told the crew, "We'll all have a beer when we get this thing down." Haynes' reply? "I don't drink, but
* That Was Objectionable: A lawyer objects in a trial, except they have no reason to.
* That Was Objectionable: Arbitrarily objecting for no good reason just to stall or throw the other attorney off their game will quickly get you chewed out by a judge, and doing the same in a deposition will likely be reported to the judge when the other side gets sick of your shit and decides to pursue sanctions (especially if you abused speaking objections to coach clients on how to answer), and will get you sanctioned in general if it's a favorite tactic of yours and judges have had enough of you wasting the court's time with pointless and ridiculous objections.
* That Was Objectionable: In court, a lawyer can refute anything simply by hollering "Objection" or "I object".
* That Was Objectionable: In court, the lawyer can refute anything by hollering "Objection" or "I object".
* That was preceded by Druids of the Claw (who can turn into bears, boost allies' damage by roaring and regenerate their health, though not while in bear form) and
* that was released outside of Japan also counts, being the main threat of the tutorial missions and the first few missions of the story.
* That was Roosevelt's intention. He hated Taft's policies and would have rather seen a Democrat win than Taft get re-elected.
* that was terrorizing the city is finally deactivated, it falls into a lake and explodes into oblivion
* That was the concept of the Swiss exposition "futur antérieur", with how archaeologists of the Fifth Millennium might interpret 21st century society based what few archaeological remains would be conserved. The expo proceeded to
* That Was the Last Entry: A diary stops abruptly to indicate the author has died.
* That Was Then, a short-lived 2002 drama about a man reliving his school years.
* That Was Then... This Is Now is compared several times to a lion — attractive, charismatic, and utterly incapable of caring about the people he hurts. This seems to be innate rather than environmental, and the narrator observes that it's unlikely he could ever be treated or convinced not to harm others, only put in jail for who and what he is.
* That Was the Reward: Someone refuses or destroys something, then learns it was a reward.
* That Was the Week That Was kickstarted the British television satire boom of the 1960s. Juvenalian.
* That Was the Week That Was, the British original (1962-63) and the American remake (1964-65), both fronted by David Frost.
* That Was the Week That Was to criticize the political establishment.
* That Was the Week That Was was seen getting into bed with an impossibly glamorous actress/model type. Amid giggling and sighing, foreplay ensues. The camera then cuts to stock footage of waves crashing against rocks, tall chimneys falling, train going into tunnels, et c. We cut back to Willie Rushton and girl, who are still in bed - but soaked through from the waves, covered in brick dust and rubble from the chimney, and smothered in soot from the steam-train. She is screaming. He is wide-eyed with panic.
* That Was the Year That Was), he remarked that the Catholic Church's ban on eating meat on Fridays seemed inconsistent, because it meant that a soldier was permitted to kill a man on a Friday but not to eat him.
* That Was the Year That Was includes a ballad dedicated to Alma Mahler-Werfel, a socialite, who he praises for managing to marry three of the greatest minds of the

day and having the raciest obituary he had ever had the pleasure of reading.
* That Was the Year That Was is a parody of a jingoistic "soldier off to war" song from World War I, updated for changing circumstances and featuring the stinger "I'll look for you when the war is over ... an hour and a half from now".
* That was until Clippers owner Donald Sterling's infamous meltdown, resulting in the team changing hands and
* that was written for a lay audience precisely to update them about how their basic ideas about science has changed drastically from Newton to Einstein, and even Hawking's book is a theme park (avoiding any scientific equations other than E=MC squared) reduction of more complex phenomenon.
* that way (at least, not that we're shown), but in order to use them to make his escape when needed. Although one of these women is revealed to be a Stand user, and his getaway is a ruse to get Jotaro and friends to trust her.
* that week's musical friggin' guest) as the punch line is starting down that road...
* (that were actually staged by the main antagonist in order to start a war)
* That what we call a void really isn't, but is filled with quantum energy, and particles that come and go in picoseconds. In untold trillions of years it will form conditions somewhere, which will produce another universe. When there's an infinity of time, even the utterly improbable will become a certainty.
* that when The Great Society was dissolved and the Slick siblings joined the Airplane and took their own songs with them. Hence, Grace Slick sings both versions.
* that, which did turn out to be another business like Jadeite's. Even Jadeite occasionally just infiltrated pre-existing businesses.
* That Which I Should Have Done I Did Not Do going through it was the wrong choice.
* That Which Is Seen, and That Which Is Not Seen", the 19th century French economist Frederic Bastiat argues that many destructive government policies arise from tendency of people to only focus on what is obviously visible.
* "That Which Redeems": The demon Reakk tears a human into two, then notices he forgot to interrogate him and steal his soul first and tried to cover it up by pushing the halves together again.
* That Which Sleeps had a successful Kickstarter campaign, promising early footage from the developer, and then...radio silence.
* "That Which Survives". An Enterprise crewman tells Mr. Spock "...our estimated time of arrival is eleven and one half solar hours."
* That Which Survives civilization called the Kalandans made an artificial planet to live on. Unfortunately, the process created a microorganism that killed the personnel stationed on the planet. By the time they died, the disease had been transported back to the original civilization via supply ships, completely wiping it out.
* That Which Survives inhabitants traveled into space and search for new bodies to possess.
* "That Which Survives": Losira, subverted in the end when we find out she didn't survive.
* That Which Survives". The last survivor of a colony leaves a computer message for any of her people who might find it.
* That whole mess can technically be avoided with other adjectives (bonito/a, hermoso/a, guapo/a, etc.). In these cases one can say, for example,
* That whole Supreme Court case when the Court ruled that since the father who filed the lawsuit didn't have custody of his kid, he couldn't claim to be protecting her First Amendment rights.
* That Wilkin Boy of Betty and Archie who fit even better. Samantha is physically very strong, while Bingo is a weak musician. This trope may explain why her father never succeeded in breaking them up or getting her to date a manlier man.
* "That Will Be All", and are brought to a room where they find their Amethyst being held by the guards as well. It turns out she's been making friends and allies, but boy do she and her "Famethyst" love pranks.
* that will implicate the President of the United States in the day's conspiracy.

He has the bank president set off the silent alarm to call the police to the bank, and since Henderson can't allow that evidence to reach CTU (which it undoubtedly would if Bauer was arrested), his men open fire on the policemen, allowing Jack to escape in the confusion. In a police car, no less.
* That without including the effects of stellar evolution (from a sun that looks not very different from ours to a huge red one when the star becomes a red giant, and finally just a very bright star when the star has become a white dwarf) or where the planet is located: just imagine, for example, the view of the Milky Way from the Magellanic Clouds or the star-studded sky of a planet in a globular star cluster.
* "That Woman" shows that it doesn't even have to be the "popular" group that is consisting of jerks: the school's "religious" group routinely breaks the rules of the group by engaging in activities like premarital sex and exploring their sexuality while also
* that word. He's clearly white, but that accent makes figuring out his exact ethnicity... difficult.
* that Worf had screwed up tremendously, and that if it hadn't been a Klingon plot he would have been punished for firing weapons without confirming the target was an enemy vessel.
* That world has a larger scale vicious cycle going as well. First, magitechnology is developed. Then, they develop a
* that would be terrible. The whole group also saw Durkon as little more than a walking band aid, and left him behind, wounded, only remembering him when they needed healing. This changed, and, so far, only Belkar retained his sociopathy.
* That would be the Eight Kings. Each one has a capture level over 6000. They include a 22-kilometer horse that can create vacuums and send columns of air straight through the aforementioned massive planet by
* That would be Willsmere, Kew. Enormous Second Empire building (think arches and towers), formerly Kew Lunatic Asylum. Nice apartment building, actually. And, yes, reportedly haunted.
* that would never be allowed on a television sitcom today, and not just because of the significant impact the show made towards marriage equality and the like. An NBC revival debuted in 2018.
* That wouldn't be the last time Karkat had an erotic slip of the tongue...
* that would put a bass drum to shame. In the middle of the night, no less. And they can be heard for 2 to 4 kilometers around.
* That Yellow Bastard—he doesn't break her heart upfront, but lies to her and kills himself afterward. If he had stayed with her, Senator Roark would have most likely attacked Nancy to get revenge on him.
* That you can knock people onto the hooks in the Dead Pool stage. You can't.
* that. You can see it in the ingredients: whey, vegetable solids, sunflower oil, opening the refrigerator to find there's nothing else and deciding to make tacos, even though you made them two nights ago, cheddar cheese, multodextrin, salt, Alex, tell your sister to come downstairs, it's taco night, whaddaya mean, "She's at Brian's house"?, rice, flour, onion powder, no we can't eat in front of the TV, we're gonna dine as a family, dried tomato, malic acid, fine, if you don't wanna eat what's being served, everyone can fend for themselves and watch this family fall apart, but if anyone wants to join me, I'll be in the dining room enjoying tacos!, disodium phosphates, paprika extract, take off that sombrero, Alex, I will not be mocked! Oh, and potatoes.
* that you're fortunate enough to draw has a couple of Heart-to-Heart scenes specific to them, and a sidequest where they and their ideals or goals are the focus. These are usually required to unlock a particular node on their Affinity Charts, which confer bonuses to their native abilities
* that Zeh'lot died between 2 and 3 PM, and that the stone slab fell onto him, even though he shouldn't reach that conclusion from the rebel hideout's photo alone. However, he's not the killer; his wife did it, and she told him how the crime happened.
* Thaumatic Moratis ("magic bereft") disorder, in which ponies don’t develop

their magic until into their adulthood.
* Thaumaturgists, the basic in-universe mechanics of the art requires both Paths and Rituals to have some way to "target" the subject of the power. With most Paths, it's as easy as being near enough to see the target. With rituals - which could take minutes, hours, or even days of preparation - there's got to be something on hand to establish what — or more importantly who — the magi is going after. And there's nothing that ensures a target lock like having a sample of the victim's blood. Except maybe knowing the victims True Name, but that's difficult to learn.
* Thaumaturgy (ritual magic) is slower and takes more prep work than evocations, but is also incredibly flexible and usually safer to use. Even if it only serves as an alternate approach to solving problems that a mundane expert could probably also deal with in a similar timespan, it means that with their three spellcasting skills (Conviction, Discipline, Lore) a proper wizard or similar "general" practitioner can act as a reasonable substitute for a wide
* Thaumic Horizons, one of the last pieces of research the player unlocks allows them to create a body out of zombie tissue and set their soul to return to it if they die. It not only allows the player to die without counting a death (and without losing their save in hardcore mode), it also allows them to enhance the body they return to.
* T. Hawk's father was also killed by Bison, not that some of the fans care or Capcom played it up.
* Thawne is the most Straw-y of them all, being simultaneously a takedown of the idea that anyone could replace Barry Allen as
* Thaw, Then, he notices that the ship is on emergency lighting, and even that seems to be failing. THEN he notices that the other capsules in the room have also failed and either contains decayed corpses or blood splatters like someone bashed their heads open from the inside. Realizing that some sort of disaster has befallen the ship, he suddenly notices that they are still in orbit around Earth, having never left... except this Earth has a giant glacier of a new ice age covering most of the northern hemisphere, and no signs of human cities anywhere...
* Thaw,. Then, he notices that the ship is on emergency lighting, and even that seems to be failing. THEN he notices that the other capsules in the room have also failed and either contains decayed corpses or blood splatters like someone bashed their heads open from the inside. Realizing that some sort of disaster has befallen the ship, he suddenly notices that they are still in orbit around Earth, having never left... except this Earth has a giant glacier of a new ice age covering most of the northern hemisphere, and no signs of human cities anywhere...
* Thay is now ruled by Szass Tam, a lich with thousands of undead followers.
* Thaylen religion, based around "the Passions," involves carved charms representing an emotion such as bravery. The charms are not magical and the Thaylens do not think that they are; the intent is for the charm to remind you to keep the emotion in mind when you need it.
* th-century battlefields' warriors tended to have guns in their hands and manure could be used produce gunpowder. Various states in Europe even levied a tax of manure on farms around this time.
* The $1,000,000 Chance of a Lifetime, but not to the contestants. If they hit it, they lost their turn to the other team.
* The $100,000 Name That Tune used the 1-1-2 rule, as shown above. This was extended to a 1-1-2-4 setup in most tournament episodes during Jim Lange's version. (Note that if the players split the first two rounds, the third round became absolutely meaningless, aside from the winner of that game receiving a prize.) At least one $100,000 finals episode had one contestant sweep the first three rounds, only to lose the final round and the tiebreaker question, giving the whole shebang to his opponent.
* The $10,000 Pyramid, after a season. Six weeks later it was snapped up by ABC, where it ran for six years.
* The $10,000 Pyramid was the only part of the format that execs liked.
* The $1.98 Beauty Show: $1.98. In change. And a "bouquet" of carrots.

* The $20,000 Pyramid. He threw his chair out of the circle and screamed.
* The $25,000 Pyramid had host Dick Clark playfully pressuring Vicki Lawrence into selecting the category with the Mystery 7 as a car was up for grabs. Vicki just glared at Clark and called him a bleeped-out name. We can only guess what was bleeped as Vicki selected the category "Loosen Up", and Clark read what the subject matter was: Things that are stiff. The studio broke down laughing; Dick and Vicki were both crying laughing.
* The $25,000 Pyramid) today, aren't you?" The audience howled with laughter and Clark was looking for a place to hide. Vicki eventually picked the category "Loosen Up," and we have a good idea of what word was bleeped as the audience went into sustained laughter when Clark read what the category was about: "Things that are stiff."
* The "$3000/$4000/$5000 + one spin" spaces in the final round can usually help a contestant lagging behind to overtake the leader and win the game, even more so if they land on the space multiple times.
* The $378.53 phone bill that Lisa ran up from the phone calls she made to the Corey hotline in "
* the $500 million of art stolen from the Isabella Stewart Gardner Museum in Boston in 1991, was carried out by two thieves dressed as Boston police officers.
* The $64,000 Question (and yes, it was titled in dollars) which offered a top prize of £6,400, but they got around this by alternating contestants so that the top prize would not be won twice in a row - once contestants reached £1,600 they would effectively tackle their remaining questions at a rate of one per episode. They eventually persuaded the ITC to increase the limit to £6,400.
* The $80 "Wild Cards Premium Edition" includes the tarot cards, as well as an art book, music CD, and a carrying case for a
* The 00 Gundam can do this as well. Like the Exia, it can dual-wield beam swords but also can dual-wield a pair of similar sized solid swords that also act as a pair of laser rifles.
* The 00's New York Yankees were known for this. They were coming off of their unbelievable run of 4 World Series titles in five years from 1996-2000. However, between 2001 and 2008, they achieved the top seed in the AL 3 times and made the World Series twice, and didn't win a single title, one of the longest stretches in the history of the club. They had three particularly notable years in that stretch. First was in 2001, when they fell to the Arizona Diamondbacks, a team in only its 4th year, in the World Series, making the D-backs the youngest team in modern American professional sports to win their sport's title—and to add insult to injury, the World Series loss happened shortly after
* The 06/17/12 update reveals the true nature of the mysterious character who was only known by their screen name, UranianUmbra.
* The 08th MS Team and getting involved in the current war, focusing on the everyday soldiers in the One Year War. Because of this, most pilots in the series don't have brand-new prototype Mobile Suits. Instead they have things like the RX-79(G) Gundam Ground Type, which is merely spare parts from the RX-78 Gundam program made into a mass-produced Gundam designed for ground combat. There's also the Gundam Ez8, which is an RX-79(G) rebuilt with field-fabricated parts due to lack of spares. One poor unit even had its destroyed head replaced with that of a GM. Still, the Ground Type Gundam's run was limited to about 20 units, with its GM counterpart, the RGM-79(G), only having 42 base units and a handful of Sniper variants built. That said, according to side materials the ground-type GM does have some Super Prototype-esque features over the standard GM — for one, it's still made out of the rarer and more durable luna titanium the original Gundam uses, rather than the standard GM's lighter but weaker titanium alloy. It's also compatible with a wider variety of weapons, including a full-sized, full-power beam rifle rather than the smaller and weaker "beam spray gun" the standard GM uses... though beam rifles were in such short supply that most examples of both the Gundam and GM Ground Type carried less powerful projectile-firing machine guns instead.
* The 08th MS Team, except the long-running period for that has been planned from

the start.
* The 08th MS Team, the Apsalus, a flying weapon of mass destruction, uses the same hard- and software components as a mid 1990s desktop PC, such as a 6X86MX CPU from the long-defunct manufacturer Cyrix. Along with DirectX6, you can kinda tell why the first 2 versions of the Apsalus ended up crash landed.
* The 08th MS Team, The Principality of Zeon commissioned the construction of the Apsalus, a Mobile Armor with a beam cannon powerful enough to simply blast through the dozens of meters of earth and rock protecting the Federation's underground Jaburo base. The completed Apsalus turns out to have scalable power output, capable of putting out anything from the full-force Jaburo killer to tiny, rapid-fire pulses for punching huge but precise holes in mobile suits.
* The 0% Growths run has some notable offshoots in the form of 0% Bases (everyone starts with no base stats, but has 100% growths to compensate), and Negative Growths (the standard stat growths now work in reverse, meaning that leveling up actually
* The 10000 Dawns: Robert Brick can get moody at times, in contrast to his more cheerful girlfriend, Sasha Billie.
* The 10.0.0 firmware update finally added this option, making moving data much quicker and convenient. Unfortunately, save data can still not be moved using this method.
* The "1000th Birthday Suit" is an outfit composed of bone articles: the bonedanna, the boneana hammock, and bone spurs.
* The 100, Abby is initially horrified that her daughter, Clarke, allowed a missile to hit a friendly village, leaving hundreds of people to die, because saving them would hurt her military strategy. However, Kane points out that Clarke grew up on the Ark, where leaders like him and Abby often denied people access to food or medicine and would routinely execute people for even minor offenses, all in the name of ensuring their species' survival, so they shouldn't be surprised when Clarke, having been given a position of leadership, behaves with the same ruthless pragmatism. As Kane puts it, "She learned what to do from us."
* The 100% Achievements run, which can only be done in a minimum of three playthroughs of the game (up to NG+2);
* The 100, actress Ivana Milenkovic (Diyoza) learned she was pregnant shortly after being cast as one of the season's antagonists, and rather than recast, they wrote it into her character.
* The 100", after Clarke loses her arms in a traumatic accident up on the Ark, her father and Raven develop a pair of artificial arms for Clarke's use. These arms require them to turn Clarke into a Nightblood based on some of Rebecca's surviving records so that the cybernetic components of the arms won't poison her, and Raven later modifies the arms to increase Clarke's capacity to touch and feel anything with her new limbs, as well as adding an extendable sword to one arm.
* The 100: After discovering Clarke's plan to kill her, Nia has Ontari cut her own hand and cover Clarke's face with her blood. Clarke is still covered in her blood in the following scene, shocked by the event and by the color of the blood as well, as Ontari is a black-blooded "Nightblood".
* The 100, after the first few violent confrontations with the Grounders, the 100 try to set up peace talks to bring an end to the fighting. It's supposed to be a meeting between Anya, leader of the Grounders, and Clarke, unofficial leader of the 100, and neither of them's supposed to bring weapons or other soldiers. However, neither Anya nor Clarke trust each other, so they both have some of their people hiding in the woods nearby with guns or bows. When the snipers in the woods spot each other, all hell breaks loose.
* The 100, A.L.I.E.'s programming only lets her interface with and control a human mind if that person has given her permission to do so. Unfortunately, her programming doesn't make a distinction between genuine consent and coerced consent, so A.L.I.E. is free to use torture and threats of death to make people let her into their minds.
* The 100, all crimes on the Ark are punishable by execution, unless the offender is under eighteen years of age. This totalitarian justice system is necessary

because the Ark is thought to be the last outpost of humanity, and extreme measures must be taken to ensure that the species survives.
* The 100. A lot of Grounders are upset they didn't get to inflict their traditional punishment on Finn, but their Commander forces them to accept it.
* The 100, and got a bit part in the Season 3 premiere where he sings a song before being tackled by a drunken Jasper.
* The 100 and sending a hundred juvenile criminals to Earth to determine if it's safe to inhabit now.
* The 100), and slaughtering innocent Sky People just to force her to react.
* The 100 and unused passages, letting him get to places inside the Mountain while avoiding guards and locked doors.
* The 100 are flushed out into space, but with the odd twist that they're meant to fall back to Earth, burning up in the atmosphere, as a way of returning them to their ancestral home.
* The 100 are more about revenge than utility, involving lengthy torture sessions where everyone with a grievance against the accused gets a chance to go at them with fire and knives.
* The 100 are taken prisoner or trapped in a dangerous situation at some point, no matter how badass they are, and they usually need at least a little outside help in order to escape.
* The 100 are told to make their way to Mt. Weather, as it's the only safe haven left on earth. When they get there, it appears to be a charming rustic shelter, shielded from the terrors of the outdoors, and run by a just and benevolent leader. In reality, they plan on harvesting blood and bone marrow from the kids, even at the cost of hurting or killing them.
* The 100: A running theme of the series are these popping up. However, it turns out the characters don't often have access to all the data.
* The 100, as the limbs suffered water damage during their escape from Mount Weather. Anya explicitly tells Clarke that there’s no shame in seeking aid from another, but also thanks her for the trust she’s shown Anya in revealing such a weakness as she demonstrates how to remove the limbs from her body.
* The 100: At the beginning of the series, Bellamy immediately tries establishing himself as the headstrong and charismatic leader of the 100, but, though Clarke never makes an explicit bid for power, by the end of the first season everyone's listening to her over Bellamy, with her combination of levelheaded and headstrong leadership.
* The 100. Becca's later refinement of the concept was the Flame, which can hold the minds and memories of multiple people, and be passed on from one person to the next, but without actually overwriting the new host's personality, merely letting them commune with the stored consciousnesses.
* The 100 become this as they fight for survival on the ground. Made explicit in the episode "Nevermore" when Monty tells Octavia, "We're your people. We were sent down together. We survive together."
* The 100 being trusted with a weapon, then they "really are screwed".
* The 100 believes that feelings are a weakness and has deliberately repressed her emotions. After spending enough time with her, Clarke is able to tell that Lexa's not as emotionally numb as she'd like people to believe, and pushes her to admit her feelings. Lexa responds, first with anger at Clarke for dredging up her emotions, then by finally admitting that she's developed feelings for Clarke, and kisses her.
* The 100: Bellamy somehow outraces an explosion while crawling through an air vent.
* The 100 (bisexual female main character, lesbian supporting characters, queer female romance)
* The 100. Both their characters were effectively murdered, closing the door on future-season guest spots. The former appeared briefly in the season finale, which served as a character sendoff.
* The 100, but supports it anyway when he sees no other option for his people's survival.

* The 100cidal rather than homicidal. Luckily, once the eclipse is over and the plants stop releasing their chemicals, the effects wear off pretty quick.
* The 100, Clarke and Anya meet to discuss the possibility of peace between the 100 and the Grounders. They agree to not bring any weapons or soldiers to the meeting ... an agreement both of them ignore, instead having people with guns or bows hiding in the woods nearby. Clarke's backup was only supposed to get involved if Anya betrayed them first; it's unclear if Anya's backup was under the same orders, or if they were meant to assassinate Clarke mid-negotiation because Clarke's backup spotted them first and opened fire.
* The 100, Clarke convinces Anya that she should work with the Sky People instead of fighting against them; Anya is killed almost immediately afterwards, shot by Sky People who didn't know she wasn't still their enemy.
* The 100, Clarke explicitly refers to Wells as the closest thing she’s ever had to a brother. For his part, while Wells was initially hurt when he realised that Clarke was now involved with Lexa, he later assures Lexa that he’s happy for them as he now retains his existing bond with Clarke rather than risk losing it by trying for something more and failing.
* The 100, Clarke Griffin loses both her arms in a traumatic accident up on the Ark — her left arm completely lost and the right severed up to the elbow — requiring her father and Raven to develop a pair of artificial arms for Clarke's use.
* The 100 Commander Lexa, military leader and ruler of the twelve clans.
* The 100 destroyed by the bombs have simultaneously begun to melt-down due to lack of maintenance. Raven cites the fact that they were designed to last a hundred years with no human crew, but they've previously hit the deadline to reverse it and there is now no stopping another apocalypse. Note that in real-life, Nuclear power plants are designed to shut themselves down if their human technicians evacuate, not keep going for a century.
* The 100 Diamond Challenge: Get 100 diamonds in your inventory on Hardcore mode (so die once and you have to start again), without strip-mining. Making diamond tools or armor will subtract from your count, so better mining and protection comes with a price.
* The 100: Dr. Tsing inside Mount Weather is a fairly sadistic version of this and her actions largely spark a war that wipes out her community. In the backstory we have Becca, who invented the AI which destroyed the world, but surviving in space also worked on methods to counter it (correctly deducing it would be a threat again) and invented a lot of stuff relevant during the main story.
* The 100 ends its first season with a big battle between the Grounder army and the 100.
* The 100 episode "Blood Must Have Blood, Part 1", Clarke lays out a meticulous, step-by-step plan for how her army's going to invade Mount Weather; she even has visual aids. Meanwhile, inside Mount Weather, Dante tells Cage he has a plan for how to stop the invasion, but we cut to a different scene before we can hear what his plan is. Take a guess which plan works.
* The 100 episode "Blood Must Have Blood, Part 1" is concerned almost exclusively with the assault on Mount Weather, but it still finds a couple moments for Raven & Wick to talk about their post-hookup awkwardness, and Clarke and Lexa to discuss what Clarke plans to do with her life once this war is over.
* The 100 episode "Fog of War", a large, intimidating Grounder warrior locks peace-seeking Kane and Jaha in a cell with a slave woman. Jaha and Kane debate how they can convince the warrior, who they think is the Grounder Commander, that their desire for peace is genuine, unaware that the slave woman is the actual Commander and the warrior is actually her trusted lieutenant.
* The 100-esque situation and more on conflict between different civilizations on the Ground.
* The 100 evacuate the village in advance of the missile, but that would tip off Mount Weather that they have an informant inside the mountain. To preserve this secret, Clarke and Lexa tell no one about the missile and simply save themselves. Abby and Octavia, who were in the village when it hit, do not take this well.

* The 100), Finn (whom she had a relationship with when they first landed on the ground), and Lexa (whom she grows closer to in season 3 and finally has sex with in "Thirteen"), and all of them ended up dying.
* The 100 from regular violent warriors into unreachable murderous monsters.
* The 100 generally portrays violence as very disturbing, both through the visible brutality of the scenes and through how the people committing the violence are left horrified and disgusted by their own actions.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You:
* The 100 Girl Friends Who Really Really Really Really Really Love You
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You already starts out far crazier and sillier than typical harem series, then the craziness only intensifies as the manga goes on and adds even more girlfriends.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You: "And so, due to how things panned out, would you guys mind accepting [new girl] as my newest girlfriend...?"
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You anime.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You as her underlings. Her boyfriend Yuu, on the other hand, is a perfectly attractive feminine-looking boy.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You as it parodies the harem genre and its tropes.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You ends with Rentarou stripping down to nothing but a loincloth in order to shout encouragement to one of the girls during baseball practice. Then the next chapter opens with everyone at the game and Rentarou fully dressed, with no one mentioning the loincloth incident or what happened between chapters.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You: Hahari's first love died from a terminal illness when they were thirteen. Years later, she meets Rentarou, and upon discovering that they are soulmates, becomes his sixth girlfriend.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You has them all walk out the door with the narration declaring the end of the Idol Road Arc.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You him.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You is a pretty good manga in its own right, but it’s quite likely that the writer made such a huge harem just to show off his ability to make 100 distinct and well-rounded characters in the first place. In fact, many readers admit to doing so just to see if the story pulls off having 100 unique girlfriends.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You kind of Japanese food.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You, Rentarou carries Nano like this when helping her down from the platform she is on.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You, Rentarou's thirteenth girlfriend is his Japanese teacher Nadeshiko (or Naddy, as she prefers to be known).
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You, Rentarou's twelfth girlfriend is his junior high schooler cousin Chiyo. Initally he's grossed out (due to both her age and the fact that they're related), but he accepts her after her heartfelt confession.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You revolves entirely around the protagonist gaining 100 soulmates, all of whom love him and are perfectly willing to share him.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You shows that this is how Yuu met his girlfriend. She saved him from being hit by a truck (and by 'saved', we mean 'stopped the truck from moving by punching the front'), then they both felt the soulmate shock.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You than her

boyfriend Yuu.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You, the girls notice how tired Rentarou is and briefly quarrel about who's lap he should use as a pillow, before deciding to let him try them all. When he is unable to pick the lap he likes the best, they all work together to make a lap bed for him.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You, the God of Love resembles an old man with wings.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You, the only answers they can come up with all start with either 'P' or 'Y'.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You: This manga is quite parodic in tone and nature; for starters, the characters are quite aware that they are in a manga:
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You while filling out Rentarou's soulmate count that Rentarou has one hundred girlfriends.
* The 100 Girlfriends Who Really, Really, Really, Really, Really Love You would be in hot water.
* The 100 given the dangerous environments and conflicts they often find themselves in. She takes after her mother, who's also a doctor.
* The 100 gives us "The City of Light". It's originally presented as a virtual world, designed as a respite from the horrors of the post-apocalyptic Earth. Later, it's revealed that all those who have entered it automatically have their consciousnesses uploaded into it upon their death. The AI running it, A.L.I.E., fully intends for all of humanity to visit, as another apocalypse is imminent, and she sees upload as the only way to preserve humanity.
* The 100: Grounders keep track of their kills through scars on their bodies, often bragging about them. Niylah observes in surprise that Clarke does not have any tally marks on her back, but Clarke responds that there is not enough room.
* The 100 has a control room that monitors and controls the entire mountain, from communications to defense systems to life support.
* The 100 has an air of this having been cobbled together from a dozen disparate space stations nearly a hundred years previous to the series opening. The ship they send down to Earth literally starts falling apart during entry.
* The 100 has been captured by the main characters, she uses just the right words to hurt them, to make them angry until they start turning on each other, and to reveal their plan to her so she can act to prevent it.
* The 100 has had several people she's cared about die, one of whom she had to execute herself. She claims that, while these losses initially devastated her, she's taught herself to no longer feel anything for anyone, and has instead devoted herself entirely towards serving as her people's Commander. However, when receiving a memento from her dead mentor, or recounting the circumstances of a past love's murder, she betrays subtle signs that she's not as unaffected by their deaths as she'd like to be, something that Clarke calls her on.
* The 100 has Lincoln abducting Octavia. And Octavia falling for him because he only caught her to heal her and because he is totally into her.
* The 100 has several violent skirmishes between the 100 and the Grounders whose territory they've landed, motivating Finn to arrange a meeting between Clarke and the Grounders' leader to discuss a peaceful resolution. However, the peace talks collapse because both Clarke and the Grounders' leader expected the meeting to be a trap, and so they both had gunmen or archers hiding just outside the peace conference. When those soldiers spot each other, the shooting starts, and the Grounders declare an all-out war of extermination on the 100.
* The 100 has the City of Light, a shared virtual reality that anyone who has taken one of A.L.I.E.'s computer chips can enter by meditating, or choose to remain in permanently even after their physical body has died.
* The 100 has the Harvest Chamber inside Mount Weather. It seems to be one of the bunker's lower levels, and it's where prisoners are used as human dialysis machines until their bodies give out.
* The 100 has the Primes, who are actually the centuries-old consciousnesses of the original colonists of Planet Alpha, stored on computer drives and inserted into new

bodies as their old ones die. This process erases the mind of the body's original owner and allows the Prime to take control.
* The 100 has "the Red", a synthetic drug developed by the Mountain Men to turn people into Reapers. It's so addictive that anyone injected with it becomes borderline feral and will do absolutely anything to get another dose, and if they go too long without dosing up the withdrawal symptoms will kill them.
* The 100 Her season 5 and season 7 character posters also have Christian imagery not used for the other characters.
* The 100 him after she learns the Grounders plan to torture him to death for his crimes.
* The 100 holds a masquerade party. Since Octavia had to keep her existence hidden from the rest of the Ark, this was the only occasion when she was able to leave her family's quarters and see the rest of the space station.
* The 100. Humanity eventually follows suit, with the exception of the protagonists.
* The 100 implies that he thought it looked cool, and now doesn't care for it.
* The 100. In the face of that, Kane is pretty much the only character who worries about upholding the law; everyone else just takes it as a given that the rules will have to be ignored.
* The 100, in the opening scene of "Bitter Harvest," Clarke sketches a portrait of Lexa as she sleeps on a couch in Clarke's room.
* The 100 introduces a group of them as a faction on the ground. They were originally prison laborers under the "employ" of the Elegius Corporation. However, they got fed up with the unsafe working conditions, especially after a mysterious sickness started killing them, and turned against the company, with the help of a sympathetic employee.
* The 100 is that Grounders don't keep track of birthdays, so their ages can only be given a rough estimate. Most notable with Lexa, the Grounder's Commander. She's young enough that Abby refers to the Grounders as being "led by a child", but it's unclear if that's literal and Lexa really is under 18, or if she's simply unusually young given that she's leading an entire nation.
* The 100, it takes a while for Abby to realize that, although she's both Clarke's mother and Chancellor of the Ark survivors, Clarke is actually doing a better job at forging alliances and planning a war than she is.
* The 100, Jasper gets drunk and steals Finn's ashes and ends up taking them to the drop ship, intending to scatter them. Monty is disgusted by his behavior and ends up leaving him there after having had enough of his self-pitying and lashing out. Jasper then trips and drops the ashes. It's a rare example of the trope not being played for laughs.
* The 100, Josephine dares Clarke not to think about where she's hiding all the memories she doesn't want Josephine to find. The door to the room containing said memories promptly opens.
* The 100 juvenile delinquents sent to verify if life on Earth is possible
* The 100 lethally radioactive; Ark people and Grounders have just adapted to high radiation levels over the last century. The Mountain Men, who have not gone through this adaptation, become covered in radiation burns after just a few seconds spent outside their bunker.
* The 100, Lexa kisses Clarke and asks her to come away with her to the Grounder capital, but soon afterwards betrays Clarke to Mount Weather. Unlike most examples of this trope, Lexa had no intention of betraying Clarke when she made those romantic overtures; she just felt that the deal Mount Weather offered her was more important than her personal feelings towards Clarke.
* The 100, "May we meet again" is an excerpt from the traditional funeral rites of the Ark. Characters occasionally use it as a farewell when they are unsure that they will reunite.
* The 100 moment that they realize how much they've been playing the alien invader role.
* The 100, Mount Weather is an enormous underground bunker, used to house a small (but technologically advanced) community of people who can't survive on the

radiation-soaked surface.
* The 100, Mount Weather is an underground military bunker that survived the atomic war and has been transformed into a self-sufficient society by the survivors inside it.
* The 100, Murphy and Emori briefly have this going on in Season 3 until they try robbing the wrong people.
* The 100 of attack against Mount Weather, complete with a scale model of the mountain.
* The 100 of exposition, and the writers hadn't gotten a good grasp on the characters' personalities or the dynamics between them yet.
* The 100 on the Ark, with the wristbands each member possesses being the only sign that they are still alive.
* The 100: Peace talks between the 100 and the Grounders break down when Jasper notices there are armed Grounders hiding just outside the peace conference (a.k.a. doing the exact same thing Jasper is); he immediately assumes they're planning an ambush or assassination, and starts shooting at them. This transforms the 100's conflict with the Grounders from a series of small skirmishes to an all-out war.
* The 100, prince Roan of the Ice Nation was banished as a result of a war between his clan and Lexa's coalition. Roan's mother, queen Nia, had Lexa's lover tortured and beheaded, so when Lexa won the war one of her diktats was Roan's banishment. In the third season, he tries to capture Clarke and deliver her to Lexa, hoping that she would lift his banishment in exchange.
* The 100 radiation, thanks to solar flares, than they would have if they'd returned to the Ground.
* The 100, Raven serves as an all-purpose engineer, but building bombs is acknowledged as being her specialty.
* The 100 Season 1 ends with a huge battle when the Grounder army assaults the 100's camp.
* The 100: Season 2 drew in a lot of new fans with the introduction of Lexa, the cool and composed Grounder Commander who happened to be a lesbian. The character was seen as positive lesbian representation, and her tension with Clarke also revealed the latter was bisexual.
* The 100: Season 2 has genius mechanic Raven hooking up with genius engineer Wick; they actually have their first almost-kiss in the excitement of solving a technical problem.
* The 100 sees Clarke quickly establish herself in this role, first among the 100, then among the Grounders and the other Ark survivors.
* The 100, set 97 years after a nuclear apocalypse, largely averts this trope, with new wilderness having almost completely replaced the old civilization's ruins. Underground bunkers seem to be the only places with reliably intact artifacts, and even then, the guns that the 100 find in one of these bunkers had to be stored in a special oil to keep them operational.
* The 100. She came to Earth after the original 100, only to find her boyfriend Finn was with the show's protagonist, Clarke. Despite this, her tech expertise help Clarke establish contact with The Arc and is essential in the battle against the Grounders.
* The 100, she dresses and acts rather regally. She hasn't had too many fight scenes, but when she does fight, it's with a swift and graceful economy of movement.
* The 100 showrunner Jason Rothenberg says that, as of the Season 2 finale, Clarke's feelings for Bellamy are not romantic in nature. However, he says that what Bellamy feels for Clarke is an open question.
* The 100: Subverted. While the attractive cast often gets in fights that leave them bruised and bloodied, facial wounds, including deep-looking cuts, typically heal over in a couple of episodes. Notable facial scarring is quite rare. Many characters also manage surprisingly well-kept appearances despite their very rough lifestyles.
* The 100, thanks to being the President's son. When actually given full control of Mount Weather, he tends to screw up royally.

* The 100 that, while clearly derived from English, is virtually incomprehensible otherwise. The Grounders have preserved English as a trade language, which would reduce linguistic drift.
* The 100 that would let them challenge the Mountain Men for supremacy.
* The 100th chapter isn't a story post, but rather an appendix listing all the major characters, organizations, and conflicts (as of that writing).
* The 100, the Ark and Grounder societies appear to be gender equal, with women acting alongside men as leaders and warriors (including female commanders-in-chief), and there being no shame in a man staying home from war to serve as a non-combat medic. This is in contrast to the Mountain Men, whose soldiers and political leaders seem to be exclusively male.
* The 100: The Ark and Mount Weather have maintained much of the technology and civilization from before the nuclear apocalypse, but the Grounders have reverted back to a tribal, hunter/gatherer society.
* The 100: The delinquents sent down to Earth would have been pretty screwed if expert mechanic Raven wasn't sent down to join them; she's responsible for building almost everything the 100 need to survive, chiefly of the blowing-stuff-up variety. Monty fills this role to a lesser extent in Season 1, but becomes more prominent as the engineer inside Mount Weather in Season 2. That season also sees Wick joining Raven as an engineering buddy.
* The 100, the Grounders (descendants of people who survived the nuclear war) and people from the Ark (who have survived exposure to high radiation levels in their orbital habitat) can endure the current levels of radioactivity on Earth's surface. The Mountain Men (descendants of people who took shelter in the Mount Weather facility) aren't so fortunate.
* The 100: The Grounders send Murphy back to the 100 after infecting him with a virus that will render his people feverish and weak by the time the Grounders invade two days later. It doesn't quite work, but only through quick thinking on the 100's part.
* The 100, the Lincoln Memorial seems to be the only piece of Washington D.C. to have survived the nuclear war and the anarchic century that followed.
* The 100, the Mountain Men have prevented Grounders from using guns, and possibly other pieces of advanced technology, by slaughtering the village of any Grounder that picks one up. Even when they go to open war against the Mountain Men, the Grounders' phobia of guns is so entrenched that they still refuse to use them.
* The 100; the only reason the kids were given their "mission" instead of just being slaughtered is that, legally, the Council's not allowed to execute children.
* The 100th episode, as a sendup to the most prominent fan pairing, has Lyra and Bon Bon acting like an old married couple with the constant qualifier of "best friends". After revealing her secret identity as a spy to Lyra, Bonbon and her have a falling out, Lyra questioning if their friendship meant anything, or if it was just another part of her cover. Thankfully, they do reconcile by the end, again putting particular stress on the words "best friend" as if to draw attention to the phrase as much as they can.
* The 100th episode, "Wormhole X-Treme!" took its name from a show based on the team, which the Air Force is letting go forward to give the SGC
* The 100, the show generally refuses to make definitive moral statements, preferring to have characters take conflicting stances on various issues, and leaving it up to the audience to decide who's right.
* The 100. The videos end with one of the people involved killing himself.
* The 100. They believe people would panic if they knew the government was planning to kill them, though, so they plan to make it look like life-support just happened to fail for a large section of the Ark.
* The 100 version of the show, with very clearly defined good guys and bad guys, and a lot more focus on the teen characters having the fun and getting the hots for each other. Standard advice from fans of the show is not to judge it based on the pilot, but watch until episodes three, four, or five to see what the show's really like.
* The 100. When a Commander dies, their memories and consciousness are stored on a

computer chip inserted in the back of their head, called "the Flame". This Flame is then passed on to the next Commander, who can commune with the past Commanders and access their memories, though they retain control of their own body.
* The 100: When Clarke checks out the forbidden areas of Mount Weather, she discovers Anya, last seen trying to kill Clarke and all her friends, locked up in a cage.
* The 100 when Raven returns a metal pendant Finn made her when she finds out he slept with Clarke.
* The 100 when she has been kidnapped by Roan (who is seemingly taking her to her death) and Bellamy comes to rescue her but is captured by Roan himself. Roan puts a knife to Bellamy's throat and is about to kill him when Clarke pleads for Bellamy's life by offering to go with Roan without resistance. Roan agrees to the deal and lets Bellamy live, though he does knock Bellamy out.
* The 100, wherein a secondary plotline is given a major twist at the end of each season, and then becomes the main focus of the next season.
* The 100, with a mention that Arkers were all genetically engineered to be universal donors.
* The 100 with no formal training, thrust into a war and a world they don't understand, so they don't always handle things as well as they should. Meanwhile, their enemies are even worse in most cases.
* The 10:10 "No Pressure" commercial features people and children being exploded bloodily because they can't or won't come up with ideas for reducing carbon emissions, and is intended to be humorous this way. Unfortunately, very few people saw the humor (it also starts very seriously, and the people-bursting comes completely out of nowhere, creating definite
* The 101st Airborne and 10th armored divisons in Bastogne, Belgium during the Battle of the Bulge. Their success at holding the town stifled the German advance because all the important roads in the region went through Bastogne. They kept the enemy back until Patton's Third Army broke through German lines to relieve them (note the word "relief" is used because no Bastogne defender will ever say they needed rescuing). The defense of the town combined with Patton's attack towards Bastogne from the south were key in defeating the German offensive.
* The 101st Airborne as a whole calls itself the "Screaming Eagles" after the eagle on its unit patch.
* The "10-20-30" melodrama. The "10-20-30" name was derived from the cheap ticket prices charged for these productions — 10 cents, 20 cents, 30 cents. Interestingly, the name itself became obsolete during the very heyday of these melodramas ("15-25-35" would have been more accurate.)
* The 10 Doctors. It's even mentioned by name as to how all ten Doctors can be in one place at the same time.
* the 10s as throwbacks to earlier decades, and a deliberate contrast to baseball jerseys of that time.
* the 10th film Shiki's forces. This is the only time we ever see Luffy and Zoro even carry guns. Not to mention how those who hardly fight with weapons, such as Sanji, actually using a weapon.
* The 10th Kingdom, after on of the heroes frees some talking birds a tribe of Gypsies were planning to sell as pets, the leader of the Gypsies her with Rapunzel-length hair, which naturally becomes problamatic.
* The 10th Kingdom) and immediately turned it off, thinking it was for kids.
* The 10th Kingdom And it was actually rather well done and hilarious.) This was not an auspicious start to the relationship.
* The 10th Kingdom, and subsequently can't get the songs out of their heads.
* The 10th Kingdom appears to be confessing his love in a very heart-felt manner, unusual for him. We soon learn that he was reciting a speech from a book, trying to memorize it.
* The 10th Kingdom), but her dad Tony decides to stay in the Nine Kingdoms. Considering the fact that he's a national hero who is good friends with King Wendell in the Nine Kingdoms and a janitor who's wanted for armed robbery in New York, it was probably a wise decision.

* The 10th Kingdom by Wolf (twice!) when he claims "magic is very nice, but it's very easy to get addicted", and later tells Virginia she is "hopelessly addicted to those shoes… and I'm not too far behind!" Whether this is meant to be a parody or an object lesson is never made clear, but it certainly plays out with extreme hilarity.
* The 10th Kingdom, conflict arises when Wolf spends all his money on a magic engagement ring with a sentient, singing pearl on top. Virginia is upset that he didn't use the money to buy the mirror they've been chasing the entire series.
* The 10th Kingdom falls into one of these, and is crippled for the rest of the series.
* The 10th Kingdom has all the main characters but one receive gifts off the last character, who happens to be the prince they just saved.
* The 10th Kingdom has a subversion. Tony tastes baked beanstalk (no, not baked beans. BEANSTALK). "It tastes like an old mattress!" "No, it doesn't. Old mattresses have a sweaty, meaty taste."
* The 10th Kingdom inverts this in the first episode, as Virginia escapes a group of trolls by trapping them in a broken elevator.
* The 10th Kingdom is a highly amusing parody of this trope. As one of the Five Women Who Changed History (and the only one still living), she is over 200 years old, yet looks only middle-aged and still quite beautiful due to 'magic surgery.' However, this does not extend beyond the surface—not only does she hack, cough, and nearly pass out from the various ailments she suffers from, but during her dance with the Dog Prince, her bones audibly creak and she ends up stuck bent over backward, needing help upright again.
* The 10th Kingdom: it wasn't villains but the casino plays some rather unusual card games, Anthony starts by playing Happy Families then moves to the high rollers table and proceeds to play Snap against stereotypically dressed aristocrats.
* The 10th Kingdom, Kissing Town makes this trope quite literal, since not only are there magical hearts floating everywhere around every happy couple getting married, but every time Virginia seems ready to dismiss Wolf as a love interest, in swoop the hearts to change her mind and turn her into a hopeless romantic. They even form a gigantic heart over the pair's heads when they share their first kiss.
* The 10th Kingdom reflect in his thoughts: "They were nothing if not thorough."
* The 10th Kingdom) regarding the meat cleaver he 'happens' to have in his hand.
* The 10th Kingdom" reveals that Wolf's parents were a victim of this, as his father was the grandson of the Big Bad Wolf while his mother was a princess of the Second Kingdom and Red Riding Hood's granddaughter, each rejecting their parents' vendettas to find out what the other was truly like.
* The 10th Kingdom" reveals that Wolf's parents were the grandson of the Big Bad Wolf and the granddaughter of Red Riding Hood, who ended up bonding after his father saved his mother from a bear because they both realised that they were outside of society and wished to be a part of it.
* The 10th Kingdom she's "got a little wolf cub growing inside" of her. Wolf also makes the none-too-subtle comment to Tony of "See you soon, grampa!" before stepping into the traveling mirror.
* The 10th Kingdom, the cave entrance is not just shaped like a dragon's head, it's an actual dragon's head. A dead, fossilized dragon (hence the name "Dragon Mountain"). This introduces a bit of Squick when the cast must take mining sleds down along the spine and ribs toward the actual mine and get tossed out the other end.
* The 10th Kingdom, the false Prince Wendell enters his coronation party by jumping on a banister and sliding down into the crowd.
* The 10th Kingdom, this remains one of only four works that included the stepmother's other attempts on Snow White, including the poison comb.
* The 10th Kingdom Tony has asked Prince to sniff for clues. Prince instantly responds that (since they're in a farming village) it's mostly excrement at ground level, and there are hundreds of minor scents. Tony then flatters Prince by saying that a master hunter like himself should be able to find the scent they want instinctively. Prince says, "Correct," and off they go.

* The 10th Kingdom. Tony is in a fairy-tale world. He attempts to barter his wristwatch, using overly simplified language and referring to it as a "clock". The Tooth Fairy quietly turns around, opens a cabinet full of old-fashioned fob watches, and says "we call them watches."
* The 10th Kingdom to our world being a non-magical, cursed offshoot of the Kingdoms.
* The 10th Kingdom, which immediately erupts into flame. They then decide to take the other door.
* The 10th Kingdom", Wolf reflects that the families of Red Riding Hood and the Big Bad Wolf basically became this, with the Wolf's family trying to cover up his worst sins and Red's family tarring all wolves with the same brush. As a result, when Wolf was born from a liaison between the Wolf's grandson and Red Riding Hood's granddaughter, he became an exile from both parties, resenting how Red's family judge all wolves as equally capable of his great-grandfather's crimes.
* The 10th Kingdom, Wolf tells her it was not her fault, even Virginia seems to buy into it by saying the fateful words: "It was my destiny..."
* The 10th season did this a third time for Archer's last coma dream with a shift to much harder
* The 10th volume of the DVD collections of the series was originally released with
* The 10 WEIRDEST Superstitions in the World!, Matt says, "In Soviet Russia, web gets posted on the cat."
* The 1/100 Master Grade model for the Strike Freedom Gundam revealed that
* The 1111th and the 2222nd volume of the long-running weekly German
* The 1.16 Nether Update introduced Striders, passive Nether mobs who can walk on lava. They too can be saddled and ridden, and are controlled with a "warped fungus on a stick" introduced in the same update, fashioned in the same way as the carrot on a stick mentioned above.
* The 11 Different Ways Your Girlfriend Will Sigh At You". 3) The "I have to pretend I'm offended, but I secretly love that you said my butt is the reason why God invented eyes'" sigh.
* The 11 Planetary Masters of Sol in FINAL can infinitely regenerate, but once the heroes learn the purpose of
* The 11th Doctor tells Amy in "The Beast Below" that they are observers only, never interfering in the affairs of other peoples or planets. Amy starts to ask the Doctor if it's difficult, being detached like that, only to see him on the scanner, talking to a young girl who was crying.
* The 11th Hour has three possible endings, only one of which is good.
* The 11th Hour, let alone looking for his ex-lover in the middle of said haunting. Stauf can give it an accidental lampshading if Carl messes up a puzzle:
* The 11th Hour, the first few scenes of the in-game movie feature Robin Morales stopping off at one of these. Instead of Robin getting mineral water, a cappuccino, and a bran muffin, she's given a cheap chocolate donut and a bland coffee. On the plus side, the waitress, Eileen Wiley, is Robin's first lead on the Stauf Mansion case.
* The 11th Hour (who would have again been the protagonist of the third game).
* The 11th level Basic Demon takes the form of a giant spider that lives in a web of darkness.
* The 11th season final featured Evan Lysacek and Nicole Scherzinger (with Erin Andrews as the also-ran). Every round had half of the score determined by the judges and half by the audience... except the final. It was played out over two days. The first had two dances, with the combination of the two receiving a single score in the usual fashion. The second had two more dances,
* The 122333 challenge is named for the levels each character starts at when they join your party (Vaan at 1, Balthier and Fran at 2, and Basch, Ashe and Penelo at 3) and involves running from every monster encounter except bosses until a certain item can be found. This can be combined with the NLB challenge above, if you're extremely masochistic.
* The 12.7mm SMG is hands down the best automatic weapon in the game, combining

the second-highest damage per second with the weight and Strength requirement of a 10mm SMG. Add the silencer and laser sight (GRA) = total ownage.
* The 12 Disasters Of Christmas, two teenage girls flee from a tornado through an orchard of Christmas trees.
* The 1/2 Hour News Hour retooled the humor down its own unique path and was more well-received.
* The 12-member big band-style group (they call themselves a "little orchestra" instead)
* the 12th angel. However, in another example of character growth, Shinji actually notices this and makes himself stop (and also mentally lampshades how "old habits are hard to break".)
* The 12th Doctor amps up this attitude, with both a more tragic portrayal of the Mondasian Cybermen - victims of hideously cruel medical experiments by doctors who figured shutting off their emotion centers was better than fixing the fact they were in
* The "12 to 6" downward elbow strike is illegal (due to ignorance when the rules were made, thinking this was some kind of killing power based on karate demonstration trickery), but any other variation is legal (i.e., "1 to 7" which is barely a degree off), and a ref will have to determine angle legality, along with moving heads and arms and whatnot, to determine if the movie was legal or not.
* The 12 Zodiac Knights — Commanders, Specialists, Champions, and Monsters make up their ranks, usually acquired via "Klingon Promotions"
* The 13 1/2 Lives of Captain Bluebear, including the aptly named Deus X (Mac) Machina.
* The 138th episode special used the trope repeatedly with Troy McClure, once parodying it by returning from a commercial break to have McClure asleep on a couch and having to be prodded awake from off stage so he could deliver the line.
* The "138th Episode Spectacular" contains an outtake from the "Devil and Homer Simpson" segment of "Treehouse of Horror IV", in which Marge hires a lawyer
* The 13 British colonies in North America had a bit of a problem with the mother country's bad habit of forcing legislation (and taxation) on them without their permission (since it would be too much of a hassle to ship American politicians across the Atlantic to Parliament), so they decided to start their
* The 13 Clocks the economy with jewels and her town collapsed once cobblestones became more valuable than jewelry.
* The 13 ½ Lives of Captain Bluebear. This quicksand is not only intelligent, but benevolent and can communicate telepathically with potential victims to warn them away. However, if someone chooses to ignore the warnings and step into the quicksand anyway, there's not a lot the quicksand can do about it other than say "I told you so" and offer its condolences as the poor victims sink to their deaths.
* The 13 Ghosts of Scooby-Doo, a movie monster personally greets Scooby and the gang, much to everyone's surprise. It quickly turns out that it's actually one of the thirteen demons possessing the TV set.
* The 13 Ghosts of Scooby-Doo episode "A Spooky Little Ghoul Like You", Scooby and the gang try to stop Vincent Van Ghoul's wedding to Nekara by pretending to be Van Ghoul's family. Scooby, Shaggy and Scrappy pretend to be Vincent Van Ghoul's children by wearing diapers and bonnets.
* The 13 Ghosts of Scooby-Doo episode "Coast-to-Ghost" had the vampire ghost Rankor use the Eye of Eternity to gradually transform Vincent Van Ghoul into stone, requiring the gang to return Vincent to normal before the transformation was complete.
* The 13 Ghosts of Scooby-Doo episode "It's a Wonderful Scoob", the ghost from the Chest of Demons that the heroes have to recapture is Time Slime, a bald ghost who schemes to move time forward to when he would rule the world.
* The 13 Ghosts of Scooby-Doo episode "Reflections In A Ghoulish Eye," Daphne is put under a spell which sends her into a deep sleep that can only be broken by a kiss from a Danish prince. Scooby, a Great Dane and dressed in a prince's outfit, licks Daphne's face and breaks the curse.

* The 13 Ghosts of Scooby-Doo episode "When You Witch Upon a Star" has Marcella having to rely on the Brewski Sisters, a trio of incompetent witches based off The Three Stooges, to free her from another dimension she got trapped in after being released from the Chest of Demons with the rest of the 13 ghosts in the series premiere. She makes it clear whenever she is outraged by the Brewski Sisters' bumbling.
* The 13 Ghosts of Scooby-Doo, except this time he set the oven to "only" 5 million degrees and he ends up flooding the living room waist deep in popcorn.
* The 13 Ghosts of Scooby-Doo for Scooby, Shaggy, Scrappy, Daphne and Flim-Flam to get them back.
* The 13 Ghosts of Scooby-Doo found the gang needed to stall until sunrise to fend off the ghosts. Asking for a last request of a song, Scooby holds the last note until sunrise. It's only about twenty to thirty seconds from our perspective, but it's long enough to annoy everyone else.
* The 13 Ghosts of Scooby-Doo had Scooby and the gang get transported into the comic book world of Platypus Duck.
* The 13 Ghosts of Scooby-Doo has the gang enter a town where everyone turns into a werewolf at night as a result of a curse put on them by the demons of the chest. They try to get the gang to leave to keep them from finding out about it, then try to keep them from leaving once they find out. Luckily, Flim-Flam manages to cure everyone.
* The 13 Ghosts of Scooby-Doo, hiding out in an abandoned funhouse allowed Shaggy and Scooby to see what the carnival was really like.
* The 13 Ghosts of Scooby-Doo Miss Cutitout who wants to edit the scene out on the account that fire is dangerous and should not be shown to young children. Scrappy-Doo and Flim-Flam proceed to guilt trip and completely humiliate her by pointing out that the dragon would be without a job, making him unable to care for his children.
* The 13 Ghosts of Scooby-Doo, Scooby and the gang are chasing a demon called Maldor. Eventually, Daphne ends up as his prisoner and he puts a curse of eternal sleep on her. Shaggy and the others try to wake her up with different methods, including tickling her bare foot with a feather. However, she gives no reaction. Eventually, Scooby wakes her up.
* The 13 Ghosts of Scooby-Doo, Shaggy and Scooby are offered their choice of a fancy doghouse, the airplane in which they arrived or the Mystery Box. The last is actually the Chest of Demons; when opened, it releases the 13 demons that had been trapped inside.
* The 13 Ghosts of Scooby-Doo, stated in a tweet that he counted 12 ghosts being recaptured with "Ship of Ghouls" included, which suggests that the ship captain being one of the 13 ghosts is now canon.
* The 13 Ghosts of Scooby-Doo: "That's Monstertainment" opens with the crew settling in to watch a movie on TV. Scooby is making the popcorn, so naturally the room is flooded with popped popcorn.
* The 13 Ghosts of Scooby-Doo: Tom Ruegger admitted he hated Flim-Flam, to the point that the character gave him a better appreciation for Scrappy Doo.
* The 13 Ghosts of Scooby-Doo trance of love and power draining kiss only work on Friday the 13th, hence why she's keen to acquire the powers of Vincent Van Ghoul before midnight. Fortunately Scooby and the gang manage to delay her long enough for time to run out so they can send her back to the Demon Chest.
* The 13 Ghosts of Scooby-Doo until Scrappy and Flim-Flam offer to save him by returning him to the Chest of Demons. Rankor accepts the offer, making him the only ghost in the series to return to the Chest of Demons willingly.
* The 13 Ghosts of Scooby-Doo was one of the few continuities where the gang mainly fought real supernatural threats, but the episode "Ship of Ghouls" featured a ghost wear a lifelike mask when disguising himself as Captain Ferguson.
* The 13 Ghosts of Scooby-Doo (with Fred and Velma and without Scrappy), Fred reacts to Daphne turning into a werewolf.
* The 13 stars, of course, have more to do with P&G having started in the United States of America, which uses the number 13 in its iconography. Which

implies that the USA is itself Satanic by the standards of its own citizens who are followers of this trope. Actually, that explains a lot.
* The 13th century-era Mongol Empire stretched from the Danube in the west all the way to the Pacific Ocean in the east. With the exception of India, Japan, and parts of Southeast Asia,
* The 13th century Mongol invasion of Europe illustrates this. Though a European knight was no less a fighter than his Mongol counterpart, the Mongols initially had superior organization, discipline and tactics. The knightly approach to warfare, i.e. a glorious headlong charge, made them nearly helpless against the Mongol
* The 13th Enumeration is the same genre as Dan Brown's stuff "except the 13th Enumeration is based on true history. :)"
* The 13th Ghost of Scooby-Doo, Matches defeats Zomba and Revolta by breathing fire at their backsides.
* "The 13th Hour" (album) by Midnight Syndicate. The album's premise is the exploration of a haunted Victorian mansion once inhabited by the Haverghast family.
* The 13th season premiere has the gang working on plans with new hire Cindy to get more customers. She comes up with a plan to shut down Murphy's, the bar around the corner. Cindy is thrown to realize that not only do the gang not know Murphy's does five times more business than Paddy's but they don't even know this bar
* The 13th Warrior: A few of the other warriors are dispatched in each battle scene till only the title character and two others remain. "Ibn" (as they call him!), Weath, Herger, Edgtho, and Hatlaf (the boy) all survive. Plus, characterization is given beyond Buliwyf and Herger. Weath is hinted at being a Celt, a musician, and has a family. Herger is one of the more educated members of the party. Edgtho is known as "the silent" just like in the book and is shown to be the group's dour-mannered scout and tracker.
* The 13th Warrior, Ahmad ibn Fadlan goes battle-mad during one attack, but seeing as he's hanging around Vikings and taking on more and more of their culture, it's not surprising.
* The 13th Warrior. Ahmad is brought water by a Viking woman who proceeds to inspect a wound on his brow while he drinks, and on hearing his yelp, tells him he's sounding like a woman, so he quips, "Do that again, and you'll make it."
* The 13th Warrior (also the title of the book it was based on). The film came out in August 1999 with its revised title.
* The 13th Warrior day." He then holds the thin passageway for as long as he can before he dies.
* The 13th Warrior film: Ahmad ibn Fadlan doesn't speak Norse at the beginning, so he can communicate only via some shared Greek and Latin with one of them. Thus the audience doesn't get to understand them, either. However, in a montage of them travelling and talking around the campfire, more and more start to turn to English as Ahmad begins to understand more until eventually he surprises them at a campfire by insulting them in their own tongue. When asked how he learned their language, he just replies, "I listened."
* The 13th Warrior, in order to get the scheming prince to back off, one of the thirteen picks a fight with a younger, bigger, stronger mook. He lets the mook beat him up for a while and very nearly win, then when the mook rushes in for a killing blow, the warrior casually sidesteps it and cuts off his head in one stroke.
* The 13th Warrior. In the book, he spends most of the story speaking Latin to the one Viking who knows it, and his comprehension of Norse slowly grows over time.
* The 13th Warrior, main character Ahmed Ibn Fahdlan is a useful extra swordsman but doesn't actually do anything to resolve the plot, with the single exception of figuring out how the group can escape from the Wendol cave. Of course, since the story is really about Bulliwye/Beowulf, this is understandable. Ahmed also figured-out that the Wendol liked to act, and maybe even think of themselves as bears, and this allowed the group to find the Wendol cave to begin with. However, he is mostly an audience identification character and eventual chronicler of Bulliwye/Beowulf, so he still fits the trope well.
* The 13th Warrior, one of the Vikings wields a sword and a short axe in the final battle.

* The 13th Warrior this film even bombed in the first place, since it gained a reputation of a well-made adventure flick without any major or obvious flaws.
* The 13th Warrior, written by the real Ahmad ibn Fadlan, up to the point where he heads off with the Vikings to battle the Wendol. The novel is portrayed as a translation of ibn Fadlan's writing that extended past the point where the real ibn Fadlan stopped (even having the end of the novel terminate just as another adventure seemed to start, indicating there was more yet to happen but the manuscript had been lost). Crichton commented at one point, a few years after writing it, that he had forgotten where the fictional part of the novel actually started.
* The 13-year-olds were competent, but anybody younger become a comic-relief sidekick. Particularly strange was when Gabby got too old to be comic relief, became competent, then was replaced with a younger actress who acted even more naive than the original Gabby did.
* The “Cherryh” patch reduces the starting FTL options to Hyperlanes, but one can discover natural wormholes that link two points in the galaxy once you research the technology to use them safely, as well as
* The “MY LEG” guy There was even an episode centering entirely around Fred and this joke!
* The “One Big Lie” subtrope of soft science fiction has another logical extreme, in the
* The 14 Amazons, based on the story of the female generals of the Yang Family, where the Matriarch of the Yang family and the wives of the men and sons slain in war takes over their spouses' place and takes on the Mongol army.
* The 14 Amazons: The Yang family's army consists entirely of home guards, conscripts and volunteers, due to the family patriach, General Yang, being defeated in battle and the entire Imperial army dying in the war.
* The 14 September 2011 gang at the beach, with Charlie Brown having just been for a free face painting and having his head painted like a soccer ball before being buried up to his neck in the sand, the back of his head facing fellow beachgoer David Beckham. The caption lampshades the coincidence: "A perfect storm of events led to a tragic end for Charlie Brown."
* , the 14th century grimoire, has stories like this attached to it. Of course, none are verifiable, and S.L. MacGregor Mathers and Aleister Crowley probably made most of them up.
* The 150th episode has a scene with Brian trying to pierce Stewie's ear, and getting the pin lodged inside his ear canal and getting it stuck.
* The 15:17 to Paris solution for what's mild behavior that doesn't even strongly indicate they've got ADD (none show any signs of it later).
* The 154th issue of Globo's edition of the Brazilian comic character
* The 15 Experience: The house the hacker is watching is rife with paranormal activity, from ghostly orbs to ghostly faces, to moving shadows.
* The 15th episode "Battle Aboard the St. Anne" aired first in the U.S. as part of a "sneak peek" due to it being more action-packed and therefore "interesting" to hook viewers.
* The 15th Hierarchical City of Torifune, also known as the Academy City, is one of these in
* the 15th Stratagem: that at least one enemy and one ally will derive their strength from their position. While still useful to attempt to "lure the tiger from the mountain," it's also wise to protect the mountain on which your own tiger rests. If the enemy manages to make it there, your ally will not have to travel far to complete the kill.
* The 1666 Great Fire of London started due to the demonic presence of Dormammu.
* The 1.69 patch gave the Valsharess glowing eyes, which made her look a lot less realistic.
* The 16-bit Era of Console Video Games (fourth generation, 1987-2000)
* The 16th and final Colossus rests atop a mountain temple, and the only way to enter is via a smaller stone bridge that crosses a very deep ravine. However, it's so ancient and decayed that even the weight of Wander will collapse it.

* The 16th-century Teutonic legend of the Schildbürgers says they were great sages who went far and wide to advise princes—until their wives got sick of them going far and wide and they needed to get the princes to stop seeking their advice.
* The 16th movie occurs at a pro soccer game. During a J. League promotion event to play soccer with children, a bomber calls Mouri and sends clues where he will strike. Conan finds the explosives on a scoreboard and rearranges them to fall at a safe location with little time. The bomber then sends a letter that he will strike during a game with the highest viewership.
* The 16th season episode "Sarcastaball" revolves around a game which Randy invents as parody, but which everyone else takes seriously.
* The 1722 Battle of Gulnabad, where an imperial Iranian army was beaten by invading Afghans due to the Iranian commanders' failing to coordinate their movements, spelled the beginning of the end for the Safavid empire. It was described this way by 18th-century traveler Jonas Hanway:
* The 1759 Battle of the Plains of Abraham in the Seven Years War was notable in that the commanding generals of both opposing armies were killed in action. The British Commanding officer, 32-year-old Major General James Wolfe, was hit by multiple musket balls early in the battle. Within seconds of falling to the ground, the men around Wolfe started shouting "They run! They run! See how they run!" Wolfe asked who was running and when he was told it was the French, he said "Now, God be praised, I will die in peace", and then died. Meanwhile the French commanding officer, Louis-Joseph de Montcalm, was wounded by British fire as he retreated with his army and died early the next morning.
* The 1794 campaign really seemed to be working in favor of the Coalition. Then the battle of Fleurus occurred, where the Allies were routed from the Austrian Netherlands. Britain's land contribution to the wars came to an end, Prussia and Spain made peace with France the following year, and Austria would be left to fight alone in Germany and Italy.
* The 17th Amendment to the Constitution made it so that senators would be elected directly by the people of the states they represent instead of by the state legislatures as had been the case previously. The same amendment also includes a provision that this would not impact the terms of senators who were already in office when it was ratified. As such, although the amendment was ratified in 1913, it wouldn't be until 1919 that the Senate was composed entirely of senators elected directly by the people.
* The 17th Recon Regiment, Camacho's Caballeros, is described as half Battlemech regiment, half gypsy caravan, being a big, tightly knit, and constantly squabbling bunch of extremely talented pilots. Their best scout kills
* The 1806 duel between the Earl of Barrymore and Humphrey Howarth was averted because the earl could not bring himself to duel with Howarth, who had prepared for the duel by undressing. The earl thought Howarth was making a farce of the duel, but in fact it was justified, as Howarth had been an army surgeon who knew that the worst thing about gunshot wounds was the risk of infection caused by bits of clothing in the wound, rather than the loss of vital organs.
* The 1812 Overture list of instruments seems fairly ordinary until you get to the percussion section:
* The 1864 Battle of Franklin was the deadliest single day for generals during The Civil War. After just 5 hours of fighting, 6 Generals from the Confederate Army of Tennessee were killed or mortally wounded: Patrick Cleburne, John C. Carter, John Adams, Hiram B. Granbury, States Rights Gist, and Otho F. Strahl. A 7th general, George Gordon, was captured, while 7 more were wounded. One reason for may be Army of Tennessee commander John Bell Hood's angry tirade against his generals the day before the battle for allowing the opposing Union army to slip past their lines in the night and reach the fortifications in Franklin. This may have made the Tennessee army commanders a little over-eager to prove themselves.
* The 1881 short story "The Clock That Went Backward", by an anonymous author later identified as
* The 1899 Cleveland Spiders team, generally agreed to be the worst in MLB

history. They only won 20 games due to their owners forcing all the good players to go to St. Louis. They were so bad, the Spiders got an amateur baseball pitcher to play their final ever game.
* The 18-minute, five-part EP "The Tain", their take on the Irish epic
* The 18th century cartoons by James Gillray and Thomas Rowlandson all portray people as grotesquely ugly, with large heads.
* The 18th century wars would end up exhausting the European powers and bringing an end to their colonial ambitions in North America.
* The 1900 House (1999) (UK; living in historical conditions. Also shown on PBS)
* the 1900 New York criminal-classes meaning of "gay" has become the common one, displacing the previous meaning of "happy" readers to wonder why she "so often wrote about homosexuals"). Likewise, in the 1990s "sad" came to mean "stupid" (though fortunately this meaning didn't catch on).
* The 1900 torch song "A Bird In a Gilded Cage" is about the sad life of a beautiful woman who has married an old guy for money instead of for love and actually left someone young she loved.
* the 1902 opera, Glinda sends frozen winds to destroy the poisoned poppies and later creates a second cyclone to send Dorothy back home. The libretto even calls her the "Mighty Ruler of Storm and Calm". Technically, Locasta, the Witch of the North, is the one to instigate both cases, but has to invoke Glinda in order to do it.
* The 1904 ditty "Under the Anheuser Bush", which was commissioned by the brewery in question. It was followed by "Budweiser's a Friend of Mine."
* the 1910 film version the Monster has long fingers as part of his general unusual appearance.
* The 1911 edition of the Encyclopedia Britannica was thought to be this when it was released, covering practically everything involving scientific and historic study known at the time when the world was seen as static: It was possible to know everything. After 1911 things got... complicated.
* The 1915 Siege of Van in Ottoman Turkey took on this kind of character, after local Armenians refused to allow their able-bodied men to be drafted and most likely massacred, as had already happened in surrounding villages. Though minorities in the empire were banned from owning guns, the Armenians resorted to defending Van, a city already surrounded by walls, from the Ottoman army with antiquated rifles and pistols that had been stashed away, and other
* The 1916 'Easter Rising' in Dublin of a thousand revolutionary militiamen against the government, at least in the eyes of its leader Patrick Pearse. While some who participated in the rebellion believed (rather naively) that it was possible to overthrow the government and establish an independent Ireland by force, Pearse was fully aware that the use of lethal force would cause the police - and the army - to respond in kind to re-establish order. For his part, he simply hoped that their deaths at the hands of the army would make them martyrs in the eyes of the people of Dublin (a "blood sacrifice", in his own words) and would inspire people to rise up and kill government officials and soldiers in the same way - thereby encouraging a cycle of revenge that would end in Irish independence, one way or another. 120 officials, police officers, and soldiers died as a consequence, as well as 80 rebels - the latter including Pearse and 15 others who were executed for treason and multiple counts of murder. 250 civilians were also killed in the fighting.
* The 1916 presidential election: Republican challenger Charles Evans Hughes went to bed believing that he had won the election, but late returns from California showed that
* The 1920s Chicago Gangsters averts the amazing coincidence part of this trope: the entire reason why the Enterprise is there is to attempt to fix the cultural contamination that happened the last time the Federation sent a ship to the planet. As it turns out, that cultural contamination consisted of leaving a book about the mobs of Chicago in the 1920s in the hands of a highly imitative culture... The Nazis, similarly, were a direct consequence of someone's meddling (a mad historian deciding to use the Nazi model to uplift a primitive civilization), rather than the species just happening to develop Nazis on their own.

* The 1922 mine workers' strike in South Africa, also known as the Rand Rebellion, had as one of its slogans "Workers of the World Unite and Fight for a White South Africa."
* The 1925 serum run to Nome, also known as the "Great Race of Mercy," was not a race against other competitors, but a race against nature itself — twenty mushers and over a hundred and fifty dogs undertook a 674-mile journey in blizzard conditions to save Nome, Alaska from a diphtheria epidemic after aircraft proved unusable. The serum arrived in five and a half days, a feat that has never been duplicated. The Iditarod, a 1150-mile dogsled race, is a commemoration of this last great hurrah and
* The 1929 song "If I Had A Talking Picture" has a section where a little boy sings about how he wants a talking picture of a similarly aged girl.
* The 1930s song "Everyone Has Sex Appeal for Someone" by Ronald Frankau contains the lines: "There's the little chap who married someone statuesque and grand / He's worn himself to ribbons, at least I understand / Through climbing up to kiss her and sliding back to land / so she must have had some sex appeal for him."
* The 1930 St. Louis Municipal Opera production somehow was able to cast
* The 1933 Wizard of Oz animated short virtually has no dialog, save for Dorothy shouting Toto's name at the beginning.
* The 1936 Egyptian cartoon "Mafish Fayda" traces several scenes of animation from the Tom and Jerry shorts "Wot a Night" and "In the Bag".
* The 1937 short story "Three Skeleton Key", by George G. Toudouze, was adapted several times for the radio anthology series
* The 1940's and 1950's fashions (and certain other aesthetics like cars, radios and cigarette lighters) also seem to coexist with
* The 1940s Mummy films (featuring a different mummy named Kharis, most frequently played by Lon Chaney, Jr.)
* The 1941-1942 Philippine campaign, specifically the battles of Bataan and Corregidor. Although the Filipino-American defenders gave up in the end (which in turn led to the infamous Bataan Death March), the tenacious defense of Bataan and Corregidor slowed the Japanese advance towards the South Pacific and into Australia, which was further slowed at the Battle of Kokoda Track and finally stopped at the Battle of the Coral Sea.
* The 1941 cartoon "The Wacky Worm" (a cartoonization of Jerry Cologna as a worm) has the title character facing the crow that's chasing him after getting drunk on apple cider. He allows the crow to sock him on the chin, which he does. And the worm immediately concedes the confrontation to the crow.
* The 1941 German invasion was also more of a mixed bag compared to Napoleon's one; the Soviets knew they could not simply retreat from their western provinces because of the industries that had been developed in those territories during the intervening years, and fought the Nazis continuously in an attempt to slow them down. The winter ironically
* The 1942 Bugs Bunny cartoon "Hold the Lion, Please" has Bugs do this to Leo the lion— and in an especially ridiculous way, as the door is set in an upright frame
* The 1943 cartoon "Happy Birthdaze" ended with Popeye apparently murdering his Navy buddy Shorty (which is usually cut from modern TV prints).
* The 1943 Goodrich pressure suit with its 'Michelin Man' look influenced fictional spacesuit designs such as
* The 1946-47 television season is generally regarded as the first season in the United States (
* The 1946 song "Shaving Cream" by Benny Bell was covered by the reggae/soca group The Fabulous Five in the 1970s, and still is considered a classic soca song in the West Indies, while the original has mostly been forgotten.
* The 1947 Italian version of the film was given a partial redub in 1963 to the song "When You Wish Upon a Star" due to the previous version being in low quality. Subsequent releases, since 1993, retain the original 1947 version.
* The 1947 Western swing song "Smoke! Smoke! Smoke! (That Cigarette)" by Tex Williams (a No. 1 Country hit for 16 weeks) is all about Tex finding it irritating

that EVERYBODY always has to take a minute to pause and smoke their cigarette.
* The 1949 DKW Schnellaster was the first mass-produced minivan, beating Volkswagen's Type 2 "Microbus" to the punch by a year. The Stout Scarab, first manufactured in 1935, is considered by some to be a prototypical minivan, although
* The 1950s adventure series by Australian author Ivan Southall featuring
* the 1950s by Les Baxter, is basically the Theme Park Version of a stew of various ethnic musics (largely but not limited to Polynesian and African music).
* The 1950s song "You Always Hurt The One You Love" (most associated with the Mills Brothers) was used prominently in
* The 1951 hit "My Heart Cries for You" was written by Carl Sigman and Percy Faith. The first issued recordings of this song gave the credit to Sigman and "Peter Mars", as Faith had written the lyric to Sigman's melody as a joke (he was dared to compose a "commercial song") and was appalled to see it recorded as a serious song so he refused to have his name attached to it. Later recordings credit Faith under his real name.
* The 1952 short "Just Ducky" has Tom chase Jerry into a pond. Jerry attempts a
* The 1953 American attempt to summit K2, the second-highest mountain and arguably the most difficult in the world, was frustrated by weather and mountain sickness. The eight-man team attempted to carry one of their number off the mountain, a nearly impossible feat at that altitude. Then a near-disastrous accident left everybody shaken and/or injured. The team decided to camp to recover and consider their options leaving their injured companion, Art Gilkey, secured in his litter to the mountain face but when they came to fetch him he had been swept away, litter and all, by an avalanche he might well have deliberately called down upon himself in a
* The 1954 final: Helmut Rahn's winning goal against Hungary ("Aus dem Hintergrund müsste Rahn kommen...") and the West German team lifting coach Sepp Herberger and captain Fritz Walther on their shoulders in the rain after the handing-over of the Jules Rimet Cup. Doubles as a signature scene for the German national team.
* The 1955 Brooklyn Dodgers, whom, after years of winning the league pennant and always coming up short in the World Series, succeeded in winning the World Series against the New York Yankees. The '55 Dodgers, which included Jackie Robinson, Pee Wee Reese and Gil Hodges, solidified their legend in baseball. After the 1955 World Series, the Brooklyn Dodgers won one more pennant (but losing in seven games to the Yankees in the World Series) before moving to Los Angeles.
* The 1956 Hungary-Soviet Olympic water polo match is a classic example of this trope.
* The 1957 Chevy pickup truck from the C.W. McCall song (which is really more of recitation set to music) "Classified":
* The 1958 Bill Haley & His Comets classic "Skinny Minnie" is from the point of view of a shorter man dating a gal who is "1.8 m high and 30 cm thick."
* The 1959-1964 shorts (sometimes called the “red rings era”) are considered much better than what came afterwards, but nevertheless suffered from coming immediately after what is near-universally considered the studio’s best output: it’s hard to live up to such beloved classics as
* The 1959 movie focuses on the captain of an American sub that was at sea in the Pacific during the war. The sub makes its way to Melbourne, and a romance ensues. With the sub commander played by
* The 1960 film adaptation. In the book, an Eloi woman named Weena shares a close relationship with the Time Traveler, but not a romance, at least not overtly. Largely because Weena, like all Eloi, was a child-sized androgynous-looking creature mentally on the level of an eight-year old. However, the film turns Weena into a love interest, looking human except still with the mentality of a child.
* The 1960 film version makes Madeline the fiancée of the narrator.
* The 1960 Pirates that upset the Yankees in the World Series after Bill Mazeroski's walk-off home run in Game 7.
* The 1960s incarnation of Blue Beetle kept a separation between his ordinary life as Ted Kord and his heroic life as Blue Beetle, but he was an exception to the usual business about keeping things secret even from the hero's loved ones: only a

couple of issues in, he decides his girlfriend deserves to know, and tells her the whole thing. In subsequent issues, she helps cover for him when he needs it.
* The 1960s series explained it by saying he was originally a military robot that the Doctor was working on, and was altered at the last minute at great haste; Tenma had rather snapped after his son's death, and didn't care beyond annoyance that he was a death machine.
* the 1960s TV series had the villain's hideout located in an abandoned warehouse.
* the 1960s TV series. The Mad Hatter seemed to have finally triumphed in "The Contaminated Cowl" by using deadly radiation to fry the Dynamic Duo into skeletons - but then it turned out the heroes had escaped after all, and had deliberately left behind the skeletons as a ruse.
* The 1960 U.S. presidential election debates were the first to be televised. Polls showed that those who watched the debate on television thought the handsome
* The 1960 World Series: The Pittsburgh Pirates were grossly outmatched by a New York Yankees team who outscored, outhit and outplayed them in almost every category except wins. The Yankees defeated them in three of the games with scores of 16-3, 10-0 and 12-0 but the Pirates' victories were close (and the Yankees still outhit the Pirates in 3 of those 4 wins). Game 7, which the Pirates won 10-9, was the first to have the series end on a game-winning home run.
* The 1961 song "Sad Movies (Make Me Cry)" references newsreels and color cartoons, neither of which have been regularly shown in theaters since the end of that decade.
* The 1962 Marty Robbins hit "Ruby Ann" tells the story from the point of view of the male Betty. He is a poor but honest, loving man. Ruby Ann is the female Archie who chooses him over the "big man" male Veronica. As the Betty gloats, "Big man, you got money in your hand, so what? You're at a table for two, but still there's only you, big shot... Ruby Ann took the hand of this poor, poor man, ain't true love a funny thing?"
* The 1962 New York Mets, whose 120 losses remain the post-1900 Major League Baseball record, remain one of the more beloved teams in history. Similarly, in games like football where it's a lot easier to lose every single game (because there are only 16 regular season games, which is a bit more than 10 times less than a standard baseball schedule), it's not uncommon for fans to cheer their team for a "perfect" losing season. (The 2008 Detroit Lions and the 2017 Cleveland Browns are good examples.)
* The 1963 animated short film, by Peter Lee and Arthur Humberstone, shortened the original 1949 children's book of the same name. It only included scenes such as a montage of Noddy and Big Ears building Noddy's house, Noddy accidentally letting the animals from Noah's Ark loose, and the trial to determine if Noddy is a toy.
* The 1963 song "Doo Wah Diddy Diddy" by The Exciters enjoyed renewed popularity after it was featured as a military cadence in the 1981 comedy
* The 1964 Ford Mustang was originally meant to be a 2-seat roadster with a rear-mounted V4 engine.
* The 1964 song "Tobacco Road" by the Nashville Teens. The narrator in the song wants to demolish the neighborhood he grew up in.
* the 1966 show's Joker are still the yardsticks by which later actors in the roles are compared.
* The 1967 Pete Rodriguez song "I Like It Like That" saw a new life in 1996 when Burger King used a cover version of said song (retitled as "I Like It") by the one-off Latin music supergroup The Blackout All-Stars,
* The 1968 movie has a live-action series that lasted only a single season in 1974, which more or less followed the same premise as the original film.
* The 1969 24 Hours of Le Mans had a Porsche crash on the first lap, get its fuel tank knocked out from under it and have a Ferrari run over it, causing it to explode into a giant pillar of smoke and fire. This, and the fact that the driver of the Porsche was killed due to not properly securing his safety harness thanks to the nature of the Le Mans start, was what caused a massive revamp of safety for next year's event.
* The 1969 24 Hours of Le Mans was the first time that the loophole-abusing

Porsche 917 was entered, and throughout most of the race, the sheer speed of the Porsches was difficult to compete with. However, the untested cars were unreliable and attrition set in. The race was eventually contested between a fast prototype Porsche with failing brakes and the then-overweight and underpowered Ford GT 40 driven by the rookie, Jacky Ickx. The last hour of the race had the two cars swapping places constantly, and ended up with Ickx's GT 40 winning by a scant 120 metres after 24 hours of racing. Ickx also won the safety battle, having willingly started last to properly secure his safety belts and was almost immediately vindicated for it via an early fatal crash by John Woolfe in one of the 917s.
* The 1969/70 Mark Lindsay hit "Arizona" isn't about a state, but about a pigtailed hippie girl.
* The 1970 Beary Family cartoon "The Unhandy Man" has Charlie Beary trying to
* The 1970s Cincinnati Reds, aka "The Big Red Machine," including Johnny Bench and Ken Griffey Sr., led by Pete Rose. They appeared in four World Series (losing one to the aforementioned A's), winning two in a row (beating the Red Sox and Yankees)
* The 1970's Jack in the Box jingle, "Take Life A Little Easier", became a minor hit on the radio.
* The 1970s were formulative years for idol singers in Japan, jumpstarting the careers of Momoe Yamaguchi and Junko Sakurada, who became famous after being scouted through audition television programs. The first well-known idol singer groups were Candies and Pink Lady.
* The 1971 episode "Kingdom of Fear" is set at a prison camp and is based on
* The 1971 film, unlike the novel, assigned specific nationalities to the four bratty kids: Augustus is German, Veruca is British, and Violet and Mike are American. The 2005 film, a 2005 stage musical (
* The 1971 Indo-Pakistan War. After Pakistan launched surprise air attacks on several Indian military bases, India quickly retaliated and also joined the rebel forces in East Pakistan, which became Bangladesh. The war lasted just 13 days. Ending with an Indian victory and the independence of Bangladesh.
* The 1971 Pirates, who defeated the Phillies in September using an all-black starting lineup, before winning the World Series a month later.
* The 1972-1974 "Swingin'" Oakland A's, which included Reggie Jackson, Catfish Hunter, and Rollie Fingers, winning three consecutive World Series
* The 1972 episode "Riot!" meant to address sub-human living conditions prevalent in the era — and to a point, even in the early 1970s, when this episode was aired ... and to a point, even today. The episode introduces Tim Matheson to viewers as the long-running series' last major new character: Griff King, who is paroled to the Cartwright's custody; Denver Pyle, who became known later as Jesse Duke on
* The 1972 Olympic Basketball Final involved multiple controversial fouls and referee decisions, all against the Americans, all in the final
* "The 1972 Silly Olympics" skit of a special for German television featured "The 100-yard dash for people with no sense of directions". At the boom of the starting gun, they scatter every which way.
* The 1972 United States Olympic basketball team still has not accepted their silver medals, as they contend the officials in the gold-medal game against the Soviet Union robbed them
* The 1972 version of Солярис (
* The 1973 breakthrough album from Joe Walsh, soon to become even more famous as part of the
* The 1973 episode "Training Division", Wells was actually saddled with a "
* The 1973-era Sentinels; they are programmed to eliminate mutants and they have a purple coat of paint.
* The 1973 Italo-Hispano-French series "L'Île mystérieuse" took some liberties with the source material, but Nemo correctly appeared as an Indian prince (played by Omar Sharif).
* The 1973 October War on the Egyptian front at least. Egyptian success in Operation Badr followed by the successful Israeli counteroffensive across the Suez.
* The 1973 series did have an ending, where Doraemon returned to the future and

Nobita promised him to grow up to be successful.
* The 1973 short story "12:01 PM" (mentioned below) was adapted for film twice:
* The 1974 Broadway revival rewrote the show in one act, with many songs thrown out (and the orchestration heavily reduced) and lyrics to some others entirely rewritten by
* The 1974 film is the biggest offender. The only name that version left unchanged was Dr. Armstrong's.
* The 1975 episode "Pressure Point", where officers Reed and Malloy deal with an autistic rookie officer who hides his disorders, including stuttering. These all lead to a situation where he is unable to alert Reed and Malloy to a potential trap set up by the episode's bad guys; don't worry, the main protagonists use their instincts to save themselves and capture the baddies. Later, Reed and Malloy interrogate the rookie cop, who admits his shortcomings and resigns. (Reed and Malloy, albeit upset, are calm and rational when getting answers; the rookie's training officer, Jerry Woods, has a cow and wants to skin his hide.) It's all part of an episode explaining why police forces sometimes "discriminate" due to certain disabilities.
* The 1975 have had two Top 10 hits on the US alternative charts. One is 2018's "Love It If We Made It", one of their best-known and most acclaimed songs. The other one, however, wasn't "Chocolate", "Sex", "Love Me" or "The Sound", but rather "Somebody Else", which is lesser-known compared to the aforementioned quintet of songs.
* The 1975 version features a chilling climax when Joanna meets her robot double.
* The 1976 Daytona 500 went into the last lap with Richard Petty and David Pearson running 1st and 2nd respectively. Pearson passed Petty for the lead on the backstretch, but as the two entered the 4th and final turn, Petty passed Pearson back. Approaching the finish line, the two cars made contact and both hit the retaining wall before spinning out onto the infield grass. Petty's damaged car ended up stalling a mere 150 feet from the finish line. As members of Petty's pit crew ran over to try and get him re-started, Pearson limped his equally-wrecked car past Petty and over the line for the victory. Both drivers had been so far ahead of the rest of the field that Petty was able to eventually re-start his car and, despite the delay, cross the finish ahead of the 3rd place driver (Benny Parsons) for second place.
* The 1976 film by falling basketball board was probably the riskiest stunt in the film. The book notably has the whole town get destroyed in Carrie's rampage, but they didn't have the budget for that, and so she only destroys the school. They ironically did plan to have a more action-packed ending than the book - having the White residence buried in a fall of boulders - but the machine that would have helped with that malfunctioned and so they had to just burn the house down instead.
* The 1976 novelty song "C.B. Savage" by country music artist Rod Hart. Released during an era where songs about the citizens band radio and its tie to truck driving songs were popular, the song sees an effeminate-sounding truck driver begin broadcasting over the C.B. radio, asking for help in locating "smokies." As the conversation continues, he begins using more and more double-entendre, implying he wants to meet with the truckers. The conversation is heard by the song's protagonist, the lead driver in a five-truck convoy protesting the then-55 mph speed limit. In the end, the truck driver — worried that he is being stalked by a creepy gay man — pulls off the road ... and it isn't long before he realizes the whole thing was a setup for his fellow truck drivers to be arrested for speeding. (The "gay truck driver" that was "stalking" the convoy was a corrupt highway patrolman, and had successfully exploited the homophobia of the truck driver.)
* The 1976 novelty song "Disco Duck," by Rick Dees and His Cast of Idiots, has the title character morph into an arm-flapping duck while on the dance floor.
* the 1976 original, one character manages to leave the precinct through a sewer pipe, hotwires a car, and speeds off to call for help... only to be killed by a gangbanger hiding in the back seat.
* The 1976 short comic "Approche Sur Centauri” from the French magazine

* the 1978 film was said to suffer mental health issues following the movies, ultimately committing suicide in 2018.
* The 1978 Miracle at the Meadowlands. The New York Giants were up 17-12 with less than two minutes left in the game, the Philadelphia Eagles were out of timeouts, and the Giants just picked off a pass from Eagles quarterback Ron Jaworski; the only thing the Giants had to do was run out the clock. Giants fans began streaming for the exits in a good mood, Eagles coach Dick Vermeil had a disgusted look on his face as he turned his attention to the post-game press conference (the team as a whole hadn't played that well that game), and (perhaps most strikingly) the CBS broadcast was already starting to having their announcers read off their list of "we thank this guy, this guy, that guy..." and rolling credits over the telecast. Then Giants quarterback Joe Pisarcik fumbles the attempted handoff to Larry Csonka and Eagles cornerback Herman Edwards picks up the fumble for a touchdown. Eagles win, 19-17.
* The 1978 pilot omitted the timed portion of Round 1 and eliminated the time limit from the bonus round, but also ended the bonus round if three wrong responses were given. Under these radically changed rules,
* the 1978 remake, the pods were updated to represent the corporate facelessness of the late '70s.
* The 1979 Pirates, who won the World Series between the Pittsburgh Steelers winning two Super Bowls.
* The 1980-2003 Fiat Panda was originally meant to be built on a streched platform of the 126.
* The 1980 contest featured an ambassador from each competing country (mostly the countries' national final hosts or commentators) introducing their country's song.
* The 1980s Broadway production deleted "He Whistled at Me" in favor of "Make Up My Heart", making Pearl's first solo an angst-ridden pop ballad rather than a bouncy, erotic disco number.
* The 1980s revival/retool, while avoiding the political issues of war by having a well-defined, clearly-evil enemy bent on
* The 1980's specials avert this trope by featuring the Peculiar Purple Pieman and later Sour Grapes as the antagonists.
* The 1980s syndicated version began with the Shopping format, but in November 1985 changed to the Winner's Board as well, played exactly the same way as on NBC. The change was rather noticeable since it was never so much as hinted at until the last segment of the last Shopping episode, when Jim announced it. The fact the Cash Jackpot continued to grow during the final Shopping week, even when it became obvious that nobody would get the $750 needed to win it, didn't help matters.
* the 1980s TV series with an apology for the effects of the Infinite Improbability Drive. Interestingly, the TV series DVD predates the film's release by at least a year.
* The 1980s was known as the "Golden Age of Idols" and were mostly defined by Seiko Matsuda and Onyanko Club. Onyanko Club was the first super group of idols with a "graduation system", lasting two years and with 52 members, and their format can be seen in other rotating idol groups such as
* the 1980s (when IBM-type PCs were relatively common as home computers but by no means the ubiquitous choice they later became) people would often refer to one as "an IBM-compatible".
* the 1980s where progressive values are more predominant—leading to social changes like stricter regulations on the police's use of firearms, reparations for victims of racial violence, and a major law enforcement crackdown on a resurgent white supremacist movement.
* the 1980s will use it too (along with some patriotic red-white-and-blue).
* The 1981 Cadillac El Dorado had a balancing problem which was corrected by installing a steel plate underneath the driver's seat. This saved Frank Lawrence "Lefty" Rosenthal from a car bomb attempt, which served as the inspiration for a scene in
* The 1981 Human League song "Don't You Want Me" is also about this situation from the dumpee's POV, but unlike the examples above, he

* the 1982 film is set on July 4th, America's Independence Day. The adaptation was necessary because principal photography was scheduled during the summer months.
* The 1982 hardcore punk wave was also called "no future" punk, as the fear of an imminent nuclear holocaust, or environmental destruction was a common theme.
* The 1982 Opera House version expanded the 1974 version back to two acts, restoring to the score "Dear Boy" (cut from the syphilis-free 1956 production but included in an appendix to the original vocal score), "Alleluia", "Chorale/Battle Music", "The Paris Waltz" (as "The Governor's Waltz", but still an instrumental), "Money, Money, Money", "What's the Use?", "Quartet Finale" (now sung before "My Love", which it originally reprised), "The Ballad of Eldorado" (as "The Ballad of the New World") and "Quiet"; the first two had been cut in most earlier productions, and the last three had new lyrics written by Richard Wilbur. The Westphalian chorale had its original wedding-related lyric replaced with the first lines of the hymn "Ein feste Burg." The duet for the Arab Conjurer and Infant Casmira (two characters who only appeared in the withdrawn
* The 1982 series used it for Turbo Boost (takeoff and landing), and Super Pursuit Mode transformation (to revert to Normal Mode, the transformation sequence was literally played backwards) regularly. There were also a few one-time uses, such as KARR's demise in
* The 1983 NCAA men's tournament final between underdog North Carolina State (coached by the late Jim Valvano) and "Phi Slama Jama" from the University of Houston (which had two future Hall of Famers in Hakeem Olajuwon and Clyde Drexler) came down to the last possession tied at 52. NC State player Dereck Whittenburg launched a long shot with 3 seconds to go, but his attempt fell far short of the rim... right into the hands of teammate Lorenzo Charles, who rose up to dunk it just as time expired. They pulled this off in 5 other games on their march to the championship; out of 9 total in the Atlantic Coast Conference and NCAA tournaments, they were trailing in the final minute in 8 (3 games were won in overtime, and one was never in doubt)
* The 1983 Philadelphia 76ers who only lost 1 game on the road to the championship.
* The 1985 advert "Bath" shot Sam Cooke's "Wonderful World" to #2 in the charts. Ironic, since it was a cover.
* The 1985 Villanova Wildcats were a rare David to run the full March Madness gauntlet. The Big East emerged as a powerful conference in short order after their inception in the 1979–80 season. The Georgetown Hoyas and St. John's Red Storm pressed forward as championship favorites while the Wildcats were an afterthought, entering the Big Dance with an 18-9 regular-season record (9-7 vs Big East opponents).
* The 1985 World Snooker Final, between Steve Davis and Dennis Taylor fits the Trope ludicrously well. Davis (aged 27) has already won the title 3 times, is the best player in the world, and is hot favourite to win again. Taylor (aged 36) is a lovable Irishman, always joking with the crowd, in the world's top ten or so but apparently outclassed, despite having had a good season (coming back bravely after the death of his mother). In the first-to-18 final, Davis races to an 8-0 lead. Taylor fights back to 11-11, but can't get ahead. Davis takes a 17-15 lead, only for Taylor to pull back again to 17-17. The edgy final frame takes over an hour, and eventually Taylor pulls out a brilliant pot to take it to the final black. He then gets the first chance, but misses badly. Davis looks sure to be left a sitter, but it goes slightly awkward - still, he's left with a pot he'd get 9 times out of 10 to win. He misses too, leaving an easy chance. Taylor steadies himself, and pots it to win 18-17 after nearly 15 hours of play.
* The 1986 Boston Celtics championship team, featuring 5 future hall of famers (Larry Bird, Robert Parish, Bill Walton, Dennis Johnson and Kevin McHale).
* The 1986 LSU Tigers, the first 11-seed to reach the Final Four, still tied for the lowest seed to do so. It took them two overtime periods just to get past their first opponent, 6-seed Purdue, but they kept rolling after that, and unlike future 11-seeds, they went through the toughest possible path, facing the 3-seed, 2-seed, and 1-seed in the following three rounds (the three later ones would face a 7, 10,

and 7, in chronological order, in the Sweet 16 rather than a 2, and the most recent one played a 9 in the Elite Eight instead of a 1).
* The 1986 New York Mets were one of the best baseball teams ever assembled. They were also, almost to a man, a bunch of drunks, womanizers, drug abusers, and masters of Jerkassery. More memorable then their fights against other teams (like literal, knuckle-up fights) were the ones among themselves. One of the more fractious ones was between team star Daryl Strawberry and the unofficial team captain Keith Hernandez.
* The 1986 reboot established Superman as fairly establishment-minded and much more overtly American, as well as ratcheting back his intelligence considerably. Additionally, while most prior stories treated Clark Kent mostly as a disguise, the reboot pushed for the idea that he considered Clark the "real" identity and Superman the disguise. He claimed to not regret the loss of Krypton itself, seeing it as just a curiosity, and was, if anything, resentful towards his heritage. Meanwhile, his difficulty with close relationships mostly vanished, culminating with marrying Lois Lane. His power went back down, though not by much, and he rarely faced cosmic-scale threats anymore.
* The 1986 revamp made this one of its earliest key plot points in order to justify his
* The 1986 World Series. Red Sox vs. Mets. Going into Game Six, the Red Sox were leading the series three games to two. The Red Sox pulled ahead, 5-3, in the top of the tenth inning, and after Wally Backman and Keith Hernandez flied out to left and center, respectively, it looked like they had it in the bag: the scoreboard at Shea Stadium briefly flashed "Congratulations, Boston Red Sox, 1986 World Champions", and TV announcers were remarking that Red Sox pitcher Bruce Hurst was about to be named Series MVP. And then, Gary Carter singled. Then pinch-hitter Kevin Mitchell also singled.
* The 1986 World Series would produce its own epic case of misblame, one which has become entrenched in baseball lore. In Game 6 of the series, the New York Mets would come back in extra innings, scoring the winning run of that game when first baseman Bill Buckner made an error and failed to field a ground ball hit between his legs. The Mets promptly won Game 7 and became champions, prolonging the legendary agony of the Boston Red Sox. Easy case for blaming Buckner, right? Not so much. Those who do conveniently ignore the fact that Boston's bullpen had already blown two leads before the error occurred, with Boston having lost a 3-2 lead in regular innings and a 5-3 lead in the 10th before Buckner's error. The situation in the 10th is particularly notable, since it happened despite the fact that when the Mets rally started they had 2 outs and no baserunners, and just about everyone except the Mets players themselves had conceded defeat. (The TV crew had already announced one Red Sox player as the player of the game and named another Sox player the World Series MVP, the message board in Shea Stadium briefly displayed a message congratulating the Red Sox on their victory, etc.) Boston relievers then gave up three hits in a row and pitcher Bob Stanley allowed the Mets to tie the game by throwing a wild pitch nowhere near target that let the tying run score and the winning run to move to second base. On top of
* The 1987 animated series does this frequently, to the point where it's lampshaded after the Big Bad and his mooks escape through a portal that closes before the good guys can follow: "How do they get away EVERY time?"
* the 1987 cartoon: an alien "toy" threatens the existence of Earth and as it powers up, things look hopeless for our heroes... then it stops. As it turns out, April knew that "every toy has batteries", showing a massive cylindrical battery to the turtles.
* the 1987 cartoon, who is the natural choice for the position of Emperor? Hint: The episode isn't titled "Krangville."
* The 1987 Ferrari F40 and 1997 Ferrari F50, produced for the company's respective anniversaries.
* The 1987 season had white actress Jan Hooks satirizing then-Philippine President Corazon "Cory" Aquino.
* the 1987 series is forced to attack the titular turtles by a bad guy who tells

him his sensei will be killed if he does not.
* The 1987 Slammy Awards: In a literal case, one of the nominees for the "Best Personal Hygiene" award was
* the 1987 version, Shredder was revealed to have a still-living mother on the show, whom he presumably loved but who really cramped his style. By the end of the episode, he teleports her out of the Technodrome and back to her retirement home, then laughs triumphantly and with great relief.
* The 1988 Scottish Opera Production and the composer's Final Revised Version restored a few songs to their original lyrics, added all-new lyrics for "Westphalia" and stuffed even more songs into the score, including "The Kings' Barcarolle," "Nothing More Than This" and "Life is Neither", which had been cut from the original production and used only infrequently before 1974. ("Barcarolle" had been used in the 1974 version only as underscoring.) An untitled abridgment of "Ring Around a Rosy" and most of the "What a fair" lyrics from the 1956 version were both interpolated into the "Auto-Da-Fé" number. A few numbers were not restored: the "Sheep Song," most of the vocals to "Alleluia" (which remained on the composer's recording) and the aforementioned duet for the Arab Conjurer and Infant Casmira.
* The 1988 season then satirized Imelda Marcos, wife of ex-dictator Ferdinand Marcos (a few years before her lampooning in
* The 1988 version also added "Goodbye, Little Dream, Goodbye", a cut song from
* the 1988 WGA strike). The former caused soaps to run without experienced writers, leading to a sharp decline in quality, and coverage of the latter not only knocked the soaps off the air for several weeks, but provided viewers with a real-life drama to enjoy, thanks largely to the media circus caused by Judge Lance Ito allowing cameras into his courtroom. Declining viewership caused the networks to put less effort into their daytime shows, creating a vicious cycle of sinking quality and ratings. To top it off, shortly before the first "legacy" soap was cancelled, there was another WGA strike (in 2007-08).
* The 1989 Batman movie was the first to give him an actual grapple gun, as opposed to the batarang with a rope tied to it he relied on before. In the film, Batman asks Vicki Vale her weight to find out if his device will be able to hoist both of them off the ground. She lies about her weight, and the device malfunctions halfway up. In another instance, he uses one that fires hooks in two opposite directions. Instead of lifting him off the ground, this allows for rapid horizontal movement by acting as a zip line. It has continued all the way into the re-imagined franchise.
* The 1989 Brazilian Portuguese version received a partial redub in 1997; here Kiara Sasso replaces Gabriela Ferreira as Ariel's singing voice (add that the lyrics to "Part of Your World" were changed, and there is quite a
* the 1989 film brings roses to her father's grave after her first big role in the opera as Carlotta's replacement.
* The 1989 Geomagnetic storm that put Quebec into a blackout for nine hours. The effects of the storm were enhanced by the fact that Quebec sits on the Laurentian Shield, a large rock formation that prevented natural grounding. This allowed the energy to take the path of least resistance, such as the electrical transmission lines, causing the entire Hydro-Quebec network to short out.
* The 1989 Loma Prieta Earthquake damaged the upper deck of the eastern span of the San Francisco-Oakland Bay Bridge, as well as causing the Cypress Structure, a double-decker freeway in Oakland, to collapse. The hated Embarcadero Freeway along the San Francisco waterfront was so heavily damaged that it was demolished, with the city redeveloping the area with vintage streetcars.
* the 1989 version has no skin around his head at all, and his "mask" is a patchwork of skin that he has taken from his victims.
* The 1990 college game between the Minnesota Golden Gophers and the Utah Utes. The Utes had blown an early 19-0 lead and the game was tied 29-29 late in the fourth quarter. Minnesota blocked a Utah punt, and after a couple plays, with :08 remaining in the game
* the 1990 film, Captain America was frozen in a block of ice in Alaska. When they dug him out, he breaks free from it on his own.

* The 1990 Julio César Chávez–Medrick Taylor fight when referee Richard Steele declared Chávez the winner by TKO with two seconds left in the final round. Since many observers believed Taylor was well ahead on points and would have won had the clock run out, they were appalled that Steele didn't check the clock and just let it run. But Steele's job was only to see if Chávez's last minute assault left Taylor unable to continue
* The 1990 revival changed the rules involving tie games. In all previous versions, when a tie game happened, the pot would carry over to the next round with the contestants playing nine new categories. In the revival, the money in the pot reset to 0 in the event of a tie, and the next round would be played for double the stakes. This is hated by fans because it means the second round can potentially be worth
* the 1990s is constant — but the hairdo is still used as a trope, implying a lot about Marge's character.
* The 1990s saw a decline in idol singers in the first couple of years due to young people preferring rock music and being "artists", but it also launched Namie Amuro's career. Also, it was known as the "Chidol Boom", where child idols (elementary school aged idol singers) became popular.
* the 1990s, there was the parody of "Shub-Internet". The harsh personification of the Internet, Beast of a Thousand Processes, Eater of Characters, Avatar of Line Noise, Personification of Lag, and Imp of Call Waiting; the hideous multi-tendriled entity formed of all the manifold connections of the net. Its purpose is malign and evil, and is the cause of all network slowdowns.
* The 1990's version downplayed a lot of the unfortunate baggage on Hadji, presenting his philosophizing as a way for him to subtly snark at his more adventurous adoptive brother and the hotheaded Jessie Bannon. Making Hadji the computer expert helped solidify this idea. Unfortunately, ten years later,
* the 1990s which not only fails to do so but also in the last ten minutes presents a teaser for an alien invasion set to occur in 2012 (which to this day looks like it may never be resolved at all).
* The 1990's World Cup Qualifiers of the Colombian National Football Team were filled with this trope, whereas the team was filled with
* The 1990 UNLV basketball team, led by Jerry "Tark the Shark" Tarkanian. They dominated basketball, beating Duke to win the championship, while their coach defied the NCAA (he was notorious for saying "The NCAA got so mad at Kentucky they decided to give Cleveland State two more years of probation."). The next year, the UNLV team almost had an undefeated season, but lost to Duke in the Final Four.
* The 1990 US Senate election in Minnesota had incumbent Senator Rudy Boschwitz go up against Paul Wellstone, a political science professor at Carleton College who had never held government office. Boschwitz outraised Wellstone by a 7-to-1 margin and tepidly campaigned, viewing Wellstone as a fringe candidate who posed no serious risk to his re-election bid, and never responded to Wellstone's requests for a debate.
* The 1991 Bingoboys' hit "How to Dance" has a line that goes "Show you how to dance/it's like sex/start out dry/end up all wet."
* The 1991 BYU-San Diego State game was a similar situation. BYU entered the game undefeated in Western Athletic Conference play, SDSU (led by future NFL great Marshall Faulk) had one loss, and it was their final conference game. An SDSU win would've given the Aztecs at least a tie for the title, and since they would've beaten BYU head-to-head, they would've earned a bid to the Holiday Bowl (played at their home stadium). The 56,737 fans at Jack Murphy Stadium in San Diego (at the time the largest home crowd ever for a regular season SDSU game) were thrilled to see the Aztecs take leads of 45-17 in the third quarter and 52-38 in the fourth, but BYU quarterback Ty Detmer (the 1990 Heisman Trophy winner) led a comeback that ended up cutting the lead to 52-51 late in the game. Rather than risk missing a two-point conversion, BYU kicked a PAT and the game ended as a 52-52 tie, allowing BYU to clinch the conference title outright when they beat archrival Utah a week later.
* the 1991 original is still more-or-less the same character here, being a spoiled

and selfish prince who was cursed to become a hideous monster for being cruel to an enchantress, but this film adds one crucial detail: Here, he lost his mother to the plague and was raised by his cruel and unforgiving father, who is implied to have molded him into the person he is prior to meeting Belle.
* The 1991 version keeps many aspects of Poe's story, but adds in a romance and supernatural elements.
* The 1991 World Series in its entirety. Seven contests, all won by the home team, four - including the climactic Game 7 - won in extra innings; Game 7 won in a 1–0 shutout by a veteran starting pitcher who went all 10 innings. And both the
* The 1992 Dream Team is remembered for being composed of 11 Hall of Famers who are considered some of the best players in the history of basketball... and Christian Laettner.
* The 1993-94 New York Rangers had, amongst their roster, hotshot winger Alexei Kovalev. One game in February saw him stay out on the ice longer than he was supposed to — a hallmark
* The 1993 College Tournament winner Phoebe Juel recounted that the coordinators had to search the studio for more boxes because the ones which were on hand were still too small for her.
* The 1993 computer game "Rags to Riches - The Financial Market Simulation" from Interplay lets you make a fortune on the stock market with the money your parents have given you.
* The 1993 edition of the Collins-Robert English-French dictionary has twin introductions (one in French and one in English) about how to use the resources it contains to make sure you use the correct translation. Each introduction begins with an example of how weird one can sound with the wrong words.
* the 1993 film, Colin wants to marry his cousin Mary when they grow up so that they can always be together. Mary is amused but uninterested. Colin's response is a jealous loathing of Dickon, the servant boy who helps them in the titular garden, with whom he suspects Mary of falling in love. Their mothers are stated to be identical twins, thus making this even iffier genetically, since the offspring of identical twins are genetic half-siblings (assuming the other parents involved to not also be identical and to be two different people).
* The 1993 made-for-cable movie is a looser adaptation using a 24-hour loop: the hero was given an electric shock at exactly 12:01, just as a nuclear device comes on line that causes time to loop. He's the only one who realizes this, and when he's not being killed each day, he tries to figure a way to prevent the nuclear device from going on-line.
* The 1993 releases of the original featurettes were available in gift sets with plushies of Pooh, Piglet, Tigger and Eeyore.
* The 1993 Trance song 'Dreams' from Quench makes good use of this trope.
* The 1994 Broadway revival inflated the role of Parthy and gave it to
* The 1994 episode "Judge And Jury" revolves around a young woman who accuses her parish priest of raping her.
* The 1994 remake has a couple of instances of the angels (the heavenly beings) not helping the Angels (the professional baseball team):
* the 1994 remake of ''The Jungle Book'' Baloo is portrayed by an American black bear rather than a sloth bear. This may be because sloth bears are an endangered species and American black bears are more common in captivity.
* The 1994 San Marino Grand Prix. During practice on Friday before the race, Rubens Barrichello was seriously injured in a crash. Then the next day during the qualifying rounds, Roland Ratzenberger was killed. And finally, the main event saw the death of Ayrton Senna.
* The 1994 story "The Great Pretender" (the first in a miniseries of
* The 1995/96 season of the Danish Superliga, saw Brøndby IF (
* The 1995 Fleer Ultra Spider-Man Arachnophobias cards include the exclusive Puma and Rhino hybrid Claw-Hide, Doppelganger and Shocker hybrid Doppel Shock, Mysterio and Lizard hybrid Myzary, and Vermin and Vulture hybrid Scavenger.
* The 1995 Ig Nobel prize in literature was awarded to DB Busch and JR Sterling

for their paper "Rectal foreign bodies: case reports and a comprehensive review of the world's literature" (
* The 1996 Chicago Bulls, with their 72-10 winning streak and fourth NBA championship, would qualify. Notable players, led by Phil Jackson, included all stars Dennis Rodman, Scottie Pippen and Tony Kukoc, as well as a certain guard from North Carolina.
* The 1996 edition has Croatia's Maja Blagdan, whose note is so high, that has even a 30 second length!
* the 1996 movie has The Doctor settling down with a book and a cup of tea after setting course for Gallifrey. The Doctor later tells Grace that it would take the TARDIS ten minutes to travel from Earth to Gallifrey.
* The 1996 Summer Olympics is this to the 1992 Summer Olympics because of its extreme heat, poor transportation, its questionable mascot and the bombing attack that took place during the middle of the games.
* The 1996 TV Movie said the Doctor was half-human, a legacy of more detailed origin stories in various film proposals, and even that much caused fandom to detonate in controversy.
* The 1997 Special Editions of the original trilogy were hit big-time with
* The 1998 edition has Imaani, the UK's entrant, who ends on a rather high note, who touches the duration of a half-minute!
* The 1998 episode "Rust Buckets" had the aesop of "Never drive around in
* The 1998 game was the dawn of the BCS era, and #3 Kansas State faced #8 Texas A&M. The #2 UCLA Bruins had already lost earlier in the day, so a win would've sent K-State to the inaugural BCS National Championship Game. KSU led 27–12 after three quarters, but A&M rallied to send the game to overtime and won 36–33 in double-OT to knock the Wildcats out.
* The 1998 re-release of "Du Riechst So Gut" got a new music video which was a concept video. Yay, werewolves.
* The 1998 Tailwind scandal, based around a (possibly but not definitely discredited) CNN story of Vietnam-era war crimes supposedly committed by US troops in Laos, revolved around a dispute over whether chemical weapons were used, including nerve gas and/or tear gas. At least one account of the story included a chemical code-named "Glink", which was supposed to paralyze everyone on the ground where it was spread; the idea was that medics were supposed to show up on rescue helicopters and give the antidote only to friendlies. (Disputes over the accuracy of the report led to a round of firings at CNN, but the original producers of the report stand by their content.)
* the 1999-2002 timeframe and dashing war heroes like Wittmann or Hartmann. It died slowly after 2002, most people gained a more balanced and neutral attitude for those involved in the war.
* the 1999 Disney film, when he comes upon the child fashioning a spear.
* The 1999 Stanley Cup Finals ended on a highly controversial overtime goal scored by the Dallas Stars' Brett Hull on the Buffalo Sabres' Dominik Hašek. It's still a
* The 1999 US Open Golf Championship's final day was almost perfectly set up for this trope, especially in the final groupings, which contained three of the most popular golfers of the year.. The young prodigy Tiger Woods was hitting his stride as one of the best golfers of the decade, and fan favorite Payne Stewart was paired with another young gun, Phil Mickelson, who was attempting to gain his first major victory in his career. The fun part? All three were within a shot or two of each other, and the tournament was settled with Payne Stewart's 15-foot putt for par,
* The 19th and before she died about eight months prior to her episode from a "major health trauma". Teague began as a rigging grip in the early seasons before he was promoted to rigging best boy grip and passed away in a car crash about a month prior to his episode's broadcast.
* The 19th century brought English such expressions as "doohickey" and "thingamabob"/"thingamajig". They were popular enough to have entries in the English dictionary.
* The 19th century Irish comic ballad "Finnegan's Wake" (which also provided

inspiration for
* The 19th-century music critic Hans von Bülow joked that Richard Wagner's early opera
* The 19th Century opera "Prince Igor" by Alexander Borodin, taking place in the semi-legelndary times of Medieval Russia, includes a dialogue between the Polovtsian Khan Konchak and his enemy, the Russian Prince Igor of the title, who had been defeated and captured by the Polovtsians. The Khan asks Igor if all is well (
* The 1e sourcebook "Manacle and Coin" includes both an exhaustive listing of races generally considered "slave races" and a sidebar from the authors about how utterly WRONG such attitudes are.
* The 1. FC Nürnberg used to dominate soccer in Germany in the 1920s, sometimes sending six players to the national squad with their arch-rival Fürth supplying the other five (there were no substitutions back then) but ever since they followed the 1968 championship with relegation the following year, fans have had to hold on to grainy black and white pictures of days long past and dream of names half-forgotten by others if they want to see a Nuremberg squad actually winning something. They did win the DFB-Pokal in 2007 but got relegated in 2008 - naturally.
* The 1st and 2nd Edition paladin had several additional restrictions as well, such as not being able to own more than a few magic items. The 1E ranger was likewise limited in how many possessions could be owned and had to be Good-aligned.
* The 1st and 2nd-edition spell "Creeping Doom", on the other hand, was seventh-level and conjured a quite deadly
* The 1st and 2nd seasons had numerous cases of characters finding out the big reveal from the first episode: that the queen has been
* The 1st Class SOLDIERs in the world of are allowed to use personal equipment, including custom uniforms, although even the heavily customised versions worn by Sephiroth and Genesis use certain insignias. They're also "unofficially" allowed to refuse orders, presumably on the grounds of: "Hey, do
* The 1st Edition Dungeon Master's Guide had advice for sending a party of
* The 1st Edition Dungeon Master's Guide has a picture of a fighter jumping into a wizard's arms after encountering a rust monster.
* The 1st Edition module "Queen of the Demonweb Pits" has Lolth's Spider-Ship, a mobile fortress that operates very like a huge machine. (The control room is even called a "bridge" in-game", with
* The 1st edition Monster Manual had a rule specifically for dragons that allowed players to try subduing them rather than killing them.
* The 1st Edition ''Wilderness Survival Guide" has rules for quicksand. A character who falls in can tread water for a while but will eventually sink below the surface and start to drown.
* The 1st Marine Division at the Chosin Reservoir during the Korean War.
* The 2000/01 Bundesliga saw an example of this. "Plucky Underdog" Schalke 04 was chasing "Eternal Champion" Bayern Munich every game of the season. They were level on points after 32 of 34 matches and both headed towards a draw on the penultimate day of the season, when in the third minute of stoppage time almost at the same time Bayern and Schalke's opponent Stuttgart both scored. Thus before the last day, Schalke were trailing by 3 points, and with Bayern playing at Hamburg, only just above the relegation zone, all seemed sealed against Schalke, especially since they went down by two goals themselves against unfancied Unterhaching, only to equalize and immediately fall behind again. In the end, Schalke was able to turn the match around to a "comfortable" 5-3 victory. Then, unexpectedly, 2 minutes from time Hamburg scored the 1-0 against Bayern, putting Schalke in pole position on goal difference. And Hamburg defended the lead until the 4th minute of stoppage time, when a controversial ruling for a handled back pass (and of course Hamburg's goalkeeper who did this was on loan from Schalke) gave Bayern a last shot at the title. At the same time, the whistle was reported in Schalke as the final whistle, so that they would be champions for the first time in half a century, and pitch invasion and celebration followed immediately - until the live scenes were shown on

the stadium screen (the free kick was somewhat delayed due to many protests in Hamburg). Bayern converted the last kick, by now 12 minutes in stoppage time, drew and thus became champions (again). Schalke since then carries the moniker "Meister der Herzen" (champion of hearts) and the validity of the ruling is still heftily discussed, with fans and players from both Schalke and Hamburg insisting to this day that this wasn't an intentional pass and thus could be handled.
* The 2000-01 post-season was an extreme example; after winning every single regular season game against the Toronto Maple Leafs and ending up 2nd overall in the conference, the two teams faced off in the first round of elimination, with Ottawa heavily favoured to win. Instead, they were
* The 2000 episode "Rogue's Roadshow" had the aesop of "Stealing cars for fun
* The 2000 Life Points intrusion penalty is also inconsistently applied across the board. Overwhelmingly it's the protagonists who get hit by it while the bad guys don't even in situations where they should. It gets to the point where it starts affecting one specific character only
* The 2000 made for TV movie has a lot more conflict and angst than either the earlier movie or the book, but much of that is due to the trend toward
* The 2000 Monday Night Miracle, the Miami Dolphins at the New York Jets. By the end of the 3rd quarter the Dolphins were up 30-7, Jets radio broadcaster Howard David stated, "And with a whole quarter to go, this game is over", and fans either began chanting "Let's go Yankees"/"Let's go Mets" (the game took place between Games 2 and 3 of the 2000 World Series between those two teams) or just left Giants Stadium early to beat traffic. Then the Jets scored 23 unanswered points to tie the game at 30 - the Dolphins scored another touchdown to go back up by seven, then the Jets scored
* The 2000 rap song "Danger (Been So Long)" by Mystikal found new popularity when it was used by
* The 2000 Royal Rumble "Miss Rumble" bikini contest. Hot women in bikinis, often getting skimpier per woman. The last bonus entrant... Mae Young. A woman in her 80s. She then promptly attempts to kiss Jerry Lawler and ends up baring her breasts. DVD version of this was unfortunately very poorly censored.
* The 2000's Baltimore Ravens. Since their first Super Bowl win in 2001, it became nothing but seasons of "almosts" in the Charm City. Throughout the 2000s and 2010s, the Ravens made the playoffs NINE TIMES, including five consecutive appearances, while consistently fielding one of the league's most prolific defenses led by stars Ray Lewis and Ed Reed. The last postseason collapse (2011-12 AFC Championship Game) perhaps being the most painful chapter yet, thanks to Lee Evans
* The 2000 single "Out Of Your Mind" by True Steppers featuring Dane Bowers and Victoria Beckham (the subject of a much-publicised UK "chart battle" with Spiller's "Groovejet", which it lost), was generally at the time and almost universally now, thought of purely as a Victoria Beckham single.
* The 2000s Mini reboot was originally meant to be a kei car-style microvan, before turning into a premium hatchback.
* The 2000s saw a boom in young adult books about "elite" high school girls, following the success of
* The 2000 US women's gymnastics team faced this going into the Sydney Games, knowing that they would be unlikely to measure up to the Magnificent Seven of 1996. Indeed, the USA didn't win a single women's gymnastics medal in Sydney — the team bronze medal that they were eventually awarded was given ten years later after the original bronze medal team was belatedly caught for cheating.
* The 2000 Year Old Man: as titled, he wouldn't be old enough to qualify, but he claims his oldest memories are of living as a caveman. And he says he met Moses.
* The 2001 and 2019 versions have contestants using their in-game money to bet on the Money Cards. In all other previous versions, money earned in the main game was the contestant's to keep.
* The 2001 game pitted #7 Colorado against #3 Texas, while elsewhere, #6 Tennessee was facing #2 Florida. The Volunteers knocked off the Gators, but Texas couldn't capitalize, putting the Volunteers in prime position to go to the national title game. Bizarrely, when they squandered that the following week (for some reason, the

Big 12 Championship Game was a week earlier than the SEC Championship Game that year), the #2 spot went to...Nebraska, a Big 12 team that hadn't even played in the conference championship game after suffering their lone loss of the year against... Colorado. (Colorado had incurred a non-conference loss, as well as losing a conference game—to

* The 2001 Seattle Mariners tied an all-time Major League record with 116 regular season victories. They didn't even reach the World Series.
* The 2001 Turner Prize was won by Martin Creed. His exhibit consisted of an empty room with a light turning on and off. When asked to explain his creation he stated that it was
* The 2001 UK Conservative Party leadership election was the first in which the candidates would be narrowed to two, who would participate in a separate runoff among all the party's members. Kenneth Clarke figured he could win the first stage of the vote but was worried about facing Michael Portillo, who was much better known and had just returned to Parliament. He did some calculations and got some of his supporters to vote for Iain Duncan Smith as a spoiler candidate, and it worked — he faced off against Duncan Smith in the runoff. Only problem being that the ex-Prime Minister
* The 2001 World Series deserves a mention as well. The upstart Arizona Diamondbacks defeated the venerable New York Yankees in seven games with the home team winning each game and two of the three games in New York being won in a walk off, as was Game 7 in Arizona. All done in the shadow of 9/11.
* The 2001 World Series featured The New York Yankees who were playing for the 4th consecutive World Series vs the Arizona Diamondbacks, who were playing their fourth season. Despite multiple comebacks from the Yankees and having to face the greatest closer in baseball history, the Diamondbacks prevailed
* The 2002-04 Ford SVT Focus was developed by a special sub-division of Ford (that also made the Mustang Cobra and Lightning truck); exclusive marketing was part of the SVT image. It was available only through select dealerships, not included in the regular Focus full-line brochures or on the main Ford website, and SVT's relatively small ad budget mostly went to the more profitable truck and Mustang. People who owned it loved it, but many others who would have didn't know it existed until it was too late.
* the 2002 cartoon, he was initially conceived as a chess-playing robot.
* The 2002 episode "Juvenile" focuses on an impressionable 14-year-old boy, Jeremy Brice, who is implied to: 1. Be socially awkward; and 2. Have trouble making (and keeping) friends, and good ones at that. His decision to befriend a troublemaker named Zachary Connor, leads to a burglary incident where Zachary (the dominant member of the duo) assaulting the woman resident and raping her, and Zachary duping Jeremy into assisting her. In the end, it ends up costing Jeremy dearly: A second-degree murder and first-degree burglary conviction and 15 years in prison (with the possibility of parole after eight years). Attorneys Cabot and Donnelly sadly bemoan afterwards that Jeremy's life is basically over ... all due to a few bad decisions, among other things.
* The 2002 film adaptation just makes matters worse by styling the brothers as camp cyber-punk/glam-rock types and ramping up the incestuous subtext (e.g. the Duchess and Junior after Junior is arrested, not to mention Ambitioso and Supervacuo's somewhat excessive hand-holding and pawing at each other)
* The 2002 film goes further: not only was Weena replaced with a love interest named Mara and the Eloi made even less childlike, but the Time Traveler was given an entire backstory of building the machine as a way to save his girlfriend from being killed by a mugger.
* The 2002 film was made after the innovation of CGI, and utilised it for the prom scene. Still though, a good portion of the deaths happen when Carrie drops an electronic scoreboard onto a wet floor and electrocutes everyone. The town's destruction is used in this version...with extremely bad CGI.
* The 2002 Missouri Tigers, the only team seeded 12 or lower to reach the Elite Eight. While this accomplishment is slightly dulled by the fact that unlike most 12-seeds who reach the Sweet 16, they were spared from playing a 1-seed, it should

also be noted that the 8-seed that took care of said 1-seed the previous round was
* The 2002 murder of Danielle van Dam. David Westerfield, the neighbor who was indicted for her murder, had a lawyer who used Locard's Theory as his entire case. It didn't work, and now Westerfield's in San Quentin. (Granted, the guy probably wasn't trying very hard to build a case, given Westerfield's attitude...)
* The 2002 remake, but it was never picked up due to disappointing ratings.
* the 2002 remake. The first is during season one, where Man-At-Arms is swallowed by Merman's giant shark-monster. (For the second time.) He-Man tries to rescue him by diving down the beast's throat, leading to this exchange:
* the 2002 remake, Tri-Klops uses a series of small floating CG devices to spy on everyone. The heroes completely fail to notice them flying around their palace... most of the time. There are at least two cases of animals chasing them, and a minor villain finds one and uses it as an excuse to get inside Skeletor's base.
* the 2002 series, we're given back-stories on the Sword of Power and King Greyskull, the same backstory for Orko as we saw in the 80s series (although he lost a wand this time instead of the original medallion), how Man-At-Arms became Teela's father (different to the 80s series) and how the Sorceress was able to become a mother in the first place.
* the 2002 TV series) gave Barbara a power chair rather than a manual one.
* the 2002 version And that may well have happened if the series had continued. She made plans to ally herself with Hordak that, unfortunately, were never resolved due to the cancellation of the series.
* The 2002 version features a scene where the detective looks through Carrie's yearbook. The same six students can be seen on every page.
* The 2002 video "Wiggly Safari" features a dedication to firefighter Brian Cannizzaro and everyone who lost their lives during the 9/11 attacks.
* The 2003-2012 Fiat Panda was planned to be an experimental lightweight low fuel consumption 5-seat small car, but ended up as a more traditional city car.
* the 2003 anime adaptation: first, Edward drops a basket of vegetables when he sees his sick mother collapsed on the floor, and later on, Hughes's wife drops a tea set when she goes into labor.
* the 2003 anime adaptation had a version of this: if there's a plot-important character in the episode we have not seen before, he is probably the villain of the week. The main exception to this rule is Rose. 'Course, a fair share of these episodes turned out to be important to the plot later.
* the 2003 anime adaptation is being called small. He's also skinny, not just short. Had he been larger he wouldn't have fit in the small space between the boulder and corner.)
* the 2003 anime adaptation of has this technique repeatedly and is over 400 years old. Unfortunately the amount of time she can spend in each body lessens each time she does it, meaning she requires more and more Philosopher's Stones to keep going.
* the 2003 anime adaptation. The latter would be an example of type 3 in respect to Greed.
* the 2003 anime adaptation, the Transmutation circles vary depending on what's being transmuted, whether the alchemist has seen the Gate, and other factors.
* the 2003 anime version about the government's nasty little misdeeds.
* the 2003 anime version, Bradley seemed to have this as his intention, which makes sense, him being a Hitler-expy and all.
* the 2003 anime version, but can't resist chowing down on them again immediately after.
* the 2003 anime version, Ed accidentally grabs Psyren's breast while fighting her, and blushes awkwardly. Psyren lampshades this and asks him if it's the first time he's fought a woman.
* the 2003 anime version, Ed dyes his (long blond) hair brown, and wears stilts and a hat in order to disguise himself.
* the 2003 anime version, Ed has one when he realizes that he has killed Greed.
* the 2003 anime version, Ed once briefly resigned his position as a state alchemist. He went back not long afterwards, but the 10-Minute Retirement probably saved his life; he ran into Scar, a serial killer targeting state alchemists, and

Scar would have killed him if Edward hadn't said he had retired.
* the 2003 anime version episodes. Even then, some of them still have a (slight) impact on the plot.
* The 2003 anime version: Every single named character who doesn't die in their first appearance shows up later in the series.
* the 2003 anime version has a massive battle between the Elric brothers and Lust and Gluttony, taking place in the waterfall area leading to the underground city below Central. Yet Ed doesn't even go there until his brother is captured and one of the homunculi they're fighting in the opening is dead.
* the 2003 anime version: In the penultimate episode, Edward dies an extremely quick and wholly undramatic death at the hands of Envy (despite being brought back in the next episode).
* the 2003 anime version is demolished she's claiming the same thing as a teacher at a school, after which even Al won't deny that she's just stealing for herself. It's ultimately subverted in the end, though, as she is acting as a thief for a good cause, just not the one she initially claimed to be fighting for: the town she operates in is one with an incredibly poor economy, and her acts are such a spectacle that they've been drawing tourists in just to see her in action, which in turn helps keep the place afloat.
* the 2003 anime version is most definitely this. Sending his soldiers to their doom and being most unreasonable as Lior is "His opportunity to be a war hero".
* the 2003 anime version, Lust's job is to be The Corrupter who tempts desperate alchemists into seeking the forbidden knowledge of how to make Philosopher's Stones. Envy also ends up creating Wrath by tempting the nascent homunculus with incomplete Philosopher's Stones.
* the 2003 anime version people (broken, emotionally wrecked people), generally capable of the full range of human emotions and motivations.
* the 2003 anime version, Roy Mustang has done several things such as sleep at his desk and try to feed his subordinate's dog, Hayate, before finally getting to work on reports at the last minute.
* the 2003 anime version's Badassity ensues. About their only real weakness is that they possess the zombie gait.
* the 2003 anime version, the Gate of Truth is visually changed to resemble the classic sculpture "The Gates of Hell" (which means it is now made of writhing human figures and inhabited by demonic creatures).
* the 2003 anime version. They've all done things they aren't proud of, but seem to take a "humans are inherently flawed, but all we can do is the best we can" approach to their struggles.
* the 2003 anime version, when Barry the Chopper threatens to kill Ed after capturing him, Ed sheds a few tears of fear as he tries to escape. Winry, having been captured by Barry and at his mercy, does this too.
* the 2003 anime version when he kills Sloth and he comments that Wrath can cry for her while he can't.
* The 2003 cartoon has a more notable character example with Karai. Karai as she appeared in the comics was originally a much more neutral character who could be ruthless but was not an enemy of the Turtles and while she was also a Foot Clan member, she didn't have much to do with Shredder either. However, the 2003 show established her as a daughter figure to the Shredder with varying degrees of loyalty to him and usually starts out as an enemy to the Turtles with her and Leonardo having some kind of connection of sorts. This characterization of Karai would go on to be her more familiar template for future incarnations.
* the 2003 cartoon when the Turtles return to their lair about six months after being driven out of New York by the Shredder. Mikey proceeds to drink from milk left in the fridge...
* The 2003 direct to video movie Detention was titled to a fitting description of the movie's premise, as
* The 2003 invasion of Iraq by the American-led coalition, commenced on March 20, routed the million-strong Iraqi military and took over the entire country in less than four weeks.

* The 2003 live-action film adaptation of was dedicated to Scott Plank, who died in 2002 following injuries from a car crash.
* the 2003-series, Donnie's confirmed to have a crush on April, who's 16 (and a high school student), instead of being a woman in her twenties.
* the 2003 series during the confrontation between the turtles and Splinter, and Shredder's forces. He takes a ludicrous amount of damage, but just keeps coming back, leading to this exchange:
* the 2003 series, Ed is killed by Envy. Al, who is the new Philosopher's Stone, transmutes himself a few moments later to revive him.
* the 2003 series of Teenage Muntant Ninja Turtles, which existed since the 1800s.
* The 2003 series plays this trope straight for the first four specials (Season 1), however Season 2 introduces a few one-off villains, and
* the 2003 TMNT series — which makes sense, given that most of the protagonists are life-long New Yorkers. One particular jab involved Casey Jones' description of a world were global warming had caused humans to evolve into mole-people to survive the scorching heat. Jersey, apparently, was the first to go. Also, in the first episode the Turtles are stuck above ground and trying to find a manhole with which they can head back underground without anyone seeing them. The first one they come across gets parked on by an armored truck; leading Raphael to kick it in rage.
* The 2004-05 lockout also screwed up several team anniversary celebrations. Some teams have continued to celebrate their original anniversaries after the lockout, while others have pushed them back a season. For example, the Ottawa Senators celebrated their 25th anniversary during the 2016-17 season, while the Tampa Bay Lightning celebrated their 25th during the 2017-18 season, even though both teams were founded the same year. Similarly, the Stars celebrated the 20th anniversary of their relocation to Dallas in 1993 during the 2012-13 season, while the Anaheim Ducks and Florida Panthers, both founded in 1993, celebrated their 20th anniversaries the following season. Making matters worse are the New York Rangers, who celebrated their 85th(!) anniversary during the 2010-11 season (what would've been their 85th season of play if not for the lockout), but then held their 90th anniversary
* The 2004 Copa América Final between Brazil and Argentina. The score was 2-1, but Brazil managed to score a goal at the
* The 2004 Copa América had Argentina scoring with three minutes left over
* The 2004 Flyers/Senators brawl holds the record for most penalty minutes awarded for a fight.
* The 2004 merger of BBC Video and another video distribution company produced a new entity called 2|Entertain, presumably playing off their intended mission ("to entertain"). The vertical bar means it also overlaps with
* The 2004 movie, trying to be more faithful to Shelley's original description.
* the 2004 Nik Naks advert where the eater of the Nik Naks (crisps) has a giant one explode out of his chest, as everybody around him is splattered with dusty cheese. After an awkward moment they all start dancing.
* The 2004 Philadelphia Eagles had one of the best seasons in the history of the franchise. They won 13 games in the regular season (a team record at the time) and had finally managed to win the NFC title game after losing it in the three consecutive years prior. Still, the most indelible memory of that magical season was team's horrible mismanagement of the clock and quarterback Donovan McNabb's apparent fatigue in Super Bowl XXXIX.
* The 2005 adaptation (and its video game) is to date, Julia Winter's (Veruca Salt) only acting credit. Much like Peter Ostrum, she elected not to continue acting and is now training to be a doctor.
* The 2005 "Battle of the Hockey Enforcers" was an attempt to see what would happen if you took a whole bunch of hockey goons and put them in a one-night fighting tournament. It was broadcast on pay-per-view like a boxing match and had no real hockey in it; it was just bare-knuckle boxing on skates with fifteen minor-league hockey enforcers. The winner was LNAH player Dean Mayrand, who took home a prize of $62,250. The tournament was quite controversial; it took three tries to

find a host and never had a second event, although it did serve as the inspiration for a Gemini Award-winning episode of CTV's newsmagazine
* the 2005 Coke Lime commercials to, "You put the lime in the Coke, you nut..."
* The 2005 filmed version of "LIVE Hot Potatoes" sees dedications to a three-year-old girl named India who had passed away from a brain disease in 2003 (she is credited as "a special friend of Dorothy the Dinosaur") and pianist
* The 2005 PAPA (Professional and Amateur Pinball Association) World Championship is framed as this in the
* The 2005 reboot was a resounding triumph for Britain's biggest sci-fi hero following the series' ignominious death back in 1989 and the failed pilot on Fox.
* The 2005 remake and pushing the ecosystem into decline, which could account for the overabundance of predators; a similar spike happened during the Cretaceous period due to an overabundance of sick and dying herbivores, followed by a huge crash when prey was exhausted.
* The 2005 revival began to avert the trope by establishing that the Doctor is perfectly capable of falling in love with his companions, and even having sexual interests, though this is never addressed explicitly. It's finally averted fully with the arrival of River Song, who becomes the Doctor's wife. Subtle references to their love life crop up, but even then, that romance is almost wholly off-screen. The Doctor has paradoxically more screentime with the more kid-friendly, platonic romance he shares with later companion Clara. The Doctor becoming too obsessed with his companion and
* The 2005 series mentions the New Roman Empire sometime around the year 12,000 (in the 51st century humanity has already spread across half the galaxy) and what should be The Fourth Great and Bountiful Human Empire around the year 200,000 which is supposed to span "a million planets, a million species". It's not specified how these are governed, but the word "empire" does imply hereditary rulers.
* the 2005 Tim Burton film, who passed away from pneumonia, and another on in 2015 for Christopher Lee.
* The 2006-2007 double whammy of the Sports Illustrated steroids report — in which several wrestlers were named for purchasing performance-enhancing drugs, including fan favorites
* The 2006 Country Music Awards saw Faith Hill and Carrie Underwood both nominated for Female Vocalist of the Year. As the nominations were being announced, a camera was trained on all five finalists, including Hill and Underwood. Then, as Underwood was announced the winner, Hill smiled and raised her arms, then apparently screamed "What?" and stormed away. All of this was
* The 2006 DVD release of the original cuts in the US has Castilian Spanish instead of Latin American Spanish.
* The 2006 episode "School Reunion" broached the subject, with Mickey referring to former companion Sarah Jane Smith as the Doctor's ex, and the ending of the Doctor and Sarah Jane's relationship was framed as a form of romance that was forced to end, with the Doctor and Sarah Jane in separate scenes confirming that there was more than just friendship between the two. Despite all of this, the Doctor and Sarah Jane are overjoyed to see each other and are friendly throughout (indeed, their friendship is reignited and continues after this).
* The 2006 final: French football icon Zinedine Zidane headbutting Italian defender Marco Materazzi and getting sent off in the final match of his career.
* The 2006 Halloween fan costume compilation had Strong Bad mistaking a woman for "The Cheat's hot mom", who was "always in and out of prison" for, at the very least, giving alcohol to minors ("Is she giving out frozen margara-Cheat-as again?").
* The 2006 Ig Nobel in Medicine was awarded to FM Fresmire for his paper "Termination of intractable hiccups with digital rectal massage" (
* The 2006 individual DVD releases of the original trilogy containing the pre-Special Edition versions of each film also included a demo of
* The 2006 Los Angeles Clippers allegedly tanked to get the sixth seed (of eight) in the NBA Western Conference in order to both avoid the Dallas Mavericks in the first round (who had the better record that year and thus would have had home-court

advantage) and delay facing the powerhouse Los Angeles Lakers until the third round of the playoffs (since the NBA Playoffs is a straight-up bracket). In addition, finishing sixth meant they faced the Denver Nuggets, who were only the third seed by virtue of winning their division: the Clippers actually had a better record, which meant
* the 2006 Massachusetts gubernatorial election. The ads blew up in Healey's face and Deval won by a landslide.
* The 2006 MLS Cup. The New England Revolution scored 8 minutes into the second overtime to go up 1-0, but since it was not sudden death like many sports, the Houston Dynamo had time to score the tying goal - and did, just over a minute later. The Dynamo eventually won on penalty kicks.
* The 2006 remake didn't lack in the catastrophe department either, though it saved Tokyo (for last).
* The 2006 revival shows that, before the Plutarkian invasion, the Martians themselves had ruined the ecosystem, but had repaired it with the Regenerator. The revival's
* The 2007/8 Writers' Strike meant that UK listing magazines couldn't review some
* The 2007 Fiat 500's original designs depicted a 5-door car with styling similar to the VW New Beetle, but with a more toy-like appearance.
* The 2007 New England Patriots are best remembered for being undefeated heading into the Super Bowl, only the second NFL team in the Super Bowl era to go undefeated until the championship game. Unfortunately for them, they lost the game to the massive underdog New York Giants.
* The 2007 New England Patriots were undefeated in regular season play and were expected to win the championship. Analysts were calling them the greatest team of all time. Then they lost to the New York Giants in Super Bowl XLII and suddenly an 18–1 season just wasn't good enough to be the best.
* the 2007 remake it takes about 20 minutes for Michael to kill a human, and this is before we get to the present day.
* The 2007 remake turns this into an intergender example by adding Jim's girlfriend Grace Andrews to the mix. Ryder eventually murders Jim and puts all his focus on Grace.
* The 2008 edition has Azerbaijan's representatives, Elnur and Samir, with
* The 2008 European live tour had Riff Raff and Magenta reappear toward the end as
* The 2008 financial crisis left policymakers and Congress with a choice that absolutely no one wanted to make. Secretary Treasury Hank Paulson and Fed Chairman Ben Bernanke warned Congress that if the banks were not bailed out, the economy would collapse and the world would be thrown into a second Great Depression. However, much of the public was against any use of taxpayer money to bail out Wall Street. Faced with a choice of letting the economy collapse or enraging the public by bailing out the people who had gotten them into the crisis in the first place, Congress and Washington relented and bailed out Wall Street.
* The 2008 Halloween cartoon "Most in the Graveyard" features a Carnivorous Undead Sheep attacking Homestar and Pom Pom.
* the 2008 let's play think Sonic and crew store their Chaos Emeralds in their anuses.
* the 2008 movie Bruce's research was specifically to recreate the super soldier serum, playing this trope as straight as possible since the original comic origin has Bruce developing a nuclear bomb using gamma radiation for the military.
* The 2008 pilot movie features a simple screen in KITT's dashboard that pulled double duty as both KITT's speech indicator and a display. In the following series, released later the same year, the screen is replaced by a spherical speech indicator mounted higher in the dashboard and multi-function holograms displayed over the windshield.
* The 2008 reformation of Captain Jack bears no resemblance musically to their predecessors. (Francisco Gutierrez, the original
* The 2008 series uses it for Turbo Boost (the CGI combustion takeoff), as well as when KITT enters and exits the SSC headquarters.
* The 2008 story involved Matoran having their Light drained out and becoming

inherently evil, while Takanuva got partially drained and gained a
* The 2008 United States Presidential race was unique for a lot of different reasons, not the least of which was the largely-agreed-upon inspirational nature of the Democratic candidate.
* The 2009 Balloon Boy hoax. To make a long story short, a young boy named Falcon goes missing and his parents claim he's on a giant gas balloon that just went off. When the balloon lands and the boy's not there, they discover the boy hiding in the attic. Turns out the parents were planning to make a reality TV show and decided this stunt would get them the publicity they needed. Sure they got publicity, but they also faced jail terms and large fees.
* The 2009 reboot plays this trope straight. Although Sour Grapes is introduced in Season 4, it is not the same character as seen in the 2003 series and the original specials, as this Sour Grapes is a Berry Girl and comes more across as a jerk character rather than a proper villain.
* The 2009 sequel to the Spanish film subverts it further - Angela actually survived the first film's events, but it's revealed that she's now possessed after killing the other survivors in the apartment complex.
* The 2009 series begins with zombies in space and a main character named... Holiday Sugarman.
* The 2009 version directed by David DeCoteau also bears little resemblance to the original story but utilizes the large swinging pendulum in the penultimate scene. The film follows a group of university students who visit a hypnotherapy institute lorded over by a sinister hypnotist who wants to use the students to experiment with the possibility of breaking the pain threshold.
* The 2009 video game explains this: the "shockwave" in 1991 made ghosts much bigger, stronger, and meaner. The Extreme Ghostbusters are therefore "Busters of Extreme Ghosts."
* The 200th episode "How Your Mother Met Me" is centered on the Mother and what kind of life she was living before she met Ted, from 2005 up until the wedding. It also shows just how close she could have crossed paths with Ted but always just missed him, including when Ted was teaching in the wrong classroom, when she mistakenly believed she was in the wrong classroom and was about to head back to the right classroom when Ted rushed past her and again, when the Mother went out for drinks with Louis and walked by Ted
* The 2010-11 Grand Final. Brisbane Roar, the red hot favourites, against the Central Coast Mariners, who have never won the Grand Final. The match goes into Extra Time at 0-0, when a substitution turns the game in the favour of the Mariners. They score in the 96th and 103rd minutes, leaving Brisbane 15 minutes to come back in the 2nd half of extra time. Time slowly ticks away, until the 117th minute comes and Brisbane score. The final kick of the game is a corner kick in the 120th minute, which one of their defensive midfielders jumps up and scores with. They then win the Grand Final 4-2 in a penalty shootout.
* The 2010 cartoon "Which Ween Costumes?" was made to make up for the lack of a Halloween cartoon that year by providing a
* The 2010 Christmas Special does it both ways. In the same relation. Abigail Pettigrew (age unknown, but adult, probably in her twenties) is held in stasis by (initially) Kazran Sardick's father, as collateral for a loan. While Kazran is a young boy, The Doctor briefly releases her. By the time Abigail is put back in stasis, Kazran promises they'll be back every Christmas Eve. They do so, and while Kazran is still younger than Abigail, they're mutually attracted to each other. Until one Christmas Eve, Kazran learns Abigail has only one day left to live, and he decides to not release her on following Christmas Eves. Eventually, Kazran becomes an old (and grumpy) man. And on a Christmas day, Abigail is the only person who can save the day. Old enough to now be her grandfather, Kazran releases Abigail. Of course, they still love each other.
* The 2010 debate in the Verkhovna Rada that resulted in Russia's lease on naval bases in the country being extended until 2042 involved a full-scale brawl that featured eggs being thrown and someone letting off a smoke grenade.
* The 2010 election in the UK was a full on scare campaign from both sides. The

Conservatives' big scare campaign centred around the disaster a hung parliament would be, and that a vote for anyone but them would be allowing Gordon Brown to stay in power. Labour's scare campaign centred around David Cameron actually being Margeret Thatcher in disguise and that if the Tories got into power it would mean disaster for the working classes whilst they favoured their rich and powerful friends, and again that a vote for anyone but Labour was a vote for
* The 2010-era direct-to-DVD films use an art style heavily inspired by the original series, albeit with a darker look and more realistic lightning and shading. The gang is in their classic outfits, and all the humans even have
* The 2010 Europa League Final between Atlético Madrid and Fulham was decided by a last-minute goal in extra time from Atleti's Diego Forlán.
* the 2010 FIFA World Cup. The United States would go on to top their group ahead of England on goals scored.
* The 2010 forest and peat fires in Central Russia caused a Smoke of Doom in many Russian cities including Moscow.
* The 2010 game goes out of its way to crank up the gore and even includes nude pictures of Jennifer.
* The 2010 Music City Bowl between North Carolina and Tennessee had a similar last-second gambit to the aforementioned Grey Cup incident, except a bit more awkward. Trailing 20–17 in the 4th, a North Carolina field goal would send the game to overtime. In the dying seconds, the Tar Heels sloppily rushed a field goal unit with
* The 2010 Red Bull cars designed by Adrian Newey. They dominated the latter half of the season but suffered many mechanical failures. Averted in 2011 when the Red Bulls rarely suffered any mechanical failures and their
* The 2010 Seattle Seahawks were the first NFL team in a non strike shortened year to win a division with a losing record. Their playoff game was against the defending Super Bowl champion New Orleans Saints. How much of an underdog were they? Before the game
* The 2010 Super Bowl commercial for Kia cars was cute (a gang of giant, living toys goes on a fun road trip to
* The 2010 UK General Election campaign was the first one to see the leaders of the three largest national parties (the Conservatives, Labour and the Liberal Democrats) take part in a series of live TV debates. Before the first debate was broadcast, very few people were aware of the leader of the smaller Lib Dem party,
* The 2010 World Cup gave us moments such as Rob Green fumbling balls into the goal, Gervinho's hairstyle, and the ever-classic
* the 2010 World Cup, goalkeeper Iker Casillas planted one on his girlfriend, well-known reporter Sara Carbonero... while she was interviewing him on live television.
* The 2011 Boston Red Sox and Atlanta Braves will forever be linked for one miraculous, baffling and unbelievable 2 hours and 10 minutes: Game 162 on September 28-September 29. Both teams were and still are considered
* The 2011 British Superbike Championship came down to the last corner of the last lap between riders Tommy Hill and John Hopkins. The two riders battled nose-to-tail for the last two laps, the lead changed hands
* The 2011 Canadian Grand Prix was the longest race in F1 history time-wise, as various stoppages for poor weather stretched its duration out to 4 hours, 4 minutes. Jenson Button, who had been last when the final stoppage occurred, put in an astonishing performance after the restart to climb his way up to second by the start of the final lap. With a few corners to go, and Button closing in, reigning world champion Sebastian Vettel made an uncharacteristic error and span wide, allowing Button through to win and seal one of the greatest performances of his entire career.
* The 2011 commercial for Utah politician Jon Huntsman's Presidential campaign, which consists solely of a motocross biker riding his motorcycle through a desert and an anecdote that Huntsman headed a rock band in the 1970s. The only thing that tells you it's a political ad is the "Paid for by Jon Huntsman" tag at the very end. Not long after,
* The 2011 edition has France's Amaury Vassili and Ukraine's Mika Newton, whose

notes are primarily used at their songs' endings.
* The 2011 federal election was a bit less alarmist on all sides, as the Conservatives and NDP realized that they could both gain at the expense of the Liberals and the Bloc (which they did). As a result, it's a fair statement that this election had
* The 2011 Fukushima Daiichi nuclear disaster also meant that episode 26, or "Super Weapon R-1" (also known as "The 8,000 Megaton Mistake"), is banned from the Japanese airwaves due to a scene where the
* The 2011 Halloween event the simply packed with these. Death apparently joined up with Pestilence, War and Famine to form a clan, and held the event involving Beauty and Fame.
* the 2011 horror-short "Hellion", a babysitter who is turning into a zombie sings (to an already zombified small boy she is tending) altered lyrics to the tune of "Brahms' Lullaby." The altered lyrics "Lullaby, sweet baby mine / Soon we'll rise and soon we'll dine") lovingly promise the zombie child that, if he goes to sleep, he will awaken to a meal of his favorite foods: "Newborn cheeks and infant lips, /Toddler toes and fingertips, / Now you're of the living dead, / Go to sleep and rest your head."
* The 2011 Mackenzie Foy - AT&T commercial television commercial. In this commercial, the son and daughter are sitting in front of a TV and only one more show can be recorded. They decide which child is going to get it, and they pick why they choose, the father then asks to say which child they favor the most, and both pick the daughter, of course, neither child actually cares, but then the father says to give it to the son instead, because that is all he going to get.
* The 2011 newly revised version of Ithkuil has 45 consonants and 13 vowels, which is in between the 2004 version and Ilaksh.
* the 2011 prequel's memorable character. The solution was to contrast Russell's performance as an experienced, scruffy, alcoholic anti-social helicopter pilot with a young, less experienced but professional-minded female student of paleontology.
* The 2011 Thanksgiving special involved Kevin Swanson returning home and admitting he went AWOL from the army. Peter refers to him as a "regular Benedict Arnold Drummond". Cut to the producers hopelessly confused and looking for a tape of
* The 2011 "Thug Assassins" angle in the Urban Wrestling Federation, in which new champion Rasche Brown was knocked over and then shot by two unknown assailants. To make matters worse, Brown seemingly never appeared at any other pro wrestling event; he was essentially, unceremoniously, killed off.
* The 2012 anime adaptation plays into this trope more. While the second part (
* The 2012 BBC production then creates another moment killer out of that scene: after hiding Falstaff,
* The 2012 CGI short, "Daffy's Rhapsody", centers around Daffy trying to perform a play called
* The 2012 commercials for the Toyota Yaris are made to look like they had
* The 2012 contest has Albania's Rona Nishliu, whose note is as quite long,
* The 2012 English Premier League was won in the last match of the season by Manchester City over Manchester United with two goals in stoppage time. United needed to beat Sunderland to stand a chance of overcoming City in the final standings, while City faced Queens Park Rangers. Both matches were played simultaneously; United scored against Sunderland after twenty minutes, putting the pressure on City. City scored against QPR after 39 minutes, retaking the title provisionally. Then QPR equalised after half time and with sixteen minutes remaining sensationally went ahead, leaving City needing two goals to win the Premier League. They got the equaliser right on full time and had five minutes of stoppage time to get another. At the same time United vs. Sunderland finished 1-0 in United's favour, leaving United looking like the champions until City's Sergio Agüero fired in a winner close to the end of stoppage time. The goal is known as "93:20", the timestamp of the match where Aguero scored.
* The 2012 film adaptation, which specialized in such films back in the day, this isn't exactly surprising.

* The 2012 game subverts this: Kinetic weapons are still very effective, with such gems as the
* The 2012 NBA season, coming right out of a lockout, is now notorious for various injuries ultimately benching players from
* The 2012 NFL season saw a series of Bud Light commercials that celebrated fans with strange little traditions that they believe will improve their team's performance... set to "Superstition" from
* The 2012 NHL Winter Classic between the Philadelphia Flyers and the New York Rangers came down to a penalty shot. The Rangers had a 3-2 lead with just under 20 seconds remaining in regulation when the Flyers were awarded a penalty shot because a Ranger other than the goalkeeper had covered the puck in the goal crease (similar to the FIFA rule, except that the defender is not ejected, and a missed shot or save is dead). The Rangers' goalie made the save, and the Rangers held on to win the game.
* The 2012 Nobel prize for Medicine went to a scientist who did reverse adult, multipotent stem cells to pluripotent stem cells that can divide into any cell in the body - but not embryonic tissues, so they can't create a new human being anyway.
* the 2012 Olympics opening ceremony, and various in-laws are presented as an average British family.
* the 2012 reboot, you can use a number of these alongside alien surgery tables in a research project to speed up the wound recovery rate of your troops.
* The 2012 remake we don't get much info. However, since it is stated later by the Marines that the Russians occupy the whole Eastern Seaboard, it can be assumed Washington is part of it.
* The 2012 revival of the manga has three, two with the same leader,
* The 2012 San Diego Comic Con Batman panel where they handed out Owl masks to the audience proves
* the 2012 series Scenes, character traits, whole characters, and whole episodes have been taken from previous incarnations and given a fresh coat of paint. To name a few examples, we have:
* The 2012 UEFA Champions League Final. In the red corner, Bayern Munich, playing on home turf. In the blue corner, Chelsea, who had eliminated FC Barcelona, the reigning Champions, in the semifinals with virtually the last kick of the tie after being 2-0 down with ten men. With seven minutes remaining, Bayern breach the Chelsea defence to take the lead. However, with two minutes of normal time remaining, Chelsea equalise. The match goes to penalties, and with literally the last kick of the game, Didier Drogba scores with his penalty to win the final for Chelsea. He also scored the equaliser, and with his announced intention to leave Chelsea, his penalty was also the last kick for him as a Chelsea player.
* The 2012 vice presidential debate became known for Joe Biden giving these repeatedly when Paul Ryan was talking. There was even a
* The 2013 Boston Marathon was supposed to be just another Boston Marathon...except that terrorist bombings exploded there.
* The 2013 Denver Broncos arguably had the most prolific offense of all time, with quarterback
* The 2013 edition has Romania's Cezar Ouatu, whose note has an almost one minute length!
* The 2013 film had modern special effects to benefit from, and adds in things like Carrie knocking everyone down with a psychic shockwave, crushing one student in the bleachers, whipping Tina with floating cables and setting her on fire, and even flying out of the gym. There are also other scenes involving characters being levitated and thrown around by Carrie's powers.
* The 2013 Florida Gulf Coast Eagles. They became just the seventh 15-seed in tournament history to upset a 2-seed (Georgetown) in the Round of 64, then took it a step further than the previous six by upsetting 7-seed San Diego State to reach the Sweet 16.
* The 2013 stage musical for the change — though the latter is mentioned in passing in Violet's introductory song.

* The 2013 summer arc begins on the 21th of June; Summer Solstice / Midsummer - It's about Kings and/or Fae.
* The 2013 Wichita State Shockers, another lower-half-of-the-bracket, mid-major team that made the Final Four. They aren't
* The 2014 Brazilian presidential campaign was rife with this, especially on the side of incumbent President Dilma Rousseff as she ran for reelection. The primary target was the long-standing opposers of the center-left-wing PT (the President's party), the right-wing PSDB, who launched former Minas Gerais Governor Aécio Neves, but once PSB's Marina Silva started appearing neck-to-neck with Rousseff on polls, the President's marketing campaigns shifted their attacks on Marina instead, basically by attacking her inefficiency during the time she was Minister of Environment under Luiz Inácio Lula da Silva (Rousseff's predecessor, who is still seen by many as the main figurehead for PT). Marina's own indecisiveness about certain social matters didn't help her campaign, and she slipped down until she finished third place, behind Neves, and was left out of the electoral run-off. The run-off campaigns themselves were a festival of
* The 2014 edition of 'The Good Schools Guide' (an annually-published guide to schools in Britain) described Harrow School as being one of the best all-boys, all-boarding schools in Britain that it was hard to surpass. This becomes substantially less impressive when you discover that, including Harrow, there is a grand total of four all-boys, all-boarding schools in Britain (the others being Eton College, Radley College, and Winchester College).
* The 2014 Fantastic Four annual gave odd case where roles were reversed when
* The 2014 Football World Cup official poster provides a perfect example: vectorized graphics with a net outline made of a myriad of bright blue, orange, yellow, orange and green little Brazilian motives, all on a white background, which has Brazil's map shape. A textbook (and beautiful) example.
* The 2014 Green Bay Packers. Their season began by losing the Kickoff Game to the defending Super Bowl champion Seattle Seahawks at CenturyLink Field. Then come the NFC Championship Game, where they have one of the worst chokes in NFL playoff history and blow a 19-7 lead with two and a half minutes to go, and proceed to lose in overtime.
* The 2014 Maryland gubernatorial election started with Democratic incumbent Lieutenant Governor Anthony G. Brown running against Republican Larry Hogan. Brown had several major advantages out of the gate, he outraised Hogan by a 2-to-1 margin, had high-profile surrogates like Barack and Michelle Obama and Bill and Hillary Clinton traveling the state on his behalf, and stated he thought his victory in the heavily Democratic-leaning state would be "a little bit of a molehill".
* The 2014 New Bilibid Prison raids in the Philippines found prisoners luxuriating in carpeted rooms fitted with a 50-inch flat-screen television set, a split-type air conditioner, a home theater system, a sauna facility, a Jacuzzi whirlpool bath, a kitchen with a dining table, wireless Internet access, closed-circuit television cameras and monitors, routers and signal boosters and even
* The 2014 NFL preseason (in preseason play, most broadcasts are handled by the teams themselves rather than the usual NFL broadcasters) brought sponsored,
* The 2014 Nobel Prize in Physiology/Medicine was awarded to Drs. John O'Keefe, Edvard and May-Britt Moser for their discoveries of grid cells that constitute a positioning system in the brain. Simply put, they are neurons in the hippocampus that may in fact encode perception of Euclidean space and fire in surprisingly regular hexagonal patterns (technically the vertices of tesselating equilateral triangles).
* The 2014 sequel finally plays things straight, with Angela being one of the two only survivors when the virus outbreaks on a ship.
* The 2014 UEFA Champions League final. Minute 93. Atlético de Madrid are winning 1-0 against Real Madrid. Atleti fans are already savouring the title (which they have never won). Then, Real gets a corner kick... and Sergio Ramos heads it into Atleti's goal, literally tying the game in the last minute. The morale shock was so high that Real proceeded to curb-stomp Atleti in extra time to win 4-1.

* the 2014 version, which is set in the 2040s but filmed in 2013, cars don't seem to have changed all that much in 30 years and except for more advanced phones, super-advanced robotic arms, and robots being used in a military capacity, there's not much to indicate this is the future. Cars look very much the same as they did in 2013, and the same goes for guns.
* The 2014 World Cup pitted the two 2010 World Cup finalists, Spain and the Netherlands, together alongside Chile and Australia. One of the toughest groups in the competition indeed, but Spain being knocked out with one game remaining, after being demolished 5-1 by the Netherlands (who finished third) and being defeated by Chile, was unexpected. They did win their third game against the also-eliminated Australia, however.
* The 2015-01-25 daily illustration sitting there, looking at him smugly.
* The 2015 Canadian federal election involved a surprising number of jabs about hair, ranging from jokes about Stephen Harper's stylist to Tom Mulcair's beard, but the prize has to go to Justin Trudeau.
* The 2015 Carolina Panthers were one of only seven NFL teams in history to win 15 games in a regular season. Little is remembered about that season today except for a sullen press conference by quarterback Cam Newton following a 24-10 loss to the Broncos in Super Bowl 50 (which proved to be Peyton Manning's final game).
* The 2015 Felix Jaehn remix of OMI's "Cheerleader" is vastly more well-known than the 2012 original.
* The 2015 FIFA corruption case, aka FIFAGate, is perhaps one of the greatest examples of white-collar crime in current times. According with
* The 2015 film version has Michael Fassbender and Jack Reynor (Irish),
* The 2015 floods in Tbilisi, Georgia (the country) resulted in the escape of many animals from the zoo including crocodiles, hippos, bears, lions and a white tiger that hid in a warehouse and killed a workman when he opened the door the morning after.
* The 2015 Halloween cartoon "The House that Gave Sucky Tricks" is loaded with this. Homestar's haunted house has attractions like a handkerchief made to look like a ghost, a tennis racket decorated to look like a monster, a pile of "scary shoes" (not to be confused with the "spooky shoes"), and an incomplete jigsaw puzzle (which seems to actually scare the Cheat). Meanwhile, Strong Bad imagines up "St. Cadaverstump's Totally Not Just an Old Furniture Warehouse Morgue-tuary", with such attractions as the Horrible Painting of Somebody's Dad, a room that smells like "Strong Mad oyster-smoothie-breath-caked-armpit-latte", a crappy two-star bed-and-breakfast, and "the new face of terror, Large Bean!"
* The 2015 Miss Universe Pageant. At the end of the pageant host Steve Harvey accidentally labeled Ariadna Gutiérrez, Miss Columbia as the winner of the pageant. The real winner was Pia Wurtzbach, Miss Philippines. The mistake was corrected but not before Steve Harvey had to apologize for his mistake, and Gutiérrez was de-crowned on camera, all while the credits were rolling.
* the 2015 Muppets TV series, thinking that it wasn't true to the characters.
* The 2015 series finale, however, brought it up as a legitimate possibility for the first time in years, but didn't confirm or deny anything.
* The 2015 series has the Empirikul, an alien inquisition that view magic as a "corruption" and have some way of counteracting it. They've already killed several of Strange's counterparts in other dimensions, and are coming for him next.
* The 2015 video "Rock & Roll Preschool" is dedicated to Emma Watkins' nanna Edith Royal (who died the preceding year from a heart attack).
* The 2015 Winter Classic is up there, too. A well-contested matchup between the Blackhawks and Capitals was tied 2-2 in the second period and wasn't broken until 12.9 seconds to go in the game, when Troy Brouwer gets a rebound off a broken stick and fires home the game-winner for the Capitals.
* The 2016-17 UEFA Champions League Round of 16. FC Barcelona had lost to Paris Saint-Germain in the first leg by 4-0, which meant they had to win by 5 goals at least. They manage to score three goals in 50 minutes, but then Cavani scores again in minute 68 - which means they need three more goals. Neymar manages to score a free kick on minute 88, and then a penalty on 90. PSG tries to fortify itself...

but in the last minute, Neymar kicks the ball into the box and Sergi Roberto kicks it in, scoring the 6-1 Barça needed to offset their previous loss and go on to quarter-finals. This is the first time in UEFA Champions League/European Cup history that a team has overcome a 4-goal deficit from the first leg to progress to the next round.
* The 2016 ad "Benny & Lenny" by Great Clips starts with the dummy Lenny waking up alone on a stage in front of empty seats. He calls out for his partner, Benny, but Benny is nowhere to be found. Desperate yet determined, Lenny goes looking for him and finds him at Great Clips having just had his haircut. As the duo's look has always incorporated the both of them having an afro, Lenny faints upon realizing their act is over.
* The 2016 cartoon "Later That Night..." mainly focuses on the post-cartoon costume round-up, with only a few glimpses of the
* The 2016 Christmas season has an arc where Davan's neighbor, Mr. Gibson, asks Davan to put up some Christmas decorations but specifically asks that they not include Krampus.
* The 2016 Cleveland Browns were about to finish the season 0-16, without any wins or ties. But a
* The 2016 Detroit Lions won a surprising number of games this way, sometimes literally at the last minute; one hopes that Lions fans aren't
* The 2016 election campaign got ugly: with sites such as Americans Against Clinton and Trump President 4 Life jumping all over
* the 2016 game which has a more engaging story and puts an extra focus on fleshing out the series lore.
* The 2016 Handball European Championships. Germany was basically a bunch of nobodies from a country that just a few years prior had to be given a "wild card" to even make it to the world cup. They squeaked by in the first round (after a loss in the first round to Spain) and only made it to the semifinal with a lot of luck and dedication. The semifinal is another squeaker which gets them to the final... Against Spain... Cue a 24:17
* The 2016 NBA playoffs had two involving the Golden State Warriors: the Western Finals where in spite of the Oklahoma City Thunder opening 3-2, the "Dubs" still won the series (leading Kevin Durant to bail them for those same Warriors in search of a championship ring, reducing the Thunder from a title contender to just a good team); and the finals themselves, where in spite of opening a 3-1 advantage over the same Cleveland Cavaliers they beat the previous year, suffered an epic comeback by the
* The 2016 race was all set to be Toyota's first victory... until their lead car broke down just after starting what would have been its final lap, and the second-placed Porsche 919 came screaming past with three minutes left on the race clock. The Toyota began to slow halfway round its penultimate lap with a turbocharger problem so unexpected that the driver of the other Toyota thought it was slowing up for a team photo-op at the finish. With a minute's lead over the Porsche the Toyota still made it to the line first so had the problem risen only a lap later they would have still won.
* the 2016 reboot, Ben using Upgrade to power up the Omnitrix during his fight with Vilgax gives him access to Omni-Enhanced versions of his aliens.
* the 2016 reboot, Bliss was introduced as a Powerpuff Girl that was created before Blossom, Bubbles, and Buttercup were. Her powers were still in beta so she consigned herself to patrolling outer space while making occasional visits to the girls. She's now an official member of a galactic task force.
* The 2016 reboot episode "Escape from Monster Island" gives us Frederick, a rhino-looking monster the girls meet when they arrive on said island.
* The 2016 reboot series had no official confirmation of its cancellation after ending its third season in 2019. But with its dwindling ratings, failed toy line, and the characters no longer showing up in Cartoon Network's bumpers, along with the staff having moved on to other projects, viewers pretty much figured the reboot was done for good.
* The 2016 referendum on the UK’s membership in the European Union was

assumed by many to be an automatic win for the “remain” side, particularly as the majority of Government officials were championing this. It was something of a surprise therefore when the "leave" campaign won with a slim majority. This was partially due to people being so overconfident they would win they didn't bother to vote or deciding to "Protest Vote" against the Prime Minister by

* The 2016 remake as well. Much like its predecessors, the film makes no apologies for what a Testosterone fest it is. A group of grizzled, well trained killers and badasses doing what they do best: Killing bad guys.

* The 2016 series has the min-short "Run, Blossom, Run", in which Blossom trying to make it to school on time to protect her perfect attendance when she oversleeps, but is hindered by

* the 2016 series the strangeness that is aliens, mecha tech, superpowered beings and monsters is taken in stride (at least until they start causing havoc).

* The 2016 Syracuse Orange. Unlike the other members of this list save for the two sets of Tigers, the 10th-seeded Orange came from a major conference, and their run was at first seemingly a fluke of getting upsets to happen in front of them: 2-seed Michigan State, which was actually considered the favorite to win the region, was bounced in the first round by Middle Tennessee (the first 15-2 upset since FGCU's run), and Gonzaga, back in their old stomping grounds as a dark horse, reached the Sweet 16 as an 11-seed. Even their first opponent, 7-seed Dayton, wasn't from a major conference. Then they ran into the champion of

* The 2016 U.S. Senate election in Wisconsin featured incumbent Republican Senator Ron Johnson in a rematch with former Democratic Senator Russ Feingold, whom he had defeated in 2010. Johnson had low approval ratings, no Republican had won a senate race in Wisconsin in a presidential election year since Bob Kasten in 1980

* The 2016 World Series not only went to Game 7, it went to extra innings, along with a rain delay right after the ninth inning ended, just to add to the drama. However, it also averted

* The 2016 World Series. The Cleveland Indians had a commanding 3-1 lead over the Chicago Cubs after the first four games. One overenthusiastic Indians fan chose to tattoo himself with both the Indians and the

* The 2017 Army vs. Navy football game was played on a very snowy day in Philadelphia, leaving the field continuously covered in snow. The production crew must have changed the "greenscreen" effect of the play lines to white. This lead to the first down and line of scrimmage overlays to appear on the jerseys, gloves, and wrist tape of players.

* The 2017 Broadway version production goes further with this trope with both demises. Violet Beauregarde explodes offstage onto her dad and Veruca Salt gets dismembered and decapitated by squirrels. Wonka does mention Veruca could be put back together with a gluestick by the Oompa Loompas and Violet could be scooped out of the pulping pond before she ferments, but he still shows some apathy if they don't recover. This could be part of the reason of

* The 2017 cartoon "Haunted Photo Booth" featured a ghostly grinning face appearing in the pictures taken in a photo booth at Marzipan's Halloween party, and Strong Bad struggling to make the ghost appear in his pictures.

* The 2017 edition has Switzerland's Timebelle's leading singer, Runa, whose final note is so high that durated at least 29 seconds!

* The 2017 Gymnastics World Championships was plagued with such injuries, so much so that people started wondering whether there was something wrong with the venue and/or the organization of the event.

* The 2017 one, which featured Shadow, opened with Shadow introducing himself and mentioning that he's been searching for that fourth Chaos Emerald for some time now, referencing the "Where's that DAMN fourth Chaos Emerald?" meme from

* The 2017 reboot also moved away from the more fanservicey elements of the genre, with the new Witchblade wielder Alex Underwood's armor covering more of her body.

* the 2017 reboot series is imprisoned on an island named Falcon Island. When Louie takes over Scrooge's company, he shuts down the magical defenses of the island, unwittingly letting the monster loose.

* The 2017 reboot shifts this over to Gert as the team actually fell apart in between her death and her resurrection. It's lampshaded as she can't believe it happened because of her, claiming she was the "appendix" of the group. Both Nico and Chase claim that she wasn't the appendix — Chase was.
* The 2017 remake includes Kelpies (styled like My Little Pony characters, no less), which as to be expected want to drown the main characters.
* The 2017 series finally sheds some light on this; Molly's grandmother is a mutant and
* the 2017 series, Nico finally admits to herself that she has feelings for Karolina, retroactively making Karolina her Closet Key.
* The 2017 Unite the Right rally did get attention because of the presence of white supremacists and several violent clashes there. It was one single action there, a white supremacist killing a counter-protester and severely hurting many more with a vehicle ramming attack, that ultimately made the difference between a one-day-wonder and one of the biggest news stories of the year.
* The 2018-19 season of the show introduced a new logo and graphics package. However,
* The 2018 cartoon "Mr. Poofers Must Die!" features Homestar trying to tell a scary story where the adorable puppy Mr. Poofers is
* The 2018 Christmas special "Best Gift Ever" premiered on October 27th, 2018.
* The 2018 Division I Women's Final Four featured not one, not two, but
* The 2018 edition has Israel's Netta and Estonia's Elina Netšajeva.
* The 2018 Los Angeles Rams were led by Sean McVay, who at 33 years old was the league's youngest head coach, and his team put up a whopping 527 points in the regular season and an extra 56 points between their two playoff games against the Dallas Cowboys and New Orleans Saints. That made him the youngest coach to reach the Super Bowl, the team's first in 17 years, facing the team that defeated them last time at Super Bowl XXXVI, the Patriots. Despite sloppy play by both teams, the Patriots once again defeated them 13-3 at Super Bowl LIII, tying the lowest losing score with the Miami Dolphins at Super Bowl VI. It didn't help that during the NFC Championship Game against the Saints, the Rams were guilty of an overlooked pass-interference call, which made many people, especially Saints fans, feel that they didn't deserve to play in the Super Bowl.
* The 2018 NCAA Super Six team final for women's gymnastics came Down To The Last Routine for UCLA, who hadn't won a national championship in eight years and were up against the scoring machine that was the University of Oklahoma. In a moment that couldn't have fulfilled this trope any better if it was scripted by movie writers, the title came down to the very last routine for UCLA. Peng Peng Lee, a third-year senior
* The 2018 qualifiers had two: Italy, one of the most successful national teams in the history of the World Cup; and the United States, ending a streak of at least showing up since 1990.
* The 2018 Rally Turkey became this when more than a dozen competitors from top-level WRC drivers to support categories ended up
* the 2018 reboot of Charmed died at the conclusion of its third season.
* the 2018 reboot, so she decides to skip it since she can't leave her friends unprotected.
* The 2018 tournament was loaded with these... especially in the South Region, which we'll get to in a bit.
* The 2018 volume of Doctor Strange starts off with an arc where he seeks out alien sources of magic to help restart Earths recently destroyed sources. He encounters a handful of alien wizards, one of which who combines science with magic he takes on as a companion, and the two of them run afoul of a number of alien mages.
* The 2019 cartoon "The Homestar Runner Enters the Spooky Woods" has Strong Bad telling a story that
* The 2019 Cricket World Cup final went down to the final ball twice - first with England being bowled out on 241 runs on their very last ball, forcing a tie-break over, then again when New Zealand were only able to equal England's 15 tie break

runs, causing them to lose on the final decider (namely which side had the most boundaries hit during the game). Even on that final ball, it all came down litertally to one play: a run out of Martin Guptil by Jason Roy and Jos Buttler: a split-second throw to down the bails before Guptil could make the winning run. Nasser Hussain comments: "
* The 2019 edition has Australia's Kate-Miller Heidke and Czechia's Albert Cerny.
* The 2019 election was the culmination of a long period of scare campaigning against the Labour Party and specifically at its leader Jeremy Corbyn. This included allegations of institutional anti-semitism in the Labour Party; a big thing was made of a list of cases being investigated by police and the relevant authority which would no doubt all be substantiated.
* The 2019 Food Network game show "Supermarket Stakeout" has four cooks competing for $10,000 outside of a supermarket, with $500 to get groceries which must last three rounds. The catch? They can only get their groceries from people who'd already shopped in the market, and in the first round must "buy them blind" (which means they can't look inside the bags before buying them). If two or more people see a shopper, they can go into an Auction to see who can offer more.
* The 2019 "Minions Of The Masters" Event adds three giant bosses to the new Co-Op mode, but among them, The Star Devourer is arguably the worst. The Star Devourer is basically a giant star-riding Marie Poppo who has 75 HP, +1 Attack and -1 Defense, however, she comes with a passive that deals +1 damage for every 200 stars she has. She can also use cards to give her a boost. She's also accompanied by Big Poppo (Yep, she's back), who will hunt down other players and force them to fight her; Big Poppo doesn't deal damage, but she can steal stars from them depending on the force of her blows, and the stars go to her boss. The Star Devourer can also use cards to give her a boost: sometimes she steals stars from players who are at a certain distance from her or Big Poppo; there is a card that have the players pay stars when they want to use cards for one chapter; another one reduces all stats of the players to -1 for one battle, among other nasty tricks. So, you have to play smart and being lucky enough to dish out enough damage before she gets too strong because, as stated before, she deals +1 additional damage for every 200 stars she has in hand, and if she defeats all players or amasses 1000 stars, you lose.
* The 2019 Netflix redub for the TV series and original movies was voice directed by
* The 2019 Oscars prefaced the Best Animated Feature nominees with a variation on
* The 2019 series Valentine's Day special pairs Blast Off with Cosmos.
* The 2019 summer event "Summer Games" adds the Summer Beast, which is basically just a tanned QP in a swimsuit. Her base HP is only 5, which may sound pathetic and easy for Co-op boss standards, but there's a catch. She can revive up to
* The 2019 US Census Supreme Court lawsuit. The SCOTUS sidestepped the larger question of whether the US Census form can include a question about whether the taker is a citizen, ruling instead that the Commerce Secretary didn't go though the proper channels to include the citizenship question on the census form in this particular case.
* The 2019 Washington Nationals had perhaps one of the most improbable runs in MLB history. A perennially-cursed team that had yet to make even the National League Championship Series since their inception in 2005 (they had made the NLCS once as the Montreal Expos in 1981, but lost to the Dodgers), the Nationals had just lost their former MVP outfielder, Bryce Harper, in free agency. Their first 50 games saw them stumble out of the gate to a 19-31 record. But over the remaining games, the Nats went 74-31, clinching a wild card spot. There, they beat the Milwaukee Brewers on a clutch three-run single by Juan Soto, who proved to be a capable replacement for Harper. They went on to face the 106-win Dodgers, and despite an early 3-0 deficit in the winner-take-all Game 5, the Nationals rallied to tie the game with consecutive home runs off ''
* The 2019 Washington Nationals had this happen twice during their postseason run:
* The 2020 adaptation has a brief scene where Mr. Knightley slips his trousers off, with the camera lingering on his bare butt for a few seconds. This did not work in the UK, where it got a U despite the presence of “brief natural

nudity.”
* The 2020 anime was marketed as a remake of the 2006 anime, so a newcomer would be excused for thinking it was a good way to get started with the series. However, in the second episode the anime turns out to be a
* The 2020 Carolina Hurricanes had this happen during a regular season NHL game against the Toronto Maple Leafs after both of their goalies went down with injuries and they had to resort to the EBUG — Emergengy Back-Up Goalie — who was a
* The 2020 cartoon, "Halloween Hijinks" has the main cast just hang out in their costumes while they watch their teenage-selves from the
* The 2020 Coronavirus pandemic is this, as it has been primarily fatal to older adults (though younger ones have died too.) Young children, however, often do not show symptoms at all, or may only have mild ones.
* The 2020 cycle was expected to be another bloodbath for Republicans up and down the ballot, especially after the emergence of the
* The 2020 Electronic Entertainment Expo would have featured more involvement from influencers as well as unique "queuetainment" experiences, but these plans were effectively halted with the advent of the
* The 2020 live-action series mixes and matches plot arcs from the series. Nanno appears in episode 2, while in the manga he didn't appear until after
* The 2020 Olympics added a match tiebreak, first to 10 points (two point advantage still applying), to the doubles tournament to push it further into the trope. The women's bronze wasn't long, but stood out for the upset: the Russians who were Wimbledon finalists that same month opened 9-5, only for their Brazilians opponents to
* The 2020 PetCo logo received much scorn for removing the iconic blue cat and red dog in favor of a bland minimalist logo.
* The 2020 Presidential Election had two presumed winners with Bernie Sanders in the Democratic primaries and Donald Trump in the general election. In the end, Joe Biden won both to the surprise of many observors.
* the 2020 remake “Ms. Liu looks pretty, but she is afraid of being ugly, and she doesn’t dare to make facial expressions.”
* the 2020 remake latched on to this as proof of his culpability and exposed this to the public, which meant that everyone except his family blamed him as well.
* The 2020 revival introduces market specials involving vendors. The contestant has to ask a florist or a barista for an order and must take a time penalty until they are served for a cash bonus. This wouldn't be so bad if the employees didn't dawdle while completing the order, even with what the contestant needed
* The 2020 season started off better for the Steelers, as they began the season 11-0 thanks to strong defensive play and a promising rookie wide receiver in Chase Claypool and the return of longtime starting quarterback Ben Roethlisberger, resulting in the best start in franchise history. This did not go without criticism from outside fans, as the team was accused of being helped by officiating and having a somewhat weak schedule
* The 2021 edition has Israel's Eden Alene, which now holds Maja Blagdan (Croatia 1996)'s record.
* The 2021 Kids' Choice Awards contained an exclusive sneak preview of
* The 2040 remake had their own version of SkyNet in the form of Galatea.
* The 20 July Plot to assassinate Hitler led to a mid-war purge of high-ranking military officers that may have accelerated the Allied victory.
* The 2.0, obtained by repairing and improving the original, is more heavily armored and features even more weapons. This one gets destroyed when
* The 20 (or even 40) years does look quite a bit less impressive when later television shows reveals that the
* The '20s was when Broadway musicals as we know them first started to become popular, led by
* The 20th Anniversary edition gleefully abandons the concept. Discovering new aspects of the mundane world through science and marveling at new discoveries is considered a perfectly valid source of Glamour. Banality is described as a

hampering force on science, since it stifles all creativity, including scientific curiosity and technological innovation. The Technocracy is still a Banality-spewing wasteland, but that stems from their obsessive need to categorize and quantify, and destroy or ignore anything that doesn't fit in their pre-conceived categories, rather than their link to science.
* The 20th-anniversary edition of Werewolf updates Black Dog to the present day, with the company under the influence of a group of unknown horrors from beneath the Scandinavian ice (spoofing White Wolf's partnership with Icelandic company CCP).
* The 20th anniversary featured a week of comics set 20 years ago in strip time: Kevin was still married to Angelique (with a baby Lindesfarne) and Kell was pregnant with Rudy.
* The 20th Anniversary had an event for Week 1 which some of the most famous past quests. While fetching milk for a redo of the Chef's Assistant quest (the first and easiest quest in the game), they find out that they need to get a bucket...from the questgiver of One Small Favor. Thankfully for the player and player character's sanity, the chain is only four people long this time.
* The 20th anniversary of the company was marked with, among other things, the retrospective book
* The 20th anniversary special "Homestar Runner Goes For the Gold" had a smaller version of this happen when The Sneak cripples Mr. Bland.
* The 20th century is more than once referred to as "the stupid ages" by the cast. In one scene, Fry questions their criticism of the 20th century claiming it gave the world the light bulb and the steam engine amongst other inventions. It is duly pointed out to him that those inventions all came from the 19th century.
* The 20th century outlaw Nikola Šuhaj — at least according to the book
* The 20th Maine), each of the regimental commanders (a colonel) is represented by a named piece. While they are present primarily for command and control rules, the highest ratings go to Col. Joshua Lawrence Chamberlain of the 20th Maine (see under Real Life).
* The 20 Year Update made the jump from 3028, just after the 4th Succession War, to 3049, right before the Clan Invasion. The War of 3039 was presented as backstory.
* The 2.1 seems identical to the 2.0, making Mickey immediately suspect a copycat until he notices the one modification: a large yellow button that contains
* The 21 Sikhs. Twenty-one Sikh soldiers defending a small but vital outpost on the Indian border were faced with twenty thousand Pashtun tribesmen armed with rifles and heavy cannons, and all of them volunteered to stay. They staved off the enemy army for most of a day before being overwhelmed, killing an estimate of eight hundred enemy troops and warning the British army of the attack, giving them time to prepare a defense and counterattack. When the British Parliament heard of the battle, it resulted in a standing ovation, and September 12 is now considered an official holiday in India.
* The 21st Century Chronicles, powerful weapons, and devices for reconstructing past events by largely undetectable trace evidence. However, an even more advanced race arrived from another system and soundly defeated them, rendering Mars uninhabitable. Some of the survivors may have been taken as slaves, and others were forced to resettle to the neighboring planet, possibly becoming our ancestors.
* The 21st Century insurance company has a commercial with a mass of shopping carts being dropped onto two cars from overhead. The object is to illustrate how both cars get the same damage and repairs, but the 21st Century insurance owner pays less.
* The 2,200-year-old human Lazarus Long occasionally has problems with memory. He uses some hypnotic and mnemonic techniques to remove unneeded memories and index the important parts, but more than once he's woken up and started looking for a book he finished reading decades ago.
* The 22nd Amendment to the Constitution, which set terms limits on the presidency, has a unique grandfather clause. It specifically exempts the then-sitting president
* The 2-3 kilometer high primates known as Striders can generate a sound that

petrifies human flesh.
* The 23rd Bruttiam Regiment consists of 600 men (with almost no vehicles), and is expected to protect an entire star system of at least two planets.
* The 23rd of November, the date of the show's first broadcast, crops up a lot, especially in the
* The 23rd Tournament arc also makes a really big point of this trope: Krillin and Yamcha are absolutely
* the 24th century didn't seem to have openly gay people line appears in the final episode, according to transcripts.
* The 25th Annual Putnam County Spelling Bee: a few audience members are selected to compete in the eponymous bee. Most of the words they get are real, but these tend to be thrown out when the play needs to declare a spelling correct/incorrect regardless of the spelling the audience member attempts.
* The 25th Annual Putnam County Spelling Bee, Chip Tolentino washes out of the eponymous bee when he notices Leaf Coneybear's buxom older sister Marigold in the audience just as he is given the word "tittup." Predictably, he spells it with only one "t" and is disqualified.
* The 25th Annual Putnam County Spelling Bee gets an "unfortunate erection" in the middle of the titular bee. This being a musical, of course, he has a song about it.
* The 25th Annual Putnam County Spelling Bee have their moments, but Leaf and Olive are the most obvious examples.
* The 25th Annual Putnam County Spelling Bee: "I'm Not That Smart" (Leaf), "I Speak Six Languages" (Marcy) and "Woe Is Me" (Schwartzy).
* The 25th Annual Putnam County Spelling Bee is an airhead until he is asked to spell a word, at which point he turns into a scary blinking robot and gives the right answer.
* The 25th Annual Putnam County Spelling Bee moved to India for a "spiritual journey," leaving Olive with an emotionally (and in some productions, physically) abusive father.
* The 25th Annual Putnam County Spelling Bee often has his name mispronounced as "Barfy", and he is always quick to correct such instances.
* The 25th Annual Putnam County Spelling Bee, Olive Ostrovsky's mother abandoned her and her father, supposedly to live in an ashram in India. Olive's sorrow over this is highlighted in her second big number, "The I Love You Song".
* The 25th Annual Putnam County Spelling Bee, Olive's mother can't come to the Bee because she's on a nine-month spiritual retreat in India. It's not confirmed that it's an example of this trope, but the stated length of her absence, along with Olive mentioning that her father is really angry at her mother about something, is certainly suggestive.
* The 25th Annual Putnam County Spelling Bee opens with Rona winning the 3rd Annual Putnam County Spelling Bee, which is revealed to be a flashback as the adult Rona prepares to host the 25th Annual.
* The 25th Annual Putnam County Spelling Bee simply calls them "friends."
* The 25th Annual Putnam County Spelling Bee: Since the show presents itself as a real spelling bee, the performance takes place over a few hours, with a majority of it in real time.
* The 25th Annual Putnam County Spelling Bee. There's an acute accent.
* The 25th Annual Putnam County Spelling Bee when Chip gets to the...climax of the song "My Unfortunate Erection" he pops a bag (or bags?) he's holding.
* The 25th Ward has the Okiai syndicate, which Tsuki, the protagonist of "Matchmaker", was a former member of. Their resurrection after previously being thought to have been abolished by the police is a major plot point.
* The 26 letters of the alphabet are divided into four categories: vowels, 'low' sounds (the first seven consonants), 'middle' sounds (the middle seven consonants) and 'high' sounds (the last seven consonants). All Materials belong to one of the three sound ranges, based on the composition of their name. For example, a Material with two high sounds and one low sounds would be 'high'. This leads to a form of
* The 26th Royal Tyran Infantry, or "Two-Six RTI", which is the regiment that many of the main characters were part of, including

* The 27 Club, which includes any popular musician who dies at the age of 27, such as Jimi Hendrix, Janis Joplin, Jim Morrison, Kurt Cobain, and Amy Winehouse.
* The 27th volume has Vanessa trying to get water out of her left ear after a shower. She 'loses'
* The 28-year-old Himura Kenshin and the 17-year-old Kamiya Kaoru form the
* The 2904 could be considered the Cannonball meets the 24 Hours of Lemons. The 2904 in the name refers to both the distance from start to finish (New York to San Francisco) and the limit of how much the teams could spend. Said limit includes not just gas, meals, and speeding tickets, but also the car itself.
* The 2904 was a race whose name refers to both the projected distance and the $2904 budget the racing teams were allowed to spend on their journey from New York City to San Francisco. Said total budget includes not only gas, food, and speeding tickets, but also
* the 29th of February be of age until he's 84. As Mabel notes " It seems so long".
* The 29th season episode "Homer Is Where the Art Isn't" has a 1970s-style P.I. in the vein of
* The 2 cm height difference between America (5'9.6) and England tends to be exaggerated by both fanartists
* The 2C was equally used by the French in propaganda movies. B1-bis' advantage was that only Flak 88 used as Pak could destroy it; so was T-34 in 1941. Hence the German Blitzkrieg doctrine of not fighting tanks with tanks, but to retreat and lure enemy tanks into a trap by "Pak-Fronts" proved sensible. Only when they had to, in later war pretty much all the time, did the Germans use tanks against tanks.
* The 2D lineage has the curse with the even installments. While considered to be good, both
* The 2-D space problem also pops up in the background material about the
* the "2Evul4U!!" paragraph of this article, xe deconstructs it by saying that the bosses of evil organizations who do this will have to dispose of the bodies, cover up for the families of the executed members, and deal with members who desert for this reason.
* The 2-hour special "Trembling Metropolitan Police Headquarters: 12 Million Hostages" has several of these.
* The 2nd edition rulebook presents "Tips for Traitors" as an excerpt from a much larger in-universe document.
* The 2nd generation Rover 400 was being designed as an all-new car. Instead, financial troubles led to the final version being just a Honda Concerto with different badging.
* the 2nd half of the 1987-88 syndicated season Wheel began reserving the Free Spin (then a wedge on the wheel as opposed to the later token version) for the first round only and replacing it with a $200 wedge that was notable for using a much-thinner version of the Clarendon-like font used on the wheel wedges. This also created a bizarre wedge pattern in which there were two consecutive $200 spaces (one of regular font next to the off model example) with another $200 two spaces away. To the show's credit, they "upgraded" the off model $200 wedge, increasing its value to $300 for the following season. Said wedge lasted until the week after the Free Spin wedge was retired the season after that, replacing it with an on-model $500 wedge.
* The 2nd Mizukage has also been revealed to be a Master of Illusion in his fight against the Allied Shinobi Forces. After his clam creates mirages (which are a type of illusion that is specifically
* The 2nd Runner, as after seeing what Jehuty is capable of with a trained pilot in control, we realize exactly how little of the mecha's capabilities its first young pilot was able to make use of. It really was using only its most basic features, assisted by the AI; it wasn't just a handwave after all.
* The 2nd Runner, does the exact same thing, although Jehuty was in a container in Calypso rather than in a military base.
* The 2nd season episode "Dead Stop" involving an unmanned space station that repairs ships,
* The 2nd Season Finale could count as a example for the show itself.

* The 2nd season gets a little more complicated. Episodes are divided into "Dividual", "Individual", and "Dual" episodes. Dividual episodes seem to be like Stand Alone episodes, except all of them have some minor detail that becomes more important later on. All three episode types cover three different angles to an overarching storyline that eventually unfolds.
* The 2 player mode is cruel enough to force both players to restart a section if either one runs out of lives. Most of the time, the surviving player will be low on lives and be the one to run out next time.
* The "2spooky" and acting like they are the most horrifying thing in the world.
* The 2 Tone label was very influential on British new wave music and the second wave of ska in particular, but its time in the sun lasted barely two years, from mid-1979 to mid-1981, and the label's aversion to long-term deals meant that its two biggest names (apart from founders The Specials), Madness and The Beat, each jumped ship after one single apiece. There was a long slow decline ahead of it, but the label's days as a major cultural force ended when The Specials fell apart in the summer of 1981.
* The 300lbs Giant Bernard and especially the 500 lbs Big Daddy Voodoo in
* The 300th episode had a burglar swallow a roll of film she and her accomplice were sent to steal. Unfortunately, her stomach acid reacts lethally with the chemicals of the film.
* The 3.0 and 3.5 versions of the Dungeon Master's Guide have a barbarian opening a chest as an example of how damage to objects works. The 3.0 version even calls it "the barbarian way".
* The 30 Foot Bride Of Candy Rock, the titular character (Lou Costello)'s young bride (Dorothy Provine) turns into a giantess after being exposed to radiation.
* "The 30% Iron Chef": After Bender wins a cooking competition using drops from a crystal flask filled with "the essence of pure flavor", Professor Farnsworth runs a chemical analysis and announces the mystery liquid is "
* The '30s and reflect on the English being used, both in terms of pronunciation and vocabulary. A generation ago, linguists listened to German as spoken in the West and the East and speculated that the political, social and economic divisions between the two Germanies was provoking the same sort of divergence. Unification appears to have solved this one.
* The '30s. Authoritarianism (both nationalist and socialist currents) becomes popular and strongman leaders are elected into power in several countries, with many analysts showing deep concern about the future of liberal democracy. A British royal marries an American divorcée.
* The 30-second commercial "Sounds" shows a montage of the products of U.S. defense contractor Northrop Grumman being assembled and used rhythmically building up over the course of the commercial until 22 seconds in it cuts to an
* The '30s (emergence of early teen culture; big hair in the case of the 1960s).
* The '30s has a male Federal Agent Jean De Wolfe standing in for the female Captain Jean DeWolff in mainstream continuity.
* the 30th anniversary of title centered around commanding an army of Luigis were released.
* The 30th anniversary was marked with the two-plus week run of a choral concert of Cirque music performed in Montreal's Saint-Jean-Baptiste Church and the photo book
* The 30-year-old tradition of sports champions visiting the White House was broken when a handful of players for the New England Patriots refused to visit Trump, while the Golden State Warriors decided to boycott the President altogether (although he had withdrawn his invitation beforehand), a move supported by the NBA.
* The ಠ_ಠ emoticon. Failing that, sometimes the classic :/ qualifies too.
* The 32nd issue has Mystique pretend to be wounded to lure Rom into a trap.
* The 32 piano sonatas include numerous masterworks, some of them framing and overshadowing hidden gems.
* The 332nd Fighter Group of the US Air Force, aka "Tuskegee Airmen", named after its initial home at Tuskegee, Alabama, and famous for being the first African-

American fighter squadron.
* The 3*3 rig check (three-ring release, straps and handles) on skydiving. The check comes
* The 33, where in spite of being about Chilean miners who got trapped after a collapse, only two actors are from the country (meanwhile there are Americans, Colombians, Mexicans, a Frenchwoman and a Brazilian).
* The 3.5 edition spell Reincarnation has a good chance of bringing the reincarnated character back as something other than what they were before. The consequences of bringing an elf back as a dwarf (or vice versa) would be quite silly, though. This has also been used to create horror, such as when the elf is reincarnated as an orc or a bugbear or something else which is simply terrifying to them.
* The 3.5 Edition supplement "Lords of Madness" describes aliens of forms various and sundry. These include: the Aboleth, hermaphrodite catfish/eel/squid spawn of the Far Realm with
* The 3.5 Miniatures Handbook introduced a "Warmage" class that was designed specifically to act as a
* The 3.5 splatbook "Complete Arcane" adds Anticipate Teleportation, a spell specifically to counter this strategy. Its duration is 24 hours, just like Mind Blank, but it's only 3rd level, because instead of giving the complete mental protection Mind Blank offers, it just warns you of an incoming teleport and holds the would-be ambusher for a round. The Greater version at 6th level gives
* The 365 Stupidest Things Ever Said calendar, a grocery store advertised "golden, ripe, boneless bananas."
* The 36 men's Grand Slam singles titles between the 2005 French Open and 2013 US Open were won by the Big Four...and Juan Martín del Potro (US Open, 2009).
* The 36. Waffen-SS Grenadier Division, "Dirlewanger". Dr. Oskar Dirlewanger was a Nazi mad political scientist and
* The 37 Basic Plots, According to a Screenwriter of the Silent-Film Era
* The 37th Age has a sea filled with 'dark currents'; when the seawater mixes with the freshwater that flows from the rivers of the one charted island, it releases a thick mist which the inhabitants worship as The Whiteness.
* The 37th gets a special Christmas-themed mission to save some sick children stranded at the North Pole. To do so, they have to fight their way through multiple ice-locked but still active enemy warships
* The 39 Clues after he shoots a Vesper at point-blank range. He's especially traumatized because up until this point, barring the Clue hunt a few years earlier, he's lived the sheltered, luxurious life of a teenage pop star and hasn't yet come to terms with all the violence that the conflict entails.
* The 39 Clues, Amy Cahill and Evan Tolliver's long-distance relationship (carried on mostly via phone) starts after Amy takes off on a series of missions around the world.
* The 39 Clues and her kids (although they aren't HALF as bad as Isabel).
* The 39 Clues come in groups of 7, and ironically the number 39 is completely meaningless.
* The 39 Clues, Dan Cahill happens to see the Holts, rival Clue hunters, in a TV report on the weather at Mt. Everest. Unfortunately, a Clue is hidden on Everest as well.
* The 39 Clues gets one of these after he begins work as a royal advisor. It has no special powers but adds to his menacing appearance.
* The 39 Clues influential person in the world. Anyone born before the 16th century is out, for starters, and while the Cahills try to get people to marry into the family, it doesn't always work; Rembrandt is a canonical example.
* The 39 Clues, it is said in one of the books that he doesn't "even like Natalie."
* The 39 Clues, Nellie is able to locate Amy and Dan by turning on the news, seeing where's there been some suspicious-sounding trouble, and heading directly to that location.
* The 39 Clues. Of special note are the members of the Lucian family branch, who prize power above all else. Surprise - the Lucians in the Clue hunt are generally

shown to be more willing to inflict serious and potentially fatal harm upon their competitors than anyone else.
* The 39 Clues says something to the effect of, "This is why you'll never have a girlfriend," he replies, "Like I'd want one!"
* The 39 Clues series, more than once to throw the other Cahills of the track.
* The 39 Clues's room in an abandoned Australian Mine. The walls had the words "Ring of Fire" carved all over, a Shakespeare quote, and a drawing of a volcano.
* The 39 Clues, which doesn't hint at anything) also has "coffee-colored" skin.
* The 39 Steps. In it, the main character is trying to evade police who are looking for him on a train. So he bursts into a woman's compartment and kisses her as the police look in, snicker, and go on. The woman then immediately turns him in to the police without hesitation.
* The 39 Steps in which it is commented that after being handcuffed together for most of the film, it makes sense for the male and female protagonists to marry.
* The 39 Steps is based on this premise. For example, after a particularly extravagant and long-winded series of costume changes, "Hannay the actor can't take any more" and exclaims "Oh just get on with it!!"
* The 3D Adventures of Sailor Moon thanks to the stiff, zombie-like animations. The fact that it's late 90s CGI does not help.
* The 3D entries released prior to the creation of the ESRB's E+10 rating (
* The 3D Maximum Impact Series take this further by having different protagonists, Alba and Soiree Meira.
* The 3DO version, which had a totally different soundtrack and even up'd the graphics with 3D and cleaner looking models. Those changes had earned complaints from fans.
* The 3DS and the Switch do support WPA2...but only the standard, "personal" variant of it that only asks for a password, not WPA2-Enterprise which requires a username along with a password, and the 3DS and Switch don't let you enter a username when trying to connect to wireless networks.
* the 3DS and Wii U editions has collectively sold nearly 10 million units), Shulk's version of the line has become much more well-known among the general gaming audience.
* The 3DS port was apparently designed with this type of run in mind, as in addition to tracking your high score, it also keeps a record of your
* The 3DS version includes the Fishing Hole. With all the kinds of fish that can be caught in both locations, it's not unheard of for players to spend all three days doing nothing but fish.
* The 3DS version of the game added the NPCs Morrie, the master of the Monster Arena, and Red, a female thief to the playable cast, bringing the number of playable characters up to 6, with 4 male and 2 female characters.
* The 3 Inches of Blood song "Wykydtron" describes this scenario. Humanity creates an artificial intelligence to command it's armies in intergalactic warfare. It then takes control of said armies and takes over the earth and thus forces humankind to nuke the planet back to the stone age from orbit.
* The 3 Little Pigs: The Movie, and duck out of sight when he walks by.
* The 3 Little Pigs: The Movie, and refuse to let their fight end, and continue attacking each other while stuffed into said cans.
* The 3 Little Pigs: The Movie: Big Boss has next to no respect for his sole employee, Aromé the skunk. Not only does he overwork her, but he also kicks her around almost whenever she’s near his feet.
* The 3 Little Pigs: The Movie, for ease of storage and transportation, all to improve his meat supplying business. According to Rublad’s comments, the machine also functions as an entire factory unto itself, capable of processing animals into individual cuts of meat, as well as more complex meat products like sausages and pies.
* The 3 Little Pigs: The Movie get along, and look out for the perfect opportunities to screw the other over in their dealings.
* The 3 Little Pigs: The Movie is a strange case, as while some shots are very well animated, the rest of the animation on the whole is pretty choppy and frequently

uses walk cycles, with well animated shots often sandwiched between what feels like shots done at 4 frames per second.
* The 3 Little Pigs: The Movie: Susette the mouse, Felix’s girlfriend, creates an offscreen diversion at the farmhouse so that Felix and the Pigs can sneak away before the butcher and the farmer realizes they are gone, with the latter freaking out at the sight of her.
* The 3 Little Pigs: The Movie, Throughout the film, characters occasionally look towards the audience and comment on the situation.
* The 3 Little Pigs: The Movie, Wally and Beemo have quite a talent for composing and performing awesome songs, but don't do much with it on account of their supreme aversion to hard work until around the middle of the film.
* The 3 Little Princesses mentions using cosmic duct tape to fix her observatory.
* The 3 Little Princesses was originally made in 2008. 10 years later, the creator began his work on parts 2 and 3 to celebrate the comic's 10th anniversary.
* The 3 Little Princesses when she accidentally pulls out the "Prank Cap Of Destiny", instead of the "Sleepover Cap Of Destiny", at the sleepover. Daisy is very unamused that Peach has pulled various cruel pranks on her.
* The 3 Little Princesses. With Rosalina it is certainly justified because she has no one else to help with the observatory. When Peach and Rosalina meet the latter isn't even wearing her typical dress, instead she's wearing a dirty mechanic uniform while fixing her observatory.
* The 3 naval heavy units have equivalent ranges and damage, despite one being a missile cruiser, one essentially the Yamato firing lasers instead of shells (and can ram enemy ships to sink them), and one an aircraft carrier (admittedly a scaled-down one that launches drones).
* The 3rd Birthday. Aya is using a machine to travel a year into the past, temporarily imposing over the physical presence of soldiers and civilians in the past; she can hop into another one at any time which lets her hop onto roofs or take over gun emplacements to use against the bizarre monsters plaguing the land.
* The 3rd Birthday, deals with a mutant outbreak that manifests in New York City.
* The 3rd Birthday features another one, although scaled down, that you get to use several times.
* The 3rd Birthday, the 25th Amendment is explicitly referred to in the Timeline files when Air Force One was destroyed by Twisted monsters on September 4, 2013, and the Vice-President took over the Presidency.
* The 3rd case of the 2nd game has Phoenix being rather impressed by Max's "ample bust". The statue kind, not that one...
* The 3rd Edition background information mentions that while many House Cawdor gangs ban women from taking up arms for the House, some women defy this prohibition and form their own all-female gangs. Just as the male gangs of the overly pious House style themselves after the Adeptus Custodes, the
* The 3rd Edition cleric lacks the finesse of the Rogue, the combat prowess of the Fighter, and the impressive offensive magic light show of the Wizard. Furthermore, it is expected to fill the thankless, inglorious task of healing and supporting the party. Most of the glory is vicarious, by allowing the party members to survive and do better at their respective jobs, but a party without a cleric is virtually hamstrung.
* The 3rd Edition Dungeon Master's Guide mentions a sliding staircase trap as a possible dungeon feature.
* The 3rd edition splatbook "The Slayers Guide to Dragons" gives us the new age category "Dracos Invictus". When dying, these dragons have death throes that cause 10D6 crush damage, variable explosive damage from 8D6 (white) to 14D10 (red/gold),
* The 3rd generation Ford Focus had a Mercury counterpart, called "Tracer", originally being developed alongside, but the 2010 discontinuation of the Mercury brand led to the cancellation of the Tracer.
* The 3rd-generation games teach visual braille while the player tries to unlock a set of legendary pokemon.
* The 3rd Terran mission involves this, where you must hold off the Zerg until rescue arrives.

* The 400 Blows: Once Antoine's parents learn that he's been skipping school, they decide to punish him in the most humiliating way imaginable to a preteen boy — by going down to school, storming into his classroom, slapping him in front of all his classmates, and letting him (and everyone else in the room) know, in no uncertain terms, that there's more to come once he gets home. They then leave him to stew in terror and suspense for the rest of the school day.
* The 400 Blows, with a candle, and a small curtain in front of it. This catches fire soon afterwards, getting Antoine into a lot of trouble.
* The 40K bash arc has the "Hyooman Empiyah" come into the galaxy in a fleet of
* The 40K universe is as much an inversion, as it is playing it straight. By the time 40k rolls around, Humanity had suffered a civilizational collapse some 15,000 years previously where the only technology maintained was either practical and necessary, or picked up by the Mechanicus which developed into a cult as the original source material for development and maintenance degraded and they needed a way to maintain the technology without losing the
* The 40s also see a civil war in Russia, where republican and regional nationalist forces rise up against the Tsar across the empire. Further complicating things are military forces in Siberia, while technically Tsarist loyalists, set up their own
* The '40s became an unlikely screen hero because of his gawky misfit clown persona and his quirly ukelele-based songs. (Technically, he played a banjolele or banjo uke.)
* The '40s but overnight seemed to have disappeared. So most likely, if they had simply continued spinning disinformation in the science-journals and phased out the science-fiction, they might have succeeded for a while longer in hiding the secret.
* The '40s stories by merging superhero adventure with aspects of romance, coming-of-age, science-fiction and horror.
* The '40s that revolves around the dark side of the art. Driven by the sociopolitical situation, there is a huge affection for Latin American music.
* The '40s, there was a prominent preacher and professor who used gloves that zapped lightning during his sermons, mostly as a response to the whole Science versus Religion debate.
* The '40s, two automobiles are often credited with inventing the sport-utility vehicle, or SUV, in its modern form.
* The '40s, when ownership fell to a revolving door of neo-fascist groups, it was a quarterly publication with a circulation of only seven thousand people. While it kept limping along until 1981, Maguire's editorial shift ended its status as a mainstream publication long before then.
* The '40s who watched her family fall apart following her brother's wartime death, culminating in her mother's breakdown, drunken endangerment of Beatrice in a car crash, and eventual lobotomy where Beatrice was told never to love anybody that much again. What little chance she had of recovering was crushed when her father callously burned her things in a fire and threatened to lobotomize her just like her mother if she ever cried or showed too much emotion again.
* The 40th anniversary had intermission videos explaining the history of the restaurant that showed classic videos related to the decade being covered. Of note was
* The 40th anniversary had to settle on-air with "40" (the highest number in the show's curriculum)
* The 40th anniversary show in 2015 featured a tribute to the show's deceased cast and crew, set to a sketch where an elderly
* The 40th anniversary special featured a lengthy tribute, presented by
* The 40th President Edward Cooper was shot in the head, which finally managed to kill him around thirty years later when he suffers from an aneurysm.
* The 40-woman 'Green Nuns'). Muammar claimed that the "Green Nuns" were formed to get the Libyan people to warm up to the idea of women in the armed forces. How much of that you believe is up to you. In the end, it turned out that they were less bodyguards and more a private harem mainly full of women who weren't there of their own free will - which might explain why none of them stayed around to protect him,

once things went south.
* The 40-Year-Old Virgin about never getting laid, he's made his peace with bachelorhood and got on with his life.
* The 40-Year-Old Virgin, as he was actually having his chest hairs ripped out.
* The 40-Year-Old Virgin, following their advice brings him nothing but trouble, and he finds happiness by remaining chaste until he eventually marries the love interest.
* The 40-Year-Old Virgin get away with all kinds of shenanigans, from continually harassing the Andy about his virginity, to skipping work to go speed-dating, to smashing fluorescent light bulbs on the loading dock. The one time we see someone actually disciplined (but not fired) is after he hooks up a video camera to the TV display feed and shoves it down his pants, but immediately after this the manager turns around and makes a rather creepy offer to "help" Andy with his virginity "problem".
* The 40-Year-Old Virgin has many of these, though it should be noted that a lot of them were in fact ad-libbed. Some of the deleted scenes shown on the DVD display this even more.
* The 40-Year-Old Virgin. It's in the title — the question is rather who the truly mature person is: Andy or his partying friends?
* The 40-Year-Old Virgin. It's then implied that he can use it (once it has shrunk back, presumably) to turn the pages of the newspaper he's reading.
* The 40-Year-Old Virgin. See page quote. It avoids many of the pitfalls of dealing with this trope by introducing a large and relatively well-developed supporting cast, all with their own hangups surrounding sex and/or relationships to work through.
* The 40-Year-Old Virgin: Subverted and gender-flipped. Trish has just gotten squicked out and jumped to some wrong conclusions about Andy and bolts out of his apartment. He chases her on his bike while she drives away. Unfortunately, he ends up accidentally hitting her car and flying through a double-sided billboard, so she gets out to see if she is okay, he tells her he's a virgin, and all is forgiven.
* The 40-Year-Old Virgin: The protagonist and his love interest decide to wait until they've had a certain number of dates before they... do it.
* The 40-Year-Old Virgin: "We're gonna need more wax!" followed by "Cancel all my appointments for this afternoon."
* The 40-Year-Old Virgin, what the main character is subjected to by his "friends" shows just how bad each of them are. The main character, however, is ultimately something of an aversion, as he's actually not that concerned with sex, being more interested in love, and is certainly a lot more mature and grown-up about it than most of the other people around him (including some of the women).
* The 40-Year-Old Virgin: when Paula, the store manager, reminisces about the time when she lost her virginity to a Hispanic boy, she remembers that he used to sing her a song, which he told her was a "traditional lullaby." Turns out that the lyrics are nowhere as romantic as she actually thinks they are. It translates to: "When I get to my room, I can't find anything. Where are you going in such a rush? To the soccer game."
* The 40-Year-Old Virgin. While Andy may fail at one night stands and short-term relationships compared with his more outgoing and lecherous coworkers, guess who's the first to sustain a healthy long-term relationship and get married?
* The 4/11/12 episode has Stephen giving a Marine civilian job training... as a television pundit, with a training montage of practicing which camera to talk at, jumping for the microphone,
* The 4.2m figure comes from researchers taking a figure from one street and multiplying it by how many streets there are in the UK as a whole. Many streets are probably un-monitored or not as tightly monitored as the average town's high street. It's the same way that one researcher investigating the so-called "Burning Times" came up with the vastly exaggerated number of people allegedly burnt for witchcraft, which was later revealed to be shoddy methodology as she took an extreme case as the basis for her calculations. Plus research suggests that it does cut crime, mostly by deterrence - even academics in favour of stricter controls

admit to that.
* The 4400 against him, causing the gas station where he worked to explode and kill him. Finally, Isabelle drives Daniel Armand insane after he cures Shawn's condition.
* The 4400), and a government conspiracy to both suppress and replicate 4400 powers. Overall it comes over as a fairly plausible set of reactions given the implausible circumstances and makes for an intense plot told from many perspectives.
* The 4400: A slight variation. In the two-part story "The Fifth Page" and "Mommy's Bosses", Kevin Burkhoff determines that the apparent disease afflicting the 4400 is not a disease at all but an unintended side effect of the promicin inhibitor that is given to them at their quarterly checkups. Promicin is a previously unknown neurotransmitter which gives the 4400 their abilities. The inhibitor builds up in the lymph nodes until it reaches toxic levels, severely damaging the immune system and ultimately resulting in death.
* The 4400 but the next episode "The New World" makes it clear that she lacks the corresponding emotional development. She has trouble grasping the concepts of good and evil.
* The 4400 canceled. The long-awaited elaboration of the fabled 'Future People' was half-answered very late in the show, but then about twice as many new questions cropped up. The cancellation then abruptly cut off any hope of the rest of it being resolved. Damn shame, really.
* The 4400 develops an ability that kills fifty perfect of the people he's within talking distance to and gives a unique magical ability to each of the remaining fifty. When he doesn't get to do that, the promicin (a fictional neurotransmitter in the show) builds up inside his body and causes him discomfort and eventually death. He begs his brother to kill him to put an end to his misery, which his brother eventually reluctantly accepts doing.
* The 4400 ends on a funeral for Danny and Susan Farrell, who had both died in the previous episodes. Most of the cast, including those who didn't even know them, were present.
* The 4400 episode "Trial by Fire": When the team finally catches the bad guy of the week, who had been blowing up members of the 4400, Tom Baldwin says to him "You are being arrested as a terrorist; you will be treated as an enemy combatant: you do NOT have the right to remain silent, you do NOT have the right to an attorney, and whatever you say will damn sure be used against you."
* The 4400 episode) where Tom wakes up in an alternate reality where the 4400 were never abducted. The only person who is also aware of the change is a woman named Alana, who does not know him yet everyone claims they are married. When they turn in for the night, Tom suggests a number of alternate places for him to sleep yet Alana suggests they share the bed to keep up appearances and because "it's a large bed. We can maintain our sectors."
* The 4400-esque worlds together with one person at a time, including changing the past, but there is a minor flaw in the worlds she creates that lead back to reality if they are found and the person she shared the dream with wants to go there.
* The 4400 from that scene: Joel Gretsch (Tom) was struggling with the zipper, and after the line "this will only be weird if we let it," complains "well, we won't, 'cause I can't get this thing up! (beat) The zipper." They both nod seriously for a moment and then crack up.
* The 4400: Grave Robbing: In "As Fate Would Have It", Jordan Collier's body vanishes from the 4400 Center immediately after his memorial service.
* The 4400 had Lily and Richard. When Richard was abducted, he was engaged to a woman named Lily. He was returned many years after her death, only to meet fellow abductee Lily—the original's granddaughter. The two fall in love and marry.
* The 4400 has NTAC (National Threat Assessment Command), a division of Homeland Security.
* The 4400 has the US governments National Threat Assessment Command (NTAC) which was pretty much completely redirected to handling issues caused by the 4400.
* The 4400: In "Daddy's Little Girl", Michael Ancelet developed total recall after

taking promicin. He is able to remember every detail of his life in perfect accuracy. However, the memories build up to such an extent that he feels as if his head will explode if he doesn't write them down. Michael's autobiography is already hundreds of page long and he has only gotten to the fourth grade.
* The 4400: In "Ghost in the Machine", Warren Trask gained the ability to control machines after taking promicin. This was not immediately apparent as he had a stroke which rendered him unable to speak or move before his powers manifested. However, Warren's mental faculties were unaffected. He managed to tap into the computers running his life support and spread a virus to every operating system developed by Ubient Software from ATMs and laptops to government mainframes and international banking databases. This had a severe effect on the global economy. Warren did so out of revenge as Ubient's CEO Drew Imroth stole the idea for the operating system Enzyme from him in the early 1980s and made billions while he received only $100,000 as part of an out of court settlement.
* The 4400: In "Gone, Part I", siblings Duncan and Olivia Germaine, who disappeared in 1964, have the ability to manipulate water and create diffusion. However, it only works if they do it together.
* The 4400. In "One of Us", it gained full control over its latest host. In the following episode "Ghost in the Machine", Diana and Meghan realized what had happened.
* The 4400: In "Terrible Swift Sword", Lewis Mesirow, who disappeared in 1955, has the ability to create a psychic link with another person through remote viewing. He uses it to locate Kevin Burkhoff and Tess Doerner for Jordan Collier.
* The 4400: In the fantasy world created by P.J. in "No Exit", a window shatters on its own and Shawn is impaled with dozens of glass shards, killing him instantly. However, considering that it is only a fantasy, he is alive and uninjured in reality.
* The 4400: In "The Gospel According to Collier", Jordan Collier saw a city surrounded by a wall 1,000 feet high during his visit to the future. In "Terrible Swift Sword", he reveals that it is the last city on Earth.
* The 4400: In "The New World", Philippa Bynes, who disappeared in 1994, has the ability to create light from her hands.
* The 4400: In "Trial by Fire", Glen and Dean Keating became domestic terrorists who targeted the 4400 after their sister Gayle was murdered (as seen in "Becoming"). They used firebombs to kill several members of the 4400, including Mary Deneville. Richard and Lily were two of their intended victims. They later tried to destroy Arcadia Estates but Tom and Diana stopped them.
* The 4400: In "Voices Carry", Gary Navarro, a baseball player who disappeared in 1973, is unable to cope with his telepathic powers. He hears every thought of every person around him and can't filter any of them out. As such, he becomes increasingly unstable. NTAC gives Gary an anti-psychotic drug called haloperidol which quietens the thoughts in his mind. However, when he is goes undercover in the 4400 Center, the drugs are confiscated and the voices return. Gary blows his cover when he bursts into Jordan Collier's office demanding the return of the haloperidol. In "The New World", Gary tells Diana that he eventually learned to control and harness his power and he now thinks of it in the same way as he does his other senses.
* The 4400: In "Wake-Up Call", Richard has a recurring nightmare in which he sees himself running through a forest shouting Isabelle's name. He realizes that it was a prophetic dream when Reverend Josiah and his sons Owen and Gabriel begin hunting him, Lily and Isabelle through a forest after learning that they are 4400s.
* The 4400: In "Weight of the World", Trent Appelbaum, a salesman who disappeared in 1989, discovers that his saliva is a catalyst for weight loss after his loan shark Dmitri Kazar lost 75 pounds within 48 hours of drinking from Trent's beer bottle. Dmitri then brings his wife Celeste to him so that she can lose weight. After she and Trent drink from the same water bottle, Celeste loses 23 pounds just as quickly. Trent sees the business potential in his ability as it could be used to wipe out obesity. Drandix Laboratories agrees to pay him $40 million for exclusive access to his ability. However, the Kazars both die of starvation. NTAC determines

that there is a protein in Trent's saliva that hyper-accelerates a person's metabolism, stimulating the brain to produce epinephrine and break down fat cells. As such, exposure to the saliva caused the Kazars to burn calories faster than they could take them in, and they starved to death in spite of the fact that they were eating everything that they could get their hands on.
* The 4400: In "White Light", the unborn Isabelle uses her abilities to injure Jordan Collier in such a way that Shawn is unable to completely heal him more than a year later.
* The 4400 is described as unpredictable — somebody injected with it will either gain a superpower or drop dead, and there is no way of predicting what that will be. When Shawn and Burkhoff start researching a way to predict whether someone will survive or not, Jordan Collier asks them to stop, as it will end up turning the world into those who have powers and those who know they will never get them. He prefers the more unpredictable way, as it just requires "one generation of sacrifice" and then the world can move on.
* The 4400? It is also worth noting he really was chosen to guide humanity by what are implied to be the closest thing to good guys from the future to save the world, and for all his sinisterness, the alternative is apparently worse in the long run.
* The 4400. It started with 4400 returned alien abductees, a few of which had superpowers. Then the government stops giving them superpower suppressant, and it turns out they ALL have superpowers. Then a scientist isolates the magical neurotransmitter behind it all, enabling him to synthesize a serum that can give ANYONE superpowers (though with a 50% risk of death). Then one guy, taking the serum, gains the power giving anyone around him superpowers (again, with a 50% risk of death for each person).
* The 4400 member of the 4400, emigrated to the United States in April 1994 using a false identity. His real name is Edwin Musinga and he is wanted by the Rwanda government for aiding and abetting the Tutsi genocide. Musinga was a Hutu who ran a clinic which primarily catered to Tutsis. The police approached him and asked if he would allow the clinic to be used as a safe house for the Tutsi. He agreed and the word quickly spread among the local Tutsi community. Within three hours, the clinic was full. However, unbeknownst to Musinga, it was a trap. The police returned and slaughtered the Tutsi. While Musinga did not kill anyone personally, he did nothing to prevent the massacre as he blamed the Tutsi for the Hutu President of Burundi Cyprien Ntaryamira's plane being shot down.
* The 4400: Not an in-show example, but in the season three bloopers, two scenes are put back-to-back to get this effect.
* The 4400 of the FBI, and a case of research failure. In subsequent seasons, it was renamed NTAC (National Threat Assessment Command) to correct this.
* The 4400 once did this to its title characters (all 4400 of them). In one episode, it appeared to do it (again) to all but one of them, but it turned out that it was really a dream world created by said character.
* The 4400 revolves around the mass release of "promicin" injections, which have a 50% chance of giving the recipient paranormal abilities, and a 50% chance of killing them outright.
* The 4400: Richard, who's Black, is the only man of color in the main cast.
* The 4400 shows the NTAC agents watching a news report on the Promicin plague. At one point, the scene cuts to the NTAC agents and later cuts back to show the reporter succumbing to the Promicin plague.
* The 4400 than just a sci-fi show". Because apparently, science fiction doesn't involve relationships, politics, or take on current issues.
* The 4400 that NTAC are on to him when she tells him that Meghan has been coming over at night to talk to Diana all week.
* The 4400, the faction led by Jordan Collier has a plan to inject every human being on Earth with promycin, the drug that has a 50/50 chance of giving a person a supernatural ability or killing them. Collier's goal is to create a new paradise of super-humans, despite the fact that this also means roughly 50% of the world's population will die. The future humans who sent back the original 4400 (with all the death and chaos many of them led to) and did everything in their power to keep

Collier around and, presumably, devise his plan, also apply given their stated goal of saving the world, no matter the bastardy things they have to do to achieve it. According to them, the alternative is worse than 50% dead, but it depends whether you believe them or not.
* The 4400 "The Great Leap Forward", the series' executive producer Ira Steven Behr makes a cameo appearance in a crowd scene.
* The 4400: The heroes aren't super, but they deal with those who are, not all of whom are bad.
* The 4400: The immune system deficiency created by the promicin inhibitor causes the abilities of the affected 4400s to stop working. In "Lockdown", Shawn is unable to heal a blind woman named Olivia Cohen. In "The Fifth Page", Maia tells him that she can't use her ability to see the future to find a solution. In the same episode, Alana is unable to distinguish between the real world and the world that she created for herself and Tom in "Life Interrupted".
* The 4400. The vast majority of characters had really, really cheap powers. This got really bad with Isabel. She had all possible abilities... and only really used one, telekinesis. Minor powers used include changing her eye color and making a pool warmer. Yet they kept saying she had many amazing powers. Somewhat compensated for by how original and cool many of these cheap powers were, such as a b-movie director who could see the events of the past exactly, so he figured out the Kennedy assassination and a powerful conspiracy... but channeled them solely into horrible, cheesy, low-budget films.
* The 4400. They were injected with Promicin, and the survivors of this made several appearances. However, they were "just" soldiers with superpowers, the latter of which is fairly common in this series, so they often got their asses kicked by 4400s or other P-positives.
* The 4400, those who've gained superpowers from exposure to promicin become immune to it. Normally though, exposure has a 50% chance of death.
* The 4400, what sort of supernatural power they had developed, and a problem they had created (either willingly or otherwise) that would be resolved by the end of the episode. As stated above, it could in this case perhaps be more accurately called something like 'Freak of the Week', as the people in focus weren't always deliberately antagonistic.
* The 4400 when she learns from Marco that her sister April took promicin and has gone missing.
* The 4400 where the show starts off with an event (4400 missing persons who disappeared over a span of 60 years suddenly reappearing, not a day older than when they left, in a ball of light near Seattle) so spectacular and public that not even the most skeptical can deny what has happened, yet everyone remains fairly skeptical about what caused it and what it means until the plot shows up to answer some questions.
* The 4400, while members of the anti-promicin conspiracy known as The Marked were sent back by a different future faction to thwart them.
* The 4-4-2 formation was dominant during the 90s and early 2000s, with three flat lines comprising four defenders, four midfielders (two of which being wingers who roam the flanks) and two strikers (often a big man and short man combination) this became the default for many teams and became synonymous with English football, becoming the title of a popular magazine, as well as being referenced in the film
* The 442nd were renowned for a truly absurd amount of bravery. They finished the war with more decorations per capita than any unit in American history. Among the awards was an astounding 21 Medals of Honor, one awarded posthumously in 1946 and 20 awarded over 50 years later in 2000.
* The 444th's AWACS "Bandog" invokes this on one mission: There's a certain pilot who's gotten his hands on some secure Osean intel, the kind that gets entire squadrons executed for viewing without authorization. This would be all well and good if he could just keep a low profile about it, but then he goes and implicates his
* The '44 Warsaw Uprising has its own radio station, as you can read in
* The 46th season premiere "Weekend Update" segment ended with a tribute to

Supreme Court Justice Ruth Bader Ginsburg with cast member Kate McKinnon dressed as her and a card with her signature lace collar and glasses with the words "Rest In Power" superimposed.
* The 47 Ronin. The 47th, Terasaka Kichiemon, was sent to inform their deceased master's former retainers that their revenge had been complete; he was pardoned and lived to the age of 78.
* The 47 Ronin was told to bring word of their successful raid to Ako. After the other 46 committed suicide he alone was pardoned by the emperor. When he died at the very old age of 87 he was buried with the others.
* The 4Kids dub did this frequently, especially in the early episodes of Season 1.
* The 4th bestiary includes the Spawn of Yog-Sothoth mentioned above as a monster-type, and notes that some of Yog-Sothoth's half-mortal children take more after their humanoid parents, becoming aberrant bloodline sorcerers instead. A later adventure gives stats for the Scion of Yog-Sothoth which is like the spawn, but can pass for humanoid (assuming they conceal their tentacles).
* The 4th edition deliberately made in an attempt to fix previous problems, largely by rewriting the whole system from scratch. Whilst fans of the edition generally agreed that their attempts succeeded, the fact it was such a strongly polarizing edition made many fans refuse to even look at what it'd done, and that resulted in a lot of these changes being abandoned for 5th edition.
* The 4th Edition introduces hideous monsters called banderhobs who kidnap mortals, some of them actually taking children from their bed at night. (The illustration for the creature in the
* The 4th Edition metagame was, for a while, dominated by the Tau instead due to the infamous Fish of Fury tactic.
* The 4th Edition sidestep the question of 'what happens to a person after they die' by stating that the deceased goes to the unknowable afterlife, beyond the reach of gods or devils. Not even the goddess of death know, as she only runs the
* The 4th Edition takes it a step further. After the Crash 2.0, almost any sufficiently complex computer system has the very rare potential to spawn an AI, and truly sapient artificial intelligence mostly arises naturally. And did we mention that everything has an operating system in it these days? Teaching the toaster love, indeed. One splat book actually includes rules for playing as them.
* The 4th Edition took this to its logical extreme with the Heart of the Abyss; a shard of
* The 4th Era Dominion, its third incarnation, is led by the extremist
* The "4U City" arcs did this as well, as Riff is the only major character present for them aside from all the alternate reality versions of other characters. The entire arc took place over several years, started and stopped randomly to return to the antics of Torg and Co. in the prime universe, and was particularly annoying since it not only kept Riff out of the main plotline for all this time but also
* The 5000 Fingers of Dr. T, and it's exactly what you'd expect from him.
* The 500 Hats of Bartholomew Cubbins): Cubbins' hat contains an identical hat. Removing the second hat reveals a third hat, which also looks exactly the same. Starting at hat 451, the hats actually get bigger.
* The 500 Hats of Bartholomew Cubbins, the main character is sentenced to death for not being able to take his hat off in the King Derwin's presence (a new hat appears on his head every time he takes his old one off). But because the executioner refuses to kill anyone that's still wearing a hat, he has to let Bartholomew go.
* The 501-503 Construction Project in Russia. This was intended to be a railroad from North Urals to Igarka near Yenisei's mouth. A part of this railroad was built in Stalin's times using gulag inmate labor, but work stopped when Stalin died. For several decades the rails just sat there in the tundra, unused. Then part of the railroad was disassembled, and part reclaimed by
* The 501st Legion, a group of Stormtooper and Bounty Hunter cosplayers who make publicity appearances for Star Wars-related events, were hired as extras for some scenes in
* (the 501st, that still includes many Clones that served under Anakin, and the First Legion, who recruits entirely from the 501st).

* The '50s, although the same decade would see a shift in action/adventure films into flashier combat sequences that became incompatible with the claustrophobic nature of these films.
* The '50s, and criticizing baby boomers for (as he claimed) destroying what was good about that era. Many critics of his speech suggested he bungled it by reemphasizing his old age (he was 72, Clinton was 50 in '96) and by not sufficiently considering the fact for many minority groups, the 1950s were a time of rampant racial segregation, bigotry, and discrimination (he did mention the reality of how bad racial relations were in the '50s, but seemed to downplay the importance of desegregation). This glory days speech was cited by some post-election as playing a key role in his loss to Bill Clinton, who easily won reelection.
* The '50s and early '60s hot rod culture favored the term "kustom", particularly in George Barris' Kustom Kars (Barris is famous for many awesome TV Kars, including
* The '50s, and SCIENCE! A rather affectionate, if not parodied, nostalgic setting.
* The '50s); and the 1963 Chrysler Turbine Car—powered, per its name, by a spinning turbine instead of reciprocating pistons—had rotary and jet-propulsion motifs, even if nonfunctional, built into its design.
* The '50s, a state of affairs that would last for the next twenty or thirty years.
* The 50's attitude towards radiation is perhaps best personified in
* The '50s, because they had only bought the moulds - copyright in the TV show names remained with the TV producers who had only licensed the rights to Airfix.
* The '50s, but it has many elements of one, including ice cream/root beer floats and nostalgic black-and-white photos on the walls. The motif is broken a little at co-branded locations as the design elements have to share space with boating materials (Long John Silvers) or pictures of Colonel Sanders.
* The '50s, eventually ballooned out of control under Brezhnev and his successors, becoming one of the factors behind the eventual downfall and dissolution of the USSR.
* The '50s— but many of the "labor-saving devices" never really caught on, except the blender and food processor. What's more, better understanding of nutrition and human physiognomy makes food pills impractical (some basic nutrients will always require a larger-than-pill mass, and human gastric stretch receptors, which help indicate fullness, wouldn't be triggered by itty-bitty pills).
* The '50s (mostly as a subversion of postwar American prosperity, but likelier to be played straight in war-devastated Europe)
* The '50s. On the one hand, his life ambition is to become an aerospace engineer. On the other, he's a recent high school graduate who has a summer job as a soda jerk at the local pharmacy.
* The '50s, R&B songs by black performers were not played on mainstream pop stations unless they were covered by white artists, because racism. However, this all changed in 1957, when a New York City disc jockey named Alan Freed invented a new type of music format called Top 40, which played all types and genres of music, as long as it was selling well.
* The '50s setting, nuclear family casts and plots that focus on family angst, frustrated desire, adultery and bad marriages:
* The '50s suggests "trapped in the fifties" Mum and Dad are actually the current Dennis's Dad's parents, but don't think about it too hard.)
* The '50s) that didn't reach the summit: "The Race Is On" (#3; see also Sawyer Brown below), "A Good Year for the Roses" (#2), "Tennessee Whiskey" (#2; see also Chris Stapleton, above); Who's Gonna Fill Their Shoes" (#3), and "The One I Loved Back Then (The Corvette Song)" (#3).
* The '50s, the KGB waited until the A4 unit had knocked off for the weekend, then arranged for Maclean (along with Guy Burgess) to do a flit from Maclean's rural home to the midnight ferry across the English Channel. By the time the alert was given on Monday, they were already in Moscow.
* The '50s. The scandal blew up in 1958 when contestant Herb Stempel revealed that he had been ordered by the producers to lose against Charles van Doren, and the resulting Congressional investigations destroyed the genre's credibility in the US

for over a decade.
* The '50s) they wouldn't be able to get the room despite being both consenting adults and/or it would have caused a scandal, and they wouldn't have been able to do it in either of their dorm rooms, like many modern college students do today.
* The '50s. This car wound up influencing the relaunched Mini Cooper and Fiat 500, both of which did the same with their vintage compact namesakes.
* The '50s to, dammit! And if the Yankees didn't win, then the Dodgers or the Giants probably did.
* The '50s was murdered by the Romanian communist regime via being scalded to death after his refusal to join a national Church under the thumb of the regime.
* The '50s were barely over (and in cultural terms, you could argue they weren't over yet) when the play was written (1960), so this might not be an example.
* The 50th aniversary issue included an insert which imagined what DWM would have looked like in 1964, celebrating a whole year of
* The 50th Anniversary celebration of the original Disneyland in California was particularly elaborate. The celebration included covering Sleeping Beauty Castle with tons of gold decorations, painting at least one vehicle on every single
* The 50th Anniversary mini-episode "The Last Battle" uses this with Arcadia's sky-trenches. The cameras and their accompanying sensors scan the skies...and then there's a blip. First comes one Dalek...
* The 51st ranked assassin from the second game reacts to being decapitated by waiting silently for several minutes before giving a speech.
* The 51st State beating up a skinhead with a golf club, and shouting "Stay down, bitch!"
* The 51st State, just fresh from graduating college with a degree in pharmacology, is pulled over by a patrolman and caught smoking marijuana. His arrest and conviction prevents his employment as a pharmacologist. Unable to work as a pharmacologist, he turns to a life of crime.
* The 51st State, Robert Carlyle's character Felix De Souza is a hardcore Liverpool supporter.
* The 51st State, the entire criminal organization that bought it was backwards enough to fall for it.
* The 5/23/21 strip begins with a content warning. "Something terrible" ruined Pig's whole day, and Rat and Goat ask Pig to try to talk about it with them. Pig sings the Kars 4 Kids
* The 53-second long elevator scene, where Asuka and Rei stand motionless in an elevator.
* The 55th episode was about Kokoro's Cocotamas throwing a Halloween party and inviting other Cocotamas to join the festivities.
* The 5★ uncap of some Story characters also changes their Charge Attack Animations
* "The 59th Street Bridge Song (Feelin' Groovy)" by Harper's Bizarre.
* The 5 Biggest Lies Everyone Tells About the Super Bowl" cites a Nielsen poll stating that the Super Bowl is not even among the top five alcoholidays despite that "football and beer go together like football and beer."
* The 5 Craziest Presidential Campaign Ads of All Time, with an ad campaign that equated casting a ballot for Putin with playing with his Tetris block, if you know what we mean. (We mean having sex with him.)"
* The 5 Creepiest Things Ever Done With a Fake Medical Degree: "A healthy booty is attractive to some people, but an ass that looks like Billy Barty with his ankle clamped in someone's asshole trapped in a net of yoga pants looks like exactly what I just described."
* The 5 May 1988 episode, the first to air after the death of Kenneth Williams a few weeks earlier (but which had been recorded before his death), was introduced by the Radio 4 continuity announcer as a tribute to his memory.
* The 5 million years AD segment has "Carakillers", a flightless terror bird-mimic evolved from South American caracara. In 2008, a flightless caracara from Pleistocene Jamaica was described.
* The 5 Most Popular Ways Statistics Are Used to Lie to You covers some fallacies

commonly used to lie with statistics.
* The 5 O'Clock news on CTV's Maritime affiliate ATV is essentially nothing but
* The 5 Shermans for one Tiger is actually just an Urban Legend, which stems from the fact that the smallest combat unit of tanks (a platoon) was 5 tanks. So you would need 5 Shermans for a Tiger because you wouldn't usually send less than 5 Shermans for a job, whether it was for taking out a machine gun nest or an isolated tank.
* The 5th ed fluff for the Gargoyle describes a siege on a heavily guarded fortress world by the Tyranids. The 'nids won because they sent in so many flyers that their corpses blocked laser cannons capable of punching through a moon.
* The 5th ed. Imperial Guard codex has a mention of a unit that died to a man in battle. The paperwork wasn't completed properly, and their leader was selected to lead a later attack. When they didn't show up, the entire unit was posthumously sentenced to death for desertion.
* The 5th Edition Chaos Chosen Star Player Gobbler Grimlich is a revolting mutant resembling a hybrid of human and toad with a massive mouth, a long, sticky tongue and elastic legs that allow him to move in great leaps.
* The 5th edition codex adds another layer of pureness, the Purifiers, who are considered even more incorruptible than their fellow brethren. And then there's their champion, Castellan Crowe, who's so pure that he carries around a
* The 5th Edition Grey Knights codex (which turned the faction into an overpowered force and had divisive lore decisions, to put it mildly) didn't quite
* The 5th edition spell Psychic Scream does this to killed enemies. Interestingly, the spell has no effect on enemies with an Intelligence of 2 or lower — a character Polymorphed into a low-intellect beast would escape damage, but a Druid using Wild Shape to morph into that same animal would not.
* The 5th Edition spells Summon Lesser Demons and Summon Greater Demon both require a vial of blood from a humanoid creature that was killed within the last 24 hours as a material component. As if the whole part where the spells are about summoning demons wasn't obvious enough about how evil the spells are.
* The 5th edition tried to do away with these imbalances as good as possible by removing all those hidden bonuses and also by bringing spells more on par with mundane skills. This means that casters have to raise their magic
* The 5th Edition Tyranid codex brings us the Swarmlord, a unique Hive Tyrant that the
* The 5th episode, "Dave and the Giant Pickle" ended with the credits having Larry-Boy (who is stuck to the camera) asking Bob for help.
* The 5th grade level of Boy Scouts is named the "Webelos". It was meant to be an abbreviation for "
* The 5th panel of a strip parodies body spray commercials' use of this.
* The 6000-SUX car is top of the list when a small time criminal demands a new car which has reclining leather seats, goes really fast and gets really shitty gas mileage. The commercial for the 6000 SUX specifically notes - 8.2 mpg!
* The 600th episode's couch gag rapidly cycles through a still frame of all previous couch gags, with an onscreen counter ticking up to 600.
* The 60-Minute Rerun episodes at 10:00pm Saturday nights (provided a sports telecast doesn't run over) starting with episodes from season 38 (2012-2013 season). In the 2014-15 in honor of the show's 40th season, one episode per week from each season will air with an hour-cut version in this timeslot.
* The '60s actually negotiated a new settlement and program by which writers and artists even when working-for-hire got some royalties and payments for their contributions, driven and inspired by the creators' rights movement.
* The '60s, a large amoeba in a tank that stares out at the scientists with a huge single eye.
* The 60's and 70's was one horrific incident in the United States after another:
* The '60s and Ho Chi Minh than Kruschev and other internal struggles. In France, during May '68, a number of young French leftists became fond of Mao and glorified the Cultural Revolution, much to their later regret.
* The '60s and later prime-time specials for the post-1948 material, renewing their

popularity among young people.
* The '60s, and the chitlin' circuit, Bruce made stand-up into the vehicle for edgy, boundary-pushing humor that it would come to be known for in the late 20th century.
* The '60s, and was the Soviet Union's standard weapon until the end of World War II. It was used for even longer as a specialist weapon (generally a sniper), and is still sometimes used by Russian police forces. Seventeen million of them have been made and exported, making them one of the cheapest high-powered weapons available.
* The 60s anti-war song One Tin Soldier tells of the Valley Folk who covet the great treasure of the Mountain Kingdom. The Kingdom are more than happy to share, but the Valley folk greedly want the whole stash, going to war with the Mountain and wiping them out. In the end, the tresure turns out to be
* The '60s, Avis was #2 in the car rental business (behind Hertz), and proudly advertised this with their slogan "We're #2, so we try harder." Until recently, they still used 'We Try Harder' as a slogan, though have dropped to third beneath Enterprise.
* The '60s, believed the best age for a soldier was thirteen to fifteen, because they obeyed orders more readily. Whenever he wanted more 'recruits', he just pulled up his truck at a local school and invited the children for a joyride.
* The '60s, but is ironically often used in nostalgic TV shows about the 1960s, even though it originally didn't reflect on that time period.
* The '60s, but it was just another unsuccessful folk-rock cover when originally released in 1967. Only when the National Conference of Christians and Jews used it in radio ads in 1969 did the song become a hit.
* The '60s, costing up to three times more than the real thing. It's a kind of an in-joke that Kojima loves.
* The '60s Cubans that opposed Fidel Castro and the communist government following Castro's overthrow of the Batista regime in 1959 have fled and now live overseas: there are now over a million Cuban-Americans (Cuba's population in 2012 was 11.1 million) living in the United States alone, the vast majority in and around Miami and Tampa. The exile community's hostility to the Cuban government and their importance in elections (Florida is considered a swing state and has many electoral votes) is a major reason for the United States' continued embargo against Cuba (though that doesn't stop the US from being Cuba's 5th largest exporter). Castro himself was an exile before that, released from prison in 1955 and spending about 18 months in Mexico.
* The '60s. Details are sketchy, but official gear includes a shepherd's crook, a helmet with a beanie-propeller on top, and flippers. This didn't stop some actual teams from briefly being formed. An excerpt from the rules:
* The '60s, expect them to find a play set in the Sixties so they can use it.
* The '60s for fun and profit. Or at least for profit. And, well, for the sake of the Cold War, itself one of these.
* The '60s gay tended to benefit from the sympathies and covert understanding of their fellows; political luminaries of the time, such as Lord George Brown (Labour), Jeremy Thorpe (Liberal) and one Prime Minister, Edward Heath (Conservative), were simply described using ambiguous terms such as "confirmed bachelor" and their gayness was accepted by the Establishment, which closed ranks around them.
* The '60s, generally grandpaternalistic or avuncular, and often content to remain in the background coming up with answers while the companions or guest characters handle the bulk of the plot. Usually takes a small gaggle of companions, usually a mixed-gender team. Usually apolitical - he'll break out lectures and he'll protect humans but he won't stick around to fix their long-term social problems. The heavy implication is that he's on the run from something, and stopping, or drawing too much attention to himself, would mean his doom - he stops to help people who are suffering because that's just what a gentleman should do. Occasionally untrustworthy due to his mercurial nature and mysterious motives.
* The '60s, Ira and Valerie still want to make the world a better place in their own way.

* The '60s issue had Peter try to negotiate steady (rather than freelance) employment out of J. Jonah Jameson so that he could afford to propose to his girlfriend. Neither the promotion nor the relationship ended up panning out, alas.
* The '60s, many younger humans (in warmer regions, at least) have started to wear the bare minimum of clothing, prefering Race-style bodypaint. In fact, some wear nothing at all. By the 21st century, it's common to show nudity on TV, and the most popular show on American TV is a gameshow where the assistant is a hot girl named Rita who wears Minoan-style clothing (i.e. fully-exposed breasts), and many women in the audience are also topless (and not all are covered in bodypaint). At the same time, the host of the show is a human-raised lizard named Donald who puts on bodypaint for the show that makes it look like he's wearing a formal suit.
* The '60s never ended, home to the Love Syndicate of Dreamworld and immortal teenage president Prez Rickard.
* The '60s rock band The Hassles recorded two low-key albums before disbanding. The bassist co-founded Ram Jam (
* The '60s sent the army to clamp down and protect the newly enfranchised African-Americans. The 1876 Presidential election led to the Republicans backing out and pulling its forces out of the South as a compromise to get their side in the White House, which immediately led to Jim Crow, electioneering violence, and the rise of lynchings in the South.
* The 60's standard "Wishin' and Hopin'", first recorded by Dusty Springfield, exhorts the listener to stop moping around and start changing yourself to get your man:
* The '60s, such that they were banned from many demolition derbies because the winner would inevitably be the person who brought an Imperial to demolish the competition.
* The '60s that makes people not notice it even if its apparent form isn't period-appropriate.
* The '60s), the basic idea of building sports cars and race cars around using aerodynamics to keep them glued to the road stuck, and has informed the design of high-performance vehicles ever since.
* The '60s. The other moon people are gone, though, their city in ruins.
* The '60s. The reason: his hair didn't fit BYU's grooming standards (the concert happened as scheduled).
* The '60s, there were several methods to ensure the intended song got radio airplay instead of the B-side:
* The '60s to escape the law but at this point, 40ish-year-old Homer would be far too young for this to make any sense now.
* The '60s turns on the windscreen wipers while attempting to start the car. Bob Newhart later said that he didn't intend to offend anyone with it, and if he had wanted to, he would have made the driver Chinese.
* The '60s was a literal political hit orchestrated by New Jersey Governer Nelson Rockefeller.
* The '60s were framed for a murder committed by the "creatures". Our heroes break out of jail and steal a police car. The girlfriend's influential father "takes care of everything" by having these charges dismissed.
* The '60s, who makes him singlehandedly responsible for starting the genre.
* The 6-11 year old KO runs into a phone booth to make a call. He says "What the heck is this thing?" towards the phone then pulls out his smartphone.
* The 61.5 and 66.5 omake chapters both end with Usui dry-humping his mattress after having two separate
* The 616 version of Rhino was also briefly replaced by a power-armour-wearing counterpart after he tries to go straight. When the New Rhino makes the mistake of killing Classic Rhino's new wife, he gets the match with his predecessor that he richly craves.
* The 616 version of the Rhino is a muscular thug in a suit resembling the hide of a rhinoceros. However, the
* The 63rd episode is the only one of the entire series in which the Warner siblings do not appear at all (outside of the opening sequence).

* The 64,000 Question of 64,000 sixpence (£1,600), later 64,000 shillings (£3,200), were worth considerably more in 1989 (at about £16,000 and £32,000) than the top prize of the then-new revival.
* The 6-4 who are badass consummate professionals and have a reputation for taking contracts for less money by working for the underdog in a conflict, in this case they are employed by The Militia.
* "The 6 Best Dresses At The Golden Globes," a slideshow featuring unfitting images of the war in Syria.
* "The 6 Most Horrific Lessons Ever Taught in Elementary School", where half of the six entries came out of Florida.
* The 6 Most Horrifying Product Recalls in China begins, "China has a population of all the people in China, and that is a hell of a lot."
* The 6 Most Mismatched Battles Ever Won by Underdogs relates victories by severely outnumbered forces in Persia, the Ottomans, Korea, Hungary, and the Mongols.
* The 6th Day: Adam Gibson teams up with his clone. They're mixing up some thermite and one of them decides to test-burn some of it. They watch as it burns through the table.
* The 6th Day: Adam's associate has an... interesting virtual companion.
* The 6th Day, clones are created by growing a "blank" and then overlaying the DNA of the intended subject onto it. In this manner, a clone of anyone can be made in under an hour.
* The 6th Day. Cloning humans is forbidden, but the antagonist has developed the technology along with brain backups and uploading in order to provide himself, and a few select minions, with effective immortality. However, the film itself contradicts this, as the clones are explicitly different people who share the same memories. At one point, the villain is still alive when his (defective) clone emerges, who doesn't even bother to wait to strip him of his clothes.
* The 6th Day features a way of making copies of a person mind that can be uploaded into clone bodies. Unfortunately as uploading is often done after death you get memories of dying.
* The 6th Day have been "GODDAMMIT SONOFABITCH!", something that her clone says as soon as it receives the previous iteration's full memories.
* The 6th Day in that flames vent from the sides of the handgun on firing, as waste gas from the chemical reaction is expelled.
* The 6th Day league which barely lasted its first season, but it's back circa 2020.
* The 6th Day rewinds the film to just at the point where Adam Gibson's syncording takes place right before the end credits.
* The 6th Day, taking place in the near future, Arnold's clone pays $447.16 for a cab ride which shouldn't have been a long trip for him. You can see the base cab fare is set at $200.
* The 6th Day, the mind scan used to imprint clones with their donors memories also works on corpses for a few hours after death. As well as imprinting clones, the recordings can also be reviewed via computer, seeing through the eyes of the donor.
* The 6th Day. The trope, subverted: There are many clones made in the movie that come back essentially the same, due to a combination of full-grown templates and memory extraction. One clone, however, keeps having a little Post Traumatic Stress from however it was he died (getting run over, neck broken, etc.). It's at least strongly implied that each revival has some copying decay – not much at once, but it adds up if you're in a violent business – independent of whether the recording was taken before or after the death trauma.
* The 6th Day, tobacco is an illicit substance, and Arnie's character enjoys an illicit puff on one of his trademark cigars.
* The 6th Day "wakes up" with a horrible neck pain and keeps rubbing it afterwards. A female Mook complains about having to pierce her ears again (not to mention the fact that she's also a virgin).
* The 6th Edition of the game added Pyromancy as a universal psychic power pool, as an option for many races that use psychic powers.
* The 6th game lets you upgrade the Technological Terror to the Anti-Bloon, which

has even stronger plasma cannons and an ability that can reduce Z.O.M.Gs from full health to their last degrade.
* The 6th season episode "Law and Boarder" ends with Castle and Beckett playing strip poker. At the end, the room is strewn with clothes, Beckett is
* The 6th Terran mission in has you rescuing a downed ship in the center of the map, surrounded by a ring of mountains. The game expects you, with your base in the east, to circle around clockwise to the west, taking you through the enemy bases on the way before you ascend the mountains around the ship and fight your way down to it. But if you put some units along the cliffs to the west and get sight up there with an air unit or a comsat sweep, they can kill a couple of anti-air turrets to create a safe landing zone for you to ferry them up there and fight a much shorter, much easier way to the ship. Alternatively, the downed ship has two worker units, some mechs and two bunkers defending it—destroying one of the bunkers gives you room to build a barracks, and you can fight your way out from the inside.
* The 700 Club, and the annual day-long CBN telethon were all stipulations when Pat Robertson sold the network in 1998). Has been hosted by Robertson since its inception.
* The 700 Club are universally despised by fans of virtually every other show on Freeform, which are considered the antithesis to everything Robertson stands for. The idea is that the continuing platforming of Robertson undercuts every progressive message their other shows are trying to promote. Fans do tend to take pride in the fact that network executives hate Robertson just as much as they do and have been trying to get rid of him for years.
* The 700 Club (no matter what lengths the network goes to get rid of him) because he thinks everything else on the channel is satanic and that they "need him".
* The 700 Club was a heavily conservative Christian talk show that did not fit in well with the later branding of the channel. Since they were legally required to continue airing the show, the channel put it on as late as they legally could and always aired a message prior to its airing, stressing that the content of the show did not represent the thoughts and beliefs of the station airing it.
* The 700th episode, "Manger Things", which takes place on Christmas, premiered on March 21, 2021, nearly three months after the Christmas season.
* The 70 Maxims of Maximally Effective Mercenaries, the published version is an annotated copy containing scholarly analysis of the Maxims. There was also an option for a defaced version, the copy given to General Tagon when he was a new recruit with handwritten commentary from a number of different characters.
* The '70s "Adventure Team" version of the franchise existed in an attempt to make the figures popular by changing them to standard Adventure/Fantasy scenarios (ninjas, explorers, outer space, etc.), rather than war or military themes, because America was really hurting after
* The '70s, a group of undercover officers on surveillance risked attracting hostile local attention when they were assumed to be members of a 'gay cult'. So several female officers where brought in, including one Sgt Julie Taylor whose name was eventually given to the operation.
* The '70s all rooted in survivalism. Needless to say, companies selling gold, canned foods, and guns and ammunition love this trend.
* The '70s all used the same layout or a mirrored copy. The games were often released together, which highlighted how recycled they were.
* The '70s, although the French Fry Goblins came earlier), an orange juice tree, Birdie the bird, and a host of other minor players.
* The '70s. Americans' obsession with the lingo even spawned the hit song "Convoy".
* The '70s, and was chased by a pimp when a banana peel he flung landed on the pimp. Later in the episode the Simpson family visits present-day (1997) New York City, and it is shown as being greatly improved, much cleaner and safer than the 70s flashback version.
* The '70sARP Instruments, on the other hand, succumbed to the consequences of trying to be ahead of everyone else and explore a new market at the same time by offering a synthesizer for guitarists. In 1974, the development of a monstrous polyphonic multi-section synthesizer named Centaur VI commenced. It bound all of

ARP's engineers and ate up pretty much the company's entire budget for a whole of two years during which ARP was unable to come up with anything new. At the end, they had two prototypes of a synth that would have been way too expensive even if mass-produced. Not only that, it would have been the first guitar synth, but the pickup failed to separate the signals from the six strings cleanly. Two years of development for nothing. Mind you, ARP was so far ahead of its time that they could have had a normal polysynth with patch memory ready for production in 1976, even before the Yamaha CS-80. ARP never fully recovered from this, also due to a few more bad decisions. By the end of the decade, they started developing a normal polysynth named Chroma to keep up with the likes of the CS-80 and the Prophet-5, but in 1981, when they were done, they didn't have any money anymore to build it and ceased their operations. The Chroma was eventually produced under the Rhodes flag.
* The '70s as a detective. The sole reason he kept a gasoline credit card was to break into buildings; he figured that the interest rates the corp. charged justified his using its card that way.
* The '70s as the main couple too often. That was so pervasive that years later a producer decided to reunite them in a soap, despite Bardina having been in retirement for two decades and Ferrer having pursued a successful career abroad.
* The '70s, as well as it's R-rated remake. The other "sort of" remake from 2002 referenced this by having one of the main villain's accomplices be a gas station worker.
* The '70s became a prolific, much-loved comedic actor and outshone the other Ace members.
* The '70s, before once again regaining it after her successor's demise.
* The '70s. Better technology and police resources along with the general decline of the use and transit of cash, along with the very heavy prison sentences associated have pushed criminals into less risky and more lucrative areas of criminal activity.
* The 70's continued this with the public just how corrupt a president could be when Richard Nixon was forced to resign in the Watergate Scandal due to a tape showing overwhelming proof that he had clearly committed obstruction of justice, and the brief hope of Jimmy Carter managing to turn the nation around would result in the 70's ending with an oil freeze that left the nation grappling with a massive energy crisis and crippled economy and a revolution in Iran that would result in a hostage crisis that would severely embarrass President Carter.
* The '70s courted controversy by seeking outside commercial sponsorship. The stuffier end of the sport deplored the fact his horses ended up with strange names. Imagine the BBC's plummy-voiced commentator intoning the following;
* The '70s doubtlessly inspire many other telethons across Latin America.
* The 70s dynasty of the "Steel Curtain" Pittsburgh Steelers is not only hard to follow for the franchise itself, but also for most teams in the NFL, even the ones that succeeded in creating
* The '70s for women's tennis, as its credibility as a legitimate sport was assured going forward.
* The '70s: Frosted Flakes, Froot Loops, Lucky Charms, Cookie Crisp, Cocoa Puffs...
* The '70s get more earthy and subdued makeovers during this decade. Crystal glass and mirrors find their way back into interior design.
* The '70s, guarding a threatened turf in Oslo from "development interests". A man trying to park his car is calmly stared down by the five women for almost sixty seconds, and decides to leave without discussion. CMOA if ever there was one.
* The '70s had very distinctive styles of dress (stereotypically skinheads and Doc Martens), the police could easily identify hooligans and contain them. Liverpool and Everton fans brought back European fashions and designer labels from their away games (as these teams were fairly consistently making the European championship games at that time), and their firms began wearing them to their games. Other fans initially laughed at this "poncey" new trend, until they realized that the Liverpudlian firms were never getting arrested because the police didn't immediately identify them. Soon, everyone was doing it, but for a time, the

football fans' Bling of War actually served to camouflage them rather than make them stand out.
* The '70s. He composed songs and wrote lyrics for even more, catering to artists like Christophe (whose big and often-covered hit "Les mots bleus" got lyrics from Jarre), Françoise Hardy, Patrick Juvet or Gérard Lenorman. He sometimes even produced albums for them.
* The '70s. He is all too familiar to anyone who attended a British school, of any kind, in the 1970s. A PE master with favourites among the sporty and who despises "the fat, sick, lame and lazy." (i.e., everyone else).
* The '70s in its lineup at various points. However, they never hit the Hot 100, and their highest-charting country hit only got to #16.
* The '70s in order to mitigate the effects of this 'soft' discrimination, but they haven't been without controversy.
* The '70s in which they drove the Volvo 760 off a fourteen-meter drop (about 45 feet) right onto its nose in order to demonstrate how safe it was.
* The '70s Irish song "The Fields of Athenry" is about a young man being sent to Australia for some combination of stealing food during the Potato Famine and rebelling against the British occupation (the song mentions both and it's unclear which was the primary factor; it's likely the speaker is a
* The '70s). It was struck down by the US Supreme Court the following year (Reno vs. ACLU), and another act with the same intent, the Child Online Protection Act of 1998, was blocked almost immediately after it was passed, and also later struck down by the Supreme Court.
* The '70s manga is from the early 70s, while the TV series is from the early 90s; the "Oniisama" Takehiko Henmi is seen writing his thesis in a typing machine in the manga, but he uses an early desktop computer (floppy disks included) in the anime.
* The '70s might have five or six bouts in its programme. While most were of the pre-arranged and choreographed variety, every so often grapple-fans would be treated to a completely unscripted bout, operating to classic Graeco-Roman rules, where some of the younger and more athletic performers on the card would be wrestling purely for the sport of it and completely for the competetive element. The winner would genuinely be the better wrestler in a "pure" bout.
* The '70s.) Now, the dish part of it can be barely larger than a dinner plate, thanks to digital TV making things much more efficient than the old analog dishes.
* The '70s. Occasionally scary due to his lack of connection with Earth and his emotional inhumanity.
* The '70s of Ann-Margret and the Bay City Rollers playing for an audience of senior citizens. (Around 1:09.)
* The '70s of having one side of a single aimed at the Pop market, and the other targeted at the Country audience, like with "Moody Blue" (Pop) and "She Thinks I Still Care" (Country), though the Pop side often ended up getting more airplay on Country radio anyway.
* The '70s of "punishing" someone by imprisoning him in a place he can walk out of at any time.
* The '70s of the planet through the development of new crops, with the number of people saved from starvation being estimated at ~1 billion. In fact, we have been so successful, now we need to educate people to not eat too much and to eat healthy.
* The '70s Peter doing just that, only for the beach to be filled with tourists enjoying themselves and lifeguards telling him not to run so fast; his narration then reveals he "stormed the beach" in 1958.
* The '70s. Played straight, the idea was that, due to its thickness, it poured slowly and was worth the wait.
* The '70s right-wing dictatorships of Latin America, like Pinochet's Chile.
* The '70s, showing it missing the last O, the first O having become a U due to damage, and the other letters all showing wear and tear, such that it looked like it said "Hullywo d".
* The '70s. The costumes here would very clearly go with the territory.
* The '70s theme. His switch from a drummer to a singer was a smooth one: In his

early days as a German rock singer, he accompanied himself on the drums.
* The '70s. The police always suspected that he was murdered but without a body they had no evidence to go on. Castle and Beckett reopen the case but the investigation is hindered by the fact that the main witness in the case had a mental breakdown and believes that he is still living in the '70s.
* The '70s there was a commercial for dishwashers set in a suburban kitchen that invoked this trope, with two housewife types standing on either side of the device in question as it made a hellacious din.
* The '70s, transistor radios lost most and eventually all of their market shares to (in chronological order) boomboxes, Walkmans, portable CD players, MP3 players, and smartphones.
* The '70s, was dying of AIDS and asked the Hulk (at the time with Banner's intelligence) for a transfusion to keep him alive, like he had done for his cousin Jen. Hulk refused.
* The '70s was renamed "Black Leopard" in order to avoid being associated with the Black Panther revolutionary organization.
* The '70s when the generic "brand" first became popular, there was a parody "Generic Greeting Card". It looked like the standard generic style on the outside, reading GREETING CARD, and on the inside there was a list of checkoffs with boxes [Happy Birthday / Happy Anniversary / Congratulations / Hello / etc.]
* The '70s. While it is currently nowhere near its '90s peak, LeBron James has given the league enough buzz to rival football and baseball in national attention. The internet and exemplary talent from abroad like Dirk Nowitzki (who is easily the best known non-soccer team sport athlete in his native Germany) or the Argentine Manu Ginobili have also helped the NBA garner a significant international fanbase, helped by the fact basketball is far simpler than gridiron football and baseball, which have struggled to gain popularity outside the American influence sphere until recent years.
* The '70s would hand out "barefoot and pregnant" awards to politicians who referenced this trope.
* The '71 Challenger Chuck and Sarah use early in "Chuck Vs. the Colonel" is no less rugged. Although it
* The 7.1 magnitude earthquake that struck Christchurch, New Zealand, on September 4, 2010.
* The 747-400 variant is this for the 747 family. Since its launch in the late 80s, it has become the most successful 747 variant, outlasting its predecessors. Although more airlines are retiring that variant, including Delta and United, the 747-400 is still around, with British Airways being the largest operator. When the new 747-8 is launched, in spite of the success of its cargo variant, its passenger variant isn't as big of a hit as that of the 747-400.
* the 74th Hunger Games that he used to watch her walk home from school every day.
* The 75: During the First Quarter Quell, District 1's junior victors try to slip the senior victors (Brilliance and Essence) laxative laced drinks at breakfast in revenge for being forced to do all the work (plus a lot of other abuse they've had to put up with over the years). One of the tributes accidentally takes Brilliance's cup, but "seeing his tribute shit himself versus a tiny orphan from Six was a small price to pay for seeing Essence practically locked in the restroom the entire day."
* The 75, Kelso wins the 12th Hunger Games with a booby trap that kills a career tribute who comes after him as he eats, and then insists on finishing his meal before leaving the arena.
* The 75mm gun-armed Sherman, although not as powerful as the 76mm variant, was able to penetrate Tigers from flank and frontal shots during Soviet testing. Also, it fired a superior high explosive shell than the 76mm variant (due to the 76mm needing extra casing material to withstand higher velocity, and thus less HE filling. This makes the 75mm much more effective against enemy infantry). The "Sherman Jumbo" assault variant had additional armor but usually retained the 75mm gun (about 100 had the 76mm gun). In fact, the very first time Shermans got into a confrontation with a Tiger, seeing that their AP rounds were having no effect, the US tank platoon fighting the Tiger loaded HE rounds and fired at the Tiger until it

stopped fighting back; the Tiger crew were killed by the concussive force of the HE rounds.
* The 75th episode has Taco-Man play a game about himself, a 2006 parody of
* The 75: When Amandus Snow (a cousin and predecessor of the president for the main books) is assassinated, there are a lot of stunned (although hardly mournful) reactions, but at least one victor (a Career from District 2) whose suffered heavily under Amandus "squeals in delight."
* The 7/7 bombings in London (if you don't know, think about them as Britain's 9/11) are implied to have been instead the fight between the Mogadorians and Conrad. So it got blamed on terrorists.
* The 7 Basic ConflictsMan vs. Nature, Man vs. Man, Man vs. Himself, Man vs. God/Fate, Man vs. Society, Man & Woman, etc.
* The 7D and turned into a slug, and wails about how she's hideous. Grim implores the queen's magic mirror to tell her that isn't true, and so the mirror replies, "All right. You are the most beautiful slimy slug I've ever seen." Hildy is not comforted.
* The 7D (as Grim had become increasingly distant towards Hildy throughout his conquest) to return Grim to his normal, idiotic self.
* The 7D barring Dopey who cannot speak but uses whistles and other sounds to communicate, Bashful and Sleepy are the least talkative of the dwarves, Bashful due to his shy nature and Sleepy due to being asleep half the time, some episodes have one or both of them having a line or two or remaining silent throughout the whole cartoon.
* The 7D episode "Knick Knack Paddy Whack," the Glooms steal The Pearl of Wisdom, which will answer one question once its shell is opened. After a scuffle with the 7D, Grim finally gets the shell open and wonders where Hildy is, so she can ask her question. The pearl takes this as his question, answers it, and promptly closes again.
* The 7D, Happy has shades of this. For example, he thinks a yard sale means selling the yard itself.
* The 7D has done this with "Buckets" (which begins with the dwarves running out of a dark house in terror) and "Doing The 7D Dance" (which starts with Hildy and Grim about to send the 7D, Queen Delightful, Lord Starchbottom, Sir Yipsalot and Squire Peckington off into space on a rocket).
* The 7D has Hildy and Grim, married wizards who constantly cause trouble. While Hildy can be a bit spoiled, they both love each other.
* The 7D, Hildy Gloom has her eye on the largest diamond in the universe, the size of a small planet. She and her husband Grim try casting tractor beam spells to obtain it. At the end of the episode, it crushes their house.
* The 7D: In "The Jollywood Jam" Lord Starchbottom accidentally gives Queen Delightful his grocery list instead of her speech.
* The 7D of the dwarfs getting scared and jumping into Lord Starchbottom's arms. Happy thinks it's pretty fun.
* The 7D premiered on July 7, 2014. In other words, a show about the Seven Dwarfs was released on the seventh day of the seventh month.
* The "7 Dreams/Nightmares" collection has Logan, who shows up in Clover's and Bright Eyes' stories and saves both them and their families from monsters created by
* The 7D used this in the episode "Knick Knack Paddy Whack", when Grim asks Dopey (whose disguised as a salesman selling snails) if a cat got his tongue. Then he says it happened to him once, and it really hurt. Cut to Grim standing before Hildy, an orange tabby hanging from the end of his tongue, and him mumbling as such to Hildy.
* The 7D. When Goldilocks steals his hat, Bashful goes into a panic looking for something to cover his exposed face with and finds a lampshade.
* The 7D, when she gets excited over her latest evil scheme or something she likes, she even pronounced it as "Squee!" when she tells Queen Delightful that she will replace her wallpaper with a purple plaid color pattern.
* The 7D will often have a candle appear over her head when she gets an idea.

* The 7D with an unrequited crush on Queen Delightful, but he's too scared to admit his affections for her. He's also clingy around the Queen. In "Buckets", he offers to stay with Queen Delightful while passive-aggressively sending Lord Starchbottom off with the other dwarfs (although while they were gone, they didn't do anything except talk about who "Buckets" is). In "The Jollywood Games", he enters and wins a tournament in the hope that he can get a kiss from her (and he does, eventually, after she rejects his request). In "Free Teensy", he appears from behind her and she reacts with a stunned "Oh. Hello." He then declares, "She can't get enough of me."
* The 7 Most Badass Man vs. Beast Showdowns includes a man driving a bear away by kicking it in the face and a women driving away a hippo by hitting in the head with a stick.
* The 7pm Project regularly from 2006-2009 and having been a newsreader on radio for years before that.
* The 7th edition Warriors of Chaos rulebook tends to somewhat encourage keeping hero killing in mind when building an exalted hero or chaos lord since they can roll on the eye of the gods table and, likely, get stronger from it.
* The 7th Guest and entering a door that doesn't fit with the hallway outside, instead exiting from the kitchen's oven on the other end of the house.
* The 7th Guest booth and a pipe organ played by a skeleton. And per the game's overall strangeness, the front door is blocked off from inside.
* The 7th Guest can be found in Henry Stauf's well-hidden laboratory. A ghostly patient wakes up moaning on an operating table, and we see that an entire half of his head is missing. He realizes this, looks down, and starts reaching for a CG brain sitting in a bucket down below. The scene ends before he can grab it, though. (Along with a horribly squicky noise.)
* The 7th Guest cutscene can be watched of a ghost patient who wakes up and finds that half of his head is missing, then reaches down and tries to put his brain back.
* The 7th Guest had the protagonist moving about a haunted house built by an evil toy maker.
* The 7th Guest has several eerie paintings hanging around the Stauf mansion, and some of them get even worse when you examine them more closely.
* The 7th Guest, Martine Burden commits adultery with the married elderly man Edward Knox to secure him as an ally against Stauf Manor's other guests. Both end up dead for their trouble, just like all the others.
* The 7th Guest, several paintings in the Stauf Mansion change in various ways, from one where a pair of hands attempt to push through the canvas, to a picture of a boy that talks and bares some vampire fangs at you, and a large portrait of Henry Stauf himself which, after a puzzle of altering his face is solved, shows Stauf's head slowly warping out of the painting and trying to attack the player.
* The 7th Guest, this happens to one of the other six guests during a cutscene. There is no discernible reason why, either. Ego, the game's narrator, is heard to inquire, "...what's wrong with her head?"
* The 7th Guest This is at least one interpretation of the events that took place.
* The 7th Guest, this is the only way to enter and exit the Art Gallery. Access to it involves traveling through a rug that turns into a portal leading there, and a painting of the Music Room acts as the exit, with the frame expanding and becoming the room itself. Course, this just fits right at home with other, more bizarre transitions elsewhere in the house.
* The 7th Guest, which is based on AI intelligence - not a problem in the Windows 3.1 days, but nigh-impossible now.
* The 7th Guest, you start off knowing that everyone in the game has died, and you have to piece together the clues to find out what happened and why. This is more complicated than it sounds, since you are the titular seventh guest, you are also dead, and only by completing the game can you save yourself from damnation, because your soul was sold.
* The 7th Is Made Up of Phantoms", Sgt. William Connors, Corporal Richard Langsford and Private Michael McCluskey, three US Army soldiers from 1964, are transported

back in time to the Battle of Little Bighorn on June 25, 1876.
* The 7th mission can be completed in about thirty seconds by simply casting "Defense Matrix" on the SCV with the Psi Emitter and sending him directly to the beacon in the enemy's base. The right route there results in very few defenders in your way, and with the Defense Matrix they can't kill the SCV in time before he gets to the beacon.
* the 7th movie, the Straw Hats find a treasure chest and eagerly open it, only for the music to die when they see a strange lump of hair. They pull it out, and out pops an old woman. They quickly chuck her back in the chest.
* The 7th Protoss mission is a terrible pain, pitching you against three strategically positioned enemy bases, but you only have to destroy a single building to win. Instead of building up your base and taking out theirs as is expected, you can simply utilize the Dark Templar's invisibility and go kill the objective in about five minutes, as long as you take the right way in that lets you bypass most of their defenses.
* The 7th Saga: Considered the hardest game on the SNES, yet there are tons of items to buff with in combat, traditional RPG roles work fine with both party members, and your ally leaving or betraying you... takes a little foresight.
* The 7th Saga even later on, becoming Metal-Pison and getting a gunmetal gray recolor.
* The 7th Saga, the player has the option of getting one of their competitors to join them. However, this splits the experience between the player and partner. Ultimately, the game is actually much easier alone because of the extra experience points.
* The 7th Saga, the robot Lux was built with a finite amount of memory and as a result has forgotten who built him and why.
* The 7th season had Gil Grissom go on a four-week sabbatical because
* The 7th season of the anime attempted to reestablish the basic characters and setting of the show. As a result, both of these elements come to the forefront again. There are 3 episodes with the Keroball in the center of everything just in the first half of the season. That's more than in all of the first season!
* The 7th Voyage of Sinbad. Near the end Sinbad's sailors use a giant ballista to kill a dragon.
* The '80s Ancelotti), Zico's Udinese, Osvaldo Bagnoli's Hellas Verona, and — arguably the single most well-known of them all — Arrigo Sacchi's AC Milan.
* The '80s and a rather loose cover because Kim Wilde couldn't exactly remember the original.
* The '80s, and is disdainful of modern teaching practices. Although he does actually start to make progress with his students, he takes the boys on an unauthorised camping trip in the woods where Nelson is hurt. Chalmers thinks that the (admittedly minor) injuries are no big deal, and is stunned when he is fired.
* The '80s, and realizing it was a pretty good idea, American Express introduced the Centurion Card in 1999, available by invitation only to those with $20 million net worth, for a $7500 sign up cost plus $2500 annual fee. It's made of anodized titanium.
* The '80s, and was subsequently decommissioned. In now houses a museum of the former base.
* The '80s, a run-and-gun game featuring heroes based on Arnie and Sly, fighting bad guys that culminates in fighting off monsters based on those Aliens. Having those action heroes load bullets into those seemingly invincible aliens and have them blow up are pretty satisfying.
* The '80s. As of this writing, nearly all the soaps on channel 1 use a Real Song Theme Tune.
* The '80s as the German sports car manufacturer Porsche also saw a sales boom in the US during that time.
* The '80s ballad "Everytime You Go Away", made a hit single by Paul Young, was written and first performed by Hall and Oates. All of Paul Young's American hits were covers, although the aforementioned song is the only one most people likely remember.

* The 80s BBC Production cast four children who were nothing like the descriptions - Peter (Richard Dempsey) looked too young, Susan (Sophie Cook) was blonde instead of brunette, Edmund (Jonathan R. Scott) looked older than Peter, and Lucy (Sophie Wilcox) was much older and chubbier- but they all gelled well together in their auditions. Later on, they added David Thwaites as Eustace, who, unlike in the books, was fair-haired and stocky, but he also gelled well. Then there is Camilla Power, who was 14 years old at the time of filming, as Jill Pole - who, in the book, was nine years old during the events of
* The '80s being unpopular and partly because, thanks to privatisation, the companies were not solely British owned anymore. Now that public displays of patriotism are a bit more acceptable in the UK again, some of the companies are reverting to their old names.
* The '80s, but according to the copyright date at the end, it was produced in 2010.
* The '80s. By pure irony, Coca-Cola sales skyrocketed when they brought back the original recipe.
* The '80s by UB40, with UB40's version regaining popularity nearly 20 years after it was released. Neil Diamond later recorded a new version inspired by UB40's cover.
* The '80s came out in 1995. (WHDH now uses—wait for it—a 7 in a circle.)
* the '80s cartoon (i.e. the one who fights his way out of a top secret lab in one episode), but would usually screw it up at the last moment with a cringeworthy mistake (the aforementioned Siegie accidentally dropped the chemical he was stealing, creating a giant amoeba that ate him and half the county he was in... Cobra's experiments had a funny way of unexpectedly doing wacky stuff like that.)
* the '80s cartoon), Megatron punishes Swindle for selling his teammates for parts by planting a bomb in his head. He has to retrieve and repair his teammates in order for the bomb to be deactivated.
* The 80's cartoon. There have been character cameos, and each show has the reporter/journalist (and Geraldo Rivera parody) Hector Ramirez.
* The '80s, centering around the January Sales when retailers get rid of all the unsold extra stock left over from Christmas; it's our nearest equivalent of Black Friday. Internet shopping has largely killed it off; if it happens these days the participants are likely to be doing it just for the hell of it.
* The '80s, especially Pablo Escobar's medellin cartel as his terror tactics made him public enemy number one. Los Pepes in particular proved to be a highly effective vigilante militia, having started out fighting communist insurgents in the jungle.
* The '80s even if it took a century. Thanks to good 'ole American ingenuity Century City is more technologically advanced than the Soviet-occupied cities outside (exactly how this was achieved is left a bit vague).
* The '80s featured large people (including some famous professional wrestlers) breaking-and-entering into the Honeycomb Hideout, demanding a big cereal to match their stature. They were rewarded, not with an arrest warrant for trespassing or a frightened hideout-owner shooting the intruder, but with a song assuring them that Honeycomb is not small, no no no.
* The '80s (following Disney's own idea of an adult Michael hiring Mary Poppins as nanny of his own children), with a December 2018 release date.
* The '80s: Goffs had their iconic spiked Stahlhelms, while Bloodaxes imitated Imperial uniforms and paraphernalia down to the rank insignia and Commissar cap. The Stormboyz were the most egregious example, though: originally, they were a sub-culture of malcontent youths who rebelled against mainstream Orkish society by doing "un-Orky" stuff such as drilling, parading and being all disciplined and hierarchical. They even wore lightning bolt badges closely resembling the SS-rune.
* The '80s gone the way of the dodo thanks to these and other restrictions placed on them, as well as toll-free and local phone numbers, as well as Internet sites and mobile apps that provide many of the same services for free.)
* The '80s got around this by having a boy use a switchblade to break the

bracelet).
* The '80s, Granada TV Rental in the UK had a cartoon mascot of a leopard in a suit covered with multi-coloured polka dots, the point being that by offering a full guarantee and free delivery (unlike — it was implied but not exactly stated — their rivals) they were the leopard that had changed its spots.
* The '80s had one story in which the titular character swapped jobs with his wife (who at the time was a stay-at-home housewife with three children) for a day. Naturally, he made a complete mess of things though some of it was because one of the kids unexpectedly got sick and needed extra care. However, at the end of the day, he suggested to his wife that they occasionally swap jobs so that she could get out of the house more — and in later stories his housekeeping skills had improved drastically.
* The '80s has a front cover picture of a girl in a bikini jumping out of a cake at a boy's birthday party.
* The '80s has an early scene in which the protagonist is dared to cut his own tongue out, which he promptly does. Later, he is able to talk normally after work with a speech therapist. Seriously.
* The '80s. In the '95 season they made it as the AL Wild Card and seized a 2-0 lead in the best-of-5 series against the Seattle Mariners before dropping Games 3, 4, and 5 at the Kingdome, the latter on a 2-run double in the bottom of the 11th inning. With a tempermental owner in George Steinbrenner, the Yankees brought about large changes to the starting roster both from within (promoting Derek Jeter and Mariano Rivera up to the starting lineup) and without (trading for, among others, Tino Martinez, who was a member of those '95 Mariners), as well as firing manager Buck Showalter and replacing him with Joe Torre. With a new core in place, the Yankees would win four of the next five World Series.
* The '80s in the popular imagination, far too irrevocably tainted to ever again be as sincerely cool as it was in 1985.
* The '80s in the second half of the decade, there's still an undeniable sense of '80s nostalgia nonetheless.
* The '80s is at home watching all this on television. He just shakes his head at the sight of his two detectives looking embarrassed at the camera.
* The '80s looked even wackier. The same went with the 20th century and both World Wars, and the 21st century. Maybe they were more different than wackier?
* The '80s. Microsoft seems to have been aware of this, and thus sought to make XP's successor, Windows Vista, into a revolutionary product packed with cutting edge, must-have features that would entice people to upgrade no matter how satisfied they already were with XP. Unfortunately, this made Vista into an overly ambitious project that ended up releasing in an unfinished state despite its protracted development time, and both users and hardware manufacturers refused to adopt it due to its high hardware requirements, instability and incompatibility with existing hardware and software.
* The '80s mouthpiece for the band until 1975. Gabriel's legend loomed large until Collins became an unexpected solo success in 1981.
* The '80s: one of his girlfriends in his younger years was a woman who'd been turned into an addict, then a prostitute, then a drug mule, by a Baltimore drug trafficking ring that ultimately murdered her when she tried to escape. It's rare for anti-drug operations to be the center of the story, but the practice still crops up frequently, especially on a villain's resume. The fact that parts of the IRA eventually deal drugs to fund themselves, and that the series' al-Qaeda expy is willing to partner with a Colombian drug cartel, despite both organizations claiming some religious roots, is a sign that they're not only wrong and dangerous but completely morally bankrupt.
* The '80s on, examples being the Clavia Micro Modular, the Alesis Micron/Akai Miniak and the Dave Smith Instruments Tetra.
* The '80s on Ice", "A Fat Smurf Hits on Dorothy Hamill", and "Snoopy Stains the Ice".
* The '80s pop music. If only they had known "heroin chic" was an existing underground fashion trend waiting to break into the mainstream.

* The '80s ran over the concept of cute magical talking critters as protagonists, this includes:
* The '80s remember the song "Happy Together" less by the Turtles and more by General Mills trying to sell us Golden Grahams.
* The 80s revival has the episode "Dealer's Choice", wherein the Devil crashes a poker game to collect on the soul of one of the players. However, he's a pretty
* The '80s series took place here in the first few seasons, but later seemed to move to an
* The '80s, since actual TV production staffers tend to use generic terms like "banner", "super", "font", "lower third" or even just "graphic".
* The '80s slowly. It wasn't uncommon in Renaissance Europe for people out in the countryside to dress in fashions that were about 20 years behind the clothing worn by people at court.
* The '80s teen horror, et cetera). On the other hand, he loves the '80s, cheesiness and all. He states that this was because the '90s were his awkward, schlubby teen years that came in between his wondrous childhood in the '80s and his present-day success as an internet personality.
* The '80s. These ads had a monologue which wouldn't be unlike programs being aired in those channels, with the exception of the product's name only being tacked on at the very end. As the main focus was on the monologues and not the products, this trope was bound to happen:
* The '80s, the TB-303 was so in-demand and sought-after, that its value had risen to multiple times its original price.
* The '80s This one is a remake of an episode from the original series, with Roddy McDowall as the prisoner.
* The '80s. To that end, they even purchased a closed-down high school in Syracuse, New York to use as a film studio.
* The '80s versions of "Don't Leave Me This Way" and "Never Can Say Goodbye" were not by Bronski Beat, but by the Communards, Jimmy Somerville's post-Bronski band. Likewise, neither band covered Sylvester's "You Make Me Feel (Mighty Real)", but Somerville later did it solo.
* The '80s, was typically Lucky Lager.) The minimalist look was replaced later in the decade by "store brand" product packaging.
* The '80s) were often shot without any microphones on set, and with each actor saying his lines in his own language. Hence, these films do not have one original or "official" language track; every version is a dub.
* The '80s, which according to them, was "the worst decade ever". The page's still active, actually, but hasn't been updated since early 2012 (they came back in 2017, but updates since then have been very sparse).
* The '80s; winning the 1988 Winston Cup championship as well as winning the sport's Most Popular Driver Award 16 times before withdrawing his name in 2002; with his legacy continuing as the father of 2020 NASCAR Cup Series champion Chase Elliott. However, Elliott had the potential for at least two more championships that slipped away due to poor late-season performances.
* The '80s with their "This Is Not Your Father's Oldsmobile" campaign. The goal was to change the old and stuffy image of the brand. The problem was that Oldsmobile already had a good reputation among the children of Oldsmobile owners before the campaign. Prospective buyers thought that they'd changed for the worse.
*
THESPACEWASNOTINWIDEUSEUNTILAFTERCLASSICALANTIQUITY.CLASSICALHEBREW,GREEK,ANDLATINWERETYPICALLYWRITTENWITHOUTSPACES,OR· WITH·NOW-OBSCURE·DIACRITICS·TO·MARK·DISAMBIGUATING·WORD· BREAKS.
* The 83rd issue of the main series has Zartan make an interesting threat to Dr. Mindbender.
* The 87 Cent Solution!, among other things to drive Scrooge mad and drive everyone

away from him. It very nearly worked.
* The 8-Bit Drummer explicitly avoids cursing on his Twitch streams. This is parodied in a bumper where he explains "alternative swearing", in which any word can sound like a swear with the right inflection.
* The 8-Bit Drummer he also has a jug and a water bottle with googly eyes that he drinks to stay hydrated during his streams.
* The 8 Bit Era Of Console Video Games are basically separate genres now.
* The 8-bit Era of Console Video Games (third generation, 1982-1994, 1998 outside of America)
* The 8-Bit Guy: Demonstrates how vintage technologies work and goes in depth on their history.
* The 8-Bit Guy. The demise of electronic stores such as Radio Shack, Circuit City, and Fry's Electronics can be attributed in part to the existence of modern smartphones.
* The 8-bit (Master System and Game Gear) versions do not follow this rule; the ring counter resets to zero once Sonic collects 100 rings. If he collects exactly 100 rings and gets hit, he'll still lose a life.
* The 8 Chosen Children were the only people with Digivices and Digimon partners. It appears now that, in
* The 8th Edition Astra Militarum Stratagem 'Aerial Spotter' represents the aircraft of the Aeronutica Imperialis acting as spotters for the player's artillery, allowing them to re-roll failed hits.
* The 8th edition Genestealer Cults Codex, released in early 2019, mentions in the "army building suggestion" page the existence of a Start Collecting box for the army containing an Acolyte Iconward, a squad of Acolyte Hybrids, a Squad of Neophyte Hybrids and a Goliath Rockgrinder. The box was finally released only one year after the Codex, and featured an Achilles Ridgerunner instead of the more expensive Goliath.
* The 8th edition map of Norsca and the Chaos Wastes shows a number of monstrous creatures lurking in Sea of Claws and the Sea of Chaos — the former, between Norsca and civilized lands, is home to a single tentacled beast; the latter, between Norsca and the Chaos Wastes, has a spiked, funnel-mouthed serpent, a red-skinned leviathan and a festering, rotting hulk emerging from holes in the sea ice. The northern end of the map is obscured by a mass of monstrous appendages and marked simply "to the Realm of Chaos".
* The 8th season finale ends with Meredith, Derek, Mark, Cristina, and Arizona stranded in the woods, all horribly injured in a plane crash and losing hope of any immediate rescue. However, Arizona (
* The 8-year-old brother of one of House's child patients gets an enormous crush on Cameron. It starts with him stealing flowers for her, then he grabs her butt, and later he attacks Chase. This eventually leads to House solving the case, as he is wont to do.
* The '90s 2 channel, but all you got was a message saying that they couldn't show it because they couldn't shell out for the high fees Sky required to show it on their service. This somewhat foreshadowed the Sky vs. Virgin Media spat, though Sky 2 had long since ceased to exist by the time of the Virgin dispute.
* The '90s, a modified version of the Fox platform was used for the fourth-generation Mustang until 2004.
* The '90s and direct-response advertisements were at their peak. Because they were an easy choice to fill up commercial time due to their length, broadcasters tended to air a lot of ads of this type during their commercial breaks.
* The '90s and early 2000s ran every holiday season spoof toy adds of "Juguetes Radioactivos: Ofensivos Inhumanos" (Radioactive Toys: Offensive and Inhumane), which included:
* The 90s-and-later incarnations of the franchise are generally more self-aware and willing to play with the series tropes, where the originals played it all straight.
* The '90s, and one could say that the genre as a whole took his advice.
* The '90s, and private colleges both small and large, all standing shoulder-to-

shoulder.
* The '90s and the generally negative pre-response to their plans for a new version of the World of Darkness has shaken the brand further.
* The '90s and the Knicks defeated the Bulls in '94, New York spent three years in a row losing!).
* The '90s and the spread of STDs than comprehensive ones, and at worst can backfire by leaving sexually active teenagers with little knowledge of safe sex. Regardless, it remains popular in many parts of the US for moral reasons.
* the 90s anime. Also a rare instance of the card's proper meaning (temptation) being used, even more surprising considering this is the 90s anime. Those possessed by the card became completely free from society's restraints and did whatever they wanted. This is the infamous episode where Umino flips Haruna's skirt.
* The '90s anime, Motoki offers an umbrella to Makoto, resulting in her developing a severe crush on him.
* The '90s Are All That (during Halloween no less) for the first time since it was banned more than 10 years prior.
* The '90s back then); other countries that aired the English dub aired the episodes in the proper order. Also for continuity reasons the Doom Tree episodes are numbered after the Beryl episodes.
* The '90s became the arbiter of what was "In" and what was "Out" in American popular culture.
* The '90s, brought him back to form, with three straight Top 10 hits (the title track, followed by "Running Out of Reasons to Run" — his only #1 hit — and "I Only Get This Way with You") before the hits tapered off again. (However, he did win a Grammy in 1998 as part of the supergroup Los Super Seven.)
* The '90s caught wind of this, he also protested by cutting short his own performance to sing part of "Choices" himself.
* The '90s), Cirque helped lay the groundwork for their decline before then.
* The '90s coming in 2017 when the Ringling Bros. and Barnum & Bailey Circus, the longtime standard-bearer of the traditional style, closed its doors.
* The '90s continues to be the only one that hasn't charted very highly but remains popular as a live act.
* The '90s culture about not romantically associating with partners from past lives, framing it for a decidedly human audience by gender flipping only one of the new hosts.
* The '90s) even won Best Supporting Actress Oscars. Then her momentum ended in 2000 when she suddenly backed out of a movie, leaving Allen stranded, eventually resulting in both of them filing lawsuits against each other.
* The '90s featured a rollerblader navigating a city. (We see this from his perspective.) About halfway through, he spots a sexy lady and keeps looking at her as he passes. He looks back at his path and sees the truck he's about to crash into. He then uses his cellphone to call his doctor and say "I did it again."
* The '90s from her daughter Izzi). She's also recorded some of her hits in Spanish, even winning the inaugural Dove Award for Best Spanish Album.
* The '90s had a white, blonde kid suffering from racism as he tried to live a day in an overwhelmingly black population. He was the only one white person in the entire piece, as even his adoptive family was black.
* The '90s has one of the Three Wise Men (guest host David Alan Grier) resort to this on the way to Bethlehem when he realizes his partners are bringing gold and frankincense to the Christ Child. Of the gifts that result from this, Baby Jesus likes the bubbles best.
* The '90s. He held several regional belts and main evented cards on US television, but he only challenged for a world title once in 2000 and lost. Despite fan clamor for him to be given another shot, another ten years went by without another world title match before he decided to call it quits.
* The '90s in Moscow. One US Seargent in that video makes the comment that eight years from now, people will be reading about that event as a sign of positive relations. Eight years later, and instead tensions over Crimea, the Arab Spring and both sides interventions in the politics of other nations have instead created

headlines about Russia and America being at odds and global boogeymen just like it was during the Cold War.
* The '90s in the '00s did these portals fall by the wayside; as of 2016, only AOL still survives, and even then in a highly truncated form that exists largely as a legacy service for those remaining few people who still use dial-up.
* The '90s, it was only a matter of course that particularly nimble or sensual defenders would sometimes shave seconds off the clock, or on rare occasions even outright stall their opposition for half the segment, by carefully maneuvering to draw said opponent into an embrace.
* The '90s making creator-owned sci-fi comics under the banner of Tekno Comix.
* The '90s — "The Backdated Lucky Charm" — had Donald stumble into one of these stores, a bookshop, where he purchases a book on making lucky charms and then when he tries to learn more about it, finds out it's missing when he returns.
* The '90s. Needless to say, this is Only Works Once. (See Mystical Silver Crystal.)
* The '90s, on French TV, there was a series of very popular commercials for laundry product OMO starring actual chimpanzees in human clothing an "speaking" in silly words, enacting stereotypical ads where they get clothing dirty and have them clean again with OMO. The commercials were popular enough to increase sales of the product by 25%.
* The '90s outfit with a battering ram, and Juggernaut with a battering ram.
* The '90s, plenty of animated shows made fun of animation from the '60s and '70s for being cheap and not very high-quality compared to them. It may be one of the only cases where creators actually felt anti-nostalgic about their childhood entertainment.
* The '90s pop-up promoting their website: a "bing!" sound, a pop-up and a "mouse double click" sound promoting the web links to which ever program you were watching. After a few months (and viewer complaints) this went away as the novelty of the web wore off.
* The 90s practically came back for Eastern Europe and Central Asia - specifically Russia, essentially all other post-Soviet states except perhaps the Baltic states and most especially the former Yugoslavia - except for the fact that this decade was anything
* The '90s rap song "Got Your Money" had a similar page: "The song is initially dedicated exclusively to the world's population of attractive females until ODB seems to have pangs of guilt for not including ladies who might be considered 'homely' or 'ugly,'"
* The '90s, reaching the Conference Finals in 1993, 1994, and 1999 as well as an appearance in 2002. Despite this, they failed to advance (losing to the Kings in 7, Canucks in 5, Sabres in 5, and Hurricanes in 6 respectively).
* The '90s's self-proclaimed status as "The King of All Media" in the early '90s was actually a parody of this.
* The '90s that it did in the early '90s; if anything, as of the late 2010s it is in the midst of a commercial and creative peak within a cultural climate that has given people all new things to be afraid of.
* The '90s that the whole story was made up to add a provocative air to what really was just the most stunning glitch with a swear filter imaginable.
* The '90s. The "will never be seen on TV" advertising was sometimes mocked by the later examples with jokes along the lines of "...except when you watch it by putting the tape into the VCR".
* The '90s they had a "Be A Star" campaign where the winners would appear in the parade on several floats in addition to modeling for the company.
* The '90s too much got together with his friends, killed his folks, then drank their blood. There's a reason every White Wolf book since then opens with a disclaimer reading, "You are not a supernatural creature, and if you think you are, then for the love of God, seek professional help."
* The 90s TV series tried to avert this by revealing that he was white before he got exposed to the power rings and his appearance changed. To
* The '90s, two children have disappeared on the way to school. It turns out

they're caught in the grain bin version of this trope, after climbing on top of a railway car and getting stuck in the grain.
* The '90s Usagi and Chibi Usa express fear of the dentist because they describe the only dentist in town as sadistic. They are more then happy to run off to the new, fun dentist in town only to have it turn out to be a trap by the Amazon Quartet.
* The '90s Usagi and Mamoru share an umbrella at least once. Usagi once unduly flips out over Mamoru offering an older lady his umbrella out of kindness at one point.
* The '90s wasn't enough, the first editions of the first games (released simultaneously) came with a shirt, a lip gloss and a backpack.
* The '90s), were adult contemporary piano ballads. Ever since the success of these two singles, she's been producing nearly nothing but piano-based adult contemporary music.
* The '90s were only distributed on analogue VHS, to prevent them from being made widely available on the Internet, which might have brought IP complaints from the BBC.
* The '90s. Westerns were produced afterwards but practically no movie has had the critical and commercial success those films enjoyed.
* The '90s where her mother strangled her for having bad grades. It retained when she locked her out of her house when she saw her bad test score, though it des change to her mother forcing her to study at the library.
* The '90s, where some of the puppets and kids get on a bus, and go through a strange rainbow, taking them to an animated Plaza Sésamo.
* The '90s, which was made to draw young children to the console. The games were mocked as cash-grabs that shouldn't be popular on a "big kid" console like the PS1. The hatedom has since become non-existent as many current hardcore gamers were fans of the series growing up.
* The '90s, which was so common that two decades after it aired on TV, it became an Internet meme.
* The '90s which were key in exposing the comic to a wider audience than it would have otherwise.
* The '90s who called himself Mr. KFI (actually Marc Germain, who these days hosts a web-based show under his real name). The conceit of the show was that Mr. KFI was in prison for ripping off mattress tags, and he was hosting the show as part of his community service requirements.
* The '90s, who were often hunky young men in cowboy hats. Many of their critics often accused them of trading on their good looks in order to cover up a lack of talent and derivative music.
* The '90s will get this effect in Eastern Europe due to that region locked away from Western pop-culture for 50 years (where only the very best of the West passed the border).
* The '90s, with several Grammy wins and multi-platinum album sales. However, their chart showings were sparse: only six of their singles even hit Top 40 on the country charts, with their best showing ("All You Ever Do Is Bring Me Down") only reaching #13. East of the Atlantic, they had an enduring Top 5 hit with Dance The Night Away.
* the 9/11 attacks, the peacock logo had the image of an American flag waving inside it.
* The 92nd layer of the Abyss is a foul and disgusting place resembling
* The 92nd layer of the Abyss, Ulgurshek, is actually a living creature, called a draeden, who is currently trapped because the Abyss
* The 95th Rifles (aka The Chosen Men) and South Essex regiments from the
* The ♂ symbol may also be used, with the arrow portion representing the penis itself.
* The 99 because his metal prosthetic arm and leg make him look monstrous, but he turns out to be working for the good guys.
* The 99p Challenge had a round based on coming up with these- suggestions included Bill Bailey's concoction of Praline and Seagull's Tears.

* The 99p Store. This has been averted by Poundland buying out their rival. Poundland sometimes has clearance items discounted to 50p.
* The 99 Rooms plays with this as an art project, using photographs of real abandoned sections of East Berlin's industrial sector and making bits and pieces of them interactive, with just a touch of added surrealism.
* The 9th Life of Sherman Phelps: In the episode "Moving Target", Ronalsd, while possessed by one of the ghosts of Sherman's previous lives, constructs a device out of a slide, a tricycle, a bear trap, a piranha in a bowl, meat on a string, and other assorted things. Its aim is to kill Sherman, but the elephant character falls into it, and is then mad at Ronald for putting him through it.
* The 9th Life of Sherman Phelps), in the episode "Serenity Now", Ronald (and by extension, the ghost who's possessing him) ends up frozen solid from waiting for too long in the frozen meat truck while Sherman tries to return someone's glove.
* The 9th Life of Sherman Phelps: Ronald is putting up one in "Candy Bandit" to catch the titular crook.
* The 9th Life of Sherman Phelps: Sherman and Ronald have a different job in each episode. They're movers in the first film, policemen in the secod, and butchers in the fifth.
* The 9th season continued this trope with a shift to classic 1930s pulp adventure for Archer's next coma dream, although this was closer in tone to the first seven seasons of the show than the eighth season was.
* The A-10 Thunderbolt II, also known as the Warthog, is one plane that can take a licking and keep on ticking. A-10's have returned to base with damaged hydraulics, wings and engines to the point that the pilots have needed to land the aircraft using manual wire controls. A-10's have returned with wings, engine or even large sections of the fuselage blown away by enemy fire.
* The A-10 "Thunderbolt II" attack aircraft (A.K.A. the "Warthog") - A close-air support aircraft capable of carrying a dozen bombs or missiles on the sort of "low and slow" flight plan necessary for accurate ground attack, but its main feature is a tank-busting
* The A-10 Thunderbolt II can reasonably be called the best close-air-support aircraft in the modern world. It is highly maneuverable,
* The AA-12 automatic shotgun was specifically designed to absorb most of its own recoil
* The Aachen Memorandum, the United Kingdom regains its independence after being under the thumb of a corrupt and dictatorial European Union.
* The A&E Network blitzed all their commercial breaks with multiple promos for the second season of
* The A&W chain of fast-food joints have become known for marketing based on nostalgia: They base many of their commercials, and even the interior on the "classic fast food joint" look of
* The "aaparition in front of a moving car" is used — sort of — in the
* The Aarne-Thompson-Uther folktale classification system, an attempt to catalog every folktale plot there is.
* The Abaddon Hotel in upstate New York is rumored to be haunted, has strange occult drawings on the basement walls and has been abandoned for years before the start of the film. The Hell House crew convert it into a haunted house attraction with
* The Abaddon Hotel is rumored to be one before it is abandoned years before the events of the film take place.
* The abandoned factory that Momo used to train Yuko in Chapter 6 of
* The abandoned Old Changi Hospital, another haunted hospital in the same city, has a torture chamber added by the Japanese secret police, with bloodstains still set into the floor.
* The Abbai took advantage of this to entice various lesser races to join the
* The Abbasid Caliph Harun al-Rashid gifted an elephant named Abul-Abbas to
* The Abbess has a trance and makes three statements, all of which come to pass. Were they actual prophecy, or merely open-ended enough that Zachry would eventually be able to apply them to

* The Abbess of the Order of Notaries Public has a mysterious past, partially revealed as having been a member of
* The Abbott And Costello Show Joe Besser's character Stinky is seen running back and forth with a small glass, first full of water, then empty. They finally stop him and find out what's going on: he accidentally started a fire and is trying to put it out, one small glass of water at a time.
* The Abbot watches Mosquito and Victoria having sex from behind a one-way mirror in
* The ABC has "#QandA" and "#FactCheck". A variant, however, in that these are shown in tweets made during the broadcast, and the latter is to sort out claims made during the hour-long show (This is justified, as they do have a lot of questions to get through and none of the subject matter is rehearsed).
* The ABC Mystery Movie was an attempt to revive The NBC Mystery Movie block, featuring new installments of both
* The ABC's of COVID-19: A Sesame Street Town Hall pre-empted the special's slot. The second special would eventually air on June 13th, 2020.
* The ABCs of Death: After failing in his final task, the protagonist of the "L" segment wakes up to find himself chained to a bed with a beautiful woman making love to him. For a few moments, things to going much better for him. And then they get much, much worse.
* The ABCs of Death and Simon Barrett enjoy playing coke-sniffing, hypocritical versions of themselves.
* The ABCs of Death: "C is for Cycle" ends with Bruno in exactly the same place he was at the start, with the implication that he is now trapped in a unending loop (hence the title).
* The AB Cs Of D Eath: "E" follows an old urban legend of spiders being able to lay eggs inside people's bodies.
* The ABCs of Death: Happens in the "L" segment. While looking up the skirt of his female captor, the protagonist sees an eye staring back at him from her crotch. Given his deteriorating physical and mental state at the time, this may have been a hallucination.
* The ABCs of Death has a kid dreaming about being in the restroom while his toilet turns into a man-eating monster.
* The ABCs of Death he wears, complete with a hood that obscures his face.
* The ABCs of Death: In "D is for Dogfight", a gang abducts dogs and then uses them in death matches against humans.
* The ABCs of Death: In "S", nothing Roxanne does to the hooded man stops him, including torching him with a flamethrower. When he finally catches her, he congratulates on her leading him a better chase than any of his other victims.
* The ABCs of Death: In the "F" segment, an earthquake unleashes a deadly gas that kills everyone in the school.
* The ABCs of Death: In the "F" segment, Yoshie's farts are powerful enough to cause her skirt to flip up. Miss Yumi can fill an entire room with the gas from her farts.
* The ABCs of Death: In the "R" segment, the patient lets the nurse live when he escapes from the facility because she was the only one of the staff who was kind to him.
* The ABCs of Death: In the "U" segment, one of the mob is carrying an axe that he employs to good effect against the vampire.
* The ABCs of Death: In the "W" segment, the city is attacked by a giant walrus that fires laser beams from its eyes.
* The ABCs of Death: In the "X" segment, the main character ravenously chows down on slop she takes out the fridge, with close shots of her mouth as she chews.
* The ABCs of Death: In "X", every person Gertrude passes on the subway and the street mocks her for her weight.
* The ABCs of Death: In "X is for XXL", Gertrude, an overweight woman, wanders the streets of France as people everywhere taunt her size; she is haunted by images of thin, attractive women. She sadly gorges herself on food before deciding to finally do something about her weight. Using a variety of sharp objects, Gertrude proceeds

to cut the fat off of her body. She walks out of the bathtub in a skeletal state and missing all her skin; she poses briefly and then bleeds to death.
* The ABCs of Death — Horror anthology series. 3 films since 2012.
* The ABCs of Death: The closing credits cleverly uses dialogue, sound effects and bits of score from all of the shorts to create a dreadful ambient piece that lasts the duration of the credits. Sounds from each short pop up when the respective short's credits are on screen.
* The ABCs of Death, the N segment has a man buying his fiancee a parrot, which he had trained to give her a wedding ring to propose to her. But after the proposal was made...the bird starts repeating the words of the man and his mistress during sex.
* The ABCs of Death: The whole point of the "E" segment is about a man being menaced by a spider.
* The ABCs of Death, who lures him into a trap. However, it's done in live-action, with human actors wearing animal costumes, and the result is rather uncanny to look at.
* The abdominal pain is likely because a even a small amount of a very dilute hydrogen peroxide solution can liberate a surprising amount of oxygen if the breakdown is catalyzed by something like, say, stomach acid. Having your stomach swell up to several times its normal size is quite uncomfortable, and if it actually ruptures, "agonizing" (and "potentially fatal") are good adjectives for the kind of pain you'll have.
* The Abduction from the Seraglio: "First beheaded, then hanged, then impaled on red-hot spikes, then burned, then manacled and drowned; finally flayed". At least one production (the Zürich Opera video recording with Malin Hartelius and Piotr Beczala) plays up the comedic effect in full: Osmin meticulously stresses the "first", "then", and "finally" (while Pedrillo, amused, counts the threats on his fingers).
* The Abduction of Saint Anne, Dave carries a chloroformed Anne from her mansion to the van.
* The Abduction of Saint Anne, Dave participates in Bishop Logan's plan to kidnap Anne and transport her to a convent in Argentina, despite being deeply suspicious of Logan's motives, because he wants to get Anne away from her mob boss father, who is holding her prisoner in her own home.
* The Abduction of Saint Anne. Gentry responds, "Well, it may sound that way to you. You're a young man. I'm an old man. I'm an old man who's been told he's dying."
* The Abduction of Saint Anne: To foil his would-be killers, Dave rents two motel rooms, one under his name and one under no name, and stays in the no name room. He sees two goons going into the room rented under his name and then leaving. When he carefully pushes the door open with a broom, it explodes.
* The Abduction of Saint Anne, Wayne sneaks into Anne's house to visit her while she's being held prisoner by her father and asks why she hasn't answered his letters. Anne replies, "What letters?" Horrified, Wayne says, "What are they doing to you?"
* The Abduction of Saint Anne: When Anne struggles and screams, Dave presses a cloth to her face. She passes out in a few seconds.
* The abductor turns violent if confronted, though may not harm his victim even if she attacks him.
* The Abh language Baronh is stated to be descended from a "purified" form of Japanese, which is surprising to many people since it looks and sounds nothing like Japanese. For example, the Abh capital was originally named "
* the Abhorsens criteria, it's likely they possess all the copies and may be responsible for keeping it up to date.
* The abilities Arena Trap and Shadow Tag force the opponent the Stand Their Ground.
* The abilities Download (ups a stat based on opponent's defenses), Anticipation (shudders depending on the power of its foe's attacks), Trace (copies the foe's ability), Rivalry (raises Attack if the foe is of the same gender), and Impostor

(transforms into an opponent in front) all involve reacting to the opponent in some way. Telepathy takes this and applies it to ally Pokemon in Doubles.
* The Abilities Guts and Flare Boost can grant the user a 50% boost to their Attack or Special Attack (respectively) while they're afflicted with the Burn status effect. Flare Boost is the more straight example as it only activates in response to the user being Burned, while Guts can also activate when it's Poisoned or Paralyzed. Notably, Guts also ignores the usual 50% Attack reduction from a Pokemon affected by Burn, meaning that it gets stronger instead of weaker when set on fire.
* The ability Analytic can give any Pokemon this, giving it a boost to its attack power if it attacks last.
* The ability Flicker Strike teleports the caster a short distance to an enemy to deliver a preemptive strike. There is also the Lightning Warp spell, which creates a burst of lightning around both the start and destination points.
* The ability for land based creatures to block flyers has been given the mechanic title "Reach." Making any creature with that ability into an Anti Air blocker.
* The ability Mold Breaker stands out in this as it allows the user to bypass any ability that would ordinarily prevent a move's normal use - in short, it's
* The ability Mold Breaker, which is available to Pokémon like Haxorus, Excadrill, and Mega Gyarados, makes their moves and their effects ignore the abilities of other Pokémon. For example, Ground-type attacks will hit Pokémon with the ability Levitate (Flying-type Pokémon are still unaffected).
* The ability of a Curseling's Tretchlet to uncover secrets extends to magecraft. This insidious power allows the homunculus to steal spells from the mind of any nearby Wizard so that their host can cast them back at the enemy.
* The ability of spirit-world interference to bestow bending is further built upon at the end of Season 2, when the Harmonic Convergence causes
* The ability of Starfleet engineers to do this at the drop of a hat is parodied in Aurelio Voltaire's "USS Make Shit Up":
* The ability Technician provides a 50% boost to all moves with a base power of 60 or less, which (more often or not) have useful secondary effects such as increased priority, hitting multiple times or bypassing accuracy; putting them on par with the more common "STAB spam" moves such as Thunderbolt or Flamethrower.
* The ability to be polyamorous is considered a defining character trait of Series 1 companion Captain Jack Harkness, who is shown as equally attracted to Rose Tyler and the Ninth Doctor. Although the series never follows this very far, when it is referenced neither Rose nor the Doctor appear too disturbed by it.
* The ability to change gameplay styles to match that of the original game,
* The ability to create and improve on his own spells, his signature one being a magical
* The ability to do this almost casually is a trademark of the Winter Soldier - however, he'll frequently put someone down with bullets to the chest, then finish them off with a double-tap to the skull.
* The ability to explicitly set spears and similar weapons against a charge (typically for double damage) in
* the ability to explode; bloodleakers born with scaleless, easily ruptured hides, usually kept as blood donors or living blood banks for religious rituals; goreguts with distended bellies and ravenous appetites; twinskulls, conjoined twins considered blessed by the xulgaths' demonic god; spinesnappers, hulking colossi used as shock troops and combat champions;
* The ability to grovel/supplicate/GENUFLECT (otherwise known as "Dogeza" in Japan) is a funny and welcome addition to the third entry of
* The ability to make their horn tips glow is a basic spell that almost all unicorns seem capable of, alongside telekinesis. It's easy enough that even a somewhat dim-witted foal like Snails can cast it (although it takes him some effort). Besides using this as a built-in flashlight of sorts, the light can be directed into a narrow beam that may or not project an image, as shown by Rarity, Twilight and a number of unicorn Royal Guards on various occasions. Regular

flashlights also exist, but it's not said whether they're magic-based or electric.
* The ability to scavenge enemy weapons and hijack enemy vehicles is a key gameplay element of the
* the ability to see through walls and apparently clothing when Tatsumi sees Mine, Akame, and Sheele in their underwear just before being rejected by the Arm.
* The ability to sense ghosts is limited to children and teenagers in the
* The ability to "skip through" both animated cutscenes and dialogue sequences, particularly handy when starting a
* The ability to tag weapons and summons as your "Favorites". Not only it acts as a filter for your inventory, it will (by default) prevent your weapon or summon from being accidentally sold, reduced, or fed to other weapons or summons when using the Auto-Select button of the upgrade menu.
* the ability to transform into a human-like form is a feature of really strong youkai. Sango says early in the series that the strongest and most dangerous youkai are the ones who can look like humans.
* The ability to transform into most animals is occasionally abused by the Animorphs (like Cassie getting an embarrassing doodle back from her teacher or Marco scaring girls at a party he wasn't invited to), but
* The ability to use the transporter to beam down to (or to beam up from) Vashti is extremely limited. Picard has to receive clearance from Central Station before he can teleport to the planet, which is protected by an impenetrable shield. The transporter signal can only pass through the
* The ability Trace (used by the Porygon and Ralts lines, as well as Mega Alakazam) copies an opponent's ability when the user enters the battle. The Porygon line also has Conversion to copy the opponent's type during the first generation games.
* The abjuration-specialized Wizard in 5th edition gets an arcane ward that protects them from damage. At lv. 6, they can use it to defend their allies.
* The aboleth language is a complex tongue meant to be spoken from multiple mouths, as aboleths use the numerous orifices on their sides to produce sounds. An aboleth's oratory skill is directly tied to how many lateral orifices it has, as this determines how many words it can form — individual aboleths can have anywhere between two and twelve — and other beings who attempt to speak are usually either limited to a small set of simple words or have to use wind instruments such as flutes, bagpipes or tubas to imitate the complex harmonics of a speaking aboleth.
* The Abolitionist song "John Brown's Body" has this as it's central theme. John Brown was fed up with the movement's attempts to peacefully end slavery in the U.S. and tried to start a slave rebellion in Virginia, which ended in his arrest and eventual hanging for treason (the first person convicted of the crime in the U.S.). John Brown's raid of the federal armory in Harper's Ferry, Virginia (today West Virginia) occured less then two years before the start of the American Civil War. In fact, the "Battle Hymn of the Republic" was set to the tune of this song.
* The abolition of religion as the illusory happiness of the people is the demand for their real happiness. To call on them to give up their illusions about their condition is to call on them to give up a condition that requires illusions. merit, since wealthier countries have grown less religious over time, although that may not be the cause (or just one among many).
* The Abominable Dr. Phibes (1971) is either very early Diesel Punk or very late Pulp Horror.
* The Abominable Dr. Phibes are fairly docile and prefer fruit and nectar to humans. And they're kind of cute, too.
* The Abominable Dr. Phibes is an award-winning concert organist, holds two degrees from prestigious European universities (including one in theology), and enjoys composing poetry and ballroom dancing to music supplied by the clockwork band he has built. He's utterly mad and spends the movie brutally murdering a whole bunch of innocent people.
* The Abominable Dr. Phibes saying "Nine killed you, nine shall die and be returned your loss, nine times nine! Nine killed you, nine shall die, nine eternities in

DOOM!"
* The Abominable Dr. Phibes's "War March of the Priests" on his theatre organ.
* The Abominable Dr. Phibes. The latter becomes especially funny if you know your Shakespeare.
* The Abominable Dr. Phibes: When Crow drives off in a desperate attempt to save Dr. Kitaj, he takes the first car he finds, which turns out to be Superintendent Waverly's. It is in less than pristine condition when he returns it, and falls apart (off-screen) when Waverly drives off.
* The Abominable Snowman, a trapper on an expedition to capture a Yeti sets a trap under the snow without telling the two member of the expedition who are behind him. Naturally he captures one of them. He claims the man shouldn't be hurt since it's his own design but it was designed for Yetis, not people.
* The Abominable Snowman, our hero sets out to look for the yeti with a five-man team, and when his wife eventually finds him he's the only one left (though the guide apparently also survived, having run back to his village in the middle of the movie).
* The Abominable Snowman seem to have this with each other, and also with humans who let themselves be drawn in.
* The Abominable Snowman, the radio is accidentally smashed early in the yeti-hunting expedition during a tussle between the team members.
* The Abominable Snowman trek up into the Himalayas in search of the yeti, but find their infighting and bad decisions causing them at least as much trouble as the beasts.
* The Abominable Snowmen", the series ventures a bit further afield, using the North Wales mountain pass at Nant Ffrancon to double for Tibet.
* The Abomination Vault has the Grand Abominations. The Nephilim crafted them from the remains of the Ravaiim, the first race that the Nephilim slaughtered during their rampage across creation. The semi-sentient Abominations possess world-ending power and a deep hatred for everything. They were deemed so dangerous that the Nephilim sealed their full power and locked them away in the eponymous Vault.
* The "Above All" ads featured a parade of Air Force toys capping it all off with the oh-so-sexy F-22 Raptor.
* The above also ties in with Monk's general tendency to avert this trope as Monk will often quickly find a series of points that leads him to believe that a suspect is the culprit but more often then not most or all of them could be explained away very easily. Monk will agree that all of the counter points are valid but use their improbability as the basis to do further investigation for actual proof ("He's the guy. I don't know how, but he's the guy.").
* The above applies to the conventional TF2 game modes. When the Medic finds his way into a mod like Zombie Fortress, many of the detriments that limited this class can become quite helpful if used properly. Overheal stays much longer on Survivors than it did in normal modes, and the speed of the Medic can help him stay ahead of two of the three zombies classes. Throw in the melee restriction that all zombies have, and a Medic can become a lethal adversary who seems impossible to chase down and kill.
* The above arc itself is part of a season-wide story arc with P.O.I.N.T. as a whole. There's an episode before it in which they get involved with Plaza affairs, and this is what sparks Enid's interest in attending P.O.I.N.T. Prep. Later in the season,
* The above are only following in the footsteps of the original masters of Postmodernism in animation:
* The above can also result in a cascading scenario of a single ninja going through multiple disguises in successive turns by repeatedly casting Ninjutsu on the "same" creature. Taken at face value, this means that the mysterious ninja could have worn
* The above description also fits many other ethnic and/or immigrant groups besides Jewish-ish.
* The above displacement of Kato is so famous he got his own Expy without Green Hornet (the 90s martial arts film, Black Mask, has people comment upon the

characters' similarity).
* The above does not apply to Canada where YMCA and YWCA remain separate organizations and while they both offer programming for men and women, Canadian YWCAs continue to offer a large amount of female-centric programming related to health as well as social issues.
* The above doesn't even come close to the duplicate name insanity that is v4. Not even counting the terrorists and just the students that appear on the island, there are
* The above entry may be somewhat countered by the fact that bayonet charges are insanely effective against people who cannot deal with crazed soldiers willing to get up close and personal in order to have the primal satisfaction of stabbing their victims to death in the most painful manner possible. The Battle of Danny Boy ended after British troops ran out of ammo and decided that bayonets were to be the killing blow to Iraqi insurgents. The insurgents, taught to believe that all westerners were cowards, fled when they realized that the British were obviously not running away but hellbent on getting revenge for casualties and a wrecked radio (
* The above example is also one of the reason the infamous Vikings were such feared raiders and capable traders. Their light, flat and yet sea-capable boats, could be lifted out of the water and transported over short distances on land with relative ease, essentialy allowing them to go from shoreline into rivers or from river to river, saving time or bypassing defences. One of the most famous examples was using rivers in todays Schleswig-Holstein in Germany. By moving short distances over land between rivers they could go from the eastern sea to the norther sea and vis versa, bypassing most the entire coasts of Schleswig-Holstein and Denmark saving weeks or months of travel along dangerous coasts.
* The above example is immediately followed by a continuation of the gag; this example is perhaps even more impressive, as Daffy manages to pull this one off all by himself:
* the above example of her parents or go on to personally support him at a few key points of his past until they had already been together for a while.
* The above examples don't even account for all the as-of-yet unused characters. There's Black★Matagi's gunblade, Underworld Vulcan's rotary cannon, Maid Gunner's sniper rifle, Demon Cannon User's, well,
* The above examples from the '80s version, but the original had Barbara Bain's Cinnamon singing three originals in "Illusion," Greg Morris' Barney going undercover as a singer... but ironically the most musically talented member of the cast(s), Lesley Ann Warren as Dana, barely got to sing!
* The above fictional examples of taking data off of a computer by stealing the whole system and working on it later have a great deal of
* The above film's scenario is inverted (or at least played with) in its dueling movie
* The above goes double for right-handed pitchers. Righty pitchers who can't break 90 mph are generally considered batting practice pitchers, as right-handers can't get quite as much of a tricky windup or funky delivery between their positioning on the mound and their own body mechanics compared to southpaws. However, pitchers like Josh Tomlin, Marco Estrada, Kyle Hendricks, and Yusmeiro Petit have been known to log incredible performances and years, with Tomlin and Petit coming close to logging perfect games, while Estrada and Hendricks both made All-Star and playoff appearances in 2016 (as did Tomlin with the playoffs). This is mainly a factor of their near perfect control, but also of their tricky off-speed pitches (the curveball for Tomlin and Petit, and the changeup for Hendricks and Estrada) that they use to create separation in both movement and speed from their fastballs.
* The above goes double for video games. Trying to "help" a player advance through a game, in addition to denying the player the opportunity to figure out solutions on their own, such "help" deprives the player of gameplay experience, including bits of the storyline, and may conflict with the player’s style of play.
* The above having been said, it isn't a surefire thing, so don't assume
* The above incident inspires a lot of this trope when combined with the fact

Steven is often mistaken for Rose by Homeworld Gems. Jasper
* The above is a general description of piracy in Traveller, but the full version is that the degree in which piracy is a viable career and is even plausible varies to a great extent depending on the traveller version, and, of course, the GM. many Classic Traveller versions take the logical route, saying that because of the ability of System Defense boats (ships) to cover most of the immediate area around a Civilized planet, and the fact that a ship just has to get only a little distance away (relative to the scale of space) from a gravity well to be able to jump (and jumps are usually not able to be reliably traced, and impossible to intercept), pirates either must work very quickly and be lucky to find a ship in a position to be attacked, or they must attack ships shortly after leaving the dock of a smaller, outskirt planet(oid), which usually yields low value loot. This makes pirating very hard to do. Raiding a poorly defended planet is a lot more viable. Other versions usually introduce things that make pirates a lot more powerful, such as reducing system defense boat presence or the creation of trade lanes or the like. Even in CT though, already rich pirates have a better chance of establishing a sustainable operation, since they can afford high technology that makes their job easier, like EM jammers or jump drive disruptors.
* The above is a parody of an actual line used between Riza and Envy when they corner him. Roy has gone on the warpath against Envy
* The above is just one product of the very active speedrunning community. Among other things, every 2D game has now been beaten in less than an hour (
* The above is largely down to his being related to usual suspect Jean Grey, who, naturally, also has these abilities - and is exponentially stronger than he is. At one point, Harry speculates that she could drive the entire town of Bayville down into the Earth's core, and there is no indication whatsoever that he's mistaken.
* The above is only 40K. In WFB many high-strength attacks did a random (usually D3 or D6) amount of damage instead. Which means yes, a level 1 mage with 2 wounds can survive being hit with a cannonball. Chariot bodies, on the other hand, go pop when hit with one. There's also an Instant Death rule - Killing Blow - in FB, but that is a special rule, not a general one.
* The above is related to the fact that Jeb Bush is married to a Latina woman.
* The above is somewhat undercut by Hartman's own words earlier in the film: "...you will become dead marines. And then you will be in a world of shit. Because marines are not allowed to die without permission!"
* The above law has specific exceptions for the litigious application of this trope - if a seller or manufacturer was demonstrably negligent or malicious in their actions, such as knowingly violating laws and regulations in the course of their business for example, then they can still be pursued in court as an accessory to the crime and liable in civil court.
* The above link simply invites Tropers to download and read the manual...
* The above magnetic fluid metal tech is used by Lex Luthor inside the Kryptonian ship that crashed on Earth to communicate with the New God Steppenwolf in the extended cut of
* The abovementioned Agate, for his Dragon Dive ability, charges up and
* The abovementioned Britt was of course based on Kyuzo, the taciturn master swordsman from
* The abovementioned knights originally based their symbol on Thauglorimorgorus, aka Thauglor the Mighty, an ancient black dragon so old that his scales had turned violet with age - and since age equals power with dragons, Thauglor was one of the most powerful dragons in Faerun for a time.
* The above-mentioned Kuru and Mad Cow disease are both examples of Prion disease. Prions are especially terrible because they are both incurable and untreatable. Even worse is that individuals can spontaneously develop prions!
* The above-mentioned moray eel, and a number of other species of aquatic creatures.
* The above-mentioned "Richard Cory" example was expanded on in a song of the same title by
* The above-mentioned "Sabão cra cra" basically sings the praises of soap.

The lyrics say that (spoilered for, ya know, explicit lyrics)

* The above-mentioned Thundercracker is later commissioned to make a
* The above mention of Laura Bailey and Travis Willingham also counts here, with Bailey voicing Lucina and Willingham voicing Lon'qu (her potential uncle or father-in-law, or
* The above (obviously a reference to Spock) might also be a specific nod to a scene in the original series episode "The Corbomite Maneuver", which Sulu himself witnessed (and was quite amused by):
* The above only holds true when he is an adult. When he was a kid, he was far less merciful to the point when he claims he's going to kill you, chances are he will unless the person escapes, repents, or beat him. The Red Ribbon Army, Great Demon King Piccolo, and his children are testaments of this. It isn't until his training with God that Goku becomes more merciful, although it's never confirmed that it was the reason. Even then, Goku goes back to killing his enemies after the Freeza Saga and stops offering second chances. Even in Freeza's case, it was more
* The above page image is a good example. Doubly so when you consider the racial situation at the time.
* The above picture comes from an ad for Absolut vodka (a Swedish product) that only ran in Mexico. To say that there was a bit of backlash when it was leaked into the USA is putting it mildly.
* The above Pirates of the Caribbean example seems like an homage to
* The above point gets very much proven when Alfred renders a younger, highly-skilled intruder that was able to enter Wayne Manor despite its extensive security measures unconscious with non-lethal bullets and defends himself to Bruce thusly
* The above risk was exploited in a different manner by the notorious
* The above situation was inverted just over two centuries later when the French invaded the Netherlands during the wars of the First Coalition, taking advantage of a cold winter and the resultant frozen rivers/harbours to not only counter the above Dutch tactic, but also take the Dutch navy with
* The above spoiler is a valid tactic in American football in order to stop the clock.
* The above term has been latched onto by a mod developer; there is now an add-on for
* The above three, are probably considered the biggest three early Mummies, that you stand decent chance of getting your hands on. That being said neither were imagined in a vacuum. Egyptomania and fascination with Mummies were old enough to be parodied by Poe. There most certainly are other mummy stories, but given where they were most often published, having remaining copies of such mediums are now rare.
* The above tradition carries on with Prince Hussein of Jordan. Some dads take their sons fishing or deer-hunting, and
* The above two are combined when the quarians throw their entire race into a final war with the geth.
* The above two can also be grouped together, as the attack ended up being fatal to Jonathan in the first real encounter with it, but the story of the attack was passed down through Erina to Joseph, her and Jonathan's grandson. As a result, it never succeeds from the start on Joseph because he already knew how the move worked.
* The above two examples fall under an old military Murphy's Law corollary: "Professional soldiers are predictable, but the world is full of amateurs."
* The above two examples, plus the episode with the Roman planet, were actually retconned/handwaved/explained in much later released reference materials, where a scientist determined that sometime in the distant past, the Sol system passed through some kind of

* The above was also subverted: while Yumichika was hidden and thus able to use his true power to win, Ikkaku was fighting at the same time and wasn't hidden, leading to his loss. Then it's
* The above was true in stories before the late 1990s; with the success of the sitcom, Archie averted this by adapting some of the sitcom's elements into the comics. Thus, they gave Hilda and Zelda makeovers that made them look and act more like typical modern women.
* the Abrafaxe's No. 382) the alpha couple (Titus Julius Prudentio and Selene) and the beta couple (Trauthelm and Thusnelda) are shown with a grand total of twelve children. Nine of them are Trauthelm and Thusnelda's.
* The Abraham example is interesting because there are no tongue slips - everything he says is completely intentional - he just doesn't realize that he's hitting another one of Raven's
* The Abrahamic faiths have Azrael (meaning "Angel of God", "Help from God" or "One Whom God Help), the Angel of Death with the various faiths having their own interpretations and perspectives on him:
* The Abraham Washington Show on WWE's version of ECW, which has a late-night talk show aesthetic. Notable for having Tony Atlas in the
* The Abrams also drinks fuel. As in, 20 gallons per mile. No, not miles per gallon. It consumes about 20 gallons of fuel for every mile it travels. Without a steady supply of tanker trucks keeping it topped up, they quickly become very expensive, hard to kill
* The Abrams is ridiculously hard to permanently put down even by the full firepower of OTHER Abrams shooting at them. At best, you get temporary knockouts; one M1A1 took a hit directly in the rear from an Iraqi T-72 in the first Gulf War. The crew survived with minor injuries, the assailing tank was quickly destroyed, and the stricken Abrams was quickly recovered and repaired. There's also a story of an Abrams that got bogged down and four T-72s decided to rush it. None of their shots penetrated. The Abrams killed two of them, shot the third as it was running away, and the forth hid behind a sand berm. The Abrams, using the thermal imaging camera, was able to see the hot exhaust rising and shot through the sand berm, killing the final T-72. When other tanks came, it was decided to abandon and destroy the Abrams rather than have to get up specialized equipment to pull it out (the other tanks couldn't). The other tanks tried to kill the now-abandoned Abrams but couldn't. One round exploded the ammunition magazine but the blowout panels directed to force of the explosion upwards. Eventually, a tractor came and pulled it out. The turret was sent back the the US for examination and the tank got a new one and was back in action pretty soon.
* The abrasive Charles Marimow, who is put in charge of the Major Crimes Unit in season 4, voices pride in having worked his way up to the rank of Lieutenant from the bottom. If he ever was competent at any of his prior positions, he certainly isn't at his current rank. His attempts to bust the notorious Stansfield gang can only be described as an
* The Abridged Chronicles lampshades this trope. It was also probably the most well-animated and choreographed fight of the whole season, despite how short it was.
* The Abridged Series, however, as this logic sometimes backfires on them.
* The Abridged Series, now a genre unto itself with multiple variations.
* The Abridged Series, that show was created in 1981, so it still counts as a "newest one in the book".
* The Abridged Series. The whole point of them is that they're fast-paced comedic retellings of popular shows, so the jokes come as quickly as everything else.
* The Abridged Series was announced to be effectively over with any possible continuation to be done as web animation.
* The Abridged Series where a work is abbreviated and alters character personalities and plot points to make the story funnier.
* Thea briefly teases Oliver by revealing that due to the Queen's mansions old/thin walls she could hear him having sex.
* The absence of a navel is pointed out when one of the creatures from

* The absence of certain valuable deeds is a vital clue in "The Norwood Builder".
* The absent-minded cleric Piffany provides the moral center for the group in
* The absent-minded Dory can never remember the name of Marlin's eponymous son, calling him at various points
* The Absentminded Fellow for the titular character being him putting his arms through the sleeves of the shirt - before realizing these are actually pants.
* The Absent-Minded Professor, Alonzo Hawk sees Professor Brainard flying his Model T and asks his son Biff what it is.
* The Absent-Minded Professor, he didn't think this was enough of a problem to alter it for the remake.
* The Absent-Minded Professor IRS Agent Harker gives the Brainards a tax bill for far more money than they have and refuses to cut them any slack, even though the federal government has unjustly confiscated the source of income they based that tax estimate on. He also fondly recalls that he arrested his own mother for not reporting bake sale money and makes a note to tax a preadolescent paperboy.
* The Absent-Minded Professor. The Army and Air Force generals squabble with the Navy admiral over who should get the rights to Flubber.
* The Absent-Minded Professor The ridiculously tall Rutland basketball players are quite petty, as shown when they go out of their way to smugly hold the basketballs just out of the Medfield players' reach and condescendingly pat their heads.
* The Absent-Minded Professor untranslated to preserve its novelty value.
* The Absent-Minded Waiter as the waiter. His absent-minded blundering starts small-scale, when he asks for their order without giving them menus, and gets bigger-scale, like when he pours water all over the dinner table because he forgot to set the glasses down first.
* The absolute ending of the clip for remake of Ronnie Hawkins' "Mary Lou" (the same clip that had an
* The absolute king of this trope in Yu-Gi-Oh! is Star Eater. The name says it all.
* The absolute king of using money to flout rules, though, was Standard Oil owner John D. Rockefeller, businessman extraordinaire and, for a long time,
* The absolute nadir of this trope is the Seravee variant that appears in the manga. It has three Seraphim units attached to its back, all of which are capable of fighting independently. When attached to Seravee, they can each pull out two arms, meaning that Seravee can wield a total of 10 beam sabers at once.
* The absolute top end, the High Lords of Terra, is one hundred percent meritocratic and anyone who can't keep the post is assassinated by a subordinate or someone else. The current
* The absolute worst may come from a guy named Porter Stansberry, a supposed financial analyst who has been disciplined by the SEC for fraud. He's spent the past year flooding the internet, TV and radio waves with ads suggesting the that one of the most important dates in US history is coming and directing people to a website (whose URL is constantly changing). The site features a video with text and voiceovers only, explaining that the US dollar and economy will definitely collapse within the next year because all other nations are on the verge of agreeing to refuse US dollars (even though doing so would voluntarily ravage those countries' economies) and that the US government will respond by taking away everyone's money and sealing off all entry/exit to the country, so you need to get your money out of the country NOW (but then how will you get to it if the government is going to shut off access to other countries?). What's more, the narrator keeps saying that you MUST believe him because he correctly predicted the collapse of General Motors, Freddie Mac and Fannie Mae (news flash - a lot of people did). Oh, and did we tell you he knows the one thing that will not only save you but actually make money when this occurs, and he'll send you the booklet about it for free - IF you sign up for his $50 a month newsletter? (Spoiler alert - it's "buy a farm.")
* The Absorbing Man and Titania were married. Absorbing Man left her because Titania couldn't let go of her fixation with
* "The Abstinence" showed what happened to a man or woman if they abstained from sex for some time. George's girlfriend gets mono and they can't have sex for six

weeks. In that time, George ends up becoming significantly more intelligent and starts fixing most of the problems in his life along with learning at a great pace. Jerry explains to him that previously, 99% of his brainpower was focused solely towards getting sex, and now that he's resigned himself to not getting any for a while, that part was finally free to think about other things for the first time ever. After the six weeks are up, George decides that he prefers being smart and breaks up with his girlfriend, planning to abstain from sex from the rest of his life... until the Portuguese he learns helps him pick up a hot Portuguese waitress (he did the math in his head and determined that it was a once in a lifetime opportunity, so he took it). After he has sex he immediately reverts back to normal. Meanwhile, Elaine sees what has happened to George and stops having sex with her medical intern boyfriend so that he can get smart enough to finally pass his doctor's licensing exam (he's failed it several times already). While this works, Elaine herself becomes significantly
* The absurdity of this sort of thing is pointed out when a cult with rules like this tries to recruit Artax and Yeagar.
* The absurdity of what can be done with the power of a Devil Fruit is frequently lampshaded in
* The Abundance, does it again: Everything is wrapped up and the characters get a happy ending...except Princess Celestia and Luna's adopted father, Lord Tydal, escapes from the afterlife to warn them that the precursors to the ponies are coming and will be bringing hellfire with them.
* The Abundance, the chapter begins with a quote from The Lord of the Rings saying there is no hope and things look that way: Twilight has been taken down by Loyalty, Scootaloo is dead, and Faith has gone missing after being mortally wounded. To twist the knife, Loyalty captures The Doctor and Dinky Hooves and sends them plummeting to their deaths. It is then that Derpy Hooves, who spent the entire story catatonic due to her daughter being taken, performs a freaking Sonic Rainboom, showering Cloudsdale in light. Twilight breaks free, Scootaloo's heart starts back up, and Faith, seeing the Rainboom, turns the massive airship he stole towards Cloudsdale. The chapter ends with another LOTR's quote: Hope… is kindled.
* The Abyssal, Alchemical and Infernal Exalted also fit this. The first two are immortal, due to being undead/robots respectively, while the Infernals replace the Dragon-Blooded in being the shortest lived Exalted, with a lifespan of only 150 years.
* The Abyss, all of which are listed below, and came out in 1989 and 1990.
* The Abyssals claim they're morally "more worthy" of Earth and despise mankind for its misdeeds, yet conveniently overlook the equally or even more heinous wrongdoings of their commanders.
* The Abyssals, on the other hand, get Resonance. If, for some reason, they decide they don't want to go along with their masters' goals of
* The Abyss and even seem to have based all their technology around it.
* The Abyss, as Lindsey Brigman is preparing to intentionally drown herself to enable an escape from a flooding mini-sub, she comments, "This was maybe not such a good idea..."
* The Abyss, a strange and almost beautiful version of this plays completely wordlessly. Lt. Coffey is in one sub that's about to slip down the wall of the abyssal trench; Lindsay Brigman is in another sub, nose-to-nose with his. As his sub slips, both Coffey and Lindsay instinctively reach towards one another, but all they can do is put their hands on the inside of their own glass.
* The Abyss. At the start of the movie they're in the middle of a very bitter divorce, but a few near-death experiences remind them that they still do, in fact, love each other, to the point of being willing to die for one another.
* The Abyss, Bud Brigman tries a more casual approach when confronted by aliens: "Howdy. Uh... How are you guys doin'?"
* The Abyss, but then suddenly, an oxygen check is asked for and the guy only has 5 minutes of oxygen left, and it took much longer than that to get down there...
* The Abyss (Chaotic Evil) is infinite layers of mind-bending horrors. They never

go into detail as to what they look like, but it's not a leap to assume that every world shape is eventually accounted for.
* The Abyss-class battleship, created by the forces of Chaos in preparation for the Horus Heresy was said to dwarf the aforementioned 26km long ships, being mentioned as rivalling the Phalanx in size and firepower.
* The Abyss: Dr. Lindsey Brigman visits the Deep Core underwater drilling rig on which Virgil "Bud" Brigman, her ex-husband, is the foreman.
* The "Abyss Feeders" are monstrous yoma shaped into a human form. They appear as mindless, almost-naked women with their eyes and
* The "Abyss Feeders" have probably been killed during the plot of the manga all or almost all.
* The Abyss film, his being a basically good guy was pretty much guaranteed from the get-go.
* The Abyss has a few layers that fit this trope as well, as the Outer Planes' nature means they're under no obligation to restrict themselves to rational ecologies. Ahvoth-Kor, the realm of Angazhan, the demon lord of apes and jungles, is a hellish rainforest watered by rains of blood and home to demonic versions of normal jungle predators. Gluttondark, the realm of Zevgavizeb, the demon lord of caverns, reptiles and predators, is a series of jungle-filled caverns roamed by dinosaurs, giant bats and Zevgavizeb himself.
* The Abyss has an interesting variation of this trope. Two characters find themselves trapped in a sinking submarine with only one diving suit, so one character lets herself drown thinking that the very cold water will make her go into hypothermic shock and slow her body functions enough that she can be carried back to the underwater rig and be revived (see "Real Life" below). It works.
* The Abyss has a twist — the crew of an experimental seafloor habitat encounter aliens, but these turn out to be benign (ish), and one of their own members is the real threat.
* the Abyss has leaked into the material world, the sky is as twisted and corrupted as the land. The sky itself, when the near-constant cover of sullen, roiling clouds breaks up, tends to be a variety of unpleasant colors — gray, green, purple, yellow, red. Oily, foul-smelling and often toxic snow and rain fall from the skies alongside showers of blood, insects, burning ash or worse, and in the most corrupted places even the celestial bodies aren't right — the sun rises and sets irregularly and in the wrong directions, and the moon and stars often appear too few or too many, or even to be ones which should shine on different worlds altogether.
* The Abyss includes a woman called "One Night". The cast list reveals that her full name is Lisa "One Night" Standing.
* The Abyssinial-Adal War was essentially a proxy conflict between the
* The Abyss. In the opening scene a U.S. Navy submarine is tracking an unknown underwater object by sonar. The sonar blip is projected on a screen, showing the object maneuvering near the sub in the traditional (but incorrect) depiction of a sonar display.
* The Abyss it implodes immediately. When there is a small crack in the hull of another minisub at its normal operating depth, it slowly fills with water, albeit higher than the level of the crack.
* The Abyss, most memorably Bud and Lindsey's disabled runabout, where Lindsey gets the idea to allow herself to drown on the remote chance she could be towed back to Deep Core and resuscitated.
* The Abyss of them a chance of survival: she drowns, and Bud drags her body to safety, and hopes she can be revived. Bud is the stronger swimmer, so Lindsey has to drown. Bud's initial response is "Fuck logic!", but he soon comes round.
* The Abyss on her face, ramming into Coffey's mini-sub until the engine shorts out and sending him plummeting into the trench, where the increasing water pressure eventually crushes his sub with him in it.
* The Abyss so that they are distinguishable even under colored lighting.
* the Abyss's slipstream core to "solidify" the entrance. Beka's reaction:
* The Abyss, the marriage of Bud and Lindsey Brigman was on the rocks because they

fought all the time. The deep sea rig they're in is cut off from the surface during a storm, and while they await rescue, they fall in love again.
* The Abyss: The underwater aliens had the ability to control water, from a harmless water tentacle to making continent destroying tidal waves all over the planet.
* The Abyss version of this in the early descent scene, as she explains the (plot critical) perils of prolonged deep water diving to a SEAL team that is thoroughly familiar with them. They end up finishing most of her sentences for her.
* The Abyss was reportedly furious with Harris for this and took action by placing air fresheners in all the actors and crew members' suits to help ensure that there was no repeat of the incident.
* The Abyss. While suffering from paranoia, Coffey decides to destroy the aliens by sending down an armed nuclear warhead.
* The AC-130 gunship is a weaponized cargo plane, which is created by taking a normal C-130 cargo plane and adding guns on one side.
* The AC-130 gunship. It's simply a Hercules cargo plane with guns and ammo rolled on board, pointing out the port side. The AC-47 and AC-119 having a similar history, being armed versions of the C-47 Dakota (better known as the DC-3 airliner) and C-119 Flying Boxcar tranports.
* the AC-130. it's is informally classified as a flying artillery platform. I mean just look at that thing.
* The AC-130u "Spectre" Gunship and other variants of C-130 cargo plane that replace the cargo with a
* The Acacia Strain mixes elements of metalcore, beatdown hardcore, djent, sludge metal, and death metal into a package that, while accessible, doesn't really fit into any easy stylistic categories. While commonly called deathcore (a label vehemently disputed by Vincent Bennett), they don't really fit into that genre either; the easiest thing to do is just call them metalcore and leave it at that.
* The Academic Decathlon "resource books" are absolutely full of nerdy jokes and pop-culture references.
* The Academy City forces settled this by bombing the power generator feeding the Kremlin Report.
* The Academy Is - "Everything We Had" ("Take the pain out of love and the love won't exist...")
* The Academy Is... has Mike Carden (rhythm guitar) and Michael Guy Chislett (lead guitar). Before Chislett joined the band, the very first lineup included Mike Carden and Mike DelPrincipe (drums).
* The Academy Novels: The Omega Clouds are gigantic, mysterious artifacts which travel through the galaxy, coming in waves about 8,000 years apart. They investigate planets they pass, and rain down electrical death from the skies on any civilization foolish enough to use right angles in their architecture.
* The Academy of Motion Pictures & Sciences also seems to suffer from this problem. Many actors have received Oscars over the years because they played a pitiful person who suffers from some kind of disease, handicap or problem in a high profile movie released that same year. Or because they played an admirable humanitarian activist or historical character. The award in those cases seems to be more a reward for the hardships or good deeds the character underwent or did in the movie than the performance itself.
* The Academy of Tomorrow (Emma Frost, Sunspot, Cannoball, Polaris) and Longshot, Forge, Detonator and Hardrive were all listed as dead at the start of issue 3.
* The Acamarian Gatherers from "The Vengeance Factor" qualify for this trope, being rootless spacefarers surviving on what they can find or steal.
* The Acamarians from "The Vengeance Factor" used to be this, but consider it
* The acapella act Straight No Chaser also mashed it up with Jason Mraz's "I'm Yours".
* The Acari X parasitoids from the Ryugu Shelter arc seem to function similarly, except they seem able to live for a good few months before any effect is really noticed.
* The Accelerated World, accessed with the command "Burst Link". This projects the

user into a blue-tinted VR version of their surroundings (resembling a
* The accepted icons for saving (a floppy disc) and a movie (a roll of film) are both representations of entirely obsolete technology — but likely to last longer than the memory of the media themselves!
* The Access Jacks implant, which allows users to hook their brain to machines via fiberoptic cable, if you prefer your connection faster and impossible to intercept.
* The accidental activation of a fictional website similar to "You Were Left Behind" (see "Real Life" below), notifying those Left Behind that the Rapture has occurred, was the event that triggered the discovery of the body in the
* The Accidental Billionaires, twins Cameron and Tyler Winklevoss approached Mark Zuckerberg to help them create a new social network called ConnectU. Their partnership lasted for three months, and ended acrimoniously when Zuckerberg went behind their backs and started his own social network. That network, Facebook, is the largest social website in the world, while ConnectU maintained a comparatively-miniscule user base before going inactive.
* The Accidental Evolution of Rock 'n' Roll, Chuck Eddy introduced his "Gladys Knight and The Pips Rule": good songs should mix seriousness and frivolity. It was based on "Midnight Train to Georgia", where Knight's earnest, poignant lead vocal is juxtaposed with The Pips' rather silly-sounding backing vocal interjections.
* The Accidental Husband, the title character arranges to become married to the host of a relationship talk show as payback for having advised the former's girlfriend to break up with him.
* The Accidental Space Spy, Datimas are born female, but can become male if they are successful enough.
* The Accidental Space Spy explores evolutionary biology using bizarre aliens as examples.
* The Accidental Space Spy: One of alien spies have this, the real body is just a oval. Rest of parts such as hands, eyes, etc were parasites but later adopted to mutual status.
* The Accidental Space Spy, the protagonist must look up proper etiquette of an alien species and quickly tell it to a member of that species so she can convince the guards she is high-class enough to be admitted to the inner hall of the president’s party.
* The "accidental" spill variant was used by Vicky the babysitter in
* The Accidental Superheroine, chooses to side with humanity rather than Orlov, although she has the occasional second thought about it when government organizations attempt to capture her for experimentation.
* The Accidental Superheroine, notes that forming pockets in her malleable body to carry things feels like a completely different sort of orifice, particularly when cellphones placed in there vibrate. Later, she envelops Giancarlo to rescue him and notes that it's an incredibly intimate and erotic experience.
* The Accidental Superheroine, Orlov claims to have engineered their empowering event at the LHC, but he also seems completely ignorant of how it works.
* The Accidental Superheroine seem to fit this trope. With complete control over their bodies, they're naturally invulnerable, don't age, and no longer need food, air, or water.
* The Accidental Time Machine, but with a twist that gives new meaning to the rest of the story.
* The Accidental Time Machine by Joe Haldeman, the main character visits a future in which the northeastern part of the United States has become a theocracy and closed itself off from the rest of the country.
* The Accidental Time Machine is this for a very long time. Averted in that it is eventually figured out, once technology has progressed for a couple billion years.
* The Accidental Time Machine was published in 2007 and begins in 2057.
* The Accidental Tourist, and the trope is invoked In-Universe by Sarah in the book, who says that Macon and Muriel will be one of those couples at a party whom no one can figure out why they're together. Macon is briefly distracted by this thought, having had those thoughts about others and now was a living example.
* The Accidental Tourist invented a card game called "Vaccination", which after

decades of refinements has become so convoluted that no outsider could possibly learn how to play it. Except for Julian, who marries into the family; when he learns the rules, lead character Macon Leary is so impressed he withdraws his objection to Julian marrying his sister.
* The accidental wish variant and the "don't break the rules" variant are both in effect on an episode of
* The Accident Man does this to bad men to create highly deniable operations.
* The Accident Man. She genuinely loves Carver, but keeps winding up in situations where she needs to pretend otherwise to save his life, and she's too good of an actress.
* The accident that created Mojo Jojo, on the other hand, could be replicated, and Mojo indeed used it again and again to create more hyperintelligent primates as his first big scheme. However, every single one of said primates went rogue and attacked everyone equally, including Mojo, which is why he hasn't tried it again since.
* the accident that killed his baby brother Eric. This convinces Roy that the vampire isn't actually his friend, but a monster that has hijacked their corpse, and he starts fighting more fiercely as a result.
* The accident which caused the deaths of 99.9% of the crew of was described in the novels as happening this way.
* The accompanying literature mentions "Gellar fields", which are used by Imperial ships to protect themselves while travelling through
* The accompanying television commercials show a montage of people reacting to the taste of the cough syrup, some of them looking like they are going to heave.
* The Accords of Vo Mimbre decree that an Imperial Princess of Tolnedra shall marry the
* The Accountant the protagonist is one, though he generally works for criminals to find out who's been pilfering their ill-gotten gains. The investigator after him finally gets a break by using the same trope to discover his money-laundering fronts.
* The Accountant: Two brothers with a family farm drowning in debt finally realize that the only way to save the farm is to kill the one brother's unfaithful wife for the insurance money.
* The Account, a podcast audio drama, haven't shown much of themselves, but they're universally acknowledged as bad news in the Midlands, where the story takes place. Earth, which is separate from the Midlands, seems to be the only place they have very good PR.
* The Account, a podcast audio drama, one-third of the humans in the Midlands turned into an army of psychopaths and got exiled to Earth. No one quite knows why. Now that they're trickling back in, and apparently sane, they're treated somewhat gingerly by the natives.
* The Account, being knighted grants a person a number of special abilities, among them a "weapon" of magical energy that's traditionally named and proclaimed when it's used. The protagonist's is Burst Punch, which more experienced knights find a tad lame.
* The Accursed Kings: In the final book, one sequence shows what happens when the executioner isn't a professional: an underfed prisoner assigned to perform the execution (having committed four murders) utterly botches the job, needing to hack away at one victim's neck half a dozen times before finally managing to separate the head from the body. The narrator notes that the executioner might be more pitiable than the prisoners.
* The Accursed Kings mines or just negotiating) to take a minor fortress, more or less living out his fantasies of being a Crusader at Jerusalem (note that gunpowder artillery is already commonplace by the time the book takes place). The tower is built, loaded with soldiers, pushed up to the walls... and promptly blown apart by cannonfire. The siege ends when the defenders agree to leave in exchange for money.
* The Accursed Kings, new King Philippe V promises his five-year old daughter to the grown-up duke of Burgundy, who accepts after seeing that she has no physical deformity, and sends her off to be brought up in Burgundy.

* The Accusation, ends with the narrator telling his friend (via letter) about his plans to escape from North Korea with his wife, risking death or worse. Whether they succeeded in fleeing is left wholly unanswered.
* The Accusation. Given that they live in North Korea, where Marx posters are everywhere and signs of dissent are harshly punished, this causes Gyeong-hee no end of grief.
* The Accuser Dan Mason claimed he did his job and was "proud of it". His wife even complained he was "too good".
* The Accuser started with the protagonist, Dan Mason, in a hospital bed, motionless, hearing the doctors mentioning that his wife was dead. Then we get flashbacks of his career as a criminal defense attorney and how it led to his hospital bed.
* The Accuser: That's what Dr. Pirot gets for helping a serial killer to survive execution.
* The Accuser, used to be a criminal defense attorney who didn't care if his clients were guilty or not as long as they paid for his services.
* The Accuser: When a lawyer is found dead, one of the cops assigned to the case hinted that the victim's former legal partner might have something to do with that. When another one mentioned mentioned said partner's handicap (being wheelchair bound) as a reason to rule him out as a suspect, the cop who accused the victim's partner invoked the trope.
* The Ace: A character who great at everything and always wins the affection of their love interest.
* The Ace. Again like Kageyama and Hinata, their names also reflect this with Nishinoya Yuu meaning “Western Valley Evening” and Azumane Asahi meaning “Eastern Peak Morning Sun”.
* The Ace: Being good at something hard makes you a badass. Being the best? That's even more badass.
* The Ace - Carleton, William Shan, Lonnie Henderson, Anthony Piccolo, Tyler, J.J. Fredericks, James Brody (sub-fighter), Heiko Kimura (sub-fighter)
* The Ace (especially since her mother is never mentioned), so who exactly is the favourite child is up in the air.
* The Ace. However, their subsequent attempts to have a child weren't as lucky; Rhaella miscarried thrice, gave birth to two stillborn children, as well three children who died less than a year old. The continuous failure to secure his legacy probably contributed to Aerys' descent to madness, as his marriage to Rhaella went from amiable to toxic. Rhaella eventually gave birth to Viserys and Daenerys, but by then Aerys had become the Mad King and brought the downfall of House Targaryen.
* The Ace is revealed as one in the cooking competition sidequest. Yuri notes that he's great when he sticks to the recipe, but his sense of taste is so terrible that when he modifies a recipe, he ruins it.
* The Ace. Littlefinger, Varys and Olenna Tyrell all have high respect for his intelligence and ruthlessness. His son Tyrion even allows that "father has a good mind for strategy".
* The Ace. Needless to say, Elsa finally gets pushed over the edge, though her intentions are always good.
* The Ace of Hearts: The "brotherhood" is a group of terrorist bombers. Although the implication is that they are left-wing or Bolshevik terrorists, the film actually never does state just what it is the brotherhood is trying to accomplish. The only hint comes when their assassination target is eventually revealed as an arrogant rich fat cat.
* The ace of spades was left on dead Vietnamese soldiers by American troops in the
* The Ace of the class, so Bakugo declares him the one to be defeated. Todoroki does acknowledge Bakugo's skills, but thinks his rival is Midoriya. During the Sports Festival Arc, Todoroki and Midoriya become rivals, while Bakugo becomes the third wheel for their rivalry doing his best just to get the attention of either. Later, when Midoriya and Todoroki become friends, Bakugo is still trying to get Todoroki to be his rival.
* The Ace of the team. In some cases the captain may be given the responsibility of

interacting with game officials regarding application and interpretation of the rules.
* The Ace-Ops tell Ren, Jaune and Yang that, when team members die, the team should just move on and replace them with someone else, essentially arguing that personal bonds and the pain of loss are meaningless. Ren explodes at that, furiously telling them that no-one is replaceable. While this has the obvious in-universe connotations of what Jaune, Ren and Nora went through after their team-mate Pyrrha died, the line takes on a reality subtext for those fans who know that Ren's voice actor,
* The Ace skills in favor of being, at most, somewhat stronger than the average Transformer. And Emirate Xaaron was made a glorified extra who is only occasionally implied to hold anything like the high position he did in the original comics.
* The Ace, whereas his own hamster Chuckie Sue either can't or won't do a selection of things. This leads to a brief feud.
* The Ace, who had pretty much been a racist asshole to her the entire episode.
* the AC font: AI dialogue to show their synthesised voicebox, and giving proper gravitas to the words 'In SPACE!'.
* The Achaemenid Empire, as it also unified the Middle East, at least for a few decades.
* The Acharnians, one of the most famous among Aristophanes' surviving works. Cleonymus of Athens was a real-life general and politician, who reportedly threw away his shield during a battle and run for his life. Aristophanes often mocked him for his cowardice. More that 2000 years later, most people (including scholars) know Cleonymus due to Aristophanes' jokes about him, rather than anything he did in life.
* The achievement "The coolest of numbers" is earned for having a constant of 6.9e21.
* The Achilleid: Achilles is so embarrassed about dressing as a woman that Thetis has to put his dress on, do his hair, and pick out the jewelry he'll wear to complete his transformation into a full-blown babe.
* The Achilleid, Achilles throws off his disguise and reveals to Lycomedes and his daughters that he's not Thetis' daughter, but, y'know, Achilles. In the same moment, he also lets Lycomedes know that he married his daughter, Deidamia, and had a child with her.
* The Achilleid, and even then, Ulysses immediately sees through the disguise anyway.
* The Achilleid begins by citing Homer, the audience knows that despite Thetis' best efforts, she can't stop Achilles from joining the Greeks in the Trojan War.
* The Achilleid shearing all their sheep to provide soldiers with clothing and the legendary Mount Othrys being stripped for its steel and stone.
* The Achilleid tells us that in just three breaststrokes, she travels from the bottom of the ocean just outside Troy to the shallows of Thessaly, which in real life are over one hundred and fifty miles away on opposite ends of the Aegean Sea.
* The Achilleid: The first thing the girls of Scyros notice about Achilles is that he's a full head taller than any of them, and it's not long after that that Achilles secretly marries one of them.
* The Achilleid. The narrator puts a lot of time describing it with a weird metaphor about blood spilling into milk.
* The Achilleid, when Achilles falls asleep after reuniting with his mother and ends up snuggling to sleep with the old centaur, more comfortable with him than his own mother.
* The Acid Queen is definitely framed as immoral and insane. This is emphasized by her demonic red lipstick on her
* The ACLU (American Civil Liberties Union) is built around this trope. In one instance, the ACLU represented a pedophile — and won — due to the fact that the case hinged on an issue of free speech. They also defend or otherwise work to protect the rights of those harmed by racism, sexism, or over-zealous (or just flat-out corrupt) law enforcement.
* "THE ACLU HAS A SORTED PAST READ SOME SHAMELESS FACTS", where this translates as

"The ACLU has a really good past".
* The ACME Bowl", but what can you expect from a school whose motto is, "We Never Lose"?
* The Acolyte "builder" unit of the undead has, like all the other units in the game,
* , the Acolytes (Gambit, Pyro, Collosus, Sabertooth, and Mastermind) are sent on a time travel frenzy thanks to Forge's soap-powered time machine. During their travel, they cause the Great Fire of Moscow, the legend of Paul Bunyun, the naming of the French Foreign Legion, and the mass extinction of Mars billions of years before the present. They also run into past versions of several Marvel characters, including Professor X, Magneto, and Captain America.
* The Acorn Princess follows two gay couples—the titular princess and her knight Nutalia, and the Flower Prince and his lover Beetle. Nutalia and Beetle are the more masuline of the pair, the former being a coolheaded and dashing figure while Beetle is muscular and boisterous, while Acorn and Flower are more softspoken and sensitive.
* The acquisition of Dragon Balls becomes increasingly trivial as the series goes on. While they were meant to be brought together only after a lifetime of searching by a very dedicated person, Bulma's Dragon Radar allows the heroes to collect them all within the span of a single story arc. Later sagas often have them acquired within the span of a single episode or even
* The Acquisitive Chuckle": Dr. Asimov originally titled this story simply "The Chuckle", but the magazine editors who bought the story renamed it, and Asimov liked the change enough to keep the new name when he inevitably reprinted the story.
* The acrimony between Amy Sherman-Palladino and Warner Bros. was so great that when she couldn't be signed on for a seventh season of
* The acronym is hard to pronounce, often due to having too many consonants stuck together (e.g. GLPNSF).
* The acronym puts meaningless words in just for the sake of spelling a word. (pineapple, unicorn).
* The acronym skips words that are more substantial than "a", "of", "for", etc.
* The acronym TARDIS is in the Oxford American Dictionary, as "a time machine" or "a building or container that is larger inside than it appears to be from the outside."
* The Act, Dee Dee and Gypsy leave because of Hurricane Katrina, and Lacey wears spaghetti strap tops. Their house was built in 2008.
* The act ended with McCay appearing to climb onto Gertie's back (actually, he stepped through a hole in the screen, and a filmed copy of himself climbed onto Gertie), and the two rode off into the distance, which resulted in
* The Acting Secretary of the Navy then flew to Guam to address the crew of the
* The Action Comics logo has achieved a similar iconic status. While it was unused for a while, it was brought back early this decade to much fanfare.
* The Action Hero's Handbook devotes a chapter to "How to Save Someone Who's Hanging From a Cliff".
* The Action Hero's Handbook has a chapter on communicating with extraterrestrials, and suggests starting with basic concepts like numbers and shapes because the authors of the book believe that no matter how alien the culture is, they would still be able to have dialogue about that, especially if they're able to go into space.
* The Action Hero's Handbook is dedicated to teaching the reader how to invoke this trope.
* The Action Hero's Handbook — "How to Interrogate a Suspect" discusses common perp sweating techniques and how to tell if a suspect has something to hide.
* The Action Hero's Handbook — The information is fairly accurate, but it advises you for situations you'll probably never run into yourself, and it's not a good idea to try any of it yourself.
* The Action Hero's Handbook: the chapter on communicating with extra terrestrials assumes that any aliens you're lucky (or unlucky) enough to encounter would be

these, but holds out the hope that they would still be able to recognize concepts like numbers and shapes. (The book reasons that any life form capable of the level of technology necessary for interstellar travel would at least have the alien equivalent of astrophysics.)
* The action-packed "Coffee Quest" followed by the tearjerking "Phoenix Rises" are preceded by "Dinner Party". They are then followed by the nightmare-fueling "Blood Moon", which precedes "Big Deal".
* The actions of the clones are attributed to Mikoto, for example Mikoto's teacher thinks that her student has been shooting a gun in public (Mikoto never uses guns but her clones do).
* The active components in Skunk spray have been released to the public in recent years as a toothpaste-like gel. Already, some police services use the
* The Activision joystick was to hold it between their thighs. The sight of a room full of young men playing this way inspired some off-color nicknames for the game.
* The act of calling a parrot to the stand in the first game seems ridiculous (the person who brings it up as a possibility does so to mock Phoenix), for good reason, but in actuality, such a thing has happened in real life trials before, and the idea of using words a parrot can speak as legal evidence is something that has happened before. The absurd part is how the game presents it in the context of such a serious moment in a murder trial, along with the way the parrot's cross-examination is treated in the same manner as that of an ordinary person's, rather then how it would realistically be if you were to use a parrot's understanding of human language as proof.
* The Act of Killing deconstructs this — the gangsters are perfectly happy with their lifestyle, and society celebrates them, but the focus is on the atrocities they have committed.
* The act of leaving the Speed Force has became this. Mark Waid, who introduced the Speed Force, had it so Wally West is the first person to ever leave it because of his love for Linda Park. However, he establishes that it's a near-impossible thing to do, and that a being can't exist in the Speed Force for too long without just merging with it. Wally does it one more time in Waid's run, when he gets stuck in the Speed Force after Abra Kadabra retcons Linda from existence and, again, he's forced to go too fast. Being in the Speed Force, spanning multiple realities, allowed Wally to see what had happened and he appears to Linda again in the alternate reality she became stranded in. That's it. Then Geoff Johns came along, and being "lost to the Speed Force" keeps everyone perfectly intact, so we have Barry Allen popping out of it to help Bart after
* The act of seeing would either be very good for both of the duo, or very bad for one of them.
* The act of SWATing (calling SWAT with a false lead) someone who is streaming online is done for no other reason than to have the person humiliated online
* The actor only claims to do their own stunts. (Readers should take many of the examples below with a grain of salt, as false claims that actors "really" did stunts have always been a popular way of getting publicity.)
* The actor playing Billy Flynn is seemingly given license to hold that penultimate note for as long as they want. And, if you think that 23 seconds is a long time, the current (at least, as of April 2016) record holder goes to Jason Danieley, who managed to keep the note going for
* "the actor playing Joseph McCarthy" was "too over-the-top". The film used actual archived footage of the real McCarthy.
* The actor playing Mace is far less aesthetically pleasing than his book counterpart, who is described as being fat, but still good-looking enough that one can easily see that he used to be a
* The actor playing the lead singer of the protagonists' band Dragon Sound was a professional musician who composed and performed all the film's songs. Unlike the rest of the cast, he had no martial arts background, so his character does not get into any fights.
* the actors direct the movies refused to go along with this, as it would be out-of-character for them, especially given the events of the previous three films.

* The actors in the "Bloody Sunday" educational short look like they came from
* The actors often fairly resemble the characters, but the costumes are often completely different. Gone are the colorful superhero costumes of the comics, and in their place
* the actors that were initially envisioned to portray Crockett and Tubbs. Both men made appearances on the show in a single episode and still have had much more lasting success in Hollywood in the years since over Thomas.
* The actors who played Luke's friends at Tosche Station in the original film (Camie, Fixer, Deak and Windy) had their roles prior to release, with the sole exception of Garrick Hagon (who played Biggs), who saw his role cut down to just appearances on Yavin 4 and the Death Star assault.
* the actor was previously undecisive has Harry arriving, and doing some wordless overacting looking back and forth from Spidey to Gwen before delivering an overenunciated "Peter...".
* The actor who played Colossus (Daniel Cudmore) was intended to have a much larger presence in
* The actor who played Fiona Carter's husband later decided to move on. He was blown up by a car bomb.
* The actor who played the blood gang member with the shotgun who murdered
* The actor who played the evil preacher, Julian Beck, was actually that gaunt: he was dying of cancer and didn't need that much makeup to look like a skeleton.
* The actor who portrayed Vincent Crabbe in the movies wasn't available for the last movie, so Gregory Goyle replaced Crabbe
* The act performed by the possessed Dana Barrett and Louis Tully in
* The actresses who play Emma as a child and teenager are dead ringers for Morrison, especially Abby Ross as teenaged Emma.
* The actress playing her can pass as a teen, but the canon character is an actual child and one of the few young characters to not get an
* The actress playing one of the classic companions did a "Dalek porn" photoshoot for a skin mag, involving her posing naked with her genitals obscured by the plunger, caressing its gunstick, and so on.
* The actress suddenly wears lots of loose, baggy clothing and heavy overcoats to conceal the hump. This can be
* The actress who played Lexie was absent a lot, having taking time off to spend time with family.
* The Acts of Caine, Hari spends much of the book being harassed by Administrator Kollberg. At the end, he is arrested by the Social Police.
* The Acts of Caine has a voice that is usually described as rumbling.
* The Acts of Caine he tries to vent his anger against a gel punching bag that hardens against force up to the strength of human bone before resetting. Well before he's gotten the rage out of his system, he's easily, repeatedly working it over.
* The Acts of Caine, in ascending order of greedy bastardry: the Business caste, the Leisureman caste, and the Board of Governors.
* The Acts of Caine is a primary cause behind how he spends most of the novel kicking their asses).
* The Acts of Caine. Maybe that kind of "honor" just confuses the poor god trying to read him.
* The Acts of Caine. She's very much philosophically inspired by Caine, the series protagonist. She meets him in prison and is proud to discover Caine could hear her lecturing the other prisoners from his separate cell — until Caine explains that he was desperately waiting for someone to knife her.
* The Acts of Caine. Something as trivial as getting drunk and shouting at him is enough to get your jaw broken, minimum.
* The Acts of Caine: They are called Stonebenders ("Dwarves" is a racial slur used by humans) and do all of their stone- and metalwork with their bare hands.
* The Acts of Caine wear reflective face-concealing masks and speak through voice-altering devices. Their utter anonymity is actually an important thematic element.
* The act that would truly re-ignite the Boy Band craze formed on the next season

of the hit UK show
* The actual aliens are usually adapted to environments very different from Old Terra. The first alien race encountered by Terragen life, and one of the most psychologically similar to humanity, the To'ul'hs, originated on a planet that can be compared to either a cool and wet "Cytherean" world or a very hot and high-pressure Gaian world ((i.e., it's somewhere between Venus and Earth). Unmodified humans would quickly die of pressure, toxin or temperature overload on To'ul'h Prime's surface and the aliens wouldn't fare much better on Earth, although they've developed their own tweaks, some of whom are adapted to Gaian environments.
* the actual aliens found on Tau Volantis are theorized to have created a form of communication based on the gills in their necks that sounds like a series of horn blows. However, it is also theorized that this is not their native language, but a second language created so they could communicate with other life forms.
* The actual amount of time that passes in the Holy Land/Sanctuary vs the rest of the universe is incredibly wonky and often contradicts itself if it means letting a main character live. For example, in
* The actual Ancient Greeks and Romans who partially inspired these aesthetics
* The actual car is a 1983 Quattro (in 1981, the Quattro wasn't available in a native British format). Phillip Glenister admitted in an interview that the producers knew it, but...well, it was a Cool Car.
* the actual CEO of Daimler, and the accent and mustache are both real.
* The actual, documented Italian conspiracy known as Propaganda Due. Unlike many other such groups, it was illegal
* the actual editors of the comics On the other hand, it's played straight in some of the early stories from the 1950s and 1960s, where Archie tends to be put off by Betty when she comes on too strong.
* The actual finale of the series pretty much glosses over the creation of the Federation in one episode, all as a holodeck simulation to help
* The actual Freemasons have their own signs to identify other members, including secret handshakes (apparently
* The actual gameplay also demonstrates the corollary very well, especially on the harder difficulty modes: If you aren't jumping around like a frog on meth, you will be
* The actual historical situation was a bit more complicated, He wasn't actually cashiered for desertion; the charge was brought against him, but the evidence basically came down to the accused and another officer making contradictory claims, and both of them had a vested interest in
* The actual "horse" riding Na'vi cavalry is rescued by the metaphorical cavalry.
* The actual house, with the secret staircase, used by Hawthorne as the setting for
* The actual Imperial Navy tends to use poorly-trained conscripts for both its boarding actions and its defence against the same. They are basically a vast mass of cannon fodder with shotguns designed to shred soldiers while leaving corridors relatively undamaged to fit with the rules about Imperial Navy commanders not being allowed to have anyone useful in ground actions under their direct command. The Space Marines themselves take part in boarding actions generally only when their
* The actual longest-lived member of Congress was probably Strom Thurmond, who retired from the Senate at age 100. He had unsuccessfully run for President in the "Dixiecrat" faction of the Democratic Party in 1948, and the people of South Carolina continually re-elected him to office well into the new millennium.
* The actual name of what used to to be the British Commonwealth (and before that the British
* The actual number of times this has happened to various superheroes is too many to list, especially including characters
* The actual phrase "attack pattern ___" (typically Delta, Omega, Theta) comes up a lot when Sisko's commanding the
* The actual point there is to over-emphasize the hair loss in the "before" pic, which a high-angle shot will indeed do. Switch to the low-angle shot, and voila! Looks like he grew a lot of new hair!

* The actual poster of the video later got this, mostly due to them happen to be in the same faction as the female player that had just broken one of the male protagonist's hearts. On a side note, part of the audience was suspecting said female player to be working for him all along up to that point.
* The actual process is more complex. The insurance company must cover both the generic and the brand name. A higher copay on the brand name incentivized consumers to use the generic. The pharmaceutical companies then started giving manufacturer's coupons to consumers covering the difference. So if the generic drug costs $10 USD a month, and the brand name $100 USD a month, the insurance might ask for a $20 copay on the brand name. So by giving the customer a coupon, the manufacturer takes advantage of their brand name recognition. The insurance covers $80 USD for the generic. The brand name manufacturer profits, the individual consumer gets a brand name (they feel better, but it's pure placebo in most cases), the insurance company adjusts prices, and consumers collectively lose.
* The actual reason for using the minimal bare-metal finishes on the American planes, of course, was that it was
* The actual reason is an aversion, since there's a genuine plot-logic reason: if Gandalf uses his full power, Sauron will
* The actual reason was that they intended to use the Devil Gundam for their own purposes and Kyoji stole it to prevent such a thing. Oy.
* The actual scouting seems to be telepathic, but the rest is just specially adapted technology. Unless her motorcycle works by telepathy too.
* The actual series features a magazine named ViVi in the episode "A Hair-Raising Experience", which is actually a real Japanese fashion magazine.
* The actual situation on the ground gets considerably more complicated, with the Science side possessing the support of the Anglican Church and the Magic side supported by the Russian military, which is fairly technologically sophisticated but totally outclassed by Academy City.
* The actual skill percentage represents how good you are at that skill while under extreme duress. As in, other people are trying to kill you and the environment isn't being much more friendly. So that's a 55% chance to succeed in a very bad situation. When it comes to practice or formalized competitions, your effective skill is going to be much, much higher and can be performed very easily, meaning a 55% skill is extremely impressive.
* The actual status of is questionable, though. The trapie claims not to be able to move after falling for it.
* The actual Transylvania, complete with Castle Frankenfido, appears in another episode. Everyone has a vaguely German accent and there are mobs of villagers in Victorian garb carrying torches and pitchforks.
* The actual way he died: Not from cancer, but from a car accident right after his cancer went into remission. He was tweeting while driving (about how good it is to be cancer free) and he slammed into a truck. It was not the crash that killed him, mind you, but the fact that the truck was full of peanuts and he was deadly allergic.
* Théoden has his armour put on for him by Gamling and uses the free time to recite some (presumably traditional) poetry over a montage of the other men and boys of Rohan despondently taking up old weapons and putting on ill fitting armour.
* Théoden — maybe not as badass as he was in his prime, but still amazingly so given that unlike most other examples in
* Théoden's expression immediately before being bowled over by the Witch-King
* Théoden's heartfelt "Hail to the victorious dead!" speech in
* Thérèse Raquin centers on Thérèse and Laurent killing her husband, Camille, so they can be together.
* Thérèse Raquin. He wasn't much of a talented painter before the murder, but he keeps unconsciously painting his victim's face in variation. Once he realizes that, he gets scared and stops painting.
* Thérèse Raquin is made to look like Camille just fell out of the boat and couldn't swim rather than a murder.

* Thérèse Raquin. It was his mother's idea, and Mme. Raquin is the only one who's particularly happy about her brilliant plan.
* Thérèse Raquin, they are haunted by memories of Thérèse's first husband Camille.
* Thérèse Raquin, though she doesn't really mean to be. But she babies Camille and rules over Thérèse.
* Thérèse Raquin, though their marriage didn't involve much, if any, sexual activity.
* Thérèse Raquin was cosseted so much as a child that he's completely intolerable to everyone but his mother. She, of course, thinks he's the best son ever.
* Thérèse Raquin. We're never told if that's his first or last name.
* Thérèse Raquin where Thérèse and Laurent find Thérèse's husband Camille to be more of a roadblock than anything, but once he's dead they find that being constantly haunted by his memory is far, far worse.
* The ad: a lottery ticket in a refrigerator magnet tray gets covered by kids' drawings, report cards, blue ribbons.
* The Adama Maneuver. For sheer ballsy things you can do with several megatons of militarized metal, there is no substitute.
* The Adam and Eve skeletons introduced in season 1 are implied to be 50 or so years old and we're left with the impression that they were some loving couple who died on the island. In season 6 we discover that the skeletons are hundreds of years old and belong to the smoke monster's original form and the crazy lady who pretended to be his and Jacob's mother.
* The Adam and Joe Show in order to fix the TV. Adam is horrified, refuses to film any more and storms off the set while Joe complains that it's supposed to be uncompromising and "you don't understand my genius."
* The Adam Carolla Show. Adam's is Ace or Ace-Man, Engineer Matt "The Porcelain Punisher" Fondiler, Assistant Gary Half-Tard (and the now-fired Gary Full-Tard), Producer Chris "Maxipada" Laxamana, Assistant "The Stoned Pelican" Mike August, Agent James "Babydoll" Dixon, Newsgirl Alison "Baby Girl" Rosen, and of course Soundboard/Producer "Bald" Bryan Bishop. Frequent guest David Allen Grier is often referred to as DAG.
* The Adam Carolla Show, is notorious for never turning down free food, ever, even if he just ate and it's the same thing he just ate (famously once eating a free steak at a live show and then eating another one when Adam took the gang out later).
* The AD&D era had some of the more formidable spells involving sacrifice of the caster's hit points — either normal damage, permanent, or the loss incurable as long as the spell is active. This includes several spells from
* The Adam West Batman show often featured a scene where Batman and Robin were climbing up a building with a guest star coming out of the window. On three occasions, a fictional character came out instead. They were Lurch from
* The Adaran clones, who are used as slaves. Because of their status, Adaran religion declares they are soulless and lack any rights.
* The Adarian, a species of aliens with a large, naturally occurring hole in their head.
* The ad campaign also featured a series of faces ending in the "G" logo with no mention of Gatorade. It wasn't until well into the campaign that they used the faces of recognizable athletes.
* The ad campaign for Season 22 consisted of billboards and TV spots urging viewers to
* The ad campaign / With these short poems / Was used at first / For shaving fo-am /
* The Addams Family (1992) episode "Ask Granny" features a grotesquely detailed close-up of Granny Frump puckering up her lips when she beats a wrestler by scaring him with the offer of a kiss.
* The Addams Family (1992) had this joke happen in the episode "FTV", where Norman

Normanmeyer exclaims "Mommy" in response to Lurch catching him snooping on the Addamses. Normanmeyer did it again in the episode "Itt's Over" when he ends up in jail for lying about Uncle Fester killing Cousin Itt.
* The Addams Family (1992) hinted at this trope in the episode "Puttergeist" when Norman Normanmeyer talks about how people reacted to seeing him dressed as the Puttergeist.
* The Addams Family (1992). It doesn't help that his parents absolutely hate the Addams and tend to end up embarrassing themselves in their schemes to get them to leave. Notably in one episode, his father was doing a 'history of underwear' for school career day, making Norman hold up said historical undies.
* The Addams Family (1992) used this plot in the episode "Itt's Over", where Uncle Fester appeared to have killed Cousin Itt after handing him a hair remover formula intended to remove Fester's hair and Fester went to prison because Norman Normanmeyer reported the alleged murder to the police. In the end, Uncle Fester's name is cleared when Cousin Itt returns to prove he's not dead and Normanmeyer ends up behind bars for falsely accusing Uncle Fester of committing murder.
* The Addams Family (2019): A child friendly CGI film adapting the comic strip about a creepy family in a creepy house.
* The Addams Family (2019) a version of this is played for laughs. After Wednesday interrupts her little brother Pugsley from attempting to shoot a crossbow bolt at something, citing that he should be practicing for his upcoming Addams family Mazurka ritual and insists that she wants to help him with as much. Pugsley is surprised and asks her why she wants to help him. She then proceeds, as the camera very slowly zooms in on Wednesday, suspenseful music plays, and Wednesday herself allows a humorously unnerving wide-eyed and raised eyebrow sporting look to come on her face, to respond with, "Because you are my brother. And...I love...you."
* The Addams Family (2019). It opened to over $30M Worldwide, and ended up making over $200M on a $24M budget. A sequel is currently set to be released in 2021.
* The Addams Family (2019), Morticia once believed that "Girl Scout campfires" were campfires you cooked Girl Scouts over, not campfires used by Girl Scouts to cook food.
* The Addams Family ancestors out of their crypt until they help him keep Wednesday and Lucas together.
* The Addams Family and may still have a few issues to work out. (Averted in the tour version, where a brief wedding scene is part of the curtain call.)
* The Addams Family, and "The Felony Squad.") In that interaction, the Dynamic Duo greets the Green Hornet and Kato as fellow heroes from another city.
* The Addams Family, a poor mook trying to warn his superiors about the Addams (due to a series of misunderstandings, he thinks they attempted to kill him) storms off after not being believed, slams the door behind him, and after a few seconds sheepishly steps out of the closet and uses the other door, leading to one of his bosses saying, "I never knew he drank."
* The Addams Family are remembered mostly for those (admittedly iconic) roles. But Ken Weatherwax (Pugsley) is the most fitting example of this trope: before the series he only had a small part in one episode of a Western tv series, then he was typecast as Pugsley well into his teens until he quit acting and became a movie grip and studio builder.
* The Addams Family: As Morticia is doing inventory of the various sacks from a cupboard:
* The Addams Family between the Chicago try-out and Broadway, including "Clandango" (replaced by "When You're An Addams"), "Passionate and True" (replaced by "Where Did We Go Wrong"), "As We're Slowly Dying" (a very brief duet between Wednesday and Lucas), and "At Seven/Teach Him How To Tango" (replaced in part by "Morticia"). "Let's Not Talk About Anything Else But Love," originally a dance number featuring Fester, the ancestors, Wednesday, and Lucas, was moved to the second act and changed into a shorter song performed by Gomez, Fester, Grandma, and Mal. The tour version complicated things by cutting "Morticia," "In The Arms," and "Where Did We Go Wrong" entirely, although the tune of the latter can be heard in part of Gomez's new song, "Trapped"- and the soundtrack is that of the Broadway version.

* The Addams Family Broadway musical with such actors as Nathan Lane and Bebe Neuwirth in the original run.
* The Addams Family, but is generally considered much inferior in quality to the previous ones.
* The Addams Family, but without exception, they all love each other dearly. Their level of affection for non-family members can vary widely.
* The Addams Family claims to have been based on the cartoons, but in reality it was a composite of their show and movie portrayals.
* The Addams Family, complete with the Power disrupting the movement of the pinball.
* The Addams Family". Crooks Marty and Claude finally race out of the house in panic after spending an evening hiding from the police. In their haste to escape, they get caught by the police.
* The Addams Family doesn't speak in the movies, other to occassionally grunt a little.
* The Addams Family", Dr. Chalon tries to put the moves on Morticia, but when she realizes what he's doing goes beyond friendliness, she sharply reminds him that she's married.
* The Addams Family episode "Cousin Itt and the Vocational Counselor", Lurch bumps his head on the ceiling of Cousin Itt's room more than once (unsurprising, considering he has to stoop nearly double to move around).
* The Addams Family (except Pugsley, who's just as pale but has brownish hair) in the films, as a physical sign of their, er, 'difference'.
* The Addams Family: Frankenstein-esque Lurch. "You Rang?" Though he's hardly the scariest member of the family. Heck, he's the LEAST scary. Except for Wednesday in the original series, who is really sweet; she just likes headless dolls and spiders.
* The Addams Family, "Full Disclosure", is one of these gone horribly wrong.
* The Addams Family: Gently plunge the ball so that it lands into Thing's eject saucer for 2 million points, with the value increasing each time.
* The Addams Family Gomez and Morticia pretend to be the servants of Lurch in order to impress Lurch's mom faking that he owns the mansion. Morticia tries to convince Lurch to pinch her in the butt as that's what would be expected from a boss and a maid, he's so uncomfortable with the idea that he can't go through.
* The Addams Family", Gomez asks Uncle Fester for a couple of tools and a screwdriver (as in the drink). Fester hands them to him and repeats the words.
* The Addams Family) got their own cartoon series following this series.
* The Addams Family has a polar bear rug as both furniture and a pet. Its name is Bruno and it growls when its stepped on.
* The Addams Family has a unnamed member of the extended Addams clan raise his hands so high that they look inflatable.
* The Addams Family has ever done as a favor for their Muggle neighbors.
* The Addams Family has Gomez lose to Morticia in every possible match (from fencing to chess), reaching ludicrous numbers.
* The Addams Family has one behind the mansion. Wednesday can be seen hanging out here.
* The Addams Family have a permanent storm cloud over their house, at least in the cartoons.
* The Addams Family, he and his wife Morticia usually worked together to solve various family problems.
* The Addams Family, his look alone could easily scare any enemy, but if that wasn't enough, he also has superhuman strength and durability.
* The Addams Family. However since the girl scout isn't named and has a similar attitude as Amanda, it wouldn't be a stretch to conclude that they are the same character.
* The Addams Family, if the player gets an end-of-ball bonus worth 20 million points or more, Gomez shouts "Who says you can't take it with you?!"
* The Addams Family; if you get a ball into the Vault while the Bookcase is closed (typically an impossible feat), the game compliments you for cheating.

* The Addams Family, illustrated by his song, "Let's Not Talk About Anything Else [but love]".
* The Addams Family: In "Lurch's Little Helper", the Addamses make a robot named Smiley, who speaks in a stereotypical robot voice, just a bit higher than most stereotypical robot voices.
* The Addams Family: In "Morticia the Matchmaker", a young lawyer's boss tries to send him to talk business with Gomez, saying that he's ideally suited because he's met the family before. The lawyer says he'd rather interact with a scorpion nest.
* The Addams Family interpretation is that it refers to Fester experimenting with electrical wires.
* The Addams Family is an example of a "repurposed TV theme song". In the early 1990s, the now-defunct HomeClub Warehouse chain used a version of the theme for its commercials.
* The Addams Family is one of the few sitcom-style series on TV without marital strife as a running gag.
* The Addams Family is prone to random explosions just for his own amusement.
* The Addams Family lean to each other to kiss, but Abigail interrupts them, telling them to knock it off.
* The Addams Family machine is used for competition, the magnet is physically removed from the machine as there is an software bug where you can just hold the ball and time them out so it is done to speed things up.
* The Addams Family: Morticia Addams fits the physical description, but is a very nice person. She just has some unusual hobbies and a slightly odd outlook on life. Same thing with her husband and daughter.
* The Addams Family" Morticia and Gomez walk the professor upstairs, seemingly forgetting the investigators locked in the "playroom." However, Gomez remembers and comes back.
* The Addams Family, Morticia owns an "African strangler" named Cleopatra which appears to be a baby man-eating plant. (In one episode, she says it is only three years old, but in another, she claims to have had it before she married Gomez.) In the cartoon version of the series, she owns full-grown versions of these monsters.
* The Addams Family, Morticia stops Wednesday when she sees her carrying a carving knife. She asks if that is for her brother, to which she nods. Morticia then says, “I don’t think so.” She takes the knife away from Wednesday and gives her an even bigger blade!
* The Addams Family, Morticia tears the skirt of her dress so it can be pulled out of the way before she and Gomez tango. Bebe Neuwirth, who originated the role on Broadway, got several wolf-whistles from the audience at this point.
* The Addams Family movie when Morticia is at the employment office. When she tells her case worker that her major was "spells and hexes", the worker nods knowingly and answers, "Liberal Arts."
* The Addams Family movie, where Wednesday makes disturbing art that her parents don't find worrisome in the least, and nor does she. Her teacher, of course, is a bit put off.
* The Addams Family musical has a song entitled "Where Did We Go Wrong?" in which Gomez and Morticia lament over Wednesday's sudden fondness for (gasp) normal, wholesome things.
* The Addams Family musical is about Wednesday falling in love with a normal boy.
* The Addams Family Musical makes this a regular occasion, with the Addams Family ancestors rising annually for a family reunion and gala. Normally, Gomez dismisses them back to their graves at the end of the night's festivities, but this year, Uncle Fester traps them in the material plane and enlists their help.
* The Addams Family musical, Uncle Fester keeps the ghosts of their ancestors on Earth by locking them out of their crypt until they help him keep Wednesday and Lucas together.
* The Addams Family occasionally talk about feeling sad or tired and wanting to drink poison, shoot themselves, etc. This seems disturbing if you don't know that the Addamses are immune to poison and many injuries and doing things that would injure or kill a normal person is their idea of fun.

* The Addams Family presented a variant with Morticia's wardrobe: she had a full-length dress of equivalent tightness. The actress, poor Anjelica Huston, must have found it almost impossible to move. It was lampshaded in the sequel:
* The Addams Family sitcom, mostly just using the occasional jump scare from the carnivorous plants as a breather from the comedy.
* The Addams Family stage musical has him saying that he has no specific sexuality before declaring his love for the moon.
* The Addams Family than the series) had he lived long enough to see them.
* The Addams Family. That being said, this is a glitch very few people will ever see due to the absurd level of skill required: Even top-ranked players are unlikely to reach 50 rooms.
* The Addams Family: The 1973 and 1992 animated versions focus on a creepy family with macabre interests.
* The Addams Family, the Addamses seemed to have a vague idea that other people weren't like them, but didn't fully understand it — such as Morticia giving a babysitter/nanny the "friendly advice" that she should keep her back to the wall at all times while working.
* The Addams Family: The Addamses use a dungeon full of torture implements as a playroom. They cure headaches with a headvice, backaches with a bed of nails or the rack, and claim that an iron maiden is "relaxing". They even regularly wield medieval weaponry or, in Uncle Fester's case, a blunderbuss.
* The Addams Family, the circumstances under which it occurs reveals that Gordon was the real Fester with amnesia the whole time.
* The Addams Family: The daily life of eccentric millionaire Gomez Addams and his macabre but loving family, who live in a haunted house.
* The Addams Family, the most common visitor of the family. Even his luggage is part of his iconic look.
* The Addams Family, the plot revolves around Wednesday Addams, now a young woman, falling in love with a young man from a more conventional family and the culture clash that ensues.
* The Addams Family there. (It shows up after Morticia gives him some motherly comfort.)
* The Addams Family, the very uptight father of Wednesday's boyfriend loosens up and gets back together with his wife who he had been drifting apart from after being molested by a squid living in the Addams' basement.
* The Addams Family. The wife of the school principal asks for the recipe for the Demon Dip and after "witch's butter" - which gives it the blue color - and lizard entrails are mentioned, snaps that Morticia doesn't have to tell her if she doesn't want to. A similar goodie is the "Whirling Dervish Wassail," a punch which consists of "an exciting and tangy blend of quicklime, witch elm, mare's tail, Saint Elmo's fire, and several other potables which could hardly be described as inert ingredients."
* The Addams Family tie-in novel by Jack Sharkey, Gomez has a rather interesting punishment for Pugsley and Wednesday's apparent misdeed — forced attendance of a fifteen-cartoon Kiddie Matinee with ice cream and "golden cake with pink icing" to follow, along with a stack of comic books on their bedside tables. Morticia considers that last part overly cruel punishment.
* The Addams Family tie-in novel by Jack Sharkey, Gomez invents a machine which is supposed to make you experience a sensation with all five senses at once, then tests it on Pugsley and Wednesday's grade-school teacher. It swaps her senses instead, making her understandably upset.
* The Addams Family: Upon realizing Fester is actually the older brother, and thus has legal control over the Addams family assets, the slimeball lawyer and his crooked partner use this to kick the rest of the Addams out of the house so they can hunt for the family fortune in peace. Leading to the last half of the film being about the creepy, kooky, mysterious, spooky, all together ooky Addams trying to function out in the "normal" world.
* The Addams Family Values ever, baldly states "My parents are having a baby. They had sex."

* The Addams Family Values story, so Wednesday responds with how her parents got the baby.
* The Addams Family was based on Lurch's aged mother coming to visit him, and his having never told her he was a butler; most of the story involved his posing as the master of the house, with Gomez acting as butler, Morticia as maid, and Grandmamma as cook.
* The Addams Family was only filmed once, but was used every time they had Gomez playing with his train set.
* The Addams Family was the only one who was later featured in an entire episode.
* The Addams Family, Wednesday chose an ancestor who was executed in this fashion for a school project about role models. Naturally, her teacher was more than a little concerned. Morticia explains that the ancestor in question danced naked in the streets and enslaved a minister.
* The Addams Family Wednesday falling in love with a boy her age and both trying to adapt to the others' family; Gomez warms up to him in the end.
* The Addams Family, when Gomez and Morticia discuss Wednesday's new boyfriend and Morticia isn't sure if Wednesday is ready for a serious relationship.
* The Addams Family", where Gomez is participating in a trial with the family observing, the entire family drives the judge nuts, including Uncle Fester who says "I Object!" just so he can participate in the trial, despite the fact that he is in the audience and thus obviously not supposed to interfere.
* the Addams family, who looks like a normal human but is biologically related to the rest of her clearly non-human family. She shares some of the other members' inhumanness like her very low body temperature.
* The Addams Family wish to visit a "typical American family." Out of the phone book they randomly choose the Addamses, who impress them so much (e.g. they think Lurch is a robot butler) that they decide they need to treat Americans with greater respect from now on.
* The Addams Family with recurring unnamed character designs. Until the proposal to create a show based on them, Addams had never even thought of them as named individuals.
* The Addams Family young woman who wears yellow for her love interest, a guy who is basically just the definition of generic.
* The addiction is treated as something akin to an addiction to painkillers, since he takes the medication to stave off the side effects of using his future police glasses (which include blinding headaches, nausea, and occasional loss of basic motor functions). Throughout the whole game he walks a fine line between using the glasses too much and taking too much medication to compensate. There is actually at least one instance where the player can make the choice to press on with the case (and risk further damage to
* The Adding Machine at Mr. Zero eating his last meal (ham and eggs) in prison:
* The Adding Machine mocks the very idea that Mr. Zero might be spared from his imminent execution (and he isn't):
* The Adding Machine. The girl who visits Zero's grave after doing six months for indecent exposure is Judy O'Grady, and the accidental matricide who accompanies Zero into the afterlife is Shrdlu (an old typesetting joke).
* The Adding Machine. When a policeman comes looking for Zero, he's ready to go, and calmly tells the others why: "I killed the boss this afternoon."
* The Adding Machine, while Daisy, contemplating suicide, repeats headlines about female suicides.
* The Adding Machine, Zero is so attached to the menial job he's held for twenty-five years that he still wants to go on adding figures even after he dies.
* The addition of GPS has been a huge mover for handheld computers. Presumably the medium as a whole is based around the want for calendar and contact programs.
* The add-on book Mekton Zeta Tech Manual allows for the construction of nearly any energy melee weapon you can imagine.
* The add-on campaign demonstrates it further; the previous campaign's canonical ending is with Arm victorious and Core destroyed to the last unit. But the Universe is a big place, and Core have hidden away a lone Commander as a contingency plan in

case of an Arm victory. He promptly activates and the
* The add-on Mothership Zeta will have your head explode if you don't put your spacesuit on before opening the room's bay doors.
* The A.D.D Test, Matt expects instant news, instant coffee, and instant porn.
* The A.D.D Test, Matt says that he doesn't get distracted easily, and immediately gets distracted by a bird.
* The Adele Dazeem gaffe got turned around its head the following Academy Awards: host Neil Patrick Harris joked
* The Adeptus Arbites, on the other hand, are closer to the standard understanding of what police can and must do, although they're still noticeably darker than usual and have more limited jurisdiction — that is, they enforce only general Imperial laws, of which there are few, leaving most to the local police. In short, they are FBI
* The Adeptus Custodes are above any Space Marine not just physically, but mentally as well. While most of their prowess is directly seen in the battlefield, where they perform feats of strength and endurance regular Marines need Terminator armor to even approach, but they are also well-educated even in topics that have little to do with warfare (such as politics and economics, giving them a hand in running the Imperium), extremely quick learners, excellent tacticians and regularly perform infiltration exercises on their own forces to find any flaws in their defense and patch them, making them expert infiltrators despite their huge presence.
* The Adeptus Mechanicus are a pseudo-scientific/religious order that placates the "machine spirits" of tanks and devices with a mixture of prayer and consecrated engine oil. They are very competent at their jobs despite appearances, however, and even a basic Enginseer usually has a cutting torch and servo-arm that make for one hell of a
* The Adeptus Mechanicus has a somewhat complicated relationship with this trope. On the one hand, artwork and stories routinely depict their worlkplaces as filled with pounding pistons, whirling cogs, sparking electricity and coils of cables lying around everywhere and just waiting for someone to trip over them. In the lore, however, the tech-priests are protective of their machinery to a literally religious degree, and will go to great lengths to ensure that it's kept safe and guarded. Depending on your average tech priest, however, "machine safety" may mean making things safe for their operators or making things safe for the
* The Adeptus Mechanicus have a secret language called Binary, completely unspeakable and untranslatable by anyone outside the priesthood, (
* The Adeptus Mechanicus is one of the best examples of the trope. A priesthood that is the government branch responsible for maintaining and producing humanity's most near-magically advanced technology, this order of
* The Adeptus Mechanicus keeps several cloning vats ready to produce literally mindless bodies for the production of Servitors (unless there's a nearby penal colony, in which case they have ample "material"). Many of these tanks are also used to mass produce Geneseed, either for the founding of new Space Marine Chapters or to help existing chapters replenish their stock, as Geneseed cannot be cultured in a tube but rather grown within a living human body.
* The Adeptus Mechanicus Onager Dunecrawler can mount a main weapon appropriately named the Icarus Array, which fires bullets, missiles, and rockets at enemy aircraft.
* The Adeptus Mechanicus Skitarii soldiers, best described as the Imperial Guard crossed with
* The Adeptus Mechanicus. Technically speaking, the Machine Cult isn't Imperium
* The Adeptus Mechanicus try to replace as much organic matter as possible with machinery. There are two specific Adepts - in
* The Adeptus Mechanicus view any sort of technological innovation as heresy. Somewhat justified, as they believe that knowledge was discovered by ancient humans and then lost, and as such new ideas could potentially be paths for Chaos to infiltrate, but given that everything is getting worse for the Imperium every year (technologically), this may not be the best policy, especially since the Emperor's

life-support system is failing...
* The Adeptus Mechanicus will sometimes use this to as a means for reproduction, either for convenience,
* The Adeptus Terra operates the Officio Sabatorum and the Templars Psykologis.
* The ad for an overactive bladder drug that features an an anthropomorphic bladder demanding to use the restroom again and again.
* The ad for Aviva Motor Insurance in Ireland has a stereotypical metalhead as the main character.
* The ad for the Android Razor looks like a trailer for a movie about a flying razor blade.
* The adherence to physics is further demonstrated when a character in the past is revealed to have ended a battle by telling his own body to "be not", creating a huge explosion. Although the characters don't know the specifics, it's pretty clear to modern readers that he converted his body to energy and turned himself into a literal
* The Adjectival Man: A nameless character who's known only by an epithet.
* The Adjectival Man: If people call them "the [X] Man" — especially if its "the [X] Man of [Y]" — they most likely aren't going to be nice.
* The Adjectival Superhero: The superhero's name is preceded by an adjective.
* The Adjustment Bureau, although they seem to prefer dark grey suits.
* The Adjustment Bureau, and to hell with whatever people themselves want or what has to be "adjusted" to do it. However it should be noted that, despite all this and being the antagonists of the film, they're not evil or even all that unreasonable.
* The Adjustment Bureau. Destiny needs its little helpers (called "The Adjusters") to ensure the proper unfolding of the great plan.
* The Adjustment Bureau has met with every single living person at some point in their lives, each time with a different look and gender.
* The Adjustment Bureau, he and Elise are able to evade them, going from downtown Manhattan to Yankee Stadium to Ellis Island in rapid succession.
* The Adjustment Bureau. In a past version of "The Plan", the fate and destiny of all humanity, they were destined to fall in love and be together, but "The Plan" has been re-written by the Chairman. Even though the current version of "The Plan" only has them meeting briefly one time and then parting ways forever, they still feel that connection and draw towards one another from when they were meant to be together.
* The Adjustment Bureau in a scene that was deleted from the final film to make the Chairman's true nature more ambiguous.
* The Adjustment Bureau people and chasing David Norris. Even the hat is important!
* The Adjustment Bureau references this when Norris, a Senatorial candidate, admits that despite his small-town anti-conformist tone he has his entire appearance dictated by careful studies from large corporations to find what will get the best reaction from the population.
* The Adjustment Bureau, the Bureau limits David Norris' options by altering reality so no taxis will stop for him, even though they clearly have no passengers. When one finally does stop, it gets hit by a truck.
* The Adjustment Bureau. The deconstruction comes in when the titular agency suggests that her influence on David is only good for him in small doses. The washroom encounter inspires him to ditch a pre-written speech and make an improvised one about how his media appearance is all calculated and artificial, getting him a popular reputation as a man of the people. An agent of the Bureau claims that it was meant to be a one-off encounter, and that if he continued to be with her, her influence would encourage him to make increasingly reckless decisions that would eventually cost him his political career.
* The Adjustment Bureau, the portal disappears when the door is closed.
* The Adjustment Bureau to carry out, and previous drafts of this plan are what keep driving David and Elise together.
* The Adjustment Bureau tries to contain this kind of incidents. But they are not above random chance and unexpected behavior.

* The Adjustment Bureau, where the hero unsuccessfully runs for the United States Senate because of a college reunion prank where he exposed his bare backside has been caught on film.
* The Adjustment Bureau which secretly controls human society is headed by a mysterious, all-knowing being known only as "The Chairman", but remains offscreen. In deleted scenes, it was revealed the Chairman is actually a woman.
* The Adjustment Bureau with a free spirited dancer. He is then inspired by the meeting to ditch his prepared speech and instead gives a brutally honest account of how his entire "common man" image, right down to the color of his ties and the scuff on his shoes, is the result of the work of highly paid consultants and spin doctors trying to reach the largest possible audience. This ends up further cementing Norris' reputation as the "people's candidate", which is just what the Bureau wanted.
* The Adjustment Bureau, with some very unflattering remarks about his spin doctors, saves his reputation as an honest "people's candidate" and his political career.
* the adjutants. In the later missions, there's also another adjutant that played a bigger role in the plot, and you could tell just by looking at her.
* The Adjutant was one originally. Female human, head connected to various wires and bits of machinery, presumably to aid in briefing the player in missions. It has been retconned to be entirely robotic, probably to make the "
* The Adkisson wrestling clan of Texas as the Von Erich family, save for patriarch Jack Adkisson/Fritz Von Erich, who used a completely different ring name.
* The AdMech make a distinction, in that those "Machine Spirits" aren't sentient AI's, but are more along the lines of a Labrador.
* The Administrator and she clearly enjoys sending the teams to blow each other to bits with the goal of a perpetual stalemate, while the Respawn machine makes sure they cannot die permanently.
* The administrator at Ichigo's school, who called several students in anime episode 11 to berate them for their misbehavior at Don Kanonji's TV show filming in episode 10.
* The Administrator, through a large monitor at the top of a room. From... wherever he is, he issues orders and ultimatums to the team creating his "Trope Of The Week" videos.
* The Admiral and the Princess, a 30-minute short film that aired on TV in a few channels.
* The Admiral, for Admiral Car Insurance. Nowadays it's a female admiral, who looks
* The Admirals' formal uniforms try to bridge the gap between modern suit-and-tie and futuristic starfleet uniform.
* The Admiral Was a Lady, the male characters (all demobbed World War II soldiers who are currently unemployed) use this to their advantage to make a bit of extra money on the side. A local bank offers a free piggy bank as its opening gift. Instead of simply cashing their unemployment cheques with the cheque-cashing man who charges a fee, they deposit the cheques in a new bank account, get the piggy bank, immediately close the account (for a cash withdrawal, no money lost)... and then sell the piggy banks to the local pawnbroker!
* The adorable, burping yeast sock puppets that appear on many episodes of
* The Adorea team sees its combatants only strike at his opponent's sword for the purpose of safely deflecting it away from himself and otherwise has them clearly trying to hit one another.
* The Adorjan theft charms; stealing in plain sight, no one realizing it for a while. But the Scourge steal individuals "owned" by others. This is more then just slaves, they can steal children, proteges, henpecked husbands, etc. This makes the object of the theft lose any emotional connection to their previous owners as well as making the original owners forget the thing stolen or be alright with it being gone.
* The AD police have the large K-11 and K-12s battlesuits with their own cockpits.
* The ad ran for several years though, with even a francophone version of the

couple for adds in Quebec. Things went overboard when the
* The "Adrenalina" series (of two books) by Brazilian author Lilian Spyriano as well. The names and cover art are already indicative —
* The Adrian Mole, a tank overhead opens and deluges him with unexpected, and humiliating, gunge.
* The ads failed, with Harper going on to win three consecutive and serving nine successful years as Prime Minister of Canada (the longest serving Conservative since Progressive Conservative Prime Minister Brian Mulroney (served 1984-1993) and the most number of consecutives wins since John Diefenbaker).
* The ads for Halos (a brand of seedless mandarin oranges) have kids acting like brats just because their parent wants to try some Halos, and the kids want them all to themselves. This brattiness includes throwing tantrums in public, threatening to reveal embarrassing secrets about the parent, and (in one commercial) even having the family cat attack the parent for trying to eat the last orange. The slogan is, "If you don't have Halos, they don't have Halos."
* The ads for mattress chain Sit 'n Sleep have a variation of this, with the owner promising huge discounts as his accountant scolds him for losing his mind. They even managed to work in a non-slogan
* The ads for Pillow Pets, Dream Lites and CuddleUppets appeared a lot during the first half of
* The ads for the cervical cancer vaccine Gardasil, with its chorus of women of different ages saying "I want to be one less."
* The ads for the Vauxhall Insignia start out looking like trailers for a movie, or possibly a new TV show. "The Insignia Project". Something like a cross between James Bond and 24.
* The ads for the winemaking estate Chateau Maison depict it as a large mansion with a well-kept garden, which doesn't much resemble the tiny miserable shack in the middle of a wasteland.
* The ADT medical alert commercial with the old woman protesting, "That's not for me! That's for some old person!"
* The "adult channels running family and children's programming and movies" example also happens around the Easter/Passover season. For example, TBS showed several
* The adult-oriented Women's Extreme Wrestling had the team of Talia and Tiffany Madison. Tiffany faded away. Talia went on to success in TNA as...
* The adults of Bridger's bash' keep Bridger and the fact that he can work miracles very secret. Part of this is because Bridger is still a child, but they also want to map out his ability and develop his personality as much as possible before revealing him to the world. Not only is his ability exceptionally dangerous — there's nothing preventing Bridger from taking a vial that says "world-ending plague" and making it real —, but they know people won't believe it even if they see it with their own eyes.
* The adults-only MAX incarnation of Nick Fury, who has at one point beat up a General with his belt.
* The Advance bonus dungeon introduces a new Infinity Plus One Weapon for each character, including the swords Apocalypse and Save the Queen.
* The Advanced Class Guide introduced the Warpriest class and it's sister Archetype, the Sacred Fist. Both derive their spell lists from the Cleric, which Blood Crow Strike is unique to. Blood Crow Strike lets you make melee unarmed attacks at a range of 100+ feet away. The book also introduced Pummeling Style, a feat which allows its user to focus all of their unarmed & natural attacks into one melee strike. Preferred Spell allows a mage to cast a spell without preparing it ahead of time by burning up prepared spells, and Spell Perfection allows one to apply a Metamagic Feat to a spell without raising its level. It took less than a week after the book's publication for players to figure out that either an unarmed Warpriest or a Sacred Fist that takes takes all these options can pool them together to launch Kamehame Hadoken-sized single blasts from hundreds of feet from its target. EVERY. ROUND. WITHOUT HAVING PREPARED THEM AHEAD OF TIME. As of yet, fittingly, it is perhaps the single-most-powerful non-Mythic maneuver in the game,

capable of unleashing literally HUNDREDS of damage on a target.
* The advanced combat/assassination droids are literally swarms of nanobots that have all the above abilities plus they can make themselves into any kind of physical weapon imaginable (and with a "brain" that extends into hyperspace for raw data storage, they can imagine quite a bit)
* The advantage in sports isn't all psychological. Sometimes it's an advantage from familiarity with the field itself, or the training conditions it provides.
* The Advent of Death's Daughter. At worst, a grisly death is coming your way.
* The advent of social networking sites, as well as their art-sharing site cousins, inevitably leads to ero-artists looking for a site to
* The advent of the 'communication age', with the Internet and mobile phones (and now smartphones) enabling people to be in contact with anyone, and have access to any existing information, virtually anytime and anywhere.
* The advent of the DVR and On-Demand services (along with streaming sites like
* The advent of the synthesizer allowed amateur songwriters to fake any number of musical instruments and other sounds to near-perfection. Because of that, people who enjoy the synthesized stuff would be mighty surprised when they're told that their favorite song was, in fact, played by a real band with real instruments.
* The Adventure Begins. His trick dragging him along with the express is similarly revenge for Thomas heckling him earlier, however this itself was only in retaliation for Gordon belittling him a fair deal beforehand.
* "The Adventure Begins" not only re-adapts the original stories where Thomas first debuted, but also elements from "The Three Railway Engines". Mainly Edward pushing Gordon up the hill happened before Thomas arrived and Henry being stuck was told via flashback. Edward mentions briefly that Henry did got out of the tunnel, but Gordon interrupts as he didn't want to hear it.
* "The Adventure Begins", the two-part premiere episode of the 2006 revival of
* The Adventure Core (or Rick) continuously flirts with Chell, boasts about his adventures, and comments on how bad the situation looks.
* The Adventure, even better music and a password system were welcome additions. The sub-weapon system reappeared, albeit it's only limited to the Cross (or Axe in the non-Japanese versions) and the Holy Water.
* The Adventure Game actress Barbara Lott, and champion water skier Liz Hobbs, he begins reading a page from the Arg Instruction Manual, and declares, "A pint of milk, a dozen eggs, a bit of... a bit of-!? Angord! Have you been writing your shopping list on my instructions again?"
* The Adventure Game if they move onto the space it currently occupies.
* The Adventure Game, one of the Argonds had an ear trumpet that was completely useless; his hearing only improved when he wore his spectacles.
* The Adventure Game the Argonds instead of the other way round) to make the contestants feel more at home... except for their monarch, the Rangdo of Arg, who turns into a potted aspidistra in Series 2 and 3 and a giant teapot in Series 4.
* The Adventure mode, Subspace Emissary, is contested enough to be considered almost separately. It's either the kind of thing players really, really wanted when they first played the adventure from
* The Adventure of Adventureness by Missingno. Master is one of the best examples of this trope. It is literally the story of how the protagonist and the narrator seek revenge on the author for writing them into a terrible story.
* The Adventure of Charles Augustus Milverton, after Holmes and Watson burglarize the titular blackmailer's house, witness his murder and barely get away. Then there's the meeting with Lestrade:
* The Adventure of Little Ralph, the hero, Ralph, was originally a man, but the main villain turned him into a boy. Ralph spends almost the entire game like this, but just prior to the game's midboss fight (halfway through the stages) Ralph randomly turns into a man again. Then, he fights the villain in a traditional fighting-game style (complete with health bars) until the villain is defeated. Then Ralph randomly turns back into a boy again. However, past the second time this happens, it is no longer unexpected, as all of the boss battles after the midboss are played as in a fighting game.

* The Adventure of Sherlock Holmes' Smarter Brother) and Prof. Moriarty (Leo McKern) boast to each other about their swordsmanship and have a duel on a high ledge in the climax. Wilder, who also wrote and directed the movie, was a champion fencer in college at the University of Iowa, making him a real-life example of this trope.
* The Adventure of Sherlock Holmes' Smarter Brother and Watson are in a room when Holmes silently informs Watson that there's someone listening at the keyhole. They then have a conversation intended to fool the eavesdropper that they're leaving the country.
* The Adventure of Sherlock Holmes' Smarter Brother instead of a parasol). Since this is a comedy, Sergeant Sacker comes along as the rower and his accidental mistakes with the oars repeatedly cause Sigerson to be splashed in the face with water.
* The Adventure of Sherlock Holmes' Smarter Brother. Moriarty's henchman use whips to fight Sigerson in their battle atop the carriages.
* The Adventure of Sherlock Holmes' Smarter Brother, Moriarty's unnamed assistant (Roy Kinnear) calls out "Oh taxi!" and collapses.
* The Adventure of Sherlock Holmes' Smarter Brother. Professor Moriarty puts one of his henchmen through one of these tests, including tricking him into going through the wrong door and getting killed.
* The Adventure of Sherlock Holmes' Smarter Brother. The sword fight between Sigerson Holmes and Professor Moriarty.
* The Adventure of The Abbey Grange be how an actual court would see it, but it would embroil the lady concerned in scandal.)
* The Adventure of the Blue Carbuncle, whereas currently he's not a danger to anyone.
* "The Adventure of the Copper Beeches". A woman gets a too-good-to-be-true job offer → Turns out that she was there to take the place of the daughter of his employer who is imprisoned somewhere in the house.
* "The adventure of their lives. A movie that will change everything." —
* The Adventure of the Italian Nobleman also employs this trope, except that in this case the "Butler" is actually a valet.
* The Adventure of the Naval Treaty (where Holmes gets knifed across the knuckles) is shown in distorted shadows.
* The Adventure of the Noble Bachelor is called in when a bride disappears within hours after the wedding ceremony. He deduces the existence of the true love, tracks down the couple — who had actually been married before, but she believed him dead — and persuades them to come clean to the rejected bridegroom.
* The Adventure of the Priory School". James Wilder, the illegitimate older son of the Duke of Holdernesse, plans to kidnap the Duke's younger son from his school in order to force the Duke to change his will in Wilder's favor. Wilder hires a man called Reuben Hayes to perform the kidnapping, but Hayes murders an innocent teacher who tried to prevent it. Wilder's horror at the event leads him to confess everything to the Duke. Even though Wilder is guilty of kidnapping an innocent boy, conspiracy to commit kidnapping and partial responsibility for the murder, Holmes only turns in Hayes to the police, allowing Wilder to be sent to Australia to seek his fortune. This is notably subverted in the Granada adaptation where Wilder does not get off. Instead he kidnaps the boy himself in a futile attempt to still make the scheme work and dies while hiding in a cave.
* "The Adventure of the Six Napoleons". A madman is stealing Napoleon busts and smashing them → The recovery of a stolen pearl.
* The Adventure of the Yellow Face misidentifies his client's suspicious wife's motive, and is for once proven wrong. It turns out that there was nothing villainous about the wife's true motive.
* The Adventure of Wisteria Lodge", a man is murdered at an hour where his guest claims he was at home. Turns out the man was intending to commit a crime himself, and the clocks were set wrong so that said extremely respectable guest could provide an alibi.
* The adventure path "Legacy of Fire" plays with this. The main antagonist is a

genie who's adding minor twists to every wish he grants so that it moves him closer to his ultimate goal; towards the end he resorts to just forcing people to wish for the things he wants to do at swordpoint, but prior to that he tends to just rely on riders and quirks to get what he wants. Meanwhile, the genie backing the heroes is effectively the head of the Society for the Promotion of Ethical Wishcraft and will only engage in this if the player characters keep wishing for stuff she's not willing to give them, like a way to end-run around the adventure or win fights automatically.
* The adventurers explore an ancient ruined Aboleth city, and find that it's in ruins because a magical artifact drove all the water out of it leaving it stranded in an enormous air bubble. Then later the plot takes the party to a plane known as "The Deep", home realm of an evil deep-sea god, and it turns out to be a pretty ordinary island in a storm-tossed but otherwise normal ocean surface. The most common demonic minions encountered there were the vulture-like Vrocks.
* The Adventurer's Guild is recurring through the series, serving as a home base for the hero.
* The adventurers pick up on this and it's why they refuse to identify themselves.
* The Adventurer to hide from the cops chasing him. He's introduced when his head pops out of the sand.
* The Adventures And Brave Deeds Of The Ships Cat On The Spanish Maine: Together With The Most Lamentable Losse Of The Alcestis and Triumphant Firing of the Port of Chagres
* The Adventures of Aero-Girl: At one point, Aero-Girl is forced to take a phone call from her mom in the middle of a battle with the Bearded Lady.
* The Adventures of Aero-Girl: The Strong Man of the Three Ring Gang has no hair on his head.
* The Adventures of Aero-Girl training from her father, Battle Jack, to protect Foxbay from those who would do it harm.
* The Adventures of Archie Andrews that was fixed in later adaptations starting in the 1980s.
* The Adventures of Archie Andrews was about Archie throwing a wild Halloween party as his house. His father is less than pleased however and refuses the money Archie's friends threw in to fix the damage.
* The Adventures of Archie Reynolds has one used by smugglers, that the heroes stumble across while exploring the neighborhood.
* The Adventures of Archie Reynolds in a crate and banging and "mmmphhing" to get attention. Archie is terrified of the banging, muffling crate for several pages, until he finally realizes "these might be human moans".
* The Adventures of Artemis P. Fonswick to lure the seven-year-old Jesse onto one of their ships. Five years later in 1958, he sees the same image just before they abduct him once again.
* The Adventures of Baron Munchausen all shaved their heads so they could switch freely between the various wigs they wore, rather than wear bald caps.
* The Adventures of Baron Munchausen: An island out in the sea turns out to be a big fish with an equally large appetite.
* The Adventures of Baron Munchausen but by the time that the Baron and Sally find him inside a giant fish, he needs a giant ear trumpet to hear.
* The Adventures Of Baron Munchausen features the baron finding an island that turns out to be a giant fish.
* The Adventures of Baron Munchausen has a three-headed bird creature, Sybil. When her victims dash off in different directions, she ends up splitting up into three, revealing her clockwork mechanism underneath.
* The Adventures of Baron Munchausen: In one scene, the heroes have been imprisoned by the King of the Moon. The Queen of the Moon — who, like her husband, has a detachable head — comes to their rescue in head-form. She giggles and moans constantly as she tries to unlock the cage, and Sally asks the Baron what she's laughing about. The Baron tells the little girl, "Um, her body is with the King, and he is, uh... tickling her feet." Cut to the royal chamber where the King is in bed with the Queen's body, and he is in fact... tickling her feet!

* The Adventures of Baron Munchausen is pretty hefty. The members of his harem, even more so.
* The Adventures of Baron Munchausen. One player starts to tell the most outlandish story about his adventures (Such as the time a pair of Frenchmen took credit for his invention of the hot air balloon), and the other players repeatedly interrupt him with additional questions. The storyteller has to either incorporate them into the story or pass the turn to the next player.
* The Adventures of Baron Munchausen: Our heroes are thrown into a whirlpool in Mount Etna and fall through the center of the Earth, emerging upside-down in the south seas. Of course, only a complete skeptic would disbelieve such a thing.
* The Adventures of Baron Munchausen, the actors playing the... actors in the theater troupe also play characters within the Baron's "real" adventures.
* The Adventures of Baron Munchausen. The Baron and Venus engage in some serious flirting, but her husband manages to keep it from going too far.
* The Adventures of Baron Munchausen, the baron, having come back from the dead, confronts the Right ordinary Horito Jackson. Horito's troops suddenly switch onto the baron's side and let all the people out, revealing the war was long over.
* The Adventures of Baron Munchausen, the people of the Moon have detachable heads. While traveling with the Baron, the Queen of the Moon's head starts moaning and giggling because her body is keeping the amorous King company. The Baron explains to a little girl that "The King is tickling her feet" instead of the obvious-to-adults explanation. The film then shows two bodies moving on a bed, the covers slip, and... the King is tickling his wife's feet.
* The Adventures of Baron Munchausen, the Sultan cuts off the Treasurer's head, which flies through the air, lands in one of the harem baths, and winks at one of the Sultan's wives. And then there are the King and Queen of the Moon, who have detachable heads, but that's not quite the same thing.
* The Adventures of Baron Munchausen the sultan has an organ where the notes played are screams of tortured people on the other side getting poked with spikes.
* The Adventures of Baron Munchausen the world's fastest man, after all. In his case, he tries to reach out and grab it several times because it's still hot from leaving the musket and it burns his fingers.
* The Adventures of Baron Munchausen, Vulcan is shown to crush coal into diamonds for Venus. But while she plays along, she also has a fairly large pile of diamonds, so in reality they aren't worth that much to her.
* The Adventures of Baron Munchausen when the townspeople open the gates of their besieged city they find that the Baron's story has seemingly come true, and the Turkish armies besieging the town have seemingly been defeated in the exact way they were defeated in the Baron's story, meaning that everything after "the end" of his story can be considered a part of the "happily ever after" his story spoke about.
* The Adventures of Baron Munchausen, which sends the whole herd into a panicked stampede through the Turkish camp.
* The Adventures Of Baron Münchhausen (1786) involve two trips to the Moon.
* The Adventures of Barry Ween, Boy Genius a naughty kid; Barry has invented dimension travel devices, working lightsabers, time machines, jetpacks, and ray guns. He secretly runs several multinational corporations in order to finance his experiments, and he can plan and execute a break-in of a top secret (and heavily guarded) government facility in the space of an afternoon. He's ten.
* The Adventures of Barry Ween, Boy Genius, and he mentions that the only time he tested it previously he had a heart attack.
* The Adventures of Barry Ween, Boy Genius. Barry dismissed his concerns, saying that humans overestimate their own significance. He claims that they could kill everyone in the town they are currently in without affecting history one iota.
* The Adventures of Barry Ween, Boy Genius. Barry Ween left one of his male enemies dressed in lingerie and handcuffed to a bed in a sleazy motel room. With another man. And no memory of what happened.
* The Adventures of Barry Ween, Boy Genius. During the rant in which he admits this, he claims that he'd gladly give up his genius if it meant he could have a

normal life.
* The Adventures of Barry Ween, Boy Genius. He predicts that he'll be driven mad by the time he turns 21 and only attends school in the hopes that regular human interaction will prevent it.
* The Adventures of Barry Ween, Boy Genius it is stated that most aliens can speak English.
* The Adventures of Barry Ween, Boy Genius, "Monkey Tales," involves: a superintelligent other-dimensional gorilla, a tribe of sasquatch, and a hyper-Ebola monkey. (That's three separate stories, mind.) In the fourth collection, "Gorilla Warfare," the characters travel to the dimension the superintelligent gorilla came from, where he (the gorilla) is worshiped as a god.
* The Adventures of Barry Ween, Boy Genius rarely speaks without using "fuck", "shit", or some other profanity. His friend Jeremy and his love interest Sara also tend to be foul-mouthed.
* The Adventures of Barry Ween, Boy Genius story, Barry remarks off-hand that he's been secretly sneaking supplements into his parents' food that will ensure they at least make it to 100.
* The Adventures of Batman and Robin, from animated series fame, had after several platforming levels where you beat up random thugs, suddenly you driving the Batmobile in a car chase with Two-Face.
* The Adventures of Batman episode "The Nine Lives of Batman" started with this.
* The Adventures of Bayou Billy is nominally a side-scrolling beat-em-up, but there are also on-rails shooting sections and driving levels interspersed throughout the game.
* The Adventures of Bayou Billy level where you had the option to use the Zapper light gun in place of the regular controller.
* The Adventures of Bertram Fiddle Episode 1: A Dreadly Business includes the following quote:
* The Adventures of Bertram Fiddle Episode 1: A Dreadly Business puts it somewhat more baldly than most examples of this trope.
* The Adventures of Blinky Bill, so they just adopt a dingo girl instead.
* The Adventures Of Blinky Bill who skips with flowers and cries at the drop of a hat. He has also helped his sister, Daisy Dingo, out in her beauty salon.
* The Adventures Of Boschen And Nesuko likes to fight (and generally live life) naked.
* The Adventures Of Brianna Baggins has Traude, once the dragon-sickness kicks in.
* The Adventures of Brisco County, Jr.: Bad Luck Betty, a superstitious deputy, managed to put the sheriff in a full body cast after tossing salt over her shoulder just as he came in, which made him lose his footing and a grandfather clock fall on him.
* The Adventures of Brisco County, Jr.: Brisco and Lord Bowler fit this perfectly. They are bounty hunters travelling the West looking for bad guys, and usually finding them.
* The Adventures of Brisco County, Jr. Brisco and several of his companions board a blimp created by Professor Wickwire. The blimp uses helium, and the trope is invoked.
* The Adventures of Brisco County, Jr.: Brisco County, Sr. was a US Marshal.
* The Adventures of Brisco County, Jr. creating a lighter-than-air airship. References included being financed by some German investor, Count von Zeppelin, who wanted it retrofitted with armaments and metal plating. "A lead zeppelin, huh? Could be your stairway to heaven." "If I sell just one of these, it'll be a good year!"
* The Adventures of Brisco County, Jr., demonstrating one and/or the other basically in every episode.
* The Adventures of Brisco County, Jr. Dixie Cousins. Whether this was the writers or characters thinking like romance novel plots is debatable.
* The Adventures of Brisco County, Jr. episode "Crystal Hawkes" features a scene where Brisco steps into a bank offering a free branding iron to anyone opening a new account.

* The Adventures of Brisco County, Jr. episode "Crystal Hawks", Brisco manages to get himself loose from the ropes he's tied up in by using a partially exposed screw in Crystal's cart. The next time she catches him, she shackles him to the cart so he can't do that again.
* The Adventures of Brisco County, Jr. had gunfighter Utah Johnny Montana (he's from Idaho) who can't speak due to having been shot in the throat, and has a sidekick who does all his talking for him.
* The Adventures of Brisco County, Jr. had two intertwining story arcs throughout the series (The Search for The Orb and The Capture of the John Bly Gang).
* The Adventures of Brisco County, Jr. has Brisco playing poker with another guy, both of them cheating constantly until finally Brisco wins with five kings to the other man's five queens. The man gladly accepts the loss with "He cheated me fair and square."
* The Adventures of Brisco County, Jr. has the hero trying to track down a set of stolen treasury plates before they could be used.
* The Adventures of Brisco County, Jr.. He has a massive vocabulary of big words and acts as if he's an expert in numerous fields, from Fine Arts to Architecture to Economics to Train Engineering, but he ends up being one of the dumbest characters on the show.
* The Adventures of Brisco County, Jr.: In "Bounty Hunters Convention", a number of bounty hunters, including Brisco and Bowler, are invited to a convention on a small island. Upon arrival, the bounty hunters all begin mysteriously dying one by one and it's up to Brisco to figure out why and at whose hand.
* The Adventures of Brisco County, Jr.: In "Crystal Hawks", Brisco is separated from Comet the Wonderhorse and has to buy a temporary replacement horse. Problem is, he's only got thirty dollars in his pocket. The resultant horse is so slow, stubborn, and dumb that Lord Bowler calls it a lemon when he sees it.
* The Adventures of Brisco County, Jr. : in order to interrogate a german bandit who does not speak English, one of the Schwenke sisters openly seduces him to make him feel comfortable... until the other sister comes in and kick the crap out of him!
* The Adventures of Brisco County, Jr. is listed in the "Aversions" folder.)
* The Adventures of Brisco County, Jr. moment that went badly the first time around, but this time his past self disappears from the continuum when he does so.
* The Adventures of Brisco County, Jr.: The eponymous star was a Bounty Hunter hired to capture the outlaw gang who murdered his father. His rival, Lord Bowler, was also looking to collect the bounty on those outlaws.
* The Adventures of Brisco County, Jr.: The series often involved deathtraps. Some were relatively simple, like leaving the heroes to drown in quicksand. Others were far more convoluted, such as binding the victims to a tree with dampened straps of rawhide. Rawhide shrinks when it dries, which would crush the ribs of the victims. That's not what kills them, though; it's the rifle pointed at the victims with a dampened rawhide strap attached to the trigger. See, we told you it was convoluted.
* The Adventures of Brisco County, Jr., this was usually the reply Brisco got when asking questions about the Orb to anyone who was actually in a position to know something.
* The Adventures of Brisco County, Jr. to tell the pilot's back story of Brisco's dad getting killed, millionaires hiring his son, and Lord Bowler as a competitive bounty hunter.
* The Adventures of Brisco County, Jr. was a science fiction/western with a lead who was best known for horror/comedies.
* The Adventures of Brisco County, Jr. when Brisco stabs villainous time traveler John Bly in the gut with an Orb rod, causing him to melt into a pile of ash.
* The Adventures of Brisco County, Jr. where we see very little evidence of racism. The part-black, part-Cherokee Lord Bowler is treated respectfully by most of the characters (only in the pilot does one character call him a "half-breed"), and various episodes feature nonwhite characters who are treated more or less as equals to the whites, including a black woman set to become the mayor of a town.
* The Adventures of Brisco County, Jr., which was highly influential, acclaimed,

and popular during its nine seasons.
* The Adventures of Buckaroo Banzai Across the 8th Dimension a mountain!
* The Adventures of Buckaroo Banzai Across the 8th Dimension and they were free to be as goofy as they pleased.
* The Adventures of Buckaroo Banzai Across the 8th Dimension an individual installment in a Modular Franchise can look when viewed by somebody who isn't intimately familiar with the rest of the franchise.
* The Adventures of Buckaroo Banzai Across the 8th Dimension broadcast and the ensuing hysteria were to distract attention from the REAL arrival of the Lectroids.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, Buckaroo and John Parker are chasing the Red Lectroid battleship in a stolen Thermopod. Banzai is sitting in a rear-facing seat, resulting in some confusion when he tries to give Parker directions.
* The Adventures of Buckaroo Banzai Across the 8th Dimension: Buckaroo Banzai invented the Jet Car, a surgical technique to implant a microphone in the human skull so people can give orders to their own brain, and (with Professor Hikita) the Oscillation Overthruster. And that's just what was mentioned in the movie — it's implied that he's done much more.
* The Adventures of Buckaroo Banzai Across the 8th Dimension: Buckaroo Banzai is a world-famous scientist, neurosurgeon, presidential advisor, rock and roll musician, and explorer of the unknown.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, Buckaroo gets confused at the climax when trying to fly the Red Lectroid Thermapod because its controls are, among other things, designed to be operated partially by the pilot's bare (and presumably prehensile) feet. He therefore has to turn control of the ship over to the Black Lectroid John Parker, who unfortunately "failed driving school."
* The Adventures of Buckaroo Banzai Across the 8th Dimension, Buckaroo, the Hong Kong Cavaliers and some Blue Blaze irregulars assault Yoyodyne Propulsion Systems to recover Penny Priddy and the Oscillation Overthruster from the villainous Red Lectroids.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. Buckaroo uses this (with a little help from the Black Lectroids) to resurrect Penny Priddy.
* The Adventures of Buckaroo Banzai Across the 8th Dimension claims that he has "enough decorations to snap a Christmas tree."
* The Adventures of Buckaroo Banzai Across the 8th Dimension, Dr. Emilio Lizardo's room in the asylum was covered in notes for the Overthruster he'd been working on at the time of the accident that caused him to share a body with an evil Lectroid.
* The Adventures of Buckaroo Banzai Across the 8th Dimension had its controls set up to be operated with one's toes.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, has already gathered a team of variously awesome people, and collects another one in the course of the movie.
* The Adventures of Buckaroo Banzai Across the 8th Dimension has Penny Priddy...and Buckaroo Banzai.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, he plays a part of the movie's title theme.
* The Adventures of Buckaroo Banzai Across the 8th Dimension: In the middle of chasing down the bad guys, the Hong Kong Cavaliers run through Buckaroo's lab. There is a watermelon in a vise. New Jersey stops, nonplussed, asks, "Why is there a watermelon there?" Reno replies, "I'll tell you later", and they immediately resume pursuit of the bad guys. It's never mentioned again.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, in the texts on the computer screens. Such Easter Eggs are often referred to by fans of the show as Okudagrams.
* The Adventures of Buckaroo Banzai Across the 8th Dimension is a relatively mild example. All the Black Lectroids do is give him the ability to see all Lectroids as they really are and the knowledge to create an antidote to their illusion disguise.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, John Bigbooté flips off Dr. Emilio Lizardo behind his back.

* The Adventures of Buckaroo Banzai Across the 8th Dimension: Lord John Whorfin, an extradimensional tyrant who was banished to Earth after being overthrown, seeks to steal a machine so he can return to his homeworld and take his throne back.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. Lord Whorfin hooks Buckaroo up to the Shock Tower, which not only detects when Buckaroo is lying but gives him a shock when he does.
* The Adventures of Buckaroo Banzai Across the 8th Dimension: Perfect Tommy lightly bumps his head against the prison bars while Buckaroo is talking to Penny Priddy in jail. The expression on his face and later dialogue indicates that he's doing it out of disbelief that Buckaroo is wasting his time with a woman who tried to kill him.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, Professor Hikita and Dr. Emilio Lizardo are working on an experiment to penetrate the 8th Dimension.
* The Adventures of Buckaroo Banzai Across the 8th Dimension receives the ability to see through the Lectroids' human disguises from the Black Lectroids. This proves to be bad news for the Red Lectroids.
* The Adventures of Buckaroo Banzai Across the 8th Dimension - the alien leader of the Red Lectroids (inhabiting the body of Italian scientist Emilio Lizardo (John Lithgow) gives a rousing pre-invasion speech to his men, complete with the mannerism of Benito Mussolini. It ends with a rousing call to arms:
* The Adventures of Buckaroo Banzai Across the 8th Dimension: The black Lectroid leader sends Buckaroo a record player-like device that generates a hologram of herself.
* The Adventures of Buckaroo Banzai Across the 8th Dimension: The goggles that arrived in the big pink box for Buckaroo Banzai allowed him to see the hologram sent from the queen of the black Lectroids.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. The Secretary of the U.S. Department of Defense is a pain in Buckaroo's neck. He badmouths Buckarooo to other people and tries to convince the President to confiscate Buckaroo's Jet Car.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, the title character jump-starts his ship while it's falling toward the ground.
* The Adventures of Buckaroo Banzai Across the 8th Dimension: the titular hero steals a red Lectroid shuttlecraft over his black Lectroid companion's protests. ("I flunk out of flight school, that is why I am a diplomat.") Later, Buckaroo convinces the Lectroid to take over the controls so he can man the guns.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. They're not all kids, they're not all urchins or orphans, and there is (according to the book, anyway) a training program, required progress in education, and other requirements.
* The Adventures of Buckaroo Banzai Across the 8th Dimension was an obvious cult film that its studio unwisely tried to sell to a mainstream audience. It only made $6 million (on a $17 million budget) in theaters. It finally found its cult on cable.
* The Adventures of Buckaroo Banzai Across the 8th Dimension was part of a cover-up of a real alien invasion.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. We actually see a mechanic working on it in Buckaroo's garage.
* The Adventures of Buckaroo Banzai Across the 8th Dimension, where ALL the Lectroids are named John.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. While being pursued by a Red Lectroid driving a truck, Buckaroo runs straight ahead down the road, where he would have inevitably been run down if a Blue Blaze Irregular helicopter hadn't arrived to rescue him.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. While Buckaroo and John Parker are hovering in the Red Lectroid thermal pod, Lord Whorfin tries to ram them with his troopship. John Parker gets them out of the way just in time, but if Whorfin had succeeded they would have been splatters on his windshield.
* The Adventures of Buckaroo Banzai Across the 8th Dimension. Whorfin gives one to the guard who couldn't turn on the TV to show Penny's torture.
* The Adventures of Buckaroo Banzai Across the 8th Dimension would have been cast

in main character roles.
* The Adventures of Captain Africa, but Columbia lost the film rights to the Phantom and had to substitute an "original" masked jungle hero.
* The Adventures Of Captain Bonneville, wrote that a bear was baited, and likewise, a wild, fierce bull, before they were brought by vaqueros to an arena in a small amphitheatre in Monterey, California, to fight each other. He called the fight "a favorite, though barbarous sport." In this case, he said that the bear used its sharp claws against the nose of the bull, before catching its tongue, after being repeatedly gored by the bull. Then the bull overturned it "with a desperate effort," and then 'dispatched' it rather easily.
* The Adventures of Captain Hatteras, after the heroes get lost for awhile and turn out to have been walking in circles.
* The Adventures of Captain Laserbeam start with the Captain doing some bit of charity work for Apex City only to get called to action by the Adventurekateers. With the Adventurekateers, Captain Laserbeam rattles off various possible villains of the week trying to work out who actually is there, in the process going through various random bantering with the Adventurekateers. Teaming up with other heroes is discussed, as is the Adventurekateers going into action and being flatly rebuffed before Captain Laserbeam goes after the villain himself. Villain puts Captain Laserbeam in a deathtrap, only for the various ramblings of the Adventurekateers to give the Captain a burst of
* The Adventures of Captain Marvel features the Billy Batson/Captain Marvel Switcher.
* The Adventures of Captain Marvel feature the title character as a heroic version of one of these. Often times the criminals will fire bullet after bullet at the Nigh-Invulnerable hero, while the Captain calmly walks forward with a 'you are SO going to get your asses kicked' smile on his face as the bullets shatter against his body.
* The Adventures of Captain Marvel film serial of the 1940's is one of the earliest examples, and interestingly enough, a mild subversion. While Captain Marvel is completely immune to bullets and blades and most forms of harm, there exists technology that can hurt him enough to stun him for a while, and phenomena like molten lava is considered lethal even to him.
* The Adventures of Captain Marvel. The serial also came out when the character's comic series was fairly young, and he had yet to become quite as invincible as he would be eventually.
* The Adventures of Captain Proton, a holodeck program based on cheesy 1930's sci-fi film serials. As Tom created the program, he's already arranged for the supervillain's mooks to have the requisite face-concealing helmets.
* The Adventures of Captain Proton and frequently take on the roles of Captain Proton and his sidekick Buster Kincaid (respectively) in the holodeck (the program being in black and white, including Tom and Harry themselves.)
* The Adventures of Captain Proton, but it tells them it's sick of the lousy diet and helps them escape instead.
* The Adventures of Captain Proton that tended to veer away the most from scientific plausibility).
* The Adventures of Captain Vrungel (and its animated adaptation), the titular captain names his yacht "Pobeda" (Russian for "Victory") — but due to an accident at its launch, the first two letters in the name fall off its stern, making it read "Beda" ("Trouble"). One English translation made the original name to be "Courage", which turned into "Rage" after the first three letters fell off.
* The Adventures of Captain Vrungel), so Vrungel’s first mate, as he pulls the sailors off the deck, accidentally grabs the captain first. The captain isn’t happy and Vrungel also feels awkward, but since the entire crew ultimately gets saved, nobody bothers with the matter for long.
* The Adventures of Caterpillar Jones, Cat doesn't get much characterization other than liking C.J., and Sammy's wife Sandy gets even less characterization.
* The Adventures of Caterpillar Jones, C.J.'s journey of growth involves him literally transforming from caterpillar to butterfly and, in doing so, symbolically

letting go of what's holding him back and embracing his new life.
* The Adventures of Caterpillar Jones, C.J.'s quest to become a butterfly and the characters he encounters, particularly the Great Owl and E. Phil Snake, are meant as a religious allegory.
* The Adventures of Caterpillar Jones, Clarence and George are a retired pair of Adventurers who learned how to do the Flip and climb Ponder Rock without Traveling Thread, inspiring Sammy and C.J. to do the same at an even younger age. They keep up their adventurous ways after becoming butterflies and go Cloud Climbing together.
* The Adventures of Caterpillar Jones, Sammy is a prankster, especially early on, and convinces C.J. that the Great Owl eats young caterpillars after the Life Watch.
* The Adventures of Cyclops and Phoenix stays beside her bed and states he's proud of being her father:
* The Adventures of Dave the Astronaut the protagonist uses one of these space cetaceans to pull his ship after it runs out of fuel.
* The Adventures of Doctor Bell: When a rabbi and a priest show up asking for Joseph Bell, he answers with "I've had to stand him every day of my life."
* The Adventures of Don Coyote and Sancho Panda (and leaving the rest of the cast human), however.
* The Adventures of Dr. McNinja acknowledges this from time to time. Perhaps the most memorable: the Doctor is running through a temple full of death traps and ends up in a room where he is completely surrounded point-blank by traps and robot guards. The alt text snarks "clearly he dies on the next page".
* The Adventures of Dr. McNinja. Action star turned evil mastermind — and a clear homage to Jean-Claude Van Damme. The author even said in an interview that if the webcomic was made into a movie, he would insist on Jean-Claude playing Frans.
* The Adventures of Dr. McNinja. After analyzing Franz Rayner's movements, Dan McNinja's son decides he actually has a Nerve Cluster in his Left Buttock, striking this point is the key to winning the fight for leadership of the Ninja clan.
* The Adventures of Dr. McNinja after Gordito learns of Dr. McNinja's trained waking reflexes.
* The Adventures of Dr. McNinja, a good moustache seems to instantly command fear and respect.
* The Adventures of Dr. McNinja almost never uses swearing, the exception being an occasion utterance of "jackass". In one issue, a NASA employee shouted "AAAA what the flarking heck!?" when his printer shorted out.
* The Adventures of Dr. McNinja and continues until the end of the issue). For that matter, another character returns from the dead not long after - though this has more consequences.
* The Adventures of Dr. McNinja, and every one of them is always fated to go back in time to stop some disaster. A new one shows up every few months to try to change the timeline, again.
* The Adventures of Dr. McNinja and other '80s nostalgia full of this trope.
* The Adventures of Dr. McNinja and taken extreme precautions to keep his beard from ever being noticeable.
* The Adventures of Dr. McNinja answers — even though the second question actually has a better, plot-relevant answer coming up next.
* The Adventures of Dr. McNinja as Doc meets a man using a jetpack and immediately tries to treat his leg-burns. Apparently, the dinosaurs who sponsor the whole jetpack thing (it really does make sense in context) deliberately use this style, as they are hunting the humans and aren't particularly concerned about their well-being.
* The Adventures of Dr. McNinja as it is which ones will not. So far there's been ninjas, vampires, dinosaurs, zombies, robots, popular fast food mascots, and more.
* The Adventures of Dr. McNinja: As the Doctor's sidekick, Gordito is excellently prepared for fights with dangerous opponents, but not for when he actually has to go to (middle) school for a while. When a girl slams his fingers with a locker door on purpose, he immediately punches her down. The other boys keep mocking him about it afterwards.

* The Adventures of Dr. McNinjaastronaut for a mayor. The list of badasses goes on.
* The Adventures of Dr. McNinja...at least, so far as we know. Not to mention the good doctor's mother, Mitzi.
* The Adventures of Dr. McNinja bargains, resemble this format, and were probably inspired by it.
* The Adventures of Dr. McNinja because there was no point doing the trope in this case.
* The Adventures of Dr. McNinja becomes one in the final arc. The Doctor manages to stop King Radical from sacrificing billions of lives, but thanks to King Radical's almost magical charisma, almost no one is grateful for it. Quite the contrary, the entire world goes out for the Doctor's blood.
* The Adventures of Dr. McNinja, but there's still some romantic tension between the two.
* The Adventures of Dr. McNinja by an evil motorcycle helping him hunt down King Radical, this trope provides the "More Than" part.
* The Adventures of Dr. McNinja, Chris Hastings comments, "Any further questions regarding the McNinja's masks can be filed under 'ninja tricks.'"
* The Adventures of Dr. McNinja civilisation was founded by King Radical, who came from another dimension that was more advanced in a rather peculiar way. Way more radical at least.
* The Adventures of Dr. McNinja confirms that it's like Roger Rabbit with "Two Bits".
* The Adventures of Dr. McNinja, curses her, slowly turning her into dust. Slow enough that she's only lost most of her limbs by the time Doc can get to her and cure her.
* The Adventures of Dr. McNinja: Dan McNinja doesn't need to develop an immunity to poisons. His body separates it out and stores it up so he can squirt it out of his eyes. "Like a toad."
* The Adventures of Dr. McNinja: Dan McNinja sets himself on fire to escape other ninjas, and you would expect someone as badass as him to be able to shrug it off, and he did, but his son seems genuinely worried about him being set ablaze.
* The Adventures of Dr. McNinja "D.A.R.E. to Resist Ninja Drugs and Violence".
* The Adventures of Dr. McNinja: Dark Smoke Puncher. Battling jetpacking dinosaurs with his ninja wizard skills. The main thing thats different about him is the trademark Future Badass scar. He was already a ninja in the present working on his technomage gear.
* The Adventures of Dr. McNinja: Defied. Mitzi McNinja only realized that her husband faked his death because her suitors kept turning up dead.
* The Adventures of Dr. McNinja, Doc initially believes that King Radical's plan is to turn an army of jerks into wizards. He only wants to turn one of those jerks into a wizard as a by-product of his larger scheme to transform this reality into the new Radical Land.
* The Adventures of Dr. McNinja, Doc took the identity of a former rival of his named Dr. McLuchador, who died several years prior, in order to infiltrate King Radical's gang.
* The Adventures of Dr. McNinja Dracula is carefully planning one of these. But before he dies, he wants to know what awaits him on the other side.
* The Adventures of Dr. McNinja Dracula's moon base using a technique taught to him by Bruce Lee. Yeah.
* The Adventures of Dr. McNinja, Dr. McNinja employs a gorilla named Judy as his secretary.
* The Adventures of Dr. McNinja: Dr. McNinja gets called out to deal with everything from appendicitis to giant lumberjack attacks.
* The Adventures of Dr. McNinja, Dr. McNinja is a doctor and a ninja. Self-explanatory.
* The Adventures of Dr. McNinja, Dr. McNinja is a doctor and a ninja. Who desperately wants to be Batman. The police of Cumberland know who he is and what he does, but he's made a deal with them: after any action they could arrest him for, if he can get back to his office and declare "Base!" before they catch him, he's

off the hook for it. He's never shown actually doing so, and most episodes end with him back at the office and no evidence that the police even tried to catch him.
* The Adventures of Dr. McNinja, Dr. McNinja, who fights in medical garb (but does so with standard ninja weapons). Played straight only once, when he had to defend himself with nothing but his stethoscope. It's broadly hinted that, while he is strong and stealthy because he's a ninja, what really makes him dangerous is his intimate knowledge of human anatomy.
* The Adventures of Dr. McNinja, during the "Spooky Stuff" storyline, Mitzi specifically warns Dark Smoke Puncher and Gordito (her youngest son and her oldest son's sidekick, respectively) that the opponent they have been tasked with taking down will try this on them. Gordito sees through Mitzi's trick right away; Dark Smoke Puncher...not so much.
* The Adventures of Dr. McNinja, first with Dracula (vampirizing him), then with Pope Francis (who's "holyness" blows him up).
* The Adventures of Dr. McNinja for this webcomic currently features his fake phone number (301-555-4982), fake fax number (301-555-4983), fake address (23 Haunted Wood Drive), but then subverts the trope by taking place in the very real Cumberland, Maryland. (After teasing readers to figure out where the doctor practiced, future stories featured the doctor purchasing an MTO sandwich from Sheetz and noting that "The real mayor of Cumberland gave my family a dog once.")
* The Adventures of Dr. McNinja Forums, which he decided at the last moment to change from Dr. McNugget. He then drew a panel of what said doctor would look like, then used the doctor as the premise of a comic he drew for his art degree.
* The Adventures of Dr. McNinja Franklin, not his deceased mentor the clone.
* The Adventures of Dr. McNinja, given that the removal of his memory is what prompts the repeat of events.
* The Adventures of Dr. McNinja go a step further, including an entire bonus second-punchline panel. The former by hovering over a red button at the end of the strip, and the latter by clicking a hidden question mark at the comic's side.
* The Adventures of Dr. McNinja has a storyline in which Dracula, from his moon base, hatches a plot to turn the clone of Benjamin Franklin into a headless horseman in order to find out more about the afterlife. Seriously. The headless horseman was chosen because it retains its physical form. Turns out they can also travel through space.
* The Adventures of Dr. McNinja has explained that he doesn't know how The Robster (a tricky lobster man) puts his suit on over his claws.
* The Adventures of Dr. McNinja has quite a bit of this, as one ludicrous situation after another is played dead serious, complete with lingering consequences. The author expressed how continually amused he was by the fact that the ninja hero would go always chasing after the fantastic menace of the week in his car... a very dull-looking Honda Accord.
* The Adventures of Dr. McNinja has spawned such a thriving T-shirt business for creator Chris Hastings that, in a recent interview, he mentioned that he sells his merch (at Topatoco) under the name "Raptor Bandit Industries" so he can draw in customers who don't read his comic.
* The Adventures of Dr. McNinja He clearly thinks some resistance members who accidentally attack Dr. McNinja are really stupid to do so, and makes a kind of "look what I have to deal with" face. He may be being a bit harsh, though.
* The Adventures of Dr. McNinja He knew ahead of time it probably wouldn't work, even lampshading it.
* The Adventures of Dr. McNinja: He's an Irish ninja/doctor who wants to be Batman! He's a mustachioed, gunslinging 12-year-old! They Fight Crime!
* The Adventures of Dr. McNinja (in a sense, which is enough to count) in "There is a Raptor in My Office" when Dr. McNinja tells a patient his cancer is back, the patient suggests a way the Doctor could have joked about it in his next line, and the Doctor is angry at how inappropriate that is.
* The Adventures of Dr. McNinja in order to be privileged to witness a lot of dinosaurs being punched.
* The Adventures of Dr. McNinja involved a high dive into a small pool, while

shooting a playing card out of the air on the way down.
* The Adventures of Dr. McNinja: In "Why A Gorilla?", McNinja runs into some hyenas that apparently can talk. Judy, being a local, claims that it's "just a mimic trick" and "they can't really talk," but it seems like an insufficient explanation given the short but appropriate things they say. McNinja is extremely freaked out by them.
* The Adventures of Dr. McNinja is heard inviting Frans Rayner to purgatory.
* The Adventures of Dr. McNinja is likely to be mined for endless hilarity in future chapters.
* The Adventures of Dr. McNinja is one of the most badass families out there. On top of being four of the deadliest ninjas in the world, one of them is also a doctor of EVERYTHING, one designs technology so advanced as to be indistinguishable from magic in his spare-time, the mom is a complete psycho, and the dad assumed the leadership role of all American ninjas by virtue of the authority in his mustache (he also sets himself on fire for fun sometimes). On top of that you've got the Doc's sidekick, the sharpshooting-acrobat raptor-riding-bandito mustachioed-12-year-old Gordito along with loyal receptionist Judy the GORILLA.
* The Adventures of Dr. McNinja is probably one of the most nonsensical works of fiction ever written. It's also absolutely hilarious.
* The Adventures of Dr. McNinja is showing signs of this, courtesy of King Radical, Charles Goodrich and Frans Rayner, in that order.
* The Adventures of Dr. McNinja: "It's better for people to think that you're stupid, than to think you're a jerk."
* The Adventures of Dr. McNinja) it's capable of blocking ninja punches.
* The Adventures of Dr. McNinja: it's implied that it would have worked if Dr. McNinja hadn't incited some self-doubt that resulted in it failing.
* The Adventures of Dr. McNinja, Judy's kitten had survived an attack from a dinosaur and now sports an eyepatch. It still looks very cute. The President of the United States is also shown to have one.
* The Adventures of Dr. McNinja knows that something is very wrong because he doesn't have to fight his way into the house past her.
* The Adventures of Dr. McNinja left behind by the tribe that build it.
* The Adventures of Dr. McNinja maitre d' around; Benjamin Franklin has been there since he died and has only gotten as far as the bread.
* The Adventures of Dr. McNinja, McBonald eventually comes to the realization that the Dr. sees him as one of his villains, which he considers hilarious. While McBonald is not the most ethical business man, he points out to the Dr. that all he did was sell some novelty burgers that coincidentally shared his name, and the Dr. responded by knocking out a restaurant full of customers, destroying his robots, and assaulting him. The Dr. admits he has a point.
* The Adventures of Dr. McNinja — enough skill to earn the respect of the McNinja family. His late father, The Amazing Flying Shooting Juan, was even better.
* The Adventures of Dr. McNinja, Mitzi knocks out Dan when he's suffering from the Knife Eye Attack.
* The Adventures of Dr. McNinja: "Now tell me where Ronald is before I super-size your pain for only thirty-nine cents more!"
* The Adventures of Dr. McNinja of the comic says "That isn't live TV. Frans tivoed it earlier that day."
* The Adventures of Dr. McNinja one villain has a plan to take over the presidency by convincing Americans that it works this way. The arc ends with the good doctor pointing out all the many flaws in the plan.
* The Adventures of Dr. McNinja" on the end of the board. (Contains spoilers)
* The Adventures of Dr. McNinja on the page reads: "Coming up, The Adventures of Dr. McForensicAccountant."
* The Adventures of Dr. McNinja, or an attempt by a disgruntled weatherman attempting to keep his own report from being upstaged.
* The Adventures of Dr. McNinja place, and messing with Dr McNinja's head. Why? For fun.
* The Adventures of Dr. McNinja: Played with. Bodybuilders eventually grow organic

jetpacks, which are directly compared to wings.
* The Adventures of Dr. McNinja plays with this. Dracula's appearance is pure Lugosi, but he lives in a fortress on the moon, staffed with Dracula-bots and various presumed-dead celebrities. And Hitler.
* The Adventures of Dr. McNinja plays with this one. In most instances, a character who takes a wallop to the head (or a chop to the neck) comes out fine. However, the back of Doc's head was once rudely introduced to a piece of wood (pirates and alcohol were involved) resulting in a concussion and a hallucinatory conversation with a roast turkey. (He got better.) In "Why a Gorilla", the trope is parodied by having Doc "wake up" while being pounded into the ground repeatedly by an angry gorilla; he had been unconscious for the better part of an hour but emerges from the experience completely fine.
* The Adventures of Dr. McNinja quick to do this to Dark Smoke Puncher when he gets possessed by a ghost. She's got good reason, though; for all she knows, the thing has outright killed her son and is using the body as a puppet, and she's being practical. Gordito, however, manages to drive the ghost out before that's necessary.
* The Adventures of Dr. McNinja reads, "Make like a tree, and shatter into a million pieces."
* The Adventures of Dr. McNinja Said work is bulldozing the bombed remains of their office. She does have her brief moments of unprofessional behavior, such as when Yoshi steals her clearly marked hot dogs, or when she encounters kittens in a box, or when Yoshi eats the kitten she adopts...
* The Adventures of Dr. McNinja says "What Ben sees is a man with dreadlocks made of fried chicken legs."
* The Adventures of Dr. McNinja scene where the Doctor educates and demonstrates proper one-liner delivery:
* The Adventures of Dr. McNinja Sean "Dark Smoke Puncher" McNinja likes to build robot animals with laser vision and stuff. Their main job is to guard the family home, but that's just an excuse—he just likes making the suckers.
* The Adventures of Dr. McNinja segment at the end of a story he had no part in.
* The Adventures of Dr. McNinja's eyes glow yellow when he goes into the mode where he can fight ghosts.
* The Adventures of Dr. McNinja's lair after being found out, only to realize he'd used his bombs all up earlier, forcing him to have to fight his way out instead.
* The Adventures of Dr. McNinja's moon base. Though that might just be because Dracula apparently collects historical figures.
* The Adventures of Dr. McNinja. So Doc uses the robo-Dracula as a heat shield and safely surfs it down to Earth's surface.
* The Adventures of Dr. McNinja so it's undoubtedly Doc and, of course, we don't get to see what he looks like after all.
* The Adventures of Dr. McNinja staring at the TV in surprise and saying "What." in the next.
* The Adventures of Dr. McNinja's titular Dr. McNinja, as well as his mother, father, and brother. There are other ninja in the plotline too, but they're less prominent.
* The Adventures of Dr. McNinja's titular Dr. McNinja, with a car, a motorcycle, and a private jet in the most recent arc, but this might be a given considering the general craziness of the series.
* The Adventures of Dr. McNinja takes place in a heavily fictionalized version of Cumberland, Maryland. Nobody in the comic thinks anything of it.
* The Adventures of Dr. McNinja terrorizing the city. The comic was later taken down.
* The Adventures of Dr. McNinja that he had countless emails about sound in space and not one about the lack of mobile reception.
* The Adventures of Dr. McNinja that the other end of the call was in a submarine.
* The Adventures of Dr. McNinja, the curtain rod collapsed, fast food scattered around the bathroom, a page of temporal theory in his right hand, and his alarm clock going off.

* The Adventures of Dr. McNinja, the good Doctor's parents have this problem with him. Mitzi McNinja doesn't know how to raise ninja children, having become one by training, and Dan McNinja was never taught this, as it's supposed to be the mother who does this. They tried to teach him via Batman, but instead of a ruthless killer, they raised a vigilante doctor.
* The Adventures of Dr. McNinja. The plot hole was that his dialogue said that this version of him had already saved the world, and saving it from Radical was an extra save, so not what he was sent for. But this contradicted King Radical asking the Chucks in the present about what they had come to save the world from, in case it was him. However, the comic was subsequently edited to replace that line with something that wouldn't create a Plot Hole.
* The Adventures of Dr. McNinja, the Radical Land definitely qualifies, where "radical" and "ham" are pretty much interchangeable, and the main universe the work takes place in isn't far behind.
* The Adventures of Dr. McNinja the reader for making it all the way through.
* The Adventures of Dr. McNinja, the titular Dr. McNinja was hired to infiltrate an ancient temple full of these, blocking a tennis robot which supposedly destroys the world if it's not beaten in tennis.
* The Adventures of Dr. McNinja The universe the setting is in is sandwiched between two other realities, the Radical land, and what amounts to the real world. These universes both bleed their coolness and lameness into the comics one respectively so that its cooler than our universe but not as cool as the radical lands.
* The Adventures of Dr. McNinja, the White House uses one called the Negazone as a security system. Since most of its victims are super villains or the mentally disturbed, they succumb and lose their sense of self rather quickly. This also has the consequence that the visions used by the keeper of the Negazone are less than effective against a heroic character, at least beyond freaking him out briefly.
* The Adventures of Dr. McNinja they're about as unreliable as Google Translate and Siri combined.
* The Adventures of Dr. McNinja, this happens to any time traveler whose space-time link is destabilized (which generally involves damaging a device strapped to their chest). In a slight twist on this trope, random objects from the points in time they end up in can occasionally be thrown back and forth in time as well, though this effect seems to be temporary.
* The Adventures of Dr. McNinja this, saying it is impossible to reason with a vengeful ghost.
* The Adventures of Dr. McNinja to give them than to say that they're probably going to die but at least they'll get to punch a dinosaur first.
* The Adventures of Dr. McNinja true that using it at just this time was the best way to save the day.)
* The Adventures of Dr. McNinja (VERY spoileriffic) page, a time traveller looks at the newspaper to find out what year it is. The front page headline reads "IT IS OCT 4TH, 1979! THAT'S IT. NOTHING IS GOING ON. SLOW DAY."
* The Adventures of Dr. McNinja: We don't see Sparklelord's destruction of the Radical Lands firsthand, but even after he is banished, his corruption runs deep, with no salvation in sight, causing horrific effects on the world.
* The Adventures of Dr. McNinja, when someone calls Doc a nurse as an insult, his response is to defend the nursing profession.
* The Adventures of Dr. McNinja: When the Doctor was little, his grandfather was attacked by Atlantean fish peoople on dry land once... because he'd tricked them into leaving Atlantis so that he could take a holiday in there in peace, and they wanted to know how to get back.
* The Adventures of Dr. McNinja, where a demon can only be slain by one of "pure Belstein blood". There is only one left, who's deformed and in a wheelchair due to generations of inbreeding.
* The Adventures of Dr. McNinja who effects stereotypical "Gangsta" mannerisms. Something of a subversion in that he only does this to prevent his parents from noticing just how incredibly nerdy he actually is.

* The Adventures of Dr. McNinja, who wears urban styles over his ninja suit but is Irish underneath it.
* The Adventures of Dr. McNinja. Why does Dr. McNinja have a mustachioed Mexican boy sidekick? What's with the raptor? Why does his dad have a mustache outside his mask?! You must learn these things.
* The Adventures of Dr. McNinja... with a full-grown mustache. At one point, the good Doctor highlights that Gordito does not merely "tag along".
* The Adventures of Duane & BrandO) and keeping their respective new projects open for when they needed to do solo work.
* The Adventures of Duane & BrandO of the later Robot Masters were created via fan-submitted contest entries, with their designs being tweaked appropriately, so Capcom didn't need to spend much time coming up with Heat Man...or any Robot Master in the game, for that matter.
* The Adventures Of Duane And Brando: the Mario 3 musical has Mario call Iggy a "nerd with a fat head", which causes Iggy to freeze up and drop his wand, complete with the word "TRIGGERED" appearing in front of him.
* The Adventures Of Electronic (about a Human-looking robot), it is specially mentioned that Electronic is extremely vulnerable to water. This is presented as unavoidable.
* The Adventures of Elmo in Grouchland - A German/American co-production.
* The Adventures of Elmo in Grouchland bombed at the box office because of its target audience, but later became the biggest-selling children's VHS of the early 2000s.
* The Adventures of Elmo in Grouchland "Make It Mine", he heavily implies that it is where missing items go to, and he subsequently takes them for his collection.
* The Adventures of Elmo in Grouchland's henchmen turn the arrow on the sign that leads to Huxley's Castle in the opposite direction to trap Elmo in a cave.
* The Adventures of Elmo in Grouchland, there is a gag about very small audience.
* The Adventures of Elmo in Grouchland was framed by segments of Ernie and Bert talking to the audience about what they are about to see and to encourage them to interact with the film. They would also interrupt the movie at certain points.
* The Adventures of Elmo in Grouchland, who played Huxley, was a last-minute replacement for another actor - in fact, he was so last-minute that they didn't have time to negotiate with the record label he was signed to, so "Mine" couldn't appear on the soundtrack.
* The Adventures of Figaro Pho, a scare chord is used in every title card, which are always displayed when the conflict for the episode is first set up.
* The Adventures of Figaro Pho, but unlike Audrey, this plant resembles a pitcher plant rather than a Venus flytrap.
* The Adventures of Figaro Pho: Every episode focuses on a different phobia, usually manifesting said phobia as a character who serves as the villain for the episode.
* The Adventures of Figaro Pho, one appears in the opening for both seasons so far. In both openings, it's the first supernatural threat to appear.
* The Adventures of Figaro Pho Rivet, whose red nose and lips, along with his perky, playful behavior, make him very clownlike.
* The Adventures of Figaro Pho seems to have been designed to be adorable.
* The Adventures of Figaro Pho: The Grim Reaper comes to Figaro's house in his self-titled episode to take Figaro to the afterlife. When Figaro insists that he isn't dead, the Grim Reaper follows him around, trying to get Figaro killed so he can do his job.
* The Adventures of Figaro Pho uses some vocal sounds, like laughing or screaming, there are no actual lines of dialogue.
* The Adventures Of Food Boy is about a teen who can generate food from his hands.
* The Adventures of Ford Fairlane Julian Grendel is roasted alive by the splashing a Sambuca Milkshake and the hero flicking a lit cigarette onto him.
* The Adventures of Ford Fairlane, the protagonist refers to his as "Stanley".
* The Adventures of Fox Tayle explode occasionally, but especially notable is a Honda Accord that gets flipped over before leaking gas and exploding.

* The Adventures of Fox Tayle, Fox is being kept in a water-filled glass container with a breathing mask. To communicate, he has to use a small waterproof writing pad and a grease pencil.
* The Adventures of Fox Tayle is about a regular fox made to be a soldier, but then the government project is cancelled. Fox escapes being killed and is hunted by the FBI for the majority of the story. First published on deviantART.
* The Adventures Of God, but God mostly just made the world for laughs and is an alcoholic. Satan is awful too.
* The Adventures of Gulliver (1968). Miniature Vikings use ship-mounted catapults to attack the city of Lilliput.
* The Adventures Of Gynostar; Douglas is the fetus one of the villains kept in a jar in her house, apparently he's her child. Later on, he joins Gynostar's team of superheroes, having acquired a robot suit that enables him to walk and shoot lasers.
* The Adventures of Gyno-Star features a shadowy cabal of corrupt corporate executives who plot to "eliminate" Gyno-Star for her meddling ways.
* The Adventures of Gyno-Star gay, but how did she know that? (The fact that he literally began to burn when the sexy man walked by escaped him).
* The Adventures of Gyno-Star has one misogynist female villain who wants to turn all women on earth into brainless zombies.
* The Adventures of Gyno-Star, one of Gyno-Star's power is an energy beam that inflicts the pain of childbirth on her enemies.
* The Adventuresof Gyno Star, the villain's electroshock torture collar is sold as a fantastic depilatory device for removing unwanted body hair. Despite the fact that it's extremely painful, it sells like hotcakes.
* The Adventures of Harry Lime returned to the role he'd made famous in the film.
* The Adventures of Harry Nile A former Chicago cop who wound up retiring after seeing widespread corruption in the force, and almost murdered a crime boss in order to get out of debt before working as a private investigator instead. Yet despite just how much of the seedy side of society he's seen, the guy's own humanity is his greatest asset, and he cares for his clients.
* The Adventures of Huckleberry Finn: Huck goes in disguise as a girl at one point; the woman he's talking to gets suspicious when he attempts to thread a needle by putting the needle onto the thread, whereas any girl would know that it is far easier to do it the other way around, and ultimately is found out when he catches a ball of yarn tossed to him via closing his legs such that it lands on his lap. A girl would instead open her legs to catch it on her skirt. In short, Huck didn't do his research.
* The Adventures of Huckleberry Finn is the original Great American Novel, but it is mostly a comedic series of adventures, especially toward the end.
* The Adventures of Huckleberry Finn. Remember, this was written not too long after the Civil War, with racism still heavy in the United States.
* The Adventures of Huckleberry Finn scheme to rescue Jim the "proper" way. He and Huck hide spoons while Aunt Sally counts them, and then replace them when she tries to re-count, as well as sending mysterious threatening messages.
* The Adventures of Huckleberry Finn uses the trope: a lone man shames a lynch mob into disbanding.
* The Adventures of Huckleberry Finn. When Tom shows up to help Huck break Jim out of captivity, Huck's pragmatic plans are always dismissed by Tom, because they 'ain't got enough style' and Tom likes to do things that he got out of books, like trying to dig a tunnel with case knives or giving Jim a bunch of pet snakes and rats.
* The Adventures of Huckleberry Finn who routinely kill members of the other family and teach their children to do so too.
* The Adventures Of Hutch The Honeybee fame) has the title character doing this while searching for his mother.
* The Adventures of Ichabod and Mr. Toad: After leaving the Halloween party and riding through a dark and ominous wood, Ichabod hears a crow, which flies off cawing, "Beware! Beware!"

* The Adventures of Ichabod and Mr. Toad. As he pursues Ichabod Crane, the evil supernatural Headless Horseman rides a diabolical steed with red eyes.
* The Adventures of Ichabod and Mr. Toad, as the title indicates, features an adaptation of Irving's story.
* The Adventures of Ichabod and Mr. Toad, both story- and character-wise, though a few other liberties were taken.
* The Adventures of Ichabod and Mr. Toad: Brom Bones has a dog howl just as Ichabod is giving a singing lesson, causing him to think he produced the sound himself.
* The Adventures of Ichabod and Mr. Toad exists, unlike the book, which very strongly hints that the horseman was Brom Bones in disguise. Notably, the Horseman's horse is the same color as that of Brom Bones, and he also carries a sword identical to that Bones previously wielded. However, Ichabod does at one point look down the Horseman's coat and panics, implying that he doesn't see anything and that what he encountered was the real deal –- although since we don't see what he sees inside the coat, he might also have been reacting to seeing a murderous Brom Bones looking up at him. In another scene the Horseman's horse jumps from a hill to another that was quite far from the former, like it was flying. A thing that a normal horse couldn't have done.
* The Adventures of Ichabod and Mr. Toad gives us Cyril Proudbottom's epic slam against the crown prosecutor, when asked how Toad got the motorcar:
* The Adventures of Ichabod and Mr. Toad, Ichabod hits a low hanging branch that swings him up in the air, landing alongside the Horseman. He continues on until he realizes whose horse he's riding, at which time the same branch knocks him back onto his own horse.
* The Adventures of Ichabod and Mr. Toad: In the process of escaping from jail after being wrongly accused of stealing a car, Toad steals a train right in front of the engineer and no one points out that even if he never stole the car, he still stole the train. However, since he jumped off the train while driving it, it might have been counted as "borrowing it without permission" because he only used it that one time.
* The Adventures of Ichabod and Mr. Toad is brought on by Mr. Toad as his star witness in the stolen motor car case, with Toad hoping that Winky's corroboration of his story that it was a gang of weasels who really stole the car will clear his name - it turns out that Winky is actually the leader of the gang, and he betrays Toad by giving false testimony against him.
* The Adventures of Ichabod and Mr. Toad) of how Toad got the stolen motorcar, the scene then plays out onscreen.
* The Adventures of Ichabod and Mr. Toad segment, the animals try to be quiet while sailing to the secret entrance to Toad Hall lest they alert a weasel guard of their presence. Toad, however, tries to shoot the guard, and they barely end up being spotted.
* The Adventures of Ichabod and Mr. Toad: The Headless Horseman throws doom pumpkins at Ichabod. We're to presume they didn't stop midair after the camera left.
* The Adventures of Ichabod and Mr. Toad: The "Legend of Sleepy Hollow" segment takes place around Halloween.
* The Adventures of Ichabod and Mr. Toad, the Sleepy Hollow segment portrays the Headless Horseman with a jack-o-lantern in place of his head similar to the one of the Scary Scarecrow that Brom Bones beheaded during his memorable, musical contribution to the scary stories sequence.
* The Adventures of Ichabod and Mr. Toad to take back the deed to Toad Hall from a sleeping Winky. As they're pulling him back up, a weasel guard spots them and throws a knife at the rope, causing Mole to fall onto Winky and kick off the climax.
* The Adventures of Ichabod and Mr. Toad to the local beauty Katrina Van Tassel, and is mercifully driven out of town by the clever ruse of the local good-ole-boy Brom.
* The Adventures of Ichabod and Mr. Toad when Ichabod grabs Katrina's hanky and leaps over the fence and chases after Brom Bones to take Katrina from him.

* The Adventures of Ichabod and Mr. Toad: When Winkie double-crossed Toad with a lie saying that Toad stole the motor car, Cyril shouts at him, "That's a deliberate lie, you monkey-faced little rumpot!"
* The Adventures of Ichabod and Mr. Toad where Mr. Toad's friends try to get his deed from Winky and his weasel henchmen.
* The Adventures of Ichabod and Mr. Toad. While Ichabod is wooing Katrina van Tassel in her home, her would-be boyfriend Brom Bones is seething with anger outside. As Ichabod is about to leave, Brom hides behind a double door waiting to attack him. Ichabod swings out the upper half of the door, slamming Brom into the wall and squashing him.
* The Adventures of Isabel is an unflappable little girl you don't want to get on the wrong side of, see her dealings with an enormous bear:
* The adventures of Jack Box, mascot CEO of the Jack In The Box fast-food chain, the longest-running campaign in television history.
* The Adventures Of Jack Bulletproof, The Cop Who Plays By All The Rules.
* The Adventures of Jérôme Moucherot that there's a huge friggin' shark stalking you in your living room. He gets in the protagonist's crosshairs when he eats his son and he has to follow the shark into its own dimension to get him back.
* The Adventures of Jimmy Neutron: A big-time director is coming to Retroville and holds a contest to find a script to make a movie out of. Jimmy scientifically constructs a script by analyzing and replicating from all of the greatest films in history. His script is chosen and he and his friends are put into the movie. Unfortunately it was a trap designed by one of Jimmy's enemies trying to kill him.
* The Adventures of Jimmy Neutron, Boy Genius abuses this power for his own amusement...
* The Adventures of Jimmy Neutron, Boy Genius, after trying and failing to snow sled, "We need a bigger hill."
* The Adventures of Jimmy Neutron, Boy Genius and all, which served as great gossip fodder for Libby's talk show segment on the news (the main plot of the episode).
* The Adventures of Jimmy Neutron, Boy Genius and builds a "brain drain" helmet to lower his intelligence to that of an average person, but it accidentally gets cranked up to maximum stupidity without him noticing, and turns him into a total idiot.
* The Adventures of Jimmy Neutron, Boy Genius", and he'd come up with a solution based on that event.
* The Adventures of Jimmy Neutron, Boy Genius (as well as Cindy as an adult), and they don't sound much different from when they were kids. However, their VAs voice their older selves with slightly different inflections.
* The Adventures of Jimmy Neutron, Boy Genius: At the end of "Journey to the Center of Carl", Miss Fowl's class is back in school after almost becoming permanently sick thanks to Jimmy's latest invention. On this day, Miss Fowl introduces them to a new student, who happens to have a cold, causing everyone to freak out and clear the room.
* The Adventures of Jimmy Neutron, Boy Genius: At the end of "My Big Fat Spy Wedding" we have this exchange:
* The Adventures of Jimmy Neutron, Boy Genius based on it. But unlike the film or the series, the short had stiffer CGI, the characters had four fingers instead of five, and Jimmy wore a red and white stripped shirt instead of his red atom symbol shirt.
* The Adventures of Jimmy Neutron, Boy Genius: Beautiful Gorgeous' form of a villainous laugh consists of her giggling, chortling, horrible laughter while making weird and absurd faces with every chuckle.
* The Adventures of Jimmy Neutron, Boy Genius, but both times she never actually gets the word out.
* The Adventures of Jimmy Neutron, Boy Genius, but they still sic him with 900 days of detention.
* The Adventures of Jimmy Neutron, Boy Genius by the fact that Sheen screams out "Catfight! Catfight!"

* The Adventures of Jimmy Neutron, Boy Genius: Captain Betty and has been called that since a ship incident with sea monkeys sank but he survived on June 3, 1999.
* The Adventures of Jimmy Neutron, Boy Genius. Careless use of a certain helmet, invented in a phase of genius-hating, will cause the wearer to intentionally break into an endless loop of dancing, while proclaiming the joys of being "loopy".
* The Adventures of Jimmy Neutron, Boy Genius, Carl and Sheen are positive that ancient Egyptian curses are a myth, just like the Loch Ness Monster and North Dakota. And permanent records.
* The Adventures of Jimmy Neutron, Boy Genius: Carl watches The Llama Channel, a channel with nothing but shows about llamas.
* The Adventures of Jimmy Neutron, Boy Genius causes Beautiful Gorgeous and the Junkman to start making out, while he argues about wanting to see what happens.
* The Adventures of Jimmy Neutron, Boy Genius, Cindy, Sheen, Libby, and Carl are taken to "Area 86" after they develop superpowers from contact with space radiation.
* The Adventures of Jimmy Neutron, Boy Genius: Cindy Vortex has an aunt stand in for her mother at Retroville's parent/child sporting day.
* The Adventures of Jimmy Neutron, Boy Genius: Cindy Vortex is the second smartest student in school after Jimmy himself, and is also a prodigy in karate.
* The Adventures of Jimmy Neutron, Boy Genius: Cindy would often do this to Jimmy whenever his inventions, discoveries etc started wreaking havoc on Retroville.
* The Adventures of Jimmy Neutron, Boy Genius computer could calculate to perfection.
* The Adventures of Jimmy Neutron, Boy Genius crossover episodes had fun with this. In the second, one character jumped back and forth between CGI and 2D animated "worlds", shouting, "I'm bulgy! Now I'm flat! I'm bulgy! I'm flat!"
* The Adventures of Jimmy Neutron, Boy Genius does this when he's telling the story of the Phantom of Retroland to the class in "The Phantom of Retroland".
* The Adventures of Jimmy Neutron, Boy Genius episode "Battle of the Bands" the group is nearly separated by a series of disagreements. At one point Carl begins to speak with a British accent and tells Jimmy and Sheen to refer to him as "The Artist Formerly Known as Carl".
* The Adventuresof Jimmy Neutron Boy Genius episode "Beach Party Mummy" Carl is at first hesitant to venture into an egyptian tomb and Jimmy tells him he can stay out "in case a marauding band of bloodthirsty graverobbers shows up". All it takes is a scarab to touch his foot for him to scream "Wait for me!" and follow them.
* The Adventures of Jimmy Neutron, Boy Genius episode "Billion Dollar Boy" has spoiled rich kid, Eustace Strych use his butler as an abuse dummy by angrily kicking him in the butt twice. First after losing to Jimmy in a kite battle, and second after losing to Jimmy again in a battle between Goddard and his RA unit robot.
* The Adventures of Jimmy Neutron, Boy Genius episode "Broadcast Blues" the camera zooms right into the mouth of Brittany, performing on stage with Cindy and Libby.
* The Adventures of Jimmy Neutron, Boy Genius episode "Brobot", Brobot thinks Jimmy has a crush on Cindy and teasingly sings "Jimmy's got a girl-friend! Jimmy's got a girl-friend! Jimmy's in lo-ove! Jimmy's in lo-ove!", to Jimmy's annoyance. At the end of the episode, Goddard plays a recording of that sing-song at Jimmy as a joke.
* The Adventures of Jimmy Neutron, Boy Genius episode "Carl Wheezer Boy Genius":
* The Adventures of Jimmy Neutron, Boy Genius episode "Grumpy Young Men", one of Jimmy's inventions turns him, Carl, and Sheen into old men. When they're about to age into dust, Jimmy convinces them to go back through the device with offers of prune whip on the other side, and when they return to normal, Carl is eating a bowl of what he thinks is prune whip but is actually Jimmy's experimental truth serum. He begins confessing secrets such as having stolen Jimmy's toast the other day and his mother being 47.
* The Adventures of Jimmy Neutron, Boy Genius episode "Men at Work", Jimmy tricks the automated McSpanky's restaurant into flying to the sun. However, the lifeless corpse of McSpanky's survives, allowing it to become an alien spaceship.
* The Adventures of Jimmy Neutron, Boy Genius episode "Raise the Oozy Scab", Jimmy

and his friends complete a school project by going in a submarine to find the lost treasure of a sunken ship. When they find the treasure, it turns out to be filled with salt water taffy, much to Jimmy's dismay. But at least they got an A+.
* The Adventures of Jimmy Neutron, Boy Genius episode, "Return of the Nanobots", Jimmy's Nanobots get into the kitchen of the school cafeteria, where their saucer proceeds to "analyze" the sloppy stew by taking a spoon and putting some in an unseen part of its underside. After arguing over whether to "correct" it by adding steak sauce (02) or spicy mustard (01), Nanobot 02 suggests that they just throw in an old shoe, which their saucer proceeds to do before leaving. The Lunch Lady then says that she already made shoe twice that week.
* The Adventures of Jimmy Neutron, Boy Genius episode "Sleepless in Retroville" features Dr. Dark, a program designed by Jimmy to tell scary stories, represented by a floating holographic face with sharp teeth.
* The Adventures of Jimmy Neutron, Boy Genius episode "Stranded", after he and Cindy get stranded on a deserted island, Jimmy gets conked on the head by several coconuts while trying to make his own camp.
* The Adventures of Jimmy Neutron, Boy Genius episode "The Incredible Shrinking Town", Jimmy, Carl and Sheen coax the Space Bandits Zix, Travoltron and Tee to fight each other pretending to be their consciences. As they argue, Travoltron call Zix a "chazazeech" which Zix says isn't even a word.
* The Adventures of Jimmy Neutron, Boy Genius episode "The Junk Man", Sheen asks Jimmy several questions as they are flying to and from the Moon, like why the voyage takes only a few minutes and why the boys don't need space suits and helmets. However, both times Jimmy starts to answer Sheen's questions, the camera cuts to Carl on the other side of the rocket singing an off-key, made-up song about the Moon. Both times Carl finishes singing, the camera cuts to Jimmy asking Sheen if he understands his answer and Sheen responding that he is still confused. On the third question, Carl's singing gets annoying, leading Sheen to yell "Carl! Enough with the song!", but even then we still do not get a plausible explanation.
* The Adventures of Jimmy Neutron, Boy Genius episode "The Junkmen Cometh" Jimmy tells Sheen to keep an eye out with some binoculars for the "Moonie Man" (made up by Brobot who just wanted Jimmy to come to the Moon and play with him) and Sheen sees a dark figure he believes is the Moonie Man. Since he is looking into the binoculars backwards, he appears "tiny and very far away" according to Sheen. Jimmy grabs the binoculars and hands them back to Sheen the correct way and they see that the figure (actually Brobot trying to scare them) is right in their faces.
* The Adventures of Jimmy Neutron, Boy Genius episode "The Trouble With Clones" Jimmy's evil clone contacts the United Nations and asks to speak to Ambassador "Ivana Shakemybooty".
* The Adventures of Jimmy Neutron, Boy Genius episode "Who Framed Jimmy Neutron?", Jimmy, Carl, and Sheen attempt to escape from jail and hide inside a pool during the night. When they lose the guards, Jimmy tells Carl that he can use the restroom, only for Carl to say that he doesn't have to go anymore.
* The Adventures of Jimmy Neutron, Boy Genius episode "Win, Lose and Kaboom", features an Orc-like race called Gorlocks. Jimmy and one of them fall in love with each other.
* The Adventures of Jimmy Neutron, Boy Genius: Eustace Strytch is a male version of this - constantly using and abusing everyone, including his own father, and focusing all his resources on one goal - SMASHING NEUTRON. Oh, and possibly using Cindy, too, just for the hell of it.
* The Adventures of Jimmy Neutron, Boy Genius, everyone lost their pants.
* The Adventures of Jimmy Neutron, Boy Genius expy). Jimmy saves the day by using his machine to turn into Hugh's favorite monster Octopus Man.
* The Adventures of Jimmy Neutron, Boy Genius expy, on his wedding) featured these kind of bloopers.
* The Adventures of Jimmy Neutron, Boy Genius flaunts this trope magnificently. There is even the "Galactic Cable Network" pay-TV service, complete with over 9 billion television channels...all in English. Bizarrely, before they encounter the aliens associated with the network, Jimmy reads a tablet sent from space and makes

a throwaway comment about translating from Aramaic.
* The Adventures of Jimmy Neutron, Boy Genius frictionless, which only makes sense on paper.
* The Adventures of Jimmy Neutron, Boy Genius gets away with throwing a party while his parents are out for the night, but then gets in trouble when he forgot the Velociraptor in the closet that Sheen had accidentally brought to the party with the time machine.
* The Adventures of Jimmy Neutron, Boy Genius good music, they fuse together into one huge alien monster.
* The Adventures of Jimmy Neutron, Boy Genius had Jimmy's dad pay 150 dollars for tickets to a free school talent show. When Jimmy's mom points out that it was a free school function, he mutters, "Darn scalpers." After hearing that Jimmy's band (who have become extremely arrogant and demanding after thinking they're awesome despite Jimmy's instruments doing everything) won't be performing, he stands up and yells, "I want my money back!" before he sits down and mutters that he didn't pay anything anyway in an embarrassed tone.
* The Adventures of Jimmy Neutron, Boy Genius had the number for turning in convicts be 555-555-5555.
* The Adventures of Jimmy Neutron, Boy Genius has a crush on Jimmy's mother Judy to the point where he has a picture of her and "him" where he's pasted a cut-out of his own face over Hugh Neutron, Judy's actual husband and Jimmy's dad.
* The Adventures of Jimmy Neutron, Boy Genius has Jimmy getting picked last for basketball due to his short stature.
* The Adventures of Jimmy Neutron, Boy Genius has Mara S (or acaciathorn, if you want to use her deviantart account handle). She founded and currently runs the longest-running JN fansite on the net. Plus, she wrote a truly incredible, book-length fanfiction called 'The Other Side Of Tomorrow', complete with chapter illustrations and its own fandom. If you've participated in any JN fandom on the net, chances are you've run into Mara or her works at some point.
* The Adventures of Jimmy Neutron, Boy Genius has to snap her out of it.
* The Adventures of Jimmy Neutron, Boy Genius, he gets trapped in a tiny jar and Carl requested Wanda(who herself look creeped out) to make him look like Judy. After which Carl leers at Calamitious and he responds with a horrified expression.
* The Adventures of Jimmy Neutron, Boy Genius, he is unsurprisingly able to pull off a good fake of Cindy's voice. Cindy's attempts to sound like Jimmy, however, fall squarely into this trope.
* The Adventures of Jimmy Neutron, Boy Genius: In "Beach Party Mummy", Jimmy's torch goes out leaving them all in complete darkness.
* The Adventures of Jimmy Neutron, Boy Genius included a holographic realistic heart.
* The Adventures of Jimmy Neutron, Boy Genius: In "Crime Sheen Investigation", after putting Cindy through a lie detector test, Jimmy tells Goddard to X-ray Cindy's clothes, prompting Sheen to have an excited expression while Carl hides behind his notepad. Cue Jimmy getting epically slapped by Cindy.
* The Adventures of Jimmy Neutron, Boy Genius: In "Normal Boy", Jimmy gets an idea, and a lightbulb appears above his head, which is promptly seized by the Gus the Janitor since a light went out in the teacher's lounge.
* The Adventures of Jimmy Neutron, Boy Genius in one episode has Sheen frequently saying "why must the good die young?" when it appears someone has died.
* The Adventures of Jimmy Neutron, Boy Genius: In "Professor Calamitous I Presume", Jimmy is trying to rescue Goddard from the villain while Carl and Sheen are at the Candy Bar. They keep in communication with walkie-talkies.
* The Adventures of Jimmy Neutron, Boy Genius: In "Send in the Clones", when the town confronts Jimmy about the stuff his clones had done.
* The Adventures of Jimmy Neutron, Boy Genius: In "Sorry, Wrong Era", when an angry mob brings Hugh home to Judy, they complain that his antics with the time travel function on Jimmy's remote disgusted Sam's customers, gave Cindy and Libby brain freeze, and made a pregnant woman experience the miracle of childbirth "again and again and again".

* The Adventures of Jimmy Neutron, Boy Genius, instead of her cartoon design which has a ponytail and looks older.
* The Adventures of Jimmy Neutron, Boy Genius instead of the game show. Naturally, he ends up on the set at the very end and saves the day by answering the trivia question correctly:
* The Adventures of Jimmy Neutron, Boy Genius: In "The Eggpire Strikes Back'' Jimmy refused to shake hands with King Goobot out of disbelief that he had truly reformed.
* The Adventures of Jimmy Neutron, Boy Genius: In the episode "Beach Mummy Party", Jimmy and his friends start dancing this way while partying in the desert.
* The Adventures of Jimmy Neutron, Boy Genius into one of his friends to retrieve an antidote that will cure a virus that is making him and his classmates sick. Sheen raises his hand while saying, "I volunteer...Carl to be the person we go inside."
* The Adventures of Jimmy Neutron, Boy Genius involving the various characters and a flying vampiric pizza. The final nightmare turns out to belong to an actual vampire pizza, sleeping in his pizza box; when he explains his terrible dream to his wife, she consoles him that children don't exist, and everyone knows that.
* The Adventures of Jimmy Neutron, Boy Genius. (It is defeated by luring it out of the dream, where it becomes harmless and is semi-reluctantly eaten by Jimmy, Carl and Sheen.)
* The Adventures of Jimmy Neutron, Boy Genius. It's "born" by static electric discharge from the behind, but is otherwise fairly harmless.
* The Adventures of Jimmy Neutron, Boy Genius, Jimmy and Carl's hamster Mr. Wuggles accidentally swap heads after a teleportation experiment gone wrong.
* The Adventures of Jimmy Neutron, Boy Genius, Jimmy and company are unknowingly teleported to a simulation of Retroville populated by very unconvincing and zombielike recreations of the citizens. The fake Sam offers them ice cream, which Libby says tastes like sheetrock, but Carl doesn't seem to mind.
* The Adventures of Jimmy Neutron, Boy Genius, Jimmy and his friends get jobs at a restaurant. Sheen is at the drive-thru window and calls out the order. Carl replies, "Is he doing the hokey-pokey or the chicken dance?" Sheen looks back at the car and asks, "Would you like fries with that?"
* The Adventures of Jimmy Neutron, Boy Genius: Jimmy, Carl, and Sheen use these in Cindy's swimming pool while on the run from a cop in "Who Framed Jimmy Neutron".
* The Adventures of Jimmy Neutron, Boy Genius, Jimmy creates a robot version of his mother when she goes on a trip to the spa. The robot acts normal at first, but it starts acting very different and starts doing things like making green slop for meals, forcing Jimmy to go to bed early, and refuses to let Jimmy or Hugh leave the house for any reason. The latter becomes so bad that the robot ties up Jimmy and Hugh when they try to leave.
* The Adventures of Jimmy Neutron, Boy Genius: Jimmy gets into these situations quite often, such as when he experimented on his Grandmother (effectively turning her into a baby) after his mother makes a rule against it.
* The Adventures of Jimmy Neutron, Boy Genius: Jimmy Neutron is usually asked this whenever he tests his inventions on his friends.
* The Adventures of Jimmy Neutron, Boy Genius: Jimmy's mom bursts free of ropes to save her son and husband from a robot copy of herself.
* The Adventures of Jimmy Neutron, Boy Genius: Judging from his ringtone, Professor Calamitus uses a Nokia phone.
* The Adventures of Jimmy Neutron, Boy Genius making a very tall tower of rounded sticks.
* The Adventures of Jimmy Neutron, Boy Genius — then the pieces fly back together, unharmed.
* The Adventures of Jimmy Neutron, Boy Genius — they didn't send Sheen's Twonkie (who never mutated due to Sheen's horrible singing) back to Twonkus-3, and it reproduces, its offspring hopping into Retroville, and one of them is seen against a "The End?" screen.
* The Adventures of Jimmy Neutron, Boy Genius, not the typical belly region. Make

of that what you will.
* The Adventures of Jimmy Neutron, Boy Genius of an urban legend about a theme park, questioning how Nick could know the kids' final words if they were never heard from again.
* The Adventures of Jimmy Neutron, Boy Genius once they're back to Retroville, it does serve as a turning point in their relationship development.
* The Adventures of Jimmy Neutron, Boy Genius opens with a spider crawling across the screen with ominous music playing. Jimmy then yells at Sheen to turn the music off.
* The Adventures of Jimmy Neutron, Boy Genius over and over again, making Cindy and Libby relive snorting smoothie from their noses over and over again.
* The Adventures of Jimmy Neutron, Boy Genius parody "Operation: Rescue Jet Fusion", Jimmy and Jet are left in an elaborate death trap... and manage to escape.
* The Adventures of Jimmy Neutron, Boy Genius place after the former beat the latter in a kite battle, Jimmy says he'd rather gargle liquid nitrogen.
* The Adventures of Jimmy Neutron, Boy Genius: Popsicle released an ice of Jimmy's face. It has blue gumball eyes and is cherry cola flavored. The ice has been discontinued.
* The Adventures of Jimmy Neutron, Boy Genius, proving he had no idea what he was doing.
* The Adventures of Jimmy Neutron, Boy Genius receives flak from various people for his ice cream/fudge swirl of a head.
* The Adventures of Jimmy Neutron, Boy Genius says "My shoe's untied...OVER THERE!"
* The Adventures of Jimmy Neutron, Boy Genius: Sheen, who's Latino, gets paired up with Libby, who's black.
* The Adventures of Jimmy Neutron, Boy Genius shower?" Well, 500% of 0.000001 still isn't much.
* The Adventures of Jimmy Neutron, Boy Genius: Similar to Michelangelo below, Jimmy Neutron's friend Carl Wheezer, when they're using Jimmy's perfect slumber party machine to make a pizza, states that he eats his pizza with clams, peanut butter, and hot fudge ("Don't knock it till you try it").
* The Adventures of Jimmy Neutron, Boy Genius so Jimmy can prove that nothing suspicious happens there. They end up trapped by a algae obsessed scientist named Dr. Moist:
* The Adventures of Jimmy Neutron, Boy Genius special "Win, Lose, and Kaboom!" in which Jimmy and his friends were taken into an intergalactic game show, the gang faced against the Needleheads in the Fear-Factor style game, "Can You Eat This?". For the Needleheads' turn, one failed to devour a banana cream pie as his head and entire body explodes.
* The Adventures of Jimmy Neutron, Boy Genius: "Stranded" featured a giant spider during the climax. It was foreshadowed in an earlier scene.
* The Adventures of Jimmy Neutron, Boy Genius that he was able to finally defeat the nanobots. And that's just the first episode they appeared in...
* The Adventures of Jimmy Neutron, Boy Genius that he was a genius by sending her pictures from Jimmy's past exploits with the exact same picture of his face taped over Jimmy's.
* The Adventures of Jimmy Neutron, Boy Genius that preceded the TV series on Nickelodeon.
* The Adventures of Jimmy Neutron, Boy Genius That's it!) and had to kidnap Jimmy so that he could finish his inventions for him.
* The Adventures of Jimmy Neutron, Boy Genius the episode “One Of Us” has everyone try to force Jimmy into watching the Happy Happy Fun Show that has them turn into rather cheerful Zombies.
* The Adventures of Jimmy Neutron, Boy Genius (the era was the Mesozoic), and that it ended 200 million years ago. Any dinosaur-crazed eight-year-old could tell you that it ended 65 million years ago.
* The Adventures of Jimmy Neutron, Boy Genius, the group are trapped in an Egyptian tomb and the lights go out when Jimmy drops his torch.
* The Adventures of Jimmy Neutron, Boy Genius. Their appearances in the actual

series had Bullock and Greenberg reprise their roles.
* The Adventures of Jimmy Neutron, Boy Genius: The Love Potion Jimmy Neutron created on said series. Used not once, but twice.
* The Adventures of Jimmy Neutron, Boy Genius, there was a rich father who didn't want to discipline his snobby son, Eustace Strych, for his behavior because he was too ashamed. At the end, after Hugh gives him tips, he finally disciplines Eustace by not letting him seek vengeance against Jimmy for a month.
* The Adventures of Jimmy Neutron, Boy Genius the season ended. The result? One of the last 3 episodes to air ("Lady Sings the Blues") had a B-plot of Jimmy and Cindy accepting their feelings for each other and ended with them kissing on the lips, which is why half the fandom considers it the series finale.
* The Adventures of Jimmy Neutron, Boy Genius they stole every adult in Retroville (except Miss Fowl) only to take them to their planet in order to feed them to their giant chicken god. The second time they arrived on Earth they successfully earned everyone's trust and tried to kill off all the adults once more. Then there is Grandma Taters, who's apparently one of many similar aliens that take over planets using hypnosis.
* The Adventures of Jimmy Neutron, Boy Genius: This happens to Jimmy when Carl exits his clubhouse in the episode "Love Potion 976/J".
* The Adventures of Jimmy Neutron, Boy Genius, this kids almost destroy the entire town before they learn to control their newly acquired superpowers.
* The Adventures of Jimmy Neutron, Boy Genius, though admittedly he lacks actual common sense, though that's somewhat justified, considering he is only ten.
* The Adventures of Jimmy Neutron, Boy Genius usually have a floating atom as a while, sometimes during commercial breaks Jimmy’s symbol on his shirt zooms in and out.
* The Adventures of Jimmy Neutron, Boy Genius voicing the character during his musical number.
* The Adventures of Jimmy Neutron, Boy Genius was a spin-off of the series instead of the other way around.
* The Adventures of Jimmy Neutron, Boy Genius was originally just a dummy owned by Jimmy's dad. Jimmy implanted him with a chip to make Hugh a good comedian, but the plan backfired and Flippy started to absorb his dad's brainpower.
* The Adventures of Jimmy Neutron, Boy Genius. When Jimmy and Cindy switches bodies, the "brains" retains their voices, but when Jimmy creates imperfect clones of himself, each has a different voice related to their personalities.
* The Adventures of Jimmy Neutron, Boy Genius when Jimmy boosts his brain to cheat on a test — which is par for the course for Jimmy's experiments.
* The Adventures of Jimmy Neutron, Boy Genius when Jimmy is actually banned from the school Science Fair because everyone is sick of him winning year after year.
* The Adventures of Jimmy Neutron, Boy Genius: When Jimmy peeks into his and his friends' futures in one episode, he sees himself as the first-ever winner of the Nobel Prize in bulk.
* The Adventures of Jimmy Neutron, Boy Genius when Jimmy, Sheen, and Carl are traveling back from the moon:
* The Adventures of Jimmy Neutron, Boy Genius: When Jimmy shows up in a tux for Jet Fusion's wedding to Beautiful Gorgeous in "My Big Fat Spy Wedding", Cindy is, to put it simply, stunned by his beauty.
* The Adventures of Jimmy Neutron, Boy Genius, when Jimmy tells his parents that he wants a little brother, his dad tries to tell him that baby making is very complicated, to which Jimmy responds, "it's not complicated, really." He then proceeds to explain it while his dad covers his ears. This eventually becomes uncomfortable enough for him to excuse himself from the table.
* The Adventures of Jimmy Neutron, Boy Genius when the leader space bandits discusses one of his plans by whispering into their ears. When Travolton asks why he's doing this, Zix responds, "Because it's more dramatic."
* The Adventures of Jimmy Neutron, Boy Genius when they have Sheen fake an alien news broadcast. The reporter is just his hand with some googly eyes on, the monster attacking him is clearly just his other hand, and the attack suddenly stops so he

can conclude the broadcast with "That is all." All but two of the aliens still fall for it.
* The Adventures of Jimmy Neutron, Boy Genius where Jimmy realizes once all is taken care of that they never sent Sheen's unmutated Twonkie back, which reproduces and its offspring hop into Retroville.
* The Adventures of Jimmy Neutron, Boy Genius, where Sheen accidentally gets stranded on an alien planet.
* The Adventures of Jimmy Neutron, Boy Genius), which reproduces and its offspring hop into Retroville.
* The Adventures of Jimmy Neutron, Boy Genius, who hails from "Backhairistan".
* The Adventures of Jimmy Neutron, Boy Genius wins after the device malfunctions, it's revealed that her "mother" is actually her bodybuilding aunt, which would mean the prize goes to the Neutrons - except that they fess up to cheating as well, at which point the presenter runs through every team present until near-terminally unathletic Carl and his father are revealed to be the only ones who haven't cheated in at least one of the events.
* The Adventures of Jimmy Neutron, Boy Genius with an extensive knowledge of human biology when Jimmy tells his parents that he wants a baby brother:
* The Adventures of Jimmy Neutron, Boy Genius within a dream within a dream within a dream.
* The Adventures of Jimmy Neutron, Boy Genius, with the alien baby making his butt glow purple and grow to a ridiculous size.
* The Adventures of Jimmy Neutron, Boy Genius yells this in the episode "Jimmy for President" after the umpteenth time someone knocks on his door to ask him to vote for them.
* The Adventures of Jimmy Neutron, Boy Genius, yet in "Attack of The Twonkies", his horrible singing ends up proving to be a lullaby to the twonkies whereas everybody else's singing is what causes them to attack in the first place.
* The Adventures of Jimmy Neutron, complete with a laser spear. And he manages to forget his solitary line.
* The Adventures of Jimmy Neutron is an excellent example of this trope - even the glitches in his programming, such as his ability to "play dead" (AKA spontaneously reassemble after a main core implosion), regularly come in handy. Jimmy's dad Hugh even comments in one episode that Goddard can do eleven million and four things, with the only talent he lacks being the ability to clean up after himself (that's Hugh's job/hobby).
* The Adventures of Jimmy Neutron: Jimmy becomes this when he becomes a hall monitor.
* The Adventures of Jimmy Neutron, Jimmy is having trouble with a bully, but his parents think he's talking about a girl, so mom Judy tries to get Hugh to give Jimmy the talk. Hugh struggles with the words, but by the time he gets the nerve to do it the conflict is resolved and Hugh ends up giving the talk to Jimmy's robot dog Goddard.
* The Adventures of Jimmy Neutron. Now realizing they started the whole feud for nothing, everyone becomes furious with Sheen and they advance on him as the episode ends.
* The Adventures of Jimmy Neutron, the Neutron family gathers to celebrate their Aunt Amanda's birthday, and at one point, this exchange happens:
* The Adventures of Jimmy Neutron, the Neutrons and the Wheezers are both more than a little peeved at Sheen.
* The Adventures of Jimmy Neutron trying to destroy Jimmy and his friends.
* The Adventures Of Joe The Circle, and a working knowledge of the laws of thermodynamics.
* The Adventures of John and Dave, Dave travels four weeks back in time, causing Nazis to win World War II.
* The Adventures Of Johnny Tao martial arts training, he becomes much more impressive.
* The Adventures of Kid Danger. As such, it doesn't do much to introduce shows to new viewers.

* The Adventures of Kid Danger to appeal to its fans, while it doesn't do much to draw in new fans.
* The Adventures of Kiki and Qeqe have several animation errors; for example, one of the titular characters in the air appears frozen.
* The Adventures of Kotetsu protagonist, Lynn "Kotetsu" Suzuki, hails from Kyoto and she has a Kyoto accent as a result. However in ADV's English dub, she is given a generic English accent.
* The Adventures of Lano and Woodley . After the third or fourth, Col tells him to stop it because there's a risk of him fainting. Frank gasps and faints. Then when he comes around, he asks what happened. Col tells him that he fainted. Guess what happens.
* The Adventures of Lano and Woodley . Col and Frank are fleeing their psychotic ex-boss who is trying to kill them. Frank trips and this exchange ensues:
* The Adventures of Lano and Woodley does this in "The Girlfriend", with Colin telling a busker about his failed attempt at seduction in a cafe, culminating in a modern dance sequence.
* The Adventures of Lano and Woodley episode "One Simple Task", Frank tells a series of ever-increasing lies to hide the fact he forgot to book a place at a caravan park, which ends with "I am an alien!"
* The Adventures of Lano and Woodley , when they've horribly damaged a wall close to an inspection in their apartment, as well as the other side of the wall in their neighbour's flat:
* The Adventures of Lano and Woodley , with neighbour Susannah's lithp. I mean, lisp.
* The Adventures of Lariat Sam: Sam is pretty much the sheriff of Bent Saddle, where keeping law and order isn't easy with the villains Badlands Meeney and his minion J. Skulking Bushwhack.
* The Adventures Of Ledo And Ix can hear it when the other accesses the party inventory, and know to expect monsters in a dangerous location "unless that music is very misleading."
* The Adventures Of Ledo And Ix of how creepy it would be to live in such a place.
* The Adventures of Letterman!" (Fortunately, the series' protagonist, Letterman, was always there to put a stop to it.)
* The Adventures of Letterman: In the infamous skit involving Spellbinder turning a plane into a plant, the pilot — realizing there is nothing that can be done to save themselves — cries out, "Air traffic control ... please talk to me!"
* The Adventures of Li'L Bill. What makes it actually funny is the executives' claim that any resemblance to a Presidential administration is entirely coincidental, although we the fandom are too smart to fall for that!
* The Adventures of Lomax, and in crucial moments, these pots will keep infinitely reappearing if you run out of either.
* The Adventures of Lomax examples are obstacles that attempt to use 3D perspective, usually only creating confusion about whether they're currently in a position where they can hit you or not.
* The Adventures of Lomax, haunted ship levels have skeletons as enemies.
* The Adventures of Lomax. He does have some hair on the sides of his head, though.
* The Adventures of Lomax, the barrel enemies from the first world stop dead and explode after a brief moment when you get close.
* The Adventures of Lomax, there are enemies in the first world who fly in balloons and throw bombs at you.
* The Adventures of Lomax, the third world is like this, complete with cowboy enemies.
* The Adventures of Lomax variant. The zombies you encounter in the second world are actually lemmings magically turned by Evil Ed into monsters. They are blue and do the Zombie Gait at first, but start running angrily when hit once, and turn back into normal lemmings when you hit them the second time.
* The Adventures of Lomax, we have lemmings turned into monsters, zombies, vampires, werewolves, sharks, green goo monsters, cowboys and exploding barrels, and there are also bees, spikes, swinging spiky balls, airships shooting rockets...

* The Adventures of Lomax with defeated enemies - you gain access to a bonus level after defeating only 50 of them.
* The Adventures of Luther Arkwright, me, and all the rest of us. It's probably Anglophone comics' single most important experimental work."
* The Adventures of Luther Arkwright. Mind reading is done by touching hand to head, but it appears that it's more of a data dump than reading surface thoughts (though it is implied that another psychic can control the contents of the dump). However, it is possible to implant thoughts without touching.
* The Adventures of Mark Twain makes various humorous quips to Tom, Becky, and Huck through their journey to Halley's Comet. However, deep down, Twain suffers from a profound sense of loneliness from his wife's passing, and thus, chases the comet so he could finally be with her once more.
* The Adventures of Mark Twain of Tom Sawyer, Huckleberry Finn and Becky Thatcher helping Mark Twain reach Hailey’s Comet.
* The Adventures of Mark Twain's face is a Greek drama mask that morphs into various faces, including an exceptionally disturbing skull.
* The Adventures of Mark Twain, where he experiments with creating life before destroying it in disgust.
* The Adventures of Massmouth on the planet Nemo. They are frighteningly fast and vicious, and their bizarre, scary screams don't help.
* The Adventures Of Mc Gee And Me: In the episode "Take Me Out of the Ball Game" Nick learns to trust in God to make him play well, not the other men and the provoking opponents on the field.
* The Adventures of Milo and Otis, a story about a lost kitten and a puppy, has a scene in the treetops at nighttime where the kitten talks with a horned owl with glowing eyes who pops out of nowhere. Though he is friendly, he is, needless to say, quite terrifying for younger children.
* The Adventures of Milo and Otis when a Bear is trying to catch and eat Milo in an abandoned shack by the beach.
* The Adventures of Mini-Goddess: On Gan-chan's birthday, the goddesses got him a robot able to grant three wishes before midnight. The first two were wasted when the other goddesses spoke too loudly, and the time drew ever and ever closer to the deadline. Finally, in a fit of panic, he wished the day would never end.
* The Adventures of Mini-Goddess, this is used as a joke: Urd is trying to help a small rat get a wife, and sets him up with an appliance of some kind. However, the appliance says that she was in love with another kitchen appliance, and the two run off together, leaving the rat standing by himself, with the shadow of a cow and horns extending from his body.
* The Adventures of Mini-Goddess with a "Do Not Touch" label. Urd and Gan-chan fight over it until she changes the sign to say "Please Touch", at which point they stop. And then Belldandy presses it herself.
* The Adventures of Mr. Incredible had Mr. Skipperdoo, a mostly useless, bespectacled rabbit.
* The Adventures of Nero, who looks like a child in a smoking jacket and mortarboard.
* The Adventures of Ook and Gluk: Kung-Fu Caveman from the Future, there is a sneak peek at a sequel, but there is currently no word on when or if it will be released.
* The Adventures of Oswald the Lucky Rabbit came with an Oswald button.
* The Adventures of Ozzie and Harriet got its fourteenth season in 2019.)
* The Adventures of Ozzie and Harriet: Ricky Nelson, who parlayed his TV fame into a legitimate music career, and carried on his family's tradition (Ozzie was also a huge star, but in the 1930s and 1940s).
* The Adventures of Paddington are framed by Paddington writing a letter to his aunt Lucy about the events of what happened in the episode.
* The Adventures of Paddington of what happened according to the letter.
* The Adventures of Paddington was supposed to premiere in April 2020 in the United Kingdom, but got bumped up a month earlier to March 2020.
* The Adventures of Paddy the Pelican resorted to looping uncolored cut-outs and rough animation which were frequently out-of-sync in each episode. Not to mention

that sound effects are largely absent with the exception of some atrociously improvised voice acting and music, all of which were provided by Singer himself!
* The Adventures of Paddy the Pelican was basically pencil tests submitted as finished cartoons, and while the artwork was decent, the animation consisted only of obvious one-second loops and panning shots.
* The Adventures of Panda Warrior spoils the ending by showing Patrick fighting the villain.
* The Adventures of Pete & Pete. Almost every time we see him, he's just been dumped by his on-and-off girlfriend Bus Driver Sally Knorp, and he reacts increasingly poorly. On various occasions, the break-up has caused him to spend the bus ride home giving a six-hour tour of important locations in his and Sally's life; go insane upon hearing "If You're Happy and You Know It"; and drive to the Arctic, tattoo her name to his chest, strap himself to an iceberg and drift out to sea (though we don't know if he went through with that last one. He shows up again afterwards, so he probably didn't.)
* The Adventures of Pete & Pete, and Little Pete and Nona from same. '90s Nickelodeon seemed to really like this trope.
* The Adventures of Pete & Pete, Artie lives in a porta-potty, but has hosted barbecue parties out of it, though the interior is never shown.
* The Adventures of Pete & Pete: Big Pete befriends a boy who dresses like he's from the 1950's, and who is obsessed with Johnny Unitas and the 1958 NFL Championship Game, which is credited with putting the NFL in the public consciousness and essentially making pro football "big", which featured Unitas leading the Colts to a 23-17 overtime victory over the New York Giants.
* The Adventures of Pete & Pete, Big Pete cannot spit it out to Ellen ("I...I..."), to which Ellen responds, "It's OK, I know" and smooches him in the middle of a packed high school stadium.
* The Adventures of Pete & Pete company, which appears to manufacture or own nearly every product and service in the show's universe, may be a rare benign example.
* The Adventures of Pete & Pete could pick up Mexican radio stations from the plate in her head.
* The Adventures of Pete & Pete. Dad wants to have a talk (not The Talk) with younger Pete but younger Pete thinks they're gonna have The Talk:
* The Adventures of Pete & Pete: Ellen gets a B in Driver's Ed, and spends the episode kissing up to the instructor. She eventually gets an A-.
* The Adventures of Pete & Pete: Ellen gets a job as a pizza delivery girl and has to do this in the final episode.
* The Adventures of Pete & Pete; Ellen has Pete help her zip up her full-body bunny costume that she has to wear for her job as a pizza delivery girl.
* The Adventures of Pete & Pete, Ellen would occasionally introduce herself as Big Pete's girlfriend, to which he would immediately correct her, saying, "You're a girl, and you're a friend, but you're not a girlfriend!"
* The Adventures of Pete & Pete episode "Splashdown" had the urban legend of a urine-detecting pool chemical come to life via "Wee-Wee See", which is used to bust a peeing perpetrator.
* The Adventures of Pete & Pete, from Kreb of the Loom underwear to the family's Krebolet, are made by KrebStar.
* The Adventures of Pete & Pete had a tattoo of a lounging Spanish woman that he called "Petunia" and was later revealed to have another of a sailing ship. He's not embarrassed, but his mother was, and she always tried to make him cover them up.
* The Adventures of Pete & Pete, has a hand missing. He replaces it with different tools, and occasionally a prosthetic hand, as the occasion warrants.
* The Adventures of Pete & Pete) helped popularize it in the late 1990's.
* The Adventures of Pete & Pete: In "Pinned!", this is how one of the wrestlers ahead of Big Pete on the ladder is taken out.
* The Adventures of Pete & Pete. In the two-parter "Goodbye, My Little Viking", Little Pete parts ways with his best friend and personal superhero Artie (the

Strongest Man - in the world!), who realizes that he is no longer needed more, and sets off to find a new kid who does.
* The Adventures of Pete & Pete in the world) chucks it off into the distance.
* The Adventures of Pete & Pete is built around this premise. The whole show has a cozy yet surreal feel to it like something out of a cartoon. For example, Wellsville has a resident superhero. Artie, the Strongest Man In the World. A man who, among other feats has hit a golf ball 300,003 yards, pushed a house to the left an inch (he wanted to knock it over, but he had strained a muscle earlier while lifting a brassiere emporium), rolled a bowling ball from Wellsville to Canada, skipped a stone on Neptune, left the Wrigley family's gutters clean and spotless by blowing through the drainage pipe (albeit at the cost of said gunk going flying all over the neighborhood), and leapt across the city in a single jump.
* The Adventures of Pete & Pete is notorious for its "unknown line", the third line of the title song "Hey, Sandy", which for years remained a mystery to fans. Recent sources have begun speculating anew as to the exact wording of the line; however, no confirmation has been forthcoming from the artist as of yet.
* The Adventures of Pete & Pete; Little Pete shoots the Garbage Man with a tranq (actually hitting a major vein!), and it takes a couple of minutes of real-time to start taking effect.
* The Adventures of Pete & Pete: Monica is always working to earn a new merit badge. Some of the badges are "ethnic dance", "kung fu", and "cafeteria lady".
* The Adventures of Pete & Pete: Pete and Ellen try going out after all of the UST between them... only for it to go horribly. However, not long after that, they kiss again and it apparently goes well. It's as frustratingly vague as it sounds.
* The Adventures of Pete & Pete, "Rangeboy." Big Pete doesn't want to be recognized at his summer job at a driving range, so he wears a bear costume and becomes the (non-speaking)golf bear. Unfortunately, he gets beaned several times — and then the golfers begin aiming at him. Before long, regular golf has ceased, and the sole sport is getting the bear with flying golf balls.
* The Adventures of Pete & Pete room, since she has never been inside one in her life, apparently. Upon entering she is utterly astounded by the presence of urinals and completely baffled as to their purpose. The two boys (who happened to be in the exact same bathroom for some reason) decide to have some fun by telling her the urinal is "a foot washer".
* The Adventures of Pete & Pete, specifically during the shorts when brevity was of the essence.
* The Adventures of Pete & Pete Stu realizes there's nobody driving the bus anymore.
* The Adventures of Pete & Pete to pull this with Big Pete and Ellen, though the show's reluctance to bother with continuity meant it didn't stick and Big Pete was back to pining for Ellen a mere seven episodes later.
* The Adventures of Pete & Pete universe never specifies what happens to folks who get sucked into hand driers.)
* The Adventures of Pete & Pete was actually filmed in New Jersey. The bowling alley shown in the series is Lodi Lanes. Three different houses were used to represent the Wrigly house- first in Leonia, then in South Orange, and finally Cranford.
* The Adventures of Pete & Pete was a series of advertisements for Nickelodeon before becoming a series. Many of the one-minute shorts were expanded into half-hour episodes throughout the show's run.
* The Adventures of Pete & Pete was still being aired as shorts, several half-hour long specials aired during that time. When the series became Half-hour fulltime, those specials were re-edited to appear as standard episodes, adding the title sequence and song "Hey Sandy" and re-scoring the episodes with the standard cues. This is most jarring with "How We Spent Our Summer Vacation".
* The Adventures of Pete & Pete: When little Pete and his friends decide to answer the payphone that's been ringing for almost thirty years (and has most of the townspeople frightened), his friends start to drop out for various reasons- one

says he's caught in a force field, and another says she's just too chicken.
* The Adventures of Pete & Pete, when Little Pete is tunneling under his house to escape from being grounded, he finds a wallet, looks at it and exclaims, "Hoffa!"
* The Adventures of Pete & Pete, when Little Pete, Wayne, Nona, and Monica are wandering through the woods without food, Nona offers for every to eat her lucky candy necklace, and says that the yellow ones taste like summer.
* The Adventures of Pete & Pete, with its wandering routes and bright, happy masks, is actually an informal brotherhood for those seeking to escape and/or forget.
* The Adventures of Pete & Pete with Little Pete's "LOVECON" alerts, with 5 being the highest level of "danger" (i.e., lovesickness).
* The Adventures of Pete & Pete, with one (Martin Van Buren) getting stuck.
* The Adventures of Pete & Pete. Young Pete and his two friends are called into the principal's office for being troublemakers and is about to give them detention before another issue takes his attention. Before he leaves, the principal tells the trio to not leave his office but forgets about them and goes home, leaving Pete and his friends in school for the whole night. After having an adventure in School during the night, the trio returns to the principal's office before he arrives in the morning. When the principal asks them what they are doing in his office, the trio reply he told not to leave his office so they did. Shocked that they did what he told them and that he had accidentally locked the kids up in the building, the principal decides to not give them detention and allows them to take the day off.
* The Adventures of Peter Pan has a second hook-hand that both looks and functions like a crab claw.
* The Adventures of Peter Pan was going to premiere on January 8, 1989, but due to TV stations pre-empting programming for coverage of Emperor Showa's death, it premiered a week later.
* The Adventures of Phoebe Zeit-Geist who eventually brings her back to life.
* The Adventures of Pinocchio - An American/French/Czech/British/German co-production.
* The Adventures of Pinocchio, Antonio the carpenter (AKA Maestro Cherry) has just fallen to the floor in shock after hearing a piece of wood talk when Gepetto comes in.
* The Adventures of Pinocchio, because it resembles a cornmeal mush of the same name. This feature about him tends to be left out of most adaptations.
* The Adventures of Pinocchio for playing fast and loose with his uncle's story, and even unsuccessfully tried to sue the studio for misrepresenting his uncle's work.
* The Adventures of Pinocchio. In the original story, it takes several days for the first part of the change (the ears) to occur.
* The Adventures of Pinocchio is about a wooden puppet who wants to become a real boy so he can grow up.
* The Adventures of Pinocchio is a wooden puppet who was alive even before being carved into his current form by Gepetto. This isn't anything unusual in the setting and Pinocchio does meet other living puppets at the Great Marionette Theater. Five of them are identified: Harlequin, Pulcinella, Signora Rosaura, and two officers, and the lot of the is owned by Mangiafuoco. Mangiafuoco captures Pinocchio after his presence at the theater causes problems and intends to burn him to cook his meal, which is something he's implied to do regularly to his puppets. Pinocchio successfully pleads his case, but volunteers to burn when Mangiafuoco says that Harlequin then has to die. The puppeteer is moved and spares everyone.
* The Adventures of Pinocchio is really fond of those: making Pinocchio's nose grow when he lies and giving him fake food as a punishment for skipping school are just a few examples.
* The Adventures of Pinocchio: The Fox and the Cat tell Pinocchio that if he plants some gold coins in the ground, they will grow into a tree with a thousand gold coins growing on it. It turns out to be a fraud.
* The Adventures of Pinocchio, the giant sea creature that swallows Pinocchio and

Geppetto is not a whale but a shark.
* The Adventures of Pinocchio who’s voice was sped up to sound childlike.
* The Adventures of Pluto Nash, and it was one of the three 2002 films he did that put his career in a bad spot.
* The Adventures of Pluto Nash, Dina picks up an automatic pistol, but ends up shooting in all directions due to recoil, but she took out most of the mooks until stopped by Bruno the robot which he takes care of the rest with his guns.
* The Adventures of Pluto Nash furniture, but actual wood). At one point, a mobster is mentioned by someone to have had a briefcase made of genuine alligator skin. Naturally, this immediately outed him as an Earther.
* The Adventures of Pluto Nash, Pluto and Dina go to see a body alteration specialist, who shows them different projections of what their bodies could look like. One of these is the pair as a male and female bodybuilder. Both of them are very impressed with their new potential bodies. Well, Dina is until Pluto has the specialist give her projection a way bigger chest and butt.
* The Adventures of Pluto Nash seems to be either really jerky or techno/pop mixed with autotuning. The dancing is also very jerky. Everyone moves for a second then freezes for half-a-second, etc.
* The Adventures of Prince Achmed kicks into gear when Prince Achmed mounts a magic mechanical horse and pulls the lever that makes the horse fly. He does not know how to make the horse land.
* The Adventures of Prince Achmed, Prince Achmed and his flying horse land in a castle occupied by five beautiful, apparently pretty horny women. They all kiss him, but when they start brawling with each other over Achmed's attention, he gets back on the horse and flies away.
* The Adventures of Prince Achmed uses a similar technique known as silhouette animation, which uses jointed figures made of black cardboard lit from behind. The effect is similar to Oriental shadow puppets.
* The Adventures of Priscilla, Queen of the Desert, Adam threatens to sing after being locked out of the bus. He carries through with the threat but is unsuccessful and spends the night outside.
* The Adventures of Priscilla, Queen of the Desert drag queen who persuades them to do a cabaret act in the middle of the desert. That breaking sound you heard was your brain.
* The Adventures of Priscilla, Queen of the Desert the character played by Terence Stamp chooses to stay in the outback with a new love interest instead of going back to Sydney.
* The Adventures of Priscilla, Queen of the Desert, Tick says to Felicia, "Is it true when you were born the doctor turned around and slapped your mother?"
* The Adventures of Priscilla, Queen of the Desert: Transgender character Bernadette reacts violently when Adam (who she never got on well with anyway) refers to her by her (male) birth name.
* The Adventures of Priscilla, Queen of the Desert until they catch him.
* The Adventures of Puss in Boots: After defeating the Sphinx, who wasn't too fond of her job guarding a magical hourglass to begin with, Puss offers her a more rewarding job as the guardian of San Lorenzo.
* The Adventures of Puss in Boots, a goblin places a curse on Puss to turn him into a black cat, thus becoming a Jinx. He ultimately decides for the good of his friends, to exile himself from town until he can find a cure.
* The Adventures of Puss in Boots a group of black cats decide to trick a Puss cursed into being black into staying with them forever, which is detailed in their "mystical tome", which turns out to simply be the leader's diary. After that the diary is just filled with "Mr. and Mrs Fransisco Puss in Boots" over and over.
* The Adventures of Puss in Boots are depicted in a 2D storybook art style as opposed to the usual 3D CG.
* The Adventures of Puss in Boots being a unicorn. Who can talk. And fly.
* The Adventures of Puss in Boots, black cats have an inherent ability to focus their bad luck into energy blasts fired in this fashion.
* The Adventures of Puss in Boots, Evil Puss becomes blinded by the Netherworld,

which leaves his eyes completely blank black.
* The Adventures of Puss in Boots features the Silver Dowsing Rod of Akhenaten, a magic dowsing rod that can track down anything the holder thinks of.
* The Adventures of Puss in Boots, in a sense, by giving the ring to the skeletons and inviting them to live in San Lorenzo.
* The Adventures of Puss in Boots is a being summoned from the Netherworld that describes himself as being the source of all fear and older than the world.
* The Adventures of Puss in Boots is on such a higher level than anyone else, that nothing anyone does to him makes him do more than flinch slightly. He blocks all of Puss' attacks barehanded just to show he can, as when Puss finds an opening and stabs at the Bloodwolf with all his might, Puss' sword breaks against him.
* The Adventures of Puss in Boots of Dulcinea allows her to wield it for an extended duration, but even she starts to become gradually more evil as time passes. El Moco, however, is evil enough that the sword doesn't need to control him entirely, because their beneficial goals put them on the same page.
* The Adventures of Puss in Boots, Pajuna the Highland cow provides milk to her customers at her bar despite having no husband or children.
* The Adventures of Puss in Boots, Puss is chased by an extremely powerful Golem that is so slow, it has been no hassle for him to simply keep moving and stay ahead of it. Dulcinea is able to take a short walk out of town to meet up with it and talk, and it still takes it five hours from that point to make it to town.
* The Adventures of Puss in Boots: Puss tries to create a scarecrow in his own image as a means of scaring off thieves, but it ends up severely terrifying orphan Toby instead.
* The Adventures of Puss in Boots, San Lorenzo's prison also doubles as its bar. Although Puss insists prisoners aren't allowed to order drinks while there, the bartender sells them drinks behind his back anyways.
* The Adventures of Puss in Boots than two friends going to relax together.
* The Adventures of Puss in Boots that was the previous season finale, the revelation that there is a lot more time to spare than first though immediately gives an opening for breather episodes starting with "Copy Cat", where Puss is so distracted thinking about the task at hand, he accidentally agrees to be in two places at once.
* The Adventures of Puss in Boots the author of Dulcinea's favorite book, Miguel A. Andante, turns out to have been a woman named Miguela Andante. Rather than a deliberate invocation of the trope, this is just the result of a typo in publishing. One of many reasons the author is not fond of that particular book.
* The Adventures of Puss in Boots the Bloodwolf has an army of wolves with bat wings. Given that they come out of a portal to the "Netherworld", they are as close to literally being bats out of hell as it gets.
* The Adventures of Puss in Boots, the group spend a small arc trying to track down clues to lead them to an artifact known as the "Obelisk of Night". After helping out the person said to have it, they find that he just has a replica of it and points them to where the real obelisk is found; the group's home town of San Lorenzo.
* The Adventures of Puss in Boots they bestow... until Puss lays some glue down to trip him up.
* The Adventures of Puss in Boots, this is how all magical fountains work. You can only benefit from the effects of a fountain once, and if you say "release" to negate the effects, you don't get a second chance.
* The Adventures of Puss in Boots to be cacophony. She is forbidden from playing it within the city limits.
* The Adventures of Puss in Boots to guard the gates of San Lorenzo to protect its treasure from thieves, but she's often sleeping, away, or simply lets thieves in because they solved her riddle.
* The Adventures of Rad Gravity, but it can by bypassed by glitching through the walls with the Teleport Beacon.
* The Adventures of Rad Gravity fight takes place in zero gravity where you have to propel yourself with your gun and trick his homing missiles into hitting him,

easier said than done.
* The Adventures of Rad Gravity, the planet Vernia has a floating city.
* The Adventures of Rad Gravity, the second half of Cyberia has you going inside a supercomputer to shut it down.
* The Adventures of Robin Hood below) that stated a peasant who escapes serfdom and lives in a city for "a year and a day" is a free man, given the man lives openly, not in hiding. Surgeon Calend has nearly completed that duration, and only has to remain 'at large' until sunset that day and he will be free, but the Sheriff closes in on him whilst he is treating Little John.
* The Adventures of Robin Hood: Character actor Sam Jaffe appears as a serf.
* The Adventures of Robin Hood for a reason: The Merry Men not only competently carry out the attack on Sir Guy's treasure caravan, but they also execute Robin's rescue from hanging even without his leadership.
* The Adventures of Robin Hood had three 'movies' released on video, and later DVD, called "Robin Hood: The Movie", "Robin Hood: The Quest for the Crown" and "Robin Hood: Greatest Adventures" that were only way to get any of this classic show before the entire series was released on DVD.
* The Adventures of Robin Hood: Hanging is the answer for murder, thievery, poaching, trespassing...
* The Adventures of Robin Hood: Howard Hill, the archer who fired all the arrows in the film, plays the man in the archery contest who scores a bullseye only to have Robin split his arrow (of course, he really fired that shot too).
* The Adventures of Robin Hood in 1959 when Will Scarlet (hitherto an occasional guest character played by Ron Howard) was promoted to a regular character played by Eddington.
* The Adventures of Robin Hood: Robin climbs up to Marian's window for a romantic meeting where he hangs on the outside of the building and she leans out to kiss him.
* The Adventures of Robin Hood, Robin's first request when King Richard asks what his reward should be is a pardon for his men.
* The Adventures of Robin Hood, the main theme that plays over the opening credits ends with the accompaniment of several drums. As the film starts, we see these drums are in the film itself, calling attention to the town crier.
* The Adventures of Rocky & Bullwinkle, Boris and Natasha tell Fearless Leader, falsely, that they've killed Rocky and Bullwinkle, making him think he's invincible. But he's no sooner gotten through boasting that no one can stop him than Karen and Rocky burst in to do exactly that. (Although they don't exactly manage to do much in the way of stopping him; it's Bullwinkle, who has gotten separated from the group and doesn't arrive until later, who actually makes it possible to defeat the Pottsylvanians.)
* The Adventures of Rocky & Bullwinkle: Boris Badenov, Natasha Fatale, and Fearless Leader all turn into real-life humans when accidentally pulled out of a TV by a Hollywood film executive. Rocky and Bullwinkle, however, stay as animated 3D models.
* The Adventures of Rocky & Bullwinkle, Boris, Natasha and Fearless Leader become live actors as they go through a television screen.
* The Adventures of Rocky & Bullwinkle enough to put out the fuse when their backs are turned.
* The Adventures of Rocky & Bullwinkle features the states of California, Arizona, New Mexico, Colorado, Kansas, Oklahoma, Missouri, Illinois, Indiana, and Ohio vs. Karen Sympathy, Rocket J. Squirrel, and Bullwinkle J. Moose.
* The Adventures of Rocky & Bullwinkle gave less screen time to the cartoon moose and squirrel than new human characters, plus the human cartoon villains that are played by real people. Rocky and Bullwinkle are on a very small part of the DVD cover (pictured above) while live-action actors are front and center.
* The Adventures of Rocky & Bullwinkle has a few things scattered throughout, most notably an instance of "damn" and a brief shot of the antagonists in a hot tub, that seem to be in awareness of this trope.
* The Adventures of Rocky & Bullwinkle is loaded with these even by the

standards of this trope. Given that many of the major characters are fully aware that they are fictional characters transplanted from a cartoon (with all the tropes that "cartoon" implies), it's not entirely surprising.
* The Adventures of Rocky & Bullwinkle is so loaded with early 2000s pop culture references that it might as well be called "The 2000s, starring Moose and Squirrel."
* The Adventures of Rocky & Bullwinkle, it made hay out of this as the plot begins when FBI Agent Karen Sympathy has to climb a lighthouse and literally greenlight the entire film herself.
* The Adventures of Rocky & Bullwinkle movie, the villains use a television program that causes the viewers to become zombies and attempt to broadcast it across the United States so Fearless Leader can become president.
* The Adventures of Rocky & Bullwinkle?", to which Fearless Leader angrily replies "Shut up! This is totally different!" (These lines appear in the film after Fearless Leader states there has never been a way to kill a cartoon character until now.)
* The Adventures of Rocky & Bullwinkle uses "Be Ya Self" by Tarsha Vega during the first part of the credits.
* The Adventures of Rocky & Bullwinkle: When enemies Boris, Natasha, and Fearless Leader escape into the real world with a nefarious scheme, Rocky and Bullwinkle do the same, and team up with a young F.B.I. Agent to stop the trio.
* The Adventures of Rocky and Bullwinkle and Friends, appropriately enough.
* The Adventures of Rocky and Bullwinkle and Friends, Nell is tied to a log headed towards a buzzsaw in the sawmill.
* The Adventures of Rocky and Bullwinkle and Friends results in Bullwinkle getting pelted in the face with various objects.
* The Adventures of Rocky and Bullwinkle and Friends set of tracks that he happens to step onto.
* The Adventures of Sam & Max: Freelance Police, "Bad Day on the Moon": Sam sees a giant cockroach do a spit-take, and describes it as "the universal sign of surprise and alarm".
* The Adventures of Sam & Max: Freelance Police head in "Fools Die on Friday", where Lorne highjacks a Swedish blimp and tries to crash into New York City in order to attract Sam and Max' attention.
* The Adventures of Sam & Max: Freelance Police: In "Christmas, Bloody Christmas", the Freelance Police team up with Sam's Granny Ruth to contain a prison break on Christmas Eve.
* The Adventures of Sam & Max: Freelance Police: In the episode "Little Bigfoot", Sam becomes extremely annoyed with Max for doing this, to the point where he takes the straw out of the cup and shoves Max's head through it. Max, oddly enough, takes this in stride:
* The Adventures of Sam & Max: Freelance Police: In the episode "The Friend For Life", this type of music is heard multiple times. The first time it's heard is a scene where Sam and Max are at a creepy amusement park at night, standing in front of a funhouse. All of a sudden, the funhouse's lights turn on, the ride comes to life, and the ominous music begins playing.
* The Adventures of Sam & Max: Freelance Police is drawn without lashes, further emphasizing her tomboyish appearance.
* The Adventures of Sam & Max: Freelance Police: Max blindly reaches for a towel while singing in the shower and accidentally hits the lever on the office toilet, burning the hell out of himself while also inadvertently flushing a tiny assailant down the crapper.
* The Adventures of Sam & Max: Freelance Police, "The Thing That Wouldn't Stop It", revolves around an old TV dinner turning into a shape-shifting monster.
* The Adventures of Sam Spade) opened and closed with Sam dictating a record of the episode's events to his secretary, Effie. Sometimes subverted when Effie was, herself, involved in events.
* The Adventures of Samurai Cat books featured a map of the areas visited in the book, showing them in relation to each other; they also all including an area

labeled "Vermont", with a spot marked "Author's House".
* The Adventures of Samurai Cat parody) employ a Kurosawa-esque wipe to end a scene. Everybody shouts "WIPE!" and voila, the scene changes ...
* The Adventures of Samurai Cat tale. The duo are on an alien ship trying to decipher the controls, and find that they're actually labelled in Japanese. Then they realise that, despite being from 17th century Japan, they were speaking English.
* The Adventures of Samurai Cat. The protagonist, samurai Miaowara Tomokato, ends up shot nearly to pieces by his enemies. The bullets are said to pass through the several places in his heart and brain where a bullet could pass through harmlessly. He (and his sidekick) are, if memory serves, 'millimetres more accurate' in their return fire.
* The Adventures of Scamper the Penguin, Gilbert has this reaction almost as soon as he sees the birds of prey start their approach on the now-exposed penguin eggs.
* The Adventures of Sharkboy and Lavagirl as Sharkboy has water powers and Lavagirl has fire powers.
* The Adventures of Sharkboy and Lavagirl created the film based on the dreams and ideas of his son Racer. The entire project was dedicated to his son.
* The Adventures of Sharkboy and Lavagirl". Eventually, some kind of settlement was reached because the movie still came out. Good luck finding any Sharkboy wrestling videos on a Google search.
* The Adventures of Sharkboy and Lavagirl, knowing full well that it will kill her. Sharkboy then throws her body into a volcano, reviving her.
* The Adventures of Sharkboy and Lavagirl powercord mooks for a shocking train of baddies.
* The Adventures of Sharkboy and Lavagirl, Sharkboy has to sing a lullaby so Max can fall asleep and have a dream. It starts out slowly, but he soon gets into the song and sings really energetically and aggressively, and Lavagirl yells at him for giving Max nightmares.
* The Adventures Of Shark Boy And Lava Girl, Sharkboy is singing to get Max to sleep;
* The Adventures of Sharkboy and Lavagirl there. At one point, Lavagirl gets pissed at him for how she was written.
* The Adventures of Sherlock Holmes and Doctor Watson, Holmes once complains to Watson that the most interesting crime news in that day's Times is a report of a failed pickpocketing attempt:
* The Adventures of Sherlock Holmes and Doctor Watson, that's how the duel between Holmes and Moriarty goes. They both seem to fall off a cliff and into a waterfall, but Holmes had checked around before Moriarty arrived, and knew of a ledge wide enough to hold a single person.
* The Adventures of Sherlock Holmes and Doctor Watson who tends be cold, moody, and high-handed. This series' version of Holmes is still very eccentric and has a mischievous sense of humor, but is warmer, friendlier, and less abrasive.
* The Adventures of Sherlock Holmes) disguises himself as a singer at a party. His disguise is so good that he feels audacious enough to get on stage in front of everyone and sing a tune. His disguise? Nothing more than a fake mustache. It's all in his facial contortions and mannerisms, and it comes across as plausible that nobody would recognize him.
* The Adventures of Sherlock Holmes, Holmes criticizes Watson's approach to a particular case, stating that he's done "remarkably badly" (by Holmes's own impossible standards, anyway). This exchange follows:
* The Adventures of Sherlock Holmes, Professor Moriarty prepares his evil plan while soft but ominous flute music plays in the background. Then, as we move to a different perspective, we can see the shadow of a man playing the flute from another room. One of Moriarty's underlings complains about it.
* The Adventures of Shirley Holmes episode "The Case of the Second Take" depicts two men playing chess with glass pieces on a board that is surrounded by old baby shoes as someone does tai chi on a rooftop in the background; according to the director, it "challenges the television fetish for speed, sensation, and the

obvious."
* The Adventures of Shirley Holmes has shades of this for Molly Hardy, the main antagonist. In the beginning, he's little more than a flunkie for her sociopathic plots, and he goes along willingly even though he knows it's wrong, just because he likes her. Eventually, he figures out that she's just using him, and splits away from her.
* The Adventures of Shirley Holmes: Shirley is offering to a teacher the hypothetical scenario of a friend in a relationship with someone and not knowing much of their past, trying to instill doubts and suspicion in the teacher regarding her own new boyfriend, who Shirley has learnt is a con man trying to steal her money. Instead the teacher assumes Shirley is talking about herself and her best friend Bo, and responds in kind.
* The Adventures of Shirley Holmes, Shirley is the daughter of British diplomat Robert Holmes and virologist Dr. Joanna Holmes. She carries on her famous ancestor's legacy of solving crimes through deductive reasoning while attending the prestigious Sussex Academy.
* The Adventures of Shirley Holmes). The police officer interrogating him acknowledged he couldn't arrest Holmes but warned he could lose his job over that. That risk was quite real.
* The Adventures of Shirley Holmes. Up to the very end, she's got everybody convinced that she's a model student. She was popular, Student President, and winner of several art and academic awards. Only Shirley and Bo see her sociopathic side, initially.
* The Adventures of Shirley Holmes who wants to stop him from exploiting child labor.
* The Adventures of Shuggy generate clones of Shuggy at set intervals. If he makes contact with any of his clones, he dies and has to start the level over from the beginning.
* The Adventures of Sinbad and arguably main recurring villain that Sinbad has to deal with.
* The Adventures of Sinbad by Tony Nicholls, Sinbad is abducted and replaced by his evil identical twin Binbad.
* The Adventures of Sinbad: Eblus, a Djinn prince who manipulates kingdoms into outlawing magic and descending into decadence so he can rule. He also assisted Turok, who doesn't qualify due to returning in the season 1 finale, in his scheme to kidnap a princess and take over a kingdom. He's killed with a spear to the face soon after the reveal of his true nature.
* The Adventures of Sinbad episode "The Beast Within", where Sinbad is forced to play a game of hunter and prey with one of Rumina's monsters.
* The Adventures of Sinbad : It's pretty usual to see a poor unnamed crewman falling off the ship during a storm scene.
* The Adventures of Sinbad. Turok is an evil sorcerer that is featured in the first two episodes, and the season one finale. Rumina is the daughter of Turok and the main villain of the first season. She loves Sinbad, but hates him for murdering her father. Rumina is an expert in black magic, which is easy to learn compared to white magic. Rumina is also obsessed with killing Maeve, something she never manages to accomplish. In the planned third season, Rumina would have made her return, and it was to be revealed she and Bryn were sisters.
* The Adventures of Sinbad villain who could turn anything he touched while wearing magic gloves into stone, and gathered a collection of beautiful women this way. He's defeated when Sinbad grabs his wrist and shoves his hand into his face.
* The Adventures of Sir Lancelot had a remnant of the Roman colonial government of Britain hiding behind a section of Hadrian's Wall, pretending to be ghosts.
* The Adventures of Slim Goodbody and the odd evil wizard, and this is what you get.
* The Adventures of Slim Goodbody B-1 needs to have tapes inserted into a drive on his chest regularly, or else his programming crashes.
* The Adventures of Slim Goodbody: B-1, Slim's sidekick, is his right-hand man and is a robot.

* The Adventures of Slim Goodbody: Despite working in law enforcement, Agent B-12 has shades of this, often holding a microphone and explaining the situation to Body Control as if she were a news reporter. Since her main (but not only) role seems to be gathering information for headquarters, this is plausible.
* The Adventures of Slim Goodbody exists in this setting, and [b] Body Control is heavily implied to be a government-funded operation.
* The Adventures of Slim Goodbody is this, and its lyrics literally say "I'm the Gobbler".
* The Adventures of Slim Goodbody of Body Control! One of the tricks Slim uses to disguise the fact that he Halen are the same person: while in his Captain Halen Hearty persona, he wears glasses. He doesn't as Slim Goodbody.
* The Adventures of Slim Goodbody: Several villains use devices on other characters that have a mental effect on them, e.g. giving them bad habits, hypontizing them into doing the villains' bidding, or making them no longer feel hungry. They refer to these effects as spells, implying their devices are this.
* The Adventures of Slim Goodbody: The Gobbler was an obese mafia-esque villain whose sole purpose in life in his introductory episode seemed to be to eat as much as possible, to the point where he had his henchman hypnotize an entire city's children into losing their appetites so that he could eat all their food!
* The Adventures of Strong Vanya acts as a trusted advisor, but he is scheming to take over the throne by forcing the Tsarevna to marry him, and it is rumored he caused the old Tsar's disabling illness. He also attempts to murder Vanya before he makes a legitimate claim for the throne.
* The Adventures of Strong Vanya: Alioska Roschof is the main character's town's biggest and dodgiest troublemaker. He turns people against each other just because he enjoys their quarrels, and he talks Vanya's brothers into burning their home down for no reason other than his amusement.
* The Adventures of Strong Vanya and a magic spear, which is more than enough to deal with most of foes he stumbles upon.
* The Adventures of Strong Vanya: Grand Duke Dimitri is a sinister, stone-hearted, power-hungry schemer who disposes of anybody who dares to badmouth him and intends to seize the throne by forcing the Tsar's daughter to marry him. Dimitri is despised by the old Tsar and Princess Vasillisa, and feared and hated by the peasantry who thank God when Vanya comes along and claims the throne.
* The Adventures of Strong Vanya is an old, evil witch who steals horses and kills whoever she finds wandering around her swamp.
* The Adventures of Strong Vanya keeps three wild, hungry Siberian bears in a pen behind the palace's gates to deal with unwanted visitors. It is said that whoever gets to deal with them will not need a coffin afterwards.
* The Adventures of Strong Vanya plots to force the Tsarevna Vasilissa into marrying him to take over the throne. Aware that the Grand Duke is despised by his daughter and hated and feared by the common follk, the old Tsar invokes one law which allows him to launch an engagement challenge: Anybody who intends to marry the princess must bring the Armor of the Tsar Ivan Vasilievich within seven years, seven months and seven weeks multiplied by seven. Meanwhile, he secretly mentors one guy who looks decent to undertake the challenge.
* The Adventures of Strong Vanya: The main character beats down the evil wood-dwelling dragon Och, which was terrorizing an entire region, and gets the magic Ironwood Spear after defeating it.
* The Adventures of Strong Vanya: The main character is armed with the Ironwood Lance, whose tip can shatter any weapon or shield upon contact.
* The Adventures of Strong Vanya: The titular character is a farmer's lazy son, born in a remote Russian village, who becomes Tsar.
* The Adventures of Sue and Kathryn! is quite horrible with the recorder, and can't play a tune to save her un-life. She claims to be self-taught, and it shows.
* The Adventures of Sue and Kathryn!, this is the response of some of the neighbors to Sue's invitation to a cookout.
* The Adventures of Superboy, a super strong alien woman named Neila, who pursued Superboy romantically, appeared to be an ersatz version of the comics' Maxima.

* The Adventures of Superboy had its own version of Metallo, whose super-strong arms were powered by a chunk of kryptonite. He's pretty much helpless when running on battery power.
* The Adventures of Superboy program. In the final episode, Superboy catches some crooks in the process of robbing a bank and they wisely put their guns down, something for which he compliments them. Ironically, his heat vision (as well as all his other powers) was going haywire that day and had to flare up just then, frying the surrendering crooks.
* The Adventures of Superboy TV series episode "Test of Time", two alien beings speed up Clark Kent/Superboy, who they think is a normal human being, to the point where time appears to have stopped for everyone but him. The aliens refer to this as "acceleration mode", and they use it to test Superboy to determine if they can win a war against the Earth's inhabitants.
* The Adventures of Super Diaper Baby, Deputy Doo-Doo, deposited on Uranus. It even lampshaded the trope with a sign reading "Welcome to Uranus (Please don't make fun of our name)".
* The Adventures of Super Diaper Baby is a villain who transformed into a living turd because he got crossed with Super Diaper Baby's poop.
* The Adventures of Superman. A bunch of mook villains were firing at Supergirl; when they ran out of bullets one threw his gun at her. Instead of ducking or the gun bouncing off of her, she fell over much to the shock of the mooks. After a beat she jumped back up again and said "I always wanted to do that" before dealing with the mooks.
* The Adventures of Superman and Clark took to search for a missing group in the jungle. The morning after they left, he casually revealed himself and asked for breakfast, now that there was absolutely no way they could send him back.
* The Adventures of Superman, a scientist is told to use his ability to whistle to summon Superman. However, he then has an adventure where he is in danger and so scared that his mouth is too dry to whistle no matter how hard he tries. Fortunately when all seems lost, he finds an abandoned water canteen to wet his whistle and whistles up Superman to save the day.
* The Adventures of Superman", at the beginning of the episode, Perry White and Jimmy Olsen are on a fishing trip. Then they run into trouble at a rural hotel.
* The Adventures of Superman. A wrestler learns about pressure points from an Indian "swami" and uses them to cripple his opponents. Seven have wound up in hospitals. At the end of the episode, the Indian agrees to use his knowledge to heal them.
* The Adventures of Superman broke out, Clark even became an agent of the federal government on the side.
* The Adventures of Superman building's ledge. Jimmy is absolutely fine, despite having been falling very fast.
* The Adventures of Superman". Clark comments on how glad he is that Lois didn't say anything about Kryptonite in her latest article. Lois and Jimmy quickly assure him that their lips are sealed.
* The Adventures of Superman", Clark Kent is lowered into an enormous vat of acid by chortling villains, who then walk out to arrange their next evil deed. Naturally, Superman then emerges, his costume soaked, but unharmed. Presumably, Kent’s glasses and clothes were dissolved.
* The Adventures of Superman, dammit — and two, foam and papier mache debris was cheaper and safer than stunt glass.)
* The Adventures of Superman drags Lois out onto the Planet building's ledge, which seems barely a foot wide.
* The Adventures of Superman either. Alone among the Superman series, nearly all of the antagonists are corrupt officials, mobsters, etc. that Clark, Lois, and/or Jimmy encountered while following a news lead.
* The Adventures of Superman episode, one villain tells another he can call the police: "Better a hundred of those guys than Superman!"
* The Adventures of Superman episode "The Wedding of Superman", Lois Lane awakens after dozing off to a delivery of flowers from Superman, and events quickly lead up

to a marriage proposal from the Man of Steel.
* The Adventures of Superman from the 1950s. Kryptonite's appearance about once per season is consistent with its in-universe rarity (and successfully keeping its effect on Superman a secret for 2 or 3 seasons) and with criminals' constant complaints about how hard the stuff is to find.
* The Adventures of Superman has a difficult time saying "I love you" to his girlfriend.
* The Adventures of Superman in 1951. At the end of the first season, the film was edited into a two-parter called "The Unknown People."
* The Adventures of Superman influences, albeit toned down for a children's television series. Clark Kent, although called a "mild-mannered reporter" in the opening narration, came across much more as a hard-boiled tough guy; when he was Superman, interestingly, he came across much more as the "big blue boy scout". The villains were typically gangsters and hoodlums. The subsequent seasons, shot in color, were more typically Fifties-Fifties, with a more sci-fi than noir sensibility.
* The Adventures of Superman: In "The Clan of the Fiery Cross", the Clan attempts to tar and feather a child.
* The Adventures of Superman, in the fourth series episode "Descendants".
* The Adventures of Superman introduced Jimmy Olsen, Inspector Henderson, Kryptonite and the names "Daily Planet" and "Perry White."
* The Adventures of Superman is almost baggy by comparison with Spandex.
* The Adventures of Superman is a publicity stunt so he can go change.
* The Adventures of Superman", Jimmy struggling with one of the bad guys and the other knocking him out with a blow to the head is shown in the shadows thrown on the wall.
* The Adventures of Superman", Lois doesn't scream, but she does spend her time fussing while Jimmy looks for some way to save Superman.
* The Adventures of Superman Professor Pepperwinkle creates a system for transporting people through telephone wires. As usual with Pepperwinkle, a gang of crooks befriends the naive professor, then uses his invention for evil; they commit crimes in Metropolis, then phone themselves to distant cities and make sure plenty of people see them to set themselves up with a (seemingly) perfect alibi.
* The Adventures of Superman radio series, the planet Krypton is said to be "situated on the other side of the Sun" from the Earth in the first episode.
* The Adventures of Superman, Reeves was only referred to as "Superman" so as not to break the illusion of younger viewers. Basically, to enforce this trope.
* The Adventures of Superman'' saga, was dedicated to Superman co-creator Joe Shuster.
* The Adventures of Superman series had the Radioactivity example. Superman gets exposed to Radiation and goes into self-imposed exile. He's lonely and wants to be around others, so he put his hand out over a potted plant. But he's so radioactive and deadly, the plant dies on the spot.
* The Adventures of Superman steps on his hand to speed up the process. Then a cop tries to grab him, but he falls and has to be caught by Superman.
* The Adventures of Superman: Superman and his co-workers fought more than a few of these during the war years.
* The Adventures of Superman", Superman gets locked in a room with Kryptonite while trying to rescue Lois and Jimmy. Jimmy neutralizes the radiation by shoving the Kryptonite into a lead pipe and stomping its ends closed.
* The Adventures of Superman: Superman will never let anyone hurt Lois, Perry, or Jimmy.
* The Adventures of Superman. Supes flies the pardon from the governor to the prison where he arrives just as the switch is being thrown. He interposes his arm in the way to block the charge from going through the innocent man.
* The Adventures of Superman that he "could have come in through the door."
* The Adventures of Superman, the 1950s George Reeve television show, is somewhat unusual to modern expectations in largely having a parade of petty mobsters be the villains. The better episodes have there be some tension in the villainous plots;

the weaker episodes, well, it turns out those bullets are bouncing off Superman. Again.
* The Adventures of Superman", the cellar of the hotel where Perry and Jimmy spend the night is shadowy and has the skeleton of the former owner chained to a wall.
* The Adventures of Superman", the crooks plan to throw Lois and Jimmy's car over a cliff to make it look like they crashed.
* The Adventures of Superman, the Klan could honestly be considered a Brotherhood of Funny Hats at worst or a parody of themselves at best, since there hasn't been a single unified Klan since the early 70's, and even among white supremacist circles, not too many people take them seriously in comparison to neo-Nazis, Odinists, and the "alt-right" movements.
* The Adventures of Superman turn to blow up!" and slaps him hard enough to jolt his head backwards.
* The Adventures of Superman, two crooks learn that Superman is really Clark Kent. His response: he abducts them and strands them on top of an isolated mountaintop. When they try to climb down, they fall to their deaths. That constitutes kidnapping and murder. There are never any consequences for this; in fact, the whole incident is never mentioned again.
* The Adventures of Superman under the knees and back when saving him from drowning.
* The Adventures of Superman used greenscreening as a budget-saving technique for the flying scenes. One shot of Superman was filmed against a variable backdrop, and as a result, he gained a mystical aura every time he had to fly somewhere.
* The Adventures of Superman" was set off by Bet-a-Million Butler making a gamble with another man that he could control Superman for thirty minutes. Of course, he lost
* The Adventures of Superman, who is out to cripple all the wrestlers in town whose contracts he doesn't own.
* The Adventures of Superman, with Clark and Jimmy enjoying a very sugary breakfast cereal together.
* The Adventures of Superman with the kid in the Superman jammies as the cowboy and the kids with white pillowcases over their heads as the Indians.
* The Adventures of Super Mario Bros. 3: A Hot Foot, a kind of fire enemy resembling an orange flame with feet, appears in one episode. It hides inside a candle flame, and when Mario and Luigi come near it jumps out and starts chasing them.
* The Adventures of Super Mario Bros. 3 and Ice Land's King get turned into dogs.
* The Adventures of Super Mario Bros. 3, and they often take more than one turn in doing so.
* The Adventures of Super Mario Bros. 3 becomes too much for them to handle.
* The Adventures of Super Mario Bros. 3 episode "A Little Learning", the second-to-last episode of the series. Even again, Hip and Hop both have speaking roles in those episodes.
* The Adventures of Super Mario Bros. 3 episode "Life's Ruff" had Hip and Hop triggering one at a hotel buffet.
* The Adventures of Super Mario Bros. 3 episode "Misadventures in Babysitting", Luigi scares away two Boo Diddleys who attempted to scare him first.
* The Adventures of Super Mario Bros. 3 episode "Never Koop a Koopa" ends with Bowser chasing Cheatsy around his throne for double crossing him. Just before The End screen comes down Cheatsy seems to vanish after running behind it.
* The Adventures of Super Mario Bros. 3 episode "Oh Brother" centers on this trope, with Mario and Luigi getting on each other's nerves and "disbrothering" each other. After Mario gets kidnapped and brainwashed by Koopa, however, Luigi takes it upon himself to save his brother, and the two reconcile, for the most part. Mario even says the trope word-for-word.
* The Adventures of Super Mario Bros. 3 episode "Princess Toadstool for President" after he explains why he voted for Princess over him.
* The Adventures of Super Mario Bros. 3 episode "The Ugly Mermaid" features a race of water-breathing fish people who live in a domed city under the water.

* The Adventures of Super Mario Bros. 3" had Bowser sending his twin Koopalings to kidnap the mummified Prince Mushroomkhamen for a reason that is never given. In the process, they end up waking up his mother, who mistakes Mario for her son (and later Luigi for her husband) because they look exactly alike.
* The Adventures of Super Mario Bros. 3 has King Koopa's Doomship, which looked like it was built out of redwood trees (or some other huge type of tree), though it was armed with Bullet Bill launchers, cannons and rocket jets. His air force, which only appeared in one episode, and his tank corps (again, only one episode) were also made of tree trunks. However, his Doomsub (two episodes) was made of metal.
* The Adventures of Super Mario Bros. 3 has the episode "Recycled Koopa" where King Koopa and the Koopalings dump their garbage into Brooklyn, turning residents into Koopa Zombies.
* The Adventures of Super Mario Bros. 3 has this when Mario confronts Bowser in the Ninja Koopa episode.
* The Adventures of Super Mario Bros. 3. In this case, when the former of the two shows aired, Nintendo of America hadn't yet given them official names.
* The Adventures of Super Mario Bros. 3 in which Hip and Hop go to Earth and steal a sports car. While they're racing around causing chaos, a news team reports on the mayhem. The report ends when the kids crash into the camera shooting it. The camera can be seen in the report it's supposed to be filming.
* The Adventures of Super Mario Bros. 3: Kootie Pie hears King Koopa stomp towards her room, demanding for it to be cleaned. She shoves all her clothes in the closet, and they rain down on Koopa the moment he walks inside. She gets grounded and decides to run away from home.
* The Adventures of Super Mario Bros. 3, Kootie Pie, upset at being insulted by Bully, yells this before starting a garbage fight.
* The Adventures of Super Mario Bros. 3, much to Bowser's chagrin and terror!
* The Adventures of Super Mario Bros. 3: One segment had a song about doing "the Frog", while the other had one as part of a plot point; both the song and segment are called "Do the Koopa".
* The Adventures of Super Mario Bros. 3 serves 12,423 years in prison with no parole for his extensive criminal record. He later tells the Mario Bros. that he prefers this sentence over spending another day with the Koopa family.
* The Adventuresof Super Mario Bros 3: "That's Prince Hugo the Huge, the new ruler of Giant Land! They say he's the biggest, toughest, bravest prince ever, even for a giant! He's a giant."
* The Adventures of Super Mario Bros. 3, the characters were frequently able to visit "the Real World". By then, though, Mario and Luigi had apparently given up their old goal of returning to Brooklyn and were comfortable living in Toad's house.
* The Adventures of Super Mario Bros. 3, the Shadow Queen refers to her as a "child" (though the Shadow Queen is a 1000 year old demon and could be using "child" metaphorically).
* The Adventures of Super Mario Bros. 3, this happens to Kootie Pie and Big Mouth during their song in "Dadzilla".
* The Adventures of Super Mario Bros. 3 videos was Luigi throwing Mario's "favorite record" into the fire. Mario is not pleased.
* The Adventures of Super Mario Bros. 3. When a giant Bob-omb explodes in Koopa's face, he seemed to be in a competent enough state to pilot his partially wrecked Doomship in a hasty retreat.
* The Adventures Of Super Mario Bros. 3, while the 'volunteers' remain perfectly still.
* The Adventures of Superpup pilot on the same sets with little people wearing giant dog masks, using character names such as "Bark Bent" and "Puppy Bite".
* The Adventures of Tartu — there's humour, intrigue, but fear due to the real threat of brutal Nazis.
* The Adventures of Teddy Ruxpin: After crossing a bridge during a race, Tweeg stopped to destroy it and even waited to see how the Wooly What's It would cross it. And he wasn't even in the lead.

* The Adventures of Teddy Ruxpin and Tweeg's team (composed of himself, his mother and the bounders) in the Wizard Week.
* The Adventures of Teddy Ruxpin crashes his airship into the tree of Leota the Woodsprite. When she introduces herself, Gimmick says there's no such things as "woodsprites", she quips back that there's no such thing as big bags of air stuck in her tree, yet there it, big as life.
* The Adventures of Teddy Ruxpin episode "Octopede Sailors" are accompanied by this, especially "The Octopede Shuffle".
* The Adventures of Teddy Ruxpin for a few furries who grew up in the late 1980s.
* The Adventures of Teddy Ruxpin had never done any other acting roles, though there were some exceptions.
* The Adventures of Teddy Ruxpin has one that had Teddy's voice saying "My friends and I, will be right back!"
* The Adventures of Teddy Ruxpin: In the episode "Rainbow Mine", when Teddy falls into the rainbow colored water, it carries him away to a giant waterfall but lucky for him, he was able to grab a conveniently placed branch and hang on to it. A plummet perspective is shown showing Teddy's feet dangling above the long drop and waterfall below.
* The Adventures of Teddy Ruxpin reveal that honesty is one of his defining traits, but sometimes, he gets a bit insensitive. In one episode, Teddy sums this trope up nicely after an argument between Grubby and Gimmick: "Grubby was trying to be honest. But you don't have to be mean to be honest, Grubby."
* The Adventures of Teddy Ruxpin seems to end with Teddy, Grubby, and Gimmick returning to Rillionia, only for the final episode to end with the trio taking off in their airship for more adventures.
* The Adventures of Teddy Ruxpin starts out this way initially, but then they return to Newton Gimmick's house until the next adventure, making it another subversion.
* The Adventures of Teddy Ruxpin: The episode "Octopede Sailors" contains a flashback to when Grubby was in a shipwreck as a child. The younger Grubby sounds similar to the normal Grubby.
* The Adventures of Teddy Ruxpin to fight off some of M.A.V.O.'s bad guys, and have to be snapped out of it by having buckets of water thrown at them afterwards. There's still a significant amount of collateral damage caused to the Grunge village.
* The Adventures of Teddy Ruxpin, turning into the Iron Warrior and Aluminum Amazon, powerful armor-clad monsters who mindlessly attack anything in sight. Though Teddy and the Grunges manage to splash them with water, causing the transformation to wear off, the village still suffers significant collateral damage.
* The Adventures of Teddy Ruxpin used this in "Octopede Sailors" during a flashback where a young Gurbby is involved in a shipwreck. Before the commercial break starts, we hear Grubby's dad call out to him, followed by the screen fading to black. The rescue part of this flashback doesn't happen until after the ads.
* The Adventures of Teddy Ruxpin: While Grundo lacks a dedicated news network, the character Louie the Grunge acts like this. He travels all over the land in a peddle powered helicopter filming anything potentially newsworthy for his boss the Wizard of Grundo's oracle business.
* The Adventures of the American Rabbit about twenty feet, lands in snow, and the sound effect when he hits is a gentle "puff".
* The Adventures of the Falcon while for the most part a private detective show had a series of episodes where the titular character was forced to work for army intelligence investigating communist activities. Though more often than not, the plots were just standard private eye fair with the antagonists being Communists.
* The Adventures of the League of S.T.E.A.M. episode "Bitter Gnomes and Gardens", lethal garden gnomes begin to attack a pair of hapless gardeners. The gardeners realize that the gnomes don't move when being directly looked at.
* The Adventures of the League of S.T.E.A.M. episode "Hairy Hijinks", Mrs. Potts tries to play this with Jay Are and The Russian.

* The Adventures of the League of S.T.E.A.M.: In webisode "Dinner with the Devil", Sir Conrad performs one. It goes awry.
* The Adventures of the League of S.T.E.A.M. is supposedly a device for picking up EVPs.
* The Adventures of the League of S.T.E.A.M. is to have a wig glued to one's head.
* The Adventures of the Road Runner (a 1962 proposed pilot for a Road Runner TV show) where he answers a child's question on why he wants to catch the Road Runner and then using film to examine his shortcomings.
* The Adventures Of The Wilderness Family features the family being menaced by a Grizzly bear several times. Averted in the case of the film's other bear, Samson, who later comes to their rescue.
* The Adventures of the Wishing Chair by Enid Blyton features a land called Puzzle Village. The norm for everyone who lives there is to wear a bundle on your head for no apparent reason and never say anything that actually makes sense. Throughout the episode in which the village appears, Jigs might have disappeared, but it's Molly and Peter who are well and truly 'lost'.
* The Adventures of Thomasina Sawyer in which ... well, the title says it all, really.
* The Adventures of Timmy the Tooth versions of this run in 1995 and 1996, which played at 1:00PM 7 days a week.
* The Adventures of Tintin (1991) story arc "Tintin and the Picaros", the Thompson Brothers are to be executed as spies. While Tintin, General Alcazar and the others successfully overthrow General Tapioca; the prison doesn't receive news of the regime change in time and is preparing to carry out the execution. Tintin, Captain Haddock, and several Picaros quickly steal a parade float and drive it to the prison where they hold the firing squad at gunpoint as Colonel Alvarez orders the execution halted.
* The Adventures of Tintin (1991)", the inside of a cigar box is shown. The cigar which Tintin picks up is quite clearly drawn on a cel, whereas the rest of the cigars are obviously part of the background.
* The Adventures of Tintin: Amid the treasure recovered by Sir Francis Haddock, Tintin discovered a scroll leading to the rest of the treasure of the Unicorn.
* The Adventures of Tintin and experience such great adventures, and that writing the books provided him Wish Fulfillment, having initially conceived Tintin as an idealized version of himself.
* The Adventures of Tintin, a young adult and a man at least in his late thirties/forties.
* The Adventures of Tintin, Barnaby does not recover from his injuries after being shot by goons before he can tell Tintin about Sakharine.
* The Adventures of Tintin, Captain Haddock found himself wearing a pink dress after colliding with a clothesline.
* The Adventures of Tintin, Captain Haddock mentions that one of his crewmen lost his job as a shepherd due to his "animal husbandry". The camera then cuts to a mouse struggling to escape his grip while he's asleep.
* The Adventures of Tintin, Captain Haddock takes aim at the villain with a bazooka... and promptly takes out the dam behind them.
* The Adventures of Tintin features this. Sir Francis Haddock sets it off, Red Rackham snuffs it out, repeat, repeat...
* The Adventures of Tintin, he sets the boat's floor itself on fire. Tintin tells him to put the fire out, but he uses whisky, which just makes it explode.
* The Adventures of Tintin introduction his cape catches fire, so he uses it against Sir Francis Haddock.
* The Adventures of Tintin, knocking it around so it shines in the eyes of the thugs that are chasing him.
* The Adventures of Tintin logo suddenly started showing up in ads. You can just picture the Paramount executive screaming, "What are we doing, releasing a kids' movie without promoting it as such?!"
* The Adventures of Tintin occasionally gets high-tech enough to deserve this description.

* The Adventures of Tintin on fire, and he actually uses it as a weapon in his first battle with his adversary, Sir Francis Haddock.
* The Adventures of Tintin; Sir Francis's crew has British soldiers wearing red. When the pirates board the ship, they are effortlessly wiped out by the pirates leaving Sir Francis to fend off the pirates on his own. Despite Sir Francis's efforts, the battle is lost and the surviving crew members are forced to leap off the ship later anyways.
* The Adventures of Tintin" speech about not letting failure get to him. It's this speech that gives Tintin an idea about how they can catch up with the bad guys.
* The Adventures of Tintin's ship finds Tintin and Captain Haddock adrift at sea in a lifeboat.
* The Adventures of Tintin: The dream sequences in "Tintin" will never be surpassed in terms of creepiness. Yet, for the sake of this article, let's just mention the nightmare scenes:
* The Adventures of Tintin, the eponymous character is seen using the handlebars of a motorbike to slide down a cable during his pursuit of a falcon in Bagghar.
* The Adventures of Tintin, Thompson and Thomson, having dutifully manned the wheel of a shipboard oxygen pump for many days on end, swear off pumping when they finally return to their home port and head off to a few days' holiday at a farm. This declaration is immediately followed by a panel showing them working the farmer's thresher with the same arduous pumping motions.
* The Adventures of Tintin. Tintin and Captain Haddock are in a desert when Haddock tells Tintin about his ancestor as he looks out over the sand dunes. Cue a virtually seamless transition between the dunes and a ship sailing on the ocean waves.
* The Adventures of Tintin. When Tintin breaks into derelict Marlinspike Hall, what appears to be a dummy standing in the darkened interior suddenly starts to follow him. This turns out to be Nestor, the loyal butler who is protecting the house.
* The Adventures of Tintin, when Tintin shows Captain Haddock the scroll he discovered in the globe where Sir Francis kept his treasure, leading to the rest of the Unicorn's treasure.
* The Adventures of Tintin, while Tintin, Haddock and Snowy are lost in the desert, Snowy (in the background) finds a dinosaur bone.
* The Adventures of Tom Sawyer. All the adults adore Tom's little brother and wish Tom were more like him... when in reality he's a manipulative, mean-spirited brat, but only Tom, Huck and Becky ever notice.
* The Adventures of Tom Sawyer consisting of a vertical-scrolling river raft ride.
* The Adventures of Tom Sawyer establishes Tom's cunning, mischievous character, although it is technically more a "He Is" song.
* The Adventures of Tom Sawyer. For him, this is all just business as usual. It's worth noting he keeps a careful distance from most adults, but immediately latches on tightly to Jim, a common occurrence with children of his background.
* The Adventures of Tom Sawyer has "Raising a Child by Yourself" for Aunt Polly and Judge Thatcher, who bond over the difficulties involved in single parenting.
* The Adventures of Tom Sawyer: Injun Joe is determined to kill Tom after he testifies against him.
* The Adventures of Tom Sawyer leave a trail (of candle-smoke marks) to find their way back. Then a couple pages later, when he was exploring side passages to try to find a way out, he used a big piece of kite string to keep from getting even more lost.
* The Adventures of Tom Sawyer: Muff Potter is accused of the murder of Dr. Robinson—an allegation he doesn't contest because he blacked out drunk at the crime scene and woke up with a knife in his hand. After his arrest, no one in town doubts that he did it. When he is about to be sentenced to death, Tom Sawyer steps out at the trial because he and Huckleberry Finn witnessed Injun Joe commit the act and then frame Muff. Joe, who is present, flees from the courtroom, leading to all charges against Muff be dropped.
* The Adventures of Tom Sawyer starts its first chapter with a cat being hurt, and gleefully continues hurting them for the rest of the story.

* The Adventures of Tom Sawyer starts off with the suggestion of this, when Tom scraps with the local dandified boy; each boy swears he'll get his big brother to beat up the taunter, with Twain adding that both big brothers were imaginary.
* The Adventures of Tom Sawyer: The eponymous Tom Sawyer is an irascible trickster who most famously gets out of his chore of whitewashing fences by convincing other kids to pay him for the privilege of doing it for him.
* The Adventures of Tom Sawyer, the villain pulls this on Tom with his girlfriend Becky in order to get him close enough to stab him.
* The Adventures of Tom Sawyer: Tom is frightened after testifying against Injun Joe, and Aunt Polly sits next to his bed on at least one night to comfort him.
* The Adventures of Tom Sawyer, Tom mentions a boy who had an incredible memory, seeming to know every verse in the Bible. Until one day the mental strain of it broke his mind.
* The Adventures of Tom Sawyer: Tom Sawyer is an example of this trope oft-cited by literary critics. He's described as "a small boy" and sometimes shows the naiveté of a very young child, yet his romantic interest in Becky Thatcher and bouts of melancholy brooding feel more suited to a twelve- or thirteen-year-old.
* The Adventures of Tom Sawyer, Tom watches Becky drowsing off to peaceful slumber when they are lost in the cave.
* The Adventures of Tom Sawyer when Tom tells Huck that as robbers all they have to do to win women is to take away their belongings but not harm them and talk nicely and politely to them until they won't let go of them even when given the chance.
* The Adventures of Tom Sawyer, who get "engaged" shortly after meeting. Before he met her, Tom was "engaged" to another girl named Amy Lawrence, which causes no small amount of trouble between them when Becky finds out.
* The Adventures Of Tom Stranger Interdimensional Insurance Agent. Guess who narrates the audiobook.
* The Adventures Of Tom Stranger Interdimensional Insurance Agent, something that has been banned by the Geneva Convention in most civilized dimensions.
* The Adventures of Tom Thumb and Thumbelina when Thumbelina rejects him and chooses Tom instead.
* The Adventures Of T Rex - featuring singing, superhero tyrannosauruses in a world of anthropomorphic dinosaurs - is not related to them.)
* The Adventures Of T Rex had one of the titular T-Rexes in a boxing tournament. One of the villain's mooks begins to throw various objects at him, causing the referee to yell "Foul!" The mook's coach then runs in and says "My boy's hitting him with everything but the kitchen sink!" In the background, the mook then picks up a kitchen sink and tosses it at the T-Rex.
* The Adventures of T-Rex ray-blasters, a "Rexmobile" transport and a secret base to battle the crime problem in Rep City.
* The Adventures of Voopa the Goolash completed production in 2007 according to creator Craig Whyte, though internal studio politics prevented the series from seeing the light of day for over a decade; the studio held the master tapes and refused to let them go. The show was considered lost media until October 2019 when Craig Whyte uploaded the first episode to his YouTube; the second episode was uploaded in November 2019, and the remaining eleven followed suit in April 2021.
* The Adventures of Wiglaf and Mordred and no pain response after the initial injury. He's also invincible, as the usual "destroy the brain" thing doesn't work. He's also completely sentient.
* The Adventures of Wiglaf and Mordred (Despite the fact he's a regenerating Zombie.)
* The Adventures of Wiglaf and Mordred Geoffrey was kidnapped by Janus and his ransom never paid. They have a child together now.
* The Adventures of Wiglaf and Mordred is the only member of her family who isn't evil. In fact, while the rest of her family plots to take over the world, she is a concert pianist.
* The Adventures of Wiglaf and Mordred: Wiglaf gains one of these pretty much whenever he goes out in public.

* The Adventures of Willy Beamish both uses this and "real" numbers. Whenever someone leaves a phone number on the Beamishes' answering machine, it's a 555 number. But a phone booth in West Frumpton instead has normal phone numbers scribbled all over it, two of which are plot-critical.
* The Adventures of Willy Beamish, if you get into too much trouble with your parents, you get a Game Over and are sent off to military school.
* The Adventures of Willy Beamish, Ms. Glass leaps onto her desk and shrieks for the school principal if Willy reveals Horny's presence in his backpack.
* The Adventures of Willy Beamish: The floppy version comes on six disks on DOS or twelve on the Amiga.
* The Adventures of Willy Beamish: Weaponized in the finale. Willy gets rid of the two antagonists by flushing them down a giant toilet full of sludge.
* The Adventures of Willy Beamish), while Brianna has a cat named Mr. Snickers. However, their suburban lifestyle is also suggested to come with a pretty hefty price tag, with Gordon's job termination immediately instilling worries in how things like the mortgage, car payments and credit cards will be paid off.
* The Adventure Zone: Amnesty definitely qualifies as this, though it is toned down significantly in his later appearances.
* The Adventure Zone: Amnesty does something similar, taking an episode between hunts to level up the characters and deal with personal drama.
* The Adventure Zone: Amnesty, founded in 1988 to protect the little town of Kepler, West Virginia by hunting down the Abominations that come through the Gate around the full moon.
* The Adventure Zone: Amnesty has Agent Stern, an agent from the paranormal division of the FBI who came to Kepler to research Bigfoot sightings in the area. Unbeknownst to him, however, Bigfoot (actually a Sylph named Barclay, who can turn himself into a human form) serves him breakfast every single day at the titular Amnesty Lodge.
* The Adventure Zone: Amnesty. However, several people in universe still haven't heard his real name by the end, thus still fulfilling this trope.
* The Adventure Zone: Amnesty, Mama warns Aubrey and Ned that no one else can be allowed near the portal. Moments later, Duck walks out of the damn thing.
* The Adventure Zone: Amnesty, Ned Chicane metes out surprising helpings of justice with the help of his enchanted Super Soaker.
* The Adventure Zone: Amnesty, paranormal researcher Thacker kept all his notes on a Mac laptop that was at least 20 years old by the time the main characters needed it. They only used it as a reference in extreme cases, because each time it booted up might be its last.
* The Adventure Zone: Amnesty the antagonist of the second arc is a water elemental, an ethereal being that forms various bodies out of water in order to attack its victims.
* The Adventure Zone: Amnesty, Tommy Wiseau is a Sylvan exile. A mummy, to be exact.
* The Adventure Zone: Amnesty) was to lie his way out of it. However, Ned still has a lot of similarities with Merle (while he's notably less scatterbrained, they still both have a fondness for barely plausible bullshitting), and Aubrey's differences to Magnus mainly run skin deep, both being impulsive, big-hearted friendly folk who love animals. Naturally, some of this is due to actor bleed — Travis has ADD, which naturally affects how he plays his characters, and Clint is always going to be at least a little forgetful. Justin however deliberately tries to make characters unlike himself - in one The The Adventure Zone Zone, he says this is a lifelong habit, and guesses that it comes from his difficulty finding fictional characters who are fat like he is.
* The Adventure Zone arc as being the result of a year she spent on the run from the Judges while they rest of her crew was imprisoned.
* The Adventure Zone averts most, if not all, dwarven cliches. He's a cleric who worships Pan (a nature god) who is frequently associated with plant life. Before the events of the campaign, he lived not in a mountain or a mine, but on a beach. He also has an American accent, but very briefly fakes a Scottish accent when

disguising himself in the Murder on the Rockport Limited arc.
* The Adventure Zone: Balance accidentally transmogrifies his lab into the titular Crystal Kingdom. Snow and ice are a recurring hazard throughout the adventure, but the date is largely forgotten about until the very end.
* The Adventure Zone: Balance, and blackmails the party into trying to kill him. His plan lasts exactly long enough for the party to tell Klarg, who kills him in a spectacular fashion.
* The Adventure Zone: Balance and his arm starts to crystalize, leading to Magnus chopping it off to save him. He gets a sweet wooden arm as a replacement.
* The Adventure Zone: Balance, anyone who gets their hands on a Grand Relic becomes this.
* The Adventure Zone: Balance arc, in which the victim is beheaded and be-handed in a locked train car aboard a train which requires all passengers to surrender their weapons upon boarding.
* The Adventure Zone: Balance-arc, Justin describes it as "the story of four idiots who played DnD so hard they made themselves cry."
* The Adventure Zone: Balance arc, the audience already knows that the crew is going to create the Grand Relics, Lucretia is going to erase everyone else's memories, and Lup and Barry are going to die]].
* The Adventure Zone: Balance are incredibly silly and crack jokes wherever they go. Working together, however, they can be a force to be reckoned with.
* The Adventure Zone: Balance as "quite the adventurers" and says how "PROUD of zem!" he is. The absurdity of the situation and his ridiculous accent makes the scene hilarious instead of at all emotional.
* The Adventure Zone: Balance, as well as the Shield of Heroic Memories and the Phantom Fist.
* The Adventure Zone: Balance Barry and Lup come to terms with their feelings for each other after performing a duet.
* The Adventure Zone: Balance beautiful gay man. He even spends one arc wearing a skirt.
* The Adventure Zone: Balance believes that all life is pointless and horrible, and that as a result it must be destroyed.
* The Adventure Zone: Balance example in Kravitz, who fakes a Cockney accent when he's working in order to seem more intimidating.
* The Adventure Zone: Balance, following Edward's destruction by Magnus, Lydia retaliates by destroying Magnus's body before she turns to ash. He's left inhabiting a mannequin body.
* The Adventure Zone: Balance formula during the Stolen Century-arc. When the new arc begins, the D&D-ruleset returns with Merle and Taako having to make saving throws. Clint (Merle) immediately rolls a 2. Justin (Taako) starts making fun of him... and then also rolls a 2.
* The Adventure Zone: Balance gets their arm turned into crystal and has to have it amputated before the rest of their body follows. Lucas is able to replace the limb with a magical plant.
* The Adventure Zone: Balance has a grand total of one line before dying off screen.
* The Adventure Zone: Balance has both Avi and the Director provide a good deal of exposition to the Tres Horny Boys.
* The Adventure Zone: Balance has Hurley and Sloane, who compete together in illegal races. Further complicated by the fact that Hurley is a cop.
* The Adventure Zone: Balance has Robbie, who's so fond of Pringles that this becomes his nickname.
* The Adventure Zone: Balance has The Black Spider, aka Magic Brian, a low-level wizard who initially seems to be an overarching villain, but who turns out to be a really small fry in the grand scheme of things.
* The Adventure Zone: Balance has The Bureau of Balance, which hires adventurers to find and collect the Grand Relics, and to stop those who use them.
* The Adventure Zone: Balance has very little patience for the adventurers' antics, constantly just trying to get them to stay on point and booting them out of her

office immediately after giving them their assignment.
* The Adventure Zone: Balance into a new, larger body, and then attaching additional limbs to it.
* The Adventure Zone: Balance is both very badass and has a gruff voice.
* The Adventure Zone: Balance is prone to rushing in, he's prone to making up combat plans on the fly.
* The Adventure Zone: Balance is uninterested in romance because he still loves his late wife Julia.
* The Adventure Zone: Balance. It subsists by eating information. This can be done by simply tossing it a piece of paper with writing on it, and afterward whatever was written will be removed from the collective memory of most planes of reality, with its name and any relevant details being impossible to understand—speakers will simply sound like static.
* The Adventure Zone: Balance join Kravitz as official bounty hunters for the Raven Queen, in exchange for her official pardon on account of their lichdom.
* The Adventure Zone: Balance, Julia qualifies for this, as we only learn about her in Magnus' flashback.
* The Adventure Zone: Balance long enough to say three words before passing out again:
* The Adventure Zone: Balance, Magnus and Merle end up fighting a cockroach while shrunk. Later, (back to regular size), they fight giant tardigrades.
* The Adventure Zone: Balance, Magnus and Taako slip into this routine while interrogating Graham... with Merle as a bonus "Maternal Cop".
* The Adventure Zone: Balance, Magnus initially thinks the voidfish is a god.
* The Adventure Zone: Balance: Many fans headcanoned Taako as Hispanic due to his name being a pun on 'taco' and his professed life goal being to invent tacos one day, even though his player Justin jokingly said "White" when asked about Taako's race in the first episode.
* The Adventure Zone: Balance, Merle constantly uses Zone of Truth, even in situations where it has no possible use.
* The Adventure Zone: Balance of fans, which is probably unsurprising given that the former is among the most popular actual-play TTRPG podcasts while the latter is among the most popular actual-play TTRPG webshows. It helped that both series ended their long-running first campaigns within a few months of each other, giving sad fans the perfect opportunity to migrate fandoms.
* The Adventure Zone: Balance, or both, and Magnus himself is the best man with Merle officiating and Taako catering.
* The Adventure Zone: Balance: Robbie/Pringles stocks the "dankest" potions, including one that resembles Orbitz and which has an effect like a cross between alcohol and salvia.
* The Adventure Zone: Balance stop the town from being destroyed at noon.
* The Adventure Zone: Balance, Taako tries to bluff his way past Sheriff Isaac by showing him a fake police badge he picked up at the Fantasy Costco. Needless to say, it doesn't work.
* The Adventure Zone: Balance, the fuse in No. 3113's frame flashes whenever she speaks.
* The Adventure Zone: Balance, the gate guard for the Hammerheads's base is a man named Barbara.
* The Adventure Zone: Balance, the Millers created a mascot for their line of elevators called Upsy, Your Lifting Friend. Despite being an elevator, his inside is fleshy, not unlike a mouth or stomach.
* The Adventure Zone: Balance. The podcast originally started with the cast playing a pre-written D&D campaign but diverged very quickly. Still, there were a few location names from the pre-written campaign that were either changed or eliminated with the graphic novel; Klarg, for example, became G'nash.
* The Adventure Zone: Balance to actually die after being thrown into the pit that it quickly circles back around into being hilarious. He continues to monologue about how he's dying for almost two straight minutes before Taako finally casts Magic Missile at him again to finish him off (and shut him up).

* The Adventure Zone: Balance to ultimately con Garfield the Deals Warlock out of it.
* The Adventure Zone: Balance was formerly in one of these with his ex-wife, Hekuba.
* The Adventure Zone: Balance were the Red Robes, and they were never villains in the first place.
* The Adventure Zone: Balance When he first admits his feelings to another character, he seems to reference this trope:
* The Adventure Zone: Balance who longed to go out in a blaze of glory.
* The Adventure Zone, but is now its own show, and more popular than MBMBAM.
* The Adventure Zone, but Taako is now absurdly squishy for his level.
* The Adventure Zone called the Rockport Slayer. However, it is Later Revealed that Jenkins, is actually the Rockport Slayer, and he Murdered and switched his clothes with the Rockport Limited's Engineer to act as a decoy.
* The Adventure Zone, can rip holes in reality, and can turn from a handsome man in a suit into a robed skeleton with glowing, red eyes at will. Taako is very into the latter.
* The Adventure Zone: During the Crystal Kingdom arc, this seems to be the only way to prevent the spreading pink tourmaline from completely crystallizing someone, as Merle unfortunately finds out after grabbing a crystal and Magnus hacks his hand off.
* The Adventure Zone. During the entire speech, Justin can be heard desperately trying not to laugh, eventually interrupting the speech to clarify that he's not laughing in-game before breaking into hysterics. Even then, the next thing Taako says comes out in a fit of giggles.
* The Adventure Zone: Dust, Augustus Parsons always introduces himself this way.
* The Adventure Zone: Dust but rather of competing business interests.
* The Adventure Zone: Dust, Dylan Mathis is found hunched over the body of Jeremiah Blackwell. Dylan claims innocence.
* The Adventure Zone: Dust, the-powers-that-be have forced Augustus Parsons to work for the Grayson Agency to atone for his sins.
* The Adventure Zone: Dust, werewolves are born, not turned. They also have an allergic reaction to silver, which ranges from being a minor skin irritant to being deadly if come into contact. Fascinatingly, this doesn't seem to stop the Mathises, a family of werewolves, from owning and operating a silver mine.
* The Adventure Zone. Especially Magnus, who is the most heroic and also the dumbest.
* The Adventure Zone: Ethersea by electing a representative from each kingdom to serve on a council to give the community some form of leadership and order, but the counsellors themselves don't inspire a ton of confidence, and citizens such as the Boyar Hermine have a habit of going over their heads (or behind their backs) to get things done.
* The Adventure Zone: Ethersea relying on both advanced science and magic to build a new society underground. Old-fashioned submarines, displaced spirits and ghosts, teleporting sharks, and magic-granting gods abound.
* The Adventure Zone: Ethersea takes place in the underwater city of Founders' Wake. Twenty-five years before the start of the campaign, a magical storm wiped out the entire surface world, forcing humanity to move under the sea in order to survive.
* The Adventure Zone follows a general plot and ostensibly centers around, you know, Adventure.
* The Adventure Zone for over 30 episodes before any one of them shows any sign of caring. As the show goes on and the stakes get higher, this is phased out somewhat (but not completely).
* The Adventure Zone from the memories of his family after his funeral, the fish nearly dies from the effort of wiping so many minds at once.
* The Adventure Zone: Graduation has Fitzroy, who loves crepes and is desperate to get his hands on some since being shipped off to the School for Heroism and Villainy.

* The Adventure Zone: Graduation whose chronic illness makes walking or even standing upright difficult or impossible on most days, so she's confined to a chair... that flies, lights up in any color she chooses, has lots of storage space, and can even be shrunk down and put inside someone's bag for transport.
* The Adventure Zone has dipped into this with a few of its campaigns.
* The Adventure Zone. He's rather annoyed about this, but they're incredibly confused, because they absolutely do not remember the incidents he's talking about. It's the first sign that the party aren't being told something very important about the quest that they're on.
* The Adventure Zone in exchange for a hostage. As soon as they're out of the goblin's earshot, they resolve to see if they can cut a better deal with his boss. Magnus and Taako also aren't above surreptitiously looting the corpses of Merle's family members behind his back.
* The Adventure Zone. In the next episode, Griffin tells them that Boyland was named after one of their fans, who clarified that his name is actually pronounced "boy-luhnd". However, real-life Boyland found the mispronunciation incredibly funny, so he gave them permission to continue using it.
* The Adventure Zone It became a fandom meme of sorts, and about twenty episodes later it was proven to be completely canon.
* The Adventure Zone mostly gets around in a floating chair that includes underglow lights and multiple compartments, one of which houses her pet animated squirrel skeleton.
* The Adventure Zone: people, including the players, kept asking for Barry Blue Jeans to come back - the joke being that he was, in fact, an extremely minor character who only appeared in a couple of episodes before being killed off with all the inhabitants of an entire town in a magical disaster. Griffin kept ranting that he was dead, goddammit - and then brought him back as a lich.
* The Adventure Zone's Balance Arc does this constantly, so often that the line "Taako's good out here" has become something of a catchphrase for him.
* The Adventure Zone's Balance Arc has quite a few. It's safe to say that anyone involved with the IPRE is extremely spoiler-heavy, but especially:
* The Adventure Zone. She's perfectly willing to go along with their inanity if they keep getting results.
* The Adventure Zone that they completely break the game and get sent back to the main dungeon.
* The Adventure Zone, the brothers clarified that it made them very uncomfortable to roleplay a romantic relationship with one another, and that, while the relationship between Taako and Kravitz would remain, any further dates would occur off-screen.
* The Adventure Zone They rectified this by bringing in a new lesbian couple, while also reviving the previous couple.
* The Adventure Zone treat the threat extremely seriously, even offering to make an equivalent sacrifice in his place.
* The Adventurous Adventures Of One Direction Later, when Harry needs to hit a very high note, he makes a bad pun so that Louis will hit him in the testicles again, causing Harry's pitch to rise in pain and allowing him to hit the note.
* The Adversary Cycle books seems to enjoy this. He tends to still win, though. He's just that powerful.
* The Adversary Cycle he realises he's well and truly screwed and takes out his vial...only for it to be sent flying when something nasty takes a bite out of his arm. The rest of the nasty chewing things are on top of him before he can pick it up again.
* The Adversary Cycle revelation of the reality of the supernatural. Having the sun nearly go dark forever, releasing godawful monsters to stalk the increasingly-long nights, while bottomless pits open up and start eating the landscape, would sure convince me.
* The Adversary Cycle. The Ally protects Earth simply because the Otherness wants it, and the protagonists serve the Ally only because the consequences of the Otherness taking over Earth are far, far worse.

* the advertisement for the Wacky Waving Inflatable Arm-Flailing Tube Man is helping black men hail taxis.
* the advertisement holograms present throughout the dystopian 2049 Los Angeles — they might be really giant and glow obnoxious amounts of light, but otherwise feature zero major imperfections.
* The advertisements where the cow hunts down (and presumably kills) a man who decided he'd prefer eating dead chicken over eating dead cow. Also leads to
* The advertising campaign for Zest Hard Water Soap, quoted above. They basically had one template commercial and they rewrote it for each city being advertised to. It was quirky, but most probably expensive because of the customization.
* The advertising for many "natural" products makes a big deal about not using "refined sugar"; but are instead "fruit juice sweetened". The problem with this claim is that the "fruit juice" used is actually
* The advertising was pretty bloody too. With a commercial of a girl smearing blood on the walls with her hands with the film's title appearing as the blood drips on the wall.
* "The Advice" has Darwin taking Mr. Small's suggestion to follow his dreams literally, so he has Gumball recreate a dream he had where he was wearing cake for shoes, there was a leprechaun who
* The advice "If you can't fix it by hitting it with a hammer then it must be an electrical problem." And the corollary, "If hitting it with a hammer doesn't work, hit it with a bigger hammer."
* The Advisor's Alliance, but everything else is completely fictional.
* The Advocate is a film based on a lawyer in Medieval France who defends a pig for killing a child. It's based on some real trials of animals that occurred during that time period. Yes, the pig was framed.
* The "a dwarf walks into a brothel with a jackass and a honeycomb" joke.
* The ad was distributed (with no credit to Moore) on a mailing list which added some spelling errors, including one that made the post even funnier. When the ad mentions that "countless men and women being who are held back in their social jobs and lives" because of their poor English, the re-posting
* The Aegis Shield (yep, hidden labyrinths) is the best shield (Gladiolus' secondary), with a 10% chance to
* The Aegis War, a conflict from 500 years ago that resulted in the destruction of three titans as
* the Aegis While in the game itself, it is only ever talked about or shown in flash backs, as multiple characters that fought in the war are still alive, the DLC expansion “Torna the Golden Country” is set during the war, showing how the war ended and setting up the main game.
* The Aeldari now still use projectile weapons, lasers, spaceships, and so on just like everyone else. Their toys may be a bit more shiny than most, but they're a very long way from being sufficiently advanced. The Necron are closer, since no-one understands how their technology is possible, especially their teleporting and FTL travel, but it's still clearly technology and not really in the sufficiently advanced realm.
* The Aeldari of the Craftworlds have the Revenant Scout Titan, the Phantom Battle Titan, and the Warlock Titan, which are comparable to the Imperial Warhound and Reaver Titans in terms of size but, as is the case with anything constructed by the Aeldari, move and fight with astonishing speed and grace for as large as they are.
* The Aeldari were this during their peak. They would move the stars for the view. Some other demonstrated examples of their near-magical technology include a planetary security system that unleashed a never-ending horde of spectral warriors armed with swords that phased through Astartes armour like nothing (and instantly killed the marine inside leaving no visible wound like the soul itself was cut) and would have wiped out two pre-Heresy legions without the intervention of
* The Aellisar, a race of fairy-like beings, have A.I. to protect it in the
* The Aeneid) and the "Homeric Hymn to Aphrodite" centuries before Virgil.
* The Aeneid and wonder what poor Odysseus is doing at the Eighth Circle of Hell.
* The Aeneid, Dido orders to build a pyre to burn Aeneas' clothes and weapons, an

image of Aeneas and also the bed on which she slept with him, claiming this ritual will heal her of her lovesickness. But when the pyre is ready, she stabs herself with Aeneas' sword on it, and the Breakup Bonfire becomes her funeral pyre.
* The Aeneid in war (the Punic Wars — her future, Virgil's past). Particularly tragic in that it's made fairly obvious that he'd have stayed with her if he'd had the choice.
* The Aeneid is about Trojans looking for a new home—and doing a good bit of fighting along the way.
* The Aeneid. Let this be a lesson to all Good Romans to never put love before duty.
* The Aeneid Reading and translating it is a rite of passage for Latin students.
* The Aeneid. The goddess Juno tries to get Aeneas to leave his quest by arranging for him to have sex with Dido, Queen of Carthage. He and Dido become involved, leading Jupiter to send Mercury to remind him of his quest to found Rome. Aeneas heeds the vision and leaves Dido behind.
* The Aeneid, the tactic is shown from the Trojans' viewpoint; it succeeds for a while, but the Greeks figure out their ploy, and the Trojan archers have no idea that the band of soldiers is made of their allies, so Aeneas loses a few men to the Greeks and to friendly fire.
* The Aeneid. To show just how badly she is broken when Aeneas leaves her, Vergil stretches to its limits the inherent flexibility of Latin word order (an effect lost in translation)—the word order and grammar are so horribly broken that the subject and direct object can be several lines apart.
* The Aeneid, which is sort of a Roman crossover fanfiction to the other two, has its fair share as well.
* The Aeon and Cybrans also have tier 4 units that are expensive and slow, but can vaporize everything in front of them with respectively a giant phason and microwave laser. The Cybrans also have the option of upgrading their
* The Aeon would also count, since they happen to led by a warmongering commander who plans to usurp the princess, and their goal is to brainwash everyone into accepting
* The aerial city of Columbia is naturally one of these to its hordes of security barges and zeppelins in
* The aerial combat where every exploding Cobra plane was accompanied by a mook in a parachute.
* The Aero Knife uses a side by side demonstration of a regular knife versus their knife. Anyone paying the slightest bit of attention will notice that the regular knife is always just pushed straight down to cut a given object while the aero knife is used with a proper slicing motion. Not helping is that the regular knife is still cutting just fine, if not as prettily as the aero knife.
* The Aeromarine, belonging to SHIELD knock-off/parody organization HATE in
* The Aeronaut class has a jetpack, which blasts one skyward on a pillar of steam. Their "blasters" also work by weaponizing this.
* The Aeronaut's Windlass series, the brothers of the Temple of the Way have worn grooves into the stone floor with their accustomed paths.
* The Aerotrain peoplemover at Washington Dulles International Airport was built with future renovations to the airport's terminals in mind. It is proposed that Concourses C and D will be replaced with new concourses, and thus the station for Concourse C on the Aerotrain is located where the future concourse is to be built. However, since the Metropolitan Washington Airport Authority has not been able to get the new concourse building off the ground, an underground walkway was built between the Aerotrain station at Concourse C and the existing Concourse C. And there are escalators to nowhere in the station that was built.
* The Aesir, as befitting a warrior race of immortals worshiped by the goddamn VIKINGS define badass. Odin, Allfather, the Allwise and supreme king of all Asgardians has fathered and or adopted numerous children who definitely qualify as experts in asskickerey: Loki, Balder, and Hermod, with the primary example being his firstborn son Thor, God of Thunder. God of War, wielder of Mjolnir and Undisputed Ruler for Life of the Kingdom of YOU'RE FUCKED.

* The Aesir not killing Fenrisulfr and Jormungandr when they were small. Then again, the Norse did love their inevitable doom as thematic material...
* The Aesop and Son segments would end with Aesop giving the moral of the story, followed by Aesop Jr. giving an alternate "moral" as a pun.
* The Aesop Brothers, cartoon strip by Charles Rodrigues about (non-identical) Siamese twins, once played this as an extended fart joke. The brothers as a Holmes-and-Watson pair are retained to find out who let go a wicked one in the presence of an elderly British nobleman. You can guess the ending.
* The aesop of "The North Wind and Sun" is supposed to be that benevolence (sunshine) is a better way to get along with people than outright hostility (north wind), but the sunshine doesn't really work as "benevolence" as it still made the man with the coat uncomfortable, it just did it in a more subtle way than the wind by using gentle manipulation over brute force. Hence, the lesson can be interpreted as "indirect and subtle attacks work usually better than all-out assaults" instead.
* the Aesop was that Stan doesn't have the right to deny Roger control over all human life just because he felt he didn't have any control over his.
* The Aes Sedai and Aiel Wise Ones both have shawls that identify one as a fully-trained initiate.
* The Aes Sedai (female magic-user) ranks are Novice (the lowest level of initiate), Accepted (journeyman mages, having passed a difficult test of character and given greater latitude in choosing the direction of their studies), and full Aes Sedai (having passed a very difficult test of magic use and been bound by a magical artifact to follow the order's
* The Aesthetics of Technology: If something looks advanced it is advanced
* The Aesthetics of Technology: The tendency to portray advanced tech using specific aesthetics that have changed over time.
* The Aether, and after that the day is still three times as long as in the Overworld.
* The Aether Cycle Blood Magic is used to create Stephen's wand and his Pentacle.
* The Aethion Expanded Multiverse fanfic writer can put in their own work and be considered "fanon" for the universe.
* The AEUG was originally planning to steal a single Gundam Mk II prototype to reverse-engineer is revolutionary "movable frame" technology. With Kamille's help, they were able to steal
* The Affair: After a bitter custody dispute following their separation, Noah and Helen eventually settle into this for the sake of their children.
* The Affair, Alison and Oscar, the obnoxious owner of the diner where she works, had sex once when they were teenagers, as he is prone to recall. After Cole finds out about her affair with Noah, she has a one-night stand with Oscar to get her mind off things.
* The Affair: Alison is pretty upset that she's portrayed this way in Noah's new book, where her character aggressively seduces him, is a drug-dealing sociopath, and is finally run over by Noah's character.
* The Affair) and assaults Noah in prison and continues stalking him after he gets out, culminating in an attempted murder.
* The Affair before realizing that one of the two kissing girls is his daughter Whitney. He quickly makes himself scarce.
* The Affair: Helen says that she married Noah because she didn't want to marry someone like her father, but that she didn't realize that she married someone like her mother instead.
* The Affair: In season 3 Noah's sister Nina accuses Helen of having control freak tendencies, and that she was mostly attracted to Noah because she wanted to nurture someone who was in emotional pain (Noah's mother had recently died when they met in college). She seems to be mostly oblivious to this, coming across as much more emotionally manipulative in Noah's POV than her own.
* The Affair: John Gunther, the sadistic prison guard stalking Noah throughout Season 3, gets incredibly pissed off after Noah visits his mother in his parents' hunting store.
* The Affair: Juliette, the French literature professor in season 3, has a roughly

20 year-older husband who was her former professor but is now apparently senile. She has sex with her own male college students as well. One of her female protegés also muses about sleeping with Noah, who teaches an American literature class.
* The Affair: Neither Noah nor Cole seems to be able to stay away from their exes for good, even if they're in other relationships.
* The Affair: Oscar tries to blackmail Noah with knowledge of his affair with Alison. Noah asks his affluent best friend to loan him the money, but out of guilt he admits what happened to his wife anyway and tells Oscar to go screw himself.
* The Affairs of Wizards, which has magic-canceling powers. Stark Industries manufactures not only lethal "anti-psionic" weapons that specifically target magic users but "Deadlock" weapons that force the magic out of a witch's body. They can then be taken alive and used for human experimentation or slavery. Loki is not pleased; his fight spurs on the plot.
* The Affair, the Solloways live in New York, and spend their holidays in Long Island.
* The Affair: While they're staying at Yvonne and Robert's mansion, Alison helps out with Robert's physical therapy after he fires his housekeeper. After massaging his legs and telling him about her passionate affair with Noah, she realizes that he's rock hard.
* The Affair: Whitney calls out her father's affair with Alison when he admonishes her for her fling with Scott.
* The Affinity Bridge is trying to find a cure for the Revenant plague and is using a strange, previously undiscovered fungus to do so. Infested revenants have the fungus partially regenerate them, so there's some new living flesh that appears on them. However that's just a side-effect, the fungus tries to hijack the host and begins growing tendrils that sprout from the limbs and belly before eventually sprouting bursting spore pods.
* The Affinity system has been changed to just be another name for the
* The Affix, and uses it along with his newfound brashness to tweak her repeatedly until her eye twitches—then tries to make her other eye twitch. Then the kidnapping is interrupted by a third party and her night gets a whole lot worse.
* The Affix, because the Affix is a probability warper and it's drawn a lot of antagonists into one city at the same time, each with different reasons for trying to acquire it. Later in the series this still happens a lot, for similar reasons.
* The Affix because the titular gem is a causality warper and it's growing in power. One of the weirdest cases is when it makes all six phones in a room ring simultaneously, with six completely different callers with totally unrelated reasons for calling.
* The Affix, it only increases his determination to get them out of harm's way.
* The Affix pulls her into the ongoing fray whether she wants to be involved or not.
* The Affix the words of the gem's previous long-term keeper imply fate and free will are both valid, and should be kept in balance. Just because the universe is deterministic doesn't mean a person's choices aren't their own. Various characters have wildly differing beliefs on the subject, but Matt sides with his predecessor's embrace of compatibilism.
* The Affront are like this as well, best illustrated by the fact they're proud to be called the Affront. The Affront Diplomatic Service consists entirely of the most xenophobic and violent Affronters, lest other races think they're going soft by even
* The AFLAC duck, at the end of it you know that there's AFLAC and there are ducks...but at least ducks aren't acronyms.
* The aforementioned 80's power ballad spoof, "Lost in the Woods." Many kids must have wondered why their parents were suddenly laughing.
* the aforementioned airship's explosion. Right before the blast hit him, Nora used her body to shield Ren. While this protected him from serious injury, Nora took the brunt of the damage and is laid in critical condition as a result.
* The aforementioned Apocalypse's adoptive father Baal, leader of the Sandstormer

raiders, was a big believer in "survival of the fittest" and passed on this worldview to his son.
* the aforementioned Betty Crocker Is it any wonder he never went through with this?
* The aforementioned book plays with this trope, exposing it in a fashion similar to Max Brooks'
* The aforementioned Brigadier Sir Alistair Gordon Lethbridge-Stewart as played by
* The aforementioned change also leads to a different sequence of events at the climax.
* The aforementioned chicken can jump buildings and control fire. It is considered
* The aforementioned class representative even accuses them of "living in sin" until they explain the situation.
* The aforementioned conspiracy discovered by Garibaldi is also a case of this.
* the aforementioned couple's daughter and eventual wife of the Doctor is certainly more actiony compared to the main protagonist. While the Doctor would solve problems with his brains, River would solve them with some feminine charm and a gun.
* The aforementioned Deathstalker is one of the most dangerous species with an extremely painful venom. While very painful, though, it probably won't kill you. The venom of the Deathstalker, known as Chlorotoxin, is a heavy target of medical research. It does two, remarkable things. One, it can actually help the body regulate insulin, which can help fight diabetes. Two, a synthetic version of the toxin can be used to target brain tumors. When lined with fluorescent molecules, the venom highlights cancer cells, which makes removing them significantly easier. The venom has been known to highlight instances of cancer only
* The aforementioned desktop environments are all based on a certain common GUI system. This system is named...
* The aforementioned doctrinal enemies, the Shadows, are Scary Darwinian Aliens. They share Vorlons' dedication to the upbringing business, but their approach is more straightforward: every thousand years they go out there in the galaxy and start killing people, and also incite others to do the same. In spades. If their "trainees" are worth their salt, they'll mount a defence and repel the invaders, thereby becoming smarter and tougher. And if they don't, oh well, natural selection is a harsh mistress, and there are always other races.
* The aforementioned Elephant is a major opponent through the zoo, requiring a
* The aforementioned Esquire Network that replaced the Style Network was aimed at metrosexual males. The network had abysmal ratings right from the get-go, and its only notable programming were reruns and spinoffs of
* The aforementioned "fast travel" method now allows a player to immediately skip up or down a level once they have found the stairs in a dungeon, making it easier to get around.
* The aforementioned flipping upside-down also created its own mechanic, the self-righting mechanism, abbreviated to "srimech" among fans. Early strategies in both
* the aforementioned hungry Hana asks him to give her some food. He hands her one of the basic food rations that the Hoshidan ninjas carry when in missions; she loves it so much that, in the B support, she asks him for the recipe so she can make it later. If they reach a S support and Saizo proposes to Hana, they explicitly say that this food deal helped them grow closer.
* The aforementioned lack of central authority also means that the law on people leaving Islam for another religion mainly falls back on regional values. In former communist countries like Albania, it's nothing to sweat over (most Albanians don't really care about religion, anyway). In
* The aforementioned Madame Rouge is one of The Brotherhood of Evil's top enforcers and is shown to be cunning and skilled enough with her shape shifting powers to handle pretty much any of the heroes in a one-on-one fight.
* The aforementioned Orion, as part of a pared-down Project Constellation called the Space Launch System. It had its first successful unmanned test in December 2014; its first unmanned mission as a complete system is set for November 2021; and its first crewed mission is set for about 2023.

* The aforementioned "Pan Galactic Gargle Blaster" from is described as the best drink in existence. It also says that the effect of a Pan Galactic Gargle Blaster is like having your brains smashed out by a slice of lemon wrapped round a large gold brick, and it sums the entire drink up as the alcoholic equivalent of a mugging. That is to say, expensive and bad for the head. It was invented by Galactic President Zaphod Beeblebrox who, naturally, has had a few. The book noted that there exist a number of twelve step programs on numerous worlds that can help a person begin recovering from the drink. Not recovering from a drinking
* The aforementioned Parker Solar Probe is the closest humanity has ever put a spacecraft near
* The aforementioned "Party Crasher" is dedicated to Marinette's male classmates, and pretty much to
* The aforementioned Polish trend is generally based on Christianity, more specifically Catholicism, as Poland is a majority-Catholic nation. (That this trend exists is probably some sort of mix of this in general, the cross-pollination between the litterati and the Catholic intellectual circles, and the fact that such topics were no longer unwelcome after the fall of communism.) Here are some examples:
* the aforementioned rail tracer by making a comment about her ticket purchases.
* The aforementioned Saizo is in the receiving end again if the player builds the support chain with
* The aforementioned Sandra Izbasa was also the final competitor on floor, an event where she was expected to factor into the medals and had the potential to possibly win gold: she was the reigning Olympic champion on the event, had qualified in second place by a fairly narrow margin
* The aforementioned SMG4 and kills people without any remorse. The reason was stated in the 2015 QnA:
* The aforementioned spotted hyenas are an extreme example, as females not only are larger and more aggressive than males, but even their genitalia look very penis-like. This "pseudopenis" even can get erect, but males can penetrate it only when it's flaccid. Since it gets erect when males act too aggressive with females, males need to remain docile or otherwise are unable to mate.
* The aforementioned St. Bartholomew's Day Massacre instigated by Catherine de Medici against the Huguenots (French Protestants) which is considered the turning point of the French Wars of Religion. Its estimated that between 5,000 to 30,000 people died and though many Catholic leaders praised it at the time (
* The aforementioned stock animation piece of Cure Black and White leaping was used in the opening for the first
* The aforementioned Style Network was replaced by the Esquire Network in 2013, which itself did not last.
* The aforementioned substance is Australium, and being near it gives people
* The aforementioned subversion took place in the internet, where Infermon was particularly adapted. Normally, the sequence is instant to outside observers.
* The aforementioned supplementary sources also imply that the Secret Dead Sea Scrolls everyone based their actions around are actually Lilith's partially-translated
* The aforementioned Taro Namatame keeps the plot driving by kidnapping what would become members of the Investigation Team and eventually Nanako Dojima.
* The aforementioned track is followed by one entitled "Music Box," in which the same little girl sings meaningless syllables over the melody.
* The aforementioned Troll Empress eventually arrives in an Alternate Universe
* The aforementioned UIU, or Unusual Incidents Unit (commonly called the UIUseless) are part of the
* The aforementioned Zladko "Zlad!" Vladcik, who claims to hail from Molvanîa. His songs "Elektronik Supersonik" and "I Am the Anti-Pope" were,
* The Africa/Burma/Patagonia specials were aired in two parts, but were essentially two-hour challenges with no natural break. The episodes specials feel a lot more complete when viewed together, and Africa/Burma are even presented on Netflix in

* The African Honey Badger, while small and cuddly on the outside, is a mean fighting machine that can SLEEP OFF Cobra Bites that can kill adult men ten times over, and EAT said cobras as a part of their staple diet. Worse, they are as bad-tempered as their American counterparts the Wolverine, enough so that LIONS would rather flee for their lives than take on the wrath of these little furballs of claws and teeth.
* The African Queen, Charlie gets several leeches on him when he's underwater, repairing the ship. Instead of tearing them off, he salts them, which (as pointed out above) isn't recommended either.
* The African Queen of the film took its cast and crew through the sort of arc this trope normally describes.
* The African Queen shows Rose standing on Charlie's shoulders to fix the mast of the boat.
* The African Savannah is consistently referred to as one of the most brutally competitive and dangerous servers thanks to the multitude of excellent builds available— to the point that both the Secretary Bird and the African Wild Dog are S-Tier because they excel at thriving in it.
* The African Warlords, who were inspired by the Latin Junta to depose their colonial overlords as well. Controls Africa though prone to in-fighting and coups.
* the Afriel Strain Guardsmen were an attempt to produce superior fighters using DNA cloned from a number of the Imperium's heroes. Unfortunately, while they are superior fighters, they also seem to suffer from absolutely appalling bad luck; every regiment a member of the Afriel Strain has joined ended up being wiped out not long after.
* The Afrika Reich - Black Africans. The psychopathic governor of a German colony in Africa has his SS troops' parade-ground paved with negro skulls...
* The Afrika Reich both take place in a world in which the Nazis were victorious, most of the African continent is under their control, and the Jewish population of Europe has been deported to Madagascar.
* The Afro-Caribbean is another region that takes international beauty contests quite seriously. The countries and territories of the region tend to be poor, with populations ranging from a hundred thousand to a couple million, so being able to send representatives to global pageants is a source of national pride, even if they seldom win the top prize. Not counting the Latin countries, the last Caribbean to win Miss Universe was Miss Trinidad and Tobago, Wendy Fitzwilliam, in 1998. However, the first black Miss Universe was also Trinidadian, Janelle Commissiong, who won in 1977.
* The Afro. Influenced by the "Black Is Beautiful" cultural movement, which saw Africans and African-Americans embrace African traditions as a means of resisting assimilation and integration into the predominantly white societies of the Western world of the 1960's, the Afro became a symbol of rebellion against racism and the demand to conform to Western cultural norms. Eventually, it became part of the
* The AFR Universe orange hair is treated as natural and coming from her biological father. An official artbook was later released that reveals Futaba dyed her hair orange on a whim.
* The AFR Universe returns to his small town home after his year-long probation is up. But while he's back home and seeing his parents again, he announces to them that he's only visiting and will be returning to Tokyo because of all the friends he made and to pursue a career in politics.
* The AFR Universe was cheating to be King several times in a row. As punishment, they're locked out of the hotel room and forced to sleep on the balcony for the rest of the night.
* The Afterafterlife: An afterlife for people who died when they were already in the afterlife.
* The Afterafterlife: You go from life to afterlife, but what comes after that?
* The aftereffects are played realistically as well, as the person who does get hit with the needle is effectively out of commission for the next novel due to rehab and physical therapy.
* The After: Failed pilot movie for Amazon streaming created by Chris Carter about

a group of strangers trying to survive the aftermath of an unexplained apocalyptic event.
* The). After falling into the Energized Protodermis and coming out as stronger Nuva versions of themselves, something no other Toa had done before or after, they've become an entirely new type of Toa, and the only ones in existence.
* The After Hours", the department store mannequins have the ability to come alive. Every month, one of them leaves the store and goes to live as a human.
* The Afterimage blew up over Bandcamp, got signed to Unique Leader Records after having been a band for less than a year, and quickly found themselves getting on major tours. In general, they have managed to achieve the success that continually eluded The Afterimage.
* The Afterimage was a decently popular djent/metalcore act in their day, but they could never
* the afterlife. As his grandfather explains; "To me, it's my sword, so I have it. But to you, it's still
* The aftermath of Nanoha and Fate's final battle in the first season, with Nanoha carrying the beaten Fate in this manner.
* The Aftermath sections had a few fangirls (and boys) as well. One had even made a Trent doll.
* The Afternoon Show did this. A typical question would be something like "In which country is the Eiffel Tower? A: France. B: America. C: Ireland."
* The After Years—it can be exchanged late in the game for the best MP-increasing item in the game.
* The AFV class as a whole is a mish-mash of vehicles that don't fit neatly into other classes. While the most prominent members of the class are IFVs, it also includes self-propelled anti-aircraft guns (M247 Sergeat York, ZSU-23-4 Shilka), scout vehicles (FV107 Scimitar, Panhard CRAB, RST-V Shadow), and multiple rocket launch system (SBS Pindad, MT-LB S8). About the only things that unite all of these vehicles are their stealth, high vision range, and light-to-nonexistent armor.
* The "against" camp in the debate on whether or not to allow women into the combat branches of the US Military uses this trope as one of their primary arguments.
* the against wholesale invasion. One lone Dragon-Blooded soldier managed to crack its defenses and gain control in one of Creation's most dire moments. She became the Scarlet Empress because nobody wanted to screw with her after that.
* The Agathons' marriage (Karl "Helo" Agathon and Sharon "Athena" Valeri) survives the entire series even after Boomer pulls a
* The Age Creature spell ages the target creature by 1 year per level of the caster. The aging can be canceled by the spell's reverse, Restore Youth.
* The AGE-FX has the Stungle Rifle, which has even more power and range per shot than the SigMaxiss Rifle, while being about half the size. It can be attached to a larger barrel to form the Daidal Bazooka, easily capable of punching straight through capital ships.
* The Age journalist Caroline Wilson was perhaps the most strident critic of Essendon coach James Hird's role in the affair, something Essendon fans did not appreciate.
* The Ageless: A character who has eternal youth and never grows old, or cannot die from any complications of old age. But they can still be killed by anything else.
* The Ageless: Aliens who can't succumb to old age but can still die with other methods.
* The Ageless), and neither of them are happy with the thought that anyone whom they might be involved with would likely be dead and dust in what to them would be a blink of an eye.
* The Ageless are unaging, so long as they continue to eat the Apples of Idun.
* The Ageless, as he has lived for over 3000 years and has the ability revive good as new if his body's in one piece.
* The Ageless, but incredibly durable and capable of regenerating from being impaled through the chest with no difficulty.
* The Ageless: Characters who can't die from old age but can still be killed

through other means.
* The Ageless Elves are dwindling thanks to huge losses over millennia of wars and cataclysms. More of the survivors are choosing to pass over the sea to the Undying Lands, and no new elves have been born in 2700 years. In the years after the series' end, all but a few sail west to the Undying Lands, with the stragglers slowly fading away into spirits.
* The Ageless: Elves who can't die from old age but can still be killed through other means.
* The Ageless: Fairies who can't die of old age but can still be killed using other methods.
* The Ageless. The Archon can't even imagine a time when people died of old age, as the Holy Archonate on the planet Murphy has decreed that CR (the one-time anti-aging procedure) was a gift from God to all humankind and that denying it to anyone was a grave sin. This is why French's gray-haired appearance (he was in his 50s when CR was invented) baffles many people. He could use biosculpture to make himself appear young again, but he doesn't want to.
* The Ageless, though, even with the use of sarcophagi, as shown with Lord Yu, one of the oldest Goa'uld in existence, whose symbiote is acting very similarly to a senile human.
* The Ageless: Vampires don't age as we mortals do. Sometimes, this is genuine eternal youth. Sometimes long periods of time undead can result in a pretty inhuman-looking character. Sometimes, they age like us, just at a much slower rate.
* The Ageless: Vampires who won't die of old age but can still be killed through other means.
* The Agency about an ad agency which was running ads for a politician that showed that his competitor for the election had some undesirable quality, like being spawn of the devil or some such equivalent, while their candidate was patriotic and 100% American. This supposedly caused people to vote against the disfavored candidate The ads were run as part of fraction of a second subliminal ads during an unrelated product, like deodorant. This movie pointed out that subliminal ads, despite opinion to the contrary, are not illegal.
* The Agency, employing cyborgs to bring peace to Pacific City today and
* The agency in charge of the Machine also has a track record of trying to kill anyone who comes near it,
* The Agency sting in which the CIA, FBI, INS, and Secret Service all attempted a sting at the same time in a post office.
* The Agency, the CIA provides a Russian scientist with a poison injection device disguised as a ballpoint pen. It was established that a squad of Russian security agents was hunting down those communicating information to the west, and shoving them into lit furnaces; punishment for traitors. The pen was meant to be a merciful option if the scientist was caught. Instead, the scientist used the pen as a weapon to take out the last boss agent.
* The Agency was Backed By The CIA, and was advertised as being the first time filming was allowed inside the actual CIA headquarters.
* The Agency, which is so secret that it does not have a name, in "Mona Lisa".
* The Agent is also a stoic character, hanging around in the background, and fighting off numerous Diicoloni while keeping a calm demeanor. She saves a scientist from an Army of them and sacrifices herself to get her to safety. Once the scientist is gone, she begins crying, afraid to die, as the creatures advance towards her.
* The Agent is initially just a replacement field operative after Bando and The Unknown man were indisposed.
* The Agent of Death — Uranus is the first "The Agent" monster whose name does not accurately depict what it is named after (in this case, the Greek god of the sky has no correlation with "Death").
* The Agents, like Brown, Jones, and Moore who always have to wear their dark-green suits.
* The "Agents of Fortune" mentioned in E.T.I. (and possibly depicted on the album cover) are a possible example.

* The Age of Adaline: Adaline never grows old, but those around her, including her daughter, age, making it a very lonely existence. She is shown interacting with her daughter who is elderly while Adaline remains youthful.
* The Age of Adaline, Adaline stops aging after crashing her car during a freak snowstorm in the San Francisco area, freezing to death in a river, then being struck by lightning.
* The age of a star can change the conditions of whatever planets orbit it as it grows bigger and hotter as it ages by pushing the habitable zone (an invisible boundary where liquid water can exist) outwards. While doing so will render any planet originally in that habitable zone uninhabitable, it will also make planets too cold for life to become warm enough for life to evolve. When our Sun dies in about 5 billion years, this will actually happen to all of the outer planets in our Solar System. In fact, even Pluto may eventually become Earth-like one day!
* The Age of Decadence: Quests "can" go down the path of violence, but unless your character is specifically geared toward it, that tends to be discouraged. Instead, most quests will end up being a series of dialogues with plenty of skill checks.
* The Age of Decadence, where city states fight over what few scraps remain of their golden age. Other countries and cultures are called by their commonly used names ("Kemet" for Egypt, the Egyptian name for it) or not even changed. The Phrygians, for instance.
* The Age of Decadence with Rock Paper Shotgun revealed that this a necessity due to him already working at another company, thus not allowing him to manage other businesses openly.
* The Age of Discovery and Exploration began in Portugal, and then Spain. The former were the first European powers to participate in the Atlantic Slave Trade, and the latter were the first European colonizers and settlers of the New World and with far greater territorial expansion than the English, French and the Dutch. Their naval prowess were surpassed by the English and the French, Spain went from being the richest and most influential continental monarchy to becoming second fiddle to France, and the late 18th and early 19th Century saw their Empires fade as ex-colonies liberated themselves. Today there are more Spanish and Portuguese speakers outside Spain and Portugal in their former colonies than there are in the metropoles.
* The Age of Dusk, Earth (and the rest of the Solar System for that matter) has been completely corrupted by Chaos to the point that not even Chaos Marines can survive there.
* The Age of Five. An important item is hidden in an anti magic zone to keep immortals out. However immortals have inertia and simply age normally for the few moments it takes them to walk in and out.
* the age of for the Clippers, since the very poor pay and long voyages on the sailing ships drove the skilled, honest and healthy sailors to steamers, so the clipper captains had to be content with all dockside scum for makeshift crews.
* The Age of Innocence by Edith Wharton, which follows the lives of upper-class New Yorkers in the 1870s.
* The Age of Innocence. It's noted that the men switch to dancing gloves when they arrive at the latter event.
* The Age of Innocence starts in the 1930's, with an elderly Newland Archer telling the story to his grandson. Cut to the outside of their car as the car wheel turns into a carriage wheel and we're transported to the 1870's for the bulk of the story. At the conclusion, the carriage wheel turns back into a car wheel as Newland finishes telling the story as they arrive at the home of Countess Olenska.
* The Age of Innocence, when a character discusses the vices of Count Olenski, he states, "When he wasn't cavorting with women, he was... collecting china. And paying any price for either." A lot of literary analysts took the "china" comment as insinuation that Olenski's lovers included men as well as women — the movie drives it home even further by having the person glance around furtively before making the comment, clearly not wanting to be overheard.
* The Age Of Madness: There are two Luddite factions in Valbeck, and they are implied to be local cells of larger movements. The Breakers don't necessarily

oppose industrialization, but want better conditions for workers both on and off the job. The Burners are this trope, seeking to destroy the machinery and enact petty vengeance on its owners.
* The Age Of Miracles by Karen Thompson Walker. An event called the Slowing begins, and days and nights become longer. At first, it's only barely noticeable, a few extra minutes. But then it goes to hours and then days and by the later part of the book, each day and night is lasting weeks. It's indicated that eventually, the rotation will stop altogether and Earth will effectively be tidally locked with the sun. Some people try to adapt to the new cycles, while others try to keep going on regular 24 hour cycles. The protagonist is sure by the end of the book that civilization is nearing its end and humanity will eventually die.
* The Age of Miracles. The days get longer and longer and as the novel ends, people realize that before long, there won’t be any night at all.
* The Age of Misrule trilogy, and Herne the Hunter plays a major part in the development of two of the main characters.
* The Age of Myths was this to the Age of Wonders. The Paradise Estate Ponies in particular count as
* "The Age of Steel", culminating in a unison recitation of "They know where we are!"
* The Age of Steel he's piloting for Pete, Rose, and the Doctor to escape from the roof of a burning factory.
* "The Age of Steel" in that in the alternate version of himself he replaced wasn't an aimless loser, and his beloved Gran was still alive. He had a lot more to live for there than in normal reality. He later returned to his home universe after the alternate Gran died.
* "The Age of Steel": Mickey and Jake are looking for the transmitter controls, and Mickey asks what it looks like. Jake responds sarcastically that it'll have a sign with "Transmitter Controls" in big red letters on it. It does.
* "The Age of Steel": Mickey insists on rescuing Rose, the Doctor, and alt!Pete despite the risk to himself and Jake.
* "The Age of Steel": Mr. Crane, John Lumic's formerly loyal lieutenant, turns against Lumic after realizing that Lumic would have converted him into a Cyberman as well. The Cybermen kill him after he sabotages Lumic's life support, while Crane is shouting, "Die, you bast–"
* "The Age of Steel": The Doctor secretly gives Mickey instructions to take down some of the villain's computer systems in the middle of one of his "I've figured out exactly how to defeat you" speeches.
* The Age of Steel", when a downed Cyberman whose emotional inhibitor has been removed asks "why... am... I... cold?" It's revealed she has no idea what has happened, and still thinks she's on the way to her wedding. (The trope name drop is especially apt, as this is what finally convinces the Doctor that the Cybermen are no longer really alive, and therefore can be destroyed.)
* The Age of Steel": When asked how he knows how to fly a zeppelin, Mickey answers "PlayStation".
* The Age Of Stupid — who laments "why didn't we save ourselves when we had the chance?" and plays back real documentary footage from 2008, when the film was made.
* The Age of the Five: Mischief and other veez, although their ability to talk is rather limited.
* The age of the friends also changes. Season 1 has Monica and Rachel say they're 26, making Ross, Chandler and Joey 27. (Phoebe is murkier). However by Season 7 Monica and Rachel are 30, and the guys are 31, making them 24 and 25 in Season 1, which is supported by flashbacks of the dates they attended high school/college. It looks like in early seasons the writers planned for the characters to be older, realized it didn't work and lopped a few years off everyone's ages.
* The age of the Great Liners from the 1880s through the 1950s, before crossing the Atlantic by airliner was routine. Steamers got so big so fast that regulations couldn't keep up. The
* The Age of the Pussyfoot (written around 1967), Charles Forrester is revived from

cryopreservation in the year 2527 with a quarter of a million dollars from his insurance and interest (worth about $1.7 million in 2011). He thinks he is rich. It takes him a while to find out he isn't. It's handled quite well as the main source of inflation is rising health care costs.
* The Age of Zeus features a whole series of these to punish the protagonists for their acts of insurrection. Zeus himself destroys the Sydney Opera House with a series of lightning bolts, Poseidon sweeps away the Golden Gate Bridge with a tidal wave, Hades (who has a death touch) and Dionysus (who can induce madness) team up to massacre the crowd in front of St. Peter's Basilica, Ares and Heracles smash the faces on Mt. Rushmore, and Hephaestus crumples the Eiffel Tower into a ball.
* The ages of Jesus' disciples are never explicitly mentioned in the Bible. They are usually depicted as adult men of assorted ages.
* The ages of Kim and Ron (and by extension, their fellow students) are also never really addressed beyond
* The ages of SpongeBob and Patrick are inconsistent. Are they adults? Children?
* "The age when the oceans drank Atlantis and the gleaming cities" is part of the
* The Aggression Scale: Bill stole the money from mob boss Bellavance's private account after Bellavance was arrested for murder, and used it to buy Owen's way out of the facility he was in. He figured Bellavance would not need the money in prison, but he didn't count on Bellavance making bail.
* The Aggression Scale. Comments from his father Bill indicate that Owen could speak before the incident that landed him in the secure mental institution, and that Owen is choosing not to speak for reasons of his own.
* The Aggression Scale, crime boss Bellavance orders his chief lieutenant Lloyd not only to recover his stolen money but to send a "loud and messy" message by killing not only the thief, but anyone who could have been the thief.
* The Aggression Scale is a man who gets into his car and is immediately shot by Lloyd who is hiding in the back seat.
* The Aggression Scale, is like a sociopathic teenage MacGyver when it comes to turning common household items into lethal weapons.
* The Aggression Scale, Owen has just been released from a high-security facility. He's suffering from some form of mental disorder, the exact nature of which is never specified. It bears some hallmarks of autism, and he refuses to communicate verbally. He is a savant when it comes to creating lethal traps.
* The Aggression Scale Owen will use in constructing his traps to battle the home invaders is seen when the family is moving into the house; often only for a few seconds.
* The Aggression Scale takes just over 48 hours. Ballavance gives Lloyd 48 hours to kill everyone who had access to the money and return to the cash to him. Bellavance and his son are still in his office during the final scene, indicating that it cannot be more a few hours past the deadline.
* The Aggression Scale, two of the hit squad, Chissolm and Freddy, are completely bald.
* The Aggressive Drug Dealer: Crack cocaine and heroin caught on big during this decade, along with their pushers, hence the establishment of this trope as part of the larger "Just Say No" movement.
* The Aggressive Drug Dealer days of the 80s and 90s, but nowadays seen as a joke due to people realizing that drug dealers operate nothing like this. Drugs are expensive, and dealers are huge targets for the police. So demanding people take free samples of drugs and deliberately seeking out random strangers in suburbia to give them to (especially kids, who wouldn't have money to buy drugs to begin with) is a good way to run out of money and get yourself caught. Most real drug dealers wait for people to come to them, or deal drugs to people they already know well. But it wasn't very appealing for parents to admit their kids were doing drugs because they actively sought them out or learned it from friends and family, thus the prevalence of the trope.
* The Aggressive Drug Dealer for not taking his drugs, and the kid's utterly wimpy response: "I'm no chicken! You're a turkey!" The takeaway most kids got from this is that marijuana users might be loudmouthed jerks but those who didn't smoke it

were hopeless nerds.
* The Aggressive Drug Dealer: He really doesn't want to hear "no" from potential customers.
* The Aggressive Drug Dealer: The local drug dealer gets you to try a drug that you can't resist, or else!
* The Aggressive Drug Dealer the negative things they've been told about drugs are untrue.
* The Aggressive Drug Dealer: They really don't want you to walk away from a drug deal.
* The Aggressive Drug Dealer waiting for "customers" to call them; that would generate suspicion, which is exactly the opposite of what they want.
* The Aggressors from Super Robot Wars Original Generation. They were the guys who
* The Aggressor Squadrons are an interesting bunch. They fly in the Russian manner, and, according to
* The Aggressors were the founders of mecha combat, and are still some of the best mecha pilots in the game. Also
* The Aging Gaze spell causes the targets to age 10 years per minute that the caster gazes upon them.
* The aging, overweight Hepzibah Smith is this to Tom Riddle, future
* The Agonist. She is very much aware of this and has stated in interviews that she would enjoy seeing what the "misheard lyrics" videos would be like.
* The Agonist, the narrator personifies their conscience as one of these.
* The Agony and the Ecstasy: Charlton Heston denied the film rights because he insisted that his portrayal of the famous sculptor Michaelangelo as straight was historically accurate.
* The Agony Booth, 2.) Mary giving away the honeymoon money was done with George's full and no-reluctance consent.
* The Agony Booth and describes as "Dying Young Retroactively Makes You More Talented", the suicide of Jonathan Brandis earned him this status.
* The Agony Booth. It doesn't help that a message pops up when opening one of the old text recaps, begging people to watch their videos.
* The Agony Booth movie, when Sam (who was pretty much an annoying dumbass throughout the film) suddenly and inexplicably knows that he can find Frodo sailing down a nearby river.
* The Agony Booth of a horrible porn flick culminates in a jumbled sequence (from the original film) covered with various censorship signs and captions. Towards the end, for a split-second, there's a caption that reads: "I'm willing to worship whatever deity makes this Slipknot editing go the fuck away!"
* The Agony Booth: Sofie Liv, a lovely, fun-loving Danish girl who isn't above dressing like Wonder Woman every now and then...
* The Agony Booth. Though it actually got another reviewer on the site who had liked the film to change his mind and took care to praise Dan O'Bannon's "B-17" segment.
* The Agony Booth to watch Atletico San Pancho. And, when that doesn't work, he starts playing Menudo!
* The Agony Booth will sometimes have the writer make a rather perverted comment, followed by a note to themselves to edit it out before posting. "Don't forget now!"
* The AG-Systems Prototype is the most maneuverable craft in the game and can pull off Double Barrel Rolls and Combat Spins outside of Eliminator mode. On the flipside, its shields are so flimsy you'll probably absorb almost all of your weapons throughout the race.
* The Agtah on the astral plane of Daziarn boast twisted misshappen forms.
* The AH64 Apache gunship. Ed Macy, a British Apache pilot who operated in Afghanistan, explained in his book
* The Ahl-I-Batin, or hidden ones, used a ritual to increase their Arcane rating in order to hide from the Technocracy. It has
* The Ahnold, but nonetheless has directly referenced the character the actor plays, such as in "Don't Have a Cow Humanity" where he bursts into the Simpsons house with the iconic line "Come with me if you want to live!"

* The Ahool is a cryptid from Southeast Asia described as a hybrid of a monkey and a bat.
* The AI can recognize when the players are working together instead of competing with each other. The latter is how the game is supposed to be played.
* The A.I. characters, one of whom described a plan to destroy the power station of the Pfhor on the planet Lh'owon as, effectively, "Step one: drop an asteroid on the roof of the (underground) power plant. Step two: drop the badass protagonist down the hole." This is about 25% of the way through
* the AI director's mood. Then again, the meat of the game is in its online multiplayer and the randomization of item and monster spawn locations.
* The Aiel, a large culture of wasteland warriors who are each worth a dozen or more standard soldiers.
* The Aiel exhibit a similar governance (and similar admissions of who holds the true power) though in their case they are led by a Clan Chief (male), a Wise One (female), and the woman who owns the Hold.
* The Aiel from the same book wield spears with deadly skill... short spears, which are a bit too short for this trope, but still of a length with most swords and balanced for throwing.
* The Aiel have taboos against public displays of affection but not public nudity, which leaves both sides wondering what the other is getting so flustered about. Westerners are just as shocked by Aiel
* The Aiel prohibition against using swords is a remnant of their previous
* The AI fragment Sigma of Project Freelancer was fascinated by the concept of "Metastability", which was basically the stage where an AI becomes indistinguishable from a normal mind. To accomplish this, he created the Meta by brainwashing Agent Maine and having him steal the other AI fragments to become whole. In season 13, Locus assumes the Meta was trying to become the perfect weapon, only for Aiden Price to explain that what the Meta truly wanted was to become human.
* The AI Gang: Wendy "Wonderchild" Wendell III's room is a disaster area, which even her parents' household cleaning robot can't do a thing about.
* The A.I. genuinely didn't know that it was hurting others and, after having this revealed to it, fixes its behavior.
* The A.I. has a bad habit of letting skilled foreigners educate their children after giving them the heritage focus. Resulting in things like, say say, the Andalusian (but still Christian) Sultan of France. And any minor courtiers said Sultan generates will be ethnically as well as culturally Andalusian.
* The AI in "Red Faction: Guerrilla" isn't much better. Guerrillas last longer than they did in the first game, eventually get weapons on par with the
* The A.I. is programmed with a directive for self-preservation and someone (unwisely) attempts to shut it down or disconnect it, or it perceives humanity to be a potential threat (possibly because it knows it will eventually be seen as a threat
* The A.I. is programmed with orders that conflict with the goals of the protagonist. In this scenario, the A.I. may not exactly be evil, it is simply following its programming to the letter and will stop anyone not doing the same.
* The A.I. may be given directives without carefully considering the
* The Ainu of Japan are a remnant of the original inhabitants of the islands before the ancestors of the Japanese came over from Korea.
* The Ainur (Valar and Maiar), as well as Ungoliant, are truly ageless, all of them being older than the physical planet. Actually they are older than time itself, which doesn't even have any real meaning to such divine beings.
* the A.I. overrode his deletion command. His next response was to simply pull the computer's plug out of the wall.
* The Air Acolytes are non-benders who took up the Air Nomad culture under the leadership of Avatar Aang. A few of them appear to worship the ground that Tenzin and his family walk on. After Harmonic Convergence happened, at least one of them became an actual airbender. Let's just say that he was extremely enthusiastic about it.

* The airbag prank is seen as this to Mac especially, since it could easily have led to
* The Airborne soldiers trying to hold a bridge don't have much in the way of anti-tank weapons, but are faced with an armored convoy. To fight them, they come up with a
* The Airborne Toxic Event's "Sometime After Midnight" ends with the lines "
* The aircraft descends slowly and menacingly while its engine gets very loud and high in pitch,
* The aircraft in "High on Sweetz" drop exploding packages that kill any gruntz in a 3x3 radius.
* The aircraft turns until it is lined up with the road, beach, dock, etc.
* The aircraft version was just as bad. The ergonomics were not a problem anymore, but the combination of 25 rounds per gun and extreme rate of fire meant they could only fire for an incredibly short time. To make it worse, they used the 9mm Glisenti round, basically a weaker 9mm Parabellum round designed for the frail Italian semiautomatics of the time that would
* The Air Force boss and a handful of mechanical mooks have an attack called Wave Cannon that deals heavy lightning damage to all of its enemies. The Air Force uses it after its countdown completes.
* The Air Force security forces that guard the Cheyenne Mountain complex are a perfect example. They're routinely killed off by various offworld enemies to demonstrate how threatening they are.
* The Air Hogs Hawk-eye is the civilian version, you can even post your findings online.
* The Air I Breathe: All the four main characters are named for a Chinese proverb that sees life as being divided between four emotional cornerstones. Forest Whitaker's character is Happiness, Brendan Fraser's character is Pleasure, Sarah Michelle Gellar's character is Sorrow, and Kevin Bacon's character is Love.
* The Air I Breathe: The gangster "Fingers" acquired his nickname because of his habit of removing the fingers of those who don't pay him their debts.
* The air in the titular good place smells like whatever makes one happiest. That can be specific smells from real life but also complex chains of events or abstract concepts.
* . The airlocks are color-coded, so you have to devise a plan that will vent the aliens without losing too many crew (either to space or the hungry aliens).
* The Air Nomads are primarily based on Shaolin and Tibetan Buddhism, mixed in with a fair bit of
* The Air Nomads lived their lives walking the earth, but they justify this trope in that they were 1. equipped with means to travel vast distances effortlessly (airbending and Sky Bison) and 2. very spiritual people who kept very few physical possessions, and could live in harmony with nature.
* The Air Nomads traveled with the help of gliders supported by airbending.
* The Air on the G String is actually the Air from Orchestral Suite No. 3 in D Major. Violinist August Wilhelmj transposed and rewrote the Air in C Major in order to play it solely on the G string of the violin. Most recordings now list the work as the Air on the G String, even if the recording is of the original Orchestral Suite version.
* The Air Pirates, a group of underground comic creators in the early 1970s.
* The Airplane Channel, which is pretty reasonable. (This was the gimmick of the real-life Discovery Wings channel before it
* The "Air Raid" mode diverts the ball back to the plunger, requiring the player to shoot at a specified target for points.
* The Air Ride Series: Miss Robot. Almost any second she is in a comic, Miss Robot is doing something stupid. This ranges from drinking lava, confirming she hacks herself, or the fact her favorite drink, water, causes her to explode.
* The air rifle gag is apparently based on a real-life incident - in the
* The Airshark (which in itself is a parody of the infamous "Landshark" boss) was so popular with the staff that they actually added it into the game as a Random Event.

* The airships we see at the end could also qualify, since they're basically modified old-school balloons.
* The air traffic control just outside of Heathrow Airport suffered from lack of staff members due to them being stuck in traffic. One of the operators, having done shifts for at least 8 hours, made an error (probably in fatigue), which resulted in two planes colliding into each other and crashing into a residential district in London. At least 80+ people died,
* The AI running the place after the company was wiped out, GLaDOS, does nothing but create endless arrays of pointless puzzles for no purpose other than forcing people to run through them. Its
* The Air Up There, a warthog charges Jimmy while he's going to the bathroom in the bushes. Saleh shoots it with a spear. Jimmy holds out his hand in gratitude, but Saleh doesn't take it because he just used the hand to wipe his butt with leaves.
* The Air Up There) blew out his knee, costing him a pro career. He becomes a college coach, instead. He still wears his championship ring from 1981 everywhere.
* The Air Up There. First his foot slips on a rock, leaving him hanging on by his fingertips until he can get his footing again. Later he grabs onto a sapling, which tears loose, sending him plummeting a good ten feet until he manages to grab on again.
* The Air Up There, Jimmy's fellow bus passengers take advantage of the fact that he doesn't speak Swahili.
* The Air Up There Nyaga and Winabi chief Urudu agree to a basketball game between the Mingori Pistons and the Winabi team. If the Pistons win, the Winabi give up their copper-rich lands to Nyaga. If the Winabi win, Nyaga returns all the cattle his goons have stolen, and agrees in front of the army commander to leave the Winabi alone forever.
* The Air Up There, Nyaga throws his baseball cap down and stomps on it when he's displeased with how the basketball game is going.
* The Air Up There, the score for the basketball game is 45 to 46 until Saleh scores the winning shot seconds before time runs out.
* The Air Up There, the Winabi are the subject of many jokes by the rest of Kenya, including a cow joke.
* The Air Up There, the Winabi initiation has two parts. The first is a dangerous, grueling mountain climb. The second is a proper ceremony where a scar is cut into the person's lower stomach with a knife. Jimmy has to go through the initiation in order to join the Winabi basketball team, to his dismay.
* the air vents also breaks in, and keeps him distracted long enough for the heroes to show up and scare him off.
* The AirZone Solution, a company that claims to have the solution to the increasing problem of air pollution is found to be secretly abducting and experimenting on people. It turns out that their preferred solution to the problem is not to clean up the pollution but to genetically engineer people who aren't bothered by it.
* The A.I.'s goals may not even take the humans into account in the first place, and it just so happens that the humans are in the way.
* The A.I.s in general are this, due to the reveal that they're actually fragments of the Alpha A.I..
* The AIs play with this trope — there's (usually) only one of them to an individual, but they appear floating over the person's shoulder and exist to help and give advice. If you have a good one, great — you don't have to worry about its evil counterpart undermining its efforts. Unfortunately, that same lack of symmetry means that if you get stuck with an evil one, you're pretty much hosed.
* the AI to make characters behave differently in gameplay, not just the story:
* The A.I. was programmed for amoral or evil purposes in the first place, and it either
* The AI will also use them against you. The sniper Arkansas in Minefield is scripted to purposely shoot at the cars and set them off.
* The AI will commit its forces to a tactical withdrawal if you force it into a pitched battle with a superior army — it deploys as far away from your army

as possible and heads for the edge of the map as fast it can. With a good cavalry force, you can often take down some of the stragglers before they disappear off-map — the AI is not very good at regrouping just to try and kill your advance cavalry.
* The AK-47 (aka Kalashnikov), the most popular assault rifle of all time, has been around since 1949 and is still in use with several dozen countries. Around 75 million AK-47s have been built, and that's not counting various modernized models such as AKM, AK-74 and AK-12.
* The AK-47 is one of the rarest guns in the world. Surprised? The ones you are seeing in the hands of Iraqi insurgents or Somali pirates are AKM's, a version of the AK-47 that was improved and made easier to mass produce and the one that eventually saw mass popularity in both Warsaw Pact armies and Soviet client states.
* The AK and most weapons derived from it have the selector switch as follows: Safe, Full Auto, Single Shot. Most other rifles have the possibly more logical Safe, Single, Auto. There's a reason for that,
* The Akatsuki Invasion: The equivalent to canon's Invasion of Pain arc, only it's almost every living Akatsuki member, an army of Zetsu clones, and
* The Akatsuki Organization forged their infamous reputation, for having members who are more than capable of killing someone, but also take down Jinchuriki single-handedly. To put it simply they are
* The Akimichi clan is made up of Mighty Glaciers. They're all pretty big, due to
* The Akkala Citadel, location of the Akkala region's tower, also featured one, that you can find about from a nearby NPC; when Castle Town was destroyed, what was left of the royal army fell back to the citadel to make their last stand against the
* The AKOTAS characters also discuss whether they should celebate their
* The Akula is the only sub that can (technically) attack without surfacing: its Ultratorpedoes ability fires a pair of supercavitating torpodes straight ahead that don't stop until they hit something, be it friend or foe. However, this attack takes a while to recharge, and hitting a specific target requires the sub to be pointed in the right direction. Which, given the series' wonky pathfinding, is easier said than done.
* The Akula/Typhoon sub mentioned above is actually a subversion. It is, in fact, a very inefficient design, nicknamed
* The Akuma can also be subject to this. They are demon worshippers that were "remade" by their demonic patrons in a way that both empower them and obliterate all of their personality, desires, goals and emotions, replacing them with an Urge chosen by the demon. And some demons were rather unthoughtful in this choice. For example, the akuma chief of the dreaded Lintha pirates has an urge to "serve the Sea that Marched Against the Flame" (another name of the demon prince otherwise known as Kimbery). Which means that at any time when Kimbery is not actively giving him orders, he just does nothing and waits.
* The Alabasta arc has two egregious examples of this. First, Igaram is caught in a massive explosion that converts a galleon to scrap-wood, mourned over for the entire arc, and then wanders back in at the end to be supportive. Even worse, Pell carries a bomb with a reported blast radius of five kilometers, which was supposed to kill every living thing in the capital city, high enough into the sky that it doesn't even char the buildings; he's not only caught in the blast, he's actively carrying the thing (and doing nothing to defend himself). After that, he must have fallen the, oh,
* The Alamo: A small group of Texans hold out in an old mission. The Mexicans win and wipe out the Texans nearly to the last man, but lose three times more fighters than the Texans and are stalled long enough fighting them that the rest of the Texans have enough time to regroup and prepare for the final battle.
* The Alamo, Davy Crocket shoots off Santa Anna's hat. Though no historical evidence is provided for this, he probably just does this to be a smart ass.
* The Alamo Davy Crockett lampshades this aspect of Santa Anna at one point, calling him a peacock.
* The Alamo. Furious, the enemy commander orders him stabbed with bayonets, to

which Davy's only reply is a warning that "I'm a screamer!"
* The Alamo is a flawlessly dressed lawyer who uses impeccably proper English but impresses Davy Crockett and his men. For example, he shoots a charging cavalry soldier with a single-shot dueling pistol as the soldier charges him.
* The Alamo: With just himself and two other men left, captured and about to be killed by the Mexican army, Davy Crockett is asked if he has anything to say. He tells them that if the Mexicans surrender, he'll go easy on them. And then the order to kill him is given, and being about to be bayoneted to death, Davy's last words to Santa Anna are "I'm warning you—I'm a screamer."
* The Alan Cross Guide to Alternative Rock, appear guilty of this: most of the bands are from the 1980s or early 1990s, several are from the 1960s and 1970s, and the ones from the 2000s that are covered are treated briefly. Cross, a history major, averts this by noting it's far easier to objectively measure the cultural impact of older artists, while for most newer artists it's too soon to tell if they'll be influential.
* The Alan Davies Show episode "Mr Strawberry" is about Alan getting cast as a mascot in an advert campaign for a kid's milkshake drink, and having to hide this from his girlfriend out of fear it'll make her lose respect for his integrity as an actor.
* The Alan King Show, a pilot for a sitcom about a businessman who decides to quit Wall Street, and teach business at his old college - which happen to be the same college his daughter is attending.
* The Alan Parsons Project did an animated video for "Don't Answer Me".
* The Alan Parsons Project lived and breathed this trope; nearly all of their albums were concept albums. They explored a wide range of concepts:
* The Alan Parsons Project's "Breakdown" is about a robot that bemoans its imperfections and the restrictions it is forced to exist under, telling its tale of woe presumably to a human. The ending chorus (
* The Alan Parsons Project, showing a copy of the aforementioned book by Flanagan.
* The Alan Parsons Project's rather wordy stories and poems into a couple of verses and choruses apiece.
* The Alara block has the plane of Grixis, a hellscape ruled by demons and lich lords.
* The Alaran shard of Esper features Etherium, an alloy infused with pure aether. The Ethersworn have vowed to infuse every living thing on the plane with the substance. This is most readily seen in game as artificial limbs.
* The Alar are the version of the Fair Folk for the mythology of the Bribris peoples of Costa Rica.
* The Alarmaverse: An aftereffect of the Great Bloop: "And, during the following June, July, and August, every foal born to Pasture citizens had red eyes and a silver mane. These "Bloop babies" were unusually long-lived, but otherwise normal ponies."
* The Alarmaverse: Ditzy preemptively tries to fend off Trixie's unrequited affection by claiming that Time Turner is her boyfriend.
* The Alarmaverse were quite happy to hunt and eat her, given the chance.
* The alarm sound of the very first Swatch MusiCall generation was composed by Jarre. In fact, he included a sample directly from the watch in "Chronologie 4", "5" and "8".
* The Alaska Independence Party, which advocates a new referendum that would include the option of Alaska becoming an independent nation, was founded in 1974. It became an officially recognized party in Alaska in 1984 and has maintained that status ever since. In 1990, the AIP even elected a governor, Wally Hickel, but Hickel did not actually support Alaska independence or a new statehood/independence referendum, and he rejoined the Republican Party in 1994. The AIP received some attention in 2008 over allegations that Republican vice-presidential nominee Sarah Palin had once been a member (she never was, but her husband Todd was for a time and she once addressed their convention as governor... but only by video, not in person).
* The "Alban Knights Baltane Special Unit" content allows you to train up to 3 of

6 different squires (3 female, 3 male), and while not a full-blown romance you can go on dates with them. Although the player's gender doesn't affect the outcome of any scenario with the squires it does alter some dialogue with them.
* The Albareth Empire, a combined power of over 700 legal and dark guilds in
* The Al Bhed Psyches kidnap Yuna to attempt to blackmail the Besaid Aurochs into throwing their game, and they also beat Wakka up so badly he collapses. Considering how absurdly high the Psyches' blitzball stats are, this comes off as unnecessary, although
* The album also contains tons of other very funny errors, such as a tape of a piece breaking and being put back on the machine backwards, Schikele mumbling to himself while not realizing he has the microphone on, and Schickele eating his lunch (including biting into an apple) while announcing.
* The album art pictures are occasionally spoilery, such as the art for Colours and Mayhem side A, which depicts
* The album BE by Pain of Salvation opens with the birth of a god, the first track beginning with heartbeats and
* The album before it has "Head South", which repeats its title 42 times (counting background vocals).
* The album "coloUrs and mayhem: Universe A" was the result of a music contest. Two songs were removed after their composer was caught plagiarizing. They were replaced with new songs with the same names.
* The album "Cruising With Ruben & The Jets"(1968) was a stylistic parody of cheesy doo-wop songs, so accurate that you could almost mistake it for being a real doo-wop album.
* The Album of the Soundtrack of the Trailer of the Film of Monty Python and the Holy Grail, a logician complains about various logical errors in the film, following multiple tangents to a rant about his wife's affair with the milkman. (It's not on the actual soundtrack of the film, which is why this example isn't under "Film".)
* The Album of the Soundtrack of the Trailer of the Film of Monty Python and the Holy Grail a logician starts out pointing out incongruities in the witch-burning scene before he goes off on a tangent about his sexually unsatisfied wife. He finishes with the unproven conclusion that sex is more fun than logic.
* The Album of the Soundtrack of the Trailer of the Film of Monty Python and the Holy Grail (which takes place at a "screening" of the film itself), John Cleese's commentary is twice interrupted by "Oh, shut up!" (when describing particular details about the castle in the opening scene and the castle in the French Taunter scene).
* The album 'Seething Vortex' was lost when all shipments of the record were destroyed in a freak hurricane, and Nathan
* the album's source of inspiration, and the song's namesake in particular, that's probably done quite purposely. And for the record, reading the poem to the song is surrealistic, almost scary.
* the album this song appears on carries the idea further: it depicts a girl wearing mismatched shoes falling backwards.
* The Alcaister has metal pages covered with a colorless and transparent contact poison. This drains one
* The Alcatraz: A high-security prison where there's lava instead of the ocean and the guards are huge robots.
* The Alcatraz that leave inmates with nothing but their most horrible memories.
* The Alcatraz they've thrown him into by climbing up a drainpipe swept by searchlights. He times his climb so he'll be in the swept area at the moment when two searchlights cross over each other, blinding the guards with the combined reflection from the wall.
* The Alchemaster's Apprentice, we know that Optimus Yarnspinner loves his food, is a hypochondriac, and was once helped by a well-meaning if creepy Uggly. All these things are reflected in this book.
* The Alchemicals have the Gyroscopic Chakram, the signature weapon of the Thousand-Wounds Gear Style. It can only be described as the bastard offspring of

* The Alchemicals themselves eventually turn into cities when their essence score gets high enough. This involves vivisecting them and spreading their body out over miles and miles of Autochthon's world-body. They're used to it because all their big improvements require carving them up. Turning into a city is only different because they aren't cut up in a nice, sterile vat complex; instead, they are spread over an entire landscape.
* The alchemic circle written in blood that binds Alphonse's soul to his armor in
* The Alchemist almost never shows any stereotypically homosexual tendencies (other than putting on a
* The Alchemist at the time. His partner who is on surveillance duty just bursts out laughing and says he better wear "those tight-ass jeans of yours" when going to meet the crooks.
* The Alchemist die, though in a subversion they suffocate in the pyre rather than burn to death.
* The Alchemist has many characters fantasizing about what they'd do with the Philosopher's Stone. Sir Epicure Mammon gets the longest speech; he plans on feasting on exotic delicacies like quail tongue and lampreys, and he'd be so rich that feather mattresses would be too coarse — he'd have to have air ... he'd set up a system of aqueducts to carry milk and rose-water to everyone....
* The Alchemist is an even better example: three con artists have half a dozen customers all expecting different magic/alchemy jobs to be done for them, each of them by a different persona of all three grifters; the customers start dropping by the house at the same time, creating collisions between multiple Fawlty Towers Plots with people being stuffed into closets — and then when somebody else hears them yelling, they're told it's the moaning of the spirits.
* The "Alchemist Run" (no food items, only use potions and elixirs for healing and buffs)
* The Alchemy Index has "Child of Dust", a funeral-like dirge which ends with the last two lines muffled and the sound gradually receding into unsettling silence. The group actually buried their microphones while recording the song, presumably to give the listener the sensation of being buried.
* The Alchemy of Stone by Ekaterina Sedia. Mattie's quest is to save an ancient race.
* The Alchemy of Stone physically capable of having sex, but certain aspects of her mechanism that have no direct connection to sex eventually take on symbolically sexual meanings for her. Eventually some of this peculiar sexuality is made quite explicit in her interactions with other characters.
* The Alchemy of Stone, the soul-smoker is this after a lifetime of absorbing ghosts.
* The Alchemyst series is stated to be on the football team though the books are set in the summer.
* The Alchemy War developments from alchemy, with their control over "clakkers" (their version of golem) being a prominent part of their success.
* The Alchemy War, the Dutch are in something of a technological stasis, with the only real development happening through the horologists. However the horologists are so jealous of their secrets and so dismissive of the needs of other aspects of society, especially commerce, that they have actually purposely stymied innovation by hording their secrets and actively preventing new inventions outside of the guild.
* The alcohol bottle labels, of all things. Nathan drinks "Keikaku" beer, which fans of a certain
* The Alcoholic: A lot of roasters make jokes about other roasters who've had established drinking problems.
* The Alcoholic, and can go from seemingly swaying-on-his-feet smashed to master swordsman in the blink of an eye.
* The Alcoholic, but a horrible franchised Wetherspoons-style mess mostly staffed by Australians) again, but "Last Orders For Gary Stead" tells the true story of a man hiding in the bottom of a beer glass to escape the reality that his life is rubbish and his wife has left him.

* The Alcoholic: Drinks way too much and may not be aware that they're behaving like an addict.
* The Alcoholic literally meaning "water of life." Finnegan got revived when he got doused with "water of life."
* The Alcoholic, Max can frequently be seen drinking bottles of "Kong" whiskey in cutscenes.
* The Alcoholic Rose developing an alcohol problem by over a year. When asked about it, the authors said that they suspect that they picked up on parts of her personality in canon that would predispose her to addiction.
* The alcohol in most alcoholic beverages is the waste product of yeast (for the most part brewer's yeast,
* The Aldi low-budget supermarket chain has a series of advertisements where a character will buy another character a delicious meal in preparation for telling them some devastating news (e.g. a man telling his wife he is cheating on her), only for the other person to be more interested in the fact that they were able to buy the entire meal at Aldi.
* The Aldmeri Dominion is the preeminent anti-human alliance in Tamriel, having at least three known iterations throughout history. The
* The Aldous Lexicon in place of Alaric/Naia, and a collage made by Naia replacing the sculpture by Alaric's mother. Which raises the question of whether Naia's mother had known about the other worlds, among other things.
* The Aldrich Family: In the radio and film series, some of the schoolmates of adolescent (and adenoidal) lead character Henry Aldrich had nicknames:
* The Aldrich Family regularly tries these when he gets into a sticky situation, invariably making things worse. For example, when his parents order him to return the West Indian straw hat he has purchased as they think it looks silly, the shop assistant points out that since he has had it monogrammed, they cannot take it back, so Henry and his friend Homer Brown try combing the phone book to find someone with the initials H.A. who wears a size 6 1/2 hat and is willing to buy a straw hat for the $3 in store credit Henry's mother thinks he received. They try to narrow the list of possible buyers by calling the newspaper, only to lead the reporter to think Henry has been robbed (or otherwise done wrong by) someone with a straw hat with the initials H.A. - which causes problems for Henry's father when he secretly decides to keep the hat for himself and goes to have it enlarged...
* The Aldrich Family. Television adaptation of the radio show. Debuted in 1949.
* The Aleran Legions in general. They're Roman legions souped up with a wide range of elemental superpowers, including archers who can snipe targets from hundreds of yards, soldiers who can launch fireballs, and flying support units. All of this is in addition to a baseline level of powers in all legionnaires, including a low level of super strength and endurance and the ability to march far faster than normal humans. The Legions have allowed Alera to carve out a stable and powerful nation in the face of hostile Wolfmen, Yetis, and animal-bonding barbarian tribes.
* the Alerans are saved from one horde of Marat barbarians by another horde of Marat barbarians, because Doroga hates Atsurak much more than he disdains the Alerans and Tavi won the challenge against Atsurak, so he had an excuse. They don't stay villains for long, though.
* The Alerans have camp followers to thank for their civilization, as they are descended from a
* The Alerans themselves have a system that effectively works out to this; theoretically, your social position is
* The Alerans themselves have a very strong martial tradition, as do the Icemen, though both of those cultures are more complex than
* The Aleran warriors who fight on the northern boarders against the powerful and deadly Ice Men are not laid to rest in the cold, hard ground. They are burned in a pyre so their bodies won't suffer the cold the hordes from the north inflicted upon them.
* The Alessian Revolt, later in the 1st Era, was an uprising of Cyrodiil's native human population which had been enslaved and brutally tortured by the Ayleids (Wild Elves). With her freed slave army, the support of the Nordic Empire, several

* The Alethi (and to a lesser extent their neighbors the Veden) are a deconstruction. During the days of the Silver Kingdoms, they were the kingdom charged with "maintaining the terrible arts of killing" while they waited for the next
* The Alethi bridgemen, who are often assigned to menial duties when not
* The Alethi elite are afflicted with something called "the Thrill," a race-wide bloodlust that drives them to fight, contest, and conquer. Their
* The Alexandria Archives that leans more to the comedic side, features a more or less self-contained horror story per episode. A few of these stories are quite lighthearted and harmless, but many of them are quite horrific and, on rare occasions, include truly disturbing elements.
* The Alfar of the Nine Realms generally don't follow this. However, Gravemoss is an exiled Light Elf and, intentionally, reminiscent of the darkest and most horrifying tales of the Fair Folk with all the knobs turned
* The Al Franken Show on Air America Radio. Wally Ballou is interviewing a British Airways passenger whose flight has been delayed, and Ballou remains oblivious that the person he's talking to, Muhammad al-Khazmani, is implied to be a terrorist hijacker.
* The Alfred Hitchcock Hour fame). Little Eva's mean aunt refuses to believe that her favorite doll can come to life, until she interrupts a game of "now you be the little girl and I'll be the doll" at a spectacularly bad time.
* The Alfred Lord Tennyson poem "St. Simeon Stylites" goes into the mind of a Christian saint,
* The Algebraist Also consider that if you really piss off Dwellers, you can expect to find a planet sized collection of rocks, gravel and dust impacting your home world at a great proportion of the speed of light.
* The Algebraist, has "aHumans" (the humans who were taken to join galactic civilisation in about 4000 BC) and "rHumans" (tho ones who made it out themselves seven thousand years later). It turns out that this was a common tactic of several galactic civilizations; by ensuring that the transplanted population was more advanced (and usually more numerous) than the originating population, the original population would have swiftly integrate and conform into the community when it made first contact. The Culmina use it as a form of controlling lesser races. Slightly averted, though; these two groups make up only a small fraction of sentient beings even among the 'Quick' species (of which humanity is a member).
* The Algebraist has the Dwellers — although they mostly live on gas planets as Air Whales, it's implied that they created a massive intergalactic network of wormholes. It is certain that at one point they used them. Their culture is intimately examined in the book.
* The Algebraist... if the portal is down, coming in the long slow way means you get to fling relativistic warheads at the target system whilst you decelerate.
* The Algebraist of years old, which means that dwellers are essentially a first-generation society.
* The Algebraist, so their response amounts to: "Yes, and what do this have to do with us?"
* The Algebraist than What Kept You? As a method of preventing every First Contact boondoggle ever theorized, it worked. It also annihilated all terrestrial human culture.
* The Algebra of Ice planet, and the villain retorts "Well, it's early days yet. They say the second crime's easier". This is clearly intended to invoke the Doctor's future destruction of Gallifrey in the Eighth Doctor Adventures (and, since the novel was published in late 2004, possibly in the New Series).
* The Algis Budrys story "Wall of Crystal, Eye of Night" has Burr, who the protagonist Sollenar attempts to kill by shooting him multiple times, and who is described as "shredded, leaking blood and worse than blood". He later falls many stories from a high-rise office building, but nevertheless, he
* The Alibi: A suspect explains why they couldn't have been around at the scene of the crime and/or couldn't possibly have committed the crime.
* The Alibi: Someone can prove they were physically incapable of committing the

crime.
* The Alibi, where the hero, after kissing his love interest at the end, notes "Actually, I've just realized; you're quite a bit taller than me, aren't you?"
* The Alice Angel theme song that plays as Henry is introduced to the... real-life version.
* The Alice McKinley Books has Alice think her stepmother, Sylvia, is cheating on her father a few times. When she learns that Sylvia's ex is going to Chester, where Sylvia is currently working as an exchange teacher, for Christmas, Alice thinks she's cheating and will continue to see him, even after getting married to Ben. Sylvia tells Alice that she had no idea that her ex was going to do this and sent him packing. Another time, Alice saw Sylvia getting out of her ex's car and tried to avoid thinking this. Sylvia says that she was playing tennis with some friends and her ex was substituting for someone.
* The Alice Network, Alice Dubois, so she asks everyone to call her Lili instead.
* The Alice Network and are not allowed to know each others' real names. Eve, Lili, and Violette even continue to refer to each other by their Nom De Guerres after their actual names have been revealed and it's pointless, for the simple reason that those are the names that feel true.
* The Alice Network being a piece of junk, but it’s actually quite a nice car. In the epilogue, however, it’s basically scrap, and they only use it to go on picnics.
* The Alice Network believes she betrayed her comrade to the Germans while under the influence of opium. She is tortured with guilt for many years, and another comrade, who agrees that it's All Her Fault, refuses to speak to her.
* The Alice Network, Cameron and Eve meet up again after the war over a drink and reminisce about dead friends. Cameron talks about his recruits who have died.
* The Alice Network: Captain Cameron is an honorable, kind soldier who would never leave a lady in distress. His gentlemanly qualities only make him more attractive to Eve, who rarely encounters kindness in the course of her life and her short-lived spying career.
* The Alice Network, Captain Cameron is promoted to Major by the end of the war. This has no particular effect on his personality or role in the book and was apparently done only because the real life Cameron was promoted.
* The Alice Network: Charlie asks Finn why he didn’t tell her that Eve often says the name “René” when she’s in her moods, given that this could be useful to Charlie, and he tells her that he works for Eve, not her.
* The Alice Network: Charlotte "Charlie" St. Clair’s nickname started out this way — Rose was the only one who called her Charlie — but after Rose’s disappearance, she begins to go by Charlie full time.
* The Alice Network: Eve tends to drink to kill the pain. Charlie and Finn sometimes join her. (Finn in particular mentioned that he drank a lot after coming back from the war, and that this led to some of his worse decisions.)
* The Alice Network features Charlie and Finn’s daughter. Justified: The mother in question was pregnant for the entire book, although it took her some time to decide whether to keep the baby.
* The Alice Network: He tells her that when he became a soldier, most of the other men had pictures of girlfriends or wives. He had neither, so he had a picture of his car.
* The Alice Network: Lili makes this comment to the waiter after a long day:
* The Alice Network — and she doesn't end up with either one in the end.
* The Alice Network; not out of malice, but because they want to impress upon her the severity of life in Lille and help her survive there.
* The Alice Network: Rene realizes Eve isn't from the French region she claims based on her accent. She allays suspicions by lying that she traveled from there for work, and didn't want to say anything since that's very near the German border, thus many French people would suspect that she's a collaborator.
* The Alice Network. This is a rare serious example — the alliteration is done solely to add some punch and isn't commented on by the narrator.
* The Alicorn Amulet, which first shows up in a side-story where Twilight Sparkle

tries to use it to make duplicate Elements of Harmony, and one of her candidates uses it to try and become a god. It reappears several months later in the hands of Spike...
* The Alicorn Princesses seem to function under this rule. Twilight and Cadance are definitely a step above the average pony, but are still fairly young and aren't
* The Alicorn sisters Princess Celestia and Princess Luna used to jointly rule Equestria together until Luna became bitter and resentful when their subjects favored Celestia over her, turning her into Nightmare Moon. After Luna is defeated and returned to normal centuries later, however, the two sisters reconcile.
* The alicorn (unicorn horn) allows its holder to start fires and throw fire.
* The Alienages are ghettos for the City Elves. The "protective" aspect is brought up in a codex entry in the first game, in that it's
* The Alien archetype has Cosmic Horror Gangi'el and Cosmic Fortress Gol'gar, monsters clearly based on
* The Alien Blaster is a unique weapon you can find that has an extremely high base damage and a 100% chance to land a critical hit with every shot. However it has an extremely limited ammo supply that cannot be replenished. Also, every shot will make it deteriorate by a sizable chunk until it becomes useless and the gun can only be repaired by NPCs which is expensive and very few NPCs can repair it up to 100% of its condition. It returns in
* The alien board game from the appropriately-named episode "The Game", allows whoever interacts with it to be able to interact with objects in real life. The side effect is that it causes the user's hands to grow in size.
* The alien camera in "Dan TV", which intercepts all television broadcasts so the user is the only one on television. However, whenever someone turns their television set off, the user is zapped.
* The alien celebrity chef Elzar is this, being famous for his amazing skill at cooking. Of course, he's also an egotistical
* The alien character Ax is actually surprised that humans invented books before computers, as he considers the former to be more convenient and easier to use. He is also surprised to hear chatrooms were invented after the telephone for the same reason.
* The Alien Factor: The alien who killed the monsters rampaging through the area is shot by the sheriff because of his scary appearance.
* The alien from the Babbel language course commercials, who despite looking somewhat like a
* the alien government finds out about this, and, to the horror of SG-1's ally, declares that the world is not ready and begins their own Masquerade.
* The alien guards that Perry beats up land in a pool. One of them declares that
* The alien henchwoman Kneemoi is responsible for most of the bizarre thefts, particularly of concepts that don't exist in any physical sense, including:
* The alien-hunting organization, hidden beneath a cement factory, run by K. Edgar Singer in
* The Alienist about male behavior in the 19th Century. Moore himself doesn't seem particularly traumatized by the incident: an infamous high-society cad and gadabout, he's used to waking up in compromising positions. He's more concerned with what happened to his trousers than what may have happened to his...other parts.
* The Alienist, Kreizler and his servant Mary have a very weird power dynamic in their relationship, where on the one hand, Kreizler is Mary's boss, but on the other hand, he is highly dependent upon her because of his bad arm. Mary seems to enjoy Laszlo's timidity whenever he needs her to do something for him.
* The alien jellyfish in the episode "Planet of the Jellyfish" dissolve into puddles of goop upon contact with mayonnaise.
* "The Alien Jellyfish Song" by Chris Conway is about an alien who spends some time on Earth and hits it off with a bartender. After they return to his home planet, he reveals his true form to her,
* The "Alien Jones" Boss Coffee ads begins with a couple guys at a bar discussing aliens, and how

* The alien jumpsuit in "Last Dan Standing" makes its wearer able to evade any attack, but drains energy from the wearer, causing them to occasionally fall asleep.
* The Alien Legion had the members of Force Nomad fighting a battle in the event horizon of a black hole. There they met a race of aliens that had been there for decades, but all their star charts were millions of years out of date. They helped our guys get out, but their system of measurements was incomprehensible to all but one of them (This was because it was amazingly ancient, and so was the translator's race). They were able to leave after a short time, but discovered that fifteen years had passed on the outside. During that time, they had been declared dead and Tamara's infant daughter was a teenager in her own platoon.
* The alien organisms become acclimatized to Earth's atmosphere and are spreading throughout the town. They are evolving rapidly to become smarter primates. Ira suddenly makes the brilliant assumption that the aliens are weak against Selenium
* The alien parents in "Believers" appear to come from a planet like this. Somewhat
* The alien prince of the Arquillian Empire who had the Galaxy was piloting a Mobile Suit Human, the better to hide from enemies — and to pet his cat.
* The alien race of the planet purposely leaving hints in case another Sapient Speices came to the world to finish off the Brother Moon
* the alien race whose existence was foreshadowed with steadily decreasing subtlety from the first book onwards. and their intense dislike and mistrust of humanity trump whatever differences they may have.
* The alien Roger once pooped out a turd made of solid gold; pretty standard fare for the show. But then a couple scenes in two different episodes were devoted to people finding the golden turd and engaging in
* The Aliens. A drug dealer he follows also turns out to be gay and an example as well though, inviting him off for sex. He accepts. Neither ever show any stereotypical traits of gay men.
* The aliens also tend to yell, "Halt!" a few seconds prior to shooting at anyone and continue to shoot even after their targets have rounded a corner or closed a door in front of them.
* The aliens are definitely well-intentioned. The only other race that was actually intelligent enough to possibly mind honestly didn't care, and in fact welcomed them. In fact, they were only wrong once before, out of all the other planets they tried.
* The alien scissors in "Bad Hair Day" can allow the user to style hair in a variety of ways, but all the cut hair congregates in the sewers and becomes a monster.
* The aliens don't invade, they intervene, offering us membership in the galactic civilization because
* The Alien Series, Serene attends catechism classes at a Catholic church, despite being her family's religion being so important to them they were willing to go into exile on Earth for it because she's trying to get closer to her Catholic crush.
* The Alien Series, this is Kitty's type, although she's not sure if she's attracted to them or they're attracted to her.
* The Aliens has alien refugees living in a slum called Troy behind a gigantic concrete wall. They get let out during the day for work release.
* The alien ships are rendered shieldless through a virus uploaded to the mothership, which apparently maintains a constant data link with both the smaller motherships and the fighters. Although the heroes believed that this would only last a few minutes, they never get their shields back. Downplayed, as the aliens are still perfectly healthy and their technology (other than the shielding) is still functioning, but without the shields making them
* the aliens in question alien empire known as the Dominion of the Black, and the aliens in question left behind clocks, counting down to a time in the near future. A highly respected scholar has translated a word that is included in all these clocks: "harvest".
* The aliens in the episode "Time's Arrow" live scant fractions of a second out of

phase with the rest of reality.
* The aliens in the movie tend to stand around out in the open in brightly-colored uniforms, despite knowing that there are rebels who will attack them. When shooting starts, they tend to flock together, making themselves an easier target. At least those brightly-colored uniforms were bulletproof in the second miniseries.
* The aliens in the second part of "Voice in the Wilderness" download the station's language files, though they speak with a very thick accent. The alien captain
* The aliens known as Monks, in the Draco Tavern series, are implied to be piloting a generation ship - the present crew may not have ever seen the home world
* The aliens on Feebla-Oot breathe and exhale oxygen, making carbon dioxide a rare commodity for them. They also explode into goo from the waist up when excited, which sounds exactly like someone shouting the name "Candace", but regenerate from it in less than a day.
* The aliens send several massive ships over major cities. They then use powerful
* The Aliens That Came From A Completely Different Planet To Earth: It features both Jeff and Jim, who are constantly getting mixed up by the other characters—occasionally even they themselves can't get their names right.
* The aliens themselves are only met in "Rama Revealed", when one of them reveals itself to Nicole, in the form of an eagle-headed humanoid, and explains the purpose of the Rama ships.
* The Aliens (they are actually called that; they are from the planet Alien) from the
* The alien sunglasses in "The Iron Crown Affair" expose aliens to the wearer, but also causes temporary blindness.
* The aliens wanting their phlebotinum (the SDF-1) back was the driving force for the first part of
* The alien units are explicitly not exactly the same as their Earthican equivalents, but they're conveniently similar.
* The Alien Way civilization and military capabilities. Then humans sent images of starships ready to strike the alien homeworld and an offer of peace.
* The alien wizard Babidi and his minions, a couple of whom are also aliens, sneak onto Earth to retrieve and revive Babidi's father's
* The Aligator Snapping Turtle. While these beasts are even slower than most other turtles, they have one of the thickest shells of any turtle and jaws that can easily break through bone.
* The Alinos Gateway map is also popular in multiplayer for its sheer size and open spaces with a mix of some small halls to hide in. People who usually play as Spire will always pick this map since he can get to a certain spot that other hunters can't reach, thus he can easily snipe everyone while generally staying out of harm's way.
* The all 0's code was also applied to the missiles themselves, but not the warheads. Also, there would be more than one control center for any squadron of missiles, and a complete launch would require the cooperation of all of them, not just two people.
* The Allagan Empire is responsible for a large chunk of the things you have to deal through. A (non-exhaustive) list: The
* The All-American Rejects", and he goes right back to describing what a bitch she was and how glad he is that she's out of his life.
* The All-American Rejects' "Dirty Little Secret" video features people whose faces are hidden by little cards that admit
* The All-American Rejects, doing an uncredited cameo. Amendola just happened to be walking past the shooting location when they needed someone to stand behind the singer and act angry, and agreed to the cameo on a whim.
* The All-American Rejects less out of place... but only just: on the one hand, the heroes of the story are trying to prevent a death. On the other, the song's still being used with kid's toys.
* The All-American Rejects song "Move Along" is to never give up and never give in, because it gets better. All you have to do is keep going, no matter how hard it is

to do so.
* The All-American Rejects "Swing Swing", which still gets quite a bit of airplay, missed the Top 40 entirely and peaked at #60.
* The All-American Slurp is about a Chinese immigrant family's struggles to integrate into American culture.
* The All-Concealing "I": A first-person narrative is a handy way of keeping the protagonist's identity hidden before revealing it in the twist ending.
* The All-Concealing "I": A story is in a first-person narrative so that the protagonist's true nature can be revealed in a twist ending.
* The All-Concealing "I": A story uses a first-person narrative so that the protagonist's true identity can be revealed in a twist ending.
* The All-Concealing "I" is about certain benefits of first-person narration.
* The All-Concealing "I": The story uses a first-person narrative to hide the identity of the protagonist until the twist ending reveals it.
* The All-Concealing "I", who speaks in the first person and none of the other characters ever refer to them by gendered pronouns.
* The All-Defector, a monstrous and uncontrollable creation of the Sobornost seeks to go one step beyond and
* The allegations were investigated and proven true in a 2019 Tribunal (link provided here
* The Alleged Car: Depending on the decade, economy/electric cars are either seen as the sign of a thoughtful, world-conscious protagonist or a slick street racing enthusiast, or effeminate crap made by Evil Foreigners out to destroy America and worshipped by cash-strapped nerds. For larger cars, the driver will either be a nail-biting badass or a thoughtless conservative who hates the environment almost as much as they hate themselves.
* The Alleged Car In actuality though, the 2CV is not a terrible car for what it was designed to do. It was designed to be a highly cheap car that could get two people across a city with a reasonable amount of safety. It was neither designed to be fast nor to go offroad. But as an economy car, it worked. It was THE car of American grad students in the period.
* The Alleged Car. One example that stands out is the Ford Excursion. The combination of its curb weight of 7230 lbs and its 6.8 L V-10 engine make for the ultimate gas guzzler, getting only 9.6 mpg.
* The Alleged Car: Someone has a car that's a complete mess and is barely able to function.
* The Alleged Car: the "Malaise Era" of cars continued apace, with a mass changeover to front-wheel-drive adding a lot of new, untested driveline components to the existing stew of cost-cutting/"take this job and shove it" quality control and analog emissions controls whose prime directive seemed to be getting a few more years out of existing carburetor tooling (the switch to EFI really gathered steam at mid-decade). Japanese cars had none of these problems, but protectionist "voluntary" import quotas in America and throughout Western Europe constrained supply of those and meant that list price was a starting point for dealer markup, not bargaining down from.
* The Alleged Expert: You fail to do what you were supposedly trained to do.
* The allegedly-catatonic Cameron, just pulled up from the bottom of a pool after keeling over into it face first, broke into one of these in
* The allegedly cursed painting "The Hands Resist Him" allegedly had the people in the paintings frown, and one person even allegedly pulled out a gun.
* The allegedly offensive character has strong sides — for example,
* The alleged murderer claims to have not visited his friend for days, but is caught because he leapt over the freshly-painted stairs and knocked on the window set into the door rather than the freshly-painted door itself. (Because it's not like fresh paint
* The Alleged Steed. However, Pablo and Uniqua are often so busy arguing about who is better than the other, they forget about the race until Tyrone passes them, resulting in Tyrone winning by a nose.
* the allegorical English morality play, who is summoned by Death to give a

reckoning of his life, with Fellowship, his kindred and cousins, goods, strength, beauty, discretion, his five senses leaving him, with Knowledge departing from him at the end, and his only companion to the grave is his Good Deeds.
* The Allegro itself looked far better in the original concept drawings from designer Harris Mann. Unfortunately it's Italian looking lines and modernist nose style became much more rotund and frumpy in production.
* The Allen And Craig Show Episode 8, Allen gets his very white, but maybe not so white, friend Lars, who he calls "the coolest guy I know" to keep Craig from becoming totally lame.
* The Allen And Craig Show is about making that episode, and the characters consistently address the audience, camera guy, and the fact that they have very little money to produce the program.
* The All-England Summarize Proust competition yielded no worthy contestants, so the award was given to
* The alley cats eliminate The King's gang in "Cats Do Dance" by incorporating all three of their previous failed attempts into one final plan: Choo Choo sneaks away and bribes Grape Ape (using the remaining bananas from the
* The all-female House of Study at the Assassins' Guild School administered by Miss Alice Band is called Tump House. But becomes Mantis House in another writing without explanation.
* The Alliance Alive and cool Daemonic superpowers with which she can help her friends!
* The Alliance Alive, but in different ways: Galil blames himself for not being good enough to prevent it, and Azura blames herself because they wouldn't have trespassed in the first place if he hadn't cajoled Galil into doing it.
* The Alliance Alive into an aerial battle that is infinitely cooler than what the protagonists are doing.
* The Alliance Alive, Kuwalsa lets Ignace do so. He also lets Ignace carry Vivian's unconscious body back.
* The Alliance Alive of whom are variants on the trope. Galil is cautious, Azura is adventurous. Vivian is enthusiastic, Ignace is staid. Gene is cold, Rachel is impulsive.
* The Alliance Alive starts off as a very linear RPG for the first 10 hours. The game gets much better after chapter 20, where you can recruit guild members to unlock more benefits, seek out construction sites for new Guild Towers, and pursue a number of goals in any order.
* The Alliance Alive. The game case also has a reversible cover that has a tabletop game on the flip side.
* The alliance also wanted to make a Caterham-branded subcompact and small crossover in order to get more appeal in the Asian markets. These vehicles never went further than the general idea.
* The Alliance cruisers in the series were designed to avoid this. The result is a ship consisting of four large vertical towers, with fighters and other craft launching upside-down off a flight deck at the "bottom" of the ship. It looked more like a mobile city than a ship. The smaller warships that appeared in
* The Alliance expedition is not a proper example — last we saw them they were in a position to survive for a while longer (Burning Crusade just retconned them to not leaving Draenor after all), it's just that they were presumed dead
* The Alliance has N7 operatives, which are basically the futuristic equivalent of Navy SEALS or the SAS.
* The Alliance is discovered many decades later, and he helps turn the tide and bring the war to an end.
* The Alliance of German States is more downplayed. The AGS is still a cohesive polity and lays claim to all the territory of modern-day Germany, but the central government of the AGS is significantly weaker than that of the Bundesrepublik that preceeded it, and acts more as a mediator in conflicts between the states and co-ordinator of the armed forces than a central government.
* The Alliance of Magicians that Gob is blacklisted from (despite actually being its founder) in

* The alliance of the Straw Hats, Law, and the soon-to-be-members of the Straw Hat Grand Fleet brings down the entire Donquixote Family in a day. The citizens — who lived under Doflamingo's rule for
* The Alliance or indiscriminately bombard planetary targets without regard for the safety of noncombatants goes a long way towards helping the Alliance win.
* The Alliance's ambassador to the blood elves (before they joined the Horde) was a dwarf, which you would think was an intentional aversion of this trope. Turns out, he was investigating things where he didn't belong and handing off blueprints of arcane sanctums to the night elves hiding in the area.
* The Alliance says that was an accident. The only overtly and intentional political messaging in the whole show is feminist undertones that are a cornerstone of Joss Whedon's work.
* The Alliance themselves got in on the action using Shepard's likeness to advertise joining their military, however, it apparently fell through by the time Shep came back.
* The Alliance: This will typically either replace or include the Good Kingdom. Once the villain makes itself known, the good nations of the world will band together in an alliance to defend themselves.
* The Alliance: When two or more countries agree to team together against common enemies.
* The Allied campaign also features the paradrop power on some maps, but it's removed in skirmish games.
* The Allied campaign culminates in the Allies doing this on a national scale — want to end the war without having the slog all the way to Moscow like last time? Use one of your new upgraded Chronospheres (set up in the right location) to transport an entire army directly to Moscow and capture the Kremlin before reinforcements arrive or the Soviet premier gets away.
* The Allied Occult Initiative, a joint operation by the Allies to counter the Axis' occult efforts. It was eventually dissolved after the war when the Western powers and Soviets went their separate ways.
* The Allied Powers seem only moments from tearing each other's throats out, even the ones that should have a lot in common (like America and England). This is
* The Allied Space Marines in John Ringo and Travis Taylor's "Vorpal Blade" Series. Their modular Wyvern armor doubles as space suits. It also incorporates a chameleon coating, and a full sensor suite, including particle sensors, which they are required to be able to understand.
* The allies also have a Cryoshot abilities, which does the same thing in a small area. Both effects deal no damage on their own but make the frozen targets more vulnerable to attacks (even buildings).
* The Allies have the Century Bomber, which can load a group of infantry and then drop them at a selected location; the Soviets have the Bullfrog, which launches infantry (or
* The Allies's Chronosphere was based on the legend/myth of the Philadelphia Experiment from the second World War, which was an experiment to attempt to create cloaking technology that twisted space and time enough to make the ship "teleport" back and forth between the docks of two different countries, which caused some of the crew to burn up, fuse with the ship's hull, or plain disappear. According to the original lore the remaining surivors went insane after the experience.
* The Alligator People has... well, a man whose genes got mixed with an alligator due to radiation.
* The Alligator People starts with nurse Marvin being put under hypnosis, and recounting her past forgotten identity as Mrs. Webber searching for her disappeared husband.
* The all-male fan club that worships a pretty nurse on the Nautilus, in
* The Allman Brothers Band band, improvisation was a major element of their sound, and lead guitarist Duane Allman listed John Coltrane and Miles Davis as two of his biggest influences. Drummer Jai Johanny Johanson also had a background in jazz (in fact, he was the one who introduced Duane to Coltrane and Davis).
* The Allman Brothers Band, "Ramblin' Man." "When it's time for leavin', I hope

you'll understand..."
* The Allman Brothers Band was aptly titled for a session that was marked by constant fighting amongst the band. It had started with Gregg Allman missing the first day and the other band members, all as coked up as he was, angrily confronting him over his commitment to the band in the face of a solo project (Dicky Betts was one to talk about that, as he had his own solo project beckoning). Eventually, it got to the point where the producers had to put together the last, and universally reviled as the worst album of the band's original run, from whatever jams the band did do together early in the session and those parts that individual members could get done themselves later on (even still, rumor has it that the producers had to do some of the rhythm parts themselves).
* The All-New Atom's between tiny alien civilization the Waiting and ancient magic god M'nagalah.
* The All-New Mickey Mouse Club; there was a recurring serial that served as a teen drama spoof called "Emerald Cove".
* The All-New Popeye Hour, is basically an updated remake of "Floor Flusher".
* The All New Superfriends had an explicit version of this in the Wonder Twins solo adventures. Most stories were titled with some unacceptable teenage activity like "Drag Race" or "Hitchhiking," which featured teenagers engaged in it at the protest of their sensible friends who are forced to alert the Wonder Twins to deal with the problem. Sure enough, the offending teenagers soon find themselves in deadly peril as a direct result of their misbehaviour and have to be rescued by the Twins.
* The All Night Express, Kenny King and Rhett Titus, wore hooded sweat shirts that had their torsos exposed on
* The All-Out Attack. Technologically superior forces aim their weapons of war and
* The Alloy of Law, as firearms have become commonplace, and Coinshots are possibly the only Mistings who can reliably deflect bullets (Lurchers, who have the opposite ability, generally pull bullets toward a metal plate carried on their chest).
* The Alloy of Law can create a bubble around himself where time moves much more quickly than it does for the rest of the world. He often uses it in combat to create a flash step effect in order to dodge bullets; he throws up a bubble as the opponent shoots, then just walks out of the path of the bullets. From an outside point of view it looks like a flash step even though he's moving at perfectly ordinary speeds from his point of view.
* The Alloy of Law includes a gunfight atop a moving train, which continues despite the protagonist being thrown off the top (he uses magic to save himself).
* The 'Allspark Almanac' even calls Lockdown's 'Fistful of Dollars' getup a 'space poncho'. Not kidding.
* The Allspark Almanac have been published. It is comprised of almost entirely Word of God, including things like the name of the planet Sentinel, Optimus, and Elita visit in "Along came a Spider" (Archa-7); the name of Ultra Magnus' hammer (The Stormbringer); what Meltdown's creatures were before they were mutated (his lawyer and stock broker); and the name of his company (Biotech Unbound).
* the Allspark, which the Autobots are searching for to bring life back to their world, is destroyed in order to kill Megatron, leaving Cybertron doomed to be barren forever. Optimus Prime, upon Bumblebee's suggestion, sends out a signal suggesting Earth as a new home for any Autobots scattered amongst the stars.
* The Alltel Wireless commercials have a similar problem. The audience is supposed to like Chad, even when he doesn't lift a finger to stop his supporters from doing terrible things to the avatars of the other companies. Besides that, Chad adopts a
* the All those who survive this absurdly brutal process are apparently rewarded with operational deployments.
* The Almighty Dollar: Egyptian, Hindu, and Mesopotamian mythology all feature deities associated with wealth and fortune, or inversions, being deities of misfortune or poverty.
* The Almighty Dollar: God(s) of wealth, money, trade, prosperity/abundance, or fortune/luck.
* The Almighty Johnsons, Anders doesn't tell Mike and Axl about his excuse before their meeting with Axl's teacher about the attendance issue.

* The Almighty Johnsons, and his girlfriend won't let him break the theme. Or rather, she knows it's not worth trying; her mother caused the whole thing as the Goddess of Parties, and trying to fight the party simply doesn't work.
* The Almighty Johnsons, a show about Norse gods hiding in New Zealand, had two:
* The Almighty Johnsons, a show about Norse gods secretly living in New Zealand, features several examples. Relationships between gods and goddesses tend to be volatile, though, so many of the pairings are brief.
* The Almighty Johnsons, destroying things and people with fire is one of Loki's favored tactics.
* The Almighty Johnsons do some baking together in only aprons only while waiting for the Gar in the "The End of the World As We Know It" episode.
* The Almighty Johnsons. It's revealed that at least some of them stayed home in Norway, but all of the main characters are Kiwis.
* The Almighty Johnsons of this. Anders (aka Bragi, the god of poetry) may be the most prominent example, with a non-stop stream of women unable to resist his seductive powers, but all the gods (and goddesses) are pretty randy. Even Ty (who is Hod, the god of cold and darkness) manages to find a girlfriend, and then ends up marrying someone else (at least temporarily). There's plenty of god/goddess-on-mortal action and god-on-god action throughout the whole show.
* The Almighty Johnsons, the entire Johnson family are reincarnations of Norse gods but only have limited godly powers and thus live a normal human life span. The one exception is Olaf, who is the god of rebirth and thus will stay young forever and cannot die of natural causes. The current generation of Johnsons are actually his grandchildren and he pretends that he is their wayward cousin. By his count he fathered 20 children so far and had to abandon them and their mothers when it became too apparent that he did not age. These days he no longer tries to have a long-lasting romantic relationship.
* The Almighty Johnsons, the Norse God of Skill, Hunt and Duel, powers manifest like this. If he can get the other party ti agree even tangibly to any form of competition (even a fight if he words it correctly) he's utterly invincible (it only applies to competitions he person personally participates, thus has no power other activities like horse racing) even if he wants to lose it will end in his favour. Mike likewise struggles with addiction to gambling, specifically as he knows he can't lose, he has a habit of getting extremely antagonist and cocky during the games often angering his opponents (it's implied this coupled with him betting often against unsavoury and likely to be violent individuals is a subconscious manifestation of his guilt at knowing he's cheating).
* The Almighty Johnsons the Norse gods are greatly reduced in power and have moved to New Zealand. They can and do die, but then the god-spirit simply moves on to another descendant. Over the years since the original migration, the descendants of the gods (who are also incarnations of the gods) have lost track of each other, in part because gods (and goddesses) don't generally like each other very much.
* The Almighty Johnsons: Ty and Eva's marriage is characterized by violent sex and sexualized violence. According to Agnetha and Olaf, this is standard for a relationship between deities.
* The Almighty Johnsons. What seems like a simple cold ends up almost killing him and all the other gods lose their powers while he is ill.
* The almighty judge of all reality threatens to torment Shawn, a head demon, by taping his eyes open and make him watch videos of soldiers returning home and being reunited with their dogs.
* The Al'miraj is the most well-known of the rabbit monsters. Appearing as a rabbit with a
* The almost completely digital dashboards on many 1980s cars. Although they are making a comeback in the form of interactive LCD screens, they make the old dashboards look barren in comparison.
* The almost constant "Robot as Slave Uprising" motif is what inspired
* The almost kiss is a running gag with Barney and Robin—they nearly kiss during Punchy's wedding, and again during "Splitsville," interrupted by a badly timed phone call each time.

* The Almost People in that the Flesh, adaptive as it was, could easily rearrange itself to create a different vocal pattern.
* The Almost People": The holo-call, though there is a lot of interference anyway (the hologram only really gets through because the plot wants it to).
* The Almost People" utters a few catchphrases of previous Doctors, in their original voices. He also gets them a bit confused.
* "The Almost People" with the 11th Doctor and "11.5", a clone created from sentient goo. They both have all the same memories and thought processes, leading to them almost always finishing the other one's sentences and saying the same thing at the same time. They actually don't mind, but it annoys Amy.
* The "Almost Politically Correct Redneck" meme often goes this route by having the redneck make an open-minded statement that is quickly contradicted by a blatantly bigoted statement.
* The Alola games have Hapu and Gladion. Hapu's short height and proportions makes her look far younger than the protagonist, but trainers in Alola go on journeys at eleven and she has the vocabulary of someone at least eleven as well. Gladion is presumably 11-year old Lillie's older brother but their age gap isn't clarified. Lillie is slightly taller than Gladion and he's still a child, so the age difference isn't too large. Some fans even interpret them as
* The alpha baboon has the colorful face of a mandrill, something real baboons lack.
* The Alpha Beta fraternity and their associated sorority, Pi Delta Pi in
* The Alphabet Game, contestant Gary Grouch participates on the game show "Alphabet Treasure Hunt" because he wants to lose (being a grouch), but keeps getting points by accident (when he's supposed to bring in something that begins with the letter B, for example, he decides to trash the place and brings in a trash can, which he points out does NOT start with the letter B, but inside the can are bugs, which DO start with B).
* The Alphabet Killer combines suspense with conventional horror, as the protagonist is visited by the ghosts of the eponymous killer's victims.
* The Alphabet Killer deliberately made use of this trope to make the audience question who the killer might be by casting male actors who have played killers in other films.
* The Alphabet Killer investigation years ago, she finds that her ex-boyfriend/ex-partner is now Chief of Police, and thus her boss. This puts him in an extremely awkward position when the killer resurfaces, as no one knew more about the case than Paige did.
* The Alphabet Killer is based around someone who targets people with these sorts of names.
* The Alphabet Killer: It's unclear if Megan really sees ghosts, or is just schizophrenic as her doctors feel, with these being hallucinations.
* The Alphabet murders of Rochester, New York. From 1971 to 1973, three girls aged 10 to 11 were murdered in the vicinity of the city. The case got its name because it was noticed that each victim had an
* The Alphabet Mysteries was originally going to be named "N is for Knoxville."
* The Alphabet Story woman living in the 1800s, so her less-than-perfect reaction isn't unheard of.
* The Alpha Centauri: a matriarchical culture that is as close to 'pure' human as possible while still having an altered game mechanic.
* The Alpha Centauri (Rigil Kentaurus) system, consisting of a yellow and an orange dwarf, A and B. B is the somewhat smaller member of the duo. Additionally,
* "The Alpha Couple" is this all over. Even their inevitable, final reconciliation has threatening undertones:
* The Alpha Cygnans are an all-female race of fighter pilots. Most look like normal females from Earth, except for their captain, Napolitalita, and Spy D, who both look and sound
* The alpha female T-Rex made her brief, minor debut in Alpha Team: Mission Deep Freeze RPG. She was expanded upon and given much more character in Dino Attack RPG.
* The Alpha Flight Low-Earth Orbit Space Station, after Alpha Flight more or less

took over from SWORD in extraterrestrial diplomacy, which has been destroyed and rebuilt at least once.
* The Alpha Incident is about an alien microorganism that causes the brains of those it infects to quickly expand, to the point of making their heads crack open, if they fall asleep.
* The Alpha Lanterns seemed to lack sufficient failsafes. While their minds were linked to the Book of Oa to make sure they faithfully executed their duties as
* The Alpha Legion as well, after realizing how truly corruptive Chaos is, but also that not all aliens are threats. They know they're the Legion of Dirty Business, and they accept that, for nobody else in the Imperium wants to do their job.
* The Alpha Legion served this role during the Great Crusade, created and operating in secrecy for specialised stealth missions like assassination, sabotage, espionage and recovery of important artifacts and persons. Often they wore black power armour bearing no insignia, and occasionally
* The Alpha Legion, which specializes in misdirection, uses surgery to make all its members look like its twin Primarchs, Alpharius and/or Omegon. The fact that the Primarchs were fifteen feet tall (as opposed to the regular
* the alpha male of this group of alpha males. The actor actually chose to play the scene completely (and quite obviously) nude, to give it a different impact and energy.
* The Alpha-Omega bomb, was lauded as a return to form for the series.
* The Alphas. College kids turned werewolves, dealing with the troubles of young adulthood by day, wolf-shaped vigilantes by night.
* The Alpha twins Aiden and Ethan who work for Deucalion have the ability to
* The Alpine Weta from New Zealand anybody? (Where do you think Weta Digital got their name?) freezes into a block of ice, comes the spring...
* The already mentioned Martian Manhunter keeps his love of Choco cookies.
* The already mysterious John Chacon, the voice actor for Gabe Logan in the first three
* The also comes into play even earlier with the fantasy game, the recreational computer game that the students play. Ender not only
* The also introduce a previous character of his (Clara Sryker) specifically when they introduce the exgirlfriend she's based on. Really, the only character mentioned on the show who
* The Also People, a pair of future police officers discuss what approach to take to a suspect, considering several variants that are standard in their time before settling on "standard Aristocracy drill: Good Cop, Downright Sycophantic Cop".
* The Also People at the start at of the chapters are all lines from fictional songs, including Silurian rock, Hith rap, 25th century human folk music, and Cyberman blues.
* The Also People features a benign but Machiavellian supercomputer named 'God' by the People who created it as a joke. It has a fondness for making yellow party dip that no-one is brave enough to try.
* The Also People, the Doctor claims that he once attempted the universe record for continuous spoon-playing, but was sabotaged by a telekinetic who kept bending his instruments.
* The also unnamed KGB colonel who set the Kremlin bomb - he later goes on to
* The Altar of Ancient Kings is a powerful magitech device, also run off of souls (though in this case, the souls are willing). Other magitech devices include arcane constructs (used by the Draenei, Blood Elves and Nightbourne), masks animated by the spirits of dead trolls, shamanic totems, teleporter pads, and the mail system (which explains how you can get mail on different planets). There are also the brooms in Silvermoon.
* The Alteans have names that focus on the 'lle' or 'or' syllables, such as Allura and Romelle (female) and Bandor and Coran (male)
* The altered (or "processed") Ood's translation devices light up when they speak.
* The Alteriens in their true form are like this with their pointed ears, somewhat larger than normal heads and eyes for their respective builds and lack of eyebrows.

Additionally, the only hair on their entire bodies is from their heads. They were modeled after the Sisters of Orion and other similar Shanda'ryn hybrids.
* The Alteriens, themselves, also assumed this role with their many voyages to Earth's past.
* The Alternate and Bryan Genesse, both Roberts' wife Erica and Genesse's wife Brooke appear.
* The alternate crew created by a time travel incident, thought to have been killed, actually landed on a planet a thousand years in the past. They were just as much "them" as the crew that remained on the ship (of whom they were unaware), and although they didn't know they'd traveled back in time, Eli theorized it was possible that they had. The "real" crew go to see their alternate lives play out in "episodes" captured by the Kinos. Had the show gone onto a third season, it's likely that their descendants would have weaved in and out of the main story.
* The alternate dimension of Jade appears to have an Arrogant Kung Fu Guy-based economy and be governed by an Arrogant-Kung-Fu-Guy-ocracy.
* The alternate ending of the last episode ends with snippets of Ted's own, long-awaited, wedding.
* The Alternate Ending, which depicts what would happen if Megas had been able to counterattack Suika instead of dodging her final strike,
* The alternate interpretation, encouraged by the author's note, is that this world is a dystopia, and allowing free sex is a way to distract people from complaining against the power.
* The alternate interpretation on how gangsta rap died is that it suffered from biased
* the alternate John who Terezi tricked into flying to his death. His death led to the Dave in his timeline going back and becoming Davesprite, but after that he was completely forgotten until dead Vriska meets him with a dream bubble, and thinking he's "her" John, takes him on a tour/date.
* The alternate life the characters would have had if Ragyo didn't use her children to test the Life Fibers and abuse them or, alternatively, if the Life Fibers haven't existed.
* The alternate Olivia actually has to fake things based only on files and a very thorough briefing. She masks her slip ups as "trying new things". Peter starts getting suspicious, but is distracted by them becoming a couple. Liv is a wee bit miffed when she gets back.
* The alternate opening from the extended cut shows that most people wear masks while walking outside. There is also a mention on how a species of tiger, which has been extinct outside of captivity, is making a comeback thanks to cloning.
* The alternate timeline battle between God-Tier Vriska and Jack Noir is only alluded to, with Doc Scratch saying it would be epic enough to devote multiple animated segments to... but he's not going to show it because it's largely irrelevant to the main plot. The comic's commentary by Hussie admits that originally he was going to show the battle, but it kept growing in scope and scale and eventually he had to admit that it was just too much for him to do justice to, and gave up.
* The alternate timeline created in the Season 3 episode "The Wish" is a vampire variant.
* The alternate timeline in which Merida finds herself in the final installment of the
* The alternate timeline of the series was caused by a succesful attempt on Albert Einstein's part to
* The alternate titles for the segments of the main cartoon were, quite often,
* The alternate-universe Cybermen in the new series represent materialistic technophilia. Their
* The alternate universe, somewhat more benevolent, version of Nicholas Flamel was used in the first
* The alternate version of "Mind's Eye (True)" is "Mind's Eye (False)". While it confers similar abilities as the (True) version,
* The alternate versions of the ancestors introduced in Act 6 tend to be similar

to their counterparts among the playable trolls... mainly because Andrew Hussie based most of them off fan stereotypes unless he had a better idea for what they should be like, so Cronus
* The alternate world Edolas shows humans in reverence to the cat-like Exceeds, who have god-like power to choose which humans can die.
* The alternating was no coincidence: the series usually offered two-episode stories, with the first having a cold open, the second reminding the viewer of what happened last week in the same story.
* The Alternative Cure Magical Girl Behoimi Chan, where she is an actual magical girl.
* The alternative is if a contestant hits a Whammy on his or her last spin when his or her opponents have $0; unless one of the contestants has "Whammied out", then the game is declared a three-way tie and all three contestants return the next day.
* The alternative isn't much better. When a l'Cie completes their Focus, their body is instantly transformed into a human-shaped crystal. It's little wonder that the humans in the
* The alternative theory (which the RSC theatrical adaptation implies) is that he's become so oblivious to Guinevere as a person he barely notices what she's doing most of the time.
* The Alternative Universe is further explored in Seasons 3 and 4, as both universes first suspect each other of trying to destroy the other and then team up to fight a common enemy. Two possible futures of the Prime Universe incorporated similar conditions as the Alternate Universe, in keeping with the idea that the evolution and decay of the Alternate Universe was slightly ahead of the Prime Universe. The show conveniently applied a red/blue color scheme to differentiate the "Red-Verse" and "Blue-Verse." The most prominent difference is the color of the Statue of Liberty: green in Prime and bronze in Alternate. This was frequently used to show which universe was being shown.
* The Alternet (written in 1863, though not published until 1994), banks communicate via a linked network of fax-style document machines.
* The Altmer (High Elves) take the cake as the haughtiest culture in Tamriel. They are indeed responsible for much of Tamriel's art, science, philosophy, language, and religion, and (while there are exceptions)
* The Altos, as with many Murder Mysteries, everyone has motive and opportunity for killing the deceased.
* The Altos, the first hitman is shot, and attempts to give up his employer, but keeps getting interrupted by members of the family as they embark on the musical number, "Come Clean".
* The Alucard Shield, when used with the Shield Rod, becomes the strongest weapon in the game. If you put the Alucard Shield and the Shield Rod in each hand, press both buttons at the same time, and you can drain enemies' life away just by touching them with the shield.
* The Alvin Show, Alvin buys a bunch of balloons and hands them to Dave, sending him floating away to the sky.
* The Alvin Show and David ends up floating away. Cue the signature scream, rapid zooming in, and echo.
* The Alvin Show: Clyde Crashcup "invents" baseball, starting with a haphazardly designed diamond. He has the ball, and Leonardo (his assistant) has the bat. Clyde's first instruction: "Pitch the bat!" Leonardo does, and knocks Clyde on his back. "Perfect."
* The Alvin Show, Dave and the Chipmunks have to share a bed since "Chesley Estate" only had one bed.
* The Alvin Show had Alvin dividing his time between babysitting a neighbor's toddler and playing a baseball game. A Clyde Crashcup segment of the show had Clyde "inventing" the sport.
* The Alvin Show has Alvin keep doing this to Dave to get him out of the garage so the Chipmunks can play in there for their "Git Along Little Doggies" number. The fourth time Alvin attempts it, Dave opens the door before he can ring the bell.

* The Alvin Show has Alvin, Simon and Theodore singing it in French. Then this occurs:
* The Alvin Show is a definitive example, claiming to have invented inventions that already existed, or being the first to discover things already discovered.
* The Alvin Show: Leonardo, Clyde Crashcup's pint-sized assistant, never speaks out loud. He usually just whispers to Clyde.
* The Alvin Show Leonardo, tried to invent the chair, baseball, jokes, the bed and dozens of other things, and seldom got it right.
* The Alvin Show: One episode has Dave Seville bent out of shape because Theodore's and Simon's beds and bedroom area are in disarray and junk-strewn. Alvin's is conspicuously and shockingly neat and tidy. That's because he shoved all his junk and toys in the closet, which Dave eventually opens.
* The Alvin Show") who look somewhat different from the "A Chipmunk Christmas" version.
* The Alwans, a race of flightless omnivorous birds, have several populations, but the most prominent, nicknamed "Roosters" by the humans, has no concept of large-scale violence (outside of hunting game): interpersonal violence is extremely rare because the Roosters have evolved to settle disputes by dominance displays, and are greatly disturbed when the
* The Alzheimer's Case, as aging hitman Angelo Ledda is asked to do one last job before he hangs up his guns for good.
* The Alzheimer's Case: The hitman Ledda is portrayed this way on the movie posters, with the cops in the foreground.
* The Amalekites were a culture of bandits who followed behind the Israelites during the whole "forty years wandering the desert" thing and picked off the children and elderly
* The Amalgam'Verse veteran who was propped up by the government and propaganda offices as such for his spectacular service and it earned him the rank of High Marshall. The concept is brutally deconstructed as the cushy command rank is meant to keep him out of the action he craves, he feels a mountain of guilt for all the youths who enlisted because of his image, and absolutely loathes the reputation it got him because of the blind hero-worship many give him.
* The Amanda Show about an entire family with this condition ("Hold this for a second."/"All right. One-Mississippi." *drop*). Naturally, they were named "The Literals."
* The Amanda Show, Amanda and Nancy Sullivan were embarrassed to find out they were wearing the same dress to the show, as were Drake, Josh, the Camera men and the Dancing Lobsters.
* The Amanda Show, Amanda is on a date with a boy who has a large pimple on his forehead. She has a disturbing claymation fantasy about chiseling it off of his face, and it becomes sentient; she fights it, and then falls in love with it.
* The Amanda Show, Amanda is on a date with a boy who has a large pimple on his forehead. She has a disturbing claymation fantasy about chiselling it off of his face, and it becomes sentient; she fights it and then falls in love with it.
* The Amanda Show as she did to everyone who bothered her, and Debbie asking if she could do it this time instead... only for the other girls to open the stall door and find them passionately making out.
* The Amanda Show birthday special, Amber received one of these as a birthday gift from Tammy.
* The Amanda Show, Courtney had a doll replica of herself that could scream, "MA-HA!"
* The Amanda Show did this for each of its "When _____s Attack!" sketches; for example: "1 (500) I-Just-Saw-the-Brady-Bunch-Attack-Some-Person-and-Now-I'm-Calling-This-Number-to-Report-What-I-Saw".
* The Amanda Show (Drake Bell) and his lackey (Josh Peck). Josh would frequently say or do something stupid, get hit and ask, "What was that for?!" To which Tony would reply, "For bein' an idiot!" which Josh would accept with an "Okay."
* The Amanda Show, Drake loses a bet to Amanda and has to run down the street in a string bikini.

* The Amanda Show, etc.). They would watch the clips of people being attacked and then at the end the subject would attack the newscaster.
* The Amanda Show featured a sketch about a superhero called The Procrastinator.
* The Amanda Show had an episode which contained a joke about a man exploding on stage in one sketch and a house being crushed by a meteor in another sketch. This episode was banned following the 9/11 terror attacks.
* The Amanda Show had a security guard refusing to let somebody in when offered diamonds or cash... but he let them in for a slice of pizza.
* The Amanda Show had a short sketch of a girl prank calling someone called Mr Oldman. The calls consist of her saying a bunch of random stuff to mess with his head, before asking him to do something ridiculous for an extended period (while still on the phone). The shorts usually end with Mr. Oldman complying with her orders, all while periodically screaming "YOU HAVE THE WRONG NUMBER!"
* The Amanda Show had Penelope Taynt (played by Amanda, herself), a nerdy fangirl and webmistress of her own Amanda fan site (which actually exists!).
* The Amanda Show has a lot of these to end Amanda's closing monologue. Including such gems as: "I gotta go water my lobsters!" "I have to go alphabetize my sister!" and "I have to go bodyslam my grandmother."
* The Amanda Show has created backstage. The hole goes all the way to a family's house in Beijing, China, which means that Barney must have passed through the center of the Earth itself—but his only response is to get up, ask for his location, and, noticing the family having lunch, say "Whatcha eatin'?"
* The Amanda Show: One skit shows Drake and Josh quarreling, and getting into a physical fight, over the last piece of some jumbo shrimp.
* The Amanda Show parody with extremely easy questions that the contestants (the other recurring characters on the show) never get right. The host frequently gets fed up and asks who even picked the contestants.
* The Amanda Show Penelope's younger brother Preston is a male version of her with slightly shorter hair.
* The Amanda Show, Procrastinator's mother tells her about a package she got from her arch enemy and that it is ticking. After telling her mother she would deal with it "eventually!", the package explodes, covering both of them in ash.
* The Amanda Show professional singers who sing very rude and personal songs) once took place at a wedding where there was a blonde and pretty bride with her neanderthal-esque groom; they decide to sing this ditty:
* The Amanda Show, screen transitions were an animated character that looked like Amanda literally wiping the screen away to the new one.
* The Amanda Show that he doesn't even know who the real Moody is since the show was cancelled before he could write the script.
* The Amanda Show, when Trudy would rule in favor of the child plaintiff and sentence the hapless adult defendant to something odd, which the bailiff would immediately carry out.
* The Amanda Show. While it was certainly well-written and funny, it would take up most of the show.
* The Amanda Show, who's obsessed with Amanda (and is played by Amanda).
* The Ama-no-Murakumo-no-Tsurugi (Sword of the Gathering Clouds of Heaven) from Japanese myth. Better known by the less cool name
* The Amaris Civil War ends up as one for the SLDF. Even though they won, Kerensky's forces were so savaged as to be almost impotent to keep the Successor States from ultimately carving up the Terran Hegemony (the central state of the Star League) amongst themselves, launching the First Succession War. In the end, Kerensky
* The Amarr are closely modeled on the medieval Catholic Church... combined with the slavery of the pre-Civil War American South.
* The Amarr Empire is a space-faring version of Renaissance-era Spain. Their
* The Amarrian legion, in all its forms, will even reflect the environment around it.
* The Amateur (1981). The fiancee of a cryptographer is murdered by terrorists, so he blackmails the CIA into letting him go into Czechoslovakia to kill those

responsible. Just as he crosses the border, the CIA discover where he's hidden the files, so he's hunted by both sides.
* The Amateur by Robert Littell. The protagonist overhears his superior at the CIA talking of how he threw dogs off the scent during World War 2 by urinating into the snow, and later uses this when being tracked by dogs inside Communist Czechoslovakia.
* The amateur can often be seen beating "veterans" of the game. (Also see
* The Amateur for training in assassination techniques. At the end of the appropriate montage that cuts between the CIA searching everywhere he might have hidden the files and the protagonist training, he tells the CIA to stop screwing around and send him in as he's never going to pass the course anyway.
* The Amateur took place in 1972 (i.e. a terrorist victim's gravestone reads 1972).
* The Amazing Adrenalini Brothers: The eponymous brothers hail from Réndøosîa, speaking constantly in its gibberish-sounding language. The country is noted for its constant natural disasters (to the point where the flag always has a hole in it) and being constantly at war with its neighbor Grimzimistan.
* The Amazing Adventures of Chilly Billy is about a tiny little man (and his equally small friends) who live in a refrigerator.
* The Amazing Adventures of Kavalier and Clay from the '40s through the present, with explanatory articles by real important figures in the comic book world, about the series' various publishers, and its place in the changing trends and values in the history of comics.
* The Amazing Adventures of Kavalier and Clay get married in 1941 for a double-purpose: Rosa is pregnant by another man, who had then run off (for an unrelated reason), and so needs a husband, and Sammy is secretly gay.
* The Amazing Adventures of Kavalier and Clay in a New York City setting where it makes sense.
* The Amazing Adventures of Kavalier and Clay, known gay character Sammy Clay encounters radio actor Tracy Bacon who is described as "well over six feet tall, broad-shouldered, with a dimple in his chin and glossy blond hair" with "distinctly visible" muscles. While Sammy's attraction to Bacon is not a revelation to himself nor the reader, it does open the closet doors to Sammy's family; Sammy's mother knows after one dinner with them that their interest is romantic, even before Sammy himself notices.
* The Amazing Adventures of Kavalier and Clay. Later, before dying of the gunshot, Max revealed to Tom that he worked for The League of the Golden Key, an organization that worked to liberate people who have been enslaved or wrongly imprisoned. His killer was a member of an international slave ring called the Iron Chain. With Max's death, Tom took his place in the League, forging the identity of the Escapist.
* The Amazing Adventures of Kavalier and Clay, most people are unaware that handsome film actor Tracy Bacon is gay. Clay is also a closeted gay man himself.
* The Amazing Adventures of Kavalier and Clay of Prague, which has been disguised as an unusually large corpse.
* The Amazing Adventures of Kavalier and Clay (one of the two main characters is gay and deals with 1940s and 50s homophobia, though he also has a brief romance)
* The Amazing Adventures of Kavalier and Clay, Rosa Sax is described like this in promotional materials and is introduced in a similar manner, but otherwise doesn't act the MPDG at all.
* The Amazing Adventures of Spider-Man, a brown trenchcoat was added onto Doctor Octopus' design.
* The Amazing Adventures of Spider-Man, after the titular hero has webbed up all the villains, he delivers one.
* The Amazing Adventures of Spider-Man, a news reporter is shown getting footage of the Sinister Syndicate stealing the Statue of Liberty, before Doctor Octopus attacks and the broadcast abruptly ends.
* The Amazing Adventures of Spider-Man as they plummet down into the sewers while escaping the villains.

* The Amazing Adventures of Spider-Man, Doctor Octopus and the Sinister Syndicate, with the aid of a levitation gun, steal the Statue of Liberty. They state that unless NYC surrenders themselves to them, they will destroy it. This thus propels forth the ride's storyline.
* The Amazing Adventures of Spider-Man him or merely incapacitated him for a time.
* The Amazing Adventures of Spider-Man, Hydro-Man rises up behind Spider-Man while he's talking to the riders.
* The Amazing Adventures of Spider-Man is to steal the Statue of Liberty and threaten to destroy it unless New York City surrenders themselves to them.
* The Amazing Adventures of Spider-Man, Ned Leeds is the Hobgoblin; who in the comics was merely brainwashed into temporarily becoming the villain, whereas here he appears to be all-evil.
* The Amazing Adventures of Spider-Man, Scream is the only female member of the Sinister Syndicate.
* The Amazing Adventures of Spider-Man, several wanted posters for the Sinister Syndicate can be seen in the opening scene.
* The Amazing Adventures of Spider-Man, Spider-Man battles the Sinister Syndicate on top of several buildings.
* The Amazing Adventures of Spider-Man, the riders are sent plummeting off a building, only to be saved right at the last second by Spider-Man and Bumblebee, respectively.
* The Amazing Adventures of Spider-Man, the riders just so happen to crash into the exact warehouse the Sinister Syndicate is hiding out in, despite there being no hints given to its location beforehand.
* The Amazing Adventures of Spider-Man, the riders nearly get themselves killed multiple times by the Sinister Syndicate, leaving Spider-Man to save them again and again.
* The Amazing Adventures of Spider-Man, the Sinister Syndicate cuts off all the TV signals in the city to broadcast their demands for New York to surrender, with Hobgoblin even saying, "We interrupt this program to give you a special report!..."
* The Amazing Adventures of Spider-Man, the titular hero defeats both Doctor Octopus and Scream with a simple punch and kick.
* The Amazing Adventures of Spider-Man where you come across a movie theater that has a phone number on its marquee. If you dial it, you'll get a message saying that the theater is closed until Spider-Man can make the city safe again.
* The Amazing Adventures of Spider-Man, who always makes it joyfully clear to everyone that he has electricity powers.
* The Amazing Adventures of Spider-Man, with the takeover of New York City being his first step.
* The Amazing Adventures of the Escapist doesn't feature the Escapist at all, but rather his Empire Comics stablemate Mr. Machine Gun. Mr. Machine Gun has a cybernetic hand that can turn into a powerful submachine gun, magazine included — and he's a hero.
* The Amazing Adventures of the Living Corpse: These are the basic shambling flesh-eaters, created by a serum and requiring brains to live. They usually have no semblance of their former selves, but sometimes their souls reawaken. Also, they last far longer the fresher the corpse.
* The Amazing Atheist get for Christmas. He expresses extreme disgust for them.
* The Amazing Atheist well hidden, he does seem to care about injustice and often rants about bad people.
* The Amazing Atheist" where his character Josh Moronstein uses the same line of logic as Feuerstein to "disprove" that gravity is real using a helium-filled balloon.
* The Amazing Book Is Not On Fire vloggers and that their respective channels are called TheAmazingPhil and DanIsNotOnFire.
* The Amazing Bulk (literal chunks of the movie were done using stock effects found on the Internet, most infamously a lengthy chase sequence near the end), nor about the extreme inconsistencies in tone or constantly echoing audio.
* The Amazing Chan and the Chan Clan #4 story "Eye Of The Idol" (February 1974) had

the family searching for the titular missing gem. Suspecting that maybe the culprit mailed it, Mimi tosses Scooter in a mail kiosk to look for it.
* The Amazing Chan and the Chan Clan; Alan of the mechanical sort, Tom of the intellectual sort.
* The Amazing Chan and the Chan Clan, and Flip says it in the following episode.
* The Amazing Chan and the Chan Clan. Anne the tomboy has to put up with "just a girl" comments from her brothers now and then, but it's clear they're just busting her chops and at the end of the day think of her as their equal.
* The Amazing Chan and the Chan Clan, but every now and then she slides into this territory (ex. chiding the kids for spying on Pop in ep 1, mediating a potential argument between Tom and Alan in ep 8).
* The Amazing Chan and the Chan Clan by this trope, to the point where his siblings have commented more than once about how they wished he'd speak English. Also in "The Greek Caper", Tom was about to offer his suggestion on how to search for missing statue and was gently told by Alan to "keep it simple". Henry lampshades this in the comic book adaptation of "To Catch A Pitcher":
* The Amazing Chan and the Chan Clan, Chu-Chu the dog has hearts coming out of his eyes for a magician's poodle assistant Fifi.
* The Amazing Chan and the Chan Clan completely averts this. Chan himself speaks good English with just a hint of Oriental flavor. His ten kids speak perfectly clear English (Henry, the eldest has a noticeable Oriental twang in his voice but otherwise perfectly understandable).
* The Amazing Chan and the Chan Clan episode "The Greek Caper" when she, Alan, Tom and Suzie are being chased by a masked stranger in a museum and disguise themselves as statues. Alan tries to stifle it with his finger and it works...for about half a second.
* The Amazing Chan and the Chan Clan episode "The Greek Caper" when they, Tom and Suzie are being chased by a masked stranger in a museum and disguise themselves as statues. It works... for about half a second.
* The Amazing Chan and the Chan Clan, every episode. Usually the same teams but every now and then they mix it up.
* The Amazing Chan and the Chan Clan films (it was tailored more to fit Hanna-Barbera's "meddling kids" genre that was so popular in the 1970s). Though it did feature Keye Luke from the Oland films as the voice of Mr. Chan.
* The Amazing Chan and the Chan Clan had four volumes published by Gold Key and drawn by Warren Tufts. They were adaptations of episodes 1, 2, 3, 5 and 11 plus a new adventure not seen in the cartoon.
* The Amazing Chan and the Chan Clan. He acts responsible for Mimi, Nancy and Scooter when they're out on the case, and is quite a cute kid.
* The Amazing Chan and the Chan Clan, he'll start barking or chewing on someone's pant legs to get their attention and they'll respond with "This isn't playtime, Chu-Chu." Fortunately, the kids catch on pretty fast, saving the use of this trope from being a more annoying instance.
* The Amazing Chan and the Chan Clan. He pulls it off quite well, too.
* The Amazing Chan and the Chan Clan is an obvious example, but sometimes Henry acts as this when there's more than just him and Stanley in a group.
* The Amazing Chan and the Chan Clan places the older kids in their teens and Flip in his preteens. Only the three youngest are given actual ages in canon.
* The Amazing Chan and the Chan Clan programmed the iconic Chan Van to be able to transform into just about anything. Even a dynamite truck.
* The Amazing Chan and the Chan Clan. Stanley also does this a few times to Henry (who, strangely enough, doesn't seem to take issue with it despite having limited patience with his brother).
* The Amazing Chan and the Chan Clan try their hardest, and are usually the ones who get the ball rolling, but it's always their dad who ends up solving the mystery in the end.
* The Amazing Chan and the Chan Clan: "You're not old enough, Scooter."
* The Amazing Colossal Man, and it came out in 1957, the year before the trope-namer.

* The Amazing Days of Abby Hayes but isn't satisfied because she didn't get the title role.
* (The Amazing Exploits Of) The Clutching Hand (Weiss Productions, 1936): Noteworthy as the last theatrical adaptation of pulp character Craig Kennedy, Science Detective (or Super Detective, as he's referred to herein), and based upon the final novel featuring same.
* The Amazing Extraordinary Friends, Ben has no idea how the Captain X insignia works and spends a lot of time trying to figure out how to control his powers (and occasionally discovering powers he did not know he had).
* The Amazing Extraordinary Friends called Ice. Flashbacks occasionally show her in action as Blaze.
* The Amazing Extraordinary Friends episode "Quality Time", Renfield hires the 'world's greatest super assassins' (the Invisible Ninja, Captain Tardy, Geyser Girl, and the Easter Bunny) to eliminate the Friends.
* The Amazing Extraordinary Friends: General Quarters in "Attack of the Atomic Bombshell", who sees nothing wrong with planning to nuke City Central to stop the Bombshell. Leads to this exchange:
* The Amazing Extraordinary Friends: In "Attack of the Atomic Bombshell", Ben tells his mother that he missed the parent-teacher evening because Roy was suffering from irritable bowel syndrome. They were actually out fighting crime as Captain X and Nitelite.
* The Amazing Extraordinary Friends: In "Revenge of The Wraith", the Wraith jumps of the the top of the cathedral carrying Vicki, gliding with his cloak. Ben, who has lost the insignia and does not have his powers, jumps after him and grabs hold. All three of them crash land in a pile of trash bags in the alley.
* The Amazing Extraordinary Friends into the 50-foot tall Atomic Bombshell when she gets angry.
* The Amazing Extraordinary Friends. Many of his jokes are actually pretty funny. It is a shame that he is also one of the most ruthless villains in the series, and doesn't care who gets hurt in his schemes, so long as the payoff is funny (to him).
* The Amazing Extraordinary Friends Renfield hired to take out Captain X in "Quality Time" turns out to be the Easter Bunny; a man in a rather sorry-looking rabbit costume.
* The Amazing Extraordinary Friends some of the time, his favourite jokes always result in people being injured or killed.
* The Amazing Extraordinary Friends, the Comedian—who is one of the more dangerous villains the heroes face, despite no having any powers—is a sadistic practical joker, among his many other villainous qualities.
* The Amazing Extraordinary Friends: The vigilante the Wraith carries knockout capsules with this effect.
* The Amazing Extraordinary Friends. When she was eventually thawed out, she had become the villainous Ice.
* The Amazing Flying Shooting Juan's greatest trick deserves some explanation:
* The Amazing Frog? features the town of Swindon, which is surrounded on all sides by an enormous wall that's nearly impossible to pass over, unless you either jump high enough or find the secret hold in the wall.
* The Amazing Frog?: The town of Swindon has a Hollywood-like sign declaring its name just outside it.
* The Amazing Interrogation follow through on his threat, is appropritely horrified.
* The Amazing Joy Buzzards follows the adventures of the most popular band in the world. As the new millennium's version of The Beatles, the Buzzards often find themselves pursued by hordes of screaming fans.
* The Amazing Maurice and His Educated Rodents are the closest ratty equivalent of a bomb-disposal unit. Their leader Darktan cultivates a similar mindset of cautious expertise within the Squad, their team's internal culture is just as paramilitary, and the Squad even operates its own trap-springer robots: the "Mr. Clicky" wind-up toys.
* The Amazing Maurice and His Educated Rodents deconstructs this concept, showing

how the sentient Clan rats come to terms with how their acquired ability to reason and imagine conflicts with their rat instincts and habits.
* The Amazing Maurice and His Educated Rodents ends with Maurice finding another stupid-looking kid to help earn his fortune.
* The Amazing Maurice and His Educated Rodents: in one header you find out that Mister Bunnsy finds himself in "the Dark Wood".
* The Amazing Maurice and His Educated Rodents involves the terrier rings where the terriers compete to kill the greatest number of rats.
* The Amazing Maurice and his Educated Rodents, Pratchett points out that, contrary to popular belief, funny is not the opposite of serious.
* The Amazing Maurice and His Educated Rodents, rats often remind one another that the "green wobbly bit" is something to be avoided when eating one another.
* The Amazing Maurice and His Educated Rodents stealthy, you ought to make it very obvious how stealthy you're being so anyone who sees you knows you're being stealthy and shouldn't notice you. So she "sneaks" around in cartoonishly exaggerated and highly obvious fashion, completely oblivious to the bemused stares she's attracting.
* The Amazing Maurice and His Educated Rodents, the clan leader Hamnpork ends up taken to a rat-coursing pit, and Darktan ends up organizing a rescue.
* The Amazing Maurice and His Educated Rodents". Then they come into contact with a real (mind-controlled) rat horde.
* The Amazing Maurice and His Educated Rodents the sentient rats don't object to eating each other, but they always spit out the "green wobbly bit".
* The Amazing Maurice and His Educated Rodents. The titular rodents themselves (as well as Maurice, a talking cat) are all good guys, though.
* The Amazing Maurice and His Educated Rodents, the Trap Disposal Squad's byword is "Be like the second mouse". The first mouse, in this parable, is the one that gets the trap rather than the cheese.
* The Amazing Maurice and His Educated Rodents urinate in places humans would prefer they not do so, and even go so far as to tank up on water before heading out on coordinated missions to "widdle" on people's stuff.
* The Amazing Maurice and His Educated Rodents when Darktan is about to lead a counterattack against the mysterious menace lurking under the town.
* The Amazing Maurice and His Educated Rodents, while Keith and the rats have settled down in Bad Blintz, Maurice goes off to find another stupid-looking kid and help him earn his fortune.
* The Amazing Maurice and His Educated Rodents with the words "Hey, stupid-looking kid! Wanna be Lord Mayor?"
* The Amazing Mumbo gives off a rather literal example in "Bunny Raven
* The Amazing Panda Adventure, the male and female leads both end up covered in leeches after tumbling into water, leading them to start stripping off their clothes hastily. A moment passes, then they both realize the other one is getting naked too...
* The Amazing Panda Adventure: The poachers, Shong and Po, appear to be in an equal partnership.
* The Amazing Race 6'' Had almost every couple fighting in the second half of the season. The Most Notable was Jonathan & Victoria, which is worse than Tara & Wil as Jonathan comes of as Abusive.
* The Amazing Race admitted to being one of these, and pretty much confirmed it by controlling her fiance throughout the season. Before the race she made him prepare with her for any possible situation, including studying geography, intensive language courses, and rock climbing
* The Amazing Race a Fast-Forward task involved a routine with such a troupe. The green pass would appear during the performance, upon which it could be claimed.
* The Amazing Race also added that age group to teams in its much maligned, but canonical "Family Edition" in Season 8;
* The Amazing Race, and is always played for drama. Most of the time it happens because teams will be tasked with finding a cab in an area that doesn't have many.
* The Amazing Race, and, when Claire finished the task, had the entire restaurant

in an uproar.
* The Amazing Race being a travel show and all, and not all of the contestants have exactly been geniuses. Occasionally the producers make a task based on it.
* The Amazing Race, Brent mentioned that his partner (now husband) Josh is the only man he’s ever been in a relationship with. They were both in their early thirties when they met.
* The Amazing Race, but frequently talked about, especially when teams spend the night in a remote location.
* The Amazing Race by Marcus when talking about keeping that he had been a professional football player a secret. Technically, as a tight end, it was his job to protect the quarterback, so it was not lying to say he was in "protection", and as he was retired at that point if asked if he was a football player, it was technically correct if he said no.
* The Amazing Race did the show because he wanted his dad to not have to work / worry about money while he had cancer.
* The Amazing Race, for example: brothers Marshall & Lance from Season 5, father & son Dave & Connor from 22, and friends Becca & Floyd from 29. It also indirectly causes a lot more teams to lose. Injuries run the gamut from concussions to heat strokes to broken bones to detached tendons.
* The Amazing Race fully believe this trope, no matter how many times the show subverts it or deconstructs it. At the beginning of each season it's the biggest and strongest teams that are generally the most feared by the other teams, and who are usually picked to win by the fans. Though justified in the first four seasons, where physical strength was only challenged by those with travel knowledge, in later seasons it's much more likely for an "Alpha Male" team to eliminate themselves with a stupid mistake than to dominate a season.
* The Amazing Race had a Detour from Season 5 that featured the teams walking a group of dogs through three checkpoints: it quickly turned into this.
* The Amazing Race had the teams do this while aiming for a target on a bar made entirely of ice.
* The Amazing Race has been on the receiving end of a couple of these from female contestants. In Season 21, a woman jumped into his arms covered in fish juice to mess with him after winning a leg. In Season 25, one of the winners didn't even stop at the finish line when they won, she ran straight into his arms.
* The Amazing Race has evolved over time. Traces of it developing can be seen in Seasons 1-7, though the full metagame does not come into effect until Season 10. It had two major effects on the game, first, shifting it from a game dominated by young, fit teams (especially "alpha male" teams) and those with extensive travel experience, to a game dominated by intelligent teams. Second, it gave teams who would have had no shot on early seasons (like Ronald & Christina, who were weak at physical tasks) a legitimate chance to win.
* The Amazing Race have been decided by footrace, with the eliminated team in sight of the mat when the second-to-last team checks in. Season 7 had three legs decided this way. However, the only finale to be decided this way was in Season 2, with a footrace from the cabs to the Finish Line. Tara and Wil were in the lead when they jumped out of the cabs, but Tara was asthmatic and could not keep up, allowing more physically fit Chris and Alex to race past her and win the million dollars.
* The Amazing Race have been known to ask already-eliminated teams to perform "decoy runs", which may be "leaked" in case a spoiler is leaked, so as to confuse the fake and real spoilers. This is most often done with late-game portions that take place within the U.S. in case people see the teams running around during filming and later recognize them on TV.
* The Amazing Race have watched the various versions of the show, there are still contestants who show a fundamental lack of knowledge for a franchise that's two decades old.
* The Amazing Race, he was urged by his partner Christie, the other teams, and the airport staff to just pay the fare and be done with but he continued to refuse. He got the police involved and came perilously close to becoming the first contestant to be arrested during the race. He finally paid the fare just because he didn't

want to miss his flight.
* The Amazing Race, it's a pretty sure sign that it's a "To be continued..." leg if it's just a few minutes until the end of the episode and still no teams whatsoever have checked into the Pit Stop.
* The Amazing Race looking for more; only they ended up averting it when Flo left the race dating a racer from another team.
* The Amazing Race, making teams operate things like doubledecker buses, armored personnel carriers, and shipyard cargo cranes, as well as extending it to things like dogsleds and donkey carts. Count on at least one shot each season of a team member saying something like "How hard can it be?" just before they screw up royally.
* The Amazing Race manage to cast at least one ditzy woman in most seasons. They are usually, but not always, blondes:
* The Amazing Race, marking the point when they went from being just another team in the background to being serious contenders for the prize, and they'd go on to win the season.
* The Amazing Race. Meanwhile, Jaime & Cara got an amazing cab driver, Cara blazed through the Roadblock, and they managed to steal the last spot in the Final 3 while Jen was in the bathroom.
* The Amazing Race, men from two different teams made a number of comments about how they felt of the possibility of losing to either of the female teams, Nat & Kat or Brook & Clair. Thomas, who finished third behind the two female teams in the finale, averted this, as he admitted that the female teams were the two best teams.
* The Amazing Race Nici struggled with the marching task at Buckingham Palace because she was doing it the way she was taught in the Air Force. The task judge even told her he could tell she had military training because she was doing everything but the turn right.
* The Amazing Race production crew often hires musicians to play at a couple tasks a season.
* The Amazing Race required teams to listen to customers ordering food in Chinese, then repeat the orders to a chef. It was easy for Tammy and Victor since they spoke the language, but Kisha and Jen had a little difficulty: instead of ordering "New Taste Beef" they ordered "Oil Comes Again to Please the Mouth," and "Golden Pork Spare Ribs" got lost in translation as "Light Competition Red Dishes I've Played Before."
* The Amazing Race's 13th season, Phil's father waited for the racers at the pit stop in New Zealand, which happened to be at his ranch.
* The Amazing Race, season 21, part of the reason eventual winners Josh and Brent wound up over 12 hours behind the lead teams and set the record for bottom-2 finishes without getting eliminated was they kept catching unlucky breaks, but at the same time, they repeatedly got saved by dumb luck.
* The Amazing Race, shemozzle racing in New Zealand involved getting covered in molasses and feathers.
* The Amazing Race, surprisingly. Partly because they made it about early-mid way, and were emphasized for the usual reasons one would be on that show.
* The Amazing Race). Teams also don’t usually carry their backpacks for the finale, they run with the clothes on their backs and their fanny packs. How exactly they ditch their bags varies. Jaymes & James from 21 just gave all their stuff to someone at the airport in Paris. Kelsey & Joey from 27 took advantage of an offer to check their bags at the gate and went back and got them. Kristi & Jen from 30 simply left their bags on the plane.
* The Amazing Race, teams were sent to a restaurant in Japan's Kappabashi-dori district, and had to pick out the fake food from a buffet table covered with real and fake display-food items. They could only use chopsticks, and if they touched a piece of real food, they had to eat it. The fakes were convincing enough that even close up, many of the Racers had difficulty identifying them; the task took some teams several hours, and a couple of racers picked wrong (real food) so often that they got sick from the amount they had to eat.

* The Amazing Race teams who last late into the race and get their airtime later. Generally speaking, the team per season that gets along and finishes in the middle is the one who gets the least amount of screen time.
* The Amazing Race that final-three teams who fall too far behind and have to be remotely notified of the finish (The Guidos in season 1, David and Jeff in season 4) are still stuck wherever they are last seen.
* The Amazing Race, the judge at the Estates Theater in Prague would do this when the player doing the Roadblock handed them the wrong item.
* The Amazing Race, there are times when the contestants are given stick shift cars to drive. Often, neither member of a team knows how to drive stick. Teams have been eliminated from the race over this. Kurt and Bergen simply gave up trying to drive their manual-transmission car in Season 26, and, since the whole leg involved driving around in a car, they were eliminated.
* The Amazing Race. The same thing happened to James & Abba in season 21 but they were allowed to run another leg because they weren't leaving Russia. The show hasn't been back since (season 21 was filmed in 2012) presumably for this reason.
* The Amazing Race, the second place team was less than a minute behind the first team, when running to the finish line. The second team then got held up at a railway crossing, giving the first team the victory.
* The Amazing Race, this is used on the contestants themselves in Seasons 7, 8, 9, and 14. The teams get a clue telling them to go to mat and find Phil, only to have him tell them that the leg is not over, and hand them their next clue.
* The Amazing Race This mechanic was gone by 10 and another one has been used ever since 12. The only good thing to come of it is the double leg which came from them having planned an NEL in country where begging is illegal (Hungary) in 6 without realizing it.
* The Amazing Race: This was one of the things that made Nat & Kat so effective on Season 17. In a game where even the most congenial people will lose it from time to time, Nat & Kat kept their decorum for the entire race, never even showing frustration with each other.
* The Amazing Race three times, and, due to their ability to blaze through physically or technically based tasks and their huge popularity, were huge favorites to win all three times. However, they lost all three times due to making several small mental or navigational mistakes, all of which accumulated to cost them the win.
* The Amazing Race throughout the waxing (one of the guys even threatened to punch his waxer in the face).
* The Amazing Race to Vicki constantly verbally abusing her. Heck not even just her, even other contestants. Even worse, was in the 10th leg he forced Vicki to quit the Roadblock thoroughly obliterating any chance they had at catching up, not that the viewers wanted them too. By the end of the season, everyone was asking themselves this.
* The Amazing Race (Unfinished Business), this was deliberately invoked as a joke by Zev & Justin, when they showed up to the starting line wearing the same Globetrotter gear worn by Harlem Globetrotters Flight Time & Big Easy when they originally raced together on a previous season.
* The Amazing Race usually has the contestants racing around the world. Planes are the usual method of transportation between countries, but transportation within countries uses cars, buses, trains, rickshaws, foot, and many other methods.
* The Amazing Race was a white man/black woman couple, Brian and Erica of season 15. They said part of the reason they did the show was to prove to their still somewhat skeptical families (her mom in particular) that they were truly in love and committed to making their marriage work.
* The Amazing Race was dedicated to the memory of He Pingping, the world's shortest man who was able to walk, who handed out clues to racers following one of the leg's Roadblocks. Pingping passed away a little more than a month before the episode's original broadcast.
* The Amazing Race was located on a small island, which Kami & Karli swam to. Upon arriving, they were told by Phil, "That was quite an entrance. Everyone else

just walked through the shallow water over there."
* The Amazing Race was notorious for this during its first eleven seasons, as equalizing flights midway through the final leg would even up the teams after they had already done most of the tasks in the episode, and once in the final destination city, the winner would then generally be determined by whoever found the best cab. This took a lot of skill out of who won the race, and left a lot fan enjoyment on whether or a not a likable team could luck their way into a victory. This can really be seen in how the best team (by the stats) in the finale rarely won during these seasons, but after they started setting the entire final leg in one city in Season 12, the best team has won a majority of the races. Some examples include Season 1 (New York, a cab ride, followed by a train ride, then a long run to the Finish Line), Season 2 (San Francisco, a couple of cab rides and a long run through the city), and Season 10 (New York, two long cab rides with a long run through the city in between).
* The Amazing Race, where teams have to climb to the top of something to retrieve their clue.
* The Amazing Race, where teams who come in last are saved from elimination due to another team incurring a penalty due to breaking a race rule. The only time this has affected a finale was in the second season of the Vietnam edition, where the team who checked in first received three ten-minute penalties, giving the win to the ladies who checked in second.
* The Amazing Race Wiki, including international versions of the show.
* The Amazing Race, with the remaining teams all celebrating the elimination of a hated/feared team:
* The Amazing Race, Zev & Justin explained Call It Karma to a cabdriver in Cambodia, who was probably laughing inside when comparing it with the real concept of Karma that he was probably raised with. Later in that same season, Brian even stated his opinion that the race is a game of who can collect the most Karma Points.
* The Amazing Red is perhaps one of the fastest people in the ring and can perform many moves in an instant. However due to his size, all it really takes is one hit to knock him out even against fellow cruiserweights and X Division wrestlers.
* The Amazing Rhythm Aces' hit "Third Rate Romance" had the line "they went to the Holiday Inn". The radio edit changed the line to "they went to the
* The Amazing Rhythm Aces' only top 10 on the country charts wasn't "Third Rate Romance", which fell one spot short, but the long-forgotten "Amazing Grace (Used to Be Her Favorite Song)". However, "Romance" was their only top 40 pop hit, and interest in the song was reignited when Sammy Kershaw covered it in 1994.
* The Amazing Screw-On Head animated series. Though the series was not picked up, the (awesome) pilot is avaliable online and on DVD.
* The Amazing Screw-On Head cyborg who fights paranormal forces at the behest of the Lincoln administration, with David Hyde-Pierce as his arch nemesis, Emperor Zombie. The Sci-Fi Channel actually had an online poll to gauge interest, but despite being very well-received it somehow never made it, possibly due to low numbers (ignoring how hard it is to promote a one-off pilot or attract word-of-mouth).
* The Amazing Screw-On Head defeats an otherwise invincible flamethrower-wielding Union supersoldier by shooting the massive tank on his back, causing him to smash through the wall and fly off like a rocket.
* The Amazing Screw-On Head where the title character is, for reasons unexplained, a head with a threaded bolt for a neck that can screw into various robot bodies, mainly humanoid.
* The Amazing Sixfinger, which is a toy that shoots darts. You can watch the frankly weird commercial
* The Amazing Spider-Man (1978) (edited from the two-part episode "The Chinese Web").
* The Amazing Spider-Man (1978) episode "Wolfpack" features an appearance by a scientist with a nametag reading "Stillwell", alluding to Dr. Farley Stillwell, who in the comics was responsible for the creation of the villain Scorpion.

* The Amazing Spider-Man (1978), starring Nicholas Hammond, actually managed to pull off a live-action version of this trope to indicate when Spider-Man's spider sense went off. They'd intercut photo-negative images with the color-corrected images for a few seconds, creating the same effect as a standard Alertness Blink.
* The Amazing Spider-Man (1978) was preceded by a 1977 television film that served as a pilot.
* The Amazing Spider-Man 2, and that he was glad when he killed other criminals. He tells him that he wants to do the same thing, to stop criminals forever. Surprisingly, Spider-Man agrees with him, but also points out that feeling anger and the desire for revenge is human. What's important is whether or not he acts on those feelings.
* The Amazing Spider-Man 2 by retorting that feeling anger and the desire for revenge is human; what's important is whether or not he acts on those feelings.
* The Amazing Spider-Man 2: During his first battle against Electro, Spider-Man hits him with water, defeating him. By the time Spidey uses the trick again, Electro had already figured out a way to create a barrier to protect himself.
* The Amazing Spider-Man 2, Electro is defeated before the final Goblin fight.
* The Amazing Spider-Man 2, Electro stops a man's heart by zapping him, then revives him by zapping him again. He at least correctly positions his hands where you are supposed to place the paddles.
* The Amazing Spiderman 2 forms a hand fruitlessly reaching out to Gwen Stacy.
* The Amazing Spider-Man 2 had a scene cut that featured Harry getting revenge on Menken by taking him up to a great height and dropping him to his death.
* The Amazing Spider-Man 2 has its take on the Green Goblin, which is a man with really bad teeth who looks perpetually dirty, with hair akin to a Troll doll. Instead of looking properly menacing, half the time he looks like he just has terrible hygiene.
* The Amazing Spider-Man 2, however, is notably the first film in the franchise to be filmed entirely in New York City and the surrounding areas; making it the largest production to be filmed in the city.
* The Amazing Spider-Man 2, Max Dillon daydreams lashing out at his boss, Mr. Smythe (B.J. Novak), grabbing him and screaming at him, before the film cuts back to Max standing silently. Granted, this was more of a nod to his mental instability.
* The Amazing Spiderman 2, Max Dillon sings this song to himself as he's repairing Oscorp's power lines.
* The Amazing Spider-Man 2 movie. This was one of the film's biggest criticisms.
* The Amazing Spider-Man 2 movie up to that point, it still became the ninth highest grossing film of 2014, and turned a profit on a budget of at most $250m.
* The Amazing Spiderman 2: One of the antagonists is Electro, an electrical engineer who gains electrical powers after an industrial accident.
* The Amazing Spider-Man 2 on Spider-Man when they were on him a moment ago. Then again it's shown earlier that Maxwell isn't mentally stable to begin with and turning into a pure energy being certainly didn't help.
* The Amazing Spider-Man 2 that much trouble, Spider-Man could probably retire or at the very least start taking days off and vacations.
* The Amazing Spider-Man 2. The film ultimately ended up a critical and commercial disappointment that resulted in the franchise being rebooted again in the MCU.
* The Amazing Spider-Man 2 to his former hero, and led him to try and take him down.
* The Amazing Spiderman 2 turns him into Electro causing him to become deranged and now seeking to kill Spider-Man.
* The Amazing Spiderman 2. Turns out? The spider ONLY works on people who are related to Peter Parker's dad, as it's gene-coded. Using it when NOT related leads to...issues. Specifically? The Lizard and Green Goblin. So, it's perfectly repeatable. Just...really dangerous.
* The Amazing Spider-Man 2 when Peter is chasing after a truck with dangerous chemical, the canisters soon spilling out into the street from the reckless driving and forcing him to break off the chase and retrieve them. He manages to grab the

last one only to get hit by a truck, though luckily unharmed and sticking to it thanks to his powers. It's at that point Gwen calls to inform him that their graduation has started and wondering where he is.
* The Amazing Spider-Man 2, when Spider-Man rescues bullied geek Max Dillon at the beginning, Max is amazed and asks why the hero would bother saving a nobody like him. Spider-Man replies that he's not a nobody, he's a somebody. Unfortunately, Max is a stalker, and this furthers his obsession with Spider-Man, having deluded himself into thinking he's Spider-Man's best friend.
* The Amazing Spider-Man 2, where Peter takes to watching Gwen from rooftops after they break up. We get this exchange:
* The Amazing Spider-Man and gasping "You've discovered my weakness... small knives!".
* The Amazing Spider-Man, and so the film was recut to move the focus away from the gritty parts of the plot.
* The Amazing Spider-Man, assuming that Peter just donned a Spider-Man costume to play the hero. Years later, when Spidey unmasks on national TV, Doc Ock goes on a rampage fueled by the humiliation of being constantly beaten by a high-schooler.
* The Amazing Spider-Man: As usual for him, Spider-Man does this to the Lizard. He even imitates a spider by crawling all over him while wrapping him in webs.
* The Amazing Spider-Man' base, remembers Tony keeps a lot of his stuff, digs into one of the boxes nearby and hauls out the Iron Spider costume, which she dons to aid the two heroes.
* The Amazing Spider-Man before them, Garfield and Stone didn't need acting to convince the audience that they were in love.
* The Amazing Spider-Man, but when Peter's uncle was killed, Flash goes to console Peter, and continues to do so, even when Peter shoves him against the lockers, telling him calmly to "let it all out". By the end of the film, the two have become good friends.
* The Amazing Spider-Man comic strip was eventually discontinued. The final storyline saw Peter Parker team up with his wife Mary Jane and Luke Cage to battle The Purple Man. Afterwards, the Parkers head off for a vacation in Australia, where they will remain until, or if, the strip is revived.
* The Amazing Spider-Man). Depending on how late the player does this mission, one could conceivably finish it, and then find out seconds later in an e-mail that Hardy has not only broken out of custody, but somehow found the time to rob a pawn shop and write a letter to Spider-Man instantaneously.
* The Amazing Spiderman does more-or-less the same thing, though it replaces the Green Goblin with The Lizard.
* The Amazing Spider-Man does this again, only this time from the perspective of Peter's parents, revealing exactly how they died.
* The Amazing Spider-Man downplays this, but doesn't fully avert it in that a lot of scenes are filmed in Los Angeles, though some scenes were filmed in New York.
* The Amazing Spider-Man: Dr. Connors is driven by a vision of a "world without weakness" in which everyone is equal, the limits of the human body having been overcome through science. While he has traces of the Lizard virus in his system, he comes to the conclusion that his Lizard form is a superior creature devoid of human weaknesses, and that his vision can be made a reality by making everyone like him, even if that means forcing the change upon everyone against their will.
* The Amazing Spider-Man: Dr. Ratha was decapitated by the Lizard. However, the scene doesn't fit into the final continuity of the film.
* the Amazing Spider-Man, er, ditto for his skills as a photojournalist. Even J. Jonah Jameson admits it...grudgingly...when Peter's not in earshot.
* The Amazing Spider-Man from the eighties has Peter getting a well-paying assignment from J. Jonah Jameson and gleefully dancing with a random homeless person while dressed as Spidey. In the next panel, the guy is seen throwing his beer bottle behind him.
* The Amazing Spider-Man game gave you different bonuses depending on where you ordered it from. Preordering from Amazon USA (or GAME stores in the UK) gave you the Stan Lee Adventure Pack, pre-ordering from GameStop (or Amazon UK) gave you the

Rhino Challenge. Other stores had the Oscorp Search and Destroy pack.
* The Amazing Spider-Man had planned to use the newly developed cross-species serum at a veteran's hospital by passing it off as a vaccine, before Connors (as the Lizard) attacked him on the bridge out of Manhattan.
* The Amazing Spider-Man has a beat-up Peter Parker collapsing through his girlfriend's window, then recovering enough under her care that he manages an impromptu date.
* The Amazing Spider-Man has four of them in one scene, when Gwen is hiding from the Lizard. The first is in relatively quick succession of each other, followed by a long silence, making the viewer think that was all of them. Then the final and loudest one is when he suddenly appears in front of her.
* The Amazing Spider-Man has the title character remarking that he was always being "doomed" by every villain he met.
* The Amazing Spider-Man. He needs the kid to climb up out of a burning car so he can get him to safety, but the kid is too scared. So Spidey unmasks and gives it to the kid, claiming it will "make him strong". It works.
* The Amazing Spider-Man hurt him; it's just that a gap in the firing allows him to heal his wounds and keep fighting. It's later played straight when Captain Stacy confronts the Lizard.
* The Amazing Spider-Man in his obligatory cameo listening to music and nonchalantly whistling as Spider-Man and the Lizard duke it out behind him, knocking down shelves and smashing lights. A large table comes hurtling toward him, but Spider-Man manages to grab onto it with a web-shot and yank it away. Stan never notices.
* The Amazing Spider-Man. In the Vulture's first appearance, Spider-Man took him down by simply clipping his wings with a device designed to cancel out the magnetic harness that allowed him to fly. Not so in their second encounter, where the Vulture puts in a fail-safe to get around this, and sucker-punches Spidey the minute he isn't looking.
* The Amazing Spider-Man, it turns out the antidote hasn't completely countered all traces of the lizard serum present in Connors.
* The Amazing Spider-Man, JMS had a scene where a Video Editor for a News Station was pulling out archive footage of Spider-Man in battle, all of which involved Spider-Man swearing (covered with bleeps), one of which involved more 'bleeps' than words and one incident where, fighting a Sentinel, Spider-Man says 'Hey buddy, that's not a bag of peanuts you're crushing!'.
* The Amazing Spider-Man: Kaine, a flawed clone of Peter Parker (a.k.a. Spider-Man), is a serial killer. However, during Grim Hunt, he disguises himself as Peter Parker, steals Spider-Man's costume, and walks into a trap set by the Kraven family for Spider-Man in order to screw up Kraven the Hunter's resurrection. It doesn't work quite as planned, as Kraven is resurrected normally, but his death does infuriate Peter to the extent that he stops holding back against them. Subverted in that two comics later, Kaine is resurrected as a spider-monster on the last page.
* The Amazing Spider-Man Most of this scene was fully rendered, implying it was cut very late in production. Part of it still appears in the theatrical release but it has been re-cut in such a way to remove Peter, making it seem like Connors is talking to himself.
* The Amazing Spider-Man. Not to mention it shows off his new reflexes, the clock only gets in about two rings before the crunching.
* The Amazing Spider-Man, Peter gets the initial idea for the Spider-Man mask upon seeing a poster of a luchador mask with a similar red-and-blue coloring.
* The Amazing Spider-Man, Peter reluctantly agrees to go on a blind date with the daughter of one of his aunt's friends. He avoided it for weeks beforehand, assuming that the girl needs to go on blind dates cause something is wrong with her. He talks to his aunt as he opens the door... only to gasp as he sees a red-headed model, Mary-Jane Watson, for the first time.
* The Amazing Spider-Man, Peter's English teacher utters a line in the film that embodies the "No Antagonist" spirit and the spirit of every true Spider-Man conflict.

* The Amazing Spider-Man. Peter tries to point out that he thinks Spider-Man is trying to help, but Captain Stacy is firmly convinced Spider-Man is a danger and points out that he's targeting criminals who all look the same, "like he's got some personal vendetta," not to mention his actions have interfered with long-term police stings.
* The Amazing Spider-Man), played even more like a Coming Of Age movie. The first film explored Peter's issues concerning his birth parents, and dealt extensively with his grief over Uncle Ben's death in more focus and detail, showing how he goes from being angry to learning the 'great responsibility' Aesop. The second film follows the first films' love story as it grows into an adult romance, Peter's continued issues with his parents' mysterious death, and reconnecting with a childhood friend.
* The Amazing Spider-Man rather than a canon confirmation that they are the same. Their reasoning for all this was, presumably, that because audiences had seen the story done twice in the past 15 years, that they would know the origin story and didn't need to retread it.
* The Amazing Spider-Man: Renew Your Vows skips ahead eight years to have Annie May Parker as a teenager.
* The Amazing Spider-Man Series for trying to do this too quickly at the expense of the quality of the film. The underperforming critical and commercial response to the movie led them to make deals with Marvel Studios to introduce Spider-Man into the MCU.
* The Amazing Spider-Man Series, initially without the actual Spider-Man.)
* The Amazing Spider-Man Series, Peter plays a role in Dr. Conners' transformation into the Lizard and Harry's transformation into the Green Goblin, both times inadvertently.
* The Amazing Spider-Man Series was developed to be a sprawling, Marvel-style universe, many plot points that were introduced in the first two films went unresolved.
* The Amazing Spider-Man show jurisdictional friction happening between the NYPD, the CIA, the FBI, the Department of Homeland Security, the NSA and SHIELD due to the Lizard's actions counting as domestic terrorism.
* The Amazing Spider-Man that you get the impression Captain Stacy has dealt with these sorts of lies from her in the past.
* The Amazing Spider-Man. The contact later used Osborn's weapons and glider to become the Hobgoblin.
* The Amazing Spider-Man, the Lizard saves Spider-Man from falling off of a building after his Lizard-ness starts to wear off and he regains his mind.
* The Amazing Spider-Man, the Lizard's first transformation back into a human is shown as a shadow, the silhouette's right arm falling off in clunks.
* The Amazing Spider-Man. "There's a bipedal lizard man rampaging through New York and is carrying a mutating chemical weapon? SCREW THAT! Lets go shoot at Spider-Man.''
* The Amazing Spider-Man: The starting point of Dr. Connors' research; he longs to create a world in which everyone is equal, a world in which illness and weakness don't exist. At the height of his insanity, he comes to the conclusion that humans are so imperfect that it's not right to leave them unevolved.
* The Amazing Spider-Man, the walls of Curt Connors' sewer lair are filled with mathematical equations.
* The Amazing Spider-Man through a serum that uses lizard DNA to re-grow limbs and human tissue. Incidentally, the same genetic technology was used to create the transgenic spider that gave Peter Parker his spider powers.
* The Amazing Spider-Man, turns Gwen Stacy into a bitter mess who blames Peter for her father's death which results in, after they got back together, her insulting and berating him until they break up—to make way for the author's version of Mary Jane.
* The Amazing Spider-Man when Peter Parker comes home and Uncle Ben demands to know why he didn't answer his phone. Before Peter can speak, his phone rings, disproving any story of it being unable to do so.

* The Amazing Spider-Man, when Spider-Man faces a criminal for the first time, the thug freaks out and tries to scare him away with a knife. Spider-Man cowers, saying small knives are his one weakness...then promptly and effortlessly webs the thug to the wall.
* The Amazing Spider-Man. When Uncle Ben dies, Peter goes sullen and violent in his grief, and when he gets violent at Flash, Flash just takes it and then asks, "Feels good, doesn't it?", implying that he has gone through something similar.
* The Amazing Spider Man, which begins with Peter Parker on his bed after the wedding of his aunt, barely remembering what happened at her wedding due to getting drunk, then he discovers his roommate Michele Gonzales on his bed, leaving Peter confused, while Michele is angry that he didn't remembered they had sex.
* The Amazing Spider-Man (which gets a surprisingly large amount of hate) is at least partially the fault of the stylist for the film rather than him. As he is pretty much seen as the face of the new franchise, every problem with it is blamed on him, regardless of what sense it makes. And if it's not him, it's the director, even if the series' problems obviously not being all Webb's fault.
* The Amazing Spider-Man, who were an off-screen couple for four years and remain friends.
* The Amazing Spiez!, a character mutates to have a set very wide hips and bottom, but returns to her usual form by the end of the episode.
* The Amazing Spiez! centered around 3 separate, younger WHOOP agents. Jerry is still featured prominently like in the core show, and Sam, Alex, and Clover occasionally have cameos in this series, but otherwise it could be argued that this is just a carbon copy of Totally Spies but with different leads and villains. The show only lasted 2 seasons before getting canceled.
* The Amazing Spiez! episode "Operation The 50 Ft. Hacker", Davey Hacker steals a gadget that makes its target grow. When the kids are fighting the giant Davey, Megan uses it on herself, making herself as tall as Davey. After successfully defeating him, however, the gadget winds up malfunctioning, causing her to inflate like a giant balloon. Marc manages to revert her back to normal size shortly after.
* The Amazing Spiez! episode "Operation The 50 Ft. Hacker." Megan winds up using the same gadget to make herself giant as well, but it eventually backfires and causes her to expand like a balloon.
* The Amazing Spiez! episode "Operation: Twins of Trouble". The Spiez' parents are frozen by the Twins but thaw out just fine.
* The Amazing Spiez! episode "Operation: Twins of Trouble". When a WOOHP jet flies off into the distance, it disappears in one of these.
* The Amazing Spiez! has personal nicknames for her brothers. Lee has "Jockstrap", Marc has "Genius" and Tony has "Brony".
* The Amazing Spiez! has some parts that are black, but the rest of the suit it brightly coloured. They also include shoulder and knee pads, unlike their predecessors.
* The Amazing Spiez!: In "Operation Spy-Sitter", three of the title heroes form one to reach a sprinkler control on a wall.
* The Amazing Spiez! is the biggest jock in school and also really nice.
* The Amazing Spiez! receives this tan process and enthralls all of the boys at school, including the Clark brothers, leaving Megan to stop the bad guys for the episode.
* The Amazing Spiez! will have a scene featuring one or more of the three Clark boys from time to time.
* "The Amazing Tale of Willy Wonka" was replaced with "Willy Wonka! Willy Wonka!"
* The Amazing World of Gumball ad that turns the Wattersons into caricatures of themselves.
* The Amazing World of Gumball after Gumball and Darwin ask a squirrel about the meaning of life.
* The Amazing World of Gumball a happy ending on Clare by fixing everything wrong with her life. Loudly.
* The Amazing World of Gumball, a minor character that appears sometimes in the background is a poop guy with limbs, though it never had a speaking role. He was

nicknamed "Mr. Poop", but this name was never confirmed.
* The Amazing World of Gumball, and all his family members, all have pitched up voices.
* The Amazing World of Gumball And are available for all kinds of parties, including stag parties (bachelor parties) and hen parties (bachelorette parties).
* The Amazing World of Gumball, and Elmopedia, a parody of Wikipedia. Some websites that don't have "Elmore" in it are Gway and Junk, parodies of eBay; Ramblr, a parody of Tumblr, and Fessebook, a more direct parody of Facebook. As for companies, there's Joyful Burger, a parody of Burger King. Since the show uses real-life backgrounds, technically all locations are fictional counterparts.
* The Amazing World of Gumball (and ends up actually choking because of her), instead of helping him, she just watched him suffocate with glee. As said by her husband, Mr. Robinson: "Sometimes man just wants to watch the world burn.
* The Amazing World of Gumball and ends up freezing time for both of them. Things go downhill from there.
* The Amazing World of Gumball and he actually agrees with Gumball that he was wrong. Later in the show, he goes back to being his brutally blunt self after seeing another character who took over the show get close to his girlfriend and even unleashes his tirades on him in form of an acid attack which burn his face off! Nicole has also can be seen as this as she crushed a guy's hand for hitting her husband Richard, despite helping them
* The Amazing World of Gumball) and Science Saru (founded by Yuasa). Needless to say, the effort shows.
* The Amazing World of Gumball and stopping the clock, and time along with it. Knowing they accidentally stopped time, they decided to mess around with it, such as pulling someone's pants down and putting lipstick all over his face.
* The Amazing World of Gumball), and the series finale "The Inquisition" (the ending of which requires knowledege of an underlying plot that's only mentioned a handful of times across the show's entire run).
* The Amazing World of Gumball and was not a reference to the main character's name, as the name came from Ben Bocquelet thinking of random things a boy would have in his pocket. Meanwhile, some of the episodes in his series underwent changes in title:
* The Amazing World of Gumball) and were trying to fabricate evidence to make it look like they died on the train home.
* The Amazing World of Gumball are still being produced long after the show's ending).
* The Amazing World of Gumball: A robber holds up a gas station with only a spoon, which the other characters think is a lethal weapon. When he gets caught in the end, the cop laughs it off.
* The Amazing World of Gumball, a show primarily made in the UK, and the creator of which has both French and English heritage, at one point had Gumball compare kindergarteners to British tourists.
* The Amazing World of Gumball", a sign in Elmore Mall's parking garage reads "Strictly no Kung-Fu in this car park" right before the Watterson family gets in a kung-fu style brawl over the new TV remote Nicole just bought.
* The Amazing World of Gumball, as video tapes have been shown being used regularly in their class. Even weirder, "The Ghouls"is a season six episode, where the second season episode "The Tape" is all about them messing up with a camera.
* The Amazing World of Gumball At one point he was cursed to turn into a "reverse mermaid", but nothing happens because that's basically what he already was.
* The Amazing World of Gumball because his enemy's weapon malfunctioned, but in a way Gumball was able to fix when he took it.
* The Amazing World of Gumball because of the world they live in, although it seem a lot of them are just this way because their parents were. Darwin, who was a pet goldfish before sprouting legs, is the only character explicitly stated to have gained intelligence this way.
* The Amazing World of Gumball, because the show's creator and other staff members disliked her character and design.

* The Amazing World of Gumball become this in the later seasons, with more episodes involving them teaming up to deal with huge catastrophes together.
* The Amazing World of Gumball being pitched way the hell down. The same goes for both of Ms. Simian's voice actors.
* The Amazing World of Gumball: Bobert, a robot, will always take literally everything he is told to do, getting to be dangerous. When he's told to follow the laws, he follows even the most useless ones, like threatening a man for slurping soup, and then yelling off-key (which are both real laws, respectively in New Jersey and North Carolina). Then, when he's told to not follow laws, he steals a woman's purse and runs away. When he's told to protect all life, he stops a car so a family of ants can pass though the road.
* The Amazing World of Gumball), but it constantly slips into other genres:
* The Amazing World of Gumball... But still having their 12/10 year old voices. In "The Mustache", Gumball and Darwin also become adults and stay with almost the same voice.
* The Amazing World of Gumball, but when it comes to pulling off her own plans, she tends to fall flat on her face.
* The Amazing World of Gumball called "The Debt" Gumball jumps towards Mr. Robinson, trying to save his life from a falling light. During his jump he is yelling a long drawn out slow motion "NOOOOOOO."
* The Amazing World of Gumball can posses someone by flying into their mouth and down their throat.
* The Amazing World of Gumball can think to shout it "Names! Names! Names!"
* The Amazing World of Gumball character does this when they are confused.
* The Amazing World of Gumball, coincidentally landing on "Gumball" more than once, but no one seems to notice - and, of course, everyone remembers his ridiculous pseudonym (the concise sounding GumBallOopsEggWobbleUnderpants) and the equally ridiculous made up country (GumBaldNoWigBattleaxeNinja) perfectly.
* The Amazing World of Gumball", Darwin doesn't care if Banana Joe chewed on the pen Darwin lent him, but his brother Gumball tries to persuade him to get revenge. However, Darwin becomes furious after Joe tears up his homework (which was actually an accident caused by Gumball poking holes in Joe's tube of glue).
* The Amazing World of Gumball Darwin logically deduces it'll only take them a minute to get back to town. Sure enough, the episode cuts to them back in town, and another minute is reducted from the timer.
* The Amazing World of Gumball does this where Gumball and Darwin believe a solar eclipse will bring about the end of the world in 24 hours.
* The Amazing World of Gumball, due to the show's fondness for parodies.
* The Amazing World of Gumball: During the Joyful Burger ad at the end of the episode "The Money", Richard says he ate Anais' homework because she said it had pie in it. Anais corrects him, saying she meant the number pi.
* The Amazing World of Gumball, ends many episodes abruptly right after the climax without any real denouement.
* The Amazing World of Gumball episode "The Bus", as part of a ham-fisted plan to teach the kids about the dangers of truancy by staging a hijacking, Banana Bob attempts to jump on the school bus and misses because he was looking at it through binoculars that made it look closer than it really was. When he looks through the binoculars again he has them backwards, so he thinks the bus is farther away and ends up getting flattened.
* The Amazing World of Gumball episode "The Club". When a club of nerds threatens to upload an embarrassing video of Gumball if he won't join their club, the Wattersons set out to stop them. Obstacles come up that are each perfectly suited to be handled by each member of the family until only Gumball is left to confront the leaders of the nerd club.
* The Amazing World of Gumball episode "The Copycats" revolves around the Wattersons dealing with a Chinese family copying everything they do. A key plot point is that the Chinese family has an equivalent of every one in the Watterson family except Anais. At the time it was produced, China was enforcing a policy limiting families to only have two children. Daughters tended to be aborted as sons

were preferred. This policy came to effect in 2016, so it was still relevant when the episode premiered in 2017. This lasted until May 31st, 2021, when China proclaimed they've updated their policy to allow three-child families.
* The Amazing World of Gumball episode "The Countdown," a bunch of Gumballs and Darwins end up time traveling to the prehistoric age. The most recently arrived Gumball and Darwin come in to watch the others fight. When the fighting changes history, Gumball and Darwin travel back and tell their duplicates that they shouldn't exist because it would create a time paradox. The others go "Oh yeah" and promptly vanish.
* The Amazing World of Gumball episode "The Countdown". With seconds to get to school, Darwin hoofs it while Gumball insists on using Parkour ("It's the fastest way to get from A to B."). He's not athletic so it actually slows him down.
* The Amazing World of Gumball episode "The Cycle", after an attempted prank by the Wattersons, Harold thinks he's rich and pays a skywriter to write Richard saying "I can count to burrito!"
* The Amazing World of Gumball episode "The DVD", Gumball is said to have seen "Alligators on a Train" 72 times.
* The Amazing World of Gumball episode "The Ghost", when Gumball is talking down Carrie (a ghost he was allowed to use his body up until then) he sees her replacing his reflection in a puddle of water.
* The Amazing World of Gumball episode "The Job" involved Richard's reality-warping shockwaves hitting the other Wattersons and Larry, who switch genders at one point,
* The Amazing World of Gumball episode, "The Joy", Gumball, according to Ms. Simian, is "infected" with "joy", a disease that makes Gumball unable to stop smiling and being cheerful. He attempts to stop smiling by literally ripping his mouth off of his face and slapping it back on, upside down. It then forcibly rotates right-side-up while still on his face.
* The Amazing World of Gumball episode "The Joy", Miss Simian rages out and flips over a desk from the side, completely flipping it over and landing back on its legs, not disturbing anything sitting on the table either. Realizing this, she then moves behind the desk and flips it over that way.
* The Amazing World of Gumball episode "The Origins", Darwin's song is interrupted when an eagle suddenly snatches him up. When she tries to feed him to her chick, Darwin slaps the chick in the face and continues crawling on while singing.
* The Amazing World of Gumball episode "The Parking": an old man takes a parking spot the Watterson family were going for, so Nicole starts scribbling on his car in lipstick. One of her kids points out why this isn't a good idea.
* The Amazing World of Gumball episode "The Puppy" wherein the turtle the Wattersons end up getting as a pet is an borderline indestructible and all-but-stated-to-be-outright-evil hellion that terrorizes the family for the duration of the episode.
* The Amazing World of Gumball episode "The Roots", after eating a bowl of fishing hooks.
* The Amazing World of Gumball episode "The Roots", the Wattersons think Darwin the goldfish misses the ocean, Gumball suggests they "use words he can understand." This is the result:
* The Amazing World of Gumball episode "The Shell" where Penny's unshelled appearance becomes permanent for the rest of the series and Gumball loves her the way it is.
* The Amazing World of Gumball episode "The Singing", the chicken that Richard orders from Joyful Burger proves to so caustic that it eats through the bottom of the bucket, then through the floor of his car.
* The Amazing World of Gumball episode "The Tape", the title character introduces his classmates to the tape he's making, saying "And introducing all my other friends in 'The Amazing World of—'. Forget it, who's gonna watch that?"
* The Amazing World of Gumball episode "The Traitor", Gumball and Darwin try to do this substituting the tar with maple syrup.
* The Amazing World of Gumball episode "The Upgrade," Gumball and Darwin are riding on a new Bobert, chasing the plane that has the old Bobert. When Gumball proposes

that new Bobert blow the plane's back door open, Darwin tells them that's too dangerous. The three of them pull up to the door, and Darwin knocks on it while politely asking for the door to open. It abruptly opens and hits them, knocking them off-course.
* The Amazing World of Gumball episode "The Wicked," Darwin tries to lambaste Mrs. Robinson while imitating her unintelligible "meh meh meh" speak. From her perspective, it comes out as "Three times did the cheese move sideways to Switzerland by radio. But, she never licked that parking permit."
* The Amazing World of Gumball episode "The Wicked", Mrs. Robinson causes some squirrels to go on a rampage in the park by giving them nuts coated in coffee. When she blames it on Gumball and Darwin and they're sentenced to community service, Darwin adds that the nuts were also soaked in prune juice, which he considered overkill.
* The Amazing World of Gumball episode "The Words", Darwin temporarily becomes a brutally honest Jerkass after Gumball teaches him to speak his mind.
* The Amazing World of Gumball equivalent to Google Maps. During the "tour", among other things, they see Richard driving onto a ramp and flying into the air, and land themselves on a patch of thin ice which breaks and lands them underwater, where they get eaten by a big fish.
* The Amazing World of Gumball, especially in "The Kids", where he mistakes Gumball—who had a puberty spurt that made his voice change—for a creepy teenager making prank calls:
* The Amazing World of Gumball: Especially mid season 2 onwards, this show has been known to release several episodes at a time, only to dissapear for months, rarely informing when the next set of episodes will be.
* The Amazing World of Gumball, especially the episodes from seasons two and three, like "The Butterfly," "The Question," "The World," "The Void," "The Job," "The Countdown," "The Oracle," "The Pizza," and "The Finale." Season one is rather tame, but does have its share of deranged moments, such as Gumball's run of bad luck on "The Curse" or Nicole fighting Tina Rex's father in "The Fight."
* The Amazing World of Gumball few seconds of two CG-animated skeletons which abruptly cut off mid-sentence.
* The Amazing World of Gumball fits this trope like a glove. Just watch the chase scene in the DVD episode.
* The Amazing World of Gumball focused on the many background characters and their interactions with Gumball and Darwin rather than Gumball's family.
* The Amazing World of Gumball for a body and a masculine voice. It's only at the end of her debut episode that she is revealed as a woman (as well as being the mother of a feared bully).
* The Amazing World of Gumball for quite a while before the show was made, but Cartoon Network pulled it in 2010. Several years later, the show's creator reposted it.
* The Amazing World of Gumball from Darwin and Anais as they try (and fail) to stop their brother from restarting the console.
* The Amazing World of Gumball from the safety of a pay phone, the stench carries through the phone line and knocks him to the floor.
* The Amazing World of Gumball getting married. It's also made clear that even though Nicole and Richard each have their own flaws, they've genuinely loved each other since they were kids, and had already been living together for years.
* The Amazing World of Gumball", Gumball admits to his little sister Anais that he kept messing up her sunscreen when she was born to make it look like she had a facial birthmark in the shape of a goat because he thought if she looked cursed their mom wouldn't love her more than him.
* The Amazing World of Gumball", Gumball and Darwin are convinced that in order to join a gang of senior citizens they need to look old, so they try to get wrinkles by wallowing in nuclear waste. They don't get wrinkles, but Gumball gets telepathy and Darwin gets magnetism.
* The Amazing World of Gumball, Gumball and Darwin are forced to outrun the explosion. They dramatically jump too soon, then the wall of flames engulfs them.

* The Amazing World of Gumball, Gumball and Darwin became rich on at least two occasions, such as when they worked their way up to being CEOs of a burger chain or made a million dollars from selling pirate hooks through infomercials, but then immediately gave up the money.
* The Amazing World of Gumball, Gumball and Darwin try to find a secret room in their house by attempting to invoke this trope.
* The Amazing World of Gumball, Gumball and Darwin try to re-film a rented DVD that they broke ("Alligators on a Train") and do an awful job at it.
* The Amazing World of Gumball, Gumball and Penny enter a relationship in the Season 3 episode "The Shell".
* The Amazing World of Gumball, Gumball announces that he's skipping to the end and presses a button to nuke the country.
* The Amazing World of Gumball Gumball, but he is thwarted because of being sprayed by a sprinkler.
* The Amazing World of Gumball, Gumball does a high dive into the school pool to be a distraction for Darwin. However, he spots Penny, and begins wondering if he's doing the right thing. Then he belly-flops onto the water, which is anything but soft. Ouch.
* The Amazing World of Gumball: Gumball is in seventh grade, and in "The Cringe", a picture of a younger him shows that he studied with his current classmates Banana Joe, Molly, Tobias, Leslie, and Hot Dog Guy since kindergarten.
* The Amazing World of Gumball: Gumball occasionally has his moments of nudity, and it comes with pixelation that conceals his nethers.
* The Amazing World of Gumball", Gumball orders Darwin to bake cookies to prepare for Penny's visit to the Watterson house. When Darwin's just putting the tray in the oven, an impatient Gumball tells him to bake faster, then turns up the temperature and burns the cookies to a crisp.
* The Amazing World of Gumball, Gumball's brain gets out of his head after studying too hard. Gumball is unchanged, as he tries to train his brain so that it becomes smarter.
* The Amazing World of Gumball, Gumball's dad goes off the deep end trying to prank him and makes some hideous faces in the process.
* The Amazing World of Gumball: Gumball's kid sister has a recording of their mother saying "What kind of horrible mother wouldn't take her daughter to her favorite show?" She rewinds and replays the "horrible mother" part repeatedly.
* The Amazing World of Gumball, Gumball's refusal to sell out to Joyful Burger has the rest of the Wattersons resort to increasingly less subtle means of Joyful Burger product placement to convince him.
* The Amazing World of Gumball, Gumball the cat tries to be friends with him to make Darwin the goldfish jealous because he himself is jealous of Darwin being friends with Tobias the rainbow. He just can't remember his "new best friend's" name, though: he keeps calling him various non-Alan names, such as Alex, Adrian, Alfred, Arthur, Adam, Andrew, Alice.
* The Amazing World of Gumball: Gumball tries (and fails) to lighten the mood in "The Parents" with this meta joke: "I like my coffee the way I like my 'I like my coffee' jokes: I don't."
* The Amazing World of Gumball, Gumball tries to bribe the nurse into giving him a sick note with a quarter.
* The Amazing World of Gumball", Gumball tries to give Alan a pep talk he has written down, but instead recites his biology notes. Once he notices, he says the words spoken so far in reverse before giving the actual speech.
* The Amazing World of Gumball had always been broadcasted on a different, local channel.
* The Amazing World of Gumball has a "fake smile" in "The Meddler" episode that eventually became a universal meme.
* The Amazing World of Gumball" has a gender-flipped version where Gumball is the beauty to Penny's beast. The episode even alludes to Beauty and the Beast multiple times.
* The Amazing World of Gumball" has Gumball communing with the newly-gotten fish

under the kitchen table. It is there that Gumball deduces that the fish is intelligent, at which he jumps for joy. Naturally, Gumball knocks his noggin on the table's underside. When the fish tries to speak to Gumball, the excited kitten is ready to jump for joy again, but this time, dons a helmet before doing so.
* The Amazing World of Gumball has Gumball's parents: Richard (a big, fat pink rabbit) and Nicole (a significantly smaller blue cat). Nicole isn't particularly short, but next to her husband (who's bigger than the whole rest of the family put together), she definitely looks it.
* The Amazing World of Gumball has main character Gumball and his little sister Anais. Their mother is a cat and their father is half-rabbit/half-rat (who looks like a rabbit). Gumball looks like a cat (like their mother) while Anais looks like a rabbit (like their father).
* The Amazing World of Gumball has sentient cacti, balloons, clouds, potatoes, bananas, toast and so on. And that's just among the main characters; everything in Elmore is alive and anything can also become anthropomorphic.
* The Amazing World of Gumball has some involving Alan the balloon and his balloon knot.
* The Amazing World of Gumball has the walking talking Banana Joe, this joke was going to happen. And it did with the largest kids in Elmore Jr. High: Tina Rex and Hector Jötunheim both slipping on Banana Joe, usually crushing him underfoot in the process.
* The Amazing World of Gumball has this in season 1 episode 17 “The Party” when Gumball considers numerous girls to ask to be his date, counting several as possibilities. Then "Sussie... no."
* The Amazing World of Gumball") have rather sizable moobs (the latter is only visible when his fur is out of the way).
* The Amazing World of Gumball have their own character flaws that can get so out of hand at times, the guys (usually Gumball) end up playing the Straight Man to them.
* The Amazing World of Gumball He also apparently has a major in Canadian history, though this could be a result of his deeper voice as of "The Nemesis" and his previously-mentioned increased intellect.
* The Amazing World of Gumball. He even camped out in front of the TV all night to make sure he'd keep it.
* The Amazing World of Gumball he inserts himself into someone else's story and forces a happy ending where he saves the day on them.
* The Amazing World of Gumball; her Aurelie Charbonnier voice is more calm and sounds mostly like a normal girl.
* The Amazing World of Gumball him, but the senior citizens just want them to send him a text message.
* The Amazing World of Gumball intentionally invoke this by resembling Filmation-era cartoons and having very stiff and choppy animation to boot. The show itself lampshaded it on their debut episode, even showing that the background crowd members cannot move their position but are more like cardboard cut-outs. It comes up again during an episode focused on extras when two members of the crowd only move by awkwardly shuffling themselves around.
* The Amazing World of Gumball: In "The Catfish", Gumball says searching his name in the internet resulted in him finding fanart of himself, which are based on real ones.
* The Amazing World of Gumball: In "The Club", Richard confesses to Nicole that he taped a wrestling match over their wedding video, causing her to rip a locked door right off the wall in pure rage.
* The Amazing World of Gumball: In the episode "The Curse", as a result of Gumball temporarily running out of luck, everything in the vicinity tries to kill him.
* The Amazing World of Gumball: In the episode "The Internet", when Darwin sings about how there's a beating heart in everything, he explicitly excludes lawyers (alongside zombies and jellyfish).
* The Amazing World of Gumball in "The Friend". The "Mentos and Coke" trick is pulled twice, and in both times it is stated to use "non-branded" mints and cola.

* The Amazing World of Gumball: In "The Mothers," the last challenge of the "Mom-Off" is stomaching a spoonful of hot sauce. Jackie, Tobias' mom, refuses the spoonful and chugs the whole bottle, winning the competition. However, Gumball later discovers that Jackie cheated by swapping the hot sauce in the bottle with ketchup, and disqualifies her.
* The Amazing World of Gumball in "The Pact." (Until it backfires when he starts confessing a little too much.), orchestrating a happy ending for Claire in "The Others", and defeating a troll simply by annoying it in "The Sorcerer." This appears to run in the family as his sister Anais also tricks her family into getting what she wants, as seen in "The Remote" and "The Password."
* The Amazing World of Gumball: In "The Party", Darwin helps Rachel clean up her home, where the party has been at (and all the kids had ruined it) before her parents come home. She rewards him with a kiss on the cheek, resulting in him crashing head first to the floor with a goofy smile on his face.
* The Amazing World of Gumball: In "The Responsible", Anais accidentally floods the whole house by leaving the bathtub faucet running. And after Gumball and Darwin rescue her and escape through the chimney, an angry Nicole comes home from a parent-teacher-conference and opens the front door only to be greeted by water suddenly blasting out.
* The Amazing World of Gumball: In "The Sneeze", Darwin can't stop sneezing. Since he happens to sneeze every time Gumball tells something absurd, Anais concludes that he might be allergic to stupidity. In the end, the reason behind Darwin's sneezes turns out to be a feather that was stuck in his gills.
* The Amazing World of Gumball: In "The Sorcerer", Gumball goes to Mrs. Jotunheim for magic training. When he says that he brought eye of newt, toe of frog, and wool of bat, Darwin adds that they'll never be allowed at the zoo again, suggesting that they gathered the items from the animals there.
* The Amazing World of Gumball. In "The Spoiler" he goes crazy trying to avoid hearing any spoilers about a movie he's going to watch, even knocking someone out with a shovel and eating another student alive. In "The Laziest", he and Darwin deliberately ruin Lazy Larry's life just so that he'll help them win a bet.
* The Amazing World of Gumball: In "The Triangle", Leslie tells Darwin to test this in the cafeteria. It works at first, but then Mr. Small drops things and when he bends to pick them up, his butt gets very close to Darwin's face. Darwin gets terrified.
* The Amazing World of Gumball in the United Kingdom is given the rating of PG for the same content (including crude humor and language, disturbing scenes, and comic violence.)
* The Amazing World of Gumball: In "The Upgrade," Gumball and Darwin take Bobert the robot to be fixed at the Bobert Store, where everything is bright white, even the employees. They end up buying a new Bobert—and while the original was already white and rather sleek, the new model is shiny black and even sleeker.
* The Amazing World of Gumball: In "The Void," Gumball and Darwin watch the school cheerleaders disastrously rehearse. Gumball cheers supportively, but Darwin expresses his criticisms.
* The Amazing World of Gumball: In "The Wish," Principal Brown enlists Gumball and Darwin's help to better express his feelings to his shaky girlfriend, Miss Simian. With their help, he regains Miss Simian's love after mustering the courage to tell her how much he loves her.
* The Amazing World of Gumball in "The World": a pillow on a bed creepily mentions that "I like to listen to your dreams."
* The Amazing World of Gumball in which Darwin doesn't appear, and Gumball doesn't appear in "The Sucker". Neither of them appear in "The Singing", "The Spinoffs", or "The Buddy" either, despite being mentioned.
* The Amazing World of Gumball, in which Gumball and Darwin are learning how to channel their rage into a violent vocal release. Darwin attempts to do so, only to create a giant bubble of "fish-gas". Their teacher then pops it, cuing black-and-white footage of a house caught in the middle of a nuclear bomb test.
* The Amazing World of Gumball is about the everyday life of a young boy and his

family. Did we mention the boy and his mother are blue anthropomorphic cats, his sister and father are pink rabbits, his brother is a goldfish that spontaneously sprouted legs one day and was adopted by the family, and his love interest is a peanut with antlers who turns out to be a shapeshifting fairy after she literally comes out of her shell? And that's not getting into how weird Gumball's friends and neighbors (and the crazy situations they get into) are.
* The Amazing World of Gumball is a more literal example of this trope. Darwin used to be the family's pet fish until he grew legs and got too big to be in his bowl all the time.
* The Amazing World of Gumball, is an anthropomorphic peanut with antlers.
* The Amazing World of Gumball is a strange example, as it falls under this trope even though the characters, by and large, don't know that they're in a TV show. Just a few examples:
* The Amazing World of Gumball is based on her self-image. She's rather self-conscious about it, which indirectly leads to her mimicking the way people describe her (or that she thinks they're describing her). William and Ocho’s powers are also based on anger.
* The Amazing World of Gumball is sad. Asked why, Mr. Small says it's because after becoming a teacher to be an inspiration, he has nothing to show for it and nobody even seems interested in his advice. Eventually it's revealed that all of the teachers feel the same way. Gumball and Darwin decide to take Mr. Small's advice to make him feel better and disaster ensues. Though it should be noted that this is largely because Gumball and Darwin keep taking his advice too literally.
* The Amazing World of Gumball" is spent with Nicole recalling how she met Richard when they were children, but she isn't telling her children about it, just recounting it in her memories.
* The Amazing World of Gumball is this. He even hits on girls who already have love interests (especially Penny, who is particularly unimpressed by his advances).
* The Amazing World of Gumball is where Tina's gym team challenged Gumball and Darwin with these and they buff up to challenge her back.
* The Amazing World of Gumball, it adds a laugh track that, as Sarah points out, gets louder the worse the joke is.
* The Amazing World of Gumball) It turns out he had a feather tickling his gills, which is what was causing the violent sneeze attacks.
* The Amazing World of Gumball", Jamie (who has been fixated on forcibly making Gumball her boyfriend during the episode, to everyone's horror) corners Gumball in the library, and he briefly crawls into a fetal position while sucking his thumb and calling out for Darwin's help.
* The Amazing World of Gumball jobs that his quitting left way too many vacuums for the rest of the town to fill.
* The Amazing World of Gumball joining in). The rules were fleshed out for real, though, in "The Game", but since the cards apparently literally create whatever hazards they claim to (like "the floor is lava"), it still results in total chaos.
* The Amazing World of Gumball kind of antagonist, but there are some exceptions:
* The Amazing World of Gumball lampoons this multiple times by taking it to the logical conclusion:
* The Amazing World of Gumball, leading to them being given a million dollars by the police who have mistaken it for a real hostage situation.
* The Amazing World of Gumball: Leslie the flower has a feminine appearance, voice, and usually hangs out with the girls, rather than the guys.
* The Amazing World of Gumball, Miss Simian has apparently been teaching since the Stone Age, and is at least 2 million years old. Her father's skeleton is on display in a natural history museum.
* The Amazing World of Gumball", Mr. Small in the woods is attacked by squirrels, almost bled dry by leeches, and even the butterflies try to feed him to a giant leech.
* The Amazing World of Gumball music, and waiting for "Sluzzle Dude" to come in through the toilet and leave presents.
* The Amazing World of Gumball. Nicole fights some guards and is confused when they

show up beaten right after the flash.
* The Amazing World of Gumball: Nicole Watterson is considered quite the looker by most fans of the show. Richard, on the other hand...
* The Amazing World of Gumball not a woman... who can say she's never lied on her resume, either."
* The Amazing World of Gumball: Ocho doesn't speak in the first season, and many background characters don't get a chance to speak because of how unimportant they are.
* The Amazing World of Gumball, Ocho's mom is a giant 8-bit spider. Her son is also larger than most normal spiders, but he is still small.
* The Amazing World of Gumball of Gumball's family and most of Penny's were listening in through the other phones—as was one wiretapper, apparently a government agent, that everyone ignores.
* The Amazing World of Gumball often qualifies. Usually very optimistic, peppy, always smiling, and slow to anger, it can be surprising to see him break his usual mould.
* The Amazing World of Gumball: One flashback to when they were teenagers courting has Richard standing on a ladder to serenade Nicole outside her bedroom window.
* The Amazing World of Gumball, one of the videos watched is Tobias playing a prank on his father at 5 AM that made his family think they were being robbed. This is the reaction when he reveals it was all a prank:
* The Amazing World of Gumball only for getting a job as a pizza delivery man.
* The Amazing World of Gumball on the main characters. In "The Shippening" she even finds a magic book that makes her fanfiction become canon.
* The Amazing World of Gumball, organs included. Gumball's brain leaves his body when Gumball tries reading a book, and spends the rest of the episode outside it. On one occasion he tried to eat something disgusting, causing an argument between his tongue, stomach, heart, brain, and what is implied to be his anus.
* The Amazing World of Gumball or if they actually get along with her it turns out there's something wrong with them. The one exception being "The Friend", where Anais does manage to make a friend, though he has to leave at the end.
* The Amazing World of Gumball: Parodied in "The Money." When Gumball begs his family not to sell out by appearing in a Joyful Burger commercial, Darwin tells him that advertising doesn't need to feel forced, as he takes a sip from a Joyful Burger cup and winks at the camera. Anais concurs with Darwin while discreetly stepping to the side, revealing a Joyful Burger poster on the wall behind her.
* The Amazing World of Gumball: Parodied in "The Money", when Nicole considers the family doing a Japanese commercial for Joyful Burger.
* The Amazing World of Gumball, Penny outruns a wolf using her shape-shifting powers. When the wolf starts to cower and back away, she taunts it, assuming it is afraid of her. Penny soon realizes that the wolf is actually fleeing from an approaching bear that she had her back to.
* The Amazing World of Gumball performs Sussie with her chin and (as of season 5) provides her voice.
* The Amazing World of Gumball predators like a teal deer with fangs and a rooster head and giant cyclopic bear with antlers.
* The Amazing World of Gumball refuses to apologize to Gumball and Darwin after accusing them of something they didn't do, despite Principal Brown urging her to do so. She replies she'll apologize "when fish grow legs and walk out of the water". Darwin (who happens to be a fish with legs walking around on dry land) is about to reply, but Gumball immediately proceeds to cover his mouth}.
* The Amazing World of Gumball removes her head every night before she goes to sleep and puts it in the freezer.
* The Amazing World of Gumball Richard was hiding inside the other two objects.
* The Amazing World of Gumball running short and needing as much filler as possible to pad out the timeslot.
* The Amazing World of Gumball scenario, he finds himself near a crocodile lady holding the bagel in a way that makes it look like he's proposing to her. She accepts, which confuses Rocky.

* The Amazing World of Gumball setting uses to erase unwanted events from the timeline. This provides an easy way to explain any continuity errors.
* The Amazing World of Gumball Shaggy Frog stories. Strangely, it works, as the Fitzgeralds see the pointless stories as a symbol for their mindless squabbles.
* The Amazing World of Gumball. She has no reason to act so cruel, but she just loves to make everyone suffer out of pure joy.
* The Amazing World of Gumball). She is shown to shut off her parents' comments, though.
* The Amazing World of Gumball) shelters him heavily as his emotions are every bit as enormous as he is.
* The Amazing World of Gumball", she willingly splits in half to avoid sharing a bus seat with Principal Brown.
* The Amazing World of Gumball shows Gumball getting stuck entirely inside a vending machine while trying to grab some candy without paying, a fireman cutting him out with a buzzsaw, then just paying for one regularly the next time.
* The Amazing World of Gumball (since most of the people in Elmore are based on food products, like Banana Joe, Sarah G. Lato, Anton the slice of toast, and the town's police force).
* The Amazing World of Gumball sometimes delves into the topic of global warming:
* The Amazing World of Gumball: Sometimes, minor characters will be shown in a place, and a few moments later, they will be in a completely different place, and they wouldn't have had time to move. Some episodes also take place during school time, but at another place, and students and staff members will be there instead of being at school.
* The Amazing World of Gumball, so Warner's credit was held back to the regular voice cast for that episode.
* The Amazing World of Gumball. Species is reflected in their behavior to various degrees, but all of them live in houses, have jobs, and send their children to school like humans.
* The Amazing World of Gumball, starting with Gumball losing his colours. As they attempt to recover their money, they start to warp the world around them, until only the storyboard is seen and they appear drawn on Post-it notes. After they sign the contract, the world returns to normal, but Gumball remains drawn in a Post-it because he refused to sign.
* The Amazing World of Gumball's "The Oracle" revolves around Gumball hoping to prevent an embarrassing event foretold by Banana Barbara in the form of a painting. Gumball's efforts to prevent the seemingly unlikely circumstances shown in the painting cause all of them to occur, including a shower of raccoons that is a direct result of Gumball sabotaging the family car.
* The Amazing World of Gumball stretches out Gumball and uses him as a living bench so that she and Darwin (whom she has declared to be her boyfriend) can sit together in a romantic fashion. When Gumball tries to voice his discomfort, Jamie angrily reminds him that benches don't talk.
* The Amazing World of Gumball, supernatural creatures like ghosts and witches are openly real and more than one of Gumball's classmates are some kind of monster. However, in several episodes, including "The Curse", "The Poltergeist", "Christmas", and "The Wand", show that only stupid people or children attribute things to the supernatural.
* The Amazing World of Gumball" takes a huge swipe at the concept of Planned Obsolescence.
* The Amazing World of Gumball talks about how he would never condone such a thing, but that it would be noble and he wouldn't be looking. Principal Brown insists fighting isn't OK, then gives lengthy "hypothetical" instructions on how to beat someone else up with their shoe.
* The Amazing World of Gumball) that changes as the butterfly changes expression.
* The Amazing World of Gumball that drove away. Then that turtle turns out to be an indestructible force of evil, and the van returns in later episodes selling other mysterious items.
* The Amazing World of Gumball that the show ultimately used. Thankfully for the

fans, a movie has been announced, finally giving a chance for the series to end on a high note.
* The Amazing World of Gumball: "The Cage" has Gumball and Darwin training wimpy geography teacher Mr. Corneille to be a cage fighter, to raise money for the school at an MMA-style challenger fight. While he earns the adoration of the school nurse, he is also brutally squashed at the final fight.
* The Amazing World of Gumball. The color motif is inverted with their parents, Richard and Nicole.
* The Amazing World of Gumball, "The Colossus", Hector the giant goes on a rampage, and suddenly his animation is incredibly fluid and dynamic, unlike the more stylized animation of the other 2D characters on the show.
* The Amazing World of Gumball: "The Console" has Gumball, Darwin and Anais sucked into a game called "Inverted Paradox: The Enemy Within." Gumball considers it this trope until it's revealed the main enemy is the game they've been playing the whole time.
* The Amazing World of Gumball. The German sentences, however, don't match what the angered tone suggests.
* The Amazing World of Gumball, "The Inquisition", the school gains a new superintendent who wishes to "fix" the flaws of the students by turning them into human characters. Gumball and Darwin find themselves the only two left and run for it, only to encounter Tobias, Tina and Sussie who have undergone the process. They corner the two, imploring them to join them and chanting "It's better this way."
* The Amazing World of Gumball, the main characters aren't surprised about that, but that Russo (a big, red block with a masculine voice) is a woman.
* The Amazing World of Gumball, there is a gang of bullies, whose strongest and angriest member is a pink bear.
* The Amazing World of Gumball. There's a reason Gumball and Darwin first hid the game under their bed, then threw it away.
* The Amazing Worldof Gumball "The Rival", baby Anais (who had demonic powers back then) repeatedly tries to kill Gumball and Darwin. In one scene, Gumball tries to play "peek-a-boo" with her, leading to such a moment where he opens his eyes and they're suddenly to the middle of a busy highway.
* The Amazing Worldof Gumball, the Robinsons and their son Rocky are 3D puppets animated as if they were actual Muppets.
* The Amazing World of Gumball", the six-year-old school hamster Chris Morris is so slow that when Darwin and Gumball try to chase him, they keep running past him until they try going "90s internet slow".
* The Amazing World of Gumball: "The Test" opens with Gumball criticizing ElmoreBuzz, which is full of useless listicles like "26 Pictures of Llamas that Pretty Much Sum Up the Human Condition" and shameless advertising scams. When he agrees to take a "Which Sitcom Character Are You?" quiz, he berates how arbitrary the questions are.
* The Amazing World of Gumball, the title character splices together footage of his friends and peers to make it seem as if they are praising him:
* The Amazing World of Gumball the titular character tries relentlessly to get his sister to tell him a secret she knows. He pokes her repeatedly in the head until warned "You do that one more time...." . The warning goes unheeded and the next scene depicts him with several scratches all over his face.
* The Amazing World of Gumball the trope by realizing what Gumball is doing and calling him out on it, pointing out that deliberately focusing on tiny issues is a slap in the face to underrepresented groups, who have much more serious problems and shouldn't be used to score holier-than-thou points in petty squabbles.
* The Amazing World of Gumball: The Van Shoopkeeper didn't appear after Season 4 (and got mentioned in Season 3), and has made only five appearances so far, but he's the reason Darwin (the main character along with Gumball) got adopted by the Watterson family.
* The Amazing World of Gumball", the Wattersons learn they have Chinese doppelgangers, who make money online by copying their actions in funny videos. When Gumball finds the family's official website and translates it into English, the

character descriptions become this.
* The Amazing World of Gumball: The Wattersons' phone number is 555-0199.
* The Amazing World of Gumball" The Wattersons prepare dinner then Nicole was accidentally pelted with whipped cream by Darwin who starts this. She was gonna snap but after reminiscing her past she decides to have it with them.
* The Amazing World of Gumball, this happens to Gumball and Darwin when, against Anais' warning, they attempt to extinguish a burning TV with water, causing it to fry them offscreen.
* The Amazing World of Gumball, this is the entire point of the episode "The Gi".
* The Amazing World of Gumball, this is what caused Richard Watterson to throw away most of his money on an online scam ("better future for your children" turned out to be "better future for your children of your children's children's great-grandchildren"). To be fair, this happened back in the 90's.
* The Amazing World of Gumball, this trope is the natural state of Gumball and Darwin.
* The Amazing World of Gumball to be their grandpa Louie's friend. Most of it leads up to the pun in the episode title.
* The Amazing World of Gumball to celebrate its 200th episode. They also held one on Super Bowl Sunday of 2018, as well as on Christmas Day of the same year.
* The Amazing World of Gumball to damage any of them, and gets his leg stuck in the deck chair.
* The Amazing World of Gumball to have the fluid drained. The sign above the entrance reads "Unlicensed Doctor" and the "Un" is burnt out.
* The Amazing World of Gumball to him, to the extent that they barely acknowledge him as a person.
* The Amazing World of Gumball tries to sabotage Darwin's slide-whistle solo by using a dart gun disguised as a flute.
* The Amazing World of Gumball used to make dollars so technically the expression is right to some point, before going back to rant more, culminating with her doing incoherent angry sounds.
* The Amazing World of Gumball virus is played completely straight, even though said virus makes everyone puke rainbows and act ridiculously happy. Also, the virus is spread through hugs. This episode currently provides the page image.
* The Amazing World of Gumball wearing the dress, including a balloon with a face scribbled on it and a fire hydrant. Apparently, it was just a really nice dress. (Given they live in a world where animals and objects spontaneously become intelligent, clothes may really be the only thing they can use as a standard of beauty.)
* The Amazing World of Gumball wears. Once Darwin joins the Watterson family at the end of the episode, his feet are worn out from running around barefoot, so Gumball gives him his shoes.
* The Amazing World of Gumball, when Darwin's first facial hairs appear, Gumball uses chewed gum to get rid of them, which makes Darwin scream. Then they both become much hairier.
* The Amazing World of Gumball: When Gumball and Darwin are trying to figure out the meaning of life in "The Question", the planets of the solar system sing a "feelgood song" about how meaningless their existence is on the cosmic scale of things.
* The Amazing World of Gumball when he starts ranting at Tobias after receiving his long-awaited high five and butt slap combo:
* The Amazing World of Gumball," when Nicole comes home from work, Richard is singing the song from the Elmore Wrecking Yard commercial ("We wreck 'em!")
* The Amazing World of Gumball, when Nicole, her children and Larry are trying to chase Richard to prevent him from delivering the next pizza in time, so that Larry can fire him and prevent the fabric of the universe from being completely torn apart, the more they get close to him, the more they are affected by his universe-tearing power. In a brief instance, they become subjected to a gender flip, among other reality distortions such as a body swap or a realistic rendering of their cartoony selves.

* The Amazing World of Gumball", when reality begins to collapse once Richard gets a job as a pizza delivery man. Luckily, he's fired right before it happens, resetting things back to normal.
* The Amazing World of Gumball", when Richard announced that he and Nicole are getting a divorce thanks to Rob taking the Parental Filter off of them.
* The Amazing World of Gumball, when Richard casts a rewind spell, Gumball pretends it works by saying the words of his previous sentence in reverse order, and Darwin corrects him by actually speaking backwards.
* The Amazing World of Gumball when the Sun gets mooned by... the Moon. With 3D butt cheeks.
* The Amazing World of Gumball when they were children. While reminiscing, she imagines all the ways her life would be different if she had done different things in the moments leading up to their meeting. Several of the imagined outcomes are her suddenly dying.
* The Amazing World of Gumball, where Gumball and Darwin go into the internet to get inside their neighbor's computer. Turns out they were simply imagining it and were just making fools of themselves.
* The Amazing World of Gumball, where Gumball ask permission to use a little girl's bike and she takes the opportunity to gouge as much money from him as possible. Of course he ended up destroying it anyway.
* The Amazing World of Gumball where Gumball had a very bad day but for some reason, it keeps repeating over and over and he must find a way to break the loop while making the most out of the predicament. The elements of the day include:
* The Amazing World of Gumball) while background objects are live-action.
* The Amazing World of Gumball while interacting with Gumball and Darwin. Taken to an extreme at the end of the episode where Gumball is forced to abide by Sarah's music due to the player getting stuck, until he simply destroys it and cuts off all the music entirely.
* The Amazing World of Gumball: While most of the characters are either funny creatures or humanoids, there are a few exceptions:
* The Amazing World of Gumball, who has a very high-pitched nasally voice.
* The Amazing World of Gumball with Gumball himself who is a terribly self-centered guy whose focus is to be the center of attention or get something by petty means and often the butt of the jokes made. Other times, however, he does have a genuine desire to help others and don't mean any harm to anyone. There's also the middle ground where he helps others for selfish goals or is just completely indifferent to a situation.
* The Amazon arc is not as lighthearted as many examples, but compared to
* The Amazon Echo, a speaker/microphone array that acts as the interface for Amazon's cloud-based personal assistant, has a long,
* The Amazon Echo does this to let the user know that it is listening to their commands.
* The Amazoness Quartet (except for JunJun, who escaped unscathed) also got this - CereCere became CeleCele, PallaPalla became ParaPara and VesVes became BesuBesu in the dub and BethBeth in the subtitles. They're named after asteroids which were named after Roman goddesses - Ceres, Pallas and Vesta, respectively.
* The Amazon Legion focuses on one of these, with particular attention given to how to maximize the effectiveness of the women in it given the general physical limitations compared to men.
* The Amazons are described as similarly having children with whatever men they happen to conquer. The queen, Pretty Little Flower, is mixed-race.
* The Amazon's Pledge would be like if that character were a statuesque, musclebound and buxom human Amazon who feels that she owes the equivalent of a life-debt to the male hero, Jorem, because of a good deed he did for her, including her sexual favor.
* The Amazons were villains whose intended purpose was to demonstrate
* The Amazon to let him in, saying that someone has to pay for Wayne's "crimes".
* The Amazon Trail also counts. And yes, you travel up the Amazon river. In a canoe.

* the Amazon Trio, who die but gain human souls that are allowed to dwell in Elysion afterwards.
* The Ambassador Hotel chose it to film a TV special in 1988). It was ultimately demolished in 2005, and a complex of public schools were built in its place.
* The Ambassador Hotel In Los Angeles (notorious for being the location of Robert F. Kennedy's assassination), despite enjoying a very active afterlife as a movie set for various films and TV shows, still steadily decayed for two decades to the point where spores grew through the floor and carpets. Ironically, its final role was a younger version of itself in the Day-in-the-life movie
* The Ambassadors of Death". A tragic example, he saw his crewmates unintentionally killed by the Ambassadors. This drove him insane, and he honestly believed he was acting in the Earth's best interest by destroying the Ambassadors, unknowing of the dire consequences this would unleash.
* "The Ambassadors of Death": General Carrington. His actions are prompted by xenophobia driven by his own encounter with the alien beings when he piloted Mars Probe Six some years earlier. His co-pilot, Jim Daniels, was killed on contact with the aliens and Carrington signed the treaty with the aliens to lure three of their number to Earth, where he hoped he could unveil their real agenda of alien invasion.
* "The Ambassadors of Death" has an inversion of the usual moral roles in this trope, with the heroes invading a press conference where the main villain is planning to murder an alien on live TV in order to start a war.
* "The Ambassadors of Death" radiation, at intensities such that a friendly greeting fired directly at a human would instantly kill them.
* "The Ambassadors of Death", they fight normal humans who aren't as well equipped as them.
* "The Ambassadors of Death" used the first episodes of a serial to fulfill the same function as a cold open.
* The Ambassador) trades lower base damage for guaranteed critical hits every time he successfully sabotages an Engineer building or backstabs an enemy.
* "The Ambergris Element". The planet Argo's surface is almost completely covered by water, making it a Water Planet. It used to be more like Earth but violent seismic disturbances caused almost all of the land to sink beneath the waves.
* The Amber Room, German soldiers disassembled the Amber Room and relocated it in Königsberg (today Kaliningrad). Since Königsberg was heavily bombed towards the end of the war, the fate of the room is still unknown. In the 70s, the Soviet government decided to construct a replica.
* The Amber Spyglass Mary Malone takes her clothes to swim after some seed pods, much to the shock and gratefulness of the Mulefa. Also, both Lyra and Will skinny dip near the end of the book as a way to bathe.
* The Amber Spyglass, the Mulefa clutch giant seed pods in specialized gripping appendages and roll around like living motorcycles. It's mentioned that when they walk, they do so in a rather clumsy and ungainly fashion, due to the placement of their legs (one in front, two in the middle, one in back, like a diamond shape).
* The Amber Spyglass there's a mention of enemy soldiers riding a giant bird, later falling to their deaths due to a laser beam from the Intention Craft.
* The Amber Spyglass, wheeled antelope/elephant-like creatures. They're intelligent and kindly and adopt her readily — but they admit, even after months of getting to know her, that they find her shape ugly and hideous because she's utterly unlike anything they've ever seen.
* The Amber Spyglass, when Mary is telling Lyra and Will about love, Lyra experiences a...curious sensation. This description is used to indicate her oncoming puberty and incipient sexuality:
* The Amber Spyglass, when the gang reforges the Subtle Knife. In an interesting variation, the blacksmith is a bear.
* The ambiance is very supernatural, with green fog and lightning. Fort Morgan looks eerie and foreboding.
* The Ambient Plasma Wave Drive would use ambient plasma as its reaction medium, generating waves in it to propel itself. Sort of like how a propeller uses ambient

air (or water) to create thrust.
* The Ambiguously Gay Duo, these villains are only half right but, it's unknown which member of the duo is the mistaken one.
* The Ambiguously Gay Duo with this, and lampshaded constantly by everyone who saw them in action.
* The Ambiguous Puzuma is the fastest animal on the Disc, achieving near light-speed (which isn't too hard, given the low speed of light on the Disc). While they can never be seen, their remains are occasionally found on cliffs and large rocks. These show a black-and-white checked coat and a thin, flat shape.
* The Ambition of Oda Nobuna and a rifle alternately for different types of engagements.
* The Ambition of Oda Nobuna, and did it because they believed strongly in Yoshiharu and Nobuna's idea of a unified Japan.
* The Ambition of Oda Nobuna games based on that era, and didn't even have much of a shock over transported back at time at all.
* The Ambition of Oda Nobuna pretends to be a man for unclear reasons. Her "wife" is actually a boy, as well. Neither of them knew this when the (political) marriage was arranged.
* The Ambition of Oda Nobuna, several characters talk of marriage. While they do talk about marrying for political gain and alliances, ultimately they conclude that it's more about love. While commoners may or may not have done this in the past (and certainly in Yoshiharu's timeline), back around this time period through much of the world nobility often married for political reasons, largely in an attempt to unite lands or nations together.
* The Ambition of Oda Nobuna, who is conveniently killed off, and tells the young lad to take his place and help Oda Nobuna to achieve her dreams of uniting Japan.
* The Ambition of Oda Nobuna, Yoshiharu does this to buy time for Nobuna to escape.
* The Ambitious Vacuum Cleaner by George Carlson (1915) is one of the earliest examples on record. It depicts a Edwardian style vacuum cleaner going on a rampage when left unattended, sucking up the entire contents of the owner's home in seconds, including the cat! Fortunately a strong gentleman friend of the owner manages to open the cleaner up, restoring the items. (It's unclear whether the vacuum is alive or not, but 'ambition' is not usually something associated with inanimate objects.)
* The Ambulance, the main character sees an attractive woman walking down the street and attempts to hit on her, she rebuffs him, he follows her and continues hitting on her, she collapses and the titular ambulance picks her up. He then spends the rest of the movie risking life and limb, fighting a sociopathic doctor constantly trying to run him down with an ambulance, and he never even got her name. After he rescues her from certain excruciating death and declares he did it for true love which he recognized at first, she asks him to call her boyfriend and let him know she's ok.
* The ambush and assassination of the FBI director during his trip to Colombia in
* The Ambush: share evidence that would exonerate the defendant. The same applies for witnesses; with rare exceptions, they must be approved by the court in order to be admitted to testify.
* The AMC Eagle was the ur-example of a crossover SUV, nearly two decades before the term was coined.
* The AMC I6 engine was first produced in 1964 and outlived the company that made it, its final application being the Jeep Wrangler in 2006 (in itself a workhorse, being visually unchanged for decades). However, the old parts are often
* The amendment is also a major plot point in the season 2 premiere when
* The Amendment to Be wants flag burning to be against the law because "those liberal freaks go too far".
* the Amenti, the Reborn. No matter how often they died again, they could resurrect without a hitch (well, barring the waiting period). The OWOD was a bit kinder on this front than the NWOD.
* The America’s Cup Bibliography of these are murder mysteries.”
* The American aircraft carrier USS Forrestal had a number of fires on board

during her deployment. The worst fire happened in 1967 and killed 134 people. Sailors jokingly referred to the ship as the "USS Zippo," "Forest Fire," and "Firestal." And the USS Enterprise (CVN-65), the first USN nuclear supercarrier, has nicknames "Three-Quarter Mile Island" and "Mobile Chernobyl".
* The American and Russian Sniper and Engineer classes used British Lee-Enfield No. 3 rifles instead of Springfield M1903s or Mosin-Nagant rifles. A later patch replaced the USMC Engineer's No. 3 with the M1 Garand, but the US Army Engineer as well as the Sniper for both factions still use the Lee-Enfield.
* the American, and Tyler needs to start acting like it, even if he doesn't feel it.
* The American assault on Iwo Jima, which itself is not only a real-life Mordor lookalike with it's black sulfur sands but also one of the most heavily defended Japanese-held islands, definitely fits this trope.
* The American Astronaut has a handgun that can turn people to ash if they forget his birthday.
* The American Astronaut has Sam, who must return the late king of Venus to his family in Earth, to do so, he must provide Venus with a new king; so he will give the owner of Jupiter a woman and he will give in return The Boy Who Saw A Breast so he can be the new Venusian king. The woman for the Jupiter ruler in turn, is a clone of Eddy, the owner of the Ceres Crossroads who wanted a cat.
* The American Astronaut planet chock-full of miners whose most advanced technology on the planet seems to be helmets with flashlights on it.
* The American Astronaut, the space is pretty much dominated by roughnecks and manual laborers.
* The American astronomer Edwin Hubble spent two years at Oxford University beginning in 1910, and fell in love with England. A scholar who'd known him in America met him again at Oxford:
* The American auto industry has careened from one extreme of this to another — they
* The American Ballet Theater version keeps the snowflakes white, but still gives the impression of Clara and the Prince being trapped in a deadly blizzard.
* The American base defense is the Patriot missile launcher, which fires a salvo of four missiles at it target. Admittedly not very impressive, except that it transmits the target's location to nearby turrets, causing them to launch their own missiles at it, resulting in this trope.
* The American Basketball Association formed in 1967 to compete against the NBA, but was actually a long-term plan to merge its teams with the NBA, which happened (for some of them) in 1976.
* The American-built F-104 Starfighter was a supersonic fighter aircraft that was, among other things, slightly faster than the F-16 Fighting Falcon, cheaper than the F-5E Tiger II, and better armed than the Soviet Su-15 Flagon. It was a Mach 2 capable interceptor, and was a pants-browning terror to fly. It got the apt nickname "The Missile with a Man in it": its high speed, low cost, and moderate firepower came at the expense of protection and the ability to actually
* The American cable channel TNT not only edits for commercials, but changes the timing of commercial breaks. After the opening teaser and credits, there should be a commercial break. Instead, TNT runs the first act directly after the opening credits. This means they later hack into the middle of another scene to put in the ads that should have run at the beginning. It's jarring.
* The American Celtic-Rock band Tempest has a number of songs that go this way, either because they're folk songs that have been set to a rock beat or because they're written in the style of such songs. For example, "The Journeyman" is about a journeyman tinker who stops in a town and within three days the mayor's daughter has declared her love for him. They promptly get married and set off for life together against the protestations of her parents.
* The American Center for Law and Justice, founded by Pat Robertson, is a Christian conservative counterpart to the ACLU that litigates for pro-Evangelical Christian, pro-life issues (even though the ACLU
* The American Civil War: agrarian, traditionalist Readceras and industrial, more

liberal Dyrwood resemble the sides pretty well, though the reasons for war were different.
* The American Civil War, and, by extension, any civil wars. Was there a Confederacy-tan, and if so, what happened to him/her? Or did Alfred develop a split personality?
* The American Civil War: An election heavily focused on race relations has the Democratic party falling in shambles due to growing divides, only unified in their belief that the Republican had to be stopped from winning at all costs. This divide ultimately costs them the election, and the Republican's rise to power practically breaks the nation in half due to mass political polarization, with much of the country unwilling to extend support to the new president, his mandate questioned due to an unspectacular popular vote performance, and several Democratic congressmen boycotting his inauguration. Subverted as there is no physical Civil War (although there have been several instances of politically and racially-motivated violence) nor has there been any secession (across from very fringe minor secession movements in California and Texas which barely get any mainstream support) while those representing the "old order" are this time the ones in charge at Washington.
* The American Civil War. An excellent brigade and division commander, he was merely competent at the corps level and performed poorly while in command of an army.
* The American Civil War a unit that Jackson reputedly hid from international observers, not to prevent international observes forming a poor impression of his army, but to stop them getting robbed by the troops and their camp followers. Their reputation on the battlefield was, however, excellent.
* The American Civil War, but it wasn't "biting the bullet" either. It was the recovery process in the hospitals that was more likely to kill you, actually, as you waited around to see if you got gangrene or not and tried not to catch anything from the sick and wounded people all around you.
* The American Civil War. But then the southern democrats dug in, and this issue is still a problem.
* The American Civil War by Union cavalry, who had the reputation of retreating whenever they were met with any kind of resistance. An old joke among soldiers, "You ever seen a dead cavalryman?"
* The American Civil War, Confederate cavalry general Nathan Bedford Forrest was distinguished for his skills as a warrior as much as he was for his leadership. Throughout the course of the war, he was wounded numerous times and killed more than 30 Union soldiers in combat. He also killed one of his own officers in self-defense, Lt. A. Wills Gould, after the two of them got into a heated exchange over a transfer order that Forrest had signed. Gould pulled his revolver and shot Forrest, but Forrest still managed to draw his knife and stab Gould to death after being shot.
* The American Civil War, Confederate guerrillas like Jesse James tended to carry multiple revolvers. The cap-and-ball revolver had six shots compared to the one shot of most weapons of the day, but once it was empty it was still slow to reload. Thus, a few men on horseback carrying 6 revolvers each could take out a platoon of regular infantry, as long as the fighting was at close range.
* The American Civil War. Confederate soldiers in particular tended to wear non-standard uniforms, due to their government generally being less organized and specifically having serious problems supplying the troops. If you didn't have an overcoat you might take one off a dead or captured Yankee. Combine that with poor communications in a pre-radio era and the huge amounts of smoke produced in combat, and the general confusion caused by combat, and Friend Or Foe happened many times.
* The American Civil War documentary regarding the war devotes its entire first episode to the backstory of the civil war.
* The American Civil War: during the Battle of Shiloh, he sent his personal physician away to tend to some injured Union soldiers, meaning that he didn't have medical care when he was wounded and bleeding to death.
* The American Civil War for the First Battle of Bull Run/Manassas: the

Confederates there were led by P.G.T. Beauregard. Sobol pointed this latter fact out in later editions.
* The American Civil War from the Union showed up in his well-worn field uniform. An observer remarked that, by appearances, one would've expected Grant to be surrendering to Lee.
* The American Civil War, generals got a lot of use out of the local papers, which often reported troop movements in the area. Robert E. Lee was particularly fond of the Northern papers during his Maryland and Pennsylvania campaigns.
* The American Civil War gradually broke down, with the horrors of Camp Andersonville (for which the commander was executed in one of the first war crimes trials) an ultimate consequence of this.
* The American Civil War had been a frigate before that, so not really an example of this trope.
* The American Civil War had some Union soldiers in grey uniforms and Confederates in blue uniforms. Both sides had not adopted their standard uniform colors until a few months after the battle.
* The American Civil War. He's basically clad as a fusion of Robert E. Lee and a Union officer.
* The American Civil War, Hofstadter noted that parties often present or dress up their platform on anti-capitalist themes while at the same time furthering business interests and tricking the public into believing that they really are going to reform the system:
* The American Civil War. Kansas was ultimately admitted as a free state on 29 January 1861.
* The American Civil War lasted for years due to the well-executed retreats by either side after losing a battle. Defeated armies were almost always able to get away. No army was forced to surrender in the open field until the remnant of Robert E. Lee's Army of Northern Virginia was brought to heel in the final days of the war.
* The American Civil War later made it clear that it was also unconstitutional. (In theory, a state could exit the Union by means of a constitutional amendment, but that's rather different.)
* The American Civil War - many in the American South were absolutely convinced that Lincoln's election in 1860 would mean the most radical Republicans would get control and destroy traditional Southern institutions (read: slavery) and their only course of action was to start an armed revolt - thus ultimately assuring that slavery was killed off just as they predicted.
* The American Civil War, notably the flashy J.E.B. Stuart and George Armstrong Custer, conformed to the image, while some of their more business-like peers like Nathan Bedford Forrest and Phil Sheridan showed how cavalry could be successfully used at the time as mounted infantry. Perhaps not suprisingly, Stuart and Custer had been professional cavalry officers before the war, while Forrest had been a civilian and Sheridan came from the infantry and only was transferred to the cavaly in May 1862.
* The American Civil War. Nowadays, the genre is dead together with slavery itself, remembered only as a historical curiosity in the grand scheme of the run-up to the Civil War.
* The American Civil War Oliver Wendell Holmes, no less! As the war went on, Washington was said to have become one of the most fortified cities in the world, owing to both its importance as the seat of government and its location close to the front lines in Virginia. The war, in fact, was a major catalyst for its growth from a minor city into a major metropolis, appropriately enough given how the war ended with a far more centralized nation than before.
* The American Civil War. Once that was done, they had a rest. Then they went back to shooting at each other.
* The American Civil War only looks like a victory for the North if you end it when Lee surrendered to Grant at the Appomattox Court House. However, the actual war was followed by the twelve-year-long Reconstruction Era, which despite being won by the North was eventually reversed by the South via Jim Crow.

* The American Civil War. Probably the most notable example was Confederate General John Bell Hood, who lost the use of his left arm at Gettysburg and later lost his right leg at Chickamauga. Amazingly, this did not derail his military career, as he went on to become commander of the Confederate Army of Tennessee.
* The American Civil War; Robert E. Lee's defeat here destroyed whatever offensive capability the Confederacy had (a few smaller offensives into the North would be attempted in 1864, but never to the scale of Gettysburg), galvanized the Union into finishing the fight, all but secured Abraham Lincoln's second term as President, and finally convinced potential European sympathizers that the South was doomed (though Lee's earlier defeat at Antietam and the Emancipation Proclamation of 1862 had already dealt a blow against the South, as nations like France and the UK were less likely to side with the slaveholding Confederates after Lincoln made the war an anti-slavery crusade).
* The American Civil War saw the mass-introduction of muzzle-loading rifles in place of smoothbore muskets, made possible by the invention of Minié ball ammunition which was small enough in diameter to easily ram down the barrel, yet could still create a good gas seal and properly engage the barrel rifling because of its expanding skirt. This made the rifles able to fire at the same rate as smoothbores, but with a much better chance of hitting what they were aimed at. When these more accurate weapons were incorporated into old-fashioned formations and movements which had been based on the need for massed vollies in order to hit anything, the result was often swathes of men being mowed down on both sides. The reason for the rather unsophisticated (even for the time) tactics employed in the Civil War was that the armies consisted almost entirely of raw conscripts. Normally a European-style army during that period would consist mostly of thoroughly-drilled line infantry, lots of cavalry, and very effective artillery. Furthermore, the chief mode of employment for line infantry would be to fire one massed volley at the enemy and then charge with bayonets. The point was not to spend much time under the enemy's fire. Because generals on both the Union and Confederate sides had mostly infantry of at-best suspect quality at their disposal (and the low quality and experience of the officers themselves made any coherent movement on the battlefield difficult) this kind of charge was pretty much out of the question; most times it was tried, it ended in complete disaster for the attacker, e.g. Pickett's infamous charge at Gettysburg. So with really no other options, generals in the war were forced to just line their troops up right in the opposing side's fire and hope their own men outlasted the enemy. European officers embedded with the American forces were appalled by what they saw, but there was very little practical advice they could give with the limited resources available.
* The American Civil War scenario whose aftershocks continue to reverberate to this day.
* The American Civil War, shortly after Virginia voted to secede from the Union, the counties in the area now known as West Virginia voted to secede from the state and join the Union. Much Virginian outrage ensued.
* The American Civil War. Sometimes it was not even necessary to dress in enemy uniforms as the only difference between the Federal and Confederate uniforms was the colour, so in near darkness it was quite easy to pass yourself off as a member of the opposing side.
* The American Civil War that involved cadets being sent into battle alongside trained soldiers.
* The American Civil War that this is war." The British government bought the ships in question.
* The American Civil War, the Confederates put this trope to work early and often. The Union always had more men, so the only way for the Confederates to win battles was to innovate- often to the point of weirdness. It sometimes meant luring the Union generals into making fruitless attacks, and sometimes meant making their own unorthodox attacks at vulnerable spots. Robert E. Lee was a fan of the trope, and Thomas Jackson was the master gamesman of it. Ultimately, the trope was subverted. Jackson, the best practitioner of it, met an untimely death, hurting the Confederate's ability to deliver these types of battle plans. Also, for most of the

early war these tricks were being played out against George McClellen, who was perhaps the worst wartime general in American history, as despite having an army that was much larger and better equipped than Lee, he was paranoid that he was always on the verge of being outnumbered and therefore was extremely prone to hesitation and ordering preemptive retreats, making it quite easy for Lee and Jackson to psych him out. By the time he was finally removed from his post, his replacements in the Union Army had learned to simply expect the unexpected from the Confederates, and to retain the initiative in spite of it.
* The American Civil War. The fact that Fort Sumter surrendered without any casualties from the shelling contributed to this idea. Instead it killed more Americans than any war before or since.
* The American Civil War. The ironic tragedy of it all, from the perspective of the film, is that it was precisely because of their outdated Romanticist view of war that the Confederate soldiers rushed off to fight an Enlightened enemy whom they could not have possibly defeated.
* The American Civil War, the piano part in the published edition begins with four bars of "Revielle" (sic).
* The American Civil War, the Proclamation of Retaliation was essentially "if you start executing/enslaving prisoners of war, so will we".
* The American Civil War the smaller Monitor, but the Monitor had a much shorter turning circle and was able to easily evade those attempts. All the while the ships kept firing away at each other in the vain hope that enough hits would cause the armor to fail. Eventually a chance shot temporarily blinded the captain of the USS Monitor, causing it to pull back momentarily before another man took over. The CSS Virginia interpreted the temporary pullback as a withdrawal, and thus began to withdraw itself, so when the USS Monitor returned to the battle, they thought the CSS Virginia was fleeing. Both sides promptly declared victory in the battle. As a result of the battle, all the European powers immediately stopped building wooden warships and built copies of the USS Monitor instead.
* The American Civil War, the United States of America is typically referred to as "the Union", and the Confederate States of America as "the Confederacy".
* The American Civil War to have the same value as the U.S. dollar. In fact, the Confederate dollar was more like a bond or promissory note than actual currency: It simply represented a promise that it could be redeemed for hard currency once the South gained independence. As the fortunes of war turned against them, Southerners lost faith that it could ever be redeemed, and inflation soared.
* The American Civil War, Union General Dan Sickles' leg was shattered by a 12-pound cannonball. In order to inspire his men to keep fighting, Sickles showed virtually no sign of pain in reaction to this. He relinquished command to General David Birney, and then calmly smoked a cigar as he was loaded onto a stretcher and carried away from the field.
* The American Civil War was a leader) was willing to compromise with the South. It opposed the expansion of slavery into new territories but was content to allow already existing slavery to remain with offers of compensation and graduated emancipation. The South refused even this moderate position (hated by the radical abolitionists) and went in open revolt upon Lincoln's election and eventually dug its own grave. John Brown, abolitonist insurgent, who killed slaveowners noted at the trial after his disastrous Harper's Ferry raid:
* The American Civil War were technically rebelling against the Union, so as to preserve their "liberty" to maintain and perpetuate slavery. As such generals such as Stonewall Jackson and Robert E. Lee became seen, in romantic Southern historiography, as rebel leaders as well.
* The American Civil War, when neither side wanted to be responsible for looking after large groups of prisoners. Eventually the Union realized that sending captured Confederates back to the South where they were allowed to work, if not fight, and thus prolong the war was not a good idea if you had the larger population.
* The American Civil War! When World War II ended, the US Government hoped it could recover as many of these silver "War Nickels" as possible from circulation, but

many stayed in circulation, and many more were hoarded as an investment, especially once the price of silver began to rise.
* The American Civil War, where both nations had "States of America" appended at the end. The Confederate States of American and the United States of America were usually referred to simply as the Confederacy and the Union.
* The American Civil War, where this was a key part of the Union's strategy to defeat the Confederacy; the blockade strategy was part of the greater Union strategy that became known as the Anaconda Plan. At full effect, approximately 95% of pre-war traffic in Confederate ports was cut off. It didn't help the Confederates that many of the blockade runners that managed to slip past the US Navy were carrying luxury goods rather then war supplies, since the former were worth a lot more.
* The American Civil War which, after having her exposed steering chains shot away, was surrounded by the Union fleet and pounded on until the supports for her 6" thick iron armor started to break, forcing surrender.
* The American Civil War, which successfully penetrated the blockade 33 times. Their actual contribution to the war was limited since the blockade runners quickly discovered that smuggling imported luxury items for wealthy plantation owners was far more profitable than smuggling weapons and other military supplies for the war effort. Laudanum, a medicinal tincture made of opium, was partiularly valuable as it was in widespread use in the 19th Century and many people were heavily addicted to it.
* The American Civil War, who in his 1865 inauguration speech stated "With malice toward none, with charity for all, with firmness in the right as God gives us to see the right, let us strive on to finish the work we are in, to bind up the nation's wounds, to care for him who shall have borne the battle and for his widow and his orphan, to do all which may achieve and cherish a just and lasting peace among ourselves and with all nations."
* The American Communist Party ended its longstanding support for the Soviet Union in 1989. Because after decades of blindly supporting Soviet militarism and gulags, it was
* The American cop show scriptwriter and prominent blogger Lee Goldberg (not to be confused with the New York meteorologist) has become notorious for being vehemently against fanfic and denouncing anybody who writes it as a plagiarist and thief.
* The American Credo—"That there was once a man who placed his tongue against the rails of the Monon railroad near Kokomo, Indiana, and, being unable to get loose, had his head cut off by a passenger train four hours later." (New #1130)
* The American Credo; not surprisingly, many of them are also common tropes in American fiction.
* The American Dad After School Special. After Steve tells his family about his new girlfriend (the aforementioned Debbie), Stan immediately assumes Steve is dating a cheerleader, and refuses to believe the truth when he is told otherwise.
* The American does not realize he was wounded in the abdomen by the sniper he had just killed until he has already driven quite a ways away. He manages to keep driving to the spot where his girlfriend is waiting for him before he collapses over the steering wheel, presumably dead.
* The American Dream Film - Pile wonders if having more money means that you can be immune to all the taxation-fueled propaganda that Hartman has been feeding him. Hartman thoroughly crushes this theory by testing it out with this trope, using Michael J. Fox's time machine to buy an entire house in 1955 and then sell it for millions in the future - only for taxes AND
* The American Dream (Flavor 2): Achieving prosperity won't make your life better, in fact it'll only destroy your life and family.
* The American Dream: Flavor 2: America is a place where dreams come to die.
* The American Dream. You start out poor, you work hard, and you finally earn yourself a better life for yourself and your family.
* The American Eagles (Ken Wayne, Tony Anthony and Danny Davis in masks) were a mixed bag. Played straight in USWA but in Lucha Libre Internacional,
* The American edition of the book uses the word "Belgium" instead. It is still a

reference to this trope, since the text explains that "
* The American Empire in the series has a defense treaty with Japan which means Japan "technically" cannot have an army, just like present day America and Japan. In the series, the American Empire is also portrayed as an openly imperialist power, invading countries like Mexico. Since many leftists (e.g. Che Guevara, Malcolm X) regards America as an evil imperialist empire and considering how the series give the socialist revolutionary and anarchist hacker quite the sympathetic portrayal...
* The American equivalent is called COYOTE, or Call Off Your Old, Tired Ethics.
* The American Experience had an episode called "Telegrams from the Dead," written, produced and directed by Matthew Collins, that explained Spiritualism as a phenomenon, a political movement, a reaction to the massive fatalities in the Civil War, and a heartfelt faith. Several seances are enacted, including a notorious 1854 moment when the spirits of a murderer and a forger showed up at the same sitting and re-enacted their crimes.
* The American Film Institute was concerned, Disney pretty much held a monopoly on the medium until about the 70s.
* The American folk song "Oh My Darling, Clementine" is about a clumsy girl tripping into a river and drowning. Her miner father then commits suicide in despair. The song is sung from the viewpoint of Clementine's lover, who wishes to join her.
* The American folk tale of John Henry tells of the man's victory in a hammerin' race against a steam-powered hammer. He wins, but the effort kills him. He dies with the old-fashioned hammer still in his hand.
* The American Freedom Train, when being put together back in 1974, considered at least a few other steam engines before Southern Pacific 4449 was selected as the primary hauler. Union Pacific 844 (or 8444, as it was numbered then) almost got the job first, since it was already in perfect running order, but Union Pacific refused to allow it to leave their tracks (though "The Living Legend" would team up with 4449 on the AFT when it passed through Cheyenne). Santa Fe 2925 was rejected for having too large of a tender, as that would have meant more water stops than allowable. A proposed team up for Nickel Plate Road 757 and 763 was deemed inappropriate, since both engines burned coal, and converting them may not have worked; a similar line of reasoning led Norfolk and Western 611 to be turned down as well.
* The American furniture chain Furniture Row has multiple brands which allows a customer to shop their four different brands in the same building in different stores, saving advertising and rent money aplenty. It also makes it very easy to dump a fad furniture trend without closing an entire store (they started out as a waterbed retailer and when that went belly up, they just dumped it and moved on to other brands).
* The American Gemini spacecraft had extra-strong ejection seats that were designed not only to blast the astronaut clear of the spacecraft, but outside the danger zone of a potential launcher fire,
* The American holiday of Groundhog Day, when groundhogs are alleged to emerge from hibernation and either retreat back underground or stay depending on the weather to come, has its basis in similar European traditions, including an Irish "Hedgehog Day" custom. But there are no hedgehogs native to North America, so an alternative small burrowing mammal was substituted.
* The American. Instead she strips down to her panties and gets in the water, but he's too tense to enjoy the sight.
* The "American" in the "Waldorf Salad" episode was a Canadian actor that made a career of being the token North American on British shows.
* The American Israeli advocacy group J Street acts as a moral substitute for two organizations: the American Israel Public Affairs Committee (AIPAC), which despite nominally being a "big tent" group has been known for its involvement with conservatives, and Jewish Voice for Peace, a far-left pro-BDS group. Specifically, J Street attracts left/progressive-leaning Jewish persons who support the two-state solution to the Israeli-Palestinian conflict, but also oppose AIPAC's mingling with

conservatives and Jewish Voice for Peace's anti-Israel rhetoric and support for BDS.
* The American is secretly building a custom-made rifle in a small Italian town. At one stage he has to hit a metal disc with a ball hammer, so waits till the church bells start ringing.
* The Americanization of Emily got away with all sorts of things due to the Code being on its last legs in 1964
* The Americanized First World State lasts for four millennia; yet its downfall
* The American Kestrel used to be called a Sparrow Hawk, but its name was changed to recognize its closeness to its European cousin, the Common Kestrel, as well as the fact that it is a falcon (the smallest and most common in North America, to be exact) and not a hawk (going by both the New World definition of Buteo and the Old World definition of Accipter).
* The American M1 Abrams main battle tank is a nigh unstoppable war machine. Many reports from tankers and troops alike will attest to seeing the tank survive very nasty scraps and being outnumbered at least 4 to 1 and still functioning. One report claimed that during a battle a tank was hit with nearly a dozen RPG's and shrugged off
* The American M270 Multiple Launch Rocket System. Each MLRS vehicle can launch 12 277mm rockets within sixty seconds. Each rocket can contain up to 644 submunitions. Total throw is therefore 7,728 bombs launched in under a minute per vehicle. MLRS batteries are colloquially known as 'grid square erasers.' It can also shoot guided missiles for extra precision.
* The American M4 Sherman medium tank was first introduced in 1942 with the British Eigth Army in North Africa. From then on, it became the standard medium tank for the US and British Armies in Europe and the Pacific, with several other militaries such as China and the USSR also using it under the Lend-Lease program. When the Germans began introducing more heavily armed and armored vehicles, the Allies responded by upgunning and upgrading the Sherman, with the M4A3(76)(W) and Sherman Firely being prominent examples. In addition, it also spawned several variants, from open-top tank destroyers, to self-propelled artillery pieces, to mobile rocket launching platorm. Following the war, it would also be exported to a number of US allies such as Israel, where it would be upgraded further.
* The American M551 Sheridan (technically an "armoured reconnaissance/airborne assault vehicle") provides a remarkable example of this trope, being poorly armoured but armed with a low-velocity 152mm gun. Put into context, its shells packed almost as much explosive as heavy artillery shells. It could also fire anti-tank missiles, which could theoretically take out any contemporary battle tank, though these were almost never used.
* the American Mafia "do not count". Committing one's first contract killing is referred to as "making your bones", and a potential inductee who does it earns his "button" in the Mafia - meaning that he is on track to becoming an official member. However, earning one's "button" did not always involve killing; good "earners," or experienced associates who have not necessarily murdered for the Mafia but are good in earning money, have in the past earned their "button" due to their other valuable contributions beyond contract killing. Until the 1980s, one only had to be involved in a murder (such as driving the getaway car) or be a major earner for the family in order to fulfill the requirements. It was not until the Donnie Brasco fiasco, which revealed that undercover FBI agent Joe Pistone was on the verge of being made into the Bonanno crime family, that a rule was made that potential inductees must actually perform a killing. Plus, doing a contract hit shows that the prospective member won't have any moral qualms killing someone when ordered to do so.
* the American Mafia has its hand in traditional bread-and-butter crimes such as extortion, illegal gambling, and loansharking, it also made forays into crimes such as labor union racketeering, political corruption, Ponzi schemes and stock fraud.
* the American Mafia's broke out as a result. The Commission is headed by a nominal Chairman, who was not seen as the capo di tutti capi as law enforcement usually claims it to be. It also decides who can join the LCN, vote on issues that might

require inter-family cooperation, and approve a new boss before he could take over officially. Though the bosses used to meet more often, greater law enforcement scrutiny and mobsters flipping left and right to save their skin have forced the Commission underground, and the families now send grunts to discuss business and resolve disputes.
* the American Mafia's is a good example that depicts the rampant corruption and bribery on the New York dockyards. The Racketeer Influenced and Corrupt Organizations (RICO) Act has provisions that allow the government to place a union under federal control. Prosecutors have to prove the union was a cover for organized crime.
* The American military later refines Manchurian Gold into the Lazarus virus. Infectees can spread the infection through bites and scratches, have the driving impulse to feed on human flesh, and possess enough intelligence to wield basic weapons and avoid things that may harm them.
* The American Motors Corporation caused quite a lot of Coca-Pepsi merging. AMC was a merge of Nash Motors and Hudson (and was going to include the high-end Studebaker/Packard company, until the director died). They bought and modernized Jeep, and did well for a while until their declining profits caused them to be bought by Renault - when that happened, they had to sell their military division, AM General (who would later make the HMMWV /
* The American Nation by John A. Garraty provides a paragraph of exposition on how Nicholas Trist and Winfield Scott were initially hostile, and only became friends after one gave the other a jar of guava marmalade.
* The american neoreactionary movement and the french archeofuturist movement both break the dichotomy. Both envision a cross between extreme traditionalism and scientific rationalism, which often results in a fantasy of a new middle ages where kingdoms use modern tech like nuclear power and genetic engineering. In case of the archeofuturists, it has to be said, that, like the name suggests, they see themselves as the successors of the futurist art movement rather than the enlightenment. Futurism can be seen a a form of romanticism embracing technology.
* The American network LOGO was originally LGBT themed however it went through
* The American Northampton, Portland, and New Orleans class heavy cruisers, designed in the 1920s and '30s, were particularly infamous examples of this. These ships were designed as light cruisers under the WWI definition with nominal armor and heavy 8" guns, but were reclassified as heavy cruisers as a result of the Washington and London naval treaties due to their gun calibers. These ships suffered horrendous losses during the war due to their inadequate protection, including three being sunk with within two hours during the Battle of Savo Island in 1942.
* The American OK symbol (thumb and forefinger touching each other to form an "O") means "you asshole" in several European cultures.
* The American Overseas Republic is a collective of oversea embassies, diplomatic missions, and military bases that refuse to recognize the authority of a United States that is now ruled by a rogue right-wing government.
* The American Pageant, has a fair dose of this. To paraphrase: "The initial attempts at colonization of the Americas failed miserably, causing suffering for all except the buzzards."
* The American patriotic song "You're a Grand Old Flag", originally written for a stage musical called
* The American petroleum company Sinclair Oil Corporation features a green dinosaur as its logo and various advertisements throughout its history featured anthropomorphic dinosaur mascots pushing the brand or filling up cars with Sinclair gasoline. (Which is made from oil which is essentially liquefied dead dinosaurs.)
* The American President door goes into his private study, and then points out the proper exit.
* . The American President has a nice thick head of hair, the Russian leader is bald.
* The American President, he savages Republican presidential hopeful Bob Rumson for using Shepherd's relationship with lobbyist Sydney Ellen Wade for smear tactics.

Rumson had ended every previous appearance with, "My name is Bob Rumson, and I'm running for president." Shepherd responds:
* The American President, Sydney Ellen Wade receives a call from President Shepherd, whom she thinks is a co-worker impersonating the President. She then tells the President that he has a nice ass and hangs up. When he calls again and proves his identity, she is suitably mortified; "Y'know what, forget it, I'm moving to Canada!"
* The American President Sydney Ellen Wade viciously criticizes President Shepherd to his staff — only to discover that, yes, he just entered the room behind her. When she tries to apologize later, he reminds her that getting viciously criticized is part of his job.
* The American President, when President Shephard and Sydney Ellen Wade are about to reconcile, A.J. announces, "If anyone needs me, I'll be in the Lincoln bedroom, giving oxygen to Lewis."
* The American Psychological Association has a vast number of databases of visual and auditory stimuli, along with arousal levels for each stimulus. These databases are kept closely guarded to maintain novelty among the general public, who may end up being part of their experiments at some point.
* The American remake also included the cursed movie on the DVD, but with two extra scare-inducing factors: first, you couldn't pause, stop, or fast-forward through it, forcing you to watch the whole thing (unless you turned the TV off.) Second, after it's finished and it returns to the menu —
* The American Revolution (1775-1783) is under-represented, but still features in US works
* The American Revolution and hoped that enough checks and balances would prevent the United States from emulating Rome's eventual slide into dictatorship.
* The American Revolution Army who went on to train the Continental Army and turn it into something resembling a professional force, and the aforementioned Tadeusz Kościuszko, a Polish nobleman.
* The American Revolution Arnold realized he had a great opportunity and he ordered the men to stop, turn, and charge the Redcoats. It turned into a complete victory.
* The American Revolution, both Patriots and Loyalists were fighting for their homes and country, and in the end the losing side had to emigrate to Canada. The situation for Republicans and Loyalists during the Troubles in Northern Ireland was also like this.
* The American Revolution, both resulting in experimental republics showcasing Enlightenment ideas on governance.
* The American Revolution but had to leave following the Treaty of Paris in 1783. At least 45,000 from the hitherto Thirteen Colonies relocated, mostly to New Brunswick (which was carved out of Nova Scotia to accommodate them) and Upper Canada (now Ontario) - many freed slaves and native tribes such as the Iroquois also followed. The mass influx of non-French into Canada, as well as the general suspicion towards the rather violenty-established "mob rule" that took hold in the United States guided the organization of Canada in the 19th and 20th Centuries.
* The American Revolution Colonel Johann Rall, leader of the Hessian mercenary garrison at Trenton, was playing either chess or cards on Christmas Eve. A loyalist farmer came to him with urgent news, but he refused to be drawn away from his game. The farmer wrote him a note, which was passed to the Colonel - and ended up in his pocket, unread. Shortly thereafter an unexpectedly large force of revolutionaries attacked, butchering the Hessians and fatally wounding Rall. The loyalist had been trying to tell him about a large group of armed people crossing the Delaware River, which as every American schoolchild knows was commanded by George Washington. The engagement proved a morale-boosting victory for the rebels, one which meant that the British didn't have the manpower to support garrisons across New Jersey, which was effectively left to the rebels. Accordingly, they drew their troops back into the area of New York City where the Royal Navy could shore up their supply lines.
* The American Revolution for half an hour before he started cleaning it up.
* The American Revolution, General Washington ordered his troops not to wear their coats while marching to their attack on the British forces. Since the day's high

temperature was well over 100°F, this meant his troops were in much better shape to fight. That said, the battle ended in a draw, with both armies reaching some of their goals. (On the other hand, American General Charles Lee either butterfingered or deliberately slow-rolled an opportunity to make Monmouth a clear or even decisive American victory, earning him the perpetual enmity of many Americans and a court-martial to boot.)
* The American Revolution had the Doan Boys, a gang of loyalist raiders who attempted to hurt the patriot war effort through robbery and sabotage. They continued their criminal activity for several years after the war ended, but their motives had changed to profit.
* The American Revolution had "Yankee"/"Yank" used for the Americans (made famous for its use in "Yankee Doodle").
* The American Revolution handled low morale and rampant insubordination during a harsh winter (worse than Valley Forge, even) by sentencing eight men to be hanged for various charges. As the eight men had the nooses placed around their necks, staring into the already-dug graves, with the coffins ready and everything, a soldier suddenly stepped forward and pleaded for a reprieve. Seven of the eight were let go.
* The American Revolution in 1777. William Howe, commander of the main British army in New York, decided to mount a sea-borne invasion and capture the rebel capital of Philadelphia rather than meet the other main British offensive of that year, a thrust south from Canada by John Burgoyne designed to cut off New England from the rest of the rebellious colonies. Howe captured Philadelphia, a victory which did not change the strategic situation at all due to the loose nature of the Continental Congress (capturing the city where the delegates met only meant they fled into the interior to reconvene at Lancaster and later York, Pennsylvania; the ability of each of the colonies to raise their own troops wasn't affected). Meanwhile, Burgoyne's army was defeated by the Americans at Saratoga and was captured shortly thereafter in the biggest turning point of the war (it was this battle that convinced France to openly support the Americans).
* The American Revolution. In actuality, the Hessians were aware that Washington was up to something and dialed down the festivities; it just didn't make a difference. According to some accounts the Continental army had a hell of party with all that capured booze afterwards.
* The American Revolution. Most of Britain regarded the South-East as "where the aristocrats were" (since they all had to go up to London half the year) with ponceyness and doubletalk (Elves) and themselves as practical, hardworking, and simple (Dwarves); these translated to the Tidewater South being Elves and everywhere else being Dwarves. Things have of course changed since then.
* The American Revolution's crossing of the Delaware River, immortalized by the famous painting, was the beginning of his attack on Trenton, and he made his winter camp at Morristown twice in the war.
* The American Revolution, the British General John "Gentleman Johnny" Burgoyne led his army on an ill-fated campaign through Saratoga in New York. Part of the reason why it failed was because of excessive luggage. He brought wagons full of frivolities like boxes of champagne while they were trying to make it through the woods. The chain of wagons was almost a mile long and is often nicknamed "Gentleman Johnny's Party Train" by modern audiences. With so much luggage, his army was too slow and was intercepted and defeated.
* The American Revolution, the city had many sympathizers with the Southern cause (largely because it had become an important shipping center for Southern cotton) and explored the possibility of becoming an independent city-state that would be neutral in the conflict. Then the attack on Fort Sumter happened and Southern popularity took a huge nosedive in the city, so the matter was dropped.
* The American Revolution. (This is a an exaggeration, while a disproportionately large number of officers where lost, no regiments lost their entire complement of officers. After Bunker Hill, the closest is a Battalion being commanded by a Captain, normally a company commander. After New Orleans, Several Companies where temporarily commanded by Sergeants, due to the loss of both the Captain and all

Lieutenants. Sill a valid example of this Trope, however)
* The American Revolution to hurt England's control of its colonies. Eventually at the Paris Peace Conference at the end of the war, the British, American and French decided unanimously to throw the Native Americans under the bus, even the ones who fought loyally for the Crown, while the Americans blackmailed the English with a better trade deal than with the French.
* The American Revolution. Usually seen as a brutal slaughter of helpless Americans by the nasty British, a recent theory suggests that the British thought they were victims of this trope -their leader's (Banastre Tarleton) horse was shot down, just as a flag of truce was going up, a flag not all the Americans noticed at first. It got ugly.
* The American Revolution was a desperate attempt to convince veterans to stick with the army for a few more weeks. General Washington, knowing a good Dare to Be Badass speech when he saw one, had it read to his entire army. It worked.
* The American Revolution was "a Presbyterian war". Whatever the religious affiliations of the top brass, the American lower ranks quite often considered themselves a Church Militant.
* The American Revolution wasn't the most tactically sound general, and overall throughout the war the Continental Army lost more battles than won — the New York/New Jersey campaign in the summer of 1776 was an especially bad time for them as the Continental Army was outmaneuvered, bloodied, and was only able to retreat from New York after not being destroyed entirely after the Battle of Long Island thanks to fortuitous bad weather. But Washington understood that in the long term his top priority was to preserve the Continental Army as a fighting force to oppose the British, who had to transport and supply their troops from an ocean and three weeks' travel away while they could organize local militia much more quickly to buy time for the Americans to solicit help from Britain's rivals on the European continent, chief among them France. Even the British taking the main ports (Boston, New York, Philadelphia, and Charleston were at various points all captured) wasn't enough — they would have to go out into the countryside to defeat the rebellious colonies there. Which they couldn't do before France and other European rivals joined in, sealing Britain's military fate at Yorktown in 1781 and their political fate soon after when Lord North was ousted as Prime Minister.
* The American Revolution was on his death bed in England, he requested to be buried in his old Continental Army uniform.
* The American Revolution (which you would think would be taught with more attention, considering that at the end of it, the present day contiguous United States was formed) are glossed over, forgotten or simply ignored.
* The American Revolution would become this for the French. During the American Revolutionary War, France decided to back the colonists in seceding from the British as revenge for their humiliating defeat in the Seven Years War. However, while the American revolution succeeded, France was left in crippling debt that led to the country undergoing its own revolution a few years later.
* The American Robin and its relatives in other parts of the New World were named by colonists for the European Robin, probably due to the red breasts on both birds ("Robins" are more archaically known as "Robin
* The Americans are a pair of Soviet spies who are ordered to pretend to be a married couple as part of their cover.
* The Americans), averted otherwise by most of the supporting Soviet roles. The creative team had an official rule in place that the roles were to be played by Russian actors who spoke the language fluently.
* The Americans can be extremely effective as long as it's used on a stressed out, untrained target; when she explains every last ridiculous detail of their faces to the police, the sketches emphasize the parts that were clearly part of the disguise, but without a framework of details to wrap it around the sketches have nothing in common with the spies' actual faces.
* The American's character runs a rival hitman off the road, then grabs his head as he leans out the window to shoot him, using his weight to break the man's neck over the car door.

* The Americans: Elizabeth Jennings, undercover KGB agent and one of the two protagonists of the show. While masquerading as a travel agent and ordinary suburban mother of two children in the US, she is willing to kill in cold blood, poison a woman's son to force her to work for the KGB, and lie to her own children about what her and her husband Phillip actually do for a living, among other morally dark acts.
* The Americans focuses on the dangers and stresses of living a double life as KGB agents in 1980s USA and how far one can go for one's country.
* The Americans for the benefit of any onlookers as the Russian screams "They're not police!"
* The Americans has the two protagonists Philip and Elizabeth, who are KGB Agents living in America as a married couple.
* The American Sign Language is believed by some to be Satanic because the
* The Americans In other words, the series focuses on two Cold War soldiers with no idea they ultimately will lose the War.
* The Americans in the original series of Captain Scarlet have a tendency to be of the former variety- strapping men, near-glowing skin etc. They're also more likely to get the cliche lines (something that also held true in the newer series).
* The Americans invaded, dismantled the militant group, and installed their own puppets, but the militants regrouped and started doing the insurgency. Said insurgency lasted until in 2021 the Americans, much like the Soviets before them, retreated their troops from the country and left it to promptly collapse to the insurgents. As of writing, the situation has fallen into a point similar to the one in the early 90's, with the insurgents taking control of the government and attempting to re-establish some sort of order within it.
* The Americans, largely set in the Washington, D.C., area, is shot in New York City, which also doubles for Philadelphia and the Soviet Union in various episodes.
* "The Americans must love this weather," a Russian general complains a few paragraphs later, because the clouds are so low that his anti-aircraft forces have almost no time to
* The Americans not only made a swimming version of the M4 Sherman, they actually used it at the Battle of Normandy. Granted, a number of them quickly sank as soon as they lumbered off the landing craft, but imagine you're a German machine-gunner
* The Americans officially restricted the use of unit insignia to adorn Army Air Service fighters until late in the war, due to concerns that they would tip off the Germans whenever the Americans were redeploying their forces (the arrival of the four squadrons of the
* The Americans, one of Phillip's assignments is to befriend Kimmy, the lonely teenage daughter of a CIA operative so that he will have a pretense to visit her house and plant bugs in her dad's office. Much to Phillip's disgust, Kimmy develops a very obvious crush on him, which the Centre encourages him to exploit.
* The American Soviet Republic, led by Communist Party General-Secretary Earl Browder, which controls a stretch of land from their capital at Chicago to New York City.
* The American special reveals that there is a Miraculous set based on Native American culture, with Jess gaining the Eagle Miraculous, and
* The Americans: Philip and Elizabeth cozy up to a Soviet defector in the fifth season who almost constantly lambasts the USSR in favor of the US. This annoys not only them (privately) but also his wife, who didn't want to defect.
* The Americans, Phillip has been trained by the KGB to seduce and have sex with targets without any emotional attachments. This creates significant psychological issues for him as the Centre increases his workload, forcing him to carry on affairs with multiple women.
* The Americans plays with this trope. The protagonists are deep-cover KGB sleeper agents in the United States in 1981, so American audiences are expected to approach them as the "villains" of the show. Indeed, they do commit murder and many other ruthless crimes throughout the series. However, the show's drama hinges on the pair being sympathetic, primarily through their home life as a family. They are often shown to be similar to their American rivals, and they occasionally get forced into

making difficult choices between duty to their nation and their own moral scruples.
* The Americans, poor Paige walks in on her parents performing mutual oral sex on each other.
* The American SR-71 Blackbird is an even more extreme example. The fastest manned, air-breathing vehicle ever, but completely unarmed. It leaks fuel like a sieve when it's on the runway — which fuel, by the way, was so exotic it was used as coolant — but it
* The Americans's United States. It involves murder and deception on a regular basis.
* The Americans, the protagonists’ daughter Paige decides to stay in America rather than go back to the USSR with them after their cover gets blown.
* The Americans, this conflict escalates with Philip giving up on the spy game and fully settling into his American life while Elizabeth becomes more fanatical in her views.
* The American superhuman Colossus tries to take on the German "living battleship" Sieglinde when the Nazis attack Paris. Colossus ambushes Sieglinde and at first seems to be winning against her, knocking her to the ground and strangling her... until she rips both of his arms off and uses her matter-disruption powers to twist his entire body into a gory sculpture of pulped flesh and shattered bone. By the end, he's so mutilated it's almost impossible to tell he was once human. The worst thing of all? He's
* The Americans were very close to one of the killed KGB officers and disobey orders when they target a CIA deputy director who was involved in planning the assassinations.
* The Americans. When a Soviet agent shoots her target with a tranquilizer, he has enough time to struggle with her and then shoot her with a tranquilizer dart in the confusion. Also, since he is larger than she is, he wakes up first and subdues her.
* The American version has a brilliant example where Mickey's homophobic, drunken father, walks straight into Mickey's room to use the bathroom - right past a naked Ian and Mickey post-sex. A few tense moments until his father comes out and obliviously proceeds to tell them they should get up, as it looks like they're gay.
* The American version take place for many characters, especially Ryan, Michael, Dwight, and (in one case) Meredith.
* the American version when he learns that the murder they're investigating may be a homophobic hate crime and still refuses to treat it with anything less than his usual "professionalism", calling out Ray for suggesting otherwise.
* The American version would be the Stryker, which, like all American vehicles deployed in support of OIF, has at least nominal air conditioning. A variant trades troop capacity for a
* The American Vice President will more than often be seen as this. Often, if they were seen as competent enough, they would have gotten the nomination for President. It helps that they have very little power. Quite frequently, the Vice President is chosen by his party to
* The American Volunteer Group, a fighter group assisting China against Japan in the early days of WWII
* The American West. It was a town filled mostly with taverns and cowboys with guns.
* The American witch hunt against comic strips in the 1940s and 1950s also blew over to Europe. In the Netherlands (otherwise a socially liberal nation at the time) many adults felt that comics would make children too lazy to read an actual book, so many Dutch comic strips from that era were in fact illustrations with novelized texts below them. Text balloons were totally absent.
* The "America's Best" owl commercials were originally based on an inversion of this, with the humans constantly asking "who?" and the owl responding eloquently to their questions,
* The 'Ameristralia' meme is about the USA and Australia joining as one nation, although it's not clear whether Australia's six states would join the USA's fifty states, or some other option is envisaged. This is probably because it's a joke and no one really cares.

* The Ames Brothers' song "The Naughty Lady of Shady Lane" is entirely built around this trope, seeming to describe a woman of ... little restraint who has recently moved into the neighborhood, but who might be redeemed by the right man. However, the last line of the song reveals that
* The Amethyst Angel herself does it slightly differently; during 'Samurai Angel' she shot straight to the strongest natural branch, Rainbow Nova, and added Ultra Instinct within 24 hours of said first jump. Ultra Instinct spontaneously activating when a normally-fatal attack is headed her way is usually when her take on Plot Armor activates (though said attacks are actually attuned to bypass the Plot Armor if it connects).
* The Amish tend to avoid certain forms of modern technology in the belief that doing so will damage their way of life, particularly if it connects them to "the world".
* The Amity Incident has Toxic Island - don't worry! it's not an island where every kind of animal and most of the plants are deadly... It's a continent.
* The Amity Incident is from this point of view initially, although it flips between the alien perspective and human in alternating chapters.
* The Amityville Horror (1979) chronicled several incidents that provably didn't happen, the film made more things up, and the sequels and remakes were entirely fictitious, but all claimed a loose connection to the true story.
* The Amityville Horror (1979), George is the last person to believe the house is haunted, yet is probably the one most affected, barring the Priest of course who ends up getting cursed after being the house for all of 10 minutes.
* The Amityville Horror (1979) has one of these, with an actual cat, that for some reason jumps in front of a window and scare the main character.
* The Amityville Horror (1979) is an allegedly true story about a haunted house in New York, though it takes place on Long Island which is densely populated NYC suburbs rather than a rural Lovecraftian setting like you'd easily find upstate.
* The Amityville Horror (2005): A specific part of the wall in the Amityville House's basement starts dripping blood at night and forming a stream leading George to it. It's revealed later on that the basement used to have a morgue, and that people were also tortured there.
* The Amityville Horror (2005) had so many of these that, if you replaced them with a bass drum, you could use the film's soundtrack as the beat to a piece of house/techno music.
* The Amityville Horror (2005) has Jodie Defeo; though sympathetic to an extent since it's implicated she's forced to do evil against her will she's still pretty damn creepy at points, especially in the scene where she traps the babysitter Lisa in the closet and forcibly jams one of Lisa's fingers into the bullet hole in her forehead.
* The Amityville Horror (2005): Made in 2005, set in 1975 plus a prologue in 1974.
* The Amityville Horror (2005)" segment, given to movies that weren't available to review.
* The Amityville Horror (2005), the police find a book in Ronald DeFeo, Jr.'s possession that has "KATCH'EM AND KILL'EM" furiously scrawled on every page.
* The Amityville Horror and all of its sequels are based on this trope. (Demons tend to hide in the objects sold from said house.)
* The Amityville Horror, flies swarming around during the height of winter was a sign of paranormal activities taking place.
* The Amityville Horror, Missy draws a picture of Jody (her "imaginary friend" demonic pig) for her father after they abandon the house.
* The Amityville Horror, save for the flashbacks to the murders before the main story. Somewhat forced in that they're based on an allegedly true story which everyone involved survived.
* The Amityville Horror. The youngest child, 5 year-old Missy, had repeated encounters with a pig-like demonic creature with red glowing eyes whom she called Jodie.
* The Amityville Horror. Though it claimed to be based on a true story, that claim has pretty much been proven false at this point. It still launched the more modern

haunted house tropes, which usually involve a couple/family moving into a house that seems fine at first, but strange things start happening. They do research and find out that evil things have happened there, so they get a priest to bless the house. Things get so bad, they leave.
* The Amityville Terror so that it can "feed" on them and remain content enough to leave the rest of Amityville alone.
* The ammonia-breathing Volus have to walk around in pressure suits all the time, and regularly wheeze in their speech. Telling one to "take a deep breath" is akin to telling them to kill themselves in an amazingly racist way. Expect a bad reaction, especially since about half of them have a
* The amnesia inducer works like a toggle switch (especially in the case of blunt force to the cranium). (Surgeon General's Warning:
* The Amoeba Boys avert this - they simply want to go to jail to prove they're just as much criminals as the other villains in Townsville.
* The Amoeba Boys. You can tell that these single-celled organisms aren't neurons.
* The amoral psychopath Teitoku Kakine practically gets erased from existence when his creation, the kind and gentle Beetle 05, takes over his body.
* The Amorous Umbrella-inspired plotline common with 1950's soap operas - attempt to kill him.
* The Amory Wars: Coheed has his right arm end up one of these. It's quite possibly the most realistic power of all the Kilgannons. (Coheed's left arm has several curved blades that pop out of it, as well as being able to destroy stars; his wife, Cambria, has tele-everything [-kinesis, telepathy, clairvoyance...], their surviving child, their son Claudio, has natural star-killing abilities, and can aparently melt through walls. As well as clairvoyance.)
* The Amory Wars is another name for Heaven, where the Prise hang out (another name for angels).
* The amount of aircraft was such that eyewitnesses describe the display as pretty much darkening the sky with air craft.
* The amount of Bro/Dave shipping is unsettling when you find out that
* The amount of Christmas episodes obviously suggests years passing, yet it never does. Doesn't anyone in Springfield realise Christmas only happens once a year? Two major events in the normally
* The amount of fog present outside the workshop is dependent on his mood
* The amount of heat Reigns received suddenly all hit the fans when on the October 22, 2018 episode of
* The amount of his HP varies from 4500 to over 6000, depending on difficulty, with a wee bit over five goddamn thousand in the Versus mode. When in doubt,
* The amount of information and popularity of the ARG was enough that a wiki was set up for it just to document it all. You can find it all summarized
* the amount of time it takes light to travel the distance light can travel in a year.
* The amount of time that passed after the calamity is hinted to be extremely long. The very first, non-spoilery terminal in the game states that the last network connection was established 9,999 years ago. On one hand, this readout is surrounded by similarly random and glitched data. On the other, the terminal says that the vast archive was reduced from several petabytes to mere dozen gigabytes in the meantime. It's unlikely that such corruption (and timer "running out of bits") could occur in mere decades. The same message also hints that the AI programs took certain liberties with the data and invalidated what didn't serve their own purposes.
* The AMP (Antimatter Manipulation Principle) technology used by the Sanctum government in
* The amphistaff can be completely stiff for use as a staff or club or completely floppy for use as a whip. Most Vong carry it wrapped around their arm in the floppy state and stiffen it to the stafflike state when ready for combat.
* The Amplification process is similar, and also adds an additional stat bonus to any of the four main stats. But this is even more expensive (both material and gold-wise) and riskier to do due to the fact that it can't be used in items already

reinforced and are not cursed to begin with. And every failure at an Amplification level of +7-+9 resets all Amplification levels to zero, with the aforementioned penalty of the item being destroyed at +10 or higher.
* The Amtrak Wars do vent steam; it's used as a close-range defense system, and capable of blasting the flesh right off your bones.
* The Amtrak Wars features the "War of a Thousands Suns". A thousand years in the past, a global nuclear war initiated by the U.S. and its allies against the Soviet Union devastates the world.
* The Amtrak Wars series by Patrick Tilley is set hundreds of years after a nuclear war has divided the United States into the underground Amtrak Federation and the above-surface 'Mutes', who are on the technological level of American Indians, but some of them also have telekinetic and telepathic powers. The Amtrak Federation are engaged in a genocidal war to retake the surface, and despite pushing a racial agenda are secretly using genetic engineering to try and acquire the Mutes' powers and resistance to radiation.
* The Amtrak Wars The two girls wind up more or less saints by the end.
* The Amtrak Wars vs Science but since it's called magic by both sides, close enough.
* the Amulet of Daylight stories where a Changeling is picked as the next Trollhunter.
* The Amulet Of Samarkand, the villainous magician Simon Lovelace uses magic to inflict this on the main character, Nathaniel, in a publicly humiliating manner.
* The Amulet, which shows, during a house fire, a toddler running down the hallway with her hair on fire and her polyester pajamas melted to her body. Her mother, under the influence of the eponymous cursed amulet, is oblivious to any danger.
* The amusement park Ned Flanders bought and refurbished into "Praiseland" was originally closed because a child somehow got his head cut off at the park.
* the amusement park that Strong Bad dreams up needs to have "a bunch of costumed mascots running around antic-ing", so he comes up with costumes of the Tire, the Stop Sign, and the carton of General Tso's Chicken, worn by Homestar, Coach Z, and Homsar respectively.
* "The Amusing Meanderings Become Observational Understandings Regarding Inquisitive Natural Equines": TAMBOURINE
* The amusing thing is that the first two choruses have "fucking" beeped while saying "They're gonna beep it anyway." It's only the last chorus, after doing that twice, that they leave the profanity and beep the actual word beep.
* The Amy Virus, Cyan's parents encourage her older sister Tam to snitch on her. It doesn't work, since Tam isn't on very good terms with her parents by that point either.
* The Amy Virus. Not only is he insistent that they attend Caltech, his Alma Mater, despite being other good colleges out there, but he also goes so far as to confiscate any of Cyan's music and instruments to keep her from practicing her hobby. Also, in Tam's case, she's planning on averting this by majoring in Industrial Design at RISD, which would help her find a very good career where she can use her artistry.
* The Amy Virus, the Butts hold all three of their daughters to extremely high standards and are dismayed when their youngest starts bringing home B minuses.
* The Amy Virus, the teenage singer Amy Zander is forced by her label to record a song she hates. When she can't get it right, the label drops her and gets another girl to record it, and Amy herself falls into obscurity
* "The Anacreontic Song" was also supposed to be performed as a lively minuet. Such a performance of "The Star-Spangled Banner" today would be received as irreverent and un-American.
* The Anakim are another example. Numbers 13:33 in the King James Version describes them thusly "And there we saw the giants, the sons of Anak, which come of the giants: and we were in our own sight as grasshoppers, and so we were in their sight." Which, if taken literally, would make them big enough to qualify as
* The analogy between first-person and third-person limited is strong enough that fanfic writers will say that a third-person limited section is in a

* The Anarchists also have heavily-augmented Elite commandos from their volunteer forces. Though most of their army is Gigglers and robots.
* The Anarchists Cookbook states that the best lockpick is gelignite closely followed by a sledgehammer, and that actual lockpicking only really matters if you care whether people know you've been in. Or you can bribe, threaten, persuade, or trick someone into unlocking the door for you.
* The Anarchists of the League have infiltrated all the other factions in the name of burning down every last trace of the old order and replacing it with something... except that no two cells can agree on exactly what that new order ought to be. In addition to the usual
* The Anarchists, on the other hand, have a completely volunteer military, meaning they have to rely on
* The Anathos Cycle starts with Hero turned Anti-Villain Elysio being forced to team up with Darkhell under the Guardian's orders.
* The Anatomy of a Fall has ghost!Frank interact with living characters with varying degrees of difficulty.
* The Anatomy of Desire by John Theureux is about a man who was skinned and is still alive, and falls in love with a nurse at the hospital.
* The Anatomy of the Tongue in Cheek. They can mostly be understood/explained. And then there's two songs: "Crayons Can Melt on Us for All I Care" and "The Only Thing Worse than Beating a Dead Horse is Betting On One." Again...understandable. Eventually.
* The Anauša, the Persian Immortals, are similar, but draw from a wider timespan. Their members can come from any royal guard or army that took their name and associated themselves with their reputation, ranging from the classical-era originals to the Iranian Imperial Guard.
* The ancestor gods of the Dwarfs are another pantheon and so is the old pantheon of ancient Nehekhara. Ind is mentioned and referred to as the land of a thousand gods so one would expect them to have quite the pantheon. Bretonnia is said to have the commoners and the occasional noble worship some Empire gods along with the Lady of the Lake, but that might not count.
* The ancestors of the Halliwell sisters are not Whitelighters but have a similar status as ascended matriarchs (not that it stops them from coming back, of course).
* The Ancestral Trail one of the heroes. Quite graphically too, with spurting blood and head-biting.
* The Ancestral Trail turns the Trio into frogs in one issue. Fortunately, the counter-spell happened to be that day's prophecy.
* The ancient and honorable art of Grayson swordfighting is ostensibly based on
* The Ancient Art of War, a 2,500-year-old treatise on military strategy. Sun Tzu appears in-game as the most challenging opponent.
* The Ancient Art of War: The overworld maps in War at Sea are fancifully decorated with sea serpents, Neptune figures, etc.
* The ancient Aztecs had a prophecy stating that their greatest capital would be built at a place where an eagle was sitting on a cactus and holding a snake in its mouth — possible things, but looking for it would be like a needle in a haystack. Eventually, they finally found it, and it became the site of Tenochtitlan. The Mexican flag has a picture of this on it. One tiny snag though —
* The ancient Chinese believed that rubbing a dog's tears on their eyes will allow them to see the spirits of the undead.
* The ancient city of the Sun Warriors (the precursor culture to the Fire Nation) is based off a combination of Mesoamerican and Southeast Asian architecture, while their clothing seems to be primarily derived from Southeast Asian tribal cultures, particular the headdresses which resemble Iban warrior headdresses.
* The ancient city-state of Teotihuacán played this role for the Mesoamerican civilizations, such as the Aztecs who arose nearly 1,000 years after its fall. It was one of the great powers of its day, dominating several of the nearby Maya cities and its influence covering much of Mesoamerica; it even had what appear to have been apartment buildings. It had considerable influence on the

development of most nearby cultures, including the Maya, and was seen as a holy place by the Aztecs, who believed it to be where the world had been created.
* The ancient clan of ninjas known as the Hand, when they aren't serving as disposable cannon fodder in stories featuring
* The ancient cloud giants lived in floating cities and castles that drifted among the clouds. A few are still aloft, but they're rare and the secret of their creation has been lost.
* The Ancient Communication Stones, which allow one to not only communicate, but INSTANTLY transfer your entire consciousness from point A to B. Distance does not seem to be an impediment - from thousands of
* The Ancient Darkrai, a group of Darkrai so powerful that in ancient times they managed to almost usurp Arceus himself and have returned to take over the world for real this time.
* the Ancient Dead's former empire is heavily based on Roman Empire with Egyptian mummy trappings; in addition to the implications held of such a cultural mix, the auxiliaries within the empire are based around the Germanic and Celtic tribes like the ones the real Roman Empire has conquered and absorbed.
* The Ancient Dragon), and possibly crushing some hapless fool upon landing.
* The Ancient drone weapons were apparently designed specifically for this tactic, but in
* The Ancient Egyptians actually did believe that space was an ocean, named Nuun.
* The ancient empire Netheril had a host of magical floating cities. Most were destroyed thousands of years ago when the mage Karsus accidentally caused magic to stop functioning. A few survivors landed safely but never flew again. One escaped into the Plane of Shadow, to return thousands of years later and start refounding the Netherese Empire.
* The ancient entity, Maganu, is this in Adam R. Brown's fantasy series,
* The ancient Falmer (Snow Elves), prior to their corruption into the goblin-like modern Falmer seen in
* The Ancient Future Trilogy remains progressive in finding a goal they can aspire to.
* The Ancient Gods Part 2, fitting as he's the setting's equivalent to Satan.
* The ancient gods, who created the labyrinth to imprison Asterion for all eternity, and make him a slave for any human that comes across him. The lack of free will Asterion has because of them combined with how he's been abused over centuries shows how ruthless the gods were towards Asterion.
* The Ancient Greek and Roman world were tolerant of religion so long as it did not contravene the Gods of the State, i.e. official religion.
* The Ancient Greek physicians, Hippocrates and Galen, taught that one of the four "humors" of the body was black bile, which was believed to cause depression. This is the origin of the word "melancholy", which comes from the Greek for "black bile".
* The Ancient Greeks being equal-opportunity lovers, there are several instances of armies being delayed on the march because an officer (and in one case, a King of Sparta) had fallen in love with a local boy and refused to leave him behind.
* The ancient Greeks believed they needed to pay Charon for passage through the river Styx, which made some of them quite neurotic about the prospect of dying with no coins for Charon on them. A ghost of a dead person asking a living one for burial with some coins is a motif that has been known to appear in Greco-Roman fiction.
* The ancient Greeks despised Hades, the god of the dead and the underworld, since they didn't like dying. He has a somewhat better reputation today, in that he regularly kept his bargains with gods and mortals alike, and would only inflict a
* The Ancient Greeks found fortifications from the previous civilization, the Mycenaeans, and assumed since no man could move such heavy stones they must have been built by Cyclopes.
* The ancient Greeks had a plethora of names for the undead, stemming from the fact that ancient Greece was made up of various independent kingdoms. Among the many names of the undead was

* The ancient Greeks poured libations to the gods and to their dead, and the practice is mentioned by their earliest writers.
* The ancient Greeks used the phalanx (a mass of troops with very long spears) as the main part of their army. This strategy didn't last against the weapons and tactics of the Roman Legions. Fast forward a few centuries, and medieval armies made extensive use of pikemen (a mass of troops with very long spears), as they were the best way to prevent knights from overrunning your lines.
* The Ancient Greeks were in on this as well. During the Olympic Games, everyone hates cheaters, okay? The Ancient Greeks had only one punishment for cheaters. They were given a statue of their own in a specific hall that everyone went to and they all had to carve on the accompanying tablet what they had done to deserve it: "My name is XX and I cheated by..." In other words, cheaters were immortalized for everyone to come see and point and laugh at for the rest of eternity. Some people just had style, you know?
* The ancient hero Chi Master Dashi is shown to be this; after saving the world once, he'd rather sit back, let his dragon do the cleanup work, and avoid people he doesn't know that are trying to look for him. Once he finds out a problem is serious, however, he agrees to help.
* The ancient history is recorded on the Poneglyphs, as well as the location of various
* The Ancient Kings of Belka qualified too. They altered their own genetics to transform themselves into
* The ancient magister-turned darkspawn Corypheus first appeared in the
* The Ancient Magus' Bride and in the very first episode, a group of fairies attempts to spirit Chise away into the fairy world (while she technically isn't in any danger of death, the fairy world does twist humans who stay in it, turning them into fairies themselves over time.) And then there's Ashen Eye, a rather malevolent and cruel trickster who is pretty much the single darkest take on the Fair Folk this series gets.
* The Ancient Magus' Bride. And she's still all about staying with him afterwards.
* The Ancient Magus' Bride, Chise consensually puts herself up for auction in the hopes of getting a better life and is bought by Elias for the purpose of having both a student, experiment, and a bride.
* The Ancient Magus' Bride, Chise goes to the land of the Fae (the anthill in specific) in order to be healed from using her magic too much. She spends a few days there at best, but comes out to find that she's lost two seasons.
* The Ancient Magus' Bride is a Sleigh Beggy, physically weak but magically powerful mages.
* The Ancient Magus' Bride: Often mistaken as shōjo due the protagonist, Chise, being female and the story's focus on her growing relationship with Elias, the titular magus. However, it runs in a shōnen magazine.
* The Ancient Magus' Bride said this trope is one of the reasons he takes Chise under his wings (aside from making her his apprentice) though we don't actually know if he's serious or not. At the very least, other magicians and magical beings believe him and constantly call Chise his bride/fiancee. According to Lindel, it's actually not uncommon for a magician master to marry his/her disciple.
* The Ancient Magus' Bride, the sleigh beggy. It's also heavily implied that, while almost anyone can become an alchemist, only people born into magic can become mages. However, due to persecution after the last war, they are a dying race.
* The Ancient Magus' Bride, this is the product of Magus Craft, which uses magical power as a power-source rather than electricity.
* The Ancient Magus' Bride with both complete immortality (he looks like a preteen boy) and a body that's continuously, unstoppably decaying. Sure, he can't be killed by any means, but the only reason he's still ambulatory is because he works relentlessly to replace the bits that fall off.
* The ancient Morrigi Empire regularly visited the Earth (and the homeworlds of the Tarka and Hivers) for the purposes of cultural exchange (basically, trading art). According to the fluff, Morrigi see alien-made art and cultural impulses as status symbols, and possessing something as exotic as a human-made bronze age axe or a

piece of ancient meso-american poetry may have made a Morrigi male very attractive to the opposite sex.
* The Ancient Near East knew a type of cavalry which the Greeks called
* The Ancient One himself invoked this on a previous student and candidate for Sorcerer Supreme, Anthony Ludgate, by unlocking his magical potential which inexplicably
* The Ancient One, there's a swamp with water that lures people in by smelling like their favorite things, but it's really an extremely dangerous pool of acid.
* The Ancient Puzzle of Pokémopolis, the day is saved by a gigantic Jigglypuff (with an EXTREMELY deep voice) singing the two battling giant Pokémon to sleep.
* the ancient Rakatan empire was Force-sensitive and was operated through the Force. When the Rakata species suddenly became deafened to the Force, their empire promptly collapsed.
* The Ancient Relics expansion added two more races, the Baol, an isolationist and slow-moving hive mind who may be responsible for
* The ancient Romans believed their gods looked unfavourably at wars of aggression. Somehow, over the centuries, they were provoked by hostile neighbours - or aiding their beleaguered allies - into conquering their way from a single city to an empire spanning over several continents.
* The ancient Romans called this sort of character a "Ballio", after the villain of
* The ancient Romans used a variant known as "scourging", using a whip that had bits of metal or bone at the tips. This punishment was reserved for non-citizens.
* The Ancients are particularly interesting, as their civilization lasted long enough to produce several substantially disparate sets of artifacts:
* The Ancients, despite being a race made almost entirely of gigantic dicks, don't really suffer from this. The few times they are called out, they ignore it (apart from a few exceptions). Then again, they are all either dead or
* The Ancients (despite being humanity's progenitors) and the Nox, super-advanced alien races in the
* The Ancients may have been this at various points in their history in
* The ancient Spartans would flog young men as a test of their masculinity.
* The Ancients themselves discovered evidence of even older race of Precursors (or God) than themselves who left a complex message/pattern or signal deep within the Cosmic Microwave Background Radiation of the universe either before or shortly after the Big Bang.
* the Ancients, who are at least equal to the Asgard in technology, all have angular-shaped technology which overall looks, well, ancient.
* The ancient Umnians invented golems ... period. Once one of their shamans figured out how to animate a lump of mud and give it orders, they didn't
* The ancient Valkyrur serve as a counterpart to Nazi Germany's idea of the superior Aryan race, and their investigation of Valkyrur sites and artifacts is comparable to SS leader Heinrich Himmler’s interest in archaeology and the occult.
* The Ancient Walkers and the Neo Walkers have done the same, though the Neo Walkers tend to bounce between ascending and descending, especially Merlin.
* The Andal invasion of Westeros, leading to the continent's official conversion to the Faith of the Seven (barring the North and the Iron Islands, which stick to their own gods), the proliferation of Andal culture, and the disappearance of the
* The Andalite case is far more interesting. In the beginning of the series, kids look up to their erstwhile saviors, the great and glorious Andalites, and are counting on them to swoop in and save the day. It becomes increasingly obvious, however, that Andalite military command couldn't care less about humans. In the end, their strategy for for winning the war was to
* The Andalite Chronicles are their juvenile forms). Among other things Elfangor is unsure why they kill cattle on Earth sometimes.
* The Andalite Chronicles, Elfangor asks Loren if she is an "Earther" after hearing the name of her homeworld for the first time, leading to some speculation that the

Andalite homeworld is called Andal.
* The Andalite Chronicles instead of legs. Elfangor, the POV character, is dumbfounded.
* The Andalite Chronicles, it is mentioned that the Andalites used to have population control laws, but that they were repealed because of the war.
* The Andalite Chronicles. states that the Andalites blockaded the planet soon after the war started, and the Yeerks still on that planet have no contact with the Empire; neither visser would even be old enough to have been born there. But why would Visser Three try to flee to a planet where his enemies are in control? Even with an Andalite body that seems like a pretty big risk to yourself and your new, incredibly-valuable super-weapon.
* The Andalite Chronicles Sub-Visser Seven (the future Visser Three) outright refused to occupy a Taxxon host since he didn't want to live with that hunger.
* The Andalite commandos who arrive in #38 turn out to all be officially dead, so the military leadership can deny knowledge of their actions. It turns out they've been sent to kill Visser Three
* The Andalites also never came up with the idea of commercial breaks for TV. Ax calls them "These Messages" at one point, and Tobias takes a minute or so to realize what he's talking about, becoming quite disturbed when he does.
* The Andalites are a telepathic species so when they "speak" an English speaking listener hears English and translator chips so they can understand languages spoken to them.
* The Andalites get quite a bit of this after it turns out they're not quite the benevolent saviors they first appeared to be, especially after it turns out
* The Andalites invented morphing technology, but they use it mostly for art ("morph-dancing") and infiltration rather than combat (seeing as their natural bodies have a big-ass tailblade and guns are designed for hands with opposable thumbs). As a result, the Animorphs are a lot more capable than the Andalite military on some missions, with similar tactics - infiltrate, morph something specific, and go wild.
* The Andalites somehow invented computers before books. They consider books to be more convenient.
* The Andalites themselves got a big speed boost to their evolutionary process when Toomin was
* The Andalites turn out to be a subversion. They evolved to be herbivores and are initially disgusted at the idea of eating flesh, and, while not pacifists, they are portrayed as a heroic race fighting to defend the galaxy from the evil Yeerks. But those on Earth seem to not have any moral qualms about eating meat, especially since in human form they are rather
* The Andaman Islands were used as a penal colony for participants of the Indian independence movement.
* The Andermani Empire was explicitly inspired by its founders to be Space Prussians, although most of the population is originally Chinese in origin. Grayson was founded by what were, essentially, descendants of American Southern Baptists (with some fundamentalist Mormonism thrown in) and much of their culture is still recognizably American.
* The Andersons' top example was the famous "rotating walls and furniture" that took the Tracys from the house to the hangars in
* The Anderson Tapes has Anderson invoking this trope over the theft he's planning. It's actually a favor to the victims, who over-insure property. The cops have somebody to chase, the newspapers have something to write about. The list goes on. Then he subverts it by saying he's just in it for the money.
* The Anderson Tapes has one for Duke Anderson, who ends the film in critical condition after being shot. It is unknown what happens to him afterwards.
* The Anderson Tapes's first roles. The title refers to the fact that the story was told though surveillance tapes.
* The Anderson Tapes, the mob's price for its help is that Duke take Socks along on the job...and make sure he doesn't survive it.
* The Andersonville Trial, General Sherman's march through and destruction of

Atlanta only exacerbated the problems at Andersonville.
* The Anderssons of doing those things Hannes does. And to make the point even clearer, the two siblings are also divided in their different tastes in music: Cecilia likes up-tempo rock'n'roll and Hannes prefers moody jazz. Fortunately though, things become a bit better between them over the course of the book: Cecilia decides to help Hannes with writing down his poems and having them published, and it seems like they have started to get a new understanding for each other's problems.
* The Anderssons out of the four original Andersson sisters. And yep, she also is a brunette.
* the and is generally billed as "the fastest thing alive." Notable in that in the Genesis games, he is actually capable of outrunning the screen's ability to scroll.
* the, and its fourth-place finish was their best in over twenty-five years.
* The Andorians are another Proud Warrior Race (they have a duel-to-the-death ritual called Ushaan), and the Romulans have some shades of this (although they often balance "honor" with being sneaky, devious
* The Andrastrian Chantry is a fantasy version of the Catholic Church, except with a
* the Andrew McLaren from 2000 ceases to exist after he kills his younger self in 1993.
* The Andrews Sisters' "Boogie Woogie Bugle Boy of Company B" plays Reveille with a boogie-woogie beat.
* The Andrews Sisters: While they were actually a singing trio, they worked with many bands during WWII.
* The Android 18 of the main timeline could be considered one as well, before her
* The Android Camera application makes a very loud click (significantly louder than an analog camera), but it's generated by the application, not the hardware. Coincidentally, there's a completely silent user-made Camera application for sale on the app market, and it's suspiciously high up on the popularity lists. Android 2.1, Motorola DEFY - you can turn the camera sounds off. Thankfully.
* The Android Invasion). At one point Tom Baker successfully petitioned the costume designers to get the stunt scarf sewn onto the main scarf to extend it to a monstrous 19'1".
* The Android Invasion if you watched the whole thing in one sitting, but most viewers who weren't anorak-level Sarah fans would have been lost after waiting a week between episodes.
* "The Android Invasion": Sarah Jane Smith's face comes off to reveal that she's been replaced by a robot.
* "The Android Invasion", slams the door shut, and then leaps sideways through the window down onto the carpark storeys below.
* "The Android Invasion", the Doctor realizes he's dealing with a Sarah Jane android when she accepts some ginger beer, the real Sarah Jane having told him earlier that she can't stand the stuff.
* The android Reese is equipped with a device that allows her to manipulate matter. That's not where the trope comes in. It comes in when the "toys" she makes with it turn out to be the Replicators, one of the most powerful foes in the series. Which invites the question: why did you make toys that are immune to energy weapons, can self-replicate, and reproduce on their own? There's childproofing stuff, but come on...
* The Android Saga episode where Chi-Chi gets fed up and forces Goku and Piccolo to take driving lessons, commencing an episode of Goku failing spectacularly at even the fundamentals of driving, and Piccolo doing moderately well except when Goku challenges to impromptu drag-racing the middle of practice. This episode is also an acknowledged Breather Episode
* The Android's Dream, a loose multi-species union similar to the modern-day UN.
* The Android's Dream begins with a rogue government agent giving himself a lactose intolerance-induced bout of gas at a meeting with an alien species in hopes of causing a diplomatic crisis, as the aliens' communication is partly scent-based.
* The Android's Dream: Most meat products are now made from lab-grown "vatted

meat," which is technically vegetarian-friendly since no real animals were involved in its creation. Real meat, from an actual animal, is said to be vanishingly rare.
* The Android's Dream") shape themselves a nice little garden in which to chat, and human "bodies" to wear while doing it.
* The Android's Dream which function a lot like modern 3D printers. Just six years after the novel was released, they already feel dated compared to the 3D printers sold for home use today.
* The Androids of later sagas are less blatant, but still maintain the theme of "deceptively-powerful beings that look like like ordinary humans", with a young protagonist from a ruinous future going back in time to stop them. In particular, Android 16 still maintains the hulking physique and is single-mindedly programmed to seek out and kill Son Goku, until he later chooses to
* The Androids of Tara", a story that was only a couple of years old at that point.
* The Androids of Tara" (a Zenda homage), leaping from the castle wall into the moat.
* The Androids of Tara ended up playing four roles: Romana, Strella and android versions of each.
* "The Androids of Tara" takes place on a Ruritanian planet called Tara, where aristocrats fence with electrified swords.
* The Androids of Tara, the Doctor decides to leave the search for the Key to Time entirely to Romana, so that he can spend the afternoon fishing...
* The Androids of Tara". The Fourth Doctor ends up in a duel with "electro-swords". At first he seems incompetent with the blade, merely parrying blows. However, it quickly becomes clear that this is a ruse, as he unleashes more and more skill until finally besting his opponent with ease.
* "The Androids of Tara", with the absurd royal crown, the spiked helmets, Romana's apparently fashionable giant purple hat, and above all, the Archimandrite's tall, sparkly, rainbow-coloured hat.
* The Andromeda Affair the aliens are transmitting a sequence of bits whose length is the product of two primes. The hero assumes correctly that this implies the bits should be arranged in a two-dimensional grid to be understood.
* The Andromeda Explorer armor also has them, cycling between purple and blue, and the Remnant Heritage armor Ryder can make.
* The Andromeda Initiative's first meeting with the angara plays with the trope. At first, it
* The Andromeda Strain before it is too late, and it is located underground in order for them to experiment on it safely without fear of it leaking out.
* The Andromeda Strain, but due to a nuke only accelerating Andromeda's growth, this only puts the entire world at risk.
* The Andromeda Strain, but he Dan Browns it when he tosses in phrases like "don't look at the scenery" to suggest that he knows what he's writing about when he's plainly making it up.
* The Andromeda Strain carried this warning: "Rated G but may be too intense for younger children."
* The Andromeda Strain, despite knowing he's putting his life in danger in the process as both the government and military try to have him assassinated.
* The Andromeda Strain film uses Eurostile Bold Extended for on-wall signage.
* The Andromeda Strain in that the characters enter and remain at Wildfire by choice, since it is the best place in the world to study Andromeda.
* The Andromeda Strain. In the climax, a character has to get to a sub-station to stop a self-destruct. He gets shot with a tranquilizer dart that is meant for small mammals (such as monkeys). He starts staggering and moving more slowly but can still function.
* The Andromeda Strain is a contagion that has at least some form of rudimentary intelligence as it can manipulate its carriers to get into locations that will spread the virus much faster, such as having infected birds suicide into a river it can spread itself further via the water.
* The Andromeda Strain is a crystal-based organism that kills Earth creatures by reorganizing the minerals in their bodies to fit the crystalline template. It turns

out, the crystals have predefined stop points, leading to the hypothesis that the organism was created by an extraterrestrial intelligence as a data storage medium.
* The Andromeda Strain is presented as a docudrama-style recounting of actual events, complete with a bibliography listing relevant scientific papers (most of the citations are real, but some are fakes supposedly authored by characters from the book).
* The Andromeda Strain is written as an introduction to some official report of the events of the novel. All his novels after that one followed suit.
* The Andromeda Strain mentions that Wildfire team leader and founder Jeremy Stone is a Nobel Prize winner in the field of biology.
* The Andromeda Strain presents itself as being a dramatisation of real events: it starts with an on-screen message thanking the secret organisations in the film for their cooperation, and noting their insistence that events be portrayed "accurately and in detail."
* The Andromeda Strain problem, if a system is not designed correctly.
* The Andromeda Strain scene while the scientists were entering Project Wildfire. It was done to prevent any Earth microbes from contaminating the facility and interfering with their experiments.
* The Andromeda Strain science. This is followed by a skit in which Crichton calls into a "Naughty Science Appreciation Line," and gets aroused listening to the operator describe the science behind the electron microscope in a sexy voice.
* The Andromeda Strain that will lead it to Lake Mead in New Vegas, where hundreds of international flights are made every day.
* The Andromeda Strain. The bacterium mutates and destroys gaskets... that are protecting the lowest, most secure level from being contaminated. A nuclear bomb is set to destroy the base, and since the bacterium mutates with levels of energy, it'll cause a worldwide outbreak.
* The Andromeda Strain. There are multiple, redundant decontamination procedures the scientists must go through just to enter the labs, and one of these is a brief flash of intense light and heat that burns away their outermost layer of skin, and all the microbes on it. It takes nearly 24 hours to go through the complete procedure.
* The Andromeda Strain, the scientists at the containment facility figure that if whatever they're studying gets out of control, they'll nuke it. Bad idea — the strain has mutated to the point where it can feed on nuclear radiation.
* The Andromeda Strain, the secret research installation plays pre-recorded messages spoken by a female voice described as "luscious". Dr. Hall is bemused to learn that this voice belongs to a 60-year-old woman.
* The Andromeda Strain. They bring the satellite to town where it's opened, and they both end up being some of the first victims of eponymus Andromeda contagion.
* The Andromeda Strain This is not helped by the fact that a shadowy government organization kept a small sample of the Andromeda Strain, and it's even implied to have gotten loose since the message sent from the future referred to its storage code.
* The Andromeda Strain what it's disguised as — a wheat modifying facility.
* The Andromeda Strain, with three substations (to disarm the bomb) per floor, but it's discovered they need five per floor, and are in the process of adding them, but they haven't been finished (this is a government installation, of course). When the self-destruct countdown is activated, team leader Stone, along with the only team member who has the shut-off key, are trapped in a section with an unfinished nuclear destruct shut-off substation. Stone cries out, "When the bomb goes off, there'll be a thousand mutations! [The virus] Andromeda will spread everywhere, they'll never be rid of it!" He touches the other team member and points at the exposed, unfinished shut-off substation. "The defense system is perfect, Mark, it'll even bury our mistakes."
* The Andromedons are unable to breathe oxygen and the atmosphere of their own planet is toxic to humans. As a result, the ones encountered during the game all wear
* The Androssian Prophecy Darach that Tala told him "what happened at the temple."

Darach assumes Raelen means Tala kissing him (as thanks for protecting her from an assassination attempt) and frantically denies that he has any romantic designs on her. However, Raelen was referring to the saving-of-Tala's-life part. Cue a quick backpedal from Darach.
* the and that Domino was a far better musician). To his friends and associates, if he wasn't Elvis, he was "E".
* The and the person telling him to pull off this scheme in the first place, which means that Vince basically had his own daughter kidnapped. And that's not even going into all of the crap from 2000. This quote sums them up nicely:
* The, and very different priorities from his peers. This often manifests as him being impatient with both the (normal) teenage childishness of his peers and the nature of the Wizarding World, while they're somewhat creeped out by him.
* the. And yes, standing under them gets your character completely drenched in crimson.
* The Andy Griffith Show about winning a foot race, when receiving his award he already has numerous medals pinned to his shirt, so Andy turns him around and pins it on his back.
* The Andy Griffith Show, a judo expert disguises himself as Barney Fife to put one over on a man who has been threatening Barney & Andy.
* The Andy Griffith Show, Andy and Barney both comment that Aunt Bea's infamous pickles taste like they've been floating in kerosene.
* The Andy Griffith Show: Andy Griffith and Don Knotts were like this. Andy's Andy Taylor was the straight man and Knotts' Barney was the wise guy. Although it was originally to be the other way around.
* The Andy Griffith Show: Andy literally tells Opie, "Sometimes, when a man and a woman love each other very much..." and the show dissolves away. Opie tells a friend afterward that he knew all about it already, but didn't say anything since Andy was so eager to tell him.
* The Andy Griffith Show, Andy once had to call a woman and tell her that her husband, whom they presumed dead and held a funeral for 2 years ago, has turned up alive. Knowing this will be a huge shock, he tries to get her to sit down.
* The Andy Griffith Show, Andy starts dating Opie's teacher Helen Crump, who later becomes Andy's wife and Opie's stepmother. Unlike most examples, Opie never really had a problem with Andy dating her but was actually happy about it.
* The Andy Griffith Show; Andy tells the "Where's My Golden Arm" story around the campfire.
* The Andy Griffith Show any effective bank security, what with its rock-bottom crime rate and genial, honest community — in fact, the only reason it was robbed in the first place was because an out-of-town robber overheard Barney ranting about the lax security in specific detail.
* The Andy Griffith Show, as his father finally decides he's had enough, declares that he's going to sell the bike, and takes a kicking and screaming Arnold to the "good ol'-fashioned woodshed" out back.
* The Andy Griffith Show Barney attaches a whole bush to the front of his new motorcycle as part of a speed trap.
* The Andy Griffith Show Barney goes undercover at the local department store as a mannequin.
* The Andy Griffith Show - Both Andy Taylor and Barney Fife served in World War II, however neither saw combat, and Barney admits that he was not allowed to leave the States.
* The Andy Griffith Show, displays detailed knowledge of American history in a scene where Barney tries to lecture him on the subject.
* The Andy Griffith Show episode "The Big House", Barney Fife lays down the law for two new inmates at the jail:
* The Andy Griffith Show features Aunt Bee's home cooking, lace doilies on the bedstands and a key left deliberately within reach of the cell so that Otis, the town drunk, can let himself out when he's sobered up. The Logic being that the only person who would ever use it is a decent bloke who just needs a place where he can't hurt himself or others.

* The Andy Griffith Show had an episode where Howard Sprague joins an order of which Andy and Goober are members. They only seem to wear the silly robes when they're deciding whether to accept a new member.
* The Andy Griffith Show had Barney Fife get his foot run over by a clueless driver, who has to be told to get his car off of Barney's foot. Barney then tells Opie, who is standing nearby, to cover his ears as he chews out the driver.
* The Andy Griffith Show had Ronny Howard mentioned in the opening credits but not appearing in the episode itself.
* The Andy Griffith Show has an episode called "The Bank Job", in which Barney stages a bank robbery to prove to everyone how insecure the bank is.
* The Andy Griffith Show has an episode where Barney gets one of these, Andy convinces him to throw it out, and...well, you can guess the rest.
* The Andy Griffith Show In this episode, Andy gives Gomer a ride, accompanies him onto the base, and even interacts with Gomer several times, all with the intent of talking Gomer out of his decision. The pilot episode of Gomer Pyle, U.S.M.C. led to some disconinuity as many of the scenes were re-enacted without Andy being present.
* The Andy Griffith Show — although not a cop show per se, included since two of the show's leads — Andy and Barney — were law enforcement officers, their work figured into many of the plots and they often worked together.
* The Andy Griffith Show once has Barney, while looking for a lost goat, enter an dark shack. The highway department is using dynamite to build a new road near Mayberry. Fortunately when Barney lit the match he doesn't light anything else.
* The Andy Griffith Show: One of the most visible and popular characters was Floyd Lawson, aka "Floyd the Barber". During the series' third season, Howard McNear, the actor who played him, suffered a major stroke, which left him unable to walk. Special accommodations were made to allow McNear to continue his role, usually by having him sit in a chair at the shop or by having him lean against an unseen stand (to make it appear he was working); although there were times his speech was slurred, McNear remained on the show as long as his health continued. Floyd the Barber makes appearances through the end of the 1966-1967 season when failing health no longer allowed McNear to continue; he died in 1969, less than a year after the final show aired.
* The Andy Griffith Show, one resident of Mayberry reported that his cow was stolen. An expert criminal forensic scientist comes out and wows everyone but Andy with his scientific knowledge. As they analyze the crime scene they identify three different sets of boot prints which the expert says belong to three different suspects. Andy is the only one to notice something important which is missing, the cow's footprints.
* The Andy Griffith Show: On occasion, whenever Barney is on the phone with Juanita at the diner, either reciting his poetry, or little love song to her, Andy will sneak in, waiting for the perfect opportune moment to join in and either reciting, or sing along with Barney, much to Barney's aggravation.
* The Andy Griffith Show, Otis Campbell, Mayberry's local drunk, constantly makes one of the jail cells his own personal bedroom during the weekends to the point Andy doesn't even bother trying to stop him from coming in and sleeping off the booze. Even allowing him the keys to the Sheriff's office to come in when he needs too.
* The Andy Griffith Show, specifically, "Mr. Mc Beevee." Opie is accused of stealing a quarter, and refuses to concede that Mr. Mc Beevee (a telephone lineman, who gave the coin to Opie) is imaginary, and Andy makes an implied threat that if Opie doesn't bend, he could face a whipping. The incident is averted when Andy decides he needs to believe his son ... and then really averted when Andy has a chance meeting with Mr. Mc Beevee.
* The Andy Griffith Show, strangers have assumed that Barney was the sheriff on more than one occasion, because Barney always wears his tie, cap, and sidearm, whereas Andy prefers to dress (and behave) more casually and never wears a gun.
* The Andy Griffith Show (thanks to Don Knotts' vast comedic talents) as it is more his overblown know-it-all attitude that makes him who he is and made him one of television's most beloved characters. His worst area is arguably his ineptitude

with firearms.
* The Andy Griffith Show: This is how convict Eddie Brooke escapes the custody of two state troopers in "Barney Gets His Man".
* The Andy Griffith Show to a conwoman, who demanded money with an accusation of this trope.
* The Andy Griffith Show was convinced someone was a jinx in one episode.
* The Andy Griffith Show was Goober's Cary Grant imitation, which consisted of nothing but him saying "Judy-Judy-Judy" very fast in a heavy North Carolina accent.
* The Andy Griffith Show when a famous musician returns home to Mayberry. Barney insists on giving him a police escort from the courthouse to his hotel—which is four doors down the block.
* The Andy Griffith Show when Aunt Bea is a holdout for a not guilty verdict but is completely inarticulate about why. She merely keeps insisting that she doesn't think the accused is guilty and winds up hanging the jury. As the court is preparing for another trial, Sheriff Taylor discovers that the real perpetrator was watching the trial from the gallery, and arrests him.
* The Andy Griffith Show, where two yokels who accidentally pick up a container of nitroglycerin (somehow mistaking it for fertilizer) manhandle it for the entire episode. It is only when it is dropped down a well that it finally explodes.
* The Andy Griffith Show: while in Mount Pilot, Andy & Barney go to a fancy French restaurant. Andy isn't too proud to say he can't read the menu and just orders a steak. Barney points to menu items and gets stuff he never thought of as food.
* The Angaran Chronicles against the oppressive theocracy which dominates the continent of Angara. Mostly following the elf Hunter Anargrin and his elite team in their morally ambiguous black ops missions.
* The Angel and the Soldier Boy was an incredible animation with no words, just music by Clannad. During one sequence a toy soldier and angel follow Pirates onto a ship that jumps into a painting of a sea scene.
* The angel Balthazaar, a former friend of recurring character (and fellow angel) Castiel. At some point during the Apocalypse, Balthazaar went rogue and has started making
* The angel Castiel was a fan-favorite upon his first appearance, thanks to his
* The Angel Eater arc is also a great example: Belldandy, while implanted with the devil by Hild, gains a tight and revealing outfit and demon wings.
* The Angel Experiment, the Flock spend a night in New York sleeping in trees. They wake up the next morning with the police calling for them that what they're doing is illegal and to get down right now so they can have their parents called. Gazzy wonders who even looks up trees and Max comments "like there aren't worse problems going on than a bunch of kids sleeping in a tree".
* The Angelic Alliance is a Set Artifact created from every artifact that offers stat bonuses to all four primary stats. The Alliance not only retains those bonuses (+21 total to every stat), it also removes the Morale penalty from mixing good and neutral troops together and casts Expert Prayer at the start of combat. The opponent could neutralize the Prayer with Expert Dispel, but this does nothing to the huge stat bonus (and good luck getting a chance to cast Dispel in the first place since the speed boost from Prayer will likely grant the army the first strike anyway — and the attack boost may very well ensure it's also the
* The angelic mayor Kaja of Katton also became very important very quickly, being a rare
* The Angel is a world-wandering costumed vigilante with no specific purpose, so seeing a random woman in danger is always a good way to get him involved in a plot. The woman in the second story was in danger because she had something someone wanted. The one in the third was kidnapped off the street to be a
* The Angel Knows. Thus the rest of the cast doesn't appear in this novel.
* The Angel of Darkness confirmed that he survived and was meant to return in the scrapped sequel.
* The Angel of Slaughter's organization brutally killing her captors while she watched.

* The angel Samandriel still believes after all the damage Castiel caused that he was only trying to make things better.
* The Angels are sort of a spoof of this: they manage to be even purer and more blissful than Fuchsia and Criminy, spending most of their time holding hands and flying around helping people. They also perform "The Wholesome Lambada of Platonic Love" for Slick and Monique.
* the Angel scooby gang ends up being given the LA branch of Wolfram and Hart to do with as they please.
* The angels count, too: God once punished Israel because David heed Satan's advice. Result? An angel was sent to wipe out many, many places off the face of the Earth, before God stopped him just as he was about to lift his finger to wipe out Jerusalem. But they are
* the Angelshark which looks more like a Manta Ray. It's generally a bottom dweller that feeds only on other fish. However, if provoked or if its tail is grabbed it can bite and leave grave lacerations because of its sharp teeth.
* The Angels Sanguine never remove their helmets, refusing to show their faces to those outside their Chapter. It is rumoured that the reason for this is related to a dark secret that lies in the catacombs beneath their Fortress-Monastery.
* The Angels Take Manhattan", Amy assured the Doctor that she and Rory had long happy lives together after being sent in the past by the Weeping Angel. Speculation on how their lives went has fueled more than a few fanfics.
* "The Angels Take Manhattan" at the end of an episode. This time, nothing.
* "The Angels Take Manhattan" ends with Amy and Rory defeating the Weeping Angels...but then another Weeping Angel appears and sends them back in time, separating them from the Doctor forever. While it was definitely this trope for the Doctor, the episode also makes it clear that it was
* "The Angels Take Manhattan": Most Weeping Angels are predators, which feed on other species by touching them, sending them back in time, and then draining the time energy from their lost future. The ones in Manhattan, however, made their lair out of an abandoned hotel: they keep humans captive in there, and repeatedly send them back in time to the same hotel so they can feed on them over and over again. The Doctor explicitly compares it to a battery farm.
* The Angels Take Manhattan) to avoid a lifetime of being trapped in a building by the Weeping Angels (where they had previously witnessed an old Rory dying). After the timeline repairs itself and everyone is safe in 2012, Rory notices a gravestone with his name carved into it ... before being suddenly zapped back in time by a Weeping Angel (and the gravestone updates itself to reflect the age he died at). The Doctor views it as if Rory had been killed because that point in New York's timestream has been damaged enough that the Doctor can't land the TARDIS back there to go get him.
* The Angels Take Manhattan turns out to be an alien statue called a Weeping Angel and naturally, it is gigantic. Oddly, since the Angels use stealth as their greatest strength, it isn't as threatening compared to the other Angels and is just background. It's also portrayed a lot smaller than the real thing.
* The Angels Take Manhattan", when the Doctor gives up some of his own regeneration energy to heal her broken wrist.
* "The Angels Take Manhattan", where they figure out they can make a "battery farm" of humans by sending them back repeatedly and feeding on them again and again until they age and die.
* The angels were founded as vampire hunters. While at first everyone loved them for it, over time the vampires became less insane and monstrous, but the angels kept slaughtering them like beasts. Eventually an uneasy peace was forced between the two groups.
* The Angels, who in the fifth and sixth seasons also start becoming disposable Mooks. Like the demons, when Angels die, they also generally take their human hosts with them. However, in this instance, the human hosts gave the Angels their consent to inhabit their bodies in the first place. Additionally, the civil war that occurs in Heaven post-Season 5 is shown to have massive casualties. Castiel is said to have smited thousands during his brief

* The angel that guards the Garden of Eden is described as wielding a fiery sword that "turned every way", such that the sword is
* The angel that said Positron Rifle is employed against (Ramiel) produces a fusion-powered beam that goes through several buildings. Then it applies
* The Angel with Black Wings - An angel mentioned the name "Lucifer" in Chapter 12: Enemy, Page 27.
* The Angel with Black Wings are the biggest bully in Ray's school life.
* The Angel with Black Wings seems like she's goofing off and just pulling harmless pranks with people but she can get very strict when it comes to the angels rules and also one of the powerful angels in the series.
* The angle from which it's filmed hides the fact that Lloyd is actually hanging above a rooftop rather than the street below. The fall could still have been fatal, though.
* The Anglerfish is the only realistically-drawn animal to appear in the entire film.
* The Angler's quests. He will ask for a fish somewhere in the world, which can be obtained by fishing in a given biome long enough, and giving it to him will net a reward. The problem is that the rewards are completely random, the quests can only be done once per in-game day, and three of the prizes are needed to craft a convenient high-tier item that has information and home-teleportation all in one (saving inventory slots). Because of this, getting unique items from him is a
* The Anglican Church persecuted Protestant dissenters such as Baptists, Quakers and other sects, many of whom settled in America to escape the Church of England. Because dissenting Protestants were such a big part of American society and politics, they disliked an official organized church authority (at the time that is), and this led to consensus for the First Amendment, a policy that forbids any official government position or endorsement of religion, that separates Church and State and also upholds religious liberties. Initially this applied only to the federal government (some states then still had official churches, and prosecuted preachers from minority sects at times for preaching without a licence). By the 1830s, however, these were abolished. Blasphemy laws did not last much longer in the US. Sadly though, some Native American religions and rituals would be banned later. Even now there is much dispute over the right extent of religious freedom, with Congress and courts wrangling over it regularly.
* The anglicization of Jesus (Yeshua) is actually Joshua, and there are plenty of American people called that. It is a bit like how in the Muslim world, you will rarely find anyone named Muhammad (since only the prophet can be called that), but in other places, you'll find plenty of Mohammeds or Ahmeds (both of which are derived from the same name).
* The Anglo/American – Nazi War against the younger, fitter and better armed Allied troops.
* The Anglo/American – Nazi War , and they show little concern for their auxiliary troops.
* The Anglo/American – Nazi War and worse, all of it is what they planned to do in real life.
* The Anglo/American – Nazi War : Nazi Germany succeeds in subduing the Soviet Union in 1943 after several lucky breaks, but doesn't conquer Britain. Eventually, the United States gets involved in the Battle for Europe and they get defeated anyway, basically a repeat of how World War I ended.
* The Anglo/American – Nazi War several OTL nations are TTL divided:
* The Anglo/American – Nazi War . The Marianas islands later join as the 52nd state, while the Ogasawara Islands and Netherlands Antilles become territories and 99-year leases are closed on Okinawa and oil territory along the Persian Gulf.
* The Anglo/American – Nazi War use of anthrax bombing and nukes, there really isn't much left of Europe after the war is won.
* The Anglo-Saxon Huscarls at the Battle of Hastings were reputed to be carrying two-handed daneaxes, whirling them around above their heads in a show of strength. This terrified the Normans, who didn't use axes. Earlier that year, at the Battle of Stamford Bridge, it is said that a single Viking warrior with a similar weapon

stood on the titular bridge and held off the entire Saxon
* The Anglo-Saxon riddle poem: A game in which a vague poetic description of an item was given and listeners were expected to recall a rote answer, is almost entirely dead today.
* The Anglo-Saxons are particularly clear examples, with the two greatest hoards ever found (Staffordshire and Sutton Hoo) consisting of functional golden and bejewelled battle-wear. Complete with dents and other battle scars.
* The Anglo-Sino Alliance has jurisdiction over almost the entirety of the star system in which the
* The Anglosphere is built around this, military-wise. Each of the above-mentioned countries can and have engaged in some truly impressive feats during countless battles through numerous wars. The US and Canada had
* The Angosians of TNG eschewed violence for intellectual development. When threatened by the Tarsian War, they genetically engineered some of their citizens into
* The Angry Beavers, a drowsy Norbert and Daggett have the least energetic pillow fight ever.
* The Angry Beavers, a mass of living pond scum was able to control Nobert by going inside his ear.
* The Angry Beavers), and finally finishes eating 10,000 boxes of cereal, he finds out that the sponsors have discontinued the promotion, and the brothers infiltrate the factory to get the prize.
* The Angry Beavers, at one point Oxnard is holding off a bunch of monsters, when someone suggests they attempt to communicate. Oxnard says that he is speaking the only language the monsters can understand, namely, fisticuffs.
* The Angry Beavers: At the end of "Stinky Toe", Dagget manages to cure his brother's case of the eponymous disease, only for Dagget to fall victim to a bad case of "Gunky Ear".
* The Angry Beavers, Daggett becomes the park ranger, but he goes mad with power and all the other animals decide to revolt as Daggett stays out of reach in a watchtower.
* The Angry Beavers, Daggett decides to fight fire with fire... except Dag accidentally becomes a flamboyant Latin American dancer after watching a commercial for a "weight loss through limbo dancing" program.
* The Angry Beavers, Dag makes Norb take a Super Solemn Beaver Promise which, if broken, means the perpetrator would be banished to the top of the highest mountain and made to wear an itchy sweater for the rest of their life.
* The Angry Beavers decide to give up and continue on with the previous universe, putting Dag and Norb back where they belong.
* The Angry Beavers episode "Beavemaster" had a scene where Tor slipped on a banana peel and fell down a cliff.
* The Angry Beavers episode "Daggy Dearest" has a scene where baby mongoose Gary pees in Norb's face while Daggett is changing his diaper.
* The Angry Beavers episode "House Broken", Daggett prepares to chew at some trees, but is grossed out when he sees that a coyote had been peeing on them.
* The Angry Beavers episode "Muscular Beaver 4". After spending the whole episode playing superhero, the last scene shows everyone flying through the air, and then Daggett remembers "Hey wait, we don't know how to fly!" and everybody plummets down.
* The Angry Beavers episode "Muscular Beaver" had Daggett attempt to help people out as the superhero the Muscular Beaver, but instead he only causes trouble for them. He bothers a bear trying to fish by attracting a giant fish that eats the bear. After that, he sees some baby birds learning to fly and annoys the mother by convincing her children that they can fly just by jumping in the air and shouting "Whoosh". Lastly, he sees a raccoon near a picnic and assumes that the raccoon is hungry, so he steals the family's food in a misguided attempt to help, only for the raccoon to get in trouble when the family catches him with the stolen food.
* The Angry Beavers episode "Open Wide for Zombies" had Norb and Daggett encounter a Swamp Witch named Edgar.

* The Angry Beavers episode "Sans-a-Pelt," a mishap involving a magic trick left Norb and Dag with no fur except head fur...and needing to get back to the dam. They encounter some sheared sheep who perform a musical number convincing the brothers (mainly Norb) of the benefits of going naked.
* The Angry Beavers episode "Sans-A-Pelt", Norb and Dag lose their fur after a failed magic trick exposing their naked bodies.
* The Angry Beavers episode "The Legend of Kid Friendly" had Norb and Daggett battle a demented outlaw named Kid Friendly. Kid Friendly initially appeared to be human, but later emerges from rubble to reveal that he's actually a robot.
* The Angry Beavers episode "The Legend of Kid Friendly" shares some traits with the Terminator, most notably being a skeletal robot in his true form and being able to regenerate like the T-1000 at the end of the episode.
* The Angry Beavers: Evidently, sapient evil rivers are just as scared of heights as normal people are, as Norbert and Daggett exploit in "A Dam Too Far".
* The Angry Beavers featured Norb and Dag competing over a variant: the boxtop prizes. Dag would reach in and grab the prize at the bottom, but Norb would clip boxtops and mail them back (and receive a much better prize in return).
* The Angry Beavers. Finally, Dag ends up making him promise not to do it again, then accidentally ruins the end of his movie by spoiling the ending. Norbert keeps his word and doesn't punch him into last week. Instead... well, this quote will explain it.
* The Angry Beavers had El Grapadura (The Stapler), who had his own TV show and even starred in a movie with the beavers.
* The Angry Beavers Halloween special was illustrated by stock footage of planes taking off, tanks driving away, navy vessels sailing on the sea, cavalry riding across the screen, sumo warriors struggling, baby turtles running across the beach, and Zulu warriors cheering. In that order.
* The Angry Beavers Halloween special, where a general scrambling the troops goes "This is not a drill! Repeat, this is not a drill! If it was a drill, I'd be telling you it was, but it's not!"
* The Angry Beavers, he lost his cape and fearsome helmet and became more or less Norbert with a bucket for a helmet.
* The Angry Beavers. His solution? Just let his brother hit him on the head again.
* The Angry Beavers: In one episode, a tree that has been growing since the time of the dinosaurs teeters on the edge of a cliff due to millions of years of erosion. Finally, a single fly lands on an exposed root-sending it toppling right into the protagonists' house.
* The Angry Beavers: In "Soccer? I Hardly Know 'Er!", Daggett turns out to be able to channel his bad temper into being a skilled soccer goalie. However, he gets so into the game he acts like a hooligan (complete with bad accent), ranting on about how it doesn't matter how the game itself plays out, because there will always a fight afterward.
* The Angry Beavers: In the episode "Gift Hoarse", Norbert gets a huge train set for Arbor Day (which, on the show, is like Christmas for beavers), while Dagget just gets a cardboard pine-tree air freshener. Dag proceeds to wreck Norb's train set in a fit of jealousy, but then feels guilty and lets Norb have his gift instead. As if on cue, the delivery man shows up with Dagget's "real" gift, a monster truck (with which the air freshener was supposed to go), which is now Norbert's.
* The Angry Beavers into Baron Once Bad Then Good Then Bad Again Beaver.
* The Angry Beavers: In "Tough Love", Bing shows up just as Dagget and Norbert are about to leave for a wrestling match and laments he had a messy break-up with his girlfriend Wanda. Norb gets distracted comisserating with Bing over his own troubled relationship with Treeflower, and an annoyed Dagget decides the only thing to do is track down Wanda and get her and Bing to make up. Unfortunately, a damaged sign that originally read "DON'T WANDER HERE" leads Dagget to the lair of a cranky alligator, whom he becomes convinced is Wanda.
* The Angry Beavers. It turns out the island on which their domain is located is... just three feet away from the Beavers' dam.

* The Angry Beavers, leading to people sending angry letters to the studio regarding what they thought was a swear word in a show for kids.
* The Angry Beavers, members of the press are seen wearing a variant of these hats; rather than having square cards tucked into their hatbands, however, they appear to have round pinback buttons saying "Press" on their hats.
* The Angry Beavers, Norb and Dag find themselves launched into a large conifer, which is then all lit up for Christmas. It's then revealed that it's April.
* The Angry Beavers, Norbert and Daggett's younger sisters, Chelsea and Stacy, are named after and voiced by creator Mitch Schauer's daughters.
* The Angry Beavers, Norbert gets arrested for a crime Dagget committed and sent to a zoo, which turned out to be a 5-star resort for animals.
* The Angry Beavers Norbert is trying to get his mind off Daggett being taller than he. When he watches TV, everything suggests that being short means being a loser.
* The Angry Beavers Norbert spends most of the episode pretending that he was sick so he can avoid work and make Daggett wait on him hand and foot. But then, Daggett turns the tables on Norbert by pretending that he's sick. After Norbert gets angry at Daggett for tricking him, they both admitted to each other that they care about each other and made up until it turns out that they both got sick for real at the end of the episode.
* The Angry Beavers. Norbert was there too and intended to help (because he thought Dagget would screw up), but his help is spotty as he had an ear infection and acted goofier than his brother usually did.
* The Angry Beavers, sending both groundward. The military gag completed, the two beavers are yanked from their army uniforms by the force of gravity, and both fall out of the plane without.
* The Angry Beavers taboo at time, which forbade shows from having a definite ending so that the episodes could be re-aired in any order on reruns, but it's actually rather critical of this practice in general, acussing Nickeledeon of profiting off reruns of already-completed TV shows without giving any compensation to the actual creators.
* The Angry Beavers that happens to eat it... and this one too was brought home by Daggett, ready to eat them in the whale's place.
* The Angry Beavers. That is, if 5 minutes pass between one scene and the next, the clocks will have advanced by exactly 5 minutes.
* The Angry Beavers: The episode where Norbert (who is deliriously ill with an ear infection) and Daggett are invited to Stump's family reunion ends with Norbert's head swelling to tremendous proportions (read: bigger than a mountain) and Daggett and the remaining Stump family members heading for the hills. The final scene is Norbert peeking over the side of the mountain, laughing insanely as he presumably is about to give chase and then...fade to black.
* The Angry Beavers, "Up All Night": This is one of the things that Norbert and Daggett try to do to pass the night. Not only does Daggett botch the joke completely, but it turns out Norbert baited his brother into calling their mother.
* The Angry Beavers was scripted, Nick Bakey and Richard Horivitz were often encouraged to improvise, resulting in some of the show's more stream-of-consciousness jokes.
* The Angry Beavers when he discovers a camera poking out of the sink.
* The Angry Beavers, where the host of a show explains how Bears can eat beavers and will be driven to do so at the slightest taste of them. Beary questions if they actually believe that he's going to eat them, and basically everything he tries to do is then mentioned on the TV show as a sign that a bear is going to eat you, culminating in the host of the show appearing in person at their house insisting that he's right.
* The Angry Beavers, who's technically the younger sibling by several seconds. He means well, but he's impressionable and incredibly high-strung.
* The Angry Birds Movie 2: Leonard sends messages via baloons to ask the birds for a truce. Upon reading one, Red asks if Leonard thinks the birds are idiots. The next message to reach Red contains Leonard's answer to the question. He does think they're idiots but really wants a truce.

* The Angry Birds Movie 2: Red, Chuck and Bomb see a flying cream pie (courtesy of the pigs) and immediately hide in the sand after Red says "Duck!". In response, an actual duck sitting on a beach chair hears what Red said and is soon hit by the pie.
* The Angry Birds Movie 2, the hatchlings inflate Zoe to try to rescue some eggs they lost. Despite Zoe only being inflated by the other birds blowing into her, she does float upward into the sky, and even into space.
* The Angry Birds Movie 2: The logo is bright red and falls into a pile of bright red feathers that fly everywhere.
* The Angry Birds Movie 2: When trying to rescue some unhatched eggs which ended up stuck on a cloud, the hatchlings inflate one of their own, Zoe, and rides her up to the cloud as she floats. It works too well, as they pass the eggs entirely and, unable to deflate Zoe in time, end up floating to outer space, only landing back when the string tied to Zoe's beak gets caught in a satellite and she deflates.
* The Angry Birds Movie 2: While all the other characters had at least some resemblance to their game counterparts, Silver looks completely different from her game version.
* The Angry Birds Movie about Red's anger issues and the Bad Piggies arrival to Bird Island. It's not until Red, Chuck, and Bomb discover the pigs' plans to steal the birds' eggs that the movie begins to increase its pace.
* The Angry Birds Movie and the "Coexist" logo, the 3 main birds are the colours of the German flag (and in at least one scene even in the same order), the pigs have beards which look strangely Arabian (especially odd considering none of the pigs in the original game have beards), there's a bald eagle that looks similar to a certain presidential candidate, a mime bird shows up (reminiscent of the Paris attacks) and various other such details.
* The Angry Birds Movie, a new area in the game opens, along with an additional scene from the movie being available for viewing.
* The Angry Birds Movie: At the beginning of the movie, it is implied that Red did this when he was inside of the family's egg, but how he found out the sex of the child is unknown.
* The Angry Birds Movie, during an attempt to retrieve the eggs, Chuck enters Chuck Time just as Red tries to come up with a plan. He uses that time to paint a demeaning message on one of the Bad Piggies ("Fart Face" in the film, "I stink" in the junior novel) and gives the paint bucket to another pig to make him a scapegoat. When the time gets to normal, the Bad Piggies fight amongst themselves.
* The Angry Birds Movie, ending with him appearing to poop on his shoulder. It later appears to be vanilla ice cream, but later, Chuck says that it was not.
* The Angry Birds Movie, Hal's jaw drops on Bubbles when Leonard introduces himself.
* The Angry Birds Movie: If someone new comes to your land, they're probably thieves who are going to steal your children.
* The Angry Birds Movie: Mighty Eagle puts on "I Will Survive" as the credits begin to roll, and all of the characters, even Red and Leonard, start dancing. Or at least Red's eyebrows start moving in rhythm to the music.
* The Angry Birds Movie, on the other hand, is widely considered an improvement over the former thanks to improving the relationship between the pigs and the bird and generally improved humor. Its 75% rating currently makes the sequel the most critically successful video game movie in film history.
* The Angry Birds Movie, Red is sent to an "anger management" class as punishment, where he meets Chuck and Bomb.
* The Angry Birds Movie. Red lampshades this during his court trial—even went so far as to pull the robe off to prove it.
* The Angry Birds Movie the characters are radically re-designed from their game counterparts. Most notably they now have hands and feet!
* The Angry Birds Movie The sight of it is enough to make Bomb cry while Chuck frantically tries to scrap his tongue off with a rock.
* The Angry Birds Movie voicing Hal & Bubbles, as most of the celebrities listed here are:

* The Angry Birds Movie, which saw a huge increase in downloads compared to its first year.
* The Angry Grandpa videos have this sometimes. Angry Grandpa destroys bathroom:
* The Angry Joe Show: Angry Joe has the ability to use Force Lightning. It is exactly as hammy as you think.
* The Angry Joe Show) argues whether or not they should progress their military or their science.
* The Angry Joe Show if he was the CEO of a video game company. He mainly partakes in developing overpriced, poorly made games and locking content behind downloadable content and loot boxes.
* The Angry Joe Show is approaching the generator... The generator is losing power... Godzilla is approaching the generator... The generator is losing power..."
* The Angry Marines, a homebrewed chapter of Warhammer40K SpaceMarines,. And the Angry Marines may or may not have been rocking out on it while it descended in flames upon the demon's head.
* The Angry Marines are an entire semi-parodic Chapter of Imperium of Man
* The "Angry Mob" approach is also how they do politics. In "Much Apu About Nothing", the town is angry about the "Bear Crisis", so they march on town hall:
* The Angry Red Planet: Four astronauts that are highly trained scientists somehow mistake the forty-foot bat-rat-spider-monkey creature legs for trees while exploring Mars.
* The Angry Red Planet. Space explorers land on Mars but instead of finding intelligent life, they're constantly attacked by monsters. When the survivors leave, they get a message from actual Martians, telling them never to return (possibly implying that the attacks were foisted on them on purpose).
* The Angry Red Planet technique, which enables hand-drawn backgrounds to look as real or as unreal as the live-action footage. However, the Mars scenes do shift from Technicolor to a red hue.
* The Angry Red Planet, which is pretty much exactly what it sounds like.
* The Angry Scientist has no hair and is often cooking up inventions that General Specific and Private Public can use to capture Sheep.
* The angry spirit who attacks a philandering professor in "Tall Tales" is this.
* The Angry Sun is a large, round flame with a perpetually-angry face. It periodically charges at Mario and Luigi in an arcuate pattern.
* The Angry Video Game Nerd, a character shows up who starts harassing the Nerd with "did you know" questions that he's heard before, questions about when stuff is coming out, and requests for advice on how to create a ripoff series.
* The Angry Video Game Nerd Adventures as playable characters. (Speaking of Mike, he can spot secret paths and destructible tiles, making searching a good deal easier.)
* The Angry Video Game Nerd Adventures difficulty makes the game take longer, players who know what they're doing can beat the game in as little as a couple hours.
* The Angry Video Game Nerd Adventures ends with the characters escaping from Game Land, only for the Nerd to find out that the game was specifically made to do so. He remarks that you'd have to be a "total nerd" to play it again... three guesses as to what happens immediately afterwards.
* The Angry Video Game Nerd Adventures has the level "Blizzard of Balls", a disturbing level with parts including battling with a snowman and a reindeer and then the Nerd exacting his revenge on Santa for the years of crappy games every Christmas by killing him and going on a downhill ski with his body.
* The Angry Video Game Nerd Adventures) running back and forth with a chainsaw.
* The Angry Video Game Nerd Adventures that featured the Nerd in Mega Man's place.
* The Angry Video Game Nerd Adventures throws up a randomized message each time the Nerd dies, usually following the template: "I'D RATHER (colorful verb phrase) FROM A (animal's body part) THAN CONTINUE THIS (colorful adjective) GAME!!"
* The Angry Video Game Nerd Adventures well the frustrating old-school games the AVGN often complained about.
* The Angry Video Game Nerd. A few minutes later, he reviews the actual game.

* The Angry Video Game Nerd after his videos started becoming more popular.
* The Angry Video Game Nerd always have them yelling each other's name dramatically whenever they meet up... somehow.
* The Angry Video Game Nerd and comes up to the "FREDDY'S™ COMING!" screen.
* The Angry Video Game Nerd and him physically assaulting the game cartridge. He pokes fun at his own status in one of his videos, where he finds a video game he actually likes and reacts with utter bewilderment.
* The Angry Video Game Nerd. Anger is literally part of his name! The Nerd tends to have grossly overblown reactions to bad video games, doing everything from going into very detailed descriptions of things he'd rather do than play the games, to utterly destroying the game cartridges. This temper even caused him to destroy a golden cartridge of Nintendo World Championships, of which there are only twelve on the planet. (Well, eleven now.)
* The Angry Video Game Nerd as a role model in an educational game for kids that teaches math, reading, and grammar:
* The Angry Video Game Nerd as symbolism of the duality of human nature and mockingly declares it the greatest video game ever made:
* The Angry Video Game Nerd, but scatological comments in a mix and match manner. He also tends to visualize things being defecated on — when he isn't physically defecating on them himself.
* The Angry Video Game Nerd, but that doesn't make his much-needed commentary on the constant wrongs of game and hardware developers throughout the history of the medium any less valid.
* The Angry Video Game Nerd came to the realization that his purpose as The Nerd is meaningless without bad video games. In the beginning, he was wishing that his game room wouldn't be cluttered with so many bad games. But when ROB the Robot removed them from existence (for its own purpose), that victory felt hollow.
* The Angry Video Game Nerd changing the actual gameplay mechanics, it's evident the developers had absolutely no clue who the game was supposed to appeal to either.
* The Angry Video Game Nerd compared to later and recent videos. Well, by comparison anyways...
* The Angry Video Game Nerd compilations on PS2 which combined make up 68 games total.
* The Angry Video Game Nerd do battle, the Critic finds himself hopelessly outgunned by all of the Nerd's NES accessories and, while cowering behind a box, tries to save himself by claiming he's the Nerd's brother. The Nerd immediately sees through it and challenges him to say their mother's name.
* The Angry Video Game Nerd does an annual Halloween double feature in which he rips apart horror-themed video games:
* The Angry Video Game Nerd does this constantly. This extends to his more mundane actions, such as loading in an NES cartridge... with his middle finger, specifically.
* The Angry Video Game Nerd, drank video game champion Billy Mitchell's own brand of hot sauce, believing it would increase his gaming skill.
* The Angry Video Game Nerd, finally managing to beat one of the games, and getting a different ending than he expected:
* The Angry Video Game Nerd game, he gets kidnapped by a crazed fan and Leatherface.
* The Angry Video Game Nerd games he reviews. Bats being the most common offender, but other similar annoyances (like the Medusa heads in Castlevania) get lambasted for all the reasons on this page as well. But with a lot of fucks, shits, and descriptions of fecal matter.
* The Angry Video Game Nerd goes this way almost any time they're on screen together.
* The Angry Video Game Nerd has done this twice, both on a 10th anniversary.
* The Angry Video Game Nerd, he believes he'd be dead by the actual year 2077, giving him the perfect excuse not to review it. Cut to a tombstone that reads:
* The Angry Video Game Nerd, he decides to harness the power of world video game

champion Billy Mitchell by drinking the latter's hot sauce.
* The Angry Video Game Nerd. He is shown as a skeleton until the Dreamcast sets the time back to 1982.
* The Angry Video Game Nerd he's given to all of the obscure games he's covered..
* The Angry Video Game Nerd. His closet contains about six "nerdy shirts" and nothing else.
* The Angry Video Game Nerd II: ASSimilation version removed the movie references, however, making the world feel like a generic sci-fi world as a result.
* The Angry Video Game Nerd II: ASSimilation, was several times harder despite being a mere human.
* The Angry Video Game Nerd in Episode 20, "Atari 5200", when he accidentally drops his old TV on his foot.
* The Angry Video Game Nerd intends to blow the Nerd up with a bomb, but the Nerd grabs him and holds him in place.
* The Angry Video Game Nerd in which he continued to complain about games all the way up to the Wii, even starting to enjoy it.
* The Angry Video Game Nerd is about a nerd... who plays video games... and is angry.
* The Angry Video Game Nerd is just him struggling to hook the thing up and get it to work, and constantly running into problems like faulty hookups, faulty controllers, lugging the heavy 5200 around the room, and even being scammed by a fake replacement controller he bought online. He never actually plays a game, because these were all real issues that he had trying to film the video for real and ultimately made that the focus of the episode since it already effectively illustrated the issues that made the console so unpopular (namely, its terrible form factor, frail controllers, and being the followup to a much more approachable machine).
* The Angry Video Game Nerd, is practically a celebrity in the online movies and video games fandom.
* The Angry Video Game Nerd is reviewing (and it's likely you often won't; he's done some pretty obscure games) to enjoy the resultant emotional meltdown.
* The Angry Video Game Nerd moment, he sarcastically quips "Silly me! I'm such a shi-theed!".
* The Angry Video Game Nerd needed someone to play against. He cloned the Nerdy Turd from his own excrement to provide an opponent. It doesn't "talk," per se, but it can make rude noises that clearly is supposed to almost, but not quite, sound like a language.
* The Angry Video Game Nerd: Online comedic critic of bad video games.
* The Angry Video Game Nerd on NES to be a Pyrrhic Victory that leaves no satisfaction, but only regret. He likens it to coming out the winner of a fist fight, but achieving nothing for your victory other than bloody bruises and broken bones.
* The Angry Video Game Nerd on NES was that the developers followed the plot of the film too closely story-wise, and that the game suffered from this.
* The Angry Video Game Nerd ("Or do ya wanna play my game, bitch?"). And sometimes the Nerd himself ("Yeah, Super Mecha Death Christ 2,000 B.C. Version 4.0 Beta, bitch.").
* The Angry Video Game Nerd. Pepsiman was portrayed as a parody of the T-1000. The Nerd ended up killing him by pushing him into a vat of Coca Cola mixed with Fanta.
* The Angry Video Game Nerd peripheral) as a potentially big step in innovative gaming... 'but too bad they were just FUCKING JERKING OFF!'
* The Angry Video Game Nerd play this to each other. The guys who play them actually get along in real life, but even the characters' attempts to do a review together ends in them beating each other up... again.
* The Angry Video Game Nerd ranted about this long before reaching the eleventh stage, which has an out-and-out bug that makes it impossible in 2 player.
* The Angry Video Game Nerd referenced this trope in his review of Tiger Electronic Games; likening them to a fad like Pogs.
* The Angry Video Game Nerd Re-Revisited when most of the levels are the same

running stage only colored differently. "Do they think we're idiots?"
* The Angry Video Game Nerd review after his clones died in various ways. Instead of having the usual Final Girl traits, the one thing he had that his clones didn't was a Power Glove!
* The Angry Video Game Nerd review was a sneaky parody of this, with Jason Voorhees representing the people who take him completely seriously at face value: fans who realize this can have a laugh at the expense of those it's poking fun at, while fans who don't realize this can enjoy that it's otherwise a straightforward Nerd episode.
* The Angry Video Game Nerd showcases a bit of a Type F personality in his early-mid episodes.
* The Angry Video Game Nerd stiff and awkward blows that quite obviously don't actually connect.
* The Angry Video Game Nerd style and hurling the cartridge into the sun.
* The Angry Video Game Nerd, such as "seated upon an ass" or "dumb ass". His response is "Heh heh... I'm going to hell."
* The Angry Video Game Nerd suggests that this is because his heart was not really into making AVGN videos at the time, because he wanted to begin work on the AVGN movie). Fortunately, in 2012, he returned to his normal pitch/aggression and now sounds pretty much the same as he did before (except more relaxed and confident).
* The Angry Video Game Nerd supporting characters (this was about when Mike Matei got an expanded role).
* The Angry Video Game Nerd that he actually hauled the system outside and set it on fire with his Boring Company Not-A-Flamethrower.
* The Angry Video Game Nerd, the Nerd flushes his copy of the game down the toilet.
* The Angry Video Game Nerd, the Nerd pulls out a game cartridge, tosses it up into the air, and whips the cartridge...followed by the sound of glass smashing offscreen and the Nerd saying "Oh shit!"
* The Angry Video Game Nerd), the Nerd says that the game has a story that says that the king has a terminal illness, and that Kid Kool has to find the aptly named Seven Wonder Herbs.
* The Angry Video Game Nerd, throwing the parcel, then the Nerd opens his front door and gets hit in the face with it.
* The Angry Video Game Nerd video, his (now-deleted) livestream where he was falling-down drunk, his insultingly racist and insultingly unfunny comics (with such humor as "'my pussy smells like fish' is a thinking man's joke"), and the fact that he stiffed an old woman over a homemade Klingon costume. All Matei needed to do was leave well enough alone after these incidents, and they probably would have been downplayed or forgotten.
* The Angry Video Game Nerd video, when discussing Sega's "Genesis Does What Nintendon't" commercial;
* The Angry Video Game Nerd was later created for Newgrounds, though it was later removed.
* The Angry Video Game Nerd who beats up and threatens to kill other characters merely because he's frustrated with a bad game he's playing at the moment. Additionally, he has also swore at and acted rude toward two kids on Halloween and literally gave them shit instead of candy, and angrily lashed out at the Guitar Guy just for trying to be apart of his review.
* The Angry Video Game Nerd, who may or may not be the Nerd's alter-ego, thus making both of them the same James (but still a different James from James Rolfe).
* The Angry Video Game Nerd would often switch up his background posters hoping people would spot the references.
* The Angry Video Game Nerd written in there. James looks at the camera and says, "Wow, they knew it was bad".
* The Anguis Series and lifestyle, despite the previous book highlighting their love and dedication towards one another, to the point that they are willing to sacrifice everything else to protect the other.
* ''The Anguis Series'' due to the vastly different demands of their careers and lifestyle. Quite an anticlimatic end for a couple who had spent almost the entirety

of their relationship proving their love and even sacrificing their freedom, friendships, and safety for the sake of the other.
* The Anicopter's elements are Fire, Water, Wind, Wood, and I CAN COMMUNICATE WITH BATS. The elements are little related to their possessors (Bat communication is the power of Robot Ant), and Fire is apparently weak to Wood.
* The Animagus and Patronus forms are generally reflective of the personality of the character. Rita Skeeter, the reporter becomes a bug on the wall, listening into conversations. Sirius who stays loyal, even in Azkaban, is a dog. Peter who betrays a secret with deadly price is a rat. Then there is the "
* The animal avatar that represents Musubi is a bear. Musubi herself is the
* The animal companion of the first Avatar, Wan, was a cat-deer, specifically a hybrid of a caracal and a pronghorn (
* The Animal Featuring Norm MacDonald as a guy asking stuff like "when do we get to light our torches" ("When its dark") and other pesky questions:
* The animal itself is dangerous, such as an exotic animal, beast god, space alien, etc.
* The Animal Kingdom Pirates led by Kaido have this as part of their crew culture. The ones at the top are the strongest fighters the crew has to offer, and crewmates may challenge them for their spot with Kaido's permission, invoking this trope.
* The animal masks worn by the main character and various other characters in
* The Animal of a near dead man having his organs replaced with those of various animals.
* the animal plague never happened. It was made by the government and the rich to scare everybody behind The Wall so they could have the forests and wildlife all to themselves.
* The Animals didn't write "Don't Let Me Be Misunderstood". It was first performed by Nina Simone. Even the Animals version has been forgotten by some fans of the later Santa Esmeralda cover, especially after
* The animals have it as well. The higher the relationship level is with them (and, in relationship to this, how good care you take of them), the better produce they provide. In
* The Animal Shelf follows five walking, talking soft toys: Gumpa the bear, Little Mutt the dog, Woeful the monkey, Getup the giraffe, and Stripey the zebra.
* The Animal Show with Stinky and Jake, who's a perfect caricature of Dave Goelz, except Goelz plays Stinky, so Dave the Human is played by Bill Barretta. The "wildife film" inserts of Dave and his family have the real Dave Goelz, though.
* The animals in the "Circle of Life" opening (and occasionally seen in the background) are all drawn realistically, despite the main and supporting cast being far more cartoony. This is best shown by comparing the
* The animals in the Zamovska and Palais de Léon regions use Russian and French onomatopoeia for animal sounds.
* The Animals of Farthing Wood animated series, Owl, Weasel, Kestrel and Adder, who were males in the books, were changed to females. Confusingly, Kestrel has male plumage.
* The Animals of Farthing Wood - A UK/France co-production between Telemagination (UK), La Fabrique (France) (first-two seasons only) and Praxinos (France) (third season only) for the European Broadcasting Union.
* The Animals of Farthing Wood body count for a children's cartoon. Only eight of the twenty-nine characters introduced in season one make it to the end, and that's not counting the casualties among later introductions.
* The Animals of Farthing Wood compared to the previous two seasons, the first two seasons were more realistic other than the animals speaking and some of the bipedal animals doing human-like motions, but in season three the art style and animation is far more cartoony with over the top facial expressions, cartoonish gags, and everyone minus the quadrupedal animals moving and acting like people with their paws and wings acting like hands.
* The Animals of Farthing Wood, Fox passes on the role of leader of the animals to his grandson, Plucky.
* The Animals of Farthing Wood. Her voice is annoying to other animals except for

another weasel, Measly, who is attracted to her.
* The Animals of Farthing Wood is constantly making insulting wisecracks, more frequently when they are more inappropriate.
* The Animals of Farthing Wood: Mr. Pheasant is killed alongside his wife in the books, but in the show however, he is killed by the farmer an episode later when he returns to the farm in order to rescue Adder.
* The Animals of Farthing Wood on the animation cels so that the characters could use them without them looking conspicuous beforehand.
* The Animals of Farthing Wood, played straight in the first season, where humans are either evil hunters, foolishly ignorant, or completely apathetic as to how their actions are hurting wildlife. Balanced out a bit in the second season, with the arrival of the Park Warden as a human ally.
* The Animals of Farthing Wood, she constantly uses phrases or quotes famous philosophers but her 'wisdom' is nearly always unwanted or inappropriate for the situation, often resulting in the other animals telling her to simply shut up. Also, within the first season, she constantly believes that she would make the better leader rather than Fox or Badger despite both showing more competency in the position than she ever exhibited.
* The Animals of Farthing Wood, Sinuous. If there's any way you can work a moustache onto a snake's schnozzle, there you go!
* The Animals of Farthing Wood: Weasel. "Beautiful Dreamer" is a favourite.
* The Animals of Farthing Wood were only around for 1 season or a few episodes before they were killed off. A few such examples are the Pheasants, Dreamer, Bounder, the baby field mice, and the Newts.
* The animals of the Farm overthrow the human administration in order to govern the farm themselves, the way that will be 'right' for them. Right in the middle and egging them on is Goldilocks. She doesn't care about how right or wrong the animals' grievances might be; what she sees is that by assisting, she'll be in a position to grab power, lots of it.
* The Animal Soldiers. Their attempts at fighting Sunred are commonly thwarted by squealing schoolgirls picking them up and hugging them.
* The animal welfare movement and its associated organizations (such as the ASPCA) is often treated as a slightly less-nutty alternative to PETA and other organizations of the animal rights movement. The former is focused on outright cruelty and doesn't advocate veganism, so animal welfare organizations are seen as more acceptable to the mainstream, even if PETA is known for their association with (past-their-prime or not) celebrities who are vegans.
* The Animal when Miles claims to be the monster to keep the mob from killing the main character. The mob immediately disbands to avoid getting charged with a hate crime, and Miles stands there as they walk off, screaming about 'reverse racism'.
* The Animal, which seems to jump between loss of control and enjoying the transformation (or possibly enjoying the loss of control). The narrator does at one point warn the victims to run.
* the Animaniacs reboot, where Brain creates a robot version of himself named B.R.A.I.N, who calls him "father".
* The animated 4-Koma Theater parodies this, with Pinako pointing out that
* the animated adaptation focusing heavily on Bruce and Selina's romance.
* The animated character and his real-world girlfriend in the video for A-ha's "Take on Me". The story is concluded at the beginning of the "The Sun Always Shines on TV" video: the man suddenly turns back into a cartoon after having died and being revived into a human, then he has to leave the girl behind.
* the animated Disney film is younger, she now has blonde hair instead of white.
* the animated Disney film (though it's following many other versions of the story), Ella is her real name, with 'Cinderella' being the nickname her step-family gives to her.
* The animated equivalent of Coconut Superpowers is something difficult and expensive to animate, such as an accurate depiction of people playing musical instruments. One of the main criticisms against
* The animated Sam the Safety Duck discusses school bus safety in a 1977 film

produced for Ontario's Ministry of Transportation and Communications,
* The animated series confirms this, aside from the fact that it shows that birds and other normal animals do not normally talk in the Aladdin universe and thus Iago was magically enhanced by Jafar.
* the animated series despite the fact that he's a grown man and she's a twelve year old.
* The Animated Series is set into the far future and operates differently enough to be considered its own continuity, immortals giving up their immortality at will and all.
* the animated series, Sehlats resemble a cross between a polar bear and a smilodon, and they are quite large. One assumes their domesticated relatives come in a similar range of sizes and temperaments to terrestrial dogs.
* The Animated Series so he couldn't pull this trick. To Clark's great surprise (and Lois's casual indifference, because it happens to her all the time), Clark Kent is rescued by Superman, which later turns out to be an imperfect clone that degenerates into Bizarro.
* The animated short "Crazytown" features, among other ludicrous reversals,
* The animated shorts of the Brothers Quay offer examples of this: Most of them don't feature any dialogue at all, they always take place in a
* The animated TV series proceeds to become a mixture of all of the above, while also being set in the U S.
* The animated version has another case of good guy with more of a bad-guy sort of scar: Lightning Lad has the scar stopping at his eye and continuing from his eyebrow, ending as a lightning bolt. It glows when he uses his powers. How he got it is unknown, as of the end of Season 1. He's also since lost an arm, having it replaced with an awesome robotic one that can even amplify his powers.
* The Animation Age Ghetto in Mexico is so strong that if it's animated, then it's automatically for kids even if it's the first chapter of
* The Animation Age Ghetto is surprisingly strong in Japan's next door neighbor South Korea. A horrifying example of this was that a Korean dub of
* The animation FAQ on her deviantART account she said word for word, "Gotta admit, that kind of gives me the creeps. I'd rather not know about it."
* The animation for the infatuation status and the Attract move in the
* The animation of Astaroth's music video shown at the end of episodes 5 of
* The animation of Tibbs entering Hell Hall is lifted from Figaro opening the window in
* The animation of Tibbs running away from Jasper and Horace is lifted from
* The animation remained the same for the fourth and fifth generation eyecatches (with a chibi Lum and a scrambled series logo) but the music and sound effects changed.
* The animation suddenly becomes partially inverted (swapping the top 50% of the image with the bottom 50%), jerky, and even shows the rows of pinholes on the sides, imitating a film jam or other problem with the theatrical projection camera. In extreme cases, the jammed film appears to melt and burn from the heat of the projector bulb—which is a separate trope, the
* The animators did sneak a subtle reference to the Nazis in. The star Foxy Loxy used to make Chicken Little think the sky was falling? It was from the sign of an astrologer - Madame
* The animators had a little bit of fun with this move: After this move is pulled off, you can see for a moment that Peacock has punched herself in the face with a brass knuckle. For the record, she's also holding a
* The Animatrix (and is apparently far more powerful by this time), as a direct result of humanity uniting against the Machines.
* The Animatrix! Answer? NUKE 'EM! And their attempt for a peaceful solution was denied. If you count these facts, it's no wonder the film's machines are emotionless and ruthless.
* The Animatrix episode "The Final Flight of the Osiris" opens with a fight where this is threatening to happen, with two combatants gradually cutting off more and more of their opponents' clothes... It isn't "combat" so much as "foreplay"...

* The Animatrix featured scenarios which test how a crewmate would respond if one of their own turned against them. In this case, Cis is informed by her partner Duo that he has betrayed the rebels and informed the machines of their location. Having locked the program so she can't escape, it's pretty much a lose-lose situation. She can kill him but be killed when the machines destroy her ship, be killed by him outright, or join him in betraying the humans.
* The Animatrix: In the film's arguably most popular segment "The Second Renaissance", in Part I the humans had manpower strong enough to overwhelm the robots that they only had to use riot control, ordinary citizens were easily eliminating the droids and did not need to deploy their military. The machines then retreated to and founded the sanctuary nation Zero One where they built high-quality technology capable of economically and militarily subjugating the human race. In Part II, angered over the impending economic crisis, the human race shoots itself in the foot by blocking out the sun in hopes that the machines would wither from lack of solar energy then launch a large-scale ground invasion on Zero One but because the human armies were outnumbered and had slower, heavier and more outdated technology, guess how that turned out.
* The Animatrix: In "The Second Renaissance," the Machines are first shown as humanoid robots designed for simple labor; as they attain sentience and begin forming a more complex society, their forms evolve into the more efficient, insectoid Machines seen in the Matrix Trilogy.
* The Animatrix is a cross-medium example. He plays a significant role in the last two movies of The Matrix Trilogy but makes his first appearance in one of the shorts from the animated direct-to-DVD film.
* The Animatrix is found in a room with "Who is the Red Queen?" scrawled on the walls and a chessboard grid on the floor of his apartment.
* The Animatrix. It contains violent images and mature themes that parents may not find suitable for viewers under the age of 17, and that may be particularly disturbing to younger viewers, including intense and graphic images of violence, brief adult language and themes and images of an apparent teen suicide. Parental discretion is strongly advised".
* The Animatrix it shown that in mid-21st century humans used (fully sapient, mind you) robots to perform manual labor. It's not just butlers and maids either, vast armies of robots are used as slave labor to haul vast building materials as a robot foreman beats on a drum to keep the workers in time. The Machines in 01 have production lines to build various items for both internal use and export. The main factor in this story is that it comes from the Zion archives and told by The Instructor, a program who interprets the archive's knowledge, so much of the knowledge of the past is to be taken with a grain of salt.
* The Animatrix — Features nine segments across which animation, writing and directing duties are handled by American, Korean, and (mostly) Japanese talent.
* The Animatrix series. The animations are done in various styles, some computer animated, some pencil drawn some of them even in experimental styles. A part of the stories are made by the Wachowski siblings and worked out by their respective artists, some of the stories are original, though they do all happen in the Matrix universe.
* The Animatrix: "The Detective's Story" stars a hardboiled detective.
* The Animatrix, the eponymous Kid frees himself from the Matrix by throwing himself off the roof of his school.
* The Animatrix theme (that was never revisited by the sequels) and the excellent hand-drawn as well as CGI animation.
* The Animatrix. The situation gets solved by letting him have the record, but literally destroying his muscles AND brain in exchange. He is seen as an unresponsive vegetable at the end.
* The Animatrix, which, in a few shorts, discusses what can happen when errors and holes are found in the matrix.
* The animatronics kill night guards by forcefully stuffing them inside sharp and dangerous animatronic suits, essentially shredding their body (besides the eyeballs and teeth), allowing

* The animatronics show has a song called "Every Boy, Every Girl" that gets remade every ten years that tells the story of the franchise and how the group of characters was formed, using a different arrangement, a different number of years that have passed
* The Animax-sponsored Tagalog version (which was done as an explicit Taglish dub, mixing both English and Tagalog frequently) of
* the anime adaptation, Aya is responsible for doing this to Ryusei in order to remind him to stick to military protocol, which is justified since he had enlisted with the Earth Federation Army recently under pressure from Major Ingram so that he wouldn't be arrested.
* The anime adaptation has the tiny but incredibly powerful Esper Tatsumaki dealing with a giant
* The anime adaptation portrays Hyouka as having a perpetually deadpan expression and monotone, including rare instances when she's agitated. She only smiles once in the entire series — after she agrees to lie for Tanukichi on the condition that he would convince Oboro to
* The anime adapted only two mini-adventures (Coby/Helmeppo and Buggy's story). This becomes a problem for those who've not read the manga and thus not know how, for example, Jango became a Marine alongside Fullbody despite having been a pirate, or Hatchan escaped from the prison and met Keimi.
* The anime adaption of Toshio Maeda's Nightmare Campus has almost nothing to do with the story of the manga, with the only similarities being that they both share characters called Masao, Esedess, Abe and Yuko.
* The anime adaption only shows Balance Breaker transformations once each. Issei's happens so out of left field that his opponent gawking for a moment is entirely reasonable, and Vali was plainly just showing off
* The anime also changes Himegami's relationship status from being Usui's love interest and adds her to Takeru's harem. Likewise, Usui's crush on Himegami is only briefly touched upon twice. He spends the rest of the series perving on any other girl he sees.
* the anime can throw people into walls, and that he's so fast that he simply appears to teleport around the screen. He's also never shown eating or sleeping.
* the anime, Dawn, Kenny, and Barry each have the respective evolutionary stages of Piplup.
* The anime differs by explicitly having Inaho promise to marry Takeru, during a flashback in episode 3. During which, Takeru swore he'd become strong enough to protect Inaho forever. Unlike the manga, he never recovered his memory of it and it was never brought up again. So it was simply
* The Anime does it too. For example, they advertised a movie trailer of the fan favorite Benizakura arc... only to afterwards state that no one would be stupid enough to give them a movie.
* The anime doesn’t show Zenitsu trying to talk with Nezuko through her box in the Butterfly Estate’s intermission, with him updating her how the training is going well for everyone then inviting her to watch a flower garden blooming.
* The anime doesn't have a single instance of Rei laughing. Not even the
* The anime does this to Pokémon in general by showing that some change personalties upon evolving, most frequently being more stubborn and aggressive. This is loosely based on how in the games Pokémon will disobey their trainers if they don't have enough gym badges. The anime presents this as a normal part of Pokémon development, while the games do not. This also gives a convenient excuse for why
* The anime does this with some episodes, but not all. Some of the scenes are minor... however, most of the major villains make their first anime appearances in said stingers, so if you're watching the show, take the time to check for a stinger after you've finished an episode so you don't miss anything.
* The anime-exclusive character Filia, the Golden Dragon, is this combined with
* The anime-exclusive villain Innsmouth has a Quirk that gives him the powers of an octopus, which include this trope most prominently.
* The anime extends this arc by having a second set of events. In that, the Straw

Hats lose the first two rounds, with the Foxy Pirates claiming Chopper and Robin for their crew. Even if they win the final round they could only get one of them back. So Nami convinces Foxy to make the last round a winner take all event, with each captain's entire crew on the line.
* The anime features many examples in the form of short filler arcs or small series of individual filler episodes. The infamous moment mentioned in the above point was followed immediately after by a strictly
* The anime furthers the eye color confusion by giving Finland brown eyes (he had blue/violet in the manga), while changing Lithuania and Estonia's green eyes to blue, Latvia's violet eyes to an aqua blue, and the Italy brothers' brown (Veneziano) and green eyes (Romano) to gold. Sweden's eyes were also initially changed from green/blue to brown, but were reverted in his later appearances.
* The anime gives this a nod very early on, establishing that Pegasus' Toon monsters are one-of-a-kind cards that were never released to the public due to them being "too powerful". During the last parts of the KC Grand Prix arc, it's revealed that Pegasus' company routinely gives away copies of unsanctioned cards as prizes (a habit that the actual card game took up).
* The anime gives us the presumably competent Giovanni, whose subordinates are the one and only Team Rocket
* The anime had so many things taken out that the visual novel's creator asked for a one-episode arc (Yakusamashi-hen) in order to fill in the plot holes.
* The anime had to remove some comedic moments and minor information about some of the characters from the manga to ensure they could fit in at least 2-3 chapters in one episode. The second season takes this further, truncating the manga's longer arcs (4-5 chapters per episode) so that they can be made into 1-2 episodes.
* The anime has a scene where Kanna is looking for a comfortable place to take a nap. She eventually decides on using
* The anime has different monsters to defeat for each of the five trials to return home.
* The anime has the infamous 26th episode, which involves Excel and Hyatt switching bodies and individually winding up in a love hotel together (for entirely different reasons). Excel (in Hyatt's body) proceeds to sexually assault Hyatt's breasts (in Excel's body) in plain view for a whole thirty seconds or so. (And that's not even the weirdest stuff that happens in that episode...)
* The anime has the Three-Tails filler arc. It contains some ideas that would make for an interesting three or four episodes but instead goes on for an exasperating 23 episodes.
* The anime introduces gunpowder-based weapons as the arsenal of Jillas, a humanoid fox minion of the third season's
* the anime, Isara looks likes she's going to shoot Alicia. Instead, she shoots through a window and takes out an Imperial soldier on the other side.
* the anime, it's more about pitting two of the best fighters against each other.
* The anime (Japanese version) corrected this, too: you can clearly hear the Black Beauty Sisters yelling "It's show time!" before singing their songs.
* The anime lasted 114 episodes airing from 1986 to 1989, cutting the story prematurely at the Poseidon arc. The subsequent Hades arc would be adapted 13 years later in the form of a 31-episode OVA series produced from 2002 to 2008.
* The anime manages to work in foreshadowing from the first episode—which would otherwise just be
* The Anime Man does this often with his face, usually when making a sarcastic aside or a similar comment that he wants to emphasize. He also tends to add speedlines for extra oomph.
* The anime/manga focused magazines OtakuUSA and AnimeUSA are placed with magazines aimed at children in Kroger and Wal-Mart stores, despite the fact that the anime featured in them are usually aimed
* the anime manga is most definetly not into girls, despite hanging around playgrounds and watching young girls. Having been given a sour opinion of adult women by his overly sexual mother, he came to appreciate the innocence of his young cousin, and when his cousin grew up he tried to recapture the feeling he had.

* the anime, Meowth of the Team Rocket trio taught himself "human talk" and how to stand on his hind legs, all for the love of a female Meowth named Meowzie who said that a human could do more for her than anything he could (as in, the food, housing and adoration), only to be rejected as now she considers him a freak.
* The Anime Motivational Posters thread at Crunchyroll. First you see an anime you recognize, then you see one that's really smart, then you start to notice the hilarious banter between the moderator and the regulars, and before you know it, you've gone 200 pages. The fact that it grows around 5 to 10 pages a day does not help.
* the anime of, Kluke is changed from a self-confident, mature girl who's virtually raised herself since the deaths of her parents to basically someone who cooks and encourages Shu without explanation. She doesn't even get her powers until a quarter of the way in the series. After that that pointl, however, she joins Shu in combat and plays a critical role in defeating General Logi.
* The Anime of the Game; as Krosserdog, his stats are all boosted high enough that his accuracy is much improved... but anybody familiar with a normal Krosserdog can still see his shooting is far less effective than normal.
* The Anime of the Game of the first game was released in North America.
* The Anime-only arcs tend to create Canon Fodder in the form of new characters:
* The anime-only Bounts can eat both unsent and living souls. In fact, it has been noted that a Shinigami's zanpakuto is the ONLY thing that can help souls move on (not counting the natural transformation of unsent souls into Hollows).
* The anime-only Showcases in the Kalos arc are heavily based on idols, and also bare similarities to the Contests from Hoenn and Sinnoh. Serena and Shauna are Performers in the anime.
* The anime opening in the PlayStation and DS rereleases use stock sound effects from
* The anime plays it in a much more positive light, but Moritsugu is an attractor and motivator for the Juda Factors (and Ohba) because of his
* The Anime Replicas from the Anime Arc occasionally use phrases from the replicas' respective sources, or some other audio source, but none of them have text based dialogue.
* The animes didn't wait as long, being only one season each (compared to the
* The anime segment of the "Reincarnation" episode had a race of mouthless aliens that could only communicate with body language.
* The anime series has Lily Enstomach, who, due to eating the Mini-Mini Fruit, now stands only a few centimeters tall. However, she still retains her giant strength and is able to regain her full height, which is higher than the masts of the Straw Hat's ship.
* The anime series. Yet, despite the decline in popularity it experienced in the Johto series, it still maintains high ratings in both Japan and the U.S. and has a large and devoted fanbase.
* The anime sometimes conflates agape with storge, as it's shown that Yurio gets better at interpreting "On Love: Agape" as he comes to terms with the familial relationships in his life, particularly his relationship with his grandfather. On the other hand,
* The anime's second season averts all this, with barely any lack of pop culture references.
* The anime starts with cherry blossom petals falling into the scene to attribute Gongenzaka's samurai motif.
* The anime-style segment in "Reincarnation" of course features one of these, albeit briefly: Zagtar, a Voltron pastiche.
* The anime suffered heavily from this with several scenes either rushed, changed or removed entirely. Normally this would be rather bad but in this case it was catastrophic since Umineko is a mystery that heavily relies on small hints and clues. This means that if they ever make a second season the mystery will be unsolvable.
* The anime used the ten-day waiting period before the Cell Games to tell a few lighter stories, such as an episode dedicated to Gohan's eleventh birthday and

another with Goku hunting down the new Dragon Balls.
* The anime version has him strike out with the same girl from the first example, after which, he goes to a movie theater to sulk. When he realizes he's the only one there without a date, he vents his frustration on the crowd and storms out.
* The anime version of the scene differs by showing the audience what Rei's doing. Shizuka is shown bent over the side of the bathtub with Rei fondling her breasts from behind. Though the animation
* The anime version reveals things a little more smoothly, but thanks to its
* The anime version still uses this trope, but in a different way - due to having used up so much of her life during the final battle, Rosette's life span is shortened to the point where she only has months to live. Rosette and Chrono both go into hiding, getting their own log cabin to live the rest of their short lives together in peace before dying. Leaving the series here would have made is a
* The anime was even worse in this regard when after the aforementioned final battle, began adapting the Konoha Hiden novels, before finally ending the series on episode 500 with
* the anime, we have Paul. When a Pokemon of his doesn't perform up to his expectations, it is released back into the wild.
* the anime, when a group of penguins with sinister motives arrive on a motorised iceberg.
* The animistic nature of the New World of Darkness spirit world originated with the equally animistic Umbra of the
* The Animorphs also has an interesting inversion of this, as one of the main protagonists, Marco, is a
* The Animorphs are also mutual Secret Keepers: their allies include the Chee, a race of
* The Animorphs are pretty hostile towards Cassie on the occasions when she shows sympathy towards Yeerks.
* The Animorphs do this fairly often, and are self-aware about it. When Ax and Tobias have to infiltrate a slaughterhouse as the steer, they have the following exchange while riding the
* The Animorphs Fan Forum: Though not exclusively devoted to fanfiction, this forum boasts a considerable archive.
* The Animorphs fight in animal forms and the morphing process gets rid of injuries (sort of like a DNA-based factory reset... loosely speaking since it can include skintight clothes and covers changeable features like hairstyle). It really only counts if they get into a fight while human, and returning to human form doesn't always remove clotted blood. A
* the Animorphs "infect" it with memories that threaten to give the whole species a Heel Realization
* The Animorphs use a crystal to turn off said protocols, leading Erek to take and kill more Hork Bajir than the entire GROUP can manage. He is so horrified at his actions he requests for the protocols to be put back, but for a few moments, he's the surprise superweapon. Made by a race of space hippies.
* The Animorphs use this routinely, hence the page quote. To be fair, it's probably
* The Animorphs wonder whether humanity will be able to live peacefully with aliens, like the
* The Ankh-Morpork City Watch has expanded so rapidly in recent years and is composed of so many different shapes and sizes of copper that being in uniform usually means being in whatever pieces of the standard uniform happened to fit or could be modified on the quick, plus whatever antique specialty equipment they could scrape up from the dregs of the armory. Troll Sgt. Detritus ends up with armor originally intended for a battle elephant, not that he really needs it, and first female recruit Constable (later Sergeant and ultimately Captain) Angua has to go without a breastplate until she gets one modified to accommodate her... well, breasts. Vimes describes the overall look as "Funny helmets through the centuries." As of
* The Ankh-Morpork Civil War ran from 8:32 pm on the 3rd of Grune to 10:45 am on

the 4th of Grune 1688 AM, being generally agreed to have ended once the city was set on fire, although that used to happen about once a month anyway.
* The Ankh-Morporkian Embassy in Ubervald has a room filled with taxidermied heads of several native animals. Vimes finds the troll head most unsettling due to the fact that Officer Detritus (a troll) is part of his entourage and orders it removed and buried. Detritus himself doesn't think much of it, pointedly showing off his grandpa's favorite cup... made from a human skull.
* The Ankh-Morpork Post Office has the classic "Neither rain, no snow, nor gloom of night..." posted on their building...followed by a list of things they refuse to deal with like "Any black dogs with orange eyebrows" and "Mrs. Cake". And the slogan was missing letters for many years because someone stole them to advertise a hairdressers.
* The Ankh-Morpork version of "Miranda" includes such clauses as "You have the right not to throw yourself out the window"... most likely added to give a figleaf to practices under Vetinari's predecessors, Homicidal Lord Winder and Mad Lord Snapcase.
* The Anla'Shok, also known as the Rangers, are a Minbari covert operations organization operated by the
* The annals of IT horror are rife with tales of clueless bosses/interns/contractors who simply could not resist pressing the
* The Annals of the Chosen it's revealed late in the trilogy that the land's magic is growing progressively weaker as the anti-magic feathers purchased from traders are gradually suppressing the ler. Considering the callousness of the ler and the idiocy of the wizards, Sword concludes this is probably for the best.
* The Annals of the Chosen there's no need for a Wizard Lord or Chosen; the people can police themselves.
* The annexation of the entirety of Mexico was actually a consideration in the aftermath of the Mexican-American War, but domestic political disputes (ie slavery) put an end to that idea. Many in the South
* The annie-plants' own explosiveness is justified as well; an integral part of their generation process involves crushing matter into Neutronium using
* The Annihilation of Fish (1999), a screenplay filmed in Los Angeles and starring James Earl Jones and Margot Kidder
* The Annihilation of Fish and Other Stories (2004), a short story collection
* The Annihilation Score around this trope. The book itself averts it, as the plot is mostly moved by one particular supervillain.
* The Annihilators example, with the character simply grabbing an enemy soldier in a headlock and lightly squeezing and pushing his head to the side with his palm, with the soldier's head falling limp with a popping sound effect.
* The Annihilist escapes from the police by going into the bathroom and climbing up the sheer air shaft to the roof.
* The Annotated Alice, books; the books were made for the imagination of children, not the analysis of "mad people". (Others have claimed that they're clearly about logic, but the imagination of children part is certainly a nice side dish.)
* The Annotated Edition: Books and other pieces of written text that have annotations for non-english speakers, or to justify certain additions to the text.
* The Annotated Mother Goose by W. S. and L. M. Baring-Gould, which makes mention of some of the more elaborate theories, one gets the impression that whenever a nursery rhyme mentions a "little man", some folklorist will rise up and state that this is clearly and unambiguously a reference to King Philip II of Spain.
* The announcement for the movie's August 28 release date was on July 2, 2020, the 35th birthday of Candace's voice actress,
* The Announcer: Introduces the host (and sometimes contestants), describes everything you could win, and describes everything you've won. Typically the first to be heard and the last to speak.
* The announcers during a match exist to give exposition. They have to explain the holds being used, recap any pertinent information regarding the match, possibly hype any upcoming matches (usually the main event of the show), and be entertaining while doing all of it.

* The Annoying Mole A Hetalia Trollfic Austria's mole is alive, and as you can guess, it is very annoying.
* The Annoying Orange: A new character is introduced to the kitchen, Orange annoys the new character, then the new character gets killed.
* The Annoying Orange Angel Orange and Devil Orange both pop up to give him advice, but both of them just suggest ways to annoy Cucumber. Angel Orange's suggestions are nicer, though.
* The Annoying Orange But considering what he is, it just looks like a circle.
* The Annoying Orange continues to release weekly videos long after the main branch of Gagfilms stopped producing videos.
* The Annoying Orange does this all the time. It actually becomes a plot point in one episode of the TV series.
* The Annoying Orange episode "Sacrifice Play" has an example of this trope with Orange.
* The Annoying Orange, Grapefruit often does this in the background. It's... disturbing to say the least.
* The Annoying Orange has spoken to pretty much anything that could conceivably be found in a kitchen, and then some.
* The Annoying Orange insists his name is "little apple", but he's almost never called that.
* The Annoying Orange. Marshmallow seems to like him and Passion Fruit has a romantic subplot with him, but he's barely tolerated by the rest of the group. Even more so with Grapefruit.
* The Annoying Orange, Orange doesn't appear in "The Weenies" despite him appearing in the video thumbnail.
* The Annoying Orange, or so it seems. Many people are surprised to find that his YouTube channel is not only still active after a decade, but at the same time, it is still getting a lot of views and suscribers (mainly from children).
* The Annoying Orange parody) when Orange appears on TV to terrorize a group of friends before climbing out of the TV into the real world.
* The Annoying Orange sets up to reveal whether Marshmallow's a boy or a girl.
* The Annoying Orange's Grandpa Lemon. He falls asleep in the middle of conversations and even while being chopped in half.
* The Annoying Orange's laugh is considered by others to be really shrill.
* The Annoying Orange: The most frequent reaction to the lead character's jokes.
* The Annoying Orange, there's a third green pill. It tastes like boogers, so he doesn't take it.
* The Annoying Orange, this occurs to Orange every time he annoys someone.
* The Annoying Orange TV show, Orange loves making jokes about Grandpa Lemon's age.
* The Annoying Orange where a banana mentions there are no words that rhyme with banana. Orange doesn't think so, though.
* The Annoying Orange where Orange and Pear go to England and (predictably) meet an expy of Sherlock Holmes, the culprit turns out to be Watson all along. He was trying to help Holmes relive the thrill of the chase by pretending to be a criminal. The world of Annoying Orange being what it is, both Holmes and Watson become supervillains by the end of the episode and promptly begin to turn London into a smoldering wasteland using a death ray.
* The "annoying replicating electrical prankster" story is practically its own sub-trope. In the old
* The Annual Anthropomorphic Literature and Arts Awards, also known as the Ursa Major Awards, are given to the best anthropomorphic works each year as voted by the furry fandom. The recommendation lists are an excellent guide to finding works popular with furries.
* The annual Celebration of Techonology features a giant robot battle royale between different companies' giant robots on an undisclosed moon or planet, and have occasionally been fierce enough to
* The annual festivals provide plenty of unique achievements and items for anyone who decides to focus on them. Halloween and Wintersday provide unique themed activities such as jumping puzzles, dungeons, and events while the Super Adventure

Box is a
* The annual Las Vegas SHOT show, probably the most publicized convention for high tech, brand new, and just plain interesting weaponry. It's not open to the public and it is difficult to get an invite: you must either be part of the gun industry, be an important member of an organization that is heavily tied to the gun industry (such as the NRA or other outdoors companies), or be part of a prominent Youtube channel that focuses on firearms with a lot of subscribers.
* The annual Nathan's hotdog-eating competition was started by three immigrants to America arguing over who was most patriotic.
* The annual Royal Rumble Match (held the last Sunday of January every year) is a good way to bring all these characters together. Thirty (forty in 2011, and twenty when it began in 1988) wrestlers compete in the match over the course of about an hour, and typically only about ten of them will be recognizable to casual fans. Even WWE diehards may have trouble keeping track of all the cameos. Remember Daniel Puder? Probably not - but if you're a Royal Rumble connoisseur, you do.
* The Annunciation, Satan appears in the form of Lucifer, played by a 12-year-old girl. He leads Adam and Eve to sin, causing them to get banished from the Garden of Evil, then takes Adam on a tour of the future.
* The Anointed One. The drawbacks of a child form are made clear when Spike, who isn't intimidated, just picks him up and carries him over to the sunlight.
* The anonymous "concerned citizen" who is the host of the true-crime podcast
* The "Anonymous GM" of Raw was either this or a Myth Stall (since it was supposed to be the overarching essence of Raw itself), or something altogether different (since WWE made no effort to explore the identity of this GM, meaning it wasn't even a storyline). A few wrestlers interacted with the laptop that the GM sent emails through but no one since
* The Anonymous RAW general manager. People quickly got sick and tired of him and wanted the angle to be killed off as quickly as possible. Let's just say when his identity finally was revealed, fans were
* The Another Day chapter parodies same-sex shipping in general with the blatantly obvious interaction between Neku and Joshua. It's as if the developers predicted they'd become a popular ship.
* The another guy who falls from a place in the movie? He's called Jaws, he's
* the answer is inevitably "yes" in a. (Indeed, if the message the commercials is trying to get across is the benefits of being selfish and mean to someone, as they suggest, it hasn't rubbed off well.) And at least once, the rabbit has gotten his wish with no strings. (Oddly enough, that one time, where he won it in a bicycle race, the kids in-story had no say in the matter; the contest judges who gave it to him were adults.)
* The Answer, it doesn't come to that, and Yukari gets better, but only after a fight with the rest of the team (Mitsuru sided with her, though).
* The answer to that question is simple: people evil enough to go to such afterlives tend to have huge egos and imagine that when
* The answer to these questions is another question: would it be as much fun if they didn't?
* The antacid brand Rennie's "Happy Tummies" campaign, featuring anthropomorphic stomachs.
* The antagonist Kumagawa is a special case because 1) he reacts to almost everything with the same smile and inscrutable tone of voice, and 2)
* The Antagonist. Some of the kills he pulls off have to be seen to be believed. Notably, based on historical records, he seems to be completely fictional.
* The Antagonist, sounding sometimes like the narrator of a book, and he believes his life is ruled by an overreaching "plot".
* The Antagonist. The antagonist's goals are in some way opposed to the protagonist, and they are the one who is blocking the protagonist's journey.
* The antagonist Vampire covenant Belial's Brood has what are called "coveys", which are much closer to this trope than other supernatural groupings.
* The Ant and the Aardvark cartoon "Technology Phooey" builds a computer to help him catch an ant, but its solutions are of dubious success. That's because it's

actually an automatic pop-up toaster.
* The Ant and the Aardvark cartoon "Technology Phooey" has the Aardvark pushing a huge rock off a cliff towards the ant, who deflects it by simply blowing at it.
* The Ant and the Aardvark has the blue aardvark go sledding down a snowy hill in pursuit of the ant. The ant passes through a wire mesh fence ... and so does the aardvark. Once the aarvarks's sled slows to a stop, he observes that his body is entirely cut in a criss-cross pattern, and examines a square piece taken from his snout. The aardvark then puts it back hastily, and sits perfectly still, hoping that nothing worse happens.
* The Ant and the Aardvark: in "Mumbo Jumbo," the Ant is being protected by an elephant as part of a brotherhood lodge pledge. The Aardvark sets a booby-trapped scale for the elephant, citing an elephant's vanity being their weak spot. The Ant suspects it's a trick, so the elephant plants a tree trunk with the Aardvark in it on the scale. Boom goes the Aardvark.
* The Ant and the Aardvark: In "Technology, Phooey", Aardvark attempts to use some spray on Charlie. But instead, he inadvertently ends up spraying himself, which results in the side effect reaction of him switching positions quickly and spasmodically, and changing into an assortment of colors and patterns.
* The Ant and the Aardvark: In "Technology Phooey", the Aardvark pushes a big rock off a cliff towards the Ant's anthill. The Ant uses his breath to blow it back up.
* The Ant and the Aardvark short "Odd Ant Out". The blue and green aardvarks fight over a can of chocolate-covered ants, but neither of them has a can opener.
* The Ant and the Aardvark: "Technology Phooey" has the Aardvark building a computer to help him find an ant.
* The Ant and the Aardvark this was averted and then inverted when the aardvark, on a motorcycle, falls over a cliff into a river. He restarted the bike at the last possible moment to do a miracle 180... only to fall off the other waterfall behind him.
* The Ant and the Aardvark, where the eponymous Aardvark will use his mouth to suck up the ant, complete with the sound of a vacuum cleaner.
* The antarctic atlantis, secret nazi base conspiracy theories and hollow earth entrance theories were combined by Miguel Serrano, to form an occult sect based on Hitler's resurrection.
* The Ant Bully against the larger threat, the Exterminator and by the end it seems they have struck a permanent peace.
* The Ant Bully is a normal human kid, but wreaks similar wrath and destruction upon a hapless ant colony. The Exterminator, Stan Beals, definitely counts too.
* The Ant Bully, Lucas enjoys a substance known in the ant kingdom as "honeydew", remarking that it tastes like green apple bubblegum. Only after he asks for seconds does he see that it is the end product of a worm-like creature's digestion process.
* The Ant Bully, Lucas wakes up to find himself shrunk, gets kidnapped by ants, thrown into their anthill and finally put on trial where several of the ants are actively urging for him to be killed. The very next morning he treats this whole ordeal as an annoying inconvenience at most. Later on in the film, he does express some sadness over missing his family, but it's relatively little considering he might never get to see them or his former life again.
* The Ant Bully: Main character Lucas is a victim of one at the hands of the neighborhood bully, to the extent that he complains he's running out of unstretched drawers.
* The Ant Bully: The basis of the initial plot: A bully and his followers torture Lucas, and Lucas takes out his frustration on a colony of ants.
* The Antediluvians — so named because they were the only vampires who survived the Biblical Flood. They aren't so much vampires as they are
* The anthem of Carolina Beach Music, is the Embers' "I Love Beach Music". The Lyrics consist heavily of popular beach music titles.
* The Anthem of the Heart starts with a young Jun discovering her father's infidelity.
* The Anthem of the Heart: Takumi admits to being surprised that the incredibly accomplished Natsuki would go for someone like him, as he considers himself boring.

* The Anthem of the Heart thought of the world as a fairytale when she was younger. This only set her up for psychological trauma when her parents got divorced.
* The Anthem of the Heart when she talks about seeing her father leaving the place with some other woman. It's later explicitly identified as a love hotel by some other characters, though by that point the place has been shut down for the sake of symbolism.
* the Anthropomorphic Personification, questions like where he spends his off-school hours and where his transfer records came from are left unanswered.
* The Anthropophagus Beast, due to the baby obviously being alive when Nikos takes a bite out of its head.
* The Anthropophagus Beast uses his taxidermy skill in preserving his dead girlfriend. The corpses is excavated in grisly detail.
* The Anthropophagus Beast. While she does smoke in one scene, Julie also turns down the advances of a fellow tourist who expressed a desire to be with her so she is sexually unavailable as well. The Final Girl notion is ultimately subverted in the final confrontation when a previous victim turns up to be alive and gives a deadly blow to the killer, saving Julie in the process.
* The antibiotic Penicillin was discovered when Alexander Fleming found his bacterial samples contaminated by Penicillium mould and studied the way the mould was able to create bacteria-free areas on his petri dish.
* the Antibodies are either absolute monotone or this. No, the Daleks don't count; they're not robots.
* The Antichrist corresponds in Jewish numerology to "Neron Kaisar," the Greek form of his name.
* The Antichrist—at that point, even if he isn't a prophesied destroyer figure, he's still a suspected mass murderer and it makes perfect sense for them to want him captured.
* The Anti-Christ, not simply those who refused to follow Jesus's teaching) in the Book of Revelation, who is "slain by the sword", yet is resurrected through the power of Satan and then cons all non-Christians into worshiping him.
* The Antichrist, the Antichrist and the False Prophet as opposites of God, Jesus and the Holy Ghost.
* The Antichrist: The offspring of the personification of evil who is destined to bring about the apocalypse.
* The Anti-Christ: The spawn of a powerful and evil being who is supposed to bring about the end of the world.
* The Antichrist. This tends to be a stumbling block against any organization - no matter how truly peaceful or well-intentioned - whose aim is one world government.
* The Antichrist, when his bombers drop their payload onto the Jews and Christian believers in Petra with explosive effect.
* The Antichrist, who is mentioned only in the first epistle of John in the context of "many antichrists" (who are more likely general oppressors and heretics rather than specific apocalyptic enemies; basically, anyone who isn't pro-Christ), is often identified with various apocalyptic figures, such as the Beast from the Sea from Revelation, the Man of Sin/Lawlessness from Second Thessalonians, and the Little Horn from Daniel. The only time "antichrist" is used is in the Johannine Epistles, and it refers to the proto-Gnostics in/around Ephesus that claimed that Jesus was a purely spiritual being (thus not really human in any meaningful sense). This was one of the major conflicts of the early church since early Christian thought involved a mixture of sometimes-conflicting Jewish and Gentile ideas regarding the nature of the spirit, God, and humanity.
* The Anti-Chuck Norris Turret in both games. It originally popped up a few times in the beginning of the first game,
* The Anticipator: Someone expecting a sneaky man to come and visit them.
* The Anticipator: When a character dramatically expects or waits for another to sneak up on them.
* The antidotes against APTX 4869 are just prototypes and their effects roughly 24 hours, but frequent use right after the original dose drastically shortens the desired effect (in episode 522-523, the second pill worked only for roughly 4

hours). Also, taking the antidote consecutively will cause the body to develop resistance against it.
* The anti-fairies are, or at least are believed to be, this. It's been stated that
* The anti-feminist blog The Return of the Kings published an article calling for a boycott of the film
* The anti-GMO movement is so popular now that some manufacturers put non-GM labels on things like salt,
* The Anti-God who's been sealed away in a nothing dimension since before the beginning of time, is incarnated into a human baby and grows up in a matter of days. Along the way she gives herself a crash course in 21st century culture that keeps her from standing out too much.
* The Anti-Grinch: Loves Christmas so much, they end up destroying it trying to contribute to it.
* The antiheroes of "The Hound" are a pair of ghoulish guys who rob graves for fun. This attracts the ire of the
* The Antikythera Mechanism (named after the Greek shipwreck it was found in) was a geared device discovered underwater, dating to around the 1st century BCE. Designed for predicting the positions of various celestial bodies, the level of craftsmanship and complexity it exhibits is far greater than anything else recovered from that time period. It was, in fact, the first known
* The Anti-Life Equation is used again in the Alternate Universe series
* The Antilles Extraction": After Sabine, Wedge, and Hobbie get captured by Pryce, Wedge and Hobbie are put in another cell, while Sabine goes through interrogation from Pryce. Wedge tries to think of a plan to save Sabine, but, of course, she breaks herself out and goes to save them instead.
* "The Antilles Extraction" is set on the binary-star-orbiting planet Montross.
* The Antilles Extraction": It's Sabine's turn to go undercover as an Imperial cadet, this time to extract some would-be defectors at an Imperial pilot academy.
* "The Antilles Extraction", Sabine goes undercover as a cadet at an Imperial flight academy to extract some would-be defectors.
* The anti-magic suppressor stones that were handed out at one point were later shown to be faulty and placed under a recall, as mentioned in Book 4 (
* The Anti-Nihilist: A character who knows how terrible the world is, but instead of succumbing to despair, decides to create meaning, values and purpose in life out of it.
* The Anti-Nihilist: A person who believes that life has no meaning or purpose, but that shouldn't stop people from enjoying life while they still can.
* The Anti-Nihilist. Everyone dies, but how one meets one's death is up to them, and the fame they have earned in life will live on afterwards.
* The Anti-Nihilist: "Life has no meaning...because it's up to us to give it one." vs. "Life has no meaning!"
* The Anti-Nihilist: Life is meaningless, but let’s just be kind to each other.
* The anti-personnel mine is a mine designed to kill or wound enemy infantry (as opposed to anti-tank mines, which infantry can walk over without triggering). These include explosives disguised as innocuous objects a person might pick up, and "bounding" mines designed to spray shrapnel horizontally at
* the anti-personnel weapon today, to the point that it's completely subsumed the role, formerly done by infantry volley fire, of repelling mass charges. It also has largely eliminated the need for battle rifles capable of targeting the enemy at ranges beyond 500 meters, except for dedicated snipers.
* The Antiques Roadshow featured an old Sindy doll from the 1960s. The original price was so-many shillings and 11 pence. There was 12 old pence in a shilling, making this the pre-decimal version of the trope.
* The "Antiquing" sketch starts with a classy commercial for Reilly's Antiques and Rarities Showroom starring it's owner Robert Reilly. However, the business ends up doing poorly so we then see a more down-to-earth commercial for the rebranded Reilly's Antiques Showroom and Sales Center. As things go downhill, the next

commercial is for Rob's Discount Antiques Warehouse and is done in a kitchy style with Robert wearing a cowboy hat and advertising his store like it was a used car dealership. In the final commercial Robert has clearly given up and is ranting at the audience to come to Reilly's Pile of Old Crap and buy something.
* The Anti-SOS Brigade in general, and Fujiwara in particular. Their plot is the focus of three novels and is foreshadowed even earlier.
* The Anti-Spirals have the Ashtangas which look like a HUGE (as in, several times the size of a planet) stone with several dozen faces and arms - scary as hell.
* the Anti-Spirals, he tries to placate the populace by having Simon arrested and scheduled for execution, since Simon is technically responsible for the actions that led to the villain's attacking them (even though everyone else did just as much) and caused a lot of property damage by destroying an enemy in a populated area. He also wants to have the Gunmen and Lagann destroyed because they're outdated technology, and tries to save humanity by having them hide underground or evacuate on a spaceship. When this turns out to be futile, Simon saves the day by riding on Gurren Lagann (with Kinon piloting Gurren) and wiping out the invasion.
* the Anti-spirals though. What he's doing is fighting so that the people who want to stay underground can do that, at least in this particular instance. Lordgenome wanted them underground, they want to be underground, and Viral is pretty much all that's left to fight for that goal. It's hard to not feel bad for Viral finally getting arrested because Enkidu has seen SO MANY HOPELESS BATTLES that it finally just breaks down. Viral even apologizes to it.
* The Anti-Spiral traps the Gurren-dan in a fantasy world, in which Viral's wife has cat ears. She is also seen in some of the Parallel Works videos and "Viral's Sweet Dream" side story.
* the anti-tank shells pierced the Japanese tanks and came out from the other side whatever theater they are in.
* The anti-terrorist squad is portrayed as causing more damage to other countries than actually helping them. An important story arc too, as Gary the actor is shocked by their actions and refuses to help his country any longer.
* The Antithesis, angels are a species classified as 'Archaeans' (winged, humanoids residing on a planet called The Atrium) and are ruled by Commander Yahweh Telei, who is surprisingly an adolescent prodigy and genetic engineer, suffering from cognitive disorders closely resembling O.C.D. and Asperger's. Angelic society revolves around high science and technology.
* The Antithesis, Demons only differ from angels by their phenotypes of black wings and dark hair. They live in the same world, but exist on lower layers of a planet that encapsulates Heaven and Hell, called "The Atrium". They do not possess the evil characteristics of the Judeo-Christian religion, but are actually a population of humanoid-looking beings, and their society contains moralistic values, political hierarchies (the highest being Lucifer, their leader/Military Commander/President, the second highest being the Archdemons) that formulate their Parliament, known as the "Obsidian Court". They are characterized with eccentric personalities, and their culture is embellished in art, literature, and theater.
* The Antithesis, main character Qaira Eltruan is not a hero by any means, and the methods he goes about 'protecting his world' are usually evil, cruel and unjust. While his ultimate goal is to protect his people and rid his world of the angels, Qaira will not hesitate to kill anyone who stands in his way, and this includes his peers. This stems from a lack of moral duty—Qaira is considered a moral nihilist by most readers.
* The Antithesis, Qaira Eltruan is a cold and callous militant leader on the outside but suffers from self-hatred and guilt on the inside. Leid Koseling attempts to help him through his internal struggles along with the malay addiction (a type of drug similar to heroin) he suffers at the beginning of Decus, but he is at first very reluctant to accept her help. In fact, he feels threatened and insulted by Leid's attempts to aid him and often becomes angry over the fact.
* The Antithesis revolves around the conflicts of a uniquely-perceived Heaven and Hell, narrated by the main character, Alezair Czynri, who is a member of the "Jury", a sect of non-Celestials who live in Purgatory and enforce "The Code".

* The Antithesis, the first episode of the story (I. The Encounter) recounts Alezair Czynri nearly getting killed by Leid Koseling in the battle of Jerusalem circa 1180. Alezair's ego is significantly damaged by this, and this initiates the entire story, making him want to pursue her and perhaps fight her again. Later in Decus, Qaira Eltruan gets his ass beat by Leid on numerous occasions after losing his temper (or after she makes him lose his temper), and often he becomes so impossible to deal with that she must smack some sense into him. This is also ego-damaging to Qaira, since he is what we would deem a "manly-man", also a chauvinist, and also a misogynist. Although the readers find Qaira's beat-downs rather funny, Qaira, in fact, does not.
* The Antithesis, Yahweh, the leader of Heaven, and Lucifer, the leader of Hell, become friendly enemies when a Civil War between the angels and demons tragically force them to oppose one another. Previously, both had worked together as scientists in Heaven's main corporation for Technology and Science, 'The Plexus', and though now friendly enemies, they still strive for the same objective: peace between Heaven and Hell.
* The Anti-Titan troops use an advanced system of ropes and grapples to gracefully
* The anti-vaccine movement firmly believes that autism is this, despite decades of evidence to the contrary, and the only doctor to make such a link was deemed to have taken part in a fraud so heinous that he was struck off the medical register in the United Kingdom and can no longer practice medicine. Still, this has not stopped this movement from maintaining that this link exists, and as a result, there is recent re-occurrence of preventable diseases like measles, whooping cough and diphtheria. In the face of such outbreaks, the anti-vaccine movement prefers to blame the vaccine instead, and calling such re-occurrences as well as better classification of autistic behavior "symptoms of a man-made epidemic".
* the Antivan Crows giving you a list of targets to assassinate. It is entirely possible for you to have killed the first one before beginning the quest. If that is the case, you have dialogue along the lines of angrily calling them out on asking you to kill a dead person. Your "handler" is visibly surprised, but recovers and then moves on.
* The anti-weapon scrambler in "SWAT Kats Unplugged." Played straight. You'd think Puma-Dyne would've learned from the Behemoth/Macro-Bot debacle to have backups and countermeasures ready, but nope. Once Hard Drive gets his hands on it, there's nothing to counteract the device's effects. Its inventor, Dr. Ohm,
* The Ant King has Stan listening to one of Vampire’s thrash goth trance doom CDs.
* The antlears are a group of circuagodonts — herbivorous, ungulate-like tribbetheres — that developed mobile, jointed antler-like limbs on their ears that they use to pull branches down to their mouths. The explanation for this is that the ears of tribbetheres have a bony matrix in them due to being derived from the gill plates of their fish ancestors, unlike the cartilaginous ears of Earth mammals. This gives them much better mobility and the ability to grip.
* The Antlers — presumably one part out of love and one part out of a sense of duty to the dying — until she dies, leaving him scarred and haunted for months. The idea of feeling indebted to the dying serves as the album's metaphor for abusive relationships in general.
* The Ant Mill; Some ants use pheromone trails to track their way back to the nest. However if the lead ant gets lost and walks around back to the original trail laid down it'll just keep walking in that circle. The kicker is that it often isn't just one ant but 100's or 1000's of them all following this trail, walking around and around in a big circle until they drop down dead.
* The Ants always successfully kill Sniffles in ways which are horrific even for the series.
* The "Ants vs. Dragons" mini-arc in Fake Karakura Town featured this in almost every fight:
* The ants were given ant-sized tools like carts and kept several years in a greenhouse, allowing them to pass experience to next generations.
* The Anubis Gates, a massive event shattered the power of magic. Over the years,

it has steadily weakened, so that by the 1800s even the simplest spells are nearly impossible and unreliable. By the modern day, magic no longer exists, save for a handful of time portals that quickly vanish. The titular gates are the villains' attempts to bring the magic back.
* The Anubis Gates, an ancient Egyptian sorcerer who has held on long after the use of magic decayed into evil.
* The Anubis Gates, as any body he takes soon starts growing hair all over.
* The Anubis Gates does this in order to infiltrate London's criminal underworld and track down the unnatural creature that killed her fiancee.
* The Anubis Gates, has the villains trying to throw the UK into crisis by pouring counterfeit money into the banking system.
* The Anubis Gates. Scheming to travel into the past and invest his wealth there, he also intends to become immortal and watch over his investment, taking full advantage of his economic foresight, rather than trust in compound interest alone.
* The Anur system has several planets with sizeable populations of different sentient species: Anur Millgan is home to the aquatic Milit Lagish and the Sonarquids who frequently cooperate while Anur Transyl is home to many Theb Khufans, Ectonurites, and Loboans as well as the native Transylians. The planet was even stabilized by a multi-species collation centuries ago. The planet also used to be home to populations of the Vladat species who forcibly dominated the planet, but a multi-species coalition with the aforementioned species and other more isolated species in the system led to the Vladats extermination.
* The anvil salesman refers to tar and feathers, but since this is 1912 one wonders if he was simply being facetious.
* The "anything outside the ring" rule is critical in the second tournament arc, where the main opponent, Tenshinhan, initially is able to flout the rule by being able to fly. Goku eventually manages to knock him out of the sky, though he falls as well. With their starting trajectories, Tenshinhan hits the ground first... except Goku happens to smash into the side of a car a split second beforehand. Thus, according to the rules, Goku loses by pure dumb luck.
* The Apache traditionally had a very complex set of rules for raiding and warfare (two distinct operations in their culture), passed down orally. One rule was not letting men whose wives were pregnant come on expeditions (they'd be distracted); another was an argot, "warpath words", consisting of using different words for nearly every action ("dragged something" rather than "walked", for instance), so that even enemies who knew Apache wouldn't understand plans.
* The APA had Bradshaw (white guy), Farooq (black guy) and sometimes Jacqueline (black woman).
* the Aparoid infection, and has to be fought in a boss battle. The whole time, he tells Fox and crew to just finish him off, ending with "never thought I'd be fighting all of you" before the process takes him over completely.
* The Apartheid Era match the original inspiration in terms of technical competence. Good try, though.
* The Apartheid Era, which no other country recognized). This caused great trouble to exiles such as Archbishop Desmond Tutu, who had no valid passport. Arrangements were finally made for them by different governments.
* The Apartment also based the film partially on a Hollywood scandal in which high-powered agent Jennings Lang was shot by producer Walter Wanger for having an affair with Wanger's wife, actress Joan Bennett. During the affair, Lang used a low-level employee's apartment. Another element of the plot was based on the experience of one of Diamond's friends, who returned home after breaking up with his girlfriend to find that she had committed suicide in his bed.
* The Apartment) and had only realized a few minutes ago that he is a guy who can make her happy. Though she came back to his titular apartment on the New Year Eve for the film's ending, they don't share a kiss or even embrace, and she doesn't reciprocate his love confession. However, her glowing smile and a hint that she's left her abusive romantic interest for good allow enough space for optimism, along with the immortal last line:
* the apartment belongs to someone else, who removed those items to hide the fact

that she.
* The Apartment has one of the most classic examples, at the end when Fran and Baxter are playing gin rummy:
* The Apartment is at once a subversion and a straight example of this.
* The Apartment: The film is remarkably timeless for something made in the early 1960s, but a few things show their age:
* The Apathy, to the point that they will just lie down and wait to die. Those who fall under their influence with repeatedly comment how tired they feel as the effects worsen.
* The Ape Woman — Horror film series. 3 films between 1943 and 1945.
* The Apexis civilization on reaching Arak was shocked to discover that many of the hills on the new continent weren't natural but rather the corpses of the all but extinct
* The Apex Predators who are equally badass and substantially less nice, they work for the IMC and make up all of the bosses the protagonist fights throughout the single player campaign.
* The ApeXtreme by Apex Digital was a CD and DVD based console planned for 2004 that went unreleased.
* The APH Book Port Plus, a handheld ebook reader for the blind, had a major update in 2012 with the 5.03 update that completely redesigned how turning the device on worked. You'd hold the power button until it told you it was going to sleep, holding it longer would switch it off. Previously, you'd have to press the power button for a couple of seconds to wake it back up. In the 5.03 version, simply tapping
* The Aphrodite Inheritance (late 70's BBC TV series), ancient greek gods once again treat us as their playthings.
* : The Api, a species of insectoid ponies, could mimic and adopt what they were shown, but were incapable of original thought and could not create anything new themselves.
* The Apocalypse According to Marie, it turns out Marie had another friend of sorts in her city aside from Bannerman. The new guy in this case is a crazy old neighbour named Cayley who had never even mentioned in the previous book... and who turns out to be connected to the novel's plot, of course.
* The Apocalypse (also from the hidden labyrinths) is the best greatsword (Gladiolus' primary), and gets stronger if the wielder's HP is below 30%.
* The Apocalypse Brings Out the Best in People: A major world crisis can change people for the better.
* The Apocalypse Brings Out the Best in People: The impending end of a society/people/world/etc leads one or more people to become kinder.
* The Apocalypse Door, an urban fantasy/thriller novel featuring secret agents battling the forces of Hell, opens in Newark:
* The Apocalypse Door by James D. Macdonald: Over the course of the novel, the protagonists piece together the evidence that the "demons" they're fighting are the spearhead of an extradimensional alien invasion — but then, at the end, it's suggested that they really are demons.
* The Apocalypse Door Later, while waiting in a bar to meet a contact, he realizes that he hasn't celebrated Mass that day, so he orders a glass of wine and takes a bowl of oyster crackers.
* The Apocalypse Stone after he's killed all the player characters' loved ones.
* The Apocalypse Stone. However, it did also allow alternate endings, such as the fabric of reality being altered in ways that would accommodate Third Edition mechanics.
* The Apocalypse tank is now even better at killing enemy tanks thanks to its Magnetic Harpoon, which drags vehicles towards its front-mounted grinders (and can drag ships towards the shore to kill them). Heavy vehicles and buildings drag the tank towards themselves instead, but the effect is much the same as the grinders do more damage per second than the guns. However, only one magnetic harpoon can affect a target at a time.
* The apocalypse (the magical equivalent of a nuclear holocaust) that ended the

Golden Age mutated several beings into monsters, some of which became complete species.
* the apocalypse!?". They then proceed to force-feed him demon blood (of which Sam was staying clean) in a misguided attempt at getting him to fight demons. What actually ends his 'retirement' is the revelation that he is Lucifer's chosen vessel.
* The Apocalypse Troll battle groups fighting both before and after the actual time travel, but each side only had a single survivor left after all the nukes finished flying, so this trope still applies.
* The Apocalypse Troll come from the same situation as the Ryall above, reinforced by a religion that holds that God made them in His image and all other intelligences are demons in disguise.
* The Apocalypse Troll for the bad guys and a single human fighter pilot for the good guys.
* The Apocalypse Troll since they find themselves a handful of centuries in (their) past.
* The Apocalypse Virus was unleashed on Tokyo on December 24, 2029, in
* The Apocalypse World exists because Sam and Dean were never born, and they learn that both their parents are dead in that timeline. The trope is
* The Apocryphal Books of the Bible (Ezra 2, 3 and 4 and Isaiah 2 and others) read much like fan-fiction. Instead of the structures found in the originals, such as common poetic forms and language (which is often repetitive and dry), these books constantly reference the more 'exciting moments' from those books. Lengthy depictions of giant apocalyptic battles between good and evil are extremely common. They are often excluded from many Biblical Canons for this reason.
* The Apollo 11 lunar module has apparently suffered a fatal crashlanding, but the lone astronaut orbiting above in the command module refuses to return to Earth. Wernher von Braun insists they make it an order, but it's pointed out they've no means of enforcing that order on a man who is 200,000 miles away. This is shown in a later episode when Apollo 24 is
* The Apollo 13 Failsafe Failure was even more spectacular (the fact that NASA managed to bring the command module home with all three men alive is often considered NASA's
* The Apollo astronauts used celestial navigation during their missions, something that sailors have been doing for centuries.
* The Apollo pilots sometimes shout "Where's the eject?" when you shoot them down.
* The apostle Bartholomew is said to have been flayed alive by an Armenian prince after the latter's brother, the king, converted to Christianity; and indeed, he is often represented in art as
* The Apostle killed by Guts at the very beginning of the manga lures men into her embrace before turning into her Apostle form and eating them alive (such as
* The Apostle Paul, who's the main protagonist of the second half of the Book of Acts in
* The Apostles of all used to be humans before offering up something they cherish the most - usually a loved one - to transform into man-eating, often-Lovecraftian abominations. Even in their human form, most have monstrous traits that give their true nature away, like Wyald's ape-like features; the Baron's fangs and yellow, snake-like eyes; and Zodd's red eyes, fangs, feline facial features, and pointed ears.
* The Apostles Of Hell in SMASH consisted of Michael Kovac (Austria), Gabriel Antonik (Norway), Lin "Bitch" Bairon (China) and Sir Robin (Belgium).
* The Apostles themselves are empowered by the God Hand, who demand the
* The Apostles warn in their Epistles that during the last days the people will be evil, corrupt, violent, dishonest, lecherous and full of vice.
* The Apothecary Diaries is ordinarily a very pretty girl, but growing up in the red light district she realized it also meant unwanted attention from men. To save herself the trouble, she applies makeup freckles to her face and dresses in frumpy clothing, due to freckles being an undesirable trait in her time. Not that it saves her from being kidnapped and taken to the Emperor's palace, of course...

* The apotheosis of this genre, at least in terms of naming tendencies, is the doom metal solo project Doom:Vs. The etymology of this (quite ridiculous) name goes as follows: he chose the Latin word "domus", meaning house, then respelt it as "doomus" (meaning "doom house", one supposes), then respelt
* The Apotheosis of Washington, George Washington has risen to the ranks of the divine as a symbol of American greatness. Now he's above the five Greek gods who bless America's trades and Lady Freedom herself.
* The Apotheosis of Washington has the Roman goddess Venus emerging from the ocean as she did in the time of ancient Greece so she can complete her godly duties... to wire transatlantic telegram cables. Behind her and Neptune's mighty horsemen, you can see a smoke-stacked industrial factory.
* The Apotheosis of Washington, Lady Freedom is a fierce warrior who fights armored kings with her mighty eagle, flag-themed shield, and golden sword aiming for the sky. Fittingly, she sits directly under General Washington's seat in the clouds.
* The Apotheosis of Washington: The soldiers Freedom battles in are seen holding torches facing the direction of a small child who recoils away. While it seems like Freedom will stop them, the implication is that they are fully willing to burn a child alive if Freedom wasn't there to restrain them.
* The apparently ironclad argument for taking both boxes: It's too late for the game-runner to change the contents of the boxes, so taking Box A gives you an extra $1000 no matter what.
* The apparently ironclad argument for taking only Box B: The game-runner has a good record at prediction, so taking only Box B makes it very likely that you'll get the million.
* The apparent meeting place of the Lodge Spirits, implied to be a time loop of the exact moment the Trinity Nuclear Explosion occurred.
* The apparent murder was an elaborate con by the Asian and "drug dealer" to steal the coin dealer's merchandise, tricking him into thinking he had witnessed a murder and was paying them hush money. The reason why the kitchen was spotless is because a waitress at the restaurant helped the Asian clean up the kitchen before the cops arrived.
* The "Apparition in front of a moving car" variety appears in both the videogame and movie versions of
* The "Apparition in front of the car" variant is used again in an episode of
* The apparition of the bloody child's prophecy when Macbeth visits the three witches:
* The Apparition was an earlier film even more loosely inspired by the Phillip Experiment - about all it has in common with the "true events" is that it involves people in a college trying to summon a spirit as part of an experiment.
* The Appeal has this happen to the Supreme Court Justice with the highest likelihood of upholding the verdict in question.
* The Appeal: The main stockholder for an NYC chemical plant is looking to reverse a $41 million judgement. The head of a shadowy Florida firm tells him he can buy a seat on the bench of the state Supreme Court for a cool $8 million, only $1 million of which is actually recorded. Let the chess match begin.
* The appearance of an alien race invading the galaxy severely disrupted the normal network of stargates, culminating in a day when
* The appearance of a new comet was once seen as a portent of major upheavals, as witness the comet of 1066 which was seen just before the Battle of Hastings. Of course, since human history is full of major upheavals, it's just a coincidence.
* The appearance of a woman on a SWAT Team (or the equivalent) used to be fictional, but women have been represented more and more in real life.
* The appearance of contemporary digitally-animated or computer generated characters. This may even include
* the appearance of Imran Zakhaev. Season 2 even centers around Woods and his team attempting to rescue Adler, who is being flown in to Verdansk.
* The appearance of the first clouds to appear over Fourecks for thousands of years invoked this trope in
* The appearance of Two-Face, Harley, and Ivy as Arkham Asylum inmates in addition

to Miss Martian transforming into the second Robin, since the Bat-Embargo restricted any limit or ban the use of Batman-related characters (outside of Batman himself along with his obscure allies and Rogues Gallery) from appearing in the
* the appearance still love her for her heroic behavior and being the face for a media that underrepresent the LGBTQA community.
* The appendages of most arthropods can be broken off at the joint fairly easily, these being weak points in their exoskeletons. In some cases this can actually be a defense mechanism, allowing bugs that get grabbed by the leg or partially ensnared in webs or similar sticky traps to get free via
* the appendices (though his information is garbled through thousands of years).
* The Appetite / Parallels features a rampaging wolf skeleton monster, interspersed with abstract visuals.
* The Apple adverts in Britain featured David Mitchell and Robert Webb as the PC and the Mac respectively. They have been quite unpopular, and have raised questions about the duo's credibility. Not least because, like the US adverts, while Webb is the ostentatiously cool character, Mitchell generally comes across as the more down-to-earth and likeable (this is despite him often playing the role of an unapologetic quasi-intellectual). While hosting
* The Apple-as-porn-star performance outfit, or the golden banana hammock he wears in Hell (Don't ask!) or Boogalow's purple velour jackets with the huge lapels, or Bibi's studded leather and bad eye make-up, or any and everything worn by Shakes... Suffice it to say, this is one ass-ugly movie.
* The Apple Dumpling Gang and commit robberies while having a perfect alibi.
* The Apple Dumpling Gang are revealed to be undercover Army Intelligence agents when they meet to exchange notes.
* The Apple Dumpling Gang, dim-witted crooks Theodore and Amos are scouting out the bank, making plans to steal the gold. This exchange ensues:
* The Apple Dumpling Gang Don Knotts noted in the commentary that they were "two men sharing an IQ (point), and it wasn't an even split."
* The Apple Dumpling Gang, starring Don Knotts and Tim Conway as the robbers.
* The Apple Dumpling Gang Theodore and Amos. Hilarity doesn't just ensue; it devours all the scenery in sight.
* The Apple family farm has a unique cultivar of apple called the "Zap apple". A ripe zap apple is rainbow-fleshed, but its name derives from what happens if one attempts to pick an unripe fruit — as Sweetie Belle learns the hard way in "Family Appreciation Day". The shock flings her over the heads of two friends.
* The Apple family is fairly close to this. Applejack is the incarnation of the Element of Honesty, Big Macintosh is capable of pulling a house off of its foundations (while
* The Apple III is an early example, being (as Steve Wozniak described it) designed more by committee than by actual engineers. A poor cooling system and other design flaws led to reliability problems due to overheating, the real-time clock could fail with prolonged use, and poor software support meant that many users had to rely on the Apple II backwards-compatibility feature to run Apple II software. Unfortunately, this feature only worked in 40-line mode, ruining the III's advantage of built-in 80-line support when upgrading a II with an 80-line expansion card would have been much cheaper. Despite the design flaws being ironed out in later machines, it still ended up being a flop.
* The Applejacks (not to be confused with the British group) were a group of American studio musicians led by Philadelphia-based musician Dave Appell. Their only hits were "Mexican Hat Rock" a modernized version of the popular Mexican hat folk dance, which hit #16 on the charts in 1958, and "Rocka-Conga", which hit #38 later that year. Dave Appell went on to become an important employee for Cameo-Parkway Records, as a session musician, background vocalist, engineer, arranger, producer, and songwriter on several of their big hits by such artists as Chubby Checker, Bobby Rydell, Dee Dee Sharp, The Dovells and the Orlons.
* "The Apple" (S2E09): An ancient supercomputer that controls a planet's primitive population is built to look like a serpent-headed giant stone idol.
* The Apples have this about their monopoly. They see it as okay to do whatever it

takes to maintain their stranglehold at others' expense and Luna help anyone who dares get in the way. Applejack at least seems genuinely clueless about why it's a bad thing and appears convinced that they couldn't survive without it, but Apple Bloom is decidedly hostile whenever someone brings it up.
* The Apple" shows that Spock still doesn't like talking about such things.
* The Apple": The humanoids of the planet Gamma Trianguli Six are kept in their backward situation by a computer/device that also controls the local weather.
* The Apple TV was the first notable aversion. It was first announced as the iTV, but the UK's
* The apportioning of available human organs to transplant patients in need of them comes down to this all the time, unfortunately. Likewise, whenever dialysis machines or other life-prolonging equipment are in short supply, life-and-death triage decisions may be necessary.
* The Apprentice. Amazingly, the idiot responsible wasn't sacked for another two weeks.
* The Apprentice are shown doing a "walk of shame" out from Lord Sugar's business headquarters to the cab, as if to imply that this is where the boardroom is located. The actual boardroom is located in a TV studio, and each of the contestants have their walk of shame filmed at the very start. This includes the eventual winner, of course. In at least one case, this created a continuity error when the contestant magically managed to change clothes going down the elevator.
* The Apprentice, claiming he hadn't sent any illegal texts, and only confessing to the deed when a few of them were read aloud.
* The Apprentice, Lord Alan Sugar turns anyone who fails their task into toads.
* The Apprentice many of the candidates have worked for major companies in the past, but it is described as stuff like "developing markets for a major international coffee company."
* The Apprentice Martha Stewart, contestants charged with producing a live billboard for laundry stain remover Tide to Go won by depicting the product with a cape and boxing gloves to "knock out stains." (Incidentally, the boxing conceit was once used in a computer-animated spot for... Listerine. It all comes back to Listerine, folks.)
* The Apprentice — one team will be led by someone with an "artistic vision", the other team will make something "tacky" that shouts the product name and concept at you, and the shouty team will win because Lord Sugar can't stand "artsy fartsy stuff".
* The Apprentice — Trump starts to explain at length what text messaging is, before stopping and admitting that everyone else knows exactly what text messaging is, and that he's the only person who needs someone to explain it to him, getting a few chuckles from the candidates.
* The Apprentice, one of the male candidates wore a lion suit, during a task of selling sweets to children at a zoo.
* The Apprentice Rogue: Artamos is part of the Order of Black Knights, which is tantamount to the kingdom's Black Ops. The mission that forms the plot is Artamos' responsibility so he has to enforce his authority over the plate mail knights from both his own kingdom and his charge's kingdom; both of them think they should be in charge.
* The Apprentice Rogue because it would conflict with their fighting style.
* The Apprentice Rogue: Falita's greed is set up in the first chapter when she plunders a corpse. As a child and even as an adult she would steal things and then forget about them; she simply wanted to take them.
* The Apprentice Rogue: The Black Knights are stealthy, have an evasive fighting style, go on covert missions, and wear black; they're like ninjas from the British Isles.
* The Apprentice Rogue: The premise of the plot; a princess from a neighboring kingdom has been engaged to the local king and needs an escort to the ceremony and her new home.
* The Apprentice Tanner from Bonus Pack 2 normally tries to help the Tanner get killed but becomes a Death Seeker if none of the other players are a Tanner.

* The Apprentice. (The ads begin at 0:30 and 2:48, and Alan Sugar voices his opinion on Dada Ads at 4:13)
* The Apprentice. The other team will put together an advert that looks sloppy and amateurish, but says enough about the product to allow them to win the task.
* The Apprentice there was Pamela Day, the towering contestant who was best known for being the only woman on the men's team and the brains behind many of their successes.
* The Apprentice, the Student, and the Charlatan Aegis. By the time the sequel rolls around, they've apparently become a couple.
* The Apprentice, the Student, and the Charlatan and adapted into an audio drama by truesailorcomet)
* The Apprentice, the Student, and the Charlatan, and is purportedly serenaded with Luna and Celestia playing a set of bagpipes and a vuvuzela respectively.
* The Apprentice, the Student, and the Charlatan and keeps him from scurrying back to their room via a leash spell. She's only holding captive because he's attempting to punish himself for screaming at her at one point, as once Nova starts to actually enjoy himself, she drops it.
* The Apprentice, the Student, and the Charlatan, and that the story just writes itself.
* The Apprentice, the Student, and the Charlatan), but then there's a moment that he catches her in the right light, and he falls head over heels for her.
* The Apprentice, the Student, and the Charlatan, Clover writes one to Nova as a final goodbye.
* The Apprentice, the Student, and the Charlatan, energy sensing is apparently a skill anyone can learn, though unicorns learn it most easily as they are more sensitive to magic around them. In addition to simply sensing magical energy, some of the practical applications include knowing when someone is lying, concealing themselves up with magic to hide it, and an ability to sense who other ponies are based on their aura, assuming they already know who they are. Protagonist Nova Shine gets the most opportunity to show his skill with it off.
* The Apprentice, the Student, and the Charlatan, including his eyes and mane & tail, but also his magic and cutie mark.
* The Apprentice, the Student, and the Charlatan is to buy a homeless pony an apartment, and then swear him and the landlord to total secrecy about it. He's trying to keep his head down so his parents don't come looking for him, given he doesn't have the best of relationships with them.
* The Apprentice, the Student, and the Charlatan, Nova Shine gets along really well with the foals of Celestia's School for Gifted Unicorns. Twilight notes how tender the moment is, considering they came here for vastly more anger-inducing reasons.
* The Apprentice, the Student, and the Charlatan: Nova Shine has three separate instances in the first half of the story where he tries to keep himself in control as three separate ponies manage to push his buttons (all unintentionally) until he finally starts screaming at them (and in one case, letting loose reflexive magic).
* The Apprentice, the Student, and the Charlatan, Nova Shine loathes just about every figure he ever saw as an idol or mentor figure for various reasons, the notable exception being Princess Luna, his current teacher, to whom he has unquestionable loyalty. His father and mother neglected him, his first mentor betrayed him, Princess Cadance refuses to stop pestering him about making his peace with all of them, and so on. The first half of the fic features him making his peace with all of them and growing to love them all as friends and family.
* The Apprentice, the Student, and the Charlatan, Nova Shine often rubs around his horn whenever he's in deep thought.
* The Apprentice, the Student, and the Charlatan, Nova Shine picks up a newspaper in the morning in Chapter 1 which mentions a new Headmaster of Celestia's School for Gifted Unicorns. A few chapters later, it becomes important because the pony in question is Nova's old mentor and he plays an integral role in helping Nova get past his worst day.
* The Apprentice, the Student, and the Charlatan, Nova Shine shows that he is aware of both the fact that he is in a story (he outright refers to the "backstory part

of the chapter" at one point), and the fact that the first several chapters are undergoing a rewrite (On Twilight mentioning that mastering a spell will take time and effort, he notes that he mastered it in a day in the original version of the chapter).
* The Apprentice, the Student, and the Charlatan, Nova to Silverblood, Steelshod to Nova.
* The Apprentice, the Student, and the Charlatan or when she finally is able to get him to talk about his past.
* The Apprentice, the Student, and the Charlatan over the cute colt she's brought home.
* The Apprentice, the Student, and the Charlatan plays with this. Nova Shine is named after one of the pioneers of magic, who happened to be Princess Luna's first Night Apprentice, a unicorn held in the same regard as Star Swirl the Bearded, and the patriarch of his family, the Novus clan. Then, Nova and Twilight discover journals belonging to every previous Faithful Student and Night Apprentice in history, one of which belongs to Nova Shine I, and in it, discovers that Nova Shine I, the first Night Apprentice, is none other than present Nova himself, who heads back in time in only a few days, meaning that Nova is named after, and idolizes, himself. Except not really, because Nova ends up returning to his own time without having done many of the things Nova Shine I was reported to have done. It turns out, however, that Clover the Clever, the mare he fell in love with and ultimately left, ended up naming her son after him, and that Nova Shine was the one who became patriarch of the Novus Clan and became one of the most famous and storied unicorns in Equestrian history. The Nova Shine from the present was named after a unicorn who was named after him.
* The Apprentice, the Student, and the Charlatan, protagonist Nova Shine lives his life trying his damnedest to stay away from his parents at all costs, due to years of being neglected as a child. A major part of the first half of the story is Nova letting go of his hatred for them, forgiving them, and letting them into his life again.
* The Apprentice, the Student, and the Charlatan, Sweetie Belle accidentally breaks a vase Rarity owned while Nova is teaching her how to control her magic. Rarity blames Nova, seeing it as his fault because he didn't dissuade Sweetie Belle from levitating it, and it leads to a bit of an icy relationship between the two of them.
* The Apprentice, the Student, and the Charlatan, Tantalus Lulamoon has one of these in his manor that conceals a tunnel that leads to the Canterlot Underground.
* The Apprentice, the Student, and the Charlatan, we get a sequence where a month or so goes by with Nova training to use an energy beam and shield spells, and we see him progress from barely being able to keep up a shield for more than a few strikes and barely able to control his beam, to being able to tank hits from three unicorns at once until being brought down by underhanded trickery, and to have the touch of a feather or the force of a train with his beam.
* The Apprentice: This is Lord Sugar's response to Karthik's boast "Give me a laptop, I'll make you a billion-dollar company." For context, this was following the defeat of Karthik's team by over £40,000.
* The Apprentice to somewhere fans of the show end up trying to visit.
* The Apprentice (UK), candidates would frequently promise to "give 110%" (or, in extreme cases, 150% or 200%). Lord Sugar eventually got so tired of this that he banned the use of the phrase.
* The Apprentice (UK), Nick Hewer comments on one team's attempts to create photographs of gay couples dancing in a nightclub:
* The Apprentice (UK), Solomon was so shaken by his interview with Claude Littner that he almost walked out of the window rather than the door.
* The Apprentice. You've now even got tourists visiting after seeing it on the show.
* The Approaching Storm and become native guides to Offee and three other Jedi.
* The appropriately-named "Drinking Song" by Jenny Owen Youngs. The chorus, "There's solace at the bottom of the bottle", is

* The appropriately named "Math Wrath" perk improves the efficiency of V.A.T.S. if the player's Science skill is high enough.
* The appropriately named Skulltaker, the highest ranking of Khorne's lesser daemons is this trope personified. His sole reason for existence is to look for the greatest warriors and fight them in hand-to-hand combat. If he wins (and he usually does) he'll rip the foe's head off and attach the skull into his cloak.
* The appropriately namely episode "A Misunderstanding" also features this. The case centers around a rape case with two teenagers. The boy seems genuinely shocked that she's accusing him of rape, and insists that they had consensual sex. The episode doesn't really dispute the idea that he didn't
* The approximately 1.5 to 2 million Rohingya people who live in Rakhine State of western
* the April 10, 1988 strip, where Lanolin and Roy roll back their sleeves, before realizing that they don't have sleeves and they just stripped the wool and feathers from their arms, painfully.
* The April 1958 issue has two men in grey spacesuits with a bubble for a helmet. You can clearly see that their eyes are closed and they appear to be unconscious.
* The April 1959 issue has three men in spacesuits that use completely round and clear helmets.
* The April 22, 2000 airing was pre-empted by coverage of the raid on the Florida home where Elian Gonzalez was being held by his father.
* the April 24, 2019 strip, the chained dog tries to learn cat language, and demonstrates what he learned so far to Garfield. Garfield's response: "You just asked for directions to the pipe wrench."
* The "April Fools' Day" episode (airdate March 25, 2020) was a full-episode tribute to Carl. All the contestants and judges were friends of his from the usual collection of Flavortown judges, other friends and relatives appeared on the show, and all the challenges were ones Carl
* The Apsalus project was one big work in progress. Its major goal was to be able to fly from Southeast Asia to Jaburo in South America by flying into the atmosphere and descending once arriving and obliterating the Federation's hidden base with a mega particle cannon.
* The aptly named Dark Cabaret group The Carnival are centered around this.
* The aptly-named Ego the Living Planet, who tangled with such persons as
* The aptly-named Elites, the strongest forms of which are the black-ish-armored Spec-Ops types, who were the only Elites who used grenades in the earlier games (and boy, did they throw
* The aptly named episode "Monster Movie" was a homage to classic monster movies. It was filmed entirely in black and white and featured a shapeshifting villain who took the forms of a Mummy, a Wolfman, and Dracula.
* The aptly named "Galaxy Drops" are carefully organized raids involving a fleet of
* The aptly-named God-Emperor of Man was this back when he was still up and walking rather than on life support.
* The aptly named Khorne Lord of Skulls model has so many skulls on it that according to an interview in
* The aptly named Lt. Gen. Chesty Puller (USMC), probably the most decorated Marine ever. Received the Navy Cross five times, and all of his service ribbons takes up seven rows on his uniform.
* The aptly-named Molotov Cocktease, whose outfit has a breast-baring and ass-baring slit up the front
* The aptly named Professor Raven. One of his spells involves summoning hundreds of exploding crows with which to
* The aptly named Psychoneurotic (sometimes merely Mad) Lord Snapcase — who, in a
* The aptly named "Repel" items (Repel, Super Repel, Max Repel, in ascending order of duration) in the series blocks
* The aptly named Silicon Red, a folk singer resembling a bearded humanoid made out of stone and one of Bender's celebrity idols (asides Elzar and Calculon) from

the seventh season
* The aptly named Smiling Titan has a mouth drawn back in a disturbing rictus-like grin, exposing every single one of her several dozen identical rectangular teeth.
* The aptly-named Turtle has no weapons but is a wedge on all sides (meaning opponents and their weapons are more likely to slide over it) and has some rather tough armor, tough enough to be the first bot to have ever broken the spinning blades of
* The aptly-named upgrade "Number One" replaces Isaac's tears with a stream of urine and replaces his normal crying expression with a look of relief. Another item, the "Lemon Mishap," causes Issac to leave a puddle of urine that damages enemies.
* The aptly named Woody Peoples was an NFL guard who wore the number 69.
* The aptly titled "Pinkie Pride" is all about Pinkie defending her pride as a party planner from her rival Cheese Sandwich, to the point where
* The aptly-titled "United State of Pop 2010 (Don't Stop the Pop)" is about having fun at a party with the dance-pop music that dominated the year.
* The Apunkalypse: Once society falls, everyone becomes a vandalizing punk.
* The Apunkalypse: Punks usher in the collapse of civilization; the apocalypse ushers in the age of the punks. It's all the same song and dance, and the punks are here to stay.
* The Apunkalypse) with emphasis on societal collapse, rising anarchy and tribalism, and cool punk-inspired outfits.
* The Aqir who fled north would become the spider-like Nerubians, who became one of the dominant forces on Northrend. This would come to end in the War of the Spider, where the Nerubians stood against and were defeated by the undead Scourge, with most becoming undead themselves. This is a rare example of a Bug War where the Bugs were arguably the good guys, or at least the
* The Aquabats!, and it comes with a pair of fuzzy dice in the cockpit.
* The Aquabats! describe an entire subculture built around this look in their song "Fashion Zombies!".
* The Aquabats! example, in the form of the movie (movies?) from their song "Stuck in a Movie!". The narrator, i.e. the guy stuck in a movie, describes it as a mish-mash of action, horror, and fantasy where none of the pieces seem to be connected to each other. It gives the impression of a montage.
* The Aquabats! He can express emotions, like love and snarkiness, and is a talented keyboardist.
* The Aquabats!: In the last verse of "Pizza Day!", the narrator attributes his malaise and inability to hold down a job to skipping lunch too many times in middle school.
* The Aquabats!, in which some bored space explorers blow their surplus rations on a micro-gravity food fight because there's not much else to do on the moon.
* The Aquabats! is about a cat turned into "a two-headed man-eating monster" by "the power of atomic energy".
* The Aquabats! is about a man who goes on a shark-fighting rampage after a shark eats his girlfriend.
* The Aquabats! is about a nerd reminiscing on the carefree days of his childhood.
* The Aquabats! is about a town overcome with malaise and apathy thanks to the eponymous Thing.
* The Aquabats!: "It's Crazy, Man!" is about a guy who goes to a rock show with a girl, only to bail on his date when he learns just how bad her halitosis is.
* The Aquabats! makes a number of tongue-in-cheek claims, like that geothermal radiation is caused by a chipmunk baking desserts at the center of the Earth, or that worms come out of the ground when it rains because eating dirt all day makes them thirsty.
* The Aquabats!' song "The Cat with Two Heads!" is about a scientist who creates the eponymous two-headed feline, only for it to escape from captivity and go on a vengeful rampage against its creator.
* The Aquabats!' song "Why Rock", a parody of the metal style associated with this trope (and claimed to be a cover of a band called Leather Pyrate) contains the

backwards message "It's worth it to graduate; your parents have the right idea. Brush your teeth."
* The Aquabats! Super Show! episode "EagleClaw!", Eagleclaw blows up Eaglebones' motorcycle in this manner using a guitar that shoots lasers. Later on, in "Ladyfingers!" Eaglebones unintentionally blows up a van with his own guitar that shoots lasers, and the partygoers associated with the van end up taking refuge in the Battletram.
* The Aquabats! Super Show! episode "EagleClaw!" while Eaglebones sings "B-R-O" during his motorcycle ride. Upon arrival at his destination the song becomes filtered through the motorcycle's radio.
* The Aquabats! Super Show! episode "Ladyfingers!" claim to be the guardians of the underworld.
* The Aquabats! Super Show! episode "ManAnt!". While ManAnt's goons are beating up everyone but the MC Bat Commander, the Commander stops to look at some grilled chicken. "It's like no one wants me to eat! I'm starving, okay?!"
* The Aquabats! Super Show! episode "Mysterious Egg!", Jimmy the Robot entrusts Jimmy Jr. to a random chicken he found on a nearby farm.
* The Aquabats! Super Show! episode "Showtime!" has a musical number appropriately titled "Showtime!" in which the band gears up to stop a downtown menace.
* The Aquabats! Super Show!" fall under this trope, as does the potato bug in "Pilgrim Boy!".
* The Aquabats! Super Show! gleefully indulges in this, and its monsters run from the fairly standard to the truly bizarre.
* The Aqua Bats Super Show, half-parody of these types of kids' shows.
* The Aquabats! Super Show! in a battle against the Cobraman for the Battletram.
* The Aquabats! Super Show!: In "The Thingy!", the Thingy plans to convert the Aquabats into fuel for its spacecraft.
* The Aquabats! Super Show!, "ManAnt!", the extremely famished band attempts to order at a deserted burger joint when ManAnt's henchmen show up to attack.
* The Aquabats! Super Show! not ascending either, with no explanation given. (They don't go through with the ascent, anyway.)
* The Aquabats! Super Show! over a period of weeks, with the logic that "your soul(s) have got to be in there somewhere."
* The Aquabats! Super Show!, the Aquabats are menaced by "Space Bees! The deadliest bees in space!"
* The Aquabats! Super Show! There isn't a single character who isn't over-the-top.
* The Aquabats! tells of a man's encounter with a tiny old man, and later an entire city of miniature people, who teach him an infectious song.
* The Aquabats!, which contains a mixture of animation and live-action.
* The Aquabats! with a nasty set of razor-sharp teeth who loves to eat raw meat. The singer even shows concern over her potentially eating him due to her appetite for human meat in particular, but she spares him and flies off after giving him one last kiss.
* The Aquariums of Pyongyang, the autobiography of a North Korean defector who spent his childhood in a gulag. His paternal grandfather was denounced and the entire father's side of the family got taken down with them. The author's mother was the daughter of a national hero and was pardoned to spare her father embarrassment. The author would much later learn that his mother had repeatedly asked the authorities to sentence her to hard labor so she could join her husband and children. They never did.
* The Aquarrans are an interesting case, as they are in fact aware that they themselves were once an advanced spacefaring people (and in fact were as technologically advanced as any others in that part of the galaxy). Unfortunately, the knowledge of their history was deliberately repressed by their priests to elevate themselves to a position of power in their society.
* The Aqua Stream ability doesn't use any mana if it's used while underwater. The reason is because it's the only way to traverse past a few obstacles in the watery caverns. The alternative of waiting for mana to recharge just to move across the room would have been insufferable.

* The Aquatar Rangers were this whenever they showed up in the Zordon Era. From their first appearance in
* The "aquatic ape" hypothesis posits that humans evolved from these, with at least one of our primate ancestors having been an amphibious creature that later re-adapted to land. The evidence for it is scant, coming down mostly to evolutionary traits that it argues are better explained by the sea than the savanna, with little in the way of fossil evidence for it. Still, it has inspired a number of writers, including the creators of
* Thea Queen becomes an ally partway through Season 3 and officially a member during the Season Finale.
* The AR-15 can effectively be called the American AK-47 in terms of the length and depth of its record. First built by ArmaLite in 1959, first adopted by the US military in 1964, and still serving in that capacity (in both the US and in countless other countries) to this day, in both the original M16 rifle and shorter M4 carbine variants. It is the longest continuously serving rifle in the history of the US military. Semi-automatic variants are also extraordinarily popular in the American civilian market.
* The Arab Federation, a confederation consisting of Iraq and Jordan for a short period in 1958. This one was unique in that it was bound dynastically: both Jordan and Iraq were monarchies under the Hashemite dynasty (King Faisal II of Iraq and King Hussein of Jordan were second cousins). However, Faisal II was overthrown in a republican coup in 1958, making the Federation a dead letter.
* The Arabian Nights frame tale features a woman in a relationship with a djinn, although it's not exactly healthy as she takes the opportunity to cheat on him with two kings as soon as he's out of sight for a while.
* The Arabian Nights the obscure stories from the collection, which probably isn't surprising when you know series creator Shabnam Rezaei grew up in the Middle East hearing the original stories.
* The Arabian Nights. There the person in question is a hunchback who choked on a bone.
* The Arab League, although it's really quite a bit weaker in unity than other such bodies like the European Union, as it's a case of
* The Arablers were a people with limited agricultural skills who settled the edges of the world's night side. They were largely displaced by further waves of migrants, and by the story's time have become entirely non-sapient beings kept as carriers, servants and beasts of burden by a species of sapient dolphins.
* The Arabs can send caravans over longer distances than other civs and can use them to exert religious influence more effectively. They also
* The Arachnos Base mission set features Arachnoids (failed super soldiers
* The Aratrum takes millennia to get from Tau Ceri back to Earth due to relativistic effects in
* the Arbalest gets torn up by the Belial. No problem, though; it's wreck is used to birth the most badass Arm Slave ever made: the ARX-8 Laevatein since it's truly one-of-a-kind but it was specifically built for the pilot.
* The Arbiter in this musical not only takes his job of refereeing a chess championship incredibly seriously, he also seems to think it makes him a badass. "I'm on the case, can't be fooled/ any objection is overruled/ I'm the Arbiter, I know the score/ from square one/ I'll be watching all sixty-four..."
* The Arbiter is the Covenant's version of the trope. Because of the
* The Arbiter's fanbase often being stereotyped as overly masculine, the fangirls are definitely out there.
* the Arbiter; the role of Arbiter is the right hand of the Covenant religion as a whole, wielding enormous power during times of great strife, and can restore the honor of an otherwise disgraced Elite — but the events that they are called into service for are so great that they WILL inevitably kill the Arbiter in question. As the Prophet of Truth states, they are "created and consumed in times of extraordinary crisis".
* The Arbiter wears black and white all show, but is also always prominently wearing blue, a colour not associated with either faction. He is self-interested,

but also disinterested — unaligned, effectively without class or creed. The colour coding is further assisted by the fact that the Arbiter is President of FIDE — he is the highest official of world chess. He may be self-interested, but his "self" effectively
* The Arbitrators generally fall into this. The book they follow is very draconian (and they follow it to the letter) but
* The arcade game has Rufio as a playable character, and he appears in the epilogue alongside the other playable Lost Boys.
* The arcade games reduce the Puyo's drop speed whenever the player uses a continue. It will only do so twice per enemy, though, so Puyo will still drop ridiculously fast against late-game opponents. This seemingly does not carry over to the home ports.
* The Arcade Super Punch Out actually had the first two of five fighters, Bear Hugger and Dragon Chan, have their own distinct palettes. Vodka Drunkenski and Super Macho Man share similar bodies. Great Tiger is Piston Hurricane with a turban and slightly longer mustache.
* The arcade system in question is a Playchoice-10, a Nintendo arcade machine with 10 different NES games inside it as the name suggests, and instead of lives/continues, feeding coins/tokens into it instead grants more playing time. And yes, it did have 2 screens, although since the games in question were NES games, the only purpose the second screen had was providing game hints and info. But after they released new info on the game, not only does the supposed backstory for the game contain tons of speculation, but the supposed promotional image for the game is blatantly photoshopped as well.
* The arcade version has Glass Joe and Kid Quick, Piston Hurricane and Pizza Pasta, and Bald Bull and Mr. Sandman.
* The arcade version of) through the various weapon shops located throughout the game.
* The Arcana: Due to its tarot influence, the game depicts the Devil as Baphomet, and the character most associated with the devil, Lucio, is strongly associated with goats in general.
* The Arcana would throw an extravagant Masquerade party every year for his own birthday, which any citizen in Vesuvia was permitted to attend. It was on the night of one such party, three years before the main story takes place, that Lucio was killed.
* The Arcane Warrior class lets a mage be a far better tank than any warrior. They do less damage per second than blaster mages and even less damage than regular warriors, but by the end of the game they can have something like twice the armor value of a warrior, maxed out elemental resistances, and absolutely ridiculous bonuses to resist getting knocked down/frozen/etc.
* The Arcanic Empire is more or less an Empire in name only. It appears to be composed significantly of nomadic tribes, and has at least two separate
* The Arcanist has two sets of wings, one of which is explicitly stated to be vestigial...although considering that his larger wings are functional and he can
* The Arcanum, and Marie Laveu are all members of a secret organization that protects the world from the occult.
* The arc before the crossover was a series of these for Ixis Naugus:
* The arc dealing with the last dark guild standing Tartaros is also accused of this, despite generally being considered one of the best arcs in the story, for specifically two points near the end. The first is the countdown of
* The Archai originally suffered from being inadvertently treated as gods by modosophonts, in
* The Archangel Michael is the second or third oldest angel in the universe in
* The archangel Raphael, the one who never really does anything or gets much characterization, is the one linked to a bloodline of black people. He never even wears the same black person for more than a couple of appearances, because after he burns them out and dumps them they're in no condition to consent again. That poor family. Also, those poor actors. The guy he wears in "
* The Archangels all predate humanity, and "The Man Who Would Be King" reveals

they were there when the first land-dwelling vertebrates evolved. The Season 10 finale implies they predate the Universe itself. All other evil angels also predate humanity, though they are younger than the Universe.
* The archangels Imperius and Tyrael both have this. Tyrael loses one when he becomes mortal. When he reforms the Horadrim, they all have a single, large shoulder pad each, most likely out of respect for Tyrael.
* The archangels, the seven former rulers of the afterlife, are a more powerful variant of angel. Following the Calamity, Anahel, ruler of the third heaven, Shehaqim, is the only known surviving archangel.
* The archbishop Rhea is also Seiros herself, having faked her own death in order to continue watching over Fódlan in over a thousand years since the church's founding, effectively making her a shadow ruler. isn't very happy with this state of affairs for various reasons and decides to kickstart a war to rid Fódlan of the Church's influence.
* The Arch-Chancellor's Hat is a major plot-point in the early novel
* The Archdemon. This presents a bit of a problem for the heroes, as the Blight can only be ended with the Archdemon's death, but it's ability to fly allows it to easily stay out of the Gray Warden's reach. Luckily, Riordan manages to sneak up on it and force it to land by slicing one of its wings open.
* The Archdemon, upon being slain, automatically does this to the nearest Darkspawn, making it impossible to kill — unless a Grey Warden strikes the final blow (which forces the Archdemon's spirit to travel in the Warden). Since Darkspawn are essentially soulless, the Archdemon can possess another darkspawn with no problems. Attempting to do the same to a Grey Warden destroys both of their souls.
* The archdevil Zariel had a head of long hair as an angel, but lost it all when she became a devil and is now completely bald.
* The Archer: All of the camp girls have been sent there regardless of their crimes due to the owner Bob bribing a judge into doing so.
* The Archer: Bob, the warden and owner of a girls' reform camp, bribed a judge to send him juveniles as the state pays for housing them.
* The Archer: Fugitive from the Empire - a 1981 TV movie which tells the story of Prince Toran who is searching for the sorcerer who can help him claim his birthright and avenge his father's murder, accompanied by a thief and an enchantress.
* The Archer: Lauren discovers that Michael likes to spy on the girls when they're in the shower.
* The Archer: Lauren protests at being sent off to reform camp for beating up Daniel, her friend's abusive boyfriend, because she was defending herself. The unfeeling judge doesn't care (we later learn that he's also corrupt, ordering girls into the camp for kickbacks, so he would do this regardless).
* The Archer: (lesbian main character, lesbian or bi female supporting character, lesbian supporting character, LGBT youth, queer female romance)
* The Archer: Michael masturbates when watching girls in the shower through a peephole.
* The Archer: No matter what their crimes (real or alleged) girls at the camp are sent there indefinitely (or at least until they're 21).
* The Archer: Rebecca's got olive skin and features which don't seem Caucasian. Her ethnicity however is not stated, and her last name, Rosinsky, is Jewish. She's played by a Cuban-American.
* The Archers: An episode where Owen rapes Kathy was preceded by such a warning, and immediately followed by a hotline number.
* The Archers are often "just missed" on-air, pulling out of Christmas pantos at the last moment and so forth, usually explained by tutting disapproval from the regular characters.
* The Archers a surprising number of people sent her husband flowers and condolences cards care of the BBC.
* The Archers: Edward "Eddie" Grundy, and his second son, Edward "Ed" Grundy.
* The Archers. Fletch explains he doesn't, on account of them not being allowed

radios in their cells. "Really? No-one ever mentioned it to me."
* The Archers in terms of volume and is showing absolutely no signs of stopping any time soon. SIXTEEN THOUSAND EPISODES.
* The Archers recordings around his surgery's schedules. When he couldn't make it, his character's wife would instead shout questions into the 'offstage' room he was supposedly sat in, and then complain that her husband couldn't hear her. Either that, or he would be constantly busy with his in-universe amateur dramatics.
* The Archers, retaining an "Agricultural Story Editor" for this purpose.
* The Archers serial. New episodes continually reference modern farming life and developments, as well as contemporary pop culture and even weather events (such as flooding arcs during periods of heavy downpour in real life).
* The Archers status - has a regular character list of about 60, with a couple of dozen appearing each week. Include occasional and silent characters, and you're into the hundreds.
* The Archers that actors are often in it for long enough to become elderly. Usually the death is offstage, but relatively soon after the actor's own death; a notable exception was Nelson Gabriel's death, which occurred after the character had been a tax exile for some time, still talked about by the other characters but not appearing.
* The Archer: The film opens on Laurel out in the wilderness, bloody streaks showing on her back through her tank top, and then shows the events which led to this, starting at weeks earlier.
* The Archer: The plot is inspired by a real scandal in 2011, where two Pennsylvania state judges where discovered taking bribes to send juveniles into private detention facilities. All the rest is added of course. The film ends with a denunciation of having juvenile offenders put in prison for profit, stating it makes them far more likely to also reoffend and end up imprisoned later as adults.
* The archetypal monocle-wearing German military officer is always a caricature of
* The archetype of a wandering, humble-seeming wise old man with a wide-brimmed hat and an array of supernatural powers may be started by Odin of
* the archfey Saundor power in exchange for her heart, prompting this response:
* The Archfiend is a YouTube ranter that frequently uses this trope. He finds it all-right that you make YouTube videos until it becomes your living (or you can live with that as a job). In fact, he frequently hates on popular YouTubers for asking money from their fans or using tactics that allow them to have a little bit more money.
* The Archie Comedy Hour, a year later. Sabrina would star in a standalone series after that.
* The Archie Mega Man comic was planning against all robot kind and how his version of the fifth game would play out.
* The Archie Show. He would attempt to prank Archie, and inevitably some authority figure would spring the trap instead. "Mrs. Grundy!"
* The Archie Show: In "A Hard Day's Knight", Archie claims to be a knight and dresses up in a suit of armor and rides a horse. He tries to challenge Reggie to a duel for Veronica's hand. Reggie nonchalantly pulls a carrot on a stick out of nowhere and sticks it on the horse's head. This causes the horse to run after the carrot, with Archie unable to stop it until he is eventually thrown off.
* The Archie Show: In "Snow Business," hijinks result in Veronica's dad getting covered in snow. In the next scene, he's shivering with his feet in a barrel of heated water.
* The Archies while Uncle George is listening. The story ends with the ex-sheriff hitchhiking out of town, at which the Archies offer him a lift — for a fee of $12 a mile.
* The Architect also pointed out that the previous "One's" loved humanity in a general sense, leading them to sacrifice most of the population for the sake of the species as a whole. Due to the Oracle's influence, Neo loved Trinity more than humanity, directly leading to humanity's freedom.
* The Architect can only dispassionately interpret love in a very mechanical manner — as chemical processes occurring in the human brain.

* The Architect is a Mook Rebel, being a self-aware Darkspawn who's attempting to try and sever their connection to the Old Gods, thus preventing the outbreak of further Blights. He suffers from a lot of
* The Architect was born unable to hear the song of the Old Gods, and thus possessing free will (unlike other darkspawn). He discovers a way to make other darkspawn into Rogue Drones as well, though this...doesn't always go well.
* The Archive herself said that the knowledge transfers at the moment of death leaving the parent brain dead, but she dosn't really mind as her mother lives on inside her head. Currently, fans don't know who's right.
* The Archive in is a being that holds the knowledge of everything ever written down, ever, in the history of mankind. Her information is updated in real-time, a fact which Harry puts to good use in
* The Archive is a human receptacle for all human knowledge, and it is also hereditary, passing from mother to daughter when the previous one dies. The pervious Archive died while her daughter was still young, meaning that a young girl is one of the most knowledgeable beings in existence. However she is still physically a child with all the limits that come with that, so she is usually seen in the company of her half-demon bodyguard/chauffeur.
* The Archive is the repository of all human knowledge. Anything written, typed, or printed, whether on stone, sand, paper, or computer, or other medium by other means, is instantly entered into her mind. The mantle is past from mother to daughter since Ancient Greece. She can recall anything her predecessors knew with perfect clarity too. She is
* The Archive/Ivy averts this trope. She's the living embodiment of all written human knowledge and, by the expert and subtle application of magic,
* The Archive. She is a living repository of all human knowledge (or at least, all written and typed human knowledge-how much beyond that isn't terribly clear), and the job is passed down from mother to daughter as the mother nears the end of her life. Normally this isn't such a big deal as the daughter is usually somewhere in the general vicinity of middle age when this happens, but in the current Archive's case, it happened just after birth; she's seven when she first meets Harry.
* The archives, restoration and research workspaces, and other non-public facilities of the Smithsonian Institution's D.C. museums occupy a
* the Archive throughout history was simply the result of previous Archives making highly-accurate conclusions based on analysis of the knowledge they possessed instead of predicting the future.
* The Archivists themselves have it even worse: not only can they not leave of their own volition, they can only die by violence. Otherwise the Eye chooses a new Archivist once they're too old to be useful, and the previous ones age eternally.
* The Arch Linux wiki is popular with users of other Linux distributions because its coverage of the more technical topics of Linux system and application configuration is so thorough.
* The Archmage, he explains that had he done so, the protagonists would have been weaker for their lack of experiences, and the bad guys would have survived in hiding to cause more trouble down the line, rather than being drawn out and crushed.
* The Archmage summons a Water Elemental, a tough short-ranged unit (and can have up to three active at any time).
* The Archonate has "The Connectivity", which seems to be roughly equivalent to planet-spanning WiFi.
* The Archonate setting, one of the significant villains is a wizard by the name of Smiling Bol. He always maintains a cheerful expression - sometimes less menacing, sometimes more so.
* The Archonate setting, the Commons, humanity's collective unconscious, is well-stocked with tropes including this one:
* The Archons themselves guide their lands with an even hand but have frightening power they bring to bear on those who disrupt their laws. Venti,Zhong-li and Ei have supportive Elemental skills and massively powerful Bursts.
* the arch-villain Tactical, who wears power armor, is forced to wear his armor

all the time for life support and mobility support after he has a stroke.
* The Arcology also appears to be one of these. While it's, technically, a space station, it is equipped with a (very ancient) slipspace drive.
* the Arcology Expert Program gained sapience, triggered by a sense of betrayal by its "father", and locked it down so it could find a way to get its code out of the host. Said methods primarily consisted of grotesque medical experiments and vivisection on its prisoners. Its god delusion had it call itself Deus. It created the first otaku this way and used them to smuggle its code out of the arcology before its father used the kill codes to destroy it. The worst estimate of casualties puts the survivors at no more than 1,600.
* The arc "Prey" has Bruce Wayne break a glass when he hears Hugo Strange on a news broadcast perfectly outlining a profile for what might drive a man to become Batman; it's unclear if it's meant to be a
* The arc's entire plot is his gambit to destroy Yamamoto for killing his father. When he that learns Yamamoto saved his father's soul from possession, he kills himself to atone for his misguided behaviour.
* The arc that introduced Bob and Dawn had them discussing the theory that a meteor killed the dinosaurs, which Bob says was greatly exaggerated. It did land on one dinosaur; he actually survived, but as you might imagine, it took a lot of expensive medical treatment. Poor Larry was eventually recognized as the first member of a new species, the doctor-billed flattypuss.
* The Arctic Incident, Artemis performs an acrobatic slide across the ice-slick roof of a moving train by calculating momentum, angles, and friction.
* The Arctic Incident; when outside forces actually want the L.E.P. to crumble, he's the first person they go after. By hijacking his computer systems, they easily bring down most the L.E.P.'s defenses. Ordinarily, this wouldn't be possible, but one of the villains is just as clever as he is and a lot more underhanded.
* The Arctic Queen Refrigerator item was recovered from the wreckage of the Grand Central Hotel in New York City, which collapsed in 1973. In real life, it came down because of improper maintenance of its load-bearing walls, but the game also implies that the fridge (which is demonstrated to have a tendency of
* The Arctic Server constantly deals cold damage to everyone in it, and has the Polar Night world event that removes sunlight for photosynthesis and solar heating entirely for months at a time. In addition, very little loot (i.e., plants) spawn there, meaning herbivore players must rely on loot like lichen to survive.
* The arctic worms in the first season episode "Ice" made people agressive and murderous.
* The Ardat-Yakshi Rila is already half-indoctrinated and barely able to stop herself from attacking her own sister when first awakened. She regains control of herself and, while her sister is dragged away screaming, draws the attention of the approaching Banshees. As one stares into her eyes, Rila seems to be speaking to the Reapers controlling it as she detonates the bomb.
* The "Ardbert" running around the present day Norvrandt is Elidibus puppeting his corpse. Since Ardbert's soul merged with the Warrior of Light's and Elidibus is the only Ascian left, it was quite easy to put two and two together. He puts so little effort into actually acting like Ardbert that the player's given the option to be offended that he thought anyone would fall for it.
* The Ardebit sisters: "Ardebit" is a Latin conjugation of "ardeo" that means "to burn".
* The Ardennes Offensive of 1944 (aka the Battle of the Bulge) is often seen as an attempt to repeat the "Sichelschnitt" (sickle-cut) of 1940.
* "The Ardennes: The Battle of the Bulge": "A small group of [American] stragglers suddenly become tired of what seems to be eternally retreating. Miles back they ceased to be part of an organized combat formation, and recorded history, at that point, lost them. The sound of firing is heard for fifteen minutes, an hour, coming from a patch of woods, a tiny village, the opposite side of a hill. The enemy has been delayed; the enemy resumes the march westward. Weeks later a graves registration team uncovers mute evidence of a last-ditch stand at woods, village, or hill."

* The AR Drone from Parrot has the same capabilities and carries both nose and belly cameras.
* The area around the collapse was rendered next to uninhabitable thanks to the dust and debris.
* The area around Vegas's Fremont Street is referred to as "Freeside" due to, again, disrepair of the Fremont Street sign.
* The area for ten kilometers around Chernobyl, meanwhile, is a spawning ground for Wyrm-servants. The radiation is bad enough that even some of the non-Black Spiral Dancer werewolves are born deformed and infertile (a condition that, in the rest of the world, is only caused by two werewolves mating).
* The area near New York's Empire Plaza state office complex in Albany has two of these. At the Rensselaer end of the Dunn Memorial Bridge that carries US 20 across the Hudson River, two stub ends are visible. On the west side, a divided freeway suddenly ends in a loop at the west boundary of the complex once you pass the entrance to the underground parking. Both are relics of a canceled freeway project that would have extended to I-90 on the east and another north-south freeway (also never built) in the middle of Albany to its west.
* The Areas of My Expertise (2005), appropriately titled "What You Did Not Know About Hoboes"
* The Areas of My Expertise alone will be worth the price of admission.
* The Areas of My Expertise, because it is the sub-mariners' favorite movie.
* The Areas of My Expertise describes this as "The Too-Easy-To-Mock State". State motto: We Are Defensive About Our Faults.
* The Areas of My Expertise is full of this, especially in the "Were You Aware of It?" segments. Among other things, there's a fifty-first state inhabited by thunderbirds, and hobos tried to conquer the United States during the Great Depression.
* The Areas of My Expertise, John Hodgman advises readers to pick up the hitchhiking ghost, promising that you will be surprised at what happens next.
* The Areas of My Expertise, John Hodgman lists a couple cursed jokes. These are jokes with a setup, but a mundane punch line.
* The Areas of My Expertise, John Hodgman provides a list of (mostly) fake periodicals where writers of short stories can submit their work for a variety of increasingly esoteric literary genres.
* The Areas of My Expertise, the word "lobster" used to refer to a type of East Coast sea otter (referred to as the Furry Old Lobster) before it was driven to extinction by the New Lobster. Also, during the '20s, "gorilla" was a slang term for a tough guy (this one is actually true), and "mega-chimp" was a slang term for an actual gorilla (this one isn't true).
* The Areas of My Expertise. Throughout the book are more "Were You Aware Of It?" lists, containing various "fun facts" about assorted historical figures. And Nick Nolte was one of the hoboes.
* The Areas of My Expertise, when one character is smugly worried that terrorists will attack the Mall of America.
* The Areas of My Expertise, where "hobo signs" were really a secret signaling system for the hobo revolution.
* The Areas of My Expertise (which grows to 800 in the paperback release).
* The Areas of My Expertise (who are not magical, just German). Soil deposits from Ar were combined with those from Kansas to synthetically create the hybrid state known as Arkansas.
* The Areas of My Expertise with a detective who never leaves his bathtub.
* The arena champion from Armored Core 3, Ace, reached his position without suffering a single loss.
* The Arena in is also an optional version. Your armor is limited to the one provided. You can however use your choice of helmet, shield and weapons. The Arena was founded by the legendary Redguard hero Gaiden Shinji, who also served as its first Blademaster (which
* the Ares Conventions, Honours of War and the Clans' even more restrictive code of honor made use of both this and nuclear weapons during the Jihad.

* the Ares Conventions that attacking a JumpShip was a war crime. Though by the time of the FedCom Civil War this was largely ignored and when the Word of Blake Jihad broke out, war crimes of so much greater magnitude were committed so often that "destruction of a Jumpship" ceased to be a noticeable offense.
* The "Are you a boy or a girl?" meme is most commonly associated with Professor Oak. The problem is that in the first generation of Pokémon games, there were no gender options and as a result he never asks the question. He does ask the player their gender in the remakes, but even then the line is actually two separate questions ("Are you a boy? Or are you a girl?") rather than as a single question.
* The Argent Circle. At the low level game in Classic, they appear to be just one of many other factions. They're later one of the driving forces for good in
* The Argentina National Football Team is considered one of the most important national teams in the world and a powerhouse of South American football ever since its inception. However, the last international championship they've won has been the 1993 Copa América. Ever since then, they've reached four Copa América finals (2004, 2007, 2015, 2016) and a FIFA World Cup final (2014) and lost them all while boasting some of the highest-profiled, highest-paid, and most celebrated players in the world in their ranks ever since the '90s. Though there have been call-outs about the players' lack of commitment to the national colors, it's largely blamed on AFA's mismanagement of the team and lackluster oversight over benefits and logistics. This, however, has finally ceased in 2021, as Argentina won the Copa América against Brazil.
* The Argentina national football team is historically one of the most powerful association football teams, and outside of a decade or two, they have been powerhouses of the sport practically since its inception. However, this hasn't translated particularly well to silverware in recent decades—after winning Copa América in 1993, the
* The Argentinian navy in the 19th Century was something of this. In fact, because most of the convicts that comprised his crews wouldn't remember the sails names but were experts at card games, Admiral Brown had the sails renamed to cards names.
* The Argents are a large family of werewolf hunters. It's strongly implied that werewolf hunting is often a family trade, so there are probably many other hunter families out there as well.
* The Argent Tournament in Northrend takes the form of an area which pits the players against NPCs representing the opposing faction, champions of the
* The Argentum Trade Guild represents greed. "Argentum" is the Latin word for "silver", which in this context, refers to money made from silver.
* The Argon also fairly demonstrate the Humans Are Soldiers subtype. In both this incident and the subsequent
* The Argon Federation was formed after one Nathan R. Gunne lured the nigh-unstoppable
* The arguably best weapon in the game is the Alloy Cannon, a plasma-tier shotgun that launches shards of alien alloys (the stuff your endgame armor is made of) as pellets out of what's essentially a portable railgun. Its damage potential is only beaten by MEC weaponry.
* The arguably most popular Hungarian soccer team, Fradi/FTC has a number of idiosyncratic chants used by their fans, such as "MINDENT BELE! MINDENT BELE!" (roughly "Use everything you have!" or "Play with all you've got!") and "HAJRÁ FRADI!" ("Go Fradi!"). There's also the infamous "LILA MAJMOK! LILA MAJMOK!" ("Purple Monkeys! Purple Monkeys!"), meant to jeer on their longtime rival team, Újpest FC, who play in purple colors.
* The argument of "dirty cop" and police relations with minorities was a highlight of the coverage of the
* The ARGUS system is a constellation of missile defence satellites equipped with powerful lasers.
* The Aria most likely to be listed as the intended target of G&S's parodic attack is "Écoute, compagnon, écoute" from
* The Ariana Black Series gets kidnapped or otherwise endangered by Voldemort at least once per fic.

* The Ariana Black Series, so she could have easily just put that back on.
* The Ariane 5 rocket's maiden flight: The navigation system had two redundant computers to handle hardware failure, but because a software error happened instead, both computers crashed simultaneously. The consequences theatened to break the rocket apart, but were successfully caught by
* The arias "But who may abide," "Thou art gone up on high" and "Thou shalt break them" were replaced with short recitatives for the 1742 Dublin premiere (though the recitative setting of "Thou art gone up on high" does not survive). The first two of these three arias, originally composed for bass, were later rewritten for alto/castrato.
* The Arilou are a somewhat more benevolent version. They clearly care about humanity, though their reasons for doing so are left ambiguous. They are also
* The Arios's first season predecessor, Gundam Kyrios, sort of does this, but has to carry a large missile launcher on it's fighter jet mode.
* The Arisen. They cannot be put down permanently, at least, not by any method mortals can possibly hope to access. Even if you try something utterly insane, like tossing one into a black hole or the heart of a sun, it won't do it — they can just be called into a new body back on Earth and start everything all over again.
* The Arishok has one of the deepest voices in the game. He's basically a mountain of perfectly sculpted muscle who makes even the other qunari look small and is
* the Arishok snaps and launches a war on Kirkwall, turning him into the monster many accused him of being.
* The Arisians. Mentor, in particular, has manifested as a giant brain in a jar, a giant brain
* The Aristocats, and pours his wine out. Some people have interpreted him as thinking he's drunk at the sight of cats being chased by a mouse, while others have interpreted it as him thinking he's drunk because the mouse and some of the cats are wearing clothes.
* The Aristocats. And that the four cats will live consecutively. (He's not very bright.) And yet, she implies at the end that she meant to leave the butler a sizable sum himself. Or that he would be bright enough to understand that, as the cats' caretaker, he would inherit the fortune in fact, if not in name, either way.
* The Aristocats are occasionally voiced by a grown women in Japan and France.
* The Aristocats (Berlioz), who hasn't reappeared in anything since then.
* The Aristocats causing the entire fight to freeze and stare at him until he gets the lock undone. Even the music cuts out. The moment the lock is undone, the fight resumes.
* The Aristocats drunk as a result of this. While it may not seem to be an example (after all, he may have been forced to drink it), he clearly ingested enough for one of the cats to lampshade it, and he even notes that he has a preference. Later on, near the end of the movie, he's in 'Everyone Wants to Be a Cat,' and either he's still drunk... or he's found something else.
* The Aristocats, Duchess falls in love with O'Malley as he helps her and her kittens find their way home.
* The Aristocats features Marie and Berlioz play-fighting. During which, Berlioz pins Marie down and tickles her belly.
* The Aristocats has pampered pet cat Duchess and laid-back alley cat Thomas O'Malley.
* The Aristocats has some shades of this. It's most notable when she and her brothers Toulouse and Berlioz are fighting to see who gets inside the door first at the beginning of the film. They ask her why she has to go first, and she tells them, "Because I'm a lady, that's why." She also constantly calls for her mother whenever her brothers mess with her.
* The Aristocats has the butler, Edgar, attempt to mail the kittens and cats away to Timbuktu at the end of the film. In the end, he himself gets thrown into the chest and is mailed off.
* The Aristocats he probably does not know this. This should explain why he simply assumed the cats would outlive him after taking the old saying that cats have nine

lives literally and multiplying nine by their expected lifespan, an assumption that got the plot moving in the first place.
* The Aristocats. He takes "you're only as old as you feel" to heart despite being genuinely really old, yet Madame loves that about him and has kept him as her lawyer for decades.
* The Aristocats: In his overconfidence, Edgar reveals to Frou Frou the horse that he's the catnapper because he made the headlines in the newspaper and is gloating how the police won't find a single clue to implicate him — only to realize that he left his hat, umbrella, motorcycle sidecar, and the cats' basket back at the countryside, and rushes out to retrieve them before the police can.
* The Aristocats in motion, pretty much. Butler Edgar is second in line for the fortune his wealthy mistress wants to leave to her cats, and so knocks them out with sleeping pills and tries to get rid of them. This being Disney, the kitties live, and then have wacky adventures before Edgar's comeuppance is delivered. Also played within that the audience (but not the characters) knows it's Edgar right off the bat.
* The Aristocats, in the beginning when Edgar kidnaps the cats while they're sleeping and leaves them in the countryside. Toulouse, one of the kittens, wakes up and says:
* The Aristocats, is even less threatening as a villain than Hook is. Not only is he constantly humiliated throughout the film when trying to get rid of the cats, but he is ultimately dealt with easily.
* The Aristocats Island and is fishing in the lagoon when Berlioz comes along. He takes the fishing line and catches an old boot.
* The Aristocats is usually naked, but is occasionally seen wearing a hat and coat at times.
* The Aristocats, just right after Thomas O'Malley frees Duchess and her kittens from the crate Edgar was going to use to send them to Timbuktu, the evil butler is immediately kicked in the rear by Frou-Frou the horse, causing him to fall into the crate, at which the other cats immediately slam its lid shut and push it out the door, just in time for it to be picked up and taken away.
* The Aristocats looks like a younger version of her mother, Duchess. The two boys are different colors, though.
* The Aristocats Napoleon and Lafayette, lest the police find them and link him to the kidnapping of the cats.
* The Aristocats Napoleon and Lafayette, who bite off the seat of his pants. They even discuss it beforehand:
* The Aristocats: O'Malley does this to Edgar, but it's subverted that while O'Malley does successfully push the ladder back, he winds up falling with Edgar.
* The Aristocats possible for littermates to have different fathers if the queen mates with more than one tom within a certain period.
* The Aristocats, Roquefort the mouse calls O'Malley "O'Toole", "O'Brien", and "O'Grady", prompting the cat's friends to think he's lying.
* The Aristocats: Scat Cat and his band go running to help O'Malley save Duchess and the kittens, and Roquefort is running after them to catch up. They run past a man at a sidewalk café who, at the sight of a mouse apparently chasing a group of anxious cats, takes the bottle of wine off his table and sadly upends it onto the sidewalk.
* The Aristocats, Scat Cat's jazz ensemble is made of cats from all countries. While the American, English, Italian, and Russian cats are fairly mild stereotypes, the Chinese Cat not only talks like this, but has buck teeth, wears a cymbal like a coolie hat, and in the song about how great being a cat is, sings only about Chinese food, while playing the piano with chopsticks. Seriously.
* The Aristocats that gets tons of represntation alongside films from the Classic Era, the Disney Renissance Era, and The Modern Renissance of the 2010s.
* The Aristocats that they'll have to provide for Duchess and O'Malley's "future little ones".
* The Aristocats: The cats are crossing a railroad trestle. A train approaches from the front, they jump underneath for safety. One of them falls into the river below.

* The Aristocats: The evil butler Edgar disguises himself as a haystack mounted on top of a sidecar in order to escape Napoleon and Lafayette.
* The Aristocats, the geese Abigail and Amelia find Thomas floating in a river, mistake his efforts to get to shore as him trying to teach himself to swim, and approach him to offer a swimming lesson. One of them attempts to cut the branch he's gripping in his mouth as a climbing rope, thinking it will encourage him to strike out on his own, and he panics and almost drowns.
* The Aristocats: The scene where Thomas O'Malley scares the milkman so that he, Duchess, and her kittens can sneak onto his truck.
* The Aristocats: The synopsis is given as a worksafe parody of the Aristocrats joke.
* The Aristocats was available in a gift set with an O'Malley plush toy.
* The Aristocats was dubbed into Dutch twice; once in 1980 and again in 2008. There's also an LP dub from 1971.
* The Aristocats, when he explains to Thomas O'Malley about his obsession with Sherry wine.
* The Aristocats when Roquefort the mouse orders Edgar and several cats to stop fighting each other so he can focus on getting Duchess and her kittens out of a crate that's bound for Timbuktu. Once the lock was unlocked, after a few seconds, they resume fighting shortly afterwards.
* The Aristocats, where Renzo Montagnani (a popular actor of that period) voiced O' Malley.
* The Aristocats, which ends when they collide in midair and fall onto the keys.
* The Aristocats while a fight is happening, Roquefort the mouse tries to crack a lock on a chest. He yells for everyone to be quiet so he can concentrate and everyone holds perfectly still. The fight continues the second he unlocks it.
* The Aristocats. While it's not explicitly stated, the fact that she's a single mother and the occasional innuendo hints that she's been around the block a bit.
* The Aristocrat NPC class, which typically represents kings and nobility, seems designed for this. They're automatically given decent weapon and armor proficiencies, an average BAB, a good list of skills and skill points, and the highest starting gold in the game. They're not supremely dangerous, but a first-level aristocrat can definitely hold his own (though, being an
* The Aristocrats: A joke about a family going to see a talent agent and doing a very inappropriate act, which they call 'The Aristocrats'.
* The Aristocrats: A joke where a family goes to a talent agent and does a very obscene act, which they call 'The Aristocrats'.
* The Aristocrats is about the film about the joke. Both have variations.
* The Aristocrats is an inversion of this style of joke. A group of performers (often described as a family) approach an agent to sign up with them and get asked if they can demonstrate their act. The set up then goes on and on, getting more and more elaborate as it describes acts of disgusting and weird behaviour, basically whatever it takes to make the joke's actual audience very uncomfortable, including incest (which is why them being a family matters), coprophilia, animals, and so on. After making your actual audience as disgusted as you can, you get to the fairly simple punchline (which they probably already know, since this is a famous old joke, and the actual entertainment comes from seeing how far you can push the set up). Of course, the agent is in shock at what he just witnessed and asked what they call this act. The entertainers say "The Aristocrats!" (Theoretically the joke is simply that all aristocrats do all this sort of thing all the time.)
* The Aristocrats joke in a sophisticated manner. The punchline itself is sort of an example, with performers of unspeakable acts describing themselves as aristocrats (or in some versions of the joke, "sophisticates").
* The Aristocrats performance being triumphantly named "the Aristocrats".
* The Arithmancer real, but Dementors can devour them, so the hope of seeing loved ones in the next life has a basis, but can also fail.
* The Arithmancer series ends with Hermione proving that surveillance and the internet will eventually make the Statute of Secrecy untenable, and the best option is a controlled reveal. The final chapter reviews the speech that she's about to

give on as many media platforms as possible.
* The Arkanians are aloof, arrogant, and obsessed with politeness, not to mention tall and willowy with
* The Arkansas Chug-a-Bug, the car of Lazy Luke and Blubber Bear, is powered by a steam boiler made from an old-fashioned potbellied stove. One episode reveals that
* The Arkansas Governor's Mansion represented the home of Suzanne Sugarbaker on
* The Ark Encounter, a $149.5 million park sponsored by the Christian creationist organization Answers in Genesis, was drowning in controversy and development hell. Its centerpiece is a full-size replica of Noah's Ark, while later phases called for the addition of models of the Tower of Babel and a first-century middle-eastern village, an aviary, and a motion theater. Announced in 2010 with construction scheduled to start in 2011 and an opening date of 2014, despite funding issues (the project had to be scaled down to $70 million), it was still heavily hyped and promoted by AiG since the announcement. Construction didn't break ground
* "The Ark" ends with the Doctor curing the plague that had infected the Ark and departing in the TARDIS. Then they rematerialise back in the same spot, except now the statue that was meant to take 700 years to complete is finished... and has a Monoid's head.
* The Ark has only four months of life support left for its current population, so the option is quickly raised to "reduce" the population to buy time to repair it. This is rejected only because the person with the authority to make such a decision
* "The Ark in Space" also features a sliding door that almost takes the Fourth Doctor's arm off. "I'm rather attached to it," he said.
* The Ark in Space" also has him wipe the mind of an evil godlike computer using a crown-of-thorns-like device that fries his brain and leaves him unconscious for two days, leaving him to revive on the third day...
* "The Ark in Space", a spacecraft is shown exploding on a viewscreen in silence, a moment which is more effective for the lack of noise.
* "The Ark in Space" complained about the practice, because, as the promo pics were things people could own, it made people remember the effects as being more shoddy than they actually were.
* The Ark in Space" due to flares making the Earth dangerous to live on.
* "The Ark in Space", Harry isn't useful in medical emergencies despite being a Navy doctor, because he "is only qualified to work on sailors".
* The Ark in Space have a very complicated life cycle and figuring out how it works from the limited evidence is crucial to the Doctor's plan to stop them.The monster progenitor is a Queen who travels through space to find a suitable host. Once she finds one, she lays her eggs inside it, and the larva eventually hatches, consumes the host and goes on the move. Through consuming the host, the larva gains its knowledge and some elements of its personality, and it then goes on the move to find further hosts to transform into Wirrn by covering them in slime, causing the resultant creature to have the knowledge of the original host as well as of the further host. As the life cycle continues a "swarm leader" with a huge amount of knowledge is created and is capable of controlling other Wirrn.
* The Ark In Space" have this as a part of their complicated life cycle. The queen parasitises the bodies of other creatures (on their planet, they use non-sapient animals that they farm for the purpose, but humans can be used as well) and their body is converted into a larval Wirrn. This larva eventually becomes a fully-grown Wirrn, inheriting the knowledge of its host.
* "The Ark in Space" have to take place somewhere else in the ship take place in it.
* "The Ark in Space": "Homo sapiens. What an inventive, invincible species. It’s only a few million years since they crawled up out of the mud and learned to walk. Puny, defenceless bipeds. They’ve survived flood, famine and plague. They’ve survived cosmic wars and holocausts. And now, here they are, out among the stars, waiting to begin a new life. Ready to outsit eternity. They’re indomitable."
* "The Ark in Space", Humanity froze itself to wait out an environmental catastrophe.

* "The Ark in Space", in order to make her angry enough to push her way out of the pipe.
* The Ark in Space", Noah finds himself slowly undergoing a horrifying transformation into a Wirrn after being infected by one.
* "The Ark in Space", one of the crew gets infected by the Wirrn, and is turned into one of them. He's also the one that causes the ship to blow up after the Doctor tampered with it, and he theorizes he must've had just enough humanity left in him to resist the Wirrn's hive mind.
* The Ark in Space, only for it to be zapped by a laser beam and returned to him smouldering.
* "The Ark in Space": The Doctor and Rogin, a space technician, need to decide who stays and gets killed when the rocket they're working on blasts off.
* "The Ark in Space": The Doctor is far too masochistic to freak out about directly connecting his brain to a psychic space-wasp eyeball even though this is the most directly dangerous thing he does in the story, but becomes slowly more and more afraid of the Wirrn as he begins to understand more and more what it actually is. As this was still an early story this sets up a clear contrast with his predecessor, who usually got much less scared of the monster the better he understood it.
* "The Ark in Space", the Earth is rendered temporarily uninhabitable by solar flares, and the surviving humans, as well as samples of the animal and plant life, sit it out in suspended animation on a space station. (The station commander even adopts the name "Noah"; his second-in-command tells the Doctor that they know it's not much of a joke, but under the circumstances they were taking their laughs where they could find them.)
* The Ark in Space where, sweating with terror, he slowly takes his hand out of his pocket and sees that it is covered in green bubble wrap. The same story has everyone get menaced by a sort of larva represented by an actor crawling around on the floor in the same green bubble wrap. The story itself is well-written and very spooky, though.
* "The Ark in Space": "Witty little knitter", and a whole scene where the Doctor has to repeatedly chant the word "green" (a word which Baker pronounces strangely).
* The Ark is not only the ultimate Forerunner defence in that it serves as, well, an ark, but also because it provides a remote detonator for any and all of the Halo rings.
* The Ark is the megastructure that both created the Halos and is able to remotely activate all of them, but unlike the Halos, the Ark is located outside the Milky Way galaxy about 262,144 Light-years from the galactic core, in order to act as a safe haven from the Halos effect. It is significantly larger then the Halo rings with a diameter of 127,000 Km, has a factory contained within it that can build new Halos if necessary, and also comes with its own small star that orbits the Ark, rather than the Ark orbiting it.
* The Ark not having enough oxygen to sustain the life of their population is the entire reason that The 100 are sent to the ground.
* The Arknverse and various creators leaving and returning to the franchise over time):
* The Ark of the Covenant apparently doesn't like it when His holy artifact is being kept as a trophy).
* The Ark of the Covenant by one of the Nazi officers) and assume they only need to dress up and say the right words to make the magic box work. They don't die so much because they opened the Ark, but because they did so out of hubris.
* The Ark of the Covenant to touch the Ark did so, God would kill them right there.
* The Ark of Truth dead in space, a Replicator Queen churning out little bugs, while four Ori cruisers take turns shooting it.
* The Ark of Truth of the Ori to the entire priesthood, depriving Adria of the faith and belief that powers her abilities.
* The Ark of Truth. Presumably, if it had played out over the course of a season instead of crammed into a single film, there would have been more believable build-up.

* "The Ark" (original airdate: 1965) was set in the year 10 Million AD.
* The ARK's Eclipse Cannon was capable of destroying a planet with the power of the Chaos Emeralds. It was used twice: first to blow apart half of the moon in
* "The Ark"-stand for the remaining billions of humans and subservient aliens, since a ship that could carry both species in their entirety would've been far too massive to build (or move).
* "The Ark", the Earth is destroyed by the sun going nova, and a spaceship carrying the surviving humans, as well as samples of the animal and plant life, sets out to colonize a distant Earth-like planet.
* The Ark": The Monoids, though they were only treating the humans like they had been treated.
* The Ark. The residents there are the descendants of the few humans who escaped a nuclear Armageddon due to being in space at the time.
* "The Ark", they visited the disease-free far future, and gave the locals their cold.
* The Arlington area of Virginia is the land originally ceded from Virginia to Washington D.C. when the city was being formed, then seceded/given back to Virginia. The rest of the city is looking to do something similar leaving D.C. to be just the region near the National Mall and some surrounding neighborhoods. Whether the city proper becomes
* The Arlington National Cemetery was created in the aftermath of the American Civil War, intentionally invoking this trope: it was built in the backyard of Confederate General Robert E. Lee. It wound up being a bit of
* The Arlong Pirates' fate is left very ambiguous. The anime mistakenly has Arlong accuse Zoro and Sanji of "killing his brethren" after they defeat Hatchan and Kuroobi. A cover story shows Hatchan escaping from the Marine ship that had arrested the Fishmen but the others on the other hand haven't been seen again outside
* The Armadillo with No Heart, all characters are anthropomorphic animals, with the two species that appear in the story (armadillos and hedgehogs) being named, respectively, Dillos and Spinehogs.
* The Armageddon Factor). Because we're not supposed to know what the Doctor's name is, and it definitely isn't just a couple of Greek letters.
* "The Armageddon Factor" his travels will be space-time blind jumps, reasoning that this will help them evade their current enemy, the Black Guardian, as he can't track the Doctor if even the Doctor has no idea where he's going.
* "The Armageddon Factor", it's implied that the Atrians unknowingly managed to wipe out the Zeons very early on in the war, and that the subsequent conflict was engineered by the Shadow simply so that he wouldn't get bored waiting for the Doctor to arrive.
* The Armageddon Factor mission to get the parts of the Key To Time by the White Guardian, is opposed by the Shadow, who was sent by the Black Guardian to get the pieces of the Key.
* "The Armageddon Factor"" speech, but drops the act immediately and reassures Romana that he's perfectly fine and has no delusions of deity.
* The Armageddon Factor", the Marshal of Atrios is another fine example, obsessed with achieving victory in an interplanetary war with Zeos, which has so far devastated Atrios to the point that its surface is virtually uninhabitable due to the radiation fallout.
* The Armageddon Factor" when the Fourth Doctor is disarming a mad supercomputer with the help of its creator — who still doesn't remember which wire is which.
* The Armageddon Inheritance invasion fleet (with a thousand times the number of battleships than the fleet that just attacked Earth) is still coming.
* The Armageddon Inheritance, there are plenty of devastated planets, with nothing but crumbling ruins and computer memory storage that was wiped out when the power failed. But Battle Fleet ships that were put on standby properly can be quickly restored (within weeks for planetoids). "Mother" and its orbital fortresses are fully functional, again thanks to a one-of-a-kind AI. Although nuclear/antimatter/warp warheads that weren't stored properly went off in the

interim.
* The Armaggedon Machine), where Keen can only access the two main bodies of Korath III Base from the bottom (and since both parts have to be explored, he has to fall there twice).
* The ArmaLite company in its original form (the name was later resurrected) only operated from 1956 to 1980, the blink of an eye compared to a lot of firearm manufacturers. However, they designed the AR-15 which would go onto become the basis for the M16, one of the most successful military rifles of all time and the basis for countless civilian spin-offs. They also made the AR-10, another widely successful rifle in the civilian sector and the AR-18, which almost every other assault rifle that is not an AR-15 or AK-47 derivative owes some lineage too. They
* The Armando Iannucci Shows explanations of various jokes, including "My Dog's Got No Nose".
* The Armando Iannucci Shows involved the mortuary owner solemnly informing the bereaved that "We like to do a rodeo theme." Therefore, the eulogy was delivered while riding on the coffin, like one of those mechanical bulls.
* The Arm, and the character has "evolved" into a strange tree-like object.
* The armbands that SG-1 uses in the episode "Upgrades" give increased physical and mental abilities, but impaired judgment and reasoning. Also they could not be removed, but would eventually permanently stop functioning and detach themselves with no lasting addictive effects.
* The Armchair Detective terms, and would hardly be included in a telegram where they could easily say "The War" or "The Great War" with fewer letters. It may not be rock-solid evidence, but it's a good reason to be very skeptical.
* The. Armed human mercenaries have become very deadly assets in the ongoing wars between alien empires. The game writer even lampshades it by pointing out that if the aliens' greatest vice is greed, then humanity's is wrath.
* The Armenian Genocide had somewhat fallen into obscurity at the time, so it worked. Only later was it made more famous once the
* The Armenian Genocide has helped bring attention to an atrocity that might have otherwise been forgotten (at least outside the regions it occurred). Indeed, many people in the new world wouldn't even have heard of Armenia if it wasn't because it was related to an atrocity that somehow keeps Turkey out of the EU.
* The Armenians were basically this after the Turks eliminated them from Turkey (much of modern day Eastern Turkey was their traditional homeland, now populated mostly by Kurds) and the Soviet Union absorbed what was left. That is until the Soviet Union collapsed and they became independent for the first time in nearly a millennium (barring a short two-year stint in the 1920s). The diaspora is still scattered all over the world though. Within Turkey itself there is still a small remnant, mostly in Istanbul and a couple sparsely populated villages elsewhere.
* The armies of Genghis Khan acted as a Depopulation Bomb. His march across Asia left so many villages desolate that forests were able to reclaim massive areas of cultivated land. The regrowth was so large and lasted for so long that it removed an estimated 700 million tons of carbon from the atmosphere, more than any other mass depopulation event in human history. This is equivalent to the amount of carbon released by a year's worth of burning of petroleum.
* The armies of Neverweres and Might-Have-Beens in the Time War are theorized to be people erased by the Time Lords or other nutjobs (see the
* The armies of the CIS are droids. Implacable, able to operate in vacuum, tireless... Too bad that Kyle has a directed EMP gun that he just turned over to the Republic for reverse-engineering.
* The armies of the French Republic included many partisans of the failed popular uprisings in the Republic of the United Provinces of the Netherlands ("Holland") and the Austrian Netherlands (the "Belgian Rebellion") of the 1780s. When the French started to win the war, they annexed, among other things, what is now Belgium and formed the new-style Batavian Republic from the former United Provinces. This was later transformed into a kingdom for Napoleon's brother Louis and in 1810 annexed by France.
* The armies of the French Revolution also had elected officers as did the Union

army for much of the American Civil War. There are many aspects of the Spanish militias which fits this trope, but not having a military hierarchy imitating 17th century monarchist forces is not one of them.
* The Armored Corps, the main division of the army, has subjected its members to magical modifications that allow them to survive a full week without eating or drinking alongside increasing their physical parameters. They're also equipped with the latest of
* The armored tanker from the final chase is heavily reinforced and protected, but doesn't include weapons systems directly, preferring guys with weapons.
* The Armor For Sleep song "Car Underwater" is about the protagonist of the album sitting in a
* The Armor of the Damned is yet another Set artifact. While the stat bonuses from the combined artifacts are nice, the Armor's ability to cast Expert Slow, Curse, Misfortune, and Weakness at the start of each battle is even nicer. While the target could neutralize the debuffs with Expert Cure, the same debuffs also make it less likely they will get the chance to do it.
* The armor of the enemy soldiers as well as Link himself is green for the weakest form, blue for the stronger version, and red for the even stronger version.
* The Armor-Piercing Fin-Stabilizing Discarding-Sabot (APFSDS) round, the standard anti-armor ammunition of the M1 Abrams tank and most other modern
* The armor worn by the Dimensional Guardians in the web fiction serial
* The Armour Of Contempt, a small band of deserters attempt to loot Dalin Criid's "corpse"; when they realize it's not actually a corpse yet, they try to ensure that it becomes one.
* The Armour Of Contempt, the story opens with Drill Sergeant Kexie laying down the law with his stick; a cross between a swagger stick and an officer's baton. He calls it Saroo.
* The Armour of Contempt, when they gather to greet Dalin Criid back from his first day of training, they succeeded in digging up some of Bragg's sacra. When Gaunt arrives to wish Dalin well, he points out that there are regulations about that sort of stuff — so they had better drink it up and get rid of it.
* The armour on the ambulance? It can be electrified, which comes in handy when the mooks attack them in the tunnel.
* The arms dealer Walt buys his first gun from is very professional about the transaction and is actually reluctant to sell the gun to Walt, since Walt is still very much an amateur at that point.
* The Arms Peddler as it it doesn't need food, rest, or need to stop, but it can't move as fast as a living horse, meaning mounted bandits are still a threat.
* The Arms Peddler, if it comes to that. However, it isn't as fast as a regular horse, allowing for chase scenes.
* The Armstrong and Miller Show featured a series of sketches starring two classic style vampires struggling to adapt to a modern world filled with Twilight style vampires.
* The Armstrong and Miller Show has the "Enlightenment with Dennis Lincoln-Park" sketches, in which the title character is repeatedly entrusted with priceless works of art despite being totally accident prone.
* The Armstrong and Miller Show. In one sketch, they sing the praises of Rohypnol.
* The Armstrong and Miller Show involves an accident-prone presenter who continually ends up destroying priceless historical artifacts. Guess what happens in the one where there's a centuries-old tapestry.
* The Armstrong and Miller Show. Several sketches in which a man has a perfectly amicable conversation about some mundane matter, wishes whoever he's been talking to a cheerful goodbye, leans over a desk microphone, and says in his best Bond villain voice, "kill them".
* The Armstrong and Miller Show, there is a sketch wherein a reporter in the Middle East speaks over satellite, while the presenter in the studio uses the delay as an opportunity to accuse him of various unsavoury things.
* The Armstrong and Miller Show where a news reporter is interviewing a prominent scientist about a discovery that "could change science forever!" The conversation

goes something like this:
* The Armstrong family where the father and the mother and the middle children look pretty much the same except for the oldest and
* The Armstrong Nebula is named after a famous astronaut — the first to walk on the moon — and each system is also named after other astronauts famous for firsts. These include Gagarin (first man to orbit) and Tereshkova (first woman in space), but also Vamshi and Grissom. There's also Hong as
* The Armstrongs: "Bullet" Bob Armstrong had four sons who wrestled: Brad, Scott, Steve and Brian (Road Dogg in WWE).
* The Army Chief of Staff is portrayed as a three-star general. During peacetime, the job is always held by someone with four-star rank. (During wartime, it can also be held by a five-star; in the US, such ranks are used only in wartime.)
* The Army Game centres on a group of National Service army conscripts assigned to the Surplus Ordnance Department at Nether Hopping, Staffordshire in Britain's post war years. Billeted in Hut 29, the men are determined to work little and have fun.
* The Army Game. Fortunately, commanding the Surplus Ordnance Department at Nether Hopping, Staffordshire, it is unlikely he will ever have to send men into battle.
* The Army Game, Hut 29 gets like this in its worst moments. In "Enter a Dark Stranger", there are branches and vines growing through the windows and along the wall; piles of dirt on the floor; and Bootsie has a pile of rubbish, including bones and an old tyre, in his bed.
* The Army Game: In "Snudge's Budgie", the boys from Hut 29 have to acquire a budgie to replace Snudge's after Bootsie lets it escape. They invoke this trope by using ventriloquism to make a tea shop owner believe her budgie has suddenly acquired a very foul mouth and offering to dispose of it for her. At the end of the episode, Snudge's real budgie is returned to him by a sailor who captured it, and has been trying to teach it to speak, with the result that it now swears like, well, a sailor.
* The Army Game: In "The Take-Over Bid", Boots is looking at a recruiting poster showing a heroic tanker and reading "The Army Is A Grand Life", and comments that it shows him happily riding around in the open air but doesn't show his little mate: shut up and suffocating down below.
* The Army Game is about a group of conscripts stationed at the Surplus Ordnance Depot at Nether Hopping. The are all very keen to see out their National Service while avoiding anything remotely military and making a little cash on the side.
* The Army Game: Ted Lune, as Pvt. Len Bone, would often read out a letter from his mother. The letter relied heavily on all different kinds of reading-out-loud tropes, and invariably finished with an inversion of this particular one; for example, "Mrs Jones next door has bought six pigs. She keeps them in the back yard and there's an awful smell from your loving mother." This was based on a popular bit from his stand-up routines (see Radio below).
* The Army Game: The show centres on a group of conscripts assigned to the Surplus Ordnance Department at Nether Hopping, Staffordshire. Billeted in Hut 29, the men are determined to work little and have fun.
* The Army Game: When Dooley joins Hut 29, Flogger attempts to convince him that he is a special rank of 'Corporal-Captain', and that Dooley needs to give him a special salute that includes patting his head and waving his hand in front of his face. Dooley adopts the new salute, but is actually playing along for a joke of his own. By the end of the episode, several other servicemen are doing it.
* The Army Game) when Snudge enters. Dooley hurriedly rips the paper from the typewriter and stuffs it in his mouth. Although he doesn't manage to swallow it, the fact it is now slobbered on, combined with Dooley's explanation that it was a racy love letter to his girlfriend, persuades Snudge he doesn't want to read it.
* The army is explicitly a task force made out of a levy of allied political entities with the specific aim of taking down the Doctor. The "Gamma Girl" is from a world that is mentioned as being "Heaven Neutral", making her presence odd since they apparently aren't involved in this conflict. This could mean that most soldiers at this time in history are "clerics", or, possibly, that the conflict with the Doctor is a holy war that all the denominations have agreed upon.

* The Army mule and the Navy goat. These sports mascots date back at least 100 years, and other college teams had mascots as well, such as the Yale bulldog and "Bucky Badger".
* The Army, Navy, and Air Force run Reserve Officer Training Corps programs at civilian universities around the country. The majority of the Cadets/Midshipmen at these units have scholarships granted by the armed services, allowing them to both attend prestigious universities at no/low cost and have a guaranteed job as an officer upon graduation.
* The army of Atlas, the Crimson Lance, is well-trained and highly disciplined as well, but
* The Army-Stormtroopers rivalry is eventually also played straight, as Palpatine's favor for the latter meant a progressive reduction in numbers of the former and a degradation of general skills for the latter. By the time of
* The army used dual-wielding quite a lot. Their sword Hwando were shorter than Japanese Katanas, but it meant they were easy to wield with one hand. One popular technique was dual-wielding swords that varied slightly in length, first striking with the shorter sword, than finishing the attack with longer one. Even if the first strike missed, the enemy would not expect the other sword to be much longer and be caught in surprise. They even went as far as to employ
* The Arn, the creators of the Hork-Bajir, became this when they failed to realize that making themselves useless as hosts wouldn't make the Yeerks leave them alone; they'd just get used for target practice. Eventually they're reduced to
* the Arn, the species which genetically engineered the trees to revive the planet after the meteor strike, and then made the Hork-Bajir to tend to them.
* The Arockalpyse starts with with a news report where at least two reporters in the field are killed by invading demons while talking to the news anchor.
* the ARPANET itself, having mysteriously gained sentience and come back online.
* The Arquillian message displays a timer labeled "Earth Time Remaining", counting down the hour. This is a justified example, as the hour time limit was added by the MIB's translators after being inferred from Arquillian SOP — one warning shot, then the target gets a "galactic standard week" to comply or be destroyed.
* The Arquillian prince known as Rosenberg is a diamond merchant, but most of his species apparently thinks diamonds are only good for amusing children (or possibly
* The Arrancar all wear black-trimmed white jackets with high collars, but in a whole range of different styles. Some much sillier than others (I'm looking at you, Aaroniero).
* The Arrancar Arc spanned chapters 183-423, four publication years and an additional four anime years.
* The Arrancar Army was Aizen's attempt to create an army that could rival the strength of the Gotei 13. Several of the highest-ranking Espada couldn't be fought by individual captains and the shinigami had to team up to take them on.
* The Arrangement (2017) centers around the Institute of the Higher Mind. The titular arrangement is the marriage of IHM member and superstar movie actor Kyle West and unknown actress Megan Morrison.
* The Arrangement is a webcomic where Ganondorf and Princess Zelda are arranged to be married. This is done in hopes that Ganondorf won't be tainted by Demise. The arrangement starts when Ganondorf is five (and Zelda is only a few years older than him), but they aren't due to get married until Ganondorf comes of age.
* The arrest of Robert Seacat to cover the family's living expenses for a few weeks, but deny any fault in having destroyed the house. The Lechs tried to sue under the Takings clause of the constitution, which requires the government to pay for any property taken from citizens for whatever reason. The court ruled that the police had not officially taken the property before destroying it, and the Lechs only got around half the amount required to rebuild the house, and nothing to cover legal fees.
* The Arrival: Aliens are causing global warming in order to kill off humans and make the planet more comfortable for their kind. When confronted, one of them points out that humans are doing the same exact thing, only much slower. The aliens are simply speeding up the process.

* "The Arrival". An airliner lands at an airfield. When the airfield personnel go to unload it, the plane is completely empty of people: no pilots, no passengers.
* The Arrival by Shaun Tan, is a beautifully illustrated graphic novel. With heavy emphasis on the "graphic" part. As in, there are NO recognizeable letters or words anywhere within the body of the story.
* The Arrival is due to aliens seeking to kill off humanity and make Earth more like their planet. One of the aliens remarks that humans don't deserve Earth. We're already killing ourselves off, they're merely speeding up the process.
* The arrival of an alien solar sail vessel in a human colonized system in
* The Arrival: The main character starts the film driving a junked-up 1968 Saab V4 station wagon. He uses it to ram the gate of a radio station and discards it without a second glance.
* The Arrival use some sort of black hole generator to destroy evidence.
* The Arrival, Zane Zaminsky is about to be discovered by guards so he takes the risk of stepping into the device they use to disguise themselves as humans. It creates a whole new body for him that gets him past the guards, but unfortunately Zane doesn't speak the aliens' language, so when one tries to speak to him a short time later he has to fight his way out.
* The Arrogant Worms, appropriately enough, have "Song Inside My Head" which is both an Ear Worm and about an Ear Worm. They even include the basic melody recorded in several different musical styles.
* The Arrogant Worms' "Don't Go Into Politics" cites various deceased figures of political, scientific, and entertainment history as proof that going into such fields means you'll end up dead. Recounting the names of numerous dead musicians, they add the corollary: "Well, we're not so sure about Elvis..."
* The Arrogant Worms' first album included a send-up of advertisements that shamelessly boast of their incredible deals with "No Sale / No Store".
* The Arrogant Worms have an album called Christmas Turkey, which is loaded with similarly dark-humored mayhem.
* The Arrogant Worms is pretty well-known in Canada (and pretty much anthemic in Saskatchewan), but the rock cover by Captain Tractor (i.e. the one with the flute solo) is the one most people think of. The Worms are better known overall, leading many to mistake the cover version for their own.
* The Arrogant Worms ≠ Three Dead Trolls in a Baggie. Both are Canadian musical comedy acts, but since the former is better known, the latter's songs (like The War of 1812 and Toronto Sucks) are often misattributed to them.
* The Arrogant Worms's "Johnny Came Home Headless", about a tall and forgetful man who walked into doorways so often that one time apparently knocked his head off — and his body didn't notice.
* The Arrogant Worms' song "Don't Go Into Politics" recommends that audiences avoid the fields of politics, science, and music. To support their argument, it points out that people like George Washington, Albert Einstein, and Leonard Bernstein did so, and they're all dead.
* The Arrogant Worms wrote the weird context "Log Into You," about a computer geek with pick-up lines like
* The Arrows Trilogy. When Talia finds out one of her mentors is lesbian, it doesn't bother her because it's not uncommon for underwives to be "special friends".
* "The Arsenal of Freedom" has Geordi in command, and puts him in conflict with the more senior Chief Engineer Logan. When Logan tries to pull rank, Geordi states that he is in command until he is relieved by either Captain Picard or Commander Riker. This is
* The Arsenal of Freedom". Unfortunately, the automated salesman they created to help sell it wouldn't take no for an answer and destroyed their civilization as a product demonstration.
* The Arsenal Stadium Mystery is a murder mystery set at the home of the Arsenal Football Club. The backdrop is a friendly match between Arsenal and The Trojans, a fictitious amateur side; one of the Trojans' players drops dead during the match, and when it is revealed he has been poisoned.

* The Arsenio Hall Show announcer Burton Richardson's claim to fame is announcing him as "ARSENIOOO

seneschal of Camelot's castle.
* the article about New Jersey's infamous, which has often been described as the funniest on the site. The combination of the outrageous-yet-true (and sourced) facts about this dangerous yet fun amusement park and their necessarily dry house style yields such gems as:
* The article actually has an explanation for the whole black-and-white thing now, albeit a purposefully utterly absurd
* The article also cites an interview with a Dr. Jack Shepard. That's the name of a character on
* The article also mentions that "Evagora says the mentor relationship Elnor has with Picard on the series mirrors his own interactions with Patrick Stewart on set."
* The article on African Currency has this line to start off the second paragraph: "In pre-colonial times African currency included shells, ingots, arrowheads, iron, human beings, salt, cattle, goats, blankets, axes, beads, and many others." What doesn't belong?
* The Articles of Confederation are this to the American government as a whole. Early Americans' fear of centralized government were borne true in the Articles, and the interstate squabbling that entailed caused it to fail. The Constitution replaced it, with a stronger central government. By extension, this is why
* The Articles of Confederation basically left printing money to the individual states; the Continental Congress issued its own currency too. Nobody, however, printed anything
* The article's opening quote refers to one of the seminal canon works of Willa Cather, one of the most prominent female authors of the first half of the 20th century (one of her others,
* The Artifact: A character who remains on the show even though the series has gone through changes rendering their original role obsolete.
* The Artifact: All Brotherhood ships are cybernetically "alive", Boaz has even managed to become self-aware.
* The Artifact: A story element or character that is no longer important to the plot, but it's still there.
* The Artifact at the end of the episode and the other being freed from it before the power could grow too great.
* The Artifact: It's still there, but do we need it now in the continuity?
* The artifact known as the Acorn of Wo Mai holds an evil demigod called the Copper Tyrant of Tros that will try to trick anyone possessing the Acorn into letting it loose.
* The Artifact. Now, we have smartphones, where thumb-typing and predictive text benefit significantly from the next letter usually being on the other side of the board.
* The Artifact of Timothy Leary's Reading Glasses, which make the world so "not boring" that you never want to take them off. McPherson makes copies of Leary's glasses that feature a toned-down version of the trippy LSD-like effects and additionally allow the wearer to see hidden messages that would otherwise be hidden.
* The Artifact or try to have it covered with something newer and more elaborate.
* The artifacts that the cyborgs were made from, and therefore by extension Lila herself, are physical expressions of it.
* The "artifact transformations" — some artifacts gradually transform their users into "the proper owner" image — physically, mentally or both.
* The Artificer class specializes in creating magic items and altering their effects. While they cannot cast spells themselves, they can replicate the effects of just about any spell in the game by "infusing" an object to turn it into a temporary wand keyed to that spell.
* The artificial gravity is given a mention in one episode, where Kaylee explains that it sometimes gets interference with a planet's gravity when the ship hits the atmosphere.
* The artificial gravity is provided by adjustable "grav plating". But it's

difficult to match up the gravity fields of docked ships, so the docking tube (equivalent of a gangplank) is null-
* The Artificial Super Intelligence of C.A.R and the Awooga self-driving cars of
* The artificial sweetener Aspartame (which you might see under trade names NutraSweet (tm) or Equal (tm).) One enantiomer tastes sweet (sweeter than sugar, in fact), and the other tastes bitter. (This is why diet sodas can taste "off" to some people.) Also worth noting that citric acid reverses the bitter enantiomer into the sweet one.
* The artificial sweetener sucralose (Splenda) is made by chlorinating regular sucrose, thus replacing three of the hydroxyl groups with chlorine. This discovery was made possible because someone misheard an instruction from their superior; they thought their boss told them to
* The Artist, after which a visibly unsettled George walks off the set. In the film's screenplay, this is actually pointed to as the precise moment where the two fall in love.
* The Artist And The Machine has Art, a magical girl. She is not happy about this at all.
* The Artist And The Machine has Mech, a robot who becomes friends with a magical girl.
* The Artist And The Machine is about a magical girl befriending a robot sent to kill her.
* The Artist, despite her being the clear female lead. Inverted, however, at the BAFTA and César Awards, which both nominated her in the Best Actress field.
* The artist did it again in early 2012, with a "Municipal City" series, centered on Commander Marvel, that is supposedly fragments of a long-lost 1950s newspaper comic.
* The Artist, downtrodden hero George Valentin, in the depths of his despair, screams at his shadow from the light of a movie projector. The shadow turns and walks away.
* The Artist features an array of anachronistic and stylistically questionable type treatments. Some of these are deliberate to evoke the silent-film era rather than copy it.
* The Artist formerly known as Captain Marvel is the World's Mightiest Mortal or The Big Red Cheese.
* The Artist, George draws one on Peppy, telling her she needs something to make her stand out if she wants to be famous. It works almost too well.
* The Artist George Valentin, in refusing to do 'talkies', claims in an interview that he is, in fact, 'an Artist', and that silent acting requires artistry, while sound will actually degrade the medium. He's wrong, of course, but the film itself pays tribute to that artistry.
* The Artistic License is internally inconsistent (e.g. it's established cops in said
* The Artistic License is so inaccurate and jarring that it doesn't even make sense
* The Artist is a huge tribute to silent films, as well as Hitchcock, Ford, and other early black-and-white filmmakers.
* The Artist — Jean Dujardin, best known for spy parody films, plays silent film star George Valentin.
* The Artist. Peppy drops her autograph book, ducks under a cop's arm to retrieve it and stumbles right into George, touching off both their relationship and her career at the same time.
* The Artist score, the film is now considered as overrated and not the best film of the year by some people.
* The artists in the New Romantic genre OWN this trope, particularly
* The "artists prefer Apple" trend comes largely from a difference in how Apple monitors worked, showing colors much closer to the final printed product (color filters that could be attached to the screen for other brands were available but clunky). This hasn't really been relevant for some time, however.
* The Artist star, sees his career in ruins after the advent of sound cinema. In

the end, after many trials and tribulation, he returns to acting once again.
* The Artist, which may explain earlier reluctance to appear in talkies.
* The Artix Entertainment examples, aside from AQ worlds, could best be summed up by this: You "buy" the game once, you have access to everything, but you can still get a currency faster by paying for it.
* The Art of Arrow Cutting. Mage is up against murder charges, but Charles uses the power of the talisman to win enough money in Vegas to post bail. The evidence against Mage was fairly circumstantial to start with, and he manages to fake his own death before his trial comes up.
* The Art of Being Normal has been in love with Zachary Olsen for ten years ago when she was four.
* The Art of Being Normal, Kate is a closeted transgender girl who is mistaken for a gay boy by most people.
* The Art of Coarse Acting but is actually a mix of how-to guide and memoir about amateur dramatics. Getting a professional in to help because he or she happens to live locally is a stressful and not especially beneficial prospect for all concerned.
* The Art of Coarse Acting by Michael Green, the author relates how he was in a play where the set designer had the idea of using three pieces of mobile scenery, made up of flats joined into a triangle on wheels, with an operator in the middle to spin or move the arrangement when required for a scene change. Things went well until Michael Green, who was one of the operators, got disoriented during a black-out and nearly wandered off the stage, stopping only when he heard a terrifying shriek and the sound of the audience fleeing the front row.
* The Art Of Coarse Acting: While playing the Reverend Henry in "Pride at Southanger Park", Aaron has his script hidden inside his bible. While reading, the breaks result in him continually insulting the character of Cecily:
* The Art of Computer Programming as an example of a question with a difficulty of "M50" (50 being the maximum, with the M standing for "special mathematical knowledge required"). After Wiles published his proof, Knuth promptly changed it to "M45" in the second edition.
* The Art of Computer Programming was started in 1962 (which may as well be the Bronze Age as far as computer programming is concerned) and not all the volumes are out yet. Initially not helped by Knuth deciding to create a typesetting system from scratch after the reissue of the first volume in 1977. He began development of the typesetting system (called TeX) in 1978, and it ended up in its own development hell as well, the input format not being finalized until 1989.
* The Art Of Kung Fu Panda goes into some of the history of the world, such as how Master Oogway came to the Valley Of Peace and why most of its residents are pigs, geese, and rabbits. Both this and the animated shorts also show off a few important locations that never appeared in the films, as well as revealing the backstories of some of the major characters.
* The Art of Manliness acknowledges this is often true and seeks to teach men how to be a little more clean cut (in other words, defy this trope)
* The Art of Manliness as nice as they think they are, in addition to being passive-aggressive and too insecure with themselves to be honest with how they feel.
* The Art of Manliness recognizes and deconstructs this trope. It gives advice to men about what it means to be masculine/badass while deflating some of the more immature ideas some have about being manly.
* The Art of Manliness seeks to avert this and is centered around the idea of men trying to be more cultured, among many other tropes once associated with manliness.
* The Art of Monsters is designed as a "reverse" Pygmalion story, where a monstrous creature who has been civilized (sort of) by a mountain hermit tries to return the favour. It doesn't end well..
* The Art Of Noise Theme opens with a dingy private detective in a dingy bar. The barman has several goes at sliding him a drink, which he misses every time.
* The Art of Racing in the Rain (who would later get acquired by Disney during production) picked it up with Mortiz remaining on board; filming began on May 2018,

and it's set to be released on September 2019.
* The Art of Self-Defense is constantly belittled by Sensei and the dojo for simply being a woman. As a part of her backstory, the only reason she was given her own changing room as the dojo's only female student is because she was attacked from behind after the men were done changing and showed no mercy against her assailant.
* The Art of Self-Defense, Sensei is a smooth talker and incredible schemer, but requires a calculator to perform simple math.
* The Art of Self-Defense Thomas (Steven Terada) out of rage at not being promoted to black belt.
* The Art of Self Defense tries his hand at shadow boxing — and has his butt handed to him by his own shadow.
* The Art of Self-Defense woman-hater archetype without question, refusing to promote the dojo's best student to a black belt simply because she's not a man.
* "The Art of Stealing" has Skunk steal a magic crystal, which Rabbit tells him that it’s a bad thing since it’s a source of Dragon’s power and threatens to tell Panda about it if he doesn’t act as his servant. When Panda finds out about the crystal, he congratulates Skunk for the exact reason Rabbit told him.
* The art of Stranski (the working name of Lorenzo Etherington), and his guides on how to draw, and how to tell stories with art. Ruined jungle temples, ukelele wielding catgirls, tiki idols, dragon ladies, stoic lion men, more or less realistic period vehicles. Mostly found online or in galleries but some very limited editions were published on Kickstarter.
* The Art of the Deal at a time when he was facing a high mortgage as his family was growing.
* The Art of, the evil Emperor Zurg is actually a miniature alien in a suit of armor.
* The Art of Theft, Trilby escapes via smoke bomb if he fails or quits a level.
* The Art of the Steal are supposed to have a code that makes them better than the thugs and gangsters of the world and how it may be horseshit:
* The Art of the Steal centres around a plan to heist the Gospel of St. John from a high-security customs warehouse.
* The Art of the Steal: Crunch Calhoun's given name is Dennis. He keeps telling Uncle Paddy—the only character who does address him as that—to stop calling him that, although no reason is given for his dislike of the name.
* The Art of the Steal, Crunch demonstrates his plan for the smash-and-grab raid on the border station using toys as props, before Nicky points out all the reasons it won't work.
* The Art of the Steal) involves smuggling Francie into the warehouse inside some kind of container, with him getting out with three minutes oxygen to spare. Nicky shoots this plan down, but does implement a Trojan horse in an altered form: getting Canadian Customs to bring the forged Gospel into the warehouse by concealing it in a 4 ft. sculpture of a vagina.
* The Art of the Steal is called 'the Reverend' and dresses like a priest, including a clerical collar. However, there is no evidence that he is actually a minister of religion.
* The Art of the Steal. Nicky stops him and outlines all of the reasons why this won't work.
* The Art of the Steal: On being told that Bick is an Interpol agent, Francie's reaction is an an incredulous "Interpol's real?!"
* The Art of the Steal on motorcycles follow. Crunch rides along the inside of the train and out a set of doors just before they close. One of the cops manages to follow, but the second is too slow and is stuck on the train as it pulls out.
* The Art of the Steal opens with Crunch being released from a Polish prison after serving a 7 year sentence.
* The Art of the Steal: The scenes set in Warsaw were actually shot in Budapest. Unfornately, several Budapest landmarks and Romanian flags are clearly visible in these scenes. Bucharest also briefly doubles for Amsterdam, but this scene is so brief that it could have been in any European city.

* The Art of Tom & Jerry: Volume II shorts Bill Hanna and Joe Barbera directed at MGM.
* The Art of War (2000). A triad gangster turns up the stereo before torturing a female agent for information.
* The Art of War (2000). Wesley Snipes' character is checking out a Triad hangout when the police raid it. He apparently evades them, but a black FBI agent starts moving in the same direction he did, gun at the ready. Later one of the perps is getting in the face of several officers when that same agent appears, slams the man's head into the table, then hauls him outside to the amusement of the officers. It turns out to be Wes wearing the FBI man's cap and raid jacket.
* The Art of War actually have the authority to do any of the things it does in the film.
* The Art of War basically spends thirteen chapters explaining how to be this and how important it is for generals and tacticians to do so. Its central ethos can be summed up in one quote: "the Way of War is a Way of Deception". Flank attacks, proxy conflicts, fake peace talks to buy time, striking unexpected targets, feints, false indicators of ambushes, double agents, bribed enemy officials — to Sun Tzu, these were as important to a general as a hammer and saw to a carpenter.
* The Art of War divide: before he wrote his treatise, Sun was a general who fought and won several wars, while Miyamoto was originally a common foot soldier eventually rising to a junior officer rank. Conceptually both are firmly on the "Soldier" side.
* The Art of War. His favored tactic - which the annotations also ascribe to other great generals - was to ignore the bureaucracy, and if the bureaucrat became too obstructive, execute him.
* The Art Of War. Instead, he advises leaving an apparent escape route to encourage flight. A fleeing enemy is easier to kill, after all.
* The Art of War. It was hidden behind a mirror in the apartment of the one comrade who didn't betray him.
* The Art of War, Neil Shaw realises a bomb has been planted in a cafeteria by someone who's just walked out. He drives his vehicle straight into it rather than waste time jumping out of his car.
* The Art of War, on the other hand, is encouraged; having soldiers that are willing to die for you has its benefits.
* The Art of War, probably by Sūn Zǐ (also spelled Sun Tzu).
* The Art of War's magnum opus on military science, quoting from it directly on several songs.
* The Art of War (Sun Tzu) advocates this practice as a way to keep an army supplied while simultaneously weakening the enemy. Doesn't say much about rape, though.
* The Art of War (Sun Tzu): Sun Tzu advises the reader never to lead his army through a swamp, because that's the best place for the enemy to lay an ambush.
* The Art of War, the oldest tactical and strategic manual in existence, includes chapters on how to use terrain to best military advantage.
* The Art of War, the U.N. building is apparently manned by one security guard.
* The Art of War to meet Shaw after a silenced shot cuts the umbrella shaft in two. There's also a silent version when the heroine is trying to sneak out of a building, but the hitman is in the security room watching her, and activates an escalator just as she's about to step on it.
* The Art of War when a cop reads out a list of phone numbers, all beginning with this trope.
* The Art of War. When it passes, he's nowhere to be seen, until it's revealed he escaped by grabbing onto the undercarriage.
* The Art of War (with exceptions, of course). Thus the discouragement of such tactics.
* The Artorias of The Abyss DLC adds the Guardian Tail as a whip. The Guardian in question happens to be a very lethal lightning-spitting manticore. Its scorpion tail, when cut, forms the whip. Yes, you are essentially swinging a poisonous scorpion tail around as a whip.

* The art shifts are lampshaded in a scene where Doc Scratch demands that the Handmaid "render [her]self in a more symbolic manner", forcing her from Hero Mode to Sprite Mode.
* The Arts of Dark and Light a mixed region in between. At the same time, while some racial types are clearly predominant in some regions, the boundaries aren't clear-cut, and there is a range of traits across the whole continent—for example, even in Amorr proper there are some blonds and redheads, though they are much less common there than in the northern lands.
* The Arts of Dark and Light, and manipulate international politics in order to secretly steer the mortal states in certain directions as part of a grand occult design.
* The Arts of Dark and Light a trained reserve officer pilot who can fight if she has to, whether with weapons or magic.
* The Arts of Dark and Light, but gather their recruits exclusively from children born with the gift of seeing magic (without being magic-users themselves).
* The Arts of Dark and Light. Despite being only a relatively junior officer, Marcus finds himself in charge of the beleaguered 17th Legion after its commanding general and most of the rest of the staff are assassinated by enemy agents.
* The Arts of Dark and Light doesn't make people there more accepting of the sorceress Caitlys, either. Since the series is still ongoing, their ultimate fate remains unresolved thus far.
* The Arts of Dark and Light features a fantasy world with a long history, multiple cultures and myths and special attention paid to religion.
* The Arts of Dark and Light follows what appears to be the downfall of the once great Amorran Republic, and certainly that of one of its foremost champions, General Sextus Valerius Corvus, as he struggles to preserve it.
* The Arts of Dark and Light for renewed conflict with the elf-kingdom Elebrion.
* The Arts of Dark and Light from the elven kingdom, and is introduced to the protagonist Marcus more or less when she saves him from assassins trying to sabotage the diplomatic mission he is accompanying.
* The Arts of Dark and Light from the war and the heavy losses they suffered, led to the increasing decline of their surviving kingdoms.
* The Arts of Dark and Light has plenty of regular warriors, but also some who fit this type better:
* The Arts of Dark and Light have the gift of detecting magic, so that they can more easily combat it. This is called the Fifth Eye, and manifests as them seeing auras around wizards and magical artifacts, whose colors and brightness depend on the type and magnitude of the magic.
* The Arts of Dark and Light in Elebrion's air force. Much of her plot arc concerns military actions when her country is invaded.
* The Arts of Dark and Light life when he is attacked by traitors among the guards. This brings her to his attention and ensures a relatively more sympathetic hearing for her embassy.
* The Arts of Dark and Light maintains both religious military orders and a more prosaic security force of church soldiers to protect its properties and interests, entirely separate from the Republic's secular chain of command. This becomes significant in the civil war, when the Republic's government (and civilian control of the military) starts to break down.
* The Arts of Dark and Light, much like the less powerful angels and demons they summon in their own experiments—interesting to study and potentially useful or even dangerous, but not an omnipotent cosmic power or cause for existential crises.
* The Arts of Dark and Light off the military contracts and plunder the war will generate.
* The Arts of Dark and Light of very skilled but far less bloodthirsty, mostly part-time citizen soldiers.
* The Arts of Dark and Light Savondir doesn't, as yet, but there are hints that their state wizards are trying to replicate either or both of the processes.
* The Arts of Dark and Light, Sextus Valerius Corvus has become a successful

general because he realizes that proper planning, intelligence and deployment are the keys to winning a campaign, and is good at the same. He isn't useless or a coward in a more direct fight, but his true talent lies in directing larger wars. Corvus also thinks this is true of the younger protagonist Marcus as an officer: though he will never be the greatest warrior in single combat, he is already an excellent tactician, and appears to have the potential to be a great strategist.
* The Arts of Dark and Light the legion he is deployed to is assigned to fight.
* The Arts of Dark and Light: Theoretical science in Selenoth is advanced enough that an equivalent of Darwinian theory has emerged, aided perhaps by magical experimentation. In Savondir, this is part of the state's ideology, to the point that it sponsors eugenics programs.
* The Arts of Dark and Light. They never really recovered, and now only three of the seven elvish kingdoms remain — and those are in steady decline as they fall further behind the rapidly multiplying humans and "subhumans" (goblins, trolls, etc) in demographic terms. The elves themselves are well aware of their problems, but no political authority is powerful enough to impose the radical (and hence, unpopular) changes that would be needed for a national rebirth. Instead, things slowly continue to grow ever worse, and individual elves react with anything from indifference to hedonism and apathy to despair.
* The Arts of Dark and Light, this would apply to Elebrion, and presumably also the other elvish kingdoms. They field small numbers and little or no heavy infantry, but every long-lived elf soldier is trained to an extremely high standard by human reckoning, and they also make heavy use of magic and their air corps as force multipliers.
* The Arts of Dark and Light, though, from Latin-Mediterranean types to stocky Bavarian/Swiss analogues, gingers and Tacitus-inspired blond and blue-eyed Nordics.
* The Arts of Dark and Light uses creepy magic to appear as an attractive woman and lure men.
* The Arts of Dark and Light whenever afforded the opportunity. To be fair, he is called out on this several times, and tries to talk more normally as a result.
* The Arts of Dark and Light, where he serves on active duty as an officer and deals more proactively with the dangers he faces.
* The Arts of Dark and Light, which is (rightly or not) feared as the exclusive tool of the dark powers. The ban is enforced by both religious and secular authorities, but in particular by a special order of Templar-like church knights, the Order of Saint Michael.
* The Arts of Dark and Light, who hold firm against their mass tactics. At one point, it's suggested that this is at least in part a self-reinforcing stereotype: since the goblin soldiers know that their commanders treat them as expendable, it makes good sense that their morale is low.
* The Arts of Dark and Light works. They literally cannot be destroyed, at least not by any means available to humans (including magic)—even burning them, grinding the ashes and scattering the dust only means it takes them a little longer to reassemble.
* The Arts of Dark and Light, young noblewoman Severa ends up in an arranged marriage to shore up her family's relations with another noble house as a civil war draws nigh. Fortunately, it turns out that her husband is not that much older than herself, and they get along rather well once they get to know each other.
* the art style of the series many fans often believe that pale-skinned characters (Toph and Aang, for example) are white.
* The art style shifts about in more subtle ways throughout the series, complementing the characters' delusions and breakdowns.
* The art style usually doesn't allow for eye colors at all, but the infamous "abandoned house" sequence (beginning
* The art teacher is asked to explain the "Humans and Nature" project to the class. After
* The Artushof Berklinger tries to avoid his daughter getting married by dressing her up as his son instead.
* The Artushof Traugott makes this a habit. He does not get Christina (the girl he

was engaged to) because he wants Felizitas. He quests for her after her father kicks him out of the house, and manages to attract Dorina, the daughter of another painter he stays with, but when he won't marry her, he gets kicked out. When he gets home after not getting two girls he finds out Felizitas got married to another man. Three strikes and you're out.
* The artwork of Ivan Seal often features shapes that seem like normal objects or people...but miscolored, taken from odd perspectives, and having all the details erased until they look like
* The artwork of Jeff Koons has tried to bridge the gap between art and kitsch, by making statues of everyday kitsch objects and exposing them in a museum. This polarized many art critics who feel it is either a postmodern subversion of kitsch, while others say it’s just the same thing.
* The Arwing has a different design in every game it's featured in. Only in
* The Aryan Brotherhood's leaders, despite all serving multiple life sentences and held in the ADX Supermax (the most secure US prison that exists) while kept on lockdown 23 hours per day inside their solitary cells,
* The Asari also frequently exhibit this attitude, acting like they are the most enlightened species in the galaxy, and controlling galaxy politics as such. However, this attitude falls flat on its face when it's revealed in the 3rd game that
* The asari are considered the most advanced race in the galaxy, and their ships are clearly built to impress. On top of being huge and blue-grey in color, their hulls are smooth and covered in blue lights, making them instantly-identifiable among a fleet of Citadel ships.
* The Asari are heavily based on the Ancient Greeks: city-states, a pantheon of varied gods, advanced technology compared to other civilizations, democratic governance rather than a republic, a
* The asari are said to be the foremost exporters of culture among the species of the known galaxy. It also works the other way round; at one point, we hear that the elcor plan to stage a production of
* The Asari are said to be this to the Turians. For the uninitiated, Asari are incredibly few in number due to...
* The asari are the most advanced of the Citadel races. In the third game, we find out that
* The asari are the oldest spacefaring species that's still around and they're all biotic. Tali
* The asari, being an all-female race, occasionally cause some issues from terms that almost-but-not-quite translate. Most prominently the parent who doesn't give birth is always called the 'father'.
* The asari characters in multiplayer use this as their dodge ability. It's faster to perform than other dodge moves and can move the character dramatically further. Unfortunately, it will also drain a small amount of your shields every time you do it (or delay your shield regeneration if your shields are already at zero).
* The Asari colony of Lesuss can also be considered a type of penal colony, as it holds an Ardat-Yakshi Monastery where asari who suffer from the Ardat-Yakshi genetic disorder are forced to live, usually against their will. The planetary description even mentions how strange is it for the asari to continue to maintain a small colony there, despite Lesuss being on the lower scale of habitability. It also notes that the colony only has a couple thousad inhabitants in a few remote locations and how everything about the colony is classified to the rest of asari society.
* The Asari Diaspora which begins after the Mekon War is partly a result of progressive Asari getting sick of the stagnation brought about by the ruling conservative-minded Matriarchs, and leaving the Republics for more open-minded polities.
* The Asari example goes even deeper when it's revealed they possessed
* The Asari got a massive boost from the Protheans in the past when they began uplifting the primitive asari by teaching them the basics of civilization such as mathematics and argirculture, as well as genetically augmenting the asari to have

natural biotic abilities and leaving them a Prothean Beacon to help boost their technological progression. All of this allowed the asari to become the first spacefaring species following the Porthean extinction and go on to more or less become the dominant race of the Galaxy, thanks to being the first to rediscover the Citadel and being the founders and leaders of the Galactic Council.
* The asari have a rough equivalent to the paladin in the form of Justicars. They are
* The asari homeworld Thessia also falls fairly quickly once the Reapers themselves get involved; it has a longer resistance to husks, many which die instantly to any directed force attack, because the entire asari population is biotic. Of course, the Reapers are devastating forces of destruction, they're there en masse, and asari culture isn't very military-oriented to begin with; the turian homeworld Palaven, held by a race who consider military service to be a
* The Asari kinda-sorta fit the trope, due to their immense age and wisdom, and are held in very high regard by virtually every other species (
* The asari race as a whole is subjected to this. They are an all female pansexual race that prefers to mate with members of other species and are open about their sexuality. Many asari “maidens” (young adults) even take jobs as strippers or dancers in bars for a few centuries, before settling down to raise children. This has created a galaxy-wide stereotype of the asari being promiscuous nymphomaniacs. The asari as a whole downplay this - except when it strategically suits them. The only asari who are promiscuous nymphos are the vampiric Ardat Yakshi serial killers, who are a source of great shame for all asari.
* The asari themselves are this trope, as they can produce an offspring with any other species. Though they can mate with one another, doing so is very taboo, as the resulting offspring have a small chance of manifesting a
* The asari, who live for one thousand years, don't seem to have a problem with this trope. They happily breed all they want to. On the other hand, in order to become pregnant, the asari has to be consciously trying to become pregnant. They can have sex all they want and only reproduce when they have a desire to. The asari, of course, are an entire race of
* Thea's boyfriend takes her to a suburban vacation, Thea falling asleep during the ride. She feels something is off when the skies are so bright and clear and the suburb immaculate. However, she soon realizes that the background sounds end up looping with birds chirping and a dog barking in a perfect sequence over and over. It leads her to discover that the "suburb" is an underground chamber set up by HIVE for survivors of the nuclear war they plan to set off.
* The Ascendant Kingdoms Saga is not the first time, due to it requiring magic to be anchored to mortal or vampire bloodlines, which can be severed. There's no apparent set period but the last time happened about four hundred years before the start of the series, and some of the vampire characters were around for it.
* The Ascendant Kingdoms Saga of something done for purely military reasons.
* The Ascendant Kingdoms Saga, since the really heinous criminals are usually executed rather than transported.
* The Ascended are presented as essentially souped-up ghosts, with the result that Dean can wound Chaya Sar by stabbing her hand with an iron knife, and
* The ascended beings are sorta stand-ins for angelic beings: clad in white, all-knowing and infuriatingly self-satisfied. Occasionally one of them will get around their own
* The Ascended keep an informal Masquerade within the junctures they control (1850 and the contemporary juncture) in
* The Ascension's Titantron entrance video is Illuminati-associated symbolism, though it's not directly related to their characters. Ricardo Rodriguez, who was initially their manager in FCW before they gained their dark image, has stated that the "talent agency" gimmick was meant to be Illuminati.
* The Ascension. Their popularity plummeted afterwards and they were ultimate let go in 2019.
* The Ascent and ends the film a hollow wreck of a man. This is made overt when the collaborator is even called "Judas" by the villagers after he helped lead his old

friend to execution.
* The Ascent is made up to look like a film from the 1940s, with its World War II setting, uses of Academy ratio (an aspect ratio long disused by then) and black and white cinematography.
* The Ascent," Odo and Quark have to climb a mountain to set up a rescue signal after they're stranded on an uninhabited planet. Odo, who is trapped in solid form at this point of the series, breaks his leg in a fall, so Quark rigs up a stretcher to drag him on. Odo castigates Quark for what he thinks is a pointlessly noble gesture, but Quark sets him straight: he's bringing Odo along so he can eat him if he dies.
* "The Ascent of Man" has a few of these. One transitions from a waterfall to an Antarctic landscape (featuring
* The Ascent, one of them cannot prevent a sneeze which alerts the Germans and leads to their capture.
* The Asch Conformity Experiment. The test subject was placed in a room with other people where everyone was shown a set of lines and asked which one was the longest. The answer was blatantly obvious, but unbeknownst to the test subject, everyone else was instructed to give the wrong answer. The subject was asked for their answer last. In those situations, they answered wrong
* The Aschen can also do this in a more active way. They possess a bioweapon that can be keyed to a particular genome, which kills off most of the species. In the backstory of "2010" they used it on the Goa'uld, and in "2001" they try to use it on Earth when SG-1 figures out their
* The Aserai Sultanate are the Arabian Peninsula and North African civilizations before the Islamic conquests.
* The Asgard appear to have evolved independently, though, despite the fact that their original form (seen only once) is very similar to that of the humans. It was the millennia of
* The Asgard are a benevolent race who once looked like six-foot humanoid elf folk. They've repeatedly transferred their consciousness into new clone bodies with increasingly diminishing returns, so that in the present they're tiny, fragile aliens of
* The Asgard are an example as well, but they legitimately respect the humans and give them technology little by little, teaching them how to use it responsibly and build it as they go, and ultimately pass on their legacy to them when they finally meet their end.
* The Asgard are not capable of sexual reproduction; they lost the ability due to extensive genetic alteration. To achieve immortality, they upload clone bodies with their memories when their old bodies die. Eventually even this tactic fails.
* The Asgard are probably a better example, totally lacking a certain type of imagination. Thor states in one episode that sometimes the answer to a problem may lie in a less sophisticated approach and that the Asgard can no longer think in such a simplistic manner (they essentially keep trying to one-up their own technological developments). He also says that the Asgard wouldn't think of creating a chemically-propelled kinetic weapon, like the machine guns used by Earth's humans. Given that the average Asgard is several hundred years old due to using multiple cloned bodies with transferred minds and it makes more sense. Its generally accepted that people tend to get more stubborn and stuck in their ways as they age. If the Asgard are remotely like this it's likely that they really can't see a better solution for something than an upgrade of what they already have.
* the Asgard give them their entire technological database before blowing up their own planet.
* The Asgard, Goa'uld, and Wraith. The Goa'uld use humans as hosts and slaves, and founded Egyptian civilisation, and the Wraith loosely farm humans as food (though the Wraith themselves are the result of a life-sucking creature called the Iratus Bug being mutated by human DNA, possibly naturally, or possibly, as the
* The Asgard had to evacuate several homeworlds throughout their war with The Replicators.
* The Asgard have a serious problem — they are all clones and because they

simply clone their last body their DNA is degrading! It seems that nobody had the bright idea to not copy the last clone, but just use the original copy every time. Though this is actually the point — they do not have any original from back in the time when they were still well enough. They found some ancient frozen Asgard, but those were not yet ready to be used as "hosts". There is no saying what the requirements of the clone are — possibly, the mind transferring process isn't actually as simple as they make it to be — possibly, the body has have some compatibility with the "transplantee". By the time they realized they have a problem, it was already too late. Yes, they could have bought some time if they stored some current copies for later use, but at the end of the series,
* the Asgard, having exhausted their last hope to fix their genetic degradation, commit mass suicide by blowing up their home planet.
* The Asgard holo-technology is revealed to the public in one episode as a counter to a CEO revealing an Asgard as proof that the government is hiding something (it was just a mindless clone). Carter then went on national television and revealed that the government has been working on realistic-looking holographic projection technology and demonstrates this by passing her hand through a solid object, revealing that she wasn't really there. The reporter interviewing her calls bullshit on that, claiming that she has never heard of a technology like that before.
* The Asgardian Destroyer is an unusual example, since it is, depending on your point of view, not an armor at all, or the very purest form of armor. It is not wearable, but rather sucks up the spirit of a sapient being that comes too close to it - it cannot operate on its own, although it quickly overrides the will of anyone who powers it. Unless that individual's will is strong enough. Anyway, it's more or less an armor that is powered by its 'wearer' instead of the other way around. It might be the most powerful armor in comics (well... apart from the Celestials' armor, but that might not
* The Asgardians, who were considered gods and left some of their technology lying around.
* The Asgard language uses old Norse runes for its alphabet, but the spoken language is indecipherable even to Daniel. In
* The Asgard must think it's funny. After all, they did name a class of starships after him (the namesake of the class got blowed up, but that was another story).
* The Asgard ships are about in the middle: their exteriors are silver and streamlined, and the interiors are white and smooth, with a fair amount of screens, lights, and control interfaces. And
* The Asgard suffer from the fact that they have totally abandoned sexual reproduction in favor of cloning.
* The Asgard usually do since they're fighting the evil aliens and are mistaken for heroic deities like
* The Asgard, who in their real shapes are typical grey aliens, have been impersonating the gods of the Norse pantheon by the way of holograms for millennia, until they deem the societies they protect are advanced enough to handle the truth.
* The Asgard, who survive only through cloning, and have found that every new generation of clones suffers a slight degeneration.
* The Asgoths of Kria (writers of the second worst poetry in the universe) are also likely to be this way on account of how precise Douglas Adams tends to be with his language - after all, their poet's small intestine throttled his brain in 'a desperate attempt to save
* The Ash after trying to make a dress inspired by their appearance because the part of her brain responsible for dress ideas won't let her forget an idea until she can complete at least one dress based on it forces her to think about how they look all the time.
* The Asha'man, an entire army of battle wizards. They are trained exhaustively in all the ways that the Power can be used to kill. Even though they can rip other armies apart just by looking at them, they are still trained in swordsmanship so that they can kill you the old fashioned way as well.
* The Ashbringer is the game's biggest rumor fountain. The developers left

* The ashes of the "fake" Hera were scattered into space from the open door of a Raptor.
* The Ashtown Burials, which features Gilgamesh, the original Dracula, Dionysus, and an assortment of obscure Celtic deities rubbing elbows with monks and mad scientists in modern-day Wisconsin.
* The "Asian mist", known as the "poison fog" to the Japanese, that was introduced by The Great Kabuki, was initially "just" strong spices, rather than traditional "poison". However, a lore of
* The Aslan and the Sword Worlders are this. The Aslan are creatures that look like lions to humans, and have a stern code of honor. All male Aslan are theoretically warriors and most useful occupations are done by women. If someone does a designated female occupation they are considered female in Aslan language. More easily understood by the fact that only 1/3 of Aslan are male. Sword Worlders are humans that admire
* The ASPCA is notorious for this. Their ads, intended to guilt-trip people into sending them support money with footage of sad animals set to royalty-free "sad piano" music or old pop ballads, are so common on American digital multicast networks such as the True Crime Network that they're played almost every ad break, even getting more airplay than the already repetitive direct response commercials! Sometimes, they can fill
* The aspect of the Guide containing more text than could possibly fit into a single volume is
* the, as Penny has her own inner life and emotional arc despite hitting many MPDG notes.
* The Asphalt Cowboy about the exploits of Max Caulpepper, the owner-operator of the Los Angeles-based Caulpepper Security Service, who was also a rancher and the widowed father of daughters Rosie, Molly and Meg.
* The Asphalt Jungle: Doc says, "I haven't carried a gun since my twenties. You carry a gun, you shoot a policeman. Bad rap, hard to beat."
* The Asphalt Jungle, the actual thieves are always honorable with each other even after the "caper" falls apart. Gus is already known as the man who won't squeal, and Dix is as ready to advance money to Doc as Gus was ready to advance it to Dix. The backstabbing comes from their backers.
* The Asphalt Jungle, while the actual thieves show trust and generosity with each other, their main financial backer (Emerich) is planning to stiff them and disappear with the goods, and his associate Brannom proves equally treacherous.
* The A-Squad's duty uniforms are the jumpsuits worn by the Dekarangers, which presents an odd contrast with the much fancier uniforms worn by the rest of SPD.
* The Asrai (Wood Elves) are fierce isolationists. They have little to no interest in the affairs of the lesser races and see little point in having any dealings with them beyond telling them to get out of their forests at the point of an arrow. However, there is something of a schizophrenic duality at the heart of the Wood Elves, and if they do find themselves dealing with others then they might just as easily act like patronising but kind-hearted High Elves as callous, murdering Dark Elves.
* The Assad regime was supported by Shia volunteers who are sympathetic to him as a fellow Shia (Assad is technically an Alawite, which is a Shia sect) and surprisingly by Western right-wing activists from Scandinavia and Greece.
* The Assassination and Subtlety specializations require using daggers. Some of their strongest moves can only be used with daggers while others are adjusted when wielding a dagger to compensate for the weapon's low damage per hit. The dagger's fast speed also makes it good for triggering poisons and other effects.
* The Assassination Bureau. After Ivan replaces the body in the coffin with himself, Sonia slips down to the funeral gondola by another route and climbs into the boat—only to end up in a deep well right underneath where the coffin is placed. This allows her to unscrew the bottom and let him fall out on top of her, where he can remain hidden until the coffin is disposed of and they can escape.
* The Assassination Bureau in that the head of the titular agency willingly accepts a contract on his own head as a challenge to weed out the unworthy elements within

his organization.
* The Assassination Bureau is asphyxiated when his saber pierces one of the hydrogen balloons in the airship.
* The Assassination Bureau Ltd., the titular bureau is filled with the former.
* The Assassination Bureau plans to destroy a peace conference to ignite a war and profit as the stock prices soar.
* The "Assassination Island" arc employed this trope several times. Makes sense, since they need to advance quietly to their goal on the top floor of a hotel. Irina
* the assassination of another lawyer 15 years ago which has been unsolved all this time. Turns out this was just the result of a fifteen-year-long revenge scheme against Miles Edgeworth, ace prosecutor.
* The Assassination of Gianni Versace, there are several gay supporting characters, subject matter includes homophobia)
* The assassination of Giuliano de Medici during the Pazzi Conspiracy of 1478. An encrypted letter deciphered only in 2004 revealed the identity of another plotter, Federico da Montefeltro, the Duke of Urbino (1422-1482, reign 1474-1482).
* The Assassination of Jesse James. After Bob shoots Wood Hite in the head, he is alive for a brief period afterwards, long enough for some friends to comfort him as he dies.
* The Assassination of Jesse James by the Coward Robert Ford also demonstrates this.
* The Assassination of Jesse James by the Coward Robert Ford, despite being from The Old West, was filmed in Winnipeg's Exchange district (which looks sufficiently old, for that matter).
* The Assassination of Jesse James by the Coward Robert Ford includes in one of its earlier scenes James's last train robbery, the Blue Cut railroad job of 1882.
* The Assassination of Jesse James by the Coward Robert Ford: Robert Ford is the main character and narrator of his story. In the middle of a scene, he'll occasionally look at the audience and stage-whisper exposition. The artificiality of the trope highlights the inaccuracy of the plot.
* The Assassination of Jesse James by the Coward Robert Ford Robert Ford, who is in turn shot and killed by a disgruntled patron in a bar several years later.
* The Assassination of Jesse James by the Coward Robert Ford: The narration throughout the film is performed by Hugh Ross, an assistant editor on the film. He originally inserted it as a placeholder, but over two years of editing and fighting with the studio, Ross's voice became ingrained in director Andrew Dominik's head, and he ultimately fought to keep it in the final cut. It's one of the highlights of the film.
* The assassination of King Gustav III of Sweden occurred at a masquerade hosted by the King. The assassin was not recognized, but dropped his pistol at the scene and, thanks to some very fine detective work, the entire conspiracy was unearthed and the involved arrested within a week. The incident was used as a plot for two different operas (see above).
* The Assassination of Nazi Ambassador Ernst vom Rath at the German Embassy in
* The Assassination of Richard Nixon: Made in 2004, set mostly in 1972-1973.
* The Assassination of Twilight Sparkle even reveals that there's inequality even among the unicorns themselves, with the nobility being the only ones holding majority, if not all, of the power aside from the Royal Family. To put this into perspective, if an average Unicornian can get by without getting screwed over by the nobility, it's considered a lucky break.
* The Assassination of Twilight Sparkle speech that snaps her out of it.
* The assassinations of Renly Baratheon and Robb Stark prove this tactic need not be limited to the battlefield. However, while in Renly's case his remaining forces joined his older brother without a fight, Robb's forces were slaughtered alongside him in the same back-stab.
* The Assassin class is stated to be the worst physical combatant of the various classes, and best for stealth tactics and picking off specific priority targets who can't overpower them (especially normal humans). However, in the game proper, an Assassin is no weaker than any other Servant of the same star level aside from a

10% damage penalty (which they share with the Caster class and isn't much lower than the penalty Archers get). To the contrary, due to the game giving Assassin a
* the assassin goes to the "wrong" room deliberately, planning to climb to the correct room OUTSIDE. The CBI comes in to arrest her and she jumps from the balcony. It takes Jane until the next day to realize the truth, by which point they'd already tipped off the real mole to Hightower's actual location, thinking they'd cleared him. Fortunately, everyone survives except the mole himself.
* The Assassin has a variant, since the child isn't aware there's any danger. Nie Yin Niang goes to kill a man and finds him with his son asleep in his arms. She decides not to kill him.
* The assassin hired to kill G'Kar in the episode "Parliament of Dreams" leaves on G'Kar's pillow a black flower, known as a "death blossom", which is the elite Thenta Makur assasins' guild's calling card which they leave as a warning before they strike.
* The assassin Jacob Lessio seems to think that looking at a woman while she's indecent is a tremendous a sinful act and refuses to do it, usually closing his eye and looking away while demanding them to clothe themselves. This cost him a fight with both Mirajaine and Natsu who use this trait against him.
* The assassin pretending to be a priest who takes Manji's confession in the first chapter of
* The Assassins Guild also follows this creed, you only kill if you're actually going to get paid for it. This is seen as a moral standpoint; killing people out of anger or hatred is murder, but being paid is a motive that is free of negative emotions (unless you consider those of the person paying you, but that's nothing to do with them), and being paid
* The Assassins' Guild are so insistent on this, they've got regular citizens doing it. In
* the Assassins' Guild as having hidden within their clothing any number of tools for killing people.
* The assassins' guild known as the Black Hand, despite sparking World War I, were on the whole outlandishly incompetent. After they'd, through
* The Assassins' Guild of Ankh-Morpork awards the Jonathan Teatime Memorial Prize, for the best
* The Assassins' Guild, while having a number of characters who are members and/or alumni (Vetinari himself was one) veers into
* The Assassins' Guild with standards to maintain; the latter are "curs who go around murdering people for money."
* The Assassins of Tamurin is recruited for a secret organization of this type.
* The assassins of the Eversor temple wear a similar white skull helmet. Where as the other temples of Officio Assassinorum rely on stealth,
* The Assault classes in general, save for the Germans and their StG 44, all use machine guns which are treated as generic assault rifles - not only usable but even viable for operation by a single person, issued far more extensively than in reality, and
* The Assault, in which the narrator's family is killed after the body of a Nazi collaborator is placed in front of their home.
* The assault on the Belgian fort of Eben Emael, which was crucial for the Blitzkrieg campaign in the West 1940. The Eben Emael strike was performed by glider infantry.
* The Assault's Medic Unlock Gun, the Voss however is nothing to slouch at. It is one of the most popular choices for an unlock compared to the Baur Rifle which is seen as tricky to fire.
* The As-Seen-On-TV OneTouch Can Opener! This innovative invention, which is shown to "simply allow one to press the button and walk away, leaving a top that cannot pop a balloon", has some
* The Assembly of the Eighth Sacrament are tasked with the recovery, researching, and management of holy relics; one particularly notable job is to inspect any claims of the Holy Grail, since it's central to Christian doctrine. Despite this, the Assembly is the lowest of the Holy Church's agencies.

* The assertion that 'beautiful is better' is very prominent in the figures of
* The assessment at the end of a botany chapter tests students' understanding of plant tissues with this scenario: Your neighbor has planted a number of trees on your side of the property line. Which part of the trees' stems should you
* The Assets, about notorious CIA mole Aldrich Ames, announces itself to be "inspired by true events". Ironically, it's more factual than the disclaimer makes it seem.
* The Assets. It was actually an eight part miniseries, but only the first two parts aired in a prime timeslot, with the rest getting the summer Saturday night burn-off treatment in bulk.
* The Ass Goblins of Auschwitz. No reason is given why they do it; it's just apparently something that they do.
* The Assignment (1997), a Carlos the Jackal lookalike undercover as the real deal, proves his identity to his handler when his handler says "awfully warm for this time of year", to which he replies "but not as sticky as two summers ago". These are the two halves of a code phrase that was part of an assignment from long ago that his handler mentioned in conversation.
* The Assignment (1997), a disguised Carlos the Jackal recognises CIA agent Jack Shaw sitting at a Paris cafe, walks right up to him and borrows a light, then tosses a hand grenade into the café. Shaw survived, and a large part of his motivation throughout the movie is to avenge the humiliation of having missed Europe's most wanted terrorist when he was literally right under his nose.
* The Assignment (1997), a KGB commando team is assaulting the safehouse of Carlos the Jackal. In this instance the cut is made by a fast burning fuse around the rim of the sucker clamp.
* The Assignment (1997). As part of his spy training, the protagonist takes part in an exercise that tests both his memory and shooting skills. He walks through a graveyard and when his trainer calls out a name, has to turn and fire at the tombstone engraved with that name.
* The Assignment (1997), Carlos dives from a balcony into the Spree River to escape the KGB. Annibal dives right after him.
* The Assignment (1997), KGB commandos use crossbows firing grappling hooks when assaulting the safehouse of Carlos the Jackal.
* The Assignment (1997). While escaping from a carload of gunmen the protagonist carjacks a taxi, throwing the driver out onto the street where he barely avoids getting hit by another vehicle.
* The Assignment (2016): After his involuntary surgery, Frank tries to have sex with his girlfriend (having been made physically female). However, he isn't able to feel anything, and consults a doctor who says sensation won't come back for around six months.
* The Assignment (2016): Frank Kitchen is a hitman, and the plot is sparked by him murdering Dr. Rachel Jane's brother over an unpaid debt he owed to criminals.
* The Assignment (2016), Frank makes it appear like her assistant killed them before being shot himself by putting the murder weapon into his hand. The police buy this, and don't believe her that he did it.
* The Assignment (2016): Frank wields guns in both hands multiple times during the film.
* The Assignment (2016) in both cases, though the first in makeup obviously).
* The Assignment (2016): Johnnie takes it to extreme heights, as she's completely unperturbed by Frank's new appearance, and has no questions or comments beyond noting how different he looks when she first sees him post-sex reassignment. She stays with him afterward, completely accepting, without hesitation. It also seems she's entirely aware that he's a hitman, and doesn't mind at all.
* The Assignment (2016): Near the beginning, Sebastian has a sex worker over in very revealing clothes. Frank's girlfriend Johnnie also appears briefly topless, and he interrupts one of his targets having sex with a naked Asian woman.
* The Assignment, Carlos starts to pull on his clothes, showing his contempt by throwing the occasional item of ladies underwear at the KGB...which serves as a distraction when he picks up a submachine gun hidden under the clothes and opens

fire.
* The Assignment catch him, they also didn't search him at all it seems since they miss his hidden gun which he uses to shoot them after waking up.
* The Assignment for infamous terrorist Carlos the Jackal, so he's recruited for a CIA/Mossad intelligence operation. His impersonation works so well he's mistaken for the real Carlos by French anti-terrorist agents and has to shoot his way out.
* The Assignment of terrorist Carlos the Jackal who is trained by the CIA/Mossad to impersonate him, so he can make contact with a former lover of Carlos. However she turns out to be an informant for French intelligence; they ambush the man they think is Carlos and he has to kill several agents in the process of escaping.
* The Assignment sitting on a chair in the middle of a snow covered road, with the trainee driving the vehicle. In this case it's a more realistic swerve-and-brake rather than a direct stop.
* The Assignment when he later meets with a contact and realises from a fresh cigarette butt left in the rubbish bin that she has met someone in secret.
* The Assignment when the band stops playing, but he doesn't rise to the bait.
* The assistance statistics, listing how often a certain model requires roadside assistance, don't account for failures that don't immobilize the car.
* The Assistant is Jane's abusive boss who berates her over the phone a few times.
* The Assistant takes place over less than a day, beginning early in the morning - perhaps around 4am - and ending at night, around 10pm.
* The Assistant: While the film is set in the New York office of a Hollywood studio, it centers on an extremely unflattering look behind the scenes of the American film industry. Studio executives rule their companies like petty tyrants, and their minions are too beaten down or self-absorbed to fight back.
* The "Assist" menu allows players who might find the game too hard to lower the damage received, reduce the frequency of enemy attacks, and slow down most puzzles, all without any penalty or cut content.
* The Associate's character needs a name for her mysterious friend and her eyes falls on a bottle of alcohol at the bar: Robert S. Cutty.
* The Associates offensive is that no one was at all surprised that he came prancing in and lisping like Sylvester the Cat, and challenges the producer to create non-stereotypical gay characters.
* The Associate to get ahead in business. Her latex mask fools everyone perfectly.
* The association between Disney and the "G" rating led Jeffrey Katzenberg to deliberately invoke this for the
* The Association of Community Organizations for Reform Now (ACORN) was ultimately found to have acted appropriately after the
* The association of ravens with evil is subverted with Mat Cauthon, a hero that is loosely based on Odin and acquires a ring with ravens on it late in the series. He also has a
* The assorted attempts to design Kryptonian formal garb, especially from the Byrne era, have caused more than a few snickers. Most of them tend to either Parodied in
* The assorted sequel series introduce the New Macross Class colonisation ships separated into 'Battle' sections that are at
* the assumed identity of another's little brother fashion towards him later...
* The assumes the character did not roll so poorly for Constitution that their hit dice wasn't a d4-X, minimum 1. Additionally, it assumes AC cannot be worse than 10.
* The assumption is that such things will often be appropriate features for steampunk settings.
* "The Assumption Song", which makes you think something rude is happening, but it isn't (e.g. "The girl in the meadow was rubbing her eyes at the fellow down by the dock. He looked like a man with a sizable... home.")
* The assumption that Inuyasha curses a lot because his crude dialect and habit of not using honorifics in the original Japanese was rendered in English as "rough" speech with
* The Assyrian invasion destroyed the Kingdom of Israel and scattered the Israelite tribes in it. The later Babylonian invasion destroyed the Kingdom of

Judah and deported most of its population to Babylonia.
* The Astartes used to use a pod called the Dreadclaw, which also functioned as a
* The Asterisk War, Ardi and Rimsi are nothing short of helpful to their owners and follow their orders, no strings attached.
* The Asterisk War: From early on, Ayato chooses Julis as the girl he loves and wants protect the most. He may have several other girls vying for his attention, but it's obvious none of them have a chance.
* The Asterisk War has the Integrated Enterprise Foundation, an international conglomerate that controls the world economy. Everything it does is in the name of profit, such as bringing entire countries to the brink of poverty, organzing fighting tournaments between teenage superhumans and brainwashing its own members to prevent any defiance.
* The Asterisk War is her White Knight. Ayato even says his purpose in life is to protect Julis.
* The Asterisk War is probably the one packing the most muscle when he wears his gray shirt and he shows off the bottom portion of his abs.
* The Asterisk War of practical experience to improve their fighting skill for the finals.
* The Asterisk War: Rikka, the series' main setting, is an artificial island-city based on a crater-lake in North Kanto.
* The Asterisk War she challenges him again on her own initiative, and this time Ayato wins, taking her #1 spot.
* The Asterisk War Silas Norman is last seen being captured by Claudia Enfield and Eishiro Yabuki.
* The Asterisk War. Supporting character Kirin Toudou's father Seijirou was sent to prison this way after he killed an armed robber to protect her, and she's fighting to see him released.
* The Asterisk War: The anime features many sword fights in which the fighters zip around at tremendous speed, attacking and dodging. While the intent may be to show the consequences of extreme agility, it often just looks as if they were deliberately missing by several feet, or simply unable to hit the side of a barn with their swords.
* The asteroid Antiope was discovered in 1866, and named after one of two characters in
* The Asteroid Field Holo-Mapper auxiliary system lets your squadrons turn invisible by entering an asteroid field.
* The Asteroids Galaxy Tour. Their trumpet player stated that he'd like to be in a band with that name, and the rest of the band liked it.
* the as the erogenous zones, the decade went on focusing the hips, whether padded or not, and whether it's wearing a circle skirt, a pencil skirt, or even pants.
* The asthma medication Advair lists as one of its side effects an increased risk of
* The Aston Martin belonging to another 00 agent that Bond steals in
* The Astounding She Monster has the protagonists (such as they are) use acid to burn away the alien's spacesuit, killing it instantly.
* The Astounding, the Amazing and the Unknown off his back. Meanwhile the crew of the real Eldridge gets drunk, leading the bureaucrat to assume from their vomiting and odd behaviour on their return that the experiment has driven them mad. This gives Heinlein's team the excuse to say that further tests will be aborted until they've fixed the problem.
* The Astounding Wolf-Man, an assassin explains that even if the story about Silver Bullets wasn't true, silver bullets should at least hurt as much as regular ones. As it turns out, there are a few elements harmful to werewolves, but Silver is the most commonly known one.
* The Astounding Wolf-Man: Being a werewolf, Wolf-Man is very susceptible to this. His costume fits his wolf form. However, with the exception of sweatpants and tank tops, if he has to wolf out in normal clothes they will be shredded.
* The Astounding Wolf-Man, written by Robert Kirkman, focuses on a man who, after being infected with lycanthropy on a family vacation, uses it as a means by which

he can become a superhero. His werewolf powers give him super strength and healing, but only work at night. Also on the night of the full moon he enters a feral state and can no longer control his actions.
* The Astral Cat insists that the only certainties of existence are entropy, futility, and the drift of atoms that will ultimately be swallowed by the "hole in the center of everything."
* The Astral Plane: Sort of the "elemental plane of thought", most notable for being the barrier realm between the Inner Planes (Material, Ethereal, Elemental) and the Outer Planes.
* The Astral Sea: Realm of the Gods and the afterlives of their chosen worshippers.
* The Astral Wanderer And The Forest Of Tears is a psychic entity that feeds on destruction, who tried to orchestrate the death of a sentient universe. As punishment, the universe imprisoned it within a painting.
* The Astray line is an odd case. The colored Frames (Red, Blue, Gold, Green and Mirage) were all prototypes, but weren't anything incredible. It's only by the wonders of
* The Astrologer: Someone who predicts the future by reading the stars.
* The Astronaut Farmer builds a spacecraft on his farm, though he orders parts that aren't on hand, like fuel and a rocket.
* The astronaut (in full space suit) going into his room ("My flight got cancelled.")
* The astronaut in "In From the Cold" is last seen trying to open the airlock of the lunar station so he wouldn't have to suffer some
* The Astronauts Apprentice': Lampshaded. Before they reach the Asteroid Belt, Grandpa tells Bradley that you can jump from one asteroid to the next, or swing between them on ropes. Bradley (who read a book about the Solar System before leaving Earth) refuses to believe this, and tells Grandpa that the asteroid belt is "mostly empty". However, when they reach their destination, it turns out that Grandpa is correct.
* The Astronauts it's an alien spaceship that crashed, carrying some cultural artifacts.
* The astronauts of the Mercury program did in fact eat their food from squeeze tubes. By the Gemini program, the victuals had been upgraded to freeze-dried food pouches and gelatin-coated bite-sized cubes. Only by Skylab did proper knife-and-fork dining finally arrive in space, aided by the invention of extra-thick, gluelike sauce all over everything (eating plain corn niblets in space remains an impossible proposition).
* The Astronaut's Wife says "cunt". Once. There are a few "fucks" too, but there is no major violence or nudity that would warrant an "adults-only" rating otherwise. However, the Irish iTunes Store labels it with a 15 rating, so maybe the IFCO have changed their minds since.
* The Astronaut Wives Club has a very mild example, since the character doing the clinging is Louise. Although she refuses to let any of the other wives in to watch Alan's first launch with her, Max is there because he has to be for his job. He tries to discreetly leave the room, but Louise grabs his hand, and they remain that way for the duration of the mission.
* The Astronaut Wives Club. He cheated in the past, but when his wife thinks he's enjoying the attentions of the Cape Cookies, she finds out he actually flirts with them, but anytime he's alone with one of them, starts gushing about how much he loves his wife.
* The Astronaut Wives Club: Made in 2015, set during the aftermath of Alan Shephard's successful venture into space in 1961.
* The Astronaut Wives Club, Max and Louise share a tentative but close dance in a barn the night the Cuban Missile Crisis reaches high tension.
* The Astronomer has this as one of his powers. It backfires when he tries to use another one of his powers, a mental shield, to protect from another character's literal

Science" — cover of the
* The Astro-Zombies: These are solar-powered cyborgs that can have knowledge directly veaned into their brains by computers.
* the Asuna that's with Ala Alba in later chapters is an impostor long before Rakan revealed it to Negi and Chisame during his Obi-Wan Moment
* The Asura Hiranyakashipu underwent ascesis for several millennia to earn a boon from the Creator, Brahma. According to the boon, he was not to be slain by any creation of Brahma. Neither day or night, neither inside nor outside an abode, neither in the sky nor on earth, he was to meet death. He was not to be slain by a living or lifeless being, either armed or unarmed. Eventually, he was killed by Lord Vishnu in the form of Narasimha (man lion hybrid) who transcended life. At twilight, Narasimha sat on a threshold, held Hiranyakashipu on his lap and eviscerated him with his claws.
* The Asurans have a version of this that involves strapping a hyperdrive to a stargate and sending it to the target location, at which point an extremely-powerful beam is fired at their stargate back on Asuras. The power of the beam can keep the gate open indefinitely (beyond the usual 38-minute cut-off) and also powers the
* The Asura regard divine being as parts of the Eternal Alchemy, a system wherein all living creatures, spirits, and even magic itself is working towards some greater purpose. They do not regard the Alchemy as worthy of worship either, instead of viewing it as the ultimate science to be unraveled and understood.
* The Asur (High Elves) behave with a kind of patronising paternalism towards the lesser races – they think that poor, feeble humans and dwarfs are constantly in need of their help and should be saved from themselves by High Elf intervention. They see the preservation of the world and the good things in it as a noble responsibility that falls on their shoulders alone because nobody else is up to the task. The fact that they're not always wrong on this just serves to reinforce their beliefs and rub everyone else up the wrong way.
* The Aswang doesn’t leave a single drop of blood at any of his massacres in
* The Aswang Project, a website and YouTube channel documenting Philippine mythology started and mostly run by the Canadian Jordan Clark.
* The Asylum, and are quite cynical about it. A blog entry advertising a sale on their films: "You'd have to illegally download to get a better deal than that... but then you'd just be stooping to our level...".
* The Asylum and Other Tales, adventure "The Asylum". The proto-shoggoth can create organs anywhere on its body whenever it likes. One example given was creating an eye in the palm of its hand.
* The Asylum and Other Tales makes an Accounting roll, he will realize that there's no way the asylum's income could cover its expenses. This is a clue that Dr. Freygan is making money another way: by helping bootleggers smuggle alcohol.
* The Asylum Challenge is simple and maddening, because it relies on herding the game's AI: fill a house with Sims, but only control one of them, and try to ensure that nobody dies of starvation because
* The Asylum has the human resistance's weaponry reverse-engineered from the alien robots'.
* The Asylum status and a good deal of the plot was taken up with rescuing them.
* The Asylum typically doesn't go over the $1 million mark when it comes to budgets.
* The Atarians is notable for featuring a man and a woman in a futuristic landscape fighting various aliens, and absolutely no indication of who they are or what's going on.
* The Atarians, who are there just so the Atarians themselves have someone to fight.
* The Atari Kid, quickly plugging and unplugging cords on a computer, and inputting the Konami Code as fast as possible. All of these skills help him take down a purse snatcher.
* The Atarka in the new Tarkir timeline have a total ban Dragonlord Atarka is afraid of the old shamanic arts, so anyone caught practicing them by a dragon of

Atarka's brood gets summarily devoured. They're still being practiced in secret, at least.
* The AT-AT Imperial walker is a terrestrial vehicle example—painfully slow, but making up for it in blaster-proof armor and firepower.
* The AT-AT Walkers' practical problems include: high center of gravity, multiple fully-exposed points of failure, extremely poor visibility, severe weakness in that they can be easily tripped up and disabled, offensive weapons which only point forward, no way to defend against an attack from below... the list goes on and on. In a nutshell, these machines would be far less effective in battle than a modern tank but they are undeniably cool.
* The "at best" is because if there are multiple children, they can choose differently from each other. Which did happen once. Elrond and his
* The A-Team, a bad guy slams his rifle into BA's crotch with no effect.
* The A-Team? Act like an artsy filmmaker? Psychoanalyze a bunch of pecans while switching between a German accent and just plain German? ...And yeah, he did all of those things.
* The A-Team after four seasons with the fifth, in which they are captured and subsequently work for a covert federal agency headed by Robert Vaughn. (However, the underlying goal, clearing their name or at least getting a pardon, was never achieved.)
* The A-Team". Al Driscoll is the former leader of the Scorpions, but is planning on turning state's evidence on them. To prevent this, they're planning on stopping the bus he's taking to L.A. and killing him.
* The A-Team already have federal heat on themselves. So Hannibal demands the keys and drives their van through a window of the sheriff's office.
* The A-Team and see a humvee going into the camera — just as a real humvee crashes through the wall to rescue Murdock.
* The A-Team", and when Therm is broken by one of Garber's men during a fight, Murdock punches out the man who did it.
* The A-Team a pair of camera closeups during the fight shows "PITY" on one hand and "FOOL" on the other as he throws punches.
* The A-Team are likelier to be rattled by something threatening Face, B.A., or Murdock than him.
* The A-Team": As the team decorates their own restaurant in an A-Team Montage, they bring in a piano, Faceman continues the background music on it, which starts again after he stops.
* The A-Team, as they couldn't stay in one place too long without being caught by the military.
* The A-Team, B.A. Baracus took a vow of nonviolence. By the movie's end, however, he had discarded it.
* The A-Team", B.A. does this after talking to his mother and finding out she was attacked and injured by thugs.
* The A-Team". B.A.'s mom still calls him "Scooter" because of his fondness for scooting a toy truck across the carpet when he was little. Murdock keeps bringing it up throughout the episode.
* The A-Team". B.A.'s mother thinks he's the head of the A-Team, so the others play along. When the subject of a plan comes up, Hannibal thinks of one while saying that B.A. had told them about it on the way. B.A. goes along with it.
* The A-Team) build a makeshift tank, equip themselves with heavy artillery (usually consisting of the aforementioned PVC piping and explosive chemicals), stockpile massive amounts of ammunition, and still have enough material left over to escape from captivity via a very large, door-breaking (if not violently building-destroying) explosion.
* The A-Team, but his Italian isn't too great. Although the English-speaking mooks around him don't know any better and it helps his disguise, it culminates in him asking two men to have his baby.
* The A-Team, but the Carthaginian general who almost brought down the Roman Republic. This Hannibal is that good. "I love it when a plan comes together."
* The A-Team, but they changed it after every criminal in the world was immediately

vapourized in the first episode.
* The A-Team by cutting through Face's noose in the film with three or four bullets in rapid succession.
* The A-Team by sitting on top of a horse statue, disguised as a rider.
* The A-Team creates forged papers that are already expired. Once the guards see the expiration they stop examining the rest, after which he produces a new document extending the expiration date - by which time the guards have already forgotten about examining the rest of the original paperwork and let them proceed.
* The A-Team death of a general, getting convicted, dishonorably discharged, and imprisoned.
* The A-Team. Despite being four dissimilar soldiers thrown together by circumstances, they are a very closely knit group, to the point where the mother of one actually characterizes the others as being her son's family. All of them are awesome in their own way.
* The A-Team: Due to his top-notch people skills and extensive contacts both military and civilian, Lt. Templeton "Faceman" Peck isn't suffering during his incarceration for a crime he didn't commit. His cell looks like a college dorm room, he was allowed to knock down walls to expand it, and no one seemed to bat an eye that he's sleeping with the female guards.
* The A-Team episode "The Maltese Cow," Face and Murdock find a message written on a mirror in Chinese. Murdock proceeds to read it out loud, and when Face gives him a weird look, he explains:
* The A-Team episode "The Sound of Thunder" has the Team hired by a man who learned he has a child from the Vietnam War.
* The A-Team episode "The Spy Who Mugged Me," Murdock (posing as a 007-type spy) does this when he starts making out with the villain's girlfriend. In doing so, he leaves poor Face to spend the night out in the rain.
* The A-Team", Face takes one to the... well, face. When Hannibal asks how many fingers he's holding up, the bleary commando volunteers "Gargh... Blue... TREE!"
* The A-Team for a crime they didn't commit and were expulsed. After that, they were chased by the army and now act as an undercover group helping people in need, becoming US' most wanted team.
* The A-Team for a mission (Face's answer when he's asked how he got it? "Trade secret").
* The A-Team gesture. B.A. then delivers a single front kick that sends the mook flying into the wall behind him.
* The A-Team. Given his craziness, it makes (relative) sense for him to be all three.
* The A-Team had an old member of their Vietnam unit, Raymond Brenner, who stood by them during their trial and each of the team remember fondly. They return the favor by going after his murderers and freeing his town.
* The A-Team had two four-issue series released just prior to the film.
* The A-Team, Hannibal, Face, and Murdock are trapped in a Vietnamese prison, and Hannibal goes over in his head how they'll escape. Needless to say, the imagined attempt doesn't end well.
* The A-Team", Hannibal Smith is kept for some time in a box of corrugated scrap metal in the heat as the sun rises higher (the villain taunts him that it's not even noon yet). While it doesn't kill him (or even stop him from making with the wisecracks), it's heavily implied that it would have killed him eventually had the bad guys not decided to dump him off the back of the truck instead.
* The A-Team: Hannibal Smith is the mastermind leader who "loves it when a plan comes together."
* The A-Team. Hannibal Smith used disguises like this frequently, but just to hide his own appearance, not look like any other specific person. Usually to screen people he would "send" to the A-Team later. He also apparently had a few regular personae.
* The A-Team", Hannibal tricks the bad guys into leaving the van (which they grabbed as a getaway vehicle) and running away by claiming that he put explosives on it. When they're gone, he still looks like he'll blow it up for a moment,

causing B.A. to yell loudly in protest about destroying "his van". Hannibal grins — and reveals that the explosives were road flares and the explosive remote was a TV remote.
* The A-Team", Harnett has discovered that Tawnia slipped a mini-microphone onto him and has her up against a wall staring at a drawn gun. Luckily, Murdock had heard the mic fizzle when Harnett dropped it into his drink. He suddenly appears in the nearest doorway and tackles the villain to the ground.
* The A-Team has a variation; they actually did commit the crime they're wanted for, but it was part of a secret military operation that wasn't criminal in this context. Unfortunately, their commander died shortly thereafter without explaining this to anyone...
* The A-Team" has Hannibal, BA, and Murdock drive a car into a police station as part of a plan to get themselves arrested.
* The A-Team has his hands cuffed behind him and put in the backseat of a car. Using his would-be killer's incompetence he quickly reveals his hands are free and steals the gun away from the man, pointing out they should "Never handcuff a guy's hands behind his back, then you can't see the hands."
* The A-Team has the A-Team step in to give a funeral for one of their old military buddies who had tangled with the Villains of the Week. With Hannibal calling the orders, the other three fire their rifles several times in salute.
* The A-Team has the team hired to escort an African princess to her wedding.
* The A-Team have led some fans to suspect that Murdock may have been the one who came up with the nickname 'Faceman' in the first place.
* The A-Team, he turns out to be quite good at it. Face says that his crepes remind him of the kind one of his girlfriends used to make.
* The A-Team. Highlights include firing the cannon of a falling tank in an attempt to fly it into a lake.
* The A-Team. If you replace "Enemy X" in the example above with "The A-Team", you get his general approach to catching the A-Team.
* The A-Team: In a fourth season episode, Murdock, with help from special guest Boy George, dresses as a pregnant woman to gain access to the rest of the team who have had to barricade themselves in the sheriff's office. Not only does he managed to convince a lynch mob to let him through without anyone questioning that he wasn't a she, but Face mentions that Murdock looked better to him as a woman than he did as a man.
* The A-Team: In "A Small and Deadly War", Murdock delivers a portion of "The Hearse Song", which is perky like any other singing telegram, but entirely morbid.
* The A-Team in one scene, Bancroft just can't work up the courage to tell him, but he manages this:
* The A-Team" involves his left hand using this trope, although it is more of a nuisance than actually evil. He names it Lefty.
* The A-Team is captured by bad guys and tied up in tires while wearing nothing but an open bathrobe.
* The A-Team It's played straight at first when Agent Lynch promises their freedom in exchange for tracking down the man who framed them.
* The A-Team knows the strengths and weaknesses of each of the other three team members, and knows exactly how to best use their strengths and minimize their weaknesses. Different as they may be, when they all fight together, it's a bad day for slimeballs everywhere.
* The A-Team". Lila tells the victims about a "shortcut" that will take an hour off their travel time, and then calls the Scorpions to tell them that somebody's coming. Long story short, the passengers end up delayed, frightened, and minus any cash or other valuables they were carrying.
* The A-Team. Mainly he's the Mechanic, but he's also the go-to guy for building small electronics like listening devices.
* The A-Team", Martin James sentences the team and Amy to a trial, which involves running on foot from the cultists in jeeps while the cultists try to shoot them down. They manage to give them the slip by hiding against an embankment until the cultists pass.

* The A-Team mentioned as a torture method shoving bamboo under someone's fingernails.
* The A-Team, most notably Murdock, who may or may not be certifiably insane.
* The A-Team movie. At their first meeting, Hannibal steps out in front of BA's oncoming van.
* The A-Team movie is that Face and Lt. Sosa are former lovers. We find out later that she dumped him because he finally wanted a real relationship and she didn't.
* The A-Team movie screams of this. It's clear they're both just having fun with the movie, and then they get in a conversation together...
* The A-Team", Murdock and Hannibal escape a prison by filling plastic bags with hot air, powered by hair dryers.
* The A-Team", Murdock begins teasing B.A. about chasing the thugs who carjacked the van because of being worried about him, to which B.A. retorts that it was the van he was worried about. The two spend several minutes going back and forth about what concerned B.A.
* The A-Team, Murdock does a barrel roll in a civilian medic helicopter, then in a C-130. Just to be clear, very few helicopters can be barrel rolled, and rolling a C-130 is a job for a professional stunt pilot.
* The A-Team: Murdock gives a nice little "war is hell" speech in the episode "The Island".
* The A-Team, Murdock infiltrated a mental hospital by pretending he thought he was Frank Sinatra, and singing his songs ad nauseam. When he was put in a straitjacket and locked in a padded room, he sang "Fairy tales can, Fairy tales can, Fairy tales can ..." over and over again.
* The A-Team, Murdock is released from the V.A. Hospital to be with his friends, and this becomes his gimmick for every episode.
* The A-Team: Murdock's "special sauce". Two of the key ingredients are Cordite and anti-freeze, and it has been known to cause temporary facial paralysis.
* The A-Team: Must have had a ton of it, with how often they knocked out B.A.
* The A-Team. Notable for being most likely the only person in this trope to be over 50 years old.
* The A-Team: Not surprisingly, Face fulfills this role by procuring rides and equipment for the team. You need a towtruck/limo/cab company? The Faceman can get that for you with some smooth moves and a silver tongue.
* The A-Team of Cuaraguay, he's been attempting to use his influence to prepare a coup and take over the country. Fearing a negative evaluation report that will see his commission pulled (and which includes such things as "delusions of godhood"), he sent his corrupt commandos to kidnap Murdock's psychiatrist in the middle of one of Murdock's therapy sessions, which results in the A-Team coming in to stop him and save the doctor.
* The A-Team once used a Trojan Whiskey Delivery Truck to get inside a convent that had been taken over by South American Guerrillas (who had just run out of booze).
* The A-Team only a mannequin and the A-Team was really hiding in a nearby tent.
* The A-Team: Other characters occasionally use Hannibal's "I love it when a plan comes together."
* The A-Team over the course of the first four seasons, only Colonel Decker actually seems to view the team (particularly Hannibal) in this way. He has a definite grudging respect for them. Hannibal, in turn, actually seems to admire Decker's relentlessness.
* The A-Team partway through season 2. Nonetheless the character was replaced by another tagalong reporter, Tawnia (Marla Heasley), this time as a recurring character; but there was even less for her to do, though at least she got a proper goodbye episode.
* The A-Team: People looking for the team usually found Hannibal in disguise when they met with the person who was supposed to get them in contact.
* The A-Team, Pete and Mack run after Murdock after finding out that he isn't who he says he is...only to turn around and run the opposite way when they're met by Hannibal, Face, and B.A., who had been hiding around the corner of a nearby building.

* The A-Team, presented as legit), and featured several WWF faces as un-billed extras in a scene where they fight off that episode's villains. In the segment featuring the Hogan-Valentine match, the ending is altered to show the bad guys entering the arena to confront and assassinate Hogan (don't worry, they're stopped in time).
* The A-Team (really, how can a suave con man and a crazy pilot be best friends? Just ask Face and Murdock), you can tell they're more like a family than just a team of ex-military acquaintances. For instance, in the Season 2 finale, when Murdock gets shot in the chest during a job in the middle of nowhere, they pull out all the stops and even face possible capture by the military in order to save him. They even include the "we can insult each other, but when outsiders do it we close ranks" bit.
* The A-Team: Real Vietnam-era 12-man A-teams were commanded by captains, not full Colonels like Hannibal Smith.
* The A-Team's body as the infection begins if they cannot get supplies in time.
* The A-Team scene where the ground attendant accidentally guided the plane to smash into the terminal.
* The A-Team: Smith is knowingly put in the cremation oven still-alive, but the goal wasn't to kill him, and in fact his escaping from the oven was all part of the plan. When he emerges alive, the attendant's reaction to the following line is to faint:
* The A-Team. Some mooks are trying to get information out of B.A., though he has said all that he knows already, so they try to hang Murdock to get him to talk more. As soon as the car Murdock was stood on reverses away to leave him dangling, Hannibal and Face drive in and Hannibal shoots the rope.
* The A-Team Special, the MythBusters first attempt to duplicate the results of a particular case in which the A-Team are locked in a lumberyard and manage to create a kind of board-throwing gun. Having shown that the method used in the show doesn't work, Adam and Jamie then set out to place themselves in the same situation: they were locked in a lumberyard full of equipment with a time limit until the "bad guys" would return, and were indeed able to create a functional board-throwing gun in those conditions.
* The A-Team spent a long time trying to keep his mother in the dark about things, but ultimately had to break the news to her. Since then, she has played small roles in his operations, even once getting information out of a captive after Michael's interrogation techniques didn't work. Despite this, she wishes he would settle down, and the things she is asked to do sometimes unsettle her.
* The A-Team starts with the team baiting a Mexican cartel into chasing them over the Rio Grande in helicopters, making the cartel guilty of invading US airspace and getting shot down by Air Force jets.
* The A-Team suppressor on his pistol. While the gun's pointed at him no less. He then proceeds to aim it at Pike such that it'll more likely kill the agent on the right than the target. Pike overpowers him and hands his gun to the agent on the right, hoping that this one isn't as much of a complete imbecile. Sadly, that agent then answers his cellphone, while also pressing the gun to his face. Not to mention that all this was happening in a moving vehicle. By that point, even Lynch was exasperated with the firearms handling incompetence.
* The A-Team's weaponry source is unclear and they have no organisation backing them up, averting this trope in one of the most Eighties of the shows.
* The A-Team, team leader John Smith did this at the start of every episode, but he only used it to fool potential clients until he decided they were O.K. Then he'd take off the disguise right in front of them.
* The A-Team: The A-Team completes their seizure of printer plates for American dollars from an ex-Iraqi Army gang by hooking their cargo container to the underside of a V-22 Osprey piloted by Murdoch and flying away with it—with B.A. conveniently locked in the container so he can't kill them all over his fear of flying.
* The A-Team ("The Bend in the River") had the team hiking, camping, and fighting in the jungle for several days. The guys were sweaty, rumpled, and grungy, but

their resident girl looked utterly perfect at all times, to the extent of her white shirt and pale slacks remaining spotless while she was kneeling in a hole digging for ancient artifacts.
* The A-Team. Their escape plan involves having Murdock walk down the aisle disguised as the bride; thus resulting in MURDOCK becoming a runaway bride himself. Murdock later writes the villain a letter of apology for leaving him at the altar.
* The A-Team, the movie starts out eight years in the past with Face being a lieutenant and Murdock being a captain. Hannibal is referred to as a colonel, but it's not expressed at the beginning of the film whether he's a lieutenant colonel or a full-bird. When the movie moves to the present, apart from BA, who is now a Sergeant instead of a Corporal, they're all still the same rank.
* The A-Team. Then in the fifth season, he confesses to a murder he didn't commit so the prosecutor won't go after Murdock.
* The A-Team, there was a first season episode where Hannibal, BA and Murdock were trying to get arrested so they could look into a prison fight ring. They tried pretending to be drunk, but the police let them go. To make sure they got arrested, they drove a car through the front wall of the police station. The clip made it to the opening credits.
* The A-Team", the team are transporting dynamite — which is not normally volatile until/unless it has a blasting cap attached — but it is really really hot and as a result the sticks of dynamite were sweating nitroglycerine.
* The A-Team", the team finds bags of a white powder while investigating the warehouse. Hannibal tastes a bit and promptly identifies it as heroin.
* The A-Team, the team gets captured by Col. Lynch. Murdock gets onto the military base the team is held at by stealing a truck and posing as a delivery guy for a bakery. He even tells Amy, "Security is always weakest through the kitchen."
* The A-Team, the team was once hired by a group of pacifists to protect them, but when the team tried to use violence, the pacifists fired them. Hannibal said that at least they weren't hypocrites.
* The A-Team. They consisted of Americans, hijacking an airliner with the aim to extort money.
* The A-Team. They stay in the U.S. because they are Americans and it's their country.)
* The A-Team they were like that even before they were sentenced for a crime they didn't commit.
* The A-Team thinking they can use him to find the team. He manages to drive them crazy before they even get back to their hideout.
* The A-Team thrown together using the materials at hand. This trope could just as easily have been called "Locking the A-Team in the Motor Pool Workshop".
* The A-Team to be Face's father, but it also underlines the quasi-father/son relationship that they have.
* The A-Team to smuggle their weapons into the foreign country where the episode takes place. That time had an unconscious BA in the casket as well.
* The A-Team to the bafflement of one of the guards due to his top-notch people skills and extensive contacts both military and civilian. As Face puts it, "It isn't who you know, it's how you know them."
* The A-Team wasn't particularly interested in "spit and polish", but being a Special Forces style group with a good track record they were given a lot of slack up until they were framed for stealing money printing press plates. The rest of the military is mildly military in this movie. Face spends at least six years as a first lieutenant for some reason when in real life, he wouldn't have that rank more than two years before receiving a promotion to captain.
* The A-Team were convicted of "A Crime They Didn't Commit" which was eventually revealed to be a bank robbery in Hanoi, Vietnam. In truth, they had been ordered to do it, but the man who gave them the order was killed and all evidence of his orders destroyed.
* The A-Team when Murdock tries to escape the mental hospital by jump-starting an ambulance. With a defibrillator. It doesn't work.
* The A-Team". When Turian gloats to Face that he's already too late to stop him

from stealing the fashion designs, Face reveals that he suspected Rina would be frightened enough to inform on him and hence he didn't replace the film. Turian sent the decoy roll with Murdock's designs to his boss and tossed the real roll into the harbor.
* The A-Team, where the titular team regularly cobbled together weapons and vehicles from random ingredients, such as twenty-four feet of PVC piping, a metal dune-buggy frame and household chemicals.
* The A-Team. While a little blood showed here and there, the series was infamous for inflicting the most extreme mayhem on bad guys... who always crawled away a bit shaken.
* The A-Team. While he's quite excited to be flying in such a dangerous situation, when the plane is actually hit by a missile, he calmly says, "Ladies and gentlemen, if you look out the side of the aircraft, you'll see the right wing is on fire."
* The A-Team who's too big for them to handle. Cue B.A., who proceeds to knock the sucka's lights out. Five minutes later he's back to insulting Murdock and Face and threatening to beat them up himself. Happens every few episodes.
* Theater des Vampires out vampires killing humans on stage while the human audience watches in oblivious entertainment, and sometimes even satirically offer themselves in place of the victim they don't believe is a victim.
* Theater director Julie Taymor won the Best Musical Tony for her adaptation of
* Theater in general was often the target of preachers in early modern Europe. The preachers claimed that theaters promoted immorality. Theaters were forcefully closed more than once. For example, when Oliver Cromwell and his puritanical supporter took power in England mid 17th century, all theaters in London were closed down. The same thing happened in the Netherlands in 1672; when the country was attacked by France, England, and two German states, preachers successfully blamed the cause of the war on God's displeasure, which was in turn caused by the theaters.
* "Theater of Magic" has some live-action faces on the walls of what seems to be a museum. Seconds later, a "painting" shows a live-action shot of a building getting demolished, along with smoke that persists into the next shot.
* The atevi are perfectionists who will concentrate on getting a technology just right before moving onto the next form of technology, while humans are completely fine with "good enough".
* The Atheist Bus Campaign. The ads demand that you stop being religious and the links for the people involved are shown in very tiny text, thus confusing many.
* The Atheist Experience podcast) regularly criticizes Catholic priests and Protestant ministers for this behavior.
* The Atheist Experience: "Theists, we don't hate you, we just think you're wrong!"
* The Atheist Experience will happily debate any theist who calls in but the hosts aren't afraid to insult or degrade the deep-seated beliefs of others when the opportunity arises.
* The Athletic grade (a co-writer gave an F-, and both gave the seller an A+, showing neither could believe what they just witnessed).
* The Atholl Highlanders are the last feudal-style aristocrat's private army existing in Europe, under the personal command of the Duke of Atholl and not a part of the British Army in any capacity. They exist for reasons that more or less boil down to "Queen Victoria thought it was cool". Luckily the army only sees ceremonial guard duty as it would presumably cause havoc trying to fit it into modern international law.
* The "A Tip From A Former Smoker" PSA's are aired during nearly every ad break during ABC's Daytime programming.
* The Atlanta Braves won a record-setting 14 consecutive division titles (or 14 in 15 seasons, depending on whether you believe the 1994 season, which ended in a players' strike, counts). They took home the World Series trophy
* The Atlanta Dream are the youngest team in the league but are a good example nevertheless. In 2010, they made it to the WNBA Finals and got swept. In 2011 they made the Finals again and got swept again.
* The Atlanta Rhythm Section's "Homesick" is about the "native son of a foreign

land" who's "lost in yesterday".
* The Atlanta Ripper. An unidentified serial killer active in Atlanta and its vicinity. He/she killed more than 20 black women and dark-skinned "mulatto" (mixed race) women from 1911 to 1914 or 1915 (which was the last "canonical" murder is in dispute). Most of them had their throats slit, but levels of additional mutilations on the bodies varied widely. The police and/or the press suspected the involvement of the Ripper on a few murder cases dating from 1917 to 1924, though the similarities were questionable. There are multiple theories on the identity of the killer, including one that claims that there was never a singular killer and that the original murder(s) and the publicized details inspired a large number of copycat killers. There simply are no definitive answers in this case.
* The Atlanta version of this would be The Varsity. A classic place that's more modern, and even has a gift shop, since The Varsity is known in the south.
* The Atlantean myth unit known as the Behemoth (available if the player chooses Rheia when advancing to the Heroic Age) has a x5 attack bonus against buildings and has regenerating health.
* The Atlanteans have a unit known as the Destroyer, which is a flamethrower that's strong against buildings but weak against other units.
* The Atlanteans take this even further, for before the destruction of their civilization, they saw Aernus not as God himself, but as the accidental fusion of the two souls (Al-Aion and Fa-Aion) of God, known to them as the Aion.
* The Atlanteans wear small glowing crystals as necklaces that can provide some light if there isn't anything else available. When Milo and Kida go exploring some underwater murals, they use Kida's crystal as a reading light.
* The Atlantic Canadian folk song "Dark-Eyed Sailor" has the same setup.
* The Atlantic Federation faction of Earth Alliance pull one of these in
* The Atlantis Expedition also evacuated a planet that was about to (and then did) experience the eruption of a super volcano.
* The Atlantis Grail series, the United States has fallen into second-world status due to several causes such as damage through climate change (Manhattan is specifically mentioned as now being a city like present-day Venice) and the rise of China and new nations (such as 'Greater Scandinavia' and 'United Industan' - the merger of India and Pakistan into a single super-power). Also, it's heavily implied that the West Coast of the U.S. has fallen on hard times due to radiation from the 2011 Japanese tsunami and nuclear accidents, as the main character's family moves to Vermont from California after the mother develops cancer (from radiation exposure suffered during their time in Los Angeles).
* The Atlantropa Articles, Ansel has a massive ship that sails through the sands of the Kiln desert.
* The Atlantropa project, a proposal to build a series of massive dams at the Strait of Gibraltar between Spain and Morocco, the Straits of Sicily and Messina between Tunisia, Sicily, and mainland Italy, and at the Dardanelles to lower the Mediterranean Sea by up to 200 meters. Additional dams would've been created in the Congo basin to create a massive inland lake. In theory, this would've opened up massive new farmlands (especially in the Adriatic Sea), created an African reservoir to use for irrigation and shipping in the interior of the continent, generated tons of cheap, clean electricity with the mega-dams, and tied the Middle East and Africa closer to Europe, which Atlantropa's supporters felt was necessary for Europe to remain competitive with the rising
* The Atlas has an Autocanon/20 mounted on the hip, and a 6-shot short-range missile launcher mounted on the leg.
* The Atlesian Paladin is a vaguely humanoid robotic war-machine that can function as a remote-controlled battle drone. However, the torso is a cockpit that can fit an adult, who can control the Paladin directly from an internal console. While the Paladin is bigger than a human to be able to comfortably accommodate one in the cockpit, it's only approximately 2-3 times the height of a human, making it a relatively small mecha option.
* The atmosphere of Venus is thick enough to efficiently distribute heat across the entire planet. There is a 20-30 degree Centigrade difference between the polar

and equatorial surface temperatures, but that's in the context of a 460 degree Centigrade average surface temperature (and an 80 degree difference between the median altitude and the planet's highest point on Maxwell Montes).
* The atolla jellyfish, fittingly nicknamed "the alarm jellyfish", combines this and
* The Atom Ant Show (1965-1968). In one episode only it was revealed (and subsequently forgotten) that he could be involuntarily distracted by the presence of a picnic.
* The "Atomic Axe", which can cut through anything (even abstracts like time itself), is the weapon of choice for the Persuader, foe of the
* The Atomic Bloodstained Bus, the three certainties are death, taxes and ceiling fans.
* The atomic bomb dropped on Hiroshima. The possibility of atomic weaponry had been theorized by every major power in the war, but the Germans believed it wouldn't make a noticeable difference in the war (and they kept drafting their best physicists and sending them to die in battle, as well as dismissing some of the underlying scientific theory as 'Jewish Physics'), the Japanese didn't quite have the gear and the resources they'd have needed and the Soviets couldn't spare the necessary resources while also trying to defend from Germany. It came as a surprise to everyone when the US turned out to have achieved the unachievable.
* The Atomic Brain), Dr. Otto Frank steals the bodies of the recently deceased so he can test his atomic-powered revival machine. These "recently deceased" have been dead for a bit, reviving them leaves them as mindless zombies, but it's proof of concept that he can revive the dead.
* The Atomic Brain. Miss Marsh's companion tries to double-cross her, killing her and letting the remaining girl take her money, but Marsh kills him. The scientist, Dr. Otto Frank, pulls one by placing Miss Marsh's brain with the cat's, revealing that he wanted to keep her locked away in the cat so he could use her money to continue his research on reviving the dead. Miss March responds by locking him in the revival chamber and setting the dial to "Frag the entire house".
* The Atomic Brain there's a moment where the dottering old woman who serves as the film's antagonist sets off after a pair of young girls. Servo quips "Oh, this is going to be some chase scene."
* The Atomic Cafe is created entirely from stock footage, the vast majority of which was originally produced by the US government.
* The atomic drop is a well known, widely used method of hurting someone's butt. Though, it is more of a knee than a kick.
* The Atomic Energy Lab was a real toy. In 1951, A.C. Gilbert introduced his U-238 Atomic Energy Lab, a radioactive learning set we can only assume was fun for the whole math club. For a mere $49.50 (adjusted for inflation: $491.41 in 2020), the kit came complete with three "
* The Atomic Fireballs, the singer tells how he woke up to discover that his lover has left him overnight. She also tied him to the bed and deposited all of his belongings on the lawn.
* "The Atomic Invaders". Herman Brownmetal is a butterfly collector who goes along with the team on its mission. At the end of the episode he asks the aliens if they have any butterflies on their planet. Erica Lane says "Oh Herman!" and both she and Jonathan Kidd laugh.
* The Atomic Submarine as it closes. So in this case it was a Contracting Door.
* The Atom. It gives him everything he's ever dreamed of - but not the things he truly wants, which are back in reality.
* The Atomos is an experimental heat-based arm-mounted laser of Grineer design.
* The Atom/Ray Palmer debuted in #34 (October, 1961). He also headlined issues #35-36 (November-December, 1961). Feedback and sales were positive enough for him to "graduate" to his own ongoing series, starting in July, 1962. His ongoing lasted to 1969, with a brief revival in 2010.
* The Atom. See the quote in that page for the details of how he tortured one villain.
* the (at one point, he loads his gun with crayons and forgets how to spell his

name).
* The Atoner: A character seeking to make up for all of their bad deeds.
* The Atoner: A formerly-evil character trying to make up for their wrongdoings.
* The Atoner: An antagonist makes up for their mistakes by repaying their victims with kindness.
* The Atoner, and currently is the Red Harpy, whose looks and mentality are a mix of the former two.
* The Atoner, and that's where Faust came from. (It's confirmed at several points in the series's Story Modes.)
* The Atoner as she has done past evil actions under free will due to being a general for the Empire. It can be said that she does fall under this trope later in the game, as the Empire tries to bring her back to their side on the Floating Island, but she refuses.
* The Atoner: Character wants to make amends for the wrongs they have done.
* The Atoner mindset. He adopts the daughter of a stranger, lifts a heavy beam off another stranger, and spares the man who hunted him for a decade for breaking parole, all out of the goodness of his heart.
* The Atoner: The hero really wants to redeem themselves for bad deeds or horrible mistakes they've made in the past.
* The Atoner: This character has done wrong in the past, but they recognize their errors and change for the better.
* The Atoner toward the end when he has a flashback to the last time he tried to find the titular Stone due to Ducky coming close to meeting the same fate as did one of the dinosaurs on the earlier expedition.
* The Atoner. Usually only when he's kind of right and the thing is worth angsting over, but the contrast to all the other powerful sword characters is interesting. Except later-stage Aoshi, but he's probably emulating Kenshin.
* Theatre critic George Jean Nathan unabashedly described himself as a destructive critic. Early in his career, he went so far as to review several plays as
* Theatre Europe (Conversely, when playing as NATO, your goal is to defend yourself for a requisite number of turns; if you ever enter the Warsaw Pact territory, the enemy will start a global nuclear war. You can also trigger it deliberately, or by provoking the enemy by launching one too many nuclear missiles against them.)
* Theatre/Hamilton but only it's after does he find out the latter didn't want to kill him. He wrecks his political career and goes down in history as a villain while Hamilton becomes a martyr.
* Theatre/Hamilton had Alexander use this trope looking for advice from George Washington on whether to come clean about his affair with Maria Reynolds. However, this part was cut out of the musical quite early.
* Theatre has a long history of being banned or closed in the Christian world for reasons of immorality.
* Theatre makeup, when seen up close, can have this effect. Since the purpose is to make it easier to read facial expressions from a distance, it often heavily emphasizes the eyes, mouth, and cheekbones. Even the most diplomatic of people would have to say a stage actor up close looks a little overdone, and this only applies to the most standard look. Any time makeup is used to certain effects, such as making a young actor look older, invoking an animal-like look (see
* Theatre of Blood: a cop hiding in the trunk of a car in an attempt to follow Lionheart ends up parked on train tracks. We hear him over the walkie-talkie to the other cops:
* Theatre of Blood: After cutting out Dickman's heart (and ensuring that it weighs exactly one pound), Edward Lionheart mails it to Devlin in a gift-wrapped box.
* Theatre of Blood (and gluttonous) critic being force-fed his two surrogate-children pet poodles until he chokes.
* Theatre of Blood, Edward Lionheart cuts out the heart of one of his victims while he's strapped to a chair.
* Theatre of Blood, Lionheart and the Stage Manager pose as constables to lure Maxwell into the ambush at the squat.
* Theatre of Blood— a cop hiding in the trunk of a car in an attempt to

follow vengeful killer actor Edward Lionheart ends up with it parked on train tracks. We hear him over the walkie-talkie to the other cops:
* Theatre of Blood, Merridew discovers partway through consuming what he thinks is a special meal that he is actually eating his beloved dogs.
* Theatre Of Cruelty brings up the complaint that "wizards made locked room mysteries commonplace" (though there are never any actual examples of this happening in the series).
* Theatre of Death, a couple on a romantic outing in a boat discover a body floating in the river. Needless to say, this shatters the mood.
* Theatre of Death, a passage concealed behind a bookcase in Davras' library leads to his secret lair in the attic.
* Theatre of Death, Colette does a reading for Nicole at Davras' party. The first three card are fairly standard, but the last two are The Tower (or The Lightning Struck Tower as Colette calls it) and Death. Colette interprets these as meaning violence and death.
* Theatre of Death, one of the sketches in the theatre involves Dani being burnt at the stake as a witch. For a moment, it looks as is Nicole is intending to burn her for real.
* Theatre of Death. The father turns out to have nothing to do with the case.
* Theatre of Magic has a hole under the trunk to lock balls in the center of a loop. Normally, diverters to the holes are down until lock is lit, but it's still possible to shoot the loop lightly so that the ball stops mid-loop and falls in the hole. Doing this will trigger a special animation where a magician falls down the stairs into the Haunted Basement: "Oooohhh Noooooo! Ow oof aak oof ack! This ball is full of wonders!" and allow you to lock balls without spelling "Magic". In a double case of developers' foresight, doing this a second time in the same game will only award some points.
* Theatre of Magic: Hitting the chest after launch will yield one of three player-selected rewards. At other times in the game, the player must hit the captive ball instead.
* Theatre of Magic not only has a ball saver, but hitting the "Hocus Pocus" target enables two magnetic ball savers near the outlanes, which automatically catch any wayward balls.
* Theatre of Magic, which locks the magician in an underwater trunk, then gives players a limited air supply (time limit) to complete the illusion.
* Theatre Of The Absurd are unrealistic and only make sense on a symbolic level.
* Theatre Of The Gods: The crew of the Necronaut find their ship in a dark, swampy world. It turns out that they were inside a "Sweetie" which is a giant slug-like monster with tentacles and extendable arms. The "Sweetie" they were in was over 10 kilometres long and that was just a pupa. Later on in the book, there's an adult "Sweetie" and it's bigger than many superplanets and easily wipes out a religiously fanatical starship battlefleet. It also easily breaks out of the gravitational pull of a nearby black hole.
* Theatre productions vary on how meaningful this detail is, as any of the motorcyclists passing by on their way to the castle could have mentioned the unoccupied car. Some directors do try to establish there was a car-trap on the road, either to get random passersby
* Theatres not infrequently have "hidden passages" installed over the "house" (audience seating area) for maintenance and adjustment of lighting or sound equipment that would be difficult or awkward to reach in any other way. However, these generally don't "go" anywhere and you usually have to exit back out the same way you came in (A really enterprising person might rappel down from a catwalk, but anyone doing so would almost certainly be in full view of the audience and draw more attention than they would have had they just walked in the main door quietly.)
* Theatre/Starship: Commander Up was chopped in half (top down; hot dog, not hamburger) and no longer has a dick.
* Theatrhythm Final Fantasy), but for those that already own one, the whole ordeal is pretty much a waste of time and money.
* Theatrhythm Final Fantasy, includes all the songs from the first game + DLC, but

also has its own DLC songs (and characters).
* Theatrica features someone urinating themselves just before standing trial. The trial procedure is severe, and the punishment system rather brutal.
* theatrical movie, but they escape just in time and retreat to live in exile in Alaska.
* theatrical, Mr. Stone threatens to fire Mr. Conklin once Stone's elected to the new post of "Coordinator of Education". This sets up the subplot where Mr. Conklin runs against Mr. Stone to head the school board.
* theatrical version use double swords during fights, a stylized representation of their claws.
* theatrical, who'd previously played Jimmy Olsen in the Donner/Reeve Superman movies, plays a Metropolis PD officer named Jerry who pleasantly greets Lois on her way to Superman's memorial.
* Theatrica verge on the brutal. Sometimes a harsh accusation from a would-be victim is enough for them to bring the full, violent force of the law down on any given individual. One warden in particular qualifies for this trope...
* Theatrics of PainActors exaggerate pain for the benefit of the audience.
* The atrium of the Georgia World Congress Center is used for scenes set at SWORD headquarters.
* The Atrocity Archives. She's seeing someone else at the time so he doesn't follow it up, but he saves her life two more times during the course of the novel, so at the end, she decides to move in with him of her own accord.
* The Attackers, one of the female pilots is shot down but manages to crash land her plane. However, in addition to a bullet wound to the shoulder, she also suffers a nasty head injury. The doctors tell her that the brain injury will make her incapable of flying in combat again. She is reassigned to a flight school as an instructor but subverts this trope by tricking another doctor into giving her a clean bill of health and is sent back to her squadron where she continues to fly combat missions. However, in the last episode of the series, this trope is double subverted when the injury catches up to her, she blacks out in the cockpit and is killed.
* The attack force is light infantry (not mechanized), with no armour or air support. While the lack of armour support is
* The Attack Moons were hollow planetoid ships used by Orks during the War of the Beast. They were created by directly converting the matter of actual planets into the ships, with the same process allowing Attack Moons to repair by stripping planetoids.
* The Attack Of The Annihilator, Batgirl falls to her death after being blasted out of the sky by the eponymous villain, but she is promptly saved by Supergirl's timely arrival.
* The Attack Of The Annihilator beneath the streets of Gotham, containing a garage, an armory, a computer and more.
* The Attack Of The Annihilator builds a ray gun powered by an alien rock's mutating energies with the purpose of transforming a woman into another psychic mutant like himself.
* The Attack Of The Annihilator hurls a smoke bomb to keep the Annihilator confused and distracted while she picks an unconscious Supergirl and runs away.
* The Attack Of The Annihilator up, her friend Doreen switches on a TV set right when a talk show is interviewing Linda Danvers (subtly informing readers that Supergirl is in the area prior to her showing up). Suddenly the show is interrupted by an emergency broadcast reporting some lunatic is blasting holes into a research laboratory.
* The Attack Of The Annihilator up to contain him while she and Batgirl decide what to do with him.
* The Attack of the Dead Men. Back in WWI, a German charge was routed by Russian soldiers who'd been victims of a gas attack, bleeding and coughing up blood as well as having some of their flesh starting to dissolve. The Germans, despite having massive numerical superiority over the dying Russian survivors, may well have thought this trope was in play due to the ghoulish condition of their foes, and so

panicked and fled.
* The attack on the second Death Star. The Rebels attacked because they believed the Emperor's
* the attack on the village was apparently done by a group of evil senators.
* the attack on Ylesia knows, Jabba will find out soon enough just how true that is.
* The attack Seifer uses on Squall while they're training in the opening FMV you can later use as his Limit Break 'Fire Cross'.
* The attack that Yuri uses to defeat the Adephagos can be learned in the PS3 version as his second Mystic Arte Heavenly Bladewing.
* The Attack Titan — when held by Eren Yeager — has no lips or cheeks, just a massive number of identical teeth set directly into its jaws; which prevents it from talking but comes in very handy for biting.
* The Attack Titan... well... attacks other Titans while ignoring the nearby humans.
* The Attack; with the hoist raising his underwear (and worsening his wedgie) every time he died in the game.
* The Attarn aren't the only ones to use good old chemically-propelled firearms, as both Earth Alliance and the
* The attempted colonisation of the pioneers erodes the hostile elements of the environment (new medium), making it friendlier. New organisms (producers) move in — seeing the potential of the changed environment [new medium] — and establish themselves, which would not have been able to survive before the first pioneers had altered the environment [new medium]. New producers also bring new consumers and the face of the resultant community changes.
* The attempt on Ronald Reagan's life by John Hinckley Jr. might have succeeded had it not been for the actions of Secret Service agent Timothy J. McCarthy, who leapt in front of Reagan, receiving a wound in his abdomen. He survived. This remains the only time since the Secret Service was officially charged with protecting Presidents in 1906 that a Secret Serviceman has actually taken a bullet for the President.
* The attempts by Unit 731 to learn how reverse death only succeed in creating a virus codenamed "Manchurian Gold", which kills people but resurrects them as mindless husks, lacking any will beyond external stimulus; unless given direct orders, they stay completely inert. Also, the virus can only be spread by being directly injected into a subject.
* the attendees at a Burrow Sunday lunch argue about who would win in a fight between Kingsley Shacklebolt and Steve McQueen, with and without wands.
* The attention to historical detail, plus the bonus episodes exploring the history behind the fiction, mean that is is possible to learn quite a bit about the history of the Johnson Administration and the politics of late 1860s America from
* The AT-TE of Episode 2 is designed very similarly to a tank despite technically being a mecha, with a low profile, multiple antipersonnel weapons, no real head, and a massively powerful swivel-mounted weapon on top. If you removed the legs and added treads, it would look like a tank. (The cockpit is transparent, but it's
* The Attic Mice, written by Ethel Pochocki and illustrated by David Catrow, the mother does this to one of the mouse children after he gets too mouthy with her. Afterwards, he runs away and ends up eating a large portion of a bar of raspberry soap, thinking mistakenly that it was a treat. He ends up falling ill and the mother blames herself for it, not realizing what he did.
* The attic minis do this. They're white at first but turn red when their creepiness gets to higher levels.
* The Atticus Institute, what starts out as a 1970s investigation of psychic abilities turns darker when it turns out their star subject's powers come from this trope.
* the attitudes of rowdy teenagers.). It's probably not coincidental that a related Gem caste (the Rose Quartzes) appears to have been completely decommissioned, nor that they seem to have been the few surviving servants of the person the aforementioned memorial was for.

* The Attorney-Client Privilege a crime, as a communication in furtherance of a criminal conspiracy cannot be privileged. It can also be waived by the client — even in an implied way, if they start mouthing off in public about what their lawyer told them.
* The attorneys we actually meet tend to range from common Morally grey (Lindsey McDonald, who seeks power above all else, though maintaining some semblance of conscience) to villains (Holland Manners and Lilah Morgan (although she arguably becomes more morally gray in Season 4
* The attorney tries to get one for a client, but the client has the attitude
* The attrition, technological decline and total warfare seen in the Succession Wars ended with the Clan Invasion, who brought with them technology that had either been forgotten since the Fall of the Star League or completely unheard of altogether.
* The AU arc has the backdrop of the Scolemis dictatorship and the Resistance fighting one another, only for it to take a direct role when they have their generals invade Kanto, Johto, and Hoenn directly and have the J-Team fight them there during the latter portion of the arc. Later on following Napoleon's rebellion, it turns into a
* The Auburn Knight. The Queen (she doesn't even get a name) is manipulative and cruel, although, to be fair, she's no different than the former (male) rulers of the kingdom.
* The Auctioneer also has an incredibly designed suit covered with a variety of buttons setting him apart from the other south scavengers.
* The Audi 5000 suffered a number of accidents involving "sudden unintended acceleration." A major factor was that the brake and accelerator pedals were closer together than on the typical American land yachts of the time, making it easy to press the accelerator instead of the brake.
* The Audi A3 only hit the North American market on its second generation, by that point it was even made in Brazil, funny enough, its VW cousin, the Golf MK4, was being exported since 1999, and by the next year all the units were made in the very same Brazilian plant.
* The audience are expected to loudly boo and hiss whenever the villains are onstage.
* The audience doesn't hear it, but we cut to outside of the house as the church's organ lets out a note (Fittingly F minor), crows are disturbed and fly off from their perches, and the neighbors around the street stand around in shock.
* The audience finds out that Nathan is Claire's father before Claire does.
* The audience first learns that Jade and Davesprite were dating when she
* The audience found out who was blackmailing Syed before anyone in the story did.
* The audience glimpses the tail end of one of these arguments in the
* The Audience: Happens in chapter 29 to a hapless pony orderly who's used to pushing around quadruped patients in pony wheelchairs, which you tip forward to help the patient step off. Unfortunately, this time the orderly is wheeling around a human in a typical human wheelchair, and ends up reflexively tipping it forward and accidentally dumping his patient onto the ground.
* The Audience in reference to the Mane Six and the use of the Elements. He must then give a brief, summarized description to Fluttershy.
* The audience is spared the deaths of at least two likable characters.
* The audience is "treated" to Jason Segel's full-frontal privates at the outset
* The audience is treated to several gratuitous full-body shots, and an instance of
* The audience knows all along that the boy Ako falls in love with is really Negi
* The audience knows it's going in a different direction, but Daniel's conversation with Reece (a young, female android) in "Menace" initially sounds like it's heading into The Talk territory. Instead, he's trying to tell her that she's a machine, not a human.
* the audience loves his antics means that 10 years later, his actions come across as much nastier, due to evolving views on consent, respect, and rape.
* The audience often calls for Nasser Rabadi to be kicked off the livestreams, and

jokes at his expense are common. He is also pitied as a hopeless virgin by Ethan and the others. On several occasions, Ethan has asked female guests to give Nasser dating advice while he's present.
* The audience thinks they're choosing things at random, and he's been influencing them by seemingly-random phrases throughout the routine. Naturally, some people don't believe it, and there's usually a controversy. The man tried to use what was ostensibly a personal development course to make people rob an armoured car with a toy gun.
* The audience, who got used to this, started lampshading double entendres by laughing even in situations where even Groucho didn't realize something sounded like an innuendo.
* the audience will try to recreate the experiments at home entertainingly in at least one episode:
* The Audi, it is mentioned that Peter learned to drive under Bucky's tutelage in Russia when they were both in HYDRA, meaning Peter himself was a HYDRA-agent younger than 15 years of age before they became members of the extended Avengers family.
* The audiobook of "Infinity Welcomes Careful Drivers" is performed by Chris Barrie alone, but sounds like a full cast recording. Barrie also does this on an unbroadcast script episode ("Identity Within") that was included in the Series VII DVD as an extra.
* The audiobook of Larry Correia's "Tom Stranger: Interdimensional Insurance Agent" features President Baldwin, read by
* The audio commentaries that get activated when you've finished the game only make it weirder. Inside many of those same rooms are audio clips by GLaDOS' fantastic voice actress, who delivers her random anecdotes with a certain frantic, hysteric edge to her voice that just makes it freaking creepy. Presumably this was fully intentional on the part of Valve.
* The audio commentary takes the rather surreal tactic of claiming that what we're viewing is an adaptation of actual events. The commentators include the "real person" on which one of the secondary characters was supposedly based, and they go so far as to constantly explain how the events depicted differ from "what really happened" and make comparisons between Peter Weller's portrayal and the "real" Buckaroo. (At least this is equally odd as the movie.)
* The Audi "Progress is Beautiful" ad, which aired frequently on NBC during the 2008 Summer Olympics.
* The Auditores, the Medicis, the Grandprés and the Dorians are major subversions of this trope since they are aristocrats aligned with the Assassin Brotherhood instead of the Templar Order.
* The Auditors of Discworld reason that any sentient personality exists for a finite period, which is negligible in comparison to the infinity of Time. Therefore, they instantly cease to exist if they make the fatal mistake of identifying themselves as "I". The book Lampshades the Insane Troll Logic of this, but the erring Auditors themselves vanish too quickly to ever catch on.
* The Auditors of Reality are sometimes referred to as, essentially, the most ridiculously anal taxmen in the history of the universe. Particularly in
* The Auditors of Reality give a bit of a Lovecraft vibe whenever they show up. Not least because their stories tend to center around
* The Auditors of Reality, on the other hand, who are roughly personifications of the laws of the universe, are antagonistic towards all life, especially intelligent beings. They have it in for Death, too, particularly as he takes the side of life against them; this results, especially in
* The Auditor, the new leader of the AAHW who controls the Master Improbability Drive and only seems interested in ensuring that the madness and chaos continues on.
* The Audubon Ballroom is the galaxy's most notorious band of terrorists, or freedom fighters, depending on how you feel about the Manpower Corporation, and genetic slavery.
* The Aughts and a host of regional titles, and put on a Fight of the Year winner

in 2014, but both times he stepped up to challenge for a world title, he was knocked out, with Danny Garcia in particular embarrassing him. He retired in 2018 never having tasted world championship gold.
* The August 10, 1985 strip had Garfield take off his fur like a suit before stepping onto a scale.
* The August 2011 Virginia Earthquakes was felt as far north as New York and shook enough to cause damage to the Washington Monument, forcing it to close for almost three years as it underwent repairs.
* the August 21, 2021 strip, Garfield boasts to the grumpy, chained guard dog that nothing can wipe the smile off his face.
* The August 9, 1996 strip had Jon call a woman on the phone "Miss Poopie-Head" after she told him
* The Auntie Poo and the Porta-Potties song "Flush The Magic Dragon" is about what can and can't be flushed down the toilet.
* The Aunty Jack Show had one character play a Learn-To-Speak-Italian record... only to have the female voice get passionate with him, and discuss having an affair. At which point her husband comes in (on the record), shooting her then himself.
* The Aunty Jack Show, she died of a heart attack. However in the specials and on her Twitter account, she was revived.
* The Au Ra can provide both sides of the trope, with their males being among the tallest of the races, while the females are the shortest (Aside from the Lalafell, who they still beat by a good margin).
* The Aura is with the Forgotten almost always does this when getting arrow kills.
* The Auric Bastion was a colossal wall built with magic and faith during the End Times, impossible to climb or scale, and even self-regenerating. Unfortunately, it was too much of a drain on the Empire's mages and clerics, and eventually fell after the wall's architect was revealed to be studying forbidden magics in hopes of keeping the wall up.
* The Auricom Prototype cannot be stunned by weapons and regains shield energy overtime, but cannot absorb weapons normally and cannot pick up defensive weapons either.
* The Aurifaber wedding party chase the bard Liliwen right into the abbey, where he manages to claim sanctuary just in time to avoid being summarilly hanged for the Aurifaber patriarch's (apparent) death.
* The Aurora Borealis, better known as Northern Lights (Aurora Australis if you're on the South Hemisphere) which are caused by the effect of certain solar particles on Earth's magnetic field, can look like someone was having fun finger-painting the sky.
* The aurora-like things you see in Outland are actually parts of the Twisting Nether that is bleeding physical world after Draenor was ripped apart by opening too many portals to the Nether. The Netherstorm zone is a result of an extreme version of this process.
* The Aurorans are good examples. Their bloodthirstiness varies by House, however. Ironically, the Proud Warrior-est house among them, the Heraani, are also the ones most likely to
* the Aurorans insult the graduate physicians of Palein, who spend their lives healing the countless warriors seriously injured in battle.
* The Aurora Staff's base form, the Bright Staff, is won from completing the third Wheel of Harma trial in fifteen moves or less. It is guaranteed to remove any debuffs on hit.
* The Aurors (magical police) tend to wear brown trenchcoats when on duty (only Shacklebolt doesn't), with retired Auror Mad Eye Moody still wearing one all the time.
* the Aurum and later the Chaos Kin into the mix... Does anybody get along in this game? As a matter of fact, if you stop to pay attention, you will see mooks of different factions beating each other up. Sometimes they'll even kill each other for you so you don't have to.
* The Aurum is a race of robots from space that are all quite strange. Some look

like wheels, some look like triangles, some are strange things that wave at Pit.
* the Aurum's case, since Palutena's Army, Hades' Underworld Forces, and Viridi's Forces of Nature join together in defeating them.
* The aurumvorax is an eight-legged wolverine-like animal that eats metals and ores, but has a special affinity for gold.
* The Aussie version, the ASLAV, is even more awesome by having something most military vehicles lack,
* The Austere Academy Klaus's teacher makes her students measure various "ordinary objects: a frying pan, a picture frame, the skeleton of a cat."
* The Austere Academy. They are also regularly bullied by a rude, violent girl named Carmelita Spats and Sunny (a baby) is made to be a secretary for Nero. There's also a rule that if students are late to class (or Sunny is late to work) their hands will be tied behind their backs during meals and they'll have to "lean down at eat their food like a dog". Sunny has her silverware taken away because she must work in the administrative building where students are not allowed. Also if students are late to meals (which are not at specified times) their glasses are taken away and beverages are served in large puddles on the trays.
* The Austin Lounge Lizards lampoon these in their song and cartoon "The Drugs I Need" about a made-up drug called "Progenitorivox", whose side effects include (in song): "Agitation, Palpitations, excessive salivation, constipation, male lactation, rust-colored urination..."
* The Australian advertisements for Arnott's "Tim-Tams" chocolate biscuits:
* The Australian Army was called in to cull an out of control Emu population in 1932.
* The Australian band The Divinyls has a song titled "I Touch Myself"; you can guess what that implies.
* The Australian comedy group Tripod had a song on this subject, with particular reference to the
* The Australian electoral system, which combines compulsory voting with a preferential voting system, has the problem of so-called "donkey voting", where people alienated from the political system simply write one-two-three-four-five... in the boxes on the ballot paper from top to bottom. The impact of this can be discerned in electoral results, and to try to counteract this on a national level the order of candidates on the ballot papers for each constituency is randomised.
* The Australian Family Association is also responsible for many movie bans. Other than its requisite gay-bashing, it tried to get the OFLC to ban
* "The Australian Fifth Degeneration Project" sketch was cited in a subsequent footnote.
* The Australian Labor Party lost two supposedly certain federal elections in the 21st century. The first was in 2004, with John Howard's popularity fading due to his sychophantic attitude towards George Bush during the War on Terror. The second was in 2019 when the Liberal Party - noticing they'd been losing every poll for nearly 6 years - stacked the deck by making a preference deal with Clive Palmer's party, wherein Palmer gave up any votes his party received to the Liberals in exchange for approvals for his next mining project. The latter proved to be so shocking that the Labor Party abandoned their principles and started pandering to the Liberal demographic.
* The Australian Labor Party proposed a (now unlikely to see the light of day) web filter which many have criticised for reasons ranging from denial of freedom of speech (justified by the leaked blacklist) to the practical, such as it slowing it down to dial-up speeds. Everyone from Telstra to Google, to
* The Australian Magpie is only distantly related to the Eurasian Magpie (which is in the same family as crows and ravens).
* The Australian miniseries Gallipoli, released on the 100th anniversary of the Gallipoli campaign, is this in spades. Soldiers die in the dozens for an ultimately futile campaign, the Anzacs and Turks come to respect each other but it doesn't stop them from killing each other, often in brutal hand to hand combat. A literal example is when, during one attack, artillery sets fire to scrubs, engulfing attacking troops in flames.

* The Australian/New Zealand energy drink "Mother" was hideously unpopular due to its horrid taste. After it was re-formulated, an extensive marketing campaign was launched, including new cans that stated (literally) "Tastes NOTHING like the old one!" and TV ads depicting commandos beating up the people responsible for the taste of the old formula.
* the Australian outback and suddenly takes a bad fall over a cliff. When he regains consciousness, he's in a strange room in someone's cabin. "Was I brought here to die?" the tourist asks. "No, mate," replies his host, "you were brought here yester-die."
* the Australian Outback, the bilby has to constantly run for his life.
* The Australian Political System zig zags this trope. Unlike in the US, one has to have only Australian citizenship to run for public office, meaning that even the highest political office have always been available to naturalised citizens. However, most of said naturalised citizens in high political office were born in the UK.
* The Australian singer-songwriter John Williamson created a song about a tomboy whose father nicknamed her Cydy (short for sidekick). It is now an official (if still mostly uncommon) Australian girl name.
* The Australians in WWII, unable to afford more than one type, also used a single uniform for all occasions — combat, sleeping, formal wear, everything. This led to annoyance when Americans in prettier leave-uniforms got all the girls.
* The Australians of the Boer War earned a reputation for larrikinism with the British, being incredibly irreverent all around, but especially toward the British officers who were unused to seeing such laid-back and undisciplined behaviour. This characterised the behaviour of Australian troops for much of the following century, with the Australian enthusiasm for the rape and murder of prisoners, people trying to surrender, and enemy civilians earning them a mix of
* The Australian version of the Style Network abruptly shut down in December 2019, having it outlive the Esquire Network by six years.
* The Australian version of Weetabix, Wheetbix, constantly hires cricketers to endorse the product.
* The Australian watershed can vary, but the absolute limit is 10 pm. After that, networks can show movies and shows completely uncensored, even if they would otherwise get an MA or R rating. Advertising will also get
* The Austre Academy is described having a very unrealistic laugh, Lemony Snicket going into detail about how his laughs are said as "te-he-he" is spelled.
* The Austrian Empire and then Austria-Hungary had one that (fascinatingly) went from hypercompetent and scary to incompetent and woefully underfunded. They went from being able to intercept and copy almost all correspondence into and out of Vienna during the Congress of Vienna (1814) to a service so badly overstretched that a staff of 20 people was expected to monitor all postal traffic in the nation post-Metternich, including clerical assistants and servants. Despite this, it was still treated as some monolithic instrument of repression and censorship, generally by people not actually within the nation. Its history is interesting, in that Metternich was insistent on keeping it funded and capable, while his rival, the Finance Minister Kolowrat, argued that the organization (1) was too expensive for the Empire's limited budget and (2) wasn't even particularly effective at preventing the spread of subversive ideas. The later ineffectiveness of the Austrian/Austro-Hungarian secret police was basically because Kolowrat was right—Metternich's secret police was unable to prevent the
* The Austrian Empire breaks down into a civil war in the 1880s between supporters of royal authority and various republican/nationalist movements. It eventually ends with
* The Austrian general Adam Albert von Neipperg lost his right eye to bayonet wounds at nineteen, in 1794 and wore an eyepatch after that. Historians mentioning him in passing often make a point of saying that this took nothing off his charm, and indeed, he became the lover and eventually morganatic husband of Marie-Louise, Napoleon's second wife.
* The Austrian made, 1970s Assault Rifle Steyr AUG, while looking rather

futuristic with its plastic housing and Bullpup setup then, looks about as old as it is today.
* The Austro-Hungarian Army from the country's civilian professionals (c.24% German).
* The Austro-Hungarian Connection and noticing her expression suggested she was expecting to be told to not use foul language (one of her pet peeves), Janos Drugeth mentally comments that his father would have taken her to task for it were he there to hear it. Not for the fact that a 16 year old girl was swearing, but because of Denise's "free verse" foulmouthing, the senior Drugeth believing in a more formalized approach to cursing.
* The Austro-Hungarian heir apparent Archduke Franz Ferdinand married Sophie Countess Chotek with the consequence that she was often humiliated by protocol and that their children were excluded from the Imperial and Royal succession. Both were assassinated in Sarajevo on 28 June 1914.
* the Austro-Hungarians were furious at their Italian allies staying neutral at the start of the war and later entering on the other side and were fighting to defend their homeland from an invasion, while on the final Christmas (about two months after the Austro-Hungarians broke through at Caporetto) the Italians were fighting like possessed to take back their own invaded lands.
* The Autarch gained a power to use Aerial Blades in the end of his Top 25 Boss Battles. They have been his "trademark power" ever since.
* The Auteur porn director whose fame has been eclipsed by his former star, who has become a Cable TV porn icon.
* The Auteur sees blood, bones and gore everywhere and everyone as talking, skinless corpses.
* The author admits to just liking the trope for its symbolic invocation of hubris (which works
* The author also convincingly explains the reason why ships don't need
* The author also made fun of people who refer to themselves as grammar nazis, by making up a character who educated children on the proper use of punctuation. The Komma Klansman.
* the author), and was responsible for Awakening Haruka... And the latter isn't actually certain in the manga.
* The author believes that kissing causes you to lose your virginity.
* The author calls this practice "retiring characters", and it typically happens when people leave the Toughs or when the Toughs leave them. They usually come back with at least a follow-up arc a few years later or a bonus story.
* The author changed her avatar's species from an anthropomorphic cat to an arctic fox
* The author discusses this in the Staff Room portion of the Eye-opening Arc (Sound Novel only) where he talks about how much sympathy a murderer receives depends on that person's motives (and that the level of sympathy someone will have for the murderer will vary from person to person) while he still believes that murder is still murder regardless of one's motive. See the
* The author does attempt to put a few comic episodes in between the doom and gloom. Like a
* The author doesn't bother to explain how Buu's egg can enter into Babidi's ship through the door, and invokes this trope.
* The author Eiichiro Oda often gives joke reason for things in his question-and-answer column, like how Zoro can
* The author ended up giving the name "Árni" to both Reynir's great-grandfather from the
* . The author even considers it necessary to list every single ship in his story, even though they bear little to no impact on the plot whatsoever. This happens even with the two main couples, Ash and Misty, and Brock and Sabrina.
* The author even lampshaded in the book's afterword. He writes about how he was going to leave the Kung Fu part out because it didn't fit the timeline... until he spent a couple of minutes thinking "But what if Jesus knew Kung Fu?"
* The author forgets what was written earlier, and unknowingly creates a scene

that goes completely against something that happened earlier. Can happen rather easily with really long stories, or ones that take a long time to write.
* the author had originally intended them to be love interests, but quickly realized that it wasn't happening.
* The author has an American and a Soviet spy encounter a member of the Italian Red Brigades active in Corsica, seemingly unaware it is part of France.
* The author has a question and answer column, but half of the time when someone asks about a fact he'll agree with any reasonable guess the writer makes (for instance several of the main characters' birthdays).
* The author has made a clear distinction between the various types of serv-machines. Only four are ever named: Hoplite, Phalanxer, Raven, and Golden Eagle. The latter is a Free Colonies design retired after the
* The author has stated who have been disintegrated and has their dust scattered are definitively gone.
* the author have ripped it apart in a matter of minutes (and in the sequel, Harry remarks that even though he's not half as powerful as he will be, he's still knowledgeable enough that in a rematch, he could have taken it solo). Indeed, more skilled and experienced combatants do just that - though they're hinted to lose a little something once they go into mass production and under mass mental control.)
* the author he is, but he seems to be completely unique. His wife Goldberry also seems to be a completely unique being.
* The author himself seemed to have a preference for the military officers who are seen leading from the front. In a majority of his books, military men who work at desk jobs (typically at the Pentagon or the White House) without complaint are typically in the mold of the politically ambitious or simply out of touch with the "real" military; while those who work mightily to stay out of staffs or offices are seen as honest straight-shooters with the good of the service foremost on their minds.
* The Authorities film. That's right, while every other boy his age was dreaming of being a superspy, he was dreaming of inventing crazy gadgets and being one of the few guys to be able to tell Bond off without consequences. His current job involves designing and employing cutting-edge equipment for a private investigative team, financed by a tech billionaire. He also loves quoting his idol and is gleeful when someone plays along.
* The Authorities him, although the team's manager tells the professor that he can't use the latter option again for fear of a negative public image. However, they do their best to make sure that the YouTube video of Rutherford getting saved by bees goes viral.
* The Authority (actually an alien in disguise) demands to be given a prostitute. Kev's team take him to one of their houses, where the girl freaks out and runs away to reveal the guy wearing garters, tights and an orange shoved up his ass. The team shoves him into the basement as they've been followed by paparazzi. Unfortunately, it also turns out the house's owner had rescued and kept an adult male tiger in the basement...
* The Authority after a year of hell at the hands of the G7 nations and some of the richest people in the world, as well as having "The Twenty Billion Dollar Bastard" Seth beating everyone on the team, including virtually killing the Midnighter (only a combination of the Doctor's magics and Engineer's surgical skills saved him), Swift (a nominal pacifist) has the Doctor turn Seth into a coop of chickens and dumps them on the doorstep of his own inbred rapist hillbilly family. His future was short.
* The Authority aged herself to look like a young woman in her twenties, this became her dress code almost exclusively. At one point she got "tired of menstruating" and de-aged herself to look about 11. The bare midriffs stayed, however.
* The Authority a guy by flying through him. Justified in that the characters all have enhanced physical abilities.
* The Authority also encountered Rose Tattoo, Spirit of Murder, who was transformed by the Doctor into the Spirit of Life, only to later return to her

original form.
* The Authority also subsequently featured Jenny Quantum, the spirit of the 21st century, who was born... well, you get the idea.
* The Authority, and rewards him in true fairytale fashion when he completes his quest. He even gets to slay a dragon!
* The Authority, and use her to influence the course of the entire next century. The good guys beat up the bad, fly into Krigstein's secret base...and offer him a job. Clearly he's got the brainpower necessary to help change the world; it just needs to be appropriately channeled.
* The Authority Apollo gives them a touch of this relationship dynamic.
* The Authority are a married gay superhero couple with very few stereotypical gay characteristics. Oh, and don't call them "poofs", because they will rip out your spine and make you eat your face if you're lucky.
* The Authority, a referee who first came to attention after costing Ryback a match against CM Punk. The Authority promoted Maddox to General Manager of Raw, though he did little during his tenure. After Maddox disobeyed their orders by allowing the Shield to be at ringside during a match, they had Kane attack him before firing him.
* The Authority are joined at the hip. They take it for granted to the point where Midnighter is disturbed and upset to meet an alternate universe version of them that broke up.
* The Authority battles God ("The Outer Dark," issues 9-12). Earth's creator is a moon-sized alien being that created the planet as a retirement home. Since Earth's creation, changes to its orbit and ecosystem led to the rise of life as we know it, instead of somewhere its creator would be comfortable. God immediately sets about "fixing" that. Or as The Engineer calls it, "turdscaping".
* The Authority because she can create virtually any device she can conceive of on the fly.
* The Authority briefly dabbled with this by introducing an alternate universe in which all sexes were reversed. At one point Midnighter recruits an entire army of reversed-sex superheroes, although they are instantly killed on the next page.
* The Authority by having him screw Roman out of the title exactly one year later.
* The Authority by world governments specifically to take down the Authority (and nearly succeeded, receiving a harem of children as a reward). His birth came about around nine months after his mother was stuck in a cabin with her seven brothers, and after his defeat was transformed into seven chickens and returned to his uncles.
* The Authority can call the Carrier for a Door to anywhere in the world, or back to the Carrier, and at least once to parallel universes.
* The Authority capable of traveling between realities) are more than willing to move into other realities and tell the locals how things should be done - Or Else!
* The Authority" conquerors if they don't approve of a nation's government.
* The Authority, criticize the Authority for thinking they know how to best how to tell people how to live their lives and how a "better world" should be. While the Commander is a rapist (in fact, saying this to Apollo after raping him), he's right that the Authority was composed of pretty screwed-up people themselves.
* The Authority does this to herself. After meeting the incarnations of centuries past and becoming aware of the current problem, Jenny uses her quantum powers to go from six years old to high school age.
* The Authority do this in one arc, evacuating the planet's entire population so as to cause less collateral damage when fighting a superpowered villain.
* The Authority due to his repeated abductions since childhood, and as an adult he never needed to due to his symbiosis with cities.
* The Authority equivalent away by making him realize he was this ("you're just a weapon with a larynx"). In the epilogue, he writes a letter thanking Midnighter for saving him, having found a home and a family.
* The authority figure trope had been played well for several decades, but when
* The Authority future, though, as the head time agent points to her two (male) partners and says, "They got together after they found out their girlfriends were

seeing each other."
* The Authority get beat up the exact same way to end the show before we got the point?).
* The Authority, having 5 eyes, and about seven short, stubby fingers on each hand.
* The Authority. In a mix of this and type 2, the Engineer and Apollo took advantage of the Renegade's gaining the other Doctors' power of empathy to behead him.
* The Authority into Humongous Mecha. As in, walk into the middle of Tokyo, ask it very nicely, and come out wearing battle armour made of concrete and skyscrapers.
* The Authority is a "seedling" who grew wings out of the backs of her arms and talons on her feet once her powers were activated. She later gets upgraded to full wings coming out of her back. Her counterpart in the G7 Authority, Rush, also had full wings coming out of her back.
* The Authority, Jack remarks how much he hates kicking in doors because he feels bad for the people who clean up afterwards. Fortunately it turns out that Midnighter can pick locks faster than Jack can kick anyway.
* The Authority, Jamie Noble (James Gibson), Joey Mercury (Adam Birch)...
* The Authority join forces in 2014 to screw over Daniel Bryan, Big Show, Dean Ambrose, Roman Reigns, and anyone else they don't like.
* The Authority: Killer cyborg Seth does this to Midnighter. It has no effect.
* The Authority likes to go to alternate universes and kill their Hitlers.
* The Authority likes to play world police and get rid of threats, and they give absolutely no shits about what the governments have to say (as the page image shows, one time some random passerby tries to ask Midnighter what is going on and the very next panel we see
* The Authority, many of the implications of these powers are investigated.
* The Authority— in the middle of fighting The Authority, a villain in temporary possession of The Doctor's nigh-omnipotence goes back in time to The Engineer's adolescence, poses as a doctor, and gives her a very intentionally Creepy Physical so that, when he steps back into the present a sentence later and reminds her of it, the traumatic memory resurfaces.
* The Authority — the Blue, an alien race who came to a parallel Earth and began interbreeding with humans centuries ago, eventually took over the planet and turned China, among other places, into a rape camp to try and father more offspring, because they actually did need women. Then they try to expand their territory into the Authority's Earth. This is a mistake.
* The Authority". Next thing you know there's a panel of the bad guy falling into a heap on the ground and Midnighter is holding the child saying "Told you so."
* The Authority, not to be confused with Doctor Who, have had problems with this. At least one of them went on a murderous rage that ended with drinking every bottle of Dom Perignon in existence (leaving him so drunk he couldn't fight back). The first Doctor in the series was a heroin addict, something that was a continuing problem for him. This is despite their ability to alter reality at will which normally puts this trope in effect.
* The Authority of an abstract concept (a century), who is an atheist.
* The Authority quickly rolled in to take the belt away from him and absorb the spotlight.
* The Authority's Apollo is powered by sunlight (being a Superman expy). In one arc where he's low on power, the plan is to drop him midair and hope he charges up fast enough to fly before he hits the ground.
* The Authority scheme by a depowered and imprisoned "renegade Doctor", who, having somehow convinced the Earth that humanity is killing it, will only convince it to calm down after he's given back his powers.
* The Authority's home base, The Carrier, counts, even down to being a
* The Authority. So, yes, they may be horrifyingly lethal, but they're certainly not glamorous.
* The Authority squad he killed in a previous miniseries... In the third miniseries, it's revealed that this all stems from a mission during his SAS days where he ended up killing folks from both sides of the conflict in Northern

Ireland.
* The Authority story "The Magnificent Kevin": Kevin has this happen to him with a couple of foes. Most notably, as the story opens, two groups of opposing spec ops forces that he worked for converge on him in his bedroom. He is under the sheets looking at porn and notices none of this. The two opposing forces massacre each other while he is otherwise engaged. The funny part comes when it is mentioned that this sort of thing seems to happen to the assassins they send after him all the time, which causes the higher-ups on all sides to send more assassins to kill someone who must have been superhuman to kill all the previous assassins, which results in a bigger massacre, and so on and so forth. Subverted in that "Kevin" probably would be a badass by normal human standards, just not in the Authority universe, and he isn't so much "mistaken" for badass as "employed by too many of the wrong people on both sides of the tracks."
* The Authority: Subverted in the first arc, where the evil dictator Kaizen Gamorra uses a bioreactor to pump out hundreds of superpowered clones (who have, at minimum, flight and heat vision abilities) every minute, launching them on Moscow, London and Los Angeles. Kaizen himself doesn't seem to have given himself any superpowers, so maybe there was a downside that doesn't get shown.
* The Authority, Swift, who's normally more gung-ho, decides to oppose one of Jenny Sparks' orders, as following it might lead to the unnecessary deaths of aliens that might be considered civilians. In "The Nativity", she also forces a truce between the Authority and Krigstein that gives the latter control over the Southeast Asian government that the Authority recently overthrew, in order to avoid a long, drawn-out conflict in which Krigstein's forces were more than willing to kill civilians.
* The Authority. Technically, she did fight in WWII, against Sliding Albion and uses her rank and status in the British Army Intelligence to make them do what she wants.
* The Authority that made Jack Hawksmoor the God of Cities have left him with... different genitalia. They are still functional, and he has retained his libido, but the sight of them did cause a doctor to vomit.
* The Authority) that satirizes and deconstructs the Authority, their brand of heroism and their tropes.
* The Authority: The Authority is unable to penetrate their opponent's force field to attack his island. That is, until Midnighter flies a 50-km long starship into the island and obliterates the enemy lair.
* The Authority: The Carrier — a spaceship that, while being made of metal, is fully sapient. However, it has only once spoken directly to anyone (and then it was only to tell hapless assassin Kev Hawkins what a prick he is).
* The Authority, the Engineer kills a huge alien parasite. In the middle of fixing the damage it did she looks up at the sky and mentions that it looks like an eclipse of the Sun. Turns out a giant alien is the thing that's eclipsing it.
* The Authority the entire surface of the planet, from the tallest mountains to the deepest oceans, has been converted and into a city. There people who derive power from urban development like Jack Hawksmoor are essentially Physical Gods and are treated as such.
* The Authority, then ended up taking Stormwatch's place among Wildstorm's major titles, to the point that for a lot of comic-book fans, the Weatherman is better known as the archnemesis of Apollo and Midnighter than as the former leader of Stormwatch.
* The Authority). The previous Doctors also confirm that (as far as they know) the Christian God does not exist.
* The Authority there, in that Jenny is the "spirit of the 20th century" — being Been There Shaped History is part of the job description.
* The Authority: There is always a Doctor. When one dies, the title and powers automatically pass on to someone else.
* The Authority they've already killed all the soldiers he's deployed, almost all of whom were just teenagers who read his ad in the back of comic books to get superpowers.
* The Authority, though for their case it might be more of 'Screw The Rules I Have

Supernatural Powers - And I Will Make New Rules!'
* The Authority to a villain that has just turned Moscow into a charnel house. The U.N. ups the response by blatantly *cough* not sending in a kill squad.
* The Authority to kind, cheerful, optimistic Apollo. Even their costumes emphasize this trope: Apollo's is white with a gold sun emblem, while Midnighter's is black with a silver crescent moon.
* The Authority took over the writing, he went back to various kinds of supervillains again.
* The Authority type in charge of the team to turn good and use his brilliant ideas to help humanity.
* The Authority very, very rarely removed his mask, which covered his hair. Due to this, the few times he did take it off, his hair color kept changing because the colorists didn't know what color it actually was, it ranged from blond to black and everything in between, except red. Fanfic writers decided that he dyed his hair, which was naturally red, to explain away the constantly changing hair colors. This was later made actual canonicity in an issue of Stormwatch: Team Achilles.
* The Authority was created and began abusing power and the roster simply for fun, as well as constantly winning over and over again, the trope began losing steam and, two years after the end of the angle, authority figures in wrestling vanished.
* The Authority were previous Shamans. In addition, Einstein was apparently involved in at least one cross-dimensional adventure with Jenny Sparks.
* The Authority who devasted several major cities with his army of supers, the Authority reaches a compromise with him and enlists him in the reconstruction effort (the reader, of course, never sees him again). Supposedly a metaphor for how Western democracies cut deals with vicious third world dictators.
* The Authority) who turned him into a creature that could only survive in cities.
* The "Authorization" imposed by Adam Malkovich toward Samus Aran in
* The author loves doing this for new characters. The buildup to Minami and Garron's first appearances makes it seem like they're evil government agents who are looking to lock up Lorem and Gospel for her past actions.
* The author might have forgotten about what actually happened in the story.
* The author of the article, Dan Drezner of the Fletcher School for Diplomacy (aka the best foreign affairs school in America), has published a monograph called Theories of International Relations and Zombies. It covers the major paradigms of IR theory and the "corpus" of zombie literature and film. It's an excellent introductory text to IR theory for beginners, and the results show that while a zombie apocalypse would suck, it's unlikely to be the end of humanity. It's also really damned funny.
* The author of the article "Uranus takes a pounding more frequently than thought" obviously had way too much fun writing it.
* The author of the comic wrote an entire book dedicated to how promotion has changed from this to what he calls the Dilbert Principle, in other words, instead of people getting promoted to their lowest level of competence, any and all incompetent employees are placed in the one place where they can do the least damage: Management. Which in turn leads to the creation of managers like the
* The author of the manga has affirmed that the characters of Haruka Tenou (Sailor Uranus) and Michiru Kaiou (Sailor Neptune) were intended as a lesbian couple. This is heavily hinted at in both the
* The author of the original book stated that the only reason Bourne even had the address was that he needed his first
* The author really wants to write a certain scene, even if the scene makes no sense. Rather than toss the scene out, the author goes right ahead and writes it anyway.
* The author released "New Millennium Editions" 20 years or so into the series, which, among other improvements, iron out the timeline and update the technology in the earlier books to be more contemporary.
* The author's commentary on Sakura Akiyama mentions that she was originally supposed to be a secretary for Furumi Pharmaceuticals rather than Magatanien, and that she "has a relationship" with Wakatsuki. Sandro doesn't specify whether he

intended for that "relationship" to be romantic, and while the pair still hang out together a lot, their interactions are mostly platonic.
* The authors have also fallen into this; apparently the two are sharing a cottage now. Cue the
* The Author shows up semi-regularly in the comic, usually to get the plot moving in an "It would take too long to get from A to B the regular way." (Such as when she took Liz from "Trying to conceive their second child" to "eight months pregnant"
* The author states in the postmortem that the star point system was based directly on similar mechanics from
* The author surrogate's father is characterized by his rather ruthless pragmatism and attention to detail, including the pursuit of a comfortable life. One major example is how he pursues a woman from a wealthy family in favor or a more beautiful but less well-to-do woman, though he insists that he fell in love with her through her engaging letters.
* The author Sydney, Lady Morgan was very vague about her age, maintaining that she was born in 1785 when it was probably 1781. Her death certificate (in 1859) gives her age as "about 80".
* The author themself is morally reprehensible and holds viewpoints that most people would consider to be closer to a villain than a hero, so the work is presented through their deeply skewed perspective.
* the author turned out to be just as high-quality as its predecessor in its comedy and character-driven drama and exploration.
* The author was recycling an identical scene in his "Ambassador Chronicles".
* The author won't be able to use their work independently without executive approval. And even if the author gets permission, they will most likely be obliged to pay royalties to use their own work/creations.
* The autistic JJ also tends to launch into one of these whenever he gets locked on.
* The Autobiography of Jane Eyre adaptation. Jane says she has always been very good at school, loves books and reading and considers herself a smart girl. She's based on a very down-to-earth character.
* The Autobiography of Jane Eyre: Adele Rochester works all the time for her futile homework assignment (though she's fond of learning), knows all about art forms of the twentieth century, speaks French, uses Latin in her tweets, has ballet/fencing/opera lessons, plays puzzles competitively, frequents Advanced Marine Zoology courses, went to an Applied Physics boot camp and is a Scout girl. She's very responsible, knows what she wants, and Jane says she kind of tutors herself. As is typical for precocious children, her family situation is complicated, to put it mildly. She surely knows a lot, but sometimes she has troubles to contextualize it and can come off as a weird kid. She's very nice to Jane, who is concerned about her being lonely and neglected by her father.
* The Autobiography of Jane Eyre. Also, they credited his actor on their web-page which has pictures of cast and characters, but instead of Mr. Wright's photo, there were several pictures with aluminium products (Mr. Rochester owns a company specializing in aluminium).
* The Autobiography of Jane Eyre, and this is her mode of speaking if she's not speaking a foreign language. For instance, she described fingernail art as "rather cathartic".
* The Autobiography of Jane Eyre: Downplayed example is Jane's toy plushy cat. Jane introduces her as such: "She's not a real cat, which makes her far more superior to any real cats." Considering Jane's lack of friends, it's understandable she bonds and still relates to her toy, but she only showed her twice and she doesn't really talk to her.
* The Autobiography of Jane Eyre: Downplayed in episode 11. Mr Rochester has loosened his shirt and a tie, and he has rolled up his sleeves, revealing his geeky tattoo. Fangirls approve.
* The Autobiography of Jane Eyre: Episode 8 was a Mr Rochester tease. Most viewers who follow the web series read the book, and knew that Jane met Mr Rochester when

she was walking to the post office. When Jane announced she had a weekend off and planned to take a walk, the audience got hopeful. However, she really went just to take a long walk and take some photographs. She later talked about her late friend Helen, revealing something of her back-story.
* The Autobiography of Jane Eyre (episode "The King of Hearts"), Jane Eyre and Edward Rochester are flirting and being cute together. He's trying to record her and snap a few photos. Jane gets close and they end up looking into each other's eyes very intensely. They almost kiss, but Jane pulls herself back. Edward has to take a few breaths to recover from the moment.
* The Autobiography of Jane Eyre. Eventually, she manages to say he's great, but it doesn't sound too convincing. But one thing was really nice — Mr. Rochester is a dog-lover.
* The Autobiography of Jane Eyre. He was absolutely checking her out at the end of the episode before he left the room. Though, she looked really cute in her nice pyjamas.
* The Autobiography of Jane Eyre: In episode 1, Jane enthusiastically plans a big change in her life and wants to experience sensational adventures, which results in applying for a new job rather spontaneously. This is in stark contrast to episode 9 when Jane longs for calm and she wants to go home really badly... except she's an orphan with only an abusive step-aunt and equally bad cousins, and poor Jane doesn't really have any place she could consider her home.
* The Autobiography of Jane Eyre: In episode 9, Jane has caught cold and is really sick, which also triggers her homesickness. It's all the more sad because she doesn't really have her home. The house feels empty and isolated, she doesn't have anybody to talk to; she misses university, but concludes that it was just a dorm room.
* The Autobiography of Jane Eyre. In the book, Jane is a narrator and an adult mature woman who is looking back on her life from her unhappy childhood, harsh and later kinder school days, her employment, and above all her mysterious love story. The narrative voice of the web series, which is Jane's vlog presenting events as they happen, is naturally changed. It started with Jane deciding to change her life and seeking new opportunities in life, and accepting to work as a live-in tutor. Her back-story is revealed in some episodes when Jane mentions her uneasy relationship with her abusive step-family or when she reminisces about her school days or her friend Helen.
* The Autobiography of Jane Eyre: It's heavily implied that Jane was ignored, bullied or abused by nearly everybody all her life. She is a nice, slightly weird girl, yet she doesn't have any friends. Her step-family was horrible. She mentioned in Episode 8 that she and Helen, her only close friend, were considered misfits at the Private School. She encountered some good teachers at university, but she didn't bond with any of them. When she comes to tutor Adele, it gets better as she's respected and Adele likes her, but it's not all great because the house is isolated, Grace is distant, Susanna-Maria is not too fond of her after their awkward encounter, other servants probably don't have time to talk to Adele's teacher, and Mr Rochester appears intimidating... Poor Jane.
* The Autobiography of Jane Eyre: Jane had one true friend Helen who died of cancer when they were at school. She doesn't have any other friends of her age and her step-aunt's family and other people at school were abusive. Poor Jane expects this trend will continue and in some of her vlogs her longing to have friends is painful to watch. She doesn't even have a place she could call home. It's implied she uploads her entries as a safety net of evidence, because she can't ask anyone else for help or advice, and there are some seriously weird things happening in the Rochester household.
* The Autobiography of Jane Eyre, Jane has a terrifying experience with the bus version. The bus terminal is very creepy, and she's actually at the bus stop in the middle of nowhere. It's late at night and she lost her mobile, so she can't contact anybody. Also the person supposed to pick her up didn't show. The video description reveals that they mixed up the times. She freaked out, but survived and was fine.
* The Autobiography of Jane Eyre, Jane meets her employer Mr Rochester without

knowing it's him. In the book, he fell off a horse on an icy road, and it's re-imagined as a minor car accident. Jane was standing in the middle of a road that is never busy, shooting an entry for her vlog, and he nearly ran her over. She obviously thinks he Drives Like Crazy, though she admits she should have been more careful as well.
* The Autobiography of Jane Eyre, Jane persuades her student Adele, who is somewhat of a child prodigy in this version, to draw pictures. Some of them were beautiful and lovely, like a picture of Jane or a picture of Adele's dog Pilot. But Mr Rochester, her father, is drawn on a mountain as a very distant figure, and the last image Jane shows is him with a big apple in his face.
* The Autobiography of Jane Eyre: Jane senses that something is off from the moment she came to be Adele Rochester's tutor. In episode 13, her suspicions are confirmed as far as the strange happenings in the house go, though she doesn't know the mystery yet. However, it's also the episode when she admits that Mr Rochester is all right, and she expected him to be horrible — neglectful or abusive to Adele and possibly to herself.
* The Autobiography of Jane Eyre: Jane's student Adele is eight years old, and she has these classes as her post-curricular activities: ballet, opera, intermediate Latin, advanced marine zoology, and she went to applied physics boot camp. She's bilingual in English/French, though that might not be that special for a Canadian child. She also likes analysing art and she draws beautifully.
* The Autobiography of Jane Eyre: Jane, who finds kids "a gazillion times better than most adults".
* The Autobiography of Jane Eyre, Liz Reed introduces and later sings a song she wrote. It's called "I hate you, leave me alone".
* The Autobiography of Jane Eyre look very spooky. Combined with ominous shadows and strange noises, her vlog very effectively captures gloomy elements of the original Gothic novel.
* The Autobiography of Jane Eyre—so he hires a tutor for her and she has thousands of extracurricular activities. He's probably not intentionally unkind and he might genuinely try to do his best but he comes off as inattentive or bossy, not too mention that he is said to travel a lot and he rarely stays at his home with her. Adele says he always brings her presents and she genuinely likes what she receives in episode 12. She's also rather cheerful in his presence, so he can't be all bad, but the guy has issues.
* The Autobiography of Jane Eyre: Miss Blanche Ingram is a model and serious businesswoman, and she claims she's fluent in eight languages. However, at one party she owns to he friend Warren she hated when her Nanny used to make him "conjugate, conjugate, conjugate" as a kid.
* The Autobiography of Jane Eyre: Mr Rochester, apparently. He is seen with a glass of scotch on his table in episode 10, and in episode 11 he says he knows he has many faults and that he finds it easier to drink than to regret. One of his tweets to his assistant reads: "Can you schedule a meeting for 2 hours from now and can you arrange a scotch?"
* The Autobiography of Jane Eyre: Mr Rochester's dog Pilot is a Bernese Mountain Dog which is a breed of dogs that are generally extremely affectionate. Adele Rochester must be fond of Pilot as she drew a beautiful picture of him.
* The Autobiography of Jane Eyre: Rose Oliver comes from an extremely wealthy family and pampered background (she's the daughter of the chief of surgery at the hospital where Simon-James Rivers works). Simon reasons that he could not date a girl like this, being a young, penniless doctor. She has a crush on him, he's not so eager, and they don't end up together.
* The Autobiography of Jane Eyre. She's a model, a trained dancer, a successful businesswoman, and a great beauty. She's very tall, compared to other ladies like petite Jane or Grace Poole, and she's as tall as Mr Rochester or her friend Warren Danton who are tall guys.
* The Autobiography of Jane Eyre, so they knew that the man who nearly ran Jane over in his car was in fact her employer. Naturally, they happily cringed at her when Jane tried to calm herself down, saying: "It's not like I'm ever gonna see him

again anyway." Oh, Jane! You don't even...
* The Autobiography of Jane Eyre style. Then she sings an aria. She's brilliant if bit weirdly over-educated. She likes showing off her knowledge.
* The Autobiography of Jane Eyre, vlog version of Mr Rochester likes saying Jane's name a lot. It's very clear especially in episode "Consequences". She calls him "sir".
* The Autobiography of Jane Eyre web series. She's really shown to behave a bit strangely around people, and she openly acknowledges it to camera when she's shooting. She has troubles to come up with a good opening line.
* The Autobiography of Jane Eyre where Jane is a young Canadian woman and she vlogs.
* The Autobiography of Jane Eyre: Word of God says they have zero budget and that they shoot the scenes at their home.
* The Autobiography Of Malcolm X, cites the half-your-age-plus-seven rule as having factored into his decision to propose to his future wife.
* The Autobiography of Malcolm X, Malcolm mentions a time during his younger(and wilder) days, when he came home to find his apartment ransacked. He immediately grabbed a few clothes and left for a friend's home, because he knew that it was most likely done by the Police, who would have planted drugs in the room, and would likely already be on their way back with a search warrant to "find" it.
* The Autobiography Of Miss Jane Pittman, a story about a 110 year old woman who lived from slavery to the civil rights movement, has a framing story that a teacher is interviewing Jane to tell his students about her.
* The Autobiography Of Miss Jane Pittman is another interview-framed film. The interview takes place in 1962, when Miss Pittman is 110 years old. Her memories extend back to before the American Civil War.
* The Autobiography of Santa Claus, and a few other people, as well as St. Nicolas himself, who basically left a fake body behind him so that people would think he died in his sleep.
* The Autobiography of Santa Claus even staged her own "mysterious disappearance" instead of finishing her flight around the world so that she could head up to the North Pole.
* The Autobot or Decepticon symbols are on every Autobot or Decepticon, often in multiple places. At least this case it's justified for being faction badges. Still kind of odd when the series motto is "Robots In Disguise" and Optimus has a giant Autobot logo on his trailer.
* the Autobots and Black Knights warn the JLF and the city of Narita about their operations (or at least give enough info to the latter to call an evacuation without spoiling their plans).
* The Autobots and Decepticons themselves are supposed to be armies, but they both have immense discipline problems. The Autobots operate a bit too much as a cult of personality around Optimus Prime rather than a functional military force, while the Decepticons, well
* The Autobots' computers Teletraan-1 and Teletraan-2 both have fairly inflectionless voices, although 1 always sounds like it's boldly announcing something, and 2 has a more soothing HAL-type voice.
* The Autobot Springer loses his shuttle, lands on Planet Junkion, and fights the Junkion Wreckgar, echoing their encounter in
* The Autobots we see are almost always a military contingent... and always act like they're just guys on vacation. Particularly notable with the obligatory
* The Autobot Warpath has a Tourette's Syndrome-like tendency to intersperce what he's saying with onomatopaeia like "Kablam!", "Zowee!" or "Pow!"
* The Autocrats, which was a CGI-animated series about the largely fictional lives of the members of the Finnish parliament. Since each episode had to be done in a week for the sake of staying topical, in the end the show was neither particularly entertaining or particularly well animated, the latter being particularly obvious.
* The autographed cast picture where everyone was in their costumes was the first spoiler for
* The automaker Dodge launched a series of commercials starring its founding Dodge

brothers, who died in 1920.
* The automaker Scion (a Toyota division) typically caters to college students, particularly when they debuted in the early 2000s with a huge list of factory accessories, ranging from simple colored interior panels, expensive sound system setups, or
* The automated systems used by the US and USSR gave false fire orders more than once, each time disaster was barely avoided by someone refusing standing orders because they didn't trust the system. Most were due to the systems misidentifying natural phenomena as incoming missiles.
* The Automatic Detective communication: in response to Mack's quip, Mack narrates, an alien "executed a maneuver with his tentacles that I could only assume was derogatory in nature."
* The Automatic Detective: despite his vow to keep his nose clean, "which should have been easy, since I didn't have a nose", he heard something break in the apartment and had to investigate.
* The Automatic Detective, it was just like the scene in the movies: "some dumb mug finds himself sitting in a tiny room with a cop standing over him, reading him the riot act. That's pretty much what happened to me." Except, he clarifies, he was standing, the room was quite large, and the cop was sitting and smoking a cigarette. But other than that, exactly like the scene in the movies.
* The Automatic Detective, Mack's big smashy hands are simply incapable of tying ties and he requires assistance. A later short story establishes that he switches to clip-ons and loves them.
* The Automatic Detective, the good news is, it looks like the data he got about the lair he's about to storm was completely accurate. The bad news is, is looks like the data he got about the lair was completely accurate (i.e. it doesn't look good for his chances of getting in and out).
* The automobile industry is simply awash in this trope, but usually inverted, with companies producing elegant luxury goods outside their home region and more modest products within. In the United States, German companies are known for producing dazzling luxury cars, VW notwithstanding. Within Europe, however, Mercedes-Benz also makes
* The Autons are living plastic. In appearance, they can range the spectrum from animate mannequin to indistinguishable from human. While costuming's moved on from their '70s heyday, back then...
* The Autons. How can a big lump of angry goo turn shop window mannequins into marching, gun-handed footsoldiers and
* The Autoresponder seems to get a real kick out of screwing with people, especially Jake. It almost comes back to bite him when he has to convince Jake to
* The Autumnlands: Tooth & Claw has a tribe of human-sized warrior bats.
* The Autumnlands: Tooth & Claw magic-user available with the experience necessary to survive on the surface world. Yet her survival tips are continuously ignored by her rival Sandorst and the group at large leading to much wasted time and life.
* The Autumnlands: Tooth & Claw that float above the planet. Main character Dunstan lives in the floating Seventh City of Keneil in the proverbial Autumnlands.
* The Autumnlands: Tooth & Claw There are birds with human-like hands in place of their feet for some as yet unknown reason.
* The Autumnlands: Tooth & Claw there is Magister Eikhoun's animated chair which Learoyd uses as a mount for a time.
* The "Autumn Rain" trilogy by David J. Williams culminates in WW III, with weaponized space. The nuclear destruction of a continent takes roughly three paragraphs of writing, and perhaps a few hours. Most of the Earth is more or less saturated with nuclear weapons, space-dropped kinetic energy weapons, high powered directed energy pin-point strikes against anything trying to shoot down those weapons, and deliberate destruction of any and all communications and electronic infrastructure either physically or through hacking. The fate of the moon and the fleets stationed at the libation points is not much better...though it takes a few days for them.

* The AVALANCHE crew blows up the Sector 1 Reactor to prevent the mako extraction from damaging the planet, causing considerable life and property damage. A throwaway line later from Jessie implies that that wasn't the original plan, and that she may have made a miscalculation when following the bomb recipe, a hint that all may not necessarily be as it seemed.
* The Avalanches adds on to this with some heavy influence from soul, rap, and children's music.
* The Avalanches came to the rescue, and their promotion also helped “Frontier Psychiatrist” become a cult hit in the US.
* The Avalanches The titular vocal sample is repeated through much of the song in different pitches. Despite that, it still manages to be a pretty good song.
* The Avalon Wars, a series of wars between Asgard and Avalon, as the followers of the two respective pantheons clashed, and the two pantheons wound up on collision course (though it's implied that the Avalonians fired the first shot, lashing out at what they saw as encroachment by the followers of the Asgardian gods and Christian missionaries). It ended when the Frost Giants invaded and an
* The Avant and Orca browsers use a right-click-and-drag gesture system (not unlike Black & White) as an alternative to buttons or menu commands. Naturally these gestures do nothing in Internet Explorer, which may take several failed attempts to register in the mind of someone used to them.
* The avant-garde electronic music artist Fad Gadget often performed on stage while tarred and feathered. He was photographed in tar and feathers for the cover of his album
* The Avant-Guards: LGBT sports series; the ensemble cast is queer, containing several lesbian/bisexual women, nonbinary, and transgender main characters.
* The Avatar and the Firelord, Aang's spirit takes a ride on Roku's dragon. This causes his body to assume a position remarkably similar to that of someone relieving themselves.
* The Avatar at one point makes a carrot stew that everyone complained tasted like dishwater. Panne, coming from a race of rabbit people, is the only one that actually liked it.
* The Avatar builds; while it's unknown how old he/she is, they don't look any older than in their late teens.
* The Avatar Chronicles based on their financial status, with the majority of the population being red and orange. The higher the color, the nicer the buildings such as malls/parks/etc you get to enter, and you have more say in the city's laws. The highest-ranking people hold violet cards, and get to wear purple to represent their status.
* The Avatar Chronicles for survival, as players' in-game status dictates living standards, job opportunities, and anything else in the real-world economy.
* The Avatar Chronicles. With a title like that, how could she be otherwise?
* The Avatar counts as well. While a lot of his powers come from the stamina and endurance the Light gives him, most of his real power comes down to well-trained reflexes, natural dexterity, experience and pure skill.
* The Avatar Extras re-airings get into it too. At the end of "The Chase", when the Gaang plus
* The Avatar himself also fits most of the criteria for the Paladin trope and is the page image. Though in the context of the game it's from, the image is
* The Avatar (killing his/her biological father Anankos, or either his/her mother Mikoto, his/her Parental Substitute
* The Avatar of Jarlsberg path allows you to make consummate foods using Jarlsberg's Cosmic Kitchen, which are pretty much described as
* The Avatar of Khaine has a superb weapon skill on the tabletop rivaled by none (
* The Avatar of Nightmare Moon uses the possibility of this as a threat to try to force Shadow to convince Celestia to surrender Canterlot, claiming that she'd take the city anyway and it’d be impossible to control victory-drunk soldiers seeking retribution for a long, hard siege and the deaths of close companions.
* The Avatar's best friend, Princess Azura, is both the stepdaughter of the Nohrian King Garon and the ward

* the Avatar's child Kana's Paralogue, Kana (barely a pre-teen) is so terrified when their living place is invaded, and the Avatar gets attacked right in front of them, that they also transform into a dragon. They don't recover until the end of the chapter, either, and cannot remember what happened, so they're shocked when the Avatar explains what took place.
* The Avatar's child Morgan can also become a Tactician, and is a devoted student of tactics who wants to become a strategist like their parent.
* the Avatar sets in slowly but surely, however, and over the course of the series, she mellows out and becomes a great deal more diplomatic.
* The Avatar's looks can be customized, which includes giving them beauty marks that can be located under their left eye or the left corner of their mouth (
* the Avatar's mother/Azura and the Hoshidan siblings' Parental Substitute.
* The Avatar Spirit. It's the spirit of the Earth, after all, so it existed even before it started manifesting itself as Avatars.
* The A.V. Club, with the writers experiencing pop culture they had avoided that far.
* The Avenger, AKA the eagle that ate Prometheus's liver each day, enters a bar looking for the the escaped Prometheus. The Avenger was offered a bowl of soup, but declined it and would have found Prometheus just outside if the bar owner's daughter hadn't said just before he opened the door, "It's liver." The Avenger quickly changes his mind.
* The Avenger from Atlantis), the protagonist pursues his mortal enemy for thousands of years; both he and his quarry transfer their brains to numerous bodies to keep up the chase.
* The Avenger. Richard Henry Benson, of the 1930's pulps was a master of disguise. He suffered a horrible emotional shock that deadened the nerves in his face which he could mold like putty. (Ah, the innocence of the '30s!) He carried around a disguise kit with wig, contacts, make-up, etc to go along with the putty face. Later when his face came back to life, he invented a serum that had the same effect.
* The Avengers (1960s), and once in an unsuccessful fight with Steed ... who remarked that the instrument probably played "sharp."
* The Avengers (1960s) and takes his keys, but has to try every key before finding the one that opens the cell door, drawing out the suspense as the firing squad is readying to shoot her partner.
* The Avengers (1960s), but his whip catches on a torch pulling it out of the wall, and activating the requisite trapdoor which he falls into.
* The Avengers (1960s) (Dr. David Keel) as John Steed's partner. In her earliest appearances (scripts written much earlier for Hendry), her dialogue was left completely unchanged. This is sometimes credited with making Cathy Gale a particularly memorable female character for the early '60s.
* The Avengers (1960s): During a fight in the village library in "Murdersville", Steed grabs an armful of books off the shelf and hurls them at an attacker.
* The Avengers (1960s) ends with Steed and Tara accidentally launched in a rocket, and Mother saying to the camera that they'll be back.
* The Avengers (1960s) enthusiast has his manor house themed to the author's works, down to a recreation of Miss Havisham's dusty, cobwebbed wedding feast room.
* The Avengers (1960s) episode "Man-Eater of Surrey Green", a man-eating plant from outer space lands in Middle England and takes several top horticulturists as its prisoners in an effort to germinate the Earth. Fortunately for the Earth, Steed just happens to be a herbicidal maniac.
* The Avengers (1960s) episodes "The Town of No Return" and "Something Nasty in the Nursery" before playing Mother in the show's final season.
* The Avengers (1960s) episode "The Living Dead", between Mrs. Peel and a female guard.
* The Avengers (1960s) episode "The Living Dead" had a huge underground city built by the villains for the purpose of raising an army.
* The Avengers (1960s) episode "The Living Dead", Steed is put up in front of a firing squad with (seemingly) no help coming:

* The Avengers (1960s) episode "The Superlative Seven". A mysterious invitation that strands him on a remote island, with six companions who are murdered one by one, makes Steed a Little Indian.
* The Avengers (1960s) episode "What the Butler Saw" involved an entire school for butlers, which turned out to be a criminal enterprise. At the end, there's an exchange along the following lines:
* The Avengers (1960s) feature Cybernauts, large bipedal robots used as dumb muscle.
* The Avengers (1960s) from outer space lands in Middle England and takes several top horticulturists as its prisoners in an effort to germinate and spread across all of the Earth.
* The Avengers (1960s) has discovered a way to turn the domestic felines of the country into vicious killers.
* The Avengers (1960s): In "Death's Door", Lord Melford has a nightmare about attending a peace conference where he is greeted at the door by a faceless man. Steed and Emma later discover he had been drugged and the nightmare staged. During the final fight against the bad guys, Emma shows up wearing the costume and mask used to create the faceless man.
* The Avengers (1960s): In "Death's Door", the diplomat Steed and Mrs Peel are assigned to protect has a seemingly prophetic dream that he will die if attends the peace conference. The dream is full oddly specific details, and when Steed and Emma ride his route to the conference, each of the details comes true; except for being splashed by a car driving through a puddle as he gets out of his limousine. Then Steed realises that made the run early, and Lord Melford would have been arriving at exactly 10:30. When they drive around the block and arrive at exactly 10:30, Mrs Peel is splashed by a car driving through a puddle as she gets out of the limo.
* The Avengers (1960s) In season 4 episode 23, "The House That Jack Built", a slowly rotating, long hallway is used to simulate this effect. It's part of several ploys designed to drive Emma Peel insane.
* The Avengers (1960s) in "Who's Who???" (subtitle: "Steed goes out of his mind. Emma is beside herself."). Steed and Emma's minds are switched with those of two enemy agents. They did not switch voices, if only because the plot demanded that the enemy use the heroes' hijacked bodies to infiltrate British security. In an amusing touch, after each commercial break, the episode also includes a "reminder" about the swap to the viewer, but the supposedly helpful voice-announcer merely gets progressively more confused.
* The Avengers (1960s): Lampshaded when Steed advises Tara King (who is practicing her judo) that if possible she should throw her opponent through a plate glass window.
* The Avengers (1960s) market expanded to the US (it was previously an exclusively British show), many UK-only-era episodes were redone. For example, "The Joker" is a creepier version of the earlier story "Don't Look Behind You", and "The £50,000 Breakfast" is a remake of "Death of a Great Dane".
* The Avengers (1960s), Mrs Peel is imprisoned in a house that is specifically designed to drive her insane as part of a revenge plot.
* The Avengers (1960s), Mrs. Peel's husband Peter is discovered to be alive in the Amazon after a plane crash years ago, signaling her character's exit from the series.
* The Avengers (1960s), Mr. Steed and Mrs. Peel were often overly-polite to each other, in a very flirtatious way.
* The Avengers (1960s) since it was from 1962 and there just aren't many series prior to that where the woman had enough of an active role to get an undercover mission (and to have UST, since that implies that her main role in the series isn't already to be a love interest).
* The Avengers (1960s) story "Dark Moon Rise, Hell Hound Kill" — and was in its own turn inspired by a Tommy Hambledon short story by "Manning Coles" — which was later rewritten to change the U-boat full of escaped Nazis to a Russian sub full of spies...
* The Avengers (1960s) switched from videotape to film in season 4, and Emma Peel

became John Steed's new partner in crime, the show's shooting became more flexible: For on-location scenes outdoors, they would be shot mute, with the dialogue being rerecorded by the original actors in post-production (as was the norm for British television at the time).
* The Avengers (1960s). The contrast between the heroes' UST-laden platonic relationship and the villains' overtly sexual one is played for laughs.
* The Avengers (1960s): "The Fear Merchants" involves a group of people who find out their targets' worst fears and phobias and use them to devastating effect. Guess what one of those phobias is?
* The Avengers (1960s) "The House that Jack Built", Emma is trapped in a house that is an elaborate psychological maze, built by a now-dead businessman who had too much free time, too much money, and one hell of a grudge against her. A recorded message he leaves flat-out states that the intention is to drive her insane, and eventually to suicide.
* The Avengers (1960s), the people in a house were held hostage by implanted bombs to prevent them from revealing their plans to kill people at a conference.
* The Avengers (1960s), three foreign assassins are the only prisoners in what appears to be a monastery, with their guards dressed as monks. The advantage of this is not discussed.
* The Avengers (1960s) tone was so heavily a product of the 60s that attempts to revive the series in the 70s failed — as did a film adaptation in 1998.
* The Avengers (1960s) turned it down to pursue a career as a television producer. The producers kept coming back to him, so to deter them, he asked for (at the time) an exorbitant amount of money, more than an actor had ever been paid for British TV up to that time. To his great surprise, the producers accepted his asking price, and the rest is history.
* The Avengers (1960s): Used as a method of murder in "Look - (Stop Me If You've Heard This One) But There Were These Two Fellers...". The two murderous clowns slide a length of red carpet under Lord Dessington's door. When the distracted Dessington steps on it, they yank it out from under his feet, and Dessington plummets to his doom out of an open window.
* The Avengers (1960s) were shot live on videotape, there was no provision for correcting errors. Frequently, the actors would flub lines, props would not work, a moving camera would run into a prop, boom microphones would wind up in a shot, etc. Only after the series went to film during the Emma Peel era were the bloopers drastically reduced.
* The Avengers (1960s) when two enemy agents switch bodies with Steed and Mrs. Peel. Sort of unavoidable, since the bad guys were supposed to be infiltrating British intelligence.
* The Avengers (1960s) with a preference for catsuits. They Fight Crime, espionage, and unnatural weirdness.
* The Avengers 1966 is tied up and put on a conveyor belt to a giant buzzsaw in the episode "Epic".
* The Avengers (1998). Alice calmly stands in the path of Mrs. Peel's oncoming car. Mrs. Peel manages to brake to a stop just inches away from her.
* The Avengers (1998)) announces his plans for world domination to a room full of scientists then asks if any of them will opt out. Two scientists raise their hands to quit and the villain kills them with poison darts in front of the other scientists, unusual for this trope. The other scientists are eventually killed off anyway.
* The Avengers (1998). Bailey rappels down from above to fight Mrs. Peel.
* The Avengers (1998), between Steed and Mrs. Peel. They flirt throughout the movie, but can't get together because (as in the original series) Mrs. Peel's husband is missing (and presumed dead), so he could show up at any time.
* The Avengers (1998). Emma Peel is captured by Sir August and brainwashed into a hallucinatory state. You'd expect Steed to break in and rescue her, but instead she escapes from Sir August, fights off her delusions and breaks out to freedom by herself.
* The Avengers (1998) evokes this, because he finds it next to impossible to care

about the characters or what happens to them since the characters in the movie don't seem to care either:
* The Avengers (1998) heavily on this trope, as virtually no one shows any amount of emotion at any point in the entire movie despite being in mortal danger.
* The Avengers (1998) is finished he murders the scientists who helped him build it.
* The Avengers (1998). Mrs. Peel and her clone are fighting on a rooftop. When Steed arrives, the clone (realizing she's outnumbered) jumps off the roof to escape. We don't see what happened to her, but she turns up later with no explanation.
* The Avengers (1998). Mrs. Peel does a short one during her sword duel with Steed.
* The Avengers (1998). Mrs. Peel's car blows up after taking damage from attacking flying robot insects. Noteworthy in that the explosion takes place several minutes after the damage occurs and without any warning.
* The Avengers (1998). Mrs. Peel's clone, created by Sir August as his henchwoman. She is distinguished from the real Mrs. Peel by wearing a black leather jumpsuit.
* The Avengers (1998). Mrs. Peel's clone does it to a Prospero Project Lab staff member while breaking into the facility.
* The Avengers (1998): Sabotage of a weather control project → holding Britain to ransom with the threat of a weather attack that will destroy London.
* The Avengers (1998): Sir August's flying armed robot insects, radio-controlled by Bailey.
* The Avengers (1998). Sir August's underground base, which is on an island in the Thames in London.
* The Avengers (1998) Sir August tells Mrs. Peel, "Join me, Emma, and we have the world."
* The Avengers (1998), the flying insect robots sent by Sir August strafe Steed and Mrs. Peel as they're driving in a car.
* The Avengers (1998). The meeting of the Council of Ministers (a group of high government officials) apparently has no security whatsoever. Sir August and his colour guard are able to walk right in without opposition, and walk out again unopposed after making extortion threats.
* The Avengers (1998): While Steed is helping Emma Peel on with her boots, they are close to kissing when Father breaks in and arrests Mrs. Peel.
* The Avengers #1½ resembles an issue from the 60's, and parodies some of the ads.
* The Avengers (2012): After so carefully sowing the seeds of dissent among the already volatile heroes, Loki takes out Agent Coulson, literally giving them something to avenge, which brings them together as a team.
* The Avengers (2012) aiming at Captain America’s shield. The beam reflects and takes out the Chitauri surrounding them.
* The Avengers (2012), and Cap specifically tells the cops to get the civvies to safety, a news report afterwards shows a bunch of grieving people in front of wall covered in memorials for innocents killed by the Chitauri, and a senator demanding that the Avengers pay for the massive amount of damage to the city.
* The Avengers (2012) appears to be multinational, and even if it isn't, it's not clear that they're properly in the military chain of command.
* The Avengers (2012) are a legion of ravenous aliens whose only personality characteristic is to be led into battle by Loki. When they arrive in New York, they raze the city and cause mass chaos with little objective or purpose.
* The Avengers (2012) averts that trope with footage from those battles and others showing that, yes, innocent people had died during those battles and the Avengers had not noticed due to dealing with Loki's Chitauri army and Ultron.
* The Avengers (2012) based on a comment to Loki. Of course, she could have been lying to motivate him into saying something, but that's beside the point.
* The Avengers (2012), bland villains and too many jokes — most of which were addressed in the Phase Three films.
* The Avengers (2012), Cap is thrown out a window by the force of an explosion, and lands on a taxi outside.

* The Avengers (2012). Cap replies that there's only one God, and he's pretty sure that He doesn't dress like that.
* The Avengers (2012): Chitauri ships are weaponized cyborg Space Whales.
* The Avengers (2012) features both a regular and a meta example. The normally reserved Agent Coulson struggles (and fails) to avoid gushing like a fanboy about meeting Captain America, eventually bringing up the subject of his trading cards. Meta-wise, Clark Gregg (the actor who plays Coulson) admitted in an interview that the SHIELD helicarrier made him squee, even mentioning it by name and explaining that he'd never really understood the meaning of "squee!" until that moment.
* The Avengers (2012) feel and showcase the wider effects of the battle.
* The Avengers (2012) genre and mixes it all together to make it a delightful Superhero Movie.
* The Avengers (2012) - Iron Man tries to simply blast Loki's Tesseract-powered portal device, only for it to protect itself with a force field. As the armor he's wearing is already on his last legs, he goes for "Plan B" - stall Loki while J.A.R.V.I.S puts the last-minute touches on his newest suit.
* The Avengers (2012): Loki's back and this time he wants to take over the Earth with help from the Chitauri.
* The Avengers (2012) Loki to Thor, he just didn't see fit to start an argument with a demi-god over the matter.
* The Avengers (2012) NYPD Officer Saunders appears in one scene of the theatrical cut (which he survives), but the last of the several deleted scenes where he provides additional aid in the final battle has him get shot and apparently killed.
* The Avengers (2012) or other Hollywood contrivance. Not quite right, but closer than Hollywood usually gets.
* The Avengers (2012): Perhaps played with, since Loki considers it a painfully obvious answer.
* The Avengers (2012) sarcastically suggests that he should do this with the Tesseract.
* The Avengers (2012), SHIELD agents fire at him with no success. Justified since they didn't know how durable Loki was, and for the rest of the movie they don't attack him small arms.
* The Avengers (2012)), sit on the sidelines snarking bitterly at everyone (Bruce), or get brainwashed and kidnapped moments after showing one of the most level-headed displays of reason in the first half of the film (Clint).
* The Avengers (2012)'s prospective recruits for the Avengers Initiative due to the death of his daughter Hope.
* The Avengers (2012). The creature is destroyed, but Loki simply summons more like them from the portal. And even those are still a fraction of the army on the other side of the portal.
* The Avengers (2012): The original six Avengers (Captain America, Iron Man, Thor, the Hulk, Black Widow, and Hawkeye) vs. Loki and his Chitauri fleet.
* The Avengers (2012) The World Security Council could also qualify, as they unleashed a nuclear weapon on New York to wipe out the alien army without trying any other options, like sending in the military to help the Avengers, or aiming the weapon at the alien ship in the first place.
* The Avengers (2012), this helps justify why none of the heroes go to their friends for help: There's just not enough time.
* The Avengers (2012)). This trope is also directly referenced at the start of the final battle:
* The Avengers (2012), Thor uses the Chrysler Building's spire to concentrate and amplify his lightning.
* The Avengers (2012)) to get the hell outta Dodge before she's shot down by anti-aircraft artillery. Damn.
* The Avengers (2012) to turn a profit on reconstruction contracts, which is a small victory.
* The Avengers (2012)" when Angelus does the same thing to Angel's companions from his prison cell.
* The Avengers (2012): When Loki tries to mind control Tony Stark with his staff,

its fails because of the metal generator in his chest. Tony puts on a look of mock-sympathy, and starts talking about "performance issues" in a way clearly meant to refer to erectile dysfunction.
* The Avengers (2012) while turning away so Steve can't see the tears in his eyes.
* The Avengers (2012) winds up with some pretty nasty cuts to her face after narrowly avoiding death-by-grenade, remaining bruised and bloody until the action subsides and she's seen getting medical attention.
* The Avengers #290, Dr. Druid points out to the Super-Adaptoid the importance of thinking things through:
* The Avengers about Marvel superheroes), a female member of the band dyes her dark hair blond to appear less Jewish. It isn't completely successful as the dark roots of her hair are still visible through the blond dye which at least one Nazi officer notices, though she manages to get away from him in time.
* The Avengers activates, which indicates she may have made the wrong choice.
* The Avengers actually made a point of not showing blood, to maintain the lighthearted tone of the series, despite numerous deaths by gunshot, stabbing, explosion and so on. There were some episodes where a little blood was shown, but they were few and far between. In one episode, we are led to believe a character was mauled to death by a tiger; the victim's clothes are in shreds, but there's no blood at all.
* The Avengers: A distress call is responsible for the birth of the team. Rick Jones had been hoping to send a call out to the Fantastic Four, but Loki intervened, and instead the founding members heard it instead.
* The Avengers, after Hercules had been rendered comatose, Zeus brought the Avengers to Olympus and attacked them. A figure came to their aid, and Zeus fought him for some time, before he realized it was Hercules, risen from his sick bed to help his friends. Zeus is deeply grieved by his folly.
* The Avengers, after the Battle of New York, to foreshadow the public opinion of superheroes in Phase One: most people are supportive and thankful, but some are wondering about the damage the city sustained and the fact that the Avengers themselves aren't answering to anyone.
* The Avengers: Age of Ultron) to use it to neutralize the Hulk by tanking his hits and returning the favor with what appears to be a jackhammer with a fist on it. After a flurry from the latter, the Hulk spits out a tooth and glares at Tony.
* The Avengers) and according to Gruenwald Shooter's involvement was essentially the decree that they needed to find a different father. Still despite a book re-written by committee at the last minute Shooter, perhaps because of his infamous reputation, is generally the sole person blamed for that issue.
* The Avengers, and becoming the main advocate for the Avengers Initiative, which was planned to be a team of superheroes. And that includes... you guessed it, Captain America.
* The Avengers and donning his full armor, and Hawkeye checking his bow.
* The Avengers and he's left on the floor, physically and mentally in shock.
* The Avengers and he threatens to retaliate if the Slokovian leader is harmed, forcing his fellow Avengers to clash with the God of Thunder.
* The Avengers. And instead of the stock 'standing together at the altar' image, they're making out in front of the church.
* The Avengers and leader of the second Emissaries of Evil and the third Masters of Evil.
* The Avengers and the ghost of Brother Voodoo. They follow the will of an undead Celestial.
* The Avengers and the X-Men fight against an alien invasion of Skrulls and Badoons in Central Park, and a woman and her children were caught in the crossfire. The father then arrived at the scene, and
* The Avengers a new, modern uniform to replace his World War II outfit.
* The Avengers are flying, armor-plated whale monsters used by the Chitauri as a combination of siege engines and war animals in the invasion of New York.
* The Avengers, as a group, serve as this to assorted supervillains and even some who technically aren't supervillains, despite the fact that they have rules of

engagement (i.e. they try not to kill people where reasonably possible). This is because a) several of their members have no compunction whatsoever about killing when 'off-duty', b) they're nigh-unstoppable when acting in concert, c) as Victor von Doom points out, they have in the past taken part in deposing leaders they took a dislike to. Oh, and they're known to take threats to/attacks on those they see as their own extremely personally. While this is shown to be very useful at times, it is pointed out that the
* The Avengers (as a reserve) back in the eighties, it involved him sticking to the bottom of their quinjet and following them to a mission.
* The Avengers, as Captain America prepares to dive into a battle involving Thor and Loki:
* The Avengers aspects, was allowed to be somewhat more suggestive, with the final line of the final episode featuring a character expressing concern about Steed and Tara being unchaperoned while riding a rocket ship into earth's orbit.
* The Avengers, as the counterpart to Sasquatch. We don't learn if he's under the curse or has a different origin, or anything else about him before he gets killed.
* The Avengers at Iron Man. While the armor sustains some damage, most of the energy is absorbed by the ARC reactor and is fired by Tony straight back at Thor. Also, Captain America says Loki's "glow stick of destiny" resembles a HYDRA weapon.
* The Avengers: At the end, Loki is shown in chains for his transport back to Asgard, in addition to a muzzle.
* The Avengers-based powers, and it granted Sean Dolan great physical powers as Bloodwraith.
* The Avengers because Coulson was revived and became the boss of this group of agents.
* The Avengers) because she was a dead ringer for his late first wife Marya Trovaya, who had been murdered by Communists.
* The Avengers before breaking her and Giant-Man up for good (or at least until someone else comes along).
* The Avengers" (being an archer). Loki is "Reindeer Games" (due to the helmet) and "Rock of Ages" (due to his regalia). Loki's staff is "the Glowstick of Destiny" (which glows and mind controls people).
* The Avengers by locating (and then punching) sensitive nerve clusters in his neck.
* The Avengers by the Russian officer early in the film in order to trick him into confessing what he was intending to do before she was forced to abort the operation thanks in part to Loki's arrival.
* The Avengers, Captain America, Black Widow, and Hawkeye steal a quinjet from the S.H.I.E.L.D. Helicarrier without even bothering to be be stealthy about it.
* The Avengers Captain America is placed under an illusion and believes he is reliving his past. He even gets to save Bucky. Ironically it's the illusion of Bucky that solemnly convinces the Captain to wake up and tells him that he knows this isn't how it actually happened. Captain America thanks Bucky for saving him again before taking his advice.
* The Avengers, Carol Danvers refuses to tell the team about her recent depowering because she believes this will scupper her chances of staying on during a reshuffling. As she does, we see Cap suggesting Carol for the team precisely because he can tell she wants on so badly. For added irony, Carol's reaction to her depowering eventually leads to her being booted off the team for real.
* The Avengers: Cathy Gale's fighting style is made of this trope. Back then, fight scenes would be recorded 'as live' on studio video with no possibility for editing or retakes, rather than being pre-filmed and edited.
* The Avengers change their line-up so frequently that they can't even plan for their own team, let alone whatever they're up against. Winging it is what they do best.
* The Avengers' city scenes, set in New York and Stuttgart, were shot in Cleveland.
* The Avengers clone do the job. Mother gives Mrs. Peel a chance to prove her innocence by finding out who was behind it.
* The Avengers. Commercials for the former film featured the bit where S.H.I.E.L.D.

agents mistake the Destroyer for a Stark Industries weapon, and commercials for the latter played up Howard Stark's role in the creation of Captain America, with Dr. Erskine's "Now, Mr. Stark!" line featured prominently.
* The Avengers, created by the evil male robot Ultron to be his bride; and later, Alkhema, who had a similar origin. Neither of these relationships worked out. Later on, Ultron showed up in female form himself.
* The Avengers crossover novel, Hydra planted a bomb at an experimental power plant that both the Avengers and Thunderbolts arrived to stop. Iron Man went to disarm it, only for Hawkeye to appear and reveal that he'd disarmed the bomb twenty minutes before the Avengers made it there.
* The Avengers describes the Asgardians as "basically gods" and Captain America blows it off saying there's only one God, and He probably doesn't dress like that.
* The Avengers doesn't have any ninja beatniks, though, so Jazz doesn't seem to fit... but he is awesome, which is what matters.)
* The Avengers, due to the sudden appearance of Thanos. Even more egregious given Iron Man used to be U.S. Secretary of Defense, not to mention the Director of S.H.I.E.L.D.
* The Avengers, during the faux Vampire War, the heavily armed and armored Shadow Colonel (actually Xarus, a son of Dracula) carried around a large minigun that chewed through vampires and even posed a threat to a number of the Avengers.
* The Avengers: Earth's Mightiest Heroes! after a big battle, grabbing Iron Man, Ant-Man and... Hulk. Each of them has an adorable bewildered look on their faces.
* The Avengers: Earth's Mightiest Heroes! after its years of financial troubles.
* The Avengers: Earth's Mightiest Heroes! after saving her from getting shot by a Kree sentry carrying a bomb that could wipe out all life on Earth. However, Giant-Man only gets as far as, "Jan, I love..." before fainting. He regains consciousness by the end of the episode, but becomes too shy to finish the declaration when Wasp asks him if he still has anything important to say.
* The Avengers: Earth's Mightiest Heroes! also appear over the course of the season, and return for the big team-up in the finale.
* The Avengers: Earth's Mightiest Heroes! also made it available to stream.
* The Avengers: Earth's Mightiest Heroes!, and announces that he has fallen in battle.
* The Avengers: Earth's Mightiest Heroes!, and he's testing the Four's strength to see if they were badass enough to help him out.
* The Avengers: Earth's Mightiest Heroes!: As a culmination of his angst, in "Yellowjacket", Hank Pym abandons his interest in rehabilitating criminals and as Yellowjacket, starts appearing to kill them, but actually transports them to a miniature prison he created by himself. However, he abandons this project by the end of the episode.
* The Avengers: Earth's Mightiest Heroes!: As a villain he is able to take on multiple Avengers at once, easily trouncing them by either phasing away from or getting too dense for every attack. As a hero... he is frequently surprised and knocked down, despite clearly still demonstrating these abilities.
* The Avengers: Earth's Mightiest Heroes!, as we see the shadow of some blood and guts spraying out, (though everything is clean when they show them in full).
* The Avengers: Earth's Mightiest Heroes! becomes Giant-Man and flattens a HYDRA robot.
* The Avengers: Earth's Mightiest Heroes!, but are revealed alive in the tie-in comic.
* The Avengers: Earth's Mightiest Heroes! called "Ultron Unlimited", "The Fall of Asgard", and "Who Do You Trust?" his favorite episodes.
* The Avengers: Earth's Mightiest Heroes! Captain America, Bucky and the Howling Commandos storm the Red Skull's castle.
* The Avengers: Earth's Mightiest Heroes!, Captain America suspects something is mind-controlling the Hulk to go berserk, who is currently captured by S.H.I.E.L.D. and General Ross. When nothing can be done to convince them to let the Hulk go, he then proceeds to break into the underwater base and breaks all sorts of rules to rescue Hulk, which is against his otherwise extremely lawful persona.

* The Avengers: Earth's Mightiest Heroes! claimed that the show's mediocre ratings might have been the result of the series being inaccessible to new viewers. Even then, viewers jumping in at this point would probably still feel confused.
* The Avengers: Earth's Mightiest Heroes! criticizes his decision to give up weapon-making and become a vigilante.
* The Avengers: Earth's Mightiest Heroes! declares an "Omega-level" emergency, meaning all SHIELD personnel, the Hulkbusters, and the US armed forces are now under his direct command. It ultimately takes the newly-formed Avengers to bring Graviton down.
* The Avengers: Earth's Mightiest Heroes! does this. As arrogant and psychotic as a machine he can get, his voice never really changes.
* The Avengers: Earth's Mightiest Heroes! due to a magic spell. Captain America goes back to his scrawny, pre-Super Serum self, Iron Man is in his prototype armor (and doesn't know how to use it), and Thor becomes a mortal (and promptly gets his leg broken, in homage to the injured leg of Donald Blake, his comic incarnation's non-powered human form for some time).
* The Avengers: Earth's Mightiest Heroes! episode "The Casket of Ancient Winters."
* The Avengers: Earth's Mightiest Heroes! episode "To Steal An Ant-Man", Scott Lang robs a Hydra bank to get the money to ransom his daughter.
* The Avengers: Earth's Mightiest Heroes! frame him of terrorizing SHIELD, torture him in prison offscreen for several episodes, and provoke him into performing a rampage that causes even his best friends to lose their respect for him. Worse, during the Hulk's imprisonment, none of the other Avengers acknowledged his absence.
* The Avengers: Earth's Mightiest Heroes! gear for a bank robbery, he finds out by chance that the helmet allows communication with insects. Also, when he tries to use Pym Discs to make the stacks of money pocket sized, he accidentally makes them shrink smaller than microscopic size instead.
* The Avengers: Earth's Mightiest Heroes! gets his own, Stormbreaker, which is similar to Mjölnir.
* The Avengers: Earth's Mightiest Heroes! had the original Big House prison. Since it was partially designed by Hank Pym, he believed strongly in prisoner rehabilitation, so every inmate was allowed some form of vanity for their cell. This allowed for a wide variety of different tastes, though not as opulent as some other examples. Mandrill had a hammock, Arnim Zola had a video game system (pong), The Mad Thinker had a chalkboard for him to do work on, and Grey Gargoyle perhaps had it best with an armchair, and tea set to enjoy.
* The Avengers: Earth's Mightiest Heroes! has a completely different animation style and voice cast compared to the final show. However, re-done versions of some of the scenes made their way into the episodes "Come the Conqueror" and "The Kang Dynasty", among others.
* The Avengers: Earth's Mightiest Heroes! has a scene like this in the series finale, after the Avengers decide to call their other superhero friends (Spider-Man, the Fantastic Four, Black Widow, Wolverine, etc.) for help.
* The Avengers: Earth's Mightiest Heroes! has a subplot regarding the return of Surtur, the fire demon, and the possibility that he will cause Ragnarok to destroy the Earth. In two episodes, Surtur wipes out the dwarves of Nidavellir, enslaves Amora the Enchantress, and slaughters Korbinite aliens. A bonus episode on one of the show's DVDs features copious buildup to a confrontation between the Avengers and Surtur. However, since the show didn't receive a third season, this confrontation ends up never taking place.
* The Avengers: Earth's Mightiest Heroes! has one that turns into a scythe.
* The Avengers: Earth's Mightiest Heroes! has the Incredible Hulk get arrested for a crime he didn't commit. None of the other Avengers show any distress over the loss of one of their oldest and most powerful members, not even the heroes who had become his closest friends over the show's course. They don't seem to bother freeing him until the series finale becomes imminent.
* The Avengers: Earth's Mightiest Heroes! has the Skrull leader say that they have been holding Captain America for two of their Earth months.

* The Avengers: Earth's Mightiest Heroes! has Tony Stark examing footage of some of his fellow Avengers (corresponding with lyrics in the theme tune), before armoring up to join the others in battling the forces of HYDRA. The closest the series gets to that is in the episode "Hail, Hydra!", but even then there's a ton of differences (AIM's involvement, the Cosmic Cube, Avengers who had joined since)
* The Avengers: Earth's Mightiest Heroes!, hates getting called "Power Man".
* The Avengers: Earth's Mightiest Heroes!, Hawkeye's "You're dead to me!" is a particularly harsh variation reserved for a former friend, Black Widow.
* The Avengers: Earth's Mightiest Heroes! helped Crossfire rob banks to pay for the medical treatment of Scott's daughter, Cassie. Some time after Cassie got cured of her disease, Crossfire kidnapped her to make Scott pay him a share of the stolen money. This prompted Scott to steal Hank Pym's Ant-Man suit so he could quickly pull off a solo bank heist.
* The Avengers: Earth's Mightiest Heroes! He nearly nukes the entire world. The robot is likely one of the scariest villains to emerge from the show thus far.
* The Avengers: Earth's Mightiest Heroes! infiltrate the Red Skull's castle.
* The Avengers: Earth's Mightiest Heroes! introduces villains Amora the Enchantress and the Executioner. Before they make their official debut attacking the heroes, they're first seen several scenes earlier as just two civilians walking past the Avengers Mansion.
* The Avengers: Earth's Mightiest Heroes!: Iron Fist and Luke Cage agree not to let anyone know that they lost a battle against a bank robber who wielded Ant-Man gear.
* The Avengers: Earth's Mightiest Heroes!, Iron Man becomes the first superhero to lead the Avengers. As people who read Iron Man's comics and/or saw his movies would expect, he mostly uses red and gold armor in this show. This incarnation even wears red as Tony Stark.
* The Avengers: Earth's Mightiest Heroes!. It's especially noticeable for the Avengers Quintet.
* The Avengers: Earth's Mightiest Heroes! join the group in the second season.
* The Avengers: Earth's Mightiest Heroes! Man-Ape became king of Wakanda by killing Black Panther's father (he cheated).
* The Avengers: Earth's Mightiest Heroes! moments by making most of the episodes into done-in-ones, in contrast to the serialized nature of the first season.
* The Avengers: Earth's Mightiest Heroes! pulls the pin out with her tongue, then the rest of her teeth.
* The Avengers: Earth's Mightiest Heroes! refuses to let the Skrulls' treatment of him in prison break his spirit, and he eventually leads the other prisoners in a riot and escape.
* The Avengers: Earth's Mightiest Heroes!." Since living organisms tend toward violence and chaos, the only way to truly bring about peace and order is to eradicate the cause of violence and chaos.
* The Avengers: Earth's Mightiest Heroes! Skrulls seeking to make the Earth their new homeworld. Galactus ate their old homeworld and a prophecy proclaims that Earth will be their new home.
* The Avengers: Earth's Mightiest Heroes! sometimes had this complaint lobbied at them. The new executive producer had some planned storylines compressed into one episode each, making the show feel more rushed and less deep than before.
* The Avengers: Earth's Mightiest Heroes!, T'Chaka is killed by Man-Ape during a duel to the death (although to be fair, Ulysses Klaw helped him).
* The Avengers: Earth's Mightiest Heroes! tearing out his power source, which is located where his heart would be.
* The Avengers: Earth's Mightiest Heroes! that leaves him unable to distinguish friend from foe.
* The Avengers: Earth's Mightiest Heroes!, the Enchantress, is the one casting the spell that allows him to stay alive, meaning he can only stay alive if he does what they say. Other than that, he has absolutely no interest in being a supervillain.
* The Avengers: Earth's Mightiest Heroes!, the Hulk allows Bruce Banner control of their shared body for one day a month. In "Nightmare In Red", Banner chooses to spend one of those days fishing, accompanied by a reluctant Hawkeye.

* The Avengers: Earth's Mightiest Heroes!, those same fans exclaimed that their real reason for helping sounded cheaper than their theory.
* The Avengers: Earth's Mightiest Heroes! to a prisonful of criminals. She starts with "most of you aren't stupid".
* The Avengers: Earth's Mightiest Heroes! to get two of Malegrim the dark elf's Wolf Minions to crash into each other.
* The Avengers: Earth's Mightiest Heroes! to looking like his comic counterpart with darker skin. It looks like it's going to stick, at least for the time being.
* The Avengers: Earth's Mightiest Heroes!, to see who could destroy the most of Kang's scarabs during his invasion. Later, Hawkeye joins in on the fun.
* The Avengers: Earth's Mightiest Heroes!, using the superpowers she developed after exposure to Kree energy. She also proceeds to wear her hair like this in her civilian identity. Though it's possible she always let her hair hang loose when she wasn't at work, so tying it back in a bun or a ponytail was just for the pragmatic purposes of her military job.
* The Avengers: Earth's Mightiest Heroes! was consistently one of the highest-rated shows on Disney XD.
* The Avengers: Earth's Mightiest Heroes!, Wasp becomes one when she's mutated by Gamma Radiation.
* The Avengers: Earth's Mightiest Heroes!, we have Wasp, whose costume exposes her entire back.
* The Avengers: Earth's Mightiest Heroes! went through a period in its second season in which Marvel stopped sharing online previews. The show also had a surprisingly scant amount of merchandise during its run.
* The Avengers: Earth's Mightiest Heroes! whenever they are reading any of their lines.
* The Avengers: Earth's Mightiest Heroes!, when something very bad happens, like Graviton escaping or the Skrulls invading Earth, the S.H.I.E.L.D. Helicarrier is usually among the first victims.
* The Avengers: Earth's Mightiest Heroes!, while battling the Enchantress and the Executioner, Iron Man's suit is damaged, Giant Man is out, and Wasp is caught by the Enchantress. When Hulk arrives and breaks the Enchantress' concentration. Thor powers up Mjölnir's thunder magic.
* The Avengers: Earth's Mightiest Heroes! (with Hank standing in for the Predator).
* The Avengers: Earth's Mightiest Heroes! with mystically-derived powers) actually solves the problem they're working on.
* The Avengers elite force "... to bring together a group of remarkable people... to fight the battles we never could." Their first mission pits them against the Chitauri, Drop/Shock Troops with some Airborne Motorcycle Cavalry and a couple of monstrous, apparently living, flying Land Battleships.
* The Avengers endure some painful transformations in the episode "Gamma World", as part of The Leader's plan to turn everyone in the world into Gamma-irritated monsters.
* The Avengers, even saying it's not the Avengers without them. Despite the fact that they were largely the two Marvel heroes most recognizable to the general public, both of them had only been full-time Avengers since 2005, and in fact, a good 40 years of Avengers history barely included either of them (Spider-Man became a reserve member in the early '90s but was rarely used unless all team members were being called in).
* The Avengers extraordinaire, doesn't even mind playing Bruce's assistant.
* The Avengers for advice, who convinced him to take the part. Ruffalo ended up kicking ass as Banner/Hulk. This is amusingly similar to their characters' relationship in the movie.
* The Avengers for a long time, and Kang spends a few years trying to revive her.
* The Avengers, for example, Hercules is often portrayed with various lovely young women. He has a romantic and sexual history with his teammates Black Widow and She-Hulk, and also apparently with Northstar.
* The Avengers for letting her leave with that creep. There's a reason both professionals and fans often consider this issue the single worst done-in-one story

ever published by Marvel.
* The Avengers for the culmination of one of the most ambitious superhero movie projects to date. The Marvel Cinematic Universe has become the biggest and most successful film franchise in history, with over 24 critically and financially successful films released as of 2020.
* The Avengers from a 30th-century earth that is entirely under his dominion, he's got some pretty startling weapons to stash there.
* The Avengers from a previous Avengers story, "Don't Look Behind You", which starred Emma Peel's predecessor, Cathy Gale.
* The Avengers gets one of these in on Loki after being stabbed through the chest.
* The Avengers grinning like a twelve-year-old as he squeezes Hemsworth's bicep while Hemsworth just smiles and laughs.
* The Avengers, had almost nothing to do with the movie. Fans and viewers were expecting to see Coulson and the gang fighting off Dark Elves and CGI beasts; what they got was Coulson and the gang cleaning up some rubble and making a dumb joke about how superheroes never pick up after themselves.
* The Avengers has a lot of this as well. It's justified in a way, due to the fact that, though they had greater numbers, the Chitauri weren't exactly impressive fighters. Though the casual banter does go down significantly as the battle goes on.
* The Avengers has a number of news anchors and commentators talking about the impact of the events.
* The Avengers) has a similar ability, and can turn himself into any substance he can touch. Naturally, he usually chooses stone, steel, concrete or some other strong material, but he becomes very dangerous when he uses the power to assimilate Cap's shield or Thor's hammer.
* The Avengers has been so successful that it has influenced a number of other works and adaptations.
* The Avengers has cooked entire feasts for Earth’s mightiest heroes.
* The Avengers has the attack on the S.H.I.E.L.D. Helicarrier, featuring Loki and his forces laying waste to it, the Hulk transforming to wreak havoc, and the Avengers working with S.H.I.E.L.D. personnel to weather the attack.
* The Avengers has the climactic Battle of New York take place all around the downtown area. On a few occasions we see Hulk rampage through occupied buildings, but the flying Leviathan creatures seem to crash through empty buildings, one brought down personally by Hulk and Thor. And then at the very end it is averted as the hundreds of candles seen during a brief memorial on the news are undoubtedly not for the Chitauri invaders that died.
* The Avengers has Tony performing a three-point landing when he makes an appearance in Germany to capture Loki.
* The Avengers have a former member, Starfox, who has the power to project good feelings. He mostly uses this to get laid. This is only to be expected, given his real name is Eros.
* The Avengers have Quinjets capable of going from Earth to Mars in the space of a few hours, at the most.
* The Avengers, Hawkeye swings down and crashes right through a massive window. He isn't badly hurt, but his pained body language seems to imply that he got poked by a few pieces of glass.
* The Avengers he's alive and kicking, and knowledge of this is restricted to 'level seven' clearance.
* The Avengers. He's not anywhere near Alfred-level badass but he's got some military background of his own.
* The Avengers he's shown to be an avid reader. His mother Frigga sends him books to his prison cell to appease him.
* The Avengers infiltrated a police academy to find answers about the murder of her husband Billy. While there she met and fell in love with Sergeant Matt McMullin who was an instructor at the academy. Unfortunately for Greer, Matt was involved with the Brethren of the Blue Fist, a group of vigilante cops operating out of the academy. Worse, Matt was revealed to have been the one who killed Billy to keep him

from exposing the Brethren's crimes.
* The Avengers, in many incarnations, were sponsored by Tony Stark himself.
* The Avengers in order to stay calm and in control. It also allows him to transform into the Hulk at will without the requisite adrenaline-pumping event that usually triggers the change.
* The Avengers: Interviewed about the heroes in the ending (and, ironically, the only random citizen to claim the idea of "superheroes in new York" is "ridiculous").
* The Avengers. In the episode “Silent Dust”, Steed steps in a bear trap while being chased by one of the bad guys. He manages to free his foot but passes out shortly afterward.
* The Avengers introduced a Captain America from the year 20XX (but given said Captain America is an adult Danielle Cage, who was an infant in the modern day when the series was released, it logically takes place around twenty-plus years later).
* The Avengers), is able to quickly formulate battle plans and issue orders as the battle develops.
* The Avengers is a fashion designer in her spare time. She likely has the largest wardrobe in comic book history.
* The Avengers is a literal one, though the first one was a villain. Black Knight II, however, plays it straight.
* The Avengers is passed out and Cap is weak and disoriented, but on his feet.
* The Avengers, is praised for being one of Marvel's best movies and a satisfying conclusion to the Infinity Saga, having even higher ratings and box office than the first movie.
* The Avengers is revisited, although most of the action takes place after the invasion has been dealt with.
* The Avengers, is simply a weapon given to him by The Other. The Tesseract meanwhile is implied to be a piece of Asgardian technology.
* The Avengers. It's mostly kept in the background and referred to obliquely as "The Incident". It has however greatly impacted the value of property in Manhattan.
* The Avengers. It's not entirely clear what 'winning' or 'losing' means in this context, but they both seem very happy with the arrangement.
* The Avengers, it's revealed that Clint is actually married with kids and Natasha ends up developing a relationship with Bruce Banner.
* The Avengers it's Sean Dolan, a young Irish orphan he saves from falling off a cliff. He spends time training the young man in swordsmanship, but the entire thing goes south when Sean draws the Ebony Blade to defend Whitman's family castle and is transformed by the sword's curse into the evil supervillain Bloodwraith.
* The Avengers joined the show, they wanted her to bleach her hair blonde. The dye ruined her hair, so in some episodes, she was wearing a wig. The short hair was Linda's growing back. One episode even has characters arguing about what color Tara's hair is.
* The Avengers, Kang's robots and clones repeat endlessly: "Kang conquers! Kang conquers!"
* The Avengers: Kang the Conqueror uses a dual minigun that's light enough to fire with one hand, preventing the need to dual wield, but he sometimes holds an additional gun in his offhand, because he can.
* The Avengers. Lampshaded by Tony in that same scene. "Right, got its attention. What the hell was step 2?"
* The Avengers. Later, his right hand got amputated and replaced by a magical scythe when he was empowered by the demon Lloigoroth.
* The Avengers. Later, when Agent Coulson shows up, Pepper lets him in while Tony tries to get rid of him; Tony whispers to Pepper "I thought we were having a moment", and she responds "I was having 12% of a moment."
* The Avengers leaps by, catches him, drags his hand down a nearby building to slow both of them to a Stark-safe velocity, ultimately cushioning Tony with his own body for the final 20 feet or so to the pavement.
* The Avengers live-action movie. Though the game was cancelled, one of the Skrulls designed for it was featured in the movie's toyline.

* The Avengers make a plan for him to break out of one of Kang's concentration camps that is not revealed until it has succeeded.
* The Avengers making an excuse not to tag along. (Although Spider-Man later became a full time member)
* The Avengers. Massively intelligent even by the standards of an Asgardian, and he doesn't mind reminding people how great he is:
* The Avengers — and also at one point draws the appreciative eyes of a cruise ship full of staring women. Yet he often acts like he's got no chance with the ladies and acts pleasantly surprised and eager to please whenever a woman shows him any attention.
* The Avengers meaning a certain part of a woman. Of course, he is a thousand years old.
* The Avengers, meaning the world is now aware that the Avengers aren't an isolated example.
* The Avengers, meanwhile, are nominally under SHIELD's command, but for various lampshaded reasons, they do whatever they like.
* The Avengers miniseriess, the Avengers aren't enough against Kang's bio-mechanical monsters. So Tony gives everyone a mech, including unsavoury ally Thanos.
* The Avengers: Mrs Peel's last words to Steed were: "Always keep your bowler on in times of stress, and a watchful eye open for diabolical masterminds."
* The Avengers. Natasha is tied to a chair, seemingly at the mercy of Russian badinskys, when a mook's phone rings. It's for the leader, and it's Phil Coulson:
* The Avengers Needless to say, neither Nick Fury nor any of the Avengers were particularly impressed by their stellar display of competence.
* The Avengers notably avert this, with Black Widow being a prominently marketed character in the toyline.
* The Avengers of the distant past to the person remembering them in the present day.)
* The Avengers of the Hulk doing just that — Loki would use duplicates but Hulk would find the real one by his scent.
* The Avengers once fought a man with the ability to control machines who attacked a demolition derby under the belief that the machines were in pain and needed liberating. When confronted by the Vision, the Avengers' resident sentient machine, with the prospect of reading his feelings he realizes that he's actually delusional and can't read machine minds at all.
* The Avengers, one episode featured a race where participants were assigned to partners. Steed's partner was a young woman who recounted the tragic deaths of her many husbands, apparently by bad luck, as Steed grew more disconcerted each time she revealed a new former spouse.
* The Avengers on this trope being averted, until the World Council panics and tries to write off the whole city. This is averted in a deleted scene when the military finally arrives and they start picking off the Chitauri soldiers one by one.
* The Avengers performance. It's almost unfair — the guys just get Scarlett Johansson, while the girls get an entire team of strong, muscular, virile men in either tight-fitting or sleeveless costumes.
* The Avengers Prelude: Fury's Big Week from S.H.I.E.L.D.'s perspective, confirming that they all happened pretty much at once.
* The Avengers reuniting after Civil War, and their reaction to the knowledge that Tony had drafted a kid in the battles. Expect such nuances as Black Widow calling Peter "Little Spider", Cap freaking out at his having dropped an airport bridge on Peter, and them deciding to train Peter better since he won't stop being Spiderman.
* The Avengers, right after Nick Fury uses an RPG to take out the Quinjet carrying the nuke that the WSC ordered against New York, a second jet takes off from a different catapult. Without thinking about it, he whips out his sidearm before realizing the bullets would do as much damage as a spitball from the distance.
* The Avengers, Rogue wears a pair of sunglasses with red capital A's on the lenses.

* The Avengers saw the alien writing on the ship in English, while Mantis saw it in Vietnamese. Once the Avengers shut off he device, Thanos' lackeys promptly killed one another since they could no longer understand what anyone was saying.
* The Avengers, second time it was Rage, and third time it was Triathlon.
* The Avengers, she easily frees herself and drops everyone she was dealing with in no time flat. With Coulson listening in on the whole thing, showing all the concern warranted by being put on hold.
* The Avengers shines through as his snarks include many movie references.
* The Avengers's hold on the title, "Female Gaze, The Movie." Where to start?
* The Avengers shot up dramatically, with some restaurants reporting increases of up to 80 percent.
* the Avengers shut down the portal to prevent the nuclear explosion from coming back to Earth.
* The Avengers sign his mint-condition Captain America trading cards takes on a slight darker turn later on when we see the aforementioned trading cards wet with the (apparently) deceased Coulson's blood, and being used by Nick Fury to motivate the Avengers to get their act together.
* The Avengers's Jane Foster relegated to a cameo as a photograph since she was heavily pregnant when they wanted her to film a cameo.
* The Avengers) spends a lot of time trying to keep Bruce Banner calm. Then the alien invasion arrives.
* The Avengers. Spidey laughs it off, stating matter-of-factly he does not believe in Lava Men. This is despite the fact that, not only is he a superhuman joining a team of gods, mutants, super soldiers, and androids, not only is he fighting equally inhuman villains at the time, but one of his own rogues resembles Lava Men a great deal: The Molten Man.
* The Avengers started off with the intent of becoming a gritty crime drama. Around the time Emma Peel took over as Steed's partner, plots became a lot more cartoony and the lead spies much quippier. By the time the series shifted to colour, the show featured plots like man-eating plants, housecats trained as assassins and an actual shrink ray. Uniquely for this trope, it's the wackier seasons that are more fondly remembered, and any attempts to bring the series back to its 'realistic' roots have been met with hostility.
* The Avengers: Steed and Mrs. Peel fake a kiss while following an enemy spy in "Escape in Time". However, they only face one another in a street corner and don't actually kiss.
* The Avengers (Stern) sits on the playfield. During the game, he flails his fists and grabs pinballs; premium editions even include a "Ramp Throwing" action where the Hulk throws a ramp.
* The Avengers (Stern), which spells COSMIC (and enables the Super Jackpot) as it spins.
* The Avengers, Steve Rogers and Tony Stark discuss Loki's next move in the following exchange:
* The Avengers's then-current storylines, also written by Engelhart, affect his status quo in this story.
* The Avengers. Still, after being cured from the split personality problem, he kept being "Yellowjacket" as his superhero identity (or at least, one of the several he had over the years). For this reason, hardly any modern reader of the Avengers will read the TPB and not realize what was really going on long before the reveal.
* The Avengers. Thanos is originally this for Ronan the Accuser, but Ronan defies him and embarks on his own personal plots.
* The Avengers that Hulk at one point prevented a suicide attempt, and later it emerges in the final battle because Bruce told it to.
* The Avengers that the films started playing up the franchise as a whole in marketing as opposed to any individual past film.
* The Avengers, the controllers on the S.H.I.E.L.D. helicarrier cheer when Tony Stark captures the nuke bound for New York and instead sends it through the portal.
* The Avengers: The Eternals visit the Avengers, and Sersi tells Ikaris not to

threaten the Black Knight, because she wants him to be her "Gann Josin". Meaning, her husband under Eternal laws, and that includes a permanent telepathic link between them, so both share the other's thoughts as in a single mind. Angered by his discussion with the Avengers, Ikaris turns the Black Knight into Sersi's Gann Josin right away. And the Black Knight? Fine, thanks for asking. Nobody ever asked him if he wanted that, and he certainly didn't.
* The Avengers, the Hulk's first transformation looks excruciating and takes a long time, because Banner is fighting it the whole time. The second time, he transforms intentionally and it only takes one smooth second, with no thrashing or screaming.
* The Avengers. The magic she had drawn on however turned out to be from a demon who decided to erase her twin sons from existence.
* The Avengers. The only similarity with the Gulf War ("Operation Desert Storm") is the name, and that's it: the actual plot has no relation at all.
* The Avengers The police commander immediately spins around and begins relaying Cap's orders almost verbatim.
* The Avengers: The portal opens, alien invaders pour into New York City and our heroes have to fight them off in the movie's climax. Technically against Loki as well but the aliens are the main threat.
* The Avengers, there's a brief epilogue in which a boy finds Ultron's dismantled head in a vacant lot, kicks it around like a football and then discards it and walks away, narrated by the original poem by Shelly.
* The Avengers. The sheer backlash from readers outraged about promoting the military-industrial complex to children caused it to be canceled before it was even released.
* The Avengers: The Supreme Intelligence of the Kree destroyed his own Empire with a Nega-Bomb, and the Avengers executed him for that. Still, a small group of Krees, called the "Lunar Legion" (because they set their base on the blue area of the moon) blame the Avengers for the destruction of their Empire and their beloved Supreme Intelligence, and try to kill them. Of course, the SI turns out to be less dead than they thought.
* The Avengers, the villain Absorbing Man absorbs the android Vision's ability to become intangible. He promptly falls through the pier he's standing on and into the water, due to a lack of control.
* The Avengers, the whole world is this to the eponymous team, but especially to Thor:
* The Avengers. This is a particularly egregious example, as the finished product reads like an Invaders story that just happens to guest star a few of the Avengers.
* The Avengers: This phrase blares over speakers as the Project P.E.G.A.S.U.S. faculty is being evacuated due to the Tesseract "misbehaving".
* The Avengers to be a Holocaust survivor — calls him out on this while refusing to kneel:
* The Avengers to give the heroes a clear victory instead of battling for seventeen more hours of cleanup.
* The Avengers to make him the new king of Wakanda so that he can attack the nation of Rudyarda without fear of reprisal.
* The Avengers: Tony's old Mark VI suit is too trashed to rely on anymore, so he demands that J.A.R.V.I.S. prepare his still-in-testing Mark VII. The new suit arrives just in time to save his life and works perfectly during the whole battle. Of course, the Mark VII being an incremental upgrade of by then well-proven technology means there was at least theoretically less that could go wrong.
* The Avengers/Tony Stark later remarks to Loki that Captain America is "a living legend who actually lives up to the legend".
* The Avengers. Tony verbally deconstructs this for Loki, telling him that you can't just "take over the world" because no one is just going to roll over and let that happen, no matter how many aliens you throw at them.
* The Avengers: United They Stand, and relegated the "big name" Avengers to special guest appearances.
* The Avengers: United They Stand battle armor for no apparent reason other than to shill toys.

* The Avengers: United They Stand has Falcon as the only minority member of the team.
* The Avengers: United They Stand's nephew is called Andrew rather than Jim or Jody.
* The Avengers: United They Stand. The concept failed and the show and toyline both tanked.
* The Avengers (U.S. Army veteran Steve Rogers) have been shown trading jabs about their respective services.
* The Avengers: Used humorously rather than for romance when Captain America hears the following from his biggest fanboy, Agent Coulson:
* The Avengers Vol. 1 #355 as part of a storyline about the Gatherers, a group of former Avengers from different universes. This version had a costume based on Jack Kirby's original design for the character, which previously had only appeared on a pin-up.
* The Avengers want to find out what S.H.I.E.L.D. is using the Tesseract for. Tony tries to hack into the Helicarrier's computer system, but Cap just breaks into the armory.
* The Avengers, was actually alive in a cocoon at the bottom of Jamaica Bay.
* The Avengers was rewritten to give him more focus, at the expense of Malekith and the Dark Elves.
* The Avengers was the smart thing to do when Hulk was backed up by the rest of the group.
* The Avengers were forced into a seven-member roster by the government. It's since become the average roster size.
* The Avengers, when Captain America throws his shield at Thor and Iron Man to get them to stop fighting and catch their attention, he does so from the top of a tree trunk.
* The Avengers, when Iron Man and Thor are about to fight each other over Loki's custody, Loki casually settles down on his rock like he's a member of the audience to watch the show.
* The Avengers, which featured guest appearances from Iron Man and Thor, two Avengers he had been prohibited from using in the actual Avengers title (Simonson later remarked that he had more latitude to use two Avengers in FF than he did in the actual Avengers comic book!).
* The Avengers, who ended up taking the part of Leonato after Head dropped out.
* The Avengers with Hulk leaving and Captain America joining as the first shakeup.
* The Avengers, with Quicksilver coming in dead last among the Avengers.
* The Avengers with quite literally every force on the planet capable of stopping him, effectively uniting them and steeling their resolve against him, and thus even if Loki "wins" it'll be one of these at best since he'll have nothing to show for it.
* The Avengers with visibly different hand and leg structure and faces that resemble a combination of human skulls and birds.
* The Avengers wore brown leather jackets with the Avengers' logo on the shoulders. This gave the team a uniformed look while maintaining their individual identities.
* The Avengers (Zen Studios) has Loki attacking the SHIELD Helicarrier.
* The Avenger uses a serum that can be injected or ingested to create this effect. A politician takes advantage of the fact that he has the antidote to create trouble that he can then smooth over, proving his diplomatic skills.
* The average Federation starship has a crew in excess of 200 people working in a three or four shift rotation; every other race crews similarly sized ships with between 15-40 people, apparently with each crew member being on duty around the clock, most of them don't even seem to have a medic aboard. The standard explanation is that the alien craft are stripped-down warships with much fewer amenities, and don't need the huge scientific and maintenance crew that a Federation ship would carry- just a pilot, a commander, an engineer, a gunner and some grunts. Even so, modern US Navy nuclear submarines, which aren't exactly known for wasting space, require a crew of 14 officers, 18 senior noncoms and 89 enlisted working on a three-shift rotation, and a starship would probably need at least that

many, if only to carry out basic maintenance and prevent everyone keeling over with exhaustion. A Klingon crew especially seems to consist of about four or five officers making up the bridge crew, a cook, and a handful of enlisted to perform repairs and occasionally kill things.
* The average Guardsman is tithed from the top 10% of his world's PDF. He is equipped with armour that'll hold well against most modern small-arms, and armed with a beam rifle that hits like a 7.62mm round (sans the recoil and casing drop) and can be recharged by virtually any power source (including body heat and open flames, though the former option is slow and the latter drastically reduces shelf-life). They are often trained on
* The Average Joe's have to win at least one game to qualify for the championships. However they suffer a humiliating defeat at the hands of some
* The aversion in "Ariel" is very much the exception that proves the rule. The plan was described in minute detail and worked (almost) exactly as planned, with all possible external threats perfectly anticipated. The suspense came from
* The Avett Brothers - "If It's the Beaches" (The song's basic message is "I would do anything to keep you". Sample lyrics: "Don't say it's over / 'Cause that's the worst news I could hear / I swear that I will / Do my best to be here just the way you like it / Even though it's hard to hide / Push my feelings all aside / I will rearrange my plans and change for you".)
* The Avian, Molluscoid, Fungoid, and Arthropoid ships fall under the "Lobster" category. Avian ships are sleek with pointed edges and spikes, Arthropoid ships are harsh, rough-looking brownish floating hives, Fungoid ships are sinister-looking, smooth black things with bright highlights, and Molluscoid ships get smooth, squid shapes and tentacle-like decorations, but all four are still pretty recognizable as spaceships.
* The Avians received spacefaring technology from a precursor race, and yet still have priest-castes and human... well, avian sacrifices to their god, with atheism being a crime. So, you have
* The Aviator and arguing with Hollywood censors when they try to make him take all the cleavage out of the movie.
* The Aviator is a tendency to repeat a sentence over and over, in an uncontrolled fashion. It's quite chilling to see Hughes sitting in a car with his hands clapped over his mouth, eyes squeezed shut as he fights with himself to stop.
* The Aviator is shot entirely in the color found in film of that era, most notably the part that takes place in the 1930s, which is entirely in red and blue.
* The Aviator, part of Howard Hughes' descent into madness includes bottling his urine while he locks himself in a room. The line of bottles gets longer and longer, showing just how long he's been in there.
* The Aviator somewhat averts this. It ends on a moment of total public triumph for Howard Hughes, but in the last scene Hughes suffers an obsessive-compulsive fit and is reduced to hiding away, helplessly staring into a darkened bathroom mirror and repeating "the way of the future."
* The Aviorans worship the builders of the Nexus near their homeworld, or "Sky Nest" as they call it, whom they refer to as "the Unhatched".
* The Avocado, created by commenters on that site looking to create their own venue for pop culture reviews and discussion. Was originally called "The AV Club After Dark", but the initials AVCAD over time morphed into the word AVOCADO.
* The Avocado), relying on donations to cover operating expenses. All content on the site is created by the site's users, just for the joy of creating something or to start a discussion in the community.
* The Avox Girl, who apparently had an entire adventure before she ever crossed paths with Katniss.
* The Awakened Fate Ultimatum and the rest of the devils away, then leaves the Amy Magic Refinery for the angels to do as they please, promising to engage Shin again when they actually have a chance to fight properly.
* The Awakened Fate Ultimatum, killing everyone around him, destroying Celestia and then the devils that come to investigate the carnage. You are then dumped to the game's title screen.

* The Awakened protagonist, starts off talking to his therapist about how his various issues may have started in kindergarten when a classmate refused to let him play with a toy dinosaur.
* The Awakening", a sentient alien WMD that is both the cause of and empowered by Hate Plagues is awakened in a British village.
* The Awakening": A small village's celebrations of an historic anniversary incorporate ritual prompted by the evil being sleeping beneath the village church. The Doctor's companion, Tegan, is offered the Guest of Honor's place—on top of a pile of kindling, tied to a stake.
* "The Awakening". A stone carving in a church starts blinking and later belching smoke due to the alien imprisoned behind it.
* The Awakening by Kate Chopin, are apparently sold with things like teargas canisters attached to the back cover.
* The Awakening by Kelley Armstrong, Chloe's blonde-with-red-streaks hair is recognized by a bystander, and so she is forced to dye it black. Since she's a sheltered fifteen-year-old and the new color looks atrocious, this is very upsetting to her.
* The Awakening in an unmarked tomb, and erased almost all traces of her existence. The evil princess takes possession of an archaeologist's daughter once he opens the hidden tomb.
* The Awakening of a Magus, a few Slytherin students leave for their dorms. After Draco and Snape follow and catch them putting on Death Eater apparel, Snape remarks anyone with a bit of brain wouldn't have played their hand so soon, but instead waited for an opportunity to backstab in the middle of a fight.
* The Awakening of a Magus, after she sees Remus in human form during the full moon (Harry worked out a procedure to change the werewolf curse into wolf Animagus ability).
* The Awakening of a Magus, after Voldemort reads a servant's mind to see the amount of power channeled during the Hogwarts Ritua, he grows so angry he executes the guy after several minutes of torture.
* The Awakening of a Magus. An ancient tome with five original copies, with Draco's grandfather giving him the presumably only surviving copy. Among other things, it has hidden text visible only to descendants of the demon Klaatu, and absent in all secondary copies.
* The Awakening of a Magus at the age of sixteen, and still survives now, as the controlling mind and progenitor of the Dementors.
* The Awakening of a Magus, but Snape teaches Harry an incantation to make any spell a simple white (Death Eaters need it as part of their disguise). In addition, Harry's Animagus forms have some purple in them.
* The Awakening of a Magus. Enough to provide a significant portion of the comic scenes in the fic.
* The Awakening of a Magus for the Dementors and their leader... not only can it destroy them, but it deprives the collective of all the souls the destroyed Dementor had ever consumed.
* The Awakening of a Magus has Tonks mention she sometimes used her true appearance (extremely beautiful, but one everyone assumed was an artificial one) for a boyfriend who wanted a perfect lover, but ultimately found it degrading to be used like that.
* The Awakening of a Magus in her (though they are yet to act upon it).
* The Awakening of a Magus irregular circumstances, to the point where any criminal investigation would be focused on the people who locked him up in the first place. In other fics, he's officially declared guilty of the relatively smaller crimes but, since the time he previously spent in Azkaban is more than the combined sentence one can get for them, he officially already served it. And in an even smaller group, he's asked to perform community service for a time until the government feels he's paid his debt to society.
* The Awakening of a Magus is to try passing his physical changes from the Awakening as a growth spurt. So far, it is unclear whether the secret will even hold until it becomes relevant. Also, it turns out that the more powerful wizards

undergo a less severe case of this; in fact, Voldemort, when shown a memory of the "New Harry" believes this is the case.
* The Awakening of a Magus, Lucius Malfoy's legal advisors are literally named Dewey, Cheetum, and Howe.
* The Awakening of a Magus, Snape draws his share of female gazes once he manages to get the grease out of his hair.
* The Awakening of a Magus) that when Darius the Magus died, the only living member of his Circle went mad and massacred the wizards he held responsible.
* The Awakening of a Magus, Tonks, disguised as Harry, is asked to do some healing, which Harry is talented in but she isn't so much. In reality, the real Harry is the one providing the healing from across the room.
* The Awakening of a Magus, Voldemort is slowly siphoning away his followers' power to increase his own. In case of a Death Eater who had failed him (or was captured and can't be rescued soon enough to avoid questioning), he drains all of it with extremely painful and naturally lethal results.
* The Awakening of a Magus, Voldemort is very displeased with Lucius after learning that Snape is not only alive after his remote execution attemp, but also teaches his son, Draco. Lucius' only justification is he didn't think to ask. In reality, Draco was fully aware from the start Voldemort believed Snape to be dead, and simply chose to keep silent.
* The Awakening to the protagonist Edna. Adele is extremely sweet, feminine, and fragile. However, Adele Ratignolle's open-minded Creole ways help Edna to unleash her inner self and the artist in her.
* "The Awakening", villainous local squire Sir George Hutchinson has it pointed out to him that he is detaining people illegally. His response? "As the local magistrate, I will find myself quite innocent."
* The Awakening Water, in which the water supply is spiked with an unspecified drug to keep people (or at least workers) docile and stupid.
* The award for all-time nastiness in a locked-room mystery has to go to
* The award for most uncool car of the series goes to Itsuki's AE85. Itsuki attempts to buy the Corolla Levin variant of Takumi's AE86 and gets ripped off with an authentic POS.
* The award-winning Rise of the Rune Lords adventure path series published by Paizo (and later updated to their own
* The Awesome Adventures of Captain Spirit (which was released as a free playable teaser for the longer game) resolving in that episode.
* the Awesome Foursome after less than two days of mostly just wandering around as tourists.
* The Awesomes, and is described by the other characters as being "batshit crazy." He is a good guy nonetheless.
* The Awesomes ends each episode with a plug for Jack Link's Beef Jerky.
* The Awesomes has, in its second season, a gorilla in a suit. Actually, rather a lot of them; one of them is marrying Muscleman's sister, and the "groom's side" is full of gorillas in suits and dresses. At least one of these (the groom's uncle) is firmly convinced that humans are the inferior species, and he's not shy about telling everyone his opinion either.
* The Awesomes: In an Indiana-Jones-themed episode, the group encounters a huge maze separating them from their objective. Prock starts to strategize the best way to tackle the maze. He barely notices when Frantic runs through it as super-speed, Muscleman bashes straight through the walls, and Hotwire and Impresario fly everyone else over.
* The Awesome Slapstick, another Marvel hero resurrected in the aftermath of the Civil War, got his start trying to save his classmates from Evil Clowns from Dimension X who were using a circus to kidnap people and turn them mediocre. No, really. Everything got righteously smashed up.
* The Awesome Slapstick friend Mike then points out that his Slapstick form lacks the requisite equipment…
* The Awesome Slapstick got his start trying to save his friends from Evil Clowns From Dimension X. No, really.

* The Awesome Slapstick: Slapstick's primary weapon is his oversized cartoon mallet.
* The Awesome Slapstick the title hero is shot in the face by The Overkiller. As Slapstick is essentially a living cartoon character, he suffers no ill effect except for a blackened face and an annoyed attitude.
* The Awesome Slapstick. When the Neutron Bum is rampaging through Manhattan, Steve Harmon flatly refuses to get involved (he was waiting in line for a concert). He leaps into action only after the Bum attacks the Tower Records building.
* The Awesome Store are magic items that look like mundane appliances:
* The Awesome Store is a red van managed by a Living Shadow that sells a plethora of items, most of which are some variety of
* The Awesomes, which results in him being a liability to other heroes most of the time.
* The Awful Green Things From Outer Space might injure them, cause them to grow, or do nothing at all, completely at random. However, any specific item continues to have consistent results once it's been used.
* The Awful Green Things From Outer Space: One of the weapons available to the crew of the spaceship Znutar as they battle the titular awful green things.
* The Awful Green Things From Outer Space that does this to the Things; canisters of Rocket Fuel are especially nice, as they are area-effect weapons and can be tossed through hatches.
* The Awful Green Things From Outer Space: They are indeed awful, green, and from outer space.
* The Awful Green Things From Outer Space: Two players depict the eponymous Things' attempt to devour the crew of the starship Znutar.
* The Awful Green Things From Outer Space until the crew work out what weapons will kill the things and which will make them grow larger.
* The Awful Truth About The Powerpuff Girls ends with everyone laughing at an unintentional joke that Blossom made.
* The Awful Truth About The Powerpuff Girls reveals that Professor Utonium and Ms Keane are not only evil, but they're secretly siblings. The Professor created the girls for revenge, not good. This is later subverted as it turns out the entire story is a film the characters are doing.
* The Awkward Adventures of Meghan Whimblesby and somehow woke in Middle-earth.
* The Awkward Adventures of Meghan Whimblesby include her not telling that she is from another world. So Meghan pretends to be from "Ravendill", her wrong name for Rivendell.
* The Awkward Adventures of Meghan Whimblesby, Meghan takes a quick bath. She is out, dressed, and walking away from the stream, when Legolas arrives. Meghan mentions her bath, Legolas apologizes, but Meghan laughs. "You didn't get a free show or anything, so we're good."
* The Awkward Adventures of Meghan Whimblesby, she suddenly has long wavy hair down to below her waist. Unlike most such characters, Meghan has trouble with her hair. It gets in her face and in her mouth, and is hard to clean and detangle. In chapter 23 "Arrivals", Meghan cuts her hair to about shoulder length.
* The Awkward Adventures of Meghan Whimblesby, when she sees the movie characters, she tries to wake from her dream. In chapter 1, Meghan pinches herself. In chapter 2, she tries to escape danger by shouting, "WAKE UP!" Then she bleeds. Because of her blood, Meghan concludes, "I'm not dreaming."
* The Axe, a jobless paper mill engineer finds a new opportunity in another paper mill and sets out to kill other appliants so he'll be the only one left to get the much coveted job.
* The Axe, an electric guitar which serves as an axe/hammer with the highest Axe and Hammer power in the game. There is a 2% (0.5% in some versions) chance of Plantera (a boss who's hard to farm due to its random location nature) dropping it. It is only moderately faster than other tools of its type and has +1 to range, neither of which matters when hammers and axes simply don't see as much use as the pickaxe.
* The axe, a normal woodsman's or fire axe, is one of the most coveted items in

* The Axe. As the protagonist states, it doesn't keep going as easy as the first time, and he is struggling more with each murder.
* The "Axe" ending, quite likely. Clover killed Seven, Santa, June and Junpei, and Ace likely killed Lotus to get into door 9. Clover would have killed Ace: she was covered in blood, he had Lotus' bracelet.
* The Axe hurts his shoulder when trying to shoot a handgun one-handed. Repeatedly.
* The Axeman Cometh, a singer is killed by an electrified mic stand while on stage. The crowd initially thinks it's part of the act.
* The Axeman of New Orleans. An unnamed serial killer, active from 1918 to 1919. He/she broke into the residences of his/her victims at night, took hold of various blades in the household (mostly razors or axes), and proceeded to attack the sleeping victims in their beds. Six victims were either killed instantly or died later as a result of their wounds, six were injured but managed to survive. The surviving victims were uncertain what happened to them and could provide no definite description. A letter attributed to the killer claimed: "They have never caught me and they never will." Which remains true.
* The Axe Murders Of Villisca, everyone possessed by the ancient evil in the house has their eyes turn black.
* The axes of the Germans were well known to the Romans—they would throw them at the enemy like javelins with the intent of splitting some shields, then charge in with melee weapons. The Francisca got its name from its popularity among the Franks in particular; an alternate theory is the other way around, that the tribe got its name from the weapon.
* The Axiom that looks like a normal piece of the woods except that the sun never sets.
* The Axis of Awesome has a song called "How To Numbers 1-3", which tells you how to bake a scone, how to catch a duck, and how to kill a hooker.
* The Axis of Awesome: Lead singer Jordan Raskopoulos is a trans woman.
* The Axis of Awesome's "Four Chords" is all about how you can write a pop song using only four chords. Their
* The aye-aye lemur is in a way a Madagascan equivalent of a woodpecker, as it bores through bark with its sharp incisors to feed on grubs and insects that tunnel in the wood.
* The Azir have bureaucracy steeped into their bones so much that when
* The Azlanti had several descendants who diverged even further from their original forms, for a number of reasons:
* The Aztec god Tlacolotl was a patron of evildoers, sorcerers and darkness. He is similar to Tezcatlipoca, though — unlike the Smoking Mirror, who is the dark half of the Light and cultivates evil so it can be exposed and dealt with — Tlacolotl cultivates
* The Aztec had Xolotl, who was also associated with death and dogs, was
* "The Aztecs", and any of the common Classic episodes where the companion stays in the time period because they met someone.
* "The Aztecs". Barbara is mistaken for a high priestess, yet refuses to sacrifice a man in the hope it will reform the Aztecs and the Conquistadores won't feel justified in destroying them. However, the man believes it's the will of the gods and commits suicide instead.
* "The Aztecs", Barbara is mistaken for the Aztec deity Yetaxa and tries to use her position to change the Aztec Empire.
* The Aztecs believed that Quetzalcoatl, the god of life, fertility, and war, would return and transform the nation.
* The Aztecs did this on a daily basis with their captives. They thrust a dagger under the ribs of the victim, yanked their heart out, and held it up as an offering of blood to their gods.
* The Aztecs may have been bloodthirsty conquerors, but nobody ever called them cowards. Even with their empire mostly revolted against them, racked with diseases they couldn't fight, and up against vastly superior technology, they fought like maniacs to defend their capital of Tenochtitlan. Hugh Thomas said: "For a time, (Cortes) and his friends seem to have been looked upon by some Mexica at least as

being reincarnations of deities. But in the end, to be honest, it had been the Mexica who fought like gods."
* "The Aztecs", naturally. Barbara, posing as the god Yetaxa, attempts to halt the Aztecs' human sacrifice, but it doesn't take.
* "The Aztecs": The Doctor accidentally gets engaged to Cameca by making her an offer that in her culture is a euphemistic marriage proposal. He apparently feels so badly about disappointing and leaving her that his libido goes AWOL for the next five or six centuries.
* The Aztecs took this one step further by encouraging their colonies to revolt so that they would have a reason to come in and make war on them again because the gods favored sacrifices captured in battle. The result was that many of these colonies allied themselves with the Conquistadores.
* The Aztecs used obsidian blades embedded in a wooden club to make a deadly weapon known as the
* "The Aztecs" was having time off. (She does not, however, miss any episodes; she just appears in a few via pre-recorded inserts, allowing Ford to have a break from the studio recordings.)
* The Aztec views of what was good and what was evil were rather alien to the sensibilities to the Spanish conquistadors. Even when offering non-human sacrifices, such as food or goods, the Aztecs would draw their own blood in offering along with the sacrifice. As for human sacrifices, being a sacrifice was considered a high honor, despite the (to the European perspective) incredibly dishonorable things done to their body after their death (which normally involved public display followed by dismemberment and cannibalism). Indeed, being sacrificed was the only surefire way to get inducted into the "best" Aztec heaven. Your afterlife was based not on how you lived, but how you died, and none of those afterlives could be considered truly hellish. And, in spite of the war and sacrifices, a lot of Aztec society was pretty progressive. They treated their slaves well, and they're one of the first societies that had compulsory education for EVERYONE, not just the upper class. All that being said, the Aztecs were an anomaly even among Mesoamericans. Most of their neighbors were also horrified. One of the reasons the Spanish conquest succeeded was that practically all the Aztec's neighbors turned on them when they saw a chance to overthrow them — the endless drive for human sacrifice playing a large part.
* The Aztlan sourcebook mentions that Aztlan still makes a profit from cocaine and other coca-plant derivatives, to which many runners express surprise for the above reason. Justified by its target market;
* The Azula/Zuko shipper fandom was always significant, but the creators surely aren't making it too difficult with certain scenes. They have even (jokingly?) shipped Zuko's alter ego with Azula at a convention. On the flip side, Azula acts that way toward
* The Azure Sky Tower. Beating it the first time was worth it, as it was only 12 floors to go up and would net you one of several rather handy gun parts (which one you got was random). Doing the trade mini-quest (which required
* The B-1 battle droids are skeletal, designed to be easily packed up and stored. According to
* The B-24 Liberator heavy bomber was virtually impossible to bail out. It had only one door, at the tail, and the catwalk was too narrow to even walk through while wearing a parachute, much less run while the plane is going down. It also had a tendency to break up on hitting water due to the design of the wing.
* The B-29 Super Fortress during WWII. It was the first mass produced pressurized aircraft, allowing it to fly thousands of feet above enemy aircraft. Even when it was forced to come in the range on non-pressurized aircraft (which it initially had to in order to bomb accurately), its thick armor allowed it to shrug off bullets. Lastly it had four remote controlled turrets that allowed their operators greatly improved aiming. It was so ridiculously hard to shoot down that bomber formations' "fighter escort" usually left the bombers to hunt ground targets of their own. As the name implies, the Superfortress succeeded the B-17 Flying Fortress, which had a similar record. Despite flying in daylight bombing raids, whereas the British flew

their bombers by night, the USAAF actually lost less bomber crews than the British, flying in the woefully under-protected Lancaster.
* The B2 session has Caliborn, one of two individuals who regularly contact the post-Scratch kids. He wants to get into the game seemingly just so he could satisfy his bloodlust, and he turns it into a competition between himself and Calliope to the point where he relishes the idea of outright killing her.
* The B-2 Spirit is interesting in that it can be flown by one pilot, but has two in case of extremely long flights, to allow one pilot to
* The B-2 Spirit is one of the most advanced stealth bombers in the world. Yet the radar-absorbent coating can be easily damaged by weather effects like rain, which is why they're housed in climate-controlled hangers.
* The B-52s' 1979 breakthrough single "Rock Lobster" is neat one to 1960s beach party surf rock.
* The B-52s apart from (the EP) Mesopotamia and (the reunion album) Funplex includes a song about animals - Rock Lobster, Quiche Lorraine, Big Bird, Juicy Jungle, Junebug and The World's Green Laughter. This is because all of its members are animal lovers.
* The B-52s contains the backwards message "I buried my parakeet in the backyard. Oh no, you're playing the record backwards! Watch out, you might ruin your needle."
* The B-52s did "Revolution Earth". You know, that slow, vaguely Celtic-sounding, completely sober hope-for-the-future song with a single, female vocalist throughout?
* The B-52s dropped "Song For A Future Generation" from their live shows after guitarist Ricky Wilson died, the reason being that he has a spoken part in the song. They have noted this fact in interviews, feeling that if he wasn't there to perform on the song, it wasn't right to perform it and that it was better for the song to remain special to his era. It remains one of the few hit singles that isn't a mainstay of the band's setlists.
* The B-52s grew up in a time when the word 'album' was used as a short-hand for long-playing vinyl and not the collection of tracks itself. As a result, he will often refer to one of the group's early albums and correct himself to say 'oh, it's a CD now'.
* The B-52s have pretty much always played "Love Shack" as the last track of their main set, which generally cleared out the radio fans, then when it came to their encore, played an older fan favorite and concluded with their first hit "Rock Lobster".
* The B-52s is widely considered by fans to be the one that best captures The B-52's spirit, as it contains their hardest rocking and lyrically weirdest material. It also opens with the best opening track they ever did "Party Out Of Bounds".
* The B-52s scene. Nowadays, Mosrite guitars are rare and expensive because of the musicians who played them.
* The B-52s' "Song For A Future Generation" video, an animated bird lands on Kate's finger at around the 2:11 mark.
* The B-52s sound, but "Love Shack", one of their five Top 40 hits, is lighter and more poppy.
* The B-52s's video for "That's Good" where a french fry penetrates a donut's hole.
* The B-52s, three) are always considered the group, and the rest of the backing band (bassist, drummer, and keyboardist) are rarely mentioned, except live when it's necessary to introduce them. This backing band doesn't have an input into the songwriting process by all accounts.
* The B-52 Stratofortress is a massive plane that needs eight jets to fly and can't break the sound barrier... but what it's meant to do—bomb the crap out of things—it does even better than the B-1B Lancers and B-2A Spirits supposed to replace it. In fact, the B-52 does this job so well that it's expected to keep flying until at least 2050,
* The B-52 Stratofortress = Tube with wings (made in the 50s). The B-1 Lancer = Slender tube with swing wings (made in the 70s). B-2 Spirit = Flying Wing (made in the 80s). The B-1 and B-2 were supposed to replace the B-52, but the B-52 is planned to be used until 2045. (This has more to due with role. Simply put, the B-

52 can haul more bombs than the other two. Sometimes stealth is needed, sometimes speed, sometimes you just need to flatten a couple of city blocks.)
* The B-52 Stratofortress was introduced as one of the first bombers made by the United States following
* The B-52 would similarly be used later on to launch D-21 recon drones which would fly out on a preprogrammed path, take pictures, and fly back to a rendezvous location where another plane trailing a net (usually a modified transport) would catch the drone in midair and reel it in.
* The Baader Meinhof Complex is about the Red Army Faction, a real-life far-left terrorist group that was active in Germany in the 1970s.
* The Baader Meinhof Complex, Muslim terrorists sharing the training camp with the RAF are not pleased about them sunbathing in the nude and both sexes having the same quarters.
* The Baatezu are the devilish tyrants of the Nine Hells and some of the most fearsome and sadistic creatures in existence. But in one corner of the layer of Malbolge, a strangely-glowing cavern called Maggoth Thyg sometimes emits horrible cries that Hell's damned souls cannot hear, but the devils can, and they find the sound instinctively terrifying. It's suspected this is related to the ancient Baatorians, the race of fiendish
* The Babadook, Amelia attempts to show the social workers the hole where the cockroaches were getting in, only to find a flat, undamaged section of wall. This makes her look even crazier.
* The Babadook Amelia, he (understandably) wets himself. This gives Amelia something else to berate him about.
* The Babadook and then a simple message of "Thank you for watching Chiller. Good night!"
* The Babadook. A significant event that sends her over the edge is her son hurting his cousin at her birthday. The film also ends during his birthday.
* The Babadook: During one of her episodes, Amelia bites her own finger down to the bone.
* The Babadook having its last scream on the network before shutting down.
* The Babadook — the best Amelia can do is accept that the damned thing is going to haunt her basement from now on and if she ever slips up, all of the horror she had to endure is going to start all over again.
* The Babadook. Partial example, as Sam never realises just what his mother was doing.
* The Babadook: The Babadook seeks to corrupt Amelia into murdering her son and killing herself.
* The Babadook, to the point where it's one of the thing's most distinguishing features. The film's page image says it all.
* The Babadook version of herself in the background of the report, holding a butcher's knife.
* The Babe Ruth song "Gimme Some Leg" is a sarcastic deconstruction of this trope; singer Jenna Haan is explaining that however good the lead singer is, however powerful her voice, there'll always be some asshole in the audience demanding she shows a bit more flesh.
* The Babe Ruth Story spoil the whole bunch, and this painted a big red target on the back of Allied Artists Video when new owner Lorimar decided to put unprofitable assets on the chopping block in 1980.
* the Babri Masjid, a four hundred and sixty-five hundred-year-old structure and an example of early Mughal architecture.
* The Baby Formula took this to its logical extreme. The entire reason the movie exists is that two actress friends of the director became pregnant at the same time and the director commissioned the script to take advantage of this.
* The Baby Huey Show aliens abduct Baby Huey to perform experiments on him, at one point they take an X-ray of his head, in place of his brain is a spider and cobwebs.
* "The baby" is a never-seen radioactive monster kept locked in the cellar.
* The Babylon 5 card game has a military conflict called "show the colours", which

is basically a free-for-all for all the players to show off how big and impressive their respective fleets are — the winner gains 2 influence, while the losers lose absolutely nothing. Unlike most military conflicts, no actual hostile actions are taken against other factions and nobody can attack other participants unless they already are at war.
* The Babylonian Code of Hammurabi, c. 1780 BCE, mandates flogging for some crimes.
* The Babylonian Ishtar (also known as Astarte) was a goddess of love
* The Babylon Project, allowing you to play a campaign where you're warring against them, or play a campaign where you're one of them.
* The Babylon Project, etc.). However, in keeping with their TV show counterparts' behavior, Starfuries also have a "glide" mode that lets them rotate while continuing on their original vector.
* The Babylon Project: In one level of The Earth-Brakiri War, just after getting to an abandoned Space Station, you discover an asteroid on a collision course with the station (in a region of space devoid of asteroids and full of mines), and have to go destroy it.
* The Babylon Project: In one level of the Earth-Brakiri war, you escape a Brakiri prison, commandeer a Brakiri fighter and try to make it to the nearest jump gate, dodging fire from Brakiri cruisers and fighters.
* The Babylon Project, the Raiders begin doing mercenary contract work for an unknown employer. At one point they're told to stand down from massacring civilians, and they reply they would miss out on a big payout if they did.
* The Baby Of Macon but blurs the line between the play and reality so much that you sometimes can't tell where the play ends and reality begins, with rather horrifying results.
* The Baby Of Macon heavily blurs the line between what is fictional and what is "real" within the film. The plot of the film is sometimes a morality play performed before an audience, but sometimes it seems real. Sometimes members of the audience are just spectators, and sometimes they walk onstage and influence the plot. We're frequently shown the actors backstage, and sometimes the actors conspire to make what happens on stage real. When the performers all make a curtain call, the lead actors, whose characters have died, remain dead. The living actors bow to the theatrical audience, and then the audience stands up and they all bow to the camera.
* The Baby Pizza sequence from "The Job". Gumball and Darwin are delivering pizzas, and one house has a pair of
* The Babys, also had only two successful songs: "Isn't It Time" and "Every Time I Think of You," both of which hit No. 13 on the Hot 100.
* The Babysitter before his showdown with Bee and tells him they should makeout "next time".
* The Babysitter: Cole makes it out alive and kills off all of the cult, but the last shot of the film is Bee rising up and killing a fireman investigating the scene.
* The Babysitter: Cole starts off as a nerdy kid who wears glasses and gets bullied at school. But after spending the night defending himself and his 12-year old neighbor (Melanie) from his babysitter, who leads a Satanic cult, Cole ditches his glasses for a T-shirt and jeans. It becomes his new "look" by the film's conclusion, to reflect his newfound confidence in himself. Plus, he now has a girlfriend: Melanie.
* The Babysitter: Each of the cultists die in spectacularly gruesome fashion, with the worst ones happening to John, Allison, and Max.
* The babysitter herself qualifies for this trope. She starts out just seeming to be a typical teenage ditz. She not only gets though the short alive, but able to counter most of the effects of Jack-Jack's powers (albeit with some minor property damage).
* The babysitter isn't always an animal — the earliest variation on this theme is one of the old Fleischer
* The Babysitter: Killer Queen is even funnier but also gorier than the first one.

* The Baby-Sitters Club (1990) revolves around the 12 and 13 year old protagonists having crushes on boys.
* The Baby-Sitters Club (2020) after circumstances require her to stand up for one of her sitting charges.
* The Baby-Sitters Club (2020): After Stacey informs Mrs. Newton that her son's sitter from the Baby-Sitters Agency let him play in the streets by himself, the agency retaliates by spreading a video of Stacey having a diabetic seizure to her clients. She mentions that this also happened at her old school and drove her away from all her other friends who also shared it.
* The Baby-Sitters Club (2020): Dawn's father only dates and marries women in the book series, while he's gay in the adaptation and has a male partner after his divorce. Apparently he and his ex-wife Sharon knew for a while but were too co-dependent on each other to do anything about it at first.
* The Baby-Sitters Club (2020)), the Netflix adaptation is set in 2020 and so includes a lot of modern updates, such as the girls owning mobile phones and the frequent use of the internet.
* The Baby-Sitters Club (2020): When Stacey finally confesses that she has diabetes and was worried that the club would make fun of her, everyone tries to comfort her and Kristy wittingly ponders if she's overreacting because her blood sugar levels are dropping. Claudia scolds her with, "Too soon."
* The Baby-Sitters Club. Also, one book featured the girls facing off against a rival babysitting club.
* The Babysitters Club and takes college classes while in high school.
* The Baby-Sitters Club: Anyone who grew up reading this series will remember the obligatory description of Claudia's outfits as the highlight of the otherwise virtually copy-and-pasted introductory passage in each book. She was also the artsy one, and her dress sense obeyed no laws of fashion except her own, but we're assured that "on her, it totally worked" every time. Her best friend Stacey was from New York, which was treated like it was proof of fashion consciousness in itself.
* The Babysitters Club, at varying intervals, the other girls have found themselves using Claudia's catchphrase "Oh my lord."
* The Babysitters Club book "Claudia and the Perfect Boy", one of the boys that Claudia fizzles out on a date with ends up happily dating a girl nicknamed "Motor Mouth Montey" (turns out that he dislikes making small talk so much that a girl who can communicate at the speed of light is his ideal).
* The Baby-Sitters Club book "Mallory Hates Boys (and Gym)", when Mal's name is called to be on one of the volleyball teams and she starts jogging over to her teammates she suddenly becomes very conscious of her arms.
* The Baby-Sitters Club book "Mary Anne's Bad-Luck Mystery", the club starts having bad luck after Mary Anne throws out a chain letter.
* The Babysitters Club books, Dawn lives in a colonial-era farmhouse and discovers a secret passage leading from her own bedroom to the old barn.
* The Baby-Sitters Club books have had 2 different TV series, 4 CD-ROM computer games, graphic novel adaptations, as well as a movie.
* The Baby-Sitters Club books revealed that even Mrs. Porter's granddaughter could not be sure whether it was true). Kristy eventually reasoned that Mrs. Porter could not be a real witch because when the Brewers' cat left a dead mouse on her doorstep she brought it over to demand that they dispose of it, rather than keeping to use in her potions.
* The Baby-Sitters Club books, the characters started the series at the end of seventh grade and moved to eighth, but stayed there for the rest of the series, leading some to suspect the author originally intended to age the characters but didn't once the series proved to be so popular. Similarly, the books originally covered a month each while being published once a month, but later moved to covering only a week each. The series began in the 1980s and ended in the 2000s.
* The Baby-Sitters Club books, the members of the eponymous club each coach a regular babysitting charge to appear in a children's beauty contest. The rivalry between the girls is so intense that they can no longer babysit together, but all

lose to a heavily made up child beauty queen with several other titles to her name.
* The Baby-Sitters Club books, this line was finally used to end the Kristy/Bart romance when it becomes clear to Kristy that Bart wants much more from the relationship than she does.
* The Baby-Sitters Club books where the sitters go to camp, Stacey finds "a comfortable patch of leaves" to sit in during the campfire on the first night. She spends most of the rest of the trip in the infirmary.
* The Baby-Sitters Club book, the Pike children are convinced that their new next-door neighbors are spies because they have foreign accents and proceed to spend much of the book basically harassing the couple—ringing their doorbell and running away, recording their voices, etc.
* The Baby-Sitters Club, Claudia is so bad at spelling, she misspells her own name at one point.
* The Baby-Sitters Club Dawn babysits for a very scatterbrained divorcee who constantly mixes up which dates her ex-husband is supposed to have their children. One day when Dawn is watching the three kids, the only boy, Buddy, suddenly goes missing. It turns out he's been picked up by his father, who is supposed to have visitation that day, and taken to an amusement park. When asked why he's not enjoying himself, Buddy explains that he's worried that Dawn doesn't know where he is - at which point the father realizes that his ex-wife isn't even home and that, from the babysitter's point of view, he's just kidnapped his own son.
* The Baby-Sitters Club didn't get an initiation ceremony. (Answer: Kristy is massively jealous of her friendship with Mary Anne.)
* The Baby-Sitters Club ends up getting demoted from eighth to seventh grade.
* The Baby-Sitters Club get into a huge fight, Mary Anne writes her friends "apology" notes. While she manages one sincere apology to Claudia, the other notes fall under this trope:
* The Babysitters Club has a small but active fanbase amongst adults, mainly those who read them as kids in the 1980s through 2000s. Attempts to revitalize the series for newer generations haven't gone very well.
* The Baby-Sitters Club has the management skills to create the club and be its president. Her sport is softball and she even starts a kids' team. It's also mentioned that she consistently earns straight As.
* 'The Babysitters Club: In a Valentine's Day-themed book, the girls discuss how cute the crushes that a couple of kids they regularly sit for have on each other are.
* The Baby-Sitters Club, it is suggested that one say something along the lines of "What a nice picture! Can you tell me about it?" when confronted with a child's drawing, because "you don't want to say 'what a lovely elephant!' and have it turn out to be a picture of their grandmother."
* The Babysitters Club, Karen becomes a local sensation after winning several spelling bees in a row. She lets it go to her head, fancying herself a big star, and makes a big deal of how she'll appear on TV for the final round. This pisses off her friends and turns them against her, and naturally she loses the final bee and is humiliated. The book ends with her planning to apologize to her friends for her behavior.
* The Baby-Sitters Club. Kristy finally decides they should remain "just friends" when it becomes clear that Bart expects more from the relationship than she wants.
* The Baby-Sitters Club: Kristy runs for class president and a radio station called BIG JOKE sponsors the printing of T-shirts reading KRISTY IS A WINNER, with the station's name printed on the back of each shirt to acknowledge them as a sponsor. The T-shirt company leaves out the word WINNER and prints T-shirts with KAREN IS A... on the front and ...BIG JOKE on the back.
* The Baby-Sitters Club loves sports, and even coaches a softball team for small children. She called it Kristy's Krushers, which includes many of the club's sitting charges.
* The Baby-Sitters Club Mallory and Jessi are mature enough to babysit and be trusted to wander around Stoneybrook alone among other things. Most ten year olds are not. It becomes a major plot point a couple of times.

* The Baby-Sitters Club, Mary Anne learns that her father used to date her new friend Dawn's mother Sharon while they were in high school, but Sharon's parents didn't approve so they ended up breaking it off. They initially drifted apart and married other people, but ultimately reconnected through their daughters' friendship (by which point he was a widower and she was divorced) and ended up getting back together and later marrying.
* The Baby-Sitters Club movie, the parent of one of Stacey's baby-sitting charges warns her in advance that her "little cousin" from abroad will be home when she comes by to baby-sit. She brings with her a little American flag to give him, expecting a young child. Instead, he's an extremely attractive 18 year old.
* The Babysitters Club or made out to be adorable like so many other examples, this is flat-out creepy and scary behavior that still results in the guy getting the girl.
* The Baby-Sitters Club, or snails. Which she then forces herself to eat to keep up the pretense.
* The Baby-Sitters Club proved ultimately responsible for the disappearance of a valuable ring that Stacey was accused of stealing.
* The Baby-Sitters Club series has Stacey constantly reminding the readers how awesome New York is. The other book narrators make a big deal out of Stacey being from the city as well.
* The Baby-Sitters Club series involves Claudia dealing with the loss of her beloved grandmother. At the funeral, she finds herself unable to cry; unaware that it's a fairly common reaction to loss, she worries something is wrong with her. When her emotions do catch up with her, they manifest in bizarre and unpredictable ways; it isn't until she breaks down completely that she's able to begin to heal.
* The Baby-Sitters Club series, whose only purpose is as love interests for Kristy and Stacey respectively. By contrast, Mary Anne's boyfriend Logan was a much more rounded character and was part of the club himself.
* The Baby-Sitters Club, since you can't very well have your Mary Lennox surrogate not shake things up.
* The Baby-Sitters Club snark community to say that the BSC is a cult and use drinking purple Kool-Aid to control their members.
* The Baby-Sitters Club, Stacey is not fond of being called Anastasia. Additionally, King, one of Logan's football teammates does NOT like it when people call him by his given name, Clarence.
* The Babysitters Club, Stacey's flashback chapter has her wetting the bed at a sleepover while sharing with her former best friend Laine. Her parents pack her off to a fancy shrink thinking something's wrong with her head, but it turns out to be a sign that she has diabetes. (Earlier in the chapter she'd been drinking a lot more than was normal.)
* The Baby Sitters Club: the 1990 edutainment program, aimed towards pre-teen girls, finds the young girls (led by Kristin Amanda "Kristy" Thomas, the girls' lead babysitter) on a wide array of misadventures while teaching life lessons to kids. First shown on HBO in the 90s.
* The Baby-Sitters Club, the characters dress in clothes that weren't unreasonable for 12 year olds in the 1990s, yet are more appealing to 2000s children.
* The Baby-Sitters Club. The Pink Clinker actually works well — Nannie just likes to call it that.
* The Baby-Sitters Club, there is Boontsie (Stacey), Sunshine (Dawn) and Shannie (Shannon).
* The Babysitters Club: This is enforced with Mary Anne, whose strict father won't let her take down her pigtails even at age twelve. Her being allowed to wear her hair loose is a major point of character development, as is the short haircut she gets later in the series.
* The Babysitters Club through a ridiculous series of training exercises in order to make her prove herself worthy of joining, she calls them out on their crap and starts her own club with her new best friend Jessi. It doesn't last, since the sitters eventually figure out that they were in fact acting like bitches and invite both girls to join the club.

* The Baby-Sitters Club to be in order to support Maureen's shopping habits.
* The Baby-Sitters Club tracks her down to her home and makes herself the author's assistant...and then later gets angry at her because not all the events in her FICTION series actually happened to her in real life, and thought her a bad writer and a liar for it.
* The Baby-Sitters Club ways. Claudia feels bad when she compares herself to her genius sister.
* The Babysitters Club when Mal explains that the only time her sister had seen black people in their predominantly white neighborhood was when a cleaning service sent two black ladies to the house.
* The Baby-Sitters Club, when Mary Anne tries to sneak over to the boys' side and Logan starts a food fight at summer camp, they are punished...by being barred from their least favourite activities.
* The Baby-Sitters Club wouldn't entrust to a high school senior, such as taking little kids around New York City unsupervised. All the BSC has to do is offer to help and explain that they have an after-school baby-sitting business, whereupon one of the parents they'd worked for would chime in with, "They're very responsible," and bingo, they were treated like honorary adults, no further questions asked. And since eleven is apparently the magic gateway to the Competence Zone, often Mallory and Jessie would be "taking care of" kids who were only a year or two younger than they are.
* "The Babysitter" takes place in one night, in which Mom and Dad go out on the town, and leave Cow in charge of babysitting Chicken; after Mom and Dad have a happy time at the Sad Club, and return to see Cow is (in their perspective) a great babysitter, they leave on the spot for an extended overseas vacation.
* The Babysitter with Cole's babysitter, Bee, by presenting Melanie as a cute blonde girl, whereas Bee is a hot blonde teenager.
* the baby that Francine was a surrogate for are her only kids, the implication being that the other pregnancy was a miscarriage or abortion.
* The Baby Trap bout of sex, much to the discomfort of Vorenus. When Pullo returns, they have the following conversation:
* The Baby Trap— Someone in a relationship deliberately causes a pregnancy without their partner's consent, in an attempt to bind their partner to them.
* The Baby Trap, media representations are almost of the female variety.
* The baby trolls are then raised by one of presumably dozens or hundreds of different types of "lusi" (singular lusus) which are different species that presumably reproduce normally. They have a symbiotic relationship with trolls, where they adopt and raise troll children, as trolls never know their parents.
* The Bacharach/David composition "Always Something There to Remind Me" is often associated with its well known cover by 80's new wave duo Naked Eyes, but it was recorded quite a few times, initially by
* The Bachelor — that the guy who told them he might be falling for them, and with whom they really thought they had a "connection", and who slept with them in the Fantasy Suite, picked one of the other 24 women he was seeing while also seeing them.
* The Bachelor, and demoted a story about the earthquake and tsunami that devastated Japan to a small thumbnail image on the top left corner.
* The Bachelor and the Bobby-Soxer, servant Bessie tries to wake up one of her charges:
* The Bachelor counts as this. It involves 20 women competing over the course of a few weeks for the affection of one man.
* The Bachelorette season where Trista Rehn chose Ryan Sutter. In each season the remaining 3 men have a one-on-one date with the Bachelorette. At the end of the dinner, the pair receives a message saying they can spend the night together. During Trista and Ryan's date, after the message arrived, Trista says "Waiter!" and Ryan says "Check please!".
* The Bachelorette. Then the executives walk through the door to call in Cleveland.
* The Bachelor has ended with the bachelor rejecting both of the final two women.
* The Bachelor, the show's villain, Chad gets so drunk, he passes out, and

according to one of the other guys, poops his pants while unconscious.
* The Bachelor, when the late grandfather reveals via video will that the protagonist is the inheritor of 100 million dollars, he reminds the room of stunned viewers to breathe.
* The Bachelor, whose entire premise is based on this (one man choosing from twenty-five women).
* The backbox translite features Yao Ming, Shaquille O'Neal, Allen Iverson, LeBron James, Dwight Howard, Kobe Bryant, Dwayne Wade and Kevin Garnett.
* The back cover of one volume of the manga and at least one or two other official illustrations for
* The back cover of the Sunset Rubdown album Random Spirit Lover has Krampus on it.
* The background characters would randomly turn into simple white figures. Played with in a brief scene where you actually see two of them
* The background dancers of "We Close Our Eyes" by Go West are large posing dolls.
* The background feats "Fey Heritage" and "Fiendish Heritage" allow respectively non-lawful and non-good
* The background fluff also has a Power Booster example: The plane of
* The background fluff for Warlocks also indicates that sometimes they're simply born out of nowhere or are descended from fiends, often unknowingly — although this is edition-dependent and
* The background for the series contains this a lot. In the "present" of the setting, it mostly consists of the Mechanicus searching for lost technology. Given the
* The background includes a more standard use: the Brakiri have learned English and how humans dress by intercepting Human broadscasts.
* The background information frequently describes bladed weapons as having "Monomolecular edges", especially on the chainswords and power swords used by
* The background information indicates that humanity has moved on to speak "Gothic", but all records and dialogues are rendered in English. "High Gothic", on the other hand, is rendered as Latin with occasional bits of other languages, usually German.
* The background information mentions how Jahad and his 10 Warriors got immortality granted by the
* The background material lists several not seen in any armies, such as the Thyrrus, which resemble more pulsating bags of meat and tentacles than anything else, and the Umbra, which are essentially black orbs filled with goo, and are suggested to be simply "parts" of a larger interdimensional creature.
* The background music for Dark Beauty Castle includes snippets from "Once Upon a Dream".
* The background of the books has Zedd stopping a war between Midlands and D'Hara by erecting a magical boundary between the two regions, one instantly killing anyone attempting to enter it. A prequel short story set at the time shows that he originally claimed he intends to drive the boundary over the whole D'Hara as a wave of death, but ultimately decided that such indiscriminate and complete genocide is way too much.
* The background pony dubbed "Derpy Hooves" is famously associated with muffins. However, her "line" is questionable, as she is only one figure in a background crowd when the line is said and two other ponies have the same mouth flap at the same time. Additionally, she never delivered any mail in the show despite her being popularly considered a mailwoman in the fandom, likely due to a scene in "
* The background posters that Sokka walked past one episode were seen for less than ten seconds, yet they still included a realistic poster for a theatre company (foreshadowing for another episode) and a poster for a town meeting about air quality (referencing the industrialized Fire Nation) and all the gambling being done on the streets. All in archaic Chinese.
* The backgrounds of Satsuki and Nui are also explored in fanfiction, especially with Satsuki's with
* The background to the comedy spin-off Fantasy American Football game

* The backing lyrics for the chorus repeats the phrase "in dog years," suggesting the narrator isn't immortal—at least not literally.
* the back in Season 5, and her focus episodes were lackluster. It also didn't help that several episodes from Season 6 were very hit-or-miss in terms of quality, and unlike previous seasons, there wasn't a continuing narrative, even just in the background like in S5. However, come Season 7, the narrative returns with the "Pillars of Equestria," Starlight's character-centric episodes turned out to be some of the best ones in the series and helped her become a fan favorite, and even some of the Mane 6-centric ones were incredibly well-received, such as "The Perfect Pear," which is widely considered to be the best episode thus far.
* the backlash of a soul bond forming between Harry, Hermione, and Susan during three-way sex trashes their room at Hogwarts.
* The backlash to this refusal reached far more people than would normally have been bothered to watch a one-hour academic debate.
* The Back o' Beyond begins in Sairith, a country very similar to 1700s Britain.
* The Back o' Beyond has few stereotypical traits except maybe his fondness for knitting, although that's for practical reasons, as well as for a hobby.
* The Back o' Beyond has Sawbones, who is good natured, if a bit quirky, and once referred to Baines as being 'dearly department.'
* The Back o' Beyond is a lich (he seems to take offense at being called a skeleton) and a pirate.
* The Back o' Beyond Nate seems to have experienced this for Sebastian, as the first time they have a proper conversation is when they're at sea. However, it's not mutual and Nate soon realises they don't know each other at all.
* The back of a Honeycomb box from a few years back has a word scramble with (eg) "YCBEMOHNO is my favorite cereal".
* The back of Pink Diamond's outfit has an open top, which is oddly combined with
* The back of the "Aces High" single albums painted on the airplane serving as this.
* The back of the published manga can cause this in two different ways since it features the top 10 of the 104th trainee corps. If you've read the first volume or seen enough episodes, you can figure this out easily, and the fact that they're in order from 1-10 going left to right helps. On the back of volume two, Eren, the fifth from the left, is transparent, which one would assume is to show that he was killed in book 1; but if you look at the later books, he goes back to being solid white, which means that he gets better in book 2.
* The Backstagers: Beckett, for Bailey Brentwood. The subtext is that Beckett fears he'll be rejected for being trans.
* The Backstagers: LBGT youth-oriented series; most of the all male ensemble cast is queer, including a bisexual character, a gay character, and a transgender male character; there several queer male supporting characters, subject matter includes queer male romance and LGBT youth.
* The backstories of Catarina's parents, as well as Nicol's parents, indicate that there are still some wriggling room for the men involved: in both cases, the future fathers proposed to the future mothers'
* The backstory also has the original Star League, which was shattered into the Successor Houses by the First Succession War.
* The backstory also provides another example in The One Sin, a boss monster of the original World so powerful no player could beat it. Doing so is what earned Balmung of the Azure Sky and Orca of the Azure Sea their status as legendary players.
* The backstory also reveals that said Major and one of his accomplices had arranged for a similar "accident" to befall a unit commander who was beginning to get suspicious. An investigation into the Major's past reveals that many of his enemies seem to die in mysterious "accidents".
* The backstory averts it; prehistoric humanity at one point had an interstellar empire which nearly equaled that of the Forerunners (before the latter defeated and devolved them), making them one of the four most advanced species in the history of the Milky Way. Even in the current era, humanity was one of the most advanced

species in the galaxy. The reason the Covenant appear superior is because their lead species, the Prophets, hijacked a cache of Forerunner technology, including a sapient race of biological computers that ran the Covenant's whole military-industrial complex. Prior to their assimilations into the Covenant, the Grunts were technologically on par with humanity circa the 19th century, the Brutes and Prophets were on par with humanity circa the early 20th century, and the Jackals, Drones, and Hunters were on par with humanity circa the 22nd century. Only the Elites got to around 25th century humanity's level natively. When said biocomputers disappear after
* The backstory describes the Romulan effort to evacuate their homeworld and several surrounding star systems in advance of the Hobus supernova. They expected to have six weeks before the shockwave reached the Romulan system. Instead, the shockwave breached subspace and hit Romulus in twelve hours,
* The backstory for Homeworld 2 explains that the Hiigarans (before their exile) first did this to the Taiidan with conventional weapons, which is why the Taiidani retaliated and took Hiigara for themselves, kicking the Hiigarans out. Later in the actual game
* The backstory for the modern day storyline establishes that in 2001, Daniel Cross killed the Assassin's Mentor, then led the Templars to loads of Assassin bases. By 2012, what's left of the Brotherhood is still in hiding.
* The backstory has the centuries-long cold war between the Centauri Republic and the Orieni Empire, at the time the major powers among the Younger Races after the Minbari-and with the latter already isolationists, the only real obstacle to complete control of local space. The Centauri were fine with the state of being, as while their technology was slightly inferior in most areas it was improving faster than the Orieni's and they also had more territory and the greater economy (both of which fed into the faster technological improvement), so they expected to eventually become strong enough to be able to quickly overrun the Orieni... Then, right as the Centauri were about to develop
* The backstory has the Interplanetary Wars, a ten-year-long series of conflicts fought almost 400 years before the events of
* The backstory, however, averts this. The main Septim line already had had various winnowing events or outright going extinct. Mostly it just led to another branch becoming the main Septim line with the Elder Council's blessing and continuing the overall Septim line of Emperors (in one case, for example, a cousin supposed to be more closely related to Tiber Septim took over).
* The backstory includes police frustration with costumed vigilantes, which leads to cops striking in protest. Public sentiment turns against the superheroes, resulting in a new federal law banning vigilante activity by costumed adventurers (unless they are willing to work for the government).
* The back-story indicates that the heroes saw the damage they were doing when they took down the ships, so they then started tossing them into the ocean instead, which is why there's even a city left standing at all.
* The backstory indicates this was the preferred role of Dread Lords before joining the Burning Legion. Members would infiltrate other races and steadily steer it into corruption and self-destruction.
* The backstory justifies this by showcasing the gods coming to an agreement not to directly intervene in each other's realms, after the last time divine arguments resulted in their last planet being destroyed.
* the backstory, many states on the west coast broke away after feeling like they'd been abandoned by the federal government. The first was Utah, who declared in independence in 2031 and annexed what was left of Nevada and Arizona. They were quickly followed by Washington, Oregon, Idaho, Montana, and Wyoming, as well as fringe groups in Texas. This began the Northwest War, the end result of which was the reabsorption of all these states, continued martial law in some parts, and the rise of the NSF. Some comments by JC hint that the U.S. is on the verge of a third civil war.
* The backstory of Byakuren and her followers is that they were protecting youkai from human persecution and trying to find a peace between the two groups, and they

ended up persecuted themselves and
* The backstory of Hogwarts reveals that founders Godric Gryffindor and Salazar Slytherin were best friends before they had a falling out over the latter's
* The backstory of how the world got the be in the state it is in 2062 in
* The backstory of Miko and her followers is them exacerbating a religious war and manipulating the beliefs of the people so they could install themselves as unquestioned immortal rulers of Japan. It's no wonder that Byakuren and Co. are rather unhappy when they get resurrected.
* The backstory of one character in Dan Simmons' novel "Hyperion" involves a young woman who begins aging backward. Her memory keeps pace with the physical age of her brain, losing one day each day, so her letters to herself accumulate to quite a stack, until she realizes the futility of writing them.
* the backstory of Shell Shock, the conflict may or may not be a civil war.
* The backstory of Sophie-Anne Leclerc, the Vampire Queen of New Orleans, is that after a plague killed his entire town except for her and her older brother, the brother (who hated her for some reason) raped her and then sold her to strangers for food and money. The brother is then killed by a vampire, but the vampire still keeps her into forced prostitution until she's turn in a failed attempt to save the vampire's life from vampire hunters. In the show, her forced prostitution is mentioned but not the brother's rape.
* The backstory of the film is that everybody loved supers, at first, and then they
* The backstory of "The Unicorn and the Wasp" concerns the child of a human-vespiform romance going insane upon finding out his true heritage and committing murders in the vein of Agatha Christie stories.
* The backstory of Twinkle the Fairy is that she got exiled from Enchanted Island for turning the Queen Fairy into a (talking) frog. Attempts to turn her back all fall short thanks to
* The backstory provides numerous examples of massive conflicts between the races of Men and Elves. The earliest such conflict took place in the 1st Era between the Atmorans (ancestors of the
* The backstory says that the band's creators and the original captain of the Aurora was
* The backstory to the first game even shows the lengths the Drengin will go to in order to get slaves. Millennia before the Arceans made
* The backup policemen are a rhinoceros and two dogs (one incompetent cop and two loyal ones).
* The Backwards Я: Placing a backwards Cyrillic letter to denote a certain setting ("Я" to denote a Russian setting), regardless of context.
* The backwards moral is common on this show, with such gems as "don't vote — it makes no difference" (from "Turd and Douche").. Also, many earlier episodes in the series ended with Stan or Kyle stepping forward to announce, "You know, I learned something today..." while the
* The Backwater Gospel takes place in an isolated and forgotten town in the Dust Bowl.
* The Backyardigans as they're really just kids imagining themselves in the time period.
* The Backyardigans: Backyardigans Pablo and Tyrone wear these as 'Delivery Agents' in the episode "Elephant on the Run". So don't mess with them.
* The Backyardigans episode "Chichen-Itza Pizza", the slogan of the titular pizzeria is "We deliver".
* The Backyardigans episode "It's Great To Be A Ghost". The image associated with the quote is actually of him saying "Let's see what kind of spooky stuff is inside the haunted house!". In a variation of this case, in Latin America, due to a misinterpretation of the "Pablo" at the beginning of the text, this quote is associated with Tyrone as "Pablo, why aren't we alive?".
* The Backyardigans episode "Monster Detectives", the transformation music slows to a crawl when Uniqua realizes she has no idea where she's going.
* The Backyardigans episode "Polka Palace Party". To make it to the titular party

on time, the Backyardigans, who are playing instruments at the party, ride a raft down a river. When they come to a waterfall, they make it off the raft in time. The instruments don't.
* The Backyardigans everytime there's a villain. Since it's a kid's show, nobody gets killed off or arrested, so this is the only way. Also likely because they are using their imaginations and are all friends anyway.
* The Backyardigans: Happens in the double-length episode "International Secret Super Spy" when The Lady in Pink's secret headquarter lights end up dying from The Lady Pink pushing on the tickle table button several times. The Lady to Pink orders Henchman Tyrone to activate the emergency lights. While doing so, Henchman Tyrone crashes off-screen and we hear the screeching cat noise.
* The Backyardigans has the kids go to Uniqua's house for a snack when it was Tyrone who invited them over and not Uniqua.
* The Backyardigans: In "Fly Girl", Uniqua flies around in a biplane delivering singing telegrams to a series of fearsome creatures. It leads to a misunderstanding, as they pursue her in an attempt to tell her they actually appreciate the telegrams and she's freaked out by them all.
* The Backyardigans: In the episode "The Funnyman Boogeyman", Pablo leaps into Uniqua's arms after the Boogeyman (a.k.a Austin) breaks out of their trap.
* The Backyardigans is about a group of friends who like to use their imaginations, with each episode taking place in a different fantasy setting. Things taught range from Greek mythology to baking pies.
* The Backyardigans is absent from at least 40% of all episodes. Tyrone was even absent from an episode or two.
* The Backyardigans, of all things, had the Big Dipper Dinner in the homonymous episode. Although the name may not give it away, it's located in outer space.
* The Backyardigans plays this trope straight in "Pirate Treasure" and "Fly Girl", but surprisingly averts it in "Pirate Camp".
* The Backyardigans sang a song about having one in the episode "Front Page News".
* The Backyardigans scary", the same happens when he meets the werewolf and the vampire, he then points out that none of them are scary. Then at the end they reach the spooky castle where his master lives, the monsters all go and hide while he looks around, then everyone yells out "Surprise!", and a big monster dance party starts.
* The Backyardigans the butler (ie. Tyrone with his hair combed) who took the jewels, but only because the lady of the house (Tasha) gave them to him. Turns out it was all a put-up job in order to liven up a dull afternoon.
* The Backyardigans: The moral intended in "The Two Musketeers" was "Don't judge a book by its cover". However, it's often interpreted as "Don't hate people for petty reasons". Then again, aesops were never their strongest point...
* The Backyardigans, though some books and marketing depict them as 2D.
* The Backyardigans, though they only imagine themselves as being in different settings in each episode.
* The Backyardigans. Tyrone the moose, who is male, is the only character with hair. His friend Tasha the female hippo looks very much like him, except for the lack of hair, antlers, and different ears.
* The Backyardigans: Uniqua in spades. This is helped by the Japanese dub, where in a few episodes she says the word "genki" after introducing herself.
* The Backyardigans, when Uniqua, Tyrone, and Austin narrowly escape a falling staircase. Uniqua is left hanging on to the top landing for dear life.
* The Bacta War his ship on a nearby planet as a final fuck you to the New Republic. One of his bridge officers then shoots him, takes command, and declares that he's willing to surrender if the Republic fleet is willing to tow the wreck of his ship into a higher orbit so that it won't crash of its own accord.
* The Bacta War, Imperial crewmen fleeing a doomed Star Destroyer ask Wedge Antilles et al. not to do this. Given that Rogue Squadron are the good guys, they weren't planning to in the first place.
* The Bacta War, Rogue Squadron has discovered that their old X-Wings are being surplussed out. Tycho notes to Wedge that the fighters are missing a critical part,

the PL-1. Wedge asks him what a PL-1 is. Turns out that's bean-counter-ese for "pilot".
* The Bacta War that is essential throughout much of the galaxy, but especially now given an ongoing biological weapon epidemic on Coruscant. Imperial Intelligence Director Ysanne Isard has seized control of the planet Thyferra, the only source of bacta, and Rogue Squadron literally goes rogue and mounts a guerrilla war to capture it.
* The Bad and the Beautiful, film producer Johnathan Shields convinces author James Lee Bartlow and his wife Rosemary to come to Hollywood so Bartlow can adapt his book into a screenplay. Shields also pays for all their expenses, so Rosemary takes advantage and buys many fancy clothes, including a pair of black velvet gloves that match her new evening dress and the black lining of her white mink wrap.
* The Bad and the Beautiful is one of the milder examinations of this trope.
* The Bad and the Beautiful, Jonathan awaits Georgia in the dark of her room to talk about her past and future. It helped that she left the door unlocked.
* The Bad and the Beautiful, not minding flops because he liked them, and holding back a vital release due to not meeting his standards.
* The Bad and the Beautiful Shields. (They still end up becoming friends, since Jonathan had no illusions about his father).
* The Bad and the Beautiful, we first meet Jonathan Shields at the funeral for his father, a former Hollywood big shot who died penniless after his studio went bust. Despite the fact that literally everyone at the funeral except himself was paid to be there and pretend to be mourning, Jonathan takes nothing away from the fate of the man he calls "the king of the heels," except that he'll have to work extra hard to ram the Shields name down the throats of everyone who didn't pay him in the proper respect. He then spends the rest of the movie being a bigger bastard than his dad ever was.
* The Bad and the Beautiful where Jonathan carries drunken Georgia out of her apartment and drops her unexpectedly into a swimming pool to help her sober up.
* The badass creatures of the night who always want to suck your blood, tend to have a
* The badassery of asari commandos is perfectly summed up by the War Assets entry for the Serrice Guard, a unit of asari commandos, in
* The Badass Longcoat is also the garb of choice for Nick Valentine (who has one which makes him look like a 50's film noir detective) and Hancock (who prefers a nautical pirate-style one, which he got from a historical exhibit of his namesake).
* The bad-ass UFC fighter Tank Abbott, for some time, worked as their enforcer/groupie, and the less said about his dancing and singing, the better. Abbott later admitted to having really enjoyed the gimmick, and stated that WCW offered him singing and dancing lessons, which he turned down because he knew there was no making
* The Bad Bad Place, somehow has enough space to encompass the population of an entire town despite being only a four-story house, and sports a vast array of impossibly-deep tunnels beneath it - tunnels that look suspiciously like burrows. Also, Google Maps can't get a clear shot of it without dissolving into pixels.
* The Bad Batch this was due to his inhibitor chip messing with his mind. Crosshair reveals later though he had his chip removed at an unspecified point and is still serving the empire willingly, stating that this is just who he is.
* The bad blood between the Flanders' religion (the Western Branch of American Reform Presbylutheranism) and Catholicism goes back to when the former split off from the Catholic Church over the right to attend services with wet hair... which they've since abolished.
* The Bad Bunch; an all-female gang of outlaws as dangerous and ruthless as any men.
* The Bad Bunch, Belle Boyd poses as Belle Starr in order to infiltrate an all-female outlaw gang. Unfortunately for her, the real Belle Starr had the same idea.
* "The Bad Dream" focuses on Brother and Sister having nightmares about a cartoon villain.
* The Bad Eggs ends with Ript and Claude in a new time era where humans are

present. Neither of them are remotely upset, and they're ready to go on more adventures in their new jungle. Provided the humans don't kill them first...
* The Bad Eggs, Furman the Proto-Human tells Ript that his breath doesn't "smell like a field of lilacs" when the raptor tries to eat him, and after Ript remarks that the Proto-Humans smell like shit.
* The Bad Eggs has Claude shitting on the ground in fear after Tee-Arr is about to eat him. Conveniently this happens after Claude was complaining about not being able to defecate during the day.
* The bad feeling between spacemen and the Special Order Squadrons in
* The Badger comics there was a union for Hispanic Sorcerers called IBOB (the International Brotherhood Of Brujos).
* The Badger dealing with Lovecraftian beasties, Mavis whipped out her "Pocket Necronomicon".
* The Badger had a recurring character named "Sister Twister", a reformed Nazi transexual nun.
* The Badger Lords often embody this, to a certain extent: while under
* The Badger named Dominance in an alternate dimension. At one point in the fight, Badger get in a groin attack against him, and Dominance instantly responds with a counter that sends Badger flying. Dominance then grins and declares "I had my gonads removed, jokes on you!" Ham, who's scrying the fight from earth comments, "He had his gonads removed and he thinks the jokes on Badger." Which was almost exactly what badger said when the POV shifted back to him.
* the badgers go out of sync after several loops was trying to test this.
* The badge seen on all of Arnold Rimmer's uniforms is a Golgafrinchum hat badge from
* the bad guy attacks the hero's little bird friend for no reason at all. The bird gets his own back later.
* The Bad Guy Breaker Keyblade provides slots for Power, Speed, and Magic Medals, without focusing on any one of them. In addition, it's the only Keyblade that has slots that don't factor in whether a Medal is Upright or Reversed, allowing any Medal of the same type to get its boost. As a tradeoff, Bad Guy Breaker's variety can be a hindrance against more specialized enemies, its Medal slot system's boost is lower than most other Keyblades, and the boosts that the equipped Medals get aren't as high as Keyblades that focus on only one Medal type. So while the Bad Guy Breaker can do anything decently, it isn't the best at anything.
* The bad guy hacker calls it "an RV", and when it gets blown up, gleefully shouts that "the quarterback is toast!"
* The bad guy in "Shadow Markets" threatens his rival's elderly aunt to force the rival to meet him so he can take his revenge.
* The Bad Guys Are Cops: When law enforcement are villainous or antagonistic to the heroes.
* the bad guys, as the Dalek force keeps losing members as they're pursuing the TARDIS from one time/place to another. Being Daleks, they don't care about, or even seem to notice, this attrition.
* The bad guys don't have a monopoly on this. In "Warriors" the State Department refuses to grant political asylum to a Turkish cellist in danger of being the victim of an
* The bad guys' entire plan is based on going back in time and changing the past. Unfortunately, while you
* The bad guys in NewWho Series 6 all wear eyepatches. It's finally revealed in
* The bad guys in the episode "The Case of the Unwanted Christmas Present" were also Communists.
* The Bad Guys. Mr. Snake taunts her mercilessly over this when he finds out.
* The Bad Guys, much to his confusion and irritation. Despite this, he goes through with the change in earnest, possibly one of the more earnest ones in the group, and ends up as one of the most sensitive members of the group.
* the bad guys planned for this by having a mole higher up in rank and nobility than Third Subtribune to take over when the other officers are removed. The mole would then have made a withdrawal and allow their plot to continue.

* The Bad Guys quickly terrifies the others (save for Mr. Wolf, who he's already on good terms with) purely out of being a spider. Despite this, he's a good guy with simply a bad reputation, an amazing hacker and inventor for the team, and an all-around nice guy. A major arc in the book "Mission Unpluckable", his debut book in the series, is him teaming up with Mr. Shark, who has to learn how to shake his fear of him to help the others.
* The Bad Guys series by Aaron Blabey is a graphic novel chapter book series. While still meant for a younger audience, they are very different than his standard rhyming children's picture books.
* The Bad Guys series wear black suits and ties, a trait that lingers from their original villain days. It keeps them looking like a group, while also keeping their gang-like qualities that they had from the past.
* The Bad Guy, the protagonist discovers the hard way that all the background music of the game comes from an orchestra playing in the top of a hill.
* The Bad Guy Wins If you go by defining the bad guy literally as the most morally degraded character in the story, then Ratchett alternately loses in the sense of ending up a murder victim himself, wins in the sense that his murderer(s) cannot murder him without getting caught, and he loses again in that the murderer(s) get(s) away with it anyhow. And had won long ago at escaping the law itself in the first place to begin with, at which his success technically remains permanent.
* The Bad Guy Wins in which the hero loses and only the villain(s) come out on top.
* The Bad Guy Wins: Sometimes good doesn't triumph. In fact, victory favors villainy in dark times.
* The Bad Guy Wins: Sometimes the villain has their day. Too bad, heroes!
* The Bad Guy Wins: The story ends with the villain being victorious and getting what they wanted.
* The Bad Guy Wins: The villain has won, meaning that the heroes' efforts to defeat him and put an end to his evil ways were all for nothing.
* The Bad Guy Wins: The villain succeeds in their plan and gets what they want.
* The Bad Kids from "Fantasy High" are six very different high school students who become
* The Bad Lieutenant: Port of Call New Orleans and the evidence room is where seized drugs are stored, this is the equivalent of punishing a small child by locking him inside a candy store.
* The Bad Lieutenant: Port of Call New Orleans claims to have never seen the original.
* The Bad Lieutenant: Port of Call New Orleans drug and gambling addictions he hasn't kicked yet, he keeps creating new problems just as soon as it looks like he's solved the old ones.
* The Bad Lieutenant: Port of Call New Orleans is this, especially at the beginning, where Terrence McDonagh jumps in water to save a prisoner without checking how deep it is, thus screwing up his back, getting him promoted and addicted to cocaine.
* The Bad Lieutenant: Port of Call New Orleans. You'd be amazed at what one dope fiend can get away with just by flashing a badge.
* "The Bad Luck Eye Of The Little Yellow God" is all about this. The eye is a green gem that Greenback stole from a Brazilian tribe to power his bad luck ray, and DM steals it from him. As long as DM is in possession of it, he is befallen with bad luck. He strains a sinew trying to return the eye whether tribe wants it or not.
* The bad luck that's haunted Maggey Byrde throughout her life is practically legendary: she's been hit by a bunch of vehicles, gotten sick from all kinds of foods, she
* The badly edited low-budget porn movie that Joan's subletter makes in her apartment (very much without Joan's consent) in an episode of
* The Bad Mother's Handbook by Kate Long, elderly Nan has flashbacks to when she adopted Karen, with the real mother (a young teenage girl abused by her stepfather) leaving town with the excuse that she was going to London to become an actress.
* The Bad News Bears as the local tough guy and best all-around athlete who gets

recruited to be on the team.
* The Bad News Bears, however, in that she has to be talked into playing, her acceptance on the team is a very minor source of conflict at most (as the team's equal-opportunity bigot, Tanner, is the only one to have issue, and she quickly puts him in his place), and one of her conditions for joining the team is that Coach Buttermaker pays for her designer clothes and ballet classes
* The Bad News Bears movie, Buttermaker orders Rudy to lean in, get hit by the pitch, and "take one for the team". Rudy doesn't like it, but he does it.
* The Bad News Bears started out that way, as a parent—who just happened to be a lawyer—sued the league to get his son on a team. He got the parents of several other rejected children in on the lawsuit, and they ended up making the Bears to accommodate for them.
* The Bad News Bears, the game comes down to the last runner trying to stretch a lucky hit and a fielding error into an inside-the-park home run. He slides into home plate just as the catcher tags him with the ball. It took a few suspenseful seconds for the home plate umpire to call it.
* The Bad News Bears was the first film to have the protagonist team NOT win.
* The Bad News Bears: While this is the basic premise, the movie avoids all the usual trappings. The coach is a disinterested drunk, the players still hate each other in the end, they only win because of a pair of ringers, and they lose the championship to the juggernaut Yankees.
* The Bad News Bears with the other characters confused by the diet's methods:
* The Bad Place abilities to become a serial murderer of the women he desperately wants to, but physically cannot have, sex with.
* The Bad Place can teleport, but suffering from amnesia, he does it unconsciously and goes all over the place, especially while sleeping. His powers aren't under control until near the end of the novel, when he regains his memory.
* The Bad Place, one of the main characters teleports to another planet in his sleep and comes back with pockets full of red diamonds, enough to be worth a considerable fortune here on Earth.
* The Bad Place. This provides a major conflict, as a sibling of said Self-Made Orphan wishes to avenge that act.
* The Bad Reporter with undecided voters in place of the mentally retarded. Not trying to win any converts now, are we, Mr. Asmussen?
* The Bad Seed (1956) is undoubtedly a psychological horror classic that successfully displaced the book it was based on. The movie was remade twice, in 1985 and again in 2018, which are nowhere near as remembered, if they are ever fortunate enough to be mentioned.
* The Bad Seed (1956). So pretty. So polite. So well-behaved. She's also a sociopathic serial killer.
* The Bad Seed, after losing her eight year old son, one of the mothers mentions that he used to talk about wanting to marry her because she was the prettiest woman to him.
* The Bad Seed is a subversion, looking like an innocent child but being evil underneath.
* The Bad Seed to a blind girl not understanding the concept of sight. Some of her conversations with her mother indicate that she can't even predict how someone with empathy would respond to murder. This most emphatically does not make her any less creepy.
* The Bad Seed to be thoroughly mediocre, though it is his most well-known and praised novel today.
* The Bad Seed tops off with little Patty McCormack curtsying to the audience.
* The Bad Sleep Well in 1960s Japan, though a looser adaptation than the previous two.
* The Bad Sleep Well, one of the people who murdered his father, as part of his plan.
* The Bad Times of Irma Baumlein. This just causes her a lot more trouble, demonstrating the Aesop that lying can cause a lot more problems than it solves.
* The Bad Unicorn Trilogy Rezormoor Dreadbringer, who is one of their customers.

* The Bad Unicorn Trilogy: The Maelshadow, and most of the characters who work for it. Even the place where the Maelshadow is from, a world called the Shadrus, is this.
* The Bad Webcomics Wiki is an entire wiki based on this. Due to the fact that it has many people, most of whom aren't qualified critics, the quality, accuracy, and fairness of the reviews may vary, but it doesn't change the fact that a considerable percentage of the webcomics reviewed there are simply bad, one way or another. It got to the point where John Solomon of "Your Webcomic is Bad and You Should Feel Bad" actually demanded that they remove quotes of his, as he felt that the "nasty critic" schtick was overdone.
* The Bad Yard Club's only #1 on the Hot Dance Club Songs chart wasn't "In De Ghetto", which only reached #20, but "The Program".
* "The Baffles Puzzle". The submarine that Aquaman finds has an air lock labeled "Air Lock".
* "The Baffles Puzzle": When one of the bad guys slams a door and traps Wendy, Marvin and Wonder Dog in a room, Wonder Dog jumps into Marvin's arms again.
* "The Baffles Puzzle". When Wendy and Marvin try to tell Robin about Wonder Dog sneezing at the museum, he brushes them off.
* The Bagel and Becky Show has a whole episode where Bagel activates an ancient Egyptian curse by peeing on a cursed ancient fire hydrant.
* The Bagel and Becky Show. Yet, only Becky can see through his disguise.
* The Bagnio, while Silvertongue's genitals are just visible as he flees through the window, all contributing to a sense of the Countess' pleas for forgiveness being intended to assuage her conscience rather than motivated by genuine remorse.
* The Bagthorpe Saga, Daisy is convinced that since her uncle Mr Bagthorpe is by far the wickedest man she knows, he must be responsible for 'putting the baby in Mummy's tummy'. Her grandma is alarmed and instantly sets the record straight.
* The Bagthorpe Saga, Grandpa Alfred Bagthorpe is 85 years old and has lost some of his hearing, but not as much as everyone else thinks; he mostly uses his hearing loss as a convenient excuse to tune out the boasting and arguments that dominate family conversations. His son-in-law, Russell, describes him as "S.D." - not, as his nephew Jack guesses, "Stone Deaf", but "Selectively Deaf".
* The Bagthorpe Saga. No other children's character comes near him for arrogance, misanthropy, and sheer awfulness — but he's still hysterically funny.
* The Bag Witch Project parody short film by Toxic Bag Productions, tells the sorry tale of three attendees at GenCon, who get hopelessly lost in the hallways of the Milwaukee convention center.
* The Bahamut weapons not only have the highest skill boosts in the entire game, but they boost based on race rather than element, allowing them to be splashed across multiple elements. However, in order to get one, you have to fight Bahamut, one of the hardest bosses in the game, and in order to fully upgrade it, you have to fight an even harder form of Bahamut meant for High Level players.
* The baiji, also known as the Yangtze River dolphin, was thought to have gone extinct or at least functionally extinct in 2006 after years of industrialization and pollution of the river they lived in. In 2007, a man caught on tape what appeared to be a white animal swimming in the river and nine years later, several news sources announced a sighting of what has been speculated to be a baiji. Still, the likelihood is that the species is now functionally, if not completely, extinct due to the very low probability a sustainable population of these large animals still exist in such a polluted and industrialized environment.
* The Bailey School Kids, so the people they run into could be just plain old weird, rather than out-and-out paranormal.
* The Ba is the personality, and the typical idea of a spirit. It's the part that can be astrally projected in dreams, usually in the form of a bird that has your face.
* The Bajoran religion: spiritual worship of the Prophets who are not gods, but (at least for the Bajorans) enlightened beings, with a well-organized religious hierarchy and a common leader. Probably a counterpart of Buddhism with some Catholicism in the mix, plus a caste system in the past like Hinduism. Also, they

have demonic beings called Pah-Wraiths who some worship as well, an idea very analogous to
* The Bajorans have supposedly tens of thousands of years of recorded history, including the best part of a millenium of manned spaceflight, at the very least. But their technology seems to have stagnated at some point and most of the people behave like
* The Bajorans normally use their family name before their personal name, though Ro Laren explains in the species' debut episode "
* The Bajorans once had a caste system in which one's caste (called a "D'jarra") dictated one's profession, rather like a
* The Baka Rangers' excursion to Library Island (and everything the Library Expedition Club did) definitely counts too. Nodoka even references it as the source of her
* The Bakeneko and Nekomata, who are malevolent ghostly cats, also commonly feature in stories where they use the forms of beautiful women to attract human men for food.
* The baker (played by James Corden) and his wife (played by Emily Blunt) from
* The Baker's Daughter, the daughter is permanently transformed into an owl as punishment for her greed and dishonesty.
* The Baker's father deserted him after stealing beans for his wife from their neighbor The Witch's garden forced the couple to hand over their newborn daughter to her, and his wife dying from guilt and grief shortly after.
* The Baker Street Dozen within British Intelligence and the leader of a saboteur ring.
* The Baker's Wife, both by the baker and the villagers. The latter prank the former by presenting him with a present which turns out to be gag gift consisting of a pair of horns.
* The Baker's Wife", it failed to arrive on Broadway, however a "Highlight" LP Recording and the song "Meadowlark" meant the show finally opened officially in London. However it failed to attract an audience, despite praise from the critics, the almost 3-hour runtime failed to help, there is now a slimmer version performed.
* The Baker's Wife lives with his four, uh... "nieces". The vicar in particular disapproves.
* The Baker's Wife, the baker resorts to this after his wife runs off with another man.
* the bakery man from episode 3 who is torn to pieces before being eaten, the fishermen of episode 4 and the policeman from episode 7 who are killed but not eaten and a few of Saya's classmates who are killed before being eaten.
* The Balance Arc concluded with Episode 69, much to the amusement of the boys.
* The Balanced Faction. In between the Spammer Faction and the Elitist Faction. Their units aren't as powerful as the Elitist units and aren't as numerous as the Spammer Faction. This faction can only exist if there are two or more other factions to compare it to or both factions in game can field roughly the same amount of units.
* The Balanced Sword, again without explicitly revealing Its identity.
* The Balanced Sword, each of which has its own name and unique power. In addition, there's Poplock's sword Steelthorn, which is quite small (a larger person might even consider it a dagger), but is enchanted to deal damage as if it were a much larger weapon.
* The Balanced Sword has a map of Zarathan in the front, and sometimes also more detailed maps of specific regions visited in that book. Zarathan, which was developed as a setting for roleplaying games as well as novels, was created to be large enough that the heroes have no chance of visiting every place on it, and there's room for multiple epic adventures to be going on simultaneously.
* The Balanced Sword, healing ability is a common sign of a god's favor, and most priests have it in some form.
* The Balanced Sword, including the dreaded doomlock spiders, and a kind of giant carnivorous caterpillar thing.
* The Balanced Sword is set on Zarathan, a world that used to be connected to Earth

in a way that allowed people and ideas to cross between them; among many other gods unknown on Earth, its pantheon includes gods from Greek and Norse mythology.
* The Balanced Sword shows up to join in, he announces his presence the same way.
* The Balanced Sword, some of the gods of Zarathan have dedicated holy warriors who are granted enhanced abilities by their patron god; the trilogy features the Justiciars, dedicated to Myrionar, God of Justice and Vengeance. A major plot driver is the revelation that the Justiciars have become corrupt and now secretly serve and gain their powers from a demonic patron (who is also apparently managing to fool Myrionar Itself, or at least prevent It from denouncing them and/or smiting them where they stand).
* The Balanced Sword, they're asked to investigate a murder, and the murderer gives himself away by mentioning a detail he shouldn't have known.
* The Balanced Sword: Tobimar, to Kyri's protagonist. But Poplock has a tendency to steal the show, whenever he gets half a chance.
* The Balanced Sword trilogy, Kyri Vantage sets out to get justice for the murder of her parents, and ends up thwarting a much larger scheme of which that was only a part. The ringleader of the group who murdered her parents, and also personally murders her older brother when his own investigation gets too close, is the main villain of the first book, and is defeated as its climax.
* The Balanced Sword. Under certain circumstances, people in Tobimar's family have to leave their country of birth to quest for their ancestral lands and legacy. They must leave at once, and never return until they succeed.
* The Balanced Sword which is the basis of Tobimar's fighting style. When he meets an opponent who fights with two similar swords and in the same style, they immediately stop fighting to explore their respective training backgrounds.
* The Balanced Sword who carry weapons and armors that have been handed down for several thousand years. Each armor has a name associated with it — Bolthawk, Condor, Mist Owl, Shrike, Silver Eagle, Skyharrier, Thornfalcon — and when a Justiciar dies, a new Justiciar is selected who inherits the armor and adopts the name.
* The Balanced Sword who is using Kerlamion's invasion as a springboard for his own scheme.
* The Balanced Sword who never went anywhere), and a few very long-lived wizards, so it happens more often than you might think that a character casually mentions how this reminds them of something that happened to them four hundred thousand years ago.
* the balcony scene. Using a tree or some other form of support as the balcony breaks the spirit of the play.
* The Bald Soprano, his first and best known play, is a prime example. Its plot (Using the term lightly) revolves around the Smiths and the Martins, their maid and the local fireman (also the maid's lover) telling each other meaningless facts about their lives. The original name was even "English Without Toil." The dialogues from his French textbook were also adapted into a set of short plays.
* The Bald Soprano opens with Mr. and Mrs. Smith having a conversation alone on stage before their maid enters to announce the arrival of their guests, Mr. and Mrs. Martin. It ends with Mr. and Mrs. Martin alone on stage, at which point they segue into the same conversation Mr. and Mrs. Smith were having at the beginning.
* The Balibo Five, a group of TV reporters from Australia and New Zealand who travelled to
* The Bali Bombings - Terrorists bombed areas where Western tourists (mostly Australians) frequented.
* The Balkans are known for their mountainous terrain which, coupled with the state of the local roads, made military movements and administration difficult. It also offered perfect hiding places for bandits and guerrillas.
* The Balkans in general. The breakdown in Yugoslavia involved (at least per the excuses given): Serbians taking revenge on Croats for siding with the Germans in World War II in revenge for the Serbians doing something to the Croats even earlier, and everyone against the Muslims due to the Turkish invasions of the 1500s, and so on and so forth. And then there are the Greeks and the Turks...for

everyone else in the area, the joke goes that they're starting to get over grudges dating back to the Roman Empire. The Greeks and the Turks involve a revenge cycle going back to Classical Greece and the Persian Empire.
* The ballad about Hedva and Shlomik (הבלדה על חדווה ושלומיק) .
* "The Ballad of Badbeard": Dr. Doofenshmirtz plans to feed Agent P to his new pet crocodiles, Susan and Susan.
* "The Ballad of Barry Allen", related to above, waxes melancholic about how The Flash perceives time.
* The Ballad of Beta Ray Bill, Skuttlebutt automatically decodified Thor's language and loaded it into Beta Ray Bill.
* The Ballad of Big Al shows 2 Allosaurus falling victim to a mud trap after trying to scavenge a Stegosaurus carcass.
* The Ballad of Black Tom, and he kills 6 cops who were shooting at him by disappearing through time and the dimensions to show up behind them and slit their throats with his father's straight razor.
* The Ballad of Black Tom: When Suydam takes a room in his mansion "Outside," the view from the window suddenly becomes the deep sea. Tommy is so shocked he drops his guitar.
* "The Ballad Of Bonnie And Clyde" by English R&B singer Georgie Fame came out shortly after the 1967 movie. It reached #1 in the UK and #7 in the USA.
* "The Ballad of Brisco County, Jr." from NBC's coverage of the Olympics than from the original show.
* The Ballad of Buster Scruggs, at least he didn't burst into a cheery musical number after shooting someone's fingers off before blowing his brains out.
* The Ballad of Buster Scruggs a wanted poster featuring himself, and only objecting to the nickname they use, "The Misanthrope". He doesn't hate mankind, he's just resigned himself to the fact that pretty much all of them are going to be wicked from now until Judgment Day.
* The Ballad of Buster Scruggs. In "Near Algodones", a lynching party is killed by an Injun raiding party, but they consider it a laugh to leave the victim tied up on his horse with the noose around his neck. Then a cattleman comes along and—rather than just cut him loose—does this trope instead. He misses and the gunshot causes the horse to bolt, leaving the victim to swing back and forth while the cattleman tries to hit the rope, which fortunately he manages before the victim chokes to death.
* The Ballad of Buster Scruggs Kangaroo Court, he smiles to the criminal next to him on the gallows:
* The Ballad of Buster Scruggs: The mysterious and quasi-supernatural overtones of "The Mortal Remains" could just be a normal stagecoach ride but are implied to be a voyage into the afterlife.
* The Ballad of Buster Scruggs: The Native Americans in "Near Algodones" and "The Gal Who Got Rattled" are presented as unsympathetic, often faceless aggressors, almost like a tidal wave of death and destruction that attacks for no reason or purpose. This is very much what one would expect from the pulp westerns that the film is inspired by. The one exception is a mentioned-only character, the former lover of the trapper, who was a Hunkpapa Lakota. They apparently got on well despite her not speaking English and the trapper not speaking Sioux.
* The Ballad of Buster Scruggs with perfect grace and dignity. His angel even sings a duet with the man who killed him as he ascends to heaven.
* The Ballad of Dinadan, fully admitting that they would probably make each other miserable.
* "The Ballad of Duke Baloney!" features the origin story of Scrooge's fierce business rival Flintheart Glomgold.
* The Ballad of Edgardo escalates and the mods become increasingly apathetic, all sides begin ignoring the actual traveling rules and just arrive where they want just in time for another fight.
* "The Ballad of Fizzball McCann" by Greg Champion (who really should have known

better) lists one too many fielders in McCann's field setup (no wicket-keeper was mentioned, although a
* The Ballad of Fletcher Reede is about a man whose girlfriend put sodium thiopental in his Coke, and how he insists that she doesn't want him to tell the truth when she asks him loaded questions.
* The Ballad Of Gay Tony, it's noted that Luis took a two-week piloting class once and the license can be seen.
* The Ballad of Gay Tony, since your main reason for breaking the law is to pay back debts to various criminals.
* The Ballad of Gay Tony throws racial and homophobic slurs against Tony and Luis like commas. In fact, not just them but he uses racial slurs towards about anyone, since he refers to Triad gangsters as "chinks".
* The Ballad of Gay Tony, Vespucci University. For a game where cars are such an integral part of the experience that it's even in the title, the fact that two of the most popular maps are either too compact for vehicles (in the case of Vespucci University) or eschew them entirely (Happiness Island) says something. What that is, we don't know.
* The Ballad of Halo Jones, a floating, hoop-shaped conurbation full of unemployed humans and Proximans that's tethered to Manhattan.
* The Ballad of Halo Jones and his publisher. So, we never got to see Halo's full journey.
* The Ballad of Halo Jones does this, so much so that some of the herdience can find it tricky to get into at first. Cheeses, though, it's worth the effort.
* The Ballad of Halo Jones notes that the upper levels of the Hoop contain pleasant gardens that prospective euthanasiacs can visit before dying. The protagonists use them as a shortcut, and plan to say the garden's beauty made them want to live again if they get caught.
* The Ballad of Halo Jones, Toby the robot guard dog brutally murders his owners in secret. When Halo listens to his old memory tapes and hears her friends dying, she asks herself why he did it. Whereupon he promptly appears in the room and says "Love, Halo. I did it all for love." Toby's owners had left him to Halo in her will and apparently the robot dog's love for Halo was powerful enough to override any programming he might have along the lines of "Hey, robot dog, don't kill your owners." Cos Halo is just that sexy, obviously. Anyway, Halo pretends to be pleased that he loves her that much, but Toby can tell from her heartbeat that she's hell terrified, so he attempts to kill her. And fails, of course.
* The Ballad of Ira Hayes, written by Peter La Farge and most famously sung by Johnny Cash: "they let him raise the flag and lower it, like you'd throw a dog a bone."
* "The Ballad of John and Yoko" has a similar history, being written by John and Paul as a snarky response to the media hype around John Lennon and Yoko Ono. It's credited to the Beatles as a whole, but only John and Paul appear, with John playing both lead and rhythm guitar, and Paul playing bass, drums, piano, and percussion (it was an 'on the spur of the moment' recording).
* "The Ballad of John and Yoko" was recorded by John and Paul entirely, with Paul filling in for Ringo on drums and John playing lead and rhythm guitar.
* The Ballad of Lucy Whipple (set in Gold Rush-era California), the titular heroine, having spent the entire book whining about how much she hates California, decides to stay there, even after being given a chance to return to her New England home.
* "The Ballad of Magellan" recounts the story of Ferdinand Magellan and his quest to find an alternate route to the East Indies. At the end, when Magellan is killed during his ill-fated stop in the Philippines, the death happens off-screen, with the Warner siblings only saying that Magellan "got hit by a spear".
* The Ballad of Narayama: The whole movie is staged in the manner of an old kabuki theater play, starting with a masked joruri who introduces the story, and continuing on with a narrator who comments on the action while playing a samisen. Additionally, the film is shot on obvious stages with obviously painted backdrops.
* "The Ballad of Russell and Julie" has a lyric where Julie announces, of her

plans to revive
* The Ballad of Sir Dinadan about the vow of silence he has taken and how he can never even say his true love Isolde's name. The trope also applies to Lancelot and Guinevere's affair in the first couple of books, though in this case it's treated more seriously due to the effect it has on Arthur and the court.
* The Ballad of Sir Dinadan, has the hero end the book by going to find his female companion, who is currently training to be a nun. He proposes to her. When the Mother Superior comes out and realizes what has happened, she prepares to go pack her pupil's bags.
* The Ballad of Songbirds and Snakes as Katniss says that, of the two District 12 tributes who won the Games before herself and Peeta, only Haymitch is still alive at the start of the original trilogy. Significantly, Lucy Gray's name is derived from a ballad about a girl who was also lost without trace and may or may not have survived.
* The Ballad of Songbirds and Snakes, as we learn the full names of Snow's fellow mentors, since family connections are rather important in Capitol society. Played straight with the tributes, though, since we only learn the full names of three: Lucy Gray Baird, Jessup Diggs, and Reaper Ash.
* The Ballad Of Stoot And Argyle Add in the boys who might like those girls, and you've got a tangled web.
* The Ballad Of The Green Berets: "A hundred men, will test today/ But only three, win the green beret."
* The Ballad Of The N Word, displays quite a few racist qualities to emphazise his evilness.
* The Ballad Of The N Word: The maximum resolution of this video is 360p, and the audio is recorded in the most shoddy and cheap way possible, in order to further its gamer aesthetic.
* The Ballad Of The N Word: The visuals are done in a heavy distorted and low quality fashion and audio is humongously loud and ear-splitting.
* The Ballad of the White Horse, and the enemy has given up chasing them to just loot, sacrificing all discipline to do. This is the trigger for him failing to give into despair and instead making an epic rousing speech, starting with, "Brothers in arms, on *this* side lies the foe," before turning into a speech that amounts to "we'll die whatever we do, so let's kill a lot of them before we do." It works.
* The Ballad Of Tom Jones. The couple in the song are constantly at each other's throats, to the point where the woman tries to kill the man by driving him off a cliff. The only thing that stops the couple killing each other is — you've guessed it — the sound of the music of Tom Jones.
* The Ballad of Twilight Sparkle, Twilight Sparkle has this reaction to a movie studio's legal team trying to intimidate her into signing over the rights to her likeness for a movie the Great and Powerful Trixie is making. It probably didn't help that Twilight had thoroughly embarrassed herself in front of Trixie several times earlier in the fic.
* The Ballad of Twilight Sparkle, Twilight tries this on a librarian at the Manehattan Public Library when asking for advice on romance regarding the Great and Powerful Trixie, or as Twilight puts it "this annoying and adamantly arrogant magical mare that somepony I know may or may not have more-than-friendly feelings for." The librarian sees right through this, much to Twilight's frustration.
* The ballad "Scarborough Fair" is about a scorned man offering his former lover a series of impossible challenges to complete before he'll take her back (like weaving a seamless shirt in a sycamore wood lane, gathering it in a basket made of flowers, and washing it in a dry well).
* The Ballas aren't much better. Posting a photo of their drugs and weapons on social media is how Trevor found out about a juicy target to send the online
* The Ball" features a peaceful race that had to abandon a series of planets because a giant puppy keeps chewing on them, destroying them in process. They eventually move onto the puppy itself.
* The Balloonman is one of the only examples who can make anyone question what is right and what is wrong and where do his actions belong. The whole point of his

character was that he was tired of seeing big criminals getting away with ruining lives because they were part of the system and started targeting corrupt officials. Even Jim looks uncertain and confused about the moral questions that arise during their showdown. Too bad he chose to close the debate he was winning by
* "The Balloon People". An obvious elevator has a giant "Elevator" label above it. Likewise, some launch tunes are labeled "Launch Tubes".
* "The Balloon People". Wonder Dog accidentally presses the balloon dog's air release button and everybody laughs at him.
* The balloon Pokemon Drifloon looks cute, but it tries to kidnap children. (In fact, in one game, there's a park that you are only allowed to bring "cute" Pokémon into; Drifloon qualifies.)
* "The Baloneyman" has Homestar's reaction to Strong Sad opening a "dusty novel" stand:
* The Balrog of Moria, and Balrogs in general, inspired a lot of "giant powerful fire demon" entities in tabletop and video gaming, ranging from
* The Balrog, one of Hades' Specters, also has this ability with his whip. Which is very, very bad indeed for whoever is ensnared, because he tends to
* The Balrog-type demons go, from the weakest to strongest, through Balrog (pale red), Pit Lord (bluish-black), and Venom Lord (olive green).
* The Baltic cruise ferries. They are basically floating five star hotels with car decks. Most people traveling between Russia, Estonia, Finland or Sweden rather opt for the ferries instead of air travel because of the superior comfort, ability to relax on board and ability to take your own car with you. While they are slower than airplanes, a good evening in the restaurant, night at the night club, pub or casino, shopping at the tax-free shop and well-slept night in the cabin usually weigh more on the scales than speed of the travel. Arguably, though, the biggest attractant is that the alcohol on board is much cheaper compared to the heavily-taxed prices in the Nordic countries.
* The Baltic donates Finland a duchy's worth of land each century ("ground," "shallows"), implying they were shallows or shoals in the Middle Ages. In Norway there are remnants of Medieval moorings some 8-10 metres above sea. The rate of the Earth's crust ascending can be up to one metre per century; this rate is clearly noticeable within a human lifetime.
* The Baltic Way, across the Baltic states, to protest against the Russian occupation.
* The Baltimore Orioles of the 1890's. They pretty much stretched the rules of baseball of time like taffy. A short list of the things they did: having the ground keeping crew alter the field in various ways to enable Baltimore's batters to play "small ball," hiding a ball within the outfield grass, grabbing onto the base runner's belt, putting dirt and pebbles in shoes, throwing equipment at base runners, tripping base runners, shoving base runners, and hip checks on base runners. As others have mentioned many times, this was not considered cheating, but playing smart baseball. Their manager at the time called it "playing baseball as she was meant to be played" though John McGraw, their pugnacious 3rd baseman more truthfully called it "artful kicking." They inspired other baseball teams, even to this day.
* "The Banagic Incident" was banned in some European countries for unknown reasons. Most guess it's because the
* The "Banana Peel Challenge" which appeared on the Internet in March 2016 has teens trying to exploit a banana peel slip to see if they can pull one off.
* The Banana Splits, as well as the "Pop Cop" segment (which doesn't feature the Splits), you can see various, then-current styles of cars from the time.
* The Banana Splits had Tooly who followed the musketeers on their adventures, usually after being forbidden from doing so.
* The Banana Splits has a live action little girl and the normally live action costumed Splits turning into cartoon figures after entering a mysterious billboard.
* The Banana Splits have Fleegle and Drooper, who have more screen-time and kills than Bingo and Snorky.
* The Banana Splits in Hocus Pocus Park (1972) transitions from live to animation

as the Splits track down a little girl who wanders off from an amusement park (where the Splits are tour guides) and into a magical land where she is in the clutches of a witch.
* The Banana Splits Movie. We see the gory aftermath when Fleegle opens the box and shows it to Poppy.
* The Banana Splits series, turning a comedy show for kids into a R-rated horror movie.
* The Banana Splits show, Thad and Poppy head off on their own to check out the various set pieces. While on the Fleegle's Magic Shop stage, Thad starts livestreaming to all their followers and proposes to Poppy there.
* The banannaquit, a tiny yellow-and-black Caribbean bird with a cute little bandit mask on its face, a pink mouth, and an ear-splitting call, which it shrieks out every waking moment.
* The bandana also counts in some situations. For example, one of the Sharpshooter challenges requires you to shoot the hats off two people. It's very easy to shoot them in the head and kill them by accident, netting yourself negative honor and a bounty on your head. But if you're wearing the bandana, these consequences are negated.
* The Band, and at the end of the song notices he doesn't have a shadow anymore.
* The Band, and first recorded on Robertson's first solo album. Several years later it became a huge hit for Rod Stewart.
* The band claimed years later that part of the reason they wanted to make the
* The Band Concert", Mickey conducts his friends in performing from the "William Tell Overture" which gets interrupted by such things as Donald playing "Turkey in the Straw" on a fife, a bee interrupting Mickey's conducting, and a tornado scaring away the audience and picking up the entire band.
* The Band "Current 93" has a song called "Hitler as Kalki" which referrences Miguel Serranos ideas.
* The band developed many of the keyboard and bass guitar techniques and tones that came to define them in the early
* The band even uses a non-integer arc number, namely the ratio of 8:5, inspired by the number of white and black keys respectively which cover an octave on a piano. This was first exhibited in the aforementioned
* The band Far are widely considered to be one of the first emo bands, but like many early groups in the genre, they had no hits before they disbanded in 1999. When they reunited in 2008, they released a joke cover of Ginuwine's R&B hit "Pony" as a reunion single. That cover, which is heavier than their usual fare, became their first and only entry on the Billboard Alternative chart.
* the band finds out that Yukina considered ditching them to play at the Future World Fes alone, Lisa is the most understanding towards and forgiving of Yukina.
* The band Foghat was named after an attempt at a KWYJIBO by one of its members.
* The band "Fozzy" performed a song for the YJ Stinger energy drink called
* The band Grail Knights are a band that plays power metal, dressed as a hybrid between superheroes and knights. While "dancing" is a bit of a stretch, there's still headbanging and horn-throwing involved.
* The band has been often disgusted when fans tell them that they played "One" at their weddings, prompting Bono to respond:
* The band has straight examples as well (again, in the realm of respecting the soldiers): "Enough" and "Sacred Lie" are the most obvious.
* The band indulges in this when Dr. Twinkletits falls out a window and gets mauled by the yard wolves. Hell, Nathan
* The Band. Instead of creepy, though, the effect is wistful and elegiac. And mighty damned pretty!
* The Bandit has a central brown block containing the engine, and a three claws (like a claw game) with spikes attached to it.
* The Bandit, hauling the all important cargo and occasionally saving the Bandit when the cops decide to get serious.
* The bandit leader, Luigi Vampa, is a polite, nice guy who reads Caesar's
* The bandit mentioned to Tohru that part of her dream of becoming a maid involved

falling in love with her master. Whether or not she actually did is never specified.
* The band occasionally write tributes to historical figures such as American president
* The Band of the Hawk fills this role for the Kingdom of Midland. When the nobles in the army object to Griffith's proposal to recapture Doldrey with only his own tiny band of misfits despite the number of elite troops Midland has already lost, Sir Laban points out that they have nothing to lose if Griffith bears the risk alone, and that the country will benefit if he pulls another miracle.
* The Band of the Hawk is like a surrogate family for people who don't belong anywhere. Guts and Casca both had crappy childhoods and were alone in the world by 11 or 12 years old. Griffith took them in, and they became part of a band of
* The Band of the Red Hand, not the most dramatic example on this page but they have more than earned the title of Badass. Led by
* The band passes a sign that reads "Loop Exit" just before entering a 360-degree vertical loop in the road.
* The Band Perry", about a scorned woman cutting down a tree that she and her ex-boyfriend had carved their names into to show their everlasting love.
* The Band Perry's "Chainsaw" goes back to see the tree she and her significant other carved with their names, a heart with an arrow, and 'forever'. Now that they've broken up, she's chopping it down for firewood.
* The Band Perry's "Hip to My Heart" begins with "I like your lips like I like my Coca-Cola / Oh, how it pops and fizzes".
* The band Renaissance had a hit with "Northern Lights". A couple of years later they recorded "Bonjour Swansong" which has an almost identical tune.
* The band running from their fans and the scenes where the dance around in an open field in
* The band's first drummer, John "Stumpy" Pepys, died in a "bizarre gardening incident" that the authorities said was "best left unsolved."
* The band's frontman Jonah Matranga scored a Top 10 pop hit in 2006 with his guest appearance on
* The Band's highest charting song, the #25 "Up on Cripple Creek" is certainly a classic — but not to the same extent as "The Weight," which stalled in the 60s.
* The band's later album "Yessongs" shows the glider guiding a fragment of the baby planet through space, where it lands in the ocean of a new, full-size world.
* The Bands of Mourning. Duralumin metalminds allow Feruchemists to store various types of Connection. If they put all of their Connection to their homeland in one metalmind, they can then put "blank" Connection in another metalmind. If someone uses this metalmind, they suddenly have no Connection to a homeland. Their soul will then automatically Connect to the closest land, which has the side effect of allowing them to speak the language as if they were raised there (though accents are preserved because of the dichotomy between mind and soul). Unfortunately, this only works for visitors to a land, because having someone Connect to their own homeland is just redundant.
* The Bands of Mourning guesses that one stepped on the first trap, and the others tried to drag them off, setting off more traps.
* The Bands of Mourning Slightly downplayed in that he does make an attempt to soften his impact by shooting at the glass first, then taking the impact on his arm, which he'd wrapped in his coat.
* The band's original idea for the video was just going to be them performing the song in a concert arena. Then the producers (who, interestingly enough, were both women) brought in their treatment for the video, which had the band performing on a giant woman in a bikini, and that she would eat them at the end. The members of Lit thought it sounded a little cheesy at first, but decided it could work and they would gladly do it if they got
* The band spends their video for "It's Time" exploring a desolate wasteland of a city, and eventually
* The Band sported beards, or at least some form of facial hair. They were

successful at it, too!
* The band's travel manager Natalie arrives at the end of the film with the police at Eagle Peak. First of all, she was in Spain so how did she get to LA so quickly, or know to get the police? How does she know the band are at Eagle Peak? For her to get there in the space of time the band knew about Eagle Peak she must have teleported from Spain.
* The band themselves also had this. They originally formed as a skiffle group called The Blackjacks, before quickly changing their name to The Quarrymen after they discovered another group was already using that name. Later they changed their name to Johnny and the Moondogs. When Stuart Sutcliffe joined, he suggested changing the name to Beatals, as a tribute to Buddy Holly and the Crickets. They then went through a few variations on this name, first changing it to The Silver Beetles, then The Silver Beatles, and finally shortening it to just The Beatles.
* The Band two years later. Somewhat inverted, however, in that you're far more likely to hear the original these days.
* The Band Wagon is considered as an adaptation of the 1931 revue of that name (which also featured Fred Astaire and several songs used in the film), "That's Entertainment" would qualify as a Movie Bonus Song.
* The Band Wagon is half Private-Eye Monologue, half ballet. (It should be noted here that the monologue's writer was Alan Jay Lerner.)
* The Band was one of the most influential groups of the late '60s and early '70s but never had a song reach the Top 20 in the USA. (They did have two albums go gold and reach the top ten.)
* The Band) were among the '70s singer-songwriters (along with the aforementioned Cat Stevens) to release comeback albums in the 2000s. Both albums were critically acclaimed.
* The Band, who rips up winning horse racing tickets "just for a laugh" (or so the main character in the song wants us to see her as).
* The band WHY? switch between alternative hip-hop, indie rock, folk, R.E.M.-inspired jangle pop and bizarre combinations of these genres. Their 2008 album
* The band wrote "Links 2-3-4" as a response to accusations of Nazism, but since the song's based on a German drill instructor's chant, and you're not going to pick up on the "We're left-wing, dammit!" message in the lyrics if you don't actually speak German, the message didn't exactly get through. To wit, the
* The Bane Chronicles (bisexual male main character, gay supporting character, queer male romance)
* The Bane Chronicles to get back to together because she's a fan of their relationship.
* The Bane Spiders are referred to as being Lord Recluse's praetorian guard in their descriptions.
* The Banger Sisters) is about a pair of former groupies who reunite years later. Suzette (Hawn) is still living a fairly wild, rock-n-roll lifestyle, but Vinnie (Sarandon) has become a conservative, middle-class mother, who is both appalled and attracted by the reminder of her wild youth.
* The Bangladesh Liberation War that this war was attached to, also lasted a short time, just 8 months between the time it started and the Indian intervention.
* The Bangles, a limited-edition CD with both a re-release of their 1983 recording and a new one for 2004. The Bangles revived the tradition in 2009 with an annual holiday podcast.
* The Bangles, even the video has the band singing in front of a wood fire in the beach.
* The Bangles have said in many interviews that their original goal was to be this to
* The Bangles. Only their last top 5 hit "In Your Room" sounded like a typical Bangles song.
* The Bangles started off having three lead singers (Susanna Hoffs and the Petterson sisters) and the first albums are relatively balanced in that department. However, as Hoffs started to gain media coverage, most of the singles (i.e. videos, i.e. hits, i.e. opening/closing live numbers and encores) had her on lead. For

their reunion album, she sings more than the others.
* The Bango-ru dolls from "The Chronciles of Meap: More than Meaps the Eye" are apparently like custom-made Wuzzles. Stacy orders an adorable bunny-bear, while Candace orders a Bango-ru that's half-cow, half-frog, which... didn't turn out so well.
* The Banish spell turns a unit ethereal, which makes them entirely immune to normal attacks. However, it also makes them unable to attack, move slower, become more vulnerable to spells and the Magic
* The bank belong to the lawmen / outlaws minor faction which has its headquarter in the same town. Robbing the bank is considered as a declaration of war by the faction. It is actually the easiest way to do it, instead of attacking a party of several dozen of men and risking heavy casualties.
* The Bank Called, Your Reality Check Bounced, subverts the trope by being perfectly well convinced that they are in an anime; he addresses the audience directly (leading other characters to wonder who he's talking to) and mentions having enough time in "this episode" for something. Kyoya, however, eventually explains that they are actually in a fan fiction, and he's apparently been aware of it the entire time.
* The Bank Called, Your Reality Check Bounced, with no explanation offered.
* The Bank Clerk, a.k.a. the "...and it's GONE!" guy plays this straight. He normally robs people out of their money without any remorse at all, and while he does the same to the New Kid he acually helps to return all the lost money with no tricks.
* The Bank Dick's family bemoaning his shiftless, scandalous nature. His eldest daughter melodramatically wails that she'll commit suicide by starving to death, sobbing "It isn't hard..." then continuing in a cheerful chirp "I tried it yesterday!"
* The Bank Dick, W.C. Fields' character is trying to keep the bank examiner from looking over the books, knocking off his glasses and 'accidentally' stepping on them. He's dismayed to see the examiner keeps about a dozen spares in his briefcase.
* The bank doesn't unilaterally change the conditions of the account, so bank fees would eat away more or less of your benefits.
* The Bank has a second attempted robbery later on where two crooks stage an elaborate awards ceremony that engages the whole town. Then another crook sneaks into the bank and opens the vault by listening to the combination. Once inside the Vault, the crook is greeted by Andy who is sitting on a chair calmly reading a paper. The crook demands to know how Andy got in, only for Andy to point out the back door to the vault that the town put in after they forgot the combination to the vault.
* The banking system in general: Even after a string of notorious crashes and bailouts, nearly everyone in any position of responsibility still has their job, having created a financial system so complex that no individual could either fully understand its machinations, or be held particularly responsible for its dysfunction, and all those who come closest are probably already employed in the system. It's a really, really crappy situation for anyone not in such a position. Which is to say, pretty much every other taxpayer.
* The Bank Job against the royal family. Though the incident in the film has been alleged to be true, it is entirely unproven.
* The Bank Job: A group of small-time crooks are engaged to stage a heist to cover the retrieval of steal embarrassing pictures of a member of the royal family. First, they aren't told that this is the heist's actual goal, and then it turns out some of the safe deposit boxes also had ties to organized crime...
* The Bank Job, members of the British secret service need to retrieve incriminating photos of the princess from a criminal who has been using them as blackmail material to stay out of jail, so they set up some criminals to rob the bank where they are being stored. The criminals have no idea of the motive behind their instigator and are unprepared when the real target, and other criminals who stored their incriminating evidence in the same bank, come after them.

* The Bank Job, the criminals rob a bank which, while fairly high profile, should not have gotten them into the trouble it did. Turns out the bank was used by various shady characters to store their valuables and incriminating documents. The bank robbers quickly become the target of corrupt cops, drug dealers, and a murderous porn baron. However, the trope is actually subverted since there was nothing 'accidental' about the mess. It is a gambit by MI-5 to retrieve politically embarrassing photographs.
* The Bank Job which is a dramatization of the 1971 Baker Street robbery in central London, from which the money and valuables stolen were never recovered.
* The Bank Job, who want to retrieve a incriminating photograph from the bank. Martine herself agrees to the plan to escape conviction on a drug smuggling charge. Terry and his employees are in it for the money, but mostly to support their own families. It's also implied that many of the deposit box owners in the bank are rather shady, since many of them have never publicly claimed or identified what had been stolen.
* The Bank of England released its first polymer £20 note, featuring artist J. M. W. Turner on the reverse, on February 20, 2020.
* The bank robber who held up a lingerie shop by mistake and ultimately made off with a pair of panties.
* The banks, overwhelmed by the sudden flush of loan applications, have been using the Blip as an excuse not to approve loans. These people were missing with no income for five years; on paper, that is extremely suspicious. Of course, it is public knowledge that these people were
* The "Banks" update changed food from a planet-locked to a "global" resource, enabling players to create specialized planets with all farms.
* The banlist in its first incarnation was a major cap on the game's creep, ending the reign of Chaos Format as well as broken decks like Makyura Exchange or Scientist FTK. However, Konami also realized its value as an easy fallback for releasing something broken, which led to the cycle of deliberately releasing overpowered cards, presiding over a meta dominated by those cards, then once everyone owned a set, banning them for years on end, just in time for the next wave of overpowered cards that the old cards would have actually been balanced against.
* The banned episode "Beauty And The Beach" features James entering a swimsuit contest with inflatable breasts.
* The banner as per a stipulation in the sale agreement. He has stated that issues of Mirage canonicity are only his opinions, as Viacom now has the authority to determine canon. It should be noted that unlike other examples where the creator never owned his creation or was screwed over, Peter Laird owned his creation for decades until he sold it to Viacom on his own will.
* The Banner Saga 2 has one early on. Significant, because the waterfall wasn't there when they initially planned the route, but was a consequence of the world splitting apart, and thus preventing them from making easy sailing to the capital. You can get your boats to the bank just in time - a long as you aren't weighed down with refugees.
* The Banner Saga 2 has the Elite Guard, the guard of King Meinolf. Boasting high stats and the shield wall ability used by most shield-bearing humans, they also come with their own set of unique abilities. All Elite Guards on the field will attack any target in range when King Meinolf uses his King's Will ability, and even take damage on behalf of the king, meaning he can't die as long as at least one guard stands. According to a conversation between Egil and Prince Ludin at the start of the game, you must have a title to apply. Depending on your choices, thy can fight with you, or against you.
* The Banner Saga 2, the kragmen use war bears, which are powerful enemies.
* The Banner Saga .By the second game, the vast majority of varl in existence are probably marching with your caravan - only a few hundred, despite being excellent warriors with a lifespan of centuries. You can either contribute to their extinction, or attempt to save as many as you can.
* The Banner Saga, half of the narrative is spent controlling a group going through the afflicted lands, where they have to fight Warped versions of the normal

enemies.
* The Banner Saga, he has a conversation with Alette in which he is uncharacteristically lucid and straightforward for a moment before reverting to his usual self. During this conversation, he confides in Alette that he knows there's something wrong with him and that he attempts to treat his condition by focusing on objects of personal importance.
* The Banner Saga standing at least twice as tall as a man, with unknown but finite lifespans lasting centuries, and horns growing from their foreheads. Crafted from clay by a dead god, they can't breed and there aren't too many left.
* The Banner Saga, this is a major part of the setting that sets morale so low.
* The Banner Saga Trilogy, losing battles still continues the storyline without a Game Over.
* The banners on this page right now, which, many thanks to Ads by Google, are currently "XTREME Ringtones," "Xtreme Machine Wheels" and "Xtreme Diesel Performance."
* The banning and hatred of sexuality could be useful to the Party for the purpose of inducing sexual frustration, which results in war hysteria and obsessive loyalty.
* The ban on "200"/"201" also extends to several foreign language adaptations of the series. In particular, the director of the French dub had stated that it is highly unlikely they'd be translated due to requiring even more dialogue censorship. Likewise, the scene where Buddha is shown snorting cocaine alongside Jesus looking at pornography, parodying the double standards of which religious figures are and aren't okay to depict, ironically got the episode (and the entire series) banned in
* The Banquet of Nyköping 1317. The Swedish king Birger had invited his younger brothers, dukes Valdemar and Erik, to Castle Nyköping to feast at Christmas. After everyone had gotten drunk, king Birger imprisoned his brothers, put them in the
* The Banshee, while somewhat more aggressive-sounding (and apparently relishing in the idea of bombing things) also keeps remarkably calm. In fact, the only Terran pilot (close to the only Terran soldier period) who
* The Bant shard (the shard composed mostly of White mana with Green and Blue supporting it) in the
* The Bantu (a language family/tribe of sub-Saharan Africa) traditionally believed that gourds and pumpkins could become man-eating monsters
* The "Banzai Charge". That is, a massed charge of riflemen equipped with bayonets... Against semiautomatic rifles and machine guns, and, after the first few times, against an enemy that had learned to expect them. It was so ineffective that one of the ways general Tadamichi Kuribayashi slowed down the Americans at Iwo Jima was by
* The Baol Organism, Grunur, and Zroni all existed more or less contemporaneously about 7 million years ago.
* The Baptist church in the United States in the 1800s favored abolition of slavery. The Southern Baptist church splits off in 1845 as an explicitly pro-slavery sect.
* The Baratheon brothers have a strained relationship with each other, though it gets especially bad between Stannis and Renly in Season 2 after they both declare themselves king, and Stannis promises to smash Renly's army when he refuses to surrender. He shrugs off Renly's death (which he himself caused) callously at first, though months later and after realizing it gained him nothing he showed a
* The Baratheon General only appears briefly in two episodes before he's killed at the Battle of Winterfell.
* The Baratie chefs have this reaction when Zeff announces that they'll be joining the Straw Hats, followed by cheering.
* The Barbarian And The Geisha as the first American Consul-General in Japan. His Japanese hosts give him a geisha to help make him feel more comfortable, as well as to keep tabs on him.
* The Barbarian and the Sorceress, even attempting to summon it to destroy and

remake the world.
* The Barbarian and the Sorceress, though in her case it's subverted as she's doing good.
* The Barbarian and the Troll are forced to go back to his disapproving father to get the special "Troll Pass" for free movement through the troll tollways that don't involve slaughtering his old schoolmates.
* The Barbarians. After the beast is slain, the former's corpse is found inside it, still holding the stone.
* The Barbarians Kadar's compound, they are spotted by one of the guards. They start kissing each other until he turns away, with much spitting ensuing afterwards.
* The Barbarian's Rage, which makes him all around meaner and tougher to his enemies for about half a dozen game rounds. This is a
* The Barbarians, where their characters call backup from two other duos of twin bash brothers to save two kids from the bad guys.
* The Barbary Coast states were known as pirates and slave takers until visited in turn by the Americans, the British, and the French at the beginning of the nineteenth century. These three each persuaded them to turn to more gentle ways of life by the use of
* The Barbed Strangler weapon which, in early rules, would instantly kill the target due to a seed pod
* The Barber of Seville: Act I - Almaviva hires a band of musicians to serenade Rosina below her balcony ("Ecco Ridente in Cielo"). A bit later, he tries again with Figaro's assistance ("Se il mio Nome") to more success.
* The Barber of Seville (and the operas based on it, of which Rossini's is the most famous), Doctor Bartholo plots to marry his ward Rosine (Bartolo and Rosina in Rossini). Count Almaviva and Figaro foil the plot. In the play, it's implied that it's just because she has been left a large dowry by her natural family and he wants to keep it for himself. When he realises the man she eloped with is very rich and will let him keep it, he's contented. However, Rossini's opera suggests that Bartolo has some real attraction to Rosina too, as he proclaims that he only becomes more charmed with her the more scornful she becomes of him.
* The Barber of Seville, Count Almaviva's connections keep him from being arrested by his romantic rival, Dr. Bartolo.
* The Barber of Seville History repeated itself and Dall'Argine's work disappeared forever.
* The Barber of Seville "Pizza roll, pizza roll, pizza roll". Also, Daniel is fired rather than voluntarily quitting his job as in the movie.
* The Barber of Seville Rosina twice and she manages to toss a letter down to him.
* The Barber of Seville: Woody is interested in a V-shaped "victory cut" hairdo. But the barber was drafted.
* The Barber of Siberia, Douglas McCracken's sign is in the Times font. The film is set in 1885, almost 50 years before that font was created.
* The Barbie and Hot Wheels computers made by Patriot Computers under licence from Mattel in 1999 were doomed to fail from the get-go. Sure, it banked on
* The Barbie Newborn Pups toy has a dog who gives birth to puppies via pushing down on her legs. Except that the puppies are "born" by falling straight down from her abdomen rather than coming out from under her tail, where a dog's vaginal opening actually is.
* The barcode is a fully functional one, and scanning it reveals it's for a "Drawstring Double Dong Dildo Holder in Midnight Blue". One has to wonder whether this was intentional or if the creators just put in a random barcode which coincidentally belonged to an unfortunate item.
* The Bar Code Rebellion, several clones are made of a single woman, each one with more and more bird DNA added to them. The first few are somewhat normal, though with notable strange behaviors and abilities. Once we reach the fifth clone, KM-5, it's become quite clear that the more bird DNA they possess, the crazier they are. The final clone, KM-6, is extremely weak, thin, and pale, and speaks only in bursts of birdlike noise.

* The Bar Code Tattoo takes place in a future where people have barcodes tattooed on their bodies and their dialogue peppered with the phrase "final level!" to describe anything remotely awesome.
* The Bar Code Tattoo. Unfortunately, the tattoo also contains your genetic code, which can be read by anyone who scans it. In other words, if you have inferior genetics (read: genes for mental ilness or physical disability), the tattoo will make you a social outcast that no legitimate institution will have anything to do with. Understandably, this fact causes a fair amount of resistance to the tattoo.
* The Bard class in 3.5th Edition has access to the spell Glibness at level 7. The sheer degree to which it improves the user's ability to lie borders on mind control, considering that it grants a +30 bonus on such checks in a system where "By the way, your Majesty, I'm actually your trueborn son and heir, hidden from you at birth by your treacherous adviser" would be, at most (even if you are a female from a completely different non-cross-fertile species), a -20 penalty, for a net bonus of +10. Oh, and it can fool magical lie detection. The
* the Bard ends up with skeletal horses running around and killing people.
* The Bard's Tale featured a town overrun by undead vikings, but one shopkeeper had stuck around. Crazy Thorvald plays this trope to a T.
* The Bard's Tale Fnarf, whom the eponymous Bard had to subdue in order to acquire his Ornate Lute.
* The Bard's Tale games had a hilarious warning/lampshade of this, pointing out "You are trekking across a frozen glacier, when a giant snow wolf suddenly appears, bares its teeth, and proceeds to chew your leg off. You have a bag of magical tricks to choose from, but one of them would be particularly effective. Hint: trying to freeze the snow wolf in an ice storm is not the best choice."
* The Bard's Tale has chickens running around the first town, which can be killed for meat. If you kill too many, though, you get to fight a rather peeved boss chicken.
* The Bard's Tale. She marries The Bard and they live happily ever after, fulfilling her promises of wealth, power, and lots of sex while the rest of the world gets overrun by her zombie armies.
* The Bard's Tale the player character and the narrator interact regularly. This usually involves them insulting one another, with the narrator taking almost sadistic glee in the acerbic protagonist's misfortunes.
* The Bard's Tale: This can be invoked for rewards in the PS2 release by summoning and dismissing the rat in bars. In fact, this is how the eponymous Bard starts the game.
* The Bard's Tale Trilogy games, used to mess with the player's map-making.
* The Bard's Tale Trilogy has placed the area surrounding Skara Brae under perpetual winter conditions, making it impossible for the heroes to leave town for the entire game.
* The Bard's Tale Trilogy stops enemies immediately realising this new monster is an illusion too.
* The Bard's Tale Trilogy, the first two games are about saving the town of Skara Brae, while in the third game, the town is destroyed.
* The Bard's Tale Trilogy. The guide for the second game refers to it as "wraparound magic".
* The Bard's Tale which can actually restore his health if you let the zombified animals reach the grinding pit from which it spawned.
* The Bard - Wandering poet, singer and storyteller who serves as a source of morale for the people around him.
* The "Bare All" promotion and the sequences that follow, complete with scenes where Yellow covers his midsection. Then there's
* The bare-faced turian called The Trickster, meanwhile, appeared just like that but had hinted that he had many other forms. One of them was a batarian deity with 8 arms and blue tatoos when he came to get the soul of a dying batarian girl. Another form of his was Jane's
* The Barefoot Contessa around to make them look even worse by comparison. Titular character Maria Vargas has great success but doesn't enjoy it, writing everything

off as phony.
* The Barefoot Contessa Hollywood publicist. When Oscar gives Maria the hard sell (re: signing a contract with Kirk), Maria is repulsed, describing Oscar to Harry as "the man with sweat on his face." Later Oscar has to wipe the flop sweat off of his face when he quits his job with Kirk.
* The Barenaked Ladies song "The Humour of the Situation" has the protagonist drive home to find all his belongings on the lawn courtesy of his girlfriend.
* The Bare Pit. At last count, that makes five or six storylines going on all at once, all destined to fail at the exact same time, Benny Hill-style.
* The Bare Pit begins with a character accidentally going out into public without remembering to get dressed first.
* The Bare Pit featured three spooky stories told around a campfire, although the cartoonist admits that Australians don't celebrate Halloween the way Americans do.
* The Bare Pit has 2 but since this is a nudist webcomic it gets inverted. The first time it happens the whole world is nude, 2nd time the dreamer is the only one who wears clothes.
* The Bare Pit provokes concern whenever he breaks out the accordion. It's not so much his playing that's bad but rather the fact that something unfortunate always happens when he does. First time, it caused a woman to go into labor. 2nd time, it caused a boat to crash on an island (though that was just in a screenplay). The 3rd time it happened a whole party's decor got ruined, after which the accordion went into "forced retirment."
* The Bare Pit takes place at a nudist resort with a pool, so this is basically just swimming to them.
* The Bare Pit, two agents check in undercover as Mark and Mary Jones.
* The barghest has a protruding spine on its back, glowing red eyes and glowing
* The baritone Frederick Baker, known by the stage name of Frederick Frederici, died of a heart attack during a production of
* The Barking Ghost, Cooper's brother Mickey is this to him big time, taking advantage of his fear every opportunity he gets.
* The Barkleys find it harder than he expected (except for bed-making, which he apparently excelled at in the army).
* The Barksdale drug gang also uses this trope to sniff out "corruption". Cutty confirms that a dealer is owed a beat-down by keeping tabs on his girlfriend to see how much new jewelry she wears. And the trope is outright
* The Barnum who openly and unashamedly takes pride in their sleazy ways.
* The Baron. Although Wulfenbach has no lack of conventional weaponry and troops, it's actually the
* The Baron encounters the crossdressing variant immediately after the opening credits of
* The Barones' neighbor, Bill Parker, is played by Patricia Heaton (Debra Barone)'s real-life husband;
* The Baroness also frequently did this as part of her schemes to capture the G.I. Joes. Sometimes she'd team up with Zartan, with both of them in disguise. A random woman would often peel off her mask and wig to reveal the Baroness. In one instance, she actually dressed up as Lady Jaye, and
* The Baroness: Domineering, cold and heartless... She's not here to please.
* The Baroness: From Anastasia DeCobray/Cisnarova to Ana Lewis, though as the Baroness she's taken on the DeCobray name through marriage.
* The Baroness gets a moment of this as well in the episode where she obtains a power to subjugate men.
* The Baroness of Hotel Moscow, having been a sinister soldier sniper for the Soviets during the Afghan War.
* The Baroness to seduce a ship magnate, only to have a fight break out between Cobra and G.I. Joe over the chemical, only to have the potion stolen by a crab. At least this time Destro found the whole silly fiasco hilarious.
* The Baroness Von Strascen, the titular baroness is in dire financial needs, but she will receive a massive sum of Euro on the condition that she gets married, which is why she goes to Las Vegas, looking for a husband and a quick wedding and

hiring Alan and Minuette as bodyguards. When her scheming cousing murders all her suitors, she foils his plans and abuses a loophole by marrying Minuette herself (offering her a large sum of money for her trouble). They do divore two days later after (apparently without really consummating the marriage), though the Baroness is still fond of Minuette.
* The Baroness when he realized there were very few women in G.I. Joe at the time. She was the first character in the canon to cross media, being imported into the TV show and given her own figure thereafter.
* The Baroness who tortures prisoners and forces them to perform sex acts for her own (and presumably, the audience's) amusement.
* The Baron, etc.). It got so that as soon as you see the villains get into a white Jag you know what is going to happen, even if the episode is set in a place that does not have any cliffs (such as the middle of London).
* The Baron of Magister Valley: Our narrator Paarfi tells us that he's sparing the reader's sensibilities by not describing the torture that our hero endures. He goes on to note that, in these more englightened times, such barbarity is no longer inflicted on anyone except the peasant Teckla, who do not feel pain as gentlemen do.
* The Barons Booty who kidnaps a nobleman's dozen-or-so young daughters while gloating in rhyme about the ransom he plans to demand for them. The children turn out to be cute but demanding, and the kind-hearted baron is worn down trying to keep them happy. To his shock, the girls' father declares that he is rather enjoying his break from them and sees no reason to take them all back. The baron ends up bankrupting himself bribing the father to let him return the kids.
* The Baron's son Gilgamesh and main heroine Agatha Heterodyne, with the dramatic twist that though they're both noble and heroic, circumstances keep putting them on the opposite side. And it was about four (real-life, not
* The Baroque Cycle and Jack Shaftoe, who has taken up making counterfeit gold Guineas.
* The Baroque Cycle consistently uses antiquated spellings of words, most often by hyphenating compound words that had yet to become fused together by common usage.
* The Baroque Cycle: Depending on where you are in Europe, either Catholicism, or some — or all — forms of Protestantism may be illegal. Some places switch back and forth multiple times over the course of the story.
* The Baroque Cycle portrays some Enlightenment figures as almost latter-day superheroes.
* The Baroque Cycle, which is set several centuries later — it's implied that he's a sort of "Wandering Jew" type. His last name is similar to the Dutch or German word for red and, at one point, he's referred to as Enoch the Red and linked to wizardry.
* The Baroque Cycle. Yevgeny the Raskolnik has a few as well, including a flail and a cannonball to act as a counterweight for throwing harpoons.
* The Barrage attack (Vaporizer) allows you to rock and roll on full auto, tearing scenery and mooks apart.
* The Barrakee Mystery murder mysteries, the murder victim had been blackmailing one of the other characters over a secret from decades in the past. It had started out with him suggesting a one-off payment for his silence, but then he had come back later to say that he wanted a regular pay-off to stay silent.
* The Barrakee Mystery novel, the overseer of Barakee Station, Frank Dugdale, is in love with the boss's niece but doesn't feel able to propose to her until he's worked his way up to owning a property of his own. Blair, one of the station hands, has a more comedic version of a similar dilemma.
* The Barraki also count. They all have these freakishly bulbous, emotionless eyes that seemingly stare into nothingness. Pridak takes the cake, however, with his butt-ugly
* The Barraki sets were popular for being the first wave of canister sets without a uniform build, but Ehlek, Pridak, and Takadox stood out for their slim bodies that used no specific torso piece. Pridak in particular is the only canister set with waist articulation.

* The Barraki's goal when they dwelled on land was to conquer all the universe and overthrow the Great Spirit Mata Nui. While they failed, Makuta was inspired by it and began formulating an
* The Barrayaran Empire had a Mad Emperor Yuri about a generation before the Vorkosigan series starts.
* The Barrayarans themselves are this in matters of war, frequently dismissing other militaries for their supposed lack of discipline (and recruitment of women).
* The Barrel Full of Monkeys game monkeys make brief appearances in each
* The Barrens by F. Paul Wilson deals with two people who go into the Pine Barrens to look for the Jersey Devil. However, it turns out that the leader is not in fact looking for the Devil at all, but for something far more sinister.
* The Barrett series of sniper rifles was originally created by a single guy as a dare to create a
* The Barretts of Wimpole Street: Part of Edward's passive-aggressive (but mostly aggressive) behavior towards his daughter Elizabeth, who is chafing under the dictatorial, tyrannical control Edward is exerting over her life.
* The Barretts of Wimpole Street. This leads to an ugly confrontation when Edward, their severely uptight, controlling father, returns unexpectedly and catches the three of them in Elizabeth's room.
* The Barrier, Álex gets notices by a homeless man. The man is next seen accosting him while flashing a police badge.
* The Barrier: A character with no known experience doing so manages to drive an ambulance perfectly fine.
* The Barrier: After circumstances result in an antagonistic character getting killed in self-defense in her own appartment, the two protagonists present start ransacking the place to make it look like look like it was robbery that went wrong. When one of them finds something they consider worth stealing in the process, they promptly take it.
* The Barrier and Julia mentions Madrid may go into lockdown in response. If that were to happen, there would be supply problems.
* The Barrier are dead in the plot's present day. People who knew them are among the protagonists, so they get development via flash-backs and being talked about.
* The Barrier are shown to inject people with a substance that seemingly makes it much harder for them to keep their mouths shut.
* The Barrier as the takedown of a terrorist cell, one of the characters supporting the New Spain dictatoriship is shown to conflate people of South Asian descent with terrorists. In a single statement, she claims that before the dictatorship took over, terrorists walked around freely, she had trouble running into a white face and Madrid looked like New Delhi.
* The Barrier: Fernando's superior Erique drops by office and says he wants him in his own office in a couple minutes. On the way to his own office, Enrique is met by someone who comes to tell him about "one his men", who is actually Fernando himself, going into a technically restricted area without permission. The short notice given by Enrique, combined with a convenient angle in the hallway, allows Fernando to hear most of the conversation without being seen by either participant and figure out that his best option is to ditch the meeting with Enrique and not stay in the building much longer.
* The Barrier: Hugo, while driving his wealthy employer in parts of Madrid that the latter hasn't seen in years, asks him if he finds the city changed. His employer admits that he's unsure whether the entity that has changed over the years is himself or the city.
* The Barrier: Hugo, who was secretly recently widowed, really needs a job. The opening he gets via a old friend of his mother-in-law expects a married couple to show up. It just so happens that Hugo's wife had a twin sister who is still alive. One of the side effects of the deception is that they need to pretend to be married. Fortunately, this is realatively easy to fake because Hugo's sister-in-law cares deeply about him and his daughter.
* The Barrier: In a presentation including photos of children who were taken away from their parents by the government under false pretenses, some photos are altered

to change the color of the subject's eyes and/or hair. One boy has very light blond hair in the presentation despite his real hair being significantly darker, while a girl with relatively light hair has it much darker on her presentation photo.
* The Barrier: In one episode, Alma presents the President with a plan, expecting him to make a very difficult decision about it. She's pleasantly surprised when he promptly signs off on it.
* The Barrier in practice in the eyes of the average citizen, the man has a point.
* The Barrier: In the finale, several policemen who no longer wish to serve the government are seen taking the New Spain triskelion off their uniforms.
* The Barrier: In the story's present day, Julia is the only survivor of a pair of identical twins. Her sister Sara is shown as an adult in several flashbacks, in which she's played by Julia's actress. The more common version of the trope is used in a photo depicting both sisters.
* The Barrier: Julia has to hide from the authorities right when her secretly widowed brother-in-law applies for a servant position that's intended for a married couple. As a result, Julia is impersonating her dead twin sister Sara for most of the series.
* The Barrier: Luis and Emilia both genuinely love the partners with whom they had children, but their past relationship with each other is heavily implied to have been very meaningful for both of them. Luis is shown to not be completely over the day Emilia told him she was going to marry Ramón more than twenty-five years later, while Emilia's response to a visit from him is to start preparing a dish she used to make for him, minus the meat that has become hard to find.
* The Barrier. Marta and Julia sharing an unusual trait shouldn't be considered odd at all.
* The Barrier: Near the end of the series, a group of revolutionaries that includes most of the protagonists breaks into the residence of the President who has been running an extremely oppressive dictatorship for the past twenty-five years.
* The Barrier: Rai, the regular driver in the wealthy home for which Hugo and Julia work, is a man of few words. His longest line of dialog is quite early on, when Hugo is asked to try repairing a car and Rai tries bullying Hugo into being submissive to him while he's in the garage.
* The Barrier's activities in favor of helping its victims, he praises his daughter Daniela for the fact that she's already been doing just that for a while.
* The Barrier set twenty-five years prior to the proper beginning of the plot, while announcement made in the present day mentions it ending twenty years prior.
* The Barrier: The actresses playing mother and daughter Emilia and Julia for most of the series are Ángela Molina and Olivia Molina, who are mother and daughter in real life, as well.
* The Barrier: The dicatorial government's triskelion shows up in a lot of places. It has even replaced the coat of arms on New Spain's flag.
* The Barrier: The plot involves the protagonists and other characters slowly uncovering the less moral plans and secrets of the dictatorship they live under, resulting in people getting killed because they have found out too much once in a while.
* The Barrier, the sole news channel and newspaper do amazingly good work of giving the protagonists news concerning them:
* The Barrier. The vehicle entering the enclave is a police car with one of the protagonists in the back. The person driving the ambulance and the person at the back of the police car don't see each other because the windows of the two vehicles are at different heights and neither has any reason to suspect that the other vehicle contains the other person.
* The Barrier. To complete the picture, Alma always turns on her "kind" persona when she interacts with the children.
* The Barrier: To put emphasis on how close a friend Álvaro is to him, Luis tells Hugo of his younger brother getting sick and spending an entire month in the hospital before dying. Luis was at his brother's side day and night. Álvaro was constantly at Luis' side for exactly the same amount of time.
* The Barrier uses this trope on a quite regular basis. If a tense situation can be

defused by a specific person or group of people showing up, they have a tendency to arrive within the last few seconds before something very unfortunate would have happened.
* The Barrier: When offered tranquilizers by his daughter during a harrowing day, Luis snaps at her that he doesn't need them.
* The Barrier. When one of the temporary caretakers gets the news that the baby survived the event, she's less enthusiastic about it than the giver of the news expects her to be. She points out that while the baby survived, there are still ten people who died.
* The Barrier where a couple of characters visit a lake one last time before it dries up that cuts to the lake's dried up present counterpart.
* The Barrier, which makes Emilia extremely angry at her. Later, when another plotline results in a couple of people Begontilde doesn't know being brought into Emilia's apartment by her daughter and son-in-law, Emilia walks to Begontilde's door and raises her middle finger towards it because she knows Begontilde is spying on them via her peephole.
* The Barrier, with one of his few instances of breaking out of it being an attempt to become Hugo's workplace bully.
* The Barrier: Yogurt laced with sedatives, injected sedatives and chloroform are all used over the course of the series, none of them take more than two minutes to kick in.
* The Barrison Sisters was a vaudeville group in the 1890s. In their most famous act, the sisters would dance, raising their skirts slightly above their knees, and ask the audience, "Would you like to see my pussy?" When they had coaxed the audience into an enthusiastic response, they would raise up their skirts, revealing that each sister was wearing underwear of their own manufacture that had a live kitten secured over the crotch.
* The Barron Knights made an entire career of parodying current pop songs. They sometimes got into trouble for this; and they once lampshaded this with one of their medleys, appropriately called "Trouble".
* The Barrow-Wight the Hobbits encounter is said to be a leftover from his kingdom, specifically a spirit from his side inhabiting the corpse of a human warrior from the other (who had some magic anti-wight weapons buried with him).
* The Barsam are hermaphrodites who reproduce by regurgitating egg-like gamete sacks, which another individual then swallows to impregnate themself.
* The Barsoom Project, actor Robin Bowles plays himself in the "fat ripper" Fimbulwinter Game. Participants speculate that the portly Bowles signed on to help him lose weight for an upcoming role.
* The Barsoom Project: Charlene Dula grew up in the orbital colony Falling Angels. Her elongated frame reminds people of a Tolkien elf, and she has a hard time with Earth gravity despite months of intensive exercise before coming to Earth.
* The Barsoom Project, Cowles Industries host a major conference to recruit nations' and other megacorps' support of a Mars-terraforming program that would use this in its operation. The possibility of building one on Earth after a Martian version has been proven safe and reliable is also discussed.
* The Barsoom Project: Electronic tampering with a high-tech LARP → multiple acts of lethal sabotage in support of covert corporate takeover scheme
* The Barsoom Project, Martin Qaterliaraq is an Inuit shaman character in the Fimbulwinter Game. His lack of a navel is an early indication that his character was crafted from molded lava by the Raven, not born.
* The Barsoom Project of humanity's sins and crimes as defined by the literal theme park version of the Eskimo religion.
* The Barsoom Project, the cave-dwelling young savages are actually the offspring of time travelers who got stranded as children. They grew up thinking of the chamber where their parents' non-functional time machine is located as "church", and go there to pray.
* The Barsoom Project. Their battle is staged in the middle of a simulated city, complete with tiny terrified civilians who die in droves every time the robots make a move, as a psychological ploy to get the bickering diplomats back to the

negotiating table.
* The Bar Stoolie", Cliff is wearing one of those novelty hats with a can holder on each side and a rubber straw. He has two cans of beer in his hat. Each can says only "Beer".
* The bartender and his patrons did this a lot in that scene, though the latter were making fun of the former.
* The bartender in "Jeff" performs a completely unnecessary one: sliding a bottle and galss along the bar to Dave, who is less than a foot away.
* The Bartender: Someone who serves alcohol at a bar, pub, nightclub, or restaurant.
* The Bar. They're one of the most dominant tag teams from the Reality and New eras of the WWE.
* The Bartimaeus Trilogy, after he knocks himself out trying to control a powerful staff.
* The Bartimaeus Trilogy a Glamour is one of many tricks that can be used by magicians. Get snared by a Glamour and you'll be sitting slack-jawed staring at something you believe to be a delicious feast as the magician closes in on you and takes you as a helpless captive. And if you so much as touch any of the supposed feast, then you're done. However, a spirit of decent quality can resist the effects of a Glamour and can direct the magician controlling them on how to shake off its effects as well.
* The Bartimaeus Trilogy. Also, any commoners who do manage to learn magic immediately become targets of other magicians, which pretty much spells their doom.
* The Bartimaeus Trilogy. Also, it's only in the prequel, in the other books he's a 14-year-old ancient Egyptian kid.
* The Bartimaeus Trilogy, and as a whirl of violence with an occassional severed limb flying out.
* The Bartimaeus Trilogy, and they use shapeshifting and glamour to take other forms.
* The Bartimaeus Trilogy, Bartimaeus comments, "All I need is some popcorn," as he watches Nathaniel get himself in trouble.
* The Bartimaeus Trilogy: Bartimaeus does this in the second book, having just escaped imprisonment and needing to flee in a hurry. Made somewhat easier for him in that he can transform into a small and very spiny impling who has no trouble sticking to the car.
* The Bartimaeus Trilogy, Bartimaeus is a demon, thousands of years old and was pretty close friends with Ptolemy and, in the end, is pretty close friends with Kitty and especially Nathanael; all three of them are/were in their teens at that time.
* The Bartimaeus Trilogy) Bartimaeus points out a duck to Nathaniel, who interprets it as the command.
* The Bartimaeus Trilogy, Bartimaeus remarks that the less effective the army, the more over-the-top their uniforms.
* The Bartimaeus Trilogy, being made of air and fire, are weak to the earth and other metals, silver being the most painful for them.
* The Bartimaeus Trilogy books, the ability to resist and survive attacks by spirits. The power varies from being able to withstand minor attacks to being able to shrug off very strong magic. Those with additional abilities can also do things such as negate the ability of spirits to hide themselves from human sight and sense things like magical objects.
* The Bartimaeus Trilogy, but it is mentioned that Nathaniel once encountered one who allegedly required a command half an hour long just to correctly fill his bath. Most spirits are reluctant to go that far, as wizards don't require a spirit's assistance to use torture spells on their slaves.
* The Bartimaeus Trilogy complicated, primarily involving magical circles and knowing the name of the demon, but also knowing dozens of other languages, candles, incenses, not leaving the circle until you are sure the demon won't hurt you, and knowing how to play various music instruments well, among other things. And that's just the basics, as demon summoning just becomes more complex from there.

* The Bartimaeus Trilogy counts as this, once saying that her only real skill is surviving. Bartimaeus says something to the effect of surviving being one of the better skills out there.
* The Bartimaeus Trilogy death in the previous book. He sometimes exaggerates the curves, though.
* The Bartimaeus Trilogy, despite having almost no connection to reality, and practically nobody we see takes them seriously.
* The Bartimaeus Trilogy. For example, Bartimaeus used to be best friends with Ptolemy, and at that point, he was about 3000 years old.
* The Bartimaeus Trilogy for several decades, he was released by a fisherman. Bartimaeus emerged in suitably spectacular fashion as a lightning bolt throwing giant, and offered the fisherman a wish. Guy dropped dead on the spot of a heart attack. Bartimaeus then says "I know there's a moral in there somewhere, but for the life of me I just can't find it."
* The Bartimaeus Trilogy. He survives... well, anything and everything, really. Bartimaeus himself puts it best:
* The Bartimaeus Trilogy: Imps are low-level demons that magicians summon for household chores and delivering messages.
* The Bartimaeus Trilogy. In the third novel, Nelson's Column gets sliced in half by Nathaniel trying out the Staff.
* The Bartimaeus Trilogy involving whatever body parts they feel like, and even the implication that they could probably take the form of inanimate objects, if they so desired. The only real limits are that excessive shifting will wear them out eventually. They also seem to be somewhat constrained by size, never getting much bigger than slightly bigger than human size (although the more powerful the demon, the larger they are).
* The Bartimaeus Trilogy is all about. It deals with the relationship between the magicians (masters) and the demons or spirits (slaves). They tend to be rather bitter and malicious, due to the fact they live in another dimension and are strictly bound as slaves whenever they are summoned to Earth. They are perfectly willing to kill someone trying to summon them if the magician messes it up.
* The Bartimaeus Trilogy is the epitome of this trope. In this series of books, almost all magic is the result of summoning and confining spirits inside pentacles, which are described as being composed mainly of words. This is a necessary step because the aforementioned spirits are usually quite vengeful for their long imprisonments in the physical realm and most of them have developed a taste for human flesh.
* The Bartimaeus Trilogy is vastly corrupt and falling apart, because a wizard's standard childhood and upbringing teaches them to value their own ambitions over anything else.
* The Bartimaeus Trilogy, magicians are given first glasses, then contact lenses, that allow them to see the first three planes, giving them a limited ability to see various supernatural defenses, disguises, etc.
* The Bartimaeus Trilogy, magicians possess magical glasses which allow them to see into the second and third planes. Djinn and other magical creatures can be invisible/disguised in this plane, and the glasses enable a human to see them in a true(r) form.
* The Bartimaeus Trilogy. Nathaniel is shown to have knowledge of Latin, Ancient Greek, and Coptic, among others.
* The Bartimaeus Trilogy, Nathaniel summons and commands the eponymous spirit with very flowery, archaic language. Bartimaeus mostly finds it pretentious and vaguely annoying.
* The Bartimaeus Trilogy: Nathaniel tries to evoke this trope, with mixed results.
* The Bartimaeus Trilogy possibly has a variant of this trope. The magicians who rule London pay people good money for their unwanted toddlers to act as their apprentices. This doesn't seem too selective, but it's also mentioned that the children must pass certain tests to be accepted. It's not mentioned what these tests look for—whether to make sure they aren't complete morons or to determine whether they are simply more intelligent than other children of their

age—but this may count.
* The Bartimaeus Trilogy's guards by running through the kitchen, the "chef" turns out to be his old enemy, Faquarl.
* The Bartimaeus Trilogy so that he might be looking at what seems like an ordinary person but knows that they're actually another djinni. Magicians have special contact lenses that let them see a few other planes, but not all seven.
* The Bartimaeus Trilogy that slowly shrinks, forcing him to shapeshift into smaller and smaller forms. (He escapes.)
* The Bartimaeus Trilogy the ability to summon, control, and torment demons is almost the only thing magicians can do. However, because this essentially gives them command of all the magic that the demons can do, they don't feel the loss that badly. However, it's also somewhat cumbersome, as the demons wish to kill their masters and will twist their commands if they can get away with it, and summoning them can be time consuming and must be done perfectly. The magicians try to conceal this weakness by commanding invisible demons to perform feats of magic, and can also have demons "seal" spells into objects that they can activate without the demon's aid later, so if someone doesn't know the trick it appears that magicians have far greater magical powers in addition to commanding mighty demons.
* The Bartimaeus Trilogy there are parts set in Ptolemaic Egypt. They're backstory bits of Bartimaeus with his long dead, and much cared for, master...Ptolemy.
* The Bartimaeus Trilogy. The rules are never fully laid out and are sometimes inconsistent (one description in Amulet of Samarkand suggests physical objects are present on all layers, but in The Golem’s Eye a skeleton is explicitly not visible on any layer other than the 1st; Bartimaeus cannot change his true form on the 7th layer yet shrinks himself to avoid being crushed by a magical cage present on all layers). There are 7 layers of reality (though a theoretical 8th one is mentioned). Every spirit and spell is truly “on” one of the layers, and in case of spirits extends down to the first, although they can change their form on the lower layers; they can also perceive the layers they are on, with the exception of observer imps, who are on the 2nd layer yet see all of them. Humans and other living creatures are visible on all layers but can perceive only the first, although magical lenses show up to the 3rd layer clearly and 4th vaguely, and cats can perceive the 2nd. Ability to see higher layers seems affected by distance as in Bartimaeus comments at one point his disguise should hold up on all layers from far enough away.
* The Bartimaeus Trilogy: The title character is a literal Noble Demon (he prefers to be called a "djinni," though; "demon" is rather rude).
* The Bartimaeus Trilogy, the titular charakter finds the word "demon" to be highly insulting, and prefers that people call him a spirit, djinni, or "exalted djinni".
* The Bartimaeus Trilogy. This has the wizardly rulers of Britain very concerned.
* The Bartimaeus Trilogy tureen of fish soup and has a ceiling dropped on it to prevent him from prying the lid off, his final thoughts before blacking out are lamenting how this was a pathetic way to die. The death part is subverted when the soup insulates him from the effects of the silver long enough for his master to summon him back.
* The Bartimaeus Trilogy, where Bartimaeus points out that "as a rough rule of thumb, the jazzier the uniform, the less powerful the army."
* The Bart-Mangled Banner his shorts right as the American flag was being unfurled, creating the illusion of his intentional mooning of the flag, and kicking off the main plot of the episode.
* The Barto Club wish for some when their attack on a Celestial Dragon ship brings out
* The bar where Fanny takes his night off and is captured by Brodie in
* The Bar With No Name, in Medina County, Ohio — infamously the location where the vigilante Scourge of the Underworld disguised himself as the bartender to assassinate 18 supervillains (who had ironically gathered there to discuss how to deal with all the recent Scourge murders). Marvel's Bar With No Name has multiple branches; there's another one operating in New York City.
* The Basalt City Chronicles, the Empire of Smilodons has a hand-to-hand version of

this as a civil, rather than criminal, trial. Only in extreme cases are the fights declared to be to the death, and almost always as a means of getting powerful nobles (who would be otherwise forced into a death match) to stop the feuds between their factions (if you win, your faction wins, but you yourself are exiled).
* The baseball game at the end of "Stroll on the Wild Side" is tied 8-8 when Murdoch comes to bat with Inspector Brackenreid on base. Despite the distracting presence of a member of the Black Hand, Murdoch hits the home run that brings both of them home to win the game.
* The baseball rule that the first two foul balls are strikes came about at least in part because the supply of balls was limited and the balls were not as tough as they have become since, so by the end of the game the balls were often battered into irregular shapes, to the delight of hitters and the consternation of pitchers.
* The baseball teams in Tokyo are the Yomiuri Giants and the Tokyo Yakult Swallows.
* The baseball version of "Quarterback Syndrome" could be called "A-Rod Syndrome", named for Alex Rodriguez. While Rodriguez is one of the best players in history, he has- with the exception of one year- never done well in the playoffs. As a result, when the New York Yankees are eliminated from the playoffs most of the blame and focus usually falls on Alex Rodriguez. This usually ignores the fact that he is rarely if ever the cause of the failure, but rather part of a wider problem. In 2012, for example, Alex Rodriguez was being
* The baseball writer Bill James once observed that bad teams blame their problems on their best players. They tend to get it into their heads that their star player should be dragging them to the playoffs, when instead it's the organization's fault for not surrounding the guy with better players. This often creates a cycle where the organization resents the player, the player grows to resent the organization and then the organization is forced to trade their best player, often for a pitifully small return.
* The Basebook pic of Freckles wearing a hat in Season 11 was 57% uploaded by the time Tucker destroyed the computer.
* The Base Defense in the series is one of the more harrowing missions there is, especially if you didn't properly design your base. Not only does failing or quitting that mission mean you've lost the base (and if that was your last one, the game as well), but you lose any facility that was heavily damaged in the firefight as well.
* The base game does this twice. At first, it looks like the final boss is Kunino-Sagiri, a.k.a. Taro Namatame. If you don't toss him into the TV, eventually you discover that the true villain is resident bumbling detective Tohru Adachi and a random godly entity called Ameno-Sagiri. But if you go to the Junes food court after saying your goodbyes, it turns out the true mastermind behind everything is Izanami, who disguised herself as a gas station attendant you met at the beginning of the game. And yeah, you fight her at the end of the true final dungeon.
* The base game's Rocket Launcher also works along these lines: the front of the weapon is a giant, open-sided, rotating cylinder with six chambers for rockets to be slotted into before firing. It has a tertiary fire mode that abuses this:
* The base general lampshades this, saying that Hyperion is only walking in to send a message.
* The Basement and looks all over for them. Things get worse, when he starts hearing child-like giggling and the lights go out again.
* The basement at Chernobyl under what's left of Reactor Number Four. That basement - hell, all of Reactor Four - is considered one of the most lethal locations on the planet.
* The Basement is so unnerving it makes the creepy set-up even more disturbing.
* The basement is where the horrible accident that sets the plot in motion happens and throughout the film is easily the creepiest part of the hotel where the worst and most obviously unexplainable things happen. It came complete with strange numbers and occult symbols already written on the walls, lots of Bibles, and is the only room in the hotel where the security cameras do not work.
* The Basement Jaxx song "Oh My Gosh", a girl sings about a guy she's met (not

that THAT narrows it down, but, you know); their conversation at one point goes:
* The base price of the Antimatter Condenser is 3,999,999,999 cookies.
* The Basham Brothers are a famed practitioner of the Tag Team Twin trick as well, despite the fact that they're
* The Basham Brothers did this all the time too. Like many of the entries here,
* The Bashful Buzzard, Beaky calls a worm an "infinitesimal piece of sh-sh...shoe leather!"
* The Bash Street Zombies story by Kev F Sutherland which appeared in
* The basic armaments for the Loyalist and Traior Terminators is a storm bolter (the
* The basic blue-shirted Cobra infantry and officers have masks over their mouth and nose along with their helmets, exposing only their eyes. Vipers (the infantry rank supposedly lower than even the regular blue-shirts) have full faceplates (and
* The basic character races are all longer-lived than humanity, with the exception of half-orcs, whose average lifespan is about 40 years. However, the nonhuman races all take longer to mature, as well — a "young adult" elf is 100 years old, while a dwarf takes forty years.
* The Basic Eight, you are reading the protagonist's diary that she has edited and sold now that she's been arrested and imprisoned for a now world-famous murder.
* The basic foundation of friendship within the band was said to be one of the reasons
* The basic Health healing item is Nosaphed, an unregulated drug that is stored in a nasal spray canister. It presumably is a decongestant and mild stimulant — the anodic music kids lie that they use it for their stuffy noses while hoarding it to use in making amphetamines. In the real world, the most common raw ingredient for homemade methamphetamine is over-the-counter pseudoephedrine tablets, a mild stimulant and decongestant sold as cold medicine — an obscure Encyclopedia check in the Church will inform you that Nosaphed's active ingredient is pseudoephedrine. However, in the game, it is used by your character for aches and pains. In the real world, pseudoephedrine doesn't lessen pain (except in your sinuses), but it can make it easier to ignore it (if only because you're distracted by the jitters and heart palpitations).
* The basic idea of some forms of fundamentalist Christianity, but especially that of Calvinism, with the aptly named doctrine of Total Depravity.
* The basic ork strategy is to run at the enemy while yelling and shooting. Justified in that the standard ork soldier is seven feet tall, tough enough to survive most small-caliber weapons, and have the numbers for such a strategy to be viable (and their biology requires orks to die to create more down the line).
* The basic physical considerations (like energy conservation law) suggest that all the energy obtained from canceling gravity must somehow be introduced into the system in some other way — most probably, during the manufacture of the very gravity-canceling material, which would make it hideously impractical, if not outright impossible, in the first place.
* The basic Plasma Tank (Imperium) and Skirmish Tank (Freedom Guard) had
* The basic plot is "Wake up on a island. Punch trees, mine, build, kill monsters." Notch has however said that he wishes to include some type of plot in the game later.
* the basic powers he grants the girls she had been beaten within an inch of her life, and Kyouko and Madoka ask how she's still standing.
* The basic premise is that Harry is the son of Thor. What complicates matters slightly is the fact that Thor was incarnated as James at the same time, since this was the first attempt at teaching him humility. As can be imagined, it went pear-shaped and Thor nearly went insane, leading to his memory being blocked and to the events of
* The basic premise of the Japanese board game Tragedy Looper is that 1-3 protagonists repeat a loop in their attempts to stop a murderer.
* The basic rulebook is quite open about it, noting for instance that a summoned demon will fulfill your wish literally and that it
* The Basics are all singers, mostly with Kris and Wally taking lead, but on their

second album Stand Out/Fit In they specifically put in their cover of "Have Love Will Travel" which has Tim take lead
* The basics are that the Powers are a set of entities with a Purpose, Role and Duties in their respective worlds; the eldest were directly made by the Creators, while younger Powers are former mortals
* The Basic system supplement "GAZ5 - The Elves of Alfheim" has a short adventure that involves a visit to the Gut Bucket, a low-class dive in the orcish quarter of Alfheim Town.
* The "Basic Trope" entry provided in the template above should only be a simple one sentence description of the trope. No excessive cleverness needed. Save the cleverness for the actual entries. (In many cases, the
* The Basij, a plainclothes militia, is controlled by the Iranian Revolutionary Guards who sometimes act as a political secret police. Consisting mostly of male volunteers, the Basij are known for their fanatical devotion to the Ayatollah of Iran. Although it's a semi-decentralized force with many local bands, they have armed battalions controlled directly by the
* The Basil Brush Show features an episode called "Holding the baby", in which young Miss Molly comes into the room carrying the aforementioned baby, followed shortly after by a middle-aged man claiming to be its father. Mr Steven comes to an understandable conclusion and almost smashes the man's face in. Fortunately, the child's mother arrives in the nick of time and explains that Steven's niece has taken up babysitting.
* The Basil Brush Show has this happen. After Basil spends all of the money on cosmetics (namely, for looking after his "brush"), he and his friends risk having to stay in the flat without electricity or heating. Whilst the others go off caroling, he starts feeling sorry for himself on a bridge. An old man (later shown to be Santa Claus) shows up and shows Basil that he makes lots of people happy, but Basil doesn't get it and wishes he was never born, so the old man sends him to a reality where his thieving cousin now does his show and where the people he helped and now in worse situations. Basil learns his lesson and after begging to exist again ends up in his own reality again. He goes home and finds everyone celebrating Christmas as one of his flatmates found a note with a large sum of money, conveniently.
* The Basil Brush Show; hiring Anil to cook the food, sending most of the guests to hospital (they were the lucky ones).
* The Basil Brush Show: "I'll have a word with the head writer when he gets home from school...."
* The Basil Brush Show involves Basil eating cheese before going to bed. He dismisses warnings about nightmares as an old wives' tale, only to dream that the human characters are turning into vampires and trying to get him.
* The Basil Brush Show, just after Mr. Steven gives away a large sum of money that wasn't his (thus forfilling the moral lesson for the episode) that could have allowed him to go to the Maldeeves, Basil comes out with this little gem...
* The Basil Brush Show probably never went an episode with the fourth wall intact. They would frequently pick up a copy of the script and read ahead, get to places quickly by cutting across the set, and on one memorable occasion total disaster was averted by the appearance of a director rushing in to explain to the marauding pirates that they'd wandered onto the wrong set. Another incident involved the camera man quitting after the cast gets cream on the lens, only for the guest star of the week to offer to operate the equipment.
* The Basil Brush Show: The episode "Basil's Millions" revolves around Basil and Cousin Mortimer inheriting a large fortune from their deceased uncle Maximillion, who explains the terms of his will to them via a video recording of himself. He tells them that there is no point talking to him as he is just a recording, yet he is completely aware of everything they say, including Basil's attempts to convince him that he isn't interested in the money and Mortimer's failed attempt at remembering his name.
* The Basil Brush Show where the Narrator would have conversations with the characters

* The basilcock monster can turn to stone any creature that meets its gaze or is touched by it.
* The Basiliskans were a species of sapient dragons who were conquered by the Mandalorians thousands of years before the movies, after which their conquerors enslaved them to serve as war mounts. Centuries of this servitude eventually caused the Basiliskans to degenerate, costing them their intelligence and reducing them to mere beasts.
* The basis for Pyrrha's interest in Jaune. Jaune's a dork, weak, and went to the
* the basis for the character, was targeted by a car bomb as shown in the movie.
* The basis of soaps "Whodunit?" murder mysteries, as the victim is usually an
* The basis of the book 'Nothing to Envy' is showing the truth of this trope in North Korea, the name coming from the fact that they are conditioned to believe that North Korea is the most advanced and glorious nation on the planet... which leads to quite significant culture shock for those who actually defect.
* The Baskervilles: An animated show about a British family living in the most twisted theme park in the world.
* The Basketball Diaries) in which the protagonist bursts into his school to mow down bullies and his teacher with a shotgun while wearing a black leather trenchcoat.
* The basketball team Motor City Muslims is a team from Detroit (a.k.a. Motor City) where every member is a Muslim.
* The Basket, the character of Frederick Treadway was played by Patrick Treadway. This is because the character originally didn't have a name, so in the script he was simply referred to as Patrick Treadway, with the intention of coming up with a name later. Everyone got so used to it that it simply became the character's name, until the real Patrick asked for it to be altered at least partially so it wouldn't feel like he was playing himself.
* The basking shark is a filter feeder, but it's been theorized that their carcasses are responsible for the idea of the
* The Basque language of the Pyrenees is unrelated to any other language on Earth, and notoriously hard to learn. According to the Basques, who take great pride in its near-Starfish qualities, the Devil himself once tried to learn the language and mastered only three words, presumably the words needed to express his opinion of the effort.
* The bassoon, in most languages, translates either into something similar to the original French word "basson" or into something close to "faggot".
* The bassoon started out just the same way as the keyboard did. Then Antonio Vivaldi showcased the instrument in more than thirty bassoon concerti, giving the instrument the nicknames of both the clown and the gentleman of the orchestra.
* The Bastard of Kosigan community module series, the precursor race were early humans who lived on Atlantis, but after the natural disaster that resulted in its sinking split into the "control" faction and the "free will" faction. The control faction, led by Gabriel, eventually won the ensuing war with the free will faction, led by Elisa Than (read Satan, though she wasn't actually that bad). Their war was primarily fought by using their advanced technology to mimic deities and create religions among lesser humans, so the control faction are the angels of modern Catholicism (the game is set in approximately 1300, but with magic and monsters and such) while the freedom faction became the demons. Ironically, Jesus was actually manipulated by the demons (and you even get to meet the demon commonly known as St. John), and the angels created the Catholic church to subvert his message.
* The Bastard of Kosigan. However, all of the NPCs involved will either die a senseless death, disappear and never be encountered again, or never mention your encounter after they join up with you.
* The Bastard of Kosigan, your character gets to hold a conversation with your recently-deceased father's ghost. Not forgiving him makes him take damage, but you can choose to forgive him completely and avoid the battle at the end.
* The bastellus, a creature native to the Land of Mists, preys on sleepers' life energy.
* The Bat, and creeps past the sleeping occupants, only to then start chiselling

his way through a wall.
* The Bat are suspected at one time or another of killing Dick Fleming.
* The Batarian heavy melee takes things a step further with a literal, charged
* The Batarian Hegemony fell to the Reapers first (one of their colonies was sitting on the mass relay through which they entered the galaxy), and
* The Batarian Hegemony is closely allied to the KMC and loathed by the Hierarchy, Union, and Dominion.
* The Batarian Hegemony subtly fits into this for a number of reasons: They're a rogue state; they have a fascistic dictatorial government that controls the citizenry with propaganda; they believe themselves to be the master race; and they are one of the only species that still practices
* The Batarian homeworld fell even quicker, as many of their leaders turned out to have been
* The batarians, a race of four-eyed aliens, are called "blinks" by some people.
* The Batarians are space North Koreans. The Batarian Hegemony is a hermit kingdom with a Stalinist political system whose leaders hate the (very Western) human Alliance but lack the military muscle to beat them, so they bankroll criminals and terrorists to strike at them. They also have a highly authoritarian government which tightly controls what the Batarian public do and do not hear from their media.
* The batarians have some of these, though they're never actually seen. Liberating one and seeing what went on there was enough to turn a model soldier into a stumbling drunk.
* The batarians still practice slavery, despite a being starfaring civilization for centuries. They argue that slavery is a "
* The Batcave in comics-continuity has its access passage hidden behind a large grandfather clock. The traditional trigger to open it is to set the time on the face to the moment of his parents' deaths.
* The Bat, Cora almost suffocates when the door of the secret room close, trapping her inside, and she cannot find the switch to open it.
* The bat-creature that smashes out of Martha Wayne's grave from Bruce's nightmare in
* The Bat, Dale finds Mark Fleming's body stuffed into the secret closet behind the grandfather clock; his throat slashed.
* The bathroom of a few Jimmy Johns restaurants has a subversion: One of the tiles on the floor reads "Interesting Facts about Uranus", in which it discusses
* The bath scene, beginning with Mulan nearly getting caught out by three fellow soldiers, continuing with Mulan being completely freaked out by the three naked men in far too close proximity and then the over-the-top payoff when, upon lamenting she never wants to see another naked man again, the ENTIRE ARMY stampedes nude into the river.
* The Batiri: Obariyon and Kodama debuted in 2010, Kobald and the team name debuted in 2011.
* The Batiri (Obariyon and Kodama) groups out to destroy CHIKARA, had debuted by destroying Kobald with the Chokebreaker.
* The Batman: 65 episodes over five seasons (it was going to end at 52, but got an additional season.)
* The Batman "A Dark Knight to Remember" Batman shields Batgirl from Penguin's flamethrower with his cape.
* The Batman Adventures #9, Batman and Batgirl come to arrest Sensei for his role in the murder of Boston Brand. Tracking him down to the League of Assassins headquarters in Tibet, they battle with him. The battle is stopped by Ra's al Ghul, who orders Sensei not to kill them. When Batman refuses to leave without the Sensei, Ra's orders the Sensei to go with Batman. Neither wishing to get in the way of Ra's plans nor to spend the rest of his days in prison, the Sensei chooses a third option and quietly walks out one of the windows of his mountain hideaway, falling to his death. Ra's reveals that while he was going to let Batman and Batgirl take him, he was not going to let them keep him.
* The Batman Adventures: After Batman has defeated one of the Scarecrow's schemes:

* The Batman Adventures. Barbara Gordon respects the Bat Family's avoidance of firearms. However, she is a cop in her day job and is willing to tote a gun when she and Batman infiltrate the base of the Sensei in Gotham Adventures #9, which Batman isn't happy about and asks her to get rid of it, feeling that she does not need it and that using it will be a mistake. It turns out that Batman was right; when Batgirl tries to use it to threaten Sensei, he saw that she was unwilling to use it to seriously hurt him if there was a chance to kill him. After calling out Batgirl for bringing a weapon she was unwilling to use, he disarms her and throws the gun away.
* The Batman Adventures comic, Batman goes undercover in Black Mask's organization, which then captures Batgirl. As Black Mask suspects a traitor in the group, he has each member step forward and turn a wheel, filling a tank containing Batgirl 1/7 full of water. There are seven mooks being tested, including Batman.
* The Batman Adventures featured different stories that took place at the same time, involving both Batman and Superman protecting a pair of mystical amulets from different threats. Even the flashbacks in both issues overlapped, showing that Bruce and Clark happened to both be studying under the magician Zatara during the same period.
* The Batman Adventures group editors: Denny O'Neil, Mike Carlin, and Archie Goodwin.
* The Batman Adventures, had a story in which Harley Quinn convinces the Joker to marry her by claiming she has inherited a fortune. When he proposes, without any ring, she snaps, "What kind of a floozy do you think I am? After all these years, you better have a ring!" He improvises by pulling the ring out of a hand grenade and putting it on her finger, leading to 'fireworks' behind them as they kiss. In a deranged sort of way, as you might expect from that pair, it was actually kind of heartwarming.
* The Batman Adventures had Commissioner Gordon seeking out a crime informant named "Wiesel". Gordon, like every other character this man had ever encountered, pronounces the name to rhyme with "weasel". He tries to tell Gordon that the accent is on the second syllable, but gets cut off.
* The Batman Adventures has lost the ability to read her medications; they can't, he can't, and then Batman shows up, saves her life and his loyalty to Scarecrow apparently wavers pretty quickly.
* The Batman Adventures has reformed and is starting a romance with his lawyer Grace Lamont. Joker hints to Harvey that Lamont is dating Harvey's friend Bruce Wayne, and is just seeing Harvey out of pity. Then he gets his assistant Harley Quinn to leak to a newspaper that Lamont is planning to marry Bruce and delivers the newspaper to Harvey. One breakdown, jailbreak, attempted murder and broken heart later, Batman asks the Joker why he caused such a horrible disaster. His response?
* The Batman Adventures, he trounced and disarmed a burglar. He actually was a kiddy TV show host (his happiest days), until his live show was attacked by some terrorists and he discovered how proficient he was at combat by engaging them head-on and handily winning. His TV career ended that moment, and he discovered that being a nicer guy than Ned Flanders didn't stop him from being a freakin' great criminal, ultimately joining Mastermind and the Perfesser to form the Threatening Trio.
* The Batman Adventures: In Issue #15 of The Batman and Robin Adventures, Dick Grayson foils the attempt on the life of Boston Brandt a.k.a. Deadman.
* The Batman Adventures is also partially a Start of Darkness story, this time for Harley Quinn. It explains who she was and how she ended up with the Joker.
* The Batman Adventures riot breaks out, during which the trio slip away unnoticed.
* The Batman Adventures, the Joker throws Harley out of a fifth-story window for the terrible offense of being better at killing Batman than him.
* The Batman Adventures, then lands on the back and perches on the rear bumper to tagalong with the gangsters to where they are going.
* The Batman Adventures when dozens of overeager teenagers start "auditioning" to be the next Robin.

* The Batman, Alfred has said this about Bruce on two occasions. In one episode, where Bruce has to cancel a blind date and sends Alfred to apologize, the date asks if Bruce is married. Alfred replies, "Yes... To his work." In another episode, Selina Kyle sighs and asks Alfred if Bruce Wayne is married. Alfred replies, "Only to his job, Miss Kyle."
* The Batman: Although not a strict example, Batgirl is dismayed to discover that Batman knows everything about crime in Gotham city, but wasn't even aware the college they were staking out is the college she now attends. Or that she had already graduated high school.
* The Batman And Robin Adventures, slips on it and falls, allowing the Caped Crusader to haul him back to Arkham.
* The Batman, and was then exposed to the villain's Joker Putty, turning him into a clay-like monster. The whole experience drove him mad and turned him into this continuity's version of Clayface, who was more than capable of murder.
* The Batman, a new vigilante named "Rumor" starts catching and imprisoning all of Gotham's supervillains. To avoid this fate, The Penguin tries to get arrested by Batman, only for Batman and Robin to ignore him as he pretends to steal a priceless painting.
* The Batman are among some of the most well-regarded things in the show due to boiling them down to their most basic natures and then adding elements that made them stronger characters.
* The Batman are an army of robots. They are defeated twice by this: the first time by a self destruct code that had been built into the various parts they were made off. The second time they were defeated by a signal to their mothership ordering them to go offline.
* The Batman barging in on your 'gas all of Gotham' schemes, do you?" he shouts.) However, this attitude was dropped the second time the two villains met when they and the Riddler developed a rather dangerous rivalry.
* The Batman, Batman attempts to wipe the Joker's makeup off to identify him, but it doesn't work.
* The Batman, Batman defeats Sinestro by stealing his ring off his finger.
* The Batman". Batman first defeats Clayface by throwing a freeze-bomb at him. When he tries it later, Clayface said he saw it coming and just made his body hard so it bounced off. Then Detective Yin does this after pretending she was going to shoot him which prompted the line:
* The Batman: Batman vs. Catwoman vs. Ragdoll, as they fought over stolen goods.
* The Batman, Batman wields chainsaw tonfas at one point to fight Poison Ivy's plant monsters.
* The Batman be a nuclear explosion because he didn't absorb enough radiation, he would just let out enough heat and radiation to destroy most of Gotham. Then he tried to use it to set off an actual nuclear reactor.
* The Batman begin dressing as Batman and assaulting people who commit minor infractions (And his Batmobile is a go-kart...). Security camera footage shows a guy missing when he tries to throw a can behind his back into a trash can, the Joker swoops in on him and drags him screaming into the shadows. In that same Batman cartoon, The Joker poisoned the mayor's wife for having too many items in the express checkout lane at a supermarket.
* The Batman between Batman, Catwoman, and Ragdoll take place inside the Gotham clock tower over two legendary jewels supposedly hidden inside it
* The Batman, Bruce Wayne is targeted by Cosmo Krank for leading a campaign to get his unsafe toys removed from the market. The Gotham police department insist on assigning him a bodyguard, who he has to dodge in order to suit up and fight crime as Batman.
* The Batman Chronicles, a killer nicknamed the Mimic tries to pull this stunt on private eye Jason Bard, using his facility at imitating voices to make it sound like Bard's client is calling for help. At the last moment, Bard realizes what is going on and shoots the correct target.
* The Batman counterparts, the armor he and his men are, as well as the stuff and architecture he uses, are based more on Roman than, as his last name implies,

Greek.
* The Batman: D.A.V.E. does this in "Gotham's Ultimate Criminal Mastermind", interrupting Gotham's television broadcasts to announce that it is about to launch Gotham's ultimate crime wave.
* The Batman did it with the appropriately titled "Superman Story Part 1". Clark attempts to ask Lois to see a boring documentary film. She brushes him aside, claiming she needs to wash her hair.
* The Batman: Donnie, the who becomes the Joker's sidekick Prank in "The Apprentice", suffers from this, and manages to empty an entire comedy club with his lame material. The Joker seems to like his stuff, however.
* The Batman entirely ruined. The suits were vacuum-sealed. The entire reason the cave stayed up was that it had braces made of titanium, which is famous for resistance to corrosion, that also had a message stored on them in binary since Batman knew the computer wouldn't keep working, and the largely intact Batmobile was presumably made of the same material.
* The Batman entitled "Cash For Toys" revolved around a toymaker who made incredibly dangerous toys, chief among them a flying platform that took one poor kid flying for miles and left him stranded atop some power lines.
* The Batman episode "Batgirl Begins: Part 1" begins with Batgirl being attacked by Batman and Poison Ivy, and the rest of the episode, as while as the next one, detail how she got there.
* The Batman episode "Call of the Cobblepot", The Penguin, in his civilian identity of Oswald Cobblepot, tries to enter one of Bruce Wayne's parties. Alfred says he's not on the list. Penguin retaliates by stealing the list and then robbing everyone who was on it, one by one.
* The Batman episode "The End of the Batman", Wrath and Scorn invade the Batcave and start blowing everything up. Wrath boasts that Batman and Robin are finished, but Batman says, "You forgot one important thing: home court advantage." He uses a device to summon a swarm of bats that overwhelm Wrath. Meanwhile, Robin gets a training robot to surprise attack Scorn.
* The Batman episode "The Laughing Cats", the Joker, having recently acquired his hyenas, sets them on Catwoman. Selina instantly befriends them while lecturing the Joker that Hyaenidae are more closely related to felines than canines.
* The Batman episode where the nanobot-enhanced Joker 2.0 learns to increase his size by changing objects into nanobots, becomes a giant, and decides to destroy both the original Joker and the heroes, leaving the city free for him to ravage.
* The Batman-esque Batman in battle against Mr. Freeze. When it becomes clear that Batman isn't as efficient as he used to be; Nightwing suggests maybe it's time to pass the torch. Batman however, being the stubborn bastard he is, replies that he would pass the torch when "the mission" (i.e. to ensure Gotham's protection) is over, to which Nightwing dryly notes will never happen.
* The Batman feels the shock, Batman answers "Yes" to Riddler's question about Batman being a cop.
* The Batman. Fortunately, after this he resets things to before he commits the crime that got him sent to prison in the first place and reforms.
* The Batman: Francis Grey's complaint about his 17 year sentence for stealing a small item:
* The Batman. Gotham’s complete reliance on Batman to stop crime is regarded as a black eye by the police, and has lead to Gotham being rated “America’s scariest city.” As such Batman has to deal with occasional police interference, and one cop is suspended for being too sympathetic to the Bat. This is worked out by the end of Season 2, and the trope is played straight after that.
* The Batman had the Kabuki Twins, the Penguin's two female bodyguards. The above-mentioned Mercy Graves also appeared as Luthor's bodyguard in a later episode. The final season also introduced attractive female sidekicks for Mirror Master and Firefly, despite both villains generally working alone in the comics.
* The Batman has an episode where he and Batgirl keep getting snatched from them (or dropped) the antidote that will cure the three villains.

* The Batman has Black Mask's thugs organizing their boss's liberation from the GCPD. As soon as Black Mask is free, he electrocutes his right-hand man and hands the reins over to a random goon.
* The Batman has just returned from a trip to eastern Asia where he acquired two ninja-like bodyguards wearing kabuki masks that he loves to flaunt
* The Batman, he's able to knock out the Penguin by throwing a serving tray; seems he learned a few things from watching Bruce use a batarang.
* The Batman: hilariously subverted in an early season 1 episode. In a reference to the 1989 film, Bruce tells his speeding Batmobile to stop, but has to dive out of its way. He even remarks that he needs to work on the brakes.
* The Batman: In "Artifacts", roughly a thousand years after Batman's time, people find the Batcave and try to find clues on how to defeat the immortal Mr. Freeze. Batman's computer has degraded beyond use, but they discover binary code etched into the titanium walls, that when translated becomes all of Batman's data.
* The Batman incarnation. The access to the Batcave is behind a coin-op games cabinet instead of a clock. The series' aim was of Batman in his early years (with the first episode being Bruce and Alfred looking back, having been 3 years since Bruce became Batman.) He does become darker and more serious as the series progresses, however.
* The Batman in exchange for all of their knowledge. By the time Batman and the Justice League found Strange, he was a vegetable.
* The Batman inform Bruce that according to the invitations that were sent out, he's hosting "A Farty."
* The Batman in which Spellbinder brainwashes several rich people's butlers (Alfred included) to steal for him is actually titled "The Butler Did It".
* The Batman is an AI supposedly designed to do this, apparently created by combining the brainwaves of Batman’s entire rogues gallery. When told about break-ins at a chemical plant and a pillow factory on the same night, it immediately figures out that the Joker is going to bombard Gotham with chemically-laced feathers to “tickle” everyone to death. When it inevitably turns rogue, it uses the same skills to uncover Batman’s secret identity.
* The Batman is primarily so one of the most famous people to don the cowl can interact with the current holder of the mantle.
* The Batman (it was actually from a weird chemical Joker injected into him that made him start to act like Joker).
* The Batman, Lex Luthor uses one of these (in sepia tone) to describe his vision for the world.
* The Batman (like his intended victims did) if he hadn't let his pride bring him to ruin.
* The Batman like the Penguin at all, and tends to do anything he thinks can help Batman when the villain shows up.
* The Batman looks competently different than he normally does, sporting long hair styled into dreadlocks, red eyes, large jagged teeth, and even wearing a straitjacket when he first appeared.
* The Batman major characters are sporting them, and the mystery of who he is is kept alive a bit longer.
* the Bat-Man mixed in as well. Then he got his own backstory, decided he didn't like guns, recruited a kid sidekick, and generally became his own person.
* The Batman more of the clay that created them both than Bennett did. Also, unlike Bennett, Karlo didn't have to worry about losing control because he didn't care.
* The Batman (most notably the pilot episode), but for the most part they were used to set up the villain's evil plan for the episode.
* The Batman, Officer Bennet suffers a Freak Out when he gets captured and mentally tortured by the Joker, followed by getting exposed to chemicals that turn his body into morphable clay. After spending two seasons as the good friend of main character Bruce Wayne, Bennet becomes the villain Clayface after the two-part season finale that focuses around this event.
* The Batman or Vicki Vale. There's no Batmobile, and the dynamic duo instead drive around in an unmodified Cadillac in the first serial and a Ford Mercury in the

follow-up (again, largely owing to the low budget). Perhaps most infamously, there are jarring propagandistic overtones in the first serial, with the narrator using anti-Japanese slurs and even attempting to justify the U.S. government's internment of Japanese-American citizens.
* The Batman. Others found him the funniest Joker yet and quite terrifying.
* The Batman - Penguin sets up a team of himself, Killer Croc, Firefly, Ragdoll and...Killer Moth.
* The Batman, "Riddler's Revenge" retconned that the season 2 episode "Riddled" was in fact not Batman's first run-in with the Riddler, as "Riddler's Revenge" contained a flashback that showed Bruce had a run-in with a a pre-costumed super villain Edward Nygma, who went after a former boss before "Riddled" and this meeting inspired Eddie to don the trademark costume.
* The Batman, Rupert Thorne attempts to bribe Batman by offering him a percentage of the profits he's gained from his crimes. Batman, of course, doesn't accept the bribe and turns him in like any other criminal.
* The Batman, Scarface seems fond of intentionally invoking this trope, redirecting insults directed at him onto the Ventriloquist, which largely works due to the weird "who's in control?" nature of their relationship.
* The Batman's continuity) belonged to Alfred. An interesting look at how perfectly reasonable assumptions on the part of archaeologists can be way off base.
* The Batman. Season 5 is more or less a Justice League show that occasionally features Batman characters.
* The Batman's Harley Quinn episode, the way the viewer can tell that Harley's returned sanity is fleeting is when she starts laughing maniacally.
* The Batman", she tackles him and sends them both flying off the roof of the building they were fighting on. Catwoman stays on top of Batman as they fall, and when they crash into the roof of a lower building Batman takes the full force of the fall while softening Catwoman's own landing and allowing her to land on her feet.
* The Batman. Specifically, the episode JTV opens with him doing this, and blaming the lack of publicity his crimes get on everyone being glued to the TV.
* The Batman states Alfred couldn't be older than 60 when Bruce had been Batman for ten years.
* The Batman Superman, although it doesn't help much aside from providing a distraction.
* The Batman. Thankfully, it got a lot better with each passing season.
* The Batman that the statue really contained a data disc within it that contained the Yakuza's secret family chart), causing Katsu to believe she was sent by a rival family. Catwoman nervously tried to give it back when she found out that was the case; fortunately, Batman was more willing to listen than Katsu was.
* The Batman, the Cluemaster lives in his mother's basement, and she seems completely oblivious to his criminal — and horribly sadistic — plans of revenge. In fact, she seems to have lost touch with reality over the years, seeing nothing odd in the least when Batman — in full costume — comes in to ask about him, regarding him as just another visitor.
* The Batman: The Joining are a race of alien robots that destroyed their creators and have since traveled the universe attacking planets and stealing all the knowledge and technology they can to make themselves smarter and more powerful before wiping out all life on the planet and moving on. They had already ravaged half the galaxy.
* The Batman "The Joining" Part 1, Batman and J'Onn J'Onzz are able to interrogate the severed head of Lucius Fox's robot duplicate. "In order to nod you need a neck"
* The Batman: The Joker and the Penguin have a pair of henchmen who never speak.
* The Batman the Joker does this twice: first against some big game hunter who hired him to steal an endangered species of leopard for him to hunt. Joker brings him the leopards, receives a pair of hyenas in return, and then immediately gasses the hunter so he can use his range to hunt Batman. Later, he eventually does this to Wrath and Scorn, who fail to realize that just because they think they're helping criminals doesn't mean Joker wants them to do his job for him.

* The Batman; the narrator actually refers to him as "the sinister Jap, Dr. Daka" and speaks glowingly of when "a wise government rounded up the shifty-eyed Japs" of Gotham City's Little Tokyo.
* The Batman to extract the location of a kidnapped detective — and then promptly forgets about the detective and instead spends his time studying Joker's psyche. A later episode even has him curing Ventriloquist, and then driving him right back into insanity as a "test".
* The Batman to kidnap Yin. He first slips a flyer for a pizza place under the door to her apartment (with a coupon); when she comes home from work, she's too tired to cook and decides to use it. She's suspicious when the operator says there's a "fifteen-seconds or it's free" offer, especially when it seems he actually gets there on time. Unfortunately, by then he has the jump on her.
* The Batman to the other police, who considered Batman as much of a threat as the villains he fought.
* The Batman tries to hand himself over to Batman because an even more dangerous vigilante named 'Rumor' has begun attacking Gotham's criminal community. Everyone knows that criminals who cross Batman end up handed over to the police and arrested, but criminals Rumor targets are abducted and never seen again, so Penguin decides a jail cell is the safest place he can be.
* The Batman value came from the data disc hidden inside it which charted the clan's hierarchy and business contacts.
* The Batman version of Clayface. Just using his powers turns him insane and monstrous.
* The Batman vs. Dracula: Most of those bitten by Dracula or his vampire victims have marks on their necks, which clues in Bruce on what exactly he's dealing with and taking steps to find out how to combat it.
* The Batman vs. Dracula: Penguin does one of these when Joker shows up in Gotham cemetery.
* The Batman vs. Dracula pushing into a PG rating. Subsequent airing on the channel have a TV-PG rating.
* The Batman vs. Dracula shocks Penguin and tosses him into the river, Penguin recovers just in time to see Batman swing after a retreating Joker. He nearly drops the trope name:
* The Batman vs. Dracula, the titular Dracula proves just how much he outclasses any threat previously seen in Gotham when he enslaves Joker and Penguin, the two most dangerous criminals the city has to offer. First, he hypnotized Penguin into becoming his human servant and turned Joker into another vampire minion.
* The Batman was that seemingly every villain was an expert hand-to-hand combatant, including traditionally poor fighters like Joker and Penguin. This was toned down as the show went on (for better or for worse), although it always existed to some extent.
* The Batman wears a black leather one. Oddly, Joker of all people seems to wear one under his tux.
* The Batman, we get the line, "Only Alfred sounds that much like Alfred."
* The Batman. When Alfred talks to Bruce's latest stood-up date (Selina Kyle), she asks if Bruce is actually married. "Only to his work..."
* The Batman, where the simple theft of a watch escalates into a tumult of destruction that lands the thief in prison for seventeen years.
* The Batman where Yin tells the Joker to freeze. The villain points a sprayer containing the last of his Putty formula at the captive Ethan Bennent:
* The Batman with a split-screen shot of Batman and Catwoman dressing up and driving out/hopping on rooftops to the same spot at the same time to confront the same villain.
* The Bat reveals in the end that the man who introduced himself to Cornelia in the first act as the detective Mr. Anderson is actually the Bat, who beat up the real Mr. Anderson and tied him in the garage.
* The Battalion Dance, has this as a major theme — basically, civilian wives going overboard with their "power" which they supposedly had because of who they married. Chaos ensued.

* The Battanians are Western Europe Celts who opposed the Romans, specifically those of the British Isles (the Irish, Welsh, and Picts), with some influence from the pre-Roman peoples of Thrace as well. There is also influence from the Celts of the later Medieval Era, such as their skilled archers (which the Welsh were known for), and them wearing tartans.
* The Batten twins, Brad and Bart in 1980s Central States promotion and WWC. They were actually baby
* The batteries in your smartphone are dead and you lack a charging cable.
* The battering ram is of the sheep variety. Fun fact: This pun also works in Latin (and several other Romance languages). "Aries" can mean either variety of ram.
* The Batter of the Bulge and assures her it's not because of the food.
* The Battery contains a scene in which one of the main characters begins masturbating at the sight of a not particularly horribly decayed female zombie that is ineffectually trying to break into his car, smooshing her breasts all over the door window in the process.
* The Battery's Down which means he needs he "needs another fucking drink".
* The Bat: The Bat wears a featureless mask (although up close it can be seen that it has eyeholes). This causes witnesses to describe him as being without a face.
* The Bat, the title murderer uses a small blade to cut a hole from a glass-paned door, which he then unlocks and opens by reaching inside.
* The battle against Pain, where they'd spend an entire chapter or two on the fight itself while the whole time,
* The battle against the Seekers of Darkness is this several times over. Sora get to team up with fellow Keyblade warriors to face against previous villains of the series for the final time. Special mention goes to the Saïx fight. After a brief stint where Kairi and Lea help you, the two are replaced by Roxas and Xion. Xion, the girl whose
* The battle at Blackrock Spire after the failed siege is probably a better example. While the Alliance has indeed pushed the Horde back to the Spire, the Horde still had a chance to strike. Orgrim Doomhammer hoped that killing the supreme commander of Alliance forces, Lord Anduin Lothar would cause the Alliance forces to lose faith and be crushed. For a moment, it nearly happened. Then Lothar's
* "The Battle", at least; he already knew that there was no money to be made, and only acted after Riker presented evidence that Bok was insane.
* The battle at Pilot Knob ended with the union soldiers blowing up their cache of ammo and powder, and evacuating the fort under cover of night and rain wearing confederate uniforms.
* The battle at Seireden between the Flame Hazes and Crimson Denizens lead by the Snake of the Festival in the final season of
* The Battle at the Binary Stars, which kicks off the Federation-Klingon War. While not quite in the scale of some of the battles in
* The battle at the Northern Water Tribe counts too. Aang managed to demolish a majority of Zhao's fleet (which is approximately half the Fire Nation Fleet), but by the end of the battle, the Northern Water Tribe suffers heavy losses. Their city is heavily damaged, many lives were lost, and as a result, are in no condition to fight the war.
* the battle between Clark, Nam-ek and Faora-el, Normal handguns aren't able to even faze the Kryptonians, but gatling guns are probably the most powerful machine guns ever created, and while they're durable enough to withstand the bullet impacts without damage, they follow the laws of motion and conservation of energy, and send the Kryptonians flying a short distance away. Later, Faora gets hit with a high-speed homing missile dead-center in her face, which was enough to send her flying a considerable distance, and knocked her out, showing that they have their limits.
* The battle between the Fantastic Four and Doctor Doom is seen as the absolute worst point of the movie by critics, featuring a lot of CGI that is pieced together incomprehensibly in a weirdly-choreographed and forgettable climax.
* The Battle Cats: Bermuda is one of the stages. The enemy base is shaped like a crashed plane, and the treasures you get in the Bermuda stages are either Recording

Boxes (Empire of Cats) or Hurricane Winds (Into the Future). Also, Bermuda in Into the Future is underwater.
* The Battle Cats in battle, get wallet upgrades through the Cat Capsule and get all the treasures which increases your max wallet capacity, the maximum capacity of your wallet is $16500) making him a huge waste of cash should you try to use him in a battle.
* The Battle Cats is to take over the world so that they can go back to the past and free all of the cats stuck in the lands of legend. This is also exaggerated in that, aside from the world, they also conquer the future (which is overrun by aliens) and the entire universe (up to and ,somehow, including the Big Bang itself)
* The Battle Cats, many enemies have at least one variant of themselves later in the game. The most common are Red, Alien, and Zombie type enemies, with the remaining being Angels, Metal, Black, etc.
* The Battle Cats, Package Doge has "Wamazon" for "Amazon", and in Dogumaru's description, it has "cBay" for "eBay".
* The Battle Cats possible with the normal Cats due to their high cost.
* The Battle Cats that can sometimes outclass Ubers might have something to do with it as well.
* The Battle Cats that lets it come back from an otherwise-fatal attack.
* The Battle Cats. The Alien variant, named I.M. Phace attacks by opening its mouth to extend a smaller head on his tongue to bite the enemies.
* The Battle Cats, they only come out one at a time and by this point, it’s most likely that one has the cats needed to beat them with little to no effort.
* The Battle Cats where in their names make no sense whatsoever. Examples include “Revolving-Door Floats”, “Gestalt, Decay”, “Chupacabra Love” and “Blockchain Twilight”
* The Battle Cats, which is quite possibly the strongest enemy in the entire game.
* The Battle City rules themselves count as this. The rules used in the show were deliberately moved closer to that of the real life TCG with no greater justification than "Kaiba changed the rules for his tournament". If the new rules had just been for Battle City, it would be one thing, since tournaments sometimes use
* The Battle Didn't Count, to appear dead but actually survive, and then destroy the PC party via manipulation from a place of complete safety.)
* The battle episodes "Blackwater" and "The Watchers on the Wall" are both marked by their interplay of awesome action and quiet drama to underline the high stakes and immense cost of such carnage.
* the Battle for Earth. And that's after pulling two seemingly impossible maneuvers in a shuttle: successfully launching off a ship in FTL (normally suicide) and then pumping all of the shuttle's power into a single powerful burst of speed that should have cracked the shuttle like an egg.
* The Battle for Earth", they find the opposite — Earth's landscapes have replaced the Digital World's own sky, and different portions of the Earth continue to make up the "sky" for the rest of the Dark Masters arc.
* The Battle for Middle-earth and fielded nothing but infantry will have more than maybe a few thousand troops between them.
* The Battle for Middle-earth does not have regular swordsmen. Instead, they have peasants whose job is to repair damaged structures. One of the researchable powers arms the peasants, turning them into fairly competent militia. This is not temporary, however. Since armies carry over in the campaign, these militia show up again already armed.
* The Battle for Middle-earth game, Mountain Giants are a unit for the "Corrupted Wild"/Goblin side. They are even bigger than Trolls, and due to their attacks of throwing boulders seem to be the same type of Giants listed at the top.
* The Battle for Middle-earth had numerous formations to be used in the game, depending on the unit. Some were only capable of an effect-less loose formation, but numerous real formations such as wedges and shield walls could be used on other units.
* The Battle for Middle-Earth II change units' formation. Shield wall and porcupine

formations did make an appearance as the other only possible optional formations for a few units to take - two for the former, one for the latter.
* The Battle for Middle-earth, with units and powers based on the Peter Jackson films, one of the Tier 4 Ring Powers for Men is Army of the Dead, which... summons an army of the dead. Aragorn gets a smaller version of this as his Level 10 ability.
* The Battle for Spain: The Spanish Civil War 1936-1939 by Antony Beevor was published in Spain, in translation, before it was published in English. Books about the Spanish Civil War by foreign authors are popular in Spain: they are seen as being less likely to be biased than books by Spanish authors.
* The Battle Fortress, IFV, Humvee and the many other forms of it in
* The Battle For Wesnoth are described directly as 'warrior monks' in the in-game description. While mainly Western-style, the no-religion-in-Wesnoth rule dictates that they gain their power not from any divine source, but from adherence to the philosophy of good itself. Although they are not as tough than their more mundane counterparts, the Grand Knights, they are faster, have basic healing abilities and are wield an Arcane-power infused attack that makes them extremely effective in combating Undead entities.
* The Battle For Wesnoth is called "Under the Burning Suns" and the new day/night cycle becomes an important game mechanic.
* The Battle For Wesnoth you will encounter a Toll Bridge, where you must pay Troll.
* The Battlefront games are at least nice enough to let you kill AT-ATs with
* The "Battle Hymn of the Republic" and similar hymns about the Second Coming come off as this to non-Christians. If you aren't prepared for it, an upbeat song about the end of the world is rather disturbing
* "The Battle Hymn of the Republic" ("Mine eyes have seen the glory of the coming of the Lord") took its melody (and some of its lyrics) from the Civil War marching song "John Brown's Body".
* The battle in Smallville not only involves Supes and the other Kryptonians fighting in a populated town smashing through inhabited buildings with reckless abandon, but the US military fires
* The battle in the first game is a ludicrously short-ranged one for the setting; the Citadel flagship is actually unable to bring its main weapon to bear fast enough before being overwhelmed by smaller enemies much lighter human Cruisers take out in a single shot.
* The battle in which Sauron was originally defeated shows his orcs as a
* The battle itself also had a last stand within a last stand: the Sikh signalman, the last soldier still standing, defended the signal shed with his bayonet, singlehandedly killing eighteen enemy soldiers. The tribesmen could only kill him by setting the entire signal shed ablaze since no one was willing to go in and fight him.
* The battle near Earth is possibly Justified. The space battle isn't really supposed to destroy the Reapers, but rather to distract them long enough for Shepard and
* The Battle Nexus fighting tournament draws in combatants from all over a multiverse that appears to be a sort of different multiverse concept.
* The Battle of 73 Easting became this during the Gulf War. The American M1 Abrams was
* The Battle of Adrianople in 378 AD was this for the late Roman Empire. Emperor Valens led an army of 20,000 Goths to put an end to the uprising that had plagued the region for two years, and decided to attack them immediately instead of waiting for the Western Roman Emperor Gratian, as he was jealous of Gratian's successes in the Western Roman Empire. The battle was a disaster, with Emperor Valens killed, two thirds of the Roman army destroyed, and the Goths free to pillage as they went. While Rome had suffered bad defeats before, the aftermath showed that Rome could no longer impose treaties on barbarians as they used to, as the Goths were given a de facto kingdom in Thrace and were never assimilated. As a result, many historians now believe Adrianople marked the start of the problems that would ultimaetly

destroy the Western Roman Empire in the fifth century.
* The Battle of Algiers: Ali La Pointe allows the French to blow him up to avoid capture.
* The Battle of Algiers the random Algerian nationalist being executed gets this, thereby inspiring Ali La Pointe.
* The Battle of Algiers Turns out the gun wasn't loaded because they were testing Ali-La-Pointe to see if he was a spy; fortunately he's able to escape.
* The Battle of Algiers was banned in France until 1971 for its criticism of France's human rights violations during the Algerian War of Independence.
* The Battle of Antarctica in the TV movie/two-parter "Lost City" is all about America
* The Battle of Aspern Essling was a similar area for the Austrians. They had just defeated Napoleon in person, they controlled the opposite side of the Danube, and they could easily have either forced another defeat by attacking the French on the Lobau, or make another slogging match against them. However, the failure of Archduke John to arrive in time allowed Napoleon to win a major victory at Wagram securing the victory in the war, and ruining a serious chance to have the rest of Europe rise against him.
* The Battle of Attu, often called the Forgotten Battle, was the only major land battle to take place in North America during the war, and the only one in the Pacific Theatre to take place in winter/arctic conditions. Imperial Japan had seized the Aleutian Islands of Attu and Kiska in 1942 as a distraction from the upcoming Battle of Midway (the distraction didn't work). The weather was so bad it forced the U.S. to wait over a year before taking back the islands. At one point American troops had to drag equipment through the snow because their vehicles couldn't get through the tough mountain terrain.
* The Battle of Austerlitz. The armies of Russia and the Holy Roman Empire seemed to have Napoleon cornered, at the end of his supply lines, and overwhelmingly outnumbered. However, Alexander I of Russia decided to fight against everybody else's advice. Napoleon proceeded to absolutely crush the Third Coalition, destroying a quarter of the entire army, and leaving pretty much ending the War of the Third Coalition then and there. The battle marked the end of the Holy Roman Empire which had lasted for a whole millennium, as Francis I had no choice but to abolish it because the majority of its territories were in French hands. Furthermore, any chance of possibly undoing the liberal reforms of the French Revolution in the lands of Western Europe already under French control, such as Italy or Holland and some parts of Germany was now impossible, with many of these regions having experienced technical independence from their Austrian overlords for two whole decades, and Austria would find itself bogged down in several rebellions against these regions when they regained them a decade later.
* The Battle of Bailén - the Spanish destroyed three French divisions. Unfortunately, it was so shocking...that Napoleon turned up to sort the mess out in person, and promptly sent Spain into retreat. Even then, although Napoleon sent the Spanish into retreat, it was the first clear defeat of a major French army since he came to power, which (along with the defense of Saragossa) encouraged his enemies to continue their fight. Thus not only did the French army find itself stuck in a bloody war on the Iberian Peninsula for the next six years, but Austria started another war in the following year (1809), leading to the first defeat of an Army led by Napoleon in person at Aspern.
* the Battle of Beldegraine), and seventh wasn't even mentioned there.
* The Battle of Blackwater features no less than four: King Stannis who leads the assault from the very front, and is well-known for being a competent soldier and commander, something he again shows at the Battle of the Wall, Tyrion Lannister, who leads the desperate counterattack against him and proves himself to be quite the strategist and a capable commander, Loras Tyrell, and Tywin Lannister who combine their respective armies into a massive cavalry charge to save the city. Tywin has never lost a war, as he proudly remarks to Arya and is a cunning and gifted military strategist. He is also a
* The Battle of Bosworth Field. The Stanleys, nominally allied with King Richard

III, waited until he was separated from his army and charged the King's Bodyguard in the rear.
* The Battle of Bouvines was another major defeat. The French King Philip II Augustus defeated a coalition of England, HRE and Flanders and
* The Battle of Britain marked the turning point on the European Front, when aerial warfare became heavily stacked in favour of the Allied forces, especially those of the UK. While Britain had stood alone in the face of Germany steadily annexing Continental Europe, this was the battle that well and truly humiliated the Luftwaffe, and cemented the iconic Hawker Hurricane and Supermarine Spitfire as aircraft that helped turn the tide of battle. Joined by Canadian, American, Australian and other allied air forces, the result wasn't necessarily a decisive victory, but one that dealt such heavy losses to the German air force that they weren't able to fully recover.
* The Battle of Bunker Hill during the American Revolution was this in textbook form. It all started when relatively small group of colonial militia had taken their (semi-legal) cache of arms and supplies atop a small hill, and a troop of regular soldiers was dispatched to disarm them. Command hoped that the militiamen wouldn't resist the attempt to confiscate their weapons, and if they did it was hoped that they would quickly give themselves up or scatter when things got serious. As it was, they were determined to resist and had the discipline to hold a line and pick the regulars off in droves as they attempted to scale the hill. The rebels inflicted several times their own casualties on the government forces by the time the hill was taken. It showed that the situation was truly beyond the diplomatic solution everyone had been hoping for, and that the rebels' militia could prove more than a match for the government's troops. General incompetence was astoundingly common throughout the war on both sides, but the most important lesson of the battle was apparently half-remembered at best as time and again British colonials tried directly assaulting the government's fortified positions.
* The Battle of Canary Wharf in "Doomsday" in and around 1 Canada Square (usually just called Canary Wharf) which, due to the
* The Battle of Castillion, the final battle of the Hundred Years War in 1453, also fits the description. By 1452, England had been thrown out of France aside from Calais, and the main priority was to fortify that one region, and keep an eye over the channel. However, the people of Gascony, who had been part of England since 1154 because of the rise of the Plantagenet dynasty, saw themselves as English subjects and urged Henry VI to recapture the province. John Talbot was sent with an army in 1452, which took the French by surprise, having expected a possible invasion to come in Normandy. The following year, the English were utterly crushed by the French artillery, Talbot was killed, an entire army was thrown away, and the battle directly contributed to Henry's mental breakdown, directly resulting in the War of the Roses.
* The Battle of Castillon, fought in Gascony on July 17, 1453, was the last battle of the Hundred Years War and is considered in hindsight to have marked its end. The forces of King Charles VII of France led by Jean Bereau used their guns to decimate the English, killing John Talbot, Earl of Shrewsberry and sending the English army into retreat. The French retook Bordeaux, thus expelling the English from everywhere in France except Callais, and the War of the Roses that began shortly afterward ensured that the English would be too busy fighting each other to launch another invasion of France for decades.
* The Battle of Castle Black is waged between a skeleton crew of men of the Night's Watch defending their primary castle on two fronts: Mance Rayder's wildling horde attacking from the front and Tormund's commando raid from behind. We follow the perspective of Jon Snow and his various friends in the Night's Watch as they struggle to fight off both invasions.
* The Battle of Coventry, where the Jade Falcons attack the planet Coventry in an attempt to salvage some dignity, get hamstrung when
* The battle of Curalaba in 1598 was this for the Spanish Crown regarding the Arauco War. In December 21, a band of Mapuches ambushed and killed the Spanish Governor and all his peerage. News of this attack spread like wildfire among the

mapuche population, leading to the Third Great Mapuche Rebellion that culminated in the Destruction of the Seven Cities where all the Spanish settlements founded south of the Bio-Bio River were burned to the ground. This dealt a fatal blow to Spain's effort of conquering the South of Chile, effectively marking the end the compaign. It was decided the best course of action was just to establish a frontier using the previously mentioned river as a natural barrier. Worth noting this wasn't the end of the war, as conflicts continued at irregular intervals during the Chilean War of Independence and the War of the Pacific. It wasn't until the Occupation of the Araucanía in 1883 that the conflict was brought to an end.
* "The Battle of Demons Run: Two Days Later" he was dying, as he was part of a warrior race and wanted to die in battle. As a result, two other survivors of the war were trying to convince him that he was fine, while he firmly insisted that he was dead.
* The Battle of Dorking (1871) can be considered the Ur-Example of military science fiction.
* The Battle of Dorking. This was written in the aftermath of the Franco-Prussian war, which had shocked Europe with the speed with which Europe's second-largest army was defeated by a numerically smaller but technically more sophisticated foe. This theme ran through the genre.
* the Battle of El Guettar, where it made a impressive debut and helped stop a German attack that included Tigers. In the majority of instances where it could not be employed for this role (due to there being no German armored thrusts to turn away—or, later in the war, much of any German armor at all), it didn't do too badly at indirect fire support and bunker-busting either (though at cost to the barrel life of their guns). The Brits also made use of the vehicle, either with the original 3-inch gun or refitted with a 17-pounder gun (both variants became known as Achilles, though this name is now only commonly used to refer to the 17-pdr equipped variant; the base model with the 3-inch gun is commonly called Wolverine, but this name is poorly attested in archival records and is of uncertain origin).
* The Battle of Endor. Most characters' voices show some controlled degree of strain or alarm at various points, but Wedge is calm and professional from "Red Leader, standing by" to "I'm already on my way out." In
* the Battle of Endor, though he is handicapped by the Emperor's shortsighted orders.
* The Battle of Fei River. Had Jin lost, the Han Chinese could have lost control of China, however, Xie An (who was famous as a great administrator and had little military experience) decided he wasn't going to let Former Qin
* The Battle off Samar, assuming that this intended to buy time for Admiral Halsey's 3rd Fleet to arrive, rather than allow the carriers to escape, and ordered a retreat. In return, Taffy 3 lost a third of their ships (including two Escort Carriers), and only two of their ships escaped damage.
* The Battle Off Samar, three additional battleships, six heavy and two light cruisers, plus eleven destroyers. With Third Fleet hundreds of miles away on Halsey's snipe hunt, Kurita's force was poised to steam directly for the Leyte landings and unleash an unsurvivable naval barrage against the defenseless beacheads and the tens of thousands of Marines and sailors occupying them.
* "the Battle of Georgetown" and seen the White House burn to the ground.
* the Battle of Gettysburg. They did so fully and immediately, and would take 82% casualties from the action - out of 262 men, 47 would stand in line for the next day. Their attack would be the worst loss suffered by any surviving U.S. military unit in a single day.
* The battle of Guadalcanal, starting just two months after Midway and ending into February of the next year, also counts. While Midway shattered Japan's hopes of conquest, this battle essentially showed that they couldn't defend their Empire in the long run. Both the Americans and Japanese committed thousands men and hundreds of ships and planes in a series of battles in and around the island. The end result was the Japanese Army and Navy losing even more men, planes, and ships that they could never recover.
* The Battle of Hattin 1187 to the Kingdom of Jerusalem, which wiped out almost

the whole army of the kingdom. It led to the downfall of Jerusalem itself. Never again were the Franks on offensive at Outremer anymore after the defeat at Hattin.
* , the Battle of Highgarden (also known as the Doom of Kings) is the final battle of the War of the Eight Kings.
* The Battle of Hogwarts puts up a valiant attempt to carry out this trope on the protagonists with some very nasty curses involved.
* The Battle of Hong Kong during the Pacific War. The Japanese captures it from the British on December 25, 1941
* the Battle of Hoth, what was, in the movies, a one-time, fairly cool longshot that happened to pay off - the snowspeeder managing to trip an AT-AT with a tow cable - has now become the de rigeur, recommended means for killing AT-ATs.
* The Battle of Hyrillka is this for the Revenant Crisis, as the rouge Decepticon-Klikiss alliance is left completely broken afterwards and unable to keep up their campaign.
* The Battle of Iwo Jima is the other candidate for the most iconic amphibious assault in
* The Battle of Jena-Auerstädt. The Prussian army had been considered the finest in Europe ever since the wars of
* The Battle of King's Landing features Jon leading all his forces in an invasion of the capital to finally overthrow
* The Battle of Ksar El Kebir in 1578 was this for the Portuguese Empire. With the empire already becoming stagnant, a massive fortune was then spent in amassing one of the largest and most well equiped land armies in Europe at the time, in an attempt by the young Portuguese king to expand their holdings in North Africa. However, they were met by the Moors and their Ottoman allies, who vastly outnumbered them. The Portuguese army fought valiantly, but was utterly crushed, the king missing or dead, and thousands of noblemen made prisoner. Another vast fortune was spent ransoming them back, and, since the king had disappeared without producing an heir, shortly after the country was taken over by the Spanish in a Personal Union, which lasted for sixty years, during which Portugal could only watch as they further lost a great amount of power, colonies, and influence. By the time they got their independence back, the other nations of Europe, with their superior economies and manpower, were well underway in their own discovery and colonisation efforts, and for Portugal there was no going back to their former glory.
* The Battle of Kursk in July 1943 is often cited as the largest tank battle in World War II, though this really depends how you define it. Mark Healy gives what's on the high end of secondary source estimates, which is that the entire Battle of Kursk involved at most 3,489 Soviet tanks and assault guns against at most 2,654 German tanks and assault guns. However, what is called "The Battle of Kursk" actually consisted of two German pincers attacking the northern and southern faces of the Kursk salient, respectively, and over the multiple days of the battle there were seperate fights in different places at different times. Prokhorovka on the Southern Face of the salient was where the largest number of tanks and assault guns fought each other
* The Battle of Kutno: an obscure, early 30es experimental Soviet design created by a visiting German engineer that went nowhere and remained in a single half-finished prototype.
* The Battle of Leyte Gulf, following the Battle of the Philippine Sea, was the Imperial Japanese Navy's final attempt to stop the US Navy. With its carrier forces utterly decimated and reduced to being nothing more than a decoy, the IJN sortied the vast majority of its remaining fleet. The Southern Force was summarily obliterated by a perfectly orchestrated night-time ambush, with a Japanese battleship being effectively executed by a firing line composed largely of the American battleships that had been sunk at Pearl Harbor (and then raised and repaired). The Northern Force, comprised of the decoy (as in, largely empty) carriers were all sunk by overwhelming carrier attack. The Center Force, where all of the true strength lay, received a golden opportunity after Halsey chased after the decoy force without so much as leaving a picket ship in the strait leading to

his landing forces and escort carriers, stumbling upon Taffy 3: half a dozen slow, unarmored escort carriers and a few destroyers
* The Battle of Life, Alfred wants to marry Marion with her sister Grace's approval. Marion thinks the two of them should be together instead and stages her own running away to hope this trope will kick in for Alfred and Grace. Which it does.
* The Battle of Little Bighorn ended with the complete annihilation of Custer's troops. One horse survived, with multiple arrows in it, as did Custer's Crow scouts,
* The Battle of Little Bighorn. The five companies of the 7th Cavalry led by Custer were so severely wiped out that the only American survivor of the battle was a
* The Battle of Los Angeles: In February of 1942, war nerves and a misidentified weather balloon led to US Army anti-aircraft batteries in and around Los Angeles thinking they were under attack by Japanese bombers and firing into the clouds in response. 5 civilians died as an indirect result (3 from car accidents caused by the chaos and 2 from heart attacks), and several buildings and cars were damaged by falling shell fragments.
* The Battle of Lukaya was the engagement that decided the Uganda–Tanzania War. Tanzania's victory there not only opened the way to Uganda's capital of Kampala, but also broke the morale of the Ugandan army.
* The Battle Of Magh Tuireadh relates how Nuada, king of the Tuatha Dé Danann, lost an arm in combat and received a functional replacement crafted of silver.
* The Battle of Magh Tuireadh, the Tuatha Dé Danann "immediately broke and burnt all their ships and boats" upon landing in Ireland to challenge the Fir Bolg for one half of the island.
* The Battle of Maldon: Fragmentary Old English epic poem about a historical battle between Anglo-Saxons and Vikings in the 990s CE.
* the Battle of Manila Bay—the Spanish government wanted a scapegoat for the loss of the war and the remainder of the Spanish Empire—so he was imprisoned anyway, but the conviction was later overturned.
* The Battle of Mogadishu, which was the direct basis of the aforementioned
* The Battle of Mohács in 1526. The battle saw the last attempt of the Kingdom of Hungary to keep the Ottoman Empire out of central Europe utterly crushed by Suleiman the Magnificent, with the death of the last Jagellion king of Hungary and an essential end of Hungary as an independent nation: The Kingdom was quickly partitioned between an Ottoman part and an Austrian part (and an Eastern Hungarian
* The Battle of Monte Cassino, part of the Italian campaign, took four months and 55,000 Allied casualties to secure, and the city was devastated by the aerial bombardment. Ironically,
* The Battle of Moscow. While overshadowed by the far bloodier Battle of Stalingrad, had the Nazis taken Moscow, their chances of winning the Eastern Front and in turn World War II in Europe would have increased. The Slavic people would have been wiped off the face of the Earth in a now Mega Holocaust. Thankfully, the Russians stood their ground and pushed the Nazi invaders out of Moscow, starting their own invasion to Berlin.
* The Battle of Mud and Flame sees the Lannister forces devastated and
* The Battle of Neretva was filmed with an international cast which included Orson Welles, Yul Brynner and Franco Nero. However, the movie was mostly in Croatian and Serbian, and the foreign actors mispronounced a lot of lines, so they were eventually redubbed.
* The Battle of Newhaven and negotiates a ceasefire between the two human space nations.
* "The Battle of New Orleans" was originally written and recorded by Jimmy Driftwood, based on an old fiddle tune called "The 8th of January", but it was
* The Battle of Ortona, where Canadian troops drove out a German detachment based in the town.
* The Battle of Passchendaele, from World War I. Heavy rains and silty, muddy

terrain made this battle a symbol of soldiers' suffering.
* The Battle of Peking during the Boxer Rebellion was this trope almost played straight. The entire city was fortified, and the Eight Nation Alliance was outnumbered by a force several times its size. At the end of the day however, they captured the city and suffered comparatively minimal casualties.
* The Battle of Pelagonia 1259 between Nicaean Byzantines and Latin Empire. At the crucial moment when both armies were engaged, the Byzantine Emperor Michael VIII ordered his archers to shoot in the melee, risking his own German mercenaries. He trusted their heavy armour could withstand the arrows. In the end the gamble paid off: the Byzantines won decisively, and two years later Michael reconquered Constantinople.
* The Battle of Preußisch Eylau (now Bagrationovsk in the Kaliningrad oblast) on February 7 and 8, 1807, was one of the most horrifying battles of
* "The Battle of Ranskoor Av Kolos" separate distress calls from the same planet.
* "The Battle of Ranskoor Av Kolos", that may explain how they reproduce.
* The Battle of Red Cliff at the climax of part two, which could be considered the biggest and most badass battle in the whole film
* The Battle of Red Cliffs, as it's widely believed that if the aggressors hadn't been defeated, the Three Kingdoms period might have ended then and there, which would have had a drastic impact on China's history.
* The Battle of Red Mountain in the 1st Era was a rare victory for the elves. After centuries of domination and expansion out of Skyrim, the Nord army, led by the Tongues (masters of the
* The Battle of Ronnel's Pass, also known as the Battle of Frozen Tears, is widely seen as the greatest defeat humanity suffered in the war.
* The Battle of Rorke's Drift, during which a platoon of around 150 men — a considerable proportion of which were ill — successfully stood off between 3 and 4,000 veteran Zulu warriors for over twelve hours with few casualties... after an army of British veterans had been massacred almost to a man (barely 50 of over 1700 troops) by the army of which said Zulu warriors were but a detachment (one that hadn't seen action) earlier the same day at the Battle of Isandlhwana.
* The Battle of Sadarapat, a turning point in the Armenian-Turkish War of 1918 in which the bigger and stronger Turkish army was bitterly defeated. It was said by historian Christopher J. Walker that had the Armenians not won the Battle of Sardarapat (which won Armenia's independence for a brief period), the word 'Armenia' might today only be an antique geographical term.
* The Battle of San Pietro and his crew made the combat scenes look so realistic that for decades after, people thought that they were real.
* The Battle of Seelow Hights was basically the Red Army's attempts to storm the last fortified barrier between itself and Berlin. They didn't do as well as most of the above examples, but they eventually did it. Berlin itself probably counts as an example.
* The Battle of Sekigahara, the unofficial start of the Tokugawa shogunate that would end the
* The Battle Of Shaker Heights, Kelly and his friends plot to take revenge on the bully Lance by dragging him out of his house at gunpoint and shouting at him in German accents. Lance bawls as he urinates out of fear.
* The Battle of Skalathrax is a strange case for the World Eaters. A siege on a battlegroup of Emperor's Children was stalling, on a planet with a night notorious for nigh-unsurvivable nights that require shelter, one of which was on its way. This caused Khârn, the strongest berserker in the army, to grab a flamethrower and set all available shelters on fire, slaughtering anyone who tried to stop him. The battle descended into anarchic bloodbath as warriors from both sides fled, fought each other over the little shelter remaining, or just attacked whatever was closest to them. Neither side could rightly claim victory, but the World Eaters definitely lost—they'd never been a particularly unified bunch, but their massive losses, combined with the anarchy and resentment that came with a good chunk of those losses being self-inflicted, destroyed the Legion's cohesion. Since then, they've consisted solely of a bunch of divided warbands that mostly

work for other armies as shock troops. The only person who did win the battle?
* the Battle of Sol with the entire industrial and military infrastructure of the system trashed.
* The Battle of Somosierra artillery battery and captured it. This sent the entire Spanish army into a panic and rout when Napoleon ordered an assault by the rest of his army to capitalize on the Poles' absolutely insane display of heroism.
* The Battle of Stalingrad: 230,000 soldiers of the German 6th Army were trapped in the pocket of Stalingrad. Only 6,000 survived the battle and the labour camps to return to Germany after the war.
* The Battle of Stalingrad lasted from summer 1942 to February 1943 without any Christmas truce.
* The Battle of Stamford Bridge (1066), where one Viking supposedly resisted the Saxon troops trying to cross the bridge, holding them off until the rest of the Vikings could prepare for battle. The Viking was defeated by one cunning Saxon going under the bridge and pushing his spear
* The Battle of Stamford Bridge, Harold Godwinson's 1066 battle against Harald Hardrada, had one of these, as the Norwegian forces retreated across the eponymous bridge in order to regroup and prepare for battle after a devastating English attack. As they retreated across the bridge, a lone viking volunteered to stay behind and hold off the English. He took down around forty men on his own, before a Saxon soldier got the better of him by floating under the bridge and hitting him from below with a spear.
* The Battle of Starcourt has Mike, El, and Max cornered inside a Gap store at the Starcourt Mall. Though the creature itself is too big to fit inside the store, it sends in several toothy, tentacle-like appendages to search for the hiding kids. One of the tentacles passes within inches of Mike's face where he's crouching behind a display stand, the "mouth" at the end hissing and shrieking before Lucas distracts the creature with a well-placed slingshot volley.
* The Battle of Stones River (known to the South as the Second Battle of Murfreesboro), which was fought from December 31, 1862, to January 2, 1863, is the scariest instance of a winter battle in the
* The Battle of Tannenberg is considered the worst Russian defeat in the war. Over 170,000 Russians were killed or captured, with their general choosing to commit suicide rather than have to face Tsar Nicholas over it.
* The Battle of Tarawa in 1943, another very famous amphibious assault in the Island Hopping Campaign. The U.S. Marines Corps secured Tarawa Atoll from the Japanese Marine garrison who, as was usually the case, fought almost to the last man.
* The Battle of Tarawa Japanese are alive to surrender, alongside 129 Korean laborers.
* the battle of the Alamo, the commanding officer received a dispatch stating that reinforcements were on their way to him. Some historians now guess that the desperate defense of the fort there was not intended as a last stand, so much as a delaying action in hope that those reinforcements would arrive.
* The Battle of the Alamo, which was a major defeat for the Republic of Texas. Subverted and completely reversed in that the Alamo actually
* The Battle of the Alamo: Wikipedia says "Described by Santa Anna as an 'irregular fortification hardly worthy of the name', the Alamo had been designed to withstand an attack by native tribes, not an artillery-equipped army." Yet despite having a numerical advantage of between 7:1 and 10:1, the attackers took over twice as many casualties (wounded and killed) as the defenders when they stormed it.
* The Battle of the Allia alert the Romans were carried through the city on gilded cushions in the same ceremony. As it happens, Rome would not be sacked again until 800 years later, the first time in 410 CE by Alaric I, then a second time in 455 CE, but at that time Rome had not been the capital of even the Western Empire for more than a 100 years (it was Ravenna, and before that it was Mediolanum).
* The Battle of the Atlantic by Jonathan Dimbleby: the German submarine U-99 was being depth charged for the first time. The commander decided to set an example of calmness by reading a novel. After a while, the radio officer noticed that the

commander didn't seem to be turning the pages. After another while, he saw that the commander was holding the novel upside down.
* The Battle of the Atlantic was a fight between Allied destroyer escorts (soldier) and German U-boats (warrior). The destroyers would act as a single unit to hunt down U-boats that would try to attack their supply convoys. The German submariners measured their success in the tonnage they had sent to the bottom of the ocean.
* The "Battle of the Bastards" features a coalition force of Northmen loyal to Jon Snow attacking Northern forces following Ramsay. This is the first large-scale battle in the show that is not a siege, so we get massive armies clashing in an open battlefield.
* "The Battle of the Bastards". Jon only calms upon seeing his sister Sansa, who ultimately kills Ramsay herself by feeding him to his own dogs.
* The Battle of the Blackwater is waged in Blackwater Bay outside of King's Landing between the reigning Lannisters and the invading army of Stannis Baratheon. It is the first episode to be entirely composed of a single battle, with the narrative following characters on both sides of the conflict.
* The "Battle of the Bulge" began the week before Christmas 1944 and ended in January 1945.
* The Battle of the Bulge in December 1944, was the single deadliest battle for the U.S. Army in the European Theatre of
* The Battle of the Bulge was Hitler's final offensive against the Western Front, an attempt to divide the forces of the Americans, the British and the French in the Ardennes region of Belgium, an effort that ended in failure as the combined forces of the Western Allies broke what was left of the back of the Nazi war machine.
* The Battle of the Bulge was the final decisive battle that erased any sliver of hope for the Germans that they might still win. Hitler hoped to split the Allied lines by dashing for and re-capturing the port of Antwerp. Despite taking the Allies completely by surprise, the Americans were able to hold the Germans off and then push back hard. While the battle was the bloodiest for the U.S. in the European theatre, with some 19,000 killed, the Germans had anywhere from 67,500 to 125,000 soldiers killed wounded or captured. And 800 tanks and armored guns were destroyed. As a result, Germany's last remaining strategic reserve forces were destroyed. The Western Allies soon invaded Germany itself, advancing rapidly through the western half of the country and with the Soviets squeezing them from the other side, the Nazis were finished within 5 months.
* The Battle of the Century, more and more people get pied and are drawn into the pie fight until over 2,500 people are engaging in a close to medium range mass pie fight.
* The Battle of the Century short culminates in a massive pie fight involving an entire neighborhood.
* The Battle of the Citadel effectively serves as this for the Mekon War. While there are a few more skirmishes with the Romulans and Gamilas afterwards, with the Mekon out of the picture and the Citadel recaptured by allied forces, his partners soon sue for peace.
* The Battle of the Coastroad sees Jon leading the Targaryen Empire's forces in Essos in a final showdown with the Slavers Alliance, breaking the power of the Slaver Cities and ending that whole theatre of conflict for the rest of the story.
* The Battle of the Conquerors is a collection of battles that couldn't be made into a story-based campaign. Therefore, the story is narrated by a generic historian.
* The Battle of the Drill and the Siege of the North certainly count, if smaller in scope; both involving the Fire Nation attacking a city, the
* The Battle of the Five Armies, the Ironfoot dwarves have a Roman theme going for them. Their leader wears a helmet with a centurion-style crest and they fight in the turtle formation.
* The Battle of the Forgotten has a generic historian tells the story of each scenarios.
* The Battle of the Gardens, wherein the Galbadian Army and the SeeD forces of

Balamb clash in one of the most memorable conflicts of the game.
* The Battle of the Labyrinth, however, the latest guy to get stranded, Leo, promises that he will stop this curse and be with her forever. It works.
* The Battle of the Philippine Sea, in 1944, became another one for Japan. They had advantages in position, geography, and circumstances (a strong wind that would considerably bolster Japanese carrier attack ranges while reducing the Americans', air bases closer to the enemy to field additional and heavier aircraft as well as land carrier aircraft returning from an extreme range attack on the enemey, etc), and the Americans were in the middle of invading islands that would give America airbases within strategic bombing range of the Japanese home islands. They sent out attack wave after attack wave, considerably more aircraft than they had had at their disposal at Midway, and the wind advantage meant that they were seemingly beyond the range of American reprisal. Only for the Japanese to find out that their pilots, planes, doctrine, technology, and ships were
* The Battle of Thermopylae: Actual events —> unreliable historical document by
* The battle of Thermopylae during the Greco-Persian wars: It (and its sister sea battle at Artemisium) were intended to be holding operations to stall the much larger Persian army and fleet until the Greek city-states could raise their levies and prepare for a counter-attack. Both were technically Greek defeats both tactically and strategically (they only succeeded at stalling the Persians for less than a week and Athens fell as a result), although the over-extension of the Persian fleet in trying to hunt down the Greek one ultimately led to the battle of Salamis, which turned the tide of the war.
* The Battle of Timor in 1942, in which several hundred survivors of the Dutch/Australian defense of the island (mostly commandos from the 2/2nd Independent Company) fell back into Portuguese East Timor and held out there, eventually being withdrawn in January 1943 after keeping an entire Japanese
* The Battle of Tobe, where all the combined forces of the Shadowkhan invade said city in order to confront the Shogunate in the Shadows
* The Battle of Towton, the bloodiest battle fought on English soil, was fought during a huge blizzard, making it difficult for the truly massive late medieval armies to coordinate. Also, because of the severe winds, the Lancastrian archers undershot most of their targets, putting them at an immediate tactical disadvantage.
* The Battle of Trafalgar became this for the Combined Navies in the Napoleonic Wars - the French and Spanish lost almost seven times as many men as the British, and the majority of their active ships-of-the-line. Not only would they never challenge the British at sea again, it gave the British the ability to strike at will at French and Spanish trade, contributing directly to the collapse of both empires by slowly throttling their treasuries. Indeed, when Napoleon was presented with an embroidery of an Eagle strangling a Lion, he said that it should be the other way round. During the battle itself, the explosion of the
* The Battle of Trafalgar is considered one of the most decisive battles of
* The Battle of Trenton, and attacked the Hessian garrison in the town during a storm that included snow and sleet and a driving wind. At least two Patriot soldiers are believed to have died of hypothermia that night.
* The Battle of Tukkayid itself was a resounding example of this trope in action, as the majority of the victories the Clans won in the battle were due to "un-Clan-like" tactics such as Clan Jade Falcon using the unorthodox Falcon Guards who fought with Inner Sphere style tactics. Clan Wolf simply discarded the normal Clan-like emphasis on quick and brutal fights and prepared for a long, drawn-out battle in which they outright suspended
* The Battle of Valcour Island is seen as a tactical defeat but a great strategic victory for the Americans. The fleet assembled by Benedict Arnold for the fight was destroyed without inflicting much damage on the British fleet, but just by fighting the battle Arnold delayed the British advance until late enough in the year that snow was beginning to fall. The British decided not to continue that year, which gave the Americans time to regroup for the Saratoga campaign and may have saved the

entire war.
* The Battle of Vimy Ridge was a WW1 battle that took place in France where the main combatants were Canadian forces against Germans.
* The Battle of Watling Street. Queen Boudica had almost completed her
* The Battle of Winterfell is the final conflict of the whole story, as the combined forces of the Targaryen Empire make a
* The Battle of Wolf 359, from the perspective of a different starship and its captain.
* The Battle of Yorktown featured several German regiments of the French Expeditionary Army, consisting of volunteers/mercenaries from the Rhineland, fighting against German regiments of the British Army, either Hannoverian (British king's German subjects) or Hessians (lent by their German sovereigns in return for British money), plus, of course, German immigrants to America in the Continental Army.
* The Battle on Crait is overall acceptable. The First Order uses proper combined arms tactics, complete with a wing of TIE fighters flying close air support to
* The battle on the plains of Atlas in Volume 8 takes place during the day, with the light actually serving to accentuate the hopeless odds Atlas' troops face.
* The Battle Royale is not only legal in-universe, but it is also used in the Maiami Championship. The only illegal part is that you cannot join in the duel when you aren't participating in another on-going duel. If you do, you get 2000 penalty damage. This might be a special rule for the tournament because people won't get much advantage like Yuya did before. Generally, the Battle Royale Mode is a plot device that allows the writers to break more rules and traditions from the previous series in order to advance the plot or to give their characters more
* The battle royal was revived in the arena of boxing in 19th century America, appearing on the undercard of boxing matches. Before the abolition of slavery, such matches featured five or six black slaves who fought blindfolded and bare-knuckled until either one was left standing or until two fighters remained, at which point the blindfolds were taken off and the fight continued as a normal bout. The practice of the battle royal continued long after the abolition into the early 20th century, with the fighters being allowed to keep their winnings.
* The Battle Royal, where you must toss your opponents out of the ring (over the top rope only) to win. And there are a lot of variations on it (WWE's
* The battles between the Demons and Angels aren't really shown either - the story focuses more on
* The battle sequence in "Spoils of War" is full of this. A Lannister warhost led by Jaime up against
* The Battleship Island: During World War 2, the Japanese island of Hashima contains a coal mine staffed by Korean conscripts. Realising that Japan is about to lose the war and that war crime charges are a possibility, the Japanese managers decide to kill all of the Koreans.
* The Battleship Potemkin: At first the film focuses on the mutiny against the Potemkin's officers, lead by Captain Golikov. After they're all thrown overboard to drown a third of the way in, the Odessa police become the bigger threat.
* The Battleship Potemkin is the navy crew again being given rotten food on a plate that reads the line from the Lord's Prayer "Give us this day our daily bread".
* The Battleship Potemkin, the Russian sailors revolt over being served maggot-infested meat and declare, "Even a dog won't eat this!"
* The battles make use of thousands of soldiers or vehicles taking part to show the scale of it (in most productions made after the late 1990s they will all be computer generated).
* The Battle(s) of Koom Valley, a recurring set of conflicts where dwarfs and trolls would wallop the hell out of each other, largely for reasons of tradition. The source of the conflict (your standard tragic miscommunication with a twist or two) was finally revealed in
* The Battlestar-class Heavy Cruisers also have a small number of fighters. Even the smallish Drazi Sunhawk can launch a single Drazi fighter.
* The Battlestar, delivering smaller raiders (small warships) and fighters (smaller

versions of the raiders) to the battlefield while also featuring a standard weapons payload. They also have modified boarding shuttles with hull-piercing bows, and the small fighters double as personnel shuttles. A "Kazon Frigate" is also mentioned. They, the Romulans and the Klingons (see below) come closest to this trope of all Trek aliens.
* The Battlestar, since they all have (very limited) Hangar Space, but Carriers are required to transport large amounts of Fighters and Bombers. Except Capital Ships all have more space than even Fleet Carriers, because everything about them is oversized.
* The battle the whips were used in was an informal battle. Icchan, the game's creator,
* The Battle Void Arc (Issues 46-49), about Zim and Dib being trapped in a
* The battle was a rout; the winning army chased the losing army half the length of Route 66.
* The Batwoman identity was held in turn by Kate Kane (until her death), Stephanie Brown (until she retired) and Carrie Kelley.
* The Baudelaires, most notably Sunny, who's a baby for most of the series!
* The Bavarian Illuminati in popular culture, many of which reference them by name. Not bad for an organization that failed to outlive its founders.
* The Bavarian town of Herzogenaurach, located about 15 miles northwest of Nuremberg, is today considered one of the greatest laboratories for sociologists thanks to a local family feud that has since expanded to ridiculous proportions. It all started in 1924 when hometown boys Adolf "Adi" Dassler and his brother Rudolf opened an athletic shoe company which is today known as Puma. The Dasslers achieved worldwide fame when Jesse Owens ran in their shoes when he won several gold medals at the 1936
* The Baxter is built around a subset of this trope, in which a straight-laced, stable, and slightly boring boyfriend is dumped for a more exciting and edgy suitor. The main character is a repeat offender who has been "the Baxter" in all of his previous relationships.
* The Bay Boy, the main character witnesses a murder through a store window by a crooked cop, but is scared by the cop into not telling anyone.
* The Bayer Leverkusen squad which finished second in all three of the Bundesliga, UEFA Champions League, and the domestic German cup in the same season was nicknamed "Neverkusen" by the media, even though it was probably the best season in the whole history of the team.
* the Bayeux Tapestry: After scenes that depict Harold Godwinsson being elected and then holding court as king of England, there is a group of people who point excitedly at a flying something meant to represent a comet (as the caption says: "these people are amazed at the star"). In the context of the tapestry, this is an ill omen of the war that is about to be triggered by Harald's coronation, and foreshadows Harold's defeat and death in the Battle of Hastings. Halley's Comet was visible in April of 1066; Harold had been crowned in January, and was killed in October.
* The Bay is this, like the videos left by Dr. Abrams, head doctor who must deal with the outbreak at the local hospital, and Jennifer, a young girl who records the progress of her infection via a Skype/YouTube-like web app.
* The Bay: One of the women interviewed by Dr. Abrams right after the outbreak is a woman named Lamya Jezek... played by Lamya Jezek.
* The Bay The experience scars her so badly that she doesn't film anything else that night, or for the next several years.
* the bazooka fires while setting it down, do. Doofenshmirtz is understandably upset.
* The BBC 1 spinning globe, until it was retired at the start of the century.
* The BBC 2, er, 2, despite the multitude of different idents created between 1991 and 2018. The 2 was tweaked in 2007, making the counterform in the left part of the logo larger.
* The BBC after shooting dead an executioner who was just doing his job. The fact that the show had long since established Robin as a flawless archer means that all

of these deaths could have easily been non-fatal injuries if he had so chosen.
* The BBC. (Although it also stars able-bodied actor Andrew Hayden-Smith as Matt's "inner voice".)
* The BBC always answers a question truthfully, if asked it three times.
* The BBC America rerun rotation of Series 2-10 also averts the trope — by
* The BBC a million years have passed, and it turns out as their expedition never returned with another planet, humanity developed the technology to move the Earth (surrounded by orbiting artificial suns) to another solar system.
* The BBC and is flying it away. It turns out they have enough fuel to catch up, but only after their air has run out. As if that wasn't bad enough, Fagor then sets out from their ship under its own power to finish them off anyway. Fortunately this provides the answer to both their problems - the crew discover that Fagor's master had upgraded the shuttle with plasma cannons, and once they've destroyed the robot they realise they can turn the shuttle around and accelerate backwards using the plasma cannons' recoil.
* The BBC, and manages to predict some of the voice characterization to a spooky degree. (Or they heard about it in the canteen.)
* The BBC and other pirate radio stations, then attempting to pass them off as their own. The BBC ended up catching them when Radio London copied a bit of fake news they had set as a trap.
* The BBC, and still does in countries where the media is censored by the government.
* The BBC, and that the cat isn't keen on the idea), while leaving the actual story as it is.
* The BBC aren't allowed to advertise, so they have to avoid brand names wherever possible. Other channels will only advertise when they're specifically being paid to do so — if they set up the competition themselves rather than being given the prize by the makers as a marketing exercise, it won't be named. Something of an internal
* The BBC aren't immune to this either, though they tend to use their regional newscasters in their shows rather than their national news broadcasters.
* The BBC bar, where its cast of delightful confidence tricksters hang out. They have never paid their tabs.
* The BBC", because under UK law you only have the rights to a trade mark if you've used it as a brand identity for products and services. Not only had the Metropolitan Police stopped using real police boxes by 1969, but they had never used it as a brand identifier in the required way.
* The BBC, Bolingbroke beheads two of Richard's supporters on the edge of a lake, such that their heads fall directly into the water.
* The BBC, but violating the show's format whereby major scene transitions are always accompanied by music.
* The BBC, but widely (and incorrectly) used to refer to teletext services provided by other broadcasters as well. Now obsolete.
* The BBC. Carrying a big reel of tape so he'd be mistaken for an engineer, he walked into Broadcasting House and went looking for an unoccupied office he could take over.
* The BBC comedy radio series Clayton Grange uses 'I Want More' from Can's 1976 album Flow Motion.
* The BBC come to mind. In the BBC version, everything is shiny, more than it would be in the English countryside. In the movie, the Bennets' home is more dirty.
* The BBC commissioned to tie in with the new series, one of them, an Eleventh Doctor story called "Dead of Winter", has a small rhyme that is recalled by Dr. Smith that goes:
* The BBC. Dear God, she usually walked away with whatever she was after and made the alleged heroes look like idiots in the process. Evil, but you just can't help but admire her sense of style.
* The BBC docs, although the latter was always more fond of reusing clips from its own dinosaur shows, primarily.
* The BBC Dotheboys Hall. Smike, the "simple" boy Nicholas befriends and rescues

from the place, becomes a senile old lady named Mrs. Smike.
* The BBC do these with small bars at the bottom or the top of the screen for the next show. Normally doesn't happen on BBC One, but
* The BBC, Dr Alice Roberts used to be notorious for dyeing her hair every possible shade of red or orange, but it seems that with her shows now involving a lot of filming in remote locations, it became too much of a hassle and she doesn't bother anymore.
* The BBC due to his popularity and name-power) would always have one of these. The most famous example was when their editor tried to replace financial news with a weather report ("it's April, what do you expect" was Paxman's "effort" as a weatherman) which Paxman sunk by being sarcastic and condescending when forced to read it, but perhaps the best example was when they tried to set up "Oh My Newsnight" when viewers could submit their own video and get on the show. Paxman was not amused:
* The BBC expressed concern following the scurrilous and seditious popularity of a re-release of "Ding, Dong, the Witch is Dead!"
* The BBC, Fagor just uses its wide-beam lasers to cut through every bulkhead in a direct line to its target.
* The BBC featured celebrities ripping their faces off via CGI to become other celebrities. These were widely criticised—the BBC briefly obtained rights to ITV's "Monkey" after ITV Digital went bust and combined the two, featuring monkeys ripping their faces off and turning into celebrities.
* The BBC, focusing on the life of an average peasant family at a grange in the Welsh-English borderland during the 1620s.
* The BBC had a sketch where he crushed an illegally parked car under a tank.
* The BBC had Satsuma computers, which were derided as spending too much time being friendly, rather than just doing what they're told.
* The BBC has animated characters coexisting with live-action, but there was no distinction intended — the animation effect was apparently due to Japanese influence on the production, leading to odd scenes like live-action characters riding a dragon that was animated sometimes, and a practical effect in other shots. It's a bit jarring.
* The BBC has been trying to avert (and risk enforcing) this trope on radio (and TV) panel shows since 2014, mandating the invitation of female comedians and saying that there is no reason to have all-male panel shows.
* The BBC has traditionally been associated with "Soul Limbo" by Booker T and the MGs.
* The BBC, have a tendency to mistakenly regard any armoured vehicle (especially those with tracks) as 'a tank', which can lead to confusing headlines about the Iraq conflict and so forth.
* The BBC have been using Ireland for the UK in a couple of productions recently, clearly for the tax breaks.
* The BBC in order to obtain an audition by carrying a large reel of tape.
* The BBC instead staging plane crashes for people that didn't pay their licence fee and then having their houses bulldozed, with the slogan "Get a TV licence — it's cheaper than a funeral".
* The BBC in which Mowgli was played by Indian actress Nisha K. Nayar.
* The BBC, in which the player investigates the death of a fictional pop star.
* The BBC iPlayer wasn't made available to the Xbox 360 due to UK licensing laws. Microsoft wanted to lock all video streaming services behind the Xbox Live Gold subscription service but the BBC, if they allowed the iPlayer on the platform, were and still are legally forbidden to charge for UK access to their content as the content charge is already part of the TV license fee. It was eventually averted and the Xbox got their own version that was available to all Xbox Live members including Silver (non-paying users).
* The BBC is 10 miles long and capable of terraforming entire planets. Pity it's ruled by a pair of psychotic computers.
* The BBC is a greasy spoon far away from major space-travel lanes in the year 2999.

* The BBC is part building cool and useful things, and part building really cool and really stupid things, and occasionally deals with all kinds of other manly skills as well.
* The BBC is titled in sarcastic reference to the way disabled people often find themselves victims of this trope.
* The BBC logo since 1997 with the three squares and B, B and C written in each of the squares in negative space. Before 1997 the boxes were slanted and underlined; before that they weren't underlined, but had rounded edges.
* The BBC mainly takes place aboard a starship, with a depleted human crew of four versus two psychopathic computers. In one episode a scheming warlord tries to blackmail the computers into letting him join the crew: he hides a military robot on board that's programmed to activate if his life signs fail. He thinks this is perfect insurance against the computers killing him by sabotaging his cryosleep pod. He's wrong.
* The BBC mandated more Earthbound stories, the Third Doctor's tenure saw him exiled to Earth, where he turned from a cosmic hobo to a debonair action hero alongside an elite military commando team called UNIT. Copious location shooting, spy thriller plots, and excellent stunt work gave the show an entirely different feel to the "base under siege" stories of his predecessor, the Second Doctor.
* The BBC, Marilyn is a newly-promoted London Transport bus controller, whose husband gets held hostage by criminals to force her into manipulating the traffic so they have a clear escape route. To discourage her from going to the police, they've set things up so it looks like it was him who committed the robbery.
* The BBC One ident "Lawn Mowers" (one of the Circles series) has some
* The BBC (one woman was injured doing a human cannonball act, and a car jumping act led to one vehicle crashing into a crowd, and a second landing on its roof and leaving the contestant with multiple injuries). The show was canceled immediately and the scandal nearly ruined presenter Noel Edmonds' career. Lush's death prompted a serious tightening of safety regulations for all stunt sequences on BBC shows and a total ban on dangerous stunts involving members of the public.
* The BBC playing Waldorf T. Flywheel, would often ad-lib in character as Groucho, but not necessarily as Flywheel. On at least one occasion he commented on what had been a topical reference in 1932, and its complete failure to get a laugh in 1990.
* The BBC Quarry is rare in the new series, which especially in its first three series has more of an emphasis on Earthbound stories (and when they do appear, it's accentuated by CGI backgrounds). It shows up for the first time in the Series 2 episode
* The BBC radio Adaption actually uses the "open by other means" as a minor plot point that was absent from the book:
* The BBC Radio forbids product placement or anything that might seem like it in their broadcasts.
* The BBC Radiophonic Workshop quite possibly deserve an entire subcategory of their own. Their task was to create strange sound effects for various BBC productions, but were seen as legitimate mad scientists by the company. The BBC even initially had a policy of not allowing anybody to work in the section for longer than 6 months, out of a genuine fear that it would drive people insane.
* The BBC's 1977 TV adaptation is the most accurate, except in dropping Arthur Holmwood and in the depiction of the count, himself.
* The BBC sent out the broadcast masters of the 2005 series under a codename in an effort to keep them secret. The selected codename was an anagram of
* The BBC's frail Sylvia always has her hair up in a scraped-and-elaborate-yet-somehow-also-messy-and-careworn bun until she's shown beginning to fall for her lodger, Simpson, when suddenly her hair is in a loose plait. When Sylvia finally marries him, her long hair is down altogether under her veil.
* The BBC's frequent radio traffic reports throughout the day are usually sedate and rather predictable things, with the "usual suspects" and bottlenecks throughout the nation popping up with depressing regularity. But one day, the traffic reporter had to make an unrehearsed announcement and she was obviously reading blind from a report put directly into her hand. With clear and mounting incredulity, she

reported that all traffic on a major road in Wiltshire had been blocked by a crashed lorry from which two African rhinoceroses had escaped and were now charging up the dual carriageway playing chicken with the traffic. Police and the RSPCA were trying to contain the situation and specialist help was being sought in order to recapture the creatures. They had escaped from an animal transporter en route between two zoos, apparently. Happily, they were recaptured alive, although no details were given. Damage ran into several tens of thousands of pounds.
* The BBC (specifically, "First Impression Part Two") for the title music and music stings. One wonders if the Beeb knew about the car-bomb lyrics or the "seven virgins and a mule" bit.
* The BBC's policy is actually quite inconsistent. For every instance of a
* The BBC's policy was mercilessly spoofed on at least one episode of
* The BBC's "Rhythm & Movement" idents for BBC One were universally despised for replacing the beloved "Balloon" idents, to the point that their replacement with the "Circle" idents was considered a case of "good riddance" by fans of the prior idents.
* The BBC stars siblings Jeremy and Rebecca Front as the eponymous married couple.
* The BBC's use of Booker T. & The MGs', "Soul Limbo". Also known as the Cricket music.
* The BBC's video-on-demand service, but many people mistakenly use it as a generic name for similar services from other broadcasters such as ITV Player, UKTV Play and Channel 4's All 4.
* The BBC the BBC decided to cut the interview short just when it was getting interesting, because they didn't think the sound quality was good enough.
* The BBC. The broadcaster also formerly branded its interactive services as BBCi.
* The BBC, the death of Intelligent Calcium, or the use of ghosts as laboratory assistants.
* The BBC. The focus was on Dr Barton trying to curtail his increasingly senile father's attempts to thwart entirely imaginary enemies of democracy in a small village, with flashbacks to the elder Barton's glory days. Interestingly, written by the son of Dick Barton's creator, Edward J. Mason.
* The BBC. There's also a very similar publicity photo for the third season involving the Doctor and Martha.
* The BBC there's an episode where the four-person crew of the starship involved in the titular search defeat an evil robot that tried to take over. Having done so they decide it's time to set course for their next destination, but it turns out that they don't have to, because out of all the infinite directions it could have chosen the evil robot randomly selected the very course they wanted to take. In another episode, somewhere in the vastness of interstellar space they just happen to accidentally run into one of the only two other ships in the fleet, just so they can have an adventure on board.
* The BBC. These begin with him crossing the Atlantic in an armchair on surfboards, propelled by two parachutes.
* The BBC. The series was originally broadcast as 26 half-hour episodes, in practice about 27-28 minues in length. A couple of years later the show was re-run as 13 hour-long episodes. Each of these needed to run at least 57 minutes, necessitating the reinstatement of some material previously cut for timing. The reinstated material was kept for home audio releases.
* The BBC. This despite the fact that Smith had already appeared nude on film (and nude selfies had leaked to the Internet).
* The BBC This is an energetically acted song. What makes the clip especially mesmerizing is that Karla is performing in a filmy black top slashed to below the navel in front and open at both sides. She gets within millimetres of inadvertent exposure several times but, perhaps due to strategic tape, never quite gets there.
* The BBC to justify betrayal, or Officer Carter citing Lawrence of Arabia going undercover as a Circassian as justification for one of his operations.
* The BBC to the story, Lestrade mentions that the file on the murder of the man who killed Violet's husband was "lost", and as far as he's concerned will remain so. None of this is in the original story.

* The BBC uses time dilation as a major plot point. The children of a starship's second-generation crew, the sole survivors of a disaster that killed the crew and erased a huge amount of scientific data (including the concept of time dilation itself), return the ship to their home solar system 115 years after it set out, only to find that a million years have passed outside. Oh, and the Earth is missing.
* The BBC was afraid that "Cover of The Rolling Stone" by Dr Hook would be taken for and advert for
* The BBC was put forward, people started to predict terrible things, as the companies would aim at the lowest common denominator. This led many of the stations of ITV in the '60s being as straightlaced as the BBC, for a while anyway. The guardians did have a point when ITV did eventually aim at the lowest common denominator.
* The BBC was well-received, but its sex scenes featuring a naked 'Dr. Who' were considered so shocking at the time that they are what most people remember of the show - the description for it on the BBC's website mentioned 'Tom Baker's thrusting buttocks' and many contemporary comedy shows spoofed it.
* The BBC, which had most of the world population wiped out by a virus which it's strongly implied was artificial.
* The BBC, which went down as one of the biggest disasters in the history of the corporation.
* The BBC with titles like "Fun Food Freeway", "Moonlight Night Flight" and "The Deserted Desert Dash".
* The BBT movie more or less falls victim to this. It's only an 8 round duel, with two of the protagonists only getting one turn. But it's padded into a 1 hour movie due to explaining Parodox and his deck.
* The BB units are essentially seven-month-old human fetuses put in one of those. Unlike most examples, they're not supposed to grow up until they're born: the pod they're in actually stunts their growth. Some
* The BDSM community is likely the only place on Earth where the Joker is considered a supporting character to Harley Quinn.
* The Beach Boys album can be described as a Psychedelic Doo-Wop/ Rock Barbershop Quartet recorded in distinct modules. But you should also add Americana to the mix. And several classical influences, from Bach to Stravinsky and Schoenberg. And some Varèse thrown in at good measure as pertaining to tape experiments. And Phil Spector's production methods (although more nuanced than his Wall of Sound) , folk, classical choir arrangements , circus music, impressionist music, jazz, musique concréte (and in the case of Vega-Tables, this is taken literally), the American-centered compositions of Gershwin, baroque pop, Yodelling and ragtime (along many more), all meant to achieve a "Teenage Symphony to God" that sounds like an ever-flowing painting by a Disney cartoon. One should also mention Smiley Smile, the substitute to the aforementioned album, after its infamous cancelation. Attempting to describe its minimalistic miasma of weirdness and near cynical self-deprecation is almost a disservice to it. Songs like Wind Chimes must be heard to be believed (in stereo is the recommended option).
* The Beach Boys attitude that leads the famously-polite Brian to lose it and finally start screaming at his dad.
* The Beach Boys (began 1961) has outlived founding members Dennis Wilson (died 1983) and Carl Wilson (died 1998)
* The Beach Boys, but by The Regents, which was easily the most popular version of the song.
* The Beach Boys' "Car Crazy Cutie" is an ode to a woman who shares her beau's enthusiasm for automobiles:
* The Beach Boys continued to sing love songs to teenage girls even after they became middle-aged, bearded, creepy men. Not counting the unreleased track "Lazy Lizzy", in which Brian sings about stalking an underage girl, the most pedo-worthy track to appear on a Beach Boys disc was undoubtedly "Hey Little Tomboy" — made even worse by a bootlegged outtake in which the Boys seem bent on gang-raping the title character.

* The Beach Boys don't really help much with discerning what the concept is beyond that, though.
* The Beach Boys filed by the Beach Boys, Van Dyke Parks leaving, Brian Wilson's mental problems and the beginning of his drug problems, and a lack of support from other members (including Mike).
* The Beach Boys' God Only Knows was originally A Day in the Limelight for Carl Wilson on lead vocals. Carl eventually became a much more frequent lead singer from this moment on.
* The Beach Boys: "Had To Phone Ya" has the singer trying to call his lover.
* The Beach Boys have quite a few car songs in their repertoire such as "409" and "Little Deuce Coupe". They even released a whole album of these songs named after the latter.
* The Beach Boys his brother Carl joined the group, in order to entice him to join.
* The Beach Boys is technically this trope. While the band still tours to this day, the original Beach Boys technically dissolved with the death of lead guitarist Carl Wilson and the departure of Brian Wilson and Al Jardine in 1998. Mike Love, Bruce Johnston, and David Marks would attempt to continue touring as "America's Band" but, following several cancelled bookings, acquired the rights to tour under the Beach Boys name. David Marks would leave in 1999, leaving Mike Love and Bruce Johnston as the only original members, with the former being the only founding member left in the band.
* The Beach Boys made of "Help Me, Rhonda" has the repetition of the refrain and the end with alternating stanzas fading out then slamming in at normal range on the ensuing stanzas.
* The Beach Boys quite a bit in the late Seventies. "Roller Skating Child," "Lazy Lizzy," and God forbid, the original, unreleased version of "Hey Little Tomboy." *shudders*
* The Beach Boys sell my vegetables" is a pun on "kartoffel", which is German for "potato".
* The Beach Boys that greatly influenced the eventual Beach Boys release).
* The Beach Boys - "The Warmth of the Sun", "Wendy", "Caroline No", "Getcha Back".
* The Beach Boys wasn't going to make it thanks to Brian Wilson's perfectionism. The last song on the album, a cover of Fred Fasset's "Barbara Ann", became a surprise hit, charting at #2, although not initially released as a single, while the album itself hit the top 10 at #6.
* The Beach Boys, when DJ won tickets to their concert and the whole family was fighting over who would get to go with her.
* The Beach Boys, who wrote such songs as "Surfin’ Safari" and "Surfin' USA," suffered from a lifelong fear of water.
* "The Beach Car", there are some shots where Tulip's number has changed, showing that it can go in both directions. It also hints at what sort of things affect her number.
* "The Beach" explored the dynamics between Zuko, Azula, Mai, and Ty Lee and what makes them tick cleverly disguised as a
* The Beach: In this film, the seemingly idyllic youth community is revealed to be anything but when one of the members is gored by a shark.
* The Beach, Leonardo Di Caprio goes crazy and imagines the world as a blocky videogame.
* The beach scene, where Goemon resuscitates Jigen by giving him mouth-to-mouth. Which Jigen might've had less of a problem with, had Goemon
* The Beach" would be to burn down her almost boyfriend's beach house.
* The Beach wrote the book while living in the Philippines and, in particular, was inspired by similar geography on the island of Palawan.
* "The Beach". Zuko flings off his robe. Doves soar skyward in the background. And a bunch of girls on the beach giggle and coo in admiration.
* The Beacon Civil War is horrified that she will get no cookies, and Yang won't be mad because she's been trying to get Ruby to eat healthy for a while. Ruby caves very quickly.
* The Beacon To Elsewhere, the protagonist has two communicators, and the same

incident stops him using either of them. He's in an area where something is interfering with the planet's power grid; the power failure brings down his flying car. One of his communicators also runs off the grid, so it can't be used. The other has its own power source, but gets destroyed in the crash.
* the Beagle Boys running the police force by switching places with Gyro. At the end Donald wakes up back in Gyro's workplace and realizes it was all a dream.
* The Beak" have Phineas and Ferb rescuing their respective love interests from danger.
* The beam cannons have a 30 km cutoff range, you just don't normally see it because
* The beam divergence problem is exacerbated by the fact that warships are protected against fire from the sides by gravity 'sidewalls' that weaken incoming fire. At ranges of over 500,000 km an energy beam would be too weakened to do any damage. In cases where the target is not protected by a side (which doesn't happen often against an awake enemy) the effective range is about double that.
* The beam-sabre fights in the various shows go back and forth between using this trope and utterly averting it. Most are short and brutal, ending with severed limbs & impaled cockpits and/or reactors, but if both combatants are named characters expect a fair amount of Flynning before somebody finally bites it. The worst offender is likely
* The Beano and its sequel were both Direct to video. These were a number of animated shorts featuring characters from The Beano.
* The Beano and so on, in the good old days when children's comic characters regularly beat each other up to that extent.
* The Beano are based, but not in a lot of English accents. One story lampshades this, with other characters claiming that her title doesn’t rhyme, while she insists that it does.
* The Beano, as Hank decided that the 'mirror' was so good, that he should use it to check out his new hat. After Hank sees his 'reflection' with the old hat, he catches on, and then proceeds to knock-out Pa off-panel, and then disguise as him to trick Ma and Ted into giving him the food back.
* The Beano characters getting up to all the mischief they liked, as long as they were punished in the last panel.
* The Beano comic, The Bash Street Kids' cook, Olive, is notorious for having terrible cooking, including custard so thick you have to cut it with a knife.
* The Beano ended in a way so that the strip was left open to return in the future. But as of 2011 bus has not yet returned to Beanotown.
* The Beano follow or have followed a formula. For example Roger the Dodger always involves Roger coming up with a dodge to get out of something, usually work, and then that dodge fails and Roger ends up doing more work or in the old days getting beaten with a Slipper.
* The Beano, from every ship's captain who encountered him: "Aargh! It's 'im!")
* The Beano, has a cover mounted free gift, it would often be absent when sold in the Republic of Ireland. Probably also applies to Canada and New Zealand.
* The Beano has this as his gimmick. It's sufficiently bad to sabotage any attempt to make his luck better.
* The Beano have had over 3000 episodes. The Dandy finally ended after 3610 issues in December 2012.
* The Beano. He controlled General Jumbo and tried to kill people before being stopped by Billy the Cat.
* The Beano: In a Fatty Fudge strip, some outlaw cowboys say "we've got prices on our heads" whilst literally having some prices drawn onto their heads (well, hats).
* The Beano, in a Roger the Dodger strip, Roger wants a day at the beach but his parents won't agree to it, so he gaslights them by putting washing back in the washing machine and bringing back books that his father already returned to the library so they think they're getting stressed and agree to it. When his dad realises what Roger's been doing by checking the date the book was checked out on (that day, rather than whenever he'd originally checked it out), they turn the tables and gaslight Roger by going full circle around a roundabout on their way to

the beach, telling him they've already been and are just coming back.
* The Beano: In one of the modern issues, Dennis the Menace's strip has some great examples of arsepulls. First Walter and his friends get struck by lightning and possessed by Viking ghosts, then it turns out there's an unexploded missile at the bottom of the lake, along with a WWII submarine. Then the editor rightfully asks why it's there in the first place, breaking the 4th wall. The writer's excuse? There's a "secret tunnel" connecting it to the sea, and the Germans were stupid enough to go into it during the Second World War.
* The Beano in the 1950s-1980s with characters slippering (In these two comics it was common for an ending of a strip to involve the character being beaten on their behind with a slipper for their misdeeds) themselves instead of their parents or other authority figure doing it.
* The Beano invents a machine, it will invariably be made out of bits of 2x4 sloppily nailed together, knotted together bits of string, old bicycle wheels and anything else that was lying around in the shed. A Wellington boot on a stick is often part of the design, regardless of the machine's intended function.
* The Beano is being incredibly rich, of course; in this case, moths will sometimes fly out wearing tiny top hats or carrying diamond rings.
* The Beano is blind without 'em - as is his canine counterpart 'Enry.
* The Beano is the world's unluckiest boy, and gets chewed up by life in every strip; sometimes the punishment comes from his pet lemming or even his mother. This trope makes it funny, though the poor boy wouldn't see it that way.
* The Beano make use of this trope. Usually only in one story, not the whole comic, and involving cartoon characters interacting with the photographs.
* The Beano. Once freed, the masses immediately depose her and destroy the proclamation. The story ends with them locking her in an equally makeshift prison to teach her a lesson.
* The Beano, once had a strip in which two old soldiers were discussing old battles using condiment pots in a cafe. After a while one of the other diners came over and said "I think you forgot something," and poured tomato ketchup over the table.
* The Beano. Presumably this was to combat the dated appearance of the other characters (he wore jeans and a t-shirt instead of short trousers and a jersey), but he only lasted a few years.
* The Beano quickly comes into effect when said demolition ball ends up crashing into their studio a few moments later.
* The Beano ran a two-part "Wild Boy of the Woods" story which revolved around the creation of a giant mechanical bullet-proof statue of Hitler being built in order for Derek, the titular wild boy, and his friends to rescue British RAF prisoners of war. The statue is destroyed at the end of the story, as it's no longer useful as a secret weapon.
* The Beano reads about a bean shortage in the paper. He promptly buys all the beans he can find and causes the shortage.
* The Beano, Roger the Dodger's gimmick is that he's often coming up with schemes to get out of doing work. Ironically, these schemes take much more effort than the work he's trying to get out of doing.
* The Beano Roger the Dodger who as the name suggests tries to dodge things mainly work.
* The Beano strip. The Bash Street Dogs steal a dinosaur bone from a museum, then throw it in a ditch dug by some workmen to save the trouble of burying it. Unfortunately, the workmen then fill the hole with cement.
* The Beano strip, too, but Mum had sewn sandpaper into his shorts (Dennis hadn't noticed) thus sanding the banister down. This was one of several unwittingly helpful things he did in that issue, with a bemused Dennis getting rewarded instead of being punished at the end.
* The Beano, such as Dennis the Menace disguising himself as Walter and pulling pranks to try and get him into trouble, or Roger the Dodger trying to get himself grounded in order to escape revenge from the last set of people he's pranked.
* The Beano. The cloud is sometimes portrayed as having a personality of its own, and acting to keep James unlucky (for instance by frying a tray of white heather

with lightning).
* The Beano, the fleeting demographic rule can sometimes apply to reprints, in that they wait a few years after a strip ends until they begin to reprint the strip. This is because the usual reader only reads the comic for 4 or 5 years and so there is a lot of reader turnover.
* The Beano trying to go back in time by running backwards faster than the speed of light. He thinks he's back in the sixties but then gets chased by an angry curator for wrecking a display in the history museum.
* The Beano TV series which just used the script from the show with new artwork.
* The Beano was a boy with an army of toy soldiers that he controlled with a wrist-mounted device. He also had a toy navy when he briefly became Admiral Jumbo in the 1970s. In one annual, one of his toy soldiers named Pike gained sentience and turned evil after being outfitted with a new form of AI.
* The Beano was inspired by the view from the D. C. Thomson & Co. office windows, overlooking the High School of Dundee playground. According to Leo Baxendale:
* The Beano, which chopped and changed according to what was on TV at the time.
* The Beano which saw Fatty, Plug and Smiffy crawl into a vent in an attempt to steal a key off Teacher.
* The Beano who seem to be the only pupils at Bash Street School. Aside from Cuthbert Cringeworthy they are all about as academically minded as a sloth.
* The Beano who used an ear trumpet to attempt to hear a cry for help.
* The Bean Trees, protagonist Taylor mentions that many of the girls in her Kentucky hometown became Candy Stripers in high school as an extracurricular activity.
* The Bear and the Dragon deleting everything that happened in the last four books in the Ryanverse series.
* The Bear and the Dragon is kicked off when a Vatican diplomat and a Baptist minister try to intervene in a late-term abortion mandated by China's one-child policy. They get killed for it, sparking international outrage (but the baby lives).
* The Bear and The Dragon people keep reacting to P resident Jack Ryan's presence unannounced with "Jesus!" He eventually responds, towards the end of the book, with "That's not my name!"
* The Bear And The Dragon subverts the whole thing by having the US and Japan conduct a joint training mission, and then having the Japanese navy doing the equivalent of cold-cocking the American forces returning to Pearl Harbor.
* The Bear and the Dragon, the US sends an armored division and a fighter wing to help Russia hold off an invasion from China. It's made plain that the Russians wouldn't have won without US aid.
* The Bear and the Dragon (unbeknownst to them, the General in charge of the entire invasion force, who went to the front to show off his manhood and bravery). The captain of the recon unit asks if the sniper has ever killed a general before, to which the sniper says no, as he lines up the shot...The invasion falls apart for a variety of reasons afterwards, but the loss of the general officer (and in fact, most of the command structure between the various divisions from precision artillery and helicopter strikes) definitely contributes to the loss of coherence among the Chinese invaders.
* The Bear and the Dragon, when China is preparing to invade Russia. The Chinese Defense Minister suggests that they shoot down a Russian recon plane, and then claim that it had invaded Chinese airspace as a justification for the invasion. Whether that actually happens is not mentioned (but it probably doesn't, as the Russians stop their recon flights in favor of the American UAVs).
* The Bear and the Fly presented in an over-the-top fashion made it somewhat unsettling.
* The Beard: A fake spouse or significant other, to hide one's actual marital status or love life.
* The Beard... for each other! They pretended to be a lesbian couple to avoid having their rent increased (as two divorced mothers with kids, they were

considered to be two separate families).
* The Beard for him, although they are very close friends. The men who Clorinda has the most emotional feelings towards tend not to be of the highest class.
* The Beard: marriage to perpetrate some sort of deception (most commonly as a way of discouraging speculation about one's sexuality).
* The Beard: Someone who pretends to be another person's spouse to prevent people from learning that they're gay or single.
* The Beards promote the idea of growing a beard thusly in their song "Beard Revolution":
* The Beard: When a gay person dates the opposite sex to appear straight.
* The Beard: When practised by lesbians and gay men, this kind of deception can divert suspicions and thus avoid homophobic bigotry.
* The Bear gives backstory as to how he ended up in the girl's town in the first place (followed a bird, got stuck on an ice flow and taken to a zoo by a cargo ship), along with sending him back to the Arctic at the end. It also gives him a reason for visiting the girl, to return the teddy bear she dropped. In the book, he just comes and goes from the house and there wasn't a sequence with a bear made out of stars.
* The bear has these kinds of eyes, as does Tod moments earlier when he confronts Copper and snarls viciously at him.
* The bear himself is fully verbal and can wander around without parental supervision but has never been to school and is clearly a cub.
* The bear is also the totem for the Northern House Mormont, a House which boasts a Lord Commander of the Night's Watch, as well as Daenerys Targaryen's
* The Bear Kingdom where bears have taken over, and humans are nothing more than slaves, pets, and sometimes food.
* The Bear Lodge works similarly, but is an actual hunting lodge with its crosshairs on the supernatural, especially werewolves.
* The Bearminator, a huge polar bear, has some pretty scary black eyes in
* The Bear. Raymond Briggs, creator of the original cartoon book, appears as the face of the moon. Composer and songwriter Howard Blake is the pianist who sees the bears go past. Executive Producer Paul Madden is the seaman who spots the bear cub on the ice floe. Director Hilary Audus is the mother at the zoo with her family. Art Director Joanna Harrison is the cashier at the zoo shop. And the baby in the cot, with the initials JC on his romper suit, is supposed to be Producer John Coates.
* The bear reappears in a much later episode and his true intentions are vague. During the middle of a massive (artificial) blizzard, Hank is worried about his girlfriend Sirena and goes out into the storm to find her. He slams his against a streetpole and is knocked out. The bear finds him, carries him, takes him to a convenience store for a snack, then takes him to Dean's dorm room where he learns that Sirena is cheating on him with Dean. Why the bear did all this is unknown.
* The Bears have four arms with double-sided multi-fingered hands, and can see a wider spectrum of color than humans.
* The Bear Show, Daddy Bear and the others getting some of what they call "Victory Pizza" after saving the day.
* The Bears Island punished their inhabitants for offending him. Additionaly, gravity is heightened on one of the islands and lowered on the second.
* The bears of Tarkir are even worse news than usual since they start at power 4 and weigh somewhere around a ton. The Khan of the Temur, Surrak Dragonclaw, earned both his position and his many scars by fighting one, which is an achievement roughly on par with stopping an oncoming car by punching it. This changes somewhat in the plane's new timeline, as the return of the dragons knocks the bears down several pegs in the food chain, especially since dragons are noted to find bear flesh quite tasty — although this has the side effect of winnowing the bear populations down to
* The Bear soldiers are another group of intelligent animals, close to human, who were made by Martellus's mentor,
* The Bear That Wasn't and they insist he's "a silly man who needs a shave and

wears a fur coat" no matter how much the bear protests.
* The bear who apparently ripped the door off of a trailer to get to the man inside.
* The Bear, who is the younger cub's surrogate parent. Terrified by the adult grizzly, the cougar runs away.
* The Beary Family: The final cartoon in the series featured Charlie Beary inviting his boss over for dinner. It ends with the boss firing Charlie after numerous mishaps.
* The Beast also starts to warm up to Belle after she refuses to obey and defer to him. Unlike with Gaston, who views her refusal to submit as a challenge to break her to his will, the Beast is inspired by her behavior to be a better person.
* The Beast Arises suffer terrible casualties until they are finally driven to extinction during the second invasion of Ullanor. In an attempt to prevent knowledge of this event from devastating the morale of the war ravaged Imperium, Chapter Master Maximus Thane of the Fists Exemplar convinced the Imperial Fists’ Successors to secretly rebuild their parent Chapter with members of their own brotherhoods.
* The Beast Arises to bombard planets by sheer force of charisma, intelligence, and force.
* "The Beast Below": Elizabeth X says she has been ruling Starship UK for ten years. However, as the Doctor points out, her antique porcelain facemask perfectly fits her face, and hence it stays on all the time. She's actually been ruling for over two hundred years, having her memory periodically erased.
* "The Beast Below": Everybody knows that something's off about the ship (It's basically an entire nation compacted into a starship), and are afraid of what happens, but they don't talk about it, ever. (Except for the Doctor, Amy Pond, and the Queen aboard the ship. And even the half-human half-smiler characters talk about it to a limited degree. Though, the general public refuses to talk about it.)
* "The Beast Below": "Except it's not a torture chamber, is it? Well, except it is. Except it isn't."
* The Beast Below" has them the reason being why the UK (and other nations) had evacuated to the stars.
* "The Beast Below" has the Smilers, modelled on creepy fairground fortune teller machines.
* "The Beast Below". He even says he'd love to see the stomach, then hastily adds "but not right now".
* "The Beast Below": Liz Ten keeps a large number of glasses of water on the floor in her room as a constant reminder that something is wrong with her kingdom.
* "The Beast Below" make sense in the same way as "a week tomorrow" (specifically, she'd gone forwards in time from the night before her wedding).
* "The Beast Below" (minus Scotland) on a single spaceship, searching for a new home after the Earth becomes uninhabitable. The discovery of just how this massive ship is travelling through space with the engines apparently off forms the main mystery of the episode. And the Doctor claims it is just one of many, with each country building their own ship. The others are just not shown.
* "The Beast Below": Queen Elizabeth the Tenth (or "Liz X") is the Queen of Starship UK. Who dual-wields laser pistols. Wow. Basically she rules.
* "The Beast Below", the Earth is rendered temporarily uninhabitable by solar flares, and the planet's population sets out in spaceships to find somewhere else to live until it's habitable again.
* The Beast Below", the lady in the sinister white mask turns out to be "the bloody queen" and one of the good guys.
* "The Beast Below": The Winders, the secret police, are revealed to be half-Smiler when they rotate their heads around.
* "The Beast Below". This nearly happens to the Doctor and Amy as well, though they manage to avoid this because the Doctor does something with the sonic screwdriver to make it vomit.
* The Beast Below", Winston Churchill calls the Doctor thousands of years in the future. Maybe his phone just picks a random point in time that the Doctor's in his

TARDIS?
* The Beast - Daigo Umehara, who is (or at least was) regarded by some as simply the best player of fighting games in the world. That
* The Beast ended up exterminating everybody in Wolfram & Hart, but they were quickly replaced.
* The Beast from 20,000 Fathoms. In both of these films, disposing of the titular monster's corpse is a major concern for the heroes because of an extremely virulent germ contained in the blood of the former and the overwhelming radioactivity of the latter preclude destruction with more conventional weapons, which would scatter pieces of the monsters' corpses thus contaminating a large area.
* The Beast from 20,000 Fathoms is credited as being suggested by the short story of the same name by Ray Bradbury. The story focuses on two men in a lighthouse which is destroyed by a massive, plesiosaur-like sea monster drawn by the sound of the foghorn. The movie tells a vastly different story of a crocodile-like dinosaur being freed from its slumber in the arctic by an atomic bomb and going on a rampage along the east coast, with one of its many targets being a lighthouse like in the story. After the movie was released, the story's name was changed to "The Foghorn" to distinguish the two.
* The Beast from 20,000 Fathoms. It should be noted, however, that the Rhedosaurus was awoken by a nuke, not mutated by one.
* The Beast from 20,000 Fathoms) so much as bringing it to the modern world (by melting said ice during a nuclear test).
* The Beast from 20,000 Fathoms: The title monster, while more predatory and aggressive than actually evil, is certainly an example of this. The rhedosaurus was frozen in Arctic ice since the early Cretaceous, and is thawed out by nuclear testing. Somehow, it is still alive.
* The Beast from 20,000 Fathoms which meant that bullets and their like were right out.
* The Beast from Angel Season 4 makes most brutes look like a pushovers though like Skip, he's more intelligent than he looks. However Angelus recognizes the Beast is still essentially this trope for a greater evil
* The Beast from season 4 couldn't walk very fast due to huge posture and massive, cloven feet. It pursued its intended targets without haste but relentlessly. Bullets bounced off of it, swords and axes broke on its skin, even a pair of hand grenades blowing up in his face failed to slow it down. Angel did try to drive a stake through its one possible weak spot, being
* The Beast has a tendency to pull on the back of his neck when he's ashamed or frustrated and will
* The Beast hiding amongst a bunch of gargoyles in the climatic fight in
* The Beast himself is a baritone as well. The towering Beast's ferociousness terrifies most other characters into submission with a single roar. Within the movie, he single-handedly drives off a hungry wolf pack threatening Belle, defeats the aforementioned badass Gaston, and rules his staff of
* The Beast himself is not far behind Gaston himself, if not more so. He's built like a bull, and his voice is
* The beastiary entries are — presumably — being written by Dante as he goes along as reminders to himself as to what works. As such, it won't update until Dante actually witnesses the enemy doing/reacting to something in a fight with them, such as penning down notable attacks and theorizing/confirming weaknesses he gets to act on.
* The Beastie Boys cover, where Mike D intentionally sings the song in Elton-ish gibberish.
* The Beastie Boys" is a series of rotoscoped pastel drawings based on specially-shot live footage.
* The Beastie Boys was created by lending audience members camcorders at a show and cutting together the best footage.
* The Beastie Boys) were originally released without Parental Advisory warnings, despite containing a decent amount of profanity. The warning was added when each album was remastered.

* The beast in Carroll's poem "Jabberwocky" is more commonly known by that name since most works that reference it use that instead of the creature's
* the Beast in his furred appearance during Marvel's Amazing Adventures anthology saw Hank fighting longtime X-Men villain the Juggernaut on Halloween night.
* The Beast In The Cave" describes cave-dwelling humans who degenerated into savage monsters.
* The Beastlands (Chaotic Good-Neutral Good) are three planes of wilderness: one of eternal day, one twilight, and the last night.
* The Beast Legion : Dragos, on several occasions in the webcomic, gives out an Evil laugh.
* The Beast Legion: It's revealed from the second page of the web manga that Xeus is the one chosen to save Lithopia from the upcoming Chaos.
* The Beast Legion that attacks Xeus is a large, ambulatory plant with muscular limbs and two fanged mouths.
* The Beast Legion who fits into this category. After being crushed his soul & body remains were linked to a giant suit of armor.
* The Beast Legion: Xeus's WereTiger form keeps coming at Master Surya despite all the obstructions.
* The Beast likely to get a reaction out of anyone who has struggled or seen a friend/relative struggle with depression and suicidal thoughts.
* The beastman prophet Malagor is referred to by a number of epithets, such as the Crowfather, the Dark Omen, the Despoiler of the Sacred and the Harbinger of Disaster, by those who'd rather not speak his name. Likewise, the monstrous warlord Morghur is referred to as the Master of Skulls, the Corrupter and the Shadow-Gave, while the plague-shaman Slugtongue is known as the Famine-Fiend, the Barren One and the Lord of the Black Harvest.
* The Beastmaster after all. She could always be the niece of the king's second wife.
* The Beastmaster and rats, due to those animals' associations with death and decay.
* The Beastmaster anime, in a fit of temper, ultimately calls up a bear to attack her brother-in-law Keiji. Keiji is already making a hasty retreat and the bear attacks Matsu's husband Toshiie instead (though Toshiie comes out of it more or less fine since the whole thing is played for laughs).
* The Beastmaster are bikini-clad centerfoldesque women...with hideously deformed faces.
* The Beastmaster: Arklon is able take people's memories for his own use in the sequel.
* The Beastmaster, Dar dresses in leather, burns the bodies and goes on a grand quest.
* The Beastmaster: Dar has his ferrets take Kiri's clothes when she's bathing as part of a scheme to try seducing her.
* The Beastmaster evil priest watches it fly away, then turns to his minions: "See! Aar has spoken! He wants your children!"
* The Beastmaster first aired in 1999, and featured Marc Singer (who starred in the movie) as a recurring guest star in the third season.
* The Beastmaster has a tiger and an eagle at his command, but he also has his iconic ferrets, Kodo and Podo.
* The Beastmaster his spells are summons (a bear, a hawk, and a quilbeast, something like a cross between a porcupine and a warthog), while his ultimate sends waves of thunder lizards from nowhere to run into enemies and explode.
* The Beast Master, Hosteen Storm taunted a character he had realized was an alien: recounting all the aliens' funerary customs and how he won't get them, because no one will realize he died.
* The Beastmaster: In the sequel, the cops who enter Dar's world run away from their patrol car crying "It's gonna blow!" like the thing's full of live explosive when a fire starts nearby. The gas tank does indeed go up like it was a bomb right after this.
* The Beastmaster job was rumored to take XP from other party members when in a

party, leading to their exclusion from parties. This persistent rumor comes from a description in a Prima strategy guide.
* The Beastmaster Maax on top. Maax regularly sacrifices children to his God Ar while the villagers are forced to watch.
* The Beastmaster's animal summons have colors that are more adapted to their environment depending on the climate they're summoned on: brown on most maps, a polar environment gets a white bear/quilbeast/hawk, forest environments are kind of purplish-brown.
* The Beastmaster, so the villain tried to have the boy killed before his birth, the act which gave him the beast empathy powers that led to the villain's downfall.
* The Beast Master, the alien Xik performed a "burnoff" of the surface of the Earth, killing all humans living on it. Luckily the human race had already spread out to other planets in the galaxy.
* The Beastmaster; their relationship to each other is never noted at all in the film after the reveal that Dar is the son of Kin's uncle the King, and they don't see any problems in a romantic relationship by film's end.
* The Beastmaster: The people who Dar runs into greatly resemble bats.
* The Beastmaster was playing somewhere in the United States, every hour, for two months. This might not actually be a joke.
* The Beastmaster. While Warriors use giant axes to the best ability, halberds are still considered polearms, and thusly Dragoons are best at them.
* The Beastmaster woolly mammoths, but they're equally dangerous to anyone Takkar rides them into.
* The Beast, meanwhile, is the leader of a group of raiders who prey on the few surviving pockets of civilization... but even if they're set for a while, he'll still attack the villages because he just likes blood.
* The Beast Must Die, Tom reveals to Pavel that her has had silver bullets made to hunt the werewolf. Exactly why he had the cases made of silver as well as the bullets is anyone's guess.
* The Beast of Babylon being the final outing, before returning to Rose.
* the Beast of Bray Road, sighted near Elkhorn, Wisconsin. While reports vary, some of the descriptions closely resemble a Wolf Man.
* The Beast of Darkness, the entity that constantly pressures Guts towards acts of inhuman butchery, is a monstrous hound made out of black shadows that lives in the darkest part of Guts subconscious.
* The Beast of Hollow Mountain: After his fight with Enrique, Felipe hands Jimmy a raw steak which he puts on his black eye while talking to don Pedro.
* The Beast of Hollow Mountain starts out as a standard ranch story about a rancher's business and romantic rivalry with the less scrupulous owner of a neighboring ranch. Then a dinosaur walks into the plot for some reason.
* The Beast of War (1988). The Soviet tank commander kills an Afghan member of his crew, convinced he's working for the mujahadeen pursuing them. Also lampshaded between two crewmembers who don't like each other much.
* The Beast of War (1988). The Soviet tank crew leaves one of their own comrades tied to a rock with a grenade under his head. ("If you want anything, just nod.")
* The Beast of War, Captain Dale Dye negotiated to get an old Russian tank from the Israeli Defence Forces. The film, set in Afghanistan, was shot in the Sinai desert.
* The Beast of War has a similar plot, though slightly more realistic. "Sorry, sir. Not much of a war. No Stalingrad. How is it that we're the Nazis this time? How is it? I tried to be a good soldier. But you can't be a good soldier in a rotten war, sir."
* The Beast of War is a forgotten war movie from 1988, depicting the struggle between a Soviet tank crew and their mujahadeen opponents. Not all the conflict takes place outside the tank. The commander shoots his Afghan translator, convinced he's working with the enemy, and when another soldier threatens to report the killing he's tied to a rock and booby-trapped for the mujahadeen to find.
* The Beast of War the eponymous beast is in fact a Ti-67; a T-54/55 captured by Israel from Egypt or Syria, refitted with new armament, seats, optics et al., and pressed into Israeli service.

* The Beast of Yucca Flats has a man getting caught inside a nuclear test explosion, becoming the eponymous beast.
* The Beast of Yucca Flats manages to sneak into the back seat of a car while the driver changes a tire.
* The Beast Planet, would EAT planets several times trhough the duration of
* The Beast Player: At the end of the original duology, Seimiya agrees to unite the two conflicting territories of Lyoza through her marriage to Shunan.
* The Beast Player: Damiya is described as tall, slender, and effeminately beautiful.
* The Beast Player: Elin is the product of a forbidden union between an Ahlyo woman and a non-Ahlyo man. The stigma is so intense that the results of such unions are called Akun Meh Chai, meaning "devil-bitten child".
* The Beast Player Erin all have green hair and green eyes, including the half breed protagonist.
* The Beast Player has a very faithful manga adaptation of the original duology.
* The Beast Player of Lyoza. They are mainly passive observers, only making sure that an ancient catastrophe doesn't strike again.
* The Beast Player (The manga. The original novel is not marketed by gender.)
* The Beast Player: Yuyan's discussion with Elin about her Ahlyo heritage makes Elin realize how much she's been hurt by the callous treatment of her by her paternal relatives and Asan, her foster father's biological son. She comes to consider her paternal grandfather "no better than trash" for letting Toda attack his daughter-in-law and young granddaughter.
* The Beast pointing out that more and more giant squids are now surviving to adulthood due to their predators being overfished. Oops again.
* The Beast Pretenders in the "Beasts of Burden" arc, with Prometheus Black as the
* The Beast releases Belle from her promise to stay when he sees how much she wants to go help her father, even though it's painfully clear he doesn't expect her to come back (or think she would even want to), which means he'll be doomed to be a Beast forever.
* The Beasts of Berlin were six gorillas uplifted by a fluke by an experimental ray reared in Communist Berlin. The ray itself had a reverse effect on humans, making them mindless beasts, but in both cases it was temporary.
* The Beasts of Valhalla, and has awesome talents in attracting black budget funding from governments who don't know he's on other people's payrolls or what his agenda is.
* The Beast subversion entity certainly counts. It quite literally rips its host apart, extracts their neurons, and then sets about using them to form an organic computer network it can subsequently use to control the ship they were flying, and hence infect more vessels. The quote formerly at the top of the page comes from the initial cut-sequence describing the entity — spoken by a poor engineer who sounds like he either wants to throw up or cry just about all the way through.
* The Beast That I Am, Naru simply chooses to believe that they just need to wait a few days for Haruka to calm down, and they can return to business as usual.
* The Beast Titan's human from bears a resemblance to Grisha Yeager. This is not a coincidence.
* The Beast Wars era came the closest to explaining how the reproduction happens... at least for the body. Certain devices on Cybertron are capable of manufacturing the bodies, which are used to house the sparks (souls) of other Transformers. These protoforms are vaguely featureless humanoid metal shapes that add on features such as transformations and the resulting kibble from scanning and selecting nearby subjects. The body keeps the spark alive and a transformer's spark can be transferred between bodies (sparkless ones are made for such a purpose). The Spark is the crux of the personality, so a seemingly crotchety old transformer could in fact be quite young, but has an old soul (Tigatron being a perfect example). These bodies are produced by machines on Cybertron but it seems none of the transformers even know how the Sparks come to exist in the first place.
* The Beast was the peak of this, being a Warboss strong enough to fight a Primarch to a standstill with a mind to match. Not only was he a genius strategist,

he also knew how to harness WAAAGH! energy to power fearsome reality-defying technology that put even
* The Beast were both set and filmed in Chicago. The former used some of the lesser-known Chicago landmarks to interesting effect, and both took full advantage of the 'L' train tracks that run through downtown.
* The Beast with a Billion Backs, Bender suggests that an unmanned probe be sent to the transdimensional rupture. All eyes then turn to Bender, who goes, "What?"
* The Beast With A Billion Backs, electromatter can only be damaged by other electromatter.
* The Beast With a Billion Backs, is Fry's girlfriend and would be this for Leela, But she was only a little jealous of them. So, another subverted trope.
* The Beast With a Billion Backs opens with a pastiche of 1930s cartoons, and has Zoidberg powering the Planet Express ship by chasing a fish on a stick.
* The Beast With a Billion Backs qualifies. Shkle is a planet-sized entity from another universe who possesses nigh-invulnerable tentacles capable of destroying or breaking any form of matter from our universe due to being made of electromatter, a primordial form of matter. Yivo can also resurrect the dead, travel between universes at will, alter matter and energy and shkle's body is literally Heaven itself, capable of providing resources and room for all life in our universe. The only things that can kill Yivo is electromatter or exiting shkler's universe.
* The Beast with Five Fingers caused him to believe that the hand was real and haunting him.
* The Beast with Five Fingers revolves around a murderous hand that has detached itself from the corpse of a dead pianist and which attempts to kill the heirs to his will. Except the ending has some of the survivors suggest it was actually a plot by a greedy heir to kill off the others, only for that heir to end up killing himself after he went mad and began believing his own lie.
* The Beast Within: A Tale of... because he didn't like the fact that the painting reflected the curse on him. Belle never learns about any of this, which means she's unwittingly ending up with someone considerably worse than she thought, while the Beast himself has forgotten his past for reasons never fully explained, meaning there's no chance of him learning from his past or making amends. The ending is still treated as completely happy, but more than a few readers have expressed a wish for Belle to leave the Beast altogether.
* The Beast Within UK Season 2, Part 2 DVD set, posits the existence of a Dinobot combiner. Given that the comic featured Transformers who weren't "born" until after other Transformers also featured had died, it was apparent that it wasn't set in any existing timeline.
* The Beast yells at Belle to leave, then saves her from wolves, leading to them becoming friends.
* The Beat Generation Likewise, the Beats were not all as rebellious as advertised.
* The Beatles' 1965 Christmas message to their fan club, John starts singing a song by The Four Tops:
* The Beatles (1980), with a few physical differences (most notably a spinning disc made to look like a vinyl record).
* The Beatles after John Lennon's infamous "bigger than Jesus" comments; outraged, hordes of outraged Christian fundamentalists organised mass burnings of Beatles records and merchandise. Except, of course, they would have had to buy them first in order to burn them, meaning that as Lennon and the other Beatles would later archly note, it wasn't quite the punishment to them it may have seemed.
* The Beatles album cover. And again, it was the cheaper reproduction.
* The Beatles album/movie in 1969, was the only musician after 1963 to be co-credited on a Beatles single, and was commonly called the "Fifth Beatle". George Harrison, who brought Preston into the studio in the first place, unsuccessfully tried to convince the band to make him an official member, noticing the positive effects Preston's presence had on the band on the band musically and personally.
* The Beatles album shipped with various thematic props such as cutout masks and badges designed by the Beatles themselves.
* The Beatles' "All You Need Is Love":'And in the end, the love you take is equal

to the love you make'
* The Beatles "All You Need Is Love": "There's nothing you can do that can't be done."
* The Beatles (along with its accompanying film) was released in 1970.
* The Beatles also caused shock for smashing their instruments on stage.
* The Beatles also charted "The Long and Winding Road" and "For You Blue" as a double-A side.
* The Beatles also feature an inversion of this trope. Owing to the oft-expressed truism that John Lennon was the "creative" Beatle and Paul McCartney was the "fluffy" Beatle, people tend to credit all the "deep" and "important" stuff that the Beatles did to Lennon, including
* The Beatles, also released by United Artists, was not part of the original three-picture deal.
* The Beatles. ("Although I laugh and I act like a clown / Beneath this mask I am wearing a frown")
* The Beatles' American fans came on board in January and February 1964. The British fans were around for about a year before that.
* The Beatles an amusement park ride, where that ride is a long spiral slide. Which is possibly the most mundane relationship metaphor ever imagined.
* The Beatles and is currently named ''The Beatles Club" airing on 88.1 FM.
* The Beatles, and lead the way for a number of other animated series involving both real and fictional musicians.
* The Beatles") and some social ("Downtown", "The Rebel"), and even the songs with broader topics tend to have passing mentions of products and politics from the era. As a result, a lot of jokes tend to get lost on modern listeners.
* The Beatles. "And yet you don't believe her when she says her love is dead, you think she needs you."
* The Beatles animated at TVC-London (with some farmed out to Group Two Studios in seasons 2 and 3) had stock animation of the boys playing their instruments during the episodes' songs.
* The Beatles Anthology in Beverly Hills and couldn't find The King's house was like "a scene out of a Beatles cartoon".
* The Beatles Anthology releases. Something will cause the band to stop playing and abort the take. This usually results in either laughter or shouting, depending on what caused it.
* The Beatles appeal to both children and adults, males and females and both fans of mainstream pop music, as well as alternative rock fans.
* The Beatles approach to the track-lists — in fact, the intent of the photo was to subvert the band's wholesome image, it wasn't intended as album art at all, and apparently it was Capitol themselves who chose to put it on the front of the album, without The Beatles' knowledge. After a backlash of initial protest, the boys made a second cover, posing quietly around a steamer trunk. Some album sleeves with the "butcher" cover that had not left the press shop yet had the new cover photo pasted over.
* The Beatles are at a wax museum to see wax statues of themselves (episode "Misery"). As a joke, John and Paul substitute their wax statues with themselves as a little old lady and a young lady approach it.
* The Beatles are at a weirdo art exhibit (episode "Twist and Shout") where Ringo tries to play a stone exhibit that looks like a drum set. The creator says it's a creation he calls "Portrait of Father."
* The Beatles are at the revenue service shelling out bags of money at tax time (episode "Taxman"). They get knocked out cold by errant bags and dream they're helping Robin Hood in his fight against the Sheriff of Nottingham.
* The Beatles are known for being among the first bands to make music videos. The videos for "Can't Buy Me Love" and "Strawberry Fields Forever" are examples of a Beatles concept video.
* The Beatles aren't Skrulls, but they did have Skrull impersonators who went native.
* The Beatles are seen dancing an endless loop in the sing-along portion of the

cartoon.
* The Beatles are sweeping America". There is no real plot to speak of.
* The Beatles as drummer right before getting big. Needless to say, most fans agree that it's not The Fab Four without Ringo.
* The Beatles as "just a bunch of tier 1 songs." One muses that perhaps those fans are missing the point of having a Beatles game...
* The Beatles, as represented by Apple Corp. since the late 1980s. There are numerous Beatles projects, and it is hard to know which ones will come out when.
* The Beatles attempts to find meanings in nonsensical Beatles lyrics led him to send his followers on a killing spree in 1969).
* The Beatles, because it was rock music and they were men wearing long hair.
* The Beatles because they thought it was neat (and they were sick of working on the song).
* The Beatles becomes hilarious when interpreted as a "your mom" joke (which it well could be).
* The Beatles. ("But as the words are leaving his lips/A noise comes from behind...")
* The Beatles cartoon "Chains," the boys (aboard a cruise ship) jump into a pool full of girls.
* The Beatles cartoon "Don't Bother Me", two spies are tailing the band to steal their book of new songs (probably Decca executives). The boys are waiting on a train to take them from Rome to Barcelona, so the two spies stage an emergency hiding behind a structure beam:
* The Beatles cartoon "Eight Days A Week," screen lover Lips Lovelace says he can't kiss anymore, so Paul fills in for him. But Paul's leading lady is a chronic kisser with a jealous boyfriend who chases them all around town, all while Paul is getting continually kissed. At the end, Paul is ready to pack it in and acquiesce the role back to Lips, but not before the leading lady wants to reward him—with another kiss.
* The Beatles cartoon episode "Eight Days A Week", Hollywood screen lover Lips Lovelace loses his ability to kiss. Paul says it's preposterous and that anybody can kiss, prompting Lovelace to vent:
* The Beatles cartoon episode "I've Just Seen A Face" has John, George and Paul examining Ringo, who has lost his singing voice. George and Paul look into each of Ringo's ears and see each other's eye looking back.
* The Beatles cartoon "Good Day Sunshine." A small rain cloud even fills his glass.
* The Beatles cartoon has live still shots of the Beatles dissolving into their cartoon counterparts.
* The Beatles cartoon "It Won't Be Long" focuses on a bonsai garden in Japan near where the boys are having a picnic. The sign outside the garden reads "Dr. Ah So, Honolable Ploplietor."
* The Beatles cartoon "Misery" gives the boys away to Count Dracula, who is haunting a wax museum.
* The Beatles cartoon "Please Please Me." Ants invade the boys' picnic, so Ringo grabs the blanket and yanks it off the ground, leaving the settings and fixings undisturbed.
* The Beatles cartoons in the late 80s, the opening of the first season was left out because of a scene where Ringo eludes a gaggle of fangirls by impersonating a Chinaman with a garbage can lid as a hat. Similarly, many first season episodes were not aired because of their presentation of Oriental stereotypes. (e.g.: In "It Won't Be Long," a botanist has a sign reading "Dr. Ah So—Honolable Ploplietor.")
* The Beatles cartoon "Tell Me What You See" has the boys visiting a renowned make-up artist at a Hollywood studio.
* The Beatles cartoon, the Fab Four themselves are in their moptop-era designs, meaning they're meant to be very young adults. However, a few episodes have them refer to themselves as teenagers, and yet another episode has them at a legal drinking age. It should be noted that it is possible to be all three simultaneously in Britain, where 18 is the drinking age and the age when one becomes an adult.

* The Beatles cartoon used real Beatles songs throughout the series, including the title sequences. "Can't Buy Me Love" and "Help!" were both used as theme songs, but the one that seems to be the best remembered is "And Your Bird Can Sing," which was used during the last season. A rearrangement of "I Should Have Known Better" was used in the title cards.
* The Beatles cartoon "We Can Work It Out" concludes with the boys agreeing that they'll have good luck as long as they stay together, and, saying in unison "Knock wood!", they knock on Ringo's head.
* The Beatles cartoon "You've Really Got a Hold on Me", the four are lost in a jungle with a jeep that stopped working. After applying thought Ringo gets an idea with the cliche bulb over the head image. Catch here is a huge snake appears (it was a worm but a witch doctor turned into a snake) and swallows the bulb! Then the reptile shines a beacon every time it opens its mouth!
* The Beatles CDs and DVDs, there's a poster of the band in their early days with Pete Best's face torn out.
* The Beatles color-codes its five main modes: "All My Loving" is blue, "Drive My Car" is red, "I Should Have Known Better" is purple, "Ticket to Ride" is light blue, and "It Won't Be Long" is yellow.
* The Beatles connection certainly helped (and continues to help) sales of Rickenbacker, Hofner, and Gretsch guitars and basses, particularly those played by the band, as well as certain Epiphone, Fender and Gibson guitars, and Ludwig drums.
* The Beatles couldn't have cared less; he is quoted as not being satisfied with the extra instruments used during the famous scene.
* The Beatles debut episode "A Hard Day's Night" has the boys in a Transylvanian castle rehearsing and getting chased around by the castle's monstrous denizens. They seek refuge in a bedroom as John tells Ringo to lie down as "You look white as a sheet." The bed sheet rises presenting itself as a ghost ("Did someone call me?") and the chase resumes.
* The Beatles debut episode "A Hard Day's Night", the boys encounter a figure emerging from a grave at a haunted castle.
* The Beatles' deliberately nonsensical "I am the Walrus" was inspired by a letter John Lennon received about how his former high school were analyzing the lyrics to Beatles' songs in the classroom. According to legend, after recording the song he quipped "Let's see the bastards figure that one out!"
* The Beatles did this for a while. Long story short, it spawned a conspiracy theory that says Paul died at some point and was replaced by a look-alike. Blame the drugs. It also allegedly resulted in Sharon Tate's death, but let's not get into that...
* The Beatles did this frequently. "Glass Onion" is Lennon trolling fans — particularly everyone who came up with elaborate conspiracy theories about
* The Beatles do this in the first-season opening of their ABC cartoon show. They do it a couple of times in some episodes as well ("There's a Place" is one).
* The Beatles , due to the amount of albums Capitol squeezed out of them, released several songs in the US before they were released in the UK. The Beatles' Second Album included "Long Tall Sally" and "I Call Your Name", Something New had "Matchbox" and "Slow Down" (all A Hard Day's Night outtakes, later compiled on a UK EP called "Long Tall Sally"). This was followed with "Dizzy Miss Lizzy" and "Bad Boy" being recorded to fill out "Beatles VI", with the former later appearing on "Help" and the latter on "A Collection Of Beatles Oldies". "Beatles VI" also gained two tracks from the upcoming UK version of Help, "You Like Me Too Much" and "Tell Me What You See". Finally, "Yesterday And Today" took three tracks from the upcoming "Revolver", these being "I'm Only Sleeping", "And Your Bird Can Sing" and "Doctor Robert", after which the band insisted that all their albums were the same in the US - with the one caveat that the US release of "Revolver" could not include those songs since they were now officially released.
* The Beatles: During the song segment of the episode "I'm Down," George bows to a little girl, who curtsies to him in return.
* The Beatles' early work includes a lot of "yeah yeah yeah"s and similar phrases.
* The Beatles easily avert this, as all 20 of their #1 hits, like the rest of the

band's discography, are still timeless classics. However, they still have several songs with surprisingly low peaks, such as "I Saw Her Standing There" (#14), "I Am The Walrus" (#56), and "Strawberry Fields Forever" (#8). This is justified, as they were all B-sides to #1 hits ("I Want To Hold Your Hand", "Hello, Goodbye", and "Penny Lane", respectively). Other iconic songs of theirs, like "Here Comes the Sun", "Lucy in the Sky with Diamonds", "Michelle", and "Tomorrow Never Knows", were never even released as singles.
* The Beatles' "Eight Days A Week" is a variation on this as the title was a typical Ringo malapropism.
* The Beatles enter a donkey in a Madrid horse race as it runs very fast in panic when it hears loud music (episode "Tell Me Why"). It comes down to a photo finish between the donkey and another horse. The donkey appears to have won by a nose, but he didn't...he won by the jockey's (Ringo) nose.
* The Beatles episode "Help!" has Paul chasing fashion thief Jacques Le Zipper up the Eiffel Tower. Jacques uses an elevator; Paul pursues him up another elevator.
* The Beatles episode "I'll Be Back," three would-be musicians try to upstage the boys' appearance in a Texas town. They and their music (a 45 rpm recording of "Ticket To Ride" as if the adapter was missing and the hole rolling against the spindle) are pelted with rotten vegetables.
* The Beatles episode "I Want To Hold Your Hand" has a scientist aboard a cruise ship, having captured an octopus whose unhappiness stems from being lovesick. The scientist lowers a diving bell into the ocean to gather some input on finding the octopus's true love. The Beatles have hidden inside the diving bell from their wild female fans, and under the sea they discover a similarly lovesick female octopus. Once back on ship, the boys buy the male octopus and throw him back into the ocean to be with the female octopus to live happily ever after.
* The Beatles episode "Komm Gib Mir Diene Hand" (the German version of "I Want To Hold Your Hand"), Paul entreats Gunthar the St. Bernard of this as a title drop.
* The Beatles episode "Misery" has the boys at a museum to see their wax statue lookalikes. As a prank, John and Paul replace their wax figures with themselves in the same pose. A young lady and an elderly lady approach the exhibit:
* The Beatles episode "Money," the boys are visiting Coney Island where Ringo mistakes a mechanical clown as Santa. (In Europe, Santa is widely known as "Father Christmas," but since this was for American television, he was called Santa Claus.)
* The Beatles episode "No Reply" had a master of disguise named Anyface who has impersonated Paul. The chief of police has the boys perform before his daughter, whom he says can pick out the real Paul easily. She can't. What gives Anyface away is that he doesn't run when confronted with hysterical female Beatles fans.
* The Beatles episode "No Reply" had the boys on vacation in Hawaii where there are suddenly two Pauls. One of them is a criminal master of disguise named Anyface, and nobody can tell who is who until a bevy of fangirls show up. The impostor does not run.
* The Beatles episode "No Reply," the boys encounter Anyface, villainous master of disguise who has made himself up to look like Paul. When a singing performance and a truth-telling test fails, what gives Anyface away is that he doesn't run when hysterical female Beatle fans arrive.
* The Beatles episode "Octopussy Cat" where Eek is trying to get a squid (which rests on his head) back to the ocean. Eek crashes into a train berth where the Fab Four are in transit:
* The Beatles episode "Paperback Writer" had the group performing in concert with flesh-and-blood photos of them in the rear.
* The Beatles episode "Strawberry Fields" ends with the group's limo departing skywards from the orphanage they visited—the car is festooned with helium-filled balloons.
* The Beatles episode "Twist And Shout," the boys meet a girl at a weirdo art exhibition who wants to unleash her creativity in a modern way. She throws paints at a canvas and the image that comes up is the Mona Lisa.
* The Beatles, especially compared to their indie years. They weren't conventionally handsome, but they were charming and they were great peformers,

which is what attracted millions of girls to them.
* The Beatles, especially the leader. The Chief Blue Meanie has a pretty freakish high-pitched laugh, which he later follows with hissing and teeth clattering.
* The Beatles: Failing to complete a mode before time runs out results in the associated song quickly tapering off.
* The Beatles For example: "What do you call a guy who hangs out with musicians all day?"
* The Beatles had a psychiatric illness that must be treated. Psychiatrists noted this and gave some of those a psychiatric test. The result was, predictably, that they did not suffer from any mental problems whatsoever and the term was redefined to maintain that being a fangirl is normal.
* The Beatles had lead guitarist George Harrison and producer George Martin, which can lead to all sorts of confusion when you're reading about the production of certain albums.
* The Beatles had the former on its inner sleeve, and John Lennon liked the former lyric more and so all of the covers of the song have the words "his armchair".
* The Beatles had this kind of relationship. The Beatles helped the Stones early on get a record deal, and then threw them a Lennon/McCartney song ("I Wanna Be Your Man"), when the Stones needed a hit. It got to the point in the late '60s that if one band had a single that still doing well in the charts, the other would hold off the release of their next single a couple of weeks, so it wouldn't interfere with the sales of the other band's release.
* The Beatles had was that of the group reclining on a lawn with a "Keep Off the Grass" sign clearly in view.
* The Beatles has, despite what his name might suggest, "hair down to his knee".
* The Beatles has John asking Ringo to dress the room for a "wild" number. Ringo whips out a jungle diorama which John dismisses as preposterous. But when Ringo's errant rifle shot causes an actual elephant to stampede by:
* The Beatles has John, Paul, and George repeatedly dismissing Ringo (and finally singing the song "Don't Bother Me") while they're on a car trip; he's just trying to tell them about the two thieves attempting to kill them and steal their book of unreleased music. Finally, he gives up and just starts foiling the thieves himself.
* The Beatles has Ringo flapping his arms and flying. When John comments that it's impossible, Ringo suddenly plummets and lands on his head.
* The Beatles has several, including soft plunging to the rollover (explicitly labeled as a skill shot on the playfield itself) and plunging to the upper flipper and then shooting the loop for a jackpot.
* The Beatles has the Eastern bad guys getting captured when they knock Ringo unconscious, then find it's Paul, and then John (but not George?) in a Ringo mask as bait for a police ambush.
* The Beatles has this effect on some people. It's a mashup of strange sounds which bears little to no resemblance to what most people think of as "music."
* The Beatles have included jet aircraft recordings in "Back In The U.S.S.R."
* The Beatles' "Helter Skelter" also does this. Twice. Which turns into a video games example when songs containing one show up in
* The Beatles. He wields a silver hammer that goes "bang bang" and then "clang clang" when it comes down upon his victim's head. It makes sure that s/he is dead.
* The Beatles. However, their rivalry was quietly a friendly one. Furthermore, the former's acrimonious break-up apparently inspired the latter to reassess their own band's group cohesion and take steps to ensure they stay together in reasonable harmony. As a result, while the Beatles' legacy has been unmatched in influence over the decades, the Rolling Stone's longevity as one of the great rock bands of all time is near-legend.
* The Beatles if you're aware that heroin addicts often seem to prefer sweets to real food). A bit sadistic, regardless: think of the bridge ("You might not feel it now...") BTW "Good News" is an English brand of chocolates; think Whitman or Russell Stover for an American equivalent.
* The Beatles, imagines a crowd responding to the singer's heartache this way.
* The Beatles' "I'm Looking Through You" try to invoke this: Paul sings his

grievances about the failing relationship, while underneath John and George's "pa pa pa pa pa pa" is the girl doing her best to make them fall into deaf ears.
* The Beatles in a joking line about "Georgia girls" in "Back in the U.S.S.R.".
* The Beatles. In Britain, it was a 7" EP, encompassing most (but not all) of the songs from the TV movie. "Penny Lane" and "Strawberry Fields Forever" were not present, as British practice at the time was to keep singles and albums totally separate. The US version was an expanded full 12" album that restored the single tracks and added a few more songs as well. In fact, now the US version IS the canonical version of the album on both sides of the Atlantic.
* The Beatles: In "Can't Buy Me Love", the boys are on holiday in Polynesia where George is trying to break open a coconut. When he sees a monkey eating a freshly broken one, he asks "How do those tiny monkeys ever open those big coconuts?" The monkey throws a coconut at George's head, knocking him out cold and breaking the coconut open. John uses the same ploy to escape the tribe chief's administrators when he's forced to marry the tribe chief's daughter.
* The Beatles in "Hold Me Tight," George and Ringo are chasing a mysterious figure up the stairwell of the Statue of Liberty. Ringo slips and tumbles back to ground level where he faces a guard.
* The Beatles: In "I'm Happy Just To Dance With You," after the boys find themselves in an Italian street festival:
* The Beatles: In "Not A Second Time," a very off-model Paul is given eyelashes as the boys rehearse their song.
* The Beatles in the early 70s, at a time when the band had recently broken up and Paul and John were still supposed to be at each other's throats. A fan encountered John strolling around Greenwich Village with an "I Love Paul" button from the days of Beatlemania. Wondering if he was making some kind of ironic statement, the fan asked him why he was wearing it—to which John replied, without missing a beat and without a trace of sarcasm, "Because I love Paul."
* The Beatles. In the end John and others applaud for him, definitely meant sarcastically.
* The Beatles: In the song "She Loves You," "She" tells the singer that she loves "you," who is being sung to.
* The Beatles (in the US and Canada; he stayed with EMI worldwide, and eventually returned to Capitol in the US). John and George's solo albums had already returned to Capitol/EMI/Universal by 2010. Paul's solo catalog didn't return to Capitol until his contract with Concord Music ended in January 2017. Ringo's discography remains scattered across different labels (including Capitol, Atlantic, Epic, and Koch).
* The Beatles is also a great group to do this with, since they sometimes made songs that either included small snippets of other songs' lyrics, or directly referred to them directly. John Lennon continued this trend after the band split up on his solo albums every so often.
* The Beatles is an overview of all kinds of outtakes, demos, live material and early recordings of many of their most famous hits.
* The Beatles is arrested for bashing Joan's and his schoolteacher's heads in with a silver hammer, he appears in the courtroom, and smashes the judge on the head with his silver hammer as he's about to be sentenced.
* The Beatles is essentially what happens when someone has a film camera and films a band suffering from Creative Differences — lots of bitter, snide passive aggressive sniping. There's one famous scene with Paul McCartney and George Harrison having a bitter fight over a chord.
* The Beatles is nearly 3,000 words long, while the Chamberlin article is about half that length.
* The Beatles: John is the only Beatle appearing in "If I Fell," while only George and Ringo appear in "Devil In Her Heart."
* The Beatles: John is the only Beatle appearing in the episode "If I Fell". George and Ringo only appear in "Devil In Her Heart" and figure prominently in "Hold Me Tight".
* The Beatles. John Lennon based it on newspaper stories he read, and, as mentioned

below, British newspapers often will list county names after town names. Hence "4,000 holes in Blackburn, Lancashire."
* The Beatles John says "Hey, wait!" when two Pauls turn up in "No Reply". One of the Pauls is a master of disguise.
* The Beatles. John uses this to prank the other Beatles with an alarm clock.
* The Beatles kid (and pretty sadistic) that uses the title hammer to murder a girl, his teacher, and the judge who took his case, in front of a full courtroom.
* The Beatles' last ever live performance, John Lennon stepped up to the microphone and said something that he must have said dozens of times during the band's teenage years: "I'd like to say thank you on behalf of the group and ourselves and I hope we've passed the audition."
* The Beatles. Later, when he was allowed to write songs, he proved his innate talent was the equal of his comrades with "Something" and "Here Comes The Sun" amongst others.
* The Beatles made it famous with the eponymous song, it would be better to keep it as is for the tourist traffic.
* The Beatles made its television premiere in 1967, it was on NBC. Since it was in black and white, NBC certainly couldn't use the peacock opening, so they used an animated penguin just standing there flapping its wings.
* The Beatles "Maxwell's Silver Hammer." Joan is a nerdy science student with no social life who spends her nights doing experiments all alone. One evening, out of the blue, a classmate of hers named Maxwell phones her for a date. A knock at the door, she answers it, Maxwell is on her front porch... and caves in her skull with his trusty argent bludgeon.
* The Beatles McCartney was upset because a marching band in the movie was playing horns on it. Never mind the original Isley Brothers version actually did have horns on it!
* The Beatles — some of the cover songs on their early albums and EPs were well known rock and roll and R&B hits, but many were obscure singles or album tracks which the band just happened to like:
* The Beatles' member Ray Thomas. Ray says he was awoken one night by groupies who had apparently climbed three floors up the outside of the hotel wall, to break in to his room through the bathroom window. Who were dissappointed they'd only got the flute player, when they were aiming for Justin Hayward or John Lodge. Ray said his ego was further defalted when the Beatles turned his story into a song, and he didn't get a penny of any royalties for it.
* The Beatles' "Michelle" has the line "These are words that go together well" resung two lines later in French: "Sont des mots qui vont très bien ensemble."
* The Beatles, modern recording techniques such as layered, multi-track production.
* The Beatles of a concept album, even if the idea didn't quite survive in the final product.
* The Beatles of their own on ABC in 1965. Despite the cheesy animation and The Beatles themselves did not being involved, the show got higher ratings than ABC's regular Monday-through-Friday daytime shows.
* The Beatles, one of the few times they allowed their music to be used in a TV show, because they were huge fans of the show. At one point, they were working with Patrick McGoohan to make a movie based on the property.
* The Beatles onwards) has often been criticised for being shamelessly cheery, lovey-dovey, and family-friendly, with "Yellow Submarine" considered the point where the band had started writing music for children. This, however, was a problem right from the beginning, as Brian Epstein deliberately moulded them into an inoffensive, radio-friendly group to distance them from their more rebellious Quarrymen/pre-1960 era - resulting in oodles of light-hearted boy band-esque songs. The band did, at times, attempt to portray themselves as less politically correct (for example, the "Butcher cover" and John Lennon's increasingly dark, anti-establishment songwriting) but were frequently held back by the pressure to keep their (mostly) pristine image intact, and this pressure contributed to their eventual break-up.

* The Beatles opens with the main character standing on a beach making a plea for the audience 'to listen to his story.' The entirety of the movie shows how he got there over the course of about three years or so.
* The Beatles. Possibly written about pre-fame member, the late Stu Sutcliffe's mourning girlfriend in Germany, Astrid Kirchherr.
* The Beatles' recording career lasted just 7 years, but in that time they completely changed the landscape of popular music, and managed to crank out a whopping thirteen studio albums. The band broke up before any of the members had turned 30.
* The Beatles refused to view it altogether for the rest of their lives.
* The Beatles, representing the controversies the group triggered in both the U.K. and the U.S. after Beatlemania's initial wave. As the scene climaxes, the music becomes a sinister combination of "Helter Skelter" and "I Want You (She's So Heavy)".
* The Beatles' "Revolution" got such a big backlash that it's more or less the reason you only hear cover versions of their tunes used for this purpose, unless it's advertising something Beatles-related.
* The Beatles, Ringo is flapping his arms and flying around the room, which John says is impossible. When Ringo grasps hold of this revelation, he drops to the floor, landing on his head.
* The Beatles: Ringo Starr was portrayed as a complete bumbling idiot.
* The Beatles said he did feel guilty about it for years, until the Marcos regime was unmasked as being a dictatorship, which made their refusal a relief to him.
* The Beatles sang songs about friendship, life, love and desire, and often sang it from the persona of good-natured
* The Beatles scenes, developing a more psychedelic-symphonic sound that would come to define much of their most famous work.
* The Beatles' Second Album was ill in hospital, so they didn't record it. This session did result in an amusing demo of "No Reply" (which features John and Paul bursting out laughing at some lyrical mistakes they make), a demo of "It's for You" recorded so Cilla Black could see how the song went, as well as the quickly forgotten song "You Know What To Do" (with session drummer Jimmie Nichol).
* The Beatles seeing a ratings boost for the weeks featuring the Beatles. It also served as an inversion on the Beatles' part, as they refused to go to the US until they already had a number one single on that side of the Atlantic.
* The Beatles shows them crossing a street, again from a distance, but they are clearly on the foreground.
* The Beatles singalongs usually have impeccable spelling of the lyrics (flashed on the screen during each song), but the singalong of "I Should Have Known Better" has a glaring error. The line "You're gonna say you love me, too" is printed out as "Your gonna say you love me to."
* The Beatles singing "John John (Let's Hope For Peace)" to the feedback of electric guitars. The band exited the stage while the instruments continued to feedback, until their roadie turned their amplifiers off.
* The Beatles so much that when their first film came out, he watched it almost nonstop on loan from the studio. When time was up, he very reluctantly gave the film back. Apparently, Paul McCartney was a little bit wary at first, but his wife Linda assured him that it was all right.
* The Beatles song "Only a Northern Song" references itself, telling how it was intentionally written badly.
* The Beatles song "Paperback Writer," the singer tells a publisher that he wants to write paperback books, and that he has just written a book about... a man who wants to write paperback books.
* The Beatles' song "She Came in Through the Bathroom Window" refers to a group of real life Beatles groupies called the "apple scruffs". The song refers to an incident where a few of them broke into Paul's house and stole some items.
* The Beatles' song "Taxman," although it's about British taxes instead of U.S. taxes, is all about this trope.
* The Beatles song "With A Little Help from my Friends" originally started "What

would you do if I sang out of tune? / Would you throw ripe tomatoes at me?". Despite their intention to not do any live concerts in the near future, Ringo (who sings the song) still requested that the line be changed lest fans take it as an cue to actually throw tomatoes at him.
* The Beatles's parts of the song was initially left blank because they couldn't think of a way to change from one to the other, consisting mainly of a bar count and Mal Evans triggering an alarm clock to mark the beginning of Paul's section. Eventually they settled on the now-iconic noisy orchestral glissando, but they were unable to remove the alarm clock from the song, and ultimately decided to leave it in. Considering that Paul's section begins with "Woke up, fell out of bed", that ringing alarm clock fits in perfectly.
* The Beatles sports a heavily '60s-inspired aesthetic, which includes simulated EM scoring reels and sound effects.
* The Beatles: Stage 5, almost everyone knows about them, and they’re referenced constantly in pop culture.
* The Beatles start running through her head at the beginning of her ill-advised downhill ski run with Bolt and Rhino.
* The Beatles 's temple, and wind up in the swimming pool of a nearby hotel.
* The Beatles-style. Eventually, they complain that he's giving away all their disguises by talking about the parts of the ship they happen to be in, and he politely obliges their request that he go narrate somewhere else.
* The Beatles's video for "Free as a Bird" is packed full of references to Beatles songs and lyrics; glimpses of the band members themselves as well as people and places important to them can also be spotted. A good many of the references are obvious, but some can only be spotted on repeat viewings or by slowing the video down.
* The Beatles') "Taxman" was used by H&R Block because it's a virulent anti-tax song. (H&R Block is the biggest tax preparing corporation in America, and it's supposed to help its customers pay less to the IRS.)
* The Beatles. The Beatles performed just five more concerts after that.
* The Beatles the boys are pursued into the horizon by a bevy of fangirls and bevy of mermaids (who they encountered in the last bumper).
* The Beatles. The first instances (John and Ringo) are actually unintentional on the part of the aliens involved; they end up giving George and Paul powers to make them roughly equal.
* The Beatles, the lads crash into a harem tent, courtesy of an out-of-control camel. They promptly get in huge trouble for looking at the girls' unveiled faces, and have to sing their way out, all the while flirting with the girls.
* The Beatles the lads felt like hanging out on the beach and going skiing, so these were written into the script.
* The Beatles themselves as a young lady and an elderly lady happen by:
* The Beatles The refrain of Katy Perry's "Never Really Over" and the bridge from Gwen Stefani's "The Sweet Life" are noted offenders of this.
* The Beatles, the singer describes a woman asking him to take a job driving her car. In the last verse, he agrees, leading her to admit:
* The Beatles. The song was added back for the 30th anniversary version of the film.
* The Beatles". This scene would have explained why Ringo withdrew his hand so quickly the next time they tried to cut it off, as well as how the boys knew to plug their ears in the Scotland Yard scene.
* The Beatles. This was also the first time they were seen with tea shades, having sported Wayfarers until then. Not that it was the only thing that they were changing at the time.
* The Beatles thought it was a laugh to burn the place down at the end.
* The Beatles to perform in Israel in 1965, but certain politicians prevented this due to the "bad effect they might have on the youth".
* The Beatles ' US albums, which often had significant differences in tracklisting and mixes to the UK, got released there decades later. There were two precedents for this, however - a US compilation of songs that hadn't been released on Capitol

albums entitled "Hey Jude" was so popular on import that it got a UK release in 1970. Also, in 1976, the band elected to reissue the 11 song US release of Magical Mystery Tour, rather than the 6 track double EP that had been released in the UK. In the early 2000s, two Capitol album box sets appeared, but US-only. In 2009, the UK albums got remastered, and a few years later the US albums followed suit, being available in the UK for the first time (however, the masters were recompiled from UK mixes, not US ones, annoying completists).
* The Beatles' visit to America in 1964, along with the Beatlemania that followed.
* The Beatles was born. While the title song and its "reprise" relate to this theme, none of the other songs do.
* The Beatles, was derided as a mess of half-done songs and sloppy editing, and arrived in stores after they'd broken up. However, it contains "Let It Be", "Get Back", "The Long and Winding Road", and "Across the Universe", some of the group's most famous and beloved songs.
* The Beatles wasn't released again until the 2012 DVD and Blu-ray special edition rerelease of the movie. Purists don't like the US album because it apparently messes with the band's concept - but the band actually preferred the US album and reissued it as such from the 70s onwards.
* The Beatles" was once used in an ad campaign by the electronics chain H.H. Gregg to advertise themselves as the chain that is able to help with any issues one might have on buying and using electronics.
* The Beatles was released worldwide on CD on 1 June 1987, so that it would indeed be "twenty years ago today."
* The Beatles went through this over the course of their career. If you look at a photo of them from the early 1960s next to one from the late 1960s, you might almost be forgiven for thinking you were looking at two different bands. Roughly, it goes something like this:
* The Beatles were already popular in Great Britain in 1962, before they went global in 1964.
* The Beatles were for the most part rather dismissive of his songwriting efforts and tended to treat him as the baby of the group because he was the youngest didn't help matters much.
* The Beatles; when the Beatles recorded this song, 95% was indeed the tax rate in Britain at the top tax bracket, which the Beatles' earnings put them in.
* The Beatles: When the cavalry rides in to the rescue to repel a band of invading Indians (episode "Little Child"), one Indian does a facepalm and says "Don't they ever get tired of winning?"
* The Beatles when they see that Sgt. Pepper's Band, encased in a big glass ball, is the spitting image of themselves (or as John explains it, "extensions of our own personalities").
* The Beatles, where the protagonist is glad to be back home after a long and terrible flight.
* The Beatles, which generally stuck pretty closely to the Beatles' arrangements of songs, made that one roughly 50/50 Beatles/Cocker.
* The Beatles, which is close enough since it's actually "Everybody's got one, got one, got one" (the other one is "Oompah oompah stick it up your jumper").
* The Beatles, whose songs written for Ronan Keating helped sustain both their late 90s successes well into the 2000s.
* The Beatles, who were the leaders of the Labour Party and the Conservative Party, respectively.
* The Beatles, who yells obscene things at the Queen and is described in the lyrics as "a dirty old man".
* The Beatles: Why George, of course! During the early years, he only wrote two songs per album. In addition, he was overshadowed by songwriters John and Paul, and clowning Ringo. Eventually, his songwriting skills benefited him the popularity in the band.
* The Beatles, with all their number one hits, on the 30th anniversary of their break-up in 2000.
* The Beatles, with almost every subgenre of rock music after them. Musicologically

speaking, in this day and age, to say a certain rock band is "Beatles-like" is redundant.
* The Beatles with songs like "Helter Skelter." Plus, they created the trend for a self-contained band, with the artists playing their own instruments and writing all of their own music.
* The Beatles with the Toronto Symphony Orchestra during a parliamentary crisis in which all the other party leaders threatened to band together and form a coalition government against him — and right after making massive cuts in arts and culture funding. Including the line "I get high with a little help from my friends". Harper's government is staunchly anti-drug, and he says he's never used any himself.
* The Beatles wrote the song "Helter Skelter" in the hopes of making a really manic, distorted, unpleasantly noisy song. The song however received substantial praise, and is considered an example of an early template for heavy metal, punk rock and grunge.
* The Beatles: "Yer Blues" has audible leftovers from a previous take in the left channel, namely John singing early placeholder lyrics leaking through the drum mic. The solo similarly has the originally-recorded solo bleed through Ringo's microphone in the left channel, while the right features the newly-recorded solo.
* The Beatles, you really have to wonder about the Beatles' relationships.
* The Beatniks style of the show, with each headline on the end of a long pole that Joel twirled manually in front of Cambot while vocalizing the musical effect.
* The Beatrice Letters has, "The day was as cold and bitter as hot chocolate if it had been put in a fridge for several hours and filled with vinegar."
* The Beatrice Letters, it explains very briefly what was happened to the Baudelaires after the 13th book. Not a whole lot, just enough to keep the mystery alive.
* The Beautician and the Beast introduces Eagleland values to him, like freedom and democracy, the whole country is stunned, adopt Eagleland osmosis and the dictator falls in love with her. The End.
* The Beautiful And Damned. She wants to be seen as a vamp (and happens to look like Theda Bara, mentioned above) but tries far too hard.
* The Beautiful And Damned. Since the novel is set in the 1910s, she is explicitly said to be an early proponent of the fashion.
* The Beautiful Elite and seek to restore their lost culture, they're still seen as barbaric dirt-dwellers by most humans, and dismissed as either heathen savages or haughty bigots by many fellow city elves. Though this varies from clan to clan.
* The Beautiful Elite's number "In Society" had its small-talk vocal section dropped, though the tune was retained to accompany a dance sequence where the Dogpatchers infiltrate their ball.
* The Beautiful Elite: Unattractive people somehow don't exist, or are extremely rare.
* The Beautiful Elite usually plays it straight, but may not apply it if they are so beautiful that they don't seem human.
* The beautifully done flying elephants at slightly racist record company execs who snootily considered African music could never, ever, take off in the major markets of the West and any investment in a band based on African rhythm was a complete waste of money.
* The beautiful maiden Sansa Stark is physically and mentally abused by her
* The Beautiful People and feigned interest in Angelina and Velvet. The latter takes the cake with this exchange.
* The Beautiful People, and Lacey Von Erich always wore as little as possible.
* The Beautiful People are all multiple time Knockouts Champions, but the entrance is usually the first thing that comes to mind.
* The Beautiful People or someone involved with one of the four. As none of the previous spotlight holders had any direct affiliation it allowed some other names to slip in while the group shift made "Knockout" segments a lot more homogenous.
* The Beautiful People they're smarter than the rest of the knockouts, no matter how many times they are proven wrong.

* The Beautiful People tried to trademark the name and start her own Beautiful People.
* The Beautiful People used to have a pink night stick they called "The Ugly Stick".
* The Beautiful People, who had tried to rejoin the group early into her fourth TNA run, was happy to see Sky go.
* The Beautiful Skies of Houou High and don't ever bring it up anymore.
* The Beautiful South - "A Little Time": the male singer has a trial separation from the female singer, saying he needs some space. When he tries to get back together, the female singer (who suspects "space" means "other women") isn't having it.
* The Beautiful South also wrote "Song For Whoever," which subverts the trope; the musician is writing songs to keep him in money ("I love the PRS cheques that you bring") based on whoever his latest girlfriend is — whose name he has conveniently forgotten.
* The Beautiful South features an old man looking back on the long relationship shared with his partner, which still seems to be going strong.
* The Beautiful South song of the same name sells "rum by the kettle-drum, whisky by the jar". While the size of the jar isn't clear, an orchestral kettle-drum would have a volume of over three litres.
* The Beautiful South, while massively successful in their native UK, only ever made it twice on the singles charts across the pond; "We Are Each Other" and "You Keep It All In" both cracked the top 20 on the Billboard Modern Rock Tracks chart. After this, nothing else.
* The Beautiful South who, according to leader Paul Heaton, split due to 'musical similarities'.
* The Beautiful Suzuka was humiliated by the super strong Younger Toguro, he became obsessed with proving that skill is superior to strength, so he spent all his time working on special techniques instead of his strength. However, Genkai pointed out strength and skill are equally important and mocked him for not building up his strength before beating the shit out of him.
* The beautiful useful notes: Brazil page has a beautiful example of this with the beautiful word, "beautiful".
* The Beauty and the Beast type relationship between Rumpelstiltskin and Belle on
* The Beauty and the Beast unit wear animal-themed powered armor/suits, while the Haven Troopers (aka FROGS) wear form-fitting suits that allow them to leap over 2-meter walls in a single bound.
* The Beaver Patrol) was written in 1967 and 1969, at a time Iran was still on friendly terms with the West. The Iranians were portrayed in a positive light, while the Kurds were portrayed as savage raiders. After the Islamic Revolution in 1979 and 9/11, those portrayals would be reversed in Western media.
* The beaver woman was misguided, but she is shown to genuinely care for her (adopted)son.
* The Bechdel Test, and there are an astonishing number of sexist cases that pass this test.
* The Bechdel Test: Does a work feature at least two named female characters and, if so, do they have a conversation about something other than men?
* The Bechdel Test, has expressed reservations with the way that it's taken as a simplistic measure of whether or not a work is sexist.
* The Becoming series is a Zombie Apocalypse where the zombies are against a bunch of badasses including a US Marine, Israeli Special Forces operative, and SWAT officer teamed up.
* The Bedfellows, this is a very bad idea; the conversation below only proves it.
* The Bedford Incident. A gung-ho destroyer commander harasses a Soviet sub with the intention of forcing it to the surface. Unfortunately he also rides his crew equally hard, so a keyed-up officer launches an anti-sub missile when he hears the words "Fire One" twice in a row (the captain was actually saying "If he (the sub) fires one, then I'll fire one"). The by-now equally keyed-up Soviet submariners respond with an atomic torpedo before they're destroyed. Downplayed in that

tactical nuclear weapons, like atomic torpedoes, tend to lack the technological protections and locks that are used on strategic nuclear weapons, like nuclear missiles.
* The Bedlam in Goliath, about the band's experiences with a ouija board.
* The Bedroom Philosopher placed a slowed-down, whispered backwards message on the song "I'm So Postmodern", targeted at soap actor Shane Porteous: "Shane Porteous, buy a smock". Then the last line of the song is "I'm so postmodern I prerecorded this song, and laced a message subliminally telling Shane Porteous to buy a smock". On the CD, this is followed by the song played backwards rapidly, so you can see for yourself.
* The "Bee-atch!" scented air freshener also surged in popularity due to the movie. It ended up being backordered for months.
* The beefalo — part American bison, part domestic cow. While they have traits of both bison and cattle, they look remarkably like Old World water buffalo, save the horns.
* The Bee Gees "New York Mining Disaster 1941". (To be picky, it was inspired by the Aberfan Mining Disaster 1966, according to the other Wiki.)
* The Bee Gees' "Tragedy" and are even more shocked that the original version is by the same group who recorded arguably the most popular disco song ever written, "Stayin' Alive".
* The Bee Gees was originally sequenced with two extra songs - "We Lost The Road" and "Country Woman," which made for two overly-long sides. The former was held for their next album ("To Whom It May Concern"), while the latter became a surprisingly good B-side.
* The Bee Gees (which bears "starring Sgt. Pepper's Lonely Hearts Club Band" in the credits) back into TV syndication nationwide while Capitol re-released the Beatles album with a decal reading "the original classic."
* The Bee Gees.... which is technically correct. While sourced from Robin's solo album 'Walls Have Eyes,' the track was not only written by all three brothers, but features Maurice and Barry on backing vocals.
* The Bee Gees, who were the face of disco in the late 1970s. Many were celebrating in the early 1980s when their amazing hit streak of the late 1970s came to a sudden halt (after 1979's "Love You Inside Out"), but even though they no longer dominated the charts, the Bee Gees — always well-respected for their harmonies — continued to sell out concerts, its members (specifically, Barry Gibb) continued to write hit songs for other artists, and in time, their songs that hit during the peak of their popularity began to receive heavy airplay on oldies stations.
* The Bee Gees, written and sung by Vince Melouney, is the only song on a Bee Gees album not written or sung by a Gibb.
* The Beekeeper's Apprentice stage of Sherlock Holmes's friendship with Mary Russell, and Watson makes this observation when the two fall asleep in a carriage, leaning against each other.
* The bee-like Vespa claims to be the fastest Regular — even if that means only those of her own level, it would make her faster than Dan. If this is remotely true, it also means the
* The Beer City Bruisers were a group who occasionally worked in the dark match during
* "the beer!!" explode, but there's enough damage done to cause the dishwasher to leak all over the kitchen uncontrollably. He then shrugs and walks away, whistling innocently.
* The beetle drones that Aku uses to subjugate the populace are helpless against stronger resistances to his reign, like Jack or the Scotsman, but given they can handle the majority of the world's populace with ease, there's really no reason to
* The beetle enemies with silly hats appeared in the penultimate world
* The beetle item can be this for lighter characters as it takes them faster than heavier ones thus giving the victim less time to escape. What is notable is many of the female characters who are damsels in their own games (Zelda, Peach, Palutena) are lighter in weight value than their respective male counterparts (Ganondorf, and all version of Link for Zelda, Mario Luigi and Bowser for Peach, and both Pits for

Palutena) and thus the aforementioned ladies who are kidnapped in their own franchise are fittingly taken away faster than the males of the same franchise.
* The Beezer) had the Numskulls who controlled a real person, with various skulls in charge of different bodily functions.
* The Beforetimes: Survivors of the apocalypse refer to the way the world used to be as something along the lines of "The Beforetimes."
* The "Before You Can Say Anbesol" commercial, for a mouth-sore relief medication. (That said, you
* The Beggars' Guild operates in a somewhat similar way. Residents of particular area or people holding a specific event, such as a wedding, can pay the Guild the fee that ensures that no beggars will show up in the vicinity. Apparently, should someone forget to pay the fee, a surprisingly large number of beggars turn up at whatever event they are holding... A running joke about the Beggars' Guild is the hardship their leaders suffer because while the ordinary rank and file can live off the pennies they receive for a cup of tea, it's beneath the dignity of a Beggars' Guild leader to ask for anything less than the price of a ten-course banquet or a warm mansion for the night. Foul Ole Ron and the Canting Crew, the most commonly seen beggars in the series, are
* The Beggar's Opera, Captain Macheath pays to make his stay in Newgate Prison considerably more comfortable, with no chains and excellent food.
* The Beggar's Opera is a generally lovable highwayman of his era. He's a criminal, yes but also tends to attract more lovers than he can name. Within the story, he gets thrown in jail for wanting to marry one of them when two others set him up, gets busted out by a fourth one, and thrown back in jail when ratted on by a fifth.
* The Beggar's Opera. The narrator (the Beggar), notes that although in a properly moral ending Macheath and the other villains would be hanged, the audience demands a happy ending, and so Macheath is reprieved, and all are invited to a dance of celebration, to celebrate his wedding to Polly. Some stagings, however, have the Beggar making his pronouncement about the need for a happy ending and totally failing to notice Macheath actually being hanged in the background.
* The Beggar Woman is the only character who doesn't neatly fit into a traditional mold. However, she does show several qualities of the modern La Strega character, with her mad ramblings and repulsive appearance.
* The Beginner's Guide, Davey drove away Coda by trying to see the symbolism in Coda's games, even though there was no symbolism involved in his games.
* The Beginner's Guide Davey Wreden, who mentions that the creator of the games showed in this game is a recluse in the very first one.
* The Beginning book. Two years after the Yeerk defeat, terrorists have started attacking alien tourists on Earth. The worst of them are cults that think the presence of aliens is staving off a long-awaited apocalypse.
* The Beginning, narrated by Susan, begins with the Doctor stealing the TARDIS.
* The beginning of an attempt to terraform Mars is mentioned in the finale of
* The beginning of a Python show takes place in an airplane cockpit where the pilot (Michael Palin) tells his passengers that they are on the flight to Glasgow and there is no need to panic.
* The beginning of "Battle Against A True Hero" starts off with one, which becomes the main riff of the song. It plays
* the beginning of Espella's interrogation, just as she is about to explain why the townsfolk fear her, the scene shifts to Layton and Luke.
* The beginning of "How the Test Was Won" features a myriad of clips where Homer gets injured in some fashion.
* The beginning of "Informed" had a woman visiting the ER for a rash on her arm. "It itches! And burns!"
* The beginning of "Mermaid Man and Barnacle Boy IV" has SpongeBob pressing through the wall of the kitchen when he hears that Mermaid Man and Barnacle Boy are at the Krusty Krab, his indentation rendered in CGI before he rips through.
* The beginning of "No Ifs, Ands, or Robots" has Otto trying to pull two fast ones on Olive regarding his broken badge and failing horrifically.
* The beginning of season two, when Sisko decides to remain on the station after

being told to pull out by Starfleet.
* The beginning of stage 6 is a behind-the-back segment, but there is one problem: the camera is at a
* The beginning of the Arrancar arc has the first 'fighting in mid-air' battles. It has a justification (soul reapers can walk on spirit particles) but it still counts because it's damn cool.
* The beginning of the (currently ongoing) "war on drugs" resulted in skyrocketing incarceration rates, hundreds of thousands of people ending up behind bars for nonviolent offenses.
* the beginning of the Eldian Empire (over a thousand years before the present). A lot of the confusion about what happened came from how no one can decipher the texts, having only the pictures to go on.
* The beginning of the finale, "Who Lives, Who Dies, Who Tells Your Story" is this for
* The beginning of the first film plays off Po's clumsiness. He actually
* The beginning of the Hell Train arc was all about preventing Hoaqin from gaining his full powers, because he was extremely evil and dangerous and out to kill the protagonist, and his fully powered form would be completely overwhelmingly powerful compared to the heroes. By the time Hwaryun finds out what's waiting for the characters at the final station, though
* The beginning of the joke has Bob being captured, but allowed to send his horse with a message. The hearing impaired horse brings back a woman.
* The beginning of the manga turns out to be one itself. And this one's actually the complicated one, as it's not only the longest, but spans the entire plot and its background.
* The beginning of the music video for Loverboy’s 1983 single "Queen of the Broken Hearts" features a bit of a young woman operating a futuristic machine. This was the winner of an
* The "beginning" of the opening act in the machinations of the villains' occurs in the pilot episode. The show opens to a narration by a mysterious woman that ends with a male narrator refuting her darkness by expressing faith in a "smaller, more honest, soul". The same episode quickly reveals the male narrator to be
* The beginning of the same episode has Homer spinning in his chair saying, "Chair goes round... Chair goes round..."
* The beginning of the second case makes it so painfully obvious that the victim, Rex
* The beginning of the song "Bump In The Night" by Allstars has a talking section similar to the Thriller example below which is followed by an evil laugh.
* The beginning, when the terrorists are searching for Iron Man right before the killing starts.
* The Begnion Empire is explicitly a theocracy, where all the members of government hold religious ranks and the Empress is also head of the church.
* The Beguiled for her. It wasn't, but she was now eighteen and refused to do it again. She has done occasional voice acting and presenting by her own choice.
* The Behavioral Sciences team theorise that the Chesapeake Ripper, a serial killer who removes organs from his still-living victims, is keeping the organs as surgical trophies.
* The behavior difference is also likely what keeps Usagi and co. from recognizing Uranus and Neptune as Haruka and Michiru. When in their civilian forms, the two are very nice to them, in contrast to their Senshi identities. But, you'd think that the more experienced Haruka and Michiru could figure out that Usagi is Sailor Moon —
* The Beheaded Freshman and Other Gruesome Tales. The lead tale (from the title) is about a freshman wanting to get into an elite club but the people blindfold him and kneel him down, saying they are going to behead him. They describe one raising the axe high over his head (the freshman thinks it is a prank) and then drop a cool washcloth on his neck. The freshman screams the moment the cool touches his neck (thinking it is cold steel) and collapses. Scared, the others call an ambulance; Seems the freshman had a heart problem that the others did not know and the fright

caused a heart attack. Whoops!
* The Behemoth is an example of this, though it edges toward parasitism — it gives Roger super-powers, including the ability to transform into the titular Behemoth, but grows whenever he uses his powers. It is left vague how large it might grow and how completely it might take over.
* The Behemoth is an interesting deconstruction: she's actually a fairly normal young woman, with her own life and aspirations, but her best friend — the lead character, Roger — sees her as something like this and develops an emotional dependence upon her as a result, despite never being able to romantically approach her.
* The Behemoth super tank in "Metal Urgency." Played straight. It appears Puma-Dyne made just the one tank, and had no means of remotely shutting it down in the event it gets stolen. Its forcefield and thought-controlled arsenal make it impervious to pretty much everything the Enforcers throw at it... meaning they can't stop a tank
* The Beiderbecke Affair and each of its two sequels, having taken what he describes as a 'sideways career move' each time.
* The Beiderbecke Affair, Jill Swinburne loses her boyfriend, Trevor Chaplain, to his former fiancee, Helen of Tadcaster, in a coin-toss after a night of heavy drinking. Mrs Swinburne honours her agreement with Helen, but Mr Chaplain goes back to her anyway because "nobody wins me at the toss of a coin." It is strongly suggested that this is a new development in Trevor's persona since the time when he and Helen were engaged.
* The Beiderbecke Connection, which has "a dissident being smuggled over the Yorkshire-Lincolnshire border" via the Humber Bridge.
* The being known as Relic is even older than the Life Entity, since he is the only remaining member of the LightSmiths, who were the first discoverers and users of the emotional spectrum, doing things even the Guardians couldn't even imagine. Relic is from the previous universe before the current DC universe the Life Entity created.
* The being with code-name "DRAGON", aka Aiwass, seems to have this as well. "
* The Belchers themselves are noticeably darker skinned then the white characters and they all have black hair.
* The Beldrobbaen, a drow clan and more or less a nation onto itself, are in a similar state, having lost an entire generation of children during a demonic accident. Since then entire houses have died out and the clan is widely thought to be on its last legs. Their cousins from a neighboring city, the Balvhakara, have no such problems and demonstrate that this state of affairs is purely the result of bad luck and clinging to a tradition of turning the fathers of Val children into
* The Belgariad. All the merchants are really spies, and most of the spies aren't averse to making money on the side.
* The Belgariad already (even if Belgarath doesn't generally look or act the part - though he won't hesitate to demonstrate it if needs be). However, a number of the main cast undergo this between the first series and the second:
* The Belgariad, although he also happens to be the greatest military strategist in the Kingdoms of the West and quite possibly the most intelligent ruler in the world at the time. Unfortunately, his health suffers late in the story largely in part of this obesity.
* The Belgariad and its sequels, a friendless background is par for the course for the Salmissras - it's very hard to make friends in a court where everyone is trying to poison everyone else in order to increase their own power and influence, and the royal pharmacologists (who are the real power behind the throne) prefer to keep their queens lonely and codependent so that they'll constantly seek to get drugged out of their gourds.
* The Belgariad and need a change of underwear at the mention of his name.
* The Belgariad and sequels/prequels, with emphasis on Algarian Light Cavalry and Mimbrate Arend Heavy Cavalry.
* The Belgariad and their arguments occasionally descend to this level when neither is willing to concede the last word or admit defeat. One fight, in particular, is

mostly just the two of them shouting "Spoiled brat!" and "Stupid peasant!" back and forth at each other until the adults finally break it up.
* The Belgariad, and the West (especially the Alorn kingdoms) preparing for a huge war with the East.
* The Belgariad, Arendia spent centuries mired in a bloody civil war between the knights of Vo Mimbre and the rogues of Vo Astur.
* The Belgariad, Arendia spent many centuries locked in a brutal three-way civil war between the duchies of Mimbre, Asturia, and Wacune.
* The Belgariad are stones which embody the conflicting destinies of the universe and bestow godlike power on anyone they allow to hold them.
* The Belgariad. A talented journeyman glassblower gives Garion a beautiful glass sculpture to present to his Aunt Pol. He admits that the reason he's doing this is that if people in the court see the King's aunt in possession of one of his works, they might commission some work from him themselves, and he needs commissions if he wants to be able to open his own shop, which he has to do before he can seriously court his master's daughter. When he's next seen, he's succeeded in becoming a master with his own shop, though whether or not he got the girl isn't mentioned.
* The Belgariad: Basically, a star died in the wrong place. This caused a chain reaction that destroyed an entire galactic cluster outside of schedule. The result was that the purpose of the universe, the force of destiny, was divided into two opposing awarenesses. The contention between them causes everything that happens in the series.
* The Belgariad) before he stole and attempted to dominate the Orb of Aldur. When he raised it to crack the world, it destroyed his looks and left him in permanent pain, hiding his now deformed face behind an iron mask.
* The Belgariad, Beldin doesn't have much use for flattery, so this is how he shows affection. She picked up the practice from her father. Before Polgara was born, Belgarath and Beldin traded insults for the same reason, and even afterward, they would do it occasionally for old time's sake.
* The Belgariad, Belgarath is one of the oldest and most powerful beings in the world but spends most of his time loafing around or reading. To be fair, though, he's also painfully aware of that even the slightest use of his powers could have grave consequences for the entire world.
* The Belgariad, Belgarath ran across a troll and managed to disembowel it to buy enough time to escape. It actually recovered and retrofitted someone's armor to use as a crude cuirass, so the same strategy was no good the next time.
* The Belgariad Belgarath uses mystical-sounding triggers and once scolds Garion as unprofessional for directing his sorcery with silly words like "Push!"
* The Belgariad, birds seem to instinctively know (and love) Polgara, even if they've never met her. The Emperor's bird even chews him out for not recognizing her.
* The Belgariad, but Garion is the first to admit he doesn't have enough understanding of the forces involved, so he tends to leave that sort of thing to his Mentors.
* The Belgariad by David Eddings avoids this for the most part, which makes it difficult to say whether or not he actually is doing it. The protagonists encounter "rock wolves", which might be hyenas, or might simply be hyena-like monsters (vaguely wolfish, humped backs, hooting laugh). Since Garion does not know what a hyena is, he cannot contrast any differences the rock wolves might have.
* The Belgariad by David Eddings, several characters fall for this, usually cut short by another character suggesting "Why don't you just stop talking now." or "What a fascinating observation, why don't we pursue that line of thought." or similar.
* The Belgariad, cures any poisoning? Imagine wearing anti-poison as a perfume (Sadi wonders if it works as antivenin as well; we never do get to find out). One of the funnier scenes in the Malloreon plays out during this arc, especially when Belgarath tries to get the plant to grow.
* The Belgariad dangerous. Fittingly, they're from a culture that worships Belar, the bear god. It's not certain whether this is just a happy coincidence or a very

direct blessing from Belar himself, but it is definitely awesome. There is also an extremist sect devoted to Belar known as the Bear-Cult. In the Belgariad they're a mild annoyance, but in the Mallorean they definitely make things worse. Belar, meanwhile, generally appears as a young blond-haired warrior, and not a bear.
* The Belgariad demon summoning includes the drawing of a protective circle which the summoner stands within. This is to stop the demon eating the summoner should the binding break, allowing him opportunity to banish it.
* The Belgariad, Drasnian merchant Silk is massively involved in trading goods and services pretty much everywhere in the world, even in the Angarak nations who are supposed to be opposed to Drasnia and the other western countries. At one point the emperor of the Mallorean empire has it pointed out to him that, were Silk and all his business enterprises to be removed, the Mallorean economy would probably collapse.
* The Belgariad, during Ce'Nedra's pregnancy, she got these sorts of cravings, mainly just to mess with Belgarion. In a subversion, it was never a problem, since Garion (a sorcerer) could simply create whatever food she wanted out of thin air.
* The Belgariad encounter the dragon (there's only one, long story) they scare it away by damaging its tail, which is effective because it's never encountered anything that could injure it before.
* The Belgariad focus on two sides working towards two mutually exclusive prophecies. However, as absolute as these prophecies appear to be, at the same time there is a lot of scrambling by folks such as Belgarath to make certain events go as outlined.
* The Belgariad for Angarak invaders, designed for the sole purpose of letting the Algars strike from every kind of ambush imaginable. The Algarian king jokes that the Angaraks insist on believing that there's something incredibly valuable about the place to justify how fiercely it's defended, when really it's just easier for the Algarians than hunting them down across the open plains.
* The Belgariad for immortality. Neither the protagonists nor the baddies were OK with it (the baddies wanted no conditions).
* The Belgariad for the following reasons: (1) The victim was himself a sorcerer (thus gifted with eternal life) so couldn't die of natural causes, (2) No other sorcerer could match the particular signature of Belgarath's sorcery so couldn't match the spell to pull him out, and (3) Belgarath himself did this to make him pay for several millennia of evil so felt no inclination to undo it himself.
* The Belgariad. Garion finally fixes it and finds a diamond underneath, reminding Belgarath that he'd put it there to see how long it would take to grind down to dust, then promptly forgotten. By then, he's so used to the loose step that he puts the diamond back.
* The Belgariad, Garion grew up on a small farm, specifically isolated from the larger world by his "aunt".
* The Belgariad: Garion knows that his "grandfather" Belgarath and "Aunt" Polgara are really 7000- and 3000-year-old sorcerers, but some of their comments make him uncomfortably aware of that fact. When they camp in the ancient ruins of Vo Wacune, Polgara reminisces sadly about how beautiful the city once was, and he realizes that she still mourns a nation that fell centuries before his birth country was even founded.
* The Belgariad: Happens when Garion starts asking Lelldorin some questions about this plan he stumbled upon. When he sums it up Lelldorin is horrified.
* The Belgariad has a lot of fun with this, particularly regarding nautical terms. Land-based characters are frequently called out on their use of "tip over" instead of "capsize", "right" instead of "starboard", and "boat" instead of "ship".
* The Belgariad has a rare heroic version: the Bear-Cult is xenophobic, reactionary, and outright seditious, but Queen Islena can't imprison its leader Grodeg because he's also the High Priest of their god. Instead, she calls the bluff on the Cult's militaristic posturing and sends all its leadership to lead the defense against an invading army, which decimates their numbers and results in Grodeg's death.
* The Belgariad has made no secret of the fact that Belgarath is his avatar, while

Polgara is his wife and co-author, Leigh Eddings.
* The Belgariad has seven gods, all brothers, above them their father UL, and over all else the disembodied Purpose of the universe.
* The Belgariad have children his own age to play with) and with Silk (which was noted as being an especially close friendship compared to Garion's other relations).
* The Belgariad having nothing but contempt for one another, their fellow demons, and the entire human race.
* The Belgariad He also mentions in his own spin-off books that details his origin that if he could ever confirm his suspicions that Zedar was involved in the suicides of two of their fellow Aldur followers, he would put him somewhere even less pleasant than where he is now.
* The Belgariad, he calmly finishes a dish that reduces his friends to tears.
* The Belgariad he expresses regret on this and surprise that the curse wasn't lifted.
* The Belgariad, he gave in to his barely-suppressed lust for power and swore fealty to Torak.
* The Belgariad he's grown into the position. He's very mild in temperament, and even when he gets very angry (at one point they're in a Temple of Torak and a major sacrifice ritual (human, of course) is going on all he does is put out the temple fires — since if the hearts can't be burned, there's no way to continue the sacrifices.)
* The Belgariad Hettar is very interested in discussing this interesting topic, and has no intention of letting her get away.
* The Belgariad includes the horrible realization by Garion that the strangely shaped mounds of moss in the Arendish forest are corpses from their centuries-long blood feuds.
* The Belgariad. In fact, several of these characters aren't even mentioned until the second quintet, which suggests that the characters were created specifically for this trope.
* The Belgariad in his persona as the Asturians' cultural archenemy, the Duke of Mimbre.)
* The Belgariad in holding up under the noble love of a woman he can't have — her husband even approves of their love! — at least until said husband conveniently dies, leaving the field wide open.
* The Belgariad introduces Belmakor and Belsamber, two previously-unmentioned disciples of Aldur who both committed suicide shortly after the War of the Gods. Their deaths help explain how Mallorea ended up being such a huge blind spot for Aldur's disciples, as Belmakor and Belsambar would have been sent to gather reconnaissance in that region if they'd lived.
* The Belgariad is very old (as in thousands of years old), very smart and good at magic, and generally very cranky. Beldin is not quite as old, but even smarter (and considerably crankier). Both of them are definitely on the side of "good", but that doesn't mean they're pleasant to be around.
* The Belgariad, it is against the law to practice sorcery in the Empire of Tolnedra. Which is ironic, because Tolnedrans don't believe in sorcery or magic as a matter of principle.
* The Belgariad, it is heavily implied that they will be getting children for a long, long time.
* The Belgariad It's eventually revealed that he wasn't always like that.
* The Belgariad, it's mentioned that human skin is seldom used for writing evil books. But only because it's really bad at holding the ink.
* The Belgariad. Liselle is straightforward and discreet about hers, at least compared to the others. She only carries a couple of small, simple daggers.
* The Belgariad lives for this. As one description puts it "little man with a face like a weasel who thinks he's funny".
* The Belgariad make their way through an unmarked quicksand maze and then get ambushed by mooks. One mook gets chased into the bog, rides straight off the safe path, and sinks to his doom. Durnik regrets only that he couldn't save the horse.

* The Belgariad) make the whole Tolnedran Empire like this; the current ruling house and its supporters hold most government jobs. It's said that even the customs officers change after dynastic succession. This isn't presented as entirely negative: families in the Empire are so extended and politically active the nepotism is less about giving incompetent family members sinecures as about filling positions with people who can be trusted not to be conspiring against the current imperial family.
* The Belgariad", most potential sorcerers don't survive the discovery of their powers.
* The Belgariad mythos, each god had a signature colour and totem animal.
* The Belgariad. Not only are they fast, but their bite is venomous — once a person's been bitten, they're doomed even if they are pulled out of the water before the leeches have drained them.
* The Belgariad of Arendia, and just about everybody else who crosses her path. She keeps calling people 'dear' and telling them they're 'good boys'.
* The Belgariad of sorts, after the genocide, the Marags' gold-filled country becomes so overrun with vengeful ghosts that no one can set foot there without going insane.
* The Belgariad of the first series) and has been for several thousand years, to the point where his reputation is more or less all that's keeping them from invading in their god's name, making him a firm member of The Dreaded.
* The Belgariad only because they're forced to, and are freed from his grip by the end of the series without any major political upheavals.
* The Belgariad over the course of the novels to grow out of the desire to build this kind of society.
* The Belgariad pairing people off, and thus most of the heroes end up in relationships by the end.
* The Belgariad. People and animals who are "called" by one of the setting's gods can attain the status of sorcerer, which grants them power everywhere, not just within the boundaries of their god's territory as with mere priests, and makes them functionally immortal. They seem to choose the age they show the world -Belgarath looks old, but Polgara looks young. However, as the deaths of some of Belgarath's brother sorcerers show, they aren't even close to completely invulnerable.
* The Belgariad plays with this trope a lot, probably because it focuses on the doings of kings and lords. Large portions of the prequel novel
* The Belgariad, Polgara does this the old-fashioned way. She puts a trustworthy person in charge of investing the token rents for land in her former duchy ... and then lives a couple thousand years. By this point, she could probably buy herself a kingdom if she felt like it, and may be one of the richest if not the richest person in the world. Too bad she has absolutely no interest in money. This may also not be an example, because the money isn't invested; it's simply the accumulation of small rents over the course of millennia. Her case is also aided by two things:
* The Belgariad posts hidden sentries who are so incredibly stupid that Polgara doesn't notice their thoughts at all.
* The Belgariad prequels. He'd been living in isolation for centuries, so when he was ready to lead an Angarak army against the West his first step was "remind everyone who's in charge here".
* The Belgariad, prophesied to be a Child of Light that will defeat the evil god Torak and rule as a sorcerer king.
* The Belgariad provide world maps like this. Interestingly, their respective sequels both take place on the then-charted lands of the far east, complete with maps. It should be noted that Eddings takes world-building very seriously.
* The Belgariad race, possibly even more so than even Belgarath himself.
* The Belgariad, Rhodar is a tactical genius who is eventually killed not in battle or heroically, but from a general organ failure brought about from years of overeating.
* The Belgariad seem perfectly content with eternal life. This is in part because they keep very, very busy. (One, Senji, doesn't even notice he's immortal until he takes a break from trying to turn lead into gold and realizes several centuries

have passed.) Not all of them were so content. Of course, those ones are not around anymore.
* The Belgariad series, many of the Alorn Kings of centuries past had their surnames granted to them upon reaching adulthood, such as Cherek Bearshoulders and his sons. Some, like Uvar Bent-beak, were given their names because of physical characteristics.
* The Belgariad, Silk is completely thrown when he meets up again with Velvet, who he remembers as the child who always pulled his nose. She's been in love with him for years and, now she's on adult terms with him, sets off on a determined campaign to cure him of his bachelorhood. It still takes a while for him to admit that he has indeed noticed she is now all grown up, but she gets him eventually.
* The Belgariad, Silk mentions that in his day, flogging was a punishment for sloppy work by students of the intelligence service's academy. Apparently it's "a very effective teaching tool", though he doesn't comment on whether or not he knows this from personal experience.
* The Belgariad sing while sober. We're never told what exactly they're singing, but it tends to scare off any birds in the vicinity.
* The Belgariad, so both sides stay in the comfort zone of trying to make "their" prophecy happen at the detriment of the other (and the prequels show Belgarath and Polgara going out of their way to make sure things happen as predicted).
* The Belgariad status, that says loads about how she feels about his looks.
* The Belgariad than not. Although, how much of this is David and how much can be attributed to his co-writer and wife, Leigh Eddings, is really anyone's guess.
* The Belgariad that left her face horribly scarred, and nobody could ever bring themselves to let her know. The scene is powerful precisely because of the contrast with Silk's playing a jerk and the overall humorous tone of the series.
* The Belgariad that this is the careful design on his part: the costume - made by one of the finest tailors of Tol Honeth - has no holes under the patches, the fraying of his tunic is woven into the cloth, and his shoes are unmatching and look like they were found in a ditch, but are actually well-made. The rope for a belt is an artistic touch on his part.
* The Belgariad, the chance to share the world. Belgarath isn't interested, and Ctuchik isn't exactly the most trustworthy person, meaning that it's quite likely he just wanted to get Belgarath's guard down (it didn't work).
* The Belgariad. The Drasnian ambassador to Nyssa is bribing the staff of the Tolnedran embassy for information as part of his intelligence network. The Tolnedran ambassador knows this, and occasionally feeds his staff fake information as a result. The Drasnian ambassador knows this.
* The Belgariad, the Marag people were wiped out long ago by their neighbors because of gold. Centuries later, the protagonists find a Marag woman as a slave in another neighboring country, referred to in prophecy as "The Mother of the Race That Died"; she becomes attracted (for several reasons) to a zealot sworn to celibacy, who returns the affection (despite himself) but holds to his vow... right up until his god tells him that isn't what the god had in mind. By the end of the series, it's mentioned they have a small army of children and counting. (Mara is implied to be giving it a push.)
* The Belgariad. The most prominent one is the Mrin Codex, but there is also the Darine Codex (less detailed than the Mrin Codex, but much easier to read and comprehend due to the insanity of the Mrin prophet), the Ashabine Oracles, and the Book of Kell.
* The Belgariad The only ones other than the Gods who were personally present at the Cracking of the World.
* The Belgariad. (The only reason Garion can wield or even lift it is because said artifact is magically removing most of its weight. At one point, when required to remove the Orb from the pommel, the suddenly-returned real weight of the sword strapped across his back almost drives him to his knees before he can unbuckle it, sending it crashing to the floor.)
* The Belgariad the remaining "prophecy", essentially the sentient spirit of the universe, fits this trope. UL, father of the gods, probably does as well, as would

the king of Hell who is implied to have power close to that of UL. The other gods are more open to debate. One is killed, but this is only because he was a mistake to start with. Whether any god could be killed when the universe itself isn't trying to get rid of them is never addressed.
* The Belgariad, the Ulgos (and the beasts who populate the region where they live) were the product of the gods screwing around with their creation powers. The god UL refused to let His children destroy those poor folks when they'd finished playing around with them, but the other gods refused to claim them, having already chosen their own followers, so those godless people were forced to wander around for centuries until finally the prophet Gorim convinced UL to take them in. Alas, when Gorim went to tell his fellow godless that they now had a new god, only a minority agreed accept UL and follow Gorim to their new home. The rest remained godless, and Gorim made them barren so that they'd all eventually die off; he considered this far more merciful than letting their race persist.
* The Belgariad, the young protagonist Garion asks his Aunt Pol about his mother. A few years later he asks Mister Wolf to tell him about his parents.
* The Belgariad. They wear these in imitation of their god, whose mask covers his maimed face.
* The Belgariad, this is the fate of Silk's nemesis Brill, after a short but ugly battle atop Rak Cthol (well, technically he was thrown over a parapet).
* The Belgariad this, to which Belgarath states that yes, they can, but frogs breed quickly and he'd rather have one human enemy instead of a lot of annoying frogs.
* The Belgariad to a depassionate Queen who rules with an iron fist and who has a pragmatic view on politics. It also immediately cleansed her mind from the multitude of drugs she was on and her new body were completely detoxed, leaving her sober for the first time in her adult life.
* The Belgariad to be married (he lives in a medieval society), so naturally Pol must resent being single.
* The Belgariad to create time, because there's no way to predict what the results would be if he tries.
* The Belgariad to hide their appearances. The good guys... obtain... a few, helping them get around the city despite the bloody stab holes in their new clothes.
* The Belgariad "to kill each other without disturbing honest people", with the sole purpose of having them accept marriage.
* The Belgariad Torak, after stealing the all-powerful Orb of Aldur, is faced with a war against all the other gods and their followers. To protect himself and his people, he uses the Orb to crack the entire continent in two, turning a pangaea into two distinct landmasses and causing lots of geological fallout and mayhem. The price of this action is that the Orb turns on him, burning away his hand and eye.
* The Belgariad, Torak spent thousands of years in a near-coma after his attempt to use the Orb crippled him. After the Battle of Vo Mimbre, he spent another couple of centuries recovering from the fatal stab wound he received during a one-on-one duel.
* The Belgariad, until he gains enough maturity and perspective to realize that she really is acting in his best interest.
* The Belgariad was a sequel, where the main characters are asked to write their memories.
* The Belgariad was once a shallow sea. When it was drained, the enormous serpents that called it home were left behind and died, leaving skeletons in the black sand.
* The Belgariad when Belgarion has to scare off a demon with the Orb of Aldur. To stop enemies homing in the "sound" that it makes, the effect covers the entire sky above the mountain range the good guys are in making it impossible to zero in on.
* The Belgariad when Jeebers, an elderly personal tutor of her little Imperial Highness Ce'Nedra, explains to the heroes that the emperor has the utmost trust in him. Which is exactly why "the princess knocked on his door deep at night, revealing to him that he got tasked to help her to disguise herself, then sneak her out of the palace without anyone else noticing, and to then escort her (alone) across half the country" ...in a time when people are murdering each other in the

streets due to all sorts of politics. Which is when he notices in sheer horror that the emperor had nothing to do with it and that this was all rebellious little Ce'Nedra's idea. Poor guy.
* The Belgariad, when King Drosta Lek Thunn of the Nadraks ends up clearing a path for the Western forces, betraying his fellow Angaraks, knowing that siding with the Mallorean forces would only mean subjugation, whereas siding with the West might get his fellow Angaraks' boots off of his neck.
* The Belgariad, when the marriage arrangements between Urgit and Prala are being arranged, one line in the contract states that Prala will have the permanent rank of most favored wife.
* The Belgariad, where a ghost story is told near the beginning of the first book, and the leader of the farming community it was told to passes it off as a moralistic sermon about fear and greed. The irony kicks in, in a later book, however, when the protagonists go to Maragor, the place where the story was set and could have actually happened, as it is inhabited by the ghosts of the Marags, slaughtered ages before.
* The Belgariad, where the Sword Fight between the Child of Light and the Child of Dark will decide the fate of the world.
* The Belgariad who put in an appearance later are just shy of indestructible.
* The Belgariad, who sits on a plain wooden chair beneath the Gondorian throne (on the third step I believe)
* The Belgariad with a very few exceptions, where any kind of bladeplay is usually quick, brutal, and to-the point. While combat styles and techniques are discussed, most of the time the characters are doing any kind of sword or knife fighting, they simply kill their victims outright.
* The Belgariad, wizards among the uncivilized tribes maintain their power by summoning demons. It's an incredibly complex process in which a lot can go wrong, and if the slightest mistake is made it invariably results in the demon escaping, killing the summoner, and then going on about whatever business suits it. The demons are forced to fit a shape imagined by the summoner, who must hold their contration while simultaneously controlling the demon like a puppet and making sure their protective circle remains intact.
* The Belgariad worship a god that loves money, which sent them down a road to love money more than Gods, so that they're effectively atheist merchants, and their god couldn't be happier with them. Most Tolnedran characters will cling to their atheism no matter how much the world's supernatural elements prod at them, including a scene where General Varana spends a tactical meeting facing away from the other commanders so that he won't have to see the sorcerers he's working with shapeshifting and casting spells. However, many acknowledge these things do exist, they just "officially" disbelieve them.
* The Belgariad, Zedar, is another, far more sympathetic example, being a former good guy who was drafted into serving Torak.
* The Belgian writer and anarchist Noel Godin specialises in pieing public figures who he thinks deserve it. After pieing Bill Gates, he supposedly said "My work is done here." Another target was
* The belief that children could not lie about terrible things led to the deaths of countless women, men, and even other children during the witch panic that swept mainly through Europe but also the US in the 17th century. Though it wasn't always the children's fault, mind you. Often times they were just saying what they thought the adults wanted to hear. The little ones often had no idea what they were even saying beyond "If I say this a person they're saying is bad will be punished."
* The belief that one must burn to ash the snake one killed: the other snake might glance into the dead snake's eyes, witness the dead snake's final moment, and exact revenge upon the person that killed the fellow snake.
* The belief that only men collect anime figures is why figures of male characters that aren't
* The belief that, when you ran out of power, you could keep perfectly still to delay Freddy's
* The Believer, a Jewish man who joined the American Nazi Party in the 1960s and

committed suicide when his heritage was revealed.
* The Believer: Danny starts a class advocating Nazism, and is later told most "students" are police informants, not actual neo-Nazis.
* The Believers, the female lead has the egg of a parasitic spider placed on her cheek by the voodoo cultists so tiny baby spiders eventually hatch from her face.
* The Believers: The villains are an evil cult consisting largely of upper-class yuppies who have sacrificed their children in dark rituals in exchange for fame and success. They want to recruit the hero to have him do the same thing to his own son.
* The Believer: The Neo-Nazis are divided between thuggish, violent skinheads vs. clean cut normal-looking people who oppose violence on pragmatic grounds.
* The Believer, where Carla appears to have converted to Judaism by the end of the movie. Thanks to her self-hating Jewish boyfriend. Who's a Neo-Nazi.
* The Belkan War standards (a bomb with the blast radius and destructive power of a small nuke but without radioactive fallout, with only 4 of them built) but the main concern of the whole game.
* The Belladonna family are more than capable of taking care of business when things go straight to hell, as revealed in Volume 5. Just ask
* The Bell, a man becomes attracted to his 15-year-old nephew, who is oblivious, instead pining for a girl his own age. It later emerges that the man was thrown out of a Buddhist community somewhere in the East for having sex with an adolescent boy.
* The Bellamy Brothers' 1976 debut single "Let Your Love Flow" was repopularized in the UK in 2008 due to the banking company Barclays using it in commercials.
* The Bellamy Brothers' debut single "Let Your Love Flow" only got to #21 on the country charts, but still gets a lot of recurrent airplay at both oldies and country because it was also their only #1 on the Hot 100. "Old Hippie" is also one of their most famous songs (to the point that they recorded
* The Bellamy Brothers' "Old Hippie" has the line "He's got young friends into New Wave/But he's just too
* The Bella Twins" and it was treated as fun and whimsical. Their feud with Jillian started because they pulled the switch on her in a match, unprovoked, yet Jillian was meant to have deserved it somehow.
* The Bellboy The eponymous bellboy (Jerry Lewis) puts a mesh towel over a sleeping sunbather to protect him from getting sunburned; in the next scene the man's face is sporting a mesh-patterned suntan.
* The Bellerverse is a collection of stories set on Earth long after the apocalypse hits. While the Foundation had measures in place to restart humanity if/ when this happened, this too is far in the past, to the point where the original researchers, staff and even SCPs are now considered gods, heroes and monsters (such as the First King Starel locked away with the dragon Sikayt, in fact Captain Strelnikov who voluntarily became bait to trap the indestructible reptile SCP-682 in an inescapable maze).
* The Belle Stars' most recognized song stateside, "World Domination", though a #2 Hot Dance Club Play hit, didn't chart at all in the UK and missed the Hot 100 as well. Their only Top 40 hit on said chart was a reissue of their 1982 single "Iko Iko" in 1989 due to its use in
* The Bellflower Bunnies has attracted a good amount of furries due to its main characters being a family of cute bunnies.
* The Bellinis, a failed pilot for a show about a widower and his dead wife's family, who like to believe they were big time mafiosos despite having been on the edges of organised crime.
* The Bell Jar Esther realises she has never cried for her father and breaks down sobbing at his graveside.
* The Bell of Lost Souls is located atop one of the highest towers of the Imperial Palace, and is said to be audible from the other side of the planet. It tolls once whenever a truly great hero of the Imperium dies, and while propaganda states that it rings at the death of each
* The Bell of Saint Gerstahl, a holy relic inside Trazyn the Infinite's

collection, began ringing when Abaddon's thirteenth Black Crusade assaulted Cadia, tipping him off that
* The bell rings to end the round, and one guy sucker punches the other. Such a punch would constitute
* The Bells can be named "Obligatory War Crime Scene: The Episode" due to the number of such scenes, including indiscriminately burning civilians, raping civilians, attempting to rape civilians, and so on.
* The Bells delivering her to the afterlife, further justified by the fact that the horse mysteriously vanishes in the next episode. As such, the final episode of the season is Arya in heaven, being rewarded with a scenario in which her murderer is punished, her family is given everything they wanted, and she gets to live a happy escapist life as an explorer.
* The Bells of Death from his mother after losing his family to bandits — everywhere he goes. Whenever he tracked down bandits terrorizing innocent townspeople, he will ring said bells before going on a killing spree; expect loads of dead villains moments after hearing those bells in the film.
* The Bells of Death: The protagonist, Wei-fu, is a swordsman who lose his family in a bandit raid five years ago, but unbeknownst to him his sister actually survived, and was forced into becoming a concubine for the bandit leader. Five years later Wei-fu has infiltrated the bandits' ranks, when the brother and sister meets each other for the first time... in front of a whole legion of villains. They are forced to pretend each other are strangers.
* The Bells Of Nagasaki, a non-fiction account of the atomic bombing of that city by a survivor, was initially refused publication under the censorship regime during the American occupation. It was eventually allowed to be published with an accurate but off-topic appendix about atrocities perpetrated by the Japanese tacked onto the end, presumably for "balance". Versions published after the end of the occupation, as well as English translations, generally omit the appendix.
* "The Bells of Saint John" attempts — and fails — to download her consciousness.
* "The Bells of Saint John" of his survival at the end of the episode.
* The Bells of Saint John, plunge all of London into a blackout, except for the street that the Doctor and Clara are on. After a moment of confusion, the Doctor realises this is to provide an easy target for the oncoming plane that has also been hacked.
* "The Bells of Saint John", the Doctor complains about her not knowing how to use iPlayer (the BBC's online media player).
* "The Bells of Saint John": The TARDIS appears in front of a crowd, and the Doctor collects money in a fez from civilians who think it is some sort of magic trick.
* "The Bells of Saint John", various people are "brain-hacked" by the villains to deliver a message to the Doctor, including a newsreader on television who then provides this trope.
* The Bells of Saint John", where a boss recommends killing an employee... but quickly adds to wait until he returns from his upcoming holiday, because she doesn't want to be unreasonable.
* "The Bells of Saint John", who tells the Eleventh Doctor to get her a cappuccino while she does some computer hacking. The Doctor rather grumpily does so.
* The Bells of St. Mary's: A point of argument between Sister Benedict and Father O'Malley. Patsy has failed her exams, and on that basis, Sister Benedict wants to hold her back. Father O'Malley wants to pass her, on the grounds that St. Mary's should be in the business of helping its students. Subverted when Patsy eventually reveals that she failed her exams on purpose in order to stay longer at St. Mary's.
* The Bell System logo designed by Saul Bass in 1969 for AT&T survived the federal breakup of the company, with several of the seven Regional Bell Operating Companies (and independent Cincinnati Bell) continuing to use the logo for as long as they retained the Bell brand. Today, only Cincinnati Bell retains the Bell name, and uses the Bell logo only for its residential landline services.
* The Bell Witch Haunting, as he's called out to investigate no matter what time of day it is.

* The Bell Witch Haunting has a priest called in near the end of the film, who seems to take the exorcism seriously, but is reading off of cue cards. It does not end well.
* The Bell Witch Haunting has one of the possessed perform this on the priest one-handed.
* The Belmont Stakes, the third jewel of American horse racing's Triple Crown, takes place in Belmont Park, near NYC.
* "The beloved" Marvin Suggs and his Muppaphone, made up of talking fuzzballs who go "Ow!" in tune as Marvin hits them with a mallet.
* The Belt Alliance started as a union for workers in the asteroid belt that armed themselves to fight against Raiders and PMC groups working for companies trying to take their mines. After
* The Belter Mateo, who's been screwed over by the Martians, launches his nephew out in an EVA suit before he takes his ship on a suicide attack against them.
* The Belters are also evenly mixed, for the opposite reason—there are only a few asteroids with life support, so everyone meets and mingles with everyone.
* The Belters as a whole. Owning to the dangers of full-time living and working in space and on rickety spaceships and stations, being mildly obsessive about maintenance and having at least some knowledge of various aspects of engineering is pretty much a requirement for survival.
* The belt's reign was short lived, though...after the card, the belt was lying around backstage when
* The Belt.' Subverted in that Cosby notes that he and his brother "had never seen this belt", but they knew what it was like: it was "nine feet long, eight feet wide, and it had hooks on it that would rip the meat off your body if it ever hit you".
* The Beltway Sniper caused fear and panic throughout Washington. Before he was caught, an investigation of one of his nests turned up a tarot card which had the words "I am God" written on it in marker. Despite the many theological or philosophical, or cultural possibilities given from the choice of card and words, some journalists declared that it was clearly a
* The Ben Chatham Adventures or a deadly serious example of that certain type of fan.
* The Benchwarmers, Clark's bat flies out of his hands and hits 3 squirrels out of a tree.
* "The Benders". It is heavily implied that the younger members are products of incest and likely also engaging in incest with the only female member of the clan.
* The benders' temperaments often follow the traditional associations with those elements, but there are exceptions.
* the Bender we all know and love. In another episode, however, he gets zapped with enough juice to literally melt his body, but his internals seem unharmed.
* The Bend Loro swaps genders somewhat randomly. As a girl, she's a great inventor. As a boy, he's lazy and pretty useless.
* The Bend Time power allows Corvo to slow down time for twelve seconds with the first level of this power, and the augmented second level allows Corvo to stop time altogether for eight seconds, letting Corvo escape from battle, line up multiple shots on targets, insta-kill everyone he's fighting, or just run across a room without being seen. However,
* The Bendu is based on the original concept for Yoda, back when the character was going to be a gigantic creature instead of the little green dude everyone knows and loves. His name also comes from the "Jedi-Bendu", Lucas' original name for the Jedi.
* the benefit of writing a time travel story is making up new tenses, and which he defines as "an inflection of 'to understand' wherein one is currently in the process of understanding something while existing in the past".
* The benefits from a number of Talents last for a year and a day, including Astral Pocket, Book Memory, Empathic Sense, Lasting Impression and Spell Crystal Lock.
* The benefits of using real reporters over actors is explained in a DVD

commentary for
* The Bene Gesserit are a mysterious order of powerful women who develop strong mental abilities for years of discipline and practice. Their leaders are called Reverend Mothers and seems to be extremely influential in the Empire. As such it has certain similarities with the Catholic Church (to be specific, he derived it partly from the Jesuit Order), but also has similarities with some female Pagan orders like the Vestals, and of course, they are called witches by their detractors.
* The Bene Gesserit are shown to have a horror of artificial insemination in
* The Bene Gesserit can also alter their own body chemistry to stop aging altogether if they choose to. They deliberately don't choose this because people would notice the resulting ageless women and conflict would result. That Alia has broken the taboo against it in
* The Bene Gesserit consider anyone who cannot pass their test of humanness to be an animal. As this test is "the death-alternative test of human awareness" anyone who takes it and fails is a DEAD animal. They don't use it to decide who's suitable breeding stock (Feyd-Rautha was intended to be the mate of the girl who was supposed to be born in Paul's place, and he's no human by their standards), they use it to decide who's suitable to teach any of their skills to. (Since the test is administered only by Reverend Mothers, who have the whole range of skills, that means that anyone giving the test knows
* The Bene Gesserit sense of discipline vs love becomes a tight rope Odrade must walk personally and on behalf of the sisterhood in
* The BENELUX version of CN had (and maybe still has) a special block on Sundays (that airs every Sunday, not only once a month) called
* The Benevolent and Protective Order of Elks doubled as a drinking club during the Prohibition era.
* The Ben-Hassrath are the intelligence agency and secret police of the Qunari in
* The Ben Heck Show because of his software-savvyness, especially in Linux.
* The Bennet family has three daughters instead of five: Jane, Lizzie and Lydia. Lydia has shades of Kitty (she's not as insufferable as Lydia in the books and, in a sense, has a happier ending). Mary Bennet is present as the girls' cousin.
* The Bennets are now the Bakshis. Elizabeth Bennet is Lalita Bakshi. Jane, Mary and Lydia Bennet become Jaya, Maya and Lakhi.
* The Bennet sisters, Jane, Lizzie, and Lydia. Jane's actress, in particular, looks very similar to both her sisters.
* The Bennu Sacrament rite allows a sorcerer to have his heart removed and stored in a canopic jar. This makes the sorcerer immune to poison, fatigue, blood loss and most diseases, and grants high resistance to weapons and other physical traumas. If his body is destroyed by fire or chopped into bits it will eventually regenerate. If the heart is taken from the jar or damaged in any way the sorcerer dies.
* The Benny Hill Show about various electric devices coming alive, a vacuum cleaner kills a maid by strangling her with its hose.
* The Benny Hill Show, a drunk Benny is at a party chatting up a beautiful woman.
* The Benny Hill Show. Another sketch had him say his wife isn't much to look at "but you can't help who you fall in love with."
* The Benny Hill Show are decided after years of negotiation — down the center of the bedroom of a pair of newlyweds. A painter paints a line down the wall and on the floor. Suddenly the husband (on the American side) needs a passport to visit his wife (on the Russian side).
* The Benny Hill Show, as many, many of the episodes ended up with someone being chased by an ever growing line of irate bystanders, usually accompanied by "Yakkity Sax" in the background.
* The Benny Hill Show At one point he takes two calls, one from a man whose plumbing is leaking and another from a woman who has a small fire, indicated by the fact that water comes out of the former tube, and smoke out of the later. He then connects the tubes together so the leaking water would put out the fire. Another couple of callers are a doctor and his patient, and the tubes are broken (they can't be connected) so he has to act as an in-between. The doctor sends a pill to

the patient by blowing it through the tube to Benny, who shall then blow it to the patient; but he sucks when he should have blown and swallows the pill himself.
* The Benny Hill Show. Benny (as Fred Scuttle) is displaying his homemade, backyard rocket in which he plans to fly to the moon.
* The Benny Hill Show, Benny finds himself on a ledge outside a window, with no way to go back since a woman locks the window behind him. He then notices a skeleton standing on the same ledge and tears up at the thought of being stranded here forever.
* The Benny Hill Show, Benny is a private patient while another lower-class looking person is going through the public way. At the end of the sketch Benny is seen perched in a late model convertible; the lower class guy is then seen getting in the car and driving away, revealing that Benny is sitting on a bicycle.
* The Benny Hill Show, Benny is in a bar and attempts to pick up what he thinks is a long-haired woman. Benny approaches her and says "My wife doesn't understand me." The "woman" turns around, showing herself to be a long-haired man, and says "Neither does mine!"
* The Benny Hill Show, Benny is peeping through a beautiful woman's window when a policeman grabs him by the shoulder and says, "You are under arrest for being a Peeping...". At this point, the woman starts undressing and both Benny and the policeman can only stand there, entranced by the view. Once the woman is down to bra and panties she draws the shades (still unaware that she was being watched) and the policeman grabs Benny again and finishes his arrest by saying, "Tom!"
* The Benny Hill Show, Benny plays a worker putting up assorted signs. One of the signs says "Post No Bills." A policeman comes along and sees him posting the Post No Bills sign and tickets him for posting the sign.
* The Benny Hill Show example above (the "female" actor would actually be a man in drag, often with a rugged face and a beard).
* The Benny Hill Show features a sketch in which Benny Hill plays a news anchor who first gets distracted by the beautiful woman watching the news, then does a live report of her getting robbed in her apartment, and finally is injured when the robber fires at the TV.
* The Benny Hill Show features a woman pulling the cover off of a birdcage with a parrot inside. The parrot begins mildly cursing when the woman notices her priest coming over to her flat. She quickly pulls the cover back over the birdcage and invites the priest in... just in time for the parrot to exclaim, "Bloody hell! What a short day that was!"
* The Benny Hill Show features Benny as an avant-garde French director being interviewed by a fawning Henry McGee, only to repeatedly burst McGee's bubble about his talent as he reveals that all the artsy stuff was actually the result of a low budget or just laziness, like switching from color to black and white after running out of color film, and casting the producer's girlfriend (who has a lisp, causing her to mispronounce a line where she orders soup and make it sound like a profound philosophical statement) as the lead.
* The Benny Hill Show, feeding him the introduction phrase by phrase, then acts surprised by all the praise heaped on him in the introduction.
* The Benny Hill Show, feeding him the introduction phrase by phrase, then acts surprised when he "discovers" that he's the one being talked about.
* The Benny Hill Show had a character cut down a tree so he could saw off one branch to use as a sign post. The sign in question was a 'Save the Trees' placard.
* The Benny Hill Show had a few Wanted posters. One is about a man wanted for arson, who promptly torches the poster.
* The Benny Hill Show had Hill going into the wrong restroom after hitting his head and reading the sign as "Laddies".
* The Benny Hill Show had Mr. T firing a LAWS rocket the wrong way round, and blowing up a public lavatory another member of the Team was using.
* The Benny Hill Show has a person watching his laundry at the laundromat, and actually switching channels somehow.
* The Benny Hill Show has done Tablecloth Yank quite a few times and has sometimes succeeded and sometimes failed. In one of the episodes, he also did an inversion of

a classic Tablecloth Yank.
* The Benny Hill Show. He was always chasing behind or chasing from cute young women and getting involved in embarrassing situations where people suddenly were exposed in their underwear.
* The Benny Hill Show: in a sketch about a wheelchair race we see one of the participants pre-race talking with someone, shot from below. He's got a chest full of medals. He crosses his legs, at which time we see he's even got medals on the soles of his shoes.
* The Benny Hill Show: In a sketch, Benny is at a weight-loss camp and is jogging. Three girls show up in front of him and flash their breasts at him, so he speeds up. He gets tired and slows down; they flash him again and he speeds up again, etc.
* The Benny Hill Show. In the sketch "Benny Kelly, Son Of Ned Kelly" he pours some alcohol into someone's ear horn and the fluid comes out the man's mouth.
* The Benny Hill Show in the sketch "The Video Machine", Benny Hill visits an island populated by beautiful women, who soon reveal themselves to be cannibals and already have a large cauldron standing by to stew him.
* The Benny Hill Show involving a man being invited back to his girlfriend's flat. She leaves to 'slip into something more comfortable'. He strips off in the expectation of sex, then all of his friends leap out shouting, "Surprise!".
* The Benny Hill Show is a sign painter and he's painting a door for a therapist, and he paints "JOHN SMITH, THE RAPIST" instead of "JOHN SMITH, THERAPIST".
* The Benny Hill Show loved this trope. One example is a group of priests entering an building with a sign that says "Tea Bar", but once they enter the other letters light up revealing the true name to be "Striptease Cabaret".
* The Benny Hill Show mentions "Paris, France, Europe" on a couple of occasions.
* The Benny Hill Show. One of the most commonly used gags. Usually with a "honking horn" sound.
* The Benny Hill Show" sings a song in praise of having an older woman lover:
* The Benny Hill Show sketch where Benny's character is pretending to be a statue when a sexy maid comes in and starts dusting him between the legs with a feather duster...
* The Benny Hill Show skits, like the double cross-dressing spies skit.
* The Benny Hill Show, the legendary comedian poses as a flasher who then opens his coat to a group of women who immediately pull out score cards grading him with a 3, two 2's, and 1 1/4.
* The Benny Hill Show used a fast version of Boots Randolph's "Yakety Sax" as its closing theme. They also used an instrumental arrangement of "Mah Na Mah Na" as background music for fast-paced comedy sequences.
* The Benny Hill Show used this trope a few times per episode. It's infamous for its use for chase scenes, often with the music "Yakety Sax".
* The Benny Hill Show, usually with Benny in drag mirroring a woman. The "disguise" fails when they start to strip...
* The Benny Hill Show when he notices the many jeweled rings and bracelets she's wearing. Robin pulls a (completely anachronistic) eye loupe to better examine them, before robbing her blind.
* The Benny Hill Show where Benny et al. are German POWs during WWII. They are planning an escape and Benny has used various food items — mostly pastry — to make a model of the camp. During his explanation of how they are going to escape, one of the other prisoners picks up the slice of pound cake which represents the gate and starts eating it.
* The Benny Hill Show, where you'll get things like "breast" instead of "blessed", "whore" instead of "whole", etc.
* The Ben Stiller Show has a sketch featuring T.J. O'Pootertoot's, a restaurant serving burgers that taste "oddly familiar." One of the employees learns that the original O'Pootertoot was stuck in a Donner party-esque situation and later turned his newfound taste for human meat into a franchise.
* The Ben Stiller Show took the place of Lassie. The wholesome farm family would interpret Manson's insane ranting with "What's that he's trying to tell us? Timmy's in trouble?"

* The Bent Spoon Award is an award given by the paranormal and pseudoscientific investigating organizations Australian Skeptics and NZ Skeptics to those who are "perpetrator[s] of the most preposterous piece of paranormal or pseudoscientific piffle." While there is an actual, physical award that exists, there is only one in existence (having claimed to have been made from wood from Noah's Ark and a spoon from the last supper to
* The Berenstain Bears among Christian parents; while he and his family were Jewish, and Jan and Stan Berenstain had long insisted that the series be secular so as to keep their appeal as broad as possible (hence why there was never a Hanukkah-themed book), the books' G-rated morality made them a hit among Christians, leading Mike to write new books aimed at them for a Christian publisher.
* The Berenstain Bears and declares that they'll have no TV or treats for a year. He backtracks after a talk with his own parents, though, and realizes that a better solution is to allow them just one treat whenever they go shopping.
* The Berenstain Bears and orders a burger at a fast-food restaurant. Because of the determination of the red car's driver (who is all but said to be Brother), the burger ends up costing more than money.
* The Berenstain Bears birthday cake, a huge crowd of guests, and the outside of their tree house decorated lavishly.
* The Berenstain Bears book "The Trouble with Pets", Lady, as a puppy, pees in the house.
* The Berenstain Bears book "The Trouble with Teasing", Milton's favorite wrestling move, called "the pancake" essentially involves falling on top of the opponent. It enables him to win every match.
* The Berenstain Bears, Brother and Sister Bear reveal to Mama Bear that they have both invited all of their friends over to play on Saturday. Mama, sounding troubled, says that it sounds less like just having friends over, and more like a party.
* The Berenstain Bears, Brother and Sister divide their treehouse in half.
* The Berenstain Bears by saying a very long prayer asking to bless a whole lot of people.
* The Berenstain Bears cartoon, Brother and Papa Bear are fighting over a snack that is the last one left in a bowl, and saying things such as "En garde!" and "Touche!".
* The Berenstain Bears chapter book between the Grizzlys and the Bears, based on the in-universe equivalent of the American Civil War. Highlights include Brother being violently chased out of Squire Grizzly's manor and the cubs at school getting into so many brawls that the teachers can't focus on anything else, including potentially injured cubs who just got in the way (like Sister's friend Lizzy who, as a Bruin, probably isn't counted on either side but clearly got knocked head over heels for being there, to her obvious fright and confusion).
* The Berenstain Bears chapter books, this is just one of the ways the bullies pick on Ferdy.
* The Berenstain Bears courtesy of Brother, Sister, and some of their animal neighbors.
* The Berenstain Bear Scouts and the Run-Amuck Robot, the titular robot is described as being made of "Everything but the kitchen sink. And quite a few sink parts."
* The Berenstain Bears does this with names like E-Bear (for Ebay) and Pawbook (for Facebook).
* The Berenstain Bears does this with, naturally, bears, in a lot of areas.
* The Berenstain Bears dolls (to the point of gentle parody, as in the Golden-Furred Bearbie).
* The Berenstain Bears easy," then tosses a wink at the audience regarding the hijinks he went through in the story.
* The Berenstain Bears entitled "Too Much Birthday" (based on the book of the same name) has, as mentioned in the previous example, everyone sing to the tune of "London Bridge":
* The Berenstain Bears, every time that Sister and Lizzie take another call from

someone else wanting to attend Lizzie's slumber party, they wrap up the conversation with "Sure, what's one more?" and hang up.
* The Berenstain Bears for every nail she bit. By the time she broke the habit for good, she'd accumulated quite an impressive amount of wealth.
* The Berenstain Bears for not wanting to kiss anyone except Brother, being unable to accept the prize for Pin the Tail on the Donkey because it's her party and it wouldn't be polite, having her new birthday blouse soaked by a friend's squirting flower, and getting motion sickness from riding the rented ponies and merry-go-round. But the last straw comes when she's initially unable to blow out any of her birthday candles and her friends tease her with saying she'll end up having six cubs when she grows up, and she begins to cry, sadly telling Mama all the mishaps that occurred to her throughout the party. But she cheers up when the others remind her she hasn't opened her presents yet, and by the end, Sister gets to learn the true importance of birthdays.
* The Berenstain Bears gets boring for Brother and Sister (although, to be sure, when you're a child and are just seeing many things for the first time, it's awfully hard to get bored).
* The Berenstain Bears had Papa, Brother, and Sister ski down the mountain near the end of the special, then they trip and become snowballs. At which point they form into one snowman.
* The Berenstain Bears has Brother Bear meeting his secret admirer, Miss Honey Bear, who turned out to be the goalie for an opposing hockey team. She is taller than Brother and reveals she has an even bigger sister!
* The Berenstain Bears: In both the cartoon and book versions of "The Truth", the cubs both tell a wild, inconsistent lie about a bird to explain a lamp getting knocked over (when in actuality they knocked it down with the soccer ball but didn't want to admit they'd been playing with it indoors).
* The Berenstain Bears: In contrast to the more down-to-Earth 2003 cartoon, the 80s animated adaptation is far more cartoony than the original books were.
* The Berenstain Bears. Instead of just being polite, they tried being super polite in an attempt to annoy Mama Bear by acting so over-the-top polite that she'd get fed up and call the whole Politeness Plan off. It backfired because, instead of annoying Mama, they ended up forgetting the whole "super polite" part and ended up starting to be regular polite without thinking about it.
* The Berenstain Bears, it is revealed that Brother is entering 3rd grade and Sister is in 1st. That means Brother was 2 when Sister was born, and Sister was 5 when Honey was born (and Mama was pregnant essentially the entire Bear canon). This includes the Bear Scout series (Cub Scouts are required to be in first grade before entering), and the chapter books where Sister is implied to be in at least 5th or 6th grade.
* The Berenstain Bears: Later books in the series have Christian teachings attached to them.
* The Berenstain Bears, once they get over the initial shock, this is Mama and Papa's reaction to the "Trouble with Grownups" play. With the idea that turnabout is fair play when Mama and Papa dress up as the cubs.
* The Berenstain Bears, one episode has Brother Bear fake not being able to lift his arm because he doesn't want to play sports.
* The Berenstain Bears, Papa Bear attempts to ski down a giant ramp, only trip and roll off it as a giant snowball, which proceeds to roll through town and crash into the Bears' tree house.
* The Berenstain Bears, revealing that Bermuda had copied down what appears to be a phone number. It's actually the number to the in-school modem, letting someone log into the school's private network and steal information from his teacher's files.
* The Berenstain Bears series were simply extended versions of the episodes from the 1980s cartoon series.
* The Berenstain Bears (Several titles authored by the son of the original creators, as well as a children's Bible featuring the characters.)
* The Berenstain Bears she took, of which she subsequently apologized for.
* The Berenstain Bears, Sister Bear overhears Lizzie's mother telling her that

Sister Bear has "big ears" in warning her not to speak so loudly about the surprise she's planning for Sister. Sister Bear only hears the part about the "big ears" and takes it literally, resulting in her being down about self-image.
* The Berenstain Bears Spend Too Much Vacation, the berries the Bear family ate at the run-down campground were so sour "that even the birds puckered!"
* The Berenstain Bears, the book where Gracie the cat first appears has Papa Bear check her sex by looking at her "bottom".
* The Berenstain Bears, the members of the student underground newspaper, including Brother, get exposed and in trouble for making a false statement about a teacher dating someone when Brother tells his sibling about it, who passes the word to Mama who then informs the authorities. This is a case of a Concerned Claire that actually turned out for the better, as with the exposure, the real student newspaper was able to be reformed, making the student underground unnecessary.
* The Berenstain Bears the new kid, Ferdie, befriends the popular girl, Queenie, not knowing that she's just using him to get his homework answers. It isn't until Ferdie sees Queenie laughing at him after he took a football to the gut that he realizes the truth. Queenie eventually apologizes to Ferdie, both for laughing at him and pretending to be his friend.
* The Berenstain Bears", this happens during a game of Musical Chairs when the music stops and the kids jump to try and sit on the chairs. Sister Bear winds up the first one out, much to her chagrin.
* The Berenstain Bears, this is one of Papa Bear's main character flaws, to the point that in "The Giant Mall" from the 2003 series, he spends over an hour wandering the mall looking for a hardware store because he wouldn't read a map. Though he does admit he was wrong at the end of the episode and vows to change his ways.
* The Berenstain Bears This is zigzagged in one of the chapter books. There's an auto show going on, and local tycoon Squire Grizzly has entered his four best cars (all extremely rare and well-maintained) in order to ensure that he wins all three trophies for first, second, and third. At the end of the book, Papa Bear's roadster (the last car made by a well-known car company before it went out of business) manages to win third. Papa is happy with winning third given how stiff the competition was, while the Squire is envious about not winning all three trophies for the best cars in the country.
* The Berenstain Bears, throwing themselves on the ground and kicking their legs and screaming their heads off.
* The Berenstain Bears, Too-Tall has been held back twice, which is why he's in Teacher Bob's class instead of Miss Glitch's.
* The Berenstain Bears: Tuffy beats up Sister Bear, but then it turns out to be because her parents are abusive. Sister Bear doesn't hurt someone weaker though, instead she punches Tuffy.
* The Berenstain Bears, up until Mr. Grizzmeyer sets the rules as "If I don't like your outfit, you go home and change". The matter is ultimately settled by a public debate with Mr. Grizzmeyer, Miss Glitch and Papa Bear on one side and the cubs on the other, which the cubs (Brother in particular) win without saying a single word: they simply show three slides they got from Grizzly Gran (Papa's mother), Mrs. Grizzmeyer (Mr. Grizzmeyer's wife) and Miss Glitch's mother of the adult trio in various bizarre outfits, including Papa wearing bellbottoms and Mr. Grizzmeyer in a zoot suit and a wide-brimmed hat. The dress code is promptly discontinued, and having made their point, the students largely abandon their stranger outfits for more normal ones.
* The Berenstain Bears well-timed and deserved. While Bigpaw turns out to be a well-meaning, easy-going guy who becomes a friendly resident of Bear Country, it's implied he is still nature's way of teaching the bears a lesson.
* The Berenstain Bears, when Sister Bear tells Papa that he's not that old, that there are some dinosaurs older than him, he subjects her to the "tickle-o-saurus."
* The Berenstain Bears when Too Tall plays a loud boombox at Lizzie's slumber party. The babysitter tells him to turn it down, but he tells her that he can't hear her because the music's too loud.

* The Beretta 92F, hot off the heels of being adopted by the US military, got a boost in the late 1980s thanks to its prominent use by the leads of films such as
* The Beretta ARX160 has a selector switch on each side and places them so vertically between where they would be on an M16 or AK derivative (the two most popular assault rifle styles), so that the user at least feels where the control is if they reflexively go for where it would be on either platform. Similarly it has three magazine releases and the cocking handle can be rotated to either side easily.
* The Beretta BM59 was on occasion used as a stand-in for the M14. As the two weapons are both modifications of the M1 Garand, this is rarely noticed.
* The Beretta Mod. 38 SMG was used on both sides of the conflict, as it could fire standard 9mm Para rounds just as well as the preferred overpowered variant and was extremely reliable and accurate, even if large and heavy, so Allied forces would use captured weapons... And, after the start of their occupation of Northern Italy (including the factories they were made in), the Germans would buy part of the production, including the overpowered round (West German army and federal police would continue using them until the sixties). Also, a small number (50) was used by
* The Berlin Brigade, a US Army contingent that was stationed in West Berlin (the UK and France also had similar contingents), can be considered an example of the previous on a smaller scale. Unification of Berlin was a prized objective of East Germany and the Soviet Union for reasons political
* The Berlin Memorandum (actually a phony plan), then release him in the hope that he'll rush back to his base to warn his superiors. When Quiller finds himself unable to break out of their surveillance, he sets off a bomb they left in his car (in case he tried to drive out, which would increase the risk of losing him), faking his death.
* The Berlin Memorandum gambit — the Nazis hope Quiller will contact his base in an attempt to avert the plan, thereby exposing its location to them.
* The Berlin Republic since 1999 and 2001 respectively. So there have been newspaper specials about adult sons (and in some cases daughters) talking to their peacetime dads about war and being a veteran.
* The Berlin U- and S-Bahn tunnels in the latter stages of the battle for Berlin in WWII. Already seeing widespread use as impromptu shelters and field hospitals, they were also the scene of several battles and retreating SS fanatics blew one of the river tunnels to flood the network. This wasn't as effective as hoped, since it only filled some tunnels to a depth of 3-4 ft. Unfortunately one of these was an unused siding holding at least 200 incapacitated wounded at ground level...
* The Berlin Wall, which both literally subdivided the city of Berlin, and became a symbol of the proverbial
* The Bermuda Triangle: A loosely-defined region of the Atlantic Ocean (somewhere between Bermuda, Florida, and Puerto Rico), where numerous ships and planes were alleged to have mysteriously disappeared. The explanations range from bad weather to supernatural phenomena.
* The Bermuda Triangle: An area of the Atlantic Ocean (somewhere between Bermuda, Florida, and Puerto Rico) that is supernaturally prone to causing the strange disappearances of ships and planes that cross it.
* The Bermuda Triangle by Charles Berlitz was an instant hit because it pretended to be a real mystery, rather than fiction. The book claims many ships and airplanes have disappeared mysteriously in the Triangle, but the facts in the book were quickly discovered to be falsified. Lots of the ships and airplanes listed never existed in the first place, and others had sunk in other parts of the world. Those that remained were not many enough to be unusual and had sunk under totally normal circumstances, such as extremely bad weather.
* The Bermuda Triangle disappearances by planes and boats in the area is no higher than any other part of the ocean that has similar size, weather, and maritime traffic. Indeed, for the amount of traffic in the area, it's one of the safest waterways in the world; since 2014, the Triangle has had one of the lowest rates of disappearance by planes and boats.
* The Bermuda Triangle involves players guiding magnetized game pieces ("cargo

ships") through the Triangle without getting them "consumed" by the ever-shifting "cloud" that moves along a grid of dots that is determined by a spinner.
* The Bermuda Triangle is eventually revealed to be an actor playing an elaborate hoax. However, Mulder correctly deduces that the real reason behind the hoax is that the aliens really have sent Flight 19 back to Earth and The Conspiracy set the whole thing up so if any more of them turned up nobody would believe them.
* The Bermuda Triangle is where Fester Addams got lost for 25 years according to Gomez in
* The Bermuda Triangle Mystery Solved probably the most baffling ACTUAL mysteries); the problem, he says, is that these incidents happen at roughly the same rates around the entire world and that you can't pin special blame on the Bermuda Triangle.
* The Bermuda Triangle: Where planes and ships go to enter inter-dimensional rifts (maybe).
* The Bernie Gunther historical fiction detective novels by Philip Kerr also depict
* The Bernie Mac Show a famous stand up comedian/comedy actor, wanting to prove that he's a serious actor, was cast in a movie where he played a legendary football player. When Bernie shows his wife and friends a copy of the near finished film, they compliment his acting skills, until the movie gets to the part where the character becomes imobilized, and they laugh at the fact that he looks so ridiculous trying to act as if he were having a stroke.
* The Bernie Mac Show Bernie frequently goes to his garage to sit facing the camera and address "America."
* The Bernie Mac Show has Bernie getting these after eating undercooked turkey.
* The Bersaglieri, the elite shock infantry of the Italian army. On the crazy part, they don't walk but run
* The Berserk Drone command ships also carry (and control) a bunch of drones.
* The Berserkers Bride, everyone in Berk's great hall does this when Dagur casually slips Hiccup's pregnancy.
* The Berserkers Bride, Fishlegs has always had a crush on Hiccup, Hiccup having always seen him as her best friend while on Berk.
* The Berserker's Bride), only for her to instead marry Dagur to unite their tribes. After she visits Berk with Dagur and reveals that she is pregnant, Snotlout tries coming on to her (thinking that she's now attractive) and even almost tries raping her.
* The Berserkers Daughter scarecrows seem to do all day is think up new ways to get kids in trouble.
* The Berserker summoned in the Fifth Grail War is Heracles/Hercules, and Lancer is at one point explained as having the potential to be summoned under this class (understandable, as Lancer is
* The Berserker: Throws themselves into battle with complete disregard for danger or consequences.
* The Beryl Coronet. Holmes was mainly concerned with finding the missing part of the coronet, but he did prove that the banker's son was not the one who stole it in the process.
* The Berzerker patches cause your field of vision to go all psychedelic (hallucinations) and reverse your controls. The Reflex patches slow time
* The Berzerkers were killed (by Panthro sinking their ship) in their first appearance. This was confirmed when the ghost of the Captain Hammerhand showed up a few episodes later. Then he came back with a new look and a new crew in the second season.
* The Beserker Suits gave their user enhanced strength, speed, and reflexes, but also caused massive adrenal failure and pain.
* The Be Sharps win a Grammy for their barbershop quartet album. Subverted in that the
* The best (and most expensive) form of armor tech in any turn-based
* The Best and the Brightest is about the decisions of America's military and foreign policy experts under the Kennedy and Johnson administrations that led to

the US getting bogged down in Vietnam.
* The best application for this is the name of the planets of the Solar System not named Earth. All of them are named after Roman gods, except for
* the best athlete at the school, but also excels in her studies. Her test scores are usually shown to be just under Chiyo's and Yomi's.
* The Best at It: 12-year-old Rahul is unconsciously enamored with Justin, a football jock on the middle school team.
* The Best at It (LGBT youth-oriented novel revolving around a gay 12-year-old Indian-American boy's self-actualization. Subject matter includes LGBT awakening, coming out, LGBT youth and LGBT acceptance)
* The Best at It music, female best friend) to be teased by Brent and for everyone close to him to be aware of.
* The Best at It novel about 12-year-old Rahul deciding to embrace his Indian culture, his sexuality and learning to be himself.
* "The Best" became a hit for Tina Turner when she covered it one year after Bonnie's original recording.
* The Best Christmas Pageant Ever features the shepherds in the titular Christmas pageant, who tremble in very realistic terror when the angel appears... because they're afraid of the girl playing the angel, a notorious bully.
* The Best Christmas Pageant Ever one of the "babies" offered to play baby Jesus in the Christmas pageant is a four-year-old. His mother says he can scrunch up.
* The "Best Darn X Pie in the Nation." Frequently pumpkin, apple, or cherry; occasionally blueberry. Or pecan if you're in the South, pronounced "p'CAHN."
* "The Best Day Ever"; during the opening number, SpongeBob is running along the sides of his pineapple house. Not only is it 3D,
* The Best _____ Ever. She drives by once or twice a month and assumes that if they haven't burned the house down or died, they're probably okay.
* The best example can be found in the Masoukishin units, each of which is blessed with the power of an elemental spirit.
* The best example comes after MegaMan destroys the Bonnes' mothership the Gesellschaft and then their backup fighter the Focke-Wulf, the following conversation occurring as the ship is about to explode:
* The best example comes at the end of Episode 68; a Demon after-action report details that the entire Leo constellation was eaten by Shroud, with "
* The best example, however, is the IOA. They make a lot of decisions that aren't logical at all.
* The best example in the sequel is most likely Omniknight, who has a healing ability, a temporary spell-immunity buff, and a mass temporary damage immunity spell for his ultimate ability.
* The best example in video games would have to be Mario and Princess Peach, and it may extend to Princess Daisy from
* The best example involves a pit bull sandwich (stirring vigorously keeps them disoriented).
* The best example is in "Popsy", a short story where a man kidnaps a young child, and the child turns out to be a vampire. The child's grandfather shows up in the last few pages of the story and is specifically described as having a slicked hairstyle, pale skin, and wearing a large black cape.
* The best example is "Liar!". US Robots accidentally makes a robot that can read minds, and no one knows how they did it. The three main characters (Susan Calvin, Pete Bogert and Alfred Lanning) are amazed by this. Susan Calvin gets told that a man she likes also likes her back, and Pete Bogert gets told that Alfred Lanning has resigned and left his position for Pete. However, soon they discover it was a lie (the man Susan liked is going to marry another woman he had brought to work a few days before, and Lanning hasn't resigned), and Susan makes the connection: the robot is still bound by the Three Laws, and thus it lied to them so that it didn't hurt them. Susan confronts the robot and provokes a
* The best example is likely Vi, whose ultimate selects a target, charges towards them, and slams them into the air and then into the ground. She becomes immune to crowd control while doing it, and any enemies that stand between her and the target

are knocked aside.
* The best example is the New York Red Bulls, or the MetroStars, as they were once called. They're one of the founding teams of the league when it started in 1996 and have fielded some very good squads, have one of the most advanced academies in US Soccer, developing a lot young talent
* The best example is the series of encounters between Bond (Sean Connery) and the sumo-wrestler-sized martial arts expert Oddjob (Harold Sakata) in
* The best example is Tony Tony Chopper who is a reindeer that ate the Hito Hito no Mi that allows him to become a reindeer/human hybrid. Chopper has many forms called Points that he often takes at different points such as Walk Point and Heavy Point but his default form is Brain Point where he stands on two feet and is a lot smarter. Chopper is a rare case of an animal becoming a human instead of the other way around.
* The best example is when they're in a bank waiting on a death to occur. As the time gets closer, a bunch of armed bank robbers rush in, while at the same time, a wife catches her husband having an affair with a coworker. With all this tension going on, murder or an accidental shooting seems imminent... but no, the whole situation manages to resolve itself peacefully. So who dies? The guy who walks in ten seconds later to cash his paycheck, slips on the floor and breaks his neck in the revolving door.
* The best example of this is Steff, who is a follower of both Mechanism and and Arkhanism despite being in a relationship with both a half-demon
* The best example of this would be the Prussian 'junker' class of middling nobility, who utterly dominated the officer corps of the German army from the 18th century to the end of World War Two.
* The best examples may be the Obyriths and their partner Tharizdun. The former are beings that predate mortal life and even gods. The latter is a god seduced by the Obyriths into evil and madness who shares their desire to destroy everything. Tharizdun used a shard of evil to create the Abyss (and by extension all demons), making him responsible for the existence of the greatest evils in the setting.
* The best example would probably be Dogwelder. He welds puppies to people.
* , the best he can usually do is to repeatedly declare himself an ordinary person with nothing weird or special about him.
* The best: "idiopathic". Which means "we don't know why it's doing that stuff".
* The best illustration of a Mêlée à Trois, though, would certainly be
* The best in-episode example is in "The Trial". Batman is loose and the villains are in a dark room lit only by Two-Face's lighter. Batman, in the exact environment where he is next to invincible, circles around the edges of the room, outside the lighter's glow, and grabs the villains one by one. The Joker finally says it's time to panic when he sees Harley suspended from the ceiling and bound with the straitjacket Batman had just escaped from. To make things worse, Harley
* The best interesting part is during the offline meet where Hideki meets Ako in real life for the first time. When you look at the entire Alley Cats Guild online, you may assume that Ako's is the only female player. But the truth comes out when during the guild's first offline meet, it turns out that Hideki's the only male player in the guild. Turns out that his other two "male" guild-mates, Schwein and Apricot is actually his classmate Akane Segawa and the
* The best is the machine that sucks the entire planet dry of breathable oxygen. It's activated once, is quickly destroyed, never referenced ever again, and didn't make any sense in the original episode at all.
* The best known cases in print comics were the more-than-yearlong breaks taken by
* The best-known example is probably "Bill Swerski's Superfans," or "DAAAAAAAA Bears!" The sketch portrays Chicago's male citizens as
* The best known example is the "Perfect Trumpet Thingy" from "Perfect" (considered the scariest thing on the show and is the page picture of the Courage the Cowardly Dog Nightmare Fuel page).
* The best-known example is the recurring "Celebrity Jeopardy" sketch where an exasperated Alex Trebek (

* The best known example of the Unwanted Harem and the OG is seen in the various versions of
* The best known film examples are two Generals who were heroes at the Battle of Endor. You know them popularly as Han Solo and Lando Calrissian. Han
* The best-known subsidiary of arms manufacturer Ares Macrotech is Knight Errant, which is essentially a
* The best-known version of Newcastle-born singer Duke's "So In Love With You", which was an international club hit in the late '90s, is the
* The Best Laid Plans) dismayed. They lampshade the seriousness of the "-gate" suffix being adopted.
* The Best Little Whorehouse in Texas, a mother is shown covering her child's ears during the "Texas Has a Whorehouse in it" number.
* The Best Little Whorehouse in Texas has his cameraman turn on the camera, once the gate is open, to make it look like he's invited. He then proceeds to take his film crew storming through the small mansion, rousing numerous prostitutes and clients, making all their faces public to shame them, and rake in the ratings. The sheriff retaliates by visiting his studio, and then, just out of camera frame, ripping off the televangilist's wig, and decking him right into the camera shot of the singing choir and then calmly walking over his prone form, making it look like he just arrived on the scene before leaving.
* The Best Little Whorehouse in Texas." He's also deaf to warnings that the movie doesn't live up to its title.
* The Best Little Whorehouse in Texas, the prostitutes hope the Aggies don't win the Thanksgiving football game (and thus a trip to the Chicken Ranch) because they find the players' constantly shouting "Yee-haw" to be annoying. The Aggies win and the girls give out a flat "yee-haw".
* The best long-arm to use for zombie hunting is a typical bolt-action rifle (preferably one that
* The Best Man Holiday, the biggest release at the time. The film had a small budget of 17 million, but made over 71 million dollars in profit. Pretty impressive, since romantic films starring African-Americans usually don't do well at the box office.
* "the best man [she's] ever met", and him being so good makes her want to be a better person.
* The best neck slot item in the game are the amulet of souls (or), which does not have any level requirements.
* "The Best Night Ever", after trashing the Grand Galloping Gala and ultimately having their dreams of the best night ever ruined, Princess Celestia comes in and reassures them that she had always found the Gala dreadfully dull and invited her friends in the hopes that they could spice things up a bit, and the episode ends with them having a good laugh about it. On the other hand, many other ponies who were perfectly happy with the way things were had
* The Best Night Ever below), Prince Blueblood whales the springs out of the alarm clock for playing "Equestria Girls" every bucking iteration of the loop. And remember, this is a pony doing the Ring Ring Crunch; a hooved mammal.
* The Best Night Ever comes and tells them that it was, in fact, the Best Night Ever, at least compared to the stuffy Galas of previous years; the reason she had invited Twilight and her friends to the Gala was in the hopes they would liven things up.
* The Best Night Ever Notably, although Pinkie Pie is unaware of the loop, she's so erratic that she always does something different.
* The Best Night Ever to the point where her voice sounds gravelly and she shouts, "COME OUT!" (without so much as a 'please') and "YOU'RE GOING TO LOVE ME!".
* The Best Night Ever vapid interest in him that puts her on the receiving end of slapstick and his dickish behavior while he basically just goes about his business at the gala. He was certainly no prince charming, but it's Rarity rather than he who wanted him to be one, and the second she's learned her lesson and storms off, they never see each other again.
* The Best Of All Possible Worlds with psychic powers who are one of the two races

who operate FTL ships, in their case due to a psychic bond with their living ships. At the beginning of the book they come close to becoming a dying race when, at the beginning of the book, their home world is rendered uninhabitable by the Ain, their Dark Elf counterparts. The progenitor race, the Caretakers are said to have given them the Gift of Mind.
* "The Best of Both Worlds" did feature a wave of (automated?) fighters sent to take on the Borg Cube...
* "The Best of Both Worlds" puts Riker in command when Picard is kidnapped and assimilated by the Borg. Troi even quotes this trope.
* The Best of Both Worlds) to trying to ward off a date rapist by telling him you're wearing crotchless panties.
* The best, of course, is "I'm waiting for the telephone repairman."
* The Best Offer, the hero's job as an antiques dealer it to tell a forgery from an original. This parallels the main story which is about him failing to see the forgery in Claire's feelings for him.
* The Best Offer, the hero's love interest Claire needs help with the zipper of her new dress and he gladly comes to assist.
* The Best Offer, Virgil, an old bachelor in his 60s, falls in love for the first time with Claire (around 30). She eventually appears to reciprocate his feelings, but only as part of a premeditated plan to steal Virgil's paintings.
* The "Best of Jimmy Fallon" DVD has his "Weekend Update" camera test, part of which is one of these (about a drive-thru strip club) as he and Tina Fey try to one-up each other.
* The Best of Me, there is no evidence that Dawson has had sex with any other woman in the 20 years since he and Amanda last saw each other.
* The best of them is almost certainly Araris Valerian, whose abilities are advanced enough
* The best one handed weapons in the game currently are the Blightbound crossbows for Ranged, the Wand of the Praesul and Imperium Core for Magic, and the Kopesh of Tumeken and the Kopesh of Elidinis for Melee, which are tier 92. They are obtained, respectively, from defeating the superbosses
* The best one is where Danny and Mickey go head-to-head to see whose methods work better. While Danny works a series of
* The Best Page in the Universe doesn't match well with his over the top troll style used in the writing that made him popular back then.
* The Best Pageinthe Universe" due to aliens detecting poorly spelt e-mails and concluding that humanity must be too moronic to be worth visiting.
* The Best Page in the Universe includes the question, "How often do you update your page?" His answer: "At least once every week. And by "once every week," I really mean "when I get a chance." And by "when I get a chance," I really mean never."
* The Best Page in the Universe in office, going so far as to claim that it was impossible to critically analyze Bush's speeches because "the man practically satirizes himself".
* The Best Page in the Universe is minimalistic in that its pages consist of minimal colour (large grey text on a black background), and is mostly text oriented, for the most part lacking images, advertisements, animations, and other fancy design gimmicks. The site author, Maddox, claims the purpose of this is in part to minimise bandwidth consumption, but is mostly as protest against "all the slick-looking, contentless web sites out there" and to make the website easier on the eyes as "Staring at a white background while you read is like staring at a light bulb".
* The Best Page in the Universe. "It's like the producers are challenging you to give less of a shit."
* The Best Page in the Universe". Most imitators unfortunately ignored the original website's satirical edge and instead just aimed for shock value.
* The Best Page in the Universe's pages' HTML source, you'll find a variety of commented-out bits.
* The Best Page in the Universe: Tongue in cheek, although a lot of people don't

seem to realize this.
* The Best Page in the Universe, uses the term "ex-biggest fan" to refer to people who enjoyed his works until reading an article panning their personal fandom. His article mocking 9/11 conspiracy theorists was a good example.
* The Best Page in the Universe, uses this as his rationale behind using a simple design consisting of a black background with white or light grey text in a large and basic font.
* The best part about the above? Grif didn't even see anyone looking at him,
* The best part about the price they pay? They either don't care or they think it's
* The best(?) part is that by then most the fans know better than just overreacting to anything Butcher says and suspect that some form of
* The best part is that Hank and his dad were fighting because Hank actually blurted out "I love you!" to his
* The best part is that they've been doing this for so long that they don't even remember
* The best part is that Thomas didn't realize what he'd done until Steranko called him up to congratulate him for making the page dirtier than he himself could ever have dreamed up.
* The best part of this episode is how everyone gradually claims to be good friends with Tuttle, in order not to feel left out.
* The best part of this is that the actual DeLoreans were dogged by controversial business practices and mechanical failures, but the
* The best part of this story is the pause. It's clear the judge was giving Mr. Buck a chance to object, but apparently he just wasn't paying attention.
* The best part? The other religions aren't that much better. At least Chaos is sort of honest about what it does, and doesn't pretend to be good.
* The best power armors in the game currently are Malevolent armor, Sirenic armor, and Tectonic armor, which are tier 90, although these armor sets do not include hand and foot items, although there are tier 90 power foot armor called hailfire boots, Flarefrost boots, and Emberkeen boots and tier 90 power hand items called Celestial hand wraps, Razorback gauntlets, and Ascension grips. The introduction of
* The best precision tools like micrometers and laboratory equipment are held to be Japanese or European (especially
* The best recent example would be the Ferrari 458 Italia, the manufacturer's former flagship RWD sports car. It had a minor design defect: the adhesive used in the rear wheel arches was too heat-sensitive. In the right conditions it could catch fire, and the fire could spread into the engine bay. Ten 458s caught fire this way in 2010, and Ferrari wound up recalling over a thousand cars to replace the glue with mechanical fasteners.
* The Best Revenge happened to Lily and James's possessions after they died. As the author explains in her notes, her brother died shortly before she started writing the fic, and being the executor of his estate taught her that "personal possessions sometimes matter very much for all sorts of reasons".
* The Best Revenge has this non-sexual variant during a dinner between Narcissa, Draco, Harry and Snape:
* The "be strong for mother" meme comes from interpreting a Doduo / Weepinbell mashup as
* The Best Science Fiction: 1949 (1948) are collected into a single hardcover volume.
* The Bestseller is soon topping the bestsellers lists. It doesn't take long for the auditors to realize something is off about Davis & Dash claiming the biggest hit of the season isn't selling more than 30,000 copies and Gerald's scam is exposed with his own father firing him.
* The best she can do is to promise she'll tell them at breakfast the next morning -- and then never show up for breakfast, claiming that makes the promise she had no intention of fulfilling not false.
* The best shields in the game currently are the Malevolent Kitshield, the Vengeful Kiteshield, and the Merciless Kiteshield at tier 90.

* The Best Show, broadcast from WFMU in Jersey City, New Jersey (and online at wfmu.org), later releasing music-free podcast episodes starting in 2006 and ending in December 2013, totaling over 500 episodes. The show returned in December 2014 as an independently produced, live streaming internet program and podcast (again with the music played over the air removed from most episodes for legal reasons). Average episodes run up to 3 hours, retaining the format it held for the majority of it's run on WFMU. Additionally, a variety of bonus episodes and spin-off shows have been produced concurrent to the main show.
* The best solution is for the second general to fire a flare above the city to signify having received the first message.
* The best subversion of this trope is the Ganymede, the earliest-built Knightmare to be shown in the series (3rd Generation). It has no internal power source, only batteries; no weapons, no closed cockpit and insufficient motive power to do anything other than harmlessly cruising.
* The best summation of a blue-green accord isn't the Simic Guild (which is mostly Blue people acting on Green things), it is the card Vedalken Heretic:
* "The best sun-chasing, globe-hopping, adventure-filled vacation day ever!" —
* The best surfers in the world come from Australia, Brazil or the USA, Hawaii in particular for the latter due to the huge importance surfing has in its culture.
* The best tank armors in the game currently are Achto Telalith armor, Achto Tempest armor, and Achto Primeval armor. These are obtained from participating in the
* The best variation of that sketch was when he called out to someone from the second-floor window to please hold the ladder for him as he climbed down. Of course, as he exits, the person can suddenly see that he is dressed as a burglar and carrying a bag marked "swag". To top it all off, he then ran off down the street shouting about how he and "that guy" just burgled the house.
* The best was from the episode "The Bart Wants What It Wants", where Wolfcastle played a CIA agent posing as a nerd for some reason or another. After getting taunted by some
* The best was when Snoop Dog was sent to hell for a 'dirty mouth'...and went to heaven as soon as he chewed Orbit. The disclaimer at the bottom? "Chewing Orbit will not actually get you into heaven."
* The best way to describe Neotanks is "Slightly more powerful Medium Tanks that cost
* The best way to sum it up might be that style is more important than substance in this case; for example, two fairies come across a hobo, and in a fit of benevolence, decide to help him. One gives him a banquet, a bath, some nice warm clothes, the works. The other harangues him, makes his life hell, and forces him to clean himself up, get a job and stand on his own two feet. In this case, both have made an effort to help him, but the first one would be called to Summer in a time of war, while the other would be headed Winterwards.
* , the best weapons for fighting vampires (even for normal humans) are simple spears and bows. As Faith demonstrated, a stake allows your enemy within arms reach (and biting reach) before you can kill them, a spear doesn't.
* the best wedding ever!", but she ends up admitting she doesn't know what a wedding is.
* The best/worst example: In one interview during the Magic World arc, he stated that
* The Best Worst Pick Up Lines!. Matt gives the audience pick-up lines like, "Ah, damn, girl, did you fart?! Because you just blew me away."
* The Best Worst Pick Up Lines, Pooter, Snack that Smiles Back, Whisker Biscuit, Beef Curtain, Squish Mitten, or the Pink Velvet Sausage Wallet."
* The Best Years has both Devon and Trent in love with Samantha in the first season. This triangle is repeated in the second season with Rich and Jake.
* The Best Years — made in Canada, set in Boston, Massachusetts.
* The Best Years of Our Lives about three returning servicemen's difficult adjustments to home life.

* The Best Years of Our Lives. Absolutely gut-wrenching to a first-time viewer.
* The Best Years of Our Lives. At one point Al obliquely asks his wife Milly whether she's given this to their adult daughter Peggy. Milly responds, "She's worked two years in a hospital. She knows more than you or I ever will."
* The Best Years of Our Lives, Fred ends up going home with the Stephenson family because he's drunk, and because he hasn't been able to find his wife. Peggy ends up putting him in her room, and when he wakes up, he not only has no idea where he is, he doesn't remember who Peggy is at first.
* The Best Years of Our Lives, Fred returns from World War II and takes up his old job as a soda jerk in the local drugstore. However, he finds this unsatisfying after his time as a captain in the Air Force.
* The Best Years of Our Lives which involves three WWII veterans returning to their hometown where their adjustment to post-war life is met with varying levels of success (one of the actors, Harold Russell, was an actual Army drill sergeant who had lost both hands in in a training accident).
* The best you can learn from an FPS is how to take advantage of the terrain and layout, and how to do coordinated attacks with other people. Any actual shooting skills or dealing with a living enemy who cares about dying requires some actual military training.
* The Betan hermaphodites are described as "Betan egalitarianism gone mad" and are relatively normal except for the obvious. They're also a minority even on their home planet though they're much in demand as sex therapists. They're different enough genetically (incompatible sex chromosomes) that they cannot reproduce with "normal" humans without the help of a laboratory, but socially they're treated as a subspecies of normal humans.
* The Betans a rumored to have one, which people assume is the reason that Admiral Naismith commands a mercenary fleet while appearing to be in his early twenties. In truth, there is no such treatment, and Admiral Naismith really is in his early twenties.
* The Betans might want to be thought of as this. However, they are capable of interfering with their neighbors' quarrels admittedly on a perfectly justifiable occasion like the Escobar war. What is more to the point is that they are arms dealers which makes them hypocrites when they condemn other people's bloodthirstiness.
* "The Bet" by Show of Hands is about a man who finds ten grand next to a car crash, takes it, bets on horses with it, wins ten grand and... yeah, you see where I'm going with this.
* the Betrayer" for nothing; the particular incident was when he grabbed a flamer and started attacking friendly and enemy forces alike after they had bunkered down to wait out a severe snowstorm (his actions shattered both the World Eaters and Emperor's Children Legions into small warbands). On the Tabletop, Kharn always hits in combat, but rolls of 1 mean he hits one of his retinue instead of the enemy.
* The Betrothed and Count Attilio: the former bet he would manage to lay his hands on Lucia.
* The Better Half, Stanley tells Harriet that he dreamed about eating a very large piece of lasagna; when he woke up, their red comforter was gone.
* The better-known song has a holiday theme, or has become associated with a holiday for some reason. These types of songs rarely make it on charts, but will become extremely well known through incessant replays by shops and radio shows.
* The better-known song was not actually a single, but had some element to it that made it popular after the fact.
* The "Better Than Life" simulation in the books inverts this by working exactly as designed - it really is 'better than life'. Trouble is, once you're in, you aren't aware it's a game and even if you are,
* The Bet that has them continuously drawing with each other right up to the end of the episode — and they're both alive and kicking (and competing).
* The Beverly Hillbillies a giant bird is carrying off a man. It's really a helicopter lowering down a geologist.
* The Beverly Hillbillies: a group of hillbillies who strike it rich and move to

Beverly Hills.
* The Beverly Hillbillies, although interaction between the casts was limited to general store owner Mr. Drucker (a regular on both series) and the occasional cameo.
* The Beverly Hillbillies. Always, it's because of the hillbillies' backwoods clothes and mannerisms:
* The Beverly Hillbillies, as Jed and Granny pass by Mrs. Drysdale among a small group of ladies.
* The Beverly Hillbillies, as Jed tries to soothe the raging Granny, this exchange occurs:
* The Beverly Hillbillies down (and has nightmares about their wedding).
* The Beverly Hillbillies featured premises which were the exact inverse of one another. The former was about country folks living in the city while the latter was about city folks living in the country.
* The Beverly Hillbillies features Granny giving Jethro a physical before he joins the army. At one point she is using a candle to look into his ear then, still looking in the same ear, moves the candle to the other side of his head. She blows in the original ear, snuffing the candle out. "If that boy had six ears, you could play him like an ocarina!" Granny concludes.
* The Beverly Hillbillies, get dogs howling in response, send a telephone receiver writhing across the table like an angry snake, and scare off traffic from a block away. Unfortunately, she also thinks it's a strong asset with which to woo the object of her affections.
* The Beverly Hillbillies Granny brings her mountain doctorin' with her to Beverly Hills. She dislikes the drugstore because it has no drugs in it, "they should call it a what-not shop." Her "rumatiz medicine" is just bootleg whiskey. She has an old mountain cure for the common cold which a drug conglomerate wants to buy until they find out it's just grain alcohol and the prescription is to drink it daily, get plenty of bed rest and additional fluids, and your cold will be "miraculously" cured in about a week.
* The Beverly Hillbillies: Granny can cook ordinary food just fine, as proven in the Thanksgiving and other episodes. But her hillbilly fare disgusts people outside the family (or outside hills); dishes like possum innards, gopher gravy, owl burgers, dandelion greens and Snyder's Swamp Surprise (pronounced Soo-prize).
* The Beverly Hillbillies. Granny gets excited and starts planning a wedding because a man they've recently met accidentally caught a glimpse of Elly Mae in her nightgown. According to the "code of the hills," as Granny puts it, now he HAS to marry her.
* The Beverly Hillbillies: Granny gets folded up into the hide-a-bed. By a monkey.
* The Beverly Hillbillies had Jethro wanting to be an astro-nut (sic). Jed says that it's ok, "That boy ain't got nothin' in his head but space" to which Granny cracks up, and Jed says "Let me put that another way". Then Jethro walks clumsily past them, wearing aluminum foil wrapped around his body to simulate a space-suit, a television antenna strapped to his back to simulate his communications system, and a literal fish-bowl as a helmet. Granny and Jed watch him stagger across the room while the studio audience is laughing hysterically, and as he leaves, Jed says "You know, I think I'll just let one stand."
* The Beverly Hillbillies had one of these, after Sonny Drysdale refuses to marry Elly May in a first-season episode.
* The Beverly Hillbillies: In "Back to Californy", Granny and Cousin Pearl become embroiled in a fight while each cooking a meal in the mansion's kitchen. Pearl purposely destroys Granny's cake by slamming the oven door. Pearl snidely tells Granny that her sweet potato pie is fall-proof. Granny takes out the pie and drops it on the floor!
* The Beverly Hillbillies: In later seasons, Jethro becomes insufferably conceited and believes he's an expert on everything. This is by virtue of his sixth-grade education and his "giant brain". Some of his low-lights include his attempt at being a talent agent, his belief he can speak Japanese and any number of claims that he's a Hollywood playboy.

* The Beverly Hillbillies in only a few hours. Other trips to and/or from Hooterville, including Granny's motorcycle/airplane/horseback jaunt home from caring for the Elliott baby, also appear to take a relatively short amount of time. However, by all indications, Hooterville is somewhere in the Midwest - probably not too far away from the Clampetts' native Ozarks due to the implied relation between their cousin Pearl Bodine and Hooterville's Kate Bradley. If it took the Clampetts several days to drive out to Californy from their cabin, as stated in an earlier episode, Hooterville shouldn't be a day trip for them.
* The Beverly Hillbillies: In "The Cat Burglar," Elly May sets traps in case the thief comes prowling around the Clampett Mansion. Jethro is caught in a net several times, until finally, at the end of the episode, Elly May catches the real cat burglar outside the front door.
* The Beverly Hillbillies: In the film, Jethro is first mentioned when Elly May says he's coming from Oxford to visit them. The next scene shows him leaving Oxford, Arkansas.
* The Beverly Hillbillies is as close you can get to this without using time travel — seeing as the Clampetts lived like it was still the 19th century before becoming wealthy (one truck among them, horse travel still being common in their region, and one phone in a 40-mile radius being the most advanced they had it), the sudden culture shock of moving to a modern Beverly Hills mansion with all the modern furnishings allowed for some real oddities.
* The Beverly Hillbillies: Jed strikes oil on his property while hunting for game and becomes rich.
* The Beverly Hillbillies "long talk" Jed intends to have with Jethro throughout the series).
* The Beverly Hillbillies: Miss Hathaway put on a disguise to rescue Granny. Later the two tried to return to Clampett Manor but were barred by a guard. Miss Hathaway asked the guard if he knew who he was talking to, to which the guard says it's one crazy lady and another one in a bad wig. Granny thought the "bad wig" part was about her and starts kicking the guy in the shins.
* The Beverly Hillbillies movie: After a driver gives them the finger, the Clampetts mistake it as a show of how people in California say "howdy" and give it to others without knowing better.
* The Beverly Hillbillies, Mr. Drysdale's first introduction to Jed Clampet is when he grabs a ruffian who's holding up the workers at the Clampet estate and asks if he knows of Jed Clampet. Jed's response is along the lines of "I am Jed Clampet and I'd appreciate it if you let go of my Sunday shirt." In a very (uncharacteristically) angry tone.
* The Beverly Hillbillies Mr. Drysdale was always on the lookout for these, because Jed & clan were too trusting to believe that anybody was trying to sucker them.
* The Beverly Hillbillies's aggression by having her watch pro wrestling on television. However, Granny gets so angry watching a baby face "Rebecca of Donnybrook Farm" get cheated and beat up that she goes to storms off to the show to do something about it. Interestingly, pro wrestling is portrayed as a city activity the country folk are new to.
* The Beverly Hillbillies. She can even convince a bird and a cat to get along, although she has mixed results in convincing her animal friends to play nice with her human family.
* The Beverly Hillbillies - the Clampetts encounter a group of Beatniks, who are intrigued and ask them what they dig. Jed tells them they dig taters, and pantomimes a shoveling action - 'Diggin' Taters' becomes the Beatnik's new dance of choice.
* The Bewitchin' Pool" opens with Gil and Gloria Sharewood telling their children Sport and Jeb that they plan to divorce, which is a scene from towards the end of the episode. This was because the production was short of usable footage.
* The Bewitchin' Pool" was inspired by Earl Hamner, Jr. reading about the increasing divorce rate for married couples and its effects on children in the San Fernando Valley of California.
