* Survival of the Fittest suffers this embarrassment when attempting to have sex with Maria Graham. Comedic, but also a relief, given he was taking advantage of Maria's highly distressed state at the time to make a move on her.
* Survival of the Fittest's v4 prom had started out with this trope, because much of the music requested early on consisted of '80s releases.
* Survival of the Fittest). "Teenager-killers" is also used as times, but not as often.
* Survival of the Fittest; the character's creator explained it was because of abandonment issues; she was once tricked into believing she was in love, and ever since, she has been purposely sabotaging her relationships or picking the worst possible boyfriends to hook up with in order to stop herself from being hurt again.
* Survival of the Fittest the game is being broadcast by the terrorists on live television by way of hijacking. The first time it happened, the government tried to cover it up by saying it was a reality TV show with an unusual theme. Then it happened again...
* Survival of the Fittest the idea), but is technically set a year behind the real world. For example, v3 is the current game, played in 2008, but in the SOTF world it's 2007. With v3 finally nearing its end after about two years of play, the setting is now further behind.
* Survival of the Fittest the person he was talking to at the time — insisting on showing him his 'present' (a meat cleaver).
* Survival of the Fittest. The problem with this? SOTF v3 is set in 2007, a year before the film even came out.
* Survival of the Fittest: The Program, Marilyn Williams does this in reaction to being thrown into the compound, under a bed, no less.
* Survival of the Fittest, there are a few that are… particularly notable. Adam Dodd, Kris Hartmann (in multiple languages!), Dorian Sanders, and Jimmy Brennan are such examples.
* Survival of the Fittest, the series that inspired it, has each of the "contestants" on the island fitted with an explosive collar that goes off if they try to leave the island or go into a danger zone. It also explodes if they try to remove the collar, making removal almost impossible. Damaging the collar enough, particularly by gunshot, is also enough to detonate them; two students died this way in v1.
* Survival of the Fittest, the work that inspired it, is pretty much impossible to place in one genre. A class of students being abducted and forced to kill each other with very close attention to their personal experiences has led to a rather diversive mix of horror, action, romance and even comedy, all thanks to the multitude of different writing styles that occurs with so many authors in one place.
* Survival of the Fittest they can get. While sometimes this is satisfying and can evoke excitement or sympathy, a lot of the time it falls flat, with the readers wanting the poster to just get on with it. Conversely, inactive or fodder characters tend to be killed off like nothing.
* Survival of the Fittest. They didn't do anything in Version Five, but as of the prologue to Version Six, they seem to know about the latest abductions and to be planning some kind of intervention.
* Survival of the Fittest they'll have once the terrorists abduct their school.
* Survival of the Fittest they usually either make a shiv or a spear from available materials. Examples of characters who made spears include Niniko Kishinawa and Daniel Brent.
* Survival of the Fittest. This includes talking about the premise of teenagers being kidnapped by terrorists and forced to fight to the death. And specific scenes can fall into this as well; to most people, a scene where a teenager pins another teenager to a tree with a sword and carves words into his chest would be disturbing, for example, but once you know the context it's much more positive.
* Survival of the Fittest this while crossing it and wondering if it'll fall,

reminding himself that the military wouldn't risk men and equipment by making a bridge that wasn't sturdy.
* Survival of the Fittest, though with some of them it is possible to kill an enemy with some creativity. A kill was made in v3 by smashing an ocarina in the victim's face, then stabbing him in the neck with a broken shard and knocking him off a cliff.
* Survival of the Fittest thrown in. V4 character Phillip Ward, a member of the ice hockey team, is also known to a bully and once beat up Jimmy Brennan during a tryout. Not counting the occasional bullies who're otherwise good people, though, this trope almost never appears in SOTF, which is slightly surprising.
* Survival of the Fittest, topics containing either extreme violence or graphic sex are expected to be given content warnings. This usually just results in more people reading it.
* Survival of the Fittest to their mother, and have been known to attempt to "regain" her love from the other twin.
* Survival of the Fittest to the setting, it isn't clear how much is still canon; at the least, them being at war with the US isn't.
* Survival of the Fittest traits. She spends a good amount of time on the island hallucinating "visions from God" and trying to convert people. Disagree with her and she'll bash your head in.
* Survival of the Fittest. Turns out it was somewhat one sided though, as Chadd spent his dying moments forgiving Janet for cheating on him, whilst Janet spent hers regretting that she couldn't think of something more worthwhile than him.
* Survival of the Fittest. Two examples come from v1, during the same gun battle. Peri Barclay wielded two revolvers, but this proved completely ineffective as he failed to hit anyone. Jacob Starr later did the same with his gun and one that an ally dropped, but he alternated fire between the two guns and it wasn't really to hit anyone as much as it was to force Peri and his ally Steven to keep their heads down, covering the other group's retreat.
* Survival of the Fittest upon which the games take place are rather large, and the odds of meeting your friends that fast are rather slim, to say the least.
* Survival of the Fittest used a sledgehammer. Unfortunately, it slowed him down enough that the one time he used it in combat, he got his arse handed to him.
* Survival of the Fittest v2, abruptly exploding due to a chemical reaction in her digestive tract.
* Survival of the Fittest, V2, and V3, despite the fact that they all have radically different characters and storylines, just because they start from the same basic set up (a bunch of kids get put on an island and forced to kill each other).
* Survival Of The Fittest V3 and its Pregame, especially since the characters are all, at best, high schoolers. Averted in V2 and V1, mostly, since few characters got opportunities to engage in hand to hand fighting.
* Survival of the Fittest v4 does once he wakes up on the island is... wet himself. Then he starts crying and running around screaming throughout the forest, eventually shouting out that "Craig Hoyle will rape you and wear your skin as a coat!"
* Survival of the Fittest v4, mostly involving racist remarks towards Isabel.
* Survival of the Fittest V4, Reiko Ishida got one of these due to her success in ice skating, often referred to as her "entourage". Bit of a subversion, though, as, unlike most characters that have found themselves in this trope, she's actually quite close friends with them.
* Survival of the Fittest version 1, Johnny Lamika ambushes and tries to rape Adam Dodd. However, before things can get too far, Adam manages to bring out his taser and fend Lamika off, before proceeding to beat him to death.
* Survival of the Fittest version 4's 'Bounce' speaks with excessive formality, which is possibly because English wasn't her parents' first language, although intelligence plays a part.
* Survival of the Fittest Version 5 is constantly drooling over Becca Everett's physique and body, leaving his narrative distinctly preoccupied with his ally's

looks. His one-track mind makes up a large part of why he agrees to team up with her.
* Survival of the Fittest version four started off as a character in the 'In-Universe Chat' (a chatroom where SOTF members could RP being members of the show's audience). After some time, she was brought into the version four pregame as a fully-fledged character.
* Survival of the Fittest version one, Cillian Crowe and Daphne Rudko both murdered their own parents, though Cillian was confined to an insane asylum due to his actions while Daphne got off scot-free.
* Survival of the Fittest version/season isn't enough — references will be made to scenes or characters in previous versions. It's often very bewildering for people seeing the RP for the first time.
* Survival of the Fittest version three, Dominica Shapiro's part in SADD was very much one of these, although she was slowly becoming more a part of the team.
* Survival of the Fittest version three is assigned a bullwhip as a weapon, which he later uses to strangle Luis Chezinski to death.
* Survival of the Fittest version three this happened to Dominica Shapiro, who initially joined the group SADD on the off chance their plan would work, with the intent on a double cross if not, but gradually became more and more part of the group properly.
* Survival of the Fittest version three was the best mechanic in her school until she was killed by a hornet's sting on the island.
* Survival of the Fittest version three who, whilst not stabbing anybody in the back or outright betraying them, was prone to walking out on groups or partners that she felt wouldn't benefit her. She wasn't exactly cowardly or villainous per se, but Maxie was definitely not somebody to be relied on.
* Survival of the Fittest version two, while not starting out like this, eventually turned into one near the end of the game.
* Survival of the Fittest villain Bobby Jacks' entire justification for 'playing the game'. (The full statement being: 'I did what I had to do to survive')
* Survival of the Fittest when he suddenly turns on Peri and attacks him.
* Survival of the Fittest, when not kidnapping hundreds of high school students at a time and forcing them to fight to the death, is shown to enjoy spending quality time with his loving wife and adorable eight-year-old daughter.
* Survival of the Fittest, where after the machete-wielding Andrew Klock is wounded with a corkscrew in his fight with Cole Hudson he pulls it out of himself and attacks Cole with both weapons, eventually lodging the corkscrew in an artery.
* Survival of the Fittest, where Danya sometimes puts medieval swords on the list of weapons to be assigned. Such swords include a 55-inches-long Claymore, a 6-feet-long Zweihänder, and a Grosse Messer.
* Survival of the Fittest - whereupon a car is crashed into a warehouse by a contestant and proceeds to explode a few seconds later. Bonus points for this causing the building to go up in a gigantic fireball too.
* Survival of the Fittest. While more common in earlier versions, the staff nowadays tries to avert this by requesting profiles that have clear pre-made traits to be rewritten if not outright denied.
* Survival of the Fittest, while this is not normally looked at in a romantic way, Bayview (V4's school) has an abnormally tall population. The current average height of a female student is a relatively normal 5'5"...the male population, on the other hand, has the average height of 6'2".
* Survival of the Fittest with Sam Sorenson, who spent a good portion of his time on the island running around naked.
* Survival of the Fittest works on a similar system, but is more idealistic. However, Shogo Kawada fits the trope at first and pretends to be the sole survivor of the Shiroiwa game to aid Nanahara and Nakagawa in their escape.
* "Survival of the Idiots": Hibernating Sandy jumps down and beats up SpongeBob and Patrick as they scream in fear.
* Survival Tabs most definitely designed to provide the greatest amount of nutrition possible in a single thumbnail-sized tablet. Take twelve daily.

* "Survival", the Doctor is thrown from the explosion when neither he nor the guy he's playing motorcycle-chicken with swerves in time. He lands face first (and arse up) in a pile of rubbish someone was nice enough to leave lying in an abandoned field.
* Survival", the final story of the Classic series before the show was cancelled:
* Survival Tips for S.H.I.E.L.D. Recruits: While deeply concerned with curtailing dangerous hijinks, S.H.I.E.L.D. has nothing against harmless fun.
* survive. Also during the earliest days of the Cataclysm Beta there was datamined info that Deathwing was going to corrupt Alexstrasza the Life-Binder and together they would conquer the world.
* Survive!, and the end of the books contain facts and figures on how to handle yourself in such an emergency.
* survive being rammed. There are recorded instances of US heavy bombers taking ramming attacks to the fuselage, and in the B-17's case the tailplane, and successfully returning to base.
* survive being swallowed alive. The bombardier beetle, for example, after being swallowed by a frog can cause a rather unpleasant chemical explosion inside of the frog's stomach that causes it to toss the beetle back out.
* Survive!, carried the following warning in advertisements and on the poster:
* Survived the Beginning: Characters survive the beginning of the story, and may or may not be killed later.
* survived the destruction of magic in the Multiverse in the last episode.
* Survive for X turns" missions have unique dialogue if you actually manage to win early by rout or capture.
* survives an exploding submarine, which is absolutely necessary for the plot because he's the only pilot. Parodied in "How Lost should have ended".
* survives massive blood loss, a gold mine cave-in, and a bullet in the chest.
* survives the attack on his team that the Ranger died and came back to life. Tonto tries to convince the 'spirit horse' to bring his brother back instead.
* survives the battle. As a result, the basic strategy for Lone Wolves is to deliberately throw them at the enemy in the hopes that they die taking down as many enemies as possible, or at the very least drawing their fire.
* survive the simulated battle. That's fair, as Harrington is universally recognized as one of the top naval commanders of her era, and her opponents are college-aged officer cadets.
* survive the ups and downs that come with life. After all, if the P3 Hero romances her, he'd either have to accept the heavy responsibilities that come with being the spouse of a rich heiress, or they'd elope, and possibly have a failed relationship.
* survive to the present day (and now there is concern that they are decaying due to visits from tourists whose breath introduces more moisture, causing the countries which have these sites to limit them).
* surviving a close-range shotgun blast thanks to a Bulletproof Vest. He makes good on that promise by picking up a bottle of Jack while grabbing his new outfit.
* Surviving Death a researcher claims most ghost photographs are not really ghosts but some are unexplained. The episode also interviews a man who claims to have made contact with a spirit through his polaroid camera.
* Surviving High School, this could be seen as a way of letting the player know Keith is gay.
* surviving humans in Lordaeron who remain loyal to the Alliance voluntarily.
* Surviving Mars has multiple Mysteries which have to do with the PC making contact with, or finding the works of, alien life forms.
* Surviving Mars has the rockets used to carry supplies and people from Earth, but can also ship rare metals off of Mars for extra money.
* Surviving Mars, one of the available sponsors you can select for your Martian colony is called the Church of the New Ark. Their birthrate is doubled and all colonists get the Religious trait (higher base morale, low sanity never leads to suicide), but they start out with only one rocket, they don't generate research on their own, and hydroponic farms produce 50% less food.
* Surviving Mars: The expansion "Green Planet" is all about terraforming Mars,

using a wide variety of methods, either exploiting existing technology (such as deliberately burning carbon fuels to warm up the planet with greenhouse gas) or the local geology (setting off a Martian supervolcano, or steering comets into the planet, to increase its atmosphere). There are four independent stats that have to be improved: atmospheric density, temperature, water availability, and flora biomass. Every method to increase these takes a long time to give up results, and the planet's lack of a magnetic field and natural soil toxicity will hinder progress.
* Surviving Mars, this is a wonder which can replace or supplement the rockets as the colony's means of trade with earth.
* surviving something that was said to kill all other people that it touched, he was even getting better from it on whether or not he's immortal, though, so it may or may not be justified.
* Surviving the Applewhites with color-blind casting. This leads to, among other things, an ad-libbed line that the von Trapp children are all adopted.
* Surviving the Game: This forms the plot of the Ice-T/Rutger Hauer/Gary Busey movie.
* surviving the Hopeless Boss Fight, you single-handedly fighting off all the enemies while they talk about how they can't bring you down.
* Surviving The World does this, with the creator standing in front of a chalkboard with his comic for the day written on it.
* Surviving Urban Disasters fame, showing techniques for how to stay safe during disasters and interviews with survivors.
* Surviving Valyrians, the Elf-like progenitors of House Targaryen, can be counted on one hand. After the Doom that destroyed their civilization the only known survivors were people who had outposts far away from the mainland such as Aegon and his family. In the century after that cataclysm, wars broke out among the colonies and their empire fell. The culture and language still exists as it was passed down to the Free Cities, but outside a few aristocratic families the very ethnicity is dead, following years of intermingling with locals.
* Surviv.io, and completely obscure anything inside the smoke (as well as removing scope advantages to the players inside the smoke). A popular tactic is to first drop a smoke grenade into a house or another confined place, and then throw a regular one into the smoke, where no-one will notice it until it's too late. The same effect can also be obtained by destroying the fire extinguishers, which are present inside bunkers and in the police station.
* Surviv.io, axes are the most common melee weapon around: you can find them stuck in the tree stumps, they'll ocasionally be present inside a sealed container in an underground bunker, and a bloodied axe may sometimes be mounted on a cabin's wall in place of a shotgun. It's very much possible to cut down someone unarmed or wielding a pistol/low-powered SMG indoors, but you are still better off with a weapon out in the open. Its greatest strength is in allowing you to open containers much faster, thus saving your precious seconds in this fast-paced game.
* Surviv.io has the short audio recordings you can trigger at certain locations, which give wider context to what happened on the island when combined with the environmental storytelling and the info written in the change logs.
* Surviv.io, which is usually considered the second-worst pistol-type weapon in the game, and one of the worst weapons in the entire game. While it is very accurate, and deals pretty good damage per shot, its fire rate is so low that actually killing anyone not already grievously wounded will take far too long next to anything else - unarmed players straight-up punching OT-38 wielders to death indoors is the rule, rather than the exception. You can dual-wield it to fire a bit faster and get double the ammo, but then you lose its accuracy advantage and get double the reload time.
* Survivor 2 has a similar close up, except a lot more gross since it's a zombie.
* Survivor. A few people complain about Helen never shutting up about various recipes, after which we see her doing just that...and then cut to nighttime where she's standing in about the same spot and talking about more recipes, giving the distinct impression that she's been standing there doing this for hours.

* Survivor after some flashbacks, reminding himself to get through the story to the point of the hijack. Just for kicks, the page numbers run backwards.
* Survivor. Also, "Ravishing" Rick Rude used "The Stripper" by David Rose as his entrance theme during his "Chippendale" gimmick.
* Survivor also subverted it by winning even though they weren't part of the Savaii and Samburu tribes, respectively.
* Survivor always has the weaker or less loyal players voted out first; and then at or near the merge, the people who carried the tribe through the first half of the game are evicted because they're a threat. Everybody also starts to make an alliance of about three to five during the tribal game, trying to get others to vote with them as dummy votes just to get a majority at tribal council. There's always at least one time where someone who's stronger is voted out over a weaker person because they're less loyal.
* Survivor appear at least on screen at some point in every single episode until they are voted out, however, due to there being many contestants on the show, it is nearly impossible to focus on every single on in an hour-long episode. As a result, some contestants are often relegated to background roles for one or more episodes, having no on-screen interviews (called "confessionals") and are completely irrelevant to the plot of the episode. In extreme cases of this, they are considered by fans to be "invisible" in the episode, indicating that they were all but completely absent from the episode. Often times, contestants are so "invisible" throughout the entire season that their invisibility actually becomes a running gag with fans. Examples include Mary in season 16, Brett in season 19, Kelly S. in season 21, and Rick in season 23.
* Survivor, because the only water Lex encountered there was at the bottom of a muddy hole).
* Survivor... but with a machete. The medical team actually came and took a look at it.
* Survivor, contestant Jerri Manthey excluded Tina Wesson when asked to list the members of her alliance. This eventually resulted in Tina turning on the alliance and voting Jerri out of the game in eighth place. Tina went on to win.
* Survivor contestant Neleh Dennis was known for saying "oh my heck" all the time, clever editing made it look like a
* Survivor, contestants faced off against each other while each balanced a ball on a flat surface with one hand, using the other hand to try and knock their opponent's ball to the ground. Since the rule was that the loser was the person whose ball hit the ground first, some of the smarter players realized they could throw their own ball high in the air and then use both of the their hands to attack the opponent with downward strikes, pushing their opponent's ball to the dirt before their own finally landed.
* Survivor, contestant Yau-Man Chan, despite being a small man in his 50s, was able to excel in many of the physical reward challenges because he calculated things like arrow trajectories. Early in the game, he opened a supply crate that several younger men couldn't open—lift the crate over a rock, drop the crate corner first, and let gravity crack a weak spot.
* Survivor Dogs". A day is "one Sun-Dog journey". The seasons are Tree Flower, Long Light, Red Leaf, and Ice Wind.
* Survivor Dogs all start as adults. This gives them a more mature outlook on life than pups and allows for plots such as Lucky becoming an older brother figure to Storm.
* Survivor Dogs and the Grim Reaper. She's a black mastiff-looking dog that lives in the earth. When beings die, their bodies are taken by the Earth-Dog.
* Survivor Dogs attributes many natural occurrences to mythical and mystical dogs:
* Survivor Dogs believe in nature spirits called the "Spirit-Dogs". They're a combination of nature spirit and anthropomorphic personification. For example, the sun is a dog called the "Sun-Dog" and the planet itself is the "Earth-Dog".
* Survivor Dogs: Bella and Lucky were separated as pups. When they meet years later, Lucky immediately feels connected to Bella even before recognizing her. They're so similar he compares it to looking in a mirror. The two do have some

differences, however, such as Lucky being much scruffier than Bella.
* Survivor Dogs book begins Yap and Squeak talking with their Mother-Dog as puppies. It then segues to Yap, now an adult named "Lucky", in a shelter right before an earthquake hits.
* Survivor Dogs breeds) and "water-dog" (Newfoundlands and other water-centric breeds). He also objects to referring to a river stone used to keep meat cold as a "cold-box" (a fridge), with his sister agreeing that "river-store" is better and "more doggish" sounding.
* Survivor Dogs, dog and wolf packs are led by an alpha. The alpha is the strongest member of the pack. They're usually referred to by their title, "Alpha", instead of their name. Alpha's also have a second-in-command called the beta. Betas are often mates towards their alpha and are the runner-up to being alpha.
* Survivor Dogs gets mortally wounded by Alpha in the first chapter of the second book.
* Survivor Dogs, HarperCollins' plan was to keep secret what animal the new series would be based on, so that it would be a big hyped-up reveal. Fans discovered on HC's own online catalog a poorly-labeled image of a cardboard stand for bookstores, with the first book's art and the text "the time has come for dogs to rule the wild" across the top. They removed the image after fans began to spread it around.
* Survivor Dogs have a rank system that goes from Alpha to Omega. Canines can advance in their rank, but most stay as is. The Omega are treated the worst, are only referred to as "Omega", and are forced to clean up after the others. Sunshine (a Maltese and thus weaker than the others) is seemingly permanently an Omega, but she's learned to enjoy her poor rank. Lucky dislikes the system and attempts to replace it with a democracy, however it's too confusing for his pack-mates and they end up reverting back to the caste system.
* Survivor Dogs is about groups of dogs (and one wolf-dog) surviving on their own after all humans evacuate the area after an earthquake. They must learn to live without help from their "longpaws". Along the way, the characters face off against rival dogs, wolves, bears, strange dangerous humans, and the environment itself, all while trying to stay alive.
* Survivor Dogs is half-German Shepherd, not half-Husky or Malamute. He gets his coloring from his gray wolf side.
* Survivor Dogs Leashed Dogs freak out as well. Lucky, who has been on his own since puphood, doesn't even know what a "vet" is and finds the whole thing absurd. Sunshine was barely scratched while he's been running around with a worse paw-cut for several days. Lucky teaches the others that licking wounds is perfectly fine medical care.
* Survivor Dogs: Moon's parents wanted her to be mates with a dog named Hunter. After Moon's pack caught a sickness, Hunter ran off and didn't come back until after the sickness had gone. Moon chased him off for his disloyalty.
* Survivor Dogs of his pack: the slimeball Pug named "Whine". Whine blackmailed Lucky, inadvertently got a packmate killed, and was all too keen to let Alpha kill the Fierce Dog puppies, all because he didn't like being the Omega of his pack.
* Survivor Dogs only contains one map that just shows the "animal view" of the world. The map differs between books. The first book contains a map of human places because the book takes place mainly in or near a city, but the third book contains a map of the forest and surrounding territory.
* Survivor Dogs or their parents were. This element of their characters hasn't been explored. Examples include Moon (a Border Collie) and Whine (a Pug).
* Survivor Dogs spit". At first, they don't go after them, but after he ticks them off by insulting their parents, they chase him.
* Survivor Dogs, this would be the pack's "beta". The beta is the second-in-command to the pack alpha. The alpha relies on the beta for guidance and second opinion. It's also mentioned that they often become mates, though it's not required.
* Survivor Dogs to be a Lone Dog again, but he hates that it had to be because of an exile.
* Survivor Dogs", while smaller units such as a day would be "one Sun-Dog journey".
* Survivor Dogs work based on a group of pet dogs and one loner dog left in a city

after a massive earthquake devastates it. They eventually make it to the wild and learn to live on their own.
* Survivor: Fan Characters about how her only regret is that she didn't do more to hurt others. Your reign was nice while it lasted, Bonnie.
* Survivor: Fan Characters and having too many one-note/Jerkass characters in their overall casts. This is mitigated somewhat, however, by the odd-numbered seasons between them being widely liked by the fanbase.
* Survivor: Fan Characters backstab them, Montana, ultimately losing him the game.
* Survivor: Fan Characters, especially later on, follows a trend opposite that of Star Trek: The odd-numbered seasons are quite popular while the even-numbered seasons get lukewarm receptions at best. The author himself has noticed, and hopes season 14 will break the pattern.
* Survivor: Fan Characters: E.T. and Ethan from Season 18 soon started doing this after ending up on the same tribe, to the annoyance of everyone else.
* Survivor: Fan Characters fan character who wore a red shirt and barely avoided dying from freak accidents multiple times. Ironically, he actually ended up being one of the season's luckiest characters as not only did he never actually die, but the comic's creator changed his elimination to occur much later in the season than initially planned.
* Survivor: Fan Characters have tried throwing an immunity challenge solely because he hated almost all of his tribemates and wanted to vote them off.
* Survivor: Fan Characters. However, both of these problems had their roots in earlier, more well-received seasons:
* Survivor: Fan Characters loves this trope: nine times out of ten when a positive underdog player or alliance is played up as being hopelessly outmatched by a more numerous and villainous alliance, one of its members will go on to win the whole thing, with four out of its first nine winners fitting this trope perfectly. The only real exception to this is Norman from Season 6 who was the last guy remaining but seemed to have a fighting chance against the crumbling female alliance, only to be eliminated in the same episode.
* Survivor: Fan Characters outcome to generate suspense about the otherwise-predictable result.
* Survivor: Fan Characters, she could very well have walked away with the million. She tried this tactic again in season 16, pretending to be Bonnie's kind therapist with "Bonnie" being an actress hired by her, but this time her tribemates saw through her act much more quickly.
* Survivor featured a contestant whose regular outfit included camouflage-pattern pants. For some reason, CBS censors blurred out the pants, thus making it look like the contestant was pantsless.
* Survivor: Fire, and Sister is probably younger than Brother, but not a baby.
* Survivor: Fire, Gran seems a bit dopey, what with sticking around in the burning kitchen, but the game ends with her giving a link to a fire safety website.
* Survivor: Fire: She doesn't come out of the kitchen when it's on fire, but then she seems pretty competent.
* Survivor: Fire: The girl walks with a skip, even though the whole premise of the game is that her house is on fire.
* Survivor: Fire: The little girl (the protagonist's sister) walks with a skip.
* Survivor: Fire: The mother is the one who unlocks the door to the safe room, saving everybody.
* Survivor: Fire, where instead of falling asleep during the day, Gran wakes up at night.
* Survivor: Fire, while the gran lets her brownies burn, they are known for being pretty good when not burnt.
* Survivor: Fire: Zigzagged for the grandmother. She makes good brownies but lets them burn and accidentally starts the fire. However, she links to a fire safety website at the end of the game.
* Survivor Guilt: A character doesn't want anyone else to die in their stead.
* Survivor Guilt: A character feels guilty for surviving a tragedy where others died.

* Survivor Guilt and blaming himself for Alonna's death. Negated when he fell in love with Fred, giving him a new lease on life.
* Survivor Guilt and performs feats that aren't supposed to be humanly possible. The epologues imply that he may have an illustrious future as a mage.
* Survivor Guilt. Between this and the possibility that the one behind the incident has a personal grudge against Undine, she fears it all happened because of her. An encounter with that person later leaves Undine unable to take pleasure from saving a civilian family from a monster because she fears it was her presence that brought about the attack in the first place. That Heartful Punch was very nearly killed as well only makes it worse.
* Survivor Guilt: Even if do you survive the story, you might still feel guilty.
* Survivor Guilt facade, Isadora's angst over her relationship with Harken).
* Survivor Guilt kicks off, she has become the kind of person who will stop criminals, send them to prison and try to help them.
* Survivor Guilt: The one person left alive feels bad that they didn't die with the others who were killed or that the others weren't the ones who survived.
* Survivor have acted like they lost the game because they didn't win.
* Survivor have had an even number of jurors — this resulted in the possibility of there being a tied vote at the end. Sure enough, if this happens (Which it did once), the second runner up would cast the tiebreaking vote.
* Survivor: Heroes vs. Villains' in a purely physical, one-on-one sumo wrestling challenge.
* Survivor. "If anyone calls me Benjamin to my face, I'm gonna go nuts."
* Survivor), in particular, understood this point perfectly, and that’s why both of them wound up with the million.
* Survivor is all about this, as being able to continue playing and eventually win depends on how others vote, so a contestant's gameplay has to be tailored for the people he's playing with. Richard Hatch all but defined the metagame in the first season when he convinced his tribemates to coordinate their votes to target the opposing tribe; and alliances have been the top strategy ever since.
* Survivor is a particularly extreme case, as the contestants are placed on a "deserted" island and must live without basic amenities.
* Survivor: Ken is the shortest, skinniest guy on the show, while his chief ally, Crystal, stands 6'3" (191cm) tall.
* Survivorman him to carry a rifle, specifically because of the danger of polar bears.
* Survivorman: In an episode where Les Stroud has to survive in the Louisiana swamps he remarks that while it can be rather pleasant during the day, the swamp is very spooky at night.
* Survivorman, Les builds a "figure-four deadfall", in which a flat rock is balanced on an easily-triggered arrangement of sticks. He baits it with a bit of peanut butter and successfully flattens a ground squirrel for dinner.
* Survivor more or less begins at the end, before coming back to the opening for the second chapter.
* Survivor: One World has a good example of the perception vs. the reality of this. Matt, an alpha male, picked out some other alpha males to work with and believed they ran the tribe; at one point describing them as "roosters" leading the "chickens" around. Then the tribe actually had to go to Tribal Council; and it was pointed out to him that there were five "chickens" and only four "roosters". Goodbye, Matt.
* Survivor, physical strength usually doesn't affect challenge success as much as some people think it does, and the social game is more of a factor overall.
* Survivor respectively have many examples of this since super fans have been cast in many seasons.
* Survivors, Abby is adamant that her son has survived the epidemic, in spite of the fact that the majority of the world's population has been wiped out. A bit of a twist on the formula seeing as he's not technically been "taken away", but at its heart, he's a missing boy and this is a slice of Chekov.
* Survivors depicts a world where 99% of humanity are wiped out by a rogue virus,

leaving hundreds of pristine but abandoned cities. The cities are largely avoided however, due to the health risks of the millions of unburied bodies.
* Survivor season that followed being an all-wild card situation after Rupert's elimination. Special mention to Sandra, who won employing a self-proclaimed strategy of "as long as it ain't me."
* Survivor Series, it was revealed that Trips had only suffered "minor injuries" and seven days later, he reappeared on television looking as good as new aside from some medical tape around his ribs.
* Survivor Series man tag teams! Of course, the heels almost always had the extra man. In its heyday, all the Series matches were of this type, but nowadays there are usually three or four (now referred to as the "Traditional Survivor Series Match"), with other match types filling out the under card. Whenever a brand split is active in WWE, there were always be at least one Raw vs Smackdown elimination match (in 2019 NXT entered teams of their own) with brand bragging rights as the prize.
* Survivor Series, the guy who cashes in and then joins up with said heel authority figure. It wasn't well-received at all, for a variety of reasons:
* Survivor Series. While they were mercilessly beaten on by the face team every time they were in the ring, they somehow survived until the very end.
* Survivors had this throughout Season Two, with various characters "off gathering salt".
* Survivors has a small but steady fandom of people drawn in by the dog and wolf characters.
* Survivors has the community start down this road in the episode "The Witch", but, mercifully, saner heads rein in the hysteria before the (innocent if slightly strange) victim gets tied to a stake.
* Survivors have Abby Grant waking up halfway through the first episode to find that her husband and all her neighbours are dead, issuing the famous plea "Please don't let me be the only one."
* survivorship bias (often owing to the way management manipulates things) end up in the unemployment line, on job-hunting websites, attending endless "workshops" and trying to "network".
* Survivorship Bias: When the story focuses on survivors of a bad situation, they had "something" that helped them survive (even if it was just sheer random good luck). Everybody else just didn't "had it", and that's too bad. Survivors being in the military is a typical way to justify them being in the frontline of the disaster.
* Survivor shot multiple combinations of contestants at Tribal Council, creating a phony boot order.
* Survivors. Hung looter in a Netto? Check. Decomposing corpse in McDonald's? Check.
* Survivors: In the fourth episode of the second season, after they're freed by the main cast.
* Survivors, Krypton was invaded by the Vrangs, who enslaved the Kryptonians until a revolt threw them out of the planet.
* Survivor's Matthew Von Eltferta has become this, though only how he came off on the show.
* Survivor's Quest and an officer stuck in the same trap in a different car solve this by using their sensors to figure out what wire does what and rigging something using the control cables, so that some power from one beam is redirected to the other, letting them move.
* Survivor's Quest gets out by siphoning power from one cable and directing it to another.
* Survivors's disgusted reaction makes it a plot point, although they get over it)
* Survivors. She begins working her way through the male members of the main cast from there.
* Survivor. Stephanie Lagrossa had played twice already. One time her tribe lost every challenge and she was the only one left in her team. The second time, she was in the final two. Guess what James Clement (and anyone else afraid of a "Repeat")

conveniently didn't mention?
* Survivors to humans, but his squashed muzzle and beady eyes are disturbing to other dogs.
* Survivor style beach games Michael uses to pick his replacement. Dwight screams at Kelly so much she drops the egg out of frustration, Jim misleads Karen into the water as a prank and Stanley drops it right at the start so he can be disqualified and return to his crosswords.
* Survivors was notable for averting this trope by filming a large percentage of its run entirely on location, a first for the BBC and unusual even today. Much of the camera work ended up being carried out by the Outside Broadcast team, who normally covered sports fixtures or concerts.
* Survivors, wherein each episode ended with a sudden pullback to a view of the Earth...centered on Gibraltar. The series itself was filmed and set in and around Manchester.
* Survivors, which was influenced by the source material for the above, made averting this a major running theme.
* Survivor, the contestants would randomly draw rocks. The two people who drew the yellow rocks would be safe, while the person who drew the purple rock would be eliminated. One of the contestants said "Oh, it feels like purple" when he picked his rock. Guess who got sent home?
* Survivor to stand out more for its aesthetic gimmicks than anything else.
* Survivor) two-time winner by winning season 20, seven years after her first win.
* Survivor when the jury really doesn't like them and is just picking between the lesser of two-three evils.
* Survivor. While both men and women show many of the expected effects of primitive living for a month, the men almost always have visible stubble and clearly grungy hair, while the women almost never have leg stubble and their hair often seems much cleaner.
* Survivor who believed he shouldn't have won and that the game was rigged for the Edge of Extinction returnee.
* Survivor, with the convoluted backstabbing, double-dealing, and mind-gaming that the players perpetrate on one another.
* Surya Bonaly, an excellent jumper and spinner with a respectable slew of titles—three-time World silver medalist (1993–1995), a five-time European champion (1991–1995), the 1991 World Junior Champion, and a nine-time French national champion (1989–1997)—who almost inevitably made a mistake that left her short of an Olympic medal (she failed to make the podium in any of three appearances), or of a World Championship.
* Suryavarman I campaign was narrated by Sangrama, general of Suryavarman's successor Udayadityavarman II. He gathers his captains to tell Suryavarman's tale so that they can inspire their men in quelling a rebellion.
* Susan Aglukark Top Singles. While she had a few other chart entries, most of them are very obscure now.
* Susan and Nanase, of all people, become friends during the tour to France, though this
* Susan and Simon. She's married for part of the series, but even after her divorce, the pair remain best friends and nothing more.
* Susan, as due to a growth spurt in the Summer arc has made her able to bump into the top shelf of her locker, making her around 5'8" as per
* Susan Bones has a few of these; initially, after Harry explains the situation to her, she admits that she's been attracted to Harry for a while and Harry apologises for not realising this by explaining that he's hopeless with girls. Chapter 27 reveals that Susan realised her own feelings for Harry when he was correcting her posture during a DA lesson the previous year, and Harry responds to her declaration of love with his own when he actually takes her virginity.
* Susan Boyle promoted one of her albums with the hashtag #SusanAlbumParty. Thanks to
* Susan Boyle was told in 2012-2013 that she has Asperger syndrome and above average intelligence after years of thinking she had a learning disability caused

by brain damage at birth.
* Susan Bradley is the spiritual (and military) leader of the Bora in
* Susan Calman is Convicted episode "Depression", Susan talks about her battle with depression and how she realised comedy was the career for her. Not because it made her happier, but because she realised all comedians were as depressed as she was.
* Susan Cooper, 11-year-old actor Nat is transported back in time to 1599, where he forms a loving friendship with 33-year-old William Shakespeare. Nat's father killed himself and Shakespeare's son died at Nat's age, which is why they are drawn to one another.
* Susan Cooper drops the hero in the falling-backward exercise... and is promptly bawled out by the director and kicked out of the group on the spot.
* Susan Cooper. The Old Ways (ancient roads) can be commanded to expel creatures of the Dark from them and prevent such creatures from passing over them.
* Susan Dexter, Galvin had been reading swords before Wren found Titch, unconscious in the snow. He tells her that he had just read the nine of swords, suffering and desolation, and the ten, for disaster. (Which is accurate.)
* Susan Dexter, Titch fights for Gerein because his arm is broken, and wins him an exile instead of death.
* Susan Dexter, Wren and her master are forcibly recruited to help retrieve the prince in swan form. After they escape the attack and realize that the queen will have Galvin killed for failure, Wren and Titch go to retrieve him.
* Susan does it to Harry when he says he deserves to be "tried for his crimes" after draining Voldemort's magic caused the unintentional death of every marked Death Eater except Snape.
* Susan dyed her hair and had it cut after finding out about her father. When she has an angst-induced awakening after learning the truth about the hammers, the dye drains from her hair, which then turns actually black, creating the strange effect of an Important Haircut that leaves her hair looking exactly the same.
* Susan Eubanks, Sandi Nieves, and Theresa Riggi all murdered their children to get revenge on their exes for leaving them (
* Susan finds one of Steve's porn tapes — "Lesbian Spank Inferno" — which leads to a falling out between the two and results in Steve having to describe the plot of the movie in a way that makes it sound classy. In the middle of a dinner party attended by all their friends.
* Susan Foreman was added to the show for this reason. The two teachers were needed for the show's original
* Susan for Marcus: After he dies to save her life, she leaves Babylon 5, never falls in love again, and doesn't mention his name until the series finale...
* Susan frantically tries to close the sunroof, but a gust of wind carries Flat Stanley out of the roof.
* Susan grabs the pig, but accidentally hits a button that causes the stereo to play at full volume.
* Susan guards the DADA classroom to prevent evidence tampering when a disguised Barty Crouch Junior dies after unsuccessfully hitting Harry with the killing curse.
* Susan had a crush on Justin before she learned he was gay. Notably, they're still
* Susan has a magical costume which seems to be a wry nod to the habit of female heroes armour being more for
* Susan Heffley causes her sons a lot of embarrassment and ruins their fun with her bit trait of a
* Susan herself briefly lapses into this upon first bumping into Insectosaurus. Not that one could blame her, considering that it is a grub seven times as tall as she was.
* Susan herself expresses 'strangst' (straight angst) in an early appearance, wishing she were a lesbian because of her and
* Susan ignores Harry's warnings and Harry not telling her enough of his life led her to make a dangerous choice and ended up a half-vampire. Because she deeply loved him and wanted him it made her inner demon want him all the more, so they separated, only later did they have one night of passionate sex (with Susan bound

and gagged so she didn't hurt him) and then she was gone from his life for many years. Then she came back telling him their child, conceived on that night of bondage, was kidnapped. Harry told her that keeping the knowledge he had a child from him ended any chance of them getting back together. She accepted that and, by gambits of others in play, would sacrifice her life to permanently destroy the Red Court vampires with Harry being her killer.
* Su-san" in early scanlations but changed to "Sve" in later scanlations.
* Susan is a character who especially stands out as someone from a completely different show. She makes a lot of sense as the granddaughter of a mysterious old man time traveller who is likely a human (albeit from another planet), and less sense as the granddaughter of an asexual two-hearted Time Lord
* Susan is a heavy inversion. She is a natural blonde who dyes her hair black/blue/some dark colour and is, in fact, one of the smartest and most sensible people in the comic.
* Susan leading to him rarely losing, means even though he's in the right it can be easy to cheer for Susan just for the sake of seeing Doom lose.
* Susan left because the Doctor realized that she wanted this but felt too loyal to her grandfather to give it up, so he forced the issue.
* Susan Lloyd, Frank Duckett, Essam Tasir, Tom Brennan, Jae Lee, Yemi, Angelo Busoni, Kelvin, Emeka, Edward Burke, Tricia Tanaka, Howard L. Zuckerman, Roger Linus, Horace Goodspeed, Emily Linus, Jonas Whitfield, Isabella, "Mother"
* Susan (Loretta Long) was part of the series' original human cast and remained a major character for almost 30 years, until around the late 90s when she was gradually phased out. By the 2010s, she only appeared in one episode per season; she made no new appearances in season 43, and in the 44th and 45th seasons she was reduced to just a background extra.
* Susan Lucci once recounted a particularly horrible scene she had on
* Susan made illegal modifications to the sharks, inadvertently making her responsible for all the subsequent deaths when the super-intelligent sharks break out, but she did it to
* Susan makes a couple of friends at school, but they're fellow loner/outsider types. Even at that stage, it's clear that she's a bit too weird and a bit too intelligent to get close to normal human beings. Once she learns that she's the granddaughter of Death, with all that implies, fighting the dangers of isolation becomes a full-time issue for her — though she manages.
* Susan Meyer started out as the Ditz, but it was largely limited to being a
* Susanna Clarke, when Mr. Norrell arrives at his first party in London, he overhears a man telling a woman how he persuaded one young woman to give up her true love for a wealthy man: first he introduced her to the charms of fine (and expensive) jewelry, then he got her penniless love to gamble, so he was deeply in debt — and pointed out to him that a man with no money was one thing, but one in debt was another.
* Susannah, her brother Sam comes home. Susannah tells him about what happened, and he says he's going to kill Blitch. Susannah doesn't take him seriously and remarks sarcastically. Then Sam kills Blitch.
* Susannah of the Mounties was dubbed in German twice. The first dub was made in 1939. The second dub was made in 1976.
* Susanoo, introduced in the fourth game, also plays this trope straight and serves as the final villain of the series. His true identity
* Susano'o is sometimes associated with thunder and lightning as well.
* Susano'o, the god of storms. His being born from Izanagi's nose, according to the
* Susan opens the sunroof so that Rodrick can dispose of his gum, but the rush of air only makes more noise. Susan starts to close the sunroof, but Rodrick throws his gum out, which boomerangs back and jams the sunroof open.
* Susanowo to her. It's not known how much of it was kicking arses and taking names, and how much of it was genuine remorse.
* Susan Rodriguez was the steadiest girlfriend he had, and they were genuinely in love.

* Susan Shackleford a vampire until that point, and it's explicitly mentioned afterwards they fixed the protection around the house to make sure she couldn't do it again.
* Susan's horn has the power to summon help to the user, which includes help that just happens to be in another dimension, as shown in
* Susan similarly grows fatter in a similar game, "Parable", after testing out a potion
* Susan Slade, where the child is passed off as his grandparents' son.
* Susan's mother Sophie is far ditzier than her daughter, especially when it comes to men, coming across as an aged
* Susan snaps her fingers to get Rodrick to stop chewing, but her snapping is louder.
* Susan starts acting macho and aggressive immediately after becoming male. It's transient, however: losing an arm-wrestling contest with the still-female Nanase is enough to snap her out of it. Sarah
* Susan Sto Helit, a kindergarten teacher, realizes she really must get out and meet more adults when, in the complete absence of any children, she says, "Does a bear poo in the woods?"
* Susan Sto Helit and Jonathan Teatime. Given time, or an alternative universe, would they have gotten it on?
* Susan Sto Helit was raised to believe that supernatural creatures were nice stories but not actually real, because her parents thought this would shield her from
* Susan Storm. She mopped the floor with the three members pretty easily, too.
* Susan Storm who attended the same government think tank as Reed, and who was involved in the accident because she was actually one of the scientists working on the Negative Zone experiment in the first place.
* Susan Storm, who in the comics got to fly into space via being Reed's girlfriend, is a scientist in this version. This aspect of Sue's backstory is retained in the
* Susan "Sue" Storm at first sight, but would only date and marry him when they were older.
* Susan tends to hide her feelings under an incredibly deadpan personality, to the point where instead of a good angel vs bad angel moral dilemma, she has a personification of her emotional side vs a personification of her logical side. It
* Susan" (time is of the essence in a missing person investigation) before coming to the police station and speaking with them some more.
* Susan uses this trope to its maximum effect, developing her wards' belief in a poker she uses to beat up the monsters that hide under the bed, rather than telling them these monsters don't exist. That is, while she realizes nothing will make them stop believing in monsters, it's much easier to make them believe she's enough of a badass to take them on.
* Susan who does this" a male crewmember of a spaceship also gets some comforting.
* Susan Woodings seemingly had survived her skin being stretched over the Banny animatronic's exoskeleton (with her eyes implied to have also been
* Susan would later go back to men and actually get engaged to George. Apparently her lesbianism "didn't take".
* 's use isn't disturbing in itself, but the subtext makes the woman seem suicidal.
* Sushi and sashimi used to be the Japanese equivalent of fast food (fish was originally transported in vinegared rice as a preservative, and poor people buying the goods would end up eating the rice as well as the fish). Nowadays, sushi is considered fancy food, and
* Sushi chefs usually cut off the heads of freshly caught fish before preparing it. The fish are generally already dead, and the beheading is largely because fish heads aren't much good as sushi: their meat is not conducive to eating in 1-2 bites as required for sushi eating.
* Sushi is a gateway into Japanese cuisine for most Westerners. It and ramen are often the only Japanese foods westerners know about.
* Sushi Pack, and present them with gifts. However, because they were too busy to

read up on Citrusian culture, their gifts of cut flowers, chocolates, and a painting titled "Making Applesauce" don't go over well with the delegates, who are essentially living fruits.
* Sushi Pack are rendered powerless by any kind of heat, but even worse, they feel compelled to announce this every time a villain pulls out a heat lamp.
* Sushi Pack are weakened by heat, and since they have a tendency to announce it, their most recurrent villains usually keep a couple of heat lamps around.
* Sushi Pack as it cut between Tako and Maguro hurtling toward Earth on an asteroid, and the rest of the team trying to figure out what happened to them.
* Sushi Pack, but since the Pack are bite-sized themselves, it's only as big as a normal human.
* Sushi Pack episode "Near Miss", Paradoxter, himself a man-ox of unknown origin, creates the Animixter Ray that combines two animals into one amalgam. The animals all go back to normal once it is broken, though.
* Sushi Pack fits the bill, although others have tried to steal credit for her inventions on occasion.
* Sushi Pack frequently throws electricity at his opponents, and in one episode he was able to target random objects (he'd gained the ability to turn them into living things).
* Sushi Pack frequently uses her telepathic powers to share zen thoughts when an antagonist needs to calm down. In one instance, she used this on her own teammates to make them follow a course of action that they did not agree with.
* Sushi Pack lose their powers and strength if they're exposed to heat. They also tend to announce this whenever it happens. "Heat! Our only weakness!"
* Sushi Pack, Sir Darkly, the personification of sadness and gloom, usually shows up with a storm cloud that rains misery on others.
* Sushi Pack, Sugar Jimmy disputes claims that his snack bars lack nutritional value:
* Sushi Pack the city is about to unvale a statue of one of their superheroes, and the pack all assume that it's going to be of them, only to discover that the statue is of Kato Platypus.
* Sushi Pack the leader of the Legion of Low Tide threatens one of his minions to break off a friendship with a member of the Pack under penalty of the worst punishment there is — ridicule. The other members procede to tease her until she begs them to stop.
* Sushi Pack, the three male members have been captured more times than the two female members (although only one episode had all three of them captured at the same time). On the other hand, at least one of each has been captured even more often (usually of the "four are captured, one sets them free" variety).
* Sushi Pack wears a fake eyepatch that does not diminish his fighting prowess in the least. Then again, considering that his main attack is flinging paint at enemies, direct aim may not be crucial.
* Sushi Pack, with two characters remembering the events of the day differently as they try to figure out how they ended up on an asteroid hurtling toward Earth.
* Sushi Striker: The Way of Sushido). Each category contains 9 Triumphs, each of which have a higher numerical requirement than the last and, fitting the game's conveyor belt sushi theme, take the form of colored plates in order of how they're traditionally priced in a conveyor belt sushi restaurant. The game will ask you to get a certain number of Triumphs of particular ranks; if you can fulfill those requirements, your Striker Rank will increase. In addition to rewards given out at each Striker Rank promotion, the higher your Striker Rank, the more likely Sushi Sprites will join you, with most of the late-game and postgame Sushi Sprites requiring a minimum Striker Rank to recruit.
* Sushi Striker: The Way of Sushido. The designers have anticipated people would attempt to use Skill Copy to use these overpowered skills and have planned ahead in two ways:
* Sushi Striker: The Way of Sushido when Tiburon starts using Sushido techniques. The next three chapters of the game focus on Musashi looking for a way to counter Sushido for a rematch.

* Susie Campbell, one of Alice Angel's former voice actresses, terrorizes the studio as a twisted form of her beloved role. In Chapter 3, there's a coffin in the ink-flooded morgue where most of the clones Susie vivisected are displayed, and her name is on the coffin.
* Susie Essman once recounted how, after watching a scary movie, she searched her entire house for any conceivable place the villain could possibly he hiding (including her dollhouse) before finally turning off the lights, climbing into bed, and pulling the covers up to her chin, still too terrified to sleep because she keeps hearing this soft, rhythmic chirping noise that she can't identify... until she realizes that her nose is whistling.
* Susie Moss, in "The One With The Superbowl Part 2" and briefly dated her in that episode.
* Susie "One-Eyed" Morgaine-Ryan was one of the few surviving Bandit Kingdom leaders after the coming of
* Susie Q, the girl tries to change herself so the popular guy likes her.
* Susie Q, the title character comes back to save her old neighborhood from being demolished.
* Susie's mother Lucy is an even more glaring example of the trope. From her very first episode, she's shown to be an incredibly talented artist and chef who studied in France and that's in addition to being a fully qualified doctor.
* Susie Swanson doesn't talk since she is a baby and is not Stewie, but she has an inner voice that channels
* Suske en Wiske album "De Dolle Musketiers" when he first sees Jerom.
* Suske en Wiske album "De Stalen Bloempot" Lambik's neck is stretched out like a snake due to an accident.
* Suske en Wiske album "De Tamtam Kloppers", where an ape claims they were unable to shoot him, only to take a sip from a jug and to discover his body is full of holes which now sprout water like a fountain.
* Suske en Wiske a lot, which allows for several gags about historical time periods and characters.
* Suske en Wiske: Also a recurring plot in the old stories. An interesting subversion is "De Gramme Huurling", where the tribesmen tell Suske en Wiske they don't put people in cauldrons anymore, because they are modernized: "Instead we put them in pressure cookers."
* Suske en Wiske and a huge chin, which make her look unattractive, but she does have a heart of gold.
* Suske en Wiske are all dressed in hoods that make them appear like the Ku Klux Klan. They are not racist or in any way affiliated to the Klan, however.
* Suske en Wiske are guarding a building when Wiske lights a fire to distract them, prompting one mook to ask the other, "Hey, what are you smoking, your mattress?"
* Suske en Wiske, at one point a dragon which is a servant of the Devil himself refuses to attack the heroes, claiming he is going on strike for better working conditions. He has to do it anyway, after being told he cannot go on strike without "joining the union" (of the Servants of Darkness, one assumes).
* Suske en Wiske, before the girl Wiske opens a medicine cabinet, she places a basin before it and stands back, as the contents falls out of it.
* Suske en Wiske: Bofor, an enemy who appears in 2 stories, has a supernatural Omnious Pipe Organ located inside a cloud, with which he can create massive storms.
* Suske en Wiske comic "De Texas Rakkers"; Lambik enters a saloon and immediately, gunfire can be heard inside. Jerom then rushes in and asks Lambik if he has been hit. To check if he's okay, Lambik takes a glass of water and references this trope.
* Suske en Wiske comic "Het Sprekende Testament" (The Speaking Testament), the heroes of the series race in a modified train that drives on (and off) the road.
* Suske en Wiske comics, especially fights that involve Jerom taking on multiple opponents at once.
* Suske en Wiske". Cut to the next shot where the cop is sitting at the bar in nothing but his underwear and socks, drinking the shot of booze after all.
* Suske en Wiske features a genie that always grants the exact opposite of what you

wish. For example, when Lambik wished for the genie to give them some allies that didn't have to be very tall, he instead gave their enemies three giants as allies. This is not because the genie is evil or malicious, but more that he is extremely clumsy. He always apologizes afterward for his screw ups. Eventually, both Wiske and Jerom get smart enough to realize the genie's flaw and exploit it by actually wishing for the exact opposite of what they really want. When Jerom defeated the giants, he wished for 3 more giants. The result: the genie screwed up again and accidentally made the 3 already existing giants disappear, exactly what Jerom really wanted.
* Suske en Wiske franchise in 1972; to this day his wishes remain the guiding principles of the comic - though it must be said that his successors have seriously pushed it in almost unrecognizable directions.
* Suske en Wiske: From the 1960s the series tried to cash in on trends of the day that have become hopelessly outdated by now:
* Suske en Wiske had a spin-off series in which the 2 main characters are five-year olds rather than (pre)-teens. It consists of one page gag comics, while the main series is one with album long stories. It also ignores the continuity of it's parent series, since it has Suske already living with Wiske and her aunt Sidonia at age 5, while in the main series both he and Wiske were already pre-teens when they first met.
* Suske en Wiske has experienced a notable decline ever since the series started using standard Dutch and moralistic endings in the 1960s. The decline of the series sank even lower after creator Willy Vandersteen became less involved. After his death in 1990, quality predictably went into the gutter, with each successive storyline having less and less to do with the initial premise.
* Suske en Wiske: In "Het Eiland Amoras" (Amoras Island) and "Het Wondere Wolfje" (The Miraculous Wolfy), people only fall when they notice the ladder beneath them has disappeared.
* Suske en Wiske: In the album "De Bokkenrijder" Wiske explains to Tante Sidonia a strange dream she had the other night. Sidonia explains the symbolic meanings behind her nightmare. As the story progresses, many elements from the nightmare happen to the cast in real life.
* Suske en Wiske in this comic book series, rather than the biblical character.
* Suske en Wiske is a children's comic that originally made a lot of jokes about Flemish-Belgian politics that only adults would get. Later most of them were removed from the later reprints, though occasionally some of them are still present.
* Suske en Wiske is a huge cash cow in Belgium, Netherlands and the Dutch Antilles. The comic strip has been translated into many other languages: French, German, Swedish, Japanese,... but is mainly popular in the Benelux. Apart from the still running comic strip itself there is a huge merchandising behind it, including numerous reissues, special albums, spinoffs, toys,... that are mostly bought by collectors. The entire output of author Willy Vandersteen and his studio, even after his death, still brings in the big bucks.
* Suske en Wiske is still the most popular comic books series in Belgium and the Netherlands. It has spawned an entire merchandising empire that's very popular in Dutch-speaking regions.
* Suske en Wiske, Jerom is usually this, beating up bad guys effortlessly.
* Suske en Wiske): Lambik, while the character changed over the years, his baldness remained one of the key parts of his appearance and has been used as an element to drive the plot forward in a couple of issues. Lambik played the role of the heroic father figure in a number of albums. In "Het geheim van de gladiatoren" (The secret of the gladiators), "De schat van Beersel" (The treasure of Beersel), and "De tartaarse helm" (The Tartar Helmet), he's depicted as an expert swordsman. These are known as the Blue Cover Series, as opposed to the Red Cover Series.
* Suske en Wiske Savantas dies and his spirit goes to Hell. They refuse to take him in, though.
* Suske en Wiske serializes all its albums in one unchronological mess. The first 66 black-and-white albums are no longer available, so they simply started again

from number 67 (!!) and randomly republished the older albums in color again, together with the newer titles. This makes reading the albums in this new order very confusing.
* Suske en Wiske's frequent time travels have taught many children in the Benelux of countless historical characters and time periods.
* Suske en Wiske's love for Lotje in unrequited. Lotje also becomes immortal and is imprisoned until she's freed in modern day. Her return triggers long-buried heartbreak in Barabas, prompting his friends to travel back in time to get a cure for Lotje's state from the enchantress. In the end, Lotje regains her human form and gets some minutes alone with Barabas before she, no longer immortal, passes on to the spirit realm.
* Suske en Wiske (Spike & Suzy) does this constantly in their time travel stories. Most stories have one of the protagonists use the teletime-machine, in the meantime destroying it. Professor Barabas then spends the whole comic rebuilding it, after which the storyline is swiftly deus ex machina'd by reinforcements (most of the time Jerom). The teletime-machine also has a screen showing the events happening in the past.
* Suske en Wiske (Spike and Suzy), would be a typical example of a Class 2 character, save for the fact that he's a bit stocky.
* Suske en Wiske started off in 1945 and new albums are still produced to this day. Their catalogue has over 338 titles now.
* Suske en Wiske stories Lambik or either Sidonia were sometimes absent, despite having been added to the main cast already. Vandersteen was still experimenting with his characters in those days and sometimes tried having Suske, Wiske and Lambik going alone on adventure, other times tried to have Sidonia and the children do the same, without Lambik.
* Suske en Wiske: Suske and Wiske, who are orphans who live at the same house, often do heroic deeds.
* Suske en Wiske: Suske is so incorruptible that he is generally the blandest of all the main characters.
* Suske en Wiske: Tante Sidonia, despite being Suske and Wiske's aunt rather than mum, can be quite inventive in action scenes if she wants to.
* Suske en Wiske: the album "Het Aruba dossier" ("The Aruba File"). The minor crime: two men ignore a red traffic light and crash into Professor Barabas' car, sending all three of them to the hospital. The major plot: once in the hospital, Barabas is accidentally given a briefcase that belongs to the other two men. In the briefcase, he finds a file that describes plans of a big criminal organisation to distribute a highly toxic substance as a new fertilizer for crops.
* Suske en Wiske: The early stories criticized the Belgian government quite often, especially in its treatment of the Flemish population. In the reprints most of these comments have been removed.
* Suske en Wiske (The Golden Circle), the heroes go up against an evil cult while in China. Wiske plans to allow herself to get abducted by said cult so she can lure them into a trap. To do so, she goes to a restaurant and when placing her order tells the waiter to hurry up since the cult is after her, loud enough for all the customers to hear. Just as she expected, one of the customers is a cult member who immediately calls his fellow cult members.
* Suske en Wiske: The stories "Bibbergoud", "De Texas Rakkers", "De Gouden Locomotief", "De Bevende Baobab",... all take place in the Wild West.
* Suske en Wiske: The stories "De Dolle Musketiers", "De Raap van Rubens", "De Jolige Joffer", "De Gladde Glipper", "Angst Op De Amsterdam", "De Kleppende Klipper", "Het Wondere Wolfje" and "Beminde Barabas".
* Suske en Wiske they get placed into an illusionary world by Mr. Priem through hypnosis. However, Mr. Priem is not their enemy; the first time he did it as a reward for helping him and the second time it was in a last-ditch attempt to get out of a trap, and in both cases they wake up when the story in the illusionary world has reached its conclusion.
* Suske en Wiske. They guard their castle by pretending to be scarecrows along the paths leading to it. Their weaponry consists of blunderbusses loaded with rag

balls, which upon impact temporarily change the targets face into a rag ball, which gives them the appearance of scarecrows. For the duration, the victims become very strong and very hostile. The voddenventen are undone when de Zwarte Madam withdraws from her deal with them, taking the magic that sustained them with her.
* Suske en Wiske was a thawed caveman who walked around bare chested in the early stories, but gradually started wearing more modern attire. Creator Willy Vandersteen did this after complaints from readers who wrote to him that "their breakfast didn't taste anymore after seeing this primitive creature in their newspaper every morning."
* Suske en Wiske: Whenever Wiske screams, it can be heard from miles away. Jerom even refers to it as "I recognize Wiske's hi-fi installation."
* Suske en Wiske, where Jerom has to transport everybody as quick as possible and therefore carries them off in the same pose.
* Suske en Wiske who also refuses to go away unless people buy his stuff.
* Suske en Wiske: Wiske literally "burning with curiosity", Suske and Wiske followed by swans ("swans" is a nickname for police on motorcycles in Belgium),...
* Suspect: Between Kathleen and Eddie as she is patching up his stab wound.
* suspected Madwoman in the Attic in fact turns out to be simply the main character's mixed-race daughter from a previous marriage, whom she'd kept hidden from her new husband. In a variation form the norm in this trope, the little girl is happy and healthy; she lived in a small but comfortable cottage in a remote part of the estate, she was well-fed and cared for, and her mother visited her whenever possible. Once Holmes reveals who she is, her new stepfather accepts her wholeheartedly.
* Suspect Existence Failure: A person suspected of being responsible for a murder ends up becoming another victim of the real culprit.
* Suspect Existence Failure: Someone suspected of murder gets killed by the real killer.
* Suspect Existence Failure: The lead suspect of a murder gets killed by the real culprit.
* Suspect Existence Failure: The suspects for a crime you're investigating fail to stay alive. This hints that you've probably failed to put the perpetrator on your suspect list.
* Suspect has one clear Golden Ending and two not-so golden endings. In two of the not-so golden endings, you spook the two guilty parties, and they attempt to leave the grounds to avoid being arrested. Depending on your timing, this leads to two variants of the not-so golden ending: One where one of the parties is accidentally killed trying to escape while the other gets away, and the other while the first one is still killed but the other one is caught. The best ending, of course, is when both are arrested before they try to leave the grounds, and you get a lengthy epilogue text summarizing the case.
* suspect interrogation as a show that they watch from behind the tinted glass — especially when done by Gibbs. Including one episode where Ziva is tasked to bring the popcorn, although she's late.
* Suspect in the film, with the trial judge warning her about this after seeing the pair near each other, but he has no proof.
* Suspect Is Hatless: A search is hindered due to a description that is incredibly vague.
* Suspect Is Hatless as "suspect is hatless". Some tropers work on cleaning those up.
* Suspect Is Hatless: Giving a description of a person which is too vague and generic to narrow down who the person could be.
* Suspect Is Hatless: Reporting a criminal while giving a description that doesn't really narrow down who could've done the crime.
* Suspect Is Hatless: Someone reports a crime while giving a description of the culprit that is too vague and generic to narrow down who the person responsible could be.
* Suspect Is Hatless: Someone reports a criminal while giving a description too vague and non-specific to narrow down who the criminal could be.

* Suspect Is Hatless: You're asked to describe a person, but fail to make your description specific enough to narrow down who the person could be.
* Suspects! by Steven Thraves was a gamebook where you played the part of a detective investigating a murder on the "Olympic Express", where a member of a film team had bumped off the caustic director. The skill of this game was to answer questions about pictures in the book: right answers gave clues to the murderer's identity, wrong answers meant the murderer would attempt to murder you, in varyingly inventive ways, such rewiring the lamp in your cabin to give you an electric shock.
* Suspects carry out a hit on New York's Finest Taxi Service, a unit of corrupt NYPD cops who use their squad cars to escort drug kingpins around the city.
* suspects Raque has kidnapped Elly. Raque and Elly are about to turn the corner and bump into Mary and Sue. Raque hears them and shoves Elly into a nearby doorway.
* Suspects, this caution is usually accompanied by vigorous verbal protest from the arrestee and the officer often has to say "Do you understand?" several times.
* suspects Worf for being a Klingon and some other guy for being part-Romulan.
* Suspect X did this twice; one was a death-faking ploy as well, but before that she killed and replaced an Internet celebrity to destabilize an online game and reach her targets through it.
* Suspect Zero, both for killing his victims and his signature of removing their eyelids.
* Suspect Zero. When he wakes up, he is tied on the floor of the killer's apartment, where a smiling O'Ryan casually threatens to torture him to death.
* suspended animation with the assumption that a cure for their ailment will be found in the future.
* Suspenders-verse mentions that Cadance can take a male form, Bolero, when she wants to; most prominently, she did so in order for she and her wife Gleaming Shield (this universe's Shining Armor) to conceive their daughter Flurry Heart.
* Suspense #14. He is puzzled to find a party going on at the furniture department, but he's welcomed with open arms by the people there. They give him a stamp so that the watchman will ignore him and he gets to pick a suit of his choosing on the sixth floor. He's having a great time until at dawn the party dissolves and he freezes near the windows, having become a mannequin just like his new friends.
* Suspense, although it's only FM synth MIDI, has a drony bass section.
* Suspense) as a married couple driving home from the movies who discover that an escaped killer has been hiding out in the back of their car.
* Suspense: A woman is hiding, inside her locked bedroom, from a knife-wielding tramp who has invaded the home. He gets in the bedroom by simply punching his way through the bedroom door and then reaching to unlock the door.
* Suspenseful music plays in the background, sometimes accompanied by the sound of an EKG.
* Suspense novelist Dean R. Koontz surprised his fan base with an uplifting but dark illustrated children's book called "Oddkins" in 1989. He then followed it with the illustrated kids' Christmas books "Santa's Twin," and its sequel "Robot Santa," though those were much more comedic in tone.
* Suspense, "Sorry, Wrong Number", starring Agnes Moorehead. Probably the oldest use of this trope in the media, it was so popular when it aired that, the next week, a new episode was preempted so that the radio play could be rebroadcasted. Eventually, it was made into a feature length movie.
* Suspension contains a magical camera that happens to drive the plot.
* Suspension with pay. You don't need to (in fact you can't) go to work, but you still get paid. Along the same vein, suspension from school: most kids hate school anyway, so you're going to "
* Suspicion plays with the trope. Dr. Nehle, who may or may not have been a Nazi, was in Chile during the war.
* Suspicion that Wallace Souza had ordered or coordinated Brazilian gangland murders for his TV show
* Suspicious has this happening to Janane Garofalo's character, in an enactment of an urban legend.

* Suspicious Links has Interspace, where Id Electronica, the being who dragged the main heroine into Interspace, lives.
* suspiciously adroit pencil-pushers with a penchant for pulling on loose tax threads.
* Suspiciously Apropos Music: When a character plays music, it's oddly relevant to the matter at hand.
* Suspiciously Clean Criminal Record: A sketchy suspect has no known history of prior offenses.
* suspiciously free birdseed. Of course, this will be the last thing that works as it's supposed to, as the laws of physics are always on the Road Runner's side.
* Suspiciously Similar Song, and the video suddenly stops as the creator gets beaten by the Copyright Police.
* Suspiciously Similar Song: A song or piece of music that sounds like a copyright-friendly imitation of another song or piece of music.
* Suspiciously Similar Song: A song or piece of music that sounds like a copyright-friendly version of another song or piece of music.
* Suspiciously Similar Song: A song that sounds like a copyright-friendly version of another song.
* Suspiciously Similar Song of Cygnus X's "The Orange Theme" titled "Black Snow", but also did an official remix of it under their own names of Bervoets & de Goejj.
* Suspiciously Similar Song variant of the original melody, as well as using elements of Trinity's version.
* Suspiciously Similar Substitute: A character gets replaced with a character similar enough that their name is the only major difference between the two.
* Suspiciously Similar Substitute: A character is replaced with a new character who is basically the previous character in all but name.
* Suspiciously Similar Substitute: A replacement character that is almost exactly like their predecessor.
* Suspiciously Similar Substitute based on mechanically, and explains why it has more European styling).
* Suspiciously Similar Substitute early in season 3 by fellow student Maria, due to her having been with him longer as fellow classmates and, therefore, more privy to his tendency to scheme for what he wants. That said, most of his schemes end up failing, for one reason or another.
* Suspiciously Similar Substitute for her in the form of Sergeant McCluskey. It is subverted in later seasons when the police hire Toby as a full time consultant. Then it is inverted when Toby starts dating a reporter and becomes her Friend on the Force.
* Suspiciously Similar Substitute!"). It was less than completely convincing, but a valiant effort.
* Suspiciously Similar Substitute, Jason was turned into a troubled juvenile delinquent.
* Suspiciously Similar Substitute, Jonas Quinn, after he left the show, though only for a season, then he was brought back. It helps that Jonas has a wide variety of interests (including linguistics, physics, and meteorology) and has very good observational skills and a near-perfect memory.
* Suspiciously Similar Substitute, Jonas Quinn, did much of the same thing, oddly enough, long after the show and other characters had all been well-established to the audience.
* Suspiciously Similar Substitute. Roadblock's gun is identified in the original comics as carrying an M2 Browning machine gun, a gun that is usually operated by a squad or vehicle-mounted, and weighs up to 120 lbs.
* Suspiciously Similar Substitutes version of Lucas) has his head bitten off. Ouch.
* Suspiciously Similar Substitute was due to Lexa Doig's pregnancy. During her pregnancy, she only appeared in chest-up shots or as a disembodied head. Her being rebuilt after the destruction also served to explain the changes to Doig's body which were caused by the pregnancy.
* Suspiciously Small Army: Micromanaging or representing a military force on the

scale of most modern armed forces would likely destroy either one's patience or video card.
* Suspiciously Specific Denial: A character denies something they weren't even accused of.
* Suspiciously Specific Denial: Denying stuff that the other person hasn't even accused you of.
* Suspiciously Specific Denial: "Frederick's Ovens. Absolutely no chance of catching fire after using our products!"
* Suspiciously Specific Denial: If you deny doing something that the other person hasn't even accused you of doing, you're only making it obvious that you actually did do it.
* Suspiciously Specific Denial. It's made even worse by some people of the older generation who use "hook up" to mean meet with or make plans with, rather than the current slang meaning "have sex with."
* Suspiciously Specific Denial link here. It does not exist in any which way, so you can't even try to look for it.
* Suspiciously Specific Denials, followed by the Martial Arts Style "they most certainly would not practice, if they existed."
* Suspiciously Specific Denials of, among other things, that the beach cable lead to an underwater DHARMA station and that the Island could move (saying to a question about the topic that ABC would fire them if they ever came up with a plot twist that crazy) before those plots came up in the series proper.
* Suspiciously Specific Denial: You fail to avoid suspicion because you denied stuff the other person hasn't even accused you of.
* Suspiciously Specific SermonReligious service is oddly plot relevant
* Suspiciously Stealthy Predator: A creature not remotely intelligent enough to pull this does.
* Suspiciously Stealthy Predator: An animal that takes measures to remain undetected.
* Suspiciously Stealthy Predator: A predatory animal that doesn't know about human technology, yet avoids it or knows how to neutralise it.
* "Suspicious Minds", another one by Elvis, but his was also a cover; the original singer was Mark James.
* Suspicious Missed Messages: If a person hasn't replied to phone calls, emails or letters in a while, it's a sure sign that something is off.
* Suspicious Missed Messages: If someone won't answer their phone, they're probably in trouble.
* Suspicious Missed Messages (if the unresponsive character is normally addicted to their phone/computer)
* Suspicious Missed Messages: Someone won't answer their phone? Better find out why!
* Suspicious Missed Messages: The trope assumes the characters involved have access to phones or computers on a daily basis, in normal circumstances.
* suspicious, since it would mean that his whole legacy and the Lannister blood claim to the throne is built on a lie. Even when Cersei herself tells Tywin outright that it's true, he refuses to believe it.
* suspicious to the same extent.) In the modern series the usual explanation is that having somebody normal to vouch for him puts people at ease; in this case Donna was elsewhere.
* Suspicious Video-Game Generosity: When the game gives you a whole bunch of healing items and ammo, you're about to fight a nasty boss battle. This performs two practical functions: First, you have an opportunity to breathe and restock in a safe environment. Second, savvy players will know to be prepared for a boss battle.
* Suspiria (1977), after the first victim is killed, she falls through the stained glass skylight, several pieces of which end up impaling her roommate who's standing below.
* Suspiria (1977), believe it or not, was inspired by what co-writer Daria Nicolodi's grandmother claimed really happened; that she (the grandmother) as a young woman fled a music school because she found out they were practicing black

magic.
* Suspiria (1977), in all it's Technicolor, trippy glory, plays this trope straight.
* Suspiria (1977) is a colorful example of the trope at play. An all-American good girl attends a ballet school in Germany, where she's forced to defeat an ancient witch in order to survive the ordeal.
* Suspiria (1977) kills the head witch (Suspirorum, the Mother of Sighs), the building starts to collapse, and the moment she leaves, it bursts into flames, supposedly killing every single person within the building except for the main heroine.
* Suspiria (1977) once the main heroine, Suzy, kills the head witch (Mater Suspiriorum, the Mother of Sighs), the building starts to collapse, and the moment she leaves, it bursts into flames, supposedly killing every single person within the building except for her. Every single person that had a name and wanted her head that is— it's blink-and-you'll-miss-it, but it's mentioned that one of the teachers took the entire student body aside from her out to the theater, so there was no-one in the building aside from Suzy and the witches.
* Suspiria (1977): The ballet institute the heroine starts at turns out to be a front for a coven of witches.
* Suspiria (1977) was originally planned to have twelve-year-old girls as the protagonists, but changed them to twenty-somethings to avoid being banned. The script was not changed, leading to...
* Suspiria (1977) was shot with the full knowledge that it was going to be dubbed later on. As it was filmed with a cast of many different nationalities, there were as many as three different languages being spoken in scenes at a time (Udo Kier was completely dubbed with an American accent for the English release). This was standard procedure for Italian films for decades.
* Suspiria (2018) are some of their most descriptive in recent years, warning of "disturbing content involving ritualistic violence, bloody images and graphic nudity, and for some language including sexual references."
* Suspiria (2018): In the climax, Susie, revealed to have been the matriarch witch Mater Suspiriorum, summons a physical incarnation of Death. This entity proceeds to kiss the imposter Helena Markos, killing the leader of the Berlin coven and her many followers (mainly by blowing up their heads). The avatar of Death is portrayed by the same actress cast as Susie's mother, perhaps proving that the Three Mothers are daughters of Death.
* Susquehanna features, in order, Latin rock, rockabilly, ska punk, reggae, punk swing, glam rock, flamenco, ska, calypso, swing jazz, bossa nova and acoustic soft rock.
* 's US release date of March 22nd, 2009. The fic itself is about the continuing adventures of a fully grown cast of Dawn, Lucas, and Barry taking place 12 years after the post-game story involving Team Galactic at Stark Mountain, with Dawn (in the player's role) having to deal with adulthood while living in her Villa she acquired in the Resort Area full time, and having to deal with both a love triangle between her, Lucas, and Barry, as well as qualifying for eligibility by Cynthia for being her successor to the Champion of Sinnoh full-time now that Cynthia is planning to retire.
* Sussed! (a game where each person is asked a question about themselves, and the other players try to guess what they answered), one of the answers to the question 'What sort of thing I would do?' is 'Deliberately order a Big Mac from a pizza restaurant'.
* sustained rocket/turret fire human players on the Empire's side to drive the AT-AT and knock out the turrets before Rebel players can use them. And may the Force help you if the Empire decides to rush in and capture the Echo Base hangar right away, depriving you of snowspeeders.
* sustained to qualify; any shorter and it's probably just your average fan disagreement.
* SUSTAIN's Helljumpers, but the idea was damn close to having Marines drop in from space. Early in his presidency, Donald Trump stated that he wanted to revive the

project under the moniker "Space Force."
* Susumu Hirasawa but that doesn't explain where the Wagnerian pomp and marches come from.
* Susumu would later found a stable called the Jimmyz, almost all of whom
* Su Susann, a fan on Vicky's Facebook page who often answered questions for other fans, was given access as one of the page admins, and who Vicky has given permission to post things on her behalf (such as revealing names of otherwise unnamed characters). Unfortunately has a bit of a
* Sutekh, both voiced by Gabriel Woolf, have deep voices to represent their ancient, primal evil.
* Sutekh" is explicitly noted by the Fourth Doctor to be the real Satan.
* Sutekh the Destroyer takes this trope to an extreme. He wants to wipe out all life so nothing can evolve that can threaten him, despite being a
* Sutekh the Destroyer. The Doctor shows Sarah Jane what the world would become if he isn't stopped — a dark, windblown wasteland. Sarah Jane, who had earlier said: "We know the world didn't end in 1911" (the year the events of "Pyramids of Mars" take place) immediately realises they have to go back and deal with Sutekh, or the world as she knows it will never exist.
* Suterareta Yuusha No Eiyuutan, the primary source of conflict is a proxy war between goddesses Clare and Messiah, with Clare being the clear aggressor.
* Sutherland Neill", the children are building robots (it's a looong story). The question whether a specific specimen is a police robot ("?" "Because of the long arms!" "??" "The long arm of the law!") gets the questioner thrown the book at. No, wait, it was the inkstand.
* Suthida, the fourth wife of Thai king Vajiralongkorn, was formerly the head of his bodyguard unit.
* Sutra, a sentient android, is passionate about Vulcan culture. She has read Surak's texts, she plays the ka'athyra beautifully, and she somehow taught herself the ability to perform a
* Suu'be Nori'fu is this to Quain'tana, since Suu'be resents Quain for making her own daughter Koil'doarth no longer be the heir.
* Suu can't enter large bodies of water because it would dilute her body by a dangerous degree. When the cast goes to the beach, she wears a waterproof wetsuit so she can play in the water.
* Suul'Ka, trying to mess with the current dominant species of the Galaxy in preparation for their inevitable return.
* Süleyman's great-grandson Mehmet III. did something similar when the mother of his eldest son Mahmut supposedly received a prophecy, according to which the sultan will die within a year. It certainly didn't help Mahmut openly went against Mehmet's all-powerful mother Safiye... Mahmut's execution proved to be a mistake - Mehmet really did die within a year, and was succeeded by his younger son Ahmet I., who was still a child (13, to be exact).
* Suur Toll gives the towering leader of the second horde one. He towers over every one but the giant eponymous character, and his sword is as big as he is.
* Suur Toll is an Estonian animated short based on the below-mentioned folktale of Tõll the Great.
* "SUUUURGE!" from one of Coca-Cola's attempts to enter the citrus soda market dominated by
* Suverted in S1E8, where the perp gives clear, concise information that quickly leads to the killer.
* Suwa Taisha, the real-life shrine saw a significant increase in pilgrimages.
* Su Wukong (Monkey King) and the other bodyguards/traveling companions go along with the monk Tripitaka in
* Su-Yeong, ends up trampling all over her boundaries. She's irritated but takes it in stride.
* Suyin herself has this problem with abusing and betraying the trust of those she claims to care for, even as she herself complains about people abusing her trust. She betrayed the trust of her older half-sister Lin by letting Korra go out to investigate the Zaheer against Lin's orders and proceeded to laugh off Lin's

criticisms as if it were no big deal. However, Suyin has disobeyed her sister a lot in the past, so it's no surprise she'd do it again. In Season 4, she betrays Korra's trust by only pretending to agree to let her go hammer out a peace treaty with Kuvira but then goes behind Korra's back to assassinate Kuvira while she's distracted. This results in Korra suffering a humiliating No-Holds-Barred Beatdown
* Su Yung: Briefly wrestled in WWE’s FCW developmental as Sonia, but launched to stardom through her Impact wrestling work.
* Su Yung USA, which didn't work, and when they sent her to seduce Rich Swann in EVOLVE, which did.
* Su Yung was the only member who pretended to respect Yung as an independent human woman, simply to get Yung to let her guard down so that it would hurt more when Kay inevitably showed her true colors.
* Suzaku also possess a white pilot suit which is different to that of regular soldiers. How fortunate he is that the Knights of Round ALSO have white uniforms that are different from that of their subordinates.
* Suzaku and Dreadwing join the Autobots and Black Knights following the SAZ Massacre, unable to stomach the atrocities committed by the Decepticons and Britannia any longer.
* Suzaku and Euphemia could be this... if there was an alpha to begin with. The typical beta couple is the couple involving the most important people after the couple involving the protagonist. But here, the protagonist is a
* Suzaku and Euphemia. Initially a straight and uncomplicated 'knight and princess' relationship,
* Suzaku and Euphie. Their goals are the same, they have a very similar sense of humor, and they get serious about the same things. Not to mention a moment in the anime, where they're shown to say the same thing at the same time, only to both burst out chuckling.
* Suzaku develops feelings for Lelouch, whom he serves as a personal bodyguard. Which heavily complicates things for Suzaku, as he's a
* Suzaku ends up falling on top of Shirley. However, in this case, it is treated as a total accident by both parties, there is no
* Suzaku gets a flight pack for his Z01 Lancelot in episode 20 (Z01/A Lancelot Air Cavalry). In the second season, Suzaku has the entirely new Z01/D Lancelot Conquista, essentially a visually similar redesign with an integrated flight system and a
* Suzaku Kururugi had repressed memories from the start of the series
* Suzaku Kururugi is stronger and faster than normal humans. This is demonstrated rather memorably when he dodges fire from an automated ceiling-mounted machine gun, runs up a nearby wall, and destroys the turret with a
* Suzaku laments that "The Talk" his adoptive mother gave him turned out to be completely useless. His adoptive mother only told him about the mechanics of heterosexual sex but Suzaku realizes that he's gay.
* Suzaku later opposes him for taking advantage of other people just like (if not more so than) Lelouch when those with power should protect those incapable of acting, recognizing that Britannian society isn't such an ideal world.
* Suzaku of the Counterattack to save Lelouch from Schneizel, but Schneizel, having become immune to Geass' effects, prepares to draw on Lelouch's face while his perception of time is stopped.
* Suzaku smashes through a window to attack Mao in the first season and in
* Suzane von Richthofen) is a Brazilian girl that is in prison for killing both her parents when she was 19 years old, with help from her boyfriend and his brother. It made quite a sensation in the media.
* Suzanne Collins herself admitted that, although she has never read
* Suzanne Collins. She refuses to elaborate on what modern races the characters would be categorized as. Katniss herself has olive skin and straight black hair just like her best friend Gale, in contrast to her blonde-haired and blue-eyed mother and sister. Rue and Thresh have "dark skin."
* Suzanne Collins to the Capitol, humanizing the fallen competitor in the normally disconnected Games.

* Suzanne Fellini: "Love on the Phone" is about a woman who longs for the touch of her lover, but because of the distance, has to settle for phone sex.
* Suzannes Diary For Nicholas. Near the end of the movie we learn that instead of being alive as the protagonist thought, they actually died in a car crash before the movie began.
* Suzanne Vega, it also reached the top 10 of the U.S. alternative and R&B charts; #2 in the UK, Ireland, and the Netherlands; and #1 in Germany, Austria, and Switzerland. Although Vega continued to be a regular presence on modern rock and adult alternative radio for the rest of the 90s, those two songs were her only trips into the US top 40.
* Suzanne Vega since the song is very upbeat and happy sounding until you hear the lyrics.
* Suzanne Vega's "Wooden Horse" in which the subject of the song is very closely based on Kaspar Hauser (see "Real Life" entry below.)
* Suzanne Vega: The similarly themed "Bound" and "Penitent" both play with the idea of the singer as the disciple of her lover, asking them to take her back like a prodigal son and wondering to what extent she would obey them.
* Suzanne Vega whiles the time away, drinking coffee and people-watching, in "Tom's Diner".
* Suzanne Vega. Who remembers Vega's acapella version, in which the "do do do-do, do do do-do" hook only turns up right at the end? It was actually released as a single a couple of years earlier; it wasn't very popular.
* Suzette resorts to it when she's short of things to be righteously outraged about.
* Suzie Morgraine-Ryan and her band of Periphery pirates display all the traits of the second option, as a deliberate affectation. Ryan herself dresses in Caribbean-style pirate garb, uses archaic words like "thou" and "thee," and even wears an eyepatch.
* Suzie prefers to rent a room at Olga's rather than stay at the school, because she doesn't want to feel "like a kid" at boarding school. You'd be hard pressed to find a twenty-something student who'd
* Suzuhara Shuuko This is a spoiler for the manga, but is revealed early in the anime.
* Suzuka. Of course, Yamato just accepts her apology and tells her not to worry about it, and so leaves himself open to more of the same abuse.
* Suzuka: The eponymous character of this show, as Yamato even when in other relationships, is obsessed with her. In the manga, he turns down other women who are interested in him, and even flat out refuses sex because of his obsession.
* Suzuka, the main couple has a baby. Although it raise a big fuss in their family; at least, it's settled down at the last chapter.
* Suzuka, the titular character Suzuka Asahina is the best high jumper and takes her sports career seriously.
* Suzuka, usually being viewed as the one at fault in a situation obviously not his own.
* Suzuka who's the real female lead. That said, the original Fuuka still casts a large shadow over the rest of the cast even after her death. That being said, she comes back in chapter 135 - but that was a fakeout as well, as it was just a person who dressed up as her because she admired her. Fuuka is well and truly dead.
* Suzuka: Yamato even when in other relationships, is obsessed with her. In the manga, he turns down other women who are interested in him and flat out refuses sex because of his obsession.
* Suzukaze does the same it's suddenly disgusting. Furthermore, despite her self-declared protective feelings for her ship sisters, she doesn't even stop to contemplate how she herself would react if, like the deserter, one of her own ship sisters were to turn on her for defending them.
* Suzuki Bakuhatsu). If you don't pay attention to any hints, visually and audibly, this trope will take place.
* Suzuki Bakuhatsu: The core of this game. You, as Suzuki, must dismantle the object carefully and fast to dispose the bomb which is planted inside that object.

* Suzuki Esteem is far too beat-up and junky for what would've been a five-year-old car at most in 2002.
* Suzuki gun War Machine recognized Suzuki gun for what they were but didn't fair any better in the end.
* Suzuki's GSX-R line of sport bikes are affectionately called "Gixxers" by British enthusiasts. This was eventually made canon with the release of the Suzuki Gixxer entry-level motorcycle.
* Suzuko Mimori before the end credits, meaning that episodes had to have entire scenes and sequences cut out in order to fit these new additions.
* Suzumi gets put under one that mentally returns her to a happier time, when her husband was still alive and the two were excitedly awaiting their first child. While the machine is destroyed, she willingly remains behind because she is happy. It isn't until Yuuhi forces her to remember that Kazuma is dead that she gets shaken out of her stupor, also remembering how she chose to continue to live to take care of her brother-in-law.
* Suzumiya Haruhi-chan no Yuutsu, when Kyon tells Itsuki he loves him, the camera shows Itsuki's face. The simple art style turns in to a shoujo style, with Itsuki's hair blowing in the wind and rose petals in the background.
* Suzumiya Haruhi No Index, after Touma Kamijou defeats Teitoku Kakine in a fight and knocks him into a river, Kuyo Suo pulls him out and nurses him back to health. They start dating.
* Suzumiya Haruhi No Index cup, Kyon takes pity on him and asks Kanzaki to finally serve him. Taniguchi is ecstatic and says it was worth losing almost all his money.
* Suzumiya Haruhi No Index powers cause the public to not recognize her.
* Suzumiya Haruhi No Index, several characters wonder why both Haruhi Suzumiya and Shizuri Mugino are in love with Kyon, commenting that he's plain-looking, has no powers, that there's nothing special about him at all. Mugino's reason is that he saved her life.
* Suzumiya Haruhi No Index, when Terra of the Left kidnaps Kyon, Kyon asks him to explain how his powers work and his goals while they wait for his plan to go into motion. Terra egotistically agrees, saying that since Kyon doesn't have any powers nor fighting skills, there is no way he can possibly use this information to his advantage. He's right, but Kyon was counting on Kaori Kanzaki coming to rescue him. She eavesdropped on his exposition and used that knowledge to defeat him. Plus, Acqua of the Back was also eavesdropping and heard about how Terra was planning to betray God's Right Seat, so he punishes him after the battle.
* Suzumiya Haruhi No Index, when the Magic Side learns of Haruhi, many of them believe she is The One True God and worship her behind her back, though they acknowledge the importance of making sure she does not learn of her powers. Kaori Kanzaki in particular is very pleased that Haruhi looks up to her like a big sister. However, the Roman Catholic Church believes she is a heretic who stole God's power and sees Sasaki as The One True God.
* Suzumiya Haruhi no Seitenkan is surprisingly common, with Kyon and Kyonko being by far the most favorite.
* Suzumiya Haruhi no Seitenkan while passing out flyers advertising the SOS Brigade.
* Suzuno in her few appearances, she's a contrast to the other priestesses in that she is described as being a very shy and quiet person, contrary to Takiko's appealing and Miaka's headstrong nature.
* Suzu was secretly tailing her pet pig Tonkatsu (who wanted to do an errand for her by himself) when she comes across Shinobu, lost
* Suzy Bogguss' most famous songs are her covers of Ian Tyson's "Someday Soon" and Nanci Griffith's "Outbound Plane", which only got to #12 and #9 respectively. She had five songs match or outpeak the latter, with her highest ranking going to the somewhat lesser known #2 "Drive South" (itself a cover of a song first recorded by its writer John Hiatt, and then later by the Forester Sisters, featuring the Bellamy Brothers).
* Suzy Cube has the Dastardly Skulls, who stole all the gold coins from Castle Cubeton.

* Suzy Cube: Suzy gains an extra life with every hundred coins that she collects.
* Suzy gives a broke showgirl some money, she says it's from her rich uncle. When the showgirl expresses surprise that Suzy has an uncle in London, she says "I haven't got any relatives anywhere, but I got a rich uncle." In other words, she has a sugar daddy.
* Suzy Puppy, and worst of all, parvovirus (likely the cause of the diarrhoea).
* Suzy Puppy; being from a puppy mill, her mother was slaughtered shortly after her birth. And because of Suzy's severe sickness, she follows her not long after.
* Suzy Puppy defecates on the floor because her severe illness has given her diarrhoea.
* Suzy's Zoo: Daisuki! Witzy (although they managed to disguise the show as 2D very well with clever use of cel-shading).
* Suzy's Zoo: Daisuki! Witzy, caused Teeter to open his mouth but not say anything when Witzy asks the two turtles where they're going (this is because both Teeter and Totter's voice was made to reply at the same time). In the original Japanese dub, Teeter parroted Totter's reply several seconds after.
* Suzy's Zoo: Daisuki! Witzy employs this trope so well that it is impossible to tell that it's actually CGI without checking the credits, or catching several very small quirks (ie, the characters turning wouldn't be that fluid if it was 2D animation).
* Suzy's Zoo: Daisuki! Witzy fare for infants, so it's probably expected.
* Suzy's Zoo: Daisuki! Witzy in the English dub of the show. This is unique to the English version however, the Japanese originals still call them "dandelions".
* Suzy's Zoo: Daisuki! Witzy, it appears that the place is gentle and happy throughout.
* Suzy's Zoo: Daisuki! Witzy plush toys started appearing, since Boof, Lulla, Patches and Ellie Funt are plushies to begin with.
* SV5 Cammy even breaks the law and sides with Juri to protect Decapre, and goes apeshit on Vega when he threatens the Dolls.
* Svalbard Global Seed Vault in Norway is a massive storage facility with labs built into a mountain to preserve seeds in case wild and farmed species die off. Currently, it contains over 750,000 samples.
* Svalbard Ski Marathon: probably the only annual sporting event where the entire track has to be surveilled by armed guards to stop polar bears from eating the competitors.
* Svarog: The world of Talar has these flying islands, populated by the local uber race of wizard-nobles.
* Svartáljǫfurr. His attacks can affect the player with the "Blinded" status effect.
* SVBI: Something Very Bad Inside. There's definitely something wrong with you, but the doctor has no clue exactly what it is, other than it's terminal.
* SVC: Chaos also has a grapple move that reverses the opponent's controls. As usual, computer opponents are not affected by the control screw.
* Svef is treated as a harder drug, said to allow the user to see their own soul, and granting a "sense of urgency and meaning". It seems to be a cocaine analogue, with drug dealers who happily deal in other drugs not willing to carry it.
* Sven and May, eventually.. how this will develop, remains to be seen.
* Sven Co-op . Admin-controlled, he's on the players' team so friendly-fire is impossible (against him, that is). David is by no means "friendly" and will relentlessly stalk and harass the players no matter what.
* Sven Co-op , allows people to "donate" money to its creators for permanent weapon enhancements - namely, their Uzis do double damage, and they can use armor to boost the damage on their melee weapon.
* Sven Co-op mods out there, and is not only still lively with activity to this day, but is still in development.
* Svengoolie arranges songs for Sven to sing, just a bit higher than Sven can sing.
* Svengoolie. He also sometimes has a wisecracking rubber chicken puppet named "Kerwyn" as a sidekick who helps him read viewer mail.
* Svengoolie, the "Boogie Woogie Bogeyman Of Berwyn" plays Reveille, although he's

in a polka band rather than the army.
* Svengoolie uses "SvenSurround" (the name a parody of SenSurround) where Sven overdubs a scene with ridiculous dialog and sound effects. Usually (but not always) reserved for after the end of the film so the original scene plays out dub-free.
* Svengoolie when the original Svengoolie, Jerry G. Bishop, decided he didn't want the job back and gave Koz his blessing.
* Sven Hassel and horrible, this wasn't as systematic as their persecution of the Jews.
* Sven Hassel book. As a soldier fighting in a German disciplinary battalion during WW2, he and his comrades were routinely sent on the most dangerous missions
* Sven Hassel can shoot them and relieve the Germans of their presence.
* Sven Hassel drill sergeants are portrayed as sadistic loudmouths, more interested in breaking men than turning them into good soldiers.
* Sven Hassel Emma. As the train is leaving for the Russian front, he leans out the window shouting that he'll put in for medical leave so he can see her again, only to get hit in the head by a passing pole, whereupon he shouts gleefully, "See, I've got a skull fracture!"
* Sven Hassel had a vast number of ethnic minorities who couldn't speak Russian either he didn't stand out).
* Sven Hassel happily executing a flood of so-called deserters gets a nasty shock when Soviet tanks turn up on their doorstep. Turns out there really is a full retreat going on.
* Sven Hassel novels, a senior SA officer has been arrested in the Night of the Long Knives purge. As he waits in his cell, he isn't alarmed because he thinks he's too important to harm — until he realises that the sound of a revving lorry and motorcycle are masking regular bursts of gunfire, like you'd hear from a firing squad.
* Sven Hassel novels. The politically-connected parents of a soldier condemned to death convince a Nazi official to rescind the death penalty. Unfortunately after they leave the official changes his mind without notifying the parents, who write to their son and tell him the good news. When the reprieve doesn't come through, he unsurprisingly has a mental breakdown.
* Sven Hassel novels, when this technique is mentioned as having been used to dismember prisoners of war, by tying their feet to the ground before letting go the tree (to which their arms are tied).
* Sven Hassel officers is a German-American and former US Marine. He is very, very tough and nasty, but the troops follow him because he can do anything he tells them to do, and has shown it.
* Sven Hassel's books about the Legion of the Damned, there is invariably a scene where the nothing-to-lose penal soldiers throw a big party, usually doing something like taking over a brothel or a high-class hotel and defending it against all comers, be they German military police, civil authority, or in one extreme case a major Russian attack. Although they may have signed a local truce with the Russians and shared the girls and the booze.
* Sven Hassel's World War II fiction, the lads are often sent on suicide missions or are otherwise caught behind Russian lines and need to get home. This invariably ends up in escapades in Soviet kit they do not know how to use and have to figure out on the spot.
* Sven Hassel the 27th Penal Panzer Regiment is commanded by Major Mike Braun, a German-American and former US Marine.
* Sven Hassel, they're not reassured. "No-one's this red, not even in Russia!"
* Sven Hassel well-trained, but much of that training has long-since been replaced by improvisation, pragmatism, utter ruthlessness, and an innate familiarity with their enemy that means they can react to and even predict their movements.
* Sven Hassel" who dresses up like a parson, complete with "soul remover".
* Sven (while with the IBI), Train (while with Chronos) and Belze from
* Svetlana Alliluyeva, daughter of Josef Stalin. She later returned to the USSR.
* Svetlana Chmakova seems to be in a love-hate relationship with her characters.
* Svetozar Boroević, a Croat general in the Austro-Hungarian Army during World

War I, who thanks to his leadership rose to the rank of Field Marshal despite the pro-Austrian bias of the time, found himself after the war being rejected by all of the successor states of the now-dismembered Austro-Hungarian Empire; Yugoslavs despised him for his pro-Habsburg loyalty (and apparent willingness to sacrifice numerous Yugoslavs in the defense of Austria-Hungary), while in the new Republic of Austria he was seen as an embarrassing reminder of their defeat and division.
* SVU a cop) to get in good with a smuggler in the illegal wildlife trade.
* SVU also occasionally have gangs where the initiation requirement is murder or rape. (Or both).
* SVU, but she had to transfer out of One PP to an Anti-Terrorism Task Force to get it.
* SVU had a spree killer be sentenced to a psychiatric facility until he is deemed fit to stand trial (which will likely never occur) after it is discovered that his erratic behavior and murders were caused by his mind being destroyed by a now terminal case of Syphilis, which an insurance company had detected during an exam, but failed to inform him of.
* SVU in general subverts this nearly as often as they play it straight, since a number of the victims are teenagers abused by adults.
* SVU is also willing to interpret the law somewhat creatively in order to bring justice.
* SVU kill her sister, but did assume her identity as a means of hiding from the man who had.
* SVU's first male in the role is Rafael Barba. He gets almost as much admiration as Alex and Casey.
* SVU so that his symptoms would return and he wouldn't be taken seriously if he tried to report what he saw.
* SVU. They try to dissuade her, but as she's dying, she insists on taking the blame.
* SVU who's been preying on prostitutes when they interview a survivor and note the way she shielded her eyes when the assailant blinded her with a flashlight (he was holding in the way cops are trained to do).
* SV Wishes. Almost immediately, he is punished for his host body's scheming and attempted sabotage despite having nothing to do with it.
* SV Wishes: A major plot point with the modern Shen Yuan and the lower-class Luo Binghe in the Xianxia world of the high noble society they find themselves in.
* SV Wishes: Luo Binghe treats his master Shen Qingqiu's bruises after the latter is hurt after stopping Liu Qingge's qi deviation and getting attacked by Yue Qingyuan as a result. This permanently sours Luo Binghe's opinion of the Lord of Household.
* SV Wishes: Shen Qingqiu is mistreated and neglected by servants despite serving as Yue Qingyuan's sole spouse for a decade and still high ranking as Second Husband. Does Yue Qingyuan actually intervene on his long-time spouse's behalf? Nope. Luo Binghe and Liu Qingge's opinions of the Lord of the Household sink once they realize this. Luo Binghe justifiably worries about Shen Qingqiu's condition when they are separated because he knows Yue Qingyuan won't think to help him.
* SV Wishes. This wasn’t done to punish him. Yue Qingyuan just got used to Shen Qingqiu handling the money and the servants throughout their marriage. He didn’t realize that by demoting Shen Qingqiu, he as the Lord of the Household or the new First Husband, Liu Qingge would have to give him the income to survive on and command the servants on the former’s behalf. The neglectful Yue Qingyuan and the unintentionally ignorant Liu Qingge accidentally leave Shen Qingqiu destitute in own home and allow for the servants to mistreat him. Liu Qingge finally helps Shen Qingqiu when he comes to own his position as First Husband and gave Shen Qingqiu new servants and money. Yue Qingyuan still continued in his neglect and ignorance until it was too late.
* SV Wishes: Whereas Shen Yuan of canon was deep in the closet, in denial of his sexuality and his romantic feelings and firmly believed himself straight. Here Shen Yuan has already realized his homosexuality, not that it helps him.
* SV Wishes: Yue Qingyuan breaks a decade-long promise to Shen Qingqiu to be

monogamous that was the bedrock of his marriage to give into social pressure and take another spouse to raise his status. Not only did that earned him further mockery of the court, it destroys what was a previously harmonious relationship and ruins the lives of everyone involved.
* Swagger sticks are officers' accouterments, the most common being a short cane with regimental insignia on the handle. Certain units have their own unique twist on the stick, such as cavalry officers carrying riding crops and officers in traditionally Irish regiments carrying sticks made from blackthorn.
* SWAG had a "Celebrity Crime" segment involving some celebrities trying to use their status to get away with relatively petty crimes.
* Swaim's head asplodes in the final episode thanks to the failsafe. Twice. He gets better.
* Swain became a ranked officer at a very early age (even though by all logic he should not have been accepted in the military at all due to being crippled). How he did it is a mystery, and contributes to his overall enigmatic status.
* Swain's entire visual theme is centered around them. From his outfit, to his ultimate turning him into a demonic man-raven, to the ravens perched around the map only visible to him.
* Swallowdale, when the children leave a time capsule and specifically mention that "it probably won't be found for many years...when people wear quite different sorts of clothes".
* swallowed he was armored, and very hard to hurt, but his insides weren't so well-protected, it seemed.)
* swallowed it to instill fear in his enemies.), he's wearing either an eyepatch or a bandanna around his eye.
* Swallowed Whole: A monster eats characters and items whole without chewing.
* Swallowed Whole: The various Egyptian books of the netherworld (New Kingdom) include a few vignettes showing deceased people, or maybe gods, swallowed whole by Apep/Apophis.
* Swallowed Whole while ranting at the heroine, by a monster that was immediately destroyed in an explosion. Although the creators admitted that Roman's role was extended beyond the originally intended one-off pilot episode appearance because both the creators and fans loved him so much, they have confirmed several times that he's dead and won't return. That doesn't stop fans theorising how to bring him back.
* Swallowed Whole without dying (known as "soft vore") and it is a purely fantastical form of fetishism, but the majority of more serious works do result in the prey's death, usually from being digested alive.
* swallow him like the rest). This was somewhat more of a "keep him alive" stratagem than a "normal life" one — there hadn't even really been enough people in the history of the world at this point for "normal" to have many benchmarks.
* Swallowing live prey is more common in nature than you might think. All amphibians and most fish swallow all their prey alive, and a good number of reptiles and birds will at least do this to small prey. And of course there's anything that eats ants or krill/plankton which simply gulp their prey down by the dozens, if not hundreds (except anteaters, which crush ants against the roof of their mouths before swallowing).
* Swallowing rolled-up bits of foil before the medical examination is suggested as a good way to avoid conscription, supposedly because the foil will show up as ulcers in x-rays (this technique never works).
* Swallowing the Earth terrifying nicknames) isn't right behind you wondering if your death would be useful for his next caper?
* swallowing them whole. The cilia paralyze almost all living creatures they touch.
* Swallow is centered around the disturbingly real-life mental illness Pica, which causes the protagonist to eat non-edible objects, such as thumb tacks. While pregnant. At one point she goes for an ultrasound, and the doctor's discovery of the objects inside her is played for complete horror.
* Swallows and Amazons, and wrote several instructional manuals of fighting and

survival skills.
* Swallows and Amazons experienced a slight shift to "Mysterious Waters".
* Swallows and Amazons series is the only adult the protagonists seem to take entirely seriously.
* Swallows and Amazons when Peggy uses one of the catchphrases in front of her without thinking.
* swallows it. It takes police a few moments to realize what the guy had done...
* Swallow the Key: It's very stupid to swallow the key to a door you just locked because you would not be able to use the key again to unlock it later. Usually used in classic cartoons, however.
* Swallow Whole to keep the creature from becoming little more than a really macabre water slide. Fifth Edition changed things so that instead a creature will involuntarily regurgitate everything it's swallowed if it takes a certain amount of damage from creatures it's swallowed whole in one round.
* Swami Beyondananda, in both stand-up and books, has a way with it as well: "If you're a sucker for a seer, and what the seer sees sucks, you can redress your grievance in a seersucker suit."
* Swami Bullwinkle announces, "Eeny meeny, chili beany, the spirits are about to speak!" Rocky: "Are they friendly spirits?" Bullwinkle: "Friendly? Just listen!"
* "Swamp and Tad: Mission Imfrogable" was about a pair of frog-like aliens coming to Earth in order to retrieve a package for their king, the mission being made difficult because a dog finds the package. Eventually, Swamp manages to get the package by being nice to the dog, and it turns out the package Tad spent the short working his ass off to get back was a pizza, which the king messily devours. After all is said and done, the two are then told that they must go back to Earth to retrieve more pizzas, much to Tad's dismay.
* Swamp blights can summon and control swarms of insects, and are surrounded by a cloud of biting mosquitoes at all times.
* Swamp blues (basically a rawer, more primitive variant of Chicago blues originating from Lousiana)
* Swampfolk are crazed rednecks who are mutated due to long term residual radiation in the waters of Point Lookout and inbreeding who have become ungodly tough and viciously territorial of their swamp lands.
* Swamp Kart Speedway rip-off. The worst part about that game is that every time a racer passes you, they go "Bye-bye!" (taken from the scene in the movie where Shrek tries to explain to Donkey how "ogres have layers"). And the same "Bye-bye!" sound is used for every single character.
* Swampland in Florida. They have been a nuisance to Florida for many years. Starting in the 1920s, unsuspecting investors would be told of prime but useless swampland that was dirt cheap. The investors, so quick to make an easy buck out of it, would purchase said land before ever placing eyes on it, blindly unaware that it is nearly impossible to develop. The Florida land boom of the 1920s was riff with such scams as it was the first real estate bubble in the state. One notable example is developers literally busing in customers and selling them shares in "towns" that were only vast plots of uninhabitable swampland with signs stating where the nonexistent buildings would be. Unfortunately, it is still running rampant due to the ability of buyers and sellers to purchase and sell land over the Internet.
* Swamp Loggers episode is actually a reworking of a documentary originally shown on parent network A&E).
* "Swamp Mates" has recurring antagonist Bubble Bass as its main character (alongside Patrick), showing Bubble Bass and Patrick taking a surreal journey into a swamp to find one of Bubble Bass's missing action figures.
* Swamp Planets: Havena (issue 268), Holci (issue 161), Icon (issue 163)
* Swamps Are Evil: It's especially a bad idea to venture too deeply inside forested wetlands.
* Swamps Are Evil: Swamps are nasty, unwholesome places, and full of evil or just unpleasant creatures.
* Swamps are the traditional home of black dragons, generally regarded as the most

sinister and malicious of all dragon breeds. Other inhabitants include the
* Swamp Sim as a T-posed model that slid across the ground when appearing and chasing you. A later update eventually gave him an actual running animation.
* swamps of Karda Nui invasion, a thick green mist blocking out the sunlight is also mentioned.
* Swamp's unlockable alternate version is considered SonSon's home stage.
* Swamp Thing 2:37, when John declines Emma's offer to spend more time in bed with her, she asks whether she's ever told him what her father says about Englishmen; he responds "Yes, you did; "no, we're not; and if I ever meet your dad I'm going to chin him." The implied word after "not" is, of course, "gay," which in 1985 was the sort of "inference" to "sex perversion" which the Code forbade.
* Swamp Thing #53, Alec manages to croak out most of "I love..." to Abby before his apparent death.
* Swamp Thing Abby Cable cradles herself on the floor after evil uncle Anton Arcane has returned to life in the body of her husband Matt and brutalized her in a number of ways, including sexual.
* Swamp Thing actually describes this as what the plants do when he comes on the scene in the New 52 series. Specifically, he likens the reaction of plants at a botanical garden in Metropolis as being like a crowd of thirteen-year-old girls at the arrival of a rock star. Invoked by name when he solves their "rat problem" shall we say:
* Swamp Thing after their escape from death, and so is the ongoing plotline about their relationship, or lack thereof. All this is so the series can focus primarily on the upcoming deconstruction and reconstruction of the Swamp Thing, and secondarily on the Cables' deteriorating marriage.
* Swamp Thing/Alec Holland. First appeared in October-November, 1972.
* Swamp Thing and his retcon, DC pretty much refuses to market Moore's version of the character in other media. Pretty much every Swamp Thing show, movie, cartoon uses the original "man to monster" origin for Swamp Thing and the Failure is the Only Option trope to drive the plot.
* Swamp Thing and replacing him with whatever-the-Swamp-Thing-was-becoming.
* Swamp Thing and Tefe Holland; the former of whom is, well, practically a living swamp as well as champion of The Parliament of the Trees, and the latter, his sort-of child, who shares his control over plants (among other abilities).
* Swamp Thing, a new generation of vampires are hatched in a town submerged in stagnant water that have the form of fish people (though closer to fish). Charmingly, they eat each other until only one huge newborn remains.
* Swamp Thing at the same time. Since then, Swamp Thing has gone on to have many successful comic runs and a number of appearances in other media, whereas Man-Thing, while still successful, as of 2019 has yet to break out of his cult status.
* Swamp Thing based this arc on one of his own cousins who went through a similar experience with her husband, and many of the specific details of Liz's plight (wearing sewn-up towels instead of proper new underwear, never immersing herself in a bath for fear of drowning, never plugging in the TV for fear of electrocution) are almost exactly the same as those of the cousin.
* Swamp Thing: Cellanth, a pretty alien woman who was abducted by Solus and tried to help the other prisoners escape by pretending to be interested in her captor, looked pretty much like a human with antennae and wings.
* Swamp Thing comic book, an autistic child in a group home draws pictures, with accompanying text, of the Monkey King that (unbeknownst to the authorities) killed his parents. Soon, all the children in the home are independently drawing pictures of the creature, presaging its reappearance.
* Swamp Thing could take a concept like "woman transforms into a bird" and make it this horrific. They give her a root to chew to start the change. She remarks at its bitter taste, and suddenly starts vomiting uncontrollably, puking up all of her internal organs, leaving her body below the neck to rot and wither away. The cultist then holds her head in his hands and talks her through the metamorphosis in graphic detail: talons slicing their way free from her neck, feathers ripping out of her skin, and so forth. Finally her mind goes away, leaving her nothing more

than a mindless animal to fly off into oblivion to awaken the ancient beast that will bring about the end of the universe, dying in the process.
* Swamp Thing did it instead, although he was being possessed by Swamp Thing at the time. This resulted in Tefe being born human but with powers over The Green.
* Swamp Thing: Dr. Holland saved Alice and Jude, even killed Dr. Anton Arcane, but due to his botanical transformation Dr. Holland can never continue his work or be with Alice.
* Swamp Thing, drifting further away from anything resembling rational thought.
* Swamp Thing, each Earth elemental begins as a man catching fire (often as a victim of foul play) and his dying body plunging into a swamp, where plants absorb his consciousness and form themselves into a protector of the Green.
* Swamp Thing in particular. Despite technically being part of the Red, flies are so close to the rot that they're infamously untrustworthy.
* Swamp Thing in protest over the controversial censorship of the intended climax of Rick Veitch's previous run.
* Swamp Thing. In the actual nineties, car designs leaned toward a much more streamlined and conservative direction.
* Swamp Thing is an avatar of the Green, the collective spirit of plants. As such while you can destroy his bodies all day he can just regrow himself and could only be killed in theory by destroying all plant matter in the universe.
* Swamp Thing, Madame Xanadu is said to have performed readings for Dan Cassidy and he always gets the same three cards - The Fool, The Hanged Man and the Wheel of Fortune. The meaning of these cards is never explained, but when she performs another reading she gets the same cards but this time they are reversed. This is a relief to Cassidy, despite cards being reversed rarely being a good thing.
* Swamp Thing: Made in 2019, flashbacks to Abby Arcane's time with the Sunderlands are set around 2005.
* Swamp Thing on your communicator and tell him to zeta beam you the hell out of here, you goddamned lunatic!" This, despite the fact that she's been witness for many years to all sorts of paranormal occurrences and creatures (like her lover).
* Swamp Thing or the other mystical characters in the DC Universe. DC management popped a head-gasket and killed the story long after it had received official approval, so Veitch and his collaborators quit, and the story was never resolved.
* Swamp Thing Pog is understandably devastated when Swamp Thing shows him that the Loneliest Animal already rules the new world they had found, and treats it just the same.
* Swamp Thing removes his mask, revealing himself to be the main villain Anton Arcane.
* Swamp Thing's girlfriend noting that Lois and Superman have essentially the same relationship as they do. After she got arrested for "Crimes against nature", leading to Swamp Thing using his plant powers to turn Gotham City into a jungle, Batman pointed this out to the mayor, who panicked and dropped the charges.
* Swamp Thing's run), a recently-vamped boy taunts one of his parents about how they were too ineffectual to protect him while he tears out the other's neck.
* Swamp Thing's run, when Swamp Thing rescued his beloved Abigail from Hell:
* Swamp Thing story features Alex Olsen, turned into a shambling plant monster by his traitorous lab partner. Alex kills his partner before he can murder Alex's beloved, but she's terrified of him and he can't speak to explain himself; he sadly turns away and returns to the swamp.
* Swamp Thing storyline features a group of vampires that have adapted to living underwater in a stagnant lake; Swamp Thing destroys them by agitating the lake and turning it into running water.
* Swamp Thing story, Metron attempts to breach the Source Wall, and sees thousands of events simultaneously across the universe. He later learns that this was actually an "Aleph Point".
* Swamp Thing story, "The Curse," draws parallels between menstruation and the traditional lunar-cycle-based activity of werewolves.
* Swamp Thing. Swampy is able to defeat a nearly omnipotent enemy while in his Place of Power in the swamps, and he has a definite advantage anywhere he's in

contact with "the clean Earth" (i.e., anywhere that nature is strong, especially anywhere that has a lot of plants - the evil coven that tried to fight him in a rain forest made a very bad mistake).
* Swamp Thing's wife. She has snow-white hair with two black streaks running through it, but she's not a spellcaster and the white hair comes from her mother's side of the family.
* Swamp Thing Thanagarian infantry prefer fighting like this, so their many enemies would forget just how advanced Thanagar's technology actually was.
* Swamp Thing, the latest in an ancient line of mystic plant elementals, once traveled to several different planets, all of which had vegetation on them, by growing a new body on the new world.
* Swamp Thing TV series: Anton Arcane complains that the jury is not impartial, as they all know him well.
* Swamp Thing upon the "clean earth" that was the titular character's place of power.
* Swamp Thing was once Alec Holland, who was murdered in the Florida swamps and rose again as a mass of vegetable matter in the shape of a hulking humanoid.
* Swamp Thing, when Abby skips bail after being charged with crimes against nature for her relationship with the title character, she flees to Gotham, stops to ask some prostitutes to recommend a place to stay, and gets picked up along with them in a police sting.
* Swamp Thing who warns him how crazy he's become. It doesn't help that Alec can't ignore the fact he can't get Abby's smile just right, and he goes mad when his Abby-self responds "All love... is madness."
* Swamp Thing, William Arcane has a severe allergy to chlorophyll, and thus has to breathe filtered oxygen.
* Swamp Thing: "You can't kill a vegetable by shooting it in the head."
* Swamp Water (1941), while not a horror film, is still arguably a good example. It takes place in the rural South, specifically the area in Georgia around the Okefenokee Swamp. The town on the swamp's edge is pleasant enough, with a general store, square dances, young women in gingham dresses and the like. But once you wander outside of town and into the enormous swampland itself, things quickly become dangerous. Not only are the trees growing out of the water so labyrinthine that you can easily become hopelessly lost and starve to death if you don't know how to catch your own food, but once trapped in there you're easily prey for alligators, Florida panthers, and the dreaded water moccasin ("cottonmouth") snake, which lurks at the water's edge and strikes without warning. Also living in that swamp is a paranoid survivalist (actually a man unjustly accused of murder who's been forced to become a recluse) played by Walter Brennan; he'll kidnap you if you get too close to his hiding place and then kill you if you try to escape.
* Swan Boats: Riding swans, having swan-shaped boats or boats pulled by swan represent love, romance, leisure or art.
* Swankie's Haddock had an ad campaign where a group of farm animals attempted to get the viewer to have fish for dinner.
* Swan Lake end with some version of this - unable to be together in life, Princess Odette and Prince Siegfried plunge together into the lake to be united in death. In the Matthew Bourne version, when both the Prince and the (possibly imaginary) Swan are dead, the Prince's younger self is seen cradled in the Swan's arms as the ballet ends.
* Swan Lake follows two identical girls, each expressing one side of this complex, and ultimately ends in tragedy. It subtly deconstructs this trope, as the prince loves the White Swan's purity, but doesn't seem to have any problem with it when she seduces him (though it's actually an imposter). It further emphasizes the deconstruction by having the same dancer play both parts, implying a real woman has both the Black and White Swan.
* Swan Lake has the fearful, modest Odette as the Betty while the flirtatious, seductive Odile is the Veronica to Siegfried's Archie
* Swan Lake) is about a princess who becomes a swan during the day due to the spell of a sorcerer.

* Swan Lake is one of the most frequently staged ballets in the world and while the ending sometimes shifts a lot, the curse itself and its escape clause remains the same.
* Swan Lake replaces Prince Siegfried with Prince Derek, and Odile with Bridget.
* Swan Lake: The heroine has been cursed to turn into a swan by day and human by night.
* Swan Lake, the titular lake is made of tears. In the ballet's original version, they were cried by Odette's grandfather when his daughter, her mother, died, while in the later revised version they were cried by Odette's mother herself when Odette was changed into a swan.
* Swan Lake" took the ballet and turned all the swans into male characters.
* Swan Lake was enchanted by her stepmother, with the help of the demon, Rothbart. Later productions avert this and make Rothbart the lone villain.
* Swan Lake wears his signature swan-like facepaint. He also occasionally spits raw egg into his opponent's mouth. Make of that what you will.
* Swann also has one, from when he lost an arm when he and his miners rebelled against the Kel-Morian Combine.
* Swann is a native of Cleveland, and also set the first book of his
* Swan Princess movie, the back wall of the festival stage falls over, nearly landing on Rogers, who escapes unscathed because of a window in the wall. He even remarks afterwards, "Well-placed window!"
* Swan Queen relationship of the Evil Queen, Regina, and the savior, Emma.
* Swans, an experimental industrial band from New York. One of the band's members, singer/songwriter/proverbial witch and keyboardist Jarboe, has solo material that delves so far into the realms of Surreal/Psychological Horror to the point that it becomes impossible to listen, although you can't help but wait it out in terror. The release of their 2012 album marked their 30th anniversary; it sounds as though they haven't missed a step nor do they plan on doing so.
* Swans, egrets, and many other birds live in an environment with lots of mud and dirty water, and spend their days dabbling around in this mud finding the edible objects in it. They still have enough time to keep their own pure-white plumage looking clean. This is certainly an impressive feat when you imagine how much work all that preening must be. But they do it, because the best way to attract the opposite sex is to prove that "I've got such good genes that I can maintain these beautiful feathers and keep them from being tarnished by mud, lice, or injuries."
* Swans frontman Michael Gira's other major project, Angels of Light, has a few of these, most notable being the song that gave the band their name: The seven-minute "Angels of Light", which seems to describe an out-of-body experience.
* Swans have done this quite frequently. Examples include "Surrogate Drone" and "The Seer".
* Swans hit #37 on the album charts, they became shorthand for "that one obscure rock group with Gira and stuff".
* Swans in particular is filled with abstract mini-narratives and decidedly creepy character studies, all framed solely with the word "you."
* Swan Song, a colonel trapped in a bunker orders the soldier and civilian boy who are trying to free him to first cut off his hand and then cauterize the flesh with heated instruments he had them prepare first.
* Swan Song: A creator's last work or artist's last performance before they died.
* Swan Song, but the bad guys wind up hideously deformed. One villain is so horrified by his appearance that he puts on a mask he refuses to take off.
* Swan Song has this uncanny ability to cause green to sprout despite a seven-year nuclear winter.
* Swan Song: "Here we go 'round the mulberry bush, the mulberry bush, the mulberry bush..."
* Swan Song, into a risky experimental coma to preserve the little remaining life support (cutting resource usage into a tenth). Piling on the problem, they are also low on fuel with their method of manual fuel extraction destroyed, so they discuss and realize that their only option is to go to a modern-day-era tech-level system and hope they can refuel on the desolate refueling station until they find a

higher-tech system that offers a way to resuscitate the comatose crew... assuming they can even be put into a coma with the combination of space-morphine and dice rolls. Miraculously, they do... but the navigator then realizes that while he made it to the system, he doesn't have the life support to fly to a fuel station and must instead crash-land onto the only inhabited planet.
* Swansong is a clone of Damsel of Distress that chooses to be a hero instead of a villain.
* "Swan Song" (S05, E22), an old boneyard just outside of Lawrence, Kansas.
* Swan Song: The Man with the Scarlet Eye sends flies out to search for Sister and the glass ring and report back to him. They do.
* Swan Song. We have the sophomoric anti-Wagner comments of Oxford students met by a girl who tries to point out how illogical they are, and complaints by a German refugee (who, ironically, has delayed his return because Wagner is now taboo in Germany and he can only attend the operas in England.)
* Swan's War and he never really recovers and dies one year later by what is implied to be suicide.
* Swan's War trilogy is a masked ball with such an abundance of plotting, provocation, and foreshadowing that it defines the evenings of both following books.
* swap between sub-weapons on the fly. (Apparently this is mostly due to the memory-intensive procedural cutting engine: there simply isn't enough RAM available on either console to run it with all 3 secondary weapons being usable at the same time.)
* SWAP Ensemble always wears a skirt or a dress. At one point, he dresses up as another male crossdresser, states that he's wearing boys' clothes for once, and tells people to stop making assumptions about his gender.
* Swapnote that allowed people to freely communicate with friends and send photographs. It was discontinued in 2013 due to a couple of instances of child predators in Japan using the app to communicate with children.
* swapped bodies. However, the only time the fact they don't have the same gender affected the episode was when Kim forgot which bathroom at school "Ron" was supposed to get in.
* swapped bodies with Dazzle and finishes him off with a 97-chomp combo. She spends the entirety of World 4 overweight, unable to keep up with Dazzle until she burns it off.
* Swapped Roles: Some roasts (especially the Comedy Central ones) end with the roastee turning around and roasting everyone else.
* Swapped Roles: Two characters swap roles to better understand each other's life.
* swapping bodies with the Astreus's crew, starting with Fargo. At first Alison thinks Jack has gone crazy, and when "Fargo" corroborates, that he's playing along as some sort of joke. Then Jack tells Alison they were just making out, leading to this:
* swapping Sakura's note, which explained her decision to kill herself
* "Swapportunity" - the opportunity to swap a higher-calorie dessert out for a low-fat cup of Yoplait Light. This one may have been tongue-in-cheek
* Swap Swap is about two schoolgirls with opposite personalities that can switch bodies by kissing.
* Swap Swap is the only yuri manga by Tomekichi, who mainly writes in the yaoi genre.
* Swap Swap Natsuko and Haruko go on the ferris wheel together, a sign that their relationship is getting more intimate. The ferris wheel operator opens the door to let them out at the end of the ride just as they're getting ready to kiss. In this case, though, the kiss is to facilitate their ability to switch bodies.
* Swap that out for Goat's milk in Mediterranean regions (where it's too dry and the soil too poor to support cattle farming).
* Swarles, Swarlos, Swarles Barkely, Bob Swarley, mon. Swarhili, Swar-lay, and Swar-wait for it-ley.
* Swarmed has a variation. Washburn takes cover from the wasps inside an empty plastic dumpster... then opens the lid again to snatch his hat, which fell off

during his escape.
* swarm of insects. She physically projects her speech for those around her to hear. Unfortunately, this does mean that Edward, who is immune to psychic powers, can't hear her at all.
* swarm of locusts. Also, if you kill an enemy skeleton, you can cast the raise-skeleton spell on it, but first it too must explode in a shower of blood and gory effluence.
* "Swarm of the Century" has the Aesop that you should listen to your friends, even when they seem not to make sense
* Swarm of the Century. Of course, they might have realized she knew what she was doing had she actually bothered to explain herself to them. It's also only fair to note that one of those plans worked, but a single overlooked parasprite set them back at square one, and another plan only failed because of Pinkie's antics.
* "Swarm of the Century", the ponies tasked with creating a banner to welcome Princess Celestia "couldn't fit it all in."
* Swarm on the Somme and having them conduct sabotage behind the front lines.
* Swarm Simulator, and easily capture territory and collect meat as resources even faster. "Ascension" is performed by sending your units into space to find a new planet to start over.
* Swarm Simulator:. There's an Invasion mechanic where you declare war on an enemy colony's leader for 2 days. During this period, said enemy's bugs will periodically appear and move around the screen, clicking on them kills them and reduces the enemy's army size, but if they escape they will steal your resources. You win once the enemy's army size is reduced to 0 before two days pass.
* Swarms of Endermen weaken the Wither Storm, much like how Withers, when spawned in the End, are outnumbered by Endermen, who can make very short work of it.
* swarms of irate Ghost Leviathans intent on chasing you out of their hunting grounds.
* swarms of nanites that passively damage enemy units within two hexes built around a gigantic floating Artificial Biological.
* S. was deliberately planned to look and feel like a book written and printed in the 1950s. The cover has woodblock print letters and graphic, there's a library sticker on the spine as well as a library "borrowed/returned" stamp in the back (with numerous dates of having been "borrowed"), and all the pages have yellowing and foxing to them. The story itself is written in a faux-translated from German mystery, with decidedly dated word usage and structure.
* Swashbuckle into a vat of the stuff if the team wins and get repeatedly doused in it in slapstick scenes between rounds.
* Swashbuckle, is the only one the team has to win in order to win the whole game. Winning the first two rounds cuts down the amount of items you have to find against the clock in the third, but it's still completely possible to lose the first two, then win the third and the game.
* Swashbuckler, acting governor Lord Durant is a despot who strips the colony for his own gain; jailing his political opponents without trial; removes the Lord High Justice from office, jails him, and evicts his wife and daughter; and attempts to flee when the going gets tough. He is also probably a pederast.
* Swashbuckler are pure Flynning, but highly entertaining nonetheless.
* Swashbuckler, etc., Jane eventually ends the fight with a right hook to Alice's jaw.
* swashbuckler Had some of the best whip stunts ever on film and the star Douglas Fairbanks Sr. did every one of them himself.
* Swashbuckler Hybrid Class lends itself well to this, with the Picaroon and Musketeer Archetypes being the most natural avenues available.
* Swashbuckler is well named. Not a single military action he attempts during the film comes off.
* Swashbuckler, it's unlikely he ever got it back. (lynch did, at least, release the horses before they went over the cliff.)
* Swashbuckler: Jane Barnet dives naked off the side of the ship and goes swimming around the caves on the cliff, watched by Ned Lynch. This historically accurate as

swimsuits did not exist in the 1700's.
* Swashbuckler, Lynch jumps through the skylight at the brothel—glass and all—in order to rescue Nick and Jane from the soldiers.
* Swashbuckler, Lynch, Nick and Jane escape from the mounted soldiers by driving a wagon full of bananas of a cliff into the ocean.
* Swashbuckler, neither the lute player nor the Woman of Dark Visage utter a word while they are on the screen. It is not clear is the can't speak, or just chose not to, but the lute player remains silent even after accidentally stabbing himself in the stomach.
* Swashbucklers of the 7 Skies, "ambitious" best describes the national character of the Barathi, whose empire is tangled, corrupt, and ridden with assassination and Vendetta-killings. The other nations have their own ideals that can cause conflict, but the Barathi are the easiest to hand for any GM who wants a sinister plot driven by someone's desire for power. Ambition is even listed as one of the fatal flaws that distinguishes a swashbuckling villain from a hero, becoming consumed by the need to win.
* Swashbucklers of the 7 Skies as to what kinds of things you want to trip you up in play. The player who takes this is literally demanding love be their weakness, effectively affirming this trope even if the character doesn't believe it.
* Swashbucklers of the 7 Skies going to go away no matter what the character does, so players are strongly advised to find some way to blow them that advances the plot or is at least entertaining, often providing the GM with story hooks for later in the process.
* Swashbucklers Of The 7 Skies has a strong vein of this, matched with extreme legalism (they invented lawyers) and the cultural practice of Vendetta. If you get away with it, it's considered a brilliant piece of politicking to be praised and emulated whenever possible... but if you are caught, then there's a fair chance you and everyone you love will "regrettably drown" well away from water.
* Swashbucklers of the 7 Skies is supposed to reward Style Dice for entertaining behavior. Act out a lot and take the lead, and you're better able to dominate the game both in and out of character, and leave everyone else—especially the fencers—in the dust.
* Swashbucklers of the 7 Skies suggests the GM tells the players what their characters are checking to spot, and if players then fail the check, the player gets to explain why. For example, the GM will call for a check to notice an assassin sneaking into the team's home, and a player who fails might say they were busy cleaning their gear... meaning they're armed when they do finally notice.
* Swashbucklers of the 7 Skies system games are fond of this one - there's usually a power currency (Style Dice, Hero Points) to let the players declare significant facts about the game, such as inventing useful NPCs or giving them new abilities. S7S even encourages players to make flat statements that something exists and tossing a Style Die down, as opposed to asking if it's so and having to pay the cost the GM sets (though the GM should ask for more dice on particularly large changes anyway).
* Swashbucklers of the Seven Skies, floating islands experience six seasons over the course of a 360 day year, as each of six skies passes overhead: The Mists are warm and foggy, The Jungle Sky is even warmer and filled with floating trees, The Sky of Thunder is full of rain and lightning, the Sky of Stones marks early autumn, the eerie and colder Ghost Sky marks late autumn, and the Sky of Frost is icy and nearly impassible. (The seventh sky, the Sky of Fire, sits at the central axis of the world dome and fries anyone who tries to enter.) Ships travelling far can cross into a sky earlier or later, and ships bear the brunt of each sky's weather, notably stones, lighting, and trees.
* Swashbucklers Of The Seven Skies has skysharks: "Horse-sized, arrow-shaped carnivores (little more than fanged mouths with wings)".
* Swashbuckler to spring her father from prison and overthrow Lord Durant: especially as he knows that Lynch is falling for her. Jane promises to pay the crew for their part in the plan, which mollifies him.
* Swastikas/Rising sun flags, for enemy aircraft shot down in air-to-air combat

(planes destroyed on the ground were either not counted, or counted separately).
* S.W.A.T. (1975) commonly used stock footage of the SWAT van responding to a call, among other things. In fact, a couple of episodes even reused the intro scenes from some other episodes.
* S.W.A.T. (1975), the boss of a bunch of crooks tries to escape by wiring himself to a bomb, with the switch in his hand. He demands and gets a truck, which he tries to escape in, driving one-handed. Naturally, something gets in his way, and he has to put both hands on the wheel — releasing the switch. Boom.
* S.W.A.T. (2003): TJ quite literally when Boxer and Street argue about Boxer's sister.
* S.W.A.T. (2017): After drinking a lot and going to a motel with a guy whom she met, Chris wakes up unable to remember most of this... including where her car is. Street helps her look for it, but also gently chides Chris for drinking too much and being rash as a result.
* S.W.A.T. (2017), but a team of bounty hunters are also pursuing them and they get in the way.
* S.W.A.T. (2017)" Chris, a fairly butch woman, is dating Kira, who's quite femme. In an unusual example, both are bisexual.
* S.W.A.T. (2017): Chris arrests a young man for drunk driving while off duty, but it turns out that his father is the deputy mayor and he makes the case disappear. He'd done so twice before too. She fights to bring him down, and eventually succeeds with Lynch's help, catching the guy on tape admitting his acts, which is used for making him resign (while they urge that his son get the help he needs).
* S.W.A.T. (2017): Chris eventually reveals that when she'd been kidnapped by gangbangers as a girl, they raped her. She didn't report this or tell her family for a long time.
* S.W.A.T. (2017): Chris is a friendly and caring woman (albeit she often puts up a tough exterior) who serves as the sniper of the unit.
* S.W.A.T. (2017)" Chris show this. She's good-looking, though she normally wears utilitarian work clothes or fairly ordinary ones when off duty. Here, she's shown in a highly flattering black spaghetti strap top that's quite revealing, and really shines.
* S.W.A.T. (2017): "Ekitai Rashku" sees the team extraditing a Yakuza clan gangster back to Japan then, once he's busted out of custody by his cohorts, aiding the Tokyo Police in getting him back.
* S.W.A.T. (2017): Erika is introduced and barely lasts half a season before being killed off.
* S.W.A.T. (2017)" Hondo and Deacon first, then the rest of the team all consider the robbers this, being highly skilled military veterans.
* S.W.A.T. (2017): In "Imposters" the titular robbers who dressed as SWAT for robbing people forced teenage girls from every family they'd robbed to strip naked, then say on video sexual things they wanted to do, so that they wouldn't report things which could help catch them in fear of this being posted online where it would follow them around for the rest of their lives.
* S.W.A.T. (2017): Starting in Season 2, Chris becomes "third" to a man and woman. It doesn't work out in the end though, as despite their reassurances she's never as important to them, which Chris dislikes. Plus she's also more into the woman.
* S.W.A.T. (2017)" the robbers turn out to all be women. Due to their skill, Deacon and Hondo openly express admiration for them. They also had been in an all-female Israeli military unit together, which is how they'd acquired their skills.
* S.W.A.T. (2017)" the robbers turn out to be the daughters of people coerced into smuggling diamonds for a criminal syndicate, who then murdered them after they did it as "loose ends". Because of that, they robbed the syndicate in retaliation.
* S.W.A.T. (2017), the uniforms of the Tokyo Metropolitan Police are correct, but the emblems on their peaked caps don't show the MPD's Asahikage seal. Which is ironic since the episode was filmed on location in Tokyo.
* SWAT 2, a real-time tactics game, features a decent interface for diplomacy, wherein you can make or grant demands, depending on your side. Good negotiations can provide a few extra points (and in the terrorist campaign, is once required for

mission completion), but the missions can never be properly resolved by negotiations alone. A successful SWAT mission still ends with busting in and killing/arresting the suspects, and the terrorists likewise need to kill all of their attackers or make their escape off-map.
* SWAT 3 had a mission where you had to rescue the Turkish ambassador from a torture cellar under a store used as a front for Kurdish terrorists.
* SWAT 3's "Rapid Deployment, Airport" mission), complete with an FMV showing what happens afterwards.
* SWAT 3. This one is notable in that both updates were made available as patches for older versions, although only people who bought the TGotY edition were able to get the disc featuring videos of Blackwater demonstrating tactics.
* SWAT 4 are prone to doing this. After telling them to drop the weapon and get down, the perp will slowly do this... and then suddenly open fire on you.
* SWAT 4 has a level ending with a "Russian police training video" using gameplay footage of Spoony's many failures. Comments are subtitled in Russian, with translated subtitles reading "NOT TO BE STANDING IN WAY FOR COMRADES MAKING ENTRANCE!" and "BEWARE OF JEWS MAKING SNEAK."
* SWAT 4: In the St. Michael's Medical Center mission, a news station broadcasts footage of your team entering the hospital. Tactical Operations Command manages to cut the cable connection to the hospital, but not before the terrorists are made aware of your entry.
* SWAT 4, some of your squadmates have some one liners after finding a dead/incapacitated suspect along with normal chatter
* SWAT 4 tackle extremely disturbing crime cases in very creepy locales.
* SWAT 4, the best score will be awarded to players who follow this trope—handcuff and report all suspects and civilians, subdue suspects with non-lethal methods and bring them in alive unless they're openly hostile, and confiscate all firearms and other evidence.
* SWAT 4 The serial killer in the second mission sometimes reacts to being handcuffed with this phrase. Of course the chances are that you already tazed or mazed her at this point.
* SWAT 4 where there's the "unauthorized use of deadly force" penalty if you kill someone before they shoot at you.
* SWAT 4 who kidnapped women and tortured them in a "dungeon" excavated beneath his basement.
* S.W.A.T., after Hondo hears Street frantically yelling "Officer down!" into the radio:
* S.W.A.T.: After Jim Street's partner Gamble gets them thrown off the SWAT team, they get punished by being put to work in the gun cage, maintaining the other SWAT units' equipment. Gamble quits rather than accepting it, but Street stays in the cage for six months, until Hondo handpicks him for a new SWAT unit he's forming.
* S.W.A.T. almost invokes this: at one point a TV cameramen climb a fence behind the LAPD command post and get a shot of their security camera feed, which the robbers holding hostages inside the bank then see on the news coverage. Lieutenant Velasquez sees what's going on and scrambles to get officers to block the TV guy's camera, but it's unclear whether any important information was transmitted.
* S.W.A.T., a random gangbanger gets one from a cop while Street and Hondo are going to visit Sanchez. Said gangbanger had been beat-up by Sanchez during the arrest.
* SWAT, as in "Surface Water Assessment Team," came into the public eye after the 2010 BP Oil Spill.
* S.W.A.T. has a helicopter use this trope in the opening sequence to deposit a group of LAPD SWAT officers on the roof of a bank where hostages are being held.
* S.W.A.T., Hondo commandeers a limousine full of prom-bound teenagers to pursue French mob boss Alex Montel after he escapes custody.
* S.W.A.T. is a former Marine. During a car ride, Hondo asks Street what he did in the SEALs.
* SWAT Kats; a minor villain announces "I'm outta here!", prompting Razor to level a bazooka at him from about ten feet away. "You said it." Bang. Did it get

mentioned that SWAT Kats was completely kickass for a 90s kid's show?
* SWAT Kats and go back in business as the invulnerable Metallikats. And despite their clear, obvious, and constant treachery, Hackle keeps collecting their battered remains and rebuilding them. The police eventually lock the heads of the robots in the police evidence locker to make him knock it off.
* SWAT Kats and goes at baddies with fist swinging, while the slighter Razor relies on a quicker, more acrobatic fighting style. The rest of the time, their approach to a problem will still always depend on their teamwork (whether it's air/ground, or piloting/weapons). If one kat is in serious trouble (or worse, unresponsive), the other will get very distressed and might channel that into a "this is for my buddy!" attack.
* SWAT Kats and the museum includes ancient spellbooks among its exhibits.
* SWAT Kats and threatens him with a comically huge drill while laughing insanely.
* SWAT Kats and when they came back as robots, they quickly cheered over their new strength, durability and firepower. Yeah, they bickered a lot, but when one of them got hurt, you can bet your aft that the other would drop everything to save them.
* SWAT Kats are an entirely fictional organization, and more like highly militarized police than actual military, there's still a few noteworthy issues:
* SWAT Kats", at the very beginning, parts of an oil refinery blow up, and you can tell which is which ahead of time. They had it far less subtle most of the time, however, as the backgrounds were drawn in a rather lavishly detailed style reminiscent of a comic-book, but the animated pieces were less "stylized", and more similar to other animated series of the time.
* SWAT Kats chemistry equipment to be seen, but for some reason the animators didn't get the message.
* SWAT Kats donned this grin occasionally, almost uniquely amongst the characters of that series.
* SWAT Kats episode "Mutation City", when it's revealed T-Bone can't swim (and the city happens to be flooded), Razor has to rescue him from the rising water-levels. His reaction;
* SWAT Kats episode "The Deadly Pyramid", the Pastmaster takes control of an army of monster mummies (each is the size of a small building!) and goes on a rampage.
* SWAT Kats episode "The Wrath of Dark Kat", Razor needs to defuse a bomb in mid-air. Popping open the hatch while muttering it's always the red wire, he discovers the villain has filled the entire bomb with a rat's nest of enough wires to fully equip a house; and of course all of them are red.
* SWAT Kats, especially in the Season 1 finale "Katastrophe", where four of the major recurring villains are caught in a massive warehouse explosion. They all get better by unknown means.
* SWAT Kats had the titular duo sent to an alternate dimension where they are not only criminals, but they and Callie Briggs are working with Dark Kat. Dark Kat's criminal ambitions and Commander Ferral's hatred for the SWAT Kats remain the same (the latter more so than usual).
* SWAT Kats has a following amongst furries. In addition to the two main characters, Deputy Mayor Callie Briggs is hugely popular with the fandom.
* SWAT Kats has a one-vehicle version of this in some form pretty much every time the Turbokat launched.
* SWAT Kats has a very bulky upper body that contrast his rather skinny legs.
* SWAT Kats has its front end pop off in flight, revealing it to be a pair of chainsaws with a rocket booster for thrust.
* SWAT Kats has Mayor Manx, who wear a toupee that doesn't even match his hair color, and will frequently fly off.
* SWAT Kats has several cool tanks, including the infamous Metallikat Express - a high-speed hovertank loaded to the brim with weaponry and missiles.
* SWAT Kats has the episode "A Bright And Shiny Future", wherein the evil Metallikats rule Megakat City. Chance and Razor are branded as outlaws, and must join a small but dedicated resistance force to overthrow Mac and Molly.
* SWAT Kats has their scramble alarm linked to Callie Briggs' communicator. It sounds the alert buzzer and flashes the red light throughout the main building in

the salvage yard, especially in the garage where they often are fixing cars. Whenever it goes off, it's time to move move move!
* SWAT Kats has the lantern jaw as well, though he is not the primary heroic figure on the show.
* SWAT Kats has this in spades. Commander Feral constantly blasts the heroes for all the collateral damage they cause, although no mention is made of any casualties. Subverted in one episode where a stray missile supposedly injured innocent bystanders, although it was later revealed to be a setup.
* SWAT Kats, have a stamp and ink pad for this purpose, and append their latest villain defeat, Morbulus, to a wall near the Turbokat's service bay. Morbulus appears to be their eighteenth downed adversary.
* SWAT Kats have Felina Feral, the one Enforcer who is willing to work with them, despite her uncle (who happens to be head of the Enforcers) being their sworn enemy.
* SWAT Kats. He finds it in the Megakat City Museum, so he smashes the glass vitrine and reclaims it. With this book of lore and spells, the Pastmaster brings a huge dinosaur into the city, and sends the SWAT Kats into the Cretaceous Period.
* SWAT Kats. He was physically smaller than T-Bone, but unlike the usual for the role he wasn't a non-combatant. He did all the shooting, and he was also the one most likely to jump from the plane into combat. On a missile. That turned into a motorcycle.
* SWAT Kats: In "Razor's Edge", Razor believes he injured two innocent elderly civilians in a chase and it negatively effects his skills to the point where he chooses to retire from being a vigilante. He sneaks his way into the hospital an attempt at forgiveness from the two. While choosing to give up, the old man says he wouldn't be able to defeat Dark Kat. That caught Razor's attention, since nobody knew that it was Dark Kat who was responsible for the recent attacks. The elderly couple are then revealed to be two much younger criminals Dark Kat hired to pose as victims to mess with the Swat Kats and Razor takes them down.
* SWAT Kats in the form of a slimy tentacle reaching towards him, only for it to cut to the monster battering down the door, having gotten the guy offscreen. Dr. Viper confirms both of them died: "Now that you've had your dinner..."
* SWAT Kats is because of this trope. The fact that the subtitle is "The Radical Squadron" seems to support that (as does the whole series' tone).
* SWAT Kats, is smashed. Everyone else is saved when the SWAT Kats defeat Shard and reverse the effects of his "mineral Midas touch."
* SWAT Kats is the primary force behind the eponymous duo's technology (though T-Bone occasionally demonstrates that he's no slouch at least when it comes to engines), and thus they made military salvage into a working supersonic jet that's armed to the teeth with all kinds of unique missiles. His knowledge has limits, however, demonstrated in the last episode when he despaired over fixing a broken radar jammer.
* SWAT Kats: It's pretty obvious that Deputy Mayor Callie Briggs is the one who really runs Megakat City, which is a good thing considering how incredibly incompetent Mayor Manx is.
* SWAT Kats jumps to mind. Running from 1993 to 1995, It was among the earlier western attempts at breaking the ghetto, and, in spite of the many problems that popped up because of that, the series went on to become a hit and garnered high ratings, and the creators even concluded a Kickstarter campaign to bring the show back.
* SWAT Kats, "Kat's Eye News" reporter Ann Gora sometimes got herself and her camera crew in danger while following the Swat Kats' adventures.
* SWAT Kats. Lieutenant Steel has his eyes set on replacing Commander Feral as leader of The Enforcers. Unlike most examples, Steel is trying to be leader of a heroic organization. Although Steel himself is the least heroic of the Enforcers as he displays all the qualities the Trope Namer has. He is complete suck-up to Feral, even praising his worst ideas, while mocking him behind his back. The moment Feral is out of commission, Steel makes his move, even once abandoning Feral to his fate. And like the Trope Namer, he's a total coward who just want to throw orders. The

moment he's forced into being Feral's co-pilot, he reveals he has no combat training and gets airsick in the jet.
* SWAT Kats. Of course, he puts his hatred aside to team up with the Metallikats in "A Bright and Shiny Future".
* SWAT Kats of damage via gunfire whenever they appear) even after they told him that they know the SWAT Kats' real identities and they will tell him if he lets them go.
* SWAT Kats: Plan Z involves T-Bone cutting the Turbokat's engines in mid-air. Razor hates Plan Z.
* SWAT Kats really seems to apply here, simply wanting to destroy the city for the sake of allowing a criminal wasteland to take its place.
* SWAT Kats right before shredding them to bits with the on-board Gatling (well, laser, but it looks like a Gatling):
* SWAT Kats size after assimilating a lot of technology, then it's creator.
* SWAT Kats SNES game's Madkat level was an amusement park where children had been disappearing, though you only see them in the opening clip and after the boss is beaten. How was he able to get zoning for the tiers of water slides that sometimes drop you off into endless pits? Not that it matters, but you gotta wonder...
* SWAT Kats: Sometimes aircraft-to-aircraft conversations take place via radio or video comm channels, but oftentimes people would just say things, and the SWAT Kats would be able to somehow hear them inside their active supersonic jet. Really, the noise from the Turbokat was just severely played down or outright eliminated in a lot of circumstances, otherwise talking and sound effects would just be blared out by engine noise.
* SWAT Kats so T-Bone would know what not to do maneuver-wise to keep from disrupting it.
* SWAT Kats: T-Bone's answer to Razor asking why he never mentioned to his best friend and fellow Swat Kat that he can't swim.
* SWAT Kats, the Metallikats constantly shrug off most attacks on them. In their debut episode, they were particularly formidable, walking through gunfire and ignoring the Swat Kats' best attacks.
* Swat Kats: The Radical Squadron, this is subverted by Commander Ulysses Feral of Megakat City's Police force, The Enforcers. Feral believes the Swat Kats are lawless vigilantes and should be brought to justice, especially when the Swat Kats T-Bone and Razor are Ex-Enforcers themselves. Also borders on a Downplayed, however, when Commander Feral has reluctantly accepted the Swat Kats help on a few occasions.
* SWAT Kats, there's a scene in the episode "The Giant Bacteria" wherein the title critter gobbles up a farmer and a cow. Both times, it's only shown in shadow (and when the farmer gets nommed, there's the added bonus of the creature's body obscuring the shadow).
* SWAT Kats, the TurboKat performs this attack twice. The first time with buzzsaw missiles while under the control of Hard Drive in "Night of Dark Kat", the second time in "When Strikes Mutilor", to destroy the fighter Mutilor was intending to use to destroy the drive and crash the mothership into the planet's surface.
* SWAT Kats. The villains also tend to be against this, constantly trying to kill the SWAT Kats, Enforcers, and anyone/anything else that gets in the way of their plans.
* SWAT Kats, this is the scene that introduces Lt. Felina Feral, one of the show's supporting characters, in the second season premiere "Mutation City". As she is rescuing Deputy Mayor Callie Briggs, Felina points a laser at the Deputy Mayor - and shoots a man-eating plant that was about to eat Callie.
* SWAT Kats: This phenomenon crops up as the "Missile of the Week" used to deal with the current problem at hand. Lampshaded by Razor in "Unlikely Alloys" upon seeing Zed.
* SWAT Kats to be aired featured a gun developed at the weapons lab with the power to stop earthquakes from space, and then look what's coming along assimilating all the technology it can...
* SWAT Kats Turbo Kat plane has ejector seats for both T-Bone and Razor. The seats

could fly independently for some time, and were shown re-docking with the plane in a few cases.
* SWAT Kats' Turbokat, which is a jet that can go into space if necessary.
* SWAT Kats Villain. Indeed, it would be easier to isolate which ones are not hammy.
* SWAT Kats, what with all the tail-grabbing, coiling and the fact he just about gets off to mutating victims.
* S.W.A.T. line of toys has riot cops with absolutely massive, over-designed weaponry. The tamest is a shotgun as long as its gunner is tall.
* S.W.A.T. loves its mission briefings and prefaces each new mission with one. The game will usually provide voice overs between your officer and their handler regarding the nature of the mission, objectives, threats, and any other potential problems that may arise. That last detail is particularly important, since it often entails things such as the presence of hostages, traps, or important suspects to try and take down non-violently.
* S.W.A.T. movie has one of Jim Street's colleagues in the LAPD armory mention that he converted to Mormonism when he got married. And habitually violates their dietary rules on the job due to a love of fast food.
* S.W.A.T., Officer Jim Street is a former Navy SEAL. He puts his demolition training to good use when the team is delayed by a locked gate.
* SWAT officer Pratt, another corrupt cop (whose crimes included partaking in a firebombing of a building ordered by Loeb and attempting to shoot a cat while searching through the wreckage for Batman) tries to shoot Batman as retaliation for Bats punching him through a wall (which itself was a response to Pratt's attempt to shoot the cat). Not only is Batman wearing body armor, but when Batman comes to, he finds that the Hangman got to Pratt in the meantime.
* S.W.A.T., Officer Street disarms the villain, holding him at gunpoint. (Although the magazine has been removed from the gun, there's still a bullet in the chamber.) Instead of arresting him (or shooting him), Street ejects the bullet from the chamber, drops the gun, and continues fighting hand-to-hand.
* SWAT. Storming Brianna's workplace he tried to kill her. His final plan was to board a bus, at the same bus stop he ran away to as a child to escape his abusive mother only to be ignored by everyone, then upon it filling up kill everyone on board.
* SWAT Team: A paramilitary police unit designed for situations that require better weapons and equipment than usual.
* SWAT Team (They usually also wear a balaclava under the helmet, because identification may lead to threats against them or their family.) Scariest thing on earth.
* S.W.A.T.. (That installment's tutorial even mentions that SWAT functions primarily as a life-saving organisation, not an armed cleanup force.) Getting a civilian killed by provoking a suspect or shooting a civilian dead results in an instant mission failure, while abusing deadly force against suspects (especially without warning) adds penalty points.
* S.W.A.T., the bad guy yells out a reward of one hundred million dollars to the person that frees him as he walks to the police station, setting up the story in the rest of the film.
* S.W.A.T.:: The New Patriots from "Any Second Now" wanted to tear down the corrupt and ineffectual current establishment and build a new one that would not neglect and cast aside people like women, veterans, the handicapped, and African-Americans. After the group's leader was imprisoned for a bombing that ironically killed six innocent people, his brother tried to orchestrate his release by taking a radio station hostage, which brought him into conflict with S.W.A.T.
* Swatting often at the expense of both the victims and the SWAT Officers involved (as it amounts to wasting resources and assets). Since the SWAT are trained to engage armed suspects this squares firmly to this trope (especially for livestreamers).
* S.W.A.T. where Hondo tells Chris Sanchez that when she goes for a headshot on a target, she needs to aim for the "vermilion line", i.e. shoot for the center of the

face and not the forehead.
* S.W.A.T. with two tours in Vietnam (in addition to four teaching combat survival) as a way of establishing his badass cred.
* sway. Yes, including himself. He plans to either kill himself or let the Watchdogs kill him once the rest of Inhumanity has been wiped out.
* SWC likes this one; there's also Jerri's plaintive "Isn't that not what you don't want me not to do?" to her dead father, and the "moral" of the illiteracy episode: "Maybe it's time to stop not doing what you pretended you can do and can't, and start doing the thing that you can't do, but can no longer pretend that you can."
* swear up a storm at the drop of a hat. Around Thanksgiving, the owner had guests coming and hatched a plan. The next time the parrot started cursing, he grabbed it by the neck and tossed it into the freezer. Muffled cussing came out of the freezer for a couple minutes, then suddenly absolute silence. The owner was worried and opened the door. The parrot very meekly walked out and quietly asked, "What did the turkey do?"
* Swear Word Plot: A child character accidentally learns a swear word, only to learn that it's not nice to swear.
* Swear Word Plot: Characters start swearing excessively and get in trouble for it.
* Swear words. Many fan translations add swear words or innuendos that weren't there to make it sound more "Adult". Part of this may also be unintentional.
* Sweary She Ra: Every single character swears profusely...except Bow, who uses replacement words.
* Sweat Drop: The anime reaction of a giant bead of sweat rolling down someone's face.
* Sweat Drop: The exaggerated version of this is practically discredited outside comedy; most shows nowadays use much smaller, more modest sweatdrops instead.
* Sweater Girl, "I Said No" involves a woman debating whether she should give in to a man on her doorstep.
* Sweater Girl style or not. With or without shoulder pads. With or without a bra underneath.
* Sweater Girl: Tight sweaters (often white) were a common item in ladies' fashion during the decade, as a way of emphasizing the bust (especially if worn over a bullet bra) without showing any skin.
* Sweat: if the face isn't sweating but everything else is, it's a mask (how a policeman at the airport recognized a masked accomplice of Diabolik: the accomplice was so nervous his shirt was covered in sweat but the face was clean, and once Ginko gave the alarm he knew who to face check);
* Sweden’s Änglagård play a pastiche of early 70s prog rock that is surprisingly convincing, thanks in part to an almost slavish use of vintage 1970s musical instruments.
* Sweden (5'11.6) and Finland (5'7) are both men, with Sweden being much taller (
* Sweden also has three (a local production with dubbed American bits in 1981, Open Sesame in 1996 - which retained the original Swedish voices of Grover and Cookie Monster, and more recent dubs of several American spin-offs, which have the second dub's Ernie and Bert).
* Sweden, being one of the last countries in the world to practice universal conscription even in peacetime, has a rich
* Sweden could be interpreted as either "Finn-sexual" towards Finland or
* Sweden had a 25-year statute of limitations on murder up until July 2010. It was removed a mere eight months before they would've been forced to drop the investigation of the murder of Prime Minister Olof Palme back in 1986 had it not been removed.
* Sweden has a very long tradition of turning humor comic strips and comic books into live-action movies, with the 1940s and 1950s being the golden age. Swedish comics that have been made into live-action movies more than once include
* Sweden has been criticized for being ultimate. This is not quite true - the law recognizes dismissal on the grounds of harassing your co-workers or gross misconduct - but we're talking really bad stuff here, like endangering other people. It is doubtful whether you can be fired for slacking around. If the

employee in question is friends with the worker's union, most employers find it easier to buy them off, as they (the employers) will face lawsuits or strikes otherwise. Oh, and even when doing layoffs, you don't get to decide who stays and who has to go. The law says that the employee hired last has to be fired first. All this goes only for salaried workers, while temps and hourlies can be more easily laid off. And then the unions wonder why employers tend to avoid employing on a monthly basis whenever possible.
* Sweden has prices ending in many different decimals, but the most common one is X.90 SEK, but as of 30 September 2010 the centismal subdivision of SEK, öre, is only legal tender on cards, if you pay with cash the price will always be rounded.
* Sweden has women in all infantry branches except its naval commandos.
* Sweden recently updated their banknotes with new motifs, and the theme that was chosen was "Swedish Artists of the 20th Century". The artists chosen were children's author
* Sweden reluctantly allows Sister Finland to all but coerce him into a sexual relationship with her in a desperate attempt to hide his homosexual tendencies early on. This was probably the one silver lining he could find in this situation; otherwise he'd probably have gone along with it anyway because
* Sweden was among the first major powers to try and fail a full-scale invasion of Russia, led by Charles XII during the winter of 1708-09. Russia's decisive victory was however in Poltava, during the following summer, and made Russia a full-fledged empire.
* Sweden was the first country in the world to implement a government branch for film censorship. It was called "Statens biografbyrå" ("The state cinema bureau") and was founded in 1911. The bureau mainly focused on violence, banning and censoring material it found "skadligt upphetsande" ("dangerously exciting".) When home video arrived in the 1980's, censorship was extended to include them also, although many films ended up slipping through the rain. Censorship was severely relaxed in the 90's, with 1992 being the year that the wall broke, thanks to
* Swedes and Finns round up the European four, with the Finns being notorious for never winning an Olympic gold in their whole history, but still being regarded as good players.
* Swedes are quite happy to remake both British and American shows now and then, despite the fact that subtitles are the norm and American and British shows popular. Examples include:
* Swedes like to attribute these mistakes to the fictional "Tryckfelsnisse" (printing error elf) entity.
* Swedish actor Mikael Nyqvist plays the Russian mob boss Viggo Tarasov in
* Swedish actress Helena Mattsson was cast as a Russian gold-digger on
* Swedish and Geatish Vikings, actually. The battle was between king Adils of Götaland and king Onela of Svealand.
* Swedish author Liza Marklund published two novels about a woman abused, beaten, and threatened by her Muslim boyfriend, subtitling them "true stories" and opening the books with a statement that only names and places had been changed, the rest were all fact. Like Dan Brown, she then proceeded to make this claim in countless interviews and articles and used the books as evidence in political debates. Then in late 2008, a woman named Monica Antonsson published a book pointing out the enormous factual errors in the book (for instance, the boyfriend wasn't actually a Muslim), proving that the book was almost entirely fiction. Marklund then stated that the book was never meant to be taken as
* Swedish cartoonist Jan Romare is very fond of this trope, using it often in Pyton (Python) and Himlens änglar (The Angels of Heaven) with the most common form being characters interacting with the panel borders (hiding outside them, running into them, getting things stuck in them, eating them...)
* Swedish climate change activist Greta Thunberg is even more sensible than most well-known world leaders, as she tears into them for not doing anything about climate change. They call her a realist for a reason.

* Swedish comedian and actor Lasse Eriksson died on stage on March 3rd, 2011. At the end of his last performance, he collapsed and was brought to the nearest hospital, less than a mile away, where he was pronounced dead on arrival.
* Swedish comedian Johan Glans had a bit about when faced with a problem, there are two kinds of people; the ones who rise to the challenge and the ones who prefer to go away and lie down in the fetal position and hope the problem goes away on its own. He confessed to belonging to the latter category.
* Swedish comedian Johan Glans has mentioned wanting to find out where a couple of Jehovah's Witnesses live, knocking on their door and saying: "Hi! I'm from the Ordinary People."
* Swedish comedy duo Hasse Alfredson and Tage Danielsson always included an improv routine in their stage shows, where Tage would read a random headline from the newspaper and introduce Hasse as [first name] Lindeman, an expert in that particular field.
* Swedish comedy group Galenskaparna has a routine in which a man's brain gets so tired of the man never using it, that it escapes and tries to make a new life for itself. ("Does anyone want a brain? Practically unused, only one previous owner!")
* Swedish comics writer/artist Jan Berglin once drew a comic about why Sweden never gets to host the Olympics, with a lobbyist trying to bribe an official with a box containing a crystal vase and a painted wooden Dala horse. The official rightly assumes it's a badly thought-out prank.
* Swedish crime writer Mons Kallentoft pulls this trick in his series about detective inspector Malin Fors. In
* Swedish death metal pioneers Unleashed are noted for their use of Viking/Norse imagery in contrast to the more gore-oriented themes of many of their contemporaries. They even write songs based upon
* Swedish (Egmont, then Bonnier Carlsen). The Bonnier Carlsen translation changed most of the character names, except for Mr. Krupp and the kids.
* Swedish Fish was invented by Swedish company Malaco, but was just one of many types of candy they did at the time, and isn't common in Sweden. However, it really took off in North America, and as such, American tourists in Sweden so commonly expect to find it there that it's widely imported.
* Swedish ice hockey forward Lias Andersson threw his silver medal at the crowd after his team lost the 2018 World Junior Ice Hockey Championship Final to Canada.
* Swedish industrial metal band Raubtier: "Låt napalmen regna ner!" (Let the napalm rain down!)
* Swedish keyboardist Bo Hansson jumped on the Tolkien bandwagon as early as 1973 with his instrumental album
* Swedish kids had a trend during the nineties with jokes that ended with a completely pointless and irrelevant observation as the punchline. Example: "Two moose were out flying. Suddenly one says, 'Wait, we can't fly!' The other replies, 'Don't worry, my uncle works as an accountant in Texas.'"
* Swedish king Erik Eriksson, who reigned in the mid-13th century, and is widely regarded both by modern and contemporary sources to have been a very good king, and whose reign was marked by peace, law reform and prosperity, never managed to live down his birth defects, and went to history as Erik the Lisp and Lame.
* Swedish Kronor's equivalent of a cent, the öre, was so rarely used that its coins were all phased out, with only the 50 öre piece remaining by the 2000s, until it finally stopped being legal tender in September 2010. However, most things in Sweden cost at least 10 kronor, and tend to not include any ore in the prices anyway.
* Swedish musician and comedian Povel Ramel mentions in his memoirs how he once did this kind of shopping on Christmas Eve in the only store he found that was still open - a
* Swedish pirate folk band Ye Banished Privateers currently has a lineup of 24 official members, according to their Wikipedia page, though only about a dozen go on tour at a time (which is still pretty impressive on its own).
* Swedish revue actor and song writer usually used pre-existing foreign songs with his own Swedish-language lyrics. Because of how very popular he was, his new

Swedish versions of foreign tunes almost always became more well-known and popular than the originals. While Karl Gerhard did have some skill as a music composer, his enormous talent for clever lyrics made it more convenient to simply cover somebody else's song and put all his energy on the text, where his true skills lay. A few examples, from a career that produced hundreds:
* Swedish rocker Eddie Meduza. He was known for his "party hard" lifestyle, which spiraled into full-blown alcoholism in the '80s. Eventually he cleaned up his act in the '90s after doctors told him he would die if he had another drink. Unfortunately he couldn't keep it up and relapsed, which led to his death in 2002. Many of his later songs sarcastically "praise" the "joys" of being drunk all the time.
* Swedish volunteers fought against the Soviets in Finland during the Winter War. The most famous such unit is probably
* Swedish writer Bengt af Klintberg wrote a book about common Swedish urban legends called
* Swedish writer Elisabet Nemert has a reconstructed example in her novel "Ödets hav". Aurora, the story's female protagonist, is forced into marriage with her uncle's friend's son, but it turns out
* Swedish writer Simona Ahrnstedt gives us three villains in her debut novel
* Sweeney has an epic one (upwards of 20 seconds) at the end of the quartet of
* Sweeney is Lucy-sexual. He escapes from prison to find her again and, upon learning she drank poison, sets about killing Judge Turpin to avenge her memory.
* Sweeney loves Lucy. So does the Judge. Mrs. Lovett loves Sweeney, who is indifferent to her. The Judge loves Johanna. Anthony loves Johanna, who loves him back. After that, things get a little confusing.
* Sweeney's plan to get Johanna back involves murdering Anthony, being Sweeney's morality pet is not the best way to stay alive
* Sweeney Todd, a pseudonymously written penny dreadful serial, is hated by a dog belonging to one of his victims. This actually forms a key part of the plot.
* Sweeney Todd) between a couple of flat characters, but other than that it's a revenge story between a mass murderer and the monster who wronged him.
* Sweeney Todd. Both are madwomen, but have entirely different ways of expressing their issues.
* Sweeney Todd, consistently has a sick sense of humor, and their duet "Little Priest" embodies this trope, as they gleefully sing about all of the people they plan to make into pies.
* Sweeney Todd fits her or not is open to interpretation, and almost all adaptations end up subverting it.
* Sweeney Todd. Homer falls in Moe's microbrewery still and the beer gets infused with his blood. Moe serves the pink brew to Marge, which reminds her of her husband for some reason. Moe keeps the truth secret in an attempt to get Marge all to himself.
* Sweeney Todd, in order to inform Sweeney of his plans to elope with Johanna, bombing both that plan and Sweeney's plan to kill Turpin straight to hell and making everything worse.
* Sweeney Todd in the musical. His original incarnation in penny dreadfuls was a lot less sympathetic.
* Sweeney Todd mythos has the dog of one of the victims repeatedly lead people to and then make menacing noises at Sweeney's barber shop. The heroes don't especially take the hint.
* Sweeney Todd, published in the 1840s. In that version, Todd did in his customers by opening a trapdoor under the chair and only employed this trope if the fall into the cellar didn't kill them outright.
* Sweeney Todd resulting from the death of his mother) has, shall we say, issues with his sexuality.
* Sweeney Todd. She's consistently portrayed as being very attractive. Preskett Prest, author of the original book, in particular waxes lyrical about how captivating she is to the men that visit her shop and most adaptations go with that and make her very flirty but Sweeney is largely immune to her charms or incapable

of having a real relationship with her. Or else he mercilessly uses her as a pawn in his plotting...
* Sweeney Todd's studio, Todd is startled to see that the hand of Pirelli is sticking out from the chest he stuffed his body in.
* Sweeney Todd's victims tend to end up as meat pies at Mrs. Lovett's pieshop.
* Sweeney Todd that include her, but especially the original penny-dreadful.
* Sweeney Todd: The Demon Barber of Fleet Street about Lucy poisoning herself, she became insane rather than dying.
* Sweeney Todd: The Demon Barber of Fleet Street about what different people taste like.
* Sweeney Todd: The Demon Barber of Fleet Street, a frequently-cut part of "The Contest" has Sweeney Todd and Pirelli competing to pull someone's tooth the quickest. Todd pulls another quick win while the show-off Pirelli struggles to extract a tooth from his stooge Tobias, who moans throughout the procedure he doesn't really need.
* Sweeney Todd: The Demon Barber of Fleet Street all center around the idea of two people using human meat to fuel a successful meat-pie business. When Mrs. Lovett used animal or other miscellaneous meat, her business failed; only when Todd and she began using fresh flesh did she become successful.
* Sweeney Todd: The Demon Barber of Fleet Street. A lot of the humor of the second half of the musical, actually.
* Sweeney Todd: The Demon Barber of Fleet Street also had actors and actresses playing their own instruments (including, notably, Patti LuPone on tuba.}
* Sweeney Todd: The Demon Barber of Fleet Street also qualifies, but she suspects Mrs. Lovett and tries to warn Todd.
* Sweeney Todd: The Demon Barber of Fleet Street, and he decides he's going to marry her, much to Johanna's horror.
* Sweeney Todd: The Demon Barber of Fleet Street and holds Lucy one last time, before accepting death.
* Sweeney Todd: The Demon Barber of Fleet Street. And that's not even mentioning what he did to her father, Benjamin Barker, for the sake of trying to claim her mother for himself.
* Sweeney Todd: The Demon Barber of Fleet Street, Anthony falls in love with Johanna in this way.
* Sweeney Todd: The Demon Barber of Fleet Street are deliberate throwbacks, in shows set in a period when it was a live trope.
* Sweeney Todd: The Demon Barber of Fleet Street, as Head was supposed to be one of the singing narrators before the sections were all cut.
* Sweeney Todd: The Demon Barber of Fleet Street: Benjamin Barker was sent to Botany Bay in Australia on false charges because the judge who sentenced him wanted his wife for himself. He escaped and returned to London under a new name: Sweeney Todd.
* Sweeney Todd: The Demon Barber of Fleet Street, both the DreamWorks and Warner Bros. logos have desaturated colors to match the look of the film proper.
* Sweeney Todd: The Demon Barber of Fleet Street, but hey, at least he's not trying to rape her, shut her in an asylum or lock her up in one room for the rest of her life.
* Sweeney Todd: The Demon Barber of Fleet Street comedic variety — Pirelli's still-twitching hand is sticking out of the chest, but Todd is able to buy time by promising Pirelli's mentally-challenged ward, Toby, a bottle of gin.
* Sweeney Todd: The Demon Barber of Fleet Street contains the following discussion of what to do with a dead body. Note that the script manages to use "if you get it" as a non-sexual double-entendre:
* Sweeney Todd: The Demon Barber of Fleet Street definitely fits the trope. Polluted streets and alleys, sewers with steam coming from them, dirty houses and dirtier rooms. The city is full of evil and corrupted people, including rapists, child abusers, serial killers turning people into meat, and so on and so forth. It's all visually very dark, as is usual in Tim Burton's works.
* Sweeney Todd: The Demon Barber of Fleet Street, digital desaturation of the color

blue makes the blood stand out more.
* Sweeney Todd: The Demon Barber of Fleet Street dropped a lot of the scare chords from the stage version, but left in the overpowering Scare Chord when the Beggar Woman is wandering in the shop - and Sweeney suddenly appears in the doorway, silhouetted.
* Sweeney Todd: The Demon Barber of Fleet Street, "Epiphany," devoted to the worthlessness of the human race and how we all deserve to die. From which point on he cuts a bloody swath in accordance with those precepts. Accompanied by dramatic chorus about moralizers and hypocrites.
* Sweeney Todd: The Demon Barber of Fleet Street example above, he escapes from prison and returns to get his revenge on the judge.
* Sweeney Todd: The Demon Barber of Fleet Street finds a severed finger baked into one of Mrs. Lovett's Meat Pies.
* Sweeney Todd: The Demon Barber of Fleet Street fits the trope as well.
* Sweeney Todd: The Demon Barber of Fleet Street follows the Christopher Bond version of the Demon Barber, giving him realistic motives instead of just being a one-dimensional bad guy.
* Sweeney Todd: The Demon Barber of Fleet Street for her pie-making business.
* Sweeney Todd: The Demon Barber of Fleet Street for Johanna's current plight.)
* Sweeney Todd: The Demon Barber of Fleet Street gets involuntarily committed to Fogg's Asylum after her plan to elope with Anthony Hope gets discovered by her guardian Judge Turpin. Turpin wanted to marry Johanna himself, but learns of her elopement plans due to a tragically foolish act by Anthony which also spoils Sweeney Todd's plot to kill Turpin. She is markedly affected by the experience but is eventually rescued by Anthony, with Johanna herself shooting the asylum keeper in the play.
* Sweeney Todd: The Demon Barber of Fleet Street gets this courtesy of the Beadle on orders from Judge Turpin for "gandering" at his ward.
* Sweeney Todd: The Demon Barber of Fleet Street has blood raining in the opening.
* Sweeney Todd: The Demon Barber of Fleet Street, however, has gone completely and incurably insane.
* Sweeney Todd: The Demon Barber of Fleet Street in order to inform Sweeney that he has found Johanna and that she has agreed to the plan. Needless to say, this ends up blowing both the aforementioned plan and Sweeney's attempt to kill Turpin straight to hell.
* Sweeney Todd: The Demon Barber of Fleet Street. In probably his only courtroom scene, he sentences an 8-year-old boy to death.
* Sweeney Todd: The Demon Barber of Fleet Street is about a barber who seeks revenge against the corrupt judge who sent him away for fifteen years on a false charge and then raped his wife Lucy. Though his primary target is Judge Turpin and the Beadle because of their role in what happened to her, he ends up killing a lot more people along the way.
* Sweeney Todd: The Demon Barber of Fleet Street is about a man who wants revenge for his false imprisonment at the hands of a corrupt judge and his Beadle so that they could have his wife for themselves. He does eventually get his revenge, but not before killing a lot of other people.
* Sweeney Todd: The Demon Barber of Fleet Street: It is said of Sweeney that he seldom laughed but often smiled.
* Sweeney Todd: The Demon Barber of Fleet Street: Lucy and Johanna, whom the Judge goes psycho over. Sweeney himself as a youth was so beautiful that Mrs. Lovett is willing to become his grisly accomplice out of the memory of his beauty.
* Sweeney Todd: The Demon Barber of Fleet Street, Lucy Barker, the wife of the title character, is lured to the house of Judge Turpin by Beadle Bamford, who tells her that the Judge is remorseful about what he did to her husband and wants to see her at his mansion. Unknown to Lucy, the Judge has thrown a wild masked ball at the mansion that is well underway when Lucy arrives. Lucy, confused and disoriented by the sights and sounds of the party and from the number of drinks she has at the place, winds up in the hands of Judge Turpin himself, who is anything but remorseful and has used this party as a means to trap and rape her:

* Sweeney Todd: The Demon Barber of Fleet Street made him an actual pre-pubescent boy, a method that is much harder to pull off on-stage, mostly because labor laws require underage performers to be doubled.
* Sweeney Todd: The Demon Barber of Fleet Street Mangst personified is when he's killing people, or thinking about killing them.
* Sweeney Todd: The Demon Barber of Fleet Street. Mrs. Lovett looks like a female Cesare, too.
* Sweeney Todd: The Demon Barber of Fleet Street. Mrs. Lovett seems to have a soft spot for Toby and treats him as a son, but when he confides in her he suspects Sweeney Todd is up to something awful, she locks him in the basement and plans to have Todd kill him later.
* Sweeney Todd: The Demon Barber of Fleet Street, Mrs. Lovett's entire scene for "By The Sea".
* Sweeney Todd: The Demon Barber of Fleet Street of how to dispose of the body of the man he just killed.
* Sweeney Todd: The Demon Barber of Fleet Street, once Mrs. Lovett's pie shop starts doing business again, the Beggar Woman starts hanging around the shop, trying to warn people that something evil's afoot, pointing out the stench from her chimneys and claiming that Mrs. Lovett is a witch. Naturally, no one believes her because she's a mad beggar woman.
* Sweeney Todd: The Demon Barber of Fleet Street outfits and stroll along a sunny beach.
* Sweeney Todd: The Demon Barber of Fleet Street Pirelli suffers a similar fate, Judge Turpin narrowly avoids it in the first act when Anthony bursts in, and Mrs. Lovett gets hers near the end.
* Sweeney Todd: The Demon Barber of Fleet Street plan for Sweeney's daughter Johanna, which doesn't work because Johanna hates him and has eyes for young sailor Anthony Hope.
* Sweeney Todd: The Demon Barber of Fleet Street rating. It has been reinstated, however, in most modern productions (including the 2005 Broadway revival, the Barcelona production, the concert versions, the 2012 London revival, the 2017 Off-Broadway revival, and many more). Additionally, "Parlour Songs" is abridged in most productions (usually leaving out "Tower of Bray"), an additional Contest segment (The Toothpulling Contest) is almost always cut, and "The Beggar Woman's Lullaby", added for the original London production, is sometimes cut as well.
* Sweeney Todd: The Demon Barber of Fleet Street, resulting in magical size-changing breasts over the course of the movie.
* Sweeney Todd: The Demon Barber of Fleet Street scene takes place, wear animal masks. It's exactly as nightmarish as it sounds.
* Sweeney Todd: The Demon Barber of Fleet Street: Sweeney Todd and his razors, as demonstrated in the song "My Friends" — just about the only Companion Cube trait they don't have is individual names.
* Sweeney Todd: The Demon Barber of Fleet Street Sweeney Todd and Mrs Lovett get one during the song "A Little Priest".
* Sweeney Todd: The Demon Barber of Fleet Street that brings about the tragedy of the play.
* Sweeney Todd: The Demon Barber of Fleet Street: The number "A Little Priest" is a wickedly funny string of allusions to personalities and flavors as the title character and Mrs. Lovett figure out how they'll dispose of Pirelli's body and make a tidy profit out of future customers, at the expense of the rival pie shop across the way.
* Sweeney Todd: The Demon Barber of Fleet Street, the razor soon developed a reputation as a murder weapon.
* Sweeney Todd: The Demon Barber of Fleet Street: "These are my friends, see how they glisten..."
* Sweeney Todd: The Demon Barber of Fleet Street, the Squick is invited right back to the party near the end when she says "And every now and then, you can do the guest in."
* Sweeney Todd: The Demon Barber of Fleet Street, the story of Lucy Barker's rape

is shown onstage as Mrs. Lovett sings about it.
* Sweeney Todd: The Demon Barber of Fleet Street. The wicked Judge Turpin is a bass.
* Sweeney Todd: The Demon Barber of Fleet Street, this happened to Benjamin Barker, the man who would become Sweeney, who was transported for life fifteen years ago because the corrupt Judge Turpin wanted his wife Lucy for himself.
* Sweeney Todd: The Demon Barber of Fleet Street, though the end is not very funny.
* Sweeney Todd: The Demon Barber of Fleet Street was funny enough, and the unrealistic geysers of blood just made it sillier.
* Sweeney Todd: The Demon Barber of Fleet Street was still in force at the time may explain some of it. He's still far from sympathetic.
* Sweeney Todd: The Demon Barber of Fleet Street, when Judge Turpin first comes to Todd for a shave, he mentions that he is marrying his ward (unaware that she is actually Todd's daughter), and comments that she's "pretty as a rosebud." "Pretty as her mother?" Todd adds, but covers with, "No, nothing," when the judge asks what he said.
* Sweeney Todd: The Demon Barber of Fleet Street, when Sweeney Todd suddenly reappears in his shop to confront the Beggar Woman for the last time.
* Sweeney Todd: The Demon Barber of Fleet Street: When Todd first enters Ms. Lovett's business she sings a whole song that works as a terrible slogan: "The Worst Pies in London".
* Sweeney Todd: The Demon Barber of Fleet Street, where Sweeney is shaving Judge Turpin while singing about their tastes in "Pretty Women". Turpin believes he may have found a friend in Todd, but Todd is just trying to get the Judge's guard down so he can kill him for raping Todd's wife.
* Sweeney Todd: The Demon Barber of Fleet Street, which turned out to be, in Sweeney's words, "an arrant fraud, concocted of piss and ink."
* Sweeney Todd: The Demon Barber of Fleet Street, while it's actually the other way round.
* Sweeney Todd: The Demon Barber of Fleet Street: While she's not his biological daughter, Judge Turpin wanting to marry his adopted daughter Johanna (with all that entails) certainly qualifies. Turpin also had a serious lust toward Johanna's mother, Sweeney's wife, which set the entire plot in motion with the awful things he did in pursuit of it.
* Sweeney Todd: The Demon Barber of Fleet Street who thought a blonde wig would look odd on a clearly Asian actress steered around the problem of Johanna's frequently invoked blonde hair by simply changing all references to her "yellow hair" to "raven hair" and removed the Wigmaker's Song (which lists several different shades of blondness, so Anthony will know how to refer to Johanna's particular hue) entirely.
* Sweeney Todd: The Demon Barber of Fleet Street. Yes, this is every bit as creepy as it sounds.
* Sweeney Todd, the titular character and judge Turpin stand for the bulk of hatefulness, while Anthony Hope and Joanna are the only good characters in the story.
* Sweep fandoms fed into each other, since they were both YA series about teenage witches coming out around the same time. There were many GeoCities sites dedicated to both.
* Sweeping Ashes: A cartoon character gets turned to ash, swept up, but revives themselves.
* Sweeping Changes: A man's 4 vacuum cleaners start to attack him when they hear he intends to replace him with a robot vacuum.
* sweeps 2007 hostage crisis storyline by showing the end result first (an explosion caused by a bomb) in the pre-opening credits teaser and then going back to where things had left off during the previous episode to show the events that set it in motion after the opening credits. In fact, the explosion depicted at the beginning of the episode did not happen for another 15 episodes after the first in which it was depicted. Each of those episodes opened with the explosion, albeit from a differing perspective.

* Sweeps Week Lesbian Kiss: Ads promoting the work show two women kissing, even though they're not lesbians.
* Sweeps Week Lesbian Kiss), and far more extreme or daring things on non-network television, the trope is clearly becoming this.
* Sweeps Week Lesbian Kiss: In case you're wondering, just because you're a lesbian doesn't mean you can't be objectified.
* Sweeps Week Lesbian Kiss: Promoting a same-sex kiss as a Ratings Stunt, regardless of context.
* Sweeps Week Lesbian Kiss: Two women kiss, it attributes nothing to the plot or conflict, and neither women questions their sexuality or mention the kiss again afterwards.
* sweep under the rug the fact that different cultures don't all view their cryptids in the same way.
* Sweet Adeline was billed as "A Musical Romance of the Gay Nineties."
* Sweet and Elite", Rarity christens an airship, which is made up of a conventional-looking boat suspended from a fish-shaped balloon.
* "Sweet and Elite" She suffers a lot of guilt over the course of the episode, and networking among the upper class is arguably very important to her career as a fashion designer.
* Sweet and Elite" when she burdens the poor busboy with a truly ridiculous amount of luggage and he is seen collapsing under the weight of all her bags twice.
* Sweet and Elite, which tracks Rarity's rise in the Canterlot social hierarchy.
* Sweet and Lowdown, about a (non-existent) jazz guitarist Emmett Ray.
* Sweet and Sour Grapes: A character gives up on trying to achieve a goal, and then later receives something that is much more rewarding than what they were originally after.
* Sweet and Sour Grapes hangs a lampshade on this trope, with Silas (a ghost) surprised to see how well the ruins of his old home have held up.
* Sweet, a notorious bank robber and murderer who retains his sweet tooth even after becoming a vampire.
* "Sweet Babboo", Sally's puppy love nickname for Linus. Linus is not amused.
* Sweet Baker: Character with goodly qualities associated with food, such as sweet temper.
* Sweet Bee and Flutterina, who possess more insectoid honey bee and butterfly wings respectively, while maintaining lovely human bodies. On the villainous Horde's side is Vultak, their zookeeper, who takes a more avian approach to his design.
* Sweet Blue Flowers: Akira had never had a crush on anyone before dating Fumi, and in the end, she is never shown ever being attracted to anyone else.
* Sweet Blue Flowers concentrates mostly on the lead characters, with the relationship between Fumi and Yasuko taking central stage. This leads to it having more focus than the original manga, since Shimura loves to introduce loads of extraneous characters with their own back stories.
* Sweet Blue Flowers: From a rather embarrassing memory that Fumi has from kindergarten. Akira came to the rescue.
* Sweet Blue Flowers love to show their friendship by pummeling each other with pillows from time to time.
* Sweet Blue Flowers might be asexual. This leads to complications with her lesbian love interest, as she's unsure if she likes her back, but the manga's ending shows them still together in the future.
* Sweet Blue Flowers, there's this whole deal with Fumi's confession to Akira. Since the relationship between the girls is central to the story, this arc is stalled immensely, mostly by having a confused Akira run around in circles.
* Sweet Blue Flowers, who Fumi sees as having the ideal happy lesbian relationship.
* Sweet Bro and Hella Jeff), and made clear that Gamzee was especially sad about losing Tavros more than anyone else.
* Sweet Bro and Hella Jeff and remains immensely popular with the fans of its own accord.
* Sweet Bro and Hella Jeff, deliberately releasing all holiday-specific comics on

the wrong day. For example, the Christmas comic going up on May 1, the Halloween comic on December 26... and even a comic that had as a punchline "It's Tuesday, you fat nasty trash!" came out on Monday.
* Sweet Bro and Hella Jeff does this in one comic. The exchange goes something like this:
* Sweet Bro and Hella Jeff Geromy is introduced, he's too smart to get involved in that nonsense—so he stands around doing absolutely nothing for the rest of the comic. In the print edition, Dave's author's notes even acknowledge this:
* Sweet Bro and Hella Jeff misspelling. In other instances, the trolls say "oh my god" instead.
* Sweet Bro and Hella Jeff. One of the strips introduces "the new friend Geromy", who is immediately (literally—the comic he first appears in doesn't involve him at all) shoved into the background to do nothing except stand around while the title characters goof off. He doesn't even get one single line of dialogue.
* Sweet Bro and Hella Jeff riffs on the trope's use in American football.
* Sweet Bro and Hella Jeff, Sweet Bro notices that Hella Jeff is "PRAYING WRONG", because he's holding his hands too far apart. For the rest of the comic, Sweet Bro struggles to force his friend's hands into the correct position, with no success.
* Sweet Bro and Hella Jeff the spelling goofs to the point of complete unintelligibility.
* Sweet Bro and Hella Jeff universe, where characters reference SBAHJ all too often.
* Sweet Bro and Hella Jeff (which is an almost indecipherable bunch of lines), but something of an upgrade in Calliope's beautiful art style.
* Sweet Charity (1969): "My Personal Property", "It's a Nice Face" and a new title song.
* Sweet Charity. Although all signs point to the contrary, Oscar winds up leaving Charity.
* Sweet Charity, Charity and Oscar meet by getting trapped in an elevator together.
* Sweet Charity. It was supposedly founded at the urging of a mysterious Voice:
* Sweet Cider later comes to suspect that that statement might be a lie, or at least a half-truth.
* Sweet Cider's Shikai, Kizuna (Bonds); described as less a sword and more like a gigantic slab of pure bronze that was hammered into the rough shape of a blade
* Sweet Country, a black farmhand, Sam Kelly, goes on the run after killing a white land-owner in self-defense. Eventually he is arrested and goes to trial, where the court finds that his actions were justified and he is acquitted of all charges. The judge also orders a police escort to accompany Sam and his family out of town in case any of the locals decide to express their displeasure at the verdict. Once they're safely out of town, the police escort turns for home, and the family just have time for a heartwarming moment before Sam is shot by the dead landowner's neighbor, who was angry enough about what he sees as a miscarriage of justice to follow them out of town and wait for the police escort to leave.
* Sweet Dee herself is shown to have severe mental issues, much like her brother Dennis who was diagnosed with Borderline Personality Disorder, to the point where she was institutionalized in college for
* Sweet Dreams all exhibit this trope whilst in their transformed state.
* Sweet Dreams is a large, fluffy Saint Bernard who transforms alongside her owner and is able to carry her around on her back while in her magical, transformed state.
* Sweet Dreams sports a prosthetic arm, similar to real-world pincer handed ones.
* Sweet Enchantments: In Emeril's route, a visit to a bookstore in the magician world turns up a "mundane" section, which is about reimagining society without magic.
* Sweet Enchantments, the heroine learns that Zain and Roman had a bet running on whether or not she'd lose her patience and punch Runa. Roman bet that the heroine is "too virtuous" to resort to violence, though the heroine counters that she's simply not dumb enough to punch a magician.
* Sweet Enchantments: Waitress Runa Amberthorne, cafe owner Liora Skyheart, and

hostess Emeril Everbloom.
* "Sweetest Thing". The "love's the sweetest thing" parts and even the "blue-eyed boy and this brown-eyed girl" part are rather offset by the "I'm losing you" and the song generally being about how the singer always screws everything up.
* SweetFreak by Sophie McKenzie is about a teenager who has been framed for cyberbullying. Though she protests her innocence, the evidence against her is so strong that even her own mother won't believe her, resulting in a string of unjust punishments both at home and at school. Eventually, however, her name is cleared and she is able to start rebuilding her life.
* Sweet Fuse: At Your Side as the manager of an amusement park, with the player assuming the role of Saki Inafune, Keiji's (fictional) niece.
* Sweet Fuse: At Your Side, can be this when paired with the hulking escort, Mitarashi, or the tallest character, fortune teller Urabe.
* Sweet Fuse: At Your Side of discussion about video game tropes, especially in scenes featuring Meoshi, a video game otaku.
* Sweet Fuse: At Your Side, Shidou pulls on Saki's cheeks to see her smile.
* Sweet Fuse: At Your Side to keep Saki safe... even if it means bargaining with Count Hogstein, keeping Saki locked up for the final three days of games, forcing the rest of their companions to unwittingly kill him and putting everyone else's live in danger, including the lives of their friends and Saki's uncle.
* Sweet Gem Berry, it's said that they are "by far the sweetest thing you've ever smelled", they're inedible, but they sell for the highest price.
* Sweetgrass Voice, who is far more malevolent than the innocent but powerful Shadowchild.
* Sweet Guilty Love Bites, "Guilty Love", the single mom Nina starts going out with her daughter Ryuna's preschool teacher Mayu. Ryuna is quite happy with the arrangement, however.
* Sweet has a lengthy screaming birth. Dog births are usually much easier and less painful than human births.
* Sweetheart and Speckles. Needless to say, understandably so, she was rather unwilling to take on these responsibilities but, with her younger cousins, she seems not to mind. However, this is because Madgie is a wanted fugitive, while said little cousins are not.
* Sweetheart Roland" deserves a special mention, as the heroine's prince is bewitched into forgetting her, and she breaks the spell by singing to him.
* Sweetheart Roland. He proposes to her when she becomes human again, but she's still in love with the titular Roland; nevertheless, the shepherd continues to let her live with him until she eventually wins Roland back.
* Sweetheart Sipping: A classic romantic date where the couple share a milkshake with two straws.
* Sweet Home Alabama," and the ending changed to have the couple playfully handcuffed together and escorted into the bar by their sheriff friend.
* Sweet Home Alabama does it with States instead of Nations. Alabama vs. New York (which, granted, are about as different as different countries to some people).
* Sweet Home Alabama of the Bland Perfection type. He's the most eligible bachelor in New York, he donates money to charity, he's hoping to become President of the United States someday, he sends his girlfriend roses for no reason...and when he gets dumped at the altar he takes it in stride and just wanders off. Given the numerous flaws her true love interest displays, it's easy to question her choice.
* Sweet Home Alabama. The consensus is that they aren't quite great, but could have added a little to the movie.
* Sweet Home Alabama, the protagonist's gay friend from NY and gay friend in Alabama share a look.
* Sweet Home, all while lacking proper weapons. As a result, running is usually the best hope for survival.
* Sweet Home, another horror series that aired on Netflix in December 2020.
* Sweet Home, because it accompanies multiple action scenes throughout the first season and they play quite a lot of it each time.
* Sweet Home, being so muscle dense that he actually singlehandedly tops the weight

recommendation on the elevator and every weapon used on him breaks without harming him.
* Sweet Home: Bom the Pomeranian is usually reliable for noticing danger.
* Sweet Home: Downplayed. A damaged car does explode, but only because a fuel leak caught fire.
* Sweet Home: Each infected person develops one of these. They serve as a means of determining exactly how those that were infected will end up mutating. Hyun's in particular is very eager to play mind games with him.
* Sweet Home: Emi's special item is the key which is required to open any locks found within the mansion. Should she somehow become unavailable, other party members will be able to find extra keys around the house.
* Sweet Home. Encounters with enemies are preceded by a slowly building tune, before a sharp shriek brings the enemy onto the screen. The same shriek comes with the many talking corpses you find before their picture shows on the screen.
* Sweet Home has mirror monsters, which resemble shriveled corpses, that attack whenever you pass by one of the mirrors in the courtyard. To prevent having to fight them every time you pass by, you need to shatter the mirror with a mallet.
* Sweet Home has several enemies with more powerful recolours in later portions of the game. (Wisp and Bane, Hound and Wolf, etc.) One interesting variation is Ghoul, in which the more powerful version is not only slightly redrawn (Missing an arm) but is also flipped upside down. (Indicating that it's dropping down/hanging from the ceiling.)
* Sweet Home: Hyuk may not be the nicest person around and he is willing to make some morally ambiguous decisions, but he is firmly on the survivors' side and is only the way he is because he has to look out for the whole group as its leader, despite being a teenager.
* Sweet Home: Hyun's weapon is a broken mop handle with a knife attached to it. Dusik Hahn upgrades it to also conduct electricity.
* Sweet Home: Hyun used to be popular, smart, athletic and an all round good guy. Then another classmate came and made everyone else in the class beat him up and cut him off, making him the sullen, cut off jerk he is at the beginning of the story.
* Sweet Home, if one gets the perfect ending (all five party members alive), the five characters are seen together, happy. As the ending closes, a face turns around and reveals that it's a monster!
* Sweet Home: Infected people's eyes turn black when they come close to becoming monsters.
* Sweet Home: In the first episode, Hyun-su hears his neighbor complaining she's hungry. When he opens the door, he finds she's eaten his ramen... and her cat. Then she turns up at his door, begging to be let in while still saying she's hungry.
* Sweet Home: Jae-heon slices off half a monster's head with ease. Especially notable because his sword is a keepsake, therefore he probably doesn't sharpen it regularly.
* Sweet Home more or less enforces this as a game mechanic. You have five playable characters who can either work independently of one another or team up, but even then the largest team size is three. While it is usually possible (if a little tedious) to keep everyone together, there are going to be times when splitting up will be required to get through certain areas.
* Sweet Home: One of the monsters is a giant spider with a human head. It chases Yi-kyung through the air-vents, and later attacks Du-sik and Su-yeong.
* Sweet Home: One of the monsters rises behind Ji-su. Jae-heon spots it just before it attacks.
* Sweet Home, provide useful exposition to the group. The game also hints at their real identity which explains why they know so much about what's going on.
* Sweet Home reduces your party down to one... and you'll get an unique ending for it.
* Sweet Home, released in December of 1989, was a JRPG that introduced many features that would become standard for survival horror, including a story told through the game's setting, the need for careful inventory management, and limited healing items.

* Sweet Home: Seok Kim is a complete Jerkass (and, as we later find out, a hypocrite as well) but he isn’t wrong that keeping Hyun around could prove to be dangerous to the group.
* Sweet Home: Setting the monsters on fire is the best way to get rid of them.
* Sweet Home takes place in one of these, referred to as a "House of Residing Evil."
* Sweet Home takes this to ridiculous levels. Rope on the floor? You'll need Kazou's lighter to get by it. Shards of broken glass? Asuka's vacuum is the only way around that. Shallow ditch in the ground? You need a board to cross it. This is despite the fact that the characters are all capable of walking through rushing streams, thorny bushes, piles of still-moving bodies, and even raging infernos.
* Sweet Home: The first episode starts with Hyun-su walking out of the building and the soldiers shooting him. The rest of the series shows the events leading up to this.
* Sweet Home: The survivors inadvertently discover one near the makeshift gravesite. They use it to escape the building when it's under siege by the military, who believe the survivors are armed and dangerous.
* Sweet Home. To even reach the platform where the item that triggers the boulder drop is being held, the player has to lay down several boards... boards which break if crossed over too many times.
* Sweet Home was actually an adaptation of the movie - the movie itself isn't known outside of Japan and is often treated as just another movie.
* Sweet Home: When Hyuk sent Hyun and Wook to get Dusik, Sook and Yeong, he whispered to Hyun to focus on Dusik, even at the price of the kids, to see if Hyun was the callous type of person who could sacrifice children.
* Sweet Home: While several minor characters had already died by this point, Jayhun’s death established that no one is safe. If there was any doubt, it was followed up by Seop Ahn.
* Sweet Home" who is all but outright implied to have been a fitness nut of sorts (or desperately craved for muscles but could never build them) constantly craved for strength resulting in his unique mutation.
* Sweetie Belle is a cute little unicorn filly who proves to be this in the episode "Stare Master". She's actually a very good singer, but as Fluttershy discovers, also a very
* Sweetie Belle is usually voiced by Sabrina Bonfitto, but when singing she is replaced by Vera Calacoci in the first seasons (albeit Jasmine Laurenti took the role in "The Show Stoppers") and Marisa Della Pasqua from Season 4 onwards.
* Sweetie Belle's arc is based on the author's experiences in learning about — and accepting — the concept of death.
* Sweetie Belle uses one among other things to build an emergency barricade in "Hearts and Hooves Day".
* Sweetie Belle was infamous for it, to the point of being fan-named 'Squeaky Belle'. When asked if it was intentional the actress confirmed that no, it was simply due to a thing called puberty and that her voice did that sometimes. As the seasons went on, Sweete Belle's voice matured to the point where it stopped cracking.
* Sweetie Drops (a.k.a. Bon Bon) is riding on Lyra Hearstrings and motivates her by dangling a pair of (human) gloves before her.
* Sweetie means that she's really turned off by lack of physical prowess.
* Sweetie's Mansion Sweetie Belle each time she catches each of their ghost form. There's another problem in that the mane cast may not have come completely back to life from the paintings. Sweetie ran into their lifeless bodies with grayed out cutie marks that were being controlled by other ghosts (ghost dogs) when Sweetie was hunting Ghost!Pinkie. It was established in that same chapter that when a pony is dead, their cutie mark is grayed out.
* Sweetie's Mansion, Sweetie Belle finds torn pages of a shared journal by Madame Fleur and Spector that explains about how they lived before they were turned into ghosts and clues about the mystery of the mansion itself.
* Sweetie's older sister Rarity usually affects a very nice mid-Atlantic-accented

speech. Get her to whining, however, and you'll give up carts full of jewels to be rid of her. Turns out she knows it and uses that voice on purpose to invoke
* Sweeties: treats are often thrown into the audience from the stage at some point (again, often at the end).
* Sweet Jane. Which is interesting, because it's actually a cover of Lou Reed's early vision for the song, not the one that Velvets eventually released.
* Sweet Jesus Pooh, That's Not Honey is an exploitable meme consisting of a comic where Pooh eats what he thinks is honey until Tigger informs him it is something else. The original comic had it that Pooh was eating Tigger's father's ashes, but most versions of the meme substitute other things that are either just as unpleasant to eat or something that can't really be consumed.
* Sweet Judy undermanned in the tsunami that sets off the plot of the book proper.
* Sweet Liberty is about a history professor struggling with a film adaptation of a book he wrote on the Revolutionary War. As the film's director explains (while Alda's character is complaining about yet another historically inaccurate change they have introduced), historical accuracy is not important to the movie-making process; the only rules for a successful movie are: 1. Defy Authority, 2. Blow Things Up, 3. Take Your Clothes Off.
* sweet little brother she has to protect. by him in a sparring match, she still worries about him far too much.
* Sweet Movie is set in 1984 (ten years after the film's release) and much of the plot is driven by a contest to find the purest woman in the world. It gets weirder from there.
* Sweet Mythsteries of Life, where Skeeve's constant need of a drink pushes him toward The Alcoholic.
* Sweetness & Lightning are voiced by actual kids, such as Rina Endou (11 years old as of August 2016) as Tsumugi.
* Sweetness & Lightning, it's significant given that this fear prevents her from cooking.
* Sweetness & Lightning tells the story of a teacher and his daughter getting cooking lessons from one of his students.
* "Sweet 'N' Sour" Larry Sweeney, June 19, 2005, by mentioning advice that "Mama Sweeney" gave him.
* Sweet on Polly Oliver: A guy is attracted to a girl who is disguised as a guy.
* Sweet on Polly Oliver: A guy starts to fall in love with a guy who is really a girl in disguise.
* Sweet on Polly Oliver: A man becomes attracted to a woman disguised as a male, the implication being that he is subconsciously figuring out that she's actually female.
* Sweet on Polly Oliver by giving the story from Shang's perspective. Before he learns the truth about her actual gender, he thinks of "Ping" as his Closet Key.
* Sweet on Polly Oliver: Straight guy find another guy attractive... because that other "guy" is actually a girl.
* Sweet on Polly Oliver, though whether this actually awakened a bisexual side in him or not isn't confirmed before the comic ends, since she's the only "man" he's ever shown being attracted to.
* "Sweetpea" pasts, so the poor guy has his reasons for being a little... eccentric.
* Sweetpea Sue wears a light pink onesie with a pattern of a colorful flowers in circles throughout and darker pink on the cuffs.
* Sweet People is the easy listening project of Swiss pianist Alain Morisod, whose only major hit was "Et les oiseaux chantaient", a recording of bird songs backed by a gentle synthesizer, strings and drums. The tranquil piece made it to #4 in the UK, #5 in Belgium and #4 in the Netherlands. Morisod continued to record under the Sweet People name into the 2010s, but never had another significant chart hit.
* "Sweet Pepper": The first time Pepper and Captain Cuddles lay eyes on each other, there's a mutual rosy pink soft focus Crush Filter on each of them for the other.
* Sweet Pickles has the title creature (a relative of the squirrel family) posting

signs in an attempt to bring order in the town where she lives.
* Sweet Polly Oliver: A female character dresses up as a man to accomplish some end.
* Sweet Polly Oliver: A girl dresses as a boy to do something only boys are allowed to do.
* Sweet Polly Oliver discover that they almost qualify as this trope due to their army being on the verge of defeat and arguably in the wrong of the conflict.
* Sweet Polly Oliver donned male disguises in more than five of their films.
* Sweet Polly Oliver Polly Perks is given the task of shaving Lieutenant Blouse — under the impression that, as a chap, she has a rough idea what she's doing — the Lieutenant asks her if she thinks she could kill a man. She stares at the razor in her hand and says she thinks she probably could.
* Sweet Polly Oliver protagonist. One of them, Kanji, makes increasingly desperate bids to get into "his" pants, which are all portrayed comedically—up to the part where he lures "him" away into an empty building with promises of information about his family and attempts to take advantage of him. Uneasy chuckles are swiftly crushed.
* Sweet Polly Oliver where the faitful Leonore disguises herself as the male Fidelio to rescue her husband Florestan from a Spanish prison.
* Sweet Reason by Jim Henle and James Garfield contains, in the first chapter, certain less-than-positive references to Detroit when teaching logical notation. "If the meeting is in Detroit, then George will be late," and "George will bring a casserole if and only if the meeting is not in Detroit."
* Sweet Revenge. Henry Bell and Karen Knightly strike a bargain for the murders of Henry's boss and Karen's lover's wife. Subverted in that Henry finds himself falling in love with his target.
* "Sweet Rosie Jones" by Buck Owens (1968) has the narrator lose the love of the title character to a "tall dark stranger." A year later Owens recorded a spinoff/sequel actually called "Tall Dark Stranger" that explored the trope even further.
* Sweets’ death counts. Booth is so angry at the guys who did it between Sweets dying and his near death and
* Sweets and Daisy couldn’t stay away from each other during both break-up periods. The second time ended with her pregnant and them marrying just before his death.
* Sweets and Daisy. They dated in season 5 and he proposed,but they broke up when Daisy went with Brennan to Maluku. They started season 6 as
* Sweets and Daisy twice. First it’s Sweets not wanting to wait a year while she goes to Maluku with Brennan and then they get back together before splitting after planning to move in together and Sweets panicking when Daisy thinks they’ll marry soon. Then they reunite again only for him to die.
* Sweets and Sour Marge", Marge files a lawsuit against a major sugar manufacturer, and after hearing her case Judge Snyder passes a law banning sugar from Sprinfield. A judge is only supposed to interpret existing laws, preside over trials and pass judgement, NOT make up new ones at his whim. Lampshaded at the end when Snyder strikes down the ban after acknowledging that he had no authority to enact it.
* Sweets. Drama: the actor has a burgeoning behind-the-scenes career, and the writers believed that having the character just leave DC didn't feel like a satisfying conclusion.
* Sweet Sea, after retrieving the Royal Necklace, Sheeba models it in front of a mirror, which immediately cracks into pieces.
* Sweet Sea, and the special effects, hair movements, and painted backgrounds are very pretty to behold.
* Sweet Seal: Seals and sea lions portrayed as sweet and cuddly animals.
* Sweet Seal: Seals, being roly-poly and fuzzy, are often used as visual shorthands for cuteness.
* Sweet Sea, Sheeba gets a short song praising her status as the meanest creature in the sea.
* Sweet Sea, Squidney does the legwork both in stealing the necklace and impeding

Sweet Sea, while his boss Sheeba waits in her lair and gloats.
* Sweet Sea starts with Sweet Sea briefly shirking her royal duties to play water polo, and her father's none too pleased.
* Sweet Seymour Skinner's Baadasssss Song", after Superintendent Chalmers is angry enough at Skinner before Bart's dog causes a crisis, and Groundskeeper Willie falling on him seems to be the last straw:
* Sweet Seymour Skinner's Baadasssss Song": "Let's see:
Tide...Cheer...Bold...Biz...Fab...All...Gain...Wisk. I believe today I will try...Bold."
* Sweet Seymour Skinner's Baadasssss Song", Principal Skinner has an idea for his great American novel.
* Sweet Seymour Skinner's Baadasssss Song" they embrace before returning to their old rivalry. Bart attaches a "Kick Me" sign to Skinner, however Skinner also managed to attach a "Teach Me" sign to Bart.
* Sweet S. has two green pigtails sticking out of the back of her head.
* Sweet Sheep: Baaa! Why hello there, ain't our wool the softest and cuddly? Despite our repetition for herd mentality, we have the b-b-b-biggest hearts and v-v-very s-s-s-weet-natured. You can thank us for producing comfortable blankets, bed sheets and socks. Meeh!
* Sweet Sheep: Sheep (especially lambs) as symbolization of innocence and purity.
* Sweet Sheep: So are sheep, due to being very sweet animals and having very soft wool.
* Sweet Sheep who serve as symbols of peace and innocence. Especially in numerous Parables of Jesus such as "Parable of the Lost Sheep", "The Sheep and the Goats", and The Nativity of Jesus.
* Sweet Silver Blues, Garret and Morley kill one of the thugs that ambush them in Full Harbor. To get rid of the body, Garrett drives them to the red-light district while Morley feigns an argument in the back of their coach, cussing out the corpse for passing out drunk so early in the evening. They stop at a bordello, park the corpse at a corner table, and tell the house staff to leave their buddy alone to sleep it off. After taking their turns upstairs, they leave, knowing that the bordello's operators will dispose of the corpse quietly once they realize the "drunk" is dead.
* Sweet Silver Blues, Morley pretends to be telling Garrett a joke, so he can warn him that their campsite is being watched. Garrett plays along, and fakes a big laugh "like it was the one about the bride who didn't know the bird need to be cleaned before it went in the oven". The actual joke, though evidently hilarious, is never mentioned again.
* Sweet Smell of Success in the scene when Falco gets his hand caught in the door. Unfortunately, said Henry, he ended up on the cutting room floor.
* Sweet Smell of Success plays out over the course of less than two days.
* Sweet Smell of Success press agent who shows off to one of his clients by making a fake call to his secretary pretending to be speaking to J.J. Hunsecker, a powerful columnist.
* Sweet Smell of Success: Senator Harvey Walker, press agent Manny Davis and his date Linda James are out having dinner with media mogul J.J. Hunsecker. Or at least, Linda claims to be Manny's date, but Hunsecker isn't fooled.
* Sweet Sorrow in a pool of blood. However, the reason Sonic isn't bleeding is because the energy blast cauterized the wound.
* Sweet Story it is also literally about an apocalypse caused by sugar.
* Sweet Story: Timmy's wish that he and Sally would be married "forever" backfires on him by causing this. Since marriage is supposed to last "until death do us part", it causes them to be cursed so that they can never die. As a result, they end up living through global extinction and are left as the last people on Earth, doomed to starve and dehydrate eternally on the now barren planet with no hope of escape.
* Sweet Stuff and the Treasure Hunt" provides a break between "Bright Lights"'s confrontation with kidnappers and a soul-stealing cloud demon and "The Return of Tambelon", which centers around an invasion by an evil wizard who will almost

conquer all of Dream Valley, without itself raising stakes any higher than some issues of self-worth and friendly competition.
* Sweet Sweetback's Baadasssss Song, mainly because any actors who had the skill set necessary and were willing to star for what little Van Peebles could offer requested Sweetback have more lines written (Sweetback only had six lines in the entire film). Production was so tight Van Peebles even ended up doing his own stuntwork and even contracted gonorrhea filming one of the film's unsimulated sex scenes.
* Sweet Sweetback's Baadasssss Song, so it's certainly relevant to the discussion.
* Sweet-Talking TJ by Karen McCombie, between the title character of the book and Stella to trick the police. It might have worked, but then they might have just not been seen.
* Sweet Tooth. Ferrets are obligate carnivores who can't taste sweetness.
* Sweet Tooth goes (she even named most of her children after various confections) often add levity to her arc.
* Sweet Tooth Johnny shoots off all of Abbot's left fingers after Abbot threatens him.
* Sweet Tooth's tournament was to find his lost best friend, Crazy Harold the Wacky Lunch Sack. Yes, it's just a paper bag.
* Sweet Tooth, the main relationship is the friendship between Gus and Jeppard. Gus is 9, while Jeppard looks at least 40.
* Sweet Valley. A young stalker's victim takes out a restraining order against her and transfers to Sweet Valley to escape her, so she has surgery to look like a girl from their old school (who died), assumes the dead girl's identity, and follows the guy to Sweet Valley.
* Sweet Valley High. Although she can be incredibly competent at getting back at anyone who tricks her.
* Sweet Valley High. And in each episode, they bicker over their differences but make up in the end.
* Sweet Valley High book "Are We In Love?", the twins' older brother Steven begins dating a black girl. Sure enough, this results in several characters being revealed as racist jerks, given their negative reaction. Adding to the drama, despite genuinely liking each other, both Steve and the girl suffer from the nagging feeling that they have little in common and equally little chemistry and wonder if they're simply continuing to date to prove all the naysayers wrong. They amicably break up at the end of the book.
* Sweet Valley High book has Elizabeth and Jessica bickering about their brother Steven's love life. Elizabeth disapproves of the girl he's thinking about dating, whereas Jessica thinks it's time for him to move on after the death of his girlfriend Tricia. A fed-up Steve demands that they stop talking about him as if he isn't there (in fact, they had become so absorbed in their argument that they genuinely forget that he was in the room) and tells them both off - Jessica for her meddling, Elizabeth for her self-righteous and judgmental attitude about the girl.
* Sweet Valley High book, one of these of Jessica Wakefield is frequently the B-plot. Despite the fact that they always blow up in her face, she will continue trying to pull one off. And sadly, several of them have been genuine attempts at improving herself (cooking lessons, music lessons), making it rather unfair that they go as badly as the other ones.
* Sweet Valley High books has Jessica charge too much on her mother's account at Lisette's. Alice finds out and demands that Jessica get a job to pay off the account.
* Sweet Valley High books, one of the twins does this after she and a boy she was helping are caught by guards in a restricted area during a party. As neither of them were invited to the party to begin with, she also runs off crying, saying, "I told you someone would see us." The guards are so busy laughing that neither of them are checked for ID or questioned about why they were in the restricted area.
* Sweet Valley High book "Taking Sides", Elizabeth and Jessica try to fix up their respective best friends Enid and Lila with newcomer Jeffrey French. At some point, Elizabeth realizes that she herself likes Jeffrey and becomes so guilt-ridden that

she becomes obsessed with pushing Jeffrey and Enid together, even as they each try to tell her that they don't have any chemistry and that Liz's efforts are making them miserable.
* Sweet Valley High Elizabeth, Jessica, or both would meet a new love interest who led her into some sort of scheme or caused her to become torn between him and her loyal regular boyfriend. Steven and other supporting characters got Satellite Love Interests too.
* Sweet Valley High Elizabeth's boyfriend Todd reacts very badly to anyone he perceives as a rival for her affections, so much so that the fan site 1bruce1 nicknamed him "Todd Punch Wilkens." Enid's boyfriend Ronnie Edwards was also like this.
* Sweet Valley High Elizabeth's pursuit of a story often served as either a subplot or a lead-in to the main plot in several books.
* Sweet Valley High has been adapted into a show, has a movie in production, and has had a lot of merchandise (including board games).
* Sweet Valley High. In one of the earlier books, it's stated that she gets good grades in most of her classes, despite her primary concern being boys, parties, and shopping. Later books indicate that she's a poor student, but it seems to be everyone's opinion that she'd be an excellent one if she simply applied herself, which in fact does happen several times in the series. Additionally, she is shown to have a natural aptitude and skill for certain things. And in the best example of this, she aces the SATs, considerably outscoring Elizabeth, despite barely studying. Unfortunately, rather than congratulating her, everyone thinks she cheated.
* Sweet Valley High Jessica is a complete airhead in the classroom, assuming amongst other things that makeup tests are about the use of cosmetics and that Paris is in Italy. Otherwise, while definitely shallow and impulsive, she can be plenty cunning and manipulative, particularly if someone plays a nasty trick on her.
* Sweet Valley High, Jessica's first attempt to replicate her accidental spilling of some extra ingredients into her cookie dough that resulted in unbelievably delicious cookies is adding pineapple flavoring and licorice extract to her dough. Not surprisingly, the cookies look and taste absolutely disgusting. Her other attempts at combining ingredients don't fare much better, and the actual combination that made the delicious cookies turns out to be a simple mixture of vanilla and almonds.
* Sweet Valley High — she tries to break them up too, having decided for herself that their relationship is boring and that they need to see other people.
* Sweet Valley High mini-series, crazy stalker Margo had one of these dedicated to Elizabeth Wakefield.
* Sweet Valley High novel had the central character constantly being verbally and emotionally bullied by her stepmother, to the point where she would outright lie to the girl's father and tell him that she was being rude and disrespectful to her — and the jerk would believe her. Not until the girl saves her baby half-sister's life (she was choking on a button) does it finally dawn on the woman how horrible she's been. The stepmother not only apologizes but admits that she was trying to drive her husband's daughter away in order to have all of her father's attention to herself.
* Sweet Valley High novel, the girls think their mother is expecting. Initially freaked out, they eventually decide that they'd love to be big sisters and decide to offer their mother support by going on and on about how nice it would be to have a baby around. The result is that their mother assumes one of THEM is pregnant. When they hurriedly correct her and tell her they were trying to be supportive of her, the trope is played twice when it turns out she isn't pregnant either.
* Sweet Valley High of cocaine. Elizabeth Wakefield drives drunk on one occasion after her drink is spiked and gets in a car crash, which results in the death of her twin sister's boyfriend and her arrest.
* Sweet Valley High Season 1 Episode 19, "Kidnapped", sisters Elizabeth and Jessica volunteer as Candy Stripers at the Sweet Valley Community Hospital. Jess schemes to

get herself on TV by sucking up to hospitalized talk show host Frank, while Liz finds herself on the receiving end of unwanted attention after showing kindness to lonely orderly Peter.
* Sweet Valley High, secondary character Emily Mayer is constantly being bullied and terrorized by her stepmother Karen, who constantly changes the house rules so that Emily always seems to be in violation of them, tells her father outright lies about her, or at the very least, spins things to make Emily seem to be in the wrong. It's soon revealed that one of the things Karen frequently hints at is sending the supposedly troublemaking Emily to a boarding school both so that she can be reformed and so that she won't be a bad influence on her baby sister.
* Sweet Valley High series, Ned and Alice Wakefield consistently blast Jessica for her bad behavior — promiscuity, bad grades, etc. Similar behavior from Elizabeth is glossed over or rationalized. One scene illustrates this perfectly; when Jessica tries to fix her brother Steven up with one of her friends, she's screamed at by everyone. But when Elizabeth steps in to defend Jessica and explain that it was her idea, suddenly it's a great idea and everyone's falling all over themselves to praise her for it. Not until Jessica RAN AWAY (TWICE, in two separate books) did it finally dawn on her family how troubled she was.
* Sweet Valley High series, the twins drove their mom's old Fiat Spider which was constantly breaking down. According to Jessica, she was driving up a hill one day, and pedestrians were walking faster than the car.
* Sweet Valley High series where Elizabeth goes to London and falls in love with an aristocrat while working as a servant at his manor house.
* Sweet Valley High's Jessica Wakefield was head cheerleader and had a different boyfriend every book. The other members of the squad did pretty well too.
* Sweet Valley High: Steven's girlfriend Tricia begins acting distant towards him. He concludes that she's seeing someone else and confronts her with this. When she doesn't deny it, he dumps her. Little did he know that she was dying of leukemia and, of course, was pushing him away so as to spare him the pain of watching her suffer.
* Sweet Valley High, Steven Wakefield goes through a stage of dating girls who remind him of Tricia, his girlfriend who died tragically. They pretty much all cotton on to this and call him out on it, and he eventually accepts he needs help.
* Sweet Valley High, takes place when the twins are in middle school but focuses on the club instead.
* Sweet Valley High that were going on. In one example, the twins' friends prove which twin is which by asking Jessica to spell thief and asking Elizabeth who a certain soap star is. Jess spells it wrong and Elizabeth doesn't have a clue about the soap star. Somehow, their friends are convinced...
* Sweet Valley High, the Unicorns adopt purple as their signature color because it's the color of royalty and power.
* Sweet Valley High, they mistake his phone conversations with his girlfriend for lovey-dovey chats with their mother.
* Sweet Valley High thrillers; Jessica is waitressing when an obese guy is rude to her while placing an order. She pointedly gives his thin wife the milkshake he ordered and gives him a Diet Coke instead.
* Sweet Valley High to horror. It worked surprisingly well, leading to more story arcs and more fantastical story elements in the future.
* Sweet Valley High tries to pose as Elizabeth, but Elizabeth's best friend doesn't believe it for a second and thinks that Jessica, Elizabeth's twin sister, is the one pretending to be her.
* Sweet Valley High TV series featured an episode where Lila and Jessica were forced to work at a pork restaurant to pay for a gown they damaged in a store. Not only do they have to dress as pigs as part of their uniform, if they don't squeal, the customer gets a free meal.
* Sweet Valley High twins, but their plans went awry when they argued over who got to become Jessica.
* Sweet Valley High twins (the difference being that Elizabeth dresses and acts in a far more conservative manner than Jessica).

* Sweet Valley High, where she was afraid to come to the twins' sleepover camp-out only for the twins to find out and promise to keep the secret.
* Sweet Valley High whose stupidity causes any scheme she embarks on to implode.
* Sweet Valley High with Ned Wakefield (and according to the book, their ancestors have been trying to hook up for nearly 200 years).
* Sweet Valley Saga books rely on the idea that the present inhabitants of Sweet Valley largely are Xeroxed from the ancestors who are the subjects of the books. Patmans and Fowlers are of course in some way derived from nobility, for example.
* Sweet Valley Twins after stealing Elizabeth's babysitting job when the amount of kids to look after goes from one to four and they all turn out to be brats.
* Sweet Valley Twins book, 12-year old Jessica is secretly dating a 16-year old boy by lying about her age and pretending to be 14. Her upcoming alibi is that she's spending the weekend at a friend's house and she has the friend call her mother, posing as the friend's mother in order to make the arrangements.
* Sweet Valley Twins book, Jessica and her friend Ellen find $200 dollars in a box buried in the latter's backyard. They show up at school with new things...just as money has been stolen from the class treasury. Sure enough, everyone, including Jessica's own sister, thinks that she and Ellen are the thieves.
* Sweet Valley Twins books where the twins' classmate Mary becomes attached to their mother and keeps making excuses to come over to the house to spend time with her. It's eventually revealed that Mary was kidnapped as a child and her real mother looked like Alice Wakefield.
* Sweet Valley Twins book when Elizabeth gets her first period, the girls go to the store to buy pads, and end up horribly embarrassed when the clerk does a price check.
* Sweet Valley Twins scenarios based on Elizabeth's actions in previous books, but also contains a couple of more nonsensical changes: the club of shallow, popular rich girls is transformed into a vicious girl gang, and Elizabeth's sister Jessica goes from bubbly, stylish, and popular to shy, geeky, and pathetic.
* Sweet Valley University book. She cringes as she does it, knowing full well how insulting it is—but it works. The waiter is able to pick up on the few English words that he does understand and help her out.
* Sweet Valley University, Elizabeth breaks up with her long term boyfriend Todd and he begins dating another girl, Gin-Yung. Gin-Yung conveniently contracts a brain tumour and dies, using her last words to tell Todd to get back together with Elizabeth.
* Sweet Valley University, she switches to TV and becomes an investigative reporter for WSVU, the campus station. She breaks several scandals that become on-going plot points in the series.
* Sweet Valley University specials, Enid/Alex Rollins is stalked by a guy obsessed with the idea of Enid as she was in high school, rejecting her choice to change her name and live a different lifestyle.
* Sweet/Vicious. Even though she escaped from it unscathed, it still left her badly traumatized.
* Sweet/Vicious features a college version of this with its protagonist, the sorority sister and rape survivor Jules, who dons a hoodie and ski mask to torment the sexual predators at her school since the campus' security force seems to not even care about the epidemic of rape at the university. She's joined by Ophelia, a rich kid hacker and weed dealer who runs into her at night when she's on the prowl and manages to figure out her identity.
* Sweet/Vicious, where the guys' desire for the sorority girls means that Greek Row is a hotbed of unpunished rape.
* Sweet/Vicious. Which is to say, she beats up rapists, taunts them when they beg for mercy, and often forces them to own up to what they did, at least to her, if the authorities aren't going to do anything.
* "Sweet Victory" has been so ingrained into the show (to the point of where the Super Bowl LIII received backlash for not playing it during their halftime show) that most people don't realize that the song was actually recorded by David Glen Eisley for a stock music library. It

* Sweetwater as she turns to face them and reveals she had a revolver with her all along and had just been waiting for them to get close so she could take them out.
* Sweetwater: Josiah is a polygamist who has two wives, while still pretending he's only married to one.
* Sweetwater: Martin the general store owner spies on female customers changing into dresses in his fitting room using a peephole from the back of the property. Sarah catches him and jabs him in the eye with the tip of her parasol early on. Later during her killing spree, she shoots him through the rectum as he's standing with his pants down outside there masturbating while he watches a girl changing through the peephole.
* Sweetwater: Sarah goes on a killing spree against everyone who wronged her in the second act, from her husband's murderer (plus his men), an unfeeling banker, and a peeping tom store owner.
* Sweetwater: Sarah loses her husband, has a miscarriage, and is raped in quick succession. Not surprisingly she completely snaps and goes on a killing spree shortly after all this.
* Sweetwater: Sarah's husband Miguel, a mestizo Mexican man, was the only person of color in the film. He dies pretty early on.
* Sweetwater: Sarah's killing spree is understandable after what she's been through, even if not all of her victims were that bad.
* sweet with his little brother. Later it's shown that he only let out his real personality whenever he was alone with his brother or thinking about his brother.
* Swellhead: The Bond-villain-esque antagonist has an elaborate underground lair on an island off the coast of Scotland. The characters lampshade the fact that he somehow managed to construct it without anyone noticing the vast amounts of time and money and material that should have involved (it turns out he created it out of thin air using magic).
* Swellhead to take their helmets off. Needless to say the beautiful heroine stands out among all the male mooks.
* Swellhead: Two of the characters have subscriptions to a high-end crossword magazine that "scorned newspaper distribution. The publishers set an entrance exam for the subscription list, charging on a sliding scale, lower price for higher grades." One character, who has a pretentious streak and an inflated opinion of himself, pays £1,000 a year for the privilege of being counted a subscriber. The other, to whom he considers himself superior, gets his for free.
* Swellhead villain plans to change the world so it all exists inside his head.
* swelling on his back, and for a few tense panels are left to worry about its fate.
* "Swell" - Say this a lot, especially if you're a teenage girl and you're talking about something you like (usually a boy). Be sure to say it in an extra cutesy and/or sweet way. The more affected it sounds, the better. ("Oh, that's just swell!") The word actually dates to
* Swelter has a casino robbery as their backstory, seen briefly in flashbacks. It went wrong, and the film follows four of the conspirators 10 years later as they attempt to track down their fifth man and the $10 dollars they stole.
* "Swelter Skelter": Nutty trips and his head cracks right open, at which point his brain fries in the heat like an eggshell, and Lifty getting trapped in a
* Swelter), they prevent the protagonist from going on the run, as they arrive to spirit away the bodies and reassure the him that his secret's safe with them.
* Swelter, whose one and only fight scene is a quick and systematic defeat by the weaker but more ruthless Kane.
* Swept Away, and was almost universally panned as being terrible, and led to Madonna's declaration that she would never act again.
* swept them 4-0. To further twist the knife in this ordeal, Clemens had a hamstring tear one month prior to the World Series. While the injury didn't hamper much of his performance in the Division and NL Championship Series, it finally did him in during Game 1 of the World Series (he lasted only two innings), which contributed to the Astros getting swept by the Sox.
* SWERY loves any and all fan-works of the game, and regularly links to pieces of

fan art and writings on the game on his Twitter account. In a Game Developer's Conference presentation, he even explained that creating fan-friendly characters and worlds is a part of his game design philosophy because it gives fans a way to enjoy the game even when they're not playing it.
* Sweyn and Askeladd attempt to negotiate a potential end to hostilities with Wales. Sweyn offers Askeladd a Sadistic Choice
* Sweyn attempts to kill Canute during their first encounter because he sees him as superfluous. He only backs down when Canute shows enough of his Character Development
* S, who went on to build a career out of making shows with dark and shocking content juxtaposed with ludicrous premises.
* Swiftand Shift Couriers has Mario being told to stop by the Traffic Controller, which causes a fight between them. Later that same episode, Amanda nearly killed the traffic controller while drunk.
* Swift Shaolin Boxer. (Yes, it's a rather incoherent mess of a movie)
* Swift Wind has pretty much the exact same reaction when Adora accidentally gives him wings and a horn. His eyes bug out and he flies around the village smashing stuff as if he has no control over himself.
* Swift Witted and his father, Burrich, become famous through the Outislands in an almost incidental fashion as Demon-Slayers. Between them, through Burrich's mastery of the Wit-magic and Swift's use of a magic arrow, they slay the stone dragon form of Kebal Rawbread and freed thousands of Outislanders from mystical torment, and a song is fashioned for their feat before they even leave the ice island Aslevjal.
* Swimfan, Madison realizes that she left her panties in Ben's car after their tryst. It isn't clear if she did this intentionally so that his girlfriend would find them.
* Swimmer can only move by hopping, making him very awkward to control.
* Swimmers will sometimes train while wearing extra clothing, like leggings, to give them more "drag" in the water. Once they get good at this, in theory, when they swim in a regular suit they'll be faster, because it's easier by comparison.
* Swimming superstar Michael Phelps insisted in multiple interviews that the 2012 London Olympic Games would definitely be his last competition. It didn't stick, of course.
* Swimming with Sharks examines the systematic abuse of production interns, who must endure a year of abuse at the hands of their sadistic Hollywood bosses in order to get a foot in the door.
* Swimming with Sharks. You are here to protect my interests and to serve my needs."
* Swimsuits for professional swimmers are getting nearer and nearer to this trope...so much so that the international swimming federation is starting to crack down on suits that are
* Swim To Me, Delores (the weathergirl who dresses up as a mermaid to do her reports. She's a professional mermaid/swimmer in shows when not on TV) is sent out specifically to be this girl during a hurricane watch. The drama is upped when she spots a drowning child and drops her mike to rescue him.
* Swindle. As a result of his arms dealing he has some of the most impressive weapons in the universe, but is the only Decepticon in the whole show that Bumblebee's stingers have ever been effective against.
* Swindled. All we know is the Citizen's gender (male) and nationality (American). Then again, this might be for his protection, given that he has expressed controversial opinions that border on anti-consumerism. Also, if his identity were to be exposed, he would be targeted for lawsuits by many of the corporations and people he's covered, not to mention harassment by trolls.
* Swindled story. He appears ready to launch into an anti-consumerist diatribe, only to take a sharp left turn:
* Swindle haves a nasal voice in the original dub. The first Italian dub gave him
* Swindle is far more famous than any other member of the Combaticons, being one of the few cases of a member of a combiner team who has been introduced as a solo operator in multiple continuities (including

* Swindle is the rich auction owner he's trying to impress. Throughout the scene, he's grunting in pain and keeps getting his neck chopped and pushed.
* Swindle lives and breathes this in every incarnation of the character.
* Swindle wears a catsuit during the final confrontation against Swindell.
* S.W.I.N.E. are either tanks, or some sort of vehicle - the game is utterly deprived of infantry.
* Swing123 and garfieldodie's Calvinverse heavy on the science fiction and action tropes.
* Swing123 and garfieldodie's Calvinverse mostly fall into this somehow.
* Swing123 - aside from the above page, his other fics use it as well.
* Swing123 from both of the authors, which uses characters from both of the trilogies (along with the side story "Prelude to a Season").
* swing CD, and give them other incentives to prescribe the medication your company made.
* Swingers features a funny answering machine, even though the message is completely normal. It seems the main character has his machine to spout out encouragements to him, as after he checks it says, in its robotic voice, comments like "She's not worth it" and "There are other fish in the sea."
* Swingers is named Sue. Apparently, his parents were inspired by the Johnny Cash song of the same title.
* Swingers. They later emulate this shot when when entering a club and one of the first parts of the film is shot in a casino.
* Swing Girls — A Japanese movie about a ragtag band of misfits who transition from ordinary high school students to a swing band playing at a music festival.
* Swing High, Swing Low, Skid is a brilliant trumpet player but doesn't have any ambition whatsoever.
* "Swingin' Doors" was originally released by Molly & the Heymakers in 1992.
* Swinging Pendulum: Amongst the cheerful and dark-haired Shiba, the pessimistic and bright-haired Ichigo tends to stick out. He also sucks at Kidou, which happens to be a clan specialty.
* Swinging Pendulum Asuka asks Ichigo if he really thinks that she can become a better fighter. Ichigo asks her if what he really thinks matters. Asuka bluntly and immediately tells him yes.
* Swinging Pendulum. Since Ichigo looks so much like Kaien, Kaien immediately adopts the amnesiac Ichigo into the clan, reasoning with his looks he had to be a Shiba.
* swinging that the Monster Trio and others possess to adequate his speed.
* Swingin' Together - a failed pilot for a proposed CBS comedy series about the comic misadventures of a band trying to make it big on the music scene.
* Swing Kids after Peter is caught stealing a radio, he's given the option of being sent to a work camp or joining the Hitler Youth.
* Swing Low, Sweet Harriet: A woman on a swing, portrayed as cute or sexy.
* swings between this and a sort of even more aggressive Karkat mode with poorly-spelled profanity.
* Swing Time (1936), after Lucky fails to show up on time for his wedding, his fiancee's father tells him he'll have to earn $25,000 as proof of his good intentions if he wants another chance.
* Swing Time Lucky finally gets Penny to forgive him for messing up their chance for a nightclub audition by singing "The Way You Look Tonight."
* Swing Time. Snow is also visible through the windows when they finally reunite at the end of the movie.
* Swing Time, the contract for a band changes hands several times in this way.
* Swing Time ... when Lucky's pal Pop hits him with a snowball as a reminder that he's engaged to someone else.
* Swingtown Laurie Miller is ferociously pursuing her hot teacher Mr. Stephens. He discourages her affection and when they do get together, they avert the trope since he's not her teacher anymore.
* Swingtown, the teenage characters play a game of strip poker in which the girls

beat the guys quite handily.
* Swing You Sinners. As psychedelic as anything from the '60s, and yet it was made in the '30s.
* Swing, You Sinners!: Every time Bimbo dives in to try and catch the chicken it results in a ball of chaotic dust, and the two emerge wearing each other's clothes or with parts of each other traded until the final tussel when they return to normal upon falling out of the cloud of dust.
* Swing, You Sinners!, we see a creature that looks like a circle with a face and legs dancing. Then it turns to the side, and we see that not only is its body long rather than sphere-shaped, but there are two identical creatures behind it.
* "S'Winter" has Dr. Doofenshmirtz plotting to squash Perry the Platypus with a piano suspended over the door, accompanied by piano music. We pan up, and see someone playing the suspended piano, who then turns around and gives a creepy yet hilarious slasher smile.
* Swipe Your Blade Off (making a swiping motion to get blood off a sword)
* Swirlie: When a bully dunks their victim's face into a flushing toilet.
* Swirly Energy Thingy to being the Panama Wormhole, Earth's main interstellar shipping channel.
* Swiss Army Appendage: A character has a variety of different prostheses for every situation.
* Swiss Army Appendage: A character has several different prostheses with different uses.
* Swiss Army Appendage: An artificial body prosthetic with many other uses besides just replacement.
* Swiss Army Heroes form in the middle of the season. Sometimes the secondary Riders get new forms as well.
* Swiss army limbs containing holdout weapons are common for the robot bodyguards and cyborg assassins in the various incarnations of
* Swiss Army Man, Manny (who is a corpse, by the way) gets one when he sees a picture of a beautiful woman in a magazine, and his erection is used as a compass.
* Swiss-Army Superpower: A power with defined limitations is applied to multiple unconventional uses.
* Swiss Army Tears: Crying on anyone or anything will magically solve your problems.
* Swiss Army Weapon since it transforms between sword and gun. Her fourth attack just has it transform for the final hit.
* Swiss Army Weapon to coat the entire floor in glue so as to give his life-draining partner Mr. Styx a chance to use his touch of death. Spider-Man easily leaps out of his boots onto the ceiling.
* Swiss Army Weapon umbrella, Tentionmaru, whose scarf transforms into a sword, and Fry, who fights with a frying pan.
* Swiss Bank Account: An unsavory character hides money in an offshore bank account.
* Swiss Bank Account: The villain hides their ill-earned money by storing it in an offshore bank account.
* Swiss Cheese Security: Characters can enter the premises whenever the plot necessitates it, despite presumably locked doors or obvious obstacles.
* Swiss claymation film "Pas de cercueil pour les pantins" ("No coffin for puppets"). Partly hommage, partly parody, all 4th wall.
* Swiss engineer Georges de Mestral once found burrs clinging to his pants and to his dog's fur. On closer inspection, he found that the burr's hooks would cling to anything loop-shaped. By artificially re-creating the loops he invented the hook-and-loop fastener, AKA "Velcro".
* Swiss Family Robinson added a hostile band of pirates, who attack the family in the climax of the movie.
* Swiss Family Robinson featured a fake gun made of bamboo that was used to scare away the wildlife.
* Swiss Family Robinson Francis suggests the family build a few of these with dangerous animals at the bottom to fend off the pirates. His father thinks the

animals aspect might be too impractical, but then the boy manages to build one of these that successfully catches a tiger. The pits later get put to good use in the climax.
* Swiss Family Robinson, Francis tosses a lit-up coconut bomb at the pirates, where the pirate captain grabs hold of it looks at it for a second, then tosses it away. It hits another pirate on the head, and explodes.
* Swiss Family Robinson Fritz falls into a quicksand while taking a shortcut back to camp from collecting bamboo. He uses the bamboo reeds as floaties until a zebra wanders by, which is tame enough (the family had been using them as regular horses) to let him hitch a ride.
* Swiss Family Robinson had Roberta, who was disguised as a cabin boy by her father to protect her from the pirates.
* Swiss Family Robinson has a fairly epic one, which is one of the biggest differences from the original book.
* Swiss Guards is the name that has been given to Swiss mercenary soldiers who have served as bodyguards, ceremonial guards, and palace guards at foreign European courts from the late 15th century until the present day. They are now represented in some sense by the Papal Swiss Guard, which is the only Swiss Guard that still exists (
* Swiss mercenaries wear brightly colored uniforms when performing ceremonial duties as the Papal bodyguard. Guardsmen wear more practical uniforms when they are actually working, however.
* Swiss Money Holding would all regularly wrestle in dress suits and pants, and shoes, with belts and ties, mixed with actual athletic gear in places.
* Swiss Thrash trio Coroner's Pale Sister off the Mental Vortex album. It comes sharply and suddenly and is actually pretty jarring.
* Switch (1975): During scene transitions, the image shrinks to a small circle, which narrows and then widens like a spinning coin.
* Switch (1975) episode "The Late Show Murders," Mac is snooping in an office when the owner almost walks in on him. Mac has to climb out the window and stand on the ledge, dozens of feet above the ground, while he waits for the coast to be clear.
* Switch (1975): Frank MacBride is a retired cop in his sixties. His partner Pete Ryan is about 25 years younger, going by the actors' ages. In "Stung from Beyond," the two even go undercover as a father and son.
* Switch (1975) pilot is a police lieutenant who steals money so he can spend it on gambling and prostitutes.
* Switch (1975). The events of the novel match up suspiciously well with whatever the villain, a corrupt private eye, happens to be doing at the moment.
* Switch (1991): A male chauvinist lady killer is killed by his ex-lovers and returns as Ellen Barkin.
* Switch (1991): Margo Brofman (JoBeth Williams), one of Steve's exes and his killer, leaves the gun with which she killed him in his apartment to frame Amanda for the murder.
* Switch also avoids the blazer and tie, and wears a green vest. He averted this when he first started going to Kaimei however, wearing the proper uniform before
* Switch, a misogynist is reincarnated in the body of a woman. He's unable to handle the upkeep of longer hair and eventually gets a short haircut.
* Switch, a restuarant's neon sign is meant to read "Volcano Laverne's", but got broken and instead reads "NO LA". This is a funny coincidence, because there is actually a character named Nola, who has always wanted to see "her name in lights".
* Switchback by seeing that he's got a matchbook from a motel where a high-profile double murder was committed.
* switchback path, but if you have a Lockpick skill of at least 75, you can pick the back gate and go straight to Tabitha's hideout.
* Switchback: The audience discovers who's the killer before the other characters do, since we see him just as she's about to murder someone (with the actual act offscreen).
* Switchback: The killer had an accomplice (seen early on) or dupe who helped him kidnap LaCrosse's son. When the FBI were closing in, he left evidence after

murdering the guy (staged as a suicide) to make it look like he'd been the killer, so they'd declare it closed. LaCrosse didn't buy this, and kept hunting.
* Switchback: The killer kidnapped LaCrosse's son, but doesn't coerce him into stopping the hunt. Rather, he left LaCrosse a note saying he can only save his son by killing him, as a challenge. Most everyone believes his son is already dead, though LaCrosse says he has to keep believing otherwise.
* Switchback: The killer started writing LaCrosse taunting letters when he began hunting him, along with leaving clues and later kidnapping LaCrosse's son. In his last letter, he left clues on how to catch him that take a long time for LaCrosse to figure out.
* switch between their human-like and their demonic form, even if one has never seen such a transformation in anime or manga.
* Switchblade Honey: Humans find a planet full of docile creatures and decide to eat them. Oops.
* Switchblade Honey who deserve the consequences of their stupidity, but can we really live with ourselves if we run out on them and leave them all to die?"
* Switchblade Sam's involves him being arrested and put in a police car after being defeated by Dennis the night before, with the cops telling Sam he can tell everyone in the big house that he met Dennis. Before the police car leaves, Dennis notices that Sam left his switchblade behind and gives it back to him. Sam is about to stab Dennis with it, but Dennis is saved when one cop shuts the door on Sam, causing him to drop his switchblade down the sewer.
* Switchblades: Folding blades, especially ones that open with a flick of a button, are wielded by petty crooks. The short and relatively fragile nature of the knives also make it likely that the wielder is going after someone unarmed or held up by said wielder's "associates."
* "Switchblades" (metal ships with giant pincers attached to the sides)
* switch bodies due to an experimental rug. Soos is able to talk while a pig, as is anyone else in Waddles' body once the switching becomes a free for all.
* switch bodies. More than once he switched bodies with Kyousuke to perv on Madoka and Hikaru (as much as a five years old child can perv on a high schooler and a middle schooler)... and Kyousuke sometimes went with it willingly to do the same without punishment, as he would be in a child body.
* switch bodies with a dying alien. While the guy isn't necessarily evil, he is the antagonist of the episode, and his attempts to blend in with modern American society amount to him all but running down the street and screaming "I'm a normal Earth native just like all of you!"
* switch-body situation, in which they are captured. The only way to get out is with an object in Gwen's rear pocket, so Gwen in Ben's body has to kick it out. At first he protests, but takes it rather calmly after Gwen notes that "at least [he's] kicking [her] butt".
* Switched: After the credits of the last episode, we see the four teens meeting after school to hang out. They've clearly become friends.
* Switched at Birth, and the second mother was unable to cope with the idea.
* Switched at Birth announced that Zoey Deutch, series regular Lea Thompson's daughter, would be appearing in a multi-episode role.
* Switched at Birth are played by actors with some sort of hearing impairment, most being profoundly deaf.
* Switched at Birth (a show that prominently features Deaf culture as several of its characters, including one of its protagonists, are Deaf) to see how the show would depict their mannerisms, culture and community.
* Switched at Birth has several deaf characters, all of whom are quite attractive - Daphne, Emmett, Emmett's mother-and have relationships with hearing people. However, they're all played as ordinary people, with some of the relationships lasting a very long time.
* Switched at Birth: Natalie is fairly feminine, in contrast to her girlfriend Hilary, who's more masculine and has short hair. The latter pointedly refuses to wear a dress for the prom, going in a tuxedo instead. They get barred as a result, because their school dress code requires girls wear dresses. In protest, they stage

their own prom dance on the lawn outside with friends.
* Switched at Birth reveals that a family friend had molested him too.
* Switched at Birth starts Bay/Emmett off this way. Subtitles are used so non-ASL-speaking viewers can understand Emmett's signing.
* Switched at Birth territory). The final scene, with all the regulars getting on down at Casa del Kennish, isn't one of them.
* Switched At Birth), though she's less disabled than Daphne, her character-merely hard of hearing, not deaf.
* Switched at Birth wishes out loud that his wayward son Hal had been switched at birth with the honorable rebel Hotspur.
* switched his body and life with a character portrayed by Michael McKean, who complains that his job is a good deal more tedious than popular belief would have it.
* Switched, rather than showing previous events with a recap, the show gives quick flashbacks to significant events in-episode. This may be justified as there are many voice-overs throughout the show, viewers watching without subtitles could easily be confused as to whether the audio is being repeated or is brand new.
* Switched, the four main characters are all teens. At the start of the story, they are all immature, naive, or selfish, but by the end of the story, they have all grown up emotionally.
* switched to small Japanese economy cars to produce vehicles tailored to local tastes.
* Switchers malicious, but there are threats of violence towards the main characters (also children).
* switches sides a half-dozen times before finally joining them for the last couple of episodes.
* Switchfoot is currently juggling his role as lead singer/songwriter for the band with the side project Fiction Family, and at some point in between all that, he founded time to release four EPs as a solo artist. The two year-period between late 2007 and late 2009 saw the release of at least fifty songs between these three projects.
* Switchfoot's "New Way To Be Human" music video features Chad Butler yanking his face off to reveal that he's actually Tim Foreman, at which point the other Tim rips off his face to reveal that he's actually Jon Foreman, at which point the other Jon pulls off his face to reveal that he's actually Jerome Fontamillas.
* Switchfoot. Their biggest hit since is "Stars", which only reached #68.
* Switch Girl, farts more than any character in the series. In fact she is the sole source of all the fart/gross out humor in the series. Granted, she tries to be a lady about it and goes to extreme lengths to hide it.
* Switch has Sora, a sunny kid who has synaesthesia allowing him to see emotions and auras as colours and who is therefore very empathetic, and is overall a sweet and upbeat kid who always sees the best in people.
* "Switch Hitter" has it that one of the drugs promoted by the band (Teamocil) has been reintroduced to the market and Lindsey starts taking it for her latest issues. After she experiences some side effects, the Narrator mentions them. This also contains a sort-of inversion when Lindsey says hallucinations are a side effect and the Narrator says they aren't.
* Switching between classical, steel-string acoustic, and electric guitar.
* Switching between soprano and alto recorders. The notes are suddenly a fifth down/up from what they were (which screws with you especially when you're reading music), and the holes are a different distance apart. Expect to miss a lot. This is a real
* Switching between variants within those standards can also be complicated due to symbols and accented letters using different keys or key combinations. The above-mentioned countries have their own variant of AZERTY or QWERTZ that differs from the other countries' variants on the same and a lot of QWERTY-using countries have their own variant of it. Canada uses
* Switching between wiki-style markup and Markdown-style markup used on sites such as

* Switching Channels are the TV version in this loose remake (Colleran is the Hildy Johnson character).
* Switching from a MUD to IRC results in lots of sentences starting with the word "say".
* Switching Goals, where they are both in co-ed youth soccer teams, the sister who is no good at soccer uses other tactics to help her team - she simply starts chatting up one of the boys on the opposing team to stop him from noticing a goal being scored by her teammates just metres away.
* Switching is entirely under the player's control but can be done only from one place. The Dark Capital is essentially a gloomy and overcast version of the regular capital. There are no people on the streets (normally); it's inhabited entirely by demons. Energy barriers called Dragon Gates block paths that are accessible in the normal version of the Capital, and you can only go between the regular Capital and the Dark Capital at certain shrines.
* Switching Keyboards between either France and Belgium (using AZERTY) or Germany, Austria and Swizerland (using QWERTZ) and most other European countries (using QWERTY) can be a pain since so many keys are still at the same place, just not all of them. Especially frustrating when you're typing your password.
* Switching programming languages can be difficult. A C-type programmer trying Python for the first time might accidentally put semicolons at the end of everything, use the wrong comment indicator, and forget that Python variables aren't type-bound (Python doesn't make the user specify booleans, integers, decimals, etc.)
* Switch Lite, handheld version of Switch, went through a similar cycle, gathering a lot of flak from fans for ditching the primary feature of original console (being able to use it both as a home and portable device) despite being primarily made as an option for people who prefer their games on the go.
* switch opponents style better on Uryu's opponent, and Uryu weak but fast style on Chad's.
* Switch, so it isn't an example of this genre but rather a traditional teen superhero story.
* switch that let you flip it between good and evil. when he handed it to Bart.
* Switch to English: Two characters start speaking in a foreign language, but then switch to the language the work was written in.
* S, with an additional letter specifying what kind of artillery (the SPHA-T has a turbolaser, the SPHA-I has an ion cannon, the SPHA-V has an anti-vehicle laser, the SPHA-C carries concussion missiles, and the SPHA-M has a mass driver).
* Switzerland and Liechtenstein also fit this trope (though Liech is adopted) with Switzerland being a
* Switzerland and Liechtenstein might fit in, though Switzerland is more
* Switzerland has built and maintained an extensive system of fortifications, tunnels, living facilities, and storage facilities, much of it underground or at least dug deep into mountains, called the National Redoubt, dating back to late 19th century. In the 20th century, they enhanced it such additions as underground/in-mountain hangars for their air force, and built reinforced highways that can function as backup runways when the planes emerge.
* Switzerland has traditionally adopted this as its military style. They remain famously neutral, never going on offense — but to this day, it remains one of the most strongly fortified countries on earth. Their military capabilities are almost entirely focused on defending against invasion, so while they could never have invaded their neighbors, they've also remained uninvaded themselves — a claim their more powerful neighbors cannot make.
* Switzerland is a cross between French, German and Italian cultural influences.
* Switzerland is surrounded by mountainous terrain, and can effectively shut down any hope of ground invasions because of it.
* Swivel-Chair Antics: Goofing around on swivel chairs: Sitting and moving around the office on chairs that have wheels and spin around.
* swivels. The secretary responds he can get a skilled swiveler first thing in the morning.

* Swooner Crooner to bring them back, starting a hilarious sequence of one-upmanship.
* Swooning Over Stans: A Grunkle Dating Simulator: In Ford’s route, the player can convince Ford to take his sweater off at the community pool.
* Swooning Over Stans: A Grunkle Dating Simulator: In Stan’s route, him and the player share one in his car during their final onscreen date.
* Swooning Over Stans: A Grunkle Dating Simulator: Stan does this to the player when they’re in his car after the dance.
* Swoopers are bat-like enemies which hang from the ceiling and swoop down (go figure) from above to attack Mario.
* S.W.O.R.D: Abigail Brand lets Gyrich know that his attempted coup of her organisation nearly led to Earth's destruction, she has all the evidence needed to prove it, and the only way she'll keep it to herself is if he quits and tells the higher-ups that she has no need of a co-command.
* Sword & Sandal: Epic action/adventure stories set in ancient times (particularly Ancient Greece or Rome); the ones that delve into mythology especially count while others aim to be more grounded.
* Sword & Sandal era, where it was actually far less common (though not unknown) than is usually believed.
* Sword & Sandal to one. Often ranges from the fantastic to the historically accurate.
* Sword & Sandal) usually had to resort to clever camera angles in order to show the martyrs being "eaten" (i.e.: playfully pounced upon) by vicious wild lions (i.e. fairly tame circus lions).
* Sword & Sandal with other portions of the world having a pseudo-medieval setting.
* Sword & Sarcasm, them, while those who can't hear them assume the djinn to be merely a superstition.
* Sword & Sorceress. After her death, the series was continued by first Diana L. Paxson, then Elisabeth Waters.
* Sword & Sorcery combo contrasting that of Caster and her master.
* Sword & Sorcery, is always complaining how the Gods hate him. However, since he has continual fantastic adventures, dozens of exotic lovers who don't mind sharing and has an alternate well endowed lion furry form that femmes lustfully drool for, it's hard to see how exactly he is cursed.
* Sword & Sorcery novels, especially should the builder civilization fall — it's got the right "strange, unfamiliar world" feel, and since areas at different distances from the sun could house aliens from very different worlds, natural spread and adaptation of alien life across the borders would provide for the monsters.
* Sword & Sorcery: Quite literally the Chinese version of this trope, to an almost uncanny degree despite the genres developing entirely independently.
* Sword And Claw fanfic, because it takes place back when the monster girls were just conventional monsters that attack and eat humans. Even most of the humanoid ones aren't described as being conventionally attractive, with the sole exception being the succubi.
* Sword And Claw has monsters being generally perceived as this and not without reason, since almost all of them attack humans to eat them. Lilith is a rare exception to this, and more exceptions show up later on.
* Sword And Claw is the only one out of his original group to survive a battle with werewolves, and his survival is thanks to Lilith intervening.
* Sword And Claw, Lilith knows a lot of magic for interacting with other people's minds, being a succubus.
* Sword and Gun: A character simultaneously wielding a gun in one hand and a sword in another, or another combination of projectile and melee weapon.
* Sword and Gun facing those aforementioned threats, some CQC training might help the men survive a few more seconds if the enemy reaches your gun line.
* Sword and Gun, for wielding a bladed weapon in one hand and a firearm in the other, rather than two bladed weapons or two firearms.

* Sword and Gun: Many pirates favor a cutlass and flintlock pistol as their main weapons, often simultaneously.
* Sword and Shield, Sordward's hair is supposed to resemble a sword, but when it sways in the wind and flops sadly after losing a battle, you can't help but see a phallic resemblance.
* Sword and Shield weapon that is well-suited for beginners, but also favored by some veterans for its versatility. Although it doesn't excel in any one area like other weapons, it doesn't have any serious flaws, and it has the advantage of allowing wielders to use items even while brandished.
* Sword and Shield who battles him. Opal, the Fairy-type Gym Leader, also has shades of this as her battle invokes the "mischievous" aspects of fairies, where she gives you a series of questions that try to trick you into picking the obvious answer instead of the "right" ones. It's no coincidence she ends up picking Bede as her successor.
* Sword and Sorcery and which also takes out the Thief, leaving us with the Fighting Man, the Magic User and the Cleric of original D&D.
* Sword Art Online: A boy and a girl enter the world's first virtual reality massive multiplayer online role-playing game, only to discover that when you die in the game, you die in the real world too. As they work to clear the game, they fall in love, and their adventures continue in several subsequent virtual realities.
* Sword Art Online Abridged and in a game that is now literally life or death, doesn't even know how to open the interface's menu.
* Sword Art Online Abridged, and says she wishes she could be their daughter - which is exactly what Kirito and Asuna have come to view her as. And Kirito and Asuna ultimately decide that they were stupid for rushing into marriage, but want to stay together anyway.
* Sword Art Online Abridged (as seen in the page quote), with Yui calling out Yulier's partner Thinker for being trapped in a high level dungeon for a supposed "peace talk", without bringing any warp crystals that could teleport him home.
* Sword Art Online Abridged, as seen when Kirito cracks a joke after watching Corvatz die in front of him during a boss fight gone wrong.
* Sword Art Online Abridged as the strongest character in the game, has a slightly different tone.
* Sword Art Online Abridged as they try and murder a player named Schmitt:
* Sword Art Online Abridged: At the beginning of Episode 11, Asuna is admiring the sleeping Kirito and anticipating a bit of morning fun when he awakes, when her reverie is interrupted by a DM from Heathcliff, summoning them both to guild HQ.
* Sword Art Online Abridged, but in real life she's a skilled kendo veteran, and so in-game she has a habit of brandishing her sword in a fighting stance even while pleading for her life. This annoys her "attackers," who break character to offer some roleplaying advice.
* Sword Art Online Abridged, compelling Kirito to try and help someone no matter how much he hates it or how little their troubles have to do with him.
* Sword Art Online Abridged complete with customs checks and a guy running a pretzel stand.
* Sword Art Online Abridged episode 8 has a version of this when BallsDeep69 and Asuna start to bring up Kirito's sex life or lack thereof, so when the Aincrad Liberation Front shows up...
* Sword Art Online Abridged falls into this when telling a player how long they're been playing before returning to his normal voice.
* Sword Art Online Abridged footage to depict what would happen to players who died in the game as a means of locking them in. It re-uses said footage again at the end of the Aincrad arc, but what makes it particularly disturbing is that it retcons how Recon got his; he bought it at a marked-up price from a pair of grieving parents whose kid was one of the SAO casualties, and even after cleaning the brains out he still suffers occasional fear attacks from the faulty device.
* Sword Art Online Abridged... from the point of view of the blacksmith. All Kirito sees is Lizbeth tapping a hot piece of metal every other second while her eyes glow orange.

* Sword Art Online Abridged- Grimlock killed his wife (and there's no indication that he got Laughing Coffin to do it this time) because she wouldn't make him a sandwich one day (she was planning a raid with the rest of her guild). Unlike in canon, where Grimlock is sent to prison, here his guildmates beat him to death just offscreen.
* Sword Art Online Abridged has a moment where Kirito's reluctant to take a rest from his quest to rescue his wife.
* Sword Art Online Abridged has an inverted example, in which Yui takes an instant disliking to Leafa as an "obstinate hussy" distracting her daddy from his mission to rescue Asuna. Kirito does rein her in, but the point is made clear.
* Sword Art Online Abridged has Kirito calling out for Grimlock after explaining to Kains and Yolko how Schmidt couldn't have killed Griselda; this trope kicks in, and is justified, in that Asuna has to drag an uncooperative Grimlock to their location.
* Sword Art Online Abridged has Kirito going through the same thing as his canon self, only he's fully aware of the consequences of his actions.
* Sword Art Online Abridged has latched onto him as some sort of savior, a major guild is twisting his arm to make him a team player, and his friends can't stop laughing about it.
* Sword Art Online Abridged has this example from episode 3's narrator:
* Sword Art Online Abridged in Episode 10. Kirito respond with parental glee.
* Sword Art Online Abridged in its games. All real-life dialogue is completely uncensored.
* Sword Art Online Abridged: In-universe. Alfheim Online was intended as a pre-school edutainment game, but some bizarre design choices (such as a lot more combat than was necessary for such a game) meant that parents didn't really buy it for their kids. A role-playing club found the game and thought it would be a good place to play out a scenario that they had been working on. It spread from there, so most of the players are hardcore role-players, or just people who thought the flight system would be cool.
* Sword Art Online Abridged is the result of Kirito blurting out a proposal in the awkward moment after sex, Asuna being so surprised that she accepts it, and then neither of them being willing to "blink" first and admit out loud what a terrible idea it is. Their subsequent adoption of Yui is another move in this game and an attempt to raise the stakes and scare the other into breaking the marriage off.
* Sword Art Online Abridged, Kibao says he doesn't need evidence and asks Jesus to back him up. One player with the name Jesus responds "It's pronounced 'Hay-soos', and I don't know you."
* Sword Art Online Abridged, Kirito realizes that the game's lead developer is masquerading as a player on the clearing team when he angrily shouts "Oh, so NOW you've seen TRON?!". The "now" part of that connects him to an earlier statement by the developer in episode 1, who asked if anyone has seen TRON, and was disappointed that no one appeared to.
* Sword Art Online Abridged like Kirito and Asuna managed to form a working relationship, so she faked amnesia and put herself in a position to be adopted by the lunatics in order to study them more closely and fix what must have been a flaw in her data. Or as Yui puts it,
* Sword Art Online Abridged" Nobuyuki Sugou so he can pay them instead.
* Sword Art Online Abridged qualities of his canon counterpart ramped up to this, going out of his way to piss others off for a quick laugh. Due to his high stats, no one can stop him from doing what he wants.
* Sword Art Online Abridged remembers an even more embarrassing detail:
* Sword Art Online Abridged scenario. Even after Kirito shows up and drives the Salamanders off, they promise they won't be deterred.
* Sword Art Online Abridged. Suguha's a year younger than Kirito, but she mercilessly thrashes him during kendo practice even as he protests that he just got out of the hospital, and spends the rest of her time with him unleashing a constant stream of sarcasm, insults, and other verbal abuse.
* Sword Art Online Abridged that had already killed thousands of people, and is

left the most wanted man on the planet after talking with Kirito and realizing how much of a fuck-up he turned out to be.
* Sword Art Online Abridged (that her "cock-sampler" of a cousin is in her game) before screaming in disgust (because she said he had a sweet ass).
* Sword Art Online Abridged. The clock keeps counting down while the screen fades to black, and just before it should reach zero, there's the sound of a coin being inserted.
* Sword Art Online Abridged, the players have to resort to flicking mayonnaise as a substitute for... other fluids, since this is supposedly a kid's game.
* Sword Art Online Abridged, the very drunk narrator is ranting about his failed marriage and vomiting out-of-frame.
* Sword Art Online Abridged they even attack, one even putting together the following:
* Sword Art Online Abridged, though he doubts that's a market big enough to profit from. Kirito soon finds out that the game has experienced a recent surge in popularity despite all this, mainly due to a small group of roleplayers finding the game in the bargain bin and thinking it would be a good place to play their planned campaign. It exploded from there, presumably by word of mouth, but it's still clear that it's a chaotic, buggy mess with inconsistent censorship.
* Sword Art Online Abridged to something Kayaba said back in episode 1).
* Sword Art Online Abridged was released anyway because it had already been delayed twice, and the publisher decided "It's a big open world, no one's gonna notice a few glitches!"
* Sword Art Online Abridged was the result of a programming error brought about by too much crunch time.
* Sword Art Online Abridged when her eyes, nose and mouth are deleted from her avatar.
* Sword Art Online Abridged when Kains hears Yolko dragged a stranger into a plot they were weaving.
* Sword Art Online Abridged. When Lizbeth is about to say it, he manages to get her to stop talking, though he's still hopelessly tearful.
* Sword Art Online Abridged when said leader swears he can duplicate their rare items, only to learn that exploit got patched out.
* Sword Art Online Abridged, when Sugou announces his intention to marry a currently-comatose Asuna at the start of the second season:
* Sword Art Online Abridged, when Sugou starts describing how interesting he finds the Nerve Gear technology and how it deals with stats. What really sells it is how TERRIFIED Asuna sounds as she realizes the implication.
* Sword Art Online Abridged where the door to his boss room doesn't unlock, trapping the clearing team indefinitely.
* Sword Art Online Abridged will do something to "piss someone off and kill thousands." Asuna is assigned to be his guard, as there’s only a slightly smaller risk of her doing the same thing. Heathcliff does at least try to spin the whole thing as a honeymoon of sorts.
* Sword Art Online adds new gameplay features, customisation, and a vastly improved translation.
* Sword Art Online after Kirito is nearly killed. Unlike most examples of this trope, this happens relatively early on; episode 10 in the anime, and chapter 16 in the light novels.
* Sword Art Online against an attempted bank robber. When she takes his gun and fires it at him, the recoil realistically sends the gun reeling back over her head.
* Sword Art Online: Alternative Gun Gale Online AGI build leads her to defeat her enemies in hilariously one-sided fashion.
* Sword Art Online: Alternative Gun Gale Online), and Karen/LLENN was rather apathetic about participating, some readers found little reason to care.
* Sword Art Online: Alternative Gun Gale Online. And of course the whole thing is inside a game, so it's possible (though certainly strange) that the governing AI decided to give LLENN some help.
* Sword Art Online: Alternative Gun Gale Online by the system mechanics; player

corpses don't despawn during the tournament and are registered as "Immortal Obejects", which means they can't be damaged and thus projectiles won't pass through.
* Sword Art Online: Alternative Gun Gale Online, during the second Squad Jam, Team T-S camped the entire battle, and came up after the bitter, desperate battle between Pitohui and LLENN to finish off the badly wounded survivors and win the game.
* Sword Art Online: Alternative Gun Gale Online for Pito & M near the end.
* Sword Art Online: Alternative Gun Gale Online- in order to prevent Karen "LLENN" Kohiruimaki from guessing Pito's real identity. As such, it's unclear how much else he deliberately changed to keep Pito's true identity secret.
* Sword Art Online: Alternative Gun Gale Online - in real life, the British SAS used pink land rovers for desert ops. Played straight when she's in a forest and sticks out like a sore thumb.
* Sword Art Online: Alternative Gun Gale Online, is a singer in real-life. This is even more obvious in the English dub, where they still use the audio ReoNa recorded rather than having someone translate it into English.
* Sword Art Online: Alternative Gun Gale Online isn't an example in and of itself, but the game Gun Gale Online takes place in a post-apocalyptic world that's basically an excuse to have deathmatches between characters. In Volume 6, the Test Play Tournament has an excuse plot about reclaiming a WMD from a terrorist group. Since almost all of humanity has been wiped out, the main characters point out the plot doesn't really make sense, and make fun of the novelist who proposed it.
* Sword Art Online: Alternative Gun Gale Online (it's explicitly said to be a luxury apartment), and why she flies first-class to and from her home in Hokkaido, make a bit less sense than they would otherwise.
* Sword Art Online: Alternative Gun Gale Online Karen "LLENN" Kohiruimaki's best friend Miyu "Fukarizoh" Shinohara calls her "Kohi."
* Sword Art Online: Alternative Gun Gale Online LLENN achieves this by accident: she made her gear pink because she wanted a cute avatar, but eventually discovered that her choice of armor color also makes for excellent camouflage in the desert, giving her a big advantage over opponents by allowing her to ambush them with ease.
* Sword Art Online: Alternative Gun Gale Online: One of LLENN's first kills in the second Squad Jam tournament has her making use of her avatar's small size to charge between a guy's legs with a knife. Given that she immediately goes for an instant-kill hit while he's squealing in pain, she obviously didn't aim there for the HP damage. When the scene cuts to the audience in the Squad Jam lobby, several male watchers are holding their groins.
* Sword Art Online: Alternative Gun Gale Online, one team entering the fourth Squad Jam, which consists purely of suicide bombers, is called Team DOOM.
* Sword Art Online: Alternative Gun Gale Online, overhears some short high school girls talking about how tall she is. She assumes they're making fun of her, but it later turns out that they think it's cool.
* Sword Art Online: Alternative Gun Gale Online shield, which is impervious to nearly any sort of gun in the game. It turns out that, while those bullets still fail to penetrate the shield, they hit hard enough to break the hinges and support bars holding the shield together, since they're made of far less exotic materials.
* Sword Art Online: Alternative Gun Gale Online that she wasn't trapped in a death game, and decided to invoke this in GGO. If she dies in a tournament, she plans to commit suicide after. Therefore, the only way for her to survive is for LLENN to kill her, since Pito promised LLENN earlier that they'd meet up in the real world if LLENN killed her.
* Sword Art Online: Alternative Gun Gale Online. This demonstrates one of the biggest security headaches: Human error. Luckily for Pito, most of the really big flaws of NerveGear have to be actively taken advantage of by an outside party, and no one is interested in trying any more.
* Sword Art Online: Alternative Gun Gale Online, where Sinon and Kirito's theory is put to test by some real-world military professionals who are experimenting to see if the game would work as a training simulator. They eventually come to the

conclusion that, while the premise is sound, there are two major flaws: the system assists oversimplify certain elements (and certain workarounds that cause the system assists to not take effect are very bad habits in real-world situations), and players levelled in the right way can acquire unrealistic properties for which there are no real-world analogues (for example, the very small and childlike LLENN running down the highway at speeds relative to a vehicle).
* Sword Art Online, and local branch offices of aerospace giants Raytheon and Northrup Grumman, among others.
* Sword Art Online and not everyone wants to risk their lives to get out of it. Asuna Yuuki (ID: Asuna) has a maxed-out cooking skill before the game ends, and Kazuto Kirigaya (ID: Kirito) eventually takes up fishing.
* Sword Art Online and seemingly being stuck for almost a minute after impact.
* Sword Art Online, and the fitness level of a player's avatar and real body often differ, at least in the cases involved.
* Sword Art Online anime ends with the cast deciding to run through the newly recreated Aincrad castle from start to finish, only this time without the Death Game aspect.
* Sword Art Online appears to exist in the same universe too, but it's set 21 years in the future from SAO so it's a lot less apparent.
* Sword Art Online arc, as all of her emotional problems come to the surface and she simply breaks down. Kirito comforts her during this, but since the moment was captured during a digitally-televised online tournament, he feels a need to explain to his girlfriend that there were no romantic implications to this event (Asuna, for her part, is a little suspicious/jealous when she sees it but accepts Kirito's explanation).
* Sword Art Online arc, Asuna' mother forcefully disconnects Asuna's VR helmet and scolds her for being a few minutes late for dinner, accusing Asuna of "disrespecting the staff's efforts," Asuna is sorely tempted to remind her of several occasions where Kyouko was also late for dinner, threw out the meals, untasted and had the staff make them again for her own convenience, but ultimately decides not to do so.
* Sword Art Online arc defines what a soul is through the Soul Translator technology. Based on SAO's "Quantum Brain Dynamics" theory, there are light particles that act as a quantum unit of mind called "Evanescent Photons", which exist within the microtubules of a nerve cell. These light particles exist in a state of indeterminism and fluctuate according to the probability theory. A collection of these particles form a Quantum Field, which have been dubbed "Fluctuating Lights" (or "Fluctlight" for short) which is what makes up the human consciousness, or in other words, the human soul. The Soul Translator machine is able to record the spin and vector of each photon within the microtubles and translate this information into a readable form for computers. It diverges from standard VR in that it's not merely nerve signals being transmitted into the system, but the soul itself.
* Sword Art Online arc in the second season of the anime, Silica's tiny dragon Pina cries his agreement to everyone's "It's a trap".
* Sword Art Online arc is the closest one for the series to have, with Underworld being filled with many monster like Goblins and Giants from the Dark Territory that outright grotesque and violent and the Human Realm while seemingly looks peaceful on the outside, is actually full of hidden corruptions and crimes everywhere.
* Sword Art Online arc, it's revealed that anybody who becomes an Integrity Knight is deprived of their memories prior to it, and for all intents and purposes, they're reborn as a new person altogether. Thus, the Alice that Kirito and Eugeo met as children and the Alice they encounter as an Integrity Knight are effectively two different entities, and restoring the former would erase the latter from existence.
* Sword Art Online arc, Kirito carries Asuna this way as they fly to the World's End Altar.
* Sword Art Online arc, she's... Kirito's girlfriend. She has almost no plot significance whatsoever, and does not appear in GGO's game world; all of her scenes

are either milling about in ALO wondering what Kirito is doing, or having conversations with him in the real world.
* Sword Art Online, Asuna catches Kirito napping and reads him the riot act, but he convinces her to take a break and she takes a nap. When she wakes up, she's drooling and has grass stuck to her face.
* Sword Art Online. Asuna quickly points out that is not an option because they would be leaving everybody else trapped as well, and their real world bodies on life support will eventually die, plus she wants to be with him in the real world. Kirito regains his resolve and they continue on the quest to beat the game.
* Sword Art Online, Asuna's ALO build, playing as an Undine Healer, but also specializing for rapier sword skills, complementing her experience from SAO. There's a reason she's nicknamed "Berserk Healer."
* Sword Art Online, Asuna's idea of "sharing" a cake with Kirito involves cutting him a slice and taking the other 7/8 of the cake. Kirito objects, saying they should each get half. He eventually settles for 1/4 while Asune takes the other 3/4.
* Sword Art Online: Before attempting to get her crush, the notoriously-solo player Kirito, to join her party, Asuna cooks him a meal with an S-class ingredient. Sure enough, he is exploring the latest dungeon with her, and only her, and Klein even congratulates him for being "ensnared by feminine wiles". Later volumes continue this trend with him loving every food she makes for him.
* Sword Art Online, before heading off to fight what would be the most dangerous and costly boss battle in the game to that point, Kirito proposes to Asuna that they just stay in SAO and live out their lives in their virtual prison that would kill them in the event of a Game Over. Asuna declines, though, since every day trapped in SAO was another day their physical bodies wasted away, as well as her desire to meet Kirito and be with him in the real world.
* Sword Art Online chibi special episodes, Kirito gives off shades of this in regards to his and Asuna's AI daughter Yui. The main victim of his protective tendencies is Klein, who he threatens constantly about teaching Yui inappropriate things.
* Sword Art Online consent (which she wouldn't have, as she despised him). A wedding is not legal if one party is not able to speak their vows and/or sign the license, and parental consent is not the same thing as speaking someone's vows by proxy. This is only an issue in the Anime however, as the original Light Novel version of the scene addresses these exact issues and instead has their "wedding" planned as nothing more than a symbolic gesture before Asuna's father simply adopts her would-be-groom instead.
* Sword Art Online) couldn't be perfectly emulated. Mixing together certain in-game items, however, could produce flavors surprisingly similar to foods in the real world.
* Sword Art Online: Despite all the characters in the SAO world being real people, many guilds' armies are composed of nothing but faceless goons.
* Sword Art Online, downplayed by SAO's player cursors; any player who commits a crime gets their cursor turned orange instead of the usual green, regardless if that crime is Player Killing or just transporting a green player to the prison area (including if that green player is just sitting as bait for a guild of orange players). Possibly because of this, SAO players give the nickname "red players" to murderers (it may also originate from the 1997 MMO Ultima Online, where lawful players have a blue tag and minor lawbreaking bestows a grey tag, but serial murderers are identified by their red tag). However, the permanence of the cursor-change is variable; if you PK, you're orange for good, but otherwise it'll wear off over time unless you commit repeated offenses.
* Sword Art Online dropping hers and screaming is what turns the crowd into a furious/panicking horde.
* Sword Art Online, especially Argo. Argo once sold a piece of information, then sold the information about her selling that information, then offered to sell even that information of the sale of information about the information the original buyer of the actual information. Quite the knowledgeable knowledge broker.

* Sword Art Online Far from killing the ship, this simply shifts the focus to the relationships between them and Yui, along with the emotional impact of their various trials.
* Sword Art Online features this, in yellow. In an amusing reversal, this (Japanese) series has ENGLISH letters in the rain.
* Sword Art Online from her phobia of guns, as part of her own self-therapy to get over it.
* Sword Art Online game mechanics, in which a player's accuracy increases the slower their heartbeat, so she deliberately keeps herself icy calm when sniping to maximize effectiveness. Out of battle, though, Sinon is much warmer in personality, at least around her friends, and especially once she starts making some progress on her psychological hangups.
* Sword Art Online GGO avatar) is Kiriko. In Fatal Bullet's Kirito Mode, in order to try to blend in, Kirito uses an alternate account when entering the BoB tournament (Which has the appearance of his canon GGO avatar). Said account's name? You guessed it: "Kiriko".
* Sword Art Online got an English release around the same time, and Yen Press began to publish English translations of the light novels beginning April 2014.
* Sword Art Online has anything with Sugou, a megalomaniac with an unhealthy obsession (and total willingness to rape the comatose body) of Asuna.
* Sword Art Online has a retelling of the Aincrad Arc in much greater detail in the form of the manga series Sword Art Online: Progressive. The main difference, however, is that the story is told from Asuna's perspective, NOT Kirito's.
* Sword Art Online has found himself in this situation a couple of times:
* Sword Art Online has Kirito on the receiving end twice; once in ALfheim Online, and once in Gun Gale Online. The textures of both blows seem to indicate HP damage.
* Sword Art Online has two types of weapons: Energy weapons and physical weapons. Energy weapons always shoot straight without worrying about wind and have lightweight ammunition, but energy shields automatically cut their damage in half, and all players have those. Physical weapons ignore shields, but their projectiles are affected by wind and their ammo is heavy and bulky. Therefore, energy weapons are only used against monsters, which don't have shields.
* Sword Art Online. He was a gamer and after he got trapped in and escaped the virtual reality game SAO. The skills he learned from the game allowed him to beat up the guy that kidnapped his girlfriend.
* Sword Art Online him in an earlier duel. Were it not for the timely arrival of Asuna who had been following them, it's likely Kuradeel would have also killed Kirito, then made up some random excuse as to why the two guildmates were dead to their guild leader Heathcliff.
* Sword Art Online. However, it does result in some difficulties in other situations...
* Sword Art Online if her buttons are pressed. When Asuna convinces Kyouko to log onto ALO to see Asuna's house, Kyouko immediately notices that her avatar feels light. Asuna points out that this is only natural, since the avatar only weighs 40 kg (roughly 88 pounds, far less than what an average adult woman weighs), prompting Kyouko to chide Asuna and ask if she's gained weight. Asuna realizes that this is the first time in a long time that she and her mother have been able to have a conversation about nothing.
* Sword Art Online II, but he's in the middle of a tournament so he has to move. In his next several fights, he charges straight at his opponent without much apparent thought.
* Sword Art Online in any way will incite the rage of the fanbase. But only if you do so while implying that fans enjoyed the scene, as even they despise that moment and sincerely wish it never happened.
* Sword Art Online: In Episode 11 of Season 1, Asuna watches Kirito as he sleeps, while the two are in the house they purchased to live together after marrying (in-game), and she thinks about how he's usually so bold, yet now he looks naive and innocent, almost like a child. And all of a sudden it strikes her that he might actually be younger than her (and she's right).

* Sword Art Online (instead of helping plan the next raid) because it was such a nice day.
* Sword Art Online in the later adaptations with him and Sachi being close friends instead.
* Sword Art Online in the series first arc. Once that's done, Kirito moves on to another game, ALFheim Online, he discovers nearly all the compatible stats and abilities he had in SAO have carried over to ALO. As a result, he starts out with a high amount of fighting power, but needs instruction on the game's more basic elements such as flying and (especially) landing.
* Sword Art Online. In this form, he is described as having long black hair, crimson lips, and shining black eyes fringed by long eyelashes.
* Sword Art Online, in which characters immerse their consciousness completely within a virtual reality.
* Sword Art Online is a borderline case. She has better than normal vision, yet still wears glasses. In this case, her spectacles are made of bullet-proof glass, and help her deal with her crippling fear of guns.
* Sword Art Online is a love story in a sci-fi setting, with harem, medieval fantasy, mythology, detective fiction and post-apocalypse in between.
* Sword Art Online is put in this role in the Fairy Dance arc. Her then-fiance Sugou intercepted her and 300 other SAO players after the game was cleared and trapped them within ALO, and kept her in particular locked in a giant bird at the top of the World Tree. However, she manages to figure out the code to the lock on her cage, times her escape so that Sugou wouldn't notice her escaping and managed to make it to a terminal where she could log out before she got caught, and even after she got locked back in her cage, she still managed to grab the admin keycard at the terminal.
* Sword Art Online, it's implied that Asuna's cousins, who are also competing with her academically due to a family-wide rivalry between their parents and hers, expressed sympathy for her being trapped in the eponymous video game for two years because she's no longer a threat to them. As such, while a part of Asuna's glad to see them again, she also recognizes their pity for what it is and doesn't like it.
* Sword Art Online. It's thus fairly obvious that he's the traitor to the Sylphs, although the twist is more about the existence of one, rather than the traitor's identity.
* Sword Art Online. Justified in that his level and therefore stats (including speed) are way above theirs.
* Sword Art Online, Kirito, is a solo player. It's seen most dramatically in the chronologically ordered Anime. Klein, the new friend Kirito just taught how to swordfight: "Kirito!" *Kirito walks away.* It's played fairly straight in later arcs, though.
* Sword Art Online, Kirito is extremely haunted by the deaths of his former guild, the Black Cats of the Full Moon, but especially that of Sachi, the lone girl in the group, since the two were clearly attracted to one another and he had promised that he wouldn't let her die. The fact that he was unable to keep that promise still weighs heavily on him, and he still remembers her in dire moments, since she left him a message to assure him that he wouldn't blame him if she died and encouraging him to keep on living.
* Sword Art Online: Kirito's girlfriend, Asuna, is a year older than him. She herself doesn't realize this until their "honeymoon" in the first season, which is a surprise to say the least.
* Sword Art Online: Kirito was rendered catatonic and is cared for by Alice. Kirito's wife Asuna eventually arrives and tries to see him, but Alice has no idea who she is and attacks her, thinking she is either an assassin or a stalker about to attack him. It doesn't help that Asuna doesn't try to explain herself and just keeping demanding "My Kirito", which further convinces Alice that she is a stalker. The fight is broken up by a third party, then they are eventually able to come to an understanding.
* Sword Art Online light novels, Kirito briefly parties with another player to perform a sidequest. The other player does not survive, so Kirito uses his sword as

a tombstone. Unfortunately, due to the fact that unattended weapons have their durability degrade over time, it only lasts a few hours.
* Sword Art Online make a field trip over this trope whenever they're onscreen together.
* Sword Art Online manage to get past them, the door will not open for anyone but a GM.
* Sword Art Online moment, resulting in Kirito taking a massive hit from her as a result.
* Sword Art Online, monsters only aggro on one player at a time. As such, players in parties take turns attacking a monster and "Switch" with teammates to recover, taking turns until the battle is concluded.
* Sword Art Online napping under the sun and he convinced her to take one herself... and she slept the best she had in months. She then started to think of him every night before going to sleep and without fail she would sleep without nightmares - prompting her realization that she was in love with him.
* Sword Art Online never look at someone else the way they look at each other. They do consider themselves husband and wife even though they are not of age.
* Sword Art Online, Nobuyuki Sugou disappears from the story once the police apprehend him.
* Sword Art Online of her group of friends. Fittingly, she wears her hair this way, which only adds to her cuteness.
* Sword Art Online. On an additional note, Kirito and Asuna are both in their mid-teens.
* Sword Art Online, one event has Kirito and Philia questing in a cave, where Kirito promptly decides to put out the torch before telling Philia to back against the wall and keep quiet. Philia is under the impression that Kirito wants to make out with her and is startled when her hand is held. However when Kirito relights the torch, Philia is shocked to discover Kirito was standing on the other side of the cave, and the one holding her hand was actually a monster. Turns out Kirito was testing if the monsters were attracted to light and Philia is really pissed off at being misled.
* Sword Art Online Online, he pronounces it ALF-haym. Later on, his friend informs him that it's actually pronounced "ALV-haym", with the F being pronounced as a V.
* Sword Art Online on the night of December 24th. He leaps down from his sleigh to challenge players on the ground.
* Sword Art Online, people who are in a close relationship can share each other's inventory. If they are married, their inventories merge.
* Sword Art Online, possibly to reinforce even further the antagonism between them.
* Sword Art Online pulls this off twice during the climax of the Fairy Dance arc:
* Sword Art Online rather than true blood siblings. However, it's pointed out that Suguha knows that since they were raised together, the rest of her family would oppose them getting together, which is why she tries to get over Kazuto.
* Sword Art Online, Raxis references this trope when he complains that the author needlessly spelled out everything for them.
* Sword Art Online, Rosalia, states there's no proof of the game designer's admonition that if you die in the game, the Nervegear game console kills you in real life. She uses this to justify attacking other players, causing at least four deaths. Whether she actually believes what she says is left ambiguous.
* Sword Art Online's Australian release has a PG for all but the last volume, which is rated M for violence, despite the fact that there wasn't really any increase in violence in the final volume. Perhaps it refers to sexual violence, given that towards the end the main antagonist attempts to rape Asuna but fails. Aniplex just slaps the whole series on the North American release with a 13+.
* Sword Art Online, Sigurd threatens to kill Kirito when the latter intercedes in a dispute between Sigurd and Leafa. Since Kirito is in an enemy capital city, he can't fight back, but Sigurd stops when one of his underlings points out that there are people watching, and it would look bad if he killed Kirito. Apparently believing that taking his anger out on Kirito wouldn't be worth the blow to his reputation, Sigurd lets Kirito go.

* Sword Art Online: Silica and Sinon have Cait Sith avatars in Alfheim Online, which are designed to evoke this trope, complete with the ears and tail.
* Sword Art Online situation (and promptly forgot them when it actually happened).
* Sword Art Online so as to not have the players start fighting amongst themselves.
* Sword Art Online: Special Edition takes place in December, Chapter 24 of the fic was posted on October 25th of 2019.
* Sword Art Online started off as a light novel series loved by the few who knew of it at first, but when the anime came out everyone turned against it and claimed the anime was crap. It has been mainly due to how the characters are handled, and the second half of the anime which is considered by many the worst.
* Sword Art Online stopping the needle, all by the mid-point of the second season.
* Sword Art Online: Sugou Nobuyuki insists on being referred to as Oberon while in ALO. Kirito couldn't care less and continues to address him by his real-world name.
* Sword Art Online, Suguha lets her feelings for Kirito develop in order to help her give up on Kazuto. That's why, by the end of Episode 22, she has a rather anguished moment where she finally confesses her love to Kazuto right after she learns that he and Kirito are the same person.
* Sword Art Online taller than everyone else. It's hard not to be intimidated by someone like that, no matter how nice they are.
* Sword Art Online that Asuna completely despised Sugou even before she was trapped in SAO for two years and the events of the Fairy Dance arc.
* Sword Art Online that declines with damage and results in the destruction of an object, or the death of a person, upon reaching zero.
* Sword Art Online: The Alicization arc begins with a young Kirito and Eugeo chopping away at a massive tree and hanging out with their mutual friend Alice. They then go to a cave in the End Mountains, resulting in Alice being arrested and taken away. The story returns to the real world, with Kirito discussing his work with Asuna and Shino, eventually leading to Kirito being attacked and the story beginning. The opening episodes provide necessary exposition and show events that become important later, but it takes a while for the arc to get going.
* Sword Art Online, the conflict between the program's core programming to help the players and the orders to not interfere created errors, which led to sentience. She eventually appears in the game as a little girl named Yui, in order to become the daughter of two of the only happy players in the entire game: Asuna and Kirito.
* Sword Art Online, the Integrity Knights are the closest thing the human lands of the Underworld have to a standing army, but Bercouli, their commander, is fairly relaxed with regards to etiquette, as seen when he insists that Alice, his protégé and subordinate, not salute to him.
* Sword Art Online, the main virtual reality aspect is just the visual and audio realism... and the imminent death.
* Sword Art Online-themed Gun Gale Online, and immediately begins consistently and handily defeating his opponents, despite having never played the game or any firearm-based MMOs, and going up against players with far more experience than him. It isn't until the end of SAO2 that he actually loses a fight fair and square, and by that point, it hardly matters.
* Sword Art Online The Movie: Ordinal Scale from Suguha to get him in better condition to compete.
* Sword Art Online The Movie: Ordinal Scale them all). After he gets beaten by Kirito, he tries to remind his employer that he promised to reunite him with Yuna, but Shigemura then says that, since Eiji spent the most time with Yuna, his memories are the most important ones and they'll be taken as well, much to his shock.
* Sword Art Online, then proceeds to kill him, thus, foiling Sugou/Oberon's plans. Even if Sugou had no way of foreseeing Kayaba's intervention, that still wasn't exactly a smart move.
* Sword Art Online. There are still several girls who fall for Kirito, who are presented as quiet tragedies, since they never had a shot with him in the first place. Asuna also has other men interested in her, but most of those with names are her husband's friends.

* Sword Art Online, the story was adapted into two episodes "Murder in the Safe Zone" and "Illusionary Avenger".
* Sword Art Online, the Underworld's human civilization assigns each person a Calling at a young age, determining their purpose in life, and anyone who accomplishes this is free to choose another. There are also nobles of various ranks, with higher-ranked nobles having the judicial authority to issue punishments to commoners and lower-ranked nobles.
* Sword Art Online, they are fully robotic, but notorious for being more temperamental than actual horses, to the point where players who can ride in real life can't get them to listen.
* Sword Art Online. This also holds true for Gun Gale Online, where Sinon is one of the only girls shown onscreen in the male-dominated game.
* Sword Art Online, this is a prerequisite for clearing each level of Aincrad. Each level's stairway-dungeon has 20 floors, and the final floor has the boss that must be defeated to clear the level.
* Sword Art Online this is part of the premise - when the villain traps 100,000 players inside an MMORPG, he also changes their avatars to match their real-life appearances. Survivors who later join other MMOs choose avatars resembling themselves out of habit, though other players rarely do so.
* Sword Art Online, though the only real similarity is being trapped in a virtual reality MMO. For the former, it's the premise of the series. For the latter, it's only a handful of characters, and the majority of the plot is barely a blip in the overall game world. In addition, the original web novel of the former was released around the same time the first game of the latter was released, which leads to people on both sides of the debate either saying the timing proves the ripoff, or shows that the premises were simply coincidental.
* Sword Art Online to hide his monstrous nature from his fellow Glowgen mercenaries. Once he logs into the Underworld as PoH and abandons the act, his physical and psychological violence against enemies and allies alike is played for horror.
* Sword Art Online. Unfortunately for her, he sees her as a little sister and, by the time he and Silica meet up again, he's already in a relationship with Asuna.
* Sword Art Online, unless the final boss of SAO is defeated, players will remain trapped in the virtual world until they die one way or another.
* Sword Art Online. Unofficial, since SAO had no actual law enforcement, but when the player whose strength and skill is second only to the GM decides to take down bandits dead or alive, he's earned the right to be called sheriff.
* Sword Art Online uses cels and mels in place of centimeters and meters.
* Sword Art Online variety. In the Alfheim arc, while interrupting the attack on the Slyph / Cait-Sith meeting, Kirito tells the Salamander General that he represents the (non-existent) Spriggan / Undine alliance. Kirito is a Spriggan, and Asuna's (eventual) main avatar is an Undine... meaning the two of them form a Spriggan/Undine alliance of their own.
* Sword Art Online video game continuity, is very skilled in sewing, which she puts to good use by making many kinds of clothes for all the girls (from uniforms and costumes to lingerie). She even made a machine in one of the games that auto-generate costumes!
* Sword Art Online, Virtual MMOs have pain inhibitors that prevent this from happening: if a player's pain inhibitor is turned down low or completely disabled, they can suffer actual bodily harm in the real world. The most extreme case is how the creator of the titular game deliberately turned his creation into a deathtrap by designing the virtual reality helmet to destroy the player's brain with microwave radiation if they die in-game or if someone else tries to remove the helmet from them.
* Sword Art Online (VR MMORPG), where thousands of players immerse their consciousness completely within a virtual reality, but remain trapped there for several years, being forced to adapt to the new virtual environment. Subsequent story arcs take place in different VR MMO games, but without the dangers from having one's consciousness trapped in the game.

* Sword Art Online was originally a one-volume stand-alone story written for a literary competition in 2002 that he didn't even submit it to. It was instead put on the web, and only after gaining popularity, did he decide to start writing follow on volumes. SAO eventually got so big it was actually published to paperback in 2009 and is now 11 volumes and still going, with a Manga, Anime, and Video Game adaptation plus a huge fanbase.
* Sword Art Online was the one who set up the death game in the first place.
* Sword Art Online when he blurts out of his plan to save Asuna from Sugou's clutches as this reminds Leafa that he has feelings for Asuna.
* Sword Art Online, when Kirito and Asuna are looking for a house on Floor 22 to buy, they stumble onto Argo and a Wizard of Oz-inspired Quest. Since their levels are miles above that floor's, the three of them use shortcuts like jumping on balconies that they aren't supposed to be able to reach.
* Sword Art Online, when Kirito initially discovers that the Holy Stone of Returning Souls only works within ten seconds, this is his reaction.
* Sword Art Online when they threaten her with an air gun (though she's still far from being completely recovered).
* Sword Art Online when we are supposed to believe that Kirito and Asuna were meant for each other from the beginning. Compounded in that the writer himself admits regularly that he has no idea how to write supporting female characters, so he just makes them love interests.
* Sword Art Online, when Yui has a panic attack while Kirito and Asuna are looking for her parents, the area around them has a minor visual glitch in addition to giving off a sound like loud television static. This is one sign that she's not a player like Kirito or Asuna, but an artificial intelligence.
* Sword Art Online, which is pretty impressive on its own — nobody really bothers putting much effort into non-combat skills like that. The supreme part is that she experimented with different spices so much that she was able to figure out how the system synthesizes flavor, and create things that simply do not exist in the game. Like soy sauce. One thing that makes this particularly funny is that at the beginning of the game when offered the knowledge of how to get cream for use as a condiment, she comments that she isn't in the game to eat good food. The "Extra Edition" OVA shows that her cooking skills extend to outside SAO, cooking lunch for her friends during their summer vacation.
* Sword Art Online, which was released during the time that thousands of players were trapped in SAO. The game quickly proved popular for being a VRMMO that was not dangerous to the players. Little do the players know, the game is actually being used to conduct illegal experiments in how to use VR to rewrite memories.
* Sword Art Online with nobles of various ranks, and the nobles tend to be rather corrupt. The nobles were originally intended to train in the sword to protect the human realms, but in practice, they hide in their lands, having forgotten their duty to the common people. There are some exceptions, mostly among the lower-ranking nobles(some of whom are practically no different than commoners), but there are also those who are even worse than the norm and horrifically abuse the common people in ways that are technically allowed by the Taboo Index.
* Sword Art Online wonders whether he's actually Kirito or just an AI.
* Sword Art Online, Yui is sleeping peacefully on top of the baby dragon Pina, which is curled up on Kirito's chest, as Kirito is sleeping peacefully in his chair. The sweet sight is so peaceful that all the girls studying want to join in.
* Sword at Sunset and later his best friend Bedwyr through battle wounds. Artos and Guenhumara don't suffer the effect, but Bedwyr and Guenhumara do.
* Sword at Sunset Medraut had a creepy, damaging relationship with his mother Ygerna, who conceived and raised him as a weapon against his father.
* Sword at Sunset of cavalry captains tried it out while on campaign and never looked back.
* Sword at Sunset's eponymous Companions, formed in imitation of Artos's, and their rivals the Teulu, the King's Bodyguard.
* Sword at Sunset with his sister that he develops some non-specified sexual dysfunction, whose scope he doesn't realize until his deeply awkward wedding night.

* sword beings, simply by killing so many supernatural creatures with the weapon that their essence rubbed off on it and anchored it in a higher plane of existence.
* Sword Cane, after Danny and Colleen overpower him and manages to get the Hand's chemist Radovan away from them. Then she cuts off his head and skewers it on a pole in the back of a truck, where Danny and Ward find it the next day, with a stick on it with the address of a location where Danny is to be challenged in a duel with several Hand assassins.
* Sword Cane and any older swordsman who wishes to lull enemies into a false sense of superiority.
* Sword Cane knife. Then Martin asks Bart to help him with the ribbon on his box of candies and says he'd be glad to share, at which Jimbo easily cuts off the ribbon with a knife and steals the box. Then he walks past Doctor Hibbert performing surgery with a pocket knife, successfully removing an about-to-burst appendix and saving a man's life. He then announces "Don't thank me, thank the knife!" as the crowd starts cheering.
* Sword CaneSometimes a sword is concealed within an umbrella instead of a cane.
* Sword Cane (with the aforementioned blood of a thousand enemies rumour), and he allows them to think this because "if people think you might have a sword, they forget that you definitely have a club". His actual weapons of choice are ordinary stilettos.
* SwordCat Princess — ostensibly to maintain Kathryn's modesty, though Smiley is gone by then and, as Kathryn points out, Jack is unconscious.
* SwordCat Princess — warning him away from thoughts of sexual assault, should he have any (he doesn't).
* Sword Coast Stratagems installed, giant spiders will shoot wads of webbing at characters, holding them in place for a while if they fail a saving throw.
* Swordcraft Story, that are almost impossible to avoid. Female summons in both games gain a crush on the main character and playing as a female does nothing to deter them, and in-fact only encourages them (Sugar only gives the famed kiss to a female PC).
* Sword Dancer books have the sun-baked, semi-nomadic Southron race who live in the desert and the blond, fair-skinned Northerners who live in the mountains. Later, she expanded it to include a sort of dark-Caucasian islander race.
* Sword Daughter is a direct adaptation of a gamebook from the "Dragontales" line, now illustrated in the style of a visual novel.
* S.W.O.R.D.: During issue 4, a Knull-possessed Cable inflicts this on Fabian Cortez and Sunfire, in a manner of seconds.
* swordfight against Tarquin, seduce women, and command his airship. He also teaches Elan the secrets of how to become a dashing swordsman and manages to fit the entire training in a 20-minute montage sequence to boot.
* Sword Fight, duh. The whole game is 1v1 fights against swordwielders where both you and them have different styles and techniques.
* Sword Fight goes on for so long the duellists are gasping for breath, propping themselves up on their swords, and occasionally mustering the strength to make wild roundhouse swings at each other. The duel is ended by their seconds when they discard their swords and just start having at each other.
* Swordfish: During the climatic bank robbery, Gabriel Shear arranges for his crew and hostages to be transported to an airport in a bus he prepared, but the destination is just a misdirection. His real escape strategy is to have a helicopter fly over the bus while it is driving, hook its cables to the bus's modified frame, and lift the whole thing away from the police convoy (unfortunately the flight gets complicated when the cables start breaking...).
* Swordfish, even going so far as to show the film winding back to the line in the film. The result was this with only one ad.
* Swordfish, Gabriel dual wields a pair of handguns in the car chase scene when he shoots at the attackers at both his sides.
* Swordfish is part of a secret U.S. government agency that plans to attack terrorist states in more horrific ways than attacks they have supported, ostensibly as right-wing terrorists themselves. The idea is the terrorist states will become

too afraid of a group that can carry out such attacks that none would dare support a group for attacking the U.S. Of course, it first requires they make a terrorist attack on US soil themselves, partly to seize a DEA slush fund for their bankroll (since the secret government money gets cut off), which helps establish their terrorist bonafides at the same time.
* Swordfish mentions realism and asserts that True Art is Realistic, which is ironic considering how unrealistic the movie itself is.
* Swordfish program was actually praised by enough of the public to force them to parole him away from computers instead of giving him a prison sentence. But, when his alcoholic wife divorces him due to him losing his job (because they won't let him use computers), they have a judge award her with their daughter even after she marries the porn king she works for. The FBI even brags about how his daughter will end up "a fluffer in her new daddy's videos" as punishment for him screwing up their ability to read every American's email.
* Swordfish Sabre: Fish rostrums used to deal damage to something/one, either by the fish itself or a third party.
* Swordfish. The hacker then gets two up on them by 1) pointing out that IKEA is Swedish, and 2) revealing that he actually understands English and was just messing with them.
* Swordfish ups the ante by also equipping the collars with over two kilograms of stainless steel ball bearings, turning each hostage into "the world's largest claymore mines."
* Sword for Truth begins with a giant tiger escaping from its cage and slaughtering a large number of the Shogun's men before being cut down in one stroke by protagonist Shuranosuke Sakaki.
* Sword hilts and sheaths were a favorite place to put decoration, not least because someone who could afford a sword could afford to make it look cool. Early Medieval swords often had the name of the owner or the name of the smith engraved in them.
* Sword. If you try to catch a level 36 Pokémon while you only have the Fire badge (which allows catching up to level 35), the Pokémon "won't let its guard down" and you don't even bother to throw a Poke Ball.
* "Sword in the Darkness" ends with someone telling Jon Snow they knew his father and that he was a good man. The fact the father is Ned Stark is bound to go over the head of anyone not already familiar with the story, as there is no mention of a familial relationship between Ned Stark and Jon Snow anywhere else in the play.
* sword in the stone, only for this trope to occur as he fails miserably. The music cranks up again as he has another go. Nope, he still can't get it out.
* Swordmages and Tactical/Resourceful Warlords rely on both strength and intelligence, and unlike the gish example above their strength is not a result of magical buffs, thus making them even better examples of this trope.
* Sword of Aeons, leaving players with nothing worth using it on. This also had the unfortunate side effect of neutering the grand moral choice of the climax, whether to kill your own sister to gain the sword. That you can't use in any real fights anymore.
* Sword of Azrael attached to one arm and a shootable one to the other.
* Sword of Chaos, a player can reasonably get to level 40. But spending money sure would make reaching the level cap much less of a grind.
* Sword of Chaos, the players, NPCs, and monsters exhibit this trait, including red harpies and female centaurs.
* Sword of Damocles still hold sway. And in the Republic of Marina, a nation which combines renaissance Venice with ancient Greece, gods and religion have been thrown aside entirely in favour of a scientific agnosticism called Natural Philosophy.
* Sword Of Doom Ryunosuke never moves faster than a sedate walk, even while fighting his way through a horde of enemies.
* Sword of fury. Through a very specific order of events, you can actually make it disappear from the island, but how (if it's even possible) you can get it remains unknown to this day.
* Sword of Gou Jian, King of Yue was discovered in a flooded tomb, clutched by a

skeleton. When unsheathed, archaeologists discovered that inside the nearly airtight scabbard was a pristine 2500-year-old sword. Where other weapons have corroded to the point of near unrecognizability, the Sword of Gou Jian is not only recognizable as an antique work of art but is also remains a viable weapon. The researchers studying it found that it provided amazing control and sharpness for a weapon of that vintage, cleanly and effortlessly cut through a stack of papers 20 pages thick without losing the stroke (which would usually require decent leverage and a paper guillotine).
* Sword of Gryffindor (which acts Mjolnir in pretty much all but name, amplifying magic on an incredible scale) is involved.
* Sword of Honour, and most of the novel is about Guy's growing disillusionment with an increasingly ignoble cause.
* Sword of Justice has rich playboy Jack Cole framed for massive fraud and embezzlement and sent to jail for five years. Realizing he's not the first to get screwed over like this, Cole spends the time talking to his fellow inmates to learn all the tricks of theft ("They say this place is a college for criminals. Well, I want to go to school.") When he finally gets out, he uses those skills to take down other white-collar crooks.
* Sword Of Justice, protagonist Jack Cole would use playing cards, the three of clubs, diamonds, hearts, and spades as his calling cards. The three of clubs was left with the target of each episode, as a warning that he was going down. The three of diamonds would be used to pass information to the police. The three of hearts would be used to pass information to the person (usually female) that he was helping, and the three of spades for the final "I got you" message to the target.
* Sword Of Justice. The main character was falsely imprisoned and uses his time there to pick up skills from other criminals. However, upon release, he uses those skills to secretly catch criminals who are normally above the law like the ones who framed him.
* Sword of Khaine is an immensely powerful weapon forged at the beginning of time by the elvish smith god. Unfortunately, it tends to bring doom and madness on anyone who wields it, most notably the man whose son started the great elvish civil war of eons past.
* Sword of Mana has a blood rain that is actually benevolent. Slaying a certain monster responsible for a curse will cause her blood to rain down on the kingdom, breaking the curse by melting the ice she had encased everyone in.
* Sword of Plot Advancement can cure all status effects when used from the item menu.
* Sword of Ramias becomes the strongest weapon in the game. The Fashion Forge is not difficult to find, but fully upgrading the Sword of Ramias will cost you quite a lot.
* Sword of Shadows, and the focus is more heavily on the "barbarian" Clansmen than the "civilized" part of the world.
* Sword of Shadows, cementing him as a truly evil character who needs to go down hard.
* Sword of Shadows skilled at letting blood with minimum pain and without hitting anything important.
* Sword of Shannara and the Elfstones of Shannara have the big battle with the majority of the characters on one side trying to survive as long as they can while the covert mission that is really what matters racing against time.
* Sword Of Shannara, if you attack the Warlock Lord instead of the book controlling him, you get a text-only ending where the main character is the new Warlock Lord.
* Sword of Shannara is over seven feet tall, and the leader of the heroes.
* Sword of the Assassin: Despite being Vietnamese, it's clearly heavily wuxia-inspired in its choreography, cinematography, and plot.
* Sword of the Cross. Neither does being a Knight mean a lifetime commitment. Some Knights take the Sword for one mission and put it down.
* Sword Of The Galaxy, meaning he could now have sex, work at night and eat food.
* Sword Of The Rightful King. Even the narrator is in on the trick, since the sections told from her point of view continue to use masculine pronouns.

* Sword of the Samurai, any samurai may disguise himself as a poor ronin in order to move across the countryside undetected (mostly for purposes of eventually infiltrating a lord's estate for some nefarious purpose). Furthermore, bands of ronin often cause trouble for local lords, who can then gain honor by killing them all in melee combat.
* Sword of the Samurai has a few kappa encountered as enemies on one route. They can be easily defeated by knocking them off balance, causing the water on their heads to fall out.
* Sword of the Samurai is both an example and a subversion, in that, on Extreme mode, any hit from any weapon could kill you.
* Sword of the Spirits the descendents assumed this as the surviving literature all spoke of fear of nuclear armageddon.
* Sword Of The Spirits; the descendents only assumed this as the surviving literature all spoke of fear of nuclear armageddon.
* Sword of the Spirits trope, the descendants of those who survived assume it was due to a nuclear war. Therefore all post-medieval technology is forbidden and anyone trying to use science is put to death.
* Sword of the Stars, aesthetics are not always indicative of how powerful a faction's ships are. The dish-dash, slapped-together Zuul craft can be as effective or moreso than the sleek Morrigi ships.
* Sword of the Stars allows you to consult the sensor display in the tactical screen to keep track of BVR enemies, but you need upgrades to actually give orders from it. Somehow.
* Sword of the Stars, anagathics technologies extend the lifespans of your admirals.
* Sword of the Stars and an intelligence several times that of a human. All Liir who ever set their flippers into space are murderously insane... At least by Liir standards, as they're actually willing to harm other beings. Though they can't survive vacuum and use starships.
* Sword of the Stars and Hivers, Humans and Tarka will do so less than average. Still, cloaked ships can be very devastating in the right situation, especially when used as a first strike against someone who lacks cloak-detecting capability, as cloaked fleets cannot be seen on the tactical map.
* Sword of the Stars. And of course, the "gods" are quite hungry when they're awoken from their centuries-long sleep, to the tune of depopulating a planet.
* Sword of the Stars, and proceeded to be driven out of the system by a species that had no space military, but a lot of ICBMs gathering dust.
* Sword of the Stars, and they only work within a gravitational well with an exponentially larger pull than the object to be transferred (thus, packets of data can be sent from basically anywhere, while objects such as ships only work from portals located within a planet's gravitational well).
* Sword of the Stars, and to be honest nearly all starship weapons are devastating to planets. Battles against enemy colonies often culminate in orbital bombardment. Interestingly, for early and part of the midgame trans-atmospheric Assault Shuttles are more effective at dealing anti-colony damage.
* Sword of the Stars and turning their (now exterminated) captors' techology into a workable technological basis for making starfleets.
* Sword of the Stars, are also kinetic. Kinetic weapons are, however, wildly inaccurate without targeting tech and deflectable by armor technology, fire more slowly than energy weapons, and up until Argos Naval Yard lacked the late-level exotic weapon variants that you could get up the energy weapons tree.
* Sword of the Stars are destroyer-size though later techs allow for cruiser versions, a torpedo ship can be made by giving a cruiser the torpedo section and filling all its medium/large turrets with missiles, the Siege Driver tech lets you build a dreadnought-size space gun, etc.). In lieu of space fighters are AI-controlled drones and assault shuttles (anti-planetary bombers carried individually by destroyers or later in groups by cruisers).
* Sword of the Stars are divided into three castes, which have some subspecies traits: the Urduku ("Common" caste) are the warriors and professionals (they

predominantly speak Urdu Kai, "common speech"), the Gutter caste are the workers representing the majority of the population (they speak various Gutter dialects collectively called Horodu Kai), and the Kona ("Exalted" caste) are the ruling class (speaking Kona Kai, "high speech"). The appendix does not mention if there are any social unrest due to the inability of persons to move from one caste to another.
* Sword of the Stars, are masters of this trope and get the technology for free when they gain access to cruisers, whereas other races must research it separately.
* Sword of the Stars (as an example, most humans see angels). Since the Morrigi are traders and diplomats by nature, this tends to smooth over diplomatic functions with other species quite nicely. Interestingly, this aura is primarily meant to attract females, similar to the tail feathers of male peacocks. Morrigi females look for a male with the most beautiful (i.e. strongest) aura, while Morrigi males look for a female who can resist their aura.
* Sword of the Stars, a single pirate encounter can see you facing craft from all the different racial factions.
* Sword of the Stars asteroid traps. A triggered trap creates a strong gravity field that pulls the ships to it, as well as any surrounding asteroids, to destroy the offenders.
* Sword of the Stars, as this implies that a crew of thousands can't fight off a few dozen enemy marines.
* Sword of the Stars. A strange virus, the Via Damasco, begins to turn AI-controlled ships against their masters with ships becoming infected after receiving a transmission from an already-infected ship. Apparently, the anti-virus is "administered" the same way.
* Sword of the Stars base game: Humans (Balanced), Liir (Subversive), Hivers (Powerhouse), and Tarka (Cannon).
* Sword of the Stars before the Liir did the same to them. As of the sequel both these factions are back, in a heavily reduced form.
* Sword of the Stars before the second expansion added psychology techs that allow a player to force a planet to surrender after just one or two nukes.
* Sword of the Starsbuilding after a war with their own crazed Elders, whom they have labelled Suul'ka. Those same Suul'ka are responsible for the creation of the Zuul and the devastation of the Morrigi. The Hivers themselves constantly engage in inter-clan warfare, resulting in entire systems being destroyed, so they keep repeating parts of the cycle.
* Sword of the Stars) but vaccines against them are easily researched.
* Sword of the Stars can be mounted in nearly any large turret socket in the game. They're especially effective when mounted on rotating defense satellites orbiting planets, where they can grab attacking ships and smash them into the planet's surface. The game's AI for some species actually takes advantage of this.
* Sword of the Stars, can research Ramscoop technology that allows their ships to travel without expending fuel. However, unlike a "standard" Bussard collector, Hiver ramscoops are powerful magnets that do the same job.
* Sword of the Stars can result in this. They are marsupials, and the mothers' milk is a potent narcotic. As long as the mother is alive and produces milk, her children are in dreamland inside her pouch. If she dies, or becomes unable to produce milk... She becomes their first meal. More commonly (and less fatally to the Zuul), the Zuul mother removes the children from the pouch and leaves them near a suitable source of meat.
* Sword of the Stars coverage is lacking against munitions coming in from "above" or "below" the horizontal plane.
* Sword of the Stars. Empires at cold war cannot enter each others' territory without declaring full scale war (with the accompanying diplomatic ramifications), but fleets meeting in neutral territory will result in a firefight.
* Sword of the Stars, especially in early game or with small groups, but reward you with a fair amount of resources if you clear a hive.
* Sword of the Stars features an ace custom flagship, a jacked-up CnC mission fused with a barrage mission. It costs a fortune, and you can only have one at a time.

Oh, and losing one hits your morale harder than having something death star a major colony.
* Sword of the Stars for any viable knowledge and then eaten. Unfortunately for both the Zuul and for the rest of the galaxy, the Zuul have lost their 'gods' and, without anyone to hold their chains, their entire race has turned to a galaxy-wide crusade to find their 'gods' again. This puts them in conflict with all the other species — and, as mentioned above, exterminating other species is what they were made for.
* Sword of the Stars for their FTL. Normally this requires dragging a gate to the destination the slow way first. But later developments can allow gates to send ships to systems without a gate up to 10 light years away, but a quarter of those trips will miss the destination by several light years. But it's still closer than traveling the whole way by sublight.
* Sword of the Stars, for thirty seconds ships with the module cannot be hit or fire on enemies, but they are visible.
* Sword of the Stars for this, including the fact that each faction has a different stardrive from the others around which they base their ships.
* Sword of the Stars, for which more than one RPG developer should probably be grateful.
* Sword of the Stars game colonizers are used up whenever they're deployed on a planet with some infrastructure unbuilt. They increase population, infrastructure, and terraforming instantly. In the second game a fleet assigned to a colonize mission will ferry colonists from their base to the new world until it's self-sustaining, then become available for re-use.
* Sword of the Stars: Ground Pounders is all about ground combat and the human and Tarka infantry appear to be wearing armor at the very least.
* Sword of the Stars has added more technologies and weapons to be used in battle, as well as new races with their own advantages and disadvantages. The sequel plans to add even more complexity to battles. And did I mention that the battles are in real time while the strategic actions are turn-based?
* Sword of the Stars has both the Hollywood bolt lasers and Beamers that are continuous beams.
* Sword of the Stars has orbital defense satellites (it's not clear if they're automated or manned) of various sizes with expansions adding large specialized space stations (e.g. command, industry, science, trade, habitat, sensor). In the sequel, you can also build hidden defense bases in asteroid fields in order to launch system defense boats at unsuspecting invaders.
* Sword of the Stars has several technologies that modify your colonists to reduce the "hazard ratings" of planets, making them easier to colonize.
* Sword of the Stars has these in Zuul Slave Disks, the Ten Rings of the Von Neumann Berserkers and the Peacekeeper Enforcer. The former two of which are Riders that detach from larger carrier ships, and the Zuul do abduct people if several million at a time and they look nothing like Greys.
* Sword of the Stars, Human and Tarka ships can't be given new orders while they're traveling FTL. If a Human or Tarka player signs a Ceasefire with another race while one or more of their fleets are en route to the other race's colonies they will continue and start a battle.
* Sword of the Stars, Human, Tarka, Hiver, Zuul and Morrigi ships, while using some form of FTL to travel through interstellar space, use regular Newtonian reaction thrusters for tactical combat. Destroying the engine section of the ships of these races will cause them to drift helplessly away from the battle, at whatever speed they're going at, in whatever direction they're going at. They sometimes end up crashing into a planet or an asteroid, and get destroyed. Liir ships, however, don't use regular thrusters at all — they use "stutter warp" (a propulsion method involving fast, repeated short-range teleportation) for both interstellar and tactical movement. Destroying their stutter warp engines will cause them to halt wherever they are.
* Sword of the Stars, implying that these were inspired by the Morrigi as well.
* Sword of the Stars. In combat, however, player-controllable Z-axis movement is

only possible through keyboard hotkeys, as opposed to the normal mouse-commands. Otherwise, the player can only issue orders in 2D, though ships will pathfind in 3D and move "up" or "down" as necessary. The sequel will implement limited controllable 3D combat maneuvering.
* Sword of the Stars in the beginning, but the latter's economy bonus means they zoom past humanity in research once they've started trading.
* Sword of the Stars investment of resources. It still takes a turn (which some people have calculates is equivalent to a year based on Hiver sublight movement) to build a destroyer by a single planet devoting considerable percentage of its industry to it.
* Sword of the Stars is known only as either the Void Cutter Drive or the Flock Drive, it can be assumed also uses hyperspace.
* Sword of the Stars is slowed to STL speeds near gravity wells (this is more a limitation of their computers' processing power rather than a physical problem). Some races also have the ability to intercept vessels in FTL speeds, though this is quite dangerous.
* Sword of the Stars. It is amusingly classified as a bio-weapon, meaning you have to go through several tiers worth of gene modification to access it. The Nano Virus is harmless to organics, but the planet's industrial output will be heavily damaged and it will wipe out an AI rebellion as if they were living creatures hit by a regular bio weapon. It is the only bio weapon that will affect the Zuul, since their machinery is made of the same metal as everyone else's.
* Sword of the Stars. It's also the de facto government of humanity, and the director of SolForce is the closest thing to a secular leader humanity has.
* Sword of the Stars, killing millions if it's not stopped. So they put a WMD in the hands of a Lieutenant.
* Sword of the Stars known as the Sin-Eaters who specialize in providing this service, by taking such memories into their mind away from those who suffer from it. They see holding these memories as part of their penance.
* Sword of the Stars littered in the lore. It looks so obvious in hindsight.
* Sword of the Stars live their entire lives in a gender-separated society where the females live on planets and the males operate the starfleet, the two only rarely meeting for mating contracts. The game mentions off-handedly that the only 'stable' Morrigi relationships are homosexual ones.
* Sword of the Stars made an alliance with the Princess who ended up winning the crown jewels.
* Sword of the Stars, missiles are one of the three weapons you are guaranteed to get at the start. They can be placed in medium or large turret mounts, and most combat-oriented cruiser or dreadnought designs can hold at least four. Add in the fact that point-defense weapons are murder on missiles, and the 3M is about the only way to use missiles in this game.
* Sword of the Stars, Morrigi curl around control pillars to run their spacecraft.
* Sword of the Stars native to that dimension. While humans only mildly annoy them (imagine a neighbor who randomly walks through rooms in your house), Zuul forcing their way through tends to piss them off (this is the neighbor with a battering ram who doesn't use doors). Both races occasionally have their colonies attacked by these so-called Spectres. And if you don't use energy weapons, you're screwed, as ballistic shots and missiles go right through them without damage. They also show up during battles in subspace, but those are pretty rare and can only happen with human/human, zuul/zuul, and human/zuul match-ups.
* Sword of the Stars none of the non-human factions are democratic. And it's unclear if SolForce itself allows much democracy.
* Sword of the Stars nukes produce a sphere again but substantially bigger.
* Sword of the Stars on the different races and their inner workings that would put several sci-fi TV series to shame.
* Sword of the Stars other systems and delivering resources there, but it might not be worth it.
* Sword of the Stars plays with this. Drives increase in power from fission (orange) to fusion (yellow) to antimatter (purple). Lasers go red, green, purple,

blue, gold. Plasma is green, yellow, purple.
* Sword of the Stars: Poor stats combine with a negative trait to disadvantage any fleet (s)he leads.
* Sword of the Stars pops their habitability zone right to yours (when using assimilation plague missiles). Useful when most planets are hostile.
* Sword of the Stars (purple). There are multiple kinds of plasma/fusion/antimatter weapons, including triple-barreled heavy mounts and plasma/fusion/antimatter emitters (which fire a short-range cone of bolts). There are also plasma/fusion/antimatter torpedoes, which track their target.
* Sword of the Stars. She then backstabs the telepaths while they're gloating over their victory, with their captives being unable to give them any useful information because they have no idea.
* Sword of the Stars. Ships won't even fire weapons beyond the set range. And if beams miss, they will simply stop at their max range, instead of some sort of a blooming effect.
* Sword of the Stars shows the Eiffel Tower being destroyed by the Hiver invasion of Earth.
* Sword of the Stars, so the strongest personality directs the collective... until it shows weakness, at which point all the ones who can challenge it will do so.
* Sword of the Stars so they could live forever in outer space. None of them feel any regret about this decision.
* Sword of the Stars states that their internal structure is much more similar to primates than reptiles.
* Sword of the Stars teleporting into space from an ocean, appearing to be encased in a shell of water which has flash-frozen in space. The Suul'ka then breaks the icy shell, signifying its "birth".
* Sword of the Stars that allow colonists to be genetically tailored to their environments is Gravitational Adaptation.
* Sword of the Stars the different species have differing environmental tolerances. After the third expansion pack made it possible to occupy planets inhabited by "civilian" populations of different species the player has to choose between terraforming conquered planets to make them more hospitable to their imperial population, or keep it in a state the civilian aliens would prefer.
* Sword of the Stars, the entire Liir military is this in that they are so pacifistic that anyone who joins the "Black Swimmers" is considered a sociopath. Most of them never leave the fleet though, they think of themselves as too broken to ever rejoin Liir civilian society.
* Sword of the Stars), the fact that two Changed males cannot physically stay in the same room without a physical altercation (and that non-Changed males immediately submit to them) means women are required to keep the machinery going. Needless to say they make full use of this to make sure the Changed receive the information and prodding needed to make the 'right' decisions, and general Tarka prejudices make certain positions and careers difficult to hold for males (including non-Changed ones) because they're seen as unintelligent and too emotional to do well in them.
* Sword of the Stars. The first ship of any new design takes longer to build and requires more resources. It also has a random chance of being either better or worse at certain things than the following ships of the same design, as evidenced by the prototype's nickname.
* Sword of the Stars. The Hivers, Liir, Tarka, Zuul and Morrigi are Intelligent Gerbil ants, dolphins, crocodile/ape hybrids, tasmanian devils, and dragon/crow/magpies, respectively.
* Sword of the Stars. The human version looks like a giant revolver with the barrel rotating after each shot.
* Sword of the Stars. The one and only time a Liir tried to enter nodespace on a human vessel, the second it felt the psychic emanations from nodespace it tore open the ship from the inside to avoid going through. Thankfully everyone onboard was fully suited.
* Sword of the Stars. The top end of average height for male Zuul is 25 cm shorter

than the bottom end of average height for female Zuul, and the difference in weight is even greater (45-70 vs. 175 kilos).
* Sword of the Stars, the Utilitarian sect has this opinion and does not support SolForce or condone its adherents enlisting. On its part, SolForce is quietly patronising of their disdain.
* Sword of the Stars. The Von Neumann Construct, labelled in data files as "final solution", is a copy of the System Killer and can be on the field at the same time as the original.
* Sword of the Stars. The word "Zuul" is only used by the other races to describe them, and is essentially the Liirian word for "complete and utter ☠☠☠☠" which pretty much tells you all you need to know about the Zuul.
* Sword of the Stars. They are the speciality of the Morrigi, who start with this technology.
* Sword of the Stars they do not have much in the way of a 'self', and therefore finds things like a name and individuality to be extremely valuable.
* Sword of the Stars. This is made all the more jarring by the recipient's nature as member of a species who consider mind rape as a healthy form of social interaction, and the Care-Bear Stare thus ends up turning him into a self-flagellating, neurotic and suicidal wreck.
* Sword of the Stars, though, this is merely an abstraction for the players' convenience. Everything actually takes place at stellar ranges and even "knife fights" with small mount weapons don't actually take place in WVR. The sequel will further avert this as weapon ranges will now exceed sensor ranges, requiring the use of battle riders as scouts/spotters.
* Sword of the Stars. To reinforce the need to outnumber, you get extra command points for every so many ships of each class more than the enemy you have, up to a certain limit, allowing you to field more ships than the Arbitrary Headcount Limit would normally give you. Get enough and you can deploy extra dreadnoughts. While destroyers can occasionally beat dreadnoughts, this relies on swarming and the dreadnought-user failing to include light weapons on his ships and is far from foolproof.
* Sword of the Stars to the pacifistic Liir, who nonetheless recognize that some of them must be able to kill for the species to survive.
* Sword of the Stars, upon which some of those who became engrams decided they were superior to the baselines and bombed the latter back to the stone age before setting out into the void to make more of themselves while wiping out the inferiors.
* Sword of the Stars use communication drones equipped with FTL engines. For gameplay reasons, there is no delay even at very long distances that require many years for the ships themselves to cross. (In game, the engines work by teleporting the object an enormous amount of times per second by small amounts, so that the ship is technically not accelerating or moving, but appears to go at up to FTL speeds.)
* Sword of the Stars used to destroy them, and that seven of them survived.
* Sword of the Stars uses the navy based naming conventions for ships, among some other standard features of this trope. In addition, the Whale people Liir take these descriptions further, describing their soldiers and explorers as "black swimmers", among other analogies.
* Sword of the Stars weapons. The randomized tech tree adds excitement to the game. The sequel escalates to the even larger Leviathans that can turret-mount most of the old fixed weapons.
* Sword of the Stars weapons will not intercept the returning missiles. The dreadnought Electronic Warfare command section does this along with two other important functions (sensor jamming and long-range scanning).
* Sword of the Stars. When launched against a planet, each plague missile kills millions of people. Enough of them can quickly depopulate a world with no ill effect to the environment. Another version of the plague makes the target population more willing to join your empire. However, millions still die.

* Sword of the Stars when the Hivers first struck humanity, they soon respond by launching hundreds of nuclear missiles, forcing the Hivers to turn tail.
* Sword of the Stars, which are indeed FTL-incapable and swattable by PD.
* Sword of the Stars, who consider conquering the galaxy a sacred duty given to them by their creators. Which happens to be true, although their creators aren't actually divine.
* Sword of the Stars with the Tarka regarding Archilochus and to some extent Roman Catholicism. The Hivers also enjoy human fermented foodstuffs, though they get drunk off cheese rather than wine.
* Sword of the Stars you can retreat from tactical encounters by jumping out. There's a waiting time for the FTL drive to be readied, but by the time you get to lategame upgraded drives the wait can be over before you even get in firing range of the enemy.
* Sword of the Stranger and/or his sheathed sword.) You know where this is going - as he draws his sword at the climax, shit gets real.
* Sword of the Stranger culminates in one of the most technically impressive fight scenes ever animated.
* Sword of the Stranger, Nanashi aka Nameless in the literal sense, dyes his red hair black to avoid trouble. Seems like the residents in feudal times hated foreigners.
* Sword of the Stranger, Nanashi has to run cross-country to find and save Kotaro.
* Sword of the Stranger when Kotarou is captured by the Ming he bites the finger of the one who grabbed him, the guy punches him to make him let go which causes him to sever his finger.
* Sword of Truth after a new queen came to power, declaring itself neutral. It had previously been allied with the Order's enemies. To absolutely no one's surprise (except apparently the queen's), the Order quickly conquers Galea.
* Sword of Truth amounts of raping and pillaging; not just villages, but whole cities and countries they roll over. Once Richard takes over one of these armies along with the state, he orders the practice stopped. Not everyone is happy, but outright disobedience is not mentioned.
* Sword of Truth, and can often be seen with a woman on each arm after getting out. Zedd is implied to have interactions with several women over the course of the series. Richard himself, while more content to just have his one significant other, still manages to end up married to three different women and have several more who want him. The male villains are darker versions of this.
* Sword of Truth, and will have to flay his friend alive as part of his initiation.
* Sword of Truth being brutally raped already, then she's a woman they're not supposed to brutally rape.
* Sword of Truth book, a mob comes to Zedd's house intending to lynch him because he's a witch. He starts his dialogue with them by asking to clarify whether they want to kill him for sorcery, or simply demean him by calling him a girl.
* Sword of Truth book, Richard, during archery practice with the Mud People, suddenly shoots at one of them (who really doesn't like him). The misunderstanding is cleared up once they find an armed trespasser behind the guy... well, mostly cleared up, because in order to ensure a kill, Richard was forced to give him a cut on the shoulder.
* Sword of Truth books are actually both the same age, but due to Warren spending more time in a spell that slows aging, he looks much younger. Verna was at first really self-conscious about her apparent age.
* Sword of Truth books is when Richard is teaching Kahlan how to shoot. In a demonstration he claims that nothing can break his concentration while he is shooting. Kahlan takes it as a challenge and starts stripping him.
* Sword of Truth books, Nicci, Death's Mistress and an obscenely powerful and deadly sorceress, makes a pronunciation that the end of the world may well be upon them all. The narration notes that she's a little undercut by the fact she's wearing a pink, frilly nightgown.
* Sword of Truth books there is a tribe called Mud People who greet each other by punching as a sign of respect to the other's strength. And Richard is foreverafter

known as "Richard with the Temper" after knocking down the Mud Person who greeted him (the custom was just explained to him, and he didn't know what would be a proper punch). It was considered a sign of great respect.
* Sword of Truth), coined in one of the more creative insults they've received.
* Sword of Truth. Each one is also an example of this trope, coming from a culture that has been training for 3,000 years just to help Richard unlock the sword's power. Richard also becomes an expert with all sorts of bladed implements. His skill with the symbolic language of magic is ultimately explained by it being analogous to swordsmanship.
* Sword of Truth. Everyone has at least a small spark of the Gift ("Han" in the Swordverse) and could learn to use magic to an extent, but they're fearful and jealous of "born wizards", who have a LOT of the Gift. Played with, in that a large fraction of magic is just being clever and tricking people, and isn't 'magical' per se, but still swells the wizards' reputation.
* Sword of Truth features a sorceress named Adie who had to cut off her leg after being attacked by a magic resistant armadillo/leech hybrid. Subverted later, when she gets infected with a magical disease. When she asks a wizard to cut the infected limb off, he explains the disease is already all over her body.
* Sword of Truth first among the people of D'Hara, then the midlands and Westlands, then the old world.
* Sword of Truth for anyone that's ever glanced at the back cover of a fantasy book before — is that he pretty much always ends up fulfilling the prophecies anyway, just not in the way that anyone thought was going to happen.
* Sword of Truth, Friedrich very briefly gets one of these looking for the Lord Rahl. Subverted because, due to the D'Haran bond with the Lord Rahl, he's already fairly sure who just saved his skinny old posterior from Heart Hounds.
* Sword of Truth from breaching the barrier between life and death, destroying everyone.
* Sword of Truth has Heart Hounds, which are tan, but otherwise fit the trope to a T.
* Sword of Truth has some examples. The Dreamwalker, a weapon from the Great War, has power over someone directly proportional to their magical talent, with a few exceptions. He can brutally mind-rape (in every possible sense of the expression) sorceresses and (off-screen wizards), but he can barely touch any of the muggles (who all have some tiny amount of magical power anyway, only a few people in the world are truly devoid of any magic at all).
* Sword of Truth has this feel. In more than half of the books they end up cleaning up their mistakes from previous books, so it's somewhat justified, bizarrely.
* Sword of Truth, in keeping with its total deconstruction of any ideas anyone had that anything BDSM-like is good, goes into great detail about those dangers of being suspended by one's wrists at the top of the page.
* Sword of Truth in the early series) would not be a good thing, unlike the view other Sisters of the Light have. She explains that without the Keeper nothing would ever die. Very soon there would be no room for anyone in the world and they'd be left as utterly miserable immortals forever. She warns him never to tell anyone about her view, because many would consider it heresy and proof that she's a servant of the Keeper herself.
* Sword of Truth, it is uncertain who is what, given the shifting of roles, but the top three are definitely Richard, Kahlan, and Nicci in some order.
* Sword of Truth. Kahlan strips down and paints herself white too to ensure the latter occurs.
* Sword of Truth kind of service, or blacksmithing or cleaning or anything else that could give the Imperial Order any advantage.
* Sword of Truth (lesbian supporting characters, queer female romance)
* Sword of Truth, magical healing works by sharing the pain of the healed. When someone is affected by an ailment of the soul, the healer has to link his own soul with theirs. This is described as being much more intimate than sex, though not erotic in any way.
* Sword of Truth "manhoods" disappear, as none of them want to admit they are

gullible enough to believe him by checking in front of everyone else.
* Sword of Truth: Mostly just a superstition; the Creator is seen by most of the main characters as, at best, a force of balance.
* Sword of Truth, of course, plans to either become a god or destroy the world by the first of Winter — his chosen Doomsday spell comes with a time limit — and so doesn't care about the lingering effects.
* Sword of Truth) on the world and end all life (except theirs; they believe that they will be granted immortality for doing so).
* Sword of Truth people called the Bandakar Empire, that Richard and Co. train to fight.
* Sword of Truth, Richard tries to use this to convince everyone else that she has. He points to where he says he, Kahlan, and Cara had been walking, and notes that there were no footprints between his and Cara's, which were several feet apart. He tells his companions that this means someone erased Kahlan's footprints. Nobody believes him since, as mentioned, everyone is sure that she never existed in the first place.
* Sword of Truth series are self-fulfilling. Richard, the main protagonist, also makes a strong argument for just letting things run there course as part of it. Throughout the series, just about every prophecy has been twisted because of interpretation, and no one knows what the actual meaning is to properly use. Even then, there are "dead branch" prophecies because some are either-or. Combined, this meant that trying to invoke a Self-Fulfilling Prophecy or prepare for it could actually prevent or impair it.
* Sword of Truth series does this as part of its synchronization effect. It links the caster and the target such that whatever physically happens to one happens to the other — if the caster is punched in the nose, the target gets a nosebleed. So if the caster is killed...
* Sword of Truth series, does this using his adopted daughter as the captive, in order to make a rescue attempt. Coincidentally, two other groups of characters use similar disguises to perform the exact same rescue, each of their own volition. After they meet up with each other, they make their way out with the rescuees playing the captives.
* Sword of Truth series, Emperor Jagang brings to the world the game of Ja'La, which is like football without pads and no penalties for unnecessary roughness...or unnecessary murder. Even attempting to have an opposing player assassinated before the game is considered fair play.
* Sword of Truth series features Kolo's journal. First discovered in a hidden alcove in the Wizard's Keep in the third book, the journal provides information on dream walkers and the great war 3,000 years ago. In later books in the series, it seems even though the main characters have not one, but several, libraries of forbidden lore to consult, good ol' Kolo's scribblings are the first book they reference.
* Sword of Truth series first meets the protagonist while shapeshifted into his long dead mother. Though he isn't fooled, it's difficult for him to remain angry at her in that form.
* Sword of Truth series fit the trope, as using them incorrectly can let the Keeper, the local equivalent of Satan, into the world of the living. The Pillars of Creation are living versions.
* Sword of Truth series, hair length indicates social status, at least for women. In this case, the longer, the higher rank. Extremely powerful women like the Mother Confessor have hair that risks brushing the ground.
* Sword of Truth series has people immune to magic turn up. The infamous evil pacifists fit into this category.
* Sword of Truth series has this as a major plot line - evil sorceresses drain the magical power of wizards and add it to their own.
* Sword of Truth series. It's indestructible, can cut through anything the wielder perceives as an enemy, and feeds off the user's anger. And in the right hands, it can make the wielder a near unbeatable swordsman.
* Sword of Truth series, Jennsen and Sebastian use this technique while at the

People's Palace. Jennsen seems to be fine with Sebastian's suggestions, until he decides that she should pretend to be pregnant, as well.
* Sword of Truth series, of all things, ends this way, after Jenssen remarks that Richard must know a lot about magic. Everyone except Jenssen and Richard, who mutters that it's not that funny...
* Sword of Truth series of novels, the hero Richard kicks a sadistic little princess on the chin hard enough to smash most of her teeth and sever her tongue completely. Normally you don't condone child abuse, but she had it coming. She gets better.
* Sword of Truth series: "People are stupid. They will believe something because they want it to be true; or because they're afraid it might be true."
* Sword of Truth series. Richard and Kahlan have been in love since early in the first book, but the increasing turmoil in the setting means they have to deal with separation, invasion, apparent betrayal, and ultimately save the world ten or twelve times before (and after) they can be together.
* Sword of Truth series. Richard is the only one who remembers her, including herself; Kahlan, in an interesting twist, is rendered amnesiac and is kept as a scullery maid by those who retgonned her.
* Sword of Truth series speaks virtually every language used within the Midlands, thanks her her childhood training as a Confessor, including the languages of various small tribes who are typically unfriendly or homicidal towards outsiders. Partially averted later, as she never bothers to learn High D'Haran so she can help translate all the ancient books of knowledge the heroes keep needing to read.
* Sword of Truth series starts with Rachel attempting to warn Chase that some strange creature is approaching while Chase is busy discussing some matters with Zedd. Chase brushes her off since an indoor garden can have no dangerous animals. Once they barely beat off the murderous demonic creature (at the cost of several dozen bystanders), Chase tells her "Give me a kick if I ever ignore your words again".
* Sword of Truth series, the D'Haran salute has the soldier in question place a fist to their heart.
* Sword of Truth series, the D'Harans say that they are "the steel against steel so that the Lord Rahl can be the magic against magic." Since only the Lord Rahl has the ability to combat magical threats, everyone else has the duty to combat physical threats (and they tend to get concerned when he tries to deal with them himself).
* Sword of Truth series, the length and style of a woman's hair is directly related to their status, so the Mother Confessor, the de facto leader and most powerful woman of this region, has very long hair. It's stated to be somewhere slightly above her hips and below the small of her back, and she cannot cut her own hair. It magically gives her great pain, as it does all Confessors.
* Sword of Truth series, the Mud People have very different ideas from most others about what constitutes, say, an appropriate compliment—where most might consider it rude, to a Mud Person, telling a woman she has nice breasts just means they think she will make a good mother (whereas asking a Mud Person woman to clean the mud out of her hair is basically propositioning her). When one character is asked to help translate this for a Mud Person smitten with someone from another land, the translator instructs him that he should instead compliment things that aren't covered by clothes.
* Sword of Truth series, the powerful magic in the sword makes his enemy's head explode — in slow motion, no less.
* Sword of Truth series, Zedd heals a woman who "held her guts from spilling out of a ripping wound in her abdomen."
* Sword of Truth set out to conquer all of the world and force their fundamentalist religion and bureaucratic Soviet economy upon it.
* Sword of Truth setting that even trying to heal someone risks horribly mutilating them.
* Sword of Truth She's also much better at tactics, even though he's more inspiring and has a better grasp of strategy.

* Sword of Truth: Slides take control of animals through projecting their souls, plus people's they captured, into their bodies.
* Sword of Truth team after he slaughters his way through a considerable number of soldiers in an almost-successful attempt to free himself.
* Sword of Truth that's the ultimate cause for all the trouble they have to go through.
* Sword of Truth, the condition of the stairs in the house which Richard moves into with Nicci is bad enough that he launches into a full-scale tirade at his three thuggish, knife-wielding housemates, saying something along the lines of "put a shirt on and fix those stairs or you'll never amount to anything". Two of them listen, and do end up better for it. The third is another story.
* Sword of Truth: The Confessors' hierarchy is based on whose gift is the most powerful and requires the least recovery time after each use.
* Sword of Truth: The Imperial Order in the later books fields an army that numbers in the millions. To put this in perspective, before they showed up, 100,000 troops was considered a large army.
* Sword of Truth: The Imperial Order preaches that magic is evil, as it sets people with the gift over those without. Yet their leader Emperor Jagang, along with its spiritual guide Brother Narev are themselves magic users. This is explained away as since they use their powers in the goal of destroying magic eventually, it's fine. One of their followers (who himself is a magic user) even says he'll die too in the end.
* Sword of Truth: The Keeper of the Underworld. He rules over the souls of the dead, but his goal is to unleash himself on the living so they can be killed and tortured forever in the afterlife.
* Sword of Truth these wizards and sorceresses, either. A mob tries this on Zedd. He stokes their fears of him until they all run away screaming. How? By asking them to explain why they're afraid of him.
* Sword of Truth: This is the purpose of the Confessor's touch. It causes the person touched to feel love toward the Confessor so overwhelmingly that they will tell them anything which they did, or do anything else asked. Thus, it's used to ensure a person accused of capital crimes is really guilty, gaining true confessions.
* Sword of Truth, though prophecies can touch on them circumspectly. No matter what, the children of any of these pristinely ungifted will have this trait. They, like almost everything else in the series, were the result of a wizard experimenting in the great war three thousand years previously.
* Sword of Truth trust this guy? Well you should, because he's right, and if you don't join with him the Order will kill and rape everyone in the country. Although that may happen anyway. However, Richard simply expects them to get in line without hesitation and also threatens punishment for anyone who doesn't, demanding complete surrender of everything they have into his control. Is it any wonder many refuse? The text acts like it's just them being unreasonable, but from their perspective it has to come off as very suspicious, and he does little to convince them of his benevolence.
* Sword of Truth: What the Sisters of the Light might have been doing with Taminura. YMMV whether it was intentional or merely a nice side-effect of their incompetent policies on raising wizards.
* Sword of Truth: When Richard learns two of his Mord-Sith are lesbian lovers, he's quick to assure one, Berdine, that he's got no problem with it. However, the manner in which it's done, including comparing it to pea soup (he doesn't like that for food, but wouldn't care if someone else does) comes off this way.
* Sword of Truth, while in other places it's justified as the only option he has left (the total war).
* Sword of Truth women in the city. In the latter case, they'll pay the mothers a stipend for raising the child. Verna had a daughter with one of the Wizards, Jedediah, who didn't have the gift and thus was given to another family. She kept in contact with her, and thus endured seeing her daughter die of old age as the Palace of the Prophets slows the Sisters' aging so they can live for centuries on

end.
* Sword of Vermilion features an item called Banshee Powder. You take it, and it kills you, bringing you back to the last church you visited. However, it's quite advantageous to use it in situations you can't get yourself out of without dying (such as being poisoned and too far away from town), as you don't have to pay the church a fee if you use banshee powder.
* Sword of Vermilion has the Luminos spell, which lasts until you leave the dungeon you cast it in.
* Sword of Vermilion were palette swaps of four different models (dragon, giant, fire demon and necromancer).
* Sword Oratoria, Aiz Wallenstein throws herself into battle against a huge army of monsters who've killed at least two other adventurers, whose eyes are open even in death. A few panels later, the corpses' eyes have been closed, making them seem much more at peace.
* Sword Oratoria, but their fears weren't fully realized until after it had nearly decimated them with its first usage of super long chant magic, only to immediately begin the incantation of a second spell.
* sword or sword-like weapon as their weapon of choice, even in science-fiction settings where this makes less sense than a gun.
* Sword over Head: The good guy has the bad guy where he wants him, raises his sword over his head... and can't go through with it.
* Sword Princess Altina All thanks to the hard work of her brilliant, yet humble strategist, Regis.
* Sword Princess Altina led an assault to capture an "impregnable" enemy fortress, and fought that enemy's army just to get to the engagement that the "brave" strategist is planning to fight.
* Sword Princess Amaltea. After being turned into a guy by a magical spring, Amaltea wonders how the heck guys can walk with..."something" in between their legs getting in the way. Ossian muses that it's a matter of habit.
* Sword Princess Amaltea. Amaltea thought this was the norm, and of course this being a gender flip of a fairytale, the reader thought too, so she went, slays the dragon, and goes to "rescue" the prince in the tower; but unfortunately for her, Ossian straight out refuses to marry her (she's a stranger after all) and there are subtle hints that Ossian may not have been in distress at all.
* Sword Princess Amaltea that fights before and thinks later while Prince Ossian is a more sensitive, down to earth character with a practical mind. Ossian very often calls Amaltea for her impulsiveness and she answers with sarcasm.
* Swordquest: Fireworld, Torr spares a pair of fire-goblins (who were previously attacking him) after they are backed into a corner and cowering for mercy.
* Swordquest grows to enormous size, and the water within it becomes a gate to Waterworld.
* Swordquest King Tyrannus — are raised by a faithful friend of their late father.
* Swordquest off the trail of her infant children by jumping into the ocean with two jars wrapped in swaddling clothes in full view of his guards.
* Swordquest prophesied his death at the hands of blonde-haired twins.
* Swordquest Realworld instead. Peter never forgave him for this, especially not after Alvin ended up publicly coming out of the closet years later in a cynical attempt to avoid getting kicked off of a reality TV show.
* Sword Quest that was an integral part of the contest tied to both of them; the games would provide cryptic clues that pointed to a panel and page number that had a hidden word on it. Finding all of the words (and using an even more cryptic hint in the beginning of the comic to discern which were red herrings) and ordering them would allow you a chance at the grand prize.
* Swordquest told him of a prophecy that they would eventually lead to his death.
* Swordquest was supposed to have clues to help you win the associated real-life contest, but they were never coded, so it just has numbers from 00 to 09.
* Swordquest: Waterworld apparently start all names with "aqu-". Their kingdom is Aqualania, their ruler is queen Aquana, and she gives the amnesiac protagonist the

name "Aquon".
* Swordquest: Waterworld pause halfway to offer prayers to their respective gods.
* Swordquest: Waterworld Torr is drowning and refers to being trapped "in Davijoen's Locker."
* Swords a boomerang with two bladed tips. Money back guarantee! Well, yeah, considering adventurers using it keep getting stabbed on the return, it's guaranteed they'd ask their money back.
* Swordsaint has moments of this. For example, Kayaba tells it to give Kirito, Asuna, and Joan useful items after defeating the Gleam Eyes. It did so for Kirito and Joan, but because Asuna was spending more after she started dating Kirito, it gave her a shield, counter to her fighting style, so she could sell it for funds.
* Swords and Scorcery Creature Collection - Subverted with False Lovers, paragons of charm and beauty, who can effortlessly win the hearts and souls of any who look upon them. They are able to inspire heroes and heroines to great deeds, give birth to new forms of art and literature, and transform cultures of entire kingdoms with their wit and grace. Yet, ultimately they will betray those dreams, leave a trail of broken lives in their wake, and crush the spirits of those who loved them simply for the evulz. They hide their true cursed nature behind powerful illusions that maintain the semblance of whom they once were before their looks began to wane in the passing of time.
* Swords are among the most common weapons wielded, especially by traditionally "heroic" characters:
* Swords Are Heroic trope is on full view, as they are wielded by many morally-driven characters (Ned Stark, Jon Snow, Arya Stark, Robb Stark, Stannis Baratheon, and Brienne of Tarth). As such a ubiquitous weapon, however, they are also wielded by less "heroic" characters (Jaime Lannister, Ser Bronn of the Blackwater, Gregor and Sandor Clegane, amongst others).
* Swords by a Blade of Sealing centuries ago. At first it looks like Quillion's statue is in the middle of screaming from the blade embedded in his chest, but when removed it shows he was about to sneeze all this time.
* Sword's Edge, labeled in the opening credits as "Knights of the Iron Reach", has the noble knight thing going. "Ser Cygnea" is a human knight who specializes in defense and is often found first in battle.
* Swords forged by Awataguchi Yoshimitsu get shipped with each other a lot, with the most frequent being Ichigo Hitofuri with any of his younger brothers and Namazuo and Honebami with each other.
* Swords made in the Near East of wootz steel were often called Damascus steel blades in the west and had a near-mythic reputation for strength and sharpness. As such, Damascus steel swords were considered very cool.
* Swords made of Damascus/Damascene Steel are said to be capable of this, being
* Swordsman And Enchantress uses a massive spear made of black ebony as his weapon, whose blade is strong enough to cut through a stone wall. Although his spear ends up being hacked into half near the finale — at which point Hsiao reveals the spear's midsection is actually hollow, containing a hidden sword which he then switched to using for the ending battle.
* Swordsman. Made by the Mandarin, it had a numerous weapons built in, including disintegrator rays, and a flamethrower.
* Swordsman of Landstar, a cute, toy solider, and later added several more Landstar monsters to his deck.
* Swordsmen: Atsuko, a photojournalist by profession, has learned enough necessary skills to be able to take care of herself. In fact, during her very first assignment as a war correspondent, she'd been taken captive by enemy forces, necessitating Kenshin to save her; however, she wound up saving him despite having taken a bayonet to the leg, by grabbing a soldier's shotgun and killing three combatants.
* Swordsmen in Double Flag Town dispatches the bandits threatening the village with dual-wielded short-swords.
* Swords Of Sorrow into a pool of gasoline leaking from a wrecked car to cause an explosion to allow her Lady Zorro to escape from the demon Shard.

* Swords of the Skull Takers on 1km1kt.com is about the player creating an apocalyptic log, unless they win. Even then, Diabolic Victories can get even more disturbing.
* Swords of Xeen and was included in some compilations of the saga, even if it's not considered canon.
* Swords over a fireplace, where any characters have any sword experience whatsoever, or even if they don't, as in
* Swords, particularly some varieties thereof (the Rapier and the Jian, for instance) have often been the mark of noblemen, military officers and others in high social standing, presumably owing to the fact that being allowed to openly go about armed was a privilege of belonging to those classes and swords were conveniently easy to carry while still leaving both hands free. (Sometimes the expense of a good sword over another weapon using less metal is also cited, but depending on the historical era some swords, especially mass-produced ones and/or war surplus or salvage from earlier conflicts, could actually be had for fairly cheap.) Ironically, one of their functions was to hack at any
* Swordspoint and he knows it, but he's always at his most amusing when people are high, dying, or suffering from severe heartache.
* Swordspoint, as well as Richard and Alec and basically everyone else in the book and its sequels to a lesser extent.
* Swordspoint. He's the greatest swordsman in the city, and deeply in love with the disgraced noble Alec Campion.
* Swordspoint student, but the age difference and mentor relationship are there, not to mention the focus on Basil's intellect and Theron's beauty.
* Swords that "always (must) kill a man when unsheathed" are somewhat frequently encountered. Examples are Dainsleif from
* Swords, the Dreary Knight thinks that the "Sword of Summoning Ducks" isn't very practical on the battlefield... until the Duck Knight makes a duck appears inside his throat.
* Swordstorm has Kapral. His motives are unclear, but he is rather sarcastic and pragmatic.
* Swordstorm of the White Scars: Flagship of Jaghatai Khan, Primarch of the V Legion. Took part in the Siege of Terra.
* Swords were made in bronze long before they were made in carbonized iron.
* Swords when she finds out that, per a past royal decree, since the Rapier Tapir defeated her in one-on-one combat while she was Queen of Hiltshire, he's taken her throne and is now the new king of Hiltshire.
* swords, which are primarily about direct, mechanical (in the case of the crossbow) or chemical (for guns) application of force. Force is power.
* Swords, which is shown in-universe to always defeat armed opponents. He keeps dropping his sundered weapons and grabbing new ones.
* Sword-wielder Skeleton enemies have made frequent appearances since
* sword Zabimaru when Renji and Hisagi read a catalogue of changes Mayuri can do to their weapons' true forms, Renji sees that changing them into females is possible, with one female example being exactly the form of Chimpette right down to the green fur covering the body.
* swore off from the raiding scene entirely and many raiding groups were broken up over it. The fight was eventually nerfed while the developers made sure that future raids didn't have the same intense difficulty.
* swore the eternal fealty of their land to the Midnight Lord Zon-Kuthon to save it from Earthfall - they still rule Nidal in their dark god's name as the Black Triune;
* sworn brother, but losing Shado, the love of his life, and the insanity brought upon by the Mirakuru caused him to turn evil. Blaming Oliver for Shado's death, he is set to return the favor by conquering Starling City, which Oliver holds dear.
* sworn enemies, and therefore will try to attack each other before they try to attack you.
* SWOT gets involved in all kind of fights, thanks to his berserk buttons and his tendency to insult everyone.

* Swynmoor has Topaz growing to an immense size due to enchanted pickles, and wreaking havoc on Reynaud's military camp, earning the respect of him and his army.
* Syaoran gets his fair share of them during the second half of the series. He tries in several episodes to tell Sakura that he likes her, only to get cut short by Kero, Yamazaki, and at one point even Sakura herself!
* Syaoran has a huge crush on Yukito in the first half of the manga, though this is later explained to just be an attraction to his Moon-based powers.
* Syberia a disillusioned office worker tells her husband and employers, over the telephone, that she is going into the arctic circle, unprepared, to look for a fairy tale. The private detective chasing her for most of the story is trying to save her life.
* Syberia, Kate can use her mobile phone anywhere, while travelling to particularly remote locations. In the second game it extends to the middle of Siberia.
* Syberia, Kate encounters a brown bear while in the hunting cabin, trapping her in there. Apparently, giving it its favorite fish satisfies its hunger.
* Syberia, Kate maturely breaks up with Dan over the phone, after she realises that he's happier with Olivia and that her journey has made her unable to reconnect with her former life in the US.
* Syberia: Pretty much everything that moves (and isn't of biological origin) is a clockwork piece.
* Syberia!) that "dance" on stage in a tavern. They can't be ridden anywhere, but they're kinda fun to watch.
* Syberia. Turns out that larger, near-man sized penguins are actually pretty dangerous, as one incensed thief learned to his regret after chucking a penguin egg in anger.
* Syberia. While the game is still set for release, the future of the series is in doubt.
* Sybil (book and film) about a British multiple, were well known to American audiences.
* Sybil Fawlty blends the traits of Signora and Ruffiana: she is vain, gossipy, and at time very cruel, but not stupid, and far better than her husband at handling guests.
* Sybil, one of Levena's minions, keeps her charge Cress locked away in a satellite.
* Sybil Vane, who takes a fatal dose of poison right after Dorian cruelly dumps her.
* Sybil was filmed in 2007 and got an European release that year, but it wasn't aired in the US until it was burned off one Saturday night in June 2008.
* Sycho Sid fandom. Unfortunately for Sid, he managed to live it down, by replacing that image with his horrific leg break in 2001.
* Sycomancy: Written messages on fig tree leaves or sometimes paper are rolled up, soaked or burnt. Observation of reactions to burning or unfurling or dying signify certain omens.
* Sycophantic Servant — A sidekick who demeans themself to uplift the hero.
* Syd Barrett Barrett seen sitting on the floor of his apartment. He is seen in the far distance, with his hair covering his eyes.
* Syd Barrett, due to his drug use causing increasingly erratic behavior. He only appears on a few tracks on their second album.
* Syd Barrett, Floyd's original songwriter, did this at least three times during his tenure in the band.
* Syd Barrett's song "Here I Go" is about a guy who has a crush on a woman who's completely wrong for him, then he meets her sister, finds she's much cooler, and falls in love with her.
* Syd Lexia's review of MAD Magazine #292. Needless to say, he was quite put out to discover that the actual article did not feature Mario (or any Nintendo game) at all:
* Sydney and Hardin, their souls consumed and enslaved by the eldritch power of the city.
* Sydney arguably has it worse, since her older sister Serena used to be her best

friend... until Serena tried to have her killed.
* Sydney eventually discovers the ultimate in spicy food off-planet,
* Sydney. For a long time, the one in Nova Scotia was commonly identified as "Sydney, C.B.," even long after Cape Breton's annexation to Nova Scotia, since "Sydney, N.S." could too easily be mistaken for "Sydney, N.S.W." (New South Wales).
* Sydney has an idea depicted (and labelled) as a "PC compact fluorescent bulb."
* Sydney herself had this happen to her as well in a previous episode,
* Sydney Hunter And The Curse Of The Mayan: Sydney starts out the game with a whip. It can break walls and vases, and defeat small enemies in a single strike.
* Sydney Hunter And The Curse Of The Mayan: There are spiders in the game that are just a head shorter than Sydney.
* Sydney Hunter And The Sacred Tribe has quite a few patches of quicksand around that will slowly pull Sydney down should he step on them. Sydney can repeatedly jump to get out of them.
* Sydney Hunter And The Shrines Of Peril: There's no real plot to this game besides "get Sydney though the screens to the shrines".
* Sydney Hunter And The Shrines Of Peril: The sky is always shown as a dark blue night sky.
* Sydney Hunter And The Shrines Of Peril travels through a cemetery to get to the titular shrine. There's even grave stones Sydney has to jump over.
* Sydney is thrown two months into the future. When she comes back, it's only been two days for her, and she asks how her pay will work. At Maxima's insistence, Ariana agrees to split the difference and pay her for a month—but only this time, since it was a relatively small jump.
* Sydney Riot of 1879) was an incident at an England-Australia match where a controversial umpiring call, which went in England's favour, sparked the irate Aussies into storming the pitch and attacking the English cricketers.
* Sydney, stranded off-world, manages to hook up with Frix, a dog-like alien species named "Woof". "Human" sounds as funny to him as "Woof" does to us.
* Sydney. The cause of the fire has never been determined, with speculation ranging from faulty electrical wiring to arson. The park has since reopened, and while it has occasionally closed again due to safety issues, this tragedy has not been repeated.
* Sydney White, being based on Snow White and the Seven Dwarves, has this with the eponymous character, who becomes the Nerd Nanny to seven dorky boys.
* Sydney White finds her and treats it as if she would never wake up, culminating with the kiss to "break the spell".
* Sydney White, rooming with "seven dorks" one of whose hobbies is this.
* Sydney White the reigning queen of the college's Hot or Not website (and therefore the "fairest of them all") is sorority girl Rachel Witchburn...until she's displaced by the newest pledge, Sydney White.
* Sye: Granted, the writer was apparently a bit unclear about certain rules. He was convinced that a rugby match implied rivers of blood. The most ridiculous moment comes when the scrum-half wiggles inside the channel between the two packs during a scrum, and starts punching the opposing team's hooker straight in the face. (If you don't play rugby, this sentence is most likely lost on you, go watch the scene from the movie if you're curious, it can be found online).
* Syfy, a fallen angel, hooked up with a human woman, but the resulting child was human, indicating that when God said there would be "no more giants", he meant it. Unfortunately, Amon had a giant son of his mummified along with four others before the flood and plans on resurrecting them, undoing God's decree.
* Syfy Alice and Hatter have an awkward goodbye where they lightly suggest one of them could sometime visit the other one's world. It doesn't take long for Hatter to show up at Alice's door.
* Syfy alumni, and the latter featuring guest appearances from almost every other Syfy show that was currently airing at the time.
* Syfy, an entire cult is made up of formerly damned souls now inhabiting the bodies of the living in order to experience earthly pleasures. Eventually one of the main characters is threatened with having his body stolen by the demonic

leader, Simon Magus, who shoots himself in the head in order to die and allow his soul to possess another.
* Syfy (anyone remember the name?) in which a malfunction causes the video game boss to animate the motion-capture exoskeleton in the real world and go on a murderous rampage.
* Syfy) averted this for many years, via Friday night blocks of strong original programming that provided some of the network's best ratings all week. Targeting a niche market known more for cultlike devotion than active social lives—i.e., nerds—may have helped the network develop an audience willing to put its favorite shows ahead of other potential Friday night activities.
* Syfy, because Syfy as a name "more clearly captures the mainstream appeal of the world's biggest entertainment category, and reflects the network's ongoing strategy to create programming that's more accessible and relatable to new audiences." The importance of the female viewer demographic is usually noted due to the popularized notion of their low regard towards science fiction. The name Syfy can also be trademarked, in contrast to "Sci-Fi," which is a generic, pre-existing term. Many critics accused the channel of trying to distance themselves from negative stereotypes of science fiction.
* Syfy, but surprisingly, she doesn't suffer a problem related to this trope, later.
* Syfy Channel Original Movie And even if you can do that, the moment it gets loose, it'll resume it's hunt as if nothing happened.
* Syfy Channel Original Movie and the scientists are trying to stop it.
* Syfy Channel Original Movie much to the girl's approval before she finally figures out that she's about to be lunch.
* Syfy Channel Original Movie. One of the characters makes a comment about a horrible smell in the air after it roars for a rather long time inside the bar she and other characters are hiding in.
* Syfy. Combine Han Solo and Captain Jack Sparrow (complete with Guyliner) but slightly less rogue and more lovable through the second part of the series.
* Syfy. Even though it's easily among the highest rated non-American shows on American television, it still isn't as ingrained in mainstream pop culture in the US as it is in Britain. The fact that it's not only British, but a science fiction show, probably has something to do with it.
* Syfy features disturbing sights found on satellite imagery that could only be seen during the day, each treated like a horror movie sequence or apocalyptic conspiracy. Examples include cryptids, giant masses below the surfaces of the water, crop-circle-type patterns, giant structures and land masses that vanish without a trace, weird clouds, mysterious smokescreens, possible chemical weapons, bizarre weather patterns, American stealth technology deep inside China, and what appears to be a murderer disposing of a body.
* Syfy) frequently made this mistake with a certain video game production school. It would show one commercial, then two or three seconds of a creepy CGI skeleton guy.
* Syfy guard comes in and catches on before he can jump her. Luckily, Tess manages to knock her out while she's busy struggling with Mason.
* Syfy has a man crushed in an open-shafted elevator (literally, the elevator "shaft" is a chain fence with no gate), it causes his eyes to bulge out while his face turns red, until his head pops and deflates like a whoopie cushion. Where is his skull? Never mind the weight of an open-air elevator being lowered that slowly wouldn't be enough to cause that much damage, most likely just pressing the lungs until he asphyxiated.
* Syfy has an airship inexplicably called "Herumfurzen", which means "farting around" in German.
* Syfy has a swarm of demonic ants that achieve a rudimentary humanoid form using the bones of people they've eaten.
* Syfy, is dressed as a typical Raygun Gothic pilot: Bomber jacket, flight cap and goggles, jodpurs and jackboots and carrying a raygun.
* Syfy", is Polish slang for "pimples," "acne," or "dirty stuff". Therefore, the

Polish version of the channel maintained the name "Sci-Fi Universal", even as the Syfy name was being used worldwide.
* Syfy is promoted lampshading this: "Even things that go bump in the night need protection"!
* Syfy parodies this in their advertisements by inverting it. They blatantly cut and paste their own shows to make it look like the characters are responding to critical praise.
* Syfy, scientist Vincent Cloak is in a race with rival John Hammond to take advantage of guided evolution, so he experiments on himself and secretly on wife Barbara as well. While both Hammond and Barbara find themselves evolving into superbeings, Vincent himself devolves into a weak simian.
* Syfy's former Ani-Monday block often made syndication-like edits for the anime being broadcast in order to fit in more commercials:
* Syfy, Sheriff Carter often has to deal with the weirdness caused by the geniuses living in the town. The sheriff himself is a former U.S Marshal.
* Syfy simultaneously. Artie is standing directly in front of the door, which doesn't fall with the house, and Claudia is lined up with the window.
* Syfy snippets- apparently, some people thought they had hallucinated this stuff and other people thought it was a Satanic message!
* Syfy to his skeletal "allies" and praises their courage when they stand fast in the face of the enemy bombardment.
* Syfy, unless the roles are reversed) is always the hero who deduces how to stop the plague/virus/infestation/attack/etc/etc.
* "Syfy", which is Polish for "acne", and just happens to be (plural) short for syphilis. Parts of the sci-fi fanbase ran along with it. (No doubt you saw the subtle irony in the Polish translation.)
* Syfy, Wonderland's economy runs on the sale of liquid emotions extracted from Oysters, or people from the human world.
* Sykes with his pet dobermans, however (they're electrified subway rails due to the third rail, so when Oliver and Dodger threw them off Sykes' car, the two are both immediately electrocuted upon hitting those tracks, and because of the third rail's voltage, the electrocution was fatal).
* Sylar actually uses his telekinesis in an unusually diverse number of ways. Practical applications include personal levitation, augmenting his physical strength (like Vader, he's fond of the one-armed throat choke),
* Sylar also attempts this in volume 3 and does about as well as Arthur.
* Sylar also managed to hold onto telekinesis after he [[spoiler: recovered from the shanti virus. When he recovered, he was only able to retain telekinesis and his original power of intuitive aptitude.
* Sylar and Peter both had lots and lots of powers, but you'd usually just see telekinesis from Sylar and a smattering of cheaper powers (such as teleports, mind reading, floating) from Peter. The expensive ones, like radiation and freezing, were usually saved for big-budget finales and premieres. Showdowns between Peter and Sylar consist of
* Sylar and Peter Petrelli both are able to acquire new powers from other evolved humans. Peter just has to remember how that hero made him feel. Notably, Peter has an easier time getting new powers,
* Sylar gets a good one while killing Ted, after flipping over the security van transporting him.
* Sylar goes down that road. After he kills for the first time, he tries to commit suicide (but is stopped by Elle and Noah). We all know how this story continues.
* Sylar has won the Eviler than Thou contest. Arthur Petrelli lost due to a bad case of bullet to the brain, courtesy of Sylar.
* Sylar in the middle of a murder because his victim's coworkers burst into her office with a surprise cake. It says something about him that he's more concerned about the cake than the fact that he's caught literally covered in blood. He's even eaten an entire pumpkin pie by himself.
* Sylar is 185 cm (6'1) and Elle is 155 cm (5'1). He has the same height difference with Claire (5'0).

* Sylar is revealed to have inherited his power to know things from his own father. When we finally meet his father, it's revealed that he also managed to find a telekinetic (like Sylar) and take his power.
* Sylar is riding in a lift with another individual. Sylar is utterly casual and generally following the elevator protocol; his fellow passenger also does so, but is doing so out of fear more than anything else — Sylar's clothes are drenched in blood. Sylar asks the other man if there's something wrong, and when he stammers out "No, of course not," his newly obtained
* Sylar killed his mother semi-accidentally, in the fight after she tried to stab him with a pair of dressmaking scissors.
* Sylar killed Nathan, Claire expresses how much she wants to kill Sylar, telling him, "You killed my father!" She doesn't manage to kill him, but she does stab a pencil in his eye.
* Sylar's biological father has the same core ability as his son (i.e. to sense how things work and steal powers). He also manages to "acquire" telekinesis from some pool soul. Peter Petrelli gets telekinesis from being around Sylar due to his empathic ability. When Arthur steals his powers, he gains this as well. In fact, he is much more proficient in them than Peter ever was, using telekinesis to
* Sylar's doubts about destroying New York last for about ten minutes before he's out pursuing exploding powers, laughing as Peter is about to explode, and preventing Hiro from stopping the Exploding Peter. I don't think we can really think of Sylar as being all that sympathetic.
* Sylar's now infamous comment on how brain-eating is "disgusting" in
* Sylar (though he ends up resurrecting. You always wanted to be special. Look at you now. You're nobody."
* Sylar turns out to eviller this time too. We should perhaps just accept that you cannot
* Sylas, the Unshackled has this as his ultimate ability, "Hijack": he can copy the ultimate of any enemy champion for one use, though there's a cooldown between times he can copy a single champion.
* Sylia occasionally receives job offers and intelligence from one of these in
* Syl is surprised to discover that she can sense when a highstorm is coming, even when it's still days off. When Kaladin was in the warcamps, she didn't need to exercise this ability since there were always lists of when the next few storms would be.
* Syllablic crossword: Each square takes in one syllable instead of a letter. "Words" usually are phrases or sentences.
* Sylphs (female-only elemental kin here) are naturally levitating and use their gossamer wings only to move themselves around.
* Sylphs have names ending in "xio" for fertile members and "xia" for infertile members.
* Sylvain's only truly low growth is in Resistance, and his only skill weakness is in bows. He has passable to good stats in every other category plus a budding talent in reason, allowing him to become a good
* Sylvain when he sees his behaviour is making her uncomfortable, he immediately backs off and instead gently encourages her to smile because he believes it will help her be more confident when interacting with others.
* Sylvanas's short story revealed there is another underlying issue with the Forsaken. Being torn from the afterlife
* Sylvanas Windrunner and Nathanos Blightcaller for the obvious reason that they are dead. (not according to
* Sylvanas Windrunner is THE dark action girl. Banshee Queen, Dark Queen of the Forsaken, Dark Ranger...she's basically a Dark Lord who just happens to work for the Horde, although Garrosh sees it in action in Silverpine when she raises new Forsaken from the Alliance dead.
* Sylvanas Windrunner's outfit, specifically her skin-tight pants, in
* Sylvan Esso's "Radio" is satirizing what artists will do to get air play on radio or make click-bait videos, but the
* Sylvanian Families because "Sylvania" happens to be the name of a manufacturer of

electrical products.
* Sylvanian Families, consider focusing on only one or two species, and avoid going for characters that are no longer produced, to avoid having your finance spiral out of control.
* Sylvanian Families: Debuted in stores in 1985, and despite some controversies (ie disappearance from US shelves for a short stint followed by a name change in the US circa 1993, and another disappearance for a short stint, this time in the UK, in 2009) and numerous revamps, is still going strong.
* Sylvanian Families enjoyed some friendly fandom back in the 80s. This most likely stemmed from the toys being similar in size (and later, Maple Town would ape Sylvanian Families and switch their figures to miniature plushes) and thus the accessories being unintentionally cross-compatible.
* Sylvanian Families figures are exactly the same whether male or female. The only way to tell them apart is from their clothes; boys wear various dungarees and shorts while girls wear dresses with flowers and bows. You can swap clothes without noticing the difference. There are four families with horns or tusks; however there are currently at least 61 families, and more if you count family members that only come individually in accessory sets.
* Sylvanian Families has a rather strange case — as character sets get discontinued and introduced, the jobs of the characters all get shuffled around. For example, Rebecca's dad was the dentist in the village, but when the Hamster family was discontinued, he's suddenly the nursery bus driver. Likewise, Rebecca's mom was a nurse at the dentist office, but became a preschool teacher. Pier's dad somehow got saddled with double duty as both the teacher at school and as town mayor when the hound family was discontinued — Dennis' father was previously the teacher of the school. Likewise, Saffron's parents were previously thespians at the local theatre, but we're changed into inventor and salon owner respectively.
* Sylvanian Families. It's hard to imagine any reason beyond advertising the toys, that this was given an animated show.
* Sylvanian Families — she will help anyone in need, no questions asked, leading some characters to take advantage of her hospitality.
* Sylvanian Families on some of the playsets involving shops and restaurants.
* Sylvanian Families played this in a rather funny way. Usually on the Japanese versions their names were based on the toys and had no official names. Until of course the official subs included on the DVDs used their Official English names. For the record:
* Sylvanian Families syndicated cartoon. Usually to the villain, Packbat, stumbling into one of his own "silly-vanian traps".
* Sylvanian Families talks in her sleep and reveals she's dreaming of cookies. She takes a chomp out of her pillow before spitting a feather out.
* Sylvanian Families was allowed to be released on DVD under the original title.
* Sylvania, ruled for centuries by the Von Carstein bloodline, is considered
* Sylvan/Jungle Giant Space Hamster: Able to climb with surprising speed and agility, presuming it can find any nonslick surface that can bear its weight.
* Sylvannas' entire characterization is the stages: she starts out in Denial, attempting to ignore her undeath so she can re-integrate with elven society, but when they (including her sisters) excommunicate her, she moves on to the third phase and spends every waking moment in sheer Defiance of Arthas for denying her a just death. After Arthas is finally defeated, she decides she has no purpose and commits Suicide... at which point, the sheer
* Sylvan of the series, who, to avoid capture casts a powerful spell, which makes the Prince wake up in the woods with amnesia.
* Sylveon has become a symbol of transgender pride and trans rights, due to its color scheme being similar to the trans flag, having a feminine appearance despite its male-slanting sex ratio, and evolving from the more masculine-looking Eevee.
* Sylvester also uses this trick in "Mouse Divided," against a cluster of cats using a larger log as a
* Sylvester and Tweety of Granny's, who does everything he can to protect Tweety from Sylvester. Even at the end, as Granny and Tweety leave on a cruise ship, that

bad ol' putty tat still tries to go after the little yellow bird, while the shark still goes after Sylvester.
* Sylvester and Tweety Pie also did a beanstalk cartoon, "Tweety and the Beanstalk".
* Sylvester and Tweety, wherein Granny and Tweety take a world tour of several foreign lands — Paris, the Swiss Alps, Venice, and Japan — is used to frame the latest cat-and-bird chase.
* Sylvester. As he falls, Sylvester yells for Malcolm to grab him again.
* Sylvester ate Tweety surely more than once, just to catch some gratuitous violence from Grandma resp. Spike and having to spit him out again. (And these are just the prominent offenders - one possibly could make an animation gag subtrope out of it...)
* Sylvester can be pretty bad himself, particularly when it comes to his friendship with Tomato (and the majority of his other friends too, if
* Sylvester Graham commissioned a whole line of Graham breads made from coursely ground wheat intended to
* Sylvester Groth was an East German actor who defected while in Austria in 1986. He has since appeared in a number of American movies, played Joseph Goebbels twice and most recently was in
* Sylvester, he was mute, being the pet cat to Porky, and the only one of the two to see horrific things happening around them. He vainly tries to communicate this through pantomime to his annoyed, incredulous master.
* Sylvester is chasing a mouse this way. The mouse puts a pat of butter on the railing, which speeds up Sylvester's trip and sends him all the way out.
* Sylvester McCoy barely sounds different at all apart from being more confident with the character.
* Sylvester McCoy, crudeness, and was overall considered obnoxious. The Seventh Doctor, on the other hand, is one of the more popular regenerations for bringing an air of mysteriousness and mischief to the role that revolutionized future Doctor portrayals.
* Sylvester McCoy) had his rrrolling Rrrs. He also flapped and fluttered his hands around ebulliently. He likes to twitch his eyebrows up and down rapidly when being deliberately funny.
* Sylvester McCoy" - in his first scene, he's trying and failing to learn to juggle from a "teach yourself" book. This is because scriptwriter Stephen Wyatt had assumed that he could juggle because of his background, and it was late in the production that he admitted to the director that he was unable to do the juggling scene that had originally been written.
* Sylvester McCoy, in which he played a has-been actor best known for his kids' TV role as "The Magical Lollipop Man".
* Sylvester McCoy) never knew his father, who was killed in World War II a month before he was born.
* Sylvester McCoy. Plus, a lot of McCoy's performance artist backround bled into the character, such as playing the spoons, physical comedy, etc.
* Sylvester McCoy put his name forward for consideration to play the Doctor in 1983, unaware the Baker had been cast. He would later play the Seventh Doctor.
* Sylvester McCoy to regenerate and was never expected to continue beyond it, and the Eighth Doctor, who was not brought back for the 2005 series as the producers wanted to start fresh, rather than any decision by the actor.
* Sylvester McCoy, treated as a sacrificial lamb. The series managed to hang on by the skin of its teeth, and got another two seasons before the next, and much longer, hiatus.
* Sylvester Shyster, a recurring villain who attempted to cheat Minnie Mouse out of her inheritance in his first story.
* Sylvester's nose is large and bulbous, as are the noses of a sizable number of other
* Sylvester Stallone (1970). Then he moved on to more broadcast and 'serious' entertainment.
* Sylvester Stallone about the company's origins. This time, Warburton calls

security.
* Sylvester Stallone (after again starring in a couple of films that were bashed), which garnered him an Oscar nomination.
* Sylvester Stallone and Chuck Wepner that took place at Richfield Coliseum in Richfield, Ohio on March 24, 1975. Wepner was TKO'd in the 15th round of the match by Ali, with few expecting him to last as long as he did. Despite the fact that the match motivated Stallone to begin work on the script, he has subsequently denied that Wepner provided any inspiration for the script.
* Sylvester Stallone appeared as a gladiator fighting a lion in a sketch on
* Sylvester Stallone by eating pancakes at a local diner three times a day. By the time he was called back for reshoots he already lost the weight. He's also taken to using growth hormones to maintain his impossibly muscular physique for various roles.
* Sylvester Stallone features a stereotypically nebbishy IA cop who angrily challenges Cobra as to whether his decision to execute a criminal holding up a supermarket might have been excessive; Cobra's response is to punch his lights out. Stallone also punches him at the end of the movie when the IA cop makes a snide comment over how he'd have handled things a bit differently, but "No hard feelings". Stallone: "Sure. (WHACK!) No hard feelings, Monte."
* Sylvester Stallone for this reason. And he got to sing a couple of songs!
* Sylvester Stallone for which his brother Frank provided half the soundtrack.
* Sylvester Stallone had handily killed pretty much everyone in any position to punish him.
* Sylvester Stallone he immediately gets a wrong number on his video phone from a nude woman.
* Sylvester Stallone in Europe out of fear of terrorism. When this was met with jeers about "big, tough" Rambo being afraid, he pointed out his critics were doing exactly what he thought the terrorists might do: confusing the role "Rambo" with the real-life actor Stallone.
* Sylvester Stallone. Most people are not aware that he started as a softcore pornography actor.
* Sylvester Stallone purely to fulfil his contract with Cannon Films. He explained:
* Sylvester Stallone purely to fulfill his contract with Cannon Films.
* Sylvester Stallone shatter with the carabiner. The studio was actually sued by the carabiner manufacturer as a result of this scene and the blatant inaccuracy of it breaking in such a scenario; when it snaps in the film, there is a prominent close up of the carabiner with the manufacturer's logo prominently displayed, which certainly would damage the manufacturer's public image in its market.
* Sylvester Stallone to win the championship...but wait! We never did see Grizzly or Hurley lose before that, did we? Most of the championship went by in the form of a montage of every single match, in which we saw Hawk, Grizzly, and Hurley easily winning all of their matches...then we saw Hawk lose to Grizzly...and then we saw Hawk beat Grizzly, Hurley beat the other quarterfinalist, and Hawk beat Hurley after a single (albeit extremely long and climactic) match. The entire "double-elimination" aspect was apparently thrown out as soon as Hawk was done using it for a plot device.
* Sylvester Stallone while in the Wasteland. Curiously, he seems to dig it, though he seemed a bit surprised/disgusted for a brief moment. There are several possible reasons for this;
* Sylvester Terkay, better known for his work in Japan, had a run in
* Sylvester Terkay cut his teeth in the wrestling business as Predator, the resident wrestling monster of Pro Wrestling ZERO-1. He was brought to WWE and briefly given a monster heel push, but he somehow never really connected with the fans and was released less than a year into his run.
* Sylvester the Cat and Tweety Bird: Aww, an adorable black-and-white tom-cat tries to catch and eat a cute yellow canary.
* Sylvester the Cat and Tweety Bird cartoon. Sylvester has immobilized the dogs in a dog pound, and Tweety wants to know how to break the spell. Sylvester's reply: "You expect me to tell you that the only way to wake them up is with a police

whistle?" Sylvester then clamps an upside-down glass over Tweety while the bird was in his paw, silencing Tweety's whistle. Unfortunately for Sylvester, Tweety happens to have a straight-pin with him.
* Sylvester the Cat and Tweety Bird makes this extra confusing as Granny cannot understand Sylvester and Tweety, yet Witch Lezah can. Could be that they can talk and Granny doesn't notice because she's senile.
* Sylvester the Cat and Tweety Bird. One of the clip shows and a movie show Sylvester has chased Tweety through the entire world.
* Sylvester the Cat and Tweety Bird. Tweety taw a puddy tat, and will take the time to banter with him before evading being devoured.
* Sylvester the Cat and Tweety Bird, Tweety would usually pop them. But unlike the other avian examples, he would use a pin or slingshot rather than his beak.
* Sylvia also is this in the Oosawa manga. She fell in love with Lewyn
* Sylvia and Morty's apartment fit the sitcom standard of lounge-kitchen, and was realistically small.
* Sylvia and the survivors have realizations of how utterly defenseless they were against a true armed assault on their lands. Even now, her group's military strength, despite welcoming Norma into the mix, is subpar compared to the more radical Norma left behind.
* Sylvia fills this role on Team Alchemical, as the most mature and technical of the group, and the member most concerned with the
* Sylvia Likens was being tied up and tortured in Gertrude Banizewski's basement, Jenny Likens wrote to their older sister Diane, pleading for help. Diane initially assumed that Jenny was just kicking up a fuss because she didn't like being left while their parents were traveling, but finally stopped in to check up on the girls. She arrived to find that Sylvia had "run away", according to Gertrude, and Jenny was too afraid to talk to her. When she contacted social services, they failed to help at all. Her death is the reason for many mandatory reporting laws, and why follow-up is required in response to tips about child abuse.
* Sylvia Louise Engdahl: Human societies go through three stages that boil down to childhood(which would be before modern science), adolecence, and adulthood. During the "adulthood" of a society, they learn how to communicate through telepathy.
* Sylvia Plath key figures in confessional poetry. Joyce Carol Oates hailed the publication of Plath's unabridged journals as a "genuine literary event."
* Sylvia Plath, Valerie gets one of these. Valerie is a friend of Esther’s in the private mental hospital. She is friendly and relaxed.
* Sylvia Plath wrote in her journal about how she wanted her mother to love her. She realized that her writing would never be hers until she stopped writing for her mother's approval and started writing for herself.
* "Sylvia's Mother" by Dr. Hook implies this, as most of what Sylvia's mother tells the singer are standard euphemisms for hurrying a daughter who is probably pregnant out of town.
* Sylvia the Sylveon, a large number of these tests are presented to Sylvia. Although tempted by some, she chooses to continue her quest because she wants to decide what she wants to do in life (the premise of the tests) after seeing her family.
* Sylvia the Sylveon was written after Sylveon was revealed as a new Fairy Type Eevee evolution but before its evolution method was known, meaning the author had to invent a means for Sylvia to evolve into a Sylveon; she had some scientists use an (unnamed) item. It later emerged that Sylveon's canon evolution method requires an Eevee to have its affection raised to a high level while knowing a Fairy Type move. The author acknowledges this in her notes at the end of the story.
* Sylvia Trench has only a couple minutes of screentime during the first two Bond films,
* Sylvie comments to Kate that she didn't think she would ever see a female black TV producer. Her husband is less than enthused with the demands of her job.
* Sylvie (or Simone) had greenish-colored hair while Monique's appeared to be a pink color. Both of them received brown hair in Season 3.
* Sylvie's Love: As a sign of their love, Robert and Sylvie slow-dance thrice: the

first is a truncated one after she first sees him perform, the next in the street following a party, and the third at a restaurant after they can finally be together.
* Sylvie's Love: In the first act, Robert is the Poor Suitor (an aspiring musician employed by her father) and the offscreen Lacy is the Rich Suitor (his father is a successful doctor) for Sylvie's hand.
* Sylvie's Love: Lacy's attitudes towards Sylvie's job fit in with The '60s. He's fine with Sylvie working...as long as it doesn't interfere with her duties at home. And given that he's just landed a big account, he tells her she can afford to stop, missing that she enjoys the work.
* Sylvie's Love: Mona calls her beloved cousin Sylvie "kiddo"; Robert's bandmates call him "B-flat".
* Sylvie's Love: New York City provides the dreamy, jazzy backdrop to Sylvie and Robert's romance.
* Sylvie's Love: Robert is a saxophonist like his love interest Sylvie's father was.
* Sylvie's Love: Robert's storyline is about succeeding as a saxophonist.
* Sylvie's Love: Sylvie was pregnant with Robert's child when her fiance Lacy returned from the Korean War, but Lacy still agreed to marry her for the child, which Sylvie comments was very noble.
* Sylvie's Love: The bulk of the story is set in the early sixties when the Civil Rights Movement was still incipient, and so the attitudes of the time affect the characters.
* Sylvie's Love: Variant on Let's Call the Whole Thing Off as Lacy makes it further than "fiance", but when he realizes at the end of the second act that he and Sylvie are incompatible and she only has eyes for Robert, he gracefully exits the story after five years of marriage.
* Sylvio, a game about recording ghostly messages using a microphone, uses a unique approach to getting into locked safes and lockers. By using the microphone to pick up imperceptible sounds, you can hear the tumbler click each time you've reached the correct number in the combination. Repeat as necessary until the door opens.
* Symbaroum has this as a major part of the backstory. After a twenty-year war against the necromantic Dark Lord, the human kingdom of Alberetor can barely support any life. The remaining population invades North, conquering the local barbarian tribes, and founding the new kingdom of Ambria on the edge of the gigantic forest Davokar.
* Sym-Bionic Titan: After Ilana misses the dance she worked so hard on (to set up the theme, as it reminded her of her home planet). Lance decides to cheer her up by putting on a hat and sharing a dance with her. Jason and Maribel's dance from earlier (after said couple abandoned them earlier) could be seen as this, although not the dance between Kimmy and her ex-boyfriend Brandon.
* Sym-Bionic Titan, after Octus crashes into a store while trying to rescue Lance and Ilana from G3, he tries to investigate the area where they vanished at, while the store-owner describes Octus' human-disguise to the cops. Octus quickly alters his appearance as the police take notes to not draw attention.
* Sym-Bionic Titan also falls under the "too dumb to be spiteful" category, but he's actually quite nice to Newton/Octus.
* Sym-Bionic Titan, although their relationship is more familial and platonic than romantic.
* Sym-Bionic Titan: Although they resemble mechs, the armor Lance and Ilana use (Manus and Corus, respectively) fit this more. There are/were many more Manus armor back on Galaluna.
* Sym-Bionic Titan and despite it killing them there isn't any blood or even a wound in the next shot.
* Sym-Bionic Titan and forces them to speak the truth. What's really creepy about it is that Xishi's face is visible from inside the victim's throat.
* Sym-Bionic Titan and passionate about school-related activities. Although she is shown to worry about the state of the people on her planet.
* Sym-Bionic Titan are pretty cruel to the show's main trio when they start school

there. Some of them get better.
* Sym-Bionic Titan aspect probably isn't standard, though, since the King passed him a new model (his old one had been confiscated) before sending him off.
* Sym-Bionic Titan, a witness is describing Octus's father's disguise to Detective Blutosky. Octus, standing nearby, alters his appearance to make him appear different from the description. A child sees Octus' face morphing and tries to get the attention of his mother. The mother, not having seen him before he morphed, tells him not to stare.
* Sym-Bionic Titan band, particularly Ian, come off as this way as they kick Lance out of their band claiming that he's "attracting the wrong kind of audience."
* Sym-Bionic Titan, being inspired by 70's super robot cartoons, doesn't even try to justify the alien main characters speaking English, or even bring it up.
* Sym-Bionic Titan budget. It got good ratings, but not enough to turn a profit without the extra push the merchandise would've given it.
* Sym-Bionic Titan. But the network didn't bite and Sym-Bionic Titan's single season is all there is.
* Sym-Bionic Titan does it in "Lessons in Love" when Lance and Ilana interrupt her and Newton when they were about to kiss.
* Sym-Bionic Titan does this after the eponymous robot just barely stops itself from falling face-first onto him.
* Sym-Bionic Titan ending when he tells the King his father won't be coming back. Though many fans heavily believe that the leader of G3 is, in fact, Lance's father. Even the episodes he is in highly suggest this.
* Sym-Bionic Titan episode "I Am Octus." Octus, when looking at a painting with his human(oid) companions, only sees paint and a canvas rather than an image. After a Mutraddi causes all organic creatures to freeze, Octus remains mobile and tries to figure out how to undo this. He asks himself "I am not a human, but I'm not just a robot. Am I both? Or neither?" He manages to be capable of painting a beautiful picture.
* Sym-Bionic Titan episode "Phantom Ninja". When Ilana remarks that she doesn't get what the girls at school see in Lance, Octus replies:
* Sym-Bionic Titan episode "Roar of the White Dragon" while fight a giant slime beast with long arms at one point they use the Titan to break one of the monster's fingers causing it to scream in pain, they then rip off its arm and beat it with it.
* Sym-Bionic Titan episode "Showdown at Sherman High" when Kimmy and the other cheerleaders are looking for a new member, before we see Ilana's audition.
* Sym-Bionic Titan episode "The Ballad of Scary Mary", although it was probably a substance like molasses rather than tar.
* Sym-Bionic Titan had The Academy on Galaluna, a military training facility which starts training future soldiers as children. To be fair, however, it is partially Truth In Television: most of them are teenagers, and military schools do exist for such ages. However, they also showed a row of children who looked even shorter, and, presumably, younger than Lance and Arthur — who were already small and really young-looking to begin with.
* Sym-Bionic Titan: Happens to Lance and Ilana when they are hitchhiking in the rain in "The Steel Foe".
* Sym-Bionic Titan has "black" eyes (most of the characters have black dots for pupils) and black hair.
* Sym-Bionic Titan has the Gallalunans, who seem to blend in with the Earthlings very well. Interestingly, one episode showed they have equivalents to multiple human ethnicity instead of all looking like white people.
* Sym-Bionic Titan, he attempts to use his electricity to bring Ilana and Lance "back to life." When it does work, he actually smacks his hand across this face, making this pained expression as if he was going to cry.
* Sym-Bionic Titan. His warm side can also be seen at times around Lance and Ilana, as well as when he's watching Animal Friends.
* Sym-Bionic Titan. If the series ever makes it to DVD, it'll make a lot more sense.

* Sym-Bionic Titan. Ilana had a bunch of these back on Galaluna, who try to copy her appearance.
* Sym-Bionic Titan: Ilana tries one of these on during a montage, as suggested by Kimmy, but doesn't seem too fond of it. She ends up not going along with it.
* Sym-Bionic Titan: In an effort to scare off a murderous classmate, Lance breaks into the military academy's armory to steal a Manus suit. Unfortunately, the classmate responded by stealing a Manus suit of his own.
* Sym-Bionic Titan, including Brandon Chase, Baron and a few unnamed high school students. Averted with Edwin "Meat" Kapinski, however.
* Sym-Bionic Titan: in the flashback episode, Ilana and Hobbes, her bodyguard, are able to tank-jack, but since the bodyguard was too wounded, Ilana had to drive the tank. The first thing she does at the controls is drive the tank in reverse.
* Sym-Bionic Titan is about two aliens and a robot who come to Earth to hide out. They quickly manage to buy a house and a car (using counterfeit cash their robot printed), enroll themselves in a high school, and one of them even obtains a driver's license.
* Sym-Bionic Titan is a teen romantic comedy set between a tearjerker episode and a particularly violent and intense one.
* Sym-Bionic Titan is just one huge love letter to the super robot genre and tokusatsu and boy, does it ever show.
* Sym-Bionic Titan, Kimmy is fed up with Octus (with Lance and Ilana) "going to the bathroom" all the time, especially when he leaves right before the prom.
* Sym-Bionic Titan, Lance and Ilana are accompanied by Octus, a bio-cybernetic robot who poses as a nerd named Newton while in school, and as their father outside of school. He serves as the "mind" of Sym-Bionic titan.
* Sym-Bionic Titan: Lance and Ilana hang out in the downtown area of Sherman on a school night. They run into a classmate of theirs, who think it is a date. Ilana reminds them that they're (masquerading as) siblings.
* Sym-Bionic Titan, Lance has a sword fight with his former Commander. In the end, Lance stabs the commander through the stomach and lets him fall from the platform they were fighting on.
* Sym-Bionic Titan: Lance is initially suspicious of the alien creature Ilana brings home, although he's taken in by how adorable it is (and tries naming it after a warrior from his home planet).
* Sym-Bionic Titan, Lance joins a band, then gets kicked off after his appearances draw a huge crowd.
* Sym-Bionic Titan. Most of the students of Sherman High have Only One Name, which the exception of Kimmy Meisner and Brandon Chase.
* Sym-Bionic Titan: Most people only know the show for its infamous twerking scene that aired on children's television.
* Sym-Bionic Titan: Newton constantly has to "go to the bathroom." With his brother and sister. It would be worse if his girlfriend knew he was really a robot.
* Sym-Bionic Titan pose as siblings in their high school. Genndy Tartakovsky said before there was to be no romance between those two.
* Sym-Bionic Titan says that the most they see each other is Brother and Sister.
* Sym-Bionic Titan. Steel's violent obsession to stop any aliens tends to endanger his men and everyone around him. During his mecha's first battle, his fighting style is far more aggressive than the Titan's and tends to cause a great deal of damage.
* Sym-Bionic Titan takes advantage of this, causing her to believe that her planet's people need her and it's her fault that they're dying. She also feels this way towards the people of Earth, as the Mutraddi are there because they are searching for her.
* Sym-Bionic Titan, the fight between the Titan and their foe creates a giant crater in the city, which is still visible and noted in subsequent episodes, with the implication that thousands were killed. The heroes try to limit their efforts to outside the city from then on.
* Sym-Bionic Titan. The King is surprised when he discovers Modula was behind his planet's invasion.

* Sym-Bionic Titan, the main trio fights a chameleon monster that tries to do this, notably impersonating Octus' girlfriend Kimmy. Octus is fortunately, reminded that it's not really her (especially as the mutraddi's eyes are pretty much its own).
* Sym-Bionic Titan the three leads' armor are named Manus, Corus and Octus (hand, heart and eye).
* Sym-Bionic Titan: The traitor during the invasion of Galaluna is stabbed through the gut by Lance and topples over the edge of a bridge to his death.
* Sym-Bionic Titan though, he's actually quite fond of the nerdy Newton.
* Sym-Bionic Titan though intentionally wanted to avoid romance between them mainly to avoid the obvious squick potential.
* Sym-Bionic Titan to be this, but Newton tells her she shouldn't have to be that just because society thinks so. Turns out with his help, she is able to figure out her math homework.
* Sym-Bionic Titan to Ilana and Lance. He's not really considered an inferior to them.
* Sym-Bionic Titan was canceled after twenty episodes due to no companies wanting to make merchandise for it.
* Sym-Bionic Titan, when Kimmy kisses Octus, sparks fly quite literally.
* Sym-Bionic Titan, where he jams his entire body down people's throats. The hitch is: He only rapes Lance. Lance, and only Lance. "Lance was raped by a space squid and doesn't want to talk about it." is an ongoing joke in the fandom, and it's even played with on the Twitter page someone set up for him.
* Sym-Bionic Titan) who has a few encounters with Lance is named Kristin. This is mentioned in the credits.
* Sym-Bionic Titan with "High School Heights", an over-the-top drama where teens are making out in every shot and a character's dark secret is his inability to read, airing on "The WC".
* Sym-Bionic Titan with the cheerleader, Kimmy. She doesn't know he's a robot though.
* Sym-Bionic Titan, Xishi, a squid-like monster about the size of an average human, climbs all the way down her victim's throat and forces them to speak the truth, causing their veins to be strained.
* Symbiopsychotaxiplasm: Take One form. It's a "documentary" about the filming of a movie called "Over the Cliff", but there is no real movie called "Over the Cliff" being screen-tested; that is a fictional plot element written by William Greaves in order to hang his movie around. And while its unclear how much of the rest of the film is scripted, Greaves himself is definitely playing a character, a film director who is both egregiously sexist and kind of incompetent, leading to frustration from the rest of the actors and crew.
* Symbiopsychotaxiplasm: Take One is about the filming of a (fictional) movie called "Over the Cliff"... and the documentary crew filming that movie... and the second documentary crew filming the first documentary crew.
* Symbiosis and her massive Ghost Pokémon entourage have to be called in.
* "Symbiosis" has an entire planet addicted to a drug called "felicium". It used to be legitimate medicine to treat a deadly plague; the plague is long since gone, but the addiction remains.
* Symbiosis to Ash entering and leaving elementary school and finally to him leaving Viridan Forest at age ten to become a Pokemon trainer.
* symbiote. All of the previous functionality is ported over and improved as well.
* : Symbiotes that merge with human hosts are able to create all kinds of organic technology. If they don’t go crazy, that is.
* Symbiotic Possession - The relationship between guest and host is friendly; something like that of roommates.
* symbiotic refuse to give the Ornarans the parts they need to repair the freighters that transport the drugs as part of the same non-interference clause. Crusher remarks that both groups would have likely much preferred to stay in their illusory relationship with each other, and Picard adds that hopefully, once the withdrawal passes, both groups will be able to begin a new, healthier relationship.
* Symbolically Broken Object: A broken object represents the death of a person or

destruction of a relationship.
* symbolically played this trope straight, since Cooper was the con man who destroyed Sawyer's family, which led Sawyer to a life in the same business.
* Symbolic Baptism: A character's immersion in water marks the beginning of a new phase in their life.
* Symbolic in ancient imperial China. An axe is given to a general and used to perform rites signaling that a fight is about to start.
* symbolic. It is not known why May accepts his offer; however, he is a rich man and above her social class. Damyan, a squire of Januarie's court, falls in love with May and she reciprocates. Januarie loses his sight, and his blindness increases his possessiveness and jealousy toward his young wife May. The lovers manage to sneak up to the branches of a pear tree in May's garden and begin to make love right above her husband's head. An enraged god Pluto restores Januarie's sight, but goddess Proserpina allows May to outwit him by explaining that she was merely struggling with Damyan in the tree because she had been told that it would magically restore Januarie's sight. The fooled Januarie and May continue to live together, and quite happily. May tells Januarie that he may be mistaken on more occasions, indicating her infidelity will go on.
* Symbolic Mutilation: A character is rendered disabled in a symbolic way.
* Symbolic Mutilation: A missing body part or injury reveals something about the character.
* Symbolic Mutilation: And sometimes it's done to represent something.
* Symbolic Serene Submersion: A dead body is shown floating beneath the water, in a symbolic kind of way.
* Symbolic Serene Submersion, but they're cool enough to let it slide.
* Symbolic Serene Submersion: Floating motionless underwater as visual shorthand for a character's emotional state.
* Symbolic Serene Submersion: Floating motionless underwater represents the character's internal state.
* Symbolic Serene Submersion: I'm floating limply underwater, symbolizing my apathy/helplessness, because I simply stopped caring.
* Symbolic Serene Submersion: Someone in danger of drowning reacts with surprising calm.
* Symbolic Serene Submersion: Surrender, meditation, calm, overwhelm, isolation, or helplessness.
* Symbolic Serene Submersion - Visual metaphor where a person is passively submerged in an ocean, pool, or other body of water for symbolic reasons
* Symbolic Wings. In Universe, the 'wings' are most likely the glyphs that make up the oath he just swore, but since birds are exceptionally rare in this world, wings don't have any special symbolism attached to them.
* Symbolism — Things Represent Other Things quite frequently in poetry.
* Symbol Magic seems to be an exception, as it seems any branch of magic can use it. For the most part, it requires precise measurements and years of study.
* Symbol Motif Clothing: A character's clothing regularly represents something important about them.
* Symbologist Robert Langdon holds a cryptex while Sir Leigh Teabing points a revolver at him in
* Symbology Research Failure: You fail to remember that cool logo you saw the other day and put into your work actually has religious meanings.
* Symbols of faith also harm vampires, although the user has to believe in the symbol. A cross won't work for Dresden but will be incredibly effective for his friend and
* Symbols of faith like Michael's cross and Harry's pentacle can repel creatures of darkness — but they're only as strong as the wielder's faith in them. When a Red Court vampire sees a man dressed as a Knight of the Cross at a costume ball, he mockingly grabs the man's crucifix, then promptly subverts the trope by bursting into white flames. Turns out the man
* Symbol Swearing: Profane language censored by replacing swear words with garish symbols (also known as grawlixes) is commonly done in comics.

* Symbol Swearing rate, Cunt. Nicolas Angel and Andy Wainright have a heated argument, and both turn aside to politely thank their respective guy for paying in. The argument started with Nicholas paying in advance for his first swear.
* Symbol Swearing: Symbols appear in speech bubbles to indicate the character is cussing, used primarily in American comic book stories or literature.
* Symbol Swearing to unteach a goblin child who'd learned them too early and was causing trouble.
* Sympathetic Adulterer: Someone cheats on their spouse and is treated as if being unfaithful was the right thing to do.
* sympathetic, and the reasons he did it are gone into in great detail.
* sympathetic. His nickname, of course, is derived from Otakon, the Otaku Convention. The first lines he says to the main character, Snake, are a very melancholy invocation of the trope, and sets him up for some very unusual and well-played parallels between the loneliness of a reclusive soldier and the loneliness of a reclusive otaku -
* Sympathetic Inspector Antagonist Ginko, with Eva and Ginko kept in constant check to prevent them from overshadowing the main character;
* Sympathetic Inspector Antagonist, has a habit of stereotyping his subjects and making somewhat, shall we say, politically insensitive remarks, particularly about Hispanics and poor people. When judged by his actions rather than his words, however, he is a good cop and a heroic man who is supremely dedicated to fighting crime and protecting his friends and family. Ironically, his two closest friends on the force (and quite possibly in the world) are Hispanic and black, the former of whom laughs off his racist jokes most of the time.
* Sympathetic Inspector Antagonist's "Shrink Bomb" works on her, and takes away her infinite HP.
* Sympathetic Inspector Antagonist: The antagonist is a likeably portrayed law-enforcer trying to capture a law-breaker who happens to be the protagonist.
* Sympathetic Inspector Antagonist, with INTERPOL itself having establishments and jurisdiction in different parts of the world.
* Sympathetic Magic this only makes the Tooth Fairy's castle a major target for someone wishing to control all the world's children at once.
* sympathetic moments, he's still an amoral arms dealer supporting a bloody civil war and acquiring weapons through dubious means.
* Sympathetic Murder Backstory: A character once killed someone, but for sympathetic reasons—still, they carry guilt over it.
* Sympathetic Murder Backstory involves them being a sympathetic killer.
* Sympathetic Murder Backstory: Is a nice person, but once killed someone.
* Sympathetic Murderer: Dwelling on the extenuating circumstances that make it more understandable why the character would resort to criminal behavior.
* Sympathetic P.O.V.: Audience sympathy depends on the point-of-view of a character.
* Sympathetic Sentient Weapon: A sentient weapon is unhappy with their role, and the audiences feels sympathetic for them.
* Sympathetic Sentient Weapon: A sentient weapon unhappy with its role.
* Sympathetic Slave Owner to have a character own slaves because they were indoctrinated into such a culture, that it stays alive.
* sympathetic the murderer was. If they had a tragic backstory and a selfless motive, the episode usually ended with Jessica shaking her head sadly.
* sympathetic with which to begin. In any case, someone eventually had a better idea.
* sympathize with Ommadon for being outraged over science striving to destroy the magical world, then his plan to destroy and discredit science to preserve the world of magic can be viewed as this.
* Sympathy and Antipathy are two other good ones. Cast on a place, they make you very strongly want to stay there, or get out as soon as possible. Cast on an object, they make you either covet it and obsess over possessing it, or want absolutely nothing to do with it. Furthermore, they only affect specific beings determined when you cast the spell, leaving all other beings unaffected.

* sympathy card and go on hating him. Joker himself doesn't know whether that's part of his real history Honestly, that's clever.
* Sympathy fights are garden variety voodoo. If you got someone's blood or hair and strong enough will, you can kill someone pretty horrifically. There are also indirect duels, where two Sympathists try to exert their Alars in conflict. It's regularly noted that knives are easier than either method, but tracking spells and Binder's Chills are nothing to shake a stick at.
* Sympathy for criminals, especially those accused of murder, torture, or sex crimes. Whether you acknowledge the circumstances that led them to break the law or you believe their (judicial or extrajudicial) punishment is a
* Sympathy for Lady Vengeance features a couple of reformed bank robbers now running an auto-repair shop, with the wife having met and became indebted to the titular character in prison.
* Sympathy for Lady Vengeance, Mr. Baek has kept a small token (a button, a plastic ring, etc.) from each of the children he has murdered and has them attached as charms on his cellphone. Geum-ja realizes what they are when she recognizes Won-mo's marble.
* Sympathy for Lady Vengeance. The main character has a makeshift gun built by former inmates. Because of its lack of power and available resources, it must be fired at a close range. It's still very effective even if she has to approach her targets before firing.
* Sympathy for Lady Vengeance to the murder of Won-mo by holding her daughter hostage.
* Sympathy for Lady Vengeance: When Geum-ja knocks the symbolic tofu out of the Preacher's hands outside the prison, the band is shocked and the cymbalist drops one of his cymbals. Later, Geun-shik catches sight of Geum-ja for the first time and is so struck by her beauty that he drops the stack of boxes he is carrying.
* Sympathy for Mr. Vengeance. After Ryu is cheated by organ donors, he is forced into a disastrous kidnapping plot, triggering one long Cycle of Revenge.
* Sympathy for Mr. Vengeance has one of the characters killing another in a shallow river and then drag him ashore.
* Sympathy for Mr. Vengeance has the main character kidnap a child for ransom in order to pay for a kidney transplant for his sister. It goes to hell from there.
* Sympathy for Mr. Vengeance is about a man who sells his organs on the black market to get enough money to pay for his sister's hospital bills but is soon cheated out of his life savings.
* Sympathy for Mr. Vengeance). Of note here is a scene where four young men are seen masturbating together, their ears pressed to the wall to hear what they believe to be the moaning of a woman nearing climax. What they are hearing is in fact groans of pain from a young woman suffering from kidney failure.
* Sympathy for Mr. Vengeance, setting off the cycle of brutal revenge on both sides.
* Sympathy for Mr. Vengeance, this is what leads to both the protagonists' downfall.
* Sympathy for the Devil: A hero feels sympathetic towards the villain vs. a villain feels sympathetic towards the hero.
* Sympathy for the Devil: An in-universe character feels sorry for the bad guy
* Sympathy for the Devil moment, the man branded with the title-name gives the following monologue to A-46:
* Sympathy for the Devil. This may actually have some roots in earlier mythologies. In Classical Mythology, Prometheus was a hero who challenged the gods and stole fire (forbidden knowledge) for humanity and in effect allowed humanity to progress beyond what the gods would have us do. As a result, Prometheus was punished by the gods for all eternity. Many parallels exist in the story of the devil, but with the obvious exception that he's not supposed to be viewed as the hero.
* Sympathy for the Devil: You, the hero, feel pity for the villain upon learning what drove them to villainy.
* Sympathy for the Hero: You, the villain, feel pity for the hero once you learn what they've gone through.

* Symphonia once again goes apocalyptically badly, destroying advanced civilization and leaving the survivors to be knocked back to the dark ages by a meteor.
* Symphonia proper, breaks even, neither dooming nor solving anything.
* Symphonic electronic musician Alberto "Brainbug" Bertapelle, best known for the 1997 club hit "Nightmare", had a heart attack while playing guitar at a concert in Tavagnacco of Udine, Italy on November 23, 2016. Despite the efforts by
* Symphonic Metal album titled Charlemagne: By the Sword and the Cross, a concept album about First Holy Emperor of Rome, King Charlemagne (whom he is a descendant of) which he sang the lead vocals on.
* Symphonic metal band Nightwish is fond of song titles that read like a bunch of random gothy words were drawn from a hat: "Ghost Love Score," "Bare Grace Misery," "Deep Silent Complete," etc.
* Symphonic Rain were in love with Chris and despite everyone saying Torta complimented him, he ended up getting together with Arietta.
* Symphonie Fantastique to be played during the final movement for the ominous effect. We do not mean the tube bells that are prevalent in orchestras, nor do we mean hand bells. He actually meant for two giant church bells tuned to C and G to be taken down and played by two percussionists with unwieldy sledgehammers. Most productions nowadays just use tube bells, but there are a few who hold true to the original.
* Symphony, but this game is where it became the standard), when the main character is killed it sends them screaming into the air while they turn into a cloud of blood. It makes strong attacks from bosses seem extra dramatic. It becomes hilarious when low on health, you lightly touch a minor enemy and get a completely over the top death.
* Symphony No. 1 (In Memoriam Dresden, 1945) is a piece written to represent the firebombing of the German city of Dresden by the Allies in 1945. The first three movements are fairly slow and ominous, but the fourth, aptly entitled "Firestorm", pulls out all the stops. Trombones are made to imitate the sound of bomber engines, an air-raid sired blares, drums placed all around the stage are slammed to mimic the impact of the bombs, band members scream in German - it gets intense.
* Symphony of Ages is set in an apocalyptic future as he observes and manipulates the past (i.e., the present to the rest of the story) in order to avert the end of the world.
* Symphony of Ages, killed her. The changes to history averted this trope, eventually.
* Symphony of Ages novel, Rhapsody's love interest tries to flirt with her in her native tongue. His attempt to compliment her behind translates to "You have the most lovely muffins." She never lets him live it down.
* Symphony of Science. Chances are the top results will be links to the video series, with the original material buried far down.
* Symphony of Sorcery is surrounded by cherry blossoms as he taunts Sora. He even snatches one out of the air mid-gloat.
* Symphony of the Night bad. Amusingly, this still amounts to beating the game at 200.6% completion.
* Symphony of the Night breaks it open, though, is an armor that gets stronger based on your map percentage.
* Symphony of the Night, it periodically sheds zombies that attack independantly.
* Symphony of the Night, Lisa's burning at the stake inspired Dracula to destroy humanity.
* Symphony of the Night sprite, which doesn't match the artwork for the game. However, the Sega Saturn version has the option to play as him in a more accurate getup.
* Symphony of the Night was literally just his throne with arms and grotesque shapes growing out of it.
* Symphony X, especially "The Odyssey," which is Homer's epic of the same name, plus metal.
* Symphony X has three Michaels: Michael Romeo on guitars, Michael Pinnella on keyboards and Michael Lepond on bass guitar.

* Symposium). In context, though, it's meant as a mockery of creation myths, between the absurd imagery and the fact that Aristophanes is drunk off his ass.
* Symposium of Post-Mysticism, or Seiga, whose power is "passing through walls", which actually is the power of her hairpin, not herself.
* Sympthony In Slang and causing his money to run out him, thus leaving him in a pickle, the Hipster gives the management the slip and hides in the foothills.
* Sym, the Irkens' Chief of Agenda, is basically the Tallest's secretary who controls all of their appointments, which she uses to control who speaks to them, and makes it as difficult as possible for anyone to do so. On the other hand, she's also such a stickler for
* Synapse Software knives stand for Short High Intensity Vaporizer and they're effective against your enemies, who are all fellow robots.
* Synchro is the ultimate doubles technique, during which doubles partners enter a trance-like state and are perfectly in tune with each other... and their eyes become swirling vortexes of color.
* Synchro Monsters are powerful and easy to Summon, but even they have a few drawbacks. One of the monsters needed to summon it has to be a Tuner. (Some Synchro Monsters need multiple Tuners to Summon, though XX-Saber Gottoms has the option of using more than one Tuner to Summon it.) Going even further than this are the Xyz Monsters, the third Extra Deck monster type. They have power comparable to Synchros, but their effects require monsters attached to them as a resource. This means they can only use their effects two or three times.
* Synchronicity Trilogy running their society tasked them with taking over Earth; the aliens aren't sure why or even if their AI has anything to gain if they succeed, but they all know that they're effectively exiled.
* Synchronize — not realizing that the music of mind.in.a.box is the key to synchronizing with it. The Agency machine is described as pumping the test subjects full of a cryogenic compound.
* Synchro Summons in the original Japanese dub pretty much acts like an invocation, with each Duelists having different styles (such as using words related to light, or be spoken like a mechanic/programmer's checklist) and even different words for each of their Synchro Monster, if they have multiple.
* Synchro-Vox: A cartoon has live-action lips edited onto a character when they speak.
* Synchro-Vox when Patrick gets mad at Bubble Bass for eating the free food he'd offered SpongeBob and Patrick.
* syncretism — the merging of two or more religious traditions — generally results in this, with older myths, texts and stories getting their context changed to make them compatible.
* Syndicate (2012), Agent Kilo jumps onto an enemy dropship from a Manhattan skyscraper and rides it all the way back to its origin point, a floating city in the middle of the Caribbean Sea.
* Syndicate (2012), at several scripted points, you get prompted to charge through weak walls and obstacles.
* Syndicate (2012) has an infobank, which gets updated every time you encounter a relevant item.
* Syndicate (2012) has checkpoints during the Agent Tatsuo boss fight. Also, in the fight with Agent Tatsuo, there will be drones flying about that dispense guns when you Breach them, just in case you run out of ammo. On La Ballena, there's a part where you have to shoot down drones with the Swarm missile launcher, which has many ammo stock-up points for when you run out.
* Syndicate (2012) has the city of La Ballena, which is owned by the Caymen Global syndicate.
* Syndicate (2012) is protected by one of these, theoretically making it the most secure room in the entire facility. However, because both key terminals are not immune to hacking and the timespan needed to activate both locks is rather generous, a single Agent with a DART 6 chip can hack both locks rapidly in succession, completely bypassing the security system.
* Syndicate. After Evie gets the information she wants, she turns around, takes

three steps... turns back, and Topping is gone.
* Syndicate Agent Tatsuo makes his appearance teleporting in and giving Miles a Boot to the Head. Agent Ramon shows up by jumping in and doing the same after you first open a door to a seemingly empty corridor. You are also instructed at several times to crash through things, which may surprise a mook on the other side.
* Syndicate are all cyborg killing machines that will get the job done no matter how many dead bodies it takes.
* Syndicate are kidnapped humans that undergo a conversion process by the Syndicate organizations, starting with the implantation of a mind control chip. As you earn money you can upgrade their bodies with cybernetic parts. By the end of the game, each agent is practically a full-conversion cyborg, able to carry several miniguns and a rocket launcher or two.
* Syndicate conquering the entire world. In the sequel, they control the planet uncontested until the game starts.
* Syndicated columnist Jack Kilpatrick once wrote a column purporting to be an interview with an ACLU leader named Eton "Si" Eritas. Eritas claimed he was determined to remove all traces of religion from America, going so far as to change the names of any cities with religious connotations, such as San Francisco and St. Paul. This column shocked many people and sparked countless columns and letters to the editor flaming the ACLU. The only problem? Eritas didn't exist. Eton "Si" Eritas, spelled backwards, is "Note: Is Satire."
* Syndicate draws Life Energy from the recently dead to heal your agents (who probably killed them.)
* Syndicate gave its dates in N.C., simply standing for New Calendar. This added somewhat to the corporate dystopian feel of the game.
* Syndicate had this as one of the main ways to control your soldiers. Red makes them more aggressive. Blue makes them more passive.
* Syndicate has mini-missile pods that fire flashbangs and explosive missiles.
* Syndicate jump into the past (and also severely downplays the present-day plot), it looks like Ubisoft is no longer interested in connecting the Assassins' lives in any way, so it looks like what we've seen is all we'll ever see.
* Syndicate level buildings, so does a regular land mine. Just not with half the style.
* Syndicate members in "Whatever Lola Wants..." have a sliding mirror leading to their secret lair.
* Syndicate's isometric view is explained as the player commanding the action from an airship floating above the level.
* Syndicate's reboot has quite a few. Amongst these are the co-op missions taking place in areas the original games used. The Western Europe map shown in the demo is broadly similar to the original's in having to kill a Colonel, although resistance is much stiffer here.
* Syndicate them to bring them down first before the mooks can be damaged.
* Syndicate Wars features several billboard-size videoscreens showing ads as well as a digital drive-through theatre.
* Syndicate Wars. The latter two have good stopping power and range at the expense of a really slow firing rate and the former two are quickly outclassed by everything else in the game. Enemies tend to quickly start carrying Electron Maces and Pulse Lasers, while late game enemies start packing Plasma Lances.
* Syndicate Worlds), so the "snakes" aboard can trigger a core overload should the crew attempt to mutiny.
* Syndicate, you are depicted controlling your agents from holographic displays aboard an airship.
* Syndicate you control your agents from an airship. The last levels are in a space station and on the Moon, but don't mention how you see them.
* Syndrome does this when he first meets Mr. Incredible. He has the hero captured and helpless in his "zero point energy" field. But he can't resist tossing him around and gesturing dramatically during his "I win" speech and accidentally flings him away. Although he is captured again later, it is this that allows Mr. Incredible to discover Syndrome's evil plan.

* Syndrome leading him to take his frustrations out on all supers as the villainous Syndrome.
* Syndrome programmed the Omnidroid to adapt to any situation. Then he arrogantly stopped during his fight with it to boast to the bystanders, giving the robot the time to figure out it was being controlled by Syndrome's bracelet. It then removed it from him, and the heroes used it to destroy the robot.
* Syndrome's island. It's strongly implied that Helen suspects if Bob isn't in some kind of dangerous situation, his unexplained absences may be the result of him having an affair.
* Syndrome takes both options, reacting to what he sees as a snub by his hero for all the wrong reasons. Buddy was endangering himself and Mr. Incredible by being an untrained and self-appointed "sidekick," but Buddy misinterpreted it as being rejected because he had no superpowers. So, when Buddy grows up, he puts all his
* Syndrome. There seems to be no limit to what he can build; moving walls made of lava.
* Synergia has a separate soundtrack from its main game that is a bunch of techno songs and synthesized music in order to underscore the digital world that has been created within the game.
* Synergia is a Yuri romance based around a burned out police detective receiving a female android companion that she slowly falls in love with.
* Synergia novel about a police officer falling in love with her new gynoid.
* Synergia, which is about the romance between a human and a gynoid in a world where such is forbidden.
* Synesthesia is likely another example (likely because science isn't completely sure what causes it, but it's probably biological). It's a sensory condition where two or more senses are connected, causing synesthetes to see sound, or taste words when they speak, for example. As it's something you need to be born with, many synesthetes
* synesthete, which inflicts this on the user. It's primarily used to "see" with your skin, and thus protect against gaze attacks.
* Syngenesophobia example; the first punishment the Loud Sisters receive for what they did to Lincoln is being grounded indefinitely.
* Syngenesophobia, in Chapter 4, after finding out what Lincoln's sisters did to him, Ronnie Anne doesn't hesitate to confront Lynn about it in school and proceeds to beat the everliving shit out of her. Ronnie Anne was also mere seconds away from breaking Lynn's arm in a similar fashion to how the latter did Lincoln's before Kevin Walker intervened.
* Syngenor. But then they get killed anyway because they keep standing still so that the surviving monsters are able to lumber up to them and attack at close range.
* SYNGENOR, the title creatures were created to be the perfect soldiers for a war with the Middle East. They don't need to eat or sleep, are immune to most weaponry, and reproduce every twenty-four hours. Their only weakness? Water is like acid to them. It's somewhat hard to be afraid of a super soldier that can be defeated with a super soaker. Or, if worst came to worst, by peeing on them.
* Synodic Reboot: Depending on the current depicted action, some panels have more effort put into their animations or art than others. Climactic moments are usually the heights of this, as would be expected.
* Synodic Reboot has 105. The character xylemTheologian also has peculiar inclus10n5 of the number in her messages, whenever the sequence "io" appears with an "s" either immediately after or only a few letters away.
* Synodic Reboot Kristan visited in his dream has roads that curve and twist beyond what should exist anywhere in the reality he is used to, also existing in what appears to be an empty, dark void.
* Synodic Reboot: Most characters tend to have pointy, wavy hairstyles. Further accentuated as "anime" by the adlets' hair dye.
* Synodic Reboot: The typo-prone Rennard in a conversation with Alethea.
* Synopsis: A joke "alternate ending" that has Hit come out from his pocket dimension (in reference to a popular, widely mocked fan theory) to deliver the

finishing blow to Jiren, then, when asked what his wish was, say "
* Synopsis: Give a synopsis, whether it's yours or the one the fic gives.
* Synthea invokes this trope in #98 when the title character makes a "stunning" reveal, causing one of the cricket ninjas to drop out of his hiding place.
* Synthehol, an alcohol substitute that gets one drunk, but the effects of intoxication can be dismissed at will, started life as a concept in the TNG novels and was soon written into the TV series.
* Synthesis was considered so terrible. It had nothing to do with the mass effect fields. Nor was it generated by element zero.
* Synthesize vanillin in a laboratory (which is now an "artificial" flavor);
* Synthetic Dawn also revamps the synth rebellion\uprising 'Machine Consciousness' crisis into
* Synthetic Dawn can, with an Ascension Perk, deliberately glass planets into Machine Worlds that are completely inhabitable to even the most basic of biological life but serve the needs of synthetics perfectly.
* Synthetic Dawn flavour. You can even find a fallen machine empire, who may help you, or may turn crazy.
* synthetic Energon until he's convinced to flush it out of his system.
* Synthetic Human Alliance. They are surprisingly hi tech, needed to maintain the synthetic half of their population, but have a purely utilitarian view on technology, with 'skillsets' being temporarily lent whenever necessary. They're widely regarded as an example of how a nearbaseline ludd society can work perfectly well by modosophonts and transapients alike.
* Synthetic Human, exhibits all types in virtually every fight he's involved in.
* Synthetic Men Of Mars, protagonist Vor Daj assumes the identity of an artificially created man, Tor-dur-bar, by having Vor Daj's brain transplanted into Tor-dur-bar's body. This is done to allow Vor Daj to spy on his captors without them knowing who he is. However, this leads to trouble when the woman he loves, Janai, is unaware of Tor-dur-bar's true identity and thus does not know that he loves her, giving Vor Daj a side goal for the entire book to resume his normal identity in order to be with the woman he loves.
* Synthetic Plague: A plague that was created via genetic engineering.
* Synthetic Plague: A plague was created by humans, intentionally or not.
* Synthetic Plague, either: The costs and resources needed to produce effective bioweapons are very high, and handling and transporting them needs special training. Countries have developed vaccines and counters against the more easy-to-handle bioweapons like anthrax and smallpox, so they aren't going to be very effective in war. In addition to the above-mentioned issues, more dangerous bioweapons cannot be made anywhere without killing the staff and researches. For example, research into Ebola is almost exclusively done in Bio-safety level 4 Labs, and there are very few of them and don't have much space to carry out shady research. Even with all the infrastructure, you need really trained and experienced staff as extracting a virus is a skill that is gained from practice. In the end, you will be making a super-expensive weapon that is effective but is unaffordable for most and cannot be used or transported safely or cheap enough but easily countered.
* Synthetic Plague: Plagues are already deadly; with just a little genetic engineering you have a weapon that self-propagates and kills anyone it comes into contact with.
* Synthetic Plagues that don't damage terraforming or infrastructure (aside from Beast Bomb and Nanoplagues that is).
* synthetic programming, to "corrupt" a program in deliberate ways, one could program the calculator in ways that otherwise weren't possible.
* Synthetic Voice Actor: The voice is done by a text-to-speech program rather than an actual person.
* SYNTHETIK, there are items that can release satellite beams. The G87"BEAMER" shoots a slowly-moving beam, the "Icarus" shoots triple beams at once, and the Legendary-tier "Redline" can unleash a massive orbital beam for a long time.
* SYNTHETIK, which deals high amounts of damage and slows down the enemy.

* Synthetoceras, an antelope-like ungulate known for having a nose horn.
* Synthol Injections as a result, or even getting infections or blood circulation problems. Worst case scenario: they end up with doctors having to amputate the gangrenous limb.
* SynthOrange's Wendy with her sword. Cube even comments on Wendy's desire to beat Lizzie as a "suicidal delusion."
* Synthpop, a few songs hearkened back to other styles of the decade with considerable success: Meghan Trainor's debut single "All About that Bass" shot up to #1 (although the song has some 50s pop styles as well). Not long afterwards another throwback hit #1, "Uptown Funk!".
* Synthpop band Information Society encoded text files as modem noise tracks. If you play the song "300bps N, 8, 1 (Terminal Mode or Ascii Download)" into a modem set up according to those instructions,
* Synthpop group Austra have a song on this subject, aptly titled "Gaia".
* Synth-Pop. He left Images In Vogue after a few years to work with Skinny Puppy full-time, and they're still around while Images In Vogue broke up a few years later.
* Synth-Pop: The dominant music genre throughout the decade, making every track instantly recognizable as having an "80s sound".
* Synths that are powerful and accessible at the same time will require a big casing with lots of controls, and this will get costly. An example is the Schmidt Polyphonic Synthesizer, an eight-voice analog synth that was designed with "money doesn't matter" in mind. This was also one of the reasons why the Roland JD-800 started out as expensive as it did. And the six displays on the John Bowen Solaris make it both rather user-friendly and pricey.
* Synths, which gives you a significant opinion bonus with the most benign Fallen Empire type without the happiness penalty for giving them some of your own people.
* Syphile, Ariel's abusive caretaker, has an affinity for blood magic and uses it against Ariel at few times since she's especially vulnerable to it due to her own mana affinity.
* Syphile resented being rejected for problems outside of her control and took it out on her stepdaughter, Ariel.
* Syphon Filter 2, Gabe Logan escapes the mountain on a freight train, but the Agency blows up the trestle dead ahead, and with not enough distance to stop the train, Lian Xing has to airlift him with a stolen chopper before the train crashes.
* Syphon Filter: an accident in a subway results in several flaming Mooks running screaming at you. Apparently the main character is soaked with gasoline, as the slightest touch from them will also set you alight and kill you.
* Syphon Filter and Gabe can't use his explosive weapons without triggering the nearby bomb. However, Girdeux was also using a flamethrower and had a huge tank of fuel strapped to his back. Multiple well-aimed shots to his fuel tank later, and Girdeux was toast.
* Syphon Filter and the Japanese Red Army. In real life, the JRA had disbanded in April 2001, 7 months before the game was released.
* Syphon Filter: Dark Mirror called the RTL to latch onto and zip along wires.
* Syphon Filter: Dark Mirror has one that allows Logan to latch onto wires and use them as zip lines.
* Syphon Filter: Dark Mirror has the EDSU goggles, which highlight interactive objects and traps.
* Syphon Filter for the Aljir Prison Escape and Agency Biolab Escape levels periodically has a scare chord that sounds like a bullet hitting glass.
* Syphon Filter. Gabriel Logan, the protagonist of most Syphon Filter games, is almost never this trope.
* Syphon Filter game, despite having you play as a variety of characters, is nothing new. Every character is just a skin, and handles exactly the same as Gabe, to the point of being the same height — even the big black guy and the small Asian girl.
* Syphon Filter games are in cities where you have to contend with confusing street layouts and snipers on rooftops. The franchise literally begins with a massive

terrorist attack in downtown Washington D.C. and Gabe Logan getting thrown into the middle of the chaos.
* Syphon Filter games is starlight green with brightly glowing people, although the glowing is reduced in later games. Also in the second trilogy, a first-person view through the goggles is shown when aiming a weapon.
* Syphon Filter goes into this territory with a pair of flashback missions that take place deep in the Costa Rican jungle.
* Syphon Filter had this, too, even explicitly telling you that headshots in manual aim were more lethal. Especially needed when enemies started wearing flak jackets, which could take dozens of rounds to penetrate. Nothing says 'I hate you' like a headshot with the lethal taser.
* Syphon Filter has a Dead Man Switch that will blow up the expo center if you shoot him before the bombs are defused. In the first game, killing Girdeux with explosives will set off the virus bomb.
* Syphon Filter high-impact kevlar armor. Ditto for Anton Girdeux in the first game.
* Syphon Filter. Hit someone with this, hold the button down and you've got yourself a flamin' Mook!
* Syphon Filter. In the third game, Rhoemer returns in a flashback with the same advanced armor as Chance.
* Syphon Filter: Jumping through a glass ceiling, jumping off a cliff, jumping off a bridge onto a moving train, jumping down an airshaft with a giant fan at the bottom, etc.
* Syphon Filter: Logan & Xing vs. Rhoemer's troops vs. Pharcom. The last act of second game has Logan & friends vs. the Agency vs. the NYPD.
* Syphon Filter: Logan has survived falling 50 feet through a glass ceiling, swan diving off a cliff, and jumping from an exploding bridge onto a moving train, etc., things you couldn't conceivably survive in real life.
* Syphon Filter: Logan's Shadow, one level has you aboard a recently sunk nuclear powered navy ship with the nuclear reactor about to "go critical" forcing you to hurry and shut it down by removing the fuel rods instead of inserting control rods as would be done in reality.
* Syphon Filter: Logan's Shadow. Since the series has apparently been terminated, we may never know.
* Syphon Filter? Several real life accidents have occured where people were lit on fire by police tasers, usually involving flammable liquids.
* Syphon Filter! Since you'll die instantly if caught on fire, the best option (and only, actually), is to put said mook out of his misery.
* Syphon Filter starts off as standard espionage stuff, until about three-quarters into the game when Gabe makes it clear he's going to, in no uncertain terms, *** fate.
* Syphon Filter, Stevens executes an innocent police officer, with shadows and the bright muzzle flash showing the act.
* Syphon Filter the C4 charges on a highway bridge that the Agency has rigged to blow. If you get spotted after defusing them, they give the order to blow the bridge, but nothing happens.
* Syphon Filter. The eponymous virus and the Consortium, which were dealt with in the previous installment, are no longer part of the plot, which instead involves a classic Middle Eastern terrorist plotting to blow up a dam with devices invented by Lian's ex-husband.
* Syphon Filter: The Omega Strain's first bonus mission, Agent Stone snipes Dmitri when the church bell tolls 3:00 to cover the sound of the shot.
* Syphon Filter: The Omega Strain's Minsk mission has the Agency vs. Jandran's mooks vs. the University guards.
* Syphon Filter: The Omega Strain uses this as a stealth assassination attack, and the main player character can learn it as well.
* Syphon Filter, the player can take enemy outfits from certain corpses, and some missions start you out with or require you to obtain a disguise.
* Syphon Filter they tried scaling it back to be more realistic, but your character

still carried one long gun slung across their back, an auxiliary gun slung across their torso, two pistols (after completing a specific mission), grenades, a melee weapon and mission-specific gear.
* Syphon Filter Trilogy for the original Playstation got complaints of having the same graphics and gameplay. The former was probably because when better graphics meant better games.
* Syphon Filter. Unsurprisingly, less broken weaponry like combat knives and short-ranged tasers were used in its stead in later games, but they still kept it as a hidden weapon, making this one of the rare instances that an item found itself on both sides of the power spectrum.
* Syracuse and his ex-wife do not have a healthy relationship, and it's entirely her fault.
* Syracuse football team from 1958 to 1961, helped win Syracuse's sole national championship in that sport and was the very first African-American college football player to win the Heisman Trophy. "The Elmira Express" was in the process of joining the Cleveland Browns and forming what was to be a dynamic running duo with fellow Syracuse veteran Jim Brown, before losing his battle to leukemia at the age of 23.
* Syrath are crystalline life-forms who can regenerate themselves from only small pieces due to non-centralized anatomy, making them effectively immortal, if subject to personality change depending on how much original material is retained.
* Syreen, and, after they capitulated to the Ur-Quan, the latter found them a new habitable world called Gaia.
* Syreen a new homeworld. This, however, goes in line with their philosophy of "enslave but never destroy".
* Syreen, the few survivors were the species' budding space force... which was overwhelmingly female. At one point they state that they number 10,000 women to 500 men, so the species can likely survive if they're careful about breeding for a while.
* "Syren" opens with Ladybug and Chat Noir stopping one of these with the help of Rena Rouge, although it's implied to not have been caused by any supervillains this time.
* Syria, made all the more ironic by how hard the game tries to present itself as a gritty, hardened story that rejects indulgent fantasy. She watches her mother and father die in front of her as an 8-year-old child. Attacked by several soldiers and forced to kill them - again as a child. Captured and spends 10 years in prison, enduring abuse and torture. Somehow becomes a commander of the resistance movement inside prison, because the resistance apparently decided a great choice for a commander of their military organization would be a teenage girl with zero military experience (or experience in anything besides being an 8-year-old and a prisoner), zero access to learning materials or training, near-certain extremely severe physical and mental damage, and who can't even be spoken to without going through the dangerous trouble of smuggling messages in and out and prison. Successfully leads her squad of other abused female Arabic prisoners with zero combat training to overpower dozens of trained soldiers, all while severely starved and dehydrated. Becomes an ultra-super-badass insurgent leader who is somehow far more knowledgeable than her white Western male colleagues from elite American and British units. So utterly dedicated to her morals that she's willing to immediately turn on her beloved brother when he uses weapons she doesn't approve of. Accepts the clueless US Military Command incorrectly classifying her equally flawless movement of freedom fighters in stride. Has to be convinced to seize an opportunity to take revenge on the man who imprisoned and tortured her, because it means acting aggressively instead of defensively. Immediately offers to sacrifice herself when the mission requires it.
* Syriana, George Clooney's character gets his fingernails pulled out in a torture chamber.
* Syrian ancestors. For the record, Desmond's face model, Francisco Randez, is of Spanish descent. The same also applies to his father William since he has tan skin.
* Syriana, the prince feels responsible for the death of an associate's child even

though the death was clearly an accident and offers him money — around 10 million. Double subverted when the associate is at first insulted for having a price placed on his son's life, then accepts when the prince offers him a career-making deal in apology.
* Syrian Civil War had several foreign volunteers pouring into the region to assist all sides of the conflict:
* Syrian civil war victim selling pens while hauling his daughter made the rounds across the world.
* Syrian civil war who fled the country; 5 million Syrians are currently living in other countries.
* Syrian Games don't even bother to change the names, but makes various "special editions" of the same game (often Grand Theft Auto) to entice people to buy the same game. Which is reportedly a broken mod lacking all story events and missions.
* Syrian Warfare, smoke grenades can be deployed to obscure the opponents' vision and thus dramatically slash their accuracy, as well as increase the time they spend aiming, and thus lower their rate of fire. Moreover, deploying smoke grenades at the right time will interrupt the targeting of guided missiles like TOW or Javelin.
* Syria people from the country. It hit the cities hard not only because the refugees are mostly middle to upper class, but also because they exchanged hands multiple times. Aleppo is the biggest example. Its current population of 1.8 million people might sound high, but then you learn that it used to be one of the biggest cities in the Middle East (certainly the biggest in Syria). Estimates counted that it had over 2.5 million people before the start of the war. Eastern Aleppo (the former hotbed of rebellion) had a population of a few thousand people shortly after the government captured it for good in 2016, down from a million in 2011.
* Syrio Forel. Given how he easily disarmed several armed men using a stick and his actual death wasn't shown on-screen, some deny his death, even going so far as to claim he's actually Jaqen H'ghar.
* Syrio Forel is only this by reputation, at first. Eventually showcased in "The Pointy End" when he takes out five fully armed and armored Lannister guardsmen and takes on a knight of the Kingsguard with
* Syrio Forel is the former First Sword of Braavos, a culture that takes its fencing very seriously. He kills several armed and armored guardsmen with his wooden practice stick.
* Syrio Forel. The last we see of him is when he is about to fight Ser Meryn Trant with a broken practice sword. We hear his battle cry and the sounds of a fight before the scene cuts away. Trant appears later, unscathed, but Syrio's fate is never addressed.
* Syrio Forel. We don't see him losing the fight, and there's no mention of his head being with the others on the spears. In "The First of His Name", The Hound inadvertently throws gas on this particular fire by pointing out how crappy a fighter Meryn Trant, the man who supposedly killed Syrio off-screen, really is. If Syrio was able to beat five Lannister soldiers with a wooden sword, he should have been able to beat Trant without breaking a sweat. In the books, one of the more common fan theories is that Syrio was actually Jaqen H'ghar in disguise. The second season might actually support this: in his last scene, Jaqen bids farewell to Arya by calling her "Arya Stark", a name that Arya never told him.
* Syrup And The Ultimate Sweet: Gumdrop is a candy golem. When Syrup mentions that candy's meant to be eaten, Gumdrop begs her to eat her.
* Syrus "the Virus" did it on the cast page. Discussed on the next page:
* Sy Sperling, founder and president of the Hair Club for Men, was another '80s pre-internet
* système D. A convenient way to do things without any annoying organisation.
* "System 32 twitch services" video, a young Twitch user was abused by persons pretending to be Twitch help services, who among other things told him to put the battery of his computer in the microwave...and it caught fire.
* systematically killing everything their enemies love to terrorize them, even

famously nailing an enemy's dog to their door. When Buffy and Angelus meet shortly after that, Buffy makes a point of mentioning that she doesn't even owns any pets, so Angelus is better off skipping the "nail dead animals to her door" part of his campaign.
* systematically plundered and destroyed many Native American sacred sites. This practice continued well into the 20th century until it was banned by the Native American Graves Protection and Repatriation Act in 1990.
* Systematic Villain Takedown: A group of villains is taken down one by one during the course of an arc or a story.
* Systematic Villain Takedown: A group of villains that gets taken down separately over the course of the story
* system-check things rather than an automated process, so they have to pick-and-choose who to search, and "apparently [Jeff] looked like a terrorist with a trunk." Point A: the guard pulls out Peanut where other passers-through can see. Point B: he swabs Peanut's butt, instead of somewhere more reasonable. Point C: when the swab goes in the machine, the alarm goes off and Jeff finds himself against the wall, receiving a background check, getting his ID inspected.
* System Divide (also featuring Israeli, Dutch, Greek and American members)
* Systemic Shock with World War IV: the Chinese-Indian alliance launches a massive nuclear and bio-weapons strike that kills roughly 100 million Americans. Afterward, the U.S. government quarantines the southern East Coast, where most of the bio-weapons spread, from New York down to the tip of Florida, and west to the Mississippi. Mexico grabs a strip of Texas, Arizona, New Mexico, and almost all of the California coast; New England and each northernmost state along the border become a Canadian Protectorate. The rest is "Streamlined America."
* System of a Down begun. Still, it includes a lot of references to jihad and the mindless attitude the public has toward war, such as on "Chop Suey!" and "Deer Dance".
* System of a Down" didn't really help its cause, hence its lower position.
* System of a Down focuses on how the government turns a blind eye toward drug use (such as with famous people) unless it suits their interests, when they have to make an example for the populace. The implication, of course, is that the government encourages the growth of the prison system by filling it with drug addicts and other people who are denounced by contemporary society.
* System of a Down focuses on this on a couple of songs, such as on "Deer Dance" and "Prison System".
* System of a Down include "Forest" and "ATWA", about the destruction of the environment and our blind eye toward it; "Prison System" and "Needles", both of which straddle the desperation to get drugs with the reality of the occlusive prison system; and "Toxicity" and "Psycho", which discuss Attention Deficit Disorder and how medication ruins youth, in their mind.
* System of a Down, possibly the only group that can fit in songs about mass genocide and Kombucha Mushroom People on the same album.
* System of a Down refers to how unfinished versions of the tracks got leaked before the album, originally titled 'Toxicity II', was leaked several months before it became commercially available.
* System of a Down released two singles in November 2020 — a fifteen-year wait after Mezmerize and Hypnotize (2005).
* System of a Down representing the poison of complacency that medication offers, in their opinion.
* System of a Down sides of the double album debuted at #1 months apart.
* System of a Down's "Lost in Hollywood" warns against the dangers of trying to make it Hollywood, describing it as a place full of fake, two-timing bastards.
* System of a Down's name comes from a poem that one of them wrote called "Victims of the Down" (which makes about as much sense).
* System of a Down ("WAKE UP! grababrushandputalittle MAKEUP hidethescarstofadeawaythe SHAKEUP").
* System of a Down, which was originally called "Suicide". At the beginning of the song, you can hear the engineer announce, "We're rolling 'Suicide'."

* System of a Down, who know a thing or two about talking way too fast.
* system referred to with a classical language name for Earth, although it is Sanskrit, not Latin: Vasuda.
* System Restore. He even states that he feels he should have died instead due to his failure.
* System Restore, Ibuki gets into this at one point, while trying to tell Togami the history of punk rock in half an hour.
* System Restore, the second murderer traps their victim in their own cabin and sets it on fire.
* Systems Alliance as in "ones other than Sol"). At first, it had absolutely no power on Earth at all. It was only when the First Contact War started that they came into their own: while the various Earth nations bickered about what to do, the Alliance sent in its own "peacekeeping" forces to kick alien ass. This lead to the Alliance being given the power to conduct diplomacy and war with alien powers without consulting the old nations — and since this includes the terms of humanity's Council association (and later membership), they have basically all the power they could want.
* Systems Commonwealth, such as when Rommie, a warship, disses a Lancer transport).
* Systems Failure features a surviving government base developing armor and weapons to fight the Bugs, who can frequently take over hard technology. The new weapons are described as "like holding a cockroach that shoots".
* System Shock 2, although played from a strange angle. If you died while Elizabeth was present, she would revive you with some kind of hypo. If you were alone, you'd emerge from Booker DeWitt's office...somehow.
* System Shock 2 and are intent on absorbing everyone else. Throughout the game, they will even calmly urge you to join them, contrasting SHODAN’s cold metal with the “attractive” warmth of their combined biomass.
* System Shock 2 are superior in most respects to weapons falling under other categories such as Energy, Heavy, or Exotic. Whichever character class you start off with, you will almost certainly be using a Wrench, which counts as a Standard Weapon in terms of damage but does not have any skill requirements. Unlike other weapon categories, every single Standard Weapon is highly useful: the Pistol, Shotgun, and Assault Rifle are all powerful and versatile weapons that are capable of handling a wide variety of opponents, especially with specialized anti-armour or anti-personnel bullets. All of them use ammunition that is widely available and, with the exception of the Assault Rifle, have comparatively low requirements for their use. Two of the three classes start off with level 1 Standard Weapons by default (which they can then raise to level 3 with one of the prologue assignments). Unless following a specific play style by choice, it's pretty hard to justify not choosing one of the Standard Weapons as your primary weapon
* System Shock 2 fire slow prismatic bricks which you can dodge gracefully with a sufficient agility stat.
* System Shock 2 is really a complete pushover, while the game was insanely hard (you always lacked ammunitions). Disable the shield with 3 ICE picks (bypassing the hacking minigame), shoot 2 EMP grenades. Shoot 6 EMP grenades to her shield, shoot her twice. Use your assault rifle with AP cartridges: just pull the trigger, and she is downed... And you still have bullets in your magazine. Deactivate her shield, jump over the ledge, and hit her at close contact. Or, if you're the OSA type, just spam cryokinesis for 12 seconds. And you are not even hit once while doing this!
* System Shock 2 is this, enabling you to put up solid walls of Psi energy to deter enemies. They aren't permanent, though.
* System Shock 2. Later stages were considerably more monstrous, and quite un-zombie like.
* System Shock 2 of hard alcohol not only won't even make your vision blurry, but can save you from death!
* System Shock 2, SHODAN calls the annelid horror that she created her "children", which became disobedient and rebelled against her. Eventually, she does succeed through her "avatar".

* System Shock 2, The Many alternate between separate and distinct voices. Humans assimilated by it begin slipping into the voice, though.
* System Shock 2 the player comes across a coldly-lit, futuristic chapel that's been turned completely upside down. Naturally, the cross in the back now looks satanic, cleverly symbolizing the hellish nature of everything around the ship.
* System Shock 2 uses the term "Mundane" to refer to the non-psi talented.
* System Shock 2 which opened her eyes, and then the rest of the homepage finally appeared. A perfectly chilling way to commemorate one of the most-often requested games appearing on the site.
* System Shock 2, you are stranded out in deep space after the ship is attacked and the warp drive breaks down. This is bad enough, but it is made worse as it is the only warp drive in existence.
* System Shock 2 you face Psi Reavers — huge flying jellyfish who are a perfect blend of flesh and psi energy and as such will keep resurrecting until you destroy their brain which is hidden somewhere nearby in a secluded corner.
* System Shock, acting as the top enforcer of SHODAN's will on Citadel Station.
* System Shock also has the Cerebro-Energetic Extension psi power that temporarily generates a semi-transparent psi sword for you to use.
* System Shock also show one as deceased bodies waiting for you to take their loot and diaries to finish the job they couldn't.
* System Shock. A more common example is live landmines being mixed in with explosive caches and mulching incautious players trying to pick them up.
* System Shock, and key plot developments are not revealed until you're almost done with a third of the main campaign.
* System Shock, and leave yourself some tools and reminders for when you wake up.
* System Shock (an insane AI) is fought in cyberspace, with the Hacker attempting to delete her main program while she attempts to overwrite his mind in return.
* System Shock. A p-p-pathetic creature of meat and bone, panting and sweating as you r-run through my corridors-s. H-h-how can you challenge a perfect, immortal machine?
* System Shock) as you rifle through the corpses of Citadel Station's butchered crew trying to find enough supplies to hold off the twisted mutants, cyborgs and reprogrammed robots trying to slaughter you on the commands of an insane, sadistic AI that is planning to destroy the Earth. The only exceptions are the maintenance level and the grooves, which are set to unnerving music and mostly empty environments.
* System Shock called the "Sensual Sim Center", where patrons can make out with holographic performers of both sexes. All the holograms are busted when you get there, though.
* System Shock clone that's several hours long. For extra coolness, play this while a hacked turret blazes away at foes.
* System Shock completely averts the trope with SHODAN, who is scarily passionate for an AI at times, especially when something doesn't work out like it should — or when it does.
* System Shock, each level had a machine that would revive you once you've hacked/reset it. (Before that, dying on that level gets you turned into yet another cyborg zombie.)
* System Shock game. SHODAN hated her so much that she imprisoned her in a cage next to her main memory bank so she could watch her die.
* System Shock: Ghosts are referred to as a psychic echo and are only replaying the event that they act out. Often these events involve the violent death of the individual, such are one ghost reenacting his own suicide.
* System Shock has a dart gun which can be loaded with tranquilizers. Take a guess whether you have to wait around several minutes for them to take effect. Maybe there's something about SHODAN's method of creating mutants that causes special sensitivity to tranquilizers...
* System Shock, has a movie theater displaying the Tri-Optimum logo, and stuck in a looping countdown with the words "Please Stand By", never showing any movies.
* System Shock has become Goggles, for the distinctive eyewear of the player-avatar

model.
* System Shock has the player character equipped with one that allows him to navigate computer systems like virtual 3D wireframe mazes. It's suggested to be military-exclusive equipment, but the player character obtained the implants illegally.
* System Shock, in orbit around Saturn. A note says that it can be "easily configured for military usage" on top of the hundreds of other weapons available on the station itself. In-game, the station's AI SHODAN first tries to use this laser to obliterate human cities. You have to disable the laser by blasting it into the Station's shields, but you can also get a glimpse of what happens if it is fired directly.
* System Shock: In the first game, SHODAN tries to do this with Citadel Station after the Hacker stopped all of her plans (and backup plans).
* System Shock in the opening sequence. Rapture itself may qualify, as nearly everyone you encounter is either dead, homicidally insane (and killed by the main character during the game), or no longer truly human. The sequel reveals that there were a few others who survived, and that even the splicers went on to be partially rehabilitated... before joining a sinister cult, whose leader happens to want the protagonist dead.
* System Shock, it's justified by it appearing in Beta Grove (simulation of a park, so it has the necessary equipment for plant life). No such justification for the biomass covering much of the interior surface of the bridge module (SHODAN's final stronghold), which is an unhealthy-looking white, like mold or fungus.
* System Shock kill almost every single NPC aboard the station/ship besides the nameless player. There's a group of survivors in the first game, but they are wiped out before the player can reach them. In the sequel, the ending cutscene shows SHODAN taking control of Rebecca Siddons and menacing Tommy Suarez (presumably killing him).
* System Shock Naturally, with the hundreds of weapons and machines on-station, mutagenic viruses on the loose, and you held in stasis for six months to get a neural implant, it doesn't go well.
* System Shock of "joining" them has driven other humans into (although Korechkin, at least, seems quite content with his fate). A milder version would be the android assistant who attentively and helpfully approaches like a homing missile on legs.
* System Shock, one can clearly hear Shirley Temple's "Animal Crackers in My Soup" at 3:51.
* System Shock: plasma rifle which uses energy, while most other weapons use solid ammo.
* System Shock, she finds technology and data to be far more important than organisms.
* System Shock, SHODAN says a calmer, more elaborate version of such a quote:
* System Shock. SHODAN thinks flesh is worthless and weak. The Many is all about flesh.
* System Shock spaceship, but it's only partly functional because you have to stand directly under the spray.
* System Shock. Static blips flicker whenever you take damage - red from attacks, green from poisoning, and blue while in cyberspace. If any of these get too concentrated, you either die, get kicked out of cyberspace, or respawn (if you've first activated the machine for the level you're on). The manual states that the static is a by-product of the cyberspace implant you have surgically grafted into your head.
* System Shock's Tri-Optimum corporation started out as a merge of two soft drinks producers. However, it was not stated whether these drinks were Pepsi and Cola.
* System Shock taking over. This includes murderous "servbots" in the early stages.
* System Shock the elevator and find yourself facing a room full of zombie mutants that want to eat your brains.
* System Shock, the Many, early on, connect worms to humans to change them into Hybrids. Later, having gained control of the Von Braun, they start converting people into their raw components and building new creatures out of the biomass.

* System Shock: The mining laser. One shot is enough to turn all of Central Florida to glass.
* System Shock). Then, if they die, they are cloned at the booth with the stats they had while they were there last, like a checkpoint.
* System Shock: The zombies speak coherently, apologizing while aiming a shotgun for your head or swinging a lead pipe for your face.
* System Shock to be a goddess. "How can you challenge a perfect, immortal machine?"
* System Shock: Weirdly played with; being kicked out of cyberspace doesn't cause much injury, but does max out fatigue (physical exertion).
* System Shock: "What if SHODAN's creations are superior to us? What will they become in a million years, in ten million years? What's clear is that SHODAN shouldn't be allowed to play God. She's far too good at it."
* System Shock, where the author explains that you shouldn't actually indulge in drugs, gleeful violence, or evil in real life.
* System Shock, where the game switches to a vertical zero-gravity shooter in other to open doors or unlock passwords. The cyberspace's graphics is formed by vectors and polygons instead of the two-dimensional sprites as the rest of the game, looking like something straight of out Tron.
* System Shock, where the only thing didn't make him quite normal was the Military-Grade Neural Interface.
* System Shock, with Terri Brosius' excellent voice work making SHODAN by far the game's most frightening and compelling character.
* Systems Malfunction: A small science-fiction LARP played in/around Westchester County NY. Unique in that it emphasizes both Boffer & Spacket combat and Theater-style role-playing & goal structure.
* Systems Malfunction. Honestly, if they simply devour you whole, you should consider yourself lucky since your death will be quick and relatively painless.
* Systems Malfunction tabletop game, the "Vehicle Expertise" and "Ace" perks allow characters to become ace pilots of the vehicle of their choice. In the LARP, the Pilot class allows characters to be ace pilots of Mini-Mecha and/or remote-piloted drones.
* Systems Malfunction were set in motion by an AI gaining sentience, going insane, and coming to believe that it was a goddess. The wouldn't have been so bad, except said AI was in charge of the space station that was relocating humankind...
* Sythyry's Journal references a character's "horse" a few times, then makes some comments about said horse pecking at people with its beak.
* Syuta Hayami believes that his Number card gives him the ability to alter Fate itself, and make his predictions come true. Astral, however, realizes that what he actually does is create
* Syuusuke Fuji. He eschews physical fitness and outright strength in favor of counter techniques that require outrageous (impossible) amounts of skill to perform. He later gains some strength in a filler training camp in the anime, but this never happens in the manga. Either way, it stops being addressed as the series delves into further ludicrousness.
* syzygies" and "syzygial" are very real word and is worth a maximum of 302 points. In case you were wondering, it's an astronomical term referring to planetary alignment.
* Syzygy", in which a rare planetary alignment causes strange behavior in a small town, and even Mulder and Scully begin to snipe at each other.
* SZA". And that's assuming they're able to understand the first line.
* Szamanka od Umarlaków in the huge organization of wizards who throw fireballs and combat demons on a regular basis.
* Szamanka od Umarlaków: Some demons, such as Bad Luck, bring the idea they personify (such as bad luck) to the person they bond with, whether they want or not. Judging how Bad Luck ended up with Ida, they bring their ideas to themselves as well.
* Szayelaporro Granz, Granz briefly pretends to be overwhelmed by Renji's attacks, only to flatly deadpan, "Just kidding," and easily counter them.

* Szayelaporro Granz greatly enjoys performing grotesque experiments on others, and goes out of his way to torture Uryuu and Renji during his battle with them.
* Szayel does this to his Fraccion once they start making a commotion following Ishida's
* Szayel in a separate chapter was shown to be in hell. Ulquiorra and Starrk were confirmed as dead in
* Szent István, and not only the attack the flagship was supposed to lead was canceled, but the Austro-Hungarian navy didn't dare to leave the ports anymore.
* Szent István was sunk on 10 June 1918, less than five months before the land battle of Vittorio Veneto which forced Austria-Hungary to sue for peace.
* Szilard's done his own research on the subject, and discovered that immortals
* Szilard's head and then throw a match at it. "We've never set a MAN on fire before!"
* szlachta. Funeral? Doesn't count if there's no fully-armed Hussar riding into the church in full gallop and breaking his lance against the coffin stand, and ritual demolition of the dead man's insignia of office.
* Szuriel, and sees warfare and carnage as the best way of accomplishing this.
* T-28,. Formidable three-turreted monster, but an abysmal failure in practise.
* T28 Super Heavy Tank / Gun Motor Carriage T95 tracks, 2 on each side. Of the two prototypes built, one was recovered in 1974 when a farmer stumbled upon it, abandoned in a field. It currently sits in Fort Benning, Georgia. The other one sadly, was damaged in an engine fire while being used as a testbed for heavy vehicle components and had to be scrapped.
* T2 also have book trilogies that create yet more alternate timelines, one from each movie.
* T2 ending as being the only person who has a chance at stopping Kazuya, once again acknowledging how highly his abilities are regarded.
* T2: Future War series (written by S.M. Sterling) disregards the events of the third film and places Sarah, John and a German resistance fighter (who evidently was/becomes the base model for the T-800/850 series) fighting T-model endoskeletons in present day America, and hide out while the Future War begins.
* T2, where the Terminator attempts to throw someone through an unbreakable window in the asylum.
* T-34 at the climax of final battle, even going through the trouble of exposing himself out of his tank hatch to physically remove one of gloves to throw it down. The protagonists agree, but requests for some time to gather their wounded and prepare.
* T34 Calliope". USSR had a few experimental rocket tanks, but chose to stick with more mobile truck "artillery".
* T-34 crews had to open the hatch when firing to vent the smoke from its powerful (for the time being) cannon until this problem was solved in T-34-85. Probably a lot of early tanks had similar problems.
* T-34 has the titular T-34 tanks, as well the German antagonists using their wide array of Panzers. The plot hinges upon a group of imprisoned Soviet tankers being forced to use a recently captured T-34-85 as live targets for a German training program, but instead figuring out a way to use it to escape.
* T-34, the tank that broke the Nazi armies. It was built in 1940, and its appearance completely shocked the Third Reich, who did not think the Russians could design good tanks. The T-34 was cheap, fast, reliable, tough and very powerful. Its 76mm gun outclassed the 37mm and 50mm guns of early Panzers, whose shots would simply bounce off the T-34's sloped armor. The 1943 upgrade of an 85-millimeter gun allowed them to deal with upgunned Panzer IV variants, Panthers and Tigers. Although not the first tank ever to have sloping armor, it was the first to use it so well in its design that it became an obvious factor to its battlefield survivability, thus prompting the Germans to come up with what eventually was the Panther. Consequently, sloped armor became a standard feature on pretty much every tank post-WW2.
* T-35. Even more of a Lego-machine, since first it got its four side-turrets from BT-2, later replaced with combination of BT-5 (slightly modded) and T-37 turrets.

* T-35 which was about as successful. Nor was the t-35 the only offshoot, for the Russians also built the T-28 and T-100, the British built the Medium Mk I, and Medium Mk III, and even the Germans got in on the act with the Neubaufahrzeug, though having a greater presence of mind, cancelled the idea soon after.
* T+ 4 is the ability to dump heat into another dimension. This is important, as the game remembers that hard vacuum is an insulator.
* T-80 due to the chances of hitting anything while manuvering like this.
* T-90 125-mm smoothbore cannon, being envisioned as a paratroopers' own tank destroyer, but its thin aluminum shell can't really take anything much above the small arms fire.
* T-90 while shooting at a target. The diesel engine is somewhat less powerful than gas turbine variants, but it has the benefit of far superior range and much lower fuel consumption.
* TA13OO has all track names stylized in all caps, followed by a numerical spelling. The letter "B" is replaced with "13", I is replaced with "1", and S is replaced with "Z".
* Tá no Ar, a show that mocks tropes commonly used in current Brazilian television.
* Taako He also has pathetically weak armor and low max-HP, meaning he can get knocked out of the fight with just a few solid hits, and needs healing most often out of all of his teammates.
* Taaroko's Buffy the Vampire Slayer opens with a chapter devoted exclusively to Oz's activities after he left Sunnydale, as he moves to Cleveland, joins a new band, and masters control of his wolf side before the destruction of Sunnydale.
* Taaroko's Buffy the Vampire Slayer, Oz returns to the Scoobies, but his new band (Illogical Stop Sign) has a lead singer who comes from another dimension and is basically a winged demon, and then their drummer becomes a Slayer after the collapse of Sunnydale, which prompts the bass player (also her boyfriend) to start training to become an official Watcher so that he can keep an eye on her in the field.
* Taaroko's Buffy the Vampire Slayer, when Giles meets Hank Summers, he explicitly states that he views Buffy and Dawn as his own daughters when Hank implies that there might be anything 'inappropriate' about Giles's relationship with them.
* Taaroko's Buffy the Vampire Slayer when Oz and Nina Ash meet for the first time; although the two have no problem with each other as people, they instinctively react violently to the other the moment they make contact when shaking hands, Willow speculating that Oz and Nina's different breeds of werewolf are natural enemies even if the two each want to be friendly to each other in their human identities.
* Taaroko's Buffy the Vampire Slayer when the gang infiltrate another dimension to rescue Lorin, one of Oz’s band mates, from his people; the author even explicitly notes that she took the idea from the fact that the characters’ plans in the show only worked perfectly when they never revealed what they were doing until it was over.
* Taaroko's Season 8, where the Scooby Gang discover that past Slayer Morgan Stronberg, who everyone believed was killed by her Watcher Richard Aubery in the 1930s, was actually killed in battle with a demon (the titular Torso Murderer) and it just looked like Richard did it. In reality, Morgan and her young Watcher were in love, and Richard spent decades trapped in the demon’s hell dimension before Buffy released him by killing the demon in the present while briefly possessed by Morgan's spirit. Willow considers it uplifting that Richard and Morgan are together now, but Xander can’t get past the fact that people are dead and a good man spent the better part of seven decades in Hell.
* Tabaluga, also is greatly vain, loves the sound of his own voice, and is prone to hamming it up all the time.
* Tabaluga's animated adaptation. Earlier seasons had only some changes, mostly near the beginning and end of series.
* Tabarnia would like to remain with Spain if Catalonia became independent.
* Tabasco Road" has Speedy protecting his drunken friends from a cat, only to have

them pick a fight with every cat in the alley at the end.
* Tabi Gweneth similarly wets herself (and passes out) soon after waking up on the island...notably, she still doesn't realize that she is in fact on Survival of the Fittest. Possibly a natural reaction to being threatened with an umbrella, but it still makes you wonder about her every-day life.
* Tabitha, Adam and the Clown Family (who were already magical) get a sidekick singing circus family.
* Tabitha deliberately fingers Alexandria as a suspect due to the latter's previous disproportionate retribution...but that's just to take focus off Tabitha herself.
* Tabitha's super power is described as "mutant powers of blowing things up and stealing all your stuff."
* Tabitha St. Germain only communicated with her fans via her blog and website, and rarely visited it. Before 2012, she only had two known interviews. She's started to open up to her fans by first attending San Diego Comic-Con 2012 and then joining Twitter in 2013.
* Tabitha St. Germain (voice acting example, but also starred in some live action works as well)
* Tabitha Vixx from the episode "Marge and Homer Turn a Couple Play". Lampshaded several times in the episode.
* Table Flip. In the second, the players kill someone who wasn't a werewolf and discover that the werewolf cards were both in the center pile. The players assume that the entire group wins because there weren't any werewolves. Just before the episode ends, "Him" appears and informs the players that if none of them are werewolves, they only win if nobody dies. Since one of them was killed, they all lose.
* Table Flip that focuses on tabletop games, uses this for its title. Dramatic slow-motion table-flipping also appears in its intro and outro.
* Table Flip, they discover a Dog companion named Fidonkers shortly before the Haunt begins and the Traitor is revealed. Fidonkers then barks and growls at the traitor accordingly.
* Tablesaw blades are so fast and so sharp that by the time you cut your entire hand off with one the sensation hasn't even reached your brain.
* Table SpaceThat one can afford both a long table, and a room big enough to hold it.
* Tables that put new "elements" in columns based on common characteristics. You know, like the real thing. More often than not, these will have a shape unlike the real Periodic Table.
* Tablet computers are essentially giant smartphones straight out of old sci-fi movies, but without the convenience of phone calls and easy messaging. Even their feature of size is being overshadowed by the production of larger smartphones. This could end up a subversion with the growth of tablet-laptop hybrids, or two-in-ones, which are more portable than the average laptop without being a pain in the ass when it comes to extensive typing work.
* Table Titans: There's a new class in Fallen Veil that uses rune-powered guns, which the party can't play of course.
* Tabletop Game A.I.A non-digital algorithm that can sub in for a human player.
* tabletop game and a different build. His design also leans into the "punk rebel" aesthetic much more than the original glam rock influence.
* Tabletop Game and Mermista providing a poseable action figure of herself (maybe she learned from the last time).
* Tabletop Game, gave players a chance to enact this trope as demons operating on Earth. Unlike the above example, however, it gave an equal chance to fight for the other side, too.
* Tabletop Game have lines ressembling tattooes on their body that may glow during physical activity. It explained in-universe for being their equivalent to blood vessels, containing nanites.
* Tabletop Game is to have an NPC hire them to do a specific task. The NPC may pay the players directly, be authorized to waive any taxes or fees they'd have to pay

on treasure they find, etc.
* Tabletop Game not only causes a disruption of the world's infrastructure as people feared but it also leads to an invasion by insectoid aliens from another dimension. The Bugs are capable of transforming into pure energy and they use the ability to travel through electrical systems and disrupt human technology. The game focuses on the remnants of NORAD and other human militias fighting a desperate guerilla war against the invaders
* tabletop game revealed that the Sarrukh, one of five Creator Races, had begun fairly non-abusive, but (mostly) began to slide into evil as their god fractured and fell into somnolence and an excuse was made for sacrificing non-Sarrukh (sacrificing honored volunteers are one thing. Mass sacrifices of slave races, another).
* Tabletop Games allows for any race to be a Paladin, most players still stick to the Human/Paladin combo (or less commonly, Aasimar/Paladin if the option is given).
* Tabletop games as a rule are divided between players who enjoy them for their strategy aspects
* TabletopGames/GalaxyTrucker has a number of in-universe explanations for certain rules. One of these explains why it is important to transport hazardous goods in the proper types of cargo holds. It tells the story of James “Skip” Fairweather, who decided to transport several tons of plutonium in used fruitcrates. Upon landing, he lost both arms and one leg to a mob of angry environmentalists.
* Tabletop Game's home world Ras Shamra is this. The thin temperate zone along the terminator has been turned into a gigantic arcology where the population lives. The extreme temperatures of the day and night side are used for combat training and weapon testing.
* Tabletop Games. If you play at a multi-gaming club, you'll probably end up at the very least being interested in those systems as well and there's no telling just how many you might get into.
* Tabletop Games. It now takes two turns to make a single attack with it; one to activate the ability, and the other to make the attack. Apparently nobody asked themselves why you couldn't just use your Eldritch Blast twice. (Or attack twice with your weapon, in case you've mistakenly built your Warlock to be a competent Fighter rather than a Warlock.)
* Tabletop Games players away from averting this trope. It makes a dull game if everybody does the "smart" thing and decides that they don't want to leave the house after all.
* Tabletop Games. Some players become highly analytical in every game they play, always looking for the best possible move on every turn. However, some games have such a huge number of possible moves, with subtle and far-reaching consequences, that analyzing them all could take ludicrous amounts of time. (There's a reason why the chess clock was invented.) Others are designed as simple little family games, to be played quickly and casually, with little riding on the result; subjecting them to chess-master levels of analysis just gets ludicrous. Most tabletop games have a turn sequence, with each player waiting their turn, so the player who is paralyzed by analysis doesn't actually lose as a result; they just slow things down to a painful extent and make the game boring. A few tabletop games include components such as egg-timers to enforce time limits on turns, saving less analytical players from boredom.
* Tabletop Games. Tabletop game worlds are generally teeming with ludicrously dangerous monsters.
* Tabletop Games, these are part of the ubiquitous Cerebral Coretech implants. Often useful (showing other citizens' names and treason stars), sometimes distracting (when the Computer or a teammate takes up half your field of vision while you're in a firefight). Also, while the hardware is difficult to subvert (being, y'know, inside the citizen's skull), the software and comm link are another matter. And there are occasional dead zones where the link can't pick up a signal, causing the display to freeze (you can get a bonus for reporting one, or take advantage to do sneaky stuff while you're off the radar).

* Tabletop Games usually avert this trope as much as possible when playing. Nothing irks players faster than an arbitrary screw by the GM; if the mechanics are good for the goose, they almost always are good for the gander. It is after all people interacting with other people, and illogical plot holes and actions can be readily pointed out and adjusted as necessary. A few games even allow players to intercede at the level of narrative, not character, but doing so usually has a mechanic behind it (aside from buying the GM pizza.) However, the mechanics of dice rolling for actions can often lead to bizarre, illogical and frustrating inconsistencies at times.
* Tabletop Games, which give certain monsters (usually ones of a certain Attribute, Monster Type, or Monster Archetype/Name Group) bonuses, regardless of who controls them, and go into their own unique card zone.
* Tabletop Game that makes all creatures of animal inteligence level se them as friends. They refuse to violate this trust so they preffer to hunt inteligent prey.
* Tabletop game Unspeakable Words, which vanished entirely from every single retailer within a week of the episode's airing, except for ONE scalper on Amazon trying to charge $200+ for a $30 game. Thankfully a Kickstarter for a new deluxe edition should soon be remedying the issue... just short of two years after the episode hit.
* Tabletop Game visit Earth and create humans (and other subspecies) as slaves to mine for gold. The aliens look very similar to us because we share two-thirds their dna.
* tabletop inspiration anime prominently features local human kingdoms with obvious European and North African influences, alongside more eastern nomadic tribes. And of course, they're joined by at least two races of elves, a large dwarven kingdom, and many other mainstays of the genre.
* Tabletop, Jess Marzipan's character is given an opportunity to create a Dark Pact to kill a monster. Pat Rothfuss notes that it seems like a bad idea, but Jess just can't resist taking the Dark Pact because it fits her "(allegedly) reformed cultist" character so perfectly and there's only a 1/6 chance that she'll have to pay the consequences for it on her next Reckoning roll. Guess what happens when it comes time for that Reckoning roll?
* tabletop map with salt shakers and stones used to represent each faction.
* Tabletop Miniatures: The intersection of Board Games and Collectible Card Games, featuring
* Tabletop Role Playing Games and group of players will help a new player considerably. Put succinctly, a new player has to learn the mechanics of most games (crunch) as well as the setting (fluff). Despite the name, learning the "fluff" is not always easier - some games have really simple rules and terribly complex ideas behind them. Smart companies design their products around this problem.
* Tabletop RPG and Players alike regardless of the setting. The common setup is something like this: a character is in trouble, whether held captive or simply seeking out help righting a wrong he or she cannot right. He or she uses his or her apparent vulnerability to manipulate the other parties into doing what he or she wants. Depending on the genre, mystical or technological augmentations can help with the con. Then, when the character gets what they want, they may either dramatically betray the others then or just leave their stooges in the dark entirely. Alternatively, play the victim when the paladins/Jedi/police/player characters show up.
* Tabletop RPG because the KODT characters were playing fourth edition in the comic at the time the system was licensed), and been seriously overhauled into a new system, as Kenzer & Co's license with Wizards expired.
* Tabletop RPG Game Masters. When the interactive lifespan of your average NPC is measured in a handful of combat rounds, you have to make the most of it!
* Tabletop RPG. Games that end with party death are always context-specific, and failing to do that is taking away the effect the players had on the game world, even in death.
* Tabletop RPG has a line of "Solo Adventures", which were essentially gamebooks with the game's rules and dice added as a randomizing element.

* Tabletop RPG has one on Mars, but the one on Earth proved to be too difficult to engineer in the high terrestrial gravity and thick atmosphere. Earth uses "Skyhooks", shorter versions, where the top is in low orbit, and the bottom flies in the stratosphere, moving cargo between high-altitude planes and low-flying spacecraft.
* Tabletop RPG It has little, if any, effect on game mechanics. But boy, is it creepy!
* Tabletop RPG kill the user within seven years of starting. Also, he rolls a percentage to see if the drug causes one of several mental disorders.
* Tabletop RPG particularly focus on algebra, and games that focus on non-narrative combat resolution like with dice or cards teach probability theory. Playing any game long enough also forces you to have an understanding of game theory. The genre has also been a boon for parents hoping that their kids would be more sociable and use their imagination.
* Tabletop RPG rulebook features a remarkably edgy and sour short example to teach basic game concepts, mechanics and help confuse the tone of the game.
* Tabletop RPGs are the starship crew/Rebel base/Ghostbusters franchise/renegade Time Lord on the scene.
* Tabletop RPG, set in the 1800s in America, the discovery of ghostrock has fostered the continued division of the Union and the Confederate States. The various states' focus on managing their own territories has kept them from expanding into areas of what would otherwise become U.S. territory. Four nations pop up instead: Mormon-run Deseret, the native Coyote Confederation, the theocratic Free and Holy City of Angels in California, and Sioux territories.
* Tabletop RPGs even advises the DM to treat it as a giant game of "Yes and...", which is an established theatre game.
* Tabletop RPGs) is not nearly the worst. Conversely, the foreword by Rich Baker to a Players' Options book (that derived some of its parts from internet house rules) set it straight on the very first page:
* Tabletop RPGs is when a player uses knowledge that he possesses that is not possessed by his character in order to get an advantage within the game. It's generally frowned upon as bad role-playing, though games placing low emphasis on role-playing might accept or encourage it. Types of metagaming include:
* Tabletop RPGs lead when it comes to weaknesses as a standard part of their character creation rules.
* Tabletop RPGs, smart players can use anything from grease to marbles to set traps.
* Tabletop RPG supplement "Neo-Anarchists' Guide to Real Life'' mentioned how exciting it was to watch a DocWagon Crisis Response Team respond to a crisis "Code Blue" alert.
* Tabletop RPG. The Architects of the Flesh also use them, modifying them with Arcanowave technology to become Bouncing Benjys.
* Tabletop RPG, the characters placing themselves into positions that offer decent protection, slow the enemy down, or give another advantage, can be very useful. For instance, in a narrow corridor or tunnel, if it's found that enemies are coming, placing the designated Tank (Fighter or Paladin with heavy armor, or the beefy Barbarian, or someone with a high Armor Class and/or Hit Points, or a Summoned creature) between the party and the enemy can allow the squishier magic and ranged attackers to fight from a safe distance, while the tank soaks up the damage and dishes out their own. Likewise, knowing when to be a Substitute Tank is also a good idea if the enemy proves to be more numerous than expected and the Main Tank is in a world of hurt.
* Tabletop RPG universe. subverts the trope of the wild frontier asteroids, being a cultured and civilized place and the home of important grandees. Several other belts play this straight.
* Tabletop RPG with armed stock cars), but its primary competitor is "combat football".
* Tabletop Simulator can flip the table. Server hosters can disable this.
* tabletop sourcebook, the entry for a character known only by nickname is

accompanied by a rueful note about how a detective should probably be better at learning people's names.
* Tabletop speculates that, in order to balance his luck out, somewhere in the universe a planet spontaneously imploded.
* Tabletop wargames are often significant aversions of this rule, because they strive for "realism" (though there are endless arguments about what counts as "realism").
* Tabletop wargames in general are very keen on this sort of decoration, both because it's
* Tabletop wargames using miniature figures have existed for centuries, especially in the Prussian Army where they were used to train officers in tactics. It wasn't until
* Tabletop was played, a "next time" trailer manages to spoil every major plot development in part two, rather ruining the tension that had been built up in part one.
* Tabletop, Wil is shown to be one. He was much more chill when playing with the kids in the Catan Jr. episode at least, no salt at all.
* Tablet peripherals for PC are intended for people who want to draw digital illustrations, but they also have a significant userbase in
* table WHERE x=1), but in terms of programming languages it's highly unusual. If you don't have programming experience, the commands should be pretty easy to pick up. If you have a lot of programming experience though, you'd be left scratching your head as you won't be able to do "I'll just type it in and see if it's the same as Python/C/Java".
* "Tabloid Reporter to the Stars": The first interstellar expedition encounters an alien race that already knows about humans because of an apparently divine messenger that the narrator finds out is
* Tabloids: often veers on parody (starting with its title) and usually prints news of sexual nature, including a weekly topless pin-up (although rather tame by Latin American standards).
* Tabloids that love to point out the follies of celebrities often feature unfortunate actresses with their Spanx showing from under their dresses as they disembark cars.
* Tabloid YouTuber DJ Keemstar has become rather infamous for how regularly he does this during on-air discussions (among
* Taboo: Cholmondeley asks James if Laura Bow is free for him to pursue, luridly exhorting that she's so pretty that she's not just someone he wants to sleep with but masturbates about.
* Taboo discusses things that are taboo in Western society, usually in non-Western cultures but it sometimes discusses various subcultures in Western society.
* Taboo: During the time period, it was an unofficial practice among some medical professionals to perform experiments on recently buried, excavated corpses. After James hires a doctor to perform a post-burial autopsy on his father so he can confirm that the man was killed through poison, the latter makes a sly remark that it would be wise to bury him a bit deeper the second time around. James immediately threatens to kill him and any of his colleagues if the body is desecrated in any way.
* Taboo: Horace Delaney was such a nice guy that his passing is largely a matter of happy business to many both of the great and the "good" of London, as well as the small and tattered on the dockside. Including his daughter.
* Taboo is widely rumored around London and is apparent to all who see them together, including her enraged husband. The Americans even go so far as to offer her as part of their bargain with James for Nootka Sound.
* Taboola is a service that provides links at the end of pages on news websites, ranging from actual links to other articles to nonsensical clickbait such as "Wardrobe Malfunctions That Actually Made It Into Films" (real example) to outright advertising, all mixed together in one big stew. Taboola isn't the only chumbox ad provider, as there's another one called "Outbrain" and, sometimes, they're on the same webpage.

* Taboo-Tattoo clone sister Bukka grants her powerful telekinesis. Bukka has used these abilities continuously since she lost her arms in an accident and has become incredibly skilled with them, being able to manipulate objects from great distances and grant herself the ability to fly.
* Taboo, they often use clips from one of their early episodes in the intro to an episode. One clip used often is one about an African tribe where the men paint their faces yellow and cross their eyes in order to impress the women.
* "Tabu" appears to be another case of a rich parent's child kidnapped for ransom, but
* Tabula Avatar, when Dawn swears in Ilythiiri. Tara makes her say it again, this time with proper grammar.
* Tabula Rasa and receive Logos Element information from them. It's essentially a security system the Eloh set up thousands of years ago by modifying some early humans to express those genes.
* Tabula Rasa behavior — they cancelled the healthy MMO and forged a resignation letter from Richard Garriott (In Space!) to keep him from getting a stock windfall. This backfired gloriously though, as Garriott successfully sued them for $28 million.
* "Tabula Rasa" focused solely on the trial of a serial killer who had woken up from a four-year coma. Amazingly, even when he escapes no one new dies (the girl they think he's taken turns out to be the corpse of his first victim, which he ran to find once his memory came back).
* Tabula Rasa gave those who pre-ordered the game access to beta, a 3-day headstart and two purely decorative pets. Also, it had an event that gave out several bonuses of its own during that headstart, effectively making them a limited preorder bonus.
* Tabula Rasa gives this as the reason why good aliens gave humans wormhole technology. The humans in turn help them fight their long term enemies who also happen to invade Earth.
* Tabula Rasa had a fun game mechanic where the Bane would stagger in place after losing all of their life, opening themselves up to a decapitating roundhouse kick that had the added bonus of giving additional experience points.
* Tabula Rasa is based around this - the PCs are humans with the capability to use ancient alien technology that writes information directly into their minds and lets them do seemingly magical things like shoot lightning.
* Tabula Rasa that was about killing General British. Well, clones of him, actually; there were dozens of them.
* Tabula Rasa, the Bane also dropped a "shard-ship" on the planet, a combination of asteroid, superweapon, and terraforming device that spreads toxins and organisms suitable for Bane habitation after impact. This is apparently a favored tactic by the Bane. It's been used on a planet belonging to another member of the Allied Free Sentients: the Brann's homeworld of Erdas.
* Tabula Rasa. The first version was going to be a fantasy MMORPG, then was scrapped to make a second fantasy MMORPG, then it was scrapped entirely and made into a completely different MMOFPS.
* Tabula Rasa was developed as a fantasy MMORPG before becoming a sci-fi MMOFPS.
* Tabula Rasa was set with player characters as soldiers in a futuristic military/militia organisation. Being an MMORPG, none of the officers minded their Receptive subordinates faffing about rather than following their orders.
* Tabula Rasa When Michael walks into Sun bathing topless in the jungle, he first apologizes (even if she hasn't revealed that she understands English) and then hands her bra, with further apologies.
* Tabula Rasa", where Willow casts a spell intended to remove Tara's memory of breaking up with her but instead blanks out everyone's memories including her own. They're in the same universe but because they're all starting from a blank slate they reach some very different conclusions about themselves. Giles and Anya think they're married, Spike thinks he's a vampire with a soul (usually Angel's role) and Buffy finds being a Slayer cool.
* Tabula Rasa". Willow and Tara are having an argument; Xander and Anya make themselves scarce.

* Tabu, Reri and another island girl get into a hair-pulling fight by the river. Their sarongs get very wet and clingy.
* Tabuu turns everyone into a trophy again,. In gameplay, Sonic's adjusted like the other fighters.
* TACA Flight 110 had both engines lose power during a thunderstorm but landed with only minor injuries to those on board near its destination of New Orleans on May 24, 1988.
* TACA Flight 110, the NTSB was able to fly it off the levee and to a nearby airport for further inspection and repairs. The aircraft was later returned to service.
* Tachibanakan To Lie Angle) is worded remarkably similar to its male counterpart.
* Tachibana tries to do this to Yuki upon meeting him but Luka pulls Yuki out of the way before Tachibana can hug him.
* Tachikomas. After discovering that they're going to be facing up against anti-tank helicopters that they'll be virtually helpless against, they try to avoid it by complaining that (despite being robots) they need to go back to base because they have stomachaches. Batou doesn't buy it for a second.
* Tachikomas (pictured) and their manga counterparts, the Fuchikomas, are mini spider tanks that can be deployed independently. Their growth forms a major arc in the first half of
* Tachikomatic, including the ability to stop time. When demonstrated, time indeed does stop... for everyone. Including the Tachikoma using the ability.
* Tachyon Squadron, a sci-fi dogfighting setting for Fate Core, is explicitly a worse place for racial minorities, LGBTQ people, and the like. (It's still not a great place for anyone, admittedly.)
* Tachyons. Since they have imaginary mass, they lose speed as they gain energy, and it would require an infinite amount of energy for one to slow down to the speed of light, let alone stop.
* Tachyon: The Fringe abuses the trope in normal flight, there is a button you can hold to continue moving in your current direction at the current speed. For example, it also allows you to fire your afterburners for a few seconds and then coast along in your current direction at extreme speeds, which is terribly useful if you need to get into or out of a particular fight very quickly, or if you just get impatient. You can even spin around and fire backwards. A real pedant could use this system to fly the ship in a (pseudo) real fashion!
* Tachyon: The Fringe allows you to hire wingmen for an up-front fee and a percentage of your mission payouts.
* Tachyon: The Fringe, all spaceships go down with shockwave rings, more noticeable on large ships.
* Tachyon: The Fringe, although their sometimes-shown (but never used) capital ships are more like GalSpan than Bora.
* Tachyon: The Fringe Anna Highfall (if you side with the Bora) is absolutely in awe of Susan.
* Tachyon: The Fringe are guided. Fighters can "glide", though, disengaging engines and rotating the craft to face and fire in any direction. It can also be used creatively with the afterburner to go past the normal max speed (but only in a given direction).
* Tachyon: The Fringe, as they are crazed religious fanatics living in the strange fog of the Twilight region, killing any passerby.
* Tachyon: The Fringe-controlled mining sector. It is likely that Bora themselves did it in order to better mine the planet's resources.
* Tachyon: The Fringe Enforcer fighters are also white and blue, although their design is radically different from most fighters in the game.
* Tachyon: The Fringe evaluating a novice flight instructor, and the tutorial's combat section has a group of drones go haywire and attack you. Later in the game, a news item reports that the instructor you evaluated saved her students when this happened again.
* Tachyon: The Fringe, everything you encounter out there is human—this allows the corporation-vs.-colonists storyline to remain the core focus, with some

glances aside for colorful space pirates, asteroid barons, and spectacularly unethical science.
* Tachyon: The Fringe for GalSpan. This is considering GalSpan forced Bora to hand over the station only to try to shoot the evacuees.
* Tachyon: The Fringe has a side quest wherein the player, a freelance starfighter, escorts a ship carrying the roof of the Sistine Chapel and protects it from a baron's forces (their master hoping to steal it so they can humiliate another baron in the region).
* Tachyon: The Fringe has the Swarm Missile launcher, a small missile pack holding four shots. With each pull of the trigger, however, the Swarm launcher fires a missile that instantly splits into four smaller missiles the moment it leaves the tubes. Just one salvo is usually enough to wipe out an opposing ship, though some ships can carry multiple racks of Swarms just to keep things interesting.
* Tachyon: The Fringe, indicating that it might well be the nebula itself that is responsible for the degeneration.
* Tachyon: The Fringe is a fighter pilot by trade. Capital ships exist, but seem to mainly be used as carriers.
* Tachyon: The Fringe is centered around tachyon gates (or tachyon coil generators, to be precise) that connect all of known space (actually, only a few dozen systems). Close to the end of the game, a news report informs the player about newly-invented tachyon wave generators, vastly increasing the range at which capital ships can travel (fighters still need static gates for FTL travel).
* Tachyon: The Fringe known as "Susan's Lance" and has scored numerous victories against GalSpan holdings.
* Tachyon: The Fringe, like the one through which the Bora originally went.
* Tachyon: The Fringe, paint it white, and smooth out some of the lines.
* Tachyon: The Fringe. Ships have a top speed, but with the clever use of afterburners and inertia, the ship's speed can nearly double. Of course, as soon as you reactivate the engines, your speed goes back to top speed. Not to mention all the banking and barrel-rolls.
* Tachyon: The Fringe "terrorists," while the Bora consider themselves to be freedom fighters. Both are true. The Bora fight GalSpan for trying to kick them out of their homes, but they use guerilla tactics to achieve their goal. Of course, they are never shown openly attacking civilian targets, as opposed to GalSpan who blow up hospitals just to avoid a drop in stock prices.
* Tachyon: The Fringe). The description starts with something like "Once again the sound of machineguns is heard..." If you assume that, in-universe, there is no sound in space, then this line is either some lame attempt at poetic imagery or just plain wrong.
* Tachyon: The Fringe, the results can be hilarious. But all too often, because of the ridiculously short ranges that happen in dogfighting, this happens when your shields are already drained...
* Tachyon: The Fringe, where you can gamble away your hard-earned money.
* Tachyon: The Fringe, who will instead reward him with a ticket back home.
* Tachyon: The Fringe won't regenerate. There are occasions where time constraints make this mode of attack inadvisable, but they're rare.
* Tacitus mentions two comet sightings during the reign of the Emperor
* Tacitus writes about the Germanics that they would not only willingly gamble away their whole property, wife and children, but even themselves.
* "tack", and most of their weapons are front-facing meaning that an Eldar admiral has to pay close attention to positioning and micromanagement. However, Eldar ships have a lot of lance-based firepower and their captains have better morale, making them less like to flee battles.
* T*A*C*K: An occasional solution to the group's cases. Most notably used when Abby tricks one of her classmates into revealing that they wrote the poison pen letters to their teacher.
* T*A*C*K: Chuck is not only good at sports, but he's a decent student and even represents Sandy Harbor at the regional spelling bee.
* T*A*C*K: Holly, Toria's little sister, who taunts Toria by calling her "Vicki",

teasing her big sister that she and Will are boyfriend and girlfriend, and using her cuteness to get what she wants.
* Tacking into the Wind" ends with Gul Rusot, a member of the Cardassian Rebellion, pointing a phaser at Kira, who is covered by Garak, while Damar holds them ALL at gun (phaser?)-point and tries to decide what to do.
* T*A*C*K: Judge Sweet's daughters pull some destructive Halloween pranks, then try to blame them on two kids who happen to be wearing the same costumes. Unfortunately for them, they pick Will and Toria, who promptly prove their innocence.
* Tackleberry's coworkers throw a goodbye party for him, because he's leaving his job as a security guard to enter the
* T*A*C*K: Often, just before "turn the page for the solution". Another character will usually make a reference to something vaguely related that will trigger a "I just figured out the answer!". It's usually Toria who triggers Will, but occasionally other characters will trigger Will or Toria into figuring things out.
* T*A*C*K: Red Jameson, the meanest kid at Monroe Elementary School. He often makes life miserable for the Sandy Harbor kids when they are grouped together for occasions like spelling bees and field days. He even broke Will's leg by "accident."
* T*A*C*K: The kids use their initials to make the name of their group, but decide to give Will the code name "K" because it turns out no one can pronounce "T*A*C*W".
* T*A*C*K: Will says that bully Red Jameson gave him a friendly wave after Will outwitted him at the spelling bee, allowing him and Toria to make their escape. Toria makes a small correction: "Will, no one waves with their fist!"
* Tacky the Penguin, "odd bird" Tacky always counts, "One, two three, four, two, three, six, zero, two and a half, zero."
* Tacky the Penguin: The heroes of the series are a small group of penguins.
* Taco Bell also had a commercial where three patrons attempt to come up with the perfect adjective to describe the chain's latest item: a combination taco/burrito with melted cheese between the two shells. They go through "smunchy" (soft/melty/crunchy) and "crufelty" (crunchy/soft/melty) before settling on "cruncheweesy" (crunchy/chewy/cheesy).
* Taco Bell and other fast-food restaurants advertising "melty cheese" on their products — which is about as meaningful as hawking "pourable water."
* Taco Bell chihuahua led to it becoming the mascot of the restaurant for a few years. Furthermore, its catchphrase, "¡Yo quiero Taco Bell!", was oft-quoted in the late 1990s and early 2000s.
* Taco Bell has a little too much respect for its customers to claim to serve Mexican food of any degree of authenticity. Instead, they are careful to always refer to their food as "Mexican-inspired."
* Taco Bell has its annual, sometimes semi-annual, adverts for its Nacho Fries, all of which are fake movie trailers produced by "Live Más Productions" (a reference to Taco Bell's slogan), and each of them is an
* Taco Bell inverts this in a commercial for their (methinks) Bacon Club Chalupa. Two very attractive
* Taco Bell is still remembered for the Taco Bell Chihuahua, a tan short-hair with a Mexican accent, voiced by
* Taco Bell once sold a tasty burrito with chili and cheese under the name of "
* Taco generally averts this with "Puttin' on the Ritz", which was his only major international hit, but it did not chart in the UK, where his only top 100 entry was "Singin' in the Rain".
* Tacoma Narrows. All he's ever wanted to do is make somebody proud, and as he sent his dad to jail and his mother hates him, he finally gets it in bromance buddy/boss/best friend Donnie.
* Taco-Man has served as a superhero in both his world and the video game world, despite suffering from a lack of focus and poor video game skills.
* Taco-Man Plays a Video Game, scenes of Taco-Man performing such activities as smoking and pointing a gun towards his head get accompanied with reminders for kids not to do them.
* Taco-Man. While there, he catches the eye of the hostess' brother, Zach.

* Taco night is when we lay some beef in a pink taco...drip some guacamole...make her sour cream..."
* Taco's uses enough lipstick, eye liner and shadowed eyebrows to make his face look a bit off.
* Tactful Translation: Someone insults someone else in their native language, and the translator says the gist of what the person said but leaves out the rude parts.
* Tactica Imperialis). Dedicated library staff work to compile usable editions specific to different situations.
* Tactical Alert - The same as Red Alert, and in fact its ancestor. (In the early years of Starfleet, the first
* Tactical Assault Light Operator Suit (TALOS) is a full-body powered armor suit with powerful body armor under production for SOCOM.
* Tactical Corsets. Strictly speaking they are not Stripperiffic in themselves, but they do combine two pieces of club fetish wear (tactical vests and corsets) into a single piece.
* Tactical Door Use: Shoot it to create makeshift holes? Set up a trap behind it? Blow it with explosives? Throw an enemy at it? There are many ways to interact with a door tactically!
* Tactical Gaming- A gaming clan with two major divisions; Tactical Sports and Tactical Warfare.
* Tactical Laser Systems have incredible range and power and will always hit what's in the targeting circle. However, that accuracy is also their greatest weakness; being unguided, if you can't keep the target in the circle then it is not going to get fried. Start working on your gunkills!
* Tactical Marine Sergeant Tarkus, especially since everyone else on your team have hair.
* Tactical officer Malcolm Reed has a fair amount of engineering skills of his own, usually applied to building things that blow other things up.
* Tactical Rock–Paper–Scissors advantage over the Rider class, and many giant enemies being Riders, Assassins are somewhat memetic in the fandom for these sneaky rogues, serial killers, and executioners being able to tank the blows of giant monsters and kill them in one shot, while the powerful mages, demigods, and dragon-slayers struggle to do the same.
* Tactical Rock–Paper–Scissors: 'high' has an advantage over 'medium', 'medium' over 'low', and 'low' over high'.
* Tactical Rock–Paper–Scissors scenario: Oranges beat Blues, being bigger and stronger, Yellows beat Oranges, being able to sneak into their harems to mate, and Blues beat Yellows, guarding their single mate and easily chasing off "sneakers".
* Tactical Rock–Paper–Scissors types of medal by equipping them in the right slot, in contrast with the next three Keyblades, which all boost the same single medal type in every slot.
* Tactical Rock–Paper–Scissors: Units, attacks, and skills are classified into several distinct classes, with each class having a clear advantage and disadvantage over other classes.
* Tactical RPG games tend to be much more open ended, and about conquering territory, whereas Tactical RPGs usually have an overarching plot typical to an Eastern RPG.)
* Tactical Shooter developer Atomic Games to make a game based on their experiences, and the developers interviewed over 70 U.S. Marines, Iraqi civilians and insurgents, war historians, and senior military officials so they could accurately portray the psychological complexities of the battle.
* Tactical Shooter obstacle you can hop over. This is done not so much for the purpose of trope play but rather for purposes of realism.
* Tactical Shooters as a whole often implement this trope as an important game mechanic that must be taken advantage of (and/or watched out for).
* Tactical sledge hammers are sometimes used in close-quarters combat fire teams. The doorman will sometimes use it in place of a battering ram or shotgun when approaching a breaching scenario. Tactical sledge hammers come in handy in

situations where explosives or shotgun shells would prove too destructive due to the presence of hostages or physical obstructions. It is not unheard of for SWAT members to find themselves using the hammer as a last-second weapon when the suspect is determined to be closer to the team than anticipated.
* Tactical This is a level at which low-level commanders exchange messages or meet handfuls of others in hastily-prepared bunkers to pore over a schedule, a provincial map with a big red arrow, and a fistful of local maps marked with the occasional scribble here and there.
* Tactical to help achieve the overall strategic goal; the "How" you use to accomplish it.
* Tactical Tomahawk has become popular among American military since the war in Vietnam. Much more versatile than the standard combat knife, it can be used in close quarters as a weapon or thrown in desperate situations. It can of course chop through wood if needed, or even be used as a hammer, as well as for any of the number of things—opening a can, breaking through something, excavation, or just nudging something difficult out of the way—that fall in-between.
* Tactical Withdrawal and regroup after falling back, Chaos Space Marines can be routed and driven from the battlefield.
* Tacticians, who want to demonstrate wargamer-style tactical mastery.
* Tacticks is actually justified, considering that the entire script is in arcane English.
* Tactics A2 this becomes funny. The red king is dressed in blue, the blue king is dressed in red, the black king is dressed in red, and the green king is dressed in purple. Not only that, but they aren't masters of their namesake magic, they use other types more often. So apparently magic types can get palette swapped as well.
* Tactics initially has Andarc and Seneca has Kyril's partners. While they maintain importance in the story, they eventually are replaced in the role by Corselia, whose role in the plot is very personal.
* Tactics Ogre and vows to fight against you for doing such an obvious evil act, despite it being considered a "Lawful" route. And no matter which route you take, the massacre still takes place.
* Tactics Ogre, but reviving downed party members is also much easier (since the "item" command is automatically equipped and doesn't have to be leveled up to use a revive item) and the player can always opt to rewind time by as many as fifty turns if they discover that they won't be able to save a party member in time.
* Tactics Ogre, given that the conflict on Valeria is being influenced by agents from Xenobia (analagous to CIA operatives) and the Holy Lodis Empire is supporting one of the factions with a significant military presence (analogous to Soviet "advisers" propping up a local friendly government).
* Tactics Ogre had exactly one black character, the Dark Knight Andoras.
* Tactics Ogre killed his father, and later on, his mother died as well. He had his brother blamed for it.
* Tactics Ogre: The Knight of Lodis, a late-game cutscene will depict Alphonse being stabbed, and he is told "You won't die if you have it treated". He will start the ensuing battle poisoned.
* Tactics Ogre: The Knight of Lodis, and given the nature of the game it is definitely meant to strike a blow against the players who didn't bother to train multiple characters.
* Tactics Ogre: The Knight of Lodis, but to be fair, even before he said this, Alphonse wasn't buying it.
* Tactics Ogre: The Knight of Lodis, Euphare's Energy Transfer skill lets her give up 1/4 of her HP to restore another character's MP.
* Tactics Ogre: The Knight of Lodis of rescuing a mermaid from other hostile humans presents itself. If you refuse, this doesn't happen, and you end up fighting the mermaid instead.
* Tactics Ogre: The Knight of Lodis terrain tile has an effect on your party members. Lakes and rivers increases the effectiveness of Water spells, while reducing Fire. Standing on rough rocky terrain increases Earth power, and can boost your physical attacks. Each tile affects the power and resistances to each of the

four elements in some way, and certain tiles can increase your offensive and defensive output overall.
* Tactics Ogre: This is happening between Lodis and Xenobia, complete with using Valeria (itself resembling Yugoslavia after the death of Josip Broz Tito) as a proxy battleground.
* Tactics Ogre, this is the Snapdragon. It turns a party member into a sword that is based off their own stats, giving insane boosts to the stats of whoever wields it.
* Tactics Ogre will immediately feel "Disaffection" and leave if you make a certain choice. There are many factors for raising and dropping loyalty: leveling them up on non-training battles will increase loyalty, but if you kill enemies with the same race as them they will drop their loyalty. Alignment has an effect too - if you have made "Lawful" choices the Lawful alignment characters' loyalty will increase while "Chaotic" characters' will drop, and vice versa.
* Tactics Ogre. You cannot be a spotless hero and at the same time have your best friend be a good guy (and alive) by the end of the game.
* Tactics Theatrics, which is probably the smoothest-looking fight in the entire series.
* Tactics). The same is true for Radaway, though with a slightly harsher addiction and no mention at all in later games.
* Tactics, where it's Nate, one of the two choices for main character. However, Perlman does play the newscaster on TV who reports that the bombs have fallen, and there is cut dialogue after he says "My God" and the feed cuts, where he says "They were right. War. War never changes."
* Ta'Darius Thomas sought out The House Of Truth when he decided to pursue a career in professional wrestling but soon discovered Truth Martini was evil and decided to distance himself from his company. 2013, eight years of toil in the sport and nearing stardom in ROH's top prospect tournament, only to be screwed in the final round by
* Tadashi going back in the fire to save Callaghan, proclaiming "someone has to help". While it
* Tadgifauna. When Tadgifauna first meet a person, they can only communicate rough feelings. Telepathic communication only becomes clear after they've had time to form a bond.
* tAditionally, Code::Blocks handles copying and pasting the linux way. You highlight your code and copy it, then middle click to paste it in. For those of you migrating from other IDEs, such as DEVC++, this is infuriating. To add to the confusion, Code::Blocks uses the right mouse button for scrolling.
* Tadpole Treble for the PC — even the low-bass toad sung so! Unfortunately, a lot of people simply don't want to play a rhythm game starring a tadpole.
* Tadpole Treble. The level Midnight Bayou is home to fellow tadpole, Sonata, who sings a heartfelt love song to Baton as that stage's musical score. The whole thing is played for laughs. The game even points out that Sonata thinking that Baton is the most beautiful girl he's seen in his life doesn't mean much when his entire life only extends to yesterday.
* Tad, the Lost Explorer: Belzoni the parrot is mute so he constantly communicates holding tiny picket signs in his wing.
* Tad, the Lost Explorer, the titular protagonist is voiced by the singer Ha Dong-hoon, aka HAHA, while Sarah is voiced by the also singer and actress Yoon Bo-ra aka Bora.
* Tad Williams. All of his considerable resources are dedicated to one task: learning how to cheat the inevitable death of his body, and he's willing to go to any lengths to accomplish it.
* Tad Williams, and creating Fantasy environments within the bounds of cyberspace. It's worth mentioning that travel time is normally nearly instantaneous, but specific virtual environments can be configured to simulate realistic movement, and this is considered something of a cachet of the eccentric and well-off.
* Tad Williams atop Green Angel Tower is heralded by a series of piercing phantom bell strokes, marking the progress of the ritual that summons him back into Osten

Ard.
* Tad Williams complains about him wasting valuable resources to send them the message for no reason other than to gloat.
* Tad Williams. Her disguise is effective enough that the hero, Simon, is fooled (granted that he's not all that observant when it comes to girls), even after they meet in the wilderness. Wiser characters do see through it, though.
* Tad Williams is implied to be like this. Its complexity is increased by the fact that players aren't expected to play to win, but rather to create aesthetically pleasing situations.
* Tad Williams is simply another arena for human virtues and vices to take place.
* Tad Williams. It isn't that old (its leader and founding member is a mere 200 years old), but it fits all the other criteria.
* Tad Williams. It's only a secret to Theo and the audience, though. The world of Faerie knows and hates it.
* Tad Williams keeps repeating how he is just a little scullion until cast and readers alike want him to shut up about it.
* Tad Williams liked these. Anton Hellebore was described as having a smile like someone who'd learned it from a book, Lord Hellebore one with absolutely no good feelings in it, and the Terrible Child had one like someone pulling up the corners of a corpse's mouth.
* Tad Williams seems to like this one, as he uses variants on it in several of his works:
* Tad Williams the fact that history isn't going to end with their current woes, and there will be more great deeds and adventures to come once the Storm King is defeated.
* Tad Williams the grand conflict with the Storm King. However, when provoked, they are fearsome fighters due to their strength and endurance from millennia of delving in the earth.
* Tad Williams to the point where simultaneous voice translation is a standard feature of the 'Net. There are cases where this fails due to linguistic nuances or a character speaking in a language that the translation software doesn't recognize.
* Tad Williams trilogy describes a tremendous variety of methods used to interface with virtual reality environments: a plain old flat screen, 3D goggles (both with "squeezers" for input), a mechanical framework that you strap into, full-body immersion in a pressure-sensitive gel, and for the rich, a direct neural implant. Within the 'Net, a combination of hand gestures and speech form the "programming" language. And some users go so far as to have custom interfaces designed for them, whether out of personal idiosyncrasies or impatience.
* Tad Williams trilogy, the Conqueror Star is a highly visible comet whose coming is said to portend the fall of empires. Given the limited amount of information presented in the story itself, it's hard to say whether it actually has supernatural powers, but its periodicity is certainly very odd.
* Tad Williams without his captors noticing; by the time of the main story he's practically half computer. Treated fairly realistically in that it doesn't make him any stronger; quite the opposite, in fact.
* Tae-goo, the "Weird", kills two people this way in the Korean film
* Taegukgi: The Brotherhood of War do this right before parting for the last time right in the middle of a brutal Korean War battle.
* Tae Kim's guide to Japanese, being a slightly colloquial Internet-based text, features some pretty wacky lines, particularly in learning expressions as "should" and "must": "You must not marry a Korean!" "You have to marry a Korean!"
* Taekwondo match fought with World Taekwondo-rules gives two points for a standard kick to the chest and three points for a standard kick to the head (both fighters wear full protective gear) while a spinning kick gives one more point for both.
* Taeler Hendrix is a walking advertisement for double-sided tape or whatever it is she uses to keep herself from falling out of her clothes.
* Taeler Hendrix mindset that permeates through the promotion might have drawn as much attention to the rebranded Women Of Honor division as any match.

* Taeler Hendrix, night one, after he caused a chain of events that caused every other participant in the six-way scramble match to be hit in the crotch and thus got three feet in his groin as they all rushed to give him retribution.
* Taeler Hendrix: OVW wrestler who was called up to for a short TNA run in 2012-13 during the Gut Check era. Wrestled in ROH in 2016.
* Taenidia (plural of "Taenidium") are circumferential thickenings of the cuticle inside a trachea or tracheole in an insect's respiratory system.
* Tae Takemi, the Death Confidant, is a doctor who gets the player to serve as a test subject for her drugs, and calls him her "little guinea pig."
* Taffy 3. If there was ever a naval battle that fits the description of David vs Goliath, it is the Battle Off Samar. 6 Escort Carriers, 3 Destroyers and 4 Destroyer Escorts against 4 Battleships,
* Taffyta and the other Sugar Rush Racers also qualify, due to their bullying towards Vanellope. But this is actually because
* Taft 2012 fell asleep on the day of Wilson's inauguration and disappeared, then woke up in November 2011. Soon after, he starts a new presidential campaign, adapting his old ideas to the modern world.
* Tagalog romance novellas/novelettes (and presumably romance novellas in other Philippine languages as well)
* Tag-Along Actor: An actor researches the role of a special profession by shadowing their real life counterpart.
* Tagalong Kid first two knives and then a knife and an enchanted dagger with the power of fire.
* Tagalong Kid, having once said that the role is a fulfillment of his childhood dream of becoming an Ultraman.
* Tag Along Kid: Vincent. Yes, even the non-wrestlers and assorted celebrities associated with the nWo outranked poor Vincent.
* Tagalong Reporter: A journalist who joins in on the hero's adventures to report them.
* Tagalong Reporter lands in the city of Hazek. They do nothing to dispel this mistake.
* Tagalong, the writer, and Tria, the artist, make occasional appearances during
* TAGAP has a few sections that change the gameplay, such as where you can fly/swim (8-way movement) and/or are in control of a vehicle (can only use the vehicle's weapons, which have infinite ammo). Two notable ones are in the second game:
* TAGAP). The "Psycho" part comes from the fact that, unless you've been specifically engineered to curb the negative effects, your intelligence is drained and you become noticeably more vulnerable to mind control.
* tag battles lets see how much of the fanbase will like it or hate it.
* tag Blake or sees her as another tool to make people miserable varies by promotion.
* Tag Climax has secret stages that have a random chance of appearing. Most of them are of the other player characters, but there is also one against Bayonetta's demon summon Labolas.
* Tagdegx. They wield the Buster Sword, which is huge for them, but their tiny body means it's only about as big as a dagger for everyone else.
* Tag Dream, despite otherwise lovingly playing with all sorts of wrestling tropes, largely avoids use of in-universe kayfabe. Kaguya is the only exception, having converted into an enthusiastic wrestling fan, which actually causes problems midway through the comic when the staged event used to bring Mokou on her team fools the audience, unfamiliar with kayfabe, into thinking Reisen had actually betrayed the fan favorite Hourai team, to they point they actually try to attack her.
* Tager's (November 23rd) is Labor's Thanksgiving Day in Japan, and International Day to End Impunity worldwide.
* Tagesschau was first aired on NWDR in Germany on Boxing Day 1952 and went to being broadcast seven days a week in 1961. The programme now serves as ARD's flagship news brand and still occupies the same 20:00 time slot as it did in 1952.
* Tag Force 2 is... Jaden, using whatever deck you built for him. No special top deck hax, the not terribly good AI on his side, and those crappy, crappy E-Hero

cards he's forced to use leads to an easy win.
* Taggart (20+ years, longest running cop show on UK TV at the moment)
* Taggart, DC Stuart Fraser was at first presented as a young, naïve, slightly geeky junior officer with no overtly gay attributes whatsoever. It was only in his fourth episode, "Angel Eyes", that he was revealed to be gay.
* Taggart - featuring DCI Jim Taggart, partnered with first DS Peter Livingstone and then (as the better example) DS/DI Mike Jardine (although, the show did become more of an ensemble, in later seasons)
* Taggart had DS Michael Jardine and DS Jackie Reid, then DCI Jardine had DS Reid and DC Stuart Fraser. Currently DCI Matthew Burke, DI Reid and DI Robbie Ross have DS Mita Rahim.
* Taggart had its title character die off-screen following the death of the actor, Mark McManus. The show continued with the rest of the ensemble cast and notoriously ended up with more seasons without Taggart than with him.
* Taggart has a suspect described as being thirtyish, slightly balding, with greasy brown hair and wearing some old and "saggy arse" blue jeans. Taggart immediately counts four guys who meet that description just standing outside in the street.
* Taggart shove a young baker's hand in a pie making machine, amputating all his fingers.
* Taggart, the first victim's daughter notices that the killer knows something about the victim's house that he shouldn't proving that he is the killer. Instead of accepting his feeble explanation and going off to call the police, she continued to badger him with questions. Strangulation ensues.
* Taggart, the initial murders were committed by Detective Chief Superintendent Gordon, and unrelated to the main case.
* Taggart. The producer was so impressed by ideas he had for one scene he was in that he was later invited to come back and write whole episodes; he quickly became one of the most prolific writers after series creator Glenn Chandler.
* Tagg ends up starting the Keystone arc by taking Annoski's Keystone to the spot it needs to be for him to revive.
* Taggerung after he eats wild ramsons. Vallug Bowbeast jokes that his breath is so bad that he could climb into Redwall and knock out the guards just by breathing on them.
* Tagg has one following the Orre arc after drinking himself unconscious at Kat's wedding.
* Tagg's group in PMD-B hands over the letter stating the Hoennese royal family's claim to the Pokepanese throne to the Hoennese emperor in order to head off any wars of regional supremacy by powers who would view it as a threat.
* TAG has one of these built in as part of the general psychological warfare suite he is equipped with. It activates involuntarily, whenever he thinks he has complete power over someone (it doesn't really matter if they're in the room or not).
* (TAG), have the pilot's arms poking through the armour, using motion-capture to move the TAG's arms.
* Tagii is locked down and Tagon has Ennesby take control of the ship, he comments on the irony of what he said the last time Ennesby asked to be the shipmind.
* Tag is about an imaginary friend who was forgotten by his human and just wants to watch you (yes you) sleep because that's what "Molly" created him for.
* Tagline Shane Gooseman, are the most prominent examples), and were usually split into teams of two.
* Tag Line was "A Beast I Am, Lest A Beast I Become" — leeches had to allow themselves little atrocities like controlled blood-drinking to avoid being consumed entirely by the madness of their inner blood-hunger. However, while in the thrall of such a state, vampires can ignore wound penalties, which is a significant combat asset.
* Tag Line writing. Similarly, the message "Beware the swarm" is engraved into one of the rocks in the snowdrifts, which triggers a cutscene about the player seeing a vision, during which the text and the Bohrok symbol appear on screen.
* Tagma (plural tagmata) is a specialized grouping of multiple segments or metameres into a coherently functional morphological unit. The thorax of an insect,

which her father is named for, is an example of a tagma.
* Tagon's mercenaries have been legally commissioned to hunt and kill
* Tagon's Toughs are one group in a universe full of them. Notable in that they have an
* Tag Team and Grappler III, Stock made the actual stripping and tossing down motion even though she wasn't actually wearing one to show she wasn't going to tag out to Pistolero and didn't want Grappler to tag Melissa, to put a stop to their games.
* Tag Team and Savio Vega would take up the tactics of Tanaka and Fuji, respectively.
* Tag Team and Traci Brooks took the opportunity to tar and feather him.
* tag team as Dundee has shown himself to be an unapologetic racist in numerous shoot interviews since then.
* Tag Team as two former wrestlers who become cops: During the target practice portion of the Police Academy Ventura's character displays remarkable marksmanship skills; he mentions that he was a SEAL (as he is in Real Life)
* Tag Team "Better Than You". Among the many teams to take up this name after they broke up were Marti Belle and Jayme Jameson in 2014 at SHINE, usually shortening it to BTY.
* Tag Team. Chris Sabin at least found the larger pair more attractive.
* Tag Team doesn't rack up at least as many points as every preceding contest in the episode combined. If one squad performs poorly, or exceptionally, no amount of early game dominance can cushion it.
* Tag Team: Every tag team match ever, starting with Tiger Daula and Fazul Mohammed vs. Whiskers Savage and Milo Steinborn in Houston, TX on October 2, 1936 and continuing all the way to today. Mexican style parejas are less "tag" though, as simply exiting the ropes allows a partner to come in.
* tag team, has also made off hand comments about returning to the ring after giving birth.
* tag team in tow to stop Solo's return to solo matches and set the group's new brute on her.
* tag team is employed by more than one company at a time, leaving one building as heel tonight and tomorrow coming into another building a face. Especially common among those trying to make money at the independent level.
* Tag Team of herself as a big domineering brute, but she's not, and she's proved she's not for so long that fans tend to cheer out of nostalgia or sympathy and boo when Lennox screeches at her for screwing up.
* Tag Team, only Havok tends to do a lot worse than slap him when they have an argument since they are about the same size. Still, she usually ends up tenderly comforting him after knocking Callihan on his ass, and Callihan will fight back on the rare occasion they are actually booked in a match against one another.
* Tag Team opponents tried to protect her and adding to the whole thing was the referee ruling the disqualification in favor of the tecnicas, so they won anyway.
* tag team or there is some immediate difference everyone with sight can see.
* Tag Team's first single "Whoomp! (There It Is)" (which was also the first track from their first album) has the line "Tag Team back again".
* tag teams history. The Rock originally had a tolerable disdain but grew to respect and like Mick as time went on. Though the actual team-up was relatively short-lived, the two have since become kayfabe best friends. In fact, the first time the Rock returned to the ring after his semi-retirement in 2003 was to come to the aid of Mick against Evolution.
* tag teams. Jack Pferer is commonly credited if individuals are needed. This is significant because Pferer is otherwise a name usually brought up by people who want to talk about how much they despised him for his outlaw mudshows, among other things.
* Tag Team Suicide: Two people kill themselves because a failure to communicate causes them both to think the other has died.
* tag team title belt in Jersey All Pro Wrestling. But more than any championship gold, they really wanted Slyk himself, refusing to start what was their own title

shot unless Brown got in the ring first.
* Tag Team Title belts from Wes Brisco and Cassidy Riley, Andrews and Fives only just functioned, they still did not get along.
* Tag Team title belts held by Hanako Nakamori and Kyoko Kimura at JWP by shaking their respective hands but when Hana tried to shake Kyoko's she got blown off. Hanako, not knowing Kyoko's problem was, quickly shook DASH's hand as well before hurrying to her corner.
* Tag Team Turmoil — Two to four tag teams start in the ring wrestling under normal tag team rules to eliminate the others by pin fall or submission. Each time a team is eliminated, another comes in to take their place until no one is left. A common occurrence is that an evil authority figure will insert another previously unannounced team into the match once a winner has been determined between all the known participants.
* Tag Team Twins mooks at his club. After Yang attacks and wipes the floor with all the other henchmen, they gang up on and manage to hold their own significantly better than Junior's more other more generically dressed men.
* Tag Team, until they teamed up it was hard to talk about anything else Kendrick had ever done without mentioning that time he went streaking on live television. Not even Josh Matthews couldn't resist while interviewing him.
* Tag Team was not, standing at 5'10 and 6 even. Also, SHIMMER's third singles champion, Madison Eagles, stood at 6'1. That said, Busic and Cruise gave up on looking "cute" after Social started directing them, and Eagles when she became obsessed with the SHIMMER Championship belt.
* Tag Team while Baszler would later state multiple times in SHIMMER that she had been trying to duplicate her mixed martial arts career through pro wrestling...
* Tag Team who did not trust one another. So why keep tagging? Because in 2019 they started winning, and kept winning after beating Doom Patrol for WWC's tag title belts. Usually solely by individual merits, but win enough and you might associate something that happens to be around with your success too.
* Tag Team) who got plenty of mic time even though their promos were largely unintelligible gibberish? Check.
* Tag Team Wrestling in general has been seen as this, as McMahon sees that it is much more profitable to put two singles wrestlers together as a tag team than to bring in a single tag team and that the best use of a tag team is to find the next
* TAG: The Assassination Game, involves a game played on a college campus where the students playing the game are each assigned a target whom they then hunt down and "kill" with guns that shoot rubber darts. (The targets are free to defend themselves, naturally, and the winner of the game is the last "assassin" standing.) It's all fun and games until the game's obsessive current champion — who has gone undeafeated over the last five rounds of the game — goes on a homicidal rampage and starts hunting his competitors for real when his target — a clumsy, timid oaf who came in dead last over the same number of rounds — accidentally "kills" the champion when he drops his dart gun while panicked.
* TAG was a Filipino channel launched by ABS-CBN in 2016 which aired Filipino-dubbed Hollywood and Asian movies. Unfortunately, the channel
* Tag was the Ship AI, with a tactical focus. When given the chance to prevent extensive damage to the habitat, he
* Tahani and Jason, once again alive on Earth, get legally married so she can transfer half of her funds to his account
* Tahani was crushed to death after trying to knock down a golden statue of her sister who was always ridiculously better than her in every single conceivable way, while said sister was in the middle of a party to celebrate her induction into the Rock and Roll Hall of Fame.
* Tahtorak, it started wrecking the place, so they released the similarly giant Kanohi Dragon to fight it, which in turn lead to even more destruction.
* Tahtorak, Kanohi Dragon and Zivon too. And yes, some of them did clash and wreck cities at various times. You may also count the Ancient Sea Behemoth and the Kraawa, the latter of which is a
* Tahu characters of the same elements and species tend to have similar sounding

names; why are you asking?
* Tahu's commercial from 2001, showing him rebuilding himself slowly, and turning red upon putting his Kanohi on.
* Taíno Mythology (the indigenous people of the Caribbean islands)
* Taiatari. One pilot is known to have successfully downed three B-29 Superfortresses by ramming attacks.
* Taichi and Takuya manage to go from a headstrong leader to a levelheaded leader.
* Tai Chi is known these days as a slow, fluid exercise program, with careful movements, an emphasis on graceful actions, and a meditative practice. But it
* Tai(chi)/Sora shippers have a recurring habit of demonising Yamato/Matt by either portraying him as an unfaithful man to Sora, an abuser who attempts to beat up Sora just because she hung out with Tai a bit more often, or someone who prioritises other activities over his girlfriend to the point that Sora feels more closure in hanging out with Tai than Matt.
* Taichi tries to throw his life away to protect Zeromaru from the first ultimate/mega level opponent they have to fight in
* Tai Chi Zero, once, when Lu Chan is hit on his horn and his powers manifest, his eyes glow white.
* Tai Fu: Wrath of the Tiger falls under this trope, both friend and foe, including the title character himself. And that's a LOT of bare chests, considering that every character except one or two of them is male.
* Taiga Aisaka eventually fall in love, despite initially having first loves (Taiga liking Yuusaku and Ryuuji liking Minori).
* Taiga Aisaka is a corded microphone (connected to a speaker) swinging that hits the enemy a couple of times.
* Taiga Fujimura, of all people, is noted to be extremely skilled with a blade. She's nowhere near the level of a Servant (she challenges Saber at one point and is almost instantly defeated), but she is recognized as a world-class swordswoman (who, according to
* Taiga Hanaya fighting for revenge - the only thing he can do after he lost everything.
* Taiga Hanaya will bite back if someone tries to offer comfort after
* Taiho. It did relatively little immediate damage, aside from splitting open a tank of aviation fuel. All that heavy armor, designed to keep explosive shells out, also kept fuel vapor in. Six and a half hours later...
* Tai Huang-chun to his own master, asking him to kill the the Big Good with his own life as payment, and then planning to take on whoever survived the epic battle.
* Taiidan Empire the treaty forbidding them from using hyperspace technology ever again that they had broken), but some Kushan, the descendants of the Hiigarans, had survived, and would cause the collapse of the Taiidan Empire by killing the emperor in battle. On a smaller scale, the fleet that laid waste to Kharak met with much more opposition than expected and was forced to withdraw before destroying the sleeper pods in orbit. The Kushan mothership ended up catching up to the damaged fleet and obliterated it in retaliation for Kharak.
* Taiidani. A more "traditional" AI-controlled variant is what the Keepers are implied to be.
* Taiji, a town located in Higashimuro District, Wakayama, Japan, conducts an ongoing dolphin hunt off its coast (as made well-known in the 2009 documentary film,
* Taijin kyofusho, or social anxiety due to fear of appearing ugly or smelly, found in Japanese culture - a similar condition called
* Taiji Sawada gained brief wide notice but then imploded almost as quickly, only to gain appreciation after he died.
* Taiju is the equivalent of an endless stamina tank, able to take Tsukasa's punch
* Taijutsu in general. It's less showy or impressive than ninjutsu and genjutsu but when used effectively, it can be effective when one person runs out of chakra to perform the other two.
* Taikatalvi by Nightwish. It has a music box motif to it, but it is not particularly ominous.

* Taika Waititi's and Chris Hemsworth's wives, Chelsea Winstanley and Elsa Pataky.
* Taiko, but realistically, as common spies who are looked down upon by samurai.
* taiko drums and shouting "Bettora!" (in a reference to an ad for fish cakes). Pipimi tells her to stop making references to obscure regional TV ads. In the official English translation, she simply points out it's "Way too obscure a refeence."
* Taiko gets this when he asks Rie about her plan to have Runa pretend to be murdered during the first blackout.
* Taikomochi. The overlap in roles makes more sense when you realize that both require similar skillsets: quick thinking, an understanding of the situation, and the ability (and close relationship with their lord) necessary to speak truth to power.
* Taikongzhans), which are starting to show up in numbers in lesser toy stores in Asian third world countries. Whatever company they're from, they have the audacity to copy Hasbro's packaging and the toys bears enough resemblance to the real deal that the differences are unnoticable to the ignorant.
* Taiko No Tatsujin Clay Anime, Don plays a prank on Katsu by dropping a washtub on him. Similarly, Katsu drops a giant blackboard eraser on Don.
* Taiko no Tatsujin series had one U.S. release under the name "Taiko Drum Master". This U.S. version was later released in Japan as "Taiko no Tatsujin: Taiko Drum Master".
* Taiko no Tatsujin. The song titled “3Q-4U-AC00” came up from the song creator’s dream, about a Taiko arcade machine becomes alive and communicate to him.
* Taiko's fatal flaw is his tendency to let his friendship with Kotoba cloud his judgment. To his credit, he doesn't hesitate to call Kotoba out when he takes his perverted antics too far, but he's also initially unwilling to believe that
* Taiko skips over decades at a time, with the story beginning in 1536 and ending in 1583.
* Tailchaser is the only known survivor out of his family. His mother and siblings disappeared one day and are presumed dead.
* Tailchaser's Song about how the first human was an exiled cat who was deformed by a demi-god due to his cocky behavior.
* Tailchaser's Song about things like where humans came from (they're deformed cats cursed to act as servants for the superior cats for all eternity) and why dogs hate cats (a trickster cat once shamed a dog king). This all seems to be true because several of the legendary characters, such as the mystical Tangaloor Firefoot and his evil brother Grizraz Hearteater, are actual cats who the main characters meet.
* Tailchaser's Song and happily running down the hills. It's mentioned that he wants to see Pouncequick and Roofshadow again, as well as go back to his clan and tell them about his adventure, but it's unknown what he'll do first.
* Tailchaser's Song, and Hushpad is around Tailchaser's age. Everyone else is unclear.
* Tailchaser's Song and is the equivalent of "droppings". Despite this, it's only ever used as the equivalent of "shit". The Clawguard is especially fond of using it as an insult towards their slaves.
* Tailchaser's Song are hairless cats with folds of skin where their eyes should be. Pouncequick compares them to large, deformed newborns.
* Tailchaser's Song came out in the 1980s, domestic cats were seen as solitary animals who only sometimes live in clowders. This is why it gets repeatedly mentioned that it's uncomfortable and unnatural for cats to be in large groups for long periods of time. Since then, research has shown that cats are more social than previously thought.
* Tailchaser's Song. Cats (or "the Folk" as they call themselves) have their own language and culture. Though most of their language is "translated" in the book, a number of their terms and words are not. Female cat are "fela", squirrels are "rikchikchik", humans are referred to as both "m'an" (meaning "out of the sunshine") and the "Big Ones", dogs are "growlers", rodents (and rodent-like animals) are "squeakers", birds are "fla-fa'az", evening is "Unfolding Dark", etc.

* Tailchaser's Song). Eventually this gets to be too much and Tailchaser leaves Hushpad and her owners.
* Tailchaser's Song had named Fever. Fever died of cancer a few years before the book was published. Tailchaser, the protagonist of the book, is also an orange tomcat.
* Tailchaser's Song. His brother, Viror Whitewind, stopped it but died in the process. Their other brother, Tangaloor Firefoot, trapped Grizraz underneath a tree. After resurfacing later, Grizaz was blinded by the sun and dug a hole into the Earth, where it is said he still remains.
* Tailchaser's Song: Howlsong looks like a larger and glossier-furred version of Tailchaser's friend Thinbone.
* Tailchaser's Song: Instead of evening, morning, afternoon, etc cats have different Hours: "(Hour of) Stretching Sun", "(Hour of) Unfolding Dark", "(Hour of) Deepest Quiet", "(Hour of) Final Dancing", etc. Summer is referred to "Hour of the Smaller Shadows", but other seasons aren't named. A month is measured in moons and is referred to as an "Eye" (as in Meercat Allmother's, their God's, eye, which they believe the moon to be). The moon cycles are referred to as the eye "shutting" and "opening".
* Tailchaser's Song is a map of "Tailchaser's World", showing a map of the area the book covers.
* Tailchaser's Song is from the POV of a feral kitten as he goes on an adventure to figure out the cat disappearances in his area. Humans (or "Big Ones" as they're called) are few and far between and are little more than background scenery. Cats see them as their servants.
* Tailchaser's Song is molded from the dead and dying bodies of hundreds of small animals.
* Tailchaser's Song. It does a pretty good job of conveying the alien viewpoint, including sense of smell and view of humans.
* Tailchaser's Song. Later on, prey animals begin deserting areas. When the apocalypse starts nearing closer, very weird things start happening. Mothers give birth to deformed and sickly kittens, lights start appearing in the skies, and random distant cries can be heard. When Blind Night (an eclipse) nears, the moon opens its Eye sooner than expected and turns blood red.
* Tailchaser's Song — the simple Heart Name, given at birth, becomes reserved for lovers, friends and family, while the grandiose and descriptive Face Name, given later after the cat has grown enough for their personality to become evident, is the one used in everyday conversation. For example, the main character, Fritti Tailchaser, is Fritti to his family and to a very small number of other characters he tells that name to, and Tailchaser to everyone else. The Tail Name is not given — each cat must discover it by themselves — and none are revealed in the book.
* Tailchaser's Song revolve around this. They live underground and are only able to come out at night, because the sun burns them. Their plan is to destroy the sun. For most of the book they're built up as terrifying, unknown monsters, but they're seen clearly for the first time when they attack and kidnap Tailchaser and his friends in the middle of the night. They nearly kill them and then force Tailchaser into slavery, building tunnels in the darkness for Hearteater (though cats having good night vision means that they're not in complete darkness).
* Tailchaser's Song's, eye). The moon cycles are referred to as the eye "shutting" and "opening", thus "tomorrow night" is instead "eye-next".
* Tailchaser's Song, Tailchaser is asked if he's 6 months old yet. He sheepishly mentions he's turning 9 months soon. In human terms, this is essentially equivalent to mistaking a 17 year old for a 12 year old.
* Tailchaser's Song that cats have. He has legions of evil cats that live under the earth wih him and do his bidding.
* Tail Concerto in particular even featured artwork by several popular furry artists as in-game visuals.
* Tail Concerto in the sky, populated by dog-people and cat-people. While they mostly act like humans, the dogs are prone to chewing on bones and their national

pastime seems to be frisbee-catching.
* Tailfin Walking: A cetacean, fish, or pinniped walking upright on its tailfins.
* Tailfin Walking anyways. They did throw in a bit of accuracy by having King Snorky's mouth not sync when he speaks, referencing to the fact dolphins use their blowholes for communication since they cannot breathe through their mouths.
* Tailfin Walking: Fish and whales are depicted as walking on their tailfins.
* Tail of the Moon and anything else by Rinko Ueda features female leads who are just tall enough to sniff their lovers' armpits. This author routinely changes her character's height by several inches — or even feet — in order to facilitate a romantic pose.
* Tailor-Made Partner: other minority character to ever appear on the show.
* Tailor-Made Prison: A prison cell that is specially designed to contain a single specific person who cannot be locked up by any normal means.
* Tailor-Made Prison: A prison designed to contain a specific character, often accounting for their weakness.
* Tailor-Made Prison: A prison made specially to hold an individual a normal prison cannot. Frequently fails anyway.
* Tailor-Made Prison for Earthbenders in the middle of the ocean, and the other side of the bars only leads to a sheer drop down to the sea. Any prisoner who got through the bars and did not have a flying bison would only have a watery grave awaiting them.
* Tailor-Made Prison having been moved out of the Bastille to a lunatic asylum ten days earlier; de Sade is himself an example of easy treatment, being a high-ranking noble imprisoned for sodomy and poisoning, and was allowed many luxuries befitting his status—he was moved to the asylum for having yelled to a crowd outside the prison on 2 July that the government was killing prisoners in the Bastille when in fact it was not)). Some even rose to high positions in the government after their release, so the wardens were extra careful on how to treat prisoners who could one day become their immediate superiors.
* Tailor-Made Prison, since the Master's really anxious to get out of there.
* Tails calls Sally and Bunnie "Aunt Sally" and "Aunt Bunnie". The former more than the latter.
* Tails can carry Sonic for quite a distance, considering he's half his size and flies by whirling his tails like a helicopter. Same case goes for him carrying other Sonic characters such as Amy.
* Tails' father and dr. Quack wears one of those too. Both of them lost one of their eyes in the Great War against the overlanders.
* Tails' friendship with Sonic had been left rather rocky since the latter dated Fiona. After getting embroiled in his parents' warring with the Acorns, Sonic attempts to help keep them incarcerated. When called out over his loyalties to Tails, he gloats he's close enough with him that it will pass. Tails, who was secretly helping his parents and overheard, finally snaps and attempts to beat the living daylights out of Sonic, laying out all their previous hardships to him while doing so.
* Tails From The Mynarski Forest. After a reader commented that a fox seemed unlikely to use "embleer" as a swear (see above), the writer responded that it might be akin to saying "Sweet Jesus".
* Tails Gets Trolled: A running gag is that Rob "The Guy With No Ears" is told massive amounts of expository dump but can't hear because...he has no ears.
* Tails Gets Trolled were all huge part of the comic's identity and entertainment value.
* Tails has a dream reminiscing his first meeting with Sonic, in which Tails is shown wandering a jungle. Even though the flashback is supposed to take place in
* "Tailsko," a female version of Tails, is likewise a popular subject for
* tail slipping through one of the manacles he'd been wearing in his human form. Unless he'd been wearing the manacles clamped around his coccyx, his tail had no business being inside one, in the first place.
* Tails' Nightmare 2's fourth area, you are chased by a boulder made out of flesh.
* Tails of Fame all have foul breath, which multiple characters openly say to their

faces. Rast in particular, cannot even kiss someone because his breath stinks of cheese and garlic.
* Tails of Fame has Lamson, who is openly gay but never displays any stereotypical gay traits or mannerisms.
* Tails of Fame has Seamus Osgranov, who slaughters his entire organization so he won't have to share his profits with them.
* Tails of Fame he didn't feel like cleaning up his corpse from within his apartment.
* Tails of Fame. He later steals twenty dollars from a homeless person just because he felt like it.
* Tails of Fame, Rast pisses his pants after he's nearly shot to death by Doug.
* Tails of Fame: Rast Racklyn's first two victims are a pair of pranksters who filmed him having sex with them and later humiliated him by leaking the video online and showing the video across their college campus. No one's remotely concerned about their disappearance even a month after they're murdered.
* Tails of Fame. Rast turns to a life of crime in order to get famous, but the story shows that everything he does is horrific, absolutely nothing he does is justified, and he only cares about himself and his ego.
* Tails of Fame wets his pants after Douglas nearly kills him in chapter 4.
* Tails of Lanschilandia gives us Lanschi and King Lanschi, who are not the same person and presumably not related. There's also Lanschi's brother Panschi.
* Tails of Lanschilandia is an obese duck who doesn't seem to do very much other than sit on his throne, though he apparently has a "royal trampoline" to bounce on.
* Tails of the Bounty Hunter: Boris Trovmar was involved in various embezzlement schemes and even sexually harassed multiple women. No one's even slightly upset when Milz Dillvor assassinates him.
* Tails of the Bounty Hunter by hurling his body onto another building. He puts so much stress on his bowels during the chase that he ends up shitting himself.
* Tails of the Bounty Hunter: Cale Tomlik's right arm is made of metal and has false fur and flesh covering it. It's also mentioned in chapter 5 that many residents in LynKaster City also have cybernetic limbs.
* Tails of the Bounty Hunter has Cale's partner Stollar, who seems to only wear a pair of pants wherever he goes.
* Tails of the Bounty Hunter has Cale Tomlik fighting off two hitmen in his hotel room in chapter 5 while he's completely naked.
* Tails of the Bounty Hunter has Cale tomlik, whom multiple people have said has got bad breath due to his rotting gums.
* Tails of the Bounty Hunter has Milz Dillvor, an assassin who cares about her best friend's well-being and even surrenders herself to Cale Tomlik just to save her. And when Cale allows her to have a phone call before heading to prison, she immediately calls her parents and warns them to go into hiding so her employers won't kill them for her failure.
* Tails of the Bounty Hunter in chapter 10. The only reason why he stops is because someone interrupted him and he nearly got caught pulling Stollar's pants down.
* Tails of the Bounty Hunter. One of Gobor's own men is disgusting by this, and Cale calls out Gobor on how childishly petty he's being.
* Tails of the Bounty Hunter so he can sell them to be used as weapons.
* Tails of the Bounty Hunter tries to beg for Douglas Kevro not to kill him. But after he realizes nothing he says will stop Doug from killing him, he smiles and calmly tells him "Do what you have to," and Doug promptly slashes his throat.
* Tails of the Bounty Hunter who doesn't mind breaking the law and occasionally causes collateral damage while he's trying to apprehend his targets.
* Tails of the Bounty Hunter, who raped his entire football team as a teenager and later began to rape civilians indiscriminately when he got older.
* Tails of the Old Republic Considering the hell he goes through, sometimes it's all that keeps him alive.
* Tails of the Space Gladiators centers around this. The entire cast consists of convicts who have to fight in galactic fights and tournaments both for entertainment, and for a chance to shave off time from their prison sentence.

* Tails of the Space Gladiators has explosive collars that all the prisoners within the Gladiator Detention Facility wear. Should anyone disobey too many rules, wander into restricted areas, or attempt to harm anyone outside of the gladiator tournaments, the collars will explode.
* Tails of the Space Gladiators has Ralousha Gorgonozz. Ralousha is a klakroshan, a reptilian alien race that has long snouts but no eyes on their faces.
* Tails of the Space Gladiators him to either give him some space or to eat breath mints after David gets blasted by Unklok's rancid breath.
* Tails of the Space Gladiators mainly focuses on a human being named David Errgash trying to survive in an alien-populated intergalactic prison where the convicts have to fight as gladiators to earn their freedom.
* Tails of the Space Gladiators thirty-two people throughout his life.
* Tails of Wasps ending soliloquy, the audience exits the hotel room to find that Judith, the hooker who robbed him at knife point, is passed out in the hallway.
* Tails Prevails", Professor Von Schlemmer invents a machine that could potentially defeat Dr. Robotnik and needs Tails' help to finish it, so Robotnik plans to manipulate Tails into sabotaging the machine and declares that he'll make Tails cooperate of his own free will, even if he has to force him.
* tails protective of them, and the pokedex implies that they hold 'a secret'. A popular theory is that the squinty eyes on their face aren't eyes at all.
* Tails. Rouge flirting with him confuses him and makes him think (correctly) that she has an ulterior motive.
* Tails Series has the Intergalactic Police Association, or the I.G.P.A. It's more or less an interstellar version of Interpol, considering agents within the organization can bypass certain jurisdictions and regulations regardless of what planet they're on.
* Tails Series has very few heroes in it. Most of the characters are morally shady anti-heroes and fall on the gray side of the scale, or they're a self-serving bystander of some kind. The villains, meanwhile, are rapists, terrorists, murderers, sociopathic mercenaries, cartel leaders, blood knights, etc.
* Tails Series that something happened to Earth that resulted in the planet being destroyed or otherwise uninhabitable. Hardly anyone seems to care, as the series mostly focuses on the various alien races populating the galaxies. The humans still left seem complacent with the fact that their home planet was destroyed centuries ago and have adjusted to living among aliens.
* Tails' Skypatrol title) started out development for an unknown cancelled handheld similar to a Game Boy.
* Tailsteak on the stinger to his hypothetical movie; said stinger consists of him in person saying a wall of swear words to boost the movie's rating up from PG to PG-13.
* Tailsteak's is composed of Paul Henderson, Brian Smith the willowy übergeek, Brian Smith the hulking drummer, and Tyler, the alien/demon/squid. Neither Smith ever reveals his middle name or answers to a nickname, having sworn a "blood oath" to that effect.
* tails (that one does not form images though, but responds vigorously to a passing shadow).
* Tails the douche, Tails corrects Knuckles after he introduces himself as an echidna, telling him that it is pronounced "arachnid".
* Tai Lung cops a tree in the face when Po uses this technique against him once they've fallen to the bottom of the temple steps.
* Tai Lung in particular REALLY underestimates Po. About a minute later, Po actually
* Tai Lung was treated like a son by Shifu before the former betrayed his foster father's principles in his pursuit of power. Tigress and Shifu had a similar relationship, although Shifu was relatively cold to her because of his falling out with Tai Lung. At least Tigress got to turn that around with Po's help.
* Tai Lung, when the latter appears before him after a flash of lightning on the steps of the temple.
* Tail Weapon enough, but it's not necessary. Note: some tail weapons are natural

and thus not at all unusual.
* Taina its highest ratings in three years, it was cancelled because network execs believed it only appealed to girls.
* tainted blood, rather than a genetic condition; the first tieflings were the result of normal humans undergoing an infernal ritual, rather than interbreeding with demons.
* Tainted by the Preview: Opinions on an upcoming work are soured by a preview giving a bad impression of what the work will be like.
* Tainted by the Preview: The audience doesn't get a good first impression of the work before it is released.
* Tainted Eve has this as her gimmick: after shooting for a while, her health is turned into blood clots that shoot alongside with her, giving her extra firepower and they can absorb some hits, but it makes her easier to kill. She also comes with the Sumptorium item, which she can use to reabsorb all the blood clots back into health (assuming they weren't killed).
* "Tainted Love", often thought of as a song about AIDS, first came out in 1964. Ed Cobb wrote and Gloria Jones sang the original version. (Thank you,
* tainted the public's perception of him in other media as well (hence why he also gets his own mention in the comics section).
* Tainted Veins: Someone with a serious and/or weird disease has more veins visible than would be normal.
* "'T ain't funny, McGee!" (reference to the character Molly, addressing McGee in
* Taint is the result of Earth’s power being depleted due to the industrial overuse of Elemental Bestia and is used by the Demon King to turn all other creatures against humanity, which is likely why humans don’t survive to demonhood.
* Taio Cruz dominated 2010 with the one-two punch of "Break Your Heart," which shot to the top of the charts in a heartbeat, and "Dynamite," one of the best-selling digital songs of all time. After that, he had a minor hit with "Higher" and then, nothing.
* Taio Cruz hit the top with "Break Your Heart" in 2010. Follow-up "Dynamite" peaked at #2, but proved to have a much longer life and eventually sold a lot more than "Break Your Heart" did.
* Tai often complains that of all the attractive lady friends Marten has, he's dating the only one who is into girls.
* Tai Pan, Dirk Struan and Jeff Cooper manage to set one up. Impressive since they are the only ones involved.
* Tai Pan has one character tell the Tai-pan that she "worships" him. Since he's a devout (if unconventional) Christian, he tells her not to say such things.
* Tai Pan is a self-made man who started out as a cabin boy under a tyrannical captain. When he becomes a ship owner, he pays wages on the day, in silver, and equips his ships with the best of everything. He has also banned all forms of punishment on board his ships other than blacklisting, i.e. if you screw up, you are dropped of on the pier the next time the ship makes port, and will never sail on a Struan ship again. Sailors fight for the chance to work aboard one of his ships.
* Tai Pan who makes an extremely good living by prostituting herself to an exclusively Chinese clientèle.
* Taiping rebels in particular were known as cháng máo "long-hairs" for their habit of growing out their queue hairstyles in defiance off Qing laws.
* Tairen Soul about a man she recognizes as Rain (her present-day lover) even though he looks different and has a different name. And the dreams are set several thousand years ago, before either of them were even born. (Typically for the trope, Ellysetta and Rain are canonically soulmates.)
* Tairen Soul books, the Fey are so self-righteous and brash that the "evil/stupid" humans are on the verge of cancelling their alliance. The strange thing is that the author is completely with the Fey on that. The author seems to think it is their natural right to be arrogant. The "good" humans are the ones who don't take offense at being treated with condescension.

* Tairen Soul, Ellie is surrounded by handsome men who swear they'll die to do her bidding. They (officially) don't want to be together or sleep with her, however.
* Tairen Soul, he theorizes that the guy is marked out to lead one of the former.
* Tairen Soul human woman who gives him catharsis and finds it difficult to adjust to Fey politics. One of the ways Rain courts her is by playing with her little sisters.
* Tairen Soul series bond this way. As the breeding of girl children depends on the mindlink and the probability of one forming between any two given individuals is low, there always is a serious skew in the sex distribution. This is "compensated" by the men killing themselves after so many centuries if they don't form a mindlink.
* Tairen Soul." The magic was just because he didn't want them to be interrupted by the understandably panicked crowd around them.
* Taisho Baseball Girls is rated TV-PG on DVD, but TV-14 on Anime Network.
* "Taishou" ("General") seems to be a common nickname for bullies in anime, as the bully character in the classic magical girl series
* Taishou isn't as extreme (no pun intended) as Buchi, but when he was in first grade, he always wanted to be close to Amanuma because he looked up to him back then and he thought he was cool. However Amanuma was basically great at everything in school unlike Taishou who was an average student at best. Because of that, Amanuma would bully and even torture Taishou a lot. Eventually it got so bad that Taishou had to transfer to a new school to get away from Amanuma's cruelty.
* TaishoXAlice, it stands to reason that miss Heroine is our prince character.
* Taisteluplaneetta Galactica ("Battle planet Galactica") which makes no sense whatsoever.
* Tais Teng centers on a man who has been traveling through time randomly, and is accidentally followed by a brother and sister who become his companions. Somehow, people from different periods also react with hostility towards any time travelers since they're foreign to that time.
* Tais Teng for eternal life, which he granted him by periodically casting the Emperor into new host bodies. However, during the most recent transference, something messed up the ritual, and the Emperor becomes trapped inside the mind of the main character. The sorcerer then tracks him down while intending to use him as the new host.
* Tais Teng that fulfills any wish you write in it, and writing, just for fun, "The Sun goes out."
* Tais Toi, smart criminal Ruby plots an elaborate escape from a mental institution, only to be sprung involuntarily by Quentin, an incredibly dumb bank robber.
* Taitofan in the fandom. She's admitted on numerous occasions that it's a fetish of hers.
* Taito, pretty much the only thing women do is scream and flee the scene.
* Taito, which has a wave motion gun that can be charged by collection small power ups called newalones.
* Taiwan. According to a NATO Review, only six of the 28 members of NATO have a greater percentage of women in their ranks than the Taiwanese Armed Forces, and only three nations actually have more women in uniform than Taiwan does. This may have something to do with the fact that the ROC Military relies on conscription of men only, and women must join the better-treated and better-paid officer corps.
* Taiwan also has many prices ending in 8, and the occasional 80 or even 88, also most likely because 8 is lucky in Taiwan as well.
* Taiwan and China also use the lunar calendar for the main holidays. They're adjusted to the solar calendar so Chinese New Year always falls at the end of January/February, Dragon Boat Festival some time in June, and Mid-Autumn Festival near the end of September.
* Taiwan) and that a Presidential candidate shot himself (non-fatally, of course) to garner sympathy votes and could get away with it because of the country's desensitization to political violence.
* Taiwan boasted two oddly-named versions, which operated at the same time: (1)

the General Department of Political Warfare, which maintained both political officers and general high-ranking commanders in every military unit, down to the company or battery level, as well as in many police units — and (2) the Taiwan Garrison Command, commanded by a three-star general, which acted to suppress political activism and ensure political orthodoxy, and was tied to various unsavory political murders or assassinations, and kept a hand in influencing society, economics, culture and education. These were the descendants of secret police organizations in pre-1949 China, in which the present Taiwan has institutional continuity with-the Central Bureau of Investigation and Statistics, and the Military Bureau of Investigation and Statistics. It also showed some influence from the Russian system of political commissars.
* Taiwan Civil Society, who claim that Taiwan is, legally U.S. Territory as it was never (technically) turned over to official Chinese control by the Treaty of San Francisco (the final peace treaty that marked the end of the war against Japan), nor was it turned over subsequently by any American government in any legal agreement, thus, they contend, Taiwan is still legally under military occupation by the U.S. (as the principal occupying power, with the Republic of China as a subordinate occupying power), with the Republic of China (which fled to the Island in 1949) essentially a government in exile. The PRC rejects this argument as they weren't a party to the Treaty of San Francisco and thus said treaty is non-binding to them.
* Taiwanese-Canadian actor Godfrey Gao collapsed from cardiac arrest while filming a sequence for the Chinese sports-reality show
* Taiwanese general entertainment channel JET TV or Japan Entertainment Television had a Philippine feed that usually aired
* Taiwanese news outlet NMA got famous for doing relatively straight, 3D-animated re-enactions of events, such as Tiger Woods's car crash, the JetBlue flight attendant who opened up the emergency slide on the plane, and a cartoonish representation of the fight over
* Taiwanese Series, is two strangers getting drunk, getting married, and falling in love.
* Taiwan gets her profile in the fourth manga volume ("An island girl nation with a headstrong and easygoing personality!") She shows it via cheering up Vietnam, teasing her brothers, and interacting with all of them as an equal. "It's okay, us Taiwanese don't believe in bad fortunes!" It's confirmed by her
* Taiwan had been a potential target of American annexation for a small period of time during the Qing dynasty era. Two American diplomats recommended that the U.S. annex Taiwan (then commonly known as Formosa) from Qing Dynasty China, mostly because it was believed that the British were also interested in the island, but the idea was rejected rather firmly by the American government. Commodore Matthew C. Perry, during his second voyage to open Japan in 1854, landed in Keelung, a major port on Taiwan. In his reports back to the government, Perry encouraged the annexation of Taiwan in order to use it as a coaling port, and because of its usefulness in countering European monopolization of the trade routes. The U.S. failed to respond to his proposal to claim sovereignty over Formosa. Ironically enough, there is a small contingent of people on Taiwan today, represented mostly by the
* Taiwan has the longest of any known country, which seems to fit with her being the only girl with one.
* Taiwan is changing from a conscription-based system to a professional volunteer army. As of 2020, they keep having to postpone it because of lack of people willing to enlist. This resulted in a four-month long draft, where draftees were not allowed to handle weapons for fear they might get hurt.
* Taiwan is this to China in a Drama CD, where they have a rather... weird interaction (She lectures him for being
* Taiwan Strait Lee's popularity in the 1996 election and gave him an outright majority in the polls as opposed to a mere plurality. China has since learned its lesson and hasn't tried anything so radical in subsequent Taiwanese elections.
* Tai Wei and his son Run Yu can both turn into dragons, while his other son Xu

Feng turns into a phoenix instead.
* Taiyang's caring, serious paternal instincts in the main show are downplayed to over-emphasise his terrible pun-based "dad jokes", making him an
* Taiyang to Jaune, twice. First, Taiyang interrogates Jaune on various hypothetical scenarios, such as what he'd do if Yang got pregnant. Then Jaune accidentally agrees to let Taiyang sleep in his dorm room, which gives Tai more time to sweat him. Jaune is mostly unconcerned through all this, as he and Yang have just started dating and he's done nothing wrong. The second time, he's significantly more worried, since Jaune has
* Taiyo Ni Hoero. In the sequel series, it's mentioned that his character was promoted and reassigned to a new precinct.
* Taiyou Sentai Sun Vulcan) was arrested in 2013 for sexually assaulting a high school girl he met on the Internet and taking pictures of the incident with his phone, which constitutes as production of child pornography.
* Taiyou's Sphinx shows their new line formation during their match with Hakushu's Dinosaurs that make them a great offensive and defensive team before the Dinosaurs have Gaou (strongest highschooler/possibly man in Japan) send them all to the hospital. Again in the manga Gaou crushes the line in the first play because he didn't suddenly stop existing for the first minutes of the match.
* Taizan relies on Miracle Draw, which inflicts 1000 damage to his opponent each time he correctly guesses what card he will draw, and 1000 damage to himself if he guesses wrong. He trained to "draw better" by dropping out of school and pulling cards out of a waterfall,
* Tajel is a Stanford International Student, but it's never made clear where she actually came from. Her ancestry was finally revealed during her wedding day strip: an English father and an Indian mother.
* Taj Mahal (largest onion dome turns upside down, spins like a top, and bumps into the other parts of the building)
* T. A Jonestown survivor even unwittingly describes this trope in a documentary interview:
* Tak 2: The Staff of Dreams has the power parasites. They are cutesy in appearance and they sabotage JB's Planetarium by leaving large gunk.
* Tak accidentally creating and losing control of a storm that threatens her and the city is to sit back and watch it play out, as it only benefits him whatever happens, ordering GIR to bring him some popcorn to enjoy it with.
* Takada's abduction in the manga. In the anime he instead points a semi-automatic pistol at him.
* Takagi and Sato, so many times. The first time, when both were in emotional moods after a case where Takagi almost dies and Sato is reminded of
* Takagi and Satou have also pretended to date on a few occasions to tail a suspect (Takagi couldn't enjoy their time together at all because Satou is pretty damn scary when in Work Mode).
* Takagi himself also does this the first time Miyoshi talks about them getting married, in Volume 2.
* Takahama goes before Sasaki, the editor in chief of Shonen Jump to ask to get a new editor because he believes that his editor, Miura, won't let him draw what he wants. Sasaki responds that saying that is the same as admitting his own lack of talent, and that no artists, whether veterans or rookies, can change editors. He suggests that Takahama go elsewhere if he's dissatisfied, but Takahama, chastened, withdraws his request and apologizes. Mashiro and Takagi note that what the editor said was harsh, but he had a point and they should stop blaming Miura.
* Takahashi-Sensei wrote a short story in the early 1970's (with many of the plot elements later ending up in
* Takahata is unable to cast spells but still manages to be badass within a society of mages with his
* Takamachi Nanoha Of 2814, a 16887 means "Illegal disposal of a disposable pre-packaged beverage vessel by attempted forced ingestion into an endangered species of carnivorous luminescent crystal fungus" in the Green Lantern Handbook. Nanoha appears to have memorized all the codes - and is strongly implied to be the only

Lantern presently in the Corps to have read the thing cover to cover.
* Takamachi Nanoha Of 2814. Rumors soon spread that their relationship is less than appropriate. Lex Luthor naturally has a field day with this.
* Takamachi Nanoha Of 2814 so horrifies the rest of the inmates (apart from Harley, who had no previous experience with her) that they fall to their knees and start praying... to Batman.
* Takamachi Nanoha Of 2814, Superman loses a fight to Vita due to his weakness to magic. Everybody makes fun of him, even Batman.
* Takamachi Nanoha Of 2814, they are sentenced to fill out all the paperwork connected to the various crimes they committed. In triplicate.
* Takamachi Nanoha Of 2814: Tuxedo Kamen's cape, which can also function as a weapon.
* Takamachi Nanoha Of 2814: When Chrono showed up on the scene he tried to assert himself as an official of the Time Space Administration Bureau but Nanoha, as the local offical of the Green Lantern Corps, put a quick end to that.
* Takamagahara Baronh went through since it was first invented in-universe.
* Takama-ga-hara is so bad at creating manga that it makes people who read it physically ill.
* TAKA Michinoku: Continued to be a mainstay in NJPW, NOAH, and KAIENTAI.
* Takamichi's master Gateau Kagura von Vandenburg and Nagi's master Filius Zect of
* Takamichi Takahata is always seen with his suit and tie even when out on missions. He got the habit from his master, Gateau Kagura Vandenberg.
* Takamichi Takahata seems to fill this position in the early chapters, but the position eventually gets passed to
* Takamura, however, is unquestionably this. Takamura was a nearly-invincible badass even before he learned to box, but after learning, he's utterly dominated his competition (although he's had some very close fights). It's even his goal to conquer every single weight division, and he's already completed two (Junior Middleweight and Middleweight, in which he even unified the WBA and WBC belts).
* Tak and the Power of Juju and got two games based loosely off the cartoon.
* Tak and the Power of Juju had the chief of the tribe act like a monkey under a voodoo curse.
* Tak and the Power of Juju is collecting Lok's Soul Balloon so he can be resurrected. He's all squeezed up in there; tough balloon.
* Takano does this, on purpose or not, with Rena and Shion when she lends them her notebook which only causes them to fuel their paranoia.
* Takanuva's dark-gold and white color scheme was replaced with all-gold.
* Takara later retconned Cybertron back into being a sequel to Arm/Ene. This doesn't eliminate the snarl due to the Galaxy Force characters, who were different folks in Japan, having different names even if they have the same jobs and head designs, as well as incompatible histories for the ones with the same names
* Takara Tomy, of Tomica fame is no exception, they created a pull back BB tank series known as WAR2 (now discontinued), as well as JSDF Type 90 tank for Tomica Premium.
* Takarazuka and Toho) have Japanese actors playing Austrians/Italians/Germans. Ditto with the South Korean versions.
* Takarazuka Revue (愛称): "pet name," "nickname," or "term of endearment". This is a confusing aspect of Takarazuka fandom and may take a while to get used to, as often their nicknames sound nothing like their stage names. The nicknames can be based on the actresses' real names, some quirk of their personality, or incidents behind the scenes. The actresses refer to each other using the nicknames on a daily basis, even in interviews.
* Takarazuka Revue (日本物), meaning literally "Japanese thing".
* Takarazuka Revue actresses - while still working with the revue - to behave according to their assigned gender in public (clothing, mannerisms, etc.) in order not to "break the fantasy", so to speak. Their conduct must align with the company motto of "Pure, proper, beautiful" - nothing scandalous. This expires once the contract is over.
* Takarazuka Revue actress, is nicknamed Tani because of her birth name, Kaoru

Tanioka.
* Takarazuka Revue and/or personal trauma) have also found a home in Zuka's choreography of intimacy between characters regardless of orientation. (Zuka actresses are technically not allowed to have their lips touch during kissing scenes, but accidents do happen.)
* Takarazuka Revue. Death and young Rudolf's scenes can be interpreted in light of their future selves' relationship.
* Takarazuka Revue fandom does a lot of this. Apparently wanting two actresses to get it on doesn't figure into said fandom's long, long list of things that are disrespectful, as long as you don't use vulgar language while you're at it.
* Takarazuka Revue Grand Theater in 1954, actress Hiromi Kazuki's costume was caught in the mechanics of the lift following the end of a scene and an upcoming quick change for the next scene. She was wearing an underskirt with a metal band about the waist, and when her costume became stuck she was unable to free herself. Her feet were dragged into the moving mechanism and the metal band cut into her torso, killing her.
* Takarazuka Revue has Ronan being whipped during his interrogation and incarceration in the Bastille.
* Takarazuka Revue in public, leading to many actresses being mistaken for men while out in public. Some amusing incidents include:
* Takarazuka Revue in the case of characters who are young children (or their child selves), given that the bottom of the age requirement to join the Revue's two-year training program is 15.
* Takarazuka Revue may refer to a troupe during a certain top star's tenure as "top star's nickname + -gumi". For example, the members of Moon Troupe while Tamaki Ryou (Tama) was top star can be called "Tamagumi". The troupes themselves are referred to interchangably in the English fandom with their actual English and Romaji names: Moon Troupe/Tsukigumi, Snow Troupe/Yukigumi, Flower Troupe/Hanagumi, Star Troupe/Hoshigumi, and Cosmos Troupe/Soragumi.
* Takarazuka Revue productions are generally melodramatic, lavish, and more stylized than what a Western audience might be used to. This is especially evident when comparing original productions with Takarazuka adaptations — acting, makeup, costume, sets, everything Zuka must be high-budget and often sparkly. The impression that a Takarazuka production ideally should make on the audience is that it is in its own "World of Dreams", separate from reality altogether. The actresses play highly idealized concepts of "men" and "women" as well, extending to their offstage gender presentation.
* Takarazuka Revue production sells milk baths themed after Elisabeth. The titular character is derided and hated in the show for taking baths in milk to maintain her beauty, while the people are dying and suffering from lack of milk.
* Takarazuka Revue (well, they called her Leona, but if it walks like a Lana and quacks like a Lana...), a character who appears in only one case (albeit a fairly long one) and doesn't have any particular history or chemistry with Phoenix.
* Takarazuka Revue (Zuka actresses, lit. "students") are considered normal, the founder believes that the fans should grow out of said crushes and the actresses should go on to be "good wives and wise mothers" after their graduation from the Revue.
* Takashi Aoyagi, Mickey's Japanese voice actor from 1991-2018, is a scholar of Japanese literature. How exactly he wound up in the role is unknown, but it's presumed he just happened to be there as he is a Chiba Prefecture native, and
* Takashi Iizuka's explanation for the lack of humans in certain games, such as
* Takashi Kawamura considers himself the burden of the Seigaku team, yet can fight
* Takashi Miike, despite darker and more serious tones compared to the game (which deals with murder cases on a day to day basis, but still) was received warmly and achieved modest success from audiences and reviewers. It helps that the Narumiya/Saitou pair (Naruhodo or Phoenix/Mitsurugi or Miles) wasn't too hard on the eyes and that Miike wasn't shy in having fun with the gravity-defying hair as well as the special effects.
* Takashi Miike in the west. It was an adaptation in name only, focusing on a minor

character and original characters as well as dumbing down any important plot elements from the game. Still was an entertaining film, just an adaptation in name only.
* Takashi Miike introduces a bizarre holographic system for projecting evidence in the courtroom that was completely absent from the original game, most likely in an effort to get the dramatic effect across when Phoenix Wright shouts "Take That!", and shoves the evidence at the witnesses' faces.
* Takashi Miike is credited as a director for over 100 movies and has been releasing at least two movies a year ever since the beginning of his career in 1991.
* Takashi Miike loves using direct-to-video V-cinema for many of his more unusual movies, because of the creative freedom this provides him. Miike is often touted as part of the reason for V-cinema's good reputation overseas.
* Takashi Murakami - "Superflat" founder known for his screen paintings.
* Takashi Shimizu, the story begins with a college professor filming himself as he brutally kills a hotel full of innocent people, including his own children, because of his obsession with reincarnation. Thirty-five years later, some creep decides to make a movie about it, and sets out to cast the killer and his victims. So what? So plenty. He succeeds, managing to cast the reincarnation of everyone involved in the massacre. The main character realizes she ties into all this, but doesn't find out how until the end of the movie, when she sees her true self in her reflection.
* Takashi Yanase has been involved with two animated adaptations of his children's books:
* Takashi Yanase. He shares the same amount of respect in Japan as Osamu Tezuka.
* Takashi Yanase's two most well-known stories are this. On one end, there is
* Takato gets a few lighthearted ones in a row when he first meets Culumon. Thinking Culumon would be safer with a human Tamer, he imagines how various of his acquaintances would go about taking care of Culumon; none of them work out very well.
* Takato has one when he can't find his partner Guilmon, imagining Guilmon being shot to death by police.
* Takatora leaves for America. But he continues to keep in touch with Mitsuzane and Gou.
* Takatsuki and Saori become close friends over the first few volumes but that started souring when Saori became jealous of Takatsuki's friendship with Nitori. Due to a love triangle (Saori likes Nitori, Nitori likes Takatsuki, Takatsuki likes no one) and messy love confessions, Saori breaks her friendship with both Nitori and Takatsuki. Over the course of middle school they slowly make up. Takatsuki and Saori go to the same high school but Nitori goes to a different one, which causes a rift in Nitori's and Takatsuki's friendship. Saori and Takatsuki become closer than ever though.
* Takatsuki confesses that she has a crush on Nitori. No blushing though, and there's no sign that the crush is requited.
* Takatsuki growing his hair out to shoulder length in high school signifies his confusion about whether he wants to be a boy or a girl. The last time we see Takatsuki she
* Takatsuki have all crushed on him. Saisho doesn't get much attention but there is a minor character who keeps on hitting on him, to his discomfort.
* Takatsuki is a boyish transgender boy. He originally had an androgynous bob style but cut it into a pixie. In middle school, Chiba gets Takatsuki to grow his hair back to medium-length but he gets it cut when he notices she's just trying to make him feminine.
* Takaya Kuroda voices Kazuma Kiryu and Kenshiro, stoic badass protagonists.
* Tak brainwashes a local business tycoon into believing that she's his daughter, then keeps him in a tube whenever he's not needed.
* take a beating from nearly any boxer. Research also showed that his skull was twice as thick around the brain as an average human skull.
* Take A Break campaigns on social issues, but it's obvious that they did not do the research on these issues. Also, their agony aunt Katie tends to be guilty of

this on multiple occasions, causing moral panic sometimes.
* Take a Break stories, once featured a story about a young girl, Cassie Griggs, who was disqualified from a talent contest after her mother was accused of trying to pass another girl off as Cassie. At the mother's request, Cassie was allowed to perform, but was not given any marks, resulting in her coming last. However, as no follow-up has (to date) been published, it's impossible to know how this setback affected Cassie's attitude to talent contests in the long term. She could have picked herself up and entered another contest, or her confidence could have been knocked so badly that she was never able to perform again. We just don't know.
* Take a closer look at the background; it's a black room with yellow stripes making a grid on the wall.
* take a drink every time he asks his guest an elaborate yes-or-no question that fully incorporates the answer he'd like them to give, and they reply, "...Not really."
* Take a few feats and you can do it twice an encounter, throw it, and increase the aura.
* take a level in badass and come together to defeat enemies stronger and more skilled than they are on multiple occasions.
* Take a Level in Badass, and the history to allow Richard to break through the Barrier between the Old World and the New.
* take a level in badass, he never manages to be anywhere nearly as powerful or evil as the true villains of the piece.
* Take a Level in Badass they took at Wolf 359, so the fleet got bigger. Considering average Federation ship has lifespan of some 80 - 100 years, as evidenced by Miranda and Constitution classes...
* take a level in kindness if you considered him evil if you treat him well during the DLC.
* Take a look at some F1 onboard laps to see just how fast and how close it can get. You'd be damn sharp if you could just register what went past you. As Nelson Piquet put it, Monaco is like riding a bike inside your living room. As many people would remind you, Monaco would not have been approved for races had it been built today.
* Take a look at some photos of the F4U and you'll quickly realise just how uncompromised this plane was: it was designed to have immense engine power both to better take off from aircraft carriers' short runways and also because air combat had become "dive and zoom" rather than dogfighting, this meant a hugely powerful engine and as mentioned above, a massive propeller. That propeller needed a large radius, but for carrier operations with rather rough landings you want very short landing gear struts because this is tougher. Therefore, the designers put a kink in the wings to get the best of both.
* Take a look at the back cover blurb of a Chinese novel that's been translated into Swedish. You'll find that it's written under the assumption that the book's potential readers are looking for a novel to teach them about China as a country, and not just a plot and characters and the other stuff you usually look for in a book. The Cultural Revolution is bound to be mentioned. The book
* Take a look at the specifications of the electronic hardware (CPU power, resolution of the CCDs of their camera(s), etc) used by spacecrafts, manned or not, and you'll find they look outdated even by the standards of the epoch of their launch. The reason of this is two-fold: 1) Since space is one of the harshest environments known
* Take a look at your own grandparents. If they haven't gone completely casual for the sake of comfort or safety, they probably dress about 20 years out of date. (Their casual wear is probably outdated as well.) In
* Take a Moment to Catch Your Death: Character dies right when they think they're in the clear.
* Take a Moment to Catch Your Death — Any hard-boiled radio drama.
* Take any bad review, whether it's in a newspaper, a radio show, a TV show, on a website, on a forum or in an Internet review. No matter how much the critics torpedo the product in question into the ground they often attract more curiosity

from their audience to actually go out and check it out, even purchase it, than actually leading people away from it. This may sound awesome, but at the same time the audience sends out a signal to those companies to bring out more similar half-assed crap, just because
* Take any car made within the last ten years and crawl up under it, and you'll find some really scary stuff. All that dirt, oil, dust and grime builds up over time. Older vehicles tend to show this more apparently, especially those that haven't been brought in for periodic maintenance, but any mechanic can tell you there's a good reason why used car salesmen don't show you the underside of the car.
* Take any video game with "American McGee" on the cover. Many people assume that it's just an intentionally silly name for a game studio.
* take a shortcut through the narrator's recording booth, where the narrator tries to turn on the closing music for the credits... only for nothing to happen. He scrolls through several random sound effects before declaring that someone else can find the correct music, and leaves angrily.
* take a shot: "On a scale of 1 to 'Invade Russia in winter', how bad is your idea?"
* Take a Stand Nick and Judy's neighbors call the police on them, ironically, thinking they were dealing with an intruder.
* Take a Thief is referred to as having a "face-shaped face." This time, the lack of information itself conveys useful information: the character has no particular identifying traits and is easily lost in crowds.
* Take a Third Option and are called juncos or towhees. In turn, most New World buntings are actually in the cardinal family, Cardinalidae.
* Take a Third Option and has Garnet, Amethyst, and Pearl fuse into Alexandrite for the dinner so all three can technically attend.
* Take a Third Option and kill Astrid, which changes the questline to hunting down the Dark Brotherhood instead. Killing all three of them gets you compliments on your ruthlessness.
* Take a Third Option, and then fight off Doom's mind control before taking his head off.
* Take a Third Option into say a Grass-type that could handle either Water or Electric (and other options exist, so unless all of the opponent's Pokemon have already been revealed, you never know what may be brought out next).
* Take a Third Option it may be seen as a cop-out. At any rate, reading such interviews can spoil a viewer's enjoyment of an otherwise immersive romantic scene.
* Take a Third Option on whether to kill Vriska or let her go off to confront Jack Noir) and, while still somewhat abrasive and egotistical, she's now recognized in-universe as a competent planner and effective leader.
* Take a Third Option or try to make fun of both sides for their extremes will usually get called out by both sides for wasting everyone's time.
* Take a Third Option, the episode is pretty bleak and mostly about humbling the brash, young, Dr. Bashir who was convinced he could come in and save the day.
* Take a Third Option: When a character has to make a choice, they opt for a new decision that wasn't among the options already given to them.
* Take a Third Option: When a character has to make a choice, they pick one that wasn't among the options given to them.
* Take a Third Option: When two options aren't good, there's always a better alternative.
* Take a Third Option, which is entirely done with CGI, but apart from the unusual fluidity of movements looks as hand-drawn as other works, just a little cleaner.
* Take a Third Option with a special rule (And They Shall Know No Fear) that avoids both total routs and the extra losses fearless units suffer, allowing them to make tactical retreats but then reform regardless of casualties.
* Take away everything to do with Batman being framed, the Phantasm trying to get revenge on the Joker, and Bruce Wayne's failure to hold on to a woman, this is the core of
* Take away honesty and you get Pelengs, who are the game's version of

* Take away the Finals, and the Houston Rockets have fallen short pretty often. Moses Malone won two MVPs in his six years there, but only got as far as a surprise Finals run in 1981, lost to the Celtics. Hakeem Olajuwon brought the Rockets to the finals in his second season (also lost to the Celtics!), and then suffered until 1994, when Houston won the first of two championships during Michael Jordan's brief retirement. After two more strong seasons losing to the team MJ would trounce in the final (Seattle and Utah), came 12 years without winning a round, even if good players such as Yao Ming and the above mentioned Tracy McGrady were in the roster. James Harden arrived from OKC in 2012, and the team soon became a contender that never missed the postseason... and fell thrice in the first round, along with having serious problems overcoming the Golden State Warriors. Most painfully, in 2017-18 the Rockets, reinforced by Chris Paul, finished with the best result in the league, easily won the first two rounds, and once they had a 3-2 advantage on the Warriors in the Conference Finals, Paul got injured and Houston suffered comebacks in the final two games. The 2018-2019 season added to the misery. After hanging with the Warriors toe-to-toe during the playoff western conference semi-finals, they bring it to a deciding Game 7. On top of this, Kevin Durant, who usually performs big for the Warriors during the playoffs was injured, giving Houston their best chance to win and make it to the western conference finals and possibly win a championship in the finals... only for
* Take Away Their Name: Magically taking someone's name away from them.
* Take Back the Skies contains a map of the fictional world of Tellus, including the thick, tumultuous storms that surround its islands.
* Take Back the Skies is set in the fictional world of Tellus, notable for the thick, tumultuous storms that surround its islands.
* Take Back Your Gift: Breaking up with someone and returning a gift they gave you.
* Take Care Bear included Take Care Bear in the toyline. Her tummy symbol from 1987 was an apple, because Take Care Bear promoted good health; but the apple now belongs to Smart Heart Bear, so Take Care Bear's tummy symbol is now a heart hugging a star.
* take care of Shiho, whom he thinks got hurt because he left her alone while he ran off to try to play hero. Anime Tate only gets to be cool when he's not trying to be.
* take care of some business, it just takes them awhile to figure that part out.)
* Take Care of the Kids: A person about to die asks for someone to look after their children once they are gone.
* Take Care of the Kids: Dying person asks someone to look after their children.
* Take Care of the Kids: Someone is dying and asks another person to take care of a person (usually a kid as kids are more likely to need care).
* Take comfort, this show was wrong: Nixon's name and other Artifacts on the moon and will be destroyed (barring intervention) when the sun enters its red giant phase in ~4 billion years. Meanwhile, interstellar artifacts like the Voyager, Pioneer, and New Horizons space probes will almost certainly still be out there cruising between the stars for many billions of years beyond that.
* Take Cover! are those that are so hardy they don't need to, or they have innate Defense that confers the same advantage anyway. Or both. You also don't get the 40% bonus to critical hit chance that flanking normally does.
* Takeda Harunobu. As impressive as this sounds, however, Classical Chinese was to upper-class Japanese as French was to the Russian nobility before Napoleon's invasion. They all spoke, read, and wrote it, though unlike the Russians they did actually use Japanese (most Russian nobles couldn't even speak Russian). The original Japanese alphabet is also based on Classical Chinese.
* Takeda is Natsuki-sexual, and it started one year prior to the start of the series in "Natsuki's Prelude", where he showed up to her class and offered her a large bouguet. His interest in her never wanes, but during the Festival she sends him a letter, thanking him for his feelings, but stating that she couldn't return them, as there was someone else she loved (See Above).
* take Danny back to his planet for study. Scout uses his power over animals to quieten Biff and later takes the dog as a specimen. Although he eventually releases

Danny, Biff is not so lucky.
* Takeda's body on the floor and starts crying uncontrollably. Nolan just holds her.
* Takedown)... which immediately leads to your commanders calling in a contigency that sends a Hirogen force you didn't know about against the enemy, and shortly after (in the next stage) a group from the faction that betrayed you shows up, on their own initiative, to fight alongside you over feeling the betrayal was dishonorable.
* Take Five: A character needs to speak to another privately, but instead asks the others to leave.
* Take Four: Went into the episode as aired. The team completed six out of the eight obstacles.
* Takefuji, perhaps the most infamous "sarakin" (Japanese consumer lending company with practices similar to a
* "Take Good Care of Her," originally a top 10 pop and top 20 R&B hit in 1961 by singer Adam Wade. Sonny took this tale of bidding the object of his unrequited love well on her wedding day to No. 1 in the late spring of 1966.
* Takehiko Inoue) is quite possibly the most notable aversion in the entire industry, at least for the current generation. There are many photos and videos of him, he has given out several interviews over the years, taken part in museum exhibits, and even been on national television; compared to most mangaka he seems quite comfortable in the spotlight.
* take him to the nearest hospital and throws him out of the airplane.
* take him up on the offer noting how she's become much more mature in the time. Miroku is notably shocked (he had forgotten) while Kagome mentally notes how awesome girls in this time period are.
* Take Hirako, and can not only keep up with them but actually takes out countless genetically superior enemies. Much like his mentor, Hirako's quinque-of-choice is "Nagomi", which takes the form of a broad, single-edged blade.
* Takehito Koyasu, whose minions have Stands related to the Major Arcana and has the power of The World who also enjoys shouting its name and using its power multiple times.
* Take Horace Harkness and Scotty Tremaine. The former is a grizzled veteran,
* Takei had a more dignified cameo as Prowl's martial arts teacher Yoketron in an episode of
* Take immature, stupid people, usually inexperienced with drinking, put them in a party, let them have all the alcohol they want. SOMEONE is getting something shoved up their ass.
* take it to eleven was just not feasible. Years later, the rest of the toyline got a comic series.
* take Kara with him, and faces their imminent death with absolute calm.
* take male or female form as they desired with far nastier critical hits and the ability to induce crushing despair. 4E Incubi are still fairly manipulative, but much more focused on destruction, corruption and predation. They have the unique ability to assume the forms of beasts as well as mortals, and to invade dreams, which they use to torment, corrupt and slaughter mortal victims. Interestingly, 4E incubi aren't explicitly gendered, suggesting that just as you can have "male succubi", you can also have "female incubi".
* "Take Me Away" is arguably about an interracial relationship between herself and a white man, and the negative attitudes that the couple receives from others.
* "Take Me Down" and "The Closer You Get" were first released by Exile. Both were hits for Alabama only a couple years before Exile reinvented itself, transforming from a one-hit wonder pop band to a successful country band.
* Take Me Home Tonight runs on this trope as you can guess from the title (it was also titled "Kids In America" at one point).
* Take Me, Ray runs a business where he simulates kidnapping experiences for clients. Generally, it seems he makes arrangements with the parties in question that no one knows that they've been "kidnapped" during the eight-hour experience. Then, he takes a job that lasts all weekend, and the police show up...

* "Take Me to Church" is an intense ballad that uses religious imagery throughout as the singer expresses wanting to worship his beloved instead of the church that rejected their love, with a prechorus of repeated
* Take Me to Your Leader, about the adventures of two aliens from Venus who go into business with an inventor and sell products created for another planet to unsuspecting humans.
* Take Me to Your Leader). It has almost always been twisted or parodied since.
* Take Me to Your Leader. Rapper Daniel Dumile (MF DOOM) takes on the persona of space monster King Geedorah, and the album is told through his alien perspective on humans... who he ultimately wishes to enslave.
* "Take My Breath Away", the only song they're really known for, sounds like nothing else on the disc. Berlin's usual style is high-energy synth pop; "Breath" is a rather somber power ballad.
* Take My Hand: One character is about to fall off a cliff and another tries to catch their hand.
* "Take My Hand, Precious Lord" is a hymn about someone in deep despair begging God to comfort them and give them strength. Thomas A. Dorsey
* Take My Hand scenario where she was too tempted to reach for it, causing her to slip from Indy’s hold and fall to her death.
* Take My Hand scene, she attempts to recover the Grail resting just out of her arm's reach. Her persistence is her ultimate undoing and she falls to her death. Indiana then tumbles over and finds himself in the exact predicament, but his father is able to act as the voice of reason.
* Taken 2, however, was trying to get at Bryan by abducting the man's loved ones — the very thing that first sent Bryan against his son and the other slavers to begin with! If Murad had just quietly restarted the ring and not done anything to regain Bryan's ire, he could have avoided his fate.
* Taken 2, it's implied that Bryan and his ex-wife will reconcile, but it is left open-ended enough that some reviews referred to the reconciliation as a dropped plot point.
* Taken 2 Murad a chance to walk away in exchange for leaving his family in peace. Murad blows it.
* Taken 3 unlikely the police would let crimes against them slide so easily.
* Taken a bit further with Galcian's training and indoctrination of Ramirez (he was just young enough for this trope to still qualify). Somewhat subverted, as it appears that Galcian genuinely cares for and respects Ramirez, acting as a father figure.
* Taken advantage of of the eponymous cosmic MacGuffin before they fall into the hands of the evil Black Guardian. It turns out that the Black Guardian's agent had been waiting by the final segment all along, having decided to sit back and let the Doctor run all the risks of gathering the first five segments, then steal them off him when he came for the last segment.
* "Taken", after accepting her deal and coldly telling the court what she did, the detectives arrest her for manslaughter, because she just proved herself criminally liable for his death.
* Taken. After Bryan Mills kills a room full of villains, he realizes their cohorts are on their way to kill him. So, he lays down with the corpses of the men he killed. It works and gives him the much-needed element of surprise.
* Taken after she allows herself to be taken by the UFO project. When Dr. Wakeman puts the helmet designed to prevent the aliens from detecting her neural signature on Allie, Lisa sees pitch black and believes that she has gone blind. When Dr. Penzler regresses her using hypnosis, Lisa learns that Allie is being held in an old farmhouse in North Dakota, which she and Charlie are eventually able to locate.
* Taken. After she lays her hands on his stomach, a scar is the only sign that he was ever injured.
* taken a huge level in badass. He still manages to keep his dignity by being utterly defiant throughout the entire beatdown.
* Taken almost literally when dealing with Bulgak and his adventures in Hell. Turns out when a soul in Hell admits to how

* Taken: Although Brian Mills stays divorced from his ex-wife, his heroics in the first movie put him on much better terms with her and their daughter for the remainder of the franchise.
* Taken, and old Brian must go after another villain, who is auctioning off the girls the leader of the kidnapping ring takes.. and then he has to face the guy who actual bought his daughter in the climax.
* take naps. To the point that he specially outfitted his horse saddle so he can nap while riding without falling off.
* Taken, as soon as the slutty best friend says she's going to have sex with a random French guy because "Who cares? He's hot!", it was obvious she was a goner.
* Taken a step further in the American Civil War. At times when holding or exchanging prisoners of war was unfeasible, captors would often grant prisoners parole: They would be flat out released and free to go in exchange for signing a paper saying that they will not take up arms against their captors again. Of course, if you got caught violating your parole,
* Taken a step further in the fan remake; if you insist upon having the Dark Master as your mentor, you get a
* Taken a step further in their running gag of using obvious black-and-white stock footage of applauding audiences throughout the series.
* Taken Back: Finding Haley, the main character's daughter is abducted from one.
* taken back to Psi Corps headquarters. This one's notable in that Talia was always intended, right from the start to be sent back to Psi Corps. They even wrote in the mechanism that would enable her to return. The only thing that changed is that unlike the original plan, she never came back.
* Taken, Bryan quickly escapes his predicament and overpowers all his captors soon enough.
* taken by the Time Wraths and forcibly turned into an enforcer of the Speed Force in the season finale.
* Taken by turning on the light. And once he's gotten the info he's gotten from him, he leaves the guy in the room with the light still on.
* Taken contains this. Bryan Mills replays the recording of the kidnapper's voice over and over in order to be able to later recognize him by sound.
* taken direct hits from high-explosive bombs during the London Blitz, been stabbed by medieval knights accusing her of witchcraft, was set on fire during Nero's fire in Rome, taken down Paleolithic bison by hand, walked naked on an Ice Age glacier, and first appeared on Earth while being submerged in lava when Earth was still a molten, inhospitable chunk of rock billions of years before life even existed
* taken down with his own projectiles, which inflict the most damage on him.
* Taken. Dr. Kreutz emerges from the building on fire from head to toe and burns to death in front of Owen's eyes within seconds.
* Taken even further by the "Goblin Bloggin'" segments by the same author, in which Green Goblin hosts a
* Taken even further in later seasons, in which Asami shows that she can drive or fly literally anything she encounters, which has included: roadsters, mopeds, racecars, Mecha-tanks, motorboats, aeroplanes, and more than one model of airship.
* Taken even further in one episode where he cries, fearing Aya may die.
* Taken even further in Season 4, wherein AJ is frequently found having complex discussions about morality and survival with Clementine. While this is partially justified by AJ having to grow up fast in a post-apocalyptic world, the game acts like Clementine's knowledge and experience are what make her smarter than AJ, not the fact that AJ is
* Taken even further in the battle of the Wall, where the Northern and Night's Watch forces launch two million
* Taken even further in the fourth game, when the special system was changed to give every character a list of possible specials, from which they can use up to four at time. Now,
* Taken even further in the Kalos Saga, where he becomes the inspirational figure for at least three different people.

* Taken even further in the revival, where the Balladeer is transformed into
* Taken even further when a bunch of thugs wreck Jaune's shop, steal his money, and beat the shit out of him. Roman and Junior begin pulling strings in the underworld to find the men responsible and make them regret the day they were born.
* Taken even further when he does a twenty-minute commentary on the series.
* Taken features an Albanian crime organization as the main antagonists, who run a sex trafficking operation and who kidnap the protagonist's daughter.
* Taken for Granite: A living being is immobilized by being turned into stone.
* Taken for Granite. Being the protagonist, this naturally doesn't last for long, as he gets revived moments later when the Pokemon literally cry him back to life, something that is never mentioned or hinted at again.
* Taken for Granite joke template of this kind. Instead, Asterix yells at them all that his best friend is dead and now is not the time, and Getafix agrees with the others not to make any more jokes in poor taste.
* Taken for Granite Then there's that woman whose arm Demona casually broke off. What do you think happened when the curse was lifted?
* Taken for granted in this universe. A portable anti-gravity generator is one of the first few pieces of alien technology that the titular hero brings back home from the moon in the earliest issues, and virtually every civilization (certainly every FTL-capable one) has artificial gravity on its ships and uses anti-gravity in lifts and vehicles. This is handwaved with the idea that working hyperspace physics by default includes some concepts of manipulating 'normal' spacetime, including gravity. Like any technology, however, the systems can't work without a power supply; a suitably wrecked but still existing starship will revert to zero-G conditions once the power cuts out.
* Taken found in eastern Indiana is most likely a landing strip. However, he later admits to Marty Erickson that he has never had any idea what the aliens are planning and that an invasion is merely one possibility.
* Taken from real life, where "deflowered" was such a widespread euphemism for "non-virgin" woman, that the term even appeared in formal Anatomy books (even late 1990's editions).
* taken from Zoom). However, the Trickster had one more, well, trick up his sleeve and revealed that he was strapped with a bomb about to go off. Luckily, Barry arrives and disarms the bomb in a matter of seconds.
* Taken further (and reconstructed a bit) when the students are explicitly told to design and finishing moves as a goal. While slightly useful for brand labeling, the real point is that both planning out a special technique whose execution requires taking your Quick use to new levels and then intensively training yourself to be capable of performing it develop you in ways ordinary exercise and practice can't. (And it continues a minor theme the series plays with that a major advantage heroes are expected to have over ordinary villains is willingness to work harder for their goals.)
* Taken further as time goes on, where the Devil of paradox space is Doc Scratch, a dapper, hyperintelligent mastermind whose head resembles a giant cue ball, and he is only the forerunner of the story's ultimate villain and the leader of the Felt, Lord English, where "English" is a term for putting a powerful spin on a ball. Our first clear look at him is a close-up of his eyes, which are rapidly-flashing pool balls. That's without getting into increasingly clear evidence that overall, ranging from the overt to the subtle, villainous and otherwise,
* Taken further, most likely by accident, in 5th edition. The Player's Handbook in 5e contains 12 classes. The 13th class, Artificer, was introduced in the edition's first Eberron sourcebook.
* Taken further when It, a creature who embodies and preys on fear, appears to Patrick Hockstetter, whose distinct insanity means that he isn't afraid of anything whatsoever. He sees It as an indistinct, semi-liquid figure, as though It honestly doesn't know how to exist around him.
* Taken has the stalker that Bryan saves singer Sheerah from. He has a minute of screentime, but it's enough to demonstrate Bryan's all-around badassery before the real plot kicks off.

* Taken. He acquires two pistols in the climactic gunfight, but instead of going akimbo, he tucks one of them into his waistband and doesn't draw it until after the first gun has been emptied and discarded.
* Taken. However, it turns out that an alien ship actually did crash, as a direct result of colliding with the Mogul balloon. The ship is discovered by two young boys and their father while on a hiking trip to Pine Lodge near Roswell.
* Taken: "I don't know who you are, but I will find you and I will kill you!"
* Taken: In "Acid Tests", it is revealed that Jesse Keys joined the US Army under the pseudonym Frank Pierce and commanded a unit in Vietnam. When his unit came under attack from the Viet Cong in a temple in the Quảng Ninh Province, the aliens abducted Jesse in order to protect him. In his absence, 27 of his men were killed. Jesse became addicted to heroin after the war because of the guilt that he felt over not doing more to save his men when he knew that the aliens would not let anything happen to him.
* Taken: In "Acid Tests", Owen Crawford tells his son Eric that the UFO project receives reports of cattle mutilation two or three times per week.
* Taken. In "Beyond the Sky", Russell is the only one of the ten men aboard the B-17 bomber who were abducted on August 1, 1944 to survive more than three years after being exposed. The immunity of the Keys family is crucial to the aliens' attempts to create a viable hybrid.
* Taken: In "Charlie and Lisa", Lisa Clarke meets Nina Toth on her first day at Morrison Junior High School on February 13, 1986 and the two girls form a lifelong friendship. After Allie is born on June 8, 1993, Nina becomes her godmother.
* Taken: In "Charlie and Lisa", Mary Crawford and Dr. Wakeman, whom she called "Uncle Chet" as a child, start a clandestine sexual relationship which lasts for nine years. It is something that they had both wanted since she was thirteen.
* Taken: In "Charlie and Lisa", the title characters Charlie Keys and Lisa Clarke have sex in zero gravity aboard one of the alien ships.
* Taken: In "Dropping the Dishes", General Beers believes the aliens should be considered as hostile and lists the belligerent acts that no nation should get away with. The list includes unwanted abductions, human experimentation, violating airspace and stealing a highly classified energy reactor.
* Taken: In "God's Equation", it is revealed that Ray Morrison was sexually molested by a man in a shed when he was eight years old.
* Taken: In "High Hopes", doctors discover that Russell and Jesse Keys both have inoperable tumors in their frontal lobes. They turn out to be implants placed in their brains by the aliens. Dr. Kreutz determines that they are tracking devices. Dr. Wakeman identifies the energy signature that each one emits in "Maintenance" and figures out how to track the implants as the aliens do in "Charlie and Lisa".
* Taken: In "Jacob and Jesse" and "High Hopes", Dr. Kreutz is an ex-Nazi scientist. As a physicist, he is more Werner von Braun than Josef Mengele, but he certainly doesn't have much problem with gruesome medical procedures.
* Taken: In "Jacob and Jesse", Sally Clarke builds a radio transmitter in her shed in the hope of contacting John so that he will come back for her and Jacob and bring them to his planet.
* Taken: In "Jacob and Jesse", the only thing that the Groom Lake research team managed to obtain from the alien ship in eleven years is velcro, which Owen Crawford dismissively describes as "a way to hold up [his] pants without a belt."
* Taken: In "Maintenance", Tom Clarke, a leading UFO debunker, realizes that aliens are real after finding out that his half-brother Jacob is half-alien.
* Taken: In "Maintenance", Tom Clarke believes that John was not an alien but a super soldier who was created using psychotropic drugs as a part of an early Cold War experiment carried out by the US government.
* Taken: In the final episode "Taken", Allie tells John that she was sorely tempted to use her powers to make Clauson and the other men who threatened them at the gas station (as seen at the end of the previous episode "John") fight each other.
* Taken: In the final episode "Taken", John confirms what Mary Crawford and Dr. Chet Wakeman had suspected about the aliens for some time: that they have no emotions and no concept of morality due to the manner in which they had evolved

over the course of millions of years.
* Taken: In the final episode "Taken", the alien John reveals that Allie is the next step in the evolution of life itself.
* Taken is told, based on prior experience, that he has 96 hours to find his kidnapped daughter before the trail runs cold.
* Taken literally in the first mission of HAWX, which has you running air support for a mission from one of the
* Taken miniseries was supposed to be a gift to humanity, a mixing of human and alien, but they decided the world wasn't ready for her.
* Taken, Murad's sons do not appear. Maybe they decided not to continue it?
* Taken, Neeson's character Bryan Mills comes across as this at first, with the rules he tries to impose for his daughter's safety. She's annoyed by them and thinks he's too strict, as does his ex-wife. Shortly after, he is proven right when he has to storm his way through the Paris Underworld to try and save his daughter from sex-traders. Mills, an ex-CIA agent, fights off thugs left and right with mostly hand-to-hand combat and even ties one of the unfortunate traders to a chair, sticks a long nail into each leg, hooks a jumper cable to each leg nail and to the house's wiring, and shocks him so he reveals who he and his group sold his daughter to. After the interrogation, he leaves him in the chair, to have volts and volts of electricity flow through his body until "it is shut off for lack of payment on the bill." Mills did say that he would kill him after finding him, and kill him he did!
* Takenobu Mitsuyoshi voiced himself in both Japanese and English dubs of
* Taken Off Life Support: A person on life support has their machine unplugged with the reasoning that it's hopeless for their loved ones to keep waiting for the person to recover.
* Taken Off Life Support: Someone is taken off life support when it's determined that they can't recover from their injuries.
* Taken of one of the alien implants on a soldier in an isolation room. The soldier is driven insane within seconds and kills himself by banging his head repeatedly on the glass.
* Taken on April 17, 1970. After knowing each other for about six weeks, he proposes to her and she says yes. In "Maintenance", they have a nine-year-old named Charlie.
* Taken one step farther in that the Syreen (the race from which the Captain's future wife comes from) are heavily implied to need men (specifically human men) to keep their race going, since most men were killed when their homeworld was destroyed. The survivors are mostly female because it was mostly the all-female Space Patrol that was off-planet at the time.
* Takenori Akagi isn't ethnically black (though he's based on Patrick Ewing), but has
* taken over by multiple personalities had controlled her for a fair amount of time.
* Taken plays out like this. Kimmy is under the bed, panicking, on the phone, when suddenly she is dragged out by her ankles. Not to her doom, but...yikes.
* Taken: Poor Kimmy, being kidnapped and almost forced into prostitution, all within hours of her arriving in France.
* Taken puts a black one on for most of the movie and some of the publicity material has him in it.
* Taken short story "The Star Tracker" that Sally Clarke had been reading immediately before she found him in her shed.
* Taken that this was a contributing factor to Bryan's divorce, although he did retire early to spend more time with his daughter.
* Taken: The aliens are intrigued by humans because their own evolution branched away and stripped them of emotions. They are especially interested in the Keys family for their strength of will and physical hardiness.
* Taken: The aliens have the ability to read a person's mind and create images from their thoughts, memories and imagination:
* Taken. The attendees of these conventions refer to themselves as contactees as they believe that they have made contact with aliens. It is unclear how many of

them other than Sally herself have actually done so.
* Taken. The CG artists deliberately tried to evoke a documentary feel, with one guy saying he would take it as a compliment if someone pointed this out to him.
* Taken the fact that the film involves this sort of story when he tells the criminals who have kidnapped his daughter that he has "a very specific set of skills. Skills I have acquired over a very long career. Skills that make me a nightmare for people like you." The villain, being a villain, refuses to accept that he's a walking dead man at this point.
* Taken. The major differences are that indentured servitude is legal, the ultrarich live in extremely gated communities, and it is common for the children of the ultra rich to be kidnapped for ransoms.
* Taken: The name Area 51 is never used but the UFO project is based in Groom Lake, Nevada from "Jacob and Jesse" to “Maintenance”.
* Taken therapy group for two hours so that the UFO project won't be able to hurt them and her parents won't be able to stop her from turning herself over to the project.
* Taken: There are numerous mysteries such as the reason behind continued abductions of Russell Keys and later his son Jesse and grandson Charlie, the nature of the artifact found at the Roswell crashsite, the purpose of the implants found in the heads of all abductees and most significantly the aliens' ultimate goal in creating hybrids. As the series progresses, answers to all of these questions are provided.
* Taken: The series follows the Keys, Crawford and Clarke families over the course of four generations and 58 years from 1944 to 2002.
* Taken: Three generations of the Crawford family, Owen, Eric and Mary, commit terrible crimes as part of their crusade to discover what the aliens are planning. Owen is a complete sociopath while Mary is highly erratic and unstable. Eric is not on quite the same level as his father and daughter. In "Maintenance", he tries to become a better man. In "God's Equation", he has reached the stage where he does not want any more deaths on his conscience.
* Taken to absolutely ridiculous extremes and took over. They eventually massacred their whole population to stop crime.
* Taken to absurd levels in the Ultimate Talent Development Plan bonus mode of
* Taken to a frightening degree in "The Trial" when you consider the double meaning of the line "Why'd he ever have to leave me?" It's telling that during the film version of the trial, instead of just being
* Taken to almost Trollish extremes in an Ink Monkey's supplement. "Secret Lesson Revelation" allows a Sidereal Sifu to use practically anything in this way, as long as they can make up some reason, however far-fetched, that it is true. Naturally, there is a comic where a Sidereal is abusing this to make a Solar clean his Demigod T-Rex stables.
* Taken to a logical extreme in Parts 1 and 2, where the element of cold belongs to
* Taken to a ludicrous extreme in "King Mario of Cramalot", an episode of
* Taken to a much bigger level in "Pups Save a Giant Bone" when Marshall winds up picking up all the pups and taking them into the elevator, and all six pups end up in a weird piled-up position...with Skye on the bottom!
* Taken to a new level by the Anime Ghidorah, who is a literal planet eater. See the anime folder.
* Taken to an extreme/absurd level (in a high school setting no less!) in
* Taken to an extreme common in anime and video games, once the hero administers his ass kicking, beating the
* Taken to an extreme in another episode. The BAU team is watching an apartment they believe belongs to the unsub. When they get confirmation, they cross the street to his building.
* Taken to an extreme in the 2009 Israel/Gaza conflict. According to the accounts of some Israeli soldiers, Hamas gunmen and suicide bombers attempted to lure them into houses most likely rigged with booby traps. Instead of taking the bait, Israeli soldiers simply just knocked down the houses with bulldozers.

* Taken to an extreme in this Mexican sitcom, where it's one of the show's many
* Taken to an extreme when Kyosuke takes over a country. Why? To give the PANDRA children diplomatic immunity so they can go to school with their friends.
* Taken to an extreme with the male anglerfish, who latches onto his mate and gradually degenerates into a mere sperm-producing appendage.
* Taken to another level when Sterling did a cold/blind/first playthrough of
* Taken to another level when the villains discover that the robbery was
* Taken to another level where Calvin's father is frustrated with Calvin wanting to hear the story every night despite having heard it enough to have the whole thing memorized, so he changes it a bit. The only clue we get is a terrified Hobbes asking Calvin "Do you think the townspeople will ever find Hamster Huey's head?"
* Taken to a particularly unusual (not to say unrealistic) degree in
* Taken to a rather ridiculous level with the Gold Knight, who wears backless
* Taken to a ridiculous extreme in the cartoon "Whining Out" from the
* Taken to a ridiculous extreme when Doofenshmirtz builds a trap consisting of a door with a Perry-shaped hole in it, claiming to have been inspired by Perry breaking through the door... and the wall... and the ceiling... and the fridge door (apparently Perry was extremely hungry on that occasion).
* Taken to a surprising level by martial-arts champion and actress Tara Cardinal with her character
* Taken to a whole new level when Mord mentions that one of his former colleagues "was later revealed to be an epic poem about tadpoles".
* Taken to dangerous extremes for Will Graham, the main character in
* Taken to extremes. After a tiff in bed, Debra took all the covers and went downstairs to sleep on the couch. For good measure, she turned down the thermostat.
* Taken to extremes by Arctic seals, which give birth on unstable pack ice. Because there's no solid place on which to park a baby seal for longer than a few weeks, tops, female seals bear highly-developed young that only need to nurse for a short period, as little as
* Taken to extremes in "Auto Erotic Assimilation", where Rick takes advantage of his lover being a
* Taken to extremes in one episode where a Japanese man and Chinese man argue with each other with the nearly the exact same accent and can't understand each other.
* Taken to extremes in one episode where Pip Bin's sister (at that point Mr. Benevolent's 'saucy evil consort') blows the disguise in
* Taken to extremes in one fanmade map named KOTH_trainsawlaser, which, along with
* Taken to extremes in one issue. Dr. Eggman decides he's sick of fooling around with Sonic and launches an all-out attack on his hometown. His forces manage to blast nearly every single good guy (except three) with powerful lasers that seem to vaporize them on contact. He then beats the crap out of Sonic for good measure. Looks like Eggman has finally won... except that those lasers didn't kill Sonic's friends, they were just teleport beams, which sent them all to cells at Eggman's HQ. Eggman announces he'll kill them all THERE… even though he could have killed them much more easily by simply making his lasers lethal in the first place. This is doubly stupid because Sonic believes everyone is dead... until Eggman TELLS Sonic that his friends are alive, and where to find them. Then he's actually surprised when Sonic mounts a rescue and frees them all. If he'd just kept his trap shut, Eggman would have had plenty of time to kill everybody.
* Taken to extremes in one novel when the characters pass through a number of alternate Xanths in search of one particular alternate, basing their assessment of whether or not they've made it on who Jenny Elf married and the resulting "species" of her daughter. In one universe, she was half-
* Taken to extremes in the final episode of Season One when Reese and the POI are trapped inside a hotel with the FBI and a hit team of corrupt cops hunting them. Finch is trying to guide them to safety, Agent Donnelly is at Taskforce headquarters guiding an FBI SWAT team towards Reece, Detectives Carter and Fusco (unknown to each other) are sending Reese and Finch information to help them dodge the SWAT team, and a corrupt NYPD officer is helping the hit team avoid the cameras and FBI while guiding them towards Reese and the POI.

* Taken to extremes in the "O Canada" cheat which grants you a "Lazer Bear" dressed in a Canadian flag. It shoots lasers out of its eyes.
* Taken to extremes in the pre-Empire novels, where he actually almost killed Mace Windu (aka
* Taken to extremes on CBS, which only aired seasons one and three of
* Taken to extremes on "Harlottown" when, after Hank and Peggy pick up a pair of porno actors who are stranded on the road, Hank leaves Bobby with John Redcorn in his house.
* Taken to extremes when Cleo gives Abe his own knork - which he had
* Taken to extremes with an infamous 90's ad campaign for Mila Margarina in Brazil featuring a houseful of nude children playing around. The ad was controversial and short-lived, but also made a lot more people aware of the brand.
* Taken to extremes with the most valuable minerals of all: moon rocks. When you're actually
* Taken together with the wooden leg example above (who was her boyfriend at the time) it's possible that being more vulnerable and "feminine" around men she cares about is just another aspect of her character, and one that she's not particularly proud of at that.
* Taken to hilarious extremes, for the sake of a joke, in the Rankin-Bass film
* Taken to hilarious extremes with Da Orks. They have FTL travel too (sort of) but in terms of communications technology
* Taken to hilarious extremes with the Hierophant Biotitan who, despite being as large as a warhound, is supported by 4 relatively tiny stalks it calls legs. How it doesn't explode from its own weight is anyone's guess.
* Taken to investigate the strange writing found in the burial chamber. He realizes that there is something more going on when Sheriff Kerby tells Dr. Powell and his archaeology students Sarah, Buzz, and Daryl to leave town after it is discovered that the mummy is no more than six years old.
* Taken to its extreme when Jason is upset that he "only" got an "A++" since it ruins his "A++++" average.
* Taken to its literal extent with Stephen Colbert's self-proclaimed "rivalry" with Korean pop idol Rain after his appearance in the
* Taken to its logical, comical degree in 8th edition with the initial Conscript rules; at three points a pop a single conscript is nothing to write home about. But this edition means that any weapon can harm anything, just that you are rolling on 6's. But conscripts now can receive orders just like normal guardsmen, and their one weakness (their pisspoor Leadership) can be completely negated by a nearby Commissar. Cue people using conscripts to literally drown anything and everything in a flurry of disco-light-shows. On top of that, it's calculated that an equal points amount of Conscripts, Platoon Commanders and Commissars can not only withstand the power of a
* taken to it's logical conclusion good at her job, that some of the merchants who summon her have formed a cult expressly devoted to her as a form of contract.
* Taken to its logical conclusion in the design of the BASIS (although then rarely mentioned past her introduction). A one-of-a-kind intergalactic exploration vessel designed by the Terran
* Taken to its logical conclusion in Vol. 9: there's a part where all but one character enters the scene by jump-kicking or trying to jumpkick someone (mostly Izaya) in the face.
* Taken to its logical conclusion with Deathfog, which instantly kills any living character who enters it, ignoring any protective gear,
* Taken to its logical conclusion with the Hippopotas, Sandile, and Gible families; Ground-type sand hippos, sand crocodiles, and sand sharks respectively.
* Taken to its logical extreme in the Last Battle itself, which has just about every known magic-user in existence fighting on one side or the other. While many mages are used as artillery, the fact that
* Taken to its logical extreme when Snake, disgusted by Otacon's pantswetting, calls out Jesus' name. Jesus appears, is also disgusted, and calls out God's name. Subsequently,

* Taken to its logical extreme with the song Dánarfregnir og Jarðarfarir (e. News of Death and Funerals), where the Icelandic national radio (RÚV)'s signature jingle before announcing the news of recently deceased people was covered by
* Taken to literally insane extremes by Maxie Zeus - he strews his stool around, convinced he is fertilizing the barren Earth. In the context of his particular delusion (He thinks he is God) it is in fact a sacred act.
* Taken to new extremes with Shockwave Impact Wrestling in Sidney Ohio USA. If you think having six wrestlers involved cheapens the length of the
* Taken to non sequitur extremes in early PSP ads. "It's like cheese you can listen to outside!"
* Taken to perhaps its ultimate extreme with Cletus Spuckler, the series' resident "slack jawed yokel". He and his wife Brandine are the parents of some 44 children. In one episode, the Spucklers take in Bart and Lisa when Homer and Marge go to jail, implying that some of the other children may be fostered as well.
* Taken to quite literal levels with Chaos Obliterators, whose bodies have been mutated by the Obliterator Virus, enabling them to generate weapons ranging from powerfists to lascannons (though the line between the weapon and obliterator is blurry, as the weapons are more of an extra limb, rather than separate item from user), as well as ammunition to said weapons.
* Taken to ridiculous extreme in second game. At max experience level, shooting one soldier will make your entire army do twice as much damage, run faster than a land speeder and be completely invulnerable to all forms of damage. And there is a trait that makes execute cool down less than its duration.
* Taken to ridiculous extremes with the Apocalypse Rules in 40k, where many weapons forgo the normal "to wound" and "Armor Save" rolls, because they
* Taken to ridiculous lengths when a car the Simpsons had recently bought in winter lost control on the ice. The Simpsons bailed out only to watch the car skid into the middle of a frozen lake, break through the ice and sink into the water, and then
* Taken to ridiculous levels at the start of the encounter. Hidan's only reaction to being impaled by two large swords is "Who the hell are you?"
* Taken to ridiculous levels with Pica, whose actual shoulders are in the shape of huge, spiked shoulder armor.
* Taken to the extreme in a cutaway gag: It seems that Peter only went to
* Taken to the extreme in Leon's fight against the first Lepotitsa in
* Taken to the extreme in one episode, where he uses it to dodge an incoming punch and escapes. Nobody seemed too bothered that he just vanished into thin air...
* Taken to the extremes with James' Carnivine. Early on in the DP saga, it caused an explosion if it did pretty much
* Taken to the extreme when the Brain Spawn wipes intelligence from the planet:
* Taken to the extreme with the special character Aun'Va. He's gone from the worst Special character in the entire game from his previous incarnation, to almost a "Must-Have" unit in any non-Farsight Enclave rules using Tau army. He can invoke an additional power, which means you can leave Storm of Fire always active, and then one of the three other Elemental Invocations make surrounding infantry units tougher, less likely to run, or more aggressively mobile. And thanks to his Paradox of Duality, he put's the normal strategy of using High Strength, Armor Piercing weapons on its head, making it likely to fail when fired at him. Combined with clever use of cover, this will frustrate enemies trying to eliminate this huge morale booster to the Tau. Not bad for a choice, where it's very likely that when used correctly, will never earn a kill on its own.
* Taken to the logical end with Ray Tracer, who uses an actual surfboard ala
* Taken to the next level with man-eating hamburgers in this animated short,
* Taken to the nth degree when Cell self-destructs and blows up King Kai's planet, also killing Goku— when Cell regenerates he knows the Instant Transmission technique that Goku employs. He somehow LEARNED the technique from Goku's CELLS.
* Taken to the point of self-parody with Elizabeth, a student in Ross's class that he dated for a while. She was consistently presented as smart, pleasant, and fun-

loving. When he broke up with her, it had nothing to do with anything she did and was for the perfectly realistic reason that they were at very different stages in their lives and he didn't see a future together. Just as he's having second thoughts about the break-up, she sticks her head out the window to yell at him and throws a water balloon.
* taken up a notch. But during his fight against Naruto and Sasuke, he couldn't take one punch from either one of them.
* Taken up a notch when special guest star Tammy Faye Bakker would play Mimi's mother, Tammy Bobeck, for two episodes.
* Taken up a notch with "The Room" which has rather realistic camera effects in keeping up with the reality theme of the episode, specifically quick zooms and bokeh focus. Even the eviction ceremony in the kids' bedroom features advanced blurred effects and lighting.
* Taken up to eleven by Tenchi and Z's Light Hawk Wings. Its heavily implied that the force needed to breach them would destroy the universe with it!
* Taken up to eleven in The Return, where there's whole scenes who are paid importance, that have not a bearing on the plot, althouhg an argument can be made about bearing importance on an atmosphere and emotional level.
* Taken up to eleven in the seventh entry, where the villains are a time-traveling army from the future . . . still driving the same WWII-era vehicles, except now they're painted blue and shoot laser beams.
* Taken was released in America several months after it was in the UK (and a full year after France).
* Taken when Dr Chet Wakeman and Mary Crawford do it the day she turned 18.
* Taken. When the daughter is being kidnapped, her father tells her specifically to scream identifying characteristics into her cell phone, so he can have something to work with when rescuing her. That doesn't really add much evidence to his searching though, and the real lead comes from when the kidnapper talks into the cell phone after kidnapping the daughter. She does manage to describe a tattoo the man has, which lets Brian identify the gang.
* Taken, where non-nerd Jack Carter is the baseball nut, and his attempt to start a town baseball team is not initially popular. They wind up starting a VR Baseball league instead.
* Taken. While observing the crop circle in a helicopter, Crawford and the others see another in the vicinity. It is in the shape of a peace symbol and the word "Howdy" written beside it. As a result, Crawford's career is ruined. He later learns that it was a prank orchestrated by Tom, a leading debunker, in revenge for Crawford breaking his mother Sally's heart and kidnapping his younger half-brother Jacob in 1959.
* Takeo-chan Bukkairoku focus exclusively on Japanese mythology and youkai. Starting with chapter twenty, a European vampire moves in next door with his harem of western monster girls (including a Frankenstein's monster, a werewolf, and a medusa) with an eye towards making Takeo his next bride.
* Takeo-chan Bukkairoku that she has to wear excessive safety gear just to survive the various mishaps that happen to her en route to or from school. She keeps herself distant from others at the start of the series because that misfortune can jinx others who are around her. Her home's landlord and master, a god of fortune she calls Mu-chan, can negate much of this if they're together. When they're apart, it kicks right back up again.
* Takeo-chan Bukkairoku. The first chapter has the real estate agency setting up her dorm putting her in a house populated by youkai. Said house has a very pleasant garden that, if one takes a very precise route, can also be a path to the underworld. Upon being informed that Takeo went missing while in the garden, the youkai all realize this is almost certainly what happened to her and set off on a rescue mission.
* Take Off Your Clothes: A character asks another to remove their clothes, but the situation isn't sexual.
* Take Off Your Clothes: Asking someone to disrobe for non-sexual reasons and having your intentions misunderstood.

* take on Azula while the latter's Firebending was enhanced by Sozin's comet.
* Take One: Sixty seconds after host Marc Summers gave the signal, the contestant came up empty with the stage covered in feathers. It turned out that the staff
* Take On Me there are a few amusingly awkward scenes that cannot be described here.
* Take Our Word for It, and everyone who saw him do it had to be hospitalised because they were laughing so much.
* Take Our Word for It - Because sometimes, you're better off not knowing.
* Take Our Word for It: The characters spend an awful lot of time talking about how scary, funny, gruesome or whatever something is, but we never actually see it.
* Take Our Word for It to make love to her (after Bud Manstrong, the only other crew member on Gargantua One for all this time, refused to satisfy her), he agrees, but only if she wears her spacesuit helmet.
* Take Our Word for It when the neighbourhood kids are trying to remove a coin off the pavement. Eddy loudly declares that he can see Sarah's underwear as she is hunched over the coin and trying to pull at it with her teeth. The viewer is left in the dark about whether Eddy was telling the truth because Sarah is facing the "camera" as she is attempting to win the challenge. The rest of the children waiting with him laugh as if Eddy had pointed out what they were all thinking, making Sarah stomp away in red-faced embarrassment, but they were as competitive as Eddy so they could've easily been lying as well.
* Take Our Word for It: Writers describe something they can't possibly live up to by showing it, so they just tell us what it's like, and let our imaginations fill in the gaps.
* Take out an entire battalion of Knightmares and kidnap the princess? After putting himself in a position where he's surrounded by the enemy and cannot simply retreat?
* Take out the magical diary part of the Ginny subplot in the second book and it’s the story of an impressionable little girl falling prey to a manipulative older boy. Ginny is a kid who’s grown up in a loving family with a whole heap of brothers to play with but goes to a boarding school and has a hard time adjusting to her new life. She’s lonely and starts talking to a “new” friend, a handsome and charming older boy. He
* Take out the risque language and you'd have the actual title of an episode of
* Takeover: Brooklyn hadn't sent the pigs sailing, that sure as hell did.
* take over command and disrupt the unit from within. Marimow forces the unit to focus on "street rips," which is the exact thing the unit was created to get away from, rendering the MCU useless. Rawls even calls him "Marimow, my Trojan Horse," making clear that he uses Marimow to break up any unit causing problems for him.
* take over household responsibilities at a young age (his mother having left and his father busy with work). He is somewhat limited in that living in poverty doesn't allow him a lot of ingredients to work with.
* take over place X goal but this is a minor plot thread and is treated by everyone like 'business as usual'. Everyone is trying to take over everyone else.
* Take Over the City. Although his goal is to totally control The Glades, he uses many of the traditional tactics for isolating an area to do so: destroying all the cell towers, disabling the video feeds, etc.
* Take Over the City: The villain plans to take over the town they live in.
* take over the entire world as the Xhosa, a one-province pagan minor country with a built-in technological handicap.
* take over the Trust and use their money and influence to covertly gain power on Earth, after it becomes clear that the Tau'ri can't be defeated using conventional
* take over the victim's body. Keepers had only had two weaknesses: alcohol - which put them to sleep - and to kill the Drakh who spawned the Keeper.
* Take Over the World: A specific nation coming to total (or near-total) control of the world.
* Take Over the World episode like Squidward got, which combined with less sympathy probably makes him the bigger loser overall.
* Take Over the World. Eventually the two of them are overthrown and chased away

from Earth by a rebellion, consisting only of Moe wielding a more advanced weapon than than Kang and Kodos can conceive of... a board with a nail in it.
* Take Over the World. He occasionally helps Sonic without any ulterior motives, gives Tails advice on girls, and even befriends Amy after they find a common interest.
* Take Over the World. He was able to look into the future and see all the possible futures that could come to pass and the only one free of human suffering and strife was the one where he was in control of humanity. Though the validity of the point is undermined by his methods, which usually amount to depriving most of humanity of its free will, killing or imprisoning anyone who resists, and in short proving that everyone who believes Doom is right is a closet fascist themselves.
* Take Over the World long enough to unlock the secrets of the Lavadome, and is willing to decimate and enslave dragonkind to do it.
* Take Over the World plot. Since the protagonist is immune, the brainwashed citizens are ordered to kill him. He escapes and returns to his hometown, intending to call the cops, only to find more antennas. His brainwashed wife shoots him.
* Take Over the World: Some players in the game of geopolitical strife have somehow managed to achieve total global domination; whether by conquering and annexing all other territories, or at least by becoming the biggest and strongest superpower in the world.
* Take Over the World, such as when he decides to go on the offensive against Kim Possible.
* Take Over the World (that is, Staff Officer Black, not Shenron) gets so pissed off about this that he guns down his boss and takes over the organization, and ignores the Dragon Balls entirely because he already has the resources needed to take over the world.
* Take Over the World with the help of the Chronicoms, not understanding that they are just using him.
* Take Over the World with their superior powers. Also, Xavin doesn't get that being genderfluid is unusual for humans because, for Skrulls, "changing gender is no different than changing hair color."
* take potshots at Dish and DirecTV for the fickleness of their dishes.
* 'Taker also has recognized several wrestlers for their unmitigated courage in facing him, especially if they are far below his weight class:
* Takers by a recently-paroled cohort only to be pitted against a hard-boiled detective and his partner who interrupt their heist.
* Takeru enrolled at Tenbi Academy because it used to be an all-girl school. But since it's turned Co-Ed, the student body is predominantly female; making it his dream come true. So he's signed up
* Takeru knows Haruko from the time they spent together at his father's dojo, where they used to spar. Haruko developed a crush on him during that time,
* Takeru: Opera Susanoh Sword of the Devil arrive at the Kingdom of Jagara, where their three princesses share basic personality traits as the main heroes. The youngest princess is quiet and demure like Oguna, the second princess is brash and hot-headed like Kumaso, while the eldest is in between the two like Izumo.
* Takeru Sato, the lead actor, left the franchise after the TV series; so for future movies and spin-offs, they de-aged Ryotaro into an 11 or 12-year-old boy, making him younger than his grandson Kotaro who is around 18.
* takes a big bite that the mother whispers, "We don't have the stuff to make pancakes." Apparently, they made the syrup too.
* takes a cab and destroys his house. He manages to evade it again... and then he breaks in half for no reason, though this could be explained as an effect of Sniffles being cursed.
* Takes a dark turn in the character of Mesaana. While the other Forsaken were out leading armies against the forces of the Light during the Age of Legends, Mesaana spent her time setting up schools for children in conquered territories. However, it was there that she taught them the values of the Shadow and encouraged them to turn on their own families. Three thousand years later, people still cringe in horror at tales of "Mesaana's Children".

* takes a few bits of fact and wraps them around a backstory for the recently deceased Voldemort to write a sensationalist piece, not realizing that he and a young Rita Skeeter have accidentally hammered out Voldemort's actual history.
* Takes a Level in Badass due to actually being able to see his opponent clearly. Senku later makes proper wire-frame glasses for Kinro, although Suika still prefers to keep using her helmet.
* takes an arrow to the knee before he can shoot Twilight. This is in a setting where guns are the weapon of choice and no character is ever shown to have a bow.
* takes a punch to the face, has the power source ripped out of his cybernetic exoskeleton, has part of a building
* takes a shot from a power staff when Makoto saves Kauru from drowning.
* takes a swipe at this) at one point. "Why do they always look like Canada?"
* Takes a Third Option by freezing time, teleporting to a prop store, stealing a fake, collapsable sword, and using that one on his sidekick. It resembles Hiro's real sword enough that the two villains fell for it
* , takes a turn into action movie territory as the Ghosts of Christmas and Jacob Marley battle someone who stole the Ghost of Christmas Present's torch in an attempt to permanently stop the dead contacting the living.
* "Takes care of the joint"), and a jock strap ("Gets in the way a lot, but basically supportive").
* takes Faye hostage that ends with Spike and Vicious clashing for the first time in the series.
* takes games way to seriously they probably don't have any real malice towards the other team.
* Take Shelter during a fight between the hero and his fellow colleague.
* Take Shelter isn't sure if his dreams are an example of this trope, or just him going mad. It doesn't help that his dreams are seemingly apocalyptic, featuring oily rain and people driven mad.
* Take Shelter, the hero wets himself during a particularly intense bad dream.
* Takeshi and Emi are the same age as Kousei and have been playing for almost ten years. They get overshadowed by him though and that has made them both become his
* Takeshi and Emi have been playing since age six, were also very good for their young age, and are still good pianists at age fourteen. They weren't quite as talented as Kousei though and thus were largely overshadowed by him.
* Takeshi Aono stated on Twitter that he would retire Roy Campbell from the series. By the time Kojima left Konami, he kept his word.
* Takeshi Aono, the voice of Colonel Campbell, passed in 2012. Campbell had previously appeared with other members of the
* Takeshi Aono voiced Ninja Murasaki in the Red Ribbon Army arc and later returned as King Piccolo and Kami.
* Takeshi Kitano is important for being the first American co-production by the Japanese filmmaker, and features different characters who speak English and/or Japanese. This notion of language barrier completely disappears in the French dub, where everybody speaks French without any difficulty.
* Takeshi Kovacs corps, and after mustering out found that the civilian job market for sociopathic killing machines was somewhat limited. With the result that most of the time he worked as a mercenary for criminal syndicates.
* Takeshi Kovacs discovers that the body he's been resleeved into used to belong to a
* Takeshi Kovacs. Even then many characters are subjected to "true death" by having their stacks destroyed or wiped. The wealthy often have off-site backups, but even those can be taken out.
* Takeshi Kovacs fall into some flavor of this trope. Kovacs is an ex-UN Special Forces operator who works as a private investigator, mercenary, and general hired gun, while Marsalis is ex-British Special Forces who specializes in hunting down genetically modified people on behalf of the government. Neither is a particularly nice guy, but then again, they don't inhabit very nice worlds either.
* Takeshi Kovacs features another twist on the cyberbrain sub-variant of this trope, in the form of "cortical stacks" implanted in every person's brain that

basically serve as a mirror backup of the brain in question. Stacks can be transferred to other bodies ("sleeves") at will, transmitted across networks, mounted within VR constructs or simply stored to disk.
* Takeshi Kovacs in a new body when they die. However most people can't afford to be resleeved more than once and unless they shell out a lot of cash they have to go through the whole aging process again, and if you die and your killer destroys your cortical stack, you're dead for good.
* Takeshi Kovacs it's explained that most people can only face going though the whole process a couple of times before giving up and accepting death, especially since it's worse the second time round because you already know what you have to look forward to. As a result, only those who are both very rich and have the right mental attitude can live for more than a couple of hundred years, and are nicknamed "Meths", short for Methuselahs. Meths tend to be amoral bastards:
* Takeshi Kovacs landed. The "angelfire" also makes for good Harlan's Day fireworks, and easy disposal of bodies.
* Takeshi Kovacs. Many sleeves are artificially created to have a range of nonhuman enhancements. They can also upload themselves into non-organic robot bodies or simply into computer programs.
* Takeshi Kovacs novels the only form of "FTL travel" is to "needlecast" your Ego from one system to another and buy or rent a sleeve on the other end.
* Takeshi Kovacs of his mercenary unit who was forcibly wired up to keep him in line. The results are not pretty.
* Takeshi Kovacs on people without remote backups. The client in the first book died that way, but had a 48-hour backup enabling him to hire Kovacs to figure out who did it.
* Takeshi Kovacs series features this trope put toward particularly gruesome ends. Torture victims could be implanted into a computer world, where they would be tortured for hours of subjective time every minute, for as long as the computer stays running. In theory, a person's consciousness could experience millennia of agony without the mercy of death.
* Takeshi Kovacs tailoring the planet's ecosystem and the colonists' biology to mesh together perfectly, and that the first Mars colonists had keeled over upon taking their first breaths of miscalibrated atmosphere.
* Takeshi Kovacs takes place in a largely post-death world where a person's consciousness is housed in a chip in his brain, called a "stack". When his body dies, his chip is inserted into a new one. Bodies, now called "sleeves", are bought and traded like garments. In the first book of the series, a centuries-old magnate hires the hero to find out how his previous sleeve was murdered.
* Takeshi Kovacs that thoroughly plan out the new ecology, including what parts of the native ecology to destroy, before the colonists are even decanted from their cloning tanks.
* Takeshi Kovacs, the UN Protectorate's Envoys recruit borderline psychopaths with just the right mix of inhibition and sense of duty. Most end up resorting to crime after they muster out, the titular character usually works as a detective, bodyguard, or mercenary. According to Kovacs, they prefer to recruit from more conventional militaries as they cultivate that mindset. Though it's not entirely clear where along the scale he falls given how often he mentions his pre-recruitment adolescence as a gangbanger.
* Takeshi Kovacs), they are nearly indestructible barring a deliberate attempt to destroy them.
* Takeshi Kovacs - to a one - are benevolent. Benevolent doesn't necessarily mean inoffensive, though, and every now and then they do get violent - but it's always against people who are committing obvious acts of assorted nastiness.
* Takeshi Kovacs turning in otherwise-loyal citizen who happened to get it stuck in their heads. The government eventually dealt with it by releasing a rip-off version featuring pro-government lyrics set to the same catchy tune.
* Takeshi Kusao, is married to Naotora Ii's voice actress, Yuka Saitou.
* Takeshi Kusao was the Japanese voice actor for Ryo in the original version of
* takes him on, leading to a clash of her Raw Magic against his Chi Magic, with

both also using the Talisman powers they stole earlier in the story. It ends with a draw.
* Takeshi's Castle, features a segmented one consists of various obstacles and challenges throughout a single episode.
* Takeshi's Castle, features this, and it involves the contestants running up a narrow tunnel and then running back into cubbyholes to avoid the polystyrene boulders.
* Takeshi's Castle involved the contestants picking cards dressing them up in bowling pins and having a guard roll a giant ball at them
* Takeshi's Castle was later re-imported to Japan, where it actually became more popular than the original show.
* Takeshi Sendo's raw power and fighting instincts are top-notch. His biggest weakness is lack of technical skill.
* Takeshi Shudō elements and he's still highly respected by a section of the fanbase, Tomioka's contributions are valued as having some of the most mature writing of the show while tackling darker subject matters, while still retaining the more optimistic look that the anime adopted after Kanto.
* Takeshi Shudō liked PokéShipping and supported it, but Shudo reportedly wasn't a fan.
* Takeshi Shudō, since the third movie he went with is considered a contender for the best movie in the series to this day.
* Takeshi's thirteen year old younger sister shows prowess at the piano, however unlike him she only began playing to get him
* takes hyperbole, sarcasm, and humour literally and the loss of her love interest Rose Quartz.
* takes into account the fact that your adversary has the old model that he thinks tells him what you think he is going to do!
* takes its name and first sentence, when Clara Clayton transforms herself from a quiet schoolteacher to a full-on superwoman, who can scale trains in motion, in order to catch up with Doc before he goes back to 1985.
* takes off his glasses, and Rusty puts on a suit, again to impress Stella. Eventually, Stella becomes their platonic friend.
* Takes on a more serious tone when several characters (including his own mother) don't want Michael seeing Ben, who is HIV-positive.
* Takes One to Kill One directly weak to his own element, merely that it's the only means Graham has of being able to fight him on an equal footing.
* takes out one of Blofeld's doctors and steals his clothing so he can infiltrate an operation room.
* takes place in a world where all cartoon characters live, and cameos occur often.
* takes place in the past, with Phoenix' mentor Mia being the Defense. The opposition is a younger Edgeworth, who has all his familiar poses and tics, and... his mentor's obnoxious finger wag, showing the great influence he had on him.
* takes that specific trope and runs with it to create an origin story of sorts for Master Hand and Crazy Hand.
* takes the damage in the first place, so it's possible for an attack to obliterate a player's head/limb. This permanently reduces their perception (head) or agility (limb) to zero, prevents them from equipping any gear for that body part, and (in the case of the head) renders them mute for the remainder of the game, so it's generally necessary to reload from a previous save, just as if they had died outright.
* takes the edge off the horror by having one of the real calls intercepted... by Rachel's voicemail. Which she then deletes.
* takes the family to his new workplace to tell him off. Unfortunately, when she does, he loses the respect of his workers and his boss fires him. Marge feels so guilty that she and the family buy a vacation house from Gill.
* takes the first excuse he can come up with to leave, and Morty refuses, as he is super grossed-out by the sexual nature of the soul-bonding with dragons—and also by the fact that he soul-bonded with his sister and grandpa along the

way—and needs to process everything that happened.
* takes the lead pony badge away from Lightning Dust and expels her from the Wonderbolts.
* takes this premise to its extreme, calling itself a "photographic novel." The comic features actors who play the role of the characters, and uses three different photographers to capture scenes. The photos are heavily post-processed.
* take Superman with him, only to find that the gas doesn't work on Kryptonians. The final panel is of Clark Kent ripping up the last surviving copy of the formula.
* takes up Roman's hat after he dies while fighting Ruby, and seeks to kill Ruby to avenge him.
* takes up what is hinted to be Diego Armando's position as the hot-headed, "never say die" defence attorney as well as the case against Dahlia Hawthorne after his poisoning.
* Take That! about how iCarly is about comedy, not shipping. The next 2 major episodes with promos? 1: Sam admits she's in love with Freddie in the first and 2: locks herself in a mental hospital and after Carly and Freddie can't get her out, Freddie says he likes her too. The next upcoming episode is about Carly reacting to her best friends dating. How on earth that is not shipping-related is beyond a lot of fans.
* Take That! against Boll's fighting skills by claiming that boxing isn't real fighting.
* Take That! against Christianity. This theory hasn't exactly caught on in most academic circles. To put it mildly.
* Take That! against the hip-hop-themed ads for Sprint's Boost Mobile prepaid service.
* Take That! and falling asleep, only to learn in her dream that it wasn't such a great time after all. When she awakes, she's happy to live in modern times.
* Take That! at his critics, Bush and other members of his administration continued to drop the word "strategery" into public statements, and it was used as the title of a book about the President which depicted a disconnect between his shrewd political savvy as represented in the book, and his bumbling buffoonery as represented by his enemies.
* Take That! at Katy Perry) was said to have been inspired from Right Said Fred's "I'm Too Sexy."
* Take That! at this trope, portraying the knights as little more than wandering bullies who picked fights with each other or even defenseless passersby for no reason. The tales of their heroic deeds are entirely fabricated (and absurd on their faces, leading the main character to marvel at how nobody picks up on the implausability of it), and the story features a lengthy description of how uncomfortable the main character is when he is put in his own shiny armor to go on his own quest.
* Take That, Audience!' characters also insulted the audience in their dialogue.
* Take That, Audience!: Critics and even show creators notoriously gave chastising remarks towards audiences for liking or not liking certain elements or/and formulas in their (preferred) works. This became the impetus for the audience-critics war towards the final years of the decade.
* Take That, Audience! everyone's speculating on, learning that what is essentially her god made it that way for no real reason made her want to kill him.
* Take That, Audience! to get the audience to realize Ward's journey was never one of redemption but falling into darkness.
* Take That!. Capcom denies this, stating Tofu was not originally envisioned to be a playable character or even a tofu, rather it was a block the developers made to test hit detection for the game. They decided to take the joke and run with it after main development was done.
* Take That! changed its theme from an instrumental to "It's a Jungle Out There." To hammer it in, at the end of the episode, the fan ends up at Monk's house at one in the morning, having shifted her obsession to Monk after he arrested the lead actor for the murder, tells him that he should get his own TV show some day, and then makes him promise that when he does, he'd never change the theme song. The old

theme song then plays over the closing credits rather than the new one.
* Take That, Critics!, both of which were seen as too disturbing by critics.
* Take That, Critics!, but the temptation to try it is often irresistible.
* Take That, Critics!: The creator responds to criticism by insulting their critics.
* Take That! every Sunday morning, but a couple of verses get into this territory:
* Take That! extremes and eliminating all traces of fun and creativity.
* Take That! fame) follows several different people in the final minutes before nuclear armageddon. The song is just over four minutes long, and counts down with each successive chorus...
* Take That! for any football team you dislike: A woman is standing at the window of her burning fifth-floor apartment, clutching her lapdog. The firefighters can't persuade her to let go of the dog to climb the ladder, so a strapping young man steps up to the building, identifies himself as the star player of [football team], and tells the woman to throw her dog down. The woman complies, the footballer plucks the dog out of the air, puts him safely on the ground to general applause... then backs up three feet and kicks off.
* Take That! had stories in which war was actually prevented, whereas certain more recent American space opera shows (*ahem*seeabove*ahem*) like to depict the heroes fighting unsuccessfully for peace for just long enough to allow a war to break out, so that they can have an exciting war arc without making the heroes look too aggressive and jingoistic.
* Take That! high school kids and fat creeps. Then of course it had the standard well-toned manly man using "a body wash for grown-ups".
* Take That! humor, has lost popularity and approval in recent years yet still rears it's ugly head occasionally.
* Take That! in the line "I know that we were intimate, but that's the part I don't recall at all").
* Take That! It partly ruins the "mechanic" of the joke, but it's (somehow) funnier.
* "Take That!" Kiss: Kissing or pretending to kiss a person to mock them.
* Take That!, leaving Castle Greyhawk as a rarely spoken-of joke module.
* Take That! / living computer of equal or greater than human intelligence.
* Take That!: Making a jab toward another work or something in real life that the author dislikes.
* Take That!. Much to their dismay, the box contained two mismatched surfaces, a few hinges, 3 legs of different lengths and an assortment of screws. They ended up building an incredibly rickety table, and had to resort to using an overturned pot to make one of the legs the same length of the other two. Half-way through the round, it tipped over and fell apart, forcing them to rebuild it.
* Take That! of sorts at the nu-metal sound, in the stylings of Ben Folds. Still qualifies as meta tho.
* Take That! (one team idly passes the ball around the center circle as the opposition just watch) and turns the city into a war zone.
* Take That! rather than the characters themselves slugging it out over in-universe disagreements.
* Take Thats against the Japanese extended into the console's marketing image; the nuclear reactor-esque startup sequence of the original Xbox and the green color scheme associated with the Xbox brand were also meant to invoke radioactivity, like the nuclear bombs that were used to defeat the Japanese in the war.
* Take That! saying "let the real artist work on the design and don't interfere."
* Take That!) saying they were great. Laurieann dropped them as clients not long after.
* Take That, Scrappy!: Making an unpopular character suffer to please the character's detractors.
* Take That! spoof commercial against Duracell, showing their battery outlasting Duracell in a similar toy. The toy used in both commercials? A mechanical rabbit hitting a drum. Fast-forward to today, and the Energizer Bunny used in that initial spoof has become a valuable mascot that keeps going and going and going...

* Take That! story about how Dib got Zim on tape, ending with a completely ridiculous story from GIR involving a giant squirrel who "eats Dib's greasy head" and flies into space to "fight all the bad guys." The host declares all of them crazy, but his producer tells him that it's popular and so he should take the show in that direction. The host, notably, seems to be cracking himself...
* Take That! that can result in a universe not based upon progress and reason.
* Take That! that he feels the need to watch his show from the other side of the room.
* Take That!). The Jets would ultimately have the last laugh, as they beat the Pats 28-21 in that game.
* "Take That!" Tit-for-Tat: A work responds to another work insulting it by insulting back.
* "Take That!" Tit-for-Tat: Dueling works swapping Take Thats with each other.
* Take That! to Apple and their 1984 ad with their 2011 ad for the Xoom, a tablet competing with the iPad.
* Take That! to the callous, superficial, and sensationalistic hack journalism that keeps paparazzi in business.
* Take That! to their old sponsor Butterfinger where Chief Wiggum tried to throw the candy into fire only for it to be thrown back, unharmed. "Even the fire doesn't want them" Wiggum comments. They lost the sponsor because of that.
* Take That! to the latter, including the catchphrase for "Angel Investigations".
* Take That! to the real Nixon, but damn if he isn't a hilariously over-the-top one. "AROOOO!"
* Take That! to Thicke himself as he has a reputation as a Ladies' Man and is one of the first to joke that his work on Pageants is all about access to the contestants.
* Take That! toward door-to-door salesmen: "I'd rather be robbed than suffer through your spiel!"
* Take That! villain briefly caused the team to transform into parodies of the X-Men and X-Force, and as such, everyone now had ridiculously misspelled names. Brickhouse became "Brique," DMZ became "Mister Ree," Flashback became "Regrette," Kwai became "Kwiklash," and so on.
* Take That! was written, the IRS was garnishing writer Robert Asprin's income.
* Take That! when Doc Robbins speaks irately of a long-retired coroner who missed crucial evidence in the original autopsy:
* Take That! when he is being banished into the desert, that his mother had personally delivered him a tribal robe to the prison just before dying (presumably from a broken heart).
* Take That! when they said "Rammstein is Laibach for kids, and Laibach is Rammstein for grown-ups."
* Take That! where his usual enemies are goverment agents hiding his existence from the world can also be read as a criticism of conspiracy theorists - Tom breaks out of his coma when he realizes that no world could be so completely controlled by hidden agendas and corrupt cabals.
* Take That!, where the holographic interface specifies it took the form Clara has in the highest esteem, which is Clara herself.
* Take That!, who accused him of selling out. It characterizes these fans as "petty little ayatollahs" with "dirty hair and tittie-rings."
* Take That! wrote the short short story "The Deadly Mission of Phineas Snodgrass." Snodgrass gives the Romans modern medicine and agriculture…but not birth control. Oops. The exceedingly overpopulated alternate timeline he created decides to do something about it. For added fun, it explicitly mentions the de Camp story. Although clearly the author didn't know that real life Romans had a common method of population control (or maybe he did, but felt it would shock the readers). After the baby was born, if it was unwanted, they would leave it out to die in the woods or street. This was called exposure, and it was common enough to play a major role in Greco-Roman mythology and folk tales.
* take the baby animal home, and in many cases will not be able to properly care for it.

* Take the body off of a Monte Carlo and stick it on a NASCAR frame to make it "road legal".
* take the form of the man the woman loves, so she does not know she has sex with a monster.
* Take the genocide path, and your character will start to show a fondness for knives. And the last weapon you get, instead of being a stick or ballet shoes, is the Real Knife.
* Take the inherent danger of driving in thick fog with some Californians'
* take them off or put them on when Buffy worked out he did this to avoid having to see whatever was going on).
* Take the Money and Run: Being locked inside "The Box" with an insurance salesman.
* Take the Money and Run had some documentary trappings, including the narrator interviewing Virgil's parents.
* Take the Money and Run has a brief background gag of a prison inmate holding a ventriloquist's dummy and taking through a glass screen to a visitor, who also holds a dummy.
* Take the Money and Run's character's holdup note says "I have a gub." He spends some time correcting them that he has a gun.
* Take the Money and Run, this is the result of attempts to teach Virgil to play the cello. As his instructor puts it, "He had no conception of the instrument. He was blowing into it." It doesn't help that he tries to play cello in a marching band.
* Take the Money and Run, Virgil tries to get rid of a blackmailer by giving her sticks of dynamite disguised as candles.
* Take The Poo To The Loo is a UNICEF collaboration with media in India to encourage people to build and use toilets - India has a notorious problem, due to both cultural issues and intense poverty, with lack of proper toilet facilities, open defecation, and the use of everything from open fields to chamber pots.
* Take These Chains from My Heart, who sang the second and third verses.
* Take This Job and Shove It: A character gets so fed up with their job that they angrily quit.
* Take This Job and Shove It (by Johnny Paycheck, it was written and first performed by David Allan Coe. Not to mention another cover by Dead Kennedys.)
* Take this trope and stretch it out to 25 minutes with musical interludes, potshots at the BBC, brandy, shorter sub-feghoots existing solely to put in awful puns,
* Take This Waltz is a nice guy and a loving husband but his wife's dissatisfaction with her comfortable daily life causes her to pursue someone else.
* Take this with a grain of salt, though. The evidence is spotty, composed partly from the accounts of the assassins (who played up the difficulty to make people think he had demonic powers) and the fact that his body was found with water in his lungs, which can happen after death. The fact that his autopsy report contains (paraphrased)
* Take Three: The team finally found the flag, but a cameraman slipped and blocked their path as they were making their way to the next obstacle. To make matters worse, no time went off the clock.
* take to blast himself. Later in Water 7, Sanji floors Chopper in his Heavy form to restrain him from getting involved in Luffy and Usopp's duel.
* take Túrin's life when the hero commits suicide, out of a combination of native darkness and bitterness for Túrin accidentally murdering its previous wielder.
* Take two characters who would otherwise have nothing in common or anything to discuss and
* Take-Two Interactive, while ignoring its intended audience in the advertising (which looked like a normal military shooter to trick people into thinking it was) due to hoping word of mouth would kick in. It didn't until far later than they hoped.
* Take Up My Sword: The hero dies, and a new hero takes up the old hero's mission.
* take years and effectively write her out of any future episodes is to assume that

NOMAD actually masked or repressed the memories, not erase them as it claimed - one more strike against its arrogant perceived perfection. This is further demonstrated by her intuitive grasp of Kiswahili that NOMAD was unable to remove.
* "Take Your Child to Work Day" Plot: An episode revolving around a parent taking their child to work. Hijinks usually ensue.
* Take Your Time dialogue files suggesting the player would have had the option of rescuing him).
* Take Your Time is one of the hardest; make ONE wrong move and the game is lost.)
* Take Your Time, the bomb will never actually go off, nor will the situation at the sabotaged industrial plant get any worse.
* Take Your Time: The villain won't put his dastardly plan into motion until you get there, no matter how long you partake in various sidequests. Wouldn't be fair to just realistically railroad you.
* Take Your Time. This happens at least twice in the game, in addition to normal story time skips. (The last era of the game is explicitly mentioned to have taken two years.)
* Taki has many by the same virtue. One of her throws has her grab her opponent by the neck and shove her sword straight through their neck clear to the other side.
* Taki Matsuya, also known as Wiz Kid, has the power of "technoforming," the ability to make metal morph into any machine he can think of. His own wheelchair is usually the closest thing at hand. It's usually a normal wheelchair, but he'll modify it to fly, shoot missiles, etc.
* Taki Matsuya demonstrates this during the episode "No Mutant Is an Island". His mutant power is the capacity to transform any vehicle he's in, so he does so by turning his wheelchair into a miniature tank with a bulldozer blade.
* Taking a cop or civilian will cause other cops to not shoot. Unless they're behind you. They also think nothing of running you both over with a car.
* Taking Advantage of Generosity: Demanding more of others who are being generous.
* Taking Advantage of Generosity: People will take others' kindness for granted.
* Taking Advantage of Generosity: Pussies like you deserve to be taken advantage of! Now buy me stuff!
* Taking Advantage of Generosity: What better way to achieve my goals than to exploit others' kindness.
* Taking advantage of it being in German, they bleep Rich Evans at random times while phonetically reading the back of the box of
* Taking advantage of their food being very heavily standardized, McDonald's once experimented with a robotic kitchen, going so far as to build a Hong Kong outlet that used one. They scrapped the idea, but not the outlet, when the construction and maintenance turned out to be far more costly than employees. Their one fully automated outlet is still there, as a minor tourist attraction, but building more isn't worthwhile with today's technology. Likewise, "vending machine" restaurants are seldom seen today even as curiosities, because of the complexity of food preparation. Thus it's cheaper to train maneuverable high school kids than to maintain the equipment. Same thing goes for having a small, well-trained staff that makes complex food. These people will usually be harder to replace, or wield more clout during employer-employee conflicts. It's just more convenient with fairly untrained, unorganized kids, most of whom do not expect to work there more than a few years, if that.
* Taking advantage of this, Diva'ratrika had the Sharen led by Sarv'swati attack the weakened Sarghress.
* Taking advantage of this is a crucial element of fencing. Most good fencers will attack, parry, and move reflexively, so variations in your technique will throw the other combatant off. The 1, 3, 7, and 8 parries are slightly more difficult to pull off than the 2, 4, 5 and 6, but the techniques to avoid them are different.
* Taking aim at the hourglass/spinning wheel/whatever which is there to convince you that your computer is actually doing something,
* Taking a Level in Badass causes her to feel guilty to the point of tears.
* taking a level in jerkass" of his season only because he was up against even worse villains.

* Taking a Level in Kindness. When SSS, SSJ and Bonnie formed a new team of heroes called The Upperclassmen, Bonnie took on the codename "The Mechanic".
* Taking a page from Sokal, James A. Lindsay, Peter Boghossian, and Helen Pluckrose decided to try their own experiment by making up
* Taking a page from the Steely Eyed Missile Men, a number of folks in commercial aviation likewise summon
* Taking a parody/satirical work seriously. Bonus points if the work in question has visual/audio cues that indicate the creator is joking and doesn't actually advocate its message(s).
* Taking a risk on a connecting flight with less than an hour layover or where you have to make multiple connections for a minimal lead is way too big of a gamble. As late as season 21, the top team made the former mistake and got over 12 hours behind everyone else because they ended up missing their connection which would have given them only an hour lead on the other flight. They got so far behind in leg 7 that they missed equalizers and it took them three legs to catch up with the pack and got eliminated. In season 23, Chester and Ephriam made the latter mistake. Their booking agent made a mistake and they tried to rush her to fix it, she got so flustered that she suggested the two stop layover instead of the one layover. They weren't in last place and a later team did get on the one layover flight. They missed their second connection and got a
* Taking a single hit will reset the ring counter to zero. However, reaching 100 rings twice in a single stage (for example, by collecting 100, taking damage, and collecting 100 again) will not award a second extra life. Same for collecting 200 rings.
* taking away his finger, as the Yakuza rules demand. But rather than using something sharp he uses a metal ring he is wearing, grinding the mook's finger against the floor until it comes off.
* Taking Back Sunday, Brand New would put out merch with "because mics are for singing not swinging" on them as a pot shot to Lazzara.
* Taking Back Sunday has two songs that are equally considered their signatures: "MakeDamnSure" and "Cute Without the 'E' (Cut from the Team)". The former was their only hit on the Hot 100 and the highest-charting song of their four entries on the alternative charts, but the latter never charted anywhere; despite having a popular music video released, it was not a single.
* Taking Back Sunday replaced their lead guitarist and back-up vocalist for the second time, they ended up with two Matts, Matt Rubano on bass and now Matt Fazzi on guitar. They differentiate by last name.
* Taking Back Sunday's "Faith: When I Let You Down" tells the story of the OMGWTFTBS Cat, an anthropomorphic cat that abandons Taking Back Sunday for fame in Hollywood.
* Taking Back the House made-for-TV sequel, Kevin McCallister creates a flood in the expensive home of his father's suitor, whom he was staying with.'
* Taking care of a dog prepares you for parenthood? Riiiight! include:
* Taking Care of Business, Jim Belushi plays a convicted car thief who escapes from prison specifically to attend a world series game for which he won tickets. During the game, he catches a foul ball that is caught on the jumbotron. He has to make a swift exit from the stadium shortly thereafter as the cops close in on him.
* Taking Care of Business, Jimmy Dworski escapes from jail, finds the Filofax of Spencer Barnes, then impersonates Barnes until the real Spencer Barnes shows up.
* taking care of them is too much for him to handle, and he calls the police so they can take him back to jail.
* Taking Chance, American military members who die while serving overseas are kept under a military escort for their entire trip back to their home town. The movie follows a Marine officer who volunteers to escort PFC Chance Phelps for the last few legs of the trip between Dover AFB and Chance's home town.
* Taking Chance: The very beginning of the film does this from the point of view of the military personnel delivering the notice.
* taking credit for Big Hero 6's accomplishments is hijacked by Steamer. Big Hero 6 uses Mega-Max to fight back. Because 4 2 Sing's mecha has no weapons, Steamer is

quite resoundedly beaten and exclaims "I'll have my revenge, boy band! Even if your songs are delightful earworms!".
* taking damage, a loud thud, and any background music cutting out for a second before fading back in.
* Taking damage, killing civilians, or trying to go into the wrong places in the
* taking doors off their hinges and separating glass from windowpanes.
* Taking Flight (and Fights), Bruce Banner and Jen Walters try to offer similar moments of understanding to Ben Grimm after he becomes the Thing.
* Taking Flight (And Fights), it's said that the Avengers turned to Doctor Strange after the transformation of Jennifer Walters and later the Fantastic Four. In both cases, Strange said he didn't want to risk mixing magic with radiation-caused transformations as the results could be quite messy.
* "Taking Flight" has a sequence as Alurra and Coran prepare the castle for flight, activating various systems until it finally launches into space.
* Taking Harry's experience into account, it's implied this played a part in the tragic origin story of the Resurrection Stone; a wizard used it to bring back his deceased love but because she wasn't truly alive, he eventually
* taking her own life in South Asia, with at least eighty percent of victims being female.
* taking her to Disneyworld and having a huge musical production put on leading up to his question.".
* taking his would-be-food in as a friend. A snake in a Japanese zoo wasn't eating after being added to their exhibit. They thought maybe it wanted something more...lively. One of the caretakers figured that the snake may have caught on with their trick, since normally they use warm meat to trick the snake's senses into thinking it's still alive and snakes won't eat dead things unless they have to. They placed a hamster in the enclosure with him and...they started cuddling. Turns out the snake was stressed from the trip and started eating again, with the hamster as a companion.
* taking in a raggedy stray dog. The dog is a Border Terrier, however it's meant to be a mixed breed in the narrative.
* taking in hostage most of the civilian population took over in Italy.
* Taking into account energy costs and The Theory of Interstellar Trade by P Krugman would need the looted resource to be quite valuable to make it worthwhile.
* Taking it a step further, a modern-day person travelling back to Shakespeare's London would probably be very confused by the accent. During Shakespeare's time the predominant accent in England sounded a lot like the modern-day southern Appalachian accent.
* Taking it to an even further degree, Steinman's "It's All Coming Back To Me Now" was written for Meat Loaf, first recorded by Pandora's Box, was later covered by Celine Dion (whose version hit #1 on the US charts), and eventually came full circle when Meat Loaf sang it on his album
* Taking Lives, in which a police chief says, "Ah, it's over", after about 70 minutes. Naturally, it isn't.
* Taking Lives, in which the Sûreté du Québec swoop down in helicopters in front of a train station in Moncton, New Brunswick (somehow managing to get there from Quebec in 20 minutes).
* Taking Lives, most of the main French Canadian characters are played by French actors using their own French accents. The difference between Quebec French and Metropolitan French is as big as the one between British English and American English. Even more bizarre, the movie itself was shot in Quebec City and there are some bona fide French Canadians as secondary characters.
* Taking Lives when Angelina Jolie's character reads to a murder suspect a list of nouns that goes something like "pants, car, house, cat, rape, incest, murder", explaining that a person's brainwaves react in a certain way to words such as the last three unless they are a sociopath.
* Taking Lives who murders people who look like him, then assumes their identities.
* Taking Magnetic damage gives your screen a mildly debilitating scrambling effect. It used to be

* taking martial arts classes and Shaggy and Scooby spend the entire second movie performing investigations on their own to prove their worth (of course, the success of said investigations is pretty limited...)
* Taking musical instruments, e.g. guitars, and adding a healthy dose of electrical magic to create electric guitars.
* taking off his shorts and running around in his underwear take his shorts off the second time.
* Taking Off tells of how a couple's search for their runaway daughter leads them into contact with other parents in a similar situation. The two form a friendship with another couple, and all four take the opportunity to rediscover their youth together with marijuana and strip poker.
* Taking one's dagger and plunging it into a table between oneself and another Klingon is another challenge to a duel to the death, as seen in the DS9 episode "Sons and Daughters". Luckily for
* taking out an entire rival Dalek squad times more powerful than the normal Dalek gun. There's a reason the other Daleks called it "the Abomination".
* taking out Luca Blight using Xanatos Speed Chess than see it ravaged by war thanks to the disjointed alliance that is the city states.
* taking over focuses on an event that was significant to the backstory of a few minor characters, but wasn't expanded on or terribly core to the main plot until it got a game devoted to it.
* Taking Over Heaven: Someone taking control of Heaven away from angels and God
* taking over their bodies when her own gets to be too old calls Flemeth's possession "a gift" and refers to it positively, though it's not entirely certain if she had gone through the entire process.
* Taking Over the Town: The villains take over a town and steal from it.
* Taking Over the Town: Villains cut a town off the outside world so they can use it for their own nefarious purposes.
* taking Peril's dick with him. To do so without anyone actually getting hurt, Phase gets Bugs to create a model penis. Cue everyone walking in just in time to see Bugs kneeling down next to his very erect penis. Including his girlfriend.
* taking pictures of everyone at the end of the trip to Kyoto, she takes a picture of several of her classmates in the hot springs, including Mana Tatsumiya. She was hiding a gun under a bucket and is seconds away from shooting Kazumi.
* Taking pictures of the floating cats is deadly. Established over a year before firing in episode 48.
* taking refuge inside Toot's dead body. Spanky mentions that it makes no sense to just bring chartacters back to life, which Ling-Ling agrees on... even though he died and was eaten earlier.
* taking refuge in the church notice a trail of blood leading up to the bell tower where he's hiding.
* taking shots at each other to bother acknowledging anyone claiming to be part of the "PC Master Race" with anything more than vague annoyance at best and complete indifference at worse.
* Taking someone else's food. Extra bonus points if the person they stole from is poor, and EXTRA bonus points if the person in question is a kid, such as taking candy from a baby.
* Taking suicide leaps off Jon's desk while he's trying to explain the same thing.
* Taking that one step further, even if your actual hitbox gets hit, in some games (read as:
* Taking the Blame for the damage caused by Betty's new cat. Betty eventually caught him in the act however.
* Taking the Bullet and is later brought back to life for the rest of the season.
* Taking the Bullet: Jumping in front of a firing gun so that you get shot instead of the intended target.
* Taking the Bullet: Jumping into harm's way to save someone who would've died had action not been taken.
* Taking the Bullet: the victim jumps in front of the projectile on purpose
* taking the Civic off of the recommended list, where it was for ages. to admit

that they whiffed.
* Taking The Falls implied that Elvis was still alive, and hiding out at Elvis Impersonator conventions.
* Taking The Falls, it turns out that Elvis is still alive, and hiding out at an Elvis impersonator convention.
* Taking the Fight Outside: A fight, or the buildup to it, is interrupted by a request to settle the score outside.
* Taking the Fight Outside: Relocating the imminent fight scene to somewhere a little more socially appropriate.
* Taking the Kids: Oftentimes, the protagonist, when faced with an abusive situation, is fighting not only to get herself out of it, but the kids as well.
* Taking the son to their job. Usually ends with the child either causing trouble at the workplace or being extremely bored the whole time.
* Taking the Veil Madonnas. No exceptions. Double points if they also happen to be beautiful and actual virgins too.
* Taking the Veil: The "Immured" variant of it fell aside by the end of the Victorian era.
* Taking things a step further is Defense Distributed, which produces and hosts CAD files for making fully functional 3D-printed guns. The centerpiece of their project is the "WikiWeapon," which is an open-source handgun made almost entirely out of plastic.
* Taking this even further, almost every non-boss encounter has more than one non-murdery solution. During the end credits, each of them will appear with
* Taking this even further, the season five finale (and could-have-been series finale) hints that Chuck is actually
* Taking this methodology a step farther, there exists Christian spanking porn. Of course, the makers deny that it's porn at all and prefer the term "Christian domestic discipline romance fiction". They claim it was created for Christian couples to explore what God intended for marriage (i.e. According to the makers, He wants husbands to spank their wives) without having to look at anything icky.
* "Taking This One To The Grave" begins at another crime scene, this one on Thanksgiving Day, with all the Liars except Spencer present.
* Taking this to a logical conclusion, some players would take advantage on a
* Taking this to the extreme, due to various character cameos and crossovers, much of television history may take place in the mind of
* Taking too long to make the final decision results in the destruction of the Crucible.
* Taking weapons from dead enemies was also relatively common, both as trophies (Lugers taken from German officers) and for more practical reasons (British soldiers would take German MP40s over their own Stens, since the Sten
* taking whatever gender they need to make the baby, and it's within Lunar abilities to make a knack to get around the need for a male and a female to make a child. Their patron Luna is known to appear as a pregnant adult male when it feels like doing so.
* Taking Woodstock has a bad-ass cross-dressing Marine: "Semper-fi you little prick".
* Taking Woodstock. She turns out to have a huge stash of money in the end, she just was tight with the money to keep her son helping around the motel.
* taking your foes alive for ransom the player ends up having to fight Tsun in honorable combat.
* Taking You with Me: A person who gets killed makes it so that their killer dies with them.
* Taking You with Me: As the villain dies, they try to ensure that the hero dies with them.
* Taking You with Me at the Battle of Luthien, tricking them into charging into what they thought were the defending lines to start making kills, only to get much of their force annihilated once the whole field of Mech-shaped bombs went off.
* Taking You with Me into the Coalition flagship, killing the guy who orchestrated the sneak attack at Fort Kennedy at the beginning of the war. The Coalition admiral

realizes too late what his old acquaintance is planning to prevent the collision.
* Taking You with Me is implied when Gambol attempts to have The Joker killed before settling on a bounty.
* Taking You with Me one of the heroes. The kicker is Cell's nonchalant quote afterwards.
* Taking You with Me on Majin Buu, asks Piccolo if he'll see Goku in the afterlife. Piccolo tells him point-blank that even though the Saiyan prince has cleaned up his act recently, he still spent a major portion of his life doing evil and fighting for his own pride. As such, he's going to Hell.
* Taking You with Me: Someone about to be killed makes it so that their killer dies with them.
* Taking You with Me which inflict damage on geological scale serve as a strong deterrent.
* Takin' Over the Asylum - Mostly in the first half of this 6-Part Scottish miniseries.
* Takin' Over the Asylum of a major character at the end of Episode 4.
* Takistan has any resemblance to the First Gulf War for how it started, the Second Gulf War for what happened to the country, or to Afghanistan for how the local people behave.
* Taki. While she just misses the mark at 5'7", she's practically a giant considering that she's
* Taki, who becomes the tight end for the Devil Bats. He joins during the middle of the Death March through America and is eventually Flanderized into becoming a huge idiot and an extra person to make short passes to. Only in one instance was he a winning factor for the team.
* Takotsubo: The story of a superhero to acknowledge that he's a superhero.
* Tak retrieving the Meekrob crystal, it's mentioned that he threw the Robo-Parents out a window. They apparently had no problem with it.
* Tak subverts the trope... for about ten seconds, until just after she's introduced herself. Then:
* Tak The Great Juju Challenge, Tak and Lok return to the dining area, expecting a huge celebration of their winning the Challenge. Instead, they find only Jibolba sweeping. Jibolba explains that everyone went home early to beat the traffic.
* Takua/Takanuva: an islander with a short stature who eventually becomes
* Takuma Sakazaki. He would go on to explain how he ended up in the situation he was in.
* Takuma Terashima as Leohart Saijo and Mizuki Shibata, although it should be noted that their relationship had already started in 2009, five years before that anime debuted in 2014.
* Takuma Yokota has established a shared universe between his various series starting with the short story
* Takumi and Haruna of the Shin'i Organization and villainess Kuu in
* Takumi could have let Norose use Noah II to greatly improve the world but he saved Rimi instead. Of course, that's assuming the psychopathic Norose would use the Noah II as he claimed he would.
* Takumi, despite being hidden under a cloak, shows off quite a bit of his toned chest and legs.
* Takumi-kun the melodramatic school "queen" Takabayashi has it out for Takumi because he wants Gii, the school idol. When he goes after Takumi with a piece of glass, his roommate, Yoshizawa, who is in love with him, slaps him and scolds him for his behaviour. Somehow this leads to Takabayashi realizing he likes Yoshizawa back.
* Takumi's dad Bunta Fujiwara is quite possibly the best driver in the whole series. He can four-wheel drift an 80's Corolla Hatchback, with ZERO counter-steer, at insane speeds.
* Takumi's rival Keisuke Takahashi, while initially quite unexperienced, quickly catches up with Takumi and by the end of the series Takumi admits he isn't sure if he'd win if he was going up against Keisuke. Compared to Takumi who uses flashy signature moves and a driving style purely refined for mountain passes, Keisuke

utilizes a more traditional circuit racing techniques and
* Tala and Luthor's relationship definitely has shades of this. Before that, it was implied Luthor and Mercy Graves were like this.
* Tala has a close and supportive relationship with her granddaughter,
* Talamak has 12 elements: water, fire, wind, earth, flora, fauna, flux, chimera, storm, time, space, and decay.
* Talarian genders have very different social roles, and are liable to underplay the importance of the other gender's work. Given that politics and leadership is a male role, this is most notable and extreme when the male government neglects their people's feminine sphere, leading to unrest in one novella. The Gorn seem to have shades of the same problem; emphasizing the warrior component of their culture and disregarding the equally important non-military aspects. In their case, rather than a gender division it's a matter of caste; the Technologist caste appears to be looked down on by the warriors. As an interesting extension of the idea, the Political caste seems to have such fear of the warriors' tendency to promote themselves above other Gorn that they've deliberately undercut their power by giving them only a single breeding world.
* TAL Chau Yoong stated he would ensure Hiljo's soul was taken care of, before taking him away to properly bury him.
* Tal'Darim engineering is basically "jailbreak stolen technology until you find maximum DPS" and then ignore all the glaring problems this
* Taldor sun goddess Sarenrae was outlawed for decades because of politics. Sarenrae is a solidly benevolent deity, but she's also the patron god of Taldor's greatest rival, and the Taldan emperor worried that the faith harbored treasonous foreign influences.
* Talent Contest: Characters participate in an amateur talent contest.
* Talent Contest: I'm gonna win this contest, because I got more talent than anyone around here!
* Talent Double: An actor has a stand-in for when their character needs to demonstrate a skill that they lack in real life.
* Talented Princess, Regular Guy: A romantic pairing consisting of a princess who is skilled and a guy who is pretty ordinary.
* Talentless Nana after the former stumbles on the latters "art" of mutilating wild animals and he's subsequently killed to keep him quiet.
* Talentless Nana. Eventually, some students start catching on that she's faking her Talent.
* Talentless Nana has Tsunekichi Hatadaira and his "Talent" of prophetic dreams, documented using a Polaroid camera. All the scenes depicted on them come true and attempts to avoid your fate oftentimes cause it to happen in the first place.
* Talentless Nana. Her friend Nana goes to great lengths to take care of her, including breaking and entering into the cafeteria to get ingredients for soup. She cuts her finger in the process and when Michiru tries to habitually lick it better, Nana yells at her for wasting any more of her lifespan on such a minor injury.
* Talentless Nana is sparked from a generation of teens awakening to superpowers and realizing that they could get away with anything with it. It takes several years of warring between the supers and the rest of the world before they are finally contained, establishing the training academy where every Talented teen is sent upon awakening.
* Talentless Nana, Nana leans in towards Kyoya as if intending to kiss him.
* Talentless Nana while Yuuka Sasaki has golden blonde hair and eyes both. Considering the world is full of superpowered "Talented" individuals, this isn't very noteworthy.
* Talents series plays this mostly straight. Those few protagonists who espouse a belief in a higher power are, at most, vaguely Deist. Those who are openly devout are almost always portrayed as mentally unstable troublemakers. Organized religious populations are shunted to backwater worlds where "the harm they can do is minimized."
* Tale of a Eunuch, has a rather baffling moment where two fighters brawling all over the palace's courtyard ends up in a dining hall filled with food. At which

point both fighters ends up grabbing and throwing food at each other instead of trading punches.
* Tale of Eun Aran, we find out after Aran is gifted with superhuman fighting skills and power that he would spend his days playing games and daydreaming about fighting evil.
* Tale of Food among the foodsouls as they don't reproduce only adds fuel to the incest shipping fire. One of the major ships in this fandom is Dézhōu × Ah-Fú.
* Tale of Food. Many other long-haired foodsouls, while nowhere as outrageous as this guy, are no slouch either, especially rarer ones: Yángzhōu Fried Rice, Lóngjǐng Shrimp, Osmanthus Wine, Farewell My Concubine, etc.
* Tale of Genji it. Genji is the son of the Emperor but can't be named a successor because of his low-ranked mother and his evil stepmother, Kokiden. Later in the novel, Genji is talking about stories with his son and notes how tiring it is to see all the wicked stepmothers in the local stories.
* Tale of Styrbjörn": An exiled Viking prince battles his uncle for the kingdom of Sweden. A short tale thanks to its extreme condensation, but epic in scope.
* ''Tale Of Tales'' scenes which are open to many different kinds of interpretation. The scenes also don't seem to appear in chronological order but are connected by the association of one thing with another, in order to reflect the structure of a human memory. It's one of the greatest animated shorts of all time and one of the better examples of this trope.
* Tale of Tales: You'd think the ogre would have died falling into the deep chasm, but he just shows up again after a while.
* Tale of the Brave) also qualifies. She could talk for hours on end about her past adventures and how she loves digging. This sometimes causes the other engines to avoid her, though Thomas is always happy to listen to her stories. Ironically, she does not think of herself as talkative.
* Tale of the Brave merchandise reveals the fact that the engines find dinosaur bones in the China Clay pits towards the end of the movie. These include the Wooden Railway "Oliver's Fossil Freight" model, which depicts Oliver pulling a freight car with a fossilized dinosaur skeleton, and the Take-N-Play "Roaring Dino Run" playset, where Thomas finds dinosaur bones and delivers them to the museum.
* Tale of the Comet, and some of the aliens learn magic by watching a native Wizard.
* Tale Of The Corporate Succubus (and the lewdest thing she can imagine herself doing with him is holding hands).
* Tale of the Dread Gazebo player who has no idea what a gazebo is but refuses to admit it, runs with the assumption it's some kind of mythical monster and tries to "slay" the gazebo.
* Tale of the Mummy, the excavators of an ancient tomb are hunted by a mummy whose bones disintegrated long ago, so it manifests as a mass of CGI-animated bandages that enfold its victims.
* Tale of the Nine Tailed's love interest being his past lover reincarnated.
* Tale Of The Sky Maiden, with the result ending the same both times, if not more horribly for her the second time.
* Tale of the Unwithering Realm), since "the darkness is without form, and void, so the works of men must fail in the twilight, because their form is less." However, there's more to it than that: each world has different physical laws and different arts which work in it (e.g. science for our world, necromancy or astrology for others), and the twilight nullifies all technology/magic which is characteristic to individual worlds and not common for all of them. Hence also why astrologers of the Dark Tower must use gigantic clockwork Babbage machines instead of computers to do their predictions; only simple mechanic devices function correctly near the sources of twilight.
* Tale of Thorstein Shiver", in which Thorstein Shiver tricks a demon with the help of King Olaf Tryggvason, ends with a laconic note that Thorstein died in battle defending King Olaf on his longship a few years later.

* Tale of Two Wastelands, engine, circumvented this by pulling the assets directly from the player's installed copy of Fallout 3, which avoids circulating the assets of the game altogether.
* Tale of Yashima features several kappa as both characters and monsters.
* Tale of Yashima is a fantasy set in the Sengoku Era of Japan, a time where man and yokai co-exist. It follows the adventures of several clans as they vie for control of the country, unaware that the yokai are up to something big behind the scenes. It's clan vs clan, but soon they'll have to unite if they want to survive what's coming. The Night Parade takes no survivors, and not everyone will make it until the end.
* Tale of Yashima: Several of the female characters, but Atsuda Manami in particular.
* Tales also had an episode where a woman is annoyed by a constantly ringing phone in the apartment next to hers. Later this escalates to what sounds like someone in the apartment trying to break through her bedroom wall. Finally she steels her nerves and goes over there...
* Tales, and it can't be done until very late in the game, usually after you've completed the entire story up to the final boss. Also, since they scale for each character based that character's individual kill count, the weapons for party members that you don't use or that focus on support will most likely be useless. By the time you can properly use these weapons, you won't need them, and they might only be useful for a scant few of your party members to begin with.
* Tales Designed to Thrizzle where two perpetually-frightened kids keep having people barge into their room by jumping through the windows. The third jumper lampshades that there's a three-for-the-price-of-two sale on windows at the store, so by breaking the third window, she was saving money.
* Tales), despite them being somewhat out of place in a medieval fantasy setting. Nobody knows why she wears them, but they've become her signature costume item.
* Tales dodging, this isn't as difficult as it sounds due to the action/real-time battle system of the series.
* Tales for the L33t: Hamlet", Marcellus' response to seeing the ghost is to "siht" his pants. This becomes a running gag throughout the film.
* Tales For The Midnight Hour: A horror anthology series by J.B. Stamper, focusing largely around sci-fi or fantasy horror.
* Tales For The Midnight Hour: Ellen asks her friends if anyone dares her to ride the Tunnel of Terror. One of them obliges her. Everyone soon wishes that they had chosen another way to liven up the afternoon.
* Tales For The Midnight Hour: Multiple stories end with the protagonist alive but still in danger.
* Tales For The Midnight Hour: "The Gooney Birds" tells about a troop of scouts who find evidence of larger and larger gooney birds while on a camping trip. At the end, the gooney birds carry them all away.
* Tales For The Midnight Hour, which echoes his own life. The book ends with the in-story avatar realizing something horrifying and just stopping and waiting. As the protagonist tries to figure it out, he realizes he's waiting for himself to arrive and start the evening all over again.
* Tales from a Forager's Kitchen, people quickly started calling out the book for being full of recipes containing ingredients that are inedible or toxic when eaten raw, including morel mushrooms (can be confused with false morels, which are lethally poisonous), elderberries (eating large amounts of elderberries can make some people sick), and acorns (which are very bitter if not leached to remove a chemical called tannin). The book was quickly pulled from shelves to avoid lawsuits.
* Tales from a Galaxy Far, Far Away Volume 1: Aliens only to end up swallowed by a sandworm before any of the other combatants even realize he's there.
* Tales from Beyond the Galactic Terrorvortex at the end of the previous album.
* Tales From Dev Null puts jokes in GDPR cookie notifications and share buttons.
* Tales from Earthsea by Goro Miyazaki, Hayao Miyazaki (who had a long-term rift with his son and was skeptical of his son's filmmaking abilities) unexpectedly came

to its premiere. Then he wrote a note to his son. "It was made honestly. I liked it."
* Tales from Earthsea: Released in Japan July 2006, released in North American theaters August 2010, 4 years later.
* Tales from Earthsea, the evil Sorcerer Lord Cobb wants to be immortal through means of Black Magic, which means the death of the world.
* Tales from Earthsea, the sightings of dragons fighting is taken to be a sign that the balance of the world is greatly upset, perhaps irreparably.
* Tales from Jabba's Palace are mechanisms used for getting around by a group of monks who have chosen life as brains-in-jars. (You can actually see the jars on the undersides in the film if you know to look for them.)
* Tales from Jabba's Palace, Malakili the Rancor Keeper was previously employed by the Circus Horrificus, where Hutts paid to see weird creatures get tortured to death.
* Tales from Muppetland: The Frog Prince: During dinner, Robin tries to warn King Rupert that "Aunt Taminella" is really a witch, but every time he does, Taminella "offers" him a popover and stuffs it into his mouth. When she offers to take the frog away, King Rupert agrees, as "he's eating all the popovers."
* Tales from Muppetland: The Frog Prince had a particularly silly version of this. The Princess's evil aunt places a spell on her where she is unable to speak straight. Despite trying her hardest to explain that "Tant Aminella" (Aunt Taminella) is the evil witch, no one catches on.
* Tales from My D&D Campaign, and Draven Rowe lost his ancestral lands (though his parents got out okay).
* Tales from My D&D Campaign, and most obnoxiously of all, they inflict 1d6 negative energy backlash damage every time you hit them in melee. Not all that hard to kill, but each fight eats a bit of the party's healing resources due to their attacks and backlash damage.
* Tales from My D&D Campaign, and The Duke Of Newland is a badass who responded to a call for surrender from the evil Kua-Toa by jumping off the wall of his fort onto the enemy herald.
* Tales from My D&D Campaign are flat-out immune to poison. This also means that they don't get drunk from alcohol. Apparently, Kua-Toa drink straight formaldehyde if they want to get buzzed.
* Tales from My D&D Campaign a troll just because the troll happened to be in its way.
* Tales from My D&D Campaign can level a small city, this is, to quote the narrator, "one hell of a badass nickname".
* Tales from My D&D Campaign can regrow from nothing more than their jawbone. Since the jawbone itself cannot be destroyed by any known force whatsoever, this renders trolls utterly unkillable.
* Tales from My D&D Campaign every time something attacks him or he attacks somebody. Unfortunately, each time he does this it tears his clothes to bits, so he's totally naked when he shifts back to his decrepit-old-man form. On the plus side, his clothes regenerate, on the down side it takes about 20 seconds and he transforms far more often than that in battle.
* Tales from My D&D Campaign features the Kua-Toa, who thanks some major divine blessings have conquered the entire ocean and a good part of the land.
* Tales from My D&D Campaign features the Warforged, a race of sentient wooden golems created by the ancient Ytarrans. Also, in more modern times Vistria relies heavily on more conventional golems for defense against the evil Kua-Toa.
* Tales from My D&D Campaign isn't a disease in the most technical sense of the word, as it doesn't seem to be contagious. Caused by exposure to the astral radiation from active Ytarran Teleportation Portals, the Plague wiped out the entire Ytarran race within a generation. More recently, the heroes have become infected, though they are at present shielded from the effects by a friendly spirit. However, the protection won't last forever, and the party will eventually need a cure.
* Tales from My D&D Campaign). It turns out his outfit is self-regenerating,

growing back after about 20 seconds, but this means that he's an aversion to the trope, even though he has literal magic pants!
* Tales from My D&D Campaign's dwarves are typical in that they are greedy, stocky, bearded miners, craftsman and merchants, who worship Moradin, like axes and drinking, compete fiercely against each other yet band together all the more fiercely against any external threat, discovered Adamantine (and possibly Mithril), and used to live in mountain dwarfholds. They may slightly diverge as they were driven from the dwarfholds centuries ago, the survivors resettling in more traditional towns all down the Diamond Coast, and they are even know to crew sailing ships (though most don't swim, and their hulls are metal-plated, as you would expect from Dwarf-boats).
* Tales from My D&D Campaign, the party discovers that there's a bounty on them: "10,000 gold for the head of the Orcslayer, and 5,000 gold for the rest."
* Tales from My D&D Campaign, this race was once a great power in the land. But a couple of millennia back, they sent out messages to all the other races saying, in these exact words, "We are tired of the gods interfering. We are leaving now." And... they left. As far as anyone can tell, every last Adar, and even most of their cities, simply vanished into thin air. Noone has the slightest idea where they went or what they are now doing.
* Tales from My D&D Campaign using their skin secretions. This not only lets them produce the cloaks for 1/100th of what such a powerful item should cost, but also makes them impossible to steal, as only a living Kua Toa can produce the chemicals that power the thing.
* Tales from My D&D Campaign. While a few Warforged have learned enough about artificing to maintain their golem bodies, an even smaller group, called the "Dark Ancients", have instead developed the ability to disconnect their consciousness from their physical body, allowing them to possess other construct bodies. It is widely suspected that the Dark Ancients are behind the occasional rediscovery of caches of sleeping Warforged, as this ensures a supply of fresh bodies.
* Tales from Netheredge in collaboration with the author, showing most of the places mentioned in the cycle so far.
* Tales from Netheredge over the Genzies under the guise of "keeping them safe".
* Tales from Netheredge, Piff has a habit of beginning to correct someone of a higher social sta— Deciding it's not worth it in mid-sentence.
* ''Tales From New Terra'' vignettes has Juno "Tank" Steele confronting the Dark Elder Axen Moon and his two alien Shade companions. At the end of the vignette, it's revealed that the whole sequence was imagined by Juno Steele, an overseer at a refinery in an attempt to liven up his otherwise boring job.
* Tales from Somewhere, Morten tosses an unnamed character out the window of the tavern because they tried to insist on taking his spot at the bar. It is soon revealed that he does this on a regular basis.
* Tales From The Aniverse is a variant. The comics consist of several short stories with varying cast members, all set in the same universe and occasionally overlapping.
* Tales from the Borderlands. By the end of the story, the friendship between the two becomes a major plot point.
* Tales from the Borderlands" Eventually he asks your opinion of it; the Vault Hunter's response, whether positive or negative, is impressively over-the-top. And Rhys will remember that.
* Tales from the Borderlands has Bossanova, a bandit king who serves as the main antagonist of the first episode, before the main plot gets rolling.
* Tales from the Borderlands has both a robotic arm and a neural implant in his eye that connects to his brain that can scan objects and people for information, as well as allowing him to hack computers easier by seeing their inner workings. At one point he also uses it to determine where a volley of orbital attacks are going to land by tracking the artillery's trajectory.
* Tales from the Borderlands has the World of Curiosities, a dilapidated and macabre museum filled with the preserved corpses of both animals and humans.
* Tales from the Borderlands have a habit of touching their hair; Rhys runs his

fingers through it, and Fiona brushes her side bang out of her eyes.
* Tales from the Borderlands his entire body becomes immobile for several hours which also prevents him from blinking. Upon meeting with Cassius, Vaughn is immediately stabbed with a syringe and is revived, albeit being heavy dehydrated.
* Tales from the Borderlands. However, this is dropped in later episodes where she clearly has no problem using guns and is even stated to be a better shot than her sister Sasha.
* Tales from the Borderlands involves a crazy bandit demolition derby known as Murder Rally 12000.
* Tales from the Borderlands is kicked off by a con from Fiona, Sasha and Felix involving a deal for a fake Vault Key. Things sort of escalate from that point on.
* Tales from the Borderlands: Played with. Rhys and Sasha have some chemistry, and Sasha's sister Fiona disapproves. However, since the player controls both Rhys and Fiona at different points, this can change. Rhys can deny the chemistry, pursue Sasha more aggressively, or just allow things to progress as they may. Fiona, on the other hand, can either give her blessing or tell Rhys to stay away from her sister.
* Tales from the Borderlands, Rhys's first order of business is to find the body of his recently-dead rival Vasquez so he can scan its face for a disguise... only to find that said face has been sliced off and that he'll need to get it from a Psycho wearing it as a mask.
* Tales from the Borderlands, Scooter can develop a crush on one of the female characters. "But I ain't sayin' which one. Fiona. Dang!"
* Tales from the Borderlands uses a different song for its opening and credits theme:
* Tales from the Borderlands warn him, then it turns out he already knew about the bomb and removed it earlier.
* Tales from the Borderlands wears a pair of goggles around her neck for most of the game (from Episode 1 to about a quarter of the way into Episode 4). She puts them on precisely once when she's moving particularly fast, but she takes them off during the same scene and never wears them again.
* Tales from the Borderlands. When the con artist Fiona has to talk her way past a bouncer outside a bar, the bouncer notices her face on a nearby Wanted poster. The bouncer's illiterate and has no idea what the poster actually says, so you can choose a few different ways for Fiona to talk her way out—for example, by claiming that poster's the VIP list.
* Tales from the Crib, which had the babies act out the stories of "Snow White" and "Jack and the Beanstalk", with the framing device consisting of the babies being read the stories by their babysitter Taffy.
* Tales from the Crypt #40, the main character's car flipped over after a blowout and caught on fire almost immediately.
* Tales from the Crypt #41, a genius who felt that he was losing his best friend to said friend's less-intellectual new wife removed about two-thirds of the guy's brain and kept it in a jar with a speaker attachment.
* Tales from the Crypt #41 a German butcher keeps a shop which—despite rationing—is always curiously well-supplied with meat...
* Tales from the Crypt", after killing Miss Kielbasa, Marty shoves her body into a bass drum case.
* Tales from the Crypt, a man who was going deaf received an ear-canal transplant from a bat. The same back-alley surgeon who performed this impossible operation had previously given one of the protagonist's friends an eye-transplant from a panther.
* Tales from the Crypt, and further pretends that they are both traveling salesmen, and marries each of them in separate ceremonies. Understandably, the twins are Not Happy when they discover the subterfuge, and proceed to execute their own version of Solomon's Judgment. With a chainsaw. In the end, each twin has half, and both are happy. Him... not so much.
* Tales from the Crypt, and it's still not resolved by the end of the episode.
* Tales from the Crypt) appears in a few cameos first as the Cryptkeeper's personal trainer who introduces the story and as a body builder in the beach scene.

* Tales from the Crypt. A woman kills her husband and shoves him into a processor meant to make soap, then takes the soap home for use. The result proves to be dangerously acidic.
* Tales from the Crypt: Bordello of Blood: Evil vampire queen is defeated and the film's love interest is rescued. Except it turns out she was vampirized and was living in sunlight using sunscreen lotion. Which makes no sense considering the evil vampire queen had set her up for some sort of ritual and her and her entire clan was wiped out, so if she was vampirized why did she stand there while all her brethren were being slaughtered?
* Tales from the Crypt, but without a lawyer to protect him, he's browbeaten into giving a confession and ends up on death row.
* Tales from the Crypt doesn't take kindly to his workers cracking jokes about his new wife. He ends up severely beating his newest worker after his unfaithful wife seduces the guy and he catches them in the act.
* Tales from the Crypt": During their struggle in the swamp, Logan kicks Maggie on to an oil lantern, causing her dress (and subsequently her) to catch fire.
* Tales from the Crypt episode "Cutting Cards" features two compulsive gamblers who hate each other, after a failed Russian Roulette they decide to play "Chop Poker" for each losing hand the loser would get a finger chopped off with a meat cleaver, we see that by the end they have each lost all their limbs.
* Tales from the Crypt episodes, with expected gory results. Examples include "Television Terror", "Split Second", "Split Personality", and "House of Horror".
* Tales from the Crypt episode "Television Terror", a tabloid news show host and his cameraman are disemboweled and hanged on live television by the ghosts of a serial killer and her victims.
* Tales from the Crypt episode "What's Cookin'," Gaston hangs Mr. Chumley from a meathook in Fred & Erma's restaurant freezer. By the end of the day's business, there's not much left of him (Chumley, that is).
* Tales from the Crypt episode "What's Cookin'". The owners of a failing restaurant find success when they begin to use meat supplied by a drifter.
* Tales from the Crypt", Ezra is attacked by the feet he amputated off his nephew Bobby's body so it would fit in the coffin.
* Tales from the Crypt) features a man who elopes with a woman he met at Mardi Gras, who refuses to remove her mask and insists on consummating the marriage in the dark. He gets curious and tries to remove it, and...well, it's listed as an example here, isn't it?
* Tales from the Crypt features an episode where a lawyer named Geri Ferret ends up working off her legal sins in a nightmarish courtroom purgetory.
* Tales from the Crypt film, titled "Poetic Justice", is actually set over two different Valentine's Days.
* Tales from the Crypt had an episode with a man who gets the auditory system of an owl.
* Tales from the Crypt has the Crypt Keeper, who casually talks to the audience in each episode. Some of the few (live) characters he has during his intro and outro segments are also shown to be aware of the fourth wall.
* Tales from the Crypt he hooked up with during a Halloween party isn't wearing a mask when he scratches her and draws blood.
* Tales from the Crypt, he shoves her into the quicksand and she vanishes beneath the surface. Logan thinks he's seen the last of her, but he's wrong.
* Tales from the Crypt horror comic of the same name, complete with Crypt-Keeper.
* Tales from the Crypt: In "Carrion Death," a multiple murderer named Diggs escapes police custody and tries to flee across the Mexican border in Texas, pursued by a motorcycle cop and a very hungry vulture. He manages to kill the cop, but not before he handcuffs himself to Diggs and swallows the key, forcing Diggs to drag the dead man through the wasteland.
* Tales from the Crypt: In "Cave Man" in #19, a museum sub-curator who's jealous that his own exhibit is being ignored in favor of a recently-discovered frozen specimen of Neanderthal Man thaws out the body, with fairly predictable results.
* Tales from the Crypt: In "Collection Completed", Anita kills Charles by hitting

him in the head with gold-plated ballpeen hammer he was given as a retirement gift from the tool company.
* Tales from the Crypt: In "Lover Come Hack to Me", Peggy's mother uses a battleaxe to hack her husband to pieces, and later Peggy uses the same axe to do the same thing to her husband Charles.
* Tales from the Crypt: In the prologue to "Only Sin Deep", the Crypt Keeper looks into a mirror and asks "Who's the fairest of them all?" The mirror promptly shatters.
* Tales from the Crypt is shown casually slicing up salami for a sandwich in the same room where he is about to perform surgery.
* Tales from the Crypt is the assassin, following a sex change (and still able to use her masculine voice).
* Tales From The Cryptkeeper, a mirror breaks. She even broke the TV screen.
* Tales From The Cryptkeeper features the main character making prank calls. One of them ends up reaching an elderly woman who begins stalking him so she can have a companion.
* Tales from the Cryptkeeper, naturally followed the format of its parent show by having the Cryptkeeper open and close each episode by narrating the story.
* Tales From The Cryptkeeper two girls who are old movie buffs are investigating a possible vampire. On their way up a ladder, they break a rung. While running from the vampire, they knock the ladder loose and it falls toward them. They freeze and end up standing exactly where the missing rung would have been. They look at each other and squeal, "Buster Keaton!"
* Tales from the Crypt leave it as a nasty surprise for James' father.
* Tales from the Crypt let off because of an improperly worded search warrant.
* Tales from the Crypt mentioned below, established that the Crypt Keeper was the son of a preserved corpse with two heads named Enoch and an Ancient Egyptian mummy named Myrna.
* Tales from the Crypt on a rich woman made by the resident voodoo expert. He puts too much in a drink for said woman, she dies, and he ends up running from a zombie that still loves him.
* Tales from the Crypt". On first meeting her, Logan describes her as "a bitch on wheels and four-on-the-floor". She does nothing but complain about how primitive and unpleasant the tropical island is and, even after being enchanted to fall in love with Logan, she demands he sack his staff and employ more presentable servants.
* Tales from the Crypt only Jeryline the hotel manager's niece survives the Collector and his minion's attack.
* Tales from the Crypt passing through happens to get arrested, the current public defender tries to get their sentence reduced to "public service", in which case the attorney takes over the job and the previous public defender is finally allowed the sweet release of death.
* Tales from the Crypt pH, so the soap-making process itself should've rendered the acid harmless. (The fact that one of her husband's eyeballs was in the soap and still moving and looking at her as she died suggests that the effect is more supernatural than chemical).
* Tales from the Crypt requires the player to time the launch so the ball hits the lit guillotine target as the light moves along.
* Tales from the Crypt, said doctor plays a rather improbable revenge "prank".
* Tales from the Crypt segment "And All Through the House" featured a killer dressed as Santa Claus. It was later remade as an episode of the tv-series. (Both were inspired by a holiday-themed tale from the original comic, though the TV series episode sticks closer to the source.)
* Tales from the Crypt set turns out to be this, decades later in the future, as its future fate is a tourist attraction that is devoid of residents.
* Tales From the Crypt story "Squash... Anyone?", there is a zombie elephant, rendered in wonderfully revolting detail by Graham Ingels.
* Tales from the Crypt, the abusive manager of a home for the blind gets his comeuppance when the visually-impaired men he's been mistreating lock him in his

office and construct a Death Course through which he must exit, with hundreds of razor blades set into the walls of a very narrow passage. They wait until he's squeezed his painful way through it once, then sic his own attack dog on him and turn out the lights.
* Tales from the Crypt: The Chinese statue in "Wish You Were Here" grants its owner three wishes, but grants them in the most perverse way possible. The inscription on the base even warns them of this.
* Tales from the Crypt: The first episode, "The Man Who Was Death", had an inmate frantically pleading for time, stating that the governor would call while the narrator claims that it never happens. In the end, when the executioner is being strapped to the chair, he makes the same type of comments.
* Tales from the Crypt, "The Man Who Was Death", one murderer gets off free because the arrest warrant was improperly signed, leading the protagonist to later hunt him down and electrocute him to make sure he doesn't escape punishment.
* Tales from the Crypt, though a handful of episodes still end this way.
* Tales from the Crypt. To add insult to injury, he becomes totally deaf, but can still hear the voice.
* Tales from the Crypt to have a young face transplanted on to him. The doctor tells him how he had successfully performed this operation in his native land, but that no one in America had believed him and all laughed at him, but one day they would have to acknowledge his brilliance.
* Tales from the Crypt-turned tourist attraction in the future decades from the present, with a tour guide informing his group of tourists about the way said character's life ended. The episode concludes with his life ending the way the tour guide did/would claim to end.
* Tales from the Crypt usually fell very far on the silly side of the scale, with intentionally hammy acting and very over-the-top characterization and often plots that present a sort of grotesque parody to sitcom plot conventions and other very outlandish stories.
* Tales from the Crypt version of the Three Little Pigs. It's also animated as well.
* Tales from the Crypt when Crypty's dad got locked in a closet with her overnight.
* Tales from the Crypt where the gruesome displays of "wax figures" were, of course, made with real people.
* Tales From the Crypt, who comes to the woman's rescue after she faints, then proceeds to pursue his murderer until they both fall into the open grave from which the dead man rose. The zombie proceeds to bury himself and his killer alive (or technically, undead and alive respectively).
* Tales from the Crypt will increase her status immensely. She notices the pearl and throws it away like it was trash.
* Tales from the Crypt Zig-zagged slightly in that he only kills the murderess woman and leaves her daughter alive.
* Tales from the Dark Multiverse all went horribly wrong due to one wrong small thing changing.
* Tales from the Dark Multiverse as a result of the torture he was subjected to as he gets revenge on Azrael.
* Tales from the Dark Multiverse, Batman the Silenced is commonly known by other characters as "Arkham's Devil".
* Tales from the Dark Multiverse by using her powers to mess with the Earth's core in order to level multiple cities simultaneously.
* Tales from the Darkside and experiencing pleasant dreams forever for ten million dollars. Corelli accepts, but the scientist changes the dreams he gives Corelli, and instead he is forced to relive the pain of his victims for all eternity.
* Tales from the Darkside are too old and infirm to live independently and have to move into a nursing home, while Grandma herself (who was never all that enfeebled to begin with) gets to stay out of it.
* Tales from the Darkside: At the end of the episode "Seasons of Belief", two monstrous arms break through the windows of a room, killing a husband and wife in front of their two young children.

* Tales from the Darkside: A variant in "Pain Killer" where it is a chain rather than a swap. A mysterious doctor arranges the removal of a troublesome individual from a person's life. The person is later contacted to kill someone in another person's life.
* Tales from the Darkside episode "A Case of the Stubborns". An elderly grandfather (the wonderful Eddie Bracken) passes away — but comes down to breakfast anyway, refusing to believe he's dead. Despite all the evidence his family shows him (he doesn't leave breath on a mirror, for instance), the old coot just won't accept it. He's more of a zombie than a ghost, and his condition is due to his cussedness rather than unfinished business, but he still won't "move on". As Grampa's body starts to decay and he begins to attract flies, someone puts a spoonful of black pepper into his handkerchief. The next time he wipes his face, the pepper makes him sneeze. He finally admits that he has died, and "lays down his burden". He was convinced because the sneeze blew his nose off.
* Tales from the Darkside episode "A New Lease on Life" featured a living apartment building; only food waste was allowed to be thrown down the trash chute, because that was its esophagus.
* Tales from the Darkside episode "Distant Signals," a mysterious, eccentric investor brings together the cast and crew of a 20-year-old private eye TV series, which was cancelled before it got a proper ending, so the story can finally be resolved. The investor turns out to be the representative of an alien race who had been following the show. (In the original short story, the private eye show was a western.)
* Tales from the Darkside episode "Florence Bravo", a woman eavesdrops on her husband and spots him talking to an attractive woman. As soon as she leaves in anger, it is revealed that the woman is simply a lawyer who was helping the husband with their new house. Unfortunately, a few minutes after the lawyer leaves, the wife returns and shoots her husband, oblivious to the truth.
* Tales from the Darkside episode has an old man and his daughter finding a fountain of youth. It is guarded by a Native American-esque spirit who says "You must sacrifice one form of immortality (i.e. your child) for another." The old man sacrifices his daughter, then finds he ages like a rock—veeery slowly, but lives like one—taking years to blink.
* Tales from the Darkside episode "Let the Games Begin". An angel and a devil have a contest over who gets a dead person's soul. At the end they give into their growing attraction to each other and get together.
* Tales from the Darkside episode "Ring Around The Ringhead", though it's not shown on screen, it's mentioned that an inter-dimensional portal tore off somebody's arm when a greedy jeweler tried to exploit it.
* Tales from the Darkside episode "Seasons of Belief" has a couple rather sadistically spinning a yarn about a giant Christmas monster called a "Grither" to their young children. And guess who shows up at the end of the episode...
* Tales from the Darkside episode wherein his Voodoo Babysitter called up similar beasties (a Jumbie) to ensure good behavior from him and his brother.
* Tales from the Darkside: In "The Bitterest Pill", a man invents a pill that allows for knowledge to be gained and stored at an alarming rate when taken, the only side-effect being an agonizing headache. He tries to convince his friends (a married couple who are neglectful and dismissive of their only son) to invest in the production of the pill but while the conversation is taking place, the child takes a few of the pills and even comments that they taste delicious on top of everything else. In the next scene he is shown to have become emancipated from his parents as well as the CEO of a company that produces the pill. In the last few moments of the episode, he speaks of the initial inventor's mistake and says that the inventor never realized that his pill worked best on a mind that was still developing rather than a fully grown one adding that the inventor's mind overloaded and couldn't take the massive influx of information.
* Tales from the Darkside: In the episode "The Geezenstacks", a little girl is given a dollhouse by her uncle, who tells her that he found it when the previous owners suddenly abandoned their home, leaving only the dollhouse behind. The girl's

father soon notices that whatever happens to the new dolls happens to their family.
* Tales from the Darkside: The Movie and has two kids with her. Not able to get what he witnessed that night out of his mind, however, he draws the creature in perfect detail. He tells his wife about it, making it clear that the creature was the reason he insisted she come home with him that night. The twist comes in, when the women reveals that she is the creature in human disguise and that he broke his promise. She transforms back into the gargoyle creature. The children also turn into gargoyle creatures. She kills him and flies off.
* Tales from the Darkside: The Movie, and the old man dies of a heart attack.
* Tales from the Darkside: The Movie, in the "Lover's Vow" segment, a man unknowingly marries a gargoyle who has taken on human form. In a variant of the "yuki-onna" scenario (see Mythology below), both the wife and their two kids turn into gargoyles when he breaks a promise to her.
* Tales from the Darkside: The Movie story it was based on, the cat burrows out of the stomach, but in the movie, the cat waits there until morning, and crawls back out of the guy's mouth, just after its real intended victim comes home to witness this (and then has a heart attack).
* Tales from the Darkside: The Movie, the similiarly-titled "Lot No. 249".
* Tales from the Darkside: The Movie version of this. An Artist down on his luck sees a horrible Gargoyle slaughtering a friend of his. The Gargoyle promises to let him live if he never, ever, EVER!!! tells another living soul about this and he agrees. And then all of a sudden his entire life has an upswing. That very night he meets and falls in love with a mysterious woman who loves him back. She mentions she knows a famous gallery owner willing to give his art a chance... Cut to ten years later. He is a famous artist, they have two lovely children, their love is greater than ever but he is constantly burdened by the horrible secret he carries within him, the ONE thing he hasn’t shared with her— and you can probably see where this is going...
* Tales from the Darkside, whose "revolutionary new diet aids" caused her to hear and see food as sentient. Rather than be tempted to eat her new "friends", she seals her own mouth and starves to death.
* Tales From The Far Side. But in the sequel, there's a segment with amoebas at a party that's abruptly interrupted when their "world" goes sideways. The camera cuts to a man putting down a mostly-empty water glass... then pulls back to him and his family exiting the same exact Egypt scene (sans waving) from the first special.
* Tales from the Flat Earth which they do with relish. Within the Drin, there's a subclass called the Drinendra that are even worse off - the Drin are at least sentient and occasionally valued, the Drinendra are demonic animals that are usually treated as a mangy cur.
* Tales from the Fleet: Lacey is the savvy human girl, calmer and more sensible than Tirra is, the energetic Aurin girl who does not hesitate to show her interest in the former.
* Tales from the Floating Vagabond, characters with the Doolittle Effect can instantly befriend all but the most aggressive animals. The downside is that animals tend to follow the PC around, seeking their attention and affection.
* Tales from the Floating Vagabond: Guns in the top of the size scale qualify, being called the "Don't Point That At My Plenet" scale.
* Tales from the Floating Vagabond has a number of "schticks", powers that can help (and occasionally harm) your character. One of these is the 'Rogers and Hammerstein Schtick', which gives your character his own theme music that he and everyone around him is aware of. This means that if someone is sneaking up on him, the music will shift to sneaky music (makes it really hard for him to sneak up on anyone not deaf, though). Sudden shifts to dramatic battle music can predict an ambush, etc.
* Tales from the Floating Vagabond has this as a trainable skill for either gender: "Look Good at All Times".
* Tales from the Floating Vagabond something they believe should be impossible (such as magic powers or mad science) and have it stop working.
* Tales from the Floating Vagabond, such as the Bartenders' Ancient Brotherhood (BartAB), the Organization of Athletic Figures (OAF) or the Teamsters' Righteously

United Kindred (TRUK).
* Tales From the Gas Station is actually an OK guy, and notes that he was a benevolent figure in the Native pantheon.
* Tales from the Goose Lady used this in the episode "The Ugly Duck-Thing", where the Duck-Thing found a benefit to his ugliness by using it to save lives, such as freeing a baby who got its head stuck in a bottle by shattering the glass with his face and defusing a bomb by staring at the timer.
* Tales from the Grave, Volume 2: Happy Holidays is a horror anthology with all the segments dealing with holidays.
* Tales from the Hood 2: After possessing John in "The Medium", Cliff uses his telekinetic powers to snap the neck of one of the gangbangers: twisting his almost 180 degrees.
* Tales from the Hood 2 alternate timeline Henry creates in "The Sacrifice", William Cotton leads a group called the Klan Patrol: an updated version of the slave patrols that existed in the antebellum south, who dress in KKK robes and operate with the full sanction of the law. Cotton and his men beat Mama Bradley and attempt to abduct Henry.
* Tales from the Hood 2, and looking to create a force of robots to allow him to take over all law enforcement activities in the US.
* Tales from the Hood 2 don't show up in the camera being used to film them. Their clothes, however, do.
* Tales from the Hood 2: In "Good Golly", a golliwog comes to life (and grows to human size) to teach some racially insensitive teenagers a lesson.
* Tales from the Hood 2: In "Good Golly", Zoe gets cut in half by a rapidly descending door—shaped like a set of teeth—in the museum.
* Tales from the Hood 2: In the changed reality Henry finds himself in "The Sacrifice", the Klan Patrol have no reservations about beating to death a black man they think raped a white woman.
* Tales from the Hood 2 involve some hot-button political issue that has emerged since the first movie was made.
* Tales from the Hood 2 the party in the good ol' days, rather than hosting it.
* Tales from the Hood 2, the Robo Patriot judges Mr. Beach's two aides to be just as guilty for their complicity in his crimes, as neither of them ever objected to his behavior.
* Tales from the Hood 2, Zoe and Philip engage in some literal Master/Slave roleplay when breaking into the "Museum of Negrosity", dirty-talking to each other as he holds a whip and she holds onto a literal whipping post.
* Tales from the Hood: A variation when one of the cops who murdered a black politician is crucified and made part of a piece of graffiti, still screaming in agony.
* Tales from the Hood being tormented in hell for the suffering he inflicted on his neighborhood.
* Tales from the Hood: Billy, Newton, and Strom conspire to murder a black politician who was exposing their drug-dealing business. Their victim subsequently rises from the grave to get revenge.
* Tales from the Hood includes a segment in which a white supremacist is tormented by dolls possessed by the ghosts of slaves.
* Tales from the Hood learn that they're dead when Simms shows them their corpses in caskets and reveals to them that they were murdered by Crazy K's associates in retaliation to killing Crazy K.
* Tales from the Hood: The wall painting of Miss Cobbs (the voodoo priestess) in Metzger's house changes when the killer dolls are released one by one, with blank shapes appearing in their place.
* Tales from the Interface, we learn that what happened up to that point was all a virtual world.
* Tales from the Kingdom of Fife story about the fall of Dundee (to an army of undead unicorns), Angus Mcfife's quest for revenge and ultimately reconquering Dundee. All songs come in chronological order, and listening to the album in any other order than that pretty much ruins it all.

* Tales from the Loop by bullying at school or dismissive parents as an attack by robo-saurs from the 34th Hell-dimension.
* Tales from the Loop, Ed's wife Kate takes their daughter Beth and leaves home to go stay with her brother Henry after Ed gets out of control with the Scrapper, a giant robot that he purchased to try to protect his family following break-ins in the local area. Later, Ed calls Henry to try to talk with Kate, but ends up only talking with Henry and we only hear Ed's side of the conversation, and his pain at having alienated his wife and daughter.
* Tales from the Loop. However, a Connection will rarely, if ever, take a part in the Kids adventures, and all other adults are uniformly useless.
* Tales from the Lush Attic also includes a commentary, but this time it's presented as an audio mp3 with the music playing in the background.
* Tales from the Mos Eisley Cantina forgive a major blunder he recently made. As Wuher says, if Labria put this sort of thinking to anything else, he'd be a very wealthy being.
* Tales from the Mos Eisley Cantina, it was revealed that Greedo was set up to face Han Solo alone because Goa knew he [Greedo] wasn't up to it, and had been hired to get rid of Greedo by a tyrant who had condemned Greedo's entire clan to extermination. (Goa didn't have the heart to pull the trigger himself.)
* Tales from the Mos Eisley Cantina species' standards that is, and Feltipern Trevagg's; by human standards she's hideous). Trevagg even calls her a "bimbo" at one point.
* Tales from the Mos Eisley Cantina this was a definite theme in The Devaronian's Tale.
* Tales from the Mos Eisley Cantina when one of the stormtroopers kills Het Nkik for, essentially, being annoying. But at least that's the last straw for Davin Felth, who decides to defect soon after.
* Tales From The Shadowhunter Academy we learn that Jack the Ripper , a serial killer who killed several women, was actually a demon child.
* Tales From The Shadowhunter Academy, Will Herondale and Tessa Gray have two children, James and Lucie. Will is a shadowhunter and Tessa is a warlock with Shadowhunter blood. James and Lucie have a half-human father and a quarter-human mother. Technically, the two are demonic to a quarter, and at the very least James has special forces for this reason.
* Tales From the SMP played by Fundy the content creator, is Oliver Arechtenshire Smitselist Cumbucket.
* Tales From the SMP, who played him and has 'Watson' as his surname in real life.
* Tales from the Vault, Kali Korash is able to transfer his essence from one body to another when his current host dies.
* Tales From The Water Cooler has Santa and Krampus discussing the latest comic book released.
* Tales from the White Hart: In "The Reluctant Orchid", Hercules Keating is nearly killed by a carnivorous orchid. He then attempts to use the orchid to murder his overbearing aunt, but this does not go according to plan.
* Tales from the Wyrd Museum, a fantasy novel trilogy, was set in one.
* Tales From The Year Between are ridden for transportation and for battle.
* Tales From The Year Between is an anthology series in which each volume takes place in a new invented world. The contributors to each volume work together to create the world for that volume, then create pieces set within it.
* Tales From The Year Between is this on two counts. Not only is each of its volumes in a different genre (and a different world, created from scratch by the contributors of that volume), but the individual pieces within each volume bounce around wildly. The first volume alone includes (among other things) erotic pieces, comedic plays, academic essays, horror short stories, and recipes.
* Tales From The Year Between sets each of its volumes in a new universe; each of its worlds is created from scratch by the contributors of that volume, and is then owned jointly by all contributors. Any one of the people who helped create the world is permitted to write their own work within it, with no need to go through the official volumes.

* Tales From Turnpike House and a couple played by Sarah Cracknell and David Essex arguing about leaving the city to go and live the good life. Their stories all eventually link up in the penultimate track, the epic "Teenage Winter".
* Tales from Watership Down, a collection of short stories in the same 'verse as the original which hardly anyone has ever heard of.
* Tales From Year Zero, and the simulated death of Yancy Beckett by Kaiju tongue was how he actually died.
* Tales games for US release, in order to please an audience for the games that — as far as anyone can tell — doesn't actually exist fall under any translation or marketing tropes? It seems like it should, but..
* Tales had a witch-like character who could use a flying broom. There are a couple situations where it's used to fly up (such as getting treasure chests too far to reach and avoid a dungeon that the other characters have to go through), though none that would desperately call for it.
* Tales is avoided due to each game following a different set of protagonists in each continuity.
* Tales of a Fourth Grade Nothing example below , Peter's father makes an omelet of dubious quality (Peter notes that he used an entire carton of eggs, while his mother only uses one or two). Peter tastes it and finds it hideous, but pretends to like it. His father tastes it and realizes that he made a horrible mistake. He scoops up the other plates and throws the omelet in the trash. Fudge starts screaming because he actually liked it.
* Tales of a Fourth Grade Nothing has Peter being given a picture dictionary, more suitable for a preschooler than the preteen that he is. Ugh. At least he has enough tact to pretend to be enthused. Fudge, on the other hand, brings out their old copy of the same book.
* Tales of a Fourth Grade Nothing. Peter is not impressed, but at least has the tact to thank its givers. Fudge, on the other hand, throws a fit when he receives the same kind of book on his third birthday.
* Tales of a Fourth Grade Nothing, Sheila Tubman used to tease Peter Hatcher by touching him and saying he's got the cooties, even up to when she is ten years old. It's after Peter's brother Fudge falls off the jungle gym set, thinking he's a bird, and loses his top two front teeth that she finally stops with the cooties.
* Tales of a Fourth Grade Nothing taunts Peter Hatcher and his friend Jimmy Fargo by singing they've got the cooties, until they both turn the tables and sing "Sheila's got the cooties!"
* Tales Of A Gay Asian, though he tends to like big fat meaty...white guys.
* Tales of an Ancient Empire. After cutting it out of her womb, however, he couldn't kill the baby. Instead, he gave her to a palace as a servant girl.
* Tales of an Ancient Empire children by different mothers (which all of them have as well).
* Tales of an Ancient Empire: Kara, the child of a human father and vampire mother.
* Tales of an Ancient Empire: Oda was one, judging by the number of women he managed to have sex with (and father children by too).
* Tales of an Mazing Girl can do this. The Latter most sensibly, To Insider Trades on the stock market to get a huge fortune.
* Tales of an Mazing Girl doesn't like Bullets—but they don't really hurt her.
* Tales of an Mazing Girl feels, this given her awesome powers. However it really cuts around into her lounging around time.
* Tales of an Mazing Girl isn't completely invulnerable - but notably she acts that way with a cool, calm demeanor that is never frightened of the Monsters, ninjas, or Star Trek Cosplayers masquerading as ninjas she faces.
* Tales of an Mazing Girl Mazing Girl Wears one- though its more of a skintight jumper that cuts off at her knee.
* Tales of an Mazing Girl Sarah wears glasses. She admits that it works simply because it's very awkward to go up to someone and ask them if they are "'Mazing Girl." If they deny it, that's not much of a conversation starter.
* Tales of Aquila This story is about different groups of academy students who use

the power of nuclear energy manipulation to overcome various challenges that threaten the national securities of their respective nations. The current main character, Roy, has to work with a special team known as SODA, as well as his dead sister, to recover three missing students from a distant land.
* Tales of Arcadia in this show along with several minor appearances, with Steve and Eli being the two main overlapping characters.
* Tales of Arcadia is set in a science-fantasy universe where trolls, aliens, magicians, and many other types of strange beings lurk around the titular town of Arcadia, California.
* Tales of Arcadia: This entire trilogy of series is primarily set in the town of Arcadia Oaks, California.
* Tales of a Reset Mind, Anger tries to spoil the reader, and gets into a fight with The Author because of that.
* Tales of a Reset Mind ends like this, with the Emotions and Nico looking for the Core Memories after the Breach is contained.
* Tales of a Reset Mind, Nico´s Joy uses two handguns, and she is actually quite good with them!
* Tales of a Reset Mind, SCP-1370 never appears again after "wandering off" after his introduction.
* Tales of a Reset Mind: the Author's justification on how the Emotions survive with no internal organs.
* Tales of a Reset Mind, the evil Emotions can only be defeated by tossing them into the Memory Dump.
* Tales of Arise: Dahnans, being slaves, universally only have one name. Zephyr exposes Shionne as a Renan (the people who enslaved the Dahnans) when he calls her by her full name.
* Tales of Arise has Hootle, Rinwell's pet owl, that rides around in her hood.
* Tales of Arise were also added, with all versions slated to release September 2021. The ninth-gen versions offer the ability to either target 4K resolution or 60 FPS gameplay with variable resolution.
* Tales of a Sixth-Grade Muppet always lived in his home town, or if it just happened after his transfromation. No-one else seems to find it odd.
* Tales of Ba Sing Se, an armadillo tiger, and a group of "hog monkeys" (which resemble baboons with porcine faces).
* Tales of Berseria. And unlike Laphicet, Eleanor doesn't get any abilities that support her teammates or restore health. Finally, Eleanor's Break Soul knocks a target into the air, which is useful but situational. The end result is a character who can fit just about any frontline role, but isn't as good as the other characters who are dedicated to one niche.
* Tales of Berseria averts this trope. Main character Velvet gets splattered with blood quite frequently, and characters who die by impalement or cutting show very large bloodstains where they were hurt, complete with gouged flesh.
* Tales of Berseria coincide to persuade Velvet to take the blinkers off and let her companions resolve some of their personal quests.
* Tales of Berseria. Descriptions of the party are usually wildly inaccurate and typically of the wrong species. Career pirate Eizen jovially notes he has fun returning to port after an absence and seeing how badly the description was screwed up this time.
* Tales of Berseria despite being only able to taste blood as a result of her transformation into a demon. It helps that she was a skilled chef as a human, as well as that she can rely on other people's sense of taste to judge her cooking.
* Tales of Berseria: Dullahan appears as a boss in Titania, where the Abbey created him through Venomization.
* Tales of Berseria Eleanor for doing something as barbaric as eating such a cute creature (and finding them delicious, apparently).
* Tales of Berseria everyone except for the two daemons can learn two healing artes with Eizen and Eleanor learning Ressurection and Life respectively.
* Tales of Berseria has a few Grade bonuses that change the level system a bit, such as changing what stats increase depending on which title the character has

equipped. Also, the player can choose to carry over items like the venite and glacite which provide in-battle bonuses, and carry over items that allow the player to warp out of a dungeon or to a town at no cost, provided they found the items on the previous playthrough.
* Tales of Berseria has all of the characters that can cast magic fit this role.
* Tales of Berseria has Kamoana. She's a preteen girl that was turned into a Therion, with her Therion-form having her wear what looks like black, swirly bodypaint.
* Tales of Berseria is a distant prequel to) calls them "the earthpulse." A good chunk of the game involves hunting down nexuses, called earthpulse points. On a few occasions the cast actually enters the earthpulse physically.
* Tales of Berseria is exactly the sort of half-truth she's notorious for.
* Tales of Berseria Jude and Milla. The weird part is how, for absolutely no reason at all, Jude is turned into a pengyon (except for the boss fights).
* Tales of Berseria, just that his reason for doing so would have been their death instead.
* Tales of Berseria keeps the tradition going, teasing the entire main cast all the time, especially Velvet, despite her being a barely stable, murderous Daemon.
* Tales of Berseria, Laphicet can equip bags as his particular type of protective equipment unique to him, some of which are named after planets. The description for the Pluto Satchel reads "A bag unfairly cast out of bag society, causing it to be slowly forgotten."
* Tales of Berseria, once he's allowed to break out of his shell and emote, is quite curious about the natural phenomenon of the world. The kid risks his life for a compass!
* Tales of Berseria outfit and demonic powers hell-bent on revenge against the man who murdered her brother, and has the melancholy attitude to match. The downplay comes from the fact that Velvet's sexuality is never emphasized as much as one would expect from her archetype, and the aesthetic of the rest of the game is as colorful as any other game in the Tales franchise.
* Tales of Berseria reveals he'd been disciplined by being assigned milk runs in the boonies. When you do see him again, he's being handed a dead-quiet governor position on Yseult, a far-flung island chain (allegedly) better known as a honeymoon destination than for strategic importance. When the player party screw that up for him, he gets reassigned to a barely-inhabited marshy shithole in the middle of nowhere, armed with a prototype device that he's more or less told will kill him when activated.
* Tales of Berseria, right after the prologue, Velvet plans to escape from the island by having Seres unlock the jail doors and have the prisoners cause a riot while they both try to escape.
* Tales of Berseria, she doesn't make a single wisecrack or goofy comment for the entire ordeal.
* Tales of Berseria, she's not remotely as evil as the rumors and propaganda say. Ironically, information about her appearance got demonized and distorted to the point that people don't recognize her even when she's standing right beside them!
* Tales of Berseria spins her spear one-handed for almost all of her artes including her third mystic arte.
* Tales of Berseria starts with a scene of 9-year old Velvet and 4-year old Laphicet running away with their brother-in-law Arthur during the Scarlet Night.
* Tales of Berseria, the ancient Avarost language has a grammar which is nothing like the current language and often requires a keen sense of intuition and unusual leaps of logic in order to truly understand the meaning. When Laphicet and Grimoirh are trying to figure out the Avarost in an ancient book, Grimoirh finds herself particularly stumped by a line which, if translated literally, states "The parent hates tomatoes, the child eggplants."
* Tales of Berseria unites the world under the stoicism and the protagonist and her party members oppose that dogma.
* Tales of Berseria, Velvet and Magilou, qualify, as both of them have ankle-length hair: in Velvet's case, she starts off the game with a hip-length braid, but after

spending three years in prison, it's grown quite a bit.
* Tales of Berseria, where your party got in a three-way fight with Eizen and Zaveid.
* Tales of Blaze and Artemis: Allen holds the Fire Miraculous, inhabited by Fenixx, which lets him transform into the fire hero Blaze and grants him the power of Heal Flame.
* Tales of Blaze and Artemis, including time itself, though she has yet to actually use it in this manner.
* Tales of Blaze and Artemis introduces Nick in chapter 10, holder of the Earth Miraculous that transforms him into Onyx. At the end of the chapter, Allen and Bianca warn him that it's too dangerous for him to show up to every villain, and that he should stay back unless they contact him.
* Tales of Blaze and Artemis: Nick holds the Earth Miraculous, inhabited by Terra, which lets him transform into the earth hero Onyx and grants him the power of Earthquake.
* Tales of Destiny 2, and since her TP regeneration is by far the best, she is suited to keep the party alive. However, she also possesses incredibly destructive spells based on the four elements, so you will be seeing her nuking half the screen during the second half of the game. Magic is very effective.
* Tales of Destiny 2 and using Anti-Everything That Could Help You tactics in his boss battles. People don't soften the evil things he's done, but love him for his vileness and intelligence.
* Tales of Destiny 2. As soon as Reala emerges from a giant Lens, Kyle is determined to become her hero and pursues her across the continent to do so. This is often lampshaded by his adopted brother, Loni, who is also roped into the adventure as a result.
* Tales of Destiny 2! He'd realized it long before, but just didn't want to bring it up.
* Tales of Destiny 2 in particular, attacks have to pass an evasion/accuracy check in order to score clean hits. Spells usually bypass that check and cause humongous amounts of damage while serving as good crowd control. Your melee fighters are responsible for keeping your casters alive while spells dish out damage.
* Tales of Destiny 2 in the original PS2 version that allows Nanaly to summon Efreet.
* Tales of Destiny 2 is about Kyle, the son of the two main characters from the first game, but aside from him, that's it.
* Tales of Destiny 2, made out of a dragon skull. It may not be a good disguise, but it's hard to deny it's cool.
* Tales of Destiny 2 scientist who wanted to be remembered as a man just for the lulz.
* Tales of Destiny 2 that are hastily swept under the rug to make way for it.
* Tales of Destiny 2: The heroes' eventual goal becomes to prevent a goddess of time from awakening and predetermining the world's past, present, and future for all eternity.
* Tales of Destiny 2 where he slams his axe down and kills everyone in one hit. Talk about cheap.
* Tales of Destiny he and his parents was copied in the world of the game from different points in time. The same applies to Lilith and Rimul, who also were reunited in Rays as teens.
* Tales of Destiny He doesn't even succeed — The party finally rescues her in the end.
* Tales of Destiny, in a pretty memorable scene. After fighting Mary's brainwashed ex-husband, mooks can be heard getting closer; Stahn and co. have to run away, but Mary wants to stay with her semi-dead man. Rutee then tells Mary that that's out of the question, because no one gets left behind... including her husband. Rutee then piggybacks him.
* Tales of Destiny is full of mirrors. Stepping in front of any of these mirrors to where you see Stahn's reflection causes a battle between him and a duplicate called a "Shadow". Presumably, the reflection comes to life and emerges from the mirror to

attack him.
* Tales of Destiny: Most of the main party (Stahn, Rutee, and Mary) are recruited criminals using the main quest to complete their community service sentence. To stop them from escaping, shock tiaras are placed on their foreheads and Leon Magnus goes with them as their handler.
* Tales of Destiny of the party, but the first thing he does after accidentally switching bodies with Philia is wonder how soft her breasts are.
* Tales of Destiny saw the Er'thers as terrorists who destroyed his civilization. Except the Er'thers were trying to free themselves from slavery and just happened to win the Aether Wars. The sequel shows that if the Aetherians had won, they would have razed the planet's surface, killing millions, and left the survivors to starve or freeze to death.
* Tales of Destiny. The Remake gives this more of a realism by reducing the boss version's HP and statistics to around what they should be when he joins the party, and instead just made him literally unbeatable.
* Tales of Destiny to execute his plans and destroy the world, but the Non-Standard Game Over does not address this little issue.
* Tales of Destiny translation to be cancelled, two groups decided to create their own separate translation projects of said game from the ground up. Those being the aforementioned Lumina Tales and Life Bottle Productions.
* Tales of Destiny where we see a lot more of the sugar side of his personality.
* Tales of Dunk & Egg has Dunk's mentor claim that the seasons have gotten longer ever since the last dragon died a few decades before the story began. Whether this is true or not isn't clear.
* Tales of Dunk and Egg, although for what it's worth, Martin is not known for Discretion Shots.
* Tales of Dunk and Egg. And that bald kid that Dunk thinks is a runaway stableboy? Turns out to be said pompous prince's little brother.
* Tales of Dunk and Egg, Dunk refuses her offer of a fine steed, but cuts off her braid so he'll have something to remember her.
* Tales of Dunk and Egg has everyone calling him "a knight who remembered his vows", which is treated as a rarity. His ethics have a lot to do with his humble upbringing as a former street urchin brought up as a hedge knight's squire. These qualities have a lot to do with he gets the future Aegon V ('Egg') as his squire, producing arguably the most fundamentally decent King that Westeros ever saw.
* Tales of Dunk and Egg his accuser Aerion Targaryen by beating the stuffing out of him.
* Tales of Dunk and Egg moment in response to the prowess of his children being brought to question by the events of the first novella.
* Tales of Dunk and Egg prequel series explores the fallout of the First Blackfyre Rebellion. The Second Blackfyre Rebellion also led to the Peake Uprising, which killed Maekar I and led to the ascension of Aegon V "Egg".
* Tales of Dunk and Egg, the towering and powerfully built Dunk has been given little in the way of combat or jousting training from his master, Ser Arlan. In spite of his imposing physique, he's rather hopeless in a trial by combat, that is until he can get his hands on his opponent and turn it into a grappling affair. By the third short story, Dunk has gained more fighting experience and now considers himself virtually peerless with an axe or mace, suggesting that a little bit of skill has gone a long way in helping him take advantage of his natural gifts. He eventually becomes Ser Duncan the Tall, showing just how far he's improved.
* Tales of Dunk and Egg this concept. Ser Duncan appears to embody a classic knight errant. He's (relatively) young and quite idealistic, believing in the code of honor that knights are supposed to follow. Indeed, he believes that "The Hedge Knight", i.e., the wanderer who sleeps in meadows and beneath trees, is closer to a "true knight" than the more political, class-conscious, power-playing knights he witnesses. After the first story, the pattern is established that he'll wander into a new area, encounter a problem, help solve it (though not in the way he originally intended) and then move on.
* Tales of Dunk and Egg truly believes Daemon Blackfyre's cause was just and that

his fellow rebels are heroes, no matter how much this has cost him.
* Tales of Dunk and Egg, we have the brief romance between Ser Duncan the Tall and a Puppeteer Tanselle Too-Tall. During their exchange of names, Tanselle notes that she often gets reactions regarding this trope because of her height.
* Tales of Dunk and Egg woman practicing archery nearby is Lady Webber, and that she is not nearly as bad as her reputation suggests.
* Tales Of Elethiya is able to grab a set of skulls off a roahn-ami while he's in battle with it. The heroes are then faced with the question of what to do with the souls inside.
* Tales Of Elethiya The stories of a noble, and sometimes misguided group of heroes, each dealing with their own baggage, fears, and beliefs as they try to find and rescue the missing Princesses of The Great Marrow.
* Tales of Eternia example of sorts; his hair colour is either blue or purple depending upon the picture you are looking at (and has varied widely in shade and intensity of said blue or purple, besides...), with his eyes always being blue or purple to match.
* Tales of Eternia, Fog/Max's Elemental Master arte turns his gun into one by firing a laser that covers the length of the entire battlefield and almost reaches the top of the screen.
* Tales of Eternia Healing Hands. Whoever holds Undine in the game also has practically all the healing magic in the party.
* Tales of Eternia. He can attacks enemies on his own, even when Meredy chants a spell.
* Tales of Eternia in the US) has a universe consisting of two flat edge-warping worlds that face one another, so each world is effectively the other's sky. A sun dispensing variable illumination is lodged in an energy barrier that keeps the two worlds apart.
* Tales of Eternia, no one in Inferia gives the heroes trying to stop the Grand Fall any credit (trying to execute them several times instead!) until they absolutely must acknowledge them (begrudgingly, because there's absolutely nothing else that can be done but to trust them) because the very idea of the Grand Fall is heretical. People in Celestia are much more helpful and grateful.
* Tales of Eternia of the group is currently doing some other work somewhere else, Max just walks up and body-slams it open.
* Tales of Eternia, the entire land of Celestia is run by captured Craymels or minor spirits. In fact, the only reason Inferia, the starting world, is still in a Middle Ages setting is because of their moral refusal to capture Craymels (although they view it more as desecration).
* Tales of Eternia this trope — right down to his long, flowing robes, anemic appearance, and his quintessential mage's staff. Since childhood, he has been awkward, clumsy and sickly (and thus a target of taunts and teasing courtesy of Reid), but makes up for it by being a dedicated and highly intelligent (and argumentative, and anti-social, and obstinate...) university student who learns some immensely powerful spells as the game progresses.
* Tales of Eternia, though not before unleashing its wrath upon one of the traders who killed its family and random monsters who get in the way.
* Tales of Eternia to send the actual desired words into the recipient's brain, and require the users to be on similar "psychic wavelengths". Interestingly, Meredy (or the psychic equivalent of her voice) speaks in pidgin English for the entire game; whereas when the Inferians actually reach Celestia, all the other Celestians speak with no accent at all, and the requirement of being on the same "wavelength" is, ironically, waived. None of this is ever explained.
* Tales of Eternia with divine aurora to Infinity Reviver before the reflected attack comes back at him, finishing him off.
* Tales of Fate is a very unique example. While he presents himself as a loner with a dark and troubled past, he actually has a strong sense of camaraderie with his friends, but has little faith in humanity and only fights to help others because it's the right thing to do. He's also killed more people than anyone at Beacon Academy ever has.

* Tales of Game's successfully ran a Kickstarter campaign for a sequel to
* Tales of Gil the ARM, bioethics are explored through having a society that can prolong life through transplant technology. This also addresses the death sentence issue, as the "donors" are condemned criminals, or for that matter any group that the voting public decides can be used for "spare parts" (In one of the stories, frozen dead — corpsicles — that died insane are being considered for becoming "donors", even though cures for their ailments now exist.) The conclusion: The inevitable erosion of the value of human life that this would cause is Not a Good Thing for society (if you can imagine death sentences for traffic tickets...)
* Tales Of Gnosis College seem unaware of the mad science going on in their midst. The mad scientists themselves take measures (not always successful) to keep their activities secret, and sometimes law enforcement itself hides the consequences of their activities for political reasons.
* Tales Of Gnosis College shifts from a national security story to a discussion of deep issues about the meaning of human life to the local sports report, treating all as being about equally serious.
* Tales Of Gnosis College suddenly manifests powerful tentacles with razor-sharp edges when a human being he cares about is threatened. The series also contains an panel in which a character imagines huge tentacles wrapping up and attacking an aircraft carrier.
* Tales Of Gnosis College that rather resembles an old-fashioned castle.
* Tales of Gnosis College) to infiltrate Professor Corwin's laboratory.
* Tales of Graces abilities. Sophie keeps trying to answer, only to have Emeraude interrupt her (and at one point Asbel himself) to answer the questions herself.
* Tales of Graces, Asbel breaks into Richard's room before he learns Richard is a prince.
* Tales of Graces, a Traveling Beastmaster concludes from Sophie's acrobatic tricks that she's either from the circus, or she's an assassin.
* Tales of Graces by Malik, Asbel, Richard, and Hubert. While Malik plays observer to it, the other three show disdain for it. Hubert mostly dislikes it because he thinks the person you marry should be your choice. Asbel and Richard agree and bemoan the marriage proposals they get.
* Tales of Graces can summon the spirits Grim Sylphie (wind), Cyan Deem (water) and Blood Flamme (fire).
* Tales of Graces, Cheria is freaked when Sophie discovers a mouse in Pascal's invention, Mecha-Asbel.
* Tales of Graces, defeating Lambda concludes the game. However, ƒ added an extra campaign called "Lineage to the future" which acts as an epilogue to the game. Sure enough, it even ends with a new final boss.
* Tales of Graces does this... rather weird gesture where she raises her hand looking like she's falling sideways before she catches herself and stands like normal and tends to answer with "Y'okay".
* Tales of Graces earns her Healing Hands through a plot event and proceeds to found a group focused on healing those injured around the world. Sophie also has these abilities.
* Tales of Graces end up creating one. Neither Hubert nor Asbel wanted to rule the town of Lhant in the first place, but circumstances years later force them to fight over it. Circumstances brought on, at least in part, by Aston sending Hubert away!
* Tales of Graces has the Sopheria flower, which Sophie is named after. When it blooms, its seeds glow a bright pink and rise into the air spontaneously.
* Tales of Graces has the sword of Asbel's father, Aston, which was a legendary eleth sword. When Asbel was in training as a knight, he sold the old, rusted sword for cheap to a traveling merchant called a "Turtlez" (one of many in the game), not realizing its history or potential. Much later in the game, the player can buy it back for hefty premium and take it to the Amarcian Enclave and it turns out to be the extremely powerful Excalibur.
* Tales of Graces have artes that are basically Japanese sayings like "因果応報", retribution or Karma, or "天衣無縫", ten'i muhou, the clothing of the heavens is

seamless, i.e. flawless, etc.
* Tales of Graces. However, Sophie has better single-target healing, Asbel has better defense and can overwhelm enemies more effectively, and Pascal is better at long-range.
* Tales of Graces, however there are a few survivors, instead of machines.
* Tales of Graces Hubert is granted the affectionate title of "Little Bro" by Pascal. Probably doubly sucks as Hubert has a raging crush on her.
* Tales of Graces involves riding a robot directly at the enemy she's firing upon, getting caught in the resulting explosion, and flying through the air and crashing into the ground.
* Tales of Graces is vulnerable to almost every status ailment in the book while in her ranged attack mode. It doesn't stop her from being insanely difficult, however.
* Tales of Graces messing around with a computer from the old Amarcian Enclave to even find the 'name' of the Aquasphere.
* Tales of Graces of Windor. While he prefers diplomacy, Richard is not against getting dirty to aid his people.
* Tales of Graces, Pascal and Hubert have one when he tells that her that just because her sister's mad at her doesn't mean that she's to blame, and she thinks that he's consoling her, but he insists that he's not. The skit is titled "Am Not, Are Too."
* Tales of Graces, Richard's descent into insanity is punctuated by him repeatedly slashing an enemy soldier even after the guard is clearly dead. The characters comment on how violent and bloody it was, but the player never sees a drop of blood on-screen.
* Tales of Graces seems to have this problem, if him fumbling around for his glasses in one of the battle victory scenes is any indication.
* Tales of Graces, she's a mechanical genius who can fix almost anything.
* Tales of Graces, she's so technologically savvy, she fills all the plot holes. She's also a mage.
* Tales of Graces shows a young boy who looks like a mix between Asbel and Cheria (their great-great grandson, according to Lineage and Legacies) playing with Sophie in the familiar flower meadow on Lhant Hill.
* Tales of Graces socially awkward she can be at times. Her immature behavior makes many players surprised to discover that she's 22 years old (although the visual design for her character doesn't help).
* Tales of Graces Sophie ridiculous lies for the lulz. This includes suggesting that Pascal is a rare breed of fish, gills included. He finally meets his match in Graces f when Richard rejoins the party, because Richard is sometimes even better at this than Malik. Especially notable is the skit "Reforming Zavhert", in which Richard leads Asbel, Hubert and Cheria in sweet, sweet revenge:
* Tales of Graces striking an enemy with a move it's weak against provides you with a temporary damage bonus that fades with time or once your combo ends. It's possible to exploit multiple weaknesses on the same enemy to increase strength and duration of the bonus.
* Tales of Graces takes the hammer usage to an extreme, wielding one as a weapon and utilizing Pow Hammer, Pow Pow Hammer, Pow Rain, and their status inflicting variations.
* Tales of Graces talk with letter Z'z replacing S'z in not just plural wordz, but also random wordz.
* Tales of Graces, the empire of Fendel is a corrupt mess that the other countries hate. Later in game you get to see how Fendel's people are affected by the corrupt government. In the town of Velanik, you can find a treasure chest at the end of a narrow path. Inside of it is a spoon, but when you turn around to leave a starving Fendelian child is blocking your way. You have to pay him 1,000 gald to escape. Thanks, the Empire!
* Tales of Graces, the manliness meter gets broken. Ladies and gentlemen, say hi to Malik Caesars.
* Tales of Graces. The two countries have a long and bitter rivalry—but when Asbel actually goes to Fendel and sees its towns for himself, he's left wondering

to himself how these poor people could possibly be his "hated enemies," much like what happened when the United States came face to face with how poor in actuality the USSR was.
* Tales of Graces, this is what prompted Hubert to grow from whiny crybaby to freaking general badass.
* Tales of Graces to end all trolls, Malik, takes Hubert aside, gives him Pascal's communicator, and encourages him to "tame the stray cat." During the credits there's a sketch of Hubert sitting at a fountain and receiving a message from Pascal.
* Tales of Graces wears a long white coat over a kimono like top and flowy white pants and white shoes. No one else in the game, let alone the knight academy, wears anything like this.
* Tales of Graces - were ones he taught himself from comic books. And then, of course, there's his transparently closeted obsession with the sunscreen rangers:
* Tales of Graces) when suggesting they go to the Amarcian Enclave. Hubert angrily asks why she didn't mention it earlier. Pascal says the trope verbatim. Hubert is the only one frustrated by this.
* Tales of Graces, which is obtained partway through the final dungeon.
* Tales of Halloween as herself in "The Night Billy Raised Hell", with Billy and Mr. Abaddon carjacking her and stealing her car.
* Tales of Halloween covers the events of one Halloween, combined with a couple of short flashbacks.
* Tales of Halloween has mounted the head of one of his victims inside a jack-o'-lantern.
* Tales of Halloween: In "Friday the 31st", the killer uses a chainsaw to cut off Dorothy's arm during their final fight
* Tales of Halloween: In "Grim Grinning Ghost", Lynn has arrived home safely and is brushing her teeth: having almost convinced herself that the ghost was just a figment of her imagination. Suddenly the bathroom door swings open and she looks round in panic, only to discover that her dog has just pushed the door open.
* Tales of Halloween: In "Grim Grinning Ghost", Lynn runs up to her front door, convinced that she is being chased by a ghost. As she attempts to unlock the door, she fumbles and drops her house keys.
* Tales of Halloween in "The Night Billy Raised Hell". Billy places a flaming paper bag on the doorstep and rings the bell, but when the householder goes to stomp it out, the bag contains a bear trap that snaps shut on his leg.
* Tales of Halloween in "The Night Billy Raised Hell". Billy places a flaming paper bag on the doorstep and rings the bells, but when the householder goes to stomp it out, the bag contains a bear trap that snaps shut on his leg.
* Talesof Halloween: In "The Ransom of Rusty Rex", two kidnappers abduct what they believe to be the son of a millionaire. However, their victim actually turns out to be a malicious goblin that has been plaguing the millionaire's life for years. Now that it is gone, he has no intention of ever taking it back.
* Tales of Halloween in "This Means War", one of them immediately throws up.
* Tales of Halloween—by his wife after she learns he has had a vasectomy.
* Tales of Halloween: The monster in "Bad Seed" is a self-mobile, man-eating pumpkin.
* Tales of Halloween: "This Means War" is about a war between neighbours over Halloween decorations that gets completely out of hand.
* Tales of Hearts adds the Reverse status to the series list. It inverts the up/down and left/right directions on the D-pad, and for some reason is the characteristic status of the Light element. Its version of Blind also makes everything black and invisible except the affected character.
* Tales of Hearts, and his brother Crinoseraph, a stoic, defensive spellcaster with two shields who's maintained his loyalty to his master.
* Tales of Hearts, and later, he starts declaring things along the lines of "this is my own will!" against his "rival" and the final boss.
* Tales of Hearts are having their penultimate Sweet Moment, the rest of the party spies on them this way from behind a nearby pillar. They fall over on their own.

* Tales of Hearts basically defines all the dangerous things in this trope. Also Corundum. In fact, almost every robot in the game, regardless of gender, is pretty much crazy. Except Kunzite.
* Tales of Hearts Chalcedny has just got done confessing to the woman he loves, and to cap it off, swears to bring her a world where she can smile. It's a fairly powerful scene… until the main character Shing steps up and declares, "We'll give you that world too!" The rest of the party drags Shing off as he protests, "It's better if everyone helps together, right?"
* Tales of Hearts. Everything inhabiting the planet quite literally had the life sucked out of it.
* Tales of Hearts has two of them as the brother and sister duo of Hisui and Kohaku Hearts.
* Tales of Hearts he gets the third kind as a bonus - two extra blades attached to flexible arms mounted on his back.
* Tales of Hearts: Kohak Hearts has a backless leotard which covers her to the neck in front, but, combined with the little leg-frills that suggest a microskirt, gives her a very flirty look from the back.
* Tales of Hearts ridiculous levels. By the end of the arte, he's leaving afterimages. That, or appearing for a slash before he's actually disappeared from the previous one.
* Tales of Hearts routinely uses his healing arte to patch people up out of battle, and is the game's primary healer within it. His sister Kohak eventually gains the most potent heal spells in the games, but long after Hisui's, and she never gains a good resurrection spell.
* Tales of Hearts runs very contrary to that of most of the other healers in the series.
* Tales of Hearts's Hisui has a pair of goggles that flip randomly between the top of his head and around his neck. He actually keeps them on in battle and off when out of it, but no particular significance is given for that.
* Tales of Heresy and that they were proud of it and hoped that he would be proud of that, too.
* Tales of Heresy), Angron is enraged that he cannot get dirt from where he lost to add to his "rope" — how can he properly commemorate the dead?
* Tales of Hoffmann, Dr. Coppelius makes a clockwork image of his dead daughter, whom he passes off as the original. Hoffmann falls in love with her and this makes the clockwork go haywire.
* Tales of Innocence: A sub-event that takes place as soon as the party returns to Regnum for Hermana has a young boy mistake Kongwai for his brother. The boy's mother notes the resemblance as well, but is aware that her son was killed in the Western Battlefield. While Kongwai initially seems annoyed at the crying child, he reveals his kinder side and agrees to play catchball to cheer him up.
* Tales of Innocence, but when questioned about it, he confirmed that yes, that's in the Japanese script too. He was as surprised as anyone else.
* Tales of Innocence does both the second and third methods. Relationship values go up based on cutscene dialog choices, and between any two characters at the end of battle if one used a healing or support skill on the other. The game is unusual in two ways: first, the game shows you the numerical values for every decision and at the end of every battle, even letting you check values at any time in the status screen, and relationship values can exist for every pair of the six characters, though only the main character's values affect the ending.
* Tales of Innocence has a big war going on between two countries in the background, but besides crossing a couple battlefields, you rarely see to much of it and spend a decent amount of time doing your own thing.
* Tales of Innocence is also a master of this, and like the aforementioned Jade, drops her gems in the same tone as everything else she says, so more often then not the rest of the party believes her until she says she's kidding.
* Tales of Innocence. It can also be used for flight in games with a battle mechanic that allows it to be spammed.
* Tales of Innocence, she sure has some impressive melee combos with that knife of

hers.
* Tales of Innocence: The R version of the game added many, many optional dream sequences to the characters' past lives while sleeping at inns. Notably, all of them are fully voiced, unlike most of the game's skits.
* Tales of Innocence were both released for the Vita with new graphics and sound design.
* Tales of Kolmar, a character once exclaims, "Goddess, Rella!" and Rella lightly responds, "Not yet, but I'm working on it." She isn't; she just has a very irreverent sense of humor.
* Tales of Kolmar. All of them feel it, some more than others. Some try to ease it by learning to speak to trees, but that takes a long time even by their lengthy standards and trees don't have much to say. Demons are intelligent but also Kantri's mortal enemy. That leaves humanity, and time and again those Kantri who don't simply dislike humans too much to talk quickly become enchanted by one or another, delighted by the smallest exchanges. Exposure to humans also makes Kantri more inclined to think in terms of hours or days as much as months or years, which can be good and bad.
* Tales of Kolmar demon-made attraction charm, fall for him complete with blushing at the very thought of him despite being in her twenties and, she thought, over that kind of reaction to boys. She didn't know he was her father then.
* Tales of Kolmar demon-summoning mages and those aligned with them always have to give the demons some of their own blood. On the heroic side, a mage discovers that when she touches her own blood to a dragon's soulgem her demon-fighting powers are greatly enhanced, to the point of being able to dispel minor ones with a touch.
* Tales of Kolmar grow throughout their lives, molting their armor every fifty years or so. The Eldest in that series, Shikrar, is over eighteen hundred years old and the largest of them, as well as a good fighter and the best flyer — though that last can't be attributed to his age, he became the best flyer and held on to that distinction from a much younger age. On their own Kantri reach about two thousand years before they die, which isn't discussed but it seems to happen fast. It's also noted that some grow "old before their time" and start to mentally slip; Shikrar suspects that another Kantri is one of these and guiltily wonders if he'll die in his sleep well before the two thousand mark, as these often do.
* Tales of Kolmar killing themselves, though normally there's some delay.
* Tales of Kolmar. Lanen fights back in every situation, but she screams like bloody murder as she does so, too — her philosophy there is to never deny anyone the chance to come help.
* Tales of Kolmar: The trilogy centers around the re-discovery of the Kantri, a long-forgotten race of dragons.
* Tales of Kolmar to be with Lanen as Varien. When this happens he doesn't stop praying to the Winds, but he does mention the human goddess, Lady Shia, a lot more often and with more reverence than before.
* Tales of Kolmar useless; it's comfortable to sleep on, decorative, they can soften it with their fiery breaths and carve and sculpt it, and most importantly they're able to slather it on as bandages after they're injured, to seal the wounds. They're still baffled by the human desire for it.
* Tales of Kolmar where a demon summoner who is immune to dragonfire turns out to not be immune to human fists.
* Tales of Kolmar, which was prophesied to result in monster children and later a world brimming with demon fire with nothing to stop it. When Lanen got pregnant this pregnancy almost killed her several times, since the mingling of such different kinds of blood was hard on her body, but ultimately the trope was subverted.
* Tales of Lagoona 2: Peril at Poseidon Park name, Leona. At one point he asked his aide "Bubbles" (real name Vinny) "Who's this Leona I keep hearing about?"
* Tales of Lagoona 3: Frauds, Forgeries and Fishsticks' "It Takes Tuna to Tango" quest description, in part:
* Tales of Legendia all have the innate ability to use Eres (the setting's term for magic), an ability that only began to appear among the Orerines fifty years before

the game's start.
* Tales of Legendia altogether. Not too long after this, Shirley confesses to Senel that she is in love with him. They presumably end up engaged via the Rite of Feriyen by the end of the Main Quest... although afterward, the other characters note that the relationship between them doesn't seem to have changed much at all (they even get new titles to reflect this; Senel obtains "Still A Brother" and Shirley obtains "Sister Girl").
* Tales of Legendia, as she is no less of a badass at the end of the game than she was at the beginning.
* Tales of Legendia but at the start of Side Story they still feel like siblings.
* Tales of Legendia. But if the player solves them all without skipping a single one, you get a title for Senel. Sadly, the title barely increases his stats, outdone by almost every other title he naturally obtains just by gaining levels in combat. You'll probably get it on an initial playthrough to prove you can do it, and then never get it again.
* Tales of Legendia but the damage scaling is disadvantageous by the end. Physical fighters will cause a lot more damage, relegating magic to crowd control and stunlocking utilities.
* Tales of Legendia every single time they get hit. There's also Mimi Baker, who shouts "Crummy!" every single time she blocks a hit, and shouts "Take this!" for almost every single swing she makes, even with her Bread Rain: Alpha that consists of close to a dozen hits delivered in the span of a few seconds.
* Tales of Legendia has Giet, Moses's pet Galf (a wolf-like creature). The Oresoren also fill the part of mascot characters, but they're their own intelligent race.
* Tales of Legendia is a big offender. The same twelve enemies appear constantly throughout the game, sometimes twice in the same dungeon, with only their palettes swapped out. This gets ridiculous within the first ten hours of the game, but in a seventy hour game, it begins to feel incredibly monotonous.
* Tales of Legendia, is never seen with a shirt on, even in flashbacks.
* Tales of Legendia, Jay was raised by a ninja, and then hundreds of talking otters. He's an antisocial "information dealer".
* Tales of Legendia kicks in when you realise that one of the game's races (of which many plot-relevent characters are from) originates from under the sea. Also, in a subversion, said sea-dwellers do not actually see themselves as being "human".
* Tales of Legendia looks to be of slightly above average musculature at best, but is nonetheless capable of throwing around monsters about three times bigger than himself with ease.
* Tales of Legendia means that water aligned spells like Spread, Aqua Laser, and Tidal Wave are just as effective against dark enemies as light spells.
* Tales of Legendia she meets (and gets annoyed if anyone else uses them). Nicknames include:
* Tales of Legendia; she's not quite so huggy when she has her memories).
* Tales of Legendia, Shirley is in love with Senel, but he was engaged to her sister, Stella, who died, and won't move on from her death.
* Tales of Legendia that deeply about relationships and is just messing with everyone for fun.
* Tales of Legendia: The female lead, Shirley Fennes, is a Ferines — a race of aquatic people that have been at odds with humanity for centuries. Even more than that, she is the Merines, who has the ability to hear the voice of the Ferines' god and let him act through her. Later in the story, a group of antagonistic Ferines perform a ritual that revives the god in Shirley in the hopes that said god will wage war against humanity. Their plan nearly succeeds because around the same time, Shirley confesses her feelings to the protagonist Senel, who rejects her because he is still in love with her deceased older sister. After she runs away, her only remaining friend, Fenimore, is then killed by an army of attacking humans. These events push Shirley over the edge and make her much more susceptible to the god's influence, as her pain and rage is amplified. She spends the next portion of the game being one of the major antagonists, encouraged by the priest who had been plotting this all along.

* Tales of Legendia. There's even a point in the game where one of the female characters suddenly grabs him and pulls him into a deep, passionate kiss...twice. He, however, is completely unaffected both times.
* Tales of Legendia This is a bit of an odd example in that none of the gameplay even takes place on the continent in question.
* Tales of Legendia, until finally brought back to her senses by Senel, who apologizes and is more receptive to her feelings, although he admits it will still take time.
* Tales of Legendia, you'd think she'd get stronger now that she actually knows who she is, what her powers are, and how to properly use them. Nope. Although there is some Integration here, as her battle quotes (and even the pitch of her voice!) all change to reflect her sudden change in personality.
* Tales of Link that fights with a smartphon. Smartphon stands for "Sacred Magic ARTifact PHONophototabulus", by the way.
* Tales of Maj'Eyal (albeit the dream of a deity) can manipulate it by using dream logic "IRL."
* Tales of Maj'Eyal and sniping skills, or throwing off physical status effects with the Unflinching Resolve talent, but it also includes Berserker talents that let them shout so hard it inflicts physical damage or shrug off damage that should kill them, or a Brawler's ability to wrestle a dragon to death.
* Tales of Maj'Eyal, Berserkers can unlock the Unstoppable talent that prevents any effect at all from reducing them to less than 1 HP for a time, while Necromancers have the Blurred Mortality talent that changes their threshold for death from 0 HP to -50, or even less - at maximum talent level you have to get to -250 HP to die. There are also Heroism infusions equippable by any class that can let users survive with negative HP in the hundreds.
* Tales of Maj'Eyal DLC, where we see tribes of orcs and giants who make wide use of steam technology and even steam-powered guns.
* Tales of Maj'Eyal has the Possessor class, which can steal the bodies of enemies that die while under their Possession debuff and add them to their library of forms. When the Possessor assumes the form of one of their stolen bodies they can use some of the body's skills. They also have access to the Steal Soul talent, which let the Possessor take one of a target's skills and renders the target unable to use it.
* Tales of Maj'Eyal includes the town Zigur, comprised almost entirely of violent and obsessive magic haters, hunting down those who either use magic or items powered by magic without regards to personality or history. Semi-justified as one of the biggest disasters of the setting, the Spellblaze, was caused by magic (although not on purpose). While their creed is extreme, several of the settings' worst threats are magic abusers, thus there is at least SOME cause for their existence.
* Tales of Maj'Eyal of other things, and so can only regain Vim by attacking creatures.
* Tales of Maj'Eyal spells, allows you to do this to a monster. You have to push it outside of time and kill it there first, but if you manage that, everything that you used outside of time gets restored to you.
* Tales of Maj'Eyal, the Kruk Pride orcs got this in the backstory after the death of Garkul. The Kruk specialize in support and logistics, and this made them an integral part of Garkul's army because the latter was a brilliant general who understood that an army marches on its stomach. After Garkul died, though the Kruk were treated like crap by other orcs who couldn't understand why the Kruk were wasting their time building things instead of killing humans like real orcs.
* Tales of Maj'Eyal use damage shield spells, which function like personal deflector shields. Archmages and Arcane Blades have abilities that make damage shields more effective, and even characters who aren't casters can still use shield runes.
* Tales of Maj'Eyal. Who in turn, believing in the evil of arcane magic, experimented on Ogre volunteers who wished to escape magic's taint until they created the Krogs through natural infusions.

* Tales of Monkey Island after he has caught the Desingeograph of his Poxed hand with his feet and flips it onto the picture bucket near the Illuminopictoscreen. Even though he says that as if he were doing it by accident, it is all a part to escape from the operating table in De Singe's laboratory.
* Tales of Monkey Island apparently says "Guybrush Threepwood! I've been waiting a long time for this!" twice, as his response is different in each episode.
* Tales of Monkey Island at the peril of being dropped down the gullet of a giant manatee. Morgan knows all about Guybrush because she's a huge fan, and Guybrush must deduce the answers to the questions based on clues he encountered earlier.
* Tales of Monkey Island, but doesn't work as Lechuck had already absorbed so much power it didn't affect him.
* Tales of Monkey Island episode, Guybrush can converse with LeChuck, who had been turned human at the start of the game, and accuse him of faking being human by trying to pull off his mask.
* Tales of Monkey Island features Kevin the Thief who can repeatedly steal anything Guybrush tries to take from his place. Kevin has NO HANDS!
* Tales of Monkey Island, Guybrush and Morgan LeFlay have to do this in order to convince Coronado De Cava that Guybrush is not trying to steal his lover, the Voodoo Lady, away from him. De Cava is a little...unhinged...from being stuck in a giant manatee for a long time.
* Tales of Monkey Island, Guybrush does this when he is talking the Voodoo Lady. To avoid her very long talking, Guybrush plugs his ears and says, "La-la-la-la! Not listening!" This mutes the Voodoo Lady's voice before Guybrush unplugs his ears, just in time to hear the rest of the Voodoo Lady's talking.
* Tales of Monkey Island, Guybrush gives us, "Your mama's so fat, it's probably a serious health risk for her. She might want to visit a physician about that."
* Tales of Monkey Island, Guybrush has the option of doing this while on trial; it's one of many ways to anger the judge (necessary to solve a puzzle).
* Tales of Monkey Island, Guybrush has to follow a set of steps to prepare a Voodoo recipe called the "Feast of the senses", to feed La Esponja Grande and make it grow. In the next episode he has to follow similar steps but backwards to make the Esponja shrink, as Lechuck had stolen it and was using to steal the Voodoo energies of the Crossroads.
* Tales of Monkey Island, Guybrush needs to infiltrate a Brotherhood to get the item to advance the plot and needs to be voted in. In order to earn the vote of Murray, whom Guybrush has cleverly inserted into the group posing as their member Santino, Guybrush has to trick Murray into thinking the initiation ritual will consist of a torture session by using this trick.
* Tales of Monkey Island: Guybrush Threepwood goes to open a cabinet, which the Voodoo Lady yells for him not to open. He asks her what's in it, and she replies, "My unmentionables." Guybrush shudders, and the cabinet from then on is named "The Scariest Cabinet In the World."
* Tales of Monkey Island has apparently been following the career of Guybrush Threepwood, Mighty Pirate, since he first defeated LeChuck, and is honored to cross swords with her idol.
* Tales of Monkey Island has various rips in the Crossroads that appear on LeChuck's ship, Club 41, a raft atop the Manatee Mating Grounds in the ocean, and a secluded island somewhere in the Gulf of Melange.
* Tales of Monkey Island have to fake being a married couple for Coronado de Cava so he would help them, as they were all trapped within a giant manatee and Coronado was neurotic and thought that Guybrush wanted something with the Voodoo Lady.
* Tales of Monkey Island. He can cross-examine himself, consult with himself during recess, insult himself, and even feign a fight with himself. The judge has a limited tolerance for this nonsense, but the guard is fooled enough to let lawyer! Guybrush go free after being "assaulted" by client!Guybrush.
* Tales of Monkey Island); her winning line, "He dug up my perfectly good X!", appears in Hardtack's accusation against Guybrush. Not only that, but her name also appears on the list of "Designer for a Day Finalists" in the end credits of Chapter 4.

* Tales of Monkey Island, if Guybrush tells Judge Grindstump "I want a change of venue!":
* Tales of Monkey Island, including Dan Connors and Kevin Bruner (whose portrayals in two picture frames as "D.C. Grosscup" and "K.B. Popnecker" appear in the Courthouse in Chapter 4).
* Tales of Monkey Island into an antagonist's gun, causing it to fire backwards.
* Tales of Monkey Island involves finding dialog lines that are simultaneously insulting to a challenger and consoling to a crestfallen ally.
* Tales of Monkey Island is a crazy French doctor who was kicked out of the court for his insane experiments. He wants to become immortal, even if it kills everyone else.
* Tales of Monkey Island, is a rabid (and the only) Guybrush Threepwood, Mighty Pirate(TM), fangirl.
* Tales of Monkey Island, LeChuck is turned into a human. During a conversation in the second episode, Guybrush can test this theory by pulling on LeChuck's face, thinking he might be wearing a mask. He's not.
* Tales of Monkey Island lets the player ask Guybrush's wife Elaine how her day has been and if she needs anything to eat... while she's tied up on the deck of a zombie demon ghost pirate's ship.
* Tales of Monkey Island. Moose adds that the other ichor, the yellow bile, is acidic and hazardous to the digestive system when drunk. Since De Cava only likes the orange ichor, Guybrush can trick him into drinking the yellow bile served on a mug for one of the key expressions in a Pirate Face-Off.
* Tales of Monkey Island, Morgan Le Flay is a pirate hunter whose number one idol is Guybrush Threepwood - a pirate.
* Tales of Monkey Island, Noogie plays the manatee bile sacs like bongos, and playing them wildly can cause the bile to rise up.
* Tales of Monkey Island presiding over a court filled with an equally bloodthirsty, pox-stricken audience of pirates. Even with the pox, he's quite a different character outside the courtroom, not the least bit concerned when you escape from jail during recess.
* Tales of Monkey Island series to have playable cold openings in five chapters... sort of. Chapter 1, for example, has a playable intro that can be accomplished with help from instructions before the main title starts. Chapter 3 has a VERY long playable cold opening consisting of a few tasks and an "Answer the question" minigame before the chapter's title starts. Chapter 4, on the other hand, only has the shortest playable cold opening, where you only have to select a topic before the chapter's title starts.
* Tales of Monkey Island!" This is practically the Marquis' catch phrase. His one weapon you see him with is labeled in the concept sketches as the "Porcelain, Bronze, and Wood Gun of Science!"
* Tales of Monkey Island to help him conquer an even bigger female manatee, who is very angry and would eat him if something went wrong.
* Tales of Monkey Island, when Le Chuck asks Guybrush for hints on solving a puzzle, the latter has the option of saying to eat breath mints. Le Chuck appears not to realize the point.
* Tales of Monkey Island, where Coronado De Cava tries this on Guybrush and Morgan (who are pretending to be a honeymooning couple). Their answers turn out similar enough that he believes them.
* Tales of Monkey Island. Whoever gets infected with this voodoo plague slowly loses their ability to reason and becomes more and more violent. It only seems to affect pirates for some reason, though.
* Tales of Monkey Island, with each one describing the title of the next chapter.
* Tales of Monkey Island with his remark "I didn't know tiny islands like this really existed." He also comments that he's glad he's not stranded there (he got there by sailing to it after choosing the destination from the ship's map) or else he'd have to worry about having something to read.
* Tales of MU, about a half-demon enchantment student and her (mis)adventures in a setting where D&D-style magic takes the place of technology.

* Tales of MU a professor caught a rich student who had been turned into a mouse by a trap on one of their dwarven weapons on display. One of his friends had also been transformed and caught by a cat, he wasn't too concerned because their insurance covered resurrection and they had both been killed before. Then she reminded him that the spell required a body, oh shit indeed.
* Tales of MU, as artifacts lost in a teleport mishap showed up in the author's other stories.
* Tales of MU as well. She is, however, a storm giant, if a small one.
* Tales of MU avert this. Many elves have spoken at their own funerals and "taking elven leave" is a dwarf euphemism for suicide.
* Tales of MU by dietary preference or culture (though nobody dares to discriminate against dragons on this basis).
* Tales of MU demons and their part-human descendants need to consume specific human parts which vary by the individual. Half-demon Mack drinks a pint of virgin's blood once a month while her father eats ovaries, a more human part-demon mentions she gets by on blonde hair.
* Tales of MU depicts elves and dwarves are the descendants of quarreling twin brothers, who grew into their current forms by attempting to emphasize their imagined differences.
* Tales of MU, dogs can detect the main character's ancestry and are utterly hostile to her. This naturally results in her being afraid of them.
* Tales of MU elves commonly use homosexuality as a form of birth control.
* Tales of MU established a separate dorm for the non-humans and part-humans, supposedly to make them feel less pressured to conform to human ways but in actuality at least in part to keep the freaks out of sight. The characters' foibles, both personal and racial, make up a significant part of the series.
* Tales of MU ethernet, not like real world ethernets at all. Forums are known as tapestries (threads, get it?).
* Tales of MU falls into this situation pretty quickly. As things stand, she is the lover of Ian, Steff, and Amaranth, the former two also being Amaranth's lovers (but not with each other as well).
* Tales of MU has many examples, magical TVs and refrigerators are mentioned by name, crystal balls are used as computers (complete with "aethernet") and mirrors are like phones (including pocket-sized "smart" mirrors).
* Tales of MU has science treated in a similar way to Wicca in our universe. The author has specifically stated in the FAQs that the scientific method simply doesn't work if you try and apply it to magic. Oftentimes this is because the magic actively refuses to be analyzed in such a way - it'll work reliably until you try and prove that it works reliably. Anyway, magic exists in this world just as much as science does in theirs.
* Tales of MU has to visit her lawyer, Lee Jenkins, in his office, and discovers the elevator warded against infernal entry, this comes into play in the form of a joke regarding how long a law firm could last if infernal beings weren't permitted to enter its offices.
* Tales of MU, in a sexual way, but she's also specifically in love with Mackenzie. Unsurprisingly, Mack needs some convincing on the latter point due to her crippling self-esteem issues.
* Tales of MU, is DEEPLY submissive, and gives herself to Amaranth (a nymph) in this way as a Type A. The ogres in said work also have a strict chain of people-ownership, romantic and otherwise, which leads to Mackenzie being treated like a simple object because she's too far down the chain of sexual dominance.
* Tales of MU is more muscular in appearance, but not enough to account for the fact that she's sometimes stronger than a dragon.
* Tales of MU is widely speculated to have been fathered by an incubus (and, by extension, to be half-succubus herself, though she feeds on virgin blood rather than sex).
* Tales of MU, it's been explained that male and female dwarves just don't get along. The one full-blooded female dwarf who appeared was not described with a beard. MU dwarves have a strong disposition for secrecy and privacy, though the

college-going ones are willing to make exceptions for attractive women of other races. One recurring minor character, Gebhard, shows a somewhat fussy and fastidious nature.
* Tales of MU). Mack therefore has atrocious table manners when her friends start introducing her to food, and at the buffet she gets hooked on barbecued ribs, eating not only the meat but the bones as well. Naturally, this freaks out the other patrons and she gets thrown out and banned.
* Tales of MU monthly to sustain himself and impregnated and abandoned the main character's mother twice. He wears a snazzy pinstriped suit and waxes philosophic (sometimes in High Draconic) when speaking with his daughter, however, and like Embries is a master of seduction.
* Tales of Munchausen, there was a man who was so fast, he had to tie heavy weights to his legs just to run at a usable speed — otherwise, the first step he takes, he'd stumble and fall over the equator.
* Tales Of Mundane Magic, and can't cross salt, which includes saltwater. If they get angry enough they become poltergeists.
* Tales Of Mundane Magic some zombies retain their ability to reason, and are even able to play hockey, with necromancers onhand to reattach body parts that come off as a result of injuries.
* Tales of MU Other characters have significance in their names, to the point where some readers look up the name of every new character who appears. Indeed, there can be frustration and complaint if a juicy new name appears and linguistic analysis doesn't quickly follow in the comments section.
* Tales of MU. Rather than form a unified pantheon, most of the gods deny each others' divinity, and all teach contradictory theology/mythology. One character (a demon, so technically an enemy of the gods... or something) even asserts that the gods are just anyone who is powerful enough to smite anyone who claims otherwise.
* Tales of MU she likes being able to legally inflict pain and injuries on college kids. Possibly both.
* Tales of MU show levels of doormat affinity, but two in particular have fit the definition of Extreme Doormat:
* Tales of MU sometimes fall prey to the translation problem mention above.
* Tales of MU, Sooni assures the residents of her dorm that she isn't going to use the protagonist's demonic heritage against her in their floor's election for school Senate. Just a few seconds earlier, she had implied that said half-demon wanted to eat their relatives.
* Tales of MU speaks with a variation of this: as a freed golem, she speaks fairly formally, and especially does not wish to voice any opinion or preference. In the early chapters, she had serious problems saying that she wanted anything. This can be seen in the "Two's Diary" Bonus stories, where she crosses out any line that expresses any emotion or desire. She's gotten better as the story has gone on, however.
* Tales of MU starts by introducing the two dozen girls that live on protagonist Mack's floor and goes from there.
* Tales of MU takes place in a magic-based world where speculative fiction is categorized into "Magic-Fiction" and "Fantasy". As a kid, Mack used to watch a TV show in the fantasy genre about bikers with chainsaws.
* Tales of MU. Technically all law firms given the high fantasy setting, but this one is played as more willing than most to represent non-humans, apparently they've worked for greater Dragons in the past.
* Tales of MU, the elven "queen" Glory gets irate when Mack's friends talk about their discomfort with Mack spending the night with Glory.
* Tales of MU. The elves are immortal, wise, good at EVERYTHING and generally peaceful, but also arrogant as all get out and often absolutely batshit insane, especially when it comes to sexual matters (it is considered fairly rational elven behavior for a young elf to castrate the lover of a rival just to spite them, for example). They resent the weariness of their too-perfect lives and usually end up killing themselves. The major half-elf character in the story hates her heritage and everything to do with it.

* Tales of MU, the half-demon Mack doesn't need to defecate because her body completely processes whatever she eats as a side effect of her demonic nature.
* Tales of MU, the main character's mother is believed by everyone to be dead, but side stories reveal that she may be alive and living under an assumed name, for reasons not completely clear yet.
* Tales of MU. They keep their birth rate low by doing things that don't produce children.
* Tales of MU, Two, the liberated golem girl, has to be protected from this trope by her friends.
* Tales of MU when Mack agrees out of exasperation, pity... and sexual interest.
* Tales of MU. While "halfling" is offensive to gnomes. The inhabitants of the non-human dorm, Harlowe Hall, are collectively referred to as "harlots".
* Tales of MU (who denies any interest in her classmates' chests and then mentions being so shocked that she looks up and meets their eyes) and to poke fun at the informal writing style, as when Mackenzie mentions her campaign letter containing barely any ellipses.
* Tales of MU. With members of these races integrated at a human university, it can lead to culture clash.
* Tales of MU work, in-universe? There's a difference between craftsmanship and science. You can make a gun without knowing ballistics. Pointing out this inconsistency to the author is an excellent way to make her not pay attention to you anymore.
* Tales of Mystery and Imagination — Edgar Allan Poe by the Alan Parsons Project. It was straight wage work: the whole thing was arranged through agents, Welles was sent a script, and Parsons was sent a tape.
* Tales of Phantasia actually predicted this and stated this as a reason for continuing his evil plan.
* Tales of Phantasia, all elves have the innate ability to sense and manipulate mana in the form of magic. These abilities are not shared by humans, but they are shared by human-elf hybrids even after generations of dilution.
* Tales of Phantasia (Arche) in their party. The party essentially sits there and takes it, and never actually tries to rebuke him.
* Tales of Phantasia are non-existent, not to mention the Rheiards that the party can fly on to avoid random encounters on the overworld.
* Tales of Phantasia, Artemis refuses to let the party see the moon spirit Luna, with whom they want to form a summon contract with, until Arche kisses Cless. As they are just about to do it, Mint pushes the two apart claiming it's "not right" to do this. Then Luna's voice interrupts further by telling Artemis to stop his prank and allow them to see her already.
* Tales of Phantasia a spellchecker that accidentally auto-corrected all the instances of "Ragnarok" to the Australian mammal.
* Tales of Phantasia by Namco, the character designs were replaced by the ones done by Kosuke Fujishima, but it was too late to change the sprites at that point. The sprites were changed in the remakes to reflect Fujishima's designs.
* Tales of Phantasia DeJap fan translation has, quite possibly, the most memorable line of the entire game.
* Tales of Phantasia feature doors that can only be opened when 4 (and later 5) people stand in front of them, basically ensuring that the player has to reunite the party.
* Tales of Phantasia features Demitel's manor, a dungeon where aside from undead and monsters in the garden, the only inhabitant is Demitel himself.
* Tales of Phantasia had the Cathedral of Fenrir. With, for bonus points, an organ BGM named "Perverse Religion".
* Tales of Phantasia has a Hell Lord monster infesting one area of the Slyph Mountain. If encountered, it will casts a powerful summon spell to kill off an entire party in one blow, forcing you to keep retreating until you solve a dungeon puzzle to get rid of it. Fortunately, running away from it is pretty easy to do.
* Tales of Phantasia has pink-haired Arche and her blue-haired boyfriend Chester.
* Tales of Phantasia. He actually belongs to an entire order of knights clad in

black, which wasn't all evil.
* Tales of Phantasia: Is it Cless or Cress? The official Japanese spelling is Cless Alvein, but the English translation uses Cress Albane. (Since another character is named Mint, and cress and mint are both types of herb, Cress would seem to be the correct choice.)
* Tales of Phantasia, it's possible to have one more character than needed.
* Tales of Phantasia land. And if you're too lazy to hunt for them, they're storebought a bit later on.
* Tales of Phantasia, long since destroyed by a meteor impact, the shield around it is still working perfectly. So by extension, so are the automatic doors, the TV (and video game system) in the pub, an electronic lock and card reader, the security systems, and the main computer Oz. Justified in that the city's power comes from the Spirit of Light, Aska. After the city's been pulled up from underwater, you can free Aska and have her join you. The city systems still somehow work after that, though...
* Tales of Phantasia Mint from the jail cell and escaped together. Arche and Chester, on the other hand, can't even interact for a second without getting furious at each other.
* Tales of Phantasia, Mint tells Cless that, shortly after they escaped from the dungeon, she saw him holding onto a unicorn earring that belonged to Meryl, Mint's mother. She thanks Cless for not telling her then what happened because, had she known, she would have lost all hope, and then Mint starts crying.
* Tales of Phantasia? No one knows. Also, when walking around as Arche (possible in later remakes), she seems to float around on her broom when "running." She still gets hurt by tiny floor spikes.
* Tales of Phantasia. Notable in that it is only used in cutscenes, rather than by the player, and also notable in being a horrible idea that almost always fails horribly. Turns out that a cannon shooting vast quantities of raw mana is a horrible idea when the source of mana only generates a finite amount and can be overstressed. The cannon is used four times over a roughly eight thousand year period.
* Tales of Phantasia notwithstanding). Conveniently, you also get the spear version of this, a weapon you've had once before but had it confiscated, the most powerful offensive magic spell, and the most powerful summon in the game — four Infinity Plus One Swords for the price of one dungeon.
* Tales of Phantasia reveals itself to be this in the opening cut scene. Playing the game shows that the kids are apparently more competent.
* Tales of Phantasia scene, Arche claims that Mint has a really nicely-sized pair of breasts. Arche is often described as attractive too.
* Tales of Phantasia, so Cless and Mint look embarrassed at each other for a couple of seconds, and then Cless mumbles, "I-I'll sleep on the floor..." and practically runs away. A moment later, he's fast asleep, and Mint brings him a blanket and pillow.
* Tales of Phantasia. So it's no surprise that the best weapons for the protagonist are based in Norse and Arthurian myth, with the katana trailing far behind. If you visit Japoni at the earliest opportunity, the Muramasa is the best slash weapon for a while. Just not forever.
* Tales of Phantasia take place in the same setting with a (literal) world sundering and world re-merging between each game. It was originally one planet, then split in two, then put back together again.
* Tales of Phantasia that when Dhaos is defeated and the world is saved, Claus and Arche will have to return to the past. Arche is a bit of a subversion, since she's a half-elf, and thus will still be around in 100 years, but Claus...
* Tales of Phantasia, the ancient city of Odin was more or less on par technologically with Earth in 1994, and even looked like a modern metropolis. It suffered a major universe-appropriate WMD-style cataclysm and ended up buried, but reasonably intact. Contrast with the mostly medieval style of everything else in the world.
* Tales of Phantasia The elves claimed that the halfbreeds could not be trusted,

since they possessed the power of elven magic but lacked the elven values to employ it responsibly. Cless then kindly tells them to shove it, as the whole reason halfbreeds had human values was that the elves kicked them out in the first place and they had no choice but to live among humans.
* Tales of Phantasia. The GBA version has alternative spellings (or poor translations) of said books. Also, these books apparently weigh a ton, since Claus can use them to smack around monsters.
* Tales of Phantasia. The protagonists actually get to rise it back to surface on the trip down there (and get elected as the new president to do this).
* Tales of Phantasia timeline has this going on. Periodically, mankind invents magitechnology, culminating in a Mana Cannon, the use of which kills large numbers of people and depletes so much mana as to threaten the life of the Mana Tree. Things progress too far, the Mana Cannon causes too much destruction, and civilization is cast back into the Dark Ages for a while. Then somebody starts exploring ruins and finding out about this thing called "magitechnology"...
* Tales of Phantasia, to acess the mountains you must first break it with a pickaxe you bought from the nearby town and when you use the tool it causes the rock blocking your path to explode. Made of Explodium indeed.
* Tales of Phantasia. Unfortunately, only the Game Boy Advance version, widely considered the weakest version, was the only one that had seen an official English version until the since-removed iOS version, which isn't thought of too fondly, either.
* Tales of Phantasia when Cless and Mint first arrive in the past. They're both embarrassed by the situation, and it ends with Cless sleeping on the floor.
* Tales of Phantasia, where ice continents can be found on both hemispheres. The southern hemisphere also contains a desert continent.
* Tales of Phantasia. Which, to be honest, is fairly understandable...
* Tales of Phantasia will use his books as a weapon if he doesn't have enough mana to summon something, an enemy is too close, or he is told not to use magic.
* Tales of Pirx the Pilot. The computers and robots in the stories usually show just one human trait at a time, e.g. rising to a challenge, dreaming, or having OCD.
* Tales of Rebirth. A few years prior to the events of the game, the Gajuma king used a ritual to grant this ability to a small number of humans.
* Tales of Rebirth, Annie asks Hilda to use her Thunder Force to revive a dead soldier, saying that "according to a research paper [she's] read, a person can be resuscitated after cardiac arrest if you apply a weak electrical current to the heart".
* Tales of Rebirth: Casters in this game have different utilities. Mao focuses on mobility and crowd control while Hilda bombards enemies with powerful, multi-hitting spells. However, since the game allows your melee characters to get Damage x 32 if you manipulate the Enhance systems, you would expect your melee characters to be able to outclass your casters in terms of damage. You would be wrong. Freeze Lancer is the arte with the potential for the most damage due to its 8.0x multiplier on the first hit...and it's a spell. Overall, magic is extremely powerful in this game.
* Tales of Rebirth features the "Seven Great Illusions", phenomena which the adventurer Franz is seeking. Three of them are sought during the main story, althoigh the "Garden of Illusion" is quite different from the one found during the story.
* Tales of Rebirth has Zapie, Claire's pet. He plays a minor part in story, mainly by sensing Claire's presence.
* Tales of Rebirth if their emotions start going out of control, usually with negative consequences to the surrounding environment. Veigue, for example, freezes his friend Claire accidentally, while Tytree trashes an entire factory within fifteen minutes by causing plants to grow out of control.
* Tales of Rebirth partway through the game, and afterwards Tytree is ecstatic at being the "closest one to Veigue." Yeah. Add that Tytree doesn't seem all that interested in women and the alternate couple of Veigue/Tytree is quite reasonably

popular, enough to rival Veigue/Claire.
* Tales of Rebirth possesses the Force of Plant, which he sometimes uses during his artes.
* Tales of Schlock, Manoa tried to do this to her own relationship. Her main squeeze Deedo started showing signs that he wanted a more serious relationship. Manoa, who had been wary of relationships ever since her boyfriend impregnated and left her, wanted to break up with him. She demanded that he have constant sex with her and she planned to end the relationship when he was too wore out to deliver. Luckily, Bodacia gave Deedo a shake that increased his sex drive enough to meet Manoa's demands.
* Tales of Schlock, Roux's butt and Fukumi's boobs accidentally get hit with zafti-gamma rays and they start to grow dramatically when they get excited. Roux uses her powers to become the super heroine "Queen 'B'" while Fukumi gets brain damage and becomes the diabolical "Double D."
* Tales of Sonic the Hedgehog fail, Sonic and Uncle Chuck come to this conclusion, considering Julian Kintobor effectively dead. Sonic in particular declares that when they see Robotnik, they're not looking at Julian, but the monster that killed him, and during the climax of the Westside Island arc, he flat-out tells Robotnik to his face that he's nothing but a "heartless, evil monster" who's wearing Dr. Kintobor's skin.
* Tales of Suspense #39, when Tony Stark first put on his first Iron Man armor to escape from a Vietnamese prison camp, he takes one step in his armor and falls flat on his face.
* Tales Of Suspense). Cue Red Skull gloating about it on TV and the Marvel Earth citizens, fickle morons that they are, screaming for Cap's blood.
* Tales of Suspense thanks to the micro transistors. Almost every single one of Iron Man's tools was described with the adjective "transistor-powered" before its noun, from powerful magnets to incredibly fast roller skates.
* Tales of Symphonia: 17-year-old Lloyd's best friend is 12-year-old Genis. During the game he also makes friends with Zelos (21) and Regal (32).
* Tales of Symphonia actually has multiple titles unlocked by eschewing certain items completely until a certain point in the game. Specifically, Lloyd's "Eternal Apprentice" title requires you to keep his starting weapon equipped until after defeating Kilia (which is admittedly still fairly early in the game), while Genis's "I Hate Gels!" title requires you to avoid using Gels (the basic HP/MP restoration items) until meeting Pronyma for the first time at Fooji Mountains (considerably later than the Kilia battle.)
* Tales of Symphonia, admit that perhaps the elves are the most to blame for what happened.
* Tales of Symphonia: A Ghost is fought in the second battle, to show how a magical enemy is weaker stronger against physical attacks.
* Tales of Symphonia also gives him a very low, gruff voice that's just as good, if not better.
* Tales of Symphonia? Also, the Gamecube version had a 2nd disc and a character you hadn't even met yet(Zelos) on the cover.
* Tales of Symphonia, and can simply refuse Colette if you want someone else.
* Tales of Symphonia and flattering old women with sweet-talk. It actually benefits him to talk to every female character he sees, as they'll give your party items if Zelos is in the lead.
* Tales of Symphonia), and judging by the other prisoners him wearing cuffs at all was probably by choice.
* Tales of Symphonia and only living relative, was murdered in front of him. His response was to embark on a four thousand year plan to resurrect her while also turning the entire world's population into soulless automatons in order to eliminate racism.
* Tales of Symphonia, and plenty of other tropes and cliches thrown in for good measure, and still manages to look like an original game despite it all.
* Tales of Symphonia and the rest of the game is the heroes unraveling the plan and how to foil it.

* Tales of Symphonia and the souls of all former Chosen merge to form the tree's spirit, the most dominant among them being Martel's. Since the new spirit of the World Tree is one of the strongest spiritual entities in the world, this effectively makes "The Goddess Martel" real.
* Tales of Symphonia, and you never get the chance to enter the lighthouse. What was up there and making people sick is never revealed, though it's believed there was originally a sidequest there to get the Heart of Chaos weapon, before this was dropped in favor of getting it from Koton instead.
* Tales of Symphonia, and you STILL have to go through a ridiculous animal-calling puzzle to push it to shore halfway across the map.
* Tales of Symphonia and Zelos to wonder what exactly that's supposed to mean.
* Talesof Symphonia, an optional scene has both Raine and Colette commenting on Sheena's body, much to her embarrassment.
* Tales of Symphonia: Approximately human-sized ladybugs are a type of enemy.
* Tales of Symphonia are, among other things, both shown to be capable of carrying things larger and heavier than themselves with ease despite being devoid of any noticeable muscle. This extends into gameplay in the latter's case, who wields enormous axes with ground shattering force.
* Tales of Symphonia are basically concentration camps by another name.
* Tales of Symphonia are like this. The main focus for most of both games is preserving the mana flow and thus preventing the collapse of the world. Without it, magic won't work, crops won't grow, etc.
* Tales of Symphonia are some variation on this trope. "I suggest that conversation while in transit impairs our rate of travel."
* Tales of Symphonia, as evidenced by his demanding the cores and then running away when he realizes he's outnumbered by his former friends, rather than just joining up with them. Yet, despite now being nearly twenty, academics-wise, he's still only managed to get around to memorizing his multiplication tables, as revealed in a skit with Raine.
* Tales of Symphonia (as it isn't possible on a single playthrough to obtain the title "Item Collector"- because you normally can only obtain one of the three ending items), rather, its manga adaptation's ending (where all three ending items are given to Lloyd) is canon.
* Tales of Symphonia at the same time, both significantly increased in power.
* Tales of Symphonia a (type of mythological) dog. His name is pronounced nearly identical to "Cu Sith" (Pronounced Cu Shee), and he matches the physical description of one.
* Tales of Symphonia augmentations, and unholy summoning spells against Cyber-Heaven for the remaining ninety-five percent.
* Tales of Symphonia because he was weakened from the injury he received defending him.
* Tales of Symphonia because she doesn't want them to worry), and any sexual innuendo flies over her head.
* Tales of Symphonia: Both Lloyd and Colette qualify quite well for the title of The Ditz. A great example is a skit conversation between the two and Regal when Colette asks how Lloyd memorized every single Dwarven Vow (of which there are at least 108).
* Tales of Symphonia but encourages Lloyd to go on and save the poor girl regardless. When he's out of earshot, she contemplates that perhaps some Chickification might do her some good as it would more or less guarantee that someone would rescue her when she's in danger... only to immediately dismiss the thought, as it "... wouldn't be (her) style."
* Tales of Symphonia, but only when the party is in tight situations in the story. This is justified in-universe in that he swore to never use his hands to fight another living being again.
* Tales of Symphonia, but when she trips she tends to fall on the exact thing she's looking for.
* Tales of Symphonia by the bad guys as the party shows up just in time to save the day.

* Tales of Symphonia by the Desians because they went to the nearby Human Ranch, a forbidden act according to the non-agression pact made between Iselia and the Desians.
* Tales of Symphonia: Colette, chosen of Sylverant, wears a blue and white robe. Zelos, the chosen of Tethe'alla, wears pink.
* Tales of Symphonia, Collette serves as the Bright Lady who wants to save the world and Lloyd is the White Knight that wants to protect her from everybody, including herself.
* Tales of Symphonia continues almost-robotically caring for her father long after his death. After the heroes help cancel out the factor warping her mind, reality sets in, and she doesn't take it well at first.
* Tales of Symphonia: Dawn of the New World a dog. Colette and Presea seems to disagree.
* Tales of Symphonia: Dawn of the New World after deftly avoiding a trap... only to land squarely on another one.
* Tales of Symphonia: Dawn of the New World and him countering with his own Eternal Recurrence mystic arte.
* Tales of Symphonia: Dawn of the New World antagonist, is mentioned to be a Sadist. She's also seen kicking around her subordinates, and laughing at their pain.
* Tales of Symphonia: Dawn of the New World. Apparently, someone at Namco really likes bears.
* Tales of Symphonia: Dawn of the New World as an acronym for "Dashing, Undaunting, Majestic, Brilliant, and Oh-so-handsome", and proudly accepts it.
* Tales of Symphonia: Dawn of the New World, but it does come off as rather extreme nonetheless.
* Tales of Symphonia: Dawn of the New World, but the second case is unintentional. It's convoluted like that.
* Tales of Symphonia: Dawn of the New World cooking... but to his and Marta's surprise, the taste is just as supreme as ever.
* Tales of Symphonia: Dawn of the New World, during one event where the characters are being chased, there is a series of skits in which Tenebrae suggests a "Speaking Ban" because he feels the dialogue in the skits themselves is interfering with escape (ironically, it also prevents him from gloating over its success)
* Tales of Symphonia: Dawn of the New World for the two, outright telling him that Colette likes him and rooting for them to get together.
* Tales of Symphonia: Dawn of the New World groan-inducing puns. At one going, he made one that was so bad that Raine and Genis didn't groan, but instead unloaded on him with their ultimate unison attack from the previous game.
* Tales of Symphonia: Dawn of the New World has them, as well, where they're among the largest monsters you can have on your team. They're also a bit unusual in that they have arms.
* Tales of Symphonia: Dawn of the New World in their employ. Tellingly, it is later revealed that Magnar, apparently the Commandant of the Martel Knights, was actually working for the Vanguard the whole time.
* Tales of Symphonia: Dawn of the New World, in which Lloyd himself uses it as a calling card for when he steals Lumen's core early in the game.
* Tales of Symphonia: Dawn of the New World is probably Alice-sexual, though with that weirdo...
* Tales of Symphonia: Dawn of the New World. It really doesn't help that this is the first of many chapters where the "Courage is the magic that turns dreams into reality" line is really overused.
* Tales of Symphonia: Dawn of the New World likes to push his teammates' buttons from time to time, probably the best example being him overhearing Sheena and Regal talking about how close Zelos is to his half-sister Seles, and then deliberately misinterpreting what they're saying as insinuating that he's in love with her. Right in front of him.
* Tales of Symphonia: Dawn of the New World — Marta is infatuated with Emil from the moment he "saves" her — so infatuated, in fact, that she sets an

ancient guardian monster to stalk him for several months, and when she does reunite with him, offers to hand herself in to be executed in order to spare his village (and his guilt). All for a guy whose name she had learned only an hour or two ago.
* Tales of Symphonia: Dawn of the New World, often reckless kid in the original. But having defeated so many villainous forces, and leading the way in changing the two worlds, Lloyd is praised in many places as "Lloyd the Great"- to the dismay of new protagonist Emil Castagnier.
* Tales of Symphonia: Dawn of the New World of which Ratatosk is the spirit).
* Tales of Symphonia: Dawn of the New World settles in and she eventually grows to be a bit more reasonable about her love... though this does not prevent her from flipping out in skits and victory poses when Emil so much as compliments another girl.
* Tales of Symphonia: Dawn of the New World, she doesn't acknowledge Emil's real personality and is really imposing her own heroic views onto him.
* Tales of Symphonia: Dawn of the New World, that changes everything...
* Tales of Symphonia: Dawn of the New World, the guards can't find the key, so he notes that the makers of these cuffs aren't known for being sturdy, breaks them, and recommends they buy some from his company next time.
* Tales of Symphonia: Dawn of the New World, the people from Teth'ealla are still discriminating against the people from Sylvarant, so the Vanguard is formed to allegedly fight on Sylvarant's behalf, only the Vanguard ends up persecuting the people from Teth'ealla.
* Tales of Symphonia: Dawn of the New World. There is no middle ground. DOTNW also gets a lot of hate for the fact that the old characters stop gaining levels at certain point, much earlier then Emil and Marta, forcing you to always rely on Emil and Marta and the monsters you recruit.
* Tales of Symphonia: Dawn of the New World underage. Marta, too, who is only 15 years old.
* Tales of Symphonia: Dawn of the New World uses the same skit portraits for the original cast as in the first game. This is rather odd in Regal's case, as by the time he joins your party he's no longer wearing the prison uniform his skit portrait shows him wearing (though he eventually just changes into his prison garbs anyway).
* Tales of Symphonia: Dawn of the New World which one, letting them pick their own preference or continue from their own experience playing the first game.
* Tales of Symphonia: Dawn of the New World, you can make an in-game selection which puts Lloyd in a romantic relationship with any female character, including Raine.
* Tales of Symphonia decide to kill the character, and if you don't like that particular character, this version could be considered your Golden Ending instead.
* Tales of Symphonia, deeply apologises for and immediatley stops the production of when smelling it for the first time).
* Tales of Symphonia, depending on who the character chooses, someone will have this effect on Lloyd during a subquest. Sheena's is notably the most like this trope, though.
* Tales of Symphonia did that involved a girl. Said OC completely freaks out and tells Colette to ask Regal, who in turn gets flustered and doesn't say anything. The next day Colette says that she found the Wonder Chef, who, when asked about sex, proceeded to tell it all to Colette. In detail. Including information about fetishes and erectile dysfunction. She blushes in the presence of Zelos and can't even hear the word 'wood' without freaking out.
* Tales of Symphonia dress up as Desians to infiltrate one of their ranches to destroy.
* Tales of Symphonia, dwarves are extinct, though their ruins are intact. A skit mentioned that the majority of the dwarves are hidden by Cruxis somewhere in Derris Kharlan as they use them for maintaining machinery, so they may have still be living on the comet.
* Tales of Symphonia emotions, they're just not obvious at first glance.
* Tales of Symphonia) endgame; there are six rooms that the heroes pass through,

and in each one is a trap of some sort that requires one party member to stay behind to hold open a door, hold off enemies, etc.
* Tales of Symphonia fashion) that there's an underlying reason. There is: once they get to Tethe'alla, they learn that the half-elves there are victims of particularly cruel discrimination.
* Tales of Symphonia father from the child, or else it would have appeared that he had fathered him at the age of 11.
* Tales of Symphonia feature the Mana Cannon. It causes mass destruction (its destroyed all civilization twice, and came damn close to doing so two more times), and leaves vast swaths of areas barren after use, although for different reasons than actual atomic weaponry.
* Tales of Symphonia feeling that she's losing her humanity as a result.
* Tales of Symphonia for him. Genis is not the altogether best chef in the game, however: That would be Regal, who earns the special title "God of the Kitchen" in a late-game sidequest.
* Tales of Symphonia for Regal by putting him with the four other playable male characters.
* Tales of Symphonia. For the large part of the game, the party must use the sewer entrance to enter the capital city.
* Tales of Symphonia games in the series for fanfic writers to speculate on. Most of the party members also have at least a few gaps to fill in... not to mention the oft-mentioned but barely seen Kharlan War era, four thousand years ago, which has spawned its own subgenre within the fandom.
* Tales of Symphonia game with an artbook and (for some people) a wall scroll.
* Tales of Symphonia, gives him the Flamberge, and Lloyd wields both swords together as the Material Blade.
* Tales of Symphonia gives out dope slaps quite often to Lloyd and Genis whenever they say or do something dumb.
* Tales of Symphonia had three parties at conflict: Cruxis, the Renegades, and Lloyd's group, who wove in and out of the conflict between the first two in an attempt to save Colette and end the system without sacrificing anyone.
* Tales of Symphonia hair stands at least eight inches high, with spike-like structures jutting about. Also, his hair bounces back and forth if you make him turn around on the overworld screens.
* Tales of Symphonia has a bonus skit in which two of the party members do this:
* Tales of Symphonia has a similar situation, although it isn't clear if it's quite as regularly timed as most others.
* Tales of Symphonia has knives that can be used by Kratos or Zelos. They're treated as swords with a smaller hitbox.
* Tales of Symphonia has limited animations for most of the cast when it came to talking. Almost everyone shares the "hand on hip, other hand gesturing" animation cycle whenever they speak.
* Tales of Symphonia has Lloyd, the main character, tossed into a Desian prison in the middle of the desert. He busts out on his own, just before the party shows up... too late.
* Tales of Symphonia has nothing to do with music or anything called Symphonia.
* Tales of Symphonia, has one of these. It is only ever seen once. Well, maybe twice.
* Tales of Symphonia has one of these; it's never explained how he got it, since he's a minor boss villain, but given that he wears an eyepatch as well, it's likely a replacement for a battle injury.
* Tales of Symphonia has the Devil's Arms, which are nine demonic, almost organic-looking and moving weapons that apparently can talk, although only Presea is able to hear them.
* Tales of Symphonia has the Penguinist and Penguiner "monsters" which appear to be people in Penguin suits.
* Tales of Symphonia have very similar designs, and in both games powering them up involves gaining the aid of the lightning summon spirit Volt).
* Tales of Symphonia. He does get mentioned at least once before he finally makes

his appearance.
* Tales of Symphonia he gradually replaces her as a charismatic leader. Yggdrasill is a mastermind/charismatic leader hybrid for the baddies, Yuan is also a mastermind/charismatic leader hybrid for the Renegades, and Vice-Chief Tiga is a levelheaded leader for Mizuho.
* Tales of Symphonia, in which case the kid gets mad because she isn't playing at all.
* Tales of Symphonia is considered non-canon: he appears in the sequel, and the endings to the manga and the anime both keep him alive.
* Tales of Symphonia is fiercely anti-half-elf. Ironically, he used to support the cause of half-elf equality and even fell in love with an elf. But when their daughter was born and her mother died, he found himself growing more hateful and terrified of her differences, coming to understand the perspective of the people who hated half-elves, and he started to support them instead.
* Tales of Symphonia is much the same way. Observe the following exchange between him and Sheena in Flanoir:
* Tales of Symphonia is partially destroyed, and Lloyd goes chasing after her.
* Tales of Symphonia is utterly obsessed with ancient ruins, though the game hints that that may be a result of her tragic backstory.
* Tales of Symphonia. It doesn't show him acting guilty for what he does, but then again, he doesn't show much emotion at all and the storyline doesn't focus on him enough to give him a chance.
* Tales of Symphonia. It is to be noted that he runs towards her, and just before the glomp takes place, he moves himself to hug her.
* Tales of Symphonia. It literally reaches "unto the heavens" and the player never sees its top from the outside.
* Tales of Symphonia. It sold around one million copies on the GameCube as a result, and is considered to be where the series first broke through in the west to become one of the more popular JRPG franchises on the market.
* Tales of Symphonia. It's unclear whether the souls comprising her will merge over time or not.
* Tales of Symphonia, Kratos never actually slashes Sheena with his sword, even though he gets more than one opportunity to do so. Instead, he just jabs her body with the hilt. Considering he's was hired to guard who she was trying to kill, you'd think it would be something that Kratos would take seriously, and he wouldn't be screwing around.
* Tales of Symphonia. Kratos, Zelos, and Regal all also have healing abilities, but Raine is the Medic of the lot.
* Tales of Symphonia. Kratos, Zelos, and Regal all also have secondary healing abilities.
* Tales of Symphonia likes to use this, though the enemies never listen.
* Tales of Symphonia. Lloyd can even earn a title by getting to a certain point with an aggregate party level below a certain number.
* Tales of Symphonia, Lloyd does this to get to Kvar alone. Unfortunately, he then proceeds to get his ass handed to him until Kratos and Sheena show up to save the day.
* Tales of Symphonia, Lloyd ends up being hunted by the Desians, who want his special Exsphere. He ends up seeing poorly drawn wanted posters in several towns across Sylvarant.
* Tales of Symphonia. Lloyd then realizes how cheesy it sounds, and never uses it again.
* Tales of Symphonia makes use of this before any of the major boss battles, giving you a bit of free roam to talk to each character in your party to get a few words of their feelings, their resolve, and exchange pep talks, all of which gets you very emotionally tied with the characters. A notable one is right before the almost-final dungeon Lloyd and co. stops at an inn to rest up before the big battle. At this time whichever character you had the best relationship with knocks on your door, and you can have a scene with them that gets pretty heart-felt.
* Tales of Symphonia manages to play this straight, avert it, and play with it not

only all in the same game, but all in the same SCENE.
* Tales of Symphonia may also count, though at the time of the game all are either dead or rebelling against Yggdrassil, openly or otherwise.
* Tales of Symphonia: Mithos: "Wow, that was an amazingly corny speech. Congratulations."
* Tales of Symphonia money, showing that Aifread's motives are perhaps not as selfless as he let on.
* Tales of Symphonia, of all places. Despite being a Japanese RPG set in a fantasy land, most of the world seems to be inspired by Western traditions; everyone even follows a Catholic-looking church. Sheena Fujibayashi’s hometown Mizuho stands out as looking stereotypically Japanese. Sheena can be perceived as a love interest for either Lloyd Irving or Zelos Wilder, and while she certainly looks exotic and sexy enough to play the part of an evil assassin at the beginning of the game, her actual personality is innocent and idealistic, which make her qualify for this trope despite being a skilled Summoner in her own right.
* Tales of Symphonia Of course, the names don't keep them from running off the customers.
* Tales of Symphonia. Particularly jarring with Colette, whose elbow-length hair was rigid as a board.
* Tales of Symphonia Raine. In short, while the two Magic Knights can do anything, someone else in the party can do it better.
* Tales of Symphonia, Raine opted to throw the eraser at him to wake him up.
* Tales of Symphonia, recipe ratings, techniques, etc., or raising/lowering grade and experience growth rates.
* Tales of Symphonia: Regal killed Presea's sister Alicia in the past and so keeps himself handcuffed as penance. He switched to killing things (monsters) with his legs.
* Tales of Symphonia She does get better by the end, but at the time...
* Tales of Symphonia She doesn't talk or even acknowledge anyone around her, but will automatically attack anyone who threatens her.
* Tales of Symphonia Sheena, but any other woman in the game he addresses IMMEDIATELY fawns over him.
* Tales of Symphonia,) Sheena would step in to fill this role, with Zelos occasionally helping out.
* Tales of Symphonia), she smiles for real, and everyone notes how cute it is.
* Tales of Symphonia. Since Yuan is a double agent and has to keep his identity under wraps, this leads to the initial impression that Botta is actually the leader, until the main character gets captured and encounters Yuan, who is then seen giving Botta orders.
* Tales of Symphonia So if you don't pick the route which allows him to redeem himself, he dies.
* Tales of Symphonia's schemes. They consistently have their own goals and methods throughout the game; sometimes these goals coincide with the party's, and sometimes they're opposed.
* Tales of Symphonia's sub-sub-subrelated army Desians are covered from the nose up, and a load of other mooks, Half-Elves or humans or living pairs of pants, whatever, they're all armoured up and whatnot.
* Tales of Symphonia. Still costs an incredible amount of MP on top of it, though.
* Tales of Symphonia take after Raine disappears into the Iselia shrine:
* Tales of Symphonia. Tethe'alla, as the flourishing world, has higher magitechnology levels than Sylvarant, and anything backed by Cruxis, in either world or on Derris-Kharlan, is even higher still on the scale, since they're the greater power that's keeping everyone else locked down.
* Tales of Symphonia that appears to replace his left arm (actually, his arm is inside the thing and can be seen during some of his attacks when the arm cannon opens up.
* Tales of Symphonia that stand perfectly still and don't chase you at all, or that such shadows have higher rates of encountering rare enemies. In reality, all large enemy shadows have an equal chance to have you fight rare enemies—they're

just, well, rare.
* Tales of Symphonia that uses water mana to surf on the water. The latter is a jet ski-like thing that uses electric mana to fly. The ancient technology that was lost in the Kharlan war is actually called "Magitechnology."
* Tales of Symphonia, the both world's skys get all purple and cloudy.
* Tales of Symphonia: the Flanoir scene with Zelos has him tell Lloyd about how his mother died in an attack meant for him. His mother's last words really hit the point home: "You should never have been born."
* Tales of Symphonia their lovers when they were mutated by Exspheres.
* Tales of Symphonia, (the last in a series of eight) Zelos and Sheena find themselves facing two weddings in order to keep the peace - a huge, pretentious, overly-extravagant wedding held by the King in Meltokio and a long, boring, stuffy, traditional wedding in Mizuho. Neither wedding appeals to the couple, and as they are bound and determined to enjoy their own wedding, they grab Lloyd and Colette as witnesses and have a private ceremony at the hot springs.
* Tales of Symphonia: The scene where Colette pretends to be an angel delivering judgment on the papal guards. They actually fall for it, though — although the fact that Colette has actual angel wings coming out of her probably scared them enough that they would have believed anything at that point.
* Tales of Symphonia, the village of Iselia has a non-aggression treaty with the Desians. After a Desian force apparently attacks the Martel Temple, Genis uses this trope as an excuse to visit the Desian human ranch, which is forbidden by the treaty. However, because the "Desians" that attacked the temple were actually a rebel faction known as the Renegades (though this fact isn't revealed until much later in the game), the actual Desians end up invoking this trope themselves and attack Iselia in retaliation.
* Tales of Symphonia this particular cone, with an optional cutscene that the player can choose to follow whichever relationship choice they want.
* Tales of Symphonia to be rescued by her grandmother's murderer (even if Lloyd didn't intend to kill her).
* Tales of Symphonia to fit in there and never steps out, but can do everything from kick with a cloven hoof, whip with its lizard tail, and yank a party member inside to do God only knows what with its huge arm.
* Tales of Symphonia. Turns out the test is out of 400. Sheena is the only other party member to score less than 100 points.
* Tales of Symphonia turns out to be a lie; which is probably why the voice actor of one of the characters responsible for perpetuating said lie is the one who delivers it, and also why that narration can later be found as an in-universe book.
* Tales of Symphonia uses intricate animation for its intro, and approximately ten seconds of full animation thereafter with mostly static storytelling throughout.
* Tales of Symphonia use this when Lloyd actives the exsphere in Iselia.
* Tales of Symphonia. When he leaves the party later on, Regal eventually joins and fulfills the role to a lesser, if more traditional, degree.
* Tales of Symphonia when interacting with a human-shaped hole in Raine's classroom earns Collette a title.
* Tales of Symphonia when the Desians put a price on his head. When the party gets a price on them in Tethe'alla, the wanted poster of Lloyd is much more accurate.
* Tales of Symphonia, when the heroes go into outer space because the Tower of Salvation goes extremely high up, an optional cutscene has (who else?) Zelos going on about this, and (who else?) Lloyd completely missing the point (Zelos didn't actually mention sex, which is probably why Lloyd didn't get it; Also because he's an idiot).
* Tales of Symphonia, when the heroes walk into the unnaturally dark Temple of Darkness, Lloyd steps on Zelos's foot, prompting him to say, "Ow! My precious foot!"
* Tales of Symphonia, where the family of the Chosen is huge, has many branches, and is scattered all over the world so that if something happens to one branch, the bloodline will still exist.
* Tales of Symphonia who will hit with any and all females he encounters. But once

he opens up and reveals the resentment he feels about his possition as Tethe'alla's chosen one, it becomes apparent that he's probably the most messed-up of the lot. And that's saying something.
* Tales of Symphonia who will literally flirt with any female human/elf/whatever that moves regardless of age. He calls little girls his "princess" or "rosebud" but this is actually played for laughs, rather than creepy. You can even get him the Gigolo title if you flirt with enough females.
* Tales of Symphonia wipes out a dragon riding army of Renegades with Judgment beams from the clouds.
* Tales of Symphonia wonders if dwarven food has special memory-enhancing ingredients.
* Tales of Symphonia work with a living body, she is shown to be horrified by her brother's efforts, and gives the body back to its original owner shortly after.
* Tales of Symphonia, you can do this with Regal if he comes along with you to the beach event.
* Tales of Symphonia: Zombies are enemies fought in the first two battles.
* Tales of Telguuth: A brother and sister who are about to be offered as the final sacrifices required to resurrect an evil god run away from the priests and take shelter in a cave in the desert. When the brother climbs out it turns out that the cave was really the mouth of the god, who eats the sister so it can rise from its slumber and lay waste to the world.
* Tales of Telguuth: A mage's apprentice is sent by his master to ask a neighboring mage for supplies, but on his way there comes across a field of human heads crying for help, which the other mage harvests for food. The apprentice refuses to believe his words that it is a sentient plant that takes on human appearance to lure in victims and tries to free one of the female heads before he gets eaten. His skin is then recycled by the plant to form a new head.
* Tales of Telguuth. It's their "children" that will truly conquer the world.
* Tales of Telguuth, just as often these people aren't evil in any way and are simply victims of the dark world of Telguuth.
* Tales of Telguuth: One story features two demons who are happily married to each other. A clever human manages to gain control of the male demon thanks to a magic ring and orders him to kill his wife. This ends up biting the human in the ass the instant the spell wears off and he becomes demon lunch.
* Tales of Telguuth where monsters, demons, and tyrants roam the land, and life is generally short and brutal.
* Tales of Termina viciously deconstructs this trope, the numerous traumatic adventures Link has had at such a young age has turned him into an emotional wreck with severe PTSD.
* Tales of Terror: In "Morella", Lenore arrives back at her family home only to find the house deserted and covered in cobwebs: no one having cleaned it in 25 years.
* Tales of Terror: In "The Black Cat", Montressor has a nightmare where Isabel and Fortunato rip his head off and then toss it back forth between themselves.
* Tales of Terror: In "The Black Cat", Montressor heaps verbal, physical and economic abuse on his poor wife Annabelle. It is little surprise he winds up murdering her.
* Tales of Terror: In "The Black Cat", Montressor shackles Fortunato and Isabel to the wall of the cellar and then bricks them up alive.
* Tales of Terror: In "The Facts in the Case of M. Valdemar", Helene reacts to every dramatic development by screaming and fainting.
* Tales of Terror: In "The Facts in the Case of M. Valdemar", the marriage between Valdemar and Helene is a case of this, with Valdemar being much older than the wife. Nevertheless, the marriage is shown to be a happy one, with the two of them being truly in love. As Valdemar is dying, he expresses his desire that Helene finds happiness with someone else after he is gone. That thing goes hideously wrong after this is not the fault of either of them.
* Tales of the Abyss. A couple sidequests and dungeons also open up, and you have to play through at least twice to get one hundred percent completion (as there is

one sidequest where you choose what reward you get, and two aren't found anywhere else).
* Tales of the Abyss, after a hyperresonence mishap teleports them both deep into a hostile country.
* Tales of the Abyss after all. He still does it and his tendency to accidentally lead women on is lampshaded.
* Tales of the Abyss and as a result people have to learn to live without it and make their own decisions. NPC reactions vary from wanting it back to enjoying their newfound freedom.
* Tales of the Abyss and communicates to Luke how much he means to them all.
* Tales of the Abyss, and even then it's too weak to be useful outside of puzzle solving.
* Tales of the Abyss and gets tricked by the villains into giving up his humanity for power. (The difference between the heroes and most of the villains, then, whether or not Screwing Destiny requires the mass sacrifice of everyone currently living on the planet)
* Tales of the Abyss, and his last name of Cecil is an alternate spelling of his mother's maiden name Cecille.
* Tales of the Abyss, and the punch is hard enough to knock Luke flat on the floor.
* Tales of the Abyss, and when he's trolling "Cheshire Cat Grin" seems a more appropriate term.
* Tales of the Abyss anime is extremely guilty of this. Men, animals and just about anything biological burst open and fall apart like blood-filled water balloons the moment they're struck... Well, except for the main characters.
* Tales of the Abyss Anise and flirts back at her. However, he's all talk: rumor around the city has it that he's still pining for a love he was forced to give up on ten years ago (who just happens to be Jade's sister).
* Tales of the Abyss are massive green-and-purple canines that shoot lightning and reproduce by laying eggs. They are also hinted to be matriarchal in nature.
* Tales of the Abyss, as well as several other characters are from this military. Some of the non-militants, like Ion for example, have kick ass combat abilities.
* Tales of the Abyss, at which time you get to choose which characters to take (for plot reasons, Jade has to go to Engeve and Natalia to Kaitzur at the same time, and you get to pick where the others go), and once involuntarily, in which case the pairings are chosen for you by the plot.
* Tales of the Abyss, Auldrant, is made up of particles called fonons. These particles exist in everything and fall into the seven elements in the order of Darkness, Earth, Wind, Water, Fire, Light and Sound with each element being created by a fonon vibrating at a specific frequency. While the first six don't have much use outside dealing damage of thier element, Sound is incredibly useful. Since both fonons and sound are made from vibration, people who can control the Sound Fonons can do things such as heal, read the future, and replicate objects and people.
* Tales of the Abyss beating him at the end confirms he has become one.
* Tales of the Abyss before she could use them whether she knew the words or not.
* Tales of the Abyss, but not a single one of them ever had the original's memories.
* Tales of the Abyss, but you do fight a series of mechs he constructs using fontech.
* Tales of the Abyss cannot touch women without having a panic attack.
* Tales of the Abyss comes in the side-quest where you have to find Emperor Peony's pet rappigs. He's named all of them after people he knows, and the one named for Jade's sister Nephry has the nicest collar. Given that Peony and Nephry have a (long-past) history anyway, Jade is noticeably displeased by this discovery.
* Tales of the Abyss depends on which authority figure you're talking to)
* Tales of the Abyss desperate to solve their horrendous financial situation.
* Tales of the Abyss Despite Asch repeatedly saying he would never work with him, Van is convinced he will.
* Tales of the Abyss did this, although to a slightly lesser extent: She didn't completely lose her dignity, but cute things at first were the only indicators of

her softer side. She shows it more in the anime adaption.
* Tales of the Abyss, Dist is not actually this to Jade, but Jade likes to pretend he is — mostly because it really, really annoys Dist, which Jade clearly finds hilarious.
* Tales of the Abyss dresses everyone in the party up in these. They sort of look like sexy Power Rangers. Except Anise. She just looks awesome.
* Tales of the Abyss, each fonon has an aggregate sentience (most are named after the summon spirits of previous games), but the one that's most important to the storyline is Lorelei, the aggregate sentience of the seventh fonon of sound.
* Tales of the Abyss evades this trope by providing almost every character with a self heal, and two characters who are both very powerful healers while being very different. Tear has powerful offensive 'holy' style magic and AoE healing with some wicked knife artes, while Natalia has most of the 'buff' spells, powerful single target heals, and a wide range of bow skills.
* Tales of the Abyss... Fandom has affectionately dubbed this particular brand of Screw Yourself "Replicacest."
* Tales of the Abyss fits the bill for the first half of the game. Ironically, her interest in Luke stems not from genuine affection, but more from the fact that she desperately wants to marry into money.
* Tales of the Abyss: Generally low on slapstick, but one early scene features an enemy, monster-tamer Arietta the Wild, sending her griffin to capture player characters Luke and Ion. Luke gets grabbed, but Ion's bodyguard Anise (whom Arietta heartily dislikes) shoves Ion out of the way, getting caught herself in the process. Arietta's response to this is to have the griffin drop Anise from high in the air, causing her to faceplant on the ground. Anise gets rather annoyed with Arietta for this but suffers no injury.
* Tales of the Abyss gives us a literal land dreadnought, the Tartarus.
* Tales of the Abyss gives us Emperor Peony, who switches easily between somewhat stilted formal language (required of him as Emperor) and striking informality (his actual personality), sometimes more than once in the same conversation.
* Tales of the Abyss has Asch and Luke (before the latter cuts his off). Tear keeps her hair at a similar length.
* Tales of the Abyss has two: Anise's X-Buster and Luke's Lost Fon Drive.
* Tales of the Abyss, healing requires the innate ability to use the Seventh Fonon. Tear and Natalia are both acknowledged as skilled healers.
* Tales of the Abyss he returns to plague you several times, and in each of his appearances he's usually strong enough to be a match for a full party.
* Tales of the Abyss. He starts out approximately 45 levels ahead of the other characters, is far stronger physically than most other black mages, and is 35 years old. In a JRPG. Still kicks the ass of a God-General after getting sealed down to the level of the rest of your party.
* Tales of the Abyss However, social services probably don't exist due to the Score being in place and all.
* Tales of the Abyss in flashbacks and shows Luke and Tear growing close and thus making their romance more natural and believable.
* Tales of the Abyss in the game. But during an emotional time at the mid-point of the game, Natalia gets some bad news and Guy becomes extremely kind and gentle towards her. While Guy has always been mentioned to be a bit of a smooth-talker towards women, despite his gynophobia, he pays extra attention to Natalia at this point, is the first one to notice when she is too distracted to move on and cheers her up. Ultimately, nothing comes from it and was never intended, despite the two still having moments of being together when the party splits up.
* Tales of the Abyss involves the party (minus Anise) complaining that inside a volcano, Jade seems to be walking off coolly while the rest is obviously getting too hot with the temperature... then the party suspects he's hiding some cooling Fon technique under his cloak... then Luke and the rest told Jade to take off his clothes and tried to strip him... only to be stopped by Tear.
* Tales of the Abyss is absolutely terrified of them. This is at first played for laughs, but then it's shown to have stemmed from a highly traumatic incident in his

past... after which it's played for laughs again. He's shown to be something of a natural charmer, and one skit shows that he's attracted to women.
* Tales of the Abyss is already there, reading up about the same subject. The two of them have a bit of a row, but out of respect for the scholar (an old friend of his), the Big Bad leaves without anything coming of it.
* Tales of the Abyss is Arietta the Wild, who also fits this trope as a dangerous combination of Beast Master and Mage.
* Tales of the Abyss is basically ancient Rome on the water, complete with an Emperor; its overworld model looks like a floating Colosseum.
* Tales of the Abyss is set to become the prince-consort of Kimlasca-Lanvaldear when Natalia ascends, as she intends to take him as her husband.
* Tales of the AbyssIt doesn't go away completely, just back to the levels they were at before the people of the old world screwed with things. It's still talked about in multiple skits that the world will have to start relying on something else, and that fonists will have a difficult time. However, that is still a very comparatively low amount to what they're used to now. This world that currently runs so much on it is going to be crippled if they don't find an alternative source of energy before the gradual decrease of the fonons stops, and levels hit rock bottom.
* Tales of the Abyss. It was so bad that all the other characters are surprised when they each first hear him say "Thank you."
* Tales of the Abyss, leaving the inhabitants, who are somewhat reliant on fonic arts for various machinery and similar to be completely useless... until they perhaps find a substitute, which could take years, if not decades or centuries.
* Tales of the Abyss: Magic is usually the preferred option in Unknown mode since enemies have ridiculously scaled physical defense, allowing your casters to shine.
* Tales of the Abyss Mieu isn't as tormented anymore and his attachment to Luke becomes more understandable.
* Tales of the Abyss). Mostly, the scene serves to underscore the seriousness of their mission.
* Tales of the Abyss nature means that he uses the same tone for nearly everything he says...
* Tales of the Abyss of the little girl, who naturally spends the game trying to avenge her giant carnivorous mommy.
* Tales of the Abyss on him; in gameplay, this brings him down to level 5 himself. There's even a skit when you get him back up to his original level that can best be summarized as "I finally broke the seal, but you all caught up to my original power, I'll be continuing to trust you."
* Tales of the Abyss, party member Guy suffers from severe gynophobia, specifically being touched by women. Its origins, rather than funny, prove to be quite horrific.
* Tales of the Abyss playing an organ. Made more confusing by the fact that he stops playing the organ in the middle of the scene, and the music keeps going.
* Tales of the Abyss plot twist happens, making the story actually interesting.
* Tales of the Abyss reaction over how they were treating the subject.
* Tales of the Abyss's actions disrupt system that contained miasma, heroes send an old warship, modified specifically for this goal, into the core to stop vibrations.
* Tales of the Abyss's Devil's Arms: weak as hell when first acquired, attack-power-based-on-kills after beating the most powerful boss in the game. Additionally, said boss also holds the best Capacity Core in the game; you can only acquire this by stealing it from her, and you can only steal from her when she's staggered, which, as you might guess, does not happen often.
* Tales of the Abyss. She at one point takes Luke telling her she "hasn't changed" in reference to her still donning her uniform after the time skip.
* Tales of the Abyss. She uses throwing knives for her physical attacks and in cutscenes, although her equipped weapons are staves.
* Tales of the Abyss shows them being closer to the size of a small dog.
* Tales of the Abyss, something called the Big Bang Effect means that since Asch's fonons entered Luke's body when Asch died, there's no way for even Jade to prevent Asch's mind overwriting Luke's, erasing his personality and leaving Asch with

Luke's body and Luke's memories. Even though the game's mythology states that the souls of dead seventh fonists go to the fon belt with their fonons Luke won't even be able to reunite with Tear there: Asch will essentially eat his soul. It's no wonder that many fans of the game ignore that sidequest and say it's Luke based on the body language of people with every reason to think it is Luke—they weren't there for the sidequest and it is Luke's body, after all.
* Tales of the Abysss. Since the weapon graphics in cutscenes do change to reflect the weapons the characters equipped, wasting time at the casino to get the joke weapons can easily be worth it for the opportunity to watch Jade wave a giant finger pointer around in the midst of a serious scene.
* Tales of the Abyss, Sync replies that if no one finds it, his side will keep the upper hand.
* Tales of the Abyss teams now include fans who had played the early games, and that though their enthusiasm was good, their plot ideas often have to be gently vetoed.
* Tales of the Abyss Tear's (Nicole Karrer) fonic hymns are treated as sound effects, and use the original audio (Yukana).
* Tales of the Abyss, Tear teaches him to control his hyperresonance, granted, the sessions are informal and Tear isn't a full-fledged teacher; they both fall in love with each other.
* Tales of the Abyss that prides himself as "Dist the Rose". No one else calls him that.
* Tales of the Abyss: The entire cheagle race, which Miue belongs to, are small, plush-like creatures with (usually) high-pitched voices. This is something that annoys the hell out of Luke, which he complains about almost every time Miue opens his mouth.
* Tales of the Abyss. The first human replica ever created was flawed enough to be psychopathically insane and hugely powerful. Others fared less well, living short and torturous lives due to their "birth defects", or even being killed shortly after creation due to their imperfections.
* Tales of the Abyss, there's an unusual example in that it's actually useful to the player outside of cutscenes: equipping Jade with his "Emperor's Best Friend" title gets you a discount in shops.
* Tales of the Abyss The result is not pretty and his friends spend the majority of the plot trying to convince Luke otherwise without much luck.
* Tales of the Abyss, they got angry and called him a pervert again, netting him the new title "Naughty Devil".
* Tales of the Abyss). This doesn't seem to pop up when in battle, even against female enemies. It's indicated that he can overcome it given sufficient motivation, like when he grabs Anise's arm to pull her up when she almost falls off a cliff, so it's possible battle is one such case (or else, that he never physically comes into contact with them during it).
* Tales of the Abyss. Those scenes have quite a lot of detailed movement, and scene angles are played more professionally, in a more dynamic way.
* Tales of the Abyss. Through Luke's POV, the Malkuth Empire should be the bad guys and his own kingdom Lanvaldear is good. Turns out, neither is really good nor bad. If anything, Malkuth is shown to be much more benevolent.
* Tales of the Abyss, thus, nearly entirely revolves around her moving past this trope.
* Tales of the Abyss to be a charismatic leader for Kimlasca and fails spectacularly (later on Princess Natalia takes the helm as the real charismatic leader) and Grand Maestro Mohs is a Mastermind for the Order of Lorelei.
* Tales of the Abyss to do this to restart the war between Malkuth and Kimlasca, using replicas for suicidal bombings, but the attempt is so shabby and poorly thought out that no one is fooled for even a second.
* Tales of the Abyss variety, there are a few instances where more powerful magic is required, and huge fonic glyphs are drawn to accommodate their power. There's actually a brief mini-game where you have to re-draw one that you were meaning to use as an escape route (on a time limit!) because a villain wiped it out.

* Tales of the Abyss was the one actually drooling at the thought of women showering.
* Tales of the Abyss: Whatever happened in Keterburg Hotel, when Jade gets information about Mt. Roneal from Dist.
* Tales of the Abyss when he decides that he wants to change himself for the better.
* Tales of the Abyss, when Luke's mother falls ill after his sudden disappearance. Tear feels terrible, since she was the cause of Luke's vanishing, but Luke tells her that his mother has always been sickly — the stress of his disappearance might have made her worse, but it certainly wasn't the only cause of her illness.
* Tales of the Abyss, where Anise insists that Van's beard is the source of his power.
* Tales of the Abyss. While Guy Cecil is terrified at the thought of being touched by women, he has no issue with talking to them and is actually something of a natural charmer.
* Tales of the Abyss, who all at least 15 years younger than he is. Story-wise he's a tremendously powerful mage and a scientific genius, but shortly after you meet him someone deploys some kind of seal on him, reducing his level from 45 to something closer to the other party members.
* Tales of the Abyss) with blonde tips and gravity-defying side-bang-spikes.
* Tales of the Abyss. You could still pull it off though launching it while Asch is airborne as a result of a nice combo.
* Tales of the Arabian Nights, a glitch allows, under some circumstances, for Harem Multiball and Genie Hurry-Up to occur at the same time. Both of them are high-scoring modes that cover each other's downsides: Genie Hurry-Up normally has a strong chance of you losing your ball down the middle, which is negated by Harem Multi-Ball's ball saver (and the fact that there's more than one ball, meaning there's no harm done in losing one or two); whereas a successful shot in Genie Hurry-Up temporarily traps a ball on a magnet, slowing the pace of Harem Multiball to a more controllable state. Under normal circumstances, neither of these modes allow for the other one to begin as long as they're active.
* Tales of the Arabian Nights, a random bounce from the jet bumpers could send the ball through a small opening into the Harem; this scores a "Harem Sneak-In", complete with giggling women.
* Tales of the Arabian Nights (as well as its associated works), with varying levels of faithfulness. Needless to say, there was a lot of compression to squeeze even one Tale into a minute-long game mode.
* Tales of the Arabian Nights (as well as its associated works), with varying levels of liberties and faithfulness.
* Tales of the Arabian Nights features over 2000 story snippets, that are frequently hilarious due to the fortune or peril they cause the player. Its rules emphasizes storytelling, and it's a bigger disappointment to not do something funny on a turn than it is to lose.
* Tales of the Arabian Nights is basically this, with the genie and the player dueling for a (captive) princess. Successful shots on the player's part pulls her closer to his side, while poor pinball skills will cause the genie to exert more pull instead.
* Tales of the Arabian Nights, press both flipper buttons quickly when entering the Bazaar. On the fourth visit, the merchant will give you a cow worth 1 million points.
* Tales of the Arabian Nights serves as one of these; the player must enter seven of the Tales and retrieve a magic jewel from each one in order to confront the evil genie of the game.
* Tales of the Arabian Nights. The player must make key shots to help his steed pull ahead of the others.
* Tales of the Astonishing Black Spark it is discussed with the superhero, GRAVI-Tina. She is shown, at times, to be more powerful than resident Superman expy The Almighty Asper, she takes down the world’s greatest villain herself, all while using her powers over gravity to fit into her absurdly tiny costume.

* Tales of the Astonishing Black Spark there is Christopher Row, Donald's agent after arriving in New York to become a superhero. The chapter All This and Rabbit Stew is where he ramps it up to eleven, manipulating Donald into taking advertisements that accentuate the stereotypes associated with his race.
* Tales Of The Big Bad Wolf and Fantasy trope mixed together using the Red Riding Hood story as the entryway into a larger number of other stories.
* Tales of the Big Bad Wolf is a fantasy web novel that is a loosely based retelling of a Red Riding Hood romantic polygon that incorporates other myths, fairy tales, and nursery rhymes.
* Tales of the Big Bad Wolf there is the belief that myths are true accounts of past, present, and future of some characters but this point is arguable. It appears that "some" may be under debate as that has some problematic consequences for the figures who have a counterpart in fairy tales and myths.
* Tales of the Black Raven by Seth Skorkowsky is a work following the adventures of the titular Master Thief in a dark and dreary Renassiance-meets-Hyboria setting.
* Tales of the Black Widowers has been published with multiple covers. One of the covers features a large spider, with seven human faces (one for each of the members) instead of eyes.
* Tales of the Black Widowers, which is his favourite type of mystery.
* Tales of the Black Widowers, why a historian would bother writing chemistry essays, and so on, ad nauseum it would seem.
* Tales of the Bounty Hunters by copying itself over the Death Star computer with the intention of wiping out both sides in the battle of Endor; other than messing with elevator timing nobody ever even noticed.
* Tales of the Bounty Hunters: Dengar has aspects of this in his relationship with Manaroo, as her people use a device which lets them share emotions. It's standard among her people, and helps to recover some of his lost emotions from sharing hers.
* Tales of the Bounty Hunters. It's a short story starts with Leia in her metal bikini being shoved into Boba Fett's room for the night, since Jabba wants to give his bounty hunter something extra. The mercenary refuses to touch her, claiming that it is immoral, and is willing to give her the bed. ("I won't hurt you," he says. "I won't touch you. Sleep if you will. Or not; I don't care.") He does, however, try to act "holier than thou" by making it seem like this makes him better because he sees the Rebellion as morally wrong. (Of course, he doesn't question anything his current employer does as morally wrong, and the reason he doesn't send her back is because that would be insulting Jabba.)
* Tales of the Bounty Hunters: Jubilar is used as one by nearby star systems. As a result of their frequent wars, the convicts tend to be drafted into the different armies depending on which spaceport they arrive at.
* Tales of the Bounty Hunters on Jubilar for cheating at cards, a felony offense.
* Tales of the Bounty Hunters. The only reason IG-88 fails is because the final part of his plan — which he succeeds at doing — involves downloading his mind into the second Death Star's computer core (and even improves the super laser's accuracy) right before the Battle of Endor. (Which, in case anyone forgot, is where the Death Star II is blown up.)
* Tales of the Branion Realm are covered by a see-through cloth with the intent to make her appear blind.
* Tales of the Branion Realm cross the border to protect a Welsh pretender to their own throne during a religious schism between the two.
* Tales of the Branion Realm fantasy series, the monarch is called not King or Queen, but the unisex "Aristok", which might be derived from "aristocrat".
* Tales of the Branion Realm features the Shadow Catcher, who during battles is depicted as a fisherman with a net, drawing up a great catch of the dead.
* Tales of the Branion Realm novels, royals have literally flaming eyes. In one book a four-year-old sovereign stares so hard at one of her vassals as she argues with him that her eyes grow hot and a "red-hot nimbus of flame" rises up between them. The man, old enough to be her grandfather, hastily submits to her will.
* Tales of the Branion Realm: Occurs among the royal family of the titular country.
* Tales of the Branion Realm; only the Vessel may rule and only the ruler can be

the Vessel. The Flame passes through the family line without regard for sanity, health, legitimacy, gender, or age, so there is no way to be skipped save death. There are two known attempts — an apostate who converted to another faith, and a crown prince who abdicates in full knowledge that he could be executed for it.
* Tales of the Branion Realm, particularly Melesandra III, who terrifies her son and heir and has orchestrated more than a few massacres of her enemies.
* Tales of the Branion Realm; plenty of knights, lords and soldiers of both genders have same-sex relationships, and when not having sex are busily engaged in killing things.
* Tales of the Branion Realm, Prince (later Aristok) Demnor and his Companion Kelahnus. This is actually more common than the Companion's Guild likes to acknowledge and, like everything else in the realm, applies even when gender-flipped.
* Tales of the Branion Realm series by Fiona Patton, set in a fantasy Europe where gender roles are unrestricted. The oldest noble heir inherits regardless of sex, and religious posts (in thinly disguised versions of Christianity) are also open to all.
* Tales of the Branion Realm series has the Holy Triarchy, which is actually three minor gods and a major one, all based on the four elements. The primordial aspect of Flame is on top, with the ruler of the realm doubling as Its avatar. Oaks, Sea and Wind are, however, the namesake of the faith, even though seeking to give them avatars of their own is regarded as heresy. All four have priests and hierarchies of their own, though the Flame's is by far the most powerful.
* Tales of the Branion Realm series, the gods are seen in vision playing "strategy" for influence. Sometimes, however, they come to earth and take over the bodies of their heroes, literally fighting it out on the battlefield. This is painful and deadly for the pawns.
* Tales of the Branion Realm such as Albangate for St. Albans and Halmouth for Falmouth, it's possible to follow the protagonists' journeys even without the maps (which is good as the maps are small and only show major locations).
* Tales of the Branion Realm, the DeMarian royal family rarely has more than a dozen members while other noble families may have hundreds, but has nonetheless managed to survive for 900 years.
* Tales of the Branion Realm, to the point where it's standard practice for an acolyte to physically hold the Seer steady while he prophesies. They tend to hit their heads otherwise.
* Tales of the Branion Realm where the cold-bloodedness and strength of mind necessary to be merciless is part of the protagonist's training by his mother. She is known for having hanged a hundred rebels at once, calmly discussing tactics with her aides while the sentence was carried out.
* Tales of the Canterlot Deportation Agency / asylum to be freed at need by the evil villain running the city.
* Tales of the Canterlot Deportation Agency: One would-be conqueror fouled himself both ways at once when he found out how badly outmatched he was.
* Tales of the Canterlot Deportation Agency: Played with, with how Jake arrived:
* Tales of the Canterlot Deportation Agency, the "temporary human settlement camp" (aka New Cynosure) where the trans-dimensional humans are kept qualifies. The Princesses recognize that there are peaceful humans who either arrived by accident or found their deliberate method only worked in one direction. Those incursions were granted two square kilometers carved out of a wild zone, and there they live, work, and make any friends they can. They can even recreate technology as long as it works cleanly. But... it's isolated from pony territory, there are guards, the entire thing is covered by a shield, and outside the border there's a monster-infested wilderness. However, one option for some of the violent incursions is an underground prison. (Ben doesn't ask about the rest).
* Tales of the Canterlot Deportation Agency: When faced the idea of a criminal just admitting his crimes:
* Tales of the Canterlot Deportation Agency: While not always specifying that he

feels responsible for the death of his family, Jack is visibly traumatized by their loss:
* Tales of the City Anna Madrigal is in the habit of taping a joint to the door of her tenants as a welcoming present. In the last chapter, she visits the grave of her former lover and tapes a joint to his tombstone with the words: "Enjoy it. It's Columbian."
* Tales of the City, Anna Madrigal runs the boarding house where most of the main cast live, and is a frequent presence in their lives in the first few books. She views her tenants as her family, even calling them her "children".
* Tales of the City books, Brian is happily married to Mary Ann, but carries on affairs with other women behind her back, only stopping after one of the other women informs him that she contracted HIV.
* Tales of the City of 28 Barbary Lane, who hands out free joints to her tenants, is willing to overlook the occasional late rent, and always seems to know how to fix everyone's problems.
* Tales of the City secretly transsexual character Anna Madrigal when a fan pointed out that this name was an anagram for “a man and a girl”. He later had Anna claim that she had chosen her new name specifically to give this "clue".
* Tales of the City, where future best friends Michael and Mary Ann first meet when Michael's then-boyfriend Robert asks for advice on making hollandaise sauce, and she thinks he's hitting on her. Later, after she moves into Mrs. Madrigal's building, she discovers that Michael is her neighbor.
* Tales of the Continuing there's a knockout drug which dissolves in water and is absorbed through the skin. One of the protagonists takes advantage of this to sedate people with a simple squirt gun.
* Tales of the Dervishes had a story (attributed to Khwaja Ali Ramitani, who died in 1306) in which a monkey was trapped by putting cherries in a jar. The monkey was so greedy that it grabbed too many cherries and couldn't remove its hand.
* Tales of the Drunken Paladin available in the weapon shops, the best weapons and armor made from meteorite shards can only be made by certain NPCs.
* Tales of the Drunken Paladin, he's still not the ideal paladin, but he's more willing to do good for its own sake regardless of rewards.
* Tales of the Drunken Paladin, Save Hobos find gold worthless and build their slum sector out of it.
* Tales of the Drunken Paladin some time well after meeting with a new character named Karla.
* Tales of the Emperasque. By the time they sit down to discuss the issue, the author literally calls it the elephant in the room.
* Tales of the Emperasque, Corvus is trapped in ever-changing, sanity-breaking maze and Leman is about to be overrun by Chaos armies.
* Tales of the Emperasque - expecting the human-eldar negotiations to end this way, Taldeer makes her daughter part of the diplomatic expedition, using the fact that Lofn has a passive calming field around her, which helps to keep everyone's tempers in check.
* Tales of the Emperasque has all the returned Primarchs, although special mention has to go to Roboute and Corax as seen during the pacification of Terran Hives, where together they pretty much rip Fulgrim's assault to shreds.
* Tales of the Emperasque: he causes Tyranid Hive to attack Dark Eldar, weakening them both. By extension, so many Dark Eldar souls going to Slaanesh, a villain himself, causes him to attack another villain, Khorne, effectively taking them out of the picture for centuries.
* Tales of the Emperasque monster Tarrasque, which is explained in-universe as an inversion of this trope: the Emperor possesses a body of a demon.
* Tales of the Emperasque now. Dante also has his moment during the canyon battle, when he theatrically pretends to blow Orks with his pistol (they explode because of mines on the ground).
* Tales of the Emperasque. Roboute Guilliman also says one for humanity after he returns to Macragge.
* Tales of the Emperasque's Cain, and Leman and Lion go for each other's throats

the first moment they can, although which one is Cain and which is Abel is a complex and twisted case.
* Tales of the Emperasque: the God-Emperor of Mankind was an example in canon, but now this psychic powerhouse has a body of seventy-feet long, fifty-feet tall Tarrasque.
* Tales of the Emperasque upon hearing latter's the name, they settle on calling the other one He'stan and narration does so as well.
* Tales of the Five Hundred Kingdoms, Adam and Gina specifically teach the Sworn Sisterhood to fight sword-and-dagger, rather than sword and shield.
* Tales of the Five Hundred Kingdoms, all fairy tales, from Russian to Middle Eastern to the Brothers Grimm and anything else, are true. In fact, a magical force known as the Tradition actively works to try and make them come true. Those that know this will use the Tradition to their advantage.
* Tales of the Five Hundred Kingdoms. A rare occasion of a flaw saving people, though the heroine learns to calm down and calls herself out for being such a busybody when she realizes people really didn't need her being so controlling to have things work.
* Tales of the Five Hundred Kingdoms at a crossroads from the POV of both the testee and the tester.
* Tales of the Five Hundred Kingdoms, characters named Rose or some variant (Rosalinda, Rosalie) tend to end up on Traditional paths; uncomfortable at best, utterly tragic at worst.
* Tales of the Five Hundred Kingdoms is a dead-straight example, up to and including causing horrific storms and shipwrecks to increase her wealth. Her daughter is horrified when she realizes that is going on.
* Tales of the Five Hundred Kingdoms. Justified in that she was very lonely and was committed to the path of an Evil Sorceress mainly because The Tradition was pushing her along.
* Tales of the Five Hundred Kingdoms series, every Godmother has a household staff of Brownies.
* Tales of the Five Hundred Kingdoms series, The Tradition is a powerful, but not all powerful, magical force that tries to force lives to follow the plot of traditional faerie tales. Rather than accepting fate the people of the Kingdoms study the tradition to predict and avert the worse tales and even use it to their own benefit: In one case a king sends his only daughter to live in a comfortable tower guarded by non-lethal tests knowing this will attract a good husband and worthy successor. In another a baby girl is fated to follow the story of Rapunzel, since they fail to free her from the Tradition they simply act out the beginning of The Princess and the Pea and move her life to a much less miserable destiny.
* Tales of the Five Hundred Kingdoms series. The Tradition is, like the Force, always capitalized, as are many roles and patterns.
* Tales of the Five Hundred Kingdoms series, unicorns are breathtakingly gorgeous and head-thuddingly stupid. There seems to be an in-universe law that beautiful magical creatures are usually dumb as rocks, while intelligent ones are seldom beautiful.
* Tales of the Five Hundred Kingdoms Stock Plot! Despite being fairly innocuous compared to many of the tales that come up, not all of them turn out well. Three examples actually show up during the time covered by the novels:
* Tales of the Five Hundred Kingdoms, the lands are suffused with an ambient magic called "the Tradition". It will fade from a land which has lost its sense of magic and wonder, and the lives of the people who live there will be diminished as a result.
* Tales of the Five Hundred Kingdoms to gather information on a tyrant that she will need to deal with. She notes that the tyrant visits his Alchemist daily for a concoction made of thirty common poisons, which gives him immunity to all but truly exotic poisons (and the reason why he doesn't need to employ a tester). For the truly exotic poisons (which are usually slow acting), the alchemist would have the antidote handy.
* Tales Of The Floating Vagabond has rather simplistic gun rules, however the most

powerful guns are labeled "Don't Point That At My Planet!"
* Tales of the Fox Van's daughter becomes a Sweet Polly Oliver—Van is horrified at her "unwomanly" desire to fight, while the normally tricky Fox is dismayed at how easily he was fooled by a false beard and deepened voice.
* Tales of the Frog Princess: Appears to be permanently stuck in Stage 1.
* Tales of the Frog Princess (Li'l is the more sympathetic of the two since she genuinely falls for him) by courting Hazel, but meeting Li'l, and "forgetting" to mention it. When Li'l finds out she (rightfully) leaves him. He shows up later, admitting to have fallen in love with her.
* Tales of the Frog Princess, Prince Garrid. Garrid falls for and marries a real bat, Li'l. They have five kids, the one we know most about being Princess Zoe.
* Tales of the Frog Princess Princess Hazel, though presumably possessing all the powers of the Green Witch, specializes in plants and flowers especially. Though it's mentioned that she turned around the kingdom's failing crops and that she has used plants against people (her sister) before, the plants are seen more as a nuisance than a help, as they've basically taken over the castle and made it impractical for combat.
* Tales of the Gold Monkey, Jake's one-eyed dog Jack growls or barks at any impostor, including the (unknown-to-the-characters) resident Nazi spy.
* Tales of the Gold Monkey" Louie is that he was given a pardon because the guillotine didn't worked.
* Tales of the Gold Monkey, played with this by dropping improbable hints about his own unknown past.
* Tales of the Gold Monkey: Set on the volcanic island of Boragorra, the volcano remains dormant, until the penultimate episode of the series.
* Tales of the Gold Monkey variety (considering his plane is an unarmed Grumman Goose flying boat, he's rather obligated to be). He is also a literal Ace, having five confirmed victories flying against the Japanese when he was with the Flying Tigers.
* Tales of the Green Lantern Corps Annual # 3, is stated to be a silicon-based life form in a galaxy with no visual light spectrum. He looks like a frog.
* Tales of the Green Lantern, Krona, in service of the death god, Nekron, had defeated the bulk of the Corps and shattered their morale. While most of the Corps was ready to go and wait for death as the Universe is destroyed, Hal Jordan overcomes the temptation and remembers his vows. At that, Jordan addresses the Corps that he is a Green Lantern and he will not await death on his knees, but will fight to the last, alone if necessary. As he takes off, he finds first his best friends are joining and then the entire Corps as they join the fight noting the Corps has never surrendered and they will not now. Ultimately, they save the Universe.
* Tales Of The Hunger Games, Johanna wore her hair in a long ponytail during her Hunger Games. When she finally subdues her final opponent (Signiall, the District Three boy), she refuses to grant his wish for a mercy kill over him yanking on her hair at the start of their battle.
* Tales Of The Hunger Games, Linnet and her district partner moons the entire crowd during the tribute parade.
* Tales Of The Hunger Games, the narrator clearly states that the 21st Hunger Games (won by Bluebell Janssen) takes place in abandoned theme park. The rides are described to be rusty with some having parts breakable enough to be used as weapons (Bluebell uses a rollercoaster chain as a whip), jaguars patrol the area looking for tributes to kill, all of rides near a river (the only source of clean water) collapse on most tributes by Gamemaker intervention, and the the final battle takes place on top of a broken roller coaster with Bluebell's final opponent plunging down to his death from it.
* Tales of the Hunger Games Wiki video fanfic about the Victors before (and after) Katniss and Peeta.
* Tales of the Jedi. Both her parents were Jedi; her mother Nomi was a hero of the Great Sith Wars and is current Grand Master of the Order. Vima herself grew up during the wars, surrounded by knights and masters.

* Tales of the Jedi, but this was changed due to the controversy, although she is mentioned once by name in-game. Lucas Licensing still can't use "Sunrider" in the name of a work or in an action figure/collectible, but apparently the name can be used within works.
* Tales of the Jedi). Given the grief and guilt he's been carrying as an exile looking for somewhere to die, it's not surprising.
* Tales of the Jedi: In The Golden Age of the Sith, the Sith council has a Sith Lord who is a head in a container, kept alive with his Sith powers.
* Tales of the Jedi series among others), the Jedi frequently led the Republic military against Sith forces.
* Tales of the Jedi serves as a knight in the Krath and Great Sith Wars. In one ambush, she actually fights with her daughter Vima on her hip, and in fact got started on the Jedi path when defending herself and her daughter from her husband's murderers.
* Tales of the Jedi: Shoaneb Culu is blind, but sees with the Force. In fact, her entire people, the Miraluka, have this ability. This is the reason why they lost their eyes over time, since they're redundant.
* Tales of the Jedi, Sith/Krath sorceress Aleema Keto desires Jedi Knight Ulic-Qel Droma who is there to infiltrate the Krath and destroy them from within.
* Tales of the Jedi's wake and being told by various Masters that she'll be a great Jedi, not surprising since she's about kindergarten age. It isn't until "Redemption", which takes place when she's a teenager, that she acts independently.
* Tales of the Jedi that was illustrated by Dario Carrasco Jr. It's the "sense of immediacy" type; anyone whose teeth aren't clenched is probably displaying this.
* Tales of the Jedi: The Beast Wars of Onderon raged for over 400 years between the inhabitants of the walled city of Iziz and the Beast Riders, the descendants of exiled criminals that managed to tame the native monsters as their weapons. In reality, the rulers of Iziz were revealed to be Sith worshippers, and the war was brought to an end when the Jedi intervened and helped bring down the corrupt rulers of Ondeorn.
* Tales of the Jedi: The final arc, "Redemption", takes place during peacetime and the conflict is around personal struggles left over from the wars.
* Tales of the Jedi, the last arc, "Redemption," centers around Vima Sunrider when she becomes old enough for Jedi training. She starts as a rash and lonely girl, but with the help of the Force, seeks out Ulic Qel-Droma as her teacher and gains the maturity she needs to be a Jedi.
* Tales of the Jedi, this is done to Aleema and Satal's old tutor after Aleema transformed his tongue into some kind of hideous monster-slug.
* Tales of the Jedi. Unfortunately for everyone else, Kun is also very evil and he goes on to kill many Jedi after his astoundingly unsurprising fall to the Dark Side.
* Tales of the Jokka have three genders, anadi (female), emodo (male), and eperu (neuter). They can also change genders up to twice in their lives, the causes aren't entirely clear.
* Tales of the Ketty Jay, Bess is a superhumanly strong golem made from a suit of armour. Originally Bess was an 11 year old, aristocrat girl who was murdered by her uncle Crake (a demonologist who had been possessed). Horrified by what he had done, Crake bound Bess's soul to the closest viable thing at hand, which was the suit of armour. Now Bess is little more than a toddler mentally and spends her days as the team muscle when not kept in storage. At the end of the series, it turns out that the ruler of the land has an army of similar but more powerful golems at his beck and call.
* Tales of the Ketty Jay dieselpunk world of airships and jet fighters.
* Tales of the Magic Land, but later books in the series are original works that use said translation as a basis.
* Tales of the Magic Land. Charlie Black was presumed dead for years after being captured by a cannibal tribe. When he turns up alive in the second book, Ellie asked whether he managed defeat them in combat. Charlie stated there was no way for him to have fought off thousands of people, but the cannibals turned out to be

quite nice guys, and once he showed himself to be more useful alive than cooked, they were all too happy to leave him alive, accepted him into the tribe, and, eventually, helped him return home.
* Tales of the Magic Land. For example, Ellie knows about Bastinda's fear of water and left the kitchen floor wet to annoy her.
* Tales of the Magic Land has a besieging army use them to take over the Emerald City.
* Tales of the Magic Land have a law that their tribe must have only a hundred birds, due to limited food resources. Since they often live up to two hundred, any new baby receives a lot of attention. The one bird that appears in the story attempted a coup after the tribe's chief attempted to put himself on top of the queue.
* Tales of the Magic Land, Urfin Jus uses a lighter to convince a savage tribe he's the god of fire, and uses them to launch a conquest. Unfortunately for him, while lighters are unknown in the Magic Land (his came from an outsider), matches are sold in every shop, so after a short while, the army starts to smell something fishy...
* Tales of the Magic Land, Urfin Jus was so afraid of setting his wooden soldiers on fire that he didn't even light his oven as long as he was making them. During the siege of the Emerald City, the first fire attack on his army nearly destroyed it, thanks to his soldiers being curious rather than afraid.
* Tales of the Magic Land where a witch named Arachna who attempts to subdue the Magic Land with the titular fog. While not lethal (it's meant to subdue rather than exterminate, after all), it has several negative effects: it's toxic, for one, and it also blocks off the sun leading to intense cold in the usually winterless Magic Land.
* Tales of the Monkey Queen: Goku, Chichi, and Mai are bisexual, Suno's a lesbian, and Future Trunks is gay with Future Gohan implied to be as well (Gohan in the current timeline initially thought he was bisexual but later came out as straight).
* "Tales of the Near Future by the Master of Science Fiction" —
* Tales Of The Nightside? Not exactly where the monsters come from, but all monsters eventually end up there.
* Tales of the Okefenokee ride opens with a short song by the ever present Crow Quartet:
* Tales of the Otherverse: After surviving a close call in the fifth chapter, Rogue decides she is fed up with holding back her feelings and kisses Kara. They become an official couple from that point on.
* Tales of the Otherverse: At the end of the second story arc, Kara and Rogue get officially together after five chapters of angst, repressed feelings and sexual tension.
* Tales of the Otherverse dog-looking animals in Krypton, although Mon-El points there is a thing called convergent evolution.
* Tales of the Otherverse: In "A World Without Heroes", a thug twists a little girl's neck. Since the main characters had just bumped into him, it proves to be a very final mistake.
* Tales of the Otherverse: In the "A World Without Heroes" story arc, Rogue rips into half a thug whose goons have just murdered a child in cold blood.
* Tales of the Otherverse set up their new Fortress in Colorado. Above the ground it looks like a quaint, lonely one-story ranch sitting in the middle of the wood... and above a vast network of caverns housing a grand complex built in the rock.
* Tales of the Otherverse takes a shower to wash her worries and frustration away.
* Tales of the Otherverse, the titular parallel Earth is invaded and destroyed by hostile other-dimensional creatures when the barriers protecting that dimension become weaker.
* Tales of the Otherverse: The titular parallel Earth was destroyed by an interdimensional war caused by all manner of evil super-beings and monsters invading the place when the borders between realities weakened.
* Tales of the Otori, does not outlast the opening chapter of the first book.
* Tales of the Otori, Kaede's father chose to stay neutral in the conflict between

the Otori and Tohan clans, then, after the Tohan won a decisive victory at the Battle of Yaegahara, then tried to suck up to the Tohan leadership. He was "rewarded" by having his daughter taken hostage and forced into servitude in the household of one of the Tohan's more strident allies.
* Tales of the Otori, Muto Shizuka and Arai Daiichi have been together for years, and Shizuka has borne him two sons, but they have never formally married.
* Tales of the Otori, sexuality is mostly portrayed pragmatically: occasionally it's an important part of the plot, but for the most part it's just in the background of the characters' lives. As such, masturbation is mentioned, but only... off-handedly.
* Tales of the Questor, a granite henge can be used to absorb the magical blast when destroying dangerous or unstable magical items. They consider this an elegant way of disposing of their thaumaturgical waste, except for the circles' tendency to attract druids.
* Tales of the Questor. Also, the Redcaps and other gangs in the Tumbledowns of Sanctuary City.
* Tales of the Questor, a metal that was almost impossible to refine in that world's technological level.
* Tales of the Questor and packed "enough wallop to knock a troll flat".
* Tales of the Questor are fairly common among them due to their long lifespans.
* Tales of the Questor are practically blind, their toes are prehensile, and their beards are actually a thick coat of fur sprouting out of their chests.
* Tales of the Questor between attacks — though it always seems to come through in a crisis, even if not in the manner expected.
* Tales of the Questor by a female maidservant, yet she doesn't think anything of looking at him.
* Tales of the Questor (canonically, they are literally too large to walk on their own, and have to be hand-fed by their handlers.) Sam is not enthused.
* Tales of the Questor (check the punchline). Save for a couple of variant plants that produce rubies and sapphires...
* Tales of the Questor: Despite impressing the notables in the big city and in the swamp territories, Quentyn's hometown of Freedom Downs considers his chosen calling as a Questor a joke and can only see the bad side of his successful adventures. However, when the town is threatened to be repossessed because of an old debt concerning an old Questor's abandoned quest, Quentyn volunteers to resume it to cancel the town's debt even though he may never be able to see home again. The town, stunned at this sacrifice, finally realize that their current Questor is a hero and hail him as such.
* Tales of the Questor Elves now die around age 20 ("Just old enough to make more elves") - which more or less caused the collapse of their society and left the surviors living as thieves and scavengers.
* Tales of the Questor, Emmet sweeps Kestrel into his arms and leans forward for a kiss, but, well, she has considerably more brawn than he has. With the crack, they both hit the ground. Fortunately, Kestrel laughs it off and still has feelings for Emmet.
* Tales of the Questor features a barely trained human lux-user who is far more powerful than most of the Racconnan's most skilled wizards, but lacks the restraint to do much besides make things explode.
* Tales of the Questor had a different take on it when it is revealed that Quentyn's close friend, Kestrel, has a romantic interest in him, but decides not to reveal it. Since the strongest moment of temptation to do so is on the night before he left on his grand quest and de facto probable permanent exile outside the Raccoonan lands, she felt that it was too cruel to give him yet another thing to sacrifice and keeps the true depth of her feelings to herself. However, it doesn't end too badly since Quentyn, although unaware of Kestrel's feelings, insists that she join him for a dance at the harvest festival and they both have one last merry time together under the circumstances.
* Tales of the Questor": Has a swarm of shadow rats made by a rat king and a magical device.

* Tales of the Questor has the Unseleighe castle of Princeling Dolan in Tir Na Nogh. Simply navigating the halls can make you arf your cookies.
* Tales of the Questor has two moons in the sky, one of which is twice the apparent diameter of the other, and which have 7 and 28 day orbits (a 13 month year, with 4 weeks to a month exactly. You can tell what day of the week it is by the phases of the moons.)
* Tales of the Questor he got long before he decided on his calling was damn good stuff.
* Tales of the Questor. In fact it's recommended that one use dead languages like Latin when dealing with the Fae so as to limit their ability to twist the meaning of your words.
* Tales of the Questor is a subversion. Instead of stupidity, it is a sense of honor and desire to help that make him accept quests which almost always indirectly monkey-wrench SOMEONE'S plans, generally without even knowing it. Examples:
* Tales of the Questor is particularly sweet and tolerant of a very young child who pulls on his whiskers and twists his tail, thinking him a cat. (he quickly makes her a harmless toy that occupies her hands)
* Tales of the Questor, Ley Lines are discussed quite often when talking about their system of magic, known as 'lux.'
* Tales of the Questor makes it a deliberate policy to never, ever read fanfics of his comics, because he knows he would go mad from the desire to dive in and re-edit...
* Tales of the Questor—- Magic is a natural ability to manipulate an exotic form of energy, can be used via technological means, and generally follows the known laws of physics (Conservation of mass and energy, for example, still apply).
* Tales of the Questor means he's favored by the White Stag, and such people cannot be hunted either. So, the Princeling is in trouble with two offenses simultaneously.
* Tales of the Questor of Racconans referring to their magic-like powers as magic, implying that they weren't even going to use magic-related terminology anymore.
* Tales of the Questor over a three-duchy radius (and his formerly-destitute duchy had no real army), but when he asked his seneschal how much there was, he was told that what he was seeing was just some of the stuff they hadn't shifted to the dungeons yet.
* Tales of the Questor, Quentyn climbs a dragon and lassos its mouth after his plan A proves completely ineffective.
* Tales of the Questor: Quentyn gets this a lot when he first starts out. Chances are it'll happen again; he does, after all, look like an animate plush toy...
* Tales of the Questor, Quentyn reacts to his new sidekick's, Sam, demands to respect her modesty when she is forced to bathe by him by noting that he finds nothing attractive in beings like Humans and Elves who look like naked rodents to him. However, when Sam emerges, Quentyn notes that her now clean bright blonde hair looks nice, and that if she had proper body fur someone could come after her for her pelt.
* Tales of the Questor, Quentyn's magic sword, Wildcard, could go from unstoppable to useless with every attack due to the unique way it was first charged (A night of drunken spellcasting by Quentyn and his friends).
* Tales of the Questor: Quentyn the Questor is treated as joke by most of his community. However, the trope is subverted when Quentyn calls a meeting to tell the town he doesn't care what they thought of him. Furthermore, when he agrees to go on what seems a permanent exile to undertake an apparently impossible quest in order to save the town, the whole community is stunned at this sacrifice. After it sinks in, the town's opinion changes overnight to mark Quentyn as a hero.
* Tales of the Questor: Rahan sets up a prank that involves tar and feathers, aimed at his nemesis Quentyn. Then Squidge gets involved by scaring the crap out of Rahan and his cronies, resulting in them being tarred and feathered instead.
* Tales of the Questor started out as a fan of the wonder-tales about the legendary Questors, before becoming a Questor himself. He even at one point uses his fan knowledge to find a way to defeat a plague of wights.

* Tales of the Questor subverts this with the fey. General belief is that they are vulnerable to "Cold iron" but this proves to be false. Research into why the iron did not work reveals that the ancient documents that the information was obtained from were actually misprinted versions found in an ancient garbage dump and that the symbol for cold and the symbol for north are very similar. Turns out the weakness is not cold iron but "north seeking iron" (lodestone), they are vulnerable to strong magnetic fields. Unfortunately only the weakest fey have this vulnerability, the strong ones can shrug it off (though with immense pain).
* Tales of the Questor that a pollutant must be dealt with because it is not one isolated case.
* Tales of the Questor, the illusions of the Fae can be pierced by someone born with "the second Sight..." or by someone with the latent ability who daubs their eyes with elderflower balm or drinks elderberry wine.
* Tales of the Questor, the newest member of Quentyn's party is a knightless squire with a sort-of-borrowed, sort-of-stolen suit of armor. Magical, self-propelled armor.
* Tales of the Questor, the ratlike Wights swell and explode when exposed to a candle flame... later on, Quentyn uses magically amplified torchflame to kill a swarm of Redcaps (with messy, gory, tick-poppy type results.)
* Tales of the Questor, there is a small story where Linneaus, a Raccoonan pastor learns that the Alligator people in the swamp were looking for information about God and he volunteers to go to them as a missionary. While that story seems like a postscript story to the strip's first major continuity, there is a later story where a wizard tells of a boy with a powerful talent for magic who goes half-crazed in horror of his power and the people who tried to exploit him and he was last seen running into the swamp, never to be seen again. These stories may be unrelated, but given the religious allegory nature of the strip, it would seem that the boy is inadvertently heading for the one Raccoonan who can help him.
* Tales Of The Ratfink, Ed Roth (voice by John Goodman) describes Ratfink as the Anti-Mickey Mouse so it's kind of fitting.
* Tales of the Sinestro Corps offers some backstory and alternate takes on events in the Sinestro Corps War from the point of view of the corps.
* Tales of the Skull King is in constant communication with the Narrator.
* Tales of the Skull King who are in the process of exterminating the Dwarven people who they nicknamed "Drews". Doesn't help that they also speak with stereotypical German spelling such as "Zee" and "Zhem".
* Tales of the Slayers, her Watcher took his revenge by opening the city gates, allowing a horde of vampires to enter and massacre the entire town. His last words were, "For God is good and God is kind, but God's not welcome here!"
* Tales of the Slayers pay for their stupidity when the Slayer's Watcher, out of revenge, opens the town's gate, letting the remaining vampires in for the slaughter.
* Tales of the South Pacific to take a drink from it, and then says he's going to take a walk for 20 minutes. He comes back 20 minutes later and is astonished to find that the supremely innocent Joe didn't pick up on his hint and didn't help himself to any whiskey.
* Tales of the Space Princess RPG. While wearing the Super Science device Night Goggles, a character can see in the dark anything within 20 yards. They function for 1 hour before needing to be recharged.
* Tales of the Space South, about the adventures of a Reluctant Psychopath in Space Alabama, a racist planet-state dystopia.
* Tales of the Space South, Dickarus is able to climb easily through the zoo's "Impermeable Fence."
* Tales of the Sundered Lands One-Eyed Ryan, as his name suggests, has only one eye. He is also very experienced.
* Tales of the Teenage Mutant Ninja Turtles, in which two Men in Black show up to debrief the turtles' friend Casey Jones after an encounter with an alien robot. However, the agents are actually aliens themselves, testing human reactions to see whether Earth is ready to be contacted openly by their race.

* Tales of the Tempest, also called "Tales of Ten Hours", though not the only one.
* Tales of the Tempest does so with the odd darker-skinned boss enemy.
* Tales of the Undiscovered Swords 侫人, meaning "messed-up person", from the Man'yōshū poem Konotegashiwa's name is taken from.
* Tales of the Undiscovered Swords being the counter for both bites (of food)/sips (of drink) and swords, and the sword Ichigo Hitofuri.
* Tales of the Undiscovered Swords speech and later on a bag of gummies he's using to lure Hōchō into joining his vegan cause after Yagen points out the gummies contain gelatin.
* Tales of the Undiscovered Swords use lengthy formal speech, instead opting for short speech, as longer would a/ defeat the purpose of efficiency, b/ indicate politeness, this being Japanese, which he flat-out doesn't have.
* Tales of the Undiscovered Swords wa lolita fashion and openly flirts with several fellow swords.
* Tales of the Undiscovered Swords who only appears in one entry, story #4.
* Tales of the Wild: Revi Pel, the fox tenderfoot, and Evina Arwel the swan druid.
* Tales of the World in battle and their Mystic Artes. The Descender also has various dialogue choices to choose during story dialogue and skits.
* Tales of the World: Radiant Mythology characters having a massive crossover and interacting with each other.
* Tales of the World series, the three Kanonnos and the three flying creatures (Mormo, Paneer, and Rockspring), among other original characters.
* Tales of the World, where the girls overhear Chester telling Lloyd about his secret spot with "the best view." Though Lloyd was never given the chance to show if he had any interest in it, he is automatically labeled as a pervert by the girls. The skit ends with him shouting "I was framed!"
* Tales of Tomorrow, a scifi program is interrupted repeatedly by views of someone's kitchen in which a murder is being planned. The images' source isn't ever fully explained, but in between these foreboding glimpses, the TV studio's personnel are seen debating where the rogue "broadcast" might be coming from, arguing about how they might prevent the crime, and frantically trying to identify and warn the intended victim.
* Tales Of Tomorrow episode "Red Dust", space explorers who've just visited a once-populated world overrun by Red Goo discover the pink crystalline "dust" has infested their ship, as well.
* Tales Of Tomorrow: In "The Children's Room", Walter's parents forbid him from reading the strange book given to him by the mysterious librarian, and his father tears out some pages and drops it in the wastebasket. When they've left, Walter retrieves it from the trash, and the very first passage he reads refers to how readers' parents have failed to take it away from them.
* Tales of Tomorrow, re-shot word for word so audiences would initially think it's a repeat.
* Tales of Ubernorden story "The Sword of War" possesses unspecified powers that allows the wielder to conquer the world.
* Tales of Vesperia" acts as a moral coming-of-age for all its characters as well.
* Tales of Vesperia: all the towns in the world are shielded underneath giant energy shields that keep monsters out, and only highly trained professionals (like the party members) are allowed outside.
* Tales of Vesperia amounts of food they would honestly not be able to finish.
* Tales of Vesperia an Are They/Aren't They one with childhood best friends Yuri and Flynn. The PS3 version only intensifies it.
* Tales of Vesperia. And a heart-shaped hole in his clothes over his chest.
* Tales of Vesperia and PC with all the PS3 additions and made available internationally.
* Tales of Vesperia and refuses to act his age. Most of the time they don't even call him Raven; they just call him, "old man". He's still one of the group until the end.
* Tales of Vesperia and working a selfish agenda, also happens to be a genuinely good guy and the comic relief character.

* Tales of Vesperia. As it is, it still takes a good while to grind enough kills to make them the best weapons again in a new game. The PS3 version added the ability to save the kill count to the grade shop, and isn't particularly expensive either. To compensate (though barely), if you power up all the Fell Arms, the final boss gets a new third form. Also, even with the extreme attack power they can rack up, it'll barely be enough to fight the Spiral Draco.
* Tales of Vesperia a straight-up adaptation of the game or some kind of children's story about Brave Vesperia's romps and adventures is up for debate.
* Tales of Vesperia, as Yuri is perfectly happy with not being celebrated, but it really frustrates his knight friend Flynn who gets all the credit for Yuri's heroics.
* Tales of Vesperia, being able to easily carry their boat around once they tie it to him.
* Tales of Vesperia between Rita and Estellise/Estelle, but leaves the exact nature of their relationship ambiguous.
* Tales of Vesperia, Brave Vesperia are about to embark on a dangerous mission to help address an issue that the new leader of the guild Altosk caused. When he says that he is coming with them, Raven decks him with a yell of "Like hell you are!"
* Tales of Vesperia. But if anyone goes after his friends, he's the first one to their defence.
* Tales of Vesperia called The Adephagos that will destroy the world, and your party can only stop it by ending over-reliance on Blastia and replacing Aer with Mana, a much safer form of energy. All of this is a not-so-subtle metaphor for fossil fuels and global warming.
* Tales of Vesperia can earn the title "Trophy Wife" without having to marry anyone.
* Tales of Vesperia commit the crimes he's accused of (well, at least most of them; one of them was a misunderstanding). His friends aren't so amused, especially when it means they have to flee the inn they are staying at to avoid a confrontation.
* Tales of Vesperia does this due to the blastia embedded within his chest and a deal he made with Alexei.
* Tales of Vesperia, does this rather often when praising the main party, along with his trademark "ja".
* Tales of Vesperia does this when he disguises himself as Regaey. Granted, the name was a dead giveaway, but his demeanor as Regaey was very meek compared to his actual personality.
* Tales of Vesperia: Estelle tends to take a lot of sayings quite literally, to the confusion of her teammates. This is the result of her living in a castle her entire life. She does eventually get a bit better about this.
* Tales of Vesperia. Flynn always seems to be just one town ahead of you...
* Tales of Vesperia: "Gaze upon my physique, and be awed! MANLY MUSK!"
* Tales of Vesperia goes after him, though he takes more offence at how low his bounty is.
* Tales of Vesperia has 2 characters who due to their positions of power will probably be acquitted for their heinous crimes even after being arrested. Yuri murders both of them in cold blood before they're given the chance.
* Tales of Vesperia has a Nam Cobanda Isle itself and the opportunity to play the ever-so-addicting casino games. There's also a mini-game in another area where you have to accurately predict if the next number is higher or lower than the one preceding it.
* Tales of Vesperia, has a pair worn on her forehead that do absolutely nothing. She also apparently has a pair of glasses tucked into the collar of her shirt that are never used.
* Tales of Vesperia has Repede thinking of Estelle this way, despite the fact Estelle truly wishes for him to like her. This repeatedly causes her no end of grief with his constant dismissal of him. Then she gets rather jealous of Judith being okay in his eyes even though they just met.
* Tales of Vesperia has the male lead (Yuri) fight. The female lead Estelle... dances in a field. The gameplay averts this, though, as both take major actions

throughout the story.
* Tales of Vesperia has these from time to time when Rita needs to hack into or otherwise control a blastia.
* Tales of Vesperia has this. Some of the stuff is rather easy to get later on in the game, and some of it is free too, so the advantage is mitigated somewhat.
* Tales of Vesperia has Yuri as a levelheaded leader. By the end of the game he's starting to grow into a charismatic leader as well.
* Tales of Vesperia have an attack that causes a bunch of energy to form around the target. Said energy explodes after a few seconds, doing considerable damage to the target.
* Tales of Vesperia, his dog Repede flashes a look at him that isn't quite shame, but also isn't one of approval.
* Tales of Vesperia; his lack of academic interest is out of laziness, not lack of brains.
* Tales of Vesperia. However, unlike most classic examples, he's completely aware of what happens when he's in either persona, hence the ambiguity.
* Tales of Vesperia (if the character that needs convincing is calm and collected) or rage-filled dismissal (if the character is not) anyways, so...
* Tales of Vesperia: If you upgrade the weapon "Ogre Hammer," it becomes "Orge Hammer +1".
* Tales of Vesperia is the first healer in the party. Her array of healing artes is far greater than that of either Karol or Raven. Her artes are also much more powerful. The storyline actually focuses quite heavily on Estelle's healing powers.
* Tales of Vesperia, it may be a result of that and not an indication of race.
* Tales of Vesperia, Judith, after warming up to her teammates, becomes one for the party. She is usually bright in tone, is very reliable, and acts supportively towards her teammates, especially Karol.
* Tales of Vesperia, Judith keeps saying over and over that she isn't a good liar. Though she never tries to outright lie to people.
* Tales of Vesperia looks like a wolf with a blue mane and a sickle-like tail, but he's referred to as just a dog. The prequel movie even shows other dogs who look just like Repede, all referred to as just "dogs".
* Tales of Vesperia moments from other companions in various skits, they never stray from being like brother and sister.
* Tales of Vesperia (noticing a theme here?) does this too; Karol (12) strikes up a good friendship with most of the party, but in particular his guild subordinate (and main protagonist) Yuri (21), who calls Karol 'Boss'. With one exception, none of the playable cast is over 21; that exception being Raven, who at 35 gets the somewhat sarcastic nickname "Old Man".
* Tales of Vesperia not only finds the whole party alive and well, but the final boss too.
* Tales of Vesperia, occasionally to a ludicrous extent. Despite her age she's probably the most intelligent person in the world by a fair margin; her response to a request for a device that would break most known natural laws is essentially, "It'll take until breakfast at least."
* Tales of Vesperia. Of course, it turns out he didn't really do anything special; he just follows the recipes to the letter.
* Tales of Vesperia, or "titles," for completing the Repede snowboarding mini-game with attachments based on each character. Yuri, Estelle and Repede himself each get Santa Claus outfits, "Winter's Night Delivery Man," "Holy Night Delivery Girl" and "Snow Delivery Dog" respectively. Karol is Rudolph the Red-nosed Reindeer, "Delivery Reindeer." The other characters get outfits with a winter theme, though not specifically a Christmas one.
* Tales of Vesperia outside the city of Dahngrest during the negotiations with the leaders of the guilds, this is noted by the inhabitants of the guild city.
* Tales of Vesperia plays it straight with Raven, 35 years old, being called an "old man" and constantly whining about his age.
* Tales of Vesperia (PS3) totally makes up for it by giving Estelle a Mystic Arte that summons all four of them at once.

* Tales of Vesperia references The Great War between humans and Entelexeia. One of the party members is a veteran.
* Tales of Vesperia Rita. Estelle's mystic arte is also the only one that heals plus like Mint she too has her own nurse outfit.
* Tales of Vesperia, Rita Mordio is accused by Yuri Lowell (the game's protagonist) of being a blastia thief. She takes them to Shaikos Ruins stating that she'd "clear her name" — and use the rest of the party for help in completing her formula, naturally, though this isn't stated (by Karol!) until after the battle with Goliath.
* Tales of Vesperia, Rita Mordio is well-known as the genius mage, but she's also considered by every mage in Aspio as a weirdo because of her extreme fascination for Blastia (despite all of them having just as much fascination that they are pretty ignorant about what happens in the world). Though making many breakthroughs, adults at Aspio very often dismiss her from discussions because she's too young.
* Tales of Vesperia She's also a Game Breaker due to the fact that her Tidal Wave and Meteor Swarm spells are EXTREMELY abusable in Overlimit, essentially stopping any boss from moving. Yes, not even the final boss can stand up to, "Blah blah blah! TIDAL WAVE!"
* Tales of Vesperia sort, tolerated by everyone in the group except for Rita, who smacks him or blasts him with magic almost any time he says or does something pervy. He's even referred to as the trope title on multiple occasions.
* Tales of Vesperia starts off as this, until his sole motivation becomes fighting Yuri.
* Tales of Vesperia surprising is that a) not many major characters comment on it and b) Yuri just flat out...doesn't care.
* Tales of Vesperia, the ancient Kritya society invented the Blastia, but were wiped out by an apocalypse. The player even visits a Krityan ruin early on the where they find some of the only golems in the game.
* Tales of Vesperia, the Atherum, the ghosts themselves are only visible on the mirrors of the walls.
* Tales of Vesperia, though it gets no further than subtext. Rita's aggressive and pragmatic, whilst Estelle is noble, naive, and sweet. She's also the only one who brings out Rita's softer side.
* Tales of Vesperia to punish allies and enemies on field while also disabling items, amongst many other things. Also notable that it takes on the look of a gigantic roulette table with poker chips all around.
* Tales of Vesperia to the main race speaks volumes. All in all, they're not exactly the best safeguards of the knowledge that a giant space octopus made from global warming is going to utterly rape the planet.
* Tales of Vesperia wields hammers with heads almost as big as himself along with swords and axes that are twice his height and is a simple 12-year-old boy. He does have a possible justification in the form of the blastia on his handbag, though.
* Tales of Vesperia, your lead character Yuri is presented with his own wanted poster... and is insulted to learn that the bounty on him is "only 5,000 Gald." It is later raised to 10,000.
* Tales of Vesperia, Yuri ends up on a wanted poster after breaking out of jail and leaving Zaphias with Estelle (who turns out to be a princess). While not explicitly pointed out, it's also very poorly drawn.
* Tales of Vesperia, Yuri has an attack called "Ghost Wolf" that allows him to move lightning fast for a strike at his opponent. His ultimate attack takes this trope to ridiculous levels.
* Tales of Vesperia. Yuri, to his credit, never actually tells Flynn what she tried to do. Probably because he knows what Flynn would do if he found out.
* Tales of Wedding Rings. He has moral objections to the whole arrangement, so he is very hesitant to cross that line. It's implied more than once that he's keeping himself in check with masturbation.
* Tales of Wedding Rings, Sato follows his childhood friend Hime to another world where she is about to marry another man, then takes the place of her original groom when a demon attacks the wedding. He then learns that doing so has made him the

Ring King, a hero destined to defeat the evil Abyss King, and that he needs to marry four other girls in order to claim the rest of the power needed to do so. He goes through with the weddings, but his number one priority is Hime, although he is kind and respectful to the other girls.
* Tales of Wedding Rings. She immediately puts the ring on Sato's finger and kisses him, magically sealing their marriage and making him the Ring King who must fight the Abyssal Lord.
* Tales of Wyre, this is the Inquisition's preferred punishment for heretics.
* Tales of Xillia 2 also rewards you with a very silly looking weapon for each of the party members upon finishing certain sidequests (examples include a pair of popguns and an omlette pan and spatula for Ludger, a giant paddle for Gaius, and an enormous grilled squid for Alvin). Similarly, they're just about the strongest weapons you have access to prior to beating the game, thanks to both their high attack power and special abilities, and in the case of the pan and spatula for Ludger, allow him to perform a special attack if he's wearing his chef costume.
* Tales of Xillia 2 as long as the bonus is active (Something they'll do with annoyingly great frequency otherwise).
* Tales of Xillia 2, can choose to flirt with anyone and everyone, male or female.
* Tales of Xillia 2) can use. They're rather small compared to the ones utilized earlier in the series, but he's able to swing them a lot faster as a result.
* Tales of Xillia 2 cast still remained as your party and often had screentime, the fact that - aside from Jude and Milla - none of them played too big of a role in the plot was once again a split-point for fans. Happy to see their favorite characters, unhappy that majority of them were mostly there to fill up your party and do little else.
* Tales of Xillia 2 for it to happen. After joining the party, Milla openly admits that she only has a limited amount of time to remain in the human realm. At the end of the game, her time is up and she has to return to the spirit realm. Her sister Muzét joins her in leaving the party at this point, though she has no such restriction and is the only Great Spirit who can easily go between realms, due to her powers.
* Tales of Xillia 2 in the first game due to their interactions not being all that romantic.
* Tales of Xillia 2 Ludger will cause her to admit in a short skit that she "feels funny" whenever she's near Ludger. Notably, when you start casting the dual Mystic Arte with them linked, Muzet blows Ludger a kiss.
* Tales of Xillia 2 make you destroy absolutely everything in seconds regardless of the difficulty setting.
* Tales of Xillia 2. Meaning the party needs to kill either Julius or Ludger.
* Tales of Xillia 2, Milla can gain the ability as well late in the game. Muzet also has a variation that simply lets her or her partner teleport right in front of an enemy or extremely far away. In this case, it's probably actual teleportation.
* Tales of Xillia 2 Muzét could count as a minor example since she has two martial artes that can be used for healing and she has access to the Resurrection spell.
* Tales of Xillia 2 nature. In the "Bad Ending" in particular, main character Ludger's twin swords are shown to be covered in blood.
* Tales of Xillia 2 of 'Erston' and interacts with the civilians. All, so he can learn about both societies, cultures, and how to bring peace to both worlds.
* Tales of Xillia 2 play time). Another thing worth mentioning is that the game has essentially no true side-quests like the first game (and most JRPGs in general) - instead, you simply get a lazy job board containing the most basic fetch-quest requests.
* Tales of Xillia 2, raising Ludger's affinity with other members of the party allows him to learn one of their artes and unlocks a special Mystic Arte he can perform with them, among other things.
* Tales of Xillia 2, this happens to the target of Leia and Ludger's linked mystic arte at the end.
* Tales of Xillia 2, though she apologizes for it quickly. She ends up being fine

in the latter option, but she gets mad at him for letting her crash into the ground instead.
* Tales of Xillia 2 to do so). He ends up with a bill of twenty million gald in total, and you're required to pay it off little by little as you progress through the story.
* Tales of Xillia 2 to learn their world is gone because it "wasn't the real world".
* Tales of Xillia 2 virtually every boss being susceptible to everything in the book save for instant death, though the duration tends to be shorter and in the case of damaging effects, they generally deal very little damage compared to normal enemies (Though there are notable exceptions). This includes even the Petrify status (Formerly available only to enemies), which makes them completely incapable of acting for a few seconds and with the right setup, you can lock them down almost indefinitely with it.
* Tales of Xillia 2. When he meets Teepo, they get a skit relating to this fact.
* Tales of Xillia 2, where Ivar draws and shows off wanted posters for Ludger and Julius to be used in case they decide to do anything foolish. He knows perfectly well what they look like, but they look as terrible as the previous examples.
* Tales of Xillia 2 which shares a similar ending, you have to choose to do it.
* Tales of Xillia 2. You can also give them to anyone in the party (guys included) once you find the appropriate accessory.
* Tales of Xillia, among other things, gets trampled by an oversized boar, accidentally lodges his own sword in his forehead, and faceplants into the ground from dozens of feet in the air, but barely is fazed by any of it. He also gets beaten up by the party on multiple occasions, but always seems more annoyed then anything else in the aftermath.
* Tales of Xillia and his Character Chapters focus on his attempt at making his spyrite technology work, so that spyrix will no longer be needed, the fourth and fifth Chapters heavily shove Milla and Jude together again, completely taking the focus off of the spyrite aspect. The attempts at romantic scenes come across as very awkward and out of place and while his spyrite technology does advance as well, it comes at the cost of viewing said awkward scenes.
* Tales of Xillia and its sequel has a really long one. It's her crowning glory and she swishes it like a cow's tail.
* Tales of Xillia and you get quickly thrown into battles, as well as being given Milla, who is amazingly overpowered for that part of the game. But then she loses those powers and the next few hours are spent travelling to Nia Khera, which forces the player to head from one identical harbor to small, very uninteresting towns connected by identically designed routes. The game does pick up again shortly after, but goes into another low point, before looking up again.
* Tales of Xillia as a result of their actions in Rashugal, though it's an optional scene.
* Tales of Xillia, before getting killed by a cannon mounted on an aircraft overhead.
* Tales of Xillia brings us the city of Fenmont where the use of spirits has created a 'night clime' which results in the city and its surrounding area to exist in an endless night where the sun never rises.
* Tales of Xillia, but the whole thing is done automatically via cutscene. The point of it is just to show that Leia isn't very good at channeling mana.
* Tales of Xillia clarifies this. Rappigs are biologically rabbits that look like pigs, and introduces a new species, Piggits, which are biologically pigs that look like rabbits. Naturally, due to a mix of convergent evolution and using the same character model, they look exactly the same.
* Tales of Xillia fits as well considering that he is 30 years older the oldest of the younger members of the party at 63. It helps though that he is a retired famous strategist.
* Tales of Xillia for a time) she's later shown, only a few months later, to have progressed to an advanced understanding of sword techniques.
* Tales of Xillia gets in on this sometimes. For instance, telling Elise that

wyverns feed on the souls of children while they sleep right after she comments on them not being as scary as she thought they would be.
* Tales of Xillia has a moment of Alvin and Milla discussing her getting some training in her swordsmanship in, though she is less than adequate at fighting at this point. Cue Alvin giving her faint praise.
* Tales of Xillia, has said that "his is the love story in the game" and occasionally reblogs sad Gaius/Wingul fanart on his Tumblr.
* Tales of Xillia has the Fell Arms, as well. They all drop from separate optional bosses that can be found wandering around specific field and dungeon maps, and the full potential of the weapons is only unlocked after beating the Golden Mage Knight in the bonus dungeon. However, they're practically required if you want the later boss fights on Unknown difficulty to conclude in a reasonable amount of time due to the sheer amount of HP and defense they have.
* Tales of Xillia has the largest age gap so far if we're going by human years with the Elize as the youngest at 12 and Rowen as the oldest at 63. The age gap is large enough that he's old enough to be a grandfather to three of the party members and father to the other two since the next oldest is Alvin at 30.
* Tales of Xillia has them, though never in the sand, instead appearing in caves and canyons.
* Tales of Xillia has this as Jude's ability, called 'Snap Pivot'. Backstepping just as he's about to get hit by an enemy, he flashsteps behind them. It actually gets lampshaded in a skit that this is what he does, once the player has used Snap Pivot a lot.
* Tales of Xillia have this going on, with Milla standing at around 167 cm, while Jude is around 162 cm. This is justified by Milla being about five years older than Jude, who is 15.
* Tales of Xillia. He served as a soldier in his younger years and is talented with magic, swords, and throwing knives. When his master is abducted, he doesn't take it sitting down and following the rescue, joins the party for the sake of addressing the culprits.
* Tales of Xillia, if you're playing as Jude and dodge an enemy's attack by backstepping, you'll flash step behind them. It sort of makes sense if done at melee range, it looks like he circles around the enemy. It's less plausible when he does it by dodging a ranged attack however.
* Tales of Xillia jokingly asks if Jude likes older women, Jude responds with an embarrassed chuckle and says "I don't know. Maybe."
* Tales of Xillia (not kidding, it was at least eight times). The party justifies keeping him around by saying he'd follow them anyways and at least this way they can keep an eye on him, but it's a surprise no one just kills him with all the trouble and grief he causes.
* Tales of Xillia, ride a horse, go into a wheelchair, or just outright crawl.
* Tales of Xillia. She comes with a set of absolutely murderously awesome darkness spells, including an evil purple version of Dhaos Laser called IGNITE TERROR. Also she nearly killed two dragons by herself.
* Tales of Xillia thanks to the enhancement of the Four Great Spirits. When she loses this, it quickly becomes apparent she was relying on them so much that she has no muscle memory for anything; barely able to swim and suddenly becoming hopelessly uncoordinated with her sword.
* Tales of Xillia the boss is also very susceptible to the Four Elemental Spirits, which the player had quite some time getting used to using in-battle, making the boss a pushover.
* Tales of Xillia, the real Maxwell gives Milla the choice of either living out the rest of her life as a normal human or becoming his successor. She picks the later, essentially becoming the goddess of Reize Maxia.
* Tales of Xillia, the scene plays out differently. On Milla's route, the assassin shoots an arrow into the ground in front of Jude, who is so surprised by the attack that he falls flat on his ass.
* Tales of Xillia. The sequel has been accused by some of being little more than an overpriced DLC pack for the first game for that and a few other reasons.

* Tales of Xillia. They defeat the last beast guarding the weapons, and Jude complains about how difficult the creatures were to find.
* Tales of Xillia They then spend some time recuperating in Sharilton, and the player is given a sequence in which they do nothing but speak to each member of the party in turn for some really nice character moments. Rowen even points out that it's the first time the party really gets to rest since they left Leronde at the beginning of the chapter.
* Tales of Xillia we have Spyrix and Spyrite, both powered by the elemental spirits that compose that world. One of the main problems in the first game is that the former technology kills said spirits, which would eventually cause them to die out entirely, and all life on the planet with them. This is why the latter is developed at the end of the first game, which accomplishes the same thing without killing the spirits.
* Tales of Xillia were automatically upgraded to a limited edition, which included an art book, soundtrack, and in-game costumes along with the game.
* Tales of Xillia with the sword, as well as instinctively learning all of her Spirit Artes.
* Tales Of Zenith, Tam O'Shanter says that it's JFK's fault the Oklahoma City Courthouse was bombed. "JFK appointed his brother Attorney General. This got Congress so mad they passed a law that the president can't appoint any relatives to a cabinet position. This meant that Bill Clinton couldn't appoint his wife Attorney General, so when Waco happened, instead of Hillary talking it out with David Koresh, Janet Reno allowed the FBI to use tanks and tear gas, and people couldn't get out and died. As a result, Timothy McVeigh saw what happened and decided to blow up the Oklahoma City Courthouse. That's why it's JFK's fault, if he hadn't appointed his brother Attorney General, Hillary would have been able to be appointed, and she's too politically savvy to have made the mistake Janet Reno did."
* Tales of Zestiria, Alisha Diphda functions as a warrior princess. Interestingly, due to the fact she was not the first child in the family, she has virtually no hope of actually becoming Queen of Hyland, so she specifically sets out and uses her nobility to help her people in whatever way she can, especially if it involves using a spear.
* Tales of Zestiria, and that he just isn't ready for anything truly serious.
* Tales of Zestiria any Seraph (Malak in Berseria) that has a human as their vessel acts as such. The Seraph grants supernatural powers to the vessel and gains protection from malevolence in return. In the case of Sub-Lords to a Shepherd's Prime Lord, they get a minor boost in ability, gaining the ability to actually fight and purify hellions.
* Tales of Zestiria at the same time. The rushed nature caused it to garner immense criticism, and a minor controversy in Japan occurred because of the handling of some of its characters.
* Tales of Zestiria, during a cutscene, late in the game, Edna comes to visit Zaveid to ask him why he was killing hellions. "Well, well, Edna coming to see me. Should I be scanning the skies for pigs?"
* Tales of Zestiria has all of the seraphs fit to an extent since all of them have their two healing artes that have secondary effects and are still able to deal fight through attack and seraphic artes.
* Tales of Zestiria has all the seraphim able to learn two healing artes that offer a buff in addition to healing while the humans have healing spells while armatized.
* Tales of Zestiria has The Scattered Bones, an assassins guild comprised of various people that all treat each other like family. Unlike most examples of assassins they're actually the good guys and specifically target anybody that tries to instigate wars or kill innocents for profit. While they themselves are assassins they never go after innocent people regardless of the profit, and will work for relatively cheap if they deem the job nessecary. Furthermore, if you're stupid enough to try to trick them into killing an innocent they'll turn around and come after you instead.
* Tales of Zestiria. In Edna's words "Earth-dwellers seem to think they're

benevolent. That's cute."
* Tales of Zestiria in Zaveid, but he doesn't get anywhere with anyone.
* Tales of Zestiria sequence, in which Alisha, not realizing this, thinks he's a had a really hard life, among other things that somebody stole his clothes. She begs him to put on a shirt she got for him, ignoring his protestations that he hasn't had a hard life and this is how he always dresses.
* Tales of Zestiria similar to how a yaoi fanific cover page would. Even Sorey's voice actor has gone on record supporting the ship. At this point it's basically all but confirmed.
* Tales of Zestiria, Sorey at one point asks if Seraphs (who are normally invisible to humans) can be reflected in mirrors, Lailah answers that only if they focus really hard they can only make themselves visible for a short moment, which is usually enough for them to groom themselves in it; Rose then wonders if people have been freaked out upon seeing a Seraph's image alongside theirs in the mirror, and thinks that maybe that's the origin for the stories of ghosts that appear in the mirrors.
* Tales of Zestiria, the Lord of Calamity, Heidalf, states that he shall let Sorey grow in his powers as a Shepherd until he becomes a shining light to the people of the world, only to then rip it from them.
* Tales of Zestiria, there's a scene early in the game where Sorey and Mikleo tickle each other in some ruins when they reconcile after a fight they had.
* Tales) or giving supporting EU characters like Mara Jade (pre-NJO) and Kyp Durron something to do without direct involvement of the principle cast as well. Others are unique characters invented for that particular book, but still manage to give the limelight to some aspect of the universe normally not shown in detail.
* Tales Out of Tallis, Rutger tries to manipulate the situation to get his brother Lammert executed, only to learn Lammert had outplayed him before Rutger even got started.
* Tales Out of Tallis Sir Bastien is trying very hard to be one, though Rien tends to make it extraordinarily difficult for him.
* TaleSpin (1990-1991) and its 1930s pulp adventure style was a high-flying, lighthearted brand of diesel.
* TaleSpin also had its share of mock archeological expeditions used as an excuse for treasure-hunting.
* TaleSpin, and we see him trying to fit into the tiny little desk and everything.
* TaleSpin and wound up an Anthro flying a plane and living in a city.
* TaleSpin, as they had to trick Rebecca into thinking there was something wrong with her hearing.
* TaleSpin. At the end, Rebecca is assuring him that she knew he'd come back and never doubted him for a moment, right before another pilot comes in asking about the job she had listed for Baloo's replacement.
* TaleSpin, Baloo and Kit collect cargo boxes from various locations around the world in order to beat Shere Khan's seven day record and win a lifetime work contract from the city. Among their locations are Italy, Greece, Egypt, India, New York, and San Francisco.
* TaleSpin, Baloo dramatically rescues Kit this way after he's been thrown off a pirate airship. Mind, the airship was several hundred (if not a thousand) feet in the air, and not only did Baloo snag him by his sweater a couple dozen feet before hitting the water, he did so from the cockpit of a plane moving at the speed of sound —so not only was Kit's descent instantly arrested, he was horizontally accelerated to Mach 1 in a split second.
* TaleSpin, Baloo is declared the heir to a rich family and inherits their fortune. The reason he is the sole heir is that all the others were killed by the cook and the butler in a scheme to inherit the fortune, but all their attempts on Baloo's life fail and the cook and the butler are arrested. So all live happily...except for the rest of the family members, who were murdered.
* TaleSpin, Baloo's pilot's license is suspended, so Rebecca keeps the business going by teaching herself to fly the Sea Duck from a book.
* TaleSpin, Baloo stays at a Thembrian penal colony which he has mistaken for a

fitness camp. He is frequently sent to what he calls a "solar powered sauna."
* TaleSpin, Baloo takes on an army of pandas in a fleet of hot air balloons armed with crude heat-seeking missiles by cramming his airplane full of ice cream (he had received large quantities of ice cream prior in the episode), causing the missiles to seek out the hot air in the pandas' balloons instead of the plane. This strategy, of course, meant he had to force the pandas to surrender or retreat before the ice cream melted.
* TaleSpin by preventing Don Karnage's Air Pirates from stealing the pyramid, which indirectly results in its being reinstalled on the original site rightside up.
* 'TaleSpin decided to dress in hot dog and pickle costumes to make money selling hot dogs at a parade. (Apparently, they didn't mind that at all; unfortunately, due to the villains' plan, they didn't manage to sell any.)
* TaleSpin, Don Carnage had the Iron Vulture, a massive flying carrier with rotors supporting it, able to launch and retrieve planes.
* TaleSpin: Downplayed. The Cape Suzette cliff gunners are generally able to keep out Don Karnage without any help from the protagonist, but once in a while the air pirates manage to get past them with some super weapon or trickery. The city's fighter squadrons are also brave and competent, but inevitably fail to stop anyone who gets past the Cliff guns due to overwhelming odds, leaving it to Baloo to save the day.
* TaleSpin episode "A Bad Reflection on You, Part 2" features a scene where Kit hides out in Don Karnage's dressing room. When Mad Dog enters the room, Kit dresses in Karnage's clothes and mimics Mad Dog's movements to avoid being noticed.
* TaleSpin episode "Bearly Alive", when Rebbecca got a call about a broken plane part. The guy on the other line said she should sit down, but she already was. The guy told her to stand up, and then sit down.
* TaleSpin episode, "Bringing Down Babyface". When Babyface Half-Nelson and his mother learn that the police have found their hideout, they fill it with dynamite and set it off before leaving. When Baloo takes a pair of police officers to the hideout, one of them lights a match, only to find out that it's filled with dynamite set to explode. The dynamite explodes with the three still inside the hideout.
* TaleSpin episode "Flight School Confidential" is revolved largely around Kit venturing to Thembria, with Baloo only getting a brief role in the opening and closing scenes. A couple of episodes also focus primarily on Rebecca and Molly's relationship.
* TaleSpin episode "In Search of Ancient Blunders", while Baloo, Wildcat, and Myra are trying to get out of the pyramid...
* TaleSpin episode, "On a Wing and a Bear", Baloo fails his pilot's test around the same time Shere Khan raises gas prices due to a fuel shortage he hired Don Karnage to stage. When Baloo returns to Higher to Higher, this exchange occurs between him and Rebecca:
* Talespin episode, "Pizza Pie in the Sky", the normally healthy and active Louie is severely allergic to anchovies. One whiff of the irregular anchovies that Baloo and Kit bring him is enough to make him ill and delusional.
* TaleSpin episode "Polly Wants a Treasure", Don Karnage gives a "Ma...Ma..." when a trap door opens beneath him, following his capture of Kit after Baloo discovers the cave's treasure. Baloo is of course able to catch Kit in time.
* TaleSpin episode "Stuck on You", Baloo and Don Karnage are stuck together by a very sticky glue. They had to work together to retrieve the solvent before the glue will set permanently.
* Talespin episode "The Bigger They Are, The Louder They Oink." She doesn't like it.
* TaleSpin episode "The Sound and the Furry", the subject comes up, but, lacking tar or feathers, engine grease and spoons are used instead.
* TaleSpin for rebelling at a Thembrian flying camp. Spigot is forced to take the task up after his bumbling is exposed.
* TaleSpin has Baloo encountering "Panda-La" a land of Asian stereotypical Panda bears who are secretly planning to invade Cape Suzette, although it is mentioned in

passing that other Panda populations despise them for their aggression. The episode was so heavily criticized because of its depiction of Asians that was taken out of syndication.
* TaleSpin has Molly asking Wildcat to describe snow. He picks up a bowling ball and says "You see this? Well, it's nothing like that."
* TaleSpin has Rebecca tell Baloo, "I'm going insane! And I'm taking you with me!".
* TaleSpin - Higher for Hire's business is suffering because its boss is female, so Baloo decides to enter an air scavenger hunt. In order to do so, he needs someone to sponsor him, but only an all-female aviation club will sponsor Higher for Hire, so he disguises himself as a lady.
* TaleSpin, Higher for Hire's resident mechanics and everyman, capable of fixing almost anything in minutes.
* TaleSpin: In "Bygones", Baloo takes Rick Sky, a pilot lost for 20 years, to where he and his men were together last, and they see them and their planes trapped inside an iceberg.
* TaleSpin: In "The Bigger They Are, The Louder They Oink", as part of her plan to retrive truffles from the Island of Zibaldo, Rebecca disguises a large ugly pig (not-so-affectionately named "Hogzilla" by Baloo) as a baby in order to get him past a security checkpoint that doesn't allow pigs.
* TaleSpin in the episode "Feminine Air" — Higher for Hire's business is suffering because its boss is female, so Baloo decides to enter an air scavenger hunt. In order to do so, he needs someone to sponsor him, but only an all-female aviation club will sponsor Higher for Hire, so he disguises himself as a lady.
* TaleSpin is having to go on a date with a woman who really likes him — but happens to be as fat as Baloo himself.
* TaleSpin is not only an excellent little buddy but also a great surrogate brother to Molly.
* TaleSpinIt gets worse; they even ban imagination, because imaginative people do not conform.
* TaleSpin. It is at this point that Baloo vows never to break another law, no matter how small... because it's too expensive.
* TaleSpin it. The difference being, in his mind, that when a pirate is the one doing the stealing and looting it becomes more dashing and romantic.
* TaleSpin". Just as they find their way out, they see the Iron Vulture above using strong cables to tote the entire pyramid out of the ground.
* TaleSpin, Kit's parents and Molly's father are never even mentioned. (Though seeing as how much of a bitch Rebecca can get, some fans think Molly's father most likely just left her.)
* TaleSpin — several thousand feet up — and uses the hook and his airfoil to hitch a ride behind a passing airplane. (His expression at one point suggests that if he has to put a grappling hook through Karnage, he just might.)
* TaleSpin, Molly casually says, "I hid in the mangoes" when she shows up on Baloo's plane while he and Kit are taking an unauthorized detour from delivering Rebecca's shipment of said mangoes to retrieve the jewel from Louie.
* TaleSpin Myra ("In Search of Ancient Blunders") and Katie Dodd ("For Whom the Bell Klangs") and spunky Princess Lotta Lamour ("The Road to Macadamia").
* TaleSpin of the largest guard. Also, the bad guy doesn't notice his feline guards replaced by two bears and a bird until it's too late.
* Talespin: On a couple occasions, Baloo engages the Sea Duck's autopilot so he can do stuff elsewhere in the plane. Said autopilot involves a piece of rope and a crowbar.
* TaleSpin: One of the Air Pirates never spoke out loud, only whispering into Don Karnage's ear. The pirate's name, ironically, was Gibber.
* Talespin: Panda-La can rise off the ground using giant balloons and fly through the air. This was done to suit its inhabitants' taste for conquest — when the pandas decided they wanted to take over a new land, they moved their city to their target location, subjugated it, and landed there until they set their eyes somewhere else.
* TaleSpin ran into these with alarming frequency, as befit the adventurer nature

of the series. The straightest example was probably the Idol of Doom, a small statuette that could cause calamities based on a specific couplet.
* TaleSpin, Rebecca and Baloo both forget about Wildcat (who went off to look for a bathroom) at the end of "The Balooest of the Bluebloods", an episode in which Baloo is revealed to be the inheritor of a huge estate. After dealing with a murderous butler and handmaid, the heroes go back home, leaving Wildcat wandering around the huge mansion, still looking for the bathroom.
* TaleSpin Rebecca look rather humble in comparison. Notable examples include when he gets an award for "Best Pilot In The World" as well as gaining a life debt from Shere Khan for saving his life.
* TaleSpin: Rebecca when captured by pygmies in "The Bigger They Are, the Louder They Oink".
* TaleSpin, since he's more interested in profit than anything of true malice.
* TaleSpin's Kit Cloudkicker. A name that, for all we know, he came up with himself. Anyway it's appropriate since he is known for "air surfing".
* TaleSpin's life, particularly where her mother Rebecca is concerned.
* TaleSpin. Some argue it's one of the best Disney animated series ever, as well as the one listed below.
* TaleSpin takes this seriously and spends most of the $20.00 Rebecca gives him on fast food, leaving him with only two cents. As a result, he is only able to afford the post office's 18th class service, which hasn't been used in 40 years, and takes ten weeks to deliver. When Baloo realizes his mistake, it's up to him to speed the mail delivery along so that the winning ticket can get delivered to Pazuza in time.
* TaleSpin that anyone believes Kitten capable of such carnage and damage.
* TaleSpin that whenever he isn't there to do the long term heavy lifting the operation tends to fall apart or at least come to a halt.
* TaleSpin. The characters were often in danger of crashing and unloading their cargo was sometimes the go-to response. This got them in trouble with their boss a few times.
* TaleSpin, the Iron Vulture. All attempts to counterattack are fried or disintegrated by this weapon. That is, until Baloo covers the fuselage of the Sea Duck in rubber and crashes his beloved plane against the weapon.
* TaleSpin. The missing step two seems to be "get brutally slaughtered by hostile natives".
* TaleSpin. Then there was Panda-La, a nation full of panda bears who were such blatant Asian stereotypes that the episode in which they appeared was eventually pulled from the lineup by Disney.
* TaleSpin the pig she brought to sniff the valuable fungus out. The biggest irony is, the natives seem to have plenty of truffles; they use them in the soup that Becky nearly becomes a part of.
* TaleSpin: There is little that Khan Industries does not produce and/or sell. This Mega Corp has got the tallest skyscraper in Cape Suzette and even has its own Navy and Air Force.
* TaleSpin, they are very comedic. Spigot is much more cruel than Dunder, but they both contrast with the much more threatening High Marshal.
* TaleSpin, though he wasn't married to Rebecca, and wasn't Kit's actual father.
* TaleSpin to fake a fuel shortage so he can raise gas prices. When his plan succeeds, Khan orders his assistant, McWhirtley, to send a telegram to Karnage congratulating him on the highjacking. When McWhirtley arrives at Karnage's hideout, Karnage asks McWhirtley if he will sing the telegram for him, and McWhirtley tells him he can't, as it doesn't even rhyme. Karnage then holds McWhirtley at swordpoint, telling him to make it rhyme and sing it, which McWhirtley does. At the end of the episode, when Khan's plan is foiled by Baloo, Khan orders McWhirtley to send Karnage another telegram. McWhirtley asks Khan if it should be a singing one, but Khan tells him, "Not this time". The telegram Khan has McWhirtley send Karnage is an explosive that explodes when Karnage opens the envelope.
* TaleSpin to someone else to settle a bill. Another he actually buys back the Sea Duck but gives it back out of guilt after Rebecca's business falls apart without

him, implying he is doomed to failure willingly or not.
* TaleSpin to the point of having dealings with criminals like pirates and gangsters.
* Talespin. Unfortunately, Wally underestimated Baloo, who managed to finagle Colonel Spigot into helping him get through the checkpoints before the bomb was discovered. Needless to say, the High Marshall actually being blown up is not part of Wally's plan.
* TaleSpin until the new owner unlocked his door with her own set of keys.
* TaleSpin was confirmed to be a wolf, but his species was never mentioned in the show. Some viewers called Karnage a fox or coyote, as he clearly looks like a canine.
* TaleSpin when Baloo and Louie were having a fight, Louie's monkey employees did this as a suggestion of how Louie should fight.
* TaleSpin: When Baloo recovers an idol from Colonel Spigot he trades it in for a 13 million torbit reward. He calls Rebecca, bragging that he's going to buy the Sea Duck back, while Louie figures out the exchange rate from torbits to shaboozis (Cape Suzette currency). Eight shaboozis worth of gas (plus ice cream tab, tax, and tip) wipes out the whole reward. Suddenly completely broke, Baloo is forced to do an immediate about-face, meekly telling Rebecca he'll be back to work tomorrow and asking if he can reverse charges on the call.
* TaleSpin. When he tries to put the new candy cane under Molly's pillow, Molly awakens and accuses Baloo of lying to her.
* TaleSpin with Rebecca Cunningham, the boss of Higher for Hire. While she has a rather shrill attitude and frequently manipulates or bullies Baloo and the others into following her schemes, she fails to have much intimidation over them or take much action against their own incompetent or obnoxious habits, leading her to come off more as a bossy friend than a domineering boss.
* Tales seems to catch everyone by surprise, only Karel and Rita seem genuinely surprised by his betrayal, whereas the more experienced Yuri and Judith seem to have anticipated his inevitable betrayal.
* Tales Series. Also known as the Sword of Time, it is capable of cleaving time and space itself.
* Tales Series, and a player's Grade total can be spent at a Grade Shop when starting a new game. These typically include bonuses a player can buy like increased experience gained, carrying over items, armor, and skills, as well as perks like more Grade and higher item capacity. A few of them also make the game more difficult, such as reducing experience earned. New Game Plus-only dungeons have become pretty common in the series as well.
* Tales Series, and he's treated like the old guy of the group, he could be anywhere from 16 to 34.
* Tales Series and/or a character having a very limited assortment of phrases they say when taking damage.
* Tales Series are vulnerable to a few status ailments, but can't be hit with instant death in the games that have it.
* Tales Series as a whole has a fairly narrow competence zone, usually between middle/late teens to early twenties. Most of the playable cast will fall between these ages (and good luck with any of the non-playable cast doing anything to help you save the world), although there are exceptions:
* Tales Series as a whole (mainly because so many games are released in such a small amount of time). Whether it's a genuine complaint or not is up to debate, but fans of the series don't tend to mind the similarly-styled games.
* Tales Series as villains, but their plots have the same narrative purpose.
* Tales Series by the healers, trying First Aid for a couple seconds and going "there's nothing I can do" or "they're too far gone." And then all the games have their own little quirks...
* Tales Series: Formal suits are a common type of costume available to the male party members.
* Tales Series games have, in addition to the usual selection of apples, bananas, etc., a pair of recurring fictional fruits called "kirima" and "amango".

* Tales Series have helped convince the party that the villain isn't the monster he was made out to be.
* Tales Series, if it's a monster and it's named after a real animal, don't expect it to look much like said animal. The most common example of this are the wolves, who aside from their canine body shape generally look more like reptiles then anything else.
* Tales Series is known to keep changing the summon designs from game to game while maintaining the basic image. Shiva is a blue-skinned icy lady, Ifrit is a horned fierce fire beast, Alexander is some winged machinery, etc. However, the details behind these descriptions change drastically.
* Tales Series is Tractor Beam, a non-elemental spell which lifts enemies and then drops them for damage.
* Tales Series kicks in when you realize that spells like Maelstrom, Spread, Aqua Laser, and Tidal Wave, traditional water aligned spells, are now in the same class as "Holy" spells. Thus, this means that you are literally killing the forces of darkness by splashing them to death - or if you prefer, washing away their evil.
* Tales Series: Many spells throughout the series, like Burn Strike, Meteor Storm, and Indignation, come down from the sky.
* Tales Series moments with two characters but doesn't get together with either of them.
* Tales Series. Monsters that are purely palette swaps are most common in the games that utilize sprite based graphics, while the 3D games usually change their model a little, as well.
* Tales Series, of all things, called Derris-Kharlan, that is apparently a source of mana. And somehow these aliens are cross-fertile with humans.
* Tales Series" route when it comes to its Jack-of-All-Stats characters.
* Tales Series. They combine bizillions of tropes with some well-calculated unexpected twists and/or original ways of presenting those tropes. And, ironically, thanks to that they manage to pull off some great, hard-to-forget stories. In other words, in Namco Tales Studio know very well what they're doing.
* Tales Series, where you will end up repeatedly fighting these bosses called the Six-God-Generals throughout the game, and they get stronger each time.
* Tales this stuff? It takes an adult watching some scenes to notice some of these themes...or actually be familiar with the cliches being deconstructed.
* Tales to Behold has frequent guest appearances by Burst Lion, Ionic Angel, Ultimate Power, Cassandra, and Rockslab, all of whom were created by fans of the series.
* Tales to Behold, has the ability to transform herself into an antropomorphic cat girl.
* Tales To Give You Goosebumps collection, the short story "Broken Dolls" features an old woman who turns people into dolls with "dolly jelly".
* Tales Told by Idiots attempts to flee at the end of the show this way. Nothing happens when he throws the smoke bomb, leading the other characters (and the audience) to stare at him for a few seconds, until he says, "If you'll excuse me, I have to go return some smoke bombs," and sheepishly walks away.
* Talia Al Ghul after giving birth to Damian Wayne is still badass enough to brandish a handgun and wear a sexy catsuit or have
* Talia al Ghul for Batman. Whenever her daddy and her beau fight, she refuses to take a side. The best she'll do is prevent Batman from actually capturing and imprisoning Ra's after winning said fight. Probably justified, as they are her father and the man she professes to love, which would make choosing a side somewhat awkward.
* Talia al-Ghul is depicted as a teenager in this version. Robin flirts with her in her first appearance, but she shoots him down. In her next, she frees Batman from a
* Talia al-Ghul is one of Batman's more long-term and complicated relationships. She often fluctuates between ally and enemy as Batman and her father, Ra's al-Ghul, battle one another. For her guest appearances in
* Talia al Ghul, Ra's Al Ghul, Hugo Strange, Clayface (possibly), and even the

Joker bite the bullet in
* Talia al Ghul, similar to Catwoman, is an on-again, off-again lover of Batman who is a sometimes a hero and sometimes a villain, and occasionally wears purple as the primary color of her costume.
* Talia al Ghul takes the cake, on one instance trying to utterly destroy Batman, kill his "family" and ruin everything he'd ever worked for... because he wasn't paying attention to her.
* Talia al Ghul tend to conflict with her loyalty to him. In more modern comics Talia has often been depicted just as much a ruthless parent to her son Damian as Ra's was to her.
* Talia and Kris did the same to fool possible spies during their diplomatic mission to Hardorn in
* Tali actually does hit with this to some extent in both sequels. While Garrus is recruited early on in all three games, Tali only joins forces with Shepard early on in the original. In both parts two (barring a borderline cameo) and three she does not show up until sometime through the halfway point, long after significant chunks of the story have come up.
* Talia in the Kitchen: A teen sitcom about the title character and her family and friends helping out with her grandmother's restaurant.
* Tali also has a tendency to talk very quickly when she's nervous which she describes as being a defensive mechanism. If the player decided to pursue her romantically, her flustered, rapid-fire delivery is made very apparent and she acknowledges this as being a defense mechanism in the moments that
* Tali also seems to have a touch of xenophilia; she's a viable love interest for a male Shepard, and if you don't hook up with her, she'll eventually end up in a relationship with Garrus, and during the Citadel DLC she's willing to entertain the possibility of a threesome with herself, female!Shepard, and Garrus. She also notes that an in-universe movie called
* Taliana Martinez from the same game, picked up in a random encounter, is a
* Tali and Ashley discuss this in the first game. Ashley mentions how long it took human women to prove they could handle shotguns, with Tali replying that the Flotilla can't afford the "luxury of sexism".
* Talia of Sensholding gets it even worse some centuries later. The Holderfolk along the border mistrust and dislike the Heralds to begin with, and do not appreciate people
* Talia's people consider their children adult as early as 13, and with the sort of upbringing she received, she's already something of a "miniature adult" when (at said 13) chosen for a Herald.
* Talia starts giving advice to her Queen when she is only 13. It's implied that her
* Talia, who turns into the very image of a succubus when exposed to the Fire Boss's essence—although again, there's nothing to imply she actually becomes one.
* Talia Winters and Susan Ivanova argued on what to do with a teenage thief who just awakened with Telepathic abilities; Talia wanted the teenager to join the Psicorps, and Susan wanted to have her go through the justice system. Dr. Stephen Franklin intervened, saying that since the teenager is unconscious, she is in medical care, and both of them should leave as they could be disturbing the patient.
* Talia Winters developed telekinesis when her telepathic abilities were enhanced. Other "Teeks" are
* Taliban Dan picking and choosing biblical text to follow, using that as an example.
* Tali, but in that case, the topic that's driven her to drink is a bit different.) And then, assuming you have "From Ashes", she drunk-dials a less-than-amused Javik and becomes convinced he has a crush on Liara.
* Tali calls out an infamous forum thread that tried to scientifically determine what her sweat smells like.
* Tali class can also be engineer, giving you numerous technical skills, though you

still mostly use them to blow stuff up. There are 2 main indicators which show just how brilliant Tali is at her job:
* Tali dies this way, too, if you fail to establish peace between the geth and quarians, and side with the geth in the resulting battle — the quarian fleet is wiped out
* Taliesin Jaffe and Mica Burton guest star in several episodes as dwarven fighter Keg and aasimar druid Reani, respectively. And like their players, they are also bisexual. AF Flowers from the Monsterhearts one shot and their player A. G. Beardsley (credited on the show as Ally Beardsley)'s pronouns are both they/them. (Beardsley is non-binary).
* Taliesin Jaffe. He even got K.T. Gray (the English voice actress for Seras) to say the famous "Bitches love cannons" line in the commentary for Episode IX.
* Tali-Ihantala 1944. and been stored in Parola Tank Museum, Finland, and restored back to working condition by volunteer enthusiasts.
* Tali is a rather notable example in that she was willing to do nearly anything for the Migrant Fleet, despite them frequently making stupid decisions that put her in stressful situations, such as when she's accused of treason. This is more evident in the third game after
* Tali is one of the best engineers from her species. Her race, the quarians, are considered the most expert of all the species in the game at engineering. It's their biggest
* Tali. Kaiden is a lesser example- he's very idealistic, but he's also a military officer who's seen some very bad things and knows firsthand that the galaxy is not a nice place.
* Talion: Revenant: At the end once he's defeated the villains and thrwarted the Hamisian plot, Nolan rides away with Morai to have another adventure.
* Talion: Revenant because she's a "demon twin" (i.e. second born identical twin).
* Talion: Revenant: Chi'gandir, who used magic to change people's shapes and then extorts them for reversing it.
* Talion: Revenant: Countess Jamila, who's half Stelosian (a black African counterpart) and Marana (who was born to a people which seems to be equivalent to Berbers or Arabs). All of the rest come from European counterparts. A few more Stelosians also appear: the ambassador to Hamis and bodyguards of his (Jamila's father had been the previous Stelosian ambassador). Jamila also has a young son with her Hamisian husband.
* Talion: Revenant: Despite chasing him all throughout the book (and before its events) for banditry, Nolan lets off Morai in the end, grateful due to his help with exposing the Hamisian plot. Plus Morai's simply just that charming, even Nolan comes to like him.
* Talion: Revenant: Finding the bodies of a family murdered by bandits triggers Nolan's memories of his own relatives being murdered, which causes him nightmares about it.
* Talion: Revenant: The Temuri are a clan-based, tribal society with frequent wars between them. However, customs have been established to limit the wars by the central government so they don't grow too vicious.
* Talion scheme. After killing him, Teal'c reveals that while he may have ordered it, he was far too cowardly to do it himself. He killed the actual assassin years ago.
* Talion will call the orcs by (first) name during Death Threat missions. Some orcs do this as well, but due to the massive amount of randomly generated names, dialogue apart from the name is more limited.
* Talisa is dark haired and is a highly competent nurse and fully capable of engaging Robb in a debate.
* Talisa looks very good for someone who's introduced having to amputate a foot. Despite likely being in such situations frequently, she's never covered in too much blood and her hair is only lightly tousled.
* Talisa Maegyr is shown to clean up nicely, without all the blood and gore that is.
* Talisa Maegyr works as a field medic in Robb Stark's army. Even after he marries

her and makes her his queen, she goes right back to her job tending to wounded soldiers despite having no obligation to do so.
* Talisa to an extent. She is a kind and intelligent woman, a skilled medic and a loving wife to Robb, but she's generally seen and remembered by people as a "foreign whore" who seduced their king and lost them the war. Although Robb and Talisa's marriage was a
* Tali, she spends the first couple of conversations stammering like a kid.
* Talislanta—in the course of adapting to a ground-based life) and the Muses (who have pretty butterfly wings, but can't stay aloft for very long).
* Talislanta, a calendar year consists of seven months, each month lasting for seven weeks of seven days. Talislanta has seven moons, so it makes a certain degree of sense.
* Talislanta a husky non-Danuvian warrior husband, whose physical prowess and military background give them something in common to talk about. Thus, these warrior-women fulfill both sides of this trope simultaneously, where tastes in men are concerned.
* Talislanta are silver-gray, six-fingered, and flat-faced. Additionally, both races are hairless and closer to the short end of average human height.
* Talislanta as "humans". The fact that some of those "human" nationalities lie well outside the range of physical types known on Earth — green humans, metallic golden humans, purple humans; humans with bat ears or webbed hands or no nose — would make the use of "human" seem incongruous at best.
* Talislanta, both Aaman and Rajinistan are particularly unpleasant theocracies.
* Talislanta features the Revenants, a widely-feared cult of assassins whom the Arimites hire to enact vengeance on each other, up to and including murder. So pervasive is their influence that the ruler of Arim cannot leave the palace for fear of being assassinated.
* Talislanta game, the Xambrian wizard-hunters are a Racial Remnant of a culture that was wiped out by evil sorcerers. The few survivors' descendants spend their entire lived tracking down and executing the ever-reincarnating culprits, over and over again.
* Talislanta give off pheromones that are just this side of mind control. Luckily, not only are most Batrean women nice people, but the pheromones can be countered by wearing nose plugs.
* Talislanta has Cymril, one of the Seven Kingdoms, and the city-state of Phantas.
* Talislanta has Disembodied Spirits, which are stereotypical Ghosts, and Reincarntors, which are the spirits of dead Torquaran wizards who possess mortals.
* Talislanta has the Axe-Head, Durge, Erd, Rictus, and Urthrax, all with six legs.
* Talislanta has the Crag Spider and the Vasp, both of which use webs to trap their prey.
* Talislanta has the Crag Spider, which is 15' long, 300+ pounds, and has 12 legs.
* Talislanta has the False Shelter Trees, Mandragores, Mantraps, Scarlet Sporozoids, Serpentvines, and Stranglevines.
* Talislanta has the Land Kra, a subterranean eel that may exceed 40' in length and weigh up to five tons.
* Talislanta has the Parthenians, an ancient seafaring "race" of automatons that have their own society.
* Talislanta has "Trivarian", a game so complex that it can only be played by people with two brains.
* Talislanta: Kharakhan Giants stand 12' tall and weigh upwards of a thousand pounds. There are only a few hundred left of them on the continent, and they're on the verge of Extinction.
* Talislanta, native insect-folk include the aggressive "sniper bugs" and nomadic "caravan bugs". These Bugs Are Different in that they're the size of ordinary insects, and are included more for exotic flavor than as potential opponents ... although the former are feuding with the pixie-like (and equally small) whisps, and the latter will trade tiny samples of rare plants for minute amounts of food.
* Talislanta. Once prosperous, a series of mishaps led them into ruin, and now they mainly survive by selling ogront dung. The rest of the continent considers them

cursed.
* Talislanta. Other forms of sex slavery exist as well - Thaecians and Sawilans are preyed upon by slavers for that reason, for instance.
* Talislanta plays this one fairly straight, with giant sand eels and duneships. Land barges, yet another type of wheeled ship, are a partial subversion, as they're used on flat steppes as well as sand.
* Talislanta revive, did so in mute, undead bodies. Now, these Black Savants work endlessly to locate the lost souls of their people and bring Khazad back from the dead. Oh, and creep out other Talislantans.
* Talislanta role-playing game, foreign male warriors are invited to parade themselves and compete in athletic events once a year. The highest-grade beefcake is claimed for her harem by Danuvia's queen, while her Amazon warriors bid for the companionship of the runner-ups.
* Talislanta RPG allows players to become (among other things) any one of several types of intolerant cleric. Although few have any spellcasting abilities, these classes are interesting in that they are the only characters that come with the "torture" skill.
* Talislanta: Striders — similar to riding birds, but scaly and butt-ugly — are used as mounts by the Kang, and their smaller, feistier cousins, marsh striders, by the Jhangarans.
* Talislanta: The Aeriad, Ferrans, Gryphs, Imrians, Jaka, Saurans, and Stryx are Intelligent Gerbil songbirds, rats, hawks, fish, panthers, lizards, and vultures, respectively.
* Talislanta. The Rajans and the Aamanians are known for their use of torture as well.
* Talislanta use plant-based technologies, including the barge-forts of the Green Aeriads (with live viridia trees for masts) and the d'oko lily plants used as houses by the Green Men.
* Talislanta uses this trope with Cartomancy, Cryptomancy, Crystalomancy and Necromancy, although all of these do include some divinatory effects. It averts it with its other Orders of magic, such as Mysticism or Invocation.
* Talisman Adventures: The Fantasy Role Playing Game for it's 35th anniversary.
* Talisman: A fantasy RPG-themed board game originally published by Games Workshop.
* Talisman and who cannot attack other characters of good alignment, and the Chivalric Knight, who can aid rival characters in battle and cannot attack another character whose strength value is less than his own.
* Talisman, but with dice and boards. This led to a network of overlapping and shifting rules, and nobody's sure which rules take precedence, which leads to a Calvinball-like experience.
* Talisman expansion uses the Day/Night game mechanic to incorporate this trope. The players have a number of in-game days (varying according to the number of players) to cooperate in order to ensure that a player reaches the Crown of Command. If they manage to do so before time runs out, every player wins. However if no one has reached the Crown before night falls on the final day, everyone loses.
* Talisman: Getting cursed by the Poltergeist to only move one space per turn instead of a random d6 roll can have a lot of benefits. It allows you to hop on and off a beneficial space and get the rewards every other turn.
* Talisman has a large number of playable characters for a board game. With all of the expansions released so far, the current edition includes: Elf, Dwarf, Priest, Warrior, Thief, Troll, Ghoul, Monk, Wizard, Sorceress, Minstrel, Druid, Assassin, Prophetess, Highlander, Valkyrie, Cleric, Rogue, Swashbuckler, Vampiress, Knight, Dread Knight, Chivalric Knight, Merchant, Alchemist, Sprite, Warlock, Sage, Philosopher, Gladiator, Magus, Gypsy, Amazon, and Necromancer.
* Talisman has several things that can temporarily turn the player into a frog, at which point he loses all his equipment and companions and is almost helpless for a couple of turns.
* Talisman of Death, you can have the misfortune of encountering Damohl, a son of the god Nil, Mouth of the Void. This serpentine chimeric abomination is immune to

anything you have and will automatically kill you. Otherwise any other gross supernatural thing can be killed in this book.
* Talisman of Death: You must obtain the Dragonslayer spear (described as a weapon with an ebony shaft and ivory tip) to defeat the final boss, a Red Dragon proud of tricks.
* Talismans work against some types of vampires but not others, and depend on the faith of the wielder. Harry, whose faith is in magic itself, uses his pentacle amulet to great effect.
* Talisman: The aptly named Grave Robber character has a special ability that allows him to encounter the top card on the discard pile instead of drawing a card for their space as normal. This presumably represents the character digging up graves for their treasure, though interestingly enough the power lets them encounter any type of card, including events, places, and previously killed enemies. The character can rob graves in a more traditional sense by visiting the graveyard space, which allows them to take one item of their choice from the top 8 cards in the adventure deck.
* Talisman: The highly random nature of the game and the many pitfalls that can befall a particular character (death, losing all items/followers, reductions in stats, and random teleportation), some games can run several hours long before a player wins. The game manual even suggests alternate rules for determining who the winner is at the end of a set time limit for players who want to avoid this.
* Talisman: The Mercenary is a particularly useful follower if you have the gold to burn. He will add 3 to your strength on combat, but only if you pay him a gold. He also costs 3 gold to hire.
* Talisman: The Necromancer player character has the ability to enslave defeated enemy spirits (which include ghosts, mummies, demons, and most other types of undead) instead of killing them. Enslaved enemy spirits add their craft to the Necromancer's in psychic combat, and while each spirit can only be used once before being discarded there is no limit to how many the player can amass during the game.
* Talisman, which has 84 different recruitable characters in the original, and as many twice more in two standalone expansions.
* Tali won their last big competition, and is pretty confident about her chances in this one, much to Garrus's annoyance.
* Tali'Zorah has a habit of wringing her hands when nervous. Also, quarians in general (if Veetor is any indication) seem to have a habit of bouncing on their toes when idle.
* Tali'Zorah says this verbatim to Admiral Xen while on the Migrant Fleet.
* Tali'Zorah's helmet (and all Quarian suits for that matter) has a light that flashes in sync with her speech. Justified in that Quarian helmets obscure the face and as they wear them near-constantly it would make group conversations highly confusing.
* Tali'Zorah. When you meet up with her again in the third game she's much more confident and this trope becomes averted.
* Tali'Zorah, who's part of an alien race called the quarians. Quarians are the whole race of incredibly skilled engineers. And even among the quarians, she is counted one of the best engineers and geth specialists.
* talk about her with dread in their voices was playing. There's something decidedly off-putting about her smiling, serene demeanor, especially when she's completely ignoring the wishes of others and deciding what's "best" for them regardless of their input.
* Talk About That Thing: A character needs to speak to another privately, so she makes up a reason why they both need to leave.
* talk about the size of different toy balls. Then Shola grins and says, "I heard that noise," having realized it was an effect and not an actual crash. Frank Oz covers up Bert by saying, "Me too" and the short ends before Shola can give the game away.
* talk about things he should not know if he wasn't the killer. To hammer this home, pressing someone in court is not an option that is suggested until the second case. Even the other first case villains aren't as obvious as this guy is. In

addition, he turns out to be a mere burglar who killed the victim to hide his tracks, as opposed to the more personal and/or grandiose motivations of the later culprits.
* Talk about vampires causes Susan to reflexively use her weapon-summoning spell; when Ellen and Nanase react, Susan flatly denies having summoned the
* talk about Wander and Hater's reckless actions in one continuous sentence.
* Talkartoon and Bimbo both get scared and have their monochromatic colors inverted.
* Talkartoons short "The Herring Murder Case", Bimbo looks in his detective book and reads a passage saying that the killer always returns to the scene of the crime, which gives him the idea to hide in the room and wait for the killer to come in so he can capture him.
* Talkartoons to further obstruct his view. He ends up cutting it off so he can see.
* Talkboy was originally conceived as a non-working prop for the film, one letter-writing campaign from 1990s kids later and it was Defictionalized by Tiger Electronics. It sold well enough that several variants were created.
* talked about and would more likely shatter from a gunshot instead of spark.
* "Talk" has the main band landing their '50s UFO-style spaceship on a seemingly desolate planet, finding a giant robot and activating it, after which it starts following them until they reach a mountain with a hole carved to fit the robot's contour. The video ends with the band returning to their spaceship and bidding the robot farewell as he sets himself inside the mountain's carved-out hole, but as he finds out one of the switches on his chest is stolen by one of the band members, he captures the spaceship in mid-flight and takes a bite out of it,
* talk her way, grabbing Elliot, and fleeing. This would have likely worked if Hedge had been an ordinary human.
* Talkin' 'bout Your Generation, and their celebrity guests, in an attempt to determine the superior generation.
* Talkin' 'bout Your Generation anyway; the only real stakes are bragging rights.
* Talkin' 'bout Your Generation is Shaun Micallef quoting some 'facts' about the topic at hand he claims he got from Wikipedia, all of which are hilarously wrong.
* Talkin' 'bout Your Generation was about "gluing together a Ming vase you've smashed before your parents get home"... although Shaun actually did it by pushing each vase off a pedestal, and Gen X's vase barely chipped, so he threw it on the floor.
* Talking about Chinese and Japanese, Chinese hanzi and kanji use the same symbols, but are often pronounced and can mean quite different things. For example, 大丈夫 is "daijoubu" in Japanese and means "alright" while in Chinese it is "da zhang fu" and means "true man" or "great husband". It is common for native speakers to start reading the characters in their native language before the brain kicks in and realises they're using the wrong pronunciation. Some hanzi and kanji also look very similar but have minor yet significant differences, such that accidentally writing it the way one used to might not give the right result in the other language.
* talking about going back to the point and click adventure genre after so many years.
* talking about how super awesome she was--even those who had never met her before the fandom rejoiced. She's still in the books, but now they're focusing more on her job as a crime scene investigator, where more of an assignable personality can surface.
* Talking about the Chaos Daemons wave released in August 2010, one month before the 8th edition of the main rulebook already had pictures of the other models in that wave (Pink Horrors, The Changeling, Kairos Fateweaver, Seekers of Slaanesh and Khorne Bloodcrushers)
* Talking about the doom they going to cause, their evil plan, their ego or something else is the staple of villains in
* talking about their past without explicit dialogue, exaggerating the stories they remember.

* Talking about the Lambda Driver, episode 12 shows what happens if you think of Takuma as a harmless kid. Hint: it involves a 50-meter-tall mecha and Tokyo.
* talking about the yuki-onna after being warned to never speak of her (despite the only person he told was his wife who was.
* Talking Animal is essentially this. Although they retain some animal like mannerisms (Dudley, a dog, has a superhuman sense of smell and an unfortunate habit of chewing his own butt, and his partner Kitty loses all self-control and star whenever she sees a mouse or a ball of string
* Talking Animal mascot admits that he took their pants as a stunt promoting loaded sundaes. Then, an elderly woman enters also without pants, announces that she's meeting friends to play mahjong, and leaves the house.
* Talking Animal Vilu Daskar, uses a particularly nasty variation on this as a punishment for theft aboard his ship; the perpetrators are strung upside-down from the mast, given twenty lashes, have their wounds washed with seawater, and cut down after several hours.
* Talking Animal: Virtually omnipresent. Sometimes justified; usually not.
* Talking Appliance Sidekick — A sidekick who is a usually inanimate object.
* Talking Bird. They live on what looks like a tropical island and is a monarchy, but the food Choi prepares in episode nine looks suspiciously Vietnamese.
* Talking Candy Bar Blues who falls prey to this trope set to some light musical accompaniment.
* Talking Cat Turf War", features a cowering tuxedo cat at the mercy of a hostile tabby cat.
* "talking" chimpanzees short) featured two chimps as removal men trying to push a piano upstairs.
* Talking Classics is presented as a documentary about a video game nerd named Keith Apicary.
* Talking Down the Suicidal: A character tells someone not to kill themselves.
* Talking Down the Suicidal: Don't kill yourself. Things will get better.
* Talking Heads' "And She Was" uses cut-out animation to create a trippy, pseudo-photorealistic look. "Road To Nowhere" utilises stop-motion animation for a number of bizarre sequences.
* Talking Heads at around the same time as when he was collaborating with the above-mentioned Bowie in the late 1970's.
* Talking Heads, born in Scotland but living in the U.S. since childhood, became a U.S. citizen in 2012, citing the ability to vote in elections as his primary motivation for doing so.
* Talking Heads (both the film and the soundtrack album) was a picture of David Byrne in the iconic big, white suit—but with his head out of frame.
* Talking Heads' cover of "Take Me to the River", by Al Green and Mabon Hodges. Also covered by The Woodshed, The Radiators, Ratdog, Grateful Dead, God Johnson, Escape Goat, Diesel Dog, Day By The River, Bockmans Euphio, Annie Lennox, Max on the Rox, Dave Matthews Band, Bryan Ferry, Mana, that funny singing fish that also does "Don't Worry, Be Happy", and others. It's a popular song.
* Talking Heads has "Life During Wartime", "Walk It Down", and "Girlfriend Is Better", which all sound very much alike.
* Talking Heads) is all about love messing with your head and causing bad decisions.
* Talking Heads, is a particularly paranoid example. It could be a metaphor, but if taken literally, then it's from the point of view of a someone convinced that perfectly ordinary air "can hurt you, too".
* Talking Heads is difficult to describe in a single phrase, encompassing elements of punk, funk, art rock, country, glam rock, afrobeat, ambient music, pop, electronic music, and advant-garde. And the thing is, you couldn't pin down any one song to a single precise genre; they all so carefully blended several disparate genres that they sounded like a unique entity.
* Talking Heads lived in Memphis, Tenessee while "the ancient Greeks" were of course in Memphis, Greece.
* Talking Heads music video "Once in a Lifetime", David Byrne's dance is about

halfway between a marionette and an epileptic fit.
* Talking Heads of Joy Division's gloomier material. (And, reportedly, the Heads were a bit disappointed when they finally listened to Joy Division for real.)
* Talking Heads song "Psycho Killer" is sung from the point of view of the Son of Sam killer.
* Talking Heads song "Totally Nude" is about a person who willingly leaves modern society to live as a wild man in the forest.
* Talking Heads; specifically began as an "art punk" outfit and continued to feature punk as a heavy element in their sound up until the mid-80's)
* Talking Heads that simply consisted of him (and only him; none of his bandmates were present) doing a pigeon dance and gawking at a whiskey can to the tune of "Girlfriend is Better". It's about as "David Byrne" as a commercial starring David Byrne could get.
* Talking Heads' three Top 40 hits does not include "Psycho Killer" (#92), "Once in a Lifetime" (#103, though a live version later peaked at #91), or "This Must Be the Place (Naive Melody)" (#62). They were the still-iconic "Burning Down the House", their not-as-memorable cover of "Take Me to the River", and the largely-forgotten "Wild Wild Life".
* Talking Heads to be spectacular. This was intentional however as he did not want to rely on special effects to tell what really happened, which makes all of his documentaries all the more informative.
* Talking Heads. "You may find yourself... living in a shotgun shack..."
* Talking Is a Free Action: Another common staple of comics is for characters to be in impending danger and still have time to talk about a bunch of stuff before getting out of harm's way or falling victim to the disaster that threatens them.
* Talking Is a Free Action: In fiction, characters who are in danger somehow have the time to say anything before they get out of harm's way or fall victim to the whatever imminent danger they are in.
* Talking Is a Free Action, it is. Because not being able to talk strategy or tell people what you're doing would be a real pain to work around, you can just talk during combat without interrupting anything.
* Talking Is a Free Action: Well, singing is. You often find lengthy arias in dramatic moments along the lines of "Yes, now we must quickly run away, silently, before anyone spots us, yes, softly, let us run…"
* talking is not his strong suit at all. Thus even when not teaming with Davey Richards he usually doesn't go long without some kind of second.
* Talking Kitty Cat. The main star of this series is Sylvester, but he is also joined by a few other talking cats that his owner has.
* Talking Kitty series showcases its main character, Sylvester, who'd rather have the house to himself. He once threatened to cut the dog's neck and attempted to force two other cats out by getting the landlord to evict the family!
* talking!) less than 24 hours later at the battle of Gettysburg, earning himself a well-deserved Medal of Honor.
* Talking like... THIS... to imitate... William Shat... ner's... acting style.
* talking lion") but almost imperceptibly, one of his bandmates actually agrees with the mom, and is excited about those snack choices.
* talking louder when not on stage. In choirs, since altos are low, they often need to project their voices in order to be heard, especially if there are some loud sopranos who are already projecting their voices at the same time.
* Talking of Hephaestus and Zeus, there's also the story of Kyôn Khryseos, the Golden Hound. One myth explains that Kyôn Khryseos is one of the many creations of Hephaestus. However, the main point of fame for the Hound is that it guarded Zeus when he was a young boy growing up. As the above entry elaborates, Hephaestus is either Zeus's son or Zeus's wife's son, so this
* Talking on the phone without comfort noise usually results in a "hey, are you still there?" after nearly every sentence. This is noticeable particularly in VoIP programs with automatic voice activation, and button activation to a lesser extent. When the participants aren't speaking and the program isn't transmitting anything, the lack of any environmental noise makes it hard to tell who is present without

visual cues. This is part of the reason for sound bites used to signal when a user connects or disconnects from a channel because adding background noise might be annoying during long conversations.
* talking patch of skin that sounded like a falsetto Bill Bailey, and attempted to urge the woman in the advert to give it "just one little scratch", which the woman did, but eventually screaming "Aaah! Not Eumavate!" when the cream was applied.
* talking possessed tree is "It'll make you dead if you keep up the puns."
* talking rhino charge the White Witch's polar-bear-drawn chariot, mowing down her right-hand minotaur in the process, in order to protect Peter. And it's awesome. Unusually for this trope, the rhino doesn't make it to his goal and is killed halfway.
* talking so much and so fast that she forgets to breathe in the process. In Act VI chapter 19, she seemingly hallucinates four copies of herself while taking a bath.
* talking sword Chaz can kill pretty much anything with a single swing. Even a scratch will suffice in most instances. The Demon King of the Dimension of Pain managed to survive getting scratched, but was still permanently crippled. The only limitation is that Chaz only has this power after bathing in the blood of the innocent.
* talking sword is able to kill just about any supernatural creature in a single strike, but it has to feed on the blood of the innocent to pull this off. Torg, being a good person himself, is naturally against the idea of using the obvious sources of such a commodity.
* Talking the Monster to Death: Defeating the enemy by talking to them.
* Talking the Monster to Death: Defeating the enemy simply by talking to them.
* Talking the Monster to Death makes Mr. Bickles seem like a stupid selfish baby.
* Talking to a Spathi ship (other than Fwiffo's) before allying with them will reveal that the Spathi consider humans to be ugly, though they don't make as big a deal about it.
* Talking to certain beastwomen in various towns around the world will have them comment on
* Talking to Dragons, the main characters travel through the Caves of Chance, a large network of caves with peculiar properties. They are pursued throughout by a creepy, sapient, jelly-like lifeform called a "quozzel," which at one point causes a cave-in trying to kill them all.
* Talking to Dragons turns people to stone, including Shiara. Daystar kisses her; she gets better.
* talking to Dr. Upton about his daughter. The comic provides a nice visual metaphor for what he's doing.
* Talking to Himself: An animated work has multiple characters who are voiced by the same actor and who interact with each other.
* Talking to Himself: A voice actor voices more than one character and their characters interact with one another.
* Talking to Himself: Most series have several characters voiced by the same voice actor because they tend to be made by only a handful of people.
* Talking to Himself: Out of necessity in trying to depict a variety of characters by yourself
* Talking to Himself: Two (or more) characters voiced by the same voice actor, in a conversation with each other.
* Talking to Himself: Two or more characters who interact with each other are voiced by the same actor.
* Talking to Himself: Two or more characters who interact with each other have the same voice actor.
* Talking Tom and Friends, Ginger and Angela do this at a costume party dressed as a Carmen Miranda lookalike with Ginger on Angela’s shoulders.
* Talking to Plants: Gardners talk to their plants out of habit or to make them grow better.
* Talking to the Dead: A one-sided conversation with a deceased loved one, often at the site of their grave and often about important issues that stayed unresolved while the loved one was alive.

* Talking to the Dead: Some Ancient Egyptians wrote letters to the dead — occasionally along the lines of threatening a lawsuit if they didn't stop sending phantoms to torment the living.
* Talking to the Dead: Talking to the dead while visiting their graves.
* Talking to Themself, but switched between Ruby and Sapphire's style of speaking as each gave different reactions to what they saw.
* Talking to the sister currently running the restaurant a the Three Sisters Inn allows the player to buy food. When it's
* talking to the snowglobe that contains a statue of his late wife, begging for forgiveness. Sad version of this trope. The comics reveal that in college the two spent much of their courtship outside in the snow.
* Talking to your Significant Other often enough on the phone that you have to fight against reflexively saying "love you, bye" when ending business calls.
* Talking Weapon mentions Oghma's talking sword Orna, formerly owned by the Fomor king Tethra, which, when taken out of its sheath, tells every deed that has been done with it.
* Talking Weapon. When donating mana to a manablade turns out to be a more delicate operation than she realized, Ferdinand is called over to make sure she didn't mess things up and uses his own mana to examine it. The combination of Rozemyne and Ferdinand's contributions result in a weapon that speaks with Ferdinand's voice.
* Talking while wearing a dental retainer can often cause this, especially if the retainer is new and you're not used to it yet.
* Talking with Signs: A character communicates using signs rather than by speaking.
* talking with their mouths full. Bloody Americans, coming over here, polluting British children with their mouth-full-talking ways!
* Talking Your Way Out: The hero is caught by the villains, but manages to use smooth talking to get away.
* Talkin' Toons with Rob Paulsen sing an improvised birthday song for a fan. Rob was apparently not aware the song was copyrighted.
* ''Talkin' To the Moon''...pretending the moon is his once significant other.
* Talk is this for fans of their '70s work since only the last 2 tracks really try to get the "classic sound".
* Talk Like a Pirate: Arrr, this is when ye talk like ye been sailin' the seven seas in search of plunder!
* Talk Like a Pirate Day. This is presumably a coincidence, unless Rowling just liked the idea of giving a silly birthday to her most serious main character.
* Talk Like a Pirate. How pronounced it is depends on the medium, in some they grunt, yell and use the occasional human loanword, in others they're perfectly able to hold conversations with humans (admittedly, these conversations consist mostly of threats and insults).
* Talk Like a Pirate: Pirates are usually heard speaking with very thick Southwest English accents.
* Talk Like a Pirate: Pirates use expressions like "Arrr!", "Shiver me timbers", "ye", "me hearties", and "be" in the place of "is".
* talk like Tonto who are mercilessly slaughtered by the brutish white man. It's difficult at times to ascertain which is more offensive.
* Talk of the Nation bent over his desk at the type writer is likely Ditko referencing Stan tirelessly writing out scripts for his comic.
* Talk of the Nation that the character was designed as a grouchier caricature of himself, and also said that he would have jumped on the opportunity to portray him in a movie.
* Talk of the Town, when it's used repeatedly for transitions, exposition, and montage. Spinning papers appear when Leopold Dilg (wrongfully accused of arson and murder) escapes, after he's caught, and when he's freed.
* Talk of the Town), who was blowing the whistle about unsafe mill conditions.
* Talk Radar put together a six hour long podcast that was half original content, half clip-show.
* Talk Radio, Barry Champlain takes a call from a listener who tells him, "My kids give me any trouble, I take off m'belt. They see the belt, that's it." Barry

proceeds to berate him for hitting his kids.
* Talk-Radio features Lazlo, the host of the show, interviewing Reed Tucker, the owner of a martial arts dojo/vegan food store who is described by Lazlo as a "scrawny, pasty dude" with a lisp and embodies this trope. After one too many ridiculous claims (such as how he was trained by a 430-year old monk an can chop a bus in half), he eventually boasts that he can chop Lazlo's desk apart ("I have already visualized the desk as two half-desks") with the expected results.
* talks about him with affection even though they're no longer a couple.
* talks about how good the fires of Hell will be when he sees his siblings there with him.
* talks about Zelda with significant romantic undertones. This was removed from the Western localizations, however, where the journal entries are written addressing the player directly instead.
* Talk Show Appearance: Characters making an appearance on a talk show usually make fools of themselves.
* Talk Show Appearance: Protagonist(s) go on a talk show to resolve their issues, become fame or even to make a point. It never ends well.
* talkshow host Murray Franklin on live television, he grabs the camera, apes Murray's catchphrase "And always remember, that's life!" before being cut off at "life" by the network and replaced by a technical difficulties screen with "Spanish Flea" playing.
* Talk Show into a show itself — in which he interviewed children to solicit these kinds of observations for their comedic value. (Being the 1960s, they were — generally — a bit milder than today's version.)
* talk show, on the grounds that attaching the "-gate" suffix to every scandal diluted his personal place in history.
* Talk shows feature a guest or guests who are invited on a per-episode basis to discuss topics with permanent hosts.
* Talk Show with Fists and boost their self-esteem. Half of the reality shows about dysfunctional celebrity families could also count as such.
* Talk Show with Fists and the standard against which all others are compared.
* Talk Soup, as E! Entertainment's only Emmy-winning show, it ran from 1991 until 2002.
* Talk Soup by claiming he lost the actual Oscar win because of a breakfast scene where he "uses the wrong hand" to eat his breakfast. If he had used the other hand, he would have won.
* Talk Soup on E!, he used to run fake offers with a long rolling list of disclaimers that always ended with "Valid in 49 states — sorry Tennessee!"
* talks they were going to adapt it as a miniseries. Nothing more has been said about either of them.
* talks to him as "Bambi". Eventually, Screech gets frustrated at not being able to meet Bambi face to face, so Zack is forced to dress up as Bambi and go on a date with Screech to the Max. He does it so well that not only is Screech convinced, but Slater hits on him, realises that it's Zack then compliments his legs. Even Kelly is convinced. Finally, Screech decides that he's better off now, knowing that he's able to date women, but claims not to be ready for commitment yet.
* Talk Talk and complete his end of the bargain, quietly stepping back into retirement right after.
* Talk Talk. Comparing their first album to their fifth, and it can be difficult to tell that they're both by the same band.
* Talk Talk cuts off abruptly at the six minute mark, during a chaotic improv section.
* Talk Talk in 2012, he was never heard from again until his death at age 64 in 2019.
* Talk to an ER doctor. You would not believe the things people attempt to cram into their own or each other's asses.
* Talk to any serious typist and you'll find just how important physical and auditory feedback is. It's why some people will shell out $70-$100 for thirty-year-old Model M keyboards, and why even modern mechanical keyboards can and do still

use its
* Talk to any woman who was in high school or junior high in 2005, and "My Humps" by the
* talk to bully and berate Robin when she returned to town, even though by now, they had both moved on from Jason.
* Talk to Everyone: If it's possible to TALK or ASK or TELL or SHOW at all.
* Talk to EveryoneIt's the only way to get that sneaky clue about the dinosaurs!
* Talk to Her, one of the characters is a bullfighter. Her profession is not questioned, and may even add to her sex appeal.
* Talk to Her". Silent film hero Alfredo takes a potion and becomes so small that he ends up wandering around on the body of the sleeping Amparo. He goes for a walk on her breasts and even climbs inside her vagina.
* Talk to Me is a biopic about the famous DJ Ralph Waldo "Petey" Greene is told via the story of his producer Dewey Hughes.
* talk to members of Game Freak staff and get a reward from the Director for completing the National Pokédex.
* Talk to the Fist: Someone's speech is interrupted by a fist to their mouth.
* talk to the other. When, after some outside prodding, they do, and the point of the queen also being Asturian nobility is mentioned, tensions ease noticeably.
* talk to women, though his family being wealthy has been the reason for at least one of those relationships. He also gains the ability to talk to women when he's been drinking, which means he scores at parties fairly often.
* "Talk TV". meaning, in a nutshell, their dialogue is pieced together from fragments of various Earth broadcasts, resulting in lingual mash-ups such as "Don't look behind door number two, Monty! It's time to play "End of the Line," my valentine! Ge-ronny-doo-ron-ron-ronny-moooo!"
* talk when she started. It’s unknown how long this situation lasted, as Taiyang seems more normally involved by the time the series started, and there seems to be little to no animosity between he and Yang in their interactions in Vol. 4.
* Talladega Nights, Ricky Bobby's father throws a bucket on him to wake him up... then throws another on him when he reacts with confusion... and another because he filled up three.
* Talladega Nights: The Ballad of Ricky Bobby, Cal Naughton Jr. just doesn't seem to understand why his friendship with Ricky Bobby should be affected by something trivial like Cal sleeping with Ricky's wife.
* Talladega Nights: The Ballad of Ricky Bobby dropped his beer the second that Jean Girard introduces everyone to his "husband".
* Talladega Nights: The Ballad of Ricky Bobby, features a lot of people who cameo as themselves, including:
* Talladega Nights: The Ballad of Ricky Bobby features a particularly vicious cougar in the back seat of the car that Ricky Bobby learns to drive again.
* Talladega Nights: The Ballad of Ricky Bobby has a few of note for NASCAR:
* Talladega Nights: The Ballad of Ricky Bobby have to raid Formula One so they can defeat him.
* Talladega Nights: The Ballad of Ricky Bobby is a parody of NASCAR racing.
* Talladega Nights: The Ballad of Ricky Bobby, thanking him for a "red-hot smokin' wife" and for all the fast food brands he's contractually obligated to sell.
* Talladega Nights: The Ballad of Ricky Bobby: the two lead characters, who have had a blood rivalry all movie, both crash in the final race. They leap out of their cars and attempt to run to the finish line, with the crowd on the edge of their seats. The announcers then point out that their footrace is completely meaningless, as both were disqualified the moment they stepped out of their cars. Doesn't stop them.
* Talladega Nights: The Ballad of Ricky Bobby towards NBC (which, at the time, had been known for airing excessive amounts of commercials during NASCAR races).
* Talladega Nights: The Ballad of Ricky Bobby: we see how far Ricky Bobby has fallen when he resorts to delivering pizzas, and accidentally takes off in reverse, smashing a woman's shopping cart.

* Talladega Nights: The Ballad of Ricky Bobby, when Ricky Bobby is re-learning how to drive.
* Talladega Nights: The Ballad of Ricky Bobby, with various characters saying increasing...strange...things to their comatose comrade.
* Talladega Superspeedway is known for this in NASCAR, because the finish line is past the pit exit, unlike Daytona where the finish line is in the tri-oval. Numerous races there have been decided by a last lap pass in the tri-oval area.
* Tallahassee, Fla., K-Mart employee Jeff Sablom was taking a break in the back of the store to try on the Batman costume he had planned to wear to a party that night when a security guard asked for his help to apprehend a shoplifter. Said the guard later, "You should have seen that man's eyes when he looked back and saw Batman chasing him." Sablom recovered four cartons of cigarettes and two videocassettes. [Gainesville Sun, 11-2-1989]
* Tallboy were developed to exploit this sort of thinking. Rather than try to break through a bunker's heavily-armed ceiling — which might be breached but would likely absorb most of the blast, protecting the occupants — these bombs were instead designed to penetrate deep beneath the ground next to the target and explode, undermining the foundations and causing the whole structure to collapse in on itself.
* Tall, Dark, and Handsome: A description for an attractive male character—tall, dark-haired (possibly in dark clothing), and very good-looking.
* Tall, Dark, and Handsome has yet to become a widespread, non-ironic look for protagonists.
* Tall, Dark, and Handsome, he's hunting other supernaturals through shadowy alleys or having mysterious men throw themselves at him.
* Tall, Dark, and Handsome, like a true Baratheon. Ned Stark immediately realizes upon seeing him for the first time that he is Robert's son. So does Stannis, when they meet in "Second Sons". In the books, it is said that Gendry resembles a young Robert so closely that it is blatantly obvious to anyone who meets him that also knows Robert (Eddard, Stannis) that Gendry is Robert's son. Given that Renly also resembles his older brother in his youth, people also remark on how much Gendry looks like Renly.
* Tall, Dark, and Handsome — sometimes the protagonist is this to explain his success with women.
* Tall, Dark, and Handsome: Tall stature + dark hair and dark eyes = very desirable.
* Tall, Dark, and Snarky: A character is tall, dark-haired, and constantly being snarky.
* Tall, Dark, and Snarky: A love interest that is tall, dark-haired, and constantly being snarky.
* taller than somebody!), Peter (5'9), the aforementioned Sylar and her father(s).
* tall for the bed, Procustes would stretch him on a rack till he fit... And of course, he kept a different-sized bed just in case there happened to be a traveler just the right size.
* tall, muscular, and rather youthful, what with him being the local football coach.
* Tallowmere, and it is an all-around serviceable. It's a melee weapon, so you can only use it up close, but it can hit enemies in front of and above you, and you can swing it decently fast.
* Tall Poppy Syndrome: Characters hate other characters because they are better than them and want to bring them down to their level.
* Tall Poppy Syndrome: Holds contempt (or worse) for peers who are affluent, ambitious, talented or who otherwise stand out.
* Tall Poppy Syndrome: I feel intense envy against people who are better than myself.
* Tall Poppy Syndrome: You think you're more successful at life than I am? Not when I have anything to do about it after I spread rumours about you!
* Tall, slender humanoid races with pointy ears are usually called "Elves", but

* Tallstar's Revenge, Sandgorse's body is lost in the collapsing, flooded tunnels.
* Tall Tale America has these turn up whenever guys like Mike Fink or Davy Crockett get tired of shooting animals.
* Tall Tale America insists throughout that it is a true account of real people from American history, even in the bibliography where it cites works of fiction as sources (the 1987 reprint breaks this with the author's afterword, though).
* Tall Tale, John Henry wields his sledgehammer in combat just as effectively as he drives steel with it.
* Tall Tale, Paul Bunyan dug the Grand Canyon by dragging his axe behind him, created Mount Hood by piling rocks on top of his campfire to put it out and formed the Great Lakes so his companion Babe the Blue Ox could have a watering hole.
* Tall Tale, Pecos Bill carries a pair of Merwin Hulbert revolvers which he usually dual wields. Similarly, Calamity Jane has a pair of Colt revolvers which she exclusively fires in this fashion.
* Tall Tales explain that the metaphysical realm operates according to the thoughts and will of humans. It is therefore a consensus reality that can interact with the physical world to some limited degree.
* Tall Tales: Father Benedict de Monte is employed by the Roman Catholic Congregation for the Doctrine of the Faith, the modern rebranding of the old Vatican Inquisition. In the story, this body still carries out investigations and combat against threats to the safety or teachings of the Church, though much more covertly than in ages past.
* Tall Tales has explained that she needs something relevant to her spell to cast it, but when such a component is not available, she has been shown to use her own blood to power the spell instead.
* Tall Tales has two story arcs set in abandoned hospitals, both connected to the same cult.
* Tall Tales is Benedict de Monte, who appears human but has been referenced in-story as something different and shown abilities such as stepping into the metaphysical realm and boiling poison out of his blood.
* Tall Tales is fundamentally driven to free mankind from the influence of gods by eradicating every other religion through violent force, including human sacrifice and binding dark gods to channel their power.
* Tall Tales is John Matteson, described in-world as an Anchor, a person who enforces the order of the physical realm on the spiritual realm. This gives him the ability to 'break' magic, and he has been shown to do so passively upon coming into contact with it.
* Tall Tales: Jackie describes the world as having a spiritual backstage where natural phenomena can be manipulated. The Ohio River shows signs of ecological distress when one of its spirits, Aaboukingon, begins investing in a mortal life away from the river.
* Tall Tales, Jackie infrequently uses her own blood to power spells when she lacks proper components, and the Brood of Nachash utilizes blood and human sacrifice in their rites.
* tall tales of 19th century American lumberjacks, is a porcupine with rubbery spines and flesh. It bounces around the landscape like a rubber ball, and anyone who eats rubberado meat will bounce around the same way for a few days.
* Tall Tales, the character Tadzio is cursed with immortality after going back on a deal with a demon.
* Tall Tales: The story arc "Born of Water" centers around a ghost residing in a bathroom.
* Tall Tales with a virtual blonde and brunette as a peace offering. Dean tells them they aren't real, and one of them assures him it will feel real.
* "Tall, Tall Trees" was co-written by Roger Miller and George Jones, both of whom recorded their own versions in the 1960s.
* Tallulah Bankhead, a last-gasp attempt by radio to hold out against television. It was successful, but expensive to produce, and couldn't bring in the sponsorships it needed. NBC cancelled it after two years, reportedly losing $1 million on it.
* Tallulah from "Daleks in Manhattan" and "Evolution of the Daleks" is an

attractive woman, but her voice could peel paint.
* Tallulah involves Elliot Page stealing a baby and passing it off as his own to get his ex-boyfriend's mom to take him in. It's a ridiculous plan you know is going to come crashing down sooner or later.
* Tallyho the fox experiences this when Siegfried the hound points out that foxes can't climb trees.
* Tally Marks on the Prison Wall: A prisoner draws or etches tally marks on the wall of their prison cell to keep track of how long they've been incarcerated.
* Tally Road, it is a prime candidate for this trope, partly because it continues at the 5-a-week pace, and partly because the site offers numerous widgets for skipping back to a previous weekday or story arc.
* Talon Company, does more raider work than actually filling contracts.
* Talon, Garrett and Zed do it when infiltrating the Capital in season 3.
* Talonhoof the Reviled by force, enslaving and torturing any ponies in his territory, before launching a war of extermination against Equestria.
* Talon Karrde as well, although at least he's honourable enough not to sell anyone out if he can help it. He even lampshades it at one point, telling a Republic officer that he's in it for the money, not the ideology. The reason he sides mostly with the good-guys? He reckons they're going to win in the end.
* Talon. Mordekaiser cannot laugh normally, but instead his laugh is always going to be "Huehuehuehuehuehuehue". A fan idea for a skin created the meme of Yasuo being a Sashimi chef.
* Talon Ryashen of Act VI believes this, explicitly telling Kyouko that she's lucky to be stranded in the monster world; he even quotes the trope name word for word. It's later revealed that he came to believe this after he was turned into a
* Talons of the Emperor pushes it even further. A Custodian is to an entire company of Space Marines what a company of Space Marines is to a single lobotomized baseline human.
* Talon). While the skill has a very short cooldown, it can't be used on the same piece of terrain for a long duration.
* Talos is in the comics like most Skrulls is a tyrannical Evil Colonist
* Talos of the Night Lords has been a thief and a murderer since childhood. He joined his Legion in their treachery during the
* Talos. On the outside it has various torture implements acting as claws to restrain other victims, then torture and kill them to remove their souls. It also has a cannon in the shape of a tail that fires incredibly corrosive bio-acid.
* Talos takes a liking to a S.H.I.E.L.D. blazer, even wearing it in his natural appearance.
* Tal Shiar and ordinary military do not use the same ranks, but overall their ranks appear to be a combination of modern human naval ranks (both Romulan Generals and Admirals show up), modern human naval ranks shifted to be equivalent to another rank (Commander is roughly equivalent of Captain, for instance), Roman-derived ranks (like Centurion for what appears to be a non-commissioned equivalent to Starfleet's Lieutenant commander) and using "sub" as a prefix to indicate a lower rank (Subcommander is roughly equivalent of Commander, as an example). There is also the enlisted rank of Uhlan, which is derived from an Eastern European title given to members of certain cavalry units.
* Tal Shiar, and the Republic ruling over most of the Empire's former space.
* Taltos have common ancestors with humanity (they're primates) and even can interbreed with humans and pass as one, but aren't humans. According with the books they were known as the ancient Picts.
* Taltos novels also have a definite aspect of this, where Vlad always seems to run into a small manifestation of some larger conflict between powerful Dragaerans and/or Living Gods. Arguably, this occurs because an audience wouldn't be interested in heroes who would be expected to solve problems easily, not to mention that it wouldn't be a very long book with them as main characters.
* Talvikuningas, a concept album by the Finnish band CMX, gives us the Praetorian cyborgs. They're exactly what you'd think they would be. Bulky armor, heavy weapons, modified genes and, oh yes, they're cyborgs. (But don't just take our word

for it, watch the
* Talvisota but just weak and fail their counterattacks just as badly.
* Talyn, a hybrid of Peacekeeper and Leviathan technology who was a living
* Talyn characters frequently refer to "stealth vectors" that ships supposedly use to approach other ships when they want to avoid being detected, although some Luxan ships (see below) have the ability to cloak. Talyn's sensors external sensors were inoperative at the time he was boarded by the Scarran.
* Talyn!John dies, sacrificing himself to destroy a Scarran Dreadnought. Moya!John learning of this when the crews finally reunite several episodes later severely impacts his relationship with Aeryn.
* Tama & Friends received well. The negative reception would help drive original producers Group TAC out of business, and the franchise would remain dormant for the next 10 years.
* Tama and Shiranui play this well and are particularly antagonistic towards the main character. Though they do show occasional benevolent sides, they like to be played for their mean side. Shiranui seems to take over this role (when not used for
* Tama and Tojo both went to heaven after dying, despite their sinister actions.
* Tamagotchi after visiting Earth for the first time, evidently assimilating human accents in doing so.
* Tamagotchi) and the frustrating mechanics of the games. Even if you don't neglect it, it might suddenly just decide to die out of nowhere. The entire Game Boy trilogy's death scenes are also infamous for their disturbing ways of playing out, even to some adults.
* Tamagotchi and thinks they're in love with each other (Mametchi was actually just helping Yumemitchi when she tripped, but Himespetchi doesn't realize this until after she wakes up from fainting from the sight).
* Tamagotchi and very cuddly and huggable (it's primarily aimed at girls most of the time, so this makes sense - girls love cute stuff, after all, right?).
* Tamagotchi animated series, the Spacey Brothers, the show's primary antagonists, often visit a cafe for bad guys called the Waru Cafe.
* Tamagotchi anime's English dub only acted in that production, possibly because most of the cast was comprised of children.
* Tamagotchi anime series is about Mametchi participating in a race where there are several events placed along the way that the racers have to complete to move on.
* Tamagotchi are based on specific objects, such as Crackertchi (a party cracker), Yakantchi (a tea kettle), Mousetchi (a computer mouse), Belltchi (a bell), and Shelltchi (a clam shell).
* Tamagotchi, as Chamametchi, Imotchi, and Kikitchi are all telling their scary stores (or about to, in Kikitchi's case), they shine a flashlight's light in their faces.
* Tamagotchi at most. However, Rolatchi, who is a Tamagotchi version of the Japanese model Rola, actually does look exactly like a human.
* Tamagotchi. Both are a specific kind of Tamagotchi called a Gaiatchi.
* Tamagotchi, but the way he voices his emotion in the dub is casual enough that it's jarring he's supposed to be feeling shocked at all.
* Tamagotchi, by the way. Usually it's conveniently timed with her saying her distinctive catchphrase "Gigakyun!", an exclamation of her love.
* Tamagotchi. Canonically, Pianitchi has a normal friendship with Smartotchi, but the two bond through a shared love of playing piano music.
* Tamagotchi devices are released outside of Japan, some characters appeared on devices years after their Japanese debut. The most notable example was the V3, which used many characters that were originally from the Osutchi and Mesutchi, which came out nine years earlier.
* Tamagotchi ends with Lovepapatchi tripping at the moment the camera goes off for a group picture of him and his wife Lovemamatchi with Mametchi and his gang, intended for Lovepapatchi and Lovemamatchi's wedding anniversary.
* Tamagotchi: Episode 118 is about Moriritchi and Anemoriritchi getting into a fight, causing the former to move to Lovelitchi's house. Lovelitchi and a few

others try to help the two to stop fighting.
* Tamagotchi episode 19, a rose is the item Yumecantchi summons for Yumemitchi and Kiraritchi to use to help get Righttchi's opponent Robosukitchi to a tea-serving robot competition they're facing off in. That rose ends up being given as a gift to a woman Robosukitchi really admires before both are brought to the site of the competition.
* Tamagotchi episode 1, Miraitchi and Clulutchi call out their father Doctor Future for installing functions in his inventions without telling them, bringing up a specific incident where he added some sort of "witch" mechanism to their makeup kits that temporarily hypnotized them into thinking and acting like they're frogs.
* Tamagotchi episode 22, the gang accidentally scare a Dreambakutchi and it flies to the top of a building that's too tall for them to reach. Candy Paku Paku uses her Pocket Designer to create numerous clones of Kuchipatchi, who form into a giant Kuchipatchi that grabs the Dreambakutchi.
* Tamagotchi episode 28 to understand what he's saying and communicate with him.
* Tamagotchi episode 34, Yumemitchi and Kiraritchi are wondering why Himespetchi is so sad and use their Yume Kira bags to transform into samurai who are able to keep secrets. Himespetchi is able to admit to them that she has a crush on Mametchi and was very shocked when she was told she has to leave for home planet for this reason.
* Tamagotchi episode 3b, Himespetchi does one when she thinks Mametchi has just noticed her, only for her to realize he was looking at Jack the peacock and not her.
* Tamagotchi episode 44, after Bolttchi confesses his love for Nuttchi, the latter is seen spoon-feeding the former some cake.
* Tamagotchi episode 6, the owner of an unfinished building notices the art Kiramotchi painted all over it (despite her promising her big sister Kiraritchi she wouldn't draw or paint on whatever surfaces she comes across) and looks angry about it, saying he thinks it's... wonderful and he loves it.
* Tamagotchi episode 7, Tropicatchi tries and fails multiple times to impress her crush, Kujack Jack the peacock. Each time, Jack runs away, and his feet are represented by circular spinning shapes.
* Tamagotchi episode 7. When Coffretchi applies makeup to Elephantotchi, the powder makes him want to sneeze, causing him to run around; right before he does so, he flings his owner off his back and into the sky, and he disappears with a twinkle. A few minutes later, Smartotchi and X are hit by Elephantotchi and also disappear into the sky with a twinkle.
* Tamagotchi episode "Cheery Cherry Blossoms" misspells the word "blossoms" as "bloosoms" in the title card.
* Tamagotchi for Himespetchi and the royal prince and princess have amnesia.
* Tamagotchi franchise installments, including the original pets, the Tamagotchis instead live on a different planet called Tamagotchi Planet.
* Tamagotchi franchise of virtual pet toys began in 1996 and has been going since.
* Tamagotchi franchise to be released in South Korea due to the Japanese cultural products ban. The toys would not see a release there until 2019, with the Tamagotchi Some, their version of the Meets/ON.
* Tamagotchi handhelds feature a burglar who occasionally steals some of your Tama Points. He's brought up in the newspaper you receive at mail call, with one of two possible stories with him being that he's robbed Tamatown's bank.
* Tamagotchi: Happiest Story in the Universe!), and decide to visit the Library to see what the new book is.
* Tamagotchi: Happiest Story in the Universe!, Chamametchi visits a book where she is an Arabian princess and is seen on a flying carpet.
* Tamagotchi: Happiest Story in the Universe!, Kikitchi throws banana peels onto the ground to make Memetchi and Makiko slip due to him being jealous about their interest in the magical books.
* Tamagotchi has Himespetchi daydream that she and her crush Mametchi are getting married. When Kuchipatchi (whom Himespetchi imagines as the priest officiating the wedding) says that Mametchi may now kiss his bride, Himespetchi and her imaginary

husband lean in for a kiss... and then Himespetchi snaps out of the daydream before she actually makes the kiss.
* Tamagotchi has the Grim Gotchi, which appears when the Tamagotchi is about to die. It looks like a small, black ghost with horns.
* Tamagotchi have only one name, usually ending with "-tchi." There is an exception to the one-name rule, though — Makiko, for some reason, has actual first, middle, and last names (Madeleine Kirie Dotchine).
* Tamagotchi he eventually learns how to sing properly without the need for any charms or anything.
* Tamagotchi, Himespetchi hides under a bush and sneaks around to figure out why Mametchi is hanging out with Yumemitchi and Kiraritchi (for context, Himespetchi has a crush on Mametchi and is worried that he may be in love with someone else).
* Tamagotchi: His name being a pun on "paparazzi" and all, Paparatchi loves taking photos in general, but especially celebrities.
* Tamagotchi Honto no Hanashi of the Tamagotchi species was actually him sulking on a bridge over a date going poorly - it was at this bridge where he was hit on the head by a Tamagotchi spaceship.
* Tamagotchi Honto no Hanashi, Oyajitchi is the only Tamagotchi who can speak Japanese.
* Tamagotchi Honto no Hanashi: When Oyajitchi gets it drunk on sake, the Tamagotchi Planet starts to sing to itself, using a giant sign that was on it as a microphone.
* Tamagotchi. However, they all eat, communicate, marry and produce offspring with no trouble at all.
* Tamagotchi in 2009, it became so popular that it ran for 271 episodes.
* Tamagotchi: Initially played straight, as Tamagotchi life was much simpler before meeting humans. Completely averted after visiting Earth, as much of the planet changed to resemble Earth, including a massive influx of pop culture, and several breeds came into existence as a result of mimicking the planet's cultures.
* Tamagotchi: Initially, the Tamagotchi Planet did not celebrate Christmas. But Tamagotchis returning from Earth had picked up on Earth traditions, including Christmas, and wanted to celebrate it. A mayor of a snowy northern village, realizing there was no Santa Tamagotchi, decides to take on the role and evolves into Santaclautchi permanently.
* Tamagotchi in the Philippines, but only covered the first season similar to the aforementioned Australian English dub.
* Tamagotchi is a giant limbless golden egg who has no face, but can eat and communicate with other Tamagotchis with no problems.
* Tamagotchi is a giant, living planet. If the planet gets drunk or falls ill, the effects are felt all over the world.
* Tamagotchi, is a green-colored Tamagotchi with the round water bowl head characteristic of the species. You can obtain it by winning a game with Mametchi or Ginjrotchi.
* Tamagotchi is a pink flying saucer, though with a less stereotypical shape, being shaped more like a big chestnut than a disk.
* Tamagotchi is a surprisingly large franchise to experience in its entirety.
* Tamagotchi, it's clearly obvious that Flowertchi is voiced by a male. And to add onto it, KuroMametchi (an actual male) talks in the same voice when disguising as Lovelin in one episode, proving both are voiced by that same actor!
* Tamagotchi, it's implied that time works differently in the ancient Tamagotchi Village compared to the rest of Tamagotchi Planet. Lovelitchi and some of the female Tama-Friends stay in Tamagotchi Village until sunset, but when they come back, it's still earlier in the day and they find Mametchi, Memetchi, and Kuchipatchi getting ready to head off to school.
* Tamagotchi just keep them alive and happy as long as possible — they do the opposite and try to kill them off as fast as possible.
* Tamagotchi, Kuchipatchi eats too many burgers at the race's burger stand and becomes rounder in shape than usual, causing him to bounce all around Tamagotchi Town when he accidentally trips. Right as Mametchi saves him from a rough fall, he returns to his original shape.

* Tamagotchi, landing on an Event space has a chance of making your player character volunteering for a senior center. The player character and one of the seniors are shown juggling in the "shower" fashion.
* Tamagotchi L.i.f.e. Tap and Hatch was a free puzzle game that offered in-app purchases. Some of the levels were nearly (if not outright) impossible without buying extra moves and power-ups, the worst offender being Level 59.
* Tamagotchi, love bubbles are often seen when Himespetchi daydreams about her crush, Mametchi.
* Tamagotchi, Mametchi and his gang stumble across a house where a Tamagotchi has been trying to scare anyone who comes near it by pretending to be a ghost and get to know the costumed kid.
* Tamagotchi media are inconsistent about whether the Tamagotchis know Japanese/English or not. According to series lore, they once had a radically different language that sounded like squeaks and beeping before they visited Earth and learned the local language, but besides that...
* Tamagotchi: Melody Land, Melodytchi's home town, is thriving with plants growing music-related items on them, such as bells and musical notes.
* Tamagotchi, Memetchi and Makiko's comedy routine as "Samurai Memetchi and Afro Makiko" features Makiko being by a washtub falling on her. Thankfully, her afro is so bushy that it cushions the washtub and makes it have no impact on her.
* Tamagotchi, merchandise spelled the franchise's name as "Tamagotchi".
* Tamagotchi, Mermaid Lovelin hides in a mostly-intact sunken ship twice to avoid being attacked by an octopus.
* Tamagotchi! Miracle Friends, where a pair of twin girls named Miraitchi and Clulutchi are inexplicably sent to the past and have to get help from Mametchi and co. in the present day to collect Dreambakutchis, creatures that will return them to the future, before a villain named X-Kamen can make off with them.
* Tamagotchi. Nobody asks her what she wanted to say after this scene.
* Tamagotchi often get the better of him, they are still pretty friendly overall though.
* Tamagotchi of them. In-universe, the explanation is that human-like Tamagotchis became more common after they vistied Earth.
* Tamagotchi, once Yumecantchi joins Yumemitchi and Kiraritchi and provides items for them to use along with the transformations they get from their Yume Kira bags, it becomes a running gag for the seemingly-useless items to be accompanied by Yumecantchi using her cuteness to convince the two that they will actually be of help. This works on Yumemitchi, who can't get over Yumecantchi's cuteness, but only serves to make Kiraritchi a bit irritated.
* Tamagotchi: One day in real life equates to one year within a Tamagotchi device. Averted with the Santaclautchi, which measures the days and is the only Tamagotchi to do so.
* Tamagotchi: On the Entama and Uratama toys, a chocolate heart can be purchased in February. Consuming it temporarily greatly accelerates the rate at which the Tamagotchi builds a relationship with another Tamagotchi.
* Tamagotchi: On the Entama, Uratama, and Versions 4 and 4.5, the player's Tamagotchi can be robbed of Tama Points by a burglar whose sprite and official artwork depicts him carrying a big bag with him.
* Tamagotchi: On the Version 1, failing at the "Jump" game will make the Tamagotchi trip over a hurdle. Many of the adult characters on other Connection releases also face plant as they walk across the screen in their idle animations.
* Tamagotchi: Part of the death sequences of most vintage releases. The heart rates gradually slow down before the flatline occurs, so it's not as bad as most examples in media where the change is instantaneous.
* Tamagotchi PC Pack game, all the Tamagotchi except for Kuchipatchi and Ichigotchi do this when you say the command "Use the bathroom" through the microphone.
* Tamagotchi" personality and his role in the show tend to make him into this.
* Tamagotchi releases from 2004 onward share the same sounds for certain events (hatching and the evolution sound for instance.) However, since the noise when you pull the battery tab, reset the device or replace the battery is now replaced by a

short musical jingle and a screen showing text that says "DIGITAL FRIENDS OF THE WORLD" on the color releases beginning with the Tamagotchi iDL, the original activation sound is instead used for the death sequence.
* Tamagotchi's 20th anniversary (the film and short were released in April 2017; the actual anniversary was in November 2016).
* Tamagotchi season 1 intro, the buildings dance to the show's opening song.
* Tamagotchi series, Professor Banzo discovered the Tamagotchi species of alien by pure chance while he was sulking on a bridge over a date going badly. A Tamagotchi UFO crashed into the river, and the Professor and his assistant Mikachu, who was there to help him cheer up, went to save the creatures from drowing. They then discovered that the aliens couldn't breathe in Earth's atmosphere, so they created little eggshell-like devices to keep them alive; since then, the two have been researching the Tamagotchis, going as far as to visit their planet in their studies.
* Tamagotchi short, Kuchipatchi throws a bag into the air. It circles Tamagotchi Planet and hits Kuchipatchi right on the back.
* Tamagotchi take it kindly when anybody tries to touch her curl of hair.
* Tamagotchi Thai dub aired by MCOT Family gives him a voice more like the Japanese version.
* Tamagotchi that is occurring where each racer must complete events placed along the way to continue. At some point in the episode, she informs the spectators to stay tuned. As if to hint that she may have been talking to the audience watching the anime as well, the episode immediately cuts to a commercial break after she says this.
* Tamagotchi that play it straight. The characters Yumemitchi and Kiraritchi use their Yume Kira bags to become people of specific occupations (fisherwomen, baseball players, firefighters, etc.) and use their abilities to make other Tamagotchis' dreams come true.
* Tamagotchi: The big flower the Tama-Friends plant and study for a school project in episode 41b slowly consumes them as they approach and stay near it. The gang walk their way around the innards of the plant and try to find a way to get out.
* Tamagotchi the fad started to die out, thus leaving the company's finances rather dire. Ironically, it's a 2004 revival of the very same toy series that got them out of that financial slump.
* Tamagotchi: The majority of Tamagotchi breeds are friendly, and at worst nuisances that can't do much harm. Their primary interest in Earth is to learn about it and befriend humanity, and only originally came to it in the first place to seek refuge from their intoxicated planet.
* Tamagotchi: The Movie, as Tanpopo is about to leave Tamagotchi Planet, she gets a group hug from Mametchi and his gang and they all cry since she and the Tamagotchis are going to miss each other.
* Tamagotchi: The Movie came with the Fureai Friend Chamametchi toy, while the American one came with the special edition of the Music Star toy and 3 figurines.
* Tamagotchi: The Movie, Mametchi and Tanpopo's faces are clearly visible through their spacesuits.
* Tamagotchi: The Movie of Mametchi's gang, has pigtails. Oddly, nothing seems to be holding them in place.
* Tamagotchi: The Movie shows that Mametchi has one in his bedroom. It activates a platform next to the house, acting as an elevator to his bedroom from the outside.
* Tamagotchi: The Movie: Subverted. The rocket Mametchi and his friends steal has to be adjusted to a certain position to shoot the Planet's medicine, but it does so using smaller rockets on the ship's arms (to rotate) and four smaller jets (to reverse and slow down) instead of just stopping.
* Tamagotchi: The Movie, there is a scene after the end credits where Tanpopo finds her Tamagotchi toy in a box in her room, which surprises her since she had left it on Tamagotchi Planet. She finds Mametchi and Chamametchi communicating with her through it, with Mametchi explaining he was the one who sent the toy back. Tanpopo responds to them, mentioning she'd love for them to see her little brother some day.

* Tamagotchi: The Mushitchi (a subspecies of bug Tamagotchi) resemble many conventional Earth bugs. There are a number of normal Tamagotchi who resemble insects as well.
* Tamagotchi, then hastily says she has "something to do" and runs away along with their Tama-Pet Hapihapitchi.
* Tamagotchi. The other Tama-Friends all agree with his statement, exclaiming they'd also rather become eggs even at the cost of sacrificing their interests.
* Tamagotchi: The person who serves food at Tamagotchi School's cafeteria does so by stretching his arms out to the students receiving their lunches.
* Tamagotchi. There are plenty of Tamagotchis that don't wear any clothing at all, but also plenty that do wear clothes (the latter type is more common in the modern releases). One of the series mascots, Mametchi, wears a black cap but no shirt or pants, while his friends Memetchi and Kuchipatchi completely lack clothing; Lovelitchi, on the other hand, does wear a shirt.
* Tamagotchi: The Tamagotchi invaded Earth by accident (fleeing their drunk planet and having their UFOs suffer engine problems and crash), but both humans and Tamagotchis ended up benefiting from the incident. The Tamagotchi deliberately returning to Earth later on is a more straight example of this.
* Tamagotchi toys are released on (or close to) November 23rd, the same date the original Tamagotchi launched in 1996.
* Tamagotchi transitions between scenes by using a wipe featuring a bunch of blue stars that slide across the screen.
* Tamagotchi TV show had at least one Christmas episode every year during its run.
* Tamagotchi Video Adventures, director Dan Kuenster co-hosts the "How to Draw Tamagotchi" segment.
* Tamagotchi Video Adventures, is seen next to a fire hydrant for a second or so.
* Tamagotchi Video Adventures, Masktchi is given a popsicle by a little girl when a gumball machine he wants to take back to Tamagotchi Planet for the museum breaks. Masktchi proposes that his popsicle stick be the relic to represent Earth in the museum's new room and is met with laughing from the others until Cosmotchi shows them the story behind the girl's generosity, and they start to cheer "Mask-tchi! Mask-tchi!" instead when asked whose Earth object should go in the exhibit.
* Tamagotchi Video Adventures media where he has a much higher-pitched voice.
* Tamagotchi Video Adventures starts with the Tamagotchis speaking an alien language before Mimitchi turns on a translation machine.
* Tamagotchi Video Adventures, the male of the golfing couple slams down his clubs after being outmatched by Zuccitchi and Kuchipatchi.
* Tamagotchi Video Adventures to rectify the problem. Even then, though, only Cosmotchi's speech is coverted into English.
* Tamagotchi Village counterparts, are preparing food, Himespetchi accidentally grabs hold of Mamesaku's hand, complete with a couple of little hearts floating from the point of physical contact for a split-second, and Mamesaku notices. Himespetchi inches away awkwardly before panicking about it.
* Tamagotchi virtual pets, Nazotchi always carries a bindle stick with him.
* Tamagotchi V-Pet releases have a heart monitor and flatline as part of their death sequences. Outside of possibly laying an egg at the end, they are completely unresponsive throughout the whole process and likely following the same ECG patterns of an actual asystolic patient, with the heart rate gradually slowing down rather than going from a normal rate to the flatline in a couple of seconds. On the releases where a character can be recovered from the brink of death, the heart monitor sounds are not part of the death sequences at all.
* Tamagotchi, was dubbed and released into theaters first instead of the first film.
* Tamagotchi" when you lost a game, with later versions instead using the word "Poor".
* Tamagotchi, where Prince Tamahiko and an amnesiac Himespetchi are about to board a ferris wheel. Himespetchi remembers her true love is actually Mametchi at the last second, realizes what's happening, and freaks out.
* Tamagotchi, while it's never outright stated if they're divorced, Cafe Mama lives

in a different city from Papapianitchi, and they're on good terms. They have a daughter named Pianitchi who is with Cafe Mama.
* Tamagotchi (with Chamametchi not understanding this, but noticing she's taller and thinking it's from all the milk she drank) and their voices swap to match as well.
* Tamagotchi, with Lovelitchi as the mermaid who becomes lovesick after seeing Mametchi the pirate and resorts to some kind of magic to travel onto the land and find him.
* Tamagotchi without it waking her up, although it does wake up Mametchi who tucks her blanket back into place before visiting Lovelitchi, who is also awake, in a nearby room.
* Tamagotchi! Yume Kira Dream episode 40, Chukatchi, who is already married to Chinatchi, starts spending more time with Benitchi. The Tama-Friends keep seeing the two together, leading them to believe Chukatchi is cheating on Chinatchi with Benitchi.
* Tamagotchi! Yume Kira Dream... which unfortunately falls under this trope as well, since only the first seven episodes were adapted, and they were spread over 14 three-minute-long webisodes.
* Tama Hills, an area in the foothills around Tokyo, was once home to a munitions factory and depot. While it wasn't one continuous underground facility, most of the buildings and storage areas were carved into the hills or buried in an attempt to protect it from aerial observation and attack, particularly a concern late in
* Tamaki Amajiki for most of his battles transforms his fingers or hands into octopus tentacles to trap his opponents.
* Tamaki Amajiki, hero name Suneater, can transform his body based on any food he has recently eaten. He eats beef, he turn his hands into hooves. He eats squid or octopus, he can transform parts of his body into tentacles. His mentor, Fatgum, makes a point of giving him swordfish meat just before they take part in a raid on a gangster's stronghold.
* Tamaki Damo seems to get a lot of enjoyment out of interrogating people.
* Tamaki ends up falling on her in a very suggestive position just as her father walks in.
* Tamaki finally managed to befriend the twins when he played their "guess which is which" game and got it right. They realize that he just got lucky, but the fact that he actually
* Tamaki (rich boy attending a private school) and Haruhi (a commoner
* Tamako Market. And since he's always been there, she never really noticed what he really means. When Mochizou finally works up the courage to tell her, she loses it for a while and takes a long time to reevaluate their relationship, culminating in a last-minute decision at the climax when he's about to leave.
* Tamako Market. As if on cue, Toccata and Fugue in D Minor plays immediately there after.
* Tamako Market causes her to sneeze violently; and apparently Dera's culture interprets sneezing at someone as a declaration of courtship towards them. Dera assesses the situation accordingly.
* Tamako Market Dera passes out in a field of flowers, gets bundled into a bouquet and shipped to the florist's, where the bouquet he's in is put on display. When he regains consciousness and finds Tamako in his face, he freaks out and flies right into her.
* Tamako Market has Tamako, a simply, happy-go-lucky girl with pigtails.
* Tamako Market, it appeared that Anko had a crush on a hyperactive classmate, but in the end it turned out it was on the sweet boy he was walking with.
* Tamako Market. Tamako herself was born on 31 December (New Years Eve), and is always forgotten because it's the busiest day of the year for mochi makers like her family.
* Tamako's childhood friend, Midori, has been friends with her since grade school.
* Tamama also constantly uses portals to move around in the manga, an element that's only brought into the anime in the last season.
* Tamama is supposed to be a young child, with most dubs giving him female voice

actresses and such... except for the Italian dub, where is voiced by Giorgio Bonino that gives Tamama a nasal voice that makes him sound more like a middle-aged man that is pretending to be a child.
* Tamama sees Angol Mois as a rival for Keroro's love and attention, but is frequently overwhelmed by her niceness.
* Tamamo beyond her level and handily humiliated her before Nube set her straight. Unlike Yang Kailen, though, Izuna is a lot more open minded (she keeps and breeds her own Tube Foxes) and gets over herself.
* Tamamo-chan’s a Fox!: A benign version pops up in chapters 56 and 57. Tamamo's human friends Nakki and Mikki come to visit her at a cafe where she is now working part-time at. Tenko is there and mentions being a regular, while the owner mentions not having customers like Nakki and Mikki around much. The end of the chapter reveals the shop's true form is a small shrine and the cafe is one for various gods.
* Tamamo-chan’s a Fox!, Tamamo Fushimi is a high school girl who is secretly a fox spirit from the Fushimi Inari shrine in Kyoto. What she doesn't seem to realize is that though she appears to be an ordinary human to adults and cameras, her fellow students can see right through her disguise.
* Tamamo-chan’s a Fox!: Tamamo is a fox spirit from the Fushimi Inari shrine in Tokyo who disguises herself as a high school student to learn more about human society. She's fascinated by all sorts of modern conveniences that her fellow students take for granted, like subway trains and bicycles.
* Tamamo-chan’s a Fox! to wish for rain for his fields, didn't he?
* Tamamo-no-Mae Asahi no Tamoto brother has been made Emperor instead of him.
* Tamamo-no-Mae Asahi no Tamoto. He kills her in order to spare the widow's daughter.
* Tamamo-no-Mae Asahi no Tamoto to start a coup against the Emperor and take over the country.
* Tamamo no Mae, the Ancestor who spawned the "Animal" line, is the only one still around in the present due to not being sealed away completely.
* Tamanous of the Brackenwoods in the early 21st century Hoh Rainforest. With werebeasts and a female protagonist.
* Tama Of The Light Country about the social and political structure of the civilizations on Mercury. People there are generally small and slim and the women have enormous, functioning, feathered wings. The men are wingless. For centuries, the law has been that once a woman marries, she must have her wings "clipped", and for clipped, read hacked off without benefit of anesthesia. Tama is a very young woman who leads a "revolt of the winged virgins".
* Tama of the Light Country is a surprisingly feminist work for 1930. It also zilches the one-culture-per-planet rule. Earthman Guy Palisse lands on Mercury in an experimental rocket. His friend Tama is a very young woman who leads a revolt of "winged virgins" and male allies against a long-established law that women must have their wings amputated (sans anesthesia) upon marriage.
* Tama Productions/drop - First studio to form out of Mushi Pro in 1965 and would go bankrupt in 2011. drop would spin off from Tama in 2004, only to meet a similar fate in 2018.
* Tamara: Almost the entire class bursts out laughing when Shawn humiliates Tamara in English by grabbing her witchcraft book and reading it out loud.
* Tamara and Kethry, the finest weapon that Tamara has ever owned and which she still uses came from a masterswordsman that she accidentally stole from and then slew when she and Kethry fought a demon-worshipping cult that had just come off of having an orgy.
* Tamara, Chloe sees that Kisha is on the phone to Tamara and asks her to lean in close so she can explain the plan, and then punches Kisha in the face to prevent her from telling Tamara their location.
* Tamara Folson admitted to police that she slashed the man who tried raping her. However, they use this as a confession to murdering a different man. The judge hearing her petition uses this initially as a pattern of her supposed "aggression" as well, despite it being to defend herself.

* Tamara in the throat with a screwdriver when he attacks her in the basement. He then pulls the screwdriver out and stares at it blankly as he bleeds out.
* Tamara: It's revealed that Shawn and Patrick raped many girls after drugging them.
* Tamara Johnson-George (known more as "Taj") has actually lampshaded this phenomenon — she admittedly never saw the show prior to casting and didn't know how to swim or fish. She actually answered casting mostly because
* Tamara, Kisha gnaws several of her fingers down to the bone when psychically compelled to gorge herself by Tamara.
* Tamara Kisha in the deserted kitchen of the hospital (although, oddly, one the deep fryers is still running).
* Tamara passive tracking system (tracks aircraft by radar emissions).
* Tamara: Shawn lures Tamara to the motel by arranging a fake tryst with her teacher, sets up a video feed, and invites his friends to watch her humiliation. Tamara goes berserk when discovers the deception, and is accidentally killed in a scuffle with the pranksters.
* Tamara's Never Seen) movies growing up, watches them for the first time as an adult.
* Tamara's virtual copy does not fare so well, she panics at waking up in a black void and
* Tamara: Tamara comes back from the dead as a cruel, manipulative and ruthless young woman bent on revenge, in stark contrast with her meek, kind previous self.
* Tamara: Under Tamara's influence, Roger cuts his own ear off, Van Gogh-style.
* Tamara when Tamara snaps and fights back; suffering a fatal injury in the ensuing struggle.
* Tamaryu and Shizuki void themselves in terror when Ran's attempt at a laugh turns into something like a
* Tamaryu voids herself on the fifth page after imagining something scary.
* Tamashii Can't Block These Comments, criticizing Poketubers Trickywii and Tamashii Hiroka's countdown of "Top 10 Disappointing Pokemon"
* TamashiiHiroka is Worst Pikachu Clone, criticizing Tamashii's countdown, "Top 5 Pikachu Clones"
* Tamasin has a bright mind, but she doesn't work well with how the school tries to teach her. This has fed into her bad reputation, and as a result she's become prone to skipping class.
* Tamasin very rarely speaks. This is because she's aware of how badly her words can be misconstrued, which is partially to blame for her bad reputation, so she thinks carefully before she talks.
* Ta-Matoran, although it's not seen as particularly offensive or "racist."
* Tama. Who, as part of her introduction chapter, pins the titular character to the ground and bites a chunk out of them. Said title character, Himari, can't even put up any resistance. Himari only lives because Tama thinks she tastes bad.
* Tamayura), and one of the local ferries even sports huge posters of the show's main heroines. The announced TV series might raise the town's popularity to even greater heights.
* Tamayura, Fuu is supposedly very awkward around strangers, but aside from the occasional stuttering and blushing she manages just fine most of the time.
* Tamayura, Fuu's younger brother Kou is generally rather sweet and cute, although he clearly has his more annoying moments. That doesn't prevent Fuu from caring a lot for him, though.
* Tamayura seem to derive quite a bit of sensuous joy from eating tasty sweets.
* Tamberlane (lesbian, transgender, and non-binary supporting characters, and LGBT parenting)
* Tamberlane: Most of the critters of Treehollow use their professions as last names, such as Belfry Baker, while young children have a matro- or patronymic, as with Belfry's daughter Tamberlane Belfriton.
* Tamberlane overthrew/replaced humanity centuries ago. The protagonist is a human child who finds herself in a world that has completely forgotten what humans looked like and that they weren't just myths.

* Tamberlane: The Silver Sage islands are a fairly peaceful place and seem to have a good standard of living but as the comic goes on we see that it is steeped in nationalism, xenophobia and a great dislike of "desenting" ideas, to the point that they talk about going "abroad" like it's going into Hell itself.
* Tambora, which spewed so much dust into the atmosphere that it lowered temperatures for several years and made 1816 'The Year Without a Summer'.
* Tambourine's character profile lists his hobby as killing people, which is also his job. It's expanded on in the anime, where after he kills Giran, a bear person who Giran was bullying tries to thank him, and Tambourine promptly cuts him down, openly admitting to the bear's son that while he killed Giran for a job, he killed the father
* Tameem Antoniades became this when his team, Ninja Theory, rebooted the hit action game series,
* Tame Impala is about the narrator finding out that the object of his affection has hooked up with a guy called Trevor. He does not take it well.
* Tame Impala preferred to perform barefoot until 2018 - he explained that he started wearing shoes after he began walking to the front of the stage during concerts.
* Tame Impala that got minimal airplay, even on the alternative stations (though "The Less I Know the Better" became a hit four years on TikTok).
* Tamer and Chaster: An instalment in a franchise removes or decreases fanservice compared to previous instalments.
* Tamer and Chaster: Reducing the amount of sexual content in the work.
* Tamer and Chaster: The adaptation has less sexual content than the original work.
* Tamers Forever Series are vicious and numerous Digimon whose predatory and opportunistic natures make them a threat even to Mega level Digimon.
* Tamers Forever Series, during the battle against the Nightmare, Gallantmon ends up being thrown face first onto Sakuyamon's breasts.
* Tamers Forever Series: Gallantmon Crimson Mode uses up his remaining life to unleash a massive explosion that wipes out Daemon.
* Tamers Forever Series has an unusual example. Unusual in that Takato doesn't actually say it to the object of his affection:
* Tamers Forever Series of effort into expanding the digimon mythology, creating a mythos that combines computer programming codes with real world mythology and religious beliefs.
* Tamers Forever Series, Rika becomes determined to prove herself the better Tamer no matter the cost.
* Tamers Forever Series she is still the most protective of the tamers.
* Tamers situation. Iori/Cody got this treatment from his older teammates, two of whom (T.K./Takeru and Kari/Hikari) conveniently forgot that Iori/Cody is older than they were during their first adventure with the Digimon.
* tamer things is a knight who hears of a girl with the power to inflict everything done to her onto her opponents instead, making her invincible, and the knight pursues her to experiment with screwing himself by proxy.
* tameshigiri practice used to test Japanese swords. Swords that can cut more than one body in one go qualify for this trope.
* Tamie is constantly seen carrying a "Nekon" brand camera (corresponding to Nikon), which matches her hat that has cat ears and a tail.
* Tamie Nogi has her become this to Masaya. Until their trip together throughout Japan, Masaya had mostly been having an uneventful stay in Vincennes following the Premier Jugment. Her inviting him on that trip signals the change of his stay there to a far more eventful one.
* Tamiko and the Two Janitors chose to spend their unlimited life spans working in an elementary school, playing with children at recess, and gently modeling life skills. In different guises, they have been adored by generations of children.
* Tamiko and the Two Janitors, Kip falls asleep on Joe's bed following a late-night meeting in Joe's room. Joe awkwardly camps out on the floor, but Kip wakes up to realize he has rudely commandeered Joe's bed, and insists Joe sleep in. Once Joe gets in, so does Kip. Eventually, Joe overcomes the awakwardness and it becomes a

usual arrangement for them.
* Tamina Snuka in order to make others look better by beating her. She has often found herself being used as a bodyguard for other title contenders.
* Tamina Snuka: Made her WWE debut in 2010. First was a valet to the Usos before her actual wrestling career took off a year later.
* Taming Dreams ends with Mardek dreaming of Rohoph narrating the events in Chapter 2.
* Taming Dreams, everyone has a characteristic of their soul referred to as a sentiment, and people can perceive each others' sentiments effortlessly.
* Taming Dreams has Berdanre, who lost his arm, leg, and spouse in a tragic accident.
* Taming Dreams is required to get from one world to the next. That said, Mardek's father Enki managed to travel from Mji Mkuu to the Bronze Archipelago somehow, and the Meek race is spread to each of the six petals.
* Taming Strange", it's revealed towards the end of the episode that Ike's laxatives were switched with Tom Brady's steroids. Cue Tom Brady shitting himself so hard that his pants sag to the ground.
* Tamir Triad", gifted dollmaker Princess Ariani begins to produce mouthless but otherwise perfect dolls in response to the death of her newborn son. This behavior culminates in the creation of a ragged, smelly, faceless doll that contains the soul (and bones) of her dead son. As bad as the nobles thought the mouthless dolls were, the faceless doll is seen as a definitive sign of madness from just about everyone who knows her.
* Tamiya is famous for creating military model kits, a huge varieties of tanks is among them.
* Tam Lin by an elven knight who claims the virginity of any maiden who wanders his fields. She refuses to forsake him and discovers he was once a mortal man rescued and captured by the faeries and is soon to be tithed to hell for the Queen. Janet rescues him from this fate by clinging to him as he is transformed into any number of beasts. When he turns into a burning coal, she throws him into a well, which turns him back into a man, and she must hide him. For all of this effort, she wins his freedom from the faerie queen.
* Tam Lin. In Dean's version, the Fairies are described as absolutely alien: "like linear A. They look as if they ought to mean something, but you can't tell what it is."
* Tam Lin inverts this: he describes in great detail exactly what she is to do — and then we are told, in one verse, that she did exactly that. (Does prevent the repetition problem just as well.)
* Tam Lin", Tam Lin is spirited away by the Queen of Elphame [Elfhome]. He enjoys his stay there, but learns that every seventh year, the elves have to pay a "tithe [tax] to Hell". Fearing he himself will be the tithe, he flees. The Queen denies that she would have offered Tam Lin, but that still seems to imply the elves regularly sacrifice one of their own to the Devil.
* Tamlyn Tomita (born in Okinawa but during the U.S. post-WWII American occupation. She later migrated in the U.S. mainland)
* Tamlyn Tomita, helping to translate script passages into Okinawan dialect and choreographing Kumiko's dance scene.
* Tamlyn Tomita — both of whom declined to return for the subsequent TV series. Neither ever appear again in person (although Dr. Kyle does get referred to several times throughout the series). Ultimately averted with Patricia Tallman (as Lyta Alexander), who also didn't return at first, but ended up rejoining the cast much later in the series when her replacement quit.
* Tammi the cheerleader, from the Johto league, took this attitude out on her own Pokémon; she became bitchy and demanding to them and furiously berated them for any mistakes. It took a brief
* Tammy and the T-Rex comments in her review, "Yes folks, our heroes are judging a dead man's penis."
* Tammy and the T-Rex has the premise of a mad scientist stealing a guy's brain so he can use it as a test subject for putting human brains into robot bodies. No

explanation is given for why this robot body is shaped like a Tyrannosaurus Rex, why it moves on its own before the transplant, or why he promises it immortality.
* Tammy Billings). But later on, they warm up to him and fully accept him as family.
* Tammy Faye Messner, one of the few prominent Christian televangelists to support LGBT rights.
* Tammy Hattley, the SAC to whom Dex and Nadeem answer to. Fisk killed one of her kids in a staged "hit and run" and threatened her daughter. She's been under Fisk's control for so long that not even her close colleagues know she used to have two kids. She and
* Tammy looked exactly like the wealthy Lady Jayne Smythe. Naturally, this enabled the two crooks who kidnapped her to pass her off as the aristocrat.
* Tammy Lynn Sytch also turned to pornography later in her career, first through pay websites and later signing a full-on deal with Vivid.
* Tammy Lynn Sytch Shockwave, she invoked this by vacating every title belt.
* Tammy Lynn Sytch's voice has deepened considerably as she's aged, and she's not even that old. Drug use may also have factored into it.
* Tammy Mathre did this in 1978, keeping a diary in her checkbook. She was a nursing student who'd become depressed and increasingly focused on God and what the Bible says about death and dying. She went camping alone in the Big Horn Mountains. A year later a few fragments of her bones were found. The diary proved she hadn't killed herself; she'd been injured and couldn't leave.
* Tammy revealing herself to be a Galactic Federation Agent and gunning down Birdperson on their wedding day
* Tammy Wynette, but its most well-known version is a collaboration with Tammy Wynette.
* Tammy Wynette "Justified and Ancient" in 1991. Of course, on the country chart, she had dozens of hits.
* Tamora Pierce, Alanna and Prince Jonathan are each other's first loves, but they ultimately break up and find happiness with other people.
* Tamora Pierce, Aly can fool a magical truth potion by retreating into what she calls her "liar's palace", the part of her mind where she's constructed a whole character and backstory for her assumed identity.
* Tamora Pierce, and aren't evil but do take natural pleasure in human suffering. They're all immortal unless killed (except possibly the kudarung, which aren't specifically identified as immortals and might not be, since they didn't enter the human world under the same circumstances as the immortals the readers know).
* Tamora Pierce and is angered when she finds people willing to help - they'll get charged, same as her. One of them teasingly says she won't get to use the potentially very helpful maps he brought unless they come with her.
* Tamora Pierce, and it turns out that the best way to kill it is to trap its head and open a hole in it, so the child's spirit can leave. She gives a field promotion to the soldier who figures this out, even though earlier he'd almost started a mutiny over her being put in command at all.
* Tamora Pierce and Tumblr to answer fiddly questions about setting or discuss plot points in general.
* Tamora Pierce) are popular young adult fantasy novels with predominantly female main characters (only one of the ten main characters is a boy), and a heavy emphasis on gender issues.
* Tamora Pierce been planned beforehand, living in New York City on 9/11 left an indelible mark on her writing. Particularly because she had, by coincidence, been about to write that part when it happened, and it was what she came back to when she was able to write again.
* Tamora Pierce books, a character is made to drink willow tea, which she complains tastes like horse urine. Coolly, the healer informs her that horse urine tastes far worse.
* Tamora Pierce books, appropriately titled "Tilt Silly". Kel received a massive blow while tilting and winds up giggling to her former, stern training master.
* Tamora Pierce books, has a few of these in his life. Initially, when he's a

street rat and thief and has been imprisoned, he "befriends" a patch of moss in his cell (which is where he takes his last name from). In a later book when his teacher is dying, he magically follows her into death and finds himself in a huge wasteland, where he begins seeing little bits of plant growth that grow denser and denser until he finds her in the middle of a garden.
* Tamora Pierce books says something to the effect of "I may look like someone's grandmother, but some grandchildren require more raising than others."
* Tamora Pierce books use this for some of their mages, the ones who choose their names after they become certified. You can measure the size of the mage's ego (good or bad) by how sentimental their name is — compare Niklaren Goldeye the seer and Yarrun Firetamer the, er, firetamer to Olennika Potcracker the cook and Ishabal Ladyhammer the war-mage.
* Tamora Pierce book, the villain Blaise relies on his seven foot bodyguard for protection.
* Tamora Pierce by the author after she realized the relationship didn't work. Alanna becomes Jonathan's King's Champion and they both marry other people.
* Tamora Pierce can be fooled fairly easily, even when you don't have magic.
* Tamora Pierce Delia of Eldorne's tower prison would include magical barriers. Pierce's reply? "Oooh, yes!"
* Tamora Pierce example is "duckmole" for "platypus" — actually a word coined by British settlers in Australia, since there's not exactly Ancient Greek or Latinization in Tortall.)
* Tamora Pierce, George Cooper is this. He's a just an ex-commoner who married Alanna, Champion of the Gods, first Lady Knight, heiress to an ancient dukedom and all around badass. Of course, George does have his claims to fame—like being the former King of Thieves and current Spymaster for the nation.
* Tamora Pierce has a map, although not a very detailed one, of Sandry's home country of Namorn.
* Tamora Pierce is about a teenage girl whose village stakes her out as a sacrifice to a dragon that's been terrorizing the area, on the advice of the local wizard. She's saved by a peddler woman who knows that this is unnecessary; apparently dragons in this world are ordinary if dangerous wild animals and the idea that they care about having virgins to eat is just a superstition.
* Tamora Pierce" is being bullied on a regular basis and learns a less-honorable style of fighting to beat the bully, they are read the riot act. Except not, because their teacher is secretly glad the bully was dealt with and the protagonist reflects on this rule as they are being told off.
* Tamora Pierce marry even younger - and with larger age gaps - than what Daine and Numair ended with.
* Tamora Pierce means "ignorant person". So it's likely that it means some variation of "gullible idiot" and that it's use for non-Traders stems from historical attitudes of Trader cultural superiority. Probably the most literal translation would then be "Not one of us and we don't want them."
* Tamora Pierce played with this trope with an anecdote about the author's eight-year-old son, an avid reader. It was Mum's job just to bring home the books. At one point, Mum noticed that the pictures on the cover were of girls. Not boys, not animals, girls. She asked his son, "Is this a girl's book?" "No, it's not a girl's book," replies her son with all the scorn of an eight-year-old boy. Then he says, "It's about a girl." Later on in the article, the book's author (Tamora Pierce, of course) mentions that parents have thanked her for including the subject of girls' periods. "Hmm, Mum didn't know that."
* Tamora Pierce quartet call humans "two-leggers", for obvious reasons.
* Tamora Pierce quartet, every new country the characters visit has its own system of Fantastic Honorifics, with variations appropriate to each culture. All of them seem to have a special honorific for mages, which is usually gender-neutral, even when no gender-neutral honorifics are used for non-mages.
* Tamora Pierce quartets has the ability to control weather, including earthquakes, heat, lightning, and wind. When traveling to a hot country, she uses her breezes to pick up rumors, cool herself, lift herself to the top of a tower, block somebody's

path, etc.
* Tamora Pierce series. In a mild variation, she has much worse regular vision without her glasses, but can see magic better.
* Tamora Pierce series, Numair says he was encouraged by his father to speak with as many long words as possible, to prove that he actually went away to school.
* Tamora Pierce squire Joren of Stone Mountain takes full advantage of the legal privileges of nobility and confesses in court to having paid two thugs to kidnap Keladry's maid Lalasa, have her tied up and left at the top of the Needle, a thin tower (with no safety railings). The Magistrate is quite pissed and lays every single fine he can think of, which is enough to bankrupt a regular family. Joren, however, is filthy rich even by the standards of nobility and he knows that since he didn't perform the physical crime and the victim is a commoner he can't be jailed.
* Tamora Pierce's series of books set in the Tortall universe has the big gods, like Mithros (war and justice), and the Goddess (fertility, women, agriculture), but it also has minor gods like Weiryn (god of the hunt for a small mountainous area), and rather hilariously a god of crossroads, NOT a god of travelers, just a god of ACTUAL crossroads.
* Tamora Pierce's works were edited down to children's literature from more adult versions (or have changed over the course of the series in order to cater to a slightly older readership), there's quite a lot of this.
* Tamora Pierce, the Child King of Gyongxe, who was apparently selected to rule by the gods themselves, and incredibly mature for his youth. The main protagonists (Sandry, Tris, Daja and Briar) also count at times.
* Tamora Pierce, there's "laugh powder" and "hotblood wine" and and "rainbow dream." Some or all of these are probably real drugs under fantasy names (poppy is also mentioned), but we'll never know.
* Tamora Pierce turns out to have had a god for a lover. He cares for her so much that after her death he petitions (successfully) to have her made a goddess as well.
* Tamora Pierce under the username "scrivener212," every now and again.
* Tamora Pierce until Alanna tells him the truth around the same time.
* Tamora Pierce when a plant mage brings everything that was or had been a plant around a house to life and makes them so strong that trying to burn them down didn't work. It's explicitly stated that it'll be years before anyone can get close to the scene.
* Tamora Pierce, when the Discipline four (who at this point in the books are basically the strongest mages in the world when they stand together) use their magic to break the border of Namorn, they are left extremely hungry and tired for days. Briar says that if they hadn't drawn power from all across the empire, they would be dead.
* Tamora Pierce. While the main setting is based on medieval England, and features mostly white characters, there are dozens of both major and supporting characters of different ethnicities.
* Tamora Pierce whose favorite subject is math, and her classmates frequently ask for her help. During the dull stretches of managing her refugee camp in the fourth book, she amuses herself with engineering projects.
* Tamori always wears sunglasses, which have become iconic in Japan due to his celebrity status, though this is less because Tamori was trying to invoke this trope and more because he is covering up a childhood eye injury.
* Tampa Bay article on Danielle Crockett, her severely-neglected daughter, described her dilapidated room as follows:
* Tampa International Airport is supposed to have six airside terminals; however, Airside D was demolished in the mid-2000s and never rebuilt. Since the airside terminals connect to the main terminal via tram lines (a similar configuration is used at Orlando International Airport), this led to there being an elevated tram line that
* Tampering with Food and Drink: Putting deadly poison in food and drink.
* Tampering with Food and Drink: Putting deadly poison in food or drink.

* Tampopo is a sketch comedy revolving around food. Its main narrative involves a pair of truck drivers who take it upon themselves to revitalize the eponymous character's failing ramen shop.
* Tampopo there's a scene where a bunch of businessmen visits a French restaurant. Each person defers up the ladder of seniority until the CEO of the company orders (something bland and safe for people new to French cuisine, as I recall.) Each person down the chain of command promptly orders the same thing—except the most junior executive. He turns out to be an expert on French food, and makes a complex order that thrills the waiter, but embarrasses the heck out of everyone else.
* Tamrielic Adventures, the "Escape from Vvardenfell" had no real antagonist, but the "Threads in Windhelm" arc had Malvirian Linvail, a Dunmer pirate lord.
* Tamriel's two southern-most mainland regions, Elsweyr and Black Marsh, both qualify. To note:
* Tam Ryvora has Agent Tierney, who spends the entirety of her time on
* Tam Ryvora wears a visor on her forehead. She has yet to actually use it as eye protection, despite the fact that she works as a mechanic.
* Tamuli that he picked up Elene and the highly irregular Styric language in a matter of weeks.
* Tamuz skirts the line on this one; his Solar mate got a heavy dose of
* Tamyra Gray and Christina Christian (season 1, the latter getting help from the contestant being absent during her elimination). On
* Tanabata no Matsuri is the Japanese version, with Orihime and Hikoboshi as the star-crossed lovers.
* Tanabata suddenly coming out of nowhere with a steel-bladed katana, to ensure that the leaves aren't destroyed or tied to the leaves of other people.
* Tanagura. The elites themselves are ranked by hair color to distinguish their classes. The humans born naturally in the slums are "mongrels" treated as the lowest of the low that can't even attain citizenship.
* Tanaka: inhabited by ambulatory pseudo-fungi that attack anyone who comes through the gate.
* Tanaka is more well-adjusted, but flashbacks imply she had this experience too. (She's also older than Toda, so she's had more time to grow.)
* Tanaka-kun is Always Listless instead of a vicious monster (this actually made the haunted house more popular).
* Tanaka-kun is Always Listless into giving him a peaceful life wherein nothing ever happens. He fails.
* Tanaka-kun is Always Listless, Miyano calls Echizen "Ecchan," who in turn calls her "Myaano" (みゃーの, elongating "mya").
* Tanaka-kun is Always Listless tendencies is because he's just so damn peaceful and serene when he sleeps that they can't bring themselves to disturb him.
* Tanaka-kun is Always Listless. Though their past isn't yet elaborated on, they were apparently pretty close as kids and hung around each other's homes all the time before eventually drifting apart. It's claimed that the two were once part of a gang together (at least, according to the former).
* Tanaka Ryuunosuke is called "Ryuu" by his sister and best friend Nishinoya.
* Tanaka threatens the protagonist with these during his Social Link conversations to keep him from revealing his secrets. Punishments include ringing his doorbell every night at midnight and putting his picture on a dating site for former convicts.
* Tanaka Yoshiki seems to like these — in addition to the Arslan example above, he has Yang Wenli, Reinhard von Lohengramm and Paul von Oberstein from
* Tanakh (Old Testament to Christian readers), worship of anything other than the one and only God was illegal and punishable by death according to many laws and decrees by the prophets and is listed as the First Commandment ("Thou shalt have no other gods before me."). But for much of Israel's history, many rulers not only allowed worship of other things, but actively facilitated it. They were okay with magi (Persian Zoroastrian priests) even in periods where they otherwise had officially banned all other forms of worship too, since Cyrus The Great was viewed

as God's servant foretold by Isaiah after he freed the Israelites enslaved by the Babylonians, allowing them to return home. Today, Israel officially allows any religion to be practiced, but accounts from neo-pagans claim they would be cut to pieces if they ever publicly admitted to worshiping someone like Anat or Thor.
* Tana Mongeau creator, model and TV personality. She's most famous for her story time content and is openly bisexual.
* Tana Mongeau: Originally became popular for her outrageous 'Story Time' style videos. Now known for her various scandals and relationships.
* Tanarus: Tanks are the primary focus of the game, mostly of the Main Battle Tank and Hover Tank variety.
* tandem with one another, and you will really notice the improvements.
* T And T had an episode with a young boxer accused of throwing a fight. Turned out his teeth protector was laced with drugs.
* Tanduay Rhum Gold in the 90s back in the Philippines, with the catchphrase "I found gold in the Philippines''.
* Tandy Computer Whiz Kids showed everyone exclusively referring to the then-current Radio Shack products they used by their full (and often very long) names in even the most casual of conversations with very few exceptions:
* Tangail Airdrop on December 11, 1971 was India's biggest paratrooper operation, involving over 1,000 troops seizing a bridge over the Jamuna River and cutting off an entire Pakistani brigade's escape route.
* Tangent Comics and a reputation for being one of his world's A-listers.
* Tangent Comics has Wildcat, a teenage girl who transforms into a feral werecat when her handler says the word "Shazam".
* Tangent Comics loves the limelight, and tries to keep it on her and her daughter any way she can. The Flash, for one, doesn't care much about being a star, but there's no reasoning with a larger-than-life figure like her mom.
* Tangent Comics: the city of New Atlantis was founded atop the ruins of Atlanta, Georgia, after the Florida peninsula was destroyed in Earth-9's version of the Cuban Missile Crisis.
* Tangent Comics version of the Sea Devils. There's at least six or seven different species, from shark people to shrimp people, and some racial strife between them.
* Tangential but interesting: Aardman was careful to keep the animators away from the interviewees, and even the interviewers. They wanted the animals chosen to be inspired by the
* Tangerine: Dinah is a prostitute in a ring that operates out of a seedy motel room.
* Tangerine Dream? Progressive rock/New Age/World music/Electronic/Trance/God Only Knows? Further proof of how flawed these labels are to begin with.
* Tangerine during the season; the additional game ended in a tie. The problem? According to the scoring rules for soccer leagues, the winner is the team with the most points at the end of the season, not just the highest winning percentage. Since a tie is worth one point and a win is worth three, Paul's team needs to win, not tie, in order to win the league. And to make matters worse, they could have done this if they had just had the climactic penalty kick occur with Paul's team up by one goal. But of course, that would be less dramatic...
* Tangerines: Ahmed and Nika are enemy soldiers, Ahmed fighting for the Abkhazians and Nika for the Georgians. Both are laid up in Ivo's house recovering from battle wounds. Ahmed says "No, I have to kill him myself" when Ivo asks if Ahmed will turn Nika in to the Abkhaz soldiers lingering out in front of the house. The real reason of course is that after getting to know him, Ivo doesn't want to kill Nika at all.
* Tangerines, and averted. Ivo, Magnus, and Juhan push one of the army jeeps off a bluff. It rolls and tumbles a good hundred feet into a ravine. Nothing happens.
* Tangerine stars Kitana Kiki Rodriguez and Mya Taylor (both trans women) as trans sex workers Sin-Dee and Alexandra.
* Tangerine Tear down a citrus grove, bury the wood and build a street of houses on top it? Now you have termites. Try to put out an eternally burning muck fire by pumping water over it? Now you have a swamp breeding mosquitoes. Fill your storm runoff retention pond with expensive Japanese koi? Now the local birds of prey have

a new food source. Plus the sinkhole, the daily rain, the lightning... By the time the deep freeze comes around, they just break out the hot cocoa and fake fire logs in defeat, while the lower-class families of Tangerine are busy trying to save their orchards.
* Tangerine Tycoon allows you to perform a multiverse breach after buying a 5-D Tangerine, the most expensive building. This also awards you with a certain amount of uCoins which unlock perks that make your life in the next universe easier.
* Tangerine Tycoon allows you to unleash an apocalypse upon the world with the mutant tangerine upgrade. Having at least one of these will cause the sky and grass to turn red, and the human population to decrease, while the mutant tangerine multiplies at an increasingly fast rate. It is possible to fully exterminate the human species with enough time.
* Tanghi Argentini: Andre has made himself out to be an expert tango dancer to a lady on the internet. He goes to his friend Franz for some emergency tango lessons, then brings Franz along for moral support when it's time to meet the lady for real at the tango club. In the end, the trope is subverted when it's revealed that Andre was looking to match Franz up with the woman all along.
* Tangible physical injuries, of varying severity, often caused by a touch. Sometimes all or part of these injuries become a
* Tangiwai train wreck, which claimed 151 lives on Christmas Eve, 1954 in what remains New Zealand's worst rail disaster.
* Tangle & Whisper). He can show these features while disguised as someone else, with terrifying results.
* Tangled about his childhood dream, inspired by stories of very rich man who could, consequently go anywhere and do anything.
* Tangled Adventures in Arendelle of princess Rapunzel providing a window into how the youngest of the kingdom take the changes that happen in the fic.
* Tangled After Gothel uses the Stabbington brothers in her plan, they end up arrested while she leaves with Rapunzel.
* Tangled, after struggling for a whole montage to hide Flynn Rider away in the closet, Rapunzel finally manages to get the door slammed shut... directly on all of his fingers. Luckily, he's unconscious and seemingly indestructible.
* Tangled. Also in the song "I've Got a Dream" the Big Nose Thug references this trope.
* Tangled, although this may be a case of having being told by aforementioned mother that people would use her healing locks for their personal gain. She also does not want to talk about her hair much, to the point she neglects to mention its powers ("I have hair that glows when I sing") at a time when they may be needed...
* Tangled, and "Beyond the Corona Walls" reveals that he once left a crime boss's daughter at the altar. After falling in love with Rapunzel though, he's completely comfortable with the idea of settling down with her and no other woman could ever change his mind.
* Tangled and manages to trade several blows before knocking the frying pan out of Flynn's hands.
* Tangled, and rich enough that he could do anything and go anywhere. Which explains Flynn's career as a thief.
* Tangled) and the main character Rapunzel went on to become one of Disney's most popular princesses.
* Tangled as Rapunzel and Flynn Rider, respectively. In context, it doesn't become a love song until Flynn starts singing though one wouldn't assume it listening to it straight.
* Tangled. A subversion, in that the thugs in the bar all turn out to be somewhat nice guys with dreams of doing something with their lives besides being thugs.
* Tangled. Averting this trope is the reason why this movie is the second most expensive film ever made. They did very well with the hair, clothes, and water... but the fire not so much.
* Tangled begins with Rapunzel as a baby, then briefly shows her as a toddler and a young child before starting the main plot on her 18th birthday. These scenes are relevant, though, as they show Mother Gothel kidnapping Rapunzel from the castle

and Rapunzel developing her obsession with the lanterns, both of which drive the plot throughout the entire movie.
* Tangled. Being 18 years old, which would already make her adult, she is barely aged up in fanart.
* Tangled brings him back to life. This is justified, since in the original tale, Rapunzel healed her beloved prince's eyesight with her tear.
* Tangled, but is turned into a Heartless. She dies after Sora defeats her.
* Tangled came out. Now Elsa, Anna, Merida, and Rapunzel tend to get platonically paired together as the "Four Seasons".
* Tangled, causing the keys to do all sorts of gymnastics. By the end, so many have gone flying that it's hard to believe there are any left on the piano.
* Tangled development, where the darker script had her acting much more reluctant to leave her tower and more nervous around people.
* Tangled does this with Rapunzel and Flynn escaping into the cave from beneath the giant falling rock pillar. Flynn manages to grab the previously discarded frying pan at the last second.
* Tangled: During the "I've Got a Dream" song, Big Nose Thug (singing about his notoriously ugly appearance and how he'd wish people would see past that) sings "Though my face leaves people screaming..." And during this line another thug, who's drinking out of a mug of beer, violently spits the beer out of his mouth (or if you interpret it worse, vomits up his stomach contents) in reaction to Big Noses face's proximity to him — just to spell it out how harshly people react to Big Nose's appearance...
* Tangledeep, axes can hit every foe adjacent to you, albeit at reduced damage. Some abilities allow you to do things like fling magical axes away, and have them return like a boomerang.
* Tangled ends with Rapunzel and Eugene kissing while (in narration) the latter answers the question "Did Rapunzel and I ever get married?"
* Tangled Ever After is actually her homecoming celebration dress colored white instead of pink.
* Tangled Ever After: Maximus sneezes and sends the wedding rings flying a few minutes before they are needed.
* Tangled Ever After, Maximus the horse and Pascal the chameleon cause all sorts of chaos trying to recover the rings for Rapunzel and Eugene's wedding. They manage it, but then the cartoon ends with Maximus accidentally sending the cart carrying the wedding cake rolling away.
* Tangled Ever After rings, so he and Pascal have to scramble across the kingdom to retrieve them.
* Tangled, except for the prologue's backstory, takes place in less than three days.
* Tangled Family Tree: A family tree with a little too much incest going on.
* tangled family trees is said to have heralded a brief return to the quality and relevance of the mutants' heyday.
* Tangled Family Tree (such as Hercules being the great-great-grandson, and half-brother, of Perseus).
* Tangled Family Tree (though maybe less inbred considering Rhaenyra's "Velaryon" children were more likely the result of an affair, though they all died without issue).
* Tangled features actors Laura Chiatti and Giampaolo Morelli as Rapunzel and Flynn and singer Mario Biondi as Hook-hand Thug.
* Tangled, Flynn assures us in the narration that they do — and Rapunzel makes her only comment at that point "after years and years of asking and asking". The follow-up short shows he's exaggerating.
* Tangled, Flynn has been mortally wounded, and Rapunzel agrees to willingly spend the rest of her life alone with Mother Gothel if she is allowed to heal Flynn first. Before she can save him, Flynn cuts Rapunzel's hair, destroying its enchantment and freeing her from Gothel's enslavement, even though it seems like his only hope of survival. Essentially, she tries to sacrifice her freedom for his life, and he sacrifices his life for her freedom.

* Tangled, Flynn jokes that the party to celebrate Rapunzel being reunited with her parents "lasted an entire week, and honestly I don't remember most of it."
* Tangled, Flynn lifts the satchel with their loot from his own partners in the opening — and at the conclusion, lifts Rapunzel's tiara — giving it back after a dirty look.
* Tangled, Flynn presents his efforts to persuade Rapunzel to release him as a generous offer to release her — she's feeling guilty about abandoning her mother, so he will bring her back without showing her what he promised, and she will give him back what he stole. When that doesn't work, he brings her to the Snuggly Duckling in an attempt to show her the thugs she fears and persuade her thus.
* Tangled: Flynn Rider, in a mocking tone, lets out a mocking "Yayyy!" after Rapunzel tells him that she likes duckling when they arrive at the Snuggly Duckling.
* Tangled: Flynn tries to get rid of Rapunzel by using her fear of disobeying her mother, by encouraging her to do it:
* Tangled from a selfish, thieving rogue to something closer to this trope.
* Tangled gives us the jaded, worldly-wise thief Flynn Rider and the spirited, innocent princess Rapunzel.
* Tangled, Gothel brings Rapunzel hazelnut soup, saying that is Rapunzel's favorite food. Zigzagged in that only Gothel but not Rapunzel herself says this, and it's implied that it isn't a favorite food of Rapunzel's and Gothel is just making this up as part of her emotional abuse of Rapunzel.
* Tangled, Gothel draws the Stabbington brothers into her plans by a promise of revenge on Flynn.
* Tangled, Gothel is dependent on Rapunzel's magical hair to keep her perpetually young; without it, she will rapidly age until death.
* Tangled had Rapunzel decide to leave Gothel to rot in her tower after finding out that she kidnapped her from her real parents when she was an infant in order to hoard her magic hair for herself. Gothel, however, is having no punishment of the sort.
* Tangled has 70 feet of hair! It's to be expected, since she's, you know, Rapunzel.
* Tangled has Mother Gothel, who locks Rapunzel in a tower the night she was born and is determined to keep her there forever, to preserve the immortality granted to her by the magic of Rapunzel's hair.
* Tangled has Rapunzel, the lost princess, and Flynn Rider a.k.a. Eugene Fitzherbert, an orphan turned thief. Neither of them knows she's the princess for quite some time, though.
* Tangled, he does try to protect her the moment he thinks she might actually be in danger and seems genuinely concerned when the head thug is bearing down on her.
* Tangled, implicit in the epilogue, where all the thugs from the Snuggly Duckling are living out their dreams, and Flynn himself, who had already been slated for execution, gets to marry the princess instead.
* Tangled implied that he became swept up enough in the song's sentiment to respond later to a thug's exhortation to "follow your dream" with a genuinely enthusiastic "I will!" (the thug was actually addressing Rapunzel and thought that Flynn's dream sucked, but still).
* Tangled includes references to scenes that were cut from the movie, including Flynn encountering a bear and Rapunzel consulting a psychic monkey.
* Tangled In Time: Link was kidnapped as baby from his parents, Sir Raven and his wife, the former being the one who holds out hope of reuniting with their son. Sir Raven does not find out that the lost kid and the father at marketplace are his long-lost son and his son's kidnapper.
* Tangled In Time sets a glamour on Link so the latter would look like a young version of himself so he would pass as his son. Only for the spell to take Mr. Dragmire literally and make Link look how he truly looks under the Dragmire disguise.
* Tangled: Inverted. The pub thugs when the viewer first meets them, seem to be

only defined by their being criminals; but once the song "I've Got A Dream" comes, we find out they all have hobbies (playing the piano; baking; mime; interior design; etc.) that they'd really love to turn into their jobs.
* Tangled in what is otherwise the adaptation of a classic fairytale; several of her actions wouldn't be out of place coming from a caring parent, but she also keeps Rapunzel inside the tower by making the world outside sound scary and discouraging her from thinking for herself.
* Tangled, just as Eugene and Rapunzel are about to kiss, the former saw the Stabbington Brothers waiting in the shore and in order to keep Rapunzel safe, he decides to head on shore to give the tiara to them. However, since he does not tell Rapunzel of their presence (whom she previously saw attempting to kill them), she is led to believe that Eugene truly abandoned her for the tiara, which traumatize her enough that led to Gothel successfully regaining hold of her to return to the tower.
* Tangled leads her to to the conclusion that she's the lost princess. Of course, the audience has known since the introduction.
* Tangled makes Rapunzel a more pro-active character, who knocks out the male lead with a frying pan as soon as he sneaks into her tower. She also uses her hair itself as a weapon numerous times. Like Esmerelda, this is downplayed - as Rapunzel's strength lies in her kindness and compassion for others.
* Tangled manipulates Rapunzel into staying in the tower not because the world is a dangerous place or because she loves Rapunzel, but merely so she can keep Rapunzel's fountain-of-youth hair to herself.
* Tangled, Mother Gothel extinguishes a whole row of candles this way during her song "Mother Knows Best", all without missing a beat.
* Tangled: Mother Gothel manipulates events to successfully convince Rapunzel that Flynn betrayed and abandoned her. Unfortunately for her, Flynn escapes her set-up and immediately races back to Rapunzel, resulting in their reconciliation and Gothel's defeat.
* Tangled no less! His dialogue was cut from the final movie so although the king appears he doesn't speak.
* Tangled of the script played it straight. Bastion was Rapunzel's love interest before Flynn but was scrapped for a more conventionally handsome protagonist. Bastion was a very large guy while Rapunzel is somewhat short. Rapunzel didn't even reach Bastion's shoulders.
* Tangled. Oh sure, it's awesome to have hair that glows and heals any wound and reverses aging, but when you get kidnapped from your birth parents, and said hair grows 3 times as fast as regular hair, there are problems that can arise. For instance, it apparently takes 3 hours to brush her hair, and 6 hours to wash it. And with 70 feet of it by the time you're 18, it can also be a real drag (literally) to lug around. And yes, you could braid it to make walking easier, but then if it catches on anything, you're stuck.
* Tangled opens with Flynn Rider, as the narrator, telling the audience that "This is the story of how I died." By the end, it turns out to be half-true.
* Tangled pretends to be Rapunzel's loving mother, but in actuality, she was the woman who kidnapped Rapunzel as a baby because her hair was full of magic from the flower used to de-age Gothel that got crushed into medicine for Rapunzel's real mother, the queen.
* Tangled, Rapunzel and Anna both have dreams that feature past events but foreshadow future ones.
* Tangled, Rapunzel and Eugene's relationship kicks off with her knocking him out with a frying pan after he breaks into her tower.
* Tangled, Rapunzel and Flynn are trapped in a cave that's filling up with water. He tells her he can't find an exit, it's too dark, and confides in her what his real name is. Wanting to reciprocate, she tells him she had magical hair that glows in the dark when she sings. It even takes her a few moments after that to make a connection. Justified, as she wasn't accustomed to even thinking of that as a useful ability.
* Tangled), Rapunzel can paint, dance, cook, play guitar, sculpt, and knit, among

other things. Plus her hair alone has many different uses, and she sometimes utilizes it in defending herself.
* Tangled: Rapunzel is more confident and capable than the classic archetype, but fits as a result of being cut off from the world. The movie doesn't hesitate to play her naivety for as many laughs as possible though.
* Tangled: Rapunzel is more cute than beautiful, and her mannerisms (such as hiding in her hair when scared) and personality make her the one of the most adorable Disney Princesses.
* Tangled: Rapunzel is pretty lively. Her never having been outside before only makes her more excitable.
* Tangled: Rapunzel narrowing her eyes. Rapunzel also has a little half-laugh she'll do when she's nervous or excited. She shares this trait with her mother - which, even more than their strong resemblance to each other, really drives home their connection to each other when they reunite and both do the little laugh.
* Tangled: Rapunzel's clothing doesn't change, but when Flynn gets four little girls to fix up her hair so it doesn't drag on the ground while they're touring the kingdom, Rapunzel ends up looking even cuter than before. Flynn's face when he sees the final result has the name of this trope written all over it.
* Tangled, Rapunzel scrambles onto Flynn's back when something rustles in the bushes. It's a rabbit.
* Tangled, Rapunzel treats Flynn's hand with her hair, after they escape drowning.
* Tangled: Rapunzel uses her magic hair to find the way out of a flooded cave.
* Tangled: Rapunzel, who is able to lift Mother Gothel up and down the tower every day using her hair and her hands. She makes it look pretty much effortless. Also, she manages to knock Flynn Rider out several times with a frying pan, and later helps him escape some guards by letting him swing on her hair.
* Tangled revolves around this. When the king's army takes the flower that Gothel had been using to keep herself eternally youthful for centuries and uses it to heal the queen, its power is transferred to Rapunzel's hair, which loses its power when it's cut. Gothel then kidnaps Rapunzel and keeps her in a tower, doing everything she can to ensure that she stays there forever, so that Gothel will always have access to Rapunzel's hair when she needs it to rejuvenate herself.
* Tangled she is very optimistic and chipper despite being locked up for eighteen years with no human contact besides her mother.
* Tangled, she turns to Rapunzel and says, "Now look what you've done."
* Tangled, shortly after Rapunzel leaves the tower with Flynn, she's startled by something in the bushes. Much to her embarrassment, it turns out to be neither thugs nor ruffians, but a harmless bunny rabbit.
* Tangled shows Rapunzel and Flynn consulting a fortune-telling monkey, in reference to a deleted scene in which Rapunzel and Flynn escape some guards with the help of a gypsy and her pet monkey.
* Tangled shows: she kisses Flynn on the mouth much as Mother Gothel kissed her. Flynn promptly pulls her closer and starts to demonstrate the differences before the cut.
* Tangled's "I See the Light" inverts it starting out as the internal thoughts of Rapunzel and Flynn before leading into a duet between the two for the last verse.
* Tangled, some international versions let Rapunzel's name be the title.
* Tangled. Still, the merchandise mainly shows Rapunzel with her long hair, like Mulan.
* Tangled Strings of The Marionettes "speak" via dancing. Humans, lacking tentacles, have considerable difficulty understanding them.
* Tangled: Subverted with Flynn. He's clearly annoyed when the Thugs sing "I've Got a Dream". He eventually joins in but only because the Thugs threaten him with knives and swords after he tells them he doesn't want to sing.
* Tangled than their swords. The end of the film reveals that all the kingdom's soldiers apparently now carry frying pans.
* Tangled (that she kidnapped, admittedly; but still, you would think she would give the girl some respect). The following is especially cringe-worthy:
* Tangled, the guard captain is tweaked with demands for a password during the

rescue.
* Tangled. The last part is deconstructed; Gothel kidnaps Rapunzel because of it.
* Tangled. The line "Sew a dress!" became "Avoid clothes!". And again when the line "All of the nights I don't remember when you're 'round me" from the Jonas Brothers' "Sucker" became "At night in the kitchen there is no clothes". Google's algorithm seems determined to get Malinda to take her clothes off.
* Tangled, the magic flower and later Rapunzel's hair serve this role for Mother Gothel. Singing the magic song restores her youth.
* Tangled...then Flynn spots the Stabbington brothers waiting for him on the shore and pulls away.
* Tangled. The protagonist Rapunzel has a small lisp while her love interest Flynn doesn't.
* Tangled: The Series: After learning that Rapunzel has her golden hair back but won't explain how that happened, Eugene urges her not to keep secrets from those she loves. Moments later:
* Tangled: The Series and vows revenge on her (and by extension, all of Corona) for turning away from him.
* Tangled: The Series'. Another 5-6 month hiatus happened between the season 2 finale ("Destinies Collide" - April 14, 2019) and the season 3 premiere ("Rapunzel's Return" - October 7, 2019).
* Tangled: The Series as a kindred spirit is debatable, but she's still not the friend she claims she wants to be.
* Tangled: The Series), a sequel to the show focusing on the adventures of Varian and his companions — his apprentice Yong, his rival Hugo (a character transplanted from Ritter and Lencioni's D&D campaign), and a princess named Nuru — as they journey across the Seven Kingdoms to discover what happened to Varian's long-lost mother.
* Tangled: The Series, as its landmass is Europe and appears to be set where France would be.
* Tangled: The Series as punishment for betraying the Saporian cause, and who tried to reduce the whole Kingdom to ashes with all the population.
* Tangled: The Series at one point and wrote "Cassandra... how can this be..." on the page. She flips through that page in the final episode.
* Tangled: The Series: Cassandra is always getting in between Rapunzel and Eugene's romantic moments.
* Tangled: The Series, Cassandra is revealed to have been courting a mysterious man named Andrew. It is revealed, however that it was fake on both ends— he was doing it to steal an important artifact and she was aware, playing along in the efforts to catch him and expose him, in an attempt to prove her worth as a guard.
* Tangled: The Series", complete with the sound of sinew being twisted.
* Tangled: The Series consists of an overarching arc with a different plotline:
* Tangled: The Series, decides to stay with Cassandra both out of her own burgeoning romantic feelings for her friend and, because of the latter's growing emotional instability throwing Corona into near-irreparable chaos, to get her to see reason. So far, it's a long process.
* Tangled: The Series episode "Curses!", Rapunzel angers a gypsy by refusing to give up the telescope given to her by her father. The gypsy then declares that Rapunzel will be cursed with misfortune. After experincing all kinds of bad luck, Rapunzel is about to give up her telescope to end the curse until Eugene gives her a moose tooth that is supposed to be a good luck charm to counteract the curse. After this, Rapunzel then gains the confidence to cross a dangerous ravine. But halfway through, the tooth is revealed to have come from Shorty's mouth, and she starts to worry that the curse will prevent them from getting to safety, until Eugene tells her that luck only exists if you believe in it.
* Tangled: The Series: Eugene puts his skills as a former thief to use by getting a job as a consultant for the Royal Guards.
* Tangled: The Series first appears in the episode and reveals he has helped the Saporians take over Corona, he has a goatee. He loses it as soon as he is redeemed. Subverted in that it is just drawn on and Lance wipes it off with his thumb.

* Tangled: The Series has this in the form of "Tangled: Before Ever After." The odd 55-minute running time was a result of the crew being unable to edit the desired story down any further, and the studio acquising to their request for an increased runtime.
* Tangled: The Series: In "Painter's Block", whoever Sugarby puts under her spell will have glowing white eyes.
* Tangled: The Series in the form of this trope in "Destinies Collide"
* Tangled: The Series: In the story "Guardian's Day" from the issue "Hair It Is", Cassandra is shown to be a bad gift-giver.
* Tangled: The Series it". Discerning readers will recognize that Varian is actually replying in the affirmative to Eugene's question despite phrasing it as a denial.
* Tangled: The Series). It's thus not uncommon to have Cass and Elsa hit it off during a visit or have Cass conveniently shipped off to be Elsa's new lady-in-waiting.
* Tangled: The Series it was established she is afraid when people attack her, and while capable of defending herself, she's far more likely to run away.
* Tangled: The Series manages to render a truth serum from a potion that inverts a person's most prominent personality trait.
* Tangled: The Series. None of it works. Rapunzel literally tells her point-blank that there's nothing she could possibly do that is so heinous that it would make Rapunzel give up on her.
* Tangled: The Series: One of these occurs at the beginning of "Rapunzeltopia" when short-haired Rapunzel meets her long-haired alter ego:
* Tangled: The Series: Played straight in "The Lost Treasure of Herz der Sonne", when Feldspar translates the inscription of the treasure map.
* Tangled: The Series "Queen For a Day". It is then followed by "Painter's Block" and "Not in the Mood", which are set after said episode and before "The Quest for Varian".
* Tangled: The Series Rapunzel accidentally cuts herself off when expelling Creighton from the palace.
* Tangled: The Series: Rapunzel and Eugene are interrupted quite a few times before getting a moment all to themselves in the pilot movie.
* Tangled: The Series: Rapunzel has been having visions and nightmares about Mother Gothel for a while since the night with the spikes. It's not explained why, but it's either a consequence of her touching the spikes...or a likely sign she has PTSD from being kidnapped as a baby and then abused for 18 years.
* Tangled: The Series, Rapunzel is ignorant of what it means to be booed by someone, so Cassandra explains:
* Tangled: The Series recite an incantation, but once they get there, Creighton appears and reveals that she wrote that part herself to trick Rapunzel into bringing the beast right to her so she can kill it.
* Tangled: The Series special "Queen for a Day", a deadly blizzard strikes Corona due to a curse cast by the warlock Zhan Tiri, causing Frederic and Arianna to fall into danger. Eugene, Lance and the Snuggly Duckling thugs band together and travel through the blizzard to find them and rescue them, despite putting their lives at stake.
* Tangled: The Series Varian is incredible for this in the episode "Secret of the Sun Drop". There's too many layers of how detailed his plan was. But technically, he got what he wanted, but he didn't get the results he was expecting. And mind you this kid is like 14 years old and with this level of preparation he could be a Chess Master.
* Tangled: The Series was CGI but its cartoon midquel is in hand-drawn animation.
* Tangled: The Series, which eventually comes true in the next episode, yet she doesn't say a single word.
* Tangled: The Series with amateur animators. As a result, many people learn of it from animatics without realizing it's from a Disney cartoon.
* Tangled: The Series with her, as such. They simply happen to have come to the same exact conclusion.

* Tangled thief, like his favorite character. Rapunzel tells him she likes his real name better, and she is implied to be the first person who liked him for himself.
* Tangled thief named "Bastion" who only robbed because he had no other choice growing up an orphan, making his more true to the original prince, however the team decided to revamp his character into something "sexier".
* Tangled to have been this. In one episode it's heavily implied that he once had a threesome with a warlord's twin daughters, and another episode reveals that he got far enough with a crime boss's daughter to leave her at the altar. Much like Naveen above, this was before he met Rapunzel.
* Tangled to sing about their dreams. When they try to get Flynn to add his dream, he turns them down. After they all point their swords at him, he immediately joins in.
* Tangled Up In Blues does this for the background character Noteworthy, essentially giving an overarching story to all his appearances in the original show.
* Tangled Up In Blues: The chapters are all titled "The [something] Blues", usually referring to the prominent location or character from the chapter, until the last one (which is simply "The Friendship Blues").
* Tangled Up In You, Adrien falls asleep in Marinette's room and she pulls a blanket over him before lying down herself.
* Tangled Up In You at one point drops us into a discussion about giraffe scarves.
* Tangled Up In You has a fairly brief one, when Marinette notes that Adrien is "so adorable when he's asleep" but lies down to sleep herself soon after, not really lingering on him.
* Tangled Up In You has several dozen of these, most of them brought on either by Marinette's crush on Adrien, Adrien's crush on Ladybug, or, in later chapters, Adrien's developing feelings for Marinette.
* Tangled Up In You, insofar as it convinces Adrien she didn't tell them anything.
* Tangled Up In You is interrupted when Adrien gets hit in the face by a snowball from a nearby fight.
* Tangled Up In You, Marinette and Adrien build one in her room during a sleepover. It's stated that Marinette hasn't made one in ages, while Adrien never has.
* Tangled Up In You position, and then later when he tries to get her to admit to making a pun.
* Tangled Up In You, when Marinette is about to take Adrien's measurements for a Ladybug onesie, he takes his shirt off before she tells him that he doesn't need to strip for this. He apologises and says it's a habit he's picked up from his photoshoots.
* Tangled was changed to "To på Flugt: Et Hårrejsende Eventyr" (Two on the Run: A Hair-Rising Fairy Tale/Adventure). The subtitle is probably a call-back to the original title.
* Tangled was originally supposed to look like an oil painting on canvas, but the technology was never perfected, so it ended up being done with conventional computer animation. However, the look is much softer and more fluid than any movie that's come beforehand, and the character designs are a very good translation of Disney 2D. That said, the oil painting look can be seen in some of the backgrounds. It's especially evident in some of the forest scenes.
* Tangled Web of Spider-Man as revenge for a previous betrayal. As with most of the injuries to Kangaroo in this series (laser cannon exploding in his crotch, getting a foot up his behind), it is played for laughs.
* Tangled Webs there's a scheming vengeful bastard out to get you usually has the target sweating long before the actual revenge is done..
* Tangled: When Flynn and Rapunzel seem to be about to kiss near the end of the floating lanterns scene, Pascal turns pink and covers his eyes. Kinda subverted, though, when he immediately peeks between his fingers.
* Tangled, when Rapunzel is supposed to be so young that her parents are still celebrating her birth, she has long hair and can hold up her own head and focus and otherwise act months older (though the surprisingly long hair could be because her hair's magical). The narration describes the period of time before Gothel abducts

her as "a moment."
* Tangled where Rapunzel and Flynn were trying to reach each other during the "Kingdom Dance" but don't come together until the song has ended.
* Tangled, which was 7 minutes of mostly slapstick, where the original spread out the slapstick over the longer running time.
* Tangled while "Something That I Want" is rather easy to separate from it.
* Tangled, who can be reasoned with when talked to. He even becomes an actual member of the Royal Guard and becomes friends with his former enemy, Flynn Rider, after the latter reforms.
* Tangled, who took over the role in later works, has confirmed he had also done the dialogue before it got discarded for a star talent.
* Tangled) with an axe still imbedded in the planks at the location of the head.
* Tangle Tower and exotic and even one-of-a-kind flowers. He attributes it to the unique properties of the lakewater around the manor. A major subplot involves a unique flower he bred to look exactly like Penny.
* Tangle Tower centers around is a Locked Room Mystery. A key complication of the case is that Freya and Flora were locked in the room when Freya died, and the door remained locked until Fitz kicked it down.
* Tango & Cash before shooting the oil tanker, revealing a steady stream of white powder. Tango cups his hands under the stream for a few seconds, then licks the resulting pile of powder in his hands.
* Tango & Cash: Both protagonists are framed by gangsters for murder to get rid of them, so they won't keep shutting down their drug business.
* Tango & Cash: Both villains and heroes go through windows without any cuts.
* Tango & Cash: Cash takes a guy's car this way, who loudly protests (especially after it gets wrecked in his chase with a suspect).
* Tango & Cash during a car chase in a parking garage, one of the vehicles bumps into a parked car where a couple is having sex in the back seat. The girl is on top and her naked upper half is shown as they stop and see what's going on. Several topless female strippers are seen in the strip club too.
* Tango & Cash, featuring an on-board computer, mounted machine gun, and 120mm cannon.
* Tango & Cash has made a small fortune playing the stock market. Thus, he's wealthier than his partner, Cash.
* Tango & Cash, the title characters find a dead body which is obviously wired. However, when they are put on trial for murdering the man, the recording is not used in the trial - the tape had been swapped with a second tape, which had been assembled from various sound bites of things the characters had said on other occasions, pieced together to make what appeared to be an incriminating conversation.
* Tango & Cash usually wears expensive business suits. His commander even calls him on that.
* Tango & Cash. While escaping prison, Stallone and Russell's characters use their belts and the prison's electric lines in this manner to get over the brick wall surrounding the prison.
* Tango Sector (the second episode) has red-coloured helicopters that first appear in the fourth level and make recurring appearances up to the sixth level. They fire big salvos of missiles, but their pattern is predictable enough that you can easily dodge their fire and blast them apart with your weapon of choice (namely the Laser Turret or the Twin Laser).
* Tango took a different slant: "Too much Tango made me think I was a ninja. But I'm not. I'm just Gary."
* Tanguy: The main character, aged 30 something, still lives with his parents and couldn't be moved to ... well move out. As a doctorate student in Chinese civilization, he uses his language skills to pick up Asian girls and eventually, yes, moves to Beijing where he marries a local woman. When he marries the Chinese girl, he moves in with her family and gets them to care for him.
* Tania Gunadi definitely embraces a Genki Girl side with how pumped up and energetic she gets. This is especially the case when she shows a fangirl side.

* Tania is actually a tiger, and she becomes an ally in the third season.
* Tania uses an Amazoness Deck and she beats Misawa several times before she is defeated by Judai.
* Tanica is introduced as an assassin on the team sent to kill Smith. After she is
* Tan is actually dyed, implying that it's naturally dark brown or black, which still doesn't answer the question.
* TANIS detailing a trip into the area where Tanis is suspected to be:
* TANIS host Nic Silver because he pays her. However, she's expressed interest in a few of the things that come up in Nic's investigation of the Tanis myth, such as a film said to drive insane anyone who views it. When Nic has to go to an old asylum to conduct an interview in the third season, M.K. insists on tagging along to see the asylum for herself, wonders along the way if they have an electric chair, and once they arrive, sneaks off to explore by herself.
* TANIS is said to be located somewhere within those woods and has a pronounced effect on those who go into it or even get too close. Many of the tales told during episodes feature men and women turning homicidal and/or suicidal after exposure to it, ranging from random fur trappers in the nineteenth century to Charles Manson.
* TANIS podcast because Nic pays well and regularly. She'll often go along with a request of Nic's with a dismissive "It's your dollar" or similar. That said, she does admit that she's gotten sucked in a little with the search for Tanis and, in her first conversation with Nic following his escape from mortal danger, says she's glad he survived.
* Tanita Tikaram to the point of equalling or even surpassing it in the public memory.
* Tanith First-And-Only. When you're the last 2,000 survivors of a planet destroyed by Chaos, you have to be badass.
* Tanith Lee, and his personality was much like that of Darrow's character, Avon.
* Tanith Lee, because it gives people false comfort in time of troubles.
* Tanith Lee. Ghosts have an item from their previous life that links them to this plane. If the item is damaged or destroyed the ghost is sent to its final destination.
* Tanith Lee has a list of about 12 words of slang for the adolescent 'Jang' caste of the dystopian novel.
* Tanith Lee... Ian Watson discussed the same thing in a short story about a human who married a djinn.
* Tanith Lee influence the world over the span of many millennia if not millions of years.
* Tanith Lee series, where changing bodies and genders is almost as easy as changing clothes. Officially you're only supposed to change once every thirty days, but nobody pays attention to that.
* Tanith Lee, the end states in as many words that everybody lived happily ever after. Well, almost everybody...
* Tanith Lee. The feudal lord of a certain lineage, when having two werewolf companions, gains the magic powers of an ancient wolf goddess - but only if all three are in a state of true love (not necessarily sexual). The powers are implied to be immense. The protagonist doesn't feel true love to his werewolves, just a kind of needy affection - but even that is enough to summon a hailstorm at a critical moment.
* Tanith Lee, the Gods created the universe, got bored with it, and now do nothing but stand around contemplating their own greatness. They've intervened in the world approximately three times in all of history, each of which was to deliver smack-downs on anyone who dared to challenge them.
* Tanith Lee, there's a wizard who takes on an apprentice and charges only one fee for his lessons: he gets to bugger the kid every night. When the apprentice finally quits, the wizard reveals that the sex was draining off years of his life (which were transferred to the wizard); and that to add insult to injury, for the few years left of the boy's life, he will act more like the lustful old wizard himself.
* Tanith Lee, while Jasleth is looking for a quest to join or a monster to slay, he comes across a prince tussling with a two-headed monster, but it turns out that the

monster is the prince's pet, they were just playing, and neither appreciates Jasleth's offer of assistance.
* Tanith Lee world. Cyrion's famous for solving problems involving the supernatural.
* Tanjiro's father, Tanjuro, looks outright ghastly due his illness in flashbacks, yet his Breathing techniques allowed him to perform physical feats that his body shouldn’t be able to handle, like performing his ritual of the Hinokami Kagura in the snow for hours upon hours without getting tired.
* Tank Adhesive Countermeasure ammo, Borma uses a bazooka, and Motoko herself uses a .50 caliber anti-tank rifle... with only one arm. Of course, considering that they are all enhanced with prosthetics to various extents, it makes some sense that they can wield these weapons. Togusa, the only non-cyborg, just uses a Mateba autorevolver. In the original movie, Batou also uses a man-portable HEAT SPIW (High-Explosive Anti-Tank Special-Purpose Individual Weapon), which he affectionately calls "your standard-issue Big Gun".
* Tankard. A vast majority of their songs are related to beer and drunk partying.
* tank armour is certainly capable of creating a new doorway in just about anything.
* Tank Battalion) opens with the commander ordering his underling to stand guard and threatening retribution if he doesn't wake him up for tomorrow's exercise. The underling does the same to his 2IC, going down the line until a private is told to stand guard. Naturally with his superiors bunking off the private does the same, and they all get in trouble with the political commissar for sleeping in.
* Tank Battles in Suburbia has eleven levels set across New Jersey suburbs like Montclair, Glen Ridge and Raritan, with the final level being on the Turnpike.
* Tank Controls game, is to assert that they are purposely bad so they would "deprive the player the ability to act like an action hero".
* Tank Controls: Made popular by the genre, even though it also appeared in other genres.
* Tank Controls: When a game forces you to move forward and backward separately from left and right.
* tank desant,, but is uncommon these days due to increases in tank speed and most modern forces that can afford tanks can afford separate transports for their infantry to let them keep up.
* Tank destroyers (excepting the M36, which had fairly respectable forward armor), the M18 Hellcat in particular. The Hellcat clocked in at 60mph (97km/h) on road, making it the fastest armored fighting vehicle of the war, used a long-barreled version of the 76mm gun used by the Sherman... and had only 5 to 25 millimeters (0.2 to 1 inch(es)) of armor depending on location. Modern wheeled tank destroyers have the heavy gun of a MBT and superior speed (the
* Tanker, etc powers, but they'll each use them in very different ways. To use fire as an example, a Tanker would cloak himself in flames, a Blaster would launch gouts of fire at enemies, a Scrapper would create a Sword out of fire, a Defender invigorate allies with an inner flame and a Controller would cover the battlefield in smoke and cinders.
* Tankettes: fast and well armed, but against heavier tanks or even Power Suits they were outclassed.
* Tank features a "lock and load montage" as the protagonist fires up his Sherman tank to rescue his son.
* Tank for the Atari 2600 are likely the original tank battle video games. Two players driving small pixelated tanks through a maze trying to blow each other up.
* Tank Girl. According to one of the animated sequences, Tank Girl's tank is controlled by one of these.
* Tank Girl. After Tank Girl and Jet Girl enter the sex club Liquid Silver in order to find Sam, they split up.
* Tank Girl. After Tank Girl and Jet Girl escape from Water And Power, there's a animated interlude with the two girls driving in Tank Girl's tank. At one point Jet Girl's eyes bug out of their sockets at Tank Girl's antics.
* Tank Girl against those watching. The woman's makeup is drastically overdone.

"This might take a really long time," quips Tank Girl.
* Tank Girl. And drinks beer. And snogs kangaroos. On the silly side, most plots are very thin and resolved in some ridiculous way.
* Tank Girl and Jet Girl as they force everyone at Liquid Silver to sing Cole Porter's "Let's Do It".
* Tank Girl. A non-liquid version: the dust/sand covering the Rippers' subgates.
* Tank Girl: Apocalypse leads into an Adam and Eve plot, but this is not picked up on in later books.
* Tank Girl as "Jet Girl". When first met she's a nice, meek girl who's easily pushed around and is quite smart (an expert mechanic and pilot).
* Tank Girl, basically gentle (if horny) unless they need to be vicious in a fight, or are provoked.
* Tank Girl: Booga, the title character's Ripper love interest with the mind of a child.
* Tank Girl comics, pilots a submarine that sometimes travels underneath the desert sand.
* Tank Girl, Doug gets repeatedly frustrated with the overuse of comic drawings instead of live action and guesses that the makers simply forgot to shoot several scenes and had to improvise. As it turns out, he was partially correct — in an interview, co-creator Jamie Hewlett said that he and Alan Martin had to animate several scenes because the producers forgot to film them.
* Tank Girl example. Tank Girl and Jet Girl are in prison. Jet Girl has been very serious in Tank Girl's company up to now.
* Tank Girl features Tank Girl and her allies fighting Nazis while naked.
* Tank Girl his mind after decapitation only to attach a holographic device projecting his head to his headless body.
* Tank Girl, Jet Girl is meek and mousy, and lets the Water and Power mook push her around until she makes friends with Tank Girl. By the end of the movie, Jet has quit stuttering, is telling off people on the radio, cowing the Reavers when they cross her, and even killing the mook who sexually harassed her.
* Tank Girl. Sam (a 10-year-old girl) is captured several times, with Tank Girl spending the movie tracking her down in order to save her. Subverted at one point when Sam cleverly uses a deadly toy to puncture a child molester's hand.
* Tank Girl scene transitions involved showing some comic book panels in-between scenes.
* Tank Girl's surprise. It shoots out blades when anyone claps their hands nearby. From what we see, it appears to be a self-defense tool to fend off potential rapists or other kinds of perverts (which Iggy's character was).
* Tank Girl strip published in 1989 had Tank Girl moon the reader on the last panel, the words "Up Yours" written on her bare ass.
* Tank Girl: Tank Girl has a boyfriend in the beginning, and hooks up with a guy at the end. But her immediate response to Jet Girl being sexually harassed is to pretend to be her girlfriend, and she refers to past sexual partners in the gender-neutral unless referring to a specific one.
* Tank Girl. Tank Girl, her tank, Jet Girl and the Rippers assault the Water and Power fortress at the end of the movie.
* Tank Girl. Tank Girl thinks that Jet Girl has come to take her back to the Water & Power prison she escaped from.
* Tank Girl: Tank Girl to a Water and Power trooper after offering him an "oil change"; a Ripper to a W&P trooper during the attack that freed Tank Girl, and a Ripper to a W&P trooper during the attack on the W&P fortress.
* Tank Girl, the character makes a joke implying that her first sexual experience was with her father.
* Tank Girl, the eponymous character jokes about her first time having sex... with her daddy.
* Tank Girl, the head of Water and Power is indicated as dead by the flatlining of a display that showed pretty ocean waves becoming a placid surface of water. He actually survived ...sort of.
* Tank Girl, The Rippers have a belief in such a place, as related by Booga.

* Tank Girl. The Rippers try to use nitrous oxide as one to find out if Tank Girl and Jet Girl are spies for Water and Power. It doesn't work at all: the girls only give nonsense responses.
* Tank Girl: the title character's haircut tend to change often, but one of her most common was a mostly shaven head with a few randomly colored locks.
* Tank Girl. The title character takes a shower with what appears to be dust falling on her.
* Tank Girl trade paperback, and didn't write the character again for around ten years. He was quoted as saying, "Most adaptations are like breaking into a bank vault from a sewer. This was like doing it the other way around."
* Tank Girl. While the little girl Sam is held captive in the Liquid Silver resort she tricks a customer into grabbing a silver ball she has. When she claps her hands twice, the ball sends blades into the customer's hand, incapacitating him.
* Tank Girl with a device that extracts his water into an expanding bottle until he's completely desiccated. The CEO then drinks it.
* Tank goes off a cliff, Nazi dies, Dr. Jones mourns for Indiana who seeming went down too, Indy climbs up a vine behind him and sneaks up during his eulogy.
* Tankies are selfless but refuse to risk their men unfairly. Their general understands this and so he and his aide take a walk near the range of enemy artillery while chatting about bird watching to inspire the others to make the (ultimately successful) charge.
* Tanking teams can have such a dire reputation that highly touted draft picks may refuse to play for them. In 1983, John Elway was drafted by the Baltimore Colts but refused to play for them — he was traded to the Denver Broncos, where he made it to five Super Bowls and won two of them. In 2004, Eli Manning refused to play for the San Diego Chargers and was traded to the New York Giants, where
* tank. Instead he can only be driven back to the center of the earth to slumber.
* Tank, James Garner's character uses a WWII Sherman tank he'd bought and restored to break his son out of prison, then drives it to the Tennessee border to seek a fair trial for his son and others framed by a corrupt Georgia sheriff.
* Tank Mages powerful, especially at a table that houseruled away the racial restriction on levels.
* tank) magic; the main restriction on all this is that much of humanity in the main setting does not think kindly of the supernatural.
* Tank Mc Namara, from 1996 to 2000. When the strip ended, they were folded into the Tank cast.
* Tank McNamara: In one comic about lightning delays for golf, Dr. Tszap invents an umbrella-hat that doubles as a lightning rod, and in the punch line, a storm is rolling in, heavily implying the golfer wearing the prototype is soon to get struck.
* Tank McNamara me that I'm going to try it." The last panel of the next strip showed Evert missing a shot while wondering frantically, "Where'd she get it? Where'd she get it?"
* Tank McNamara once stated that he became a football player because "I got to hurt people and it was legal." He seemed serious, although almost everything else we're ever shown of his personality contradicts this.
* Tank McNamara (one strip showed a fan holding a sign that read "We're No. 26!"). For this reason, the NBA and later the NHL have instituted lotteries whereby teams at the bottom are not guaranteed the first pick in the following year's draft. However, the odds are still heavily weighted towards the worst teams, and in any case teams are still sometimes accused of "playing for ping-pong balls."
* Tank McNamara." (Sweatsox did at least have the grace to look ashamed of himself when she said that.)
* Tankmen, and it's implied that this is since Skittles has a reputation for doing poorly in close combat.
* Tankmen are started by Steve leaving behind and losing the tank he was supposed to drive due to needing to urinate outside urgently.
* Tankmen is infamous for casually putting cock jokes into its dialogue whenever a good opportunity is found.

* Tankmen movie, they all decide to watch the movie together instead of shooting each other's brains out.
* Tankmen series will always find a way to put cock jokes and other comedic references to the human male phallic organ in their dialogue, and is in fact infamous for it.
* Tankmen starts with the war-torn remnants of a city, but what what makes it so crappy is that the warring factions don't even know what they're fighting for, but keep on warring as if it were an average 9-to-5 grind.
* Tankmen, the insult manages to actually get a serious reaction from Bill.
* Tankový prapor, thought it's meant as a satire of the communist system rather than the military.
* Tank Pong, after one player successfully kills the other and his tank is still in motion during the "death sequence" (i.e. the "dead" opponent spinning), if the victor's moving tank touches the wall bounding the playfield, his tank will suddenly start sliding rapidly along the wall, warping around off the edge of the screen and back out the opposite edge, until the next round begins. If the same victor's tank touches the beaten tank while doing so, he also takes the spinning tank with him in that joyride.
* tanks and anti-aircraft guns against each other. The country couldn't function without being completely paralyzed multiple times a day. Those in the Party who had opposed Mao were expelled, only coming back on his death. At that point, his supporters were themselves purged, most famous being the Gang of Four: Madame Mao and three other top officials who had led the Cultural Revolution.
* Tanks are almost always vulnerable from above and below, and to a lesser extent, the sides and
* tanks' are fragile and explode when destroyed, but their flames leave only smouldering rubble in less than a second. They function quite well as anti-garrison/anti-infantry units too.
* tanks decided that they'd be useful for the purpose of war, with the invention of a reliable and compact internal combustion engine and the caterpillar track making them practical to build.
* tanks die in droves) and most overpowered stuff rather toned back (Abaddon is horrifyingly powerful in combat, but at the scale of Apocalypse he can't really move fast enough to kill most things). It was the precursor to the various expansions such as Formation Dataslates and Unbound Armies, which would slowly see this attitude bleed in to mainstream 40k.
* Tanks for the Memories as it happening during "lunch hour" so all the workers were out eating when it happened. Even if we're to assume nobody stayed in to eat, or was on the can, or backlogged and working through lunch, or napping during their break, it's still very unlikely burying all of Ponyville in an avalanche didn't give a few ponies a very bad time.
* "Tanks for the Memories", Rainbow Dash would like to point out that she's not angry about Tank having to hibernate. At all.
* Tanks for the Memories", the Mane Six enter her room the conventional manner, except for Pinkie, who simply hops in through a wall (while saying "Knock knock!"). It's a far less destructive example than most — as Rainbow Dash's house is made of clouds, the hole immediately seals itself.
* Tanks generally have a bolt on the inside and an external "lock" (two holes for a padlock).
* Tanks have been long associated with the Soviet Union, which has not only often led the field in their design, pioneering or popularizing innovations such as high-powered diesel powerplants, autoloaders, smoothbore guns, and explosive-reactive armour tiles,
* Tanks in movies are invariably rather slow moving. While the original WWI era tanks were like that, modern day tanks can move up to 60-70 MPH.
* Tanks is based around this trope. In a typical game, 2-4 Allied tanks and/or assault guns meet a similar number of German tanks and engage in a brief but brutal tank-on-tank battle. The battle usually takes place in a small village or a wooded area so lines-of-sight are limited and the tanks have to maneuver around buildings

and/or trees to get a shot on an opposing tank, hopefully hitting it in its weaker side or rear armor. The battles are assumed to be skirmishes-of-opportunity rather than planned attacks so there is no nearby infantry or artillery that can provide support fast enough to affect the outcome.
* Tank! (SPI and then Avalon Hill, 1970) is one of the seminal games of tabletop wargaming, spawning several series of games at that level. Also, there have been games covering all the major tank battles of history, such as those described below.
* tanks. Tank crew were well shielded from nuclear blasts and radiation (thus, a tank not caught in the direct blast of a nuke would likely survive, and the crew would likely survive as well, especially if the tank were quickly hosed down to wash off the irradiated dirt and dust that would've landed on it), but a sufficiently high dose of highly penetrating radiation (such as high energy fast neutrons) would both incapacitate and fatally irradiate the crew, but also render the tank shell dangerously radioactive and therefore unusable. This radiation effect from a neutron bomb would be wider than the blast radius of a normal nuclear bomb, and thus would be able to knock out a larger formation of enemy tanks. Modern tanks are far better protected than those of the 60s, and a neutron bomb would have to be detonated so close to them that using conventional nuclear explosives would be just as effective, if not more so.
* tanks weren't just slower, less armored, less reliable, and less lethal than modern ones — the crew was housed in the hull along with the engine and lacked proper ventilation. It could be so hot inside (a common figure being up to 50°C) that numerous tank operations ended prematurely because its crew was too sick to continue, or even rendered unconscious. Fuel was also housed internally, making any ignition of it a death sentence for the crew. Even rounds that failed to pierce the tank's armor was liable to be knocked around into gaps in the armour and put shrapnel inside, forcing crews to be equipped with protective leather-and-mail masks to protect their faces.
* Tanks, which can throw themselves into flying tackles at other tanks. While full physics support has yet to be implemented in-game, gravity can still be used as a last-resort weapon. Particularly heavy tanks, like the Maus for example, can drop onto nearly any tank in the game and crush them to death. Any tank which can survive the initial impact will rapidly lose it's HP, so long as the assailant can remain on top of the unlucky victim.
* Tanks, with modern Main Battle Tanks striking an even balance between firepower, armor and mobility. The image, however, still sticks. The last true Glaciers would have to be the heavy monsters built or designed by the Nazis and Soviets in World War 2.
* tank" to describe an armored fighting vehicle was originally a bit of code invented by the British to obfuscate what they were actually building, hoping that people would assume the word referred to water storage units. Of course, the name ended up sticking, at least in the English language.
* Tanktoon smaller than either Russian tank on its own, let alone the two of them stacked together. The Mauschen still falls for it, at least until the tarp falls off.
* Tank-Top Tomboy: When a tank top is an indicator of a tomboyish female.
* tank treads and suspension gear in place of legs, which is never ever commented on as something unusual.
* Tank Ubers: Complete all Toontown Central Tasks, whether you choose to take the task for the Sound/Toon Up gags is optional, and max all activities and your Sellbot Suit.
* Tank Universal. In spite of playing from a first person perspective, it's not so much a simulator as it is an arcade-action game, encouraging fast gameplay against hordes of enemies using all sorts of neat power ups.
* Tank Vixens and luck works like magnetism, so those around them get good luck. Sonya Guildencrantz is the official jinx for the 101st Tank Crushing Brigade.
* Tank Vixens has "itty bitty mousie titties" and the members of the 101st battalion are well-endowed.

* Tank Vixens. Her designation is "Unit Jinx" and her function is to deflect bad luck from the rest of the unit by attracting it to herself.
* Tank Vixens: Issue #1 shows Udda von Schteppenslammer overlooking the titular vixens.
* Tank Vixens seemingly every girl in the 101st Tank Crushers is sleeping with all the others save Firen and Sonya.
* tank will kill it, or at best take it out of action for the duration of the battle. This is because tanks are very compact vehicles, so anything that gets through the armor is going to hit something important. Increasingly, this “something important” is the crew itself.
* Tanna, ends with the tribe deciding to abandon the custom of arranged marriages and allow marriages for love. Cue singing and dancing by the whole tribe in celebration, freeze frame, roll credits.
* Tannaris, Sword of Envy is a bastard sword that appears to be made of crystal. It aids the wielder's defenses and can dispel buffs from those it hits.
* Tanna. Wawa's tribe offers her in marriage to a hostile neighboring tribe as a peacemaking gesture, but Wawa is in love with a fellow tribesman and refuses to go through with it. The tribe must then consider whether the custom of arranged marriage is still appropriate.
* Tanner's Tiger Evan tries to take his ward Minna to the Montreal Expo, but the customs agent won't let them into Canada because of his membership in a Quebec separatist organization.
* Tannhäuser. At the start of the opera, she's already seduced the minnesinger Tannhauser into debauchery, and her spell on him is prevalent throughout; during Act II's song contest at the Wartburg castle, Tannhauser is entranced into singing his love for Venus, horrifying Princess Elisabeth and the court, and causing the Landgrave and the knights to condemn him to death. At the end, however, Tannhauser is saved by Elisabeth's love, banishing Venus and allowing Tannhauser to be forgiven before his death.
* Tannhäuser has Heinrich der Schreiber, an arrogant Minnesinger whom Princess Elisabeth is in love with and ultimately dies for. Heinrich never even acknowledges her, as he is busy engaging in debauchery with a Pagan goddess.
* Tannhäuser is between the chaste, spiritual, courtly love espoused by Wolfram von Eschenbach and the sensual, worldly, pagan love of Heinrich. Appropriately enough, they both sing a poetic ode to their own version.
* Tannhäuser was being premiered in Paris, he was told that they'd have to insert a ballet; he could either write one, or they'd pay someone's brother-in-law to arrange some of the thematic material from the opera into it. He said he'd write one, and that the place where it would make the most sense plot-wise would be in the very first scene. The management told him it would have to be in "the middle of the middle" because that was when they seated latecomers. Said latecomers were aristocratic patrons of the Paris Opera, who liked to dine at their clubs and thus couldn't be bothered to be there when the opera started, but still wanted to see the ballet, as they were romantically interested in the dancers themselves. Tannhäuser still premiered with its ballet at the beginning, but the uproar it caused led to interruptions, and the production was withdrawn after three performances.
* Tannhäuser, who pines after the titular hero who never acknowledges her feelings.
* Tanning stickers in different shapes can be placed on a person's body when they go out tanning. When the person is finished tanning, the sticker is removed, leaving a little untanned spot in the shape of the sticker.
* /Tansy Leefinch attitude, but she still tries to look on the bright side.
* Tansy Walcutt uses her telepathy during sex to give her partners an amazing time. And so she can plant psychic hooks in their minds to control them later.
* Tantabus Mark II because a new character appeared out of nowhere to save her from a situation that had already been established to be impossible for her to escape on her own. This is a problem, since Daring writes accounts of her adventures as fiction. With Moondog's help, Daring finds a solution: Rewrite earlier chapters so

that Princess Luna was the one who sent her on the mission, has been checking on her in her dreams since, and therefore is in a good position to jump in to help when she gets attacked.
* Tantabus Mark II because it doesn't have access to any of the dream energy that it needs to live.
* Tantabus Mark II, Fluttershy's plan for defeating the dragon involves kicking his throat, due to the softer scales. Fortunately, this is enough to dislodge the metal lodged in its larynx.
* Tantabus Mark II: Lampshaded; Daring Do (who is both an adventurer and an author) notes that absolutely everyone loves a good monologue, which is why villains still do it and authors still use it even when they're mocking the absurdity.
* Tantabus Mark II. Sometimes the only difference between a good dream and a nightmare is the presence of a flamethrower...
* Tantabus Mark II: When Moondog is talking themselves in Coranto's dream:
* Tantalog term "Meega, nala kweesta!" later. "Meega" appears to be a personal pronoun (like "I", "me", "my", etc.), "nala" is a statement of wanting, and "kweesta" means "to destroy". So the quote is literally, "I want to destroy!" That isn't really vulgar to us, but it is to the aliens who were dismayed at Stitch's then-destructive nature. Or the phrase itself is fairly mundane but Stitch used some sort of inflection that is obvious in-universe but is undetectable to we the viewers that renders the phrase obscene. Another possibility is that the obscene aspect of the phrase is cultural, not its literal meaning.
* Tantalus was a king who tried to steal some ambrosia from the gods. They found out and banished him from Olympus. He invited them to a feast at his home to "try to make it up to them"; he killed his children and fed them to the gods to prove that they weren't all-knowing as revenge for being banished. They found out about that, too (they are gods, after all) and now he's in the Fields Of Punishment. He's standing in a lake under a fruit tree, and he's starving. Every time he tries to eat or drink, the food/liquid moves away from him.
* Tantalus, whose punishment for killing his son and serving him as a meal to the gods was to stand in a pool of water beneath a fruit tree with low branches. Whenever he reached for the fruit, the branches raised his intended meal from his grasp. Whenever he bent down to get a drink, the water receded before he could get any. Thus was born the word
* Tante Droll (Aunt Droll) is famous as a "Westmann" who looks like a woman (fans are still divided between those who see him as just looking a bit feminine and those who see him as an outright transvestite).
* Tantei Gakuen Q. In it, Dan Morihiko explains that the "Q" in "Q Class" stands for "Qualified", at which point the word "QUARIFIED" is displayed on-screen in front of him in big letters, appearing one letter at a time.
* Tantei Opera Milky Holmes, absurd as it is, heaps slapstick on everybody, with the heroines getting it the hardest, though G4 (particularly Kokoro) get theirs too.
* Tantei Opera Milky Holmes does this with the male protagonist, Kobayashi Opera. He appears as an almost-unnoticeable cameo in the penultimate episode, though.
* Tantei Opera Milky Holmes has the power to control electronics. This extends from the reasonable (hacking past security systems) to the weird (turning an alarm clock into a suit of armor).
* Tantei Opera Milky Holmes Henriette are the same person because she's gotten stuck in their breasts, and knows the boyoyon feeling.
* Tantei Opera Milky Holmes her power is to activate other people's powers.
* Tantei Opera Milky Holmes. However, it turns out that she only has to say "3.14", before they're completely convinced that the person in front of them is way too smart to be Sherlock.
* Tantei Opera Milky Holmes loves Status Quo a bit TOO much for the well-being of those poor girls!
* Tantei Opera Milky Holmes. That the bear knocks her into the sky and off the cliff is a major catalyst for the episode. When Sherlock, Kokoro, and Airi come across that same bear later, it's still almost invincible.

* Tantei Opera Milky Holmes. The main characters keep missing the most obvious evidence and failing to make any kind of proper deduction.
* Tantei Team KZ Jiken Note, after Kuroki told Aya Wakatake has been in bed for two days because he was dumped...
* Tantei Team KZ Jiken Note; and since then there have been paranormal subplots for subsequent novels—but the main plot maintains realistic.
* Tantei Team KZ Jiken Note anime turns each 200-plus-page novel into 4 9-minute shorts, so this is unpreventable. Using episode 1 as example:
* Tantei Team KZ Jiken Note as this is why his performance is infamously unstable.
* Tantei Team KZ Jiken Note. At the time he was infamous for this and was forced out of the team as a result.
* Tantei Team KZ Jiken Note, Aya asks Kozuka to call Wakatake's cell phone, which breaks the stalemate by freaking out the delinquents.
* Tantei Team KZ Jiken Note, but he does come back once every few novels.
* Tantei Team KZ Jiken Note. For your information, they're seventh graders.
* Tantei Team KZ Jiken Note introduces a large number of computer science terms, ranging from the several flavours of C, to Deep Learning, and to cybersecurity terms such as DDoS. In the same novel, synthetic cannabinoids was also discussed.
* Tantei Team KZ Jiken Note is about what happened to Uesugi during his time there; and the author actually notes this novel is chronologically simultaneous to the ninth and tenth novels.
* Tantei Team KZ Jiken Note may start off as an aversion of this trope as it involves the main cast moving on a grade in the first three novels, but thereafter the cast have always been seventh graders.
* Tantei Team KZ Jiken Note, officially returns to the recurring cast in the eighteenth novel, when he returns to Aya's class.
* Tantei Team KZ Jiken Note relationship in this series is cast in friendship terms despite some of them being dangerously close to romantic, something that can be justified by the fact that the cast are just seventh graders.
* Tantei Team KZ Jiken Note series single-handedly turns the house he's cloistered in to run nearly completely in artificial intelligence (and an occasional driverless car), he falls into this.
* Tantei Team KZ Jiken Note series, there's Aya and her sister Nako. Aya is mildly introverted and constantly worrying, while Nako is energetic and carefree.
* Tantei Team KZ Jiken Note starts calling Aya "Aaya." Aya complained that only her mother calls her that way, but Kuroki justified his action by saying this is the Affectionate Nickname for most Aya's and Ayako's of this world. Eventually, everybody in the cast calls Aya "Aaya."
* Tantei Team KZ Jiken Note, there's no escaping the fact that it's one girl surrounded by boys that she and everyone around her consider to be cool and good-looking, and she even develops some feelings towards some of them. While not as strong as older Reverse Harem series, it still has the same effect.
* Tantei Team KZ Jiken Note, this is Aya's role when the KZ investigates. Her verbal abilities isn't the most useful in investigations, so her main role is to make detailed records in the eponymous case notebook.
* Tantei Team KZ Jiken Note. This pretty much means her social circle is limited to the KZ and Sunahara.
* Tantei Team KZ Jiken Note to break off with him, to Aya's own disdain.
* Tantei Team KZ Jiken Note, unlike the other two, who are lopsided in different ways.
* Tanto Cuore seems to be designed with a constantly-shifting metagame in mind. It's functionally a very simple game about managing card draw, resources, and deckbuilding strategies to gain victory points. But even the basic set has sixteen general maids, and you choose ten from that pool to play with. Potentially, you can play with seven different arms races involving various maids, even before adding in cards from the expansion.
* Tantri the Mantri in Tinkle digest, whose main goal is to kill Rajah Hooja and become the Rajah (based on Iznogoud). Naturally, he always fails, and injures himself. The Rajah is ignorant enough to believe that Tantri is a devoted servant

for getting himself into such dire situations.
* Tantrum Throwing: Things don't go your way? Throw random things around.
* Tanuki: A real animal also known as the "raccoon dog", treated in mythology as a shapeshifting trickster.
* Tanuki initially subverts this with his rather unsightly animal form, but he later switches to this trope in order to appeal to women.
* Tanuki in Japanese folklore are known pranksters who possess the power of illusion, able to disguise themselves and objects as different things. A recurring tale among supposed victims of the tanuki claim that a supposedly normal person (a tanuki in disguise as a human) would pay them for goods and/or services, only for that money to turn into leaves and rocks long afterwards. Despite this, tanuki are considered to be symbols of economic prosperity, many Japanese businesses today having statue depictions outside their door for good luck.
* Tanuki/Kitsune Contrast who are portrayed as rivals in folklore and media.
* tanuki suffers from a bit of this. They're canids often misidentified as a raccoon or a badger. Its English name is usually raccoon-dog. Same for many other languages.
* Tanya Desjani, the captain of his flagship. They still have to go back to their best behaviour while on active duty.
* Tanya has been brown-skinned for all the the games (almost averted in
* Tanya Huff and he's going to have a sore back later." Cue bogglement.
* Tanya Huff and there are more female Gales than male so they tend, in the words of one of them, to be "enthusiastically undiscriminating".
* Tanya Huff between the Gale girls. One of these, between main character Alysha and her cousin Charlie is particularly focused on in the book.
* Tanya Huff for whom the death of the other assistant means only a disturbance in the data.
* Tanya Huff, has been keeping himself alive this way for a couple of hundred years.
* Tanya Huff, Lieutenant Jarret is shaken by having killed someone for the first time, and asks Torin if it ever gets easier. Her response is along the lines of, "yes, sir. I'm sorry to say that it does."
* Tanya Huff—consists of this trope; they don't descend to killing each other, but... not by much.
* Tanya Huff memorized (the story plays it for a comedy, with some direct references to the list).
* Tanya Huff one of these, despite getting drawn in to dealing with Toronto's supernatural weirdnesses pretty frequently; he just wants to deal with the ghosts or the evil wizards or whatever and get back to his real job... which is writing romance novels.
* Tanya Huff's "A Woman's Work" is highly competent, beloved by her people, treats her staff well... and is utterly ruthless to her enemies (and her friends, if she had any). She's the type of person who wears understated, sensible clothing while her son wears flashy, extravagant uniforms because she knows who assassins would instinctively aim at. And then she marries him off to a neighbouring country's princess (sole survivor of the royal family), the Queen expecting that the princess will quickly produce an heir, following which the prince is likely to have a fatal accident. Not that she minds, as she thinks the princess has the right stuff to inherit the job of Queen.
* Tanya Huff series, policeman Michael Celluci investigates his romantic rival, vampire (and romance writer) Henry Fitzroy — and, naturally, finds the sort of gaping holes in Henry's ID that you'd expect with someone who was born (and died) well before Social Security numbers and driver's licenses were created. Of course, skeptical as Celluci is, "vampire" is not what he first thinks when he finds those holes and informs Vicki of them; he's rather nonplussed when she laughs at him when he suggests that Henry might be affiliated with the Mafia because of it, though.
* Tanya Huff series, this was part of the postulate of a coalition of hyper-pacifist races on why they never contacted less advanced worlds. They reasoned that

the races needed to grow into their technology and overcome their warlike tendencies. If they succeeded, they would adopt the same pacifist mentality and be recruited; if they failed, they'd wipe themselves out of existence before achieving interstellar flight.
* Tanya Huff series, vampire Henry Fitzroy started his unlife buried alive for three days before his sire could dig him up. Several hundred years later, this is still a Very Unpleasant Memory.
* Tanya Huff Subverted in that the race happens almost at the beginning of the book rather than the end.
* Tanya Huff, the evil queen is genre-savvy and provides numerous health benefits for her obedient subjects to invoke this trope.
* Tanya Huff trilogy, protagonist Tony Foster proves to be this for his crush, actor Lee Nicholas.
* Tanya Huff, who then withdrew after offering a show of respect (mirroring the Zulus quitting the field).
* Tanya. Luckily, the cable TV airing show this variant, while movie channel keep the silhouette intact.
* Tanya Noori. Ryoga has absolutely no idea of why she wants to kill him.
* Tanya provokes the Francois Republic with an eye towards being removed from power in exchange for a comfortable exile. The other Great Powers backstab the Francois Republic and basically tore up most of the Treaty of Triano. Notably this was a major plank in Tanya's (thought to be impossible to achieve) party platform.
* Tanya seeks to get voted out of office peacefully before the problems of post-War Germania can rear their ugly head. She starts a government enterprise to splinter her own ruling coalition (which contain radical Free Market Capitalists). She puts a man to work designing a cheap car for the masses thinking it would be a marginal profit. Instead he creates the Volkswagen Beetle, one of the most successful cars of all time.
* Tanya's is a small chainsaw in her wrist-mounted Omnitool, one of many tools in her armour.
* Tanya Tucker cast member, and Nash is a member of pop group Hot Chelle Rae.
* Tanya Tucker, from 1972. The original A-side, "Love's the Answer" was not the answer to what would be the follow-up to the 14-year-old Tucker's first hit, "Delta Dawn."
* Tanya Tucker sang about one in "What's Your Mama's Name." In what turns out to be a story of a man trying to search for and reconnect with an ex-girlfriend, the man (named Buford Wilson) travels to Memphis, Tennessee, to search for the woman, but things take an unexpected turn when Wilson meets a green-eyed girl, with whom he suspects he has a connection. After believing the girl may be his daughter, Wilson asks her the title question, about New Orleans (where he and his ex-girlfriend had their previous encounter) and if she knows a man named Buford Wilson. When others witness Wilson offering the girl candy — a nickel's worth, yet! — he is arrested for enticing a child and sentenced to a month in the county jail on hard labor. Wilson's true intentions aren't revealed until the final verse, when years later he — by now a homeless, drunken vagrant — is found dead ... a ragged coat and a faded letter contained within his only possessions. The letter, by the way, is the final clue as to the man's true intentions: "You have a daughter, and her eyes are Wilson green" ... meaning that this wasn't some random, drunken, seedy stranger trying to lure away a little girl to molest. The song became 14-year-old Tucker's first No. 1 hit in May 1973 and set the tone of much of her early material: Gritty, meaty material about adult topics and where the outcome wasn't always positive, her husky voice belying the fact she was just barely into her teenage years.
* Tanya Tucker's breakthrough hit "Delta Dawn" remains one of her most iconic songs despite only reaching #6. "Texas (When I Die)" and "Two Sparrows in a Hurricane" are also among her most downloaded songs, with respective peaks of #5 and #2. Also, her only Top 40 pop hit was "Lizzie and the Rainman", which is nowhere near as popular as the likes of "Delta Dawn", "What's Your Mama's Name", or any of her popular country releases from her 1986-94 comeback period (none of which crossed

over at all).
* Tanya Tucker's "I Believe The South Is Gonna Rise Again" with the line about her sharecropper father who "died a tired old man at 44."
* Tanya Tucker's "Some Kind Of Trouble". First it starts with her landlord coming to remind her that she's late with the rent. Then she calls her old boyfriend for some advice, only to get another woman on the other end of the line saying, "Hang up the phone." Then she talks to her boss about working overtime or something, only to be told by the boss that she no longer has a job. With those three strikes against her, she then turns to a preacher and asks him to pray for her, and he just says "all of God's children got to deal with their own kind of trouble."
* Tanya Weinberger's short cartoon "Fast Food!" revolves around a trio of chefs planning to make
* Tanzania is a union of two separate territories in East Africa: Tanganyika (a British, formerly German, colony) and Zanzibar (an offshoot of the Sultanate of Oman).
* Tanzania; they are all kicked out of school and blamed for becoming pregnant.
* Tanz Der Vampire, Alfred is searching for Sarah and vows to protect her, at any cost.
* Tanz Der Vampire and sings a whole song about how smart he is and proving it later on by singing a song consisting entirely of authors whose books he read. Apart from those two songs (and his bit in the finale), he is not overly boastful, but his exceedingly inquisitive nature combined with a certain amount of tactlessness doesn't make him very popular with the villagers, who live in denial.
* Tanz Der Vampire a shameless flirt who lies to get what she wants and spends hours at a time quite possibly pleasuring herself in the tub, vocalizing orgasmically about it.
* Tanz der Vampire, but it could also represent the vampire's successful takeover of the world.
* Tanz Der Vampire. Human!Magda has a skinny red braid. Vampire!Magda has voluminous, cascading red tresses.
* Tanz Der Vampire, if you happen to be a mortal, and thus on the menu. Alfred and Professor Abronisus are normal humans, so when they become trapped in the ballroom they steal vampire costumes and desperately try to dance along to escape detection, though they're always two steps behind. It works... for a while.
* Tanz Der Vampire is like this toward Sarah. Herbert is a less loser-ish version toward Alfred.
* Tanz Der Vampire is mostly sung in (loud) German, as is the rest of the play, but contains a few English lines even in the original version. These aren't found elsewhere and there's no reason given for them other than just escalating that last song.
* Tanz Der Vampire literally nails the door to his daughter Sarah's room shut while soliloquizing about how his own lusty nature has convinced him that any man, given the opportunity, would steal her away from him.
* Tanz Der Vampire — blond, androgynously pretty and flamboyant, he becomes infatuated with the young vampire-hunter Alfred and tries to bite him.
* Tanz Der Vampire person the Graf loves properly anymore, to the point of basically tossing the hero to Herbert as a present. Awww?
* Tanz Der Vampire. She spends the musical longing for the Count's bite even as Alfred sings of his love for her.
* Tanz Der Vampire, the disastrous Broadway adaptation. (In short: The producer had it rewritten into a spoofy comedy, thinking that would play better to Americans, and then allowed lead actor Michael Crawford more control over the show than songwriter Jim Steinman.)
* Tanz Der Vampire. There's wolves, wilderness, an ancient castle, and the dangerous Count von Krolock.
* Tanz der Vampire: "Totale Fnsternis" (Total Eclipse) is a remake of his smash hit Bonnie Tyler ballad "Total Eclipse of the Heart" with mostly changed lyrics (and, in the American version of the show, the audience reacted to it as a parody of the famous song - entirely unintentional). "Die Unstillbare Gier" (The Insatiable

Greed) re-used the melody of his lesser hit Meat Loaf ballad "Objects in the Rear View Mirror May Appear Closer Than They Are" with completely new lyrics. And "Gott Ist Tot" (God Is Dead) and "Einladung Zum Ball" (Invitation to the Ball) both use parts of the more obscure "Original Sin" originally recorded by Pandora's Box and covered by Meat Loaf in 1995.
* Tanz Der Vampire, we see him practically writhing in the dirt of the castle graveyard as he castigates himself for being driven to destroy what he loves and never rising to the true pinnacle he always wanted to achieve.
* Tanz Der Vampire. Western productions tend to go the other route and gives him white hair.
* Tanz Der Vampire, with Sarah pressing her face to Alfred's shoulder with her back to the audience. When she turns around again, though, she's developed an interesting new set of teeth...
* Taoism has a similar concept known as Immortals (Chinese, Xian), which is basically the same concept as the Buddha or Boddhisatva of Buddhism. It's unknown if the concept is original from Taoism or if it was adapted after Buddhist influence on it.
* Taoism is basically this trope. They see good and evil as not a strict moral dichotomy, but as complementary. In fact, it mentions instances where things that seem crooked are actually more good than supposedly good things.
* Tao Jun and her mind-controlled zombie puppet kung-fu guy Lee Pai Long from
* Taokaka comes from a race of cat-people who hide their real faces underneath hoods, giving them a decidedly
* Tao Okamoto, and cast her in the part despite her lack of resemblance to the comic character.
* Tao Okamoto was originally known more for her modeling and didn't have much interest in acting. That all changed when her agent informed her that if she agreed to be in
* Tao Pai Pai and his brother Shin aka Crane Hermit. Tao is headstrong and precise, Shin is cautious and has others do his dirty work.
* Tao Pai Pai charges 10 billion Zeni per kill, but nonetheless loves killing people. Hell, the
* Tao Pai Pai, known in the English dub simply as Mercenary Tao, an assassin who wears a
* Tao Pai Pai (Mercenary/General Tao) does this when he's losing his rematch against Goku—following up his "surrender" by throwing a grenade. Unfortunately for Tao, Goku deflects it right back at him...
* Tao Pai Pai's preferred method of travel was to hurl a log towards his destination, leap on top of it, and ride it into the horizon.
* Taopo Swamp: The actual swamp is only one screen, but it's so thick that you can
* Tao. Tao, apparently, was responsible for re-awakening remorse in the Dark Lord.
* Tao te Ching is an attempt to do this to the Tao, through a series of analogies.
* taotie, though versions varied on whether it also had eyes on its head as well.
* Taped Fist Match — The wrestlers must compete with their fists taped, the idea being that this would make it harder to grab each other while at the same time protecting their hands while punching, basically encouraging the athletes to "fight" instead of wrestle. Traditionally, these would be made in response to someone receiving multiple disqualifications for closed fist strikes but as that became less of a thing, wrestlers would simply be put in them as punishment for cheating or attacking someone outside of sanctioned matches.
* Tapeheads, and the guard on tape is seen dancing along to the music.
* Tapeheads of him on live TV, which gets them arrested by the FBI. They're acquitted of the crime, but go to jail anyway for outstanding traffic warrants.
* Tapeheads, they're asked for a copy of the unpremiered video. Being low on funds, they put it on a video that previously held a videotaped funeral, accidentally copying only the audio. Fortunately, the song just happened to fit the funeral visuals very well, and it is lauded as a masterful work of art, even winning an award.
* Tapejara in "Giant of the Skies" were restored as mainly black with a red crest,

years before fossil evidence confirmed those same colors.
* tapered off after Kevin Murphy took over as Tom Servo from J. Elvis Weinstein and ceased entirely partway into the third season.
* "Tapestry" begins with Picard on the brink of death after an energy blast stops his artificial heart. He finds himself
* "Tapestry" reveals that this is how Picard got his first command. He was serving as a bridge officer on the
* Tapestry. When he goes to Troi and Riker asking about his performance, they end up falling into this.
* Tapestry" where Picard was supposedly killed in a meaningless bar fight. Much to the dismay of his crew.
* tapetum lucidum: if there's a dim light source (like a campfire) behind the person peering into the darkness, it may be bright enough to reflect off the tapetum and reveal the animal's eyes but not bright enough to make the whole animal visible. Nearly all nocturnal predators have a tapetum lucidum, because it improves their night vision, including all the ones that you really don't want to have lurking around your campfire...
* tapeworm done by the end of 2007, then struck it through and appended 2008. Both years, of course, have long since passed.
* Tapeworms aside, it should be mentioned that they usually appeared as cave-dwellers forging weapons and jewelry. Sometimes with remarkable results. It was cave-dwelling dwarves who made Þór's hammer (always hits, destroys its target, returns to the user), Óðinn's spear (always hits its target), Freyja's necklace (shining like the sun), and the nine golden rings (give birth to new rings). Thus the legend of the stunted master forgers in the mountains was born.
* Taping EVPs and scanning for electromagnetic signs of ghosts is a crucial part of
* Tapion fills this role for kid Trunks as well in said movie, especially since he lost his own younger brother.
* Tapio Rautavaara, one of the most beloved singers in Finland, also won the Olympic gold in javelin at the 1948 London Olympics.
* Tapirs can be killed by chasing them into water so they drown (even though real tapirs take to the water to escape predators). Not to mention they are referred to as "Asian tapirs", when they have the coloring of a Baird's tapir (native to South America). Interestingly, the game also has a Malayan tapir, but it's referred to as a "white-bellied tapir" and is regarded as an alternative skin coloring.
* Tap on the Head: Someone gets knocked out via a hit on the head but suffers no damage from it.
* Tap on the Head: Someone is knocked unconscious by being hit on the head without suffering any permanent injury.
* Tapper down the bar and into the wall. You also lose a life if you send a mug down a bar when there isn't a customer there to catch it.
* Tapping the build number 7 times will unlock the otherwise hidden "developer settings" on most Android devices.
* Taps is to be closed down and razed. The outraged students refuse to allow it and end up in a confrontation with the authorities.
* Taps starts a gunfight with the National Guard with a machine gun (outnumbered 100:1 and they have a tank) rather than admit defeat during their standoff. When confronted by his friend and commander Cadet Moreland he raves about how beautiful the battle is. A second later he's shot about a hundred times.
* Taps. The movie's title also indicates the impending death of the academy.
* Tapuz"). It's a fairly recent addition to the language, and this fruit apparently had no previous Hebrew name whatsoever (foreign names were used).
* Tara and Willow were shown on at least two occasions to be floating in the throes of love on
* Tara, a recurring character since season four, was finally promoted to regular cast member in season six...and was killed in the same episode where she first appeared in the opening credits.

* Tara Duncan. A dragon states that he won't eat humans: cows taste better. The heroine wonders how he can tell.
* Tara Duncan all end up paired with somebody even if they never interacted before. It include Sparrow and Fabrice, Fafnir and Sylver, Mara and Archangel, Chem and Charm, Lisbeth and Various, Betty and a werewolf and later Jar, Jeremy and Sanhexia, just to name a few).
* Tara Duncan, the vampire are portrayed as very scholar guys, mostly working on science and philosophy. However, Tara mostly sees them at the "cold" side of this trope, noting their diplomats are polite but not nice, and their elected president, not as easygoing as most kings. Elves in this verse, on the other hand, are hot-blooded.
* Tara gets her moment too. Even though her skills are on the research and magic side, so she otherwise never gets physically involved in battles, when Willow is threatened? Lack of weapons training is irrelevant, she's getting a one-blow instant kill with an axe.
* Tara is a better example. Even in Season 5, Dawn was stealing and playing hooky.
* Tara is a mild case: occasionally Willow will seem attracted to another girl and look hurt because of it.
* Tara is killed, Willow looks up, and her eyes are glowing red. It's even lampshaded/foreshadowed by the episode's title, "Seeing Red".
* - Tara is revealed to have Ascended after her death and has fallen in love with Daniel Jackson; this prompts some surprise from her old friends in the Scooby Gang, but Tara observes that gender didn't mean much to the Ascended in their natural states, with her bond with Daniel focused on her perception of his soul.
* Tarakava are referred to as water-dwelling lizards, when they have nothing aquatic about them (
* Tara Kemp: This pop singer from California had a No. 3 hit with "Hold You Tight" and a No. 7 hit with "Piece Of My Heart," but after one follow up barely made it onto the Hot 100, her career was over in a flash.
* Tarakudo felt this way about Hiruzen, the Eldest of Shadowkhan. When they faced each other in combat at the climax of Tarakudo's rebellion against the Oni Elders, Tarakudo tried to convince Hiruzen to defect, and when he (barely) defeated him, ordered his troops to treat his body with respect.
* Tarakudo makes several to Jade when communicating with her during her time in Gotham
* Tara. Likewise, Madison Rayne eventually found Poison in a box and was left terrified.
* Tara loses two girlfriends, Alisha in Season 4 and Denise in Season 6.
* Taral Wayne demonstrates the sophistication of their thawing techniques. It's probably just as well they didn't visit a volcanic planet.
* Taran delivers an elegantly subtle one of these to amnesiac Princess Eilonwy in the third book of
* Tar and Feathers: Either as a comedic prank or a serious form of punishment, someone is covered in hot tar and feathers for humiliation.
* Taranee and Hay Lin to some degree, implied by their Guardian forms being just as large-breasted as Will's and them liking it. She too shows she likes her Guardian form. This is driven home in one episode: Cornelia's mother embarrasses her in front of the others by jokingly implying she stuffs her bra after seeing Hay Lin transformed and buxom, believing it's a Halloween costume with false breasts. Hay Lin suddenly looks angry and humiliated, and puffs up her chest some more to (over)compensate.
* Taran. He becomes a great warrior who lead an army of his own, and afterwards was named the next High King of Prydain.
* Taranis, the Celtic god of thunder. Also related to Perun and Thor.
* Taran Killam jocks who host a hip-hop show on a small town Minnesota station.
* Tarantino has also stated that Django and his wife Broomhilda are intended to be the ancestors of
* Tarantula! featured a blown-up tarantula, although it used a model for closeups.
* Tarantula! shows the monster carrying a screaming woman in its mouth.

* Tarantulas was also planning to wipe out both the Autobots and the Decepticons, thus erasing the Maximals and the Predacons. When someone points out that he'd be erased as well, he reveals that, like the Tripredacus Council (the three Cybertronians running the Predacon government), Tarantulas is descended from another group of bots.
* Taran Wanderer. Taran has a magic horn that, when sounded, will summon the Fair Folk to his aid, but only once.
* Taran Wanderer, Taran is on a quest to discover who his parents were (and in so doing, who he himself is). Early in the journey he visits his friend King Smoit, who offers to preempt the quest by adopting Taran and making him his son and heir. This is something of a subversion of the trope, because King Smoit has only the best of intentions — he's very fond of Taran and would be proud to call him his son.
* Taran Zhu, leader of the Shado-Pan, calls both sides out on this in the latest patch:
* Tara once told a story about her father's wake where her niece asked why only the top of the casket was open. Her response was "Oh, because Grandpa's not wearing any pants." Her mother found this hilarious.
* Tara Samms is an odd example; it's a pseudonym used by Stephen Cole for some of his
* Taras Bulba (1962). The Cossack forces arrive in support of the Poles, who are losing in a battle against the Turkish forces. It turns out that the Poles were merely holding back so that they could treacherously attack the Cossacks after they won the battle for them.
* Tara Sheppard, Thor provides a full history of how demons fit into what the SGC know of Earth’s history.
* Tara Strong actresses before), but her voice is recorded separately from other actors in the show; she's the only Hollywood-based actor while all the others record in Canada, and Strong is usually unavailable to travel. Strong does perform Twilight's first line in "At the Gala", but Rebecca Shoichet takes over for the rest of the song.
* Tara Strong as a "Deranged Squad Female". She can be heard shouting from behind a door, but doesn't physically appear in person.
* Tara Strong because it was different from the family-friendly stuff she was doing at the time.
* Tara Strong has said that Terrence was her least favorite character to play, as his raspy voice made her go hoarse with each appearance. This is probably partly the reason why he was downplayed in later episodes.
* Tara Strong of her character Twilight Sparkle on her Twitter feed. That said, she does love to tease people on Twitter by posting pictures of her various animated roles with messages that make it sound suggestive.
* Tara Strong. She voiced the Molly Dolly in Season 3 before getting cast as a protagonist Gwen in the two spin-off movies.
* Tara Strong, the voice actress for Twilight Sparkle and the self-appointed queen of bronies.
* Tara Strong, the voice of Raven, threatened to beat him up once. When Pan re-used the joke for his review of the series, he added one extra clip afterwards.
* Tara Strong would be cast as Starfire, while she would go on to play Raven.
* Tara's "Under Your Spell" is getting quite sexually suggestive only to
* Tara the Griffin can see auras, right down to family relationships and various types of arcane power.
* Tara wears Willow's sweater in the fourth-season episode "New Moon Rising", which precipitates the episode's trouble.
* Tara will perform a fist bump with people to show her respect for them.
* Tardigrades are also known as water bears or moss piglets. They are neither bears nor swine, but rather aquatic eight-legged micro-organisms.
* Tardigrades are naturally resistant to radiation thanks to a protein they produce that protects their DNA from being damaged by radiation. What's more, the gene for this protein

* TARDIS' Ghost Trap) that make use of the fact they are built from LEGO and thus can have their structures rearranged.
* TARDIS herself. A mini TARDIS that while still bigger on the inside, only has a console room with emergency supplies and is programmed to find the nearest safe planet if not piloted.
* TARDIS is also telepathic; she most notably uses the power to translate for the Doctor and companions. However, she can directly communicate with them, although a human may need to look into her heart.
* Tardis (who use Tardis in their print edition, since in their house style acronyms are written with only an initial capital), intentional period pieces, or Cushing film-verse fics.
* Tarduk, an Agori who's even less powerful than the above Matoran, and doesn't have any of the cool weapons that many of the others have, is a pretty good example.
* Tarephen Shrine must destroy the central letter on their foreheads in order to beat them down.
* Targaryen have a dragon, Eastern Dragons represent fertility, sexuality and regeneration, things that can be easily associated with the Targaryens, especially Daenerys, whilst Western Dragons are associated with greed and chaos, also something that can be link to the Targaryens, especially those in Westeros like the Mad King.
* Targaryen loyalists and serves as their spymaster. Arthur may be the face and military leader, but it's pretty clear they would be nowhere near as well off without the magister handling things behind the scenes.
* Target Acquired 2016 has left a perennial army of robots in her wake of busting out of jail.
* Target attempted to license Adam Freeland's anti-consumerist song "We Want Your Soul". Apparently, Target only listened to the lines "here's popcorn, here's magazines, here's milkshakes, here's blue jeans", while conveniently ignoring the rest of the song, the
* Target department stores did an ad that co-opted the commonly-used facetious pronunciation of "Tar-ZHAY" to jokingly act posh.
* Targeted Human Sacrifice: They can't just grab any random person to kill, they need a specific type of individual for the sacrifice.
* targeted on your side and let it "expire"; or use a bugged passive in combination with Open Wounds to cause the monster to take physical damage despite being immune to it.
* Target features an alien diplomat from a pacifist civilization who arrives on a Lunar Base fleeing more violent aliens. After the humans defeat several of the alien soldiers, the pacifist alien decides to present humans as "their" warriors in order to negotiate a peace treaty.
* Target in Australia ran an ad in 2012 in which all the mannequins in their stores come to life at night just to have fun. The watchman only notices their outfits are a little in disarray.
* targeting a noncombatant world. It wasn't just any girl, either - she'd reprogrammed it herself, and given it her own voice (the old voice was a Cardassian male which annoyed her).
* Target novelisation, a crush on Janley that he tries to ignore. It seems to be mostly there so Janley's beauty can be described through Lesterson's internal monologue.
* Target of Desire: Episode 1: Maia is packing heat, but that's not the only thing she's packing. Hi-o.
* Target of Desire: Episode 1. Maria's glasses are so thick, when she looks at a map, she can see people waving at her.
* targets; after all, Tarn is nothing if not a bureaucrat at heart. At one point Shockwave tries to buy his own life with the locations of 31 other targets of theirs and Tarn tells him nothing doing.
* Targets: Bobby Thompson, a recently returned Vietnam Vet who finally snaps one day and goes on rampage. He starts by killing his wife, his mother and a delivery

boy in his suburban home. That afternoon, Thompson continues the killing spree, shooting people in passing cars from atop an oil storage tank that sits alongside a heavily traveled freeway. When the police respond and start to close in on Thompson, he flees to drive-in theatre where he murders the projectionist and starts shooting at the patrons.
* Targets during the massacre at the drive-in, we at one point cut to one of the cars showing a child in the front passenger seat crying hysterically. The camera pans away to the driver seat where we see a dead adult. A shot is heard and the crying stops.
* Targets of his satire may be on the right or the left. It's a merit-based system.
* Targets of Opportunity detailing the Children of the Worm Cult. The criminal organization began when a group of Mexican Special Forces defected to serve as cartel muscle—an NPC in the scenario is one such member.
* Targets's character tells a story called "Appointment in Samara", about a man who attempts to avoid meeting Death by going to another place, only to find that that is the place he is fated to meet Death.
* Target Terror that either pop up close to shank the player or throw knives at range.
* Target was originally started in 1962 as the discount store subsidiary of the
* Target went through a period where they used "Hello Goodbye" in its ads (they carefully changed the spelling to put on the screen "Hello Goodbuy") - but only the chorus and the "hey la"s. Any more, and we would
* Target Women segment 'Broadview Security': "Your assailants aren't just Joe Burglar from Look-like-a-Caucasian-Burglar University." Cue shots from the commercials of various black hoodie/tuque-wearing men scowling at the camera.
* "Target Women" series on Infomania was entirely about how stupid advertising for women is — everything from the amount of emotion we're supposed to expend on cleaning products to the way birth control pills are marketed as a way to make your period lighter so no one has to acknowledge women wanting to have sex but not babies.
* Target: X). She also uses this as an execution method with her claws against a Purifier goon during Second Coming.
* Tarhunna, the Hittite weather god, was depicted as holding a three-pronged thunderbolt in his hand.
* Taric can do some crowd control, but not as well as Blitzcrank, some sustain, but not as well as Soraka, some buffing and debuffing, but not as well as Lulu. Taric's main distinguishing feature is a low skill requirement compared with other supports- two of his skills simply hit anyone nearby, while the other two are single target clicks.
* Taric, the Gem Knight, is not too far behind. While Leona is out in front making everyone else give way, Taric has always got one eye on his laning partners, boosting their stats, restoring their health, and using his stunning gems to stop their attackers or set up victims for an easy kill.
* Taric, whose appreciation for the world's beauty ended up leading to his men getting slaughtered by Void monsters while off admiring a temple, was exiled to climb Mount Targon. While most people used this as a chance to start a new life in exile, Taric took the chance to atone for his mistake seriously. His successful climb led to him becoming the Aspect of the Protector, giving him the ability to guard the entire world and its beauty alike.
* Taris just can't get a break. In the same game, the Republic classes' side of Taris sees the Republic working to rebuild the planet and make it habitable once more
* Tarja Turunen are both natural blondes, hard as it is to visualize. As is Anette Olzon.
* Tarja Turunen, which accuses Nightwish and Tuomas in particular of being egotistical prima donnas. (Things have thawed somewhat since then: Tarja is friends with current Nightwish vocalist Floor Jansen and has made live appearances with guitarist Marco Hietala.)

* Tarka can research technology that allows them to use their hyperdrives for tactical combat by manipulating the hyperspace bubble to move the ship. Unlike Liir ships, however, Tarka ships with destroyed engines will continue coasting.
* Tarka males go from "scaly monkey" to "scaly ape" after the Change, which also enables them to enter the highest echelons of power.
* Tarka normally have reaction drives, but their hyperdrives can be enhanced to allow them to maneuver at subluminal speeds without the use of reaction drives. This leaves space in the aft section to add more and/or heavier turrets.
* Tarka one but can quickly research it in order to be able to send orders to their ships while in flight.
* Tarka The Otter tells the realistic tale of an otter growing up in the rivers of North Devon.
* Tarkin actually had a history with this trope... And while he grew progressively more ruthless about it, it always worked until Alderaan:
* Tarkin announces the dissolution of the Senate as having swept away the "last remnants of the Old Republic", implying that the Senate had long been a powerless organ of a long-defunct government. Perhaps justified by the fact that the Empire had been declared nineteen years earlier, with the Senate remaining but all power really resting with Palpatine as the Emperor. Nearly twenty years is a fairly long period, after all, enough so that an entire generation of citizens could be born or grow up with it.
* Tarkin blew up Alderaan with the intention of demonstrating the full destructive power of the Death Star and making people too afraid to oppose the Empire lest they be the next planet to be destroyed. It instead caused a huge backlash that led to high rebel recruitment.
* Tarkin Doctrine, an Emperor had to be seen as living up to the exploits of his forefathers (remember, Xerxes is only the 4th Persian Emperor). This means conquest — and, for Darius and Xerxes, Greece is about the only thing left that's easy to conquer. Or at least they had every reason to expect it to be easy.
* Tarkin does, of course, overestimate his own intelligence. And the novel
* Tarkin, purposefully going for the plain and leaving space only for the rank badge - the only decoration he believes appropriate for a military officer.
* Tarkin starting from the stealth ship he designed for the Republic during the Clone Wars, has a much improved cloak that, when active, makes it impossible to detect. When the ship is stolen Tarkin only manages to track it because it was temporarily carrying one of Darth Vader's meditation chambers, that the Sith could sense through the Force.
* Tarkir's clans are the Abzan Houses, Jeskai Way, Sultai Brood, Mardu Horde, and Temur Frontier.
* Tarkovsky rebelled against this by emphasizing that nature was more important than human life and that, in human life, we rarely get answers to our questions.
* Tarkus' introduction on a loading screen image mentions he was awarded Terminator honors for his performance during the
* Tarma and Kethry is by realizing that one of the guards is wearing jewellery he shouldn't be able to afford (Though this is considered to be grounds for suspicion, not proof in and of itself).
* Tarmac (asphalt road covering): Interestingly, the term originally referred to a completely different pavement,
* Tarmac, that black stuff on the surface of runways, helipads, and the like, is actually a trademarked term.
* Tarnished Silver, which use MissingNo., the Unown, and events from the protagonist's past to screw with his life and/or health.
* Tarnsman of Gor. His name is Narr and he's a relatively pleasant chap, although a bit of a fussbudget.
* Taro is a type III for Team Taiyo. His headstrong approach convinces his teammates to go for higher goals, even though all of them are overall weak duelists. Indeed, his believe in teamwork manages to write a legend into dueling history.
* Taro Namatame kidnapped people who appear in the Midnight Channel and threw them

into the TV world, having the misguided belief that it will "save" them from being killed, when in reality it was what caused it.
* Taro Namatame represents what the protagonist might have become had he jumped to conclusions about the Midnight Channel and the TV World that lead him to kidnapping people and abandoning them in a parallel world.
* Taro's personal maids (Lemon, Marron and Melon) run their feet in circles while carrying Ryuuka to Taro.
* Tarot, although the miniature pixies/goblins are more common. Notably, they don't seem to have any of the weaknesses listed at the beginning of this article.
* Tarot Cards: The Devil card in standard card decks uses Baphomet as its image.
* Tarot Cards, the major arcana are said to represent the development of an unenlightened seeker (The Fool) through enlightenment until they reach fulfillment (The World).
* Tarot Cards) with no effort represents self-control and gentleness over brute force. In some interpretations, the inverted Strength card plays it straight.
* tarot deck was eventually produced as a full deck, originally sold under the name "007 Deck" and later renamed "Tarot of the Witches". Its reception by actual tarot readers is mixed.
* Tarot de Marseille calls the number XIII (Death) "The nameless arcana".
* Tarot eventually reveals the protagonist was a former card sharp who was addicted to Mnem, a temporary memory enhancer with a nasty side effect: Withdrawal damaged the mind, eventually wiping most of the victim's memories. His mind was almost completely wiped when he found himself in the care of a priesthood and eventually joined them.
* Tarot-inspired is clearly based on Lady Justice having the appearance, balance, and the sword. However, this version does not have her eyes covered with a blindfold, and she has large feathers acting like hair decorations.
* Tarot Motifs, Strength is often depicted as a young girl holding up a beast.
* Tarot Mysteries: The local criminal court judge is described as the hardest of hardasses and doesn't seem to have any concept of bail.
* Tarot series, is unimpressed by the inner world's (that have modern tech) dilating door, comparing it to the anus of a defecating dinosaur.
* Tarot, the Justice card shows a figure holding a scale in his or her left hand.
* Tarot Troubles: The Tower, Hanged Man, and Death cards are used for this purpose in fiction. In reality, physical death is not indicated by any individual card but rather an interaction between the combination of cards pulled and the question asked.
* Tarot wants death and destruction for the sake of death and destruction.
* Tarot where she’s developed a crush on her fellow Padawan Bultar Swan, whereas her sexual orientation was never made clear in Legends.
* Tarot: Witch of the Black Rose, around issue 100, when Jon is proposing to Tarot, he's too busy arguing that being her boyfriend has already put him in enough danger that becoming her husband wouldn't change things much, that he's fully willing to go through with the consequences, and so on, to realize that she said "yes" almost immediately.
* Tarot, Witch of the Black Rose As is typical of this series, Krampus is depicted as a hot lady.
* Tarot: Witch of the Black Rose by Blacksword Comics, created by Jim Balent and his wife Holly Golightly.
* Tarot: Witch of the Black Rose has a sea witch who has a vagina with a beak. That's right. A squid beak to go with the tentacles growing out her labia.
* Tarot: Witch of the Black Rose has many appearing throughout the series.
* Tarot: Witch of the Black Rose, Tarot decides that she must kill her archnemesis after he manages to attack her and her mother while rotting away in a prison. After she does the deed, she is seen trying to furiously scrub away all the blood on her hands.
* Tarot: Witch of the Black Rose, the townies want to do it, and the fact that it happened in the past drives Raven's hatred.
* Tarot", with the narrator saying "I have become one of the things that crawl at

night."
* Tarou likes sweet, cute girls like Narumi (and actually does tend to find Narumi adorable in internal dialogue), but is with the belligerent and serious Hanako.
* Taro Yoko, and the money-grubbing persona he's built up around himself is just a joke.
* Taro Yoko As an added gut punch to players, some of these games require players to sacrifice their save data and unlockables in order to achieve the final ending.
* Taro Yoko, he is of the belief that creators should stay out of the public eye, stating that if he found out that the writer of an erotic novel series was a middle-aged man, he'd be disappointed.
* Taro Yoko's games fall victim to having to be made with a shoestring budget as well as often having an inexperienced crew under him often leads to lackluster graphics and gameplay. His games often use atmosphere and story in center in order to get by instead.
* Taro Yoko, while the latter works for a lighthearted and adorable rhythm game series.
* tar-penetration macadam as a paving surface made macadam surfaces (which are very labor-intensive to build) obsolete, but the old alternate term for "pavement" carried forward.
* Tarquin also falls into this, to the point of trying to destroy a man's life for daring to speak to him as an equal.
* Tarquin can be given this role and Elan can become the main protagonist.
* Tarquin doesn't really give a damn about Ian, but has him framed for murder anyway. He was annoyed by Ian speaking to Tarquin as if they were equals and he wants to test Haley's worthiness to be his future daughter-in-law.
* Tarquin. He's been married nine times, every time to women who are much younger and very pretty, and that doesn't necessarily keep his attention off other women. They have very little to say in the matter
* Tarquin insists that he's an inventor and a scholar, not a necromancer, though the
* Tarquin is totally hot. He's definitely getting a lot out of that feat in Craft Disturbing Mental Image.
* Tarquin kills Nale, Laurin Shattersmith disintegrates his corpse and scatters the ashes to the wind so nobody can revive him. (Despite being based on Dungeons & Dragons
* Tarquin, more in spirit than the word. He is perfectly content to kick back and relax as his master plan slowly absorbs the rest of the continent into a completely secret dictatorship. Or in other words, he literally owns everything he sees, so in his own words, he has "lived like a god for over three decades."
* Tarquin repeatedly threatens to cut off Elan's arm once the latter starts denying his ideas of how their narrative conflict of "evil father vs. good son" is supposed to work. All keeping in line with invoking being a
* Tarquin's axe, as revealed in a bonus strip in the printed book, is an intelligent weapon that seeks blood and destruction, and can possess Evil characters. Tarquin was simply strong-willed enough that he could overpower it and force the axe to obey him.
* Tarquin's right-hand man Malack has it out for Nale because the latter killed his three children.
* Tarquin the fairy and Nettle the elf seem to be the only exceptions.
* Tarquin then starts using similar euphemisms (claiming that while he's "a silverback," he can still "bathe an ape,"), which only serves to confuse Elan.
* Tarquin will have a problem if he needs a new wand, since the Wise Old Elf says fairies' wands come from the plant they're named after.
* Tarrare was a man who would eat literally anything because food simply seemed to pass through him. It isn't known exactly what was wrong with him since there have been no modern cases similar to him though some of his symptoms could have been caused by hyperthyroidism.
* Tarrlok has become this as of the events of "When Extremes Meet", when it's revealed that

* Tarsiers and can't move in their sockets, making them look perpetually shocked.
* Tarsius, are capable of this. Since they look a bit like E.T., you probably don't want to chance upon them at night.
* Tartaglia as well. Often a priest, whose main role is to conduct whatever marriages happen at the end.
* Tartessos, they deploy the "Cherokee Brigade" - a force of SUVs (mostly Jeep Cherokees) equipped with machine guns, which are far faster than any other landbound force.
* Tartuffe the family patriarch and that patriarch's mother, who are the only people who have any influence in the matter.
* TARU became the lifelong manager of Crazy MAX, a bunch of punks he barely knew, because they spared him from a beatdown they gave to TARU's partner and opponents during a match.
* Taruho Inagaki (1900 - 1977), Meiji novelist whose best known works include an essay called "The Aesthetics of Boys' Love" and who is one of the founding fathers of modern BL.
* Tarutaru allies, who arrive first as mercenaries but soon migrate to Windurst in large numbers and henceforth serve as bodyguards and self-expressed babysitters to their cuddly-wuddly allies.
* Tar Valon is governed by the Aes Sedai. Also, the Aes Sedai (especially the Blue Ajah) tend to meddle in the political affairs of the rest of the world, and many rulers willingly keep the counsel of an Aes Sedai advisor.
* Tarvek after identifying a treacherous unit just by looking at the military map while on the way to the cells. Because they aren't complete fools, his decisions are assessed by other strategists and 23 weapons are trained on him at all times.
* Tarvek being of dubious allegiance, and possibly choosing Agatha's side). Also, the multiple branches of the family are constantly schisming, re-aligning, and betraying each other.
* Tarvek finds himself to be chronically kidnapped due to the political climate after the time skip in
* Tarvek finds that he is very popular with kidnappers due to the political climate following the timeskip. At one point being kidnapped by kidnappers and then kidnapped
* Tarvek. He's a plausible enough rival to really put the wind up Gil, but the authors are
* Tarvek is a more minor example. His original plans — to plant a fake 'Heterodyne girl', declare himself Storm King (a title which he does actually have a claim to), and then exploit an old prophecy to marry the Heterodyne and give himself even more legitimacy — end up going completely out the window when he falls in love with the
* Tarvek is forced to do the same thing when Gil decides to save him by tossing him out of Castle Wulfenbach on the same "falling machine"... while tied up to a Spark fighting with a mad Jäger on board. He finally makes the machine fly inches from the ground.
* Tarvek picks up the heavily wounded Ruxala with an arm behind her back and another under her knees to carry her out of a crashed and burning airship.
* Tarvek released Violetta from her obligations to him, his family, and the order so that he could send her into Lady Heterodyne's service.
* Tarvek spit-takes his wine during a formal diner at the Sturmvoraus table. Then again, Agatha just made a really unexpected off-hand revelation.
* Tarvek's stated aim of protecting Agatha from Gil's advances, after Gil's friends decide to announce to the whole town that he's going to marry her, backfires more than a little.
* Tarvek stated that the zombie revenants are actually only "a statistical extreme", and that the sleeper agent revenants are actually far more common. It's just that, since the zombie revenants are far more obvious, they managed to divert attention from the real things.
* Tarvek Sturmvoraus alternates between helpful, heroic, not-entirely-trusted sidekick and toadying, evil, certainly-not-trusted minion when heroine Agatha

Heterodyne and villain The Other start grappling for control of
* Tarvek Sturmvoraus is a more minor example. While he didn't necessarily improve on the design until he built the second head, the fact that he was able to reverse-engineer one of the Van Rijn muses without
* Tarvek Sturmvoraus, the underhanded and devious Prince of Sturmhalten, reveals in
* Tarvek was raised in a family where serving the Other and their memory and the population being wasped into mind control were just things that
* Taryn Fujioka, who's apparently one of Jean's friends, one that appears once or twice for a few seconds standing next to Jean, then doing nothing until suddenly being interested in Scott. In Season 3, she reveals herself to be a
* Taryn Terrell: Left WWE in 2010. Was in TNA from 2012-2015. Retired in 2018.
* Tarzan (2013), brings in a private mercenary army to secure control of it, and plans to murder Porter and Jane to ensure that there are no witnesses to gainsay his version of events.
* Tarzan (2013), Clayton and Smith are last seen plunging to their deaths in an out of control helicopter.
* Tarzan (2013). It ends tragically when Kala reaches for her baby, with the branch snapping before she can reach him. When Jane falls of the cliff, Tarzan manages to grab her but loses his grip so that she falls into the river and he has to dive in after her. When Jane misses her jump over the chasm in the climax, Tarzan grabs her and promises to never let go.
* Tarzan (2013), she is swept over one and Tarzan follows in an attempt to save her.
* Tarzan: A failed example during the final showdown, when Tarzan gets his hands on Clayton's gun.
* Tarzan a fictional ape species named "Mangani", which combines the physical and behavioral traits of chimpanzees, gorillas and primitive humans. In 1996, in the Bili Forest in the Democratic Republic of Congo, a subspecies of chimpanzee was discovered that is larger than other chimpanzees and shows some gorilla-like behavior. The similarity between the Mangani and the "Bili ape" did not go unnoticed.
* Tarzan, a film from Sony Animation also directed by Buck, demonstrating that it was meant in jest, since it would otherwise probably result in a legal disputes, given that two different studios are involved. In 2019, Buck finally confirmed that his comment was only meant as a joke.
* Tarzan, after being cast as the stupid white hunter and killing a trained Hollywood lion. Told that he's "not the type", he goes back to Africa.
* Tarzan Alive in Africa), and Tarzan smiles and says, "He knew what he was doing."
* Tarzan also has an attack where he charges forward, wildly swinging his spear, which will knock down if not defeat outright every enemy in his way with the exception of the boss.
* Tarzan, although enormously strong by human standards, is much weaker than the apes who raised him. It is his superior skills and reason that set him up as their ruler.
* Tarzan. A muscular jungle guy, who fights big apes and crocodiles. 100% manly!
* Tarzan and a few of his friends attain eternal life and youth by stealing some immortality pills from one novel's Big Bad (he cannot share immortality with the world, due to the pill's morally dubious manufacturing method). Tarzan has a very upbeat, "seize the day" mindset and is completely unbothered by the consequences of his immortality. When asked by someone if the thought of all his friends growing old and dying bothers him, he replies that the promise of making new friends makes up for it. When asked if he is worried about boredom, Tarzan replies that he lives such an exciting life, he doesn't worry about it.
* Tarzan, and even after she becomes an older gorilla, she sounds mostly the same (albeit a bit deeper).
* Tarzan and His Mate: Holt introduces Arlington to Tarzan as "Martin, my friend." Tarzan spends the rest of the movie addressing Arlington as "Martin Myfriend."
* Tarzan and His Mate series, after censorship got stricter, saw Jane wearing a

more conservative one-piece.
* Tarzan and His Mate with Tarzan. She gets her dress back after a few moments of chasing.
* Tarzan and Jane are nearly eaten by a mutated plant when entering the meteorite chasm in
* Tarzan and Jane is Greystoke, and that's why he's 'Lord Greystoke'." The original surname is referenced by having a character loosely based on William Clayton named Clayton Greystoke.
* Tarzan and Jane take a romantic ride swinging high on vines during "Strangers Like Me."
* Tarzan and the City of Gold. (as far as Phobeg's concerned, the world). Phobeg is an experienced warrior, but when he meets the Lord of the Jungle, "he greatly under-estimated the strength of the symmetrical muscles that flowed so smoothly beneath the bronzed hide." Let's let Phobeg tell the outcome: "If a man can pick Phobeg up and toss him around as though he were a baby, Phobeg is willing to be his slave."
* Tarzan, and their friendship is explored further in the animated series.
* Tarzan. Blink and you'll miss it, though; the shadow itself appears for only a brief second right on a tree in a dark background, and you'll more likely be focused on Tarzan himself rather than the background where the shadow appears.
* Tarzan Boy: A handsome man who was raised in the jungle and defends it.
* Tarzan by the novel's real villain, but redeems himself by telling Jane the truth, releasing her from the engagement and giving Tarzan his blessing.
* Tarzan, Clayton gets fed up with Tarzan and hunts him down like the animal he sees him as.
* Tarzan: Clayton tries to get Tarzan to understand the world "gorilla" by shouting it at him. All it results in is Tarzan yelling it right back at him.
* Tarzan, due to her upbringing and ultimately tragic environment) La, Priestess of Opar, who would not take no for an answer.
* Tarzan: During the chase scene with the baboons, we see a baboon taking Jane's boot as he plummets into the jungle below.
* Tarzan English, not to mention introduced him to physics, music, astronomy, dance, and geography. And yep, she's a brunette.
* Tarzanetto: An Italian comic book character who started as a minor parody of Tarzan, but eventually got popular enough to star in his own comic. He looks like a bald cigar-smoking boy.
* Tarzan, even as an adult. ("Clothing was a hindrance and a bother", claims the character in one story.)
* Tarzan films are portrayed by Asian elephants, even though the films take place in Africa. Granted, Asian elephants are much easier to train than their African cousins. In the first film, cardboard ears were attached to them to make them look more like African elephants.
* Tarzan films, Boy brings up some shiny yellow rocks from the bottom of a lake. Jane dismisses it with an, "Oh, that's gold," before throwing it away over her shoulder.
* Tarzan, has dreadlocks. No question, he's the picture of wild manliness.
* Tarzan has the pitched jungle fight between Clayton and his forces against Tarzan and his allies.
* Tarzan! He knew Tarzan wouldn't quite like it when he found out they were going to capture his gorilla family, so he got the henchmen to jump on him ALL at once to try and successfully overwhelm him!
* Tarzan. He only smiles very few times, most specifically when he bonded with his biological son at the beginning of the film. He's never smiled in any of the other media or promotional artwork he's been in thus far.
* Tarzan); however, fans still make use of it when discussing what Tarzan's life was "really" like. This was paid homage to in the series based on the Disney animated adaptation, where he writes the book after meeting Tarzan.
* Tarzan II" with young Tarzan, which involves tickling his toes and tummy.
* Tarzan in Tarzan's case for growing up wild in a tropical jungle, though.

* Tarzan is a combination montage of him falling deeper in love with Jane and learning about humanity.
* Tarzan is dared by Terk to get an elephant hair so he can hang out with her and her friends. The two are on a tall cliff over the water the elephants are in. She tries to lead him away to go back to his mother, but Tarzan rushes forward and jumps off the cliff. He starts with a proper dive while shouting what would be his signature yell, but the yell turns into a scream as Tarzan starts flailing around and ends up painfully belly-flopping into the river.
* Tarzan is defined by his hunting knife, to the point that those who only know the character from adaptations can be forgiven for not knowing that he's also a gifted marksman.
* Tarzan is (loosely) based on Terkoz from the original novels, who was male. Apparently, this was a result of Rosie O’Donnell’s audition.
* Tarzan is only seen with her hair up at the beginning of the film. After her friendship with Tarzan starts, it's almost always shown down. This reflects how she's becoming accustomed to the jungle.
* Tarzan is rendered to a dazed smile after Tarzan kisses her, which is quickly broken when she realizes the gorillas are watching.
* Tarzan is the stern leader of the gorilla tribe who disapproves of Tarzan and forbids him to interact with humans. However, he is only concerned about his family's safety and he is right about some of the humans being dangerous (i.e. Clayton, the true villain of the film).
* Tarzan is very close to her goofy scientist father, Archimedes, and even works as his assistant.
* Tarzan. It's especially fanservice-y when he becomes a very well-toned adult man.
* Tarzan, it turns out Clayton was planning all along to double-cross the Porters and capture and sell Tarzan's gorilla family.
* Tarzan Jane and her father brought, because there's a dissolve to Tarzan still looking through slides while they're asleep.
* Tarzan, Jane is a London girl. Tarzan literally lives with gorillas. She ends up loving life in the jungle far more than life in the city.
* Tarzan, Jane is sketching a picture of Tarzan on a chalkboard and gets lost in his image, showing that she is already falling for him despite their brief encounter.
* Tarzan: Jane. The movie makes quite a bit of comedic use out of her inexperience in the jungle, though this eventually dies down as she gets more used to things — still, chances are if there's a scene where she's in that huge, fancy-looking dress, it's going to be ruined in some kind of slapstick scene.
* Tarzan! Later, Phobeg tells the Lord of the Jungle, after having (twice) proven his friendship, "Because I owe my life to you," replied the warrior, "and because I know a man when I see one. If a man can pick Phobeg up and toss him around as though he were a baby, Phobeg is willing to be his slave."
* Tarzan, leading to him leaping from the top of a mast and actually managing to reach the funnel's top and hang from it. Despite being him, his shoes make it impossible for him to climb it up and so he's left horrified as he awaits his inevitable fall.
* Tarzan, Lord of the Jungle, Tarzan encounters two feuding groups of Knights Templar, neither of whom know that the Crusades are over.
* Tarzan made this one of his favored tactics, once he learned how to use a rope. A whole village ended up convinced there was a supernatural force that would yank men up into the trees.
* Tarzan movie has the title hero do lots of Parkour-style movement through the jungle.
* Tarzan. Not only does Tarzan turn down a chance return to human civilization, Jane and her father make a last-minute decision to stay in the jungle with Tarzan.
* Tarzan novels by Andy Briggs features a setting update and Tarzan at age 18 serves as a reboot.
* Tarzan of the Apes, a young Tarzan is disgusted the first time he sees his hideous reflection in a pool of water and wishes he were as handsome as the other

young apes (having grown up among them, he sees the apes' appearance as normal and his difference from them as freaky).
* Tarzan of the Apes. Burroughs may have heard of real ape mothers doing this. She leaves the body in the shack when she adopts John.
* Tarzan of the Apes by revealing Tarzan's true identity, releasing Jane from the engagement and then giving the two his blessing to marry.
* Tarzan of the Apes. Eventually his secretary Mr. Philander complains about his overly fussy attitude, and the professor replies "Look here, Skinny Philander, if you are lookin' for a scrap, peel off your coat and come on down on the ground, and I'll punch your head just as I did sixty years ago in the alley back of Porky Evans' barn." Philander is relieved that his old friend is still there under all the pomp.
* Tarzan of the Apes opens with a mutiny. The crew of the Arrow rise up, kill the brutal officers and steal the ship. Because Lord Greystoke had been kind to the leader of the mutiny during the voyage, he and his pregnant wife are put ashore on a remote stretch of the African coast rather than being killed.
* Tarzan of the Apes, Tarzan taught himself how to read and write, but having been raised by apes, he has no idea how to vocalize language. As a result, when Tarzan leaves notes for Jane after becoming attracted to her following his various rescues of her and her team, she isn't able to believe the eloquent note writer and the hunky jungle man are the same person and becomes attracted to both.
* Tarzan on ABC, it was rated TV-PG instead of the G rating it had carried in theaters and on video (mostly for mild sexual innuendo and action violence).
* Tarzan, our heroes are caged inside Clayton's ship while he and his cronies go to trap the gorillas. Upset about this, Professor Porter slams his fist against a wall, and suddenly the ship tilts, caused by Tantor the elephant climbing aboard to rescue them.
* Tarzan parody. Jane asks the monkeys who encouraged Tarzan to get plastered, after which they take this pose.
* Tarzan, Prof. Porter faints after meeting the gorillas. When he wakes up, he's saying "Oh, Your Highness. You're such a tease."
* Tarzan's abilities are mostly this; growing up under very harsh conditions and among apes much stronger than any normal human, he grew to be able to keep up. How strong is Tarzan, you ask? In one story, four burly sailors are struggling with Lord Greystoke's shipping trunk, so he casually picks it up and carries it himself! If the sailors can haul their own weight, a reasonable strength at the time, and weigh about 175 lbs., then he's casually shifting some 700 lbs. or more.
* Tarzan's Desert Mystery, Tarzan is caught by a bizarre man-eating plant with long vines entwining him, but he summons some elephants to free him by pulling the vines off long enough for him to escape.
* Tarzan's Fight for Life includes scenes filmed around Hat Creek and Pit River in Northern California.
* Tarzan. She was a very significant threat it is just the fact that more important things happened to Tarzan's life a short time afterwards.
* Tarzan slaps Jane aside when she tries to stop him from shooting Tarzan with his gun.
* Tarzan's native habitat. While Tarzan is perfectly at home here, it tends to prove lethal to outsiders who attempt to intrude: especially if Tarzan does not want them there.
* Tarzan's often able to win over others' sympathy through his eyes, including the gorillas. In reality, gorillas do not like direct eye contact, perceiving it as a challenge. Locking eyes with one of them is
* Tarzan Tarzan are a "serious" example — something that could conceivably exist rather than something accepted because they're in a cartoon or something. They're a species that's advanced enough to have their own spoken language, but still look animal and spend their time sitting in trees and non-human stuff like that. There's also a scene highlighting how Tarzan's human intelligence is still more encompassing than theirs, as he's able to think about long-term consequences in a way they're not.

* Tarzan, Tarzan has to contend with Nemone, the beautiful but jealous and temperamental queen of Cathne, the City of Gold. She became queen at the age of 12 and was manipulated and blackmailed by an old black woman name M'duze who, it was speculated, was Nemone's mother. The queen was considered a bit mentally unstable. She was jealous of her beauty and had all good-looking women either mutilated or killed.
* Tarzan Terk sends Tarzan off to find a hair...of an elephant to get rid of him for some time. He succeeds— although in the process, he causes a stampede, and the panicking elephants almost crush a baby gorilla.
* Tarzan the Ape Man and its sequels, Johnny Weissmuller (6'3) was a full foot taller and considerably more massive than Maureen O'Sullivan.
* Tarzan: The elephant herd dismisses young Tantor when he says there's something in the water. It turns out to be a young Tarzan trying to get an elephant hair for a dare.
* Tarzan, the song "Trashin' the Camp" is this trope, with instruments ranging from a typewriter and glass bell-jar percussion to an (elephant-enhanced) gramophone trumpet.
* Tarzan, the titular character has his biological father's hair color, nose, and jawline, and his mother's eye color.
* Tarzan to defeat, which can be difficult without the use of a turbo controller, and the game is extremely short.
* Tarzan Triumphs (1943), after Tarzan has defeated a Nazi invasion of Africa, Cheetah stumbles upon the German radio, and begins gibbering into the microphone. In Berlin, the radio operator believes he is finally receiving a message from the mission commander and summons the general. The general listens to Cheetah for a few seconds, then chews out the operator. "This isn't Colonel Von Reichart! IT IS THE FUEHRER!" All present snap to attention and give the Nazi salute.
* Tarzan underwent constant recasting, from Johnny Weismuller (who played Tarzan from 1932 to 1948) to Lex Barker and further (Mike Henry served as the last series Tarzan in theatrical film in 1968). Since Brenda Joyce stayed on as Jane from the last Weismuller film to at least the first Barker film, this represents a case of a sliding timescale. It's most noticeable with their son Boy, who ages from infancy to childhood (about ten, in the movies) in the space of a cutscene, while his parents haven't aged a day.
* Tarzan: Untamed: Oswald and his crew are last seen being caught in a rush of collapsing elephant bones. It's unknown if they survived or were crushed to death.
* Tarzan... until an episode introduces Queen La, a villain with magical powers.
* Tarzan was advised to keep a sock full of quarters handy when dealing with the chimp, just in case it tried to attack him. Sure enough, Cheetah attacked him and Johnny hit him with the quarters and legend has it from that day on Johnny and Cheetah were the best of pals. However, Cheetah wasn't at all a fan of Maureen O'Sullivan, and often had to wear a leg shackle around the actress.
* Tarzan: We never see Kala and Kerchak's son get killed by Sabor. All we hear is the sound of the leopard's attack.
* Tarzan when he appears dressed in his father's suit - because it means he now looks like a human gentleman instead of the boy raised by apes (and is, therefore, ready to leave his home in the jungle).
* Tarzan when Jane decides to stay in Africa, she runs from the boat to the beach and kisses Tarzan. She looks very embarrassed, but then Tarzan swoops in for a kiss.
* Tarzan, when Jane sketches a rendition of Tarzan on a blackboard and begins staring wistfully into the drawing.
* Tarzan when Tarzan fights with Sabor. He does not yet know that Sabor had killed his birth parents or Kerchek and Kala's son, so the fight between them has more meaning than he realizes.
* Tarzan, where he pulls her close to him while they swing together on vines.
* Tarzan where Tarzan and Jane press their palms up towards each other. The significance behind it is that earlier, when Tarzan was a child, his hands didn't match up with his gorilla mother's, meaning that they were different. However, when

his hand and Jane's hand match up perfectly, he knew that he was one of her kind.
* Tarzan, which co-owns the film's copyright and fully owns the character, beat them to it.
* Tarzan who came to Africa to conduct genetic and evolutionary experiments on gorillas. He rejuvenated himself with gorilla genes, but gradually assumed their physical characteristics.
* Tarzan who managed to teach himself English and French from books his parents left behind, as well as an inveterate prankster with a quick wit and a well-developed but dark sense of humor and a full-blown dandy who loved to look good, even before he came in contact with civilization. All adaptations seem to ignore this in favor of playing up his physical prowess.
* Tarzoon: Shame of the Jungle, rarely did he let a sentence go by without an f-bomb thrown in.
* Tasakeru are stripped of their citizenship and given a lifetime ban on setting foot inside their country's only major city. Most of them have found ways of avoiding or ignoring the ban as needed.
* Tasakeru (as mentioned above), she provides much-needed food for the other Outcasts.
* Tasakeru enforce a ban on magic, believing that only the Gods should be able to change the laws of nature. The degree to which the ban is followed varies from family to family; some families are willing to use magical tools and objects enchanted by other mages, and others refuse to use any magic at all.
* Tasakeru forbids the use of magic, seeing it as an affront to their revered Goddess of Life.
* Tasakeru has the slurs "stinktails" for skunks, "taints" for wolfoxes, and "snake", used by the squirrels as a vicious insult.
* Tasakeru takes place in an alternate universe where humans have never existed.
* Tasakeru, there's a rather literal usage of this in Book III, in which a wolf who named himself Stalker creates a hybrid of all eight sentient species by stealing blood from each of them...
* Tasakeru with a shy nature and long blonde hair, the color of which is unique in the setting.
* Tasakeru, with the core story of the Three Gods, which is interpreted in different ways by each of the eight species.
* Taser (electroshock weapons): Also appropriated as the verb "to tase". The company is quite desperate in trying to prevent genericization, which is why they will never allow the word "Taser" to be used as a verb (that's how Xerox lost their trademark) in approved media.
* Tasers version which gives a longer reach as well as the potential to bludgeon with melee force if the electric function fails.
* Tasha Ozera calls Dimitri "Dimka", demonstrating their close friendship.
* Tasha Ozera has an unrequited crush on Dimitri. She eventually proposes to him and is turned down, as he preferred Rose to her.
* Tasha's Cauldron of Everything, a 5E sourcebook, has a chapter on unusual and otherworldly phenomena that includes a description of primal fruit, grown from plants rooted in areas rich in primal magic or blessed by divine influence. These fruit can be told from normal ones by traits such as odd colors or faint sparkling or luminescence, and if eaten (including after cooking or juicing) can produce a number of effects, such as healing their eater or providing them with boosted strength or vitality, providing resistance from harmful magic, or providing temporary telepathy.
* Tasha's Cauldron of Everything comes the Barrier Tattoo, which can, depending on the type, give one the same level, and type, of protection as Studded Leather armor (12 + Dex Mod), Half Plate Armor (15 + Dex Mod (+2 max)), or Full Plate Armor (18), with the ability to add on a shield to the AC. Also, one doesn't need to be proficient in the equivilent armor, or need to meet any strength requierments. Also, no disadvantage on Stealth Checks. Thus everyone could potentially have the equivilent protection of Full Plate Armor, without wearing any obvious bulky armor.
* Tasha's speaking voice is done by Naelee Rae (Seasons 1-2) and Gianna Bruzzese

(Seasons 3-4), and her singing voice is done by Kristin Klabunde (Seasons 1-2) and Gabriella Malek (Seasons 3-4).
* Tasha's Uncontrollable Hideous Laughter. It not only incapacitates the target, but also weakens their muscles for a while after they calm down.
* Tasha Yar also managed to escape Turkana IV, which literally became a
* Tasha Yar was killed off by a sentient oil slick when Denise Crosby left near the end of the first season. Although her character came back twice in later episodes, both times were due to time travel; the "original" Tasha was gone for good. On the
* Tasha Yar was raised by human dissidents on Turkana IV, where various factions were constantly at war and gang rape was a common occurrence.
* Tashigi most often fights men (except for when she faces Robin), and Vivi tends to fight both men and women (even though she typically can't do anything without the Straw Hats backing her up, and her opponents typically don't hit her- for example, Crocodile merely threatens to dry her up if she resists).
* Tashigi says this after saying that she believes Zoro is assuming she's weaker because she's a woman.
* Tashigi tries to convince Smoker of the same thing when they're held captive in Punk Hazard, saying that if begging a pirate for help is what they have to do in order to save the children and stop Vergo, then they should beg. Neither of them end up doing it since what Trafalgar Law actually wants is for them to keep quiet about his activities on the island, but the sentiment is the same.
* Tashigi wears pink which contrasts to Smoker (blue), the same goes for Smoker and Hina.
* Tasio the Trickster is a public nuisance in every city of Tariatla. According to a Roalt city wall commander, he would destroy a civilization or raise it to a new level of prosperity on a whim. "Most of the time, he's just a pest."
* Task Force books, as one of the creators of the game was also the novels' author, though how the two universes actually use this trope differs.
* Task Force DEFY, "those who dare defy destiny". Much like AR Team, the significance of this is yet to be fully explained, but
* Task Force X are focused on during their mission to infiltrate Justice League headquarters and
* Task Force X. They are: Bette Sans Souci, AKA Plastique, Floyd Lawton, AKA Deadshot, Temple Fugate, AKA The Clock King, and George "Digger" Harkness, AKA Captain Boomerang.
* TaskMaker, also has lock picks which can be used if the player is a Thief.
* TaskMaker is an adaptation of an obscure 1993 black-and-white Mac RPG of the same name, which itself was adapted from a tabletop RPG. What little fans the obscure 1997 version has probably know it only by that version, and not its predecessors.
* TaskMaker. One of the quests given to you by the title character is to bring him the head of a rebel. A player can indeed kill the Rebel and take his head (although this drains a lot of points and some Spirit due to his Good alignment, which is not revealed until after you kill him), but the saner option is to Bestow a gift to the Rebel, who will then give you a slave's head to pass off as his own. The TaskMaker never suspects a thing.
* TaskMaker, the Ethereal Potion makes the player temporarily intangible. He or she may phase through walls, and attacks by enemies will pass right through, but the player cannot interact with doors or switches, or pick up objects, until the effect wears off.
* Taskmaster and Alex Horne. Greg has expressed shock and horror that there are people who could imagine such stories and is especially creeped by those with complete romantic arcs. Alex, on the other hand, has said "part of me was pleased".
* Taskmaster and Nish Kumar — never actually figure it out and just end up wandering around aimless and bewildered. Perhaps not surprisingly, Mortimer is the only one who finds his way back to the starting point and wins the round.
* Taskmaster Another weakness is that he has reached his brain's limits on what he can remember—as he memorizes actions and techniques, other memories become corrupted, diffused, or lost, so he suffers from a scattered variant of amnesia.

* Taskmaster given Alex's portrayal as preternaturally bashful about any physical contact with women.
* Taskmaster has a long history of obnoxious pet names for all, going right back to his first appearance in the 1980s. And considering how many superheroes and villains he's interacted with, that's a lot of pet names. This trait comes and goes a bit with later writers and how well they keep to his original "snarky Bronx thug" persona, though.
* Taskmaster", has no superpowers at all. Yet he still can stand toe to toe with plenty of heroes or villains by virtue of the fact that he's incredibly fit, and those reflexes. He even can achieve a limited form of superspeed by watching recordings of himself in fast-forward.
* Taskmaster has sinister-sounding hurdy-gurdy music that links in between the games. Slightly discordant and rather unsettling.
* Taskmaster. In the first episode of Series 10, the contestants are given the task of making the largest thing they can find appear to vanish without using any kind of editing trickery (i.e. without cutting from a shot of the object present to a shot where the object as been removed). Johnny Vegas decides to interpret this through a combination of this trope and political commentary on Jeremy Corbyn's decisive defeat in the 2019 British general election, by staging a "400ft" taxidermied mutant socialist chicken, unleashed by Corbyn upon his political enemies, attacking a paper version of Westminster.
* Taskmaster is seeing how badly the contestants screw up while trying to perform the tasks. A specifically invoked example is the prize task from the Champion of Champions special, which was to bring in the most cringeworthy/embarrassing item. The winner brought in a clip of himself giving an interview on a political talk show that he had clearly not prepared for.
* Taskmaster mini, it is revealed that his ability to copy other peoples fighting styles comes at the price of his personal memories. He eventually remembers that he used to be a SHIELD agent and the waitress that has been tagging along with him is really his wife and also a SHIELD agent. Sadly, To save her he copies the fighting style of the guy who's attacking them, thus causing him to forget her again, leaving Mercedes alone once again. She even implies that this isn't the first time she has managed to make him remember her.
* Taskmaster mini-series, where Taskmaster states that he began using a katana so he could duplicate the moves (his power) of Silver Samurai.
* Taskmaster, of course, he copied it off of another bullet-catcher, and promptly killed him immediately afterward.
* Taskmaster off guard by suddenly stopping in the middle of their fight and going into a breakdancing routine is a sterling example of Deadpool's M.O.
* Taskmaster saw a noticeable height difference when Josh Widdicombe (5'7") collected the winner's trophy from host Greg Davies (6'8").
* Taskmaster saw the contestants having to get an egg as high as possible in 20 minutes. They were aided with a table, some pens, and a big stack of paper. Romesh's attempt saw him just stack the egg on top of the pens, and the pens on top of the paper. Greg was in disbelief that that was all Romesh could come up with in 20 minutes, and he was certain Romesh would come last ... until it transpired that Roisin, Tim, and Frank all had to be disqualified because they broke their eggs, meaning that Josh came in first place, and Romesh in second.
* Taskmaster sometimes has a sudden death round if two contestants are tied in first place. Generally these are pre-recorded tasks (a selection of which will be recorded alongside the regular tasks and chosen by the production team as and when they're needed, with only the tied contestants' attempts being shown), but sometimes they will be done live with an arbitrary tie-break question (such as guessing Frank Skinner's age in minutes).
* Taskmaster: Taskmaster's costume always incorporates some sort of skull mask, which has ranged over the years from vaguely skull-like to what looks like actual bone to stylized ballistic armour.
* Taskmaster task out of his pocket, on which was written "Ha, ha, ha. You must now pick a letter of the alphabet and say that letter out loud." Ed's repsonse this

time? "I bet you're really proud of yourself for that one, aren't you?"
* Taskmaster that was dumped into the water supply. The solution was meant to quickly input Nazi beliefs into people to resurrect the Reich, but when it was spilled into the water supply, it ended up making everyone think they were Hitler.
* Taskmaster their fellow team mate's efforts while the third simply watched without lifting a finger to intervene. Conversely, after some initial confusion the other team quickly realised they were supposed to complete all tasks, with one member helping the other after he'd completed his part. Unsurprisingly, the cooperative team did better than the in-fighting team.
* Taskmaster, when the competitors were challenged to destroy a cake in the most beautiful way possible, Noel Fielding attempted this by putting his cake, plate and all, into a washing machine. Taskmaster Greg admitted that he could happily watch it spin for hours.
* Taskmaster will work for whoever is willing to pay him the most money.
* Tasmania 1900 Berlin is always referenced whenever a team as a huge losing streak in the Bundesliga. They just played one season, were immediately relegated to never reach the highest level again and the had by far the worst season's record in Bundesliga history (out of 34 games, they won 2, drew 4 and lost 28 and only scored 15 goals).
* Tasmania and Australia were found as the culprit for a string of crop circles springing up. Turns out, when wallabies gorge themselves in the local poppy fields (grown legally as a medicinal crop), they get high and hop around in circles.
* Tasmanian devils when Han Solo stuffs Luke inside a dead Tauntaun for warmth.
* Tassadar Heroic Ability allows him to tank and deal a significant amount of damage, but he's not as good at dealing damage as a dedicated Assassin nor is he as tanky as a typical Warrior. He lacks a hard disable, but partially compensates with talents that let him slow enemies and the Force Wall Heroic Ability, which lets him block off enemies. Finally, he can turn invisible and invulnerable briefly, which gives him a way to get out of trouble, but it's not quite as effective as some of the other repositioning/escape abilities in the game. All things considered, Tassadar's main outstanding quality is that almost no other hero has a kit as versatile as his.
* Tasseography, Tasseomancy Means Cup Divination. Reading tea leaves or coffee grains that remain in a cup once the beverage has been consumed.
* Tass Times in Tonetown dimension) has a triangular moon that, although never seen on screen, is mentioned in the manual.
* Taste: "Boy, was that a bad idea! Your tongue now bears the residue left behind by adventurers who, like yourself, have felt the need to press various and sundry organs against the sign."
* tasted like cardboard so they changed the formula of the sauce and crust.
* Taste of Cherry by Abbas Kiarostami ends with an idyllic scene featuring the production crew and some assorted others relaxing on a flowery hillside. It's lovely, but the footage seemed thrown in for no readily apparent reason. Test groups responded to it negatively and it was taken out of some theatrical runs, but restored for the DVD release. The director says he put it in there to remind us all that it's just a movie, and after the movie's depressing events he thought the audience deserved a break.
* Tastes Better Than It Looks: Food that looks disgusting, but tastes delicious.
* Tastes Better Than It Looks: Food that looks unappetizing, but when tried, actually tastes good.
* "Tastes Like Chicken" is all about Billy jumping to the conclusion that Mandy is a cannibal who's eaten his friends and family and plans to eat him next, which ends with a played-for-laughs implication that she actually has eaten Irwin.
* Tastes Like ChickenSince the audience can't taste whatever exotic meat the character is eating, they have to say what it tastes like, and the best way to describe a taste is to name something else it tastes like.
* Tastes Like Chicken: The First Century BCE Roman poet Horace ridiculed the habit of serving peacocks during Roman feasts, saying the birds tasted no different from chicken.

* Tastes Like Diabetes: A work is disliked for being too saccharine and cute.
* Tastes Like Diabetes. Granted, most little girls wouldn't like it if they found out the woman behind their cute stationery was a 60-something-year old woman.
* Tastes Like Diabetes he's been forced to sing about, says "I'm outta here! Screw you!"
* Tastes Like Diabetes. (Likewise, being in a game about music, Sayu's boss theme, which is supposedly her image song, is actually well-made.)
* Tastes Like Diabetes of all people, ending with a caption reading "Buy more Heineken or we'll keep playing this song".
* Tastes Like Diabetes (the wedding photo) while the narration points out how there is still a lot of rebuilding to be done which we never actually see.
* Tastes Like Diabetes: The work ends up being too cute or sweet for anyone to enjoy.
* Tastes Like Purple: Describing a sensation as something that can't really be experienced with that sense, like saying that something tastes or smells like something that can only be seen.
* taste tested a cheeseburger in a can. His final thoughts were that it tasted like the smell of dogs' feet: a healthy dog's clean feet have an earthy, mushroomy smell, and the burger tasted like that.
* Taste the Blood of Dracula: Another character named Lucy is turned and helps Dracula and her hypnotized friend killed her father and later bites her boyfriend.
* Taste the Blood of Dracula find vampirized Lucy in a casket, Secker tries to stake her, only for Paxton to chase him away, so that the task of slaying his daughter would befall on him alone. He fails because he takes too much time to do the deed.
* Taste the Blood of Dracula, the sequel to the above when the eponymous substance starts to take form in a goblet.
* tasting disgusting. One ad had a blindfolded man drinking it, and a... sample from a puddle in the men's room. He said 'I can't tell the difference. Must be made by the same people.'
* tasting her urine, which means, more or less "honey-tasting urine.")
* Tasty Gold: Gold's properties, in particular it being a soft metal, means a character might test its authenticity by biting it.
* Tasty Gold sort of test on cooking pot, and then walking away, displeased with what she finds. Her teeth are left on the edge of the pot, and Apple Bloom has to retrieve them for her.
* tasty instruments) due to confusing "Köstlich" with the Danish "kostbar".
* Tasty Tears: Tears have a wonderful taste to some people. Sometimes used to add flavor to cuisine.
* Tasuku and Tsumugi first starts noticing something's up when Homare reads him the same poem twice, and when he says that he just read the same darn poem the previous day, Azuma says he doesn't know what he's talking about. Soon it appears that Misumi is caught in the loop as well, but he is aware of it too and pleads them to end the loop by saying how they really feel to eachother (because everytime the loop starts, he loses his triangles he searched for).
* Tasuku Hatanaka only a little over three and a half years earlier. As a bonus, said characters also develop romantic feelings for each other.
* Tatakau Shisho) has Ireia Kitty, a heavy-set old lady who can kick some serious ass.
* Tatanka briefly donned whiteface and black lipstick and eyeshadow late in 2006 after he suffered an emotional meltdown after losing too many matches and announced that his degradation had awakened a "vengeful spirit" that would avenge the Native American people.
* Tatanka: Started in the Carolina indies in the late 1980s, had his one significant run in WWE from 1992-1996.
* Tatarigoroshi-hen and Yakusamashi-hen ends up comatose and is killed when she wakes up.
* Tate and Liza have only two Pokémon, at a point in the game when most gym leaders have at least four, and both of them are weak to Surf, a powerful move that

you are required to have in order to get to the gym in the first place. Oh, and you face them in a double battle, which makes it even
* Tatemiya Saiji, the substitute supreme pontiff of the Amakusa-style church in
* Tatenashi tries to seduce Ichika by surprising him wearing an apron, though she is wearing a swimsuit under it.
* Tater Tots is a brand name owned in America by Ore-Ida, in turn a part of Kraft Heinz.
* Tatewaki and Kodachi Kunō, meanwhile, exemplify a much darker (and funnier) version of the trope. Luckily,
* Tatewaki Kunō gets roughly the respect from Ranma that would put him towards this trope, but he's so thoroughly irritating that Ranma is perfectly aware of who he is.
* Tatewaki Kunō has these fantasies a lot... usually with two women throwing themselves at him (which, according to his
* Tatewaki Kunō rarely wears a school uniform, either, opting instead for his kendo outfit.
* Tatewaki Kunō's wooden sword is capable of cutting trees in half and
* Tatewaki Kuno also fits, for the most part, except for the fact that most other characters could kick his ass in their sleep once he falls victim to
* Tatewaki Kuno: Has never actually tried to kill Ranma for Akane or "the pigtailed girl's" hand, and doesn't even seem to want to kill Ranma in their fights. His attitude of "if I beat up Ranma, then the girls I want will naturally flock to me for proving my studliness" does fit under the general umbrella of this trope, but lethal force is not his intention. Though... there is the way he starts swinging around a live steel katana instead of his
* Tatewaki Kuno, who is so spoiled and egotistical that he can't get it
* Tatiana Maslany. The fact that all of her characters are clones helps explain their similar appearances somewhat, but Maslany could credibly pass for any of these nationalities, which also helps make it more believable.
* Tatiana's experiment to determine whether or not Gary really was "the perfect sub" tipped over the edge into lunacy. It actually sort of worked on its own terms, though, despite her failure to cover some details.
* Tatie Danielle is far away from your sweet old auntie, that's for sure. After her caretaker's death — for which she was pretty responsible — she gets to live with her grandnephew's family. Woe to them...
* Tatooine Ghost another man for being creative when faced with a similar problem, even though the attempt failed).
* Tatooine Ghost, has Leia and Han disguise themselves as nonhumans, via skin colouring and prosthetics; since they picked Twi'lek and Devaronian disguises, they even got to hide some handy tools inside the lekku (head-tentacles) and horns of their respective guises. Other such novels also include some pretty interesting and comprehensive disguises, while requiring no actual cosmetic surgery or any such thing.
* Tatooine is a barren desert home to vicious barbarian aliens, giant desert dragons, and precious little civilization, all of which is run by criminals, although the desert climate is what makes things most difficult.
* Tatooine is also the home planet of Cole Fardreamer, a mechanic who meets Luke in The New Rebellion.
* Tatopoulos escapes the baby Godzillas by elevator in the 1998 American
* Tatort. 1971 saw 11 episodes, 2008 saw 31, and not evenly distributed to boot. In the first twenty years, the length of episodes varied, too, up to two hours; more recently things settled on about one and a half hours.
* Tatort co-produced the crossover episode "Unter Brüdern" ("Among Brothers"), which aired on 28 October 1990.
* Tatort episode "Satisfaktion": After pathologist Professor Boerne is knocked out by being hit on the head from behind with a sabre at an academic fraternity, he wakes up on one of his morgue's steel tables and asks: "Am I dead?" His assistant Alberich answers to the negative. It turns out he had just been brought to their place of work where she stitched up the cut and sat back to wait for him to regain

consciousness.
* Tatort Felber in Frankfurt in 1995. Klaus Löwitsch played two such roles in 1982 and 1985, in the first episode he did his character was killed in the line of duty.
* Tatort it when people have to admit that he was right all along…
* Tatort (NDR; Hannover): The actress Maria Furtwängler who plays KHK Charlotte Lindholm is the daughter of Kathrin Ackermann who portrays Charlotte's mother Annemarie Lindholm.
* Tatort the Leipzig team of Hauptkommissare Eva Saalfeld (Simone Thomalla) and Andreas Keppler (Martin Wuttke) used to be married to each other but got divorced a few years before their first episode.
* Tats and so the 'monster' aspect is almost entirely absent from the equation.
* Tatsuki also has this kind of relationship with Ichigo, at least up until his shinigami activities start interfering with his social life. Their friendship recovers after she, Keigo and Mizuiro learn the full truth about what's been happening. This is played for laughs when Orihime immodestly jumps out of a classroom window to join Tatsuki and Ichigo, who end up bickering about chastising Orhime's behaviour like parents who disagree on the best way to punish an unruly child.
* Tatsuko Itagaki but lacks the technique or the drive to hold her own against similarly powerful martial artists.
* Tatsumaki is possibly the only person who gets it worse than him. ONE draws her consistently in a sucky fashion in
* Tatsumaki literally has the hero name 'Tornado of Terror', and she definitely deserves it, feeling no remorse about using her psychic powers to torture and butcher her enemies, and even to threaten her allies. Her younger sister, 'Blizzard of Hell' Fubuki, also qualifies.
* Tatsumaki Senpuukyaku had the character turn 360 degrees. Toss in the Rolling Attacks (which are just spins in another plane) and it's easy to see how someone can get dizzy.
* Tatsumi does the same thing to Danger Beast Cosmina later on, when he has inherited Incursio.
* Tatsumi Fujinami is rarely seen without formal wear. His son LEONA even less so. tuxedo.
* Tatsumi Port Island is also fairly relaxed, although it does involve the group learning a little more about Naoto's backstory.
* Tatsunoko Production - Currently owned by TV station Nippon TV (54.3%), toy company TakaraTomy (20%), talent agency Horipro (13.5%), and I.G. Port (11.2%)
* Tatsunoko productions (Paul blue, Nina pink). Interestingly the latter three had the same character designer (Akiko Shimomoto).
* Tatsunoko Production was set to get one as well, but had languished in development hell for years while Imagi's CGI version was announced. After the CGI film plans fell through, Nikkatsu's live-action version went into production in late 2012 and was released in 2013.
* Tatsunoko vs. Capcom fitted with all manner of offensive weapons. These include, but are not limited to, a gatling gun, chainsaws and multiple missiles. Somehow getting hit with these is completely survivable, unless they are used to end the round. And even then, it's still just a "K.O." rather than a kill.
* Tatsunoko vs. Capcom has Baroque mode, which to execute you must be willing to give up red health (meaning health that can be healed on the sidelines). However, the more punishment you take means the more health you can exchange to power up, and that means the stronger you'll be under its influence.
* Tatsunoko vs. Capcom: Hurricane Polimar's level 3 Hyper Combo caps off with him breaking the prone opponent's neck with a slight twist of his foot. It does quite a bit of damage, too.
* Tatsunoko vs. Capcom, many of Gold Lightan's attacks are stomps, including one where he kicks the poor soul to the wall, and stomps on and spins on their body. For the record, Gold Lightan is a giant alien robot. Ouch.
* Tatsunoko vs. Capcom: one of Frank West's specials has a zombie barreling down

the field in a shopping cart, toppling his opponent. In response, Frank screams, "Oh my God!"
* Tatsunoko vs. Capcom on the sides of the screen. This gave players more opportunities to set up combos. However, these games still retain the air combo spikes (along with the camera tilts).
* Tatsunoko vs. Capcom uses its thrusters as attacks in some of its command normals.
* Tatsunoko vs. Capcom, with additional characters (though one of the original characters was removed due to licensing issues), tweaked mechanics, and altered character properties. This is a case where the special version is supposedly for Western release only (as the original game was only released in Japan), until Japanese fans asked to be released in their country as well.
* Tatsuo got beaten to death by his wife Aki's cousin Ichiro because Tatsuo saw him trying to drop the killing weapon (a knife which he used to kill his grandfather) in the sea.
* Tatsuomi Hamada is a great example. Beginning with his first appearance as
* Tatsuo Mikami and later Gamo Minato are Team Dads to the Japanese National Squad. To a degree, so is Munemasa Katagiri, but in a more distant way.
* Tatsuya does not consider himself part of the Yotsuba clan. He's directly descended from them (in a society where
* Tatsuya Sudou in both parts of the duology gets half of his face burned off (and loses his eye in the process, both times). He's pretty incensed about it.
* Tatsuya Yuuki/Meijin Kawaguchi III has used at least four Gunpla with Gatling gun options- Nu Vrabe's Mercury Lev weapon pack features one, as does Hi-Nu Vrabe's Amazing Lev A. He uses one with the Kampfer Amazing as a surprise finisher against the Renato brothers in the 7th World Tournament, and his Gundam Amazing Red Warrior also has one amongst its plethora of weaponry.
* Tattercoats's mother died in childbirth. Her grandfather hates her as a consequence.
* Tattered Rags, the brainchild of Jodi Cain, who specializes in creepy rag dolls with many different designs. All of the dolls are made for display and made to order if the customer chooses.
* tattered white hospital gown is revenge on the midwife that killed her and stole her newborn baby.
* Tatterhood. The end of the fairy tale does prove that she can be beautiful if she wants, but she makes it clear that she prefers to be ugly.
* Tatterhood" , the queen is so eager to have a child, she neglects to follow the magical directions to get them.
* Tattiawna Jones, as well, is mixed Caucasian and Black Canadian like her character.
* Tattletail: Stay in the dark too long, and Mama Tattletail will catch you, especially since being in darkness makes Tattletail freak out. Being in the light (not counting your flashlight) also means you're safe, as the power goes out when she's attacking.
* Tattletale is this to Taylor, offering her friendship without reservation and a place in her supervillain gang, which given Taylor's status as a bullied fifteen-year-old almost immediately earns her affection. This example is notable in that Tattletale genuinely does want what's best for Taylor, and thinks that she can get a sense of fulfillment and empowerment with the Undersiders that she won't get if she just keeps going to school and being bullied.
* Tattletales and the question was posited to the husbands, Bert Convy would start the question "Gentlemen...and you too, Dick..."
* Tattletales with "their gals" Marcia Wallace and Fannie Flagg. Host Bert Convy would just substitute the words "your gal" for "your wife" when reading the questions.
* Tattoo artists regard name tattoos as a cursed romantic gesture or a relationship jinx. Getting a tattoo of a lovers name can be positively received at the time, it eventually destroys the relationship entirely since it puts a lot of pressure on maintaining the relationship or it gives off some unsettling vibes for

a new-love or ex-love. Not to mention it can make them look promiscuous and spiteful with past loves when they edit the tattoo.
* Tattooed Crook: Criminals with tattoos, usually to display gang affiliation.
* Tattooed Crook: Many criminals have skin tattoos, which often display their membership in a particular gang.
* Tattooed Crook: People with tattoos tend to be sketchy and suspicious.
* Tattooed Teenage Alien Fighters from Beverly Hills: Earth is the nexus of a network of portals that would make universal domination a lot easier for Emperor Gorganus. It's established in the first episode of the series Gorganus won't explode Earth because the portal network would be destroyed as well.
* Tattooed Teenage Alien Fighters from Beverly Hills fight the evil Emperor Gorganis.
* Tattooed Teenage Alien Fighters from Beverly Hills: In the episode "Nightmare on Rodeo Drive", the heroes become trapped in a dream world. Swinton figures it out and tells the others that anything they think of comes true. Gordon smiles at Laurie and she is suddenly in her bra and panties. She gets annoyed and wills her clothes back.
* Tattooed Teenage Alien Fighters from Beverly Hills). Very cheesy though...
* Tattooed" where she starts off in 6 pieces (head, torso, arms, and legs) but then reassembles herself during the first chorus of the song.
* Tattoo Nightmares, on Spike TV. It shows how hard it can be; many of the bad tattoos are large and dark. Most of the tattoos were either poor drunk decisions or free tattoos given out of trucks and the like. In several cases, people mention the tattoo artist doing drugs right before tattooing them.
* tattoos, they appear to be surgical scars from her time at the Teltin facility.
* tattoo that Arlong gave her Nojiko got herself tattooed so her sister wouldn't feels so different. The gold bangle Nami wears constantly after the Arlong Park Arc is from Nojiko.
* tattoo the whites of your eyes black made of ink), extreme light sensitivity, glaucoma and even blindness.
* tattoo, which Moe offered to remove with a cheese grater (to Moe's disappointment, Homer never got the tattoo).
* t.A.T.u. became famous for the supposed love affair between singers Lena Katina and Yulia Volkova. Not only were the two a fake couple guided by a manager who relied on producing scandals for publicity, but they ditched the manager and the lesbian gimmick within two years of achieving fame, have both since married men, and Volkova has made comments condemning male homosexuality.
* t.A.T.u., "Gay Boy" in Russian) is about a girl in love with a gay boy who spurns her.
* t.A.T.u. member Lena Katina's debut solo single "Never Forget" is about the fallout of her friendship with former t.A.T.u. partner Julia Volkova.
* t.A.T.u., respectively. Lena's natural hair color is strawberry blonde, while Yulia is a natural blonde.
* t.A.T.u.'s song "Prostie Dvijenia" ("Simple Moves"). It's all about masturbation. Check out the music video sometime.
* t.A.T.u. were infamously portrayed as a lesbian couple, both in their music videos and in their actual music, live performances, and general public image. Even though it was all an act, one member, Julia Volkova, is actually bisexual in real life.
* t.A.T.u. Yulia (tomboy) and Lena (girly girl). Hardly a surprise, considering the marketing.
* t.A.T.u., Yulia Volkova and Lena Katina. Their manager, Ivan Shapovalov, did many things to make them look younger for his own fetish material. They both bleached their eyebrows, and Lena became blond for "Ya Soshla S Uma/All the Things She Said." Eventually, Lena would brighten her natural red hair, and Yulia had to dye her blonde hair black.
* Tau armies suffer severe morale penalties if their Ethereal leader is slain. A blurb in an Imperial Guard codex credits a Ratling sniper named Magogg with assuring one Imperial victory when he blew an Ethereal's head off. In the lore,

however, this is a risky move; the army
* T'au around that can do all the talking when they have to meet with members of another species.
* Tau as well, when one considers that it is for the greater good for sterilization policies, and special "helmets" for their bug allies.
* Tau Battlesuits are also known by Imperial designations. XV (short for the Tau term, which translates to "mantle of the hero"), followed by a number indicating weight class and a second number indicating specialisation. For example XV-8 is a general purpose heavy battlesuit, while XV-88 is the same class but fitted for fire support and XV-25 is a light stealth suit. The new XV-104 mech is therefore properly called "ten-four" rather than "hundred and four".
* Taub had one in an 8th season episode while being chewed out by House for not being objective about a patient. He said "... I think I just had a light bulb." House immediately stopped ragging on him and said "You can trust light bulbs."
* Tau Ceti e — the planet the humans were hoping to settle — turns out to be completely inhospitable. It is covered in massive hurricanes, and the shuttle carrying the elderly colonists was torn to shreds the moment it entered the atmosphere.
* Tau Commander Farsight has his own Battlesuit customized with the unique Dawnblade he found, subsequently making him the only tau unit dangerously competent in close combat, which suited his bloodthirsty tendencies.
* Tau Commander Farsight's battlesuit is modified to be able to wield the Dawn Blade in close combat, but unknown to him the Dawn Blade drains the life of those killed by it and give it to the bearer, and might possibly be a Daemon Weapon that he simply cannot hear the temptations of.]]
* Tau don't wear shoes, although with them it's more a case of "bare-hoof" than "bare-foot". Their allies, the Kroot, don't wear shoes either, but then,
* Tau Empire are attracted to their "Greater Good" philosophy and its less brutal treatment of its citizens.
* Tau Empire, realized that the Imperium of Man is several orders of magnitude larger and more powerful and the Crusade was but a mere fraction of their strength, and that the only reason the Tau is still alive is because The Imperium is too busy fighting wars with everyone else in the galaxy. The arrival of Hive Fleet Behemoth forced the Imperium into a peace treaty with the Tau and letting them go as buffer states, but ever since that the Tau must tread lightly lest the Imperium sends a larger Crusade that might actually wipe them.
* Tau Empire were covering up the existence of the Warp and daemons, as it conflicted with their own secular agenda. Farsight believed that this ran counter to the Greater Good.
* Tau Ethereals are considered nearly godlike by the lower castes, with the Tau being physically incapable of disobeying their orders,
* Tau Fire Caste warriors can either keep serving or go up the ranks until they're removed from active service to become this. If that sounds limiting, bear in mind the Fire Caste's sole purpose is to fight for Tau, and Tau parents are genetically screened to ensure the best offspring comes out.
* taught are some of the biggest explosions ever seen in red, she's learned quite well.
* Taught by Experience where Naruto quickly figures out (after learning about Suna's economic struggles) that Suna is likely to attack Konoha because "I've been poor before. Eventually, poor people get desperate." It's also implied that Naruto was struggling only because he was behind when it came to basic skills, like reading and writing, which was something parents usually jump-started their kids at home.
* Tau have a caste system where members of each caste possess different physiologies. The military Fire caste are tall and strong, the pilot Air caste are slender and have better depth-perception and G-force tolerance, and the worker Earth caste are short and stocky.
* Taunt Fortress 2 takes the mercs' various taunts and applies them literally in a series of comedic snippets. For example:

* taunting her and it seems she's about to break free with sheer force.
* taunting Malygos over Saragosa's corpse Aspect of Magic. And then death, too, in The Nexus.
* Taunting the Unconscious: It's your fault that you're in this state.
* Taunting the Unconscious: Making fun of someone who's comatose, unconscious, or in a similar state.
* Taunting the Unconscious: Making fun of someone who's comatose, unconscious, or in a similar state as a way to vent their negative feelings.
* Taunton Cider's Red Rock Cider was advertised on British television in the late 1980s and early 1990s with a series of spots paying homage to
* taunts Euphemia during the hostage situation about his hatred of the royal family (planting the seeds in her mind that Zero might be Lelouch). He also reveals to Suzaku that he knows Suzaku's deepest secret — that Suzaku killed his own father — in order to appear omniscient. Not only does this fail to recruit him, but Suzaku begins to suspect Zero's identity, as Lelouch is one of the few who knows Suzaku is a patricide.
* Tau Pathfinders can use a targeting laser to fire a missile from a nearby Skyray tank, even if the Skyray doesn't have line-of-sight.
* Taur, crushing a golden goblet after drinking from it. Shortly after, he orders the butchering of a camp of foreigners. Part of this was to clear out potential spies before his upcoming invasion of the West, but mostly to feed his bloodlust.
* Tauren (and tuskarr), being down-to-earth people, use 'gravy' consonants a lot. "Magatha", "Baine"
* Tauren. In fact, the Humans are the only race that gets an actual honest-to-goodness horse (although from an in-universe point of view, these are likely no more or less unusual than giant birds or tame rams). The Pandaren, which are the only playable race that can be either part of the Alliance or the Horde, ride dragon turtles, fittingly as they are from the Azeroth equivalent of China.
* Tauren Spirit Walkers can switch between ethereal and physical form.
* Tau'ri getting worked on in a lab in an earlier episode. This prototype fails spectacularly. It's not until Season 6 that a successful prototype Space Fighter is fielded by Stargate Command, and it's not until Season 7 that the production model gets built, and sees actual combat for the first time.
* Taurus and Muletta. Then animal rights groups pointed out that the comic (and new cartoon) glorified bullfighting, which destroyed the franchise's reputation, not helped by the fact that the original creator lost the rights to the characters, making him powerless to do anything about it.
* Taurus Bulba in the pilot episode, who connives behind the guards' backs instead of bribing them, taking this trope
* Taurus Bulba takes this ludicrous extremes, wherein his lower body, legs and feet are
* Taurus Model 82 in .38 Special (a copy of the Smith & Wesson Model 10) being standard-issue for the Carabineros.
* Taurus Wagon police cars looked very futuristic at the time. Not so much now.
* Taurus: You will realize too late that an absolute monarch is still in thrall to the needs of his subjects when your hamsters start dying of starvation.
* T'au serves as both the Capital of the Tau Empire and the Homeworld of the Tau species. Also within the Tau empire are Pech and Vespid, the Homeworlds of the Kroot and Vespid species.
* Tau shield drones are programmed to get in the way of incoming fire to protect their user. They have
* Tau society supposedly treats its human citizens (AKA Gue'vesa) quite well, sometimes to the point of
* Tau, Tau military dogma is highly mobile and considers the amount of territory controlled in a conflict to be meaningless compared to the armies that fight on it. Soldiers lost holding a position are therefore throwing their lives away for no reason, and a Tau commander who would commit himself to a Last Stand is incompetent rather than courageous.
* Tau the humanoids there, who had only recently mastered fire and simple tools.

But the fleet subsequently sent to cleanse and colonize the system was lost in a Warp storm, and internal conflicts made the Imperium lose interest in one world on the Eastern Fringe. Six thousand years later, an unknown alien ship was destroyed while approaching the Imperial world of Devlan after failing to respond to challenges from the local defense fleet, and when the bodies in the wreckage were identified, the Imperial authorities were horrified that the "new" xenos rapidly expanding in that corner of the galaxy were the same species the Imperium had failed to properly purge millennia ago. So then the Tau got to experience the Imperium in the form of the Damocles Gulf Crusade, which ground to a bloody stalemate until Tyranid troubles forced the Imperium's attention elsewhere.
* Tau, they were able to keep their technological capability unlike the humans who lost a lot of technological power and the Orks who unlike the Eldar whom they wer created alongside devolved and cannot fully access their inbuilt genetic knowledge. Some large Tyranids (read:bugs the size of houses, or multi kilometer bioships) are also capable of generating plasma within their own bodies, although it's more of a mix of unstable chemicals that ignite when spat out and leaves the bug's mouth or other organ that projects them. That being said, the Tyranids are so evolved this chemical cocktail used by their bioforms burns hot enough that it makes plasma, hence "bio-plasma".
* Tautological Templar. Batman noticeably doesn't have a rebuttal for this.
* Tautological Templar: Convinced that they're good to the point that everything they do is good by default.
* Tautological Templar: I don't give a fuck what everybody says! I'm a good guy so everything I do is good because I say so!
* Tautological Templar: Somebody who believes that they are good, and that makes everything they do good by default.
* Tautological Templar we do is righteous! Because we can't do wrong, period!
* Tautological Templar: You're on the right side and are therefore incapable of doing wrong.
* Tau units are sometimes bonded together in the Ta'lissera ritual, which translates as "covenant", "bond", or
* Tau, who are terrible in close combat, pack weapons with enough firepower to have their small arms pose a credible threat to tanks. In early editions, Tau could bang out light vehicles with their rifles even on their front armor, and could pierce most tanks with their sidearms if they got to the weak rear armor. In the current (late 2020) edition, they can deal a ton of wounds to anything with their basic rifles.
* Tau Zero is only supposed to take 5 years of time (relative to the passengers on board) to reach Beta Virginis. It becomes a generation ship, though, when its deceleration unit breaks down.
* Tavian, a sympathetic character in "The Romans," is revealed at the end of the story to secretly be a Christian.
* Tavi gets an amazing one to his entire country via watercrafting in
* Tavi himself isn't immune to this. Because he gets his powers late in life, he lacks the fine control seen from other crafters. Inventive as it was, his
* Tavis and Gan's father was an alien who landed on Earth, ended up joining the Vietnam War in the early '60s, met a Vietnamese woman, and fell for her. Their mother didn't realize she was pregnant until after their father had already left.
* Tavi's Aunt Isana seems like a young-looking woman whose only capable of performing water magic in a world where the ruling classes will use six element-based magics. After the events of the third book when she discovers a long time confident has loved her for years, it helps her open up after losing the first great love in her life many many years ago. She isn't going to lose him easily now. In the final book, when they are captured by the
* Tavi's Blood And Fire: Nihlus survives his encounter with Saren, but loses a hand to an attack on the Spectre compound.
* Tavi's Blood And Fire, the Covenant fills this role. It is explained that the Covenant have only failed to conquer the Citadel races due to the Citadel possessing vastly superior numbers. The Forerunners (Protheans) and Reapers will

likely be the Higher-Tech Species to them in turn.
* Tavi series finds himself in command of the First Aleran Legion when an enemy attack leaves him the sole surviving officer who can command. He goes from being the Third Sub-Tribune to the Tribune Logistica (Third assistant to the Quartermaster, about as low in the chain of command as an officer can get, a position he had never even earned, being appointed there for intelligence-gathering purposes), whose duties to that point consisted mostly of latrine-digging (As punishment from the Quartermaster for catching him at petty embezzling) to commander of a legion. He does far better than anyone else could ever have hoped to.
* Tavi takes out a notably-insane expert swordswoman by using his watercraft to figure out which taunts would be most effective, causing her to lose her cool and make mistakes.
* Tavros and Vriska. Tavros is a sweet, shy, kind boy with low self-esteem and a great love of animals and fairies. Vriska is an aggressive, dominating
* Tavros decides that Vriska must be stopped (after more Kick the Dog.
* Tavros deserves special mention. At one point he attempts to save a young Jade from accidentally shooting herself by taking psychic control of her dog, Becquerel, and deflecting the shot at her grandfather (whom he believed was a hostile intruder), killing him. He then points out that Becquerel would have saved her even if he hadn't done anything (in a way that would not have killed Grandpa Harley) and that he only interfered so he could feel a little better about himself. Even when she points out that killing her grandfather was
* Tavros finds himself still berated by Vriska in the afterlife for a long while until he finally tells her off and flies away.
* Tavros Nitram finally stands up to Vriska and actually goes to fight her when he learns
* Tavros Nitram was the Page of Breath, and so at least had the potential to have similar wind powers. He's never seen using them, though.
* Tawni O'Dell writes realistically of towns in and around Pennsylvania's coal mining industry.
* Tawny Man sexual. He tells Fitz that he 'puts no limits' on his feelings, but he knows Fitz isn't interested and therefore it wasn't a conversation that ever needed to happen.
* Tawny Man trilogy, as a side effect of Fitz having the Skill. Prince Dutiful also seems to have experienced this, and since Nettle's primary Skill-ability is control over dreams, it's likely that it's happened to her as well.
* Tawny Man trilogy, Nettle's Skill manifests itself as the ability to control dreams, and she and Fitz interact in dreams before they actually meet.
* Tawny Man were forced by the Pale Woman to have dragons and serpents tattooed over their entire backs. Both had unforeseen circumstances.
* Tax collectors in Roman-occupied territories were notorious for claiming more payment than their managers demanded and pocketing the difference, which was part of the reason why tax collectors were so hated by the Jews at the time.
* taxes, and, Scrooge has no choice but to give up the gold to avoid going broke "Two centuries before he was born."
* Taxes. While no one (especially right-wingers) likes paying taxes, without them states could not pay for roads and other infrastructure spending, police and military protection, and much more.
* tax forms in the US have a box to report "other income". If you've profited through any crime and don't report it, the government only has to prove that you have unaccounted-for income, so they can book you on tax evasion (and possibly filling out a falsified form) if nothing else. The presence of this box prevents any criminal from claiming that their illegal profits were unreported because they didn't fit any of the categories present - because it does not ask what form this income took, it was upheld as not violating the Fifth Amendment, which prevents self-incrimination.
* Taxi (2004): One scene shows the team of female robbers doing this to a security camera when they attack and rob a bank.

* Taxi, a French action comedy (written by Luc Besson) comically subverts this: one of the two protagonists is a young policeman who is very good at playing driving video games, but always keeps failing the actual driving exams.
* Taxi: After Louie makes a pact with God that if he survives surgery he'll be a better person, Bobby makes a bet with Alex that he can make Louie angry and cause him to revert to his old ways. After insulting him doesn't work, Bobby tells Louie that he totaled his cab. Louie trembles with rage but calls upon iron self control to keep from yelling. Bobby then tells him that he caused the accident himself by running a stop-sign. There are more tremors but Louie keeps control. Finally, Bobby gives up and goes to pay Alex, admitting that Louie really has changed. Louie overhears and realizes there wasn't an accident. And what point he finally snaps, attaching Bobby to a chain hook and raising him to the ceiling:
* Taxi, Alex and Louie have a bet going on who can make the most money in a night of cabbing. Louie brings in more money, but Alex makes enough in tips to make slightly more than Louie. The question of the winner comes down to whether the tips Alex has collected count towards the total. They decide to let a person who didn't bet make the decision, but only one person in the entire garage didn't do so. Cue everyone staring at Latka as he eats a bucket of chicken. Oblivious, he looks up and says, "Would anyone like a bite?"
* Taxi Alex finds himself in a gay bar dancing with a man against his will and ends up disco dancing with all the patrons.
* Taxi. An old woman who is a con artist sues the taxi company for damages after being injured. She had previously faked injury in the past to pursue false damage claims against other companies as well. However, this time the woman informs her lawyer that she really did fall and break her hip, meaning the lawsuit is completely legitimate. The lawyer remarks: "Well, there's a first time for everything."
* Taxi: Arnie Ross (Wally Shawn) and Elaine Nardo (Marilu Henner, ex-model) in the last season.
* Taxi as '200 miles an hour'. It has no bearing on the plot, but it credits the vehicle as going much faster than it really is (124 miles per hour).
* Taxi Brooklyn episode "Ambush", a witness in a mafia trial is being transported via a prison bus that gets hit by mobsters, even though she was traveling under an assumed name. Subverted somewhat in that the mobsters don't know her real name or what she looks like, so WITSEC at least didn't screw that part up.
* Taxi. But it's really a Girl Scout selling cookies, and when Louie screams, she screams as well, dropping her cookies and fleeing.
* Taxicab Killer at play here. Still, there's probably a bit of new media hatin' in the mix.
* Taxi! compete in foxtrot contest and lose. When the winning contestant gloats just a bit too much, Cagney knocks him out.
* Taxi crabs were considered de-canonized for years because the writer didn't like the joke. They slowly drifted back into canonical territory, though.
* Taxi crying. And he asks, "But am I crying because I miss you, or am I crying because I didn't cry?" He decides it doesn't matter and he's glad the tears have finally come.
* "Taxidermy" by Erin Murray starts out as a normal lost-love ballad, until the singer starts explaining how she's going to keep him.
* Taxidermy Is Creepy: Stuffed animals — or the people who stuff them — are used to disconcerting effect.
* Taxidermy Is Creepy: Taxidermy and those who are into it are perceived as creepy.
* Taxidermy Is Creepy: The practice of stuffing and preserving dead bodies is depicted as being unnerving and scary.
* Taxi Driver discuss the subtext as if it had always been part of the film.
* Taxi Driver" features both a crossroads demon and a dead vampire in Purgatory who have this look.
* Taxi Driver in a shot where the protagonist draws his .44 Magnum in his right hand and his snubnose revolver in his left. The barrel of the former is longer than the entirety of the latter.

* Taxi Driver. In terms of Vietnam causing his total alienation from normal society.
* Taxi Driver is about a man who befriends a 12-year-old girl as well.
* Taxi Driver is all about the protagonist projecting his self-loathing on others, where his antagonists are just placeholders for the things he hates about himself or wants for himself.
* Taxi Driver is a subversion, as he didn't really get his head shaved in a mohawk (they still had scenes to shoot with his hair, so a bald cap with a horse mane was put on De Niro's head). However, he did shed thirty-five pounds to play the role of Travis.
* Taxi Driver: It cannot be pressed enough how important this film was for this trope. An insomniac and depressed New York City cab driver becomes obsessed with cleansing the city of human "trash".
* Taxi Driver, one of the pimp's men gets several fingers blown off when Travis cuts loose with his .44 Magnum.
* taxi driver, positions, nobility) in their country are worthless in this country.
* Taxi Driver says the epilogue really happened, but next time Travis won't be a hero.
* Taxi Driver" scene was rendered in the script as, "Travis talks in the mirror."
* Taxi Driver sells his wares (in this case handguns) from a couple of suitcases. He also claims he can get the protagonist anything from illegal drugs to a brand new Cadillac.
* Taxi Driver. The reason for this: how satisfying would a story about revenge be if we didn't get to linger over the results a bit?
* Taxi Driver, Travis Bickle buys a number of guns from the suitcase of a skeevy street dealer. After making several purchases, the man runs down a laundry list of other illegal wares, to Bickle's disgust.
* Taxi Driver was completely improvised by Robert De Niro. The original script just said "Travis looks in the mirror".
* Taxi driving: get your passenger to their destination as quickly, and safely, as possible. With a cash bonus for doing well.
* Taxi. During his hippie days, he changed his name from Caldwell to Ignatowski, believing it was "Starchild" spelled backwards, and wrote his college term papers in fingerpaint.
* Taxi: Elaine asks Jim to go to a fancy party with her (out of concern for his feelings and with major reservations). He shows up at her door groomed and shaved, in a neato tux. Elaine gasps "You're gorgeous!" He replies in his quavering burnout voice "Yeah, I never get tired of hearing that."
* Taxi, Emilien keeps failing his driving test because he does this every time.
* Taxi episode had Louie addressing Latka as "you dumb fff...oreigner".
* Taxi episode, Jim Ignatowski is moonlighting as a vacuum cleaner salesman:
* Taxi episode. John Burns picks up a girl at Mario's with the line, "Let's just skip everything and get married." Not only does it get him a date, but she accepts his proposal. (As John later explains to the other cabbies, each of them was expecting the other to call it off...but they went through with it.) Later, the couple plan to get the marriage annulled, but by the episode's end they actually decide to make a go of it.
* Taxi episode "Louie Moves Uptown", where she tries to get a nice apartment. However the application board rejected her because she was an actress, and she responded by hiking up her skirt and sticking her tongue out at them.
* Taxi, even though she wants him to. "I was brought up that there are the nice girls, and then there are the girls you have fun with." He can't even go into her bedroom without having a mental crisis.
* Taxi ever been publicly humiliated. He can, in fact, relate, claiming it happens every time he has to buy new clothes, seeing as he has to shop in the boy's department.)
* Taxi, everyone is discussing their fantasies, Alex notes that his always go south. We then see his fantasy. A beautiful girl gets into his cab, and the two hit it off. They head back to his apartment and in the middle of making out, Alex

discovers she's actually his adult niece.
* Taxi flashback episode shows a single taste of a "hash brownie" transforming straitlaced Harvard student James Caldwell into spaced-out hippie freak Jim Ignatowski.
* Taxi, German exchange cop Petra surprises Commissaire Gibert with her Japanese skills. He should have known about them because they're mentioned in her file, but they're mentioned after her measurements where he stopped reading.
* Taxi had a pretty good relationship as shown whenever the latter appeared. It helped that they both hadn't seen each other for eighteen years. They even kissed when Phyllis came over to visit Alex for Christmas.
* Taxi has boxer Tony being pressured to do this in a fight, but it turns out his opponent is also trying to lose, flopping after Tony barely taps him with his glove.
* Taxi: "He insisted on ordering the meal in French. My main course was ten pats of butter."
* Taxi (he's essentially Kaufman's "Foreign Man" character turned into a full person) is always really happy to be in America and loves America more than anyone at the company.
* Taxi: In both the original movie and the US remake, Daniel/Belle's taxi has one, but it's so s/he can change the taxi steering wheel for a professional steering wheel.
* Taxi into this at the beginning of the final season. The writers got back on the ball pretty quickly and Alex went back to being his normal self.
* Taxi is a semi-pro boxer who trains kids at a youth center, so boxing comes up a few times as a main plot.
* Taxi is from an unidentified Ruritania. The national dress seen in episodes like "The Wedding of Latka and Simca" places the homeland somewhere in central Europe.
* Taxi, it's clear that Jim, a burned-out hippie, is desperate to find one, so the rest of the cabbies decide to turn him into a taxi driver too. Needless to say, this also changed the show in many aspects.
* Taxi, Jim Ignatowski is brought to a fancy party by Elaine who is hoping to impress someone but needs a date to attend the party. Jim proceeds to humiliate Elaine by acting like the '60s burn-out that he is, only to save the situation by sitting down at the piano and playing brilliantly. The other guests assume that Jim was just having a bit of fun, and so Elaine succeeds in her goal. Jim's befuddled reaction to his own playing: "I must have taken.. music lessons..."
* Taxi. Later he had to get divorced from his prostitute "wife" in order to marry Simka.
* Taxi: Latka and Simka have displayed various customs from their unnamed foreign country:
* Taxi, Latka loses a bet with Tony and can't talk for a week. In one scene, he communicates with the cabbies using signs.
* Taxi, Latka starts to tell the other characters how there's only one thing you need in life to make you happy, and that's friends...but then he remembers that you also need food and clothes...and a nice car...and a home...with a pool...and a beautiful woman "to make you foam at the mouth"...and finally concludes that if you have all that other stuff, "the friends would only get in the way."
* Taxi: Louie is in the hospital and the gang goes to see him. He has a box of chocolates that someone gave him and he offers them each "have one." They decline. Then he offers Latka one; Latka goes to town, eating practically the whole box. Louie then looks at the box and says "I said 'have one' not 'leave one!'"
* Taxi, Louie tries to tell the cabbies about his supposed sex life with Zena, wanting to whisper about it in their ears. He tries to move Bobby's hair away from his ears, only for Bobby to tell him, "I don't even let people I like touch my hair!"
* Taxi, lovable jerk Louie regales the cabbies with stories of his hellish high school days, as being a short, unattractive child made him an easy bullying target. The cruelest thing his tormentors did was tell him that an attractive girl that he had a desperate crush on wished to sit next to him at the cafeteria. Louie went to

lunchroom and saw her sitting at a table - and a baby's highchair next to her.
* Taxi movie by the German bank robbers. They drive in a truck, paint their cars a different color and flee under the police's nose.
* Taxi movie, Daniel and Emilien are observing Krüger's workshop and waiting for it to close. After a few hours, Daniel mentions that Krüger has insomnia and his workshop is open 24 hours a day. Emilien asks why he didn't mention this earlier, and Daniel replies that he didn't ask.
* Taxi movie series, where the black comic relief cop can never get a car to stop for him.
* Taxi). Once he managed to convince her that Vic wouldn't actually love her, she was able to convince Vic to leave for good.
* Taxi revolved around Alex going on a blind date with a witty phone operator named Angela, only to discover she was considerably overweight and very sensitive about it after getting burned by various men in the past. Alex spent the episode trying to prove he wasn't that shallow and help her learn to love herself. The episode also introduced the song, "Angela", which ended up becoming the show's theme song.
* Taxi. She was originally blonde and named "Marilyn" until management requested a last-minute art change to avoid a potential lawsuit.
* Taxi. Subverted with the fact that Reverend Jim considers him his "best friend".
* Taxi, the off-screen female voice in the John Charles Walters Productions logo says "Merry Christmas, Mr. Walters!" instead of "Good night, Mr. Walters!"
* Taxi, the player shoots the ball into the Spinout saucer, then collects a bonus based on how many revolutions it makes times the current ball number (Extra balls dosen't count as one ball, but counts as one for the multiplier).
* Taxi. Tony's doctor told him he couldn't box anymore without risking serious brain damage, possibly death. Tony is willing to take the risk, but Alex convinces him to quit by pointing out that his opponent would have to live with it on his conscience.
* Taxi were filmed in 1978 (the famous Queensboro Bridge "loop" used for the intro was intended as inter-scene footage as well).
* Taxi. Whenever Daniel and Lilly want to get down and dirty, something comes in between.
* Taxi when Jim rescued a horse and brought him into the garage, Louie came up and growled, "Get that ugly, flea-ridden, stinking animal out of my garage, and tell him to take his horse with him!"
* Taxi, who she names "Bill Board" while passing a billboard. She convinces Alex Reiger to pretend to be Bill at a dinner party (during which he reinforces the charade by joking "Yeah, my name really is Bill Board... you should meet my brothers, Clip and Switch...")
* Taxi work seems to be the Killer App for hybrid cars. No fuel is consumed idling in dense city traffic or waiting for fares, the battery packs are barely affected by massive mileage and indeed seem to thrive on constantly being in use compared to being parked 22-plus hours a day like most personal cars, and both the financial and environmental cost/benefit ratios increase compared to private use.
* Taxman Takes the Winnings: A character receives a large sum of money, only for almost all of it to go to taxes.
* Taxonomic Term Confusion: Terms like "domain", "species", and "genus" get confused.
* Taxonomic Term Confusion: Terms like "genus", "species", and "domain" are confused.
* Taxonomic Term Confusion: Words related to taxonomy (the study of classifying living things) get confused with one another or used incorrectly.
* Taxonomy and cladistics on the Discworld were codified by a long-disappeared zoologist called Carl Linoleum. His system is pretty much parallel to that devised on our world by Carolus Linnaeus - until it gets to species not known on our planet. Linoleum had a suspect sense of humour and no perceptible sense of caution, as his names for those other species are
* Taxonomy runs into a lot of problems with this trope. Due to a complicated hierarchy and scientific species names based on species' places in the hierarchy

(i.e. the binomial nomenclature of
* Taxus brevifolia). A fully synthetic version of the drug was quickly invented thereafter because making a single dose of the drug requires the cutting down of an entire Yew tree and the manufacture of the drug was threatening to put the Pacific Yew on the endangered list.
* Tax without using the T-Word, and under that logic, the bill was a-okay. It should be pointed out that this was not the victory proponents wanted, because much of the opposition to the bill was centered on it being forced participation and/or a tax.
* tayammum) if pure water is unavailable, or if there's a valid medical reason why the person cannot wash with water.
* Taye Diggs said that being in an animated movie was "on [his] bucket list," which is why he took the role of
* Tayend is a pretty classic example of this. The very first thing the reader learns about Tayend is that he's beautiful. His long blond hair and form-fitting clothes are described constantly, and all from
* Taylor Amelia, a talented web comedienne whose videos nonetheless focus on her other
* Taylor Anderson will frequently measure distances in "tails", which equate almost exactly to yards. Apparently, an average adult Lemurian's tail is about a yard long. Tails are also the same on land and at sea.
* Taylor and restore her beauty. Unfortunately for Taylor, the Yeerk chosen to infest her is not exactly a pillar of mental stability...
* Taylor betrays him and her own morals for her own purposes and destroys Jack's faith for good this time.
* Taylor ended up being almost a carbon-copy of Amy, even down to the same voice actress, but nearly all of the fandom consider Taylor to be a better character due to being somewhat more fleshed out thanks to her backstory being provided, as well as actually having a few
* , Taylor gets this power instead of bug control. And it makes her, in Director Piggot's words, "scarier than any [parahuman] I've encountered yet. And yes, I am including Nilbog in that total." If anyone is about to harm Taylor, something will happen to stop them. And if they were doing it on purpose, they will be punished in proportion to the scale of their deliberate offense. Taylor's power can sense any attempt to harm her, without any conscious effort on her part, and can if necessary reach back in time up to the moment of her trigger to set events in motion - which makes her get stronger the more time passes. In under two weeks her powers had been able to manipulate reality sufficiently to break the ABB and the Merchants, take out half the Empire-88, terrorize Coil into turning himself in, and lure in and kill/neutralize most of the Slaughterhouse 9, all without any conscious action on Taylor's, and in many cases even her knowledge, suggesting that within a year she'll be utterly unstoppable. On top of it all, her powers work in a variety of bizarre but hilarious Rube Goldberg-esque ways, such as Lung getting tarred and feathered or Kaiser getting hit by a literal ton of frozen crap.
* Taylor Ham (a form of processed pork product native to and beloved in the Mid-Atlantic states, especially
* , Taylor (having gone back twenty-two years in time) looks enough like her mother that it causes confusion in people who haven't seen her in a while, or are viewing her in dim light.
* Taylor Hebert and Rachel Lindt — an intelligent and idealistic bullied teenager and a
* Taylor Hebert. Then she peacefully retires at around nineteen years old.
* Taylor herself later admits that this is the real reason she joined the Undersiders, contrary to her earlier
* Taylor herself shows little to no hesitation in achieving her goals. Rob a bank, threaten innocent people with black widows? Well, she has to play along if she wants to find out who the Undersiders are working for. Dragon standing in her way? Sorry Dragon, you've been cool, but
* Taylor invokes the trope against Scion, giving him the illusion of being reunited

with his counterpart before dashing his hopes to drive him to despair so that he would let himself be killed.
* Taylor is also missing from season one's "Bad News Blair", "School Lies" and "Woman on the Verge", and in the first half of season four she only appears in four episodes - "Gaslit" was her final episode before leaving - although she remains listed in the credits for the entire season
* Taylor Kitsch lost thirty pounds of muscle — and took up smoking! — to play suicidally-depressed photojournalist Kevin Carter in
* Taylor Lautner seems to possess only two emotions: bored and constipated.
* Taylor, Legend and Amy work together to heal her with yellow sunlight.
* Taylor Made of The Chicago Girls, Made In Sin and the various incarnations of Valkyrie. She is very expressive visually; verbally is a whole different story. Her promos can be quite clever but her delivery makes it hard to appreciate, hence most of her heel career is spent playing off more charismatic partners like Nikki St John or
* Taylor Momsen began her career as a child actor, famously as Cindy Lou in
* Taylor Momsen (Lily) are AWOL from the season three premiere "The Freshmen".
* Taylor Momsen who plays Jenny isn't much far behind at 5'6.5"/169 cm.
* , Taylor requires a cassette tape with soothing music for her to go into the self-hypnotic trance that she needs to contact her dead best friend, Lisa. Until it's destroyed in a fight, and she finds that she doesn't need it after all. Subverted in that she had needed the tape at first, but after months of using it, didn't actually require it to put herself into a trance any more.
* Taylor Richardson, who had played Annie in the musical's 2013 Broadway revival following
* Taylor Russell, like Judy Robinson, was born to a Black father and White mother.
* Taylor's Ark, the title character rescues a little girl from a colony planet that has been ravaged by a disease that has killed off all of the other colonists except her. The bank that owns the colony worlds wishes to sell them to the highest bidder, and is using the virus to kill off the colonists on said worlds. Unfortunately, the colonists on the planet where the girl was found anticipated this and set up their estate plan in the form of a tontine, making the girl a multi-millionaire.
* Taylor Schilling, says she's dated both men and women, while not using labels (her character is bisexual).
* Taylor Schilling's, leaving her instead with a brief appearance near the end.
* "Taylor" seems to have kicked in since, however, and the name has continued its decline.
* Taylor's forces review the bulletins for the pirate captains of Pavia while preparing to raid the system, with the rewards including several trillion Throne gelts and multiple
* Taylor's going to need the inmates of the Birdcage if she's going to take down Scion.
* Taylor Spreitler episode "Friending Emily" as the victim's sister, Taylor Culphers.
* Taylor Swift (also played by Taylor), you can almost hear the AB scream "What!!"
* Taylor Swift, and many of her fans have followed her lead in becoming fans of the show as well.
* Taylor Swift, and then seemingly recognizing each other in the present.
* Taylor Swift - "Back to December," though it's more like, "I blew it, I regret it, and it's too late to apologize but I'm gonna try anyway because I miss you — but if you can't forgive me, I understand."
* Taylor Swift, before the bridge, where she's drunk and crying, and we get this lyric:
* Taylor Swift - "Breathe". (Swift is, in fact, a particularly infamous example of an artist specializing in breakup songs.)
* Taylor Swift built her early career on this trope. "Teardrops On My Guitar" is the earliest example.
* Taylor Swift did something similar, discussing various topics in her opening

monologue song and ending each verse with "But I'm not going to talk about that in my monologue song."
* Taylor Swift Enters Alternate Universe To Date Body-Building George Harrison." And Gandhi played for the Seattle Seahawks.
* Taylor Swift guest starred as victim Haley Jones. The episode opens fairly normally, with Nick Stokes arriving at a crime scene to find Haley dead. From there, however, the episode travels backward in time to a number of previous cases at the same location, all of which have some bearing on the current one.
* Taylor Swift had a typo occur on official t-shirts: Part of the text was meant to read "you're the only one of you, baby that's the fun of you", but some of the shirts had a misplaced apostrophe ("your'e"). This was a lyric from her single "ME!", which ironically also included the lyric "spelling is fun".
* Taylor Swift, had her song "White Horse" featured in one of the episodes.
* Taylor Swift has a love song titled "Sparks Fly". The song also says, "I'm captivated by you, baby, like a firework show."
* Taylor Swift has a song named Invisible String on her eighth studio album, Folklore. The song talks about a girl singing about how the person she's with is someone she's meant to be with.
* Taylor Swift has had seven #1 hits, but "Love Story" (#4), "I Knew You Were Trouble" (#2), and "You Belong With Me" (#2) didn't make the cut.
* Taylor Swift has the following lines: "They're burning all the witches even if you aren't one/They got their pitchforks and proof/Their receipts and reasons"
* Taylor Swift her old forumas to a sufficient point that most no longer saw them as relevant.
* Taylor Swift: In "London Boy," after falling in love with the titular boy, the (American) narrator loves everything English.
* Taylor Swift in "Look What You Made Me Do", where she claims she was locked out of her house after giving someone a place to sleep.
* Taylor Swift; in the album, she notes she's putting someone on a Nixon-esque "list" and underlined it twice.
* Taylor Swift, in the music video of her song "You Belong With Me", is able to write messages and hold them up to her bedroom window to show her crush. He writes back because she's his friend.
* Taylor Swift in the past but she has largely grown out of it. She chalks it up to immaturity. It was to the point that an image from "You Belong With Me" was the page image:
* Taylor Swift. In the video for the song "You Belong With Me", she plays dual roles as a cheerleader and as a nerdy neighbor girl. For the nerdy neighbor girl part she dons a pair of glasses, which not only fail to make her look unattractive but actually make her even more beautiful.
* Taylor Swift is about how for a long time, she was mad at a former friend and upset about everything they did but is now at a place where indifference is all she feels, and it's peaceful and nice.
* Taylor Swift is a common one) to continue to be listed as the genre they started as, as long as their sound doesn't become too alien.
* Taylor Swift is one of the most critically acclaim and best selling album of 2020 (appeared at #1 on the Year End Album chart) but none of its single ended up on the Top 100 Song of the Year.
* Taylor Swift. It's talking about how the guy in the song shouldn't pursue her because 'he has a girl at home and everybody knows it'. Interesting inversion in that it's in the perspective of the girl who's being pursued.
* Taylor Swift, largely spurred on by the fact that she writes songs specifically aimed at young women.
* Taylor Swift left her original record label, Big Machine, after her contract expired in November 2018, she was bringing in roughly 80% of their annual revenue all by herself.
* Taylor Swift majority of her first album's sales were from the teenage crowd.
* Taylor Swift: "Picture to Burn", "Should've Said No", and "We Are Never Ever Getting Back Together".

* Taylor Swift plays an increasingly obsessed and insane version of herself in her video for "Blank Space", parodying the image some portions of the media have of her as an drama-addict who deliberately makes her romantic life chaotic to provide inspiration for songs.
* Taylor Swift released between 2006 and 2011, and made her, at age 20, the youngest person ever to win Album of the Year at the Grammy Awards.
* Taylor Swift's albums, the lyrics are all lowercase except for a few seemingly random capital letters. When read top to bottom, the capital letters spell out a message (for instance, "Can't tell me nothin'" is the hidden message in the lyrics to "Tim McGraw").
* Taylor Swift's "American Woman", not so much (after all, the very first line is "American woman, stay away from me!").
* Taylor Swift's "Bad Blood", at the end of the opening fight, Swift is kicked out a window, falling into a parked car in the street below from where she begins singing the song.
* Taylor Swift's "Blank Space" describes a woman who turns out to be this, and explicitly refers to herself as one before the second chorus:
* Taylor Swift's "Blank Space", the narrator admits that her exes view her as a crazy ex-girlfriend:
* Taylor Swift's "Death by a Thousand Cuts," the narrator attempts to drown her sorrow after a break-up with little success.
* Taylor Swift's "Fifteen" uses mostly second-person narration despite clearly being an autobiographical song.
* Taylor Swift: "She wears short skirts/high heels, I wear T-shirts/sneakers, she's cheer captain and I'm on the bleachers..." which refers respectively to the nerdy neighbor girl protagonist and cheerleader antagonist of the song.
* Taylor Swift's "Into You") to their partner's best friend (with the partner witnessing) or their best friend's partner (with the best friend witnessing) to gauge the target's reaction; of course, the test only works if the person being texted a) is unfamiliar with the lyrics and b) hasn't been tipped off about the prank.
* Taylor Swift's made a short song "Thug Story". The end of the song was censored for comedic effect, with Taylor Swift protesting "But I didn't even swear".
* Taylor Swift song contained alt-right dog whistles. It received exactly one comment until two months later, when Swift's lawyer sent them an angry letter demanding they take the post down, and that they also couldn't publish said angry letter because it was copyrighted. Naturally, PopFront published it. This led to major music publications like Pitchfork and Spin picking up the story in addition to national organizations like the Washington Post, the ACLU getting involved, and many, many more people seeing the article.
* Taylor Swift song "Picture to Burn" is about burning up pictures of her ex.
* Taylor Swift songs. Most notable when she reaches the front of the stage during her performance of "Mean" at the 54th Grammy Awards.
* Taylor Swift's perspective. Betty and James are named but the girl James had a fling with isn't.
* Taylor Swift's relationship when she and her boyfriend broke up and reunited several times.
* Taylor Swift's romantic relationships and personal life are often reflected upon in her songs, sometimes to the point of humorists joking that she must start and end romances to provide subject matter for her music.
* Taylor Swift switched a line in her song "Mean" to read "Someday, I'll be singing this at the Grammys..."
* Taylor Swift's "You Belong With Me" features a love triangle between blonde
* Taylor Swift takes the role of Archie choosing between her current boyfriend (Betty) who she describes as "sensible" and who "calls exactly when he says he will," and her "wild and crazy" ex who is "just so frustrating, intoxicating, complicated," who fills the role of Veronica. In the end, she chooses her ex.
* Taylor Swift: The narrator speculates that their tormentor was abused once, then declares that they won't turn out like them.

* Taylor Swift, the songs “cardigan”, “august”, and “betty” are perspectives of each teenager (Betty, James, and the unnamed girl James had an affair with) involved in a tumultuous summer love triangle.
* Taylor Swift - "Tim McGraw", "All Too Well", "Last Kiss", "Back to December"
* Taylor Swift to ever collaborate on a song together, but indeed they did in former's song "Bad Blood".
* Taylor Swift tribute to her grandmother Marjorie Finley and how Taylor moans that she, despite all of the good memories mentioned earlier in the song, will never fully know what an incredible person her grandmother was, all the while expressing heavy guilt and regret for not asking more questions because of her own young age:
* Taylor Swift was groped by a radio host by the name of David Mueller at a fan event after a concert in 2013 while they were taking a picture. She told his employer what happened and he was fired. He sued her for $3 million in damages for losing his job and for defamation in 2015. She countersued him for $1 for sexual assault. She won the case and dollar.
* Taylor Swift was nominated for the Grammy for "Best Country Album," even though it contained songs like "We Are Never Ever Getting Back Together," and "I Knew You Were Trouble," which sounded about as Bubblegum Pop as you could get. It may have influenced Swift's choice to officially change her music genre of choice from Country to Pop.
* Taylor Swift was the one for whom she wrote the song. Except, of course, the cover was Flipped. He did a really nice job, too.
* Taylor Swift, who collaborated with her on the song) falling in love over the course of a school day.
* Taylor Swift, who she accused of taking her dancers away from her. Perry would hit back at Swift with that "Regina George" tweet and "Swish Swish". Swift hit back at her with "Look What You Made Me Do". Fortunately, the feud ended in mid 2018 when the two reconciled and Perry appeared in Swift's music video for "You Need to Calm Down".
* Taylor Swift) without her permission. She completely denounced the album and called it "tasteless" and "shameless greed in the time of coronavirus".
* Taylor Swift, with the boy winning over the father and marrying the girl.
* Taylor Swift with this, but they're sung softly, over a gentle piano and guitar intrumental.
* Taylor Swift would often wear a white dress signifying this trope. But times change.
* Taylor Swift would stream for the first time on Apple Music (alongside her back catalogue). However, she didn't want to put it on other services yet. As of 2017, her music is back on Spotify, and also available on Pandora and Google Play Music.
* Taylor Swift - "You Belong With Me" is about a girl who's jealous that her friend has a girlfriend. She thinks his girlfriend is bad for him and thinks she'd be a better match for him.
* Taylor Varga had subjected Taylor to following the locker, Danny Hebert called Principal Blackwell and tore into her about the whole period of bullying, demanding a meeting to settle the matter. When the time for the meeting came, Danny found that the trio's parents had been called in by Principal Blackwell.
* Taylor Varga just nope out if there's even a chance of getting within a stone's throw of Taylor.
* Taylor Varga that the thought of her being even a stone's throw away is enough to make them just nope out of whatever they're doing and go hide on the exact opposite side of the planet.
* Taylor Walsh made sure all of the patients in the hospital were evacuated and transferred out of the city before the anomaly event.
* Taylor Wilde of TNA was discovered working at a Sunglasses Hut just to pay the bills since, despite being a personality on a primetime TV series and holding (at the time) the TNA Knockouts Championship, TNA didn't cover her living expenses. Wrestling these days, especially at that level (being nationally televised), is usually regarded as a genuine occupation and having to pull odd jobs like that is seen as fairly shady on TNA's part (other wrestlers on TNA's roster also said they

weren't making a solid income from wrestling either and had to do other work to get by).
* Taylor Wilde was working a minimum wage job at Sunglass Hut while was reigning Knockouts Champion because of how underpaid she was. After a fan recognized her, she resigned immediately.
* Taylor Wilson places, and places that either charge high tuitions or pay astronomical salaries (or both).
* Tay, the Moiety Rebel Age, one of the rebels gives you back your book, along with Catherine's journal, and they appear in your inventory when you pick them up.
* Tayutama, she's wielding a significantly-sized mallet. She's a goddess, but still, that's some impressive hammering.
* Tayutama. The odd ending probably recreates the trope straight but isn't explored.
* Tayuya was also killed in this way: she was in the middle of thinking she would use her genjutsu when Temari's huge attack instantly leveled the area and crushed her under a tree.
* Tay Zonday of "Chocolate Rain" fame has Asperger's. He disclosed his diagnosis in a tweet in which he criticized conservative American pundits for making fun of teen climate activist Greta Thunberg's own Asperger's diagnosis.
* Tay Zonday's head explodes after the "Dramatic Chipmunk" stares him down in "Canada on Strike". Complete with dramatic music and everything. He manages to blow the critter's head off with his gun before he croaks.
* "Taz and the Pterodactyl": When the pterodactyl charges at Taz, he ducks and somersaults through the screen.
* Taz at the beginning of his match in Heatwave '98, and it's also a standard opening spot in any match against a giant like Mark Henry, Big Show or someone billed as a monster heel like Zeus. The beginning of a match is generally the most acceptable time to no sell a move, since it makes sense that a wrestler is less hurt by moves when they're fresh, especially if it plays into the psychology of the match (e.g. a "get the big man off his feet" plot).
* Taz: Began the decade as an AEW commentator, also becoming manager of the Team Taz stable in 2020.
* Taz is this to such a level that he was the wrestler for whom the "(Wrestler Name)'s Gonna KILLL YOUUUU!!!!" chant was coined.
* Taz-Mania: A spy (who, naturally, looks nothing like Taz) does this to Taz in "Yet Another Road to Taz-Mania".
* Taz-Mania: Being a parody of typical sitcom family, the Tasmanian Devils' home is like this. The exception is Taz's room, which is literally a cave whose only furnishing is a rock that he sleeps on.
* Taz-Mania (British) voiced Bushwhacker Bob's mum and Constance Koala.
* Taz-Mania channel is showing something that's somehow connected to sea birds.
* Taz-Mania channel - is showing something that's somehow connected to Sea Birds.
* Taz-Mania eager to follow Bob's order to stop Leghorn's hiccups by scaring him.
* Taz-Mania, enemy agents turn the family mini-van into a weaponized spy car after Hugh, Drew and Taz are mistaken for fellow spies.
* Taz-Mania episode "Francis Takes a Stand" featured Francis starting a lemonade stand. Taz opened another one across the street from Francis'. The only customer who ever appeared was a tax collector who, after buying a lemonade from Francis (and hating its taste), revealed himself a tax collector and took the money he gave Francis as payment for the lemonade.
* Taz-Mania episode "Retakes Not Included", as turning back pages allows Bull Gator and Axl to undo events that have already happened.
* Taz-Mania episode "Retakes Not Included". Bull and Axl realise that they have digressed too long and that the plot has moved on without them. They flip backwards through the script in order to catch up and prevent Taz from eating a cute fluffy bunny.
* Taz-Mania episode "Retakes Not Included" starts with Bull and Axl running off the edge of the animation and finding themselves standing on a blank page. This is the first of Bull's many complaints about the shoddy production values of this

particular episode. At the end of the episode, the traditional 'end-of-reel' markings flash up the screen while the characters continue to bicker.
* Taz-Mania episode "Taz in Keeweeland". This place is very much in the mould of the original Wackyland, with the Keewee taking the place of the Dodo.
* Taz-Mania featured two spies who dressed themselves as tourists from Cleveland. Practically every conversation they had included some mention about the place.
* Taz-Mania") follow Taz (or "Bright Eyes" as she calls him) and his family around, with the others trying to ignore the strange lady spying on them.
* Taz-Mania had carnivorous plants with eyes in the jungle stages. They were Taz's size and could slowly walk around, and Taz could pick them up, carry them, and eat them (though they could still bite and damage Taz if held, so eat them quickly). The boss of the jungle was a gigantic screen-sized version of the plants, who could be quite a tough fight if you don't utilize the three bags of weed-killer scattered around the arena.
* Taz-Mania: Happens at the end of "Bird-Brained Beast" when the Platypus Brothers back their truck over Taz as they are leaving.
* Taz-Mania: Happens to an elderly Francis X. Bushlad when it is discovered that he never completed his manhood ritual.
* Taz-Mania: Happens to the Platypus Brothers when they get lost searching for Taz in their attic in "Never Cry Taz".
* Taz-Mania, has no ending because Buddy Boar literally forgot to include the final scene.
* Taz-Mania: In "Astro-Taz", Taz's skill at video games allows him to shoot out a meteor swarm that was going to destroy the Earth.
* Taz-Mania in "Feed a Cold" where the force of Taz's sneezes is enough to lift the roof off the Platypus Brothers' house.
* Taz-Mania: In "Here Kitty, Kitty, Kitty", Kitty unravels a comforter off the bed and Taz has to knit it back together.
* Taz-Mania: In one episode, Molly brings a kitty home and the kitty torments Taz behind Molly's back. In the end, the kitty held a sign saying "I'll be back". A later episode did feature the cat returning.
* Taz-Mania: In "Return of the Road to Taz-Mania Strikes Back" Hugh, Drew and Taz get involved in a golf buggy chase. At one point Jean, who is on foot, overtakes them to remind them that they still need to buy orange juice.
* Taz-Mania: In "Road to Tazmania", a spy does this to send Hugh, Drew and Taz to the Spy Mart.
* Taz-Mania: In "Sub Commander Taz", he ordered a nuclear submarine from a comic-book ad. It was delivered in a crate that filled most of the room, but it turned out to be a toy so small it could be dropped into a water glass.
* Taz-Mania: In "Taz in Keeweeland", Taz's repeated pressing of the 'pound' key allows the Keewee to pop out of the handset and pound him on the head with a mallet.
* Taz-Mania: In "The Bushrats Must Be Crazy", the Bushrats start worshiping Jake's rubber duck.
* Taz-Mania: In "The Origin of the Beginning of the Incredible Taz-Man", Taz gets arrested for attempting to remove junk mail from someone's letterbox.
* Taz-Mania: In "The Thing That Ate the Outback", Taz creates the eponymous thing with a mail-order chemistry kit.
* Taz-Mania: In "Ticket Taker Taz", Molly's radio appears to be directly answering the questions she puts to it.
* Taz-Mania: In "To Catch a Taz", Wendal arrests Thickley on "a 219; a fashion faux pas".
* Taz-Mania: In "Unhappy Together", an argument between the Platypus Brothers ends with them cutting their house in half.
* Taz-Mania: In "Yet Another Road To Taz-Mania", Taz and a group of spies get trapped in a pin-setter, set up on the bowling alley, and knocked down by a bowling ball.
* Taz-Mania. It fails as spectacularly as all of his other plans to catch Taz.
* Taz-Mania level. Their tops could be used as platforms, but touching their sides

resulted in instant death.
* Taz-Mania once had a bit where Taz went to insane lengths to get the prize from a box of cereal...which turned out to be one of those baking-powder propelled submarines.
* Taz-Mania: One gets installed in the family mini-van (without the Devil's knowledge) in "Yet Another Road to Tazmania". Taz is accidentally ejected from the car while Hugh is trying to turn on the air conditioning.
* Taz-Mania on the gag, saying "I really should have seen that coming".
* Taz-Mania: "Retakes Not Included" largely consists of Bull Gator complaining about the direction of that particular episode.
* Taz-Mania short where the family goes hiking and it starts to rain, somebody calls for a cadence and Taz chants:
* Taz-Mania: Taz and Wendal are stranded on one in "Taz-Manian Theatre".
* Taz-Mania: Taz beats up two dinosaurs in a pit and they both try to get out but he drags them back in.
* Taz-Mania: Taz gets his tongue stuck to frozen dinner in "Take All of Me". Wendal's attempts to free him do not go well.
* Taz-Mania, Taz has to travel across two rivers, one headed to the left, and another headed to the right, with a waterfall in the middle. He has to navigate the river by hopping across boulders and logs that slowly sink, and since the controls aren't always responsive, he sometimes ends up landing in the water. If he stays on a boulder too long, an alligator will pop up and attack him, and if he loses all his health, he sinks into the water. Is it any wonder Taz hates water?
* Taz-Mania: Taz's attempts to convince Bushwacker Bob that someone is trying to murder them in "A Midsummer Night's Scream".
* Taz-Mania: Taz takes a job at the Burger Thing after he quits the show in "But Is It Taz?". It includes a geriatric employee who has taken more that 20 years to make 'Employee of the Month'.
* Taz-Mania, the Bandicoot scouts seemed to have badges for everything. For example, Taz's brother had a merit badge in swinging from vines to save people from falling off waterfalls.
* Taz-Mania, the Dingo and Taz are both knocked off a tall mountain and start to fall. They take so long to fall that they have to draw for breath and Dingo has time to admire his house.
* Taz-Mania, the primary justification used by Bull Gator and Axl for anything they do is that they are doing it "to please the zoo-going children of the world".
* Taz-Mania, this happens to Taz when he attempts to eat the giant seabird's egg, only for it to hatch into a baby seabird and mistake him for its mother.
* Taz-Mania: This trope sums up the attempts of both Francis X. Bushlad, and Bull Gator and Axl, to capture Taz, and Taz's attempts to capture the Kee-Wee.
* Taz-Mania uses 'arugula' as an inherently funny word. Especially funny when John Astin says it.
* Taz-Mania: "War and Pieces" consists entirely of an escalating war between Taz and Molly that begins when Molly's loud music causes Taz to drop his sandwich, and he retaliates by eating her CDs.
* Taz-Mania, Wendal gets exposed to Gamma Rays that turn him into a monster whenever he gets angry. By the end of the episode, Mr. Thickley gets tired of constantly trying to appease Wendal and finally says, "Oh, go ahead and hit me!" The camera freezes as Wendal turns into a monster and grabs Taz to do just that! All we hear is the sound of Taz screaming and whacking noises.
* Taz-Mania, where Taz makes a weird word, with symbols that aren't even in Scrabble pieces, but when he was called on it, it actually was in the dictionary, albeit a dictionary of vulgar expletives.
* Tazmily Village was founded by the last survivors of a calamity (which is never described, but is thought to have been a result of their previous lifestyles), who had decided to manipulate all but Leder's memories in order to make them believe that they had always existed in harmony with nature.
* Taz: Wanted has these as "Whack-in-the-Boxes", which must be disabled before destroying them.

* Taz was shown to be an adorably innocent little child, who was very sensitive and prone to
* Taz(z) is an aversion as well. A stout 5'9, 230 or so pounds, he was known as The Human Suplex Machine, and would make a habit of throwing around men much larger than he.
* Tazz on TNA when his broadcast partners were less than enthused by them; though he questioned his own tastes in the latter case, he still stuck by them.
* TBJZL is black, though he sometimes changed to hot pink whenever custom cars/bikes aren't allowed to avoid confusion between him and JJ.
* TBN into a new channel called JUCE-TV which itself shut down in early 2020.
* TBN that focused exclusively on live church services. In 2016 it rebranded as Hillsong Channel and shifted to a focus on more generalized church programming outside of only church services.
* TBN) which itself was created as a result of the merger between their teen-oriented JCTV network and their preschool-oriented Smile of a Child shut down in early 2020 as a result of TBN's ongoing serious financial troubles.
* TBN would begin to always show the phone number for its toll-free "prayer line" on screen at all times during programming starting sometime in the mid 80's. In the late 90's and early 2000's with the advent of the Web, it would alternate with the www.tbn.org website also being shown on screen and alternating with the number.
* T-Bone and Razor seem to favor a mix of Steamroller and Plugger styles. An example of an Ace with a back-seater — T-Bone's the pilot, Razor's the gunner/weapons officer.
* TBOverse actually subverts this trope in that the stories show the proposed caliphate to be unworkable due to its internal contradictions and it collapses in barely more than a decade. By the time of the last story, set in 1986, "The Caliphate" has collapsed and the ruling authorities are trying to rebuild their relations with the rest of the world.
* TBS, a baseball game going overtime pushed the film back 30 minutes and joined it in progress.
* TBS and TNT were notorious up until the late-2000s for overplaying
* TBS! Another tale was that the sales department had a storage closet full of Ginsu knives and the other stuff they hawked during ad breaks; some employees proceeded to fill a crate full of this and other Southern stuff, and ship it off to some British engineers who'd helped them install an audio console; the FedEx customs people were bemused, and the British guys absolutely loved it, especially the Moon Pies they'd tossed in there.)
* TBS, an unrelated show meant to premiere in the same block as a companion series, never made it to TV, being held back to become HBO Max's first original adult animated series two years later (and surprisingly had more episodes greenlit afterward).
* TBS had brief skits of people calling the TBS Comedy Research Institute to ask if a certain situation they were in was funny.
* TB Skyen, a hideous shit-brown toad monster with a zombie-like face and arms poking out of the end, he spent half the boss fight geeking out about it.
* TB Skyen episode, intercut with sepia-toned clips from later in the episode of his character getting mauled.
* TB Skyen games, particularly when backtracking to find a specific door that he now has a key for. Often there will be a hyper-accelerated sequence of him just running in the wrong direction forever.
* TBS playoffs that one of the later ads referred to itself as part of a three-hour Frank TV promo, sometimes interrupted by baseball.
* T Campbell has done this with various webcomics he's written or co-authored, both played straight and using alternate versions of characters.
* T Campbell, has even stated that the trope is the reason Tiffany has been able to get the better of Faith. As seen in the following quote:
* TCG gates to jump between sectors, while capital ships are too big to fit into the gates.
* T'Chaka, Black Panther's father, is killed in his introductory scene in

* T'Challa accuses Baron Zemo of being little more than a Nazi. The other man objects, claiming to be
* T'Challa, being a well-educated and polished young man who can nonetheless beat the hell out of most anyone he comes up against.
* Tchernobog, The One That Binds, The Dreaming God, The Sleeping God and The Devourer of Souls from
* TCM Now it plays full time and all its shows are dubbed; TCM no longer airs.
* TDA: In the Reunion Special "Celebrity Manhunt", Gwen is shown giving one of these to Katie and Sadie on her webshow.
* TD and Celestia eventually strike up a friendship and later romance in
* TDI: Owen, Heather, and Izzy, "The Sucky Outdoors", to a bird whose singing is just a little bit aggravating
* TD the Alicorn Princess after he accidentally becomes an ageless alicorn. When they start seeing each other, TD is in his mid-twenties, and Celestia has at least 2000 years on him.
* TD the Alicorn Princess, after he accidentally ends up taking Twilight's place and ascends as an alicorn.
* TD the Alicorn Princess quickly starts to get out of control after Blueblood sets up a machine that pies TD in the face.
* TD the Alicorn Princess. This being after Celestia accidentally traps him in Equestria, and after numerous instances of the two punching the other in the face.
* TDWT: In "Slap Slap Revolution", After getting chewed out for tossing out an electric meat grinder in the previous episode that they could've used to win the sausage building contest, Heather tries to justify her actions, only for her teammates to tell her to "SHUT IT!!"
* Tea and Sympathy Tom and tries to defend him from being bullied by the other boys.
* Tea and Sympathy wasn't exactly a widow, although her husband didn't pay much attention to her, which is why she turned her attention to the young man whom his more 'hearty' classmates thought was gay... but he wasn't.
* "Tea At The Treedome" has a very mild case. When Sandy takes the flowers from SpongeBob, part of his finger breaks off.
* teabagging in multiplayer FPS is pretty much this since it's done on the corpse of a player. It's one of the rare times players do this by choice in a game where it wasn't intended to have this, but they managed to find a way to do it thanks to crouching.
* Tea bags, traditionally square, were revolutionised by making them round. Adverts claimed that this somehow improved the quality of the brew. Later, they pulled a similar trick with tetrahedral tea bags. In fairness, the tetrahedral bags make it a bit less of a waste to put proper whole-leaf tea in the bag rather than the fannings (i.e. leftovers) they usually put in bags. Still ridiculously overpriced, though.
* Tea Bags were "invented" when New York merchant Thomas Sullivan, in order to cut costs, sent tea samples in silk bags instead of metal containers, so his customers would take the tea out of the bag and brew it. They instead dunked the whole bag into the water, and a new way to make tea was born.
* Tea, Biscuits and Incest Mikayla eventually learns that her boyfriend Jayden is also her half-brother.
* tea ceremony sound stage revealed that she introduced it to Mary. Ginga, who also drinks her tea this way, asks her father, who is suggested to be of Japanese descent, if he would like to try it, and he politely refuses.
* Teacher fits this trope. Whenever it is shown, it always has smoke coming out of it, and it often falls apart.
* "Teacher Halfar": Halfar suffers because he wants to teach children in their native language, but it's forbidden. He goes from school to school and has no money. He hangs himself, and the poem ends with a sarcastic statement that he has finally found a position — a suicide's grave.
* Teacher/Parent Romance: A teacher and the parent of one of their students start a romantic relationship.

* Teacher/Parent Romance: A teacher falls in love with and dates the parent of one of their students.
* Teacher/Parent Romance: A teacher falls in love with the parent of one of their students.
* teacher recognizes that they haven't really mastered the martial art in question, and their "innovations" are just the things they're ignoring, taking shortcuts with, or teaching inadequately. Keep in mind: most modern martial arts are, for all intents and purposes, sports and exercise methods. Would you broadcast that you teach people how to play your "personal variant" of baseball?
* Teachers (2016), an animated bluebird visits each of the teachers as they are getting ready to go in for the first day of school.
* Teachers (2016) does a variation with a teacher being punished. Ms. Snap sends out an inappropriate tweet and is suspended for three days. The other teachers end up crusading for her right to a life outside of school.
* Teachers (2016) is called "Picture Day." Some of the things that go wrong include Ms. Snap's self tanner setting horribly, Ms. Feldman losing her eyebrows, the photographer harassing Ms. Cannon, and the school mascot dying.
* Teachers (2016) is Ms. Bennigan's relationship with one of her student's parents. Among themselves, the teachers only ever refer to him as "Hot Dad."
* Teachers (2016), Ms. Snap seems to have pressed her room parent into service as her personal attendant—Mrs. Schneider is seen lint rolling her sweater and bringing her a demitasse while she teaches.
* Teachers (2016). Part of it involves slamming Ms. Bennigan's head against the whiteboard and using catsup to leave a streak of "blood." The kid manning the camera freaks out when she sees it.
* Teachers and students. (The teacher must be significantly older than the student.)
* Teachers can and will do this to very good pupils in favor of getting other students more involved.
* Teachers had the rare variant of a gay pupil having a crush on one of the teachers.
* Teachers has many of the main cast smoking, not only at the pub but also illicitly in the school toilets and in maintenance areas of the school grounds. As with many of the above examples, even the legal smoking areas depicted stand out to UK viewers, who have been unable to smoke in workplaces and public buildings (including pubs) since 2006.
* Teachers, in which the titular teachers, most of whom loathe their jobs, believe this about the teenagers they teach — but their actual interactions with them show that the teachers are more at fault than the teens. However, background events in any given hallway or yard scene do tend to show students casually setting each other on fire or hanging each other out of windows as the teachers walk by obliviously...
* Teachers, one of Alex's students has to get an abortion after she's impregnated by the gym teacher.
* Teachers or prefects in schools traditionally carried canes or switches which marked their right (and potential threat) to administer canings
* Teachers out of School: Often times a student would react this way if their teacher is out shopping.
* Teacher's Pet actually blurts out his real name when he first arrives at the school disguised as a human, but it is misheard as "Scott", so he decides to roll with it.
* Teacher's Pet. Also, when the duo are about to go to sleep with Ian, who is trying to scare them out of their wits.
* Teacher's Pet and again for actually saying "tushy", Spot mentions Lake Titicaca at the end of the episode and tells Ian not to say a word when he starts to react.
* Teacher's Pet and was subsequently adapted into the cartoon's antepenultimate episode "The Nose Knows".
* Teacher's Pet", a new hot-babe teacher seduces boys (including Xander) and invites them to her home. Of course, she turns out to be a giant man-eating mantis

who preys on virgins. Hooray for metaphors.
* Teacher's Pet, at the very end of the song "I Wanna Be a Boy", Spot runs towards the camera screaming.
* Teacher's Pet, both Leonard and Scott are shocked when the class presidency goes to Ian.
* Teacher's Pet Dr. Ivan Krank lives there. Barry Anger derisively refers to Florida as "where the coo-coo nuts grow".
* Teacher's Pet episode "Attack of the 50-Inch Girl" has Leonard, Spot/Scott, Taylor, Tyler, Trevor and Ian enter the girls' room and find it to be luxurious and pink.
* Teacher's Pet episode "Being Mrs. Leadready" has a scene where Leonard and Spot, both dressed as the mother of Spot's human persona Scott Leadyready II, copy each other's movements as if one of them was looking at their reflection.
* Teacher's Pet episode "Being Mrs. Leadready" has Spot wail for his mommy after getting overwhelmed by the stress of trying to pretend to be Scott Leadready II and Scott's mother all at once.
* Teacher's Pet episode "Being Mrs. Leadready", Leonard mentions that his mother once embarrassed him by showing the class his naked baby pictures.
* Teacher's Pet episode "Take Me Out of the Ballgame" has Spot/Scott trying to help his owner Leonard win the baseball game after the former is disqualified from participating after the dog masquerading as a human student accidentally lets it slip that he's only been a student for eight months.
* Teacher's Pet episode "The Flipper" has Leonard get a swelled head after he beats everyone else in school at a game that involves flipping baseball cards.
* Teacher's Pet has his mother as one of his teachers, which of course causes him no end of embarrassment.
* Teacher's Pet has the school principal Crosby Strickler mention that he hates dogs because he got half of his thumb bit off by one that was brought to class when he was in the fourth grade.
* Teacher's Pet hints at the grouchy canary Pretty Boy being this in the episode "Being Mrs. Leadready", where Spot asks him and Mr. Jolly to help him in having to show up at the Helpermans' house as both his human persona Scott Leadready II and Scott's mother. Pretty Boy and Mr. Jolly insist that they'll only help Spot if he provides them with things they want, with one of Pretty Boy's demands being that his cage be lined with the teeny weenie bikini issue of a sports magazine.
* Teacher's Pet his mom, and Spot (who was under the guise of Scott Leadready II) had none.
* Teacher's Pet is a mad scientist named Dr. Ivan Krank, who desires to turn animals into human beings to disprove everyone's assertions that he is a "wacko", even when his initial attempts on an alligator and a mosquito have only resulted in grotesque mutant hybrids. Spot turns to him in hopes that he will help him achieve his desire to become a human boy. While Spot proves to be the first successful human transformation, Dr. Krank transforms him into a human adult rather than a boy and spends the rest of the movie trying to capture Spot when he escapes his lab.
* Teacher's Pet: Leonard Helperman is hopelessly in love with his girl classmate Leslie Dunkling. They have been best friends since they were babies.
* Teacher's Pet, Misuzu-sensei ends up having sex with her fifteen-year-old student, Masahiro. Who is also the younger brother of her co-worker and boyfriend. Oops.
* Teacher's Pet, Mr. Jolly comes to Prettyboy one day reminding him how Prettyboy said, "It would be a hot day in December before I teach you how to sing." Mr. Jolly then shows Prettyboy a calendar and a thermometer to prove that it is indeed a hot day in December, to Prettyboy's irritation.
* Teacher's Pet: Spot comes up with his alias (Scott Leadready II) by first blurting out his real name (the teacher mistakes it as "Scott" instead of "Spot"), and then reading the teacher's pencil (A "Leadready No. 2" pencil).
* Teacher's Pet: Spot does this when he finds out why Moby and his spouse Charlotte can't go home to his human family:
* Teacher's Pet, (surprising, as the main character is allergic to cats). Ginger

climbs a tree to escape from what she thinks is a savage dog (it isn't) but ends up with her nose too close to a fig flower. The resulting sneeze causes her to fall off the branch landing flat on her back.
* Teacher's Pet "Taint Valentine's Day" has Pretty Boy fall for a female bird with breasts.
* Teacher's Pet (the film) from 2004. Despite poor marketing, critics loved it.
* Teacher's Pet: The student who kisses up to the teacher and rats on anyone trying to discreetly break the rules.
* Teacher's Pet: The title card for "Muutamorphosis" features Spot the dog morphing evolution-style into his upright-walking Scott persona.
* Teacher's Pet turns Spot into a human, but he becomes a grown man because of dog years.
* Teacher's Pet was dedicated to Hubcaps, creator Gary Baseman's dog and the inspiration for the television series, who died during production.
* Teacher's Pet when Leonard discovers that Scott is actually his dog Spot.
* Teacher's Pet, which probably has the most deranged animation out of any Disney show ever made.
* Teachers, suffers a fatal heart attack at his desk, in the middle of class. What makes his death qualify for this trope is that the class period ends, and three more class periods come and go, before anyone (be it a student or a fellow teacher) notices that he's dead.
* Teacher/Student Romance: A teacher is romantically involved with their student.
* Teacher/Student Romance because they do this while one hands the other a book.
* Teacher/Student Romance: Far more acceptable when it's a female teacher and a male student.
* Teacher/Student Romance, is the exemplar). If they go with a student as the protagonist, however, it often gets inverted to a creepy teacher being hot for student.
* Teacher/Student Romance: It is acceptable for an authoritative adult, be male or female, to desire sex with minors; the minors should thank their luck instead of even thinking they were taken advantage of, as long as said authoritative adult is attractive. This applies more to female teacher/male student than vice versa.
* Teacher/Student Romance version. In recent years, news media have been condemning female teacher/male student scandals in response, but the general feeling is that female teacher/male students affairs are nothing harmful, and it addes another Double Standard if the female teacher in question is hot...
* teachers where the title character is caned by his teacher is based on Dahl's own punishment as a child.
* Teachers will inform your class when asked which class is the favorite, "You're my favorite 6th period class!" though sometimes have no shame in pointing out "you're my favorite disruptive and obnoxious class," which can indeed be true if there's another class more disruptive than yours. Or they flat-out say that you're the best class, but say that to all of the other classes as well. Or, to avoid lying or being rude, a teacher may say something along the lines of "you're my favorite class of 2007" or "you're the best fourth period I've had all year."
* Teacher Trouble by Alexander McCall Smith, the 12-year-old heroine looks so mature for her age that on her first day of high school she is mistaken for a teacher and left in charge of a class.
* teaches his children how to fight with staves initially because doing so will prepare them for using almost any weapon to some extent. He also defeats the first attempted siege on his tower not with magic but by forcing the attacking hordes to charge up a narrow icy slope into a choke point staffed by men with spears.
* teaches that the wealthy and powerful are expected to hold themselves to a higher standard and contribute more to society than those in less powerful or less fortunate positions.
* teach for a few years, although at the time he said he was done for good.
* Teach Him Anger: Being angry is a justified response to a bad situation, however, you must still control yourself before you do something you regret.
* Teach Him Anger Karal has to bring An'desha past this point to prove to him that

he can release his emotions without losing control of his powers.
* Teach Him Anger (when one of the other protagonists tries to make the calm character reach this in order to make him stop being a doormat... and often regretting it afterward).
* Teaching Feeling Due to a large number of people wishing to be a father figure role, than a lover. Even having a mod that stops you from being locked out of game content because you didn't want to have sex with Sylvie, allowing you to be a father figure. A later update on the game led to you being able to have Sylvie call you by a different name. If you choose to be called "Daddy" or "Papa" she'll ask if you think of her as a daughter.
* teaching, logafach."). Taxxon-speak is said to be almost impossible to decipher, even for Controllers.
* Teaching Mrs. Tingle without the awesome cast (except Dame Helen Mirren of course)
* Teaching Mrs. Tingle, with the title character having it in for teenage student Leigh Anne Watson for having many of the opportunities she never did, and trying to make Leigh Ann's life miserable as a result.
* Teaching the Student Teacher!", while taking a nap, Dawn's Piplup's face gets drawn on by Thomas, one of the students in "My Very First Pokemon Coordinator Class", causing him to angrily chase after Thomas.
* teaching to the test at the end; no matter how well you did in law school, if you don't pass the bar exam, you can't practice law.
* Teach Me 3, Daphne is stunned by how much her 18-year-old nephew has grown up since the last she saw him.
* Teach Me To Kill Q.Bee gets picked by an old creep fan of hers unaware of her secret, she's a psychopath serial killer. The creep ends up knocked out in the car and decapitated by Q.Bee in the woods.
* Teach Newgate. By killing Whitebeard and stealing his Devil Fruit, Marshall has truly become Blackbeard.
* Tékumel is one of the earliest aversions in tabletop games, pre-dating Dungeons & Dragons in development stage.
* Téléchat. The titular character is made of several vegetables including a pumpkin for a head.
* Téléchat to this show and how it abused this trope to no end.
* Téléfrançais!, a Canadian live action series meant to teach children French.
* Télé-Québec, Quebec's province-owned public broadcaster. Originally launched in 1968 under the Radio-Québec name as a producer of educational TV and radio programs, it started broadcasting on its own in 1972. It acquired its current name in 1996, long after having abandonned radio productions.
* téléromans that are mostly independent from the rest of Anglophone Canada. However, there are only so many of them and thus, it is not unusual to see the same person playing two different characters on competing channels during the same week. And even then some Québécois actors have popped up in Anglophone Canadian films & TV series.
* Téléthon (broadcasted on a couple of public television channels), which exists since 1987, takes places on the first week-end of December, and serves to collect funds for medical research on neuromuscular diseases.
* tea disguised as beer (in a rare intentional use of the latter trope).
* Tea for Two involves a blind date, in which two strangers meet, share tea and ask each other the New York Times' series of "36 Questions That Lead to Love".
* Tea is brought to Great Britain thanks to some strange potion that Getafix gave Asterix before he left for Britain in
* Teakettle boiling: can be used to represent it building up and then reaching a peak when the kettle whistles.
* Teal'c almost never tells a joke or laughs (unless you count his occasional plays on Earth idioms), with one
* Teal'c epitomizes this trope. Up to and including describing just exactly how he got that emblem on his head to a bunch of inner-city punks.

* Teal'c gets a door in the face in the episode "Windows of Opportunity".
* Teal'c is stoic, and easily confused by English language proverbs and metaphors and the most basic of human customs. He is also an avid fan of
* Teal'c rebels against the Goa'uld and joins the SGC in the first episode, becoming a
* Teal'c satisfying) in the episode "Orpheus", though it takes some squeezing.
* Teal'c's brainwashed son by clacking his jaws together. Nothing happens, because the heroes had already noticed his deadly teeth and replaced them with harmless ones.
* Teal'c's façade actually cracks a little in the very first episode. O'Neill sees that Teal'c is struggling to carry out the vicious acts demanded of him by the Goa'uld. This prompts O'Neill to seeks Teal'c's help in escaping, and kicks off the rest of the show.
* Teal'c was tortured to death and resurrected with a sarcophagus successively by a Jaffa who wanted to extort from him a filmed admission that Goa'uld are true gods.
* Teal'c was ubiquitously known as "shol'va" (traitor). The word was always spat out as a curse, although it made Teal'c and O'Neill smile.
* teal green with a yellow bill, because the character designer thought it looked cool. Turns out, platypi are bioflourescent, and their fur glows green under ultraviolet light.
* Tealove's Steamy Adventure, and now he just needs to sign the non-disclosure clause, the non-compete clause, etc etc.
* Tealove's Steamy Adventure, Baron Zeppeli is studying eye colors, of all things. He kidnaps Tealove so he can forcibly change her color. His lab assistants are a pair of unicorns, Cherry Pie and Waterfire, who constantly bicker with each other.
* Tealove's Steamy Adventure contains nothing that actually appears in the story other than the two eponymous protagonists and implications of time travel.
* Tealove's Steamy Adventure ends with the villainous cultist running away, and the protagonists lampshade the fact that they'll probably see her again. The very last lines of the story are:
* Tealove's Steamy Adventure exaggerates it for laughs. Big Tiny Little tries to impersonate Colt Skylark in order to gain Tealove and Snowcatcher's confidence. He looks and acts nothing like Skylark, he doesn't wear any disguise, and he doesn't get that Skylark was never a friend of Tealove or Snowcatcher in the first place. He doesn't fool anyone—the others just get tired of arguing with him.
* Tealove's Steamy Adventure Later, Big Jim hosts a tea party. Tealove takes one sip and spits the tea out, and says:
* Tealove's Steamy Adventure, Libra ends a tea party by calmly asking everyone to step away from the table, then flipping it across the room, roaring as she does so. Then she retrieves her baseball bat from a hole where the table had been standing a second ago.
* Tealove's Steamy Adventure). Neither is particularly fast, but Zeppeli's airship is slightly less slow. Tealove and Minty escape by transforming their balloon basket into a glider.
* Tealove's Steamy Adventure: Tealove endures captivity in Big Jim's cave for several hours. What finally makes her snap is when he serves really bad tea at a tea party. She takes her tea very seriously.
* Tealove's Steamy Adventure, Tealove really enjoys the view of Big Mac's muscular behind as he leads her through the forest.
* Tealove's Steamy Adventure, the giant turtle gets no explanation whatsoever.
* Tealove's Steamy Adventure, the villainous cultist sends an army of mobile plants to attack the protagonists.
* Tealove's Steamy Adventure, who is also a troll and lives in a cave, but is otherwise nothing like the cave troll from the story. The picture is full of nonsense along those lines.
* Team’s libero Nishinoya was born on 10/10 in contrast to team’s
* Team17 had a bit of fun with this when they made an announcement regarding
* Team17 mentioned in passing to magazine PC Zone that a mission pack was coming

out for a
* Team 3D Academy who lost his leg in combat and wrestled with use of a prosthetic. Fans received him as a war hero.
* Team 3-D (The Dudley Boys) that had "Death, Taxes, Tables" on the back.
* Team 7 and Team 8 try "Formation B" against Tobi, but it doesn't work because he's an
* Team 7, he wants to teach Naruto but has to pass Sakura and Sasuke. Made bittersweet by Sakura and Sasuke bombing the Bell Test and Naruto (attempting to) deliberately fail it.
* Team 7 (Naruto, Sasuke, and Hinata) aka Team Lie (and later Neji) in
* Team 7's Ascension, every ninja that lives to be forty or older has already reached this point. Due to not only how dangerous their profession is but also the tolls medical jutsu invoke on a person (medical jutsu isn't magic, it only speeds up the healing), most ninja develop arthritis in their thirties. Regardless of how in shape they are, by fifty their bones and internal organs match up with a civilian in their seventies. It's another reason those like Sarutobi who live to their seventies are legendary. Not only did they survive shinobi life for roughly sixty years, but physically they're at least in their nineties.
* Team 7's Ascension. He also cashes in a favor the Daimyo owes his clan to have Naruto learn politics for a month, Sasuke swordsmanship (without chakra), and Sakura etiquette. Then he makes them live in a training ground that has no water, almost zero vegetation, and few animals. The trio are forced to rely on Naruto's water jutsu for water and Sasuke's Sharingan to find animals to eat.
* Team 7's Ascension, Neji demands to know how their chips will be distributed now that a fourth of their alliance is out. Hinata throws all of the chips at him and yells that he's a miserable human being.
* Team 7's relations and characteristics are a dead ringer for those of the Legendary Sannin. This was one reason many fans were able to pick up on a
* Team 7/Weapon X crossover, the two squads meet in an underground base they were both tasked with blowing up. At gunpoint, they ask each other sports questions to find out if they are Soviets. Amusingly, Wolverine (a Canadian) asks a hockey question, which would probably be more easily answered by a Russian than an American.
* Team 8, Kurenai is killed by being hit in the head with a kunai after breaking Tsukuyomi.
* Team 8: Moritake is a retired shinobi who lost much of his left leg to an explosive tag in a war between Konoha and Iwagakure. He now runs a small cafe.
* Team 8: Naruto asks Jiraiya if losing people close to you eventually becomes easier.
* Team 8 realizes that putting the two together on a team could set them both on a path to healing, and so she takes on Naruto. The fic then largely follows their journey together to heal and grow past their difficulties.
* Team 8 to use his chakra pulse to dispel the genjutsu Kabuto put on the stadium. Naruto overpowers the pulse so much it ends up covering the entire village - causing Orochimaru's plan to fall to pieces twice over, as not only did it dispel the jutsu that were going to summon the giant snakes, it also destroys the barrier he had put to prevent people from interfering with his duel with the Third Hokage.
* Team 8: Tsunade is intrigued by how very motivated a main branch Hyūga clan member seems to be about pleading for her to heal Naruto, and decides to put them off by demanding six months' indentured service as payment; surely their pride will make them baulk. Hinata agrees immediately.
* Team Ame might count too. Yahiko/Naruto as the brash, hot-headed one and underdog, Konan/Sakura as the "smart" one of the three, Nagato/Sasuke as the Genius and most talented of the three. There's also hints of a
* Team America and Team Japan tie the game, and no overtime is given because the people hosting the tournament thought America would wreck the tournament like always. Unhappy with a tie (As Bud Walker puts it, it's like kissing your sister.) the teams continue playing despite being told not to. It's assumed that Team America won, but Team Japan doesn't mind.

* Team America Hummer, in all its star-spangled glory. It even has hidden weaponry for when that terrorist just needs to get taken care of.
* Team America (the previous subject of their line) was arrested for battery.
* Team America: World Police actors who have no idea how the world outside of Hollywood works.
* Team America: World Police and all - to disguise himself as an Arab, and comes out looking like an awful stage makeup job.
* Team America: World Police and Kim's giant statue of himself is actually portrayed by a "living statue" mime.
* Team America: World Police can only be found on DVD. All Blu-ray copies only contain the R-rated cut.
* Team America: World Police, Carson is the only member of the team to die- in the first scene, no less. He attempts to propose to Lisa, only for a terrorist who had been shot into a fountain to shoot him.
* Team America: World Police depicts a member named Carson in the opening scene who is killed off quickly by a jihadist. The team then hires Broadway actor Gary to replace him.
* Team America: World Police: Every time the location changed, there would be a subtitle that stated the place's name and its distance in miles from AMERICA!.
* Team America: World Police full of man-eating sharks, played by live dogfish that are bigger than the human marionettes.
* Team America: World Police gets outclassed by Gary's "dicks, pussies and assholes" speech, Kim Jong-Il kills him for it.
* Team America: World Police guys didn't ask him to provide his own voice.
* Team America: World Police had Kim Jong Il speaking exclusively like this. He also sings like this. Specifically, the song "I'm So Ronery".
* Team America: World Police had UN inspector Hans Blix and Kim Jong-il have this exchange;
* Team America: World Police has the ever-amusing MPAA warning of "graphic crude and sexual humor, violent images and strong language — all involving puppets". The BBFC's warning is similar.
* Team America: World Police intentionally made Kim Jong-il shorter and fatter than the other puppets, with more exaggerated facial features with his jagged teeth and sagging cheeks.
* Team America: World Police. In the lyrics to "You Are Worthress, Arec Barrwin," which plays over the closing credits:
* Team America: World Police talks like this, as emphasized in his song "I'm so ronery".
* Team America: World Police. The original cut received an NC-17 rating but a scene depicting graphic puppet sex was cut down to ensure an R.
* Team America: World Police (the sharks are, in this case, played by live-action dogfish).
* Team America: World Police: The Team America Hummer has various hidden weaponry like missiles and machine guns appear when it's "Valmorphanized".
* Team America: World Police" The whole film is a parody of every cliché in action movies.
* Team America: World Police: they save the world by blowing up everything in their path.
* Team America: World Police This is also something of a subversion because Stan still skis like a beginner after the montage.
* Team America: World Police: This trope is mercilessly lampooned as a satire on America's interventionist foreign policy during the 2000s. American forces are shown meddling in foreign affairs, causing in huge amounts of carnage, and then joyously declaring victory while ignoring the wreckage they leave behind.
* Team America: World Police: Turns out there is a cockroach that was piloting Kim Jong Il.
* Team America: World Police, when Gary convinces the audience to rise up against Kim-Jong Il by with a rousing speech about naughty bits.
* Team America: World Police. When Gary is being briefed for his first mission,

Spottswoode prepares him for the fact that, if he is captured, he might want to take his own life. To that end, he supplies him with... a hammer.
* Team America: World Police. When he was a kid, he and his family went to the zoo and he was fooling around on the railing over the gorilla exhibit and fell in. Gary's older brother, Tommy, jumped in after him, only for the gorillas to beat him to death to get at the blueberries he had in his pocket.
* Team America: World Police, with Americans doing their part to stop a North-Korean/Arabian conspiracy from Paris to Egypt.
* Team America: World Police with Tim Robbins' explanation for how corporations make money through the team.
* Team America: World Police worked on the film with him and were in favor of his ideology. They didn't and they weren't, so this was their way of getting revenge.
* Team Arrow). He's basically per his creator Max Allan Collins in Amazing Heroes#119, a modern version of the Shadow, Zorro, the Lone Ranger, and the Green Hornet. (He's the guy in the illustration with the hockey mask/jersey.)
* Team Avolition, such as the Doridian server, have since reconciled with them and become friends.
* Team-based multiplayer games can easily get to be this. You have to play and practice to "git gud" and be beneficial to teammates but to not be
* "Team Be Jealous" were as close as sisters and occasionally mistaken for lesbians. Jessicka Havok even imitated Allysin Kay's hairstyle and fencenets.
* Team Big Body is harder to place because while the Centerpiece is obviously Kinnikuman Big Body, all of his teammates were beaten by Mammothman before they could receive much characterization.
* Team Blondage infamy. Two years later Lollipop had retired from pro wrestling but returned to PGWA again when told Ricci wanted another birthday match. So the fans were nice to Lollipop for the nice gesture, and then turned on Ricci as it became clear she had only made the request for a chance to injure Lollipop.
* Team-building constitutes a metagame, too, with savvy teams exploiting market inefficiencies. One example that's held true for decades now: the draft is a crapshoot, so get as many draft picks as you can.
* Team Canada (which in of itself might have been the largest Team Canada ever with ten members) to Planet Jarrett (which was headed by "The Kings Of Wrestling"
* Team CFVY has one in Velvet Scarlatina, who Team Leader Coco Adel had been keeping in reserve as her team's secret weapon. Velvet's true capabilities were revealed in the Battle of Beacon, where she does battle with two mechs that only one of which gave the entire Team RWBY a hard time, as nothing else that anyone else could throw at them did any damage. Her true capabilities? She is able to copy the weapons and movements of any character that she has taken a picture of with her camera, making her a completely adaptable weapons master.
* Team Chaotix consists of the 20-year-old Vector the Crocodile, the 16-year-old Espio the Chameleon, and the 6-year-old Charmy Bee.
* Team Chef: Toby 'Chefo' Jones, Rebecca 'Bomber' Brown and Jesscia 'Bird' Bird.
* team choose people with close attachments to those who have cheated death (heroes, mostly). Ergo, they died for, well, nothing.
* Team Chris is Really, Really, Really, Really Hot, another of the three teams in the aforementioned season, also qualifies. While the team was dominated by males (
* Team Dad boss to give a crime syndicate access to the bank to carry out a scheme.
* Team Dad for most of Konoha, barring his former teammates and Danzo, his former friend.
* Team Dad for the rest of his players, and steps up to lead the Japanese team when Tsubasa is absent.
* Team Dad (specially to Naruto). Also Kakashi and Asuma, as team leaders.
* Team Dad towards Hector (who lampshades the trope by calling him "old man"), Serra (whom he can marry through supports) and Matthew. It's even more evident in Hector's route, in which Uther sends him after the runaway Hector with this trope in mind.
* Team Dad, tries to give Mozu a makeover, is an excellent seamstress, etc.
* Team Deathmatch events get their own depending on whether it's regular TDM or

Naval Fleet Assault. For regular TDM, it's Avalon and B7R again, once more likely owing to the popularity of the game that introduced them. For Naval Fleet Assault, Comona is usually the most-played, at best probably due to its awesome music.
* Team DOOM consists of players who converted from other VRMMOs, which means that they start with characters that have already been leveled up, and have much higher base stats than those who start from scratch, hence the "strong" part. The "unskilled" part refers to how they have no experience with GGO, and mainly fight through suicide bombing their opponents.
* teamed up with a cash register-turned-robot who are partners as LAPD homicide detectives.
* Tea merchant T.E. Stockwell. UK's biggest supermarket, Tesco, and their Stockwell & co. brand, are named after him.
* Team Evil also get this, when they enter a dungeon complex full of monsters, and the next panel has them emerging while discussing how epic the battle was and how difficult to draw it would have been.
* Teamfight Tactics, an auto-battler spin-off of League, used Gunslingers as a class.
* Team Flare fits the bill much better than previous teams, as its Admins are a generic class just like grunts; it's the scientists that are unique.
* Team Flare's soft-serve ice-cream hairstyles look more like poo to some detractors.
* Team Fortess 2, as there's apparently no middle ground between one team steamrolling the other in seconds or the game dragging on forever with Sudden Death after Sudden Death.
* Team Fortress 2 about how Sun Tzu not only invented fighting, but he once herded two of every animal onto a boat and beat the crap out of all of them.
* Team Fortress 2 According to the description, it doesn't control Pyro so much as agree with him wholeheartedly that everything should burn.
* Team Fortress 2 achievements include "Marxman", "Communist Mani-Fisto", "Stalin the Cart", "Pushkin the Cart", "Lenin a Hand", and "Red Oktoberfest".
* Team Fortress 2. A common strategy for Spies is to sap a Teleporter entrance and stand on top of it so that when the Engineer breaks the sapper, the Spy teleports through, kills the Engineer in doing so, and can sap his buildings with impunity.
* Team Fortress 2: A cosmetic restricted to Halloween or a full moon, the Voodoo-Cursed Sniper Soul, turns the Sniper into a zombie. When taunting with a melee, the Sniper takes off their cranium along with their hat, exposing the brain underneath.
* Team Fortress 2 active. Nothing short of hacking can help a player survive this.
* Team Fortress 2 added doves for several of the maps. If you shoot them, hit them with a melee weapon, or even just brush against them, they explode.
* Team Fortress 2 A Demoman will lay a stick bomb carpet somewhere, or an Engineer will put up a sentry, and then they'll go off and engage the enemy. If planned properly, they can simply retreat into the sticky bombs or the sentry and kill their opponent instantly.
* Team Fortress 2 (after you get killed, during a freezecam of your killer the game will gleefully point out where "your pancreas!", "your foot!", "your kidney!" etc. lies, if the body parts appear on the shot). It is largely thanks to that factor that the game was received so well.
* Team Fortress 2: A level 3 Sentry fires missiles at a target in a spiraling-inward fashion.
* Team Fortress 2, all of his combat voices will be replaced with robot-themed voices delivered in this fashion.
* Team Fortress 2: All of the classes (as well as the Administrator) tend to be quite sadistically gleeful when things go well.
* Team Fortress 2 almost everyone else. Everyone else's weapons (with one sole exception, see below) do the same damage no matter where they hit.
* Team Fortress 2 also invented stairs, before he was assassinated by John "Tower of Hats" Booth.
* Team Fortress 2. Although one could write this off as a glitch or a mistake due it being nixed in a later update.

* Team Fortress 2, and a robotic Teddy Roosebelt, along with the Pyro, whose head is now preserved in a glass dome on a floating platform. He gives the RED team a warning about some vaguely-explained "Hat Wars" (also telling them that in the future, the President of the US will be a cybernetically-enhanced Pomeranian in a sweater), and to prevent that from happening they must not open the robotic crates full of hats that Grey Mann's robots were trying to sell them. Naturally, the Soldier hears him saying the exact opposite.
* Team Fortress 2 and being replaced with a "Mega Baboon" heart, and Medic pushing the organ into the Heavy's chest cavity so hard he breaks off a rib. All while the Heavy is awake, mind you.
* Team Fortress 2), and can be seen by other players while "inspecting" a teammate's loadout or on the Deathcam if the owner has it equipped. A later patch added "Stat Clocks", which display the number of kills on the weapon itself, in a fashion similar to an odometer.
* Team Fortress 2 and flirting whenever a woman comes near, with zero success.
* Team Fortress 2 and had it moved to New Mexico so that they could meet there.
* Team Fortress 2) and Medic still do not swear. Class updates have provided at one line for the other classes in which they swear, usually some form of "ass" or "son of a bitch." Some class-specific examples:
* Team Fortress 2, and several cosmetic items are suits of armor for the various classes. Pyro gets the most mileage out of this, having both a samurai's armor and helmet as well as a full black knight ensemble to dance in, while also being technically armored already in his fireproof suit (which can also have variations as a hazmat/radiation suit).
* Team Fortress 2, and so on. This was done on purpose, to make the characters' accents sound stereotypically exaggerated. This even goes for the American accents in the game!
* Team Fortress 2 and takes pride in his strict adherence to his code of ethics:
* Team Fortress 2, and you will see why some of the diehard fans see him as the symbol of everything that is wrong with the game today.
* Team Fortress 2: Applejack with Engineer, Rarity with Heavy and Spy, Pinkie Pie with Soldier, Pyro, Heavy and Scout, Fluttershy with Medic and Heavy, Rainbow Dash with Scout and Soldier, and Twilight Sparkle with Sniper via Youtube.
* Team Fortress 2 are a parody of this: The small black "'fro" and a pimp's hat.
* Team Fortress 2 are easily rooted out by the people on the other team whose names the game has randomly given them for their disguise.
* Team Fortress 2 are fragile and forced to play dangerously to do their jobs. The faster battle classes must go to close range to do damage and risk being counterattacked. The classes with the biggest guns are slow and easily targeted, but make up for it with higher health (or Sentry health in the case of the Engineer). The classes with the ability to deal widespread explosive damage are hampered by lower speed, self-damage, and long reload times.
* Team Fortress 2 as a cosmetic item for all the classes, mimicking this trope.
* Team Fortress 2, a skeleton with a Jack-O' Lantern for a head. The mercenaries can also achieve this trope with the Horseless Headless Horsemann's Head, won by beating the HHH.
* Team Fortress 2 at best, but that doesn't stop them from working together like a well-oiled machine of death who are quick to genuinely thank and complement each other for a job well done.
* Team Fortress 2, a TF2 rendition of remembrance staple The Last Post.
* Team Fortress 2: Australium is an exceedingly rare metal that boosts human abilities far beyond normal, meaning Australia featured 21st-century cities in the 19th century.
* Team Fortress 2. Back in the 1850s, two idiot brothers were willed acres of expensive but useless real estate by their father because he knew they'd spend the rest of their days fighting to seize the other's portion. Sure enough, Redmond and Blutarch Mann hired teams of mercenaries to battle over control points, briefcases full of intelligence documents, or bombs on minecarts. Thanks to life-extending technology, the conflict rages over a hundred years.

* Team Fortress 2 be considered serious. Specifically, the theory of phlogiston seems to hold some degree of truth in their universe.
* Team Fortress 2 been drunk!", etc.). His "Meet the Team" video features the strongest example of this trope, with him going from sober to somewhat wasted by the end and bemoaning the fact that he is "a black Scottish cyclops".
* Team Fortress 2 before "Meet the Spy" finally settled the issue with a canon answer: "French".
* Team Fortress 2 being a game where cosmetic items only serves an aesthetic purpose, goggles aren't exempt from this.
* Team Fortress 2, believing them to be valuable resources somewhat like coal mines.
* Team Fortress 2 below: due to the incredible potency of sniper rifles compared to other weapons, snipers will usually prioritize enemy snipers as targets to try and keep those weapons away from teammates that can't easily retaliate.
* Team Fortress 2 blog, somebody on the development team shoved an M&M up their nose. (The picture that went with the blog was an angry Medic using a pointer to indicate said M&M on a head x-ray.)
* Team Fortress 2: Bot pathfinding is still a work in progress, and sometimes they can be seen stuck running endlessly against walls; this was especially obvious in Payload maps, since the way most of them are set up it made the RED-aligned bots think that the quickest way to get on the battlefield was through the back wall of RED spawn, and the Medieval map also features RED bots crowding around walls due to a window of RED's starting fort being inaccurately marked as a possible exit.
* Team Fortress 2, but it's pretty heavily implied that the relationship between the RED Spy and the BLU Scout's mother is this trope (his rival, BLU Spy, took a bunch of pictures of them on a date and then having steamy sex with each other, but the RED Spy only claimed one of them back for himself: the one showing him and his "petit cho-fleur" holding hands).
* Team Fortress 2 came out, it had been leaked (thus spoiling the surprise twist that the update for the Sniper class was to be hijacked/shared by the Spy class). As a result, the video was simply introduced with the words "act surprised".
* Team Fortress 2 can be destroyed after they're planted by using any weapon that shoots bullets, any melee weapon (if one is brave enough), the Scottish Resistance, Detonator, Scorch Shot, or Short Circuit (which can destroy even sticky bombs that haven't landed and Grenades from the normal Grenade Launcher), or moved away using the Pyro's airblast or any sort of explosion.
* Team Fortress 2 can disguise as one of the enemy's team in order to backstab them, or as a different class of his own team in order to cause confusion and misleading.
* Team Fortress 2 can perform something that resembles this using sticky bombs and rockets, respectively. It can be a useful tactic for getting around a strong enemy defense, or to get very close to an enemy for a melee attack while minimizing the foe's chance of landing an attack of their own.
* Team Fortress 2 can turn a fight into this trope, especially for classes who can give up their secondary weapons for a piece of equipment, such as a Scout using the slow-reloading Scattergun as well as the Bonk Atomic Punch. Most notable with the Soldier and Demoman, who have powerful weapons but long reload times — players who empty their magazine with one weapon will often just switch to the second and keep firing, and if that goes dry mid-fight as well, it's not uncommon for them to draw their melee weapon and have at it.
* Team Fortress 2 certainly believes this as stated in his "Meet the Team" video:
* Team Fortress 2. Cheeky Scouts, usually nothing more than Sentry fodder, can park themselves just outside of its range in large enough maps and plink at it with handgun bullets until it's destroyed. Conversely, the Engineer's Wrangler allows them to take control of the sentry themselves and tell it where to fire regardless of if there's actually a target there - as long as there's a clear line of sight between the sentry and where you're pointing the laser, you can make it fire at it.
* Team Fortress 2 Classic is a complete modification of the game, taking the oldest version of TF2 and adding new weapons, game modes and even compatibility for four

teams instead of two.
* Team Fortress 2 come up in lessons about video game character design.
* Team Fortress 2 comic "Blood in the Water", Sniper mentions that his family moonshine recipe doesn't last long because it eventually eats through its barrel.
* Team Fortress 2 comic reveals that the RED team is rather guilty of this.
* Team Fortress 2 comic, Soldier strips naked and covers himself in honey to fight bears. He, along with Zhanna, does this again against the robot army in Issue #6.
* Team Fortress 2, complete with the victim floating in the air before being vaporized (it's actually the same animation used in Half Life 2. The Engineer has his own with the Pomson 6000, and the Pyro gets a unique variation - the target disintegrating into a smoldering pile of cinders - with the Phlogistinator, Man Melter, and Third Degree.
* Team Fortress 2 considers himself this, and is one when on your team. On the enemy team, he's a sadistic psychopath.
* Team Fortress 2 consists of a team of these being pitted against another team of them. To wit:
* Team Fortress 2 count as this. All of the mercs on both teams start haphazardly next to the other side, and can just run to battle in about 4 seconds, and everybody should die at least once. Given that the announcer seemed to be looking for this setup, it may be the brothers were intended to both become "the Neidermeyer".
* Team Fortress 2, Demo hallucinates that his liver, sick of his alcohol-soaked existence, is leaving him for good. It plays out like a breakup scene.
* Team Fortress 2, depending on the team. Spies wear a mask that consists of the face of the class they're disguised as. If you're on their team, you can see them as a spy. If not, well, it's a perfect disguise (until the shooting starts).
* Team Fortress 2 did the WAR! Update, which involved a contest where Soldier and Demoman players would try to kill each other, with the winning side getting the Gunboats item. Naturally, the developers discovered that some players were getting outrageous kill counts—the highest scorer on either side had accumulated over 200,000 kills. Keep in mind that the contest lasted a week, so that translates to getting a Soldier or Demoman kill every three seconds, in an online FPS where only a fraction of the base plays Soldier or Demoman, and doing this every second of every day. Or, as the Administrator put it:
* Team Fortress 2 doesn't normally invoke this, but there are exceptions. The most notable is Arena mode, where the objective is literally to kill everyone on the opposing team, and respawning is not permitted until the next round. As a result, both teams lose their players one by one, and typically only one or two members on one team are still alive at the end.
* Team Fortress 2 does this in "Meet the Spy", where the Soldier shoots the BLU spy in the head with his shotgun. "He could be you! He could be me! He could even be—" *BOOM*
* Team Fortress 2, due to both being free-to-play multiplayer shooters with goofy humor and more colorful graphics.
* Team Fortress 2 either plays this straight or averts this. Or maybe inverts it. We really have no idea.
* Team Fortress 2 ended up using very un-spooky sandalwood scented candles for the ritual.
* Team Fortress 2 enemy directly, as opposed to knocking them into stage hazards.
* Team Fortress 2' energy drink for the Scout. As the advertisement tells us, "Bonk! is fulla radiation, which as we all know is pretty great for giving people super powers."
* Team Fortress 2. Essentially the Pyro character sees him/herself wielding a magical tuba (flamethrower) that sprays rainbows and bubbles (blazing napalm) at the various cartoon creatures (opponents) found in his/her personal candyland (battlefield).
* Team Fortress 2, etc). In addition to first-person shooter tropes, it also has a few RPG/MMORPG tropes, with the class system and all.
* Team Fortress 2, every class's uniform is brightly-colored around the torso, to

draw attention to the weapon they're wielding and to make aiming at them easier.
* Team Fortress 2, everything uses a cartoony style and the different playable classes are larger-than-life humorous personalities.
* Team Fortress 2, excluding certain promotional items which are all reskins, as well as all of the maps and all of the player-versus-player servers. Even the Mann Versus Machine has free servers that will let free players play any of the mission sets. So theoretically they can enjoy the same game without paying to win. Buying any item from the Mann Co. Store or buying The Orange Box bundle from Steam will instantly upgrade you to Premium status (which gets all the perks of people who have bought the game). On top of that, the cheapest item is only 10 cents (though you need a minimum deposit of $5 into your Steam Wallet first). Additionally, people who owned the game before it went Free-to-Play got a special untradeable Proof of Purchase halo.
* Team Fortress 2: Exiting a teleporter will cause you to leave a trail of glowing particles for 18 seconds. The enemy team might use this as a clue to identifying the teleporter's location.
* Team Fortress 2 fanboys seem to fare worst at TF2, to the point where a CoD player playing TF2 for the first time is considered highly entertaining.
* Team Fortress 2 fandom. Although the Medic can heal someone from 1 HP to 150% health in a matter of seconds, he also follows them into battle, and the healing target is compelled to watch out for his Medic.
* Team Fortress 2 fan-film "End of the Line" has the BLU Team sending a runaway train laden with explosives hurtling towards the RED Team's base.
* Team Fortress 2, fans often take the sound effects (like the Scout's "BONK!") and make music of it. The Mario 1-1 theme and the Mortal Kombat theme are two of the most popular.
* Team Fortress 2 featured in Nucleus and the giant missile launcher in Gravelpit. In addition, the buildings of the Engineer class are retro-futuristic as well.
* Team Fortress 2 features a rather half-assed variant on the payload carts. It seems that the Heavy vandalizes them; they all have something he says scratched into the paintjob or spraypainted on them. For example, the one that's used most often says "CRY SOME MORE" on it. One of them also happens to be designed like a mechanical shark's head.
* Team Fortress 2 features the Heavy having an operation to strengthen his heart in order to sustain an Übercharge. When the Medic exposes the Heavy's heart to the Quick Fix's beam, it starts beating rapidly once before exploding. He then replaces the heart with a Mega Baboon's, which starts to beat vigorously and continues beating even while the Medic holds it in his hand, detached from the Heavy.
* Team Fortress 2 fire axe into their heads, the Pyro is then seen simply walking away very akin to a soldier, while whistling "Do you believe in magic?" as the town falls apart from the severe fire damage.
* Team Fortress 2 fireteams with sniper support or sustained bombardment from rocket-jumping Soldiers and artillery-like stickybomb spam. This is even more brutal with multiple levels instead of a single slope, as exemplified in maps like Egypt and Badlands, both of which have capture points raised well above the battlefield and with scant cover on the way up.
* Team Fortress 2 (for every class besides Sniper, anyway), which deliberately removed them (and replaced them with more-or-less random criticals) because the developers felt that headshots rewarded obsessive players at the expense of casual gamers and were unfriendly to team play.
* Team Fortress 2. For example, a common variation is to harass a target so that a Spy can get behind them to backstab them.
* Team Fortress 2 for twelve seconds, calls everyone credit to team and thinks entire trope is BABIES!
* Team Fortress 2 frequently claims each episode of "Extreme Rancho Relaxo" or "Map Tips and Tricks" will be the last. It never sticks.
* Team Fortress 2 frequently switches between this (when he's explaining his constructs or means of defending himself) and a comparatively more simple way of

speaking.
* Team Fortress 2) from their side of the area to the opposing team's base. Whoever gets theirs to the final station wins. Of course, they're free to screw with each other's progress. There's also a map based on the same principal called, you guessed it, wackyraces. There is also a variation called Balloon Race, which pits the two teams in a zany dirigible race (which tends to end with people exploding, naturally).
* Team Fortress 2, given that the mercenaries all belong to RED or BLU and wear the appropriate colour — The Administrator and Miss Pauling control both of them, and so wear a combination of both colours. And Unusuals, the best quality a hat (or weapon, in Horseless Headless Horsemann's Headtaker's case) can get, are marked with purple text.
* Team Fortress 2 goes along with her obvious attempt to frame him for the crime.
* Team Fortress 2. Gray Mann, his robots, and the classic mercenaries wear gray (though in-game his bots wear blue due to confusion from testers). Gray's daughter Olivia wears a dark green. Merasmus and The Bombonomicon both emit a bright green glow. The Horseless Headless Horsemann and Monoculus glow violet. Even with all the unlockable weapons and modifiable accessories, the game has never allowed you to wear the colors of the opposite team (not counting disguised Spies).
* Team Fortress 2 had become a much more polished experience, it had (begrudgingly?) adopted some of the improvements TF2 made to the core experience (keep in mind this was all before TF2 had basically turned into the totally different beast it is today).
* Team Fortress 2 had his eyes removes and replaced with mechanical ones that can see through anything, including any Spy's disguise.
* Team Fortress 2 had unused sounds finally added in the Engineer Update. These include melee dares.
* Team Fortress 2 has a commentary node (on tc_hydro) about how its conspicuous waist-high fences are a major theme of the game. And since there's nothing on the other side except empty desert, the players don't really want to get over the fences anyway.
* Team Fortress 2 has a daily prize for the player who used the most keys that day!
* Team Fortress 2 has added fan-created "community" weapons to the list of items that can be found during game.
* Team Fortress 2 has also the Strange Weapons introduced in the Über Update, those weapons are just like the normal weapons but with counters, the most common counter is "Players Killed", but with "Strange Parts" you can have more counters like "Buildings Destroyed", "Headshot Kills", "Point-Blank Kills", "Long-Distance Kills" and players of a specific class killed, changing the owner of the weapon reset the counters to 0.
* Team Fortress 2 has a moment when Blue Demoman looks into his bottle at the sight of all the people dancing Texas-style.
* Team Fortress 2 has a monkey-like face and appearance, which will make some think he's a monkey for a second.
* Team Fortress 2 has an achievement called Insurance Fraud, in this game, the Spy class can disguise as an enemy, making all players in the enemy team look at you and think you're one of them, you can choose to disguise as all 9 classes including the Spy, and enemy Medics can even heal you, you get this achievement if you kill an enemy, while an enemy Medic was healing you.
* Team Fortress 2 has a Revolver as his primary weapon, replacing the tranquilizer pistol from the original games. It's the third most accurate weapon in the game (after the Sniper's rifle and the Soldier's rocket launcher) and is rather powerful. Unusually for a revolver, it also has one of the fastest reload speeds in the game (loads a whole new magazine at once with a loader in just over one second). The lack of health on the part of the Spy class makes it less useful in pitched firefights than you'd think, though.
* Team Fortress 2 has a ton of skins for your perusal. Texture hacks unfortunately don't work on Valve's own servers, to stop cheaters from..well...seeing through walls.

* Team Fortress 2 has certain weapons that are more effective against the Engineer's structures:
* Team Fortress 2 has male pattern baldness. But also for some reason, a stubble setting on his razor. The Engineer can also sport this if you unlock the right hats. Or lack of hat-hat. The Spy is probably also bald (or shaves his head), given the snug fit of his balaclava. Of course, the baldness is only awesome if they're on your team.
* Team Fortress 2 has many unofficial modes made by fans of the game. First, you might be in a Vs. Saxton Hale game, where it's your team against the super-manly CEO of Mann Co., and then FortWars, where your team builds walls out of junk and then plays "keep-away" with the intelligence, either protecting it or killing the other team, and then it's off to PropHunt, where one team has been transformed into various bits of scenery (a haystack, a barrel, a wooden cow, etc.) while the other team must find them. The hunted can't use any sort of weapon, but the hunters lose health every time they fire their weapons, to prevent spamming.
* Team Fortress 2 has several item sets, such as the Tank Buster and Gas Jockey's Gear, which leave a gravestone on the site where the victim was killed.
* Team Fortress 2 has several retro rayguns modeled after Weta's "Dr. Grordbort's" line.
* Team Fortress 2 has so many wearable hats, and a player base so obsessed with said hats, that the game is occasionally known as "the world's number 1 war-themed hat simulator". To the point that any of the other examples on this list may be converted into a Team Fortress parody.
* Team Fortress 2 has their hammy moments, some more than others, so many of their "battle cry" lines — uttered at the beginning of every round — count as this. Especially the Heavy and Demoman. Also, the Heavy's Übercharge lines, given the context. "IS GOOD TIME TO RUN, COWARDS!"
* Team Fortress 2 has the "Mann Co. Supply Crate" that randomly drops along with everything else. To open it you need to buy a key from the ingame store for $2.50USD. These crates can contain commonly dropped weapons (enjoy your $2 Equalizer), paint to recolour your hats or a special hat that has a particle effect applied to it. These hats have a <1% chance of actually being in a crate.
* Team Fortress 2 has the soldier pull the pin on a hand grenade but not throw it, the explosion killing the Soldier and any enemy within a six foot radius of him.
* Team Fortress 2 has this effect on games that offer in-game promotional items as pre-order bonuses, particularly if promotional weapons are being offered.
* Team Fortress 2 has two highly-caffeinated drinks that give him special effects: Bonk! Energy Drink (It's fulla radiation!) makes him invincible, and Crit-a-Cola allows him to score (Mini-)Criticals while running faster.
* Team Fortress 2 has very detailed customization options, not only allowing you to dress your mercenaries in fancy clothing but paint them very conspicuous colors or even equip ones with extremely visible particle effects (like a flaming hat). It's a much observed phenomenon that players with better cosmetics are perceived as being of higher skill, which functionally means they're more likely to be pocketed by Medics but are also likely to be prioritized by the enemy.
* Team Fortress 2 hated his family (he didn't give a damn when his wife died giving birth and he loathed his sons) but he seemed to be fond of his employees. In his will, he gave his maid Elizabeth his personal estate and his tracker Barnabus Hale his business empire, while he gave his sons a worthless piece of land to fight over for the rest of their lives.
* Team Fortress 2 have both an invisibility watch and a disguise kit. The invisibility will flicker if the spy is shot or if someone runs into them, and the disguise will fail if they use their gun or knife. If an enemy pyro lights a spy on fire, the disguise and cloak are maintained, but they are completely worthless as friendly players cannot be lit on fire, and the player is clearly a spy once they're on fire. Plus, ya know, the whole "burning to death" thing.
* Team Fortress 2: Having the higher ground affords a tactical advantage to pretty much all of the classes, but the Soldier in particular earns an achievement called "Death From Above" by killing enough enemies in that fashion.

* Team Fortress 2. He also seem to deal in non-human organs as well, as we can only imagine what a "Mega Baboon" is supposed to be.
* Team Fortress 2. (He's trimmed off everything on his chin except for a small triangle beneath his lip. The man is stylin'.)
* Team Fortress 2. Hilariously enough, this includes robot bosses, which a skilled Pyro can airblast them towards the banana peel to receive an instant kill.
* Team Fortress 2 - His fire-based weaponry inflicts massive damage, and then leaves the victims to burn for several seconds afterward, inflicting further damage all the while. This results in various reactions, from the Scout wailing "Fire! Fire! Oh, I'm burnin'!", to the Engineer calmly muttering to himself, "I'm burnin' up...", or even the Spy stating matter-of-factly "I appear to have burst into flames."
* Team Fortress 2; however, and he still performs quite adequately considering his weapon of choice is a grenade launcher.
* Team Fortress 2 Hydro ones, each of which had only three people on them. The only reason most players still go to Hydro is to go there for a short time to get the World Traveler Achievement.
* Team Fortress 2 "I do believe I'm on fire," or "I appear to have burst into flames." Hitting him with Jarate, on the other hand...
* Team Fortress 2, I'd say there isn't much variety in the maps. You get to decide between territory control in a desert environment, territory control in an industrial environment, or, just to mix things up, capture the flag... in a desert-industrial environment."
* Team Fortress 2, if a round ends with neither side winning, servers have the option of then going to Sudden Death, where all health packs are removed from the level and respawning is disabled. Teams can win either by accomplishing the objective or eliminating the other team.
* Team Fortress 2 (if he must say so himself) earn the aforementioned medals by flying himself out to "war zones" and fighting on his own initiative, and it is hard to argue with his prowess.
* Team Fortress 2 in a dress). One comic also indicates that he doesn't believe in blood types.
* Team Fortress 2 in an office filled with cosmetic-obsessed, hat-loving lunatics.
* Team Fortress 2. In another post, the writers had apparently gone missing, though it been a week before anyone noticed.
* Team Fortress 2 in a way, as the game's developers track various game-related statistics, and RED tends to have a higher chance of winning.
* Team Fortress 2 included "noisemakers" you can set off that play Halloween-themed sounds to the entire map. One of them is "Black Cat". In theory, it's supposed to be creepy. In practice, considering all the offscreen gunshots and explosions that occur during any given round, it devolves into this trope very quickly.
* Team Fortress 2 (including Pipeline and Nightfall) work this way; if a team wins both of the first two rounds, they can still lose the third round and the game. While they are given a significant edge (their bomb starts up further in the last round), whether this is worth the effort to win those first two rounds is debatable. At one point Pipeline was changed so that winning both of the first two rounds placed the winning team's cart at the checkpoint in the middle of the track, giving them a significant advantage but still allowing determined opponents to have a chance, especially given how quickly rounds of Payload Race can turn around. Then they changed it back for some reason.
* Team Fortress 2 initially appears this way, especially in his Meet the Spy video. It kind of falls apart in-game, though, when he winds up shouting insults like a 12-year-old and laughing until he snorts.
* Team Fortress 2: In Mann Vs. Machine mode, one of the Medic's upgrades is an Ubershield, which, in addition to reflecting projectiles such as rockets and grenades, is capable of disintegrating robots that come into contact with it rather quickly, being able to dispatch weaker robots such as Scouts and Spies after only a second or two of contact.
* Team Fortress 2: In "Meet The Demoman", Demo is asked what makes him a good

demoman. Demo responds thusly.
* Team Fortress 2 in "Meet the Medic". He's intelligent, but that doesn't mean he knows what he's doing.
* Team Fortress 2 in order to find spies, and a Pyro who does not do this will most likely be subject to a spy-check himself.
* Team Fortress 2. In order to get a certain hat for your friend, you have to go to someone else who has that hat, and who wants some other hat that you can get from another friend, etc.
* Team Fortress 2In the end, it's playstyle dependant. One has to keep in mind that by equipping the aforementioned katana as a Demoman armed with one of the shields and a pair of boots, you effectively get a weapon that has no drawbacks. It provides health on kill and benefits from random critical hits (which other swords trade for additional range). The only drawback is the lack of extra range. The katana is the weapon of choice for when you want to berserk; thanks to the random crits and health on kill, killing sprees become quite common!
* Team Fortress 2 in Virtual Reality mode can use the player's headset to aim weapons.
* Team Fortress 2 invokes this trope with its "Nemesis" gameplay mechanic. Specifically, if you kill another player 4 times in succession without being killed by them in return, you will be designated their nemesis and have a flashing icon displayed over your head. Only that player will be able to see this icon (and if they kill you, they receive bonus points) and it won't appear over their head when you spot them. And, even though the nemesis in question will be notified that they're dominating that player after the fourth kill, enemy players' names are not shown outside of the kill feed (except when disguised while playing as a Spy), often leaving the only way to identify a player you've dominated as being the guy who repeatedly charges you brandishing a melee weapon.
* Team Fortress 2 is a Communist. But only the enemy Heavy, not the equally-Russian Heavy from his own team.
* Team Fortress 2" is all about this. Sniper really has to pee, and since all of his jars are full, he pees in a soda can, and then Scout finds it and unknowingly drinks from it.
* Team Fortress 2, is a mad scientist and doctor with a knowledge of black magic...and he has a nasty horde of robots on the tail of himself and his team.
* Team Fortress 2, is a mechanical hand designed by his grandfather Radigan. It was implied in the official blog that the Engineer willingly sawed off his original right hand to accommodate the replacement, though some theories exist that the hand under the glove was always artificial.
* Team Fortress 2 is a mouth-breathing serial killer and has a gas jockey themed item set.
* Team Fortress 2 is a perfect example of this trope. It went from a Quake mod to one of the premier "Steam" titles in the Orange Box collection. Within the game, a few high quality player-made maps have been honorarily canonized as official.
* Team Fortress 2 is a universe populated by psychopaths, sociopaths, murderers and assholes, on both sides. In a great deal of its fanfiction, the bad guy is picked out as the only one who will commit the act of rape. There is however fanfiction where characters commit borderline rape and you're still meant to see some other character as the "villain".
* Team Fortress 2 is bald underneath his helmet. Meanwhile, Pyro is the only class that doesn't have a "no hat" alternate hat, so fan theories have run wild about what exactly is under his ubiquitous gas mask, ranging from a horribly scarred or deformed freak to a hot woman. Someone even made a video where the Pyro reveals themselves to be Half Life 3.
* Team Fortress 2 is based mainly on the art of JC Leyendecker, but elements from Norman Rockwell and Dean Cornwell influenced the game as well.
* Team Fortress 2 is capable of creating NASA-level sentry turrets and teleportation devices using nothing more than his wrench and scrap metal collected from weapons dropped by the recently dead.
* Team Fortress 2 is French, and is fluent (apparently) in English, French, Spanish

and Italian (and possibly other languages too).
* Team Fortress 2 is no slouch either. Include Ricardo Milos' hat way past the meme's prime? Yes we can!
* Team Fortress 2 is notable in that he has to pull out a radio and switch it to "Millionaire's Holiday" for his to start. He often pulls this radio out of whoever he's just killed.
* Team Fortress 2 is only played because of the hats; they often refer to it as "America's #1 war-themed hat simulator."
* Team Fortress 2 is revealed to be keeping the living head of a Blu Spy in his refrigerator. He also has several still-beating hearts in there.
* Team Fortress 2" is still sometimes viewed as an insult and a synonym for being a noob. (Although the free-to-play players either quit the game or got competent.)
* Team Fortress 2 is that the Third Mann brother has appeared, murdered his brothers and set his robot armies against Mann Co. The mercenaries are "hired" by Saxton Hale to defend his company.
* Team Fortress 2 is the biggest nicknamer of all. Here is a small compilation of such "nicknames":
* Team Fortress 2 is voiced by John Patrick Lowrie, an American born in Hawaii, and raised in Colorado. The game's accents are all designed to sound like caricatures of what 1960's Americans would imagine these accents to sound like.
* Team Fortress 2. It even include a loud ticking sound and a loud explosion. And "'blank' is a time bomb" shows up on everyone's screen when the poor bastard rolls the time bomb.
* Team Fortress 2, "I think of most of the characters as being straight, you just wouldn't notice since there's no women around for them to be straight with."
* Team Fortress 2 it on a couple of occasions should they fall in. The Scout will say "Holy crap, dis goes on forever..." after a while of screaming. The Spy will either say "Come on, I don't have all day!" after some screaming, or he will scream for a bit and continue after taking a breath.
* Team Fortress 2. It's a rubber glove that grants a speed boost upon slapping an opponent with it. It even announces that the player got a "SLAP KILL!" in the killfeed when an enemy dies to it.
* Team Fortress 2. It sure helped him having Merasmus as a roommate for a time.
* Team Fortress 2 Jane Doe to avoid gender confusion by the name. Due to the Soldier being somewhat of a paranoid nutcase (as well as several other types of nutcase) and "Jane Doe" being commonly used to refer to a female of unknown identity, it's likely that this a pseudonym. This would mean that not only was the name chosen on purpose, he chose it for himself!
* Team Fortress 2 just to test out the new weapons swelled server populations immensely.
* Team Fortress 2 land the Pyro sees in Meet the Pyro. Oddly enough, people playing Pyro cannot see this unless they are actually wearing the goggles or one of the other Pyroland cosmetics or weapons.
* Team Fortress 2 makes this trope a basis for every non stock weapon as a balancing factor, so that pretty much everything is designed to be more a sidegrade than an upgrade in general use.
* Team Fortress 2 maps have a sign that reads "This Job Has Worked [0] Days Without an Accident". The Payload map Swiftwater has a non-zero numbers of days for the sign, but is appended with "that said, there have been a number of homicides".
* Team Fortress 2 may announce his arrival by seeing either "DOOM! All of you are DOOMED!" or "Welcome to your DOOM!", say "Time to play hide-and-seek... your DOOM!" when hiding, and shout "I leave you... to your DOOM!" when he leaves.
* Team Fortress 2 — the jack o' lantern the Horsemann was wearing in place of a head. If they go the extra mile and land a hit with a melee weapon near his dying moments, the player gets an extra rare crafting item as well.
* Team Fortress 2 Mecha-Engineer update comes with a comic; in it, the Heavy elbows Miss Pauling to stop her from mentioning his Russian heritage within earshot of the Soldier, who thinks the whole team is Americans.
* Team Fortress 2: "MEDIIIIIIIIC!" (which the Medic sees as his symbol in a word

balloon emanating from the person needing help)
* Team Fortress 2 "Meet The Videos" this trope is inverted with the RED team mercenaries regularly defeating BLU mercenaries.
* Team Fortress 2. Merasmus the magician constantly gets referred to as "ma'am" and "witch-woman" despite clearly looking and sounding like a man.
* Team Fortress 2 merchandise includes Plushie Stickybombs, recreations of the Mann Co and RED Team Ellis Caps, the Sandvich poster seen in Meet the Sandvich and BONK! shirts that parody the common Mountain Dew/Coca Cola shirt. And now they have a fully-mobile Level 1 Sentry prop in their building though they (thankfully) don't have enough metal to reload or upgrade it.
* Team Fortress 2 mod, which multiples most weapon stats by ten and grants other weapons ridiculous bonuses. If you're a trader, not a fighter, there's plenty of trade maps where the emphasis is on trading or exploring the often expansive and detailed maps. If you play on these kinds of servers too long, you might forget how to function if you return to a normal server...
* Team Fortress 2 more about fighting than you do, pal, because he invented it!") The camera switches views at the end, revealing the "soldiers" to be a row of severed BLU Team heads on a fence.
* Team Fortress 2). Mostly because both love explosives, and both have lost an eye.
* Team Fortress 2 named the Eyelander (which lowers his health, but grants him bonus health if it's used to kill people). It also constantly whispers "headsss".
* Team Fortress 2. None of all this has any bearing on the game itself - other than introducing new guns - which pretty much remains plotless.
* Team Fortress 2 of "Do You Believe In Magic" by the Lovin' Spoonful as he departs the battlefield, leaving the bodies of the entire BLU team in his wake.
* Team Fortress 2 on airborne targets depending on certain situations.
* Team Fortress 2, one is a sadistic voice-in-the-sky, and one only appears in supplementary canon. Particularly full of preposterone:
* Team Fortress 2 ones) have dedicated Sniper balconies on both sides of the map, which can result in the Snipers focusing on dueling the opposing Snipers and nothing besides that.
* Team Fortress 2 only see about ten seconds of the falling, then the game flags them "dead" so they can respawn).
* Team Fortress 2 parents, which led to him reuniting with his birth parents.
* Team Fortress 2 promotional videos show the RED team being absurdly competent:
* Team Fortress 2 put aside their differences to try and produce an heir by this method. Thankfully, they were killed moments before they could put in the orders to "build a machine to make one of us pregnant."
* Team Fortress 2 puts it: "When you're the only healer choice, your team will need you no matter how much they hate you".
* Team Fortress 2: Radigan Conagher, the Engineer's grandfather, is "a man of many ideas and few words."
* Team Fortress 2 real towns named Rottenburg in Germany, one of them (Rottenburg am Neckar) being only 60 kilometers away from Stuttgart.
* Team Fortress 2 robot attacks, bullets and otherwise, while allowing his team to shoot from safety. It also damages robots that touch it, but they can still walk through it.
* Team Fortress 2's class updates seem to be one long string of Valve weaponizing memes. They also managed to make "Your mom" jokes with style.
* Team Fortress 2's Competitive Mode has a rare chance of The Spy giving some at the start of a match:
* Team Fortress 2's constructs, most notably the sentry gun, have this happen, mainly when being upgraded.
* Team Fortress 2, Scout privately turns to Spy for help earning the heart of Ms. Pauling. However, since Scout made fun of Spy earlier, Spy responds by activating the intercom and blowing into it to create the feedback squeal that alerts everyone else, making it clear that Scout will have to really swallow his pride for Spy's help.
* Team Fortress 2. Seemingly innocuous buildings (farmhouses, industrial complexes,

warehouses, etc.) hide areas full of computers, rocket launchpads or giant lasers.
* Team Fortress 2 seems to have this problem. In the part of the video "Meet the Spy", right before the fake Medic puts on his glasses, he's both squinting and slightly cross-eyed, just like someone with a strong prescription would be after taking off his glasses.
* Team Fortress 2 series). The Dead of Night is an all class-item that pretty much makes all the mercenaries look nice.
* Team Fortress 2's Halloween events. TF2 is normally about a (not so) normal war going on between two companies, but every Halloween supernatural elements come into play. For example, in 2013 you had to send your employer's dead brother to Hell, while fending off skeletons with magic.
* Team Fortress 2. She doesn't have any audio clips yet, but based on her description, it's safe to assume she is a girl scout to some extent, and she does kill people. (Well, as much as her brother does.) Subversion; beyond the deliberate pun, she's a 20-something gangster-turned-mercenary just like her brother.
* Team Fortress 2 shows the Sniper peeing in jars. In-game you can unlock his urine jars as a secondary weapon, called "Jarate", which applies a 35% defense debuff on any enemy it hits. It's also good at detecting Spies as the splash gives away their position, even while cloaking and putting out fire from Pyros. But watch out for Pyros who reflects those! That can lead to a few exceptions...
* Team Fortress 2s Medic literally created a device that can heal people from the brink of death to full physical health within the minute, out of a Flower pot, blender, fire hose, several gauges and malfunctioning medical equipment. The Soldier has a cobbled-together rocket launcher, Pyro a flamethrower, and Medic once more, a syringe gun that's just as cobbled together as the Quick fix.
* Team Fortress 2's "Meet the Spy" video was leaked a few hours earlier than its intended release.
* Team Fortress 2, Soldier is concerned when he thinks his cardboard costume scared Miss Pauling, and Heavy decided to come on a mission with the two of them, just because Miss Pauling was going.
* Team Fortress 2 somehow attached to the string. Unfortunately, it doesn't make him run any faster.
* Team Fortress 2", someone tried to blackmail the Medic, he escaped. "But zat was after I pulled out all his teezh, fed him his own testicles, drilled a hole into his skull and zen poured in ze acid…"
* Team Fortress 2, so they made him black. So this probably isn't a case of tokenism, but an attempt to break a stereotype. Amusingly, the "aggressive black Scotsman" with an absurdly broad accent is a stereotype of its own in the UK. It's lampshaded in the Demoman's intro video on the official site:
* Team Fortress 2's plate. Except that here, someone actually opens the faucet, filling the "Faucet" logo on the bottom left with water.
* Team Fortress 2's player classes all have different strengths, weaknesses, and unique abilities, forcing players to help each other out so their team can win...in theory, at least. There's also a hat-painting item known as Team Spirit, which makes your hat match your current team's color.
* Team Fortress 2 sprays are more often used for this purpose. So many players are bronies, they get easily distracted by them. Bonus points if it's an image macro.
* Team Fortress 2's publicity blurb, the Sniper created it from an old bolt-action rifle, a long piece of metal, some bolts, one half of a binocular and a military-grade laser sight, all bought for just under three dinars.
* Team Fortress 2. Spy and Scout are in prison, and Spy warns Scout that the food they are being given has been laced with anti-psychotics and muscle relaxers, and he'd rather have a clear head in preparation for his upcoming trial. He sits at the table, pulling several false teeth from his mouth, which are revealed to include several tiny objects, such as a Cornish hen dinner, a candelabra, and a balisong (butterfly knife).
* Team Fortress 2's Soldier, after being rejected from all branches of the military he flew to Europe on his own and embarked on a 'Nazi killing spree', which ended when he heard news of the war's end. In 1949.

* Team Fortress 2 started a huge, multi-part ARG, with one part leading up to the Pyromania update, and the other up to the mysterious "Mann vs Machine" update.
* Team Fortress 2 subbing in for one of the Soldier's lines ("I teleported breaaaad!") because Rick May, his usual voice actor, had throat cancer and could not yell.
* Team Fortress 2 supplemental material, Australia discovered "Australium" in the 19th century, causing all the men (and women) there to grow handlebar mustaches and rocketing Australia to a leading position in technological progress.
* Team Fortress 2 supplementary comic Loose Cannon, Engineer's grandfather built Blutarch and Redmond Mann machines that would extend their lifespans indefinitely. When Blutarch eventually demands that Engineer fix his when it starts to break down. Engie points out that without his grandfather's blueprints it'd be impossible, and said blueprints were buried with him- at which point Blutarch presents a large stack of old papers before him.
* Team Fortress 2 supplementary material, the RED Soldier (and presumably the BLU one as well) keeps a collection of severed enemy heads.
* Team Fortress 2's webcomic, Medic has died and finds himself in Hell. However, because Medic infused his body with eight more souls, he thus must go to Heaven. However, he negotiates with Satan instead to simply return to life for fifty years. Satan isn't terribly thrilled with this arrangement, as if he owns the majority of his souls, he can vote himself into Heaven, but Medic reassures him that it's almost a certainty that he will end up in Hell.
* Team Fortress 2 tacks on a dolly-over to your killer, or what's currently left of them.
* Team Fortress 2 takes part in this when you equip his full Halloween set, going "beep boop", or even half-assing it and just saying "Robot noises"
* Team Fortress 2 taunt, he can potentially blend in with the surroundings - the last place "normal" players think to look. What makes this tactic truly broken is that, unlike while Cloaking or Disguises, the Spy can still capture objectives in this manner or block the enemy from capturing while Boxtrotting.
* Team Fortress 2: Teleportation is done one-way-only with machines placed at point A and point B. They can be sabotaged by either placing a Spy sapper on either machine (disabling both instantly and eventually destroying them) or directly attacking the teleporter. Users also leave behind a trail of energy in the first few seconds after teleporting, allowing enemies to discern its location.
* Team Fortress 2, TFIndustries; all together, they give her complete control of the entire world.
* Team Fortress 2 thanks to fans combining the latter female with Heavy's famous "I've yet to meet one who can outsmart bullet." line from "Meet the Heavy."
* Team Fortress 2 that applies stem cells extracted from the patient's skin to treat second-degree burns.
* Team Fortress 2 that starts with Spy insisting that Scout practice seduction on him.
* Team Fortress 2 that takes place on a space base. Naturally, the signage thus far is all in Eurostile.
* Team Fortress 2, the BLU Soldier has killed the BLU Spy because the latter was "obviously" the RED Spy.
* Team Fortress 2: The characters will drop their own Bond One Liners, independent of the player's input. This often happens when you kill the same player four times without being killed by them in response, earning a "Domination".
* Team Fortress 2, the effect on the opposing team can be devastating.
* Team Fortress 2. The fastest class, the Scout, is capable of just over 22 mph at top speed. This is quite possible to reach in real life, but the Scout is still beyond normal for being able to run at that speed consistently without being exhausted.
* Team Fortress 2. The game uses highly stylized art reminiscent of a Pixar film which, coupled with bright colors, apparently makes it look "cartoony". This is contrasted by large amounts of blood, players gibbing upon explosion, and a mild level of swearing. You can occasionally run into 7 or 8-year-old kids online whose

parents obviously didn't pay attention to the rating. Speaking of online, as a multiplayer game with voice and text chat, it's very common to hear even more inappropriate language than what was originally put in the game—there's a reason the ESRB warnings state that "online interactions are not rated".
* Team Fortress 2. The head of the BLU Spy, which the RED Medic keeps in his fridge, is being sustained by some eldritch and surely illegal medical technique involving dry-cell batteries.
* Team Fortress 2, the Heavy can be seen directing some concerned glances toward the camera.
* Team Fortress 2, the Heavy can use the Dalokohs bar to heal himself infinitely.
* Team Fortress 2 The Heavy does wonder if he really should be awake during this procedure.
* Team Fortress 2; The Heavy is Russian, and the KGB was the Russian CIA. More recently, he also got the Gloves of Running Urgently (GRU), which have flames painted on them and make him run faster.
* Team Fortress 2, the Heavy Weapons Guy, according to the Scout, is "like a big shaved bear that hates people."
* Team Fortress 2 The Heavy will often yell "Get behind me Doktor!" At first glance it sounds like He's ordering the medic to get back there to keep healing him, but then you realize the phase "Get behind me" can also be used to protect someone. Heavy is literally willing to take a bullet for the Medic.
* Team Fortress 2. The latter is...a gigantic spinning whirligig of light. Hanging over a radioactive pit. It's quite pretty.
* Team Fortress 2: The Mann versus Machine update added a cooperative game mode where the mercenary soldiers face off against hordes of incoming mechanical counterparts of themselves, and depending on server setting, ranging from your usual punchable-weak-toy-soldiers to outright Nightmare fuel.
* Team Fortress 2, the Medic may say this when holding a melee weapon, looking at an enemy player, and choosing the "battle cry" speech.
* Team Fortress 2. The mercs also get to find and wear unique, Halloween-only cosmetics during these events.
* Team Fortress 2. Then they became part of Valve and started working on a GoldSrc version, then constantly changed everything around until they released it in 2007.
* Team Fortress 2, the Pyro eventually received a sledgehammer called the Homewrecker, which does extra damage to buildings but isn't as effective against enemies as the axe. It wasn't too popular, as Sentry Guns (the buildings you're in the biggest hurry to destroy) push you back while shooting at you, until the ability to take out sappers on friendly buildings was added. An automechanic-themed update features the Powerjack, a makeshift hammer made out of an automobile jack and a car battery which grant 25 HP upon killing an enemy (even going into overheal.)
* Team Fortress 2: There are a few hats and accessories that fit the theme. Most notable is the Pyro who is capable of wearing a skull-themed gas mask (The Last Breath), wear a skull on top of that (The Skull Island Topper), three skulls across his chest (the Bonedelier), and wield a spinal column with skull attached as a melee weapon.
* Team Fortress 2: The reason why RED and BLU are fighting is because of a historic feud between brothers Redmond and Blutarch Mann.
* Team Fortress 2, the RED Demoman's father held something like thirty jobs simultaneously. (The Demoman himself works three jobs.)
* Team Fortress 2", the Red Spy breaks the Blue Medic's neck with a karate chop.
* Team Fortress 2, the RED team all have very vivid and symbolic dreams pertaining to which power they'll eventually develop before they wake up to discover their new abilities.
* Team Fortress 2: There's a reason why the Heavy and Medic pairing is one of the most iconic.
* Team Fortress 2, there's a special Halloween skin that you can apply to your characters that invoke this trope, although whether they're really dead or just in very convincing costume isn't clear. For example;

* Team Fortress 2, the Scout "flexes" his arms and acts very proud of his muscles even though there's literally no bulge whatsoever. He does this in attempts to attract women in several supplementary comics as well. It... never works, unfortunately for him, even though it sometimes does make him look suddenly a lot more muscular.
* Team Fortress 2: The Scout's Home Run taunt has him imitating Babe Ruth's famous pose.
* Team Fortress 2: The Scout, stated as the youngest of nine boys in his backstory, is even called "the runt of the litter" in his official wiki biography. Gameplay-wise, though, he's the fastest of the team (though he has the least HP).
* Team Fortress 2). The Sniper also has them as part of his standard attire.
* Team Fortress 2, the Sniper has a domination quote in reference to the Spy:
* Team Fortress 2, the soldier achievement Semper Fry requires you to kill opponents while on fire. To explain, on of the Soldier's melee weapons, the Equalizer, increases his speed and attack when he is at little health. So more damage = more power. Fire = more damage. Fire = more power.
* Team Fortress 2. The Spy has an in-game domination line over an enemy scout referencing this scene ("Well, off to visit your mother!")
* Team Fortress 2 the status quo...but only in the loosest sense of "continuity"—in game, any player can choose any battleground they wish.
* Team Fortress 2. The strange thing is the original taunt submitted "True Scotsman's Call" has his playing the bagpipes beautifully with drums, flutes, pipes, and bagpipes playing along. Why did the team change it to something so grating and obnoxious is unknown but it may have to do with licensing music.
* Team Fortress 2. The titular character, John Phantom, has the apparent catchphrase "The defense rests... in peace!" The Eyelander angrily points out that if he's a district attorney, as the show's title suggests, that makes him part of the prosecution, not the defense, and indeed, he seems to have spent the episode prosecuting a criminal. (Also, he makes a silly sound when disappearing, which the Eyelander suggests means they didn't do their research on ghosts, either.)
* Team Fortress 2. The writers came up with the basic scenario before letting the voice actors loose, their improv making up the entirety of the video.
* Team Fortress 2, they actually shrink away into their necks (covered up with a gore effect and with a separate severed head object spawned if needed).
* Team Fortress 2. They're the completely harmless variations of the Soldier's and Demoman's primary weapons, respectively. They do absolutely no damage whatsoever, but still retain all the force behind their explosions for the user, allowing you to zoom around the map with impunity! You'll still take a LOT of fall-damage if you're not careful though! Not too mention that a good player can easily shoot you down...
* Team Fortress 2, they temporarily snap into reality and brutally kill the bear.)
* Team Fortress 2. This additionally gives the game a sort of "Americana" feel, like that of a WWII ad, or manly pulp magazine.
* Team Fortress 2, though, and thus is very desperate to get his carnival up and running so he can pay them back as soon as possible.
* Team Fortress 2, though in this case a stealth character in general vs a burglar, unless you're stealing the intel of course.
* Team Fortress 2 to be aware of and look out for (as well as other Spy counter-strategies) to avoid a knife in your or your teammates' backs.
* Team Fortress 2 to be evil and to appease the Clown God Boffo, and evil circuses have followed in this tradition ever since.
* Team Fortress 2 to challenge each other to a melee weapon-only 'boxing match', seeing as how all of the Heavy's melee weapons are variations on his fists.
* Team Fortress 2 to discern that they're just a pair of squabbling idiots in the wrong bodies attempting to hide their mistake.
* Team Fortress 2 to get around. The other team are all set to pyros and have to seek out the fake objects. A popular strategy is to hide atop something like a shelf in a room or right in plain sight, simply because players tend not to look directly up for enemies. Not having to look up very often for enemies in the main

game mode probably helps to make this behaviour more common.
* Team Fortress 2 to teammates can fall into this trope. Shouting the spy's disguise might work if he's in the heart of battle, but if he's just changed (which good players do often) or has the knife "Your Eternal Reward", it's likely he's someone completely different or invisible.
* Team Fortress 2 trailer "Meet the Spy", the BLU Spy gets his head blown off by the BLU Soldier after the latter mistakes the former for the RED Spy. To be fair, the BLU Spy had just warned the other people in the room that the RED Spy could disguise himself as one of them.
* Team Fortress 2 until 1948 because he didn't realize it had ended and was enjoying killing Nazis too much. By Nazis, we mean normal Germans—considering where he first arrived (Poland), maybe not even that close.
* Team Fortress 2 uses this basic framing device (with the heroically-evil RED and evilly-heroic BLU) to provide the deliberately flimsy rationale for the game.
* Team Fortress 2 veterans can take advantage of years of honed skills as the Sniper.
* Team Fortress 2 video "Expiration Date", as Medic reveals that a loaf of bread that was recently sent through a teleporter has tumors, Heavy pauses eating his sandvich and looks down at it. In the next scene, he is seen inspecting it before deciding to eat it anyway.
* Team Fortress 2 video "Expiration Date", when Scout offers to help her with her work:
* Team Fortress 2 video, he tells an anecdote to the Heavy in which a doctor somehow made his patient lose his skeleton and that the doctor is never heard from again... And then he admits that's how he lost his medical license.
* Team Fortress 2 videos, which are intended as tutorials for the game.
* Team Fortress 2" video: When the Medic turns the medigun up to full power, it not only heals the Heavy's injuries, but repairs the damage to his jacket.
* Team Fortress 2 want to push it and count stage hazards as characters, the Ghost (Zepheniah Mann) was first seen on Event Harvest, and the skeletons/the Skeleton King was first used on Helltower.
* Team Fortress 2, "WAR!", a visit to the messy, paranoid BLU Soldier leads to a shotgun pointed over an overturned table and the ultimatum that if they are not a tomato soup wholesaler or a new delivery man from the rib place, the interloper is in for a world of hurt. Close inspection of some of the boxes and containers on the floor reveals that the Soldier is, indeed, a longtime customer of an establishment called "THE RIB PLACE".
* Team Fortress 2 was ported to Linux, users who tried it out got a free effigy of Tux (see Real Life, below) that their character could wear strapped to his butt. For players with Pyrovision on, Tux will be credited with assists just like the Balloonicorn.
* Team Fortress 2 webcomics when he has to work for his rival Charles Darling:
* Team Fortress 2 wells up when talking about his gun Sacha, but he also commands the "babies" he's fighting to "cry some more".
* Team Fortress 2'' were originally the only way to unlock additional gear for your characters. You can still obtain all of the original 27 unlockables this way, which is handy since the sheer number of items in the random drop pool now means the odds of finding those particular ones by the time you reach the necessary milestones to unlock them are slim.
* Team Fortress 2? What German wouldn't want to turn the tide of the battle by healing someone so hard that they turn into a glowing invincible juggernaut? Nobody, that's who.
* Team Fortress 2 when his enemies' back is turned). Valve noticed, and in a later update gave the Spy domination lines to his opponents full of insults, puns, and deranged laughter.
* Team Fortress 2, when in disguise, looks exactly like the person he's imitating—body shape, face, and voice.
* Team Fortress 2 when it had said device attached to it). The two then rush off into battle, and just as Medic is about to pop his very first charge...

* Team Fortress 2. When the Scout and Heavy switch brains, Heavy-in-Scout's-body speaks with Scout's voice in a Russian accent, while Scout-in-Heavy's-body uses Heavy's deep voice but now Brooklyn-accented.
* Team Fortress 2: When you join a server, you get the bare bones of your mission presented to you in an old-timey black and white movie (and on Territory Control, what parts of the map have been won by which teams drawn on the blackboard).
* Team Fortress 2, where he isn't allowed any of these things, he becomes a joke character nobody plays as except when they're trolling, due to his low speed and health. He does get a saving grace with his special melee weapons, such as the Gunslinger (which gives him extra HP and causes an automatic critical hit when striking thrice in a row), the Southern Hospitality (which causes bleed on hit and has its secondary weakness nullified by a lesser amount of fire) or the Eureka Effect (which lets him teleport back to spawn).
* Team Fortress 2 where he's rather angry at the idea of being turned down.
* Team Fortress 2 where things just won't go your way. And then there's the days when you're playing as a Demoman and a friendly Medic gives you a kritzkrieg, turning you into the anti-god allowing you to one hit kill every living thing that dared to spawn on the other team.
* Team Fortress 2, which involved a humans vs. aliens plot. Finally, in 2006, the game was retooled into the humorous, cartoonish, lighthearted FPS we all know of today.
* Team Fortress 2, which not only can't be headshot or backstabbed, it is also completely immune to all negative effects like Jarate, Mad Milk, Burning, Sapped, Stun, etc.
* Team Fortress 2. Which side he displays generally depends on whether he's currently sniping.
* Team Fortress 2, while keys need to be bought from the ingame store—the playerbase (especially bots) is constantly pumping more metal into the economy, leading to its value slowly cratering. On the bright side, this means that you can buy every single actual stat-affecting weapon for basically nothing.
* Team Fortress 2, who is always hidden behind a gas mask and fireproof suit, and only speaks in muffled mumblings.
* Team Fortress 2 who kidnaps children from across the world, brings them back to his workshop in the South Pole, and forces them to make gifts year-round, which they then give to him. In the comic "A Smissmas Story", the Spy gets a little boy to stab him to death with an icicle.
* Team Fortress 2 who smashes his way through the enemy ranks with a roaring laugh, is commonly put off by the Medic's sinister tendencies. The Medic's take on all this? As far as he's concerned, he's just practicing medicine.
* Team Fortress 2 will sometimes say this line during stalemate, while reacting to the Burstchester taunt, or when the Yeti Punch taunt is used. He will also say this when he is reacting to the skeleton spell.
* Team Fortress 2 with each other, especially Sniper/Spy, who in canon hate each other with the fury of a thousand suns.
* Team Fortress 2 with his fists can send opponents (or rather their corpses) across a room. The Gunslinger (a prosthetic robot hand) landing its three hit combo can get even more ridiculous, sending the unfortunate person's ragdoll shooting off into whatever direction the Engineer was aiming at the time, even if it's ten feet up in the air.
* Team Fortress 2 with his mother and sisters (after the death of his father, a counter-revolutionary), and that only by torturing the guards to death and setting the gulag ablaze were the prisoners able to escape. When the KGB agents ran after Heavy and his family, he taught his sisters to "butcher them like hogs" until "their screams died on their lips". Heavy is very proud when he discovers that his sisters, now all grown women, are more than capable of taking care of themselves without his help.
* Team Fortress 2, with Soldier even slicing the ears off his enemies in an attempt to make his fiancée a necklace.
* Team Fortress 2. With the expansion of Steam trading, however, other options are

open such as trading Steam game gifts or items from other games.
* Team Fortress 2 wouldn't qualify, if not for the fact the artist misspelled Sex Bom(b).
* Team Fortress 2, yet when asked whether that comes in handy in his line of work, he replies "More than you think."
* Team Fortress 2, you can hear the train coming on the Well maps, but that doesn't stop it from claiming victims who step on the tracks at the most inopportune time.
* Team Fortress 2. You can put on a flawless disguise so that the opposing team doesn't give you a second glance as you slip past them, you can plan your infiltration route through back passages and rarely-used hallways, and then you turn a corner and blunder into some noob who's gotten lost in his own base.
* Team Fortress 2. You can say two very true things about the main cast: 1. They are all funny as hell. 2. They are all highly-paid mercenaries of questionable mental stability, hired to repeatedly kill their alter-egos on the other team (or lately, fight armies of killer robots).
* Team Fortress Classic, and two shotguns, the class can be the poster child of this trope in video games. The Medic is also the second-fastest class behind the scout, is immune to infection, and regenerates his own health over time.
* Team Fortress Classic is the only reason that maps like 2Fort and Well were remade, even though their gameplay and layout isn't as refined as their contemporaries.
* Team Fortress Classic. Since he's the only class that can heal, though, he gets the title by default.
* Team Fortress Classic took over, and for the longest time the market was since fragmented between WW2 and modern or futuristic shooters.
* Team Four Star, after Walter and Seras subdue Jan Valentine, there's this exchange:
* Team Four Star, as seen in the Twitch marathon before the premiere of the finale.
* Team Four Star", can see them). Cooler also hates being compared to Frieza, but it's covered in more depth since he views his little brother as an overly pampered brat and developed a major inferiority complex over it.
* Team Four Star, Garlic Jr. berates his henchmen for bringing back a dragon ball with the toddler it was on. Son Gohan then says his father will come for them, the mooks just laugh saying that they ganged up on and beat Piccolo. Gohan says his father fought against him and won as well, and he was alone.
* Team Four Star, Goku does this to Jeice while Jeice is giving a monologue. Only Goku wasn't trying to stop his speech, he was trying to get Jeice to fight.
* Team Four Star has a poor track record of delivering on announced original content:
* Team Four Star has Jerry the Flumph. Being in the mind only makes it worse...
* Team Four Star hired Grant Smith, an outspoken critic of their abridged series content, as a main cast member for their gaming side channel.
* Team Four Star, his crewmate Ezra points out that 'Our lives have the randomness of dice rolls!'.
* Team Four Star. Kaiser refuses to fall for it, quipping "How about you check me for prostate cancer?"; Kirran responds "Fuck you! That was a good one."
* Team Four Star. Lanipator confirmed that this was the case in the 32nd episode.
* Team Four Star-loving friend Grant, and, again, did most of it while absolutely stinking drunk.
* Team Four Star parodies content warnings on their bloopers or alternate ideas videos. Most notably, the first one opens with one of the members warning that the video will contain strong language not suitable for minors. He then adds "So if you're under the age of 18 and have never heard the word "fuck" before... well, you have now!"
* Team Four Star playthrough that Frogurt, their Frost Demon character, is omnisex and doesn't associate themselves with any type of gender. Frogurt's character entry uses the singular they pronoun for them.
* Team Four Star series, Takahata101 generally fills this role, charging in recklessly most of the time.

* Team Four Star's on her face? "Well, at least I'm going to die with a raging boner."
* Team Four Star that comedically retells the end of the Cell Arc, they barred Funimation from using them.
* Team Four Star the page quote for a reason. Some examples include...
* Team Four Star, they had a Fearow they nicknamed Alex. When fighting a random mook in the Fighting Dojo, the mook sent out a Primeape, so they sent Alex out, thinking that because Alex was Flying type, they had a type advantage over the Fighting-type Primeape. Primeape proceeded to use Cross-Chop, which insta-killed Alex. After a moment of stunned silence, they finally realized that Fearow is Flying/NORMAL type, which means that due to Fighting's type-trump over normal, he would take 1x damage from fighting type attacks due to the super-effective attack against normal cancelling out the ineffective attack against flying.
* Team Four Star. Voice #8 for male created characters is literally him as Ghost Nappa.
* Team Four Star, when he finds out Gohan and Krillin are from the planet Earth.
* Team Four Star) while the Z Fighters even go so far as to say that they'd rather fight any of the previous movie antagonists instead of Broly.
* Team Four Star Xenoverse Playthroughs is the result of Goku, Piccolo & Mr. Popo having a three-way on the dragon balls.
* Team Galactic: "Andromedome" (Marble League stadium), "Stardust Accelerator" (Marble League track)
* Team Galaxy both possess wacky hair designs. In fact, in one episode, Yoko panics when her pigtails are cut off, resulting in a more modest hairdo.
* Team Galaxy called "H2-Oh No!" featured an aquatic race stealing water from various planets because their own planet is in a system that has six suns, which constantly evaporate the planet's water supply.
* Team Galaxy features this, where the circus clowns kidnap humans for their performances.
* Team Galaxy has Brett, a serious boy genius. Unlike his partners, he actually enjoys homework and mental exercises, and is often annoyed at the lack of intellect the other marshalls possess. Early on, he also detested being called a "kid", although that aspect was later dropped.
* Team Galaxy in which Josh and Brett are supposed to be translating a text from an alien language into English. Josh, who has been goofing off playing a video game on his computer, connects his up to Brett's and steals his copy. Josh ends up taking all the credit. Annoyed, Brett tells Josh he has a word for him and speaks some strange word. The whole class suddenly gains an expression of shock on their faces.
* Team Galaxy the 3 protagonists enforce the law throughout the stars as space marshals.
* Team Galaxy who seduce males to feed on them. The team has to rescue Mr. Spzoerscliipw' before she grows bored with her "appetizers" and moves on to the main course.
* Team Gibbs sometimes has dealings with a Turkish arms dealer named Agah Bayar.
* Team Guy's Tenten was the member with the least amount of backstory in the group, but some of the anime's filler episodes expanded on her character and gave her some reasons for becoming a ninja.
* Team Hand-Stack: A group puts their hands together to show teamwork.
* Team Hand-Stack. However, their timing is all off, so they never actually all have their hands in the circle at the same time.
* Team Hell No: Debuted in 2012. Daniel Bryan, one-half of the team, was also new to WWE for the decade.
* Team Hell No, decided to send them to anger management together in spite of the fact they had been feuding for the last couple of months. It eventually culminated in them winning the tag team titles, and using their matches to one-up each other whenever given the chance.
* Team Hell No. He has since ditched it agian after taking an official position in Triple H's cabal.
* Team Hell NO) often had segments that were nearly 30-40 minutes in length,

usually consisting of one having a singles match with the other on commentary, then a long promo segment, and then the other partner having a match while the first member went on commentary; not to mention any pre-taped segments...
* Team Hell No that ran on this trope. There was so much animosity between the two that they argued constantly, stole each other's title belts, and even cost each other singles matches. But when one of them was in serious trouble, the other would become very defensive of his tag team partner.
* Team Hell No to be cranked up to near self-parody levels, creating some of the most hilarious moments in recent WWE history. The audience loved their interactions so much that despite being heels who hadn't changed character at all, they got the face treatment.
* Team Homer", Homer gets an anesthetized Mr. Burns to sign a $500.00 check so he can register a bowling team with Apu, Moe, and Otto, called the "Pin Pals". When Burns recovers from his stupor and discovers the check he wrote to Homer, he replaces Otto in the team as revenge, but since Burns is a horrible bowler, the team is convinced they will lose the championship.
* Team Human and partly honest concern for her friend's well-being. Cathy is 17 and Francis is over 150, and the process of becoming a vampire has the risk of killing Cathy or turning her into a zombie.
* Team Human, zombies are the results of vampire conversions gone wrong.
* Team Ico and horseback riding.) Cutscenes are few and brief, resulting in a high level of immersion for the player, and seemingly-simple plots that support a lot of analysis and reinterpretation.
* Team ICO for their awesome games that usually get placed high on many "Best Games" lists.
* Team Inferno techniques down the air vents to turn the bases into ovens that take weeks to cool.
* teaming together as The American Wolves. They remain as friendly as opponents can be too, almost devoid of vitriol, jealousy or resentment.
* Team Jabberwock are this trope taking to extreme. They are all racist American streetballers who tell everyone in Japan on live television to quit playing basketball because they are "monkeys". They are also prone to violence even off-court and they love to humiliate their opponents that goes beyond normal streetball taunting.
* Team JNPR (Jaune, Nora, Pyrrha, and Ren) bond together a bit faster, and quickly become team RWBY's closest allies. In fact, when team RWBY temporarily splits up, Ruby ends up joining team JNPR, and when her team reunites team JNPR stays with them.
* Team Killer: A character who kills people on their own side or team.
* Team Killer: A treacherous member of a group murders their own comrades.
* Team Killer". Scott goes around stealing various possessions of both teams with the intent to frame Brick for it later that day, but Dawn makes the mistake of not keeping quiet about her discovery of Scott's scheming. So, he blames the thefts on her instead, putting everything he stole and his own shark tooth in the bag Dawn had earlier gone beachcombing with. Dawn doesn't get a chance to defend herself and is voted off, although her name gets cleared by the time of the finale.
* Team Killer". Scott sabotages his ice mirror to melt down the Toxic Rats' own snow fort and blames it on B. Because it's a fragile frame-up, he continues with other stories to get the required votes against B. He tells Sam that someone who doesn't talk must have something to hide, Dawn that B hates nature, and Lightning that B calls him "Fizzle" behind his back. B is voted out that evening, but his name gets cleared by the time of the finale.
* Team Kirby Clash Deluxe are free to download, but if you need a lot of Gem Apples quickly to buy better gear or items that permanently multiply the rate you gain crafting materials for the said gear, you're gonna need some real money. Buying enough Gem Apples will also upgrade the tree in the town so that it will produce a lot of Gem Apples when it's harvesting time, and there's a maximum cap to how much Gem Apples you can buy with real money roughly equal to the cost of most full-priced new games: once you reach this cap, it's impossible to buy any more Gem

Apples with real money and the tree will produce enough of them that you'll be able to buy out the entire remaining store inventory in just a few harvests.
* Team Kirisaki Daiichi's specialty is injuring their opponents without the referee noticing the act. Their team leader (and coach) Hanamura in particular loves to ruin the effort of other teams and he views destroying said effort as a form of art.
* Team Knight Rider composed of complementary abilities, as an earlier attempt to just make one car with all the relevant abilities had ended badly.
* Team Knight Rider, the team figures out where a group of thieves is going to strike by finding the one place that would require all their individual skills. One of them was a contortionist.
* Team Knight Rider version 2 (2008), where it's a C-130 cargo plane instead.
* Team Knight Rider, who is left confined to a wheelchair and needing the use of tubes to talk due to an unspecified illness.
* Team KZ (which requires being the top 2% academically), but on the other hand couldn't even get into the middle school he wants.
* team leader killed off each of their superiors so that they would be forced to take the reigns. One of the NPCs even wonders about this, thinking it may be the greatest chain of assassinations of all time.
* Team LVDR: Blaze uses his fellow prisoners as suicide bombers, murders them to blow off steam, and is perfectly willing to kill them just to score a victory against his enemies.
* Team LVDR has a prosthetic leg after needing to get her original one amputated.
* Team LVDR is a dark example. He’s a faunus trafficker, and he enjoyed every second of it.
* Team LVDR is openly gay while no such romantic interest in women was mentioned in canon.
* Team Machine discover a coded message from privacy terrorist group Vigilance written on the wall of an apparently empty lockup in infrared paint. There's also a CCTV camera, a remotely activated trigger for the roller door and the sprinkler system has been converted to spray everything
* Team Machine has a battered acrylic board set up in the abandoned library they use for their headquarters, on which they put pictures and information on the
* Team Medical Dragon: Dr. Katou's first name is Akira, which is typically a male name. She mentions receiving a tie as a gift from some business associate who doesn't know her personally, but assumes that she's a man due to her name.
* Team Medical Dragon, it's possible to identify the good and bad guys by one characteristic alone: most of the time, the good guys are drawn incredibly attractively, while evil characters invariably look like the products of 18 generations of inbreeding.
* Team Medical Dragon: The main conflict driving the plot of the story is the confrontation between those medical professionals who want to keep the corrupt system the same and value their own advancement and salaries over patient's lives and those willing to risk their careers in order to help patients ethically.
* team medic Calvin James due to the risk of possible heart failure. In one novel the prisoner has a heart condition, so they try hypnosis instead, getting enough details to work out the information they're looking for. In another, some mooks who were injured in the fight that led to their capture start babbling their cover stories after they're injected with an anesthesia. This causes Phoenix Force to realise they're professional intelligence agents who have been given hypnotically-induced cover stories in case they were injected with a truth serum.
* Team Member in the Adaptation: In the adaptation, a character is associated with a team or organization they have little to no association with in the original work.
* Team Mom among the newer even younger heroes. Nightwing becomes the leveleheaded leader of his own splinter faction, trying to rein in the personalities of less experienced heroes that don't have any other mentor figure before they graduate to the team proper if they choose to. Beast Boy later leads the public facing squad of the Team as a charismatic internet celebrity. Aqualad has since promoted to Aquaman

and is the co-leader of the Justice League, trying to maintain their good image on earth while Wonder Woman leads the League in space. Batman also splinters into another sect that he coordinates as a mastermind with Miss Martian, Aquaman, and Wonder Woman working together in the shadows.
* Team Mom for the submarines who tends to be rather forward with her affections for the Admiral and several lines implying she has a jealous streak. It's common to find fanart portraying Jingei taking a kitchen knife to the Admiral for daring to look at another girl.
* Team Mom is far more serious than the rest of the team, and is usually the one keeping them on-task. She's also one of the party members who's more willing to use underhanded tactics in order to overcome their foes and get justice and is easily one of the most vicious of the Phantom Thieves.
* Team Mom is more like the team grandpa, old Gramp. Without him there's a better than 80% chance that the rest of Nanba Salvage would have killed each other by now.
* Team Mom movie. Most noticeable during the Backson song, where she not only buys into Owl's story of the supposed monster as easily as everyone else but even adds her own superstitions to the number, such as the monster waking up babies and stealing her youth.
* Team Mom) of the group becoming so shocked they cover the "innocent" one's ears while moving them away. The kid picks up on it in the second half, however, shocking the Team Parent again enough to punch the first guy out.
* Team Mom of the Nordics is Sweden: he's levelheaded, serious, good at woodcrafts, and has even adopted two child micronations (Sealand and Ladonia).
* Team Mom of the Oda group, has elements of this trope. He's normally an extremely kind and caring man but becomes cold and hostile towards anyone who disrespects or threatens his lord Nobunaga, including the main character when he initially believes her to be a spy or assassin. When his suspicions against her are disproved, his behavior towards her changes so radically from icy hostility to doting sweetness that she has trouble adjusting to it at first.
* Team Mom Oishi are frequent bowlers, and Inui decides to force those who gutter to drink his newest health drink, with the losing team having to guzzle the whole thing.
* Team Mom. Robin is the Cool Big Sis to Nami, and is often referred to as "oneesama" by Nami who hugs her frequently and goes shopping with her.
* Team Mom's characterization - which resulted in the planned Monica/Joey relationship being changed to Chandler, who Monica was now more suited with.
* Team Mom takes center stage quickly as she helps both Ruby and Blake through their own issues, even providing Weiss some critique on occasion. She's also forced to acknowledge that her gung-ho methods aren't always the best, so she retreats into herself for a while and comes out being more willing to think things through.
* Team Mom TV series, Sheila sometimes lets younger children take naps on her like this. She did it for Terry in "The Girl who Dreamed Tomorrow", and then for Presto in "The Last Illusion".
* Team Neighborhood BLU Soldier outlines a plan to hijack the RED Team's cable TV with a random assortment of props related to the team like a Sonic Doll for Scout, a rotten Sandvich for Heavy and a Hitler action figure for the Medic.
* Team Neighborhood to cope with the stress of loosing internet the Soldier makes chocolate pudding at 4am and proceeds to snort it like cocaine, leading to a vivid hallucination.
* Team Ninja continued their support for the Xbox brand into the 360 era with
* team of eight), Freya and Amarant and Steiner and Vivi. Special mention goes to Steiner and Vivi because of their in-game sword magic command combination.
* team of pretty guys (the TV series, at least) have eyes matching their hair; and one of those who doesn't technically don't quite fit into exceptions either.
* Team Omega and, on the other, on an independent superhero whose deposing of the Congo's warlords sets a dangerous new precedent.
* Teamo Supremo, a touristic guide becomes a supervillain and defeats the Teamo with her knowledge of local landmarks (not as dumb as it sounds — she knew perfectly all the territories where they fought). The Teamo only defeats her after

an intensive study of the local history and geography.
* Teamo Supremo claims to be from another planet, despite the fact that he looks too much like his "Earth-mom" to possibly not be her child.
* Teamo Supremo: "I have to know this stuff if I want to be a(n) [occupation] someday."
* Teamo Supremo, Laser Pirate's main weapon is his laser hook, which can morph into other weapons, such as a laser blade and a laser cannon.
* Teamo Supremo once faced a criminal said to have used a technicality to get away with previous crimes.
* Team Pet, detects evil in two episodes that were broadcast consecutively.
* Team Pet, Momo, is a flying lemur (it has wings similar to a bat's).
* Team Pet, or at least a cartoonish chihuahua rather than a realistic Boston Terrier.
* Team Pet when pushed. In the fight with the zombie Oars Chopper consistently used his medical knowledge to tip the fight in the Straw Hats' favor.
* Team RNJR kill the Nuckelavee Grimm. Thanks to the quick medical evacuation, he survived.
* Team Rocket, after all). For instance, they planned to steal a (then) full set of four Eevee evolutions, each one individually extremely valuable. They get three of them and a huge lead, easily enough to escape — but Jessie insists on going back for the fourth one, resulting in their capture. Other times, it's because they'll try and steal Pikachu even if they already have a chance to get away with some rare/valuable Pokémon/object.
* Team Rocket also tends to give nicknames, most of which are variations on "Twerp" (which is what they call Ash) - Big Twerp, Rude Twerp, Twerpette, etc.
* Team Rocket also threaten to do this in a later episode, when they find their memberships have expired. It is quickly pointed out they can just reapply.
* Team Rocket and secretly helping Ash and his friends restore the king.
* Team Rocket aren't the only ones to get this treatment. In "Cerulean Blues", the Invincible Pokémon Brothers use their three Tentacruel to try and Poison Sting both Misty and her Gyarados into submission. Misty and Gyarados respond by blasting off the Tentacruel with a Hyper Beam, and then giving the same treatment to the brothers with a Hydro Pump. They even
* Team Rocket, but every once in a while you're reminded that they're the oddballs of a larger and much more dangerous syndicate. In fact, Jessie, James, and Meowth are very lucky to still have their job!
* Team Rocket cheats like no other, and they still usually lose. You'll get ambushed in the games by several Mooks in a row. Heck, the entire Elite Four is basically an endurance contest of five consecutive battles. You can heal in between battles - however, you have to use your own limited items to heal outside of (and during) battles, and you can't buy any PP-restoring items (although you can grow Leppa Berries before taking the challenge).
* Team Rocket got a few episodes starring them, with minimal appearances by the main characters.
* Team Rocket got a Tagalong Kid in the Sinnoh Arc, in the form of James' Mime Jr.
* Team Rocket grunts are supposed to wear black uniforms. Jessie and James wear white versions in the
* Team Rocket has become so iconic that Jessie and James's dynamic (e.g. aggressive female paired with passive male,
* Team Rocket is killed this way) Yet he turns up unharmed Team Rocket's next scene.
* Team Rocket join in the effort in bringing power back to LaRousse City in
* Team Rocket, Pikachu, and Ash all swing off a ship in EP274, the last episode before
* Team Rocket Roots, Jessebelle is a clone of Jessie. She, however, is much more malicious than her "sister" and has none of Jessie's positive aspects.
* Team Rocket Roots starts with Jessie's mother Miya giving her to foster care as a toddler because she can't keep Jessie at the headquarters. It then timeskips to 23 years later, with Jessie now being an adult.

* Team Rocket's Arbok and Weezing were a total wreck when forced to leave their trainers with a group of other Pokemon to get away from a poacher.
* Team Rocket. Since their goal is usually to capture Ash's Pikachu, they simply can't win. Ironically, several episodes make it appear that if they tried going after someone else's Pokémon (or tried a non-criminal path) they'd be successful. Unfortunately for them, the plot dictates that they must follow Ash and Co. around the planet.
* Team Rocket's Meowth being able to stand on two legs was very unusual. Meowth are strictly quadrupedal... Or at least they were at the
* Team Rocket's Meowth is usually depicted as a pitiful battler and falls quickly. Odd times however he gets in a good offence before the inevitable beatdown occurs.
* Team Rocket's Meowth often keeps Jessie and James updated on Pokémon moves and types, and being one himself, can even translate what they say for them. Since he spent most of his life learning to be sapient, however, his own abilities as a Pokémon are limited, making him an ineffective battler most of the time.
* Team Rocket's Meowth sees himself as competing with Giovanni's pet Persian for the boss' attention, although it's clear that the Persian couldn't care less.
* Team Rocket's mottos, particularly in Sinnoh. Bulbapedia has a complete list. They're too long to put here, though "Listen, is that a/n [adjective noun]/[noun] I hear?" "It [verb]s to me loud and clear!" is a common one. And when defeated and going offscreen, they used to cry out that they are "_____ing off again" (usually "blasting off"). It was a normal
* Team Rocket's plan for world domination involving capturing Legendary Pokemon with powerful Poke balls/
* Team Rocket's. They're for the well-behaved Pokémon that they plan to sell and come with actual plants, trees, and soil, along with a large pond for Water-types and skylights that allow natural light in. But, as nice as the accommodations are, the metal walls make it abundantly clear that it's meant to confine them.
* Team Rocket, such as making sure a Skitty he met got to May since he knew its life would consist of getting sent flying a daily basis.
* Team Rocket thugs have broken into a Pokémon nursery to steal the eggs, but their Drowzee misses the young girl currently on watch. That was their first mistake. Their second was assuming a rich-looking girl with no Pokémon of her own would be easy to cow. Weiss Schnee draws her sword and disabuses them of that notion rapidly.
* Team Rocket trio did this for a good portion of the Unova arc. When things start going too far south, they get the heck of there instead of fighting until they're sent blasting off. It's worked much better for them.
* Team Rocket, when their boss gives them an actual serious assignment.
* Team Rocket Wins anime, Team Rocket did win a fight against Ash legitimately.
* Team Rocket Wins: Ineffectual villains manage to achieve a minor victory.
* Team Rocket Wins moment at the end of "A Message To Gracias". While delivering a message to General Gracias, Speedy initially has Sylvester tied up, then finds out the message was a birthday greeting.
* Team RWBY expains to Pinot, a snobby Devon Corp. scientist, why they use metal cages to hold Grimm: unlike force fields there's no battery to drain.
* Team RWBY make themselves into this after their attempted attack on the White Fang goes disastrously wrong. So much so, that Ozpin launches his own PR campaign to bring up Team RWBY's reputation.
* Team RWBY versions of Burnie, Gus, and Joel. Ruby's reaction is to yelp out "Ew, boys! Ew ew ew ew ew ew ew!" and run away backwards. Should be noted that Ruby is 15, long past that sort of thinking.
* Team Selina deal with life post-Presidency, with Selina trying to publish her memories and open a Presidential library.
* Team Selina trying desperately to engineer a win in the election tiebreaker vote in Congress.
* Team Service Announcement is just a daydream by the Pyro, hence why his airblast was so powerful. Powerful is an understatement, really, as whoever got blasted by

it was not only extinguished but becomes rich, a king, and gets tons of women and a dancing posse.
* Team Service Announcement of the MtM taunt because so many people were buying it to replace it.
* Team Service Announcement showcased in "Sentry Knockback" an Ubercharged BLU Heavy was pinned against the wall by a RED Engineers' Sentry, only for the Ubercharged BLU Medic to come in and dance in front of the Sentrys' guns to allow his Heavy to get back to his feet again and simply punch the distracted Sentry.
* Team Service Announcement, which, well, is pretty much just the same clip over and over again.
* Team Service Announcement, willfully standing on a sticky-mine trap.
* Team Seven as a whole (in addition to each of the individual members) also gets some notoriety as "The Lucky Sevens", which refers to their
* Team Silent, the vaguely-defined group of individuals responsible for the first four
* Team Skull whereupon running into two recurring identical male grunts, the player is asked if they remember them. Upon answering yes, one of the Grunts will remark "Even though we look identical? That's kind of impressive, actually!" The likewise is also true, should the player answer no, the two Grunts will wonder if you were confused because they had switched places (Grunt A usually being on the left and Grunt B on the right), making yet another joke about the fact that they are identical.
* Team's libero Nishinoya uses similar sound effects when he tries to explain how he receives perfectly. His teammates point out that he sucks at explaining because it's all instinct to him.
* Teams Magma, Aqua, and Galactic can also be classified as this, but those organizations have shifted from the more
* Team SMASK macro fanfic), to test John to see if he wants to enter the league of evil characters, he is told to shag the Racnoss. He complies.
* Teams playing a single forward require a striker who can do everything. The 'lone striker' or 'target man' is required to hold the ball for his team to arrive from defence to support, to play in other attackers, while also getting into positions to shoot at goal.
* Team Starkid allowed the audience to choose names for the main characters, which of the family will die at the end and the method of their death.
* Team StarKid, all three influences being extremely blatant. As of 2018, they've abandoned the musical parody genre.
* Team StarKid, and Ron Weasley recently made an appearance as a background dancer.
* Team Starkid make a video for April Fools almost every year about puppy-kittys to the chagrin of the fans who keep an eye on their page
* Team Starkid Members - the various crew members who constitute the team
* Team StarKid set in a world where all famous films have been overshadowed by their Broadway musical adaptations.
* Team Starkid, specializing in musical comedies, most often parodies, which they upload on YouTube.
* Teams that have decided to tank have been known to trade away important players in a bid to lose games. The weirdest version of this came in 2019, when the Miami Dolphins traded away basically everyone of note (including safety Minkah Fitzpatrick, who promptly turned his new team the Pittsburgh Steelers into one of the league's best defenses) and ate up $66 million in dead cap space (
* team still proceed to go and save people to give them a future, at the cost of their own lives, just like the original. John himself lampshades it why he feels mourning for it, with Hawkwoman commenting that it was because they were heroes.
* teams up with Team Free Will in season 7; as well as having a name drop in season 6.
* Teams will often upgrade to spraying champagne all over the locker room when they clinch important postseason milestones like making the playoffs or winning the World Series.
* Teams with multiple Soldiers can end up looking like a MMM. This was so

prevalent in the Soldier versus Demoman update that some servers
* Team Taiyou is probably the biggest example in the franchise. "Budget" doesn't begin to describe their decks, which are mostly made up of
* Team Taiyou's when they get caught and are chased around until dawn.
* Team Tetsuo, rather than Sakura and Sasuke do the Genin Exam and have Naruto, his favorite student, held back another year if they fail, Tetsuo decides to pass them on the spot so he could take them on months-long training trips to whip them into shape to get Naruto to the Suna Chunin Exam. Although in his defence, he was getting the Rookie of the Year and Top Kunoichi, so he assumed that he'd just need to shape them up a bit.
* Team Twerp cannot help but get completely lost on too many occasions to count. It gets ridiculous when you realize that at some point in their journey (throughout the
* Team Umizoomi compartments, and as much strength as the plot demands.
* Team Umizoomi could be considered a team of Lilliputians. Bot is a non-"human" example.
* Team Umizoomi. He can go from guarding doors to guarding bridges to even capturing sharks. So far he's doing a good job at it.
* Team Umizoomi regularly has live actors interacting with the computer-animated characters and environments.
* Team Umizoomi, "Robo-Tools", "The Sunshine Fairy", and "Little Panda Joe" are the breather episodes of Season 4, which introduced the show's most prominent villains, the TroubleMakers.
* Team Umizoomi. When that was done, he inverts it altogether by never stealing shapes again.
* teamup. Bonding with Goku's son Gohan while training him cements the end of Piccolo's grudge.
* team-up films, in which they started getting theatrical premieres instead.
* team up lore would establish that Samus and the Space Pirates hate each other so much that they would never consider teaming up, even against bigger threats like the Ing or Dark Samus.
* Team-Up Series: A crossover involving heroes teaming up to face their collective enemies.
* Team weeks are often disliked due to the game sometimes being slowed down by twice as many interviews and teams conferring over what letter to call. In addition, the house minimum during these weeks is $2,000, which is awfully generous when you consider that the basic Wheel template is only $500-$900 outside of the top dollar value. Even during the Final Spin where $1,000 is added to the value spun, one consonant on any value except the highest one will give you less than said minimum. Also, the first Toss-Up is still worth $1,000 which is not raised to the minimum itself, which results in several games where a team who solves only that puzzle ends up awkwardly having their final score raised to $2,000 at the tail end of the game.
* Team Wondercute, an entire team of Adorable Badasses dedicated to 'defending cuteness' and are the terror of the combat simulation exercises. Not surprisingly, Jade is pretty much their
* Teamwork allowed it to be averted. The Spanish, for example, developed a formation called the
* Teamwork Puzzle Game: A game in which the player controls a group of characters, and progress frequently depends on puzzles making use of this fact.
* Teamwork Seduction: Two characters team up to attract someone's attention.
* Team X by their employers make the exact roster, especially at any one point in time, uncertain).
* Team Xen Admin Nastasia is cold, cruel, and completely remorseless in regards to her involvement in terrorist attacks; making even her coworkers question why she is so ruthless. It is later revealed that
* Team Yankee are fired and he becomes competent under fire. One of his buddies from OCS shows up later and fails to follow his example — the men bet on how long he'll last and he's severely injured when his tank is hit by a "Hind"-launched

anti-tank missile.
* Team Yankee at one point sees the eponymous team defending a hill behind Soviet lines when its plan of attack goes drastically awry.
* Team Yankee explores how the Iran-Iraq War would've developed if NATO and the Warsaw Pact got more heavily involved.
* Team Yankee, set in the same scenario, which focuses on a U.S tank company.
* Team Yankee, the eponymous team is named for the phonetic letter Y, while its sister unit, Team Bravo, is named for the phonetic letter B. The phonetic alphabet is also featured prominently during radio communications.
* Team Yankee The story is centered around an American tank platoon in the Battle for Germany. The Soviets Start It.
* Team Yankee, the tankers of the eponymous team adopt the practice of painting a white ring around the barrel of their tanks' main guns for each enemy tank destroyed. They are inspired to do so by a German World War II veteran, who mentions the real life practice noted below.
* Team Yankee, the titular unit encounters a company of combat engineers during a night march who are repairing a bridge they need to cross. When the repairs are completed, the engineers direct them to cross the bridge one tank at a time so as not to cause additional damage. Engineers are also sometimes mentioned as having prepared defensive positions the team is occupying, such as during the defense of the Langen Gap, where a company of engineers also lays mines and digs an antitank ditch prior to the battle.
* Teana and Subaru both go to visit their dead loved ones (parents and older brother for the former, and mother for the latter) in the fourth
* Teana arrives to visit the hospitalized Subaru, loudly telling her that they'll go buy her some hot soup from the cafeteria.
* Teana, meanwhile, is a heroic example, using invisibility and projected images to confuse foes on the battlefield.
* tean zu involves several strips of bamboo placed between the fingers. It has been depicted in several period dramas. Also removing fingernails. It was also used by the Japanese.
* Tea Party Express leader Mark Williams once called Allah "the terrorists' monkey god". (
* Tea Peter ("Giraffity!"), Quagmire promptly denies that the baby is his.
* Tear-Apart Tug-of-War: Two or more characters are fighting over an object, tugging it back and forth until it rips or breaks.
* Tear, at various points, puts an entire house to sleep, slits a man's throat with a throwing knife, and takes a hit for someone with much higher defense. In battle, the sleep spell only affects one target, her knife based attacks are pitifully weak, and her defense is among the lowest in the party. She's still very good, just not at what the cutscenes would suggest.
* Teardrop sends Woody flying through the air in the first episode of
* Tear has very potent healing spells that cover a wide area and can use Resurrection. However, her offensive spell pool is extremely powerful and she gains a unique accessory that easily makes her the best offensive spellcaster. Her melee artes are limited but have their uses, so she can easily go out on the offence.
* Tearing a character's face off with one hand (complete with pun about trying to save face).
* tearing one of his smokestacks off his shoulder and stabbing it in said goon's face. He bought the time to even come up with this plan by grabbing his stacks of Autobot badge awards off the shelf and using them as improvised throwing weapons; why they were given such sharp edges is anyone's guess.
* tearing planets apart. By that point it wasn't inhabited, but still.
* Tear It Up and Throw It Away", which was cut late in the off-Broadway rehearsals. Originally performed early in the first act, between "What Do You Do with a BA in English?" and "If You Were Gay"; Kate is called for jury duty, and Nicky advises her to ignore the summons, pretending it was lost in the mail. ("Your civic duty? Who gives a doody?") Kate tears up the summons and is ticketed for littering. The number was cut during off-Broadway rehearsals because it had no relevance to the

plot, and because, according to puppeteer Stephanie D'Abruzzo, there was no judicious way to dispose of the paper scraps until the intermission, nearly a full hour later. The cut came so late that early promotional materials included references to the song, and its main melody can be heard underscoring dialog in "The Money Song" on the original cast recording. It was included on a CD that accompanied the original souvenir program, but not on the cast recording.
* Tear Jerker and more comedic. The episode's premise is a lover's murder/suicide pact, which two ghosts are trying to get Mulder and Scully to re-enact.
* Tear Jerker at a railroad crossing: A young family heads out to have a picnic, leaving their family dog behind to wait for them to come back on the front porch, unaware that this would be the last time their dog would see them, as the father approaches a railroad crossing that has no red warning lights, bells, or crossing gates, and a train is coming. He tries to beat it, and we all know what happens next. Cut back to the dog, still on the porch, waiting for his owners, unaware they are never coming home, all while "O Where, O Where, Has My Little Dog Gone?" plays in the background.
* Tear Jerker books. The Manticorans unleash a massive missile volley against a Solarian fleet, after the Solarian commander repeatedly refuses to surrender. After the first wave of missiles vaporizes the lead ship, the Solarian second-in-command tries to surrender, only to learn that the FTL comm the Manticorans had been using to talk to her can't interface with the missiles, and there isn't enough time to call the missiles off before they hit.
* Tear Jerker character once lived. He finds her bed piled high with flowers, and sees footprints in the dust - and the tracks of the giant wolf who walked away.
* Tear Jerker didn't want to go through with it, but they were scared and desperate.
* tear jerker (double the empathy objects). He expresses regret (such as he can feel) that he cannot share in her feelings of love and she responds that she will try to feel it enough for both of them.
* Tear Jerker effect when Rose and John meet in person for the first time.
* Tear Jerker. Even the most active of Hip-Hop haters will feel some sadness.
* tearjerker example: in 1939, the great New York Yankees first baseman Lou Gehrig had been experiencing periodic weakness and loss of muscle coordination but tried to ignore it. One day during a game, he fielded a routine grounder and flipped the ball to the pitcher covering first base, ending the inning. As Gehrig made it back to the dugout, his teammates showered him with praise, patting him on the back and congratulating him. Realizing how badly he must have been performing if such a routine play earned so much praise, he quit the game. Soon after, he was diagnosed with ALS, a disease now commonly referred to as "Lou Gehrig's Disease." It would kill him two years later.
* Tear Jerker example occurs. Clark simultaneously experiences this with an Anguished Declaration of Love, when he realizes that he loved Alicia while trying to rip the head off her murderer. Despite having already been hit hard by her death, this realization, and the fact that he will never get a chance to tell her (knowing she reciprocated) completely breaks the future Man of Steel.
* Tear Jerker, he pleads with Sora to stay with him in the Hundred Acre Wood; Sora reassures him that "I will always be with you, right here", pointing out that he'll always be in Pooh's heart.
* Tear Jerker in that Bart's co-creator Mike Wieringo died of a heart attack a few months later.
* Tear Jerker is about a much-publicized incident in which a single mother abandons her four children, forcing them to fend for themselves, and one of the children is killed by a sibling's friends. The film can be seen as a subversion of this trope, as the real-life incident is more brutal than what is depicted on film.
* Tear Jerker moment, Red Star was revealed to have lived in exile his whole life in a compound built to contain him after he accidentally destroyed half of his hometown.
* Tear Jerker mostly out of desperation to cure his son of his disease.
* Tear Jerker. Several characters die throughout the movie, and it ends with the

three surviving main characters walking along the beach and they imagine being reunited with all their friends who died of AIDS. Then it cuts back to the three of them alone, wondering if a cure will ever be found.
* Tear Jerker: Some operas, especially ones by Puccini, seem engineered specifically to be as heart-rending as possible.
* Tear Jerker that makes sense for what House is like, but again not confirmed by writers.
* Tear Jerker, when Sam realises Frodo intends to leave and not come back.
* Tear Jerker. When the Apollo 13 command module lost all long-term power and had to be shutdown for an emergency flight home in April 1970, significant water condensation built up inside the spacecraft. Thankfully, there were no electrical shorts when the command module was restarted from battery power as the crew prepped the spacecraft for its reentry and splashdown.
* Tear Jerker, when the protagonist finally meets his beloved mother (who tragically died) in a dream:
* Tear Jerker, which is unusual for Paisley's standards, but not so much for Krauss'.
* tearjerkingly brilliant and no other crew member. The life he lived involved getting married, having a family, and other things he's never made time for - taking it from a disturbing experience to something he sees as a gift.
* tearjerkingly moment after, it's made pretty clear that he would have died out of depression.
* tear-jerking Sherlock Holmes, but that Sherlock Holmes no longer exists. As for Holmes's response to her pleas, it doesn't get much colder than this:
* Tear Off Your Face, the half-troll Ogmund tries to get away from Odd by sinking into the earth (as trolls can). Odd gets hold of Ogmund's beard and rips "off the whole beard with the skin underneath right down the bone, including the entire face and both cheeks".
* Tear Of Grace, each of them between ten and twenty minutes long, with his longest series having over 300 episodes.
* Tear of Grace videos where he throws an Uruk off a sheer cliff for refusing to introduce himself before or during their fight.
* TearRing Saga reverts back to Ballista which are customizable with different ballista providing different ranges and different ammunition providing different effects. Moreover, Ballista not only have to be facing a certain direction, but have a cone of fire with where they are aiming (this is to not make them overpowered with having too much range in a hexagonal based strategy game).
* TearRing Saga The story ends with the two protagonists, Runan and Holmes setting off on a voyage in search of another adventure along with their love interests and a couple of friends. The last scene of the game is of their ship, the Sea Lion sailing off to unspecified destination.
* Tears for Fears As the movie became a cult hit, the song became popular enough that it was rereleased successfully as a single in 2003. It reached number 1 in the UK because of this. Since then, it has appeared in dozens of shows and a handful of commercials.
* Tears for Fears: Besides a brief shot of a framed photo of the band, Roland Orzabal and Curt Smith are completely absent from the "I Love You But I'm Lost" music video.
* Tears for Fears documentary, Orzabal acknowledges that Smith was physically attractive.
* Tears for Fears: In the "I Believe (A Soulful Re-Recording)" music video, Curt Smith only appears thrice for a few seconds; he hits a triangle the first two times, and in the third, he's dressed to the nines in a tuxedo while he taps his champagne glass with a knife. It's an early sign that he's gradually being pushed aside by Roland Orzabal from the band's creative process.
* Tears for Fears in the song "Sowing the Seeds of Love", this is how angry protesters express their dissatisfaction towards a politician: "There's egg on your face and mud on your shoes".
* Tears for Fears, it's worth noting that astrology confirms that Cancerians

(Smith's sign) and Leos (Orzabal's sign) have opposite temperaments.
* Tears for Fears"Let it all out! These are the things I can do without, come on! I'm talking to you, come on!"
* Tears for Fears" ("Lucy's sign is the Chinese dragon, oh") even though that song wasn't included in the group's discography until the 2020 super deluxe edition. This dragon has no legs and its wings are fan-like.
* Tears for Fears' "Mad World" sees himself as this. It's arguable whether he actually is.
* Tears for Fears" music video, Curt Smith's character is at the back of the room gazing out the window instead of joining the festivity that's taking place in the foreground. It's a visual shorthand that he suffers from depression because he obviously doesn't want to socialize with anyone, preferring to sulk on his own than potentially ruining the merry mood of the guests (who don't seem to care about his emotional state).
* Tears for Fears" music video has an extremely vivid blue tint to highlight the laboratory setting that the young girl is trapped in while she's being monitored by scientists.
* Tears for Fears" music video, lead singer Curt Smith drives an antique mid-1960s Austin-Healey 3000 Mark III convertible sports car that was painted in British Racing Green.
* Tears for Fears" music video, Roland Orzabal spends most of his screen time shirtless.
* Tears for Fears" music video, there's a scene where two people behind Roland Orzabal are wearing large, bulky gas masks for some bizarre reason — everyone else in the library can breathe the air normally.
* Tears for Fears: Near the beginning of "The Way You Are" music video, the Steinberger logo of Curt Smith's bass guitar is displayed clearly in the middle of the screen.
* Tears for Fears of "Shout") is "The devil has the power to assume a pleasing shape".
* Tears for Fears's "Then Came the Last Days of May", and the former was impressed enough that he immediately asked the latter if he wanted to be the lead singer of his band. Curt replied yes, and the duo became best friends and musical partners from that point forward.
* Tears for Fears: The message of "Sowing the Seeds of Love" is that love can solve the world's problems.
* Tears for Fears", the narrator's loved one has terrible chronic pain, and the patient wants to undergo euthanasia to end their suffering.
* Tears for Fears: The song "Swords and Knives" features the verse "And it's sad love's not enough to make things better".
* Tears for Fears tying in with the album's denser, more organic sound and even more eclectic style.
* Tears for Fears who have compared their bromance to a marriage (plus their 9-year-long separation to a divorce), it's unsurprising that their friendship break-up songs are no less passionate or poignant than those that are about a romance gone sour.
* tear. Since Theresia hasn't been seen in over a hundred chapters, it's safe to assume Guts is safe from her revenge.
* tears Just when it seems to have worked, it grabs her by the top of her head and nonchalantly chucks her over its shoulder.
* "Tears of a Clooney" features Stan chaining Francine to stop her from killing
* Tears of a Dragon, series, the protagonists visit an alternate dimension where all the former dragons are trapped in a time loop of a single day with no memories outside their present experience of that single day. They eat the same food, go to the same town meeting, go on the same dates—by the time of the story, they have been doing this for years on end without realizing it. Since they are the only ones who realize what is happening, it is the main characters’ goal to rescue the inhabitants of the somewhat misnamed "Dragons' Rest".
* Tears of Blood: A person's death is signified by crying tears of blood.

* Tears Of Epoch. They, unlike the Shades, are formed using sunlight instead of darkness, but are also formed out of nightmares and ill omens. It is said that the only way to take down a Chroma and even defend a Chroma attack, is to believe in dreams that are actually beautiful and happy, as opposed to ill and dark. It is even witnessed by Ernaut that if a victim is attacked by a Chroma, they eventually become infected and mutate into one.
* Tears of Joy (and relief) into Luke's chest when she finds out her father Richard, who had been rushed to the hospital, is going to be okay.
* Tears of Rage! In story, Liliana also sheds them when Gideon sacrifices himself to save her....and Nicol Bolas reacts with a smug smile.
* Tears of Remorse: A character, grieved by their own guilt, cries. Tears might wash the guilt away. Crying is self-soothing.
* Tears of Remorse: Crying because you genuinely feel bad about what you've done.
* Tears of Remorse he's in afterwards, show that he is not a simple cold-blooded killer and is really not built for the profession that he's in.
* Tears of Remorse: When a character cries over a horrible thing he's done.
* Tears of Steel; because the film and its assets were open source, it was possible for a team of Chinese students to obtain the original CGI files and edit in the live action parts with Chinese actors — but as they weren't capable of changing the CGI files on a large scale, they had to do each scene shot for shot.
* Tears of the Black Tiger at Badmovies.org describes it as "probably the best violent cowboy shoot 'em up ever made in Thailand."
* Tears of the Sun — the team's point man at the river crossing calls for everyone to stop and get to cover because he hears something approaching through the foliage. Upon seeing that it's just a wild pig, he calls away "all clear" and stands up... right in time to eat a sniper's bullet from across the river.
* Tears of Vengeance, Ranma takes revenge on Nabiki's rapist by dousing him with water mixed with an instant packet of Nyannichuan and drops the now-female rapist in the worse part of town.
* "Tear-Stained Letter", one of only two big hits for Cajun-country singer Jo-El Sonnier, is a cover of the
* Tears to Tiara 2 a floating city that has walls that can be raised above water or sunk below, cast its own magic, and communicate with words on a central pillar.
* Tears to Tiara 2 allows you to retain all the equipment and cor (currency) you had in the save file as well as all the skill books you have bought throughout the entire playthrough of that file.
* Tears to Tiara 2 arguing with Kleito over worshipers, usually Hamil. Then it's revealed that the lack of worshipers had caused the rest of the Ba'al gods to fall into a coma, and she is trying to wake them up. She succeeds and in the climax they save her life.
* Tears to Tiara 2 as bait when she intercepts the party on the high seas.
* Tears to Tiara 2. At one point the party decides to let themselves be captured by slavers. The girls disguised themselves, with some magical help, so they will be kept on the same ship as the guys.
* Tears to Tiara 2, before Tart points out to him Charis is going to follow him on his suicide charge, all cheerful and smiles. He stops himself to not get her killed.
* Tears to Tiara 2 everywhere as her bodyguard. He fools everyone at first sight and makes the goddess of war and barbarian princess complain about how to be ladylike.
* Tears to Tiara 2, Hamil dreams of the forging of the swords of Melqart and Tanit over a thousand years ago.
* Tears to Tiara 2, Hamil was apparently under the impression that the religious rituals he performed to summon divine reinforcements for war meant he's married to the goddess Ashtarte. She didn't think so. Not that she's complaining once she found out.
* Tears to Tiara 2 has seen much better days and he's determined to return it to its former glory.
* Tears to Tiara 2 has the emperor's praetorian guard legions, both in game and in

story. If not careful they can take out a tank character in two or three hits.
* Tears to Tiara 2 raises the battle cry of Ashtarte, and all Canaanites at the Ba'al Festival follows suit. This empowers Tarte, which prevents both her and Hamil from being burnt alive.
* Tears to Tiara 2. She's curious because she's a God/Elf and spends most of her time living underground.
* Tears to Tiara 2, teaches combat, magic, and leadership skills, and even serves as a place to recruit new members.
* Tears to Tiara 2: The Goddess Ashtarte summons one in the form of Elven elephants and Taros.
* Tears to Tiara 2 transforms into her dragon form and shoots the Flames of Creation from her hands.
* Tears to Tiara 2 until she sings. Not that she was actually in any danger by that point.
* Tears to Tiara 2, which also supplies her with magic and allows her to teleport within city limits.
* Tears to Tiara 2, with his cowardness and every-failing quest to get girls.
* Tears to Tiara, a former imperial officer, with Morgan as the fake prisoner. It would have worked, if it weren't for the fact that the unit that Octavia associated herself with was known to have been destroyed a long time ago.
* Tears to Tiara: After declaring war on the Empire, Arthur orders his men to burn their hometown down so they will march onward to conquer a new home.
* Tears to Tiara also has a Classical setting, this time around the Western Mediterranean and Phoenician culture.
* Tears to Tiara he accidentally marries Octavia because he grabs her hand, bringing him to four. At the rate he's going, everyone on earth is going to marry him, apparently.
* Tears to Tiara hints that this coronation would be coming. Also, his name and any basic knowledge of mythology.
* Tears to Tiara is strongly associated with holy powers, which makes its more moderate members like Gaius and Octavia uneasy.
* Tears to Tiara, non-humans on your team are affected whenever the bad guys use Obelisk to unleash the "holy" aura Gravitas.
* Tears to Tiara power, she tied the string to the wrong finger, meaning the two of them actually made out without its spell in effect.
* Tears to Tiara's Master Ogam. While he spends much of the early episodes as the calm and serious old guy, it's not long before he breaks out his MAGICAL POWERS and blows up an ogre.
* Tears to Tiara, so when Arthur is the first mortal EVER to scratch him, he freaks out. Ironically, his second form is butt ugly.
* Tears to Tiara', though this is more of an allusion to mythology (it's set in Britain during the Roman invasion) than a lampshading.
* Tears to Tiara, when Gaius of the Divine Empire tries to take Avalon, where the demon king Arawn is at.
* Tears to Tiara, whose civilizations were destroyed by the heavens, but evidently a not insignificant population of each remains. The more powerful lineages of these races are worshiped as gods by humans.
* Tear Up the Contract: A primitive but sometimes effective way of undoing an agreement the character no longer wants.
* tease" at best. Much pointing and laughing are probably involved here.
* Teased at this in 1990 during his feud with Earthquake. To allow legit injuries to heal and to tend to movie-making projects, Hogan,
* Teased when Freeza is trying to hold off the Spirit Bomb before ultimately being averted.
* Teased with Awesome: When a video game gives you awesome gameplay elements only to take them back immediately.
* teaser ad, which later appeared on the compilation of music videos for that album.
* Teaser and the Firecat, had no singles at all, but the pop-influenced "Sitting"

and "Can't Keep It In" propelled the album to #1.
* Teaser EquipmentShopkeepers in video games sell powerful equipment, but you won't be able to afford them until later.
* teaser plays Woody's outgoing message, which Sam says (in the message) is stupid. The caller is revealed to be Woody, who now agrees that the message is stupid.
* teaser trailer, Mike opens a child's locked closet door using a key card.
* tease the male Avatar about him wanting to peep on her in that same talk.
* teasing a suicide attempt twice: once by standing on a stool with a rope, only to reveal that he's hanging not himself, but a cage for a pet scallop, and another by putting his head in an oven, only to pull out brownies. Both false attempts are prefaced with "I just can't get happy."
* teasing finally has Yang and Darrel kissing in Chapter 27, much to the relief of the readers, if the reviews are anything to go by.
* Teasing Master Takagi-san, a spinoff depicting Nishikata and Takagi as a married couple raising their daughter Chi, Chi is pretending to be a princess, prompting Takagi to suggest getting her dad to give her a "princess carry". However, because Chi is in kindergarten, and thus much smaller than her dad, it ends up looking more like a "baby carry", much to Chi's embarrassment when her parents point it out.
* Teasing Master Takagi-san the protagonist has an adorable "war" going with his cute classmate, with each of them trying to get the other to blush and react to their antics. It's very obvious she is always going to win every single one of these contests, although "failure" is a relative term when you have the cutest girl in the class paying this much attention to you.
* Teasing Master Takagi-san, the protagonist Nishikata is constantly teased by his cute classmate (the Takagi-san from the title) and more often than not winds up blushing like mad or is otherwise outsmarted. He tries to get his own back, but whatever plan he comes up with either has a glaring flaw he fails to notice until it's too late, or Takagi-san turns it against him. Takagi-san genuinely likes him, but she just enjoys watching his over-the-top reactions. (Yes, you will probably die of diabetes if you read this manga.)
* teasing them. Notably the contentious episode "Bats!" was praised when it was accidecanlly credited to McCarthy, only to be condemned once the actual writer was revealed.
* Teasing the Substitute Teacher: I like to bully substitute teachers!
* Teasing the Substitute Teacher: Students mistreat their substitute teacher.
* Teasle, as a Korean War veteran like in the novel (and technically a fellow military vet in general like Rambo and Trautman), was presumably responsible for many noble actions on the battlefield to be hailed a
* Teatime Racers has a bonus video where the anthropomorphic food and drink characters sing a song about wanting to be eaten and drunk.
* tea without milk whilst posing as working-class Brits. That would be seen as a little odd today. In the '40s and '50s, you may as well have turned up with a sandwich board saying, “I’m a spy.”
* Tea With Seira is a very long story where the titular Seira really doesn't want to commit genocide but ultimately authorizes the complete extermination of humanity.
* Tea with the Black Dragon, during Martha's first conversation with Mayland Long, he tells her a version of the tale of Thomas the Rhymer, which continues past the usual ending point to talk about Thomas' son. When he finishes, she remarks that he tells it with such authority she could almost believe he'd had it from Thomas in person.
* Tea with the Black Dragon is a contemporary cybercrime adventure story, but the dragon of the title is not just a metaphor.
* Tea with the Black Dragon, Mayland Long infiltrates a building to investigate one of the villains. As he exits an elevator, he hears someone shout "Hold it!" ... but she just wants him to hold the elevator for her.
* Tea with the Black Dragon, the villains start out with non-violent cybercrime. When an audit threatens to expose the money they've stolen, they commit other crimes to cover their tracks, including kidnapping the mother of an accomplice

who's planning to go to the police. The hostage refuses to co-operate, and one of the kidnappers loses his temper and attacks her, apparently killing her. Finding themselves on the hook for one murder, they decide they might as well keep going, and plan to murder the accomplice as well, along with a friend of the family who has been investigating the kidnapping.
* Tebow's situation was actually pretty similar to Anna Kournikova's, of all people. A solid competitor but hampered by serious flaws (weak arm, can't handle speed of NFL/bad control, injury-prone), came along at exactly the right time (fans looking for a role model in troubled league/Internet just starting to really take off) became insanely popular among a certain section of the fanbase (evangelicals/horndogs), genuinely tried to improve, couldn't, finally hit rock bottom (0-7, 1 interception, 0.0 passer rating/clobbered in first round of US Open), and quickly faded into obscurity with little fanfare. There were other openly devoutly Christian QBs before (Kurt Warner and Jon Kitna), during (Philip Rivers) and since (Russell Wilson) Tebow's tenure. but none captured the imagination of the faithful on the basis of his faith like Tebow.
* Tecate beer is common for this trope, as it is one of the few beer brands that will pay for product placement even when characters use it in this way:
* Tech 10 Rebooted has basically given up on people and the law, but fights as hard as he can for what he sees as justice.
* Tech 10 Rebooted, Tech fights for what he believes is 'justice', and will straight up ignore the safety of people or the upholding of the law in order to accomplish his goals.
* Tech Bro: A guy who works in a tech company or has a tech-affiliated job, but is nonetheless jockish.
* Tech Bro: Wild party last night, dude? What do you mean our tech screwed over a bunch of people?
* Tech Demo Game: A game that has such high hardware requirements, it's almost like a tech demo for said hardware requirements. It can also refer to games that make an obvious push to show off power (such as a game for a video game console).
* Tech. He was exceptionally good at his job, becoming the information baron of a hive, due to his mentality of a cad combined with his thought processes being that of a computer.
* Techies aren't so much of a Troll personality-wise, but gameplay-wise, they
* Techies They may be hot wiring the terminal or disarming the bomb while the rest hold off the baddies.
* (techinally Furry Online Comic), having debut in 1986 on CompuServe, and also the first online comic to receive some media attention.
* Tech Infantry, although all starships have standard electromagnetic deflector shields that protect them from micrometeorites and induced cosmic rays when traveling at a substantial percentage of light speed. Some of the larger warships have gravity-based shields created by their gravitic drives, but these are of limited utility, as it's hard to shoot out through a zone of such intense gravity that it can bend weapon beams away or crush incoming missiles.
* Tech Infantry and becomes an uninhabited backwater system, even for humans.
* Tech Infantry, but adds Guardian Bugs and Emperor Bugs, gigantic guards and mates for the queen; Drones, a tougher version of Workers that can fight by trying to bite enemies, and gives the Warrior bugs and larger castes the ability to use magic.
* Tech Infantry, but are (of course) also completely mind-controlled by the Caal.
* Tech Infantry called New Israel on the ruins of the former Christian Federation planets.
* Tech Infantry, carrying on the tradition of endless civil war from the other side of the barbed wire. Meanwhile, the Vampires, Mages, Werewolves, and other supernatural creatures continue their private and not-so-private power struggles as usual.
* Tech Infantry caught in the middle or used as cannon fodder by both sides.
* Tech Infantry driven insane by the planet's natural anti-magic field. A planet that drives BUGS insane is not a nice place to serve out a life sentence, however

brief that may be.
* Tech Infantry, early in the backstory, a centuries-long Masquerade was broken by the Bug invasion of Brazil, and the existence of Mages, Vampires, and Werewolves was revealed to the masses in the ensuing War of Gehenna. For the rest of the story, magical and non-magical humans live alongside each other and jointly battle aliens, although only the magical ones are subject to compulsory military service.
* Tech Infantry, especially in later seasons, when Earth has been devastated by an asteroid strike, abandoned, partially re-colonized by rebels against the now inaccurately-named Earth Federation, then effectively destroyed. Mars and the asteroid belt remain important industrial centers, but Earth is a burnt-out cinder whose top several miles of crust melted to magma when the Moon was blown up and the fragments rained down over several years. The Earth Federation moves its capital to the garden planet of Avalon, then to Wilke's Star, and pretty much never looks back.
* Tech Infantry, every battle in the story is one of these, if not an outright defeat. The first Jurvain invasion of Rios is destroyed, at the cost of a jump gate, then a rebel attack is driven off with such heavy cost in Council Loyalist ships that when a second Jurvain invasion comes in, there's effectively nothing to stop them. The rebel fleet attacks the Federation capital in Avalon, and is again driven off at the cost of such heavy Federation casualties that future offensive operations against anyone are impossible. And the Vin Shriak is defeated, at the cost of so weakening the Federation that they are powerless to resist a subsequent invasion by the Eastern Bloc and their alien allies.
* Tech Infantry expansion pack in the mid-1990s, still has a couple of people writing short stories set in that universe today.
* Tech Infantry has a dinosaur-killer-sized asteroid dropped on earth in the backstory. After the Earth partially recovers and is just starting to be recolonized by rebels against the main human government, said government sends in a fleet that blows up the moon, first by firing several small black holes through it to weaken its structure, then ramming it with a miles-long starship moving at 90 percent of the speed of light. The shattered fragments of the moon rain down on the surface of the earth, melting the top few miles of crust into a continuous layer of molten lava, boiling off the oceans, and blasting the atmosphere away. A few decades later, some nasty aliens invade, and the invasion is only stopped by using Dooms Day Devices to send the suns of the main alien homeworlds into supernova.
* Tech Infantry has an epigraph quote either from a real or in-universe fictional work of literature, poem, song lyric, or a pithy quote from an in-universe fictional character. The title of each "episode" (four acts) is taken from the epigraph to the last act of that episode. Which means the episode title, and by extension the fourth-act epigraph, is chosen before anything beyond act one of that episode is written.
* Tech Infantry has Avalon, a paradise of a planet thanks to liberal application of Life Magic, and the new capital of the Earth Federation after Earth itself is destroyed.
* Tech Infantry has Colonel Arthur Clarke, commanding officer of the Raptors, an elite military unit tasked with chasing down and arresting (or killing) draft-dodging Werewolves and Mages, as well as other secret operations. His successor, Colonel Andrea Treschi, is quite the badass himself.
* Tech Infantry has Jennifer's Star, named for the girlfriend (and later wife) of the guy who originally created the game.
* Tech Infantry has Johanna Ingolfsson and later Xinjao O'Reilly as Number Two to Erich Von Shrakenberg.
* Tech Infantry has several cases of this, including Alpha Centauri, Wilke's Star, Jennifer's Star, and most of the rest of the planets, really, since if the planet isn't named for the star, the star is probably named for the principal inhabited planet.
* Tech Infantry has several cases of this, including New Tokyo, New Paris, New Chicago, and New Madrid.
* Tech Infantry has several, from Erich Von Shrakenberg (until he gets promoted to

Commodore and then Admiral) to James Welthammer (who technically is a rankless civilian, but commands a space freighter). Xinjao O'Reilly eventually gets his own ship to command as well.
* Tech Infantry has several, including the Raptors led by Colonel Arthur Clarke, the Red Scorpions, and Alastair Dimiye's Dead Boys Battallion.
* Tech Infantry has the Christian Federation, one of several rebel factions during the Third Civil War. There are also Crusader Teams who hunt Vampires in the Federation, and later in the Middle Kingdom.
* Tech Infantry has the Frontier Worlds Territory and a few other colony-world minor political entities who broke off from the Earth Federation, along with the various internal rebel groups who aren't so much interested in independence as in taking over the whole shebang for themselves.
* Tech Infantry has the Jade Flower and Emile's Pub, among others. The Rage fits the trope even more so.
* Tech Infantry has the magical sword Kuar, which grants you invisibility and increasing magical power, then sucks out our soul. There is also The Orb, a mystical artifact of untold power which is sought by the Caal.
* Tech Infantry has this scheme for newly-discovered planets, but once they get colonized and settled, places named things like "H4" get renamed things like "New Madrid".
* Tech Infantry has various bits of military and other hardware manufactured either by totally fictional companies (XTRON Labs) or fictional mergers (Boeing Airbus and Sukhoi Grumman build space fighters, for example).
* Tech Infantry has Xinjao O'Reilly and his engineering crew captured and locked in a storage room for tools and spare parts when their space station is seized by rebels. They waste no time in grabbing tools, using them to open access panels, and escape into the maintenance spaces inside the bulkheads. Lampshaded when Xinjao incredulously remarks on how stupid it is to lock up a bunch of starship engineers in the tool closet on their own space station.
* Tech Infantry. It greatly helps that many of those soldiers inside the armor are Werewolves.
* Tech Infantry named it for New Madrid, Missouri, and the earthquake-prone fault line that runs through it.
* Tech Infantry on what a stupid move this is, grab a bunch of tools, and escape into the maintenance passageways between bulkheads. They make life very difficult for the rebels controlling the station for a while.
* Tech Infantry spin-off project, set several centuries after the seventh season.
* Tech Infantry that leads to their conquest of the Federation after a civil war followed by alien invasion severely weakens it. Treschi becomes the right-hand man of the new Emperor, then orchestrates some elaborate court intrigue to ensure his puppet prince takes over when the Emperor dies, and Treschi becomes the true power behind the throne.
* Tech Infantry to change what everyone believes about how the universe works, and thus change the way the universe actually works.
* Tech Infantry to resourceful leader of a guerrilla band of engineers and admiral of his own private mercenary space fleet.
* Tech Infantry who are themselves very much Always Chaotic Evil. And any organization in this universe with "Security" as part of its name is guaranteed to be evil.
* Tech Jacket due to their weak bodies, but their helmets are retractable.
* Tech Jacket has the Geldarians pay for their stay on earth in lumps of gold, which he refers as "trash metal".
* Tech Jacket: Subverted, when the protagonist Zack Thompson and his Geldarian love interest Princess Lin start getting closer they are foiled by an unspecified incompatibility of genitalia.
* Tech Levels makes sense. Steel (TL 3) is still quite common as a building material today (TL 8).
* Tech Manuals away the reason why the gravity never seems to fail, even if the ship loses power. The reason is that systems generating gravity have to spin up

when powered on and keep going for several hours even if the power is cut off meaning that gravity disappears slowly rather than cutting off all at once.
* Tech-Marines are never made to feel welcome by either side they're loyal to. The Adeptus Mechanicus see them as mere cogs to the Machine God, and don't truly welcome them as members of the Machine Cult. While their Space Marine brethren see them as untrustworthy cyborgs. Hence they tend to work in isolation.
* Techmarines are Space Marines with a dual loyalty to both their chapter and the Adeptus Mechanicus, and are charged with maintaining their battle-brothers' equipment. On the tabletop they can repair damaged vehicles and bolster the defences of ruined structures, or since they're
* Techmoan”. Investigating a combination radio, record player and tape recorder released in Japan in the 1960s, Mat uncovers some patent documents with the application date “15th July 37” on it (“37.7.15”, as dates are written year-month-day in Japan) and spends several minutes speculating how a design using 1960s components could have been submitted in 1937. He speculates it was some incredibly forward-thinking futurist, and even goes as far as suggesting a time traveller sent the designs back in time to try and make money, before finally admitting he knows that the year on the patent was given in Shōwa (the number of years into emperor Hirohito’s reign), with Shōwa 37 being 1962 CE, and he just strung out the explanation as an excuse to delve into the history of tape recorders.
* Techmoan, still contains a tape erase head and a button for the record function, the latter of which is covered up by a piece of plastic on the front, due to it using the same cassette deck as the Technics M205 and M24 home stereo casette decks.
* Tech N9ne, 2015's "Hood Go Crazy" (featuring 2 Chainz and B.o.B.), which peaked at #90.
* Tech N9ne's "The Beast" contains the line "You in killer klown land / Face paint and Juggalettes with bubble butts".
* tech Nationalism. The anger created from conscription varies from high (as a Democracy or Republic) to moderate (Monarchy) to relatively low (Communism or Fascism).
* Technical: A small pickup, utility vehicle or a truck converted into a fighting vehicle, usually with a heavy weapon bolted on the cargo bed. Usually this weapon is a machine gun, but can just as well be a anti-aircraft cannon or heavy anti-tank rocket launcher.
* technical, basically a four-wheel pickup truck with a weapon mounted in its bed. It's quite speedy and maneuverable, and thanks to its heavy weapons (which have historically included things like rocket pods, anti-aircraft cannons, and turrets from proper fighting vehicles), it can be a terror to even armored vehicles if it gets the drop on them. It also has the armor of, well... a pickup truck.
* Technical consultant and former Marine captain Dale Dye has appeared in many of the war films he's worked on, beginning with
* Technical Death Metal and the Finnish band Demilich; arguably the two most unsettling examples.
* Technical Death Metal band Meshuggah, whose lyrics usually deal with complex metaphysical and spiritual themes, yet are rendered almost completely unintelligible by frontman Jens Kidman's brutal, Dalek-like shout.
* Technical Difficulties enemy from Kirby's past who hijacks the Halberd as part of his plot to get revenge on Kirby.
* technical difficulties in 'Let's Drown Out Assassin's Creed Brotherhood' video, Gabriel saved Yahtzee from a team of ninjas..
* technical difficulties), rather than something as mundane as a problem with a broadcaster's equipment.
* Technically, Aang is this too, since he is technically 112 years old on account of being frozen in an iceberg for most of that time.
* Technically, a better translation would be "of death that kills" if you want it to sound as silly as it does in its original language. Yeah... indeed.
* Technically, a faun really oughtn't to be made out of rotting wood, but

* Technically, a genetically engineered super power could be more probable than a random mutation by radiation. With radiation, even if you do somehow get a beneficial mutation (and this is incredibly improbable, mind you),
* Technically all of Morituri are this since they can all die explosively at any minute. Most noticeably the death of one causes a hull breach in the ship they're using to take the fight to the Horde fleet.
* Technically all of the endings aside from the True Ending are this.
* technically allowed and thus the term "Legal Wife" became common. Most wealthy or powerful men had also at least one concubine or mistress, though, who were secondary wives in all but name.
* Technically almost all male animals are fathers of a thousand young as they produce millions or even billions of sperm, and while only one sperm gets to the egg (assuming a successful conception) in theory if all their sperm fertilized eggs they could populate entire planets.
* technically and ridiculously-high costs for rezzing your player characters, all to push sales of Death Medals that can be used to revive yourself on the spot or exchanged for your primary in-game currency.
* technically an Eagle Squadron as Mexico was at war, it bears many of the same characteristics.
* Technically, any Bene Gesserit Reverend Mother becomes this way by ingesting poison and hoping that her body will metabolize it into a substance that will transform her.
* Technically, any military laser is that - the mirror or lense that focused the beam on target could also be used in reverse to collect light FROM target on sensor, thus acting like telescope.
* Technically, anyone not in the know shouldn't realize Pentex even exists as an entity; it should just look like a bunch of shady but independent companies that are all in each others' pockets.
* Technically anyone whose dreamself is on Prospit can see these visions, but Jade is the only one shown to use them extensively. They have a tendency to be vague as well.
* Technically, anyone with sufficient programming skills could have changed the game further, but the resident
* Technically, anything that takes place in the Universal Century timeline and was released after
* Technically, anything with a nervous system is a Mind Hive in the same sense as the Geth are in
* Technically, anytime this show has a flashback there will be at least one Posthumous Character.
* Technically applies to all five castes, though the civilian and government castes are much more chill about letting you retire once you get old.
* Technically a subversion, but listing percentages over 100 isn't always a mathematical impossibility. While it's true you can't have, say, an object that's more than 100 percent pure gold, you can increase the amount of something by, say, 150 percent, equal to 2.5 times as much.
* Technically a subversion, but there is an ancient Sumerian clay tablet (officially named Cylinder Seal VA 243), which has a picture of the sun in the upper left corner surrounded by 9 dots. Many people claim it's a map of the solar system and they successfully guessed there were nine planets. That said, most scholars now think the dots just represent the various Sumerian deities. Also, while the tablet has writing on it, it just says “Dubsiga, Ili-illat, your/his servant.” Whereas one would think if it's a map of the solar system there would be writing saying this.
* Technically (at least according to the novels) Tsabo and Crovax were active at the same time, not to mention a Phyrexian-augmented Ertai, running about causing havoc. So it's more like a case of triple Dragons, no? Also, in that same block the 5 Dragons were awakened, each of whom had their own Golem Attendant, that could be considered their own Dragons.
* technically at war with them and the British. They weren't formally at peace

until 1947, when the Paris Peace Treaty was ratified.
* Technically Brody does fulfill this trope, as Vaas foiled his attempts on revenge
* Technically, conservation of energy is a long-term phenomenon. Macroscopically, it always holds, but brief violations at the subatomic level happen on a regular basis, and radioactivity would be impossible without them. Any energy that appears from nowhere must vanish whence it came before it can be observed (if you tried to observe it, you would necessarily supply the borrowed energy with your measuring device).
* Technically, "Defeated" is intended to be a vague, blanket term that allows the player to decide what happens to everyone. Considering the genre...
* technically doesn't have one, but as he's a transforming robot he probably needs it less.
* Technically, every boss battle in both games is one of these. Most of the really creepy, surreal ones are in
* Technically everyone can learn all of these charms and spells even if their exaltations are too weak for them to put them to use
* Technically, everypony is a mage of sorts. They just have different kinds of magic: Unicorns have the basic telekinesis and possibly other spells, pegasi have flight and weather manipulation, and earth ponies are figuratively and literally
* Technically, every priest, pope or equivalent in any given religion can be considered a promoted fanboy.
* Technically, every weapon can become one of these when fully upgraded. When all upgrades are bought, a ridiculously expensive one becomes available. For instance, the Striker gains an ammo capacity that takes roughly an hour to empty, the SMG gains damage equal to several pistol clips per bullet, and the Broken Butterfly magnum gains damage rivaled only by the Rocket Launcher and the Handcannon. Restarting the game with a
* Technically funds are measured in bc, "billion credits", but 1 bc is still chump change compared to the cost of running an interstellar empire.
* Technically, Gohan and Goten are this, as their grandfather is Gyū Maō (the king of Fry-Pan Mountain), making Chi-Chi, their mother, a princess. (Though, like Trunks, they were never really referred to as a prince.)
* Technically half alien, but still Caucasian from his mother's side; Spock and Uhura have a relationship in the rebooted
* Technically happened between Benton and Corday, as she was his intern at one point. And between Carter himself and an attending he was interning for.
* Technically, Haruhi does this to herself, locking herself out of the knowledge of her own
* technically has a couple of these among its ranks, though they tend to be rather more grubby than most examples of this trope. And in the Watch it doesn't matter how gilded you are, Sam Vimes will see to it you're copper to the core.
* Technically, he first got it when he was ganged up by some really angry ghosts, but the Ghostly Wail did serve as a hidden weapon for his final battle in the episode.
* Technically heritage means they can control the abilities of the one possessing them. It requires a great deal of trust on the part of both participants to pull off though.
* Technically, he's been in safe mode since the end of the war of time, which is why he always seems so happy-go-round, he also warns his to-be enemies (whenever he has a chance) to not mess with him, apparently he believes that at some point the evildoers will realize that messing with the greatest mass murderer the universe has ever known is a bad idea, they never learn.
* Technically, he still doesn't know how to turn it on. Instead, he had to learn to keep it under control due to
* Technically, he was a correction officer, not a cop, but if anyone in
* Technically, his greatcoat bears the insignia of "Group Captain", which is a full title, is never referred to as "Captain", and has the equivalent rank of "Colonel" in the armed forces. And in his first appearance, his uniform bears the

insignia of "Squadron Leader", which has the equivalent rank of "Major".
* Technically, his "Swiss Army Appendage" got weaponized as well into his ability to adapt new weapons.
* Technically, humans aren't paranoid. "Paranoid" would imply your fears
* Technically, if you throw away the "first person I've ever loved for real" excuse,
* Technically, imp-powered devices such as iconographs and disorganisers probably count as well, depending on how "alive" you consider the imps. (
* Technically, in English, you always say "yes" if you want cake regardless of how the question was asked. This can cause serious grief for Chinese speakers learning English, as in Chinese, the answer depends on how the question is asked.
* technically in favor of exploration and conquest. Then one of the races hits Earth.
* Technically, it could be said that Chewbacca's wife wears one about 5 minutes into
* technically it isn't pronounced like that — he just prefers it.
* Technically, it's a Soap Within a Music Video, but the music video for
* Technically it's a sports coach rather than a teacher, but the relationship between Neil and his coach in
* Technically, it's possible for anyone with a powerful enough HF generator to send an FTL message. However, the enormous HF stations allow the creation of stable "floating" channels that enable the existence of the Interstar.
* technically it's rather significant that one of the only times she rolls back on that stance was because one of her boyfriends was the target of said human.
* Technically, it's something of an aversion, since most of the tomb raiding is done by the Nazis. The Allies simply send BJ Blazkowicz in and a few hours and hundreds of Nazi corpse's later, the Reich is down one super weapon. Downplayed in
* Technically it was the final large scale naval battle. There hasn't been a clash of carrier fleets, battleships, battlecruisers, heavy cruisers, light cruisers, and destroyers
* Technically, it was the followup speech by de-facto leader, Otter, that mobilized the frat.
* Technically it would be 'Captain and Supply Officier' but Lafiel and Jinto from
* Technically Jack Sparrow too, as he also loses Elizabeth to Will in the third film. This is less tragic though because while Norrington genuinely loved Elizabeth
* Technically, Kanon is also one, although with the events surrounding her existence, she might as well be human.
* technically legal but clearly against the spirit of the law, the judge will usually decide against them regardless.
* technically legal to live outside them but elves who do nearly always end up being driven back in by their violently bigoted neighbors.
* technically living (sort of, the other wiki uses this quote: "organisms at the edge of life"), invades a cell. If two viruses of the same strain attacks a cell, their DNA or RNA can break apart and recombine into a new shape. Also, if different strains of a virus have an "offspring", they can become more deadly AND spread across species. The 2009 flu pandemic, i.e., had a mix of swine, avian, and human influenza genetic sequences.
* Technically Living Zombie: A monster that has everything in common with the typical depiction of a zombie except for the fact that they are not undead, I.e. rabies victims or possessed people.
* Technically Living Zombie: It looks like a zombie and acts like a zombie, but isn't actually undead.
* Technically Living Zombies that end up embodying most zombie tropes. They have gained immortality, but at the price of having to consume every kind of human tissue in order to keep theirs from rotting away. Hence, the smart ones are especially keen on brains. They still inevitably look rotten after enough time, and most become almost mindless as well.
* Technically Living Zombie: There are occasionally some types of vampires who are actually fully living beings and are not undead.

* Technically Living Zombie: They may look and act like the undead, but they're actually still alive.
* Technically Lot's wife was spared for about five minutes, but when God says "don't look" and you look anyway, no one's going to have a lot of sympathy for you.
* Technically, Max is under absolutely no obligation to accept Lem's deal: there's no implicit or explicit mention of a penalty for refusing. The reason Max goes along with the deal is three-fold: to get his hands on powerful weaponry, to piss off Punchinello, and to gain a potential ally.
* Technically Morgana has a similar epiphany after Bo kisses her for the first time, but she takes a day or so to process the idea of two women loving each other in that sense, and even after that, standards of the time prompt her to be reticent about expressing her feelings at first
* Technically Naked Shapeshifter: A shape-shifter forms clothes when taking on the form of a clothed person, but isn't actually wearing clothes in their true form.
* Technically Naked Shapeshifter: A shapeshifter whose clothes are part of their body.
* Technically Naked Shapeshifter: Shapeshifting into a human involves copying their clothes as well.
* Technically Naked Shapeshifter whose clothes are just part of her shapeshifted more pleasing to the human eye form.
* Technically, none of the events that Hussie is in are real, as the Handmaid doesn't actually end up going anywhere and Doc Scratch dies with the destruction of the universe regardless of Hussie's intervention.
* Technically, none of us would be here if not for the original Alien Kudzu, cyanobacteria (a.k.a. "blue-green algae"). Before they evolved, Earth's atmosphere was virtually free of oxygen and anaerobic Archaea dominated its ecosystems. Once they started spewing out volatile oxygen as a byproduct of photosynthesis, they took over the world and drove the oxygen-intolerant Archaea into niche habitats like hot springs, hypersaline waters, or deep under the ocean floor. The chloroplasts of modern plants are their distant descendants, so one could argue that
* technically not a proper explosion but that's splitting hairs) is called a BLEVE (Boiling Liquid Expanding Vapour Explosion) or SSEVE (Sublimating Solid Expanding Vapour Explosion).
* Technically not a weapon, but still increases your characters' powers to ridiculous levels, the Sheriff Star is an accessory in most
* technically of farming if you don't want to use actual money. Luckily, the game has regular events that give extra Questionite and sales that allow the purchase of a Freeform slot for cheap, severely reducing the amount of farming necessary. It also helps that farming only requires to do handful of missions per day, so while farming is necessary, grinding isn't.
* technically one brownie. Andy catches him that time and makes him cut them into smaller pieces.
* Technically, only one in 117 humans have it, but that's still a lot, given that there are nearly 7 billion of us. Hell, Cade alone made a mess of the Gua infiltration effort. Imagine millions of humans doing that.
* Technically, only the Amalekites were supposed to be destroyed... that is, the rest of the nations were given the option to clear out. Allegedly, one did.
* Technically, our and other animals' waste is edible... to other organisms. Like bacteria and dung beetles.
* Technically, Paragon Shepard became Transhuman during the second game, having been resurrected with cybernetic implants, as well as undergoing extensive genetic modification that not only gives them increased speed and stamina, but resistance to small arms fire and strong enough to wield weapons that when fired, would normally shatter every bone in a normal person's arm. Shepard is a Pro-Human Transhuman in either case; paragon Shepard is a hero who protects all sentient life in the galaxy, while renegade Shepard
* technically possible, but most e-mail clients won't be able to handle it.
* Technically, Ralf (who's under his command) holds the rank of Colonel as well.

* Technically set up before Totto Land but not beginning in earnest until afterward, the Wano arc is the first time the Straw Hats have done in planning to be part of a war from the beginning instead of being dragged in by circumstance. Having formed an alliance with the
* Technically she and Peeta met at the age of five on the first day of school but they never interacted until they were eleven.
* Technically, she fails; she falls into an eternal sleep and it's Cupid who, coming out of his depression, gives her her happy ending by pleading to Zeus.
* Technically she never left as she's now, in her words, "everywhere at once." However, only magical girls who are about to die/become witches can see her in their final moments, so it counts. She even spends her last moments with Homura apologizing that she has to go.
* Technically, since the incident in question was on the holodeck, they were bullet-shaped force fields.
* Technically Snart’s cold gun, considering that we last saw it being disassembled by Ray to use its components to disable a bomb; also applies to Mjolnir, which is restored by Thanos on Hela's request (even if it's subsequently picked up by Jane because Hela didn't know about the worthiness enchantment).
* technically spaceplanes, as they can be launched off an Imperial Navy starship in orbit and can reach that starship from ground airbases once the fighting's over. In something of a subversion, the Imperial Navy's starfighters, like the Fury, are altogether much larger than standard aircraft and have a crew of around three, and while they can operate in an atmosphere it's not recommended because they're not designed for it.
* Technically speaking, colors like white and pink don't exist. Visible light, at least for humans, consists of just red, orange, yellow, green, blue, and violet. Every other color is just the result of human brains trying to mix the wavelengths.
* Technically speaking, Disney portrayed a same-sex couple in Hugo and Djali from
* Technically speaking, everyone eats trace amounts of metal—the iron statistic in dietary information really
* Technically speaking, the Centauri civilians are all women and children: upon reaching adulthood everyone serves in the military (either the royal armed forces or a House militia) for a tour, upon which he can choose if staying in active service or becoming a reservist that can be recalled in service in case of necessity. Also, when things get
* Technically speaking the Department of War became the Department of the Army (and arguably the Department of the Air Force). The Department of Defense took the War Department and the Navy Department's Cabinet seats (there was no department that ran all the military branches at the same time after the creation of the Navy Department in 1798
* Technically speaking, Valerie Grey could be counted as the Missing Black Woman.
* Technically supported at the same time, as the game provides rules for formalized spellcasting duels. These rules expand on the counterspell system, making it easier to help prevent duels from ending in a single round and making them more dynamic as casters decide which spells to spend slots on countering and which to let land.
* technically, the actual final conflict of the war is the allied expeditionary force (which was launched years earlier) reaching and assaulting the Reapers' base in Dark Space.
* Technically the case for Members of Parliament in Britain. A rule dating from the time of
* Technically the communication isn't reverse engineered, because the Buggers didn't use technology to do it in the first place. It was rather that they were living proof that it was possible, which inspired humans to figure out how to replicate it using our own technology.
* Technically, the confusion is Sam saying, "You don't even like girls!" Much as people try to put him in one hole or another, Max is Max, and what he actually thinks about women will forever remain a mystery.
* Technically the game's protagonist, since neither "Paul" or the game ever refer

to it directly.
* Technically the Haka performed by New Zealand's national team, the All Blacks, just before a match starts is not a war dance. However, you could be forgiven for mistaking it for one. Tonga, Samoa and Fiji have their own versions.
* Technically, the Hammond B3 and C3 organs were additive synthesizers (this is why organ is one of the easiest sounds to synthesize), and had already appeared on many recordings by the early 1960s.
* Technically, the Hulk. The jury is out on whether that one went very wrong or very right.
* technically. Their Dutch channels originally began as a joint venture with an offshoot of the influential, former offshore radio operation Veronica, which had previously participated in the public system)
* Technically, the manual stated that the Liir used a "bioweapon" and that the specific vector was unknown. The sequel states that the bioweapon is known as "The Black"
* Technically the Minovsky Drive is not a reactionless drive, but a system to use the Minovsky particles from the fusion reactor powering the suit for propulsion directly, thus avoiding the need for dedicated reaction mass. It is more akin to a photon drive hybridized with an exotic fusion torch.
* Technically the Nazis did manage to invade part of North America when they set up monitoring stations in Greenland after seizing Denmark. Fifteen Greenlanders on dogsleds, 'the Sledge Patrol', shut down the monitoring stations and that was that. Although the closest the Nazis ever got to shooting at the American mainland was U-boats harassing USN shipping in American waters.
* Technically, the normal process of bone development before birth could qualify, as softer connective tissues are calcified into bone. This process also occurs in children as their long bones' ends fuse to their shafts, and in extreme old age when the sutures of the skull fuse solid.
* Technically, the Plastic Soldiers of Coror could be considered clones, given that they have no individual personality of their own, but they'd probably fall more under
* technically. The point is to force Neo to understand how much of his human instinct he needs to overcome to realize his full capabilities inside the Matrix.
* Technically, the Reapers qualify, being the apex predator of the entire galaxy which has won every battle for the past 3.2 million years, all without squabbling. However, it's implied that they only stay unified because they refuse to rule; they commit mass genocide over centuries, then sleep for about 49,500 years.
* Technically the titular characters' core group counts too. There's a miniature
* Technically the war is still ongoing as no peace treaty was ever signed between North and South Korea, and China and the United Nations never declared war on each other. Nor did the United States actually declare war on North Korea, or China on South Korea.
* Technically, the weapon would be mounted on a shuttle, not on a satellite, as shown by the demo video at the start of the movie. It's still insta-death from orbit for anyone it hits though.
* Technically, they aren't fighters. In the pre-mission cutscene, they were depicted as being used as long-range missile launchers, and may have also been attacking from the flank. They seem purposed to attack the Cornerian cruisers instead of smaller, interceptor sized craft.
* Technically they're calacas (see above), which accounts for their stylization.
* Technically, they use a "quantum singularity" (as in semi-controlled artificial black hole) to power the ENGINE which creates a wormhole. Somehow. Still goes to hell though.
* Technically they were field-grey versions of the coloured (mainly blue) uniforms that were worn for peacetime service, which however had come in different grades of "bling" depending on whether it was worn e. g. for garrison drill or parades. And the spiked leather helmets at least could be said to have provided a little more protection than the cloth caps and hats worn by the other armies before the introduction of steel helmets.

* Technically, this comes into play pretty much whenever a person needs to be somewhere by a specific time, but most people only feel the sense of racing the clock when there's a significant risk of not making it in time; if the person has plenty of time to get there, the deadline is more of a formality.
* Technically, this is the most beneficial of the wishes, but you've still got to jump through the hoops if you want it to actually benefit you. If you pick music, you're given a flute identical to the one encountered in "The Christmas Conspiracy," and are told to follow the music prompts; if you succeed, you get to keep the flute as a nifty cosmetic item. If you pick knowledge, you have to answer a series of riddles, the last of which can only be answered if you've been listening to the CEO's hints and can guess his true name: Mephistopheles.
* Technically this relationship can be justified with any character in power armor, but it's especially relevant with Danse, who just won't leave it.
* Technically, this trope also occurs in the episode "Paradise Lost". In it, both
* Technically, though, he only knew Tedd's father, who is the head of the American
* technically... though she dies in the following episode from her fall-related injuries.
* Technically, though we never see it working, Sarah Connor's answering machine in
* Technically though, we only know certain Zeldas are related; and only
* Technically, Titans are also flying saucers, but they are, basically, this game's version of Cyberdiscs (i.e. flying robots).
* technically to have a fully recognised maester assigned to outlaws and cadet branches, be they nobles or not. If you smell a fish, you're not the only one: Tyrion notes all this when he bumps into it.
* Technically, Tony Stark made at least the first three versions of the Iron Man armor outside of a real facility. The first version was made from "scraps" in a cave. The second and third were actually built in his garage. It just so happens that his garage contains equipment that most modern factories lack.
* Technically, what Cloud is being told to do in this scene is Rescue Breathing; that is, forcing air into the lungs to interrupt the drowning process. You only do that for a patient who has a pulse but not breathing on their own, and it is
* technically, with explicit nepotism being responsible for his advancement. The people telling him this were (probably) just messing with him.
* technically wrong with her greeting, but considering she's meeting a stranger for the first time, "I'm glad to see you" is hardly a fitting greeting.
* Technically yes, although more reminiscent of the trope are the Parts Pirates, who capture kids not specifically marked for unwinding, basically kidnapping them and shipping them to private unwind facilities. It's stated that in China, they don't even take all of you at once, which the lead Parts Pirate in North America finds
* Technically, you DO have control of Tamlen in the Dalish Elf origin of
* technically, you don't need to actually make the closed geometric shape to work your magic, since it's all based on intent and willpower. If a person believes starting the pentagram from the top point gives it more power or more suited to attack magic, the end result will reflect this as well. Most everyone uses circles, triangles, etc anyway, because while you technically don't need them, they make it a hell of a lot easier to use the spell in question, and there's no reason not to when you're not using off-the-cuff evocations and the like.
* Technically, Zaktan. When his old boss tried to vaporize him, he was somehow able to pull himself back together as microscopic "protodites". In this new, permanent state, Zaktan can easily avoid attacks by turning into an insect swarm; change the shape of body parts; heal damage by filling the gaps with Protodites; and engulf a foe in an attack that must feel like getting hit with thousands of needles. Zaktan himself calls it a curse however, as his voice now sounds like a crowd speaking; and whenever he wakes up he can feel his body shifting "where there once were tissue and solid metal".
* Technical Machines (TMs) were initially one-use items and often limited to one per-game, so you only had one opportunity to teach Blizzard to a Pokémon.
* technical manuals all try to provide consistent explanations for the science and

technology of the series.
* (technical) pacifism Airbending truly is, in the hands of an aggressor.
* Technical Pacifist ancient alien androids, who provide information and occasionally use their holograms to pose as the Animorphs; the free Hork-Bajir colony in a nearby valley; and a few members of the Yeerk Peace Movement.
* Technical Pacifist: A variation. Spare the enemies unless situation forces you to kill specific ones.
* Technical Pacifist, but they'll whoop your ass so badly that you wish they did.
* Technical reasons: the people who were originally hired to do it backed out, the special effects plans didn't play out in their favor, there was not enough money in the budget to include it.
* Technicals light; some technicals are large pickups or even flatbed trucks with light tank turrets or howitzers mounted on the back) attached to the back they can't deal or take much damage compared to more heavily armed and armored vehicles. However in comparison they're much quicker and more maneuverable, capable of hitting targets and getting out of the line of fire before the enemy has time to properly respond.
* Technicals resemble this trope, being a four-wheel drive with some form of heavy weapon mounted on the back.
* Technical thrash metal band Coroner has a song entitled "Grin (Nails Hurt)" off the aptly titled "Grin" album, which itself features a pretty sadistic grin.
* Technical Virgin: Has never had the kind of sex that someone thinks "counts", but has done other sexual stuff.
* Technical Virgin: Someone has had sex, sort of, but has never had the kind of sex where two people's genitals touch each other.
* Technical Virgin), which causes the magical virgin city of Vanorva to decry him as a slut.
* Technic History: Almost every planet considered worth the bother of visiting has political and ethnic divides of various kinds, within races as well as between them. Sometimes they are mainly there for color and other times they are a plot point. The most important one of these is Avalon where Ythrians and Humans jointly found a colony. The main division is between Humans and Ythrians but there are divisions between Ythrians as well. Stories about Avalon stress both that friendship with someone who isn't like oneself is harder work then clichés make it out to be, but that it is worth the trouble.
* Technic History of writing a history of a fictional culture or civilization and placing the stories within it.
* Technic History of Ythrians and helps write a history of the founding of the dual-race Human-Ythrian colony Avalon (in other words the stories of Van Rijn and David Falkayn) and writes a translation of a Ythrian hunting song.
* Technic History series included a Terran Empire. (Deliberately established on feudal-service lines by the "Founder" Manuel Argos the Great, before it went decadent.)
* Technic History that is a history that spans ages and focuses on the history of several intersteller civilizations, primarily the rise and fall of the Polesotechnic League and the Terran Empire. Contains numerous short stories, as well as a few novel length tales one or two of which would qualify as epics in their own right.
* Technic History: "That race still bears the chromosomes of conquerors. There are still brave men in the Empire, devoted men, shrewd men ... with the experience of a history longer than ours to guide them. If they see doom before them, they'll fight like demons." — Brechdan Ironrede of Merseia
* Technic History this series tends to lean toward the romantic, with it's adventuring, colorful cultures, politics both on an imperial and tribal scale and it's tragic clashes of honorable characters. Yet it also has an enlightenment side, such as a search for knowledge and a respect for science, and a balanced appraisal of both the benefits of commerce and it's costs on those who can't compete.
* Technic History; though ignorance and difficulty understanding each other is a problem, there is little actual hatred. In the second case it is more a matter of

neighbors misunderstanding each other and occasionally rubbing each other the wrong way. Nonetheless, in both cases the cultural differences between Humans and Ythrians loom large.
* Technic History with the protagonist, Dominic Flandry, as an aristocratic gentleman spy. A hint of sourness is given by the inevitable collapse of the empire the hero serves.
* Technician vs. Performer. As such, the "diva" type of female performer in pro wrestling shows was gradually phased out. Couple that with the rise of Internet subcultures, and the "diva" type is almost never played straight anymore.
* Technician vs. Performer — One contestant is good because he worked at it (Discipline), another because it seems to come naturally to him (Harmony).
* Technician vs. Performer more often than not, looking like one giant theatrical play. While the Soviets' willingness to succeed at any cost no matter how high won them the Second World War, the Fascist states have captured the imagination of many people who continue to be impressed by many things they created, as well as impressing their opponents enough in their innovation that everyone studied and eventually adopted said innovations (such as the jerrycan, assault rifle, and guided missiles, among others).
* Technician vs. Performer: One seeks to perfect their craft, the other seeks to enjoy it.
* Technician vs. Performer: Two characters contrast each other because one is all about being accurate and the other just wants to have fun.
* Technician Wade dies calling out "Mama, mama, mama!" as he is dying from a morphine overdose the squad adminster as a Mercy Kill
* Technicolor Death: A character's death has them become a light show.
* Technicolor Eyes: Eye color(s) that is physically impossible and simply unusual.
* Technicolor NinjasCharacter who wears highly visible colors but still manages to be very stealthy.
* Technicolor Science equipment have already gone the way of the dodo. The functions of those apparatus' are now either obsolete or accomplished using miniaturized and simpler equipment.
* Technicolor Science: Science looks "cooler" when all the chemicals and reactions are bright and neon.
* Technicolor ToxinPoison is brightly-colored so it's easy to tell that it's poisonous.
* technicolor toxins developed over time, including a baby face version in Yuji Nagata's "blue justice mist".
* Techno Babble are the fastest brachiators, travelling at up to 55 km/h through treetops. Speaking of apes, orangutans are similarly adapted to living in trees, and their arms are so long that the orangutans sometimes use them like crutches when they have to move about on the ground.
* Technobabble contains rather a lot of baffling alchemical jargon. Some uses it straight to confuse the audience with the cleverness of the characters who understand alchemy, and some is in-universe technobabble employed by charlatans pretending to be actual alchemists.
* Techno Babble explanation for portals to 18th century Paris in a spaceship, before admitting he made it up just because he didn't want to say "magic door."
* Technobabble: It sounds like technical jargon but doesn't mean anything.
* Techno Babble: Mad scientists' explanations of their works often lapse into incompressible jargon.
* Techno Babble miracle-cure it was intended to avert to keep her alive.
* Technobabble: Since the ship can't travel faster than light, it enters
* Techno Babble states that the Solid Eye's NVG setting is a mixture of several different enhanced vision devices, including light-amplification and infrared.
* Technobabble thing for him. Provided he's got an alternative source of sparks, that is.
* Technobabble: This exploits the curvature of spacetime in some way to instantly move a ship from one location to another. Functionally, a ship using a Jump Drive does not travel faster than light; instead, it alters the distance that has to be

traveled in the first place - these are sometimes called "fold drives" due to the analogy of folding a piece of paper to make two distant points adjacent. As the range is rarely unlimited, the ship typically moves in a series of "jumps", needing some time to recharge or re-calibrate its engine in-between jumps. Because the jump itself is generally instantaneous, this is technically the fastest method. Oddly enough this system rarely uses
* Techno Babble to explain the technical aspects of the Engineer's work, it's all euphemisms for "smack it with a wrench".
* Techno Babble with Bruce Banner, much to the bemusement of Captain America.
* technobabbly reasons - the latest Traveler to arrive will always have been sent back from a later time than all the Travelers who arrived before them, creating the illusion that the two time periods are happening in parallel.
* Technobabylon has converted to decimal time, divind a day into 10 hours, an hour into 100 minutes, and a minute into 100 seconds. Obviously, not everyone is a fan, and other nations have no intention of moving away from the traditional 24-hour clock.
* Technobabylon organic nanomachines called "wetware" are used for many different purposes, from hacking to genetic engineering.
* Technobabylon serve actual living humans, seeing it as the ultimate display of power over the poor.
* Technobabylon, tigers are mentioned to have gone extinct by 2087. One possible reason is that India is a radioactive hellhole.
* Technoblade does this to the point of Memetic Mutation. Techno often promotes his channel at the most inopportune moments, and he even has a "Sellout Timer" set to go off every thirty minutes so he can remember to promote.
* Technoblade is a livestreamed survival multiplayer server, with all your favorite content creators. And also TommyInnit."
* Technoblade setting off two Withers to destroy the ruins of L'Manburg during the Manburg-Pogtopia War encouraged the Butcher Army to go after and execute him (among many other factors
* TechnoCop, shooting enemies would leave their corpses in a pool of blood.
* Techno Dystopia: Because it's got all this pretty future technology it must be good, right?
* Techno Dystopia by the introduction of new technology is fundamentally contrary to the Enlightenment's idea of technology in and of itself being a force of good.
* Techno Dystopia: Futuristic settings where technology has made life worse.
* Techno in the mid-80s, the genre would really begin to hit its stride in this decade, finding popularity in the European club scene.
* Techno Kitten Adventure not only has several objects and flashing colors thrown in the background to throw you off-guard, but there are also moments where, for instance, your scores fly through the background and several sections of one map literally renders the entire screen reversed for a few seconds.
* technological enlightenment. You also have the option of starting next to an alien empire more advanced than your own in order to increase the challenge.
* technologically advanced cities, the dead creator god of the mortal plane.
* Technologically Advanced Foe: The other guy's technology completely outclasses yours.
* Technologically-aided obfuscation:. Easy to expand back into something readable without mousing over random words.
* Technologically Blind Elders: Old people don't know how to work new tech.
* Technologically Blind Elders: The older you are, the worse you are at operating modern technology.
* Technological Pacifist: A character who things technology is great, except when used for warfare.
* Technological Pacifist: A character who thinks technology is great, except when used for warfare.
* Technological: Sometimes, the technology needed to produce the sequence (or at least on budget) is not there yet.
* Technologies. Researching a technology requires you to roll 1, 2 or 3 successes.

Some technologies allow to research technologies faster, and pulling them early lets you snowball.
* Technologists, fetishized technology into a spiritual belief system.
* Technology also keeps advancing in real-time. Old mobile phones are now replaced by cellphones, etc. In chapters 192-196, which were released in 1998, the concept of chatting on the internet was relatively new. But in chapters 1006-1008, released at the end of 2017, a rumor was spreaded fast and nation-wide through Twitter. Another extreme example is the flashback case in chapter 972-974, an event that occured 10 years prior to the story, yet the characters in that flashback were using image-sending cellphones with cameras and they could read freshly reported news on the internet.
* Technology companies in particular are rife with "patent trolls" who own seemingly obvious/general patents and threaten legal action against smaller companies. When they think they have enough balls to do so, they go after bigger ones (and more often than not win). Notable cases where the trolls were defeated (or at least had little success if any):
* Technology Connections was far less bulky than video equipment for a few decades.
* Technology Guide includes the Technomancer as a prestige class, which grants certain powers over high-tech items by combining expertise in magic and engineering. It also includes the Technomancy spell, which is closer to divination (it helps locate and identify technological items).
* technology has lurched forward, while a later episode had another character getting too attached to her new cell phone and even later episodes have characters owning smartphones like they're nothing.
* Technology Levels: Cultural advancement represented as an advance through a series of discrete levels.
* Technology Levels is upgraded to "Vassal" status, instead of providing extra Influence their ship unit cap is partially diverted to their liege and the military they do have is obliged to participate in their wars.
* Technology Levels, some Amish will occasionally admit the use of specific items of modern technology, but only if it doesn't interfere with their way of life. So, for example, phones are not permitted in the home, but they might have a one in a "phone shanty" shared amongst the community in case of emergency. Acceptance of technology also varies between Amish sub-sects, with some going further than the rest.
* Technology Marches On and Apple added sound capabilities to their computers and began to sell music through iTunes, which they felt was Apple homing in on their territory. One could even claim that the end of the Beatles started when manager Brian Epstein died of an overdose, leaving the Beatles directionless. Without a strong manager, the group imploded with squabbling and arguing over what direction to take.
* Technology Marches On and now every PC with an 80386 or higher and other microprocessors which support some kind of protected mode can run Linux and other Unix-like operating systems.
* Technology Marches On: An old work features use of technology that is now out of date.
* Technology Marches On: An old work features use of technology that is now out-of-date.
* Technology Marches OnAnother important advantage of Windows XP Professional is that it has a very good MS-DOS compatibility. So you can use it for doing serious things like writing programs or controlling self-made hardware and connect to the Internet without having to reboot or use another computer simultaneously. (You can also connect to the Internet with FreeDOS but it's currently quite buggy.) As long you are Administrator, you can access most hardware directly, without access violations. This is also important for some commercial devices for burning PROMS or microcontrollers because they also use the COM port directly (and don't support Linux). Further you can redirect datastreams to COM and LPT ports, bypassing the Windows printer driver. This is very useful if one writes programs and wants to print several headers (*.H,*.ASH,...) on the same piece of paper or have a dot

matrix printer. The Windows printer driver always adds pagefeeds so one would waste plenty paper using it. Under Windows XP Professional you can simply send data to ports with commands like "TYPE VGA.ASH >LPT1". The only annoying thing is that Windows XP doesn't recon the \\DEV\\ directory (as opposed to true DOSes).
* Technology Marches On: A work becomes dated as real-life technology progresses past what it depicts.
* Technology Marches On, but not reading and writing. As you may have noticed, punch cards became obsolete before literacy did.
* Technology Marches On-class carriers. On the practical front, arguments over economic-logistical and tactical economies of scale of large vs small carriers - as the latter still need complex, expensive radar and other electronics that don't necessarily downscale in cost proportionate to size - and whether said missiles live up to the hype under combat conditions have been had for years if not decades and are beyond the scope of this article.
* Technology Marches On efficiency experts to identity theft and abusive patent litigation.
* Technology Marches On: Emphasis is placed on technology considered cutting-edge at the time, which has since become outdated.
* Technology Marches On, some people are still obsessed by the low-bitrate vintage digital synthesizers or new hardware models like Waldorf Blofeld.
* Technology Marches On takes place. Currently in production, comprising novels 30-41, and 44+.
* technology of old as worthy of worship. The Imperium of Man and Adeptus Mechanicus think they have the right idea and enforce it galaxy-wide...
* Technology Porn: Extensive focus on complex and/or advanced machines for audience appeal.
* Technology to allow a living brain to control robotic limbs does exist, though at the moment it is rather crude and basic.
* Technology Uplift: Aliens who feel they're responsible for sharing technology with other species.
* Technology Uplift: Basically this trope, but without the time travel.
* Technology Uplift by helping introduce innovations to one country to force the rest to try and catch up.
* Technology Uplift: Giving a culture access to more complex technology than it currently has.
* Technomages or a dragon. Similar to a telekinetic, this requires constant concentration, as the tech only works as long as the technomage holds the "spell" in his or her mind. Technomages train from a young age to keep multiple "spells" in their minds.
* Technomancer series about how the Earth has been taken over demons and humanity has been rebuilt into a cyberpunk future with humanity at the bottom of the corporate food chain. Its protagonist is a nanotech cyborg with an AI attached to himself and a dark as well as mysterious past.
* Technomancy (a new breed of "magic" based around the matrix and technology) tends to work a bit better with the world of cyber; though it still requires essence, so most technomancers are not cybered themselves. Fortunately for them, they don't need it most of the time on account of having what amounts to a biological wireless router in their heads.
* Technopath abilities every few episodes. He puts his hand on a prop and squints.
* Technopath she generates and absorbs electricity, though she can't really control it except by discharging the current frequently. Since she can hold a charge in the hundreds of thousands of volts, this makes touching or even approaching her quite dangerous, and she often overloads electronic devices just by being near them. Did we mention that she has severe anger management issues and multiple personality disorder, and that two of those personalities were later transferred into her clone?
* Technopath, which in-universe are called Cyberpaths. Mei Hartford has not been seen in canon, but given the existence of Artificial Intelligences in Generation 2, which is in the past of this fanfiction, the implication is that the unnamed entity

is an artificial intelligence of some stripe:
* Technopath who infect you and turn you into a were-cougar? Neat-o! Get split into two duplicates and have two of your personalities put in one body and the other two in the duplicate? Yeah, ok...
* Technopathy abilities to kill Rur, and absolutely anyone it's encountered ever since.
* Technopathy like to die, please. Unfortunately for him, no hero he antagonizes seems to have the oomph to grant him his heart's desire.
* Technophiles - Technophiles are the heralds of the bleeding edge of battlefield technology, and place high-tech above all other considerations. They're most noticeable around settings with
* Technophobia: Someone who is afraid of technology and potential harm that can arise from its use.
* Techno Police 21C they managed to make an 80-minute pilot. And repurposed it as a theatrical movie. Which wasn't very successful.
* Technos Japan as their main publisher, who would go on to absorb Million in 2015.
* technotheocratic Imperial Citizens, as opposed to merely planetary subjects). In a lot of ways, it's pretty similar to the medieval Church...
* Technotise Edit I Ja, terrible soap operas exist in the future too, with a twist. The woman's "a robot... my heart is made of metal!" and the man reveals... "I am in fact... an alien! I don't even have a heart!" as a shocking twist.
* techno, which includes such lyrical gems as "Europe will crumble" , "Love will die" and "The emptiness will get us all".
* Techno Wizard: Characters that are very competent and skilled with computers.
* Techno Wizards have armor and weapons that sparkle with various gems, which serve to magically empower them.
* Technus could literally be the ghost in the machine (which is not the same as the
* Tech-priests believe that becoming more mechanical brings them closer to the Omnissiah, and thus voluntary replacements are not just accepted, but essentially mandatory to be able to function in society at all.
* Techpriests can also attempt to "appease the machine spirit," a sort of innate A.I./
* Techpriests of the Adeptus Mechanicus also do this to normal humans. At least one has been heard to call them
* Tech Romancer, a fighting game featuring humongous mecha inspired by super robot and real robot anime series.
* Tech Romancer does this in the Wiseduck story mode if you chose the ending where the crew decided that they were human and lay the beatdown on the enemy. Ten years later after the war, Alvin is the lone survivor and gives a libation to his now-deceased crew.
* Tech Romancer final boss Goldibus has this in his second form. Which is ironic, since there's no mouth on his actual head. (Interestingly enough, both Jinpachi and Goldibus share the same voice actor, Chikao Ōtsuka)
* Tech Sgt. Chen, although not Scottish, is the equivalent of Scotty, (badly) operating their transpo... sorry, "digital conveyor".
* Tech Tree wide armour penetration and also greatly damage internals.
* Tech TV lead to the Style Network getting replaced instead. This left G4 as a "zombie network" of nothing but reruns, syndicated shows, and ads until its death at the end of 2014, with the syndicated shows not even airing in the last few months.
* Tech TV of the trope, the Ending was well animated, with haunting imagery and a memorable song. Contrast with the Opening, which is just live-action footage of a tidal pool.
* Tech TV personality James Kim, who took a logging road in Oregon shown on a map as a shortcut during a family Thanksgiving vacation in 2006. The road was supposed to be closed for the winter, but a gate was left open. The family's car got stuck in the snow, and Kim left to seek help, but died of hypothermia.
* Tech TV, they just converted the channel to fully in-house and opted to not carry

those channels.
* "Têtes à claques" video, the amazing power of the "Willi Waller" (an ordinary potato peeler) is contrasted with the difficulty of peeling potatoes with one's fingernails (0:49).
* Teckla, which has a Teckla as the viewpoint character, suggests that Teckla only seem cowardly out of necessity because they're at such a disadvantage to other Houses.
* Tecktonik. Xtreme Kool Letterz (in particular the use of "ck") is also very popular amongst its practitioners around the world, either for individual aliases or group names.
* Tecmo rather than their movie names and Stephen Chow himself being the team's captain).
* Tecmo's Deception appear in the plot; they must be specifically summoned by luring a Merchant and a Pirate.
* Tecmo's Deception has this little blurb on the back of the jewel case:
* Tecmo's Deception is the Psychic, which is made up of young girls who can telekinetically throw knives at you.
* Tecmo's Deception, which can fire laser-like beams at you from a distance.
* Tecmo swears to get his revenge against Namco, who he carries a huge grudge towards...
* Tecna's outfits have gotten progressively more Stripperiffic as the series went on, starting out with a full bodysuit, then a pretty, sort of tech-looking tube top and skirt, and now her even less covering Sophix (the outfits have also gotten less sci-Fi looking, which is
* tecnicas, Amapola intentionally got disqualified by missile drop kicking Diana La Cazadora before she could make Polly Star tap out.
* tecnicos, but one who prioritized taking down BDK over anything else, meaning he wasn't paired with other rudos during this time and had no designs on betraying the tecnicos.
* tecnicos to battle against El Legión de Puerto Rico but then disappeared from lucha libre before making an unexpected return, leading El Comando Caribeño against his countrymen.
* Tectonic Fragdrill, a gigantic stationary drilling platform for Genestealer Cults. It can damage anything that comes close and even cause earthquakes by drilling into the planet's crust. Some cultists can also arm themselves with smaller rock drills, which are capable of boring through multiple enemies with a single attack.
* Tecton's powers and equipment let him create targeted, localized earthquakes.
* Ted 2: "All units, we have a 3-17 on Maple Drive. Area units please respond."
* Ted 2 has examples where the tag is actually what Ted and John are using while posting embarrassing photos of the other (John drenched in semen samples: "#GrrrMondays"; Ted smoking through a penis-shaped bong: "#MyAmazingSummer"; John hit by a used diaper: "#ShitHappens").
* Ted 2 has Ted quite shocked by not only what John has in his collection, but how it's organized!
* Ted 2 that discarded all character development from the original, as well as focusing too much on Ted himself.
* Ted Alexandro has a bit about how his neighbors called him by the wrong name once, and he deliberately never corrected them. It was years before they found out:
* Ted, and everything he stands for was a bad choice to review MacFarlane's directorial debut. Who'd a thunk it?
* Ted and he instantly becomes a celebrity for a while. But after a while, as Patrick Stewart explained the best, "nobody gives a shit"
* Ted and his fiance Stella has one after Stella's sister told them her fiance left her and she can't get a refund but it leads to a
* Ted and his high school/college girlfriend Karen. They'd have a cycle where he'd catch her cheating, break up, then eventually get back together, much to his friends' irritation.
* Ted and Lily. Notable in that, since Lily's been Marshall's girlfriend since the

day he and Ted became roommates, and Ted and Marshall have been
* Ted and Lily occasionally have this kind of conflict over Marshall, but tend to act out their possessive and jealous impulses on Marshall rather than each other (partly because they themselves were
* Ted and Marshall are in some tense situation together. Marshall stares intently at Ted, and you can hear his thoughts in voiceover: (Ted, we've been friends so long that I know you can read my thoughts by now. Go get Lily). Ted, staring back, nods and leaves. Subverted in that he comes back with something else completely, as he thought Marshall wanted something
* Ted and Marshall's college friend, Steve, is known as "the Blitz" who is prone to miss all the cool things that had happened. It's said to be a "curse" in Wesleyan which is passed down to each generation. In "Blitzgiving", Steve is free from the "the Blitz" curse after it was passed down to Ted, who went to sleep early but missed out what his friends had been up to after he left the bar. Then, it was passed down to Barney who took the wrong cab going to Zoey's house. By the end of the episode, Steve becomes "the Blitz" again.
* Ted and Natalie had apparently gotten together and broken up three times.
* Ted and Robin break up because they both want different things from life. Ted actually knows Robin doesn't want to get married, but on their anniversary Robin freaks out when she thinks Ted is proposing to her, forcing them to reevaluate their relationship and ultimately admit they can't keep postponing confronting the fact they can never be happy together in the long term.
* Ted and Robin break up very amicably with no heartbreak or fighting whatsoever (after realizing that they wanted completely different lives and didn't want to force each other to compromise), and not only remain very close friends throughout the series but it is revealed that they will always remain close friends, as Robin is known as "Aunt Robin" to Ted's future children and apparently interacts with them a great deal. They are even platonic roommates in seasons 4-7, and Ted has promised to be Robin's best man should she ever get married.
* Ted and Robin do this a few times throughout the series. S1: Ted —> Robin then Robin —> Ted then Ted —> Robin. S4: Robin —> Ted. S5 and S7/8/9: Ted —> Robin.
* Ted and Robin had this type of relationship in "Benefits", as part of the writers' continuing efforts to have them hook up at least once a season. In a neat little twist, despite a few worrying implications of
* Ted and Robin have just had their first fight, and are talking it over with their respective best friends:
* Ted and Robin in the finale. While a good point is made that Ted always had feelings for her, her behavior throughout the episode, which is basically tantamount to abandoning her friends because she was no longer comfortable with their dynamic, simply does not sit well with a lot of fans.
* Ted and Robin which had been going on for most of the seasons. Then, Ted decided to
* Ted, and the fact that Ted has spent his whole life living off others and has consequently never been to school, had a job or eve learned to live on his own, so when he actually does need to find work, all he he can manage is a piss-poor cashier job at a crappy downtown grocery store.
* Ted and Zoey in season 6. Ted insists that they actually have a very healthy relationship and merely "challenge" each other instead of agreeing about everything like Marshall and Lily. However, Future Ted admits that in hindsight, Lily and Marshall's relationship was much more functional and his own relationship with Zoey was a disaster.
* Ted appears to get run through by a sword in medieval England, causing Bill to mourn him ("Ted, don't be dead, dude!"). But it turns out Ted fell out of the armor just when he hit the ground; the armor got stabbed, not him. (Never mind the fact that he was completely strapped into this complex outfit.) It's also a
* Ted as he is deliberately trying to get fired from his job by either openly insulting his boss or having sex with an employee during work.
* Ted, a yearly conference, places most of the recorded presentations on its

website under the Creative Commons license and has over 500 listed as of this writing. Good luck getting through them all in under a month.
* Ted Baxter did this in at least one of the "Teddy Awards" episodes of
* Ted Baxter reading the news and acting as the face of the network), and in the latter seasons as Baxter's character was softened — at Ted Knight's request — the emphasis was less so on his mistakes.
* Ted becomes the Mother's second love as their meeting allows her to move on from grieving her first love, who died when she was 21. She spent several years being single and later was in a relationship with another guy, but it wasn't love. She and Ted are soulmates.
* Ted Blumberg once recounted a game of Scrabble with his younger sister during which she played the word "PLRTNYP", and then dared him to look it up in the dictionary. He found the word in the dictionary, defined as "word only used in Scrabble", written in crayon.
* Ted briefly dates a woman who is a graduate student at the college where he is teaching architecture. College rules actually prohibit professor-student relationships. Ted finds this ridiculous in their case since he is only a few years older than her and she is an economics student and never will interact with him academically. The relationship does not last long enough for this to matter.
* "Ted"; Buffy is seen sitting on a swingset after her problems with
* Ted" Buffy redresses Angel's hands from his wounds sustained in the episode before. She's babbling on about what's happening in her life before it turns into a sweet moment between the two of them.
* Ted" - Buffy tries to duck out of miniature golf with her mom's new suitor. Willow backs her up but Xander will have none of it.
* Ted Bundy: At one point Ted follows a woman home and watches her undress in front of a window while he masturbates. A revolted neighbor throws a bucket of water on him.
* Ted Bundy does this with one of his victims, carrying the body out nonchalantly as random strangers pass by.
* Ted Bundy: Part of the reason he was able to elude the authorities for so long was his generic looks, which allowed him to completely change his appearance very easily.
* Ted Bundy's initial capture was this: On August 16, 1975, an off-duty cop driving around his own neighborhood in a suburb of Salt Lake City saw a Volkswagen Bug that didn't belong there driving with its lights off. Bundy promptly took off. The cop eventually chased him down and cited Bundy for failure to stop for an officer and possession of burglary tools. A detective connected Bundy with an open case of kidnapping and attempted murder. He was soon linked with some two dozen murders and became America's most notorious serial killer. This happened
* Ted", but don't expect anyone not a stickler for pronunciation of the Italian language to ever do so.
* Ted" by billionaire Nick Hanauer in which he warns his fellow 0.1%ers that unless they step up and do something to counteract the rapidly rising inequality in US income and wealth distribution, modern-day versions of such mobs are almost guaranteed.
* Ted can't so much not keep secrets as he doesn't understand why something should be a secret unless specifically told so. For example, when Stella told him
* Ted Chaough has an affair with Peggy, his head writer. He wants to leave his wife for her, but breaks it off very soon and leaves Mannhatten. He insists he loves her and Penny is very hurt by his treatment of her.
* Ted Chaough has an affair with Peggy, his head writer. He wants to leave his wife for her, but breaks it off very soon and leaves Mannhatten. He insists he loves her deeply, but Penny is very hurt by his treatment of her.
* Ted Chiang, the narrator mentions how he has "journeyed all the way to the edge of the world, and seen the solid chromium wall that extends from the ground up into the infinite sky."
* Ted claims to become "weirdly good" at beatboxing when drinking bourbon. Cut to him giving a performance at MacLaren's, complete with a mic drop and wild applause.

Immediately afterwards, Lily points out that the bourbon
* Ted crashes the Singles Week musical chairs game that Alexis has organized in order to declare his love for her in front of all the attendees.
* TedCrusty with the help of his headless dummy friend Joe, has more or less elevated this trope to comedy gold.
* Tedd and Grace have never had any love interests except each other.
* Ted Danson as Larry's friends, along with Mary Steenburgen and Rosie O'Donnell.
* Ted dates Carly, and while they barely fit this trope (he's in his early 30s, she's 21), she seems to only be dating him because she thinks he's really old (remarking that he "still goes at it like he's in his 50s"). She describes being turned on by watching
* Tedd can literally see magic if he concentrates hard enough. Unlike Luke, he can see the various subtle differences between spells and enchantments and make intuitive leaps on how it works. It even works on itself
* Tedd does note that the first time gender-bending, their new genders' thoughts are exaggerated, which played a part in everyone's storyline during the event, but the only one whose gender-bending mental state was a major plot point was Susan, as it helped her recognize her hangups with men.
* Ted Dekker, Danny Hansen drugs a man into unconsciousness and cuts out a piece of tongue before deciding that the man didn't didn't deserve to live on even like that and kills him anyway.
* Ted Dekker is that Thomas Hunter receives a head injury and wakes up in another world. The action is then split across "our world" and that other world: every time Hunter falls asleep in one, he wakes up in the other.
* Ted Dekker's Circle series. The first three books came and it was quite a gripping story that seemed to lead to a happy ending. But then along came Green where
* Tedd, for his part, while his libido hasn't really changed, has lost a lot of his
* Tedd gets this at times from the football players that are shown. The
* Tedd himself also counts. Though as noted above he's half-Japanese, the art style doesn't make him look any different from white characters (well, he has purple hair, but
* Ted DiBiase and took umbrage when Dusty invited a round woman in the audience to be his valet.
* Ted Dibiase apparently did not have the best relationship in junior's developmental years. Sr. attempted to make up for it by spoiling his son as an adult.
* Ted DiBiase, as at times he would engage in evil behaviour with no significant personal gain whatsoever, such as when he offered a young child $100 if he could dribble a basketball ten times without dropping it, then kicked the ball out of the child's hands halfway through.
* Ted DiBiase, but Honky refused and threatened to leave WWF with the belt, so WWF caved in and allowed Honky to keep the belt, and gave Randy Savage the WWF title at WrestleMania IV to make up for it.
* Ted DiBiase: Debuted in the 70s, made his career with the "Million-Dollar Man" gimmick.
* Ted DiBiase had a series of "Country Whipping" matches, in which both men had a short strap to use during the match.
* Ted DiBiase. He did whatever his boss wanted and took scores of abuse both from opponents and DiBiase himself. At the 1991 Royal Rumble, after making a simple mistake hitting his boss by accident, Virgil gets beat down by DiBiase and tossed out of the ring. After the match, DiBiase gets on the mic to demand Virgil come in and wrap his Million Dollar Belt around his boss's waist. Virgil enters with the belt...and drops it at DiBiase's feet. DiBiase snaps at Virgil to do it, reminding him how the man's mother owes so much to this job. As Virgil leans down to get the belt, DiBiase turns to laugh at the crowd...and as he turns around, Virgil leaps up and nails him in the face with the title, causing the crowd to erupt.
* Ted Dibiase Jr, one of the laxest promotions booking wise, once stripped Taya

Valkyrie of the Reina De Reinas for using an illegal hold to win the belt from Ayako Hamada, even though the match was No DQ.
* Ted DiBiase, suffered a massive heart attack during his match July 2, 1969, in Lubbock, Texas against Man Mountain Mike; when other wrestlers (including Man Mountain Mike), ring attendants, the referee, and the promoters realized what was happening, the match was stopped and CPR was performed, but DiBiase died that night at the hospital at the young age of 45; his death was later linked to a pre-existing health condition.
* Ted DiBiase, who could sound folksy and charming even while deliberately cheating a little boy out of a chance to win some of his money.
* Ted didn't like his rune, the Soul Eater, and at one point gave it up but then he took it back and lived for hundreds of years more.
* Teddie, though he doesn't realize why that is. His friend Rise even comments on how unusual it is for a girl to actually make him embarrassed.
* Teddie. Unfortunately for Teddie, his immaturity, perverted habits, and lack of commitment fail to win any girl over.
* Teddie, who is a being from beyond the TV, also manages to slip into society quite easily (well, at least
* Tedd is a straight example. He likes this form of shapeshifting because his androgynous face becomes an advantage while close enough to Tedd's own form and he likes to feel attractive. Once this problem became moot
* Teddiursa is a small teddy bear. However, when it evolves at Level 30, it becomes the dangerous Ursaring. Ursaring is a
* Ted does address the issue at one point, to hilarious effect; "This whole pedophile priests thing is all out of proportion. If there are 200 million priests in the world and 5% are pedophiles....." *cue look of hilarious horror*
* Tedd points out that he forgot to shout out a "pointless Japanese name" for the last attack he used; mortified, Elliot asks for a do-over.
* Tedd's father is a higher-up in a mysterious government agency that monitors and controls the paranormal, and their mother
* Tedd, when he learns the party theme was for his benefit, and Grace is now blaming herself for not realizing he wouldn't be comfortable.
* Teddy Bears' Picnic. After having the recruits peel potatoes as a punishment, he decides he's changed his mind and orders them to glue the potato skins back on.
* "Teddy Bear's Picnic," featured in Spike & Mike's Sick & Twisted Film Festival.
* Teddy (Brigit Mendler) has a few chances to sing on the show, once for a talent show, a contest, and an audition for a school musical.
* Teddy feels sympathy for Henry, a patient who has a chronic illness and marries him because he has no insurance and can't afford treatment. She eventually falls in love with him and agrees to a romantic relationship, but he dies soon after.
* Teddy Geiger, transgender singer known for the hit "For You I Will (Confidence)".
* Teddy Hart got fired/black balled for getting in a fight with another wrestler? Again? Teddy Hart got fired/black balled for deciding not go with the previously agreed finish? Not the first time. Teddy Hart was selling cocaine? Sure, why not? Teddy Hart was acting out gay for pay chloroform fantasies and passing them off as custom matches? Who cares, why isn't he here now? Teddy Hart was fined for failing to control one of his many cats? How quaint. Teddy Hart got arrested for enabling Masada's public drunkenness and disturbance of the peace? Whatever you say. Teddy Hart is being investigated for domestic abuse/kidnapping/murder? At this point fans don't even try to guess why Teddy Hart doesn't appear on a show they thought they'd see him on. They just wait and debate. Are his various misadventures his refusal to clean up? Has he really cleaned up but remained an improbably powerful
* Teddy is ritualistic to the point of becoming violently angry when he's unable to eat at Bob's restaurant for a single day, tends to insert himself in Bob's family issues despite not even knowing his last name, is obsessive to the point of trapping people in his house when his pet guinea pig dies at a party, is shown to be a hoarder in one episode, selectively hears what he wants to, and has a habit of oversharing.

* Teddy London that's trying to break into our world. Since then, he has confronted vampires, werewolves, ghosts and the devil himself... though none of them are exactly like the myths that inspired them.
* Teddy Long is best known as a referee, or maybe as a manager, or a general manager, or a political activist...
* Teddy, one of Devlin's outlaws, is dressed in a Confederate uniform in
* Teddy Roosevelt encountered this trope while exploring Brazil in 1913. The former President attempted to travel down an uncharted river in dugout canoes. When they encountered a waterfall, the group attempted to carry the heavy canoes past it. However, they encountered so many waterfalls that the group eventually resorted to just throwing the canoes over the falls and hoping they weren’t smashed. The absurd number of waterfalls (and the occasional need to carve new canoes) became such an obstacle that starvation and illness threatened to destroy the group. Roosevelt barely survived the journey, and some members of his party died along the way.
* Teddy Roosevelt: You So Crazy created by Alex Hirsch for 24-Hour Toons.
* Teddy Roosevelt: You So Crazy for the "24-Hour Toons" project. The short claims that Theodore Roosevelt had twenty-six split personalities (several of which served on Roosevelt's cabinet), that he attempted to wage war on the sky, and that he was ultimately overthrown and eaten by William Howard Taft, "the fattest man in America".
* Teddy Ruxpin has an original birthday song called "It's Your Birthday".
* Teddy Ruxpin have had trouble searching for him online due to having believed since childhood that he was called "Teddy Ruck Spin".
* Teddy Ruxpin lessons in his storybooks. This partnership ended when it was revealed the Teddy Ruxpin toys were manufactured by child labor. Oops.
* Teddy Ruxpin seems to be popular with those with learning disabilities, since the toy teaches children how to read.
* Teddy Ruxpin was first made by Worlds of Wonder from 1985-1988. When they went bankrupt, Hasbro made their own version. Yes! Entertainment made a version of toy in 1998, followed by Backpack Toys and Wicked Cool Toys, who currently owns the rights.
* Teddy Scares had a series of graphic novels published by Ape Entertainment.
* Teddy Scares line is that teddy bears rejected and outgrown by their owners have come back as undead monsters. The best examples are Rita Mortis and Redmond Gore, who are both very violent and antisocial.
* Teddy Scares wears a sack over his head and likes to kill people with his axe.
* Teddy Sears (Hunter Zolomon) is so strong that some think Accelerated Man is a good twin of Hunter Zolomon.
* Teddy starts off his bullying of Gray by dumping cola on him, dunking his schoolbag into water, and marking his back with a giant black X. When Gray retaliates, he does so by soaking Teddy's prized backpack in the rain, knocking him out with a cola can, and then topping off with the X across his back.
* Teddy, who is killed in the first scene but due to the film's Anachronic Order
* Ted-Ed Riddles. It is easy to make fun of the arbitrary rules (and many of the comments do that). However, the videos are well animated and the riddles themselves are interesting to solve (possibly
* Ted fills Robin's living room with roses and brings her tons of chocolate as part of his Grand Romantic Gesture. The main part is hiring musicians with blue instruments to play for her.
* Ted first says he's going to use the stalactite to stab the cans open, but realizes that even if they get the food, it'll have no real effect; they'll still be at the mercy of AM, so he quickly performs a Mercy Kill
* Ted gives Stella flowers at the end of their two-minute date, which she politely refuses because she's allergic. She's charmed though.
* Ted has a big beef against the rival architecture collective "Sven".
* Ted has a habit of of writing letters to himself after his breakups so that in the future, if he is tempted to start dating one of his exes, he can go back to the letter and be reminded of why they broke up to avoid making the same mistake. Some

of the previous episodes become
* Ted has been in love with Robin for the whole season 1. In the S1 finale, he's convinced he has to make it rain to keep Robin in New York (otherwise she will go on a company trip and might get together with her colleague). Amazingly, it starts raining heavily and Ted heads to Robin's. Ted is soaking wet and convinces Robin to go outside as well, though he comes to her door first and they start kissing violently.
* Ted Healy decided to split from his back-up comedy players. Healy faded into obscurity. Not so for
* Ted hires his ex Alexis as his receptionist, a move which makes little sense outside of a
* Ted. His boss then tells him "You're promoted." Earlier in the film, during Ted's job interview, he tells off the same guy, who then immediately hires him.
* Ted, however, and Donny goes after Ted again when he goes to Comic-Con. Subsequently, after he injures John, Ted exposes Donny to the security using the same trick he used to lure him out of hiding, and Donny is last seen being dragged away by the guards to presumably be arrested for stalking, kidnapping, and attempted murder.
* Ted Hughes, his sister getting kidnapped and Ffangs setting off to find her. The last line of the book is "The adventures of Ffangs will be continued in the next book", but the sequel was either never written or never published.
* Ted is a comedy about a teddy bear named Ted who comes to life as a result of a child's Christmas wish. Years later, the boy is all grown-up and struggling to become an adult. Ted is a slacker who just wants to drink beer and smoke pot and wants his best friend to do the same. Not scary, but still bad news.
* Ted is alone in season eight when Marshall and Lily are with baby Marvin, and Robin and Barney are getting ready for their wedding while Ted sits alone in the bar.
* Ted is a real toy. Many comments on commercials (and some videos of the cartoon) for the toy have people stating something about Ted in them.
* Ted is a stuffed bear who gained sentience after his owner made a wish. 27 years later, he's still around but has since become much cruder.
* Ted is guilty of causing this twice with his ex-girlfriend Natalie, both times not even being aware that it was her birthday. The first time he breaks up with her, he does it by leaving a message on her answering machine, which is played in front of everyone at her surprise birthday party. The second time, he does it publicly in a restaurant, again not even being aware that it was her birthday. Understandably upset he did it twice and didn't even consider it was her birthday both times, Natalie uses her Krav Maga skills to beat him up.
* Ted is supposed to be the most levelheaded, but is a chronic liar, willing to break laws to achieve his means, and dreams of completely unrealistic things. Bishop Brennan is the only character who can see Ted for what he really is, which is why they mutually hate each other. The creators have noted they were inspired by
* Ted is the main character in the first few episodes. Later, he gradually becomes less important as focus shifts to
* Ted is trying to defend his ownership and occasional wearing of red cowboy boots, leading to this exchange:
* Ted, John's teddy bear drives John's car, using built-up pedals so he can reach them.
* Ted: John was such an outcast as a kid that even the kids who were getting beat up by bullies would shun him. The reason he made his wish for Ted to come to life was so he could finally have a real friend. It was such a traumatic experience for him that he refuses to ditch Ted, even as Lori points out he has other friends now.
* Ted Jr. is very jealous of Daniel for having his wife Tawny's affections in
* Ted Kaczynski (better known as "The Unabomber") who was, in fact, an assistant professor of mathematics at UC Berkeley between 1967-69.
* Ted Kaczynski was exposed as the Unabomber by his brother David when the latter read the Unabomber Manifesto and found not only similar themes to an essay Ted wrote in college but also the sentence "You can't eat your cake and have it, too"

as opposed to the usual idiom "You can't have your cake and eat it too". David had only ever heard that alternate phrasing used by Ted and his mother.
* Ted Knight used to get irritated because people kept confusing him with his
* Ted Kord in the comics was killed by a headshot from Max Lord after discovering his access to Brother Eye. In the series, it is revealed he was assassinated by Sportsmaster and Deathstroke in their attempt to acquire the Blue Beetle scarab originally belonging to his predecessor Dan Garrett.
* Ted Lasso is Rebecca, the new owner of a British soccer team, wants to destroy it as it was the only thing her ex-husband loved. So she hires the titular character as the new coach...an American who has never coached soccer in his life. Despite that, Ted starts pushing the team into becoming winners. Ends up subverted as Rebecca realizes how many people will be put out of work if the team goes under and she refuses Ted's resignation to build the team into real winners.
* Ted Lasso, Sam learns that Dubai Air, the sponsor of his football team, is causing extreme environmental damage in his home country of Nigeria and bribing the government to look the other way. In response, he pulls out of an ad campaign Dubai Air was featuring him in, tapes over the sponsorship logo on his uniform (with the rest of the team then doing the same in support) and openly accuses the Nigerian government of corruption during the post-match press conference.
* Ted Lasso shows up in one episode, but they're largely irrelevant to the plot.
* Ted Lasso's therapist Sharon complains to her own therapist about Ted's constant deflections:
* Ted Lasso, where characters frequently laugh at each other's jokes. It's a subtle but effective way to demonstrate the show's emphasis on positivity and relationships. One of the earliest signs that Ted is winning over the other characters is that they are consistently amused by his jokes and wordplay.
* Ted Lewis were both replaced with Craig Blair as Giovanni and Mr. Contesta. However, when Blair quit working for the studio, the two were brought back to reprise their respective roles.
* Ted looks through the Alicorn Amulet for a "make-me-sober-or-kill-me" spell the day after drinking a lot of Diamond Dog rotgut. It works by purging all the alcohol from his body at once, through every available orifice. Fortunately there was a cleaning spell cross-referenced with it.
* Ted Maher was more of a caretaker/nurse for the ailing Monaco billionaire Edmond Safra, but the guy was an ex-Green Beret, hence his $600-a-day pay as a bodyguard.
* Ted — she hates him but the sex is great. When she "dumps" him, he drives off with the line "you're no longer my number three!"
* Ted meets the mother of his children at the train station when it's raining. He's wet because he doesn't have an umbrella and she encourages him to
* Ted Mosby is a Jerk!", which includes a 22-minute song about how horrible Ted (actually, Barney using his name) was to the woman who made the webpage.
* Ted Nugent, making fun of his pro-firearms position in "I Don't Wanna Know Why the Caged Bird Sings" and his support for the Republican Party in "Politically Inept, with Homer Simpson".
* Ted Nugent's "Stranglehold" is now selling VW Jettas. Strange, considering Ted is well-known to be from Detroit/Michigan. Also, there's the lyrics, which one wouldn't normally consider family-friendly.
* Ted occasionally returns the favor for Barney, albeit not always willingly. In season three Marshall points out that according to Barney's
* Ted Poe, who now represents TX-2 in Congress. He loved doing that kind of thing.
* Ted Raimi. Each of the other two (Jett and Jace) appears separately in a different episode.
* Ted returns from his solo honeymoon having worked out the whole time and Alexis checks him out only to be
* Ted Reynolds features quite possibly the ultimate example: the ship in question was sent out by a previous (human) galaxy-wide civilization to colonize one of the Magellanic Clouds, and is now returning. It's the size of a (dwarf) planet, has its own gravitational field, and (as the protagonist eventually realizes) contains a population nearly equal to the total population of the galaxy, since it's inhabited

in three dimensions rather than just on the surface, as with habitable worlds.
* Ted, Robin and Barney go through this several times, whether together or with their respective lovers (when the break up isn't permanent).
* Ted says "I'm in love with you" to Robin on their first date in the pilot episode.
* Ted's Caving Page, a backdated hoax that attempts to explain all of the supernatural elements of Ted's story with an added chapter.
* Ted's Caving Page. Even before the creature appears, the darkness of the cave and its claustrophobically tight passages are described in harrowing detail.
* Ted's cousin also does one of these when her son asks her what a "'
* "Ted's Pants" (a.k.a. "Dance Dance") as well. Fall Out Boy songs are quite common for this.
* Ted's parents. At one point, Ted's father introduces a suitor to Ted's mother nine months after their divorce.
* Ted's parents pretend to be happily married while they have actually been separated and dating other people for months.
* Ted talks like this all the time, especially during the college flashbacks, because he is — in the other characters' own words — douchy like that. And his on-again/off-again high school/college girlfriend, Karen, talks like this all the time too.
* Ted the Caver webfiction, a Jack Russel terrier named Trip refuses to go into a sinister cave the protagonists are investigating.
* Ted: The eponymous teddy bear has a desire for his girlfriend to finger his tag, most likely because it's the closest thing to a lower body orifice he has, seeing that he's a magically animated teddy bear and all.
* Ted the lawyer comedically threatens to kill himself numerous times over the course of the show. Ted also makes the occasional oblique reference to murdering Dr. Kelso. "Bloop..." certainly comes to mind
* Ted the lawyer. Many, many times he would be overheard giving lovey-dovey 'I miss you sweetums' talk over the phone. Sounds like he finally found a girl, huh? Nope. It's his MOM. Other dialogue suggests much wrongness, like how her feet are cold.
* Ted Tonate murders Detective Candice Arme because she sees him trying to steal a bomb to sell on the black market.
* Ted Tonate wears a pair of goggles that can extend to about five feet in length and act as a pair of binoculars.
* Ted topped the box office charts in the following week, repeating the gross of its debut!
* Ted tries to recall the names of his past dates from photographs by associating them with either the occasion ("Bertha" for a girl he met at a birthday party), or something in the picture. He gets them all wrong.
* Ted, trying to rescue him, accidentally jumps off the subway turnstile and is sent to court causing him to miss the flight for his dream job in Chicago.
* Ted Turner among the cast), and later became CNN's senior entertainment correspondent.
* Ted Turner, and competitive sailor, even captaining an America's Cup-winning boat)
* Ted Turner built his media empire on repeated airings of this movie, though that distinction more properly belongs to some of the other films on this page.
* Ted Turner in an attempt to compete with MTV. However, most cable providers didn't want to carry another all-music channel, and it was shut down after only a month on the air.
* Ted video invokes this trope to illustrate chemical collisions (with parallels between particular orientation and amount of energy in the collisions).
* Ted was the best. We would all just hang out in his trailer and be like, ‘Hi, John Ritter!!’ and he didn’t care. And, we got to shoot at a mini-golf place.”
* Ted Wheeler's utterly clueless about what is going on around him with his family. In Season 2, we see he has a "Reagan/Bush '84" sign proudly displayed

outside of his house.
* Ted. While he no longer has that status, he still has an obsessive fan named Donny, who wanted his own magical teddy bear when he was a kid. When his father denied him one, he vowed never to deny any similar request for his own son. Donny and his son Robert first attempt to buy Ted off from John, but when that didn't work out, they resort to kidnapping him.
* Ted Whitney's only major acting credit was as King Terenas Menethil II in
* Ted Williams is widely known as one of the greatest hitters in the history of baseball: but he was also an excellent pilot (John Glenn's wingman), and a master fisherman: he was inducted into the IGFA Fishing Hall of Fame (yes, there is a fishing hall of fame).
* Ted Wong's parents divorced when he was ten. His mother didn't want him and left him with his father, who bought him a condo twenty minutes away and then ignored him unless he needed something. Ted was basically forced to raise himself (except for a monthly maid and a "wise mailman"), and the worst part is that he doesn't see anything wrong with this situation until his horrified friends point it out.
* "Teeeen Girl Squaaaad! Teenage girls between the ages of thirteen and nineteen!"
* Teekkarivanukas and get unsurprisingly soused. Cream liqueur is especially suitable for this stuff.
* Teekyuu: Each episode is only two minutes long, including the opening theme, so a lot of the humor goes on at breakneck speeds.
* Teekyuu is to combine this with either complete non-sequiters or dumb puns to cause the viewer (and frequently other characters on the show) to only realize something weird has been said once the episode is over.
* Teenage Bottlerocket has a song called "Headbanger," about a "heavy metal party" full of people like this, and singling out one guy who's headbanging so much it becomes a serious health risk.
* Teenage Bounty Hunters: has sisters Blair and Sterling Wesley as a pair of protege bounty hunters for former cop turned bounty hunter, Bowser Wilkins. The girls are unusually talented at it despite their occasional screw-ups and they're from a prominent wealthy family in Georgia so they can navigate the Georgian upper crust where Bowser can't.
* teenage boy whose neighbor has been bullying his family. However, the woman is unable to bring herself to do it, and the other attempt is interrupted by the FBI.
* Teenage Death Songs, ends with the protagonist digging up his girlfriend's grave and climbing into the coffin with her. What he does then is left fortunately ambiguous.
* Teenage Death Song "Teen Angel" is a skewed priority if ever there was one. The girl puts herself in the path of a speeding train because she wants to retrieve her boyfriend's high school ring.
* teenaged goblins who are good-aligned — for the explicit reason that it cheeses off their parents, who are Evil. "Listen to me, young man, you will drink the blood of the innocent and you will LIKE IT!"
* teenaged student friends) to do inhumane courses designed for Military training. They chose him over Logan's sessions, leading to many one-liner jokes by the Professor.
* Teenage girl Megan has a crush on the at least 30-something Preacher in
* Teenage islander Isma never knew her mother, who according to her father was a mermaid, and lost him to an accident a few years ago. However, the charm left on the door by her mother helps protect her from the island's curse, and
* Teenage Jinchuriki Shinobi: Himeko's true, TRUE form, Empress Isis, who pops out of nowhere to defeat Kira. There was no explanation for this whatsoever, especially since Kira was a demon god.
* teenage member of the Crazy 88s gang, with the flat of her blade against his backside:
* "Teenage Mummies In Love" has a scene where Eric and Trevor are running away from a real mummy, and this trope ensues, albeit with school lockers rather than doors.
* Teenage Mutant Leela's Hurdles", exposure from age-reversing tar makes the

characters younger; this is eventually cured by diving into the Fountain of Aging.
* Teenage Mutant Leela's Hurdles", Farnsworth is at a health spa to get "Youthasized" and the attendant encourages him to take a bath in hot tar. Farnsworth immediately takes his clothes off.
* Teenage Mutant Milk-Caused Hurdles of a teacher (from the military, no less) whom he gets a crush on. However, he grows jealous because Skinner feels the same way about her.
* Teenage Mutant Milk-caused Hurdles", The "La-Z Rider Couch Gag" is a throwback to a more serious 80's animation style, with an overlay effect representing visible tracking lines from the worn and dirty video heads of a VHS player.
* Teenage Mutant Ninja Turtle (2012) is never seen without food in his mouth and is so fat he is never seen standing up.
* Teenage Mutant Ninja Turtles 13 additional episodes were produced for Syndication in 1990, in addition to the first 26 episodes on CBS. The final episode count is 193.
* Teenage Mutant Ninja Turtles (1987): Although possibly just an idle threat, the Shredder makes an awful lot of fuss over dining on turtle soup.
* Teenage Mutant Ninja Turtles (1987), and then he transforms into Bugman.
* Teenage Mutant Ninja Turtles (1987): An episode titled "Phantom of the Sewers" has the eponymous character haunting a pizza restaurant. The Phantom even has a secret lair full of booby traps! It turns out that his business partner had betrayed him (as he wanted to use the robots he'd built) and threw chemicals in his face, disfiguring him. But in another twist, the "chemicals" were actually paint, so his face wasn't actually disfigured at all.
* Teenage Mutant Ninja Turtles (1987). April suffered a particularly bad case of this, as she could look like a foxy lady in one shot, and then an escaped mental patient in the next one. The differences evened out in the second season, with cheaper looking backgrounds and animation, but also much better and more consistent character designs.
* Teenage Mutant Ninja Turtles (1987): Bebop and Rocksteady are a pair of incompetent minions. No wonder Shredder never wins.
* Teenage Mutant Ninja Turtles (1987) Bebop and Rocksteady sometimes carried April O'Neil like this when they kidnapped her, and one of the turtles would do this to her if they caught her after she fell from a high place.
* Teenage Mutant Ninja Turtles (1987): "Case of the Hot Kimono" sees Don Turtelli using this term in response to April and her mystery writer aunt ("Ninja nutcakes and the Queen of Sheba!").
* Teenage Mutant Ninja Turtles (1987), chemicals with absurd mutating properties, silly adventures, and, to top it off, an equally campy theme song.
* Teenage Mutant Ninja Turtles (1987) during a hospital blackout. John assures her that it's all right because he's not her brother - when he was born, an insane nurse switched him with another baby. Krang is openly weeping.
* Teenage Mutant Ninja Turtles (1987) each other, Kazuo rather embarrassed to have such a man as a sibling. (Note that in most continuities, "Saki" is actually Shredder's given name, his family name being "Oroku"—placed before the given name, as is done in Japan—making this version something of an error compared to other continuities.)
* Teenage Mutant Ninja Turtles (1987) episode "April's Fool" April O'Neil does some modeling poses while showing the turtles and Splinter the dress she's wearing for the king's ball she was invited to.
* Teenage Mutant Ninja Turtles (1987) episode "Donatello Trashes Slash", Vern does a report on a new turtle exhibit at the aquarium. After he's finished, he goes to a rant on how he thinks it's a waste of taxpayers' money on "dirty, smelly reptiles". Unfortunately, the cameraman informs him they're still rolling. Needless to say, Donatello, who saw the report, isn't pleased.
* Teenage Mutant Ninja Turtles (1987) episode "Enter The Fly", Krang throws Baxter Stockman into a disintegrator unit because he has no use for him. It malfunctions, merging Stockman with a housefly that had accidentally entered the chamber with him and turning him into a mutant.

* Teenage Mutant Ninja Turtles (1987) episode, "Four Turtles and a Baby", as part of Shredder's plan to capture the Neutrino baby that the Turtles are babysitting, he sends Bebop and Rocksteady to the Pretty Baby Photo contest at the Channel 6 Studio, with Rocksteady disguised as a baby, and Bebop disguised as his mother.
* Teenage Mutant Ninja Turtles (1987) episode "Nightmare in the Lair" had the Turtles end up in Nightmare Land, where they faced monsters from nightmares Michelangelo got from watching horror movies. When asked what movie a giant spider monster came from, Michelangelo answers that it's actually from a nightmare he got from eating bad pizza.
* Teenage Mutant Ninja Turtles (1987) episode "Raphael Meets His Match", piratical villain Captain Filch holds the yacht crew hostage and force them to walk the plank (that goes for April) unless his ransom is received.
* Teenage Mutant Ninja Turtles (1987) episode "Revenge of the Fly", Baxter Stockman turns people including April, Vernon, Irma, and Burne into giant mutant insects with a mutagen ray gun. The turtles are able to reverse the transformations by adjusting the dial.
* Teenage Mutant Ninja Turtles (1987) episode "Rhino-Man", Shredder and Krang have Rocksteady and Bebop become superheroes so they could enter a superhero contest and receive a diamond they want.
* Teenage Mutant Ninja Turtles (1987) fast; the Turtles are able to deliver the cure by filling a cement mixer with ice cream and placing the pill inside it.
* Teenage Mutant Ninja Turtles (1987) featured construction sites as frequent places for the turtles to fight, though usually they just chased the bad guys there rather than there being any plot-relevant reason for them.
* Teenage Mutant Ninja Turtles (1987). (Followed by groans, shouting, forehead slapping, and Michelangelo demanding to change the channel to cartoons.)
* Teenage Mutant Ninja Turtles (1987) for his and Krang's attempts to conquer the Earth. In one episode, the villains trap the Turtles in Dimension X, paving the way for an easy conquest. However, the Turtles provoke the Shredder into letting them out so he can fight them head-on by pointing out that he had never personally defeated them.
* Teenage Mutant Ninja Turtles (1987) goes a step further and leaves out the voice cast as well.
* Teenage Mutant Ninja Turtles (1987) got caught by the villains on more than one occasion because her sneezes gave away her hiding place.
* Teenage Mutant Ninja Turtles (1987) had a justified example. The person calling the Turtles to tell them about the news broadcast (April) was the reporter delivering it.
* Teenage Mutant Ninja Turtles (1987) had a tendency to have villains who long avoided punishment for their actions eventually getting their comeuppance.
* Teenage Mutant Ninja Turtles (1987) had the Turtles take cover behind a stack of boxes. Raphael looks into the boxes and the following conversation takes place:
* Teenage Mutant Ninja Turtles (1987) has Shredder and his henchmen, Bebop and Rocksteady. Shredder is usually portrayed as competent, though he can provide comic relief, while his henchmen, a menacing anthropomorphic boar and rhino, are actually clumsy and cowardly.
* Teenage Mutant Ninja Turtles (1987) has Shredder, Bebop, and Rocksteady go after a friend of Irma's in his apartment. He goes to escape, only for Bebop to jump in front of the door and tell him he's not going through it. He simply replies "Oh, that's okay. I don't use that closet much anyway." Confused, Bebop turns around, opens the door, and gets buried by the junk inside.
* Teenage Mutant Ninja Turtles (1987) has Zack, a bratty kid with aspirations of being the fifth turtle.
* Teenage Mutant Ninja Turtles (1987) have "turtle communicators", which resemble flip-top cellphones, only shaped like a turtle shell, and containing a video screen and camera.
* Teenage Mutant Ninja Turtles (1987): In "Attack of the 50-Foot Irma", when Irma, who had recently been hit with a growth ray, accidentally steps on Vernon's foot.
* Teenage Mutant Ninja Turtles (1987). Insofar as a brain in a mech suit counts as

a stomach.
* Teenage Mutant Ninja Turtles (1987) in that she was a mutated human.
* Teenage Mutant Ninja Turtles (1987): In the last few seasons, the sky is red instead of its normal blue. This wasn't actually done by an alien but rather to convey the relatively more serious tone of those seasons.
* Teenage Mutant Ninja Turtles (1987): In the "The Old Switcheroo", an accident at a lab caused Splinter and Shredder to switch minds during a fight with each other. While trapped inside their bodies, Splinter and Shredder still had their real voices when they were talking in thought but had the opposite voice when talking out loud.
* Teenage Mutant Ninja Turtles (1987): Irma Langinstein. She wears large nerdy glasses at all times.
* Teenage Mutant Ninja Turtles (1987). Keep in mind that one of them is a slimy brain monster.
* Teenage Mutant Ninja Turtles (1987), Krang is an "equal opportunity tyrant"; he uses that phrase himself when he hires Lotus Blossom.
* Teenage Mutant Ninja Turtles (1987): Krang is obsessed with getting his robot body working.
* Teenage Mutant Ninja Turtles (1987), Leonardo and Michelangelo are shopping in a supermarket when two goons try to hold it up. They respond and catch the crooks, but they have to split before the cops show up, so they ask the cashier if she can ring them up quickly. Seeing as they just saved her life, she tells them it's on the house.
* Teenage Mutant Ninja Turtles (1987) liked watching a TV show that seemed to consist entirely of a man named John and a woman named Marsha staring at each other and saying their names over and over.
* Teenage Mutant Ninja Turtles (1987), "Michelangelo Meets Mondo Gecko"
* Teenage Mutant Ninja Turtles (1987) miniseries and the first four issues of the ongoing series being adapted from the first seven episodes of the cartoon, before establishing its own continuity.
* Teenage Mutant Ninja Turtles (1987) not as the protectors of New York that they actually were. It doesn't matter how much April O'Neil presented coverage, live or unedited, that they were genuine heroes, talk shows and other forms of the press would always be quick to jump on them as a menace on the flimsiest of hearsay, rumors, or stuff they pulled out of their own ass. Just for ratings.
* Teenage Mutant Ninja Turtles (1987): One episode featured villains breaking in the mansion of a pizza chain's tycoon. Raphael describes the motto as being that, if the pizza doesn't come on time, it comes cold.
* Teenage Mutant Ninja Turtles (1987) plays with this from time to time, not so much information being "accidentally" revealed, but rather, if Shredder or Krang happen to be watching Channel 6's newsfeed, and decide whatever is being reported on could work to their advantage. For example, in "Green With Jealousy", the Technodrome (now inside a volcano) experiences a severe power shortage, Bebop and Rocksteady watch Channel 6 report a story on a nuclear-powered submarine, inspiring Krang to intercept it and use its fuel to supply power to the Technodrome.
* Teenage Mutant Ninja Turtles (1987) season 3 episode "Burne's Blues", a trio of Elvis aliens abduct and tickle their victims.
* Teenage Mutant Ninja Turtles (1987) seemed to have a thing for April.
* Teenage Mutant Ninja Turtles (1987 series), Michealangelo apparently does this to April O' Neil when he's untying the ropes that hold her to a chair. April O'Neil's expression when he's doing this really cements the scene.
* Teenage Mutant Ninja Turtles (1987) Shredder awakens a spirit of an ancient Foot clan ninja master claiming to be the current grandmaster of the Foot clan. Splinter calls him out on this saying that Shredder does not know the Foot clan's most powerful and secret technique, the "Kur-Li Maneuver". Splinter then proves that he is a true master of the Foot style by performing the "Kur-Li Maneuver" in which he hypnotizes Shredder, paralyzing him, and then begins slapping Shredder around while doing his best Curly impression.
* Teenage Mutant Ninja Turtles (1987), Shredder was hypnotized by Splinter into

going between his and Michelangelo personalities whenever he hears their names, due to an accident caused by Bebop. However, the hypnosis was canceled out, after the same accident occurred.
* Teenage Mutant Ninja Turtles (1987) soap operas, and frequently weeps over the stories.
* Teenage Mutant Ninja Turtles (1987) theme song was "When the evil Shredder farts, these turtle boys put on their gas masks!"
* Teenage Mutant Ninja Turtles (1987). The only way to make a Zipp vanish and/or shrink is for it to eat an extremely rare metal called Regidium.
* Teenage Mutant Ninja Turtles (1987). The use of an "else" clause with "unless" likely plays on the double negative of "don't cut no slack."
* Teenage Mutant Ninja Turtles (1987) throughout the episode: He mentions that the gang they are in pursuit of "Took everything that wasn't nailed down — and even a few things that were."
* Teenage Mutant Ninja Turtles (1987) too many times; it looked legit until he found out it was under the control of two bona-fide aliens, Wingnut and Screwloose.
* Teenage Mutant Ninja Turtles (1987) tried to explain that they gained the memories of the boar and rhino that they touched and morphed into, but that doesn't explain why this doesn't apply to any of the other mutants in the show.
* Teenage Mutant Ninja Turtles (1987) upset about having to ditch the suits when Shredder aborted the plan.)
* Teenage Mutant Ninja Turtles (1987) upset when Lotus beats them up, especially when she decides to humiliate them further by tarring and feathering them as a finishing move. (Well, throwing them into a pipe that breaks, spilling tar on them; she likely thought up the feather part on a whim.)
* Teenage Mutant Ninja Turtles (1987) used this trope for its main cast, which according to Renae Jacobs (April), allowed the cast to play off each other and even ad-lib.
* Teenage Mutant Ninja Turtles (1987) was that the turtles kept getting the villain Dr. Polidorius's name wrong (calling him names like Pollyanna, Polyester, Polly-Wolly-Doodle, Polyunsaturated, Polytechnic, Polyurethane, Polynesia, Parlez-vous).
* Teenage Mutant Ninja Turtles (1987) were the ones forced to do most of the maintenance.
* Teenage Mutant Ninja Turtles (1987): When Bebop and Rocksteady meet some friends from before they were turned into mutants, they have to prove to their friends who they are. Rocksteady runs towards a wall and hits it with his head and it convinces their friends because they don't believe anybody other than Bebop and Rocksteady would do anything that stupid.
* Teenage Mutant Ninja Turtles (1987), where multiple things from the 1987 series are reimagined to be less silly, the robots are revealed early on to be adaptive, and can challenge the heroes. It's also justified: The heroes keep beating up the Foot so much, they can't recruit any more minions!
* Teenage Mutant Ninja Turtles (1987) which Shredder accurately guesses is to annoy him. Shredder makes it quite clear that he only puts up with Krang for his weapons.
* Teenage Mutant Ninja Turtles (1987) who couldn't do anything right. In fact, this Trope was lampshaded by the Shredder himself when the experiment was actually done:
* Teenage Mutant Ninja Turtles (1987) with them, but as the series went on they began being treated more like standard superheroes and walked around openly.
* Teenage Mutant Ninja Turtles (1990), Casey Jones mentions at one point that he played a sport (presumably Ice Hockey) professionally, but his career lasted less than a year before he got injured.
* Teenage Mutant Ninja Turtles (1990) contains a room where underage teens smoke and gamble.
* Teenage Mutant Ninja Turtles (1990) did most of his own stunts, save for the backflips and skateboarding.
* Teenage Mutant Ninja Turtles (1990) had this happen when April wakes up in the Turtles' den and sees them for the first time. She starts screaming and a few of the turtles follow suit.
* Teenage Mutant Ninja Turtles (1990) has a G-rated version of this between

Donatello and Casey Jones while they are fixing a truck. Part of it was that they were trying to go in alphabetical order.
* Teenage Mutant Ninja Turtles (1990) has one "insult" (actually a description) traded for another. Casey Jones reveals that he's uncomfortable spending the night in the Turtles sewer lair.
* Teenage Mutant Ninja Turtles (1990) has the whole subplot on the farm as one big quiet drama scene in an action film.
* Teenage Mutant Ninja Turtles (1990), Michelangelo starts doing the "it slices, it dices" routine as Leonardo tosses a pizza in the air and slices it with his katanas — until a slice falls on Splinter's head.
* Teenage Mutant Ninja Turtles (1990) movie. Lampshaded, as seen on the page quote.
* Teenage Mutant Ninja Turtles (1990) says she has to go to a neighbor’s house four miles away to call her boss, Casey responds, “Hey, you just saved yourself an eight-mile round tripper. You were fired.” April doesn’t take it well—either the news or Casey’s attempt at “sensitivity.”
* Teenage Mutant Ninja Turtles (1990) Shredder, and one by one they fail utterly. Shredder can only be defeated by the intervention of the previously hermitic mentor of the turtles, Splinter.
* Teenage Mutant Ninja Turtles (1990). Shredder isn't lying, however, just incorrect; he doesn't know that Splinter was rescued by Casey and Danny as the Foot were carrying out their assault on the sewer den after Shredder ordered him killed.
* Teenage Mutant Ninja Turtles (1990), Shredder orders his Foot Clan to kill April O'Neil when she begins to dig too deep into his group.
* Teenage Mutant Ninja Turtles (1990) succeed, however, in collapsing the floor and dumping everyone down into the basement turned junk shop, where things get worse for the Turtles.
* Teenage Mutant Ninja Turtles (1990): "The class is Pain 101. Your instructor is Casey Jones."
* Teenage Mutant Ninja Turtles (1990): the pizza delivery is two minutes late, so Michelangelo got the pizza at a discount. Also, the "address" was a storm drain they christened "122 1/8", making the address a bit of a puzzle.
* Teenage Mutant Ninja Turtles (1990), the police chief is threatening to arrest April's boss's son for delinquency if he doesn't get April to stop criticizing the police in her news reports. When it didn't work, April's boss was forced to fire her.
* Teenage Mutant Ninja Turtles (1990). This was deemed to dark and lines and heavy breathing was added to the final cut to imply that he survived but passed out.
* Teenage Mutant Ninja Turtles (1990) used disaffected youths to form a thieves' guild.
* Teenage Mutant Ninja Turtles (1990): while fixing a truck, Donatello and Casey Jones engage in a game involving the swapping of insults, going through the entire alphabet. (They end up on "Gak-Face" and "Hose-Brain.")
* Teenage Mutant Ninja Turtles (1990) wields one in the final showdown with devastating efficiency.
* Teenage Mutant Ninja Turtles (2003) about focusing his mind to avoid distractions.
* Teenage Mutant Ninja Turtles (2003)", a cut deep enough to wear him down and require medical attention later, but doesn't show on his skin.
* Teenage Mutant Ninja Turtles (2003), all that remains are Khan, a bunch of Foot Ninja and a digital clone of the Shredder. To add insult to injury, even Karai and Chaplin turned their backs to the organization.
* Teenage Mutant Ninja Turtles (2003) and try to escape before he's blasted out the window.
* Teenage Mutant Ninja Turtles (2003), and usually asks him to repeat himself in English this time. Though sometimes the writers sacrifice snappier dialogue to remind us that he's the smart one:
* Teenage Mutant Ninja Turtles (2003) animated series has two of these. The second, Torbin Zixx, is a mercenary who will betray everyone twice in order to complete a job. The first and more important one, however, is Foot Clan member Karai, whose

sense of honor clashes with her devotion to her father in a way that makes her impossible to predict.
* Teenage Mutant Ninja Turtles (2003) are one of these: established almost a thousand year ago in Japan, they protect the stranded Utrom aliens from outsiders.
* Teenage Mutant Ninja Turtles (2003). As part of a test, Michelangelo has to steal an object from the test area without getting caught by Leonardo. Leo set up a bunch of moving spotlights in the darkened room so that it's almost impossible to stay in the shadows. Mikey circumvents this by blinding Leo with a metal plate and stealing the object while he's blinded.
* Teenage Mutant Ninja Turtles (2003), assassin duo Mr. Touch and Mr. Go need to bump fists in order to (temporarily) access their powers: super-strength for Mr. Touch, super-speed for Mr. Go. Given that these fade in a matter of minutes, they're always together.
* Teenage Mutant Ninja Turtles (2003), Atlantis—or, as it's called by the natives, Y'lyntis—was at the center of several of the series' subplots, including the origin of the turtles' second lair.
* Teenage Mutant Ninja Turtles (2003) battle, three of the turtles and Splinter trounce his army while Leo beats him down easily, before kicking him back to his own time, but not before Raph reveals that they had defeated him already. This event is implied to be the reason why the Shredder became so ruthless after his first defeat, which would cause the events of the next four seasons, facilitating said defeat.
* Teenage Mutant Ninja Turtles (2003)..." before following the others.
* Teenage Mutant Ninja Turtles (2003) bent on conquering and enslaving the universe.
* Teenage Mutant Ninja Turtles (2003) borders on being and subverting this trope. It's also the reason he's been reduced to a brain and an eye.
* Teenage Mutant Ninja Turtles (2003)", Donatello and April encounter the Brotherhood, a race of lizard-like beings who allegedly sought to reach Earth in order to share their technology. However, Donatello eventually finds that not only does the Brotherhood plan to consume every human on Earth, they had already done so with the main inhabitants of the planet they currently lived in.
* Teenage Mutant Ninja Turtles (2003): During their first off-planet adventure, the Turtles end up fleeing from some Triceratons in a flying car, with Mikey in the "sidecar".
* Teenage Mutant Ninja Turtles (2003) episode "Tales of Leo". After a severe smackdown by The Foot two episodes ago, Leonardo is unconscious and dying. The A-plot of the episode consists of his family's conversations with him about his childhood, told in the form of flashbacks.
* Teenage Mutant Ninja Turtles (2003) episode "The Big House", where the turtles plan to escape from a Triceraton prison.
* Teenage Mutant Ninja Turtles (2003) episode "The Trouble With Augie", Donatello eventually founds a mass grave organized in this manner. While one can see bits and pieces of other types of bones, skulls are by far the most common.
* Teenage Mutant Ninja Turtles (2003) episode "The Way of Invisibility"; after capturing Raph, Hun allows him to escape, while sending some of the invisible Foottech Ninjas to follow him back to the Turtles' lair. Luckily, the rest of the heroes catch on to what's happening and meet up with Raph before he gets home.
* Teenage Mutant Ninja Turtles (2003) go down, he was willing to die before he told the Shredder anything, and his last words to the villain were to insult him, saying, "He who lives without honor will die without honor."
* Teenage Mutant Ninja Turtles (2003) going on in New York City to Donatello.
* Teenage Mutant Ninja Turtles (2003) had a DVD release whose main attraction was the final arc with the Shredder and the third season finale. It was released at least a month before the beginning of the fourth season, and included three episodes from the next season well before their network premiere. Later the entire second half of the Fast Forward season was released on DVD, two months before its premiere. Finally, the infamous "Insane in the Membrane" was never aired, but was included in a DVD that contained the bulk of the fourth season.

* Teenage Mutant Ninja Turtles (2003) had a short-lived comic book adaptation by Dreamwave, which, like the 1987 cartoon comic adaptation before it, initially adapted episodes of the actual show before moving on with original stories.
* Teenage Mutant Ninja Turtles (2003) had this happen again, when Karai attacked the turtles' second lair, completely trashing it and forcing them to relocate to a third lair.
* Teenage Mutant Ninja Turtles (2003) has a boyfriend/girlfriend example in the episode "The People's Choice", where Casey does it to April while hanging out at his grandmother's farm.
* Teenage Mutant Ninja Turtles (2003) has Casey attempting to propose to April using a hockey analogy.
* Teenage Mutant Ninja Turtles (2003), has three diagonal scars down his left cheek, which he gained from Splinter himself prior to his mutation.
* Teenage Mutant Ninja Turtles (2003) he places the last two cards, the perimeter alarm goes off. After Donatello hurries to check his computer systems, something starts beating on the front door. The Turtles go for their weapons, and the house of cards gets its very own falling-down shot before it cuts back to the door finally breaking in.
* Teenage Mutant Ninja Turtles (2003). He takes on all of the Turtles, Splinter, Leatherhead, April, and Casey with nothing but a suit and a tie. Shredder needs his armor, Foot army, and Karai/Hun to take on the Turtles alone. Truly a badass.
* Teenage Mutant Ninja Turtles (2003), his original actor Greg Carey returned to the role.
* Teenage Mutant Ninja Turtles (2003), his sci-fi elements were dramatically darker and more conspiratorial than the campy stuff usually featured on the series.
* Teenage Mutant Ninja Turtles (2003) incarnation of Master Splinter was not originally Hamato Yoshi the ninjitsu master as most incarnations are, but was Hamato Yoshi's pet rat, who learned ninjitsu just by watching his owner. For a regular, unmutated rat, that's pretty impressive.
* Teenage Mutant Ninja Turtles (2003) incarnation of the Rat King (a.k.a. "The Slayer") is made from DNA from Bishop, Splinter, among other possible sources.
* Teenage Mutant Ninja Turtles (2003): In "Reality Check", Leonardo's alternate dimension counterpart, Graviturtle, uses a white that channels his gravity powers.
* Teenage Mutant Ninja Turtles (2003). In "Return to New York Part 3", he claims to have conquered Japan for the Tokugawa Clan.
* Teenage Mutant Ninja Turtles (2003): In "Sons of the Silent Age," the flashback scene shows over a dozen merpeople revolting against the Y'Lyntians, but only five journeyed to Manhattan. It's unclear whether the other merpeople all died or if they went elsewhere in their own small groups. The merwoman speaks as if her race's survival depends on her eggs hatching, but she could have just meant her specific tribe.
* Teenage Mutant Ninja Turtles (2003): In the episode "Adventures in Turtle-Sitting," Donatello, having been stung by a mutated bug, starts mutating into a monster while in April's apartment. He's able to resist it long enough to warn April and Casey to stay away from him as he runs out of the room... only to change and attack them.
* Teenage Mutant Ninja Turtles (2003). In the fourth season of the show, it was revealed that Agent Bishop's body was slowly degenerating, and therefore needed to transfer his mind to a new one, which eventually happened, dissolving skin and all. Later on, Baxter Stockman cloned himself a new body to replace the one he had systematically lost during the course of the series, only to find it decaying as well.
* Teenage Mutant Ninja Turtles (2003). In the very first episode, Leo does this and does this good. And thru many episodes Turtles cling to the ceiling a lot. Well, its justified that all of them are ninjas...
* Teenage Mutant Ninja Turtles (2003)" involves an attempt bring it back down to Earth.
* Teenage Mutant Ninja Turtles (2003) is his head in a robot-spider's body.
* Teenage Mutant Ninja Turtles (2003) is the focus of an episode, and Raptarr from

the third such race becomes a recurring character for the rest of the show.
* Teenage Mutant Ninja Turtles (2003), it is revealed that Oroku Saki, the Shredder, had taken both identities from a man-turned-demon in ancient Japan.
* Teenage Mutant Ninja Turtles (2003), it is revealed that the Roswell incident occurred when the Earth Protection Force, led by Agent Bishop, shot down an alien ship belonging to the aliens that initially abducted him.
* Teenage Mutant Ninja Turtles (2003): Karai is trained in ninjutsu yet is also an aspiring practitioner of bushido.
* Teenage Mutant Ninja Turtles (2003), Leo's first meeting with The Ancient One is a textbook example of the trope. Fortunately he figures it out on his own.
* Teenage Mutant Ninja Turtles (2003) loves this trope, with many fight scenes taking place on the tops of speeding trucks.
* Teenage Mutant Ninja Turtles (2003): Master Splinter has moments of this.
* Teenage Mutant Ninja Turtles (2003): Michelangelo eats Pluto. Or the doughnut representing Pluto in Donatello's diagram, at least.
* Teenage Mutant Ninja Turtles (2003), New York became a battleground between what was left of the Foot, the mob, and the Purple Dragons gang.
* Teenage Mutant Ninja Turtles (2003) of the series' hundredth episode.
* Teenage Mutant Ninja Turtles (2003) (presumably) has plans, but no prototype nor back-up. This is justified, however, by the fact that several of its parts were salvaged from the remains of an alien invasion, and could not be replicated.
* Teenage Mutant Ninja Turtles (2003) recurring character Ruffington is both the "corporate lobbyist" and "gangland gun runner", being a legitimate government contractor, and selling modified alien weaponry to street gangs such as the Purple Dragons.
* Teenage Mutant Ninja Turtles (2003) revealed that the turtles had met Casey Jones when they were all kids, trying to teach him how to be strong. The turtles had disguised themselves, taking turns as to who would help him out, and Casey was using a different name (Arnold), so they never realized they'd met before.
* Teenage Mutant Ninja Turtles (2003) said "we're going to DEFCON 4!" when the Triceraton spaceships began attacking Earth.
* Teenage Mutant Ninja Turtles (2003), saying that the 1987 characters in the 2012 series are instead from another universe.
* Teenage Mutant Ninja Turtles (2003)'s Demon Shredder started as a normal human and obtained his god-like abilities after he allowed a dying Tengu to possess him.
* Teenage Mutant Ninja Turtles (2003) "Secret Origins" arc, the turtles and Splinter are taken to the Utroms' Oracle Pod Chamber, which allows them to experience the aliens' collective memory in a virtual reality environment. Unfortunately, after some sabotage by Baxter Stockman, the environment becomes deadly, and the turtles are forced to look for the failsafe embedded inside the simulation before their minds can return to their bodies.
* Teenage Mutant Ninja Turtles (2003) series, Mike can be seen riding a hoverboard in the sewers.
* Teenage Mutant Ninja Turtles (2003) series, where time-travelling demon Savanti Romero threatens the future by trying to make the asteroid that wiped out the dinosaurs miss Earth. The turtles' mission, thus, is to assure that the colony drop happens.
* Teenage Mutant Ninja Turtles (2003) sides for protecting their new friend the Fugitoid, who is the only one who can help them return home.
* Teenage Mutant Ninja Turtles (2003) supposed to spend some time in the future.
* Teenage Mutant Ninja Turtles (2003), the antagonist Bishop is a Man in Black.
* Teenage Mutant Ninja Turtles (2003) the character of Angelo Sauper was voiced by Kakihara in Japanese and Sinterniklaas in English.
* Teenage Mutant Ninja Turtles (2003). The first occurs in "Return to New York", where the turtles storm Foot HQ in order to kill The Shredder, and the second in "Enter the Dragons," where the turtles and a shitload of allies storm The Demon Shredder's keep in order to kill him.
* Teenage Mutant Ninja Turtles (2003), the Fugitoid gets this treatment after he makes his heroic sacrifice at the end of the "Worlds Collide" arc.

* Teenage Mutant Ninja Turtles (2003): The Ninja Tribunal consists of four humans turned gods after intensive, if unspecified, training; when we first see them in the present, they are shown to possess immortality, limited omniscience, and the ability to reshape reality, among other perks.
* Teenage Mutant Ninja Turtles (2003) : There was a 3-part episode "Space Invaders", which centered on the Triceratons invading Earth in their frantic search for the Fugitoid.
* Teenage Mutant Ninja Turtles (2003) there were the Foot Mystics, powerful servants of the Demon Shredder who were composed of (and commanded powers of) Wind, Earth, Water, Fire, and Metal.
* Teenage Mutant Ninja Turtles (2003): The Sword of Tengu. Legend says its creator folded the metal over and over until every impurity and imperfection was eliminated. It's actually made of alien metal.
* Teenage Mutant Ninja Turtles (2003). The transformation itself — which happens after a long illness — is fairly brief, but still enough to leave him screaming in pain.
* Teenage Mutant Ninja Turtles (2003). The Turtles get rid of Cyber Shredder for good and April and Casey are officially married.
* Teenage Mutant Ninja Turtles (2003): The turtles' Triceraton ally Zog does this to the Shredder by keeping him immobile inside an exploding ship. While he succeeds in his intention of giving the turtles enough time to escape, the Shredder survives, while he himself...doesn't.
* Teenage Mutant Ninja Turtles (2003) the Ultimate Daimyo's War Staff is not only an object of power, it represents his authority over the Battle Nexus, which is why people who try to usurp him make a priority of obtaining it.
* Teenage Mutant Ninja Turtles (2003) The Y'Lyntian arc contains flashbacks showing that the people of Atlantis were in the middle of a battle against the oppressed human kingdoms when their mutated slaves (beasts of burden, merpeople, and avians) turned on them. The slaves helped the humans win the battle, sunk Atlantis into the sea, and then fled elsewhere, establishing civilizations of their own.
* Teenage Mutant Ninja Turtles (2003), this is how the Demon Shredder meets his demise, with green fire substituting for the expected shower of blood.
* Teenage Mutant Ninja Turtles (2003), this trope is why both the Federation and the Triceraton Republic want Professor Honeycutt's newly designed Teleportal, which, the show makes clear, could be used to destroy planets with no one being the wiser by beaming nuclear bombs into the core of the planet.
* Teenage Mutant Ninja Turtles (2003) to actually be a Back from the Dead situation. Given the character, the elaboration was sort of unnecessary, except for the fact that a) said occasion involved being at ground zero of an explosion that atomized a building, and b) it allowed the writers to bring the character back yet again. Also played straight with a couple of other characters, one of which included a nifty sequence in which flesh returns to his skeleton as he is resurrected.
* Teenage Mutant Ninja Turtles (2003), Triceratons stage a very public invasion of Earth. After it is repelled, things return more or less back to normal, with some subtle differences, such as anti-alien militias, a new black market for alien weaponry, and a world more ready to accept subsequent weirdness. While the turtles are still not free to show themselves on the streets, when they do, they're immediately classified as aliens.
* Teenage Mutant Ninja Turtles (2003) uses a variation: When April's antique shop is placed under surveillance by the Foot Clan, Angel smuggles secret messages between April and Leo hidden inside a pizza box.
* Teenage Mutant Ninja Turtles (2003) uses the time scepter to send the turtles to different times and places. Michaelangelo was sent to an alternate universe where the turtles are more traditionally cartoonish superheroes. Raphael was sent to a motorcycle race on an alien world. Donatello was sent to a dystopian future where Shredder had conquered the world. Leonardo was sent to an alternate universe similar to a samurai movie which was populated by humanoid animals.
* Teenage Mutant Ninja Turtles (2003) villain who can fight on par with the

Turtles. But some of his strength, durability, and survival feats will make you think otherwise, given his penchant for bending metal with his bare hands, ripping off a support beam and using it as a weapon, and surviving falls that would seriously kill most ordinary people.
* Teenage Mutant Ninja Turtles (2003) warring empires saw the potential for it to be one, as they could use it to teleport nuclear bombs into the cores of planets.
* Teenage Mutant Ninja Turtles (2003) was cancelled after two seasons, dubbing only the first 52 episodes of the show.
* Teenage Mutant Ninja Turtles (2003) when he watches his index finger spontaneously melt off.
* Teenage Mutant Ninja Turtles (2003)", when Leonardo, Usagi, Gen, and Lord Noriyuki find themselves at a cliff, and then are soon attacked by Neko Ninja.
* Teenage Mutant Ninja Turtles (2003), where after his main body is destroyed, he is placed into a much larger, more heavily armed (literally; he's got four of them in this thing) suit.
* Teenage Mutant Ninja Turtles (2003)), while Leonardo dives to catch Karai, then deploys. It's slightly more realistic, as their fall ends with a curve from vertical to horizontal, which dumps their kinetic energy in a safer fashion.
* Teenage Mutant Ninja Turtles (2003) who possesses the blueprints for a teleportation device that both sides seek to weaponize. Later, the Federation also gets involved and secretly make a deal with the US government to capture the Fugitoid. The three-part episodes where the two rival empires finally duke it out is appropriately titled "Worlds Collide".
* Teenage Mutant Ninja Turtles (2003) worn by the Shredder's Elite Guard:
* Teenage Mutant Ninja Turtles (2003) you got 4 mutant humanoid turtles who do ninjitsu, and battle ninjas, robots, aliens, and inter-dimensional creatures to boot.
* Teenage Mutant Ninja Turtles (2012)", an anthropomorphic rock pigeon named Pigeon Pete offers to take the main characters to where they need to go, at the cost of "bread" — sourdough to be exact. Leonardo nervously invokes this when asking Pete to clarify.
* Teenage Mutant Ninja Turtles (2012), and he was using Tiger Claw all along in order to accomplish those three tasks.
* Teenage Mutant Ninja Turtles (2012), and last seen knocked out by Mikey before the Shredder sets his mansion on fire with a Molotov cocktail. He's not shown amongst the surviving members of the Foot in the next season, but his death remains unconfirmed.
* Teenage Mutant Ninja Turtles (2012) and makes him attack anyone close to him.
* Teenage Mutant Ninja Turtles (2012), and then he thought he could be like the turtles by dousing himself with mutagen, instead he became a horrible blob monster so in a way he got what he wanted.
* Teenage Mutant Ninja Turtles (2012), April discovers she has a rare gift when she is able to "communicate" with a psychic mutant monkey. This gift intrigues Splinter and he offers to train her as a as a Kunoichi, who were traditionally trained with different skillsets than male ninja.
* Teenage Mutant Ninja Turtles (2012) as a remote-controlled edge weapon.
* Teenage Mutant Ninja Turtles (2012), at one point Donatello and Raphael have a baking contest and have April try their cakes. After she tries Raph's, she vomits, which is rainbow-colored because of the frosting, and this also causes Raph and Donny to vomit shortly afterward.
* Teenage Mutant Ninja Turtles (2012) before concluding by pointing to a Danger: Explosive sign on it.
* Teenage Mutant Ninja Turtles (2012)) before realizing he has joined the conversation.
* Teenage Mutant Ninja Turtles (2012), Bradford mentions this trope just before stabbing the Mutagen bomb, spilling mutagen on himself and Xever and washing them off the balcony.
* Teenage Mutant Ninja Turtles (2012). Bradford wants to eat Xever too, but only to shut him up.

* Teenage Mutant Ninja Turtles (2012) briefly has Mikey doing this to Raph.
* Teenage Mutant Ninja Turtles (2012) can eventually transform between her serpent and human form at will.
* Teenage Mutant Ninja Turtles (2012) cartoon, in answer to Leonardo's confusion over why he was so sure in choosing him as the team's leader, Master Splinter asserts that as leader, he will learn that there are no right and wrong answers, only "choices".
* Teenage Mutant Ninja Turtles (2012)". Casey shoots back that he's not "oblidary".
* Teenage Mutant Ninja Turtles (2012) confirmed that their version of Michelangelo has ADHD-PI (Attention deficit hyperactivity disorder predominantly inattentive).
* Teenage Mutant Ninja Turtles (2012) daughter, made this blatantly obvious from the get-go.
* Teenage Mutant Ninja Turtles (2012) despite her relationship to the Shredder.
* Teenage Mutant Ninja Turtles (2012): Despite proving again and again that he's the only one who has what it takes to be a good leader, Leo notes that his brothers only seem to follow his lead when they feel like doing so. In "New Girl in Town," it reaches the point where Leo gets sick and tired of constantly being second-guessed and not getting any appreciation for his efforts that he decides to let Raph be leader for a change.
* Teenage Mutant Ninja Turtles (2012) DNA, and presumably, if the Kraang managed to get their hands on her complete DNA sequence, these issues would not occur.
* Teenage Mutant Ninja Turtles (2012) Donatello is shown carrying Leonardo this way during a nightmare sequence in the Wacky World of Wyrm.
* Teenage Mutant Ninja Turtles (2012) episode "Metalhead", Donatello says "Gentlemen, and Raphael" before unveiling the eponymous attack drone. Raph is not amused by this, but Mikey seems to be.
* Teenage Mutant Ninja Turtles (2012) episode "The Manhattan Project'', April and Casey encounter giant worms brought from Dimension X, and are freaked out by a baby worm that has a human baby's face.
* Teenage Mutant Ninja Turtles (2012) explode if they don't fix things fast.
* Teenage Mutant Ninja Turtles (2012) Fascinatingly enough, the word choice implies this to be the fate of everyone (or at least good people) when they end up dying.
* Teenage Mutant Ninja Turtles (2012) for the season finale, when the Tricereton armada arrives. The season ends with Shredder choosing to kill Splinter than to save Earth, and the Earth destroyed by the Triceretons' singularity weapon.
* Teenage Mutant Ninja Turtles (2012) gets what's coming to him in "Owari," as his killing of Splinter and injuring Karai is what gets the Turtles to come after him full-force, and he's beheaded by Leonardo.
* Teenage Mutant Ninja Turtles (2012) has a giant eye floating in a black hole that randomly zaps whatever gets caught in its sight with purple lightning.
* Teenage Mutant Ninja Turtles (2012) has, among others, April as a teenager as opposed to a young adult like previous versions. Master Splinter is also younger, as in most continuities he is an old man, where here he is middle aged.
* Teenage Mutant Ninja Turtles (2012) has Leonardo and Karai. They're flirty before they realize that Karai is actually the long-lost daughter of Splinter (aka Hamato Yoshi), who raised Leonardo from childhood. After the reveal, they actually grow closer, and though the attraction isn't explicitly referred to as much, they tend to treat each other a bit too intimately for step-siblings.
* Teenage Mutant Ninja Turtles (2012) has the Season 3 episode "Casey Jones vs. The Underworld", which focuses more on Casey's rivalry with Hun than any of the turtles, as if to make up for Casey always being left out of important missions.
* Teenage Mutant Ninja Turtles (2012) . He only found out a year later when doing ADR for the fight scenes.
* Teenage Mutant Ninja Turtles (2012), he refuses to. (The reason it happened was because it was a plot by the villain to brainwash anyone who ordered the pizzas.
* Teenage Mutant Ninja Turtles (2012): In the penultimate episode of Season 4, "Requiem," Splinter is killed by Shredder. The next episode, "Owari," begins with Splinter's funeral; he is buried on April's family farm in North Hampton, with the Turtles themselves and their allies, including the Mighty Mutanimals and April's

father, in attendance.
* Teenage Mutant Ninja Turtles (2012) is actually part of the Kraang gathering. He was kicked out for being an idiot. When Krang and the Sub-Prime meet, Krang is referred to as the Sub-Prime's cousin.
* Teenage Mutant Ninja Turtles (2012) is against the rules and Mikey lowers his hand.
* Teenage Mutant Ninja Turtles (2012) is Donatello's constant crush on April. It wasn't so bad during the first season where it just popped up every now and then, but in season two the new writers decided to take it and make it the primary aspect of Don's character, making every single one of his appearances devoted to him lamenting on his crush on April and getting jealous over Casey, which has also wound up limiting April's character development as well. Even worse is by the end of the season it seemed that the whole love-triangle aspect was finally resolved, only for the whole thing to come back with a vengeance early on in the third season. By this point, fans have become sick of it.
* Teenage Mutant Ninja Turtles (2012), is it really a surprise they can beat the foot-bots even when they can predict their attacks?
* Teenage Mutant Ninja Turtles (2012). It falls to him to synthesize antidotes and diagnose symptoms from poisons and injuries.
* Teenage Mutant Ninja Turtles (2012), it is revealed that the Foot Clan has invoked this trope, due to many of the former members quitting after losing to the turtles so often.
* Teenage Mutant Ninja Turtles (2012). Karai flirts with Leo on screen, but they become enemies after Leo and his brothers try to kill the Shredder, her father.
* Teenage Mutant Ninja Turtles (2012) Kavaxas to Earth in order to resurrect the Shredder, who was killed by Leonardo at the end of Season 4. By the fourth episode of the season, Kavaxas succeeds in doing so... but the revived Shredder is little more than a shambling corpse. Tiger Claw himself suspects that Shredder has not been truly revived, and Kavaxas is simply using him as a puppet; he's proven right.
* Teenage Mutant Ninja Turtles (2012): Leatherhead the mutant alligator falls squarely into this trope. Literally, as his upper body down to about the point where his rib cage ends just squares off and sits on a pair of legs and hips that look like they should belong to someone about one third of his size. That could actually be why he's depicted as being powerful but extremely ungainly.
* Teenage Mutant Ninja Turtles (2012) Master Splinter tells his sons that Shredder attacked him and his family, killing his wife and infant daughter, Miwa. During the first season finale, the Shredder tells him the truth: his wife died in the attack, but Shredder found his daughter and raised her as his own, naming her Karai.
* Teenage Mutant Ninja Turtles (2012), Michaelangelo rubs a reject batch of retro-mutagen on his skin (he read the label that said to keep it "Super Cooled" and thought it would make him "super cool") and develops a bad case of "shellacne" which gets progressively worse. If Donatello didn't make an antidote soon, Mikey would eventually turn into one big zit.
* Teenage Mutant Ninja Turtles (2012), Michelangelo coins the name for most villains and some equipment (such as the Turtle van now being the "Shellraiser"), to the point of total annoyance. Indeed, he even gets annoyed when people decide to create their own monikers (e.g., "He calls himself the Rat King"), when or another Turtle does so.
* Teenage Mutant Ninja Turtles (2012) Michelangelo has been gradually becoming this. He often makes the mistake of goading monsters and mutation freaks which doesn't end well, and him screwing off near or with mutagen has resulted in several characters getting exposed to it, even himself at one point. And he still doesn't learn.
* Teenage Mutant Ninja Turtles (2012)!" Michelangelo then states that he doesn't think they'd fit.
* Teenage Mutant Ninja Turtles (2012). Mikey even fails to notice what's happening on one occasion and just thinks the plan is an excuse to wear a silly costume.
* Teenage Mutant Ninja Turtles (2012), Mikey gets tickled by Metalhead's scanning lasers.

* Teenage Mutant Ninja Turtles (2012) one with new mutations, and even ones that aren't usually still involve one - that way there's more monster toys for the kids to buy and pit them against their turtle figures.
* Teenage Mutant Ninja Turtles (2012), only to find out that it is protected by a force field.
* Teenage Mutant Ninja Turtles (2012), Pete, being a mutated pigeon, has a tendency to do this.
* Teenage Mutant Ninja Turtles (2012) plan that leads to a confrontation with Shredder is doomed to fail.
* Teenage Mutant Ninja Turtles (2012) plays with this trope on and off throughout its run. Considering that it's a mix between the original comics and first series explains it.
* Teenage Mutant Ninja Turtles (2012) portrays Michelangelo as easily distracted. Best exemplified in this quote from "The Pulverizer".
* Teenage Mutant Ninja Turtles (2012), pretty much destroying the fear factor.
* Teenage Mutant Ninja Turtles (2012) resulted in a new generation of mutants with a population so large that they cannot go unignored by New York's human population. This, combined with the Earth Protection Force's experience and resources in managing such events, led to an uneasy cohabitation with humans and mutants, allowing the Hamato Clan a chance to live out in the open without most of the fears their mutated physiologies gave them.
* Teenage Mutant Ninja Turtles (2012) sees its version of the Shredder sport massive burn scars under his helmet, something past Shredders didn't have.
* Teenage Mutant Ninja Turtles (2012)'s face is covered in gruesome burn scars, and his right eye is whited out.
* Teenage Mutant Ninja Turtles (2012). She's been able to hold her own against any of the turtles, and has no trouble at all with the Kraang-droids.
* Teenage Mutant Ninja Turtles (2012) ships all resemble angular pryamids.
* Teenage Mutant Ninja Turtles (2012), Shredder takes the time to gloat over finally beating Splinter:
* Teenage Mutant Ninja Turtles (2012). Splinter catches them in the act and asks about their injuries, and after a few minutes of them stammering and trying to come up with an excuse, Mikey claims they were hit by a bus. Splinter doesn't buy it for a second.
* Teenage Mutant Ninja Turtles (2012), Splinter falls into the same pit and encounters the Rat King, who attempts to assert control over Splinter. After Splinter escapes him, he discovers the Rat King's decayed corpse, causing him to write off what he had previously seen as a hallucination.
* Teenage Mutant Ninja Turtles (2012), Spy Roach gets hit by an energy drill, causing him to expand until he explodes.
* Teenage Mutant Ninja Turtles (2012) tends to mix 2D and 3D animation (such as flashbacks being done entirely in "motion comic" format), and the show's camera angles, effects, shading, and character designs are reminiscent of comic books.
* Teenage Mutant Ninja Turtles (2012). The captain specifically brings two crewman along when he beams down to a dangerous planet so they'll get shot instead of him.
* Teenage Mutant Ninja Turtles (2012) the Earth gets invaded by Triceratons who use a Black Hole Generator to destroy the planet. At the last second the turtles are saved by the Fugitoid, who takes them six months into the past to save Earth. He points out that this is the only chance they are going to get and won't be able to time travel again.
* Teenage Mutant Ninja Turtles (2012) the first time that April, Casey and Irma are shown hanging out together he tells Irma that she shouldn't be chaperoning his and April's date. April replies that they're not on a date. This probably counts as the first time he's explicitly shown romantic interest in her.
* Teenage Mutant Ninja Turtles (2012). The Kraang plan to alter earth's atmosphere to one that they prefer, and that earth natives can't breathe in.
* Teenage Mutant Ninja Turtles (2012), the rock titan General Traag reassembles himself with nary a scratch after being at the epicenter of a bomb explosion.
* Teenage Mutant Ninja Turtles (2012), The Shredder is slain by Leonardo only to be

revived for one episode shortly into the fifth season.
* Teenage Mutant Ninja Turtles (2012), The Turtles easily defeat several Foot Ninja which caused them to get swelled heads. Splinter scolds the turtles for their overconfidence and forces them to switch weapons to teach them a lesson.
* Teenage Mutant Ninja Turtles (2012), the yellow gas on the Kraang's planet that they recreate in the TCRI building is toxic to Earth beings.
* Teenage Mutant Ninja Turtles (2012). They're extremely disappointed at the anti-climactic ending, and Michelangelo watches it again, but rewinds to just before he gets eaten and pauses it there.
* Teenage Mutant Ninja Turtles (2012) to the latter show in TMNT's fourth season, and the fact that Ciro Nieli worked on both shows.
* Teenage Mutant Ninja Turtles (2012) Vringath Dregg has a mothership that looks like a giant bug and is made of organic tech.
* Teenage Mutant Ninja Turtles (2012) was in love with the same woman Hamato Yoshi/Splinter loved. When she chose Yoshi over Saki, he became jealous of Yoshi and came to hate him. His entire plan is to kill Splinter by using his long-lost daughter as a weapon.
* Teenage Mutant Ninja Turtles (2012)", when Casey calls Professor Honeycutt "metal" after he rescues them from Dregg, the professor misunderstands the compliment and clarifies that he is indeed made of metal, as well as a plastic fiber compound.
* Teenage Mutant Ninja Turtles (2012) when Fishface mockingly calls Casey Jones the team's "obligatory human." In the show proper it was played straightest in season 1, where April was the main human on the side of good.
* Teenage Mutant Ninja Turtles (2012), when Tiger Claw senses Alopex and freezes up, Bebop jokes that he's been using catnip. Given that Tiger Claw hid a plant behind his back when Bebop and Rocksteady came into his room, it's... not implausible.
* Teenage Mutant Ninja Turtles (2012), while the turtles and Renet are in an Egyptian tomb Michelangelo feels someone poke him from behind and assumes it's Raphael playing a prank on him. Except Raph is in front of him; Mikey looks back and to his horror sees it's a dismembered mummy arm on his shell.
* Teenage Mutant Ninja Turtles (2012), whilst the Turtles are trying to get some information out of Snake, Raphael says some barbed things regarding Michelangelo's appearance.
* Teenage Mutant Ninja Turtles (2012) who is a bounty hunter and wears bulky power armor that also doubles as his spaceship. It features twin laser Gatling guns, missile launchers, and a very powerful mouth hatch with metal-shredding teeth, in addition to his own razor-lined mouth inside. He's hired to hunt down the Turtles and bring them to Dregg, the main villain of season 4, and the Turtles later succeed in making the hunt personal for Armaggon, creating a secondary recurring villain.
* Teenage Mutant Ninja Turtles (2012), with "Live Action Role Play" right on the labels.
* Teenage Mutant Ninja Turtles (2012) Xever/Fishface freely admits to Raph that he works for the Shredder because he "likes having a job where he gets to crack skulls every day."
* Teenage Mutant Ninja Turtles (2014), all of the Turtles are much larger compared to their traditional appearances, but Raphael is noticeably the bulkiest of the four.
* Teenage Mutant Ninja Turtles (2014) as the most prominent name in the marketing, despite being only one of a half dozen producers, because his name was also the most notable.
* Teenage Mutant Ninja Turtles (2014), both Mikey and Vernon have made it clear that they are attracted to April but she either ignores their advances or brushes it aside.
* Teenage Mutant Ninja Turtles (2014), both Raph and Mikey have sunglasses as part of their clothing, but both never use them. Mikey's don't even seem to be the same size as his face! Averted with Donatello's high-tech scanners.

* Teenage Mutant Ninja Turtles (2014), but particularly on April and Vernon's part as they slide down a snowy mountain in a truck cab - their conversation does not match their dire situation.
* Teenage Mutant Ninja Turtles (2014) has several retractable blades per arm, and he can even pull them out to make a double-edged blade. The suit can also fire the blades, and bring them back with magnets...
* Teenage Mutant Ninja Turtles (2014) in the climax. The only female character in the film who actually uses weapons and participates in battles is Karai.
* Teenage Mutant Ninja Turtles (2014), it's clear that Raph doesn't respect Leo's leadership at first, but it's also clear that Leo is in charge because no-one is able to keep the team together like he can. Raph eventually realizes that following Leo's orders is the only way for them to win.
* Teenage Mutant Ninja Turtles (2014), Mikey has April on his mind in pretty much every non-action scene where they interact. He even apologizes for how creepy his "We will find you" line sounded when she first meets them.
* Teenage Mutant Ninja Turtles (2014) mutant turtles, however in the case of great blood loss as the turtles experience, giving them adrenaline would definitely give them short-lived pep but it would be short-lived and not last as long as through the end of the movie. The amount they received on their dangerously low blood pressure should also have given them heart failure within minutes.
* Teenage Mutant Ninja Turtles (2014) ninja cult from the original source.
* Teenage Mutant Ninja Turtles (2014) of stopping the spire on Sacks' tower from falling, and the toxin from contaminating a ten-block radius. Leonardo's response?
* Teenage Mutant Ninja Turtles (2014) of the Shredder, is generally agreed to be a much better advertisement for the film and has turned some detractors around into supporters while in general calming the fanbase.
* Teenage Mutant Ninja Turtles (2014), Raphael's assumed dead by the Foot Clan when his brothers are captured. He was just knocked out.
* Teenage Mutant Ninja Turtles (2014): Shredder's introduction in full armor, fanning out his excessive number of blades. There is also Raphael crashing shell first into a humvee, flipping it over.
* Teenage Mutant Ninja Turtles (2014) soundtrack is named "Adolescent Genetically Altered Shinobi Terrapins".
* Teenage Mutant Ninja Turtles (2014), sports quite a few facial scars.
* Teenage Mutant Ninja Turtles (2014), the Turtles and their outfits look very similar to popular aspects of the “realistic fan art" in the fandom look, especially Raphael's clothing.
* Teenage Mutant Ninja Turtles (2014), the Turtles' shells are bulletproof, which they were quite delighted to learn.
* Teenage Mutant Ninja Turtles (2014). They've switched out their fabric masks for silver face masks with sunglasses.
* Teenage Mutant Ninja Turtles (2014), this is basically Leo's answer when Raph asks who put him in charge.
* Teenage Mutant Ninja Turtles (2014), to major clothing differences and physical stature.
* Teenage Mutant Ninja Turtles (2014). Vernon also qualifies due to his driving skills and confrontation with Sacks.
* Teenage Mutant Ninja Turtles (2014), Vernon misinterprets April's description of the turtles, asking if they're aliens. April points out how stupid that idea sounds. This was exactly how the fans reacted during very early development when a leaked script (that wasn't even real) had the turtles be aliens.
* Teenage Mutant Ninja Turtles (2014), when they reach the Sacks estate, Raphael elects to simply tear a hole in the side of Vernon's van and jump out.
* Teenage Mutant Ninja Turtles (2014), where they have to perform balancing acts while simultaneously doing another task for hours on end.
* Teenage Mutant Ninja Turtles (2014), while Leonardo is a pretty serious character, he often finds himself going along with his brothers' antics. The elevator scene is a good example.
* Teenage Mutant Ninja Turtles (2014), with the Shredder again. Time will tell if

this was playing the trope straight or subverting it.
* Teenage Mutant Ninja Turtles 2, April attempts to convince Keno that Mikey's nunchaku are really hers and ends up smacking herself several times in the arms and chest.
* Teenage Mutant Ninja Turtles Adventures #23, a space criminal named Bellybomb is sentenced to a toxic prison planet for seventeen life sentences for extortion, armed robbery, hijacking, kidnapping, torture, murder, man-eating, brain poaching, soul thievery...and impersonating a primitive deity named Bob. After the jailers read off these crimes, Bellybomb points out that they didn't mention his unpaid parking tickets.
* Teenage Mutant Ninja Turtles Adventures comic book series doesn't help matters, since it was based off of the animated series and was probably read more by said complainers. Of course, Eastman and Laird's Mirage Studios didn't produce that book series—it was licensed out to Archie Comics.
* Teenage Mutant Ninja Turtles Adventures for additional details) fits this trope perfectly. Including the child.
* Teenage Mutant Ninja Turtles Adventures has this. The only time she ever showed both eyes was in a flash-forward to her in her twenties.
* Teenage Mutant Ninja Turtles Adventures, including animated mainstays such as Leatherhead, Slash and Metalhead, assassinated.
* Teenage Mutant Ninja Turtles Adventures introduced Ninjara, a ninja foxwoman, as an antagonist. A few issues later, she joins the turtles and becomes a series regular, appearing in every story since.
* Teenage Mutant Ninja Turtles Adventures: It occurs with Null's mercenaries -who turn out to be robotic- during the "Terracide" arc.
* Teenage Mutant Ninja Turtles Adventures, Jive Talk, and hot-rodded flying cars.
* Teenage Mutant Ninja Turtles Adventures: Morbus is a garbage planet within Dimension X, where Krang is banished by Cherubae.
* Teenage Mutant Ninja Turtles Adventures series featured the turtles traveling to another dimension where Ace Duck wrestles Leatherhead in a huge arena. They are quickly selected to participate.
* Teenage Mutant Ninja Turtles Adventures special, where reality-altering mole Headrush (acting on Splinter's behalf) tests the turtles with a series of threats obviously designed to fit the turtles' individual skills (a conveyor belt of doom for Donny, pizza monsters for Mikey, etc.). However, whenever it was time for a turtle to face his designated foe, Headrush would then incapacitate him, requiring one (and always one) of the other turtles to step in and handle the threat in his stead.
* Teenage Mutant Ninja Turtles Adventures taking suicide pills that set their heads on fire, burning the flesh off. No reason not to do it with style...
* Teenage Mutant Ninja Turtles Adventures: The Ninja Turtles from the year 2094 wore these during an arc, based on action figure designs.
* Teenage Mutant Ninja Turtles, after being freed from his confinement in an asteroid, decides that in order to destroy all the Turtles in the universe, he must destroy reality itself, and sets out to do just that.
* Teenage Mutant Ninja Turtles, after he's made a master control for the hundreds of Mousers Shredder forced him to make, Shred-head decides that "He knows too much" and sends his Foot Soldiers to eliminate Baxter. Only the Turtles' timely intervention prevent the Foot from succeeding.
* Teenage Mutant Ninja Turtles", after Leonardo travels through a ‘random’ portal to Narnia in the New York sewers, his family, April and Klunk track down the now-elderly Susan in New York, where she is able to open a door to Narnia using a photograph of the wardrobe and invoking her status as a Queen of Narnia.
* Teenage Mutant Ninja Turtles after Nickelodeon's acquisition of the franchise that he actually likes Venus as a character and hopes for her to make a comeback someday.
* Teenage Mutant Ninja Turtles, all of which were produced during the 1990s. The 2007 movie, however, is straight-up CGI animation.

* Teenage Mutant Ninja Turtles. A lot of imported turtles were abandoned after the show fell out of favour and the luckiest of them were dumped in rivers and reservoirs. Various areas of Britain report that water features suddenly developed resident turtle populations after the end of the show's run on TV, possibly when owners realised they weren't going to morph into superheroes and that the real thing is rather prosaic and boring - and possibly long-lived. Sefton Park in Liverpool, for instance, now has an unwanted turtle population which defies attempts to cull it and is a pest, preying on native fish and wildfowl. Fishermen across the UK hate the imported alien population of snapping turtles, for their part in depleting fish stocks. Attempts are periodically made to cull them.
* Teenage Mutant Ninja Turtles also featured turtle-like demons identified as kappa, despite the lack of water-filled depressions.
* Teenage Mutant Ninja Turtles: Although the precise number and location varies between incarnations, The Shredder's costume will always include several of these.
* Teenage Mutant Ninja Turtles. Although the Turtles also appear, Hun is the main focus of the episode, giving hints as to his background.
* Teenage Mutant Ninja Turtles always leaves a lotus flower whatever crime she strikes.
* Teenage Mutant Ninja Turtles & Other Strangeness adventure in which a time-traveling Southern man buys a bunch of automatic weapons with the intention of giving them to the Confederacy. The players are supposed to stop him.
* Teenage Mutant Ninja Turtles & Other Strangeness had an elaborate character creation system that provided rules for creating mutant squirrels, Moose, Housecats, or whatever. But the title characters were impossible to create according to the rules. Their Ninja Skills were fine, but their mutations were more advantageous than was possible for Player Characters.
* Teenage Mutant Ninja Turtles & Other Strangeness he tends to come off as a less than altruistic person.
* Teenage Mutant Ninja Turtles & Other Strangeness hiding in underground bunkers.
* Teenage Mutant Ninja Turtles & Other Strangeness supplement "Transdimensional TMNT" had a surprisingly complex justification for San Dimas Time that involved the time stream coiling around itself in predictable patterns and jumping from coil to coil where they touch.
* Teenage Mutant Ninja Turtles & Other Strangeness. Unexpectedly he creates a successful bionic man.
* Teenage Mutant Ninja Turtles, and a new subtitle—"Back to the Sewer".
* Teenage Mutant Ninja Turtles and found most of them to be disgusting.
* Teenage Mutant Ninja Turtles and human masks in public but soon switching over to them being publicly known heroes. April's career as a news reporter probably helped in that regard.
* Teenage Mutant Ninja Turtles, and that any input he and Kevin Eastman gave the crew of the series tended to be ignored. Kevin Eastman, however, admits to being fond of the series, with Bebop and Rocksteady being among his favorite characters in the franchise.
* Teenage Mutant Ninja Turtles and vice versa, alternating between hand-drawn animation and CGI.
* Teenage Mutant Ninja Turtles animated series has just about everybody pulling this every time they go up on a rooftop.
* Teenage Mutant Ninja Turtles animated series was dubbed for Japanese TV, the two characters were renamed Sawaki Oroku and Yoshihama Takeshi respectively (both names in surname/given name order).
* Teenage Mutant Ninja Turtles. An orphan found and adopted by the Shredder at an early age, he turned her into one of his most loyal and capable lieutenants. The Shredder, surprisingly enough, turns out to be a rather good parent (at least from her account) and the ensuing loyalty she feels to him is at the core of her character arc.
* Teenage Mutant Ninja Turtles, April, seen as a puff-piece reporter but attempting to break into serious journalism, is brushed aside by her superiors when she

attempts to get a camera crew sent to a Foot Clan robbery in progress.
* Teenage Mutant Ninja Turtles arcade game, whenever you're fighting Rocksteady and Bebop at the same time, you can pull this off by waiting for them both to charge, and then jump at the last second. It does at least a bit of damage and leaves them both stunned for a while, leaving you a chance to get in a few free hits.
* Teenage Mutant Ninja Turtles are a ninja cult from Japan, and are known for drug smuggling, counterfeiting, gunrunning, murder, assassinations, computer hacking, theft, and terrorism.
* Teenage Mutant Ninja Turtles are probably the most closely associated to it. If you weren't familiar with the term until you heard it used by the turtles, you probably think of them when you hear it.
* Teenage Mutant Ninja Turtles, a show Bart would have been watching. In the episode "Behind The Laughter", he complains that he never said "Cowabunga" in his life.
* Teenage Mutant Ninja Turtles at one point April winks after thanking her saviors. The Turtles argue which of them she was winking at, when she clarifies that she was winking at Splinter.
* Teenage Mutant Ninja Turtles, at one point the plan calls for April to get inside a building so she can access their security system. Since this means the guards have to not be paying attention, Casey is assigned the job of distraction, which he accomplishes by smashing up the lobby in his best crazed-loon persona.
* Teenage Mutant Ninja Turtles at the end of their season 3 arc. One case turns out to be more permanent than the other.
* Teenage Mutant Ninja Turtles baddie Baxter Stockman can be viewed as a kind-of failed evil genius in most versions.
* Teenage Mutant Ninja Turtles, Baxter says he just did it because "it was FUN!"
* Teenage Mutant Ninja Turtles be bothered by hordes of Foot Ninjas trying to kill them.
* Teenage Mutant Ninja Turtles, before they're interrupted by a rampaging Nano.
* Teenage Mutant Ninja Turtles Belladonna Starchild finally manage to confess their love for each other, Belladonna innocently asks if she can touch Donny's shell, you may think this trope is going to happen but instead of getting aroused Donny just gets very sleepy and relaxed; it is mentioned in another fic the the Turtle's shells are NOT erogenous zones.
* Teenage Mutant Ninja Turtles "Body Count" miniseries had metal hands.
* Teenage Mutant Ninja Turtles, but his lack of focus and laziness hold him back from being the best fighter.
* Teenage Mutant Ninja Turtles, but mayhem breaks out before anything really happens.
* Teenage Mutant Ninja Turtles, but the original 2003 series wraps up with all the characters in one huge battle.
* Teenage Mutant Ninja Turtles, but watch enough cartoons and you'll know it by heart.
* Teenage Mutant Ninja Turtles calls all of his counterparts "sellouts".
* Teenage Mutant Ninja Turtles calls home!), though both films take place in much of New York, anyway.
* Teenage Mutant Ninja Turtles can get you killed. Being a good deal younger than his previous incarnations, this Splinter is much faster and more deadly than in the previous series. He even incorporates his mutation into his fighting style, dropping to all fours and fighting like a rat against especially powerful opponents.
* Teenage Mutant Ninja Turtles cartoon cemented the series as being for little boys.
* Teenage Mutant Ninja Turtles cartoon did this with a planet of "peaceful space turtles".
* Teenage Mutant Ninja Turtles cartoon, Donatello has invented a device that will freeze a person mid-action. Michaelangelo, skeptical, offers to test it out. He takes a leap into the air, and Donatello freezes him in mid jump. Donatello then tells the others that when Michaelangelo is unfrozen, he'll have no idea that any

time has passed, and will probably say something like "See? I told you it wouldn't work!" Which is exactly what happens when he's unfrozen.
* Teenage Mutant Ninja Turtles cartoon hooked up at the beginning of the third season; with the exception of an early, minor hiccup, the relationship continued strong ever since, culminating in their marriage at the end of the seventh season.
* Teenage Mutant Ninja Turtles cartoon. In one episode, Michaelangelo asked why villains always chose to meet in abandoned warehouses. Raphael told him it was "because there aren't any old, abandoned luxury penthouses!"
* Teenage Mutant Ninja Turtles cartoon, in order to avoid outcries against such a "violent" show, the majority of the turtles' enemies were robots (Foot soldiers, Mousers.) As a result, nearly every episode featured at least 6 robots exploding after getting wet, and in one episode they threatened a robot and said they would get it wet.
* Teenage Mutant Ninja Turtles cartoon, Leonardo and Raphael are in a hallway with a lot of doors in the Technodrome, when they decide to try to open them. From behind the first a missile comes out, but Leonardo says that there can't be missiles behind every door. Naturally, behind the second are about 20 Foot soldiers!
* Teenage Mutant Ninja Turtles cartoon says it quite often when he runs into trouble. For example:
* Teenage Mutant Ninja Turtles cartoon's first season, Donatello is busy building a new device at Baxter Stockman's lab while the rest of the family goes off to attack the Technodrome. While they're fighting off Foot Soldiers, Don gives them a call, checking in;
* Teenage Mutant Ninja Turtles cartoons, he is able to do so mentally from the start.
* Teenage Mutant Ninja Turtles cartoon, the Daimyo's son is deaged for this purpose, although he's only turned back to a young child and not an infant.
* Teenage Mutant Ninja Turtles cartoon, the leader of the Purple Dragon gang, Hun, killed Casey Jones's father when Casey was a kid; unsurprisingly, Casey is packing a grudge against Hun and everyone wearing the Purple Dragon colors. Averted insofar as Casey refuses a couple of opportunities to kill Hun, however.
* Teenage Mutant Ninja Turtles cartoon where a character's all-powerful transformation ray couldn't affect gold. So Donatello arranged to borrow four ancient Roman shields that were made of gold. ("And try not to ding 'em, okay? They have to go back to the museum tomorrow.")
* Teenage Mutant Ninja Turtles cartoon, where Serling stops a toy robot from killing the Turtles by removing its batteries.
* Teenage Mutant Ninja Turtles, Casey Jones' cousin Sid is considered the black sheep of the Jones family. A petty criminal, his first appearance shows him threatening Casey at gunpoint in order to steal money supposedly hidden in his grandmother's house. Later on, he becomes a member of the Foot Clan. It does not end well for him.
* Teenage Mutant Ninja Turtles cereal featured the Turtles using their Ninja Nets. Those Turtles. Always using their Ninja Nets.
* Teenage Mutant Ninja Turtles chemicals, making it fully impossible to replicate.
* Teenage Mutant Ninja Turtles children's novel has the Turtles and Splinter take a camping trip. Raphael and Michelangelo do this to Donatello (with Mikey kneeling and Raph pushing) when they get into a discussion on whether or not Bigfoot exists.
* Teenage Mutant Ninja Turtles' "City at War" arc, with three factions—the local branch of the Foot, the Purple Dragons, and the generically-named "Mob"—fighting for control of the New York City underworld in the wake of the power vacuum created by the Shredder's apparent death.
* Teenage Mutant Ninja Turtles clings to the ceiling, after hiding in the shower, to avoid being seen by April's boss when he throws open the curtain looking for a towel.
* Teenage Mutant Ninja Turtles come with two staffs (maybe the second is a spare since his bo-staff often breaks).
* Teenage Mutant Ninja Turtles comic book: after Baxter Stockman unleashes his

Mouser robots, they destroy the turtles' lair, forcing the turtles to relocate to April's apartment. Afterwards, the Foot attack the apartment, setting it on fire and forcing the turtles to relocate to Casey's grandmother's farmhouse in Massachusetts. Said story was eventually adapted in the first movie and second cartoon, with minor changes: in the movie, the Foot are responsible for both attacks, and in the cartoon, the turtles are present for the initial attack (only Splinter is present in the original).
* Teenage Mutant Ninja Turtles comic book introduced the Utroms, as species of vaguely brain-like aliens who, after being stranded on earth to to Mobile Suit Human exoskeletons in order to blend in with the population.
* Teenage Mutant Ninja Turtles comic book, it is revealed that Baxter Stockman had infected April O'Neil with "NanoBaxterBots," which were slowly killing her. As a response, utrom Glurin and Professor Honeycutt devise NanoTurtleBots, nanomachines that draw their fighting skills from the turtles' memories, which they then insert into April.
* Teenage Mutant Ninja Turtles comic has a bit of a subversion: After being teleported to safety by the Utroms, the Turtles and Splinter find themselves materializing in April's bathtub... however, the bathtub is empty and April isn't even in the bathroom at the time.
* Teenage Mutant Ninja Turtles Comic —> Cartoon —> Comic based on cartoon —> Movie —> Band —> ...
* Teenage Mutant Ninja Turtles comics, April and the turtles once got chased by the police because April's van coincidentally was the same make, model, and color as a van used by a group of bank robbers earlier that day.
* Teenage Mutant Ninja Turtles comics, concluding its run. However, here, the storyline involved splinter factions of the Foot attempting to gain supremacy in New York before Karai took over.
* Teenage Mutant Ninja Turtles comics is a computer expert who builds small "Mouser" robots and uses them to commit crimes.
* Teenage Mutant Ninja Turtles "Coming Out of Our Shells" television concert. While Shredder has control of the stage, he roasts some of the children in the audience. One of his comments: "I think I've seen your face on a milk carton."
* Teenage Mutant Ninja Turtles commented, "We didn't go for major stars, because the stars of the film are the turtles."
* Teenage Mutant Ninja Turtles (Data East), according to a flyer, are called "Bronco Bumpers".
* Teenage Mutant Ninja Turtles (Data East) have a spinning pizza disc as a major gimmick.
* Teenage Mutant Ninja Turtles (Data East) is full of '80s and '90s slang.
* Teenage Mutant Ninja Turtles (Data East)", some of the primary modes end by setting up the premise of another mode (such as Krang getting his robotic body or Baxter Stockman being mutated). As a result, completing the former is a requirement for being able to start the latter.
* Teenage Mutant Ninja Turtles. Despite Leonardo actually slicing one, Michelangelo's exclamation seems to imply they had been previously holding back.
* Teenage Mutant Ninja Turtles does not exist as far as he's concerned, and that goes double for the polarizing Venus de Milo. Kevin Eastman on the other hand likes Venus and hopes that she makes a comeback one day.
* Teenage Mutant Ninja Turtles does this the fastest with the first episode revealing to the turtles themselves that they aren't that special or unique among New York's vast mutant population, many of whom operate in the open without consequence.
* Teenage Mutant Ninja Turtles: Donatello and Michaelangelo return to their lair after a long absence and find a pizza they'd left behind has spoiled. They tearfully salute it while humming "Taps."
* Teenage Mutant Ninja Turtles, Donatello calculates a ratio of 1 Triceraton trigon to 10 minutes.
* Teenage Mutant Ninja Turtles, Donatello speaks in a nerdy voice, and wears high tech, spectacle-like goggles to emphasize that he is a nerd.

* Teenage Mutant Ninja Turtles, Donatello tries to baseball swing his bo into Tokka. It not only fails to do any damage, but the recoil of the blow knocks Donatello senseless.
* Teenage Mutant Ninja Turtles, encouraging his son to consider whether the turtles would be happier as individual successes or as one family.
* Teenage Mutant Ninja Turtles episode "April's Artifact", Raph grabbed a stick to swat a "lousy little gnat". Leo informs him "You're gonna need a bigger flyswatter" just as a Giant Enemy Bug shows up.
* Teenage Mutant Ninja Turtles episode "Cowabunga Shredhead" has Shredder, thinking he's Michelangelo, walk into the Turtles' lair, resulting in this exchange:
* Teenage Mutant Ninja Turtles episode opens with the turtles running frantically down the street.
* Teenage Mutant Ninja Turtles episode "Pizza By The Shred" when Michelangelo is a "Weird Pizza" delivery boy hired by Shredder, he delivered a pickle and ice cream pizza to a pregnant woman.
* Teenage Mutant Ninja Turtles episode "Rondo in New York" when action Hollywood star tours the theater to promote his latest film. The actor is really short and has a crew placing apple boxes as he walks by the crowd looking down on them, much to Michelangelo's disappointment.
* Teenage Mutant Ninja Turtles episode "The Case of the Killer Pizzas" contained this one showing every time someone in the episode mentioned pizza.
* Teenage Mutant Ninja Turtles, especially in the original comics and second animated series.
* Teenage Mutant Ninja Turtles; even knowing the full extent of his crimes, she'll try her damnedest to keep him from harm, even if that means fighting her friends.
* Teenage Mutant Ninja Turtles). Eventually, the Turtles become prisoners of their own fame and lay around watching TV all day getting lazy and fat. Don then wakes up screaming "Teenage Couch Potato Turtles!"
* Teenage Mutant Ninja Turtles: Even wisecracking Michelangelo is sometimes at a loss for the right words:
* Teenage Mutant Ninja Turtles, everyone in the "audience" is vocal about having seen that one coming.
* Teenage Mutant Ninja Turtles except Donatello dual-wield their respective weapons.
* Teenage Mutant Ninja Turtles: Fall of the Foot Clan on Game Boy. We get the ending shot of the Turtles having saved April O'Neil, while an epilogue tells us things might not be over... and then we see the Technodrome (presumably) fall into a pit of lava. The credits roll and once they are finished, we see a pic which says "The End" with a still image of Krang below it. Wait a few seconds and Krang villainously laughs (and his face clearly reflects his mood) and "The End" becomes "The End?"
* Teenage Mutant Ninja Turtles fans who like "Tcest" write the brothers as adopted siblings. It's vague in the various continuities if they're blood-related or not.
* Teenage Mutant Ninja Turtles: Fast Forward a legit sport. However, being from the past, Raphael is unaware of this and treats it like its all a show, at least until he gets his shell kicked by a disgruntled wrestler.
* Teenage Mutant Ninja Turtles: Fast Forward And then he goes back to his spaceship and throws a temper tantrum complaining that all of his efforts have been in vain and saying that Earth could sustain his race for centuries if not for the accursed sun.
* Teenage Mutant Ninja Turtles: Fast Forward Darius Dun. Despite different goals and storylines, they established a resource-sharing relationship, where Darius gave Sh'Okanabo the stolen plans for nephew Cody Jones' time window, in exchange for the assistance of the turtle clones Sh'Okanabo had created.
* Teenage Mutant Ninja Turtles: Fast Forward Episode 22 ("Head of State"):
* Teenage Mutant Ninja Turtles: Fast Forward episode "Enter the Jammerhead", after he had been imprisoned during his last appearance. The "partially cognizant" bit comes from the fact that he was suffering from a system crash (Jammerhead is at least partially cybernetic) that had left him catatonic.

* Teenage Mutant Ninja Turtles: Fast Forward, i.e. being attacked by appliances while trying to read the holographic newspaper. "I hate the future!"
* Teenage Mutant Ninja Turtles: Fast Forward is thwarted by...sunlight. Although this is handwaved as a particular, unexpected feature of Earth's, and Sh'Okanabo himself is not normally affected, dealing with his weakness is the thrust of his character arc throughout the remainder of the season.
* Teenage Mutant Ninja Turtles: Fast Forward, Pro Wrestling has become a legit sport. However, being from the past, Raphael is unaware of this and treats it like it's all a show, at least until he gets his shell kicked by a disgruntled wrestler, Tripple Threat, who becomes a recurring villain.
* Teenage Mutant Ninja Turtles: Fast Forward that secretly uses the company to build them anyways behind everyones back.
* Teenage Mutant Ninja Turtles features Leonardo recovering his confidence after a brutal battle by forging new swords for himself.
* Teenage Mutant Ninja Turtles, find a way to counteract the potion. Afterwards, further hilarity ensues when Irma discovers who was actually courting her.
* Teenage Mutant Ninja Turtles (first cartoon) frequently used this trope.
* Teenage Mutant Ninja Turtles for a similarly-dressed European princess and kidnapped, and when security orders everyone to take off their masks, the Turtles are in an obvious bind.
* Teenage Mutant Ninja Turtles, for example, involved superheroes, government agents and ninjas fighting against ancient Japanese demons and their zombie army.
* Teenage Mutant Ninja Turtles. Four turtles born and raised in New York city, trained in ninjitsu by their master and adoptive father Splinter, who learned the craft from his Japanese owner Hamato Yoshi.
* Teenage Mutant Ninja Turtles franchise. None of their other comics managed to get the same amount of success.
* Teenage Mutant Ninja Turtles game for the game boy takes place on top of a series of moving trucks.
* Teenage Mutant Ninja Turtles games, Leonardo often takes this role. Donatello has the longest reach but is physically the weakest, Michelangelo the strongest but slowest, and Raphael the fastest but has the shortest reach (some games switch these around but you get the idea). Leo, meanwhile, is in the middle across the board.
* Teenage Mutant Ninja Turtles goes horribly wrong thanks to Rocksteady pulling out the brake lever. They wind up rerouting the train via a switch so it doesn't run over Splinter, but instead it hits a runaway dinosaur robot and blows up, completely derailing in the process.
* Teenage Mutant Ninja Turtles had the Shredder make all the adults in New York act like children. A newscaster at Channel 6 went "Nyah nyah, I'm on TV and you're not!" on the air.
* Teenage Mutant Ninja Turtles has an indirect and regretful variation where teenage Danny looks at April's apartment building (and father's antique store) burning down from a few blocks away, after providing the Foot with the information about where to find her and the turtles. From the look on his face he's clearly starting to feel guilt and doubt about his loyalties.
* Teenage Mutant Ninja Turtles has the heroes in a halfshell meet a race of turtle aliens. The aliens have machines that can make gold, but only use it for building material as they absorb nutrients from gold-reflected light. The aliens want to move to Earth, but the turtles realize that their gold-makers would wreak havoc on the economy.
* Teenage Mutant Ninja Turtles has the title turtles able to transform into super versions of themselves, but only for three minutes.
* Teenage Mutant Ninja Turtles having had time to go around and get into position. It's likely a legitimate super-power, what with the glowing red eyes.
* Teenage Mutant Ninja Turtles, he is mortally wounded by a stab to the stomach from Shredder and dies in the collapsing lair, taking Shredder with him.
* Teenage Mutant Ninja Turtles. He loved a woman named Tang Shen who ended up being murdered.

* Teenage Mutant Ninja Turtles. Hence, in the 1987 cartoon series the Foot soldiers are clearly robots.
* Teenage Mutant Ninja Turtles He tells them, no, he saw it on the 5:00 news.
* Teenage Mutant Ninja Turtles he wasn't even allowed to draw them completely (the most he gets is them half out of their scabbards in a big panoramic shot, but he puts them back and fights unarmed for no apparent reason).
* Teenage Mutant Ninja Turtles. His funeral is very simple, and his body is laid in a casket, drifted onto a lake and set alight.
* Teenage Mutant Ninja Turtles. However, that time, him laughing at himself was more justified as he was trying to cheer up Michelangelo, who feared he'd never laugh again.
* Teenage Mutant Ninja Turtles (IDW), after Bebop and Rocksteady nearly kill Donatello, his mind is uploaded into Metalhead while the Fugitoid and Harold heal his broken body.
* Teenage Mutant Ninja Turtles (IDW) and shows no difficulty interacting with the modern world.
* Teenage Mutant Ninja Turtles (IDW), Bebop and Rocksteady break Donatello's shell while the rest of the team is away. To save his life, the Fugitoid puts Donny's body in a freezer to slow down his metabolic functions, then transfers his consciousness into the turtle robot Metalhead. He stays this way for several issues while he and the Fugitoid work on repairing his damaged body with mutagen and an artificial shell made of titanium.
* Teenage Mutant Ninja Turtles (IDW): Howard Lillja is extremely fond of the word "obtruse." While it is a legitimate English word, he's constantly using it in the wrong form. Neither Donatello nor Angel ever seem able to convince him that he's using it wrong.
* Teenage Mutant Ninja Turtles (IDW), Krang attempts to terraform Earth into "New Utrominon" using the Technodrome, but the Turtles manage to thwart his plans so they don't extend any further than the small Atlantic island where the Technodrome was located. Whenever it shows up later in the series, the island's new environment is so hostile to non-Utroms like the Turtles that they have to wear respirators the whole time.
* Teenage Mutant Ninja Turtles II: Back from the Sewers jokingly claims that the Select button "was used to shoot missiles, but Shredder's goons broke it so it no longer works".
* Teenage Mutant Ninja Turtles III, after Michaelangelo rescues Yoshi from the burning house, Leonardo attempts CPR on Yoshi. During this, Mitsu claims he's "casting an evil spell", but April corrects her that "he's helping".
* Teenage Mutant Ninja Turtles III: After switching places during time travel, April O' Neil wears Kenshin's samurai outfit in feudal Japan. Later, after escaping from the dungeon with the Turtles, we see her ripping part of the samurai clothing off by the lake while Leo and Donatello are looking.
* Teenage Mutant Ninja Turtles III has the turtles do this with a justification. The established rules of time-travel in the movie state that in order to go into the past, the turtles would have to swap places- and uniforms- with whoever is holding the scepter in feudal Japan. It just so happened that the ones in the past were the Daimyo's honor guard. Luckily, the ceremonial samurai masks allow the Turtles to disguise their faces as well.
* Teenage Mutant Ninja Turtles III, just before leaving on their time-travel adventure, Donatello has this warning to give;
* Teenage Mutant Ninja Turtles III nobody even knows we're alive down here!" At which point April O'Neil, the Turtles' first human friend who let them hide in her apartment from the Foot in the last two movies, shows up to deliver some gifts to them.
* Teenage Mutant Ninja Turtles III, Raph yells "Hey, mac!" to a guard. When said guard turns around, Raph cold-cocks him and tells him to "take the rest of the day off."
* Teenage Mutant Ninja Turtles III: The Manhattan Project, but with the additional health-draining special attacks performed by pressing the A and B simultaneously.

* Teenage Mutant Ninja Turtles III, the time traveling scepter (in the present) only has enough power to work five times in sixty hours, after which it is destroyed, rendering even the fully intact scepter in 1603 Japan useless as well.
* Teenage Mutant Ninja Turtles III, the Turtles and April are sent back in time to feudal Japan. At the end of the movie, Michelangelo decides he wants to stay since the Turtles had gained the people's respect and adoration and he wouldn't have to live in secrecy in the sewer, Raphael agrees and Leonardo briefly considers this as well. Meanwhile, Donatello and April adamantly want to go back to their modern lives in New York. Ultimately they're convinced to return together, realizing they'll meddle too much in the past.
* Teenage Mutant Ninja Turtles III, the villain attempts to throw the time-traveling scepter off a roof while he escapes, which would trap the turtles in feudal Japan if it breaks. Mikey grabs the scepter, but almost falls off the roof until the other three turtles manage to pull him back up.
* Teenage Mutant Ninja Turtles III, though the film takes place in New York and Ancient Japan, many scenes are actually filmed in Hong Kong and Astoria, Oregon.
* Teenage Mutant Ninja Turtles III when, after having escaped the Daimyo's castle, April cuts off the lower portion of her robes leaving her legs completely exposed. When the turtles notice she claims that she's allowed on the grounds that she is technically on vacation even if they are stuck centuries in the past in Japan.
* Teenage Mutant Ninja Turtles II: The Arcade Game look at the player as if saying, "Still there?"
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze, after downing the mutagen and transforming into Super Shredder, Shredder becomes so fixated on killing the Turtles that he doesn't realize that the bridge they're under is falling apart. But then when told so, he's beyond caring.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze!" And then the hand falters and falls limp upon the ruins of the pier, never to rise again, signifying that yes, the Shredder is finally done for.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze, April O'Neil asks the police chief for information about who or what caused the damage in downtown New York, and then uses this phrase. The attempt was unsuccessful; the police chief refused to divulge any information.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze "City Hall" station, which was decommissioned in 1945.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze concert, who comes up with a fitting song and dance for the occasion on the spot.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze, Donatello knocks on Michelangelo's head and it produces a hollow clonk.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze, Donatello winds up and baseball-swings his bo into Tokka's chest. The only damage is to Don's cool.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze features not a double take, but a triple take when Keno notices the Turtles running up behind him.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze forcing the violence to be toned down. Too many scenes are basically just one of the turtles throwing a punch or kick at a Foot ninja that's obviously several feet away who then does a back-flip or somersault in an unconvincing attempt to make it look like they were hit.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze going to avoid the people.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze has Raph saying "I thought I just saw a ghost!" as he's infiltrating the Foot Clan's new headquarters with Keno, and with good reason—he's just caught a glimpse of the Shredder, who he thought was dead following the last movie.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze has the title turtles playing keep-away from the Foot with the last canister of mutagenic ooze. It eventually finds its way into Tatsu's hands when one of the defeated Foot lays a staff across the floor, causing Donatello, who is riding on a chair, to wipe out.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze known as one of the Six

Cosmic Monsters of the Universe who guards a piece of the black hole generator and has no affiliation to Shredder and/or Rahzar in this incarnation.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze (played by David Warner) asking Michaelangelo to pass him a vial of dimethyl chlorinide. Quips Mikey, "I don't mean to criticize science, but wouldn't it be easier just to call it 'the pink one'?"
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze that resulted in the Turtles coming into being — namely, an unknown mixture of discarded chemicals being accidentally exposed to radiative waves.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze, the only turtle allowed to use his weapon was Donatello. Michelangelo had a psuedo-nunchuck moment in the opening scene using sausage links.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze to the Shredder.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze when Donatello hogties one of the robbers in the introductory battle.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze, which specifies Rahzar is the canine and Tokka the turtle.)
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze. While cleaning April's apartment, Mikey, who's cleaning the counters, asks his brothers to watch him.
* Teenage Mutant Ninja Turtles II: The Secret of the Ooze while yelling some more, then died. Doesn't help that Super Shredder was played by Kevin "argh my quad!" Nash either.
* Teenage Mutant Ninja Turtles, including the Battle Nexus, and its proctor, the Gyoji; and later, Hun and (off-panel only, due to the series' cancellation) Agent Bishop.
* Teenage Mutant Ninja Turtles. In some versions this is extended to the turtles' additional friends, including April and Casey.
* Teenage Mutant Ninja Turtles instead of the '80s series (such as his constant complaints about April's lack of yellow jumpsuits in the films, or that Judith Hoag looks nothing like April, when her portrayal did in fact resemble the original comic's version).
* Teenage Mutant Ninja Turtles in the 2003's series where Michelangelo is the only one who is a b-movie buff.
* Teenage Mutant Ninja Turtles. In the 2007 TMNT movie, Splinter even said that when they work together and are in the right rhythm, they are unbeatable.
* Teenage Mutant Ninja Turtles. In the 2012 cartoon, it started out as a Republic, and then became an Empire.
* Teenage Mutant Ninja Turtles: In the early black and white issues, the characters' swearing was limited to heartfelt cries of "Dung!"
* Teenage Mutant Ninja Turtles, in the "Guide to the Universe" sourcebook where a practitioner has this art.
* Teenage Mutant Ninja Turtles: In the original comic they are raised with one purpose: to murder Shredder, which they do in issue one.
* Teenage Mutant Ninja Turtles introduces Raptarr, a winged super-hero in the mold of the X-Men's Angel.
* Teenage Mutant Ninja Turtles: Inverted, as Splinter dies of a heart attack.
* Teenage Mutant Ninja Turtles is a bit different by having Donnie's staff have a retractable blade. As a result, the staff can double as a naginata in a pinch.
* Teenage Mutant Ninja Turtles is a variation. He doesn't need it to survive, but without it, he's a barely mobile brain-like creature.
* Teenage Mutant Ninja Turtles is hilarious in itself. It was also meant to parody the rampant sell-out/cash-in desires of its era's comic creators, making it more hilarious.
* Teenage Mutant Ninja Turtles is officially "New New York", as evidenced by several signs, it is still usually called "New York".
* Teenage Mutant Ninja Turtles is often sparked by her viewing multiple timelines and noticing the turtles having a water balloon fight on a rooftop and deciding it would be fun to drop in.
* Teenage Mutant Ninja Turtles, it's getting out of hand. If you watched the 80s

cartoon, Surfer Michelangelo would be far more likely than soldier or spy!
* Teenage Mutant Ninja Turtles, jaded cynic Breech Loader is fighting on the side of good, for good reasons, but despite a devotion to learning the ways of honour, she still fights horribly dirty.
* Teenage Mutant Ninja Turtles, Krang will attack this way. Justified in that it's an android body.
* Teenage Mutant Ninja Turtles live in a hideout within the sewers of New York City.
* Teenage Mutant Ninja Turtles made a household name out of what was once a bloody black-and-white self-published comic.
* Teenage Mutant Ninja Turtles make several attempts to undo the mutations of him and his brothers.
* Teenage Mutant Ninja Turtles, Michaelangelo is even more prone to this than ever. The most obvious example is when his brothers are arguing about how to pick a lock in a Kraang stronghold, Mikey asks whether any of them had bothered just hitting the nearby button... Which actually activates the alarm. Which all of them knew because they had all seen the same buttons used to activate the alarm system in the past... include Mikey. He still presses the button before anyone can stop him.
* Teenage Mutant Ninja Turtles, Michelangelo is goofing off and eating pizza during training when two of his brothers wreck one of his pizzas, causing him to go on a rampage that ends up helping Michelangelo win the training match.
* Teenage Mutant Ninja Turtles (Mirage), a flashback shows Hamato Yoshi told that for the crime of killing his fellow Foot ninja Oroku Nagi, he must either live in shame or redeem himself via seppuku. After the turtles defeat Nagi's brother (and Yoshi's murderer) Saki, they offer him the same ultimatum.
* Teenage Mutant Ninja Turtles (Mirage) breaks tradition by making April unambiguously African-American.
* Teenage Mutant Ninja Turtles (Mirage) came out, the Ninja Turtles exploded into pop culture icons.
* Teenage Mutant Ninja Turtles, Mirage continuity: In the Rat King's first appearance, he was revealed to apparently still be alive after his battle with the turtles in an abandoned factory. Later on, when an injured Splinter is trapped in the same factory, The Rat King appears periodically before him and acts as the rat's spiritual guide. Two months later, after Splinter heals enough to leave, he finds The Rat King's rag-covered skeleton.
* Teenage Mutant Ninja Turtles (Mirage) during one time-travel adventure where the Turtles spent some time stuck in medieval Japan, and Raphael passed the time by teaching ninjitsu and other ninja abilities to a pair of Ronin warriors. After the adventure is finished and the Turtles headed back to their own time, the Ronin decide to put their new skills to use...
* Teenage Mutant Ninja Turtles (Mirage)elangelo. Spelled that way because Eastman and Laird didn't look up how to spell "Michelangelo."
* Teenage Mutant Ninja Turtles (Mirage). Every subsequent appearance is actually a colony of worms that were scientifically and magically conditioned to take on the mind and physical form of whoever they ate.
* Teenage Mutant Ninja Turtles (Mirage) spawning many cartoons and toys.
* Teenage Mutant Ninja Turtles (Mirage) takes place on the rare occasions these games are acknowledged.
* Teenage Mutant Ninja Turtles (Mirage) the four heroes leave the planet and immediately come upon robots and aliens that speak English (and, in the same town, some who don't).
* Teenage Mutant Ninja Turtles (Mirage): The Fugitoid invents the teleportal as a means of instantaneous long distance travel. The Federation and the Triceratons want to use it as an instantaneous bomber. For instance putting a nuke in a planet's core. Eventually the professor decides it better to destroy it so no one can use it at all, than risk it being turned into a weapon.
* Teenage Mutant Ninja Turtles (Mirage). The Turtles, along with April and Casey Jones, find a dying fishlike humanoid creature on a riverbank who reveals she is the last female of her kind to April through telepathy. The last remaining four

males briefly fight the Turtles until the female dies from the sickness she's gotten from a nearby power plant. The males carry her body back into waters, while the Turtles watch, both species doomed to extinction. The End.
* Teenage Mutant Ninja Turtles (Mirage) was finished, Laird and Eastman got the stunt suits for Don and Raph respectively to keep as souvenirs.
* Teenage Mutant Ninja Turtles (Mirage), which are basically the most famous American comic book ninja.
* Teenage Mutant Ninja Turtles movie features April and Casey kissing, with the Turtles watching above from a rooftop congratulating them.
* Teenage Mutant Ninja Turtles movie, Raphael develops a crush on April some time after he rescues her from the Foot; he's noticeably bashful when she thanks him for rescuing her and she returns the favor by staying by his side when he's put into a coma to make sure he doesn't get killed. But the tension between them is not brought throughout the rest of the movie or any of the sequels.
* Teenage Mutant Ninja Turtles movie, the turtles hold a memorial service for a pizza that has grown moldy in their lair.
* Teenage Mutant Ninja Turtles movie, when an unconscious April recovers in the Turtles' lair, Michaelangelo looks at Splinter and asks hopefully, "Can we keep her?"
* Teenage Mutant Ninja Turtles movie, when Raphael is beaten into a coma by the Foot Clan, Leonardo spends the entire time watching over him after the Turtles retreat into hiding at April's farm.
* Teenage Mutant Ninja Turtles: Mutants In Manhattan: A recurring element in the game are timed segments where the turtles have to diffuse bombs set by the Foot. The more turtles doing the disarming at a time, the faster it is.
* Teenage Mutant Ninja Turtles: Mutants In Manhattan has a cel-shaded art-style, giving it a comic book aesthetic.
* Teenage Mutant Ninja Turtles: Mutants In Manhattan seems to prefer using flying machines over flying, first flying on a flying saucer in his boss-fight and then flying away on a glider. The closest we ever see is that he flaps his wings when he jumps high, implying his wings are not meant for flight. Later subverted in his second boss fight where he is seen hovering.
* Teenage Mutant Ninja Turtles: Mutants In Manhattan wields a chainsaw in his boss fights.
* Teenage Mutant Ninja Turtles: Mutants In Manhattan wields a giant hammer.
* Teenage Mutantninja Turtles(NES), the Foot Clan do this to the Turtles' apartment when they kidnap Splinter.
* Teenage Mutant Ninja Turtles newspaper comic, the turtles have several (mis)adventures end on a space bus station after closing hour. In the darkness Raphael gets separated from the others, and Leonardo think they should better search for him:
* Teenage Mutant Ninja Turtles. Note that her characterization differs according to the movies or series.
* Teenage Mutant Ninja Turtles of a mystery show being interrupted by a news report from their friend April O'Neil.
* Teenage Mutant Ninja Turtles, of course — with April O'Neil and Casey Jones as the human allies. Later volumes have humanity meeting aliens like the Utrom, so the Turtles begin going in public but still hide their mutant nature by pretending to be aliens.
* Teenage Mutant Ninja Turtles of its presence that lead to the double-standard as it will make less of an impact because of its placement.
* Teenage Mutant Ninja Turtles of scholar he is). He also discussed horror tropes in season 1's three-parter "Notes from the Underground".
* Teenage Mutant Ninja Turtles of the team. His intellect has saved the day numerous times and he's skilled with a bo staff.
* Teenage Mutant Ninja Turtles (of the Turtles) capturing them and April. The Turtles are frozen still with a gas and put on display while the villain prepares to dip April in wax and intends to do the same to the heroes. Irma arrives just in time to unfreeze them and they save the day, battling an army of robots that the

villain used as skeletons for his wax figures.
* Teenage Mutant Ninja Turtles once his consciousness is transferred to a new one, with his skin and muscles melting into purple goo.
* Teenage Mutant Ninja Turtles; one berserker rage later, Yoshi had killed Nagi. Saki's death wasn't the end of things, however; after he was slain, the Foot Clan that he led became honor-bound to kill the turtles in order to avenge him, and the cycle continues until Karai, who had been sent from Japan in order to unify the then-warring Foot Clan, offers to end the vendetta if the turtles help her eliminate one of the rogue factions, a deal which they take.
* Teenage Mutant Ninja Turtles one-shots took place at Christmas, and featured lots of action scenes:
* Teenage Mutant Ninja Turtles), only to discover he can't, as he winds up "thinking about not thinking".
* Teenage Mutant Ninja Turtles on sketches. "No one knows who Krang is! It would be a waste of time to talk about Krang on television! No more Krang!"
* Teenage Mutant Ninja Turtles (or the early IDW issues), asking why all of the Turtles are wearing red, or "why they're all Raph", or any indication that their original bandana color is weird and foreign.
* Teenage Mutant Ninja Turtles: Out of the Shadows, after horsing around for a bit, they both pull out the fronts of their pants and look down, punctuating it with a mutual boast of, "My man!"
* Teenage Mutant Ninja Turtles: Out of the Shadows, after Raph and Mikey trick Casey into charging Splinter for shit and giggles, and he gets his ass trounced by the ninjustu master, we get a short shot from Casey's viewpoint, with the Turtles, April and Splinter huddled above him.
* Teenage Mutant Ninja Turtles: Out of the Shadows couldn't and actually feel like a genuine TMNT adaptation, or a still terrible movie that wastes many fan favorite characters?
* Teenage Mutant Ninja Turtles: Out of the Shadows: In "Broken Things", after suffering from constant bad dreams and tormented by her memories of her time as Krang's guinea pig, Hisako breaks down and attempts to commit seppuku using one of Leo's katanas. Splinter enters the room just in time and distracts her, causing her to miss and non-fatally cut her side.
* Teenage Mutant Ninja Turtles: Out of the Shadows: Mikey accidentally breaks off mechanized nun-chuck arms on the Turtles' truck by raising them in the air in celebration before driving under an overpass.
* Teenage Mutant Ninja Turtles: Out of the Shadows, the Turtles infiltrate a plane in-flight, only to find it's full of Foot ninja.
* Teenage Mutant Ninja Turtles: Out of the Shadows, the Turtles pass by a Halloween parade.
* Teenage Mutant Ninja Turtles: Out of the Shadows, they also used Hisako as a lab rat, putting her through horrific experiments for the first ten years of her life.
* Teenage Mutant Ninja Turtles: Out of the Shadows, this is the way Raphael lands on an airplane.
* Teenage Mutant Ninja Turtles: Out of the Shadows to use against Krang. The alliance falls apart when the Newtralizer reveals his plans for the mech:
* Teenage Mutant Ninja Turtles, Raphael heads for the roof after a fight with Leonardo. Suddenly, a bunch of Foot ninjas attack him. After their numbers grow, they manage to overtake him and throw him through a skylight and down into April's apartment. Later, the climactic battle against Shredder takes place on a different rooftop.
* Teenage Mutant Ninja Turtles: Raphael, in heated response to Donatello's teasing of him getting televised credit for saving April's life, hurls one of his Sai at his brother. It lands right between the latter's legs, prompting him to quickly cease.
* Teenage Mutant Ninja Turtles reboot, signed up on a high-profile message board on the subject. After only a few posts, he announced that he was leaving and never coming back, due to being outright bullied over tiny perceived foibles over and over, including one user that posted many times, complaining about the same exact

thing in each post leading to dozens of messages in between his visits about the same thing, from the same person.
* Teenage Mutant Ninja Turtles: Rescue Palooza is a love letter to the 80's series, made with OpenBOR.
* Teenage Mutant Ninja Turtles season, Shredder and Krang's goal is to free the Technodrome from wherever in the universe it's trapped. It's always in the season finale or next season opener that they succeed, only to get it trapped somewhere else.
* Teenage Mutant Ninja Turtles series, and actually called in advance by Michaelangelo, who is a sci-fi aficionado. Later on used again in the episode "The Trouble With Augie", recording the destruction of an interdimensional culture by their seemingly-benign visitors.
* Teenage Mutant Ninja Turtles series, beginning as acquaintances, and later friends, until the third season, when they become a couple. In the last season, Casey has proposed to April, and the two are now married. Other incarnations of the couple have gone through the process as well.
* Teenage Mutant Ninja Turtles series had the Foot, and then the Elite Foot who appeared from behind him, all the time, with massive straw hats. And big weapons.
* Teenage Mutant Ninja Turtles series, Leonardo manages to slice Karai's Shredder helmet into several pieces to get her attention.
* Teenage Mutant Ninja Turtles series, Rocksteady asks the secretary, "Bring me five hundred jelly donuts and a diet soda. I'm trying to watch my weight."
* Teenage Mutant Ninja Turtles series. The series starts out with the Utroms, aliens who have appeared in the story before, coming to Earth and offering the planet a chance to join the larger galactic community. The narration describes how the world reacts to the offer and knowledge that aliens exist. Among other things, religions try to fit the aliens' existence into their doctrines, several regimes are overthrown, and the stock market is thrown into chaos. There're more mundane consequences, such as a vicious bidding war between toy companies for the right to produce Utrom plushies. The story resumes after the governments of the world have mostly managed to smooth things out, but the way society has changed to accommodate the aliens is a major part of the series from that point on.
* Teenage Mutant Ninja Turtles series, the Turtles had disguises made by April's TV studio consisting of latex masks that resemble generic male bald humans. Usually they would simply wear these masks with only trenchcoats and nothing else (not even caring if their true turtle hands are exposed). Raphael initially doubts this will work...
* Teenage Mutant Ninja Turtles, she heads into April O'Neil's shop and asks her to give Leonardo a message. When April asks Karai (whom she's never met before) how she knows the turtle, she responds with the trope name.
* Teenage Mutant Ninja Turtles shows presumably younger versions of the Ninja Turtles attempting to do this. They don't seem to be cooperating very well.
* Teenage Mutant Ninja Turtles, Shredder capitalizes on the trope when hatching a plot against the turtles, taking advantage of their affection for April - whom he directly notes is "their weakest point." (He took advantage of that "weakest point" several times, but that was the only time he identified her as such.)
* Teenage Mutant Ninja Turtles: Shredder's Revenge it would be better to team up rather than compete against each other.
* Teenage Mutant Ninja Turtles silly moments. It helps that it's pretty self-aware of its roots in both shows and the original comic.
* Teenage Mutant Ninja Turtles since it also gives the brothers their weapons back for the final battle.
* Teenage Mutant Ninja Turtles) since none of the other turtles are interested in the position. Played with by the fact that Raph tends to rely on brute force for anything and isn't particularly good at making decisions, and Leo often is the one who organizes things during battles without usurping his position.
* Teenage Mutant Ninja Turtles, since staves and nunchaku are much easier to obtain, this led to much more violence among children imitating Mike and Don. This eventually resulted in Mike trading in his nunchakus for a grappling hook.

* Teenage Mutant Ninja Turtles: Smash Up, so they're really bashing themselves.
* Teenage Mutant Ninja Turtles sometimes fills in the gap with stories taking place during the Time Skip.
* Teenage Mutant Ninja Turtles spaceships, which now comprise the backbone of the Triceraton fleet.
* Teenage Mutant Ninja Turtles Splinter and Shredder's minds are accidentally swapped. Splinter manages to bluff his way through, after almost being found out when he doesn't sufficiently insult and belittle Shredder's two idiot minions Rock Steady and Be-Bop. Shredder, on the other hand, has far less success.
* Teenage Mutant Ninja Turtles. Splinter and Shredder were now dead, as were Kraang Prime and Sub-Prime. The theme song was also changed. Unlike the past seasons, every episode was now part of a mini-arc. The show lasted only one more season after the retool.
* Teenage Mutant Ninja Turtles, Splinter performs an impressive feat of magic with three tiny white spheres, shrinking three inflated turtles back to normal. He explains the spheres were given to him by a wise Sensei for use in an emergency, but they aren't made of anything magical:
* Teenage Mutant Ninja Turtles, starting in 2003, the Turtles and Splinter are a family, and they sometimes extend it with April, and Casey.
* Teenage Mutant Ninja Turtles (Stern) going around at the time of the game's release.
* Teenage Mutant Ninja Turtles (Stern) lays off on it, but still has a few voice clips that engage in (by then dated) '80s and '90s slang.
* Teenage Mutant Ninja Turtles (Stern) makes April constantly sound rather unemotional. Best shown during the introduction to "The Wrath of Krang", where she reports on Krang rampaging through the city, looking and sounding mildly annoyed at most.
* Teenage Mutant Ninja Turtles (Stern), the captured turtles are each tied to a chair.
* Teenage Mutant Ninja Turtles (Stern) (the game's designer). The article's body simply consists of the lyrics to the theme song.
* Teenage Mutant Ninja Turtles (Stern), the mode "Team Up" involves rescuing three of the four turtles (whichever ones you're not playing as) from the Shredder.
* Teenage Mutant Ninja Turtles - Superhero series based on a comic book series and even more popular animated cartoon series, 6 films since 1990, five live-action, one completely animated in CGI.
* Teenage Mutant Ninja Turtles swipes some because he was sick of being treated like a freak by the people of New York. Of course his brothers had to turn him back because the transformation would've eventually killed him.
* Teenage Mutant Ninja Turtles tale set thirty years in the future, features the final battle between the turtles (and their surviving allies) and the Shredder, who has conquered the world. In the end, the only surviving cast members are resistance leader April O' Neil and present-day Donatello, who soon after is whisked away to another era.
* Teenage Mutant Ninja Turtles tendency to plaster its logo everywhere made for a minor wall banger, as the organization's dragon claw symbol was also used in its legitimate operations, meaning that anyone who got a good look at a Foot Ninja would see the symbol adorning the Foot's very visible skyscraper base and put two and two together without effort.
* Teenage Mutant Ninja Turtles that a romance with April began. For the longer version see the second bullet below.
* Teenage Mutant Ninja Turtles that bred Mix-and-Match Critters to be his slaves (a gorilla-bison was among the examples).
* Teenage Mutant Ninja Turtles that he and one of the Turtles must save. The portal stays open long enough for the Turtle to return home... but not Kirby.
* Teenage Mutant Ninja Turtles the 2003 versions of the Turtles openly mocked the 1980s Turtles for it.
* Teenage Mutant Ninja Turtles: The Arcade Game. In reality, there's only two Stone Warriors in the entire game, Lt. Granitor and General Traag, and they're both end-

stage bosses.
* Teenage Mutant Ninja Turtles: The Arcade Game, the first level is like this. Flames span the bottom of the screen throughout the entire stage, even after you go into the room at the end of the hall, where the only smoke in the level is found. In the arcade version, there are also occasional patches of fire on the ground. None of the fire in the level hurts you even if you walk right into it.
* Teenage Mutant Ninja Turtles: The Arcade Game to indicate their weapons of choice. For example, the white Foot Soldiers attack with katanas, while the orange ones wield boomerangs.
* Teenage Mutant Ninja Turtles, the Archie comics version had a female Middle Eastern soldier with special powers.
* Teenage Mutant Ninja Turtles, the CGI movie, has them doing full-on parkour runs of the city. Even more impressive is that each turtle has his own preference and style of moving.
* Teenage Mutant Ninja Turtles, the logo gained a green turtle shell design.
* Teenage Mutant Ninja Turtles: The Manhattan Project, Shredder issues a challenge to the Turtles by airlifting the entirety of Manhattan Island into the sky. It's up to the Turtles to get it back down.
* Teenage Mutant Ninja Turtles-the original Eastman and Laird series is far more brutal than the cartoons or movies made in its name. In its climactic Turtles vs Foot Clan scene, the Foot Clan is slashed to pieces (with blood and severed limbs all about) and Shredder beaten to a gasping pulp. Leonardo offers him a dagger with which to perform seppuku, so he could go out like the samurai he dresses like. Instead, Shredder pulls out a grenade and attempts to perform this trope.
* Teenage Mutant Ninja Turtles). The same goes for virtually their entire supporting cast, most notably their adoptive father Splinter, and sometimes-foe Leatherhead.
* Teenage Mutant Ninja Turtles, the Shredder give Leonardo an ancient sword forged by a man who folded the metal 1,000 times to take out any impurities. Also the Shredder's magic sword.
* Teenage Mutant Ninja Turtles, the team originally consists of four dinosaurs - T-Bone the t-rex, Spike the triceratops, Bullzeye the pterodactyl, and Stegz the...yeah. In the latter half of the series, they are sent to an alternate dimension and bring back the ankylosaur Hardrock to become their fifth ranger. Except he's barely mentioned or acknowledged even after then. Hmmm.
* Teenage Mutant Ninja Turtles; the Teenage Mutant Ninja Turtles use a dimensional portal stick to go to the 1987 universe.
* Teenage Mutant Ninja Turtles, the title turtles and their master, Splinter were all once ordinary pet turtles (and a rat), but were all mutated into their current forms after exposure to radiation coming from a leaking can full of mutagenic ooze. (In a couple of the adaptations, Splinter was originally human, but the turtles are consistently turtles.)
* Teenage Mutant Ninja Turtles, the turtles (excluding Donatello) stacked up to fix a light. The totem collapsed when Michaelangelo (at the base) got up to do something not realizing he was still supporting the totem.
* Teenage Mutant Ninja Turtles. This might explain why they made such crappy ninjas.
* Teenage Mutant Ninja Turtles. This would have been more effective if the Shredder wasn't actually an alien inhabiting a much larger robot body.
* Teenage Mutant Ninja Turtles to disable the device, and return him to normal.
* Teenage Mutant Ninja Turtles to do all the cleaning work around the Technodrome, even though they are lazy and incompetent enough that it would seem more efficient to have the work done by robots.
* Teenage Mutant Ninja Turtles took a chance in it, and the film was one of the most profitable independent movies at the time, earning its $13.5 million budget 10 times over!
* Teenage Mutant Ninja Turtles toon, part of Krang's backstory was that he had been exiled from Dimension X.
* Teenage Mutant Ninja Turtles to see if April's devotion to Casey was strong

enough that she'd be willing to go through anything for him.
* Teenage Mutant Ninja Turtles: Tournament Fighters arcade game when he's taken captive by Granitor.
* Teenage Mutant Ninja Turtles: Tournament Fighters features a shark named Armaggon as a playable character, whose fighting style resembled an odd mix of Guile and Dhalsim.
* Teenage Mutant Ninja Turtles: Tournament Fighters takes place on top of a commuter train.
* Teenage Mutant Ninja Turtles toyline came out. The first action figures were set to give the Turtles tails, which their comic book counterparts did have. While tails did work on the characters in the two-dimensional drawings, in the 3-D mock-ups, they ended up looking rather... phallic. So the tails were removed, and the Turtles were never depicted having tails since.
* Teenage Mutant Ninja Turtles turtle named Venus was introduced to the previously all-male quartet. (She could be a sixth ranger if you count Splinter, though.)
* Teenage Mutant Ninja Turtles Turtles instead. The newer cartoon didn't catch on and only 52 episodes were dubbed before it got canceled.
* Teenage Mutant Ninja Turtles: Turtles in Time, a turtle who runs over the spikes in the water will say, "My toes! My toes!" Also, if he steps on a loose board on the pirate ship, it smacks him in the face, prompting him to say, "Ohhh, my nose!"
* Teenage Mutant Ninja Turtles: Turtles in Time, a turtle will leap if injured on the foot (such as by floating spikes in the sewer surfing level).
* Teenage Mutant Ninja Turtles: Turtles in Time before the Game Over screen.
* Teenage Mutant Ninja Turtles: Turtles in Time (despite the two games' different art styles).
* Teenage Mutant Ninja Turtles: Turtles in Time has loose planks on the pirate ship level that smack the player character whenever they step on them. It's the same gag.
* Teenage Mutant Ninja Turtles: Turtles in Time, if you run over spikes (while riding your jetboard!), your character does the hurt foot hop while saying "My toes! My toes!"
* Teenage Mutant Ninja Turtles: Turtles in Time starts with Krang piloting a massive exosuit and stealing the Statue of Liberty on live television.
* Teenage Mutant Ninja Turtles: Turtles in Time. The year the level takes place in? 2020 (the game was released in 1992). Despite the year growing closer, there is nary a hoverboard, a floating highway, or a futuristic styled skyline in sight.
* Teenage Mutant Ninja Turtles: Turtles in Time thought it was a good idea at the time during the arcade release.
* Teenage Mutant Ninja Turtles: Turtles in Time was set on a moving train of flatbeds. Other than Foot Soldiers riding up on horses and boarding, it could have been a ground level and not changed the essence of the gameplay.
* Teenage Mutant Ninja Turtles TV adaptations do this all the time with intense music.
* Teenage Mutant Ninja Turtles, two live action musical specials, a couple of novels, several kid's books, magazines and crossovers and heaven know how much toys and merchandise.
* Teenage Mutant Ninja Turtles, Usagi says this when he and Leonardo infiltrate a fortress. While Usagi respects the Turtles, he doesn't really like ninjas.
* Teenage Mutant Ninja Turtles uses this in one of the episodes where an alien invasion is faked.
* Teenage Mutant Ninja Turtles usually plays this role in the show, as he is very wise and skilled. And a ninja, of course.
* Teenage Mutant Ninja Turtles utilizes this to let the turtles walk the city. No one will ever notice that you are a large green turtle if you wear a trenchcoat and a hat!
* Teenage Mutant Ninja Turtles was leaked twice prior to its announcement, both officially and unofficially:
* Teenage Mutant Ninja Turtles was one of these, featuring a significant amount of the series' supporting cast and even the creators themselves in a cameo.

* Teenage Mutant Ninja Turtles were explicitly trained by a Japanese ninja, who had moved to New York and got turned into a rat (or a rat who learned from such a ninja before passing his teachings on to the turtles). However, they are in every other way 100% American.
* Teenage Mutant Ninja Turtles whenever Donatello describes a device using scientific terms. One example when the Technodrome escaped Dimension X heading towards Earth:
* Teenage Mutant Ninja Turtles when you consider that he was still never able to locate the turtles' lair.
* Teenage Mutant Ninja Turtles, where Raphael's tendency to smack Mikey around a bit extends to Donatello and even Leonardo (the last of which, at least, will hit back). A lot of Raphael's humor involves various insults leveled at his brothers.
* Teenage Mutant Ninja Turtles, where they are transported to feudal Japan by means of a magical scepter, as kappas generally resemble humanoid turtles.
* Teenage Mutant Ninja Turtles), which, according to Turtlepedia, is filled with "all kinds of technology the Turtes found or developed". Among other things, it has laser guns on the roof, and on the fold-out doors. They also have other vehicles as well.
* Teenage Mutant Ninja Turtles, which is odd, since there was no indication from the last movie that things would turn out this way.
* Teenage Mutant Ninja Turtles, while set in an alternate dimension rather than a future Earth, this trope comes into play, as the Turtles and Casey Jones find themselves pursuing a group of mutants who have stolen their car, in a high-speed chase on top of a floating highway in the sky of an alien world.
* Teenage Mutant Ninja Turtles"), while the color coding of their bandannas happened about the same time as the comics. All subsequent adaptations have taken their cues from that.
* Teenage Mutant Ninja Turtles wields the nunchaku, an extremely difficult weapon to master, while his brothers can't. Despite his natural talent, he would rather sit down and play video games.
* Teenage Mutant Ninja Turtles will cry out "Mamaaaaa!" often during a bad situation.
* Teenage Mutant Ninja Turtles with homemade materials and the occasional bit of salvaged alien technology.
* Teenage Mutant Ninja Turtles, with Shredder appearing through a dimensional portal accompanied by vast armies of Foot Soldiers behind him. While it was an action show, there were a lot of episodes that didn't have very much fighting, and any time the Foot appeared it was usually in small groups, instead of being a vast horde.
* Teenage Mutant Ninja Turtles you can usually rely on Michelangelo to fill the role. Typically the youngest of the four he is also the most fun-loving and laid back member, which keeps the others in check (particularly Raphael and Leonardo, who frequently butt heads as contrasting personalities).
* Teenage Mutant Samurai Wombats: A team of heroic non-humans fighting crime in a modern setting. Feared by all but a few human friends, they must stay in hiding.
* Teenage Mutant Samurai Wombats: Heroic non-humans fighting crime in a modern setting, living in hiding from all of society save one or two human friends.
* TEEN Agent, established its eponymous hero as one of these from childhood. He spoke French, German, Romani (the language of the "Gypsy" people), Turkish, Swahili, and Apache among others.
* teenage officer. His host told him, "I assure you, sir, that it is necessary." Whereupon the guest said, "I cannot swear to that. But I do know that it is not necessary that I should watch it."
* Teenage Paparazzo) who've gone down a self-destructive path due to the pressures of fame and a demanding legion of photographers trying to get their photograph are shown to prove this point.
* Teenage Robot has the Sour Kangaroo tell everyone that Horton's sayings about the speck will lead to anarchy and gets everyone to cage him and destroy the speck. When Horton's words turn out to be true and the speck is saved, the Kangaroo gets

shunned and hated.
* teenagers and young adults. They're infamous for a very aggressive form of online boycotting called "cancelling", in which they strive to seriously damage their target's reputation/career and drive them out of polite society (or at least off the current platform, by appealing to moderators to get them banned).
* Teenagers from Outer Space and the reason all the aliens have come to Earth.
* Teenagers from Outer Space: Derek is killed by the mass crash of the alien fleet.
* Teenagers from Outer Space, Earth is the only planet in the universe to have developed a teen culture.
* Teenagers from Outer Space gave the invaders guns that instantly reduced humans (and dogs) to bleached skeletons.
* Teenagers from Outer Space has a novel way of handling this; when a PC tries to use telepathy, the GM makes up three different things the target might be thinking, and the player rolls a die to determine what they pick up. Thus, you may be trying to find out if your cute classmate fancies you, only to stumble upon her plans for world conquest through absolute control of toilet paper supplies. This is entirely appropriate for the game.
* Teenagers from Outer Space has a unique twist on the classic flying saucer: the alien ship is essentially a gigantic screw with a UFO as its head. When it lands, the screw part drills into the ground so only the head is left exposed, looking like a normal flying saucer has landed.
* Teenagers from Outer Space has its Alien Control Officers, who are supposed to keep the chaos caused by alien students to a minimum. Since they're equipped with black suits, black sunglasses, excessive ultra-tech firepower, and "All the tactical sense of a pithed hamster", this rarely works.
* Teenagers from Outer Space, it's more like the body just disappears and is replaced by a prop skeleton.
* Teenagers from Outer Space, most player characters will be aliens with whatever strange customs their players can come up with (since there are no "standard" races), so it's fine to play this trope to the hilt. Hilariously, humans get a shot at it too in the form of the "Fake Out" ability; because humans come from Earth, which is the coolest, most interesting, and happening place in the universe, any native human must probably know just how to act, talk and behave in order to be cool, interesting and happening, and you should listen to them if you want to fit in. Thus, if a human tells an alien to wear golf pants, greet the teacher by farting, and always carry a trout, then clearly they must know best. (At least until the alien finds out they've been had.) Another popular one is to tell the cute space babe that humans greet each other by kissing...which can have unexpected consequences.
* Teenagers from Outer Space, Not Very Near Humans, and Real Weirdies, which usually fall under this trope.
* Teenagers from Outer Space. The rules specifically state that characters either have militant parents who will punish even the smallest infraction harshly, or hippie parents that refuse to take an interest in your life. However, since the main point of the character interaction is teenaged drama, having antagonistic parents works.
* Teenagers from Outer Space. Two people having sex is dramatic, boring, and awkward. Two people trying desperately to have sex, only to be thwarted by spaceship accidents, alien control officers, and unexpected surprise parties is hilarious.
* Teenagers from Outer Space used the shadow of a lobster for its giant monster.
* Teenagers from Outer Space was made on a budget of US$14,000 (with inflation that's about $114,000 today). This is indicated by such things as a toy standing in for a death ray and an extended sequence featuring a lobster dangled in front of the camera to serve as a giant alien monster.
* Teenagers from Outer Space who run out of "Bonk Points" aren't killed, but temporarily taken out of action.
* Teenagers having sex in various quiet (and sometimes not so quiet) corners became a common feature. One middle-aged female diarist even described walking

through the Tiergarten with a companion, with both of them trying to come up with a witty name for it that took into account all the nervous giggling and sighs of pleasure they heard...when she saw her fourteen year old son with a lady friend, walking in the other direction and adjusting their clothes. The comedy of the situation is made tragically grim when the motivation for all this randiness is taken into account: German girls wanted to lose their virginity in a consensual sexual act, rather than have their first experience of sex be rape by a drunken and probably violent Red Army soldier.
* teenagers - is extremely unconstitutional. In US law, while conscription is permitted, no Congressional act or executive order can violate the Constitution, and the McGrauer-Linden Act is among the most extreme imaginable violations of due process, which is protected by the Fifth Amendment.
* "Teenagers Slipping on Ice" is a video of school kids falling one by one on icy pavement.
* . Teenagers will often go on tours of the state using the magazine as their guide. Has been spun off into two books, as well as books covering other states.
* teenager, when fellow scout Herman asks how he's going to get the Cross of Coronado away from Fedora and his men, he admits that he doesn't know, but he'll think of something.
* Teenage trance medium Nettie Colburn Maynard, however, had a sitting with Lincoln in December 1862 concerning
* Teenage Wasteland: A world where children somehow gain power over adults.
* Teenage Wasteland: Kids now have adult powers and responsibility and rule over adult society.
* Teenage Worrier, but at the end, we learn the father in that book has begun creating another work.
* Teenage Worrier series, Letty's father is the author of a widely acclaimed novel called "Moving On", but since his daughter's birth it has taken him almost sixteen years to finish his next work (and, it is implied, he probably never will.)
* Teenage Worrier series, where Letty's parents are rarely at home, refuse to cook or buy groceries, smoke and get drunk in the house, and largely ignore her in favor of their younger son.
* Teenage Zombies: Invasion of the Alien Brain Thingys: All the alien brain thingys are contained in jars that they use for mobility.
* Teenage Zombies: Invasion of the Alien Brain Thingys can turn his skateboard into one with the hover disc.
* Teenage Z Ombies Invasion Of The Alien Brain Thingys is missing the lower half of his body. He gets around on his skateboard.
* Teenage Zombies: Invasion of the Alien Brain Thingys is that Earth is being invaded by the titular aliens, when said aliens meet unlikely resistance in the form of a trio of undead teenagers who see them as an all-they-can-eat brain buffet.
* Teenage Zombies: Invasion of the Alien Brain Thingys: The titular trio are comprised of undead children.
* Teenage Zombies: Invasion of the Alien Brain Thingys wears a red hood.
* Teen Angel featured a P.A. announcement requesting that the first two letters from a "Class of '98" sign be returned. The recently deceased Marty then proudly shows Steve the two letters, knowing full well he could never be caught due to his being dead.
* Teen Angel has Marty conjuring up closed captioning for his and Steve's dialog, though the captions lose accuracy almost immediately. When Marty notices and remarks, "That's not what I said!" the caption renders as "There's snot on my head."
* Teen Angel, Marty dies and becomes the title character after eating a six-month-old hamburger found under his friend Steve's bed.
* Teen Angel Steve gets a crush on Jessica Fishman, a popular cheerleader. He winds up dating her for most of the series. Granted, the series lasted 17 episodes...
* Teen Angel, where the title character creates smoke but is left standing in the room. Then, in front of the person he wants to escape from, walks into a closet.

* Teen Beach 2. "Every line's a perfect take/Never need a bathroom break"
* Teen Beach Movie (2013), the only TV Movie released by Disney Channel that year.
* Teen Beach Movie. By coincidence, Mack is where Lela, the female lead, should be when she met her boyfriend Tanner; and vice-versa with Brady and Tanner. As a result, he and Lela believe wrongly that, respectively, Mack and Brady are their soulmates. The latter two spend the rest of the movie trying to put them back in the right path.
* Teen Beach Movie. They get back together at the end of the film after she changed her mind and decided not to go after all.
* Teen Beach Movie was dedicated to Annette Funicello, one of Disney's original Mouseketeers, whose "beach party" movies were being spoofed in the film.
* Teen Beach Movie" were most likely unaware that it was a spoof of the teen beach movie series of the 60s starring Frankie Avalon and famous Mouseketeer Annette Funicello.
* Teen Care Bears, an organization that pathologically fears and attempts to destroy all forms of magic, as leaving them alive might cause most of humanity to turn on the Care Bears. In a later story, they seem determined to kill Fauna because she's been corrupted by No-Heart and might pose an unstoppable threat to everyone if she's left alive.
* Teen Crumpets episodes have few songs with English lyrics, such as Damon Grobain's song in "L'ADN à Pa", the song that Cassandra sings in "Quasi Cassie", and the disco song apparently sung by Marylin in "Marilyn Blues".
* Teen Drama, when Gumball and Darwin try to help the saddened Claire when she suddenly has to move.
* Teen Genius and something of a special case. On one level she understands just how suicidally dangerous being a pilot is, and has made peace with it (at least at first). She also shows impressive understanding of other people's motivations and relations (with the notable exception of Rei — she's aware of Misato/Kaji, just in denial). On the flip side, she is very short-tempered and bratty.
* Teen Genius, but he beat Gozaburo in a chess match in order to get him and Mokuba adopted. When he was TEN. THAT takes SKILLZ!
* Teen Genius, but underneath is extremely lonely from constantly moving schools, insecure about everything outside of studying and hides her intelligence to avoid being labelled the 'freaky math girl'. She does become more comfortable with herself after the first film.
* Teen Genius by Todoroki, was to create the disguises, she opts for going into a store instead. While she does play an important role by helping everyone track down the Nomu, you can take her out of the latter part of the story and nothing changes.
* Teen Genius instead of thinking up real, sustainable solutions to them.
* Teen Genius Mark Desmond, the original Blockbuster, which gave him a large, super-strong body but similarly reduced him to a childlike level of intelligence.
* Teen Genius show that he's class president and seems to be popular at his school, in part because he's smart enough to get on people's good side and use his snarky zingers effectively.
* Teen Genius, simply because she wants him to admit that he is wrong (it's her methods in doing so that put her into villain territory).
* Teen Genius who once unlocked a Storage Vault door by tinkering with the fuse box.
* Teen Genius who very nearly beat her through sheer talent later in the series.
* Teen girls' huge phone bills, this idea has found new but distinct life. Instead of calls or texts running up the phone bill, it is in-app purchases.
* Teen Girl Squad by texting somebody who is only a few feet away from her, and making a "frontways Cupid" that looks like a "USB Dongle goblin".
* Teen Girl Squad, Cheerleader and So and So are trying to impress a pair of "olda boys":
* Teen Girl Squad, Cheerleader claims the other girls can't go to The Ugly One's Sweet Someteenth birthday because "We have...the...Olympics...tonight." Though once The Ugly One tells them it's a "boy/girl party," Cheerleader tells her the coach just called and says the Olympics are dumb, so she can come to the party after all.

It then cuts to an Olympic coach being glared at by an Olympic Man, who says "I don't know what they're talking about, I swear!"
* Teen Girl Squad, Cheerleader is considered the hottest out of the group in-universe. She's also the meanest.
* Teen Girl Squad draw that new hotness?"). So much so, he prevents the "Arrow'd Guy" from, err, Arrowing her, and proceeds to make out with the piece of loose-leaf she's drawn on.
* Teen Girl Squad episode #7: "I saw Tompkins in his under—where're you going?"
* Teen Girl Squad has a Scotsman caber-tosses Cheerleader and is disgusted that his throw only goes 23 meters. Success in the caber toss is measured by straightness, not distance. The Chaps point out their mistake in the DVD commentary.
* Teen Girl Squad has a set of Spear Counterparts in the Four Gregs, though it's not quite as blatant (there's not an easy match-up of personalities, for example).
* Teen Girl Squad has Manolios Ugly One, who likes to advertise his store which specializes only in selling used and broken electronics such as a broken VCR and smashed tape.
* Teen Girl Squad has So-And-So's imaginary boyfriend Brett Bretterson. In a weird twist, she actually speaks to "him", much to the concern of the other girls. In a later episode, she claims that she broke up with him.
* Teen Girl Squad, having been turned down multiple times and only getting into one date in the entire series (who may or may not have been a relative).
* Teen Girl Squad Issue 11. So-and-So is getting chewed out by her obnoxious manager at Shirt Folding Store when the manager is suddenly punched out by an astronaut ("MEET A FIST!"). The explanation for this behavior?
* Teen Girl Squad Issue #11, So-And-So's manager at the Shirt Folding Store has her hair, eyes, mouth, and feet taken from clipped-out magazine pictures of a real-life person (Mary-Kate Olsen, to be precise).
* Teen Girl Squad issue #12, the girls spend the whole episode talking about "Valentimes Day". So-and-So, the most academically adept one, finally snaps and yells that it's ValenTINE'S Day. The TGS universe being what it is, she promptly gets impaled by the tines of a fork... strapped to the front of a car.
* Teen Girl Squad issue 14, What's Her Face finds a slice of cake in her locker so old, it's mutated into a giant monster, which promptly eats her.
* Teen Girl Squad Issue 5, Whats-Her-Face is watching Thomas skateboard. He's announced as doing a "360 Shove It to Boneless". A Boneless is an ollie (jump) move, and thus can't be linked to this way.
* Teen Girl Squad), much to the disgust of Sci-Fi Greg, who defies the trope.
* Teen Girl Squad of the group. It helps that the series mocked the "high school hierarchy" that they were victims of.
* Teen Girl Squad opens with the girls listening to the opening announcements, which mentions that the day's lunch is "a breadtangle of pizza", Tompkins is being called to the principal's office, and there's a Battle of the Bands coming up.
* Teen Girl Squad short "4 Gregs", crickets are heard when the other Gregs are confused by D&D Greg's knowledge of the rules of football.
* Teen Girl Squad spinoff "4 Gregs" has Tompkins's website get "HAXXORED", to which he exclaims, "Ow! All my client!"
* Teen Girl Squad, the girls tend to speak in whatever slang they think is cool, including AAVE. This is parodied in issue 15 where What's Her Face is confused by the school dance being called the "Priggidy Prizom" and feels she needs to brush up on her "white girl gangsta".
* Teen Girl Squad, the girls wil cry out "Ow! My [body part or attribute]," when they get injured or killed. This is usually caused by the "comic"'s trademark cathphrase/running gag: "[noun]'d!!!" This descended from the first strip's use of "Arrowed!!!", and includes "404'd!!!", "MSG'd!!!", "Cerebellum'd!!!", and "Late 360 shove-it to boneless...'d!!!"
* Teen Girl Squad, The Ugly One gets "MSG'd!", destroying her stomach lining and leaving her, if not necessarily dead, limp on the ground with X'd-out eyes. In the next scene she reappears good as new, finally saying "My stomach feels better."

* Teen Girl Squad threatens D&D Greg with "I gut you like sheep!" Then he follows through on that threat. D&D Greg complains that the gutted sheep that said it wasn't so bad was lying.
* Teen Girl Squad to be somewhere between 13 and 19, which answers nothing since that age range is the exact definition of a teenager. Some ages have been implied, but most of them are contradictory; one issue claims that Cheerleader and So-and-So are in eighth grade, but another has What's-Her-Face claim she's had her driver's license for a year, yet the members of the group all seem to be the same age.
* Teen Girl Squad), Toddler Whats-Her-Face claims "I can count to G!" while Toddler Cheerleader brags "I can count to purple, backwards."
* Teen Girl Squad tries to date a clunky robot named Chizuko and gets "UNCANNY VALLEY'D" to death for his trouble.
* Teen Girl Squad Unlike most examples, however, he actually follows through. Under a minute after giving the threat, no less.
* Teen Girl Squad was also meant to be this, but became unexpectedly popular on its own merits and became a regular feature of the site.
* Teen Girl Squad was "Teeny Tiny Girl Squad", which featured the girls as preschoolers (though still prone to comical deaths, as seen when new boy character Tompkins "died somehow").
* Teen Girl Squad"), while Cheerleader's "Double-Double Whipless Mochacinno Half-Caf" dive got a score of "Three noses?".
* Teen Hater: A character who despises teenagers to extensive degrees.
* Teen Hater: A character who possesses an inexplicable loathing of teenagers.
* Teen Hater: A character with a passionate hatred for teenagers who may be out to make them suffer.
* Teen Hater: A person who hatesteenagers is liable to try and harm them.
* Teen Hater too! Stay the fuck away from me if you're in the 13-19 age range!
* Teen Idol, and she claims the 80s got to Canada a little later than everywhere else.
* Teen Idol) brother, Shizuo. Kasuka saved the poor guy from the resulting beatdown and was scouted in Shizuo's place.
* Teen Idol for his powerful baritone voice and clean image, comparably speaking.
* Teenie Beanies, which were available at McDonald's for several years, were this to
* teen Kazran and Abigail's endless kissing that he decides to accept a marriage proposal from Marilyn Munroe.
* Teen Life, based on his own experiences transitioning as a teenager.
* Teen Lit Wasteland, increasingly detached from actual science in favor of Dunkelman's own fixations, a melange of Silicon Valley techno-utopianism, nerd culture, Eastern religions, and pop psychology.
* Teen Lit Wasteland, putting them in a position where the Masquerade no longer matters: they have their own country now, and all they need to do to stay safe is protect their borders from Canadian and Japanese incursion.
* Teen Mommy Darci start off as doll commercials, before it's revealed that they're actually PSAs discouraging teen pregnancy.
* Teen pop and boy bands tend to have this happen once they fade out of the spotlight.
* Teens Are Monsters: Teenagers' risky behavior can often result from abuse.
* Teens Are Monsters versions of this trope do still pop up from time to time in most media.
* Teens Are Monsters: Well, I'm 16 and I hate you just as much! I love making everyone miserable!
* Teens Are Short: The need for an older actor to be believable as a teenager leads to casting actors that are uncommonly short. This leads to many situations where the teenagers are all somewhere around five feet when in real life most teenagers (especially 16-19) are the same height as their parents, or even taller.
* Teens Are Short: To show that a character is a teenager and not an adult, they are noticeably shorter.
* Teen singer Paul Petersen's 1962 hit "She Can't Find Her Keys" features this

with the narrator's date's purse, although it's suggested it's all a ruse to put off kissing him goodnight.
* Teens in the Universe). One of the teens even mentions in her log that the whistles are indistinguishable to the human ear. The robots quickly switch to English after observing humans for a short while... and even communicate among themselves in English instead of their normal whistles. The Cassiopeians are quickly able to learn English after asking the teens to give them the Russian alphabet and a list of commonly-used words, which the translation device provides. Funny enough, when Lob tries to communicate with two robots by writing out a mathematical formula, one of the robots corrects his mistake, which indicates that they understand the Latin alphabet, Arabic numerals, and mathematical symbols. Their own writing is incomprehensible to humans.
* Teens Love Shopping more closely supervised than the teens and tweens of a generation or two ago, so they might not have a chance to go walking around the mall and getting into wacky hijinks anyway.
* Teens Love Shopping: More works are realizing that stereotyping is not cool and many teens prefer to shop online than at malls, but the trope still gets used.
* Teens Love Shopping: Teenagers (especially girls) enjoy partaking in consumerism.
* Teen Superspy young Elle-Boys are all quite beautiful and have very feminine figures, regardless of what they might look like in their male guises.
* Teen Titan Bushido inherited the mantle after the death of his mother. His family had been protecting Japan for generations up to that point.
* Teen Titans: 65 episodes over five seasons (the show was going to end on episode 52, but then got one more season).
* Teen Titans #7 decides to go with him, which causes the rest of the team to follow.
* Teen Titans about the shoe rocket. His sonic cannons remain his favorite weapon, though.
* Teen Titans a few times. Once, when his teammates thought he was going crazy, they restrained him to a medical bed.
* Teen Titans: After his initial appearance, Killer Moth is shown with an energy whip. He later gives it to his daughter.
* Teen Titans, after Raven learns that the guy she's been dating (and who just drugged and tried to rape her) was actually Adonis in disguise, she tells the rest of the team "A second. I need to throw up" and runs for the toilet.
* Teen Titans (a hot alien babe with orange skin) had a successful career as a fashion model.
* Teen Titans all around. Especially when they stop for the night. Take note, when asked to tell a bedtime story she slightly dumbs down the Trigon arc into a hilariously funny tale of horror for the little kids.
* Teen Titans, along with many other early 2000s cartoons, had the Gamestation console.
* Teen Titans. Also, her romance with Beast Boy is shown to be genuine and not fake.
* Teen Titans, although it was somewhat toned down when Marv Wolfman and Len Wein came on board.
* Teen Titans, although when the character was formally allowed back into Titans continuity, later artists and writers aged her back down.
* Teen Titans and appears to have lost her memory, possibly a side effect from being brought back from her petrified state. However, it's implied that she's merely faking amnesia.
* Teen Titans), and asks "Uh? Master Robin? Do you have any food that hasn't expired two months ago, isn't covered in a strange blue substance, or is an unusually large worm?"
* Teen Titans, and Beast Boy) despite it not being the original lineup.
* Teen Titans, and enjoys it very much. Initially. After several minutes of their attentions, he begins to grow weary of them, and eventually even ends up running away from them, though it's implied to only be a case of him seeing it as too much of a good thing.

* Teen Titans, and even though Dick manages to cover her with a towel, Gar freaks out and starts apologizing profusely.
* Teen Titans and had no regrets betraying the Titans. Because of the bad implication of putting the blame on a young girl being manipulated by and older guy, adaptation have portrayed Terra much more sympathetically.
* Teen Titans" and have a sweet, tender moment... which is ruined when her brothers show up and beat the crap out of Beast Boy. Guess they didn't approve.
* Teen Titans, and he leaves the Schoolgirl to enjoy a normal life, and attend to his responsibilities.
* Teen Titans and how he made it clear there was no way out of the cases and he said he'd keep them as trophies, they'd likely have died of dehydration in those cases of Cyborg hadn't saved them.
* Teen Titans), and it was later recycled for his review of the show on YouTube.
* Teen Titans, and received real injuries as a result. Whether or not those injuries were an example of this, or merely him beating himself up while hallucinating, is not entirely explained.
* Teen Titans), and royalty. Her sister Blackfire speaks fluent English, though.
* Teen Titans" and the team stopping by an island (that of course will eventually house their headquarters) and Cyborg comments that "somebody should build a house out here."
* Teen Titans and thus nothing to give him. He then proceeds to have his butt handed to him on a platter.
* Teen Titans, and uses a mundane illusion to trick Mumbo and save the team.
* Teen Titans and was often the first one taken out by bad guys despite her considerable power in her earliest appearances).
* Teen Titans: Angel of the H.I.V.E. Academy has feathered wings she can shift the size of.
* Teen Titans angry at him because he had to beg Jericho to un-possess him, so Terra thinks he's "gone soft" on her. She then tries to kill everyone in the area, but she only succeeds in killing herself.
* Teen Titans animated series, and Aqualad's little Mechanic friend Tramm.
* Teen Titans animated series has healing powers, but her allies tend to not receive notable injuries to use them on. Most notably, she heals Beast Boy's broken leg in "Final Exam".
* Teen Titans animated series is a tech-based master of illusion, controlling holographic emitters by use of his cane.
* Teen Titans animator Terry Gilliam. They even threw in the crushing foot!
* Teen Titans Annual #2 and Cheshire (the only one to survive/catch on and make subsequent appearances.)
* Teen Titans, apparently the initiation for the H.I.V.E. academy is eating a unicycle and carrying a female student's books while wearing a pink tutu.
* Teen Titans apprentice in exchange for him teaching her to control her powers, leading to her betrayal and becoming a villain.
* Teen Titans. Aqualad's eyes are solid black, but he's a good guy. When under the influence of evil mind control, his eyes turn red.
* Teen Titans are among the most powerful titans on the team in terms of physical power and abilities but are often easily dispatched by villains with more skills.
* Teen Titans are in this sort of familial friendship, except for Starfire and Robin, but it's most obvious with Beast Boy and Raven.
* Teen Titans are regularly seen eating pizza or playing video games, among other "normal" social activities. Though almost every time they go out to the local carnival or something, trouble soon follows.
* Teen Titans are teen geniuses in some way, but Robin, who angsts over everything, is a pretty straightforward example.
* Teen Titans, a robot named Atlas kidnapped Beast Boy, Starfire, Raven, and Cyborg and challenged Cyborg to a match and said that he would keep the other Titans as trophies if Cyborg lost. Thankfully, Cyborg won.
* Teen Titans as a rival for Robin, eventually forming Titans East along with other heroes who had previous appearances.

* Teen Titans, as he managed to possess Robin, Beast Boy, and Cyborg; the only reason he failed was Raven's desperately casting a spell just before the soul-sucking machine hit her and Starfire, which allowed the two girls to escape and save the others. Even better, while the Puppet King was one of the army of villains recruited into the Brotherhood of Evil in the penultimate storyline and was defeated along with the rest, he was not among the ones who was frozen, suggesting he might have escaped.
* Teen Titans. As mentioned in the Comic Book section, she is half demon.
* Teen Titans as the doors change problematically from second to second due to Mad Mod being an illusionist.
* Teen Titans, at least in their original run, were composed of the teenaged sidekicks of adult superheroes. Later versions of the Titans were mostly composed of college age superheroes, but still had members who were barely old enough to shave (like Beast Boy).
* Teen Titans a typo; he's basically a giant spider with a fully functional human body growing underneath his head.
* Teen Titans), back to its normal length. The haircut seems to symbolize her taking back control of her life, reclaiming her humanity. The same haircut presumably happens in "The End, Part 3". Her hair grew out again when she regained her power (which she used to defeat her father for good), but when we see her again back in Titans tower, her hair is back to normal length again. However, we never actually see her cut her hair in this episode.
* Teen Titans, Beast Boy at one point transports the team by turning into a whale and having them hop in his mouth. After he spits them back out, Raven does the "Two words: breath mints" bit.
* Teen Titans, Beast Boy has managed to avoid being captured by the Brotherhood of Evil, but the only apparent other "survivors" have rather lame powers and don't see the point in trying to fight back. He manages to rally everyone together to go save the day.
* Teen Titans: Beast Boy is often telling jokes that make everyone else groan, especially Raven.
* Teen Titans, Beast Boy is the last member of the original team not to have been captured by the Brotherhood of Evil. He and a group of second-stringers have to rescue the rest of the teen heroes.
* Teen Titans, Beast Boy never gets to bite anyone while in T-Rex form. He does do a lot of trampling and charging around as a rhino or other animal, but his no-holds-barred form is oddly ineffective.
* Teen Titans: Beast Boy retains his green color when changing into other animals. This would make infiltration difficult.
* Teen Titans, Beast Boy says after just having frozen Brotherhood of Evil leader The Brain: "Check it out, brain freeze." Cue groans from the two dozen or so heroes assembled.
* Teen Titans. Beast Boy's bottomless well of TV trivia knowledge ultimately allows the Titans to defeat Control Freak, who was only dangerous because he also possessed a bottomless well of TV trivia knowledge.
* Teen Titans, Beast Boy's power is "shapeshifting into animals", taking on both their form and natural powers. The range, mechanism, and limitations of his power have never, in the fifty years since his debut, been really examined, leading to what is basically one of the most versatile movesets in all of DC. Here's a few applications of his broad power:
* Teen Titans begins an entire series where this plays a huge plot point for Starfire and Robin. Be warned, the stories are rated for a reason.
* Teen Titans, being a Tamaranian living on Earth. She often has trouble understanding the ways in which things work on Earth, but is deeply fascinated with the planet and its people.
* Teen Titans. Being the ruler of a Hell-like who sought to conquer everything that exists qualifies.
* Teen Titans building falls over amid much dust and explosions. When the dust clears, Cyborg is standing in the middle of the space made by the cross-stroke.

* Teen Titans, but Cyborg mistakenly assumes it was supposed to be affectionate.
* Teen Titans, but he tends to use them for very trivial goals. In other words, he's good at building things, but not too good at finding useful ways to use them.
* Teen Titans, but he will always be green. Madam Rouge from the animated version has no such weakness.
* Teen Titans but Raven submits to it upon realizing that resistance would get the other Titans killed.
* Teen Titans, but with his mouth instead of his eyes. Unusually, while most examples of this trope featuring the mouth only use the teeth, this example shows his entire mouth.
* Teen Titans by the even more careless Gizmo. Cyborg finds the little pipsqueak and protests in horror at the sight of him munching down on fast food inside the car.
* Teen Titans: Call of Blood, talks like a text message, and likes food with outlandish flavours).
* Teen Titans: Call of Blood, then kick back with video games and junk food like a normal teenager.
* Teen Titans: Call of Blood, when Superboy first arrives at Titans' Tower, he flies around and sings "SU-PER-BOY IN THE HOUSE! SU-PER-BOY IN THE HOUSE!" while hip-hop music blares from his phone.
* Teen Titans cartoon had a gag in which season-long villains who had not made an appearance in a while are shown on milk cartons.
* Teen Titans cartoon has some trouble understanding why, exactly, Beast Boy's jokes are supposed to be funny. When exposed to "Why are ducks so funny? Because they're always quacking jokes!", she said something like, "Oh, I get it! It is humorous because ducks lack the large brains necessary for the telling of jokes!"
* Teen Titans cartoon is known to do this when coming across something too cute for words.
* Teen Titans cartoon; the main characters all live in a giant T-shaped tower for the express purpose of doing hero work and don't have any separation between their personal identities and their heroics. Not that this would be realistic for the Titans anyway, considering that the members of the team include an alien, a cyborg, and a boy with green skin. Beast Boy apparently played this straight while he was with the Doom Patrol, but he immediately discards it once he joins the Titans.
* Teen Titans character Flamebird appears to think this way: Themed Weapons + Costume + Vigilantism = Instant Relationship with Superhero Crush!
* Teen Titans claims to be able to read "English, German, Latin, Romanian, Ancient Sumerian, and Sanskrit"...but not Japanese.
* Teen Titans, Cody sneaks into the Cheyenne Mountain base on a dare. Spotted by guards, he runs away and ends up running into a women's locker room, which is full of young women in various states of undress. He stops and stares at them, assuming that he has run onto a holo-deck. One of the women (who are, of course, all military personnel) then kicks him to the ground.
* Teen Titans comic had a retool when the character of Lilith and Loren Jupiter were introduced. The Titans, minus Robin, abandoned their hero costumes and focused on teenage social issues. It didn't last.
* Teen Titans comics especially precrisis. It seems like every single issue there would be some supernatural/psychic/alien/other fantastic threat that a civilian or single Titan would witness, only for most of the team to blow it off as imaginary or the viewer as crazy until they did a little bit of investigating and then stop said threat, then the same exact thing happens next issue.
* Teen Titans comics, Raven ends up having all her emotions escape her mind, only for the group to have to recapture them again. A later issue has it turning out that they missed one (Of course, Rage), and though Raven is happy with this, since it's the first time in a while where she's been able to really feel emotions without worrying about things taking a turn for the worse, she realizes that she needs to have all her emotions and takes Rage back into her mind.
* Teen Titans. Considering that the show was aimed at kids, no mention of his sexuality was made.

* Teen Titans continuity, the horn was instead a technological device built by Mal and his girlfriend Karen.
* Teen Titans crossover "The Insiders", Superboy was brainwashed by Lex Luthor, who used the words "Vincere Aut Mori" ("Conquer or die" in Latin).
* Teen Titans. Cyborg gets extremely frustrated because he eventually can't think of a way to dumb it down enough.
* Teen Titans, Cyborg gets infected with a virus, so Gizmo and Beast Boy go micro and fight the virus. One scene shows white blood cells chasing them.
* Teen Titans - Cyborg. He lost and had half of his scalp replaced with metal plating in a tragic back story that was never told, and likely shaves the remains because half a head of hair would look rather silly. He grows his hair in the comics, and half an afro looks just as silly as you'd think.
* Teen Titans, Cyborg immediately takes the team out for a spin. Raven doesn't see what the fuss is about. "Are we there yet?" "NO!"
* Teen Titans: Cyborg in the very first episode, and again in the third season finale. Starfire also intends to leave the team for an arranged marriage at one point.
* Teen Titans. Cyborg occasionally remote-controlled his hands or limbs for various purposes, though it was never his first option.
* Teen Titans, Cyborg's car gets destroyed pretty much in every episode it makes an appearance in.
* Teen Titans, depending on the situation, is either a levelheaded leader or headstrong leader.
* Teen Titans (Donna), Kid Flash (Wally), Speedy (Roy), and Aqualad (Garth). This was carried over in the cartoon.
* Teen Titans: Downplayed in the second half of the "Aftershock" two-parter, where when Beast Boy is breaking into Slade's lair, he turns into a mouse and disables a security camera by unplugging a cable.
* Teen Titans draw themselves in there all the time, In fact, it's hard to find an episode without a single reference to the creative team.
* Teen Titans due to lack of respect from her villainous peers and the kindness from Kid Flash, she effortlessly beats not only her old team but her former idol Madame Rouge, a villainess who was previously nigh-unstoppable by even the more powerful Titans.
* Teen Titans, during a fight with Trigon in Raven's mind, Cyborg has to remind Beast Boy and Raven that they're in battle and he's in danger.
* Teen Titans: During Dr. Light's first scuffle with the Titans, Raven pulls him into her cloak and shows him something that absolutely traumatizes him. During his second encounter, he surrenders immediately after Raven puts on a scary face.
* Teen Titans, during its adaptation of the "Judas Contract" arc in the second season. When it's revealed that Terra was working for Slade, Beast Boy once again is the one asking the question. This version of Terra gives a Type 2 response instead and tearfully reminds him of his earlier promise to remain her friend even if "something bad happens", at which point he angrily rejects her instead.
* Teen Titans during their first battle against Raven's father Trigon. Arriving in his stronghold, the Titans are confronted by a giant dog. Changeling tells the others to go on and stays behind to deal with the dog.
* Teen Titans: Earth One and Tara Markov are portrayed as a high-school couple, despite never having been shown to have any interest in each other in other continuities.
* Teen Titans East. The way she interacts with her teammates makes her come off as being like a concerned mother. Perhaps it's why she ends up becoming the leader of Titans East.
* Teen Titans encounter these on a pretty regular basis. Alien police bots, various goo monsters, and anyone passing by a supervillain garage sale have some of these. Even Cyborg and Raven on occasion.
* Teen Titans end of the spectrum, with extending legs and a radar dish in his head.
* Teen Titans, enough to recite novel-length poetry with a brightly-colored floral

background.
* Teen Titans, "Episode 257-494": Some famous person on a talk show is about to reveal the secret to world peace when the Titans interrupt saying that the viewers must stop watching this program, since the TV signal is literally rotting their brains.
* Teen Titans episode "Betrayal", Beast Boy ate a pie offered by Terra and compliments with, "This is the best pie... in the history of pies."
* Teen Titans episode "Betrothed", Beast Boy is able to scare some palace guards away by transforming into one of the giant Tameranian beasts he saw earlier:
* Teen Titans episode "Betrothed", Beast Boy turns into a non-Earth animal for the first time, specifically an alien seen earlier in the episode:
* Teen Titans episode "Crash", Raven scares Gizmo into helping to cure Cyborg by lowering her hood. We only see her shadow on the floor next to gizmo, but there are implied to be tentacles coming out of there.
* Teen Titans episode "Employee of the Month", Beast Boy gets a job at a fast food place, and gets annoyed when the boss calls him a different name every time he talks to him. Eventually, the boss calls him "Tammy", causing Beast Boy to snap. "Dude, that's a girl's name!"
* Teen Titans episode "Employee of the Month", Raven finds the steak mascot at Mega Meaty Meat quite disturbing.
* Teen Titans episode "Episode 257-494" (AKA "Don't Touch that Dial", appropriately enough), Control Freak does this at the beginning of the episode. It turns out this is part of his scheme, though: he's modified the signal to send waves through people's television sets that turn them into mindless zombies, so that while they're watching him battle the Teen Titans, the TV is literally rotting their brains.
* Teen Titans episode "Every Dog Has His Day", Soto agrees to become the pet as while his dog becomes the owner — all because Soto couldn't fathom life without his dog. It also makes perfect sense because Soto is a dumb, destructive baby while his dog is intelligent.
* Teen Titans episode "Fear Itself" had a similar premise, with a monster stalking Titan Tower and picking off the Titans one by one, using a method similar to killers used in slasher movies. Raven was the last one left because the "monster" was her own powers acting on her repressed fear - after the team had watched a scary movie, no less. Ironically, this would not only make her the Final Girl in this scenario, but technically, the antagonist as well.
* Teen Titans episode "Fear Itself". Starfire is swarmed by the rat monsters and sinks into the floor. By the time Cyborg comes for her, she is completely submerged and the pile completely disappears with her along with it.
* Teen Titans episode "Haunted", the team finds a badly-injured Robin claiming that Slade is alive. Despite the team's clear evidence that Slade is not around, Robin angrily proclaims that Slade still is and rants that if they get in his way he'll fight them, forcing Starfire to hit him with an energy blast.
* Teen Titans episode "How Long is Forever?", Starfire time-travels 20 years into the future. She seeks out the 20-years-older versions of her teammates and discovers Beast Boy on display in a cage in a circus.
* Teen Titans episode in which Raven travels with very young kids — an awkward prospect for all of them, as she's potential Nightmare Fuel herself — the oldest of the kids has the power to bring her imaginary friend to life. Invisible at first, "Bobby" is finally revealed to be a giant teddy bear... which sprouts six-inch claws and jagged-line fangs when its maker sics it on the bad guys.
* Teen Titans episode "Mother Mae-Eye'', Cyborg bought the pie that the title character comes from at a shop like this, owned by a creepy looking old gypsy woman. (Who may have been Mother Mae-Eye herself; the two looked similar.)
* Teen Titans episode "Only Human" when Raven tried to cheer up Cyborg. He declines, and it shows a scene where he shoots her down from a plane with a bunch of cannons, sending her flying down on a parachute charred from head to toe.
* Teen Titans episode "Revolution", Robin becomes an old man, after getting his

youth drained by Mad Mod.
* Teen Titans episode "The End Part 1", Cyborg carries Raven this way as the team brings her to a safe room.
* Teen Titans episode "The Quest", had it all. He bested Robin early in the episode, something only Slade had really ever done before.
* Teen Titans episode "TROQ", the Titans are playing a card game. Starfire asks "Please, explain why it is bad to be the Old Maid?"
* Teen Titans episode when Cyborg catches Beast Boy and Starfire dressing up as Robin.
* Teen Titans episode "Winner Take All", the final battle among friendly competitors is between Robin, Speedy, and Wildebeest. The competitors hold no grudges and are only playing to win the tournament. The fight becomes a one-on-one once Wildebeest loses.
* Teen Titans. Eventually, Beast Boy stops flopping around and just swats Aqualad's hand away.
* Teen Titans example however is in Season 4 finale "The End (Part 1)" when Cyborg lifts an office building and uses it to smash Plasmus through two other buildings.
* Teen Titans. Faced with a maze inside Raven's mind, Cyborg and Beast Boy try the usual tricks — blasting the walls and flying over them — but are thwarted and forced to go through.
* Teen Titans fame. Terra used everyone, hated good, and only cared for herself. The only times she showed true compassion were when she interacted with her long lost older brother.
* Teen Titans fandom, the one that enjoys adventures of various Robins, Batgirls, and other teenage members of Bat-Family.
* Teen Titans fanfic, one had a passing mention of discovering a bronze age civilization of sentient chickpeas in said fridge.
* Teen Titans fans can be easily spotted in a crowd by their willingness to use of 'glorious' in day to day speech without a trace of irony.
* Teen Titans. Fans who ship Beast Boy/Raven will often portray Beast Boy as Archie, Raven as Betty, and Terra as Veronica. In fanfiction, Beast Boy will be more taken with the unstable, traitorous Terra, but in the end he will discover that he's loved his friend Raven all along.
* Teen Titans features her angrily attacking and yelling at both Slade and Trigon.
* Teen Titans figure and... turned out to be a generic villain whose plans made no sense. Skitter was called away in the middle of a crossover... and returns over a year later without that plot thread amounting to anything. Basically everything that wasn't a self-contained arc was being made up as it went along.
* Teen Titans films, it takes her only a few moments to reconstitute after being frozen and shattered into pieces. The episode that really spotlighted her was practically a horror movie.
* Teen Titans for Blackfire as Starfire wasn't at all happy to see her again.
* Teen Titans, for example, imagining that having a meal "on me" means eating on top of a person.
* Teen Titans formed the new team by appearing in the dreams of former members and some new young heroes to help her fight her father, after the Justice League wouldn't trust her.
* Teen Titans: "For Real" opens with Control Freak growling, "GRRRRRReetings, Titans! It is your number one nemesis!" But since the Titans are out of town, they're not there. Control Freak pops all over the Tower, repeating the greeting, before finally saying it one last time, listlessly.
* Teen Titans from the comics though with elements of the New Teen Titans and the Sixties incarnation.
* Teen Titans gave Cyborg a special weapon which amplified his powers, to prove his loyalty to the H.I.V.E. he had to shoot the Titans. Psych! Cyborg turns around and shoots Brother Blood!
* Teen Titans gets his targets easier that way, and that he, the funny guy, will inevitably be taken first. He ends up being right.
* Teen Titans give 110%... until he finally does it in the final battle by focusing

on his humanity.
* Teen Titans gives us Jericho, who can take over anyone by making eye contact. In the penultimate episode, he does this very rapidly during a big fight scene.
* Teen Titans. Gizmo refuses to help the virus-infected Cyborg until Raven pulls off her hood...the shadow implies what Gizmo sees is some sort of Lovecraftian horror. A completely terrified Gizmo agrees to help rather than be subjected to it again.
* Teen Titans: Gnarrk was a time displaced Neanderthal stranded in the present. Through love and telepathic communication, Lilith teaches him human language and customs.
* Teen Titans Go!. Adverts went as far as to claim it was "your new favourite show".
* Teen Titans Go!. After Beast Boy and Cyborg fight all episode over whether hamburgers or burritos are the superior food, they make up and decided to get dessert. But Cyborg wants pie, while Beast Boy wants ice cream. Just as it looks like they're gonna fight all over again, they decide to get pie ala mode.
* Teen Titans Go!. After their combatants have destroyed each other, the two friends make up and then look like they're about to have another debate over whether pie or ice cream is the better dessert, only for them to agree that those two foods are better eaten together.
* Teen Titans Go! also aired like this. Beginning in 2020, the US feed also airs these specials as 11-minute parts in reruns.
* Teen Titans Go! also received high praise from critics for its mix of lowbrow humor and clever parody.
* Teen Titans Go! and Beast Boy, established that Cyborg's mother helped his father fit him with his bionic parts after the accident that injured him. Cyborg's mother died in the same accident that injured him in the original comics and was also implied to be deceased in the cartoon the comic was based on in the episode "The End".
* Teen Titans Go! and solves all the world's problems in three seconds. With no crime to fight, the Teen Titans disband because they no longer have a purpose.
* Teen Titans Go!). And then he tells Raven to kill her friends and become a demon.
* Teen Titans Go!, and we're shown some people inside them. Judging by them spinning in a halo and the speed they leave Earth, it couldn't have ended well for them.
* Teen Titans Go! and when he eats the unopened can of food he throws everything up.
* Teen Titans Go!, as he regularly leaves (and enters) Titan Tower through the windows rather than take the elevator down to the front door. Many examples are caused by him being a drama queen. The rest are likely him following in Batman's footsteps (as mentioned in the Comics section above).
* Teen Titans Go!: At least one movie of the Super Ninja Fury movie series Cyborg and Beast Boy watch features Canadian ninjas.
* Teen Titans Go!, at which point none of the Titans can take him seriously anymore.
* Teen Titans Go!: Beast Boy can talk in animal form, and takes full advantage of it.
* Teen Titans Go!, Beast Boy gets an eyepatch made out of a metal plate and a chain as part of his "Scar Man" persona in the episode "Man Person".
* Teen Titans Go!: Beast Boy has one hair that perpetually sticks out even when he makes the effort to gel his hair down to look dapper.
* Teen Titans Go!, Beast Boy sucks it up with a vacuum and puts it back into Cyborg's body, which revives him.
* Teen Titans Go! began showing, it likewise got a comic book adaptation of the shows. As you can imagine this threw some confusion for most fans mistaking the first series based on the 2003 show. DC eventually labeled the '03 based comics as "Vol 1".
* Teen Titans Go! begins with the two becoming official, but by the end Garfield winds up in the doghouse after he angers her. However, this doesn't exactly

indicate a break-up, just the two hitting a rough patch in their relationship, which pleases the remaining Titans who find their bickering highly entertaining.
* Teen Titans Go! behind the conflict, wanting to take over every other holiday and eventually the entire calendar year.
* Teen Titans Go! cartoon is turned into a more comedic version of themselves.
* Teen Titans Go! comic based off the new show, Robin interrogates everyone regarding Cyborg's missing sandwich.
* Teen Titans Go! comic, "Par for the Course", shows Beastboy and Robin raising the stakes of their mini-golf game by instituting humiliating punishments for the loser and arguing over whether the use of their powers and gadgets constitutes cheating. Cyborg steps in to referee, but he judges that there are no rules.
* Teen Titans Go!, complete with lots of advertising, especially with the latter's. While there are still some problems, most would consider the current state an improvement compared to the last couple of years.
* Teen Titans Go! don't allow them to be separated, they still keep Zan... as a receptionist.
* Teen Titans Go Easter Egg Hunt on Cartoon Network, where they hid colored eggs throughout the episodes and viewers had to find them. If they named the correct episode and scene the egg appeared in, they would be eligible for a chance to win exclusive Cartoon Network merchandise.
* Teen Titans Go! episode, appropriately titled "The H.I.V.E. Five", has the titular villain group having a day off trying to forget our five heroes, to no luck.
* Teen Titans Go! episode "Beast Girl" on March 2, 2018 ended with a promo showing winners of a drawing contest that the network held to promote the episode.
* Teen Titans Go! episode "Dog Hand", Starfire introduces herself to Trigon as Raven's "best female friend within the Teen Titans".
* Teen Titans Go! episode "Girls Night In", when Robin, Cyborg, and Beast Boy see that Starfire, Raven and a few friends of theirs snuck out of the tower, they suddenly become Obnoxious Oscars who track the girls down to report them to "Mom and Dad", who don't actually exist. This ends up interfering with the girls' fight with Blackfire and results in all of them being captured, but the boys completely fail to realize what's going on and only care about ratting the girls out.
* Teen Titans Go! episode "Legendary Sandwich", Robin has to wait in the bakery department of the supermarket and gets number 78 with them serving number 22. While played for laughs, it's clearly a more realistic take on the trope.
* Teen Titans Go! episode "Nose Mouth" Cyborg once again loses his mouth to Raven.
* Teen Titans Go! episode "Ones and Zeroes", when his fellow Titans come up with the idea of creating their own robot to create a completely new pizza, Robin warns them not to do it, cuing a flashback of one of his own attempts going haywire. They do anyway, and by episode's end their new creation, caught in an infinite loop that includes creating its own drones, leaves Jump City in ruins and nearly takes over the world.
* Teen Titans Go! episode "Opposites", Cyborg sees Jinx this way the first time.
* Teen Titans Go! episode "Pure Protein", Cyborg tells Robin that "he can't make a confession until Robin puts some clothes on". A naked Robin says it's okay, much to Cyborg's dismay.
* Teen Titans Go! episode "Staff Meeting", when Starfire blurts out that she and the other Titans broke Robin's staff, he lets one of these out as his mouth flips open, then a giant "WHAT" drops down between the halves of his head and he crushes it as they snap shut.
* Teen Titans Go! episode "Uncle Jokes" Starfire, trying to impress Beat Boy and Cyborg that she can use food as comedy, use a string of spaghetti to floss her ears this way.
* Teen Titans Go! features Cyborg riding a mechanical horse while "The Night Begins to Shine" is playing.
* Teen Titans Go! For example in one episode Starfire defeats the other members of the group in a tickle war. In another episode, Raven tickles the whisperer in exchange for it to make everything silent. Starfire has also been seen tickling her

pet Silkie multiple times.
* Teen Titans Go! had Bumblebee join the team as part of a summer-long event, though her addition wasn't permanent as she later leaves the team to become a solo superhero, with a card confirming she wouldn't be coming back.
* Teen Titans Go! had Raven getting a zit that was actually a manifestation of her inner evil, which later emerged as a scaled-down Trigon.
* Teen Titans Go! has Cyborg and Beast Boy have a staring contest to determine who gets the last slice of a pizza. Cyborg wins and tries to eat the slice, only to discover that it's extremely moldy and rotten. It's only when they exit the restaurant that they realize that 30 years have passed while they were staring at the slice.
* Teen Titans Go! has earned a reputation as being one of the most hated cartoons in recent history...and yet it's one of Cartoon Network's highest-rated and biggest money-making shows partly because of this.
* Teen Titans Go! has referenced several pieces of pop culture that would later become outdated within months to years after being broadcast:
* Teen Titans Go!", has Robin, Starfire, and Raven act very condescending to the Powerpuff Girls and dismissing them as "babies". After the Powerpuff Girls beat Mojo Jojo, the Titans appear to learn their lesson and compliment the girls on their victory, only to get back to insulting them when Blossom replies that they couldn't have defeated Mojo without the Titans' help.
* Teen Titans Go! has Starfire, Beast Boy and Cyborg go off to alien planets to gather ingredients for the Legendary Sandwich while Robin gets stuck at the supermarket getting pretzel bread. While waiting on his turn to order, he gets into these with not only riding the cart around, but having one with a squeaky wheel that also stops.
* Teen Titans Go!. He decides to fix the dynamic... by making himself even dumber than his brain-drained teammates.
* Teen Titans Go! he is amazed that she looks happier now than she ever did in her life. He leaves without speaking to her, but she notices him out of the corner of her eye and seems happy to see him.
* Teen Titans Go!: Here in the followup series, Robin takes the unfunny ball in the episode "Uncle Jokes".
* Teen Titans Go!, her hood is ALWAYS up. The only episodes she is seen without her hood are in "Laundry Day" and "Meatball Party".
* Teen Titans Go!, "Hey, Pizza": Beast Boy and Cyborg lay all sorts of traps for the pizza delivery guy in order to get a free pizza, but with each attempt he always ends up at the tower in under a minute. They destroy buildings. They do not, at any point, receive a free pizza. After they give up at the end, the delivery guy is late to the senior citizen, who gets it free instead, causing them to throw a fit.
* Teen Titans Go!: In "Arms Race with Legs" in one scene where Beast Boy glomps Raven's legs, there's another Beast Boy standing where he jumped from.
* Teen Titans Go! incarnation totally averts it, being a goofy slacker who could care less about being part-machine.
* Teen Titans Go!, including one scene in "Had to Be There" where he pulled it out of his ear and was unaffected.
* Teen Titans Go!. In fact, "Barakat syndrome Wally T" is Google's third result when you type in the syndrome's name.
* Teen Titans Go!: In Issue #41, Killer Moth is free and says he paid his debt to society. Raven says he "got off on some pointless technicality".
* Teen Titans Go!: In Issue #42, Raven asks the readers "Why do poets hate the colors orange, purple, and silver?" The answer is "Well, you try coming up with rhymes for those words!"
* Teen Titans Go!: In "Laundry Day", Robin disposes of the roster that proves it is his turn to do the laundry by putting it into a blender, turning it into a smoothie and drinking it. He later burps it back up.
* Teen Titans Go!: In "Staring Into The Future", Cyborg and Beast Boy end up 30 years in the future after a staring contest. When they get to Raven, she has

basically become God after defeating Trigon in the ultimate battle of good vs evil.
* Teen Titans Go!: In "Tower Power", Beast Boy spitting his soda over Cyborg is enough to cause him to malfunction.
* Teen Titans Go! is a worthy successor to the original cartoon and that anyone who disagrees is "a poop mouth with poop opinions".
* Teen Titans Go! Island Adventures five-parter. After the Titans get stranded on a deserted island, Robin claims they can no longer use their powers just because they're stranded on a deserted island and thus can't just fly back home, even though they still use their powers several times.
* Teen Titans Go! is Raven using her magic to teleport villains to jail cell by creating portals underneath their feet. She has done so for Dr. Light and Mumbo Jumbo.
* Teen Titans Go! is really good at mimicking other characters. He mimics Batman, Beast Boy, Cyborg, Starfire, and Raven at one point or another, taking on their general shape while doing their best impressions of those characters.
* Teen Titans Go!: Issue #30 has a story focused on Speedy and Aqualad.
* Teen Titans Go! issue (the one based on the '03 series) that introduced Wonder Girl to infiltrate Blackfire's base of operations. They have Beast Boy disguise himself as a Gordanian and sneak the uncaptured Titans in to rescue the others. Blackfire even lampshades it herself as she berates herself for not realizing it sooner.
* Teen Titans Go! is targeted exclusively at kids or if it's aimed at general audiences, but considering its popularity with kids, it might not matter.
* Teen Titans Go!. It doesn't help matters that they devoted several episodes to said song.
* Teen Titans Go!. It's partially justified as Larry had turned her into paper beforehand, but there was little enough holding her together that she still should have ripped.
* Teen Titans Go!" Lady Justice briefly appears with her scales right before the trial of the episode.
* Teen Titans Go!, "Legendary Sandwich", when Silkie sneaks in while the Titans (sans Raven) are bickering over who gets the first taste of the sandwich and outright devours it himself, only to spew it back out moments later.
* Teen Titans Go!-like game and he has trouble crossing a road. He gets past all the cars no problem when he turns into a chicken.
* Teen Titans Go!: Mumbo Jumbo asks "How many magicians does it take to change a lightbulb?" and answers "Depends what you want it changed to!"
* Teen Titans good at the whole "charismatic cult leader" thing. Even Dick Grayson himself joined the Church of Blood at one point!
* Teen Titans Go! of a cardboard box with a bikini scrawled on it in marker and calling himself "Beast Babe".
* Teen Titans Go! of this trope. Down to farting on garbage and turning it into unicorns!
* Teen Titans Go!: One episode sees all of the world's sounds stolen by an unexpectedly cutesy villain. Inexplicably, the Titans are able to create new sounds for the lost ones by mimicking the lost sound enough times, causing the new (often poorly made) sound to take over for the stolen one. The Titans recognize that the results aren't perfect (every incidence of a new sound is exactly alike with zero variation), but accept it anyway, at least until they can get Earth's noises back where they belong (with a few other sound placement hiccups along the way, which they point out).
* Teen Titans Go! or the process behind making the show, in which case the fourth wall ceases to exist.
* Teen Titans Go!" realizing that Starfire and Cyborg have been abducted by the stork.
* Teen Titans gorillas. Also, velociraptors speak, but in their own language.
* Teen Titans Go!, Robin chokes up when he tries to ask Starfire out. She takes his babbling as a type of game and also starts babbling.
* Teen Titans Go!. Robin is very excited to use it until he learns he's the left

leg.
* Teen Titans Go! running from a tyrannosaurus...and everybody immediately stopping and dancing to disco lights. Including the Dinosaur.
* Teen Titans Go! scenario get literally electrifying when they kiss one another.
* Teen Titans Go! See Space Jam, the Nerdlucks have far more detailed and complex designs than the Titans.
* Teen Titans Go! series that had downright dark and terrifying episodes to balance the lighthearted ones. The new show is purely comedic with even wackier situations and the characters have been redesigned into a simpler, more cartoonish style.
* Teen Titans Go! showrunner Michael Jelenic who made voiced cameo appearences in the show.
* Teen Titans Go! since he respectively voices Kid Flash and Bumblebee in those shows.
* Teen Titans Go! status. However, in December 2019, holiday episodes were brought back into rotation to expand the episode variety since the show had close to 300 episodes in the can. The United Kingdom also has holiday episodes are treated as part of the normal rotation.
* Teen Titans Go! stubborn streaks in their recklessness and Raven is much snarkier than before and even willing to put her friends in harm's way on a few occasions. Starfire somewhat averts this as mostly her naïveté is played up and usually when she does any action, it's not for a selfish reason.
* Teen Titans Go! teach lessons, especially about kindness and acceptance).
* Teen Titans Go! that getting out and expanding your horizons is what rots your brain, while mindlessly watching television all day is what's good for you.
* Teen Titans Go!", that they're able to jinx him twice in the same episode.
* Teen Titans Go!: The episode "Halloween vs Christmas" is about the Titans battling against Santa Claus, who has decided to take over Halloween. It is the only holiday with Hoopla to rival Christmas, so if he takes it, he will rule all the calendar's holidays.
* Teen Titans Go!, the evil version of Aqualad was shown to have black eyes with red irises. Regular Aqualad just had solid black eyes.
* Teen Titans Go!, the fangirls that chase Robin around? Yep, some of the production staff.
* Teen Titans Go!, the game that Beast Boy plays in Driver's Ed and Grandma Voice has the game over screen which reads "YOU ARE DIE"
* Teen Titans Go!: The season 1 finale has a part of the episode done as puppets.
* Teen Titans Go!, the team decides to hold a slumber party to help Cyborg get over his fear of the dark. Robin suggests they build a blanket fort, and everyone agrees, until they remember it's Robin and his blueprints require two hours just to lay the foundation so he does it himself. It has several floors, guest bedrooms, a bowling alley, artwork, and who knows what else.
* Teen Titans Go!, the Teen Titans have a large red couch in the living room where they are very often seen.
* Teen Titans Go!. They battle Starfire's newly-sentient brain, who repels the submarine's missiles by pointing out that most missiles never reach their intended target and renders its lasers ineffective by pointing out that modern lasers aren't advanced enough to be used as conventional weaponry (despite this being a superhero cartoon where laser weapons have been repeatedly shown to exist).
* Teen Titans Go!: This is apparently the secret ingredient in Mother May Eye's pies (and not love) as she attempts to bake Robin, Raven and Starfire into pies in "Pie Bros".
* Teen Titans Go!. Though, in an ironic example of this trope, this show actually managed to get two Primetime Emmy nominations.
* Teen Titans Go!" throughout the episode until they realize together THEY are the ultimate bro and bump back the Ultimate Brofist.
* Teen Titans Go! to pass the time, but they result in Starfire punching Robin and Beast Boy whenever she sees a bug. Raven gets increasingly motion-sick from reading in the car, and a foreseen run-in with the H.I.V.E. Five also adds to the chaos.
* Teen Titans Go! To the Movies and a 75% audience score from 115 reviews.

* Teen Titans Go! To the Movies, and did mildly well at the box office.
* Teen Titans Go! To the Movies) and flossing (during a musical number in "The Chaff").
* Teen Titans Go! To the Movies . Averted with the other songs, where he does his own singing.
* Teen Titans Go! To the Movies caused an explosive reaction of shock and joy from that show's fans.
* Teen Titans Go! To the Movies encouraging parents to find the right size car seat for their children. This seems very odd indeed, being that most of the kids in the target audience of the show would be too old to need one according to the website itself.
* Teen Titans Go! To the Movies for the "My Superhero Movie" song's infamous line about Robin shaking his booty in 3D.
* Teen Titans Go! To the Movies has the voice actors for the Titans record together, just like in its parent series.
* Teen Titans Go! To the Movies it's based on, it's produced by Warner Brothers Animation and DC Comics, and is not a network original.
* Teen Titans Go! To the Movies onto every screen known to man in order to brainwash the population into doing his bidding.
* Teen Titans Go! To the Movies reportedly came in on a $10 million budget, around half to a third of the cost of other film expansions of TV cartoons.
* Teen Titans Go! To the Movies, storyboard artists Joey Cappabianca and Dave Stone voice Plastic Man and Ace Morgan respectively.
* Teen Titans Go! To the Movies: The Teen Titans get denied entry into the premiere of Batman's movie and then Hollywood's sets by the same guard because they are not on the list. Both times, they simply sneak in with Raven's portal powers. The second time they go to the Hollywood sets, the guard is about to deny them again, but then he checks the list and they are on it this time.
* Teen Titans Go! To the Movies to keep the Titans from destroying the machine.
* Teen Titans Go! To the Movies. While the song and scene does appear in the film, only the Titans themselves sing it with no appearance by Lil' Yatchy, but his version plays over the credits.
* Teen Titans Go! to the Titans, though he does hope Raven will turn around and join him.
* Teen Titans Go! "Uncle Jokes" has Robin only telling these jokes. Starfire learns humor from Beast Boy and Cyborg, which messes up Robin's mind and the status quo when she becomes a third clown like them. The only way they fix it is by giving her the "uncle" treatment. The only person who finds Robin's jokes funny is Raven.
* Teen Titans Go!. Unlike the reactions by viewers, the Titans thought his face looked beautiful.
* Teen Titans Go!. Usually it's Starfire's proposal, but sometimes others are the lead.
* Teen Titans Go! version of Girl Scout cookies) are made from real rangers and implores the other Titans not to eat them before they correct her.
* Teen Titans Go! Volume 2 quickly expire. Not so luckily, once everyone else moves on to the next teen idol, so does Starfire.
* Teen Titans Go! vs. Teen Titans credited as executive producers, their role is still minimal, while no one else currently working on the series is involved.
* Teen Titans Go! vs. Teen Titans: Parodied when 2013 Robin starts calling his martial arts moves, only for 2003 Robin to punch him out while he is talking.
* Teen Titans Go! when Raven pulls Beast Boy's heart out through his mouth, but it's still connected to his circulatory system and it slings back into place when she lets it go.
* Teen Titans Go! When Starfire gives in to temptation, she opens it and finds that they're a pair of adorable green and pink imps, who are friendly at first until she gives them too much affection, causing them to turn into an egg and metamorphize into a giant, two-headed monster.
* Teen Titans Go!, where after several failed attempts to cross the road, he thinks about the words "cross the road" and decides that it'd be easier to cross as a

chicken, so he turns into a chicken and is able to cross without getting run over... only to make it to the other side and get eaten by a gator.
* Teen Titans Go! where Beast Boy transforms into a wiener after claiming Trigon is one.
* Teen Titans Go! where in the episode "Artful Dodgers," The Titans cheat during a dodgeball rematch against the Hive (who were playing fairly in every dodgeball game against them). The Titans win by calling the police after being eliminated. Cyborg claims the victory was by default. Jinx also points out that they were cheating before the Titans all got eliminated.
* Teen Titans Go! where kids got excited over "The Pee Pee Dance" played every half-hour during the summer of 2015.
* Teen Titans Go!, which is a repurposed version of Trick Daddy's "Take It To Da House". The latter also played in "Waffles" as background music.
* Teen Titans Go!, which they (except Robin) use to apparently master other skills. After they're defeated by Katarou, Robin shows them that the training montage only gives the illusion of accomplishment, not the actual results. The other Titans join Robin in training over a lengthy period of years, condensed into a time dissolve technique. Later, when the elderly Titans have mastered the crane kick and they kick Katarou's skull, they think they have killed Katarou, who had actually died by the time they finally mastered the crane kick.
* Teen Titans Go! with the eponymous fan. Raven states that fans are where superheroes get their strength, being the main reason the really famous ones like the members of the Justice League are so powerful. Wally T's proximity to the Titans vastly boosts their power levels, but their powers fade completely when they alienate him in their attempts to pander for more fans.
* Teen Titans had a bit of a subversion when the team was captured by Mumbo and stripped of their powers and weapons and tried to brainstorm an escape plan.
* Teen Titans had a subversion in the second season. Beast Boy and Terra were on a date, riding on the Ferris Wheel when Slade ambushed them. The ride never broke down, or suffered from structural failure during the entire fight... until earth-controlling Terra destroyed it on her own at the end, to escape from Slade.
* Teen Titans had designs on grooming Robin into this. When that failed, he moved on and succeeded with Terra. Then he pushed her too far and suffered an explosive retaliation.
* Teen Titans had every male cop - and both gay women - staring at her in wordless, slack-jawed awe.
* Teen Titans had one episode where Cyborg was infected with a computer virus and hallucinated that everything he looked at was food. This led to him eating everything from a stop sign to the cash right out of an ATM (and nearly the ATM itself). It stopped being funny when he mistook the tip of a transmission tower for a giant cherry, threatening to spread the virus to the entire city.
* Teen Titans had Starfire playing the Screaming Wowman rather a lot. Raven, however, did it in one episode, off-screen, before she was attacked by a were-creature.
* Teen Titans had these, the length of it varying depending on the episode.
* Teen Titans ham. While The Brain can't ham, Monsieur Mallah, his talking gorilla assistant, does a pretty good job of it.
* Teen Titans has a particularly extreme example given by Robin, where his jaw drops off the screen, loops back around, and drops onto his head.
* Teen Titans has a surprisingly wide variety of Mooks, but some fall into this category.
* Teen Titans, has been vegetarian since he was eight years old and went vegan in 2009.
* Teen Titans has Cyborg turned into a bear. He thinks his sonic cannon is usable, but it turns out to be this.
* Teen Titans has Kid Devil, who tried desperately to be a good superhero but always felt like the weakest link of the team because of a string of losses. It came to a head when Clock King kidnapped and brainwashed him into fighting in a teenage superhero bloodsport and almost killing someone. Miss Martian managed to

snap him out of it by reminding him of his dream to be a hero and what a sweet, earnest person he truly is.
* Teen Titans has no compunction about slapping Starfire and Raven around for gags.
* Teen Titans has Robin as his apprentice, he watches Robin beat up the rest of the Titans and says that it's "thrilling." He even rewinds the tape a couple times. Make of that what you will.
* Teen Titans has Starfire (and her sister Blackfire) who are super strong, can fly, can throw fireballs, learn languages by kissing and have inordinately high pain thresholds (including a tolerance for extreme temperatures). All of these powers are just... characteristics of Tamaranians, apparently.
* Teen Titans has Starfire. She is an alien from another planet and thus, Earth culture is quite new to her. Additionally, her people, Tamaranians, are quite open with their emotions and how they feel, so there's often a lack of subtlety in her actions. However, it makes her endearing, especially contrasting with her older sister, who while much more socially aware and seemingly cool, is a hedonistic jerk.
* Teen Titans has the Titans wind up in the bodies of the Mane 6. Naturally, this means the male Titans have this happen to them with the exception of Beast Boy, who ends up in Spike's body. Cyborg is not happy about this last part.
* Teen Titans) have to simultaneously push two buttons on opposite sides of the city. They all get around it, of course.
* Teen Titans having the other as their number one crossover on Fanfiction dot net over ten years later. Both shows came out around the same time and revolved around teenage superheroes and both were relatively lighthearted while still being able to go into some pretty dark territory, so it's not too surprising. Generally, if you were a fan of one, chances were you were also a fan of the other. In some circles, there was even a bit of a joke that Danny was the unofficial sixth Titan.
* Teen Titans headlined issue #59 (December, 1965). Feedback was positive and the Titans "graduated" to their own series in February, 1966. Their ongoing series was published regularly to 1973, was revived in 1976, and cancelled in 1978.
* Teen Titans. He barely has enough time to disable the trap before Rouge reforms and captures him.
* Teen Titans. He fully admits that his options are "laugh or cry" and he's choosing the former.
* Teen Titans, he makes it clear that the problems in his life don't bother him nearly as much as they think; but what he can't stand is when people feel sorry for him.
* Teen Titans. Her costume after joining the Titans is basically the same but with the Titans logo on the t-shirt.
* Teen Titans He releases Cyborg and decides to try to relearn some of what he had lost.
* Teen Titans. His body is mostly mechanical but there's still some skin and (presumably) organs in there. His brain is stated to be half grey matter and half CPU.
* Teen Titans HIVE injected into him to give him the same powers as his father. For this, Slade felt he was justified in planting a mole in their team and plotting their deaths.
* Teen Titans. However, she's willing to go to almost any lengths for her friends, and we occasionally see glimpses of her softer side.
* Teen Titans, if her planet-hopping in "Transformation" is anything to go by. Of course, in the first episode aired (third in production order), she and Robin are just finishing a conversation on this subject as they enter the living room.
* Teen Titans implies she was drugged by Deathstroke into becoming evil, however.
* Teen Titans. In addition to the above, Trigon has red eyes that glow constantly, Brother Blood's eyes glow red when he uses any of his powers, Blackfire's eyes are purple and glow when she's angry or charging up a starbolt, and Jinx's glow pinkish-purple.
* Teen Titans: In "Car Trouble" in the first scene of the third act Cyborg is sitting despondently on a curb, having failed to get his car back from Gizmo,

surrounded by empty milkshake cups. Presently Raven shows up, looks at the cups and remarks, "Fourteen milkshakes. Not a good sign."
* Teen Titans includes certain people who have been marked by a demon and thus can "do evil without [spiritual] consequence and good without reward".
* Teen Titans. In fact, though he is credited as associate producer for said show, he has no major involvement in the show and that Aaron Horvath is the creative force behind the series.
* Teen Titans: In one episode Starfire turns into a chrysalis, her species' own version of puberty, and Robin chases after her even after seeing all her weird changes. Later, when he meets up with her again, he tells her he would have come for her even if she hadn't changed back to looking perfectly normal. D'aww...
* Teen Titans: In one episode, Starfire, who is depressed because she is undergoing transformation (which is sort of like puberty to her species) is attacked by a carnivorous plant on an alien planet; but it spits her out. This makes her even more depressed, as she thinks the plant finds her revolting. Later, after a far-more wicked monster threatens to devour her, the other Titans come to her rescue, and the plant appears again, this time preying on the monster.
* Teen Titans in order to get medical help for Kid Devil. While there, Robin discovers that the Chief regularly gaslights the other Patrolmen, convincing them that they're mentally ill or have impaired judgment in order to discourage them from questioning his orders.
* Teen Titans in rapid succession, then stops and asks for a diet soda. But when told they do not have soda (only meat), he simply asks for a cup of meat juice. Being part cyborg as well as in shape makes this lesser than most examples.
* Teen Titans: In "Revved Up", Ding Dong Daddy taunts Cyborg with "The junkyard called! They want their scrapheap back!".
* Teen Titans: In Season 5 Episode 7 titled "Hide and Seek", Raven battles Monsieur Mallah who pursues three child superheroes that Raven is tasked with bringing to the "drop-off point" only for Raven to be forced to fight Mallah when he arrives and stop running from him.
* Teen Titans: In the '90s run, Tempest freezes Dr. Light's eyeballs during a fight, which should logically blind him- but he's fine.
* Teen Titans. In the comics most of them eventually grow up quickly enough to avert this for most people, but the main gang in the cartoons doesn't. They almost die on several occasions, have no adult supervision, and the youngest is between the ages of fourteen and sixteen.
* Teen Titans: In the episode "Mother Mae-Eye'' Mother Mae-Eye binds Starfire in a baby chair and tries to force-feed her pies using a conveyor belt.
* Teen Titans: In the episode "The Beast Within" Beast Boy screams this when everybody claims that he attacked Raven.
* Teen Titans: In the episode "Wavelength," Cyborg destroys Brother Blood's underground base by "boost[ing] the wavelength in the transmission matrix, triggering a meltdown in the amplification system." Which is funny, because increasing a wavelength will result in a loss of energy, instead of an increase.
* Teen Titans: In the episode where Aqualad's introduced, Raven and Starfire are instantly smitten. Aqualad doesn't notice until the very end of the episode, and quite frankly, those two scare him.
* Teen Titans in the face, then she kisses him on the lips (so she could learn the language due to the Tamaranean ability to absorb languages through physical contact).
* Teen Titans: In the finale, Beast Boy throws a handful of mud at a girl he believes to be a restored Terra. It hits her in the face.
* Teen Titans into one, and when found out, was able to grow to giant size and use them as weapons.
* Teen Titans introduces Terra by having her running from/fighting a giant scorpion.
* Teen Titans involves wearing a dress in the halls, among other things.
* Teen Titans: In "X", when Red X returns, the Titans want to make sure that Robin (who was Red X before) is really himself and not some kind of trick. After Starfire

establishes he's not a hologram, they consider a cavity search to rule out other possibilities:
* Teen Titans is allergic to metallic chromium. The allergy is more dangerous to others than herself, as it causes her to sneeze energy blasts. It even turns out to be an advantage, as it allows the team to track a chromium-based bomb. It's also a big case of artistic license, as chromium is used in a lot of common technologies.
* Teen Titans is an insecure and vulnerable kid who constantly uses humour as a defense mechanism.
* Teen Titans is built up as the series' parallel to Satan in almost every way, but there doesn't seem to be a contrasting "God" figure at all.
* Teen Titans is constantly praised for how beautiful she is by the heroes, villains, and bystanders.
* Teen Titans is possessed by his son Jericho, who murders Slade's loyal butler Wintergreen and mounts his head on a wall.
* Teen Titans is pretty much a giant head on legs when Raven makes him explode, so while it's not technically bloody it's still messy, graphic and complete with gunky splatters right back in Raven's face.
* Teen Titans is red, so there might be some there that we just can't make out.
* Teen Titans is shown to be able to heal in addition to her more combat friendly powers. She uses this power exactly twice onscreen.
* Teen Titans is skilled in both melee weapons and guns, and regularly carries examples of both types at once.
* Teen Titans is this for Beast Boy, his first love being Jillian Jackson.
* Teen Titans is very skilled at breaking people with scare tactics with her dark powers. After exposing him to the unholy terrors of her home, Dr. Light was so traumatized that in future encounters he will surrender at the very sight of Raven, Making her Dreaded for one person alone.
* Teen Titans is written as a reply from Beast Boy to his male fans, who supposedly write to him constantly and ask him to teach them how to attract girls. He's inadequate in romantic matters, and his "conquest" of Raven only happened in his mind... but he fails to realize this.
* Teen Titans, it doesn't make him any less evil than the others on this list.
* Teen Titans. It does otherwise fit the trope, however, including the part about falling in love with someone you cannot stay with.
* Teen Titans it out into space so it can detonate safely away from Earth.
* Teen Titans. It's left ambiguous if she's actually lost them or not.
* Teen Titans Johnny Rancid was the lowest tier criminal to ever appear; just a violent jerk with a motorcycle and a small laser gun. Then he gets the power to rewrite the rules of reality and turns the world into a gothic hellscape.
* Teen Titans, just before "Things Change", ends with a massive battle between the expanded Teen Titan army and the Brotherhood of Evil.
* Teen Titans lampshades it to friend-turned-villain Terra in that subtle, elegant way only she can:
* Teen Titans later in the series—the robot soldiers that served Brother Blood and the Brain were clearly shown to be machines from their first appearances.
* Teen Titans; Mas can't do much without his brother Menos, but how many other twelve-year-olds will run up and kick someone who's six times bigger than they are?
* Teen Titans — are treated this way. They met in their teens and have been inseparable since.
* Teen Titans. Meanwhile, all versions of the character now have green starbolts, with her sister Blackfire now sporting purple ones, as opposed to the entire Tameranian species just having red starbolts.
* Teen Titans miniseries leads strength to the argument that Cheshire is incapable of love unless it's a means for her goals.
* Teen Titans. Mostly she uses it on inanimate objects to make them collapse.
* Teen Titans: Mother Mae-Eye does to Starfire after Starfire breaks her conditioning and attempts to tell the other Titans what Mother is really doing in "Mother Mae-Eye".
* Teen Titans movie, it was shown that Beast Boy can't read Japanese, and doesn't

even know what Otaku means.
* Teen Titans movies. It also explains what happens if the viewer has trouble meditating ("Stop saying Zinthos and consult your ancient scrolls immediately.")
* Teen Titans, much less that you like it, will get you yelled at by the fandom. While the show is hated across the board, it's especially dangerous to bring it up to fans of the original show.
* Teen Titans: Multiple instances between Starfire and Robin, as well as Beastboy and Terra.
* Teen Titans, multiple villains have one of these over the course of the series, from Slade (at least twice), the HIVE Academy run by Brother Blood, and the final base of the Brotherhood of Evil.
* Teen Titans named Teether can chew up and spit even metal with gunlike force.
* Teen Titans. Naturally BB rejects Terra, which only pushes her closer to Slade.
* Teen Titans. Note that in the comics she was much less sympathetic, so naturally she didn't get this treatment.
* Teen Titans of them and manipulates their emotions to keep them under her control.
* Teen Titans of them can be true perfection, letting their collective egos turn them against each other.
* Teen Titans of them handled her absence well, since she balanced them out.
* Teen Titans of them notice that Terra was in the background; how that's handled depends on the writer's personal views of the character.)
* Teen Titans of what he turns into, and is willing to stay asleep forever if that's what it takes to avoid it.
* Teen Titans once. Fortunately, they recognize each other before they attack.
* Teen Titans once tried to look into the future. Bad idea. She uses drawing to make sense of what she remembers whenever it comes to her. So far, she's seen Terra, See-More and Kid.
* Teen Titans. One could argue that Slade considers Robin a Worthy Opponent but Robin simply sees Slade as a diabolical villain.
* Teen Titans: One episode of Teen Titans has Raven forced to take three little kids who are potential superheroes to a safe place to stop them from being kidnapped by the Brotherhood of Evil. At one point, she and the kids are trying to escape from Monsieur Mallah by riding in a cable-car, and the wire snaps. They go plummeting down the mountain in the car, which eventually crashes, but the kids land harmlessly in the snow. The two who can talk both promptly sit up and scream, "Again! Again!" Raven's reply? "NO AGAIN."
* Teen Titans, one episode showed his hand as being organic beneath the exterior.
* Teen Titans, one of the DCU's top assassins (and also her father), though she eventually realized how messed up her relationship with him was.
* Teen Titans one of the side effects of Beast Boy's powers is that he's incapable of getting sick. This apparently didn't carry over to the cartoon, since one episode had him getting a cold.
* Teen Titans one-sided when the Titans captured in the previous episode are unfrozen, in spite of the fact that this should only bring their numbers up to about equal.
* Teen Titans only attacked the Titans due to misunderstanding that they thought Starfire was committing a thievery on their solar system when in truth, Blackfire was the one doing it and framed Starfire for it. Once that was cleared off, they successfully capture Blackfire and then never threatened the Earth anymore, therefore they're pretty much their planet's good police doing their job. Their conversation also kinda imply this:
* Teen Titans On occasion, he has tried to fly away and promptly been shot down by a ray-gun, force-field, or what-have-you. He also mentions at one point that transforming into a flying animal is very tiring.
* Teen Titans, on the other hand, villain Cheshire's hair was lengthened: it seems to fall to about her knees.
* Teen Titans on the prom's dessert table. Tip: Never date a guy with a girlfriend who can shoot lasers out of her eyes.

* Teen Titans or the attack is ensured to somehow be nonlethal. Despite retaining the typical pacifistic heroes role, the Titans themselves rarely hold back during action sequences. Particularly glaring with Robin, who wielded explosive discs as a standard weapon; imagine a police officer substituting a hand grenade for his billy club.
* Teen Titans, Phobia has been turned into an incredibly squicky version of this trope, with her abducting heroes and villains to become her playthings.
* Teen Titans powers, and Raven, having been knocked into the ocean, can't fly out because the water has turned into glue.
* Teen Titans powers, is able to stretch her limbs fast enough to strike and grab him.
* Teen Titans qualifies for this. In his first appearance, he is an old man who attacks the Titans with a holographic version of his young self who uses hypnotics and moving objects. Then, in his second appearance, it's hypnotics and robots. Oh, in the same episode, he is back to his younger self thanks to absorbing Robin's youth.
* Teen Titans: Race to the Start. His screams of pain, described as sounding like "a boiling kettle crossed with a cat getting gutted alive," are mistaken for Lian's and everyone rushes to "save" her from Damian.
* Teen Titans), Ravager and Kid Devil are living under the authority of one of these.
* Teen Titans Raven, as he puts immense effort into getting her to smile.
* Teen Titans, Raven crash-lands on a planet inhabited by tiny aliens, and is worshiped as a God simply for being more than three inches tall.
* Teen Titans", Raven does this to Beast Boy after he makes his last and somewhat awkward comment: "Okay, next time, we're going to Mexico!" She then coldly slaps him senseless off the stage, the camera fades after that, then the credits roll.
* Teen Titans, Raven initially has her full telekinetic powers from the series, but then has them drained so much that they become near useless.
* Teen Titans, ravens are used as a symbol of (take a wild guess) Raven. Given Raven's demonic nature and all-around creepiness, that definitely results in this trope.
* Teen Titans, Raven was Discipline (her powers required focus and would quickly get out of control if she was emotional) and Starfire was Harmony (her powers required her to feel). This was explored in one episode where they changed bodies.
* Teen Titans reactions to his jokes may be more about maintaining her emotional reserve than being genuinely annoyed.
* Teen Titans (Rebirth), complete with a "Next: The Sixth Titan" preview.
* Teen Titans, Red X flirted with Starfire after pinning her to the wall with one of his gadgets, calling her "cutie" and remarking that the "only crime" between them was that they hadn't gone on a date. (Her only response was to blast him with her starbolts through her eyes.)
* Teen Titans, Red X will fight with or against anyone depending on his own interests and whims.
* Teen Titans relationship with Terra (who, mind you, is young enough to be his daughter). Modern adaptations of this story tend to excise the sexual relationship between the two and make Deathstroke the more evil of the two.
* Teen Titans reunites them). Some villains were lucky to have two appearances.
* Teen Titans: "Revved Up" focuses on the Titans' efforts to retrieve a mysterious briefcase critical to their fight against the Brotherhood of Evil. Cut to black the moment Robin opens the case, the contents of which are never revealed afterwards.
* Teen Titans, Robin also fights atop a bamboo grove against an anthropomorphic monkey while journeying up a mountain to meet a martial arts master. He later perches on top of the bad guy's staff (really his which was stolen), and then leaps off, causing the staff to smack the bad guy.
* Teen Titans, Robin formed an uneasy alliance with Slade, after Slade convinced him that Trigon was a far greater evil (which Robin really couldn't deny). Later, however, Slade proved that he was still a contender when he faced Trigon's demonic guardian:

* Teen Titans, Robin had his walls completely covered with news clippings of Slade in "Masks", his definite low-point in his vendetta against the man.
* Teen Titans. Robin has steel-toed boots designed to look like Chuck Taylors, Beast Boy has Velcro sneakers with paw-print soles, and even Cyborg has some pretty cool-looking feet. Glen Murakami had this to say on the character designs:
* Teen Titans, Robin once gave Ravager a pair of literal "stun swords" so she could use her otherwise very lethal fighting techniques to the fullest without actually killing anybody.
* Teen Titans, Robin traded in his usual staff for a pair of smaller sticks and wielded them using the Filipino martial art of escrima.
* Teen Titans screams. Given how powerful they both are, it's hilarious.
* Teen Titans screams "QUIET!" in the movies when the others wouldn't stop arguing.
* Teen Titans Season 2 episode "Date with Destiny", Beast Boy makes mention that Killer Moth's mutant drones are cute enough to keep as pets (in the larval stage). Despite Raven's warning, he manages to hide Silkie up until Season 3's "Can I Keep Him?"
* Teen Titans season has an overarching plotline, related to one of the core characters:
* Teen Titans, See-More reveals he had "see-through" vision and then gazes intently at Starfire, which prompts her to cover herself up while blushing. This allows her to be an easy target from See-More's next attack.
* Teen Titans seems to function as leader whenever Robin is AWOL or otherwise unable to lead, e.g the Season 1 finale. Except during the finale of the fifth season story arc, when the role falls to Beast Boy. True, for most of it this was by default of him being the only core team member still free and active, but when the others show up, he still seems to be calling the shots until Robin's freed from the Brotherhood. There's also the fact that to most of the team the Brotherhood are new enemies, while Beast Boy had already faced them numerous times when he was a member of the Doom Patrol before joining the Titans.
* Teen Titans sees Robin and Starfire sharing a significant look right before Robin leaves with Slade to try rescuing Raven.
* Teen Titans sees what she's wearing and promptly freaks out, using her hair to cover herself up.
* Teen Titans. See the prom episode "Date With Destiny" with Killer Moth and Kitten, though it was Fang who felt the brunt of Starfire's protective wrath.
* Teen Titans see this every day, and of course their cartoon and mainstream comic counterparts get along just fine without it.
* Teen Titans series, but not without reason. The process which created him involved telepathically uploading a genius IQ into his brain, but with no actual learning involved, knowledge of subjects like advanced mathematics, sciences, world history, and over a dozen languages are stored in the boy's subconscious until a situation demands he remember.
* Teen Titans series — in the episode "How Long is Forever?" Starfire is pulled into a future where the Titans broke up after she vanished. While Cyborg is reduced to living in the ruins of Titan tower attached to a crude power generator, Beast Boy has locked himself into a cage at a freak show and Raven appears to have lost her mind, Robin on the other hand has become Nightwing.
* Teen Titans, she also kisses a random Japanese boy to learn the language. This time, when she explains why, Robin's pretty relieved...
* Teen Titans; she'd been told it would end a war but in fact it was a ruse by her big sister Blackfire.
* Teen Titans, she fought the Titans and eventually used her earth-manipulating powers to destroy the underground lair they were in. As they start to dig through the rubble, Beast Boy says that she could've used her powers to escape... and then he finds her body a couple of panels later.
* Teen Titans short and decided to throw a pie in Rose Wilson's (Ravager) face. Rose apparently yelled at her enough to leave her crying.
* Teen Titans short "Burp", she has the opening line, "...and that is what happened right before the Big Bang." It seems Starfire knows quite a lot about the secrets

of the universe, but the show just won't let us hear them!
* Teen Titans show up to arrest Starfire. As it turns out, the actual fugitive is her sister, Blackfire, who deliberately gave her a necklace to make them think Starfire was her. Fortunately, the mistake is cleared up. (This is not the last time Blackfire will be a threat to her sister in the series.)
* Teen Titans Silkie grows into a giant monster Starfire is forced to take him away to a remote island and leave him there. When he tries to grab her to stop her from leaving, she's left with no choice but to shoot him with her powers to make him let go.
* Teen Titans since, in the words of a fellow villain, he's experienced every war in history.
* Teen Titans's introduction is overshadowed by Jericho being introduced at the exact same moment.
* Teen Titans, Slade is a menace through the season, while Trigon is a threat only in three episodes.)
* Teen Titans, Slade once threatened to kill Starfire, Cyborg, Beast Boy and Raven if Robin didn't become his apprentice. Robin managed to turn it around on him by injecting himself with the same nanites that were in the other Titans, and made an offer of his own: Either Slade didn't kill any of them, or he killed all of them, thus losing his apprentice.
* Teen Titans, Slade rationalizes his role in it, and when Robin points out that Slade's made people suffer, Slade coolly says "It's what I do best."
* Teen Titans Slade, the first stage of this prophecy comes to pass, as she is covered with the markings that will enable her to become said portal and is given a nightmarish vision of Trigon's supposedly-inevitable victory.
* Teen Titans. Sometimes their villains actually are old people (Mad Mod being a prime example).
* Teen Titans, so Robin's origin story was completely untouchable, aside from a few implications.
* Teen Titans source material actually had the heroes as young adults overcoming the fact that they weren't kids anymore and continuing their heroic exploits regardless. However, since the cartoon series was being directed towards children, they were de-aged to around 15-17 and 16-18.
* Teen Titans's parents died during the time she was sold into slavery. Starfire never notes this when she goes back to her home planet and didn't seem too fazed about the slavery part either.
* Teen Titans Spotlight featured a superhuman psychiatrist who was brainwashing her clients into becoming secret assassins; she used the trigger words "Goldilocks", "Rumpelstiltkin", and possibly "Snow White" to activate and deactivate them.
* Teen Titans Spotlight's girlfriend Sarah in order to lure him into a trap. He tapes her mouth shut and dresses her up in a convincing Two-Face costume, hoping that Cyborg will accidently kill her in a fit of rage. Fortunately, Cyborg sees through the ruse at the last second.
* Teen Titans: Starfire. All that emotional energy is the source of her super powers. 'Joy' for Flight, 'confidence' for super strength, and general perkiness.
* Teen Titans' Starfire is among the tallest members of the group, and still very attractive, and her slightly older sister Blackfire is just as tall and attractive (the only differences being hair and eye colors).
* Teen Titans; Starfire manages to grab hold of the necklace and crush it, then win the fight.)
* Teen Titans, Starfire's hair goes down past her waist and merges with the stream of energy left behind when she flies.
* Teen Titans: Starfire's odd Tamaranean customs and fish-out-of-waterness is the show's main source of funny.
* Teen Titans". Starfire starts to exhibit all sorts of ugly deformations as a result of Tamaranean puberty that she tries to hide with bulky clothes. Eventually, she's unable to hide them anymore and flies off in fear that her teammates will think she's ugly. She ends up getting captured by a spider alien that feeds on Tamaraneans that go through this process, just as Starfire ends up immobilized in a

cocoon. The other Titans show up to save her, with Robin reassuring Starfire that no matter how monstrous she might end up looking after the metamorphosis, she'll still be their friend. It ends up being moot, because Starfire looks just the same after emerging — the only difference being that she now has extra powers.
* Teen Titans Starfire was the only one who enjoyed them for being "crunchy on the outside, yet runny on the inside".
* Teen Titans started to turn into this during the definitive Wolfman run. She proved herself to be a capable leader of her people and even started to put aside the needless, if somewhat understandable, grudge she bore against her sister. It didn't last.
* Teen Titans, Tara Markov alias Terra true to her name. She can control and manipulate all forms of rock and earthly substances and materials. There is no set limit to how far or how close she needs to be to the earth for this power and ability to work. She has been able to be completely off the ground and still control the earth. She has created tremors, earthquakes, sharpen rocks to a needle point, and has control over these elements for as long as she can physically maintain them. The same goes for her heroic brother Geo-Force.
* Teen Titans: Terra can control earth and rock, an ability known in-universe as geokinesis.
* Teen Titans Terra was far more evil and dangerous than him due to her mental problems, worrying him frequently. His plan to bring down the Titans from within went off without a hitch thanks to her prowess, but immediately fell apart the moment she got pissed off at him.
* Teen Titans that introduced the H.I.V.E., one of the things the Titans complain about after they reclaim their tower from the villains is that they threw away all the blue furry food in the refrigerator.
* Teen Titans that on Tamaran, lip contact does indeed signify merely a transfer of knowledge as opposed to meaning "more" on Earth.
* Teen Titans that they struggle to work together as teammates, let alone do anything constructive about the attraction.
* Teen Titans that tries to take over the world by starting a chain of fast food restaurants that serve a delicious meat substitute made of his secretions... which happens to be more alien tofu.
* Teen Titans The Abridged Series, Robin wondered who declared it obscure reference day.
* Teen Titans: The characters play Stankball using a ball made from unwashed socks.
* Teen Titans, the eponymous team of three boys and two girls all live together in the same building. While Robin's relationship with Starfire does not stay platonic for the whole series, the other characters remain just friends.
* Teen Titans: the first episode had Cyborg looking for the TV remote, doing things like holding up the couch, in the beginning and end.
* Teen Titans, the force-field around his tidal wave-generator is invisible until Cyborg walks into it. During their fight, Blood pins Cyborg against it, shocking him painfully.
* Teen Titans: "The Gem was born of evil's fire;/the Gem shall be His portal./He comes to claim, He comes to sire/The end of all things mortal."
* Teen Titans, the goggles may protect against the wind. They may also protect against dust and dirt that get flung around when she moves rocks.
* Teen Titans, the ground beneath her starts to crumble... out pops Cyborg and some reinforcements! Ceiling bursts open... and Starfire has some more! Finally Raven brings in the last of them and Battle Royal against the Brotherhood of Evil begins!!!
* Teen Titans: The Judas Contract has a rare female example: when Terra kisses Beast Boy, her powers levitate a bunch of rocks.
* Teen Titans: The Judas Contract: Lampshaded in the flashback when Starfire arrives on Earth. The Titans argue about whether to help her or the aliens fighting her (who look like ugly, winged reptilians). Bumblebee says that the choice is obvious, but Speedy counters that looks can be deceiving. Robin finally orders the Titans to assist Starfire after she's knocked unconscious.

* Teen Titans: The Judas Contract of being hunted down by a mob afraid of her powers. She then gets saved by Slade moments before getting shot. And while she does snark about the Titan gang, she is shown having genuine fun with them and also developing feelings for Beast Boy. And when she does betray the team, she herself is betrayed by Slade to Brother Blood.
* Teen Titans: The Judas Contract to be part of the New 52-based DC Animated Movies Universe.
* Teen Titans, the meta-tastic villain Control Freak is the Titans' self-proclaimed Number One Fan. He is a caricature of the stereotypical lank-haired, overweight geek, complete with overfondness for lightsabers and trenchcoats. One of his two feature episodes is chock-full of fandom references, up to and including online ship-wars. Control Freak is also tremendously disappointed in one of these episodes to discover that the Titans East (a group of C-listers he's never even heard of before) are substituting for the "real" Titans while they're away on a long-term mission, and thus the gadgets he'd designed specifically to challenge the Titans were wasted. As the Titans East have completely different powers, he escapes and comes up with new weapons to fight them... and becomes a fanboy of the Titans East as well once they defeat him. He also becomes disappointed when he finds out that the Teen Titans don't even consider him an actual villain when he discovers their list of villains and doesn't find himself listed but instead finds The Puppet King's name- a villain they had only encountered once.
* Teen Titans, then a shot of the target of that punch being knocked backwards.
* Teen Titans, then fakes an enemy invasion — of her own planet. Starfire wins the crown but quickly gives it to her mentor and surrogate father, as she already has a job on Earth.
* Teen Titans the one being imprisoned, and Starfire is actually free to leave.
* Teen Titans: The one thing Beast Boy can't stand is when people pity him.
* Teen Titans there was the True Master (named Chu Hui in the end credits) a rare female example of this trope. Her habit of giving answers that had simple meanings when people expected complicated ones was very similar to Mr. Miyagi's habit of doing so.
* Teen Titans The soul of his dead Aunt Marla managed to convince him otherwise.
* Teen Titans; the team's hometown was never named in the cartoon. Meanwhile, "Steel City" is the location of Titans East.
* Teen Titans, the Titans are under mind control from villain of the week and each character is forced to wear some embarrassing costume. Beast Boy is in a pink bunny suit. Cue his confusion when he finally snaps out of it.
* Teen Titans. The Titans still managed to take them down, but it took a lot of strategizing and improvising where ordinary mooks would have just been effortlessly blasted through.
* Teen Titans) they attempted to raise Warp so he would become a good member of society. Unfortunately, his obsession with time made him become corrupt and evil again, even brainwashing Robin to join his side and attack Starfire from her timeline.
* Teen Titans, they exchange rather menacing greetings in their native tongue. Then he decides to give her a more friendly greeting by tickling her. Starfire enjoys this.
* Teen Titans. They seem to have given up on that, though, as his most recent appearance circa 2006 portrays him as a tool of the repressive post-Soviet government.
* Teen Titans this. Considering Slade had a way to kill them all with a push of a button, his only viable response was to do as Slade asked for their sake...including not holding back against them when he commits crimes for Slade.
* Teen Titans. This isn't out of lust but in order to sire powerful children to spread his evil and help him conquer.
* Teen Titans. This is stated in the special features on the third season DVD.
* Teen Titans, this occurs frequently right when a Titan notices they're about to be attacked by a villain.
* Teen Titans though, and she's mortified when she snaps out of it. Though the glow

comes back and she snarls with sharp teeth when asked what she'd done to him.
* Teen Titans. Though his mask and body-suit hides it, underneath Slade is shown to be a dessicated, walking skeleton with an eye (he only had one eye before his previous death). Slade was likely restored to a fully living human state following his assault on Trigon's demonic guardian who held what Slade wanted.
* Teen Titans, Thunder and Lightning, terrorize people because they find it "amusing". They don't take the feelings of the people around them into account, something Beast Boy calls them out on. (Thunder eventually realized that they were hurting people and turned on his brother, and Lightning eventually figured it out too, just in time for them to help stop the real threat.) Thunder and Lightning are loosely based off of Japanese thunder gods (Raijin, in particular) who are said to cause all sorts of destructive mischief for their own amusement.
* Teen Titans, Tim is about to be attacked by an animalistic Skitter, until a furious Cassie intervenes in order to protect him.
* Teen Titans. To add to this status, he even saves the heroes' lives and helps save the city before escaping.
* Teen Titans to come skinny dipping with her in the pool in Titans Tower.
* Teen Titans: Together for Tomorrow, because she speaks Kryptonian once outside of it. Fortunately, Kara quickly picks up on some basic English, and is really good at deciphering Conner's charades.
* Teen Titans: Together for Tomorrow is aghast when Conner first calls her "Auntie". In line with this trope, it's more because she's (physically) only two years his senior than actually his first cousin once removed.
* Teen Titans: Together for Tomorrow, is an android. Judging by Superboy's jab that Lex "had to build himself a girlfriend," and Robin calling Mercy "a glorified blow-up doll," their relationship has a sexual element.
* Teen Titans: Together for Tomorrow. Justified because she's adjusting to Earth life, and it seems tomatoes taste like a fruit native to Krypton.
* Teen Titans: Together for Tomorrow" that looks like a white and blue wolf with a lion's mane and tail, long horse's ears, and a crystal growth on his snout shaped like a rhino's horns.
* Teen Titans to how she appears in the comics (she normally wears her hair long, and she temporarily donned a white costume after killing Trigon to celebrate her freedom from him), and many fans loved the new look. However, she went back to her old style in the end just as a personal preference.
* Teen Titans to power the suit, an unstable element that is so dangerous, even superheroes aren't legally allowed to buy it.)
* Teen Titans to prevent the birth of a son who will become a horrific despot that Donna isn't even pregnant with yet.
* Teen Titans to reset everything and restore the world to its original form.
* Teen Titans to stop Raven from falling into Mumbo's hat... but they all end up falling in anyway.
* Teen Titans Trigon at the end of the fourth season, and he's never seen again since then.
* Teen Titans: Trigon who, like his original comic book counterpart, is supposed to be the incarnation of all evil.
* Teen Titans: Trouble in Tokyo. A girl who works for the villain approaches Beast Boy and calls him "otaku". Beast Boy takes it to mean that she thinks he's cute when it actually means "comic book geek", which is something only someone who had been watching him could have known about.
* Teen Titans: Trouble in Tokyo are enjoying a boat ride during a visit in Tokyo. Real-life cherry blossom trees also signify romantic love.
* Teen Titans: Trouble in Tokyo Brushogun has origins in this: he fell in love with a painting of a woman he created and used black magic in an attempt to bring her to life.
* Teen Titans: Trouble in Tokyo: Brushogun used to be a normal artist until he turned to dark magic to make one of his creations alive. The price was his own transformation into an ink-filled, paper-skinned entity with the ability to create inky minions. Both Brushogun and the minions can look normal, but their true form

is pure ink.
* Teen Titans: Trouble in Tokyo drove the Robin×Starfire shippers nuts. "No! Why did you walk in now? They were about to, and Robin's wearing those!"
* Teen Titans: Trouble in Tokyo. Eventually, there was a mass convergence.
* Teen Titans: Trouble in Tokyo. Fortunately, the whole team had to go shortly after, but BB had to turn into a dog and use the tree.
* Teen Titans: Trouble in Tokyo heroes to Tokyo to rescue him from Daizo and foil his evil scheme.
* Teen Titans: Trouble in Tokyo, likewise, has Starfire learning English by kissing Robin after she first arrives on Earth. Her species learns languages that way.
* Teen Titans: Trouble in Tokyo movie started with a supervillain blatantly assaulting the Titans Tower with explosives.
* Teen Titans: Trouble in Tokyo), only it's in an American parody and mockery of the original Japanese Manzai.
* Teen Titans: Trouble in Tokyo, Raven does this to Beast Boy after he makes his last and somewhat awkward comment: "Okay, next time, we're going to Mexico!" She then coldly slaps him senseless off the stage, the camera fades after that, then the credits roll.
* Teen Titans: Trouble in Tokyo, Raven is wandering around the eponymous city looking for something to do. She arrives at a news-stand and asks if they carry anything in English, German, Latin, Romanian, Ancient Sumerian, or Sanskrit. Apparently, Starfire and her kind have the ability to gain and understand another's language just by kissing them (which she demonstrated by smooching a Japanese stranger).
* Teen Titans: Trouble in Tokyo summoned several Palette Swapped copies of previously created villains for the final battle.
* Teen Titans: Trouble in Tokyo. The Japanese Self Defense Force is actually so competent, it shocks the heroes. There's a reason for this….
* Teen Titans: Trouble in Tokyo, too. In fact it would have been, had they been robots instead of living ink.
* Teen Titans, turning them into old and worn-out with faded colors, and made Mad Mod's clothes regain their color and look new again.
* Teen Titans. Unfortunately, it doesn't help as Slade was on to him from the start.
* Teen Titans, until the camera cuts to The Brotherhood of Evil at their base listening to them the entire time through their communicator and they were able to pinpoint their location.
* Teen Titans using her dark powers, whereas exposure to that in the 1st season reduced him into a shivering wreck. Upon seeing that thing again in the 4th season, Dr. Light goes from "No one defeats Dr. Light!" into "I'd like to go to jail now, please."
* Teen Titans views Cyborg as this, as he was the only one of the Titans to provide him with a decent fight, and actually managed to defeat him. It gets to the point that, during a fight with Robin, Guerra compares his fighting style with Cyborg's, and while he loses all interest in the Titans after his contract with Midnight expires, he's still looking forward to a rematch with Cyborg.
* Teen Titans villain Brother Blood, a supervillain cult leader who bathes in the blood of his followers to prolong his life (although not indefinitely).
* Teen Titans villain Mammoth is superhumanly strong and tough but has almost nothing in the way of actual combat training. He just flails wildly at foes, relying on his strength and toughness to carry him through. More skilled opponents have been known to complain about how frustrating it is to fight him, as he is easy to hit but almost impossible to damage.
* Teen Titans villain Shimmer can transmute any element or compound into any other. However, the change only lasts for a few minutes.
* Teen Titans walls at one point using telekinesis, and he doesn't even blink.)
* Teen Titans, wanting to do good, but her inability to control her powers resulting in causing multiple natural disasters and her becoming a runaway in order to avoid hurting others, eventually turning to Slade when he promises to be able to

give the control she so desperately wants.
* Teen Titans was a highly skilled military general — who had been around for nearly every single battle in recorded history. At one point he quotes Sun Tzu, then mentions that he was an excellent pupil. He's described as knowing every tactic used in every battle in every war in history because he was there personally. (His comic counterpart is "merely" pushing a thousand.)
* Teen Titans was astoundingly dark, given the show's track record at the time.
* Teen Titans, was designed to address this problem with the whole above ground building being a hologram to attract enemies intending mayhem.
* Teen Titans was her downfall, because Starfire quickly realized that the Jewel itself was far more fragile than Blackfire was; she managed to grab it and crush it, and as a result, defeat Blackfire.
* Teen Titans was Teeny Titans, an in-universe parody from the early 1990s involving babified versions of Nightwing, Starfire, Pantha, Changeling, and Baby Wildebeest (turned into a magic transforming doll) and their battles against evil Mr. (Slade "Deathstroke") Wilson. The fictional "Teeny Titans" came about when the New Titans were strapped for cash and decided to whore themselves out via merchandising deals and was largely played for shock value as far as the team being horrified at how their cartoon show was a slapstick kiddie show.
* Teen Titans was very lonely before joining the team, and still lonely even after she joined. When she thought she was being replaced by her sister Blackfire, it affected her deeply as she isn't very fond of losing friends. However, she's more worried that Robin might like Blackfire more than her.
* Teen Titans, whenever two (or more) characters share a quiet moment, be it romantic or otherwise. For instance, when Starfire was cheering Cyborg up about not being normal at the end of "Deception", the rest of the Titans show up to wrestle Cyborg into a pink dress as an "initiation".
* Teen Titans. When her sister announced Starfire's husband-to-be, a beautiful Tamaranean boy showed up and Starfire was actually looking forward the idea of being his wife. The boy then revealed a hideous-looking alien as the actual husband-to-be, much to Starfire's horror.
* Teen Titans when in response to wondering why her teammates, sans Robin, were pretending to be Robin, Beast Boy retorts, "You know you wanna try it."
* Teen Titans when Robin used it to get his team away from Now-Evil Terra. Beast Boy lingers for a bit before he runs off into the smoke.
* Teen Titans. When she gets to fully cut loose, it's a thing of beauty.
* Teen Titans, when Terra believes she's been betrayed by Deathstroke, she flips out and begins trying to kill everyone — Deathstroke, the Titans, even H.I.V.E. — in her rage and taking them with her. All she ends up doing is killing herself.
* Teen Titans when the team had crashed into a pile in a darkened pit, the following dialogue occurs:
* Teen Titans. When the Titans go to Tamaran, she is not at all ditzy and it is her teammates that have the blank "what's going on" looks.
* Teen Titans, where Cyborg learns Tamaranian from Starfire, they exchange a joke about "how many does it take". All the rest of the words, as well as the pun, are left untranslated, so we can only wonder.
* Teen Titans where Robin is chasing a villain on his motorcycle and said chase ends up bouncing off the car of a couple making out.
* Teen Titans, where the title character discovered that Eternity had been beaten to death by Calculator.
* Teen Titans, which the episode takes much of its inspiration from). On a more serious note, in "Birthmark", Slade transports Raven into a devastated world that she is destined to bring about, a vision which actually comes true in the season finale.
* Teen Titans while, but hey, that happens to everyone in comics at least once.)
* Teen Titans. While it was one of the most successful and acclaimed comics of the '80s and has continued in some form to this day, the show was what introduced the team to modern audiences, and has been ingrained in the minds of many non-comic

readers as the definitive source. There are several ways this shows:
* Teen Titans, while she remained guarding the prison. In the end, she got bored and created humanity to have some company. Toward the end of the story, Kishar summons Death (to discuss the repercussions of a certain difficult choice made) and casually mentions it's been nearly a billion years since she last did that.
* Teen Titans while warning him not to abuse it, advised him to dump his even more psychotic girlfriend, and hooked him up with the Rogues in Central City once everything went south for Titans East.
* Teen Titans who aren't fond of the direction the creators took with the reboot.
* Teen Titans (who like Aquagirl, is Latino) and Traci 13 (who is half-Chinese).
* Teen Titans, who traumatizes him to the point that, by merely showing up, she defeats him instantly.
* Teen Titans who uses her aerokinesis abilities almost exclusively to suffocate people.
* Teen Titans: Witch-Hunt before putting the rest of her plan into action.
* Teen Titans: Witch-Hunt is the Key to the Cosmos. While small and not really cool-looking, it's for opening portals, seemingly to anywhere in the universe.
* Teen Titans: Witch-Hunt, the sorceress stresses that she wants Donna to think of her as a sister while the girl is still trying to wrap her head around this.
* Teen Titans. With everyone else captured, Beast Boy leads a bunch of D-listers to rescue them.
* Teen Titans: Year One is a modern retelling of how the original team formed. It changed a few character designs:
* Teen Titans: Year One puts an emphasis on his fish-looking aspects and he gives him a bluish skin tone.
* Teen Titans, yet often has very dark, dramatic storylines and, on a few occasions, will have an episode focus almost entirely on character interactions, with the obligatory supervillain battle relegated to a minor B-plot.
* teen tragedy songs", that were popular in the '60s, the narrator digs up his girlfriend's grave, (who died in an accident) crawls into her coffin, and closes the lid. Complete with sound effects.
* Teen Witch subverts this by making Louise's familiar an object: a blue charm which she is told both symbolizes her powers and always finds a way back to her from lifetime to lifetime.
* Teen Witch: The protagonist and eponymous witch, Louise Miller, has no opponents throughout the movie. The main conflict is that she has the ability to make anything she wants come to pass. So all she has to do is wish to be the most popular girl (which she does) and that gets the attention of the most popular boy.
* Teen Witch, the teacher of a sex ed class holds up a rolled-up umbrella and asks the students to guess what it represents. One of them responds: "A Roger. A love one. Joystick, dong, zipper-lizard, tallywhacker, trouser-snake, schlong!"
* Teen Wolf (1985), Scott's eyes flash red and his voice drops to an evil growl to intimidate the hard-ass old man into selling him a keg of beer.
* Teen Wolf: Alpha werewolves' eyes turn red when they feel angry or predatory, even in human form. Once they shift, their eyes may glow outright. Also, Scott's yellow/gold eyes whenever he transforms.
* Teen Wolf, although not with a mirror. In the first episode, Scott sees someone behind him through his webcam.
* Teen Wolf, a nice little speech punctuated at the end by a low, bestial growl (the principal knows about the family legacy of lycanthropy). After a beat, both men glance down, and Harold, back to friendly, remarks, "I knew I could count on you." It is strongly implied that the principal has wet himself. This is made even funnier by the fact that Harold is at least a foot shorter than the principal.
* Teen Wolf apparently has similar energy currents running through it, although they are not in straight lines.
* Teen Wolf: A recurring device used in the show. Throughout Season 1, suspicion for being the Alpha is leveled#d at Derek Hale, Adrian Harris, Alan Deaton, and a few other adults who aren't hunters. In Season 2, there are numerous candidates for the Kanima(and later its Master). In Season 3a, nobody knows who the Darach is, and

in 3b several of the main characters are considered for the Nogitsune. In Seasons 4 and 5, the Benefactor, the Hybrids, and the Beast of Gevaudan all fulfil the mandatory 'mysterious figure the cast need to learn the identity of'.
* Teen Wolf) are married in real life and have been for nearly 30 years now.
* Teen Wolf are "You have to tell my dad-" repeated with some urgency. At first, the heroes think they just wanted to tell their father they loved them but said father revealed they had told him that early that day. This leads them to realize that the dead character was trying to tell them how they defeated the so far unkillable villains of the season, which the heroes then work out for themselves.
* Teen Wolf: A romance develops between Scott, who is a werewolf, and Allison, who comes from a family of werewolf hunters.
* Teen Wolf. As an FBI agent, it's likely he was a workaholic with little time for his wife and child.
* Teen Wolf as both an Alpha and a Beta that Derek and other Alphas do not seem to know how to use.
* Teen Wolf. A Type Three for Scott and Allison. Scott loved to whine and moan about it and pass his masquerade duties on to someone else (mainly Stiles) so that he could try to avert the trope.
* Teen Wolf, Beacon Hills is currently in one, via the Argents, the Hales, and the Alphas, but with all of the murders and investigations and sightings, the masquerade is under threat of being broken by many individuals, individually.
* Teen Wolf, Boyd accepts the bite when Derek offers it because he's tired of not having any friends, and becoming a part of Derek's pack means that he won't have to be alone anymore.
* Teen Wolf, but now he has full control and seems to have grown out of the angst. His best friend, Stiles Stilinski, rejects the bite later as well because of a similar reasoning and states that he's perfectly happy being a normal human.
* Teen Wolf come from very wealthy families who appear to give them whatever they want. In Jackson's case, this includes a brand new Porsche.
* Teen Wolf: Derek bumps Braeden's forehead after kissing her, when she expresses fear over the possibility of him dying.
* Teen Wolf, despite supposedly being an out-of-the-way town in a non-coastal part of California, Beacon Hills has a seemingly endless number of these, with vast, cavernous interiors. One serves as the headquarters of Derek and his pack, with a couple of subway cars thrown in for good measure.
* Teen Wolf does this both before and after receiving an title sequence. From season 2 onward, each episode's cold open usually leads to a moment that seamlessly transitions into the intense theme song that plays.
* Teen Wolf does this. Scott. He cares deeply for humans and innocents, even trying to protect the Argents when possible. In contrast Derek is fine offering the "gift" of Lycanthropy to those who crave it, outcasts, the ones who are emotionally damaged and with health problems. Scott is particularly upset at this because of the active hunting werewolves face, making that much more likely the new converts die... Assuming they don't kill someone first.
* Teen Wolf, ends up with Stiles, a straight-A student with a talent for research and detective work.
* Teen Wolf Ethan in a homosexual and supporting character version of this.
* Teen Wolf. Even when they transform, they look essentially the same besides the addition of claws, fangs, and glowing eyes. This extends beyond the werewolves as well. It's hard to think of any monster girl on the show that isn't cute.
* Teen Wolf, except as photographs of a beast-like figure in one, an then a human-like figure in another.
* Teen Wolf, featured a light comedy version of this. These werewolves were hereditary, and could transform at will retaining full mental faculties, but lost control of the transformation on nights of the full moon.
* Teen Wolf features and doe eyes that have drawn more than a few snarky comments comparing him to Bambi.
* Teen Wolf finally have one in the sixth season’s mid-season finale, after the former was wiped from everyone’s memory for ten episodes.

* Teen Wolf for Lydia. Also, whenever trouble occurs, Lydia's first instinct is to find Scott.
* Teen Wolf going on between the werewolves, the other creatures, and the people who hunt them.
* Teen Wolf has a sizable following of werewolf fans because of, well, the film being about a high school student who finds out he's a werewolf.
* Teen Wolf has Chris Argent and his associates preparing to hunt down Derek, Scott, and the Season 1 Alpha.
* Teen Wolf has Danny, lacrosse goalie and best friend of the school's leading straight jock Jackson. It is later revealed that Jackson himself is bisexual rather than straight when he is shown to be in a relationship with another Straight Gay, Ethan (who is Danny's ex no less).
* Teen Wolf has this. The fullness of the moon triggers a shift in personality for werewolves, which can be overcome by experience (Derek) or a special focus (Scott). Then, there are cases like Isaac, Erica, and Boyd, who are generally more bully-like regardless of the lunar phases. This is particularly ironic because Isaac, Erica, and Boyd were all bullied before they received the bite.
* Teen Wolf has this with "Fury" for Matt, "Visionary" for Deucalion, and "The Overlooked" for The Darach, as well as season one for Peter Hale.
* Teen Wolf (in a little party game commonly known as "Seven Minutes' Heaven") by the couple's friends, who put them in the closet just to encourage some amorousness. Though the two initially would prefer to remain just friends, the guy's werewolf side does have him getting a bit frisky with her...
* Teen Wolf in denial, and only a handful of people know what is really going on! Oh, and a new main character is a teenage girl who turned into a werecoyote as a child, killed her mother and sister during a full moon, and went to live in the woods as a coyote for nearly a decade out of remorse. When Scott manages to change her back, her return is happily accepted without question by her father, she is put into high school(!) and nobody questions the fact that she openly talks about life a coyote!
* Teen Wolf. Initially it seems that she is only being influenced by Peter Hale. But lately it has become apparent that she can hear other ghosts as well, and that it is not a voluntary ability.
* Teen Wolf in "Lunatic". In the previous episode, he gets clawed in the back by the Alpha, while Scott and Stiles make a run for it. We see him hit the ground, but he turns out to be fine.
* Teen Wolf in the eleventh episode of season 2, when Coach Finstock is finally going to let Stiles, who is normally a bench-warmer, into a lacrosse game this comes up.
* Teen Wolf, in which any supernatural entity — the alpha, the Kanima, etcetera — seems to have the ability to turn off the lights in order to freak out whichever character they're targeting at the moment.
* Teen Wolf, Isaac's father throws a glass at him, almost blinding him, and then says blandly, "Well, that was your fault."
* Teen Wolf is an interesting example. At first, she was unaware of her son Scott's being a werewolf—but once she became privy not only to that, but all of the supernatural goings-on in her town, she quickly rose to Action Mom status, helping to fight off the various monsters that attack Scott and his friends.
* Teen Wolf is considered 'Pack Mom,' by most of the fandom. He helps out other characters in various ways, even if it comes at a cost to him. He is also shown as being protective of many of the members in the show even though, most of the time, he's physically weaker than they are.
* Teen Wolf is yet another show that often comes under fire for its queerbaiting (especially between Stiles and Derek) and giving much less screentime to lgbt characters and relationships than straight ones despite creator Jeff Davies being openly gay.
* Teen Wolf. It's mentioned that some of the members of Derek's family who died in the fire were human, despite the Hales primarily being a family of werewolves. Most fans have taken this to mean that not every child with werewolf parents inherits

the werewolf gene, even though Derek and his sisters did.
* Teen Wolf: Jackson's reaction at being demoted to co-captain... alongside Scott.
* Teen Wolf: Just about all the wolves use this, but Derek most commonly.
* Teen Wolf. Knowing this Derek kills Alpha Peter Hale while Scott begs him to stop.
* Teen Wolf, leaving Stiles heartbroken if supernatural shenanigans causes it to be irreparably damaged.
* Teen Wolf; literally; that's the whole premise. (Weird, uncontrollable physical changes; mood swings; powerful, destructive, violent urges and thoughts you don't understand and can barely control. Is it adolescence or lycanthropy?)
* Teen Wolf Lydia arranges for her and Allison to go on a double date - and then insists to Allison that it's a group thing and not a double date, when Allison says she's not ready to date. She finally admits that it is a double date, but at least, "It's not an orgy."
* Teen Wolf: Lydia references this trope, warning Allison over the phone that Scott might fall off of it, starting with being thirty minutes late for dates and eventually ending up at domestic violence.
* Teen Wolf midterm. He's an amazing investigator and a brilliant researcher, but no one who just looked at him would tell you he was competent.
* Teen Wolf moment by his father when the alibis start blending together.
* Teen Wolf moments in Season 2, and it's revealed partway through Season 1 that part of the reason he's so... aggressive is due to him having an almost pathological need to prove himself thanks to being adopted.
* Teen Wolf. "Motel California" is set in a motel whose creepy owner boasts about having the highest suicide rate of any hotel in America, and most of the main characters experience terrifying apparitions and try to kill themselves. However, the suicide rate is noted (when someone stops to do the maths) as not being that statistically unusual and the visions and self-harm attempts are caused by a mixture of hallucinogenic poison and psychic suggestion from a villain totally unrelated to the motel, and in one case by a character (unknown to themselves) being a banshee who is extra-sensitive to places where people have died.
* Teen Wolf no slouches themselves, the smartest character on the show is without a doubt the redheaded Lydia.
* Teen Wolf of sympathy from fans because his ex-girlfriend set his house on fire and his whole family, including his parents, died.
* Teen Wolf qualify for this trope. Stiles is extremely intuitive and exhibits a wide breadth of knowledge on many topics. Lydia is a brilliant chemist, and also knows both archaic and classical Latin (and probably other languages as well). Danny is a skilled hacker and knows how to write software. Matt is a photography/videography expert.
* Teen Wolf, sacrificing his Alpha power to heal his sister Corra, and Scott has amped it up into actual healing on a few occasions as well.
* Teen Wolf. Scott and Stiles especially tend to end up just winging it.
* Teen Wolf, Scott and Stiles find themselves at a big and rather lively gay club, despite the show being set in a small town.
* Teen Wolf: Scott becomes a werewolf once Peter Hale bites him in the woods.
* Teen Wolf, Scott instantly becomes popular with the ladies when he starts turning into a werewolf. People aren't as interested in him when he's not furry.
* Teen Wolf: Scott McCall is a potent combination of Charismatic and Headstrong leader types. His headstrong traits are expressed in a refusal to back down in the face of powerful and intimating foes, with an equally strong need to save people and going to any moral length to do so. His charismatic leadership comes from his generous heart (the boy deeply loves anyone in his group), sweet and bright personality (that smile could melt anyone), emotional expressiveness and outright blatant sex appeal; especially after his ascent to an Alpha Wolf as told by Stiles "...You're [now] the hot girl that everyone wants to sleep with.". Most members of his pack seem to be at least moderately attracted to him, and get into his personal space with great frequency (which he doesn't seem to mind in the least).
* Teen Wolf, Scott sidles up behind Pamela and guides her arm to teach her how to

bowl. Pamela plays along with the Hands-On Method in order to get Mick jealous. It works.
* Teen Wolf, season 1 episode 10, Co Captain, near the end, the background music of "Lose Your Soul" by Dead Man's Bones ft. the Silverlake Conservatory of Music Children's Choir is heard as various characters interact, all in a creepy, chilling way. The music's sinister tones fits the scenes well.
* Teen Wolf: Seems to be the case with lycanthropy, but mainly to those who have been turned and never wanted to be a werewolf to begin with. Some people, like Derek and other members of the Hale family, are naturally born with it.
* Teen Wolf. She is a top-notch nurse and it is something of a running joke among fans that she seems to be the only full-time staff member at the Beacon Hills Memorial Hospital, as she often treats ailments that would normally require a doctor.
* Teen Wolf: Sheriff Stilinski - Stiles's father - has never recovered from his wife Claudia's death and still struggles to talk about her. Although Claudia died at least six years before the show, he continues to wear his wedding ring and shows no interest in dating again, despite having a lot of chemistry with Scott's mother Melissa.
* Teen Wolf. Sorta. In one episode, Scott is banned from a school dance, shows up anyways, and when his coach starts chasing him, he comes across an openly gay classmate and convinces him to dance with him. When the coach catches up to him and starts yelling, the whole gym thinks he's yelling about the two boys dancing together rather than the fact Scott isn't supposed to be at the dance.
* Teen Wolf. Stiles does have ADHD, but it manifests more in a somewhat wacky body language, impulsive decisions and the tendency to ramble. It's stated by one of his teachers that he has trouble focusing in class, but you could make a case for him hyper-focusing on other things. Also, he doesn't ramble that much. More of a zingy one-liner dude. He hyper-focuses as well, as shown in "Wolf Moon" when he ends up spending hours researching lycanthropy on little more than a whim.
* Teen Wolf: Stiles gets this a lot. In "Night School", while the rest of the group are barricading the door from the Alpha, HE is trying to point out the 20-foot windows.
* Teen Wolf: Stiles thought that Derek got shot by one, which caused Derek to call Stiles an idiot.
* Teen Wolf, Stiles ties a red string around Lydia's finger during Season 3, while the two happen to be investigating Japanese mythology. The two are also referred to as each other's "emotional tethers". Whether the show ends up playing the trope straight is up in the air though.
* Teen Wolf that Allison's family keeps of everything they've ever hunted, which they think might help them take down the creepy lizard monster that's going around killing people.
* Teen Wolf. The cell phones that almost every teen carries have never fallen into any of the usual dead battery or no service cliches. It would be completely implausible, seeing as how they are in the middle of the suburbs. Oftentimes, the phones worked into the plot without breaking it, with missed and interrupted calls taking the places of complete silence.
* Teen Wolf: The eponymous teen opens the movie at the free throw line, way up in his head. He bounces. He bounces the ball. He bounces. He bounces. He bricks it. He is despised.
* Teen Wolf". The flicker of killer Allison with ring daggers in the elevator.
* TeenWolf. The primary monster of the season, the Anuk-Ite, caused terror across the entire town, which manifested in the humans as hate for their supernatural neighbors.
* Teen Wolf, there's at least one Horror Movie Stupidity Cliche in any given episode. The first episode takes the cake, though. Two teenagers— one of them asthmatic— search for the OTHER HALF OF A CORPSE. At night. In the woods.
* Teen Wolf. The streak appeared to be broken in Season 3 with the introduction of gay werewolf Ethan, but he also occupied a minor role, did not always have lines, and was only present for the one season.

* Teen Wolf the viewers meet him he's climbing into Scott's window in the middle of the night, and on several occasions gives both Scott and Scott's mother Melissa quite the scare. By Season 2 he's just had a key made to simplify things, and Melissa's resigned herself to him making their house a second home.
* Teen Wolf the werekids can't get drunk because of their healing factor.
* Teen Wolf. They are part of a larger community of such people as well.
* Teen Wolf thinks it's probably an old book, and Allison remembers that she's seen her grandfather with a book like that. They go to great lengths to get ahold of it, only to discover that it is, in fact, a cookbook. The real bestiary turns out to be on a flash drive.
* Teen Wolf, thus the transformation was an unavoidable consequence of averting Liam's death rather than a direct means of preventing it.
* Teen Wolf to attain increased physical and magical powers. Human sacrifices, selected because they possess a specific defining feature (e.g. virgins, warriors, healers, philosophers and guardians) are ritualistically murdered for this purpose.
* Teen Wolf to learn that Scott, not Stiles or Derek, is the actual main character of the show and Stiles and Derek get relatively few interactions with each other compared to other characters.
* Teen Wolf towards their mission that they are even willing to torture and kill ordinary humans if it suits their goals, whether those humans actually have anything to do with werewolves or not. Combined with how well-equipped they are and the way that they generally outgun their victims by a wide margin, this creates the impression that they are thrill-killers rather than protectors of humanity.
* Teen Wolf tries to eliminate Derek by pitting his own pack against him.
* Teen Wolf) under the Hale family house with wolfsbane planted on top, so they can remain in wolf form even after death.
* Teen Wolf uses it in the Season 2 finale, with the already-weakened werewolves, Erica and Boyd surrounded by the Alpha pack, who appear to be itching for a fight.
* Teen Wolf uses this to hilarious effect along with a demonic voice to procure beer from a curmudgeonly old liquor store keeper without having to show ID.
* Teen Wolf was an ordinary high school student (and asthmatic, no less, which severely curtailed his attempts to make the lacrosse team) until he was bitten by a werewolf.
* Teen Wolf wears shoes. The camera focuses on her feet at least once every time she appears, and her particularly long toenails are often pointed out.
* Teen Wolf, werewolf claws, despite looking almost like 'normal' sharpened human nails, can substitute a knife to cut cable and rake through metal effortlessly.
* Teen Wolf when Scott says he might go to Derek for help about being a werewolf.
* Teen Wolf. When Scott's mom lets him borrow the car to go to a party, she asks if they need to have "The Talk." Scott replies not to worry, that he's not going to have sex, to which his mom replies, aghast, that she's referring to "The Talk" about filling up the car with gas when you borrow it.
* Teen Wolf while doing this. Derek has just presumably been killed, and in fury and agonizing grief, Braeden fires shot after shot at none other than the BERSERKERS. Poetic justice. Nice job Braeden.
* Teen Wolf: While trapped in the school by the alpha werewolf, while most of the others are looking for ways to barricade the single door into the room, Stiles points out the very large wall of windows that could easily be crashed through.
* Teen Wolf who's extremely gifted in chemistry and can read archaic Latin.
* Teen Wolf will cut captured werewolves in half to guarantee that they won't be able to heal themselves.
* Tee Off, Mr. Bean when the eponymous character hits a golf ball into a car's tailpipe, causing it to churn and sputter for several seconds before shooting the ball out at high speed.
* Teeth, Brad likes his stepsister a little too much. She doesn't know it for most of the time and is horrified when she finds out.
* Teeth-Clenched Salute: one of the first things taught to a soldier regarding saluting is that you salute the RANK of the officer, not the officer himself. Not saluting, even when you have every reason in the world to not enjoy it, is

considered an offense against the protocol and chain of command of the army itself, beyond any disrespect that might be intended against the salutee.
* Teeth-Clenched Teamwork, are more well-established and has many of their demigods living to their old age; it's the reason why the Roman Empire managed to conquer so large an area in the time of disjointed barbarians, after all.
* Teeth-Clenched Teamwork: I don't want to team up with you, but I have no choice.
* Teeth-Clenched Teamwork if their mutual hate actually presents trouble in working together.
* Teeth-Clenched Teamwork: People grudgingly work together to achieve a goal.
* Teeth-Clenched Teamwork throughout the war, but as the war winds down they turn on each other with the events of the Purple Wedding being the spark that sets them off against each other.
* Teeth-Clenched Teamwork towards Jade, with Raythor trying to keep the tensions between them from boiling over.
* Teeth-Clenched Teamwork: Two characters hate each other despite working together.
* Teeth-Clenched Teamwork: We may be on the same side, but I hate your freakin' guts!
* Teethed Glory and Injury, is both an example of this trope and contains several more: "Twelve was Ruin", "Reflection Pulse Remains", "Scald Scar of Water" and "Found, Oval and Final" in particular.
* Teeth Of The Tiger, it's mentioned that former President Ryan had provided his new black counterterrorist organization with a stack of signed pardons before leaving office, all saying that <fill in name> is hereby pardoned of any crimes he committed from <fill in date> to <fill in date>. The legality of a preemptive pardon — especially one signed by a President who left office before the crime in question happened — would be questionable at best, and even if it wasn't, the fact that a presidential pardon can only cover violations of federal law means the documents don't provide as much legal protection as the organization thinks. And even if the pardons were valid, many of the illegal actions taken by agents of The Campus were performed in foreign countries, where a pardon from the President of the United States has zero weight — a head of state cannot pardon crimes committed against someone else's country.
* Teeth. The brother has spent most of his life with a crush on his step-sister and despises their parents for making them siblings.
* Teeth when her boyfriend tries to rape her and he winds up getting his penis ripped off, causing him to bleed to death. Then when her mother dies later on after her skeevy stepbrother heard her calling for help but instead kept having sex with his girlfriend, she takes advantage of the fact that he's been wanting to have sex with her for years to bite his penis off too. The ending implies that she takes up being a vigilante to get rid of any other predators she finds.
* "Tee työtä jolla on tarkoitus" (Have a job with an enigma).
* TeeVo" to record actions the heroes take while he's busy with something else.
* Teferi "phased it out" (transported it to the future) to prepare for the Phyrexian invasion, and when it was time for it to "phase in", it couldn't.
* Teflon (US) and Fluon (UK) for polytetrafluorethylene. Teflon is Du Pont trademark while Fluon is that of ICI. Hostaflon (Germany) is that of Hoechst.
* Teflon was invented when an organo-fluoride gas was left in a cylinder a long time and solidified by itself.
* Tegami Bachi: Letter Bee feel of the series, it can still be a bit hard to accept.
* Tegami Bachi: Letter Bee has garnered more than few double-takes for his androgynous appearance.
* Tegami Bachi: Letter Bee. He drops the attitude at the end of the arc in which he first expresses it, after recognizing that he couldn't have managed without her help.
* Tegami Bachi: Letter Bee, hours are generally referred to as "bells"; for example, the 15th bell seems to be 3:00 in the afternoon.
* Tegami Bachi: Letter Bee-infested wastelands of Amberground, as well as the only ones capable of fighting the Gaichuu. Unfortunately, since the Letter Bees are

government employees and the government is rather corrupt, people are naturally suspicious of them. This is part of the reason why Lag's aunt, Sabrina Mary, acts hostile toward Gauche despite being grateful to him for delivering her nephew. Her town relies on a illegal port to survive, so the town is wary of government employees.
* Tegami Bachi: Letter Bee, Largo, master of the Bee Hive, visits one such knowledge broker in a tobacco shop. He buys various bits of information while disguising his requests as cigarette purchases.
* Tegami Bachi: Letter Bee, Letter Bees who fire their "Heart Guns", guns that fire bullets from their "hearts", become fatigued over time and need rest and food. If they fire their entire heart, they completely lose their personality and emotions.
* Tegami Bachi: Letter Bee. Nelli hears Nello through the window, as he sobs and tells Jiggy that he's "so angry." Nello dies a week later, and Nelli assumes that he was angry with Jiggy for leaving them behind. In reality, Nello had promised Jiggy that he'd look after Nelli, and was angry about not being able to fulfill that promise.
* Tegami Bachi: Letter Bee shows a seven-year-old Lag Seeing being delivered to Cambel Litmus, establishing his goals of finding his mother and meeting Gauche again. By the end of the chapter, he's five years older, and ready to set out to become a Letter Bee.
* Tegami Bachi: Letter Bee temporarily steps down as Lag's "dingo" partner after feeling as though she failed him for drinking the "honey water" and becoming temporarily paralyzed and not of any use to him. She comes back to help him save a man from falling from a tightrope.
* Tegami Bachi: Letter Bee: The Earth's natural sun has long since expired, and so a small man-made sun was created. The capital "Akatsuki" enjoys simulated daylight. The middle-class region, "Yuusari", is in a state of perpetual twilight. In the impoverished region "Yodaka", the artificial sun is no brighter than a full moon.
* Tegami Bachi: Letter Bee, the main foes are giant armored insects(and in some cases, arachnids) known as Gaichuu. Not only can they only be defeated with a Shindan (a bullet of the heart), but that Shindan must be fired at the gaps in a Gaichuu's armor, so a Letter bee usually uses their dingo as a distraction in order to take aim at the spot. The weak spots vary from species to species, but each species of Gaichuu generally has a weakness in the same spot.
* Tegami Bachi: Letter Bee, the only way to eliminate a Gaichuu is to shoot a Shindan, or heart bullet, into the gaps in its armor. Near the end of the anime, Cabernet, the most dangerous Gaichuu shown, is able to gain a layer of armor that covers its entire body, protecting its weak spot. Niche and her sister are forced to break a hole in said armor in order to get at this weakness.
* Tegan and Nyssa cry on each other's shoulders following Adric's death at the end of "
* Tegan Nox, Welsh professional wrestler who wrestled for various independent promotions before signing up for NXT. Came out as bisexual in 2020.
* Tegel Manor (1989). One trap found in the manor is quicksand. Anyone who falls into it sinks at a rate of six inches per round (1 minute).
* Tegel Manor features the 100 (un)dead members of the Rump family, and the sole living heir who is looking for adventurers to rid him of his relatives.
* Tegmina (plural of "Tegmen") are the modified leathery front wings on an insect, which protect the hindwings when folded.
* Tegna's news graphics package and "C Clarity" theme have been derided by angry fanboys as too "hipster"-like from the day it began being rolled out.
* Tehanu into one of these. It's worth noting that in Earthsea, women in general and witches in particular are considered suspect. Wizards are celibate because they fear contamination from women, even the sympathetic characters such as Ged.
* Tehanu: Therru (good guy) was horribly burned when her natural parents threw her into a fire.
* Teh Gladiators, first when the Murlocs that join the heroes turn out to actually be female, and then when one of them, Yolanda, develops a crush on Vallant rather than vice versa.

* Teh Gladiators) of expressing his disgust/despair with his companions' idiotic antics.
* Teh Internet Is Serious Business by Tim Price, staged by the Royal Court Theatre in London, autumn 2014. It is about the "hacktivist" groups Anonymous and LulzSec.
* Tehnoobshow, who started out with a few videos about a stereotypical noob, eventually became this to
* Tehol Beddict Tehol doesn't know this at first, but when he finds out, both are happy to continue the relationship they have.
* Tehran: A couple Iranian cops are bribed to let a car's passengers go without searching them.
* Tehran: All of the Israeli and Iranian characters are played by actors of those backgrounds (even if not born there in the latter case). It goes for those of Iranian Jewish descent as well.
* Tehran: Faraz frequently threatens people's relatives who he has in custody or can get to for cooperation from them. Later he suffers this himself when his wife is kidnapped by Mossad, and then inflicts it on Tamar to get her back by kidnapping her father.
* Tehran: Iran is one, and it overshadows much of social life there, with Iranian dissidents against religious restrictions imposed upon them which the Islamic Revolutionary Guards enforce. Many of the Iranian expats make it clear it's what they hate about Iran, while loving the country itself (and the people).
* Tehran is when he's kidnapped, despite going through a whole ton of hardship during the first season.
* Tehran: It involves a female Mossad agent of Israeli-Iranian heritage to infiltrate Tehran and take out Iranian military defenses. It shows the problems of how something unexpected can potentially ruin an entire op. It also shows Mossad's cooperation with the rest of the Israeli military in conducting joint operations.
* Tehran: Kamali was seen reviewing surveillance tapes of the women's restroom and noted that the Jordanian Airline stewardess (who happens to be Zhila) uses her right hand. He finds out that the switch was made since Tamar was seen in the stewardess uniform using her left hand.
* Tehran: Mossad arranges to have one for Masoud by kidnapping Faraz's wife. However, it falls apart.
* Tehran: Mossad's operation to disable Iranian anti-aircraft defenses for a potential Israeli air strike is (likely) inspired by the Israeli Air Force's air strike operation when they bombed the incomplete Iraqi Osirak nuclear reactor in 1981.
* Tehran: Tamar dresses up as a male security guard to sneak into an electrical station in the last episode of Season 1, complete with a fake mustache.
* Teikoku Alexanders — Runningback Takeru Yamamoto (charismatic leader)
* Teitoku Kakine makes an army with his Dark Matter that looks, sounds, and acts like the Misaka Sisters and turns them on Accelerator. Accelerator, who had sworn to protect the Misaka Sisters and is eternally guilty about killing some back when he was a bad guy, falls into despair and almost lets them kill him. Mugino steps in and saves him. Drawing on her experience with the fake Frenda, she reminds Accelerator that they're just Kakine's puppets, not the actual Misaka Sisters, which restores his will to fight.
* Teito Monogatari mysticism, which became a major trope in Japanese pop culture.
* Tejano and country singer Emilio Navaira was one of the biggest names in Tejano music, but the charts never showed it: he never had a big hit on the Latin charts, and his biggest country hit, "It's Not the End of the World", only got to #27.
* Te Karere bulletin was to go to air. TV One subsequently experienced ten minutes of technical difficulties while the police were called and the protesters escorted off the set.
