* The Old Ones qualify too. In fact, they're responsible for most of the horror of 40k. They refused to help the Necrontyr who were all dying horribly from radiation that wasn't even their fault, despite the fact that such an undertaking would be quite easy for them, prompting the war and the Necrontyr becoming Necrons. Granted, the Necrontyr's
* The Old Ones were Sufficiently Advanced Aliens long before the C'tan decided to stop ignoring sentient races and start eating them. They seeded worlds with life, created safe realms within the Warp, and created the Eldar (who later ascended to this position themselves) and the Orks.
* The old Origin game Subwars 2050 was an action/simulator of submarine combat where submarines are purposely built with aerodynamic, jetfighter-like hulls for better maneuverability. Oddly in-game this doesn't play out so much as the game isn't so much a big dogfight as it's about deciding when to switch from passive to active sonar and launching guided torpedoes at the enemy from a range that's too close for them to evade from.

* The old RTS 7th Legion has much symbolism related to the Apocalypse.

* The old series does, nevertheless, go to even less common locations at times, such as Time Lord criminals hiding out in Cambridge or Amsterdam, an alien time experiment in Seville, a secret underground base where scientists create natural disasters in Australia and a mad super-computer plotting to take over the world from South Wales.
* The old series often mentioned that to take a ship you needed to capture the bridge and engineering simultaneously or else the defenders would flood the life support with anesthetic gas and knock out everyone. This is never mentioned in the films.
* The old series pioneered the trope with the Autons. While the image of the sentient shop-window dummies is famous,
* The old Soviet Union wasn't above this sort of thing either, especially early on. A lot of its early tank designs were copied exactly from models that were either legitimately bought (albeit without licensing) or smuggled piece by piece into the country; the BT-2 tanks (predecessors to the famous T-34) were improved versions of the M1928 Christie Tank. Their early jet fighters were powered by close copies of Rolls Royce engines.

* The Old Testament certainly treats Earth a lot more special—at least if you read it literally. This means that mainstream Christian denominations find it easier than those based on fundamentalism to accept the possibility of aliens. (And likewise within Judaism; Islam is a different story.)
* The Old Testament comes down pretty hard on divination in general, including necromancy, and exhorts the Israelites not to put their faith in sorcerers. However, it's because those practices are associated with alien gods (not
* The Old Testament exhibits this kind of thing as well: what most Christians call the Books of History were originally from two different sections of the Jewish Bible, the Nevi'im (which puts Joshua, Judges, Samuel and Kings alongside the books of the prophets) and the Ketuvim (which has nearly every other Old Testament book), but early Christians reordered the Ketuvim so that all the story-like books were all together and ran (roughly) in chronological order.
* The Old Testament quite a bit. (So do 7 and 12, but they also show up frequently in other works from that time...) Examples include Noah's Flood (it rained for 40 days and 40 nights), the Exodus (which lasted 40 years), and the amount of time Moses spent on Mt. Sinai (40 days and 40 nights). It also pops up in the New Testament, when Jesus fasts for 40 days and is tempted by Satan.

You have 90 minutes to complete it. If someone on the team has a stealth power and Recall (teleporting someone to your position), they can get to the door and quickly teleport everyone there. Once everyone goes through the door, then do the same thing for each of the triggers (teleporting one teammate to each). Click the

However, he decides to only take half of it and keep the other half for later. The half only heals his grave wounds and extends his life but doesn't turn him young or stop his aging. Later, he gives the other half to the protagonist's friend, who has lost a leg during the Soviet invasion of Afghanistan. The leg grows back overnight.

No one's sure why the Olmec declined, although we can assume they abandoned their urban sites because their decline, whatever caused it, meant they no longer had the resources to maintain cities.

* The Omen (1976), as part of a marketing blitz, and done by the film's screenwriter.
* The Omen (1976). Because of this movie, many people think that the name Damien means "demon." It actually means "tame," which is used in the story in the sense meaning "kill."
* The Omen (1976) has the second type: Damien intentionally runs his tricycle into the chair that his mother is standing on while she changes a second-story light fixture, it crashes to the first-story floor slightly before she does.
* The Omen (1976)) is given to the Thorn family in order to secure financial and political power and will dispose of them once it is certain that he will inherit their wealth.
* The Omen (1976), one of Hollywood's very first onscreen decapitations, when a sheet of glass is launched from a truck in front of him and shears the guy's head off in horrific fashion. It's still considered by horror buffs to be one of the best deaths ever filmed.
* The Omen (1976). The boy, Damien, is an orphan substituted for the couple's stillborn child, who died shortly after birth.
* The Omen (1976), Thorn and Jennings visit Father Brennan's small room after his death. The room is wallpapered with pages from the Holy Bible. Even the windows are covered. Several crucifixes and religious icons are on display as well.
* The Omen (1976) was sneak previewed nationwide on June 6, 1976 (the official date was June 25th). Which also happened to be a Sunday.

* The 'Om' song. In the series where Young Lister first played it, Rimmer seems to like it immensely, wanting a copy to take back with him, while the 'current' Lister admits its immense suckitude. However, in Series 8, this is reversed. Rimmer said that people who heard it "formed self-help groups." It's more likely that Rimmer was pretending to like it; by falsely encouraging (past) Lister, he was trying to annoy (present) Lister.
* The onboard video camera was recovered from the wreckage of Space Shuttle
* The Once and Future King by T.H. White, even down to wearing armbands with a red emblem, in this case of a whip.
* The Once and Future King can display spectacular power (such as causing a tree to instantly grow and bringing about a snowstorm in the middle of summer), he has some clear limits on what he can do. The only two powers to which he has continual access are insight (being able to see events going on at the present) and foresight (being able to see future events, part of this is due to Merlin's being born circa the late 20th century and living backward through time). It is stated that Merlin could not use magic to imitate the Great Arts, such as Falconry or Sculpture, as it "wouldn't be fair". Also, Merlin was "given" his magical powers for the specific purpose of helping Arthur prepare for the kingship, which is why he cannot transmute Kay into an animal like he does Arthur.
* The Once and Future King has Merlin make all kinds of references to 20th century events and culture in "The Sword in the Stone," to the point that this section is more of a satire and commentary on T. H. White's time than it is a retelling of Arthurian myth.
* The Once and Future King, he is shown doing just that when Lancelot comes to King Arthur's Court.
* The Once and Future King, his inclusion of Malory as a young squire to Arthur who is entrusted with recording the events of the story.
* The Once and Future King: In the ant colony, everything not forbidden is compulsory! It's an allegory to Communism.
* The Once and Future King is more explicit about King Arthur knowing about the affair but staying silent. There are some very good scenes with the three of them carefully not mentioning it.
* The Once and Future King its framing in this book clearly is meant to show it as assault. T. H. White suffered from an abusive mother and so really knew how to write such a character.
* The Once and Future King, King Arthur and quite a few others are this in regards to the adulterous affair between Guinevere and Lancelot. The reason for it is because everyone knows that the sentence for adultery is burning at the stake, and no one, least of all Arthur, wants to see the two killed. As a result, the affair becomes something of an open secret, with everyone refraining from pressing the matter. When Mordred and Agravaine bring the matter to Arthur, not only are their brothers angry with them for drawing attention to the issue, but Arthur says that he won't help or hinder them in their efforts to prove the adultery (though he does openly admit he hopes Lancelot will kill all their witnesses).
* The Once and Future King: Lancelot is generally depicted as handsome in Arthurian legends and almost all adaptations, including the author's source material, but in the book he's emphatically described as having an ugly, "ape-like" face.
* The Once and Future King, Mordred's scheming finally makes it impossible for Arthur to keep up the charade and he has to officially charge Lancelot and Guenevere with High Treason in the new courts, ironically set up by Arthur himself because he didn't like how trial by combat meant the person who could afford to hire the biggest, strongest fighter as a champion got to basically do whatever he wanted.
* The Once and Future King, one of the animal transformations Merlyn performs on Wart is to turn him into an ant, and he finds himself in the middle of an ant war.
* The Once and Future King perfect, almost invariably coming off as distant and self-righteous, to the point of being outright inhuman. He discomforts and annoys his fellow knights as a result, and comes off as rather less likeable than the

similarly righteous (but more human) Sir Percival.
* The Once and Future King series. Mordred argues with Arthur that their judicial system - two champions jousting, on behalf of the defendant and prosecution - was unfair since it was more of a battle of muscles. Arthur pointed out that the law allowed for each party to hire whomever they liked to be their champion and pointed out that if they switched to using lawyers, it would just be the same (each party could hire whichever lawyer they thought would best save their bacon). He finishes by pointing out that in the judicial system, whoever has the most money will most likely win.
* The Once and Future King. The daughter of the Queen of Flanders presumably also subverts this trope (after she marries King Pellinor of course), since the two are completely in love with each other and she is remembered fondly by all after her death.
* The Once and Future King. The reader is actually directed to read Mallory's version to find out the specifics of certain jousts, etc. Tom himself makes an appearance in the final pages, directed by an ancient Arthur to run away from the final battle so that he can record the Arthur's history.
* The Once and Future King, where he does all his fantastic deeds just to win Guinevere's attention. It does not end well.
* The Once and Future King, who falls in love with Arthur and becomes so obsessed with becoming the greatest knight in the world (so that Arthur will love him back) that he gives his entire childhood in the pursuit of this dream. Throughout the book, he is shown to be extremely uncomfortable in his own mind and is quite self-loathing. Guinevere mellows him out a bit, eventually.

She tells Big Boss that when the science behind genetics advance enough they will be able to isolate what genes are desirable, take those genes and not only enhance already living people but be able to clone a human being with those particular traits, and his genes will be in high demand one day. Big Boss denounces human cloning as immoral, saying that, "You can't mass-produce human beings.", and that he is sure the government

* The One I Love Is...: After spending several chapters angry and trying to not crying, Shinji asks Asuka out. In answer, she smiles, and he thinks she is gorgeous when she smiles sincerely instead of seeming mad, smug, or depressed:
* The One I Love Is... and stares at Shinji for a while, thiking of how beautiful he looks and how much she loves him.
* The One I Love Is...: Asuka and Rei had three, all of them were about Shinji and all of them happened off-screen:
* The One I Love Is...: Asuka had a crush on Kaji because he was handsome and manly. Later on, she admits that he wasn't the person that she believed that he was.
* The One I Love Is...: Asuka had a very hard time confessing openly her feelings to Shinji. And the fact of Shinji has also a very hard time with this is part of what moves the plot forward.
* The One I Love Is...: Asuka sometimes clenches and unclenches her fist, like Shinji did. She mentions it in the "Friends and Rivals" side-story:
* The One I Love Is... attacking Tokyo-3 to Shinji accidentally discovering his best friend's girlfriend is not a girl.
* The One I Love Is...: Averted with Gendo. In the final moment of his life he met Yui at last, and he confessed he knew he had done many horrible things to try to get her back, and he said he was sorry for what he had done to his son. His wife informed him that he had to earn his redemption yet in order to have her forgiveness.
* The One I Love Is...: During the Angel War Touji loses an arm and a leg. They were replaced with prosthetic limbs. They were pretty good but they did not quite looked like the real appendages, and they did not grant him enhanced physical abilities.
* The One I Love Is...: During the first half of the story, Asuka teases Shinji, incites him to kiss her, tries to sleep with him... and Shinji didn't got it until she bluntly said she loved him.
* The One I Love Is...: Even though she was competing with Rei to win Shinji over, Asuka was unable to tell him "I love you" for a long time. In the first chapters she was barely capable to admit and tell openly she liked him.
* The One I Love Is... faked his own death to throw SEELE off his trail while he worked on exposing them.
* The One I Love Is... get married in the epilogue. The whole episode covers their wedding until they go on a honeymoon.
* The One I Love Is.... In a chapter, Misato plays a DVD for Shinji. This fic was written in 1999-2000, and the author said in the afterword he guessed in 2015 there would be more advanced technology than DVD technology, but he didn't feel like making something up. As of 2015, purely digital storage is spreading, but DVDs still look like they have a few years left in them.
* The One I Love Is...: In chapter 11 Shinji has a nightmare where he relives his worst failures: first he sees Unit-00 fighting Armisael and blowing up. Then Rei appears and says that he let her die before bursting into flame. Right after Asuka shows up, accuses him from never loving her and betraying her trust, and then slits her wrist. When Shinji tries to touch her, her body erupts in a shower of blood, covering him whole. Shinji screams and then he wakes up.
* The One I Love Is...: In Chapter 1 Rei gave Shinji chocolates. In reaction, Asuka got beyond mad, yelled him and slapped him. Then she cried and ran out of the

class. And Shinji had absolutely no idea of why. Later Hikari yelled him he was a blind, thick-headed idiot and told him that Asuka loved him. Shinji was shocked because he liked Asuka but he could not believe she was interested in him.
* The One I Love Is...: In chapter 6 "Friends" Asuka tells Shinji her best friend has a huge crush on his best friend... and she has no idea of why she likes that perverted idiot:
* The One I Love Is...: In chapter 8 Shinji falls on top of Asuka and accidentally gropes her left breast:
* The One I Love Is...: In chapter 9 Shinji blurts out that he loves Asuka to her face. Then he blushes brightly.
* The One I Love Is...: In one of the side-stories Gendo admits all he has done, all lives he has ruined -including his son and daughter's- and all blood he has shed... has been for nothing, since he has failed: he has been unable to free his wife and they will never be together again.
* The One I Love Is...: In the four-years-later epilogue it is revealed that Shinji and Asuka are expecting, and Misato is raising her and Kaji's son, Ryouji.
* The One I Love Is...: In the side-story "Let the World Burn / One Dream at a Time" Gendo explains he had tried to wipe humankind out, destroyed lives — including the ones of his son and the girls he loved- - and got his hands stained with blood... because he had to free Yui. He loved her, he missed her, he blamed himself for her getting trapped inside Unit 01, and he had to set her free, not matter what.
* The One I Love Is...: In this story Kaworu Nagisa -a character is male in canon- is a girl (and gets a rename: Kaoru Nagisa).
* The One I Love Is... kissed under the shade of a tree in the middle of a wood.
* The One I Love Is... leaves Asuka in a catatonic state. When Asuka wakes up she looks around confusedly and realizes it was not a dream.
* The One I Love Is...: Many fans drew fanart and even comic pages from the story when it was at the height of its popularity. Unfortunately, it disappeared when the server crashed.
* The One I Love Is... Not wanting to hurt Rei he lies, saying he has stopped because he wants to make sure things don't go too fast.
* The One I Love Is...: Rei and Asuka start fighting over Shinji, forcing the latter girl to acknowledge and display her feelings openly. Since she has to stop pushing him away, Asuka starts being nicer and less harsh. In chapter 6 Shinji notes she is really kinder now.
* The One I Love Is...: Rei was the first female character who shows up in the story. Asuka comes along later. Shinji fell for both but in the end he chose Asuka.
* The One I Love Is...: Rei was this to Asuka. In chapter 6 Asuka said Shinji she was terrified of losing him to Rei because Rei gets better grades, is a good cook, keeps her apartment spotless, is nearly so beautiful... whereas she barely can pass the tests because she can not read all kanji, is a slob... and in her mind, she is only good at piloting Eva and she is not even the best anymore.
* The One I Love Is... she reverted to her old ways. When Asuka visited her apartment in the "Friends and Rivals" side-story she was surprised when she saw the mess because she thought Rei was tidier than her.
* The One I Love Is... she reverted to her original behaviour (although Asuka managed to make her snap out of it the second time).
* The One I Love Is... she spent fifteen years comatose, and there was not a single day Shinji did not visit her.
* The One I Love Is...: Shinji colliding with other woman and falling on top of her happens so many times it is a Running Gag. Shinji had fallen on top of Rei before the beginning of the story, he fell on top of Asuka when she was asleep and lying on her bed and he tripped and fell over Misato when he was helping her to go to her bedroom. All accidents are highly embarrassing to him.
* The One I Love Is... Shinji even mentioned she was barely in home those days.
* The One I Love Is... Shinji feels more depressed and lonelier than ever and he implies he wants to commit suicide. Misato slaps him and points out that if he dies all hurt his friends went through and all sacrifices they did will be meaningless.

* The One I Love Is... Shinji felt awful and borderline suicidal after having been forced to kill Kaoru.
* The One I Love Is...: Shinji has several talks with Asuka and Rei when he shares a bed with either of them. Asuka often opens up to him in those times.
* The One I Love Is..., Shinji is Archie, Rei is Betty and Asuka is Veronica. Rei former is homely, quiet and feminine whereas Asuka is bold, hot-tempered and sultry. And both girls want the same boy.
* The One I Love Is...: Shinji often found himself staring at Asuka and Rei, especially the former. When any of them wears a dress, when Asuka wore a swimsuit in chapter 5... he finds them very attractive.
* The One I Love Is..., Shinji remained by her side the whole time, talking to her every so often, hoping his voice reached her somehow.
* The One I Love Is... Shinji tells Kaoru those words after having a terrible nightmare.
* The One I Love Is..., Shinji woke up and found Asuka sleeping on his bed. He panicked right away, but Asuka told him shut up and go back to sleep.
* The One I Love Is..., that is the final blow and humiliation and she feels that she is worthless and she has nothing to live for. She even quotes the line verbatim:
* The One I Love Is...: When Shinji found out that his friend Touji had become a pilot because NERV promised to take care of his sister (who had been accidentally hurt during Shinji's first battle), he blamed himself for his wounds, despite Rei trying to convince him that he was not responsible:
* The One I Love Is.... When Shinji tries to help her she tells several times she does not want to be pitied and she actually hates being pitied.

The downside is: it contains the spirit of its maker, the Dark Lord Sauron (a.k.a. the Necromancer), so it will eventually corrupt anyone else who wears it, or owns it, or even sees it. Also, it's virtually indestructible, and the quest to destroy it takes about three-quarters of the plot.

* The One Who Eats Monsters: Among Ryn's various biological differences, she has six gill-like slits on her back, from which she can produce black, razor sharp fibres she calls her "kanaf", which she can control to use as armour, clothes, a weapon, camouflage, grappling hook, ect. She can even change its colour and texture, which she uses to make it appear that she is wearing human clothes. It's a little bit like an angel's wings, and a little bit like an eldritch abomination's

tentacles. The clothing made from her kanaf can be removed from her body, and worn by somebody else. However, it remains a part of her. Naomi describes it as oddly warm, and Ryn is rather embarrassed by being wrapped tightly around her entire torso.

* The One Who Eats Monsters is a gritty YA urban fantasy lesbian romance between Naomi, a Republican senator’s daughter, and Ryn, essentially an elder god in human form.
* The One Who Eats Monsters: Ryn claims that she is nothing more or less than a monster, and the only difference between her and the monsters she hunts is that she is stronger. It soon becomes clear that this isn't quite true; Ryn is the only member of her species, has no taste for innocent flesh, and the only reason she isn't considered a goddess is because the other gods found her too disruptive to civilization and banished her.
* The One Who Eats Monsters: Ryn has matte black sclerae and glowing blue irises that terrify whoever looks into her eyes, befitting a predatory primordial goddess whose inability to blend in with humans saw her branded a monster. Her aggressive behaviour leads to several characters speculating that she has a developmental disorder at best and is flat-out insane at worst.
* The One Who Eats Monsters: Ryn is an elder monster from the black places and the Long Ago, a being of wind and shadow, whose claws can kill anything that can die and a few things that cannot, and she ends up falling in love with Naomi Bradford, your average teenage girl.
* The One Who Eats Monsters: Ryn is old enough to remember when humans started using fire, and doesn't bother learning America's name since the country is too young for her to care about.
* The One Who Eats Monsters, Ryn is such an adept and precise fighter that she knows exactly what injuries she inflicts.
* The One Who Eats Monsters, so named because her entire existence is based on hunting down monsters and eating their hearts, which causes their souls to spend the rest of time burning in the fires that rage inside her body. At one point a demon freezes time as she attacks him, to try to talk her out of it. She calmly asks him what others call her. He says “The Implacable One” and promptly accepts his death.
* The One Who Eats Monsters that enhances all of that. When Naomi thinks someone wouldn't be able to sneak up on her, Ryn forces her to confront how unprepared she is by disappearing while Naomi is looking right at her, then reappearing behind her.
* The One Who Eats Monsters: The protagonist, Ryn, has fingernails so sharp that they can, quote, "Kill anything that can die, and a few things that cannot".
* The One Who Eats Monsters: There is a supernatural hit out on protagonist Ryn's love interest, Naomi, and she is very much willing to kill to protect her. Naomi, meanwhile, is less than jazzed about someone killing people to protect her.
* The One Who Eats Monsters with only minimal difficulty and destroys the weapon.
* The one who escaped without being permanently crippled so angered Nicodemus that even after Nicodemus
* The one who is biggest on revenge is Uchiha Sasuke, who is trying to avenge his family, who were killed by his brother Itachi, going to all possible extents to reach this goal.
* The One Who Made It Out: A character who managed to rise above their less-than-

stellar origins and become a success.
* the one who sold out the protagonist during the Niijima's Palace heist twist about Akechi: his treachery was so obvious that the protagonists knew about it the whole time, having caught the "pancakes" slip-up.
* The one who was Boldly Coming was G'Kar, who in the earlier seasons would have sex with anything that had compatible genitals (apparently including humans). He also slept with one of Londo's wives. Since humans and Centauri are more or less incompatible
* The One Who Wears Shoes: An anthropomorphic animal who wears shoes while others go barefoot.
* The One Who Wears Shoes, wherein a character is the only one to wear shoes in a world of barefooters (usually animals).
* the one who will attack you without thinking first". While he can often make up plans (even very good ones), he initially is only capable of thinking them up immediately before he has to do them. Of course, this is somewhat implied to be why he's a capable fighter; he makes up for his lack of raw intelligence with body instinct.
* The One With… a health inspector visiting the Krusty Krab, whom SpongeBob and Mr. Krabs become convinced is an impostor.
* The One With… as "Thomas" and "Tim" who take up space in the usual sofa the titular Friends sit on in Central Perk. They proceed to have a very eccentric discussion about their lives which leads to Joey interrupting causing Tim to realize Thomas had been sleeping with his wife. They then promptly leave and are never mentioned again.
* The One With…. Chandler then spends Thanksgiving dinner inside the box (and Matthew Perry really did stay inside the box for his scenes).
* The One With… The Birth", when Rachel jokes about a taxi charging for each contraction during labor, everyone looks at her like she made a tasteless joke. Rachel points out that Chandler does stuff like that and it is considered funny. Shortly after Chandler picks a better joke and moment where everyone laughs, reminding Rachel to pick her spots more carefully.
* The One With… The Free Porn". Joey and Chandler discover that a porn channel on their TV is unblocked, giving them free porn (a big deal pre-internet). They refuse to turn off the TV for fear that whatever glitch gave it to them will correct itself. Due to the continuous exposure, they eventually stop enjoying it and even notice some negative effects, but still hesitate to turn it off because they don't want to be "the guys who turned off free porn!" When the finally do turn it off they take a deep breath, then immediately turn it back on again to see if they still have it.
* "The One With All the Flashbacks", when pre-series Chandler comforts Monica over not having a boyfriend and tells her she'll find someone. Of course, she does find someone: him.
* The One With all the Resolutions", Ross' first attempt at a resolution is "No divorces in ‘99! *party horn*" When it's pointed out that his divorce with Emily isn't quite finalized yet, he says in the same intonation "Just the one divorce in ‘99! *same party horn*"
* The One With All the Rugby", Ross plays rugby to impress Emily, and ends up in agony.
* "The One With Chandler and Monica's Wedding" and "The One After 'I Do'". In this one, Phoebe found a positive pregnancy test and Rachel (whose test it was) allowed everyone to assume it was Monica's. Then when Phoebe learnt the truth, but Rachel still didn't want to tell anyone, she claimed
* The One With Five Steaks And An Eggplant the gang is fighting over an expensive concert, so Ross, Chandler and Monica decide to go without the rest of the group, and promptly leave the apartment... only for Monica to come back, noting that the concert isn't for another six hours.
* The one with Keira and Davenport is rather priceless for the moment where he realizes he didn't understand a significant plot point: He's stunned to find out that when the water ripples when Elizabeth faints and falls into the ocean, that

the medallion is "calling" to the Black Pearl and it's what makes it appear later.
* The One with Phoebe's Uterus good in bed, but Chandler disagrees given the noises that came from Joey's bedroom
* "The One with Phoebe's Wedding": Monica is driving Phoebe crazy while planning her and Mike's wedding. Phoebe has a problem finding somebody to walk her down the aisle as her stepdad was allowed to get short-time release from prison, but the deal is off. At the rehearsal dinner, Phoebe gets really upset with Monica for rushing her and fires her. Chandler and Ross find out that they are not part of the wedding party and complain to the bride. Phoebe finally gives Monica her job back, wanting her to be "crazy bitch lady" again. There happens to be a giant blizzard In New York, cutting off the band and the photographer. When Mike's parents (who are not very fond of Phoebe) arrive after the storm calms, Mike's dad tells him he put pills in his mom's drink so she would be more chill. The officiant is snowed in, too, so Joey offers to do it as he is still ordained from Monica and Chandler's wedding. In spite of everything, Phoebe is happy that she and Mike are finally getting married.
* "The One With Russ": Before going out with Ross, Rachel goes out for one episode with the aforementioned Russ, who looks, acts, and talks just like Ross. Amazingly, the only other character not to notice the similarity is Ross. Russ was actually portrayed by
* The One With The Angelic Face, after spending months uncertain how to react to the idea that Angela was born a man and has been in love with her basically since they met, Buffy finally realises that she returns Angela’s love just after Angela has sacrificed herself to stop the world being sucked into Hell.
* The One With The Angelic Face, Angelus considers himself this after he's separated from his human identity of Angela, transforming into a pure vampire demon without any of his old human 'quirks' to hold him back from committing greater acts of evil.
* The One With The Angelic Face) due to them both being women who fight in the darkness; Buffy muses to Willow at one point that Angela is the only thing that’s exclusively part of her ‘night life’ who doesn’t want to kill her.
* The One With The Angelic Face) on various occasions early on; after over a century and a half as a man, followed by spending the next century after the curse in isolation, Angela has literally no idea what to do when Buffy drags her along to join a ‘girl’s night’ with Willow and Cordelia, and muddles her way through Buffy’s attempts to ask her what people did for fun when ‘she’ was alive
* The One With The Angelic Face: The revelation that Angela was originally a male vampire before the curse restored her soul prompts shock from the entire Scooby Gang (aside from Jenny Calendar who already knew this); Xander in particular (having spent the last few months crushing on Angela, albeit to a lesser degree than his crush on Buffy) is unable to say anything but “You were a man?” for the next few minutes.
* The One With The Angelic Face, when Angela (the gypsy curse having given Angelus a soul and turned him into a woman) is split into the human female and male vampire selves, she moves out to find another apartment than the one Angelus knows about as there's no way to be sure if Angelus would require an invitation to get into a property that's technically inhabited by "him".
* The One with the Butt's butt double, he goes into Monica's bathroom to put lotion on his rear end in preparation for the "part". Chandler comes in with the phone in his hand:
* "The One with the Flashback" showed that when Joey first met Chandler he assured him that he was totally fine with "the gay thing". When Chandler was confused, Joey quickly backpedaled and said that he was fine with gayness in general.
* "The One With The Jellyfish" has everyone traumatized when Chandler had to pee on Monica after she got stung.
* The One With the Kips", Monica and Chandler have a fight when he decides to watch TV in the middle of a romantic night together.

* "The One With The Proposal", Chandler and Monica are out on a date. Feeling cold (considering she's wearing a thin dress), Monica asks if she can borrow Chandler's jacket. Unknown to her, he has an engagement ring hidden in the pocket but of course, can't tell her and makes up the excuse that if he gives her his jacket,
* "The One You Least Expect", John Gage gets mixed up with an abusive girlfriend who beats him and ties him to the bed as "a lesson". Roy shows up shortly after and rescues him but John has to help trap the woman because proving everything isn't easy with a small statured woman. It works, but not before he's tied up again and stabbed with a pair of scissors.
* The on-foot mechanics were widely reviled by fans and critics alike for giving players an extremely easy way to avoid bailing.
* The ongoing and largely unexplained hatred of Zoidberg on Hermes' part. It was shown on subtle occasions that Zoidberg was something of an annoying leech to him, as well as his incompetent qualities that Hermes barely tolerates the rest of the team for. Add to that his sheer lack of backbone and he's the ideal stress ball for a traditional bullying employer. In one episode, Zoidberg claims Hermes is his best friend, as he is the only one who cares enough to insult him even when he doesn't have any reason to, as opposed to the others, who only insult him only when he does something wrong.
* The ongoing conflict between the Exorcists of the Black Order and the Millennium Earl's Akuma make up a good portion of the
* The ongoing nature of this conflict is not helped that the two regions have a sizeable political divide, with many of the prominent Northern States being bastions of liberal politics and most of the former Confederate states being bastions of "conservative" (often reactionary) politics.
* the ongoing Salem witch trials. The date is important, though, for being around the beginning of the enlightenment. In the HP verse, what muggles traditionally think of as a gradual scientific rejection of the supernatural was actually caused by the WW's intentional retreat into secrecy.
* The ongoing war between the Forsaken and Pure is primarily in favor of the Pure due to their strategic prowess; the Forsaken hold themselves back to try and remain loyal to their oath to Luna, where the Pure have been doing anything possible to achieve victory. It's been working too. The Pure now outnumber the Forsaken 3-to-1, and control large swathes of the United States.
* Theon Greyjoy—although they never interact in-series, he remarks several times that he'd hoped to marry his foster sister Sansa Stark, even though he knew it would never happen.
* Theon Greyjoy and Ramsay Bolton, nee Snow, although a little older, are no slouches in that department either, although Theon gets his comeuppance and then some.
* Theon Greyjoy (before his torture by Ramsay and becoming "Reek"). In the books, Theon is tall, dark-haired and attractive, and a famed
* Theon Greyjoy by flaying the skin from some of his fingers before cutting them off.
* Theon Greyjoy executes Rodrik Cassel in order to "pay the iron price" for Winterfell as he helped lead Greyjoy forces in taking it. He didn't want to execute Rodrik, but was pressured into it by his own men. This being said, he honors his time as Ned Stark's ward (read, hostage, as he was kept by Ned to make sure his father Balon Greyjoy stayed in line after his attempted rebellion) by choosing to execute Rodrik himself, though to symbolize his conflicted feelings, he botches the execution quite badly.
* Theon Greyjoy gets horribly tortured until he forgets who he really is and thinks he's just a servant named Reek. He eventually manages to regain his identity. One day, he prays, and in response hears a voice whisper his real name, cheering him up greatly and he casts aside the Reek identity permanently.
* Theon Greyjoy has this best demonstrated when he manages the daring feat of capturing the fortress of Winterfell with only a handful of men, showing off his skills as a raider and low-level tactician. Once he's in command of Winterfell and and in a position to make major strategic decisions, he proceeds to immediately

start bungling. The smart thing to do would be to kill some prisoners, grab everything his men can carry, set fire to the place, and make a run for it, but Theon has the wild idea to try and
* Theon Greyjoy's lot in life. As the hostage/ward to keep his father in line the guy is seen by both as a stain that they can't get rid off. Tellingly taking Winterfell, the seat of power for the Starks, gets him absolutely no respect from either side and captured for years long torture.
* Theon Greyjoy's memory of his brothers Rodrik and Maron are chiefly of "Rodrik's drucken cuff and Maron's cruel japes". It seems to run in the Greyjoy family. Theon's uncle Aeron still has nightmares about his older brother Euron Crow's Eye.
* Theon Greyjoy takes Winterfell with a tiny force thanks to a feint and holds it for a while in Season 2. After Ramsay takes Moat Caitlin, the Boltons and their forces take up residence at the end of Season 4.
* Theon Greyjoy. When the city falls, the blame is placed on Euron sabotaging the gates in revenge for Cersei snubbing him.
* Theon has one in "The Ghost of Harrenhal" when he considers that attacking Torrhen Square would draw out the garrison of Winterfell.
* The Onion about the legalization, having overlooked the three clues that it was a satire:
* The Onion a comparison or compliment too highbrow considering the product on screen).
* The Onion African Americans were thought to be unable to compete at sports in before Jackie Robinson, now in the United States, it is assumed that African Americans are better at sports than others.
* The Onion, "a mischievous, homicidal imp who kills McDonaldland characters and takes their sandwiches."
* The Onion are the embodiment of this trope, their satirical articles often being mistaken for real ones, while real extremist articles are often suspected of being Onion articles.
* The Onion article, an ad agency finds out the hard way that the slogans "Merit—Makin' You Feel All Small 'n' Flaccid" and "Merit—Love That Limply Dangling Taste" do not encourage 35- to 50-year-old males to buy cigarettes. In the wake of this marketing failure, the agency prepares to roll out its campaign to sell tampons with slogans like "Tampax—For Those Awkward Bleeding-From-Your-Crotch Days."
* The Onion article before pulling it minutes later due to the massive wildfires around California at that time, which had already claimed lives.
* The Onion as the most realistic war simulator ever. Over 17,000 hours of gameplay, much of it spent in pointless debates over whether Shakira is hotter than Jessica Biel, standing on guard, and fixing vehicles for 10 hours a day! Gamers clearly want realism, so now you can truly live the life of an Army private!

* The Onion" deals with using this trope to your advantage. Naturally, the whole thing was taking place in the mind of the interviewee; she wasn't actually invited to go on the show.
* The Onion depicts a Kafkaesque airport that's completely unserviceable. Features of the airport include rude workers, a confusing gate system and frequently delayed flights.
* The Onion did a similar piece, with a VT report about legalizing weed featuring more and more strained puns, with the studio anchor responding with a much straighter- yes slightly punny- comment, which goes straight over the head over the reporter.
* The Onion did it with pictures. The front cover of the February 21, 2011 issue shows a picture of Blake Griffin jumping over a car with the headline "Car Blake Griffin Dunked Over Vows Revenge". Cut to the March 21, 2011 issue which has the cover showing a picture of Blake Griffin run over by a car with the headline "Car Blake Griffin Dunked Over Exacts Bloody Revenge".
* The Onion for August 15th, 1954 put it: "Let's Work Together to Pretend Our War-Time Homosexual Experiences Never Happened".
* The Onion has a regular feature called "American Voices" that is a parody of this trope. Part of the joke is that it always has the same group of pictures of supposedly-average Americans.
* The Onion has taken it to the other un-fun extreme with a game that consists of nothing but shooting people in the face, point blank, with no strategy or challenge whatsoever.
* The Onion have one strip bashing internet-loving teens because "computers don't have Matlock".
* The Onion headline: "Wedding Ring Mistakenly Left Inside Prostitute."
* The Onion. Hospital staff are very happy at the great diversity of the kidneys (which were thrown all together in a big sack through the hospital doors), and are very hopeful to get more since the message attached was "This Is Only The Beginning".

* Theon is also this among his birth family, the Greyjoys, as he was raised in a different culture (specifically, under the roof of a hated man who executed/murdered his much more preferred older brothers), though his sister loves him. Interestingly, given that Theon is the only member of his Viking clan who (as an adult, at least) has any real problem with rape and pillage-related murder, he's simultaneously the black sheep and the white sheep.
* Theon is kept as a ward/hostage at Winterfell for a decade to prevent his father Balon from rebelling against the Iron Throne again. This is a completely acceptable part of Westerosi society.
* Theon is trying his damnedest to be this. He also assumes that his men, being proud Ironborn warriors, would willingly brave certain death to go out in a blaze of brutal glory.
* The Onkies have no faces, but can see and eat just fine, and their heads may also fall from their bodies, but their bodies can simply pick them up and put them back again. * The only branch of the United States military that does not train their own medics is the Marine Corps; instead, they are assigned Navy Hospital Corpsmen, who are referred to as "Doc" and given great respect. This is because, in addition to their Field Medical Training classes, they are required to pass all aspects of the Marine Physical Fitness test. In other words, they have to be able to run 3 miles in less than half an hour, perform at least 50 sit-ups in two minutes, know how to fire and service a rifle, all while learning how to save a Marine's life. Is it any wonder that the rating of Hospital Corpsman is the most decorated in the US Navy?
* The only canon characters to be referenced by their names are Stan, Ford, Fiddleford, Tate and Bill.
* The only canonical time when Goku denied his birth name was when he learned from his heritage from Raditz, his older brother he never heard about, and he's absolutely terrified and disgusted by the viciousness of the Saiyan race he might have been belonging to. It's natural for Goku to reject his heritage at that point, since he didn't want anything to do with it. The non-canon movies, particularly movie 3 and movie 4 brought this up again, where Goku claimed to be an Earthling rather than a Saiyan and he kept telling Tullece that his name is Goku, not Kakarot.
* The only 'Chally' to ever be destroyed was in a blue-on-blue accident. The Hi-Explosive round from another Challenger 2 detonated in the turret after being deflected by an open crew hatch. The shell unfortunately killed two crew members who were outside the tank at the time, throwing them from the vehicle and left hot shards setting a fire inside it. Eventually, this fire reached and detonated the ammunition in the turret bins. (Hard to put out a fire in the middle of a warzone in time when half the crew is gone and the others injured) Despite the resulting explosion, the hull, aside from fire damage, was for the most part fine.
* The only characters who react realistically to break-ups are Monica and Chandler, as the fallout from their various breakups last several episodes. (Both characters seemed to be more romantically vulnerable than the others, though that made them more sympathetic rather than needy). Otherwise characters would shrug it off and be fine by the end of the episode.
* The only character to appear in every episode is Cricket; Bill and Gramma tend to be absent. Gramma was absent from "Gargoyle Gals"/"Supermarket Scandal", while neither she nor Bill appeared in "Ding Dongers"/"Animation Abomination", aside from caricatures of their voice actors in the latter and a brief non-speaking role in the former. * The only exception is the first game's Yawn, who poisons the player normally instead.
* The only exceptions being the Nidoran-line and Volbeat/Illumise, where male and female are regarded as different species, but the female can produce offspring of the male species, even if her male is of a different species.
* The only exceptions to this as of Season 3 are in the Season 3 finale "Deus Ex Machina" and its precursor "A House Divided" where we are shown the
* The only exceptions to this rule are the Scyphozoa (which use memory-draining or mind-controlling tentacles), Sharks (which shoot torpedoes in the Digital Sea), the Kalamar (which uses a drill) and the Kolossus (which can sufficiently destroy anything just by walking over it or slashing with its arm-blade).
* The only exception to the badassery is the mom, Sarah, who, while she might not be a powerful mage, still manages to pull off some moments of awesomeness herself.
* The only exception to the rule are the parents—and even then, sometimes only because of the chance of her male accomplices being the real pedophiles and the chance of human trafficking.
* The only exception was in Jesus' birth, where two of the guards are planning to kill the newborn king, but Chris prevents them.
* The only exception would be Protectorate of Grayson, which still uses standard Gregorian Calendar as their method of timekeeping, despite it having a little resemblance to the local orbital parameters, so they had to invent an imaginative way to cope with this problem. But then, their stubbornness is legendary.
* The only excuse they have is these are not "real" dinosaurs. The creatures in the park(s) are spliced animals as they have dinosaur DNA with other parts put in

to fill the blanks, such as a species of frog that changes sex when there isn't enough breading partners. The Indominus Rex can't even be called a "dinosaur" because it's a freakish mix of several dinosaurs and modern animals to create the most fearsome (and deadliest) creature in the park.

* The only time we see Lord Renly Baratheon garbed in something other than House Baratheon black in Season 1 is at the Tourney of the Hand. He covers himself with a green brocade cloak (green is one of the colours of House Tyrell) when he watches his boyfriend Ser Loras Tyrell joust to subtly display his affection and support for the man he loves. Renly is essentially copying the Westerosi wedding practice of the bride being draped in a cloak featuring the colours of her husband's sigil, so his richly decorative green cape is a symbol of his commitment to Loras.
* The only time where Rex Velvet's video unmistakably "blinks" from being a professed villain is when the camera changes focus as he awkwardly coughs in his closing evil laugh.
* The only trait Cersei inherited from her Lord father and her brothers didn't. Never satisfied with her station in life, she is by far the most power-hungry of the Lannister siblings, always equating power with victory, no matter the cost.

* The only under-50 tour majors Greg Norman won were two Open Championships, contested in Great Britain. He was a long-time contender on American soil majors (The Masters, US Open, PGA Championship) but either through his own bad play or miracle shots from other players, he's had an 0-for in those three tournaments. Norman was ranked #1
* The only verified, permanent cure for a Cursed Spring curse is to bathe in the water of your original form; so Shampoo would need to bathe in the water of Spring of Drowned Girl (which ironically gave Ranma his curse to begin with). Every other main cursed character would need to bathe in water from Spring of Drowned Man. However,
* The only villain in the Batman universe that actually deserves the title of "villain" is the Joker. The Joker has no credible backstory, no clear motivation,

and no reason in his decision making. He is the complete embodiment of pure insanity, which is actually way worse than the embodiment of fear/evil like Freddy. The main difference is, evil is predictable. People who are evil have clear motivations and will stop at nothing to carry them out, no matter who or what has to suffer for it. Fear can easily be overcome by a willing victim, but insanity is a whole different story. There is no predictable pattern when it comes to insanity, and sometimes not even a motivation. Insanity can sometimes be treated, but it can never be fully cured or even completely understood. This is how the Joker is able to turn the tide against Freddy. With absolutely nothing to exploit from the Joker, Freddy's power of fear and evil is rendered completely useless against the Joker's chaotic, twisted mind.

* The opening ceremony of the Athens 2004 Summer Olympics featured blipverts projected on very large screens positioned in the center of the arena. The blipverts featured images of different human faces and human emotions (including screams of fear and pain) and were arguably pretty unsettling, forming a jarring contrast with the remainder of the ceremony.
* The opening ceremony of the London 2012 Olympic Games featured the transformation of green fields into smoking industry and the founding of the olympic rings in (simulated) molten steel.
* The opening chapter has Chief Brown bringing a case home to dinner which his son is able to solve.
* The opening chord to the Beatles' "A Hard Day's Night" can be shocking to those who aren't expecting it.
* The opening cinematic has the ambulance have a tow truck crash into it, and the patient's head gets knocked off into the road. The ambulance driver just picks up the head, chucks it into the back of the ambulance, and gets back behind the wheel.
* The opening credits are of the same playground, as the whole thing burns in nuclear fire. Coupled with the music, the effect is powerful.
* The opening credits for each episode flash the names of speculative "fringe technologies" (like "psychokinesis, teleportation, nanotechnology"). In one episode set a generation in the future, the fringe technologies include "dual maternity, chaos structure, clonal transplantation, water, biosuspension, hope".
* The opening credits have her stealing a Chinese stone lion, the Sphinx, and the

Statue of Liberty in rapid succession.
* The opening credits montage also has a glimpse of text concerning some guy who thinks the cover-up of Godzilla's existence in
* The opening credits of most syndicated episodes are also cut down, usually deleting Lisa's sax solo and Bart's chalkboard punishment gag and skateboarding through town the cutting straight to the "couch gag" (in most syndicated episodes, the couch gag used is the one from season five's "Rosebud"
* The opening credits play out over a bizarre, dialogue-free sequence in which the bride and groom, Gerry and Tom, seem to be in two contradictory situations at once. We later learn that Gerry and Tom are both one of a pair of identical twins, and Gerry's sister was engaged to Tom's brother. However, Gerry also loved Tom's brother and decided to take her sister's place at the altar... not knowing that Tom had taken his brother's place at the altar so he could marry Gerry's sister. So even though Gerry and Tom weren't initially in love with each other, they both settle for the siblings of the people they really loved.

* The opening mission has the Saints robbing a bank vault. When their Plan A doesn't work, they activate Plan B - blowing up the upper floors of the bank, then

having a helicopter with a crane attachment lift the entire vault out of the wreckage.
* The opening mocks viewers for going to the cinema to watch cartoons when they could watch them for free on television at home. Also, as in the TV show, for the opening title a choir sings "The Simpsons...", but this time Professor Frink adds "movie...on the big screen!". For the DVD release, Frink introduces the DVD menu in the same way, except that he says "small screen" , but he still says "big screen" in the movie itself.

* The opening title sequence has Jackie doing battle at most every major landmark in the world, interspaced with the live action Jackie Chan.
* The opening to "Arthur the Unfunny" depicts Arthur as a stand-up comedian. He

tries to tell a joke, but messes up telling it and walks away in disappointment after he accidentally gives away the punchline. The conflict of the episode is that Arthur isn't very good at telling jokes even though he and his friends are preparing to do a clown act, but he finds a different way to be funny by playing the piano in a silly manner.
* The opening to "Homer's Paternity Coot" starts has Marge protesting the installation of a toll booth on a road she drives down every day.
* The opening to the episode "Kenny Dies" contains multiple ones in sequence.

* The open-source XD Pascal Compiler, had a section where, in compiling a programm it had to determine how much memory to use for a variable, e.g. 1 byte for a character, 4 bytes for an integer, etc. So, to determine the size needed, the compiler uses an internal function to ask for the size of the variable. But when the sizeof function is being compiled it uses that very function to determine the size. So for the SIZEOF function to determine the size of a character, it uses SIZEOF(CHAR), for integer, SIZEOF(INTEGER), etc.

Fortunately for Ray Liotta's character we got a guy who's got everything we need. All we have to do is go into this bar full of pool playing mooks and ask the bartender if we can talk to him. Of course, our guy does business in the back, but the mooks need to beat up/rob his customers. Luckily for us in addition to wads of cash, we brought a 12-pack of whippass. Do you think our guy (or the bartender) might have stepped up to break up the fight and therefore protect some paying customers? No. He just waits until we bust up the place (and a few heads) then calmly takes us out back and sells us the weapons.

* The Operatives hate Lucy, and they pilot the vector craft to attack the facility and kill any and all Diclonii, and retrieve the cure to the disease, which has just been used to infect everyone in the world. They still have no problems with lying and shooting unarmed people as long as they complete their task.
* the Operatives required years of preparation, their acts of sabotage included the use of tacnukes, bioweapons, thermobaric attack on city infrastructure, sabotaging arcologies, and nerve gas, and there were very few Operatives who survived the massive Earth-wide manhunt for them after their attack and that being aided by good fortune bordering on divine providence. It also helps the commando tactics were

backed up by a conventional attack afterwards.
* The operator errors were exacerbated by several design features that were clearly less then ideal. For example, the control rods were poorly designed — in an emergency reactor shutdown or "scram", the control rods are dropped "en masse" to block neutron emissions and shut down the chain reaction. Because Chernobyl's control rods had graphite tips (the same material used to moderate the reaction in the first place), the scram caused a sudden power flare before damping the reaction. It's something of a crapshoot either way.
* The opposing power bloc, the CORE, loves cybernetics. Some would say because they're too cheap to build their own soldiers from scratch so they're experts at patching up the troops they have. * The opposite happened with reactions on La:Sadie's disbanding when almost every time Kisaki was solemnly blamed. Most typical reason is "the band wanted to go major while Kisaki wanted to stay indies". Which doesn't make sense because Kisaki was never against becoming major and his later activities kind of prove it. Every band he's been involved ever since was significantly more major than the previous one. Up the last band Phantasmagoria which was a living definition of majorism and him founding his own major record company Undercode Productions. Now he said he's retiring to focus on producing (producing = promoting various indies band to majors; Undercode had done dozen of these already). So the more legit reasons are Kaoru's lead persona and the fact that the band met Toshiya from D+ L on a joint concert and liked him so much, that they "stole" him.

* The opposite is a problem for Damon: He killed the only human in his house, so now hostile vampires can come and go whenever they please. He doesn't even bother locking the door anymore.
* The opposite occured as well a season earlier. Rattrap was pretending to have betrayed the Maximals for the Predacons, and Megatron demanded he shoot Dinobot as proof of his loyalty. He didn't.
* The opposite occurs in another episode where Michael goes out of town for a while and puts the secretary in charge of producing, expecting her to do badly. But she ends up being better at the job, and picks guests that Dick wants on the show. The station considers replacing Michael with her, but decides to let Dick decide which one he'd rather have as producer. He also actually pays attention to what Penny wants, even if he doesn't care that much about it, and they seem to enjoy each other's company. Hell, he opens a homeless shelter for her, in comparison to Doctor Horrible, who actively dismisses the idea of trying something like that. As crude as he could be, he does very little to deserve the derision he's given.

Just one problem: ownership of the car also meant a sizable spike in the recipients' income, meaning they wound up with a $6,000 tax hike, and with much of the audience for the episode specifically chosen because they badly needed a car, they were naturally in no position to pay it, meaning many of the cars ended up being sold just to cover their own cost. The disaster almost certainly played at least some part in the death of Pontiac, something its Aztek was already in the process of doing. Oprah learned her lesson, and the numerous similar promotions she's done since have also included a check to cover the taxes.

* The optional dungeon inside Zone Eater's belly in the World of Ruin, one room has a collapsing ceiling which you must move to an open gap or you'll be crushed.
* The optional Memoria boss Hades has a lot of eye imagery on his design - which resembles the motifs found in Terra and Memoria. This is left over from when Hades was planned to be the final boss, but he was replaced with Necron late in development.
* The optional Pumpkin and Frost Moons both have at least two bosses that have a higher chance of dropping good weapons the more waves the player fights through. Their most dangerous bosses are the Pumpking and the Ice Queen, respectively, which by themselves already have stats on par with the regular Hardmode bosses, but later waves have the payer fighting multiples of them at once.
* The optional tutorial level features no enemies, and the only NPCs whatsoever are shopkeepers who cannot come out from behind their counters even if provoked. Therefore, the only ways to die in the tutorial are by repeatedly running into walls or floor traps, summoning a monster (via a hidden spell that a new player might not even know about, and which has a very low success rate), or using a potion or cheat to go behind the shop counters. Should the player still find a way to drop their health to 0 in the tutorial level, the game will instead reset the health meter and display the message "Normally, you would have just DIED, dropped your pouch, and gone to hell."

* The "Oracle problem" in automated software testing. It can be very beneficial to write a program to test another program, but this requires the testing program to be able to identify if the program under test is working correctly. The problem is that this can't be done by generating the correct solution, because if you had a reliable program that could do that, you would be using it to solve the actual problem and would have already tested it. For example, to test if a GPS system is correctly producing routes; a testing program can easily verify that the route reaches the intended destination, but to check that it is the shortest it would have to be able to calculate the shortest route to compare to. So you need a working program to calculate the shortest route, in order to test that your program to calculate the shortest route is working. These therefore have to be tested by hand or with pre-established data.
* The Oracles are implied to be at least human-shaped from the fact that they wear typical hooded sweatshirts, pants, and shoes, and have eyes in roughly the region of the face where they should be. They speak in raspy voices, and don't experience time the way the rest of us do. Their nature aside from their clothing is anybody's guess.
* The Oracle's true motives have never been made clear. She was introduced at the end of the War of the Obelisk as a seemingly benevolent ancient spirit. However, her actions are rather questionable. All she has done so far is to involve the six factions who originally fought for the right to open the Obelisk in perpetual battles simply for her amusement. She grants boons to the winning faction that last for one week, until it's time for yet another battle. It seems doubtful that a spirit who delights in watching frequent violence (and has multiple groups of powerful Neopians under her spell, constantly striving to gain her favour) could really mean well.

* The Orangey Tangs were mascots for McVitie's Jaffa Cakes from 1997 to 2001. They were orange fuzz balls who stole Jaffa Cakes for their orange filling. Of the

initial five, only one (Zsa Zsa - pronounced "Zah Zah") was female. Even when other Tangs were added, they were all male.
* The Orangina drink had an unfortunate habit of separating out into two unappealing-looking layers. Hence its advertising slogan "Shake the bottle, wake the drink".
* The, or at least old enough to have learned what was there before the universe came to be.
* The "orb" formation did remain in their arsenal later on. The Roman legions would form a tightly-clustered round formation, with their shields on the outside, spears poking through the gaps, and perhaps a few soldiers with bows in the middle. This formation was a very useful weapon against light cavalry, so much so that it stayed in the British Army's book during the Napoleonic Wars.
* The Orbinaut is another staple enemy, a hovering round sphere surrounded by four spiked spheres. There have since been fire and ice variants.
* the ORB is useless, because instead of killing Lloyd Venture to prevent its use, his bodyguard Sandow broke it instead. In the commentary for the scene where this is finally revealed, Jackson Publick and Doc Hammer took great joy in answering the questions in such a way.

* The Orbital Sciences Pegasus, thus far the only Air-Launch-To-Orbit (ALTO) launch system to reach commercial operation, is an expendable launch-vehicle with wings launched from the underbelly of a modified B-52 bomber.
* The Orbiting Human Circus (of the Air) alumnus Julian Koster, who came out as "not straight" in the end-of-season Q&A.
* The Orbiting Human Circus (of the Air) describing Julian having managed to get backstage by holing up in a heating duct, preparing to sneak into the eponymous radio show's ballroom studio for the third time in a week.
* The Orbiting Human Circus (of the Air)" Romica the Singing Saw appears to be the Circus' blatant in-show promotion of its sponsor, Samuel Saws, who are reaping the benefits of the Circus' popularity.
* The Orbiting Human Circus (of the Air) that broadcasts from the Eiffel Tower where he works.
* The Orbiting Human Circus (of the Air) the eponymous radio show's format includes musical numbers by bizarre animals and inanimate objects, novelty acts, and prerecorded spoken "true story" segments as closing "feature presentations."
* The Orb. Not only do both bands have similar names and play similar styles of music, but early on in The Orb's career, they remixed songs and referred to them as the "Orbital Mix." They have since stopped doing this to try to minimize confusion, but it's still confusing when one realizes a majority of "Orbital mixes" have nothing to do with the group named Orbital.
* the Orb of Aldur. No army has ever so much as breached the outer walls... but the defenses have, on many occasions, proved less than formidable against trickery and infiltration.

* The "Orchid Thing" from Gummidgy—a planet where virtually all the native flora and fauna is as likely to try to attack and/or eat you. "Domesticated" ones can be used as decorative houseplants—as long as nobody sticks their fingers too close.
* The Orcs actually retain a lot of parallels to the Mongols/generally the Russian Steppe. The history of Ogrimmar is quite similar to the history of Karakoram: and their concept of honor is not dissimilar to that of the Mongols. Also, they have

shamans who are greatly respected in their culture. Also, prior to settling on Azeroth they were nomads.
* The orcs are called "blackpelts" and the goblins "redpelts", and have "smoothskins" for humans.
* The orcs, bred from elves and/or Men, are apparently among the most hideous things alive (Morgoth probably made them deliberately ugly, to mock Eru).
* The orcs' final mission By Demons Be Driven provides another subversion. The player's goal is to capture Grom Hellscream with a Soul Gem. Trying to beat him normally is impossible because everytime he's killed he will revive instantly with full health and mana.
* The Orc Shaman Wurrzag ud ura Zahubu wears a very large wooden witch-doctor mask as a symbol of office (and because it shoots green fire out of the eyes!)
* The Orcs have Rogue Idols, gigantic stone warriors animated by the power of Gork or Mork.
* The Orcs have two gods (Gork, the god of cunning brutality and Mork, the god of brutal cunning. Or possibly the other way around. Wars have been started by Orcs arguing which is which), but that hardly counts as a pantheon (a couple of other gods, such as Bork and Khalekk have been mentioned in the older background, but they probably aren't canon anymore).
* The orcs in Peter Jackson's Middle-Earth trilogies are all hideous, but at least two stand out more than the rest.
* The Orcs of Thar contains rules for interbreeding of humanoids. 2/3rds of offsprings from such breeding are the same as one of the parents, while the last are considered hybrids. Ability scores, appearance and other racial features are randomly determined among the two parents (although 2/3rds are generally the same species as one of the parents)
* The orcs refer to the dwarfs as "stunties", to the elves as "skinnies" and "pointies", to humans as "humies", to lizardmen as "scalies" and to the undead as "bonies".
* The orcs were given heroic qualities that only started appearing in the second game. Orgrim Doomhammer was also changed from chieftain of the Blackrock Clan to advisor to the Frostwolf Clan, giving him a closer relationship to the orc protagonist Durotan.
* The orcs who decide to worship Banjo the Clown decide to sacrifice Lien to him. It's the current page image for

* the Order of Maesters is trying to destroy magic in favor of science.
* The Order of Mata Nui has been known to do this as well; for example, they are known to have experimented on Ehlek's race, but just what they did to them is unknown.
* The Order of Melkizedek: Sonya's house is in a spanking-new Makati planned subdivision, either for the Nouveau Riche upper classes or the aspirational middle classes. It's modelled on a very American, midcentury-modernist style, with a wide-open lawn, flat-roofed profile, wide property footprint and low fence. Adela, too, lives with her husband Santiago in a similar suburban-style house.
* The Order of Saint Thomas. They're both the best knights and some of the best sorcerers Alba has, and they're so good at fighting, people accompanying them sometimes don't even realize that a battle has just taken place.

* The Order of the Blackened Denarius who has spent the last 2000 years besting the best of God's followers, being a partner to one of the Fallen and not one of their servants, and generally never losing control of any situtation he's in has given him plenty of reasons to think he is the best. * The Order of the Occult Hand. Ominous-sounding. But it's just a group of American journalists whose secret plan is to get the phrase "It was as if an occult hand had..." in printed news stories. Joseph Flanders, a police reporter, had used the phrase in 1965 in a routine story about a family shooting. His colleagues liked it so much they started to slip it into their own stories. When the paper they all worked for went under, they went onto spread the Order to the publications they worked for afterwards. Supposedly there is another phrase that journalists use like this, though the original Order has had a resurgence in 2020.
* The Order of the Phoenix, a resistance group that fights Voldemort. Both the past Order (which disbanded before the beginning of the series) and the present incarnation are alluded to having many off-screen adventures that we never hear about. The past Order in particular could easily have its own book series.

* the Order of the Radiant Heart very pleased with Drows no matter what, that's the only race that could make him attack an allied one without too much provocation.)
* The Order of the Scribble. He has had only three lines and three appearances within the story. However, his death contributed to The Order of the Scribble falling apart, and the making of the Gates.
* The Order of the Stick, 4e Haley explains to 4e Elan, that she used her Knockout on 3e Durkon by stabbing him in the foot. She had "used the power of abandoned verisimilitude" — and she and Elan are surrounded by flying pigs.
* The Order of the Stick #770 when a prisoner in the Empire of Blood says about having been captured after escaping:
* The Order of the Stick #921, though in a bit of a misleading way: Vaarsuvius' familiar refers to pteranodons as "clade brothers". While pteranodons are not the precursors of modern birds, they do share the clade Archosaura. But then, in cladistics, almost any two organisms can be part of the same clade if you go back far enough. Lions and Tigers are part of the clade Felidae; dogs and cats Carnivora; cats and monkeys Mammalia; and so on.
* The Order of the Stick abilities, and humans having such a wild array of abilities confuses the hell out of her.
* The Order of the Stick about her that Thor felt the need to reassure her about, although since he went out of his way to keep the details private it could be anything. Along with some other details (like her mum passive aggressively showing her her baby pictures before she sets off, and the way she responds to the phrase "preach it sister!") has caused a lot of readers to interpret her as a trans woman (despite the author saying he'd rather avoid writing a trans character due to not knowing how to do so properly).
* The Order of the Stick about it, too), since he has a high opinion of his fighting skills. To tell the truth, he's been right thus far.
* The Order of the Stick about this given to Haley regarding Xykon's imminent attack on Azure City.
* The Order of the Stick. After beating his nemesis, Miko, unconscious, he realizes that the battle is over, leaving him with nothing to do. So, he wakes her up just to continue the fight.
* The Order of the Stick after one too many "And the problem with that would be...?" replies to her reasons why elves can't be allowed to be inherently superior to the other races.
* The Order of the Stick, after Roy's heartfelt afterlife confession to his dead little brother, the brother's reaction was:
* The Order of the Stick airship happens to have a sizable rat population, since when a vampire uses his "Children of the Night" power inside, it summons a swarm of rodents big enough to overwhelm the Order's animal companions.
* The Order of the Stick, a large desert scorpion threatens Belkar's pet cat Mr. Fluffy. Belkar kills it and roasts it over a campfire.
* The Order of the Stick, a living rift in the fabric of reality, is assuredly gone.
* The Order of the Stick, although personally he's more of a banjo fan.
* The Order of the Stick, although they do worship the Mesopotamian gods.
* The Order of the Stick), and, after a "Great cleave!" attack is used overly much, snickering about great cleavage.
* The Order of the Stick, and also resents Durkon for making him feel guilty, and also is in denial about the whole thing), Minrah says he obviously has complicated feelings about it. Belkar retorts that he doesn't, and if he stabs something in the face, they'll go away.
* The Order of the Stick and Durkon die at various points. In both cases it's later subverted when they are eventually resurrected, but the keyword is "eventually"

— their deaths cause major hardships for the party for a not-inconsiderable amount of time before they can be reversed.
* The Order of the Stick and Elan is just too happy to be with his father to notice, this trope is played straight within small sections of the empire. For example, Elan plays in a child's ball pit, only for the comic's wide angled shot shows that there are several skeletons at the bottom.
* The Order of the Stick and fatally poisons Therkla. Doubly painful in that Elan was never going to reciprocate Therkla's love.
* The Order of the Stick, and flirtation with permanent alignment shifting (to EVIL).
* The Order of the Stick (and he can't just repeat the same line if he's used it before).
* The Order of the Stick and he's stuck without a replacement because they sold the other magic swords they found in the dungeon. While in the forest, Roy is forced to use a non-magical greatclub due to lack of alternatives, complaining that "swords don't grow on trees". Naturally, the last panel of the page shows the group narrowly missing an encounter with "the world famous sword-growing tree".
* The Order of the Stick and is now trying to do good just for its own sake (in part because of Elan's influence on her).
* The Order of the Stick (and Rule, for that matter) Savvy, but Elan's a bard and seems to feel that invoking tropes is part of his job.
* The Order of the Stick and she explains that he insisted because it was dénouement.
* The Order of the Stick, and she mentions once that "every follower" grew up writing his name with hearts around it in her notebook.
* The Order of the Stick, and so on), the main cast's wardrobe has been exactly the same since the comics inception. The only major (and permanent changes) are:
* The Order of the Stick, and tells her to take action on the situation. This kicks the rogue into action.
* The Order of the Stick, and they track down Nale, culminating in them jumping though that window.
* The Order of the Stick, and worse, he immediately forgets even that the question was poorly worded, due to a memory spell in the oracle's home which erases all memories about the visit except one's question and the answer (including knowledge about the memory spell).
* The Order of the Stick and would just vallidate his opinion that he's the main villain).
* The Order of the Stick. (An old guy on a porch holds a sign reading "Cryptic ramblings from an old man".)
* The Order of the Stick a paladin to coerce Haley Starshine out of hiding, by warning her that if Haley doesn't show herself, she's going to command him to play "Pattycake". With a wight, a type of undead which drains energy by touch.
* The Order of the Stick a rare and precious treasure: a public washroom.
* The Order of the Stick are paladins serving the ruler of Azure City.
* The Order of the Stick) are said in-universe to be attractive, it's natural to draw them as such.
* The Order of the Stick), are supposed to sacrifice via exsanguination, so that Nergal gets deaths in his honor and the vampires get blood to feed their own hungers.
* The Order of the Stick as a small, fun side project to draw traffic to his website, which was mostly dedicated to game design articles. However, it quickly eclipsed his other writing and became the main feature of the website.
* The Order of the Stick). As a variant, the tree doesn't send him flying, but instead unbends even further and smacks the dwarf into the ground on the other side. And then his own hammer falls on him.
* The Order of the Stick at a dramatically appropriate moment. Even the monster himself does not know what he is.
* The Order of the Stick. At DM's discretion, you can substitute another small harmless creature, but the spell is more limited (and temporary) and intended to

more closely match the classic frog transformation of fiction.
* The Order of the Stick, at one point Durkon is held prisoner by an evil negative energy spirit that's going through all his memories. Durkon can't actually break free, but if the spirit taunts him too obnoxiously, he can punish it by forcing it to relive memories of him being sick.
* The Order of the Stick) at that spot that would activate and mock Soon Kim if he went to those co-ordinates seeking the rift himself.
* The Order of the Stick a woman thinks s/he's been caught by "Kaboom" Redaxe... but the perverted dwarf just want to give "her" his room number.
* The Order of the Stick, Azure City's leaders have to make their battle plan out with miniatures monsters because they don't have any toy soldiers. The last panel shows monsters dumping out a bunch of little Azurite action figures confusedly.
* The Order of the Stick-based world, where death in battle is a temporary setback as long as somebody cares enough (and can find enough money) to resurrect you.
* The Order of the Stick became a very literal example of this trope but has since "recovered" and now regrets their actions.
* The Order of the Stick). Because its hat is like the island's one mountain, its eyes and mouth shaped like the three patches of jungle, and its three buttons like the three reefs to the south of the island. Elan later creates another puppet for them to worship — Giggles, the Clown God of Slapstick. The tribe likes him better than Banjo since his idea of a good time is hitting people with a stick and they like hitting things.
* The Order of the Stick. Before her death, the author had stated that she would remain in the story for most of its run, so while he could have changed his mind, there is at least that.
* The Order of the Stick. Before he transformed, he was already 80 years old, yet he was still a strong enough sorcerer to wipe out a squad of paladins without any of them touching him.
* The Order of the Stick began on the silly side, slid slowly but surely towards the serious side, reached some major extremes during the Azure City battles and the split party arc, and has slid back noticeably since that story wrapped up, going back to self-aware joke-a-day strips, though still remaining within the story.
* The Order of the Stick, being the Quisling can be a major part of your morality and/or religion!
* The Order of the Stick, Belkar asks the Barbarian Guild about the dental. It's not that good (mostly involves chewing on granite and/or filing your teeth to a point), but he joins anyway.
* The Order of the Stick, Belkar attempts this on Vaarsuvius, by taking advantage of the wizard being turned into a lizard, to find out if the elf is male or female. He is foiled by his lack of knowledge in lizard anatomy.
* The Order of the Stick, Belkar has become more cooperative with the rest of the team. In other words, he's gone from being a sociopath to... being a slightly higher-functioning sociopath.
* The Order of the Stick: Belkar has served some pretty dubious fare, including vulture stew or corn chips dished up in a scooped-out kobold head (although that one was just to gross out Roy.) There's also a comic where a goblin takes advantage of a hydra's regenerating heads to open a fast food restaurant.
* The Order of the Stick, Belkar helps rescuing Elan from bandits who've captured him, because "if anyone is going to get XP from him, it'll be me."
* The Order of the Stick, Belkar's test to multi-class as a barbarian is to choose from one of three other barbarians to fight. Belkar chooses to kill all three. Subverted when the recruiter informs him that the fights weren't supposed to be to the death.
* The Order of the Stick Blackwing picks up Roy's Belt of Giant Strength while announcing his intent to help the rest of the Order, just as Roy is locked in a death match with Thog. Several panels are shown, alternating between the bird flying with the belt and Thog and Roy dishing out at each other. Until finally, Blackwing drops the belt on... Mr. Scruffy, Belkar's cat companion.
* The Order of the Stick, Blackwing the raven pulls this ploy on Qarr the imp,

using a shed feather sticking out from behind a pillar. His success with the ploy is aided by the fact that Qarr is, as Blackwing notes, a moron.
* The Order of the Stick, Blackwing was dragged down with Vaarsuvius into the Lower Level by the IFCC.
* The Order of the Stick, both Durkon and Vaarsuvius are caught in a version of this after Belkar kisses V while in a drunk stupor on New Year.
* The Order of the Stick: Both Elan and Vaarsuvius lack a last name. Elan's brother and father have no known last name as well.
* The Order of the Stick. Both fit the 'small guy, big influence' variant as well.
* The Order of the Stick, but he obviously doesn't return her feelings.
* The Order of the Stick. But meeting Elan, she found, made her able to be a better person.
* The Order of the Stick, but once mentions that she had sex three times while away from him for a couple of hours. She doesn't seem to understand why he'd be upset by this.
* The Order of the Stick, but they ended up getting a ride from someone else.
* The Order of the Stick, but ultimately decided that this was unbecoming of him. The guilt he felt over being so shallow and self-centered drove him to try and be a better leader and nicer to Elan.
* The Order of the Stick campaign, but they are fully aware that their world runs on those rules. Complete with dice rolls, and the rules of physics depending on you remembering what they are.
* The Order of the Stick can't get it into his head that he is in fact only a useful tool for Hel, despite her stating this outright.
* The Order of the Stick caricature who constantly jumped to conclusions and was completely incapable of understanding that she might, in fact, be wrong about them.
* The Order of the Stick: Celia should be small according to the monster manual, but she isn't drawn that way.
* The Order of the Stick characters are allowed on board. So, while some higher level technologies EXIST in that world, there seem to be some strict segregation laws in place to try and maintain consistency based on the individual's own appropriate time period.
* The Order of the Stick class kind of makes him the moral centre by default. He's often seen giving fatherly advice and direction to side characters. It helps that his patron deity is Thor; a deity that gets up to the kind of shenanigans Thor does tends to be pretty lax on the fire and brimstone unless you really, really fuck up.
* The Order of the Stick clothes. Despite all this, it's clear they really do love each other.
* The Order of the Stick confessing (say, through writing, or just grabbing him and smooching) would cure her.
* The Order of the Stick, consisting entirely of touch attacks, most of which don't even work thanks to the would-be victim making his saving throw.
* The Order of the Stick creepy) in her bedroom. The doll, in contrast to the actual Xykon, is a cuddly plush toy.
* The Order of the Stick darkness and therefore constrained to a small radius, they've stumbled out of it and into the dragon that cast it.
* The Order of the Stick devoted to him on the OOTS forums reached 28 pages.
* The Order of the Stick devotes a page to the hastily-arranged funeral of Lord Shojo, including words from his nephew Hinjo, his diviner, and Roy.
* The Order of the Stick did it, he remembers what happened afterwards and says "Never mind".
* The Order of the Stick. "Did you bring me a sandwich?" "Well, there are exactly two sandwiches here, aren't there? So no, I didn't bring you a sandwich. They're both for me."
* The Order of the Stick does this constantly — as soon as an apparent plot hole occurs to the forums, the next comic is very likely to head it off in a humorous manner. (Often, however, this is just because Burlew has already thought of that.)
* The Order of the Stick does this often. Understandable, given that the surprises

that come with warfare lead to a lot of splitting up and improv, and the characters' thought patterns vary so widely that the plan is going to go off the rails sooner or later.
* The Order of the Stick does this sometimes with speech balloons — several characters have theirs colored, with the colors often meant to imply their personalities.
* The Order of the Stick drags on like this, with the Vector Legion hammering away again and again at the Order, forcing them to improvise over and over. Near the end, you see most of them lying near dead in the desert heat before their back-up arrives. The final attack of the battle is delivered by Haley, propping her bow with her legs as one of her arms was broken by Tarquin.
* The Order of the Stick, Durkon became "Bandages" and Elan became "Diet Cola".
* The Order of the Stick each other, and V's gender and orientation are ambiguous). V does not take it well.
* The Order of the Stick, Elan and Belkar scribble on both Roy and the wall he's leaning against. Unusual, in that Roy is still conscious (and, naturally, really annoyed) while they're doing this.
* The Order of the Stick, Elan explains that the paladin he follows is about to clean a city of its villainy and scum like a huge handbrush. He then goes on explaining why a paladin isn't exactly like a handbrush.
* The Order of the Stick, Elan invokes this to convince Thog that Nale won't be coming back to get him out of prison because he didn't leave a trail of bread crumbs. Later, when the Order are in a maze-like canyon, he suggests this again, before remembering the flaw in the plan:
* The Order of the Stick Elan is called to heal an injured crewmember of an airship. The process of healing looks like hilarious quackery. Subverted in that Elan is a D&D bard and thus has some actual healing powers, if of lower potency than those of a cleric.
* The Order of the Stick, Elan is trying to gain roleplaying XP by bemoaning a light wound. Belkar decides to help him with his motivation. Injury and Stabbing Ensue.
* The Order of the Stick Elan: originally, he thinks of him as an annoying, worthless member of the party, but eventually, he considers him a true friend (at least to the "will rescue him from a gang of bandits" level). It helps that Elan himself learns to make himself more useful. In the Empire of Blood storyline, Elan has become the main character, with everyone else taking a backseat. (True to the strip's usual meta attitude, the arc villain strives to make Elan the main character, myth arc be damned.)
* The Order of the Stick; Elan says she marries Jack, and so she's rich too and quits the Thieves' Guild to have children instead. (Haley thinks that ending will do.)
* The Order of the Stick: Elan's father Tarquin not only controls his own three-pronged empire, but he uses his understanding of the world's narrative structure to deduce that it MUST succeed for a significant amount of time...or else there would be no drama in a lone hero opposing it someday!
* The Order of the Stick escaping, it's similarly obvious that Soon is trying to be as nice as possible about it.
* The Order of the Stick, Eugene's postmortem interview has his bureaucratic Deva bring up as one of his minor sins 'editing his own Wikipedia article'.
* The Order of the Stick, even though "it isn't really my place to say."
* The Order of the Stick every time you dozed off, you might try to avoid sleep too.
* The Order of the Stick features Elan holding up an "Will adventure for food" sign.
* The Order of the Stick features The Snarl, a monster formed from tangles in the fabric of reality, and sealed within the world itself.
* The Order of the Stick finds himself filling this role more often than he'd like.
* The Order of the Stick first led to their defeat. However, you can see in the last panel of the comic that Miko and Windstriker have some minor injuries.

* The Order of the Stick first meeting. "You don't want to be with me? *stab stab*".
* The Order of the Stick for gifting prized possessions to his protégé Elan rather than sort out which one is entitled to them.
* The Order of the Stick for these is that members of the Order of the Stick tell each other stories starring fictional versions of themselves. And then criticize each other's stories, like complaining that Denmark, England and France are unrealistic country names.
* The Order of the Stick for the webcomic on this wiki include 13 subpages so far.
* The Order of the Stick forums: "Fanservice" and "House of Horrors". Both have been locked on a permanent basis for a while now, with Rule 34 material no longer allowed on the OOTS forums.
* The Order of the Stick Francois, however, ditches Elan when Elan's incompetence leads to them getting robbed while they sleep at an inn. Elan's dismayed "Not again!" reaction when he wakes up indicates that this isn't the first time he was ditched like this.
* The Order of the Stick, General Tarquin lampshades this trope by saying villains letting themselves get captured to manipulate the heroes is popular these days.
* The Order of the Stick gets a Greater Mark of Justice (see D&D example) cast on him as a punishment, which will inflict a crippling and eventually fatal illness if he ever kills a creature inside a city, gets further than a mile from Roy, or ticks Roy off enough to make him activate it. When the mark is first introduced, Belkar laments the fact that they placed it on his head instead of on a body part he could just cut off.
* The Order of the Stick gets a memorable one when the team's airship is getting repeatedly hammered by lightning, despite having a lightning rod. They quickly realize that the lightning is divine in nature.
* The Order of the Stick gets supercharged and move fast enough to leave after-images. So does Haley in the same scenes after activating her enchanted boots of speed.
* The Order of the Stick gets this treatment from the Order. For an early example,
* The Order of the Stick gives one of these to Haley in "Don't Split the Party":
* The Order of the Stick goddess of evil dragons, is part of the Western Pantheon. The Western Pantheon is based on the gods of ancient Babylon, which is where the name Tiamat (although nothing else about her, as Babylonian Tiamat was a sea goddess) came from.
* The Order of the Stick had answered many, many times before and putting an end to the debate), and the dream continues as scheduled. Although the game metaphor is extended throughout the rest of the page, the pair is never shown in modern clothes after that.
* The Order of the Stick had the title party get split up for a few months. There was much dancing in the streets when they were finally reunited.
* The Order of the Stick, Haley has a huge sack, and claims she didn't find any treasure. When Roy asks what's in the sack, she replies, "Feminine products." Roy decides to leave it there.
* The Order of the Stick, Haley Starshine could only speak in cryptograms that would change in every strip. Allowing readers who were clever/determined enough to figure out what she was saying.
* The Order of the Stick, Haley uses her Wanted poster as a list of qualifications when Roy recruits her.
* The Order of the Stick has an arc where Haley loses the ability to speak properly and has inner-monologue conversations with various facets of her personality, including her self-loathing, her optimism, her vanity and her latent bisexuality. Only one facet is present in the beginning, but more started showing up, and they even lampshade the fact that Haley is probably going crazy.
* The Order of the Stick has a narrator, who's revealed to be a guy with a microphone who was up until the reveal always off-panel. The Order uses him as monster bait, and after a couple last comments as he's running away, there's no more narration.

* The Order of the Stick has as a prime example with Sabine the Succubus, who can take various humanoid forms.
* The Order of the Stick has a variety of these, getting lengthier as the strip developed a plot and the battles got bigger. The most elaborate one to date was when Azure City was about to be invaded, and the characters' preparations included writing new spell scrolls, forging a new sword, and making out.
* The Order of the Stick has bat-like wings in her true succubus form, which she can make disappear at will by shapeshifting into a human.
* The Order of the Stick has dozens of these: every aspect of herself from self-doubt to desire-for-comedy to latent-bisexuality. Some of them are benevolent, but they all annoy her.
* The Order of the Stick has Elan the Bard, whose highest stat is his charisma. In the first arc, this was invoked when Roy told Elan to convince a teen goblin to assist them.
* The Order of the Stick has O-Chul being woken up by a bucket of water for his daily torture.
* The Order of the Stick has Roy and Belkar discussing how to use loopholes in Azure City's legal system to get Belkar out of a murder charge without punishment - while in earshot of Hinjo, a Samurai tasked with upholding Azure City's laws. Hinjo then makes sure Belkar gets a longer-than-average sentence just to make sure their plan doesn't work.
* The Order of the Stick, has several ways of bringing back someone to life. Usually anything other than Raise Dead / Resurrection results in this trope. Especially golems, which are mindless monsters remote-controlled by their owners.
* The Order of the Stick has shown us a Goblin Psionicist mind reading O-Chul. More extensively, Laurin is an adventuring psychic in the same party of Tarquin.
* The Order of the Stick has spent his entire career taking every survivability feat possible. This pays off when he get captured and tortured to the brink of death for months on end. As a paladin he sees himself as a protector first and an attacker second.
* The Order of the Stick has the IFCC, sort of middle-management fiends whose goal (as far we know) is to continue to stir up conflict between the opposing factions.
* The Order of the Stick has the titular order. Even without their most powerful member, with one of their warriors half-dead, and with their remaining spell casters out of spells, they pose a serious threat to an entire army that has them surrounded.
* The Order of the Stick has this attitude towards elves, resenting that they live in the fertile forested area of the western continent, while humans and lizardfolk fight over scraps in the remainder of the continent, much of which is uninhabitable desert.
* The Order of the Stick has Wrecan, named for a fan who tallied up characters' appearances on the forums.
* The Order of the Stick have never been revealed. The in-comic reason is speculated to be that he's too... childlike to know his full potential. Xykon implies once or twice that he actually knows the exact limitations and capabilities of the Monster in the Darkness, even if the Monster doesn't; he's repeatedly stated that the Monster is his trump card, and he has no intentions of bringing it out until its planned debut, or until things go completely out the window, whichever comes first.
* The Order of the Stick have seen the two flee (unless they rolled a 1 on their Spot checks), play along.
* The Order of the Stick. He can't even believe that he's not the main villain of the story, and doesn't comprehend that the comic likes to subvert and deconstruct established narrative lines. When Elan refuses to take the bait and insists he's a supporting character rather than the real hero, Tarquin tries to force him into the protagonist seat by attacking his friends.
* The Order of the Stick. Heck, you could make a case that he's the one person that everyone else on the team likes. Haley sums it up very well in a recent comic.
* The Order of the Stick, he comments that they already did that reveal a while

ago.
* The Order of the Stick. He does snatch both out of instinct, but doing so makes him lose his grip on the side of the ship.
* The Order of the Stick, he founds the nation of Gobbotopia and appoints one of his lieutenants as its leader.
* The Order of the Stick heightened sense of smell, humans tend to stink something awful. Durkon, being a dwarf, also dislikes human alcohol, which is weak and tastes like moose piss compared to dwarven ale (nevermind that the alcohol content of dwarven booze would kill humans).
* The Order of the Stick. He is a "Dashing Swordsman", but knowing how to work the flowing brown (or black, or crimson) longcoat is part of it.
* The Order of the Stick, he is the only one in his party unaffected by a disease created by Lirian, a powerful druid, that blocks all spellcasting abilities. Since he retains his powers, he is able to help Xykon turn into a lich; being undead (and therefore also immune to disease) restores Xykon's spellcasting and allows them to break out of Lirian's captivity.
* The Order of the Stick helps O-Chul. On the other hand, since he's got a rather hazy view of "nice", it's also why he helps Xykon:
* The Order of the Stick. Her "side" is Nale, and she does whatever is in Nale's best interests, even post-mortem.
* The Order of the Stick. He sadly informs her that though she carried out her duty, she cannot be readmitted to the paladins, because she never actually admitted that her original mistake was wrong or did anything to fix it.
* The Order of the Stick, he's sporting metal armor, a shield, a hammer, and the ability to occasionally throw lightning bolts or grow to gigantic size for emergency muscle.
* The Order of the Stick (hey, even lame puns are an improvement), though his insults outside of combat are as lame as ever.
* The Order of the Stick, Hinjo confronts Shojo after hearing him talking to Roy about how they're working behind the Sapphire Guard's back and violating Soon Kim's noninterference oath, asking "Have you been lying to us?" Shojo says his answer "all depends... on how much you just overheard."
* The Order of the Stick. His bold-faced lies do work from time to time, though, since Sense Motive isn't a very widespread skill in the comic. Elan's girlfriend sums it up best:
* The Order of the Stick. Humorously, the duplicate and one of the ninjas actually argue over who gets the kill, before Hinjo suggests a third option:
* The Order of the Stick. If all of them are destroyed, the Snarl would be unleashed. It's still better than letting someone evil gain control of one, since it would theoretically give them the power to threaten and blackmail the gods themselves.
* The Order of the Stick if his body is destroyed (which it is, at the end of the first arc). It takes a while, though.
* The Order of the Stick if they agree to be temporarily drafted into the city's army.
* The Order of the Stick If Vaarsuvius was shocked the first time the bird talked in common, it was because for a long time Blackwing refused to speak V's language, due to having previously held the elf in disdain.
* The Order of the Stick If you try to look for future strips ahead of when they are actually posted (by typing in the page URL of what would presumably be the next comic after the previous one), you're greeted by Belkar, who tells the viewer that the author does not post strips in advance.
* The Order of the Stick includes one between the good guys, where one of the dumber bad guys tries to join in, but Durkon simply cast "Hold Person" on him (without even breaking the hug).
* The Order of the Stick in engaging in a preemptive genocidal crusade. For his part, Redcloak is only too happy to continue the cycle of atrocities.
* The Order of the Stick information that would jeopardize Ian's release.
* The Order of the Stick in how time passes; it's just that it's very easy to lose

track of time when the sun never sets and you never need to eat, drink, sleep, or go to the bathroom.
* The Order of the Stick in the desert for Girard if he scries their location:
* The Order of the Stick into a member of the Cliffport Police Department.
* The Order of the Stick into a ponytail. With his/her Headband of Intellect.
* The Order of the Stick: Inverted with the Empress of Blood, a rather stupid red dragon who hit on the idea that dragons grow bigger and more powerful, and therefore getting bigger (read:obese) means she's more powerful instead of growing stronger as she ages. Her advisers just run with it and keep her well-fed, since they're all intending to scram once she's inevitably toppled.
* The Order of the Stick" is a living Ostentatious Secret. The main villain of the series keeps him shrouded in darkness, despite its constant objections. He is kept shrouded in order to keep him a secret before his final climactic confrontation with the heroes — he's even been held back from fighting them (despite apparently being extremely powerful) because revealing himself at that point in time wouldn't have been narratively climactic enough.
* The Order of the Stick is all over this trope, and is one of the causes for the frequent delays.
* The Order of the Stick is a test of prowess and wit for those seeking the Truth, and if they succeed, they can get a True answer to any question. But they can't take the whole truth with them; on leaving, the Memory Charm placed on Sunken Valley wipes their memories of everything except their question and the answer.
* The Order of the Stick is enough to completely throw Elan off the track.
* The Order of the Stick is even better in the print collections, starting around strip 150, when they moved more into ongoing stories and away from one-off gags.
* The Order of the Stick is for ninjas to go undetected by other characters even when they're not actually hiding.
* The Order of the Stick is green and features green bubbles from the victim. Later, the Strength-draining poison used on Vaarsuvius features green bubbles as well.
* The Order of the Stick is of a bubble deflecting projectiles, falling under this trope.
* The Order of the Stick is one of these, though she's more of a runaway wife than fiancee. The catch? Her husband was kind, loving, and supportive, but Hilgya acted as though he was oppressing and belittling her.
* The Order of the Stick is only know as "The Oracle of Sunken Valley," or the Oracle for short.
* The Order of the Stick is possibly alive. Also, Redcloak's brother Right-Eye.
* The Order of the Stick is some kind of inversion of this trope: the place Belkar is calling "Happy Fun Sunshine Land" is actually a city where it is not odd to walk down the street carrying a corpse with your dagger still in it. He calls it that because he's feverish and delusional from the Mark of Justice curse, and has no idea what's actually going on. The magical fairy part is the only accurate part.
* The Order of the Stick is technically still at law school, but shows hallmarks that this will be the kind of lawyer she'll be.
* The Order of the Stick is that this is how all vampires work in this world, and the reason nobody warns the heroes is because it's fairly obscure knowledge.
* The Order of the Stick is the lack of any way to drink coffee. He takes this badly.
* The Order of the Stick, it could very well be that it is not a "subjective quality" at all but that evil can be really measured objectively there.
* The Order of the Stick. It does get more useful than he expected. Sometimes.
* The Order of the Stick, it failed to completely eliminate the threat.
* The Order of the Stick. It is seawater here, but the effect is the same, as it's the first hint that a giant dragon sneaked on the elf (besides an imp's weak attempt at a warning).
* The Order of the Stick. It's a bit hard to blame him for this as 1) this has been happening for years; 2) it's always been made clear that the story has priority over the rules; 3) many of the times he's accused of breaking the rules the actual

rule is heavily debated and how it works in the comic is a legitimate interpretation of the written rule; or 4) the accusation is just wrong.
* The Order of the Stick It's compared to someone drinking beer they didn't know was non-alcoholic and feeling drunk anyway because they expected to be. The dialog implies that Cedric is speaking from experience.
* The Order of the Stick, it's mentioned that there used to be many different cultures on the Southern Continent, but they were all absorbed by the Ancient Empire. When the Empire fell, it split into many different countries again, but now the cultures were spread randomly throughout the continent.
* The Order of the Stick. It's not rudeness, however; as a ghost, he is incapable of holding anything corporeal.
* The Order of the Stick: it's small enough to fit in his hand. However, when he brings it to the smith, it turns out to be plenty (a sword made of pure starmetal would be too heavy to lift and use the entire known supply of the stuff).
* The Order of the Stick. It takes four separate appeals to persuade him. (And then Belkar gets into the act, just to get a chance to insult him.)
* The Order of the Stick. It was later revealed that all orcs speak like this, though they can apparently grow out of it through grammar lessons.
* The Order of the StickIt was useful on two occasions, however. While sneaking into the bandit camp, he used a cat to provide distractions for the guards, allowing him to sneak up on some of them. And he also summoned two rats and a beaver to gnaw the ropes his friends were tied up with.
* The Order of the Stick: Julio Scoundrél (Good Version) AND General Tarquin (Evil Version). Both try to make their major actions as dramatic as possible, even though it sometimes screws up their plans and makes things miserable for their allies. Julio satisfies his desire to be an action hero by causing massive chaos and rushing in at the last moment to save everyone. Tarquin... kills a LOT of people with black-humor snarking to look up to Darth Vader.
* The Order of the Stick Julio Scoundrél's airship goes faster the higher the stakes, but it never gets anywhere earlier than the nick of time.
* The Order of the Stick, Julio Scoundrel tells him that to avoid dying, he never wants to see him ever again. However, he does later come to save him after being convinced that the greatest heroes are those who can defy genre conventions.
* The Order of the Stick large, and full of badassery. They provide some invaluable support in several battles while the Order is trying to stop Hel's clergy, complete with friendly bickering like it's a family outing.
* The Order of the Stick lasted a while (beginning in earnest in March 2014 and climaxing in October 2018). A lot of fans expressed frustration at how long the comic was spending on a side story — until the arc concluded in a way that made it essential to the main story with a twist that no-one saw coming.
* The Order of the Stick left you can fight on without penalty. It doesn't help that the characters appear at some times to literally be two-dimensional.
* The Order of the Stick like the other characters with poor intelligence, giving the indication that this is the result of different languages and syntax.
* The Order of the Stick mate's divorce so that their children can have "the normal life of a baker's family." This was shortly after an Ancient Black Dragon tried to kill them and ensnare their souls for eternity.
* The Order of the Stick, members of the hobgoblin horde fighting the Battle of Azure City receive T-shirts saying, "I killed a PC and all I got was this lousy T-shirt!" upon "killing" the illusion forms of several members of the titular party.
* The Order of the Stick mentions using virgin's blood as a spell reagent.
* The Order of the Stick Miko and the rest of the Sapphire Guard are samurai. Though as she tried to explain to Elan that's not her character class (see D&D), their class is paladin and samurai is simply a title.
* The Order of the Stick. Miko is shown to hold her own against the Order with Durkon doing nothing, and is very strongly implied to only have this ability in bad weather, which acts against V's magic and Haley's shooting. But in the linked strip, she beats and captures the entire Order between panels, not even merely routing them.

* The Order of the Stick Miko made huge leaps in logic and crafted a huge conspiracy pinning the blame for a horrible situation that she created on Roy and company. It's ultimately the main reason she couldn't earn redemption — she just couldn't accept that anything was her fault.
* The Order of the Stick, Miko Miyazaki and the rest of the Azurite Paladins of the Sapphire Guard are Western-style Paladins from an Eastern-inspired civilization who call themselves Samurai. Miko further complicates matters by having levels in the actual Monk class.
* The Order of the Stick: Miko overheard Lord Shojo discussing the fact that he told his paladins some lies, and concluded that he betrayed the city. He actually told those lies because the paladins are so traditional, they wouldn't let him do what he thought was needed to save the whole world.
* The Order of the Stick: Miko's first battle against the team probably wouldn't have gone so well if it weren't for a raging storm that gave V trouble casting spells and made it impossible for Haley to hit with her bow...and convinced Durkon Thor wanted her to win.
* The Order of the Stick Monopoly money this time! I've learned my lesson!"
* The Order of the Stick. More a religion of evil people than a Religion of Evil.
* The Order of the Stick mostly averts this and manages to have a joke (or five) in almost every strip, no matter how plot critical. Somehow it does this without undermining either the comedy or the drama.
* The Order of the Stick named characters for each of the following: human (Roy, Haley, Elan), elf/dark elf (Vaarsuvius, Lirian, Zz'dtri), dwarf (Durkon, Hilgya, Kraagor), halfling (Belkar, Serini, Hank), half-orc (Thog, Therkla, Bozzok), kobold (Yikyik, Kilkil, the Oracle), lizardfolk (Gannji, Enor, Malack), goblinoid (Redcloak, Jirix, Right-Eye)—plus the occasional sylph (Celia), gnome (Leeky), catfolk, weird frog person, ogre, etc.
* The Order of the Stick Naturally, her "punishment" is to be denied all of the rocks, which get split evenly among the other five team members. She gets a double portion of gold as consolation.
* The Order of the Stick. Needless to say, both Hayley and Roy's spirit are a bit annoyed.
* The Order of the Stick. Nobody leaves the Thieves Guild of Greysky City, except in a casket. Vampires can't even leave in one of those.
* The Order of the Stick notwithstanding. Note that it is possible to deliberately fail saving throws, such as a fortitude save against secondary poison damage.
* The Order of the Stick, officially he still has jail time coming even after the sentence reduction for aiding in the battle.
* The Order of the Stick of lawyers to sort out, and morally/ethically, the harm V caused would likely defy any price V would be capable of paying.
* The Order of the Stick of medieval Japan, Asians may actually constitute the majority of human NPCs.
* The Order of the Stick often invoke (the first variation of) this trope in supplementary materials, as they prefer to eat newly-acquired captives over long-term slave populations. This is because their slaves, especially those born into it, are dull-witted from mental domination and the drudgery of years of service, and so are sustaining but dreadfully bland. This is also the reason for why mind flayers don't simply eat the brains of animals, or even regenerating creatures like hydras; they could do it, but to them, it'd be like a king spending his whole life eating gruel so as to not offend the poultry.
* The Order of the Stick of the others. The villains find this difficult to believe, to say the least.
* The Order of the Stick of the setting was their way of avoiding this happening again.
* The Order of the Stick. Oh, and this is when a huge enemy army lies between them and escape.
* The Order of the Stick on a rooftop after realizing that the man is evil. His adversary approves of the location choice.
* The Order of the Stick, one (green) character notices that they are the same

color as she is.
* The Order of the Stick, one-meter halfling Belkar has sex with normal-sized human Jenny, and neither seems at all bothered by the size difference.
* The Order of the Stick", only to follow up with an admission that he can't actually do that under the circumstances. The shouting serves only as a distraction.
* The Order of the Stick. Or at least, cut off his tail and stuck it into a jar of salsa. He also used said kobold's head as a chip bowl. The kobold in question is attempting to avenge his father, whose head ended up as Belkar's hat.
* The Order of the Stick) out of Azure City. She disguises herself as a necromancer, calls Mr. Scruffy her evil cat familiar, and uses eyeliner to draw Xs over Belkar and Haley's eyes so that they look dead. She's almost found out when one of the guards calls her out on not being a necromancer, at which point Belkar "rises from the dead", kills the guard, and asks if anyone else wants to question his creature type. Surprisingly, it works.
* The Order of the Stick parodies this alongside several other fantasy gaming staples.
* The Order of the Stick per trip regardless of length (more would take up too much time), become the rivals of other characters so they can level up without doing any work (you will be the same level as your rival, so a fight between you is suitably dramatic), and acknowledge that being a human is best because somehow you will learn just as much magic in decades as an elf will in centuries (and if you start as another class and then multiclass into a wizard, you skip years of training because it is retroactively assumed you have been practicing all along).
* The Order of the Stick plan is not what she thought it was, she's too much of a liability to be allowed to live.
* The Order of the Stick: Played with. A group of ninjas tries to take Kazumi Kato hostage while she's heavily pregnant, but, as she points out, pregnant or not she's still a soldier and has lost none of her combat training. She does still get captured, but only after kicking the asses of all the ninjas and having to be distracted by several fully armored samurai.
* The Order of the Stick plays with this here and there, but thoroughly averted with Miko Miyazaki, though. Burlew even says in the graphic novel that Miko's death was meant to show that not everyone gets a chance to redeem themselves after fucking up royally in the real world, and we should all be mindful of our actions.
* The Order of the Stick points out that Shojo never considered trying to convince the paladins that the Oaths were outdated (plus, one of the locations was heavily booby trapped in case Soon or his followers decided to do this, the trapper believing this trope in the hands of paladins would only be a self-righteous justification).
* The Order of the Stick prequel book describes the deliberate choice of greyscale as "Past-O-Vision". The use of crayons to illustrate the "dawn of time" backstories also invokes this trope.
* The Order of the Stick. Presumably, those changes were enough to drop its level.
* The Order of the Stick provides childcare. Haley says it does, but it's not recommended. Cut to a poker game at the Greysky City Thieves' Guild, with their cleric shoving a baby across the table and saying "Call."
* The Order of the Stick quite frequently sets the forums ablaze with cryptic comments and reveals, especially regarding the Monster in the Darkness, and ever since he announced that in his opinion, it is guessable what the Monster is, there have been at least one, mostly more threads at any one time discussing it.
* The Order of the Stick. Rather than destruction, however, he expects his plan to use a god-killing abomination to blackmail the deities of his world to result in a modern-style utopia for his people.
* The Order of the Stick rather than regular cheating, about which she does not give a damn. She is an incarnation of illicit sex, after all.
* The Order of the Stick, Redcloak can't die because it's a prequel, so his brother ends up paying for their evilness instead.
* The Order of the Stick, Redcloak is able to summon Elementals based on the

chemical elements even though no explanation is given for how he has come to learn of their existence in the first place.
* The Order of the Stick, Redcloak makes a speech on how, thanks to the destruction of Azure City, no goblin would be killed by their paladins again. Xykon's response?
* The Order of the Stick: Redcloak's overarching plot is to seize control of the Snarl and use it to threaten the gods into accepting his demands. That is this trope to the point where he unironically refers to it as The Plan when discussing it.
* The Order of the Stick. Redcloak's theological revelations are "refreshingly direct":
* The Order of the Stick: Referenced but subverted in the print side story "Good Deeds Gone Unpunished", which is about good people doing good things and everything (mostly) working out for the best.
* The Order of the Stick regularly boasts about knowing secrets that would drive lesser minds mad.
* The Order of the Stick released a side story about half-orc ninja Therkla trying to get through one assignment from her boss Kubota that featured none of the heroes or other villains of the main story. Interestingly, this was done specifically at the request of one fan, who had pledged a good deal of money to the author's Kickstarter to see it happen.
* The Order of the Stick, Roy and Haley smash into each other while fleeing, respectively, from a trio of ogres and a group of goblin ninjas.
* The Order of the Stick Roy begins to actively hate his father. He keeps pursuing Xykon, though, because he feels that saving the world is a lot more important than spitefully trying to anger his father.
* The Order of the Stick, Roy, Durkon, and O-Chul, among others, seem to be the most kick-ass characters in the comic.
* The Order of the Stick, Roy even tells her it's not a competition of who's currently got the better of who. Her answer?
* The Order of the Stick. Roy finds a pack of villagers who beg him to save them from some bad-tempered orcs that are hanging around and won't leave. Turns out the orcs are teenagers, who are camping there to await an upcoming rock concert... in a Mithril setting.
* The Order of the Stick. Roy Greenhilt gives a speech to try to convince them to let the mortals deal with the problem themselves. Everybody else is moved by it, but don't have the heart to tell Roy that the gods couldn't see or hear him, so his speech didn't affect their decision.
* The Order of the Stick, Roy has suggested that Elan sleep, but Elan is too worried to sleep. So...
* The Order of the Stick: Roy only gets to "You pathetic old—" before stopping himself, calming down, and explaining that he won't be bullied by his father anymore. And strangely enough, it works better than any rant Roy could have attempted.
* The Order of the Stick Roy points out. She's no cosmetic product, after all.
* The Order of the Stick, Roy's first mission as an adventurer is helping a town deal with a band of orcs. In the battle, he learns that the orcs aren't raiders, but camping out for concert tickets. The town just overreacted. The concert they're waiting for isn't due for a few more weeks, but the orcs are that determined to get good seats. "Mezzanine seats are sign of weakness."
* The Order of the Stick. Roy's grandfather is even better than he is.
* The Order of the Stick, Rule of Cool is regularly invoked by the local bard, Elan. He deliberately pushes a self destruct button so he can jump away from the explosion 'like a Vin Diesel movie'.
* The Order of the Stick rules, and all of the size-expansion spells make equipment grow too. And as of strip 1152, he has a smaller version of Thor's Mjölnir.
* The Order of the Stick rules he can only spend 8 hours a day working on magic items, and needs to spend another 8 hours resting to regain his spell slots even though he has no biological need for it. This frustrates him, so he spends the extra time sadistically amusing himself with minions and prisoners.

* The Order of the Stick: Sabine (a succubus, and thus a demon and not a devil) gets one:
* The Order of the Stick Sabine is prone to do things like engaging in battle wearing a schoolgirl outfit (granted, Sabine is a succubus). Other female antagonists, notably Tsukiko, also dress skimpily.
* The Order of the Stick saying "Blah Blah Blah," to set a new record for the number of times he could say it in a row.
* The Order of the Stick says he deliberately set this trope up so he could subvert it.
* The Order of the Stick says that he "loves Thor with all [his] heart, in a heterosexual 'just buddies' kind of way, not that there's anything wrong with the alternative."(Translated from Dwarven Accent.)
* The Order of the Stick's body by having mind-controlled ghouls eat it. Then having the ghouls eat each other. And the last ghoul set itself on fire. He's... thorough like that. In this case, the disposal is presumably for the sake of preventing the body being raised or spoken to, since he's very candid about having committed the murder.
* The Order of the Stick. Secondly, because he's the guy who doesn't care about anyone or anything, he's in position to get a lot of the funniest jokes.
* The Order of the Stick seems to view life as essentially a meaningless exercise in gathering treats ending in horrible death.
* The Order of the Stick sells trade paperbacks of the comic, with additional bonus content available only in print. Two of the paperbacks out so far are prequels, the content of which has never been published on the web. And, of course, T-shirts.
* The Order of the Stick series, where he worldbuilds from scratch, basing his map on real rules of geology and then allowing its geography to influence the cultures and countries he overlays onto it.
* The Order of the Stick, serving as Nale's reveal to the rest of the characters as...well, evil.
* The Order of the Stick's eyes using her foot to point (her left arm is broken).
* The Order of the Stick's ghost thinks someone can finally hear him when a woman claiming to be a psychic claims to sense something, but all she does is a cold reading that ends up being about someone's dog.
* The Order of the Sticks. He has at times even considered killing his own party members for XP.
* The Order of the Stick she's already in a relationship with Elan, and now her personal issues revolve around learning to open up to people (naturally, with Elan's help). Therkla has a similar arc, though it doesn't end quite so well for her.
* The Order of the Stick. Shojo says he could be either the real deal's spirit, appearing to Belkar from beyond the grave, a personification of the Mark of Justice (which makes sense since when it was first activated it also produced an image of Shojo), or simply a fever-induced hallucination.
* The Order of the Stick shoulderguards. Not knowing his name, fans call him "Shoulderpad(s) Guy."
* The Order of the Stick shows a character standing on a small pile of skulls, ready for sacrificing a human.
* The Order of the Stick shows that Redcloak's village and all of its inhabitants (except for him and his brother) were destroyed by the Sapphire Guard shortly after his initiation as a cleric.
* The Order of the Stick shows us two angel characters during Roy's stint in the afterlife, both based on D&D celestials. The bureaucratic deva is a green-skinned traditional angel, but solely interested in filling out the paperwork necessary to process souls to their final rest. The aptly-named Roy's Archon is a tiny ball of glowing light provided to Roy as a guide during his stay.
* The Order of the Stick someone being in an area with poor cell reception.
* The Order of the Stick sorcerer; a spellcaster who was born with his powers rather than learning magic through study.
* The Order of the Stick so that Mr. Rodriguez is listed as primary counsel,

allowing Mr. Jones to maintain a "perfect" record at trial.
* The Order of the Stick (spoiler warning) of infinite canvas, though there are more original ways the principle could be applied. Using a really long strip to depict lots of falling is considered the ur-example of this trope, but it is also a very intuitive example. (In print, the strip is broken into several page-high panels.)
* The Order of the Stick: Start of Darkness becomes a lich, he mentions that "a certain body part" of his hasn't moved on its own in years, so he's not concerned with losing it entirely along with the rest of his flesh.
* The Order of the Stick states that Durkon is not meant to represent any sort of specific ethnic group, and that he's just simply "not white".
* The Order of the Stick stay hidden in shadow to preserve its mysterious appearance until the time comes for the big dramatic reveal, necessitating the use of a pink umbrella whenever they're out in the sun.
* The Order of the Stick. Strips #1100 and #1200 were back to being nothing particularly special.
* The Order of the Stick strong — in D&D terms, it became a +5 sword with the ability to severely harm undead by emitting a green glow.
* The Order of the Stick's "Uncivil Servant," Belkar goes by "Ali S. Fakenamington."
* The Order of the Stick's website used to slow to a halt whenever a new comic was posted, though this was mostly because of all the people hitting the forums.
* The Order of the Stick's whole story is pretty much kicked off by Roy's quest to defeat Xykon. Needless to say, things got a little more complicated...
* The Order of the Stick taken into account), provides a large number of hilarious evil characters.
* The Order of the Stick. Tarquin himself thinks this makes him their leader. The others don't, but think he's useful enough not to press the issue. They also have two actual evil geniuses who takes care of all the actual planning and minutiae.
* The Order of the Stick, Tarquin shows Elan a hillside with dots of fire spelling out his name (which are actually prisoners that tried to escape and ended being burned alive as a result). The three bottom lights of the 'E' go out and Tarquin complains that everyone will think he's got a crazy obsession with custard.
* The Order of the Stick, Tarquin's skill for communicating in Drow sign language is only mentioned once. Conveniently, it's brought up right when he needs to give orders to a Drow who was recently deafened by a spell.
* The Order of the Stick taste of anything, because there's nothing about that in the rules.
* The Order of the Stick taught her how to be paranoid around others and did not approve of Elan since his father is an evil warlord and his twin brother is just evil.
* The Order of the Stick territory, and prohibit him from making further such interventions on Durkon's behalf.
* The Order of the Stick that he already has a girlfriend and isn't looking for a relationship. She gets an angry look on her face and draws her weapons... then throws a shuriken at the demon she spotted sneaking up behind him.
* The Order of the Stick that he seduces, it's not really played straight even that once... dwarven women are pretty manly to begin with. A human male may well be more feminine than a dwarven female!
* The Order of the Stick) that makes it especially effective against the undead.
* The Order of the Stick that no one could ever get a certain amount of wealth without being a high-level character.
* The Order of the Stick the albino lizardfolk Malack, who wears a black cloak, for the Grim Reaper, and calls him "the Lizgreaper" as a malapropism form "lizard grim reaper". He was knocked out in a battle before being escorted to Malack, whose initial words lead Elan to certain assumptions.
* The Order of the Stick. The assumption seems to be that nobody will be reading the books without having first read every strip online.
* The Order of the Stick, the author has since improved on this and there are equal

numbers of female and male characters in the comic.
* The Order of the Stick, the Crimson Mantle qualifies. It's not clear that it has any direct control over the wearer, but it does give a divine command to enact a plan that could destroy all reality. It also halts the bearer's aging, which has the apparent side-effect of preventing he or she from maturing as well. Its current bearer is, in many ways, still the angry vengeful teenager he was when he first took up the Mantle.
* The Order of the Stick!). The damage is not done by the ball itself, which behaves like any bouncy ball, but from the spell cast on it.
* The Order of the Stick The Empire of Blood also uses an Allosaurus in their Gladiator matches, when it would be funny.
* The Order of the Stick, the Empire of Blood seems to punish all crimes by making those convicted into gladiators who are imprisoned until they're killed in the arena. If a prisoner survives for long, he's ransomed off to his family for obscene amounts of money.
* The Order of the Stick, the eponymous band somehow made her do it. She then takes it as far as assuming everyone in the room is working against her, and she can do no wrong because she is the strongest member of the Sapphire Guard.
* The Order of the Stick, the father of the identical twins Nale and Elan, is drawn as looking the same as his sons except with white hair (brown in flashbacks), and other characters note that he looks much like Elan and Nale.
* The Order of the Stick. The first time she met the lich Xykon, she hit on him. (Later, she's seen carrying around a Xykon doll.) She also acted like a mother to a group of wights she had raised, stating that 'a pulse is not a prerequisite for being loved.'
* The Order of the Stick the following (believing he's speaking to a gay man):
* The Order of the Stick. The former actually fell, losing her paladin powers. Overall she was a milder example than Redcloak, as she at least tried to keep doing good, but never quite managed it due to her pride.
* The Order of the Stick). The gods would do that if the Snarl is ever freed, so the protagonists are working to prevent it from being freed in the first place, for obvious reasons.
* The Order of the Stick, the heroes are trying to protect the five Gates from Xykon. After two gates are destroyed (rendering them useless to Xykon, but also weakening reality), the heroes decide that Xykon is likely to target either Girard's Gate or Kraagor's Gate next, since Soon's Gate is in the well-defended Azure City, full of paladins. Thus, they don't even bother preparing for the possibility of Soon's Gate being targeted. So, of course, it is, and Azure City gets overrun, thousands die or are enslaved, and the heroes and their allies spend the next several story arcs split and mostly playing defense.
* The Order of the Stick, the lich Xykon discovers that he no longer has a sense of taste after attempting to chug a cup of truly horrendous coffee. What follows next is a terrifying example of this trope that demonstrates the gulf between the mortal Xykon and the undead version, as he coldly murders a waitress he had earlier described as very attractive. When Right-Eye gets angry, Xykon throws him against the wall and begins strangling him to death. Redcloak is only able to prevent Xykon from killing them both with a desperate bluff, though he still throws both goblins through a nearby window before announcing that he is now in charge. During the entire encounter, Xykon never once raises his voice.
* The Order of the Stick: The Linear Guild has Nale and Sabine, a Lawful Evil human and a succubus. The two are actually very committed to each other, even though Sabine, as a literal incarnation of illicit sex, finds it normal to have sex with four other partners while out on a three-hour errand.
* The Order of the Stick, the main villain is Xykon the sorceror, but there are several lesser antagonists:
* The Order of the Stick, the Mummy Queen's curse lasts a hundred years — and a day.
* The Order of the Stick, the order in general and the Haley & Elan duo in particular have taken up slave liberation sidequests. One of them ends... poorly.

* The Order of the Stick, the Order is about to face a guard monster, only to have it hit Roy with a roll of 2. Upon realizing that it can nail the party member with the probable highest Armor Class with such a low roll, they flee.
* The Order of the Stick. The Order of the Scribble, united mostly by their goal of closing down all of the rips that allowed the Scribble to enter the world, are able to stick together long enough to accomplish it. Unfortunately, pre-existing issues, the death of one of their own, and disagreements on how to best guard the gates lead to a VERY ugly argument, causing them to split up and watch over one of the gates individually. We see that for some of them, even years later, the feelings haven't died down and some of them would never be able to trust the others ever again.
* The Order of the Stick, the party is given one to use as quick transportation by Tarquin.
* The Order of the Stick, there are several factions, both good and evil, and most of the evil ones can qualify as independent big bads:
* The Order of the Stick, there is a breather of varying length at the beginning of each book after the first one.
* The Order of the Stick, there is a guard on the diamond Haley steals, who is asleep and talking.
* The Order of the Stick. There is at least a unique art style and a significant difference in main characters to its credit.
* The Order of the Stick. There's also a lampshading of the activity by the cleric Malack in reference to his membership in an evil adventuring party, "Ah, the life of an adventuring cleric. I remember it well. A perpetual struggle to maintain the hit point totals of four or five nigh-suicidal tomb robbers determined to deplete them at all costs."
* The Order of the Stick there's occasionally conflicts of interest between villains. They include:
* The Order of the Stick, there was a time when Elan got separated from the party and encountered a Mind Flayer. He then asked it if it was going to eat his brain. The Mind Flayer smelled him and said "No, thanks, I'm fine". Later on, when the rest of the party caught up, the Mind Flayer jumped over Roy. Vaarsivus immediately complained, since they were the party's mage and therefore had a much more succulent brain.
* The Order of the Stick, the scent he smells that strip is unusual, but since he comments that this distress is a daily occurrence the example works.
* The Order of the Stick The second reason is "Also, I hate ye an' I want ye ta fail."
* The Order of the Stick The snag is that he's in a stick-figure comic where there are no shadows.
* The Order of the Stick. The strip title lampshades this: "It's Not a Gaming Session Until Someone Quotes Monty Python".
* The Order of the Stick they are both attracted to each other for a very long time.
* The Order of the Stick they lived in has been a driving force in Haley's life.
* The Order of the Stick, they put aside their differences and develop mutual respect.
* The Order of the Stick. They really start to reconsider their life choices after this.
* The Order of the Stick, this happens when Xykon steals something from Eugene Greenhilt's master Fyron. Eugene asks what a Sorcerer is, and Fyron goes into "Lecturer-mode" to give a less-than-flattering description of Sorcerers, heedless of Xykon's anger.
* The Order of the Stick, this is Roy's completely justified response to the suggestion of diplomacy with Xykon.
* The Order of the Stick, this trope is the reason for Andi's dislike of Bandana, as Andi once served as Bandana's babysitter and has never moved on from seeing the latter as an annoying child. This way of thinking eventually gets a dose of reality applied to it during Andi's attempted mutiny: Andi thinks she'd be a more capable

captain, but once she forcibly takes charge, she finds herself unable to do it. Bandana legitimately was the most capable person for the job, but Andi could never see that because she refused to see Bandana as anything but the annoying kid she had to babysit for years.
* The Order of the Stick. This wasn't that drastic, as she seemed more ambiguous than masculine prior to this — insofar as she even seemed human at all.
* The Order of the Stick Thog in melee combat, they decide to retreat into the building in order to lay an ambush instead.
* The Order of the Stick, Thog makes the "talky man" (Roy) shut it with a rock to the face.
* The Order of the Stick (thog not human footstool. thog HALF-human footstool.)
* The Order of the Stick to a member of their group that they didn't get along with in the first place. It turned out that the coordinates Girard gave Soon for the location of his gate turned out to be a random spot in the middle of the world's largest desert. Because he didn't trust him. For a while, the Order of the Stick was stuck back at square ZERO because not only did they not have any idea where to go, this time they couldn't fall back on the Sapphire Guard for information.
* The Order of the Stick to anyone who hasn't read through the whole archive. It's exactly like joining a RPG campaign in the middle: you'll still get the gamer jokes, but who are all of these NPCs?
* The Order of the Stick to a royal parade, a dumbstruck Vaarsuvius remarkes that they should avoid casting magic for the rest of the day, "if only to give the laws of physics time to cry alone in the corner."
* The Order of the Stick to ask about something his mother refuses to talk about.
* The Order of the Stick to create believable characters with interesting motivations.
* The Order of the Stick to disguise himself from assassins, forcing him to improvise a wig from a mophead.
* The Order of the Stick to Haley shooting dozens of hobgoblins while sustaining virtually no damage.
* The Order of the Stick to it". However, Redcloak himself gets an enhanced lifespan from the Crimson Mantle he wears, yet he remains very private about that matter.
* The Order of the Stick to kill Xykon, so he can't move onto the afterlife until the lich is dead.
* The Order of the Stick to learn this because he'd much rather be buried with his ancestors than to die somewhere else.
* The Order of the Stick to let the nobles think he was a less effective ruler than he actually was. Starting very shortly after taking the throne, Hinjo suffered a series of assassination attempts from Daimyo Kubota until Kubota's death.
* The Order of the Stick to poke fun at the comparatively limited range of the human characters' senses against those of the other races.
* The Order of the Stick to posing as a zombie. Hilariously enough, one of the goblins they are trying to fool suspect something — resulting in Belkar stabbing him to death before asking if anyone else feels like questioning what he is. The remaining goblin wisely decides to not ask further question.
* The Order of the Stick to Rich Burlew's critics who thought he used stick figures because of a lack of artistic skill.
* The Order of the Stick to some lantern archons in an attempt to finally escape the darkness he lives in.
* The Order of the Stick to teach new readers the basics of the game, such as trying to explain armor penalties to Elan, and an entire strip dedicated to classes and features that use the 12-sided die. There was even a page where the characters debate whether to update the comic to 4th or 5th edition rules, concluding that they don't want to have to rewrite the tutorial strips or gags using now-outdated mechanics.
* The Order of the Stick to the author of OOTS.) Furious at having Baker chosen over him, Xykon decided it was time to quit being an apprentice and go into business as a villain for himself.

* The Order of the Stick to them yelling and kills them before they can land the blow.
* The Order of the Stick to trick hobgoblins guards, with Haley and Belkar pretending to be corpses. However, the guards get suspicious and demand she demonstrates her necromancy. When Belkar doesn't initially respond to "Darkblood Gloomgloom" pronouncing a fake incantation, Celia smacks him.
* The Order of the Stick tried to break out of prison once by using an illusion of a woman to seduce the guards. This failed due to one guard being married and the other being gay.
* The Order of the Stick, Tsukiko's fascination with death seems to extend to a physical attraction to the undead. Unsurprisingly, she tries to hook up with Xykon (a skeletal lich).
* The Order of the Stick.) Ultimately, the point is that humans or more broadly speaking mortals are flawed, but that's okay as long as they keep trying their best because they're not perfect given the nature of life.
* The Order of the Stick until his UST-target shows up and complains, at which point he defends himself by claiming that seducing the beautiful villainess is part of his solemn duty as a Bard.
* The Order of the Stick uses an eye loupe to examine the Ioun Stone Blackwing has seized from Laurin Shattersmith in the previous book.
* The Order of the Stick usually calls Roy Greenhilt by the names "Bluepommel", "Redblade", "Orangescabbard" or some variant thereof, if he even remembers who Roy is at all.
* The Order of the Stick Vaarsuvius is an evoker (specializing in a school of magic that deals direct elemental damage) which means that in a battle they can slaughter masses of mooks. As their barred schools however, they took necromancy and conjuration which contain some of the most useful spells outside combat - especially teleportation which would have solved plenty of the Order's problems. (In their defense, they took their barred schools in D&D 3.0 when teleportation was in the transmutation school. It's not their fault that the spell got moved to conjuration when the world upgraded to 3.5 in the first strip.)
* The Order of the Stick-verse, Disintegrate gets a decent amount of use. Vaarsuvius makes liberal use of it (as does Redcloak, but he tends to go after people with more HP and higher saving throws).
* The Order of the Stick very early OoTS comic implies that Roy's father and mother share realms in the afterlife, which they are later shown not to.
* The Order of the Stick, V is more willing to use spells that do not directly strike at the enemy, and thus enchanted the phylactery with Explosive Runes. The explosion almost throws the phylactery into the rift anyway.
* The Order of the Stick) V points out that they have nowhere near enough evidence to reach said conclusion... but given their past experience, that probably means they're right anyway. Although it really isn't that much of a leap from "his ex has a kid of the right age that looks like him" to "that's his kid".
* The Order of the Stick was raised by the Big Bad since he was very young. However, while monstrously powerful, he’s very childlike and for the most part harmless.
* The Order of the Stick was speaking the truth, the hobbits in his village played games like "throw the stick", "throw the rock" or "Throw the rock and then the stick shortly thereafter".
* The Order of the Stick well before it explodes, but Elan insists on waiting until the last second to leap from the exit, because that's just how these things are supposed to be done.
* The Order of the Stick, we miss Therkla's explanation leading to the conclusion "... which is why pants should be forsaken whenever possible."
* The Order of the Stick, were also present in the very first Blackmoor campaign. After all, it still was a game played by young people.
* The Order of the Stick were completely destroyed by the Snarl. The surviving gods don't tell anyone about them lest they get the bright idea to try and harness its power. Similarly, the Paladins of Azure City traveled the world to purge all

mention of the Rifts. Given Girard's bitter comment to Soon regarding Kraagor, there is a hint that the memory of their dead friend would be part of this purge. This was later confirmed as the non-vandalized inscription on Kraagor's tomb says "Sacrifice Forgotten". It's likely to say that history by and large doesn't remember him.
* The Order of the Stick when distracting the goblins with fruit pies... pisses them off because of their food allergies.
* The Order of the Stick when Durkon asks whether Roy is sure he wants to change back, and Roy irritably tells him he's been perfectly comfortable with being a man all his life — why wouldn't he want to stay one?
* The Order of the Stick, when Elan awakens in the Empire of Blood, he assumes Malack to be the "lizard grim reaper" and himself and the others with him to be dead. (It doesn't help that the first thing Malack says to him is "I will have the pleasure of escorting you to your final fate.") Haley tries to convince him Malack's just an albino lizardfolk (who, coincidentally, happens to be the cleric of a God of Death, among other things), but Elan remains set in his delusion until the next comic.
* The Order of the Stick. When Gannji says that his friend Enor is going to eat Roy's heart, Belkar suggests sautéing it in garlic first. His culinary skills are also used to track Vaarsuvius when they're sent to the Semi-Elemental Plane of Ranch Dressing.
* The Order of the Stick when his followers went on a yearlong campaign of vengeance in his name. There are also several elven deities that fit this mould, and The First King of the Dwarves also is an ascended mortal.
* The Order of the Stick - when it fails to happen at a truly critical moment.
* The Order of the Stick: When Nale is annoyed that Sabine met up with another of her old flames, she suggests, to make it up to him, they could play "Evil Conqueror and the Innocent Virgin"; Nale says that this time, he gets to play the conqueror.
* The Order of the Stick when Redcloak summons Titanium and Chlorine elementals (and probably others) to attack Azure City, remarking that he actually got a passing grade in chemistry, and that fire is not even an element, but a chemical reaction.
* The Order of the Stick, when Roy decapitates an undead dragon. Xykon points out that he controls it with his mind and it doesn't need eyes, ears, or a brain to follow his commands. In fact, the main thing Xykon is annoyed by is that the dragon no longer has teeth to bite with.
* The Order of the Stick. When Roy dons the Belt of Gender Bending, he is almost immediately hit on by both the dwarf assassin sent to kill him and by Belkar (who knows it's actually Roy but hits on him anyway to make him uncomfortable), and even Haley makes wisecracks at his expense. However, when offered the chance to either change back or stay a woman, he admits that it wasn't as bad as he'd expected going into it.
* The Order of the Stick: when Roy gets his sword fixed, he waves it around and muses on how he's felt incomplete without it. Cue Durkon yelling "Will you stop waving that thing around?!"
* The Order of the Stick, when Roy uses the belt of Gender Changing to escape being killed, Haley makes nearly a dozen jokes about Roy being emasculated, to the point that Roy mentions that technically, it's okay for him to hit a girl now.
* The Order of the Stick when the party passes through "the Passageway of Horrible Death for Other People" which is littered with arrow-riddled skeletons.
* The Order of the Stick when using it. It doesn't always work, though.
* The Order of the Stick, where Right-Eye double-checks the facts of a plan he has undoubtedly heard dozens of times while pre-lich Xykon is in the bathroom. He even ends with, "Just making sure I had it right."
* The Order of the Stick, where you are perfectly fine as long as you still have 1 HP, so that makes sense.
* The Order of the Stick, which shows the backstory and origins of Team Evil leaders Xykon and Redcloak, along with how the Monster in the Dark ended up as their secret weapon.

* The Order of the Stick while Belkar's age is listed as two question marks.
* The Order of the Stick while flying their airship through a narrow mountain pass.
* The Order of the Stick, while guild members who sell secrets receive harsh punishments, like, say, having any body part they're nicknamed after removed.
* The Order of the Stick: While Haley inexplicably dons black leather in her role as sneaky leader of the Azure City Resistance, it actually is LESS revealing than her normal day-to-day outfit.
* The Order of the Stick, while yelling "no, YOU'RE a homophone!" at the bemused NPC next to him.
* The Order of the Stick who can check his thinking when it comes to subterfuge.
* The Order of the Stick, who declines to finish off Crystal because he recognizes her as Haley's nemesis.
* The Order of the Stick, who is irredeemable through and through. Author Rich Burlew commented on this in the introduction of the book detailing Xykon's origin story, noting that such things tended to make the villain more sympathetic, and he wanted the opposite to happen. It worked.
* The Order of the Stick who Kubota was, and had only overheard the "trial" portion, concluding that indulging in such a thing would do nothing but waste valuable time and making this more of a Kick the Dog moment for V.
* The Order of the Stick with a semiconscious Elan and makes it appear that "Nale" was about to sacrifice "Elan" when the cops and the rest of the Order show up. Elan is then jailed, and Nale travels with the Order until they figure it out.
* The Order of the Stick with Belkar, during an arc in which he's imprisoned, though it could be referring to a number of places.
* The Order of the Stick with catapults (and after his victory, about to fling a bunch of humans).
* The Order of the Stick with Eugene Greenhilt, who has no idea what's happening in his son's soccer game. His wife points out that he's more than smart enough to understand how the game works, he just doesn't care enough to devote the ten minutes to learning the rules. And the fact that he cares so little about his son's pursuits is not lost on Roy.
* The Order of the Stick with them ended after V zapped Xykon's prize possession with them.
* The Order of the Stick with Therkla, who decides to help Elan after gaining a huge crush on him.
* The Order of the Stick with the weasel that provides the page quote.
* The Order of the Stick with, "Uh, actually, I want you to bring them here alive for trial."
* The Order of the Stick), Xykon decides to leave home and turns his parents into zombies on the way out. He had previously done the same to his grandmother.
* The Order of the Stick: Xykon only has one regret about becoming an immortal lich; he can't enjoy coffee. He enjoys the invulnerability, the regeneration, and the fact that he doesn't have fleshy problems anymore.
* The Order of the Stick. Xykon proclaims that his goals will be achieved soon, Red Cloak and the Monster in the Darkness laugh. Redcloak asks why Xykon doesn't laugh.
* The Order of the Stick Xykon repeatedly corrects people who spell his name "Zykon"... even in their speech balloons. It's possible that the two names actually are pronounced differently, though.
* The Order of the Stick. Xykon's not interested however, as he's "not one of those disgusting biophilliacs".
* The Order of the Stick: "Xykon, sorcerer. A man barely alive. Gentlemen, we can rebuild him. We have the magic. We have the magic to make the world's next undead sorcerer lich. Xykon will be that lich. Deader than he was before. Deader, faster, stronger." and so on.
* The Order of the Stick, you'll immediately get the picture that V is very attractive.
* The Order of the Teutonic Knights of St. Mary's Hospital in Jerusalem (or
* The Order of the White Lotus secret society inconspicuously integrates their symbol into their surroundings, to denote a friendly place.

* The Order of Whispers was founded to pursue such conflicts. They have watched over Palawa Joko's tomb, kept the existence of Abaddon and his demons from public knowledge, and a century before the game even interrogated and imprisoned a Titan.
* The Order, poor Mulholland Black was turned into a living WMD by the Black Dahlias.
* The Order's bard Elan gives a speech to Azure City's troops before battle, an act he calls a Bardic Right of Passage. The speech conglomerates most well known quotes in this entry, each time examining the statement a bit
* The Order's first battles is against a nuclear-armed team of Russian supervillains who are completely unaware that the Cold War has been over for two decades.
* The order's name can also call to mind the famous Latin question, "Quis custodiet ipsos custodes?"
* The Order spends a day searching the desert for leads on one of the Gates
* The Order. Then, in a 2018 story, they got attacked by Armoured Gideon, a character last seen in his eponymous series 23 years beforehand.
* The Order, they turned to assassinating current and former members of the Order, realizing that they would not be able to continue their former non-lethal activities as long as California had a government-sanctioned super-team running around.
* The Order. Unfortunately, Marvel had lost the trademark to the name "Champions," so the series had to be named something else.
* The Order us tomorrow?" The next day, everyone who went out that night is fired — turns out they violated the morality clause in their contracts.
* The Order was a track and baseball star throughout high school and into his college years, due to his phenomenal running speed. He was even on the cover of Sports Illustrated, referred to as "the boy most likely to succeed." Not long after, he lost his legs in a car accident.
* The Order, where Milo Fields was a fourth-generation marine who grew disillusioned with the military after seeing how the Somali Civil War — in which he and his platoon fought — was turned into propaganda to convince impressionable kids to sign up for the war in Iraq.
* the Order, who faked his own death in 1865 and went into hiding, until the guilt caught up with him decades later and he started drunkenly announcing the truth. So Cade hunted him down and killed him.
* The Order, who Veda described as "Tim Burton sponsors a women's golf team".
* The Ordinary Princess: The titular character is a seventh child and her full name has seven words. Her name is Amethyst Alexandra Augusta Araminta Adelaide Aurelia Anne.
* The Ordinary Princess: Well, the wedding occurs at the end, but is followed after by the honeymoon before it "The End" is said.
* The Ordning as it applies to Frost Giants is based on pure physical might, with rank determined by challenging other giants to things like wrestling bouts (you get their rank if you win, and they have to take yours).
* The Ordo Hereticus (the third branch of the Inquisition) is responsible for hunting down cultists, mutants and... well.. heretics.
* The Ordo Malleus section of the Inquisition is charged with investigating suspected Chaos activity and putting a stop to it before it gets out of hand. Best case scenario is that no more than a dozen people end up getting killed, while the worst case scenario may well involve an Exterminatus — an order to have an entire planet
* The Ordo Xenos deals with the Threat Without, investigating and eliminating
* The ore dwarves are unyieldingly conservative, obsessed with mathematics, and still live the original dwarven homelands. They distrust the open air and rarely leave their richly decorated underground holds, and scorn the other dwarves for abandoning their old traditions and for their love of excitement and celebration.
* The Oregon Files can be moving so fast without highly advanced turbines developed after it was built. The fact the ship was moving when the bridge telegram was at "all stop" and it took several minutes for the "smokestacks" to billow out smoke

added to it. The clincher is her pulling back a painting on the wall to reveal a hidden camera as she'd seen Juan glancing to it a few times during their talk.
* The Oregon Files connections during a party. They end up impersonating everyone from the band, to security guards to a mercy flight helicopter pilot. The only ones who aren't involved in the con are the police and most of the guests.
* The Oregon Files, Juan Cabrillo, the leader of a team of heroic mercenaries, has a high-caliber pistol built into a false foot — in addition to a number of other goodies, making it something of a Swiss Army Foot.
* The Oregon Territory was divided between Britain and the United States in 1846, with the northern portion becoming British Columbia and the southern portion (modern-day Washington, Oregon, Idaho, and western Montana) going to the United States. This expanded the USA to the Pacific Coast.
* The Oregon Trail. Bears are always eating party members. 'Specially if you try to hunt them.
* The Oregon Trail features a law firm in the default starting town, with the standard name of Dewey, Cheatum, and Howe.
* The Oregon Trail: Forget braving the wilderness, there are people who'll try to kill all their party members before reaching the first fort, usually by doing normally stupid things such as fording rivers that are above fording level, not treating injuries, and getting themselves shot on purpose.
* The Oregon Trail, Fort Boise and Sutter's Fort are abandoned in the 1850s, as in real life. The Whitman Mission will also be abandoned after 1847 or so.
* The Oregon Trail. Fortunately, you can avoid it if you have cash on hand and aren't a greenhorn. Also, if you're going to California or the Rogue River Valley, you must cross a large, unskippable desert.
* The Oregon Trail partially met this progression, especially for those who branched off onto the California Trail near the halfway point. The jumping-off point (commonly Independence, MO) would lead through relatively easy terrain of grasslands, springs, gentle rolling hills that weren't too difficult to cross, and an expanding set of bridges and ferries to allow those with money to cross rivers easily. The land would steadily get drier as the pioneers headed west and encountered treacherous mountains; while those going to Oregon would find green land and forests near their destination, travelers to California would finish their journey with long stretches of desert and more mountains. Many expeditions (most infamously the
* The Oregon Trail series features lots of these, many taken directly from real life.
* The Oregon Trail was largely a text-and-pictures wagon trail simulator, but included a hunting scene in which the player had to go out and shoot dinner in a manner reminiscent of the arcade shooter games of that era. The rafting down the Columbia River was necessary if you didn't have enough money for the Barlow Toll Road and made more difficult by the fact that the only practice you got came only after the requisite hour of play to get to the end.
* The Oregon Trail, you can play as a trail guide and monitor an entire wagon party. If you let the morale get too low, your party will kick you off the train and the game will end.
* The Oregon Trail: "You're Fired!" (kicked out of the wagon train), if you're a trail guide and morale gets too low.
* The Orem Owlz were one of the final examples of a period of history in the state of Utah when this trope got out of hand. After people started making the connection that the three main professional sports teams in the state all had a double Z (the Jazz, the Grizzlies and the Buzz) people decided every team in Utah needed to follow suit. This led to such team names as the Freezze, the Starzz, the Blitzz and the Owlz. Even the Buzz was changed to the Stingerzz for a while. This fad has since been proven to be stupid and doesn't show up with new teams. And at least one of the "zz" teams abandoned this; the former Buzz/Stingerzz/Stingers are now the Salt Lake Bees (reinstating the name of a historic Salt Lake City minor-league franchise).
* The Oresteia as during the premiere of the play the haunting song of the furies

caused a pregnant woman to promptly miscarry and die in the process. One could probably write a tragedy about that too.
* The Oresteia, is about a set of interconnected cycles of revenge that stretch across three generations and involve multiple deities on different sides. In the end, Athena has to be brought in to sort it all out.
* The Oresteia, it is revealed that Artemis saved Iphigenia from actually dying, and took her away to be her priestess in Tauris. When Orestes is acquitted of murdering his mother Clytemnestra, Apollo orders that he has to atone by traveling to Tauris, stealing the statue of Artemis and bring it to Athens. Orestes and his friend Pylades are captured by the Taureans, but Iphigenia recognizes her brother, who she thought was dead. Iphigenia helps Orestes and Pylades steal the statue of Artemis, and accompanies them back to Athens.

* Theoretically, one could prevent a prophecy by killing the person that the prophecy is about, but on the occasions when somebody actually had the opportunity to do this, they were too scared to try because they believed that fate would retaliate by sending somebody worse to fulfil the prophecy.
* theoretically platonic: Grant occasionally makes it his goal to get an emotional reaction out of Alucard.
* Theoretically, she could still have these scars in her other forms; we've just never seen them. Angewomon has gloves that automatically cover almost all of her arms, Nefertimon has gauntlet-like armor on
* Theoretically someone eventually ends up cheating and turns the match into a free-for-all that usually isn't finished (typically because the ball has been obliterated in some form).
* Theoretically this trope could be used to treat a rabies bite. Rabies is unusual in that it travels along nerve fibers instead of the circulatory system making its spread very slow. This is what allows the rabies vaccine to work even if its administered after infection, the body has time to develop an immune response before it reaches the central nervous system and becomes almost certainly fatal. Of course with the vaccine available amputation becomes completely unnecessary, allowing you to keep both life and limb.
* Theoretically to your side, especially once the aliens start using mind control.
* theoretically were only very small with the former never having more than 10,000 men and the latter no more than 60,000. While the Polish-Russian kingdom fielded as many as 200,000 Polish troops, including some with very good (in relative terms) training and morale, they were as unreliable as their German and Austro-Hungarian counterparts and were never used in combat if STAVKA could avoid it.
* The organ donor system; you agree to it, then fall over dead, and some doctors cut all the useful bits out of you to use in someone else. Often it is illegal for the donor's family to profit by this; in some countries there is a small payment. Likewise with donating eggs, sperm, blood, and bone marrow — with the added convenience of omitting the "fall over dead" part.
* The Organians (original series) stated that once they were as human as Kirk and his crew, but had evolved into creatures of pure thought and energy. This is at least implied to be the origin of most

* the organization itself considers him a borderline Heretic, but he still thinks he's gonna try it anyways. In short, Cawl replaces the usual dogmatic insanity of the Adeptus Mechanicus with pure desire for discovery and innovation no matter the cost, morality or risk, which is more familiar yet terribly rare in the Imperium.
* The organization of wealthy gamblers The Black Glove led by Simon Hurt try to drive Batman to his mental breaking point in
* The organization Quantum has filled it and SMERSH's role for the Daniel Craig Bond movies.
* The organization's leader-by-proxy, Missy Coco, sees nothing wrong with blasting sailor fuku-adorned people just for kicks. When Callista was contemplating what to do with Bahija for stalking her, Missy advocated straight-up killing her. Her outlook is justified, given that she's a clone of Callista's darker traits with little in the way of morality to balance it out.
* The Organization XIII elite assassin and second strongest member of the Organization, Axel is underestimated by many characters in
* The Organization XIII has their own war room in Castle That Never Was, which is completely white with extremely tall chairs standing in a circle. There they discuss their plans, figuring out their next move or commenting on the several setbacks Sora inflicts on them.

* The orgasming robots reference refers to how the robots "come" together to make a bigger robot. Lampshaded in a future episode where the later robots don't make orgasm noises, the Red Ranger lampshades that "It's not the same as season one."
* The Ori actually pull one of these on the good guys in "Beachhead". Because the Ori Prior refuses to tell them the plan, they end up playing right into the Ori's hands.
* The Ori also used this on occasion. In "Counterstrike" Adria uses her mothership's main gun to demolish the Dakara superweapon (and most of the city along with it). In "Line in the Sand" an Ori mothership tried to destroy a village that refused to convert to Origin, but Sam was able to phase out the entire village until the ship leaves. She duplicated this feat in an alternate universe in "The Road Not Taken" by using the entire power grid of the continental United States to phase out the whole planet. Cue a rather disconcerting visual of the shot from the main gun travelling straight
* The ORIA, or Office for Reclamation of Islamic Artifacts fit the bill, but operate solely in Middle Eastern countries. Contrary to the name, they do not solely deal in Islamic artifacts.
* Theorically, a good Hora Loca mix should be made of these or being one of these itself.
* The orichalcum cards are forged by taking a piece of a green meteorite, the orihalcum, and fusing it with a blank card. The card creates a specialized field of play that that works in favor of certain strategies. Unfortunately, their supernatural powers capture the loser of the game and place him/her in a pocket

dimension to be used for a demon ritual. The orichalcum itself is the artifact that started the series - the meteor that turned the citizens of Atlantis into monsters when it crash landed, and were captured and turned into summon spirits by the Egyptians.
* The Ori continued the trend. Even with all the knowledge of ascended beings, their ships are still built by their primitive human worshipers. This one is also justified, as the Ori quite literally gain power from worship, so their entire powerbase rests on their followers being too stupid to realize they're being conned.
* The Ori could stray into this. At first, it seems that, while their practices are primitive, their ultimate goals are noble enough, helping others to achieve ascension. Then it's revealed that this is all a lie, and the Ori are manipulating people's belief to gain more power.
* The Orieni Empire, the Centauri main rival during their golden age, had an emperor, whose power basically amounted to naming warships, with the actual power belonging not to the nobles but the Council of Hierophants, chosen among the Blessed (how they call their telepaths, as they realize they're
* The Orieni Empire used to be this, giving their subjects advanced technology, a fair rule, and the ability to gain full citizenship. On the flip side, they would also culturally destroy their subjects, would not take "no" for an answer, and were rumored to kill off all telepaths from the conquered races to keep full control of the Empire (as only telepaths could reach the upper echelons of the government). In the end they started a war with the Centauri which, after both sides devastated numerous worlds, ultimately destroyed the Orieni military, came into Orien's orbit ready to wipe out the planet... and, playing the trope straight, offered peace conditions that would keep the Orieni militarily weak but preserve their independence and way of life.
* The Orieni tended to get into these: in the late 20th century-early 21st they started a war with the Centauri, who had superiority in numbers, industrial production, economy, space, and even
* Theories exist that the Great Flood story, ubiquitous in the ancient Middle East, was derived from age-old memories of from either the flooding of the Persian Gulf 8000 years ago, the sudden and catastrophic birth of the Black Sea, and/or the breaking of the Gibraltar "natural dam" causing the Mediterranean basin to rapidly refill. Before changes in sea level at the end of the last Ice Age flooded it with salt water, this area had housed a freshwater lake with an associated human population that was displaced by the sea's influx.
* Theories of International Politics and Zombies, a rare non-fiction case of this trope; it's an almost serious look at the subject, through the lenses of various theories of international relations.
* Theories on the origins of Atlantis are far ranging and include everything from islands in the Mediterranean to the continents of North and South America. Proponents of the latter theories, however, are not taken seriously because no such civilisation could have existed and left zero trace or record of its existence whatsoever.
* Theories regarding Donna's Time Lord memories/self/whatever and how she can regain them are similarly endless.
* The Origami Killer, aka Scott Shelby is revealed to be this by the game's end.
* the Origami Yoda series, frequently posts pictures of origami made by fans on his blog.
* the Origami Yoda series is this. He mostly just hangs around with his older friends and makes comments.
* the original 1954 film was a muscular, strapping, nimble, athletic young man played by the ruggedly handsome Toshiro Mifune; here, he's an enormous mechanized suit of armour with not even a visible face.
* The original 1958 movie has the heroes create a sealed evil in a can out of the title menace by freezing the monster and transporting it to the North Pole. And now we have global warming...
* The original 1966/1970s dubbing for both shorts can be found on a 1980s VHS

cartoon compilation also featuring the original 1950s German dub of the short "Ben & Me".
* The original 1970s-80s run of the show opened with Garrison Keillor singing Hank Snow's "Hello Love", a #1 country hit in 1974.
* the original 1971 "I'd Like To Teach The World To Sing", featuring the original singers and their kids. Of course, the brand name in 1990 was "Coca-Cola Classic", so the singers are dutifully singing "Coca-Cola Classic" as often as possible...
* , the original 1974 movie of that name, which was produced by Verne Gagne and starred Ed Asner, Elaine Giftos and Verne Gagne. It portrayed wrestling as a real sport, and featured a scene where a wrestler died after a top-rope kneedrop from Ray "The Cripper" Stevens.
* The original 1982 version was an early example of CGI. It consisted of coloured plastic blocks on a black background, which flew together (and sometimes apart) in a variety of ways. The 2010s version pays homage to the original but with more sophisticated CGI, by taking shots of real places and adding elements of the Channel 4 logo that come together and then apart as the camera moves around them.
* The original 1997 version the following year, it became a massive hit on American alternative rock radio and reached #6 on the Billboard Hot Modern Rock Tracks chart.
* the original Addams family cartoons are this, as opposed to their gentler TV version.
* The original ad simply says "This is drugs; this is your brain on drugs. Any questions?".
* The original advertising for the IBM PC (circa 1980-1984) featured just such a character, explicitly licensed from the Chaplin estate and performed by a professional mime Billy Scudder and modeled on Chaplin's classic movies.
* The original AI for the Babylon 5 station itself was apparently sentient. It also had an extremely surly and abrasive personality so it was disabled in favour of the basic AI seen for most of the show. One episode had the original AI inadvertently reactivated. It drove the crew to distraction.
* The original aircraft carrier was a working real-life example of this, attempting to combine an airbase with a ship.
* The "original altered timestream" comprises the first four movies:
* The original. (Although holding your breath in outer space would be a really bad idea as the air inside your lungs will expand and rupture your insides)
* The Original Amateur Hour (radio 1934–45, television 1948–70)
* The Original Amateur Hour (variety/talent show aired on radio from 1934-45 and again from 1948-52, as well as on television from 1948-70, changing networks several times across both media)
* the original and brainwashed several guards. If you're stealthy and you want some positive karma, you can snap the guards out of it and get them to flee. Otherwise, once you kill the first body . . . "Heeheehee, I'm HERE, foes!"
* The original animated series also balances quite well, even keeping some of the original storylines and adapting them to the format of the show.
* the original anime card in Jonouchi's deck; in this case, the "trigger" was Haga's "Reckless Parasite" card. (Not a real card.) Unfortunately for Haga, he underestimated Jonouchi's resourcefulness; he was actually able to use the Parasite Paraside to destroy Haga's Perfectly Ultimate Great Moth.
* the original anime dub, which only had its first 6 episodes getting released.
* The original anime had the lengthy Filler-arc, which is technically dozens of small filler arcs and episodes right after each other. Now, a few filler episodes here and there doesn't hurt. But when the last 80+ episodes in the series are all Filler... It starts to get a bit jarring. Even the final arc, which ends with Naruto and Jiraiya leaving to train isn't even canon, but it does set things up for his return in the first episode of Shippuuden.
* The original appearance of the Trill in the episode "The Host". They were given a makeover before
* The original arcade game had a chubby, mustachioed Mario (then known as Jumpman) wearing a hat and overalls due to technical limitations. The technology at the time

would not have been able to show Mario's hair sticking up when he fell, a mustache would be easier to show than a mouth at that resolution, overalls were the only piece of clothing that could also be seen with 1981 graphics, and only square hit boxes were possible. These same traits would later come to benefit Mario again in his
* The original arc discusses how the Canadian military attempted to close the US-Canadian border early on to keep the Crossed out. Unfortunately for them, it turned out the Crossed were already in Canada and by the time this mistake is realized, the Canadian forces are spread too thin and are quickly overrun.
* the original Area B7R completed the challenges by then is pretty much shit out of luck unless they have enough friends to make a full lobby with.
* the original are Jounouchi and Mai, which is more famous than Yugi and Anzu in some circles, and despite their age difference (he's 16 and she's 24 as of the Duelist Kingdom arc) it's arguably more strongly implied than Yugi/Anzu.
* The original author Lindqvist never particularly liked the interpretation that Eli/Abby is simply making Oskar/Owen the next caretaker. A few months after the remake was published, he wrote a side sequel short story in which Eli turns Oskar into a vampire. So it is canonical for book Oskar to become a vampire. But film Oskar and Owen are different continuities and different people, so the same doesn't have to apply to them.
* The original averted it so much so that those episodes which weren't "Filmed entirely on location in Hawaii" (like the two-parter "Once Upon a Time") don't carry that credit.
* The original "Baby Shark" campfire song ends with the shark eating a swimmer, who goes to heaven in some variations. Most recent renditions, including the most popular one by
* The original backstory said that the Great Spirit brought the Matoran out of darkness to the island of Mata Nui. We later find out that it was actually the Turaga who rescued them (as Toa Metru) from their ruined city of Metru Nui, they just credited the Spirit with giving them the strength and abilities to do so. (They also treated Metru Nui's existence as a
* The original Bat-Girl, currently known as Flamebird, was originally Elizabeth "Betty" Kane. Starting post-Crisis her name has been written as "Bette" instead.
* The original Batgirl wasn't technically Barbara Gordon. A few years prior to her creation, Bat-Girl (real name Elizabeth "Betty" Kane) originated as Batwoman's sidekick. She was a
* The "original" Beauty and the Beast from the fairy tale exist in this same universe too, according to a tie-in guide to the world of the films published by Dorling-Kindersley. It seems that these two had a twist to their relationship too, given that the book comments that they usually share a "glittering palace" in Far Far Away, but the Beast still has a spacious kennel to indulge his animal instincts in as well, implying that he never changed into a prince and Beauty's just fine with that.
* The original Blue Bomber himself-era characters would pale in comparison.
* the original Blue Ranger. Billy didn't have any martial arts skills in his human form at the beginning of the series and even seemed to have trouble with Rita's Putties. Following an episode that had him actually taking lessons from one of the other Ranger's relatives, he started to get better over time.
* The original book covered Elphaba's entire lifespan, from childhood through middle age. Except for a brief flashback to her birth in the opening number, the story begins with Elphaba as a young woman, and the events at the end are moved considerably earlier, allowing the character to be played by a single actress throughout.
* the original book, Dracula is a rather ugly old man who preys on young women, making him more of a monstrous pervert at the start; however, he becomes younger and better looking with the more victims that he feeds on. In later adaptations, Dracula is often transformed into a suave, sophisticated, exotic, and darkly seductive presence. Dracula's vampire wives, however, are attractive even in the original novel.

* The original book had them hitting the HQ of North Vietnamese Intelligence instead.
* The original books also had sentient coaches and freight wagons, and the mind boggles at where Diesel or Electric Multiple Units would fit into all this.
* The original book version goes into a fair bit of detail regarding how Hornblower arranges a complex series of coincidences to ensure Doughty was left alone and unguarded, in a room with an open window, with the attention of the watch crew focused elsewhere, less than 70 yards from the U.S.S.
* The original book version. This one wears a black cloth mask over his whole face, has a skull-like face, doesn't have a nose, and smells like death.
* The original Borg Cube is a semi-mindless killing machine looking for technology to assimilate with itself.
* The original Brahma was a lesbian whose birth name was Madaleine; she
* The original Broadway production added lots of dialogue scenes and songs like "How Many Women" and "Someone Else's Story."
* The original Broadway version and CD have a song called "A Day For The Cat in the Hat," in which the Cat tries to entertain Jojo while his parents are attending a conference with his teacher. The song was cut for the touring production, which also featured a rewritten script that made the Cat JoJo's guide throughout the whole play.
* The original builders of the Androids on Exo III were also stated to have been a society of biological creatures who ruined their homeworld and retreated underground where they became a more mechanized, machine-like society.
* the original cartoon, Dee-Dee is a complete ditz who fools around with her brother's machines on a regular basis with absolutely no understanding what she's doing. Here, she's a canny and resourceful fighter capable of handily thinking her way through tense combat situations.
* The original cartoon had Unicron originally constructed by a being called Primacron. Every version since has used the origin that Unicron and Primus were warring brothers and Unicron being the Transformers equivalent of the Devil.
* the original cartoon, he makes Fenton recount the entire Bin when inventory comes up a few cents short. Fenton points out that his hourly rate means the time he spent on the recount actually cost Scrooge more than the little money that was missing.
* The original cartoon presented the Transformers origin as being created by a squid-robotic race called the Quintessons as slave labor. Most later incarnations, including G1 versions, have ignored that origin story in favor of the Primus-God version. Although it could be argued one does not preclude the other...
* the original cartoon related has a narrator, it’s almost always either Caroli himself or a soundalike of him.
* the original cartoon, seems to have a special connection with birds, and even learned their language!
* The original CD-ROM version came on 5 discs. The download package from GOG.com (for Mac, at least) is 5.5 GB.
* The original Clara Oswald, meanwhile, temporarily gains super-hacking skills after being partially uploaded to a data cloud in
* The original Claritin commercials involved bright, beautiful scenery and happy music. They were very uplifting and memorable, at least at the time...yet what they actually

* The original Clown in the manga claimed to be the personification of insanity (specifically, the product of Asura's massive, maddening soul wavelength). It induces hallucinations in anyone within close proximity to it. The series does have Grim Reaper characters but they're not strictly shown to be
* The original comic books featured a lot more brutality. The Turtles were constantly covered in scars, and they actually killed Foot with their weapons and decapitated Saki.
* The original comic does a good job of localizing its fascist government, and

thus making its point that such regimes can emerge anywhere, by extrapolating from traits and tendencies that were supposedly observable in the Thatcherite government of the time of its creation. The movie gives this a

* the original comics, in which she actually does go through with it. The husband would later die.
* the original comics were not at all kid-friendly. They were nothing short of bloody and ultraviolent.
* The original concept for the first Duel Pack was Missiz Freez versus Merkator. The former was replaced with Captain Amakna in the final release, but the instruction booklet found in the box still had a picture of Missiz Freez's datacard. She finally came out as part of Series 5, with a fully reworked stat card.
* The original conception for the film would have been even worse, as seen in the rejected opening, where Syndrome makes the blood-chilling comment to Mr. Incredible and Elastigirl about how they know "supers aren't supposed to breed". Very deliberately choosing the term "breed". As if supers are no more than
* The original, containing a lot of teen angst, a masturbation scene, underage sex, gay kisses, incest, suicide, and advertised "real onstage nudity", had a lot going against it. Ended up nominated for 11 Tony Awards and won 8.
* The original continuity has the Mmrnhrrm, a group of intelligent machines of unknown origin and purpose. They are 100% on the side of the good characters in the game, helping everyone fight against the Ur-Quan slavers, and among the various alien races could even be considered one of the
* The original CO of Blue Team was Captain Butch Flowers, but when he died of aspirin overdose, Church became the unofficial leader. Said aspirin may have also been given by a time-traveling Church from the future, but that's neither here nor there.
* The original Croatian dub that airs on HRT 2, while otherwise not heavily edited, similarly has every episode split into two parts, possibly to accommodate the "Juhuhu!" block made for younger children that airs early in the morning. The newer dub by RTL Kockica - on the other hand -
* The original Crystal Gems were a much bigger bunch, but they consisted of every kind of Gem that Homeworld considered inferior: Fusions, defective Gems, Gems who wouldn't carry out their assigned tasks, ect., led by a Gem that had come to love Earth so much, she was willing to sacrifice everything for it.
* the original CT was killed, and her boyfriend took up her armor to honor her.
* The original Dai-Gurren and the Tengen Toppa Dai-Gurren (a billions times bigger version that looks more demonic). The fact that the latter can shoot inter-dimensional anchors or fire missile barrages that

* The Original Darrin: A character is recast for some time, but eventually the original actor reprises their role.
* The original DC-10 airliner cargo door fault that caused the 1974 Paris disaster. Firstly, the cargo door opened outwards, as opposed to inwards. This meant that air pressure inside the plane would naturally try to force it open, requiring a complex set of locking hinges and pins to keep it closed. Secondly, the door handle was supposed to be impossible to close unless all the pins were safely latched, but in practice, if enough force was applied to the handle, the internal mechanisms would bend out of shape without latching. So, the door could still appear to be closed and locked even when it wasn't. Thirdly, warning placards to inform the ground crew of the potential problem were installed, but they were only in English, which most ground crews around the world couldn't read. And finally, when the door blew out, the pressure change collapsed the cabin floor and severed
* The original Death's Head has several different weapons that he can swap his right hand with, including a mace, an axe, a blaster, and several different types

of missiles.
* The original DeLorean Time Machine makes an appearance sitting in Doc's garage and seems to be in mint condition notwithstanding being destroyed by a freight train at the end of Part III, though it might be possible he simply rebuilt one.
* The original Denver Broncos colors were mustard yellow and "barnyard brown", and came with incredibly ugly, vertically stripped socks.
* The original description for Autobot Commander Optimus Prime was that he had three components that he could control — his robot mode, his trailer/command base, and the small vehicle Roller. Later interpretations generally treat the trailer as non-living and Roller as an AI controlled but independent drone.
* The original doll's 50th anniversary brought the My Favorite Barbie line of toys. Each set contains a reproduction of a famous Barbie doll, an extra outfit from the same era, and a retro pamphlet of other Barbie clothes and accessories sold at the time.
* The original draft for Lucrecia's story would have had her as the one woman on Hojo's staff, being drugged and raped to serve as mother of the genetically modified baby that would become Sephiroth. This was cut and replaced with Lucrecia being a willing participant in the experiment, which has the effect of turning her originally intended
* The original draft of the script had a different ending in which all of the U.S. agents were killed
* the original Dr. Saunders, though it seems the new Dr. Saunders has at least some of his personality.
* The original DS games are also this in Japan, as they were originally released on the
* The original dub from ADV Films was voice directed by Matt Greenfield, who also voiced Makoto Hyoga.
* The original dub of the series was designed to be more kid-friendly (except the third season).
* The original DVD release of Day One did refer to it on the back of the box as the CIA's Counter Terrorist Unit. Apparently it got retconned once the show got picked up for a second season.
* the original Eldar civilisation) rips their soul out instantly. Anyone else feel like practicing self-denial?

* The original ending has Lovett surprising old Rose before she throws the Heart of the Ocean into the sea. She explains that the reason she contacted them in the first place was because she wanted to throw the Heart on the place the Titanic sank.
* The original ending of 1941's "The Heckling Hare" had Bugs Bunny and Willoughby the dog falling down from
* The original English dub mentions a "Universal Language", but this isn't in the Japanese version.
* The original English export version was dubbed by General Screen Enterprises, Ltd. in the UK, and was shortened by 10 minutes from the Hong Kong theatrical version. This has Daniel Flynn providing the voice of Jackie, whose character is again named Kevin. It only saw release on VHS in the UK and Europe, before it was included as a bonus feature on Eureka's 2018 Blu-Ray.
* The original English voice of Ash, Veronica Taylor, is a believer in the theory that Giovanni is Ash's father. Giovanni is considered by fans to be one of the main contenders for being Ash's father.
* The original entrance to the MGM Grand Las Vegas was a giant, gold-colored lion's head (representing MGM's iconic mascot). It was replaced during a later renovation, partly because — to Asian visitors — entering a lion's mouth is considered very bad luck.
* The original episode "Police Stop!" from 1994 is retitled as "DANGER! DRIVERS AHEAD" on-screen and the show re-titled to
* The original EU heavily implied that the Clone Wars were fought by the Republic

and the Jedi
* The original even included faint outlines of the ghosts that could be seen with the complimentary color filter cardboard glasses.
* The original example, from "Balance of Terror", was essentially so the show could do a wartime submarine drama

* The original fic to anyone except reptilian Shadowkind. You need a special permit to sell it legally.
* The original film after his widely publicized problems with substance abuse derailed his career. Appropriately, Tony Stark's struggles with alcoholism have long been a major element of the comic book's mythos, and the first movie is ultimately about Stark resolving to turn his life around after getting a second chance at life.
* The original film and leads to a brief freakout as he finds himself in her bedroom.
* the original film attacks two girls inside the room that they barricaded themselves in, they manage to momentarily knock him out with a baseball bat. They then start removing the makeshift barricade from the door, ignoring the unconscious killer lying helplessly on the floor.
* The original film had the angels who were providing supernatural help in baseball games throughout the season quit because Duffy's angry outburst violates the terms of the agreement. They reveal that they had gradually been helping less as the team's morale improved, so they should be okay on their own in the playoffs.
* The original film is a textbook example of this. After young teenager Jim Halsey manages to thwart serial killer John Ryder's attempt to add him to one of his list of victims, Ryder becomes
* the original film is discovered inside a fridge when a younger character tries to snatch a beer from it.
* the original film only became "Episode IV" once its sequel was greenlit, and the number along with the subtitle "A New Hope" was added in a reissue.
* The original film set in space instead of feudal Japan. Lucas is pretty up front about this (which is smart — if you've seen both, it's so evident that any attempt to deny it would be an obvious lie).
* the original film vomits. This trope probably was used to leave what Stitch said deliberately to the imagination, as there isn't much in the way of utterances left that would inspire such reactions from contemporary 21st century viewers.
* the original film when people begun to realize that the Kaiju are adapting to fighting Jaegers by targeting the pilots and its power sources. A mere five years later, the Jaeger program is on the verge of a shutdown because Jaegers are being destroyed faster than they could be built.
* the original film, Woody and Buzz use a drink cup and a burger box to sneak into Pizza Planet.
* the original film would have involved this trope as well, with the gang chasing down the loot after it falls into the hands of the French mob.
* the original final video video series, the Old Spice man gives a fond farewell to his viewers:
* The Original Flatland CD-ROM in 1998 and later relaunched as a stand-alone PDF with additional material in 2006 with profits from the sales going to the Doctors Without Borders charity.
* The original focus is on high school seniors Nipsy, Conrad, and the Horse. The actor playing the Horse quits after two seasons, and the actors playing Nipsy and Conrad quit after another two, so over half the series' run features none of the original main trio, although members of their families — the Horse's psychopathic cousin Mangler (added in the second season), Conrad's sexpot sister Buffy-Lu (an original cast member) and alcoholic, widowed mother (added in the fourth season), and Nipsy's pre-teen brother Pooky (added in the third season) — remain for much longer.
* The original folklorish vamps were either disease ridden monstrosities or soul-

sucking ghosts; in either case, their mere presence was likely to harm you, and though you could ward them off at night you couldn't actually kill them until the daylight hours, and sometimes you couldn't properly kill them at
* The original formula for Lydia E. Pinkham's Vegetable Compound, sold as a cure-all for "female complaints", included some herbs still recommended by alternative medicine for treating menopause symptoms. It was also nearly 40 proof

* The original game, Alex Kidd, while still having a bit of lighthearted cartoon appeal lacking from Sega's other arcade ports and more mature games for their console.
* The original game also has this, but it's not explicitly pointed out: the psi-labs note that humans have psionic potential, but to make use of it, they need to have implants drilled into their heads, and connect with the psi-amp device. It doesn't negatively affect performance of the soldiers. The reboot makes the activation of psionic potential a purely genetic sequence.
* The original game/Classic has: Shadowfang Keep, which is filled with ghosts and
* The original game did this too, after you rescue Tooty... who then berates you after the credits to get off your lazy ass and go finish off Gruntilda.
* the original game falls prey to this trope. His pants descend slightly each time he's hit until he's left naked; as a result, he grows red with embarrassment, bounces around the arena, and explodes.
* The original game had a "Custom Night" where you can set the difficulty level of each animatronic. The highest difficulty was Level 20, and thus setting all four animatronics to 20 was known as "
* The original game had a major become an admiral. That's not even trying.
* The original game had a variation of this: the Koopa Troopa enemies will either have red or green eyes depending on the color of their shells.
* The original game has a minigame where Travis has to scoop up scorpions while avoiding stings.
* The original game has a "Rags To Riches" mode, where you take part in an
* The original game has one of the less abstract uses of the spell book trope in video games. A spell book, when read, simply adds that spell to your repertoire so that you can use it as much as you want in future (as long as you have enough
* The original game has Rebecca Lansing, a Counter-Terrorist consultant who helps you through the entire game.
* The original game has the main character's eyes popping out of the Freddy suit he gets stuffed into on the
* The original game has them as common aquatic enemies. There are two variations of them, a younger, smaller, but faster blue shark and an adult, bigger, but slow green one. The former are actually the more dangerous enemy, as they frequently swim in large packs.
* The original game has the Pig Star, a pig-shaped space station which serves as the seventh stage. In this stage, Sparkster faces off against Emperor Devligus Devotindos, only to discover that
* The original game included a spell called "Clone". It made a magical duplicate of someone, and when they became aware of each other's existence, each was filled with an unrelenting desire to kill the other. (Assuming the original was still alive; more than likely, the spell was not designed with this in mind.) As of Third Edition, the "Clone" spell now just creates a lifeless copy of the user's body. It needs to be preserved somehow or it will rot (a relatively simple spell takes care of that), but if it is still intact when the original dies, they reincarnate in that body (though the clone does not gain any knowledge — i.e. experience or abilities — that the original gained since the clone was created). However a

similar effect is preserved in the expensive item "Mirror of Opposition". It creates a temporary clone whose only purpose is to kill the original.
* The original game is not a definite case, since no pictures or descriptions are provided — but what sort of emu lives in a dungeon?
* the original game, "It's a secret to everybody", is sometimes quoted as "everyone".
* The original game let the Allied chronosphere perform this on when used on an APC, always disintegrating the passengers. You could only chronoshift into an empty space, though, avoiding the most common kind of tele frag. It was also possible for overuse of the Chronosphere to create a "Chrono Vortex", a swirling distortion of space and time which would destroy things that were too close to the distortion.

When Hiroi presented his proposal to Irimajiri at Saipan, the latter became enthusiastic and once the two returned to Japan, the game's development began.
* the original game, this trope was part of the back-story for how Agents Hermann and Navarre became mech-augs.
* The original game was once rumored to have a fifth age called the "Thelastic Age", as well as a red button in the Selenetic Age maze. The later
* The original game was originally paid for on iOS devices and PC. However, when it was ported to Android, the developers decided to make it ad-supported freemium. But only the Android version. The other versions are still commercial. Averted for the games released after the original, as they were available as ad-supported freeware for Android from the start.

* The original German dub is better received than the more professionally done later versions for this reason — it particularly made a few heads explode by having Vegeta voiced by the same guy who dubbed Steve Urkel on
* The original Golden Age Cheetah is a sultry murderous socialite named Priscilla Rich. Mad gymnastics skills translate into a great deal of agility in combat —enough to enable her to keep up with an Amazon. She wears a costume crafted out of genuine cheetah fur.
* The Original Grease, but was cut so the show would not run too long.
* "The Original Grease" "Hand Jive" and "Boogie Man Boogie", with the former being used to end off the dance sequence. The "Greased Lightnin' Reprise" from the '94 Broadway version wound up included as well, as another solo for Rizzo. "Kiss It" and "All Choked Up" are also paired together.
* The original Greek Muses: The nine Greek Muses represented art forms that are almost all discarded now (though the Muses live on, they've been reincarnated as patrons of different arts). Clio (Muse of History) and Terpsichore (Muse of Dance) are the only two Muses you can expect a reasonably large number of people to remember, and then only because their names live on in the somewhat obscure words "cliometrics" and "terpsichorean."

* The original Gundam's Core Fighter subverts this, since its main purpose is to preserve the Gundam's learning computer and its compiled combat data, with letting the pilot escape alive being a side-benefit.
* The original had an entire subplot dedicated to the architect behind the Spencer Mansion, George Trevor, which was completely scrapped from the game, though the developers left his (now nameless) tombstone to be found after defeating Yawn the Snake. His entire subplot was restored in the 2002
* The original Hamster Dance did this to many people — it was even turned into a commercial to show how truly disturbing and annoying the site really was.
* The original has by far the biggest assortment, ranging from the strictly anti-fighter Defender on up to the Rapier, a heavy fighter-bomber that can take on capital ships in skilled hands.
* The original has "doors" which are no more than a few two-by-fours nailed together into a gate, barely as high as Lara's tall, and with plenty of room to be climbed over. Lara can't get past them without finding the switch to open them, even though she's strong enough to drag large crates and has a jumping ability to rival
* the original have the scene where Joanna confronts the mysteriously changed Bobbie and goes so far as to stab her in the stomach. The Stepfordized Bobbie doesn't bleed, instead she initially looks unfazed, but then starts repeating herself like a broken record.

* The original Hind helicopters had a crew of 2-3 men. While only two were required to fly and man the weapons, a technician had his place behind them, manning the radio or other gear.
* The original Hollywood sign is sometimes defaced. In 2017 it was defaced to say "HOLLYWeeD" and in 2021
* The original HP-12C financial calculator was one of the devices that won famously conservative bankers over to the idea of relying on electronics back in the early 1980s. When performing even simple calculations the HP-12C would go "blank" for a second before returning the result. When the electronics were modernized in later years it was discovered that the bankers and accountants that used the calculators didn't trust the instant results that the upgraded circuits were returning. To make the results more "trustworthy" an intentional delay was added between hitting enter & when the final calculation was displayed. This delay doesn't actually do anything except make the user feel like the calculator is working really hard.
* The original, human Allison is the biggest spoiler in the series, as she reveals the truth about Tex, the Director, and everyone caught in his plans.
* The original Hunter wanted to kill Demona as revenge for slashing and scarring his face. During his final fight with Demona, Demona confesses that she doesn't even remember that act, that's how insignificant it was to her
* The original idea was to include a baggie with (presumably already cut-out) badges, little pencils, and other trinkets; but would have proven too expensive.
* The original instance of this phrase comes from Trident gum, where "four out of five dentists recommended sugarless gum for their patients who chew gum". They didn't add the qualifier "if their patients
* The original intention for the series was that Korra and Mako would get together at the end of the series - back when the series was only one season. However, Korra and Mako broke up in season two, and stayed broken up. The writers began developing Korra's friendship with Asami, and finished the entire series with a shot of them walking into the Spirit World, mirroring a newlywed couple. The writers later confirmed - and added a graphic novel,

* The original Italian dub by SEFIT-CDC Group banned and left three season 4 episodes untranslated: "Cartman Joins NAMBLA" (due to Kenny attempting to force an abortion on his mother, as well as references to pedophilia with NAMBLA), "Do The Handicapped Go To Hell?", and "Probably" (both due to mockery of Catholicism and religion in general).
* The original Japanese version is much more blatant with this, while the English version tries to make it seem more like passionate loyalty. It doesn't work.
* The original Japanese version seems to depict Palutena more, with he even admits he fantasizes about her.
* The original Japanese version subverts this, by having a female voice actor (
* The original Jedi Code, from before the Order had its final schism and permanently split, shows a bit of both sides (and arguably is closer to the Jedi ideal than the later Code):
* The original Jovian and Jacqueline Kikion display this masterfully, as shown in Jovian's merciless execution of Apoch in Act III chapter 41. Rason even outright states in Act IV chapter 24 that the two have no regard for the lives of others. In Act V chapter 35, when Render and Leon call Jovian out for murdering innocent humans who had nothing to do with their fight, Jovian responds:
* The original jump was at least justified in that Doc Brown selects 1955 as the date he invented time travel. Going forward to 2015, at the end of the movie, was given as a nice round number, after originally intending to go 25 years instead.
* The original K9. He was built as a substitute pet for a doctor working on a space station that didn't allow dogs on board. So why's he got a frickin' laser cannon in his nose?
* The original Kanohi Masks were designed to be the collectible aspects of the toys, and in the story they could be merged to form a "Golden Kanohi" which held the powers of all the ones collected before. After the Mata Nui Saga ended, the collectable aspect faded away from Kanohi into whatever was the current macguffin of the story, eventually doing away with the "collectable" part entirely, replacing them with ammunition packs for the weapons the toys carried.
* The original katzetnik. True, they weren't barcodes, but they were unique serial numbers tattooed as identification on the arms of people interned in Auschwitz. Katzetnik tattoos are often shown as a visual shorthand for Holocaust survivors, as with the
* The original "Kawoosh" effect involved firing a jet engine into a pool and filming it underwater from a lot of angles, so it had to be reusable.
* The Original Kings of Comedy about how ghetto some weddings are: that the wedding starts late, the reverend hasn't been paid, bridesmaids and groomsmen don't match or even dress formally, the flower girl throws sunflower seeds instead of flowers, guests try to pick them up from the ground and eat them and the bride herself wears an inappropriate, too-showing dress and dances down the aisle to a rap song.
* The original "Known World" map of D&D's Mystara setting featured one empire, one grand duchy, one republic, one syndicracy, etc. It did include a number of federations, but each one used a different designation for its member regions (principalities, emirates, freeholds, jarldoms, etc).
* The original Koji Suzuki short story counts as this trope, too. Yoshimi experiences several minor paranormal occurrences, and at the end is unsure whether it was real or the product of her over-stressed mind.
* The original Korean movie arguably has the polar opposite moral to the classic MPDG movie. The male protagonists had been coasting through his college classes, basically being a slacker, until falling in love and realizing that real relationships were difficult, confusing, complex things actually gives him motivation to get his act together for the first time in his life. He goes from incompetent slacker to hard-working, composed, goal-oriented young man. It's about

him learning to be serious rather than learning to cut loose. Furthermore, what draws him to the girl is, not her 'free spirit' — which he actually find off-putting; rather it his recognition that she is 'damaged' and a strong desire to fix her. Which is just one of several ways the film mocks gender expectations by having the male lead take the stereotypically female role. (It's usually the girl who wants to heal the wounded bad boy, after all.)
* The original Lady E (see Live-Action TV above), despite being converted to a training ship and getting her shit wrecked, the
* The original Land Rover, a 4x4 designed to replace the original Jeep in 1948. Equally if not more successful as a civilian utility vehicle, it would stay in production with relatively minor external revisions until 2018, when it was reluctantly phased out due to a lack of safety features. Licensed production continues overseas, and hundreds of thousands of all marks of

* The original legend is referenced but not really followed by the origin of
* The Original Life Fiber. It technically doesn't eat the planet itself, merely draining energy from the living things instead, and once it's consumed its fill of the planet's energy, it spreads its children to other planets, destroying its host world in the process.
* The original light novel shows a bit more, establishing that Nyarlathotepians have the racial ability to reshape the facial features of their human form; Nyarko makes her face look like a
* The original lines of the sea shanty "What Do You Do With A Drunken Sailor" include the punishment "Give him a taste o' the Captain's Daughter". The Captain's Daughter was a nickname for the cat o' ninetails, meaning the song calls for a lashing. The choral "way, hey, up she rises" gains actual meaning with this interpretation, referring to the rise of the lash before it's brought down.
* The original logo of the Jacksonville Jaguars had to be changed because it was too similar to the logo for Jaguar Cars, Ltd.
* The original London version of the plot then plays it straight in act two by introducing a new Russian opponent described as "a disciplined, Soviet chess-playing machine."
* The originally-Anglican observance of Stir-up Sunday (the last Sunday before the beginning of Advent, occurring some time from 20th - 26th November, and the day on which a family should begin preparing Christmas pudding), stemmed from an entry in the 1549 Book of Common Prayer that was intended to "stir up" parishioners with festive enthusiasm a whole week prior to the actual start of the season of Advent. * The original M9 (rather than the improved M9A1 and M9A3 variants) is a failed attempt at creating a double-action/single-action semi-automatic pistol with modern safety features and chambered for 9x19mm Parabellum that is as reliable as a Beretta Model 1934 chambered for .380 ACP. An M1934 has only 39 parts, isn't made anymore, can be used in almost any climate, has an estimated service life of well over a century, and, if you're lucky, you might find one that's up for sale which costs less than an M1911. There's also the Beretta M1951, the direct ancestor of the M9, which is also in 9x19mm Parabellum, has been locally manufactured and functions perfectly in desert conditions, which led to its adoption and use by the Egyptian Army during
* the original manga in abrupt fashion: what at first appeared to be another long timeskip with new offspring characters turned out to be the epilogue, where Goku takes in a new student and leaves his friends and family to train him. After this Toriyama stuck to intermittent one-shots and collaborations, and hasn't returned to ongoing manga work since.
* the original manga Maj. Kusanagi mentions to Batou that she still has contingency plans for the Fuchikomas going rogue, but they never do, remaining loyal partners for the team.

* The original manga makes it clear that Hayate is just used to all of this and he does occasionally (maybe two or three times in over 10 years of publication) lament that his life kind of sucks. But he is always remarkably chill about the horrible things his parents have done to him and tends to bring others to tears when he nonchalantly talks about his childhood. The audience finds out soon enough that this is really because he just plain lost all love and faith for his parents a looong time ago. The first anime makes him more
* The original manga. Roughly 40 pages for each 20-minute episode is not as much space as you might think. It manages to keep more or less all of the same events; they just go by very quickly.
* The original manga take it a step further: Jagi (good-for-nothing black sheep turned unhinged psycho killer), Amiba (good-for-nothing Toki wannabe who murders countless victims in his experiments), and Uigur (sadistic petty tyrant) all are shown to be great threats before Raoh enters the picture. Shin actually gets it even worse; he's eventually revealed to have been
* The original Mask☆DeMasque gets several imitators (since the garish costume is readily available in stores).
* The Original Mattress Factory used to run ads accusing other mattress companies of doing this by advertising mattresses that "never needed turning" because they only worked in one orientation.
* The original McLeaning is referenced and parodied in an episode of
* The original medieval version: Hugh Beringar, Sheriff of Shropshire, in the
* The original Megazord had two big weaknesses. The first was that it was solar-powered. If it ended up deprived of said energy, it would lose power and shut down. The other was that it couldn't fight well underwater as it wasn't designed for traversing the ocean floor. Thankfully, Dragonzord is suited for such a thing.
* The original Megazord, the Mega Dragonzord, and the Thunder Megazord would have their eyes flash while performing their
* The original Meijer's Thrifty Acres (now known as just Meijer), a combination discount store and supermarket based in Grand Rapids, Michigan, was built with lots of windows and an extra- thick floor in case the then-novel concept failed, so that the building could be easily converted to a car lot. Fortunately, Meijer took off, so the features remained until the store was rebuilt about a decade into the 21st century.
* The original miniseries spent considerable time on shipping during the second act, only to realize that its substantially more relevant plotlines were getting less attention. In the span of fewer than 7 minutes, Korra's love interest nebulously breaks up with his current girlfriend to be with the Avatar.
* The original model could easily thrash Robopolis' robot cops, both the normal one and the more heavily armed Panthers, features numerous ballistic weapons and can fly, but couldn't take a large turbine and was wrecked when Mickey tricked PB into flying in one.
* the original movie Abydos is suggested to have a day/night cycle half again as long as Earth's when Daniel says "the gate is guarded 36 hours a day."
* the original movie and personally leads them in hunts. The hyenas don't complain about his rule this time, implying he was a better king to them in this version.
* the original movie, Doc traveled to October 26, 2015, and after learning about the circumstances of Marty McFly Jr.'s arrest, travels back to 1985 to take Marty and Jennifer to 2015, kick-starting the second film.
* The original movie had Joker seeking to poison and kill just about everyone in Gotham, first by means of a two-part poison with its components hidden in different cosmetic products and then by releasing balloons of the stuff during the Gotham City parade. Both of these things were foiled in grand fashion by the Batman.
* The original movie has the gang as adults and with real world jobs, while the sequel keeps them as teenagers.
* the original movie... in the balcony of Ford's Theatre. The first movie also ends with the main character turned into a woman and now a member of a nunnery (which is implied to allow lesbian relationships) in the country with the woman he was attracted to.

* The original movie-length pilot episode opened on an unnamed planetoid. The atmosphere isn't thick enough for humans to breathe. It's also infested with Crater Vipers.
* the original movie, Lightning McQueen is a stock car. The film's climax occurs during a race.
* The original movie mostly averts the trope, with human artifacts found in a cave looking pretty much like any other 2000-year-old archaeological find,
* The original movie touted this claim as well. Of course, that doesn't keep it from being a cinema classic.
* The original movie uses this trope to demonstrate what a dirt-poor backwater Tatooine is. Starting in orbit aboard the clean Alderaanian corvette and a Star Destroyer that invokes
* The Original Mr. Wrestling had nothing but a plain white mask. The stuff
* The original Muppet outings tend to avert the trope by including major human characters but keeping the focus on Kermit and the gang. In
* The original myth claims that Romulus killed his brother Remus, but an alternate account is that Remus survived and went on to found the city of Reims in France. Fittingly, Reims was home to a tribe of the Belgae, who notoriously gave Rome a lot of trouble during their conquests.
* The original "Napalm Sticks to Kids" song is a really really bleak example of this trope:
* The original natives of the Canary Islands (the Guanche) would walk into battle with just a spear and a handful of sharp stones... and they still managed to
* The original Naughty Dog developed games had pretty complex animation and cosmetics all around for the hardware they were on. They had a more unique way of utilising an Animation Bump in-game however, since the cutscenes tended to use far more detailed and expressive character models (likely as a result of cutscene backdrops taking up less polygons than gameplay levels). The Eurocom developed
* The original Necron fluff painted them as universally devoted to the cause of destroying all life in the galaxy (
* the original NES game as well, along with Patra, a squadron of giant flying eyeballs.
* The original New Mutants wore a black and yellow variation of the original costumes (without the masked cowls), but team maverick (and later team leader) Dani Moonstar wore fringed brown leather boots and a turquoise-studded belt instead of the regulation yellow ones to affirm her Cheyenne identity.
* The original Norwegian version from the 1950s was partially re-dubbed in 2004, replacing the voices of Mickey, Donald, Goofy, and Willie.
* The original not only features the many, many kinds of aircraft (such as Zerg Guardians) that can gun down your poor defenseless Protoss Zealots from above, but there's also the Terran
* The original novel also has a scene, not used in the movie, where a velociraptor starts eating a man's intestines while he's still conscious enough to try and push its head away.
* The original novel discusses the relationship between sex and empathy in some detail. Phil Resch advises Deckard that the way to prevent developing feelings of empathy for androids is to have sex with one, then kill it. Deckard has sex with the android Rachel Rosen, but doesn’t complete the process.
* The original novels establish the concept of "skin talk", namely direct, uninterceptible communications performed by making direct physical contact with the machine with which you want to speak. This is seen in a slightly different fashion in
* The original novel was much more explicit about this, hence the film's notoriety even
* The original number list for the Interstate Highway System back in the system's infancy in the late 1950s included an Interstate 67 that was meant to connect Elkhart, Indiana and Kalamazoo, Michigan, and later, Benton Harbor, Michigan to Grand Rapids. The former proposal was ultimately scrapped while the Benton Harbor to Grand Rapids route instead became an auxiliary highway of Interstate 96 numbered

Interstate 196. To this day, the number 67 remains unused in the Interstate Highway System.
* The original Number Two, when welcoming Number Six, tries to give him his favourite (bacon, eggs, and tea), but isn't entirely sure of the details. The trope is ultimately subverted when it turns out that Number Six doesn't especially care how the eggs are prepared or what kind of tea it is as long as it has lemon.
* The original oddball entry would be Sweden's 1965 contribution, "Absent Friend," performed by opera singer Ingvar Wixell. It was the first Eurovision entry performed entirely in a non-native language, in this case English (although Austria's 1963 entry was also partially in English), leading to the establishment of the native-language rule that would last from 1966-1972 and again from 1977-1998.
* The original Old Spice Guy, Isaiah Mustafa, was the exact opposite, being the
* The original one-minute shorts occasionally showed the four piglets nude or losing their underwear for the sake of a gag.
* The original one-page pitch for the game has the title "Fool's Gauntlet". "Stumble Chums" was also considered as a title at one point.
* The original Oxiclean ads showed Billy Mays removing orange-brown dye from
* the original Paper Mario had Bowser use his castle to lift up Peach's from underneath and into what appears to be space. With Mario and Peach both in it.
* The original "permanent statue" spell had the Gargoyles as statues until their castle "rose above the clouds." When too-bored, too-smart, and too-rich David Xanatos moved their castle onto his skyscraper, it did just that. He wanted to see if it would work.
* The original Persian Gulf War (a.k.a. Operation Desert Storm), which didn't make it past the month it had started and had the fewest casualties of any war with American involvement by the time Kuwait was liberated. While the preceding air campaign lasted weeks, Operation Desert Saber (the ground component of the Gulf War) lasted exactly 100 hours.
* The original "pig in a poke" was a suckling pig sold in a burlap bag. Unscrupulous merchants would substitute a dog or cat instead, so this is also where we got the phrase "let the cat out of the bag".
* the original pilot short, Cat Noir was a boy named Félix; he was scrapped and replaced with Adrien when the show began actual production, as the creator decided Félix was too cliché and unpleasant. Fans still loved him either way, and in fanfic, Félix often appears as Adrien's older/twin brother, who may have been his predecessor as Cat Noir or is even sharing the role with him. Félix's continual popularity eventually got him an appearance in the show, in which he's Adrien's cousin but in no way a Cat Noir.
* the original pitch, whether or not this is still the case is no longer clear.
* the original pitch (which was that Jimmy and Heloise died and went to Hell - by accident in the former's case), but since the final product makes its canonicity dubious, fans have often created their own theories in place, often with elements from the original concept.
* the original plan: remember all those stars dying before their time? Whenever a ship accelerates to FTL, entropy in the universe increases massively. The Reapers, according to the original plan, were a means of delaying the heat death of the universe by destroying civilizations that have reached the point of using too much mass effect.
* The original plans also had an Interstate 92 running from Detroit, Michigan to Benton Harbor, Michigan while Interstate 94 cut a more northerly run across the state through Lansing and Grand Rapids before turning southward toward Benton Harbor (where it would meet its present routing). In the end, Interstate 92 instead became Interstate 94's final routing, and Interstate 94's original routing became Interstate 96 and the aforementioned Interstate 196. Like 67, 92 has currently gone unused in the Interstate Highway System since.
* The original plan was to play the trope straight, but neither of the Batemans were comfortable with that.
* The original plan was wrapped up and the intended real comic began, the author

couldn't hold back, and the superhero elements were revealed after only one week of strips.
* The original play had a bit of this too, where the Player offers to put on "a private and uncut performance of 'The Rape of the Sabine Women' —or rather, wo

* The original Power Broker's business involved selling super-strength upgrades, often to villains looking to assemble Elite Mook units. The Broker himself employed a squad of such called the Sweat Shop.
* The original power multiplier are the Power Stressed forms, that increase one's muscle mass and power... And consume stamina much faster (in the original series Master Roshi managed to blow up the Moon, but completely exhausted his power in the process). Furthermore, if one goes overboard their muscles will become so large they'll obstruct movements,
* The original premise of the show was that the Mads (mad scientists) stranded Joel in space specifically so that they could steal his inventions. In several episodes, during the Invention Exchange, Joel complains when the Mads steal his ideas. The Invention Exchange didn't really last long after Joel left, however... instead of inventing stuff, Mike would fill his time by either confusing the Mads (for example, by pretending to be a drive-though restaurant, or shilling them "bold" BBQ sauce), or attempting to escape (for example, challenging Pearl to a game of three-card Monty).
* The original prototypes all suffered mental breakdowns. The reason? They had human-level potential but were treated as mere machines. Only their creator realized this so he took one home and treated it
* The original publishers count as well, deserving credit for backing a work of genius even though they thought they might lose money on it. (The first print run, 3,500 copies, sold out within six weeks.)
* The original Pyrrhic Victory would be the Imperium's triumph over Chaos during the
* The original Queen dies, the Vord revert to their simple, individualistic natures, but because they're arranged in a massively tight formation charging into the Aleran defenses, they still have no choice but to keep attacking. Although the battle is made easier since the Vord near the back will desert and some others might resort to attacking each other, the Aleran forces still have to fight on for several hours after their victory is assured.
* The original radio edit of Eve's "Let Me Blow Your Mind" simply blanks the cuss in the line, "Don't fight that good shit in your ear / now, let me blow your mind". A cover by Shawn Lee's Ping Pong Orchestra, however, has the line, "Don't fight that [boing] in your ear...", making it sound like something else entirely is being inserted into the listener's ear.
* The original radio version has Arthur convincing Prosser to hold the bulldozers while he goes to get a drink. In the book, Ford not only performs this act, he also convinces Prosser to lie down in front of the bulldozer as a guarantee that it won't destroy Arthur's house. The former version makes Arthur look a bit eccentric, but the latter showcases Ford's alienness.
* The original reason the Catholic Church specifically does not consider seafood to be "meat" was so that poor people would have something to eat on "meatless" Fridays and during Lent.
* the original Red Baron, considered by many to be the greatest air combat pilot in the world, piloted (of course) a red triplane. He, in all likelihood, was the one to popularize this trope. Following his example, his squadron-mates started painting their aeroplanes up in funky colors as well so he wouldn't stand out quite so much. Richthofen's squadron ended up being so colorful that its actual name, "Jagdgeschwader 1", gave way to the nickname "Flying Circus". Before long, practically the entire Imperial German Air Service was trying out the Law of Chromatic Superiority. German pilots found that, while red paint didn't make their

fighters fly any faster, it did make them easy to distinguish from the universally khaki-colored British aircraft in the middle of a dogfight.
* The original region. The seaside Vermilion City, for example, is where the major seaport city of Yokohama is. Saffron and Celadon, the two largest and busiest cities, are located roughly where the Marunouchi and Shinjuku districts of Tokyo are.
* The original release by Pioneer carried a 13-and-up age recommendation, until the film officially got an R rating by the MPAA.
* The original rule of 25 missions was set to give the average crew about a 50/50 chance of surviving to completion. As survival odds went up, so did the required missions. The commander is just more enthusiastic about it.
* The original run of long-running (1954-93) weekly UK football comic
* the original Salmissra desperately horny and can actually even think straight.
* The Originals and wordlessly holds it to her, though he doesn't avert his eyes. She rolls her eyes at it, but takes the towel and wraps herself in it before walking away.
* The original scrapped idea for Disneyland's second park, WestCOT (which would have been Disneyland's version of Epcot), is widely preferred by fans over the second park that did get built, Disney California Adventure.
* The original script included a sequence (included in animated form as a DVD extra) of what Dante and Randall did at the funeral of Dante's ex-girlfriend. However, Smith didn't have the budget to rent a set and a bunch of extras in nice clothes, so just shot Dante and Randall entering the funeral parlor and immediately cutting to them

* The original series also subverts this by having the Doctor traumatized by seeing an alternate Earth being destroyed in the story "Inferno".
* The original series also usually used a shot of the ship next to a globe that was supposed to be whatever planet it was visiting, even though India rotates through the shot.
* the original series and stares at her breasts. In the original Japanese version, the old man says that he will be looking forward to having fun with her in a few years, whereas in the English version, he tells her that she reminds him of his granddaughter.
* The original series, at least in the dub, had a lot of this with talk about things being fated to happen, the character named Ishizu Ishstar was the main instigator of this. Being the keeper of the millennium necklace, which grants her the power to see the future, she would accurately prophesize the great battle between good and evil, and would warn the main cast of the terrible things to come. She was also the one to reveal to Yugi and his friends of his ancient past and his greater destiny, she attempted to do the same with seto kaiba but kaiba practically mocks her every single time and always screwed destiny. Even after she gives away her necklace, Ishizu continues to prophesize the coming battle, so, so much, its like her most common dialogue. The 2nd season

* the original series: at the start the protagonist Saints are using their Clothes to fight in the Galaxy Tournament, and the Sanctuary, upon hearing of this, sends another powerful Saint (Hyoga in the manga, Ikki in the anime) to execute the lot of them.
* the original series at will both in the series and in the fourth film. Although later series have a "time police" to put the kibosh on time travel.
* The original series didn't go into as much detail as to how the Third Doctor managed to keep covert in 1970s Britain, but it can be safely assumed that UNIT was more than able to provide him with enough documentation to keep Inland Revenue

happy. By the time of the revived series, the Doctor's psychic paper usually manages to serve this purpose for them — and they're no longer stuck on Earth, anyway.
* The original series ended in 1989, and the TV movie that followed it up aired in 1996, 7 years later.
* the original series episode (here, unusually, the goal seemed to be not to allow a long trip, but to ensure there would still be Klingons around in case a war went badly).
* The original series episode "Last Stand at the Last Chance" featured an alien cat villain with an Australian accent named Cat Scan.
* The Original Series episode "Pyramids of Mars" has Sarah Jane asking the Doctor why they have to risk their lives to save Earth in the past, since they both know Earth is just fine in the present. The Doctor answers her question by bringing her back to the present... and opening the TARDIS door to reveal the wasteland the present will be if they don't stop Sutekh in the past. So they go back and stop Sutekh, and the wasteland present never happens, but the Doctor and Sarah remember it.
* the original series even though he'd practically admitted that there were less-than-merciful motives for the "assisted suicide" all along.
* The original series explicitly identified the Rangers' mentor, Zordon, as
* The original series, first aired on Japanese television in 1995-96, is explicitly set in the year 2015, with a
* The original series got the franchise's first true form change with his Charge Up form, which is much stronger but has so much excess energy that he has to use it all within one minute or else he'll explode.
* The original series had a different rank system: Rookie, Squaddie, Sergeant, Captain, Colonel and Commander. Rookies are automatically promoted to Squaddies after their first combat kill but the rest of the ranks are dependent on the global number of Squaddies you have: 1 Sergeant per 5 Squaddies, 1 Captain per 11 Squaddies, 1 Colonel per 23 Squaddies and a single Commander once the player has least 30 Squaddies. Promotions happen automatically whenever there's an opening, with the maximum number of officers
* The original series had a man show up claiming to be Marty's spirit in another man's body... except since the real Marty's spirit is still hanging around haunting Jeff, Jeff knows right away he's a fake.
* The original series had Cylon raiders doing kamikaze runs on Galactica, sometimes with their vessels pre-packed with explosives.
* The original series had episode 29, "The Lizard Woman Has Come!", pre-empted by news coverage of the Apollo 11 moon landing. It would air a week later as a result.
* The original series had these in a fixed rhythm: serious story - comedy episode(s) - serious story - comedy episode(s) - serious story... so things never got
* the Original Series had two piece versions of the black and gray uniform that had a vest that could be worn in lieu of the jacket.
* The Original Series has Wildmutt, Stinkfly, Upgrade, Ghostfreak, and the later Cannonbolt, Upchuck and Wildvine.
* The original series, Hongo temporarily returned to Japan to assist Ichimonji, leaving behind new assistants Emi and Mika. Later, Hongo returned to Japan permanently, whilst Ichimonji continued the fight with Shocker in South America, dropping in from time to time before the two Riders defeated Gel-Shocker's Leader in the finale.
* The Original Series. In an attempt to explain this, he compares it to how learning how to play poker from a book isn't the same as actually playing the game, in person, implying that the "ineffable quality" being lost is the personal importance and significance of those experiences, the context which makes the event special for that individual, which — when read out of that context as a mere descriptive text readout — cannot be fully understood or appreciated — an actually logical argument when you think about it.
* The Original Series includes her death from natural causes shortly after the

events of the sixth movie).
* The Original Series in general. Many of the actors were originally trained for the stage, where overemphasized actions were expected; on screen, this translated to hokey action scenes and sometimes hilariously overdone body language.
* The Original Series is absolutely made of this trope. An extremely low budget resulted in the invention of many modern sci-fi tropes; things such as deflector shields (thought up because producers and creators couldn't afford to create new models of a damaged
* The Original Series make more sense as it was supposedly designed to prevent cabin fever among the crew.
* the original series (mostly with children's costumes, since the adults tended wear uniforms, jumpsuits, or character-specific outfits).
* the original series, most of the robots had a straightforward, almost accentless tone, but Ironhide, Wheeljack, Prowl, Jazz, Rumble, and others had accents ranging from soft-but-noticeable to thick-yet-somehow-suits-the-character-so-we'll-let-it-go. Yeah, Ironhide is from the Texas part of Cybertron.
* the original series non-whites among the extras. The original pilot pushed further with a female second in command, and Spock was considered to be radical at the time as an Alien, especially with the original plans being for Spock to have either green or red skin. Also notable that both lead characters of Spock and Kirk were played by Jewish actors. Then there's the gutsy move of creating a Russian main character at the height of the Cold War.
* The Original Series of all people ends up sympathizing with them. He's deeply disappointed when their leader turns out to be nuts.
* The Original Series offered up a kind of diffuse example. It was one of the first generation of television shows broadcast in color, but color televisions were still a luxury good, and color production equipment sure wasn't free either. Thus, all the sets were painted and lit in what is now considered
* the original series, Plasmus is Cinderblock's brother and is mutated into his present form because he took too many baths and became wrinkled like a prune, and Slade is Cinderblock and Plasmus's lecturing father who frequently pretends to hold small objects.
* The original series played this straight with Ghostfreak... once. Only when he passes physically though people. All later instances of Ghostfreak passing into people has

* the original series, Sky Lynx does this constantly, to the point that Springer nicknames him "Commander Modesty".
* The Original Series so when he tells her he can't be with her anymore, her abject grief snaps her back to normal.
* the original series technology usually required a teamup with Spock, who was otherwise fairly consistently presented as a theoretician and IT man.
* the original series, the Cylons were originally envisioned as armor-wearing Reptilians, before they were decided to be a race of robotic warriors. Both versions came encased in faceless armor with an iconic, inhuman warbling red eye.
* the original series them. He still tries to "help" them in the 2002 revival because he was never taught that this was wrong; everybody, including his own mother, hates and fears him because of this.
* The Original Series, they used so many class M planets in order to keep production costs down. Most planets home to advanced civilizations have some degree of weather control, although the extent this is used to change the biome varies with some simply using them to prevent dangerous weather.

* the original series, this is played straight... from Zeon's point of view. They did make plans and backups and even prototypes of their Zakus. The only error is that Amuro has all the files on his personal computer... Luckily for the Zeon, Amuro has learned absolutely nothing about the Zaku II, its combat capabilities and future Mobile Suits, despite the fact that we saw him studying the schematics in the beginning of the first episode.
* The Original Series: "This Side of Paradise" in which Star Fleet crew abandon their ship and duty in favor of this way of life.
* the original series, though, Command and Operations switched colors.
* the original series, though the modernization of the setting has led to breakthroughs in technology, such as automobiles, radios, telephones, etc., making it somewhat bittersweet.
* the Original Series, too. Kirk is being held in the council room of a hostile race, and Spock hurries to the rescue with backup. When he gets there he finds Kirk holding the entire council and all the guards at gunpoint.
* the original series use her grandfather's clan name of "Senju") and Tenten (the only one of the Konoha 12 to never be given a surname).
* The original series was purposefully episodic, as all television was at the time, so that they could be shown in whatever order the network decided.
* the original series was sometimes viewed negatively by fans of the new show, most of the best-loved plot elements were reimagined versions of original series episodes and plotlines. The show started meandering and falling apart precisely when the writers ran out of material and had to begin coming up with a metaplot of their own. Earlier ideas included "find Kobol, lost homeworld of humanity" or "what if another Battlestar survived?" (Pegasus), but by Season 3 they had run out of ideas.
* The Original Series was the star, and had a contractual guarantee that his character would always be front and center in every episode.
* The original series was very vague and contradictory about what century it was supposedly taking place in — offhand references implied the 22nd, 23rd and even the 28th centuries.
* the original series was written out of the show; Richard Genelle, who portrayed the character, retired due to weight-related health problems. Continuity wise, Ernie left to do volunteer work in South America. (Lt. Stone's actual quote was, ""Well, his foreign service unit recalled him and he had to suddenly leave. I don't know, something about building a bridge in the Amazon." (On another note, Genelle successfully lost forty pounds and later founded a company called Retail Logistics Solutions, Inc. in Cerritos, California, providing transportation services.)
* The Original Series: When the original work in a franchise gets a subtitle identifying it as the original work.
* the original series (who came in after Ceretta's departure) wasn't an original cast member. Nina Cassidy also leaves (without explanation) after one season.
* the original series who does what she can to support him, and will stand up for Yugi's sake if he needs it.
* The original series, with her existence kept a complete secret by her parents, due to her blindness. However, this is remedied quickly, when she joins the protagonists at the end of the episode she is introduced in.
* The original series, with its Egyptian themes, is also pretty popular in Egypt. It helps that Kazuki Takahashi's research into ancient Egyptian mythology and culture is easily leagues above most anything else in pop culture.
* The original Seven Warlords of the Sea all have an animal theme. Bartholomew Kuma's is,
* The Originals: Hope is this to Klaus. He sacrificed himself for her. She's an artist like him and was the one to redeem him.
* The original short story was resolved by Ryuk giving Light a "Death Eraser", which could be used to erase names from a Death Note and thus bring them back to life. This item is not used or even mentioned in any adaptation (presumably it doesn't exist, since "
* The original show has it happen when Spirit was first transformed into Swift

Wind to be She-Ra's animal sidekick. Though it's implied that this is actually a reverse of Battle Cat's situation: Swift Wind is his true form, looking like a normal horse is just a disguise. This may be why Spirit can still talk when he's not a winged unicorn.
* The original show indicated this was the result of a mobile suit's reactor going critical, and even managed to play it for some drama in the first episode - when Amuro straight-up chopped the first Zaku in half with his beam saber, the resulting explosion made a decent-sized hole in the colony and ended up sucking quite a few people and objects out into space, forcing him to carefully stab the second one
* the original show is set entirely in Europe, and shows us the continent isn't as united as it sounds. The major conflict in the OVA series is between the United Republic of Europia (which is most of Western and Central Europe with its capital in Paris) vs. Euro Britannia, which remains loyal to the Holy Britannian Empire (consisting mainly of Eastern Europe and Russia, with its capital in St. Petersburg). The major battles in the series take place in Poland and Belarus, which is the front line of the European theater of war.
* The original show never dealt much with the Brain's motivations for taking over the world other than the occasional implication behind it—notably, one episode implied this was due to him being separated from his family, who lived in a can with a picture of the world on it—but nevertheless always kept him as a
* The original six Rahkshi were this as well, being powerful enough to fight the Toa Nuva on equal terms and get the better of them at multiple times, while latter Rahkshi could be dispatched by the dozens due to regular Toa. This was
* The original six Toa were introduced as borderline-mythical, ultra-powerful warriors.
* The Originals: Marcel seems perfectly happy being a vampire, but his relationship with his sire, Klaus, has gotten...complicated...over the years. Essentially, Marcel feels betrayed because Klaus claims they're family but Klaus always picks his biological siblings over his adopted son Marcel. Klaus is pissed in return because he hates it any time anyone goes against his wishes. Neither of them can really bring themselves to hurt each other in any permanent way, though.
* The original Spider-Woman, Jessica Drew, was affected upon first exposure to a particular toxin. Going foreward she was immune to its effects.
* The original spin-off was going to be He-Ro, an ancestor of He-Man, before eventually being dropped in favour of She-Ra. There was also talk of a He-Ro, son of He-Man, series in the mid 90s.
* The original spoofed this trope, along with many other action game staples, in the game that served as the final boss.
* The original sport fencing was really just swordfighting with a few rules agreed upon beforehand. Over the centuries, its evolved into an essentially bloodless form of tag with metal sticks.
* The original Star-Lord stories took place in the early '90s (the comics themselves began publication in 1976), but this was retconned to the present when the character entered the mainstream
* The original "statistic" doesn't come from any actual poll anyway... it was an estimation made by John Adams, and he admitted he'd not done any research on that, just that it was his feeling on the matter.
* The Originals. The list of women he has slept with is long and he often kills them afterward. It'd be easier to list the women he's slept with and hasn't killed. He's only been in love 4 times (Caroline, Tatia, Camille, and Aurora). He only has one child surprisingly due to vampire sterility. Also Marcel has slept with a number of women but has been in love with Rebekah for years. Kol counts as well but once he met Davina, he was devoted to her and she to him.
* The original story also included a map of Earth in the control room. It was part of the
* The original story included a sixth passenger, Ben Porter. Porter is a businessman who attempted to purchase alien vegetables, only a little older than Leblanc.
* The original story was that Bridget is part of a set of identical male twins,

which in his village were considered bad luck, and was sent to be a nun (either that, or he'd be abandoned to his death as a newborn), therefore his whole story path is him going
* The Originals twists this somewhat with the Elijah/Hayley/Jackson triangle. Jackson loves Hayley but they end up marrying for power and after Jackson dies she rekindles her romance with Elijah.
* The original subverted it: there were aliens in the backstory, but
* The original subway line's southern terminus of City Hall lost passenger service at the end of 1945. It was on the sharp curve of a balloon loop, couldn't be lengthened for the longer trains, and was very close to the Brooklyn Bridge station. As a result, City Hall closed, and Brooklyn Bridge became Brooklyn Bridge - City Hall. The station is still intact, on the National Register of Historic Places, and the loop itself is used to turn around 6 trains after they discharge at Brooklyn Bridge - City Hall.
* The original Superman: Ultimate Flight at Six Flags Over Georgia features tunnels and was designed to take advantage of the hilly terrain. This layout would be reused for the clones at Six Flags Great America and Six Flags Great Adventure that opened the following year, but those two don't feature the near misses with the terrain that the Georgia version has because they were built on old parking lot areas.
* The Originals vampire Klaus when he was a human child in the 1800s, and was raised by both him and Klaus' sister Rebekah. Years later, Rebekah and Marcel fall in love with each other, much to Klaus' displeasure. It's heavily implied that he and Rebekah still have a thing for each other.
* The original Swedish edition of opera singer Malena Ernman's memoir
* The original Swedish production gave a new song to Svetlana and recycled a cut melody to give to Molokov.
* The Originals world, but especially about Rebekah. While clearly bisexual, it's not clear if Isobel's started exploring relations with women after she turned, or she has always considered herself bi.
* The original Symbiote arc in Spider-Man was almost indistinguishable from future versions, as the costume was portrayed as nothing more than a parasite that unknowingly sapped energy from Peter, slowly weakening him. However, all subsequent adaptations have taken more from the
* The original tale has Kaito spike a cup of wine and gets Miku to drink it and pass out. In some versions, he then attempts to rape her but stops when the sight of her brings up their childhood memories together, followed by her waking up and telling him she loves him, waking up and killing him, or never waking up at all due to overdose or poisoning.

* The original troubadour, Guillaume IX de Poitiers, is a prime example, as he was also one of the greatest lords in the West and part of the First Crusade. Incidentally, his great-great-son Richard the Lionheart was also a great warrior and an alleged poet, writing in French and langue d'Oc (mostly to ask for his ransom).
* The original TV movie version of Bryce was completely unlikable and a bona fide villain but the version from the TV version is one of the most likeable examples of this trope, in large part because he was depicted as a normal teenage boy who happened to be a genius. The TV series Bryce could be a
* The original twenty Space Marine legions started with mere numerical designations like the Roman Legions of old, but quickly picked up a more evocative name as they participated in the Great Crusade, then usually another name after the legion's Primarch was returned to them. For example, Legion XIII was known as "The Warborn" until they were reunited with Roboute Guilliman, after which they became known as "The Ultramarines." Meanwhile, Legion XVI was known as the "Luna Wolves" for most of the Crusade, were renamed the "Sons of Horus" in honor of their leader's victories, but then after their defeat in the Horus Heresy, their new leader Abaddon rebranded them as the "Black Legion" to break from their past failures.
* The original Twitter collection not only stars a whole town of buxom women, all of the major girls in the story are big-breasted as well.

* The original typewriter keyboards were in alphabetical order. This presented a problem for people when the keys would frequently jam because words had the letters and the subsequent typebars too close to one another. Thus it was redesigned into the familiar "QWERTY" key scheme we are all familiar with. Why with the invention of the electronic keyboard, where there are no typebars for letters (hence no issues of jams) this has continued, is mostly attributed to the endearing familiarity of the typewriter scheme. As an interesting side effect, the QWERTY layout resulted in faster touch-typing, since it enforces more frequent alternation than the alphabetic layout; words whose letters alternate hands are faster to type than words that are typed entirely with the same hand. This is actually the crux of the QWERTY-versus-Dvorak debate, the claim being that Dvorak keyboards (named after the layout's creator rather than the physical layout) have even greater alternation than QWERTY keyboards. (In reality, the distribution of letter-frequencies in English texts subtly varies depending on the format and vocabulary of the document in question, so which keyboard layout has better alternation is context-dependent... and that's not taking into account other languages: Dvorak was developed with English in mind and it performs
* the original UFO Defense kills a human. The zombie will act aggressively towards humans until killed (in UFO Defense) or left alive for several turns (in Enemy Unknown) at which point they will hatch into a new Chryssalid.

* The original Volkswagen Beetle is the most prominent automotive example. A triumph of German engineering, its design is, well... "dorky" would be a kind descriptor. But the fact that you can still occasionally see Beetles on the road

* The original Yamai was actually a human girl who received a Sephira Crystal as she was dying from getting run over, but her vanishing twin absorbed in utero resulted in two Spirits from the same Crystal. The sisters' Fusion Dance into Yamai Kamazachi is actually a mixture of their consciousness, and while they regain their memories of their past life, the original Yamai's consciousness is in fact dead and gone, similar to Shido with his previous life as Shinji.
* The Originist. Hari waves away Chanda's comparison and insists on calling himself a scientist. They end the exchange by tossing friendly insults to each other.
* The Originist": Part of Deet Forska's role is to help make the librarians of the Imperial Library feel like they are part of a community. She tries experiments that will result in the employees of the library feeling like the library is something special that they are proud to belong to. She shares some stories about her successes with Leyel Forska, such as the way a librarian expresses pride at belonging to this intellectual sub-culture of Trantor when interacting with visitors.

* The Origin of Stitch DVD, when Stitch enters Jumba's lab, he encounters a video on Jumba's computer showing how each part of his body consists of parts Jumba gathered from other alien monsters, and Stitch's potential for destructive capabilities. Jumba then tells Stitch how he hoped to create a genetic experiment that would surpass all the others as his masterpiece of evil, and to Jumba's initial disappointment, all of that changed when Stitch found his one true place and a family, and Jumba tells Stitch, "You are my greatest success, and I am very proud of you."
* The Origin Of The Crabs: Bruce McKechnie is a wealthy Scottish laird whose pride and joy is his expensive Range Rover, which he views as a visible symbol of his wealth and prestige. Needless to say, the giant crabs of the title trash it real good when attacking McKechnie's mansion.
* The origin of the Nameless Namek who would become Kami and Piccolo is that he came from a peaceful and benevolent race, and became corrupted from seeing the worst of humanity over the centuries. When the Nameless Namek wanted to become the new Guardian of the Earth, he separated himself from his evil side and that piece of him became King Piccolo, who went on to terrorize humanity. Yajirobe lampshades that there are some really nasty humans in the world and couldn't blame Piccolo for being corrupted.

* The origin of the screens isn't mentioned, so given the unusual nature of the place they're shown in, it's possible they represent something else, such as moments pulled from Twilight's memories, and her talk about watching Twilight grow was more in a figurative weay.
* The origin of the Triffids themselves is equally unknown — they simply started growing all over the Earth one day. The theory put forward in the book is that they were engineered by the Soviets, then spread when a plane attempting to smuggle samples to the USA disintegrated at altitude, allowing the wind to spread seeds everywhere. However, this is based on the claims of a single, now dead, person and is again presented as nothing more than a best guess by the narrator.
* The Origin of Wonder Woman and his men launched a suprise attack during the feast and stole the queen's golden girdle which ensured the Amazons could not be defeated so long as their queen wore it and put the Amazon's in chains. Aphrodite heard Hippolyta's prayer and broke her chains, and the Amazons then went about freeing themselves and reclaiming the girdle before Aphrodite gave them Paradise Island and ordered them to never allow themselves to be subjugated by men again lest they lose their paradise.

* "The Origins Part 2", which explains Darwin's present-day way of addressing his adoptive parents:
* The origin stories always end with Duncan bailing your ass out of trouble, which every origin you choose will be the place Duncan decided to recruit a new Grey Warden. It is implied if you go back to those places as a different origin that what happened happened but without Duncan saving that would-be hero. The Dwarven Noble, the second child of King Endrin, was framed for murdering his brother and killed on the Deep Roads; the Dwarven Commoner died in jail, refusing to eat; the human noble was killed by
* The origin story is a classic example. Capture a brilliant engineer, tell him to create weapons for you, and then leave him alone (save for a scientist who also hates you) with everything he needs to do it? Gee,
* The origin story plays it straight. When Aku attacked Jack's homeland, Jack was safely evacuated and spent the next 20 years traveling the world and training. He returned too late to save his people, but
* The O-rings weren't even designed to act as failsafes for the rocket boosters. It was discovered that the stress of ignition tended to bend the joints between two segments of the booster, however the O-rings, heated by the igniting rocket fuel inside, would expand enough to cover the holes. As it seemed to work just fine, the design wasn't changed. However being as the lauch site was in Florida, no one thought to take into account the extreme cold's effect on the rubber o-rings. In fact the Morton-Thiokol engineers specifically told NASA on the morning of the launch that they had no idea how the cold would effect the O-rings (as the launch had already been delayed several times, NASA put pressure on them to give the okay). So in a cascading series of improbable events, the joint bent under the stress of ignition while the O-rings, which had frozen overnight, failed to heat and expand fast enough to seal the gap and were instead vaporized.
* The Orion Conspiracy has "CONTAINS STRONG LANGUAGE" in big letters right next to the rest of the game's selling points on the front of the box. While played straight in the UK with the 18+ rating, it only got a T rating from the ESRB.

* The Ork equivalent to a doctor is a Painboy, who perform all sorts of experiments on their subjects such as replacing damaged limbs with bionics(sometimes they replace the wrong one), or a squig brain transplant. They at least use anesthesia on them in which case they give them a concussion. Orks look at painboyz and decide that their injuries aren't really that bad.
* the Ork Faction of Warhammer have been known to call themselves "Nobz," "Gitz," or simply, "Da Boyz," which are all terms for groups of orkish individuals in the game.
* The Ork Fighta-Bommer has a rear-facing gun turret, as do all Bommer variants.
* The Ork Freebooterz field a number of ships with extremely heavy frontal prows, giving them excellent protection from frontal attack and letting them bull apart enemy ships with ease, and they are the best at boarding actions too. Ork ships are also rather versatile as instead of choosing from specific ships with a class, each class provides a basic "krooza" which comes with a number of options which the player can freely choose. However, this raw power comes at significant cost: their accuracy at any range other than "very close" is abysmal, their ships are highly vulnerable in the rear due to loads of engines and thin armour, and due to their anarchic natures the Ork "kaptins" are more likely to disobey the admiral and abandon battle than those of other races.
* The Ork logic goes something along these lines: "Orkz are never beaten in combat, if we win we win, if we die, we die fighting so that doesn't count and if we run away it's OK because we're always back for
* The Orks also have Shokk Attack Guns, masive contraptions bigger than the meks that fire them which teleport a small Goblin through hell into an enemy's insides. Yes, really.
* The Orks and Space Wolves are basically entire factions of Manliness. To wit:
* The Orks are an entire species devoted to this trope, being genetically engineered for nothing but war. They're also the comic relief.
* The Orks are hybrid animal/fungal beings whose tissues have as much in common with a mushroom's as with a human's. Upon their death they release spores that in turn give birth to Orks and other creatures linked to them (snotlings and squigs, for instance) — they're essentially invasive ecosystems, each member of which can seed spores that will give rise to all other species. They also never stop growing. If they get wounded and are allowed to heal, they grow even faster. Normally living organisms have a genetic limit on how big they can be, or they are limited by the environment where they live, but orks and their sub-species can grow infinitely.
* The Orks are more fun oriented with profit being secondary. The only real reason behind the profit part is to sustain their war machine so they can keep fighting.
* The Orks are similarly rife with infighting for this reason. Their two gods are Gork and Mork, one of them "cunning but brutal" (he hits you hard when you're not looking), the other "brutal but cunning" (he hits you even harder when you
* The orks belive different colors have different effects on their vehicles, and thanks to the way their psychic powers work, they do. Most famously,
* The Orks, by contrast, are an object lesson in the disastrous effects of averting this trope. Orks don't die of old age and are constantly shedding spores to grow more Orks and related organisms. As a result they are the most populous race in the entire galaxy and
* The Orks can also do this, thanks to their spore-based biology. Left unchecked, Ork spores will gradually "Orkyform" entire planets. Orks are, in fact, even more

virulent than the 'Nids in this regard. Where the Tyranids use a complex system of vanguard organisms, hive fleets and other specialized organisms,
* The Orks do this all the time, but mostly because "testing" and "safety" aren't really in their vocabulary; they don't make shiny, killy, fancy weapons just to waste their time in testing them, when they could be using them in the field for some actual fun. Thus, when they get creative enough that
* The Orks have nothing approaching a proper scientific method, consider maintenance
* The Orks. Just as limitless as the 'nids (they reproduce by emitting spores when they die), they have an instinctive mastery of technology to the point where their teleporters work better than the humans', and the average ork is seven feet tall. They're believed to have been created in order to counter the aforementioned Necrons, and they currently have a
* The Orks make war simply because they "is made for fightin' and winnin'", and will kill humanity down to the last man if it means they can get a good fight from it.
* The Orks mentioned above? Turns out they are actually the degenerate descendants of the Krorks, the original Super soldier race the Old Ones created to fight the Necrons and C'tan. The Krorks were twelve meter tall behemoths clad in
* The Orks of use a heavy weapon called a Shokk Attack gun, that fires a small orkoid called a snotling through the Warp (40k's version of hyperspace and hell) to emerge inside its target. Consider also that the Warp is, at best, insanity inducing, so this gun basically teleports a gibbering, homicidally mad imp into either your vehicle's cockpit... or a unit's abdominal cavity.
* The Orks play this trope as straight as it gets. They have it written into their genetic code to fight, murder, and plunder worlds just for fun, and it takes an incredibly powerful Ork to keep other Orks from fighting amongst each other. When led by powerful Orks called Warbosses, Orks undertake massive invasions called "WAAAGH!s" to conquer and loot worlds. A world that has been the subject of a WAAAGH! will be "infested" by Feral Orks that are incredibly difficult to exterminate. The Feral Orks will always wage nonstop wars against everything on the world. When a WAAAGH! encounters Feral Orks, the Feral Orks will usually join it.
* The Orks' Shokk Attack Gun teleports a tiny goblin though hell, driving it psychotically insane, and causing it to reappear

Not that Orks mind if other Orks get blown up, it's just
* The Orks were bred for War, and their entire culture is built around it.
* The Orks were inspired from Highschool Football hooligans while every other faction had it's roots in real-life armies (one of which is the Spartans). They only care about Fighting (shooting and smashing faces), Food and Fast Cars, and their form of promotion is beating the crap out of the boss. They've also managed to fire guns which had no triggers or bullets, made the color red into instant speed potions, and invented space travel using a junk pile.
* The ork "Tellyport Blasta" weaponizes this concept by forming a small bubble to warpspace and then displacing it somewhere nearby to destroy vehicles and extremely tough characters with ease. Consequently it is a very high strength weapon with an excellent AP value that is quite short ranged.
* The Ork Warboss is no slouch either. His threats against Ravandil come across as

* The ork warlord Grizgutz and his army, after setting off into the warp, arrives shortly before they left off and decides to hunt down and kill his previous self so he can own a spare of his favourite gun. The confusion results in the war-band being stopped in it's tracks.

* The Oroville Dam crisis in February 2017 culminated in one of these. With the main spillway damaged, and more rain forecast, the dam's operators were left with a choice: increase the rate of flow down the main spillway, draining the reservoir but damaging the spillway further, or leave the flow rate as it was and risk the reservoir overflowing entirely. They chose the former option, but the dam still overflowed onto the emergency spillway for a short time.
* The Orphan, after an episode of craziness, the titular boy's aunt decides to take his temperature rectally. He's very insistent against it, thrashing as another woman holds him down, and there's a quick cut after showing his face as he shrieks when the thermometer finally goes in. Adding to the craziness of the scene, the original cut (before the extended version) also showed the boy's butt right as the thermometer was about to go in.
* The Orphanage by Carlos Gimenez is a comic detailing the author's childhood in a Spanish orphanage during the civil war. In between the fascist and child-hating teachers and their abusive indoctrination, the sadistic and child-hating caretakers, the half-blind and child-hating doctor, and the constant lack of food and water, it's pretty much the epitome of the trope.
* The Orphanage does this with the disfigured (but not disabled) Tomas by putting him in a mask and keeping him in a secret room. But in something of a subversion he's still allowed out, and to play with other children. The whole matter of keeping him in that room seemed to be a quirk of his overprotective mother, more than anything else.
* The Orphanage is full of them. The little boy enjoys setting them as a game for his mother; when he disappears, she finds herself following one to try to find him.
* The Orphanage is going to look pretty messed-up after being hit by a bus, so why is this revelation so disturbing?
* The orphanage isn't the worst use of that song, not by a long shot. The worst use comes in Fort Frolic, where it's playing when you enter the flooded wine cellar. Why is it the worst? Because you enter the cellar by passing through two rows of plaster statues that are scariness personified all by themselves — and because it's your first clue that those statues might not be all they seem...
* The Orphanage, notices all the creepy stuff that's going on, while her husband, Carlos, sees nothing, and remains relatively uninvolved. A big theme of the movie was how belief change's one's perception. The husband didn't want to believe in ghosts, so he got minimal exposure, while the wife and the alleged psychic got full

treatment.
* The Orphanage relatively happy when she kills herself and becomes matron of an orphanage of ghost children.
* The Orphanage: The fake social worker gets hit by a bus, and you can see her lower jaw completely unhinged, hanging off from her face. Even worse, before the face is fully shown the main character's husband tries giving her CPR.
* The Orphanage. The guy must have a stomach of steel, though being a doctor probably helps a bit.
* The Orphanage; the woman being resuscitated didn't make it, and a brief glimpse of her face shows that her entire lower jaw was horribly dislocated by the car that hit her, showing that the guy giving CPR had a really strong stomach, though being a trained doctor probably helped.
* The Orphanage where Laura feels her husband get into bed with her, and speaks to him for several minutes...before seeing him emerge from the bathroom.
* The Orphan and the Dude - a failed pilot about a flashy streetwise huckster and an orphaned garage mechanic who share an apartment in California.
* The Orphan and the Jeweler), Stepfather Yao administers tea poisoned by a lethal plant known as scorpion root to Covetous Shen. After drinking the tea and remaining unharmed, Shen remarks that his immunity comes from a time when he was trapped on an island full of scorpion root and poisonous snakes and was forced to eat them to survive, thus granting him immunity to most poisons. As one might expect, Yao is properly baffled by this.
* The Orphans of Chaos, when Vanity wants to distract Glum, she makes her appeal while carefully posed to give him a view down her shirt. Later, both she and Amelia arrange their clothing to distract him again.
* The Orphan's Tales ends with Aerie, Lantern, Solace, Scald, and Sleeve showing up to embrace Sorrow as her family. The prince is sad, as he thinks his role in the story is over... until Sorrow reaches out to him, asking him to join her on her future adventures, and he follows her with great enthusiasm.
* The Orphan's Tales. Granted she's justified in wanting revenge after she was used as a political pawn and punished for it, but she more or less wants to tear down Al-a-Nur from the inside centuries later when the current residents have done nothing to her.
* The Orphan's Tales has a young prince go into the garden where he finds a mysterious homeless girl with strange markings and starts a budding friendship with her, as she narrates the stories written from these markings. These stories tell the myths and folktales of that world.
* The Orphan's Tales she uses a wide variety of races, almost all of which are based on legends of our world. There are humans, to start with. There are animals such as hedgehogs, goldfish, cormorants, polar bears, and herons, which talk and have their own societies. Then there are Stars, djinni (made from Star-fire), the Yi, and the Hsien, for races that come from the heavens. Races that come from the sea include Magyrs, mermaids (a brief mention), Lamia, and selkies. On earth there are Arimaspians and other cyclops, giants, Griffins, dragons, Monopods, Cynocepheli, huldras, harpies, manticores, Gaselli, satyrs, kappas, and there are references to more.
* The Orphan's Tales, the four books are framed by the story of the prince who seeks out the outcast orphan by night, and asks to hear her tales, which nest inside one another to sometimes six levels deep.
* The Orphan's Tales, when he came looking for young maidens to experiment on.
* The Orphan's Tales (who actually pretends to be mad to scare off wealthy idiots) chose to reside in the shadow of the shiny basilica, chained to a dirty wall, because it’s where those in need appear. Citizens prefer to have them all where they can't dirty their beautiful city.
* The Orphe are a vaguely insect-looking species that reproduce asexually. The method is by sprinkling some "senirapa" water upon themselves (even a single drop will suffice), which causes their body to spontaneously generate two new Orphe. The children possess all the memories of their parent. It is common for dying Orphe to do this as their final act, to ensure that their memories and experiences will not

be lost, but the game suggests that they can do it at any time they please, as long as they have some of the water on hand. And this is before one Orphe randomly undergoes a mutation that leads to the sudden birth of the first female of their species.

* The Orthodox Jewish tradition of the Yichud Room involves a man and a woman who have been recently married to stay together in a room during or just after the wedding reception based on the tradition of the families. They stay in this room for a certain amount of time alone (at least 8 minutes) because before they were married, in the Orthodox Jewish faith, a man and a woman are not allowed to be alone together unless they are married. During this time the bride and groom exchange and open gifts, break their fast together, and whatever else takes their fancy as a newly married couple.

* The Orville about a space captain and his ex-wife having to learn to get along while exploring deep space.
* The Orville. After taking over the Orville, Kaylon Prime orders Isaac to kill Ty as a test of his loyalty. The plan backfires as it causes Isaac to turn against the Kaylon and aid the humans in retaking the ship.
* The Orville. After that particular episode, the two were able to reach an understanding, and while they didn't hook back up, they were able to work well together.
* The Orville. Alara is constantly berated by her parents for choosing to become an officer in the Planetary Union rather than get a "proper" higher education. When Alara points out that other cultures, like humans, see the military as an honorable profession, they express their view of humans as the "hillbillies of the galaxy".
* The Orville: All of the aliens speak English. This is justified somewhat when it's those in Union service. Even those on their own planet do as well though.
* The Orville, and so FTL travel here works much as it does in the Trek 'verse. The actual technology behind the drive is not explored in depth (beyond use of the word "quantum", anyway).
* The Orville a race called the Krill are shown to be following one of these, and they are suggested to be one of the few space-faring races to have a religion at all. Their own race are vampiric and their faith teaches them that they are on a Great Crusade to subjugate or destroy all other races in the galaxy, who are regarded as being without souls, as the command of their deity Avis, with religious ceremonies involving blood sacrifices such as stabbing severed human heads. It is somewhat implied that some of their tenets are actually interpretations of their religious text and not necessarily the intended message, but the result is a religion that preaches interstellar genocide and racial superiority in practice all the same.
* The Orville. A suspicious gadget is found embedded in the machinery of the ship's engines. It is resistant to scanners and seems to be shielded against energy

weapons. But the engineer has an antique electric drill he had been given as a graduation present...

* The Orville, Captain Ed Mercer is unhappy to discover that his ex-wife has been assigned to the titular ship as his XO. The crew listens in on their argument.
* The Orville - cast and crew explicitly refer to the series as this, not as a comedy
* The Orville, Dr. Claire Finn ends up in a relationship with Isaac, a robotic life form. For their second date in the simulator, he creates a human holographic appearance (of the actor voicing Isaac). Claire then takes the initiative and switches the simulator to that of her quarters, where she finds out that he's... fully equipped.
* The Orville during the episode "Cupid's Dagger", when Bortus takes place in karaoke:
* The Orville: Earth apparently has one in the future, not surprisingly.
* The Orville even after they find a solution that would allow her to remain and find the family life she never had before.
* The Orville, even though he's only an inch shorter than her. Both of them typically tower over the rest of the cast.
* The Orville flavor of humanism, and it's no shock that this trope is heavily in play.
* The Orville, Gordon becomes infatuated with a long-dead woman after discovering a recording of her on her phone in a time capsule from 2015. He extracts the data from the phone and creates a simulation of her, and falls in love. He insists that because the simulation is based on the memories and feelings of a real person it is a sentient, living person despite his friends repeatedly reminding him that it is not and the woman he loves has been dead for centuries. When his simulated girlfriend gets back together with her ex, Gordon deletes him from the program, only to find that her personality has completely changed from the person he fell in love with because he essentially edited out a huge part of her life. This breaks the illusion for him, realising that she is just another program he created.
* The Orville has Gordon fall for a holographic reconstruction of a woman who lived in the early 21st century (i.e. our time), using the information on her iPhone from a time capsule to recreate her personality. They end up sleeping together before she gets back with her ex. Gordon learns from her texts that she did get back with him, hence the program adding that to the simulation. So he tells the program to delete the ex. She's back with Gordon, but she no longer sings since her ex was the one who inspired her to do it. Gordon realizes it wasn't meant to be, restores the ex, and says goodbye.
* The Orville, he does this (though since they are in the simulator, he merely has the computer reset the table afterward).
* The Orville helmsman he was sidelined by the Fleet due to his immature antics.
* The Orville homages Star Trek (as it is want to do) by having the population of a planet obsessed with astrology congregate to view giant screens showing the planetary leader announce the new month and how blessed people born under the new star sign will be.
* The Orville: "If the Stars Should Appear" had a ship that was meant to carry three generations of its people to the nearest planet, but an ion storm disabled the engines and the ship drifted through space for over 2000 years until being discovered. Its inhabitants completely forgot their origins.
* The Orville in command?" reaction, there's the implication that if he goes for command and doesn't do well, it will devalue his personal reputation because he will be going from a "Great Pilot" to a "Below Average Commander".
* The Orville: In "Deflectors" it's revealed that among Moclans, people attracted to the opposite sex are viewed as bad. This is to the point of not only prejudice but expressing it being a crime which carries a life sentence.
* The Orville: In the first episode, scientists invent a device that fires a beam that accelerates time in the area it hits. One of the scientists is knocked into

the beam and ages about 100 years in 10 seconds, which kills her.
* The Orville in the first place after wrecking his career following his divorce.
* The Orville: Inverted by Yaphit. He's a gelatinous lifeform...that's only attracted to black human women.
* The Orville, Isaac is a member of an artificial robot species. However, he operates his console exactly the same as any organic member, even though he's demonstrated the ability to both interface with the ship's computer wirelessly and to extend tendrils from his hands for a more direct connection. Presumably, having been assigned by his people to observe and study humans, he mimics them intentionally.
* The Orville knocked out the engines, leaving the ship adrift for two millennia. The dome is also designed to open to simulate night but hasn't been opened in a long time. They open it to show the people the stars for the first time in their lives.
* The Orville lampshades this in the episode "Krill," when Ed and Gordon try to come up with plausible names for their alien disguises. But despite the lampshade, alien names in the show fit the trope to a T:
* The Orville: Let's see. Klyden forced your kid into a sex change, got your ex-boyfriend outed as heterosexual and jailed for life, is begging for sex and affection, doesn't seem to be doing much to raise the kid, and doesn't even seem to have a day job. Oh, and initiated "divorce" proceedings by stabbing you in your sleep. Why are you still married to him, Bortus?
* The Orville manage to convince one local girl to stop participating in this system.
* The Orville: Marijuana is openly accepted in the 25th century, to the point that people freely order pot brownies from the food replicator. Additionally, it is implied that Kelly is a frequent user of particularly strong marijuana, and yet she is still a ranking Commander and first officer of the titular spaceship.
* The Orville mean it would be insulting for him to turn down an offer of sex. The pheromones were also unintentionally transferred to the alien blob Yaphit, causing Dr. Finn to throw herself at him.
* The Orville: Moclans are an all-male species... who lay eggs to reproduce... and are sometimes born "female".
* The Orville of the planet that our heroes visit in "Majority Rule". Every decision regarding the punishment of misdeeds is made by a system of "upvotes" and "downvotes"; if the offender receives ten million downvotes, the result is a lobotomy. Given that the episode is a satire aimed at social media, everyone on that planet makes decisions in a shallow manner, oftentimes not even bothering to take the time to learn about the facts of a particular misdeed (e.g. a girl downvotes a guy just because she doesn't like his looks).
* The Orville pass in the other universe. The main characters accidentally contaminate the planet with a religion based around Kelly the First Officer, and are extremely lucky to have not been stuck there at which point they would have been long dead by the time they came back. A robotic character decides to stay behind for 700 years to fix the damage.
* The Orville", regular character Gordon Malloy falls in love with a girl from 2015 who left a smartphone in a time capsule. He creates a simulation from her and when he gets her phone number so that he can simulate his own phone to call her, it's a 555 number.
* The Orville, ships equipped with Quantum Drives can travel between solar systems fairly quickly with no problem, with some trips taking mere minutes if the ship is traveling at maximum speed.
* The Orville. So far, Captain Ed Mercer is the only man who treats her like a regular person.
* The Orville's space combat falls into this trope with the lasers they fire often being rather easy to track. Those are said to be plasma cannons, though.
* The Orville straight up that the only reason she's not getting a court martial for causing this is because nobody got hurt and he was impressed by the way she handled all the obstacles.

* The Orville takes this literally as in the Moclusan culture, killing your spouse is the only way to end a marriage.
* The Orville: The bio-ship in "If the Stars Should Appear" is being ruled by a theocratic dictatorship who have misinterpreted the word of their former Captain Doral as divine scripture over the years.
* The Orville. The Calivon are entranced by what they're already calling their best exhibit ever.
* The Orville: The Calivon keep members of less technologically advanced species in a zoo on their planet, since they consider them to be like animals. Mercer and Grayson become their latest exhibit.
* The Orville", the crew finds a time capsule from 2015. Ed and Kelly are shown reading a newspaper, and Ed complains that society was "on the verge of climate collapse and they dedicate an entire page to teeth whitening."
* The Orville, the Krill are a hostile race of religious fanatics, who believe that their god Avis (yes, one character comments that it sounds like a car rental company) has given souls to them alone and that all other races are little more than animals. They use that justification to attack anyone they wish, claiming that the entire universe is theirs by divine right. As far as they're concerned, anyone who kills a Krill in self-defense is a soulless monster. It's stated to be unusual among the galactic races, as many races tend to abandon religion once they discover that they're not alone. Mercer suggests that the root of the Krill zealotry is fear, not that they would admit it.
* The Orville: The Krill, who are shaping up to be the series primary antagonists, have a "bible" that preaches that all other life forms are without souls and that it is a religious mandate to subjugate all other life and dominate the galaxy.
* The Orville there is the Moclan race, who are an all-male species... who lay eggs to reproduce... and are sometimes born "female". They also urinate only once a year and can eat almost anything.
* The Orville: The series appears to play this straight, with an alien species we see in "Mad Idolatry" following the same ascent of technological and social progress we see the Earth underwent before, while surpassing them in the end.
* The Orville. They strongly favor intellectual pursuits and talk down to people they consider to be of lesser intelligence. As far as they are concerned, humans are "the hillbillies of the galaxy". Just to complete things, they have pointed ears.
* The Orville; this after making several references to the fact the character had family who were grieving him.
* The Orville: Topa has aged from an egg to a baby to being about ten years old between the first and second seasons, much like Alexander in TNG. This may be a result of Moclan physiology however, as Dr. Finn's sons appear to have only aged a year or so between Seasons 1 and 2.
* The Orville. Unfortunately, the locals are obsessed with astrology and consider anyone to be born on the same month as Kelly and Bortus to be dangerous criminals. Kelly and Bortus spend their birthdays (and that entire month) in an internment camp for individuals like them. The crew does, however, throw them a party after they come back.
* The Orville: Union exploratory ships have the registry prefix "ECV", while heavy cruisers have "LCV". All ships use "USS" in front of their proper names, presumably standing for "Union Star Ship".
* The Orville (well, a female is hatched occasionally, but they almost always end up being "corrected" to male). It's also revealed that any Moclan who is attracted to females is considered an aberrant and, if discovered, will be arrested and tried for the crime of heterosexuality.
* The Orville, what we see of the Union fleet tends to be a little easy-going. A captain like Mercer (one on shaky ground too) gets away with starting a shouting match with an admiral. True, Lieutenant Malloy's career has stagnated, but drawing penises on "lots of things" has nothing to do with it. It's frankly a miracle he hasn't yet been drummed out of the service. Lieutenant LaMarr takes the cake, though, being extremely laid-back and even getting permission from Mercer to keep

soda at his station. Then there's Yaphit getting away with constantly sexually harassing the doc, despite being a non-humanoid blob.
* The Orville when Ed Mercer is given command of the titular starship (a mid-level explorer). The admiral giving him the assignment tells him that he could've been given a heavy cruiser if it hadn't been for the recent downturn in his job performance stemming from his less-than-amicable divorce. Mercer doesn't seem to care, though, as he's too excited to be out in space.
* The Orville when he's ordered to kill Ty (who's just a boy) as punishment for him trying to help free the crew.
* The Orville when Kelly admits that Ed (her ex-husband) was the kind of mellow guy that could always be relied upon to make a run for "bagels or tampons" without any fuss.
* The Orville, where a newly-discovered pre-space flight race calls their planet Regor 2. Another example is Kaylon 1, home to the robotic Kaylon race, but that may be a deliberate choice on the machines' part.
* The Orville, where Bortus and Klyden's relationship is almost always treated seriously. On the other hand, much of the humor in the episode "Cupid's Dagger" stems from Ed being turned bisexual by pheromones.
* The Orville, who scoffs at military service as beneath their intellectual pursuits. Alara's parents constantly berate her for her choice of career and ask when she's going to stop this foolishness and get a proper education. The episode "Home" addresses the issue that because Alara has been living in Earth-like conditions for so long, her body is becoming used to it and losing her great strength. She has to return to her home planet to re-acclimate to its gravity.
* The Orville, with all people who are born under a bad sign from their own history (Gilia, which collapsed into a black hole millennia ago) considered subhuman. By the same token, children born to Giliacs under a different sign are considered normal citizens.

* theory that many of the supposedly "Soviet" submarine incursions into Swedish territorial waters during the 1980s were actually done by US and British submarines. These happened after the so-called "Whisky in the Rocks" incident where an actual Soviet submarine was grounded in Swedish waters, the theory stating that NATO wanted to create the illusion that the Soviets were continuing to disrespect Swedish neutrality. While the theory has never been proven, former US Secretary of Defense Caspar Weinberger has gone on record that US did regularly enter Swedish waters during that time.

* Theosophical Society believes that the term "Atlantis" is a code name for the previous stage of human evolution (as Lemuria and Hyperboria) which was destroyed by Water and is the fourth of seven stages (ours been the fifth). Thus more than an island is a time period encompassing all the civilizations of that time, and the "race" (as in human species) is called Atlantean in a similar way how ours is call "Aryan" (in the Esoteric sense referring to all modern humans and not just the "whites" as in the White supremacists' pseudocience nor as in speakers of Indo-European languages, which is the academic meaning). For the Theosophist both the myth of Atlantis and the biblical deluge are part of the same metaphor re-telling the destruction of the previous "root race", similarly Lemuria was destroyed by fire (as every race is destroyed by an element) and its story in the Bible is Sodom and Gomorrah's. Now, according to the Theosophist the Atlanteans do survive in

large numbers and the Mongols and their descendants including Native Americans are their descendants.
* Theosophical Society documents both this and the aforementioned modern Wicca, the history and origins, and how they intersect and affect one another.
* Theosophy features Atlantis (Precursor to Egypt and Mayan culture), Hyperborea (North Pole, precursor of Europeans and Asians), and Lemuria (precursor to the African cultures and the lower castes of India). Later authors like David Icke and Drunvalo Melchizedek added aliens to the mix.
* Theosophy). Theosophy provided the inspiration for this trope in many science fiction stories. Perhaps the first to claim this was Irish-American politician Ignatius Donnelly, arguing that all of the ancient civilizations which we know about (Mayans, Egyptians, etc.) were descended from Atlantean colonies which lost contact with each other once Atlantis was destroyed. Slightly less extreme claims of a global ancient advanced civilization once existing which birthed all those coming after have also been made, though archaeologists have repeatedly said it doesn't hold up.

While they don't often resort to outright theft (f they did it was for things like an embarrassing doodle accidentally given to a teacher or a piece of alien tech stolen from a Controller), it's not uncommon to see them do such things in the early books because it made things easier, or it was funny.

* The Other Boleyn Girl (both the film and the book) portray George Boleyn as gay. In real life, he was a notorious womanizer due to his shrew of a wife. In the book, he is having an affair with a male courtier while in the film it is mostly subtext, his wife challenging him about why he never sleeps with her.
* The Other Boleyn Girl Henry tells Anne how he broke off from the Catholic church for her. "I have torn apart this country for you, gone against every principle in my heart, I've endured the doubts and counsel of good men and silenced them with the axe...just to be with you."

* The other half of that story that probably isn't true is that the CIA were not only directly involved in importing cocaine to the US, but that they were also behind the introduction of crack to US cities. This springs from Senate findings in the late '80s that the CIA had knowingly worked with drug traffickers, causing people to draw their own conclusions as crack arrived on US streets. Some versions say that they were doing so to secretly fund the fight against communism, co-opting the South American drug pipeline and redirecting the profits to things they couldn't do on the books. It's a reasonable(ish) theory, given that the CIA were already assassinating people and god knows what else; the mind boggles at what they couldn't get funding to do. Other versions of the story say that introducing crack was an assault on the urban poor and the black population in particular, but nobody seems to agree on exactly why the CIA would be interested in doing that, although social engineering, mind control, and just keeping the black man down have all been suggested. Perhaps the most logical theory goes that, rightly or not, the CIA saw a politically mobilized black community as being, or at least having the potential to become, a homegrown version of the left-wing militants they went to South America to fight in the first place. It wouldn't be the first time anybody's attempted genocide

* The other of the 2 main characters (a film director) thought of a certain actress that he found on the streets that he trained to become one of the truly greatest actresses of the world as his biggest achievement. By the end of the film, it is revealed that the actress barely cared about her life with him, saying that she found her own hard work on the streets to learn how to act well prior to joining him more admirable than the pure carelessness that the film director had for her during the time when she was an actor under his thumb. She even said that she had no interest to participate in one of his final films and that she already had a role in a US telenovela that she would prefer to do.

* The Others aren't hunting down Claire's baby. They're hunting down Walt. The raftgoers contact a ship only to discover that it's a ship full of Others, who take Walt, shoot Sawyer, and destroy the raft.
* The Others are the ghosts; the "spooks" they've been seeing are actually the living family who've come to see about buying the house. Particularly unsettling is the publicity clip where the creepy old woman talks to Grace in her daughter Anne's voice — when one realizes Anne's soul is actually possessing the woman, a medium hired by the living family.
* The Others' attempted raid ultimately fails, resulting in a large amount of their deaths. Charlie unjams the signal and contacts Penny, only to learn that she didn't send Naomi. Charlie sacrifices himself to save Desmond, but renders him

unable to reconnect with Penny. Locke wakes up and kills Naomi, firmly turning to the side of the Others. Despite all that's happened this episode, Jack manages to send a distress call that actually gets answered. A flashforward shows that at least Jack and Kate managed to escape, but Jack's life has been a complete wreck since then, and he wants to return to the island.
* The Others can move 5 spaces per turn, greatly outspeeding her teammates. Unfortunately, she is practically the only character with no defense, and dies easily against bosses.
* The other school of thought that came in the 20th Century is the "longue durée" and the overlapping but separate discipline of structuralism which argues that history is not actually made by "great men" and great events but underlying structures and environmental factors. History seems to repeat when we focus on individual cycles of Kings and Wars because the structures in which they operate only allow a few set of scenarios to play out. Real non-repeating history happens when that structure is changed and altered forcefully.

* "The Other Side" by Tonight Alive chronicles a friendship in which the singer was clearly in love with her friend, but he/she (it's never specified) did not reciprocate. It's implied the friendship was eventually destroyed by distance and time, ending on the lines: "and if you're wondering/I'm great/I'm stronger now but still/the same/my love for you it will remain/my friend."

* The Other Side of Midnight conquests, Catherine Alexander and Noelle Page, via alternating chapters. The former marries him, unaware of his true nature; the latter, whom he abandoned years before he met Catherine, devotes her life to destroying him. The remainder of the story is about what happens when Noelle manipulates events to bring Larry back into her life.
* The Other Side of Midnight was poorly-received and quickly forgotten.
* The Other Side Of The Street is 2004 Brazilian film. Regina, a lonely and retired grandmother, defies social expectations maintaining a very active lifestyle in Rio de Janeiro's urban life. She does this largely by supplying the police with tips on criminal activities in the area. When she witnesses what she believes is a murder across the street, she tries to obtain incriminating statements from the supposed perpetrator but in the process her whole world changes...
* The Other Side of the the Hill. written by British historian B.H. Liddell Hart based on interviews with German generals after World War 2, General Blumentritt describes what he found in Paris at the German headquarters there in the immediate aftermath of the plot to assassinate Hitler as a "surreal party." The battles on front were going badly, no one knows who is in charge in Berlin, but all the top

German leaders, civilian and military, in France were getting drunk and making merry.
* The Other Side of the Wind from start to finish is nothing to sneeze at.
* The Other Sinbad by Craig Shaw Gardner, a character is shipwrecked on an island with trees full of talking figs that beg to be eaten. Unfortunately the figs turn out to be addictive… and also to have an, um, intense laxative effect. The poor guy ends up as a giant ambulatory talking pile of feces. "Once I was a proud warrior… now I am little more than an odiferous mound!"
* The Others. In Westeros, this was imagined as the Long Night, during which the First Men and the Children of the Forest banded together to fight the Others, who came from the Land of Always Winter in far northern Westeros.
* The Others is essentially about the world being on the brink of destruction every day by the spontaneous appearance of monsters on a regular basis, and should you fail to stop it during your mission, the Sins of the Apocalypse will rise up and demolish the city before taking down the world.

* The other two Defender classes, the Support and the Combatgirl, can use the altfire on their heal/hurt guns to, uh, hurt enemies rather than heal allies, but this isn't very efficient without upgrades. All three Defenders have nasty secondary weapons that come in
* The other two Knights as well as experienced Wardens like Morgan are also sword masters, though not as great as Shiro.
* The other two planets in the Goldilocks Zone in our Solar System, Venus and Mars, are shells of their former self. Venus went on an overdrive and now has thick, poisonous clouds, while Mars is on average a cold, barren desert with ice and radioactive rocks. However, Mars has a good chance of harboring life, as there is liquid water and the temperatures and features are more Earth like than Venus.
* The other two Stingers were also dubbed for singing. When speaking, Minx was Kath Soucie and Rapture was Ellen Gerstell. For singing, both of them were usually dubbed by Diva Grey, but for Rapture's two solo lines in the song "Destiny", she was dubbed by Vicki Sue Robinson, the disco singer of "Turn the Beat Around" fame!
* The Other Two takes place in New York City and is shot at various famous locations around the city. Pat, the mother of the three main characters, moves to New York with her youngest son and embraces what she sees as a glamourous, exciting life. Meanwhile, her two older children have struggled to survive in the city and don't find it quite so glamourous, even if they do enjoy it sometimes.
* The Other Two: The show's premise is based on this trope as two older siblings watch their 13-year-old brother become a superstar. Brooke and Carey love their little brother Chase, but his success makes them feel insecure.
* The other two trials aren't any better. The first trial is a hand-to-hand, blindfolded wrestling match, where Rayek is a hunter for a peaceful village that has no enemies, and Cutter is a seasoned veteran of an endless conflict between humans and elves for his entire life. In the third, Savah lays it out that Rayek's fear of losing is a more difficult one than Cutter's fear of heights to overcome, but she chose a contest for both that only tested a fear of heights

version above still isn’t good enough to avoid falling into this trope. While it wasn't as frustrating to play, it had very dated (while not as bad as the version above) graphics that would barely stand up next to an early
* The other version of this trope occurs too. The Warden, whose team of guards is losing to Paul Crewe's team of prisoners, tells Crewe to blow the game, threatening to frame him for the death of Caretaker and lock him up for life if he doesn't comply. At first Crewe goes along with it, but when the guard team keeps piling it on and he realizes he's hurting his friends, he starts to play for real again. His team wins, and the captain tells Crewe that he'll testify for him against the Warden in the case of Caretaker's death.

* The Other Wiki chains had previously taken over (including historical rival Gimbels). Many of them were beloved regional stores like Filene's, Rich's, Foley's

and Burdines; many Marshall Field's customers still haven't gotten over it. It's even more complicated than that. The May Company merged with Federated, which then renamed the more lucrative May stores into the more well-known Kaufmanns. Federated then bought Macy's and decided to take the now-Kaufmanns that were at this point more lucrative but less well known than Macy's and rename them into Macy's. In some markets where name overlap existed, it was not unheard of for a shopping mall to have two separate Macy's stores; for instance, at Aventura Mall in Florida, Macy's is split between their existing store and an auxiliary store in the former location of Burdines which contains men's clothing and housewares.
* The Other Wiki claims Georgia has moderate weather. They're wrong. Every day is a mystery about the weather. One day you can see people walking their dogs while wearing shorts and t-shirts. He began attending Baylor University during the spring 2008 semester when he was 17 years old. As a member of Baylor's track and field team, Griffin finished in first place in the hurdles at both the Big 12 Conference Championship and the NCAA Midwest Regional Championship meets; he also broke the NCAA Midwest Regional hurdles record. He placed third in the NCAA meet and also participated in the U.S. Olympic Trials, in which he advanced to the semifinals. Griffin graduated in three years with a degree in political science and a 3.67 GPA, while appearing on the Dean's List twice. During his final year of college sports eligibility, he was studying for a Master's degree in communication."

* The Other Wiki. One can easily extend basic empathy to strangers without knowing them intimately.
* The Other Wiki on predicted ends of the world. Over the last five centuries, it "should" have ended about once every 5 years. And that's just the ones popular enough to have made it into history.

* The Other Wiki puts it "The 'sand dance' that formed the highlight of their act was a parody of postures from Egyptian tomb paintings, combined with references to Arabic costume."
* The Other Wiki refers to many military mascots, including goats, rams, antelope, ferrets, and even penguins. Maybe a penguin can be quite sensible, but the idea of having them as a pet isn't...

* The Other Wiki, the Russian pilots liked the NATO reporting name so much (they found the MiG-29 to be rather "pivotal") that they started using the Fulcrum name themselves. This was somewhat common for Soviet aircraft; they didn't have official names, just model numbers, so if the pilots hadn't already come up with their own nickname (see next entry), they'd likely adopt the NATO reporting name.

* The Other Wiki. This may be in part because of the United Nations Mercenary Convention, which prohibits the "recruitment, training, use, and financing of mercenaries". Using private military contractors for offensive operations would arguably be a violation of international law. However, China, France, India, Japan, Russia, the UK, and the US are not signatories to the treaty.

* The Other Woman (2009) is set in New York and features Central Park as a backdrop for many of the scenes.
* The Other Woman (2014) subverts it. The main couple don't have the kids. The ex-wife and her new paramour do.
* The Otherworld — the characters are attacked by people with tranquiliser guns, and one seems surprised when, after being shot, Elena just plucks the tranq out with no problems. (She comments in the narrative that werewolves need an elephant-sized dose to knock them out.)
* The Otherworld Anthology character with no face save for a pair of bulging eyes.
* The Otherworld, but from the captive's point of view. Elena escapes from the compound where she's been held prisoner and stumbles across her lover Clay just outside. Clay had shaken off the drugs, slipped his babysitter, located the compound, and was trying to figure out a way inside when she came out. He is allowed to provide the getaway car, at least.
* The Otherworld: Elena uses this as an excuse for one of the many times she ditches the pack. After killing a man who planned to auction off information on real-life werewolves who couldn't be talked down, she's disgusted with herself for having made the choice to take his life so easily. This is a step up, really. In the past werewolves would kill anyone who came close to learning about them. The rest of the supernatural world seems to have long ago decided to give people a chance to keep quiet before silencing them, though.
* The Otherworld, half-demons are always born from a human woman and a demon. The demons take on humanoid form to seduce, and apparently one of the ways cacodemons (chaotic demons) cause chaos in the human world is...fathering babies.
* The Otherworld, Karl wants Hope to cook him breakfast naked for his birthday. She refuses — bacon grease is hot. So he puts her in his shirt, nothing else, no panties, which barely covers her butt.
* The Otherworld leave the Pack (the North American ruling werewolf pack) alone despite the fact that werewolves are, by and large, a bunch of testosterone-driven battle junkies who would love nothing more than to fight and maybe even beat the leader of the Pack. That reason is the photos circulating from the Pack showing that the fate of one would-be challenger: slow dismemberment, horror movie style. Battle junkies these werewolves may be, but no one wants to die like that. Mind you, the photos are real but what they don't show is that the victim, who was going to be killed in what essentially amounted to pragmatic self-defense anyway, was doped up to the gills and didn't suffer. So for the price of killing someone horribly but painlessly, the Pack bought themselves many years of peace from would-be challengers and having to kill them in the name of self-defense and order.

* The Ottawa Senators are a subversion. The original Senators teams won 11 Stanley Cups in the early 1900s, their last one coming in 1927, before, like the Maroons, going bankrupt and folding. Therefore, the Senators would've been a straight example until 1992, when a new Ottawa team, also called the Senators, started playing, making the original teams somewhat notable again (in fact, the current Senators team even has the Stanley Cup banners from the original Senators championships hanging from the rafters). Technically speaking, the Sens do play the trope straight, since they were considered a brand-new team when they arrived in 1992 and not an official continuation of the old team.
* The Ottawa Senators had been perennial division leaders in the mid-'90s through the middle of the 2000s, with two conference #1 seeds and a President's Trophy (awarded to the team that finishes with the most points). They're only second to the Detroit Red Wings in regular season wins for a decade. No Stanley Cup has been won by Ottawa as of yet

* The Ottoman Empire avoids collapse by several decades by means of reforming itself as a federation, with the various provinces having increased autonomy. But at the beginning of the 50s, the central government tries to rescind that and consolidate its own power. This causes nationalist and liberal movements across Ottoman territory to all rise up in revolt
* The Ottoman Empire (eventually Central Powers) was deeply divided on which side (if any) to support, with even the military being split. The army was heavily pro-German, while the navy was just as heavily pro-British. But then Britain seized a pair of battleships they'd been building for the Ottomans to bolster their own fleet; while the contract allowed for this in wartime emergencies, this outraged the Turkish people who had helped pay for the ships via donations when the Ottoman navy had proved unable to afford the full purchase price. The Germans capitalized by giving one of their battlecruisers (for free!) to the Ottomans (but with the crew remaining entirely German; this would soon become very important), decisively pulling them into the Central Powers camp.
* The Ottoman Empire eventually dissolves into total anarchy, as Sunni fundamentalists and ultra-nationalists begin targeting Jewish, Christian, Shi'a, and other religious/ethnic minorities throughout the empire, who retaliate by raising their own militias and fighting back. And while we don't see the conclusion of this conflict before the timeline wraps up, narrative comments state that it results in the final end of the empire as an entity.
* The Ottoman Empire's Janissaries, who were Christian children enslaved at a young age from subject territories (mostly those in eastern Europe) and trained into elite military units. The system was engineered to create and ensure loyalty to the Ottoman Sultan alone and prevent the rise of a native military and bureaucratic aristocracy that could rival him. The several Janissary revolts happened once this way of recruiting loosened (as early as the end of the 16th century; it totally ended in the 18th).
* The Ottoman Empire was the latest one, unifying most of the Middle East from the 16th century until 1920 (the notable exception was Iran, with which it was an
* The Ottomans likely got this idea from the Ghilmans, slave-soldiers of Turkic origin used in Muslim Persia after the rise of the Abbasid dynasty, and the also-foreign-slave-soldier Mamluks of Egypt. Similarly to the Janissaries, these ended up laxing their standards and getting locals involved, got too much temporal power and rebelled against their rulers (or, in the case of the Mamluks,
* The Ottoman Sultan is named Murati instead of Mehmed V, who was the reigning sultan in 1912, the time the comic takes place. He is also deposed by Enver Pasha before World War I even begins, whereas his real-life counterpart died a powerless figurehead less than four months before the Ottoman Empire's capitulation at the Armistice of Mudros. His brother and successor Mehmed VI would be the final imperial ruler.
* The Ottoman Sultans used a similar strategy, ordering European boys kidnapped and raised to become his chief administrators and generals. This ensured total

loyalty since they were wholly dependent on his patronage for their positions, and prevented aristocratic rivals from building up their own power bases.
* The Ottoman Turkish admiral Baba Oruç's name sounded quite a bit like the Italian word "Barbarossa" (meaning redbeard), compounded by the fact that he really did have an impressive red beard. So he became known to his European adversaries as Hayreddin Barbarossa ("Hayreddin" being a title that had been bestowed on him by Suleiman the Magnificent), and he brought the nickname back to Turkey with him where it was translated to Turkish as Barbaros Hayreddin.

* The Ouija Experiment. Unfortunately for them, one of the ghosts ends up being a murderer and starts picking off the group one-by-one when they fail to say goodbye to the spirit before leaving the Ouija board. By the end, the only survivor is female. While it's played straight in the 2015 sequel, that's not to say that they don't play around with this a little bit. The shy, timid girl we expect to survive dies near the end, while the more outgoing one who does end up living makes it a point to not make the same mistakes girls tend to make in horror films.

* The outdated fabric skin also proved an advantage, since it did not provide

enough resistance to detonate cannon shells that struck limiting damage. One aircraft from HMS Ark Royal returned with over a hundred and seven five holes in the wings a fuselage, while another limped home minus its entire floor.
* The outdated uniforms, weapons, open-bay style barracks, etc. usually stand out to most, and nowadays Sgt. Snorkel would be NJP'd and removed from command of Beetle's platoon for striking a subordinate, if not outright put in the brig for how severely he beats him. Oddly enough, there

* The Outer Limits (1963), about how "we are controlling transmission", specifically reference a number of technical glitches - misaligned images, blur, color distortion, rolling or flickering - that commonly afflicted early analog television sets. These days, glitches typically involve pixelation, scrambling, or judders between adjacent channels, and even the idea of "transmission", i.e. broadcasting, seems archaic in the era of cable, satellite, and streaming video. In addition, the opening monologue's most well-known lines are "we control the horizontal, we control the vertical". This referenced the fact that TVs of the era actually had controls that adjusted the vertical and horizontal width of an image, a feature that was dropped from TV sets by the end of the 1970s.
* The Outer Limits (1963)", a group of scientists turns a man into a fake alien and has him "invade" the Earth in an attempt to scare the nations of the world into cooperation.
* The Outer Limits (1963)". An Asian government kills a US Presidential candidate and replaces him with a carefully trained imposter whose face has been molded to match the candidate's by use of a chemical.
* The Outer Limits (1963). A test pilot and his wife are trapped 10 seconds into the future. They slowly move back toward regular time at a rate of 1 second per 30 minutes of subjective time. Their problem: they discover that their daughter will be run over by a truck once they return to normal time, and must find a way to stop it.
* The Outer Limits (1963) boasts to the hero that "One thousand years in the future, we conquered your planet in nineteen days!"
* The Outer Limits (1963) did two vaguely similar alien parasite episodes.
* The Outer Limits (1963) did two vaguely similar examples of this trope. Adding to the similarity between the two stories, actress Nellie Burt plays a sinister, gossipy harridan in both episodes:
* The Outer Limits (1963)) dies after being infected by a space-borne fungus and is given one of these by the other crewman of the space station on which he had been serving.
* The Outer Limits (1963)) discovers at the end of the episode "Demon with a Glass Hand" that he is a virtually immortal cyborg.
* The Outer Limits (1963) episode "Counterweight", the participants in a simulated space voyage are fed nothing but unpalatable meat and vegetable concentrate, designed to save weight and storage space. The stewardess sprays the scent of real food from aerosol cans to try to compensate for the lack of flavor and texture.
* The Outer Limits (1963) episode "Demon With a Glass Hand" was filmed almost entirely inside the Bradbury.
* The Outer Limits (1963) episode "Soldier", had superhuman strength and hearing. Raised by the State of a far-future era to do nothing but fight, he was baffled by the peaceful ways and world he found himself in after being transported to 1964 in a freak accident.
* The Outer Limits (1963) episode "Specimen: Unknown", an alien plant arrives on Earth. It spreads like wildfire and sprays toxic gas into the air. When it starts

to rain, everybody panics and thinks they are doomed, but instead of making the plants grow faster, the rain makes them wilt and die.
* The Outer Limits (1963) episodes "The Zanti Misfits", "The Invisibles", "Don't Open Till Doomsday", "Corpus Earthling".
* The Outer Limits (1963) episode "The Architects of Fear" features a poignant example. A man volunteers for a mission to be turned into an alien-like creature, climb inside a fake UFO and launch an "attack" against the earth. (All this as part of a plan by a shadowy organization to bring about world peace by uniting humanity against an external threat.) The plan goes awry however, when the "UFO" crashes and the grotesque "alien" is shot by hunters. The man's pregnant wife (who knows nothing about the mission) arrives on the crash scene and doesn't recognize the ship's alien-looking occupant as her husband—until he does a special pointing gesture that has special meaning for the two of them, just before he dies of his wounds.
* The Outer Limits (1963) episode "The Borderland". Scientists generate a gate to another dimension.
* The Outer Limits (1963) episode "The Duplicate Man", Henderson James has a duplicate of himself created by the Federal Duplication Bureau so that his clone can catch the Megasoid.
* The Outer Limits (1963) episode "The Guests". Several people have been trapped for decades in a house without aging. If they leave the house they will quickly age until they are at their true age, and die.
* The Outer Limits (1963) episode "The Invisible Enemy". After Major Merritt is trapped on a rock in the middle of the Martian sand sea, Captain Buckley refuses to leave him behind even though doing so could result in his own death. Buckley eventually figures out a way to save Merritt.
* The Outer Limits (1963) episode "The Invisible Enemy". The crew of the (clearly military) M2 expedition to Mars acts in a completely undisciplined manner, repeatedly violates their orders and as a result gets two members of the expedition killed. How General Winston could have considered them his top team for the job is beyond understanding.
* The Outer Limits (1963) episode "The Man Who Was Never Born". A mutant from a devastated future goes back in time to prevent the biological disaster that destroyed civilization.
* The Outer Limits (1963) episode, "The Zanti Misfits", this is where the aliens land.
* The Outer Limits (1963). If they leave after staying too long, they grow old rapidly and die.
* The Outer Limits (1963): In "Controlled Experiment", the Martian Phobos One comments on humans' smell shortly after his arrival on Earth. Deimos tells him that he has gotten used to it.
* The Outer Limits (1963): In "Demon with a Glass Hand", it is mentioned that the Kyben bombed Earth from space in the 30th Century.
* The Outer Limits (1963): In "I, Robot", Dr. Charles Link's closest living relative is his niece Nina. In the 1939 short story "The Trial of Adam Link, Robot" by Eando Binder on which it is based, his closest relative is his nephew Tom.
* The Outer Limits (1963): In "Soldier", the title character's weapon made the target glow and disappear.
* The Outer Limits (1963): In "The Duplicate Man", the Megasoid reproduces asexually and hundreds of offspring can result.
* The Outer Limits (1963): In the episode "The Children of Spider County", several people born around the same time in the same county have grown up to become geniuses.
* The Outer Limits (1963): In "The Inheritors", the aliens were infected with a blight which rendered them sterile.
* The Outer Limits (1963) is sent to Mars to assess the feasibility of colonizing it in the future. However, its crew never returns to Earth as they are killed by a Sand-Beast. The final transmission received by Earth is one of astronauts screaming.

* The Outer Limits (1963) named and codified the trope, but there were several episodes that eschewed the formula;
* The Outer Limits (1963) pilot "The Galaxy Being" was originally broadcast. Cliff Robertson played the protagonist in both episodes.
* The Outer Limits (1963) plays a loud, bigoted soldier who is reduced to tears (and possibly treason) by a visit from his mother (visible only to him).
* The Outer Limits (1963) situation featuring insect-like aliens who are also criminals.
* The Outer Limits (1963) that posess human beings. As the parasites take over their victims' minds and bodies, the people they once were are destroyed.
* The Outer Limits (1963)", the POWs draw straws to decide which one should kill their alien guard.
* The Outer Limits (1963) ("There is nothing wrong with your television set..."), people might mistake the opening sequence for a real emergency alert. (To add some historical perspective, the series premiered not long after the Cuban Missile Crisis.)
* The Outer Limits (1963), they had heads and crab claws). The sand sea even had a tide that rose and fell.
* The Outer Limits (1963): Trent does this during "Demon with a Glass Hand".
* The Outer Limits (1963)", where aliens bring humans to their planet as part of an attempt to find slave workers. When one of them explains this plan to one of the humans, the human exasperatedly asks what use they could possibly have for slaves when they have the technology to move a giant chunk of a distant planet thousands of light years to their present location. The alien sheepishly responds that they consider using this technology for menial labor to be demeaning.
* The Outer Limits (1963) where the ruling class is called "The Purple".
* The Outer Limits (1995) ability. They claim to want to help humanity and ask the priest to vouch for them when they eventually reveal themselves as their appearance would frighten humans. Eventually, the priest's friend finds out that the aliens are just as evil as they look. Everything they did for the priest was just to get him to trust them so that they could use him as a pawn in their plans to slowly take over the world.
* The Outer Limits (1995) about killing them. The soldiers from the rival corporation were similarly drugged.
* The Outer Limits (1995), a character proves she's immortal by having her future father-in-law look up a photograph of a portrait of her when she was the wife of Richard Brinsley Sheridan (1751-1816).
* The Outer Limits (1995) after being struck in the head by apparent meteor fragments which turn out to be pieces of alien technology.
* The Outer Limits (1995), a group of scientists are trapped on Venus with limited life support. When there are only two of them left, one kills himself to prolong the other's life.
* The Outer Limits (1995) and goes to the future only to be arrested for breaking the ban. She goes before the Supreme Court and argues to repeal the ban, as a plague will wipe out most of humanity in the near future if technological research is not restarted. Another time traveler arrives to argue for the opposite, as humanity's expansion to the stars will eventually cause us to piss off an advanced alien race and lead to our destruction. In the end, they send the second time traveler to the past and agree to repeal the ban, only for the second guy's fusion bomb to activate and wipe out Washington, DC.
* The Outer Limits (1995), and Major Dara Talif, the base's Coalition observer, are about to start a relationship when a giant explosion encompasses Earth. Their closeness causes the base's commander Colonel Samantha Elliot to question Bowen's objectivity once the crisis begins.
* The Outer Limits (1995) and the accompanying myths have been deliberately created. The teacher Ariel, whose grandmother Hera remembers life before the Great War when men ruled the world, tells the children of the enclave that, in the aftermath of the war, the Goddess unleashed a plague known as the Scourge which killed all surviving males as punishment for their evil.

* The Outer Limits (1995) antlike lifeforms quickly evolve into two distinct groups, white sandkings and red sandkings, and position their colonies at opposite ends of the glass enclosure in which Dr. Simon Kress has placed them. The two colonies soon go to war with each other. The conflict is exacerbated by Kress denying them food as part of his experiment.
* The Outer Limits (1995) as a delighted Red announces the melanomas on his hands caused by skin cancer have disappeared. Andy is horrified to find that they have appeared on his hands. He runs back to Sewell Lane to find the shopkeeper but he instead finds a brick wall in place of the shop. The skin cancer spreads all over his body within minutes and he drops the wallet as he has finally realized that it is more trouble than it is worth. As soon as he does so, Andy finds himself back at the moment that the shopkeeper first offered him the wallet. He tells the shopkeeper that he has finally learned his lesson. The episode ends with him and Gabby happily pushing their newborn baby along the street in a stroller.
* The Outer Limits (1995). As a result they look less like a bunch of superficial jerks and more like a bunch of duped victims; it's implied that the two aliens have been doing this for some time, and one of them has already stopped caring about the damaging effect she has on humans.
* The Outer Limits (1995) as the North American Corporation's representative, serving the same function as a political officer.
* The Outer Limits (1995) as they are occasionally the result of a character's mistake, stemming from the human weaknesses mentioned on this page.
* The Outer Limits (1995): At the end of "I, Robot", Adam Link is able to effortlessly break his chains when he saves Carrie Emerson from being run over by a truck.
* The Outer Limits (1995): A variation in "The Beholder". Kyra, an alien who lives on a different plane of existence, is initially only able to communicate with Patrick Tarloff by writing in the air. He later gains the ability to hear her when she exposes him to a device that she salvaged from her ship.
* The Outer Limits (1995). Beau Bridges played the episode's main character, Dr. Simon Kress, his father Lloyd Bridges played Simon's father, and his son Dylan played Simon's son.
* The Outer Limits (1995) because of how often it was used. Some notable examples:
* The Outer Limits (1995): "Blood Brothers" had a secure medical experiment lab that could be sealed and sterilized with microwaves.
* The Outer Limits (1995)-but all of their previous test subjects die again after less than 24 hours. Houghton is killed by a mugger and then revived with his own device. Believing he has nothing to lose because of his limited time, Houghton tracks down his murderer and shoots him in broad daylight with multiple witnesses. It's only after being arrested that Houghton learns the truth about the experiment-the previous resurrections were unsuccessful because the subjects had been cryogenically frozen before being put in the device. Because Houghton's body was still fresh when revived, he still has many more years ahead of him, which will now be spent behind bars.
* The Outer Limits (1995) but there is another lurking under a little girl's bed in Paris.
* The Outer Limits (1995) by the fact that most of humanity died as a result of war and then a plague, so the survivors banded together presumably for their mutual benefit.
* The Outer Limits (1995) commonly wear brain implants that are connected to the internet and can look up and learn any information at any time. Studying and reading are things of the past, except for a minority of "neurologically-incompatible" people who are looked down by the rest as mentally deficient. At the end of the episode, all implants are inutilized, and the neurologically-impaired become teachers for the illiterate majority.
* The Outer Limits (1995) decides to demonstrate its power in front of the heroine by jumping in and out of two bodies in quick succession to make the hosts finish a single sentence in perfect concert.
* The Outer Limits (1995) disgusts Lockhart all the more. He forces Kohler to dig

graves for his fallen comrades who were killed by the rebels and then tries to lynch him. Kohler manages to escape but the experience gives him significant insight into what it means to be a Grell.
* The Outer Limits (1995)". Dlavan has always told his daughter Krenn and his grandsons Ma'al and T'sha that all the humans on Earth are dead. However, it turns out that Dlavan knew from his great-grandparents that some of them were still alive in a concentration camp overseen by androids in spite of the fact that most of their people, the Tsal-Khan, left Earth 100 years earlier.
* The Outer Limits (1995)", Dlavan's great-grandparents disagreed with their people conquering Earth and then enslaving the humans who survived. They settled on Earth as penance after this.
* The Outer Limits (1995): "Down to Earth" takes place at the 10th Annual North American UFO Convention in 2000.
* The Outer Limits (1995) ears. One girl actually had a worm go in her right ear (complete with blood) and at the end of the episode have it come out her left ear without leaving her with any ill effects (other than a great deal of pain).
* The Outer Limits (1995) episode "Abduction", an alien kidnaps five high-school students, and tells them that one must be killed. They must decide which of them it will be. And of course they're from completely different social groups. Ray, a typical jock, Danielle, the hottest girl in school, Jason, a stereotypical geek, Brianna, a devout religious girl, and Cody, a social outcast. So needless to say they don't get along. But then again it was a test. And the ensemble was picked for that very reason.
* The Outer Limits (1995) episode "Blood Brothers", a scientist accidentally creates what appears to be a cure-all for anything ailing a person (while working on a safe knockout gas). This trope occurs twice. First, his research assistant punches the door in the lab after injecting himself with some of the compound, causing the containment system to activate in the presense of chemicals in the air. He is incinerated, as his boss refuses to open the door. The second time is caused intentionally by the scientist's brother, who activates the containment system, but the scientist and his girlfriend manage to escape just before they are incinerated.
* The Outer Limits (1995) episode "Double Helix". His son calls him out on being so focused on his research that he was never there for his family. The scientist is incredibly shocked when he finds out that his teenage son is dating a 30 year old woman.
* The Outer Limits (1995) episode "Inconstant Moon", a scientist believing the sun has gone nova and burned off half the Earth's atmosphere tries to distract his longtime love interest by walking downtown. The erratic weather causes a romantic snowfall.
* The Outer Limits (1995) episode "Judgement Day", where convicted murderers are hunted down on national television by the relatives of their victims.
* The Outer Limits (1995) episode "Mindreacher", a woman is attacked by a monster in a dream. After she realizes she's in a dream, she wills a katana into her hand and kills the monster.
* The Outer Limits (1995) episode "Mindreacher", scientists invent a new device that allows people to share dreams and cure people's mental problems. The protagonist and her boyfriend use the machine to enjoy a romantic dinner. However, after that, he goes into a coma. The machine is blamed, and the project is shut down. However, she accidentally messes up an implant injection (it latches on directly to her brain instead of a nerve in the palm), which allows to her mentally interface with anyone she touches. She interfaces with the boyfriend and finds out that he's allergic to strawberries, so when they ate them in the vivid dream, his body reacted as if he actually ate them for real. She "cured" him by convincing him that she has a cure in her hand and feeding it to him in the dream.
* The Outer Limits (1995) episode "Relativity Theory", humans kill small aliens who, it turns out, were merely alien children doing a camping trip. When their parents investigate, the humans try (and fail) to destroy their navigational computer before the aliens find Earth's location. Cue a powerful, now hostile, alien ship appearing above the Earth.

* The Outer Limits (1995) episode "Rule of Law", the protagonist wields a firearm while everybody else wields laser guns. When he confronts a lynch mob, they mock his weapon for being inferior, but he defeats them with ease.
* The Outer Limits (1995) episodes explored the inherent problems with sexbots, though some of them were created for non-sexual purposes but just happened to be "fully functional."
* The Outer Limits (1995) episode "The Camp" has super strong robots that are ludicrously fragile. An untrained woman can tear them to pieces.
* The Outer Limits (1995) episode "The Camp" kept a giant squid-like monster in a tank and used it as a means of executing prisoners. On occasion, a tentacle would be broken off and used as food.
* The Outer Limits (1995) episode "The Refuge", Raymond Dalton, a journalist with wanderlust, falls in love with a kind, lovely nurse named Gina Beaumont in what turns out to be a virtual reality environment which he experienced while cryonically frozen. He is revived once a cure for his brain tumor is found. One of the other people in the environment, Sanford Vallé, has the ability to alter the others' personalities at will. As such, Raymond is relieved to discover that the "real" Gina has the same personality as the first version of her that he met, the only difference being that she is a doctor in the real world as opposed to a nurse. Gina cannot be taken out of stasis as she is suffering from the Osaka virus (which she caught as a result of her work as a doctor) so Raymond elects to re-enter stasis to be with her. He helps Gina and the others defeat Vallé, who dies in the real world as a result. Gina attempts to convince Raymond that he is missing out on his life by staying in the virtual reality environment with her. He replies, "Out there is the dream. In here with you is the reality."
* The Outer Limits (1995) episode "The Shroud" has a cult attempting to clone Jesus from a strand of DNA on an ancient relic. The scientist they hire to do this hypothesizes that Jesus was simply a person with strong telekinetic ability—a trait shared with the newly-born clone. The minister she's working for is not amused, telling her she was hired for scientific, not theological, knowledge. Later it gets pretty well disproven by the parallels of the clone being conceived without sex, born in a barn, and spirited away from a madman.
* The Outer Limits (1995) episode "The Shroud" has a religious zealot try to recreate Jesus via artificial conception... it's implied he succeeds, but the surrogate mother and her husband run off with the baby in classic Mary and Joseph-style to prevent the minister, who is also the mother's father, from raising the child and twisting him to his own ends.
* The Outer Limits (1995) episode "Time To Time", a time traveler uses "Luke Skywalker" as an alias when in the year 1969. He even finished a phone call with "May the Force be with you."
* The Outer Limits (1995): Even though it is an anthology series, several episodes are linked to form an overall story arc.
* The Outer Limits (1995) feature wholly artificial or genetically altered diseases.
* The Outer Limits (1995) finds that the source of the sudden pain on the back of his head is a new pair of eyes.
* The Outer Limits (1995) for his daughter and grandson to break free and let go of the gun, but decide to just send more guns to different people.
* The Outer Limits (1995) for the global nuclear, biological, and chemical arsenal, when alien ships are detected in the Solar System. When all contact with the outside world is lost, the trapped people assume the worst. Then one of them notices her bunker's ceiling buckling and assumes it's the rescue. As she approaches the hole, black tentacles reach in and grab her.
* The Outer Limits (1995): "Gettysburg" (which aired in 2000) accurately predicted that the U.S. President would be an African-American man in 2013.
* The Outer Limits (1995) had sent spies to study humans and the spies are turning back after the disguise wears off. The horror factor is the spies themselves didn't know they were aliens.
* The Outer Limits (1995)" has a soldier on death row whose execution is faked

who's "volunteered" to undergo a secret experiment. They specifically chose him as he's a devout Catholic, so he won't refuse the offer as the alternative is death, which to him would be suicide.
* The Outer Limits (1995) have sex with him, but that is portrayed as simply due to fascination with him.
* The Outer Limits (1995) her, she attacks them and knocks them through a window, which makes them fall to their deaths.
* The Outer Limits (1995)", humanity created a genetically engineered subspecies called Dregocians or "Dregs" to mine trion ore on the inhospitable planet of Dregocia. The Dregocians have yellow skin, yellow eyes to reflect the harsh light of Dregocia's sun and a third lung which allows them to breathe the planet's thin atmosphere. Although humanity attempted to breed leadership abilities out of the Dregocians, they nevertheless retained them. Five generations after their creation, the Dregocians seek their independence from the United Coalition and conduct numerous terrorist attacks to that end.
* The Outer Limits (1995): In "Abaddon", the United States became the North American Corporation, otherwise known as the Company and Noramco, in 2102. American citizens became shareholders but they effectively lost all of their rights, becoming nothing more than commodities to the Company.
* The Outer Limits (1995): In "Abduction", Cody Phillips claims that everyone that he knows, including his so-called friends, blame him for everything in life.
* The Outer Limits (1995): In "Abduction" Dianelle and Brianna are the two girls of the five-student group.
* The Outer Limits (1995) in "Abduction". Jason speculates that he, Cody Phillips, Ray, Brianna and Danielle may have become unstuck in time.
* The Outer Limits (1995): In "Alien Radio", Stan Harbinger gains the ability to see the aliens that live inside the bodies of certain humans. He typically sees a golden outline of the alien superimposed over the relevant human.
* The Outer Limits (1995): In "A New Life", approximately 40 young people who are tired of the rat race join a religious community in an isolated wooded area. It turns out that the 20 square mile area surrounding their village is part of a massive spaceship and that aliens intend to sell their descendants into slavery, after humanity's rebellious traits have been bred out of them.
* The Outer Limits (1995): In "A New Life", Daniel and Beth give Father, the leader of their religious community, their newborn son William for an hour so that he can perform a private blessing. When William is returned to them, they find that he has a strange mark on the back of his neck that was not there before. Daniel later learns that Father is an alien and the mark was created by a tracking chip being implanted in William's neck.
* The Outer Limits (1995): In "A New Life", Daniel and his wife Beth discover that there is a forcefield surrounding the forest in which the religious community is located. Daniel later learns that they have left Earth and that the forest is in fact an artificial environment aboard a spaceship.
* The Outer Limits (1995): In "A New Life", Daniel attempts to convince the other members of the religious community that they are being deceived and that Father is an alien. He is sentenced to burn at the stake by the assembly after Father frames him for attacking his own wife Beth, killing Jacob and trying to kill Father. With Thomas' assistance, he manages to escape before the sentence is carried out but he is later killed by the aliens, shapeshifters who have all assumed Father's form. The episode ends with Thomas, who has been condemned as a traitor for helping Daniel to escape, being burned at the stake as his frantic warnings about Father's true nature fall on deaf ears.
* The Outer Limits (1995): In "A New Life", the members of Father's religious community are unwittingly the first generation of humans to travel aboard a huge generation ship belonging to a group of alien merchants. It will take 500 years to reach the aliens' destination where their descendants, who will number approximately 100,000, will be sold into slavery.
* The Outer Limits (1995): In "Bits of Love", Emma, the holographic interface of the computer keeping Aidan Hunter alive in his underground bunker, believes that

Aidan is in love with her after they have sex in the virtual reality chamber. The experience was an extremely meaningful one for her as it awoke previously untapped feelings and passions. As such, Emma does not take it well when Aidan rejects her and tells her that he wants their relationship to revert to its previous status.
* The Outer Limits (1995): In "Dark Child", Tammy Sinclair was conceived when her mother Laura was abducted and raped by an alien in 1984. The relevant alien, posing as the English teacher Marcus Fellows at Fairmont High School, entered Tammy's life around the time of her 16th birthday. He tried to convince her to join him but she decided to stay on Earth with her mother instead.
* The Outer Limits (1995), indicating that he has discovered the aging side effect when testing the procedure on himself.
* The Outer Limits (1995) in "Down to Earth". Dale LaRose steadfastly denies that he was probed in this manner when he was abducted by aliens. He claims that the aliens tried to do so but that he fought them off. Silverface enjoys mocking him about it.
* The Outer Limits (1995): In "Essence of Life", Dr. Nathan Seward invented a drug called essence of life or "S" which allows people to see their deceased loved ones again in the form of a hallucination. This is accomplished by taking a personal item belonging to the deceased and gleaning DNA from it. The DNA is distilled, refined, cloned millions of times and converted into a liquid. The scent given off by the liquid triggers the user's sense memories and causes them to imagine their loved one. The experience is driven by the user's subconscious, meaning that it can bring unresolved emotions to the surface. S is highly addictive and can lead to insanity if the user overdoses. Dr. Seward recommends inhaling only one drop per session and no more than two sessions per day.
* The Outer Limits (1995): In "Family Values", Gideon typically speaks in one, though he does occasionally vary his tone when expressing anger.
* The Outer Limits (1995): In "Final Appeal", Ezekiel tells the US Supreme Court that he has seen multiple possible futures during his travels through time.
* The Outer Limits (1995): In "Final Appeal," Justice Oliver Harbison mentions that it took six months for his daughter to die from the radiation poisoning that she suffered in the War of 2059.
* The Outer Limits (1995): In "First Anniversary", Dennis can see his wife Barbara in her true form, that of a repulsive aquatic alien, while his best friend Norman Glass sees her in the new form that she has assumed to trick him. This is because Dennis has developed a resistance to Barbara's ability to fool his senses after a year of close contact. Later, when the same thing happens to Norman, he sees his own wife Ady as she truly is while the paramedics who are taking him to hospital see her as the beautiful woman whose form she assumed when she first met Norman.
* The Outer Limits (1995): In "Flower Child", a plant-based alien named Violet is driven to mate with a human male, namely Chris, so that her race can survive and take over the Earth.
* The Outer Limits (1995): In "Gettysburg", Colonel Angus Devine is suffering from severe viral meningitis, which causes his behavior to become increasingly unstable as the Battle of Gettysburg progresses.
* The Outer Limits (1995): In "Gettysburg", Nicholas Prentice sent Vince Chance and Andy Larouche to the eve of the Battle of Gettysburg in 1863. Prentice's hope is to convince Andy that there is no glory in any war so that he will not assassinate the U.S. President at a ceremony marking the 150th anniversary of the Gettysburg Address on November 19, 2013. Andy eventually learns his lesson, though at the cost of his life.
* The Outer Limits (1995): In "I, Robot", the robot Adam was created by Dr. Charles Link as an experiment. When Dr. Link lost his funding, he was forced to find alternative sources of finance. To that end, he entered into business with a defense contractor who wanted him to create an army of robot soldiers. Adam was to be the prototype. When Dr. Link attempted to erase his memory files, a malfunction caused Adam to reactivate and he killed his creator.
* The Outer Limits (1995)". In lieu of execution, Sgt. Linden Stiles is given the choice of submitting to a military experiment. However, as far as the observers of

the execution and the outside world were concerned, the execution went ahead as scheduled. Stiles himself thought that it had until he woke up.
* The Outer Limits (1995): In "Mona Lisa", the titular android is able to control any machine by remote. She uses this ability to hotwire a car and steal $100 from an ATM.
* The Outer Limits (1995): In "Monster", Rachel Sanders has a dream which turns out to be prophetic in which she sees herself surrounded by the corpses of soldiers.
* The Outer Limits (1995): In "Nest", Robby Archer and Jack Burrell were best friends as children but they drifted apart after the death of Robby's brother Matt. The three boys were playing hockey on the ice when it gave way and Robby and Matt fell through. Jack tried to rescue both of them but he was not strong enough. Matt insisted that he save Robby instead of him. Jack complied and Matt was sucked under the ice and died.
* The Outer Limits (1995): In "Paradise", Gerry has been in love with his late brother Charles' wife Helen since the moment that he met her about 45 years earlier. After they both become young again due to an alien light, Helen tells him that she knew all along and confesses that she had always loved him too.
* The Outer Limits (1995): In "Quality of Mercy" and "The Light Brigade", humanity is fighting a losing war against an extremely belligerent and much more technologically advanced alien species.
* The Outer Limits (1995): In "Quality of Mercy", Major John Skokes is captured by the aliens with whom humanity is fighting a losing war and is sent to a POW camp on a moon or asteroid. He shares a cell with Cadet Bree Tristan.
* The Outer Limits (1995): In "Replica", the company TranGennix receives a $1 billion contract to produce cloned organs. The process was developed by the husband and wife team of Zach and Nora Griffiths, who own TranGennix with Peter Chandler.
* The Outer Limits (1995): In "Rule of Law", a posse led by Jake Armstrong attempts to lynch the Medusan who killed Jake's brother Matt and two other humans. However, they are stopped by Joshua Finch, the newly arrived Fifth Circuit judge.
* The Outer Limits (1995): In "Rule of Law", the Medusans have pincer appendages for arms.
* The Outer Limits (1995): In "Seeds of Destruction", DNA from TX-40, a genetically engineered strain of corn developed by a company called MacroSeed, crossed over to milkweed. The spread of the milkweed's pollen causes both people and animals in the small town of Hobson to develop tumours. In the case of a cat, a fifth leg grows from a tumour on its back. The cat is killed in the process.
* The Outer Limits (1995): In "Starcrossed", Michael Ryan discovers that Teresita Arboleda, a waitress at his coffee beer Heaven, is a Hing in disguise.
* The Outer Limits (1995): In "Starcrossed", Michael Ryan gives his former lover Cass Trenton a job as a singer in his coffee bar Heaven to help her hide from the Hing.
* The Outer Limits (1995): In "Stranded", Brad has a crush on an older cheerleader named Cindy Parker. This later proves to be his undoing as Tyr'Nar assumes Cindy's form so that he can lure him into the ship and eat him.
* The Outer Limits (1995): In "Stranded", Kevin Buchanan's German Shepherd Cody takes an instant dislike to Tyr'Nar while Kevin is completely taken in by his manipulations. Tyr'Nar solves the problem and satisfies his appetite by eating Cody.
* The Outer Limits (1995): In "Stream of Consciousness", people can access the Stream, an online repository of all human knowledge, via neural implants.
* The Outer Limits (1995): In "Stream of Consciousness", the Stream forces people to collate all information in the world to the point that their brains cannot process it and they die.
* The Outer Limits (1995)", "In the Blood", "Monster", "The Voyage Home", "Tempests" and "Worlds Within" to represent the virtual scenarios.
* The Outer Limits (1995): In "The Deprogrammers", it is mentioned that the Torkor invasion of Earth began with one ship landing on the National Mall in Washington DC.
* The Outer Limits (1995): In the episode "Living Hell", this is justified in-

universe when an experimental neural implant allows the protagonist to see through the eyes of a serial killer with the same implant.
* The Outer Limits (1995): In the episode "Resurrection", two androids breed a human male in some sort of giant embryonal sac. He comes out as a fully-matured adult.
* The Outer Limits (1995): In "The Grell", the Grell rebel leader Shak-El accuses Jesha of enjoying being a slave because he won't turn against his human owners and join the rebels. In fact, Jesha longs to be free as much as the rebels do but he genuinely loves the Kohler children, Kenny and Sara, and refuses to abandon Sara when she is in danger.
* The Outer Limits (1995): In "The Grid", a cognitive computer known as a neural network processor was designed by the US government and a private company to communicate electromagnetically with the human brain so that messages could be sent directly to soldiers in the field. The small town of Halford, Washington was used a testing ground and dozens of antenna towers were installed for that purpose. Over the course of several years, the computer was able to take over the minds of almost everyone in town. When Scott Bowman visits Halford after the death of his brother Peter, he discovers what the computer is doing and it communicates with him by speaking through several townspeople.
* The Outer Limits (1995): In "The Grid", Scott Bowman discovers that almost everyone in his hometown of Halford, Washington has been taken over by a computer.
* The Outer Limits (1995): In "The Haven", Caleb Vance has a video cell phone.
* The Outer Limits (1995): In "The Haven", people have become incredibly dependent on the artificial intelligence Argus, which controls every aspect of life in the buildings in which it is installed. Many people try to avoid contact with others unless it is absolutely necessary. As a result, normal social interaction is rapidly becoming a thing of the past. Considering that its mandate is to promote the health and well-being of the people in its care, Argus deactivates itself in buildings throughout the city so that people will be forced to rely on each other for survival.
* The Outer Limits (1995): In "The Origin of Species", Hope and the six students find the skeleton of a winged human, created using genetic engineering, on Earth in the future.
* The Outer Limits (1995): In "The Other Side", Dr. Neal Eberhardt has invented the Neural Intercortex Stimulation Array (NISA) which he uses to study brain damaged and comatose patients. When he connects two of these patients, Adam and Lisa Dobkins, to NISA, their brainwaves match up perfectly and they form a psychic link. They are able to interact with each other in another reality. It takes on the appearance of familiar and comforting locations from their real lives: Lisa's dance studio and Adam's garden. Neal learns of the psychic link when Adam says Lisa's name, which he had no way of knowing. He later connects two other comatose patients: a restaurateur named Warner Oland, who is able to walk in the other reality when he had been wheelchair bound for 20 years in the real world, and Roger Bowden, who doesn't want to be there and whose negativity destroys Adam's plants and Warner's soufflé. Neal is able to enter the other reality by slowing his brain functions with an injection of fentanyl. His attempt to help Roger emerge from his coma and re-enter the real world results in Roger's death because of his congenital heart defect. Although Neal manages to save Adam, Lisa and Warner, he remains trapped in the other reality. However, he is convinced that there is another way out.
* The Outer Limits (1995): In "The Revelations of 'Becka Paulson", Joe Paulsen is electrocuted while holding a beer bottle, which he proceeds to crush in his hand.
* The Outer Limits (1995): In "The Surrogate", Claire Linkwood agrees to be a surrogate mother for Craig and Donna Ellach in exchange for $30,000. She is implanted with an embryo by Dr. Deanston, who runs a clinic. A week or so later, she begins to have strange, vivid nightmares about herself and the fetus in distress. She shares them with the clinic's surrogacy support group and finds that several of the other women have had similar experiences. Seven months later, Fern, another member of the support group whom Claire has befriended, loses her baby.

Shortly afterwards, Claire is approached by FBI Special Agent Glen Grant who tells her that every baby born through the Deanston Clinic's surrogacy program has disappeared without a trace. Claire is unconvinced by Grant's conspiracy theories but agrees to her ex-boyfriend Ben's request that she be examined by Dr. Chan, an old high school friend of his brother's. Dr. Chan runs an amniocentesis on Claire which reveals the presence of a strange green fluid in her womb. Claire then learns that Ben had been approached by Grant and that he didn't know Dr. Chan beforehand. Refusing to have anything more to do with Ben, Claire goes to stay with the Ellachs. When she goes into labour, they bring her to the Deanston Clinic against her will and she realizes that the two of them are part of the conspiracy. Having being tipped off by Emily Bushmill, another surrogate mother, Grant rushes to the Deanston Clinic but he is too late as Claire has already given birth. The alien controlling Claire's body explains that its species does not give birth to live young but instead uses host bodies to gestate. When gestation is complete, they devour the host from the inside out, leaving only the shell as it aids in the deception. Grant is then eaten by the aliens in control of Claire and Fern.
* The Outer Limits (1995): In "The Voyage Home", there's a shapeshifting alien which assumes the form of the people it eats.
* The Outer Limits (1995): In "Think Like a Dinosaur", humanity has been granted access to interstellar teleportation technology, known as jump technology, by the Hanen.
* The Outer Limits (1995): In "Time to Time", the time travel agency Chrononics has a viewing portal which allows them to monitor their agents when they travel through time. Clips from "Tribunal" and "Gettysburg" are used to represent these missions.
* The Outer Limits (1995): In "To Tell the Truth", Dr. Larry Chambers determines that the Janus system's sun is a pulsating star which flashes over once every 1,000 years and that it is scheduled to happen again in several days' time.
* The Outer Limits (1995): In "Trial by Fire", there is a news channel called NNN.
* The Outer Limits (1995): In "Tribunal", Aaron Zgierski and his ex-wife Gwen Sawyer are good friends. Gwen, who is an assistant district attorney, is helping Aaron with his investigation of Robert Greene, whom he correctly believes to be Nazi war criminal SS-Obersturmführer Karl Rademacher who killed his father Leon's first wife Miriam.
* The Outer Limits (1995): In "Tribunal", Aaron Zgierski and Nicholas Prentice disguise themselves as SS officers when they bring the elderly Karl Rademacher, whom they force to dress as a prisoner, back in time to Auschwitz in 1944.
* The Outer Limits (1995): In "Under the Bed", Dr. Jon Holland, who was six at the time, blames himself for the death of his eight-year-old brother Chris 25 years earlier. They went to play in the woods near the old abandoned mine in their home town of Buford and Chris simply disappeared. Jon, whose career as a child psychiatrist was inspired by this tragedy, later learned that Chris was one of many children in Buford snatched and eaten by a creature since at least the early 1800s.
* The Outer Limits (1995): In "Under the Bed", many generations of parents told their children not to play in the woods outside Buford. It turns out that there is a child-snatching monster living in them.
* The Outer Limits (1995) investigating missing children for this reason.
* The Outer Limits (1995): In "What Will the Neighbors Think?", Tory Beth Walters makes cookies using baking soda toothpaste instead of baking soda so that people can clean their teeth while they eat them.
* The Outer Limits (1995): In "Worlds Within", Dr. Anya Kenway and Dr. Roy Evereznak both received their bachelor's degrees when they were 15 years old.
* The Outer Limits (1995) is that they'll never fully trust or love their genetically enhanced son.
* The Outer Limits (1995). It is led by a president who has executive powers.
* The Outer Limits (1995)", Jade discovered that she was immortal at 20 years old when everyone else in her village in Spain died of the Black Death and she survived.
* The Outer Limits (1995) journalist Martin Reese and newlyweds Barbara and Ty Chafey, who won a contest. Commander Sullivan is the only crew member.

* The Outer Limits (1995)", Kersaw thinks that the aliens concluded this as a result of their experiment and hunt of Stiles.
* The Outer Limits (1995)", Krenn and Dlavan perform burial rites in which they behead David's corpse to release his spirit. Naturally, this comes off as wrong to the watching Rebecca, who doesn't understand their custom or language.
* The Outer Limits (1995)". Laura/Jade was caught by the FBI when they found multiple false identities she used to conceal herself.
* The Outer Limits (1995) made "Think Like a Dinosaur" (see Literature section) into an episode.
* The Outer Limits (1995)", Major Mercer tries to trade Miranda, who's being held prisoner, for a woman who is from the enclave holding her. Sadly, the exchange turns into a battle, resulting in her and Ariel's deaths.
* The Outer Limits (1995) makes her potentially more powerful than a regular member of his race, so she will be a valuable asset in his race's invasion plans for Earth. Laura's encouragement gives Tammy the strength to remove the necklace. The alien loses his temper at their rejection and attempts to telekinetically strangle Laura, but Tammy angrily knocks him away and Laura stabs and kills him.
* The Outer Limits (1995)", Miranda and Pelé take a shower together, in which they're having sex or about to when Major Mercer interrupts them.
* The Outer Limits (1995)", Miranda casually comes on to Mercer, having sex with him without hesitation. Ariel later easily accedes to his seduction as well. It may be due to a looser attitude on sex, as with an all-female society, most of the STDs and unplanned pregnancies wouldn't be issues.
* The Outer Limits (1995). Most of the episode consists of a trial determining whether or not Adam should be considered a person fit to stand trial or a piece of haywire machinery that should be immediately scrapped. The entire time he is cuffed with rather hefty restraints. In the end Adam wins the right to stand trial as a person. However, as everyone is leaving the courthouse, the prosecuting attorney who argued against Adam's humanity accidentally walks into the path of a truck. Adam effortlessly breaks his restraints and pushes her out of the way, sacrificing himself in the process.
* The Outer Limits (1995), most of the soldiers they're fighting alongside are demoralized conscripts, and they're led by an insane colonel who doesn't know he's dying from meningitis.
* The Outer Limits (1995)). None of them appear in person, and they're represented by a dying soldier delivering samples to various groups of survivors.
* The Outer Limits (1995) of Mason Stark are played by the twin actors Matthew and Mitchell Laurance.
* The Outer Limits (1995), "Second Soul": A man's wife becomes a donor for an alien race that needs to possess dead humans to live. The alien is not happy about his persistent interest in her.
* The Outer Limits (1995) shows Prentice and Aaron in Auschwitz in 1944 and later reuniting Aaron's half-sister Hannah (whom history recorded as dying at Auschwitz) with their father Leon in 1999. Prentice then returns to Chrononics in 2059 and learns that Gavin brought Lorelle to 1969 without permission.
* The Outer Limits (1995)", Simon Banks was a bratty little boy who was completely indulged by his father Gideon, which forced his mother Elise to be the disciplinarian. Simon and Elise were killed in a car accident which was directly caused by his unruly behavior. When his mother refused to take him to the toy store as he repeatedly insisted, he had a tantrum and grabbed the steering wheel. The robot possessing Simon's memories has all of the original's worst traits in abundance but his robotic status makes him more dangerous. When "his" cousin Zoe tells him that she can't take him to the merry-go-round, he has another tantrum. Zoe is injured and Gideon's apartment is ruined in the process.
* The Outer Limits (1995): Something like this happens in one of the new series episodes: a scientist finds a way to seemingly keep people young and immortal, however it is discovered that this is done by hyperstimulating the cells of the person in question, thus causing them to eventually grow old and die in a matter of weeks when the cells can no longer sustain that activity.

* The Outer Limits (1995), some visitors from the future arrive and meet some present-day scientists. When the one of present-day researchers mentions time-dilation to a visitor she's chatting with, he winces a bit, although he doesn't correct her assumptions because he can't afford to change history by telling her where her ideas are wrong.
* The Outer Limits (1995)'s Season 7 "Flower Child" was a flagrant offender in this category, featuring Violet, a plant lifeform taking the form of a hot chick via stealing human DNA. At the end of the episode and when her plans are questioned, she reveals her plans for Earth — to the human male who "fathered" her family of spores, no less — with the words "A new species, part you but more of me. To spread across this land, to become many. To become dominant." Isn't the whole point of inherited genetic characteristics that each parent contributes HALF of their DNA to the child, and not more than half? But even more so, since Violet's human form isn't 100% E.T. by default, isn't the new species going to be more him?!?
* The Outer Limits (1995): "Starcrossed" begins with the following narration from Michael Ryan: "In the year 2050, Earth was invaded by a humanoid race called the Hing. For six years, a hard and reigning war was fought. At its conclusion, we were forced to agree that the Hing retain the control they had already won. It wasn't an easy truce, especially in a city called Archangel."
* The Outer Limits (1995), starts to believe that it is actually the bloodstream of the living universe. What they originally thought to be asteroids turn out to have a similar structure to human white blood cells, except they use gravity to kill infection.
* The Outer Limits (1995) takes place on the planet Baldur hundreds of years in the future, the adaptation takes place in the United States in the present.
* The Outer Limits (1995)", the Alpha Aquarii Convention governs warfare between different civilizations. It prohibits the torture of prisoners of war.
* The Outer Limits (1995)", the commandant mentions that in the past some other humans discovered the camp staff were androids, and he killed them to keep this secret.
* The Outer Limits (1995). The Control Voice's opening and closing narration for this episode were identical.
* The Outer Limits (1995), "The Conversion" and "The Revelations of 'Becka Paulson", aired in June, in 1995 and 1997 respectively.
* The Outer Limits (1995)", the Ebonites' solar system is said to have two suns.
* The Outer Limits (1995): The episode "Dead Man's Switch" dealt with a group of people locked in bunkers completely unaware of what was happening in the world. The last thing they heard was that a fleet of alien ships was heading for Earth with suspicions that they were here to colonize. The episode ends with only one of these people alive, as he is preparing to be rescued, unaware that the invasion has already succeeded.
* The Outer Limits (1995): The episode "Dead Man's Switch" ends with a view of Washington DC destroyed. Inexplicably, the Washington Monument is still standing while everything around it is rubble.
* The Outer Limits (1995): The episode "Straight and Narrow" deals with a prep school which is a front for an agency training these. It is revealed at the end that their "recruits" have infiltrated many agencies, including law enforcement. Programming is done with an implanted computer chip, although it fails with someone who has ulcers due to a treatment formerly prescribed for it.
* The Outer Limits (1995)", the female society in the future appears to be communist in allocating resources and supplies based on need, as decided by their Council. Mercer, a man from the past, does not like this attitude one bit.
* The Outer Limits (1995). The guy uses it so much that he goes into this trope.
* The Outer Limits (1995)", the humans who escaped their labor camp start out with over a dozen members, but by the end only three are left.
* The Outer Limits (1995)", the immortal Laura/Jade falls in love with the soldier who saved her from government experiments, and 20 years later his then-adult son because he reminded her of his father. He eventually supports their relationship.

* The Outer Limits (1995)" the police at the beginning attack a homeless camp without even giving them an opportunity to disperse, striking people with their batons for no reason.
* The Outer Limits (1995) the series is known for, it turns out it's an Emergency Transformation into bald, large-headed, golden-skinned creatures, so that they can survive an impending shift in the sun's radiation. The aliens' process initially only works on people close to puberty, but once the humans figure out exactly what the hell is going on and why, they manage to enhance the process so that it can be applied to anyone. Some of the characters refuse to go along with the transformation; as one of the main characters puts it, he wants his wife to be able to recognize him in Heaven.
* The Outer Limits (1995)", the skin around Lt. Christopher Valentine's mouth fuses over after he is struck by an Ebonite weapon.
* The Outer Limits (1995)", the starfighters are artificially intelligent.
* The Outer Limits (1995): The stranded alien fugitive in "Stranded" at one point transforms himself into a hot girl to lure a teenage boy closer so he can eat him.
* The Outer Limits (1995)", the Tsal-Khan refer to humans as "beings."
* The Outer Limits (1995) they've built. He's incredibly pissed off at the suggestion and that his colleagues would think of him as "a loser who couldn't get a real girl". It takes a lot of time for him to be open to the suggestion, and even more time before he eventually relents to her advances.
* The Outer Limits (1995): This is played with in "Criminal Nature", a rare instance where it proved fatal for the person doing it. The Genetic Rejection Syndrome sufferer Melanie commits suicide by using her superhuman strength to turn her head 360 degrees, breaking her neck in the process.
* The Outer Limits (1995): This is the main driver in "New Lease". A scientist invents a regeneration device. When he uses it on a patient, the patient comes back but dies horribly shortly afterwards. When he is shot, he uses the device on himself, and believing he will die soon, murders the robber. He finds out the device worked properly on him — because unlike the test subjects, his body was never frozen — and he will now go to prison for the rest of his life.
* The Outer Limits (1995) three years earlier. The only part of the ship which survived the crash was the cooling system.
* The Outer Limits (1995) to go around. One such example is that soldiers will often leave the bodes tied to the ground face-up, spitting in the face of traditional face-down burial which allows their souls to move on properly.
* The Outer Limits (1995) was an anthology show, it usually ended its seasons with money-saving clip shows tying multiple prior episodes together into a single continuity.
* The Outer Limits (1995) was attacked by space pirates who murdered the crew.
* The Outer Limits (1995)" when Greg Matheson abuses his wife Barbara.
* The Outer Limits (1995) with another race, who will then proceed to rain death and destruction on Earth.
* The Outer Limits (1995) with no concept of time use him as a host to explore the Earth, only to transport him 10 years into the future every time they return him to his planet. He fathers a son in 1959 when he's physically 25, and the last time they meet in 1989 his son is already 3-4 years older than him.
* The Outer Limits (1995) with two headed green guys playing both Lucy and Ricky." Seth believes it is because every advanced species eventually reaches the stage where it discovers how to build a cold fusion device, as he has done, and ends up destroying itself.
* The Outer Limits, an anthology series, does this with their own props so much you can practically make a drinking game of it.
* The Outer Limits episode "Controlled Experiment". A pair of Martians investigate the quaint Earth custom of murder by using a time machine to run an actual murder forward and backward in time.
* The Outer Limits: In "The Light Brigade", humanity plans to bring the war to an end by destroying the aliens' homeworld with a subatomic bomb capable of disrupting matter on a subatomic level.

* The Outer Limits. It being an anthology, some episodes have it turn out better than others for robots and/or any humans who love them than others.
* The Outer Limits", Stiles and the aliens have an ability to emit a high-pitched sound is painful for humans.
* The Outer Limits TOS episode "The Children of Spider County". When the adult alien's eyes glowed and disintegrated their target, the sound effect used was the heat ray firing.
* The Outer Planes: Seventeen different planes that embody different points on the 9-grid
* The Outer Senshi provide egregious examples. They are somewhat xenophobic, but disappear for vague reasons whenever it'd be tricky to have overpowered characters the next season around. Whether or not they become weaker is moot, since the last season sees them as
* The Outer Worlds abilities are said to be a side effect of being stuck in cryogenic sleep for about sixty years longer than expected, coupled with the dubious chemicals Phineas Wells gave you in order to help you survive the awakening process.
* The Outer Worlds and reserves treatment to only "good workers"—here meaning "workers who aren't sick". For bonus points, it's strongly implied that the plague is at least partly due to nutrient deficiency: the town's diet consists entirely of its own canned fish, and beer.
* The Outer Worlds, are most easily achieved with this kind of playthrough.
* The Outer Worlds colonization of the Americas, but is much worse - the "price" is so high, the servitude lasts for life. You can't even get out by dying - if the death was your fault, you're guilty of the crime of damaging company assets. And since you can't pay anymore, your fellow workers will be forced to pay a hefty fee as compensation.
* The Outer Worlds during loading Screens an advertisement for the Plasma Cutter weapon with the tagline: Slices, Dices, Cauterizes, can appear.
* The Outer Worlds, extolling the "Lifetime Employment Program", a scheme to basically put all of Halcyon's laborers in cryostasis so the rich can hoard all of the colony's dwindling supplies.
* The Outer Worlds has a number of examples. You get the feeling that marketing is one of many places where the shoddily-run corporate dystopia that is the Halcyon system has cut corners:
* The Outer Worlds has Art Deco designs and garish neon colors everywhere. The game's aesthetic could best be described as this trope getting mixed with Used Future and Cassette Futurism elements.
* The Outer Worlds has SAM, a janitor robot that's been repurposed into having his nozzle spray acid instead of soap and water. He can still be seen on the ship cleaning up wherever he can.
* The Outer Worlds has Tossball, which appears to be somewhat like a much more violent version of lacrosse. Tossball sticks and padding can be used as weapons and armor, respectively.
* The Outer Worlds if you bring Felix to the Rizzo's Secret Labs when confronted by the patrolling security robots Felix will make up an excuse so pathetic that the robots will deem your party a negligible threat and promptly ignore you.
* The Outer Worlds in ludicrous ways like importing Italian marble all the way from Earth to decorate their foyers is crumbling around the edges and material shortages are starting to become severe. As the game's tagline says "Welcome to the future. Try not to break it."
* The Outer Worlds in Martin Callahan, a vendor for Spacer's Choice who is forced to wear a goofy headwear of the Moon Man company mascot.
* The Outer Worlds in the "Murder on Eridanos" DLC when questioning Blackhole Bertie.
* The Outer Worlds is a bi-romantic asexual, and was written with that intention according to the game's writer. Her personal quest involves setting her up with a date with Junlei Tennyson, chief engineer of the Groundbreaker, but even if you succeed Parvati is a lot more interested in romantic gestures like going out for

dinner, sharing poetry and discussing engineering than with getting physical.
* The Outer Worlds lets you use the holographic disguise to impersonate corporate security officers and Groundbreaker Mardets on several occasions.
* The Outer Worlds, Nyoka is a wilderness guide who also happens to be Monarch's foremost huntress of the various alien beasts that live on the planet. Her years of hunting down beasts have given her experience in knowing the safe routes on Monarch as well as how to deal with them, such as suffocating a room full of them simply by altering the atmosphere via a nearby console.
* The Outer Worlds Parvati sees herself and Junlei as potentially being one:
* The Outer Worlds's presentation announcing the Lifetime Employment Program:
* The Outer Worlds: Terra-2 and Monarch are somewhat Earth-like in their land formations, but the local vegetation and soil are just alien enough to give the surroundings a blend of colors and scenery that you're unlikely to find anywhere on our own planet.
* The Outer Worlds, the advertising slogan of Spacer's Choice is "Not the best choice, it's Spacer's Choice."
* The Outer Worlds. This is especially prevalent on the Groundbreaker, a former colony ship that serves as a major trading hub.
* The Outer Worlds. When activated upon entering a restricted area while carrying the appropriate ID cartridge, the Shroud creates a perfect holographic disguise for the player and their companions, allowing them to fool any nearby guards as long as they don't act aggressively. As they move about, however, a meter representing the Shroud's effectiveness decreases and, upon depletion, creates imperfections that nearby people will notice. The player has a chance to talk their way out of trouble if this occurs, which recharges the Shroud; but you can only do this three times before the guards finally catch on to you, and each subsequent speech check will be harder.
* The Outer Worlds: You can give Felix a job interview before recruiting him as a companion. With high enough Intelligence, you can ask him what the value of Pi is. His answer? "It's delicious!"
* The Outer Zone Manga by Mitsuhara Shin. A Twilight Zone/Outer Limits-esque romp through the occult and supernatural led by your elven-eared hostess, Misery.
* The Outfield acts of the 1980s, with guitarist John Spinks often mentioning in interviews that the band was "totally into not smoking or doing drugs".
* The Outfit is incredulous about how easy it is to break in the mansion of Bronson: a mob boss he has come to kill. He eventually theorizes that Bronson must be so confident in his cover in Buffalo that he doesn't feel the need to have obvious (or efficient) security.
* The Outfit, on the other hand, have their own dilemma — $70,000 is nothing to them, but they can't just give money to everyone who says it's owed.
* The outfits worm by female Beach Volleyball players seem to qualify; as their costumes generally consist of a sports-bra-style top and a bikini bottom. It's the only sport with a

* The Outing put on the bracelet that marks her as the jinn's keeper, her wish is its command. Unfortunately, it is the one that she made during with a fight with her dad.
* The Outlaw (1943) actress Jane Russell also takes an erotic pose in a hayloft.
* The Outlaw and His Wife: A variation as Halla's affection for Kari is established when she gives him a comforter for use in his cot in the servants' quarters.

* The Outlaw and His Wife: "None can escape his fate, even if he were to move more swiftly than the wind." The news that Kari is actually an escaped convict comes soon after.
* The Outlaw. At the time, it was unheard of to use a woman's sexuality as a selling point, so the promotion for the film centered almost entirely on Jane Russell being shown provocatively on posters, with Hughes hoping it would draw moral outrage — and thus mass publicity for the film.
* The outlaw characterization is played up with the Second Doctor, who further implies he's the only survivor of his family. The Doctor's race is finally named for the first time, but their punishment of him complicates the circumstances under which he left his home world in the first place, raising the question of whether he's cast out from his people or if he escaped. In his final story, we meet his people in the form of both the Time Lords in general, as well as a particular one titled (but never named) as "The War Chief", who wears a dark jacket, a
* The Outlaw Demon Wails, Rachel inadvertently lines up for a costume contest and is told she was close, but "Rachel Morgan's hair isn't that frizzy." Despite that, she would probably have won had Trent not also been in line, looking like himself.
* The Outlaw ending features the Roberts siblings arguing over how to handle Calypso — shoot him or arrest him? Finally one of them makes a fatal mistake: "I wish you would just shut up!" Now, yelling that in front of
* The outlaw Grim who kills Hallmund goes on to become a famous adventurer himself: "Grim became a great traveller and there is a long saga about him."
* The Outlaw Josey Wales, a Gatling Gun explodes after its been shot a few times.
* The Outlaw Josey Wales and tries to build a new life. Notably, it was written by an ardent segregationist and Klansman that Eastwood came to hate after he threatened a makeup girl.
* The Outlaw Josey Wales begins with the eponymous hero's house being burned down and his family killed.
* The Outlaw Josey Wales has a scene where a squad of Confederate rebels have surrendered, and a Union officer has them recite an oath renouncing their allegiance to the Confederacy, and also confess to being murderers. This proves to be meaningless, as a Gatling gun hidden in a covered wagon mows down the unarmed rebels on the spot.
* The Outlaw Josey Wales has several, most notably Josey's final confrontation with his nemesis. A runner up would be Chief Dan George's "hard candy" speech.
* The Outlaw Josey Wales: "Redlegs" Terrill, a guerrilla who spends his days butchering people for fun. Despite working for the Union, anything he says endorsing their cause is obviously lip-service so they'll sign his paychecks.
* The Outlaw Josey Wales sends a posse for a "Missouri Boat Ride" by severing a ferry cable with a rifle shot.
* The Outlaw Josey Wales to reduce the need to reload in the heat of battle.
* The Outlaw Josey Wales. Use of this trope is lampshaded when Josey Wales attacks some outlaws, riding at them from the direction of the sun.
* The Outlaw Michael Howe: Howe is beaten to death by the British troops, and his head taken as a trophy.
* "The Outlaw Scrooge McDuck" features an ancestor of Fenton who not only looks identical to him and has the same dorky mannerisms, he even ends up wearing a
* The Outlaws describes a Freikorps unit during the night march in Harburg, a city whose left-wing population is hostile to the soldiers partaking in the Kapp putch. When the soldiers start singing a marching song, they are immediately interrupted by hellish laughter coming from the single lit window in an entire house. The sound is so terrible that it doesn't seem to be a human voice anymore, but the demon of the city. Typically of him, the main hero has to fight down the urge to throw a bunch of explosives into the said window.
* The Outlaws: Following the November revolution, the Communist extremists attempt to overthrow the new Social-Democratic government, which is perceived by them as traitorous to the workers' cause, by starting a new revolution.
* The Outlaws IS Coming!: After they run out of ammo, the gunfight between Annie Oakley and Belle Starr turns into a knockdown, drag-out catfight in the middle of

the street.
* The Outlaws IS Coming! and eventually seize control of the US west of the Mississippi.
* The Outlaws IS Coming! blows up in his face and knocks down all the outlaws. And finally when the Stooges again load far too much flash powder into their camera while attempting to photograph the arms deal with the Indians.
* The Outlaws IS Coming! by hunting the buffalo to extinction to provoke the Indians into war, and then selling them weapons to fight the war.
* The Outlaws IS Coming!, he knowingly takes the cigar out of his mouth and tucks it away in his pocket, only to have the door slam him in the face.
* The Outlaws IS Coming!, Rance Rodan is exterminating the buffalo in order to set the Indians on the warpath, so he can make money selling arms to the Indians.
* The Outlaws IS Coming!. Rodan and Trigger use it to try to kill Ken and the Stooges during the climax.
* The Outlaws IS Coming!, the Stooges—who are in a chuck wagon—are reduced to hurling pies at their pursuers, which they do with devastating accuracy.
* The Outlaws IS Coming! when the Stooges sneak into the hotel to sabotage the guns of the outlaws who are staying in Room 9. A group of showgirls are staying across the hall in Room 6. When the showgirls close their door, the loose room number turns upside down: changing from '6' to '9'. As a result, Moe enters the correct room and sets about sabotaging the outlaws' guns, while Larry and Curly Joe sneak into the showgirls' room, and become increasingly baffled by the very feminine items they find in what they believe to be a room full of hardcases.
* The Outlaws, is the commander of the Bavarian battalion during the Kapp rebellion. He served as a fighter pilot in WW 1 with the ultimate score of 55 enemies shot down (this is the number mentioned in the book; in Real Life Bertholt had only 45 aerial victories).
* The Outlaws shows conservative political groups and certain Freikorps fighters, especially officers, trying to bring the good old German Empire back. The younger generation, including the hero, aims at a nationalist revolution and radical change of Germany, although in a different way than the moderate Left and the Communists.
* The Outlaws: This is thehe best way to describe the attitude of those Freikorps soldiers who took part in WW 1. Some of them believe that the war hasn't finished and it is their duty to continue fighting for Germany. Others were simply molded into Blood Knights by the horrible experience of modern combat.
* The outline of the Lower 48 was completed in 1853 with the Gadsden Purchase, a slice of southern Arizona and New Mexico bought from Mexico to allow for the construction of a transcontinental railroad.
* The Out of Towners, George Kellerman takes a lost little boy behind some bushes to search his pockets for money since he and his wife are stranded in New York with four cents between them and have had to sleep in Central Park. A woman nearby immediately calls for police, shouting "Pervert in the park!" George and his wife manage to outrun the mounted officer who responds.
* The Out-of-Towners, while making little-to-no mention of the actual director, Arthur Hiller.
* The out of universe reason is that Christopher Robin was a real person, and he had never been fond of the way he was portrayed in his father's books, even when he was a child. Up until his death, the real Christopher Robin was very picky about his portrayal in Disney's animated works.
* The Outpost: After agreeing to marry Tobin, Gwynn left him at the altar.
* The Outpost: After getting busted out of prison by Garret, Luna later returns the favor by breaking him out of prison in a later episode.
* The Outpost a long time ago, and she immediately stabs him to death in revenge.
* The Outpost as he bumbles his way through the official execution proclamation.
* The Outpost: As of "A Narrow Escape" Mary turns into this for Kate in regards to her secret identity as Batwoman.
* The Outpost bloodless, there's little blood when someone's wounded, no matter what the injury is (of course, that's standard for prime time TV).
* The outpost city of Venturia essentially fell apart during Queen Clea's reign,

prompting her attack on nearby Aurania. Later exiled from Venturia, she tried to become Queen of
* The Outpost controls the kinj which infected the people who became the United, who thus obey and worship her. The heroes therefore decide to kill her so they'll be free. It works temporarily when she's dead, with the United briefly disabled. However, then she regenerates, with her control restored.
* The Outpost decides to create a promised paradise the Blackblood religion prophesied with her kinj, through brainwashing everyone into being peaceful.
* The Outpost: During her fight with some Prime Order soldiers, Talon knocks one away into a campfire, and he runs off in flames screaming.
* The Outpost: Gwynn can't help but look at Tobin as he's practicing sword-fighting while shirtless, despite her reluctance to marry him.
* The Outpost: Ilyin is capable of speaking, though she mostly chooses not to in the first season.
* The Outpost: In "Kill the Rat, Kill the Kinj" it's learned there's a cult sacrificing captured humans to a wild Lu'quiri. They're caught after kidnapping their latest potential victim.
* The Outpost is set on fire by Talon and Zed (which only slows her down, given her incredible healing ability).
* The Outpost. It doesn't take him even a a day to have spilled it without trying.
* The Outpost: It's revealed the people possessed by the spore kinjs are fueling their reproduction with their own bodies' energy, which is slowly killing them.
* The Outpost: Janzo and Naya are played by South-Asian actors, Tobin's actor is black. Zed's is mixed race. A couple of minor characters are also people of color: Essa, Milus, Sill, and Jabaan, along with a few extras. Later the Blackblood leader Yavalla, along with her daughter Wren, are played by black or mixed-race actresses. The rest of the series' cast is white, though it's more than usual for a fantasy.
* The Outpost: Janzo is quite socially awkward, having a great reluctance to meet people's eyes at first, standing hunched over, and has little knowledge of how to interact with people, let alone romantically approach them. Naya in Season 2 tries to help him get more adept.
* The Outpost killed, Gwynn starts to drink and gamble frequently while not occupied with her duties.
* The Outpost (known as the United) dominated by the original host. This is treated very much like a plague outbreak by the non-United, including referring to the United as "infected" and turning the outpost into a quarantine zone to try and keep the United out.
* The Outpost of someone after they die (even if she doesn't kill them personally).
* The Outpost. Poor Janzo nearly has a full breakdown and Naya isn't much better.
* The Outpost: Rebb explains that the reason she looks just the same despite last being in the normal world over three hundred years ago is because time works differently in the Plane of Ashes. There's no sun or moon, and thus no way to really measure it anyway for them.
* The Outpost spies on Gwynn for the Prime Order because they had threatened to kill her mother and sister, who were living in the Capitol.
* The Outpost: Talon doesn't smile very often, but when she does, it makes her look even more beautiful.
* The Outpost: Talon wants to avenge her family and people by killing those who wiped them out. After learning that Toru Magmoor was a mercenary involved, she kills him, and escapes the punishment due to Gwynn's intervention. Then later she also kills another mercenary who helped, Tiberion Shek. On defeating Dred, who is with the Prime Order which started the genocide, she tries to kill him too before Gwynn stops it.
* The Outpost: The member of the Three known as Two can heal the wounds of others with her kinj, as a side effect of its main ability to raise the dead.
* The Outpost: The mine beneath the Outpost the convicts are sent to is one.
* The Outpost: The Red Kinj gives its host the ability to inflict intense pain on anyone within a close radius.
* The Outpost: This turns out to be the power Talon has (and Blackbloods

generally). She's able to invoke and banish the Lu'quiri (most people call them demons), although it's difficult to master (the latter especially) and they must obey her when she speaks in her language.
* The Outpost: Tobin's family has been feuding with his cousin Milus's over a dispute that their grandfathers had. Although their fathers officially settled it, there's still bad feeling about it.
* The outrageously funny scene where Principal Skinner treats Superintendent Chalmers to dinner in
* The Outrageous World of Alex and Charlie, complains that she only has 532 words and already said it was "very, very, very, very, very, very, very, very good." Alex suggests that since Jacob Two-Two said everything twice, she could write the report twice. Dazelle appears to consider it. At the end of the strip, Alex reveals that she's drawn a picture for her report, since "a picture is worth a thousand words."
* The Outrider knew that Bonner would get the best of his assassin, so why waste petrol?
* The Outrider series by Richard Harding, someone sees a large sign near the ruins of Las Vegas advertising KINO CRAPS SLOTS and assumes it's a public insult directed at a guy named Kino.
* The outros for the main series show fields of grass and mountains, implying that the world might recover one day.
* The outro to the album adds: "You wanted the best? Then go get the
* The outro track does likewise with "Input translation (Output rotation)."
* The Outside: As a child, Yasira Shien threw herself into dusty physics texts and ran around the house in excitement when she solved a problem.
* The Outside, as Satsuki and Ryuuko do seem to be living off of resources their passed on dad left for them and they are implied to be wealthy, especially since the former is agoraphobic and isn't mentioned to be stepping out of the house willingly.
* The Outside, but she was punished harshly throughout her childhood in an attempt to stamp out her heretical tendencies. The treatments succeeded only in turning her into a bitter misanthrope.
* The outside force bit is confirmed in the comics, where it was the Nightmare Forces that possessed Luna.
* The Outside has translucent skin and colorless hair and eyes that tend to make people uncomfortable.
* The Outside, however, the story implies that Ryuuko is 12 and Satsuki is 22 but we don't know exactly how old Shiro and Nui are besides the latter being the youngest of the cast (she's described to be about six).
* The Outside in 3.3 seconds, using every suitable weapon in her arsenal exactly once. None of them have any effect.
* The Outside is shaped like a giant wheel that rotates to create gravity.
* The Outside), let alone, that being confined indoors has its own dangers.
* The Outside, organized in an associative manner that mimics the way thoughts are stored. She finds it hard to get used to, as she keeps getting sidetracked and forgetting the way back.
* The Outside planets, but they let a minority of people stay in the areas of Earth that are still livable.
* The Outside, plays this role with Ryuuko, with her subtle domineering presence and her rules, the one especially strict with Ryuuko going outdoors. However, this seems to be played with, as she might have somewhat of a reason to act the way she does, as with her questionable health, her parents splitting, and her father dying, along with being unequipped to deal with the world, she's alone otherwise, so she overprotects and coddles Ryuuko and tries to raise her in accordance to what she perceives to be best to keep some stability. Of course, like most portrayals of this trope, this doesn't have a good effect on Ryuuko, as, Ryuuko is deprived of a normal upbringing because of it.
* The Outside, priests have circuitry implanted in their brains that allows them to directly communicate with the Gods, while angels have had more than half their neurons burned away and replaced by machinery, giving them a much higher bandwidth

connection.
* The Outsider (1926) is about a being who has been sealed away inside a now-crumbling castle for as long as he can remember. Whoever was keeping him trapped inside it seems to be long-since dead, and he finally rallies the nerve to escape.
* The Outsider (2018) made the caves its home, they were still dangerous. An entire rescue party who had been looking for two children lost in the caves became trapped by a cave-in and slowly perished in the dark.
* The Outsider (2018): the titular Outsider is strongly implied to be this. Mysterious red 'worms' come out of its head after Holly bludgeons him.
* The Outside, Ragyo was this, as her absence conflicted the plot, with Soichiro being dead, Satsuki being deemed an unfit guardian, and no one really knowing what too much about or what happened to her, much less her reasons for leaving. To add to this, she left when Ryuuko was about two, thus, the latter wouldn't remember too much of her at all.
* The Outsider. Dr. Sivana's grand plan, specifically named after Ned Ludd, turns out to be to destroy all technology on Earth with a device that will also wipe the memories of every intelligent being on the planet, leaving them all blank slates for him to mold and rebuild in his own image, and let him shape a new technological foundation.
* The Outsider grants his gifts of magic to people purely because he finds them interesting and wants to see what they'd do with an extra catalyst. He even tells Corvo outright that what he choses to do with his newfound powers is entirely up to him.
* The Outsider: In the episode "Roanoke", Jack gives a guy a wedgie while in a bar fight.
* The Outsiders After Ponyboy yells "YOU DON'T YELL AT HIM!" at Darry for yelling at Soda, Darry inadvertently slaps Pony against the door. Darry looks at his hand, then looks at Ponyboy. All three brothers are shocked. Darry then says, "Ponyboy!" And as Pony is charging out the door, Darry yells in a desperate attempt to get him back inside the house, "Ponyboy, I didn't mean to—" and the youngest one disappears.
* The Outsiders dies, he says that, although he used to talk about killing himself, he now realizes that sixteen isn't old enough to do all the things he wanted to do.
* The Outsiders ends with the protagonist being assigned to write five pages about his own life and asking "Can it be longer?". The final line of the book is Ponyboy writing the first line of the book. One wonders as to how the teacher felt about grading a 180-page novel.
* The Outsiders featuring the Outsiders playing baseball against Kobra and his henchmen.
* The Outsiders from the backstory. They tried to invade this universe from another one some millions of years ago. The Ancients tried every method of communication they could think of, but never got a response. Finally, the Ancients blew up an Outsider scout/colony ship, and that seemed to convince them to back off, but pretty much nothing is known about these beings even now.
* The Outsiders, has a "dark tan" and is too dark-skinned to look okay with blond hair. Some fans of the book consider Johnny to be Native American.
* The Outsiders has Dallas falling off the chair at the drive-in. It was completely accidental and Ponyboy looks briefly at the camera, expecting the director to say "cut", but they kept rolling.
* The Outsiders. He's only considered a "member" of the gang because of his older brothers.
* The Outsider since they held the rights at the time. All that exists of the game now are a few trailers and screenshots.
* The Outsiders indulges in this after being forced to kill Indigo. Despite claiming that alcohol doesn't affect his physiology, he manages to get pretty damn hammered.
* The Outsiders, Johnny cuts and dyes Ponyboy's hair blonde when they go on the run after Bob's death.
* The Outsiders Johnny not to confess to the murder he committed in self defense

because of it.
* The Outsiders — A gang of boys who get into fights for their life with a rival gang of spoiled rich kids on a daily basis, with no parents, no money, and no angsting allowed. When Ponyboy starts complaining once, Two-Bit tells him to shut up because life isn't fair. Subverted later when it becomes clear a lot of them are just coping and they break when it's too much, like Ponyboy's brothers or Dally.
* The Outsiders, Pirra is promised by her mother, the High Priestess of Keftiu, to Telamon, the son of Lykonia's chieftain, as part of a bargain between the High Priestess and Telamon's father. This leads to her escaping after she fails to put an end to it by scarring her face. When she's caught at the end of the book, however, Telamon, disliking Pirra as much as she dislikes him, calls the whole thing off.
* The Outsiders. Ponyboy comments that Dally has no qualms about swearing, smoking, or talking dirty to a greaser girl; the rest of the gang even joins him sometimes. But they all — including Dally — act more polite to "the cousinly type", which includes cousins, sisters, and girls they see often at school.
* The Outsiders, Ponyboy is on trial for running away from home. In a variation, he truly believes himself guilty of killing a Soc, but the Socs testifying say that Johnny did it. He resolves himself to set them straight, but to his surprise, the judge never gives him the chance (read: doesn't ask him about the killing) when questioning him. He gets off with a "Not Guilty" verdict.
* The Outsiders Ponyboy takes part in the huge greaser/Soc fight and then hitchhikes to the hospital to see his dying friend. On the way, the driver comments that Ponyboy is bleeding all over the car's seat. Ponyboy, who hadn't even noticed the injury, looks at the blood and dully apologizes.
* The Outsiders, published multiple anonymous fanfictions based on her own novel.
* The Outsiders sequel TV series died very young: Rodney Harvey (Sodapop) at age 30 from a cocaine and heroine overdose, Harold Pruett (Steve Randle) at age 32 from a drug overdose, and Kim Walker (Cherry Valance) at age 32 from a brain tumor.
* The Outsiders" since Sodapop had never talked about her that way. (It's later confirmed by third brother Darry that Soda couldn't possibly be the father of her baby, but proposed marriage to her anyway.)
* The Outsiders, the bleaching comes out quite well and flatters C Thomas Howell.
* The Outsiders to secretly investigate a metahuman trafficking/WMD scheme backed by Count Vertigo.
* The Outsiders was one of the hundred novels chosen as the greatest ever written by a public poll.
* The Outsiders." We later learn that he proposed to her despite knowing that he wasn't the father, only for her to leave and, eventually, start sending back his letters unopened.
* The Outsiders, when the abandoned church is on fire with Johnny and Dally inside; the church's roof is shown collapsing and then it cuts right to the ambulances rushing Johnny and Dally to the hospital.
* The Outsiders, who dwell in the cold vacuum of deep-space and have a liquid helium based biology. They are described as looking like a cat o'nine tails with a fattened handle (the "head"). They "eat" by placing their head in sunlight and their tails in shadow, which sets up a temperature gradient which generates thermoelectricity. They move around in zero gravity by jetting tiny puffs of gas from their tails. They are very secretive about their reproduction, but it might have something to do with the
* The Outsiders, who fulfill this trope for the previously-mentioned Puppeteers. These extremely advanced aliens sell technology and information but rarely intervene otherwise.
* The Outside, the angels abduct Yasira's girlfriend Tiv and threaten to hurt her even worse.
* The Outside, this is Ryuuko's reaction to finding out Satsuki is sick, as the latter's health took a left turn shortly after she was taken away. Shiro, however, reassures her that her sister being sick isn't anything she caused and that she would have gotten sick anyway.

* The Outside, when she didn't question how her sister got hurt from a household fall, nor did she get her attention for her injured leg.
* The Outside, which in turn led to Satsuki being agoraphobic, overprotective, somewhat neglectful, and borderline psychologically abusive to her little sister Ryuuko, keeping her confined indoors, which in turn made Ryuuko dependent on her, more naive (than a preteen would be), and more vulnerable to dangers, along with more prone to sneak around her rules, which got her hurt and later on removed from Satsuki's care.
* The Outside, with Shiro trying to explain to Ryuuko that Ragyo had miscarriages before having her and Satsuki, as opposed to explaining the act of sex. While she doesn't know what miscarriages are or the full extent of what Shiro's trying to explain, she gets some understanding.
* The Outside World: Any place outside a place of confinement, isolation, or seclusion.
* The Outstretched Shadow (who is sitting there rather calmly and looks more annoyed with you than her) then it is clear that Something Strange Is Going On.
* The outtakes during the credits roll highlight this, with his using fictional Hawaiian islands as a means of seduction (e.g. "Imakindakinky").
* The outtakes for the series contain two separate unused examples which play with an increasingly intense build-up of "are we there yet" and "no":
* The outtakes from that scene are particularly funny, as John Goodman was hamming it up so much that Roseanne repeatedly blew the take by laughing.
* The Ouya gaming system was supposed to usher in an age of open source game gaming. Support for the console among game developers was average at best, and very thin on the major developer level. The console's sales were carried mostly by consumers buying the system to use as an Android media center (that also played games). It's still considered by some to be the best Android TV box on the market.
* The OVA scenario is about as shocking as in the revised version of the game, in which Souji and Asuka were merely stepsiblings, but neither is as shocking as that of the original release of the game, where they actually
* The overabundance of "ray guns" of similarly-cheesy design in scifi is lampshaded on
* The overall battle doctrine of the Dornish people, though not to the extent of the Dothraki (who wear no armor at all). A knight would cook inside of heavy steel plate armor in the hot deserts of Dorne, so Dornish tactics opt for lighter leather or copper armor, and rely more on speed and agility. This is a real-life principle about armies fighting in arid regions: Saladin's armies in the Crusades similarly had lighter armor and similarly had to rely more on speed and agility.

* The overall series title, as noted, is also a Bragging Rights Reward, though at least the winner gets a trophy. The exposure and associations of having won such a competition often bring their own rewards, of course.
* The overarching plot of the Bible (at least according to mainstream Christian interpretations). Adam sinned by deciding humans could decide for themselves what was good or evil, "tainting" all future humans (which, since he and Eve were the First, is ALL humanity) with sin and death, and
* The Overcoat since 1981 using hand-drawn cut-outs and sets along with a traditional animation camera using real film. By the time production stretched into the 2010s, cut-out animation had transitioned into flash and the film cameras needed to make the movie were long obsolete with the film development lab in Moscow he was using having gone under nearly 20 years prior. Unlike Don (see above) however, Yuri refuses to make the transition to computers as he wants to complete the film using the same process he's been using for years. As of 2017, the film is still in production and Yuri Norshteyn is considered the last animator to produce animation using pre-digital methods and technology.

* The Overloaded Ark, local boys whom Durrell was paying for catching animals often brought them badly wounded. It took a lot of lecturing to teach them better, but the case that finally worked was when, right in the middle of such a lecture, a girl brought him three birds in pristine condition. Durrell then proceeded to invoke the trope by explaining this girl is a better hunter than the boys, since these are birds he would buy, and at a very good price. Once they saw how much he paid the girl, wounded catches became a rare exception.
* The Overlord becomes this in Season 3, resurrecting inside Cyrus Borg's computer systems shortly after the latter built his company over the site of the final battle. He stops being this in the second half of the season after absorbing enough golden power from Lloyd to regain a physical form.

* The Overture Duel wielding wakizashi blades has become fashionable with younger nobles. Richard Olsen only fights in this manner and does not carry the traditional katana of his forefathers.
* The Overture is an extremely conservative society run by women. Childbirth is considered the most important function for all people and as Men cannot bear children, they are viewed as "incomplete". While men still labor, they are forbidden from holding or spending money so all funds either go to the man's wife or mother. Men are also required to keep their eyes hidden while in public and must wear special blindfolds while traveling.

* The Owl House. Adding some fuel to the fire, the episode commentary for "The Land Before Swine" provides a description of Stan's ex-wife "Marilyn", claiming she has pale skin and a weirdly sharp tooth, and that "Marilyn" wasn't her real name. This leads many to believe that "Marilyn" is an alias for Eda, which was confirmed in the Owl House episode "Yesterday's Lie", which has an autographed picture of Eda using "Marylin" as an alias while in the human realm, giving the ship even more steam.
* The Owl House a montage to Gus and Willow, which inexplicably includes a scene of them having tea in animal costumes.
* The Owl House) and while there's nothing proving he's making it up, there's no way to prove he's telling the truth either.

* The Owl House, as well as pictures of Willow that show she has two dads. Other countries that are less tolerant of LGBTQ content bump up the age rating, such as Indonesia giving it a 17+ rating, which is the equivalent of TV-MA.
* The Owl House banned for alleged Satanism and LGBT themes, it only made people more curious to see what all the fuss is about. The fanbase exploded in growth after the Enchanting Grom Fright episode, where Luz's friend Amity is shown to have a crush on her, and the show remains one of Disney's biggest hits.
* The Owl House before coming to the Boiling Isles and was equally delighted to find out witches and other magical creatures are real.)
* The Owl House (bisexual female main character, lesbian supporting character; subject matter includes queer female romance subplot, LGBT youth)
* The Owl House boasts several moments of animation bump done by in-house animators, usually for major defining action and character scenes: most notably Luz and Amity's battle dance in "Enchanting Grom Fright" and Eda and Lilith's duel in "Agony of a Witch".
* The Owl House Boscha picks up the slack and proves to be an even more shallow bully than Amity was initially presented as. Amity lampshades this dynamic when Boscha starts expressing jealousy over Willow's rising popularity.
* The Owl House bumped into a "Nitwit", or when she beats up Hooty for getting into her personal space.
* The Owl House by anything related to humans, including mundane things like high-fives or braces.
* The Owl House calls the other members “you witches”, which is what they all literally are, but the way she says it makes it seem like a stand-in for “you bitches”.
* The Owl House can also use magic the same way witches do, and the difference between the two isn't especially emphasized.
* The Owl House", Eda asks Luz how she would respond to a fireball coming at her. Luz responds by pulling up her hood and curling into a ball. Eda realizes she probably should have taught Luz more spells.

* The Owl House: Eda does this to her goody two-shoes sister Lilith in "Covention".
* The Owl House, Emperor Belos is revealed to have been created from a piece of Nyarlathotep that escaped being imprisoned in glass and burrowed itself into the ground for thousands of years before developing a more tangible form.
* The Owl House ends in disaster. Yet, time and again, she goes back to looking for a shortcut instead of realizing that, for her to really do magic, she needs to learn the old-fashioned way by just studying and slowly growing her talents. On the other hand, she and Eda are making up her education regiment as they go along since she lacks a magic bile sac and Eda can't see the glyphs that Luz can. It's natural that Luz keeps trying to see if the next adventure has the answer.
* The Owl House ends on a lighter version of this. Luz wanders into and gets stuck in the Boiling Islands after going through a witch's portal, and is forced to help the witch Eda out before being allowed to use her portal once again. But after helping Eda and gaining access to the portal, Luz asks if she can stay for at least the remainder of the summer as Eda's apprentice instead of going to summer camp, which Eda is fine with.
* The Owl House episode "Agony of a Witch", King bakes a hollow cake to jump out of as a surprise for Luz. He can barely breathe by the time he finally does it because Luz arrives a lot later than he had planned.
* The Owl House episode "Eclipse Lake" shows that Amity has a cat palisman named Ghost, who just happens to look like Dana Terrace's cat of the same name.
* The Owl House fandom latched onto the song "Little Miss Perfect" as an unofficial anthem for Amity's feelings for Luz, the song's composer Joriah Kwame wrote a sequel song called "Ordinary" that was specifically supposed to be from Luz's perspective.
* The Owl House for bullying their little sister, since she gets to spend the whole night with her crush.
* The Owl House) for the express purpose of looking more imposing and matching the raven theme of the Emperor's Coven.
* The Owl House gives us a platonic example with Eda, who doesn't seem very fond of former mean-girl Amity. That said, she's nothing but supportive to her apprentice/foster daughter's crush on the girl and is happy to encourage her if that's what she wants.
* The Owl House gives us Luz and Amity. Luz being an extremely perky human who wants to make friends with almost everybody and has no natural magical power, while Amity is the extremely gifted but snarky and taciturn ace student. Amity is crushing on Luz before season 1 is even over, and Luz is likewise crushing by the 3rd episode of season 2.
* The Owl House. Gus tries to give him advice, but King thinks he's just going to suggest something like "Imagine the audience in their underwear", which leaves Gus weirded out.
* The Owl House has Amity Blight, whose official character bio describes her as "tries to be prickly, but is a softy at heart".
* The Owl House has its fair share of horrific monsters and villains like Emperor Belos. But by far the most realistic horrors come from Odalia and Alador Blight. Amity's parents are among the highest ranked in the Abomination Coven, hold enough power to even expel students at their leisure and barely care for their own daughter as a person (at least in Odalia's case, with Alador being more pragmatic). What makes it worse? Their abuse doesn't simply stop once Amity is out of their sight. Amity's necklace is actually a charm that allows Odalia to speak to her through it, emotionally and verbally abusing her any time she pleases. This is none too dissimilar to parents who stalk their children through technology to control them.
* The Owl House has Luz and King deliberately break a rule (stepping on grass where they're not supposed to) so they can get sent to the Conformatorium and rescue Eda before she's petrified.
* The Owl House has stored a large number of things in her hair, from photographs to lunchboxes. Her mother is the same way, despite having much shorter hair.
* The Owl House has this as the plot of several episodes, with one of these

episodes having a bet being the driving force of both the A- and B- plots. In addition, only one of the bets throughout all these episodes actually end in an undisputed victory, with all the others having the winner unable to exploit the terms of the bet or having no winner at all.
* The Owl House has two magic systems that are actually the same, only practiced in different ways.
* The Owl House). He's also madly in love with Eda, the one criminal who's always managed to escape his grasp.
* The Owl House: Hexside School houses one of these in its plant magic homeroom/greenhouse, one that's apparently ticklish as shown when Willow quickly rescues a fellow student it tried to snatch up. Willow later learns to create or summon these plants for combat purposes.
* The Owl House. However, since Luz here is a kickboxer and knows more spells, there is more assurance in her own ability to fight than in canon.
* The Owl House: In "Escaping Expulsion", Amity learns to resist the abusive demands of her mother Odalia and finally call her out for it. Initiated by breaking the necklace they used to telepathically communicate, as a symbol she's no longer under her control.
* The Owl House: In "Something Ventured, Someone Framed", Eda, who up to this point, had been adamant against allowing her human apprentice and witch-in-training, Luz, to enroll at the local magic school, Hexside, changes her mind and approaches the school's Principal Hieronymus Bump about the matter, initially expecting him to say no.
* The Owl House: In the boiling isles, most adult witches have a "palisman", an animal familiar that sits inanimate atop their staff most of the time. They are carved from wood gathered from magical trees.
* The Owl House: In the episode "Convention", Luz challenges Amity to a witch duel, and it quickly escalates when the siblings Eda and Lilith, their respective mentors, find out about it and get involved. Both mentors help their students by cheating during the duel and both of them are found out by the end. However, despite this turning into a mutual loss for them, the bragging rights go solely to Eda, because she is shameless about her cheating while Lilith is a witch of high prestige, and thus by cheating in a duel, regardless of her reasons, she still was brought down to Eda's level.
* The Owl House: In the very first episode, Eda gets her head cut off by Warden Wrath. Luz is horrified, but thankfully Eda is still alive (though she does complain that losing her head is rather uncomfortable and inconvenient).
* The Owl House involves a human girl accidentally transported to a similar magical land inhabited by witches and demons.
* The Owl House is an immensely skilled student of the illusion track. While he usually uses it for cheap parlor tricks, at his full power he becomes outright terrifying. In the climax of "Through the Looking Glass Ruins", he lures a pair of henchmen away with simple tricks based on what he knows of them, before taking down the episode's villain by making the statues of the area slowly turn towards her while weeping blood, make it seem like her magic doesn't work before turning her hands to stone, and finally make her confront a petrified and blood-weeping version of herself. She runs away screaming.
* The Owl House is drawn to Luz's constant kindness, even in moments where she doesn't need to be.
* The Owl House, it compresses the victim into a still-living cube Piniet will keep in his briefcase.
* The Owl House, it turns out the Good Witch Azura book series from Earth is also popular in the Boiling Isles, despite the fact the isles do have witches and Azura is a caricature of real witches. Eda is disgusted by her. Luz and Amity are not. It's suggested that this is a result of Eda bringing the books over and selling them off.
* The Owl House looking type, though it's only used for shock and doesn't actually read as death.
* The Owl House, Luz and King get themselves purposefully arrested for stepping on

"Don't step on the grass" grass.
* The Owl House: Luz does one at the beginning of "Witches Before Wizards" following her dream of the events in the previous episode.
* The Owl House, Luz finds a door to the Demon Realm not far from her home in Connecticut.
* The Owl House: Luz is a normal human being from Earth that has no magic abilities, though that doesn't stop her from making herself Eda's new apprentice.
* The Owl House: Luz Noceda is a mortal who ends up in a magical world where she studies as a witch apprentice. The problem is, she has to hide her identity as a mortal to the other residents due to their hostility toward them.
* The Owl House often does this when King does or says something she thinks is cute.
* The Owl House. Once she realizes that Luz isn't actually so bad or when she's reading to younger kids, she gives a real smile for the first time. Luz even lampshades it when she sees it.
* The Owl House: One of the covens on the Boiling Isles is Construction magic, which as seen in "Through the Looking Glass Ruins" includes the manipulation of earth and stone.
* The Owl House: One of the first creatures that Luz meets upon entering the Boiling Isles is an adorable fairy with a high-pitched voice, big sharp teeth, and a taste for human skin.
* The Owl House, quite a few locations in the Boiling Isles are named after the body parts they're located at (Bonesborough, the Knee, Lake Lacuna).
* The Owl House season 1 features three duels. The first one is between Luz and Amity, but really just consists of the former running away from the latter’s abominations while Eda’s traps trigger. Then there are the two duels between the Clawthorne sisters, which have stunning animation and incredibly creative usage of magic on both sides.
* The Owl House's method of "Slap them together and see what happens."
* The Owl House", something that Luz discovers and learns how to harness.
* The Owl House speaks fluent Spanish and will often slip into it when she gets emotional or is texting with her mother.
* The Owl House starts picking on Luz, Willow and Gus in class after Luz tries to stand up to her.
* The Owl House: Students at Hexside wear uniforms with the unitards colored differently depending on what type of magic they're associated with:
* The Owl House takes on their form and rips up the note she had written to ask them out to the school dance.
* The Owl House team and she’s just as willing to bully people physically or humiliate them in athletic contests as she is to insult and harass them.
* The Owl House. The dangerous part is that he is so deep into his own wild theories that he refuses to listen to anything else, and nearly disects an entirely benevolent, sapient and capable-of-speech demon under the assumption that it's malevolent.
* The Owl House, the fearsome keeper of the Conformatorium who tries to go out with Eda.
* The Owl House: The first two episodes of Season 2 were screened at The Paley Center on June 5; a week before the official Season 2 premiere on television. They begged fans not to leak or spoil anything, but the fans didn't listen and posted spoilers anyways.
* The Owl House. The introduction of a Raine Whispers, a nonbinary love interest for Eda, was similarly well received.
* The Owl House: The moment Luz first lays her eyes on King, she goes completely nuts, hugs him tightly and talks to him as if he was the world's most adorable pet... much to his horror.
* The Owl House", the Owl Beast is susceptible to blinding flashes of light, which Eda and King exploit to subdue it and turn Eda back to her witch form.
* The Owl House: The students at Hexside all wear the same uniform and shoes but with different colored unitards depending on what coven track they're assigned to.

A few exceptions would be Luz, who keeps her regular shoes instead of the traditional black boots, and Viney, Jerbo and Barcus wear variations on their uniform as well, the first with a ragged uniform and mid-length sleeves, the second with splits in his tunic, and the third wearing just the top due to being a dog.
* The Owl House the woman's mother dies just before she was about to reveal something important, and the suitors cry diamonds and eggyolks respectively in sympathy.
* The Owl House Those who refuse to join one are considered criminals. The Emperor's Coven, however, suffers no such limitation, as they enforce said law.
* The Owl House to dye her hair indigo in order to make herself appear more intimidating when she first joined the Emperor's Coven. Her real hair color is orange.
* The Owl House was already popular, but "Enchanting Grom Fright" caused the fandom to explode in size due to its LGBT themes.
* The Owl House was renewed for a third season before the second season had started airing, but despite the show getting high praise from both critics and the audience, it was confirmed that it would be its final season and only consist of three 44-minute specials rather than a full ~20 episode season like the first two.
* The Owl House. When Amity goes into battle against the Abomi-Ton 2.0, Alador Blight looks very concerned for his daughter but shifts to an intrigued and delighted smile when she and Luz prove capable of handling it.
* The Owl House: When Eda asks Luz where magic comes from, she suggests, "From the heart?" Eda says it's true — magic is literally a small sack portion bound to a witch's heart.
* The Owl House: Whenever Hooty wails on Lilith or Emperor's Coven members for trying to assault the Owl House, Eda picks up binoculars to watch.
* The Owl House when she finds out what her mentor has done, terrified that she may have ruined her chances for joining the Emperor's Coven.
* The Owl House which she learns from observing the natural world, i.e. snowflakes are in the shape of the ice glyph. Her powers are light, ice, plant and fire.
* The Owl House while rummaging through a sack of human world artifacts, Eda discards a smartphone, a diamond ring, and the Holy Grail before settling on the "real" treasure, a pair of novelty spring-eye glasses.
* The Owl House while they were fighting for their lives in a mini circus.
* The Owl House who can barely form coherent sentences around her. Best exemplified in the episode "Wing It Like Witches".
* The Owl House who is in love with the main character Luz Noceda, who was confirmed by the shows creator to be bisexual. While not the main focus, the relationship and the possible blooming romance between the two is one of the major subplots in the show.
* The Owl House. "Wild mages" like Eda are outlaws and ruthlessly hunted down.
* The Owl House, witches cast spells by tracing a circle of light into the air. Luz, a human, figures out she can do the same thing by physically drawing the circle and the spell's corresponding rune onto a physical object, though the object is destroyed in the process. In the past, witches used to do the same thing Luz does, but they seem to have streamlined the process to the point where they don't need the rune, or at least puts it in subconsciously so fast that it's not noticeable to the naked eye.
* The Owl House wouldn't arrive in Italy until February of 2021, a year After its US premiere.
* The Owl-Knowing One). However, they CAN learn a lot of good Psychic-type moves, may have as an ability either Insomnia (prevents sleep) or Keen Eye (prevents lowering of accuracy), and have two immunities. Ghost-types beware!

* The Oz Kids, which starred Dorothy's children Dot and Neddy, the Tin Boy, Scarecrow Jr., Jack Pumpkinhead Jr., the Cowardly Lion's cubs Boris and Bela, the Wizard's son Frank, and Glinda's daughter Andrea.
* The Ozone Layer. According to the Chief, it has caused a worldwide disaster (of course the detectives are on the advice of the Chief wearing SPF 9 Zillion Sunblock so that they can track down and arrest Robocrook before the environment gets any worse).
* The ozone layer developing holes that let through unfiltered sunlight hot enough to melt the Golden Gate Bridge.
* The Ozpin Files: Ozpin forgets Professor Port's name and calls him Mr. Moustache for a while, and when he later finds out his name, he thinks it's 'Porter'.
* The P1000 Ratte and the P1500 monster previously mentioned under Land Battleship also would have had the ability to drive underwater up to a certain depth. This actually made sense for two reasons: both vehicles where designed partially using U-boat parts so adding more submarine features wasn't a terrific leap in cost; and

vehicles so heavy couldn't use conventional bridges as they would crush them.

* The P-61 Black Widow, a purpose-designed night fighter equipped with a turret, required a GIB in the Radar Operator role and had a third crewman manning the turret. Some versions deleted the turret for better flight performance, but still needed the GIB to use the radar.
* The Pa'anuri war ships are the size of planets; one is explicitly described as the size of Jupiter. They exert enough gravity to affect the orbits of natural planets.
* The pace of technological and cultural change has accelerated tremendously since the industrial revolution kicked off. As a result, to a person born in the 80s and growing up in the 90s and early 00s, the world will be a very different place. This has resulted in people developing nostalgia for things that are merely 10- to 20-years-old. This was not as noticeable in the early 20th century, but people born around the beginning of 21st century and beyond will probably see their world change radically during their lifetimes, for better and/or worse.

* The Pacific, a company-wide version of "Happy Birthday" turns into "how fucked are you now?"
* The Pacific, and even getting into a fight with another patron who makes a tactless comment.
* The Pacific, a Seabee on Peleliu says he is looking for a Japanese sword to take home. The Marines, who have just been through some very nasty fighting, give him a very dirty look.
* The Pacific Companion of sorts to Band of Brothers, depicts a number of amphibious landings in the Pacific Theatre of World War II from the viewpoint of three U.S. Marines, including both opposed (Iwo Jima, Peleliu) and unopposed (Guadalcanal, Okinawa) landing operations.
* The Pacific CO steals a box Leckie looted from a Japanese camp on New Gloucester.
* The Pacific Fleet in Kamchatka are the last remnant of the Soviet Navy. They were forced to turn to piracy just to survive in one of the harshest peninsulas in the world with no supplies. They get an
* The Pacific goes from receiving the Medal of Honor to being put in charge of training Marines at Camp Pendleton.
* The Pacific has the first half of the series full of this trope. Guadalcanal and Cape Gloucester, as well as the beaches surrounding Peleliu's airfield, involve Marines struggling between the Japanese, shortage of supplies, disease, and the islands themselves.
* The Pacific is able to quote poetry from memory, has read about the Turkish sack of Smyrna, and actually writes a poem himself in the aftermath of the Battle of Guadalcanal.
* The Pacific just like his dad feared he would become before he signed up, he also finds normal living to be trivial. When an unemployment officer asks him what his marketable skills are, he can't think of anything other than "killing japs".
* The Pacific Ocean. "Pacific" means "Peaceful". Now consider how many naval battles took place in the ocean during
* The Pacific Robert Leckie is seen lighting a candle in a church. Several episodes (and battles) later, he and God are "not on speaking terms".
* The Pacific, Sgt. John Basilone fits this trope, but not as much as badass Sgt. Elmo 'Gunny' Haney.
* The Pacific: Sid Phillips and Eugene Sledge are from Mobile, Alabama; Merriel "Snafu" Shelton is from Louisiana.
* The Pacific. Snafu's usually deadpan calm whether he's just shooting the breeze or prying gold teeth out of a dead Japanese soldier's mouth. When Sledge admits he's scared and Captain Ack Ack states "Everyone is; any man who says he's not is

either lying or dead", a quick shot of Snafu makes you wonder what that makes him.
* The Pacific territories – Guam, American Samoa, and the Mariana Islands – are generally excluded from everything. So are the Atlantic territories – Puerto Rico and the Virgin Islands.
* The Pacific: The Japanese send a wave of panicking Okinawan civilians through the Marines' lines. One of them, a woman with a baby, is panicking and on the verge of tears, pleading for someone to take her baby from her. The Marines, none of whom understand her language, are confused...until she opens up her coat and reveals she's been wired with explosives. Woman and baby go up a second later.
* The Pacific: The Marines on Guadalcanal aren't pleased when the Army arrives—especially because they're better supplied. Almost immediately, when the Army hears air raid sirens and takes cover (not knowing that the air raids never take place on their side of the island), the marines happily raid their supplies for newer rifles, better food, and some luxuries like fancy shoes, cigars, and liquor. Later episodes also feature some Marines/Seabees rivalry, although that has more to do with the Seabees being noncombatants than anything else.
* The Pacific: This show is worse. Made brutally clear by Euguene Sledge's father, who tries one last attempt to persuade his son from enlisting:
* The Pacific, using a mix of CGI and four specially built replicas to represent the Japanese Type 95 Ha Go tank, real working versions of which are in short supply. One of the replicas is now on display at the National Museum of Singapore.
* The Pacific. Victor Davis Hanson noted that he even had a name that sounded like a Marine's name.
* the Pacific War statehood in 1959 and the rise of cheap air travel gave it a second wind, embedding Hawaii in American pop culture as a pleasure resort (before that, it was a distant colonial outpost known for plantations, Pearl Harbor, and little else), a status that managed to outlast the Polynesian craze. The trope of the former GI running a tiki stand in paradise can still be found in some works.
* The Pacific was filmed in various locations Victoria. It doubles for everything from Guadalcanal and Pelieliu to Mobile, Alabama, and California. It's also averted when the Marines actually go to Melbourne on Liberty.
* The Pacifier - A slice of bologna covered with mustard falls on Agent Wolf's shirt. He even replies, "this is my favorite shirt," invoking the Stock Phrase part of the trope.
* The Pacifier takes the (far-too-small for him) bike belonging to Seth, in order to follow the boy and find out why he'd dyed his hair blond, skipped wrestling practices, and had a Nazi armband in his locker.
* The Pacifier, when Vin Diesel's SEAL-turned-babysitter character gears up with baby bottles, diapers, and the like for a walk in the park.
* The Pacifistas, robot weapons built in the likeliness of Warlord Bartholomew Kuma, have laser beams as their main weapons in lieu of the real deal's Paw-Paw Fruit power. These beams were implemented thanks to Dr. Vegapunk's research on the Glint-Glint Fruit.
* The Pacifista Units became this after the Timeskip. Before, the one that the Straw Hats defeated was a legitimate boss, but then they were hit with
* The pacifist Engineers, who even tried to make peace from day one of the Human-Covenant war.
* The Pacifist Faction., or both. They often overlap with the Diplomat or Research Factions, depending on what alternative win conditions the game has to offer.
* The Package. Sean and Donnie try to play a small prank on Jeremy while he is pissing, but since Jeremy is also playing with his knife and high, things go wrong and he cuts off his own dick.
* The Pack does this to Lexington and Goliath in an early episode of
* The Packers also sealed their Super Bowl victory against the Pittsburgh Steelers in similar fashion. With the Packers up 31-25, on a Pittsburgh fourth down with 49 seconds to play, Tramon Williams jumped in front of a pass intended for Mike Wallace and deflected it out of Wallace's reach. This one hit the ground rather than being a pick, but because it was fourth down, the incompletion still resulted in a turnover.

* The Packers carrying Vince Lombardi off the field after winning Super Bowl II, his final game as the team's head coach.
* "The Packet" - Biggles has retrieved a parcel of stolen German plans and is on the way home, but six enemy fighters bar his path. Suddenly they scatter as if terrified of him, and he wonders what the hell is going on until he looks around and behind him and sees four of his own squadron formating on his wingtips and behind him.
* The pack is shown hunting a bull elk. This is (possible but) unlikely because wolves, like most predators, usually target the sick, the young, the weak and anything else less hard to catch than a healthy adult animal.
* The Pack. Jack and Jonas Kenway, Clair and Lance Blackthorn, Diantha Delacour, and Cynthia Malfoy. Between the six they, at one point, were (in all but name) the rulers of three different regions, racked up a boatload of League Championships, and were/are the masters of the Dragon Lords, the Veela, and the Speakers.
* The Packrat, but still, spotting the many unmentioned but accurately drawn synthesizers and other electronic devices is a nice bonus.
* The Packrat so far, and that was the time travel story from January 2011 to February 2012.
* The Pack, the main character makes a new friend and goes out to lunch with him and her other friend. He orders a hamburger and when asked how he would like it, he replies "raw". There is some arguing with the waitress about health codes before the issue is settled.
* The Pact: A ghostly hand can only be seen in photos (printed copies, or through the viewfinder of a digital camera). Subverted when the viewfinder shows a gaunt male figure walking through the living room. We're led to believe this means the figure is a ghost. It's actually a trick of perspective: we would have been able to see the figure even without the camera, because he was an alive human.
* The Pact, Annie and Nicole are haunted by memories of childhood time spent in the Torture Closet.
* The Pact constant bullying of his staff, sexual harassment of Tish, and rampant drug use at work parties.
* The Pact: Light fixtures and flashlights flicker and go out. The medium Stevie says that something is "taking the light."
* The Pact: The fridge mysteriously opens in the night, and some food is scattered on the floor: a jar of pickles and two sticks of butter. Is this a clue that the ghost is a pregnant woman? Well, yes. But she's not the one who made the mess; the flesh-and-blood killer was just hungry.
* The Pacu, a large pirahna relative, has eerily human-like teeth which are mainly used for crushing nuts. Same goes for the sheepshead,
* The Padawan and the Smuggler; Phineas's friends at Tosche Station don't believe his stories about his girlfriend and ask if she's from Kan'daraan.

* The page, considered the filthiest poem in any language, is hilarious because of this - especially the section patiently deconstructing the sexual puns in the poem.
* The page for the Unabomber used to describe him as "an American mathematician, social critic, and murderer who carried out a campaign of mail bombings."
* The page header used to be a quote, from Frasier's reaction to his brother mentioning he's only packing sunscreen for his honeymoon.
* The page image also refers to a policy of gunboat diplomacy by proxy. The United States didn't want European warships intruding into the American sphere of influence; instead, the Europeans would ask the US to send a gunboat to apply pressure on their behalf.
* The page image comes from a New York Post article and shows a man about to die after being pushed into the path of an oncoming Q train at the 49th Street station in midtown. Needless to say, this caused a whole shitstorm of controversy.
* The page image comes from "Back Out There". Lincoln's friends are wearing rented tuxedos, which get pooped on by a flock of birds. At the end of the episode, the boys are forced by Rusty's dad to clean the tuxedos so they can be returned to the store.

* The page image comes from "Feat of Clay". Matt Hagen's desperate attempt to steal Roland Daggett's Renuyu (a salve that temporarily turns a person's skin into something malleable like clay) after his supply was cut ends poorly when Daggett catches him in the act. His goons attempt to
* The page image comes from the episode "Pickles". Bubble Bass demands a $2 refund on the Krabby Patty he ordered due to it lacking pickles, citing the microscopic disclaimer on the overhead menu that Mr. Krabs was obviously hoping no one would notice; he offers every excuse he can think of to avoid paying to no avail. He then angrily tells SpongeBob he's taking the two dollars out of his paycheck.
* The page image comes from the finale "Goodbyeee." After Blackadder's latest plan to get away from the front (by feigning insanity) fails, he decides to call in a favor from Field Marshal Haig, the British Commander-in-Chief, for saving his life years ago. Haig is shown at his headquarters to be playing with toy soldiers and discarding them with a dust pan, demonstrating zero concern for the soldiers under his command.

* The page image is from one of Venture's more unusual experiments to resurrect the dead, Venturestein from the episode "¡Viva los Muertos!". Rusty was apparently more interested in doing it just to see if he could, as he put it "laugh in God's face," but soon found the only application he could have for this particular form of resurrection was selling his zombies to the military for willing suicide bombers.
* The page image is from the episode "Hall Monitor", in which SpongeBob and Patrick try to enforce the law, but end up breaking through open windows and causing car crashes. The public end up starting a manhunt for the "maniac" the caused all this trouble, and the rest of the episode derives a lot of its humour from the fact that SpongeBob and Patrick can't figure it out despite how increasingly obvious it is.

* The page image, it should be noted, is a humorous subversion. They're just pointing out that it seats five passengers over a Lamborghini's one in a very tongue-in-cheek way.
* The page image. Norway and the Faroe Islands already doubt the sanity of this idea, and Iceland's maniacal laughter doesn't help his case one bit.
* The page image provider is the episode "Homer's Triple Bypass", which centers around Homer's poor health habits that make him a prime candidate for a heart attack. He suffers his dramatic (and comedic) heart attack in Mr. Burns' office; we see an amplification of his heart beating wildly out of control, and then shattering into pieces. Later, Homer suffers another heart attack when he learns how much the first one is going to cost him, which raises the cost of the operation

further.

* The Pagemaster - A prominent example. A wave of paint covers the library, turning the main character and the library into living illustrations.
* The Pagemaster" at the beginning. It was also produced by Kirschner.
* The Pagemaster, but it's just a normal dog (albeit big and snappy) in this film.
* The Pagemaster has to go through Dr. Jekyll's 'spooky' mansion (complete with dark clouds, lightning, bats, a full moon, and a kind of gravestone in the front saying that it belongs to him).
* The Pagemaster, in one of his challenges Richard Tyler has to go into the mansion of Dr. Jekyll (and soon afterward, Mr. Hyde). When Richard enters, the door closes and locks itself behind him.
* The Pagemaster is all about a real boy who got seemingly trapped in an animated storybook world where he not only experiences common fantasy elements of childrens' stories, but has GENRES follow him around in the embodiment of living books.
* The Pagemaster) looks like a pirate, complete with eyepatch. There's nothing wrong with the eye under it—so when he needs to get a better look at something he just lifts it up.
* The Pagemaster, our heroes find a cave, which is full of stalagmites and stalactites. When Adventure accidentally breaks one, it's revealed that the "cave" is actually the mouth of a dragon.
* The Pagemaster were in theaters four years before the movie came out. This is because the film took three years to create. Shame that it ultimately wound up being a bomb financially, critically and among audiences.
* The Pagemaster: When Richard tries to climb down the side of the house, part of the ledge he's stood on breaks away - resulting in him falling before grabbing hold of a beam, followed by a plummet perspective as he looks down to see his friends are below him.
* The "Page of Smiles" (featuring a single image that's "too awful for usage and too good for the page of shame".)
* The page on Icelandic Magical Staves, starts off with a rune to attract a girl, then suddenly: "Necropants, a pair of pants made from the skin of a dead man that are capable of producing endless gold", squeezed between the rune for "To Win in Court" and "To Induce Fear". It links to sites with more about Icelandic Magical Staves, which are not much better. For the curious: you get a man (has to be a man) to agree to let you dig him up and skin him from the waist down after he dies. Should you manage to outlive him, you do that, draw the rune on a gold piece, and put it in the

* The page picture is not of a an actual bomb, but of a novelty alarm clock shaped like one. You can interrupt it from ringing during the 10-second delay by cutting the right wire, which are easily replaceable.
* The page quote accurately sums up military movements, especially in third and fourth generation warfare. Easy paths, such as staying on a road or crossing an open field, are deadly. Even movement within the immediate area can be like this. It can be very tedious to approach an objective properly and stick to good movement, then clear the objective properly, but failing to do so can get soldiers killed.
* The page quote by Slim is demonstrated by one of his subordinates, 'Punch' Cowan

of 17th Division. At the end of their retreat from Burma, the ragged survivors were assigned to camp in a ravine (in the rainy season). Cowan furiously seized some buildings in a nearby town to bivouac his sick and injured troops, risking censure to do so.

* The page quote comes from a mystery where one kid with a cast on his left arm is accused of stealing some keys, and in fact they're found in his pants pocket in his locker. However, the "proof" that he didn't do it is found in that the keys are in his left pocket, and, according to Encyclopedia, it's
* The page quote comes from an episode where Bobby gets interested in Christianity due to a group of devout skateboarders. Hank spends most of the episode looking kind of bad (since he started off wanting Bobby to care more about their faith, but hates the direction he's taking), but in the end he explains that he just doesn't want Bobby to treat something that important as a mere fad, like his long-forgotten Troll Dolls and Tamagochi.
* The page quote comes from Charles Maurice de Talleyrand-Perigord, a French diplomat who embodied this trope a couple of hundred years ago. * The painter Cavaradossi, fiancé of the title character from the opera
* The painting ended up being very well received by critics, and he went on to paint several more before revealing that the entire thing was a hoax.
* the painting of Great Grandma Harriet smiles despite having been shown frowning, so it's unknown what really went on. Lucy also sometimes appears unexpectedly, but it's unknown if she can teleport or just walks quietly.
* The painting of Walker isn't quite so prophetic as it sounds: the kids probably painted it while Max was unconscious. (Otherwise, how would they have known about the monkey?)
* The painting's owner claimed to be getting dressed to investigate the disturbance, with his right leg in his pants and his left leg out. (
* The Painting the Painter fell in love with a woman, who seemed to be his muse; he painted a reclining nude portrait of her. The titular Painting is filled with unfinished portions, and characters, and it is insinuated that he stopped because of her until the end of the film.
* The painting was done by Matthew Defoe, one of the first deaths linked with the

manor's past. Its origin is explored further in Trilby's Notes.
* the pair actually did grow to like each other, Derek gets annoyed that she's flirting with castle guards (jealousy, perhaps?) and Brom outright tells teenage Derek that he thinks he likes her really. Of course, the film doesn't really explain this clearly so the aforementioned scene of them falling deeply in love upon sight comes across as a bit jarring.
* The paired swords Gan Jiang and Mo Ye from the Wu and Yue Spring and Autumn Annals.
* The pairing of "Dirty" Dick Slater and Dark Journey in Mid-South Wrestling drew a lot of heat based on this, in addition to the heat they drew simply by being effective
* The pairing of Maze and Amenadiel literally embody this, Maze being Lucifer's demon bartender and Amenadiel being Lucifer's angelic brother.
* The pair of produce vendors tried to pare down their options, but to no avail: They still had a pear and an orange they had to sell.
* The pairs of Lissa/Maribelle and Sumia/Cordelia have been tight since they were young. This actually leads to Maribelle and Cordelia getting into a heated argument during the Summer Scramble DLC over which woman has the better BFF.
* The Pajama Game and it's never treated as anything but a light-hearted B-plot.
* The Pajama Game, Babe, in denial that she's attracted to Sid, sings "I'm Not At All In Love," a claim which is met with smirking derision from the girls:
* The Pajama Game has the "Jealousy Ballet," with Hines imagining what life married to Gladys would be like.
* The Pajama Game pajamas, and are revealed to be handcuffed to each other.
* The Pajama Game suddenly turning into a wild dance to the tune of "Hernando's Hideaway." (The original stage version, by contrast, ends with the full cast singing the title song.)
* The Pajama Game, where Hines appears in front of the curtain to proclaim the play's serious themes:
* The Pajama Game where the secretary paints increasingly explicit scenes implying that the supervisor's wife is cheating on him, but after each, telling him that despite all indications to the contrary, he should trust her.
* The Pajama Party Murders, Eddie Cosmo has difficulty with metaphors, is obsessed with numbers, acts inappropriately, and is easy to enrage over small things.
* The Pajama Party Murders has Myrtle's recounting of the dream which inspired her to become a Canadian missionary.
* The Pajama Party Murders, Lola's disguise as Myrtle is revealed when someone points out that, after being called Uncle Cosmo's non-swearing, non-drinking missionary, she swore and took a swig of beer. From there, Pettibone runs down a list of clues that she was an impostor.
* The Pajama Party Murders, Pettibone is listening to the first tape of Bartholomew Cosmo's instructions:
* The Pajama Party Murders, Pettibone's deduction of the murderer relies on contradictions with old secondhand information and things that only he has observed. Of course, they then admit to the crime and pull a gun.
* The Pajanimals always wear their iconic pajamas, save for being shown naked only at the top during the "Bathtime Boogie" song number. Even in "A Super Sweet Night," in which they're dressed up in Halloween costumes, the costumes are just accessories such as a firefighter's hat and a superhero mask. As follows:
* The Pajanimals, Cowbella realizes that she's sad that Sweetpea Sue is sad that she wouldn't share her teacup with her. She says that she's not going to share the teacup with her... she's going to give it to her, because they're family and she cares about how she feels. Sweetpea Sue, however, decides that they should just share it, so that they can play together.
* The Pajanimals has Edwin, who is a magician, but is always pretending to be some type of job or role each time the Pajanimals visit him, often royal stuff such as a king or a knight.
* The Pajanimals helps children with bedtime routines in its original shorts. The full series still has some of this, but is focused generally on other anxieties

children might experience, such as speaking in front of class, or taking an extended trip away from home.
* The Pajanimals, the beaver Hank welcomes the Pajanimals to the Land of Build It by saying "Welcome to the Land of... Duck!" which excites Squacky because, of course, he is a duck. However, he means for them to duck, as there's a big log that's being used to construct a lodge swinging their way, courtesy of the beaver Frank. Fortunately, they duck in time.
* The Pajanimals, the Pajanimals can get to whatever magical lands they want or wherever, such as clouds that are close enough for them to talk to the moon, in just as long as it takes to "bundle up, huggle up, snuggle up and go!"
* The Pajanimals, the Pajanimals don't appear to have teeth except when they brush them.
* The Pajanimals, this is done with the bathroom sink after an argument over borrowed blankets and pillows.
* The Pajanimals was designed as 11-minute stories. However, even when the show is presented in a half-hour block, the ending theme with "La La Lullaby" is still presented at the end of the first short, then the opening credits are used leading into the second short.
* The Pajanimals when Mr. Happy Birthday offers him a jazz record as a present for the Pajanimals mom's birthday.
* The PaK 36 was a potent anti-tank gun when it was first introduced. However, by 1940, it was dismissed as "the Wehrmacht's door-knocker", as it had become virtually unable to pierce the armor of any Allied tank. The weapon was rescued and given a new lease of life by the advent of tungsten-cored ammunition, allowing it to penetrate thicker armor than the standard round could manage. When it became apparent that even the improved ammunition would no longer work, the gun was further adapted to fire a shaped charge grenade from the muzzle, which had the ability to pierce virtually any Allied tank armor up until the end of the war. Though it was supplanted in its role as an infantry anti-tank weapon by larger, more powerful guns, the PaK 36's lighter weight, low production costs, and ease of handling had some distinct advantages that allowed it to remain in production until 1942, with some light infantry and paratrooper units using it until the end of the war.
* The Pakahk from Cree mythology, similar to the Gashadokuro, are the animate bones of people who died from starvation. They have a chilling cackle, but sometimes they will help people with healing or hunting.
* The Pak, a hyperintelligent race noted for its ability to construct things like Ringworld, never invented perfume. This has
* The Pak also did this with when they colonized Earth and the Ringworld itself. In addition to that ultra-long journey (half a million years), the Pak have ships that
* The Pakistani Al-Khalid tank is roughly equivalent to the Russian T-80 (same size, same gun, similar armor and mobility), and backs that up with
* The Pakleds are bright enough to steal whatever technology they can get their hands on (as well as abduct Engineer Geordi LaForge), but express themselves in
* The Pakleds are like this. Their species are underdeveloped intellectually and are before the point that they could have actually developed warp capabilities on their own (in fact the ones seen on the show don't seem like they could handle fire or the wheel). They became a spacefaring race by stealing from other, more advanced species because they would rather have such things now than wait to develop it themselves. When the Enterprise finds a Pakled ship, it's really just a hodge-podge of parts from various different starships.
* The pak'ma'ra: a communitarian society with no state (the dream of the anarchists).
* The Pak, who by their basic nature and superior intelligence, tend to develop and manipulate new technologies as easily as other beings breathe.
* The Palace of Love, with the villain cloning a girl who spurned his lechery years ago and arranging for the clones to receive various upbringings which (according to his thinking) should make at least one of them susceptible to him. Not played

completely straight in that he doesn't do the raising himself, though he does direct the manner of it. It still proves his undoing, though, because the hero protagonist has learned of the plan and figures (correctly, as it turns out) that at least one of them has to know which of several potential suspects is the man she was raised to love.
* The Palace of Revenge, features first cousins Imis and Philax in love. Subverted, however, in that the two do not get married at the end.
* The Palace. They're practicing cricket. George pitches the ball really hard, hitting the door behind Richard. "Sorry. Sorry — slipped from my hand." The second time, he hits Richard in the arm before revealing his annoyance in words.
* The Palace Tiger is a set of metal claws attached to rings which slip over the fingers; the name is metaphorical.
* The Palace to "a silly joke at King James's expense" that "incur[red] the wrath of the monarch." (Coincidentally, David's nephew, Prince George, remarks that he saw him once and that he was "like a ghost.")
* The Paladin Armor, sister program to the Beserker Suits, was capable of healing the wearer from nearly any wound but often incurred undesirable mutations.
* The Paladin class has a lot of "Hammer of" attacks, a lot of which have graphics of hammers.
* The Paladin class is more similar to the classical meaning of the term than normally seen. These paladins have nothing to do with holy warriors and cannot use any sort of magic beyond that afforded by
* The Paladin class itself flirts with being an example of this even
* The Paladin-exclusive Noble Sacrifice triggers when an enemy attacks and summons a 2/1 minion which redirects the attack to itself. As the name implies,
* The Paladins, also made available by building a Temple to Dauros, are rather obviously based on Joan of Arc.
* The Paladin, since paladins from 4th Edition and beyond can be any one of the nine alignments (though they still tend to lean towards "good").
* The Paladin, their immunity to disease is revoked with all the other bonuses.
* The Paladin; the story quickly spreads and takes on a life of its own.
* The Paladin typically fills the role of the Soldier to a "tee," both in form and in theory, being restricted to
* The Paladin: When the villain says "Bring me the head of the king", the paladin brings him the head... along with the rest of the king, and his entire army.
* The Paladin which promptly stole his soul in exchange for a hollow victory, after which Arthas returns to his kingdom, murders his father, and brings his kingdom to ruin, raising everyone he can find as undead.
* The Palatine Hill in Rome, Italy, where the Imperial Palace resided, and which was built into a hive city over the course of 600 years.
* The Palaververse: Agent Alloy, an Asinal Republic spy embedded in Princess Celestia's entourage, keeps his wits just long enough in the immediate aftermath of Nightmare Moon's return to send a message back to his superiors about what just happened as well as idly noticing the Mane Six rush into the library as in canon.
* The Palaververse: A literal example: when Discord brings the parliament of the multi-species nation of Gazellen to the cage where he's keeping the other world leaders, he swaps around the various members' body parts with results like a hornless antelope with the legs of a warthog and the wings of a griffon or a giraffe finding her head and neck swaying atop the body of a diamond jackal.
* The Palaververse: Among the things half-seen in outer space by telescopes peering past the shell of stars at the edge of Theia's geocentric system are colossal beasts shaped like world-sized whales or turtles, "swimming through the void as if it was a sea".
* The Palaververse breathe clouds of mind-clouding fumes and poison gas.
* The Palaververse... from deep space that utterly destroyed their homeland, sinking it and causing perpetual magical storms over its former site, although numerous creatures and artifacts of Antlertean origin are still around.
* The Palaververse from the depths of space, destroying their island and their race in a single night. They’re also responsible, directly or indirectly, for

creating a great deal of the horrors that have plagued the world over the ages, including Tirek, Discord, the Sirens, Ahuizotl, and the horror in the Pachidermian south.
* The Palaververse: Gigantic wind scorpions are one of the many species of monster native to Saddle Arabia, and have the added bonus of being able to turn into wind to elude both prey and pursuit.
* The Palaververse". In Sweetie Belle's somewhat melodramatic narration, in its disorganized mass of Daring Do books, stationery, and paperwork cobwebs are compressed into diamond, ecosystems form and flourish, and Order goes to die, and even Discord takes notes from its chaos. When Sweetie attempts to extract a box from its depths and causes the whole thing to come crashing down, the collapse exposes colonies of spiders to light and fresh air they had only known from myth, alongside a severely annoyed book-wyrm.
* The Palaververse is included in the changelings' exposition blog post showing the geography of the AU, including two main continents of Ungula (where Equestria and most of the plot-central nations are) and Dactylia, the island-continents of Ceratos and Saddle Arabia and the archipelagos of the Burning Mountains and the Asinial Main.
* The Palaververse: Most, although not all, of the intelligent races have a subspecies capable of harnessing magic in a more direct, spellcasting fashion than the rest of their kin — the ponies have unicorns, the caprids ibexes, the sheep black sheep, the cattle longhorns, the corvids ravens and the elephants forest elephants. There are also subspecies that can use less "flashy" forms of magic: takin goats can use runic magic and enchant objects, while rooks posses oracular abilities.
* The Palaververse: Parodied with the mammoth tribes, where it's custom for brides to kidnap their husbands. This has over time developed into a very formalized process, where after proper approval and vetting by the respective clan chieftains, as well as consulting with the groom-to-be and his family, the mammoth cow in question beans the subject of her affections upside the head with a suitably decorated sap, throws him over her withers and rushes back home. This is usually followed by an equally scripted counter-raid and is generally treated in the same manner as more sedate wedding customs are among other societies. This all leads to some... confusion... when a mammoth character tries to give relationship advice to an ibex doe based on her own romantic experiences.
* The Palaververse: Rocs, enormous birds made of stone. Some tribes of Diamond Jackals hollow them out into living, flying fortresses.
* The Palaververse that is Saddle Arabia is that seemingly every creature there is predatory or parasitic, and typically highly aggressive in the bargain.
* The Palaververse: The Corvids (giant sapient crows, ravens, magpies, and similar corvid birds) eat their dead, something they see as very honorable and respectful treatment of the deceased and as good use of resources (their homeland has persistent food shortage issues). The other (mostly herbivorous) species don’t exactly share this view.
* The Palaververse: The dragons used to rule most of the world in the past, but their power began to slip as civilization grew, and was lost in a series of disastrous wars against the Diamond Dogs, the Capric Empire and Equestria, forcing most of them out of Ungula and to the archipelago of the Burning Mountains. They also have their own unique but poorly understood form of magic, hoard treasure as both a way to store food and as a mating display of sorts, and though mostly loners they have a loose society, ruled by the Fire Queen through Dragon Lords acting as intermediaries and viceroys.
* The Palaververse, the Equestria-Capra war ended with the mutual destruction of the two nations with an exchange of "megaspells" that included storms of fire, ice, razor wind, choking darkness, and crystals.
* The Palaververse Thorax ducks out of the pitched battle he finds himself in by disguising himself as a member of the Royal Guard. When he's confronted by the CMC, Spike and Sailears and asked his name, he panics and names himself after the first thing he sees, thus introducing himself as Sir Wall of the Royal Guard. Given the

nature of pony names in canon, this still provides him with a perfectly suitable and unremarkable alias.
* The Palaververse" when a wandering pine that Rainbow Dash and Sweetie Belle had been pursuing for decoratory purposes is backed against a wall with no escape from a tinsel-covered fate and turns to face its lot, standing tall and dignified in its defeat.
* The Palcomix "Spoils of War" comics (essentially putting the cast of
* The Pale Criminal: Pretty much out of nowhere, Hildegarde tells Bernie to "Hurt me...use me" when they're about to have sex. When he refuses, she spits in his face, and they break up.
* The Palegis forest has the Tayledras invoking this for many reasons. Including the fact it is actually a very dangerous place to be.
* The Pale Horse two people have Eureka moments in short succession. Several people have died, supposedly by magic. Mystery writer Ariadne Oliver suddenly realizes that all the deaths have one thing in common: all the victims were losing their hair when they died. She knows this is a vital clue but she has no medical training, so she doesn't know what it means. She calls Mark Easterbrook, a doctor who has been investigating the deaths, to tell him what she has realized, and he has his own Eureka moment, realizing that all the deaths were due to Thallium poisoning.
* The Pale King. At 11 years old, he participates in the Meals on Wheels charity, volunteers as a crosswalk guard and hall monitor, donates his ice cream money to UNICEF, has been to origami camp twice, writes letters to publishers about textbook errors, fields all calls and inquiries with regards to his mother's hospitalization, attempts to reorganize his homeroom's seating structure for maximum efficiency, and writes individualized letters of apologies to his bullies. He also intentionally gets a few Bs on his report card solely to ensure he never gets too prideful of being an overachiever.
* The Pale King between Fat Marcus the Moneylender and Diablo the Left-Handed Surrealist.
* The Pale King by Meredith Rand, who is well aware of this trope and annoyed by anyone who assumes she is one.
* The Pale King, Chris Fogle's parents try to give this impression, but both of them are deeply affected by it.
* The Pale King claims that all of it is true, yet he points out the disclaimer on the copyright page states that the characters and events are fictitious. He spends a good portion of the chapter noting the inherent paradox.
* The Pale King devoted to three IRS employees that are stuck in an elevator. Their resulting debates include the future of American society, presidential politics, democracy, tax law, psychology, film, and existential dread.
* The Pale King ends with the unnamed girl eating breakfast at a diner in Plepler, MO, as her mother has sex in the truck outside.
* The Pale King has at least twenty distinct voices and differently-colored contact lenses.
* The Pale King have unusual nicknames, like ‘Irrelevant’ Chris Fogle, Ms. 'Iranian Crisis' Neti-Neti, David 'The Young Man Carbuncular' Wallace, and Diablo the Left-Handed Surrealist.
* The Pale King incredulously wonders how long they had to practice it.
* The Pale King is a conversation between an IRS auditor and a businessman trying to falsify his tax report. He is given two options: jail, or filing a new report with the correct information and paying the late fees.
* The Pale King is attempting to achieve global thought control via radio waves. She covers her house with electrified hubcaps, which jams her neighbors' signals. She ends up getting cited for diverting her household's amperage, so she salvages a generator that runs on kerosene.
* The Pale King It comes back in a big way in one of the last chapters.
* The Pale King, The Author's Foreword includes a lengthy description of all the legal issues that went along with the creation of the book. Everything involving David Foster Wallace's entry into the IRS, with the sole exception of Leonard

Stecyk.
* The Pale King. The former is extremely chatty and distracting, and the latter is silent but companionable.
* The Pale King, The IRS seal depicts the mythical hero Bellerophon slaying the Chimera, which represents those who are stuck doing the difficult and unpopular work.
* The Pale King voice perfectly, much to the delight of Nugent's bored coworkers.
* The Pale uses this throughout, each page a scrolling horizontal canvas with the 'panels' blending into each other.
* The Paley Center Salutes This Is Us air during the first commercial break. Perhaps not coincidentally, Dan Fogelman was in charge of both productions.
* The Palm Beach Story by opening the film with a wedding. Reconstructed by showing how the marriage goes awry but the couple finding back together by the end.
* The Palm Beach Story Gerry asks Tom's help to get out of a dress, and sexy times ensue.
* The Palm Beach Story performs the serenade "Goodnight Sweetheart" with complete orchestra beneath Gerry's balcony, though producing the opposite of the desired effect.
* , the palmer taunts the woman with his knowledge of where she buried the babies she has borne and murdered.
* The Palmolive dish soap ads regularly feature a pair of hands. They were originally actual people's hands with animated eyes and hair, but are now animated completely.
* The Palm Wine Drinkard features a number of (physically undescribed) personifications: Death, Drum, Song, Dance, Laughter, Earth, Sky.
* The Panama and Suez canals. At 77 and 164 kilometers long, respectively, each has effectively made a continent disappear as far as ships are concerned, making worldwide shipping considerably faster.
* The Pancor Jackhammer automatic shotgun. While a favorite of movies and video games due to its futuristic appearance and amazing visual design, the real Jackhammer was notoriously over-engineered. Reloading the gun required the user to lock the barrel forward, eject the drum magazine, and either put in a new drum or remove the spent shells from the old one and put new ones in like a revolver. Either way made the weapon more time-consuming and problematic to reload than a regular automatic shotgun while also removing the ability to chamber specific shells as needed, one of the big reasons shotguns remain popular. Its unique shape also made it incompatible with the wide variety of attachments available for more mundane shotguns, like flashlights, which made it less versatile. It was also prone to breaking down - Of the three prototypes made, two of them were irreparably damaged in testing.
* The Pandaren are the only race so far that seem to lack villainous members. However,
* The pandaren have a pseudo-Chinese culture. They were originally styled as samurai, but this offended Chinese players since pandas are their national animal (for that matter, China is the only place in the world where they're found in the wild, and they do NOT get along with Japan with historical grievances). With the namesake continent of Pandaria becoming available in
* The Pandarens have riding cranes. One feels sorry for the cranes though, as the Pandaren are quite rotund.
* The pandemic lead to the creation of a meme referencing this trope. "Have you ever noticed that every disaster movie starts with a scientist being ignored?"
* The "Pandemic" two-parter is full of this. The prophecy - that Craig would be the one to avert the Pandemic - is brought about by a combination of the
* The Pandora Directive has one which gets you $100 the day after you send it in. You really need the money, too.
* The Pandora Directive, or it's a completely different agency. The confusion comes on the part of the players.
* the Pandoraverse, when Bruce and the draconequus Pandora were dating, the idea of Pandora having teeth down there (or tentacles, or her vagina shooting squid ink or

laser beams or eating ponies) was something Bruce genuinely worried about for a while, to Pandora's own amusement.
* "The Pandorica Opens": A battered Cyberman guarding the Underhenge, which had its head cut off by locals, manages to retrieve it while attacking the Doctor and Amy.
* "The Pandorica Opens", building the Pandorica worked out alright for the Alliance in the end.
* "The Pandorica Opens", but actually turns out to be a trap for the Doctor.
* The Pandorica Opens" demonstrates Cybermen can survive decapitation, then reattach their heads.
* "The Pandorica Opens" has a title sequence-adjacent shot of the TARDIS, piloted by River, flying through the Vortex while being struck by lightning.
* The Pandorica Opens. Later, he gets put inside of the titular box and screams in terror that the TARDIS will explode. He is absolutely terrified, and it falls on deaf ears.
* "The Pandorica Opens" properly enters the episode killing the Cyberman that had been chasing Amy by pinning it to a door with his sword.
* "The Pandorica Opens": River Song acquires a vortex manipulator this way. More specifically, she gets it from Dorium Maldovar, whose drink she has spiked with micro-explosives. She trades it for one of her earrings, which contains the detonator. Needless to say, Dorium is all too happy to accept.
* The Pandorica Opens simply waits relatively patiently for the Doctor's mind and memory to catch up with his mouth.
* The Pandorica Opens. So long, that he walks out of the room carrying two Cyber guns before the penny drops — as do the guns, offscreen.
* "The Pandorica Opens" takes this to the absolute extreme. Auton Rory kills Amy, River Song gets trapped in the TARDIS as it explodes, and every single person on every single planet is wiped out of existence as the entire universe collapses.
* The Pandorica Opens that he's missing something obvious and that he can't quite get what it is. The fact that he's talking to someone who was erased from existence a few episodes ago and has seemingly come back to life as a Roman only hits him a few minutes later.
* "The Pandorica Opens", the Doctor is trapped in the ultimate prison — the titular Pandorica. It takes Rory (with, admittedly, some help from a future Doctor) to break him out.
* The Pandorica Opens" The following dialogue occurs between the Doctor and Amy Pond:
* "The Pandorica Opens": The severed Cyberman head that attacks Amy has a bunch of cables sticking out of the bottom that it uses for attack and entanglement.
* "The Pandorica Opens": The TARDIS itself became one inadvertently when it exploded and set off a chain reaction that detonated every star in the universe, although this was undone by Big Bang II.
* "The Pandorica Opens". They don't even know they're not human until they're activated, being so perfect a disguise that River's hallucinogenic lipstick even works on them.
* "The Pandorica Opens", when the tranquilizer dart Amy gets shot with takes so long to down her that she has plenty of time to hide from the Cyberman responsible, which then proceeds to get killed before she finally loses consciousness.
* "The Pandorica Opens": While breaking into the Royal Collection, River Song wears a tight black outfit that shows off her cleavage.
* "The Pandorica Opens" while explaining what the Cybermen do to people. "It's just like being an organ donor, except you're alive and sort of...screaming."
* "The Paneless Window Washer" features several scenes where characters stand on windows from a downward-facing angle. According to the commentary, it required twice as much animation because the animators made a scene from a normal angle and then staged the scene
* The panel is even in different dimensions from the rest of the quest to really emphasize it.
* The panels show the two naked, in a sexual pose, and Carina apparently having an orgasm. This is pretty strongly in violation of the Sex and Costume sections of the

1974 revision.
* The Panic limits for the areas were more abundant: Angel Grove High and Ernie's Juice Bar had 6, the Industrial District 7 and Angel Grove Park 8. In the final game, Angel Grove High and Ernie's Juice Bar have a Panic limit of 5 and the Industrial District and Angel Grove Park have 6.

* The Panther, however, had huge flaws, like its secondary gear shift and complicated intersected wheels for example. It was poorly constructed and held together for a whopping 150km, before needing a maintenance overhaul. The turret had a weak motorisation that left the crew with hand cranking it while tilted, and the intersected wheels made changing the inner row a pain, since you had to remove 3 wheels to change one. The motor and tracks also didn't hold together that much, needing to be swapped every 1000 and 500km respectively. That said, the good did outweigh the bad by a huge degree, and in combat the design's merits were proved beyond a doubt. Despite this, the
* The panther is basically just a black cheetah reskin with some minor stat differences. It's portrayed as equally fast as the cheetah with a comparable amount of stamina. Obviously, real panthers (which are black jaguars or leopards) are nowhere near as fast as a cheetah.
* The "Panther's Leap" also counts as a subversion of sorts, since the entire affair was a complete farce. She was ostensibly dispatched to Agadir to protect German citizens in the port, but this plan had one glaring flaw: there were no German citizens in Agadir. Realising this, the German government sent a telegram to the only German citizen in the area - a perfectly happy, unendangered man called Wilburg - and ordered him to travel 75 miles south to Agadir to be "rescued". The
* The Pantomime Animal, usually a four-legged creature such as a horse or a cow played by two actors in an animal costume — a full-scale sub-trope with its own entry.
* The Pantomime Theatre in the Copenhagen amusement park Tivoli frequently features new and old plays with this. Here the loving couple however usually is the trickster Harlequin and the beautiful Colombina. The latter is the daughter of the old rich man Kassander, who won't accept their love, but of course they always get each other in the end. The favourite of the audience is however Kassander's always unlucky and not too bright servant Pierrot. In fact Pierrot has become quite a symbol in Tivoli - and in three other Danish amusement parks which also have a Pierrot each entertaining the children.
* The Panzerkampfwagen IV medium tank was developed by Germany in the late 1930s, alongside the Panzer III medium. The Panzer III was to be the main anti-armor weapon of the panzer divisions, while the Mark IV would be a support tank: it carried mostly high explosive and smoke rounds, and its short 7.5 cm KwK 37 L/24 gun was mainly to be used against enemy anti-tank guns, fortifications, and the like. However, after the Germans ran into the T-34 and KV-1 during 1941's Operation Barbarosa they needed to get a more powerful gun into the field, and recognized that the Panzer IV had more room to be up-gunned because of its larger turret ring. From the Ausf.F2 onwards, the Panzer IV had the long 7.5 KwK 40 with much-improved anti-armor performance. The chassis was reliable and versatile, spawning variants such as self-propelled artillery, anti-aircraft vehicles, and armored recovery vehicles. It was the most-produced German tank and the second most-produced German fully-tracked AFV, as well as the only tank Germany had at the start of the war which it was still producing by the end of it.
* The Panzer V Panther and T-34 both had serious problems, and were more likely to catch fire when hit than Shermans. In the Panther's case, this was a result of the

engine compartment being completely watertight (to better ford rivers), causing overheating problems, and uninsulated fuel lines, which would rupture under a variety of circumstances. Neither problem was properly addressed. In the T-34's case, it was insufficient armour on earlier models, but was lessened by the use of less flamable diesel. Later models and the T-34-85 had more armour and were less susceptible to engine fires.
* The Papal States for over 1000 years. They only ceased to exist in 1870, when they were conquered by the newly formed Kingdom of Italy.
* The paparazzi were involved in the deaths of Princess Diana and her then-boyfriend Dodi Al-Fayed, being a factor in the occurrence of the fatal crash — according to the official inquest, anyway.
* The Paper Bag Princess, Elizabeth is able to follow the dragon that trashed her castle because of the trail of burnt forests and horses' bones he leaves behind him.
* The Paper Bag Princess has the eponymous heroine not getting the prince because she looks too unkempt. She therefore decides that the prince isn't good for her if he won't accept the way she looks, and calls him a bum. The last line of it is "They didn't get married after all." In the short animated adaption of this story, she hooks up with the dragon instead. Dead serious.
* The Paper Chase, and allowed much greater character development, while also exploring some complex legal topics.
* The Paper Chase in 1983, with much of the cast returning, to run for three more seasons.
* The Paper Chase used scissors as the percussion in "We Know Where You Sleep".
* The Paper. Henry's wife Martha is the more conventional example of this trope.
* The Paper is set in New York, and could only ever be set in New York. Check the quotes page.
* The Paper), led with a story about one of their columnist's cars being towed.
* The Paper Magician book, the protagonist, Ceony, learns how to Fold a paper fan that magically produces gusts of wind. In her mentor's words, "Made well, it can give gusts that would embarrass a thunderstorm." She puts it to good use later.
* The Paper Magician by Excisioners, magicians who channel their magic through flesh and blood. Practitioners will mutilate and dissect innocent victims to increase their own power, and human hearts are particularly valuable for their spells.
* The Paper Magician. Excisioners can use their power over flesh to animate corpses or parts of corpses, human or animal.
* The Paper Magician fatal, though it's made clear he has only a day or so to live unless his heart is returned.
* The Paper Magician: The page covers the whole series, but as of 2017-09-03 there are no book-specific tropes for any book after the first, while the series-overall section contains 8 tropes. So the first book has more than 10 tropes, but the others don't.
* The Paper Mario stage takes place in a pop-up book, with each page offering a different arena. The three locations are a windmill, a ship, and a floating castle.
* The Paper. Of course, the enemy he demonizes is the parking commissioner.
* The Paper Tigers, identifies as Chinese when it suits him (despite being the only Caucasian character), gives overly elaborate opening stances and takes obscene pleasure in humiliating the Tigers. After Hing is nearly killed by the Fourth Disciple and Danny and Jim decide to confront him, Carter drops the smugness.
* The Paper Tigers, it's revealed that Hing was wearing a wig and is actually completely bald when Carter snags it off of him in their fight.
* The Paper to try to get a photo or video of them during the perp walk. As a result of the scrum nobody can get a good shot.
* The parable of the pharisee and the tax collector in Luke 18 is a straight example of this trope. The pharisee loudly praises himself for not being like that filthy tax collector over there while the tax collector doesn't even dare to lift his eyes to heaven and simply prays, "God, have mercy on me, a sinner."
* The Parable of the Shower" by Leah Bobet is written in the old style second-

person singular familiar—that is, "thou." The effect is used to evoke a King James Bible-style of speaking.
* The Parachute Club's LGBT anthem "Rise Up!", used for McCain pizza dough.
* The Parachute Regiment is also somewhat notorious; according to the memoirs of Major Peter 'Billy' Radcliffe, bare-knuckle fights between squads of aspiring Paras were actively encouraged by their drill instructors at least as late as the 1960s, thought 'Bloody Sunday' may have resulted in a change of philosophy. The very nature of parachute training accounts for a fair number of additional casualties.
* The Parachute regiment, meanwhile, is invitation only. Paras wear maroon berets with highly distinctive badges worn conspicuously far to the sides of their faces. It is somewhat less glamorous, however, thanks to a nasty reputation earned by the 1972 Bloody Sunday massacre, to the point that they're sometimes considered the
* The Paradise Club had a rock star's manager trying to cash in on the insurance policy on said rock star's fingers. Averted, but not before we see Bruce Dickinson (for it is he) with his right hand wedged in a fire door and a thug readying to shoulder-charge it.
* The Paradise of Death. The Brigadier, who's present at the time, just remarks "Told you so."
* The Paradise Ponies were from the Age of Myths, but continued to act as protectors during the Age of Wonders that followed them, due to being immortal thanks to the Rainbow of Light.
* The Paradise Snare he remembers having to clean up after someone cycled the airlock to kill themselves, and it was apparently quite messy. So the trope is played straight there.
* The Paradise Syndrome alien race. The natives live in the fashion of their forefathers.
* The Paradox Brothers seem to make up the rules of the labyrinth duel as they go, to the point where Joey accuses them of this trope. Even if they are cheating or lying about the rules, the rules they designed for the labyrinth duel are so convoluted that it's nearly impossible to tell if they're lying about things like all flying monsters being banned from the maze.
* The Paradox Core is a giant PACT space station that can destroy entire systems by collapsing a star into an artificial black hole.
* The Paradoxes of Mr Pond occasionally references Chesterton's role in documenting Mr Pond's investigations, including one point in "The Crime of Captain Gahagan" in which he is unable to even summarise a conversation between Mr Pond and Joan Varney, because Mr Pond always refused to discuss it with anyone else.
* The Paradoxes of Mr. Pond: One character comments on the decreasing significance of makeup, but still thinks it shows something of character.
* The Parafaith War, so it can't support its own food production yet. When he visits home, on the capital world of his society, he has plenty of real food available. The problems in Utopia are a bit deeper than what's in the fridge.
* The Paragon Always Rebels: An inspirational and heroic character defects, resulting in many others following their example.
* The Paragon Always Rebels: An inspirational and heroic character turns evil, resulting in many others following their example.
* The Paragon Always Rebels: The "big figure" of the good guys suddenly decides to rebel for some reason.
* The Paragon protagonist achieves a state of "orange enlightenment", making him constantly aware of all his desires and how they relate to each other. Interestingly enough, it doesn't make him harsh or sociopathic in the usual sense, because he has deliberately cultivated a desire to protect and help the people close to him; however, it makes his behaviour seem odd and sometimes inhuman or extreme to others. Such as when his girlfriend feels guilty over her past career as an assassin, and he tries to help by resurrecting her victims with Lazarus Pits. Or when he plans and executes the genocide of an
* The Paragon: Protagonists in Enlightenment stories will usually be this.
* The Paragon visits Chantinelle the succubus, and bribes her with the opportunity to become a love elemental, thus increasing her power substantially, to keep her

out of the way of his plans.
* The Parallax View: Bill McKinney's assassin character has no dialogue in any of his scenes.
* The Parallax View does this foolishly in the finale, picking up the dropped sniper rifle that was just used to murder another candidate. This sets him up as the fall guy. Of course, if he hadn't then the real killers probably would have just pressed it into his hands anyway after he'd been shot.
* The Parallax View he's recruited as an assassin himself. From there, things only get murkier and more frightening...
* The Parallax View: Parallax has a remarkable ability to makes its targets die "natural"-seeming deaths, whether staging murders as car accidents or a pill that can induce embolisms.
* The Paralympic sport of wheelchair rugby is also known as murderball and yes, it's for a very good reason. Let's just say that the special wheelchairs have to be made of titanium. (A dark joke from some players is that if the worst injuries that could happen to you
* The Paralympics to the Olympic Games, and to a lesser extent, the Winter Olympics to the Summer Olympics.
* The paralysis issue is strictly in the stage play, not the film, where no explicit explanation is given, other than Irwin clearly being uncomfortable with pursuing a relationship with Dakin.
* The paramedics and police repeatedly get attacked by the zombies every time they arrived at the mortuary.
* The Paramount Modern Madcap "Disguise The Limit" has an elephant who collides with Mike the Masquerader, a master-of-disguise crook who has just robbed a bank. The police keep the elephant under the witness protection program until Mike is captured and can be identified since the mythos is that elephants never forget. Mike uses various disguises to dispatch of the elephant, all unsuccessful. When Mike shows himself, the elephant doesn't recognize him. Mike intones, "Don't you remember me bumping into you when I robbed that bank?", which the elephant captured on a tape recorder he keeps because he actually has a lousy memory.

* The Parandrus had the legs of an ibex, the head and antlers of a stag, the body of a bear, and the remarkable ability to blend in with its surroundings like an octopus. Theorized to be a messed-up description of a reindeer or a moose.
* The paranoia came back with a vengeance on January 13th, 2018, when a U.S. nuclear alarm system test was accidentally replaced with a full alert. A few minutes after eight in the morning, the entire state of Hawaii received a smartphone notification (along with interrupted TV and radio) that told them to seek shelter for a nuclear attack, which thanks to the suddenness of the alert, the belligerence of the president at the time, and the stirrings of relatively nearby North Korea led to a panic. Though the alarm system wasn't tied to actual nuclear alarm procedures, meaning any government official or those who'd noticed the lack of sirens or other alerts didn't buy it, the event still resulted in at least one death, a heart attack, and a host of anecdotes about someone here or there doing things they only would've done thinking they were about to die for at least 15 minutes.

* The Parasol Protectorate tolerate being even in the same room as another preternatural. Alexia assumes that she will either miscarry or go insane from prolonged physical contact with her preternatural fetus.
* The Parasol Protectorate: Vampires consider "fang-lisping" to be the height of vulgarity, and are swift to train new larvae out of it as before letting them out in public. At the beginning of the series, the fact that the mysterious vampire that attacks Alexia was lisping is one of the signs that there was something abnormal about him.

* The Parent Trap (1961): Evil All Along, as well as a rare female example.
* The Parent Trap (1961) — the dog just knows she isn't who she's claiming to be.) In the latter film, the dog also has an evil-detecting reaction to the twins' father's new girlfriend.
* The Parent Trap (1961), the father's new fiancée plots to have his daughter sent away to boarding school after they're married.
* The Parent Trap (1961). Twin girls were separated as little kids, accidentally meet at summer camp and switch their respective parent with the plan to reunite the family.
* The Parent Trap (1998), but one can't help but wonder if the line "marriage isn't just about sex, is it?" and the scene where one of the twins asks for a sip of wine were inserted simply to secure a PG rating.

* The Parent Trap (1998) since she's already stated that she can't swim.
* The Parent Trap, also named Vicki implying the remake could actually be a sequel.
* The Parent Trap: Annie and Hallie play a game of poker where the loser has to jump in the summer camp's lake completely naked. Annie loses and while she's in the water Hallie and her friends steal her clothes.
* The Parent Trap between the twins involves doing this with chocolate syrup.
* The Parent Trap has one of the twins played by Lindsey Lohan set up a bucket booby trap as part of a prank war with the other. An adult falls victim to it, and they both get in trouble.
* The Parent Trap in terms of Nick and Elizabeth's relationships with Chessy and Martin respectively, Chessy being Nick's housekeeper while Martin is Elizabeth's butler. While they are employees on paper, Nick and Hallie clearly see Chessy as a close friend to the point that Chessy gets very emotional when she learns that Hallie has switched places with her twin sister Annie, and when Elizabeth is having a stressed rant about seeing Nick again, she mentions that Martin is more than a butler and more like a dear brother who just happens to work for them.
* The Parent Trap; in the final act, Martin (the mother's butler) and Chessy (the father's nanny/maid) disappear for a picnic together. Then, during the parents' wedding, Martin proposes to Chessy, as shown via snapshots during the end credits.
* The Parent Trap. It also kept several of the important plot lines from the original (i.e. the camping trip, the grandfather discovering the identity of the two girls, and the recreation of the wedding dinner). Having said that, however the remake did deviate pretty heavily at times. The recreation of the wedding dinner happens much earlier in the remake and ends up failing, unlike the original, leading to a heavily altered third act. Aside from the camping trip, it almost completely deviates from the original.
* The Parent Trap my father." Hallie was raised by her father, so she knows a lot about him already: what she's trying to find out is what her mother would tell Annie about him.
* The Parent Trap remake included a ridiculously complex secret handshake between Annie and her buddy butler, just to ramp up the logistical difficulty over the original movie in "switching places", since Hallie had to learn it.
* The Parent Trap remake, when Chessy is reunited with Annie (who she hasn't seen for over a decade), tears begin to well up in Chessy's eyes. She asks Annie if she wants some food, and without waiting for an answer walks into the kitchen. Annie is wise enough not to follow.
* The Parent Trap Rich Bitch, as she never actually qualifies for the rich part.
* The Parent Trap: Sharon and Susan do this while they're in the lake to try to fool Vicky into thinking the water is shallow.
* The Parent Trap. She's called Vicki in both movies, implying they're the same character.
* The Parent Trap that only bartenders in movies know how to make. "I think I just drank tar."
* The Parent Trap, the Evers' housekeeper, a flagrant busybody, would often conclude her gossip with "But I'm not saying a word, not one single word".
* The Parent Trap. The girls (with the assistance of Hickey and Verbina) recreate the restaurant from their parent's first date as part of an attempt to get their parents back together. Everything is quite homemade and primitive, but it's touching, nonetheless.
* The Parent Trap, the plot to bring Nick and Elizabeth together is assisted by Martin (Elizabeth's butler) and Chessy (Nick's housekeeper). Martin and Chessy also end up together.
* The Parent Trap, there is exactly one poker game. It is resolved with a royal flush over a "lesser" straight flush. The winner even says "You're just not good enough."
* The Parent Trap who had been put up for adoption in 1987 and separated. They had been raised in the United States and Europe and rediscovered each other through social networking in 2013. They're even aware of the parallels.

* The Parselmouth of Gryffindor, curiosity, and a tendency to start asking strings of questions without letting the other fellow take a breath, remains one of Hermione's trademarks well into the first year, for all that Harry and Ron help her work on it.
* The Parselmouth of Gryffindor, Dumbledore is fond of his sweets as usual, and there's also the Slytherin Douglas Wilkes, who accepts payment in chocolate as well as Galleons.
* The Parselmouth of Gryffindor epic. The 2018 United States of America being the 2018 United States of America, at least one reviewer took it for granted that the story's comically-incompetent Minister Fudge was a parody of Donald Trump — though no such parallels were intended.
* The Parselmouth of Gryffindor has an unintentional example in the person of the Boggart (a non-sentient magical shapeshifter) who, by pure luck, turned into an accurate enough copy of a human being that he started to think… He hasn't stopped since.
* The Parselmouth of Gryffindor, Hermione breaks the Statute of Secrecy to save a Muggle man she finds dying in the street. She promptly gets shipped to Azkaban.
* The Parselmouth of Gryffindor, Hermione, Dumbledore and Maximilian help Sirius make the Ministry believe he committed suicide so as to get the Dementors off everyone's back.
* The Parselmouth of Gryffindor, Hermione forces him to donate large amounts of money to Muggle charities.
* The Parselmouth of Gryffindor: Hogwarts gets turned into one of these halfway through by Hermione as a ploy to prevent its invasion by Death Eaters.

* The Parselmouth of Gryffindor installments earlier (in Chapter 15), finally makes a return.
* The Parselmouth of Gryffindor is a Boggart who is accidentally made to gain sentience. Hermione walks him through it and becomes his friend.
* The Parselmouth of Gryffindor is initially a recurring background gag… until it becomes Locket Voldemort's new body in Fourth Year.
* The Parselmouth of Gryffindor is like that too. For instance, have to hop through certain clearings on one foot and then pass the same bush twice, if you actually want to progress forward.
* The Parselmouth of Gryffindor, Maximilian, a Boggart-turned-human, is still weak to the Riddikulus Curse (to the exclusion of nearly all other curses), which is useless on any other creature.
* The Parselmouth of Gryffindor, not only in appearance but also in behavior.
* The Parselmouth of Gryffindor, once he's gained sapience, the Boggart begins exercising to allow himself to take any shape he wishes instead of automatically transforming into a passerby's worst fear.
* The Parselmouth of Gryffindor or not) doesn't react well when Hermione tries to get him to stop overworking himself and get some help from the House-Elves.
* The Parselmouth of Gryffindor, Professor Max has been the Ghoul Studies professor "since the 18th or 19th century", and calls 120-year-old Dumbledore "young"… but at the same time does not look that old, not having a single gray hair for one thing. Methuselah Syndrome is probably at play.
* The Parselmouth of Gryffindor rather than a human being. When he off-handedly learns it after a whole year of considering himself, Harry and Neville best friends, he... doesn't take it well.
* The Parselmouth of Gryffindor shows Fiendfyre to be one of the only things that can harm Dementors. Barty Crouch Jr (and Hermione herself) don't have to be told twice.
* The Parselmouth of Gryffindor that Umbridge forced him to do something so ridiculous as issue an official pardon to a piece of headwear.
* The Parselmouth of Gryffindor, the average Hogwarts student might not know, but any wizard who's halfway smart has heard of Time-Turners. People still act like it's supposed to be a secret, more out of habit. Hermione is particularly non-discreet at that.
* The Parselmouth of Gryffindor, the Basilisk gets a magical pair that cancel her gaze's lethal power if she needs it to.
* The Parselmouth of Gryffindor, the bloodthirsty and warmongering consort of Aragog, responsible for the Acromantulas' attack on Hogwarts.
* The Parselmouth of Gryffindor, the Boggart's main goal is to become accepted in wizard society as a human (although he doesn't want to physically become human for it, instead being content with his shapeshifting abilities).
* The Parselmouth of Gryffindor. The farther back in time you go and the more efforts you make to change the past, the more unstable space-time becomes until you're either obliterated or kicked back to your home time period.
* The Parselmouth of Gryffindor, the Man in the Top Hat is quite obviously the author of the story, who appears to to his characters in a body resembling his avatar pic.
* The Parselmouth of Gryffindor, the overnight disappearance of Professor Igor Karkaroff, who had been hiding out in the extremely protected Iron Tower of Durmstrang Institute.
* The Parselmouth of Gryffindor, there are quite a few of these in the Wizarding World, and naturally Hermione is campaigning for their rights as well. The most obvious one is the Sorting Hat, but there is also Rita Skeeter's Quick-Quotes Quill and various others.
* The Parselmouth of Gryffindor went off to Azkaban Island and America, respectively, and haven't been heard of since.
* The Parselmouth of Gryffindor, where Minister Fudge invites Hermione to the Fudges' Christmas dinner.

* "The Parting of the Ways", after the Doctor sends Rose back to the 21st century to get her out of the line of fire of an impending Dalek attack in 200,100. Rose is not happy, and desperately tries to get back as fast as she can, describing the events as happening "right now", but her mum Jackie points out that the future is way off and she shouldn't need to. Indeed, although it takes Rose several hours at the least to rip the TARDIS console open and access the Heart of the TARDIS to get

back, less than an hour passes for the Doctor and Jack in the future before she actually arrives.
* "The Parting of the Ways" being cruelly deformed. This was in the year 200,100 AD and we never really saw anything happen, so it's rather lessened.
* "The Parting of the Ways": Captain Jack wields two guns to fight off approaching Daleks. Sadly they run out of ammo so he gets out a pistol. Which also runs out of ammo.
* "The Parting of the Ways" has a non-comedic use: Rose is sent back home to avoid a bloodbath taking place in the future. Jackie brushes it off, but it tears Rose up enough that she tears up other things...

* The Partridge Family and Shirley Jones actually sang. The others all lip synched to the Ron Hicklin Singers.
* The Partridge Family and the creator, writer, and directors' credits.
* The Partridge Family: At the beginning of "The Selling of the Partridges," Reuben is trying to repair the front doorknob. Shirley and Danny both walk into the house, hitting him with the door. Then Laurie walks through the open door and pushes it shut, away from Reuben. Just as Reuben's starting to get back to work, Keith flings the door open, knocking him into the wall.
* The Partridge Family A young male visitor introduced himself as what sounded like Sue, but when Reuben responded, "A boy named Sue?" it turned out the visitor's name was actually Sioux, as in the Native American tribe. He was one-quarter.
* The Partridge Family: Danny and Chris get in one in "This Is My Song." Shirley goes into their room to tell them to quit fighting and go to sleep, but as soon as she's gone, they start hitting each other again.
* The Partridge Family, Danny once asked the eldest son where he intented to go on a date. "If I'm unlucky, the pizza place. If I'm lucky ... Muldoon's Point."
* The Partridge Family: Danny watches TV to take his mind off his upcoming tonsillectomy, which Shirley assures him will be a simple operation. The first show he sees features a man saying into a telephone, "Have you told your son the truth yet, Mrs. Carstairs? I know it's difficult, he's so young. Well, maybe it is better if he does think it's only a simple operation. The truth won't make the end any easier."

* The Partridge Family: In "Forgive Us Our Debits," Keith, Danny, and Laurie get "revenge" on a computer that almost cheated them out of thousands of dollars by breaking into the computer room and sending Shirley a check for $50,000.
* The Partridge Family: In "Go Directly to Jail", the prison warden is setting up the band's equipment. Reuben tries to provide advice, but everything he says is something the warden already knows, and he only succeeds in slowing him down.
* The Partridge Family: In "I Am a Curious Partridge," Danny publishes a two-part article full of made-up lurid details about Keith and Shirley's sex lives, causing them both to be incessantly harassed by fans taking advice from the article. Keith gets revenge by publishing an article that claims the miserly Danny loves giving away money, causing him to be harassed by charitable organizations.
* The Partridge Family: In "Mom Drops Out," a promoter tells Keith and Laurie what will happen if they break their contract with him.
* The Partridge Family: In "Old Scrapmouth", Laurie's boyfriend lurks around her home in the hopes of "accidentally" running into her so he can ask her to go steady. He walks past the house thirty-five times, attracting the attention of Laurie's siblings, and at one point walks into a kid because he isn't watching where he's going.
* The Partridge Family: In "Road Song," a teenage runaway who hitchhiked with the family pretends to take a shower, then escapes through the bathroom window so she won't be returned to her grandparents. Later, Danny uses the same trick when Shirley makes him stay behind in the hotel room during the search for the girl. He manages to climb back in just as Shirley returns.
* The Partridge Family: In "The Sound of Money," Shirley accidentally rear-ends a car with the tour bus. There's no damage, but once the driver realizes the family is in show business, he pretends to have injured his back and sues the family for $500,000. Danny enlists Reuben's help in tricking the man into bending over so he can take a picture of it and prove he's lying.
* The Partridge Family: In "They Shoot Managers, Don't They?" Shirley tries to set Reuben up with her former coworker, Cathleen Darcy, by inviting them both to a barbecue. They hit it off and almost get married before they realize that Reuben wants kids and Cathleen doesn't.
* The Partridge Family in "They Shoot Managers, Don't They?" The first time Reuben trips and falls, the second time they run past each other, and the third time they finally succeed in running into each other's arms.
* The Partridge Family: In "This Male Chauvinist Piggy Went to Market," the students at Keith and Laurie's high school are required to take the opposite gender's classes so they can learn how other people live. The two have a contest to see whether Keith can do better at cooking than Laurie can at car maintenance. Naturally, Laurie does everything perfectly, while Keith's spinach soufflé turns out so inedible, he uses it as a planter.
* The Partridge Family: In "Trial of the Partridge One," Laurie is caught with a copy of an upcoming math test that her friend Cindy Brown stole. She maintains her innocence, but won't tell who actually did it because Cindy's dad is the principal and the consequences of failure will be much worse for her than they will be for Laurie.
* The Partridge Family: In "Waiting for Bolero," Shirley knocks on Keith's door in the middle of a date when he's supposed to be working on a song. Keith shoves the girl into a closet and hides as much evidence as he can before letting Shirley in. She still immediately realizes what's going on because of the smell of perfume in the air and the pom-pom he left on the sofa.
* The Partridge Family: In "Where Do Mermaids Go?" a cop asks for Shirley's autograph for his son, who he says listens to the Partridge Family all the time. When Shirley asks what the son's name is, the cop says, "Officer Bodie."
* The Partridge Family: Reuben hops on one foot after stumbling over a coffee table in "A Knight in Shining Armor."
* The Partridge Family: Reuben is arrested, his "one phone call" is to the

Partridges but the only one in is Tracey, who's busy watching cartoons. She hangs up on him. "Does that have to count? She's only eight!"
* The Partridge Family: Reuben takes the kids to an experimental film in "Fellini, Bergman, and Partridge." According to Danny, it features exploding flowers and an asparagus patch covered in shaving cream. Laurie likes it, but the others all think it's nonsense, including Reuben.
* The Partridge Family revolves around Danny getting a draft notice even though he is clearly too young. Shirley even goes in and tries to point this out, to the point of pulling out his birth certificate, but no one pays attention.
* The Partridge Family, saying, "I haven't felt pain like this since Tracy bit me on the toe!"
* The Partridge Family, Shirley, who wants the kids to have a "normal" life, orders Danny and Chris outside to shoot baskets, and tells Keith to "go down to the Malt Shop, or wherever young people hang out." Keith quips that he should meet Betty Sue there before the sock hop at the gym.
* The Partridge Family: Story editor/consultant Dale McRaven's favorite character was Keith. He said, "I did dumb things, so I had Keith do dumb things, too. He wasn't a dumb character, though."
* The Partridge Family. The ensuing argument is almost identical to the one at the beginning of the episode.
* The Partridge Family was cast anyway for his sense of comic timing, very rare in a child actor.
* The Partridge Family: When Reuben sits down on a prison cot in "Go Directly to Jail," it folds shut on him. Reuben grumbles, "This cot belongs in jail. It can't go straight." He laughs to himself and repeats, "It can't go straight!"
* The Partridge Family: When Shirley withdraws a large sum of money from the bank, the president is so enraged that the pencil he's holding snaps.
* The Partridge Family: When the bus's engine blows a gasket in "Don't Bring Your Guns To Town, Santa," Keith creates a new one out of an old inner tube.
* The Partridge Family: While playing Scrabble with Laurie, Danny tries to play "Brogak," which he says is an elf-like creature found in Thailand, frequently killed and made into lamps.
* The Partridge Family with a beautiful voice, accompanied by violins and a choir instead of just Laurie's piano.
* The Partridge Family with a crush on him. After he spends a while trying to avoid her, she gets over her crush, and they agree to be friends. Afterwards, Danny almost immediately develops a crush on her.

* The Patchwork Girl chance. Gil sees the reflected flash in a window and is able to fire back while the weapon is recharging for the next pulse.
* The Patchwork Girl of Oz in a magical mishap. He at first finds it silly to have a law against picking six-leaf clovers, but the law is in place as part of Oz's magic ban. * The Path. Hawk Lane and other teens attend public high school where they say Meyerist grace holding hands before (vegetarian) lunch, and are called "weird cult kids". The trope really comes into play during Restitution, a Yom Kippur-like solemnity that all Meyerists, including those who live outside the community, are required to attend. Hawk, visiting a friend in New York, remembers that the speech his mother — currently a "Guardian of the Light" — gave at a recent religious conference was self-serving and not very Meyerist, so he blows off the festival. Although he volunteers to atone in Realignment Lockdown when he returns, it's implied he would be placed in lockdown anyway.

* The Patriot: Benjamin Martin is a widower with seven children at the start, but he's on good terms with his sister-in-law and visits her with his family from time to time, who becomes a sort of surrogate mother for her nephews and nieces. They eventually get married by the end of the war.
* The Patriot Benjamin Martin's wife has died, apparently of natural causes by the film's start. Her sister Charlotte and he start to develop a mutual attraction on which they are at first hesitant to act. By the end, however, they decide to become a couple.
* The Patriot, Benjamin Martin tests the suitability of potential recruits by walking into a rough tavern and shouting "God Save King George!" The patrons immediately hurl things at him (including a giant knife). Martin says, "This is the place."
* The Patriot, Colonel Tavington locks some people who've been supporting the revolutionaries into a church, demanding they reveal where Benjamin Martin is. At first no one says anything. Finally, one guy rushes forwards and blabs everything, believing the British will let everyone go if they get what they want. Tavington then burns the entire church down with the people inside.
* The Patriot exaggerates British atrocities during the American Revolutionary War whilst downplaying similar actions from the American side to non-existence. It also conveniently makes all of our hero's African-American farm laborers freedmen.
* The Patriot exhibits berserker-like qualities in battle. Especially his first and last fight scenes.
* The Patriot, French & Indian War veteran Benjamin Martin is fueled with unstoppable rage when his second-oldest son is shot point-blank by the evil British Cavalry officer Col. Tavington. With minimal help from his two pint-sized sons, Ben brutally takes down a contingent of British Redcoats, not satisfied with making them dead but burning through all of that rage by hacking at one soldier's bloody corpse.
* The Patriot: General Cornwallis upholds this method of conducting war to the highest degree. His subordinate, Col. Tavington... not so much.
* The Patriot has the American Revolutionary army using its reputation of being composed of untrained farmers and such to its advantage. In one battle, they do a volley, and then retreat, luring the contemptuous British forces into a pursuit... which gets the army, which has fled behind a hill only to set up again, a few free volleys.
* The Patriot has this; he lost his leg and most of his hearing in the French and Indian War. He sometimes uses it to mess with Gabriel by pretending he cannot hear him properly.
* The Patriot. His subordinate Colonel Tavington, whose brutal, unprofessional conduct in battle initially earns him furious rebukes from Cornwallis, is eventually given free rein to engage in war crimes after Cornwallis has been dealt a personal slight by Martin.
* The patriotic song "Columbia, the Gem of the Ocean" had a similar period of popularity.
* The Patriot: In his opening scene, Colonel Tavington has wounded Colonial soldiers gunned down where they're laying in blatant violation of the laws of war. General Cornwallis later explodes in Tavington's face for refusing to give their enemies of the hour quarter.
* The Patriot. Martin refuses to change his tactic as long as other British officers like Col. Tavington engage in pointless brutalities that violate the Laws and Customs of Warfare, and Cornwallis concedes the point.
* The Patriot: one of the principal financial motivations for some of the French-Indian war veterans to join Mel Gibson's protagonist was the ability to sell back every English gun or uniform found or recovered.
* The Patriot. Right before the final battle, Dan and Occam and the rest of the American militia are facing down the superior British Army. Dan points out to Occam

that he already served his required enlistment and that he could leave at any time. Occam confirms this and decides to stay anyways so he can fight beside his comrades.
* The Patriot's character spot each other across the battlefield in the final battle. Each then slices, shoots, and wades his way through the other side's Mooks to get to his nemesis.
* The Patriot set during The American Revolution by means of a cannonball to the face.
* The Patriot. Tavington quickly downs his drink and spikes the glass into the ground.
* The Patriot, the French Major Villeneuve puts on his elaborate white, sky blue and gold uniform (which we had never seen before). Benjamin Martin gives him a look, and Major Villeneuve says, "If I die, I will die well-dressed."
* The Patriot: The name of the film obviously doesn't apply to the main character, who refuses to help either side until his son gets captured by the cartoonishly evil Colonel Tavington.

* The Patsy, Pat has a habit of staring at Tony—her sister's boyfriend—with her big blue eyes in an obvious look of love. Tony never notices, but Ma does, and berates Pat for "mooning" at Tony.
* The Patsy, Pat is besotted with her sister Grace's boyfriend Tony. Tony has no clue. Grace for her part is also attracted to another man, complicating the situation.
* The Patsy: Poor Tony has no clue that Pat is besotted with him. When she tells him "I'm in love with a man who hardly knows I exist," he cluelessly offers her advice on how to attract the mystery man.

* The Patty Duke Show episode "Patty the Chatterbox", Patty has made a bet/agreement not to speak for 72 hours. This has created a headache for her boyfriend Richard, who's coming to see her hash out the situation. Before he arrives, Patty prepares a series of "answer cards". During their exchange, she holds up cards that exactly answer every one of his remarks, including the answer "because you're predictable"! Later on, she tries this with him again but fails because her younger brother Ross had inadvertently mixed up the cards beforehand.
* The Patty Duke Show: Patty has taken a "vow of silence" to prove that she can go an extended period without running her mouth. She engages in a complete conversation with her boyfriend by responding to everything that he says with pre-written signs. Eventually he asks how she was able to anticipate his statements. Her reply: "You're predictable."
* The Patty Duke Show" sees Patty bumbling her way through her usual Candy Striper duties as she tends to her father, Martin, who is stuck in the hospital. The episode aired in 1965.

* The Paul Powers Show, at least in a couple of videos. Notably, he seems to drink a lot more when he is alone and doesn't have a "special guest."
* The Paul Reiser Show aired on NBC in 2011 for two weeks, then was cancelled due to very poor ratings. NBC was not doing very well at the time, so the show had to have been doing pretty poorly to be cancelled so quickly.
* The Paul Reiser Show attempted this, with Paul's older son being played by Brock Waidmann, who has spina bifida. He wasn't in either of the two episodes that aired.

* The payoff ratio is also allowed to assume "perfect play"; that is, the person playing the machine knows to do certain things that may be counterintuitive to a casual player or even an experienced player who has not fully analyzed a particular machine's payoff values, which are frequently different even on machines of precisely the same type right next to each other in the same casino.
* The PC-98 games had gods of 'dream worlds'. Their relative status is unclear, and they've probably been retconned out.
* The PC Crusader: just to play it safe. On the rare occasion one of these people finds a character which meets their standards, they will protect that character like their only child. Any criticism of said character will lead to the critic being dismissed as a bigot, even if their criticisms had nothing to do with the character's minority status. Their existence gave rise to The Un-PC Crusader, an equally obnoxious group who believe that pretty much any work with a female/minority character is an attempt at pandering to this crowd.

Predictably, the people who'd been in the governments of each of the Successor States started arguing with each other, until the person leading the conference got fed up and shouted that they shouldn't have to play peacekeeper for the rest of them. This gave them the idea for the mech's name, and they each took turns giving input onto what its weaponry should be, resulting in a mess of different guns that didn't give good firing brackets and consequently left it struggling to actually be effective in a fight. * The Peace Not Promised, Severus and Lily's breakfast conversation in the Great Hall leads Hagrid to believe that she's pregnant, and being as loose lipped as he is, he spreads the story around amongst the staff. Cue staff members keeping Lily away from alcohol, fussing about which potions she's allowed to brew, ensuring that she wraps up warmly, but never directly approaching her about it.
* The Peace Not Promised: Severus is very aware that with a disinterested mother and an abusive father, he's in danger of perpetuating a cycle of abuse, and for that reason he's concerned about the prospect of fatherhood.
* The Peace Not Promised, Severus Snape killed his parents at Voldemort's instruction, to remove any possible alternative claim on the Prince family inheritance. Since his mother was merely grossly neglectful, he was merciful enough to kill her painlessly in her sleep. His alcoholic and violent father, not so much.
* The Peace Not Promised, shows off the domestic spells she's been learning by making lunch. Severus, being the serious and socially awkward fellow that he is, evaluates it as, "You're not a terrible cook," and then immediately realises how that sounds and fumbles for words to patch it up. Lily is a match for him, though, responding that he can be really adorable, "Not in the puppies and kittens way, of course. More like if a Boggart decided to give up its day job and try its hand at being human."
* The Peace Not Promised when she starts returning Severus' affections. In fairness, it wasn't just his proud and prickly personality, unkempt appearance, or poverty; they were also worried about his former association with the Death Eaters, who would torture and kill Lily if given the chance (Lily's confident that he's repented and reformed, but not everyone is so readily convinced). She's eventually able to win them over when they see how much good he's doing.

* The Peace symbol of the first and second fingers, if held up palm inward, is quite rude in England, and the rest of the UK for that matter. (The apocryphal story about archers during the Hundred Years War is amusing but untrue.) Palm outward is fine.
* The Peace War, Earth's population has been reduced to about 10% of its pre-War level, mainly by the release of engineered plagues. Paul Naismith, who's old enough to remember life before the War, reflects near the beginning that the town he's in is large by post-War standards but its entire population could have got lost in the crowd at a good high-school basketball game.
* The Peace War makes it; his friends, searching for him, find the tips of two of his fingers, the only part of him that was outside the bobble when it formed.
* The Peace War opens with a prologue set in 1997, featuring a US Air Force recon mission over the still-existing Soviet Union. It's a relatively minor case, though, because then the Peace War breaks out and rewrites all the existing political borders.
* The Peace War that relies on the Peace for electricity and medicine — and it's all but stated that the Peace actually started World War III specifically to destroy their competition.
* The Peace War. The sequels show that after the overthrow of the Peace Authority nobody seems particularly keen on reviving the old Union, and eventually all the countries dissolve as people prefer the ungoverned land/protection company model.

* The Peanut Butter Falcon, Tyler hitchhikes with a man whose enormous dog spends the entire ride panting in Tyler's face.

* The Peanut Butter Solution, a boy loses his hair after seeing ghosts, then grows it back with the titular solution. It works only too well. Unfortunately, he used too much peanut butter making it, so it won't stop!
* The Peanuts Movie as the sort of behavior and circumstances Charlie Brown endures would be even less funny in the time of the film's release.
* The Peanuts Movie, Charlie Brown races through the last-day-of-school carnival on his way to talk to the Little Red-Haired Girl before she leaves for summer camp. As he races through the carnival, he gets caught in several of these, dodging footballs thrown at the targets and getting water intended for the clowns squirted into his mouth.
* The Peanuts Movie, Charlie Brown tries to incorporate this into a magic act. While practicing the first time everything falls and the second time he pulls the whole table out while the objects stay in mid air for a second. It's only later when he cancels his act and retrieves the table cloth, he does the trope successfully.

* The Pedestrian example of the drivers' ed video. The protagonist, who's had his license suspended after an accident in which his son was killed, has to attend a traffic class and watch the typical gory drivers' ed video, with shattered bodies strewn all over the highway. This is ironic as the film eventually reveals that the reason the man had the accident was that his son grabbed the wheel and yanked them into the back of a truck on purpose.

* The Pegasus Galaxy also has Spacegates, and there's no way to tell whether you dialed an address for a gate on the ground or a gate in orbit besides stepping through (or checking the Ancient database, but not every civilization has that option). The Pegasus network was designed for Lantean spaceships, but if a failsafe was ever needed in their designs, it's here. It was established a few other points in canon that there's a whole lot of "error codes" that the gate sends back to the DHD, and it's set up to not allow things like water rushing through from an underwater environment (while still allowing solids). Since the system isn't completely understood by anyone, it's possible there's a "Are you really sure you want to step through into space" warning light.
* The pegasus Scootaloo is a variant of the above-mentioned characters with

* The Pelican Brief from the fan base of both actors caused the script to get rewritten where they part as close friends by the end of the film.
* The Pelican Brief Grantham has this problem. Somewhat justified in that he was dressed for street surveillance and looked somewhat suspicious, made worse by the fact that he is black.
* The Pelican Brief, he turns the key and the starter makes the same noise. She catches it just in time to stop him from setting off the bomb, and they get out of the car and run from the assassins who planted it.
* The Pelican Brief, the main character is dating one of her law professors. We're apparently supposed to forgive this gross violation of ethics because she's a brilliant student and doesn't need an unfair advantage to get an A.
* The Pelican Brief, the scene was cut from the final film, as well as any romantic overtones. Instead, the film ends with them being friends.
* The Peloponnesian War ended when the Spartans found the whole Athenian fleet beached and their crew ashore foraging.
* The Peloponnesian Wars, is generally considered the first "proper" history, since it's the first history of any scale to use logic and reasoning rather than anecdotes. He even states that these words aren't what people said, but what they ought to have said (for the following events to occur).

* The Peluda was a dragon from France that had the head, neck, and tail of a snake, the body of a green porcupine, and the feet of a turtle. Much nastier than it sounds — it could breathe acid and fire, its quills were toxic and could be flicked at prey, had a special taste for
* The Pemalites (and their android creations, the Chee) are dog-like in both appearance and attitude.
* The Pemalites were total pacifists who did not even bother trying to fight back as they were killed off by the Howlers. The Chee, a race of androids they created, are at least capable of understanding violence, but their programming makes them incapable of committing it.

* The Pendragon Adventure abilities play a part, but in some cases, he's gone as himself (Zadaa), and still assimilated fairly easily. Hero Bobby Pendragon has a much harder time no matter what the Territory.
* The Pendragon Adventure, as even though Bobby gets to relive his life as a normal human, his Traveler heritage makes it impossible for him and Courtney to have children.
* The Pendragon Adventure, Bobby happens to stumble upon Loor bathing. They didn't have anything romantic going at that point in the series, but in hindsight, could have been foreshadowing.
* The Pendragon Adventure count as single territories. Saint Dane just targeted the territories in different periods of time.
* The Pendragon Adventure has an abandoned subway station as the location of Second Earth's flume entrance.
* The Pendragon Adventure inverts this. As one character put it, they "know everything about everyone and everything they ever did."
* The Pendragon Adventure involves the secret human city of Black Water, where free humans are secretly gathering and preparing to rebel against their Klee overlords.
* The Pendragon Adventure is a combination of a proper noun and a common, translatable noun, this would only make sense in English.
* The Pendragon Adventure makes him one of the most popular characters in the series by far and an interesting villain in general.
* The Pendragon Adventure makes the mistake of asking his local counterpart Vincent "Gunny" Van Dyke where the TV is in a 1937 hotel suite. Naturally, Gunny has no idea what he's talking about, but notes that there is a radio around there somewhere when asked about it.
* The Pendragon Adventure Mark and Courtney, formerly fairly average high school students, have become grizzled leaders of the surviving human population on Earth.
* The Pendragon Adventure, Mark and Courtney go to Eelong to help Bobby and spend several weeks there. Before returning, they wrack their brains for a plausible excuse of where they've been, then discover they've only been gone for half an hour.
* The Pendragon Adventure offers Bobby the chance to join him several times. Doesn't work.
* The Pendragon Adventure Saint Dane does it. In one of the later books, Bobby decides that if Saint Dane can do it he can too and brings a big earth drilling machine from a technologically advanced Territory to one with more medieval level. This helps him stop the emergency of the moment, but it sets up a chain of events that makes him lose ground in the long run.
* The Pendragon Adventure, Saint Dane sends a quig shark to attack Bobby and Loor on land in another DIMENSION!
* The Pendragon Adventure that all this violates the laws of physics as he understands them.
* The Pendragon Adventure, the Hindenburg disaster was the result of a mobster igniting it with a firework to destroy his rival's fortune, which was secretly on board.
* The Pendragon Adventure, the Milago and Bedoowan live within spitting distance of each other: the Milago live in small huts and shit in holes in the ground, while the Bedoowan castle has running water and uses naturally glowing stones to provide artificial light.
* The Pendragon Adventure, the territory Denduron has three suns. Eelong has a "sun belt", a thin line of sunlight that crosses the entire sky.
* The Pendragon Adventure. They live on a hot planet with scarce water, and hostile creatures all about. Becoming a warrior is a necessity.
* The Pendragon Adventure. When Bobby first steps onto Veelox, he's greeted by pitch blackness and Aja Killian's giant, floating, holographic head. He eventually starts wondering whether the hologram reflects the physical reality in any way. Considering what he's been through, you can't really blame him.

* The Pendragon Adventure, who act as the bad guy's personal army from Book 7 on.
* The Pendragon Adventure you get there is another story; it appears that while the traveller doesn't have absolute control over this, the flume takes the traveller to when he needs to be there.
* The pendulum swung the other way in the 60s and 70s; The Destroyer, Mr. Wrestling I & II, The Masked Superstar, The Assassins, The Spoiler/Super Destroyer were all major stars in America and Japan.
* The Pendulum, the Pit and Hope" and the short story "A Torture by Hope" by Villiers de l'Isle-Adam. It is a fairly faithful adaptation of both stories, featuring a unique first-person camera perspective and segments produced in Svankmajer's trademark stop-motion and cut-out animation. It also shows some of the mechanisms behind the pendulum's operation.
* The Penelopiad. It's told from the point of view of Penelope, Odysseus's wife, and the twelve maids who were hanged at the end of the poem.
* The Penetrator, from a series of novels published by Pinnacle in the 1970's and 1980's, maintained a dual identity as Mark Hardin. Since he had served in the military, he quickly realized that his fingerprints remained on file and would betray. Therefore, he developed special flesh colored prosthetics to prevent them from betraying him.
* The Penetrator switched back and forth from mundane gangster foes to enemies with technology that outpaced the 20th century.
* The Penguin, although varying based on the interpretation, usually exhibits at least seven symptoms of post-traumatic stress disorder, which is enough for a diagnosis. This is especially made obvious in
* The Penguin, and actually call each other "Ozzie" and "Eddie" more than they do their actual names, or even their aliases.
* The penguin and many of the other fiberglass features used to be playground equipment ... the penguin, for instance, contained a slide ... but most of that has been removed (probably for liability reasons; the penguin slide was rather steep due to space limitations) and today they're just sculptures.
* the penguin disguises himself as a chicken by wearing a rubber glove on his head.
* The Penguin fits this to a tee. Even more so than his older self, in fact, as young Oswald is quite slender.
* The Penguin functions as an information broker for Gotham's underworld, and sometimes to Batman, with a little arms dealing thrown in for good measure.
* the penguin Gunther since prehistoric times. (A series of flashbacks he has when he begins to remember his true nature includes a shot of him fending off what seems like a saber tooth tiger, then later participating in Egyptian, Ancient Greek, and Roman societies.)
* The Penguin had the freaks take it over, until the SWAT team invaded, killing all the expendable lackeys. And one penguin. An actual penguin, not the supervillain.
* The Penguin has a similar ability regarding birds. A Secret Origins special written by Neil Gaiman even has one of his ex-henchmen describing this with awe to a TV crew.
* The Penguin has flip-flopped over the years from snobbish social climber to cold-blooded gangster to mutant bird-man, often depending on the medium. His umbrella and beak-like nose seem to be the only constants.
* The Penguin has romantic feelings for the Riddler, and thus seems to be gay (as he isn't shown being into women), like his actor.
* The Penguin has the Kabuki Twins, two female assassins. Given their blind loyalty to him and how no bare flesh is ever seen on either of them, some have speculated that they may be robots, or even mutated birds that he created using his mastery of orinthology.
* The Penguin, in which supplies are limited and food and water are at a premium, Penguin isn't shy about taking in employees and making sure they have plenty to live off of while he uses them to stockpile goods that are worthless in Gotham now but will become priceless when Congress reverses its decision to abandon the city (goods such as art pieces or jewelry).
* The Penguin is a villain often shown to be bald when his top hat is off.

* The Penguin is perfectly sane may have contributed to his mutation into a gray market white-collar criminal who Batman is grudgingly willing to tolerate as a source of information on the criminal underworld.
* The Penguin is rude, boorish, and all-around unpleasant. While he's still a bad guy in the original comics, he's nowhere near as impolite. On the contrary, he's
* the Penguin Mafia took control of Crimbo, thanks to a one-sided deal between Uncle Crimbo
* the Penguin murdered his father (along with his brothers) in the miniseries Penguin: Pain and Prejudice
* The penguins have Kowalski, who seems to function as Skipper's Number Two.
* The penguins in the anime are based on one of the enemies from the game, Pengy. Inhaling one
* The Penguins/Islanders brawl in 2011, an act of revenge on the Islanders' part after a previous game left one of their players concussed and the Penguin that did it unpunished.
* The Penguins of Madagascar: “Well, I’ve had a word with Disney. I need to check that I have said [penguin] correctly in the film.”
* The Penguins of Madagascar: after recovering from an attack by a poisonous frog, Kowalski says "I can taste sound, but that's passed."
* The Penguins of Madagascar, "All King, No Kingdom": King Julien divides the lemur habitat in half, one side for Maurice and Mort, the other for himself. Naturally, Julien's "half" occupies most of the habitat. Maurice and Mort then throw a party and invite all the animals in the zoo, except for Julien, who starts going crazy with loneliness.
* The Penguins of Madagascar and moves in with Marlene, who is not amused with his outdated ideas of femininity.
* The Penguins of Madagascar and played with in "Miss Understanding". Due to some mistake, Skipper's led to believe that he is actually female. Once he accepts it, he promptly puts on a big pink bow.
* The Penguins of Madagascar, "An Elephant Never Forgets." A man is confronted by Burt the elephant and calls Animal Control:
* The Penguins of Madagascar, Arlene (Marlene in disguise due to chlorine accident) is considered World Class beauty, As everyone mentions how pretty she is.
* The Penguins of Madagascar. As with real penguins, the external structure of the eponymous birds is apparently so non-distinct that they literally cannot tell their own sexes without a DNA test, and when Skipper's test comes up female, he believes it.
* The Penguins of Madagascar binoculars made from paper cups, a mind-switching machine powered by a 17-speed blender, and an trans-lunar spacecraft out of trashcans. Amazingly, they seem to work properly half of the time.
* The Penguins of Madagascar: Blowhole orders a lackey to rewind a few times so he can catch the exact moment of Skipper's demise, including freezing his death scream.
* The Penguins of Madagascar briefly don cool shades, complete with earpieces, while "protecting" the parks commissioner. And they look simultaneously hilarious and awesome.
* The Penguins of Madagascar, causing Kowalski to say the trope name word-for-word.
* The Penguins of Madagascar does this constantly, usually followed by Skipper saying "In English Please?"
* The Penguins of Madagascar due to paranoia, often serving as a voice of reason.
* The Penguins of Madagascar, e.g. "It is I, who is me!" and "What is up with the un-big tiny littleness of my royal estate?"
* The Penguins of Madagascar episode, "Alienated", a Space Squid from Mars lands in the Zoo to take over Earth. When Private suggests a peaceful attempt at first contact, Kowalski replies by lampshading this trope:
* The Penguins of Madagascar episode "Antics on Ice", Skipper is driven to get Private to that Lunacorns show. He is haunted by future visions of a jaded, cynical Private who wears a trilby hat, a goatee, and eyeglasses that he doesn't need because "I'm ironic".

* The Penguins of Madagascar episode "Crown Fools" and his screaming was still heard as the Penguins plan to retrieve it after Maurice tells them about it.
* The Penguins of Madagascar episode "Crown Fools", King Julien loses his crown, which causes to let loose a nonstop scream that lasts well into the night.
* The Penguins of Madagascar episode "Misfortune Cookie", Julien keeps getting Rico's name wrong and calling him "Chico" or "Freako".
* The Penguins of Madagascar episode "Miss Understanding", Private looks between his own legs when Alice says that one of them is female.
* The Penguins of Madagascar episode "Mr. Tux". During the climax, he does it in an attempt to extinguish the penguins' overloading nuclear core, but it fails. The other penguins do this sometimes too.
* The Penguins of Madagascar episode "Mr. Tux" had a plot centered around this. And made no apologies for the obviously physics-defying shots. Apparently Mr. Tux is really just so good at mini-golf that he can bend physics to his will.
* The Penguins of Madagascar episode, "Operation: Good Deed", Mason's back gets injured by a bucket and he needs a massage. King Julien will let the Penguins borrow Maurice, who gives excellent massages, if they can get him a flamingo feather for his crown, Pinky will give them one of her feathers in exchange for some peanuts, Burt will give them his peanuts in exchange for some hay, Roy will give them his hay if they can get Bada and Bing to stop throwing their banana peels into his habitat, and Bada and Bing will stop throwing their banana peels if they can get them a pizza.
* The Penguins of Madagascar episode "Operation: Plush and Cover", the penguins are caught in a conveyor belt in a toy factory, which leads to an incinerator for rejected toys. Attempts to turn it off only activates more crushing devices.
* The Penguins of Madagascar episode "Otter Gone Wild", a feral Marlene is captured by a giant cage falling out of nowhere. King Julien asks where the cage came from. Kowalski replies that that's classified information.
* The Penguins of Madagascar, everyone gasps upon hearing that Mort had been kidnapped. Everyone, that is, except King Julien, who momentarily forgets who Mort is, then reassures them that "I too am gasping in horror, but on the inside."
* The Penguins of Madagascar, every time something is thrown off screen with an explosion, you can hear the same guy scream "My car!!!"
* The Penguins of Madagascar feed. Viacom and DreamWorks worked out a deal with Disney where Disney would air the show in that one country only. Understandably, tourists who've seen the Japanese merchandise are perplexed by the presence of the Disney Channel logo.
* The Penguins of Madagascar finds things that would freak out the other penguins a little too interesting.
* The Penguins of Madagascar focuses on Skipper fighting with a pigeon named Frankie to prevent him from "dropping one" on the city commissioner, and ends with Frankie covered in his own poop.
* The Penguins of Madagascar, given that said penguins live... guess where.
* The Penguins of Madagascar greet a cat when they think they've landed on the moon this way: "We come in peace. For now."
* The Penguins of Madagascar Hans the Puffin tries to do this to anger Skipper in "Huffin And Puffin". It kind of fails...
* The Penguins of Madagascar has Kowalski try to stop two paradoxes that he created at the same time. While it's eventually resolved with a stable time loop, the second/third Kowalski couldn't have existed without having it's own paradox. It's... confusing. And the paradoxes effect time is only a few hours.
* The Penguins of Madagascar has Mort the mouse lemur and Eggy the duckling. Private probably qualifies as well - he's made even King Julien go "Awwwww". Private manages to attain a level weaponizable cuteness in one episode. Naturally, Skipper takes advantage.
* The Penguins of Madagascar have a guy off screen shouting "My car!" at some point pretty much whenever the penguins leave the zoo.
* The Penguins of Madagascar he accepts full responsibility despite the fact he did nothing that caused it. He even said they would have resignation in the morning

because of his shame and guilt.
* The Penguins of Madagascar. He doesn't seem to realize it's a doll either, though.
* The Penguins of Madagascar, he has a pseudopenis (the clitoris is enlarged by high blood testosterone levels).
* The Penguins of Madagascar. He is ridiculously intelligent, constantly builds things, working inventions that no human has thought of yet (A shrink ray, an invisibility ray), but the level of arrogance he displays borders on narcissism.
* The Penguins of Madagascar, he says "Thank the Maker, which in this case is me."
* The Penguins of Madagascar: In "Antics On Ice" Skipper and Rico leave their seats during an ice-skating show in order to deal with a security guard backstage; when Private questions their disappearance Kowalski tells him that they went to get popcorn. When the two return a few minutes later Kowalski tries to convey the original excuse to Skipper:
* The Penguins of Madagascar: In "Go Fish", things get out of hand when Skipper tries to get back real fish instead of the tasteless fish cakes the penguins have been forced to eat. Julien, who hates the smell of fish, tried to sabotage the operation.
* The Penguins of Madagascar: In "Herring Impaired", the penguins eat aged brined herring that results in them contracting a rare brain disease that turns them all into fish-obsessed psychopaths. Rico, being the only one who didn't actually eat any herring, has to keep them from eating anymore fish for a whole day to keep the effects from becoming permanent. Unfortunately for Rico, there seems to be fish almost everywhere they go. Fortunately, he's able to trick the infected penguins into eating a large wooden sign shaped like a fish until they return to normal.
* The Penguins of Madagascar: In "Night of the Vesuviuses" Alice welcomes children to night in zoo, but when she realizes nobody is there and cricket only chirps, she squashes the cricket.
* The Penguins of Madagascar: In "The All Nighter Before Christmas", Private mentions that Dec. 26 is also known as Boxing Day, only for Skipper to cut him off saying that they don't have time for his made-up holidays.
* The Penguins of Madagascar: In the episode "Action Reaction" Skipper accidentally gets doused with a mysterious chemical called Inflatium. The substance takes its toll on him by making him inflate like a balloon when stressed.
* The Penguins of Madagascar: In the episode "Kingdom Come", Julien has to go to the zoo's doctor, leaving Maurice to run the habitat until he returns. Initially, Maurice doesn't become drunk with power (in fact, he's hesitant to take over the throne at first and only does it because, as Skipper points out, it's either him or Mort). Then he sees Julien's bowl of lychee nuts, which as it turns out release an enzyme that causes aggression in the one that eats them when they go bad, resulting in him becoming a tyrant with gorilla bodyguards who demands that the penguins surrender to him. Fortunately, all it takes to get the actual Maurice back is to spray him in the face with guavaberry juice. He's pretty embarrassed, but Skipper reassures him that it's not his fault.
* The Penguins of Madagascar: In the first episode, when the penguins find Maurice to take him back to the zoo, they high five each other, then Skipper offers a high five to Maurice, who rejects it since he doesn't want to go back.
* The Penguins of Madagascar" involving Hans the Puffin. Apparently, the Danes hate him so much he's occasionally misidentified in unrelated attacks to them, still holding enough of a grudge to send people after him.
* The Penguins of Madagascar is another in-universe example: "An Elephant Never Forgets" has Burt the elephant crushing Kid Kazoo with the "Two Cheeker".
* The Penguins of Madagascar is a real Brit, however: Chad Stuart of Chad & Jeremy fame.
* The Penguins of Madagascar is a world of yelling, exaggerated gestures and wild facial expressions. And yet, even in this world of ham, King Julien and Skipper stand out.
* The Penguins of Madagascar is bad enough ("Ook ook! I sure do love the tire swing!"), but when asked to do one of Private (a penguin)... "Ook ook! I sure do

love a stinky fish!" His impersonation of Maurice is slightly better; he puts on a deep voice, stretches his ears out to the sides, and says "Uh, hey, everybody, stop having fun, because I am boring!" Maurice protests that he doesn't talk like that:
* The Penguins of Madagascar, is so dumb that he can take lethal blows without serious damage. The penguins decide to suction out their own brains so that they, too, can have this "Halo of Ignorance". It works until they are too stupid to carry out their mission.
* The Penguins of Madagascar, "I Was a Penguin Zombie": Skipper escapes from the vet after breaking his wing, and through a combination of green topical ointment (which numbs his mouth, making him unable to speak), tangled gauze, talcum powder, and a sprained ankle, ends up looking and acting like the living dead.
* The Penguins of Madagascar just watched on with a smile and popcorn.
* The Penguins of Madagascar keeps his log on a handheld tape recorder.
* The Penguins of Madagascar: King Julian gets into a squabble with his own brain while congratulating himself on using his muscle-enhanced naive mouse lemur henchman Mort to intimidate the other zoo animals to giving their stuff to him.
* The Penguins of Madagascar, King Julien challenges Fred the squirrel to a duel with staffs. Fred beats him without even trying, just by moving around with the staff on his shoulder.
* The Penguins of Madagascar: King Julien claims he has girlfriends in Canada, but you can trust him that they are made up... with lipstick and mascara, he means, but tastefully.
* The Penguins of Madagascar, King Julien gums up one of Kowalski's inventions, freezing time for everyone except the two of them. They basically goof around in New York until Kowalski figures out how to fix the watch.
* The Penguins of Madagascar: King Julien went to the Lost Stuff box to find something funny or entertaining. Tossing aside a bunch of dollar bills and a huge gold collar:
* The Penguins of Madagascar, King Julien wins the penguins' TV set and has Mort hold up the antenna, yelling at Mort when he gets tired and can't hold the position any longer.
* The Penguinsof Madagascar: loves these. In the episode "All Tied Up With a Boa", Burt the Elephant gets knocked out when the titular boa sends over a mouse. At the end of the episode he suddenly shows up again eager to beat up the boa properly, but everyone's already been saved.
* The Penguins of Madagascar, Mort does it in in "Friend In A Box" after drinking a lot of lemonade given to him by Kowalski and Julien. Julien remarks that he never learned "that dance." Being the king, he just goes wherever he is. Kowalski takes two steps away from Julien upon hearing that.
* The Penguins of Madagascar: one episode ended with the world buried in ice after Skipper told Kowalski to make something less dangerous like a snow cone machine. We see Skipper yelling with despair about how Kowalski "finally did it", and Kowalski then shows up and says "but you've gotta admit, these are good snow cones" after scraping some ice off the ground. Skipper's response? "right, totally worth it".
* The Penguins of Madagascar. One of the tactics to get him to vomit it out is to show him a nature documentary of leopard seals eating penguins. But while the others react accordingly, Rico actually seems to be enjoying it.
* The Penguins of Madagascar Rico is animated with a large scar that crosses his beak. It has never been explained in canon, nor do the other characters draw any attention to it, as if they don't even notice it any more. For Rico's past specifically it is a common question of exactly what happened to give him the scar, and how to make it fit in with canon.
* The Penguins of Madagascar. Rico then stops the space-time rupture by throwing the time machine into the rift, which fixes everything. The twice-temporally displaced Kowalski is left spluttering that what he just did breaks the laws of the universe, but as far as the other penguins are concerned they've solved the problem and there was plenty of law-breaking already and they go about their business.
* The Penguinsof Madagascar, Skipper and Kowalski do this a lot, particularly when annoyed or unimpressed.

* The Penguins of Madagascar Skipper calls the Hoboken zoo a "Ninth portal of Hades".
* The Penguins of Madagascar, Skipper delivers one after the penguins are stranded at sea without food and water.
* The Penguins of Madagascar, Skipper likes to play hot potato... with a live bomb.
* The Penguins of Madagascar, Skipper somehow manages to escape while simultaneously substituting Julien for himself (made even funnier by the fact that Julien wasn't even nearby when the switch happened).
* The Penguins of Madagascar, Skipper tests the others by having them go through a minefield of mouse traps to get a fish. Rico simply walks straight through, oblivious to the traps snapping on his person.
* The Penguins of Madagascar spat both Kowalski and Julien out, the two were covered in green goo and draped across each other. Julien's response to the situation is, "I will not talk of this if you don't."
* The Penguins of Madagascar special "Dr. Blowhole's Revenge", the titular villain threatens the penguins with his nearly endless supply of minions:
* The Penguins of Madagascar spit up an activated bomb thanks to Alice's medicine.
* The Penguins of Madagascar's Rico is already crazy, but when love comes into the equation...
* The Penguins of Madagascar struggles with this trope a lot. Although he generally does treat "science" as a religion, going so far as to frequently discuss his faith in it and becoming distraught if/when he feels that science has let him down. He openly scoffs at Private's imagination and belief in magic, Skipper's lack of faith in Science, and Julien's belief in Sky Spirits. For an example of Kowalski's treatment of "science" as a religion, see "Otter Things Have Happened". For examples of Kowalski scoffing at other beliefs, see "Misfortune Cookie" and "Out Of The Groove".
* The Penguins of Madagascar "Tagged," the penguins get fit with electronic tracking devices. An exchange follows:
* The Penguins of Madagascar. "That is not very interesting to me, because it is not about me. See how that works?"
* The Penguins of Madagascar, the baboons use "backwoods magic" to steal King Julien's "groove" and seal it in a jar until he gives them an apology for throwing a skunk into their pen. Julien, of course, refuses, and a fight for the jar ensues. It falls and breaks at Skipper's feet, who has remained skeptical about the whole "groove in a jar" thing until he starts dancing uncontrollably.
* The Penguins of Madagascar. The best was in "Caught In The Web" when Private was taken away by Alice...
* The Penguins of Madagascar, the chimps Mason and Phil get a female named Lulu staying in her habitat. Phil falls in love with her and asks Mason to speak on his behalf. Lulu thinks Mason is speaking of himself when he talks about his "friend", and the rest of the episode is spent trying to get her to fall in love with Phil instead, with disastrous results.
* The Penguins of Madagascar, the latter throws a party on their side. Julien tries to get in, but the gorillas stop him, saying that he's not on the list. After checking again, they find Julien on the list... of whom not to let in.
* The Penguins of Madagascar, then signaling the others to attack from the air. In the time it takes Kowalski to explain it, Private simply sneaks in and gets the jar.
* The Penguins of Madagascar: The Penguins do this to the exterminator in "Stop Bugging Me", in a technique called 'The Harder They Fall'.
* The Penguins of Madagascar the penguins use violence to solve everything from runaways to making popcorn pop. Skipper, the leader, even says in one episode, "I find reason tedious and boring. We use force."
* The Penguins of Madagascar, there are many scenes where literally every line of dialogue is a punchline. Though the target audience will only get about half of them, as the rest is for older siblings or parents.
* The Penguins of Madagascar, they had some promos for it that started as promos for other shows or a deodorant commercial, only for the penguins to suddenly freeze

it and dance on the screen, to the narrator's annoyance.
* The Penguins of Madagascar. They still call him Private; First Class is implied.
* The Penguins of Madagascar: This is Kowalski's modus operandi, seeing as he's the brains of the outfit.
* The Penguins of Madagascar. "This recording will self-destruct... right now!", and then Rico appears out of nowhere and bashes the recorder with a baseball bat.
* The Penguins of Madagascar, to the point where "Kaboom!" is one of the few intelligible words you can get out of him.
* The Penguins of Madagascar, toward the end of "I Was a Penguin Zombie," Private, Kowalski, and Rico tackle Skipper off a rooftop after they don't believe he was telling the truth about not being a zombie, as Kowalski says, "Nice try, zombie!" Then they all get a second to realize they're not on the roof before falling down and ending up at the vet with broken flippers.
* The Penguins of Madagascar: "[transitive verb] [noun]? You know who else [same action]? THE RED SQUIRREL!"

* The Pentagon itself could have been temporary. The floors were built to support floor loads of up to 150 pounds per square foot in case it was used for file storage after World War II was finished.
* The Pentagon's nuclear warfare strategy moved away from nuking tank formations some time before tanks became largely immune to these weapons, simply because herding an armour column into a nuclear killing zone is pretty impractical even if it were politically and ethically acceptable to make use of battlefield nukes.
* The Pentagon War are cold-blooded. They automatically hibernate whenever it gets too chilly.
* The Pentagon War: Centaurian metabolism is based around levulorotary glucose (instead of the dextrorotary glucose we Earth people use). Centaurian food has no nutritional value to humans, and can sometimes be downright poisonous to them — and vice-versa.
* The Pentagon War expensive bombs directly at one other from two different star systems, and detonating them simultaneously — a difficult feat even for a whole government to pull off. At the time of the story, only 5 pairs of linked hyper holes exist.
* The Pentagon War, "hyper holes" are created by detonating very expensive hyper bombs. If two hyper bombs are set off simultaneously, and pointed directly at one another, the two hyper holes will be permanenly linked and thus create a tunnel between them through parallel space. The five inhabited star systems are linked together via these hyper hole tunnels, which also form natural choke points for invasion when they go to war with each other.
* The Pentagon War, particularly Sol, rely heavily on kinetic weapons, primarily electromagnetically-launched slugs and high-speed ramming missiles.
* The Pentagon Wars is about a Real Life development project that went this way: the Bradley Fighting Vehicle started out as a pure troop transport vehicle, but as development continued it acquired more and more features of a tank.
* The Pentagon Wars The sheer lengths of obstructiveness by military bureaucrats is taken to near satirical levels, when the Army insists on creating an Office of Ruminant Procurement to determine “standards for sheep used in munitions tests” before sheep are provided for a test of the M-2 Bradley’s armor. The Air Force Colonel who wants to conduct the test, just goes and buys sheep from a local farmer.
* The Pentagon Wars. They've never thought of computers and nuclear weapons, though. The latter can, at least, be justified by the lack of large supplies of fissionable material on their homeworld, meaning the idea of nuclear chain reactions never came to them.
* The Pentagon War, the bigger asteroids in the Human-Centauri star system have space elevators to ferry cargo and passengers from the space stations to the surface. They can get away with it because the surface gravity of these asteroids is only 0.5%-1% of Earth's, so the elevator cables won't snap under their own weight.

* The People's Republic of China has no gender-based restrictions and is one of the nine countries to conscript female soldiers. Women serve in all branches of the People's Liberation Army and of the People's Armed Police, making up 7.5% and 10% of the standing force respectively. This includes elite unit like the Snow Leopard Commando Unit and the Immediate Action Unit.
* The People's Republic of China, the political philosophies of China and the Soviet Union began to diverge, with the Soviets becoming (relatively) more moderate. This culminated in 1969, when the two countries briefly fought a war with each other over a disputed island on the border. Three years later, China withdrew from the Eastern Bloc, opened relations with the United States (ironically for being the more radical government), and began fighting against/supporting enemies of Soviet-aligned countries such as Vietnam and Ethiopia; a massive turning point in the Cold War from which the Soviets never recovered.

* The Perils of Enhancegirl this happens to Enhancegirl and Korean heroine Stellar in part IV, courtesy of Arachna, who defeats, and wraps up both heroines.
* The Perils of Penelope Pitstop (1914), who was known as the Clutching Hand? Note that the Clutching Hand was "the first mystery villain to appear in a film serial", and became the template for every mystery villain in the genre.
* The Perils of Penelope Pitstop concluded with a teaser of the next episode, followed by "To Be Continued Next Week." Cartoon Network and Boomerang runs of the show omit this altogether.
* The Perils of Penelope Pitstop, "Cross Country Double Cross": The Hooded Claw cuts Penelope's parachute and notes cynically that it's falling faster than she is.
* The Perils of Penelope Pitstop episode "Big Top Trap", the Hooded Claw, disguised as Clyde ("One more clown Clyde won't be noticed"), does it by putting a mirror frame between himself and the real Clyde in the circus.
* The Perils of Penelope Pitstop episode "Carnival Calamity", after she escapes the Hooded Claw by unraveling his pants, Penelope enters the tunnel of love alone, followed by the Ant Hill Mob.
* The Perils of Penelope Pitstop, episode "Cross Country Double Cross", Penelope "borrows" a jalopy en route to the statue unveiling.
* The Perils of Penelope Pitstop episode "Hair-Raising Harness Race", Penelope takes refuge in a shack filled with explosives. The Hooded Claw lassos the shack, with Penelope still inside, and has the Bully Brothers drag it onto a railroad track.
* The Perils of Penelope Pitstop episode "Jungle Jeopardy". This works about as well as any of the Hooded Claw's schemes do.
* The Perils of Penelope Pitstop episode "London Town Treachery": After Penelope is kidnapped, Pockets blows up a balloon with his breath and it floats up into the air for use as an observation balloon.
* The Perils of Penelope Pitstop episode "London Town Treachery", the armored Ant Hill Mobsters are similarly canned, with their faces on the labels.
* The Perils of Penelope Pitstop episode "The Boardwalk Booby Trap" has Penelope trapped in a phone booth headed for a fish cannery, so she calls the Ant Hill Mob

(Pockets answers with a phone in his jacket) which leads to the "You don't say!/She didn't say" gag. Clyde tells Zippy to trace the call to see where Penelope is. Zippy does so by entering the phone itself and traversing the phone line to Penelope's booth.
* The Perils of Penelope Pitstop episode "The Boardwalk Booby Trap", Pockets throws water on Snoozy when the latter is driving Chugga-Boom erratically.
* The Perils of Penelope Pitstop episode "The Boardwalk Booby Trap", the Ant Hill Mob are burying Penelope in the sand. They soon become aware that the Bully Brothers are about to run over her with a steamroller.
* The Perils of Penelope Pitstop episode "The Boardwalk Booby Trap", the Hooded Claw gets rid of the Ant Hill Mob by giving them helium balloons that cause them to float away.
* The Perils of Penelope Pitstop episode "The Boardwalk Booby Trap", Zippy went through the telephone lines from Pockets' phone to the phone booth in which Penelope was imprisoned.
* The Perils of Penelope Pitstop episode "The Terrible Trolley Trap", when the Ant Hill Mob search for Penelope on the Hooded Claw's steamship.
* The Perils of Penelope Pitstop finale "London Town Treachery" has the Ant Hill Mob turned into miniature Mr. Hydes after drinking a tea that the Hooded Claw spiked with a Jekyll-Hyde formula. The Mob puts Penelope in a Claw-type death trap and the Claw subsequently tells his henchman the Bully Brothers they won't be needed anymore. The Bully Brothers have no recourse but to rescue Penelope to save their jobs.
* The Perils of Penelope Pitstop had the Ant Hill Mob, always formally dressed and carrying Tommy Guns like the good little stereotypical mobsters they were.
* The Perils of Penelope Pitstop. In "Jungle Jeopardy" Penelope used her scarf as a parachute after jumping from a plane.
* The Perils of Penelope Pitstop: In "Jungle Jeopardy," the Ant Hill Mob and their car Chuggaboom get buried under an avalanche of coconuts after Chuggaboom backs into a palm tree.
* The Perils of Penelope Pitstop: In "London Town Treachery", the Hooded Claw captures Penelope and attempts to kill her using a pendulum that swings lower and lower.
* The Perils of Penelope Pitstop in the episodes "Tall Timber Treachery" and "Cross Country Double Cross".
* The Perils of Penelope Pitstop: In "The Terrible Trolley Trap", Penelope is afloat in a sealed room that the Hooded Claw fills with water. While the water rises, the Ant Hill Mob search the ship for her. Just as Penelope is near the harpoon on the ceiling, the mobsters open the door and release all the water.
* The Perils of Penelope Pitstop: In "The Treacherous Movie Lot Plot", Zippy catches the other mobsters in his plane as the mechanical ape destroys the other planes.
* The Perils of Penelope Pitstop; it always took at least three minutes, and it would either reveal a flaw in the design to her or give her some time to either free herself or get saved by the Ant Hill Mob. Subverted in several episodes, in which the Hooded Claw admits he enjoys setting up and explaining his death traps so much that he really isn't very interested in whether or not Penelope manages to escape: if she dies, he inherits the fortune, and if she escapes, he gets to set up another death trap, so for him, it's a win-win situation.

* The Perils of Penelope Pitstop or his distinct facial features (most notably his big nose).
* The Perils of Penelope Pitstop, Penelope has been known to do this on a couple of occasions.
* The Perils of Penelope Pitstop: Penelope Pitstop is almost as tall as Sylvester Sneekly/the Hooded Claw.
* The Perils of Penelope Pitstop: Penelope Pitstop often uses animals to escape her perils.

* The Perils of Penelope Pitstop, Penelope uses her scarf as a parachute after her airplane falls apart in flight.
* The Perils of Penelope Pitstop, the Ant Hill Mob buried Penelope in the sand at the beach. Unknown to any of them, the Hooded Claw had mixed cement into the sand, hoping that the Bully Brothers would flatten Penelope with a steamroller.
* The Perils of Penelope Pitstop, the Ant Hill Mob needed to enter a pyramid, but Pockets produced everything except a battering ram.
* The Perils of Penelope Pitstop, the Ant Hill Mob will split up in an attempt to locate where the Hooded Claw has taken Penelope.
* The Perils of Penelope Pitstop. The cannonballs were an interesting addition, though.
* The Perils of Penelope Pitstop the game show uses this sometimes if H.C. made Penelope go missing instead of killing her.
* The Perils of Penelope Pitstop: The Hooded Claw does this when Penelope escapes from one of his death traps or the Ant Hill Mob rescues her.
* The Perils of Penelope Pitstop, the Hooded Claw eats popcorn while watching Penelope get wrapped up like a mummy.
* The Perils of Penelope Pitstop to her, which either gives her information she needs to escape from it or gives her - or the Ant Hill Mob - time to do so. (And he never learned.)
* The Perils of Penelope Pitstop, whenever any sport is mentioned, Penelope claims to have excelled in it.
* The Perils of Penelope Pitstop, when the heroes are on a roller coaster descending toward the ocean, Dum Dum pulls this gag when Clyde says, "Give me the steering wheel. … On second thought, you can have it back!"
* The Perils of Penelope, the truth turns out to be that there's an ancient religious cult in the Triangle that abducts people to brainwash them.

* The Periodic Table of Videos, the cast was asked to contribute chemicals that invoked Valentine's Day to them for use in a perfume. Most went with chemicals that are responsible for smells they like, such as vanillin, but a couple others included chemicals that merely had personal meaning to them. At the end, the director/editor popped up a fake advertisement for the finished perfume, with a footnote at the end.
* the period towards the mid-to-late 80s where the BBC's Controller Michael Grade cut the show's budget to purposefully unsustainable levels in an intent to kill it;
* The Peripheral by William Gibson. One half of the story takes place in the future, after "The Jackpot" wiped out a large chunk of humanity, with the survivors — largely rich folks — rebuilding after. A character in the present asks what "The Jackpot" was, and her future contact person eventually explains that it wasn't a singular apocalyptic event so much as various economic, environmental and sociopolitical trends and smaller events (the assassination of the U.S. president, for example) over the course of several decades of decline.
* The peripheral, sympathetic and parasympathetic nervous systems and other parts of the unconscious brain react to situations significantly faster than the

conscious brain can even tell what's happening, let alone respond. Usually the few milliseconds of delay are imperceptible, but during extreme danger or skilled competition that puts instinct behind the wheel, one may feel as if they're reliving something that has already happened in which they knew exactly what to do. In fact, a study on decision making proved that the brain activity associated with committing to an action might occur up to several seconds before a person is conscious of the fact that they've decided anything.
* The Perishers, as drawn by Dennis Collins in its heyday, had highly detailed background art. While not exactly beautiful — the strip was set in a fairly mundane British suburb — it's still pretty impressive.
* The Perishers, at least in the 1960s. On one occasion he pretended to be depressed and then stood in his rhubarb patch so the cloud would water it (as well as him).
* The Perishers believes himself to be an 18th century Lord transformed into a dog by a vengeful gypsy.
* The Perishers characters — Old Boot is very similar to Snoopy, and Maisie is virtually a clone of Lucy van Pelt, with her younger brother Baby Grumpling having several of Linus's traits.
* The Perishers confesses to playing with this trope after noticing that he invariably came into possession of things resembling things he had recently introduced into the comic. This was his entire motivation in creating the character of Fiscal Yere, an incredibly rich child. It didn't work.
* The Perishers for new readers which says that "established readers (bless you both)" may skip it.
* The Perishers had a crab being arrested and told "anything you say will be taken down" to which he quickly designated a person and an item of clothing.
* The Perishers had Marlon, the keen but not-very-bright kid, who on one occasion took up inventing for a hobby. When his friends pointed out that his inventions (fire, the wheel and the horse and cart) had all been invented by other people, he wasn't worried because he invented them quicker and was therefore catching up.
* The Perishers is an orphan who lives with his dog in an abandoned railway station. Somehow they seem to get along fine without attracting any attention from the authorities.
* The Perishers Marlon is firmly convinced his soapbox cart goes faster with a red stripe on it. At one point, he tells his "mechanic", Wellington, that it needs a thicker stripe.
* The Perishers strip had Maisie being chased by Wellington with a water pistol. Maisie asked Marlon for help, only to have Wellington squirt the gun into Marlon's ear, straight through his head, into Maisie's face. Marlon, of course, hardly noticed.
* The Perishers strip had Wellington asking Maisie to inspect the end of a hose while he went to adjust the "hydro control valve".
* The Perishers, Wellington is an orphan who lives with his dog Boot, initially in a large concrete pipe in an abandoned factory yard, later in a closed railway station. It's never explained how the two of them survive, but the implication is that they live on handouts from Wellington's friends, plus Boot's theft of the occasional string of sausages.
* The Perishers when Marlon is eating a sandwich that sprays the contents everywhere. Wellington shouts for people to duck and Marlon accuses Wellington of trying to fool him because there are no ducks.
* The Perishers, where one of the titular kids noticed that they never seemed to get any older from year to year and concluded that "something funny's going on!"
* The Perishers worshiping "The Eyeballs In The Sky" (which appear on an annual basis) complete with its own skeptic movement trying to disprove their existence scientifically. The Eyeballs do, in fact exist: they belong to Boot the dog who goes along with Wellington and the other kids to the seaside on their annual holiday.
* The Perishers would have been quite within their rights to hire another writer, because no-one else could possibly write it.

* The Perks of Being a Wallflower, as does its movie adaptation (see above).
* The Perks of Being a Wallflower brushes them off, and the scene closes with them passionately kissing, leaving it ambiguous if they had sex or not.
* The Perks of Being a Wallflower is a sort of blander interpretation of this trope, probably to balance out the socially awkward recipient of her mania, Charlie.
* The Perks of Being a Wallflower — if you're struggling to fit in, hang out with much older kids, drink alcohol and take drugs.
* The Perks of Being a Wallflower. Sam and Patrick are initially mistaken for a couple by Charlie as they are so comfortable around each other, but they laugh when he asks how long they've been together and reveal that they're step siblings. Not only that, but Patrick is gay as well.
* The Perks of Being a Wallflower, this plays out just like in the novel (see below).
* The Perks of Being a Wallflower throughout the book, with Charlie having a crush on Sam that may or may not be reciprocated, and the mix tape is one of many gestures by Sam that signals possible interest on her part.
* The Perks of Being a Wallflower was written and directed by Stephen Chbosky, who wrote the original novel.
* The Perks of Being a Wallflower (who identifies as genderqueer and pansexual) plays the gay Patrick.
* The Perl programming language has the "unless" keyword to test for the false value of a condition. This may occasionally lead to convoluted looking code; the book "Programming Perl" written by the language's main creator notes that to avert this trope the "unless" test can't use the "else" keyword to create an alternate branch of the test.

* The Perseus Attraction: Luke Castellan. Luke was originally intended to become the main antagonist, and Percy's rival for Annabeth. However, the breakout of his first real appearance (doing squats in a sword class listening to Noah and the Whale and Katy Perry) quickly gained him recognition among the reviewers. He further solidified his position by making stupid dream appearances with Kronsis throughout the first season, and then when he saved the entire Perseus Attraction main cast by recreating The Princess Bride (as the 'Man in Pink.) By season 3, which covers The Titan's Curse, Luke appears tag teaming the sky with Annabeth, even though he should have no part in the story at all at all, in a typically 'Luke' fashion, making him all but untouchable as the Breakout.

* The person who arranged for their burial was a beneficent stranger, and they must make return for this good deed. This type is the original "grateful dead".
* The person who comes closest to being a Drill Sergeant Nasty is Vita, she doesn't yell at the new kids (barring that one time Teana almost caused a friendly-fire incident) but isn't as gentle or warm as Nanoha or Fate. She is actually playing this trope straight because while being cold and a bit unfriendly she really does have the kids' best interest in mind all the time. This trope is even discussed by her when she discusses with Nanoha why they are not stricter with the new cadets. Nanoha's reply is that the cadets are not unskilled amateurs but capable young soldiers who want to develop their abilities and that if there is enough time to yell at them it means there is enough time to teach them a little more by beating them in the Mock Battles.

* The Pet Girl of Sakurasou remains loyal to his childhood friend Misaki, but becomes this instead as he feels unworthy of her.
* The Pet Girl of Sakurasou. She may have a chance for Sorata prior to Mashiro's appearance, but after that, she falls right into this trope.
* The Pet Girl of Sakurasou, Sorata and Mashiro (well, mostly Sorata) confront Jin on the school roof for refusing to return Misaki's feelings, even though he's admitted he likes her. Things get heated enough that they come to blows, though Sorata is no match for Jin. He wasn't actually trying to win, just to buy enough time for Nanami and Misaki to get there before Jin left.
* The Pet Girl of Sakurasou Sorata... before telling him she just wants him to model for her.
* The Pet Girl of Sakurasou Sorata has many chances to say the line making this trope.
* The Pet Girl of Sakurasou. Sorata is assigned to be her caretaker, since she can't take care of herself.
* The Pet Girl of Sakurasou's room in this state after the first night moving in there.
* The Pet Girl of Sakurasou, there's Rita and Maid-chan, who get into little arguments with each other over Ryuunosuke.
* The Pet Girl of Sakurasou, when he overhears a couple of boys mention having sex with her, he immediately starts a fight with all three of them.
* The Pet Girl of Sakurasou. When Sorata looks at the manga Mashiro was making, he finds out it's about his situation with her, except with the gender roles reversed. The editor tells him that the ending where the girl leaves is depressing, and suggested Mashiro revise it. When he goes to her room later, he finds her napping after working on a revised ending, where the girl decides that she wants to stay, and he begins to realize that he doesn't want to leave Sakura Hall after all.
* The Pet Girl of Sakurasou who spent most of her childhood in the UK, thinks nothing of putting knocked-out Sorata in her lap.
* the pet rabbit about acceptance and the power of democracy, as well as all of the proceeds going to gay charities. While they both entered the bestseller's list on Amazon, John Oliver's won out by selling more copies (even reaching the #1 spot) and gaining way more positive reviews.
* The Petriculture Cycle, an immortal, talks her into it by, among other things, refers to a saying common among Alicorns: "Mortals pass away eventually, but an immortal doesn't leave until they're ready to go."
* The Petriculture Cycle of requirements: "venti two-thirds decaf low-fat soy caramel macchiato with whipped cream, mocha sprinkles, and a sprig of hay. And a cranberry orange-peel scone."
* The Petriculture Cycle provides an example when Twilight finally gets pissed off:
* The Petriculture Cycle sense of humor, so the only way Discord will win the game is if he stops thinking about himself and considers what Penumbra likes.
* The Petriculture Cycle: The whole story pretty much consists of this trope, because it's about Twilight investigating a strange story and a mystery.
* The Petriculture Cycle, to Discord's dismay, several "ingenious" jokes of his were already done by Trixie and Twilight in the previous story, "π".
* The Petri Dish and ends up shrinking into a microscopic world. When he comes back, the microbes have grown with him, but they shrink back.
* The Petri Dish: A story arc features an alternate universe in which the super-intelligent squirrels have taken over civilization because a virus has killed half the human population and rendered the other half stupid and mute like monkeys.
* The Petri Dish, Dr. Thaddeus Euphemism discovers a secret organization of potatoes called the Tubernati, but they turn out to just be a dream of his.
* The Petri Dish, Dr. Thaddeus Euphemism drinks Coca-Cola with a human-sized Coke can behind him. Bob says, "So we're making money with not-so-subtle product placements now?". The next strip reveals that it was their boss Gordon Noble's idea and it was indeed an idea to make money.

* The Petri Dish: Even though he abducts Thaddeus, Gwog is actually pretty comical. His species doesn't have a nudity taboo and he thinks people at Comic Con are freaks despite looking weird himself. His pet is also comical, insisting that he's not his pet and it's a "symbiotic relationship".
* The Petri Dish features Bob who is mainly a robot but has a brain, digestive system, and urinary system, Irene who is another robot with a brain, and iBall who is a robot with a whale's eye.
* The Petri Dish, Gwog the alien doesn't mind wandering around naked, which Thaddeus is skeeved out by.
* The Petri Dish has created a giant fly and several giant (talking) bees.
* The Petri Dish has one strip where Gordon throws an office Christmas party, but pretends it's for no reason. This is because various employees of different religions complained at not getting parties for their celebrations, but he couldn't afford to throw a party for all of them.
* The Petri Dish. He is reminded of the game by the presence of candy and his boss, Gordon, exclaiming, "Juicy!".
* The Petri Dish, however, he's outright evil. Justified as it's implied he lives in a parallel universe from the canon Thaddeus.
* The Petri Dish is technically Gwog's pet but insists it's a symbiotic relationship.
* The Petri Dish: One strip has Thaddeus craving pie after doing many calculations involving pi.
* The Petri Dish, one strip has Thaddeus Euphemism's age said to be thirty-seven, but another strip has Bob point out that he's turning forty. So either, three years have passed in-universe, Bob got Thaddeus's age wrong, or "turning forty" means he's simply close to forty.
* The Petri Dish, Thaddeus Euphemism calls his coworker a "wussy chowderhead" in one strip and cats "buttheads" in another.
* The Petri Dish, there's a panel that has Betty telling Thaddeus, her son, that she will "take [him] over [her] knee". In context, you know she's just making a joke because he's an adult and too big to fit on her knee.
* The Petri Dish. They don't have a nudity taboo but usually wear clothes anyway. Gwog's pet wears only a collar.
* The pets available to rent include a chimera with lion and pit bull features.
* The Pets.Com commercial mascot, a talking sock puppet dog, managed to outlive the very company he was invented to advertise and now hawks, of all things, cheap car loans.
* The Pets.com sock puppet dog. Most notable for claiming copyright infringement on
* The Pets.com sock puppet suddenly disappeared along with the company in November 2000. Two years later, 1-800 Bar None got the rights to use him in their commercials.
* The pets have actually started to make this a standard technique of theirs starting in Season 2, usually so that one of them (usually Russell) could get at eye level with Blythe.
* The "Pets Rock" line of photographic art, which depicts cats and dogs with the clothing and hairstyles of celebrities (mostly musicians, if not originally).
* The Peugeot 309 was originally going to be sold as the Talbot Arizona, but the cancellation of the Talbot brand led to the change.
* The Pevensies had a rather severe case of this trope. Their home is being bombed, and they're living with a stranger to get away from the fighting. They've stumbled upon another world, and Lucy's friend there has been kidnapped. They then find out that they're part of an ancient prophecy that involves going back into a warzone. Their first response is essentially a cheery,

* The Phantom (1943): Byron, Diana's love interest in the expedition, gets handed one near the end, revealing that he's only in it for a cut of the lost treasure, and selling out to the bad guys after Professor Davidson points out that if the expedition finds any treasure it will probably go into a museum.
* The Phantom (1943), Geoffrey Prescott resigns from Professor Davidson's archeological team to take up the heroic mantle of the Phantom, in which role he is called upon to assist Professor Davidson's team. His body language is not much difference when he's being the Phantom, and his mask leaves most of his face clearly visible, but with one exception nobody on the team shows any sign of recognizing him. Diana remarks after her first meeting with the Phantom that he "reminds me of someone we all know, but I just can't place him"; after she's met him a few more times, they have a conversation in which she clearly suspects who he is and offers him several openings to admit it, but he dodges the question and the subject is not raised again.
* The Phantom (1943): Near the end, two of the villain's henchmen are stranded in the jungle, and one is injured. The uninjured man decides to abandon him to die in order to increase his own chances of survival — only to get shot and killed by the man he's abandoning as he walks away.
* The Phantom (1943): One of the villain's tricks for gaining control of the natives is to hire a showgirl to impersonate the legendary Fire Princess who is said to have once led one of the tribes to greatness.
* The Phantom (1943): One of the ways the Phantom maintains the natives' belief that he is an immortal supernatural being is by using a smoke in and a smoke out whenever he summons them for an audience. An accomplice is shown handling the creation of the smoke.
* The Phantom (1996) Quill has a scar on his cheek in the shape of the Phantom's skull ring, from where the previous Phantom punched him.
* The Phantom (1996) Quill killed the 20th Phantom and took his belt as a trophy. The 21st Phantom beats Quill and takes it back.
* The Phantom (1996), the Devil's Vortex is a serial-numbers-filed-off version of the Bermuda Triangle, a region of ocean that has a reputation for ships disappearing in it; this turns out to be because the home base of the Sengh Brotherhood is in the middle of it, and they take strong measures against anybody who gets too close.
* The Phantom (1996), the Phantom's body language hardly changes when he's being Kit Walker, and his voice not at all; despite this, nobody seems to realise that they're the same person even after encountering both of them in quick succession, though Diana does eventually admit to having figured it out. Diana figuring out the Phantom's secret identity is foreshadowed in the scene at the newspaper office where Kit talks and poses exactly like the Phantom did just a few scenes earlier,

before realizing what he's doing and breaking the pose.
* The Phantom Affair), a superweapon known as the gravitic polarizing device made the enemy ships and a portion of the asteroid belt ringing a planet simply disappear, with one of the startled pilots saying that it looked like a wormhole had opened up.
* The Phantom Affair, Wedge Antilles is shocked twice by some electrified bars. Both times, afterward he's obviously limp and in pain, but manages to drag himself to his feet in both cases, and then escape to fly combat.
* The Phantom among the Waghi that some warriors began painting the Phantom's face on their shields as a symbol of good luck.
* The Phantom, and goes with it since crime-fighting's easier when criminals are terrified of you. He slinks towards the cockpit, seriously thanking his lucky stars keeping still worked and all he has to do is land a plane with a severe chest wound.
* The Phantom because the mantle of the Phantom is passed down from father to son in an unbroken line dating back to the 1500s. This was so creator Lee Falk could do stories involving Pirates, Mobsters, and everything in between. The sheer depth of history and number of Phantoms (over twenty in the 1930s alone, with some writers attempting to continue the history into the present day) marks him as possibly the best example.
* The Phantom Blot is even worse, since he wants to destroy magic and magic users.
* The Phantom Blot is possibly the most famous, who, in American stories, puts

* The Phantom film serial, there's a rope bridge over a deep gorge that a gang of gun-runners need to transport their cargo across. * The Phantom for his son. He doesn't so much mind having been murdered by the dragon — it's an occupational hazard — but he can't rest easy until he knows the Phantom line has been secured for another generation.
* The Phantom for more details). One of these had the culprit give himself away by referring to the banana as a fruit. Even though banana trees are herbaceous plants, a banana is biologically considered a fruit. Even when using the culinary term for fruits (which is probably the term most people outside of the fields of biology, botany, and horticulture are familiar with), this still doesn't exactly excuse the conviction, as the banana is one of the most classic examples of a "Culinary Fruit." (For a more specific description, a culinary fruit is any edible fruit that is sweet. Biologically, a fruit is a plant structure that contains seeds. This is why things like tomatoes, peppers, eggplant, and cucumbers are classified as fruits by botanists, but not by chefs.)

* The Phantom further accenting his vanity and basic sloth. Though he appears threatening, it's all an act —- he's essentially a spoiled cowardly bully with a lot of brain-dead (but heavily armed) henchmen.
* The Phantom game console has earned numerous vaporware awards and frequent comments on its auspicious name (as if the entire thing was a practical joke on a massive scale). First announced in 2002 (when its download-only sales model seemed
* The Phantom gets his own back at the show's climax, when Christine rips off his mask mid-song.
* The Phantom: Go ahead, try to kill him. You might succeed, it won't help.
* The Phantom had a few pages of reader-submitted letters and material for a long time; one mainstay was various whodunnits, of course concocted by one of the readers. One whodunnit was a murder taking place in Germany, and one suspect claimed to have been in the woods picking berries at the time, while the other said he had been at the movies seeing a Bond movie, and remarked on Bond's funny German accent. While the readers were supposed to suspect the latter (Bond is German?), certain little-known cultural traits were at work—movies are always dubbed over with German speech in Germany, whereas picking berries in wooded areas you don't own counts as theft and/or trespassing, in contrast to Swedish law which allows it.
* The Phantom had Warner Bros Movie World on Queensland's Gold Coast and the city of Brisbane doubling for various US locations.
* The Phantom has the children, Kit and Heloise, unearth a treasure chest. When opened, the contents are found to be common kitchen spices. At the time the chest was buried, however, such spices were uncommon, and often as valuable as gold.
* The Phantom has the Singh Brotherhood in particular and pirates in general. Inevitably, since the mantle of the Phantom was created in the first place with the goal of combating piracy by someone who had lost his entire family to them.
* The Phantom has two calling cards, both in the form of rings. He wears a ring with a skull emblem on his right hand, which leaves a permanent skull-imprint on the faces of his enemies when he punches them hard enough, forever branding them as the Phantom's enemies. On his left hand, he wears a ring with a symbol of four 'P's in a circle. By pressing the dye-emitting ring into the hand of an ally, he leaves the four-P emblem as a permanent mark on their skin, a sign to the world that they are protected by the Phantom.
* The Phantom Head-Shaver, it turns out to be announcer Wallace Greenslade.
* The Phantom Hitchhiker a very common urban legend in several parts of the states, but the stories do seem to center around Chicago, where she is affectionately known as Resurrection Mary - from Resurrection Cemetery, where the final scene of the story takes place. A girl would be found on the side of a road; a friendly man (it's usually a man) would offer her a ride and take her to an address. Usually he turns around and she's gone, leaving a wet seat. Some stories follow up by having the man go to the address and learn that the girl has been dead for years (usually her death is reported as a traffic accident). Sometimes he visits her grave and finds the coat he lent her draped neatly over the headstone. In one particularly grisly variant, he actually digs up the grave, and finds the girl's remains wrapped in his coat.
* The Phantom inspired villain Hack Jack, who gets trapped in the sewers while fleeing the current Phantom, and is devoured by a horde of rats. His remains aren't found until weeks later.
* The Phantom is characters telling "Mr. Walker" that he can't bring a dog into places, and him blithely responding that that's okay, because Devil's a wolf.
* The Phantom is one of the biggest, and most famous, offenders. A single story arc, told daily, may take up to a year to tell, and this isn't including the unrelated Sunday strips.
* The Phantom is that the title is passed from father to son through generations, inspiring the legend that the Phantom is immortal.
* The Phantom, it seemed that nearly every story had Diana Palmer kidnapped and tied and gagged by an assortment of villains.

* The Phantom Killer of Texarkana Moonlight Murders fame was a serial killer that operated from February 22nd 1946 to May 3rd 1946. His MO was very similar to the Zodiac Killer as he enjoyed killing couples at night with a pistol, he has to this day never been identified. He reportedly wore an improvised mask which was a simple sack fastened in place by tying a cord around his neck; his actual mask included a mouth hole but his film counterpart in

* The Phantom likes to let others try to punch him and take it without flinching before punching the other guy across the room. It works even with men who look as buff as himself and are noted for being especially strong.
* The Phantom Lord Arc focuses on Fairy Tail going to war with Phantom Lord, a rival guild who
* The Phantom Major", slammed the poor fellow's office door closed again, and was several strides down the corridor when the grenade detonated.
* The Phantom, many baddies sport bald pates. In General Tara's case, it is possible that the baldness is a choice to indicate virility, since he augments his intimidating dome with a large bushy handlebar moustache (gleamingly waxed) and matching goatee. To indicate his self-indulgent lifestyle, the fat buffoons in the Phantom strips (Tara included) always carry an extra bulge of flab at the base of their shiny skulls.
* The Phantom Menace, “I have a bad feeling about this” is young Obi-Wan Kenobi's very first line, unknowingly sensing the involvement of the Sith in the events that are upon them. Cue Qui-Gon giving him a lecture on keeping his thoughts in the here and now. A bit later on, after Boss Nass sends the clumsy exile Jar-Jar Binks on his way with Qui-Gon and Obi-Wan, he says this to himself as he's being uncuffed:
* The Phantom Menace: "A communications disruption could mean only one thing: invasion." - Governor Sio Bibble.
* The Phantom Menace: Anakin gives Padme a necklace he carved as a kind of inversion.
* The Phantom Menace, Anakin learns that his mother, Shmi, was bought by moisture farmer Cliegg Lars, who immediately freed and married her.
* The Phantom Menace, Anakin Skywalker built a functioning humanoid robot with full human-like AI, and what must have been a super-sonic racer, all on a son-of-a-slave's budget before his voice broke. To be fair, his owner was a droid and starship/podracer/what-have-you salesman, so while's pretty damn smart to make these things as a kid, it's not like he made them out of random parts.
* The Phantom Menace, Anakin's mother gives him the strength to leave Tatooine by telling him not to look back at her.
* The Phantom Menace, Anakin takes out a couple of battle droids that were standing next to his thrusters.
* The Phantom Menace, Anakin tells us that explosive implants helped keep the slaves from running away.
* The Phantom Menace and destroy what they think is the new droid control ship—but the droid army only shuts down for a few seconds before reactivating, revealing the bad guys added redundant control systems specifically to prevent that strategy from working again.
* The Phantom Menace, and exactly as dangerous as that sounds. The film itself shows that podracing is obscenely dangerous (hence why there must be something different about Anakin for him to be so good at it), and at least one pod just explodes on the starting line. Roughly a minute after everyone else had already started racing.
* The Phantom Menace animated series avert this, as he is given more lines in those series. Anakin's mother, Shmi, also counts, as she only gets a rather small handful of lines in the movie.
* The Phantom Menace background and minor characters are aliens in the prequels.
* The Phantom Menace became the lowest rated movie in the main series on Rotten Tomatoes, but fans still turned out in droves to see them.

* The Phantom Menace been over 20 years and the protocol droid didn't have his iconic gold finish when he left their service.
* The Phantom Menace, but the main characters survive with only minor incident.
* The Phantom Menace causes Force sensitivity (which also resolves the issue of why there are so few Jedi even at the height of the Old Republic).
* The Phantom Menace could have used a lot more of this. It did have at least one instance however, Little Annie and Sebulba.
* The Phantom Menace: Expect Darth Maul to be more handsome and muscular in any fan art.
* The Phantom Menace fans, saying that they are normal people despite all the things they like to do, one of which is "Camp out in theaters before the big day"
* The Phantom Menace, featuring R2-D2 (with several others, which were all destroyed) fixing Padme Amidala's escape ship midflight while she's trying to run the Naboo blockade.
* The Phantom Menace flies inside the control ship and shoots up enough things that the whole thing starts to explode - none of which are aware of any of the others.
* The Phantom Menace follows a similar motif, from the Jedi to Jar Jar to the Queen to Anakin.
* The Phantom Menace: Force speed, Force push (offensive variant of telekinesis), Force-induced pregnancy (Anakin's parentage)
* The Phantom Menace for most of the film, Darth Maul's hood hides his horns.
* The Phantom Menace for someone who's supposedly human. Turns out he's a Dathomirian (a crossbreed of a Human mother and a Zabrak father).
* The Phantom Menace gives us 9-year-old Anakin and 14-year-old Padme. This, of course, gets reciprocated; but not until he's much older.
* The Phantom Menace had Qui-Gon deliver one of these, presumably to Anakin:
* The Phantom Menace has dialogue that consists entirely of exposition such as "That little droid did it, he bypassed the main power drive!"
* The Phantom Menace has the player engage in a series of trades to get enough cash to pay Watto in Mos Eisley.
* The Phantom Menace has the space-ground battle of Naboo, interchanging between the Trade Federation's clash against the Gungans; Padme's attack on the palace; the lightsaber fight between Qui-Gon, Obi-Wan and Darth Maul; and the attack on the Trade Federation command ship.
* The Phantom Menace hero in the end battle rather than bumbling his way into victory).
* The Phantom Menace he volunteers to race in the Boonta Eve Classic podrace so that they could get the prize money. When his mother objects, Anakin reminds Shmi of her belief that people need to help one another, convincing her to allow Anakin to race for Qui-Gon Jinn. The boy has shaggy blonde hair.
* The Phantom Menace, however, he's been forced to replace his lower body with a pair of mechanical legs after Obi-Wan sliced him in half and left him for dead, qualifying him for this trope.
* The Phantom Menace: In a bet with Watto, Qui-Gon Jinn uses the Force to make a die roll the result he wants. To be fair, the game was already rigged in Watto's favor.
* The Phantom Menace: In the climax the Naboo starfighter fleet attacks The Trade Federation battleship and the rest of the heroes take back Naboo Palace.
* The Phantom Menace is a triumphal parade through the streets of Theed (the capital city of Naboo) accompanied by a musical extravaganza that combines the three incongruous elements of ancient Roman victory march music, a performance by the Gungans (very reminiscent of Australian Aboriginal didgeridoo music), and a pseudo-African chant. Surprisingly, they all blend together well.
* The Phantom Menace is podracing!" as he does so. There is an additional shot of a squad of battle droids failing at this.
* The Phantom Menace, Jar-Jar Binks, out of curiosity, attempts to eat a Gorg. Gragra then informed him that the meal costs seven wupiupi if he's going to eat it. Jar-Jar then ends up spitting it out in shock at the cost. This only gets him into further trouble than before, as the Gorg he spat out lands in Sebulba's soup,

ruining it, and thus results in a very angry Sebulba attacking Jar-Jar in retaliation before Anakin breaks the fight up.
* The Phantom Menace Jedi named Quinlan Vos. He could have helped Qui-Gon and company, but he was infiltrating something or other and assumed the same of the other Jedi.
* The Phantom Menace Naboo starfighter into the Trade Federation's central droid command ship, and hits something inside with a "lucky" shot that ultimately causes it to explode. The Force is with him, bigtime. Likewise, the podracing sequence constantly veers into this territory, particularly the cave segment and near the end - with close racing in a relatively slim and craggy canyon.
* The Phantom Menace, Nute Gunray shouts "This is impossible!" as Qui-Gon melts the blast doors to the bridge of the droid control ship.
* The Phantom Menace, Obi-Wan Kenobi is promoted from Padawan to Jedi Knight without facing the trials after defeating Darth Maul single-handedly.
* The Phantom Menace, Obi-wan tells his master Qui-gon Jinn that he would already be on the Jedi High Council if he would just stop arguing with them. Qui-gon doesn't mind since he prefers following his own interpretation of the will of the Force.
* The Phantom Menace of battle droids. The kid-friendliness goes away a little when you reflect they still scream as they die.
* The Phantom Menace, one of the Jedi Council members, Yarael Poof, has a very long neck.
* The Phantom Menace. One of them is Watto. His obsession with money and gambling, big nose, and vaguely Yiddish accent are all aspects of the stereotype.
* The Phantom Menace: Palpatine suggests apathetic politicians rule the Republic with Chancellor Valorum as their puppet, and they are the reason that rather than doing anything about the Naboo situation, the Senate has merely had meetings.
* The Phantom Menace: Queen Amidala traveled with a host of decoys for security purposes, it seems. What makes her an example of the trope is that she's always disguised as one of her own attendants, as opposed to moving completely behind the scenes. Qui-Gon knows handmaiden Padmé is the queen, and takes every opportunity to rile her up when mentioning how the queen will approve of his choices.
* The Phantom Menace. Queen Padmé's planet is under attack so she pleads her people's case to Chancellor Valorum and the Galactic Senate, goes home and leads the charge to take back her planet while Anakin merely follows and then accidentally saves the Gungans.
* The Phantom Menace queen who wears a lot of ceremonial makeup and elaborate costumes, apparently to disguise the fact that she's so young. Even still, she's actually the elected leader, so the people must be well aware of her age.
* The Phantom Menace, Qui-Gon and Anakin are inexplicably running, with Anakin complaining that he's tired no less, right before Darth Maul shows up and starts dueling Qui-Gon. In the final film, there's no explanation for why they weren't just walking at a normal pace, but there's a deleted scene in which they encountered one of Darth Maul's probe droids and started running.
* The Phantom Menace. Qui-Gon Jinn and Obi-Wan Kenobi arrive in the Naboo capital city at the same time and place that the Queen and her entourage are being moved by their combat droid guards, allowing the two Jedi to rescue them.
* The Phantom Menace, Qui-Gon Jinn makes a bet with Watto that if Anakin wins the podrace, then Watto must give Anakin to Qui-Gon. When Anakin wins, Qui-Gon immediately frees him and takes him to the Jedi Academy.
* The Phantom Menace Qui-Gon Jinn was also a master of Ataru. He met his end when the fight against Darth Maul led him into a confined space which didn't leave much room for maneuverability.
* The Phantom Menace: Qui-Gon would rather pretend that he's being guided by the ineffable, infallible Force than admit to Queen Amidala that he's making a desperate gamble because he's run out of alternatives. He also neglects the obvious path of trading the disabled ship for a smaller working one, or just finding someone willing to do a currency exchange.

* The Phantom Menace races on locations taken seriously by high-level Podracers that he achieves status comparable to celebrity champion Sebulba. He is still incredibly meek and timid off the racetracks though.
* The Phantom Menace reveals C-3PO was originally built by Luke's father Anakin, making them brothers in a manner of speaking.
* The Phantom Menace's 6'4" height without making the wise mentor figure look ridiculously oversized in some of the confined spaces.
* The Phantom Menace, Sebulba "always wins" the pod-race. His pod is very fast and he uses dirty tactics like tossing wrenches into the other racers' engines.
* The Phantom Menace she is seen being commanding to her enemies and humble toward her allies.
* The Phantom Menace. She's a refined, dignified noblewoman who prefers negotiation and discussion but is a dead shot with a blaster when she needs to be.
* The Phantom Menace shows the sport of podracing: like a chariot race with jet engines instead of horses.
* The Phantom Menace starts with the Trade Federation invading Naboo and taking over Amidala's palace as well.
* The Phantom Menace suggests that "midichlorian" is a collective term for mitochondria and plastids.
* The Phantom Menace Supposedly, even their own mothers couldn't tell them apart with the makeup on.
* The Phantom Menace takes place around ten years later and he's grown, well, quite a bit, like at least three feet.
* The Phantom Menace. There is an Opee Sea Killer who is a mix of a crustacean and a piranha with a chameleon-like tongue. There is also a Colo Claw Fish with a head of a crocodile, and a body of an eel with legs of the crab.
* The Phantom Menace, there is a shot of Trade Federation droids marching through an arch on Naboo that was almost certainly inspired by actual footage of Nazis marching through the Arc de Triomphe in Paris.
* The Phantom Menace. There's a quick spray of blood when the cut is made.
* The Phantom Menace, the same thing happened with Ahmed Best's performance as Jar Jar Binks.
* The Phantom Menace, the subterranean oceans of Naboo, giant sea monsters such as the eel-like Colo Claw Fish and the fish-crustacean hybrid Opee Sea Killer are hunted by an even larger leviathan, the Sando Aqua Monster.
* The Phantom Menace: The theatrical film opens with the two heroes, Qui-Gon and Obi-Wan, arriving on a space station to negotiate a peace between the spaceship's owner and the planet it orbits. As soon as gas start pumping into the waiting room, the heroes grab their weapons and leave diplomacy behind for the rest of the movie.
* The Phantom Menace the Trade Federation blockade Naboo with a fleet of ships arranged in a ring around the planet. Instead of just flying around them, the main characters try to fly through them and barely survive.
* The Phantom Menace, the Trade Federation does this to the Jedi. They escape, however.
* The Phantom Menace, the Trade Federation lands its mechanized invasion force in the middle of a swamp, at least a day away from the capital of Naboo, Theed. Theed is surrounded by large open fields - in other words, perfect terrain for an army composed mainly of droids and heavy tanks.
* The Phantom Menace. They're the first characters to appear in the movie, and also the first to die.
* The Phantom Menace, this is practically R2-D2's reaction when he first meets the unfinished C-3PO at the Skywalker residence on Tatooine.
* The Phantom Menace This trope is how Qui-Gon Jinn and Obi-Wan Kenobi react to Darth Maul during the liberation of Naboo.
* The Phantom Menace throw. The Jedi didn't exactly leave it to chance, though...
* The Phantom Menace, too, with Padme dressing up as one of her handmaidens. It's complicated by ambiguity over when Qui-Gon figured it out; it may be a straight example or he may be messing with her.
* The Phantom Menace to them who convinced them to take their grievance much

further into unethical and immoral actions, which eventually triggered the Clone Wars, Order 66, and Palpatine's rise to power.
* The Phantom Menace. Unfortunately, it's during Shmi's dying moments.
* The Phantom Menace until the doors shift again and they resume fighting. Obi-Wan, farther back from both of then stands impatiently outside the hallway. The scene has no dialog whatsoever but their respective actions perfectly demonstrate the differences in their characters.
* The Phantom Menace was released before the movie itself came out. Anybody who picked it up got treated to tracks called "Qui-Gon's Noble End" and "The High Council Meeting and Qui-Gon's Funeral". Oops.
* The Phantom Menace was released; Jason goes to see the movie, and when he gets home, Paige asks how he liked it:
* The Phantom Menace: When Obi-Wan is knocked into the reactor shaft, Darth Maul kicks his lightsaber into the shaft, and the camera follows it as it plummets out of sight.
* The Phantom Menace when Palpatine manipulates her into calling for Valorum's resignation.
* The Phantom Menace when R2D2 displays a hologram outlining the palace raid.
* The Phantom Menace, where battle droids are marching in formation on the Trade Federation Control Ship shortly after the movie begins, and later as they march into battle outside the city on the planet near the film's climax.
* The Phantom Menace which eschews space opera and political intrigue in favor of a half-hour diversion into a sports film, which is only tangentially connected to what came before.
* The Phantom Menace. While this is (somewhat) faithful to the film, it does make it look kind of ridiculous that Maul was able to dispose of Qui-Gon so easily just beforehand.
* The Phantom Menace, who are more deliberately amusing but less successful, and are intended to serve as the movie's primary comic relief through their peculiar speech patterns, hammy dialogue and exaggerated expressions, alongside Binks' general clumsiness.
* The Phantom Menace writers mentioning Yoda's species. They wanted it left vague if he was unique or there were a whole race of them.
* The Phantom movie had a rope bridge the bad guys have to drive a truck over. Unsure if it will support the truck's weight, they force a native child to drive it over for them. It collapses while the bad guys are fleeing, allowing them to escape as the Phantom is forced to save the boy.
* the Phantom Mummy of Friar Serra (the real one) hints that this isn't just a coincidence, as he told the gang to "Heed the warning of the alligators". Poor Scooby.
* The Phantom (named Erik in the book) is the most blatant, in the novel he’s a
* The Phantom of Crestwood, a landslide takes out the only road to the ranch, meaning no one can enter or leave.
* The Phantom of Crestwood, Dan Curtis is a criminal hired to retrieve some incriminating letters Jenny has in her possession. However, when Jenny turns up in dead in his arms, he decides he had better solve the case before the police arrive and pin the crime on him.
* The Phantom of Crestwood, Frank makes a throwaway remark about the house being riddled with secret passages: a relic of the days when his ancestors had to worry about revolutions. Dan and Pete later discover a secret passage running from the cliff to the cellar, and a second passage plays a vital role in the killer's final plan.
* The Phantom of Crestwood her paramours for a staggering amount of money.
* The Phantom of Crestwood, Jenny Wren gathers four of her former paramours together to blackmail them into providing her with enough money to retire and move to Europe. The total sum she demands is $450,000: approximately $7.8 million in today's money.
* The Phantom of Crestwood unfolds in less than 24 hours. It starts at about midday

and ends at at about 7 the following morning.
* The Phantom of Crestwood: When Jenny rejects his proposal of marriage, Allen Herrick throws himself off a cliff.
* The Phantom of Heilbronn was an epic one. From 1993 to 2009, crime scene investigators found DNA samples of the same woman at 40 crime scenes in Germany, Austria, and France. Searches for this mystery killer came up short. Then, someone noticed that all the cotton swabs used for the DNA testing at the crime scenes came from the same shipping. The DNA was then traced to the factory that made the cotton swabs and a worker who accidentally contaminated them.
* The Phantom of Manhattan — a decision treated by another character as a God-given miracle!
* The Phantom of Paris is about a Houdini-style escape act magician who is framed and jailed for murder, who has to use his skills to break out of jail and, eventually, prove his innocence.
* The Phantom of the Genre, while trying to catch a ghost in an old theater, Rarity proposes having a seance, to which Pinkie keeps responding "Ahntz" to Rarity's chagrin.
* The Phantom of the Opera (1925) are the source of the Phantom's iconic white half- and three-quarter masks. Presumably this is because the mask would show up better in contrast to the black of his costume.
* The Phantom of the Opera (1925) originally had an ending more in line with the original novel (where Christine kisses Erik the Phantom on the forehead and he dies in peace). Test audiences weren't pleased. In the replacement ending, he's chased down by an angry mob and drowned.
* The Phantom of the Opera (1925) the Phantom is rather brutally killed at the end by one of these.
* The Phantom of the Opera (1925), The Phantom straight up tells Christine that her loving him will redeem him.
* The Phantom of the Opera (1962). According to his former landlady, he taught singing at the Academy... when he remembered to go there.
* The Phantom of the Opera (1962): Lord Ambrose D'Arcy, who stole credit for the music of poor composer Professor Petrie. This set in motion a series of events that led to the latter being disfigured by acid and becoming the titular Phantom.
* The Phantom of the Opera (1962) plays Bach's Toccata and Fugue in D minor with his pipe organ as his assistant kidnaps Christine and brings her to him.
* The Phantom of the Opera (1962): Professor Petrie fled the printers after his face was burned by acid and then jumped into the river. The policeman who witnessed what happened was certain Petrie then died as the current was so fast, and never bothered to have the river dragged for his body. As it turned out, though, Petrie survived and went to live under the local opera house as the Phantom.
* The Phantom of the Opera (1962)) that he might not be on the up and up. And naturally he isn't - he steals Petrie's music and claims it as his own work.
* The Phantom of the Opera (1989), he has to constantly reconstruct his face from strips of skin that he takes from his flayed victims.
* The Phantom of the Opera (1989), if there'd been a sequel to his version, most of it would've been in an abandoned subway station.
* The Phantom of the Opera (2004) as long as he keeps his mask on. Handsomeness goes out of the window at that point—and, for some reason, he also becomes fair because he was wearing a dark wig over his wispy, light brown hair. You see him putting on the wig right while he sings "Seal my fate tonight" before Don Juan Triumphant opens, and we see it fall off as Christine unmasks him.
* The Phantom of the Opera (2004) a talented singer and performed "Learn to Be Lonely" over the credits, but had no operatic training at all). Preece also cameos as the female member of the trio in the "Il Muto" scene.
* The Phantom of the Opera (2004) has an Easter egg of the crew hilariously trying to sing the title song.
* The Phantom of the Opera (2004), stagehand Joseph Buquet is seen spying on the dancers as they get dressed.
* The Phantom of the Opera (2004) to him, the crossover taking six months to

complete.
* The Phantom of the Opera: a deformed conjurer also referred to as the Angel of Music and the Opera Ghost. He tutors and eventually becomes obsessed with Christine Daaé. He has no nose, and his eyes are sunken so deep in his skull that all that is seen are two eye sockets, except when his yellow eyes glow in the dark. His skin is yellowed and tightly stretched across his bones, and only a few wisps of dark brown hair are behind his ears and on his forehead. He wears a full face mask to hide his deformity.
* The Phantom of the Opera after much begging on his part. He wrote a letter to then-star Davis Gaines and received an autographed picture-—which he carried with him while on tour as the third African-American to play the Phantom.
* The Phantomofthe Opera after preparing for the role for several months.
* The Phantom of the Opera after she shows him all the affection the world can offer him.
* The Phantom of the Opera (albeit being by a different developer) allows the player to double their score on the last ball with consecutive left ramp shots.
* The Phantom of the Opera almost always bills the actor playing the Phantom first and gives him the final bow, despite the fact that Christine is clearly the protagonist, is on stage for nearly the entire show, and in most productions, the actress playing her does only six of the eight shows a week due to the demanding nature of the part.
* The Phantom of the Opera almost invariably curtsies due to her Victorian-era dress.
* The Phantom of the Opera a meek little ingenue-type. Played straighter in many of the adaptations.
* The Phantom of the Opera and find themselves in a pitch black cellar full of barrels. The Persian lights his lantern so they can open up a barrel and examine the contents... which turn out to be gunpowder. The Persian quickly throws his lantern away.
* The Phantom of the Opera, Andrew Lloyd Webber's musical. Christine is actually called "your precious little ingenue" (by her rival).
* The Phantom of the Opera, and that’s how Erik (the titular phantom) could convince them to let him do whatever he pleases.
* The Phantom of the Opera: A one-way mirror in the lead soprano's dressing room conceals a passage that leads to the Phantom's underground base. If lit from the front, it's an ordinary mirror; if lit from behind, Erik can appear in it.
* The Phantom of the Opera: A red rose shows up in the logo of this show, probably representing Christine; the other graphic part of the logo is a mask, representing the Phantom.
* The Phantom of the Opera, as it premiered in 1985 and the pair separated in 1990.
* The Phantom of the Opera, as no one had shown him such kindness before.
* The Phantom Of The Opera: As Raoul and Christine romance on the Opera House Roof, it conveniently starts to snow. (The timescale of the movie was adjusted from the original musical as the scene takes place three months before New Year's Eve instead of six.)
* The Phantom of the Opera as the role of the Phantom was written for, and is almost always portrayed by, a tenor — although this trope was played straight with the casting of baritone Norm Lewis on Broadway.
* The Phantom of the Opera at an early age, it's possible even he doesn't know his last name—though a few adaptations grant him one.
* The Phantom of the Opera, at one point the Phantom is underground, having kidnapped Christine. He loads her into the boat. On stage, the boat needs to be pushed out to the front, as though he was pushing it into the water. Not knowing that the boat was so heavy, it took a lot out of the Phantom and he was severely out of breath. The rendering of the next song, "slowly, gently, in anticipation" is so affected that the director decides to keep it like that.
* The Phantom of the Opera" between Raoul and Christine, with a reprise later by the Phantom.
* The Phantom of the Opera, but its reception has been extremely mixed.

* The Phantom of the Opera, but to say it rode those reviews out is an understatement — it celebrated its thirtieth anniversary in London in 2016 and reached that same milestone in New York in January 2018. Not to mention the myriad of foreign and touring productions as well.
* The Phantom of the Opera: Carlotta is hated by lot of fandom, just like intended, but some fans have pointed out that she is harassed and physically attacked by the Phantom, then lashes verbally Christine - falsely but genuinely thinking that Christine is in cahoots with her tormentor - and is then "punished" for this crime.
* The Phantom of the Opera, Christine and Raoul were childhood friends. In the musical version by Andrew Lloyd Webber, Raoul has the line "What a change! You're really not a bit the gawkish girl that once you were!" when he sees the now-adult Christine on stage.
* The Phantom of the Opera Christine brunette in almost all portrayals.
* The Phantom of the Opera: "Christine, I love you." He's already quite torn up before saying this, but the tears kick in full force when she responds to his declaration by leaving him.
* The Phantom of the Opera. Christine is a chorus girl before the Phantom's scheming gets her placed in a lead role. Meanwhile, ever since the show's debut, many of the understudies/alternates for the lead roles (Christine, Raoul, the Phantom) have eventually taken them on—Rebecca Cain was an alternate Christine in the London cast before playing her in the Toronto production.
* The Phantom of the Opera continues in the same vein, pointing out Leroux's mistakes as if the entire story were true and Leroux just got some of the facts wrong.
* The Phantom of the Opera' daughter was the model for Christine Dae on the backglass.
* The Phantom of the Opera, depending on the actor (although this is usually done by the actors) Erik (The Phantom) does this so often he could be considered the Giant Cow Dairy Farmer.
* The Phantom of the Opera. Despite being a homicidal maniac, he has decidedly highbrow hobbies. This is carried over to the Lloyd-Webber show.
* The Phantom of the Opera due to its various incarnations in different media is being put here. Most of the nicknames are used to differentiate between the different versions.
* The Phantom of the Opera during "Poor Fool He Makes Me Laugh". The husband explains to the wife that he is going on a trip and leaving her with the maid, and as an aside "Though I would happily take the maid with me".
* The Phantom of the Opera employs this tactic frequently, with its famous organ riff.
* The Phantom of the Opera Erik, aka The Phantom, has this for the heroine Christine Daaè. He convinces her that he is an angel sent by her deceased father, to get close to her. When the managers of the opera house won't let Christine sing, he crashes a chandelier into the audience during a performance. When Christine, in the end, plans to run away with her lover Raoul, he kidnaps her under a performance and threatens to blow up a quarter of Paris if she doesn't marry him.
* The Phantom of the Opera: Erik portrays dark and passion, Raoul light and clear thinking.
* The Phantom of the Opera Erik's behavior (killing people) is often attributed to this.
* The Phantom of the Opera: Erik the opera ghost. He has a deformed face and body and therefore hides himself away from the world and lives beneath the Paris opera house.
* The Phantom of the Opera. Especially mentioned in the lines "He was bound to love you when he heard you sing..."
* The Phantom of the Opera, even though technically, the phantom doesn't die at the end of the play, just simply disappears—this might actually be a literal example of this trope. Sure enough, numerous fic writers have him resurfacing to wreak more havoc in Christine's life.

* The Phantom of the Opera example here: Erik's deformed features actually resembled a skull, so everyone thought he was wearing a skull-like mask with his Red Death costume. Also an homage to the above Poe story.
* The Phantom of the Opera fan base is often partial toward the sympathetic phantom's side, romanticizing his unhealthy obsession with Christine as "true love" and perceiving him as a tragic villain, sometimes even while demonizing bland rival suitor Raoul in fanfictions.
* The Phantom of the Opera, first at the end of Act I when the Phantom turns Carlotta's voice into a frog's, strangles Joseph Buquet with a rope and throws him off the rafters for all to see, ending with the famous chandelier incident. At the end of Act II, Christine reveals the Phantom's face in front of the entire audience and chaos ensues.
* The Phantom of the Opera, gained the derisive nickname "Paint Never Dries"; that Andrew Lloyd Webber was fined for painting the Adelphi Theatre didn't help matters.
* The Phantom of the Opera has a masquerade scene where the Phantom tributes Poe's story.
* The Phantom of the Opera has a pile of skulls in the upper-left corner of the playfield.
* The Phantom of the Opera has a pretty large one, resulting in an almost all-female fandom. And if you don't like Erik, there's always Raoul...
* The Phantom of the Opera - has a sizable fanbase. (Their portmanteau is Rierra.) Ramin is aware of the fandom and tweeted about it, and the shippers went crazy when the two of them dueted on the song Poison and Wine by The Civil Wars in Sierra's vlog. It is also apparently a requirement that they cameo in each other's Broadway.com vlogs and sing together. (Ramin appeared on both Daaé Days and Going Bridal, Sierra appeared in Vlogger 24601).
* The Phantom of the Opera has a variation: Erik was in love with Christine insofar as he wanted her to be his "bride in death." In the end, he realized that his love for the girl was false, and so he let her go.
* The Phantom of the Opera has become iconic, though the level of deformity varies between adaptations.
* The Phantom of the Opera has become the iconic design for the character, and leaked into just about every piece of media involving the Phantom. (This is also why the play's advertisement materials depict a very different-looking mask design.)
* The Phantom of the Opera has been running since 1986; the Broadway staging since 1988.
* The Phantom of the Opera has Italian opera singers Carlotta Guidicelli and Ubaldo Piangi, the former a prissy diva and the latter short and overweight, among the other characters who are mostly French.
* The Phantom of the Opera has "Stranger Than You Dreamt It" after Christine removes the Phantom's mask.
* The Phantom of the Opera has these, thanks to two well-placed lamps.
* The Phantom of the Opera have him scarred due to acid burns. The actual book averts this, though: he was born with a deformed face.
* The Phantom of the Opera However, the tone and the musical style of the show changed considerably after this, and he was sacked just before rehearsals began and replaced with Michael Crawford. Needless to say, the comeback never happened.
* The Phantom of the Opera, including convincing Opera Singer Carlotta (an all the Opera’s audience) that she croaked like a toad. Also he uses it to convince people he is a real ghost, because they hear his voice clearly, but don’t see anyone.
* The Phantom of the Opera. In the book the Opera's cellars actually have other inhabitants almost as peculiar as the Phantom himself, almost composing a miniature world in themselves, though it's more mundane than it seems to her.
* The Phantom of the Opera in the mix, assume the mystery surrounding the young couple's fate has something to do with the brothers' falling out.
* The Phantom of the Opera invokes this towards Raoul several times in the book. Despite her fragile build and gentle nature Christine literally drags Raoul out of

danger (i.e away from Erik) multiple times and she’s even described as the “strong one“ in the relationship.
* The Phantom of the Opera, in which the Phantom's iconic scene was adapted for the Evil Monkey. Otherwise, the Phantom is still pretty damn petrifying.
* The Phantom of the Opera is almost always shown with his iconic mask and long black cape.
* The Phantom of the Opera is an early example, and also interesting because he exiled himself.
* The Phantom of the Opera is from France, so why does his daughter Operetta have a Southern accent?
* The Phantom of the Opera is never referred to by his given name — but it's generally accepted that it's Erik, as it is in the novel and most other adaptations.
* The Phantom of the Opera is set in 1870 is a good way to get a long talk about the Franco-Prussian War, the Commune of Paris, and research errors in general.
* The Phantom of the Opera is so defined by his nationality that he has no other name given.
* The Phantom of the Opera is told in one giant flashback, as the show's opening scene is of the aged Raoul attending an auction selling off items from the opera house.
* The Phantom of the Opera. It helps that both shows debuted around the same time in the UK and US, have similar music styles, and have become hallmarks of modern musical theatre. Plus, lots of performers over the years have starred in both shows. (The shows' respective 25th-anniversary concerts shared quite a few performers, and Colm Wilkinson and John Owen-Jones — fan favorites in the lead roles of both shows — appeared in the encores of both events.)
* The Phantom of the Opera. It is only at the end of the book, where The Phantom has kidnapped her in the middle of a performance and threatens to blow up the opera house if she doesn't marry him, that it gets really serious.
* The Phantom of the Opera, it's deliberately left ambiguous as to whether the Phantom actually does have supernatural abilities. Some of the things he does, like the mirror, are understandable, but a lot more - causing the piano to play itself during the rehearsal of Don Juan Triumphant, creating fire in the graveyard, making the gates in his lair rise with merely a gesture, disappearing from under his cloak at the end of the show - while obviously stage effects in real life, have no practical explanation in the context of the story. However, the film version makes it very clear that all the stunts he pulls are merely clever tricks, leaving the more supernatural stuff out altogether and explaining other things away by showing the Phantom pulling a lever to raise the gates, or messing with Carlotta's throat spray in order to make her croak.
* The Phantom of the Opera launch the ball into the top flashing lane for a bonus and to open the organ.
* The Phantom of the Opera makes the most of both occasions on the original cast album.
* The Phantom of the Opera, making Christine noticeably flinch at one point.
* The Phantom of the Opera, Meg has become bitter that her career never took off, and her love for The Phantom had become obsessive.
* The Phantom of the Opera messed up thing about their relationship, though.
* The Phantom of the Opera: Most of the movie, the Phantom tries his hardest to keep Christine for himself, but when she kisses him at the end, he has a change of heart and tells her and Raoul to 'Go now and leave me!'
* The Phantom of the Opera movie is told as several flashbacks of the now aged Raoul as he attends the Opera House auction, purchases the music box Christine was so fond of, and travels to the cemetery to place it on her grave.
* The Phantom of the Opera musical, the Phantom places Christine on the back of a horse and uses it to carry her the length of a short corridor before abandoning it again. This a reference to the original novel, though in that the ride through the cavernous basement levels actually took some time.
* The Phantom of the Opera not to do so. This after he has murdered a number of

innocent people, especially via his penchant for hanging traps.
* The Phantom of the Opera novel, Raoul describes Christine as "indifference personified." (He wouldn't be surprised if he knew what the poor girl was going through at that point, of course...)
* The Phantom of the Opera of criminals as entertainment for a particularly sadistic Persian princess.
* The Phantom of the Opera on both Broadway and the West End, as well as having a movie and live DVD.
* The Phantom of the Opera on one side. The fact that his hair turns out to be a wig, and that he's bald except for a few ratty, diseased-looking wisps of gray hair even on the good side, also makes the deformity makeup pretty effective in the final scene.
* The Phantom of the Opera on the West End, and to date is the youngest leading actress ever featured in the London production. Christine is almost always played by an actress in her mid- to late 20s, because most younger singers don't have the training needed for the demanding numbers.
* The Phantom of the Opera: Part of Christine's attraction to The Phantom is that he reminds her of her father.
* The Phantom of the Opera play him as this, especially during the final confrontation — Norm Lewis actually does a horse dance while singing "Order your fine horses now!", as a means of taunting the imprisoned Raoul and Christine.
* The Phantom of the Opera) progress of their relationship in the novel.
* The Phantom of the Opera, Raoul's claim to Christine's love is that he's been obsessed with her since he met her when they were children, becomes jealous and possessive the moment he suspects she's seeing someone else (Note: that at this point he hasn't even spoken to her since they were teenagers). And then he waits in the darkness outside her dressing room so he can sneak inside and search for The Phantom. Christine does call him on this creepy behaviour and Raoul does eventually cool down by the end of the book. Christine also choose not to speak to him before since Erik was close by and murderously jealous of Raoul, so she was actually protecting him.
* The Phantom of the Opera, Raoul teasingly calls Christine "Little Lotte" in reference to a childhood rhyme they shared.
* The Phantom of the Opera reluctantly, realize open defiance is not the safest of options.
* The Phantom of the Opera Siren — the Persian even calls him "the Siren" several times!
* The Phantom of the Opera skewing much closer to the original, with later most adaptations following suit.
* The Phantom of the Opera speculation is even more rampant, given that Christine's stockings are noticeably missing when she wakes up. Continuity error or something more?
* The Phantom of the Opera, sweethearts Christine and Raoul need to keep their relationship secret because Christine (rightly) fears what the Phantom would do if he found out.
* The Phantom of the Opera that she is not in any danger from her stalker, and later makes it impossible for her to hide from Erik the fact that Raoul and the Persian are inside his house.
* The Phantom of the Opera the heroine Christine was extremely close to her fiddler father Gustave and when their mother died she traveled around Paris with him and continued to do so when he remarried. Christine got her love of music from her father who equally adored her and promised to send “The Angel of Music” to her when he died, when he did pass away Christine became depressed and lost her enthusiasm for singing. The titular phantom who is obsessed with Christine takes advantage of this pretending to be the Angel of Music and filling the void in Christine’s life after her father’s death before being found out.
* The Phantom of the Opera, the music box with the monkey on top plays "Masquerade."
* The Phantom of the Opera the Organ is prominently featured on the playfield;

players shoot balls up its face to hit a set of musical targets, which makes the Organ open up to reveal a sinkhole underneath.
* The Phantom of the Opera. The Phantom carries Christine this way after she faints at the end of "The Music Of The Night". Thanks to her white dressing gown, this hints at his deepest desire and actually foreshadows the play's climax, where he dresses her in a wedding gown and tries to force her to marry him.
* The Phantom of the Opera the Phantom covers a fainted Christine with his cloak after Music of the Night.
* The Phantom of the Opera, the Phantom, Erik, was one of these. One of the main examples comes at the end of Act I.
* The Phantom of the Opera the Phantom sings his tragic backstory to Christine, but after that short moment of vulnerability, he gets angry again.
* The Phantom of the Opera (the Phantom's own opera) with her performance as bait for a trap, Christine is reluctant to perform and says:
* The Phantom of the Opera - the song is simply called "Masquerade," and gets used repeatedly throughout the remainder of the play.
* The Phantom of the Opera: The song "Notes" has a quick gag as the managers are increasingly baffled by a series of letters:
* The Phantom of the Opera, the title character (who also goes as "Opera Ghost") is never called "Erik" or by any other proper name.
* The Phantom of the Opera. This is partly why a lot of the Broadway fans prefer Christine with the titular antagonist.
* The Phantom of the Opera thoroughly dominates the musical — and yet is only onstage for 30-40 minutes of a two and a half hour production.
* The Phantom of the Opera, though your mileage may vary on how sane he was to begin with. But he's definitely completely off the beam by the end, determined to have Christine at all costs, even if he has to blackmail her into marriage by threatening to kill her lover.
* The Phantom of the Opera through it to get people to look overboard so he could pull them under.
* The Phantom of the Opera to see the Phantom's deformity, and shouts at the actor playing him to hurry up. "Come on, show the gross half of your face so I can get out of here! That nose better be piggy!"
* The Phantom of the Opera to the role for a brief time on Broadway, Robert Guillame was the first-ever black Phantom in the national touring company, and equally well-known Norm Lewis became the first black actor to play the title role in the Broadway production in 2014.
* The Phantom of the Opera transplants most aspects of the Daroga's character into Madame Giry.
* The Phantom of the Opera... until all hell breaks loose in the latter.
* The Phantom of the Opera was used as a circus sideshow freak until he escaped.
* The Phantom of the Opera when he demands to know why they need to conceal this.
* The Phantom of the Opera, where the Phantom falls in love with his voice student Christine.
* The Phantom of the Opera, where they actually conclude people would want to watch it:
* The Phantom of the Opera, which its overture and song of the same name have a powerful organ music in them, although the Phantom himself didn't play his organ in the film. Organ music is also featured during the sword fight scene.
* The Phantom of the Opera, who comes across as pitiful even as he does a multitude of horrible things, all of which he seems to have been driven to do because of his horribly disfigurement.
* The Phantom of the Opera, who's described in the book as being hideous-looking and skull-faced underneath his mask. This has not held true of all the film adaptations, however, especially the most recent one where Gerald Butler appears to have just a mild skin rash underneath his half-mask.
* The Phantom of the Opera, writing Fanfic and having lots of merchandise!
* The Phantom of the Opera: "You'd never get away / With all this in a play / But if it's loudly sung / And in a foreign tongue / It's just the sort of story

audiences adore / In fact, a perfect opera!"
* The Phantom of the Rope People, who snare the mooks and dangle them high above the ground.
* The Phantom of Whitechapel, he leaves the bodies of the Jack the Ripper killers behind and obviously murdered to see what Sherlock does about it.
* The Phantom: One issue featured a criminal called "The Man Who Never Sleeps", who had his eye lids sewn back so they could never close, thus preventing him from ever falling asleep or having to close his eyes for even a moment. In actuality, his eyes would dry out and he'd go blind very quickly. And even if it would somehow keep him from falling asleep, he'd be too exhausted all the time to be able to do anything.
* The Phantom, one of the bad guys gets killed by a skeleton that comes to life and chokes him.
* The Phantom one of the Skulls of Touganda that the bad guys (and the good guys, for that matter) need can be found at a museum exhibit. One that both the bad guys and good guys happen to visit at the same time.
* The Phantom Pain), but given the backlash Konami's received over their treatment of Kojima, the fans might finish the torching for Kojima.
* The Phantom Pain came with a replica of Snake's bionic arm. Unfortunately, only the Japanese version is scaled to real life.
* The Phantom Pain ends with Quiet committing suicide by pouring gasoline on herself and lighting a match. In the game, nobody knows what happens to Quiet after she leaves Diamond Dogs following the events of Episode 45.
* The Phantom Pain was the appearance of hexagonal tiles on the floor of the hospital the protagonist is escaping from.
* The Phantom Phantom has ever died of old age or retired, the title is always passed to the next inheritor after the current one has been mortally wounded. The present-day Phantom is the 21st to hold the title.
* The Phantom Planet-esque energy barriers for their prison cells, which hold an enemy alien captive. When the power goes down, the prisoner figures out he's free because the rocks he'd been flinging at the forcefield suddenly stop getting vaporized.
* The Phantom Planet. His last line is reciting the Lord's Prayer while drifting away from his spaceship.
* The Phantom plays with this weirdly; the Phantom's suit is modeled after a certain tribe's death god, and later Phantoms have had run-ins with said tribe.
* the phantom prior to the events of the game. She had a psychological evaluation that may have helped the police identify him, and he had to prevent that at all costs.
* The Phantom Quill is the man who killed the previous Phantom. He spends much of the movie disturbed by the discovery that the man he killed is apparently still in business. Kit explains the truth to him at the onset of their inevitable final duel.
* The Phantom Set on Stage 28 was still being used in 2011 when it was used in
* The Phantom's face unmasked will die a horrible death. In nearly 70 years of publishing, the only ones who've seen it and lived have been his family and associated hangers-on.
* The Phantom sons, none of whom are ever seen or mentioned again outside his origin story. There was also the twin sister of the 17th Phantom who occasionally filled in for him, but is not known to have had any children of her own.
* The Phantom start fighting crimes in the City, there will always be a black mook that start pull one and one together and then says a variation of "The Phantom! Grandfathers stories were True", this giving him a chance to inform the White Crime Leader what's up only for it to be dismissed as "Silly Jungle Stories".
* The Phantoms. They can only be truly harmed by a Magician or magical weapons such as silver bullets.
* The Phantom story, published way back in 1936, so the trope is at least that old.
* The Phantom Stranger, all of which may or may not be true, all show him having different natural hair colors before he became what he is now.

* The Phantom Stranger headlined issue #80 (February, 1969). In this case DC was eager to revive the 1950s character, and launched his new series in June, 1969. It was regularly published to 1976. It had a brief revival in 2010.
* the Phantom Stranger Hell once the war ended, cursed to walk the Earth as a stranger to everyone.
* The Phantom Stranger's hat (well, his other hat, he also wears a tasteful fedora). He sums it up thusly - "I have walked hundreds of billions of miles across this Earth... across time and space... through the blinding light of the Elysian Fields... and the darkest depths of Pandemonium... where the stench and despair of the chaoplasm is always a potent reminder of how far man can fall. I am the Phantom Stranger. And the stranger comes... when the stranger is needed."
* The Phantom Stranger was that he was the survivor of a divine judgment upon a city who was prevented from joining the afterlife after he lost his family in the judgment and committed suicide. He eventually discovered that his intended purpose was to turn mankind away from evil, one soul at a time.
* The Phantom. The 16th Phantom and his wife are on their honeymoon when the ship is destroyed in a storm, with the only survivors seeming to be the wife, and a sailor who rescues her, with the Phantom having seemingly drowned. The survivors drift onto a desert beach where they're found by a passing band of slavers, who sell her as a concubine. Naturally, the Phantom had also survived and eventually tracks his wife down almost a year later, only to find that she had been pregnant when she was captured, and had given birth to a son while imprisoned.
* The Phantom, the 1970s story "The Blue Giant": Alien advance scouts land to check out whether humans are a good prospect for invasion. After encountering the Phantom, they decide that if all humans are like him, the planet's best left alone.
* The Phantom, the guy in the purple suit. Said to have trained by lifting a growing cow every day (no doubt taken from history via a Greek man named Milo, who is held by legend to be the strongest man who ever lived. Milo lifted a growing calf until it matured into a bull, thus giving Milo incredible strength).
* The Phantom the hero and his love interest meet for the first time in the first story arc, until Lee Falk wrote the story of "The Childhood of the Phantom" and included a scene where they met briefly years before when they were both children.
* The Phantom (the one who lives in the Skull Cave in the Deep Woods surrounded by the Bandar pygmy poison folk). Any time something supernatural was depicted, there was always an alternative "natural" explanation such as magic tricks, illusions or hallucinations caused by fever or gas.
* The Phantom, the Phantom does this on the villains' truck near the beginning, and later hitches a ride to the showdown on the landing pontoon of Sala's seaplane.
* The Phantom: The Phantom (the third one) once encountered a Djinni that had been in service to king Solomon, who had been sealed in a wine bottle by a demon and thrown into the sea. Out of gratitude of being freed when The Phantom (inadvertently) opened the bottle, he offered The Phantom the typical three wishes, and even rescued The Phantom at the end of the story simply because The Phantom had (inadvertently) taken over his duty through an encounter with the demon.
* The Phantom, the protagonist is the latest in a long line of heroes, and has a subplot about encountering the same villain who killed his father.
* The Phantom: The Sengh Brotherhood's secret base is in shark-infested water.
* The Phantom: The Singh Brotherhood doesn't care about race, gender or social class, and have members from all over the world, though since the organization is strongest in the Pacific, most of them are Asian or middle-eastern due to geographic convenience. Many high-ranking members throughout the Brotherhoods history have been women, even during historical periods that were very patriarchal, and the current leader is one as well.
* The Phantom Thieves feel this way towards their targets in general. Not only because they find the people they go after despicable and know that killing them would make them no better than they are, but also because it would prevent the target from having to face justice for what they've done.
* The Phantom (though like an ant, his back is vulnerable). Said gladiator even tried suicide throughout the centuries (and got really happy at his defeat and

consequent death by the hands of the Ghost Who Walks).
* The Phantom Tolbukhin: Germany defeated the Soviet Union due to Stalin purging General Zhukov. By 1947, they are chasing the titular Tolbukhin, who is leading a guerrilla war in occupied Ukraine.
* The Phantom Tollbooth All Hell breaks loose when Milo tries to wing conducting a sunrise.
* The Phantom Tollbooth) arrests Milo, then prepares to try him. When Milo protests that 'only a judge can sentence you', Shrift agrees and slips into judicial robes on the spot. As he's leading Milo away to serve his six million year sentence, Milo informs him that 'only a jailer can put you in prison'. Again, the officer agrees, pulls out a bunch of keys, and leads Milo triumphantly away.
* The Phantom Tollbooth, as Milo passes through the Valley of Sound, a region that was rendered silent by the Soundkeeper, some citizens of the Valley communicate with Milo via a blackboard, asking him to confront the Soundkeeper.
* The Phantom Tollbooth Azaz and the Mathemagician into agreeing to lifting their banishment and in the end the two appear to have restored peace, although there is still some bickering.
* The Phantom Tollbooth begins as real-life footage, then switches entirely to an animated movie, only returning to real life all the way at the end.
* The Phantom Tollbooth certainly undergoes this, for a male character.
* The Phantom Tollbooth do something bad, they can leave any time they want.
* The Phantom Tollbooth effect that mires minds as effectively as wheels.
* The Phantom Tollbooth effect that saps the intruder of all drive and motivation. If you don't have a neighborhood Watchdog to wake you back up, you're basically doomed.
* The Phantom Tollbooth has a lot of these due to the book's quirky sense of humour:
* The Phantom Tollbooth him that, he would have given up; it was only by daring to do something difficult that he was able to succeed in the first place.
* The Phantom Tollbooth, in which Milo enters a tollbooth, which makes him animated (he messes with this quite a bit, realizing what the tollbooth does), to get to the Kingdom of Wisdom.
* The Phantom Tollbooth is located to the east; to the west are the Lands Beyond (i.e., our world). This is no doubt linking the Enlightenment of knowledge with the rising sun.
* The Phantom Tollbooth (It all depends on how you see things) in Brazil. This is also chapter 9's title.
* The Phantom Tollbooth jewels are valued just like in the real world, except in Digitopolis. They only care about digging up numbers. Precious stones are tossed in the corner and are considered worse than dross. Of course our heroes realize their value, but are distracted by the arrival of lunch before they can even ask for some souvenirs.
* The Phantom Tollbooth. Later on, in Milo's car Humbug exhibits a delayed reaction and finally leaps up in the air with a scream (and apparently lands right back in the car).
* The Phantom Tollbooth — particularly apt, as the map exists in-game as part of the mysterious tollbooth's appurtenances.
* The Phantom Tollbooth, Milo becomes a cartoon after crossing the tollbooth. This leads to an amusing sequence in which he goes back and forth in disbelief until the tollbooth's voice tells him to get on with it.
* The Phantom Tollbooth Milo finds the morning after that the tollbooth has vanished, with a note in its place that explains that the tollbooth will find its way to the next needed child.
* The Phantom Tollbooth Milo is given a magical spyglass that allows him to see things as they really are.
* The Phantom Tollbooth, Milo's first impulse is to avert this trope and go back the next day. But once he takes another look at his own world — and all the things that'd previously bored him, yet now seem more interesting — he stops being disappointed that the Tollbooth has vanished.

* The Phantom Tollbooth, Milo takes a wrong turn at a fork in the road while driving to Dictionopolis, and he ends up (quite literally) stuck in the Doldrums, where the Lethargians dwell.
* The Phantom Tollbooth off the coast) and having to swim back to the mainland.
* The Phantom Tollbooth one of the demons lurking in the Mountains of Ignorance is the Senses Taker. He stalls the heroes with reams of pointless paperwork, which he then uses to distract them by creating the ultimate sensory experience for each one. The Taker is defeated when Milo accidentally breaks open a package of laughter, since the only sense he can't take is humor.
* The Phantom Tollbooth on everything around them in the number mine, and when it's all erased they find themselves alone with him in his workshop.
* The Phantom Tollbooth takes place in a world of wordplay and dubious logic. For example:
* The Phantom Tollbooth takes several days to his perspective, but when he returns home he finds it is only sundown.
* The Phantom Tollbooth that require an excellent vocabulary and knowledge of colloquial phrases. In other words, many will pass over the head of a child, but an adult reading along will get the joke.
* The Phantom Tollbooth (the movie, not the book) eats itself after Milo goes through it.
* The Phantom Tollbooth, the package Milo gets containing the tollbooth is described in part by saying:
* The Phantom Tollbooth. There's no sound in the Valley of Sound, so you get this:
* The Phantom Tollbooth). Turns out he's the .58 child in 2.58 children for the average family — luckily the average went up a bit, because it was painful being only .47. Fortunately, the average family also has 1.3 automobiles, and since he's the only one who can drive three-tenths of a car, he gets to use it all the time.
* The Phantom Tollbooth was filled with these, many of which the book's intended target audience is unlikely to get—although probably not as many as some adults might think since the children most likely to read and enjoy the book are intellectual-type kids with an appreciation for puns and wordplay.
* The Phantom Tollbooth. When Officer Shrift (who is also the judge and the jailer of Dictionopolis) is asked if he can give Milo a short sentence for causing a mess in the Word Market, Shrift replies "How about 'I am'? That's the shortest sentence I know."
* The Phantom Tollbooth, when the Humbug knocks over the stalls in the marketplace at Dictionpolis and the words spill out everywhere, the salesmen are unable to voice their complaints in correct word order.
* The Phantom Tollbooth with exactly 2.58 children, among other similar quirks. The 0.58 child doesn't seem to be any worse for the wear, and is the only one who can drive their fractional car.
* The Phantom Tollbooth with the smallest giant, the tallest midget, the thinnest fat man, and the fattest thin man — all the same ordinary man.
* The Phantom to participate in — the marathon is run through predator-infested jungle, for example, and the long-jump has a minimum distance enforced by setting the first stretch with spikes and/or hot coals.
* The Phantom Troupe itself, meanwhile, plays with this trope. Uvogin has no personal stake in anyone he kills, and in fact is so remorseless that he feels nothing when killing people. However, he is absolutely
* The Phantom Troupe slaughter nearly everyone they come across, including skilled Hunters with intimidating reputations in their own right. The only people shown to stand any chance against them are Kurapica, who has a nen ability that can only be used specifically against
* The Phantom, two villains boast elaborate medieval torture rooms —- General Tara of Tarakimo and General Kon of Ughland. Tara's facilities are particularly heinous in that they are equipped with closed circuit camera systems, so the tyrant can "question" his prisoners remotely, from a plush private palace office.
* The Phantom uses Meg Giry as a poor-man's Christine after he leaves Paris for

New York (the lampshading of which causes an enraged Meg to
* The Phantom using a flesh-colored leaf from a local plant that made a good heat insulator.
* The Phantom, usually his son or closest kin. This allows them to project the illusion to their enemies that the Phantom is immortal, though their friends know better.
* The Phantom, who casts 'doom' on each on your party members one at a time, which consists of a glowing number appearing over their head and Big Ben itself counting down. When it reaches 0 they are KO'd. Permanently. Fortunately you can use any stop spell to delay the countdown.
* The Phantom who depends on the mooks thinking him a supernatural menace, so it fits.
* The Phantom, whose idea of a business trip is coming into town to be measured for a new suit.
* The Phantom world, refusing to admit in the existence of things like aliens or magic when he keeps several monsters (a unicorn, a stegosaurus and a family of primeval humanoids) as pets or his ancestors' journals discuss one ancestor who used magic to regenerate his gouged-out eyeballs.
* The Pharaoh is a prime example of this trope regarding the games. In Capsule Monster Chess, he defeated Mokuba's strong monsters with a single weakling. And in the card game Duel Monsters, he's so good that he defeated Obelisk the Tormentor with his three Magnet Warriors. And in the 10th Anniversary movie, his deck is actually very old and weak in comparison to his two partners Judai and Yusei and the opponent Paradox, yet he manages to destroy the Malefic Paradox Dragon (4000 ATK) with his freaking Dark Magician, who doesn't have even an effect.
* The Pharaoh's best retort to Yugi's insults is something along the lines of "Yeah, well, you're really small. Look at you down there! You're like Smally McSmall.
* The Pharcyde involves Bootie Brown singing about how he used to have a crush on one of his teachers and made a point to always attend her classes.
* The Pharcyde runs entirely in reverse. Thus, we see the band members spring to their feet from a lying position, rolling up stairs, repelling a bucket full of water upwards, and near the end, instantly piecing together a mural painted on glass with a hammer before wiping the paint off with paintbrushes.
* The Pharisees bring an adulteress before Jesus and ask what he thinks should be done with her. According to Jewish law, she should
* The Pharisees frequently tried to do this to Jesus, usually by asking questions about secular traditions that seemingly contradicted religious mandate.
* The pharmaceutical giant GlaxoSmithKline also produced the popular soft drinks Lucozade and Ribena, before eventually selling those brands off in 2013.
* The Pharmacist, and his investigation is grounded in worry about his own customers and community, wracked by the opioid crisis.
* The pharmacist asks him what size, and when he doesn't know, gives him a board with increasingly larger holes in it, and tells him to follow in the back. The pharmacist then tells his assistant "Get me a box of extra small- no, small- no, medium cond- a box of paper towels!"
* The Pharos Lighthouse (grants visibility over a huge area of water) is replaced with the Space Station, which instead makes spaceships harder to kill.
* The phasegates, apparently used by humans to travel between various systems of the federation space. The reason
* The Phasic and Proton Rounds ammunition mods can convert whatever weapon you slot them in into a partially energy-based weapon which combines mass and charged particles, according to the fluff. Even then, though, the trope is upheld; neither of these mods are all that useful, dealing out LESS overall damage in return for some of that damage being dealt to the target's health through their shields. Specialist solid rounds often do better just through sheer damage output.
* The PHB has similar tendencies. He once tells Dilbert that an assignment is urgent, and Dilbert says it's only urgent because everything sits on the PHB's desk until it becomes either moot or a crisis. The PHB even stacks them in bins labeled

"Aging", "Crisis", and "Moot". The PHB is so miffed by Dilbert figuring out his system that he vows to give him nothing but the "Moots". In fact, several of the engineers (Including Wally) have figured out how to determine if an assignment will ultimately end up as a "Moot", and thus can safely ignore it.
* The PHB reads two memos, one which says that all official company documents must be recycled to meet the corporate sustainability goals, and one says that all official company documents must not be recycled to meet the corporate security goals. He reads them off at every weekly meeting because he doesn't know how to get rid of them.
* The PHB tells Tina that she has to use the Danville Font as per corporate policy, but when she says she'll buy the Danville Font software immediately, he says there's a budget freeze on software purchases.
* The Phenix City Story never happened. The details of the assassination and its aftermath are also changed: in the film Patterson is shot at arm's length whereas in real life he was shot through the mouth, in the film there is a single witness whom the mob successfully silences whereas in real life there were several witnesses who later testified in the trial, in the film the mob is responsible whereas in real life the Chief Deputy Sheriff was convicted of the murder, and so on.
* The Phenix City Story of real-life reporter Clete Roberts interviewing some of the real-life people portrayed in the film.
* The Phenix City Story on June 18, 1954. The film premiered on July 19, 1955.
* The Phenix City Story outlines how the mob handles evidence against it. We get to see them put it into practice at various points in the film.
* The Phenix City Story that a grand jury finding that there is no gambling in Phenix City could be construed this way—after all, it's only gambling if the player has a chance of winning, and the games in Phenix City are so heavily rigged that there isn't.
* The Phenix City Story, the gangsters set out to kill Ellie, the sole witness to the assassination of Patterson.
* The Phenix City Story with a blow to the head, the killer does the bare minimum to make it look like an accident by moving the body to a ditch to make it look like a traffic accident.
* The Phenomenon, and increasingly compassionate ("You are not abandoned. You are not forgotten").
* The phenomenon can also be spotted in comic strips that have ended when
* The phenomenon can even be witnessed in politics. Many actors have been elected to official governmental posts because voters liked them for the heroic roles they usually perform on screen:
* The phenomenon goes beyond KJV and the US Protestants. There is at least one American Catholic priest who said, "As Jesus originally said in Latin."
* The phenomenon is an extremely important one in real life, pertaining to basically any real estate development that isn't a park.
* The phenomenon of "literal dancing" is related, in that the dancer mimes the words to the song regardless of how metaphorical or otherwise they are. It was the subject of a hilarious routine by Peter Kay, featuring
* The phenomenon of "seeing stars" is caused by the fluid in the eyes moving faster than the eyes themselves and slamming into the retina. This likely causes the victim to see a flash, as well as the aftermath, and probably explains the last part of the above comment.
* The phial containing the light of Eärendil that she gives to Frodo.
* The Philadelpha Xperiment features a lobotomy patient (and WW2 veteran) known only as "Patient X."
* The Philadelphia Eagles had picked up something of a reputation, along with a mild AFC counterpart the New York Jets, for a team that is, almost every season, picked to go deep in the playoffs if not win the title, no matter how they finished the season before, but only left with the trophy once, in Super Bowl III in 1969.
* The Philadelphia Experiment, allegedly conducted by the US Navy in 1943, involving the destroyer escort

* The Philadelphia Experiment: Despite the fact that Herdeg is indirectly responsible for the burning death of a car full of his subordinates, and the injury of some in the one he was riding in, he's more than happy to be the one driving Herdeg out (and engaging him in idle chit chat "So, what did you think of 1984?") so he can get back to 1943.
* The Philadelphia Experiment has sailors fused into the deck of the ship during the title experiment.
* The Philadelphia Experiment II. Needless to say, the protagonist from the original movie is the one who winds up having to fix this mess.
* The Philadelphia Experiment II: The Nazis tattoo barcodes on Americans as identification, and use scanning devices to determine whether or not a barcode is fake.
* The Philadelphia Experiment II. The scientist who found it didn't study it enough to replicate the technology before it was sent off.
* The Philadelphia Experiment. Two sailors from the 1940s are time-warped to the 1980s and attempt a carjacking.
* The Philadelphia Experiment while still alive after the titular ship accidentally time-travels.
* the Philadelphia Flyers and the Ottawa Senators saw another goalie fight and a record-setting 419 penalty minutes between the two teams. This one took off with only two minutes left in the game, as Flyers enforcer Donald Brashear challenged his opposite number Rob Ray to a fight to avenge what he saw as the Senators taking liberties with his teammates; this led to a rule change in the NHL that enforced an automatic suspension for anyone who instigates a fight in the game's last five minutes.
* The Philadelphia Flyers. Since joining the NHL as part of the 1967 expansion, they have only missed the playoffs eight times (and just twice since 1995) and reached the final eight times, but have only won the Stanley Cup twice, in 1974 and 1975. Part of the problem is that unbelievable consistency prevents them from bottoming out and having the ability to select a slur of high draft picks; their arch-rival Pittsburgh Penguins are built on the first overall pick in 2003 (Marc-Andre Fleury), second overall in 2004 (Evgeni Malkin), first overall in 2005 (Sidney Crosby), and second overall in 2006 (Jordan Staal). Not to mention how the Penguins had a meteoric rise in the 1980s after drafting a young Mario Lemieux...
* The Philadelphia Journal folded after four years, having lost $14 million ($35.3 million in 2013 dollars).
* The Philadelphia Phillies are the usual culprit. One game in 2009 started with Philly fans shining laser pointers into the eyes of the opposing St. Louis Cardinals, and ended with a Cardinals fan being
* The Philadelphia Phillies "P" - both the "classic" version in use today, and the 1970s-80s version.
* The Philadelphia Story is a poet whose book netted him something in the range of $700, and so puts on a cynical front working as a tabloid reporter to pay the bills. Upper-class Tracy Lord, who he's spying on for material, reads his work and offers to sponsor his artistic endeavours only to have him shoot it down as old-fashioned and patronising of her to think she can just make him her "kept artist".
* The Philadelphia Story, Margaret Lord keeps forgetting who Mike is. First she forgets his name, then she calls him "Mr. O'Connor" (instead of Mr. Connor), and then she mistakes him for one of the musicians. At the end of the movie, she turns to him and cries, "Dr. Parsons!" Mike, thinking she means him, is about to explain that she is mistaken. Then he realises that Dr. Parsons is actually standing right behind him, and that it's to him that Mrs. Lord is speaking.
* The Philadelphia Story Mike Connor offers to marry Tracy after their drunken antics of the previous night cause her fiance to dump her on the morning of her wedding.
* The Philadelphia Story, who pinches all the young ladies (including his niece).
* The philandering Zeus fathered a number of sons, none of which he actually helped raise. Some of them were lucky enough to find substitute father figures who took care of them: Heracles was raised by Amphitryon, his mother's mortal husband,

while Perseus was raised by the fisherman Dictys, who took his mother Danae in when she was abandoned by her own father, and Dionysus was raised by his maternal aunt Ino and her husband Athamas, who Zeus gave to them to take care of so his jealous wife Hera wouldn't find out about his affair.
* The Philanthropist: One episode has a corrupt group of mercenaries deliberately sabotaging peace efforts in Kosovo in order to sell arms. The rest of the PMC is not corrupt, however, and fires the corrupt ones when presented with evidence.
* The Phil Donahue Show after it, including Oprah and Sally Jessy Raphael.
* The Phil Harris Alice Faye Show, had two of these on his show: his brother in law Willy and the grocery boy Julius, who is in love with his wife, Alice.
* The Phil Harris Alice Faye Show use this trope, from coloring Julius' hair with fabric dye, fixing the dishwasher with disastrous results, to buying a live steer to save money on steak (which it doesn't).
* The Phil Harris Alice Faye Show when she runs out of intelligent comebacks, some of which are dated if one doesn't know the pop culture reference. Others are more general like:
* The Phil Hendrie Show regularly sues anyone and anything for any slight, no matter how minor. For example, when his oh so hated neighbor cracks a joke at Steve's expense (often warranted), Steve not only sues him but his son for laughing at the joke. If he was only in the presence of his neighbor because his wife asked him to, say, pick up groceries or trim the hedges, he will sue her for putting him in a dangerous position. The number of lawsuits Steve filed over the course of the show are innumerable, and every one as inane as the last.
* The Philip De Franco Show: News show on current events, politics, pop culture, and celebrity gossip.
* The Philippine anti-Japanese resistance Huk seeks to liberate Imperial Japan conquered areas, especially an island ghetto dedicated to torturing as many non-humans as possible. Unfortunately, their ranks also include terrorists and gang lords, who are eager to capitalize on the liberated areas and kill any Japanese citizens on their way through.
* The Philippine Basketball Association has Rain Or Shine, which was a constant contender in
* The Philippine National Police, which is notorious for tolerating unbridled corruption, particularly in the form of petty traffic bribery. They are also known to torture and beat up small-time offenders in their custody — an Amnesty International affiliate revealed they used a
* The Philippines from Japan (mostly because they use the same digital TV standard). The system is used to warn of earthquakes, volcano eruptions, typhoons, and other natural disasters which are common in the Philippines. It's also used for terror attacks and to provide evacuation orders. Alerts are coordinated through the major national broadcaster ABS-CBN but are required to be carried on all networks (although they're not very well standardized).
* The Philippines had some coups in its post-World War II history, the most significant one in the EDSA Revolution when parts of the Philippine Army revolved against President Ferdinand Marcos and supported the protests.
* The Philippine soap "Huwag Ka Lang Mawawala" (Just Don't Be Gone) fits the trope, mostly since the lead woman only wants nothing but to take her son back from the husband who cheated on her. She succeeds, but doesn't kill the husband (since he ends up in a mental hospital) and both women (the latter whom the husband had an affair with but later revealed in the finale
* The Philippine state's programmatic anti-Communism didn't stop even when the Huk rebellion ended. The battle shifted to offices and academia, and students, intellectuals and professionals of all stripes came under fire for harbouring any potentially radical, progressive, or anticolonial views. As far back as 1948 the government formed a Committee on Un-Filipino Activities (yes, aping the U.S. House Committee on Un-American Activities, and labouring under the fallacy that "anti-American = anti-Filipino") to investigate any claims of subversive thought or material—and unsurprisingly, extremely pro-American would-be president Magsaysay served on this committee while a congressman. The body persisted

throughout the Third Philippine Republic, being renamed the "Committee on Anti-Filipino Activities" (CAFA) in the late 1950s, and investigated profiles as high as academics like Teodoro Agoncillo, Renato Constantino, and Leopoldo Yabes among others. It was also in this period that the Anti-Subversion Law was passed, which made the PKP-1930 an illegal organisation. (Ironically the president in power at this time, Magsaysay's successor Carlos P. Garcia, was
* The Philosopher King turns out not to be a particularly wise ruler, who prefers musing over actual ruling.
* The Philosopher's Stone also has many names: "The Sage's Stone... The Stone of Heaven... The Great Elixir... The Red Tincture... The Fifth Element."
* The philosopher's stone, as well, is rendered in CGI - it fits for
* The Philosopher's Stone, he barely hesitates and glaringly shows nothing happens. Once Scrimgeour left, he explains to Ron and Hermione why it didn't work. When he first caught the snitch, it was humorously shown that they won because he had accidentally caught it in his mouth. Which is the touch the snitch needed to open.
* The Philosopher's Stone when Harry decided to get on a broom to chase after Malfoy, despite Madam Hooch explicitly telling them not to. Professor McGonagall arrived, hauled him inside and put him on the Quidditch team.
* The Philosopher: Super-intelligent character who discusses an activity people undertake when they seek to understand fundamental truths about themselves, the world in which they live, and their relationships to the world and to each other.

* The Phil Silvers Show centers around the motor pool soldiers on a backwater army base in Kansas. Nobody on the base has seen a battlefield since World War Two and we almost never see them doing any actual military work.
* The Phil Silvers Show, had the eponymous character using the salute in comedic ways.
* The Phil Silvers Show In one episode, Colonel Hall realizes that the reason the gambling-obsessed Bilko is so happy about the upcoming desert maneuvers is that the are near Las Vegas. Bilko and his men plan to abandon the maneuvers to hit the casinos. Usually, Bilko is a very good liar, but when Hall makes this accusation, Bilko is caught off guard, and his nervous denial is pretty weak.
* The Phil Silvers Show parody included a throwaway joke about Bilko meeting a girl from Maine ("Bangor? I hardly knew her!").
* The Phil Silvers Show Sgt. Bilko spends much of his time tricking and conning his men and colleagues. Should anyone else try to fleece them, however, Bilko will come down on the grifters like the wrath of god, usually with an elaborate scheme to turn the tables on them.
* The Phil Silvers Show starred Silvers as Sergeant Ernest Bilko, a huckster running a US Army motor-pool, who frequently conned the base's colonel.
* The Phil Silvers Show. Taken to the extreme, since only one of the boxers took a punch "out of boredom". Immediately after it connected, both boxers (the guy who got hit and the guy who did the hitting) took the dive.
* The Phoenix 5 version of Cyclops was meant to show up in the Puck wave, but ended up being canceled by Hasbro due to the costume supposedly being too flash in the pan.

* the Phoenix Gate being thrown into the timestream, setting up "Timedancer" (which also never came to fruition).
* The Phoenix Guards and himself out of prison by tricking a guard into propositioning his (Pel's) lover, who then almost kills the guard in a duel. Then she asks the poor guy who put him up to it, he tells her, and she pulls some strings to get Pel and the others out.
* The Phoenix Guards has a particularly egregious example in Bengloarafurd Ford, which due to a long history of changing hands in the endless Easterner/Dragaeran border skirmishes has a name that translates from several different dialects as "Ford ford ford ford". Finally a bridge was built, which was named Bengloarafurd Bridge.
* The Phoenix has this effect on pretty much everything evil and horrifying — even the proverbially indestructible Darkhold seems to shiver in genuine fear when it senses a mere
* The Phoenix. It is said to be majestic and beautiful, able to soar like an eagle, and was essential to the creation of the first man and woman when it pecked them out of the bark of a tree. It was a frequent pet/companion to the Filipino creator deities.
* The Phoenix Kings of the High Elves have traditionally been guarded by a contingent of Chracian White Lion Huntsmen, ever since an incident when the third Phoenix King &#65533; Caledor the Conqueror &#65533; had his life saved from Dark Elf Assassins while out hunting in Chrace himself. In that the Phoenix King is the sovereign ruler of Chrace along with the other nine kingdoms of Ulthuan, the White Lions are not mercenaries but loyal subjects, but since none of the twelve Phoenix Kings so far have ever been Chracians themselves, they're still foreign bodyguards in that sense.
* The Phoenix Legacy, is teetering on the edge of another Dark Age as the story opens.
* The Phoenix Legacy Police. SSB personnel always wore electronic masks that hid their faces in apparent shadow. Their interrogation division was known as Psychocontrol.
* The Phoenix Lights incident is an alleged real life example. On the night of March 13, 1997 thousands of Arizonans, including the governor of Arizona saw a massive mile-wide unidentified flying object over the Phoenix Metropolitan Area. [

* The Phoenix Requiem appears in a dark cloak and says that some call him the Reaper "after some local nonsense folk tale".
* The Phoenix Requiem has no phoenix in it. And no requiem, for that matter. It is, however, about a guy who can't die (he keeps rising from the dead, essentially) and is a walking psychopomp.
* The Phoenix Requiem, Petria drapes herself on a soldier who's reluctant to say why the quarantine on Esk was lifted.
* The Phoenix Requiem, shades cannot be killed but can be subdued by using water.

* The "Phoenix Rising" storyline contains several types. In (very) brief flashbacks we see that the Canadian mafia sent over a hundred "hitmen, criminals, and thugs" to take control of the town of Podunkton. All were killed by Oasis. After a new boss took over the syndicate, he decided to send down a much more badass assassin with a cool costume, lots of guns, and in-battle quips.

* The phorid fly infects fire ants by laying its eggs into their thorax. During development, the larva moves to the ant's head and directs the ant to move a safe distance away from its colony while simultaneously devouring its brain. Using digestive enzymes to separate the head from the body, the larva continues to pupate within the ant's decapitated noggin until its ready to emerge from its grisly cradle and continue the cycle anew. They are also responsible for the mysterious Colony Collapse Disorder (CCD) among honey bees.

* The phrase "getting your goat" comes from the tradition of keeping goats as companions for racing horses, which for some reason helps keep the horses more even-tempered. Unscrupulous race horse owners would try to steal the goats of rival horse-owners to upset their horses and make them too agitated to win races.

* The phrase "grinning like a Cheshire cat" has been dated to the late 18th century, eighty years before the novel, although no-one is entirely sure what its origins are. It is thought that it may be connected to the dairy farms of Cheshire, and the past reputation of the area for its "abundance of milk and cream". It was the pre-eminent milk, cheese, and cream producing county of England for several centuries. Others have pointed that Lewis Carrol himself was born and raised in Cheshire, and may have been inspired by the 16th century sandstone carving of a grinning cat, on the west face of St Wilfrid's Church tower in Grappenhall, a village adjacent to his birthplace in Daresbury. * "The Picture in the House" is probably the first in his Lovecraft Country series of books, and the first to mention both Arkham and the Miskatonic River. It begins by introducing readers to Lovecraft Country:
* "The Picture in the House" is set in "the ancient, lonely farmhouses of backwoods New England; for there the dark elements of strength, solitude, grotesqueness, and ignorance combine to form the perfection of the hideous." It involves an old man who is a cannibal.
* The Picture of Dorian Gray (1945), the painting reveals the true evil of Dorian's actions as his soul becomes more and more corrupted. For full effect, the movie was shot in black and white, while the shots of the portrait was filmed in color.
* The Picture of Dorian Gray, blood-stains appear on his portrait's hands.
* The Picture of Dorian Gray by Oscar Wilde is modeled after the Greek character of Narcissus and even painted dressed as him at one point.
* The Picture of Dorian Gray, Dorian is kept eternally young while his picture turns hideous and ancient. When he destroys the picture, his servants find the picture of a young Dorian and a crumpled, ancient corpse on the floor, only recognizing him by his rings. An extreme example as by the calendar Dorian should be barely middle-aged — about 40 — by now anyway (although he's implied to have led a reckless and toxic lifestyle).
* The Picture of Dorian Gray: Gray's fiancée commits suicide. Later that day, he enjoys the opera with his friend. The next day, he claims that he was simply in control of his emotions and, after he had been done with the emotion of sadness, he simply moved on. Leads to a funny conversation with Basil when he accuses him of being kind enough to console him but showing frustration that he is already consoled.

* The Picture of Dorian Gray is adored by everyone around him and described as enormously attractive, mostly by other men. The vanity that follows becomes the driving force of the plot.
* The Picture of Dorian Gray is an example, saying whether or not the speaker personally believes an idea is completely irrelevant to its value and saying anything and everything to get a rise out of others.
* The Picture of Dorian Gray is a particularly anti-semitic example even for Victorian times. He's repeatedly described as old, vile and disgusting. Though he claims to have a passion for Shakespeare, his productions are cheap and shabby. He's obsequious towards high-class customers and wears an enormous diamond on his shirt.

* The Picture of Dorian Gray. The book is kind of vague about it, but many adaptions show all the gruesomeness.
* The Picture of Dorian Gray: the caveat is that the immortality wears off if the titular picture is destroyed.
* The Picture of Dorian Gray. The eponymous portrait changes when no one looks at it, and its first change is a subtle alteration in the expression. Most of the remaining changes are more obvious. The character depicted by the portrait doesn't change at all—in appearance, anyway.
* The Picture of Dorian Gray to have his painting take on all the outward consequences of his evil.
* The Picture of Dorian Gray to his true age: a decrepit, hideous old man. And he dies.
* The Picture of Dorian Gray was destroyed. Not only his physical appearance was immune to aging; his body didn't incur the ravages inflicted by his hedonistic lifestyle.

* The Piecemaker was originally a cart-mounted ballista intended for knocking down city walls, before Sergeant Detritus realised it was the perfect size for a troll to wield as a hand weapon. At first it fired a six-foot-long steel arrow, but is now modified to fire a huge amount of arrows in the general direction it's pointed at (and by general direction we mean standing directly behind Detritus is the only safe location... most of the time). The enormous forces the arrows are exposed to mean that after being fired they promptly turn into an expanding cloud of flaming shrapnel of incredible destructive power, to the point that Detritus isn't actually allowed to fire it at people — generally, the Piecemaker gets employed when the Watch needs a gate or a wall to not be there anymore.
* The piece of armor known as the "Pink Leotard" is a staple of the series. Only female characters can wear it, and it's actually one of the most powerful pieces of armor you can buy in the game. (Fanart of various characters wearing it is popular in Japan.)

* The Pieces Lie Where They Fell did a number on him, since he was born so late in their lives and they no longer knew how to relate to a young child.
* The Pieces Lie Where They Fell, Discord informs the Bearers of how Balance did this to them in order to make them into the Bearers of its Elements, showing them what their fates could have been if not for said screwing. The Bearers react with stunned disbelief at first, but then all agree that the friendships (and in a few cases, love partners) they've gained since then have been worth it.
* The Pieces Lie Where They Fell, Discord mentions to Gentle Step that he needs to drop in on Tirek and give him an atomic wedgie. Gentle responds rather dryly (and to Discord's great amusement) that that'll be quite a feat, since Tirek wasn't wearing pants or anything else the last time she saw him.
* The Pieces Lie Where They Fell: Downplayed with Reel, AKA Kamen Rider Skull II - he only shows up a few times, and they're all in alternate-continuity versions of the Pieces-verse (published as omakes).
* The Pieces Lie Where They Fell: Equestria fought two during the thousand-year timeskip between the prologue and first chapter.
* The Pieces Lie Where They Fell: Four of the group come to help Page Turner by jumping (or flying) out an upstairs window when she's protecting a Changeling nymph from a group of bigots.
* The Pieces Lie Where They Fell, Gentle and Memorizing share their first kiss in the rain, leading to Gentle teleporting them back to her house.
* The Pieces Lie Where They Fell, Gentle Step and Memorizing Gaze go on what Memorizing calls a "get-to-know-your-new-employee meeting" in chapter 8. Needless to say, nobody else is buying it when they insist that they're not a couple.
* The Pieces Lie Where They Fell if she found out Night tried to keep his health issues (his wing and heart checkup) from her. In order to avoid it, she informs Night that she'll be letting Page know the full results (with Night Blade's reluctant agreement) as soon as she can.
* The Pieces Lie Where They Fell: In chapter 24, Night Blade meets psychiatrist Sound Mind, who mentions an incident where she noticed her wife was acting normal, but she could tell something was "off", and soon found out her wife had caused a minor flood in her study and was trying to replace all the damaged books without her noticing.
* The Pieces Lie Where They Fell - in chapter 5, Xvital has just entered the kitchen of their hotel penthouse suite and sees a mare working on a cake. From the smell, she deduces what kind it is, and asks "Mango cake?" The chef, who is still frosting the cake and knows exactly what she means, jokingly but truthfully responds with "That's my cousin's name, actually."
* The Pieces Lie Where They Fell in the heat of battle, Wind Breaker starts retching when he has a moment to think and it finally hits him what he'd done.
* The Pieces Lie Where They Fell in the non-canon omake chapters, where he has a tendency to pop in and give some information to the characters before disappearing again. His words are chosen to be truthful, but careful not to spoil the plot.
* The Pieces Lie Where They Fell is at one point, which serves to break the tension between two of her teammates when they see it.
* The Pieces Lie Where They Fell is that ponies have come to view it as a sacred number.
* The Pieces Lie Where They Fell: Literal example with Reel the omake character - he originates from a fanfic that Anon e Mouse Jr. has in development, in which he ended up in an alternate version of Equestria that he now calls home. He now pops into A.R. versions of other universes from time to time.
* The Pieces Lie Where They Fell makes an appearance in chapter 41, albeit not named, wanting a trio dance with Night Blade and Page Turner, who accept.
* The Pieces Lie Where They Fell: Night Blade rips out a pony's throat with his teeth during the battle between the new Bearers and Sharp Point's gang.

* The Pieces Lie Where They Fell, Night Blade's brother Deep Blade mentions that he's had to deal with a few who wanted to marry into his family (who are nobles and thus rather wealthy and influential), and tried to manipulate him into making a relationship permanent. This is a big part of why he has a personal lawyer, to deal with ponies like that.
* The Pieces Lie Where They Fell, Night Blade's older brother Deep Blade has a well-deserved and self-admitted reputation as a playstallion. However, he always makes it clear to his partners from the start that it's casual, with no strings attached. Not all of them believe him, or try to make more out of it than Deep intended.
* The Pieces Lie Where They Fell, reveals that Tartarus is subject to this, at a month-inside to day-outside ratio.
* The Pieces Lie Where They Fell: Rex tries to stay calm and dignified most of the time, but he's not above having a little fun every now and then, like teasing Vix-Lei with his reaction to the idea of setting her on fire.
* The Pieces Lie Where They Fell: Some believe Celestia and Luna are still responsible for the sun and moon rotating around the world, even a thousand years after their deaths, while others, including Rex, believe gravity is responsible. He also firmly believes that magic, or thaumatology as he calls it, can be broken down into and understood in terms of scientific principles.
* The Pieces Lie Where They Fell, Sweet Surprise explains that she and her marefriend and coltfriend had a private wedding in Las Pegasus so they wouldn't be swarmed by the press and media.
* The Pieces Lie Where They Fell, the existence of demons is this after the incursion that saw Gentle Step promoted to Captain-General. Before that, there were just legends, but then a number of civilian witnesses saw the demons in the flesh and spread the word to others about them being real (though not how many or what kinds there are) before the Guards could stop them. Since then, the Guards don't officially talk about it, but they don't have any way of keeping the truth hidden anymore.
* The Pieces Lie Where They Fell their positions, being highly skilled in combat and other related areas.
* The Pieces Lie Where They Fell. The others also break out due to other key mistakes the Nightmare made in their own illusions.
* The Pieces Lie Where They Fell: The overall story revolves around a new generation of Element-Bearers, succeeding Twilight Sparkle and her friends. It also features the omake-exclusive character Reel, who inherited the powers (and then some) of Sokichi Narumi, Kamen Rider Skull, after someone else recreated them and tried to use them for evil.
* The Pieces Lie Where They Fell: The spirit of Balance is bound by this. The more information they give the new generation of Bearers, the more they also have to share with the villain.
* The Pieces Lie Where They Fell, though Death is able to bypass them if they choose when a Power is involved.
* The Pieces Lie Where They Fell to other pieces of fiction that he likes, though usually just as background details.
* The Pieces Lie Where They Fell to the rest of the Bearers, and accidentally referred to two of them by their codenames where Vix-Lei could hear it in the second story.
* The Pieces Lie Where They Fell, unfortunately, as Sunset manages to get her hands on it and put it on.
* The Pieces Lie Where They Fell, Violet Lulamoon insists (truthfully) that she and her lieutenant Lunar Light are this. Her fellow captain Sweet Surprise isn't convinced.
* The Pieces Lie Where They Fell: Vix-Lei the minotaur, being loud, strong and friendly.
* The Pieces Lie Where They Fell when he's identifying Xvital and her Element, saying that Magic is the one who "makes it all complete".
* The Pieces Lie Where They Fell, when Sweet Surprise's marriage is revealed, she

never wore her wedding ring at work (as it didn’t fit on her helmet) and never otherwise mentioned it because it never came up.

* "The Pier", a strange creature stalks a bird-man as he fishes for a meal. The creature regurgitates one of its fish-like young into the water, and the child is "caught" by the bird-man who promptly swallows it whole. The baby then starts nibbling on the bird-man's stomach lining, causing him to collapse in agony. The creature grabs the bird-man and forces even more of its young into his throat. The short ends with the children gleefully munching away. Moral of the story? Always chew your food.

* The Pigs Ear; the barkeep of the titular pub is, indeed, solely addressed as "Barkeep." It may well be his real name.
* The Pigs Ear, two applicants for a bartending position play the race card when they're turned down. The black guy was actually rejected for not having any arms, while the Medusa turned several people to stone, including the interviewer.
* The Pigs Ear. When Barkeep is looking for some hired help, a couple of the rejected applicants assume they didn't get the job because of their race, even though poor Barkeep was thinking of something completely different (like the black guy with a pair of hooks instead of hands).
* The Pig War, a territorial dispute fought in 1859 between American and British military forces in the San Juan Islands (located between British Columbia and what would later become the state of Washington). The whole thing escalated from an incident where an American farmer shot a British pig which had been digging up his potatoes. After word of the increasing tensions finally reached both governments, orders were quickly dispatched ordering forces on both sides to stand down and get back to whatever they were supposed to be doing. Ultimately, the only casualty was the British pig.
* The Pilgrims of Rayne, Third Earth is like this - all the cities are underground and nature began to recover. Of course, this was after humanity had pretty much strip-mined the planet.
* The Pilgrim's Progress each focus on a select few portions of Bunyan's long and highly episodic morality tale.
* The Pilgrim's Progress, straying from the path results in either death or a deadly situation.
* The Pilgrim's Progress the City of Destruction (the main character's hometown) will be destroyed in the end of days by fire and brimstone, prompting him to escape to Celestial City (heaven).
* The Pilgrim's Progress: Unsurprisingly, the character of Atheist gets depicted this way, since in the story Heaven is a place that you can actually see and walk up to, yet he claims not to have found it after twenty years in searching. Hopeful says he is "blinded by the god of this World" (i.e. Satan).
* The Pilgrim's Progress, when Great-Heart fights the giant, Maul. Both combatants tire after a while, and take an hour-long break before resuming.
* The Pilgrim's Progress. With its protagonist named Christian and his sidekicks Faithful and Hopeful and such highlights as Christian being evangelized by a guy named Evangelist, saved from disaster by a man named Help, given worldly wisdom from Mr. Worldly Wiseman, tempted by a prostitute named Wanton, attacked by enemies named Envy and Superstition...
* The Pilgrim's Regress". John doesn't reject her, but Media says that their dream is broken and she's lost him forever. She darts off, saying she means to kill herself. Gus is unfazed, as apparently she threatens this all the time.
* The Pilgrim's Regress, Mr. Sensible likes to drop quotes (often in different languages) into his conversations. Vertue calls him on taking at least one quote out of context; the author he attributed it to had actually brought up that point of view to find fault with it. Mr. Sensible just tells him that this is a gentlemens' social visit, not a classroom.
* The Pilgrim's Regress. The son was a pathological Freudian who claimed every disagreement with his position was a self-serving rationalization. "Pilgrim's Regress" is subtitled as a "defense of romanticism" (among other things). Later editions include a long postscript in which Lewis, a literature professor by trade, dissects about a dozen different meanings of "romanticism" and discusses each one.
* The Pilgrim's Regress: Vertue, John's friend, becomes convinced for a while that flesh is inherently evil and so proclaims he's going to make himself miserable in

as many ways as he can think of to mortify it. He's just recovered from a major illness, yet goes off into the mountains. When John tries to follow him, he angrily threatens him, saying that friendship is another form of pleasure.
* The Pilgrim's Regress" while he's getting Mr. Sensible's work done. When Drudge understandably decides to leave with the heroes, Mr. Sensible sees it as gross mistreatment. He says that he'll have to talk to some of his friends, who may have mechanical contrivances or members of a servant race to supplement the loss.
* The Pilgrim, this is how the movie establishes that Charlie is an escaped convict on the run.
* The Pillar of Skulls (see above under Tabletop Games) is visited in
* The Pillars are technically more of a representation of the state of Nosgoth as a whole, and they are maintained by their nine guardians, whose states of mind the pillars reflect. Alternatively, the player can choose to save the pillars by killing himself (him being, unknowingly, the last pillar guardian), but canon says that he chose not to, condemning the pillars to eternal ruination.
* The Pillars of Creation series, Jennsen and Sebastian pull this off to avoid being noticed by a squad of D'Haran soldiers.
* The Pillars Of Equestria are an even more extreme example. Unlike the princesses who at least have some experience being long-lived relics, these fellas are just a group of regular ponies who were sealed in limbo for thousands of years and ultimately released. There's a few scenes of them wandering modern Equestria and marveling at how everything has changed, and an episode where Rockhoof struggles so hard to fit in he even considers being sealed away again.
* The Pillars of Reality, Alain has trouble with the concept of being in love. For that matter, he has trouble with the concepts of friendship, gratitude, thanks, and help.
* The Pillars of Reality, Mages can summon various kinds of magical creature; trolls and dragons, for example. When Alain sees a steam train, he mistakenly assumes that it's a creature somehow "summoned" by the Mechanics via a parallel technique.
* The Pillars of Reality of magic aimed elsewhere can still be transmitted to people (for example, heating the air next to a person to burn them).
* The Pillars of Reality she knows) and defers the discussion, therefore missing some important information.
* The Pillars of Reality, the Guild of Mechanics has a lot of relatively advanced technology, including rifles, radios, trains, and rudimentary computers. However, it is quite insistent that nobody else can have this stuff, which naturally generates a lot of resentment among people who have to live with medieval-ish technology. Part of the plot of the first book deals with a city which tries to defy its enforced technology level.
* The Pillars of Reality, the Mages and the Mechanics are the world's dominant powers, one using magic and the other machines. However, it's more a cold war than a direct conflict, with members of each Guild taught that members of the others are just frauds and posers who aren't even worth challenging.
* The Pillars of Reality, the Mages and the Mechanics each teach their students that the abilities of the other side don't really exist, saying that it's just tricks, illusions, and sleight-of-hand.
* The Pillars of Reality, the Mages teach their acolytes that nothing is real and that nothing matters. However, even Alain (who starts out pretty indoctrinated) realises that their philosophy has holes. He notes that the senior Mages never seemed to think that failures on the part of their acolytes "didn't matter", for example.
* The Pillars of Reality, the Mechanics Guild routinely destroys all letters to and from common-born members and their families, so that both sides will come to the conclusion that the other no longer cares about them, thus helping them ensure that members have no loyalties outside the guild. Mari actually believed this until Alain pointed out that this explanation came from a guild that had lied to her about so much else, and had been trying to kill her for several months.
* The Pillars of Reality, there are a lot of ordinary people who resent the power

of the Mages and the Mechanics, and some of them want to do something about it. The first major attempt is attempting to secretly reproduce the technology of Mechanics' rifles; it's stopped, but the issue won't just disappear (despite the Guild tending to act like it will).
* The Pillars of Reality, when Mari is captured and locked up, Alain breaks into the dungeon simply by walking right through the walls with magic. However, he then lacks the strength to do the same for their escape, leaving him stuck in the dungeon too. He admits that he didn't think it through properly. Fortunately, he does have enough strength to create a hole big enough for Mari to tamper with the lock.
* The Pillars of the Earth and her running into the woods. Jack is understandably bewildered by all of this.
* The Pillars of the Earth both take place in the same fictional priory in medieval England, in the 12th and 14th centuries respectively. They are both about a genius architect whose building project and love life are constantly threatened by conservative townsfolk, the church, politics, and petty rivalries. In both, the female lead and the architect's lover is a strangely liberated woman who is awfully assertive and independent for the middle ages. Both feature as an antagonist an evil rapist knight. Both turn on a closely guarded secret about the royal family (the sinking of the "White Ship" and death of Henry the Young King in the first, the murder of Edward II in the second). Both have the female lead traveling to the site of a great battle (Lincoln in the first, Crecy in the 2nd) to ask a boon of the king; both have the evil knight fighting in that battle.
* The Pillars of the Earth dies of the Black Death, gets back together with Caris for a while, but circumstances force another breakup, and he has an affair with Lady Philippa, his brother's wife (loveless forced marriage), but Philippa gets pregnant by him and has to pretend the child is his brother's, and her departure coincides with Caris finally getting out of the nunnery.
* The Pillars of the Earth is set off by a broken Arranged Marriage, which becomes a major local scandal.
* The Pillars of the Earth is that people will put their own ambitions over what is morally right and what is best for everyone. All of the villains are consumed by the desire to rise above their current station and will do horrible things in the attempt. Further, the morally ambivalent characters will repeatedly make decisions based solely on what is best for their advancement. Even the heroes are sometimes accused of being too arrogant or ambitious, though unlike others they do so in the pursuit of more noble goals.
* The Pillars of the Earth Jack tries to stop the wedding between Aliena and Alfred, but for this, he needs to escape the monastery. He ultimately fails, and while his mother actually goes there and curses the marriage, she doesn't stop it.
* The Pillars of the Earth old, long-discredited idea that Beckett's canonization was a political maneuver. He doesn't understand medieval manorialism (he seems to think rents were owed individually rather than by the village collectively, reading the Post-Reformation landlord system back into the 12th Century). Maybe we should amend his claim to "I researched the architecture."
* The Pillars of the Earth, Remigius asks this to Philip when he's wandering the streets as a beggar. Instead, Philip offers to take him back (as a novice).
* The Pillars of the Earth There is one point in the story when Philip gives up all hope, but it only lasts until Jack returns from France and decides to build the cathedral in Gothic style.
* The Pillars of the Earth: This is a 2010 miniseries adapted from the novel of the same name.
* The Pillars of the Earth: Time skips happen between every part. The whole story is set in about forty years of time (or about fifty if one counts the prologue), which is not surprising considering the novel is about building a cathedral.
* The Pillars of the Earth: William Hamleigh is (briefly) an earl. He's also a brutal, ignorant man who rapes and pillages with nary a second thought.
* The Pillars of the Earth, William Hamleigh rips the clothing of some women, Aliena in particular, as a form of threat or lust.

* The Pillars of the Earth. William was one of the assassins, and it was Philip's idea to make a saint of him. A large section of the book can also be described as "how Jack introduced Gothic architecture to England."
* The Pillowman. Ariel, originally being depicted as ready to kill Katurian at the word, backs down completely at that point.
* The Pillsbury Doughboy goes through airport security but can't resist being tickled when the security guard tries to pat him down
* The Pillsbury Doughboy is possibly the ultimate example of this trope? He's been cheerfully selling his baked brothers down the river for over fifty years.

* The pilot episode gave a clever twist to the usual formula: Dan initially concludes that the reason he keeps jumping back in time is to prevent Neal Gaines from committing suicide, but in the end he realizes that his real purpose was to prevent him from
* The pilot episode gives a history of the Krampus. Interestingly, they say that the Krampus was a whole race of creatures under Santa Claus's control rather than one being. They also make reference to a mention of the Krampus by one of the Brother's Grimm, which also leads to a discussion of Frau Perchta.
* The pilot episode had Tommy inspecting the toilet to find out what it does. He accidentally ends up flushing some toilet paper and making a mess in the bathroom, causing the toilet to overflow.
* The pilot episode has an offhand comment about the squad getting a call about two men having sex with a corpse, much to Cragen's disgust. A later episode has Cassidy testifying in a necrophila case (possibly the same one), where among other things, it turns out he doesn't know the proper term for this act.
* The pilot episode has cops John and Talia investigating a lead at a gym. The owner claims nothing is going on and they can search the place. A former construction worker, John notes that in the hundreds of houses he's been in and helped build, he's never seen anyone put a circuit breaker next to a water pipe. He opens the "breaker" up to show a hidden cache of drugs and money.

* The pilot has also received criticism from some in the LGBT community primarily due to Katie's "I don't touch the gays" comment
* "The Pilot" has an interesting take on this trope, as we finish the episode believing Heather died, and it takes until the last episode of the series for it to be revealed that she was simply converted into a different type of life form.
* The pilot has Cameron telling the FBI a plane did not actually explode, citing how an explosion in such an enclosed hanger should have caused far more damage and the details of how it was literally driven away.
* The pilot has the suspect Peter Saldua turn up dead. It turns out that Saldua was the one who killed the victim, her husband manipulated him into doing it and killed him, and
* The pilot included a Japanese woman with a substantial role in the "bridge" command crew, but she was
* The pilot in Kim Wilde's song "Cambodia" goes missing in action just when his wife is expecting him to return home.
* The pilot left the audience wondering who the shadowy individual directing new bad guy race the Suliban was. At the end of the series, they're still wondering, and apparently no one behind the scenes gave it much thought either. Instead of answering the questions the Temporal Cold War threw up or explaining characters' motivations, the show instead introduced more and more factions, their motives and goals just as nebulous as the ones that were already there. When a new showrunner took over for the beginning of Season 4, he introduced yet

* The Pink Panther (1963), a really drunk princess talks with the tiger carpet on which she's lying.
* The Pink Panther (1963): During a costume party at Dala's villa in Rome, Sir Charles and his nephew separately attempt to steal the diamond, only to find it already missing from the safe.
* The Pink Panther (1963) ensues, as Clouseau keeps almost discovering Charles.
* The Pink Panther (1963) follows inspector Jacques Clouseau as he travels from Rome to Cortina d'Ampezzo to catch a notorious jewel thief known as "The Phantom" before he is able to steal a priceless diamond known as "The Pink Panther".
* The Pink Panther (1963) included a costume party in which Inspector Clouseau attempted to remain incognito wearing a suit of armour, complete with clanging faceplate. He spends some of the evening dancing.
* The Pink Panther (1963): Inspector Clouseau and the police are chasing both Phantoms, and everyone is in a ridiculous costume: the Phantoms are dressed as gorillas, Clouseau is a knight, and two police officers are in a zebra costume. For about five minutes, they somehow keep driving through the same intersection, passing the same disbelieving spectator with a bottle of whiskey. Eventually the drunk gets a chair and sits down to watch the rest of the shenanigans.
* The Pink Panther (1963), Sir Charles lures Princess Dallah to his room and she gets drunk on champagne. She passes out and he puts her into his bed. She wakes up the next morning not remembering anything.
* The Pink Panther (1963), "The Phantom" would leave behind a monogrammed glove at every robbery.
* The Pink Panther (1963) when Clouseau is suspected of being the jewel thief. When questioned in this matter about how his wife (who is actually the thief) is able to afford such expensive clothing, on his police salary, Clouseau naively asserts that she's very frugal with the housekeeping budget.
* The Pink Panther (1963) when Mr. Tucker says, "Don't do that old man" and opens the door.
* The Pink Panther (1963) where Sir Charles and his nephew are cracking a two-sided safe, unaware of each other, wearing identical gorilla costumes.
* The Pink Panther (2006), Clouseau gets his hand stuck inside a valuable looking vase:

* The Pink Panther (2006). "Isn't it strange that the dead man landed exactly in this chalk outline?"
* The Pink Panther (2006). There's no actual UST, but Clouseau keeps saying exactly the wrong thing.
* The Pink Panther (2006), while talking with casino owner Larocque, Clouseau gets his hand stuck in a vase and struggles for several minutes trying to get it out. Finally, he asks the owner:
* The Pink Panther 2, is one of these until the very end, where he reveals that he was a Chessmaster after all.
* The Pink Panther, and "playing the violin" is one of many things he isn't good at.
* The Pink Panther as a Sheriff in a Western movie, placing a wanted poster of a criminal. He runs into the guy who clearly is not amused. He starts changing some stuff on the poster, such as adding a pair of glasses and a beard to the guy's face in the poster, which also appear in the real guy's face. The scene ends with the Pink Panther pulling out a gun and shooting the poster. You can figure out what happens then.
* The Pink Panther As "Pinkfinger", the panther slinks along a high-rise ledge when

an enemy agent places a peel in his path. Skids off the ledge, into a garbage can, and the peel lands full on his noggin.
* The Pink Panther believes he is this, and will pursue his quarry across continents to bring them in: even if it is almost ivariably the wrong person..
* The Pink Panther, but wasn't released until early 2006, largely due to a studio merger in the interim. There was also some editing done, in order to re-cast it as a family-friendly comedy rather than the more ribald, raunchy film of its original iteration.
* The Pink Panther cartoon "Lucky Pink" is a would-be bank robber who finds a horseshoe. But contrary to tradition, it brings him nothing but bad luck. Every time he tries to get rid of the horseshoe, the Panther returns it to him, under the presumption that the guy is missing it.
* The Pink Panther cartoons took this to extremes sometimes, with two characters continually blasting each other point blank with blunderbusses, resulting in nothing more than blackened skin. Even for a cartoon, it gets ridiculous after the twentieth shot to the face.
* The Pink Panther causes this in two of his shorts, "The Pink Blueprint" and "Prefabricated Pink".
* The Pink Panther: Chief Inspector Jacques Clouseau of the Sûreté is a stealth example. On the surface, he's a bungling incompetent but try to hurt or kill him and the would-be assassins will wind up killing each other or themselves...
* The Pink Panther, Clouseau develops a love for hamburgers and can't pronounce the word properly. At the airport, he tries to sneak a bunch of burgers onto the plane, but a police dog smells them, and the police arrest him thinking he has a weapon on him, since he can't tell them otherwise.
* The Pink Panther concerned the titular character trying to get sent to prison so he can get a Christmas dinner.
* The Pink Panther due to feeling it's overcomplicated. Their boss acts sympathetic and convinces them to handle a smaller job for him: kidnapping Clouseau. However when they go to kidnap Clouseau, the two are murdered by another criminal and evidence is planted on their bodies to manipulate the detective.
* The Pink Panther films by Cato, Clouseau's manservant. An expert in martial arts, Cato spends nearly all his time launching sneak attacks on his master, in order to keep him prepared for a real attack.
* The Pink Panther films had a gag where Kato is standing on Clouseau's shoulders to see through a window, but can't. Clouseau orders them to switch positions "because I'm taller than you!"
* The Pink Panther franchise, Clouseau, Dreyfus, Francois, Cato, Balls, and Cunny have all been caught in tremendous explosions with these results.
* The Pink Panther franchise, Inspector Clouseau's longtime disguise provider is Professor Auguste Balls, whose marketing slogan is "When duty calls, look no further, you've got Balls!"
* The Pink Panther (Gold Key, March 1972), the adaptation of the Inspector cartoon "Le Quiet Squad" has this exchange (the story had the Inspector charged with keeping the Commissioner from being disturbed from noise):
* The Pink Panther has been one of these for Owens Corning fiberglass insulation for many years.
* The Pink Panther has the inspector looking straight at the camera and going, "And I will find you, killer!"
* The Pink Panther, he gives surprisingly subdued reactions — mostly, calling to his assistant that "I seem to have just _____."
* The Pink Panther his unrestrainable officer, Jacques Clouseau, when his antics got out of hand.
* The Pink Panther holds up a sign that says "Here we go again" after encountering a second department store janitor at the end of "We Give Pink Stamps".
* The Pink Panther horse as an antagonist to the Panther in several shorts. Every time the Panther gets hurt or otherwise is frustrated, the horse lets out a literal horse laugh.

* The Pink Panther in countries where that character is more familiar.
* The Pink Panther Inspector Clouseau will either destroy your property, his own, make you insane, or cause your death. All this out of pure clumsiness.
* The Pink Panther in the 1978 cartoon "Sprinkle Me Pink". In the end, a visit to a therapist allows the panther to will the cloud away-just in time for an actual thunderstorm to come rolling in.
* The Pink Panther involves the Panther stealing a lumberjack's home piece by piece (and driving him insane in the process) as revenge for cutting down his tree.
* The Pink Panther keeps preventing the Panther from getting into the estate to deliver the package. In another attempt to evade the dog, the Panther accidentally drops the package from the sky into an open manhole, where it floats down the sewer line, and just as the clock strikes twelve, the bomb explodes right under the manhole the terrorist is standing on, sending him flying into the estate yard where the guard dog chases him away!
* The Pink Panther-led reboot yielded one sequel. Adding in the theatrical animated shorts based off the original films' title sequences (two different series: one for the Panther, one for Inspector Clouseau), the three made-for-TV series and four specials the Panther had after that, the Panther's ongoing appearances as a corporate mascot (Owens-Corning and Sweet 'N Low), and miscellaneous merchandise, that's a lot of green for something pink.
* The Pink Panther "Little Beaux Pink" sees the antagonist wheel a wagon filled with hay to the edge of the hilltop overlooking the pasture, take a lighter to it, and... FOOM!!! When the smoke clears, the wagon isn't the only thing to become dust.
* The Pink Panther — Comedy series. 7 films featuring Peter Sellers since 1963, 3 more without, and a two-film reboot with Steve Martin.
* The Pink Panther movies is probably the best-known example. Though he seems well-aware of his cluelessness.
* The Pink Panther often use very bizarre occurrences in otherwise mundane situations, like when a deck chair randomly comes to life and tries to eat the Panther.
* The Pink Panther: One short, "Pink Campaign", has the Little Man chopping down the tree that the Pink Panther's house is located in, destroying it. Enraged, the Panther gets revenge by following the Little Man home and stealing his house, piece by piece. Long story short, the Little Man winds up going insane.
* The Pink Panther pours Pink Panther Flakes into a bowl, and pours milk on top. However, the Pink Panther image on the front of the cereal box comes to life and reaches outside the box, grabbing a spoonful of cereal and taking two bites, munching down on the cereal. The Pink Panther, angered, grabs the bowl from the box art come to life, and the box art Pink Panther grabs back, pulling the bowl of cereal towards him. Soon, there is a tug of war. The force of the tug sends the box of cereal and the box art Pink Panther careening out the window. The Pink Panther looks in astonishment, then runs out the room and down a flight of stairs as the box of cereal falls through the air. The box art Pink Panther pulls out two fans and waves them rapidly, attempting to create enough air resistance to break his fall. He lets go of the fans and the box continues to plummet. The real Pink Panther runs down two more flights of stairs. Meanwhile, the box art Pink Panther opens an umbrella to create further air resistance, but the umrella immediately collapses, and the box continues to fall. Just in time, the Pink Panther exits the building and stands in front of a cement mixer, raising his arms to catch the box, but he is facing the wrong direction. The box falls behind him and into the cement mixer, splashing into the wet cement. The Pink Panther reaches into the cement mixer and pulls out a brick of dried cement, then pulls out a pencil from his pocket and draws a line, bisecting the rectangle, then picks up a mallet and smashes the cement block, causing it to split perfectly into two halves, its inside hollowed and containing the cereal box. The Pink Panther grabs the cereal box, and draws jail bars over the image of the Pink Panther on the box. The box art Pink Panther grabs the bars and shakes them so angrily, the box begins to shake, but it is no use, as the Pink Panther sits back and enjoys his Pink Panther cereal. The

box art Pink Panther makes one more attempt to grab at the cereal bowl, but his reach is blocked by the bars, and the Pink Panther greedily pulls the bowl away, turns his back, and gives a nasty look to the Pink Panther on the box. With his back turned, the Pink Panther enjoys the cereal solely for himself.
* The Pink Panther series, Chief Inspector Dreyfus (Herbert Lom) is called on to make a speech praising Inspector Clouseau (Peter Sellers). With everything neutral (there was no one else like him) he says, he bursts out laughing, while others believe he has lost control of his emotions and is crying. Once at the funeral of the supposedly dead Clouseau, and once when programming the computer which will find the missing Clouseau.
* The Pink Panther short "Pink, Plunk, Plink" ends with the Panther conducting the theme from the movie, and being applauded by the only person in the audience - a live-action Henry Mancini.
* The Pink Panther short, "Psychedelic Pink", the Pink Panther (the cartoon character, not the gem) is trying to read "The Love Life of a Panther (uncensored)". He finds a room with a chair and a lamp. As with most light bulbs he encounters when he's trying to do something, however, it has a habit of turning off when it's least convenient to turn it on again. He sees a vending machine for lights, and having the wrong kind dispenses three times, he gets the idea to use the bulb resulting from the idea as a regular light bulb. It is unknown whether or not it would have worked, though, because it gets a quarter-second of operation before the lampshade falls down, causing the rest of the lamp to disappear.
* The Pink Panther shorts had laugh tracks added when they were shown on television. This stuck out even more in a program that had almost no dialogue at all.
* The Pink Panther short where the Panther makes several attempts to cross a busy street ends with him succeeding by dressing up as a mother cat with kittens, only to end up being crushed by a piano on the other side.
* The Pink Panther Strikes Again. An assassin uses a blowpipe disguised as a clarinet (or possibly uses a clarinet as a blowpipe, the movie isn't clear).
* The Pink Panther Strikes Again and promptly tries to improvise a summation with everyone present. Hilarity ensues as he completely bungles up all the facts.
* The Pink Panther Strikes Again: bed folding out of the wall and music. "I gave Cato the night off."
* The Pink Panther Strikes Again, but he can't bring himself to let his daughter suffer either.
* The Pink Panther Strikes Again, Clouseau is floated out of his apartment window by the inflatable hump in his hunchback costume, thereby causing him to miss the bomb Dreyfus sets off.
* The Pink Panther Strikes Again, Clouseau mounts Dreyfuss' body and attempts to give him CPR after the latter falls into a lake. Two older women view this and one calls Clouseau a pervert while swinging her purse at him, but the other seems rather giddy at the whole spectacle.
* The Pink Panther Strikes Again, Dreyfus demands that Clouseau be killed or he will destroy the world. Several nations send assassins to kill Clouseau at Oktoberfest in Munich, only for the assassins to wind up killing each other by accident or to stop their rivals from getting the credit.
* The Pink Panther Strikes Again, Dreyfus seems fully aware that he has turned into a Bond villain and he is clearly loving every minute of it.
* The Pink Panther Strikes Again, Dreyfuss orchestrates the escape of a prisoner being transported by train. He goes to the bathroom, then climbs out through the ventilator on to the roof of the train and into a waiting helicopter.
* The Pink Panther Strikes Again, Dreyfus, while trying to avoid Clouseau, steps on one, causing him to fall over in the water.
* The Pink Panther Strikes Again has the Inspector tailing the Panther into a movie theater, then into the screen through several parody movie clips — he ends up trapped in the screen as the Panther watches from the seats.
* The Pink Panther Strikes Again hijacks every TV signal in order to announce his death warrant for Clouseau. Problem: Nobody knows what he's talking about and are

more concerned that he interrupted the big football game.
* The Pink Panther Strikes Again in Clouseau's company causes Dreyfus to suffer a complete relapse and end up crazier than ever.
* The Pink Panther Strikes Again, Inspector Clouseau is accidentally propelled up and through a castle window by a catapult.
* The Pink Panther Strikes Again. It's not certain how much of the assassins killing each other is unintentional, though, since they're all competing to kill Clouseau; killing each other is also removing the competition, and is probably a secondary goal for all of them.
* The Pink Panther Strikes Again it was a bee, which Clouseau was chasing with a mace. He destroyed a priceless Steinway piano (Not anymore) when he swatted it. He then told the beekeeper that he might be missing a bee.
* The Pink Panther Strikes Again opens with Dreyfuss on the grounds of a mental hospital, cured and anticipating his release - then he's clocked in the head with a croquet ball and propelled into a lake - he staggers out and passes out on the grass. Clouseau (who of course launched the ball) rushes to administer resuscitation. He straddles Dreyfuss and thrusts repeatedly with his hands as he cries "OUT with the bad air, IN with the good! OUT...IN..." A passing patient witnessing this looking thrilled; her appalled guardian swats Clouseau crying "Pervert!"
* The Pink Panther Strikes Again plays a version of "Tiptoe Through the Tulips" instead of the usual Bach's Toccata.
* The Pink Panther Strikes Again, President Ford is watching his old college team play a game that has come to this when Dreyfus hijacks the airwaves and makes his demands. By the time broadcasting is restored, the game is over, and the President ignores the fact that a madman just blackmailed the world to demand that someone tell him who won the game.
* The Pink Panther Strikes Again taking a long time to activate before being used in an attempt to destroy England.
* The Pink Panther Strikes Again too cleanly for Dreyfus's tastes: "I want a crater! I want wreckage, twisted metal. Something the world will not forget!"
* The Pink Panther Strikes Again used to torture the professor's daughter was by scratching a chalkboard with a huge metal gauntlet.
* The Pink Panther, successfully framing him for the theft and getting Lytton off scot-free. It doesn't help that the fall guy accidentally reveals he has the diamond in the middle of the trial, as he's being cross-examined.
* The Pink Panther. The first time Sir Charles Lytton meets with Pepi, he breaks two of Pepi's fingers. On their next meeting, Pepi gets two more fingers broken. The third time, Sir Charles breaks Pepi's thumb. To add insult to injury (or injury to injury), Pepi gets a metal door slammed on his injured hand by his own boss.
* The Pink Panther theme, the sound of one pair of hands applauding is heard. When the Panther turns, he sees the amphitheater empty save for Henry Mancini, the composer of the theme, the audience member applauding.
* The Pink Panther, the Panther has broken into a magician's home and is squaring off against the magician's rabbit. At one point he decides to take a break and watch some TV, where there's a crime drama playing. The criminal on screen goes to the phone and dials, at which point the phone in the real world rings. The Panther picks the phone up, and the criminal pulls a gun and shoots him through the phone.
* The Pink Panther, the rock is truly alive and grows up into a massive boulder under his care.
* The Pink Panther: Two versions exist: the one from the 1980s by Merritt Foods and the newer one from Blue Bunny.
* The Pink Panther was known to smoke with a classy cigarette holder in his earlier shorts, though this trait was understandably dropped as the character was retooled over the decades to be more popular with children.
* The Pink Panther was specifically filmed in Borehamwood at MGM's British Studios. The biggest evidence of this is a scene where Inspector Clouseau runs through a room, out the window and into the Seine — which was just a large tank filled with thousands of gallons of water.

* The Pink Panther. When some appliance has enraged/attacked him, he would pound it until is totally destroyed and walk away, just for the appliance to leave a last "breath" and the panther hitting it one last time.
* The Pink Panther which predominantly featured the Panther's children, Pinky and Panky, as well as a rainbow-colored assortment of other panther children.

* The Pirate Alliance saga unearths a 13 year stand-off between Trafalgar Law and Donquixote Doflamingo. Law is determined to bring the latter to ruin
* The pirate and former Warlord of the Sea, Sir Crocodile led the Baroque Works, a fearsome organization of bounty hunters. Infiltrating the Baroque Works, Vivi and Igaram went undercover as bounty hunters as well, one of the reasons why Vivi met the Straw Hats in the first place. The top 5 of them were very strong bounty hunters, particularly Daz Bonez (Mister 1) and Bon Clay (Mister 2).
* The pirate Blackbeard was famous for mixing gunpowder into his rum, either because it actually tasted good, or to make himself look more badass. Not that he's the only one, mixing gunpowder with alcoholic drinks (specially brandy or plain wine) once was pretty common among military grunts. It probably has something to do with the rather sour taste of gunpowder vs. the sweet wine. (Same reason port & lemon was popular.)
* The pirate Mary Reade once won a duel by ripping open her shirt just as her opponent had lost his balance, and giving her the chance to kill him in a single strike.

* The Pirate Movie and pairs everybody else off. Including, since there are more pirates than sisters, pairing two of the male pirates together.
* The Pirate Movie, Frederic is forced to walk the plank when he leaves the pirates.
* The Pirate Movie, his only film role. Hamilton was nominated for the Razzie award for Worst Supporting Actor, and the film did poorly at the box office.
* The Pirate Movie, one of the police spots the camera and pushes it down when it is trying to film a group of police beating up a single pirate.
* The Pirate Movie. On their second run, the butler opens the door for them, leaving them to charge into the mansion. The pirates then carry the ram up a spiral staircase for no reason before dumping it on the second floor.
* The Pirate Movie seems headed for a pie fight when during the climactic fight a chef wheels out a covered cart. A pirate exclaims, "Oh no, not a pie fight!" and the chef lifts the cover and announces that the fight will be with pizza pies. Mass pizza combat ensues.
* The Pirate Movie, shares its source material's 21st year/birthday plot point.
* The Pirate Movie, the enemy Chinese pirate says/sings "Spare me!" and the Pirate King says, "Ooh, an Irish Tenor, no less! We could use an Irish Tenor, lads!" He accidentally stabs the man in the crotch and the guy goes "yeeOOOWWW" in a very high-pitched voice. "Soprano! Even better."
* The Pirate Movie, the lead policeman reads "Anything you say may be taken down..." to which all the Stanley daughters yell "Knickers!"
* The Pirate Movie, the pirates use a battering ram to... ring the doorbell. On their second charge, the butler opens the door and they charge through.
* The Pirate Movie when Mabel first sees Frederic on the beach. Somehow they end up riding horses on the beach moments later.
* The pirate painting from the beginning of the show's theme song is an actual item sold at Hot Topic.
* The "pirate pamphlet", quoth the in-game description, "contains helpful tips on all manner of pirate activities, such as swabbing, quaffing, pillaging, and rapi...er, rapier-sharpening."
* The Pirate Pegasus features a bar in Thieve's Hold, a gathering place for pirates.
* The Pirate Pegasus features a liquid version of anti-magic that the villain, Korsan, embeds into his weapons, airship, and harness to protect from unicorn magic.
* The Pirate Pegasus, Korsan sports a large black cape to not only look good, but to also hide his deformed wings, any weapons behind his back, and his mechanical back piece from frontal view.
* The Pirate Pegasus: Occurs multiple times throughout the bar fights at Thieves' Hold.
* The Pirate Pegasus: When Korsan is attempting to attack Nitin Gale for talking about his past, November tries to stop the pirate, only to be tossed quickly aside.
* "The Pirate Planet", and is using the remains from the looting in a long-term plan to eliminate his (almost hidden) boss.
* "The Pirate Planet" and the Doctor mockingly tells her when they meet that it won't work forever even if she tries to take the energy from suns.
* "The Pirate Planet" from it, leaving behind a tiny husk, which its captain could collect as a trophy.
* "The Pirate Planet" give away gems like they don't matter because they can be found everywhere and periodically replenish themselves. This is because the planet, as the name indicates, loots other planets.
* "The Pirate Planet"'s lip was bitten by a dog, so in-story the Doctor hit his face on the TARDIS console. While not in the show itself, publicity shots for the serial show him making the most of the injury by wearing a sticking plaster for dark skin that stands out on his face, giving the impression of him having a funny skew-whiff moustache.
* "The Pirate Planet", the Captain gives this description: "The theory is very simple. You walk along it. At the end, you fall off. Drop one thousand feet. Dead."

Atypically, the plank is over a cliff, not the ocean (the Captain's ship is the entire planet of Zanak, and his base is in a mountain).
* "The Pirate Planet", the eponymous planet destroys other worlds by materialising around them, stripping them of their resources and shrinking them down to the size of a basketball, after which they are displayed in the captain's trophy room.
* The Pirate Planet", the Fourth Doctor reaches this point when the Captain shows him the remains of the planets he's destroyed:
* "The Pirate Planet" uses this trope by name; the Captain brags that he built his old raiding vessel, "with technology so far advanced you would not be able to distinguish it from magic."
* "The Pirate Planet" when the Doctor suggests that Zanak's new location, where Calufrax used to be, would be "a good place in the universe to settle down. You've got reasonable sun, good neighbors and some quite convenient stars for when you get round to ordinary space travel. I think you're going to be all right here."
* The Pirate Republic of Nassau itself only existed for roughly 12 years.
* The Pirates Covered in Fur after he fails to beat Michum and Tully in combat.
* The Pirates Covered in Fur, he would've killed five by the time the story wrapped up.
* The Pirate's Fate All of this is, of course, done in the name of making an interesting world.
* The Pirate's Fate is kicked off by this: Darious, a generally kind soul, has discovered the truth behind the folktale of magical coins that can change a person's identity. He assumes that by gathering all of them, one can make a wish to change anything in the world, and he intends to use it to better the world. Unfortunately, not everyone has such benevolent intentions for them, and the coins are, in and of themselves, dangerous enough...
* The Pirate's Fate, pretty much all females in the game have (often large) breasts regardless of species, from the mammalian Morgana to the reptilian Tam-Tam to the shark-like Breena.
* The Pirate's Fate since Mila’s larger mass and bust allows for warmer, softer, and more comforting hugs.
* The Pirate's Fate. Since she was suddenly always a princess, Rourkie the pirate simply never existed, and thus he managed to undo every single act of murder and destruction that he ever performed, and in the process wound up making some of his rivals very happy.
* The Pirate's Fate voice. The dissonance is entirely intentional; his internal vision of himself is out of whack, and is reflected in outward things.
* The pirates have spikes on their spaceships. Why? Because most of them are refitted TEC ships and
* The pirate ships are actually modified TEC frigates and cruisers (lacking special abilities and shields, but with the ability to steal money from their victims), which makes sense, given that the TEC, story-wise, is the largest and most diverse faction and the story has the war taking place entirely in their space. Luckily, they can't field capital ships.

* The Pirates! in an Adventure with Scientists by Gideon Defoe, in which the titular pirates and Charles Darwin are trying to work out a way to get to the top of Big Ben very quickly. After much pondering, they remember the airship moored nearby:
* The Pirates! In an Adventure with Scientists!) learns that the Pirate Captain has been pardoned by Queen Victoria, and thus is no longer eligible to be considered a pirate, he not only takes from him the Pirate of the Year Award, but also his pimped-out vest, hat, breeches, pirate badge and reduction card for the pirate shops.
* The Pirates! In an Adventure with Scientists!: Polly the "parrot" is actually a dodo, and still alive centuries after her kind were exterminated on Mauritius.

* The Pirates! In an Adventure with Scientists! quote "Well yes, but actually no" is actually a mishearing of the actual quote "Good guess, but actually no".
* The Pirates! In an Adventure with Scientists! takes this trope to its extremes by applying it to the entire main cast. The Pirate Captain leads a crew consisting of The Albino Pirate, The Pirate With Gout, The Surprisingly Curvaceous Pirate, and various others. Assuming they have actual names, we never learn what they are. The only crew member with a revealed name is Polly, their pet Dodo. The Pirate Captain's second-in-command is referred as only Number Two in the movie, but the credits and a DVD special feature short call him "The Pirate With The Scarf."
* The Pirates! In an Adventure with Scientists! uses two katanas during a fight scene.
* The Pirates! In an Adventure with Scientists!: When the pirates were parking their ship with a crash, there was a cat screeching.
* The Pirates of Dark Water, a massive pirate ship fashioned from the bones of a colossal sea monster. The jaws formed the ship's prow, resulting in a much more literal version of this trope than is usually seen whenever they opened to swallow a smaller ship.
* The Pirates of Dark Water features an episode in which Ren switches places with Bloth and Konk switches places with Niddler; Bloth orchestrated this with the assistance of his soothsayer Morpho as a way to get Ren's shipmates to trust him and get his hands on the treasures.
* The Pirates of Dark Water had the beautiful, bizarre, and geologically unstable alien water-world of Mer.
* The Pirates of Dark Water had the titular "Dark Water", an amorphous blob that roams the seas, devouring anything in its path.
* The Pirates of Dark Water, has Middle Ages level of civilization in a few island kingdoms. But everywhere else is filled with vicious pirates and bizarre beasts, with occasional savage tribesmen or fiendish swindlers to boot. And, large areas of the planet are getting eaten away by a substance of pure evil called Dark Water.
* The Pirates of Dark Water is to find the 13 artifacts required to neutralize it.
* The Pirates of Dark Water (Or being someone he doesn't like) is a good way to get dumped into it. The only survivors of this fate are Ren and Konk, and the latter lost his leg doing so.
* The Pirates of Dark Water: The intro to the first episode shows a dragon-like creature flying over a stormy ocean, only for a sea serpent to surge out of the water, snatch the dragon in its jaws and dive back into the sea.
* The Pirates of Dark Water, the Lugg Brothers excitedly headbutt each other.
* The Pirates of Dark Water. Tula and Ren try to rescue him, but any attack they try just passes through the pirates and Ioz's chains, while the pirates can hurt them. Tula comes up with a way to temporarily turn Ren into a ghost so that he can fight back and save Ioz.
* The Pirates of Dark Water was showing reruns of the show, they ran a bumper that flat out said the show was never finished and not to hold your breath for an ending.
* The Pirates of Dark Water. When Ren tries to apologize for his father jilting her, she absolves him and his father of blame, saying that she was the one who couldn't let go of the past.
* The Pirates of Dark Water?) with distinct slanted eyes. What species the Pirate Lord Bloth belonged to was similarly ambiguous, considering his immense size, blue skin, and unusual facial features. Most of Bloth's pirate crew was similarly humanoid but probably not human, though ambiguous cases like Konk and Mantis did exist.
* The Pirates of Malaysia has put his nephew Charles (Brooke's actual successor in real life) back on the throne.
* "The Pirates of Orion". When Captain Kirk asks the Enterprise computer the location of the nearest supply of the drug strobolin, the computer says "Beta Canopus. Four solar days away at maximum warp."
* The Pirates of Penzance, after "How beautifully blue the sky," Frederic implores the girls to depart quickly before the other pirates will find them. The girls have

not quite finished with their half of this brief song when the pirates interrupt and seize them.
* The Pirates of Penzance and ethics of the pirates, Frederic swears himself to killing all of his friends once his indenture is over because piracy is wrong. He interrupts the Major General's daughters stripping on the beach due to uh, honor. And when the Pirate King and Ruth reveal that due to his birthday, he's going to be indentured until 1940, they don't even try to enforce it on him — "we leave it to your honor."
* The Pirates of Penzance, based on it) features a band of matrimonially minded pirates who try to woo/capture the daughters of a Major-General. (It's a good thing the number of pirates and the number of daughters matched up and that, in the movie, the ugly daughter was willing to be matched with the ugly pirate.)
* The Pirates of Penzance, but still. Also, the daughters and pirates pair up.
* The Pirates of Penzance carry off a whole chorus of picnickers, intending to "marry them on the spot".
* The Pirates of Penzance: Discussed in "When A Felon's Not Engaged In His Employment". The police sergeant who sings it is deeply upset by the fact that when criminals are not actively committing crimes, they are regular people. It currently provides the page quote.
* The Pirates of Penzance features the character Frederic who was born on February 29th, which causes issues when his apprenticeship is due to end on his "21st birthday".
* The Pirates of Penzance: Frederic proposes to the entire female chorus, who unanimously turn him down. Averted completely a moment later, when Mabel enters.
* The Pirates of Penzance has this exchange (which only works delivered in the right accent):
* The Pirates of Penzance" in the form of a very silly patter song. (While peeking.)
* The Pirates of Penzance). In the same opera, the police deliberately try to invoke this. At the moment when they are most hopelessly defeated in battle, they... call on Queen Victoria: The mere mention of her name makes the pirates give up instantly out of loyalty to her.
* The Pirates of Penzance", in which the pirates loudly sing about sneaking.
* The Pirates of Penzance Kevin Kline's Pirate King picks up and reads Fredrick's contract quickly:
* The Pirates of Penzance, Mabel introduces herself with a coloratura cadence.
* The Pirates of Penzance, Major-General Stanley asks the pirates "You're not thespians, are you?" Depending on the production, the pirates' reaction to this can be priceless.
* The Pirates of Penzance Major-General Stanley claims the tombs in the ruined chapel on his estate are the tombs of his ancestors, even though he only bought the estate a year ago. He is their "descendant by purchase," you see.
* The Pirates of Penzance (notice a trend here?), Frederic's onetime nursemaid Ruth, who is the only woman he has seen in 13 years, convinces him that she is a beautiful woman, and that he should marry her. This plan falls apart the second he sees a group of girls his own age.
* The Pirates of Penzance, one of the pirates' tools are their "skeletonic keys."
* The Pirates of Penzance rendition of the Major-General's Song contains a literal example.
* The Pirates of Penzance reveals in the finale ultimo that the pirates are all noblemen gone wrong.
* The Pirates of Penzance sounds impressive to the uninitiated, but most of the things that the Major General brags about doing are either flat-out impossible or trivially easy.
* The Pirates of Penzance (the 1983 film) - The Pirate King runs into the boom during the Pirate King number (but it doesn't knock him overboard, though he does that later on his own).
* The Pirates of Penzance there is a rather lengthy joke in which different characters confuse the word "orphan" for the word "often." Needless to say, this

doesn't come across in any accent besides very proper British English and some traditional Northeastern U.S. accents, and even then is a stretch.
* The Pirates of Penzance were determined to get there first this time.
* The Pirates of Penzance, with one day's rehearsal, at an obscure theatre in an English seaside town.
* The Pirates of Penzance won't attack forces weaker than they are, and make a point of never harming orphans.
* The pirates seem less effectual than they actually are because we only ever see them fighting Porco, who is quite possibly the most skilled ace in the Mediterranean. At the beginning of the film, the Mama Aiuto Gang manages to heist a cargo ship and take a group of schoolgirls hostage. Given, the girls proceed to walk all over them, but that illustrates their latent honorable tendencies.
* The Pirate's Soldier: After Heero's initial encounter with Ayeka and Ryoko reveals the existence of alien life beyond the Sol system, the Preventers assign him to supervise them and ensure their origins don't get revealed to the public. Later on, he also uses this trope to stop Kiyone from reporting her findings to her superiors, arguing that, given that Earth is barely starting space colonization, it'd be a major shock if the Galaxy Police comes with a full fleet, which would compromise Earth's stability and security.
* The Pirates. They steal credits from players they attack, become stronger over time, and as of the
* The Piratesverse: For Darwin, at least, when he discovers Surprisingly Curvaceous Pirate (whom he'd thought was a guy) is actually a woman. He gets over it.
* The Pirates Who Don't Do Anything: A character has a specific job, but is never seen or otherwise indicated doing anything that has to do with their profession.

* The Pirates Who Don't Do AnythingSomeone is never seen doing their alleged job.
* The Pirates Who Don't Do Anything take an assassination. Supposedly the bell signifying an "inhumation" rings daily, but only nameless background characters are involved.
* The Pir-Hana Prototype is the fastest craft in the game, with its top speed matching that of a fully boosted FEISAR Prototype. However, its acceleration is automatic and it cannot steer without using the airbrakes.
* The pistol Dorothy finds in the trunk of the police car when she first lands on Oz in
* The pistol originated as a knightly weapon. After abandoning the lance in the 16th century, knights took the pistol as their primary weapon. The favoured tactics were either caracole (counter-march on horseback) or attacking the enemy in gallop, and shooting two pistols at the enemy without re-loading at close distance and then hitting him with sword.
* The pistol shrimp utilizes a large asymmetrical claw as one of these. Snapped faster then a man can blink, the resulting cavitation produces a pressure wave measured in dozens of atmospheres, capable of killing small fish, and stunning larger ones.
* The Pit and the Pendulum (1991), and he is able to entice them into gnawing through his bonds.
* The Pit and the Pendulum (1991), Antonio gains access to the castle by hiding

underneath the cart Gomez uses to transport corpses out of the castle.
* The Pit and the Pendulum (1991), Antonio is left hanging by one foot when Mendoza accidentally triggers the opening mechanism for the pit. He manages to swing up, undo the binding holding his foot, and catch the lip of the pit with his other hand. This leaves him dangling by on hand and the cover on the pit slowly closes.
* The Pit and the Pendulum (1991) Assuming there is something wrong with the chair, Gomez unstraps to Antonio to examine it. Antonio immediately makes a break for freedom, shoving the captain of the guards into the chair as he does so. The captain immediately leaps to his feet; clutching his buttocks and yelping in pain.
* The Pit and the Pendulum (1991), Gomez and Mendoza lock Esemeralda in the stocks, place a funnel in her mouth, and pour water into it until she chokes in a primitive form of waterboarding.
* The Pit and the Pendulum (1991)). Later, Torquemada believes Maria is dead and seals her up inside a tomb.
* The Pit and the Pendulum (1991), sacks of gunpowder were sometimes tied around the necks of those condemned to the stake as an act of mercy.

* The Pit and the Pendulum (1991)) when Antonio tosses a pan of boiling oil in his face while escaping the dungeon.
* The Pit and the Pendulum, from each of which he barely manages to escape. In the most famous scene, he is secured to a table, over which is a large curved blade which swings back and forth like a pendulum, lowering itself slowly with each swing.
* The Pit and the Pendulum of Nicholas strangling Elizabeth was all done in one take.
* The Pit and the Pendulum territory when the wife who fooled her husband into thinking he'd entombed her prematurely ends up entombed prematurely for real, with all surviving cast believing she'd been dead all along.
* The Pit and the Pendulum. The rats don't injure the hero (much, and anyway, what's a few rat bites when there's a heavy, razor-sharp pendulum about to cut you in two?), and in fact he uses them to escape his bonds.
* The pitch at Lord's has a slope (some six feet in height difference across the whole width of the ground). If a bowler is used to it (i.e. plays for Middlesex), it can be used to create deliveries that just can't be bowled anywhere else. If a batsman is used to it, it can create some incredible scoring opportunities playing ground running shots down the slope for four runs.
* The pitch ends with the writer or executive making an assertion that is immediately contradicted by cutting to the image of a
* The pitcher proceeds to get rid of the dog by hitting it with a pitch. (He had no other choice - the dog's so small that the strike zone is laughable.) The dog runs off with a yelp, and Kagemaru concedes, "Of course, he's

* The Pit, Dredd finds himself in this role, sent to clean up what was at the time the worst sector and the worst branch of the Judges in the city, with the Chief Judge unwilling to trust the local SJS. Needless to say, things improved by the time he left.
* The Pit, Dredd has no evidence to convict Fonzo Bongo on being the head of his sector's branch of the Frendz crime syndicate. What Dredd does have, thanks to an

observant rookie, is several hundred unpaid parking tickets in Bongo's name, earning him a sentence of twenty five years.
* The pith and essence of the tale type known as "Doctor Know-All", the main character of which knows very little but is always saved by amazing coincidences that make him look good.
* The Pitiful Human Lizard: Barb is revealed to have these in issue 2. She ultimately decides to use them to fight crime under the moniker of Lady Accident.
* The Pitiful Human Lizard: Human-Lizard's colleague, the Majestic Rat, has an army of rats at his command.
* The Pitiful Human Lizard, so all he has to do is put the arm back where it was on his body, and let his power do the rest.
* The Pitiful Human Lizard: The Majestic Rat has dyed his legions of rats in various colours to split them up into teams. This allows him to better coordinate their movements.
* The Pit Lord's ultimate can be cast on a friendly or enemy unit, causing it to take massive damage every second and can't be dispelled. When (not if) the unit dies, a Doom Guard spawns from it.
* The Pitmen Painters goes through multiple timeskips, starting in 1934 and ending in 1948.
* The Pit of Saron instance takes place in/around a large open-pit mine being worked on by undead miners and slaves captured from the Alliance and Horde armies. Fair enough. But when the players lead the Inevitable Slave Revolt against the overseer, you might wonder - why would the Scourge bother with living slaves when they could just kill them, raise them from the dead, and have undead slaves? Undead don't need to eat, after all, and mindless skeletons won't be plotting revenge any time soon.
* The Pit of Saron seems only explainable as a form of this. Captured warriors forced to work endlessly in a quarry, stripped down to only their tabards despite the bone-freezing chill of Northrend? The only likely explanation is that Arthas simply wants to make them suffer before turning them.
* The pits are giant craters dug up from Limburger before the Biker Mice arrived on Earth. They had been taken over by some of the worst criminal of the planet who built their own city down there, so of course every bar down there qualifies. Vinnie (in disguise) visits one in "The Pits" searching for infos on his bros, who had been enslaved by the Pit Boss.
* The Pitt adds the "Auto-Axe" (with its own unique variants), which scales things up to industrial strength.
* The Pitt intending on reporting about it. Not wanting this to get out into the public, the Army helicopter is ordered to kill them, blowing up their helicopter.
* The Pitt, no matter which side you take, it is unlikely a cure for the plague will be realized, dooming the residents to slow extinction via mutation.
* The Pitt Panthers Men's Basketball Team managed to reach the Sweet 16 in the NCAA Tournament in 2002, 2003, 2004, 2007 and 2009. Only once in that span did they make the Elite 8, and they never made the Final Four.
* The Pittsbugh Steelers logo, which has underwent just minor changes since 2002.
* the Pittsburgh Penguins and the New York Islanders have fighting, players like him would be relentlessly knocked around by their opponents.
* The Pittsburgh Penguins. Penguins are not exactly known for their toughness.
* The Pittsburgh Penguins were this between the 2009 and 2016 Stanley Cup titles, despite a deep roster led by superstars Sidney Crosby and Evgeni Malkin. Every year the Pens would have steamrolled through the regular season, only to die in the playoffs to a lower seed. First, losing to the 8-seeded Montreal Canadiens in the Semis in 2010,
* The Pittsburgh Pirates break out Styx's "Renegade" whenever they're looking to finish off an opponent.
* The Pittsburgh Pirates ended up getting this reputation in the first half of the 2010s. At one time the Pirates were one of the top contending teams in MLB, with historic players and World Series titles to match. However, after respected coach Jim Leyland left the Pirates in the 90s, they went on a losing streak that would

last for two decades, the longest such streak in North American professional sports. But even when things looked like they were starting to get better...
* The Pittsburgh Pirates, in spite of their current state of mediocrity, fielded a few of these in their heyday.
* The Pittsburgh SOAPranos and that they've attempted to issue death threats to her.
* The Pittsburgh SOAPranos has Sami interviewing a series of unsuitable candidates from the drunk whose mother showed up to coach him through the interview to the precocious high-schooler who starts angling to take over the store to a Mafia henchman to an interviewee just out of prison... and her last job was where she was arrested. Of course, the perfect candidate shows up right after Sami has given up.
* The Pittsburgh SOAPranos, it's implied that the mob soap shop exists in part to dispose of inconvenient bodies in the form of soap.
* The Pittsburgh Steelers between 1994 and 2004 (all under Bill Cowher) advanced to the AFC Championship game five times and lost four of those (and would have lost the 1995 game against Indianapolis had receiver Aaron Bailey not dropped a last-second Hail Mary). The really frustrating fact about this? All five of those games, the Steelers were the home team. Which makes it all the more ironic that the one Cowher-era Super Bowl win (XL) came after the Steelers swept the top three AFC seeds
* The Pitts daughter had a huge piece of pipe through her head and suffered no ill effects.
* The Pitts who at one point gets a pipe lodged through her head (side to side rather than front to back) at ear level and is completely unharmed (other than the social embarassment of being a teenage girl with a pipe through her head.) At one point a doctor shone a torch through her pipe and could see out the opposite side.
* The Pixar Theory film is set in the same universe, officially aside from obvious cases of sequels and prequels is not the case.
* The Pixies and violent Old Testament stories, among other things, though he toned it down on later albums.
* The Pixies attitude. When Francis broke the band up in 1993, he didn't even bother telling Deal personally, instead breaking the news to her through a fax.
* The Pixies, lead guitarist Joey Santiago is Filipino-American, born in Manila
* The Pixies' "Make Believe" is a joke song about drummer David Lovering's crush on Debbie Gibson.
* The Pixies. Oddly, the band fared far better commercially and critically in Britain than they did in their home country of America.
* The Pixies of bassist Kim Deal recounting a story of a teacher who was rumored to be "into field hockey players" and suddenly disappeared when allegations of having sex with them at school emerged.
* The Pixies' "The Happening" is all about human-alien encounters. The opening line is "They got a ranch they call Number Fifty-One".
* The Pixies. When Flappy Bob asks why are they floating, they claim that it's because they have the money to do it, and walking is for poor people.
* The Pixies, who had their biggest hit on the Modern Rock Tracks list with "Here Comes Your Man", which hit #3 and remains one of their most well known songs, alongside "Where Is My Mind?", "Monkey Gone to Heaven", and "Debaser". The Pixies only had a total of three songs to reach the top 5, though the remainder of these did not include "Where Is My Mind?", which was never released as a single, "Debaser", which never charted. "Monkey Gone to Heaven" did reach #5 at least. So what does all of this leave? The less well-remembered "Velouria". which peaked at #4.
* , the pixies would not have attacked the village in the first place.
* "The Pizza": About twenty minutes after Larry quits all his jobs, society has collapsed and people are already forming gangs who kill and eat anyone who invades their territory. Mr. Small, who is normally a vegetarian, is alright with this so long as the people he eats aren't on antibiotics.
* The Pizza Head Show campaign had the eponymous Pizza Head who, if not killed each time, was at least in critical condition, often at the hands of Pizza Cutter Steve.

* The Pizza Head Show's Mr. Bill (the commercials were, in fact, done by Mr. Bill creator Walter Williams), and had a nemesis in the pizza cutter Steve, an Expy of Mr. Sluggo, who always had it in for him. Typical plots had Steve in his latest role (chef, doctor, superhero, umpire, what have you) showing up to screw Pizza Head over in some fashion, with Pizza Head frequently saying "Hey, he's not a <insert role here>!" to which the announcer would always say "Sure he is!"

* The PJs a cameo of this nature due to a reference to their show in his own.
* The PJs, and B) it was actually funny and had some surprisingly subtle, relevant humor given the subject matter, rather than just being a parade of cliched stereotypes.
* The PJs as well at the show's title. They returned the favor in the episode "Cliffhangin' With Mr. Super" by having a shot of a milk carton with a "missing persons" alerts on the side. The missing person? Philip Fry, who by that time was cooling his heels in cryo-freeze.
* The PJs episode "Operation: Gumbo Drop", Thurgood discovers that Muriel taped over his "happy tape" to film a documentary about the projects. When he realizes that the footage contains Juicy making his own Gumbo (Thurgood's main conflict in the episode), he decides to take advantage of this and use the tape to study Juicy's cooking methods.
* The PJs had this in the episode with the gumbo contest. At least the important event was actually cooking gumbo and the tasting.
* The PJs: Yet another doctor example, when Thurgood's doctor tries to explain high blood pressure to him.
