* The Last Place on Earth specifically compliments her on it, and notes that he wishes he wasn't to grumpy to be like her. She is a great traveller(for an Edwardian woman), artist, and party girl; wishes she could go with Robert, and tells him in effect, "Be a badass and give me a badass son as well."
* The Last Place on Earth who wishes that she could accompany her husband, Captain Robert Scott, on his expedition to be the first humans to reach the South Pole. She resents the fact that she can't go because she's a woman, and she references this

trope when she says "Men do. Women don't."
* The last player actually picked in a given year's NFL Draft is dubbed "Mr. Irrelevant", who gets invited along with his family to a week's worth of festivities in Newport Beach, CA, and gets the "Lowsman Trophy", which mimics the Heisman Trophy given to the best player in college football but depicts a player fumbling the ball.
* The Last Podcast on the Left: A podcast that goes over true crime topics such as cults and serial killers and supernatural events like cryptids, hauntings, and UFOs, all the while cracking jokes and treating the horrible people involved with all of the respect they deserve: None.
* The Last Podcast on the Left common to serial killers, where after the first, most difficult kill, they have to do a little bit more to maintain the thrill and grow steadily more sloppy as they do.
* The Last Podcast on the Left describes this as Robert Hansen's M.O. He would kidnap women, set them loose in the wilderness, and hunt them down. Despite the similarity to the trope naming story, the hosts think it unlikely Hansen ever actually read it, as the man was a dullard.
* The Last Podcast on the Left have been able to laugh at and crack jokes about a ton of serious, heavy subjects, even when it's incredibly irreverant, but absolutely none of them were able to make light of the case of Junko Furuta, an innocent teenage girl who was abducted at random and tortured to death in an unbelievably gruesome way over 44 days by a group of teenage boys.
* The Last Podcast on the Left: In part 3 of the show's series on Mormonism, Marcus describes how a man left the LDS Church because one of Joseph Smith's revelations, meant specifically for him, spelled his name wrong. He thought that, out of anything, God should be able to spell. Henry notes that the name's proper spelling was the non-intuitive "Symonds Ryder". Ben posits that, between this and His apparently not telling the Manson Family how to spell "Helter Skelter", perhaps God really can't spell.
* The Last Podcast on the Left: Parodied in the series on Jonestown, where it's joked that if you're in a cult you can save yourself by yelling "Check, please!", at which point the cult is obliged to let you leave. It sees use again in the show's next cult series on the Order of the Solar Temple.
* The Last Podcast on the Left pedophile fly freely, but in the final part, when the main topic is a man raised in the Children of God's sexually abusive environment who went on to murder one of his abusers then kill himself, the number of jokes drops sharply and they express sympathy as they refer to statements he made before the act showing he knew what he was going to be doing.
* The Last Podcast on the Left secret, who horribly botched a beheading, and went on to be mocked and insulted to the point stuff was thrown at his funeral procession after he died himself.
* The Last Podcast on the Left series on Casey Anthony, the hosts tell the story of a man chosen to be a juror in Anthony's trial and, wanting no part of it, deliberately spoke to reporters as soon as he could, knowing full well he was forbidden from doing so. This got him thrown off the jury and slapped with Contempt of Court charges. He proclaimed he had no regrets about this action.
* The Last Podcast on the Left series, the hosts talk about the Kid's first murder victim, Frank "Windy" Cahill. Marcus notes he's not entirely sure if the name "Windy" comes from Cahill being a short-tempered blowhard or for being a farty son of a bitch. This prompts Henry to create a character version of Cahill that's serious and stern but ends his sentences with farts. Ben, meanwhile, can only ponder how bad your farting must be to earn you a nickname.
* The Last Podcast on the Left survived a mass shooting, this one the Parkland, Florida school shooting of February 2018.
* The Last Podcast on the Left tendencies and well-written confessions. By the end of the series, Henry Zebrowski decides that Panzram is his favorite Heavy Hitter.
* The Last Podcast on the Left to followers... at which point Marcus then takes the opportunity to remind listeners that you can get a bone fragment from his ranch for the low low price of a $25+ monthly Patreon donation.

* The Last Podcast on the Left when called on anything. In the case of the office building she finally had to admit she didn't work at the office at all when she navigated police into a dead end.
* The Last Poets were also the forerunners of hip-hop collectives like the
* The last point is a popular myth, rather than fact, and one actively refuted by Steven Foster (the writer for the dub) in interviews. He's actually described much of the process that went into the dub in depth, and while the script was written in a haphazard 'on the fly' way, very little actual improvisation by the voice actors ever happened. "The actors would chime in with a joke or a line every now and then, which is, I guess, how the rumor got started that the whole show was ad-libbed," is a direct quote.
* The Last Policeman and its two sequels are highly contrasting in that he's quiet and straitlaced while she's rebellious and rambunctious. He's also philosophical about the coming end of the world, and she's determined to avert it somehow.
* The Last Pony on Earth has the protagonist make one of these, and this is when one of his priorities (apart from finding other survivors) is to regain his human body—therefore, the final step is "Human again!". He then adds that "hopefully whoever's reading this already knows what we did for six, because this crisis is over and everything's back to normal."
* The Last Portrait James Lord is gay as in real life but it's never addressed since it's not plot important. When talking to his partner on the phone, it's never shown that he's talking to a man. Even Giacometti, when "assessing" his facial features calls him a brute - maybe played for laughs if the viewer knows Lord was gay.
* "The Last Poster". Styled like a collector's item, it showed the two men in black and white pixellation, and Butler says, "Looks like we've been outlawed, sir."
* The Last Prayer, Naruto has an instinctive grasp of seals that allows him to easily understand or create pretty much any seal he comes across. Mabui, who considers herself rather proficient at seals, has to ask him to dumb down his ideas until eventually she just asks him how beginners get their start in sealing. Notably, Naruto took a single glance at a scroll she's spent months trying to decipher and remarks that the seal would work but it'd be wonky and inefficient. Later, Naruto comments on being able to make a seal that'd heal almost any injury and admits that he doesn't remotely understand any of the parts relating to biology except that he knows the seal would work.
* The Last Prayer: One of the conditions to Ino forgiving Choji for accidentally drugging her is that he can never mention it happened.
* The Last Problem, a Q&A was held with showrunner Big Jim Miller on Twitter. Miller revealed that a lot of things which fans wondered about (including in that episode) were intentionally left vague, never got discussed, or were outside of his control to conceivably answer.
* The Last Problem" shows stained glass windows in the Canterlot throne room, the kind reserved for commemorating great victories achieved by Equestria's heroes, depicting the Student Six defeating a rhinoceros-like creature and an adult Flurry Heart doing something with the Crystal Heart, implying they all went on to have their own adventures after the time of the show.
* The Last Queen of Greenwood, Caradel describes her own hair in chapter 5.
* The last question is a trick question to test the couple's devotion.
* The Last Question, it is populated by "a trillion, trillion, trillion" people, spread all over the universe.
* The Last Real Man Silas Young forced The Beer City Bruiser to be a bad boss to
* "The Last Real Man" Silas Young openly admits to hating the internet, believing it is only good for teasing nerds.
* The Last Real Man Silas Young spent his time in Ring of Honor trying to teach Dalton Castle's Boys how to do manly things like change car tires.
* The last regular episode ended with a brief announcement: "That was it - the last of them." The 1972 reunion show "The Last Goon Show of All" ended just as inconclusively as a regular episode.
* The Last Remake of Beau Geste, a spoof of the 1930's classic, itself set in the

1890's.
* The Last Remake of Beau Geste attempts to pick it up. He has to keep circling around the spinning newspaper so that he can read the headline.
* The Last Remnant. And she's a complete badass at that. Her daughter Emmy is just as good of a fighter, and is one of the best party members you can use (though her bearing on the actual plot is nowhere near what her mother's is).
* The Last Remnant, a side quest features an amnesiac named Jorgen who asks you to bring him three items that will help him remember his past. There are more than three items that can be used for this quest, and depending on which ones you bring and in which order, the character's past (and his class) will be different.
* The Last Remnant, a sidequest involves rescuing a merchant's son from kidnappers. The catch? The son is a yama, a race of 10-foot-tall powerhouses (and said son is one of the larger ones), and the three kidnappers are qsiti, a race of 2-foot-tall reptilian creatures, with knives that would barely scratch the yama's skin. Rush even says something to the effect of "Which one of them actually needs help?"
* The Last Remnant complex battle system that takes a lot of patience to understand, much less master. There's also the really long, unskippable cut scenes...but, once you understand the fights enough so that you're not just pushing buttons, it gets good. It should be noted that the PC version makes the cutscenes skippable and somewhat streamlines the battle system, though it is still quite bewildering starting out.
* The Last Remnant has the Yama race, which is the largest of the four races in the game.
* The Last Remnant. It Gaes hard, it Bolgs hard, and it's shaped like a giant penis!
* The Last Remnant, Jason Liebrecht puts on a fake Brit accent to play David Nassau, the Marquis of Athlum. He doesn't do a generic cockney, though his accent is an amalgamation of three different English accents. It's oddly fitting.
* the last remnants of humanity, having discovered that there was no escape from the entropy consuming all existence, and became some kind of terrifying hive mind race of sociopaths in order to hang on just a little longer..
* The Last Remnant takes this to a particularly literal level. In battle, he wears an eyepatch that appears to be tied into the aiming or activation of the remnant Gae Bolg — an enormous energy cannon.
* The Last Remnant, with the game's world being a Pangaea-style supercontinent.
* The Last Resurrection Hitler is actually the right-hand man to Jesus himself, and teams up with his angels. Could count as a subversion depending on metaphysical semantics.
* The Last Revelation. Heck, this whole story arc was retconned out when Crystal Dynamics took over the series.
* The Last Ride is more of a wild card than a finisher in more recent matches. When used, it is often for a high point of the match (often as a counter to someone backing Undertaker into the turnbuckle then climbing on to punch him) rather than a match finisher, so it can lead into the clothesline, Snake eyes, etc. moveset listed above. It occasionally follows the chokeslam, though this is rare.
* The "last rites" option of Saradomin's holy book (like a Bible) reads "Thy cause was false, thy skills did lack; see you in Lumbridge when you get back." (Lumbridge is normally where players respawn).
* The Last Roundup", Derpy is accidentally shooting lighting out of a storm cloud, and Rainbow Dash tells her to be more careful: "Don't want to do any more damage than you've already done." The camera pulls out to show Town Hall's wrecked roof — just before the roof collapses entirely.
* The Last Roundup" features Applejack essentially running away from home in shame when she doesn't win as big as she and everypony else had expected her to in a big rodeo competition she'd won ten years straight.
* The Last Roundup", when she accidentally electrocutes herself (and Rainbow Dash's tail) with a storm cloud.
* The Last Rune: After several characters come into possession of a translation spell, one character continues swearing obscure and bizarre oaths in his native

language until he realizes they're being translated for his companions. As he puts it, "They work better when nobody else knows what you're saying."
* The Last Rune, saying it was a coward's move and a terrible position to put Travis in.
* The last saga, which deals with Demon World Tournament, has a ton of these. Both Raizen's old sparring partners and Yusuke's old enemies share this love of a challenge, the latter thanks in no small part to Yusuke's influence. In fact, this mindset is the subject of an entire episode in the anime, and it's inferred that such an attitude could actually bring in an era of honor and sportsmanship among demons, replacing bloodlust with a love of a challenge.
* The Last Saiyuki, the ability to extend the Nyoibo and bring monsters into existence depend on whether or not a person's Mou is open, basically, whether or not they believe the impossible can happen.
* The Last Samurai. After enduring several volleys of gunfire, Katsumoto and his men manage to divide the Imperial Japanese army with columns of fire, pelt the stranded half with arrows, before rushing them on foot. The Imperial army, for their part, also meet them head on, having a slight range advantage with their guns until the samurai close the distance. Then there's the final cavalry charge, which consists of Katsumoto, Algrene and any surviving samurai pushing as far as they can through the Imperial Army's lines until they're brutally stopped by machine gun fire.
* The Last Samurai and not a man to be admired at all, but Katsumoto fails to see Custer's faults.
* The Last Samurai, and others actually allowed their soldiers to sign on to fight in other wars to gain valuable combat experience, so long as it did not conflict with their own nation's interests and alliances.
* The Last Samurai. A stand-out example is when discussing Custer's Last Stand: Algren believes that Custer was arrogant and incompetent for taking his men against a force of natives that vastly outnumbered them, while Kasumoto admires the man's bravery, and says it was a good death for Custer and his men.
* The Last Samurai, every single Samurai appears to be killed in the final battle... except for Tom Cruise's character Nate Algren, who miraculously survives being shot multiple times by a Gatling gun.
* The Last Samurai fearlessly facing death in the face of insurmountable odds, holds Custer in high regards.
* The Last Samurai has Algren's new hosts struggling to pronounce his surname.
* The Last Samurai has Nathan and Katsumoto's samurais fighting against the Meiji government.
* The Last Samurai is another prime example, where said last samurai happens to be a disgraced US military man.
* The Last Samurai. It's also a movie that basically praises the good old days, which is something that any nostalgia junkie would get behind. Both in spite, and because it wasn't as great as people would like it to be.
* The Last Samurai: Katsumoto returns to his badly outnumbered and outgunned force after 'negotiating' with Omura, and tells his commanders: "Well, they won't surrender."
* The Last Samurai. Katsumoto says to Algren at one point that a man could spend his entire life searching for a perfect cherry blossom and it would not be a wasted life. As he dies committing seppuku on the battlefield, he sees the cherry blossoms in the distance:
* The Last Samurai, Nathan Algren is talking to Katsumoto about the war and makes note that they can win, despite being outnumbered and outgunned, using the Battle of Thermopylae to exemplify his thesis and tactics. Katsumoto never heard of said battle (as Japan was isolated from the world until the movie's time period), so he only knows what Algren told him. Moments before they march to war, this exchange occurs:
* The Last Samurai. Nathan Algren's training fights always end quickly (and with him sporting a fresh bruise), until Nobutada explains that Algren has "too many mind — mind the sword, mind the people watching, mind your enemy. Too many

mind. No mind." Notable in that this is legitimate advice and something many martial arts schools teach. It does, indeed, work like a charm, but you're far more likely to hit your sparring partner harder than you should.
* The Last Samurai: "No disrespect intended, sir, but shove it up your ass!"
* The Last Samurai's character is a US Army officer who has been assigned to train Japanese soldiers. In one scene, he repeatedly fires very close to a Japanese soldier, all while yelling at the soldier to shoot him (he doesn't actually expect to get shot, he's doing it to prove the Japanese aren't ready to perform under fire).
* The Last Samurai: So after more than a year of training the Japanese army has a well trained officer corps, soldiers who can finally shoot straight, and all the cutting edge military equipment that the late 19th century has to offer. In the final battle, however, once the samurai retreat from the initial artillery barrage, they send their troops over a hill in pursuit and run headlong into a samurai ambush that ends up destroying the majority of the army.
* The Last Samurai, starring Tom Cruise, has retired U.S. Army Captain Nathan Algren drunk for a good third of the movie, drowning his sorrows and being haunted by nightmares due to his role in the American Indian genocide around the time of General Custer.
* The Last Samurai, that Samurai rejected firearms and viewed them as dishonorable weapons. However, the Samurai armies embraced the arequebus when it was brought over by the Portuguese, using it in conjunction with spears to form pseudo-Pike and Shot tactics. By the time of Japan's invasion of Korea in 1592, around a fourth of the Japanese invasion force used were equipped with guns.
* The Last Samurai, the samurai rebel because the Emperor wants to modernize and Westernize Japan. The rebels fight the Imperial army with old-fashioned bows, spears and swords and do surprisingly well before getting cut down in a hail of machinegun fire. However, the real rebels upon which the film is based used modern weapons, and died in a last-ditch charge when their ammo ran out.
* The Last Samurai to make Asian history more accessible to Westerners, it never tries to claim that Cruise's character is a samurai. He's just a wayward American who gets some samurai training and falls in love with their way of life.
* The Last Samurai, with Katsumoto's whole village abuzz with training, meditating, and making arms, armor, and incendiaries. Algren's suiting up near the end is particularly contemplative.
* The Last Samurai, with some of their methodology were accurately presented.
* The last scene of episode one, when Bran catches Cersei and Jaime at their twincest. With horrific and long-reaching consequences.
* the last scene of the sketch shows the funeral home's sign, telling passers-by that the funeral has been held over several weeks.
* The last season also has one last paintball episode, "The Paintball Scattering."
* The last season introduces a new form of Super-Vampire called the Turok-Han. They have the same weaknesses as regular vampires. They die by a wooden stake in the heart, or decapitation, or sunlight. But their strengths are massively amplified, to the point that the highly experienced and strong Buffy Summers is unable to drive a stake deep enough through the Turokahn's super tough and thick skin to pierce its heart. A vicious, brutal, lopsided beatdown of curbstomp proportions ensues. Later Buffy is only able to kill this one Turokhan by luring him to a battlefield of her choosing where, after a lengthy battle she finally manages to decapitate him using razor wire. So, clearly the Turok-Han are insanely tough right? This was the point.
* The last season largely focuses on the presidential election between republican Arnold Vinick and democrat Matthew Santos. The winner ends up offering his competitor the job of
* The last season reveals Singetails are also apparently immune to the effects of sage fruit.
* The Last Seduction, Bridget has been found out on her criminal activities but (while driving) convinces the man to accept sex in lieu of capturing her. When he undoes his seat belt to expose himself, she deliberately drives into a tree,

killing him.
* The Last Seduction has Bridget dressing up as a cheerleader for Mike.
* The Last Seduction makes up an alias while looking, into a mirror, at a poster for the city of New York, and comes up with "Wen Kroy", with "Wen" later elaborated into "Wendy". And unusually, the man she was running from actually manages to reconstruct her thought process, and finds her under her new name.
* The Last Seduction: Mike used to live in Buffalo for a while, and got married to a woman named Trish, but he ran away on their wedding night because Trish turned out to be a pre-op transexual.
* The Last Sentinel featuring Katee Sackhoff the main character carries a sapient talking rifle.
* The last series of the show completely changed the style of the end game, with both teams now taking part, each adult seated on a ramp, and the kids answering questions to slide them up a level - the one who reached the fifth notch first was then thrown in. The team that had accumulated the most points during the game being given a slight head start, but it didn't really shake the feeling that it made the rest of the games slightly pointless.
* The last serving soldier to have seen active service in WW2 left the British Army in 1983, with general officer's rank.
* The Last Sharknado: It's About Time does this for the entire franchise, as Fin's actions prevent the original modern Sharknado and restore all of his lost friends and family to life.
* The last sheep during the Sleepy Sheep's attack animation. Lampshaded in
* The Last Ship Admiral Konstantin Ruskov, who has delusions of using the cure for the Red Flu to create a new world order, and has no problem shooting his own men to make a point. He even forces his XO — his own brother — to be a guinea pig for the cure at gunpoint, even when there's a good chance it won't work and he'll die.
* The Last Ship and then sends it careening on a collision course for the battleship. Both ships are then destroyed in the subsequent explosion.
* The Last Ship as he can literally turn and block her from view with his body.
* The Last Ship. Aside from an implication that Hawaii is under Naval control, there's no mention of the status of either it or Alaska.
* The Last Ship at night, so the only way to track the incoming torpedoes is by sonar.
* The Last Ship, Danny Green and Kara Foster play out this trope well, even endangering a mission because of their feelings. Averted: Because Dr.Scott is a civilian and a triangle arises between her, Tex, and the Captain.
* The Last Ship features plenty of these, both positive and negative throughout the series given how many nations get ravaged by the Avian flu. The main characters arguably provide an example of this themselves for the first season or two that actually succeeds in their mission. Villainous counterparts include Ruskov, Peng Wu, and Granderson’s mother.
* The Last Ship had its story arc plotted across three seasons, but the show got picked up for two additional seasons. This resulted in Season 4 and 5 each getting a mostly self-contained story arc.
* The Last Ship. He is played by 5'11" Travis Van Winkle and she is played by 5'2" Marissa Neitling.
* The Last Ship is frequently shown activating her CIWS to defend against incoming missiles.
* The Last Ship is set after a very brief World War III that consisted of nukes wiping out most of humanity.
* The Last Ship move to secure their power base by having all surviving senior officers of the US military assassinated, allowing them to seize control of forces on the regional level.
* The Last Ship: Rachel and Tophet are this for a while in season one as the only scientists working on a cure aboard an isolated ship. Gradually, we meet various other scientists (some good, some evil) making similar efforts in quarantine zones, some of whom provide aid to the crew of the Nathan James, such as Julius Hunter,

Michael Neustadter and Dr. Milowsky.
* The Last Ship seeking to usurp the federal government's authority), quickly take steps to bloodlessly retake control of the ship.
* The Last Ship, the Chosen managed to find a hacker who was sympathetic to their cause to give them access to a network through which they could spread their virulent anti-Navy propaganda. Said propaganda ends up working a little too well, causing a bunch of riled-up, paranoid Americans to attack an oil platform after they spot a naval chopper landing on it. Said oil platform turns out to be the hub through which the propaganda network operates, and thus, not only is the propaganda network disabled, but the Chosen have also alienated the hacker.
* The Last Ship, though some details are revealed over time — at the very least, Britain put up a fight, which all but wiped out the Royal Air Force in the process.
* The last ship to fly the Confederate flag (CSS Shenandoah, a commerce raider) reached port (in England to avoid accusations of piracy) and officially struck its colors in November of 1865 (about 5 months after most of the rest of the Confederate forces). It spent most of the intervening time getting months-old bad news occasionally whenever it would raid "enemy" shipping.
* The Last Ship: While every season has plenty of combat, Season 5 is the only one with a full-scale declared war, pitting the United States and its allies against the forces of the restored Gran Colombia.
* The last significant filler sequence is the Other World Tournament that occurs after Cell is defeated but before the appearance of Buu, as well as some extra Great Saiyaman shenanigans. After that, the anime was just as likely to take a week or four off the air than it was to stall for time by using filler to pad out existing fights.
* The Last Skull is a comic-book-inspired series featuring "teenaged superheroism, explosions and time-travel".
* The Last Son describes his early attempts to fly as "George of the Jungle, only without vines".
* The Last Son, Emma Frost does this when she first encounters Superman, after he easily makes short work of her students and Shinobi Shaw, while saying "Very impressive".
* The Last Son ends with Mutants revealed to the world, and Superman making his first public appearance confirming his rumored existence.
* The last song Freddie wrote by himself, "A Winter's Tale", was coincidentally inspired by watching the swans at Lake Geneva, therefore being his swan song in more than one way. It was recorded after "The Show Must Go On" and "These Are the Days of Our Lives" but before "Mother Love", which he and Brian wrote together.
* The Last Song. In the end, she has currently abandoned her acting career to focus on her music.
* The last song of t.A.T.u.'s last album, "Don't Regret", is also about the group's break-up.
* The Last Son, Graydon Creed and the Friends of Humanity, in addition to the canon "muties" for mutants, create the term "krypper" to refer to Superman and other Kryptonians by bastardizing the word Krypton.
* The Last Son has many examples of this trope with the large amount of superheroes, but one of the most prominent examples is Superman with Captain America. The latter is a World War II veteran, while the former grew hearing the latter's stories and aspired to be like him when he decided to become a hero. When the two finally meet each other, they become fast friend over their shared ideals, and remain staunch allies throughout the story.
* The Last Son of Krypton", after making it plain to this mysterious alien that he runs Metropolis, Luthor notes that he often wonders if he should be satisfied with "just" one city and that between the two of them they could basically run the world. Naturally, Superman doesn't bite.
* The Last Son series, after the Fantastic Four meet Superman, the Human Torch jokingly speculates that he's an alien, only to be shocked when the reactions of Superman and the X-Men reveal that he was right (the Thing observes that, by law of

averages, even Johnny would have to be right at some point).
* The Last Son singularity to absorb the blast and avoid major damage.
* The Last Sons. Surprisingly, nobody suspected that he'd take the same third option he previously took.
* The Last Son Superman creates a space suit made of nanomachines for outerspace missions. Starting on Book Two, he repurposes it so it can protect him from Kryptonite radiation.
* The Last Son, this is Superman's solution whenever he encounters Kryptonite.
* The Last Son was once Krypton's most renowned military commander, and a close friend of Superman's father Jor-El, who even named him the godfather of his son. Unfortunately, the death of his lover Ursa during the Krypton-Shi'ar war drove Zod mad to the point he fired upon Shi'ar ships that had already surrendered. He was found guilty of war crimes and banished to the Phantom Zone until he was accidentally freed on Earth by Cadmus tampering with his cell. Zod took advantage of the fact that his trial wasn't on the records of Superman's Fortress of Solitude prior to Krypton's destruction to earn his trust and secretly plotted to take over Earth.
* The Last Son, when Kitty and Rogue both try to kiss him. A little more heartbreaking for the latter, as at the time, he was the only person she knew that she could touch without draining.
* The Last Son, when the Fantastic Four and Alison Blaire fail to secure an alliance with Doctor Doom in the prelude to the alien invasion, they run into an angry Latverian mob coming at them. Thankfully, Doom's daughter Siryn steps in and manages to calm them down.
* The Last Sovereign between the Incubus King and the Fucklord right here:
* The Last Sovereign but still. The player character gains several succubi party members and all of them are fully fleshed out individuals in their own right.
* The Last Sovereign commander is refusing to retreat or surrender in the face of overwhelming odds, despite her troops' protests, when suddenly Aka surprises the commander with a knife to her back. Before Aka can even get a sentence out she surrenders immediately much to Aka's bewilderment and her underling's incredulity. Her reasoning is that there's no honor in surrendering to a bunch of grunts, a sexy assassin chick on the other hand...
* The Last Sovereign: Sierra Lee apparently knew, or guessed, that people would unencrypt the game to data-mine potential spoilers; as such, in place of Ivala's portrait, she put the Dramatic Chipmunk clip.
* The Last Spartan follows an old rule in vehicle combat from the previous games: "Don't brake for nobody."
* The Last Spartan has this line, courtesy of N'tho when trying to distract the Thresher Maw that the team is fighting:
* The Last Spartan is just some random soldier they put in similar armor as a publicity stunt. Ethan Jeong is the only one to personally call him out on his alleged impersonation so far though.
* The Last Spartan. It deals with the misadventures of the emponymous grunt and his asari wife. It also features Elites acting in commercials.
* The Last Spartan, when N'tho is trying to distract the Thresher Maw from the rest of the team:
* The last speech that Jim Jones gave to the residents of Jonestown was recorded for posterity. In it, you can hear him direct the older members of the community to help the younger children, and for them to "not worry about the children's crying; [the punch] is just a little bitter. It's not painful." Makes for some
* The Last Stage exhibit this trope throughout the story by necessity.
* The Last Stage is a #1. He has the most amount and most powerful weapons, is physically imposing, and considers himself a tool to be used by the other members of The Detachment.
* The Last Stage is a former Army medic now working for The Detachment. Just because he patches the other characters up doesn't mean he's above bringing out the guns when he needs to.
* The Last Stage needs to know what something is or does, though, PHILLIPS is the

one he looks to.
* ''The Last Stage'' pulling the strings more or less view Earth as lunch.
* The Last Stage write up the mission briefs and gives the orders in the field for the other members of The Detachment.
* The Last Stand 2, however Ross believes that the protagonist growing a full beard in between the two games counteracts this.
* The Last Stand allows you to play and level up freely, but there are waiting times placed on missions, buildings, upgrades, and raids. Of course, they can be sped up with fuel which can be found, but there is a cap to how much you can find in a day. You can also build a FUEL Generator, but it also gives out very little and must be refueled by materials. The easiest way to get more is by purchasing some with real money.
* The Last Stand is fond of bribing cops to get his way. When it's suspected that he's done so, the FBI chief has his department investigated, easily tracks down the one bribed through a Swiss bank account, and even chastises said mole for thinking it was beyond their reach.
* The Last Stand is wearing a bandolier of shotgun shells when they get hit by a signal flare. The shells start to cook off, then a lot of them explode at once, effectively blowing his torso apart.
* The Last Stand to temporarily fend off Frank Martinez and Sarah Torrance.
* The Last Stand where a couple dozen POWs, German defectors, American soldiers, and a tank held off a 200-man Waffen SS death squad until reinforcements arrived.
* The Last Stand which Ray uses to chase after him at the climax of the film.
* The Last Starfighter After the alien Grig describes his home as a cave, Alex tries to describe his home.
* The Last Starfighter, Alex Rogan is recruited to be a real Starfighter when he breaks the record on a video game; the game was just a test to find someone with enough talent.
* The Last Starfighter: Alex Rogan's mother says exactly the wrong thing to her son who is dreading the idea of life never going further away than the trailer park he's grown up in... and doesn't seem to know why that upsets him.
* The Last Starfighter, a movie about an alien race who recruits pilots through video games:
* The Last Starfighter, an alien Zandozan assassin does this to a local law enforcement officer in order to blend in with the human population. After we see this we realize that the other Zandozan we saw in human form earlier must have done it to some unlucky human off screen.
* The Last Starfighter. An apparent ordinary arcade game turns out to be one of these, both a training device and a recruiting tool to find promising pilots.
* The Last Starfighter and it occurred to him, that what if a video game had been a sword in a stone, and a boy had scored an incredible number in the video game, which sent out a ripple effect across the universe.
* The Last Starfighter as a fighter pilot, Centauri uses this as a last-ditch attempt to recruit him.
* The Last Starfighter, as an alien assassin comes to his hometown. Centauri implies this trope (as well as Alex's death) will result unless Alex takes part in the war. Alex reluctantly agrees.
* The Last Starfighter, Centauri dies from injuries sustained from the battle with the Zando-Zan assassin, but Centauri shows up alive later, and fully healed.
* The Last Starfighter comes pretty close with Xur (pronounced "zur").
* The Last Starfighter did a non-magic version. A con man looking for recruitment bounties wants to recruit the most talented pilot he can find in order to get paid by the Star League. He does this by seeding planets with a testing booth disguised as an arcade game called Starfighter; the one person who beats the game turns out to be a human teenager living in a desert trailerpark.
* The Last Starfighter. During Zur's transmission into the Starfighter base, his holographic head glitches several times.
* The Last Starfighter, Earth is an underdeveloped backwater notable mainly for being neutral in the war between the Star League and the Kodan Armada and off-

limits for mercenary Starfighter recruiters. That is, until Alex Rogan beat a certain video game...
* The Last Starfighter features this exchange between protagonist Alex and his alien navigator Grig:
* The Last Starfighter, Grigg explains that they'll be facing wave after wave of Ko-Dan fighters, but the biggest threat is the communication turret on the bottom of the Ko-Dan command ship, which allows the fighters to act as a single coordinated unit.
* The Last Starfighter has a variation. The assassin sent to kill the titular hero manages to get off "The Last Starfighter is..." before he is killed, but the bad guys already knew who he was - what they didn't know was if he was still a threat.
* The Last Starfighter has been kept beyond the frontier of the civilized galaxy by an energy wall generated by thousands of satellites in a grid formation. That is, until the Ko-Dan laser-bore a hole in this wall, through which they launch meteors at Star Base. The damage created by these meteors disables the satellites, so the frontier wall dissipates, allowing the armada free go at the galaxy.
* The Last Starfighter has Ko-Dan fighters do this when battling Alex's Gunstar. The Gunstar itself has its weapons mounted on turrets and fights by simply plowing right through the enemy formation and blasting anything it can reach.
* The Last Starfighter has the Ko-Dan Armada severely damage Starfighter Command by firing small asteroids at it with a mass driver of some sort.
* The Last Starfighter. He goes and gets into his squad car, only to be attacked and killed by a shapeshifting alien "hitbeast" called a Zando-Zan.
* The Last Starfighter is about an Earth teen who gets recruited by aliens for this sort of organization.
* The Last Starfighter is a sassy flirt who spends her days listening to modern rock music on her headphones, and makes Maggie and Alex look stodgy by comparison.
* The Last Starfighter is a variation. He is a gunner, not a pilot, on what is essentially an outer space weapons platform (which lacks the maneuverability of the typical Ace Pilot vehicle), but he basically fulfills this trope.
* The Last Starfighter. Justified in this case, as it's a one-shot last-resort weapon meant to take out all enemies at close range.
* The Last Starfighter, opening the loading access panels to the missile magazines and firing them all. In this case, though, none of the rockets actually hit anything.
* The Last Starfighter's gunstar is set up like an attack helicopter, with Grig (in back) as the navigator and pilot, responsible for navigation and technical matters, while Alex (in the front seat) serves as the ship's gunner.
* The Last Starfighter, since the Gunstar is capable of detecting the species of its pilot and modifying its cockpit and controls to match.
* The Last Starfighter starts with his being recruited to become a mecha pilot based on his performance with a video game created to train and scout prospective recruits. Military-grade simulators are also referred to in several cutscenes.
* The Last Starfighter, the android Beta removes his own head to repair it.
* The Last Starfighter. The Death Blossom device in Alex's Gunstar has never been tested. Grig tells Alex that using it might overload the systems and blow up the ship. Alex convinces him to use it anyway, and it destroys all of the Ko-Dan fighters.
* The Last Starfighter: The Gunstars and Ko-Dan fighters (though the Gunstars are really more like a gunship or weapons platform than a true fighter).
* The Last Starfighter: The images Zur projected into the Starfighter base.
* The Last Starfighter the invading Kodan fleet all wore uniforms of red with black touches (Xur wore all black, but he was a traitor from Rylos working with the Kodan).
* The Last Starfighter. Their commander even states that they're already better than war vets, who are stuck in their ways. Innovation and improvisation is the key to victory. This proves true during their battle, when they come up with unorthodox and unexpected tactics that would've led to victory, if their admiral didn't plan to sacrifice them all along to further his own career.

* The Last Starfighter the Starfighter base is destroyed by an attack killing all the Starfighters except Alex, who had returned to Earth
* The Last Starfighter, the Star League created The Frontier, a force field barrier generated by a pattern of fixed devices. It was designed to keep out the Ko-Dan Armada, the starfleet of the Ko-Dan Empire.
* The Last Starfighter (though it's the 10-year-old brother with the stash in this case). Alex has just met his simuloid duplicate, Beta, and the conversation naturally gets a little loud. Startled, Alex's younger brother Louis wakes up:
* The Last Starfighter to recruit from planets so primitive they aren't even on the map is that the "civilized" races have put war behind them ages ago. Those few with a talent for violence — the Starfighters — are considered dangerously psychotic by most of their own people.
* The Last Starfighter: Used to explain why the Star League is so hard up for fighter pilots as to be recruiting them from pre-contact worlds. Most Starfighters are, by the League's standards, homicidal maniacs. Just hearing the battlecry "Victory or death!" made a visiting official physically ill.
* The Last Starfighter was based around this idea; aliens plant a spaceflight simulator disguised as an arcade game on Earth, and recruit the high-score winner to help them fight invaders. Made somewhat more realistic - and easier for the hero - by the fact that he's merely the ship's gunner and has someone else to do the actual flying for him.
* The Last Starfighter, when Centauri asks who made the highest score on the Starfighter video game, Alex replies: "Alex Rogan. You're looking at him."
* The Last Starfighter, when Centauri brings up three people, but Alex doesn't recognize the last one.
* The Last Starfighter when he sees his brother Alex and Alex's girlfriend Maggie kissing.
* The Last Starfighter, when he was wounded in front of Alex Rogan's girlfriend. Moments before, Beta had been trying to convince her that he was a robot. She didn't believe him. He gets shot, shows her his circuits, and says, "See?" before chasing after the attacker.
* The Last Starfighter, where Alex overcomes his original reluctance to get involved with Xur and stays with the Star League.
* The Last Starfighter, where the mere mention of physical violence made many League members uneasy.
* The Last Star) realizes this, and, being a soldier himself, can keep his force disciplined enough to not get too many losses. And still, the Minbari are on the verge of economic collapse due the attacks on the shipping lines...
* The Last Station is about the last days of Leo Tolstoy told from the perspective of a young man hired to be his secretary.
* The last steam train to be built by the British Railway was named the
* the last stormsonor, the last living specimen of a species of immense birds that slowly went extinct as the growing ice age covered their feeding grounds in ice and caused their egg-like pupal sacs to freeze to death before they could hatch. The last one was born in a freak warm year, from a clutch deposited by an ancient hen who died after laying, and was the only one to hatch successfully. She never met another member of her kind, and instead imprinted on a flock of a much smaller related species with which she spent the rest of her life.
* The Last Story after a sidequest you'll get a few of them, with a fan club...
* The Last Story doesn't suffer as much, but it does suffer. Upgrading the armors can help make them look more sensible, or a lot worse. There's also a color option in case you think Calista's bright pink armor is too insufferable. Honorable mention goes to the Dragon greaves, which looks like half of a bad Dragon costume that was used at a furry convention. Of course, you could just make them invisible, which just makes the characters run around in incredibly boring underwear.
* The Last Story functions like this. He proclaims himself an archaeologist, but he seems to know a lot about architecture, geology, and dark magic (merely as an academic curiosity, of course), aiding the protagonists in a series of optional chapters.

* The Last Story has Dagran, who manages to return to the good side right after his terminal defeat in the final battle. Even after his death, he manages to use the power of the Outsider to revive Lowell.
* The Last Story has one that starts with a lunch bag (mandatorily received after a main mission), and concludes with receiving a rare katana in a subterranean prison.
* The Last Story: If you refuse to marry Calista 3 times in chapter 42, you get a Game Over.
* The Last Story is used to show how pompous and corrupt he is, especially during the attack on Gurak civilians.
* The Last Story, it is also stated that the Empire has fought many campaigns against the Gurak people in the past. The game's plot is well and truly kicked off when the Gurak invade Lazulis Island, sparking off another war.
* The Last Story Its sole purpose is to make your characters appear as if they aren't wearing any armor when, in fact, they are. And naturally, you get the dye that makes your shirt invisible long before the one that makes your pants invisible.
* The Last Story Some rare items, like the Particle of the Outsider, are more plentiful so you can upgrade your members' weaponry and armor more easily.
* The Last Story, the final game in the original set of three games wanted by Operation Rainfall.
* The Last Story when the Gurak attack Lazulis Castle during her engagement announcement. Though five minutes later, you pass by her room and she can duck in to change into something more appropriate.
* The last straw is when the government refuses to pay the families of the dead soldiers due to plausible deniability, which drives Hummell to go rogue.
* The Last Straw, Rowley's personality became a lot more juvenile and so did his interests, to the point even Greg felt embarrassed to have him as his friend. However, as of the recent books, this is being slightly undone with Rowley finally growing up from the kiddy interests. In fact, there's a little bit of hints that unlike Greg, Rowley is actually advancing as a teenager.
* The last strike of a full Hammerfist combo usually results in human-class enemies flying yards.
* The Last Summer Erin works as a PA who fetches coffee orders at an office and doesn't seem to like it. She says it's only for her college resume.
* The Last Summer even though it was merely for a couple seconds in a background role.
* The Last Summer Foster recalls one girl he went after, Brenda Boner, actually was willing to have sex but as they stepped down her dad came home so they had to sit on a couch under a blanket for a long time to cover up how they weren't wearing pants or underwear, with Brenda's dad sitting next to them to watch tv.
* The Last Superhero have ostensibly (history is not noticeably different than our own) been influencing the history of the United States since its founding. The protagonists of the book are John Utticus Wagner II, his father Orville, and his grandfather, John.
* The Last Supper: Bartholomew has slammed the table, James the Lesser is grabbing for someone's attention, Andrew can barely stand to hear any of this, Judas is hiding as best as he can, Peter is reaching over the table brandishing a knife, John is almost swooning, James the Great is keeping Thomas and Phillip from rushing Jesus, Matthew and Thaddeus are ambushing a dumbfounded Simon for information, and Christ... is solely focused on the bread and wine in front of him, with no regard for the panic of his followers. For reference, the painting depicts the moment during the dinner where Jesus reveals one of his followers will/has betrayed him to the Romans, and that he will soon be crucified.
* The Last Supper depict events, Peter will cut off the ear of a Roman centurion within a day.
* The Last Supper, Judas is identified by the small bag he is gripping, either indicating the money he accepted to betray Christ or the Apostles' treasury from which he is stealing. Either way, the bag acts as a reminder why Judas is framed in darkness apart from the other Apostles.

* The Last Supper: Judas, the traitor Jesus is alluding to, is framed in shadow to distinguish him from the just apostles in the light.
* The Last Supper painting everyone is most familiar with doesn't have the halos, but it does have one guy framed in shadow and leaning away from Jesus, spilling salt (a bad omen) all over the table.
* The Last Supper's depiction of John is often mistaken for a woman due to Leonardo's attempt to convey youth through John's his long hair and lack of a beard. This confusion has lead to wild mass guessing that Leonardo's John is supposed to be a depiction of Mary of Magdala, although this idea leaves Jesus with an Apostle missing from his supper.
* The Last Supper's notes that specified which names of each individual in the painting. Sure, Jesus was easy to spot out, but it's harder to tell the androgynous figure next to Christ is John without Leonardo's confirmation.
* The Last Supper, the female character Paulie is caught masturbating while fully clothed and it doesn't really faze her.
* The Last Supper, the individual reaction of the Apostles to the news of a traitor is not described, and neither is the physical appearance of the Apostles or Jesus. In visualizing the Last Supper, Leonardo uses the personalities of the Apostles as described elsewhere to extrapolate how he thinks they would react and puts the ideas to paint.
* The Last Supper, the only one without an emotional reaction to the upcoming betrayal of Jesus is Jesus himself, who remains calm among the chaos of the scene. Jesus appears to be reaching for the bread in front of him, as if moving on from the matter.
* The Last Supper: The painting contains several notable appearances of the number three, perhaps reflecting the Christian doctrine of the Holy Trinity.
* The Last Supper to allow the viewer to clearly see all of their reactions to the news of a traitor in their midst.
* the last survival of Imperial Rome. Just try to picture of all those ancient Emperors as thuggish godfathers, or vice versa: quite an interesting new perspective, isn't it.
* The last team faces off against Ainz himself. Not only does he fight them to a standstill, he then reveals he's not a warrior but a caster, and takes off the ring that was hiding his
* The Last Temptation of Christ) but contrary to popular belief, very poor box-office sales.
* The Last Temptation of Christ by involving a lot more people than the traditional thirteen (including women) and having them seat on the ground, and the Crucifixion scenes skew from traditional religious portrayals in favor of archaeology and non-religious accounts of how Roman crucifixions happened (for example, Jesus only carries the horizontal section to Golgotha, he is nailed by the wrists and also tied, and the two thiefs are nailed to dead trees). Jesus' cross looks like a traditional Latin cross by sheer accident, due to the wooden sign reading "Jesus Nazarene King of the Jews" being placed on top of it; if not for that, it would look like a 'T'.
* The Last Temptation of Christ happens, Satan appears as an angel in the form of a young girl and finally as the pillar of fire again.
* The Last Temptation of Christ it was banned in Chile because it was considered offensive to the Catholic faith. During the 90s it became a symbol of the fight against censorship and conservatism in chilean society, but it only lifted its ban in 2003
* The Last Temptation of Christ Jesus rejects it to die on the cross and redeem humanity.
* The Last Temptation of Christ off the ground by the end of the decade.
* The Last Temptation of Christ's long-planned film adaptation finally got greenlighted.
* The Last Temptation of Christ. The entire scenario of the film is that Jesus was tempted with, not power and glory, but a completely normal life. According to the film, if Jesus could have a wish just for himself, it would be his own carpentry

shop, a loving wife and some kids. (Yes, and doing all the stuff with his wife that gets all those kids.)
* The Last Temptation of Christ who were afraid of what "superstitious viewers" would do after watching a film that depicted Jesus Christ as a flawed human being.
* The Last Temptation of Christ, you cannot find a copy of it in any local video store, and it's rare to find a bootleg copy of it.
* The Last Temptation of Homer revolving around Homer falling in love with an attractive co-worker named Mindy Simmons, much to his chagrin. It is heavily implied that Mindy doesn't want to be attracted to Homer either. In the end, Homer ultimately chooses to stay faithful to Marge, which Mindy accepts — she leaves after sharing a kiss with Homer, and Marge later shows up to share a romantic evening with Homer.
* The Last Temptation of Homer", when Homer goes to Capital City with Mindy to attend an energy convention, the bellhop assumes that Homer & Mindy will be getting it on.
* The Last Temptation of Homer when Moe says that it's "the worst name I ever heard". Then Homer just admits his problem.
* The Last Temptation of Krust" is a "Chinaman" impression, complete with fake buck teeth and catchphrase ("Me so solly!").
* The Last Temptation of Krust said "I got my period today" while at the comedy festival.
* The Last Temptation of Krust", which revolves around Krusty attempting to modernize his stand-up act, he tests his first batch of new observational material on the family:
* "The Last Test", Georgina faints from relief upon seeing her brother returned and alive. He frantically fetches a jug of water and pours it on her, waking her up.
* The Last Theorem. They immediately decelerate, but wonder how are they suppose to keep themselves hidden if gigajoules of energy were poured out from 154 spaceships at once. They, of course, then get detected.
* The last thing the Drive-Thru Whale does in the cartoon "Drive-Thru" is blast off into orbit after eating a Europa-pean Space Lobster.
* The last third of "Anime Games" has Scott being pulled into an anime fight, with Scott and the opponent fighting inside giant mechs they conjured up.
* The last three minutes and seven seconds of "I Want You (She's So Heavy)" is the same six-note guitar riff. Over and over again. Until of course, the riff cuts off in the middle
* The Last Thrilling Wonder Story: Wolfe argues with his protagonist, punishes him for not following the plot, and realises at the end that the character has broken through the fourth wall and is coming for him.
* The last time is after Henderson quits, and Frohman decides to steal his Combine Elite uniform for a bit. This doesn't play into much before he ditches the outfit again.
* "The Last Time" opens with the male singer going to the female singer house and show up as her door, with lyrics setting up as an intimate only to reveal that the reason he is going there to beg her for forgiveness.
* the last time they met-over-the-phone shows Mira doesn't mind at all.
* The last time we see Amy on-screen (not counting the movies) is in
* The last time you see Lovejoy, he is limping and his face is bleeding. This isn't due to injuries caused in the ongoing disaster; a deleted scene has Cal send Lovejoy after Rose and Jack after he realizes the Heart of the Ocean is with Rose, and Jack beats Lovejoy in a fight.
* The last to have undergone this sentence was Peter James Bossy who, rather than serving a
* The Last Tomorrow: Avril eventually uses her googles as eye protection while repairing a broken weapon.
* The Last Traction Hero's power plant. He doesn't want the fact to be spoken of again.
* The Last Train involves a man going down into a station and finding himself apparently back in time - or is he among ghosts? The people there don't belong in

the 70's when he enters the station - they appear to be sheltering from bombs during the Blitz.
* The Last Train that let the main characters survive, is this when he reappears in the future, forty years older.
* The Last Train, where a meteor strike is about to hit the earth causing bringing about the end of civilisation as we know it, so the nation's top scientists are stored as human popsicles in an underground laboratory whilst the general public is kept ignorant. The main characters are all random strangers travelling on the same train who get also get made into human popsicles when a junior scientist traveling on the same train realizes she won't make it to the facility in time and activates one of the freezing devices. She initially has a hard time convincing the others of what really happened when they all thaw out.
* The Last Tribute gets a brief moment of this as he ponders her fate.
* The Last Tribute series, Haymitch invokes this by having one of his sponsors talk about what a shame it is that their slaves to the rules say only one tribute can survive the Hunger Games.
* The Last Trump immediately gets to work on supporting proposals for years to be measured from the Atomic Era.
* The Last Trump, there is no sunlight, just a pervasive light and warmth. One of the characters believes it to be the light of the First Day; before the sun, moon, and stars were created.
* the Last Tuesday Society operates the Viktor Wynd Museum of Curiosities, Fine Art, and Natural History. They also have a branch in Falmouth.
* The last two lines are either an inversion, in that Miracle Max thinks he's lying when he's not, or it's simply that Miracle Max is less pleased by the real story than he was by the lie.
* The last two remaining people, Saruwatari and Mark, have one to kill themselves after everyone else is Locked in a Freezer
* The last two seasons invert this by having Michael attack others while they have home field advantage. He counters their advantage through planning, surveillance, and slight of hand.
* The last two years of the losing streak would give a taste for what was ahead. In 2011, the Pirates shocked the baseball world by suddenly having a winning record going into the All-Star break. However, after a marathon game with the Atlanta Braves that lasted 20-innings, the Pirates lost over a suspect call. From that moment onward, they went on a losing streak and finished the year with a losing record. 2012 would even be more painful for them. The Pirates carried a winning record all the way until September, only for them to suddenly start losing series to some of the worst teams like the Chicago Cubs, and ended their season with another losing record.
* The Last Ultramarine appears for only the final part of the first scene in the story, but in that brief appearance he disrupts Tzeentch's ritual. This ensures that Taylor
* The Last Unicorn. All of its conversation consists of random quotes, some of them suspiciously modern-sounding for the world it lives in.
* The Last Unicorn. As the narrator puts it, he's not lying, just arranging events in a more logical way.
* The Last Unicorn, Captain Cully requests that one of his men sing a song of Cully's heroics. The musician later angrily gets up and reveals that, rather than valiantly fighting off the three villains in the song, he wrote them a letter - which he didn't even sign.
* The Last Unicorn) explains to Lady Amalthea, a unicorn transformed into a human, why he has captured all the other unicorns.
* The Last Unicorn has a slight variation. Lir isn't dead yet, but his mortal life is nothing compared to the immortal unicorn who will forever remember him and the love it had for him.
* The Last Unicorn, has long flowing white hair. "The young girl... she looks so strange! There's a newness about her," comments Prince Lir.
* The Last Unicorn have a couple of suggestively-placed large boles on its trunk.

* The Last Unicorn/hilarity when Lir, who's in love with her as a human finds out who she really is and says "Unicorn, mermaid, sorceress, no name you could give her would surprise or frighten me. I love whom I love." Schmendrick says "Well, that's a very nice sentiment, but when I turn her back into her proper shape..." and Lir just repeats stonily: "I LOVE WHOM I LOVE."
* The Last Unicorn (immortal but can be killed) live solitary lives in separate forests and mate very rarely.
* The Last Unicorn initially is pushy towards the Lady Amalthea, doing many different actions to call her attention, but she's disinterested in engaging with him. After she loses her memory is when she starts giving him a chance and falling for him.
* The Last Unicorn is regarded as highly faithful to the text, even though significant parts of the book (such as the poetry and songs) are left out.
* The Last Unicorn, it's treated as a joke. Several chapters later, Amalthea and Lir fall in love. It's explicitly stated that Amalthea still has feelings for him after she's turned back into a unicorn.
* The Last Unicorn: King Haggard falls to his death from the balcony when the unicorns destroy his castle.
* The Last Unicorn Midnight Carnival while they wait for the show to start, but he could "work more ominous wonders if he chose."
* The Last Unicorn Mommy Fortuna, the old hag who captured the Unicorn, had also captured a harpy, another immortal creature. The unicorn points out that Mommy couldn't hold them forever, and the harpy will kill her for the indignity. Mommy Fortuna agrees that, yes eventually, she will slip up and the harpy will go free; but, the harpy will always remember Mommy Fortuna had captured her, forever. That is how Mommy Fortuna plans on "living forever," as a memory of the immortal harpy.
* The Last Unicorn. Over time, her humanity becomes evident, gains substance, and becomes her own woman — who is able to make her own argument for the beauty of mortal pleasures like love. Alas, she 'dies' when the unicorn retakes her rightful form.
* The Last Unicorn Prince Lir's romantic overtures at first, but she becomes more human emotionally as time goes on, and soon returns his love.
* The Last Unicorn, Schmendrick gets this treatment from the tree he's tied to after his magic makes it decidedly more anthropomorphic.
* The Last Unicorn, she screams that "I can feel this body dying around me!" She gets used to it.
* The Last Unicorn, she's horrified. Following this traumatic event, she becomes completely emotionless and slowly forgets who she was. It's not until later in the story that she's able to feel emotions again.
* The Last Unicorn she's met his human counterpart, meaning that one moment of taking notice of him came from his reminding her of the human version!)
* The Last Unicorn: Somehow the Red Bull runs through all of England without being seen by every town in the way.
* The Last Unicorn starts losing her sense of self when she's transformed into a human.
* The Last Unicorn. The eponymous unicorn can't stay among humans, since so few are pure enough to recognize her and treat her as an intelligent being deserves, but her time as a human has allowed her to know love and hurt and joy, things normal unicorns never experience, so she'll never again fit in among the eternally unchanging, emotionless creatures that were once her own kind. Still, she thanks Schmendrick for the experience, with the claim that if she had to do it again she would. Also in the original novel.
* The Last Unicorn the title character is immortal but can be killed by anything from a dragon to a stray arrow.
* The Last Unicorn, the unicorn (who is very old herself) speaks about the Red Bull this way.
* The Last Unicorn to be turned back because she'll lose the man she's come to love.
* The Last Unicorn, unicorns never cry because they never feel the kind of human

grief and regret that would prompt them. After a stint as a human to save her fellows, the unicorn confesses that she is now full of tears even though she cannot cry.
* The Last Unicorn: When running from a freed harpy in Mommy Fortuna's Midnight Carnival, the Unicorn instructs Schmendrick not to run (you should never run from anything immortal, as it attracts their attention) and not to look back as it tears Mommy's thug to shreds.
* The last verse completes it. Unlike the first three verses, which were addressed from Stan to Eminem, the last verse is Eminem's response to the letter in the second verse. He sees how unstable Stan is and says that he hopes the letter gets to him before it's too late and Stan ends up like the guy he saw on the news that killed himself and his pregnant girlfriend by driving them off a bridge.
* The last vision in the last episode we have of agent Cooper is him laughing maniacally in front of a mirror. One can assume that he remains forever possessed by BOB, who now roams again freely. A
* The Last Wagon) is shot after less than ten seconds of screen time and just one quick line of dialogue. Harper's third brother, Cole, lasts a few minutes longer and has some dialogue, but falls to Todd after a close-quarters battle.
* The Last War averts several tropes by making the sides the Federation and Alliance, and not pointing fingers at any countries in the nuclear attack at the end.
* The Last War when the designer dress Harry bought Ginny is described as "incredibly stripperiffic".
* The Last Wave lawyer Richard Chamberlain dreams of an young Aborigine standing in his home offering him a sacred stone—the day before meeting the young man who is accused of murder.
* The Last Wave, which is all about the end of the world and about doom. There isn't a single effects shot.
* The last weapon has a spade-like or axe-like blade fixed to one end and a crescent-shaped blade on the other.
* The last we see of Mew Cai, after her destruction, is her avatar curled up on a cloud, watching a toaster's soul fly past her.
* The last we see of Ziggy Sobotka in season 2 is him on his way to prison in the ending montage.
* The Last West, Robert Whittenheimer is trying to figure out what went wrong with his grandfather's atom bomb, believing that it is the key to ending America's technological stagnation.
* The Last West, the US failed to develop a working atomic bomb in 1945, and thus the war in the Pacific never ended. Sixty years later, the US is still fighting against the Japanese.
* The Last, when Iruka tells his students to write down the name of the person they want to spend their last day with, Naruto tells Sakura that he'd protect her, which she predictably rebuffs because she's focused on Sasuke. However, when Naruto actually thinks to himself, he admits that he doesn't have family or friends, and he's unable to write down a name. Despite his previous statement, Naruto does not think to write Sakura's name, even though he's supposed to have a crush on her in his childhood. This is an understated yet telling scene that demonstrates that his passing crush on her was non-existent and not serious.
* The Last Will of Dr. Mabuse (1931) as the main protagonist. Blending the super villain from a pulp thriller with the hero of a police procedural works surprisingly well. Well enough that a 1960s revival of the Mabuse series retains Lohmann as its protagonist.
* The Last Winter, Dawn goes insane and murders Motor, the station mechanic. When Abby finds her shortly afterwards, Dawn starts laughing insanely and attacks her.
* The Last Winter: When Alaska's northern areas start to melt, spirits of extinct animals start to manifest from the oil.
* The Last Wish being ordered and try to murder potential master before he have a chance to speak. And once you manage to get a genie under your control, he will harass you until you'll use all wishes, so he can finally be free.

* The Last Wish frequently employ similar after-the-fact recollections as framing devices for story segments (to the point of smothering the actual story at times).
* The Last Wish, the protagonist Geralt of Rivia, a man who hunts monsters for a living, pulls out a rather vicious one against a racist half-elf who insulted him for being a witcher.
* The Last Witch Hunter. A kiss between them was filmed but cut from the finished product. While she helps him get over his wife's death, Chloe is significantly younger than him (twenty years between the actors) and it's never stated whether things are romantic or more of a surrogate father/daughter pairing.
* The Last Witch Hunter and, more importantly, being eight hundred years old while Chloe seems to have not yet hit her thirties.
* The Last Witch Hunter, Axe and Cross uses Tarot to determine whether the suspect is guilty. In this case, the trouble comes from the fact that they determine him to be guilty, but acting alone, while the latter clearly isn't the case.
* The Last Witch Hunter, Belial sacrifices another warlock, Max, against his wishes to bring the Witch Queen back.
* The Last Witch Hunter, Belial sets Ellic up to be arrested for 36th Dolan's murder to throw Kaulder off his tracks.
* The Last Witch Hunter, both the memory potion and the dreamwalkers can make what happens to people in dreams happen to them in reality. This was exploited by the dreamwalkers of the past, as Kaulder calls them the Queen's "deadliest assassins".
* The Last Witch Hunter, Chloe has a cat sound ringtone for Miranda's calls which everyone in the room finds awkward.
* The Last Witch Hunter ends with Kaulder and Chloe setting off to watch out for rogue witches, this time without Axe and Cross' aid.
* The Last Witch Hunter, flashback!Kaulder sports an impressive Viking beard.
* The Last Witch Hunter has Aston Martin Rapide which Kaulder uses frequently in the present.
* The Last Witch Hunter has this in addition to his immortality. Lesser wounds heal in seconds and broken bones need less than a minute to mend themselves.
* The Last Witch Hunter in the present-day part of the film is an eight-hundred-years-old, gun-and-sword toting, witch-killing badass with a bald head.
* The Last Witch Hunter is rather baroque, incorporating dozens upon dozens of inerwoven, intricate details, each of them somehow referencing witchcraft as depicted in the film.
* The Last Witch Hunter is said to be based on four elements, and sometimes it shows. Weather runes (cold and water) are obvious examples and at one point Belial breathes fire.
* The Last Witch Hunter. Kaulder mentions that during the war against the Witch Queen, dreamwalkers were her deadliest assassins.
* The Last Witch Hunter, Kaulder often provides information about the world of the film to Chloe and 37th Dolan, who are both new to the job.
* The Last Witch Hunter, Kaulder takes her to a bas-relief depicting her kind's functions and powers back from the days of the Witch Queen, expositing as he shows it to her.
* The Last Witch Hunter, light seems to be general anathema to Dark Magic, as the Witch Queen dwells in darkness and is physically repulsed by light, while Belial's teleporters work only in shadows. Kaulder exploits this in his final fight against the Queen.
* The Last Witch Hunter. On the one hand, he obviously misses his wife and daughter, and is sorely tempted when the option to finally die is presented to him. On the other hand, he seems to have decided to make the most out of his immortal existence, cheerfully indulging in modern technology like iPads and sports cars.
* The Last Witch Hunter personality and appearance are completed by her smoking, first a cigarillo, then from a shisha.
* The Last Witch Hunter Secret Keepers, helping Kaulder fit into advancing society, recording his history and keeping him human.
* The Last Witch Hunter sorceress quickly turns into an old crone. It's implied that the charm wasn't keeping her young as much as it was projecting an illusion.

* The Last Witch Hunter tech and have their own patterns of weapons — not to mention employing world's only immortal witch hunter.
* The Last Witch Hunter. Thankfully, Kaulder manages to realize that the man is cursed, not dead, before the funeral.
* The Last Witch Hunter that him walking in to a witch bar clears the entire place out before he even makes it to the counter.
* The Last Witch Hunter, the eponymous witch hunter spends most of the movie in shirt and suit trousers.
* The Last Witch Hunter, the hunters in the prologue destroy the Plague Tree by burning it down, and Kaulder's sword can be set on fire for witch hunting. It's even in Axe and Cross' motto, "by iron and fire".
* The Last Witch Hunter, the very basis of the plot is the Witch Queen doing this.
* The Last Witch Hunter, the Witch Queen claims to remember the times before mankind. Depending on which hominid you consider to be human already, her lifespan could be measured in millions of years.
* The Last Witch Hunter, the Witch Queen's plan is to eradicate the entire human civilization and all traits of it so that the witches can rule the world.
* The Last Witch Hunter, when inspecting 36th Dolan's house following his death, Kaulder checks it for earth magic and the entire illusion of peaceful household is immediately shattered, revealing that the place was raided and the Dolan tortured.
* The Last Witch Hunter, with all the voice the man brings to the part.
* The last words from the American submarine USS Thresher, in communication with a surface ship just before sinking, were "...exceeding test depth...".
* The last words of a Black Dragon who was going to subject Vaarsuvius' family to a
* The last words of Juliet: "I have to tell you something, it's really really important..." Luckily,
* The last words spoken during the anime version indicate Ryuk is leaning on the fourth wall. They're spoken by Ryuk as
* The Las Vegas Raiders and San Francisco 49ers used to play one another every preseason, in an annual "Battle of the Bay" game because the Raiders were once stationed in Oakland. This lasted until the 2011 meeting, which saw multiple brawls between the teams' fans, including a brutal beating of one fan in a restroom that sent them to the hospital. This led to the NFL officially discontinuing all future preseason games between the two teams.
* the Las Vegas version, just replace the beaches of Miami with the hotel pools.
* The late 18th and early 19th centuries saw France and Britain try to inflict these on each other at various times in their mutual rivalry for European supremacy. Britain being an island was both its main strategic strength (all the superiority of one's army was pointless if it couldn't cross water safely)
* The late 18th century saw two major Enlightenment-inspired revolutions,
* The late 1970s and into the early 1980s was not a good time for cricket uniforms, specifically the one-day format where coloured uniforms are the norm.
* the late 1980s (design work underway in 1990, shown 1992), and plenty others.
* the late 1980s it was not considered shameful for American men to wear them while swimming.
* The late 1990s were chosen most likely because Bellisario wanted to keep the time-travelling within Sam's lifetime, but also within the audience's past. Therefore, the show's "present" needed to be futuristic, but couldn't be too far in the future.
* The late 2000s/early-mid 2010s economic slump, credit crunch, and dismal job market pretty much became a Trope Breaker for
* The late 2010s introduces Carl Hardee, Sr. and his hapless son Carl Hardee, Jr. As the spokesmen for the Hardee's and Carl's Jr. chain of restaurants.
* The late 3.5 base class Dragonfire Adept centred around the power of dragons. While some of this came out in the form of a kind of spellcasting, they also got the ability to breathe fire (and potentially several other things) and grew scales (and got a free bonus feat that allowed access to otherwise sorcerer-specific dragon-themed transhuman feats).

* the late 60s. In these, a student (usually) named Pepe Nietnagel is The Prankster who keeps driving his teachers insane (literally in one case). His pranks aren't quite as elaborate as Pfeiffer's, but Germans are quite easy to entertain.
* The late 80's "Wacky Wild Kool-Aid Style" and early 90's "human cartoon" ads for Kool-Aid brand juice products were produced by the
* the late 90's, which they did through letters in the original and through e-mails in the 90's series.
* The late Argentinian President Nestor Kirchner and his collaborators were nicknamed "The Penguins" because of Kirchner's birth place in the South of Argentina and his bird-like nose.
* The late Bob Munden was a wizard with his single action .45LC revolver. A real life Lucky Luke,
* The Late Bourgeois World, in which the apartheid government collapses amid violence, switches from past tense to present for the short last chapter, in which the main female protagonist is running towards a helicopter that contains either "saviors or murderers".
* The late British film critic Leslie Halliwell published many volumes of his capsule film reviews, which were noted for being consistently negative towards modern-day (post-1960) motion pictures, a fact noted by media outlets such as the
* The late bungling inventor B.S. "Bloody Stupid" Johnson is a peculiar inversion of this trope, whose inventions frequently bend the fabric of space and time in order to
* The late Captain Flowers of Blue Team was shown to be this before the show began, either through flashbacks
* The late comics artist Dick Hafer had a few of these included in his book
* The Late Crusader is a road trip comedy about a 12th century knight hitching a ride with an unfortunate Portuguese teenager to the Holy Land... in the modern day.
* The late Dame Barbara Cartland, prolific romance novelist. Clive James famously described her face as looking like "looking like the corpses of two crows that had flown into a chalk cliff".
* The late David Jackson was once mistaken by a kid for Olag Gan, his
* The late Derek "Boogeyman" Boogaard was 6'7'', arguably stronger than Chára, and was pretty much a designated fighter.
* The late Dick Beals made a living voicing children in his career, as his voice was buffeted by his 4-foot, 7-inch body frame. He was Speedy Alka-Seltzer, and was the voice of not only Buzzer Bell on
* The late director Gary Winick did a number of cookie-cutter romantic comedies (
* The late Dwayne McDuffie was known for rather hostile reactions toward any fans who criticized him on his work on
* The late Edd Gould was once asked on Tumblr if he was disturbed by Rule 34 of his characters, especially seeing as most of them are based on him and his friends. He responded with "it was only a matter of time", implying that he considered it inevitable, regardless of his personal thoughts on it. Tom Ridgewell and Matt Hargreves have expressed similar sentiments, though, after Edd's death, both of them are a little more...caustic about it (not without reason, of course). Tord Larsson's thoughts on the matter have never been recorded, due to him leaving the show before the fandom exploded (though some fans speculate that aggressive shippers were part of the reason he left).
* The late English magician/comedian Tommy Cooper was an undeniable master of using Obfuscating Stupidity in his magic acts. He intentionally botched his own tricks and acted incompetent 90% of the time until he'd pretend to foul up yet another, only to pull off the trick perfectly.
* The late Filipino composer Levi Celerio was known to use a leaf as a musical instrument, and even had a Guinness record for being the only man who could pull that off.
* "The Late Great Captain Pierce" has Hawkeye declared dead, so B.J. throws a wake for him. The P.A. announcer:
* The late, great country comedienne Minnie Pearl: "HOWDYYYYYYYYYYYYYYY!!!!"
* The late, great Dr. Hunter S. Thompson (AKA Raoul Duke), founder of a branch of

journalism called "Gonzo" (no, not THAT
* The late, great Eazy-E of N.W.A was rarely seen without his shades.
* The late great Tammy Faye Bakker Messner (née La Valley), wife of infamous televangelist Jim Bakker (1961-1992) and later Ronald Roe Messner. The woman's makeup would have scared the Joker.
* The late James Randi presented Pigasus Awards (Pig + Pegasus) each year for paranormal fraud in several categories.
* The late John Pinette also did a lot of jokes about food and his weight.
* the late Justin Carmichal). Additionally, Lovhaug and White have ditched the JewWario hats.
* The late Kevin Seymour was a veteran anime voice director in the 90s and early-mid 2000s, but he rarely cast himself in his shows. The biggest exception was Inspector Zenigata in
* The late kickboxing legend Andy Hug was famous for his axe kicks and using them for metagaming his opponents. Since axe kick comes down vertically from above, traditional boxing guard is useless against it. Opponents who tried to adjust their defense left massive openings elsewhere, which let Hug get a lot of knockouts with basic strikes.
* the late King Robert's bastard children. Even Cersei seems taken aback by this. They kill most of them.
* The Late Late Show and re-vamped it, giving it a new set and a more comedic style than Snyder's. Then he left the show...and in came Craig Ferguson, who became a darling in the late-night ranks, with his unconventional style of humor and freewheeling take on talk show conventions. After Ferguson stepped down, James Corden took over and gave the show a further makeover, prioritizing variety, equaling (and in some ways surpassing) Ferguson's success.
* The Late Late Show Geoff Peterson to get away with a hand gesture resembling masturbation because he didn't have genitalia.
* The Late Late Show had been a cult hit under its previous host Craig Ferguson (aided by his unique humor and charm), but James Corden's incarnation all but surpassed it in mainstream popularity thanks to the viral popularity of his "Carpool Karaoke" segments.
* The Late Late Show is breaking". After catching himself, Ferguson remarked, "That was a bit of a Freudian penis."
* The Late Late Show). It got a little bit better when Ferguson's new contract with the accompanying new larger studio kicked in, though new no budget items such as the 'fireplace' with a still of a fire keep the show's cheap charm strong.
* The Late Late Show phrase or two throughout the monologue leading the viewer to assume "he" can only be programmed to store a few phrases at a time.
* The Late Late Show where he listed off every single social network he was supposedly on.
* The late Linda Smith had a routine complaining about the use of this trope in opera: "Someone puts on a big hat and suddenly no-one can recognize them, even people who they've been talking to for half an hour. If that worked in real life, the witness protection program would consist of a selection of headgear."
* The Late Lord Frey gained his nickname for his (in)actions during Robert's Rebellion, in which he was a Tully vassal (and so supposedly on the side of Robert Baratheon), but while he called his banners and mustered an army, the Freys stayed at home until the decisive Battle of the Trident, at which point the Freys arrived
* "The Late Mattia Pascal" (translated from Italian) goes something like this:
* The late Miami Dolphins football team owner Joe Robbie played himself in the movie adaptation of
* The late Minnie Ripperton wrote her one big hit "Loving You" for her daughter Maya, who she
* "The Late Mr. Justice": An old foe of Jack's, gangster Rick Morales, is noted to have failed to be let out on parole twice because, in his hearings, he said the first thing he would do upon release was kill Jack Justice. Trixie has to confirm he did this twice, noting that doing it even
* "The Lateness Of The Hour" featured an old couple living happily in a mansion

filled with robot servants, and their unhappy daughter that wants to get out of the house. In the end, in true Twilight Zone style, she was a robot all along; when this revalation causes her a mental breakdown, the couple reprogram her to be a massagist.
* The late Peter Freyne, a local political columnist in Vermont. Two of the ones more recognizable to the rest of the country were "Ol'Bernardo" (Sen. Bernie Sanders, I-VT) and "Ho-Ho" (Former Gov. and DNC chairman Howard Dean).
* The Late Philip J. Fry, Fry, Bender and Professor Farnsworth are traveling forward in a time machine that can only journey to the future. At some points we cut away to what is going on with Leela and the rest of Planet Express, including visits to the years 3030 and 3050. Truly, this is technically "Meanwhile, back in the past," but what the heck.
* "The Late Philip J. Fry", when Fry, Bender and Farnsworth travel to a future where everyone is dead. They pass a couple of less total apocalypses on their way to the end of the world, and eventually
* The Late Philip J. Fry", which could only go forward in time. When Farnsworth, Fry and Bender returned to a new, identical universe (making the Big Bounce theory true), it's impossible to know if the killing of the fish or Hitler did anything to Universe Two because they didn't get to stop in the 31st century to find out. They had to go around again to finally make a stop at Universe 3. This leads to all sorts of crazy implications as to what happened to the time traveling crew in the 2nd universe...do they kill their Universe 4 selves?
* The Late Phillip J. Fry", Fry, Bender and Prof. Farnsworth are stuck in a time machine that only goes forwards, so they decide to just sit back and watch the end of the universe while downing a few beers.
* The Late Phillip J. Fry is parodied when it is shown that in the year 5,000,000 AD human evolution has diverged into two species. A unnamed race of small pink and purple creatures "advanced in intellect and morality", and the "Dumbloks", "stupid vicious brutes who live underground". The montage song "In the Year 252525" displays some less extreme examples such as medieval-looking knights riding ostriches.
* "The Late Phillip. J Fry" states that in the year 1,000,000 & 1/2, mankind's ultimate punishment will be enslavement by giraffes.
* The late plot of the series is driven by the stories left to the Uchiha clan by their ancestors on a stone tablet. As a narrator the tablet is proved unreliable when
* The late Polish music critic Robert Leszczyński was so infamous that he wound up as a target of a
* The late Prince Rhaegar Targaryen is described as an incredibly handsome man, even more beautiful than Jaime. When we see him in a flashback, he's pretty average looking.
* The later 8th Doctor stories show the opening stages of the Time War, with the Time Lords and Daleks working against each other and the Master being resurrected.
* The later addition of an Unknown/Ray route to Another Story also qualifies for this trope as, like with V, the original story gave no indication that Unknown/Ray was ever intended to be a love interest and even made it very clear that
* The later books make it clear that while joining a Center or Center-derived corporation is optional (At one point the leader of the first Center flat out stated that he barely had the resources to test the people who come to the Center voluntarily for Talent, so a law requiring people to be tested and registered would be unenforceable), obeying the code of conduct first laid down by the Centers is not. Any Talent, registered or not, that is caught using their Talent to commit a crime or do things that the Centers have ruled unethical is stripped of their psychic ability... permanently.
* The later books subvert this with the grags, an extremist faction that becomes the Discworld version of Islamic terrorists (bearded, live in caves, have very specific views on women and what they're allowed to do and use violence against those they deem deviants...). Thankfully, these don't last long.
* The later cartoon "Hobo Gadget Band" has the unnamed hobo and his buddies

entering a radio talent contest where they perform a song about themselves and how they use anything to make music.
* The later cartoons from 1964-69 after the original studio shut down, specifically the
* The later entries/Eutechnyx NASCAR series is a victim of this or not.
* The later episode "Magic Duel" features the "I can do it better" variant between Twilight Sparkle and
* The later episode "Power Ploy" plays it straight. After Kirby regains his strength, he grabs the snake monster, Red Viper, gets on his Warp Star, and instantly flies to the sun where he proceeds to throw the evil monster into it.
* The later episode "Regeneration" plays with this. Phlox is nearly assimilated by the Borg, but manages to take down a numerical sequence that he heard in the hive mind. It turns out that those numbers were the coordinates of Earth, and they've been sent to the Borg homeworld in the Delta Quadrant. While T'Pol says it would take 200 years to be received, Archer is worried that this means the invasion is postponed until the 24th Century. Fortunately, the viewers already know that everything will work out.
* The later episode "The 42-Year-Old Virgin" plays with a lot of classic sex tropes by applying them to
* The later episode "U.S.S. Callister" features a creepy tech genius creating digital clones of people he doesn't like and torturing them in a game space he created. The clones (whose personalities match those of their real-world selves) plot to either escape or delete themselves.
* The later fight between Zoro and T-Bone deserves honorable mention for taking place directly
* The later films show the mammoths galloping, which is jarring since the first three films accurately depicted their running as simply faster walking.
* The later games have a mechanic by which gamers can buy and invest in property and businesses which unlock missions that involve improving and building said works. Actual propety acquisition and businesses is a complex process that involves mortgage, electricity and maintenance which is usually handwaved with a one-time cash payment with no additional expenses incurred on the part of the owner.
* The later games introduce Mega Stones, which are required to activate
* The later games rarely tackle the importance of class and social background. The blending mechanic allows a Native American like
* The later game translations also had some odd euphemisms such as "Pit Hockey". Even "heck" at least would've been alliterative.
* The late Richard Jeni once joked about loading pornography on dial-up: "All right, all right, good boobs, all right, come on-
* The later "integrated" version of the Hulk (originally intended to be all of Banner/Hulk's personae combined into a functional whole, later
* The later movies have multi-layered uniforms with turtleneck sweater undershirts. Doesn't it get
* The later parts of the Arrancar saga are considered this. Common issues cited include
* The later raid on Pleasant Manor could be counted as a (narrowly) successful castle-storming.
* The later regenerations of the Doctor constantly struggle against becoming this. During "The Waters of Mars", the Tenth Doctor ends up going so completely
* The later scene also shows Hans Frollo having a chance to escape death. As he flies up, however, shadowy hands grab him and devour his soul, leaving his body to rot. These hands are revealed to be the Hell Guards in
* The later season of the cartoon series casts doubt on this, as many of the Transformers killed in the movie are seen up and walking around again, although some of these occasions are believed to have been animation gaffes. The impact of this is lessened since the highest-profile fatality, Optimus Prime, returned in the cartoon series. In the comics set after the movie, impressively, he stayed dead permanently.
* The later seasons loved this, making Suzy the regular member of an entire army

of girl scouts. In one episode, they wage a water-balloon war on Carl and the geeks, who in turn, recruit Johnny to train them. In another one, Johnny is assigned to watch over the Girl Scouts. He takes them on a trip near a building scheduled for demolition. When he loses track of them and goes into the building to look for them, the scene shifts to the girl scouts chatting with the workers ready to demolish the building. They let Suzy push the button. Kaboom.
* The later series gradually phased out the bright colors in the uniforms in favor of black and gray, limiting the colored part to the shoulders and eventually just an undershirt.
* The later series replaced the original psi-blockers with genetically-cloned esper brains that could generate the same effects without the horror.
* The later side story about Ivo Sharktooth. What happens when you hire him? Usually, he blunders around the crime scene(s) until the people who did the crime try to have him silenced via this trope, allowing him to eventually track down who did it through tracing the people currently trying to kill him back to the source.
* The later slogan "Army of One" was replaced with "Army Strong" when the Iraq War started to ruin their re-enlistment rates. Too much
* The late Russian author Vasily Aksyonov told a story about a Soviet army officer he encountered in the late 1960's, at a time when tensions between the Soviet Union and China were at an all-time high, to the level of
* The later Wraith Squadron books have another one between Myn Donos, the Wraiths' sniper who lost his whole squadron in an Imperial ambush, and Lara Notsil,
* The (late) senior member of the "Beltway Sniper" serial killer duo was convicted of multiple murders,
* The Late Show (1992), an Australian comedy show, had this type as one of the guests in their "Guide to Dinner Parties" sketch.
* The Late Show (1992)) - it was put on at 9.00 on a Saturday, where most of its intended audience would have gone out. However, it became very popular with parents who had to stay home to look after their children, and so lasted two seasons.
* The Late Show (1992) poked fun at its own use of very thin premises for comedy with the phrase, "Champagne sketch comedy". Later, they would have show member Rob Sitch bring in a bottle of champagne to the actors in the middle of a sketch to let them know the joke was wearing thin.
* The Late Show (1992). Two of its recurring sketches have their own pages:
* The Late Show") Also contained a pair of religious stations with a similar format for a period, which are now known as.....
* The Late Show, a man on fire briefly ran behind Letterman and into the backstage area during his monologue. Normally you'd assume this was part of the act, but Letterman seemed genuinely surprised, and both he and the camera made a point of ignoring the flaming man, and never even mentioned him (there was no laugh track or anything either).
* The Late Show: Ballard has to kill a bad guy. And even though it was a kill-or-be-killed scenario, she has to do some soul searching afterwards.
* The Late Show: He's an aging, antisocial gumshoe! She's a quirky hippy! She starts out as his client, but eventually they fight crime!
* The Late Show it was mentioned the possibility of some things being removed due to legal reasons. Due to his commitment and love of all things DVD, when this happens Tony Martin (cast member and producer of the DVD) cuts into the commentary track and explains what happened, and fills the blank in with jokes to ensure the commentary doesn't have any awkward pauses.
* The Late Show often had these kinds of acts — one had glass soft drink bottles which they stuck their fingers in and popped out for the sound.
* The Late Show regarding recent photos of Pluto taken by New Horizons, complete with an interview with Neil deGrasse Tyson.
* The Late Show's Top Ten List of the most dangerous toys (from November 1997), Number 8 was "'Ouch!' The Step-On-A-Rake Game".
* The Late Show that the Russian bank Vnesheconombank has such close ties to Vladimir Putin that if one opens a checking account for $100 or more, one receives "a free toaster and a dead journalist."

* The Late Show with David Letterman amplifies this trope to its comic extreme in its Dwight the Troubled Teen skits. At the slightest provocation, Dwight loudly proclaims his hatred for his family and storms off.
* The Late Show with David Letterman and when asked how he thought the film came out, he admitted he hadn't watched it. After some pressing he shyly explained he very rarely watches his own films, and shot down any recommendations with a series of Blunt Nos.
* The Late Show With David Letterman had a segment called "Late Show Unfair Edit" in which they would splice together words from a politician's speech or interview to make it appear that they said something stupid.
* The Late Show with David Letterman Letterman decided to have a bribe-off: whichever city gave him the most stuff (Wahoo or then-current Home Office Tahlequah, Oklahoma) would get it. After some very pathetic bribes from Tahlequah Letterman declared Wahoo the winner.
* The Late Show with David Letterman of all things also counts for similar reasons.
* The Late Show with David Letterman: One edition of "Stupid Human Tricks" included a woman who could pop her eyeballs out of the sockets. She later had a brief career in commercials reacting to surprising things by popping her eyes.
* The Late Show with David Letterman years at NBC, a 33-year run in late-night television)
* The Late Show with Stephen Colbert and adds, "If you understood that, I'm sorry you also had a hard time in high school."
* The Late Show with Stephen Colbert and the Vatican's review of it, Colbert notes that he is both a lifelong Catholic and a huge Star Wars fan. Later in the segment, after discussing the Vatican's newspaper's review of The Force Awakens, he says he is "caught in a crisis of faith between deeply held beliefs embedded in me since childhood and the Catholic Church."
* The Late Show with Stephen Colbert every time he opens his Meanwhile segment:
* The Late Show with Stephen Colbert for a punch line. These are animated in time for a same-day broadcast.
* The Late Show with Stephen Colbert has #HeWhoShallBeNamed for giving various funny names for former president Trump.
* The Late Show with Stephen Colbert has Stephen and a guest enter a blanket fort and ask each other questions while taking on the mentality of small children.
* The Late Show with Stephen Colbert, he just flips the table over. ("I win again!")
* The Late Show with Stephen Colbert in Senate business. This prompted Stephen to comment in his monologue that Roberts should probably pick a more recent example "because I'm pettifogging sure nobody knows what that means."
* The Late Show with Stephen Colbert: On June 15, 2018, Colbert mocks the deleterious work conditions at the White House and the difficulties of hiring staff. To the question "Interested in a job in the White House?", he jokes that the GMail app offered the auto-suggested responses, "No", "Hell no", and "I'd rather eat a muffin made of broken glass."
* The Late Show with Stephen Colbert. Sure, he doesn't know much about filing taxes, but he has all sorts of anecdotes about his career to share...at all times of day and night...
* The late Southern California car dealer Cal Worthington had a very well known jingle (with varying lyrics) set to the tune of "If You're Happy and You Know it".
* The latest addition to this sub-genre: the Atto Melani books by Rita Monaldi and Francesco Sorti, about a
* The Latest Buzz: At high school, D.J.'s nickname was 'Triangle Head'. Which may have been Mr. Shepherd's fault.
* The Latest Buzz has Michael desperate to get validation for his fashion choices from a total stranger after he thinks the stranger made a sarcastic remark about his tie.
* The Latest Buzz: In one episode of Amanda has her dad's assistant give Noah and Michael wedgies for betraying her.
* The Latest Buzz: In "The Infamous Issue", Rebecca's hilariously bad dancing leaks

online on Glee Tube and she becomes a laughing stock.
* The Latest Buzz: In "The Pet Peeves Issue", Amanda is attempting to hide her pet pony in the office. When the others complain about the smell of horse dung, Amanda claims it is her new perfume.
* The Latest Buzz: In "The Pet Peeves Issue", Michael complains to Rebecca that she is always correcting his grammar. She then points out that he ended a sentence with a preposition.
* The Latest Buzz involves Amanda dating a guy who looks exactly like Wilder, naturally he was played by Munro Chamber's twin.
* The latest consensus is that Ork technology is quite functional if crude, thanks to the engineering knowledge hardwired into the Mekboyz genes by the Orks' creators the Old Ones. Humans are able to make use of scavenged Ork vehicles and weapons that aren't too big for them. The Ork gestalt field just makes their equipment perform even better. Magic isn't strictly necessary for the Ork's tech to work, it just helps it perform at peak (and even beyond) efficiency.
* The latest Eldar Codex has also introduced the psychic power Death Mission, which gives a Farseer significant bonuses at the expense of killing him a turn or so later.
* The latest expansion, however, did introduce the Rail Cannons, two or three of which are mounted on Impactor cruisers and six (or seven... or ten for
* The latest fashionable ideas rule out the idea of him being anything other than a villain.
* The latest radio commercial by Boeing in the ad war of Boeing vs EADS (European Aeronautic Defence and Space Company) features this. Some background for those not in the know first: Boeing and EADS are in a contract war over developing the KC-X tanker aircraft for the US Air Force; Boeing is proposing a 767 based tanker while EADS proposes an Airbus A330 based tanker. The ad has people each speaking parts of the ad and finishing each other's sentences as they talk about how Boeing is better than EADS for various reasons including Made in the USA as well as directly refuting the EADS slogan of "Real, Proven, and Ready" by stating that their A330 has never been actually built so it is not really proven is it?
* The latest series of ads has the Crunchy Nut eater getting himself/others around him
* The latest thus far is Goku vs Frieza. The latter loses his cool the more Goku demonstrates his stupidity by being oblivious of Frieza's insults and making random shouts at each other. Frieza finally snaps and goes all
* The latest unofficial patch allows a "Homosexual" background for the PC. One of the more obvious changes is the sex partner at the start of the game. Male characters can attempt to Seduce other males as well.
* The latest version includes special moves called "Enlightenment" and "Master Slice", both of which make achieving Rebirth not only possible to do legitimately, but much quicker and easier.
* The latest Xfinity ad featuring the Slowskies has Mr. and Mrs. Slowsky receiving an invitation to a
* The late US Chief Justice, William Rehnquist, adorned the sleeves of his black judicial robe with four gold stripes, an idea he got after seeing the Lord Chancellor dressed the same way in a production of
* The late-Victorian/early-Edwardian socialite Daisy Grenville, Countess of Warwick, was nicknamed "Babbling Brooke" because her husband's
* The late William Rehnquist, when he was Chief Justice of the United States, added four stripes to the sleeves of his court robes, because he'd seen
* The LaTeX typesetting language is widely used in academia for typesetting scientific books and journals, but it has become popular among authors self-publishing books because of the quality of its output.
* The Lathe of Heaven, all the major events center on Portland, Oregon, where the protagonist (whose dreams alter reality) lives. Coincidentally, this is also the home town of author Ursula LeGuin.
* The Lathe of Heaven) dreams can be controlled. The Trigger Phrase is "Antwerp."
* The Lathe of Heaven. The year is 2002. A man can afford an egg maybe once a

month, and it's been twenty years since any grain could be spared for making alcohol. Population, seven billion.
* The Latias who's friends with Emerald is also able to do this by manipulating the refraction of light. She's actually a lot easier to identify than Green. Just look for females with her distinctive hairstyle.
* The Latin American bread corporation Bimbo, which owns many American and Chinese brands, is after their mascot teddy bear. Snickers among Americans ensue, where "bimbo" is an insult meaning "stupid girl."
* The Latin American dub decided to maintain the game, and translated the heroines' names: Hikaru became "Lucy" (derived from Latin
* The Latin-American dub from Mexico was no slouch in this either. Led by the late
* The Latin American dub took it up a notch, by taking the 4Kids dub (though keeping the Japanese footage) and giving Team Rocket lots of references to Latin American pop culture.
* The Latin-American Spanish dub had the then-teenaged Uraz Huerta playing Syaoran in both the TV series and the second movie. For the record,
* The Latin American watershed is typically 10 pm; after that, the networks like to start airing
* The Latin Junta, a military dictatorship backed by the Soviets to undermine Europe. Controls Central and South America and fights the Soviets to promote its own flavor of communism.
* The Latino Nation for LAX, The Latin American Exchange(Xchange), in
* The Latin poet Horace jokingly warned poets to avoid starting out a poem in the grand old epic style, lest 'parturient montes, nascetur ridiculus mus' - "The mountains will labour and bring to birth a comical mouse." Of course, Pope was particularly influenced by Horace, as were most poets of his day. If there had been a 'Poetry Tropes' website in those days, 'ridiculus mus' may well have been the
* The Latin Vulgate Bible rendered YHWH as "Iehovah" (remembering that in Classical Latin, "v" is pronounced like either a "u" or a "w".) Eventually, this spelling came down into modern English as "Jehovah."
* The latter arises from a series of adverts by Vegas (playing a character called Al) and the Muuuunkeigh for ITV Digital, which went under despite giving away free sock monkeys with every subscription (some people signed up purely for that reason). The Al-Muuunkeigh combo was briefly transferred to
* the latter as a comeuppance for his toward the former throughout the episode.
* the latter asks the former out, despite going out with said individual's best friend.
* The latter bit about a male geek never pursuing a female geek is subverted in the later book,
* The latter case is justified since that same episode ends with the implication that Android 18 consciously set out to destroy all country music after she and Android 17 killed off the Z Fighters.
* The latter change may not be related to translation, since for years there's been some confusion over whether a certain event (
* The latter configuration causes trouble for one woman who went on a date with a coworker who happened to be a Genie. At the end of the date, she convinces him to show her his real eyes, and she spends some time staring into them, face-to-abdomen. Problem was, they were sitting in a
* The latter entails getting the ball into the left saucer, be it through plunging or immediately after plunging. This is worth a million points, with 250,000 being added for each successive shot.
* The latter example above, "I'm Batman" and "Ever dance with the Devil in the pale moonlight?" are the
* The latter game also has a short sound clip that ED-E plays whenever he discovers an enemy while he's your companion that serves the same purpose. Combined with the massive boost to Perception he gives you, and you will never be surprised by an enemy again - just mildly annoyed.
* The latter half of summer vacation. With a suspect in custody, the Investigation Team relaxes and hangs out together, from enjoying the festival to sharing a

watermelon together.
* The latter half of the Punk Hazard arc had Luffy wanting to wallop Caesar Clown after Caesar used his Gas-Gas Fruit, right when Luffy was about to win, to remove all of the oxygen out of the air to suffocate Luffy to near-death.
* The latter half of the Tribulation gets somewhat cozy for the believers. Sure, they're still getting hunted down and beheaded by those who take the
* The latter is a Romulan spy who is prepared to bring the galaxy to the brink of war, not to mention get millions if not billions of Romulans killed, in order to prevent any robots being built, because she belongs to a cabal of religious fanatics who think Romulan mythology proves robots to be apocalypse-bringing demons.
* The latter is more commonly used by Spanish sources themselves, yet English sources seem to be divided on whether it should be written
* The latter is one of the prime reasons for new models: governments requiring more energy efficiency for environmental reasons. Cars especially have constantly increasing mileage targets to meet with the amount of energy in a gallon of gasoline remaining the same. So cars have to get smaller and lighter (while still maintaining crash standards), requiring the use of less metal and rubber and more plastic parts.
* The latter is subverted when the girl wakes up early and angrily tells them what they're doing is rape and is killed when she tries to escape — the scene marks the trio crossing the Moral Event Horizon
* The latter looks identical to Trisha except with darker hair and pale skin. Her personality is what especially makes her this.
* The latter may become the former, given enough Wyrd and not enough Clarity
* The latter seems unlikely, since she is shrewd enough to immediately see through Cersei's plan to get her damned in trial by combat, and calls her a "vile, scheming, evil bitch". Cersei's main reason for antagonizing Margaery is because of a prophecy that says she will be brought down by a younger and more beautiful queen. The reader is well aware that this could just as easily be Daenerys, whom Cersei has never even considered.
* The latter song was actually used in promotional advertising for the United States Navy for a short time — as part of the deal, the music video was shot on a Navy frigate. The song was dropped from advertising because of protests over using taxpayer money to assist in the production of a then-controversial video.
* The latter time, her driver to the courtroom turns out to be a hired goon who wants her not to get there. By the time Gibbs and co. get there to rescue her, the van's pulled over, and when they open the door the goon falls out, with Abby tasering him multiple times.
* The latter (who is already implied to be hundreds of years old) wants to take a much more direct approach and
* The latter would at first glance seem not so significant within the film's context as the Columbia disaster happened long after the film's release. However, the backup commander for mission STS-3 was Ken Mattingly, who was portrayed by
* "The Laughing" features a variant. Dexter becomes a mischief-making
* The Laughing Man arc of Season 1 goes into full swing when Togusa discovers that the detectives investigating the Laughing Man case have been illegally bugged with Interceptors by their own supervisor. The issue plays second-fiddle when a fake Laughing Man attempts a public assassination.
* "The Laughing Man" Hugh Morrus who was introduced in a vignette in the Dungeon itself.
* The Laughing Salesman, functions. He approaches someone and offers to make their heart's desire come true, only to screw them over in the end. One episode, for example, has him approach a man who wishes to no longer be lonely. He makes the man think that he's going to meet a beautiful woman at the park, but instead he sets him up as being a pervert who's been preying on women and has him arrested, commenting that this will ensure that the man will receive national attention and never feel alone anymore.
* The Laughing Salesman kill them). However, simply not making a deal with Moguro

isn't an option — reject his services, and he'll ruin your life anyway.
* The Laughing Salesman, when Moguro helps his clients with their problems, they would later betray his trust or ignore his warnings. When that happens, the camera would reveal that he's in the vicinity of his clients and he's aware of their actions and he plans to punish them later on. And after his clients suffer from his punishment, the camera would most of the time reveal Moguro watching them from a distance and then he would walk off to find his next potential client.
* The Laughing Target unhappy with the new girlfriend for taking what's rightfully hers...
* The Laughing Target: When Azusa and Yuzura were mere children, they were betrothed to each other by their parents. Many years later, after Azusa's mother mysteriously dies, Azusa returns to Yuzura with the intent of marrying him; Yuzura has a girlfriend, Satomi, and this doesn't sit too well with Azusa. Add to the fact that Azusa is anything but "normal", and she has no problem eliminating the competition by any means possible.
* The Laughing Vampire on a rubbish heap, the protagonist, a teenage male vampire, transforms her — a beautiful scene with fireworks going on in the distance.
* The Laugh Out Loud Cats made to look like it's from the early 20th century.
* The launching sequence for a Pelican is a shoutout to the Viper tube launch of
* The launch of the BMW 3 Series in 1975 changed the definition of what a luxury car could be. While it wasn't the first luxury compact (even from BMW itself), it was the car that proved, especially to Americans, that the phrase "luxury compact" wasn't an oxymoron, and that smaller sedans could be just as desirable to own and drive as their larger roadboat cousins — an especially attractive proposition for buyers at the height of the aforementioned energy crises. It also created a much greater demand for performance in luxury cars, not merely pampering drivers but also allowing them more finesse behind the wheel. By the
* The Laundromat: two lonely women regularly meet late at night in a laundromat to converse.
* The Laundry (2010) opens "Welcome to the hottest and fastest-growing hobby of, er, 1977".
* The Laundry Files. All magic is based around very complicated mathematics. This made it very hard to do... until Turing invented the computer.
* The Laundry Files and embodiment of cold that proceeded to drain all heat, freezing Earth and eventually the entire universe.
* The Laundry Files are known as NIGHTMARE scenarios. Right now, the one looking most likely is NIGHTMARE GREEN, i.e. a combination of Earth entering an unstable area of space-time and the mental activity of seven billion humans causing a trans-dimensional rift and letting in something with too many angles and tentacles.
* The Laundry Files a vaguely heroic figure, the Black Chamber is the closest thing to capital-E Evil. However, the President, most civilians, and some other organizations like the Comstock Office (another US occult agency) fits more into the Beautiful camp.
* The Laundry Files consider its archenemy to be ... Human Resources. Political maneuvering among various managers—and the protagonist always has two—feeds the conflict as much or more than brain-eating horrors from other universes.
* The Laundry Files delusional narcissist his age until Mo joined up. Everyone is almost entirely cut off from their families for the same reasons—all Bob's parents know is that he's a civil servant.
* The Laundry Files has, well, The Laundry, the British department tasked with dealing with cosmic threats. Unlike most of their counterparts here, and like British Government departments in real life, funding is a main concern and middle-managers are perhaps a slightly bigger threat to national security than shoggoths. Also mentioned are the Black Chamber (the US counterpart, with far better funding and far fewer morals), the GSA (modern German Men in Black, nicknamed the Faust Force), and the Thirteenth Directorate (Russian agency, descended from certain KGB elements), among others. The "black suits and sunglasses" part is averted, though, since they are civil servants.

* The Laundry Files. Hence, in the modern era, most magic practitioners are just computer scientists with really alarming apps on their smartphones. Magic can be done without technology using your own brain as the computing device, but it's much harder and carries the risk of contracting Krantzberg syndrome: an irreversible, progressive dementia-like illness caused by microscopic demons hungry for brain neurons being inadvertently summoned into your skull.
* The Laundry Files, he really doesn't want to deal with anything crawling down the chimney...
* The Laundry Files, however, this succubus is "merely" an extradimensional demonic intelligence bound to a person's soul (an unbound incubus is used in an earlier book to lure in a professor by posing as her ex). Ramona's got the bum end of the deal; the succubus eats the souls of whoever she sleeps with, and if she doesn't feed it, it eats hers. This causes problems when one of her victims dies of a heart attack before the moment of climax.
* The Laundry Files intelligence agency, it's literally impossible to deliberately spill the beans on a codeword to anyone not briefed on it.
* The Laundry Files involve spies as they exist in the real world. Most of your time is spent doing paperwork and what jobs you have are generally very boring and mundane. Kind of stale beer, but more "generic bar beer".
* The Laundry Files is about an English secret agency that spends almost all of its time enforcing a ban not just on magic but on branches of computer programming and higher mathematics that might lead to magic, because unsupervised amateurs could accidentally summon eldritch things which devour the world. The rest of their time is spent stopping eldritch things from devouring the world because they don't have the budget to keep track of every gifted mathematician in the UK, and the politics involved when dealing with other nations' magical agency.
* The Laundry Files-linked tumor in their brain; spooky observer-effect magic means that instead of shooting out a beam of death, whatever is observed by them instantly has a percentage of its carbon atoms converted to silicon. The results are invariably lethal to living beings. So naturally, the titular agency figures out a way to duplicate the effect with a pair of ordinary video cameras, linked to some very special software that emulates the effects of the basilisk tumor; a basilisk gun to the face can even kill a shoggoth.
* The Laundry Files, magic is advanced maths and is, therefore, easier for computers to do than people. When Bob gets an iPhone, Brain gimmicks it to have the usual array of Laundry Agent spells as apps.
* The Laundry Files, magic is an application of higher mathematics onto reality via dimension-bending "Dho-Na Curves". It's all very complicated, but suffice it to say that most magical rituals require a sort of "summoning grid", a geometric structure paired with some form of computation. Technically, an advanced mathematician can simply perform the necessary calculations in their head—but since this tends to summon hungry microscopic demons into one's brain, summoning grids are a lot safer. The grids can be drawn, like how it's done traditionally, or you can go more advanced and use electric circuit or laser-based system.
* The Laundry Files officially known as the Operational Phenomenology Agency. Their German counterparts are the Geheime Sicherheit Abteilung (Secret Security Department, also known as the "Faust Force").
* The Laundry Files of the other dimension's energy, and attempts to do this to our world.
* The Laundry Files. Once hired, they've ensured you're neutralized. If you want or are capable of being useful (to a widely varying degree of "useful"), that's good. But most employees aren't doing anything really worth doing, or get any opportunity to make mistakes with consequences beyond getting themselves killed. Which is also usually good. And the exceptions are, if not irreplacable, too valuable to let go of over anything not worth killing them for. Either way, the Laundry doesn't fire anybody for anything - or kill that many of its people either.
* The Laundry Files rare form of brain tumor and can be replicated on a circuit board.
* The Laundry Files refer to them as Residual Human Resources, or RCRs.

* The Laundry Files route, his own characters occasionally dip into this trope as well.
* The Laundry Files series are regular humans whose brains have been overwritten by a low-level demonic entity. The demon multiplies by touch; the briefest skin contact with a zombie turns you into a new one, and the cycle continues from there.
* The Laundry Files strong enough to be one-man armies end up in management.
* The Laundry Files that is at least minimally scriptable. They are contagious, but not through bites, requiring merely galvanic skin contact.
* The Laundry Files that think human souls are crunchy and good with ketchup.
* The Laundry Files the apocalypse in an isolated bunker until dwindling resources forced them to find a new home (read: our Earth).
* The Laundry Files. The Cult of the Black Pharaoh is the oldest and most dangerous one of these.
* The Laundry Files, The Laundry fights such a war on behalf of Britain. Other governments have their own secret magical agencies.
* The Laundry Files, the organisations formerly known as MI5 and MI6 have invoked and exploited Acronym Confusion by changing their initialisms to DI5 and DI6 respectively and having their old initalisms reassigned. This way, the government can honestly claim that MI5 is certainly not doing whatever Orwellian thing they're being accused of while forgetting to explain that this is because MI5 is the organisation in charge of rubbish collection.
* The Laundry Files. The sixth Laundry Files novel, "The Annihilation Score," uses this trope name as the title for the second section of the book.
* The Laundry Files. They realized soon after the only thing this had done was deny themselves a great source of knowledge. So from now on, they recruit anyone who looks like they're going to either do something great or do something disastrous (like Bob, the series' protagonist) - or at least offer them that option before killing them. In some cases, the Laundry would not try to recruit you but merely destroy your findings.
* The Laundry Files. "This machine kills demons" indeed. In fact, it takes extreme skill and luck (and often costs sanity) to limit its killing to just demons, as it actually is one itself.
* The Laundry Files to gain victims. The encounter no doubt explains Lovecraft's later phobia about sex.
* The Laundry Files to make himself untouchable by anyone but a person who resembles James Bond, and as a side effect develops a tendency to monologue.
* The Laundry Files (Turing died sixteen years before Carmack was born).
* The Laundry Files usually has Bob, one of the titular organization's field agents/computational demonologists/IT guys sent out on a minor call, only to pull the string on something larger:
* The Laundry Files with the right kind of theorem, crayon on the walls of a padded cell takes on a whole different level of menace.
* The Laundry Series it. As explained, if a vampire can recognize somebody else as a vampire, clearly the second vampire's very existence threatens to reveal vampires are real, and so the only reason why vampires communicate is if they haven't yet worked out their plans for killing each other. This fades rapidly after their introduction to the series (after the inevitable finally happens and a plan for killing another vampire involves threatening the Masquerade to force him to expose himself, the plan going bad on both sides).
* The Laundry Series speaks of the Chthonians, codenamed DEEP SEVEN, who live in the upper regions of Earth's mantle.
* The Laurie Berkner Band: "Telephone" is about trying to call friends, only to find they aren't home to answer.
* The Lava Caves of New YorkAdding volcanism in places where by all rights there shouldn't be any.
* The Lava Caves of New York: Lava or magma in locales that normally don't support volcanic activity.
* The Lava Wars, again, we know next-to-nothing about this one. Apparently it was caused by a guy called Magma.

* The Lavender Hill Mob (1951), a crime thriller surrounding a jewel theft. He consulted the Bank of England on the project and it set up a special committee to advise on how best the robbery could take place.
* The Lavender Hill Mob:A meek bank clerk who oversees the shipment of bullion joins with an eccentric neighbor to steal gold bars and smuggle them out of the country as miniature Eiffel Towers.
* The Lavender Hill Mob, Holland and Pendlebury publicly discuss that they left the safe open. They wait in the building at night, and when thieves break in, they recruit them into their criminal scheme.
* The lavishly illustrated chemistry picture book "The Elements" by Theodore Grey has many jokes, but this one is comedy gold: "Gold is the gold standard of metals."
* The Law and the Lady, Valeria met her future husband by tripping and falling into the trout stream where he was fishing.
* The LawDog Files. He promptly eyes his chimichanga suspiciously and hopes that he's just hearing things.
* The Law Firm of Pun, Pun, and Wordplay: A law firm with a silly combination of names.
* The Law Firm of Pun, Pun, and Wordplay: A law firm with silly, funny names.
* The Law Firm of Pun, Pun, and Wordplay. Most famously, the firm of Dewey, Cheatham, and Howe ("do we cheat 'em? And how!")
* The law firm pretty much runs on this trope. Harvey and Jessica get away with a lot because they are usually too smart to get caught or they are only caught when it is too late to do anything about it. On the other hand, this makes them very arrogant and gets them into serious trouble when they overshoot and get caught breaking the rules.
* The "Law For Kids" comics produced by the Arizona and South Carolina state governments have been popular targets for LUE and 4chan users.
* The law is followed with the giants. They are twice the height of a regular humans, and to compensate for the increase in weight, their legs are disproportionately long and thick, and they appear to move slowly. This effect was realized by a combination of tall actors outfitted with prosthetics and
* The law laid down by the Dundonian Presbeteryans who founded D.C. Thomson to the writers of
* The Lawndale Incident. On July 25, 1977, as the story goes, a ten-year-old boy named Marlon Lowe was playing outside his home when a pair of gigantic birds flew overhead. One of them swooped down and snatched Marlon up, carried him a few feet, and then dropped him unharmed onto the ground after
* The Lawnmower Man initially boosted intelligence with smart drugs and virtual reality simulation/stimulation. He later also speed-read scientific research at blinding speeds, but fell back on VR programs for learning because reading wasn't fast enough for him.
* The Lawnmower Man since the judge agreed with him over how the film was such an incredibly loose adaptation of his short story.
* The Lawnmower Man, which reinserted deleted scenes that offered more character development, making the film more than just a demonstration of (now incredibly dated) CGI. The DVD just relegated them to separate menu options in the special features.
* "The Law of Attraction" and "Universal Magnetism" and "Like Attracts Like" are concepts explored in at least two books,
* The Law of Conservation of Detail as it can drag the story on longer than it ought to unless the author is able to work something new into the situation — for example, the star player on the team got injured on the game-tying score and now the team has to figure out on the fly how to play without them.
* The Law of Conservation of Detail (unless it is used to point out that the character is partially or completely deaf).
* The Law of Fan Jackassery: If a show's popularity is midway between "obscure" and "mainstream", there's a good chance that most of its fans will be toxic jerks.
* The Law of Innocence: Defense attorney Mickey Haller represents himself after he is accused of murder. Mickey says "Maybe I did have a fool for a client" but still

feels like he has to handle his own defense. He does at least get his law partner Jennifer Aronson, and later his ex-wife Maggie McPherson, to sit alongside him.
* The Law of Innocence: In one scene Mickey decides to test whether or not the guards are listening to his prison phone calls, by having a fake conversation with Jennifer about fleeing to Baja. When the prosecutor brings this up in court, Mickey nails her.
* The Law Of Knowledge: With understanding comes control and power. (This law is responsible for things like
* ''The Law of Land Warfare'' (aka The Geneva Convention) to do if you wish to conduct war like a civilized country and expect other countries to do the same. It's also binding, and is what gives tribunals like the Nuremburg Trials the justification for trying people for war crimes, among other things.
* The Law of Names: Related to both the Law of Knowledge and the Law of Association. The law simply states that by knowing the true and complete name of a phenomenon or entity gives you complete control over it (This law is responsible for things like
* The Law of Nines, a modern-day "reboot/continuation" of the story, the book ends with the main character being asked by an ally to tell him how the whole conflict started.
* The Law of Purple and a few of them are going for the most bizarre combo award
* The Law of Purple are the designated Beta Couple. And that's not even considering what the rest of the cast is up to...
* The Law of Purple: At one point, Blue does this to Dex in order to keep Dex from attacking Lette. In a variation, Blue opts to plant a foot in Dex's face.
* The Law of Purple contains two avatars of the author-Jay, an employee at Dachsund's Market, and the boss lady dragon.
* The Law of Purple has Doctor Dross, a possibly sociopathic doctor with a Hitlerstache.
* The Law of Purple: Inverted by Caligula; instead of an advanced culture that once had religion but derides it as worthless now, there was almost never any organized religion to speak of and parts of the population are only now discovering it. However, most Caligulians view religious groups as nothing more than cults and consider them highly abnormal.
* The Law of Purple nearsighted without them. Possible aversion with another character, who also wears glasses but doesn't appear to be quite as dependent on them.
* The Law of Purple. She's not actually dumb, although her cultural mindset and self-centered personality sometimes get in the way of thinking clearly.
* The Law of Purple: Silver is the king of a planet called Caligula and yes, he's a very bad king.
* The Law of Purple, though that method was used more for the psychological effect.
* The Law of Purple. Unless the individual in question kills themself, their dragon can always revive them. Blue has already been revived from a fatal crash-landing on Earth and has admitted to reviving after being shot in the face at point-blank range.
* "The Law of Sin and Death" had civilians on board and is on the Halo for the long haul as far as anyone knows, and the Covenant seems to consist solely of Elites. Most notably, Cortana (or "the Sword") is depicted as a mysterious AI residing in Installation 04's systems who first appears to the main character as a seraph, and engages in frequent Biblical-flavoured back-and-forth with him. Towards the end, Cortana attempts to mentally merge with him, and is none too happy to be rejected. Cortana in the final game is...not like this.
* The Law of the Gun, the main bad guy perishes when he attempts to escape the heroes by diving of the trail through the cane brakes along the Rio Grande and plunging into quicksand where he vanishes without trace.
* The Law of Ueki, and apparently don't have any qualms about killing their opponents.
* The Law of Ueki delivers one of these to Margaret, and the entire race of Protectorates. Nobody listens.

* The Law of Ueki has a weapon called Kurogane, which turns their arm into a giant, 6-foot cannon that completely overshadows the user in size.
* The Lawof Ueki has the power to copy another person's power, with the catch being he has to be within a 10 meter distance for 24 hours from the person with the ability he wants to copy. Being the one who put together the Robert's Ten, he has thus copied all of the members' powers, along with two other powers, all of which he uses when fighting against Ueki.
* The Law of Ueki—but she wears them atop her head rather than over her eyes.
* The Law of Ueki: Ueki and Mori officially become a couple at the end.
* The Law of Ueki: Yunpao has the ability to transform electricity into sugar and back again.
* The Lawrence Welk Show, and has been more-or-less continuously appearing on TV in reruns ever since. Over sixty years after its debut, you can still catch episodes every weekend on many PBS stations throughout the US, while most of its younger and hipper competitors have long-since left the airwaves.
* The Lawrence Welk Show countless hipper programs with much younger audiences.
* The Lawrence Welk Show did this whenever a member of the cast became pregnant, which was quite often.
* The Lawrence Welk Show (Locally on KTLA in Los Angeles 1955-1971, then nationally on ABC 1955-1971 and in syndication 1971-1982; reruns still air on some PBS stations)
* The Laws and Customs of War as understood pre-nineteenth century that if there was no surrender after the wall was breached, then the invaders had three days to sack it without it being considered a war crime, because Urban Warfare was feared so much that preventing it by intimidation was considered justified.
* The Laws and Customs of War as well as naval officers did and had an elaborate system of law regarding captures (which even allowed a privateer to file suit in a rival belligerent's court after the war if a ship wasn't properly ransomed).
* The Laws and Ordinances of The Cities of Ankh and Morpork it, since the equally by the book, but much more pragmatic, Commander Vimes got the Librarian to hide it because it was just causing trouble. Also, it's quite heavy, so if Captain Carrot threatens to "throw the book at you", duck.
* The laws of aerodynamics and hydrodynamics mean that every airplane and yacht is a compromise. Fast, Dry, or easy to handle; Pick two, because you cannot get the third. For airplanes: fast - safe - manouevreable - pick two but not three. Except when you're just willing to spend more money, time, and resources on a design, which then becomes the drawback.
* "The Laws of Gods and Men" opens with Yara Greyjoy's raid on the Dreadfort interrupting Ramsay Snow and Myranda. Ramsay isn't bothered much as he enjoys killing as much as screwing.
* The Laws of Gods and Men", Yara Greyjoy aborts her mission to rescue Theon when she realizes how utterly broken he is, saying her brother is "dead".
* The laws of magic the setting tend to mean that any informal duel between good and bad
* The laws of nature (the cycle of life and death, the seasons, etc.) and physics (gravity, etc.) are in a similar vein. Many of the et'Ada who created Mundus fully sacrificed themselves, dying while willing these laws into existence. These are known as the Ehlnofey (the "Earthbones"), and they can likewise be manipulated by mortals. (The Psijic Order and the Dwemer are renowned for this ability, allowing, for example, the Dwemer to
* the law students, while searching for evidence that Sam Fisher was guilty of killing one of their friends for refusing to abort their love child, accidentally throw him over a railing, and when he turns out to not be dead from that, he starts choking one of them to death, resulting in one of the others bludgeoning him to death with a trophy. In this case, he was such an Asshole Victim.
* The lawsuit was particularly telling on a number of grounds in and of itself: Fox News did not draw complaints about the portrayals of their anchors (though, to be fair, the book was not yet published at the time), and the suit was functionally
* The lawyer drawing up the paperwork for the marriage who has a long-term affair

with the bride is seen in
* The Lawyer plays this fairly straight, encountering the Gang in pretty much every case that'd involve law (inheritance law, real estate law, patent and copyright law, trial law), though it's averted by Uncle Jack, stated to be a state and civil lawyer who's out of his depth in a trial. Charlie claims to be (and probably isn't) a specialist in "bird law" but still tries to go head-to-head in any given law case, regardless of how related it is to birds.
* The lawyers of the British child-killer Ian Brady tried this, basically relying on circular reasoning: "My client has done something so horrible he must be insane, therefore he is insane." It didn't work initially, though he was since been transferred to Broadmoor Psychiatric Hospital — which is specifically for the
* The Lay of Paul Twister. So when he wants to get something new invented, he has to get some researchers and engineers who actually know what they're doing and point them in the right direction.
* The Lay of Paul Twister. Unfortunately, with no useful skills that are really applicable to a pre-technological society, all he has going for him is his power, which, as he finds out, is most usefully employed as a thief-for-hire, breaking magical wards that protect valuable items.
* The Layover, and by her own admission, her standards when she's horny aren't all that high. The beginning shows she had slept with the cab driver who took her home, for instance.
* The Layover. It gets even worse when Kate's attempt to climb out of the window goes awry.
* The Layover: One of the biggest complaints about the movie is that the twist that the wedding Ryan was so desperate to attend was his own was transparently obvious since the second the wedding is first mentioned.
* The Layover: The hotel manager where Kate and Meg are staying thinks they're lesbians when they get into a fight.
* The Lazarus Effect has Zoe's recurring nightmare of a fire when she was young.
* The Lazarus Effect in an unusual case, being resurrected with a special serum has the side effect that the person brought back keeps making it. If they get a second injection, they can start producing it on their own, and if there's anyone near they want to resurrect...
* "The Lazarus Experiment" by blowing up a lab. He then proceeds to outrun the fireball down a corridor.
* "The Lazarus Experiment" drains people away leaving emaciated husks.
* "The Lazarus Experiment": Lazarus has been seemingly defeated, and his prone body is being loaded into an ambulance. But it's only the beginning of the third act, so he turns back into a monster and kills the ambulance crew.
* "The Lazarus Experiment": Lazarus is insistent that rejecting death is part of being human. Human beings are hardwired to avoid death, that's why adrenaline kicks in when someone is in danger. And that's why society has made advances in medicine. However, Lazarus' chosen method of avoiding death (accidentally turning himself into a life-draining monster) is definitely not agreeable.
* "The Lazarus Experiment": Martha and her sister Tish do this to lure the mutated Professor Lazarus up to the bell tower of Southwark Cathedral, where the acoustics will be just right for the Doctor to use the cathedral's organ to revert him to human form.
* "The Lazarus Experiment": Pre-transformation Professor Lazarus is implied to be this, what with his reaching for Tish and asking her about the perfume she's wearing (actually soap).
* "The Lazarus Experiment": Professor Lazarus wonders, with his (flawed) rejuvenation tech, what he could get done in multiple lifetimes.
* "The Lazarus Experiment": Richard Lazarus turns himself into a gigantic monster who drains people's life force to survive.
* "The Lazarus Experiment": Richard Lazarus uses a device to rejuvenate himself to a younger age, which has the side effect of also causing him to transform into a life-draining monster. When he's finally killed for real, his body turns back into his original aged appearance.

* "The Lazarus Experiment". Since he's at least 900 at this point (though going by the Classic series, he might be closer to 1500), he knows whereof he speaks.
* "The Lazarus Experiment" that works by reprogramming DNA and commanding it to rejuvenate, he achieves his goal of becoming younger, but accidentally activates some dormant "junk" DNA, turning him into a life-draining monster. However, Lazarus isn't bothered by the change, considering it necessary to be able to possess the extended lifespan he wants.
* "The Lazarus Experiment": The Doctor and Martha have just found Lady Thaw's body in Lazarus's office, Lazarus having drained her of life energy. They leave in one of the lifts to go look for Lazarus back at the party downstairs... and mere seconds after their lift leaves, Lazarus emerges from the other lift with Tish.
* "The Lazarus Experiment": The mutated Professor Lazarus sustains himself by draining his victims of their life energy.
* The Lazarus Experiment": The weird scorpion monster that Professor Lazarus transforms into is said to be an evolutionary possibility that humanity rejected long ago but has remained locked in the genes.
* "The Lazarus Experiment", turning them into mummified husks, to sustain himself.
* The Lazarus Experiment": When the Doctor meets Martha's mother Francine, he causes an awkward moment by saying that he and Martha haven't had much time to talk as they've been "busy" (time travelling). Fortunately, the conversation is interrupted before he can dig himself deeper.
* The Lazarus Heart spell for very advanced clerics of the Church of S'Allumer. It doesn't always work, depending a bit on the subject's willpower, and can only be refreshed after praying eight times every six hours for one day. The Church never accepts payment for the use of the spell like they do for healing, but rather they evaluate it on a case-by-case basis and insist on a term of service when they decide to use it. However it can be applied to a living person and held until they die.
* The Lazarus Project) when Ben Garvey eventually accepts that he is a patient at the psychiatric hospital but then, after finding his supposedly hallucinated dog at the local animal shelter, finds that it was a plot to stop him leaving.
* The Lazarus was a top of the line luxury car even before it became a
* The Lazer Collection 7, after the man assaulted in the pepper battle admits to having a food allergy, the Earth can be seen with a bright, brilliant lazer.
* The Lazer Collection, Ron mentions that Dumbledore has had an accident. When Harry asks if it was serious, Ron replies, "No, it was Snape." Cue Fail Horn and I'mma Firin' My Lazer!
* The Lazer Collection the Lazer Collection, he just thought it was ridiculous that people expected him to put out 4 so soon after 3.
* The Lazlow Show would require the world's longest version of "The Girl from Ipanema" while you rode it.
* The LBW rule in cricket was introduced to stop a batsman defending his wicket with his leg, rather than his bat. Modern bowlers, particularly spin bowlers, often exploit the rule to get a batsman out LBW without him ever intending to get his leg in the way, and batting practice has responded similarly.
* The LCPD again taking on a huge horde at the Libertonian in chapter thirteen.
* The LCPD fighting against the undead as they storm Algonquin when the bridges are overrun in chapter eleven.
* The LDS church encourages its members to have at least a full year's supply of food, for themselves and to share with neighbors, in the event of an emergency.
* The lead actor was run off the show because the studio felt that it needed to be more episodic. And then they did it again in season five; not a good sign when you have to continually cycle cast members to save money. The tone of the show changed from a sci-fi detective story ("Who are the Taelons and what do they want in exchange for improving Earth") to a
* the lead alien from the oldest race that first founded the Galactic Milieu.
* The lead character, Ichigo, begins the series as a fringe member of her eventual love interest's
* The Leader: Allegretto, the protagonist that primarly uses swords. The other

characters defer to him for some reason, even getting lampshaded by Viola.
* The Leader and best fighter of the team, fight evil space wizard Lord Zedd one-on-one. The battle ends in a stalemate.
* The Leader, and country boy with a sword who gets sucked into an adventure.
* The Leader, an inspiring, cool, guitar-playing guy, and the leader of the team.
* The Leader: Aqualad. He was voted into the position during the team's first away mission, as he was the oldest and the most level-headed of the bunch.
* The leader, Arthur Langtry, is called the Merlin and is the strongest of the lot. A master of defensive magics, he once created a barrier ward on the fly to hold back
* The Leader: Bartz, chosen by the Wind Crystal, symbolizing passion. It turns out that his father Dorgann was one of the Warriors of Dawn, further linking his destiny to saving the world. He often speaks on the party's behalf even when he's not the overworld leader.
* The Leader: Bello, an insatiable curiosity and boundless energy make the scrappy Bello a driving force among his friends.
* The Leader: Blu, the hero who can eventually take charge of situations.
* The Leader but in self imposed exile for breaking his no kill policy.
* The leader can bend reality to her will, and once gave the time traveler the ability to fire lasers from her eye while filming a movie. The next character is a data-manipulating android that can't be killed, even with 6 spikes and 2 energy tentacles the size of a ship's mast through her body. After that, we have an ESPer, who can move into alternate dimensions created by the leader, usually to fight her inner demons. Following that, we have a time traveler, who grows up to become
* The Leader: Charles Grant, the hero of the story and leader of the mission.
* The Leader: Chrom, the Exalt of Ylisse and commander of the Shepherds.
* The Leader: Conan, who is admired by the rest and leads investigations.
* The Leader: CR-S01, for Surgery mode. A skilled surgeon sentenced to 250 years in cryogenic prison for his involvement in a biological terror attack at Cumberland College.
* The Leader: Darkwing Duck / Drake Mallard, The crime-fighting hero with a lot of pride. This being his troop, they follow his orders (or don't, in Gosalyn's case). Launchpad actually works for him.
* The Leader: Dunk, a tough guy who did the most talking, led the adventures, and set up the first half of the catch-phrase "If you know what's good for you."
* The Leader: Eir Steagalkin, who is the member most devoted to fighting the Elder Dragons and sparks the initial push to reconcile.
* The Leader: Elicina, the hidden princess and later idealistic Queen of Crimea
* The Leader films and specials, being the only "human" with a deep understanding of the magic that has leaked in their dimension from the main MLP universe.
* The Leader: Fred, the brave detective who makes the plans, designs the traps, and decides when to split up.
* The Leader: Hannibal, primarily a Mastermind type; he's the man with the plan who organizes the others and is almost perpetually one step ahead of all their adversaries
* The Leader: Harry, a reluctant hero, and a wizard who helps the police with cases involving magic.
* The Leader has been possessing Rick Jones' corpse since his apparent resurrection. A few issues later, he takes over the body of Del Frye, a teenager in Shadow Base's care. And then it turns out he's managed to take over the Green Scar Hulk personality. Exactly where Rick and the Green Scar's minds are during all this is unclear, but Frye's possession shows he's stuck reliving his own death over and over while the Leader steals his body.
* The Leader has this for the Hulk as well. He even got a bit depressed when he found out
* The Leader: Hero, a kind and noble traveler on a quest to save the world in thirty seconds.
* The Leader He started the tradition for the Power Rangers. His greatest fear is failing them as a leader.

* The Leader However, the position of stallion is dependent on the collective graces of the mares- if they don't like a stallion they might gang up to attack him and drive him away even if he's the strongest around.
* The Leader: Howlett, the founder and leader of Daily Grind who acts a strategist and a negotiator.
* The Leader: Ike, the stoic company leader who commands the respect of everyone he meets.
* The Leader: Jack, the doctor who lead the most missions and became the overall leader for the survivors.
* The Leader: Jake, described as a natural born leader. Strong but kind, the one the others look to for guidance.
* The Leader: Jamie. He owns M-5 and was responsible for the initial concept of the show, alongside Peter Rees. He often develops the plan for how a myth will be tackled and keeps everybody on-track in their respective roles within the build, although a lot of his leadership is cut out because he can come off as very gruff when telling people what to do.
* The Leader: Julian, the eldest, he's clever, strong, and responsible.
* The Leader: Ken "The Eagle" Washio (G1), the tactical expert with a strong sense of justice. He is the eponymous “Gatchaman” of the show’s title.
* The Leader: Laharl, the protagonist who sets upon claiming the throne for himself. Cocky, spoiled, and quick-tempered.
* The Leader leader of the group, also the main detective whose "hunches" usually saved the day.
* The Leader: Mario, the courageous, cheerful, and competitive main hero.
* The Leader: Naomi, a kind black ops soldier, hired to lead and defend the civilian science team (though she is killed early on)
* The Leader: Nigel Uno / Numbuh One, who is not only the literal leader of Sector V but also tactically gifted and dedicated to his job
* the leader of a gang of bandits opens with Geralt waking up to a mute priestess propositioning him, and he's all too content to reciprocate.
* The leader of criminal gang The Felt is named Lord English, after a particular spin put on a cue ball in pool. Creator Andrew Hussie hadn't even
* The leader of the alchemists, shown giggling behind Tyrion, Joffrey, and the Hound's
* The leader of the Anti-Semitic Jews captures Moses in order to ready the world for the return of Haman.
* The leader of the Dark Web crime syndicate in Mainline Equus, Shadow Web created an
* The leader of the Glorft also takes their defeats personally and often vows revenge on Coop, even to the point of resigning himself and his crew to being trapped in the past by ordering the destruction of MEGAS (and thus, also its time drive).
* The leader of the Rebels is easily distracted by Kuo and Nix, where Kuo even had to yell at him to focus on their meeting.
* The leader of the Replicants, Roy Batty, is the main antagonist of
* The leader of the Revolutionary Army, Monkey D. Dragon, is called "the most wanted criminal in the world", as the group openly defies the World Government and have converted several countries to their cause.
* The leader of the Space Pirates is the Pirate Boss, while the series usually refers to Mother Brain or Ridley as the leader. Additionally, the Pirate Boss is a human, while all later
* the leader of the strongest remaining faction not allied with the Watcher.
* The Leader of the troop) and Moonlight Deeproot (a member of the lowest rank that is subservient to the others) falling in love. Their romance led to a war in the troop. Sunrise was killed by the council while her mate Moonlight died of a broken heart. Since then, inter-rank matings have been forbidden.
* The leader of the Vandenreich can transfer bits of his own soul to other people to grant them special powers. Each of his highest ranking subordinates possesses a unique power represented by a letter of the alphabet. The dark twist is that

* The Leader: Pierce - The most logical member who holds the rest of the team together.
* The Leader proper, now able to lead missions after outgrowing his Part I trainee status.
* The leader, Re-Destro, was president and CEO of the Detnerat Company, which was dedicated to creating individual items fitting people with Quirks that make them unable to buy anything standardized
* The Leader: Red Fire Ranger Nick. A loner that finds he's the only one who can bring together the other rangers.
* The Leader: Red Ranger Jack. A former delinquent turned hero who proves himself a capable commander.
* The Leader: Rusl, a retired master swordsman and leader of the group.
* The leaders of Chaos warbands tend to be those who the gods most favor. However, they aren't really priests, as the Chaos gods would much rather their followers kill loyalists and aliens instead of holding masses. The Word Bearers are the purest example. Most other Legions' hierarchies are based at least partially on
* the leaders of his genuinely good-guy group see through it immediately, but play along as it means that the little psycho would be easier to control for the remaining months of his life.
* The leaders of the 1916 Easter Rising in Ireland, especially Patrick Pearse and James Connolly, as well as their successors in
* The leaders of the government know the truth about the outside world, they've convinced the rest of the populace to stay within the walls and die at their commands, and they're willing to murder all their citizens to create a Titan enslavement machine if it means they don't have to face the Kingdom of Marley.
* The leaders of the World Government are the Five Elder Stars, the highest-ranking Celestial Dragons, who are willing to go full-on
* The Leader: Soren, the main protagonist of most of the books, the unofficial leader of the band, and the eventual king of Ga'Hoole.
* The Leader: Steve, a gung-ho former Navy SEAL. The head of the Task Force who formed the team to find out the truth about his father's murder.
* The Leader: The Commander (player character), who makes the main decisions and carries the group in combat.
* The Leader"). The latter's scar is a memento from Faith, whose Watcher was slain by Kakistos.
* The Leader: Thor, the hero lured into a trap by his brother but lead the team to victory.
* The Leader: Welkin, leader of Squad 7 of the 3rd Regiment. Using his scientific knowledge, he quickly becomes a strategist rivaling his legendary father.
* The Leader who is welcomed into the team, quickly becoming their strongest trainer and forming deep bonds with starter, mega, and legendary Pokemon.
* The Leader, who makes up for his lack of intelligence with sheer determination.
* The Leader who must master the elements and defeat the Fire Lord. The last airbender.
* The Leader, who was given the leader title after Nina left. He's compassionate and loyal, though also rebellious and impulsive as a leader.
* The Leader: Xander is the direct and honest first born, heir, and commander of their of armies. Wields a magic sword.
* The Leader: Zayne Carrick, the compassionate, heroic Jedi protagonist.
* The lead female character, Jailbreak, has been met with widespread mockery and apathy by feminist fans despite her plotline and motivations advocating strongly for women's issues. Some would say
* The lead ghost, which manifests visibly as a glowing translucent woman-like figure and the orbs who followed her are visible to the cameras as well as
* The leading Canadian politicians of the era kept the state of affairs firmly in this trope. Their goal was to make sure that the United States did not start looking north as a direction for expansion. The Northwest Mounted Police were established primarily to make sure that Canada could justify its claims over the areas that would become Alberta and Saskatchewan and a transcontinental railroad

was built to solidify this claim. However, Canada never tried to claim any territory to the south which was claimed by the United States. This resulted in any Americans who tried to look north to quickly decide that it would be too much of a headache when they could go west instead.
* The leading candidate for the real world basis of Lovecraft's fictional Miskatonic University is Brown University in Providence, Rhode Island. Fittingly enough, Brown's John Hay Library houses Lovecraft's papers.
* The leading contender for the cause of the Permian-Triassic Mass Extinction (also known as
* The leading woman is turned into a 50 foot (well, 49-foot, 11 and 1/2-inch) woman by being doused with
* The Lead Masks of Vintem Hill: did the two men transcend their corporeal bodies and transport their minds into a "realm of infinite knowledge and consciousness" after making contact with aliens, or were they tricked into killing themselves by criminals?
* The lead singer/guitarist of The Silversun Pickups has a very high register, causing a mild version of this for someone who hasn't seen them perform before.
* The lead singer of alt-rock band A Silent Film has admitted in least one interview that the band name is "a little awkward".
* The lead singer of the Japanese noise band Hanatarash (known for their live shows involving power tools and on occasion industrial construction heavy machinery) once strapped a buzzsaw to his back, and proceeded to show off the dangers inherent in improper use of such tools by falling over and accidentally almost amputating his leg. He was rushed to hospital and luckily was able to keep the limb.
* The lead singer of The Waitresses' "I Know What Boys Like" does "nya nya nya nya nya" during the bridge and at the end of the song while mocking the boys that she teases with her charms throughout the rest.
* The lead students of each house wear a variant of the uniform which resembles dress uniforms from their respective countries. They also wear a cape on their left shoulder that is color-coded to their house and national origin: red for Edelgard of the Black Eagles, blue for Dimitri of the Blue Lions, and yellow for Claude of the Golden Deer.
* The lead-time in the comics was lampshaded shortly before the 2000 Presidential Election, where Huey laments that the candidate he was rooting for doesn't stand a chance. Aaron McGruder, meanwhile, keeps leaving comments at the bottom of the panels apologizing because he has to draw out the strips a couple of months in advance, so the polls may have changed in that time. Then at the end, it's revealed that the candidate Huey was rooting for was Ralph Nader, causing Aaron McGruder to admit that the polls for him probably didn't change after all.
* The lead up to WrestleMania XXVIII played off this to spark a rematch from the previous year: Undertaker defeated Triple H by making him submit to Hell's Gate at WrestleMania XXVII, however Triple H was the one who walked out under his own power and continued to appear and sporadically wrestle throughout 2011, whereas Undertaker was carried out on a stretcher and wasn't seen at all for the rest of the year. For this reason, Undertaker, despite officially claiming victory, was the one who sought Triple H out for a rematch for the sake of his
* the lead vampire besieging the Firmament Temple of Thor is/was Durkon Thundershield, drops a tray of beers in shock. For a dwarven brewmaster to waste perfectly good beer, that certainly means the situation is serious.
* , the lead woman, Lula, starts repeating the conclusion of a story told by her co-star: "And that's how the blues were born" several times before completely flipping out, stabbing him, and pushing him out of the subway car they're both riding.
* The Leaf's ANBU wear animal-themed masks that completely cover their faces. Mist ANBU and hunter-nin wear white masks with patterns resembling flowing water painted on them.
* The Leafs have the dubiously desired title of "the most profitable losing team in sports": despite the fact that they haven't won the Stanley Cup, or even gotten

close to it, in 50+ years, home games are always sold out, and the wait time for season tickets in the worst seats in their home of Scotiabank Arena is 7-10
* The League celebrated its 75th season in 1991-92 with both a league-wide patch and by having the Original Six teams
* The League has stated several times that he is just flat out more comfortable lying than telling the truth.
* The League is that Kevin and Taco's mother clearly believes the pot-smoking moron Taco who has no idea where he is half the time and no career or goals is far more successful a person than Kevin, a happily married lawyer and father.
* The League is what happens when a hipster becomes needy and desperate rather than smug.
* The League notary by pressing his notary stamp against a suicide bomber, turning him into a bikini clad supermodel.
* The League of Assassins, in the episode of the same name, attacks the Canary's clock tower base to try and kill her.
* The League of Extraordinary Gentlemen A character named Eva Draper (Winter Ave Zoli), the daughter of German scientist Karl Draper, was removed during editing but remained in some of the promotional material. Eva had appeared in two scenes: one ended up on the cutting room floor, and she was digitally replaced with a different character in the other. A brief fight scene featuring Tom Sawyer and the replacement character was rotoscoped into the film. The deleted scenes which feature Draper appear on the DVD.
* The League of Extraordinary Gentlemen, a Coca-Cola representative is torn to pieces for interrupting Santa while he's high on mushrooms sending his astral self across the world to spread good cheer.
* The League of Extraordinary Gentlemen, a fictional world travel guide to the setting. The guide mentions that the floating ruins of Cloudcuckooland can still be spotted in a certain area of Greece if you have a strong enough telescope, but that the fortress has drifted so high that actual birds can no longer reach it.
* The League of Extraordinary Gentlemen, Allan Quatermain and Tom Sawyer attempt to have one of these on the deck of the ship, where Quatermain tells Sawyer about his son's death.
* The League of Extraordinary Gentlemen: :Allan Quatermain's rifle is laid on his grave, not stuck into it.
* The League of Extraordinary Gentlemen. Also, he started the Renaissance.
* The League of Extraordinary Gentlemen, although one still wouldn't automatically make the jump that he went on to join the secret service from there.
* The League of Extraordinary Gentlemen, a male-on-male rape (and murder) scene and its aftermath kept shifting between horrified amusement and genuine horror.
* The League of Extraordinary Gentlemen, a man is pretending to be Allan Quatermain, while halfway through the conversation we can see Sean Connery, the real Quatermain, sitting in shadows just to his left. Eventually he turns around and tells the impostor to toddle off.
* The League of Extraordinary Gentlemen and also for winning over fans of the graphic novel who were disgusted by his predecessor, original invisible man Hawley Griffin.
* The League of Extraordinary Gentlemen and his world was accused of plagiarizing older literature. Superheroes as a whole are represented as a group of old people constantly getting their image banked off of by unscrupulous businessmen.
* The League of Extraordinary Gentlemen and then joins them. He later saves the League from being slaughtered by the mook's gunfire by shooting most of them.
* The League of Extraordinary Gentlemen) are all presented as real to the public, nor is there any attempt to argue otherwise.
* The League of Extraordinary Gentlemen, a secret wing of the British Library acts both as this, and the headquarters of the eponymous League.
* The League of Extraordinary Gentlemen awesome, should something happen to one of the legs (like, say, a superpowered psychopath physically wrenching one of them off), then good luck remaining upright with only two.
* The League of Extraordinary Gentlemen" before heading into the cave.

* The League of Extraordinary Gentlemen: Black Dossier has just happened.)
* The League of Extraordinary Gentlemen: Black Dossier, the character Galley Wag is from a dark-matter dimension and speaks in a bizarre slang like "Bread and Tits!" and "Huff yer oyver in all you'm tick senned such a plumious sparktackle?" While the statements make sense in context, the human Mina can understand Galley Wag and provide translation.
* The League of Extraordinary Gentlemen, but the fact the government is delighted to have an invisible treacherous rapist on its books is troubling to say the least. You might also count Nemo but at least there's method to his madness.
* The League of Extraordinary Gentlemen by Alan Moore. Just try to catch all the references in it to Victorian literature, politics, and events.
* The League of Extraordinary Gentlemen by it and wants to execute Hyde for his crime.
* The League of Extraordinary Gentlemen" can be seen written in graffiti a couple of times.
* The League of Extraordinary Gentlemen can cram into a panel and not get sued over. However, they all do relate to a certain period of History, or Literary History. He does keep a coherence.
* The League of Extraordinary Gentlemen, Captain Nemo's daughter Janni Dakkar is first seen swimming naked.
* The League of Extraordinary Gentlemen character is fair game for inclusion).
* The League of Extraordinary Gentlemen climaxes in an aerial gang war fought between Professor Moriarty and Fu Manchu.
* The League of Extraordinary Gentlemen, demonstrating that careers are genetically transmitted in the LOEG-verse.
* The League of Extraordinary Gentlemen, despite the rooms near-mythical status in pop culture, it's little more than a dirty room full of mundane torture tools.
* The League of Extraordinary Gentlemen does this, despite there eventually being three married couples out of the seven individuals in question. Since the entire story is told from the point of view of a very proper Victorian English girl's diary entries, it doesn't get described even when the cohabitation stops being innocent.
* The League of Extraordinary Gentlemen does this for several genres and periods, albeit with a darker edge.
* The League of Extraordinary Gentlemen does this with a few people, combining several characters from established fiction into a single person.
* The League of Extraordinary Gentlemen drinks a concoction that gives him incredible size and strength...and glowing red skin with horrible acne.
* The League of Extraordinary Gentlemen, due to the presence of Mr. Hyde and a few others.
* The League of Extraordinary Gentlemen. During the fight in Dorian Gray's mansion, Captain Nemo does this to one of the Fantom's mooks.
* The League of Extraordinary Gentlemen ends with Quatermain's funeral, at which the surviving members decide to continue traveling the world together instead of going their separate ways.
* The League of Extraordinary Gentlemen, Fellaurora sends a statue flying across the room with her mind.
* The League of Extraordinary Gentlemen film: Dorian Gray after he sees his portrait. Justified by the mechanism of his immortality: the portrait took on the effects of aging and injury for him.
* The League of Extraordinary Gentlemen for a world war. The term "world war" is even mentioned for audience members who weren't paying attention.
* The League of Extraordinary Gentlemen. H-9 is shown to be very ill-tempered and even tried to assault Allan Quatermain and Mina Murray.
* The League of Extraordinary Gentlemen has different values in the Victorian Era than in modern times, how women are more prominent in 20th Century fiction than in earlier eras and the relationship between the narratives of an author and that of the state, culture and society he lives in.
* The League of Extraordinary Gentlemen has him continue this, despite ostensibly

working with British intelligence; his descendents continue this, to the point that his grandson Jack is his universe's equivalent of Osama bin Laden.
* The League of Extraordinary Gentlemen has some unusual metafictional examples of this trope.
* The League of Extraordinary Gentlemen has the following exchange after Quatermain and Sawyer capture Mr. Hyde:
* The League of Extraordinary Gentlemen has the heroes tasked by the British Government with stopping the villain's plot to destabilize European geopolitics and starting a war. It's revealed at the end that he's doing it to boost his arms sales.
* The League of Extraordinary Gentlemen). He reveals this at the end of the recording right before they start going off. Of course they still live.
* The League of Extraordinary Gentlemen, Hyde-to-Jekyll. Hyde is more than twice Jekyll's size, considerably bulkier in terms of muscle mass. Ouch. The transformation also seems to be physically exhausting, as Jekyll is shown red-faced, sweating, and panting the first time he changes back.
* The League of Extraordinary Gentlemen in 3D color print. Everyone visiting or inhabitating is shown wearing 3D glasses, with the heterochrome lenses. Lenses that use the same colors as Spider Jerusalem's own glasses.
* The League of Extraordinary Gentlemen. In addition, after the book proper is over, there's a small splash page featuring the silhouette of his corpse continually floating, presumably in space.
* The League of Extraordinary Gentlemen. In an early scene in the movie, he's seen getting riddled with bullets, which only succeeds in destroying his suit and making him mildly annoyed.
* The League of Extraordinary Gentlemen. Interestingly for a villain, he actually honors their agreement once his victim holds up his end of it.
* The League of Extraordinary Gentlemen, in which Mina's husband is dead and she has no affair with Quatermain. Sawyer flirts with her a bit and she did have an affair with Dorian Grey in the past, but it's implied that her years of living as a vampire have left her unable to really love anyone.
* The League of Extraordinary Gentlemen. Ironically, when she reveals this to Alan Quatermain, he's more intrigued than repelled, as he was once married to a woman who'd also suffered neck scars.
* The League of Extraordinary Gentlemen is basically a Literary Necrophiliac orgy.
* The League of Extraordinary Gentlemen) is basically the minutes for the meeting in which the first League was founded.
* The League of Extraordinary Gentlemen is because the Phantom killed his Secret Service partner, who was also his childhood friend. He never actually comes out and says this was Huckleberry Finn, but it's pretty well implied. Unfortunately, the scene in which Tom explains this to the League was cut from the film and only appears in the DVD extras. The novelization has him outright confirming that it was Huck Finn he was out to avenge.
* The League of Extraordinary Gentlemen is essentially the coolest literature major course you always wanted to attend.
* The League of Extraordinary Gentlemen. It gets even worse once he gets into the twentieth century.
* The League of Extraordinary Gentlemen, it's a clear sign that this trope is in effect.
* The League of Extraordinary Gentlemen kills himself this way after being caught by Allan Quatermain.
* The League of Extraordinary Gentlemen. Mina Harker gains red eyes when she lets her inner vampire out.
* The League of Extraordinary Gentlemen. Mina Murray, Captain Nemo and Allan Quartermain are investigating a school under the guise of a married couple and their manservant. They are given two rooms for the night, one with a couple's bed and another with a shabby servant's bed.
* The League of Extraordinary Gentlemen movie is a pastiche of Victorian-era stories.

* The League of Extraordinary Gentlemen of the Hyde formula, and a whole lot of it, he'd presumably have considerably more malevolent natural tendencies than Jekyll.
* The League of Extraordinary Gentlemen, one is left to presume that in-universe they invented these weapons themselves.
* The League of Extraordinary Gentlemen originally formed by Kaiser Wilhelm in the early 20th century. After the deaths of Maria, Caligari, Cesare and Dr. Rotwang, and the defection of Mabuse, Hynkel's fortunes quickly crumbled.
* The League of Extraordinary Gentlemen: Orlando has a long history of causing massive problems through his/her stupidity, starting with telling other Trojans they should drag that giant wooden horse inside the city walls to get a better look at it.
* The League of Extraordinary Gentlemen: Orlando has spent the past 4000 years screwing and fighting his way across the world multiple times.
* The League of Extraordinary Gentlemen puts Nemo in this role, and Jekyll to a lesser extent.
* The League of Extraordinary Gentlemen racist characterization and design into happy coincidences and heroic traits.
* The League of Extraordinary Gentlemen recruits Hawley Griffin/The Invisible Man from inside a girl's school where several girls think they've been sexed by the Holy Spirit, planning to go ahead with their "virgin births".
* The League of Extraordinary Gentlemen removes his sword from Mina Harker's body and prepares to leave, she rises up behind him, stabs him and pins him to a wall. Vampires like Mina are only incapacitated by being staked, not killed.
* The League of Extraordinary Gentlemen retirement homes incase their TV or movie franchises become profitable again.
* The League of Extraordinary Gentlemen/satire of Victorian era fiction and values.
* The League of Extraordinary Gentlemen, Sawyer apparently dies helping prevent the destruction of Venice, but it turns out he didn't somehow.
* The League of Extraordinary Gentlemen's case it is introduced to choke off the Thames river, and so stop the movements of Captain Nemo's Nautilus, the only weapon that was having much success at all against their tripods.
* The League of Extraordinary Gentlemen set in 2009. And we don't even know what all the final volume will get into by the time it's done. Seeing as how it's setting contains characters and elements from all genres of fiction, this is probably to be expected.
* The League of Extraordinary Gentlemen's is going to follow suit eventually.
* The League of Extraordinary Gentlemen's "New Traveler's Almanac," New England, as well as the Connecticut-New York-New Jersey area, are specified as hotbeds of disturbing supernatural phenomena. Naturally, this is in direct reference to the setting favored by Lovecraft, but it's also a byproduct of the fact that, as there were many more writers from that area than elsewhere in the US at the time the story takes place, there were also more stories set there in general.
* The League of Extraordinary Gentlemen) so American audiences would have someone to identify with.
* The League of Extraordinary Gentlemen. Soon afterwards, when the League of Shadows arrives and also asks for Quatermain, the impersonator starts over again and he's immediately killed by them.
* The League of Extraordinary Gentlemen start debating the rumours in a detached sort of way.
* The League of Extraordinary Gentlemen summoning a storm with a ritual and lightning striking his grave.
* The League of Extraordinary Gentlemen that a man named Gullivar Jones flew to Mars on a flying carpet, for instance — and had all this time thought her encounter with Dracula to be an anomaly, not akin to something she would soon deal with every day.
* The League of Extraordinary Gentlemen that it's hardly a clue at all.
* The League of Extraordinary Gentlemen The attacker comes after Sawyer with a knife, striking the floor between his legs as Sawyer scoots backward.
* The League of Extraordinary Gentlemen ("The League of the Extraordinary Ones").

* The League of Extraordinary Gentlemen The man is busy chanting in Zulu. His chants are (translated) him saying: "Arise, son of man. Arise child. It is not yet time to rest."
* The League of Extraordinary Gentlemen, the two Macheaths presumably had nearly identical lives.
* The League of Extraordinary Gentlemen, Tiresias' youngest daughter, Bio/Bion/Vita/Vito/Roland/Orlando, began to develop this ability at the age of ten.
* The League of Extraordinary Gentlemen, Tom Sawyer is a solid example of Vaporizer, but Quatermain is a far superior example of Trick Shot.
* The League of Extraordinary Gentlemen. Tom Sawyer, who's otherwise an excellent shot with his Winchester, often attempts to bring down enemies by unloading twin revolvers at them simultaneously. However, he never actually hits anything when he attempts this, and every time he tries it in front of Allen Quatermain, he is berated for "shooting like a bloody fool".
* The League of Extraordinary Gentlemen universe does this with damn near everything, not just places but people and events as well.
* The League of Extraordinary Gentlemen uses his invisibility to kill a police officer and steal his clothes because he was cold. This is perfectly in character with the original (see under "Literature", below).
* The League of Extraordinary Gentlemen was in fact a hybrid of Anthrax and Streptococcus developed by Dr. Moreau while working for the British Military.
* The League of Extraordinary Gentlemen was partly filmed in the Czech Republic.
* The League of Extraordinary Gentlemen when Mr. Apollo winks at the reader but is immediately asked who he's winking at. To which he apologizes saying he has a facial tic that affects a lot of superheroes.
* The League of Extraordinary Gentlemen. When one of the soldiers fills his entire torso with lead, he just stands there, takes a deep breath, and then cuts off the guy's breastplate and stabs him. As soon as the guy falls, he takes the handkerchief out of his breast pocket, wipes the sword clean with it, and puts it back in a dignified manner.
* The League of Extraordinary Gentlemen: when Quatermain is introduced to Nemo, he refers to him as a "pirate".
* The League of Extraordinary Gentlemen. When the League prevents the destruction of Venice, which would result in the deaths of delegates in the middle of peace talks, Fantom replies that this is only delaying the inevitable. It's implied that even though Fantom's enslaved scientists were rescued, they refused to forget the wonders they learned in his service and began mass-producing them for their countries, leading to the ludicrously steep technological curve of WWI.
* The League of Extraordinary Gentlemen. When the Nautilus is sinking, Nemo orders that the engine room be sealed off so the water doesn't flood the rest of the ship, condemning the crew trapped in it to death by drowning.
* The League of Extraordinary Gentlemen, where Mina's vampire bites left her neck a mass of scar tissue (she wears a ribbon to hide them, which slips when she and Allan sleep together). She flees from Allan, but he chases her and manages to explain that one of his previous wives had similar scars from a fire, and that it was the coincidence that surprised him.
* The League of Extraordinary Gentlemen. Which lead, FWIW, to the awesome moment when we combine this with the previous trope. And Nemo blasts the jelly out of a couple of tripods.
* The League of Extraordinary Gentlemen (which shifts the action to the 1950s) changes this to Raygun Gothic.
* The League of Extraordinary Gentlemen who bears a passing resemblance to Hynkel, and makes his name playing a parody of him in propaganda films.
* The League of Extraordinary Gentlemen, who everybody thought got killed at Reichenbach Falls a few years before the time of the film. Then, at the absolute end of the movie, a witch doctor is performing a ritual at the grave of Allan Quartermain, the League's leader, and the skies darken and the ground trembles. This was the supposed sequel set-up.
* The League of Extraordinary Gentlemen who frequently makes passing mention of the

historical figures s/he has met at various points their life.
* The League of Extraordinary Gentlemen, who has stowed away on the escape vessel with the bad guys, manages to send a message to the rest of the League with the coordinates of the escape route. They immediately realize it's from him because of the way the message opens - he's the only one in the world who would address them collectively as "my freaky darlings."
* The League of Extraordinary Gentlemen, who wears bloody reindeer skins, is accompanied by spirits he calls his "little helpers", and does not appreciate being visited by representatives of the Coca-Cola company hoping to licence his image.
* The League of Extraordinary Gentlemen, you could call it foreshadowing...
* The League of Frightened Men book, the titular league permanently disabled an unpopular fellow college student many years ago in a hazing incident. (They're frightened now because, after years of patronizing him, they're panicking at the idea that some sudden deaths among them may be due to his having murdered them, and they can't prove it.)
* The League of Gentlemen, and he has reached this status. Isn't that right, DAAAAAAAAAAVE?
* The League Of Gentlemen Apocalypse has the characters from the show traveling to the real world to stop their writers canceling the show.
* The League of Gentlemen are played by the same three actors, so they need to use various prosthetics to differentiate between roles. Some of them (Tubbs and Edward, in particular) are quite hideous.
* The League of Gentlemen are talking to the scarecrow when the head falls off revealing the bound and gagged man. He tells them he's been tied up and asks them to help him, which they already knew. They then put his gag back in his mouth and replace his head saying they want to stay friends.
* The League of Gentlemen but also the indignity of hearing his gloating who greatly lampshades her cluelessness by sneering
* The League of Gentlemen, can look anyway. Papa learned the makeup skills to cover his minstrel face from his various wives.
* The League of Gentlemen had a mortician who put a bit too much of himself into his work.
* The League of Gentlemen had the characters celebrating "Nude Day" by spending the day at home naked.
* The League of Gentlemen has "Go, Johnny, Go, Go, Go, Go", a sketch in which a novice player makes increasingly trivial mistakes and violations of the rules to the eponymous game.
* The League of Gentlemen has one scene that starts by making it look as though Benjamin is being forced to perform oral sex on Harvey. It turns out he's just cleaning the toilet brush.
* The League of Gentlemen Hilary Briss, definitely serves as an analogue to a drug, including the obsessive behaviour and the nosebleeds but despite all suggestions that bring to mind a certain source, the writers have denied it, claiming that there is nothing more mundane than cannibalism and that the truth is so much worse... Which makes one wonder what the hell is he providing, unicorn meat?
* The League of Gentlemen. It's... odd. Initially a comedy, the sense that the town is just a mask for insanity, evil and genuinely disturbing horror grows as the series progresses.
* The League of Gentlemen Legz Akimbo theatre troupe display their slogan on their van: "Put yourself inside a child". The town of Royston Vasey itself is "You'll Never Leave!" which has omninous undertones.
* The League of Gentlemen. Now the place is not entirely beyond logic though and there is a more natural down-to-earth side to Vasey and there is no better way to describe it than Cloudcuckooland.
* The League of Gentlemen of his face rather than the genuinely skin-colored parts when he wants to look human.
* The League of Gentlemen, Pauline is called a "psychotic 50-year-old lesbian." Her response? "How dare you! I'm 48!"
* The League of Gentlemen ready. There has never been any concrete evidence of

Benjamin actually masturbating.
* The League of Gentlemen's heist would have gone off flawlessly if a random little boy hadn't been collecting license plate numbers outside the bank. This, coupled with the fact that they rendezvous at Hyde's house afterwards, allows the police to catch them all cash in hand.
* The League of Gentlemen so it is entirely possible that they are still there.
* The League of Gentlemen son of corrupt hicks Edward and Tubbs Tattsyrup. They keep him in the attic.
* The League of Gentlemen, the German character Herr Lipp is a Funny Foreigner — he unwittingly says things that make him sound like a pedophile, which is ultimately revealed to be true. Things like "You are still erect" to mean "You are still awake".
* The League of Gentlemen, the only friends Pauline has are pens. She is quite proud of this, because she is a saddo.
* The League of Gentlemen, the protagonists have a couple of men speaking in Irish accents, knowing that the IRA will get the blame.
* The League of Gentlemen to stop him telling anyone about his peculiar habits. Don't worry, he left him a straw.
* The League of Gentlemen: Tubbs and Edward, who torture and sometimes kill any non-locals who intrude on their shop.
* The League of Gentlemen, when Mickey tries to start all the restart class standing on their desks in support of Pauline. It doesn't work, but she's touched by the gesture anyway.
* The League of Gentlemen, which he then gave to the police, who investigated all of the people with cars that were near the scene of the crime.
* The League of Gentlemen which means he can force himself upon his son's girlfriend right in front of him and get away with it.
* The League of Gentlemen with Edward and Tubbs, who get a properly dramatic death scene, but then it turns out that they're not dead. While leaving town, they are suddenly killed by a train.
* The League of Gentlemen: "You wouldn't want to make him angry. I once saw him beat a man until both he and the man were crying."
* the League of Non-Aligned Worlds is in theory a strict alliance bent on becoming
* The League of Non-Aligned Worlds was, in theory, much stronger than the Dilgar (indeed,
* The League of Peoples Verse in the League of Peoples, most of humanity has lost all forms of creative impulse. There is no need to work because machines handle all industry; there is no hope for scientific research because League technology is beyond human understanding; there is nothing to do but lose oneself in mindless decadence. This is a fate that has already all but destroyed several other cultures which were "uplifted" by the League.
* The League of Peoples Verse more often than it succeeds. Genetic engineering is only widely used by alien species, such as the Divians and Cashlings.
* The League of Peoples Verse, Myoko burns out her telekinetic powers lifting up a jolly-boat and hurling it onto the shore. She dies minutes later.
* The League of Peoples Verse sees himself as a social gadfly in the tradition of Socrates, constantly prodding people to deal with issues they'd rather ignore. Like Socrates, he ends up sentenced to execution because of it.
* The League of Peoples Verse, she bitterly notes in her narration that "Festina" means "The Happy One" and her typical state of mind is anything but happy.
* The League of Peoples Verse, sonic stunners are the standard weapon carried by Explorers, as lethal weapons are prohibited by the League. They are supposed to cause six hours of unconsciousness, but in practice their effects vary wildly from species to species.
* The League of Peoples Verse, the entire Cashling species suffer from this: always bored, easily distracted, and unable to focus their attention on anything for very long.
* The League of Peoples Verse travelled around "uplifting" deserving species by granting them wonderful gifts of sufficiently advanced technology... gifts which

would destroy the species' culture, stagnate their development, and slowly drive them into decay and extinction.
* The League of Privateers are a mix between standard theatrical "yo-ho-ho" pirates and the Italian city states. Again, Version 4 gives them more modern technology, throwing in elements of revolutionary-era America.
* The League of Secret Heroes by thwarting plots by spies and villains.
* The League of S.T.E.A.M. encounter one in their webisode, "Big Trouble".
* The League of S.T.E.A.M. has a clockwork cyborg girl (R.O.S.E.) used for zombie hunting.
* The League of S.T.E.A.M. has a clockwork zombie-hunting cyborg named R.O.S.E.
* The League of S.T.E.A.M. once has to deal with invisible ghost monkeys.
* The League of S.T.E.A.M.'s Crackitus Potts and Professor Jager may qualify.
* The League of S.T.E.A.M.'s webisode, "Dinner with the Devil", Sir Conrad gets possessed after a botched exorcism. As he's the resident demonologist, the rest of the League is in a bit of a quandary.
* The League of S.T.E.A.M. take on ghosts, zombies, werewolves, vampires and all manner of supernatural creatures; each member of the team specializes in a particular supernatural entity but all are competent as part of the team.
* The League of S.T.E.A.M. TV ad from the film is even parodied in a short.
* The League of S.T.E.A.M. wear goggles (it's steampunk, what do you expect?) but they rarely seem to be used for anything.
* The League Of Super Redundant Heroes, when Buckaress gets a job as a waitress in a redneck bar and HATES this, ending in disaster...
* The League of Temperance is an organization of vampires who have sworn off "the B vord", and embraced a life of cheery sing-songs and delicious cocoa, oh my vord yes. The Temperance League is modeled after drug rehabilitation groups like Alcoholics Anonymous. We are informed that most people find "reformed" vampires to be very weird, and we see plenty of evidence that this is so. Apparently the craving cannot be eliminated, only channeled, and usually it is with laser-like intensity.
* the League of Tripoli, who come from a different world, where fascist France, Spain, Italy, and Germany are at war with Britain, Russia (not USSR), and US. They have powerful ships, subs, and airplanes.
* The League of Villains also boasts within its numbers Shigaraki, an abandoned child from an abusive home, Spinner,
* The League of Villains as a whole intend to call out the Pro World for their hypocrisies and failings, and they aren't wrong that the Pro system is hugely flawed. Shigaraki Tomura, in particular, has an exceedingly
* The League of Villains goes in this direction after they start recruiting. One of their members, Kenji Hikishi Magne), is male-to-female transgender and everybody refers to her with the proper pronouns — even Shigaraki, who generally seems to care very little about what people think. In fact, Magne's teammate Jin (Twice) gets violently angry at someone for misgendering "Big Sis Magne"
* The League of Villains is hated by everyone and even by other villains who consider them childish, such as Stain, and a bunch of overhyped villains, such as Chisaki. They even dislike each other among themselves. Still, characters such as Shigaraki, Himiko, and Dabi maintain a strong fanbase.
* "The League of Villains": Where T grabs Jimmy and Sheen in the courtroom
* The League Of Volunteers has a group of Nazis summons an ancient Irish demon to serve them in issue 1. It doesn't go as planned.
* The League of Youth has the young attorney Stensgaard. He wishes to make things better by creating a new political party, and thus gather the young forces against the "old regime". As it happens, he is led off course by older and more experienced politicians, who actually do it to preserve the status quo and their own positions. At the end of the play, he is run out of town.
* The League: Rafi and Dirty Randy meet in an insane asylum, which is run by a sadistic nurse a la Nurse Ratched. After spending most of the episode attempting to escape, Randy goes to the reception desk and requests to leave, revealing that he voluntarily checked in after accidentally killing Rafi's family.

* The League: Ruxin's wife Sofia knows to leave him alone when he and the rest of the league show up to watch. Averted by Kevin and Jenny: she's a bigger football fan (and better team owner) than he is.
* The Leakey Establishment screen with the gun moved to the right and the enemies progressed slightly, and so on. When Tappen asks how many centuries it takes to play a game, he says he's thought of that — the program can simulate a game without needing human involvement, and just print out your score once it's finished.
* The Leakiest Sink, where two players would have to take turns sitting inside the booth while a celebrity guest pulled one of six plugs apparently attached to it somehow. One of these plugs would start up the gunge tank, so the danger increased as the game went on and the chance of picking the 'right' (wrong?) one got higher.
* The Leaky Cauldron. book and is often called on by the media to talk about the series. She is also a senior creative consultant on Pottermore, a project officially endorsed by Rowling.
* The Leaning Tower of Pisa gets this again, being rebuilt in Pisa after having been destroyed in Monument Beach. In "
* The learner starts making mistakes. At 75 volts, he screams and says he is in pain. By 300 volts, he's screaming about his heart. At 315 volts, he lets out a blood-curdling cry and no words. At 330 volts, silence. The experimenter says no answer is a wrong answer - keep shocking the learner. At 450 volts, continue administering 450 volt shocks.
* The Learning Tree, Newt is lying on his stomach on the ground, idly regarding an anthill, when the dark clouds above suddenly form a funnel cloud far away. A tornado then whips through the area.
* The Learning Tree wasn't born blind, but was blinded in an explosion. After his nephew Newt asks him if he remembers colors, Uncle Rob says yes, and talks about the colors he can see dancing in his head. Then he grows philosophical and wonders if people will get along better in the future, when their colors mix together.
* The Leashed Dogs act as this. They were raised as pets until their owners evacuated due to upcoming earthquakes. Clueless and defenseless, they have to learn how to live on their own alongside the reader.
* the least-viewed of them all., which is just as big as it is in the US as it is in Canada.
* The Leatherstocking Tales, where the setting is shifted to North America circa 1759 with Lear bringing Chingachgook to mind, as does Gloucester Leatherstocking and his sons the Munro sisters.
* Theleb K'aarna is a Pan Tangian sorcerer and an archenemy of Elric of Melniboné., having clashed with him multiple times.
* The LeBrons: An African-American series aimed at children. For an Internet series however, the animation is as perfect as a television cartoon.
* The LeBrons episode "Coach", when an angry Gloria chases them down the school hall for stealing a book that she wrote.
* The LeBrons, this show set out to teach its viewers "positive life lessons", in a way meant to be relatable to kids.
* The Leclerc also deals with the poor fuel efficiency of jet engines by using a hybrid diesel/gas turbine setup. The main engine is a mostly conventional diesel, but instead of the usual supercharger it's got a small gas turbine.
* The LED Incapacitator, a rather recent non-lethal weapon which works by creating a bright pulsing light with continuously changing colours to dazzle and disorient an opponent when violence is not permitted. Readers of
* "The Leech Woman", repeatedly shouting "JED!" This culminates in him letting out a ridiculously long shout of "JEEEEEEEEED!" that lasts throughout the entire end credits of the movie.
* The Leech Woman, whose leading lady romps through the jungle in a white blouse — and it stays white the whole time! Ajax, strong on dirt?
* The Leeshore is mundane to the core. FTL is non-existant, and the only fantastic tech shown is the "i-ply" computronium material and its lesser derivatives which are used as a construction material.

* The Leet World, he concocts an elaborate plan to enter the House and finish his brother off.
* The Leet World: In "Satisfaction Guaranteed", Player has something of an obsession with a snowman's hat. In the second season, the same hat can be seen in the intro sequence.
* The Leet World). In the mid-season finale, he tosses a grenade into a room full of fellow housemates after hearing gunfire, seriously injuring Player.
* The Leet World, resulting in Westheimer and Chet occasionally inserting plugs for fictitious companies like “Sir Spice-a-Lot’s Chicken” and “Koala Cola” into conversations.
* The Leet World's Ahmad combines this technique with a shotgun when he boosts his speed using HAX.
* The Leet World, the leader of the terrorists' little backyard band has his name standing at five words: Cortez Amelio Alejandro Jesus Cardinal.
* The Leet World when he beats him in single combat. While the Domination Guy doesn't join Cortez's side, he does return later in the series to save Cortez's life during the final confrontation with Ahmad.
* The Leet World, who the housemates call the Domination Guy after his apparent obsession with domination (no, not like that.)
* The left and right side of a spacecraft are referred to as "port" and "starboard" respectively, such as during the launch of NASA's
* The Left Banke had two hits in 1966: "Walk Away Renee" and "Pretty Ballerina", before vanishing away instantly.
* The Left faction of the Provisional Government/Blues, hearing a rumor that the Right faction is about to purge them, commit their own purge. Though this one is less violent than the others, less "We're throwing you in jail", more "We're not gonna let you have any real power".
* The left hand contains a hidden dagger that can be used to stab the opponent when his weapon and concentration are distracted by a feint attack from your long sword.
* The Left-Handed Hummingbird by Kate Orman began as a fan fiction for the Australian fanzine Pirate Planet.
* The "Left-Handed Spanner" is such an old and well-known variation that pretty much everyone should be wise to it. Doesn't mean other left-handed tools that don't have left-handed variations aren't fair game.
* The Left Hand of Darkness, an Earthman notices all the bridges in Karhide have keystones set with pinkish mortar. Turns out they believe an arch will fall without a bloodbond. They used to mix the mortar with human blood and bones, but these days, animal substitutes are used.
* The Left Hand of Darkness, can also be considered a aversion, with a black protagonist and the inhabitants of Gethen described as similar to the Inuit or Tibetans.
* The Left Hand of Darkness diplomats consider it a good thing, since if their mission on a particular planet fails, they can hop over to the nearest planet, then turn around and come right back and have a whole new generation of leaders with which to try again.
* The Left Hand of Darkness, Gethenians count years backward and forward, with the current year always being year one. The more exact dates are determined by their relation to some historical events.
* The Left Hand of Darkness. He is a stereotypical "golden age sci-fi" protagonist with a very rigid and logical way of thinking, so he is left at a loss when the locals don't see the world the same way as him.
* The Left Hand of Darkness, in which Gethen has several different countries. The protagonist eventually visits the country of Orgota, to find that its government and customs are vastly different from Karhide, and even mentions that he's not as familiar with the native language.
* The Left Hand of Darkness it's clarified that the ansible needs a significant gravity source to work, so one "end" of the connection is a "stabile" and must be fixed on a planet while the "ansible" is portable.
* The Left Hand of Darkness. Just because they've never had war doesn't mean they

aren't capable of violence.
* The Left Hand of Darkness of the planet Gethen, who mostly look Asian or Inuit, are visited by a lone Earthman who is black.
* The Left Hand of Darkness shift and are called "perverts". A human from Earth travels there, trying to establish a diplomatic connection with the rest of humanity; his mission is complicated because they all consider him a "pervert". One character, in an attempt to seduce another, used hormones to shift his/her cycle timing and ensure his/her gender is the opposite of the target's. The target's reaction shows they think the attempted seducer is also a pervert, though the word is not used there.
* The Left Hand of Darkness, so incest during this time is generally not frowned upon, certainly during pubescence, unless it becomes a romantic attachment. They might "keep kemmer" (have a long-term partner) or "vow kemmer" (the equivalent of marriage), but the vast majority of Gethenians are polygamous during kemmer, and most openly visit kemmer-houses to mate with whoever else happens to be there.
* The Left Hand of Darkness takes place on a planet (called "Winter") where people have no permanent sex. They are sexless and asexual most of the time, but from puberty on they turn into a male or a female once a month to reproduce. The same person can be male or female on different occasions, so basically everybody on the planet is both a male and a female and neither.
* The Left Hand of Darkness takes the basic idea so far it almost becomes disqualified as an example, as the human-descended people on the planet Gethen are all of both sexes (or neither); they take turns becoming "male" or "female" for reproduction. The human-as-we-know-it protagonist is really confused by this even after years of living there as an ambassador of sorts.
* The Left Hand of Darkness: The Gethenians are genderless most of the time and assume one gender or the other randomly when they enter a mating cycle, but they're still always referred to as "men."
* The Left Hand of Darkness, the planet Gethen is inhabited by androgynous humanoids who only get a specific gender during kemmer, their analogue of being in heat. The gender they get is random (unless they use hormone therapy). Therefore, their analogue of LGBT folk (and about as common as real-life LGBT folk) are "perverts", people who tend to be a particular gender for longer than usual. One can guess this creates some problems when they encounter an Earthman.
* The Left Hand of Darkness. There are more lands, like the Antarctic continent of Perunter, but the protagonist and main narrator does not visit them.
* The Left Hand of Destiny features a tall Ferengi named Pharh. While he's a typical profit-obsessed Ferengi, he also shows that he's willing to fight for those he considers his friends, even though he gets defensive when this is pointed out, claiming that he's only being motivated by profit. In this case, his willingness to fight by Martok's side is described by him as simply him making sure that Martok pays off the cost of Pharh's shuttle, which Martok wrecked. In the end, Pharh takes a disruptor bolt meant for Martok, and Martok honors his friend's memory in the most Ferengi way possible — by paying off the cost of the shuttle to Pharh's family (not to mention fighting a battle in his honor).
* The Left Hand of God doubles as Father O'Shea. He even gets some divine blessing for it.
* The Left Hand of God, Thomas Cale tells someone "Remember: revenge is the best revenge."
* The Left Hand Of The Electron where you are sending an interstellar radio message to an alien culture. How do you describe the concepts of "right" and "left"? Start with math.
* The Leftovers has Matt Jamison uncharacteristically tell a dirty joke in exchange for passage aboard a ship.
* The Leftovers, Laurie and Kevin have gotten divorced between Season 1 and 2 and John and Erica have gotten divorced between Season 2 and 3. Come Season 3, Laurie and John (two characters who have shared no scenes together to this point, and showed no interest in each other) are married and working together.
* The left side of Shireen Baratheon's face is scarred by (cured) Greyscale.

* The Legacy (1979), protagonists Maggie and Pete try to leave the Ravenhurst mansion after the other guests start dying, only to find that all the roads lead back to the mansion.
* The Legacy, a 1978 horror film. The two main characters cannot leave the mansion, no matter what they try.
* The Legacy Challenge is simple: keep a family going for ten generations without cheating. It's spawned numerous variations, the most popular among them being the "
* The legacy character, Jonas, was into a relationship with Stature in
* The legacy is a title or code name passed along to every person to hold the position regardless of relation, and the title becomes their primary identity.
* The Legacy of Goku II, where Super Saiyan/Super Namek caused your character to do the transformation animation in real time and would be interrupted if you got hit, making them a pain in the ass to pull off during boss fights (luckily, most boss arenas had places you could hide behind to transform without getting punched).
* The Legacy Of Heorot and Steven Barnes, fish-like creatures swimming in the stream of a colony planet are referred to as "samlon" (much to his chagrin, it took some folks half the book to notice it wasn't "salmon"). Of course, they turn out to be rather more than that...
* The Legacy of Heorot is ruled thus; Electricity? Concentrated vitamins? Construction materials? Interplanetary transport? All state monopolies.
* The Legacy Of The Cursed Mask Series has demonic grass, a type of plant that impales people and drains them of blood.
* The Legacy of the Glorious, the part where the Spanish-American War begins is called "The Boiler Explodes", which is what literally happens to be what starts the war, as an American ship's boiler's explosion makes the Americans believe the Spanish are attacking them.
* The legacy of the late Princess Veriti (Truth) turns out to be entirely false.
* The Legacy of Totalitarianism in a Tundra, the novel starts with a long list of trigger warnings, including "Trigger Warnings".
* The Legacy of Vashna, and it drains some more every time it is used.
* The Legacy of Zorro published by Gold Rush Games for the Instant Fuzion system.
* The legacy, so to speak, is parasitic or possessive and goes through multiple hosts over time.
* The Legacy starts suddenly choking from a chicken bone during dinner. The Heimlich maneuver doesn't do anything, so the nurse of the house's owner proceeds to try to save his life with a tracheotomy operation.
* The Legacy version has a Porcelain Doll omen that counts as a ghost on the doll owner's turn and the chapter that introduces that omen has two possible creepy doll-themed haunts: either the traitor is summoning an army of singing dolls to kill everyone else or the traitor wants to feed a hungry doll the blood of others until it grows big enough to burrow underneath the house.
* The Legacy Virus became a plot by Apocalypse and carried out through unwitting lackies in the Friends of Humanity, and was resolved in two episodes through the combined efforts of the series' resident time travelers, Cable and Bishop.
* The legalities involved in state secession can go several ways. On one hand, all thirteen of the original colonies predate the United States by definition, since it was these states which ratified the Constitution and brought the federal government into existence. Under the
* The legalization of marijuana in many parts of the world led to some glorification of weed smokers, such as rappers either bragging or normalising it in their songs (one of the biggest hits of 2011 was Snoop Dogg and Wiz Khalifa's "Young, Wild and Free", which even had "So what [if] we smoke weed?" in the chorus).
* The legal principle of Condonation can give rise to a strange inversion of this trope by allowing someone to prove that their partner knowingly accepted their
* The legal system is in many ways an attempt to use as many words as possible in describing simple things. This is supposed to—and actually does—make it easier for the lawyers and judges to know exactly what everyone is talking about (usually—some lawyers are bad writers, and some judges are even worse). If

you're on trial for killing someone, the fact that there is a distinction between "murder," "voluntary manslaughter," "involuntary manslaughter," and "justifiable homicide" will be very helpful. Still, it is annoying to see three lines for something that could be said in a few words. The trick is that while legal terms, although seemingly complex, usually facilitate brevity ('involuntary manslaughter' in opposition to 'killing someone with no intention to do so'), the legal documents are usually a stellar example as they usually must describe absolutely everything the document might pertain to in smallest detail. The lack of this is more often than not the main reason behind legal
* The legal text of EGM magazine, near the end of said magazine, always contains some sort of joke.
* The legend about the Llanquihue Lake in Southern Chile features the Huilliche princess Licarayén and her boyfriend, the
* The legend also says whoever tries to take it will suffer the same fate.
* The Legendary Axe: 99,999,990 points, even though the score increases in fifty point units, and the second place was 30,068,300 points.
* The Legendary Birds are forcibly evolved and brainwashed by special armor created by Team Rocket during the Team Rocket arc of
* The legendary Chimeri/Dunmeri hero Lord Indoril Nerevar. Very little is known of his early life and even then, there are conflicting sources.
* The Legendary Dark Knight Sparda is the father of the series' main protagonist Dante and has an influence in the plot that is felt everywhere despite being dead.
* The legendary "Dead Parrot" sketch climaxes in the frustrated customer rattling off a long list of euphemisms that indicate the dead Norwegian Blue parrot is
* The legendary "Friends, Romans, countrymen, lend me your ears" speech from
* The legendary hero Hakumen is hands down the strongest character in the setting, with the possible exception of Azrael. However, he doesn't truly exist as we understand; he's stuck in another dimension called the Boundary, and the threads binding him to the physical world are tenuous at best,
* The Legendary Moonlight Sculptor: As a result of an epic quest arc being succesfully completed, high level mage characters are allowed to evolve their class to become Necromancers. This VRMMORPG would not otherwise allow users to become this class if the quest had failed.
* The Legendary Moonlight Sculptor, people think it is a parody of how the race has no in-game culture. He is completely unaware of how bad he is.
* The Legendary Moonlight Sculptor, the main character Weed considers his non-combat title-class to be this, he calls his class a "glass sculptor" as his unique attacks do a lot of damage, but because he is a crafter class, he cannot equip heavy armor, and does not receive the ordinary damage reducing skills of, say, a warrior.
* The Legendary Moonlight Sculptor, when players connect to the VRMMORPG, the author describes the players as experiencing a time parallax. The game experiences time as flowing four times as fast. So while the game has only been released for a year after the story's introduction is done, the game itself has had four real years. This becomes more important as a media group is trying to edit footage from the game, and is unable to keep up with the "live" footage, having to frequently fast forward.
* The legendary One-Eyed Owl, the most powerful Ghoul seen in the original series. Rumored to be a
* The Legendary Starfy are simply regular Swabbies flying around thanks to the three balloons attached to their clothing.
* The Legendary Starfy (as an Assist Trophy) before the series was first released outside of Japan.
* The Legendary Starfy completely, taking place almost entirely underwater despite the title character being from the sky.
* The Legendary Starfy has Snarks, which are shark enemies that cannot be harmed at all. There is also humongous Mega Snark, who prowls around the S.S. Logwater and regularly rams onto the ship trying to devour Starfy. The latter will have to take cover behind the ship's masts to avoid being gobbled up.

* The Legendary Starfy have enemy penguins shove Starfy into a huge snowball and send him rolling down the cliffs. Starfy's expression during the entire snowball ride is absolutely priceless, by the way.
* The Legendary Starfy series qualify. Heck, the hero is a cute yellow starfish with a huge smile which makes the most adorable noises.
* The Legendary Starfy's Prince Starfy and Princess Starly of the Pufftop Kingdom and how far they progressed in the Ami Kingdom, and she sends her strongest and most loyal minions to try to assassinate them, as you defeat the bosses that have been sent to murder you and get further in the Ami Kingdom, Degil gets visibly and verbally more frustrated that Starfy and Starly are still alive and getting ever so closer to fighting and defeating her in her lair.
* The Legendary Starfy, the winner has a crown descending to land on their head while the others have a basin dropped on them instead.
* The Legendary Starfy title started development in 1995 for the Game Boy. It was moved to the Game Boy Color before finally being released as a Game Boy Advance title in 2002.
* The Legendary Starfy when Starfy gives a beating to the Terrible Trio when they try to abduct Bunston. And when the Terrible Trio returns to Pufftop in search for him, this fate befalls to them once again at the hands of Starly.
* The legendary sword which is supposed to make Gohan the strongest warrior in the universe is actually just very heavy. Gohan gets stronger because wielding it is like training with impossibly heavy barbells. Also because it's a
* The Legendary Tae Yamada. As the only member of Franchouchou to remain a (mostly) mindless zombie, she's not saying anything. We know three things about her life pre-mortem: she was 29 when she died, one of her favorite foods was mentaiko, and she liked to visit travel agencies (implying she lived no earlier than the 20th century).
* The legendary tag teams also have legendary finishing moves, the most famous being
* The legendary Tau Commander Farsight compiled two such volumes during his career. Befitting the Tau's reactionary style of warfare, they are deconstructions of the tactics of different species: the
* The legendary weapon Sever has the special ability "Slain enemies rest in pieces". Any killing blow with it has an artificially large crit value, causing the slain enemy to explode into gibs.
* The legend got its start due to Matthew 16:28, in which Jesus says “Truly I tell you, some who are standing here will not taste death before they see the Son of Man coming in his kingdom.” Since the Second Coming still hasn't happened yet, some have speculated that one of Jesus's listeners must still be alive wandering the Earth anonymously.
* The legend itself is about a girl who got cut in half and rips other people's legs off in anger, if they knew about her or the legend based on her.
* The Legend of Ban Anti-Aang sort of Avatar, with an emphasis on Neutral Jing.
* The Legend of Billie Jean blood—somewhere in the confusion, Putter got her first period.
* The Legend of Billie Jean plays Putter getting her first period both for drama and comedy.
* The Legend of Billie Jean play teenage siblings. With their blond hair, grey-blue eyes, peaches-and-cream complexions, and identical last names, coupled with the fact that both actors were relative unknowns at the time, it was unsurprising when many moviegoers assumed they were real-life brother-and-sister.
* The Legend of Billie Jean was a box office bomb during its original release, but started to gain popularity as it began to play on syndicated networks years later.
* The Legend of Black Heaven both as the show's theme and as a song played by the main character...to save the universe.
* The Legend of Black Heaven falls under this trope as well as being rather hard to activate.
* The Legend of Bloody Molly, and comes back as "Bloody Molly" (a take on the "Bloody Mary" Urban Legend) to exact revenge on them.

* The Legend of Boggy Creek casts Texarkana locals in many of the roles; some of whom being actual witnesses to the Fouke Monster recreating their encounters.
* The Legend of Boggy Creek shows the creature attacking a housed shared by two families.
* The Legend of Calamity Jane episode "I'd Rather Be in Philadelphia" involves a group of Neo-Confederates who are trying to assassinate President Grant. The gang's leader at one point declares, "Grant may be a red-handed murderer, but he gets the trains to run on time."
* The Legend of Calamity Jane. How she manages to hide her hip-length red locks under that hat is a complete mystery.
* The Legend of Calamity Jane, it's discovered in a flashback that this was what led to Jane's first kill; she shot a man trying to rape her as a teen.
* The Legend of Calamity Jane, outlaw Bill Doolin fakes raids by both the Comanche tribe and the Calvary, threatening to cause already-poor relations to flare into war. The long-term implications don't really concern him, though — he just wants to draw security off of a shipment of gold.
* The Legend of Calamity Jane, to rescue a Comanche who is about to be lynched. It helps that it was an impromptu over-the-branch hanging, at a height that required a barrel to be kicked out from under the (innocent) victim's feet.
* The Legend of Chekhov: If someone tells a fairy tale or legend, it'll turn out to be true. And, outright disbelieving it only ups the uncomfortable nature of the truth when it hits.
* The Legend of Chun-Li doing the "spinning bird kick" and prepare to cringe as Chun-Li slowly kicks those around her without even doing the full splits and her opponents fall down (as in not the direction they were kicked in) from the kicks that clearly miss.
* The Legend of Dark Witch, Zizou gains bosses' powers upon their defeat, and can enhance them with Tres crystals to make them even stronger.
* The Legend of Dick and Dom episode "Hairwolf", a lunatic goes on a random tirade about things you shouldn't do, like playing the bassoon in the bathtub. At the end of the episode, he jumps in front of the camera and says to the audience, "DON'T have a cheesy ending-noone would believe it".
* The Legend of Dick and Dom. He doesn't actually learn any more magic.
* The Legend of Dick and Dom is the brain of a prince called “Dick”. They eventually remove it from the one travelling with them, to no ill effects.
* The Legend of Dick and Dom to Da Bungalow, like the heroes being put in the stocks and having tomatoes flung at them.
* The Legend of Dick and Dom: Whenever the leads can be made to fall into the mud or fight in a tub of custard, they are.
* The Legend of Dick and Dom when they can't afford to film anything and doing a little animation on the map instead.
* The Legend of Dragoon actually fought in the Dragon Campaign and has been spending the centuries since then hunting down and killing the Moon Child.
* The Legend of Dragoon. Along its eastern border is an unidentified landmass, so it appears to be a peninsula of sorts similar to Europe.
* The Legend of Dragoon and capturing his childhood friend, but is largely inconsequential in the grand scheme of the game's plot.
* The Legend of Dragoon. Both have decent speed physical and magical attack and defense stats though Dart is more rounded whereas Haschel is a bit more offensively based.
* The Legend of Dragoon: Damia, Lenus, and Meru all have Dragoon armor resembling a leotard with thigh high boots.
* The Legend of Dragoon, Dart and Rose are lost overboard after the party visits the haunted ship. When they rejoin the party everyone yells at Dart to get upstairs and see Shana. Meru declares herself the official guard to keep anyone from interrupting the two lovebirds. She herself is then caught spying at the door, her justification being she has no knowledge of romantic relationships and is trying to learn more about them. Cue a very embarrassed Meru being caught when Dart opens the door.

* The Legend of Dragoon, Dart is like this at first with Shana (not to be confused with the above show), but he warms up to her by the end of the second disc.
* The Legend of Dragoon, Dart's initial Dragoon Magic attack, Flame Shot, has him throwing his sword into the air, charging a ball of fire in front of him and shoulder-tackling it to the target. He catches his sword after the impact.
* The Legend of Dragoon definitely, umm... measures up. Not only does he have the build for it, but you only ever see him in two places, sitting on his throne (which is in the most luxurious throne room in the entire game by the way) and the banquet hall.
* The Legend of Dragoon: Feyrbrand can also produce and shot blue poison (causes Fear) and grey poison (causes Stun).
* The Legend of Dragoon gave the frail-looking little dancer girl the big-ass hammer, and she did fall over after swinging it in one of her attack animations.
* The Legend of Dragoon had a picture that trapped a princess inside of it in Act 2.
* The Legend of Dragoon had this with most of the members of your character's team.
* The Legend of Dragoon has 2, the first one being the Black-Burst dragon's shadow cannon, and the second one being the infamous divine dragon cannon.
* The Legend of Dragoon has a sleeping housecat blocking an entrance, which is only passable when the cat is lured away with food rather than, say, just stepping over the cat or shooing it away.
* The Legend of Dragoon hates roses because they're linked with her abusive mother, saying that her mother kept them around because they were beautiful but the bouquet was always in sight whenever she was beaten. Incidentally, she doesn't get along with the character Rose.
* The Legend of Dragoon, if you lose something will happen that makes you the winner by default. One of the opponents is deemed to have cheated by using "an illegal poison". However, the first round of the tournament has the opponent start by using a poison-inflicting item without being penalized for it; while he's disqualified if you lose, the disqualification is because he tries to outright murder you after he's already been declared the winner.
* The Legend of Dragoon, in which humans waged war against the Winglies who ruled over them, was essentially this.
* The Legend of Dragoon is a master of the Rouge School of Martial Arts (not a mistake, despite the game's dodgy translation; he comes from the village of Rouge). Naturally, it gets written as the Rogue School on occasion.
* The Legend of Dragoon is green and can spit a poisonous green goo from its belly. Furthermore, toxic stuff tends to be green-colored.
* The Legend of Dragoon is only for the audience. The transformations that do take longer, such as Dart's first transformation don't provoke any attacks, likely because Dragoons are at best a barely remembered legend so most enemies have no idea what's happening.
* The Legend of Dragoon is still alive (and was happily married for at least a little while).
* The Legend of Dragoon Lloyd slays the Divine Dragon, claiming his Dragoon Spirit in the process. But it won't work for him so he says it will be his "trophy."
* The Legend of Dragoon, "Oh, my dear daughter, I miss those days when you used to say, "I'll marry you, papa.""
* The Legend of Dragoon reveals that Rose is the Black Monster Dart has been searching for. But it was already very obvious that the Black Monster was a Dragoon with a darkness theme and near the end of Disc 2, it was established that Rose has been around since the Dragon Campaign over 11,000 years ago (which itself was frequently hinted with the fact she knows far more about the time period than even acknowledged experts).
* The Legend of Dragoon revived all killed players after combat with one hit point. Given that only one of the seven characters can revive party members (and only after reaching level three as a dragoon) and players can only carry a total of 32 items in their inventory, this is pretty much required. Likewise, blocking not only halves all damage taken for one turn and prevents status effects, it also heals the

party member for ten percent of their health.
* The Legend of Dragoon. She was a scrawny 13-year-old when he left but now she's an 18-year-old young woman, and she doesn't want to be Dart's "little sister" anymore either.
* The Legend of Dragoon. Should the player lose any of the matches, his opponent gets taken out of the competition for either cheating (i.e using poison) or something completely contrived (falling over or getting sick and being unable to fight).
* The Legend of Dragoon, the creator of the world created a Tree of Life, each fruit of which is a new species of animal. Apart from the sapient species, these creatures are uniformly hostile to all life, and the final fruit, the Virage Embryo, exists for the sole purpose of destroying all life on the world.
* The Legend of Dragoon, the final spell all the character receives is a Dragon summon. However, given that all the magic in this game has extremely over the top destructive effects, this is overkill.
* The Legend of Dragoon This isn't the only "cannot be" moment LOD offers.
* The Legend of Dratini, the 30 Tauros Ash accidentally caught in that episode appear to come out of nowhere in "Showdown at the Po-ké Corral".
* The Legend of Drizzt and spoke to the mind of the wielder to increase their blood lust.
* The Legend of Drizzt doesn't follow Drizzt, but Wulfgar as he wanders along the northern Sword Coast in search for a place to stay. It details his adventures as a bouncer in Luskan and his relationship with Delly Curtie.
* The Legend of Drizzt, Drizzt and Catti-brie were together for keeps.
* The Legend of Drizzt. Drizzt at least can move at superhuman speeds due to his magical anklets, but he's taught this move to other people as well.
* The Legend of Drizzt: Drizzt Do'Urden, in his series of novels by R.A. Salvatore, spends much of the series trying to prevent himself from getting close to his human friend, Cattie-brie, knowing that he will outlive her by centuries, but eventually falls for her anyway.
* The Legend of Drizzt: Drizzt Do'Urden in R.A. Salvatore's later books stops giving the other cast members breathing room. Even before that, he was originally intended as a mentor figure for Wulfgar, to be phased out and only show up occasionally. Instead he stole the entire series for himself.
* The Legend of Drizzt, Drizzt Do'Urden. It has 20,000 drow inhabitants plus hundreds of thousands of slaves, grows giant mushrooms and Rothe livestock and trades with other underground humanoid races.
* The Legend of Drizzt: Drizzt Do'Urden's friend Wulfgar wields a huge magical warhammer called Aegis-fang in battle; aside from him being strong enough and the hammer being powerful enough to stagger a giant when he throws it, it returns to his hands after it's thrown.
* The Legend of Drizzt, Drizzt floods the room with light to escape from his family (who are now trying to kill him). Being creatures who live their whole lives in the dark underground, the light is not only blinding, but painful as well.
* The Legend of Drizzt, Drizzt's arch-nemesis Artemis Entreri wields Charon's Claw, a sword with bones for a hilt. However, the trope is also subverted with another of Drizzt's main enemies, Obould Many-Arrows. He has a helmet crafted to look like a skull but which is actually made of glass-steel, a super-hard, transparent material.
* The Legend of Drizzt else in his life to look forward too. During his later series with Jarlaxale, we see just how empty he feels most of the time, and how little pleasure his craft really gives him.
* The Legend of Drizzt hero, with complete stats — and quite strong enough to face a squid thingy and a dragon and a group of liches.
* The Legend of Drizzt. Obould wanted to make a kingdom for his people, one that would be recognized by the rest of the world. Obould's ambition more or less forces the orcs to become more civilized.
* The Legend of Drizzt series, Drizzt muses that even the assassin Artemis Entreri has his standards: he kills people left and right, but he didn't rape Catti-Brie

when she was his prisoner.
* The Legend of Drizzt smack of this. Whenever Alegni perceives he has been slighted by Barrabus, he rings a magical tuning fork on Claw's blade that causes him agony - all the while lamenting how Barrabus' behaviour forces him to do this.
* The Legend of Drunken Master, which replaced the original music and sound effects, and had Chan looping his own lines for the new dubbing. Part of the original ending is kept, but ends before Fei-Hung's state can be shown.
* The Legend of Eevee, where it saves the main character, Pichu, from otherwise unsurvivable events such as being stabbed multiple times with a spear or falling into a bottomless pit. Pichu and his partner Togetic both know about it. Some of the secondary characters know about it as well.
* The Legend of el Lobodestroyo Vs. la Liga de los Villanos. Not much has been shown off besides a few test animations and music, however it's still in development as of 2016. The developers are doing it in their free time for no profit, so the game's development is taking a long time.
* The Legend of Fodlan, Link has already met Bernadetta in the past, thanks to him saving her uncle. A few years later, and he gets involved in Kostas' attack on Garreg Mach's students. This leads to him meeting Bernadetta again, who has become a student herself.
* The Legend of Frenchie King. Although unlike most examples, there's some serious punching and wrestling going on, almost no slapping and absolutely no hair-pulling.
* The Legend of Frenchie King: because of the titular bandit's shenanigans, Maria has to stop a runaway train in a scene that establishes her badassery.
* The Legend of Frenchie King: before their fight, Louise shows Maria, who's carrying a rifle, that she doesn't have guns on her. Maria silently agrees to a physical brawl and throws away her rifle.
* The Legend of Frenchie King: Being set in a Texas town of French immigrants who insist on speaking French, it's the English-speaking marshall who's out of place. A lot of the comedy comes from his attempts to communicate with the other characters.
* The Legend of Frenchie King between the two leads, takes place in Christmas-time, although it's painfully obvious that it was shot in Summer-time.
* The Legend of Frenchie King Dr. Miller shoots the chemist who tells him about the oil while his back is turned, because up to that point he's pretending that they're partners and that he'll share the fortune with him.
* The Legend of Frenchie King ends when the oil they both want starts to spill out of the well and they stare in surprise for a few seconds before collapsing from exhaustion.
* The Legend of Frenchie King ends with Louise and her sisters going back to being wandering outlaws after the ranch they were looking to settle in for a while gets destroyed, but they get five new additions to the gang.
* The Legend of Frenchie King: Maria only learns that Louise is Frenchie King near the end of the movie, while the audience already knows this since nearly the start of it.
* The Legend of Frosty the Snowman takes place in a stereotypical 1950's suburban community, but racism doesn't exist. Kids of different races hang out, and it's socially acceptable for Tommy (who is white) to be attracted to Sara (who is black).
* "The Legend of Goultard" reveals how Goultard became a demonic berserker in the game. He was originally a brave and mighty hero who had a good life with a wife and three children. Then a villain named Katar kidnapped them to lure Goultard into a fight. Goultard tracks him down and is horrified when he discovers that Katar has already murdered his entire family. After a brutal
* The Legend Of Hell House, as sole survivor of a previous investigative team, provides the backstory of the Belasco House, called the "Mount Everest of haunted houses." He relates the evil debauchery that started it all, as well as the dire fates of his colleagues on the earlier mission. Fischer advised the others on the team to do nothing to provoke the forces in the house and wait for the week to pass so they can live and collect their fees. As the casualties mount, Fischer is persuaded/forced by circumstances to take action.

* The Legend of Heroes: Trails from Zero an accessory that's only exclusive for him to equip. If the character is female and the player has done their romantic events, then players get to watch the fireworks with said girl and ends up kissing them, unless they're minors then he doesn't.
* The Legend of Heroes: Trails from Zero and Trails to Azure to officially release the games using the last and best fan translations as a foundation.
* The Legend of Heroes: Trails from Zero for Juna (pronounced you-bow), and "Alkichi" for Altina.
* The Legend of Heroes: Trails from Zero has Kevin and Ries doing their undercover work.
* The Legend of Heroes: Trails from Zero in Crossbell because of the influence the two nations have on Crossbell's internal politics. A lot of criminals have ties to either the pro-Erebonia or pro-Calvard factions, and are thus able to bribe their way out of trouble. The two nations also help themselves to a chunk of Crossbell's tax revenue because it has the "privilege" of being a buffer state between the two conflicting nations. Factors such as these and more make it understandable why the villains want Crossbell to be independent.
* The Legend of Heroes - Trails, including primary characters such as Lloyd Bannings, Rixia Mao, Elie MacDowell and Mariabell Crois, as well as side characters like Cao Lee and Grace Lynn.
* The Legend of Heroes: Trails in the Sky after all the fighting, tragedy, and reuniting together, decide to leave Liberl in search of Renne. After all, there's a big world out there to explore and they've got reputations to make as Bracers, just so long as they travel together. And as later games would show, they indeed had many adventures along the way.
* The Legend of Heroes: Trails in the Sky, allows teleportation across explored places and activates monuments, among other things.
* The Legend of Heroes: Trails in the Sky and part of a shadowy evil organization called Ouroborous, Joshua used to be a member and assassin until he failed to kill Estelle's father and Alba/Weissmann wiped his memory and has used him as a spy and puppet for the last five years, and everything the heroes did was just furthering his own plan. Joshua later confesses it all to Estelle, drugs her with a kiss and tells her to forget about him, and runs away. Cue end credits.
* The Legend of Heroes: Trails in the Sky, as Estelle and her friends find the source of the fog covering Rolent, they are engulfed by a spell from Luciola. Estelle wakes in front of her family house with her father and suddenly-alive mother and turns into a child, spending happy times together. She manages to get out of it when she remembers Joshua's harmonica song.
* The Legend of Heroes: Trails in the Sky attempted to establish the foundation for an entire series taking place after the original duology. It was actually successful enough for the series to happen.
* The Legend of Heroes: Trails in the Sky at the Academy. The students stage the classic play "The Madrigal of White Magnolias" but with gender-swapped casting: thus Estelle and Kloe play the dueling knights while Joshua is cajoled into playing the role of the princess.
* The Legend of Heroes: Trails in the Sky at Valleria Shore in chapter 1. Besides five different kinds of fish of increasing rarity and value, you can also catch "Holey Boots".
* The Legend of Heroes: Trails in the Sky can change dialogue in the main story depending on whether or not you've done certain sidequests. For example, in Second Chapter, there is a sidequest where your characters spar with some members of the military at a fortress for training. When you go to the same fortress for story-related reasons, if you did that sidequest first, the characters acknowledge that you assisted with training the soldiers at the fortress. This is even done between games, because the later games can read your saves and carry over progress accordingly, so for example, if you did a sidequest for a lighthouse keeper in First Chapter, you can go back to the same lighthouse in Second Chapter and get another sidequest there, and he'll acknowledge that you helped him out before too.
* The Legend of Heroes: Trails in the Sky, Estelle and Joshua manage to oust the

culprit behind the attempted fire of an orphanage after bluffing him to make him drop he had nothing to do with 'the mercenaries in black', with Estelle quickly mentioning that no one had said what the hired crooks were wearing when they started the fire.
* The Legend of Heroes: Trails in the Sky - Estelle and Joshua, though Joshua isn't exactly physically inept. He IS a bracer, after all. He just prefers reading a book to hiking or fishing.
* The Legend of Heroes: Trails in the Sky - Estelle and Joshua visit the city of Zeiss to meet with Professor Russell about a mysterious black orbment sent to their father, but which has ended up in their care. They end up escorted to his home and lab by his granddaughter, Tita. Upon arrival, and trying to introduce themselves, they find him completely absorbed in his work, putting the finishing touches on his latest invention. He whizzes away, bumping Estelle aside, and when they catch up with him, he has Tita start helping him with his work, tells Joshua to go fetch a book, and tells Estelle to make him coffee.
* The Legend of Heroes: Trails in the Sky, Estelle suggests calling the black orbment the "Dark Thingy of Impending DOOM." Her suggestion is dismissed as being annoying to say.
* The Legend of Heroes: Trails in the Sky for party members in the second game:
* The Legend of Heroes: Trails in the Sky had its English release only for PC as XSeed didn't had enough time to port it to PSP.
* The Legend of Heroes: Trails in the Sky has Estelle breaking out of the Glorious to find where Joshua is at.
* The Legend of Heroes: Trails in the Sky has twin tails that reaches to her skirt.
* The Legend of Heroes: Trails in the Sky has two discs. Due to the large scope of the game, after much time on the second disc, a temporary swap occurs back to the first disc, then back again disc 2 near the endgame.
* The Legend of Heroes: Trails in the Sky, in a just world the word "weirdo" would be the one getting emphasis. Lo and behold, in the final version of the game in that very text box, the giant text remains, but this time it's "total weirdo" that's blown up instead (with Olivier immediately commenting on the strange emphasis afterwards).
* The Legend of Heroes: Trails in the Sky is Mystery Paste. It restores 2400 HP and cures all status ailments, but the treasure chest it's initially found in warns you that you're cursed, and the description reads "The real mystery is why anyone would eat this."
* The Legend of Heroes: Trails in the Sky, is still a rarity for the genre.
* The Legend of Heroes: Trails in the Sky. It's this attention to detail that balloons the scripts into the hundreds of thousands in word count, and that's just in the kingdom of Liberl; one small country across an entire continent that would be a few sidequests and a town in nearly any other JRPG.
* The Legend of Heroes: Trails in the Sky, Joshua and Estelle have to reach a church without being caught by guards. If caught, the number of guards patrolling will decrease.
* The Legend of Heroes: Trails in the Sky, one of the many "empty chest" messages you can get for examining a chest you have already opened is this.
* The Legend of Heroes: Trails in the Sky reads "I'm so glad you checked this chest! I'm you from the future and I came back to warn you about—"
* The Legend of Heroes: Trails in the Sky - Second Chapter - 4 tropes as of 2/27/20.
* The Legend of Heroes: Trails in the Sky series has this one. He uses it as one of his S-Craft attacks. Called; Aura Blast. Just as long as the enemies are within the attack circle range, they will get hit with it.
* The Legend of Heroes: Trails in the Sky She immediately convince herself that he simply went back to their home, even as Kevin takes noticed she's acting in denial, Estelle accepts the truth once she sees it for herself.
* The Legend of Heroes: Trails in the Sky, the Enforcers of Ouroboros are introduced as the one responsible for the incident in each area for every chapter.
* The Legend of Heroes: Trails in the Sky to do heavy damage to the entire party.

If you don't go all out with your own Crafts, odds are enough of the Joshua bots will stick around long enough to wipe out your team.
* The Legend of Heroes: Trails in the Sky wanted Estelle's win to be suitably dramatic)
* The Legend of Heroes: Trails in the Sky: While investigating the circumstances affecting a town's water supply, the team learns some information that a suspicious man wearing dark glasses was seen going around the area.
* The Legend of Heroes: Trails into Reverie Can anyone tell how Rean is supposed to be a harem protagonist?
* The Legend of Heroes: Trails into Reverie lampshades that there's literally no difference with Lapis arguing there is.
* The Legend of Heroes: Trails into Reverie with Elie being shocked that she didn't even hear anything like it from her connections.
* The Legend of Heroes: Trails of Cold Steel, a baby starts crying when it feels the waves of darkness passing through.
* The Legend of Heroes: Trails of Cold Steel accident that happened in the prologue, this causes awkwardness. Later on the same party ends up having to share a tent, but by that point they'd all known each other for several months and they're much more comfortable with the idea.
* The Legend of Heroes: Trails of Cold Steel actually harbors romantic feelings towards him, nor taking the hints from others regarding this.
* The Legend of Heroes: Trails of Cold Steel, after each of the dormitory events with Rean's chosen partner towards the beginning of the Finale section, the view cuts to the outside of the dormitory to show it gently snowing. If your chosen partner was one of the female characters, then it certainly means love. If a male character, then, well, a strong friendship at least.
* The Legend of Heroes: Trails of Cold Steel, after Instructor Sara Valestein outlines the basic details of Class VII at the start of the first game, Machias informs her...
* The Legend of Heroes: Trails of Cold Steel after Rean falls asleep on the bench. Emma then makes him sleep on her lap without him knowing till he wakes up, admitting it was the best sleep in his life, then feels embarrassed about it.
* The Legend of Heroes: Trails of Cold Steel after seeing both Juna and Kurt's position.
* The Legend of Heroes: Trails of Cold Steel, also jumps in by bringing in the booze while Duvalie and Altina can't take the casual atmosphere anymore and both want to take things seriously.
* The Legend of Heroes: Trails of Cold Steel among Erebonia's commoners, who have benefitted from his policies.
* The Legend of Heroes: Trails of Cold Steel, an anime-style idea bulb will sometimes appear over a character's head when they get an idea, such as in Chapter 4 when Emma excuses her talking with her cat, Celine, as talking with a friend on her ARCUS unit. It also sometimes shows up when Rean answers a question in class.
* The Legend of Heroes: Trails of Cold Steel and annihilates the corrupted beast guarding one of the seven treasures of the goddess Aidios. This is reflected in his Rush attack where instead of it being normally red, it turns purple.
* The Legend of Heroes: Trails of Cold Steel and getting a peculiar dish has him respond with a word-for-word recitation of the trope name.
* The Legend of Heroes: Trails of Cold Steel and his future students see through his disguise immediately. Played straight for when he travels to different parts of the country where no one recognizes him if he starts wearing his glasses.
* The Legend of Heroes: Trails of Cold Steel and its sequel are full of these. Dorothee, the head of the Thors Military Academy literature club, is probably the most notable one. There's also Princess Alfin, who additionally roped in Elise Schwarzer, the adoptive sister of the game's main protagonist.
* The Legend of Heroes: Trails of Cold Steel, and Makarov and Mary are engaged by the time of the 4th game.
* The Legend of Heroes: Trails of Cold Steel appearing in certain textures in the game (ironic how they got Railway correct tho). Adding to the hilarity, when the

game was localized to English, these errors somehow slipped through the cracks on the original run and were only patched once people played up to the chapter and started pointing this out... after it was re-released in HD.
* The Legend of Heroes: Trails of Cold Steel. As a result, she tries to distance herself from Rean.
* The Legend of Heroes: Trails of Cold Steel: As Class VII located the mercenaries who attacked the military bases in the Nord Highlands, the mercenaries' employer Gideon uses his flute to summon a colossal spider to get rid of them both.
* The Legend of Heroes: Trails of Cold Steel as much as possible but ultimately aren't the ones who could end the war itself.
* The Legend of Heroes: Trails of Cold Steel as Rean finds a way to survive his death.
* The Legend of Heroes: Trails of Cold Steel as Rean thinks that the two look more like overprotective dads than anything.
* The Legend of Heroes: Trails of Cold Steel at some point will be a boss fight, no matter how absurd the situation is. And there are at least four games in the series with him being a boss fight.
* The Legend of Heroes: Trails of Cold Steel, but Rean doesn't buy it, asking if he's expected to believe that everything they did together was just a lie, that it meant nothing.
* The Legend of Heroes: Trails of Cold Steel, carrying the princess who was abducted by the Noble Alliance despite the overwhelming odds. Everyone on the ship lampshades at how crazy the kid is and praises his guts for it. He's also crazy enough to jump from a tall building and be caught by Valimar and his own friends lampshade it as well.
* The Legend of Heroes: Trails of Cold Steel conflict against the country's nobility, who have a long history of classism and oppression. While Osborne's expansionist policies have created his fair share of enemies, said policies have also improved the living conditions for the country's commoners, which result in him looking better in comparison to most of the nobility.
* The Legend of Heroes: Trails of Cold Steel ends up getting headaches from their acts like not staying put in camp and actually stealing a military robot while tailing him and his friends in his mission given to him by the government, disobeying their other instructor's orders just so they can follow him, and even tailing him to a casino when he's gathering information from jaegers. He even calls them out on it by the end of the first chapter.
* The Legend of Heroes: Trails of Cold Steel ends up staring at them while the two of them were studying in one of Emma's bonding events.
* The Legend of Heroes: Trails of Cold Steel enters a civil war between the Noble Alliance and the Imperial Military at the end of the first game. The whole of the second game is devoted to trying to stop it.
* The Legend of Heroes: Trails of Cold Steel faster even if it betrays his beliefs. Alfin has to snap him out of it, telling Rean to hold on to his beliefs.
* The Legend of Heroes: Trails of Cold Steel fight. Fortunately, the mechanics are fixed in the sequel where they've added a lot of things in the Divine Knight battles.
* The Legend of Heroes: Trails of Cold Steel fighting in the Erebonian Civil War, defeating multiple incursions by the Republic of Calvard at the Erebonian border, and participating in the invasion of North Ambria. The branch campus also boasts Major Michael Irving from the Railway Military Police in its instructing staff and former General Aurelia Le Guin as the principal.
* The Legend of Heroes: Trails of Cold Steel final chapter takes place all in a single day.
* The Legend of Heroes: Trails of Cold Steel for anyone who's played a few games like this.
* The Legend of Heroes: Trails of Cold Steel for the first time with the lights coming on and the monitor turning on.
* The Legend of Heroes: Trails of Cold Steel for this portion of the game. In fact, the Aion Type Alpha-II in the Divine Knight fight, literally the next fight, posed

more of a challenge.
* The Legend of Heroes: Trails of Cold Steel for two and a half centuries ago, his allies don't even care for his cause and are just allies with him because their goals just so happen to align.
* The Legend of Heroes: Trails of Cold Steel games, Aurelia Leguin's vision is unusually keen, to the degree that she can see everything in excruciating detail. She sometimes finds herself getting annoyed by specks of dust floating in the air and thus commissioned special glasses to suppress her vision.
* The Legend of Heroes: Trails of Cold Steel. Growing the bond between party members increases or enhances the various link abilities they can use, and maxing out the bond between Rean and another character allows an optional romantic encounter between them.
* The Legend of Heroes: Trails of Cold Steel grows into one. His specialty is both a Steamroller and a Plugger.
* The Legend of Heroes: Trails of Cold Steel has become banned in the UAE for undisclosed reasons.
* The Legend of Heroes: Trails of Cold Steel has the Ferris Wheel ride where Rean can take another character with him to spend some time during the Overture chapter.
* The Legend of Heroes: Trails of Cold Steel has the option to dance with the ladies at the climax of the game if he has a high bonding affinity with them. For the guys, however, they skip out on the dancing and go straight to watching the other people dance while they just sit down in the distance.
* The Legend of Heroes: Trails of Cold Steel, however, and having the Academic Rank at which the medal is awarded in a carry-over save file results in extra bonuses when starting the sequel.
* The Legend of Heroes: Trails of Cold Steel however, Lloyd plays this trope straight where he's doing his own thing while Rean and the new Class VII are doing their adventures onscreen.
* The Legend of Heroes: Trails of Cold Steel, if you choose to do a study session with Crow in Chapter 3, he teaches Rean about CPR, and then suggests that CPR on a pretty girl is a gateway to "fireworks."
* The Legend of Heroes: Trails of Cold Steel... I'm done. Hit my limit... ...There needsh to be more booze in thish glass... Zzz..."
* The Legend of Heroes: Trails of Cold Steel instructor, ends up grimacing at the sight as it reminds him of what and Alisa did.
* The Legend of Heroes: Trails of Cold Steel in the Eisengard Range, near his hometown, as the Awakener shares the damage taken by the Divine Knight and it's taken almost all of the Knight's mana just to recover him.
* The Legend of Heroes: Trails of Cold Steel in the first game which was to their detriment.
* The Legend of Heroes: Trails of Cold Steel introduces the "Round of Seven" app, which lets the members of the old Class VII communicate with each other, complete with video phone. Later on, they begin communicating with other characters that have ARCUS by video phone as well.
* The Legend of Heroes: Trails of Cold Steel is this to his students as he will make sure they're taken care of, scold them if they do something wrong, or help them out when they're troubled.
* The Legend of Heroes: Trails of Cold Steel it at one point when Sara makes the same request...
* The Legend of Heroes: Trails of Cold Steel member is only able to give one hint as to their origins: "Black Workshop".
* The Legend of Heroes: Trails of Cold Steel of the first two games participates in said war and all the details are told through flashbacks as he explains it to his friends.
* The Legend of Heroes: Trails of Cold Steel one another. By the time the fight was over, their classmates mocked them for being so over-the-top.
* The Legend of Heroes: Trails of Cold Steel, one is conveniently used to bring Millium back to life.
* The Legend of Heroes: Trails of Cold Steel, orbal appliances are still new

technology to most people, and certainly to Laura S. Arseid, who grew up training in the way of the sword in the remote village of Legram. During a bonding event, she and Rean Schwarzer explore a store full of these appliances in Roer, but she gets a little too hands-on and ends up seemingly breaking an orbal washing machine and causing near-disaster with other appliances. Fortunately, the damage isn't as bad as it seems, and the owner is willing to be forgiving since they're classmates of Alisa Reinford, who is well-regarded in the town.
* The Legend of Heroes: Trails of Cold Steel, Randy is disappointed by the Erebonian Empire's orbal network. It's so boring - if he were in Crossbell, he "could bring up some swimsuit babes just like that."
* The Legend of Heroes: Trails of Cold Steel. Rean and Alisa's dispute doesn't break the Link system because they get over their issues before they end up in the same party. That said, there are some issues...
* The Legend of Heroes: Trails of Cold Steel, Rean can be as low as level 92 (while starting at 40) when everyone else is at around level 130.
* The Legend of Heroes: Trails of Cold Steel, Rean has to board the Pantagruel in exchange for his hometown Ymir's safety. He then encounters all of the bad guys he's fought in the past game and a half and all of them are very accommodating with him.
* The Legend of Heroes: Trails of Cold Steel, Rean Schwarzer ends up helping out the Student Council because Instructor Sara "volunteered" him for it. He agrees to Sara's request to get the journals from Towa in the Student Council room, but when he gets there, Towa tells him "thank you for everything," and he's confused, she clarifies about how pleased she is that he agreed to help out the Student Council with their work on his free days. Of course, he agreed to no such thing, but upon seeing how overworked Towa already appears, he can hardly refuse.
* The Legend of Heroes: Trails of Cold Steel, Rean tells Altina that she has to figure out what school club to join for herself after she asks him to simply assign her one, or else it won't mean anything. Later, if you do her bonding event, he relents somewhat by helping her to do some of the legwork, but tells her that the final decision still has to be hers.
* The Legend of Heroes: Trails of Cold Steel series got PS4 updated re-releases as they were first released on the PS3 and Vita over half a decade before, but the third and fourth game were released for the PS4.
* The Legend of Heroes: Trails of Cold Steel series tends to be accurate in the timeline of these boasts, but wrong about everything else:
* The Legend of Heroes: Trails of Cold Steel She says that she'd say "You won't feel a thing," but admits point-blank that do so would be an untruth.
* The Legend of Heroes: Trails of Cold Steel still can't catch a break.
* The Legend of Heroes: Trails of Cold Steel students from a different class who will make the most bizarre dishes made from plants from rocks or even bugs. One of his sidequests requires that Rean gather these ingredients and when he finishes, Rean ends up getting a taste out of the dish. Turns out that while there's some odd taste here and there, the dish itself isn't quite that bad.
* The Legend of Heroes: Trails of Cold Steel takes place which is at Heimdallr capital the next day.
* The Legend of Heroes: Trails of Cold Steel that they should seek medical attention because of a greatly increased heart-rate.
* The Legend of Heroes: Trails of Cold Steel the consent of her much more straight-arrow twin sister Linde.
* The Legend of Heroes: Trails of Cold Steel the middle finger after Rean and Ash talk about Ash's circumstances, Rean encouraging him to move forward, and Rean wishing his student a good night's rest.
* The Legend of Heroes: Trails of Cold Steel, then now you have one too.
* The Legend of Heroes: Trails of Cold Steel, the "orbal net" exists in the Empire of Erebonia, an orbal energy network capable of transmitting various kinds of data wirelessly. It is still in the early stages of development, however, so the orbal net is more accurately a rough analogy to the real-life ARPANET in that it's basically a primitive Internet that is primarily used by the military. A sidequest

late in the first game in the Roer Industrial City reveals there are plans to expand it for civilian use.
* The Legend of Heroes: Trails of Cold Steel, the party compliments Tita on the power of her Orbal Gear, but notes that she didn't have to stick with them, that she could have stuck with Agate and helped him and her other friends from Liberl. She tells them that she's a branch campus student first and foremost and she explained all of this to Agate the night before. Ash suggests that something else may have happened between her and Agate afterwards, but she replies that he just gave a little smile and patted her on the head. Altina says that as far as head-pats go, it was probably more innocent that the ones that Rean gives out, Musse saying that she might be right, but that Rean doesn't realize the implications of what he's doing half the time. Kurt comments that he hopes he doesn't end up like that and Rean thinks to himself, "I'm RIGHT here, you guys..."
* The Legend of Heroes: Trails of Cold Steel: The second game has a sidequest where two characters plan to attack some enemy soldiers and then retreat to a different town; however, they sat across from each other when looking at the map, leading to one of them reading it upside down. This causes them to go to separate towns while they both worry about where the other is.
* The Legend of Heroes: Trails of Cold Steel the series makes fun of her petite stature.
* The Legend of Heroes: Trails of Cold Steel they were doing at the end of their first battle.
* The Legend of Heroes: Trails of Cold Steel. This continues to be the case in the second game, with examples such as Rean and Elise, who are adoptive siblings, and Millium and Claire, who are fellow Ironbloods. The third game avoids this entirely, and treats Link levels and bond levels as different things. For instance, the field exercise in the Sutherland province has Claire join as a party member for a short time, and it's mentioned how everyone in the party except Kurt knows her. Despite having no connection to her, Kurt's link level with Claire is the same as everyone else's when she joins.
* The Legend of Heroes: Trails of Cold Steel though his student Kurt Vander ends up taking this mantle with him getting a face full of Juna's chest after the new Class VII ends up falling from the same trap door set up like in the first game.
* The Legend of Heroes: Trails of Cold Steel (though Sara does give Rean a kiss on the cheek but at this point, she's no longer a teacher at Thors while Rean is a teacher of the branch school). Meanwhile, Musse has the hots for said teacher Rean, who firmly denies what she's doing and makes sure she gets the memo. Still doesn't stop her from trying regardless. Also in III, Rean (now a teacher himself) can also pursue a similar relationship with his students Juna, Musse, and Altina (though like Sara he tells them to wait until they graduate before taking things further).
* The Legend of Heroes: Trails of Cold Steel to do a better job of slowing down the force that wiped them out less than an hour later. In the second game, once the surprise of the sudden rebellion wears off and the surviving units get a feel for what the enemy's new weapons systems are capable of, the Imperial Army looks much more competent. There are two cases of useless militaries in the third game, but both times it was the fault of their civilian superiors: in one case the Imperial Army was ordered to stand down during a crisis because the Chancellor wanted the Provincial Army to try and fail to handle the situation first in order to make them look bad, and in the second the Provincial Army's sensible deployment plans kept getting overridden by the whims of the self-serving incompetent who was the acting Duke, allowing a crisis to form and escalate.
* The Legend of Heroes: Trails of Cold Steel to do with the resolution of the southern and western fronts of the war, as they're busy fighting in the north and east.
* The Legend of Heroes: Trails of Cold Steel" to join Thors Military Academy's branch campus as staff, so that the government could continue to make use of their skills while also keeping an eye on them and separating them from their closest comrades. Le Guin describes the branch campus as a whole as a "trash bin" where the government can place people with "problematic" backgrounds, as even most of the

students there were prevented from attending the main campus, where the crown prince would be attending.
* The Legend of Heroes: Trails of Cold Steel tries to nudge players to choose Alisa.
* The Legend of Heroes: Trails of Cold Steel uses sword and gun as her weapon of choice. Both of them are sold in one package instead of separately since the game has no right-left hand equipment system.
* The Legend of Heroes: Trails of Cold Steel, when Machias asks as to whether Rean, Gaius, or Elliot were nobles whatsoever, the latter two denied it fully but Rean's response is that "he doesn't have any noble blood on him" which Machias does buy (since Machias was introduced in the story as hating all nobles) but Elliot notices the dodge. Rean does feel bad about it later and does come clean (he's adopted by nobles but as far as Rean knows at the time, he was a commoner) but to Machias, he felt that he was lied to.
* The Legend of Heroes: Trails of Cold Steel." When she asks if Rean would care to join them, he replies that it sounds fun, but he has to go polish his tachi.
* The Legend of Heroes: Trails of Cold Steel when the crew tries to pry some information from an informant. Turns out he is quite willing if the three ladies in the crew steps on him. Angelica quips that the informant would probably have been even more willing to give them the info had Claire been in her RMP uniform.
* The Legend of Heroes: Trails of Cold Steel, which also killed Claire's mother and younger brother. Claire eventually caught on too, and was able to gather the evidence needed to expose her uncle, who was given the death penalty for his crimes.
* The Legend of Heroes: Trails of Cold Steel, which can cause this. One notable example was a group of soldiers forcing down an airship so they could identify key members of the government opposition party so that they could be summarily executed for disagreeing with the Chancellor's plans for a war of conquest of a neighboring country over a crime they didn't commit.
* The Legend of Heroes: Trails of Cold Steel who hugs him and brings his head near her chest.
* The Legend of Heroes: Trails of Cold Steel with the Goliath Noa and Kestrel Beta respectively.
* The Legend of Heroes: Trails of Cold Steel you get to meet some of its leaders and even buy some of their merchandise.
* The Legend of Heroes - Trails: The series provides an option if a battle is lost to retry with decreased enemy stats for those who want to enjoy the story. The effect can be stacked multiple times per battle and enemies would only inflict minimal damage and have low defenses, though this doesn't apply to status aliments such as poison or petrification.
* The Legend of Heroes: Trails to Azure has Lloyd breaking out of prison alongside Garcia.
* The Legend of Heroes - Trails with Rean, gives a more not-so-pleasant sight.
* The legend of John Henry may or may not have been inspired by legends passed down from former slaves about Makoma, a West African mythic hero who used an iron sledgehammer to fight giant monsters. Probably best known in the Northern hemisphere for his legend being adapted as a
* The Legend of Johnny Lingo, the older Tama threatens to steal Mahana's clothes while she's bathing. She agrees to talk to him, so he leaves the clothes for her to put on, and goes to a different place where they talk.
* The Legend of Johnny Lingo, we learn that the "Johnny Lingo" that we've met is not the original bearer of that name, and is about to pass it on to his protegé.
* The Legend of Kage, although the latter also has Western medieval fantasy elements.
* The Legend of Kage, which described the happy times of your character and the princess he just saved, and then with a foreboding "However....." begins the kidnapping process all over again.
* The legend of King Canute and the Waves: Canute was a Norse king with a seat in

England in the 10th century. The story goes that he had his throne brought to the seashore while the tide was out. He sat and commanded the tide not to insult its sovereign by flowing in and getting his feet wet. This command, naturally, was ignored, and Canute's name is nowadays used proverbially to indicate that someone is failing to grasp that their authority has limits.
* The legend of King Midas (the first part, at least) is a good example. Upon finding the drunken satyr Silenus, a follower of Dionysus, trespassing on his property, Midas treated him hospitably for ten days rather than punishing him. Dionysus offered Midas a reward for his charity, offering him anything he wanted; Midas asked that anything he touched be turned to gold. Although the god warned him that he had made a foolish wish, he still granted it. Though Midas was happy at first, it soon became obvious that he had indeed been foolish. His daughter was quickly
* The Legend of Koizumi Hitler of all people has this when he first appears and whenever he talks about the Pope.
* The Legend of Korah has this to the point of being ridiculous. Even the World's name, Terra Altsoba means Earth at War.
* The Legend of Korah so to speak, and a host of other strange species. Subverted with the Neodammerai.
* The Legend of Korra Aang, and his friends Sokka and Toph as middle-aged adults.
* The Legend of Korra: Aang's grandchildren could all count as Cuties, but none more so then Meelo. "Be the leaf!"
* The Legend of Korra, a cross between a ferret and a red panda. That is a powerful combination of cute.
* The Legend of Korra actually see the events leading up to one between the Equalists and the Benders. The final season has the world near on the brink of another world war, this time by the Earth Kingdom.
* The Legend of Korra after one of the team's regulars left them. She then becomes a regular team member and keeps on playing alongside Mako and Bolin all the way into the finals. Later at the beginning of season two, pro-bending falls off the spotlight as Korra has taken up her duties as a full-time Avatar and Mako has a job as a police officer.
* The Legend of Korra, a height that Book 4 wasn't quite able to reach for many.
* The Legend of Korra. A lot of people are able to influence her because of this.
* The Legend of Korra also favours the face-concealing mask, with the few who aren't masked being mostly named characters like Kuvira herself and Bataar Jr.
* The Legend of Korra, also has a self-created Bald of Awesome. In "The Original Airbenders" Tenzin explains that one of the reasons Airbenders shave their heads is that due to more exposed skin, they're able to sense attacks through the air. This is demonstrated when a recently-shaved acolyte is able to sense a net being thrown at him from behind and evade it.
* The Legend of Korra also has one that would make Haru proud. Bolin speculates that he started growing it at age 10.
* The Legend of Korra also has the large metal airships of its predecessor, albeit with 70 additional years of technological development.
* The Legend of Korra also has this for the second season's Big Bad, but it's hard to get into without massive spoilers.
* The Legend of Korra also sweep them up and hold them in place with giant magnets.
* The Legend of Korra, Amon and his Equalist uprising can be compared to real life Communist movements. They believe that the only way to protect non-benders is to de-power benders, whom they blame for forming oppressive societal hierarchies.
* The Legend of Korra, Amon is the direct big bad by lying, exaggerating, and manipulating non-benders to his cause by fabricating certain cases against benders, but Tarrlok inadvertently helps this along by mobilizing task forces against Non-benders, fueling their wrath against Benders. The real issues and greater scope enemy of book 1 is the conflict between benders and non-benders; but both brothers (perhaps unwittingly on Tarrlok's part, but regardless) are escalating the violence in the city, causing a Civil War in the process.
* The Legend of Korra Amon leader of the Equalists plans to depower all benders in

Republic City.
* The Legend of Korra and 4 episodes to do it. Unusually for this trope, Korra has to come back multiple times on different levels. First she has to physically remove the poison from her body, and then she has to emotionally confront the root of her trauma.
* The Legend of Korra and apparently gets shipped with Korra pretty often.
* The Legend of Korra and became a master, and twin metalbending boys who serve alongside their mother as her teammates.
* The Legend of Korra, and detracts from other elements. Of course, the story is about far more than the romantic subplots but this trope is definitely being brought up by a section of the fandom. Ironic since, despite its wide demographic audience, it's still a children's show.
* The Legend of Korra and is just as good on the inside as she is on the outside who becomes a core member of Team Avatar all the way to the end of the series.
* The Legend of Korra, and it's their powers - not mechanisms — that move the doors around. Most of the other doors in the series are traditionally hinged or manually slid doors.
* The Legend of Korra, and its urban vermin is no exception. Republic City in particular is home to lizard crows, scavenging creatures with the bodies of reptiles and the heads and wings of corvid birds, which are often seen rooting around the streets for scraps of food, as well as spider rats, household pests resembling rodents with spider legs,
* The Legend of Korra, and just having a few pebbles on hand is enough for him to create a buzzsaw out of lava.
* The Legend of Korra, and Kuvira is engaged to one of Suyin's biological sons. It's never specified if Suyin adopted Kuvira or not however it's implied she was raised alongside her family from a young age.
* The Legend of Korra and refuses to join the Equalist rebellion with him against Benders.
* The Legend of Korra, and tricks Korra into opening the portals so that Vaatu can break out during Harmonic Convergence.
* The Legend of Korra an Equalist trespassing into his booth, aiming a lightning-bending device at him at point-blank range and the wetting of his own pants.
* The Legend of Korra an example, as they fused with Vaatu's counterpart Raava, spirit of light.
* The Legend of Korra, a powerful dark spirit. Korra learns how to invert this trope, and turns the spirits back to normal.
* The Legend of Korra apparently feels that letters need to contain this.
* The Legend of Korra are actually loyal to her), though she still has some trouble establishing order and collecting taxes outside the boundaries of Ba Sing Se due to the unpopularity of many of her rulings. After Hou-Ting's assassination, Kuvira spends three years bringing order to her chaos-ravaged land under the orders of the United Republic of Nations, only to strike out and form her own despotic Earth Empire.
* The Legend of Korra are the main opposing team of the protagonist Fire Ferrets. The enemity is well earned as the Wolfbats cheat in the fight and it's implied they have done it before.
* The Legend of Korra as a femme fatale Equalist early in development but the writers liked her so much they made her a subversion instead.
* The Legend of Korra as a means of forcing Zaofu's surrender. When Su doesn't bite, Korra steps up to fight and fails; but then Ikki and Jinora interrupt a potential killing blow by Kuvira, which she then turns around and uses as an excuse to attack as it "violates their treaty" and takes Zaofu shortly afterwards.
* The Legend of Korra Asami Sato tends to disappear for a while and then reappear with no explanation, especially bad in the second season, though in the last two seasons, the number of episodes she was absent decreased.
* The Legend of Korra as one of Korra's trainers. She encourages Korra in her plan to run off to Republic City, helping set the series in motion.
* The Legend of Korra. As the investigation goes nowhere, they come to the

uncomfortable realization that Aiwei is one of the only people in the city who can keep a secret.
* The Legend of Korra. At first, the creators could not find a name for her, but when they were staying in an eco-lodge, the owner introduced them to his dog "Cora". They agreed on the name and changed it to "Korra", most likely to fit into the Water Tribe's tradition of having "K" somewhere in their name, so this trope might be a coincidence.
* The Legend of Korra, automobiles are largely referred to as "Satomobiles", even if they're not an actual Satomobile. "Satomobile" refers to a specific car brand started by Hiroshi Sato.
* The Legend of Korra, a website where people vote for who they think the 'biggest' fans are. Most of the top scorers are Big Name Fans.
* The Legend of Korra". A White Lotus guard does this right into the face of another when the pro-bending announcer on the radio reveals that Korra — whom they were supposed to be guarding — is playing in a match.
* The Legend of Korra, Baatar takes the role full-time. Of course, it's more or less clear Baatar is much better than Varrick, a fact the latter is loathe to put up with.
* The Legend of Korra begins every episode with a newsreel recap of the previous events.
* The Legend of Korra begins with the main character having to deal with a violent uprising of people who can't bend the elements, and so use technology, martial arts, and superior numbers to threaten the democratic government of Republic City. While these "Equalists" are essentially terrorists who simply turn oppression on benders, it is shown that non-benders have less economic opportunity and social clout than benders (all five people on the city council are part of the bending minority). Their cause is only further legitimized when the city council approves measures to cut off power to the non-bending ghetto and to arrest non-bending civilians without trials.
* The Legend of Korra bender, but the Avatar, "the living embodiment of the ability that had taken her mother".
* The Legend of Korra between Mako and Korra, but some in the audience got the impression that he hadn't actually broken up with Asami yet. (The writers may have intended a conversation that they had earlier to be a breakup, but if so, it was vague enough to cause confusion.)
* The Legend of Korra between saving the passengers or capturing the bad guys. Not surprisingly, she chooses the former.
* The Legend of Korra boasts the "I was old when the world was young" version to Wan during their fight:
* The Legend of Korra. Both however share a good sense of humor, lots of compassion for strangers, and a certain impulsiveness. They also learn different advanced bending forms. Aang learned tremorsense and lightning redirect, Korra learned metalbending, healing and spirit pacification.
* The Legend of Korra briefly showed "Cucumber-quats" (presumably a cucumber/kumquat hybrid).
* The Legend of Korra brings us Bolin. He's a big, bulky pro earthbender, but he is also a hopeless romantic who's open about his emotions.
* The Legend of Korra, Bumi aggressively pummels a dark spirit with a flurry of punches. After delivering it an uppercut, the spirit only makes an aggravated look at him, prompting Bumi to smile awkwardly at it while sweating profusely before it punches him back.
* The Legend of Korra, but are knocked unconscious when Kuvira rips said arm off and throws it across the city. Mako and Bolin are similarly knocked out when Mako overloads the power source, which causes the Colossus to explode. At that point, Korra is the only one left standing against Kuvira herself.
* The Legend of Korra, but they never manage to take control of more than a single city. There's little to suggest their ultimate goal was remotely plausible, given the lack of known appeal of their revolutionary ideology to foreigners, and the practical matter of their city-state being economically dwarfed by the rest of the

world.
* The Legend of Korra, but ultimately fails when trying to put it back in place.
* The Legend of Korra by an anarchist group causes chaos throughout the Earth Kingdom, causing it to divide into several impoverished states and harassed by bandits.
* The Legend of Korra by a protestor, then after his exasperated bodyguard Mako points out it was a strawberry pie he calms down a bit, then freaks out again because of his allergies.
* The Legend of Korra by smoke bombs. She not only manages to tail her quarries but manages to shock a couple into submission.
* The Legend of Korra. By the age of sixteen, she has already mastered three of the four elements-although airbending proves to be a rather significant hurdle for her to overcome.
* The Legend of Korra by the third book's finale, she loses. After she gets better and back into top form, she resolves to not let Republic City fall to Kuvira's conquest too.
* The Legend of Korra can find work powering the generators that supply electricity to Republic City. It's depicted as exhausting work akin to manual labor, but not life-threatening.
* The Legend of Korra. Complete with bounty hunters who are fans of Bolin's Nuktuk movie, a rather small inn room, and wanted posters.
* The Legend of Korra. Counting their more reliable allies (who vary from potent authority figures, to street thieves), you get something of a mess, which only gets messier as the stakes get higher in the later seasons and even former enemies start putting their weight behind the Avatar.
* The Legend of Korra cousins Desna and Eska are introduced, and since they look almost exactly alike except for make-up on Eska (the girl), Bolin assumes they are both girls.
* The Legend of Korra covers the attack as it happens, even when one of the Equalists enters his booth to silence him.
* The Legend of Korra critters are just as normal as the newly-invented car.
* The Legend of Korra, culminating in a final shot of Korra and Asami holding hands and gazing into each other's eyes as romantic music plays.
* The Legend of Korra describing it as "If Jazz was invented in China during the 20s."
* The Legend of Korra, despite some vague prodding at the possibility of romance, Asami and Korra both develop this sort of relationship with Bolin.
* The Legend of Korra does this quite a bit with Mako. Mako has a bad tendency, when caught in a lie or omission of truth, to try and shift the blame on another party. More often than not, he's called on it almost as soon as the lie comes out of his mouth.
* The Legend of Korra does this when she's using Metalbending to get dressed, to show that she is no longer affiliated with the police force.
* The Legend of Korra, during the time before the Avatar Cycle, the whole world was shown to be like this, except for the lion turtle cities. The lion turtles had to temporarily grant humans the power of the elements whenever they ventured outside, and even with that they often didn't return.
* The Legend of Korra episode "The Spirit of Competition" Korra and Bolin get into one on their date, much to the horror of the other patrons in the restaurant. Korra seems to come out on top.
* The Legend of Korra episode "The Sting", which is all about Mako investigating bombings at the Southern Water Tribe cultural center. Korra, last seen being eaten by a dark spirit, shows up for a few seconds at the very end.
* The Legend of Korra, Eska and Desna's waterbending comes off as this. Whereas their relatives tend to use fancy techniques like water sprouts, ice drills, huge waves and ice sculptures, those two stick to water streams and 'small' ice bolts to attack, and water-skating for high-speed movement.
* The Legend of Korra even points this specific incident out in a speech about the corruption in Republic City.

* The Legend of Korra. Fan excitement for the project led to Nickelodeon ordering an additional season before its premiere, followed by two more. Those three seasons would go on to have a more continuous plot regarding how greatly Korra's actions concerning the Spirit World would change the world.
* The Legend of Korra fans based on some of his character Mako's actions/choices.
* The Legend of Korra features a love triangle between Korra, Asami, and their mutual love interest Mako. Both girls date, and later break up with him at different points in the show. The series finale ends with Korra and Asami becoming a couple.
* The Legend of Korra, firebending does turn out to have one incredibly useful peaceful function; electricity generation. Republic City employs hundreds of fire-benders to lightning bend, powering the city. We also discover that it can be used to "read" a person's chi, and discover sources of illness.
* The Legend of Korra, Fire Lord Zuko, Iroh's nephew, is keeping the tradition alive. Despite the fact that he’s 88 when he first shows up and a grandfather of two, he's an incredibly powerful bender, and shows no hesitation in hunting down the Red Lotus (Season 3's villains), mostly by himself. He was part of the group that saved Korra from them as a kid, despite the fact that he have been 75 or so at that point. Oh, and he rides a dragon.
* The Legend of Korra fly. Asami at least had six months to become an ace.
* The Legend of Korra: Following in its predecessor's footsteps, the comics explore the immediate aftermath of the show's fourth season. Namely the issue of the new spirit portal in the middle of Republic City and the remnants of the Earth Nation army still making a bid for power in Kuvira's absence.
* The Legend of Korra, follows the tradition but alters the execution:
* The Legend of Korra for carrying officers into dangerous situations.
* The Legend of Korra for season 1, looming over Korra, Mako, and Bolin.
* The Legend of Korra Fortunately, she recovers in the following seasons to both do more and have more to do.
* The Legend of Korra from the moment he meets her, but she's interested in his standoffish brother Mako, who becomes more cordial with her as he gets to know her.
* The Legend of Korra game focuses heavily on Korra, to the point that you barely see anyone else from the cast. Mako and Bolin only get a short cutscene appearance both in the beginning and end of the game. Asami is not given even that, making her the only one of the main cast to remain completely absent.
* The Legend of Korra gets hit in the chest by a pie and thinks that he's bleeding to death. Mako has to assure him that it's a pie, not blood.
* The Legend of Korra gives us Korra/Amon. Amon is a creepy mind rapist who's able to reduce the normally badass Korra to tears through psychological torture.
* The Legend of Korra grew up in an isolated compound (located in the South Pole) populated only by guards and teachers. Her only friend before arriving at Republic City was her polar bear dog.
* The Legend of Korra has already proven to be horrible when it comes to excuses. Her explanation for leaving in episode 7 takes the cake, though;
* The Legend of Korra has a mostly self-contained plot in Book 1, which was originally going to be the entirety of the series, but Books 2, 3 and 4 form a two-part trilogy, with the events of Book 2 being more standalone but creating the situation for the more inter-linked Books 3 and 4, which focus on the conflict against the Red Lotus Society and the fascist regime they inadvertently cause, set in a changing world that possibly may not need the Avatar anymore.
* The Legend of Korra has a somewhat chilling example for a kids' show with the "Fog of Lost Souls'', which eternally imprisons its victims in their most traumatic memories.
* The Legend of Korra has ever since been a human altered by Raava's essence.
* The Legend of Korra has Kuvira give a short one to Korra when calls out for her tyrannical behavior as ruler of the Earth Empire.
* The Legend of Korra has one in "The Guide". The adult and child halves of Tenzin's family each peep in on opposite sides of a doorway.
* The Legend of Korra has proven capable of hijacking the radio airwaves to spread

his propaganda and ultimatums.
* The Legend of Korra has The Red Lotus, which has been around for 70 years, who advocate complete anarchy, and seek to eliminate governments, the Order of The White Lotus, and finally the Avatar herself. Their evil ranges from criminal acts, terrorist acts, and plots to assassinate political leaders, all to accomplish their goals.
* The Legend of Korra has the sports announcer discussing everything going on in the Pro-Bender arena. Then the Equalists invade and he continues narrating the events. "One of the masked men has currently broken into this booth and is about to electrocute me. I am currently wetting my pants" in the same announcer's voice without emotion.
* The Legend of Korra has Vaatu's return, which although occurring every ten thousand years, is treated as such.
* The Legend of Korra. He becomes uncoordinated, sullen and the next day is clearly hungover.
* The Legend of Korra He explains that since his company had built the prison, he designed the cell for himself— expecting to need it one day.
* The Legend of Korra her rather poorly. Apparently, Prince Wu was the only one who actually thought Korra should have been invited.
* The Legend of Korra, he tries to quit. But Kuvira forces him to keep working on pain of death, and imprisons him in his lab when he tries to escape.
* The Legend of Korra, his namesake's great-great-nephew. He manages to burn through the Equalist forces while the rest of his army gets decimated.
* The Legend of Korra, however, subverting this trope, since they believed he would help restore balance to the world, and not destroy it as he intended.
* The Legend of Korra in an Earth Kingdom slum while bitterly denying her identity as the Avatar. The next episode covers her attempt to recover from her injuries and PTSD received in Season 3 before she ran away and ended up where she was in the premier.
* The Legend of Korra includes the wedding of Varrick and Zhu Li as its penultimate scene.
* The Legend of Korra in his Revelation speech. Subliminal messages tie in perfectly with his character.
* The Legend of Korra in production to one of the main characters, as keeping her in the former role would mean that she'd have no place in the show once her status as such was revealed.
* The Legend of Korra: In Season 2 Eska's reaction to Bolin's break-up shows her true possessive and horrifying nature.
* The Legend of Korra in Season 4. Kuvira is exceptionally fast and agile, able to dodge most attacks and strike back before her opponent can go on the defensive. However, she lacks Korra's stamina and fights between the two tend to even out rather quickly whenever Korra lands a solid blow. She's also notably vulnerable against air attacks, which are harder for her to anticipate or sidestep.
* The Legend of Korra: In the episode "Skeletons In the Closet", Bolin uses a telescope backwards before quickly correcting himself.
* The Legend of Korra, in the series. Unlike most examples, she is quite short.
* The Legend of Korra: In the two-parter "Beginnings", we learn about the light and darkness spirits Raava and Vaatu and their conflict with each other. If either of them wins against the other on the day of harmonic convergence, there will be a 10,000 year age of light or darkness. However, if either of them gets contained, then there won't be another battle and either light or darkness will endure indefinitely until they are freed.
* The Legend of Korra in the world of Avatar, as well as negotiator to prevent future conflicts between the Fire Nation, Earth Kingdom, the Water Tribes and the (slowly resurgent) Air Nomads.
* The Legend of Korra in Zaofu collect various chunks of meteorite. Said chunks of "Space Earth" are incredibly easy to bend (almost as fluidly as water), even for the most novice of metalbenders.
* The Legend of Korra is a Concerned Corey in the episode "Peacekeepers", ratting

Korra out to the President to prevent her from doing something completely irrational and escalating the Water Tribe's civil war.
* The Legend of Korra is licking Korra's face over and over. Her friendliness extends to licking a police attendant's hair. She's also so big that multiple characters can ride on her back at once.
* The Legend of Korra, is proficient in three elements (all four since the Book 1 finale) but lacking access to advanced and specialized techniques like metalbending, bloodbending, or lightning generation. This seems to be par the course for Avatars in general; they're expected to master all the elements, but they have a lifetime in which to do it, meaning they take some time to reach mastery of all of them.
* The Legend of Korra is that there are no bathrooms in Republic City, and the citizens somehow don't need to use them.
* The Legend of Korra is that Zuko’s marital status has never been confirmed one way or the other. He has a daughter and two grandkids, implying he’s been married at one point, but it’s unclear to whom he is/was married or if he’s widowed as well.
* The Legend of Korra is the only character to have dyed hair—specifically, it's dyed a bright red.
* The Legend of Korra is this compared to the previous series, with characters now having more realistic, more human proportions.
* The Legend of Korra. It appears that Bolin is so focused on stopping Kuvira that he is not allowing himself to think about how he messed up by trusting her, but he is upset when he meets the innocent people Kuvira is interning in her camps, realizing that he has had a part (albeit unwittingly) in ruining their lives.
* The Legend of Korra, it is revealed that instead of dying an ordinary death and reincarnating, Iroh voluntarily left his physical body behind and entered the spirit world.
* The Legend of Korra It's about three thousand times more awesome than it sounds.
* The Legend of Korra: It's implied that this happened to Bumi. While walking around the fog with his siblings, he started having flashbacks of this event. Even though his siblings believed that his stories were fabricated, it's pretty clear that this one really did happen.
* The Legend of Korra, it turns out that the city hides a dark underbelly of crime and poverty. In particular, the night fight scenes in the streets take cues from this trope.
* The Legend of Korra jumps on the board and scrambles all of the pieces.
* The Legend of Korra. Just about any woman he stands next to looks tiny in comparison.
* The Legend of Korra: Kai and Jinora start off as this. They're 12-year-olds when they first meet. After a timeskip they're a little older but still together.
* The Legend of Korra, Kai is brushed off despite just having saved Tenzin and three-quarters of Team Avatar, though he stubbornly keeps trying despite several interruptions and brush-offs. When he's gotten to say his piece Mako chastises him for not saying this earlier, to Kai's irritation.
* The Legend of Korra, Korra and the heroes are declared enemies of the state by the Earth Kingdom after rescuing airbenders the Dai Li have been kidnapping. Zaofu is the only place in the Earth Kingdom that doesn't have it out for them.
* The Legend of Korra: Korra becomes an All-Loving Hero with time, learning to empathize with even her enemies.
* The Legend of Korra, Korra creates a wall of ice to get rid of some pursuing cops. One who was grappling on to her and being dragged along slams right into it and slides down.
* The Legend of Korra: Korra gets her own glowing eyes in the Season 1 finale, when she too goes into the Avatar State for the first time. It's every bit as awesome as ever.
* The Legend of Korra Korra makes this pose while attempting to airbend a newspaper, while shouting "Airbend!"
* The Legend of Korra, Korra uses the Avatar State to punch a hole in the Northern

Tribe's blockade of the Southern Tribe's harbor, enabling Varrick's boat to race through before the astonished Northern sailors can collect themselves.
* The Legend of Korra: Kuvira, formerly of Zaofu, leads a military unit that forces every state in the splintered Earth Kingdom into submission, ostensibly so Prince Wu, the legal heir to the throne, can take over the newly reunited land. Instead, at his coronation, she declares herself leader of the new Earth Empire.
* The Legend of Korra, Kuvira of Book 4 is known as "The Great Uniter" due to her conquest of the fractured Earth Kingdom.
* The Legend of Korra: Lampshaded and subverted by Toph. She's the greatest earthbender in the world, but she's also 80-plus and her back is killing her. Sometimes you just gotta let the kids win the war. This is also the reason Katara never showed up for the Water Tribe Civil War.
* The Legend of Korra, leaving them unable to truly reconnect and make amends.
* The Legend of Korra Lin Beifong suddenly makes a flicking motion as a zipping sound is heard. She then tersely explains to Bolin that his fly was down.
* The Legend of Korra: Lin uses "flameo" at one point, a term heavily implied to be an F-bomb alternative.
* The Legend of Korra, Mako and Bolin are actual brothers, and hand out asskicking like a pro team. They've graduated to this status in Books 3 and 4, since they hardly spent time with each other in previous books.
* The Legend of Korra", Mako and Korra fall asleep this way while staking out Republic City Park, and wake up with hasty awkwardness when they realize the position they're in.
* The Legend of Korra, Mako does this in his head, and has to spell it out for Tahno when they realize the man they're looking for may be nearby.
* The Legend of Korra", Mako is sleeping on a cot under his desk at the police station. When his phone ringing suddenly wakes him up, he naturally bumps his head underneath the desk.
* The Legend of Korra, Mako is Team Avatar's resident detective, constantly finding clues in the environment and suspicious patterns in peoples' behavior in order to lead his friends to the truth when things seem out of place. In fact, Chief Beifong of Republic City is sufficiently impressed with his perception to hire him as an officer, and he rather quickly rises to the position of an official detective thanks to his abilities.
* The Legend of Korra may perhaps be the most continuity-heavy cartoon to date. Barring the first season, each season directly leads into the next, with the resulting fallout shaping the events of each. Although the villains and arcs they generate were separate, the characters and global politics constantly changed. By Season 3, it'd more or less become an adult drama that just so happened to be in animated form.
* The Legend of Korra metropolises with the Asian aesthetics accentuated. The soundtrack has been described as "1920s New Orleans jazz but if it were invented in China".
* The Legend of Korra: Ming-Hua can do this entirely with her waterbending: cutting a circular hole in the glass with the tip of a cutter made of ice, and using her watery arm as the suction cup.
* The Legend of Korra Motor Mouth spiel of questions which she manages to answer perfectly with pin-point accuracy.
* The Legend of Korra movement, but even then breaking the stale genre conventions wasn't ever the point — which leads us back to defining its genre by its relation to the original series.
* The Legend of Korra nature, the second season was moved to Friday night from Saturday morning despite the show being targeted at teens/ young adults. Its ratings tanked after the move but it continued to do well on Nick's website and other digital platforms. Eventually, it was outright pulled from the live schedule and moved online but whether or not it was due to the ratings or the content (the second episode shown exclusively online had a brutal, unambiguous murder by asphyxiation on-screen) isn’t definitively known even though Nick said they had always planned to do it.

* The Legend of Korra of this trope. Korra and her friends travel through the Earth Kingdom in order to recruit the new airbenders, with Tenzin trying to convince them to join him in rebuilding the Air Nation, but he completely sucks at selling it. For example, he tells the mother of a young airbender that his son will get tattoos all over his body like Tenzin, tells a fat man eating a turkey leg about the airbenders' vegetarian diet, a woman wearing very elegant and expensive-looking clothes about having to wear monk robes, and other unseen airbenders about other "perks" of the Air Nomads such as shaving your head, giving up all your worldly possessions or having a bison as your best friend.
* The Legend of Korra on hand, just so he can say something cool whenever he captures a criminal at his job as a cop.
* The Legend of Korra. People also argue over whether or not the Lieutenant died, which is pretty ambiguous at the moment.
* The Legend of Korra: Played with in Book 2. After finding out Eska is insane, Bolin asks Korra why she didn't warn him that Eska "has the power to reach into my heart and crush my soul with her bare hands". Korra tells him she thought it was obvious.
* The Legend of Korra, Prince Wu does this in the second to last episode, distracting a trio of Earth Empire soldiers with songs containing hidden messages to a pair of badgermoles, ordering them to attack.
* The Legend of Korra restraining her and looks like he's about to take her bending away and... doesn't. However, he justifies it and only comes across as even smarter because of it. He needs support for his plan to succeed and this early in the game, taking her bending away would only turn her into a martyr banding everyone not already on his side against him.
* The Legend of Korra, rewatching the show now makes their slow-burn relationship and its development quite heartwarming to watch.
* The Legend of Korra rolls around, the fan club has transformed into the Air Acolytes, a group of non-bender people who live by the ways of the Air Nomads, making them just as much a part of the nation as Aang's airbender son and grandchildren are.
* The Legend of Korra: Ruins of the Empire (main romance is between two bisexual women)
* The Legend of Korra: Season 3 really ramps up the disturbing deaths.
* The Legend of Korra segments are done in the style of old movies, complete with a grainy sepia effect and an overly-excited announcer.
* The Legend of Korra, seven-year-old Ikki sees nothing wrong with letting Asami know that her friend Korra is in love with her boyfriend.
* The Legend of Korra, she begins to learn to cooperate and work with the police, rather than just blindly charging in on her own. More often than not though, the police and government are willing to let Korra deal with the situation as she sees fit.
* The Legend of Korra. She cares nothing for Korra's Avatar status, especially since the first thing Korra did in the city was smash up a street, and even less so when she tries to relate to her by way of Toph being her previous incarnation's mentor (Lin... doesn't get along with the rest of her family).
* The Legend of Korra she had to stay in for most of her life, then things would've been different.
* The Legend of Korra, she immediately decides to participate in the fight against the villains.
* The Legend of Korra, she kicks over his desk with airbending... in the middle of the police station where he worked.
* The Legend of Korra. She's healed in the season finale, and back at her post by Book II.
* The Legend of Korra. She tells them that they could join her or hope that someone finds them in the middle of nowhere and rescues them before another train comes. They join her.
* The Legend of Korra: Shiro Shinobi, the announcer, was one before he took his announcing job.

* The Legend of Korra: Shortly after Korra of the Southern Water Tribe was discovered to be the next Avatar, a kidnapping attempt was made on her by a terrorist group called the "Red Lotus." After eventually confronting Zaheer (the group's leader) and having a talk with him, Zaheer explains why he and his comrades wanted to kidnap her—however, Korra ultimately points out to Zaheer that his group's plan pretty much only amounts to kidnapping and brainwashing a little kid.
* The Legend of Korra short period of time where she pretended to side with him if only to get the upper hand. In the end, she was as genuine as she seemed to be.
* The Legend of Korra. Similar to actual nukes, Varrick's original goal was to create a source of unlimited clean energy.
* The Legend of Korra since he was ten, that he was raised by an older sister, and that he and Ming-Hua are mutually attracted to each other. They share a look, then Gazan tells Bolin he got two out of three right. We never find out which.
* The Legend of Korra, staging thefts of shipments in order to drive Future Industries into bankruptcy so he can buy a controlling interest and taking advantage of the Water Tribe Civil War to expand his business.
* The Legend of Korra stars Korra, a borderline example as she's seventeen at the start. However, sometimes she doesn't even act her age.
* The Legend of Korra starts off with the Northern Water Tribe imposing martial law on the Southern Water Tribe. Considering that the Southern Water Tribe does not recognize Northern leadership and has been allowed to self-govern for almost a century or even longer, this predictably resulted in an insurgency.
* The Legend of Korra striking different poses, and says that movies should have "romance."
* The Legend of Korra. Tenzin also tells Korra that she needs to learn things from her enemies.
* The Legend of Korra: Tenzin disdains pro-bending as a mockery of the noble history of bending. Until he sees that it works to teach airbending basics to Korra where he has been unsuccessful, and further, that it helps her team win the match. At which point he is swept up in the excitement of the jubilant crowd and cheers himself! Before collecting himself...and then going on to become an actual fan of the sport!
* The Legend of Korra than either fans of the show or people in that world would have guessed when Varrick first started making these films, not that Varrick knew about that or would have cared.
* The Legend of Korra that details the origins of the first Avatar, the art style takes on a look and feel reminiscent of the paintings of feudal Japan, with watercolor backgrounds, lots of swirls in things like fire and dust, and a pale tint.
* The Legend of Korra that Tenzin was often beaten up by his older siblings as a child. It's implied this is because they were jealous of him being their father's favorite kid (being the only Airbender), and even as adults, their relationship is less-than-perfect.
* The Legend of Korra: The first episode has Korra take a few thugs down. Saihkan and the other officers arrest them and order her arrest. Come back from commercial sees him laying out the charges, and Officer Song giving chase.
* The Legend of Korra, the four active members of the Red Lotus are described as undefeatable, with no single person having a chance of defeating any of them individually, much less the four of them together. However, Tenzin actually comes close to proving this wrong in his one-on-one battle with their leader Zaheer, as he seems to have the upper hand thanks to his years of experience and mastery bending air outmatching Zaheer's skilled but inexperienced style, but Zaheer's reinforcements show up before the battle is over.
* The Legend of Korra The goal of the films are to get the public to side with the Southern Tribe so that president Raiko would send his forces to help them win the civil war (but in actuality, it's part of a greater plan for Varrick to create an even bigger war he can profit from).
* The Legend of Korra, the Great Spirits of Light and Darkness, Raava and Vaatu, are both truly immortal. Even if one were to be physically destroyed, they would

regenerate within their counterpart and emerge once more ten thousand years later. They fight an everlasting battle for dominance over the world, Raava for Light and Order, Vaatu for Darkness and Chaos.
* The Legend of Korra. The impact actually sends him flying head over heels.
* The Legend of Korra. (The judge is corrupt, and so kind of deserves it, but she doesn't know that, at least not at first. And it does not make her look very good to the courtroom audience any which way.)
* The Legend of Korra: The Korra/Mako/Asami love triangle was widely criticized as bogging down season 2 with unnecessary romantic drama. The producers responded to this criticism by excising the love triangle entirely from later seasons and even mocking it in one episode where Mako admits how pointlessly messy his past romances with Korra and Asami were.
* The Legend of Korra, the Krew has a battle on a moving train in order to rescue Prince Wu.
* The Legend of Korra: The metalbending police of Republic City use metallic whips as their primary weapon. Chief Lin Beifong, as the daughter of Toph (who created this technique), is particularly skilled with them.
* The Legend of Korra. The only thing you see is a big cloud of smoke, and the only thing you hear is a big bang from the explosion.
* The Legend of Korra. The owner of the underground fighting ring seems to recognize Korra as the Avatar, but she denies it.
* The Legend of Korra", the pro-bending announcer decides that the sight of Bolin throwing up a large quantity of noodles creates the perfect opportunity to advertise Flameo Noodles.
* The Legend of Korra, there's Commander Bumi of the United Forces, Tenzin's brother.
* The Legend of Korra there's Naga, Korra's Polar Bear-Dog, a beast the size of a polar bear with mostly the personality and appearance of a very large dog, who can carry three people at one with reasonable speed.
* The Legend of Korra the rules of Airbender etiquette, so he reluctantly allows Tarrlok to stay (much to the chagrin of his wife).
* The Legend of Korra, the Spirit of Light and Peace. He spent the rest of his life (and that of his many reincarnations) trying to fix that mistake.
* The Legend of Korra, the Spirit Vines, which comes from the Spirit World, can be used as a new energy source. Kuvira mostly uses them to power her weapons.
* The Legend of Korra, the stoicism is never around for long. In particular, despite earlier deriding pro-bending as a "mockery of the noble tradition of bending", he later caves in and becomes a closeted fan himself.
* The Legend of Korra, the title character herself has some pride issues as well. Having humility forced on her happens a lot throughout the show.
* The Legend of Korra, the warrior class appears to have been abolished in favor of a professional army.
* The Legend of Korra, the White Falls Wolfbats are a pro-bending team who have a flashy, pyrotechnics-heavy entrance; blatantly cheat; and use banned moves like headshots and mixing rock into water.
* The Legend of Korra, they acknowledge that they were surprised by their feelings at first, but ultimately happy.
* The Legend of Korra, they don't move like they used to anymore due to age, injuries, and what have you, although they do teach and heal where they can. Case in point, after the first real fight she's had in quite some time, Toph mentions that her back was just about to give.
* The Legend of Korra they kept her in a compound in the first place: the Red Lotus, a splinter faction of the White Lotus wanted to kidnap and raise her for their own ends.
* The Legend of Korra this applies to Bolin. He goes from pro-bender, to mover star, to soldier, to police officer, to aide to the president, before leaving that last positon for yet another adventure with Korra. His brother Mako points this out, and Bolin recognizes this fact but goes anyway.
* The Legend of Korra: This happens between Mako and Korra while she's recovering

from being kidnapped by Amon. One morning, you see him sitting by her bedside while she's resting and place his hand over hers. It's not treated as an "aww, look at how cute she looks" thing in the show (as he seems rather troubled while doing it). He was more likely thinking about all the danger she had been in and trying to receive some comfort from her presence. Later on, we find out that that whole worrying experience had made him realize he loved her, so he was likely going through that as well.
* The Legend of Korra. This would put her in her early 20s like Mako, giving credence to the idea of him being in his mid-20s.
* The Legend of Korra, though one could possibly assume she was a manifestation of Korra's confidence issues that she needed to overcome.
* The Legend of Korra to bend was granted by lion turtles before every spirit departed the world when the Spirit World and human world were cut off from each other.
* The Legend of Korra to come with him. The latter doesn't want to leave his mom despite his father's cruelty.
* The Legend of Korra to forcefully conscript air benders(i.e: kidnap) for her army.
* The Legend of Korra) to have eaten her father's pet bear Bosco, she may just hate pets in general.
* The Legend of Korra to her at seventeen in a training duel against three firebenders, clearly having mastered firebending.
* The Legend of Korra to Mako after he accuses her of dating Bolin just to annoy him. Then she kisses him and he seems pretty into it... until they see Bolin holding a bouquet which was clearly meant for Korra and bawling his eyes out. Not that that kiss was going to end well anyway.
* The Legend of Korra to never participate in a fight. The latter is a bender to boot.
* The Legend of Korra, Tonraq and other South Tribe men are being put on trial for possible rebel activity. When they are found guilty, Bolin interrupts the judge's sentencing with an "Objection!", only to shrink back in his seat when the judge barks at him to sit down.
* The Legend of Korra too, but the difference in capabilities between magitek and normal tech has, at this point, been largely diminished.
* The Legend of Korra: Toph's daughter Lin gets one in "Out of the Past", metalbending her armor onto herself from across the room. Tony Stark would be impressed.
* The Legend of Korra: Toph ultimately loved her daughters and considered them a blessing, but gave them far too much freedom (a result of own parents' over-protective and restrictive ways), wouldn't tell either about their respective fathers, and was frequently busy as the chief of police.
* The Legend of Korra to read out some "Comedy Amon" jokes at a convention.
* The Legend of Korra Truly, these episodes were crafted by people who truly love and care for the franchise.
* The Legend of Korra: Turf Wars: Jargala. Leader of the Creeping Crystal Triad? Check. Fearless even on the brink of defeat? Check. She'll fit right in.
* The Legend of Korra: Turf Wars, Korra fully confesses her feelings to Asami.
* The Legend of Korra: Turf Wars (the main character is a bisexual woman, there is a queer female romance subplot between her and supporting character who is also a bisexual woman)
* The Legend of Korra two are correct, but given their glances, it would seem the first two are correct.
* The Legend of Korra uses the "Spirit of Competition", between Mako, Bolin and Korra when Mako tries to build up confidence for the upcoming tournament.
* The Legend of Korra using Varrick's phrase "Do the thing" against him when he gets arrested.
* The Legend of Korra, Vaatu fires purple laser beams in Season 2. In Season 4, harnessing the vast amounts of energy contained within the spirit vines causes a purple glow.

* The Legend of Korra Vaatu is this trope in the second book. Zaheer averts it, he is a regular sized man but Ghazan and especially P'li do fit this trope, since they are taller than him.
* The Legend of Korra, Varrick tries to get back on the heroes' good side after his arrest by bringing up all the good things he's done for them. He lists warning Korra about Unalaq, getting Bolin into the movers, saving Asami's company, and getting Mako thrown in jail. A moment later, he acknowledges that the last one was more of a bad thing.
* The Legend of Korra vlogs, he calls Kuvira "Princess Zelda", "Zelda", or in one case, "Princess Hitler".
* The Legend of Korra Wan Shi Tong is reliant on his fox aides to gather knowledge of the human world, who somehow came to the idea that the radio was operated by tiny men inside machines. When he realizes his mistake, he gives a stern glare at one of his foxes, who bows its head in shame.
* The Legend of Korra was arrested for being a getaway driver for one of the gangs, she quickly destroyed the police report and covered it up. This led to a rift developing between Suyin and her sister Lin (who was the one who arrested her in the first place).
* The Legend of Korra was over. Technically he was correct, since Raava and Wan merge to form the original Avatar, and thus beginning the Era of the Avatar.
* The Legend of Korra was the only one to initially receive a French dub. A fandub project was later started, which received support from Janet Varney (Korra's original VA), and discussions took place with Viacom to let it become the official French dub. Said project was eventually scrapped when the rest of the series finally received an official dub courtesy of France 4, with all previous comedians reprising their roles, five whole years after the original broadcasting of the first book.
* The Legend of Korra waterbenders raiding an anti-bending hideout brings along a water tank.
* The Legend of Korra, waving Tenzin's arms around as if he was still awake.
* The Legend of Korra, we learn of Harmonic Convergence, where the alignment of the solar system every 1000 years causes the spirit portals on the opposite poles of the world to merge and greatly amplify the world's spiritual energy, marking a cyclical event where Raava and Vaatu must fight to determine the fate of the world.
* The Legend of Korra. What's more impressive; that the creators bothered to put such a small detail in, or that the fanbase managed to catch it?
* The Legend of Korra when he leads the trainees to defeat some poachers. Basically, when the universe isn't conspiring to make him lose his dignity, Tenzin is a full-time so-proud-of-you engine.
* The Legend of Korra when Opal decides she wants to go to the Air Temple to train as an airbender, her farewell dinner consists of her favorite meal: raw kale in veggie wraps.
* The Legend of Korra, when the bender animating the walking dead men is rendered unconscious, their animation fails and they fall like dominos. Naturally, this is incorporated into the defense of Republic City in the final chapters.
* The Legend of Korra when the opportunity to do so presented itself. She’s also excited to get Toph’s grandsons, Wei and Wing, to teach her how to play their metalbending game when she learns how to do it.
* The Legend of Korra, when Zaheer murders the Earth Queen, it seems that all of her citizens celebrate and no one mourns her untimely death...except for Mako and Bolin's grandma and the Queen's great-nephew, more because of the brutal nature of her death. The rest of the world was afraid of the implications this has for their home nations.
* The Legend of Korra, where Bolin (half-Fire Nation, half-Earth Kingdom) plays "Nuktuk, Hero of the South(ern Water Tribe)". A important note here is that both Water Tribes are by far the darkest skinned of the peoples in the Avaverse and Bolin and his co-star Ginger are both fair skinned.
* The Legend of Korra, where Korra, Asami, and a group of Earth Nation soldiers escape from the desert (and the giant burrowing land shark that tried to eat them)

and find themselves at a town. One of them notices a... unique mount tied up outside the city.
* The Legend of Korra, which are equally useful in snaring crooks as they are in swinging from building to building.
* The Legend of Korra, which is a common fashion statement for firebenders in Republic City, but he is unusually attached to it. When he goes to an upscale restaurant with Asami Sato, he wears it with his tuxedo. Later on, she buys him a silk scarf, which he does not wear, so she asks why. Mako tells Asami that the scarf is all he has left of his murdered father. Later, Mako gives the scarf to his paternal grandmother, Yin.
* The Legend of Korra, which is why, in a best of three rounds format, the third round is always played. It's the only way left to win for a team down two rounds.
* The Legend of Korra, who corrupts other spirits into becoming dark spirits and serve him. While humans aren't ostensibly corrupted, giving in to negative emotions like anger is to be overwhelmed by darkness.
* The Legend of Korra, who has has remained strong, kind, and supportive despite multiple betrayals and disappointments and a lot of loss.
* The Legend of Korra whose powers depend on martial and spiritual perfection.
* The Legend of Korra, with even the divisive first two seasons seen as fantastic in their own right.
* The Legend of Korra, with humans isolated on Lion Turtle cities to avoid the attention of uncaring if not downright alien spirit creatures. This all changes when the personification of Order merged with a human, creating a mediator that would bring balance to both worlds.
* The Legend of Korra with one girl — Asami Sato — who has a last name and one — Korra — who doesn't, fan fics were quick to adopt the practice of having Korra take the name "Korra Sato," whether depicting the two as married or not.
* The Legend of Korra with this machine, which she said works like a "Future Industries forklift".
* The Legend of Korra with whom she formed a more functional relationship.
* The Legend of Korra, Zaheer delivers one of these to his guards about his idol Guru Laghima and his philosophy. As soon as the guards ask what does it mean, he tells them that they have blinded themselves to the possibility of a new reality, and reveals his newly found airbending. He uses the airbending escape his cell and lock the very guards back into his cell, before taunting them, and leaving them to starve to death.
* The Legend of Korra: Zaheer gets an amazing one just before he murders the Earth Queen.
* The Legend of Korra, Zaheer is generally established as a massive threat, even before getting his airbending. The third season finale shows him flying away for his life from an enraged Avatar Korra.
* The Legend of Kyrandia bushes growing at strategic points. The Fireberries themselves emit light, and warmth from Brandon's hand causes the berries to decay and lose their glow over the maximum of three screen transitions; if he drops them on the cold floor, the decay stops and the glow remains constant. So Brandon must explore the Grotto by dropping Fireberries on the floor to light up otherwise pitch-black rooms, then come back for more. Get caught in a room with no bush and no berries, and the results are predictably unpleasant.
* The Legend of Kyrandia, but all we get to see is him twitching his finger.
* The Legend of Kyrandia, causing his owner to pursue him through the fields. He is later seen relaxing at the pirate bar, at least until a fight breaks out.
* The Legend of Kyrandia game, Malcolm can be sent to prison to perform menial labor: first making doilies, then chipping stone, and then chain-ganged into trimming hedges or rowing a boat. The player can either perform the labor and earn Malcolm's parole, or perform an inventive prison break, such as by flinging the pile of boulders to their target rather than ferrying a few chips at a time.
* The Legend of Kyrandia has what is presumably a parody of this: laughter will often occur after Malcolm's comments, regardless of whether they are intended to be

funny. Thankfully, it can be disabled in the options menu.
* The Legend of Kyrandia, the protagonist Malcolm is summoned by the Fish Queen for a game of Tic-Tac-Toe. Despite her enthusiasm for the game, she is exceptionally bad at it, and will always demand a rematch if Malcolm wins. Thus, you have to go out of your way to lose.
* The Legend of Link's Distractions and what happens when Links busy doing them in real time.
* The Legend of Lobo who speaks is Rex Allen as the narrator, explaining to us what the cast is thinking and what their individual personalities are. While this is understandable due to most of the cast being animals, there are also two human cattlemen who serve as the villains of the move, and they don't make so much as a peep either.
* The Legend of Lucy, although multiple characters have pointed out her actions are more akin to that of a vigilante.
* The Legend of Lucy hid her career as a bounty hunter from her friend Glenda because of this and thought she would want to break off their friendship after being kidnapped and attacked, but Glenda was all too happy to have the excitement in her life.
* The Legend of Lylah Clare, and that movie's world could easily fit into this one.)
* The Legend of Maian, most of the Regis Knights, immortal super warriors who can't die till their -also immortal-master dies.
* The Legend of Maxx, the main character Maxx is said to be either the destroyer of everything or a bowl of two goldfish by Remiel due to in-comic translation issues with the prophecies regarding Maxx. Remiel frequently repeats this possibility whenever it's mentioned that he could destroy the world in a vain attempt at hope.
* The Legend of Mother Sarah: A strong and determined woman travels a post-apocalyptic wasteland, searching for her lost children in the midst of a catastrophic war. Despite the theme of family it is basically a Heroic epic focused on Sarah.
* The Legend of Mother Sarah both factions propose in regards to what to do with Earth's future.
* The Legend of Mother Sarah features one of the earliest representations of this trope in Japanese media, featuring a tall, athletic and imposing woman as the main character. Despite her unusual build and seldom displaying her body, many of the men she comes across in the series ogle her (like her co-prisoners in the work camps) or openly state that they find her very attractive.
* The Legend of Mother Sarah, she's often able to come out on top by herself when she's being attacked.
* The Legend of Mother Sarah, towers over or is just as tall as most men she runs into and often gets in trouble either for being an attractive female or because she likes to right the wrongs in the places she visits.
* The Legend of Mother Sarah woman trying to retrieve her lost children and who will stop at nothing to do so, including brawling and using guns. It helps that she's an unusually tall and jacked woman.
* The legend of Mulan), in novels, several Chinese-produced films, and even on television.
* The Legend of Neil a magic inventory, and is simply carrying his ever-growing list of items awkwardly around with him and trying not to drop anything. Luckily, since he's in a video-game, someone eventually explains to him that he has a special inventory in which he can store everything he carries with him... unfortunately, the first time he tries to use it in battle, he realizes he doesn't know how to control what item comes out. He hasn't accessed his inventory since (it's only been a few episodes since he learned), so there's no way of telling if he's figured it out or will need further instruction.
* The Legend of Neil enough to catch all of Ganon's mistakes, but unfortunately Ganon doesn't listen to a word he says.
* The Legend Of Neil, Ganon either will punish Wizzrobe by hitting him, or by turning the fog machines on. Guess which one he hates more:

* The Legend of Neil: Neil does this in the episode "Gettin' High in Hyrule" by pointing and shouting "I'm distracting you!"
* The Legend of Neil the fairy, when asked to sing with him by another fairy comments "I don't like online musicals''
* The Legend of Neil. Wizzrobe lures Neil into the first dungeon full of relatively weak monsters, but wonders why he didn't lead him instead to dungeon 7, which is where Ganon's strongest minions dwell.
* The Legend Of Nightfall, Nightfall is charged with "forty-seven acts of grand theft, nineteen murders, two counts of treason, one assault, and more than eight hundred and fifty misdemeanors. And that’s just in Alyndar."
* The Legend of Ogrest also has such a trap; for some reason, Ogrest ends up riding atop the boulder while the Ecaflip pirates are running from it.
* The Legend of Ogrest leads to a crash against a stone pillar, and then a boat.
* The Legend of Phoenix Mountain has the main character's grandfather, who fell in love with the main character's grandmother after she slammed her fist into his right eye.
* The Legend of Prince Valiant a guy who wanted to murder them. She does ask the boys to help her out of a hole she had gotten stuck in.
* The Legend of Rah and the Muggles for children 6 to 12. However, most of the story is of Teletubbies-like hijinks that most kids this age would find horrifyingly boring. After being horrified by the prologue and backstory notes, which gives a frankly terrifying post-nuclear fallout apocalypse scenario with descriptions of political corruption, escalations into outright warfare, biological and nuclear weapons and eugenics. Yes, eugenics; our sweet child-like Muggles are the mutated offspring of war prisoners, war conscientious and "ethnically impures".
* The Legend of Rah and the Muggles has this done by the old Yur the Muggle, for sake of comedy in chapter six.
* The Legend of Red Wolf when Red Wolf creeps up on them. Instead of attacking them, however, he crushes a scorpion that was about to sting them.
* The Legend of Royal Blue and La Sylphide Simone recognizes La Sylphide after hearing her voice, and Gabriel detransforms in his room before seeing his classmate Julien Bonheur had let himself in. The two of them are glad to provide alibis and moral support when needed, and sharing the secret helps Gabriel and Julien develop a real friendship.
* The legend of Saint Dymphna for poor Dymphna, and tried to force her to marry him.
* "The Legend of Satchmo": Chuckie walks through a backyard at night, and imagines the windows of houses as scowling faces and the shadow of a tree as a chomping monster.
* The Legend of Sleepy Hollow (2009), an opera, with music by William Withem and libretto by Melanie Helton.
* The Legend of Sleepy Hollow beyond a few screams and some warm-up chords. His thoughts are explained via the narration.
* The Legend of Sleepy Hollow, by Deanna Wadsworth, Brom Bones does more than masquerade as the Headless Horseman.
* The Legend of Sleepy Hollow: Ichabod Crane, of course. All that was left was his hat and a shattered jack-o-lantern. And they never found the head of the Headless Horseman.
* The Legend of Sleepy Hollow: Ichabod Crane's borrowed mount, Gunpowder, in Washington Irving's story.
* The Legend of Sleepy Hollow, is described as rather odd-looking, having a small head, big ears, a long nose, long arms and legs, and a very skinny build. The narrator even compares him to a scarecrow and a grasshopper.
* The Legend of Sleepy Hollow is sometimes depicted with a jack-o-lantern in place of his head.
* The Legend of Sleepy Hollow takes place near Halloween which is fitting because the villain is associated with jack-o-lanterns.
* The Legend of Sleepy Hollow when Thelma tells Ichabod to take off his clothes. He's taken aback, but she just wants to mend them.

* The Legend of Snow White Jack he's actually evil and tasks him with delivering a bouquet of poisoned flowers to Snow White. When he can't go through with it and drops the bouquet on the forest floor, all plant life within a few feet of it withers and dies.
* The Legend of Spyro and sent out to help the Drk Master take over the world. And she is a total badass. Interestingly, the "Fury" attacks of Spyro (and Cynder in the third game) make them elemental tykebombs.
* The Legend of Spyro: A New Beginning: In the level Dante's Freezer, Spyro arrives right when the Ice Soldiers and the apes are in the middle of a war. Neither of them is pleased to see him. They spend a lot of time bombing each other as well as Spyro, which can sometimes mean that the gigantic mass of enemies in front of you that you're sweating over is wiped out in ten seconds by the other side.
* The Legend of Spyro: A New Beginning. The villain for most of the game, Cynder, is actually a baby dragon, mutated into a powerful adult-like form by the powers of the actual main villain. Once she is defeated, she is cut off from these powers and reverts to her natural younger-looking, weaker, and much less badass form. She remains in this form throughout the ending and subsequent Spyro games, where she is a protagonist.
* The Legend of Spyro: A New Dawn: After going awhile into the forest temple, Sparx begins getting an unpleasant rash. Ember identifies the plants in the bush he passed through as poison ivy, which she knows because her mother taught her about it (not because Dragons get poison ivy, which they don't, but because eating it is really dangerous).
* The Legend of Spyro: A New Dawn) and had been waiting to get word they were coming and escaped, took on the Warden herself, freed the slaves with Sparx's help, and was just wrapping up her boss fight.
* The Legend of Spyro: A New Dawn, Boss Kaze and Empress Tyrania, go out this way. Boss Kaze falls off the side of a mountain after his fight with Pyrus and Delilah, and Tyrania falls out of the sky after her heart is destroyed by the heroes (so it technically wasn't what killed her). Delilah promptly lampshades all the ways Kaze's death could've killed him, grossing Pyrus out.
* The Legend of Spyro: A New Dawn Deadlock as this. She in fact overthrew the Naga's previous queen and took over herself because said queen was an abusive tyrant; she treats her minions well and makes sure everyone is paid for their services, and some of the Naga even admit that she's the best queen they've ever had.
* The Legend of Spyro: A New Dawn, Sparx reveals his dad had The Talk with him before he left home. He promptly changes the subject because he doesn't want to talk about it. Volteer and Cyril give a rather tame one to Cynder as well. Volteer was about to give a much more...detailed version by Cyril cut him off.
* The Legend of Spyro: A New Dawn to save his daughter from the Warden.
* The Legend of Spyro: Dawn of the Dragon: Cynder's Poison element is green.
* The Legend of Spyro: Dawn of the Dragon: Malefor shouts "You can't defeat me! I am eternal!" as he's defeated at the end.
* The Legend of Spyro: Dawn of the Dragon Malefor unleashes is pretty much a mountain-sized, much more frightening one.
* The Legend of Spyro: Dawn of the Dragon? No mention is made as to whether Malefor appeared or didn't appear in the book that gets a page for every dragon that dies.
* The Legend of Spyro: Dawn of the Dragon: Very little is explained about Malefor's backstory. Any fanfiction that's not Spyro/Cynder shipping is probably this. His "death" in the final game was also vague, leading to many fanfiction and fan comics.
* The Legend of Spyro games fall under this category, considering the first three games were chock full of side quests (some of them really annoying too).
* The Legend of Spyro games, the trilogy ended up completely overhauling each of the three returning characters' personalities:
* The Legend Of Spyro New Frontier both Cynder and Spyro admit that they are terrified of their respective dark forms' personalities overcoming them, resulting in a sadistic monster and violent berserker respectively.

* The Legend of Spyro). Of the three, West is the only one who has extensive voice acting experince.
* The Legend of Spyro serve as the main villains of the first two games, Dark Cynder in the first game and Gaul in the second. He only drives the plot in the third game after being freed.
* The Legend of Spyro, the first two games had an occasional case of powder trails leading to massive stashes of explosives set there by either the Apes or the Skavengers, depending on the game. Spyro can ignite the powder with his fire breath to cause a massive explosion.
* The Legend of Spyro: Volteer is known for his motor mouth, evidently due to being an electric dragon. It also doesn't help that he uses really big words.
* The Legend of Spyro: Volteer talks like this, often to the annoyance of the other Dragon Guardians and Sparx, though Spyro somehow has no problem understanding him. Example:
* The Legend of Spyro: While the four Dragon Guardians' age isn't mentioned, their words imply they're getting too old for the job, but that doesn't mean the Apes attacking the temple in the second game didn't get their butts kicked by the four of them. Yeah, Spyro and Cynder outclass them in the end, but that's what they were hoping for.
* The Legend of Spyro: Zonoya's Revenge: Cynder and Zonoya used to be best friends until Cynder became cursed, scratched Zonoya's eye and drove her away.
* The Legend of Spyro: Zonoya's Revenge does not affect the plot at all except to be Sparx's girlfriend.
* The Legend of Spyro: Zonoya's Revenge: Spyro wants to make sure Nina is always safe, to the point that he has Sparx constantly monitor her.
* The Legend of Spyro: Zonoya's Revenge. Zonoya was also in love with him, leading to many of her actions in addition to her revenge plot, making him responsible for most of the plot.
* The Legend of Su-Ling is portrayed as this. She's allergic to just about everything (flowers, feathers, and Chen's tiger cub) and she wants larger jewels for her marriage.
* The Legend of Sun Knight: As the Ice Knight, he is (in addition to using ice magic) expected to act cold and distant, rarely speaking and never being friendly to anyone. Since the premise for the series is that the twelve knights aren't who they're expected to be, Ice is secretly a kind person who wants to be friends with everyone. Since he's not permitted to smile and hold friendly conversations, he conveys this by making sweets for everyone he cares for.
* The Legend of Sun Knight, Creus, the Sun Knight in question, is able to learn any magic spell just by watching it. Including Necromancy. Which the Sun Knight is not supposed to know. Oops.
* The Legend of Sun Knight. Having low physical endurance and strength, and sword skills that are "not very good," as well as having been trained to hide his magic talent, Sun can't openly muscle his way through most challenges. He still fights openly with spells when he doubts he'll be recognized, but his preferred tactics are to manipulate others into doing what he wants, something which is helped by the appearance he maintains as an attractive figurehead. Those who know his true nature consider his friend Judge to be the one who maintains the church from the front while saying Sun's place is to sneak around and mess with things behind the scenes.
* The Legend of Sun Knight the twelve knight captains are required to change their last name to match that of the position they are accepted into. Candidates to be raised as the next generation of knight captain are chosen in part based on how much they match the expected appearance of the captain position they wish to take. (The Sun Knight, for example, must be blond and fair skinned, while the Storm Knight either needs some mutant gene for blue hair or an open mind regarding hair dye.) A large portion of their training to inherit the position also involves acting, to the point that many of the current cast member's backstories will completely neglect to show them learning and swordplay or other common duties and focus on them struggling to pull off a part of their expected character.
* The Legend of Sun Knight, where the Sun Knight has to hide his newly-undead best

friend from his fellow knights of the Holy Temple. So he hides him in the Holy Temple itself; after all, who would believe that an undead could have made it past all their defenses without raising an alarm?
* The Legend of Tarzan, Abby calls "Daddy" and begins tugging at the fingers of Marco, her father. Marco gently says, "Not now, Abby" because he's discussing how to cure a disease sweeping the jungle. She continues tugging at his fingers until she collapses at his feet, overtaken by the very disease he's been discussing.
* The Legend of Tarzan cartoon had this happen; Tarzan always rescued them before they drowned, however. Unless, like in the books, it is used to dispose of an antagonist (in one episode, a Giant Ape-Eating Python).
* The Legend of Tarzan down on to the top of the moving slave train, where they dispose of the guards on top of the train.
* The Legend of Tarzan, Hugo and Hooft are on the run from the Foreign Legion because they disobeyed orders to kill civilians.
* The Legend of Tarzan, in the episode "Tarzan and the Volcanic Diamond Mine".
* The Legend of Tarzan: In the episode "The British Invasion", while Jane and her friends are evading the panthers.
* The Legend of Tarzan: In "The Seeds of Destruction", Jane plants a sweet-smelling non-native flower near the elephant pond, but the vine grows out of control, driving the elephants out of their home and forcing them to share with the gorillas. When tensions between the two threaten to lead to all-out war, Jane must find a way to fix her mistake.
* The Legend of Tarzan, leaving Léon Rom to handle the planning for the subjugation of the Congo.
* The Legend of Tarzan: Rom invites Jane to dine with him while she is his captive on his riverboat; with the understanding that if she refuses, he will drop her friend into the river to be eaten by crocodiles.
* The Legend of Tarzan: Rom is able to do this with Madagascar spider silk rosary, getting it to wrap around and grapple whatever target he chooses; such as Jane's wrist during dinner, or Tarzan's throat during the final fight.
* The Legend of Tarzan; she only appears a couple of times, but both times she is incredibly single-minded about her chosen prey. Sabor is not the type of leopard who would find something easier to attack than a baby protected by a gorilla.
* The Legend of Tarzan spirit who adopts the voice of whoever she's possessing at the time.
* The Legend of Tarzan, Tarzan challenges a rhinoceros by throwing mud in its face in a very gauntlet-like manner.
* The Legend of Tarzan, the title character is presented with one in regards to bullish rhinos that have forcefully moved into the apes' territory after being driven out of their homes by human civilization. After learning that he purchased large amounts of dynamite to resolve the rhino issue, Jane and the others rush to stop Tarzan from doing the deed, which turns out to be blowing up a new section of river. Aware that he could've killed them all if he wanted to, the rhinos accept their new home.
* "The legend of the Avatar begins... whether he likes it or not." —
* The Legend of the Bone Knapper Dragon, Gobber's parents were depicted this way in his flashback.
* The Legend of the Chaos God: Solego laughs when he gleefully uses the Gizmosuit to smash through the Money Bin's front door:
* The Legend of the Chaos God, Solego's plans to escape his imprisonment and take over the world are constantly disrupted by the protagonists he runs afoul with Darkwing Duck being the biggest of them all.
* The Legend of the Chaos God: Solego, though trapped within a crystal, has the power to possess any living or mechanical thing that comes in direct contact with the crystal.
* The Legend Of The Dogman roaming the woods of Michigan and appearing every ten years from 1897 to 1987.
* The legend of the Dragon of Wantley states that the dragon met a most undignified end by being kicked up the ass by a knight wearing spiked armor.

* The legend of the Golem is at least Older than Steam. In some versions, the golem roams Prague in the guise of Joseph the water carrier (in other words, a laborer who has a reason to be almost anywhere, is expected to be silent, and to whom no one pays attention). This enables him to eavesdrop on plots to harm the Jews of Prague so that his master can arrange for the golem to foil the plots.
* The Legend of the Ice People is a long series of these, all concerning the same family.
* The Legend of the Ice People some members of the eponymous family have this power, most notably Tengel the Good.
* The Legend of the Ice People Tengel, the hero of the first few books was repeatedly told as a child that he'd killed his mother.
* The Legend of the Legendary Heroes is lazy but if you hurt one of his friends, you will see why Alpha Stigmas are feared: an evil God of Destruction personality with overwhelming powers will just disintegrate you.
* The Legend of the Legendary Heroes, Lucille kills his parents in order to protect his sister Ferris from them.
* The Legend of the Lone Ranger, but also destroyed the career of its star, Klinton Spilsbury, who was making his film debut. He hasn't done another film since.
* The Legend of the Lone Ranger features the Ranger and Tonto riding past it on horseback.
* The Legend of the Lone Ranger — which met with similar rejection to the 1981 film.
* The Legend of the Mystical Ninja here. It also has one of the shops where you can buy the Hourglass item, adding time to the ever-ticking time limit at the top of the screen. You can't just waste hours here, you can buy them and waste more!
* The Legend of the Mystical Ninja, Koban Cat is found tied up and suspended from a great height.
* The Legend of the Mystical Ninja, one boss is a daruma doll whose stacking segments try to slam into you by sliding across the screen one by one.
* The Legend Of The North Wind, while Peiot takes a bath in a water barrel to cure his sea sickness, his sister Ane (who stowed away on board of the ship) steals his clothes so she sneak into the ships kitchen and get some food unnoticed. She returns them afterwards though.
* The legend of the roc (a bird of prey big enough to carry elephants) might have been inspired by ostriches, since being huge and flightless they were thought to be the roc's chicks; a similar theory proposes the giant — and extinct since the beginning of the second millennium — elephant birds of Madagascar instead, formerly some of the biggest living birds on Earth and situated just at the edge of the known world of the Arabs.
* The legend of the star-crossed lovers Diarmuid and Deirdre in Irish mythology (below) was set to music by Irish folk-rockers the
* The Legend of the Titanic. And that's not even going into the subplots involving whaling, evil sharks teaming up with a whale-hunter to plan the shipwreck of the Titanic, talking dolphins, and a baby-faced octopus. (The last of whom being duped by the villains into placing the iceberg in the Titanic's way in the first place.) The second film drops any sense of relation to the actual incident left and brings Atlantis into the mess.
* The Legend of the Titanic as it does here, which is to say no damn sense at all.
* The Legend of the Titanic before the narrator finishes with the story to his grandchildren.
* The Legend of the Titanic, one with an electrocuted mouse and another one with an octopus, who didn't move out of the way from under the ship after he couldn't hold it up any longer.
* The Legend of the Titanic, several characters who seemingly died get better by the end, including Camembert and Tentacles, both of whom are explicitly shown to be dead.
* The Legend of the Titanic, Smiley the dog pees on the leg of a man who's done nothing more than doing his job: telling his owner to put the dog on a leash.
* The Legend of the Titanic. Then he says he needs to drop something, picks up a

glass, pours water into it, and promptly drops it.
* The Legend of the Titanic where it turns out nobody died during the sinking of the Titanic as they were saved by a giant octopus. Also the characters that are seen to die in the film are shown to be alive and well with no explanation how they survived.
* The legend of the "Wandering Jew" claims that a certain Ahasver was cursed for laughing at
* The Legend of the White Snake type monk called Fa-Hai intervenes, not because she is evil, but simply because she is non-human. Fa-Hai's meddling did more harm than good.
* The Legend of the Winterking: The Crown of Nandur by J. Kent Holloway is a high-fantasy story.
* The Legendof Thunder Marina while flying. Somewhat fittingly an evil Skarmory is after them.
* The Legend of Thunder! The 4Kids dub team didn't get the memo about his gender, though he's never referred to as "she", and is often considered by fans just to be a man with a very feminine voice. However, the Latin American Spanish dub repeatedly calls him a woman.
* The Legend of Thunder!, though, Marina (literally) tosses her Misdreavus into a two-on-one battle, and everyone stops what they're doing — even the villains in the process of capturing the elusive and powerful Raikou — to either watch or order Pokémon around... but then Attila gets an idea.
* The Legend of Thunder! what one can expect to see under her shorts quite accurately.
* The Legend of Total Drama Island also notes that “a swell of dramatic music” accompanied Noah's speech in the finished episode.
* The Legend of Total Drama Island, an eliminated contestant makes a guest appearance to help with a later challenge.
* The Legend of Total Drama Island arrives with said contestant still submerged, but the narrative explicitly states that there was no visible blood.
* The Legend of Total Drama Island, a school of sharks won't harm Courtney out of "professional courtesy" because she plans to be a lawyer when she grows up.
* The Legend of Total Drama Island, Bridgette sees numerous parallels between the day's events and her previous night's dream of finding a presumably dead contestant alive. The trope is subverted when she comes to the place where she dreamed of finding said contestant—a spot she had never been to before—only to find no sign of human presence.
* The Legend of Total Drama Island, but are in fact also directed at the reader.
* The Legend of Total Drama Island, Chris gets a taste of this courtesy of Katie and Sadie, when he refuses once too often to let them be on the same team. They physically assault him and, among other indignities, they forcibly restyle the vain host's hair to “an irregular, spiky mane, the likes of which is rarely seen outside of anime.”
* The Legend of Total Drama Island, Chris uses this term for the contestants whom he had expected to be eliminated early in the game. Subverted when Chris notes with mixed feelings that the "cannon fodder" is turning out to be more capable than he expected, for which he blames the profilers for not doing their jobs.
* The Legend of Total Drama Island, Cody lampshades this when Heather flirts with him.
* The Legend of Total Drama Island, Courtney reacts thusly when Chris awards a certain challenge to the Eagles after it appeared that he was going to disqualify them and should have disqualified them.
* The Legend of Total Drama Island) debuter Sierra will have an important cameo near the end.
* The Legend of Total Drama Island. Duncan reacts as strongly as he does because standees of attractive women are his phobia object.
* The Legend of Total Drama Island duplicates this feel by insertion of (mostly famous) poems at various points where they fit or enhance the scene's mood. These poems are usually part of the narrative, but characters occasionally recite them

in-universe.
* The Legend of Total Drama Island features color coding in a couple of the challenges:
* The Legend of Total Drama Island features this during the dodgeball match. When the Muskies adopt the tactic of having everyone throw simultaneously at the same player, Courtney devises organized patterns with names like "Coffin" and "Die Five".
* The Legend of Total Drama Island has two instances in the early chapters:
* The Legend of Total Drama Island have far more detail than is strictly necessary to advance the story.
* The Legend of Total Drama Island, Izzy soils herself in her terror during the phobia challenge.
* The Legend of Total Drama Island, Katie and Sadie are almost exclusively comic relief through the first several chapters. Then, during the camping challenge, instead of a reimagined version of the childish quarrel they had in canon after getting lost, they are caught in a nighttime storm without adequate shelter or clothing and develop severe hypothermia, facing a very real possibility of decidedly uncomic deaths.
* The Legend of Total Drama Island, Lindsay has been tasked with giving her friend Sadie a bad haircut during the phobia challenge, and cuts loose with a Big YES when she realizes that she can use extensions to do a reversible job.
* The Legend of Total Drama Island makes her "rescue" sound like "a pitched battle against a thousand-kilo, armor plated killing machine".
* The Legend of Total Drama Island, several contestants discuss the topic at the amphitheater whilst they wait for Chris to brief them on the Talent Show challenge.
* The Legend of Total Drama Island, specifically the Mardrus & Mathers translation.
* The Legend of Total Drama Island tends to depict the contestants more realistically and multidimensionally than the canon does, due to her insider perspective. She also makes references suggesting that the finished episodes mentioned in the reimagining don't depict the contestants any more multidimensionally than the canon episodes do.
* The Legend of Total Drama Island, the following invocations (from separate incidents) are typical:
* The Legend of Total Drama Island, the normally mild-mannered Bridgette sheds tears of rage whilst denouncing Chris for his treatment of the interns.
* The Legend of Total Drama Island, the Storyteller is Canadian and so mainly uses metric units of measure. The few in-story references to imperial units appear in dialogue, as opposed to narrative.
* The Legend of Total Drama Island, to lend a "legendary" flavor; but the dialogue is modern teenspeak or middle-of-the-road colloquial English because that's how the characters speak in the source material.
* The Legend of Total Drama Island, wherein the racers took to whipping each other instead of their horses. Ezekiel and Lindsay are the obedient "horses" who continue to paddle whilst the alpha cats have their fight.
* The Legend of Total Drama Island, which is probably one of the most blood-drenched epics of all time. There is a minor subversion in that Lindsay does bleed after being hit in the mouth.
* The Legend of Total Drama Island" with a stereotypical Far Eastern accent and a bad imitation of Heather's voice.
* The Legend Of White Fang Raven-Moon who could either turn into a raven or use astral projection to possess a raven.
* The Legend Of William Tell asks permission to go home and tend his parents' farm.
* The Legend Of William Tell includes several scenes and lines of dialogue that did not appear in the show. One showed up as a flashback despite not being shown the first time around.
* The Legend Of William Tell Kalem looks into a fire. Kreel looks into his cauldren. Close up on Kalem's eyes. Close up on Kreel's eyes. Kalem throws dust into the fire. Kreel makes vaguely magical hand motions. Sun rise, sun set. Alvar

whines. Trees blow. Most episodes will have their own bits of stock footage as well.
* The Legend Of William Tell. Kreel, a dark magician, raises Xax to overthrow the King and Queen and take control of the country.
* The Legend Of William Tell: Will and the others take Vara from the Citadel against her will in the first episode. They're protecting her from Xax, who's one step away from arranging an accident and taking her crown, but she considers it kidnapping for at least another episode and makes several attempts to escape from them.
* The Legend of Wonder Woman (2016) adds another great pilot to the supporting cast; Lt. Lawrence Stone, one of the Tuskeegee Airmen.
* The Legend of Wonder Woman (2016): After Diana and the Holliday Girls "borrow" an experimental aircraft in order to go join the fight against the Duke of Deception and try to prevent him from awakening the Titan, they pass an allied aircraft. When Diana talks about contacting them on the radio, Tilly Heyday pushes the giant red button covered in caution tape while cheerfully chirping "maybe it's the radio!" while the others, in horror, tell her not to. It turns out to be the button to turn the plane invisible.
* The Legend of Wonder Woman (2016): After Diana refuses to give Etta her backstory, Etta comes up with a fanciful dramatic one she knows is false where Diana is a princess fleeing from an arranged marriage.
* The Legend of Wonder Woman (2016): After the climactic battle, Lawrence Stone wraps Etta Candy in his flight jacket since it's snowing and she's in a torn t-shirt.
* The Legend of Wonder Woman (2016): After the deception that convinced him to become Ares' champion is revealed, the Duke of Deception casually flies to Mars to confront Ares—only to find that Ares' martian base is long abandoned. The mixing of the gods with the planets of their names is a nod to Wonder Woman's creator, who treated Ares' spiritual realm as somehow contiguous with the physical planet.
* The Legend of Wonder Woman (2016): Airplanes, tanks and most everything else regularly goes up in giant explosions after taking little damage in this series.
* The Legend of Wonder Woman (2016) Alcippe has a rugged dueling style scar on her right cheekbone, signifying her heroic but tough and harsh nature.
* The Legend of Wonder Woman (2016): Alcippe is like a strict mother to her guard, but centuries of watching her women grow old and die while she remains immortal have caused her to try and distance herself from them. It is still clear they look up to her and she is protective of them and still keeps track of each of her trainees throughout their lives.
* The Legend of Wonder Woman (2016): Alcippe is taken out by Antiope when Antiope realizes Alcippe has figured out too much of her traitorous plan.
* The Legend of Wonder Woman (2016) all of the Amazons besides the founders were born when their mothers where granted pregnancies by the gods with no men or sexual intercourse involved since this version of the Amazons are not immortal and would otherwise die out.
* The Legend of Wonder Woman (2016): A montage of Diana training with Alcippe also shows the young princess aging to adulthood.
* The Legend of Wonder Woman (2016) an entire contingent of traitor Amazons are easily defeated by Philippus on her own, with it taking two priestesses channeling the power of Hades and Ares to take her down which still doesn't kill her and nearly didn't work.
* The Legend of Wonder Woman (2016): Antiope is around to watch her niece Diana grow up, but Penthesiliea is brought to the comics from the mythology only to die in antiquity against Greek heroes (though a different set than those who killed her in her famous mythological death) leaving Hippolyta with lingering guilt for having temporarily left the Amazons during the time Penthesiliea was killed.
* The Legend of Wonder Woman (2016): Any non-Amazons who end up inside the magical barrier around Themyscira lose their memories of anything which happened there once they leave. This affects Steve Trevor but enough interaction with Diana eventually

brings those memories back.
* The Legend of Wonder Woman (2016) approves of the mutual crush between Etta and Lawrence Stone, and he keeps bringing Lawrence to functions where he knows Etta is going to be which Lawrence would not otherwise attend.
* The Legend of Wonder Woman (2016) crashes onto the island and she ends up leaving to the wider world.
* The Legend of Wonder Woman (2016) created by the Nazis messing with a piece of a downed extraterrestrial giant, that is powered/contains the solidified vengeful souls of a dead planet.
* The Legend of Wonder Woman (2016): Despite the way the adults brush her off the danger Diana feels encroaching on Themyscira is not imagined. The power of the gods has waned to the point that they are begining to fade even in the pocket demension of Themyscira which they retreated to, and shortly after Diana leaves the island the infighting among the gods as they try to stave off death and force the Amazons to help them enslave humanity to get new worshipers leaves Themyscira in ruins and all the Amazons besides Hippolyta dead or turned to stone.
* The Legend of Wonder Woman (2016): Diana climbs to the outside of the experimental aircraft she and the Holliday Girls are flying to draw the Duke of Deception's undead forces.
* The Legend of Wonder Woman (2016): Diana is completely unprepared for the wider world as she'd been lied to her entire life and didn't belive any humans still lived outside the barrier around Themyscira. She is uncomfortable being around men and sticks out horribly even after Etta takes her under her wing. The first time she goes to a movie she starts yelling at the characters on screen, but she's not quite naïve as she has a better understanding of the cost of war, prejudice and violence than many of those she's around.
* The Legend of Wonder Woman (2016) Etta Candy (5'3) comes up to her love interest Lawrence Stone's shoulders, and that's with heels on.
* The Legend of Wonder Woman (2016): Etta Candy and Pamela Smuthers are both pretty war time singers leading their own musical groups, the Holiday Girls and Pamela and the Peas respectively and they are both fashion conscious and tend to look quite glamorous on stage.
* The Legend of Wonder Woman (2016): Etta Candy drops out of college after her parents use an old picture of her with hair removal cream on her face as an advertisement in all the local papers and post it up on a billboard near the school. She'd been thinking about joining a USO tour anyway, but after that, she fled the states in a hurry.
* The Legend of Wonder Woman (2016): Etta Candy sews and designs her own clothes and is very fashion conscious. She is happy to get an interview with a Parisian fashion magazine editor and is thinking of designing clothes to make money.
* The Legend of Wonder Woman (2016) even before Zeus tossed it into space and whether Diana still counts as a true Amazon after finding a life in the world outside is up for debate.
* The Legend of Wonder Woman (2016) for Ares' plot and was injured and essentially helpless and in need of rescue for the duration of his stay.
* The Legend of Wonder Woman (2016) goes on a rant in which he makes it clear he wants to massacre millions and then force the survivors to worship him and perform human sacrifices to him at swordpoint in order to regain his old strength that fully cements him as a self obsessed villain and confirms that Diana's wariness of him is not unfounded.
* The Legend of Wonder Woman (2016): In the climax Diana and the Holliday Girls end up in a bomber in the middle of a fight between fighters (including Steve Trevor and Lawrence Stone), which goes horribly sideways for the Allies when the Duke of Deception figures out how to use his necromancy to tear their planes apart in the air.
* The Legend of Wonder Woman (2016) is on the other hand a much more eager Nazi ally, with far more blood lust, power hunger and disregard for the sanctity of life than Byde.
* The Legend of Wonder Woman (2016) is what forces Diana to face the reality of the

wider world she's in and ask about the war Etta has been trying to tell her about, and been furious with her for discrediting and not caring about.
* The Legend of Wonder Woman (2016) most of the Amazons have normal lifespans, outside of randomly being granted a pregnancy or two, with only the very few who are the champions of Olympians having their aging stopped which comes at a price where they have to watch everyone around them age and die and lose a significant degree of their autonomy to their patron god.
* The Legend of Wonder Woman (2016) of course prefers a lasso for the non-lethal applications, turning down more practical weapons even before she receives the Lasso of Truth.
* The Legend of Wonder Woman (2016). Pamela doesn't seem to see how that has any bearing on the conversation.
* The Legend of Wonder Woman (2016) Pamela Smuthers' father is a rich politician and it has done her personality no favors to be his spoiled daughter.
* The Legend of Wonder Woman (2016): Pamela Smuthers verbally attacks Etta for supposedly "stealing" her boyfriend and being involved with too many boys at a college party. Etta is upset but doesn't feel she did anything wrong, especially since she turned down Pam's boyfriend and isn't interested in him.
* The Legend of Wonder Woman (2016) reduces the Holliday Girls siblings to twins, and spells their names as Tilly and Milly.
* The Legend of Wonder Woman (2016) right before the Amazons were cut off from the rest of humanity by the gods moving the island.
* The Legend of Wonder Woman (2016)'s (and in the original comics Diana Prince's) USAAF superior General Darnell doesn't even rate a mention. It also reduces the Heyday triplets to the Heyday twins.
* The Legend of Wonder Woman (2016)'s crash on Themyscira, and Diana fleeing with him to save him at the behest of her mentor Alcippe who stayed behind to fight the traitors that drew him to the island Diana has to tend to his wounds without a full understanding of just who all has turned traitor or why or whether they are close to finding them.
* The Legend of Wonder Woman (2016)'s shirt and his pants up to the knee are in tatters when he first appears.
* The Legend of Wonder Woman (2016): Steve Trevor and Lawrence Stone are both USAAF pilots who are very respectful lieutenants who get promotions for their actions, though Steve feels his is undeserved. They are gentlemen by their honorable and polite actions not by class, as they are Americans from lower-middle-class families.
* The Legend of Wonder Woman (2016) talks about the freedom of the sky while on Themyscira, which Diana doesn't really understand. Later Diana says the same short speech back to him to show that despite their differences they're kindred spirits, and to help Steve feel like he knows her despite his amnesia.
* The Legend of Wonder Woman (2016): The B-17 that ends up used in experiments that turn it invisible at the push of a button has art of Wonder Woman with her bullet repelling bracers crossed defensively on it.
* The Legend of Wonder Woman (2016): The Duke of Deception uses his illusion powers to make his victims see things which horrify them and bring them to despair.
* The Legend of Wonder Woman (2016): The elderly couple that takes Diana in when she first leaves Paradise Island confuses Diana because of how the old man is a sailor who is rarely home and she feels like his wife deserves more attention. She quickly learns that the two are perfectly quirky together and both are very happy with their relationship which helps her not to judge so quickly in the future.
* The Legend of Wonder Woman (2016): The fighter pilot that is flying alongside the B-17 when Tilly pushes the invisibility button looks wide eyed at what appear to be a bunch of young women standing in midair and flying alongside him where there used to be a bomber and promptly tossed his flask over his shoulder.
* The Legend of Wonder Woman (2016): The Heart of Baetylus is a broken off chunk of the "Titan" that once tried to destroy all life on earth, that wants to remerge with its main body so that it can reaminate and restart working on that goal and warps the minds of those who hold it besides Hippolyta who was its chosen guardian.

* The Legend of Wonder Woman (2016): The Holiday Girls seem to be a perfectly accepted and universally loved group despite consisting of three white women, one black woman and one brown woman in a period when the United States was highly segregated and hate crimes against African Americans were common. As a matter of fact, while Lawrence is obviously serving with an all black unit (the Tuskegee Airmen), segregation and racial inequality and violence is treated as non-existent despite the time period and setting.
* The Legend of Wonder Woman (2016): Themyscira is a walled city which the inhabitants are warned not to stray from on an island that's been placed behind a magical barrier separating it from the dimension of the physical world, and where the ruling powers claim that humanity outside the barrier has been entirely killed off.
* The Legend of Wonder Woman (2016): The "Titan" was brought down by breaking off a piece of its gem like "heart", which is actually a container for the souls of a dying world which have become twisted over time in their unnatural confinement.
* The Legend of Wonder Woman (2016): The US ground forces refer to the Germans as Jerrys.
* The Legend of Wonder Woman (2016) which are entirely factual but don't seem any different from the made up tales.
* The Legend of Wonder Woman (2016): While most languages get translated into English, the French is left as is.
* The Legend of Wonder Woman (2016). Zeus is furious Diana refuses to aid him, as he sees it as a bit of unpleasantness to achieve utopia, seeimingly incapable of realizing this "utopia" would be hell for everyone but himself.
* The Legend of Wonder Woman is a wealthy socialite who has willingly allied herself with the Nazis and thinks hesitating to kill hundreds with an explosion is ridiculous.
* The Legend of Wonder Woman Lawrence Stone has a crush on her after she flirts with him. At first, it seems to just be more of her loud cheerful proclamations that are unfounded in reality later it is revealed that he does actually reciprocate her feelings, though no relationship is started between them before the book's cancellation. Probably because of the reactions and prejudice they would face as a white Texan woman and an African American man trying to date in the 1940s.
* The Legend of Wonder Woman she allows herself to be bullied into aiding the villains and doesn't even put up a token resistance, just asking that her sister be spared but doing nothing but looking sad when she's told her sister will be killed if she gets in the way.
* The Legend of Wonder Woman still possesses this power, but uses it to make his victims feel despair and see death and horror surrounding them.
* The Legend of Yan-Kan Mar: The three main characters in the novel as well as the invaders are all from a species called Taiko, and the protagonists are from 44 million years ago in earth’s history. Along with being in an unfamiliar time period, the Taiko are also among a different species: humans.
* The Legend of Yan-Kan Mar: Toki (formerly Yan-Kan) is illiterate due to her social standing never allowing her to go to school back when the Taiko ruled the world. When given the chance she still doesn’t go to school, but rather gets a job while her sisters get a proper education.
* The Legend of Zelda actually makes this explicit. At one point, two characters in love with Link talk about how it is impossible to win in a lifetime where Link has already met Zelda (even if, such as in this case, they've barely spoken to each other).
* The Legend of Zelda ad, a man dressed in a black outfit insanely calls out "Zelda" and the names of enemies while in a prison cell.
* The Legend of Zelda: After Cia brings forth the multiple areas from different eras to the main world, the Hyrulean Forces split up into three armies to deal with the problem on three separate fronts. Impa and Sheik head to the era of the Hero of Time, Lana heads to the era of Twilight, and Link heads to the era of the Sky.
* The Legend of Zelda: A Link Between Worlds as Groose and thinking he's destined

to be a hero and earn the affections of Princess Zelda. One kidnapping and eventual rescue later, Osfala accepts he's no hero.
* The Legend of Zelda: A Link Between Worlds brings back the Bug Catching Net. It can reflect the projectiles fired by one of the main villains. But probably not like in said game, the upgraded form is a fairly viable weapon to use against enemies, doing about the same amount of damage as the most powered-up version of the Master Sword. So for someone with good timing, you end up with a fairly viable melee weapon despite it looking utterly ridiculous.
* The Legend of Zelda: A Link Between Worlds but, instead of being a corrupted Sacred Realm, is a parallel dimension to Hyrule that has been corrupted by its residents destroying their Triforce centuries before. As a result, the land of Lorule itself has begun crumbling away, leaving gaping abysses across the landscape, and monsters have overrun much of the country. Its people are all parallels to those of Hyrule but altered in some way, usually leaving them more pessimistic, more cowardly or more malevolent than their Hyrulean counterparts.
* The Legend of Zelda: A Link Between Worlds by having the same animation.
* The Legend of Zelda: A Link Between Worlds) cuddling up, indicating she wants to find love in her own life.
* The Legend of Zelda: A Link Between Worlds give her the Triforce; instead, Yuga betrays her, revealing that he was playing her all along and plans to use the Triforce to remake Lorule in his own image.
* The Legend of Zelda: A Link Between Worlds "Her Grace will be most pleased..." It's possible that the developers hoped players would overlook that line, but if you read it for even a moment, it becomes obvious that the two are conspirators.
* The Legend of Zelda: A Link Between Worlds. Her huge bulk is actually a side effect of her Smooth Stone being stolen, which kept her power in check. Without it, she gorges on fish all day and grows bigger over time. Once the stone is returned, she slims down and is calmer.
* The Legend of Zelda: A Link Between Worlds, if an enemy knocks you off the edge of a bottomless pit, you hang in the air for a second before falling. The same is true for them if you knock them off the edge.
* The Legend of Zelda: A Link Between Worlds, implying that Zelda is of the age to want a romantic attachment. This puts the final shot of the game of Link and Zelda looking at the same painting together and smiling at each other in a different light.
* The Legend of Zelda: A Link Between Worlds: In Lorule, skulls take on the role of, and are as common as, the pots seen in Hyrule and in the other games. Lorule Castle is especially packed with them.
* The Legend of Zelda: A Link Between Worlds in this mode. Until you get the Blue Mail, a lot more attacks become strong enough to take you down in one or two hits.
* The Legend of Zelda: A Link Between Worlds, Irene claims to be the most talented witch in her generation. The only other witch in the game is her grandmother.
* The Legend of Zelda: A Link Between Worlds it would only stun enemies that weren't specifically programmed to die from it.
* The Legend of Zelda: A Link Between Worlds knights that are twice as strong as the blue knights.
* The Legend of Zelda: A Link Between Worlds lets Link turn into a 2D painting on flat surfaces.
* The Legend of Zelda: A Link Between Worlds makes things even vaguer.
* The Legend of Zelda: A Link Between Worlds (now under the name of Sand Rod) to allow Link to cross over them safely with the created solid sand tiles.
* The Legend of Zelda: A Link Between Worlds of Sahasrahla. He explores Lorule, a location similar the Dark World complete with most dungeons having the same names and themes, fights bosses which are the Lorulean counterparts of the ones fought in the Dark World (like Arrghus, Stalblind and Grinexx), goes up against a villain with a similar plan to Agahnim and a design suspiciously like Ghirahim, Chancellor Cole and Ganondorf... Everything that occurs is basically a repeat of the Link to the Past storyline.
* The Legend of Zelda: A Link Between Worlds take precautions to protect herself

(Yuga implies that Impa was the last Sage he captured), and Rosso, a burly mountaineer. When he's freed from his prison, he casually remarks that he's known about his Sagehood for years, but never bothered to bring it up because it seemed so unimportant; if he'd told someone beforehand, he might have been able to be kept safe. However, given that Yuga not only has teleportation powers, but can trap people so long as there's a flat surface nearby, it would have been dang near impossible to defend against him.
* The Legend of Zelda: A Link Between Worlds that plagued previous titles.
* The Legend of Zelda: A Link Between Worlds: The world of Lorule is literally falling apart at the seams, and is crossed by deep chasms where the land falls away into an endless black abyss dotted with crumbling chunks of the landscape and waterfalls endlessly pouring the waters over the cliffs.
* The Legend of Zelda: A Link Between Worlds when the Shady Guy steals the Smooth Stone from her fountain. At one point, she is shown immediately getting bigger upon gulping down a fish, and the other Zoras maintain that Link must get the stone back before she gets even bigger.
* The Legend of Zelda: A Link Between Worlds, where literally every uniquely named/designed character you meet in your travels turns out to be a sage in the second half of the game.
* The Legend of Zelda: A Link Between Worlds; Yuga merges with Ganon but remains the one in control, able to use the Triforce of Power for his scheme.
* The Legend of Zelda: A Link Between Worlds, Yuga turns Zelda and the Seven Sages into paintings. He is able to turn himself into a non-imprisoned painting that can move along walls, an ability Link can also use.
* The Legend of Zelda: A Link to the Past: A blood-red Moon is glimpsed at throughout the tale, and sporting a skull face in the Dark World. In fact, the only tangible transition to the Dark World (apart from the wall collapsing around Link) is the smoke billowing from Agahnim's corpse to form the skull above.
* The Legend of Zelda: A Link to the Past: According to the manual backstory, Ganondorf and his band of thieves found the entrance to the Sacred Realm and the Triforce together. Then, instead of sharing the power, the thieves turned against one another in order to claim the Triforce uncontested. Ganondorf emerged victorious, and touched the Triforce with the blood of his followers still fresh in his hands.
* The Legend of Zelda: A Link to the Past adaptations depict the Hyrule soldiers not as possessed humans, but as monsters or suits of Animated Armor.
* The Legend of Zelda: A Link to the Past: After a whirlpool engulfs both Vitreous and the Wizzrobe, Zora appears from beneath to rescue Link.
* The Legend of Zelda: A Link to the Past: After taking enough damage, Blind the Thief's head flies off and he grows a new one. He survives two decapitations before being felled for good.
* The Legend of Zelda: A Link to the Past. After the evil wizard in residence does away with Princess Zelda, his minions get the word out (with surprising speed) that Link has kidnapped her. Signs are posted in his hometown and if they spot him, his neighbors will yell for the palace guards to come and kill him.
* The Legend of Zelda: A Link to the Past: Agahnim cuts down Link's uncle with a swath of lightning from his sword, leaving no wound. Even his tunic is intact.
* The Legend of Zelda: A Link to the Past, Agahnim plans to undo the Sages' seal and free Ganon, the King of Evil. Zelda tells us he is very close to completing his plan right from the beginning of the game.
* The Legend of Zelda: A Link to the Past: Agahnim's knowledge of sorcery is the key to his power and his plan to imprison the Maidens in the Dark World does succeed despite Link's efforts to stop him.
* The Legend of Zelda: A Link to the Past, a librarian gets the idea for a hot air balloon from a boy who draws an analogy to his bubble bath.
* The Legend of Zelda: A Link to the Past all have Spiny Beetles that hide under bushes, rocks, or skulls and walk towards Link when he gets close. The Power Bracelet is required to remove the rocks and skulls to make the beetles vulnerable, but bushes can be slashed.

* The Legend of Zelda: A Link to the Past. Also a new riddle sidequest for the Hurricane Spin.
* The Legend of Zelda: A Link to the Past, among others. Made possible with Hyrule Magic and Black Magic editing programs.
* The Legend of Zelda: A Link to the Past, among others—on his back.
* The Legend of Zelda: A Link to the Past, and are easily defeated by Link.
* The Legend of Zelda: A Link to the Past, and a three-headed rock monster to an organic, three-headed, eastern-style dragon.
* The Legend of Zelda: A Link to the Past, and it showed up on Link's hand before he even had the Triforce of Courage. It just marked him as the hero destined to claim it.
* The Legend of Zelda: A Link to the Past: A pair of Chain Chomps appear in Turtle Rock. There's also a portrait of Mario in a hanging in a house.
* The Legend of Zelda: A Link to the Past are turned into demons. Link himself is turned into a pink bunny unless he gathers the correct item. Beyond the Dark World reflecting the Light World, in some cases events on one will affect the other, as seen when Link drains a Light World lake to gain access to a water-themed Dark World dungeon.
* The Legend of Zelda: A Link to the Past a reward, however, on another sign that can only be seen at the start of the game: A royal bounty of 100 rupees for help in finding the missing maidens.
* The Legend of Zelda: A Link to the Past: As fighting the Trinexx, Link exclaims: "This is one schizoid serpent!"
* The Legend of Zelda: A Link to the Past: As Link is fighting a group of monsters off, The Boy cheers Link on by pounding the head of one the statues that pour into the fountain. This triggers the Swamp Palace in the Dark World to get flooded, washing away the monsters and Link. Subverted in that the flooding water helps him defeat the two enemies he was fighting and get him to a high hole in the wall.
* The Legend of Zelda: A Link to the Past: Averted. The guards who are called to arrest Link in Kakariko Village are some of the weakest enemies in the game, although the rarely-summoned trident-wielding variety is noticeably stronger than the normal variety with swords.
* The Legend of Zelda: A Link to the Past, avoid this with travel between their two worlds/time periods. If you try to transport yourself into a solid object you'll flash for a bit and then be kicked back to your original position, able to adjust your position and try again.
* The Legend of Zelda: A Link to the Past, but there is no boss...until you bomb its ceiling and lead a certain prisoner into the light...
* The Legend of Zelda: A Link to the Past came with another large foldout map of Hyrule which also had the layouts of the first three dungeons on the back of it.
* The Legend of Zelda: A Link to the Past comments upon meeting Link that he's an "ugly little man" and his face is grotesque. Zora later gives Link a monster mask that will let him infiltrate one of Ganon's strongholds.
* The Legend of Zelda: A Link to the Past concerns Link's quest for the wish-granting Triforce; he wants it less to make a wish of his own and more to get it out of the hands of Ganon, who had previously used it to take over the Sacred Realm (in the process turning it into the Dark World) and is currently using it to invade the Light World. Once Link gets it, however, he realizes that he can use it to undo all of Ganon's evil works.
* The Legend of Zelda: A Link to the Past continues this with the blue and red armor, the blue and red boomerangs, and arguably the ice rod (blue) and the fire rod (red). The Cane of Byrna (blue) and Cane of Somaria (red) may also qualify, since the latter is required to progress in the game where the former is completely optional. Averted with the potions, where the blue potion is the best because it has the combined abilities of the red and green potions. In many cases, the red/blue coding of enemies is changed up somewhat to take advantage of the Super NES's ability to display far more colors on-screen than the NES, i.e., Eyegores and Goriyas are green/red and Leevers are green/purple. In all three examples, green is the weakest.

* The Legend of Zelda: A Link to the Past corrupted it, and later games show it to be just a beautiful, lush world not much different from Hyrule.
* The Legend of Zelda: A Link to the Past: Downplayed. In the final battle, Ganon is baffled that Link managed to get as far as he did and defeat his alter-ego Agahnim twice. But he confidently proclaims that he will destroy Link and take over the Light World soon after.
* The Legend of Zelda: A Link to the Past: Due to the timing of when Ganon reveals himself, the nature of his and Agahnim's identity is ambiguous. On one hand, Agahnim is trying to break the seal on Ganon in the Sacred Realm, but as Ganon reveals Agahnim to be his "alter ego", Ganon is apparently able to escape the Sacred Realm. This leads to two possibilities: 1. That Agahnim was possessed by Ganon with some power that could leak out of the Sacred Realm, or 2. That Agahnim is an alternate body created by Ganon that can escape the Sacred Realm but with limited power. Neither explanation is used in-game, but the comics and two mangas use the former explanation.
* The Legend of Zelda: A Link to the Past, Dungeon Boss Arrghus is reimagined as a bright red jellyfish with tentacles.
* The Legend of Zelda: A Link to the Past, Epheremelda doesn't buy into the idea that Zelda has suddenly warped from Turtle Rock to the swamplands, and recommends that they go find the map first. Link, blinded by his devotion, forges ahead and mounts of a successful rescue of...a Wizzrobe. Whoops.
* The Legend of Zelda: A Link to the Past, Epheremelda seems to have a crush on Link, and blows her stack whenever he ignores her to look for Zelda.
* The Legend of Zelda: A Link to the Past features an enemy made of ice completely resistant to everything but fire magic, which reduces it to a shrinking puddle.
* The Legend of Zelda: A Link to the Past features the Snapdragon, which is something like a daikon radish with legs and a big, toothy maw.
* The Legend of Zelda: A Link to the Past: Following Sahasrala's direction, Link heads for the Library to study the Book of Mudora, only to find it has been set on fire by soldiers. The boy alerts Link that the Librarian is stuck inside.
* The Legend of Zelda: A Link to the Past for sending Zelda to the Dark World encased in a crystal and making him think he sacrificed (and therefore killed) her.
* The Legend of Zelda: A Link to the Past from Princess Zelda to a sleeping Link. She also sends him another one later in the game, when she's captured a second time.
* The Legend of Zelda: A Link to the Past, Ganon's wish to the Triforce was to rule the world. The Triforce grants him that wish by transforming the Sacred Realm into the Dark World. Ganon is not satisfied by the results, and seeks to conquer the Light World (Hyrule) as well.
* The Legend of Zelda: A Link to the Past, Ganon transforms into a giant bat after emerging out of Agahnim when Link beats him a second time. He can also create fire bats during his second phase.
* The Legend of Zelda: A Link to the Past, Ghanti hates Hylian Knights due the bandits she was raised by telling her that her parents were killed by them. It turns out that it's the other way around: her parents were Hylian Knights who were killed by bandits, who then abducted her.
* The Legend of Zelda: A Link to the Past Great Fairy has a monstrous face due to Ganon's curse.
* The Legend of Zelda: A Link to the Past has a similar strategy, losing and regrowing his head through the fight while the extra heads attack Link.
* The Legend of Zelda: A Link to the Past has a weak point (often shaped like a flower) in its tail.
* The Legend of Zelda: A Link to the Past has something similar to the first Zelda game, but with an Iris Out before hand.
* The Legend of Zelda: A Link to the Past has two rope bridges spanning Death Mountain's halves. The upper bridge is surprisingly sturdy and safe, while the lower one is impassably broken. It is possible to jump off the last plank of the broken bridge, but doing so only sends the player plummeting into a bottomless dark chasm.

* The Legend of Zelda: A Link to the Past, Helmasaur King covers its weak point with a ceratopsian, three-pronged, bony blue mask that must be broken with Bombs or the Magic Hammer.
* The Legend of Zelda: A Link to the Past. However, when the monster's ghost appears in Ganon's Tower, Link identifies it as Moldorm.
* The Legend of Zelda: A Link to the Past (in both worlds), so how either remain somewhat stable is unknown.
* The Legend of Zelda: A Link to the Past: In Chapter 5, Link decides to lie down and rest for a bit, only to be woken up by Zelda, who reminds him that he only has until sundown before Agahnim casts his final incantation on her.
* The Legend of Zelda: A Link to the Past in exchange for keeping his whereabouts a secret.
* The Legend of Zelda: A Link to the Past: In the first chapter, Agahnim vanishes into blue mist with Zelda in his clutches.
* The Legend of Zelda: A Link to the Past: In the game's intro, the King of Hyrule, recently "eliminated" by Agahnim, is shown seated on his throne as a skeleton.
* The Legend of Zelda: A Link to the Past in the original Japanese. The two manga adaptations as well as the North American comic use the former explanation.
* The Legend of Zelda: A Link to the Past: In the rubble of the Dark Palace, a knight introduces himself as Roam and challenges Link for the right to wield the Master Sword.
* The Legend of Zelda: A Link to the Past is where you find the sixth Dark World dungeon, Misery Mire. There is also the Plains of Ruin, which are the Dark World counterpart of the Great Swamp in Hyrule; they contain its second dungeon, the Swamp Palace.
* The Legend of Zelda: A Link to the Past: Lighting up the two torches temporary blinds Ganon for a moment, giving Link the perfect time to stun him.
* The Legend of Zelda: A Link to the Past. Likely done to tone down the violence for the young gaming audience.
* The Legend of Zelda: A Link to the Past likewise features giant ribcage tunnels in its take on the area.
* The Legend of Zelda: A Link to the Past, Link acquires a whistle that summons a large bird to carry him away on the overworld. Mainly this is useful for quick transportation, but is also handy if you're swamped by soldiers or the like.
* The Legend of Zelda: A Link to the Past: Link and the fairy duo head out to the Swamp Palace but discover that it's completely dried up. Link calls to Sahasrahla for help and asks him to go to the Light World location of the Palace, where Sahasrahla and the boy find a fountain. The boy, excited to see Link in the pool of water, suddenly shouts at Link to look out for the Taurus right behind him.
* The Legend of Zelda: A Link to the Past: Link ends up getting thrashed by a Wizzrobe, requiring Zora to rescue him.
* The Legend of Zelda: A Link to the Past, Link gets framed for kidnapping Zelda despite the fact that it was really Agahnim who at first simply locks her in the castle's dungeon, but later banishes her to the Dark World. Agahnim also has fame for ridding Hyrule of drought and pestilence.
* The Legend of Zelda: A Link to the Past: Link grows distant after Ganon's defeat, dedicating his life to guarding the Triforce.
* The Legend of Zelda: A Link to the Past, Link has no choice but to kill soldiers who either are brainwashed or do not realize or care that their king has been murdered and that they should be fighting Aghanim's "government".
* The Legend of Zelda: A Link to the Past, Link periodically turns into a bipedal grey wolf in the Dark World.
* The Legend of Zelda: A Link to the Past, Link's uncle has a droopy and very bushy black moustache. And he may not be as badass as his nephew, but he can and did put an honorable fight before getting done in.
* The Legend of Zelda: A Link to the Past: Link, using the Book of Mudora in the Desert of Mystery, reveals a scorpion statue that has the Pendant of Power hang on it. Before Link can approach it, he sinks into the quicksand — and resurfaces on top of a Lanmola. Eep!

* The Legend of Zelda: A Link to the Past. Luckily, Link gets the Magic Mirror right before he enters, and uses it to return to Hyrule. The mirror is used extensively in the second half of the game as Link finds more portals and collects crystals from the Dark World dungeons.
* The Legend of Zelda: A Link to the Past. Most likely the town wasn't always that way. There also are citizens who aren't dangerous, but are very strange (they appear to all be in some mask cult).
* The Legend of Zelda: A Link to the Past: Nobody in Kakariko takes Link very seriously. Even Sahashrala's wife finds it surprising that the Pendant of Courage was entrusted to him.
* The Legend of Zelda: A Link to the Past of the maidens were sealed inside magic crystals, just as Ganondorf intended in the first place. So in the Thieves' Town dungeon, you probably realize immediately that something isn't right when you find the maiden imprisoned in a prison cell. The "maiden" also asks you to take her outside, but if you try to do so, she won't actually let you. Turns out, "she" is actually the dungeon boss in disguise.
* The Legend of Zelda: A Link to the Past: On Death Mountain, Link sees a vision of his dead parents standing with his uncle. Link reaches for his mother's hand when she extends hers out to him, but Link's hand turns into a werewolf claw when it passes the portal's boundary.
* The Legend of Zelda: A Link to the Past opens with militaristic staccato beats, giving it a warlike energy evocative of "Mars".
* The Legend of Zelda: A Link to the Past people cursed by the Dark Realm may turn into a talking animal, if they're lucky (compared to some of the freakishly disturbing transformations Link comes across)
* The Legend of Zelda: A Link to the Past plays up Link's and Zelda's queenly/knightly relationship to the point where it's romantically tinged.
* The Legend of Zelda: A Link to the Past provides this for everyone, even characters who have died.
* The Legend of Zelda: A Link to the Past. (Rather than an actual mask, Zora plucks off one of his own scales and slaps it on Link's mug.)
* The Legend of Zelda: A Link to the Past released on the SNES averages out to around 12 million copies, making it the bestselling third-party game for the system.
* The Legend of Zelda: A Link to the Past remake. His design, however, is more reminiscent of a teen in his early teens according to official art. The similarly aged Marin and Zelda are also depicted as looking teenage.
* The Legend of Zelda: A Link to the Past, resulting in him and the Sacred Realm being transformed to reflect his dark desires.
* The Legend of Zelda: A Link to the Past, Roam plugs two of Trinexx's heads with arrows, just in time to save a hapless Link.
* The Legend of Zelda: A Link to the Past, Roam's Dark World form gives him a pair of wings on his back. This allows him to both fly and fight at the same time.
* The Legend of Zelda: A Link to the Past: Sahasrahla is an old man who lives in the ancient ruins of the Eastern Palace, ready to give Link expository details about the Imprisoning War and a quest to obtain the Master Sword.
* The Legend of Zelda: A Link to the Past, Sahasrahla telepathically contacts Link through special tiles to give hints or move the plot along.
* The Legend of Zelda: A Link to the Past sees his child self unable to pluck a small plant from the ground without a bracelet that gives him "Goron strength".
* The Legend of Zelda: A Link to the Past: Shortly after witnessing a vision of his parents, Zelda appears to Link in the desert, causing him to brush it off as another mirage. Zelda claims that they are in a dream, for if two people dream the same thing, they will run into each other.
* The Legend of Zelda: A Link to the Past: Stronger varieties of soldiers simply have differently colored armor. Interestingly enough, the color coincides with the colors of Link's own armor upgrades obtained later in the game (green being the standard version, blue being stronger than green, and red being the strongest). Most enemies in the Dark World are a redesigned version of a Light World enemy with

similar behavior.
* The Legend of Zelda: A Link to the Past takes Link's uncle's form and gives a similar line before attacking.
* The Legend of Zelda: A Link to the Past that latches on to wooden objects or specialized targets. In this game specifically, it is the flagship item of the Swamp Palace.
* The Legend of Zelda: A Link to the Past: The Ball-and-Chain Soldier, much more durable than the generic types and his one attack can dish out heavy damage in early game. One of them even serves as a Mini-Boss guarding Princess Zelda herself.
* The Legend of Zelda: A Link to the Past, the Dark World feeds on the more unpleasant emotions, threatening to turn Link into a beast a few times. The hotheaded Roam is even more susceptible.
* The Legend of Zelda: A Link to the Past; the Golden Realm. On the other hand, the power he gained from that conquest would have led to him breaking into the Light world and conquering it as well, so it may have been fulfilling his wish in a sort of roundabout fashion.
* The Legend of Zelda: A Link to the Past: The opening of the game strongly implies that Agahnim murdered Zelda's father upon usurping the throne (the king is shown as a skeleton, among other things). He was also indirectly responsible for the death of Link's uncle, who served as a father figure to Link. After recieving a telepathic distress call from the captured Zelda, Link journeys out to defeat Agahnim and save Hyrule.
* The Legend of Zelda: A Link to the Past: The Pendant of Courage gives Link the jolt he needs to cut a soldier in half. This sends the other mooks wailing out of the temple in terror.
* The Legend of Zelda: A Link to the Past: The purple Dark Link of the GBA remake is the last "Dark Link" to be fought, is the most resilient, and can copy all of the real Link's sword techniques.
* The Legend of Zelda: A Link to the Past: The sun never rises in the Dark World.
* The Legend of Zelda: A Link to the Past, this is how you trigger the boss fight with the boss underneath Kakariko village. You are told he kidnapped one of the descendants of the sages, and in some way, you can say he did it, but he also disguised himself as the girl and hid himself in his own prison. Of course, it gets rather obvious something's up when the "hostage" doesn't want to leave the dungeon through the exit...
* The Legend of Zelda: A Link to the Past: Those trapped in the Dark World are cursed to become beasts without artifacts or heroic willpower. Roam, however, takes advantage of being able to become an eagle.
* The Legend of Zelda: A Link to the Past, though, Link wants to take Agahnim down because the sorcerer killed his uncle right in front of him.
* The Legend of Zelda: A Link to the Past, three different chests can contain the magic lamp: the one in the house Link wakes up in, another one in a tunnel under the castle, and the last one in Princess Zelda's cell. There's only one lamp; the second and third chests are backups for the first one in case you somehow didn't notice it; so, the lamp will magically appear in whichever chest you open first (if you open the other two, you find only 5 Rupees).
* The Legend of Zelda: A Link to the Past: Two "Dwarven Swordsmiths" can upgrade the Master Sword into the stronger Tempered Sword. They are the only dwarves to appear in the entire series, and nothing is made of their presence in a village otherwise made up entirely of Hylians.
* The Legend of Zelda: A Link to the Past: Upon arrival in the Dark World, Link is confronted by three thieves and their "boss," a huge cyclops Hinox. They make trouble by questioning Link about a fairy they're hunting.
* The Legend of Zelda: A Link to the Past: We never do learn exactly what Link wishes when he touches the Triforce. Clearly it involves restoring Hyrule to its former glory, but it would have been kind of neat to see his actual choice of words.
* The Legend of Zelda: A Link to the Past: When Ganon reveals himself in Ganon's Tower, Link uses the flute to summon the bird to give chase and take him to the

Pyramid of Power. However, during regular gameplay, the bird can only be summoned in the Light World.
* The Legend of Zelda: A Link to the Past: When Link finds his uncle dying in the sewers of Hyrule Castle, he is told to take his sword and save Princess Zelda.
* The Legend of Zelda: A Link to the Past: When Roam sniffs at Link's "immaturity," deriding all the crap he's been through, Link throws a tantrum. "I'll show YOU who's weak!"
* The Legend of Zelda: A Link to the Past: When the Water Palace begins to flood, the Taurus grabs onto a Hinox, gasping that he can't swim. The Taurus's armor ends up dragging them both underwater.
* The Legend of Zelda: A Link to the Past, where the palace guards have the townspeople convinced that he's responsible for Princess Zelda's disappearance. He has to slink around Kakariko Village in order to achieve his objectives; if his neighbors spot him, they send for the guards to kill him.
* The Legend of Zelda: A Link to the Past, which does raise the question of why he's still keeping them around.
* The Legend of Zelda: A Link to the Past which led to the Triforce being sealed in the Sacred Realm in the first place.
* The Legend of Zelda: A Link to the Past with a completely different function (jumping instead of invisibility).
* The Legend of Zelda: A Link to the Past: With no way to reach Ganon's floating castle, Roam goes a little nuts and surrenders to his eagle form. Back on the ground, Zelda says a prayer to the maidens, who magically float her and Link into the structure.
* The Legend of Zelda: A Link to the Past, you find a girl trapped in one of the dungeons who asks you to lead her out, but if you do so she tells you not to go out that way. You have to lead the "girl" into a room with bright sunlight coming in, which reveals her to be the boss Blind. Which makes it very odd that, when you first rescued her from the dungeon, she asked "Please, take me outside."
* The Legend of Zelda: A Link to the Past: Your Uncle survives long enough to give you his sword, but dies as he tries to tell you something very important: "Zelda is your..." He gets better along with everyone else killed after you beat the game, presumably because of Link's wish on the Triforce. We never find out what he was going to say, though, until the GBA re-release which alters his "dying" speech and he actually manages to finish what he was saying before dying. In the new version, he basically tells Link that it's his destiny to save Zelda and that he really enjoyed their time together.
* The Legend of Zelda, all of the myths of Hyrule are proven to be true.
* The Legend of Zelda also introduces the Twilight World, which may be part of the Dark World or a different plane entirely.
* The Legend of Zelda also makes it possible for your horse to take damage and die, in addition to letting you use a variety of melee weapons on horseback, doubling the damage of melee strikes done while galloping, and spawning mounted enemies in several areas.
* The Legend of Zelda, although you would never tell from the sprites. In addition to the long sideburns from other games, his bangs also point straight forward.
* The Legend of Zelda) always incredibly versatile and useful items, showing the value of reusing and recycling.
* The Legend of Zelda, and its especially prevalent in anything having to do with Link's character development across each story.
* The Legend of Zelda, and none consider themselves part-Hylian. Contrast this with Granté, who is half-Hylian, half-Sheikah and both looks and is explicitly identified as such.
* The Legend of Zelda animated series, Link is transformed into a frog. At the end of the episode, after he is cured, he still reflexively grabs and eats a fly.
* The Legend of Zelda an overarching puzzle in terms of how to get across the rooms.
* The Legend of Zelda are barely remembered, with the one Gerudo character who does bring it up considering it a disgrace to her people's honor.

* The Legend of Zelda are either in the southeast (in the early games) or in the north/northwest (in the later ones).
* The Legend of Zelda are still hostile towards Link, there are a handful of them that are friendly and their queen states that some of her underlings ignore her orders on not attacking everyone they see.
* The Legend of Zelda are zombies with large rectangular teeth — in the former made all the creepier by the coffin-wood masks they wear.
* The Legend of Zelda: As Link is a Heroic Mime in the series proper, perhaps this is the only way he could truly talk. He holds up a sign saying "PLEASE LOOK UP THE MANUAL FOR DETAILS" in the opening scroll.
* The Legend of Zelda, as she wears royal dresses at ceremonies, and pants and boots when traveling around Hyrule.
* The Legend of Zelda at best and can be played with any knowledge of the other games.
* The Legend of Zelda a third of the most powerful holy artifact in the series, so he does have deity-like powers.
* The Legend of Zelda. Because of this, should they ever use it, the good guys only use the Triforce to resolve more immediate matters such as defeating just one instance of Ganon or restoring the damage done by said villain.
* The Legend of Zelda beings (such as the goddess Hylia and a variety of lesser deities and immortal dragons).
* The Legend of Zelda both fit chronologically last in one of the three timelines. The diverse cities seen in other games, including their unique cultural development, history, and anything else they might have contributed is either lost or replaced by a barren wasteland filled with Moblins and Octorocks, hermits hiding away in caves, and a small number of remote towns with a handful of people.
* The Legend of Zelda: Breath of the Wild 100 years before the game takes place.
* The Legend of Zelda: Breath of the Wild, a brutal centaur-like monster with more hit points than the game's final boss.
* The Legend of Zelda: Breath of the Wild, after Calamity Ganon loses its chance for a proper reincarnation, it transforms into Dark Beast Ganon and has to be stopped from rampaging across the world.
* The Legend of Zelda: Breath of the Wild after her soul is freed from captivity.
* The Legend of Zelda: Breath of the Wild, a game that was otherwise receiving rapturous praise from most other gaming outlets and reviewers at the time.
* The Legend of Zelda: Breath of the Wild, all of whom have their own reasons for letting him stay despite this knowledge.
* The Legend of Zelda: Breath of the Wild allow this; any food item which nearby a fire will become cooked after a while, meaning the player can happily bake a few apples using the burning corpse of a slain enemy.
* The Legend of Zelda: Breath of the Wild amiibo through the roof - not just new ones released for the game, but ones that had been available for months or even years already.
* The Legend of Zelda: Breath of the Wild among the Zora women, to the point that one female Zora soldier has even organized a fan club where the ladies can collectively swoon over him.
* The Legend of Zelda: Breath of the Wild and breaks down crying in Link's arms.
* The Legend of Zelda: Breath of the Wild and her pet Sand Seal Patricia in a way more befitting a child of her age. She'll get rather embarrassed if you catch her doing the former.
* The Legend of Zelda: Breath of the Wild and she will ram on the intruder to punish him for his trampling.
* The Legend of Zelda: Breath of the Wild and the most important young man in all of Hyrule.
* The Legend of Zelda: Breath of the Wild and the past's tragedy regarding them. There are four non-Hylian races, four dead Champions, each from the four races and four Divine Beasts once plioted by the Champions. The Champions represent the four weapon types in the game. There are four Blights corrupting the Divine Beasts and four powers to be gained from the Champions' freed spirits.

* The Legend of Zelda: Breath of the Wild, and they like to put them in places such as treasure chests.
* The Legend of Zelda: Breath of the Wild and try to kill themselves unnerved a lot of players.
* The Legend of Zelda: Breath of the Wild, and upon meeting him for the first time deems him "the very picture of the hero I always imagined," but it wasn't until actually seeing him in-person that she becomes truly enamored with him.
* The Legend of Zelda: Breath of the Wild any others. Some are also upset by the mainstream success of Breath of the Wild in itself, seeing it as a potential reason for Nintendo to abandon the series' roots entirely.
* The Legend of Zelda: Breath of the Wild are able to fly, since by his measurements wings their size shouldn’t be strong enough to carry them (adult Rito are on average a few feet taller than humans, with the same proportions.)
* The Legend of Zelda: Breath of the Wild as a reward for completing all 120 Shrines in the game. It's basically the original, green tunic, only with dorky, toddler-like short sleeves and pantaloons. Some players found the design to be baffingly underwhelming, to say the least.
* The Legend of Zelda: Breath of the Wild: A variant occurs with bottomless bogs, patches of sucking mud encountered throughout Hyrule. Link will sink steadily the moment he enters them; he can cross them safely if he hurries, but staying in one for more than a few seconds will see him sucked down below the surface. Notably, objects that normally float when dropped in water, such as wooden weapons and monsters parts, will also sink instantly in this substance; however, amphibious enemies such as lizalfos and water octoroks can swim and float in it just fine.
* The Legend of Zelda: Breath of the Wild because his back hurts too much, leaving it up to Link and Yunobo.
* The Legend of Zelda: Breath of the Wild be killed by destroying their heads; if you don't get a one-hit-kill headshot, their skull just falls off temporarily and will join back up with its body if you don't destroy it quickly.
* The Legend of Zelda: Breath of the Wild but much of their territory is now lost to monsters and restricted to their close surrounding area.
* The Legend of Zelda: Breath of the Wild by Ganon's power, once freed they decide to stick around willingly so they can use the Divine Beasts to help Link in the final battle.
* The Legend of Zelda: Breath of the Wild by picking it up and tossing it off a cliff. His huge body also makes sense since he looks like a whale shark.
* The Legend of Zelda: Breath of the Wild. By the time Mipha was ready, she was killed by a minion of Calamity Ganon.
* The Legend of Zelda: Breath of the Wild, Cado got so obsessed with caring for his flock of Cuccos that it estranged him from his wife Rola.
* The Legend of Zelda: Breath of the Wild can be seen in different areas as a result of Calamity Ganon's corruption. Sometimes this growth has eyes and fanged mouths.
* The Legend of Zelda: Breath of the Wild cannons so Link can destroy them with Bomb Arrows and give the two of them the opportunity to board the Divine Beast. But Teba gets burned on one of his legs by a laser blast, forcing him to fall back to the Flight Range to recover.
* The Legend of Zelda: Breath of the Wild cannons while Link destroys those cannons with Bomb Arrows.
* The Legend of Zelda: Breath of the Wild capable of possessing the Divine Beasts and Guardians and turning them against Hyrule was a major unforeseen factor.
* The Legend of Zelda: Breath of the Wild characters have names derived from Japanese transliterations of English words relating to beauty and cosmetics. "Riju" comes from "rouge," "Buliara" in the Japanese version is "Beauler" (derived from "beau"), "Essa" comes from "aesthetics," "Fegran" comes from "fragrance," "Kohm" comes from "comb," "Laine" comes from "eye liner," "Isha" comes from "eye shadow," and so on.
* The Legend of Zelda: Breath of the Wild comes close to bucking the trend:
* The Legend of Zelda: Breath of the Wild: Compared to the Blight Ganons, various

monsters or even Ganon himself, Master Kohga of the Yiga Clan doesn't go down in an epic battle against Link. Rather, when he attempts his "ultimate move", which is just a giant spiky ball, he's too busy figuring out how to use it to notice it rolling towards him. He ends up falling into the pit, with the spike ball landing on top him. Link doesn't even do a single thing, like pushing the ball in the first place. Kohga met his end due to his own stupidity and absent mindedness.
* The Legend of Zelda: Breath of the Wild Compendium entry says the reason there are so few eyewitness accounts of them is because White-Maned Lynels won't let even a single passerby escape with their lives. This isn’t actually borne out in-game, where Lynels are the only type of monster that don’t immediately attack when they notice you.
* The Legend of Zelda: Breath of the Wild conceivably be averted if there were Gerudo women who fell in love with men of any of the non-human races, who are portrayed as being as tall as the average Gerudo, but no such pairing is depicted. Even in disguise asking the guard to go in, she'll comment that this "Gerudo" is too short, not tanned, and has blonde hair.
* The Legend of Zelda: Breath of the Wild continues with the tradition of flat chests for male Zoras. Female Zoras do have breasts, but they are small to the point where you'd have to be looking at them closely to notice. The Zora princess, Mipha, also falls under the same boat. The only difference between male and female Zoras are in skin color, where males are green, blue, or black while females are magenta. However, the Zora prince, Sidon, is magenta colored.
* The Legend of Zelda: Breath of the Wild, cuts a rather feminine figure in them. Several NPCs comment on his attractiveness when he's disguised as a girl — quite a few guys try to hit on him, in fact — and talking to one lovestruck NPC while wearing the Gerudo outfit unlocks side-quests to obtain the Sand Boots and the Snow Boots.
* The Legend of Zelda: Breath of the Wild) damage in a single shot. The smaller Guardian Scouts have smaller lasers that are not as damaging, but can be fired in rapid succession.
* The Legend of Zelda: Breath of the Wild deliberately averts this as much as possible with its open world, as shown by how Link is able to climb virtually any surface whereas in previous games he can only climb with vines. However, there are still obstacles Link simply cannot pass.
* The Legend of Zelda: Breath of the Wild descended from a line of Hylian knights. In one memory, Zelda muses on the pressure of being a slave to one's lineage, and wonders if Link would have chosen a different path in life if this wasn't the case. Yunobo is a more straightforward example, being a descendant of the Goron Champion, Daruk.
* The Legend of Zelda: Breath of the Wild, despite being a fairly serious game overall, uses Gravitational Consciousness in one instance. If Link uses the Stasis rune on someone on horseback (such as a Bokoblin), the rider remains magically locked in place while the horse runs off. When the rune (and thus the magic) wear off, the rider floats in midair for a second with a visible question mark over their heads, then falls to the ground.
* The Legend of Zelda: Breath of the Wild, destroying most vestiges of civilization as a result.
* The Legend of Zelda: Breath of the Wild: During the night, multiple types of enemies of varying level of strength will spawn randomly throughout the map. Thus, when journeying at night, Link will periodically be beset by skeletal Stal versions of regular enemies that emerge from the ground, swarms of batlike Keese, and Yiga Clan assassins. Downplayed in that Stal enemies and Keese are extremely weak and Yiga footsoldiers, while quick and annoying, aren't very strong either; their main threat comes from impending Link's progress, making fights against stronger foes more difficult, and gradually wearing down Link's health and weapons through their constant onslaughts. However, night also brings the stronger Yiga blademasters and rouses the large, powerful Stalnoxes that rest inertly in the ground during the day. Traveling by night is generally fairly dangerous in the early game and more trouble than it's worth later on, hence the game providing the ability to skip

ahead to dawn at campfires.
* The Legend of Zelda: Breath of the Wild dynamic that matches their respective sizes: Sidon is energetic and sociable, while Mipha is quiet and demure.
* The Legend of Zelda: Breath of the Wild entries and the actual entities they describe.
* The Legend of Zelda: Breath of the Wild). Every subsequent interaction with him sees her easily flustered by his mere presence. And that's not even mentioning her reaction if Link talks to her without a shirt on.
* The Legend of Zelda: Breath of the Wild, except that it's chipped and rusting much like it is briefly in-game.
* The Legend of Zelda: Breath of the Wild explicitly mention her love for him.
* The Legend of Zelda: Breath of the Wild, extra enemies spawn on floating platforms held up by balloons.
* The Legend of Zelda: Breath of the Wild features various types of hammers. The common Sledgehammer can often be found in Shrines and near mines, while the Gorons have modified several greatswords into functional hammers. These weapons are useful for hitting objects under Stasis, breaking apart mineral nodes, and damaging the rock-based Pebbits and Taluses.
* The Legend of Zelda: Breath of the Wild fort, garrison and training camp seen around Hyrule is in ruins and taken over by monsters and littered with rusted weapons concentrated in small clusters, invoking this trope.
* The Legend of Zelda: Breath of the Wild for their daughter Finley. The Sheikah scientist Robbie also has one with his current wife Jerrin. His first love was a woman named Cherry, after whom he named his mechanical "ancient oven" (though he stopped referring to it by that name after seeing how much this upset Jerrin).
* The Legend of Zelda: Breath of the Wild found across Hyrule, though they were forced to abandon it because the other races became afraid of it. Yet when said technology was rediscovered a century before the events of the game, it is the Sheikah who are instrumental in redecifering how it functions; Zelda is the only non-Sheikah who is able to keep up with them.
* The Legend of Zelda: Breath of the Wild freezes all enemies on screen while Link either collapses or ragdolls as he dies, depending on what the last attack to him did. A short tune plays as Game Over appears while the screen fades to black.
* The Legend of Zelda: Breath of the Wild games. This is due to the main quest consisting of only four main dungeons, each of which are very small on their own, one final dungeon which consists of many optional segments and little required ones, and very brief pre-dungeon quests to open the way to each dungeon.
* The Legend of Zelda: Breath of the Wild Ganon Blight that uses a bastardized version of their element/power/weapon.
* The Legend of Zelda: Breath of the Wild girl Kheel is trying unsuccessfully to get her sisters to come to singing practice, she speculates that they'll be more likely to listen to a "big scary Hylian" like him.
* The Legend of Zelda: Breath of the Wild Gorons have no interest in gems because they taste bad. So they sell them to other races, who are willing to pay a lot of money for them for some reason the Gorons don't understand, nor do they bother to question.
* The Legend of Zelda: Breath of the Wild has flashbacks where he begins to recover his memories while others are around. Every time there are others around they notice that he has zoned out for these flashbacks and comment on it when he snaps back to the present.
* The Legend of Zelda: Breath of the Wild has not stopped certain factions of the fanbase from shipping her with Link upon the revelation that she fell in love with him before she was killed by Waterblight Ganon and was even planning on proposing to him.
* The Legend of Zelda: Breath of the Wild has several in the library of Hyrule Castle. One hides a tunnel leading to a dock, while another hides King Rhoam's secret study.
* The Legend of Zelda: Breath of the Wild has skeletal horses you can ride, as well as Stalfos versions of most monsters.

* The Legend of Zelda: Breath of the Wild has the latent powers kick in variant. Zelda stands in front of Link with her hand up, which should be ineffectual against the possessed guardian: but because she loves Link the power of the Goddess activates and kills the guardian.
* The Legend of Zelda: Breath of the Wild has this happen with all the Sheikah Shrine Monks after they have given you their Spirit Orbs.
* The Legend of Zelda: Breath of the Wild has two Gatehouses on the middle level of the structure on the path leading to the Sanctum. If Link walks into them, the gates will slam shut and a Lynel will suddenly appear to attack.
* The Legend of Zelda: Breath of the Wild; he's seen wearing the Hood with his Champion's Tunic on the Rider amiibo.
* The Legend of Zelda: Breath of the Wild, he would not stop fighting in order to protect Zelda's life. He collapses and would have died had it not been for Zelda's intervention.
* The Legend of Zelda: Breath of the Wild. However, you can read the diary of Paya, Impa's granddaughter, and discover that she has an "Auntie Purah," tipping you off to the ruse well beforehand.
* The Legend of Zelda: Breath of the Wild, if Link is out in the open at night, he may sometimes get attacked by large swarms of Keese from out of nowhere. They can be scared off with a good attack that takes out a few of them, though.
* The Legend of Zelda: Breath of the Wild. If you head straight to fighting Calamity Ganon after the tutorial section, you'll still get enough plot exposition to know what's at stake. But completing the other story quests will not only make the fight much easier from a gameplay perspective, they'll also provide you with further clarification on what Link's relationships with Zelda and the Champions were like.
* The Legend of Zelda: Breath of the Wild. If you take a look inside his house, you'll see that the walls are completely covered with drawings of the birds.
* The Legend of Zelda: Breath of the Wild in almost every combat encounter, there are two specific sections where it is required: the mission to board Divine Beast Vah Rudania, and the mission to infiltrate the Yiga Clan Hideout.
* The Legend of Zelda: Breath of the Wild in her bedroom or with her actual sand seal Patricia in the latter's pen.
* The Legend of Zelda: Breath of the Wild in relation to the shorter Link.
* The Legend of Zelda: Breath of the Wild in terms of natural barriers. The north and and west portions of Hyrule are cut off by a massive gorge, the southwest has an expansive desert, and the south and east are nothing but the sea. The gorge is too wide to fully cross and too deep to go down safely, the desert kicks up an impassible sandstorm if you try to go any further (if you still try, the game will trigger the message "You can't go any farther"), and venturing beyond the sea just greets you with an invisible wall. Trying to climb cliffs near these barriers will have the game force Link to dislodge from the wall to prevent him from climbing. What makes it stranger is the world map does show more landmass beyond the desert and chasms, but no one in game ever mentions it.
* The Legend of Zelda: Breath of the Wild in the fight against Calamity Ganon.
* The Legend of Zelda: Breath of the Wild in the Gerudo Desert, there are also Sand Seals, walrus-like beasts of burden that swim through sand like it is water.
* The Legend of Zelda: Breath of the Wild in the northern reaches, and the snowbound Mount Lanayru in the lower central region. As well as this, on the Great Plateau where you start the game, the cold Mount Hylia is located to the south-west, while the northern section is forested.
* The Legend of Zelda: Breath of the Wild. In the second phase of the fight, it detaches the spikes projecting from its back and uses them to redirect its shots to confuse Link as well as to fire condensed blasts of wind from its arm cannon. The drones can be temporarily taken out.
* The Legend of Zelda: Breath of the Wild, in this game she has been fighting Ganon non-stop for 100 years. She's finally beginning to lose the battle as the game begins, so she needs you for backup.
* The Legend of Zelda: Breath of the Wild is absolutely adorable and beautiful.

* The Legend of Zelda: Breath of the Wild is absolutely obsessed with monsters, to the point of running a traveling monster-themed shop called Fang and Bone and wearing makeup and clothes that make him look monstrous.
* The Legend of Zelda: Breath of the Wild is freestyle, and if your Stamina Wheel runs out, Link will slip and fall; however, if the surface isn't too steep, you can keep pushing toward the rockface to break your fall and give the Wheel some time to refill before continuing. If you're climbing a wet surface (e.g. rock climbing during rainfall), you will always slip down the rock after climbing a little. You can keep trying, but that will only wear you out faster.
* The Legend of Zelda: Breath of the Wild is indeed erupting due to Divine Beast Vah Rudania's influence, the real threat when scaling the mountain comes from the fiery cannonballs Vah Rudania shoots at trespassers.
* The Legend of Zelda: Breath of the Wild is likely to avert this very frequently, however this doesn't stop people from trying, but this Link is a lot more forceful and insistent on being rewarded for the effort he puts in towards certain acts since he otherwise has no method of support and has to constantly fight for resources.
* The Legend of Zelda: Breath of the Wild is shown to be out of breath after another failed attempt to perfect Revali's Gale while verbally expressing his desperation to get it right. Upon seeing that Princess Zelda has been watching and listening to the whole thing, he quickly and pompously chastises her for eavesdropping.
* The Legend of Zelda: Breath of the Wild, it quickly becomes a running gag, complete with native Gerudo speakers coaching people having trouble with it to bite their lower lip as they pronounce the words.
* The Legend of Zelda: Breath of the Wild It's also possible that she wasn't, given that The Great Deku Tree cuts her off by insisting she should deliver the message herself, but the lead of up of "Tell him I—" sure seems to point in that direction.
* The Legend of Zelda: Breath of the Wild just about any time she looks at him.
* The Legend of Zelda: Breath of the Wild: Kilton, who runs the monster based Fang & Bone shop, is a Hylian. Unlike the rest of the Hylians, which look like the average human, Kilton is quite short and a little chubby, and has light green-blue skin, barely any hair, bright red lips, small fangs protruding from his mouth, and a tapering head as tall as the rest of his body.
* The Legend of Zelda: Breath of the Wild, King Rhoam attempted to stop Calamity Ganon's reawakening after hearing a prophecy of it. His efforts to revive the Guardians and the Divine Beasts, funding a massive military, assembling the Champions and getting Zelda to unlock her powers quickly were all done to prevent the Hyrule kingdom's fall. It fell nevertheless, as it was foreseen 10,000 years ago. The towers and shrines did not activate during the king's reign. It was not the right time. It would not occur until well after the fall of Hyrule.
* The Legend of Zelda: Breath of the Wild Korok puzzles to find and solve, among other things.
* The Legend of Zelda: Breath of the Wild lasers at Hyrule Castle, taking out 1/8 of Ganon's health bar per beast (for a total of half if you freed them all) in a burst of glorious light. The lasers are each as large as one of the castle's towers.
* The Legend of Zelda: Breath of the Wild leader. Link has the option to say he "has a big dumb belly", which naturally doesn't go over well.
* The Legend of Zelda: Breath of the Wild like Kass. Link is even smaller than Revali and has no trouble wielding it either
* The Legend of Zelda: Breath of the Wild. Link can bring this up at a bar, but no one believes it, leading to the above.
* The Legend of Zelda: Breath of the Wild: Link can shoot electric arrows, bomb arrows, or remote bombs at fish swimming in bodies of water, which causes large amounts to rise to the surface.
* The Legend of Zelda: Breath of the Wild. Link has to enter the four Divine Beasts and purge them of Ganon's influence so the souls of their pilots can regain control

and aid him in the final battle.
* The Legend of Zelda: Breath of the Wild, Link himself served this role to the "Big Bad Bazz Brigade", a trio of Zoras that he mentored in swordsmanship.
* The Legend of Zelda: Breath of the Wild, Link initially stays silent when interacting with Zelda. Only when she starts cooking him meals does he finally open up about his hopes and fears (all offscreen, though).
* The Legend of Zelda: Breath of the Wild Link is the old Hylian Champion and a man based solely on him carrying the Sheikah Slate.
* The Legend of Zelda: Breath of the Wild looks to be 90% torso, and given how large he is, that is a lot of torso. His son Sidon is a less drastic example.
* The Legend of Zelda: Breath of the Wild love decorating their armor and weapons with lavish amounts of gold and jewelry. The Zoras weaponry are also plated with silver, which actually prevents corrosion with water.
* The Legend of Zelda: Breath of the Wild machines that defeated it 10,000 years ago in an act of unexpected tactical foresight.
* The Legend of Zelda: Breath of the Wild — using them will always result in Dubious Food — but the result will always be edible. Kilton the monster shop owner seems to have perfected this technique, and sells bottles of purple "monster extract" that can be used to cook much more nutritious monster-based meals, although their descriptions note how these aren't for everyone and you'll either love or hate the taste.
* The Legend of Zelda: Breath of the Wild mean that boss fights often become this, as you devolve from hitting the thing with a Royal Claymore and shooting three bomb arrows at a time, to just wailing on it with the weapons that dropped from those mooks you killed earlier. In a pinch, players might even resort to throwing their endless supply of comparatively-weak bombs.
* The Legend of Zelda: Breath of the Wild minibosses and the final boss require hitting weak points to deal damage at all.
* The Legend of Zelda: Breath of the Wild more relevant to the main plot, the rest deal with less important background details such as why Zora Armor is used in marriage proposals, how King Dorephan got his forehead scar, etc.
* The Legend of Zelda: Breath of the Wild: Mount Satori, a supernatural mountain marked by the presence of a gathering of spirit-like beings on its summit during certain nights and by the absence of regular enemies on its slopes outside of the undead, is also home to immense flocks of crows constantly wheeling and circling in its skies and perching on its slops and cliffs. Similarly, the Bottomless Swamp — an area of sucking quicksand-like bogs, pools of deadly Malice, dead trees and giant stone skulls half-buried in the mire — is home to a similar, smaller flock of crows that circles above it at all times.
* The Legend of Zelda: Breath of the Wild: Multiple plants — voltfruit, numerous wildflowers, swift and endura carrots and fleet-lotus seeds — and various supernatural species of mushroom provide buffs when cooked into food, ranging from increased strength or physical energy to the ability to withstand elemental extremes.
* The Legend of Zelda: Breath of the Wild of everything else. Long ago, it had been deemed as a potential threat to the safety of Hyrule and further development was prohibited, but their technology remains scattered around the land.
* The Legend of Zelda: Breath of the Wild of ruined villages and farmholds (there are literally dozens of them all over the land, outnumbering by far the still inhabited settlements) hint that most of Hyrule's population died during the Calamity a century prior.
* The Legend of Zelda: Breath of the Wild of three different varieties of a particular enemy.
* The Legend of Zelda: Breath of the Wild. One of its primary tactics is to warp towards you, swing at you with its sword, then warp away before you can respond... unless you're able to parry its strike, which leaves it open to attack.
* The Legend of Zelda: Breath of the Wild: One of Link's memories shows that after he and Zelda fled from Hyrule Castle in the wake of Calamity Ganon's return, she broke down sobbing in Link's arms because, despite all their preparations,

everything had gone wrong, leading to the deaths of her father and the Champions, and the destruction of most of the kingdom. The kicker? She was supposed to be the one to seal Calamity Ganon away, but she utterly failed in unlocking her power to do so. As far as Zelda was aware, the destruction of her home and the death of nearly everyone she ever knew was due to her own incompetence.
* The Legend of Zelda: Breath of the Wild on Link and again, it's left up to the air if Link reciprocated those feelings. Kass's teacher was the court poet for the Hyrule royal family and fell for Zelda but she only had eyes on Link. There was also Kodah, another childhood friend of Link's, who also chased after him.
* The Legend of Zelda: Breath of the Wild (or rather, in a barrel) downriver in the hopes that she'll find true love with whatever "prince" finds it. Link can follow the barrel as it goes downstream and convinces the guy who gets it, Sasan, to go meet Finley in-person.
* The Legend of Zelda: Breath of the Wild: Paya can be heard sighing every so often when she is talking to Link.
* The Legend of Zelda: Breath of the Wild plays with this. Boy meets girl. Boy meets other girl, who coincidentally has the blood of the goddess (no biggie). Girl with blood of goddess sends OG girl to die at the hands of an ancient evil. Boy and girl with blood of goddess live happily ever after???
* The Legend of Zelda: Breath of the Wild, Pools of Malice will often feature toothy mouths that even "give birth" to floating monster skulls.
* The Legend of Zelda: Breath of the Wild pulling everyone into a bear hug at the last second). Link receives a copy of the photo afterwards and can hang it up on the wall in his house at Hateno Village (provided he bought all the upgrades).
* The Legend of Zelda: Breath of the Wild quickly caught on to memetic levels once it was first shown off.
* The Legend of Zelda: Breath of the Wild robots that the Kingdom of Hyrule had originally dug up for the express purpose of fighting against Ganon. Not only were the soldiers woefully outgunned, they hadn't anticipated their own weapons being used against them. We never get to see whether or not the army was truly useless as usual under normal circumstances, but it's clear the odds were heavily stacked against them this time, and compared with previous games NPCs are far more likely to praise the strength and bravery of those doomed soldiers.
* The Legend of Zelda: Breath of the Wild, several diaries make it a point to say just how skilled with a sword he is. Zelda's personal diary even mentions he was able to best fully grown opponents whilst he was still just a child.
* The Legend of Zelda: Breath of the Wild. She is a childhood friend of Link's who harbors strong affection for Link and was a little upset to realize that as Zelda's appointed knight, Link would be spending much more time with the princess. When the Champions were taking a photo, Mipha at first timidly stands away from Link but shuffles closer when Zelda looks away for a moment.
* The Legend of Zelda: Breath of the Wild. She's so ignorant of romance that when she develops a crush on Link, she thinks she has fallen ill at first.
* The Legend of Zelda: Breath of the Wild; shops DO have a limited supply of items to purchase, but they all restock when the Blood Moon rises.
* The Legend of Zelda: Breath of the Wild" since he was in fact marked for death when he left the organization. Then Link saves him and they wisely back off.
* The Legend of Zelda: Breath of the Wild. So did Seggin, who is stated to have taught her how to wield a spear.
* The Legend of Zelda: Breath of the Wild, so its spirit began to possess the Divine Beasts and Guardian, killed the Champions and turned the battle in its favor.
* The Legend of Zelda: Breath of the Wild soldiers created by the Sheikah to aid in Hyrule's defense. The grounds around Hyrule Castle, where Ganon is contained, are infested with Malice as well. The ancient dragon Naydra is first found covered in Malice, which Link needs to destroy to free it.
* The Legend of Zelda: Breath of the Wild. Soon after, Ganon emerges and utterly devastates Hyrule.
* The Legend of Zelda: Breath of the Wild, so the age gap between Link and Sidon is

much narrower than it first appears).
* The Legend of Zelda: Breath of the Wild, so this trope is played straight for the monsters he fights to protect Zora's Domain, particularly that giant Octorok whose stomach he speared his way out of.
* The Legend of Zelda: Breath of the Wild suggesting that more underwater exploration may have been a planned thing at some point in the game's development.
* The Legend of Zelda: Breath of the Wild tablet computer. Known in-game as "Runes", they are downloaded onto the Sheikah Slate via magical liquid, and appear similar to apps on real-world tablets.
* The Legend of Zelda: Breath of the Wild take advantage of snarking his way through everything. Sometimes Link can get forced choices with only one dialogue option to choose from, making the trope downplayed.
* The Legend of Zelda: Breath of the Wild talks of "The Miracle of the White Scale", where a former king was saved from a lethal blow in combat when his enemy was blinded by the sunlight reflecting off of a scale that his wife had woven into to his armor. It then became tradition for Zora princesses to craft armor for their intended husbands in honor of this event.
* The Legend of Zelda: Breath of the Wild that appears every few nights and explicitly respawns all monsters but in the background also affects all items laying around and overall reverts the world to its untouched state. If one picks up enough items or kills enough enemies, the game will actually do an instant Blood Moon regardless of the time of day.
* The Legend of Zelda: Breath of the Wild that strip him of his armor (the latter gradually gives you temporary substitutes as you progress).
* The Legend of Zelda: Breath of the Wild that when she suddenly develops a crush on Link, she initially thinks she has contracted some illness, to the point that she asks her grandmother and their two bodyguards for some medicine and advice.
* The Legend of Zelda: Breath of the Wild, the Champions were chosen precisely because they were the best warriors of their respective races. Even a hundred years after their deaths, they are still renowned for their power and skill.
* The Legend of Zelda: Breath of the Wild, the Gerudo chief Riju's hair is ankle length even when tied into a braid wider than her waist.
* The Legend of Zelda: Breath of the Wild, the Great Deku Tree can once again be entered by Link, though there are only a shop and a bed inside this time around.
* The Legend of Zelda: Breath of the Wild the Guardians and Divine Beasts to decimate Hyrule.
* The Legend of Zelda: Breath of the Wild, the main evidence that the Calamity happened are the blasted ruins and decayed Guardians strewn about Hyrule. There's also the original battle between Hyrule's combined forces and Ganon 10,000 years prior, which is only depicted on a mural in Impa's home.
* The Legend of Zelda: Breath of the Wild, the modern "Champions" are all related to the previous Champions who were murdered by Ganon. All except for Teba, who has no blood ties to Revali. He also is the only one of the batch who is already an adult with a family, while the rest of the lineup are teenagers or young adults at best.
* The Legend of Zelda: Breath of the Wild, then worked perfectly when switched on to fight Ganon the second time around. Unfortunately for those in Hyrule, this continued when Ganon hijacked them, and right through the 100 years Link's been sleeping in the Shrine of Resurrection plus the adventure itself.
* The Legend of Zelda: Breath of the Wild, the ocean is to the south and east.
* The Legend of Zelda: Breath of the Wild: the Stasis rune allows Link to stop a single object, but what makes this special is that he can attack the frozen object to build up kinetic energy, which is resolved as soon as the effect breaks. The upgraded version of this rune can stop enemies as well.
* The Legend of Zelda: Breath of the Wild: The Zora are stated to live for hundreds of years. One NPC in Zora's Domain recalls playing with Link when they were kids, but although Link has been in stasis for the past century and has an excuse to still have a youthful appearance, the Zora also looks like a young adult. In a sidequest, you can additionally hook up a human man and a Zora girl who are around

the same age temporally—but the human is an adult while the Zora is still a child (physically anyway: according to the Zora, they mature emotionally and mentally before they do physically, so there's a relatively brief window where they have the mind of an adult and the body of a child).
* The Legend of Zelda: Breath of the Wild, things get much more rousing.
* The Legend of Zelda: Breath of the Wild this ability is also given to Vah Ruta and Vah Naboris.
* The Legend of Zelda: Breath of the Wild This game at least establishes to an extent not seen in previous games that dark-skinned Hylians are about as common as light-skinned ones.
* The Legend of Zelda: Breath of the Wild, this trope is referenced and played for laughs. In Hyrule Castle, there are some books that can be found containing recipes from the royal family. One of these is the Monster Cake, which is described as the chancellor's favorite and a "dangerous" dish that might motivate one to plan evil schemes.
* The Legend of Zelda: Breath of the Wild, though a handful of Sheikah are working to recover their lost knowledge.
* The Legend of Zelda: Breath of the Wild, though he's also able to acquire a variety of other weapons that can freeze enemies solid, such as Ice/Blizzard Rods, Frostspears and (Great) Frostblades.
* The Legend of Zelda: Breath of the Wild, though stables will unsurprisingly refuse to let you register them.
* The Legend of Zelda: Breath of the Wild (though the former didn't end up with the object of her affection).
* The Legend of Zelda: Breath of the Wild to force him to stay away. She nearly gets killed by the Yiga Clan because of this.
* The Legend of Zelda: Breath of the Wild to kickstart his Paraglider momentum—non-Amiibo runs use this to glide across Hyrule Field instead of wasting time taming a horse.
* The Legend of Zelda: Breath of the Wild too aggressive), and traveling Gerudo that Link encounters are often quite awkward when interacting with him. At least one actively flies into a panic when Link talks to her, whispering to herself to try and remember the lessons she was taught about what to do around a "voe".
* The Legend of Zelda: Breath of the Wild to signify their bond, but they wear the fabric in different ways. Link and Zelda wear theirs as tunics, Revali uses his as a scarf and also has a scrap tied to his bow to gauge the wind's direction, Mipha and Daruk wear them as sashes, and Urbosa's is a skirt.
* The Legend of Zelda: Breath of the Wild to snowier peaks such as Mount Hylia and the Hebra Peaks. There's usually a simple path that lets you walk like normal to spots that are important to the plot, but climbing can bring you to special hidden things such as Koroks.
* The Legend of Zelda: Breath of the Wild unless you have Bomb Arrows to hit it from a distance.
* The Legend of Zelda: Breath of the Wild: Upon freeing each of the Divine Beasts, Link is gifted with their respective champion's signature spells and weapons (though the weapons are given by separate NPCs rather than the champions themselves).
* The Legend of Zelda: Breath of the Wild variety. When they are reunited in the ending, however, they seem to be too preoccupied with their upcoming plans to rebuild Hyrule to be thinking about romance in the immediate future. That said, this could change when the sequel comes out.
* The Legend of Zelda: Breath of the Wild wandering around the colder and more northerly parts of the map.
* The Legend of Zelda: Breath of the Wild was incredibly skilled with a sword from a young age. Reading through Mipha's diary in "The Champions' Ballad" DLC reveals that he was already able to best grown men in single combat by the time he was four.
* The Legend of Zelda: Breath of the Wild was threatening Rito Village recently because she can use it as an excuse to not go to music practice.

* The Legend of Zelda: Breath of the Wild wears tight pants that don't leave much room for imagination.
* The Legend of Zelda: Breath of the Wild when he jumps from a tower at Inogo Bridge when you first meet him.
* The Legend of Zelda: Breath of the Wild when they'll suddenly reveal themselves as a Yiga and try to kill you.
* The Legend of Zelda: Breath of the Wild: When traveling at night, Link may be set upon by large wandering flocks of Keese, a type of batlike enemies. These will immediately bear down on him and attempt to swarm him up until he kills even a single one of them, at which point the whole flock will instantly turn tail and flee. A similar thing occurs with regular wolves Link can encounter in the wilderness, which come in packs of two to four and will attack him when they spot him. Despite their initial aggressiveness, they will cut their losses and flee like other animals do should Link kill one of their packmates.
* The Legend of Zelda: Breath of the Wild where one Gerudo woman named Risa says that if she had found an injured Voe (male Hylian) on the ground she'd bring him back home secretly and nurse him back to health... to which the instructor Ashai says is basically kidnapping (not to mention the Voe are banned from Gerudo town to make the Gerudo go out and explore Hyrule).
* The Legend of Zelda: Breath of the Wild where the developers wanted to recreate how Link appeared in his artwork from the very first game carrying every possible item. In this game, Link can be seen with a sword, a shield, a bow and quiver of arrows, and his Sheikah Slate.
* The Legend of Zelda: Breath of the Wild, which can be handy for fighting foes from a distance, it's fairly brittle compared to other weapons of similar strength,
* The Legend of Zelda: Breath of the Wild, which is why the innkeeper says nothing about Link's behavior on the Blissful Waterbed.
* The Legend of Zelda: Breath of the Wild, which prompted Nintendo to make it a dual release on both systems. The Switch version renders at a higher resolution, and features a more stable frame rate and higher quality audio.
* The Legend of Zelda: Breath of the Wild, while cooking only clearly inedible objects like ore or firewood produces Rock-Hard Food. They don't recover much health, and poor Link's eating animations for these items have him forcing himself to eat the Dubious Food and struggling to eat the Rock-Hard Food.
* The Legend of Zelda: Breath of the Wild. While Nintendo wasn't exactly lying in the trailer, the scene was just presented out of context for the sake of hype.
* The Legend of Zelda: Breath of the Wild, who can detect camouflaged Lizalfos and enemies hidden in the player's field of vision.
* The Legend of Zelda: Breath of the Wild, who is actually the last King of Hyrule. You don't find out until after the tutorial, which raises...questions.
* The Legend of Zelda: Breath of the Wild, who lack said vulnerability, but one Zora named Seggin instead unsuccessfully tries to develop an immunity to electricity by repeatedly touching a Shock Arrow.
* The Legend of Zelda: Breath of the Wild will be able to finish the game, but won't learn anything about the world, the nature of this Link's true identity, or the role Zelda had in the backstory.
* The Legend of Zelda: Breath of the Wild will be instantly killed if they enter water too deep to wade in — Bokoblins, Moblins, and all varieties of Stal- enemies can't swim at all (and for the latter, even throwing their skulls into water will suffice). However, this is not universal - Lizalfos are capable swimmers, and Hinoxes are surprisingly agile in water. Fire Keese take this one step further, as merely being caught in the rain is enough to kill them.
* The Legend of Zelda: Breath of the Wild will see through the disguise given a minute or two and attack anyway.
* The Legend of Zelda: Breath of the Wild with a hilt. It has one of the highest damage ratings out of all two-handed weaponry, although some of the parts required to make them are hard to come by.
* The Legend of Zelda: Breath of the Wild with Bomb Arrows. Teba originally planned to do everything on his own, but he discovered Link was a much better archer while

Teba was the better flyer.
* The Legend of Zelda: Breath of the Wild with Link and thus have no reason to hold him responsible. And the older Zora eventually soften their views once Link subdues Divine Beast Vah Ruta.
* The Legend of Zelda: Breath of the Wild, you actually get to control them in certain missions.
* The Legend of Zelda: Breath of the Wild you're looking at, the trope is either subverted or outright defied. While Zelda's feelings for Link are made pretty explicit, the Western version of the game leaves Link's side of things deliberately more ambiguous. The Japanese version, on the other hand, has the Adventure Log entries written from Link's perspective in first person, and he expresses a strong desire to save her and see her smile again, which strongly implies he reciprocates.
* The Legend of Zelda: Breath of the Wild You're then left to complete the game in which ever way you see fit but even the most direct ways can involve several of the techniques learned from the old man strung together.
* The Legend of Zelda), but in their subsequent appearances usually emerge from the ceilings instead. If one grabs hold of Link, he gets dragged back to the dungeon's entrance.
* The Legend of Zelda), but it's justified as significant period of time and/or space separate most of the games.
* The Legend of Zelda, but sadly for him this appearance usually isn’t remembered by fans.
* The Legend of Zelda by his rebelling minion, after he was trapped in an invulnerable sphere that can only be broken by the Triforce. He falls for quite a while, until the story eventually comes back to him when he realizes that his magic still works inside the sphere, and he conjures up a balloon to slowly float his way back out. Actual times or distances are never mentioned, though they are implied to be fairly ridiculous.
* The Legend of Zelda came in a golden cartridge and had a poster-sized foldout map of Hyrule which had the locations of the first four dungeons marked and could be used for taking notes. (Much to the general annoyance of people who owned the original, this map has not been re-released with any of the remakes.)
* The Legend of Zelda can't be beaten without it unless the player knows the trick regarding the Fairy Spell to bypass the doors in a different way.
* The Legend of Zelda cartoon features Link using a magic sword exclusively as a projectile weapon (as if he had full hearts, it shoots out energy). He never swings it at anything, though he may have cut a vine or rope with it once.
* The Legend of Zelda cartoon is Link getting smacked when Zelda opens and closes a door.
* The Legend of Zelda cartoon. The king catches Link about to swing into Zelda's room for a kiss and tells him not to... until he has flowers, because "girls are crazy about flowers."
* The Legend of Zelda cartoon, there's an episode where Ganon turns Link into a frog.
* The Legend of Zelda cartoon. Zelda has spent the entire series denying that she loves Link. Due to a wacky accident, Link's spirit gets separated from his body, so he and Zelda go on a quest to find his body and pull him together. While everyone can hear his voice, Zelda is the only one who can see him. When Ganon learns this, he mutters that that must mean that she loves him. Link and Zelda overhear this, and Link shouts for joy at this undeniable proof that she does love him — thus giving away their location and starting a fight scene with the bad guys.
* The Legend of Zelda CD-i Games are an example of this trope getting far out of hand. The Russian animators allegedly modeled the poses off of pantomime.
* The Legend of Zelda CD-i Games, due to their hideous and awful animation.
* The Legend of Zelda CD-i Games: Hectan's heart continues to beat after his body melts away.
* The Legend of Zelda CD-i Games: The cut scenes: "Gee, it sure is boring around here!"
* The Legend of Zelda CD-i Games they'll remember it starred Zelda, had a top-down

perspective, and used live-action cutscenes instead of animated ones, and nothing else.
* The Legend of Zelda CD-i Games times he's saved the world, it's still cold for her to treat him like an incompetent boob.
* The Legend of Zelda CD-i Games which you can start a conversation with by stabbing them. This is hand waved in the in-game tutorial:
* The Legend of Zelda CD-i Games, with their clunky acting and low-budget costumes, but they're also not really bad enough to make for good joke fodder.
* The Legend of Zelda Cia, Volga, and Wizzro were made playable by a free update to the Wii U version. However, all of the missions involving them are in the Master Quest DLC pack, including the missions to unlock their 2nd and 3rd level weapons and heart containers. You can play as them for free, but without buying the DLC, they'll never have a decent health bar or a weapon with more than 120 attack power. Same thing goes for Medli for Legends. Once again, Definitive Edition averts this and has everything available from the get.
* The Legend of Zelda comics, based on the two NES games in the franchise. Link and Zelda are teenagers, so not married yet, but it's all but stated that they will be eventually; and while Link isn't exactly ugly, he's sort of goofy-looking, with a longish nose and somewhat dorky mannerisms. Standing next to the stunningly beautiful princess doesn't help his case. But she loves him anyway.
* The Legend of Zelda comics done by Valiant, Link is suspended by his wrists when captured by Ganon's minions.
* The Legend of Zelda comics, Zelda makes one of these to try to save Link from being hopelessly corrupted by the Triforce of Power in the storyline "The Price". Once he's back to normal, she denies having ever said such a thing.
* The Legend of Zelda community of inquisitive scavenger-scientists, respectively.
* The Legend of Zelda consists of a huge mouth filled with sharp, concentric teeth.
* The Legend of Zelda, Cuccos are short-tempered, even more so than in the other games. Some Adventure Mode battles will have two cuccos fighting for territory in a random base. Interrupt and the base gets sealed off, with you asked to "survive until the cuccos calm down."
* The Legend of Zelda, depending on whether you have found the Silver Arrows. Even though he's invisible and constantly teleporting, his projectiles just don't do enough damage to an endgame-ready Link, meaning that attacking the air and dodging occasionally will be plenty to get in the needed three hits and bring him down.
* The Legend of Zelda describes Peahats (flowery enemies fluttering around the screen) as being the ghosts of flowers. Pol's Voices, hopping rabbit-like creatures defeated by loud noises, are also described as being ghosts.
* The Legend of Zelda, due to reincarnating (along with Zelda herself) each game.
* The Legend of Zelda: During the fourth mission in Legend Mode, a mission entails safely escorting an Engineer from the Allied Base to a bridge so he can lower it. Succeed, and thing proceed that much faster. Fail, and the Hyrulean Forces take a hit to their morale... but Cia ends up lowering the bridge herself, in order to let her monsters attack.
* The Legend of Zelda episode "Stinging A Stinger". He ends up with a "loves me not" and blames the flower.
* The Legend of Zelda episode "The Moblins Are Revolting," the Moblins attempt to kill Link and kidnap Zelda when Ganon is incapacitated. Most of the schemes backfire upon themselves without Link even having to do anything, Wile E. Coyote style.
* The Legend of Zelda episode, "Video Game References" where Starfire, in a pastiche of the game, comes across a woman trying to rein in a rowdy "coocalacka". "You mean, the chicken?" "Nooooo! Coocalacka!"
* The Legend of Zelda essentially soft reboots every time there's a major console release. After all, "legend" is right in the title, so several games end up being retellings of a standard "Zelda myth": there's always a hero, a princess, and evil overlord, etc.; the details may change but it's still the same story at its core. They've been connected into a series timeline, but such connections are usually an afterthought. That said, the following two games are more explicit reboots than

others in the series:
* The Legend of Zelda, establishes the Fierce Deity as Link's Terminian counterpart, who was corrupted by Majora and purified into the Fierce Deity's Mask, whereas Demise is Majora's late Hyrulean counterpart.
* The Legend of Zelda, every character you can play as is capable of killing entire legions of Mooks single-handedly. Fowl farmer who can kill scores of enemies with bomb arrows? Check. 35-year-old Manchild who slaughters his foes by popping a balloon in their faces and tossing bombs at them? Check. Ten-year-old "Princess?" who can beat up the king of evil by throwing butterflies at him? Super check.
* The Legend of Zelda, everyone that is not above the rank of Captain won't last for long on the field.
* The Legend of Zelda, Fairy Magic unleashes a magical explosion that completely wipes out nearly every enemy Mook in its range while dealing heavy damage to all other enemies and leaving behind a passive effect based on the spell's element. Doubling up the same element on a single fairy will expand the radius of the effect and Refreshing a fairy when she reaches level 99 will add a little extra damage to the spell for each refresh.
* The Legend of Zelda, fake switches that release bombs or enemies, fake doors that fall on Link, fake treasure chests, etc.
* The Legend of Zelda features characters who have an unrequited crush, usually on the titular princess, but never get her interest.
* The Legend of Zelda. Fi admits to Sheik at one point that, though she can't feel love herself, she understands the concept perfectly.
* The Legend Of Zelda, following the Roman numeral designation of the second game.
* The Legend of Zelda: Four Swords (2004) manga have been good friends since they were young.
* The Legend of Zelda: Four Swords (2004), Vio wears a purple outfit, is the smartest of the four copies of Link, is an expert archer, and is the only one to decisively beat another counterpart in a fight.
* The Legend of Zelda: Four Swords Adventures also features the Dark World, but it doesn't cover the entire world. Link can collect Moon Pearls in some levels to open portals, which are used to bypass obstacles and solve puzzles. It comes up fairly often, but it isn't central to the game.
* The Legend of Zelda: Four Swords Adventures also includes Force Gem-sucking Wizzrobes.
* The Legend of Zelda: Four Swords Adventures and basically disconnected from any other games in the series, which some fans dislike.
* The Legend of Zelda: Four Swords Adventures, and still fall in droves.
* The Legend of Zelda: Four Swords Adventures as it clearly wasn't written with continuity in mind.
* The Legend of Zelda: Four Swords Adventures, Eiji Aonuma described Miyamoto as "upending the tea table" in the story development, leaving the plot rather... messy. He felt it was too complicated.
* The Legend of Zelda: Four Swords Adventures of Ganondorf into the monstrous Ganon.
* The Legend of Zelda: Four Swords Adventures, once again brainwashed to fight Link.
* The Legend of Zelda: Four Swords Adventures subscription, and registering games and other Nintendo merchandise on Nintendo's website.
* The Legend of Zelda: Four Swords Adventures: The Swamp serves as the second stage of the fourth level, although it wasn't always the poisonous mire you trek through: it used to be a place of natural beauty before Vaati's power corrupted it, and it is seen back to normal in the ending.
* The Legend of Zelda: Four Swords says his only motive is kidnapping any young girl that takes his fancy.
* The Legend of Zelda: Four Swords-series has a lot of puzzles which include the "four buttons, each of them only triggers if a person is standing on it"-factor. In some of the games this is subverted by "one player controls four characters". At some places this is required to move on, at others it's just "drop a lot of loot"!

* The Legend of Zelda: Four Swords trope is so prevalent in that series that the games tend to indicate arrow/slingshot targets with eyes. That means most enemies who are specifically weak to arrows have unnaturally large eyes somewhere on their bodies, and walls with projectile-based switches stare at you.
* The Legend of Zelda franchise allow players to skip Heart Containers, allowing for challenging three-heart runs. Any% speedruns usually skip most or all of the hearts, especially in 3D games, mainly because picking one up activates a cutscene that wastes a few precious seconds.
* The Legend of Zelda franchise is infamous for it's cast of quirky characters. Two well-known examples are Princess Agitha and Tingle. Agitha, is very introverted, speaks in odd phrases and has an obsession with collecting bugs. When you give her the first bug, she comments on how she didn't think you would, as she theorizes that people consider her to be "poor mannered", dispite her gracious, cheerful attitude' hinting at the notion that people avoid her for her weirdness and/or occasional social slip ups. Tingle, a reoccuring charachter, is a man-child who believes he will have a fairy companion someday, as he (acording to him) is a reincarnation of one. He is a dissapointment to his father, as Tingle is 35.
* The Legend of Zelda from the ongoing curse of an evil demon. He is utterly pure of heart, and wields the Master Sword: a holy weapon specifically forged by the goddesses to destroy evil.
* The Legend of Zelda, Fyrus recalls his mother calling him "a little prince" when he was younger. After being crowned King of the Gerudo, he realizes that she was dropping hints about his heritage.
* The Legend of Zelda games, but more often than not they don't meet until the events of the game:
* The Legend of Zelda games. Either Link's sidekick leaves Link or Link leaves Hyrule to go on a journey.
* The Legend of Zelda games has been the target of flirtation from a number of female characters, but he seems to be more taken aback than tantalized. To be fair, in most of the games he's prepubescent, but he seems no less innocent when portrayed as an adult.
* The Legend of Zelda games, Link is the only one who can liberate Hyrule and or save Zelda. If any other characters attempt to save Hyrule, they will usually either end up being killed or captured.
* The Legend of Zelda games. Unlike the animated example, the relationship is portrayed more sympathetically (he doesn't ask for a kiss at ridiculous moments, and she clearly reciprocates his feelings); it's implied that they will eventually marry when they reach adulthood. As noted elsewhere, no romance exists between them in either of the games which existed at the time the comics were made.
* The Legend of Zelda games you can find bomb flowers growing on the ground. they are flowers whose fruit are bombs that light up the moment you pick them up. Gorons take these fruits and process them to create normal bombs.
* The Legend of Zelda game. There are multiple stories, videos and pieces of fan art with Link and the most well-known female characters.
* The Legend of Zelda, Ganon can only be properly slain with a silver arrow. They are replaced by the more explicitly magic Light Arrows from the next games on.
* The Legend of Zelda, Ganondorf/Ganon is no stranger to being shipped with Link. The two are forever in eternal combat, with Ganondorf arriving back into the timeline during peace to try and take over, and forever beaten down by Link and Zelda... but the shippers would like to reimagine this as Ganondorf being an actually amicable, and fun-loving guy if it weren't for the curse of reviving as a villain. The logic of the shippers will usually bend over backwards to find a justification for the two to be together despite one of this pairing being a literal wall of evil in some games.
* The Legend of Zelda Ganondorf has an army of specialized monsters and supernatural creatures (warriors).
* The Legend of Zelda: Ganondorf is known as "King of Thieves" or "the Great King of Evil" in some installments, and serves as the franchise's main antagonist and villain.

* The Legend of Zelda: Ganon has both played this trope straight and subverted it more than once:
* The Legend of Zelda: Gorons seem to be this. It's never outright stated, but they eat rocks and can take a lava bath without harm.
* The Legend of Zelda had a graveyard on the western side of the map. Touching most of the gravestones made an invincible Ghini spawn, which could quickly become a hassle. But if you can handle them, it becomes one of the best places to farm rupees. The first quest hides the magic sword there, and the second quest has the entrance to the 6th dungeon hidden there.
* The Legend of Zelda has a boss and some mooks which you must remove a mask from before you can hit them.
* The Legend of Zelda has Darknuts and Iron Knuckles, which qualify in several cases as guardians for Ganon and Vaati.
* The Legend of Zelda has essentially an entire other overworld under the ocean because you can transform into a merman.
* The Legend of Zelda has her starting off as a worldly pirate who laughs at the idea of Link being a hero. Some games also have her gain abilities as well, like the ability to turn into a ninja, wield magic, use a bow and arrow set, ride a horse, swordfight, and possess a suit of armor to fight.
* The Legend of Zelda has humans with round ears in Ordona and ones with pointed ears everywhere else; at no point in any of these games, however, are humans and Hylians explicitly identified as separate races.
* The Legend of Zelda has identical dungeon walls whether a bomb will punch a hole in them or not. Fortunately, only the middle of any given wall needs checking. The overworld is far trickier, since bombable walls always face south, but otherwise can be in any location (when checking, keep in mind that bombing between tiles can let you hit two walls at once).
* The Legend of Zelda has quite possibly allowed the series to reach Stage 5 by now.
* The Legend of Zelda has several in each incarnation such as Wolfos (wolf human hybrids) Lizalfos, Dinolfos and Aeralfos (lizard men of various shapes and sizes), the Zora (fish men) and their descendants the Rito (bird men).
* The Legend of Zelda has the entire world turn red as Link dies before fading to black as he finally disappears.
* The Legend of Zelda has the Great Spin, which allows Link to release a very powerful spin when he's full on HP. The game also added a tool called the Spinner, which rotates walls in dungeons, and you can ride grooves.
* The Legend of Zelda has the King of Red Lions, Link's sentient ship). The Triforce is an even more iconic symbol of the series (and to an extent, the Hylian Crest).
* The Legend of Zelda has this at its core, connecting all the games. Ganon is an eternal threat, but every time he rises to endanger Hyrule, there is — and will always be — a Link and a Zelda to oppose him. Only the circumstances change.
* The Legend of Zelda. He is never harmed in any way by this, despite taking damage from falls and some other impacts.
* The Legend of Zelda, he tells the viewers to buy his DVD, which is "not rushed at all". The cover art is a terrible drawing made in crayon, and the lines of a sheet of paper are visible.
* The Legend of Zelda he uses it to shield his eyes after Link lights up the room.
* The Legend of Zelda. However, the Sheikah still appear to be light-skinned only, likely due to being heavily based on ancient Japanese people in this game.
* The Legend of Zelda: If a monster has a red or orange version and a blue version, the blue version is generally tougher. The only exception is the blue Bubbles, which are far less annoying than the red versions. On the other side, if a beneficial item has a red and a blue version, the red is better — red potions have two doses, the red ring's protection is twice as strong as the blue ring, and the red candle has infinite use whereas the blue candle has one use per screen. The Magical Sword (red hilt) does more damage than the White Sword (blue hilt).

* The Legend of Zelda. If the player finishes the STAR minigame in Hyrule Castle Town, a group of girls will squee and run away every time Link goes by. You get a couple of free hearts from the pure power of estrogen left in their wake.
* The Legend of Zelda (incidentally, Rupees use Ingot sprites from the former). This is removed from localized manuals. The Bubble enemy may also be an allusion to the latter game's [Lava] Bubbles (then known as Podoboos).
* The Legend of Zelda injured is when he bends over in exhaustion when low on health). The fact that he manages to journey long without a moment's rest plays a bit more on this as well.
* The Legend of Zelda. Interestingly, the Bombers themselves aspire to be this.
* The Legend of Zelda in the first episode, but the parody became less stealthy once he backed out.
* The Legend of Zelda in the large and colorful supporting cast, and amazing countries each one inhabits.
* The Legend of Zelda is a famous example of someone named after the character. For the record, the character herself was named after a famous person, Zelda Fitzgerald.
* The Legend of Zelda, is explicitly fated to always have a strong connection to whoever's the current incarnation of the Hero, although how close they are is dependent on how they interact.
* The Legend of Zelda is one example. Other than the random grunts and yells, he never utters any words:
* The Legend of Zelda is Zelda contacting Link for help telepathically at the beginning of the game.
* The Legend of Zelda. It goes about as well as you'd expect, with Link smashing against a wall and losing his sword. This Link in particular is very prone to falling and getting in all sorts of funny accidents.
* The Legend of Zelda, it's common for Link to call Zelda "Zel" for short.
* The Legend of Zelda: It's hard to tell from the sprites, but Zelda's hair goes down to her ankles. Most other Zeldas have their hair from mid- to lower-back. This only applies to the sprite as most official art depicts her with medium length hair.
* The Legend of Zelda. Its sounds, pixel art and quotes are some of the most iconic of the entire series with the first quote of the game being the most well known of the franchise by far.
* The Legend of Zelda Jovani was turned into gold after selling his soul for wealth. Good thing for them Link came along to put things right.
* The Legend of Zelda, knows that he's near consistently portrayed in adaptations as, and implied in the games to be, a brave, humble, all-around heroic person who saves the land of Hyrule and its princess without expecting anything in return. People familiar with Link's other portrayals will probably be surprised that in the cartoon that came after the NES games, he's the complete opposite. This Link was lazy, self-centered, whiny, and is only motivated by getting Zelda to kiss him.
* The Legend of Zelda lets him go on a date with Rosa of the Subrosians, a race of hooded creatures whose actual appearance is unknown.
* The Legend of Zelda, Link - as bearer of the Triforce of Courage - has a natural instinct to protect others, especially those weaker than himself. In most installments, his main protectorate is Princess Zelda.
* The Legend of Zelda, Link asks himself why he gave up the exciting life of an adventurer to live in a boring castle. Then, he looks out the window and sees Princess Zelda in a revealing nightgown. "Well, there is one reason..."
* The Legend of Zelda, Link can wear the Stealth Armor provided by the Sheikah to make it easier to sneak around.
* The Legend of Zelda, Link had a tendency to spin his sword in a flashy manner. When he becomes incapacitated in one episode, Zelda uses his sword - and does the same thing.
* The Legend of Zelda, Link has a crush on Princess Zelda. Unknown to him, he is her older half-brother who was abandoned because he was half-elf and the previous Zelda didn't want her husband killing him. The manga never shows him learning that

they're related. Zelda knows they're related, and doesn't requite Link's feelings, but is never shown telling him that they're related.
* The Legend of Zelda, Link is a half-elf half-human child instead of (presumably) being full Hylian.
* The Legend of Zelda, Link is lying on Princess Zelda's lap, although this turns out to be a dream.
* The Legend of Zelda - Link is made of this trope. All sentient characters except Ganondorf are required to help him in some way.
* The Legend of Zelda, Link is trapped in a room in the Temple of Souls with several Dark Links. Lana comes in to aid him; however, even with her, they are still at a disadvantage. Just when things are looking dire, Darunia, Midna, Fi, and Impa appear to save them.
* The Legend of Zelda, Link is Zelda's older half-brother from a romance the previous Queen Zelda had prior to being married. He's half-elf, which only adds to the "forbidden" aspect as elves are looked down upon by humans. Queen Zelda sent Link away for fear that her husband would kill him. Link grew up thinking he was a common orphan boy.
* The Legend of Zelda, Link meets young Zelda, who has escaped from the castle and disguised herself as a commoner girl. When Link asks her about Princess Zelda's whereabouts, she tells him that she and Zelda are good friends and that she'd introduce him if he played with her for a whole day.
* The Legend of Zelda: Link's Awakening, and a sidequest focused on letting you construct and run through your own dungeons, in addition to a large number of minor changes and adjustments.
* The Legend of Zelda: Link's Awakening and conclude that Link isn't far from shore.)
* The Legend of Zelda: Link's Awakening and it can all be preserved in a photo, too.
* The Legend of Zelda: Link's Awakening, a pair of boys playing catch will give you tips on what to do in the game, followed by "I don't know what that means, I'm just a kid."
* The Legend of Zelda: Link's Awakening as well as a whole village of talking animals.
* The Legend of Zelda: Link's Awakening, at least, the only actual shoreline you can access is in the south).
* The Legend of Zelda: Link's Awakening by a dream of the Wind Fish and disappears when he wakes up.
* The Legend of Zelda: Link's Awakening entries and having little-to-no sidequests.
* The Legend of Zelda: Link's Awakening Even though most people know it's coming, it's still a pretty powerful ending. The manga is even worse.
* The Legend of Zelda: Link's Awakening fleshes out the minigames that were minor parts of the original game, including the Trendy Game (now a full physics-based claw game), the fishing spot (more fish to catch and multiple lures), and the raft-riding game (which now uses the Hookshot and has an additional time trial mode). They also provide more rewards.
* The Legend of Zelda: Link's Awakening. For most games, the degree to which they are connected is left unclear.
* The Legend of Zelda: Link's Awakening has a series of rope bridges connecting the various peaks of Tal Tal Mountain Range. Most of them are in good condition, but two of them are missing planks and require either the Roc's Feather or Hookshot to cross them.
* The Legend of Zelda: Link's Awakening has this as the second dungeon boss. First you have to destroy the bottle before you can defeat the clownlike Djinni.
* The Legend of Zelda: Link's Awakening hearts of damage, it is very possible to stunlock him with the Fire Rod. The flames from the fire rod that stay for a few seconds can stunlock him, giving you free hits on him. It's possible to defeat him after dousing his flame shell, never submerging again.
* The Legend of Zelda: Link's Awakening. He has to be convinced by the Owl that it's worth waking the Wind Fish up, even if the island dies.

* The Legend of Zelda: Link's Awakening, in the second dungeon. Link must cross the room while avoiding being pulled into a bottomless pit surrounding the enemy.
* The Legend of Zelda: Link's Awakening is actually a flying whale (which are mammals, not fish). It's eventually lampshaded by the game itself.
* The Legend of Zelda: Link's Awakening is rated E or its equivalent everywhere, like the original... except in Japan, where it was slapped with a B rating and a descriptor for "Crime." Presumably, stealing from an item shop fits this regardless of the consequences.
* The Legend of Zelda: Link's Awakening. Made sillier by its absurdly tiny wings.
* The Legend of Zelda: Link's Awakening may have said it best when she suggested that Link is meant to "toil in obscurity forever." Now remember that most of these Links are different people throughout history, and you realize that the name "Link" is a jinx for every poor sap that has it.
* The Legend of Zelda: Link's Awakening — this was only the second game in the series to feature Cuccos, and in all later games killing them is completely impossible.
* The Legend of Zelda: Link's Awakening's death animation, except with the screen fading to white.
* The Legend of Zelda: Link's Awakening that makes it look different from other Zelda games. Link, just like everyone else in this game's artstyle, looks like a tiny figurine. People even nickname this version of Link "Toy Link."
* The Legend of Zelda: Link's Awakening, this is the case with the game's conflict. The various townsfolk and NPCs who help Link out (Especially Marin) fulfill the role of the dreams, whereas the monsters who oppose Link are the Nightmares. For that matter, the bosses are even called "Nightmares".
* The Legend of Zelda: Link's Awakening was a trapped interdimensional being that did indeed look more whale than fish.
* The Legend of Zelda: Link's Awakening whatsoever and only gets a passing mention at the beginning of the game.
* The Legend of Zelda: Link's Awakening with the addition of a bonus dungeon that featured color-themed puzzles and some CGs that would be unlocked if you took certain actions that you could print out with the Game Boy Printer.
* The Legend of Zelda: Link's Awakening. Yikes. Still, it is pretty hard to resist doing this in-game, since the bow in the game is sold at the ridiculous price of 990 rupees (the rupee cap is at 999), and it takes a looooong time to save up that amount of money.
* The Legend of Zelda: Link's Awakening: You fight a Lanmola in a pit of quicksand. You only get sucked downward (to a cave you must traverse to get back to the surface) if you get put in the center of the pit; the rest of the quicksand simply pulls you toward that center.
* The Legend of Zelda: Majora's Mask. After playing it, the narrator begins to experience terrible things in their everyday life.
* The Legend of Zelda: Majora's Mask after Skull Kid leaves her behind and stays with Link when she sees Skull Kid try to destroy the world.
* The Legend of Zelda: Majora's Mask, a golden tractor beam is used by the 'ghosts' to abduct cows (and the unfortunate Romani).
* The Legend of Zelda: Majora's Mask, a hand reaching out from underneath a bathroom asks for your help. The owner of the hand is never seen.
* The Legend of Zelda: Majora's Mask a little girl locks her father in a cupboard after he's partially transformed into a zombie-like Gibdo.
* The Legend of Zelda: Majora's Mask also had limited edition gold cartridges (sans preorder since the Collector's Edition was also available through retail) with an added lenticular label.
* The Legend of Zelda: Majora's Mask. Also the default expression of the Happy Mask Salesman.
* The Legend of Zelda: Majora's Mask, although you do fight skeleton soldier mini-bosses that are practically Stalfos in all but name.
* The Legend of Zelda: Majora's Mask and it's never acknowledged in-universe. The implied backstory throws a lot more into the mix, with interesting carvings at

Stone Tower that have led to speculation that Termina may have been cursed by the goddesses for blasphemy.
* The Legend of Zelda: Majora's Mask and refuses to open the door for anyone to prevent the Gibdos outside from taking him away. After Link returns him to normal, she says she'll try to convince him to leave the dangerous Ikana Canyon go back to Clock Town.
* The Legend of Zelda: Majora's Mask and the only way to make it stop after waking it up is to destroy it.
* The Legend of Zelda: Majora's Mask, an intimidating moon growing ever-larger in the sky serves as both a timepiece and to remind players that (despite widespread recycling of character models) they're in the parallel world of Termina, not in Hyrule. Additionally, as the moon nears collision, the sky turns a sickly green during the day and reddish during the night.
* The Legend of Zelda: Majora's Mask, Anju and Kafei's subplot fits this; they are the Innamorati, Mayor Dotour is il Dottore, and Link seems to be a male version of Columbina. Among others, the Curiosity Shop owner is Brighella, and Tingle is a loose version of Pulcinella.
* The Legend of Zelda: Majora's Mask Anju's mother assumes the worst and insists that he and Cremia are having an affair. Meanwhile, one of Mutoh's carpenters has a crush on Anju and threatens Link if he speaks to him while wearing Kafei's Mask.
* The Legend of Zelda: Majora's Mask approach to avoid saying what's going on.
* The Legend of Zelda: Majora's Mask. At one point in a sidequest, Kafei asks Link if he can keep a secret, and Link can answer "No." That aside, Kafei rejects that answer, tells Link that "yes" is the socially acceptable answer, and proceeds to tell Link his secret anyway.
* The Legend of Zelda: Majora's Mask attaches and reattaches his head to attack Link during the fight against him. Once he and his Skull Knights are defeated and their bodies disintegrated using reflected sunlight, their incorporeal spirits are represented by the same floating skulls.
* The Legend of Zelda: Majora's Mask, at the end of which he stayed 9.
* The Legend of Zelda: Majora's Mask, but in those games it is less creepy than the original.
* The Legend of Zelda: Majora's Mask, but it was heavily driven by his resentment towards their perceived abandonment.
* The Legend of Zelda: Majora's Mask counterpart of Hyrule where everyone has different names and their personalities are changed.
* The Legend of Zelda: Majora's Mask does so by giving a single salute, after which Keeta dissolves into the earth. Interestingly enough, Link was given a saluting animation for each of his different forms, even though this is the only place in the game it's used. Overall, it's a very touching moment.
* The Legend of Zelda: Majora's Mask does this to Link, gaining angry eyes.
* The Legend of Zelda: Majora's Mask featured a Great Fairy using this method to teach Link how to perform a spin attack.
* The Legend of Zelda: Majora's Mask features an eerie droning tune in the background.
* The Legend of Zelda: Majora's Mask features a reversed Song of Healing nicknamed the "Song of Unhealing".
* The Legend of Zelda: Majora's Mask getting frozen with the Zora mask has the same effect as falling into a pit.
* The Legend of Zelda: Majora's Mask has a giant music box that plays what can only described as scary circus music. It doesn't even help much that it also scares the mummies away.
* The Legend of Zelda: Majora's Mask has been cursed into a Gibdo. Pamela herself - a small child - keeps him locked in a cupboard in their basement so no-one finds out about it. Thankfully, you're capable of using the Song of Healing to cure him and turn his curse into a mask, but you first must lure Pamela out of the house and sneak in without her noticing.
* The Legend of Zelda: Majora's Mask has hurt, until he is finally strong enough to stop it all from happening.

* The Legend of Zelda: Majora's Mask has the ocean located on the western side of the map. No relation to Japan, which is an island.
* The Legend of Zelda: Majora's Mask have a scimitar strapped to each hand. Although they could be holding it under their ponchos, the attacks they use suggest otherwise.
* The Legend of Zelda: Majora's Mask, he gives Link a salute as "Taps" plays in the background.
* The Legend of Zelda: Majora's Mask Her fiance, Kafei, has been missing for quite a while, and she's beginning to think that he ran off because he didn't really love her after all. This is not helped by her mother, who seems convinced that Kafei hooked up with Anju's best friend instead. As part of the game's most elaborate sidequest, Link must give her proof of Kafei's love for her, otherwise, the poor girl will give up on him completely.
* The Legend of Zelda: Majora's Mask. He's a giant freaking eye covered in what look like fish eggs. And how does the fight start? You look up at him, only to suddenly have the camera zoom in so much that his eye's taking up most of the screen.
* The Legend of Zelda: Majora's Mask. If you attempt to ride Epona while wearing the Goron mask, Tatl will stop you. "You'll flatten the poor thing!"
* The Legend of Zelda: Majora's Mask, if you had already been in the boss room). It still comes in handy if you couldn't finish all side quests that only open after a dungeon has been cleared in the previous cycle.
* The Legend of Zelda: Majora's Mask: Igos du Ikana, Igos du Ikana's bodyguards, Flat, Sharp and every undead inhabitant of the Ikana Canyon revived by Skull Kid wearing the Majora's Mask and maintained alive by Twinmold.
* The Legend of Zelda: Majora's Mask, in Snowhead Temple, there's one area where you must fall for several in-game hours (if you aren't using the Inverted Song of Time, that is) as Deku Link — just to get the last Stray Fairy of the area. Of course, it's worth it to get the Double Magic Meter. All the while, Link's just making strange spasms while holding onto the flowers.
* The Legend of Zelda: Majora's Mask introduced undead fish for the water levels.
* The Legend of Zelda: Majora's Mask is overflowing with nightmarish elements.
* The Legend of Zelda: Majora's Mask is somewhat similar to, if a bit more frantic than, the music that plays during the First Day. Until you turn up the bass, that is, and can hear the creepy, dooming countermelody that is supplementing the happy normal music.
* The Legend of Zelda: Majora's Mask is that Link obtains lots of masks with unique powers. There are 28 obtainable masks in total: Four transformation masks, twenty regular masks that have different effects or uses, and the four masks from bosses that allow Link to refight them without having to go through their dungeons again.
* The Legend of Zelda: Majora's Mask, it determines their behavior and elemental affinity.
* The Legend of Zelda: Majora's Mask, it remains a hotly-debated topic whenever the game is discussed.
* The Legend of Zelda: Majora's Mask itself (as well as the manga) uses this trope when Link is turned into a Deku Scrub, too.
* The Legend of Zelda: Majora's Mask: It's left ambiguous as to what exactly Majora is, but "unspeakably powerful" and "incredibly evil" are some of the only things we know about it. Through its mask, Majora is able to end all life on Termina by crashing the moon to the surface.
* The Legend of Zelda: Majora's Mask let you save in the middle of the 3-day cycle at the Owl Statues have two save slots instead of three).
* The Legend of Zelda: Majora's Mask, Link can become Deku Link, Goron Link, or Zora Link using magical soul-trapping masks.
* The Legend of Zelda: Majora's Mask. Link can easily block the blades of the rank-and-file members with his shield, but the Garo Masters can channel fire and ice magic through their swords and will quickly overwhelm unwary players.
* The Legend of Zelda: Majora's Mask. Link has the ability to rewind time 72 hours before a certain point in-game time, and predictably, when he rewinds time he loses

all of the money he accumulated during that 3-day period. Fortunately for Link, the hub city's bank is apparently temporally insured, since the banker stamps Link's account balance on his head, and this stamp never fades or disappears with the rewinding of time. Realistically, this should mean the complete destabilization of the city's economy, since the money deposited at the end of the 3-day cycle technically does not exist at the beginning of the cycle, but most people are probably more worried about the moon falling out of orbit than they are about time-travel based banking scams.
* The Legend of Zelda: Majora's Mask, Link learns the song "The Oath to Order" fairly early on. After he has wound his way through Termina and awakened each of its four protective Giants, he uses the Oath to Order to call them together on midnight of the Final Day.
* The Legend of Zelda: Majora's Mask, Link replays the same three days over and over. The lottery in Clock Town will always have the same winning numbers, so Link can keep winning.
* The Legend of Zelda: Majora's Mask manage to live to see the morning, and their wedding begins.
* The Legend of Zelda: Majora's Mask never walks anywhere. He usually "cuts" from frame-to-frame to different locations, though at one point he turns around to face the camera by slowly rotating on the spot...
* The Legend of Zelda: Majora's Mask of an army officer who died centuries ago, trick his men who dance around graves at night into thinking he [Link] is the officer, and have his men open up the graves to go on adventures underground.
* The Legend of Zelda: Majora's Mask of centipedes (Twinmold) in Stone Tower Temple. For the latter, it's recommended to use the Giant's Mask to attack the weak points (heads and tails) more easily.
* The Legend of Zelda: Majora's Mask, once Link has been turned into a Deku Scrub and Tatl "apologizes" he looks at the camera and shrugs helplessly.
* The Legend of Zelda: Majora's Mask, one pair of shop owners consists of a short little man and his enormous, muscular, roaring companion, who is repeatedly told to just be quiet.
* The Legend of Zelda: Majora's Mask only features one. The Couple's Mask also subverts the usual creepiness by being a symbol of marriage and loving union; the lines it has in lieu of a face are a simplified image of an embracing couple.
* The Legend of Zelda: Majora's Mask presents two examples excluding the dodongos:
* The Legend of Zelda: Majora's Mask remake came out on Friday, February 13, 2015.
* The Legend of Zelda: Majora's Mask seems to find Link adorable when he wears the bunny hood, but he quickly composes himself and tells him to take it off because it might get dirty in the dojo.
* The Legend of Zelda: Majora's Mask. She nearly lets the facade slip at one point:
* The Legend of Zelda: Majora's Mask. Similar cutscenes, showing circles of clock faces surrounding Link, accompany the game's other time-manipulating songs.
* The Legend of Zelda: Majora's Mask since it recycles the engine, controls, gameplay, and art assets. However, they used the tools in a completely different manner, focusing on a time limit, and shifting Link into completely different creatures with different controls, averting this trope.
* The Legend of Zelda: Majora's Mask Somehow, raising your shield protects you from harm.
* The Legend of Zelda: Majora's Mask's Southern Swamp likely still qualifies. The dominant NPC race there had been an enemy in all previous installments, their king is a xenophobe, and the boss of Woodfall Temple is a "Jungle Warrior", as opposed to the other three dungeons' mechanical beast, fish monster, and twin giant worms.
* The Legend of Zelda: Majora's Mask Swordsman, who can teach Link sword techniques for a fee.
* The Legend of Zelda: Majora's Mask tasks you with saving the world from a falling moon that will make impact within 72 hours, which is roughly 54 minutes in real time. You'll be traveling back in time to the first day over and over in order to retry and be able to progress in other areas once you get the appropriate items. There's also a song in game you can play that will slow down the flow of time,

allowing you to play for about an hour and a half before you have to go back in time to restart.
* The Legend of Zelda: Majora's Mask. Thank goodness it's possible to skip them after you see it for the first time.
* The Legend of Zelda: Majora's Mask "Thank you. You flee now. That's an order!"
* The Legend of Zelda: Majora's Mask that you're only allowed to use it in boss rooms.
* The Legend of Zelda: Majora's Mask. The failure of the Nintendo 64DD was the initial driving force to make the project a full-fledged sequel.
* The Legend of Zelda: Majora's Mask), the first iteration shows you how to reset time back to the beginning of day 1.
* The Legend of Zelda: Majora's Mask, the gate to the castle of Ikana is sealed and cannot be opened by any means... too bad there's a big hole in the wall right next to it.
* The Legend of Zelda: Majora's Mask: The Indigo-gos, who are also literally a band.
* The Legend of Zelda: Majora's Mask The intention was probably making it look more unsettling, but it ended up looking far too grotesque and over the top, to the point of looking more derpy and cartoony than scary.
* The Legend of Zelda: Majora's Mask, there are several plants in the Woodfall Temple, which float on water like very flat lotus flowers with a tiny, thin row of teeth along the edge and an eye in the middle. Deku Link can use them as platforms to jump across, but if Link climbs on in his regular form, it will close on him, chew him up, and spit him back out. They turn into normal, non-carnivorous flowers when the water is purified.
* The Legend of Zelda: Majora's Mask there was a little girl's father who had a curse on him from working so close around Gibdos (mummies). He was cursed so that he looked like a Gibdo and to keep his daughter safe he locked himself up in a wardrobe in the basement of their house.
* The Legend of Zelda: Majora's Mask: The way to Snowhead Temple is blocked by a blizzard caused by a giant, invisible Goron. To get into the temple, you play the "Goron Lulluby", putting the giant to sleep and ending the blizzard.
* The Legend of Zelda: Majora's Mask to an enemy in Stone Tower Temple.
* The Legend of Zelda: Majora's Mask to completely annihilate the wretched thing? Especially if you just drank a bottle of Chateau Romani to give you infinite magic.
* The Legend of Zelda: Majora's Mask to get back to town quickly), more due to the smell than for Gorman's sake.
* The Legend of Zelda: Majora's Mask. Unable to cope with the memories of his future self and saving the world after the reset, he left everything he knew in Kokiri Forest to find Navi again.
* The Legend of Zelda: Majora's Mask, undead King Igos Du Ikana still rules over his dead kingdom from his palace long after it was destroyed. His subjects now consist only of skeletal warriors and mummies. The Ikana military is still intact and led by Captain Keeta, a giant skeleton. His soldiers generally want to take leave of the oath they swore him so they can pass on.
* The Legend of Zelda: Majora's Mask until you reset), and there are no duplicate Links running around, so one would assume events from the last cycle would be the only ones to persist. Possibly the Goddess of Time stitches all the best events together.
* The Legend of Zelda: Majora's Mask versions. None of his alternate versions (Deku, Goron, Zora, Fierce Deity) are suited to use it.
* The Legend of Zelda: Majora's Mask waist. How they manage to form a working club that helps people, when realistically they shouldn't even be able to talk yet, is anybody's guess.
* The Legend of Zelda: Majora's Mask was released in Japan in April 2000, and the localization was finished that July. They sat on it until the holidays in order to go up against the PS2.
* The Legend of Zelda: Majora's Mask was stated to be based on the series director's dream of the moon falling and crashing on Earth.

* The Legend of Zelda: Majora's Mask while he tries to stop the moon from falling.
* The Legend of Zelda: Majora's Mask will commit suicide if Link defeats them in combat... by way of setting themselves on fire. "To die without leaving a corpse; that is the way of the Garo." Things get strange when the Garo Master instead blows himself up with a handy bomb... And drops hints seconds later his "suicide" wasn't entirely fatal.
* The Legend of Zelda: Majora's Mask, with the added difficulty that it also hides a switch that opens the door up ahead.
* The Legend of Zelda man from the desert, who often becomes a giant boar monster named Ganon. Most bosses in the series also qualify.
* The Legend of Zelda. Meanwhile, the other two pieces, the Triforce of Courage and Triforce of Wisdom, went to the heroes: Link and Princess Zelda respectively. Thus, in all games in the series, it is the job of the various Links and Zeldas to stop Ganondorf from gaining the full Triforce so his ambitions can come to fruition.
* The Legend of Zelda. Mechanical enemies are rare in the series, due to the high-fantasy setting, but they exist:
* The Legend of Zelda, Midna's entrance starts with her already at war with Cia, but due to a misunderstanding on the battlefield, she assumes Lana and Agitha are part of Cia's forces and attacks. When Cia retreats, it leaves Lana to defeat Midna and sort out who's on whose side.
* The Legend of Zelda Miyamoto's games and even shares his signature grin.
* The Legend of Zelda mythos, with several generations of Links and Zeldas with different relationships, this comes into play in installments when their relationship seems more romantic, while in others it comes across as familial (especially due to a mistranslation in the SNES game making gamers believe she is Link's sister.)
* The Legend of Zelda. Neither the ninja Shiek nor the pirate Tetra wear gloves, emphasizing this trope.
* The Legend of Zelda no matter the incarnation has anything that would fit into any fantasy story. With Three goddesses creating a magical triangular artifact which is the most sought in the series. Witches, sorcerers, dragons, mermaids, alternate dimensions, robots, time travel, etc.
* The Legend of Zelda: Ocarina of Time Adult Link is a larger guy than most of the population.
* The Legend of Zelda: Ocarina of Time. After being in limbo for 7 years he's grown up only to find that all his friends haven't. Turns out he's a different species to them anyway. They don't recognize him and many of them actually miss the child Link that left. Link seems to decide not to tell them (though Mido might know).
* The Legend of Zelda: Ocarina of Time. After defeating the monster that was making Lord Jabu-Jabu ill, Link is granted the hand of Princess Ruto of the Zoras...which he doesn't want.
* The Legend of Zelda: Ocarina of Time, a giant boulder on top of Death Mountain turns out to be Biggoron.
* The Legend of Zelda: Ocarina of Time: A Gossip Stone reveals to Link that Mido's embarrassing secret is that he still wets his bed.
* The Legend of Zelda: Ocarina of Time all have this kind of tune: the theme for the Stone Tower Temple, Song of Healing, Twilight Hyrule, etc.
* The Legend of Zelda: Ocarina of Time allows Link to see invisible enemies (namely Moas).
* The Legend of Zelda: Ocarina of Time also ended up being temporarily recalled due to its music's use of the sample.
* The Legend of Zelda: Ocarina of Time. Also, it houses the entrance to the spooky shadow temple, and the well isn't too far away from the cemetery.
* The Legend of Zelda: Ocarina of Time, an angry Roura pulls one of Link's long, Hylian ears in one scene.
* The Legend of Zelda: Ocarina of Time and reliving the end of the world over and over and over and over and over and...
* The Legend of Zelda: Ocarina of Time appear to be pretty heavily based off of the medieval Arabians, albiet in an all-female context.

* The Legend of Zelda: Ocarina of Time. A previous boss called Phantom Ganon, which is supposed to be weaker than the real Ganondorf, is more challenging, as the arena you fight him in is much smaller, giving you less time to react to the blasts. Even in his Ganon form, where his attacks will do a massive amount of damage if they connect, he's still a complete joke, as he's incredibly slow with equally slow attacks. Beating him is as simple as rolling under his legs and whaling on his tail over and over again.
* The Legend of Zelda: Ocarina of Time are a rare example that don't move forward by themselves; Link still has to walk when he's wearing them. They also have a short time limit, so they're mostly used to solve puzzles rather than as a means of travel. But they still let Link walk over obstacles like water, quicksand, or even empty air while they're active.
* The Legend of Zelda: Ocarina of Time, are portrayed as significantly taller than humans if not to the same extent as the King — Sidon, for instance, is nearly three times Link's height.
* The Legend of Zelda: Ocarina of Time as he waits for the hero to arrive.
* The Legend of Zelda: Ocarina of Time (a timeline where the child Link used his knowledge of the future to help avert Ganondorf's invasion before it happened).
* The Legend of Zelda: Ocarina of Time, a trapped Goron who would be fed to the boss Volvagia says something like this.
* The Legend of Zelda: Ocarina of Time battles like this in Dodongo's Cavern. Both times, Link is pitted against two Lizalfos, who attack him one at a time and switch places after the current fighter takes a certain amount of damage.
* The Legend of Zelda: Ocarina of Time brings that game's version of Death Mountain and Lake Hylia for Darunia and Princess Ruto, respectively.
* The Legend of Zelda: Ocarina of Time), but most are just neat background info.
* The Legend of Zelda: Ocarina of Time centers around Link's adventures as a child before he seals himself inside the Temple of Time, where he lays dormant for several years and later emerges as an adult.
* The Legend of Zelda: Ocarina of Time changes it up by having the camera pull out after Link collapses and then it fades to black.
* The Legend of Zelda: Ocarina of Time). Daytime does have the stronger Peahats, which are almost as persistent, but one has to stray much further off the path to provoke them. Averted in Adult Link's timeline: there's barely any difference between day and night danger-wise.
* The Legend of Zelda: Ocarina of Time, depending on the mask Link wears at the stage, the Deku Scrubs will either adore it, have mixed reviews on it, or hate it. If it is the last one, they'll do their own variation on Produce Pelting... by spitting Deku Nuts at Link until he leaves.
* The Legend of Zelda: Ocarina of Time, doing this journey again will be necessary in order to bring eye drops to Biggoron (as using the warp songs will automatically deplete all the time limit) and repair the Biggoron Sword.
* The Legend of Zelda: Ocarina of Time (DragonRand100) The Gerudo, like the counterparts in the game, are a predominantly female race that rely on mixing with other societies to find males. It is revealed that in the distant past a curse was afflicted on them by the Sheikah that causes male children to often die at childbirth. Inevitably, it is explained that this would result in the Gerudo race dying out in the future, unless the curse could be broken.
* The Legend of Zelda: Ocarina of Time, drains all the light out of the room when casting his evil magic. To the viewer, this almost silhouettes Ganondorf in darkness.
* The Legend of Zelda: Ocarina of Time element, which was eventually dropped from the game. Unfortunately for poor Link, his potential love interests were not dropped along with it, and so the player gets to see every relationship he has torn apart.
* The Legend of Zelda: Ocarina of Time explains to Link that the Sheikah are forbidden from having romantic relationships because they believe that such emotions cloud their better judgment and rational thinking; thus, they reproduce via birthing mothers, whose sole purpose in the tribe is to bear the children. As a

result, the Sheikah children are raised by the entire Sheikah community rather than by their birth parents.
* The Legend of Zelda: Ocarina of Time featured all the NPCs dancing around a bonfire after the defeat of Ganon.
* The Legend of Zelda: Ocarina of Time features a female Goron. Only male Goron appear in the games and the species might be male-only. In the manga, a mother Goron is depicted with eyelashes and breasts.
* The Legend of Zelda: Ocarina of Time features Nayru's Love, a spell that protects Link with a blue diamond-shaped barrier for one minute.
* The Legend of Zelda: Ocarina of Time for Ganon/Ganondorf. Later games have brought the focus away from the central Triforce myth to flesh out the broader Hylian mythos and pantheon.
* The Legend of Zelda: Ocarina of Time from the ground and bowls him over.
* The Legend of Zelda: Ocarina of Time had endlessly spawning Stalchildren that appeared in Hyrule Field at night, which grew larger the more of them you defeated.
* The Legend of Zelda: Ocarina of Time had Morpha, a boss that is effectively a pool of water. It has a round ball as a weak point and is subtitled as a "Giant Aquatic Amoeba", though it's unclear if only the ball is the boss and it's hydrokinetic, or if the whole pool is the boss and the ball is just its nucleus. After it's defeated, the entire room dries up with astonishing quickness, supporting the latter idea.
* The Legend of Zelda: Ocarina of Time had Phantom Ganon charge out of a set of paintings in the middle of a temple, as well as Poes possessing the paintings throughout the dungeon.
* The Legend of Zelda: Ocarina of Time had some feelies in other countries, such as "Deku Nuts" and an actual ocarina.
* The Legend of Zelda: Ocarina of Time has a giant river of sand flowing through the desert.
* The Legend of Zelda: Ocarina of Time has a more benevolent example. After climbing Death Mountain as a child, Link meets a large owl named Kaepora Gaebora, who offers him a shortcut back down. If the player accepts, Link will be lifted up and flown down the mountain, to be dropped off at Kakariko Village at the base.
* The Legend of Zelda: Ocarina of Time has an absolutely ginormous dodongo skull near the entrance to the boss chamber in the Dodongo Cavern. Kinda' makes you wonder what would've happened if Ganondorf had resurrected THAT instead of the dragon in the Fire Temple. Furthermore, in Dondongo's Cavern that entire room where the skull is located is inside a massive ribcage. Oddly, this means the ginormous skull is facing the wrong way...
* The Legend of Zelda: Ocarina of Time has a vague recounting of a war which occurred before Link was born and led to the death of his mother, who left him in the care of the Great Deku Tree. It's implied that this was the war that led to the unification of Hyrule.
* The Legend of Zelda: Ocarina of Time has certain colors corresponding to Locations, Elements, Races etc. that are all aligned.
* The Legend of Zelda: Ocarina of Time has Link start another journey after or during the credits.
* The Legend of Zelda: Ocarina of Time has Navi leaving Link at the end because Link isn't a Kokiri and the only reason she was sent to him was so he could fulfill his quest. Once that was done, she couldn't stay with him any longer.
* The Legend of Zelda: Ocarina of Time has the infamous Wall Master, which drops from above and attempts to grab Link. If you look up as it's falling though, it disappears...
* The Legend of Zelda: Ocarina of Time has this in Kokiri Village, where the locals know little to nothing of what goes on outside the forest, and all believe that leaving will cause them to die.
* The Legend of Zelda: Ocarina of Time has two, one in the past and the other in the future.
* The Legend of Zelda: Ocarina of Time have a poignant goodbye as he leaves the forest for the first time to go on a quest.

* The Legend of Zelda: Ocarina of Time, have involved time travel.) And if there does exist an alternate timeline for every game, then what happened in those dozens of other timelines?
* The Legend of Zelda: Ocarina of Time, have since become the franchise's most common Man-Eating Plants. They have most of the features of cartoonish carnivorous botany — a mouthlike "bulb" with animal teeth and a clear tongue, minimal presence of actual leaves and a tendency to lunge and snap at people passing close. Several varieties appear, including Baba Serpents that can survive having their stems severed and will chase after Link like snakes if cut.
* The Legend of Zelda: Ocarina of Time, he rigs his castle to fall down when he loses to Link in their first match. When the hero and Zelda survive that, too, he gives in to his rage and turns into Ganon for another attack.
* The Legend of Zelda: Ocarina of Time he's experienced enough to use the bow even as a child.
* The Legend of Zelda: Ocarina of Time himself or end the conversation, and the cursor always defaults to "Yes, I do want you to repeat".
* The Legend of Zelda: Ocarina of Time, his reflection is no longer visible in the water...
* The Legend of Zelda: Ocarina of Time: if Link gets frozen, he'll thaw out eventually, but as long as he's frozen he loses hearts, possibly because of suffocation.
* The Legend of Zelda: Ocarina of Time if you run around as Wolf in Hyrule Town...
* The Legend of Zelda: Ocarina of Time In a slightly less lovey-dovey example, Impa teaches Link Zelda's Lullaby.
* The Legend of Zelda: Ocarina of Time. In most games he doesn't even have eyes.
* The Legend of Zelda: Ocarina of Time: In order to defeat Ganon, Link must strike at its tail in order to weaken it enough to reach its head for the finishing blow. Ganon can turn quickly to hide its tail, so Link must stun it using various means, or just roll under its legs.
* The Legend of Zelda: Ocarina of Time in the Happy Mask Shop in Hyrule Castle Market.
* The Legend of Zelda: Ocarina of Time: In the Shadow Temple, there are rooms where the floors, walls and ceilings are made entirely out of skulls.
* The Legend of Zelda: Ocarina of Time involve Link rescuing the Sages or equivalent characters from Ganon's grasp, almost half of whom are guys.
* The Legend of Zelda: Ocarina of Time is that Ocarnia is afraid that he isn't good enough to eventually become Mask.
* The Legend of Zelda: Ocarina of Time. It has six of them, and they attempt to grab Link while the rest of its body remains underground.
* The Legend of Zelda: Ocarina of Time: It is extremely inadvisable to go into the Lost Woods unless you are a Kokiri child with a guardian fairy, if you don't you want to become one of the undead monsters that roam the forest. Oddly, it's implied by Saria that she and Link used to play in the woods before he received his fairy. This may either be attributed to him being guided by Saria or simply that he's the bearer of a portion of the Triforce.
* The Legend of Zelda: Ocarina of Time: It's implied that Link is attracted to Sheik. He even gets flustered at one point from staring at him for too long. Sheik is actually his childhood crush Princess Zelda in disguise.
* The Legend of Zelda: Ocarina of Time, it's kinda hard to notice they're on your side at first.
* The Legend of Zelda: Ocarina of Time: It's revealed that Volvagia is a baby dragon that Link brought seven years ago. During the Young Link part of the manga, there's no place where that scene could have taken place.
* The Legend of Zelda: Ocarina of Time. Let's count them: Kokiri Sage Saria, Farmer Girl Malon, Zora Princess Ruto, probably Princess Zelda, and even Gerudo sage Nabooru makes a comment in that direction! Still, he manages to avoid all of them, even the one who tried to get him engaged with her.
* The Legend of Zelda: Ocarina of Time, Like-likes will slowly melt into a puddle before burning away.

* The Legend of Zelda: Ocarina of Time, Link accepts the Zoras' sacred jewel so he can open the Door of Time, only to discover with some confusion that he is now engaged to Princess Ruto.
* The Legend of Zelda: Ocarina of Time, Link can bribe a guard with ten rupees to let him sneak into Hyrule Castle. A bit pointless, as there is a nearby vine you can climb up for free and you can't bribe any of the other guards past him, but what the hey?
* The Legend of Zelda: Ocarina of Time, Link could only wield the Master Sword when he is an adult, so upon gaining it he was put into a sleep for seven years.
* The Legend of Zelda: Ocarina of Time, Link ends the third dungeon by saving Princess Ruto from the dungeon's boss. Ruto, who had initially been standoffish towards Link, changes her tune and becomes quite taken with him. She gives him the Zora's Sapphire, but mentions that her mother told her to only give to her future husband...which means she and Link are now engaged! When Link meets Ruto in the adult era, she calls him out on making her wait but admits that saving Hyrule is more important than getting married.
* The Legend of Zelda: Ocarina of Time, Link must once again traverse the interior of Jabu-Jabu, except this time it's the god of a different group of Zoras, in the land of Labrynna.
* The Legend of Zelda: Ocarina of Time, Link pulls the Master Sword from the Pedestal of Time and travels seven years into the future. He eventually learns that he can go back to the present by putting the Master Sword back.
* The Legend of Zelda: Ocarina of Time, Link's response to Darunia dancing to Saria's song is to back away slowly.
* The Legend of Zelda: Ocarina of Time made this much more difficult to pull off, due to changes to the backflipping physics (Link jumps higher, but covers a shorter distance). It's completely gone in the Gamecube and Wii games, where attempting to flip over similarly-high fences will cause Link to hit an invisible wall and more effectively prevent sequence breaking.
* The Legend of Zelda: Ocarina of Time manga, Rauru tells Link that his deceased father was a Hyrulean royal knight who died in battle.
* The Legend of Zelda: Ocarina of Time manga, Ruto ran off and hid in Lord Jabu Jabu because her father was going to marry her off the next day.
* The Legend of Zelda: Ocarina of Time, Mido admits that he was a jerk and asks the adult version of Link (whom he doesn't recognize) to apologize to Link on his behalf.
* The Legend of Zelda: Ocarina of Time Nabooru. She enlists his help, promising a reward. Once Link (around the age of 19) saves Nabooru and she becomes a sage, she says "It's a shame. If I had known you'd become such a handsome man...I would have kept my promise!"
* The Legend of Zelda: Ocarina of Time. No, the little four-hole wooden ones wouldn't do. They had to be the 10-hole ceramic kind. And they had to be blue. Many music stores were sold out and couldn't figure out why.
* The Legend of Zelda: Ocarina of Time, or over 20% of the install base. It raised 3DS sales by over 50% the week it came out as well, despite not being released in the West until the following week.
* The Legend of Zelda: Ocarina of Time, Phantom Ganon does this to himself before the fight begins.
* The Legend of Zelda: Ocarina of Time, Phantom Ganon leaped in and out of pictures.
* The Legend of Zelda: Ocarina of Time, Saria's Song is first heard diegetically, directing your path through the Lost Woods maze. After you learn the song on the Ocarina, it becomes permanent background music there.
* The Legend of Zelda: Ocarina of Time sealing the Golden Realm that Ganondorf has been attempting to obtain, and of course Ganondorf follows Link into the Golden Realm and takes the Triforce when Link unseals it. This sort of thing happens a lot in the series. Specifically, Link himself was sealed away because, as a Hylian child, he was considered too young to be the Hero of Time. Of course, the Hero would have been unnecessary if he hadn't been sealed away for seven years, letting

Ganondorf take over. If Link had in fact been a Kokiri, or else a little bit older, he would have succeeded in stopping Ganondorf because he would have gotten the power first.
* The Legend of Zelda: Ocarina of Time, she's taken a turn for the creepy. "That guy isn't here anymore. Anybody who comes into the forest will be lost. Everybody will become a Stalfos. Everybody, Stalfos. So, he's not here anymore. Only his saw is left. Hee hee." ... "Heh heh heh. Are you going to be...too? Heh heh!"
* The Legend of Zelda: Ocarina of Time's Hyrule Field. While they come up to adult Link's waist, Link on Epona's back must jump over one in particular it as if it were a high fence, and only then at a very particular angle (perpendicular).
* The Legend of Zelda: Ocarina of Time's Links are actually confirmed to be) but at the same time are reincarnations of each other.
* The Legend of Zelda: Ocarina of Time: Some of Link's stunts were done with motion capture.
* The Legend of Zelda: Ocarina of Time suffered from this in Spain. The Spanish translation for the game wasn't going to make it in time, so to avoid having to delay the release date for all Europe (and miss the holiday season at it), it was not programmed into the game. Instead, a 150-page guide was printed and bundled with all copies of the game in Spain, which included all the English lines of text with their respective Spanish translations. While a creative workaround, the guide was certainly not handy to use for the players, especially with how non-linear the storyline is.
* The Legend of Zelda: Ocarina of Time) that crush you when you try to open one of them.
* The Legend of Zelda: Ocarina of Time that has a distinct symbol for their respective virtue. Regions that don't have a Goddess and Triforce bearer still get by with only associated races, national symbols, colors, elemental power, and songs.
* The Legend of Zelda: Ocarina of Time, the area of floor you have to bomb in order to reach King Dodongo uses a texture that doesn't quite mesh with the floor around it; if you look closely you can see the seams. Also, the rocks that you can bomb tend to be very obvious, as they all use the same model.
* The Legend of Zelda: Ocarina of Time: The battle against Shadow Link starts off like this and goes on for about a minute or so before he starts attacking on his own.
* The Legend of Zelda: Ocarina of Time, the blonde Kokiri girl (seen on the roof of Saria's house as a child, and gives the Odd Mushroom to Adult Link) is Fado. She was never named in the game, but her name was revealed on the old official Zelda site and was later used in the Encyclopedia.
* The Legend of Zelda: Ocarina of Time The fact that they are defeated in just two hits and even may lose their heads in a comical way makes them even more un-frightening.
* The Legend of Zelda: Ocarina of Time: The game has both the basic Hookshot and the upgraded Longshot, which, obviously, is quite a bit longer. Only Adult Link can use them, since his Child form already has the Boomerang for long-range stunning attacks.
* The Legend of Zelda: Ocarina of Time the Gerudo throw Link into some sort of cell, leaving him all of his equipment, and no matter how many times he escapes and gets caught again, they just throw him back in the same cell. With all of his equipment.
* The Legend of Zelda: Ocarina of Time, the Great Deku Tree turns gray when he dies.
* The Legend of Zelda: Ocarina of Time, the guillotines in the Shadow Temple make a scraping sound as they rise and fall.
* The Legend of Zelda: Ocarina of Time: The Haunted Wasteland has a river of no-escape quicksand that you cross by either using the Longshot or the Hover Boots. Once across, you are still in danger of sinking if you stray off the path.
* The Legend of Zelda: Ocarina of Time, the mysterious Sheik turns out to be the future badass self of the princess Zelda, having disguised herself to evade

Ganondorf and to aid Link.
* The Legend of Zelda: Ocarina of Time, there is no actual smoke, only a moment of blinding light. It helps that Sheik is magic, though. To be specific, the sheikahs use Deku Nuts, which blind you and daze you. Link and the player see it as them instantly disappearing, but what actually happens is Link loses his awareness giving ample time for them to get away. You can do this yourself with the in game enemies, as the Deku Nut is a useable item.
* The Legend of Zelda: Ocarina of Time, there is no coast or ocean. The largest body of water is Lake Hylia, which is landlocked (and to the south).
* The Legend of Zelda: Ocarina of Time, there is the Marathon Man, who you cannot beat in a race no matter how fast you run.
* The Legend of Zelda: Ocarina of Time, there's a cutscene between Link and Saria when Link leaves the Kokiri forest for the first time. There's no dialogue and it's completely serious. The point of the scene is never explained, leaving many fans with different interpretations on what it means and what Link is feeling.
* The Legend of Zelda: Ocarina of Time they get their respective Triforces. It might have something to do with legends about Hylian ears being designed to hear the messages of the gods...
* The Legend of Zelda: Ocarina of Time to Link, who responds to this like any rational person would — by screaming and fleeing in terror.
* The Legend of Zelda: Ocarina of Time, tries to have all the Gorons fed to the great lava dragon Volvagia as an example of what happens to those who defy him.
* The Legend of Zelda: Ocarina of Time, upon entering the Spirit Temple's boss room and encountering another Iron Knuckle, the by-now familiar mini-boss BGM starts up as it reaches for its battle axe and prepares to attack... only for it to suddenly taper off as the Iron Knuckle realizes it is unarmed. It promptly snaps its fingers and summons its axe out of thin air, which cues the music to start again.
* The Legend of Zelda: Ocarina of Time Up to Eleven. In spite of that it is also one of the darker installments of the series.
* The Legend of Zelda: Ocarina of Time, using a false identity to aid Link while avoiding capture by Ganondorf.
* The Legend of Zelda: Ocarina of Time when Link deliberately uses bombs to set it off.
* The Legend of Zelda: Ocarina of Time when Link is battling ganon Zelda herself despite her vast array of magical powers including being able to teleport wherever she wants and ability to transform into a more nimble being who could easily jump over the firewall simply stands there doing nothing in the battle. Even when the firewall goes down all she does is tell Link to get the Master Sword (while she makes no attempt to move whatsoever) and stands there even after there is nothing blocking her. She only gets involved at one point.
* The Legend of Zelda: Ocarina of Time, wherein he is playing the organ while awaiting Link's arrival at the castle to rescue Princess Zelda.
* The Legend of Zelda: Ocarina of Time, where they could dig through the dirt while staying under the plants as they stalked Link.
* The Legend of Zelda: Ocarina of Time where you infiltrate the Gerudo Fortress, having to avoid guards and stunning them with your bow/hookshot and freeing prisoners covertly. And a simplified preview of this genre shift earlier in the same game, when young Link has to sneak past Hyrule Castle guards to meet up with Princess Zelda.
* The Legend of Zelda: Ocarina of Time, which are places taken over by Skulltulas.
* The Legend of Zelda: Ocarina of Time Which is accessed by a slender vertical ladder. How they get the cow up there is anybody's guess.
* The Legend of Zelda: Ocarina of Time. While Rauru claims afterwards that the Sword demands an adult wielder, this is not foreshadowed beforehand, and it is contradicted in both earlier and later games within the same timeline.
* The Legend of Zelda: Ocarina of Time. While the game has come under its fair share of criticism in the years since, at the time, it won back a lot of series fans by featuring an "adult" Link and a darker story, as well as introducing new items and characters (including one of the franchise's most well-loved partner

characters, Midna).
* The Legend of Zelda: Ocarina of Time. Why these dried-up zombies wanted to dry-hump your face was never explained.
* The Legend of Zelda: Ocarina of Time with the Bombchu Shop in Castle Town, which sells nothing but Bombchus in limited quantities of ten and twenty. Once they're gone, they're gone. Not that most players are ever going to need all of the 120 Bombchus that are available. A merchant in the Haunted Wasteland has an unlimited supply of Bombchus anyway, although he does charge more than the shop in Castle Town.
* The Legend of Zelda: Ocarina of Time wouldn't be recognized by the still childish Kokiri (except for Saria, but she's a Sage, so...)
* The Legend of Zelda: Ocarina of Time you can use your sword to slice wooden signs to pieces, then play Zelda's Lullaby on your ocarina to cause the pieces to float up, reattach themselves, and reconstitute the sign.
* The Legend of Zelda: Ocarina of Time, Zelda goes in disguise as Sheik, a masculine version of herself.
* The Legend of Zelda: Ocarina of Time. Zelda writes an official royal decree to the guard of the neighboring village to allow Link to go Death Mountain. The guard when finding out laughs loudly at the letter and situation, as both Link and Zelda are children he believes Zelda is just using her royal family authority to play a children's game and doesn't take Link seriously due to his age. He does open the gate but it appears to be more for his own amusement rather than listening to the princess of the land.
* The Legend of Zelda. Once these are gone, they will sometimes be replaced with different wares but more often they will be sold out forever, denoted by a wooden sign with an X painted on it. This is just as unrealistic in the opposite direction, as it means these shops only have one of the given item and had no prospects of selling them to anyone else (Though in one game, once all these one-sell only items are sold, he immediately announces that he has enough money to retire). Items that can be used or lost, like potions or ammo, will never run out and otherwise infinite use items that can be lost (such as a wooden shield that was destroyed) will be back in stock after they are lost.
* The Legend of Zelda, one can't help but think it's because the developers couldn't decide on which girl to pair him up with.
* The Legend of Zelda, one Link can pick up another in order to throw him over an obstacle or onto a high cliff.
* The Legend of Zelda, one of Ganon's plots to steal the Triforce of Wisdom was with a magic mirror that created a copy of Zelda and also allowed her to be taken to his realm, where she was tied to a spike in Ganon's chamber, but managed to escape.
* The Legend of Zelda one of the first weapons you have access to is a woodcutter's axe, and you're able to scavenge bigger and better ones as the game progresses.
* The Legend of Zelda, only the Silver Arrows and the Master Sword can harm Ganon.
* The Legend of Zelda Oracle, a skeletal Piratian had his entire body destroyed except for his skull. Link must carry his skull so the Piratian can help locate the bell his Captain was looking for.
* The Legend of Zelda Oracle can only activate dormant time portals in fixed locations. Once upgraded though, Link no longer needs to find a portal to travel through time but can do it anywhere except in the graveyard or near the black tower.
* The Legend of Zelda: Oracle Games, but this doesn't explain why Zelda has a completely different design than before and why she doesn't recognize Link.
* The Legend of Zelda: Oracle Games feature Gasha trees, which sprout from Gasha seeds you plant and their nuts bear various useful items.
* The Legend of Zelda: Oracle Games getting a flute, the game forces the choice for you.)
* The Legend of Zelda: Oracle Games grows from a baby to a child during the course of the first game you play, then into a teenager during a linked game.
* The Legend of Zelda: Oracle Games has the Switch Hook, which, rather than pulling

Link toward an object, makes him switch places with it. It can also be upgraded into the Long Hook, which is about twice the length.
* The Legend of Zelda: Oracle Games has the Yoll Graveyard, which had ghosts in it as well as the first dungeon in the game. In addition, the final dungeon in the game is located in the same location in the past, and is an ancient tomb blocked by whirlpools. The Yoll Graveyard is also one of the only two places in the entire game that prevents you from time traveling, and distorts the screen if you try.
* The Legend of Zelda: Oracle Games required to progress, and caused many players to become stuck in them due to their high difficulty, especially the rhythm one, which can be insanely hard if you've never played a Rhythm game before.
* The Legend of Zelda: Oracle Games, sometimes Maple runs into Link causing them to both drop several items and a mini-game where they race to collect the items. If the screen they ran into each other on had a lot of deep water that the items fall into it and disappear, even if the total value of the items Link collect is better than that Maple collects, Maple still counts the items that disappeared as if she collected them.
* The Legend of Zelda: Oracle Games the one where you need to go (the directions are random, but sometimes it's possible for the sequence to just be up all the way).
* The Legend of Zelda: Oracle Games, this means the two somehow were around during the events of that game, and yet didn't do anything when Ganon tried to return.
* The Legend of Zelda: Oracle Games when hit with a weapon too weak to kill them in one hit—which is to say that such weaponry exists.
* The Legend of Zelda Oracle intimidating - right up until you go to enter the dungeon and the volcano goes cross-eyed.
* The Legend of Zelda: Oracle of Ages and several NPCs' comments throughout the game indicate that Ambi herself is normally kind, fair, and a bit of a dreamer, so she's an aversion when outside of Veran's influence.
* The Legend of Zelda: Oracle of Ages as befitting her deceptive, mystical nature.
* The Legend of Zelda: Oracle of Ages However, rather than appear completed instantaneously to your present self, the tower being built in the past progresses in increments as you progress through the plot.
* The Legend of Zelda Oracle of Ages in order to sneak into the Oracle's sanctuary with Link. She later controls the Oracle of Ages, Nayru and falls back on controlling Queen Ambi later on. She tries to do this to Link but he dodges her soul effortlessly.
* The Legend of Zelda: Oracle of Ages Nayru and uses her powers as the Oracle of Ages to create perpetual daytime and manipulates Queen Ambi into making the residents of Lynna Village work on the Black Tower 24/7.
* The Legend of Zelda: Oracle of Ages that each possess her face. They are a beetle with her head which she can retract in, a bee which has her face on top of its forehead, and a spider which has her face on its underside.
* The Legend of Zelda: Oracle of Ages, though the seeds are at least somewhat rare.
* The Legend of Zelda: Oracle of Ages uses an interesting variant of this trope: the boss of the 7th dungeon is vulnerable only to its own projectile attacks. However, rather than luring them back to it (they aren't homing projectiles), you have to use the Long Hook to swap places with the big jellyfish and put it into the path of its own attack.
* The Legend of Zelda: Oracle of Seasons, a Subrosan can be seen tossing items into a volcano because he likes the resulting explosions. These are items that Link would typically spend lots of money or go on sidequests for, like Gasha Seeds or Pieces of Heart; too bad for the player, you can't get them from him. Also, the Subrosan market sells items Link would find useful for relatively small numbers of Ore Chunks, with an implication that they don't know what some of those items are (they refer to a Piece of Heart as a "Peach Stone" and put it on the counter upside-down.)
* The Legend of Zelda: Oracle of Seasons, flooded not by rising seawater (it's quite far from the ocean) but by melting snow from the mountains.
* The Legend of Zelda: Oracle of Seasons: The land of Holodrum's seasons are mixed

up due to General Onox's meddling, resulting in a patchwork of summer heat, fall colors, wintry chill and lush spring growth rubbing shoulders across the land. Link can also change the seasons at will with the aid of the Rod of Seasons.
* The Legend of Zelda: Oracle of Seasons: The miniboss Syger (a rolling tiger) has to be hit in the globe at the end of its tail to be damaged.
* The Legend of Zelda Oracle: The first dungeon boss, Pumpkin Head, resembles a humanoid with a jack-o'-lantern for a head. It's actually a small spirit inhabiting the pumpkin and controlling the rest of the body.
* The Legend of Zelda Oracle: The wizard Agunima can create three copies of himself, which move about the room and attack Link independently. The two copies are invulnerable, but can be told from the real Agunima because they don't cast shadows.
* The Legend of Zelda or it could be a reference to concept art that depicted Link as a blond.
* The Legend of Zelda or unintentionally), such as a teenage Zelda and a young Impa.
* The Legend of Zelda: Paradise Calling justified the games' use of this with a Sheikah scroll that Link keeps behind his shield, allowing him to store his bow and arrows among other things.
* The Legend of Zelda: Paradise Calling, Link and Malon are reunited when she is ambushed by bandits in her milk cart and almost raped before he intervenes.
* The Legend of Zelda: Paradise Calling: Malon breaks down crying in the bath after returning to Lon Lon Ranch, having narrowly escaped being raped and murdered the day before.
* The Legend of Zelda: Paradise Calling: Sheik is known for doing this in canon, but when she meets Link and Malon in Kakariko Village, she pulls out a couple of Deku seeds before deciding to spare them the theatrics for once.
* The Legend of Zelda: Paradise Calling: When Link inspects Malon's bruises after the bandit attack, he notes that a mark by her left eye looks older than the rest. She insists that she got it today and he lets the matter drop until they get back to the ranch and he sees how Ingo treats her.
* The Legend of Zelda: Paradise Calling, when Link tries to tell Malon that the gargoyle statue came to life and attacked him.
* The Legend of Zelda: Phantom Hourglass, a Goron tells you that, since you're an outsider, he shouldn't tell you that the Elder's home is right over there, in this spot on your map! (Of course, the home is a big and obvious cave anyway.)
* The Legend of Zelda: Phantom Hourglass cash value. And yes, if Link opens a chest, he will always take the rupoor if there's one inside.
* The Legend of Zelda: Phantom Hourglass, fog rolls in on the ghost ship to emphasize its eeriness.
* The Legend of Zelda: Phantom Hourglass for killing the monsters or suddenly blaring out lines like "FALLEN! FALLEN! They are the Fallen!". When all four are reunited it should come as no surprise whatsoever that they reveal themselves to be hideous monsters and start a game of Dead Man's Volley.
* The Legend of Zelda: Phantom Hourglass has green worm-like enemies (which are literally called Sandworms) that chase and try to eat Link if he moves any faster than walking speed across certain sandy areas.
* The Legend of Zelda: Phantom Hourglass, has many skeletons of previous adventurers scattered through its halls. In an interesting variation, all of them still retain their spirits, who will give you clues to help succeed where they failed.
* The Legend of Zelda: Phantom Hourglass involving whacking a seesaw with the hammer in order to reach the giant golem Eox's weak point.
* The Legend of Zelda: Phantom Hourglass on Nintendo's website within a certain timeframe from the game's release or until the stylus supply was exhausted.
* The Legend of Zelda: Phantom Hourglass. Phantoms can't see or enter them, and time doesn't drain from the Phantom Hourglass when Link is in one.
* The Legend of Zelda: Phantom Hourglass sand is deadly for Link (luckily, his Bombchus can navigate through them just fine).

* The Legend of Zelda: Phantom Hourglass, set long after her passing, she's referred to in the past tense as Tetra.
* The Legend of Zelda: Phantom Hourglass situation you can't just leave the little brats to rot.
* The Legend of Zelda: Phantom Hourglass, the 8th floor of the Temple of the Ocean King has a fake safe zone only distinguishable by the fact that all the other safe zones have animations, while this one is static. And by falling into it.
* The Legend of Zelda: Phantom Hourglass, the game brings back the Grappling Hook, which works differently to take advantage of the game's touch controls. Any wooden pole can be reached to as soon as Link shoots the hook at it. If the item is used between two poles, the rope will serve as a tightrope for Link to cross over.
* The Legend of Zelda: Phantom Hourglass, there's the on-screen clock, aided by the fact that the Moon is coming down slowly and it's visible from almost everywhere in the game's world. The on-screen clock eventually changes into a countdown in the game's last six minutes.
* The Legend of Zelda: Phantom Hourglass until you get the bow about halfway through the game, and cannot be defeated until you get the necessary legendary sword shortly before the end of the game.
* The Legend of Zelda: Phantom Hourglass when your sword gets to full power and you can finally kill the bastards.
* The Legend of Zelda: Phantom Hourglass, while the fairy Ciela rightfully calls out 20s-30s Linebeck for being a coward, he seems to develop a real friendship with the twelve-year-old Link, even helping him save the world.
* The Legend of Zelda: Phantom Hourglass, you gain the ability to stop time for several seconds during the final boss battle.
* The Legend of Zelda released in 1986 and still makes games to this day.
* The Legend of Zelda respectively. In the former game, excessive development resulted in environmental degradation and desertification that left the advanced civilization in ruins, while in the latter game, the Kingdom of Hyrule deliberately abandoned the technology out of fear of its power and only dug it back up 10,000 years later to use it against Calamity Ganon.
* The Legend of Zelda: Round-eared humans play a generally marginal role in the setting. Most notable events in the series center around the pointy-eared Hylians, Sheikah and Gerudo, as well as the more clearly non-human races, while humans rarely produce notable individuals from their ranks. They're also relatively uncommon, and mostly inhabit territories on the edge of Hyrule and the known world.
* The Legend of Zelda runs into the Beamos' range of vision, it'll fire a long laser that travels across the ground at him from its eye.
* The Legend of Zelda series and how good the player is, this can either be played straight or subverted with a child Link.
* The Legend of Zelda series does this all the time. Towns are small and might have only a dozen buildings, if that. Forests, fields, mountains and so on are all small compared to what they would be in real life. Because all travel is in real-time, rather than the world being symbolically represented, the result is that it can feel rather small, and not like a world anyone could actually live in. Even as a single country, it's small.
* The Legend of Zelda series features numerous females, several of whom, fall under this category:
* The Legend of Zelda series seem to be set in an almost separate universe than the more modern ones:
* The Legend of Zelda, set north of the original with Death Mountain as a divider, even features another Hylian continent beyond the ocean.
* The Legend of Zelda: Several games use this to denote enemy strength, with progressively stronger variants of a basic enemy family coming in distinct colors.
* The Legend of Zelda's GBA "NES Classics" edition touched up the translation in spots, notably in the introduction.
* The Legend of Zelda, she guides him when he first awakens on the Great Plateau and sporadically notifies him when he's completed major story quests.
* The Legend of Zelda, Sheik notes that Link lacks skill, but has potential, and

describes him as "all impulse and reaction instead of thought and action." She even asks Link how he managed to beat Demise in the first place with how he fights.
* The Legend of Zelda shows that, like real frogs, they can travel across land alright but will get dehydrated quickly when away from water too long.
* The Legend of Zelda: Skyward Sword, all have the same glossy purple coloration.
* The Legend of Zelda: Skyward Sword also included a gold Wii Remote and a Music CD.
* The Legend of Zelda: Skyward Sword and believes he's destined to save her and earn her affections. He's absolutely crushed to learn he's no hero and eventually comes to accept Zelda will never return his feelings.
* The Legend of Zelda: Skyward Sword, and had lived for thousands of years already, justifying the trope.
* The Legend of Zelda: Skyward Sword and look over the landscape. Zelda decides that she's going to try to make a life for herself there and asks Link if he'll be doing the same. He smiles and the game ends.
* The Legend of Zelda: Skyward Sword), and perhaps more cruelly, he's happy when Peatrice is upset, as he figures that means she broke up with whoever the boy was.
* The Legend of Zelda: Skyward Sword, and then praise some small or irrelevent aspect of the game like a nice texture, or liking how the cursor rotates.
* The Legend of Zelda: Skyward Sword and Zelda's father keeping everything except that Zelda is missing from the rest of the (small) population.
* The Legend of Zelda: Skyward Sword: Apparently, Zelda isn't above dragging her childhood friend around to things she wants to do, doing all the talking whenever she's around (even if Link never talks), and pushing/jumping at him from potentially-lethal flights to make him use the sailcloth/catch her on his Loftwing.
* The Legend of Zelda: Skyward Sword (appropriately enough), and after about 45 seconds launches into epicness.
* The Legend of Zelda: Skyward Sword are described as returning from death by way of sheer hatred and will to mess up the world. And, supposedly due to a penchant for undergarments...
* The Legend of Zelda: Skyward Sword are implied to be this way. You find the Thunder Dragon's remains in the present, and travel back in time to find out he's sick and dying. After healing him in the past, he's simply absent in the present, but does show up for the song, so he likely just changed residence instead of dying.
* The Legend of Zelda: Skyward Sword as well as a replay of the Silent Realm challenges, and unsurprisingly this has kept players playing them over and over again because of the Speed Run potential in both cases, and the opportunity to get juicy rewards (including the legendary Hylian Shield) helps.
* The Legend of Zelda: Skyward Sword at the end that sticks to things Link hits it with.
* The Legend of Zelda: Skyward Sword (Australian-Japanese co-production)
* The Legend of Zelda: Skyward Sword brings us Beedle the shopkeeper. Talk to him in the day when he's doing his job, and he speaks like every other NPC out there. However, if talk to him at night, when he's not on duty, he suddenly talks in a highly affected accent and starts using words like "tenebrous." If you bring it up to him, he brushes you off.
* The Legend of Zelda: Skyward Sword, but at no other point is Faron Woods ever stated to be overflowing with monsters.
* The Legend of Zelda: Skyward Sword), but he's rather restrained compared to the other two.
* The Legend of Zelda: Skyward Sword. But when you finally face the thing in battle, it may be hard not to crack up at its almost cutesy-looking feet with flabby "toes", and the fact that it looks like a giant man-eating pinecone.
* The Legend of Zelda: Skyward Sword carries the knightly longsword known as the Goddess Sword throughout the game and derives several magical abilities from it. It becomes the Master Sword later on.
* The Legend of Zelda: Skyward Sword, Deku Babas (carnivorous plant enemies that attack by biting) are now able to open their jaws vertically as well as

horizontally, giving them the appearance of this trope.
* The Legend of Zelda: Skyward Sword: Deku Babas return again, along with the tougher Quadro Babas.
* The Legend of Zelda: Skyward Sword) demon-like creature that wants nothing more than to be a normal Skyloftian, and begs Link to get Gratitude Crystals that he hopes will allow him to transform. Successfully get enough, and he can be found in the local bazaar in a humanoid form... though he still looks slightly demonic.
* The Legend of Zelda: Skyward Sword does this while performing a ritual.
* The Legend of Zelda: Skyward Sword, each student uses a slightly different uniform when they graduate from the Knight Academy. The color varies each year and seems to be personalized to a degree; Pipit, Link's friend, has a yellow tunic with markings on the pants; Karane has a light green tunic and a beret instead of a cap and Link himself uses pouches on the waist with a white shirt under the chainmail.
* The Legend of Zelda: Skyward Sword, Eagus has the role of teaching the students of the Knight Academy everything about swordfights. As expected, Link is one of those students.
* The Legend of Zelda: Skyward Sword enemy that is portrayed here as a bulky robotic statue), and Sentrobe (a flying drone that shoots missiles and releases flying spheres that self-destruct over time if they're left unchecked).
* The Legend of Zelda: Skyward Sword even before he stopped being a jerk to Link.
* The Legend of Zelda: Skyward Sword, even though the game lets players know early on that the direction of their swings will be important.
* The Legend of Zelda: Skyward Sword: Fi's comment states that Cursed Spumes, a type of enemy, live in poisonous swamps. In-game, they're only found in the fiery crater of Eldin Volcano.
* The Legend of Zelda: Skyward Sword fits this mold well enough being the bullying rival to Link throughout the early game, mainly due to his own unrequited crush on Zelda and jealousy of how close Link is to her. He does get more likeable later on when he helps Link save Zelda from Ghirahim and Demise.
* The Legend of Zelda: Skyward Sword following Demise's ravaging of the surface world.
* The Legend of Zelda: Skyward Sword frequently analyzes situations in the form of percentages.
* The Legend of Zelda: Skyward Sword from is the origin of all demons in the Zelda series. This seems to be a common feature among demons, since Batreaux from the same game also seems to summon monsters with his presence. During nighttime in Skyloft, Keese and Chuchus appear and the Remlits turn feral. Once Batreaux becomes a human, the monsters stop appearing and the Remlits remain tame at night.
* The Legend of Zelda: Skyward Sword from the beginning (which, when upgraded one more time after the Imprisoned is defeated for the second time, becomes instantaneous); however, you take double damage and enemies don't drop any hearts randomly.
* The Legend of Zelda: Skyward Sword, Ghirahim gives a speech similar to this to his army before the final showdown with Link by telling them to die on Link's sword to slow him down so that Ghirahim can finish an important ceremony. The army knows that if they don't die on Link's sword, then they will die on Ghirahim's.
* The Legend of Zelda: Skyward Sword gives us the Sandship, which used to be a seafaring vessel until the seas dried out and filled with sand. At least, until you activate the Timeshift Stone on board, restoring both the ship and the ocean around it to their former glory.
* The Legend of Zelda: Skyward Sword Groose gets two of these near the start of the game.
* The Legend of Zelda: Skyward Sword has an impenetrable cloud cover that separates the residents of Skyloft from the surface. As far as the people of Skyloft are concerned, the "surface" is a mythical place, rumored to be filled with monsters.
* The Legend of Zelda: Skyward Sword has Batreaux, a friendly demon who wants nothing more than to be friends with people. He eventually gets turned into a human as part of a sidequest.
* The Legend of Zelda: Skyward Sword has elements of the stealth genre in the

Silent Realm segments, the true example of this trope is the visit to the Eldin Volcano during the Song Of The Hero quest, where upon entry the volcano explodes, Link is captured and all his items are taken from him. He has to slowly sneak around the newly instated enemy camp and retrieve his items and has to use the ones he gets back to help him get the other ones as if they were gadgets like in a true stealth-action game.
* The Legend of Zelda: Skyward Sword has Levias, a flying whale who is the guardian deity of the skies.
* The Legend of Zelda: Skyward Sword has the Goron archeologist Gorko speaking of ancient legends of a sky-bound people who live on an island with streets of gold and water that grants youth. Obviously, being a resident, Link knows it's pretty mundane other than the floating land.
* The Legend of Zelda: Skyward Sword has the Sentrobes, which are flying security cameras with a short-range projectile launcher and the ability to launch self-propelled bombs with a timed fuse.
* The Legend of Zelda: Skyward Sword. He also gets behind Link, invading his personal space again, and whispers in his ear. He tells Link to come to him after licking his lips and says they're bound by that red thread of fate, that they're destined to fight. He also says that the thread of fate will be soaked crimson with Link's blood.
* The Legend of Zelda: Skyward Sword, he'll fall to the ground and struggle to breathe for a few seconds before going limp.
* The Legend of Zelda: Skyward Sword. Hence, he causes the events of every game for the rest of the series.
* The Legend of Zelda: Skyward Sword. However, in this game, instead of dive-bombing you to attack they... take craps on your head. Huh.
* The Legend of Zelda: Skyward Sword, however, reveals that the westernmost desert used to be an ocean.
* The Legend of Zelda: Skyward Sword included a special 25th Anniversary CD with orchestral arrangements of the music from the series.
* The Legend of Zelda: Skyward Sword in the Lanayru Shipyard later in the game.
* The Legend of Zelda: Skyward Sword in the Zelda series originates from.
* The Legend of Zelda: Skyward Sword introduced the Mogmas, a race of tunnel dwellers who are mostly seen plotting to steal ancient treasure from the local temples. Despite being thieves they always repay debts, and their kindness and inclination to help Link save Zelda make them very lovable.
* The Legend of Zelda: Skyward Sword introduces Loftwings, large birds almost the entire culture of Skyloft is built around.
* The Legend of Zelda: Skyward Sword is celebrating its 25th anniversary. The game was released to coincide with the 25th anniversary of the Zelda series.
* The Legend of Zelda: Skyward Sword is hell. It's full of zombies, bones, poisoned water, it's like the underworld in every way. Link even CLIMBS OUT OF THIS AREA BY A ROPE at one point, which has been used a few times to show people escaping hell.
* The Legend of Zelda: Skyward Sword is, in his humanoid form, by far the largest non-monster type enemy in the game and possibly the entire series.
* The Legend of Zelda: Skyward Sword is like this when Link isn't being chased by the Guardians.
* The Legend of Zelda: Skyward Sword is "special" because it's red, the implication being that it's faster than the others. Pipit, during the prologue, won the Wing Ceremony last year, but thanks his lucky stars Link's "red terror" wasn't involved.
* The Legend of Zelda: Skyward Sword is spent laughing at Cawlin's misfortune.
* The Legend of Zelda: Skyward Sword, it's implied that Link has a habit of spacing out in (or downright skipping) lessons in the Knight Academy, only to breeze through them anyways.
* The Legend of Zelda: Skyward Sword, Ledd and Cobal, sit outside the Earth Temple, brainstorming ways to get inside to loot the place like they're in a cat burglar movie. The following exchange occurs:
* The Legend of Zelda: Skyward Sword, Link can climb over low barriers, including the waist-height fences in Skyloft. Running over one of these sends you plummeting

to your doom, and a convenient passing knight has to save you. Link has his own rideable bird, but the game doesn't let you call it unless you jump off in one of a few special spots (which are not fenced). So even though he can, technically, jump over the fence, it might as well be an infinitely high wall that scolds you when you run into it.
* The Legend of Zelda: Skyward Sword, Link is knocked out by a volcanic blast as he tries to land in the Eldin Volcanic region. He wakes up with no items and only three filled hearts, in a jail cell.
* The Legend of Zelda: Skyward Sword, Link must revisit each of the previous areas in order to collect the parts of the Song of Heroes. These can be done in any order, but no matter when you choose to do Eldin Volcano you always arrive just as it erupts.
* The Legend of Zelda: Skyward Sword located during one of the last segments of the game. Nintendo later released a free downloadable patch to fix it.
* The Legend of Zelda: Skyward Sword, look close at the blackboard in the classroom — there's one of those Japanese umbrella diagrams. While the names are considerably lo-res, and thus almost unreadable, but if you get close to it a dialogue box will pop up with the text "Karane + Caw...".
* The Legend of Zelda: Skyward Sword. Not only does it allow you to retrieve small items and press unreachable switches, an upgrade also allows it to carry larger objects (pots, bombs, etc.), and subsequent upgrades provide it a longer range and the ability to accelerate.
* The Legend of Zelda: Skyward Sword, one level requires visiting three mini-dungeons to find the next main one. The final room of the second initially looks like an empty room with some sand, but after some dusting Moldarach (the final boss of the Lanayru Mining Facility) inexplicably shows up for a rematch.
* The Legend of Zelda: Skyward Sword, Peatrice (the storage girl) has a boring job, which makes her seem rather uncaring about anybody who comes around, but as Link continues to visit her, she starts to like him more and more. Eventually, she begins to fall in love with Link.
* The Legend of Zelda: Skyward Sword persona while expressing his anger over Zelda being snatched from his grasp.
* The Legend of Zelda: Skyward Sword qualifies — the civilization apparently consists of less than a thousand people, all of whom live on a few dozen floating islands in the sky. The land below is a complete mystery, believed to be overrun with hideous monsters, but an impenetrable cloud cover prevents anyone from even descending to it.
* The Legend of Zelda: Skyward Sword quickly loses track of what he was doing or saying when Zelda is talking to him.
* The Legend of Zelda: Skyward Sword region had built large industrial complexes that produced mining facilities, advanced ships, "Time Stones" capable of locally shifting time, and intelligent autonomous robots maintaining them all. But their unchecked expansion led to the desertification of what was once a region of lush fields and seas and the collapse of their civilization. By the time Link arrives there, he must use the Time Stones in order to shift time back to when things were still functional, and even then he must rely on the robots to work some of the more complex devices.
* The Legend of Zelda: Skyward Sword right in order to actually hit it.
* The Legend of Zelda: Skyward Sword satisfying using Koloktos's own weapon to tear it to pieces, and its part of the reason why the boss is so memorable.
* The Legend of Zelda: Skyward Sword's Boss Keys are 3-dimensional golden sculptures that have to be turned the right way before inserting them. Their shape is also thematically related to the dungeon they are found in; the one in the Ancient Cistern resembles the dungeon's central Buddha-like statue, while the Sand Ship's resembles a squid.
* The Legend of Zelda: Skyward Sword teleports out of the way of projectile attacks.
* The Legend of Zelda: Skyward Sword: The developers said that the girl in the early promotional art wasn't the Master Sword, she was the Goddess Sword... which

becomes the Master Sword over the course of the game.
* The Legend of Zelda: Skyward Sword "The Legend of Groose: Skyward Hair".
* The Legend of Zelda: Skyward Sword they're collected together after completing the Lanayru Silent Realm challenge. It can now be used to latch onto vines, though it's important to keep an eye on Link's stamina. Due to its place of obtainment, it is implied that, like the Beetle and the Gust Bellows, it's an invention by the Ancient Robots.
* The Legend of Zelda: Skyward Sword. This is correct; a different, lightning-charged projectile attack that can be performed in that environment, though activated and utilized in much the same manner, is distinct from a Skyward Strike.
* The Legend of Zelda: Skyward Sword. To a lesser extent, there is also a religious allegory in the process to enter that dungeon (Link must cure Faron by delivering sacred water to her).
* The Legend of Zelda: Skyward Sword to get needed items. There's also the entire region of Lanayru, the location of the Temple of Time. There are minerals here that can create time portals to the past when Link strikes them. They usually only affect the immediate area, but Skipper's Sandship carries the most powerful one, able to stretch its effects at least as far as the horizon, effectively giving the place a true present-mode and a past-mode.
* The Legend of Zelda: Skyward Sword, to the point where admitting you like it in some circles will get you attacked.
* The Legend of Zelda: Skyward Sword uses Skyloft and Sealed Grounds for Fi and Ghirahim respectively.
* The Legend of Zelda: Skyward Sword when he lands in lava. In the latter game, you can inflict this on your enemies with the Fire Rod.
* The Legend of Zelda: Skyward Sword, where leaping to your doom and whistling for a nearby bird to rescue you is just how people get around.
* The Legend of Zelda: Skyward Sword, where Link's Loftwing learns a new method of acceleration that is far more accurate than your previous attack/acceleration. How does it do it? By rapidly barrel rolling.
* The Legend of Zelda: Skyward Sword, who will swoop in out of nowhere to catch him without fail.
* The Legend of Zelda: Skyward Sword with the Triforce to keep both safe and out of reach of the war.
* The Legend of Zelda's Link served as Princess Zelda's personal knight.
* The Legend of Zelda so present in the series is to show the Links of different games playing together as an orchestra.
* The Legend of Zelda) speaks in a modern dialect, though somewhat formally, but that could be explained as him knowing it to converse with Link more easily.
* The Legend of Zelda. Specifically, they're used to deliver the killing blow once he was stunned by Link's sword in both games. Later games would replace them with the Light Arrows.
* The Legend of Zelda: Spirit Tracks, after defeating Byrne in battle, Link and Zelda take a moment to sentimentally smile at each other in an affirmation of their friendship, while a heartwarming version of "Zelda's Lullaby" swells. And then it deflates as we see that Byrne is getting away, while Link and Zelda continue to stand there and smile like morons.
* The Legend of Zelda: Spirit Tracks and Zeldas wasn't already enough.
* The Legend of Zelda: Spirit Tracks are not only rails for the royal trains, they also act as the Ley Lines that channel the energy of the Spirits and keep Malladus imprissoned within the Tower of Spirits.
* The Legend of Zelda: Spirit Tracks attack if you constantly hit him with your sword (this is actually the point of the battle, to get Malladus to face away from Zelda so she can shoot him in the back). The short "short" sequence before this is also nearly impossible to fail, as Zelda, whom you must defend from Malladus' flaming boulders while she charges her magic, will never die if she gets hit, but simply lose focus. You lose health if Zelda is hit, but the flaming boulders tend to drop recovery hearts.
* The Legend of Zelda: Spirit Tracks called Malgyorg who swim in the desert of Sand

Realm.
* The Legend of Zelda: Spirit Tracks: Disorientation Station consists of several looping identical rooms that are randomly distributed.
* The Legend of Zelda: Spirit Tracks Don't even think about whacking it with a sword.
* The Legend of Zelda: Spirit Tracks during their friendship hi-five with a double-take.
* The Legend of Zelda: Spirit Tracks factor was pretty high up in that game.
* The Legend of Zelda: Spirit Tracks features a train-top battle as part of the final boss fight.
* The Legend of Zelda: Spirit Tracks had the boss Skeldrich, which was basically a giant humanoid skull with an absurdly long neck.
* The Legend of Zelda: Spirit Tracks has taken great glee in mocking just about every Zelda tradition it can. It has to be played to be believed.
* The Legend of Zelda: Spirit Tracks. He can use it for hand-to-hand combat or launch it like a grappling hook.
* The Legend of Zelda: Spirit Tracks is remembered fondly as the founder of New Hyrule, with a stained glass portrait of her overlooking Hyrule Castle's throne room.
* The Legend of Zelda: Spirit Tracks Link must climb up the Tower of Spirits. While it is very similar in function to the predecessor's central dungeon, you can now skip all previously finished sections and never return.
* The Legend of Zelda: Spirit Tracks of the game would suffice by itself, but it goes further. The last shot of the game is Link and Zelda holding hands in a very romantic tone. Also, in two of the three epilogues of the game we see that they still are together in some way.
* The Legend of Zelda: Spirit Tracks, one of the early missions is to help Zelda escape her own castle and bodyguards.
* The Legend of Zelda: Spirit Tracks: Princess Zelda herself becomes a ghost after the villain steals her body, and can aid Link by possessing Phantoms, enemies resembling living suits of armor.
* The Legend of Zelda: Spirit Tracks's Chancellor Cole. Like Ghirahim, everything he does is in the name of resurrecting his master, but he has a much greater presence in the plot compared to Malladus himself.
* The Legend of Zelda: Spirit Tracks: Stagnox is a gigantic stag beetle that charges at Link during battle, though its abdomen can be hurt. In the first phase, it's necessary to remove the surrounding poison from the abdomen; in the second phase, stunning it requires hitting the head with an explosive instead.
* The Legend of Zelda: Spirit Tracks, the bad guys remove Zelda's soul from her body; most people can't see her soul and her body is lifeless. The plan is to then house a monster's spirit in her body and thus control Hyrule.
* The Legend of Zelda: Spirit Tracks, there are five types of rabbit you can collect, matching the environment in which they're found, including one that lives in the sea.
* The Legend of Zelda: Spirit Tracks. There's a grand total of one time in the game where they can be hunted down and killed, and that's just before the final boss.
* The Legend of Zelda: Spirit Tracks: The Sand Realm has quicksand pits in the Sand Temple and parts of the nearby Tower of Spirits. The Sand Wand can create sand bridges by solidifying part of the quicksand's terrain so Link (as well as Phantom Zelda in the Tower of Spirits) can walk over them safely.
* The Legend of Zelda: Spirit Tracks. This is why stage 2 of the final battle has Link having to take down the ghost mice used to attack Zelda by Chancellor Cole.
* The Legend of Zelda: Spirit Tracks was modest enough to limit himself to just Hyrule...
* The Legend of Zelda: Spirit Tracks when Anjean reveals that a demon will take over her body. She freaks out so badly that, at one point, the player has no control over the text boxes. It's played for laughs, and she snaps out of it rather quickly when Anjean tells her that she needs to accompany Link, as several traps in the Tower of Spirits require teamwork.

* The Legend of Zelda: Spirit Tracks you get the boss Fraaz, whose attack involves inflating himself with fire or icy air, and he shows off his ability within seconds of you meeting him for the first time.
* The Legend of Zelda: Spirit Tracks. Your whip seems to instantly curl around objects like you would expect of an action hero's, but really it has a snake head on the leading end that bites onto things instead.
* The Legend of Zelda: Spirit Tracks, Zelda can quickly surf from one Phantom to another one whenever Link hits one in the back. This turns into a true Body Surf-Orgy in the last segment of the Tower of Spirits.
* The Legend of Zelda: Spirit Tracks Zelda. Don't mess with her in her phantom armor...or when she has a bow in her hands.
* The Legend of Zelda surrounding those scenes, has resulted in him becoming universally identified with them.
* The Legend of Zelda's Wallmasters show the shadow of their hand before they strike from above and take you back to the dungeon's start.
* The Legend of Zelda takes this to a whole new level, where one boss IS the floor of the room you just walked in.
* The Legend of Zelda teleportation. However, she also defends the Royal Family of Hyrule by wielding swords like katanas in close-quarters combat, which more closely resembles a samurai.
* The Legend of Zelda that speaks in his stead during cutscenes, asking questions and so on.
* The Legend of Zelda: The Abridged Series. Also, this trope applies to anyone stupid enough to trust Link. Especially Navi.
* The Legend of Zelda: The Abridged Series, even showing a clip where he climbs up a higher wall.
* The Legend of Zelda: The Abridged Series: Sheik refuses to help Link in any of the temples because that would risk them breaking a nail.
* The Legend of Zelda: the bestiary guy who pays you for killing different types of enemies throughout the game!
* The Legend of Zelda. The current Zelda and the recently-revived Sleeping Zelda both fight over Link at the end. They're distant relatives as the latter had been comatose for centuries, and the current Zelda is presumably a descendant of her brother.
* The Legend of Zelda the fairy that brought Link to the temple. When Cia asks why she didn't say anything, Ciela responds that she was the one who made the offer (Ciela is a big fan of Cia's sweets).
* The Legend of Zelda: The Gorons primarily move by rolling. While they can walk, their stubby legs and extremely top heavy stature make them so slow they can be outrun by a small human child. However, in ball form they can roll fast enough to match a half-grown young horse.
* The Legend of Zelda; their tendency to jump around before rejoining the body is what adds a little challenge).
* The Legend of Zelda: The Light of Courage, Link fires a sword blast at Ganon, burning his robe off. The best part is that nobody cares.
* The Legend of Zelda: The Light of Courage of every other character stand out even more than they already do.
* The Legend of Zelda, the main couple decide to go to a monastery that performs "pagan bonding rituals" for married couples. The four-part ritual is broken down into the physical bonding, the mental bonding, the spiritual bonding and the sexual bonding. Guess what Link and Jenna need to do for the last one.
* The Legend of Zelda, the majority of the female heroes of the Hyrulean Forces are sensibly dressed. The sole exceptions are Midna and Ruto, who are technically naked but get a pass since both lack certain human attributes and the latter's Ocarina of Time 3DS design makes her look like she's wearing a dress of sorts, and potentially Lana's Bare Your Midriff outfit depending on one's values. On the dark forces' side, though, Cia is dressed in a very Stripperiffic outfit.
* The Legend of Zelda: The Minish Cap after just a few seconds and running to the next one, requiring Link to run after her.

* The Legend of Zelda: The Minish Cap, all of which had the usual nine dungeons plus, depending on which game being played, up to four mini-dungeons.
* The Legend of Zelda: The Minish Cap and live alongside the humans, unnoticed. It's really the same thing gameplay-wise: Link can only shrink at certain places, changing things at normal size open up paths when shrunk and vice versa, and certain enemies are only encountered while shrunk. The game takes that last part a step further: you can encounter normal Zelda enemies in the Minish realm, but while they die in one or two hits at normal size, they become massive bosses once you're an inch tall.
* The Legend of Zelda: The Minish Cap, an offshoot of the Picori who loved humans so much that they eventually chose to move in with them, helping with tasks like baking bread and making shoes, but always doing so in secret.
* The Legend of Zelda: The Minish Cap, Biggoron will upgrade your defensive item to the Mirror Shield for you if you go and do something "impressive". What do you have to do to impress him? Beat the game, by which point the Mirror Shield becomes irrelevant.
* The Legend of Zelda: The Minish Cap consists of a quicksand-like marsh with safe zones in the form of raised land. Traversing it safely requires getting ahold of the Pegasus Shoes, which let you dash across before the muck can take hold.
* The Legend of Zelda: The Minish Cap. However, this opens up a couple plot holes. First, Link's talking hat Ezlo admits that he's not very familiar with the village's dialect and thus doesn't understand most of what they say, but after Link eats the Jabber Nut, Ezlo understands everything perfectly as well, despite the game never hinting that Ezlo ate any of it. Second, Link can only understand animals while he's small; when he's full-sized, it all sounds like regular animal noises. The game never bothers to explain either issue.
* The Legend of Zelda: The Minish Cap, Link has to eat a Jabber Nut in order to understand the language of the Minish People.
* The Legend of Zelda: The Minish Cap) Octorok) is frozen when you first enter, but your efforts to thaw out the Water Element thaw it as well, and it apparently feels well enough to snatch the Water Element and fight you right away.
* The Legend of Zelda: The Minish Cap remembers earlier information about there being monsters inside, and says he'll wait for Link at the entrance. The very next snippet has Ezlo retracting that and saying he won't let Link leave him all alone.
* The Legend of Zelda: The Minish Cap's launch. This also allowed a few bugs from the European release to be fixed.
* The Legend of Zelda: The Minish Cap states that Tingle was the perpetrator of the above, so it's not really clear.
* The Legend of Zelda: The Minish Cap: The Gust Jar is your go-to for defeating any ghost-like enemies, like ghinies and that one wraith thing possessing the old man from the Wind Tribe.
* The Legend of Zelda: The Minish Cap: There's a palace in the sky, which is a (very large) mansion floating in midair.
* The Legend of Zelda: The Minish Cap, while the player is tiny, they have to watch out for the cats that will take a swipe at them.
* The Legend of Zelda: The Minish Cap, with a twist: The books don't trigger anything, but you need to return them to their proper place, so you can climb on them later, when shrunken down, in order to reach a Minish-sage who lives on one of the shelves.
* The Legend of Zelda: The Minish Cap would do this to Link and force him to run around at top speed.
* The Legend of Zelda. Therefore, they say, there really is no single timeline — instead, each game is a kind of remake of the previous ones.
* The Legend of Zelda there is nothing to suggest anything between them besides Link saving Zelda, plus they're both in their "young" forms rather than their teenage versions.
* The Legend of Zelda: There's a very marked tendency for the leaders of groups, nations or species to be a lot bigger than their followers.
* The Legend of Zelda, the Stalfos wander around in dungeons. They get upgraded to

firing sword beams in the second quest.
* The Legend of Zelda). The titular Zelda however is always a relative of the Zelda preceding her in the timeline.
* The Legend of Zelda: The Wind Waker allows the player to throw Medli into walls at times, resulting in her being dazed and only able to speak in gibberish for a few seconds.
* The Legend of Zelda: The Wind Waker Also, many players have noted that, aside from Link and Aryll, most of the children in the game behave like small adults, especially (aside from Tetra) Medli.
* The Legend of Zelda: The Wind Waker). Also very uncharacteristic of Nintendo is the sheer amount of unused content left on the disc, probably due to not having enough time to wipe it before sending it in for production; notably, there are more unused rooms than there are islands on the entire Great Sea.
* The Legend of Zelda: The Wind Waker - and she'll utter complete gibberish, like the following:
* The Legend of Zelda: The Wind Waker and the Triforce Chart quest. The HD remake makes said short length more noticeable by adding a special sail to speed up sailing and cutting down the Triforce quest. Defenders argue that the game still provides plenty of side quests and mini-dungeons to extend the actual gameplay, including several optional islands.
* The Legend of Zelda: The Wind Waker and your main form of transportation through the Great Sea.
* The Legend of Zelda: The Wind Waker a new graphical effect added to the game is that enemies' eyes have a noticeable glow to them.
* The Legend of Zelda: The Wind Waker, as well as the controllable statues from the same dungeon.
* The Legend of Zelda: The Wind Waker begins when Link's sister is carried off by the massive plumed vulture, Helmaroc King.
* The Legend of Zelda: The Wind Waker, both made Link look rather young because of his chibi model.
* The Legend of Zelda: The Wind Waker can have this happen to Stalfos enemies, with their top half and head trying to run away from Link and their feet trying to attack him. They can also, semi obviously literally be blasted to millions of pieces with just a head bouncing around.
* The Legend of Zelda: The Wind Waker chosen by destiny and he has to prove to the gods that he is worthy of wielding the Master Sword AND the Triforce of Courage.
* The Legend of Zelda: The Wind Waker draws its explosions something like this, although the aftereffect of stylized curly smoke is more prominent.
* The Legend of Zelda: The Wind Waker), eventually The King of Red Lions will tell you to look around the room for something else to target.
* The Legend of Zelda: The Wind Waker, everyone believes Ganondorf has returned to destroy the world. It turns out that he originally wanted to take over the lush Hyrule to free his people from the harsh desert. It's quite sad, really.
* The Legend of Zelda: The Wind Waker, expect to hear a lot of yelps and shouts of distress as Link tries to keep his balance while moving across ice, especially when he's turning. And if you try going the exact opposite direction you're moving too quickly, he can fall on his face.
* The Legend of Zelda: The Wind Waker). Furthermore, you can take a picture of a character or enemy and take it to Carlov, he can make a figurine of it. If this were a normal photograph, he may or may not have to guess what a character looks like from the other angles, but apparently, he gets it right, so...
* The Legend of Zelda: The Wind Waker had a somewhat rushed production that required the team to cut several dungeons they planned to include. This influenced the whole Nayru's Pearl arc of the game; turns out that Greatfish Isle, where the Pearl and the dungeon containing it would have been located, has been torn apart by Ganondorf by the time you reach it, and locating the Pearl requires you to instead explore the previously-visited Windfall and Outset Islands.
* The Legend of Zelda: The Wind Waker has a few of these, which you have to get past with the "sidle" command. You're fine as long as you don't let up the 'A'

button.
* The Legend of Zelda: The Wind Waker has a non-malicious example with Gohdan, an ancient machine created by the gods to challenge the new hero before their access to the biggest secret of the Great Sea.
* The Legend of Zelda: The Wind Waker has his legs obscured most of the time because he's wearing a kimono, but the waist is low enough to make it clear his legs are small.
* The Legend of Zelda: The Wind Waker has very impressive cloth simulation (for 2003) for clothing and hair and manages to avoid this trope for the most part. Sometimes, however, some flaws with the physics engine crop up, including a small flaw with how long, thin strings are handled. The trope is played straight with Medli, who has a long ponytail that is seemingly not affected by the wind, even though her hair moves when she is walking or running.
* The Legend of Zelda: The Wind Waker have been passed down for generations to the point where they're now considered a myth. Despite this, the people of Outset Island have a custom where boys are garbed in green when they come of age (twelve), in the hopes they'll find courage like the Hero of Time. There's also a statue of said Hero of Time in Hyrule Castle, as well as stained glass portraits of the Seven Sages.
* The Legend of Zelda: The Wind Waker, however, the Rito are depicted as full-on anthropomorphic birds; anthropomorphic birds with noticeable busts, in the case of the women.
* The Legend of Zelda: The Wind Waker. If you come at them, they will jump back and out of range. Out of all the enemies you face short of bosses, darknuts are clearly the most heavily armed and armored as well as the most skilled.
* The Legend of Zelda: The Wind Waker: In a subquest in Windfall Island, you can photograph two people who have this problem. (They share a look.) The quest-giver will then use this photograph to help them along.
* The Legend of Zelda: The Wind Waker. In a variant, though, there's he's not gloating. He's just — nostalgic? bitter? remorseful? detached? Take your pick.
* The Legend of Zelda: The Wind Waker in it for reasons not too well explained.
* The Legend of Zelda: The Wind Waker, in particular, uses a very famous "fire" stock sound found in movies, TV shows, and other video games.
* The Legend of Zelda: The Wind Waker instantly made them more popular. In particular, a minor Rito NPC named Kass grew quite popular thanks to his rather large build compared to a normal Rito and is usually happy to see Link in good spirits.
* The Legend of Zelda: The Wind Waker is a giant Korok eating plant that uses this with its vines to attack Link.
* The Legend of Zelda: The Wind Waker is a giant Poe made up of twenty smaller Poes and a mask that seems to either control or coordinate them.
* The Legend of Zelda: The Wind Waker is a near-perfect example of one of these.
* The Legend of Zelda: The Wind Waker is so tall it can be seen from almost anywhere on the map.
* The Legend of Zelda: The Wind Waker it explodes, blasting Link right into the rising Tower Of The Gods.
* The Legend of Zelda: The Wind Waker: Lampshaded in the auction minigame. If you lose the auction, you may leave the room and re-enter it immediately, at which point the auction will begin afresh. The auctioneer's preamble will then begin: "Today's lot is... a treasure chart. Yes, this is exactly the same treasure chart we had last time, but for some reason, Anton, who won the auction, has decided to return it."
* The Legend of Zelda: The Wind Waker later than in other games, namely in the penultimate dungeon, so the Grappling Hook won't be superseded for a while (especially since it has other uses anyway, such as acting as a salvage crane to retrieve underwater treasure and being used to steal enemy items).
* The Legend of Zelda: The Wind Waker, Link can break some of these, but if he breaks too many, he has to pay 10 rupees each.

* The Legend of Zelda: The Wind Waker, Link's ice arrows will freeze enemies solid, but they break out a few seconds later unless the damage was enough to kill them...or unless you smash them with a hammer.
* The Legend of Zelda: The Wind Waker Link's sister is kidnapped on his birthday.
* The Legend of Zelda: The Wind Waker Link was about 4 feet tall, one of the smallest characters in the game. Ganon was almost thrice Link's height!
* The Legend of Zelda: The Wind Waker, Maggie takes Moe the moblin's letter, saying "I want to eat you for dinner", to be a marriage proposal.
* The Legend of Zelda: The Wind Waker mailman in order for Maggie to finally get a letter from the Moblin.
* The Legend of Zelda: The Wind Waker might have something to do with it.
* The Legend of Zelda: The Wind Waker New Game Plus features Link playing through the game in the blue outfit he starts the game in (at the point where you would get the green tunic, you get invisible clothes instead). Also, text that was previously in the "ancient" language is translated into English, revealing very interesting conversations (such as when the King of Red Lions boat is talking with Jabu, about Link, knowing he can't understand them). As a third bonus, Link starts the game with the Deluxe Picto Box, making the picture-taking sidequest easier to complete. Finally, the sunken treasure you can pinpoint after collecting and opening the Treasure Charts will be slightly further away from its original position, making their locations more difficult (this also applies to the Triforce Shards). Beware, though, as unlike most games, you can only replay this one once.
* The Legend of Zelda: The Wind Waker, one Pro-Action Replay cheat code enables the player to hold a button to levitate. This can be done indefinitely (unless you crash the game). When climbing Dragon Roost Mountain, the player will pass through several doors that actually load new maps at the top of the mountain. Thus, if the player levitates up to the top of Dragon Roost Mountain from the overworld map, they'll find that the top of the Mountain isn't actually animated at all from above, and it's just a hollow, glitchy tube that allows the player to see all the way through to the ocean.
* The Legend of Zelda: The Wind Waker on the appearance of far-away objects.
* The Legend of Zelda: The Wind Waker, Orca is an old man living on Outset Island who spent his life studying swordsmanship. He teaches swordsmanship to Link and gives him the Hero's Sword. He grades Link's ability until Link surpasses him.
* The Legend of Zelda: The Wind Waker's first form, and even then she doesn't participate in the second half of the fight.
* The Legend of Zelda: The Wind Waker simplified this quest so that only three of the Shards require Charts, the rest can be acquired directly.
* The Legend of Zelda: The Wind Waker), tailored for the DS's lower hardware capacity.
* The Legend of Zelda: The Wind Waker take place on Link's birthday. He's just received his gifts from Grandma and they're starting to celebrate when his beloved little sister gets abducted by a giant bird.
* The Legend of Zelda: The Wind Waker that those who speak ancient Hylian such as Valoo and Jabun are not only significantly different from modern Hylian speakers like Link but utterly incomprehensible. The few modern characters who do speak the ancient version of the language, such as Valoo's attendants, speak it in a form so broken they can manage only partial translations making ancient Hylian very near to extinction.
* The Legend of Zelda: The Wind Waker, the evil Darknuts are jackal-headed monsters under their armor. They come in a number of different varieties, but all fight with sword and shield until stripped of their armor. Then they switch to kicks and punches.
* The Legend of Zelda: The Wind Waker. The first time Link climbs the tower, the door slams and locks and he is captured and thrown into the sea. The next time he's more cautious and waits for the door to lock. He gives a relieved sigh when it doesn't. Then after a little cutscene, the boss shows up and the door magically locks and the fight/deathcourse starts!
* The Legend of Zelda: The Wind Waker: The Great Sea has no physical barrier to

keep you from leaving the map. However, your boat tells you that it's dangerous to leave and turns you around.
* The Legend of Zelda: The Wind Waker: The Koroks are periodically sent out by the Great Deku Tree to plant trees on the islands of the Great Sea, in an attempt to create forests and to reclaim land from the sea.
* The Legend of Zelda: The Wind Waker, the old man on Windfall Island who asks you to look for his daughter makes the sound and flashes the symbol every time you get in range for him to ask you again. Since he stands right outside the entrance to the main part of the island, you'll have to tap through his dialogue if he gets close enough to you. Fortunately, he stops doing it when his daughter is rescued.
* The Legend of Zelda: The Wind Waker, the pathway leading to Ganon's tower was blocked by an invisible wall of energy that could only be broken by the fully restored Master Sword.
* The Legend of Zelda: The Wind Waker, there are two brothers in a house on the first island. The strong brother on the ground floor sometimes knocks things over by ramming into the wall, the smart brother on the top floor responds by banging loudly on the floor/ceiling while yelling for him to stop that.
* The Legend of Zelda: The Wind Waker, there are two girls on Windfall Island who embody this trope. They "won't" tell you anything, not even for two Rupees!
* The Legend of Zelda: The Wind Waker, the rope bridge on Outset Island leading to the Fairy Woods is the one that Link's sister Aryll gets snatched off of by the Helmaroc King.
* The Legend of Zelda: The Wind Waker, The submerged Hyrule is frozen in time, with several Moblins and Darknuts frozen in the middle of an apparent siege on Hyrule Castle. When Link draws the Master Sword, time starts again... giving Link a hall full of monsters to try his new toy on.
* The Legend of Zelda: The Wind Waker: The wooden cage where Ganondorf keeps his kidnapped children has this problem. The relevant cutscenes make it pretty obvious that both Link and his captive sister could easily fit between the bars. This is far from the only thing keeping them there (it's in a properly-locked room at the top of a heavily-guarded evil fortress), and the cage itself may be intended to protect the prisoners from the giant bird guarding the area; but it's still pretty silly when Link ineffectually and unnecessarily tries to force the door open.
* The Legend of Zelda: The Wind Waker (They're so little that they're pleased to get even one rupee each.)
* The Legend of Zelda: The Wind Waker: This is especially weird because the entire overworld is the ocean, and yet it's little more than something to traverse. There's no diving and even simply trying to swim can cause you to run out of breath. The one underwater location magically acts as if it isn't completely submerged.
* The Legend of Zelda: The Wind Waker, this is played for laughs, when Link sets the third pearl into its slot, the statue starts to glow. Link runs for cover, but nothing happens. Confused, he goes back to the statue to check...only for it to blow up in his face, causing him to fly hundreds of yards away, flying right into the wall of the tower that is rising from the ocean.
* The Legend of Zelda: The Wind Waker titles would go on to use a similar art style.
* The Legend of Zelda: The Wind Waker, to the point that many questioned how much better a HD remake would actually make the former look.
* The Legend of Zelda: The Wind Waker type rather than the Fat Bastard type.
* The Legend of Zelda: The Wind Waker, when Link occasionally yells "C'mon!", but that's it.
* The Legend of Zelda: The Wind Waker which allows him to see how much health enemies have.
* The Legend of Zelda: The Wind Waker will try to eat Link if he stays inside too long while its weak point is exposed. After a few seconds, it spits Link out, only costing 1/4 heart of damage. Unless you're going for a no-damage run, this may actually be a more effective strategy to kill it since you get at least five more hits in that way.

* The Legend of Zelda: The Wind Waker, with Medli instead being slightly attracted to Prince Komali, the two girls on Windfall island either having different problems or already being in love, and Aryll being, well, his sister. Only the creepy fairy-queen is seen flirting with him and she's never seen again after that.
* The Legend of Zelda: The Wind Waker. Yet he never receives damage above one-and-a-half hearts per hit (Ganondorf only does one heart of damage). And this is despite the fact that Link is only a child.
* The Legend of Zelda: The Wind Waker. You also have to take out the searchlight operators in order to be able to move on.
* The Legend of Zelda: The Wind Waker, you can hide in a barrel in this fashion. The Moblin guard will not notice you even if you significantly shorten their patrol path by hiding in it, even as their noses clip through the barrel. (They will likely, however, notice if your barrel is assaulted and consequently broken by a Rat, but only because you'll be standing out in the open.)
* The Legend of Zelda: The Wind Waker, you have to follow a girl to watch what she does without her noticing you. If she hears you (if you run, for example) but you're out of her sight, Link will freeze and meow like a cat.
* The Legend of Zelda. They appear nearly identical to the Hylians, though presumably lack their connection to the goddess Hylia.
* The Legend of Zelda, they're featured at their largest, with Link looking like a doll when he's next to them.
* The Legend of Zelda: This is the way it is in almost every single game that features a swamp.
* The Legend of Zelda those previous events, and they turn out to be not very much like what legend remembers them as at all.
* The Legend of Zelda: Throughout the series, the plot has involved several technologically advanced civilizations in the distant past who either disappeared or lost their knowledge of their tech, leaving the advanced artifacts behind for Link and others to figure out and use:
* The Legend of Zelda to do so (Zelda tried using the Sheikah Slate to enter one Shrine, but it specifically needed to be Link using it).
* The Legend of Zelda: Tri Force Heroes, a cheerleader outfit, and a Queen of Hearts dress.
* The Legend Of Zelda Triforce Heroes for her. The rest of the kingdom is also grief-stricken. The heroes' task is to find a way to remove the awful onesie so that Styla can go back to wearing trendsetting outfits.
* The Legend of Zelda: Tri Force Heroes has a floating castle within World 8, the Sky Realm.
* The Legend of Zelda: Tri Force Heroes. It was a "gift" from The Lady, who despised Styla's fashion sense, and the Links must track her down to get her to remove the jumpsuit.
* The Legend of Zelda: Tri Force Heroes series. If you continue to hit it, the song will keep playing and gradually get faster the more you keep hitting it.
* The Legend of Zelda: Tri Force Heroes: The game features the Gripshot, where it can be used to grapple onto your own teammates to traverse ledges when nothing else is available to grapple onto.
* The Legend of Zelda: Tri Force Heroes, the immediately preceding game, but there's no in-universe explanation for this.
* The Legend of Zelda: Twilight Princess, adding further credence to the above.
* The Legend of Zelda: Twilight Princess: After defeating Beast Ganon, Midna teleports Link and Zelda away before transforming into some kind of demonic glowing octopus-thing again. We then cut to Link and Zelda in the field, watching explosions rocking the castle. Then Ganondorf shows up on horseback, holding the Fused Shadow that Midna had been using as a hat the whole game.... and disintegrates it. Cue the second phase of the boss battle.
* The Legend of Zelda: Twilight Princess against any unlucky mook. However, Link can't even hold his shield while preparing for it. The Ending Blow, which finished downed enemies, on the other hand is one of the most useful Hidden Skills, and the first one Link learns.

* The Legend of Zelda: Twilight Princess a group of cowardly castle guards run away from having to help someone across a certain very dangerous field (so Link has to do it) and the pint-sized, plump one at the end is the last to run away. Hilarity and annoyance ensue.
* The Legend of Zelda: Twilight Princess also had skeletal dogs called Stalhounds.
* The Legend of Zelda: Twilight Princess among his old Resistance buddies.
* The Legend of Zelda: Twilight Princess, and must be struck several times in order to kill him.
* The Legend of Zelda: Twilight Princess, and show up later. One subboss is even a baboon (acting under pest control).
* The Legend of Zelda: Twilight Princess appears all too painful and disorienting for poor Link. Like Majora's Mask, however, transforming after this first cutscene is instantaneous and, presumably, painless.
* The Legend of Zelda: Twilight Princess arena until you defeat all the creatures attacking you. Sometimes they make it impossible to actually defeat them all at once, requiring that you defeat the out-of-the-way one before taking on the remaining two.
* The Legend of Zelda: Twilight Princess, as the bodice of her distinctive gown is a rich purple color. This particular incarnation of Zelda is a bit older than some of the others, and is shown to have unusual powers.
* The Legend of Zelda: Twilight Princess, at one point he becomes a giant, and in order to defeat him, you must swing the iron ball and chain into his foot. As he hops around holding his foot in pain, he shrinks back down to regular size, which is when you attack him.
* The Legend of Zelda: Twilight Princess (Australian-Japanese co-production)
* The Legend of Zelda: Twilight Princess averts this trope. The world doesn't change much when it's under the Twilight Realm's influence, but all the NPCs and monsters do. The Twilight Realm itself does not mirror Hyrule at all, and acts instead as the penultimate dungeon.
* The Legend of Zelda: Twilight Princess: Besides Deku Babas and Baba Serpents, the enormous Twilit Parasite Diababa appears as the boss of the Forest Temple.
* The Legend of Zelda: Twilight Princess: Beth is one of the kids from Ordon Village and said to be 14. She nurses a crush on Link near the beginning of the game, but shifts her affections to Ralis after finding out he's the prince of the Zoras.
* The Legend of Zelda: Twilight Princess, both male and female Zoras are identical and flat-chested. The deceased Zora queen, on the other hand....
* The Legend of Zelda: Twilight Princess bring you your mail! Even if you pull off the glitch of making him fall into the abyss of Hyrule Field, he'll STILL bring you your mail.
* The Legend of Zelda: Twilight Princess carries a dagger in his book, although he's a noncombatant and leaves the fighting to his better-armed groupmates.
* The Legend of Zelda: Twilight Princess changes up the mythos a bit: the Triforce is notably backgrounded, and new Light Spirits are added; without the Light Spirits, the Twilight Realm takes over the world. And the Twilight Realm has its own — small suns that return Dark creatures to their original, more peaceful forms.
* The Legend of Zelda: Twilight Princess, Chuchus (a random blob of evil jelly) leave behind jelly when defeated which you can drink for various effects. Purple jelly randomly alters your health meter, more often than not by bringing you down in hearts.
* The Legend of Zelda: Twilight Princess. Combine this with the fact that Link is not exactly tall, and you get this.
* The Legend of Zelda: Twilight Princess does when you give her one of the golden bugs.
* The Legend of Zelda: Twilight Princess: Dr. Borville is elderly, bent and withered, with a face dominated by ridiculous poofed-out hair, gigantic wing-like ears, thick coke-bottle glasses, and a pronounced lower lip from whose corners two teeth visibly protrude.

* The Legend of Zelda: Twilight Princess: During the day, Hyrule Field has enemies that can be seen from a long way off. Come night, they're replaced by skeletal hellhounds who endlessly respawn near the player and attack in packs.
* The Legend of Zelda: Twilight Princess during the portion where you must navigate the Lost woods. The Skull Kid unleashes groups of actual man-sized marionettes on you which move in this way to attack you.
* The Legend of Zelda: Twilight Princess effective without being harmful to Link.
* The Legend of Zelda: Twilight Princess fangirls who will follow Link as if he were a rockstar no matter where in the city he goes.
* The Legend of Zelda: Twilight Princess features many examples of this. There are many rock walls that cannot be destroyed at all until you reach the area on the other side by other means; others can only be smashed by the Ball and Chain or a Goron.
* The Legend of Zelda: Twilight Princess features the ghost of the Zora Queen. It also features the very chilling ghosts of the guards of Hyrule castle, who silently and desperately point Link to the Princess.
* The Legend of Zelda: Twilight Princess fits this trope physically, with her black braided hair and almost paper-white skin (complete with under-eye dark circles). She's one of the good guys, however.
* The Legend of Zelda: Twilight Princess, Ganondorf does this. Set for execution at the hands (or sword rather), of the sages, he breaks free from his chains (AFTER he is already stabbed in the stomach) and in one swift move kills one of the sages. Of course, he had the Triforce of Power on his side, so he did have some help.
* The Legend of Zelda: Twilight Princess. Ganondorf seems to be inspired by this trope in the same game, since he has similar armor and a similar sword to the Darknuts, although he is first and foremost an evil king rather than a knight.
* The Legend of Zelda: Twilight Princess gas/mist that can be temporarily locally dispelled by waving a lantern about.
* The Legend of Zelda: Twilight Princess go through various stages until finally duking it out with Link in a straight one-on-one swordfight.
* The Legend of Zelda: Twilight Princess has a cutscene like this. A ball and chain statue comes to life and attacks Link from behind while the camera is in front of him.
* The Legend of Zelda: Twilight Princess has a more crystalline shape.
* The Legend of Zelda: Twilight Princess has a slightly more realistic version where the geyser holds up a bridge instead of Link himself. There are also several geysers in Death Mountain that hurt you if you're near them.
* The Legend of Zelda: Twilight Princess has a sumo minigame in which you have to push your Goron opponent out of bounds to win.
* The Legend of Zelda: Twilight Princess has a trio of fangirls who hang outside Purlo's tent. If he wins the STARS minigame, they squee whenever he talks to them.
* The Legend of Zelda: Twilight Princess has a white, glowing scar in the middle of his chest, left over from when the Sages tried and failed to execute him with a sword.
* The Legend of Zelda: Twilight Princess has you steering a big Kargaroc (basically a monstrous vulture) to pop fruit-shaped balloons for points.
* The Legend of Zelda: Twilight Princess" He then gracefully bows out, implying that he believes Link to be stronger than his former master.
* The Legend of Zelda: Twilight Princess, his breath will be suddenly cut off as the camera pans to his body collapsing to the ground and tragic music plays. Bonus points whenever he dies in wolf form, since Midna will appear over his body and sigh.
* The Legend of Zelda: Twilight Princess, however, he gains the ability to turn into a wolf whenever he needs to.
* The Legend of Zelda: Twilight Princess, including the same background music.
* The Legend of Zelda: Twilight Princess intended to give it to Link, before he set off to deliver the Ordon Sword and Shield to Hyrule Castle, to ensure his safe return. But King Bulbin and his army attacked the village and abducted her before she had the chance.

* The Legend of Zelda: Twilight Princess: In the final dungeon, Link is rescued by his allies from an arrow to the face and about four mooks, despite the fact that by now Link has destroyed entire hordes of enemies and has been hit by more arrows than a practice dummy.
* The Legend of Zelda: Twilight Princess in the timeline. So, does Telma have Gerudo in her blood or is she just a Gerudo-looking Hylian?
* The Legend of Zelda: Twilight Princess invoke this kind of feel. And they mostly show up when the Twilight Realm is growing or shrinking.
* The Legend of Zelda: Twilight Princess is distinguished from the others by a rose on her head.
* The Legend of Zelda: Twilight Princess is instead similar to a feudal Japanese village. A Native American motif also appears in the latter game, this time inspiring the Rito culture.
* The Legend of Zelda: Twilight Princess is located on the tip of its tongue, and can be hit with sword, arrows, bombs, arrows with bombs...
* The Legend of Zelda: Twilight Princess, is noted by her former tutor to have been an excellent student. She's also the chosen disciple of the Goddess of Wisdom, so it's only logical.
* The Legend of Zelda: Twilight Princess Link does seem a bit more built; accordingly, more of his strength is his own rather than from a magical artifact, and he gets to show off said strength a bit more than other Links. Justified in his being a farmhand prior to his adventure. Manual labor does a body good...
* The Legend of Zelda: Twilight Princess, Link has to threaten a certain character with one of these in order to get him to divulge some plot-important information. The description says that the total amount is 'astronomical'.
* The Legend of Zelda: Twilight Princess, Link must defeat a baboon mini-boss by targeting his oversized bright-red ass.
* The Legend of Zelda: Twilight Princess, Link must joust a King Bublin on The Eldin Bridge on horseback.
* The Legend of Zelda: Twilight Princess, losing in his Ganon form to Link and Midna, and watching Midna teleport Zelda and Link away, he just detonates Hyrule Castle. He has to be chased down on horseback and put down for good afterward.
* The Legend of Zelda: Twilight Princess loves bugs. She just LOVES THEM SO MUCH.
* The Legend of Zelda: Twilight Princess, making her the "elegant evening dress" version of this trope.
* The Legend of Zelda: Twilight Princess, once you head to the Forest Temple in human form with Midna, you have to go through a mass of purple fog following a monkey with your lantern. The fog doesn't affect your enemies, sadly, making it very annoying when you're running along and the monkey suddenly stops in terror and you careen into purple death. The penultimate dungeon also has black, ashy mist that traps you in wolf form as long as you stand in it.
* The Legend of Zelda: Twilight Princess. Outside of the Twilight, he's feared as a monster. Inside of it, he's invisible so he gets no credit for his heroic actions. Thankfully, Link also has a human form in which he can be viewed heroically.
* The Legend of Zelda: Twilight Princess over the course of the battle against him.
* The Legend of Zelda: Twilight Princess play while it's roaming, and your objective is to take the Sol to its outer slot in the Palace's entrance. Once you do this process with both Sols, you'll be able to progress to the dungeon's second half and won't have to worry about the hands anymore.
* The Legend of Zelda: Twilight Princess puts you right into a Spaghetti Western (or a light-gun FPS, depending how you play it).
* The Legend of Zelda: Twilight Princess refines it to be a more supernatural power specific to the Sacred Beast (hence the third-eye pattern on his facial fur).
* The Legend of Zelda: Twilight Princess, Rusl's wife Uli in Ordon Village is very visibly pregnant with her second child. The game's ending montage shows that she has given birth.
* The Legend of Zelda: Twilight Princess, Rusl, the Ordon swordsman and Colin's father, is this to Link. It's stated that he was responsible for teaching Link everything he knows and can be viewed as either a sample of this trope or a

straight father figure. Their relationship is more depicted as this in the manga adaption.
* The Legend of Zelda: Twilight Princess's attempts to move away from aspects of the formula.
* The Legend of Zelda: Twilight Princess's fishing hole. Cherry blossoms filling the trees lets you know that the current season is spring, which affects the likelihood of finding certain fish.
* The Legend of Zelda: Twilight Princess: Shadow Beasts always attack in groups of 3 or more, and when only one is left standing it will let out a howl that revives the others. To defeat them you must use area attacks to take down the last two at once.
* The Legend of Zelda: Twilight Princess shows this happening to Rusl and Uli. Granted they were married with a child for the course of the game and Uli's pregnancy is both visually noticeable and plot-related, the fact that they show the baby at the end makes it count.
* The Legend of Zelda: Twilight Princess sizes down its Moldorms to a more reasonable size and populates the Gerudo Desert and the quicksand pits in the Arbiter's Ground with them. They leap out of the sand like fishes to attack Link, and must be pulled out with the Clawshot to be defeated.
* The Legend of Zelda: Twilight Princess's Ooccoo is infamous for looking like it has 4 pairs of exposed saggy breasts because of some extremely badly placed markings combined with suggestive feather shapes.
* The Legend of Zelda: Twilight Princess's representative invades Hyrule and slaughters anybody who gets in his way en route to Princess Zelda. When he finally reaches her, he gives her an ultimatum she can't possibly fight — surrender the kingdom or watch your people be massacred. She's already seen that her people can't stand up to the power he's brought with him, and drops her rapier in a gesture of submission.
* The Legend of Zelda: Twilight Princess starts out as a version of this, but has a gradual change of heart.
* The Legend of Zelda: Twilight Princesssurpassed it more than a decade later.
* The Legend of Zelda: Twilight Princess survives his attempted execution.
* The Legend of Zelda: Twilight Princess. Talo needs to be yanked away from the window.
* The Legend of Zelda: Twilight Princess tells us, the goddesses may have made the Oocca first, then the Oocca made the Hylians before retreating to the City in the Sky. This is a slightly inaccurate interpretation in the English version: The Japanese text states they helped the Hylians create a society, rather than literally creating them.
* The Legend of Zelda: Twilight Princess that can be used whenever an enemy has been knocked over. If you press A before the enemy gets back up, Link does an over-head jump strike, stabbing the monster through the chest or stomach. Later he also gains an attack called "Mortal Draw", which lets you perform an instant-kill on most humanoid enemies as long as you keep your sword sheathed and the enemy is close enough (putting you at risk of getting hit).
* The Legend of Zelda: Twilight Princess: The Arbiter's Grounds has quicksand, including the instant-death type, as a frequent and dangerous obstacle. While some areas can be crossed while sinking slowly, wearing the metal boots is instant death.
* The Legend of Zelda: Twilight Princess: The light stolen to the guardian spirits has to be retrieved by killing electric, luminiscent Shadow Bugs. Their queen is the Twilit Bloat, found in Lake Hylia.
* The Legend of Zelda: Twilight Princess. The more "realistic" art style may have had something to do with it.
* The Legend of Zelda: Twilight Princess: The Resistance Group investigating the temples together (and aiding Link by storming Hyrule Castle with him).
* The Legend of Zelda: Twilight Princess, the Twili are a peaceful race who are content with life in the Twilight Realm. With the exception of Zant, who felt like an insect trapped in a cage, and wanted freedom for him and his people.

* The Legend of Zelda: Twilight Princess. They even help him break into the castle toward the end.
* The Legend of Zelda: Twilight Princess, this appears the first time Zant speaks, but not after.
* The Legend of Zelda: Twilight Princess: This trope is optionally self-inflicted. There is a section at the Snowpeak Ruins dungeon that contains cannons. If you load one with a cannonball and one of your bombs and position Link in front of the blast, he will die instantly, regardless oh how many hearts you have at the time.
* The Legend of Zelda: Twilight Princess. Though everyone in the game (presumably) speaks and reads the current dialect of the Hylian language, Shad is apparently the only person in the kingdom who reads and understands Sky Writing, the written language of the ancient race called the Oocca, and is therefore the only NPC who can help Link with that necessary portion of his quest.
* The Legend of Zelda: Twilight Princess, though Miyamoto had suggested during development that he would be even older.
* The Legend of Zelda: Twilight Princess, though you're also given the option of shooting an arrow into their mouth.
* The Legend of Zelda: Twilight Princess. Though Zant was smart enough to take the Fused Shadows from Midna and Link, he merely curses Link to stay as a wolf permanently rather than killing him outright. When he meets them again at Arbiter's Grounds and sees that Link is still alive, he shatters the Mirror of Twilight and scatters its pieces across Hyrule. But he doesn't actively stop them from reclaiming them, however. Before that, he animates Stallord to kill Link, and then promptly leaves without even bothering to make sure that Stallord actually beat him.
* The Legend of Zelda: Twilight Princess time she displays shapeshifting powers.
* The Legend of Zelda: Twilight Princess. To get past him without getting smashed to bits, Link has to hookshot the ceiling behind the lizard and drop down behind to attack hi unarmored tail.
* The Legend of Zelda: Twilight Princess used motion captured animations in the Zelda series for the first time since 1998. The motion capture is especially evident in cutscenes.
* The Legend of Zelda: Twilight Princess uses the Temple of Twilight for Midna and Zant, while Twilight Field can count for Agitha's.
* The Legend of Zelda: Twilight Princess uses this as the way of defeating an early miniboss: he throws a boomerang from atop a set of columns, and if you roll into the column he's on after he's thrown the boomerang, destabilizing him, it'll knock him down when it returns.
* The Legend of Zelda: Twilight Princess was based on the GameCube version, with the Hero Mode being inspired by the Wii version.
* The Legend of Zelda: Twilight Princess, when reaching the Temple of Time, you gain the Dominion Rod and thereby gain control of a monolithic, mobile, hammer-wielding statue, which you have to return to the first room. The hammer-wielding statue can break past all of the fiddly little gates and things that you had to work your way past on the way up. And kill all enemies in one hit. You do not know what fun is until you see an entire puzzle-room destroyed 'neath the mighty tread of the Hammer Golem!
* The Legend of Zelda: Twilight Princess when she helps Link in the game's final battle.
* The Legend of Zelda: Twilight Princess when the fuse on your bomb runs out, Link will die instantly. Unless he's wearing the Magic Armor, in which case he'll lose all his Rupees.
* The Legend of Zelda: Twilight Princess, when the Gorons seem to hate the Hylians, but actually the Gorons were just ashamed for having problems with an evil curse on their leader, which is why they kept the Hylians away from their territory.
* The Legend of Zelda: Twilight Princess when you've exposed an enemy's vulnerabilities.
* The Legend of Zelda: Twilight Princess where players enjoy watching before killing him with satisfaction.

* The Legend of Zelda: Twilight Princess, where they evolved into the Twili.
* The Legend of Zelda: Twilight Princess while he is transformed into a wolf. Link himself rides a horse (or a ginormous boar on occasion).
* The Legend of Zelda: Twilight Princess, while invisible to humans, look like creepy stitched-up rag dolls wielding scythes when their true form is seen.
* The Legend of Zelda: Twilight Princess while in Wolf Form you can talk to pretty much any animal, your horse Epona in particular says barely anything aside from that she "hates Link's wolf form and wishes he'd turn back soon"
* The Legend of Zelda: Twilight Princess,) with many different smells presented throughout the game.
* The Legend of Zelda: Twilight Princess would involve Link turning into a wolf, Nintendo denied it with "wanna bet?" to cover up any surprises. The IGN editor won the bet.
* The Legend of Zelda: Twilight Princess: Zant takes you to previous boss arenas and requires you to use the same item used against it. Once you figure that out, he becomes simple, and he is not helped by the small number of attacks he possesses. Even the final phase, where he takes out swords, is easy because it boils down to waiting until he stops attacking and hitting him.
* The Legend of Zelda: Twilight Princess: Zant transports himself and Link to the Forest Temple, the Goron Mines, the Lakebed Temple, the Snowpeak Ruins and finally Hyrule Field throughout his boss battle. He uses different attacks in each area, forcing the player to adopt different strategies accordingly.
* The Legend of Zelda: Twisted Fates, Link is captured by the Ghost Ship and presumed dead; Tetra, having pushed him into boarding the ship instead of her, blames herself and spends the next five years mourning his loss.
* The Legend of Zelda used "faerie." The GBA remake went back to "fairy."
* The Legend of Zelda usually has a spot on his chest or his weakness is his tail. The Master Sword is more or less kryptonite because the sacred sword has the power to repel evil.
* The Legend of Zelda usually have names that begin with 'Dar'. Darunia, Darmani, Darbus, etc.
* The Legend of Zelda version of Ganondorf sported an orange beard on charcoal-colored skin, and made it work.
* The Legend of Zelda version of this, being a monarchy with a lot of Greek influences in it's architecture, monsters and naming schemes that is constantly conquered, has quirky customs, a bloody history and borders a desert country inhabited by Arab-like peoples.
* The Legend of Zelda was also based on Miyamoto's childhood, but more so from him exploring the caves he would find around his neighborhood, leading to the series' famous dungeon crawling.
* The Legend of Zelda were ever released translated into Korean until Nintendo of Korea was established in 2006.
* The Legend of Zelda where the Dark Forces have a slew of different monsters that their armies can mix and match for a variety of different army setups. In contrast, the Hyrulean Forces simply use Hylian and Goron soldiers as troops.
* The Legend of Zelda whether it's the same Link between these games (Japanese version says it's not, English version says it is).
* The Legend of Zelda, while large bats common in Hyrulean dungeons are replaced by Chasupas, giant eyeballs with bat wings. This also occurs for Hyrulean monsters; the octopus-like Octoroks, for instance, are replaced by the more alien-looking, antennaed Slaroks, while the fishlike Zora are replaced the cyclopean Ku.
* The Legend of Zelda: While the potions are explicitly magical, the food items in the more recent games are not. Link can come back from the brink of death just by drinking half a bottle of milk or soup. Bottled fairies are an even straighter example: they will appear when you run out of health and give you a smallish health boost so you can keep fighting for a bit longer.
* The Legend of Zelda, Zelda claims that this happened because Ganon had only the Triforce of Power. Without the complete Triforce, Ganon could not control the power of the gods to grant his wish.

* The Legend of Zorro, after she and Armand have had dinner, a servant brings "her" pipe. Initially, she says she needs her stomach to settle first, but when she needs an excuse to be out on the balcony, she's forced to light up.
* The Legend of Zorro, Catherine Zeta-Jones runs across a dirt field at full speed, fights with a shovel, runs back across the same field at full speed, falls in the dirt at least once, and when she gets back to her room her white nightgown is spotless and she doesn't have a hair out of place.
* The Legend of Zorro has one where even the damn horse ends up getting involved!
* The Legend of Zorro loses his footing during a fight on a half-built bridge and lands with his groin squarely on a scaffolding pole. Zorro takes a moment to wince in very sincere sympathy.
* The Legend of Zorro members hear Armand's evil plans, one disagrees. As a result, Armand demonstrates his secret weapon - nitroglycerin - by throwing a small bottle of it on him.
* The Legend Of Zorro series, Zorro's massive fireplace is the entrance to the cave where he keeps Tornado.
* The Legend of Zorro, when Joaquin breaks Alejandro out of prison. A few guards come running, and Alejandro (who is secretly the masked hero Zorro) thrashes them in about five seconds flat. When a surprised Joaquin asks him where he learned that, he quips, "Prison changes a man, son."
* The Legend of Zorro, Zorro fights a man named McGivens and later Count Arman, both end up dead.
* The Legend of Zorro, Zorro manages to land his horse on top of a moving carriage train, only to notice that it's about to enter a tunnel. There's a shot of the horse's eyes widening.
* The Legend, qualifying as one of Jet Li's greatest fights, where he uses an arsenal of katanas to tear apart an alley full of mooks standing between him and where the bad guys have taken her. While blindfolded. His mother may be even more badass than he is. When he is defeated by his prospective mother-in-law in the first movie, it's his mum who goes and restores the family honor (disguised as his brother).
* The Legend Reborn: Mata Nui and the Ignika landing on Bara Magna, followed by the creation of Mata Nui's Toa body.
* The Legend Reborn themselves didn't happen. They just happened in a way that contradicts the movie's visuals (like Mata Nui's island is shown being covered with lush jungles when according to the canon, it was a barren wasteland).
* The Legend Reborn website's webmaster at the time brought up these inconsistencies during a meeting with the filmmakers, but his points were ignored.
* The "legend rule" applies to legendary creatures (or legendary permanents of any type). Legendary permanents represent unique, named characters, places, or objects rather than generic ones; originally, the legend rule stated that if a legendary permanent entering the battlefield shares a name with one already on the battlefield, both are sent to the graveyard. However, two legendary permanent cards could represent the same character without sharing a name. For example,
* the Legends meet Rex Tyler (AKA Hourman), the leader of the Justice Society of America.
* The Legends of Ethshar, being the end-cap of a cylinder. The edge of the end-cap is marked by a "noxious yellow gas".
* The Legends of Ethshar. If a warlock steps into one of these universes, they lose contact with the Source that supplies their magic, and lose all their powers until they leave.
* The Legends of Ethshar. Second, it will only prevent the wielder from dying. It is perfectly alright with letting them be maimed, blinded, or any number of other horrible things that happen when one wields a bloodthirsty sword.
* The Legends of Ethshar takes place in the final years of the Great War between the Northern Empire and Old Ethshar. By the time of the novel, Old Ethshar had collapsed due to internal strife, but the massive army and supporting staff fielded against the Northerners had become a self-supporting nation by that point.
* The Legends of Ethshar, the hero steals a ship to escape his home village. This

is one of the few examples where he does give it back... in the epilogue a couple of years later.
* The Legends of Ethshar where the erstwhile dragon-slayers were promised a bag of gold and a princess for defeating the dragon. Upon returning successfully, one of the heroes tries to refuse the princess and take the gold only to find that it's a package deal. There are too many princesses and the gold is her dowry.
* The Legends of Galactic Heroes, Admiral Bucock and his captain, as well as many others during the Battle of Mar-Ardetta.
* The legends of genies often fall under this trope. Not all genies are good, ya see, and the good ones will interpret wishes
* The Legends of Nezha, and never reaired, making it hard to find online.
* The Legends of Treasure Island and revived himself from hell previously, was dragged back down for cheating Death.
* The Legends of Treasure Island, the quality downgrade is still noticeable, with stiffer animation, less stylistic character designs and more basic cartoony backgrounds compared to the almost movie-like efforts of Moving Images' work. The title sequence used in both seasons, like many examples here, surpasses anything in the show itself however.
* The Legendsong Saga but retain their awareness and identity, becoming the equivalent of guardian spirits.
* The Legendsong Saga. Coralyn follows the traditional Iridomi practice of shaving her head and wearing wigs or headdresses. Despite supposedly being common practice, Alaude (her minion) is the only other person shown to do this; Iridomi in general are seen as being more evil in general due to association and their poison industry.
* The Legendsong Saga encourages and makes extensive use of this practice, her son, Kalide, particularly enjoys it and is infamous for his 'skill'. He tends to be less cold-blooded about it, frequently becoming frustrated and losing control; getting him in trouble with Coralyn for causing excessive damage.
* The Legendsong Saga frequently uses masks (or veils) to hide her silverblind eye, as it both shows that she is a stranger and fulfils one of the signs of the Unraveller.
* The Legendsong Saga soulweavers gain this when they give up their regular sight during their final initiation.
* The Legendsong Saga while away from their home on Darkfall. Their preferred fighting method is a form of martial arts, sometimes accompanied by a short javelin.
* The Legendsong. What is more surprising is the way that Tarsin puts up with her, despite knowing that she and his brother are plotting against him.
* The Legends pick up Zari in 2042, which is exactly 25 years after the episode aired.
* The Legend That Was Earth, Hyadean films (which are mostly exercises in social engineering) fail to make a splash on Earth. Human films, on the other hand, are becoming very popular on the Hyadean homeworld.
* The Legio IX Hispana (9th Spanish Legion) of the Roman army, a unit with a fairly well-documented history from the 1st century BC onward and which was stationed in Britain since the conquest of that province, disappears from historical sources around 120 AD. This has led to the assumption (first popularized by Theodor Mommsen) that the legion was completely destroyed in a catastrophic defeat against British
* The Legion also dislikes medical technology, because it allows the sick and weak to survive when they don't deserve to.
* The Legion of Super Heroes in the 31st Century animated series. What looks like an enigmatic villain observing the heroes and President Wazzo on a monitor turns out to be Starfinger watching a television set while it's still on display at a store so he doesn't have to buy it.
* The Legion Of Superheroes occasionally shows signs of this trope, more in the second season. He mentions his twelfth level intelligence practically every episode. "You're good...but you don't have a twelfth level intelligence." "A

twelfth level intelligence has no need for improvisation, Bouncing Boy." Gaaaah.
* The Legion of the Dead, a dwarven army composed of anybody willing to give up every single aspect of their former lives in order to take up arms against the darkspawn. A funeral is held for every new member and in all ways save the obvious they are considered dead by society. Thus, if you're bankrupt, wanted, disgraced, insane, or somehow otherwise unfit to live among normal people, you can join the Legion and be accepted and pardoned. And many do. Even non-dwarves can join if they wish (something absolutely unheard of anywhere else in dwarven society) because the Legion is chillingly aware it is a
* The Legion of the Dead is also comprised at least partially of this. Exiles, criminals, murderers and even rapists from Orzammar are accepted as members, who hold their own funerals when they join, consider themselves dead, and are willing to spend their last days waging guerrilla warfare and
* The Legions of Hell invade Azeroth, they send the Alliance and the Horde limping back severely weakened from the first battle.
* The legions of the Tolnedran Empire, who are considered by more or less the entire cast to be the best-trained fighting force in the world.
* The leg is actually injured in the first place when Daniel's opponent is ordered by the Sensei to deliberately cripple him with an illegal attack in
* The Legislacerators are a sort of combined prosecutor and hanging judge. It's not entirely clear what role the Honorable Tyranny actually plays in a trial; it doesn't
* The LEGO Batman Movie, Batgirl is voiced by vlogger Nathalie “Natoo” Odzierejko, while Robin is voiced by “Danse avec les stars ” winner Rayane Bensetti. Professional football players Antoine Griezmann and Blaise Matuidi voice Superman and the Flash, respectively.
* The LEGO Batman Movie, Batman drops the microphone he's been beat-boxing on after announcing his movie.
* The LEGO Batman Movie, Batman is informed that Alfred left some Lobster Thermidor in the refrigerator for Batman, causing Batman to yell, "Oh, that's my favorite!"
* The LEGO Batman Movie Batman uses them a lot, often proceeded by him actually declaring "smoke bomb".
* The LEGO Batman Movie came with a Batgirl minifigure at Target, and a miniature Batmobile set at Toys 'R' Us.
* The LEGO Batman Movie: During the chase scene, Robin tells Batman that he needs to go #1. When the Batwing keeps getting hit and losing engines, Robin states, "Good news. Our bathroom problem is solved."
* The LEGO Batman Movie ends with Batman and friends giving the bad guys a head start before going off to catch them again.
* The LEGO Batman Movie features the Bat-Family and the Rogues dancing to a bouncy pop song.
* The LEGO Batman Movie he leaves the plane, the Joker's doomsday device threatens to blow Gotham into... an infinite bottomless pit that it's apparently built over, and the police snipers, well:
* The LEGO Batman Movie is upset that Batman won't say "I hate you" to him.
* The LEGO Batman Movie: Robin/Dick Grayson's origin is largely simplified to "an orphan adopted by Bruce Wayne", leaving out the Flying Graysons and the circus for the sake of focusing on the main plot.
* The LEGO Batman Movie, Robin plays "Never Gonna Give You Up" while cycling through music to use for the film's climactic battle, which Batman simply groans at.
* The LEGO Batman Movie stops [Joker]." much to Joker's annoyance. This turns out to be a plot point; Joker's furious that Batman doesn't see him as his greatest nemesis, but as "Some guy I fight."
* The LEGO Batman Movie" straight over his head and into the background once he's done with it, at which point it snaps in half.
* The LEGO Batman Movie tendencies, you name it. They even take some affectionate shots at the nature of the live action Batman films themselves, and imply every incarnation of Batman was just a different phase he went through.

* The LEGO Batman Movie, the Joker comes up with his plan just as a giant lightbulb (made of Lego) is being carried behind him. It lights up with a 'ting!'.
* The LEGO Batman Movie, the Mexican Spanish dub actually cast a real teenager, Emilio Treviño, who was 17 at the time of the film's release.
* The LEGO Batman Movie to help him take over the city. Each name is accompanied by a brief clip of the villain in question.
* The LEGO Batman Movie when Batman is ascending into the Phantom Zone, he hits an invisible barrier and falls because of his actions in the film's climax, Phyllis no longer sees him as a villain.
* The LEGO Batman Movie, when Dick Grayson discovers the Batcave and sees Batman:
* The Lego Beer Song has ten million views on Youtube. Approximately two of those people have heard of an opera called "Carmen" by composer Georges Bizet. Fewer still know that the opera in turn was an adaptation of a novella.
* The Lego Beer Song itself was undoubtedly inspired by a few previous music videos that had been made using the same song.
* The LEGO company itself wanted a villain they could eventually actually sell as a toy, so Makuta was given a physical form. The 2001
* The LEGO Group has officially answered a question from various people if it is correct to refer to multiple pieces as "LEGO" or "LEGOs". They say neither; rather, "LEGO" is properly an adjective, as in "LEGO pieces" or "LEGO sets".
* The LEGO Movie 2: The Second Part also did the same - even down to making the characters 'fight' like minifigs.
* The LEGO Movie 2: The Second Part, and then it cuts after a five years timeskip. The movie came out in 2019, five years after the first.
* The LEGO Movie 2: The Second Part, a shot of the remains of the "BRICKSBURG" sign in the ruins of Apocalypseburg shows the first two letters falling off, so that it reads "ICKSBURG".
* The LEGO Movie 2: The Second Part at the start of "Catchy Song", Wyldstyle's head rotate on her shoulders to keep her face in front of the camera.
* The LEGO Movie 2: The Second Part), but Vitruvius and Bad Cop have it even worse: both have been reduced to silent cameos that last a couple of seconds.
* The LEGO Movie 2: The Second Part: During Lucy's clash with Sweet Mayhem, Sweet Mayhem uses two spinning stars on a stick as a weapon. When the weapon breaks apart, one of the stars says it feels dizzy and vomits glitter.
* The LEGO Movie 2: The Second Part, even though this wasn't the filmmakers' intent.
* The LEGO Movie 2: The Second Part for his actions in the previous film, callously abandon everyone to the mercy of The Duplo Aliens. When he returns at the end, he's snagged by one of the celebratory fireworks and sent flying into a store full of them.
* The LEGO Movie 2: The Second Part has often been described as a bomb by movie journalists. Its $191 million gross was a severe disappointment, no doubt about it, but it still ended up just barely earning back its $99 million budget in theaters (and toy sales put it firmly in the black). This still wasn't enough for Warner Bros. though, and they let their rights to the franchise lapse.
* The LEGO Movie 2: The Second Part has two significant changes to avoid spoiling several plot points: Lucy's hair is still mostly black instead of the more multicolored version seen at that point in the film, while Emmett is lacking the Rex Dangervest vest he was wearing then.
* The LEGO Movie 2: The Second Part!" He replies in confusion "You're me, and I'm late to school, I forgot my homework, and my pants are made of pudding?"
* The LEGO Movie 2: The Second Part in its Wal-Mart-exclusive release.
* The LEGO Movie 2: The Second Part: Inverted, when Emmet rebuilds his house into a space ship to rescue his friends from the Systar System.
* The LEGO Movie 2: The Second Part. It's a sequel and follow-up to the original.
* The LEGO Movie 2: The Second Part, Queen Watevra Wan'abi bribes Captain Metalbeard with a planet that's also a pirate ship.
* The LEGO Movie 2: The Second Part shows that the Bricksburg sign (which largely resembles the Hollywood sign) has been ripped apart during the apocalypse.

* The LEGO Movie 2: The Second Part: The planet Duplo is covered in piles of Lego bricks that the Duplo aliens sort and bring to Watevra Wan'abi's temple.
* The LEGO Movie 2: The Second Part. This gets lampshaded pretty hard later on.
* The LEGO Movie 2: The Second Part used this towards the end of the film during the final battle when Unikitty uses a glitter hairball missle.
* The LEGO Movie 2: The Second Part, when Batman agrees to marry Queen Watevra Wa-Nabi, she asks him if he wants to have the wedding in 15 minutes. Batman tells her to make it a quarter of an hour.
* The LEGO Movie 2: The Second Part: When Sweet Mayhem's spaceship approaches the Systar System, at first we only see a lone, ordinary round planet. But then we get a side view, and the system is revealed to be composed of many planets with fantastic shapes, which were previously aligned perfectly.
* The LEGO Movie 2: The Second Part with a visual elephant, who's a butler.
* The LEGO Movie: 4D — A New Adventure doesn't appear due to licensing issues.
* The LEGO Movie: 4D — A New Adventure, Risky Business's Micro Manager replica sprays lemon water, which he mentions is only harmful to electronic devices. Emmet and Wyldstyle later get the idea to use it to short-circuit the mind control devices brainwashing their friends.
* The LEGO Movie: 4D — A New Adventure, Risky Business's robot henchmen disguise themselves as fake robot henchmen with paper masks with their faces on them.
* The LEGO Movie: 4D — A New Adventure, while Emmet's friends all get cool attractions at Brick World that they enjoy, Emmet gets stuck with "Emmet's Breakfast with a Plant Merry-No-Round", which is a recreation of his apartment where he sits on a stationary couch and watches a replica of Planty dance around slightly. Wyldstyle notices that Emmet is unhappy with his ride, so she takes him with her on the much more exciting "Wyldstyle's Super-Cycle Mega-Coaster" instead.
* The LEGO Movie: 4D — A New Adventure, Wyldstyle takes Emmet on the "Wyldstyle's Super-Cycle Mega-Coaster" to take his mind off how lame his ride at Brick World is. When robot henchmen on another car start shooting at them, Emmet gets jealous about how exciting Wyldstyle's ride is compared to his.
* The LEGO Movie.) Additionally, several of the mini-figures from the movie (such as William Shakespeare, Abraham Lincoln, and Michaelangelo the artist) that were just cameos or background gags were also made after their appearance.
* The LEGO Movie. Also, one of the Master Builders throws a shark at Emmet when the latter's speech fails to rally the heroes. It chirps like a dolphin.
* The LEGO Movie (although none of these spinoffs have matched the original's success).
* The LEGO Movie are in the title and on the studs of the actual pieces the world is built from. Nobody uses terms like "minifig" or "minifigure", either.
* The LEGO Movie, as Octan is a fictional oil company whose logo appeared on several LEGO City sets.
* The LEGO Movie, because now that his plan's achieving its completion, why would he need him anymore?
* The LEGO Movie builds one from scratch using some nearby wrecking balls and other construction equipment.
* The LEGO Movie but not always the exact interpretation of the scenes.
* The LEGO Movie, but the rest of the characters see this as just one more example of how incredibly bland he is.
* The LEGO Movie. Complete with thunder and lightning, and a torturous Think Tank for Master Builders.
* The LEGO Movie, despite no changes in content. On Netflix, the second film is rated a much more appropriate TV-Y7-FV.
* The LEGO Movie; despite the obvious, there's also plugs for Band-Aids, Xacto knives, Q-tips and Krazy Glue. They are treated like ancient relics, with the last one being a super weapon that can end the world.
* The LEGO Movie, does begin with that scene but then immediately fast-forwards to, well, five years later, where it's shown that the aliens have turned the city into a desolate Mad Max-esque landscape called "Apocalypseburg''.

* The LEGO Movie does show up (complete with main fanfare and most of the original actors reprising their roles), it was a huge and pleasant surprise for fans.
* The LEGO Movie due to introducing a whole new level of depth to the movie and coming right smack out of nowhere, with only the briefest of foreshadowing leading up to their appearance.
* The LEGO Movie. During the big break in to Lord Business' fortress, the heroes place him on watch. Cue him looking at a wall with a pair of binoculars.
* The LEGO Movie, Emmet has figured out a great plan by using his knowledge to help the others infiltrate Lord Business' tower. Everything is going according to plan right up until the last second where Emmet is about to put the Piece of Resistance on the Kragle, whereby the alarm bells ring, the entire group is arrested and sent to the Think Tank.
* The LEGO Movie, Emmet is thought to be the "Special," or the one destined to defeat Lord Business. In actuality, he's a bumbling, adorkable, normal guy.
* The LEGO Movie, Emmet is tied to the self-destruct mechanism's battery, Lord Business is armed to the teeth and not to mention his outfit makes it almost impossible to attack him. It doesn't do him any harm to gloat when everything's coming up great for him.
* The LEGO Movie, Emmett turns out to be this trope. The Master Builders look down on him because he's just an average and mundane construction worker, and seemingly not as creative as they are. But while the other Master Builders squabble and try to force their own dominant styles onto a project, resulting in a chaotic mess that quickly falls apart, Emmett's comparatively more boring constructions hold together because he knows where the pieces ought to go to prevent them from collapsing. Such as his double-decker couch, which everyone sneers at, but which turns out to be the only thing that survives the collapse of the submarine the others had previously tried to build.
* The LEGO Movie features one of these, including a funny rant by Morgan Freeman which ended up being used in the main film. Another features Batman chastising himself for using rather outdated terms and Unikitty getting a bit carried away with her lines until her actress Alison Brie breaks character and starts laughing.
* The LEGO Movie has an "infinitieth floor" where the Kragle is kept. Also the building is so tall that there is a loading bay for cargo spaceships.
* The LEGO Movie has a small but clever bilingual pun. Lord Business' doomsday device is called the Tentacle Arm Kragle Outside Sprayer, or TAKOS (the 'S' is silent), which looks like a bunch of giant tentacles. "Tako" in Japanese means "octopus".
* The LEGO Movie has a weapon called the Tentacle Arm Kragle Outside Sprayer, or TAKOS, with a silent "S" (pronounced as "taco"). The reason why its creator named it that is so that he can call the day he'll release it "Taco Tuesday".
* The LEGO Movie has Emmet laughing at something, which annoys Batman. Emmet responds by saying that he laughs at everything, and Batman admits that the laugh was actually good.
* The LEGO Movie has the heroes escape from the overrun Cloudcuckooland in a hastily built submarine. As they ponder their options, the wizard Vitruvius wonders why his feet feel wet. It turns out the submarine is leaking badly, and Lego-water is pouring in. Batman, immersed to his chin, snarls "This is not how Batman dies". Wyldstyle is heard ordering "Abandon ship! Abandon ship!" moments before the doomed craft explodes.
* The LEGO Movie has the Sword of Exact Zero. A justified example, as it is an actual metal blade (an X-Acto Knife, to be exact) in a world where nearly everything is made from plastic.
* The LEGO Movie helps, as even the most spectacular explosions and overloaded action sequences end up sillier as a result.
* The LEGO Movie, he plans to accomplish this on a designated day known only as 'Taco Tuesday'.
* The LEGO Movie, her words fall on deaf ears. Emmet, enraptured, hears only "Proper name, place name, backstory stuff. I'm so pretty. I like you, but I'm mad at you for some reason." Emmet only alienates himself further when he asks to hear

the whole lesson again because he wasn't listening.
* The LEGO Movie in this world), causing it to fall into the ocean. Only Emmet, his team, and Captain Metalbeard make it out — all of the other inhabitants are arrested or presumably perished in the waters below, as Bad Cop finds no signs of life after scouring the area.
* The LEGO Movie is a Master Builder who has quite the temper if her friends get hurt.
* The LEGO Movie Lord Business has a collection of "artifacts" left by the Creators, such as the Fleece-Crested Staff of Que-Teep (a Q-Tip), the Sword of Exact-Zero (a X-Acto knife blade), the Po'lish Remover of Na'il (nail polish remover), and the dreaded Kragle (a half-empty tube of Krazy Glue with some of the letters on the label worn off).
* The LEGO Movie, Lord Business' use of projection in his punishment of GCBC enables him to lay all fault on his lieutenant for not doing his job, considering how even the slightest imperfection can ruin his temper. This trope is used when GCBC is forced to Kragle his own parents because he is made to effectively take it out on the people he loves for his own failure at his job. It is reinforced because of how much Lord Business refuses failure as an option.
* The LEGO Movie: Lord Business when he dons his villain outfit. Even his robot secret police enforce this trope.
* The LEGO Movie". Most of the time he doesn't get the chance, as the other Master Builders shoot down his idea before he can get very far. Once they let him build his spaceship...
* The LEGO Movie narrative, while still being a solid example of the same.
* The LEGO Movie naturally has one of these. His name is Vitruvius, and he prefers the term "experienced."
* The LEGO Movie: No creativity allowed, everyone must follow the instructions.
* The LEGO Movie persona when it slips. Woe betide anyone she unleashes her rage onto, as the climax could attest.
* The LEGO Movie (pictured above); she always tries to stay positive, even after her home is blown to bits by Lord Business' forces. But during the climax, when she sees Emmet under attack, she finally loses it and goes on a rampage through the Micro-Managers blocking Emmet's path.
* The LEGO Movie proposes that she stop going out with him because he's a jerk and doesn't respect her... and Batman reappears, having stolen a vital component from the Millennium Falcon that he needs to solve their crisis.
* The LEGO Movie reflects the fear he can truly instil in his enemies when he's in this state.
* The LEGO Movie repeatedly had the characters point out all the "LEGO logic" and the oddities in the world.
* The LEGO Movie returned to their respective roles of Wyldstyle, Emmet, Batman, Unikitty, Benny, and Metalbeard.
* The LEGO Movie. She may look adorable, but hurt her feelings or her friends and she'll turn into an uncontrollable weapon.
* The LEGO Movie, thanks to his good cop side, before President Business removes his Good Cop persona (with a Q-tip and nail polish remover). He is then perfectly willing to go through with the deed.
* The LEGO Movie: The entire movie has taken place in the mind of an imaginative boy named Finn, who snuck down into his basement to play with his father's LEGO collection. Lord Business is actually based on Finn's image of his overly strict father (aka "The Man Upstairs"), who insists on building a perfectly ordered LEGO world with no room for playing or experimentation.
* The LEGO Movie, the Master Builders are at a huge disadvantage thanks to Lord Business's massively more organized robot troops.
* The LEGO Movie: The Piece of Resistance is seen falling in this way, into the Infinite Abyss of Nothingness.
* The LEGO Movie; the robot cowboys trying to catch Emmet, Wyldstyle, and Vitruvius plant some dynamite outside their room:
* The LEGO Movie They also do Shout Outs to BIONICLE and Fabuland, two sets that

ended before most kids nowadays were born.
* The LEGO Movie, this has become something of a house style for Warner Bros. in its animated movies:
* The LEGO Movie Videogame, after providing sound effects for an episode of "Where Are My Pants?" in the mission "Broadcast News":
* The LEGO Movie Videogame: In the mission "Bricksburg Under Attack", Superman refers to Emmet as Eric multiple times.
* The LEGO Movie Videogame is that Master Builders can use green circles to highlight 3 groups of parts in a green aura and throw them into a green whirlwind to reassemble them into something else. However, the parts need to be within range of the circle in order to be selected.
* The LEGO Movie Videogame, Vitruvius warns Emmet and Wyldstyle that they should get on another train in the mission "Escape From Flatbush".
* The LEGO Movie was dedicated to executive producer Kathleen Flemming, who died in a serious accident while the film was being produced.
* The LEGO Movie was, like the toys, marketed toward children but had a big enough impact on adults that there was a backlash when it failed to get an Oscar nomination.
* The LEGO Movie, when Emmett tries to argue that President Business can't be a villain.
* The LEGO Movie - when Vitruvius is addressing the assembled Lego Master Builders (by name), he mentions "Michelangelo, Michelangelo...". The Renaissance artist and the Turtle are sitting next to each other.
* The LEGO Movie where he plays down his strengths, so that by the time he gets to the actual rousing part, everyone's lost faith in him.
* The LEGO Movie, where Vitruvius admits that he made up the prophecy about "the Special" because he knew that it would inspire hope and bring about an actual "Special" by the hidden potential found in everyone.
* The LEGO Movie which coincides with its themes such as "you can build anything if you believe you can" and "coexisting makes the world around you a better place".
* The LEGO Movie, which gathered a lot of attention during those weeks with Japanese moviegoers. It later became one of the biggest-selling Western animated films when the DVD came out.
* The LEGO Movie, who couldn't join in on the commentary, and put her on speakerphone and basically describe what's happening in the movie at that moment to her, while she's eating lunch at Subway.
* The LEGO Movie whom the LEGO people regard as a godlike figure. The Kragle is only one of many tubes of Krazy Glue in his possession.
* The LEGO Movie, who promptly transforms back, trashes them, then explains that one of the rules of being a pirate is that nobody is allowed to put their butt on a pirate's face.
* The LEGO Ninjago Movie failed to win over critics who enjoyed both of the two previous theatrical Lego movies, with reviews calling it too generic, with less effort to appeal to older audience members. These turned it into WAG’s first movie with a Rotten RT score, as well as its first box-office bomb.
* The LEGO Ninjago Movie, Garmadon has his Shark Army deliver a message to his brother Wu. It reads: "You're a big, stupid dumb-dumb with a dumb face and a big butt and your butt stinks and you smell like a butt."
* The LEGO Ninjago Movie got emotional while recording some dialogue between Lloyd and Garmadon.
* The LEGO Ninjago Movie, hitting an enemy with Fire Spinjitzu will set their rear on fire.
* The LEGO Ninjago Movie, indicates it's based primarily upon the first three arcs in the series, where the main antagonist was Lord Garmadon, but the main cast includes Lloyd and Nya, both of whom, while still prominent in the franchise, didn't become ninja until seasons 2 and 5, respectively.
* The LEGO Ninjago Movie, in which the mighty Meowthra is depicted as one of these... from the perspective of the main characters, who are all LEGO minifigures living in a world built out of LEGO. In actuality, Meowthra is a perfectly normal

house-cat.
* The LEGO Ninjago Movie is that Lord Gamaron insists that the proper pronunciation for Lloyd is "Luh-Loyd" and gets annoyed when anyone tries to correct him.
* The LEGO Ninjago Movie, one of the things Garmadon orders his generals to do is to make a school bus full of little children dangle precariously on a highway. Lloyd later deals with the general trying to push the vehicle into the water on the way to deal with Garmadon and he catches it with his dragon mech when it falls.
* The LEGO Ninjago Movie reveals the alter ego of Lloyd's mother, Misako, the Lady Iron Dragon. It didn't hit shelves until some time in between the movie's theatrical run and its home video release, but pictures came out earlier than that.
* The "Le Guin" update allows planets to have specializations. Any planet where the majority job is "farmer" gains the "Agri World" specialization, gaining an additional bonus to food production.
* The Leipzig Market Hall has two giant 68-meter diameter domes on top of an otherwise very basic, albeit large, hangar. Apparently they constituted a novel solution to the architectural problem of holding up such a large roof.
* The Leisure Hive, a Foamasi detective is presented as a villain until we find that he just lacks a speech synthesizer.
* "The Leisure Hive", after the villain is reverted to babyhood by an experimental device intended to rejuvenate the planet's aging and sterile population.
* The Leisure Hive in the aftermath of their twenty minute war with the Foamasi.
* "The Leisure Hive" is being businessmen. The costume designer talks about this on the DVD, explaining that since they were businessmen they had to be dressed in suits, but virtually any modernist twist on the suit that she came up with for the design ended up looking like a 60s throwback. Eventually she came up with the idea of using open lapels with multicoloured linings clipped in as a kind of tie replacement, which is something not yet mainstream.
* "The Leisure Hive" started out with the Doctor and Romana at Blackpool beach.
* The Leisure Hive", the Argolians are a sterile, dying race because of the radiation damage they sustained in a conflict known as "The Twenty Minute War".
* "The Leisure Hive", the Argolins have this as a racial trait — they remain youthful for most of their lives, before suddenly aging to death in a matter of hours. The Doctor is subjected to this too and forcibly aged 500 years (although, being that this is the Doctor and he's pushing 900 at this point, this only causes him to go from looking like a well-kept 40-something into looking like he's in his 80s).
* "The Leisure Hive": The artificially aged Fourth Doctor starts obsessively writing equations and various graffiti ("Beware of the Dog") on his own TARDIS with a white pencil.
* The leisure suit became popular from the 1960s through the '70s when the abundance of synthetic materials, cheap prices, and a dislike for formality made it the fashion symbol for men. Its height of popularity was during the '70s when it was frequently associated with disco culture. But when disco's mainstream acceptance died, the leisure suit went with it — and by the '80s, it was commonly considered emblematic of '70s kitsch. While disco itself saw a massive reappraisal in
* The lemon chicken that won Ray's heart - only for him to discover later that this is practically the
* The Lemonheads' "Style", a sample lyric being "But I don't wanna not get stoned / So I'm not gonna not knock things down".
* The "le monkey face" meme is an example of this. For some backstory: The expression "
* The lengthy Full Blooming minigame can be skipped for a respectable sum of experience points and some Essence.
* The Leningrad Cowboys took this trope even further by playing Russians
* The Lenin library in Moscow ("Leninka" for short) is the closest real-life example regarding the Soviet era.
* The Lennon Report appearance, and he snaps back "I'll have your mother home by — what, is 1:00 good?" He then asks Phil to lend him $20, and Phil says, "Is

that all my mother's worth?"
* The Lennon Report as one of these. A hit and run accident on his motorcycle landed him in Roosevelt Hospital with a shattered hip — right outside Lennon's room in the ED. He spends the entire film trying to confirm that it's Lennon in there and get word to his assignment editor — at one point dragging himself down the hall to get to a phone. Weiss confirms this all really happened and there were moments when the film felt like a documentary.
* The Lennon Sisters, though they achieved this status on a smaller scale, via the
* The Lenny Henry had various pop stars criticizing Lenny Henry's impressions of them as being hopelessly inaccurate. Since they were, of course, being played by Lenny Henry...
* The Lenny Henry has Lenny reprising the characters of Deakus from the 1985 TV series and Delbert Wilkins from the 1986 sitcom version, the latter also seeing Vas Blackwood returning as his sidekick Winston. The final episode also features the return of Theopolis P. Wildebeest.
* The Lenny Henry) says he'll be tried in the great tradition of British colonial justice — innocent until proven black.
* The Lensmen at one point were thrown into another dimension where the laws of physics are different. After finally figuring out how to return to their home dimension, they went back to the other dimension and modified two planets to be thrown at Boskone. When they did, the "foreign" planets hit the Boskone planets at
* The Lensmen universe is acrawl with energy weapons, but minimally or non-portable heavy machine guns ("high calibre machine rifles") are still useful weapons against soldiers in personal armour. Kim Kinnison has an unfortunate encounter with one of these and barely gets away with his life. The next time he goes where angels fear to tread he wears a suit of armour so heavy it has to be power-driven, and he first takes pains to demonstrate its immunity to ammo 20% over what he encountered previously. Later in the canon, he actually uses the kinetic energy of a bullet stream to tilt his opponent's armor off balance and expose him, which he couldn't have done with an energy weapon.
* The Leo Kottke/Mike Gordon song "Clone" (from the album of the same name) has fun with this idea.
* The Leonard/Penny pairing qualifies. Leonard is quite dorky and isn't
* The Leonard Regime always have needed equipment, often illegal to possess. Justified due to the ease of purchasing on the black market and the government's inability to stop it.
* The Leonard Regime, Ben's training has given him the opportunity to play medic multiple times. Madison is also mentioned to be capable in this area.
* The Leonard Regime: Bomber planes rain down destruction during the final battle.
* The Leonard Regime is spent with the main characters being wanted. This ultimately escalates into all-out war as the characters gain followers.
* The Leonard Regime must resort to this in order to feed and arm themselves.
* The Leonard Regime, Nick is the de facto but usually unquestioned leader of the team.
* The Leonard Regime, the entire rebellion fights for its survival at the end of the book.
* The Leopard Man, a public relations man rents a black leopard to promote his girlfriend Kiki's nightclub act. However, a rival performer scares the leopard and it escapes.
* The Leopard Man Jerry becomes suspicious that the recent deaths blamed on an escaped leopard he was renting are being committed by a human and gradually begins exploring angles.
* The Leopard Men were all made sapient by Queen La's dark magic. When La is killed in their second appearance in their show, the magic spell cast upon them is broken, and as a result they all turn back into ordinary leopards.
* The "Leper Colony" bomber's radio is damaged, meaning it can't be recalled even when General Ripper's recall code is discovered.
* The Leper of Saint Giles who treated everyone around him badly and was about to marry a child bride in love with someone else for her money... but his long-time

mistress, a sympathetic character, was fond of him, and he treated her well even though she had aged and lost her looks, and she speaks of him with affection when she and Cadfael discuss him.
* The Leper of St. Giles: A beautiful young heiress has been forcibly betrothed to a much older baron by her abusive guardians. They know about the handsome young squire who loves her, but they don't know that her long-lost grandfather is hovering nearby, determined to see his grandchild happy.
* The leprechaun story with the stump and the marker happens to Scrooge McDuck, but Scrooge is savvy enough to insist that the wish-granting leprechaun not touch his marker. Of course, the leprechaun simply has someone else duplicate his marker. A
* The Lernaean Hydra's first eleven heads would grow two more heads for each one cut off. Hercules either used fire or the hydra's own poison to cauterize the necks. But the 12th was completely immortal, so Hercules just buried it under a rock. (A very large rock)
* The lesbian Lady Jane marries Admiral Knighton because her sexual relations with an actress were being gossipped about in society, and because he needed someone knowledgable about farming to manage an estate he inherited, and also because
* The lespuko being a genetic relative of the uryuom are also humanoid in build but more animalistic than them.
* The Les Savy Fav songs "Reformat" and "Reformat(Dramatic Reading), the latter a spoken piece in the style of a radio play, are about the captain of a diesel-powered submarine who pushes it beyond its capability and decides to use the crew's oxygen to power the sub long enough to surface. He kills anyone who tries to stop him and the rest die when the plan
* the less enlightened periods in human history, when twins were considered an ill omen or a sign of outright demonic taint.
* The lesser known but more mainstream Milton Bradley & Games Workshop boardgame
* The lesser known Jagdpanther tank destroyer is also a bitch to kill.
* The Lesser of Two Evils" featured Space Bandidos. They're easy to distinguish from other kinds of spaceborne brigands: if it's them, you'll hear maracas.
* The Lesser of Two Evils, Leela is clearly excited, then disappointed when the misunderstanding is cleared up and the prize taken from her and handed to the actual winner.
* The Lesser of Two Evils, which is built by primitive robots (who dress and behave like human cavemen) and runs by burning fossil fuels (as in actual dinosaur bones rather than petroleum biproducts). An ad in the re-created subway seems to assume that "Spanglish" was an actual language.
* The lesser Orkoids known as Snotlings have an animalistic intelligence that prevents them from running from something until it's way too late, such as an Big Mek's Shokk Attack Gun (which hurls Snotlings through the Warp into something/somebody else) but they have some sort of natural affinity to farm and raise the fungus and squigs that feed the bigger orks. As with other Orkoids, all of them are genetically designed to establish a fully functioning ecosystem to support a Ork "civilization" for war.
* The Lesser Sun villain. However, these monsters are incredibly dependent on sunlight for energy, to the point where going for even an hour without sunlight will kill them. As such, they can roam the island freely during the day, but every night must retreat to the abandoned castle where they were created, and where their creator left what is essentially a giant magical full-spectrum lamp which provides a close enough approximation of sunlight to sustain them through the night.
* The less famous "Star and Bars" is generally preferred over the famous "battle flag" by Civil War reenactors, as the battle flag is now heavily associated with white supremacy. Those wishing to pay some respects to history by acknowledging the Confederacy, but not invoking the racism that the Confederacy has been associated with since the civil war, also generally fly the Stars and Bars.
* the less idealized a portrait looks, the more likely it is accurate.
* the less likely parents are going to believe the children trying to tell them.

* The less man relies on God, the more depraved and incommunicable he becomes, as demonstrated by the descent in
* The Lesson: A couple leave their young son with his uncle while they are hosting a party. The child ties up his uncle (who is drunk) and puts a plastic bag over the man's head to pretend he is an astronaut. When the parents find him, they are angry that he got drunk while taking care of their son. They decide to "teach him a lesson" by leaving him tied up while they go out - but then they get into a car accident. The badly wounded mother tries to tell hospital staff that the uncle needs help, but can only manage to say the word "bag", making the nurses think that she wants something from her handbag. Meanwhile, at home, the little boy is wondering why his uncle doesn't want to play any more ...
* the lesson is that behaviors that work in a specialized environment like prison can be detrimental when used outside said environment, but Low Key insists that the moral of the story is "don't screw with those bitches at the airport."
* The Less Than Epic Adventures of TJ and Amal agreeing to drive cross-country with a total stranger is what sets the plot rolling.
* The Less Than Epic Adventures of TJ and Amal ends with Amal realizing he loves TJ and entering what's heavily implied to be the tattoo parlor TJ started working at, but we don't see what happens after that. It's a pretty optimistic ending for the two of them, but a purchasable epilogue comic makes it more ambiguous by providing three theoretical scenarios of their future: one has them in a happy relationship, another shows them having more difficulties with their relationship but still together, and a third has their attempt to pursue a relationship not work out.
* The Less Than Epic Adventures of TJ and Amal falls directly into this plotline with the story following the two titular characters on the road from California to Providence, Rhode Island after Amal agrees to drive TJ while on a bender.
* The Less Than Epic Adventures of TJ and Amal (gay main character, bisexual male main character, queer male romance, coming out story)
* The Less Than Epic Adventures of TJ and Amal is a road trip story which follows the budding romance of a gay Indian man recently disowned by his family and a bisexual, free-spirited hippie as they travel across America.
* The Lester Guy Show. It's not a Lester Guy Show episode without head trauma!
* The lethality of phaser weapons also seem to vary wildly depending on who they're being shot at. While there are multiple phaser settings that usually include
* The Lethian Robot War has a second act that is even more unusual: after the first one, the robots started serving the local humans to the point they practically
* The "L.E.T'S. H.A.N.G." and "Table for Six" events are chock full of these as Lowain and his bros, and later Sutera, Korwa and Lamretta fantasize about potential romance.
* The Letter appears in Rebecca's mirror while she's driving her friend Isabella home, almost causing her to crash.
* The Letter, even seeing her as a manifestation of karma that has come to him after all the wrong he's done.
* The Letter, Geoffrey Hammond's lover demands $10000 from his other lover, the woman that killed him, in return for an incriminating letter.
* The Letter, Hannah has children if she survived and either stayed happily married or ended up with another love interest.
* The Letter has the Ermengarde Mansion - a gorgeous, centuries-old house which is feared by the locals because of the belief that it's haunted. Indeed it is, and seven main characters all fall victim to the Mansion's curse.
* The Letter, Luke's romance endings with Marianne and Rebecca are this. In both of them, the narration states that the two are good friends, but only time will tell whether or not they'll become a couple.
* The Letter of Last Resort to the United Kingdom if they are ever opened. She tries several drafts, going from being pretty plain in her supposed final orders up to trying to provide comforting words to the imaginary captain.
* The Letter, one of the photos that Zach takes of Hannah ends up eerily distorted

due to the ghost's presence. Trying to make another copy of it doesn't help.
* The Letter People: All 60 episodes from the 1970s series ran roughly for this length.
* The Letter People: A puppet show that teaches phonics with surprisingly developed characters.
* The Letter People: First broadcast in 1976, it ran clear into the 1990s.
* The Letter People "Hi, I'm [name], and my sound is the same sound that starts [adjective noun]."
* The Letter People: If it's not enough that Mister M's sound is "Munching Mouth", his song cements his status this way as he lists foods starting with M that he loves to eat. And if that's still not enough, his introductory episode had him at a market, eating foods beginning with M, making a mess.
* The Letter playable characters have relationship values with each other, which will change over time depending on the player's choices. Character relationships affect some story branching as well as the epilogue.
* The Letters From Nicodemus. Booze pours like rain and shameless women dance all night long in the Den of Iniquity Herod's palace becomes.
* The Letters From Nicodemus, giving them a place to have the Last Supper and helping with the funeral.
* The Letter. She was accused of having used witchcraft, including using it to kill Lady Charlotte's husband, and was sentenced to be burned at the stake, a fate that she took to silently.
* The letters "k", "r", and "z" are very common among the Ghiscari of Slaver's Bay and there is a "mo", "na", or "zo" between the given and surnames (Kraznys mo Nakloz, Razdahl mo Eraz, Prendahl na Ghezn, Hizdahr zo Loraq).
* The Letters Of The Devil appears simple at first, but it becomes progressively more complex as more and more clues surface.
* The Letters Of The Devil, Cedric makes reference to his old partner, Eric Thompson, who was killed by a junkie.
* The Letters of the Devil, Detective Cedric Dustin is more interested in advancing himself by doing the least amount of work possible than he is in actually solving crimes.
* The Letters of the Devil inhabits is a world of barely-hidden corruption. As the mysterious "L" says in the Prologue, "The city is beautiful from a distance. It hides the Rot well."
* The Letters Of The Devil is started by Cedric's investigation into Rita Carey's fraudulent business practices, and we discover a plethora of other, more heinous crimes as his investigation progresses.
* The Letters Of The Devil opens on a bridge, and Cedric meets with Ira on the same bridge.
* The Letters Of The Devil, Rita Carey is accused of running a Ponzi scheme.
* The Letters of the Devil, Rita Carey is portrayed as being an exceptional and charitable businesswoman, which causes roadblocks when Cedric investigates her for fraud.
* The Letters Of The Devil, Rita Carey is the CEO of Carey Investments, and the story starts when Cedric receives a letter saying her entire business is a Ponzi scheme.
* The Letters Of The Devil, Rita Carey sends the police precinct boxes full of accounting records.
* The Letters Of The Devil, Vida Olivier is a tabloid reporter following up on an anonymous letter implicating a political couple in the shady deaths of their late spouses.
* The Letters Page, and the next few seconds of the recording are just Adam Rebottaro quietly losing it.
* The letters placed by Frank Churchill before Jane Fairfax, which she swept away and refused to read, contained the word 'pardon'.
* The Letter, the Ermengarde Mansion is able to continuously rearrange its rooms.
* The Letter, the surrounding area sometimes gets covered in blood when the ghost stalks a character.

* The Letter use their blood to write "Help Me" multiple times throughout the room.
* The Leucrotta (or Crocotta) had the head of a badger, the tail and body of a lion, and the legs of a deer, combined with a
* The Level 12 quest (Island of Mystery war) involves fighting enemies on the Battlefield while wearing one of two specific outfits. If the player doesn't have either outfit, a noncombat adventure in the Arid, Extra-Dry Desert will provide a full set for one of them.
* The level 50 perks are undeniably good but come on, it takes so long to reach level 50 you'll probably beat the game before that, and even if you reach it, you're obviously so strong you don't need the perks anyway. One even relies on racking up lots of karma, but by that point, you probably blew through all the big karma opportunities in the game.
* The level 5 espers get this to varying degrees. Accelerator, Kakine, and Mugino are the big ones. Kakine and Mugino are the leaders of powerful black ops groups, where they serve in the "blaster" role. Accelerator is in many ways
* The Level 999 Villager via arm strength alone doesn't help clear things up.
* The level boss Quadraxis has a laser attack which, upon successfully hitting Samus, causes the HUD to vanish and the screen to go blurry.
* The Level Fives and Moses seem to be having these kind of dreams in the
* The level immediately preceding the above, Seoul, is no slouch either. The entire level takes place in a warzone, meaning that all the enemies are automatically on high alert and will start shooting if they so much as see your shadow, and there is no alert music, so you won't know when they've seen you until they are actively shooting you. The first part of the level is actually fairly easy, but then it pulls a
* The level in every other Star Wars game that forces you to play the "Snowspeeder wrapping up the legs of the AT-AT" level.
* The level of Dan Browning was at its worst in Season 1 (for example, 75% of William Wallace's arsenal wasn't invented until centuries after he died), and they tried to avert this trope more and more as the show went on. That said, Season 3 does have one glaring case: Joan of Arc was a
* The level of detail in anatomy class during medical school and other advanced training is very granular and fine-detailed because it needs to be for the purpose of medicine. You do not need to know what the procerus
* The level of disability is too bizarre or exaggerated for any living person anyway, like
* The level of Dread Harry invokes increases in later books. The reader doesn't see it as much because many of the beings he's seen dealing with by the time his reputation grows enough are either powerful enough to be considered minor gods or just haven't realized who they're dealing with until he starts blowing things up. He's come across the stuff of nightmares a few times and seen them scream and run away just upon realizing who he was. Even the people on his side who don't know him personally tend to give him a wide berth (though this has something to do with the fact that it deserves a special mention whenever something is on fire and he
* The level of manliness is quantified when someone receives a scar from a LARPing sword fight in
* The level of obsession this involves can get downright frightening. Some players have managed to shave their times down to
* The level of technology in the show seemed to have stuck with the series' late 80s/early 90s origins for quite a few years. Vinyl albums were commonly seen in episodes well into the 90s, plus there's the Simpsons family's dial-tuner TV set with rabbit-ear antenna. Homer's car also looks like it dates from the 80s.
* The level "Of Their Own Accord" ends with the player character, Private James Ramirez trapped in the wreckage of a crashed Blackhawk (Ramirez's squad was protecting a civilian evacuation, and got hit by a SAM). As Russian troops approach the crashed Blackhawk, Ramirez's M4 runs out of ammo, Corporal Dunn gets shot, and an enemy helicopter hovers over, shining its searchlight straight at the player as the screen fades to white. The next level putting you in the shoes of a soldier half the world away. The level "Second Sun" returns to Ramirez, letting them replay

everything mentioned above, but then revealing how the actions of Captain Price in the last level end up saving him and his squad.
* The level "Of Their Own Accord" starts in a damp basement assumed to be somewhere in the Washington D.C. area, filled with wounded and dead soldiers while artillery shells shake the ground above. When a Sergeant orders the player character to follow him outside into combat, the player emerges in a muddy trench and the first thing to be seen of the outside are the scorched remains of the Washington Monument, backlit by dark clouds that reflect the fires of Capitol Hill, which looks more like Berlin in 1945. The Washington Monument
* The level up originally required to defeat either a Monster or 7 foot soldiers. In the final game the foot soldiers amount has been reduced to 6.
* The Level Upper program, for example, is a noise file that increases a listener's power level before putting them in a coma, in which state they can be used as an organic computer for the controller of the network to make use of
* The level up system through taking the souls of defeated enemies is,
* The level with the giant ants. It's not a boss, but a level where the enemies are giant ants.
* The Levely arc is a more direct example that take place within the chapters, excluding the Strawhats since the event is about the rulers of the kingdoms allied with the Rule Government. The viewpoint shifts between the Strawhats allies from Alabasta, Dressrosa, Fishman Island, and Sakura Kingdom and the Revolutionaries.
* The Leviathan is so big that its body, covered by eons of sediment, soil and rock, has in many places become a part of the landscape, forming great ridges, islands and peaks settled by marine and terrestrial beings who have no idea what kind of entity they live on. What's initially taken to be a towering temple-spire to Leviathan is, in fact, just one of its hollowed spines.
* The Leviathan of Dis, described as a "biological ship" found by the salarians, and apparently stolen by the batarians, was revealed to be yet another Reaper. Not necessarily obvious considering the Reapers appear to be entirely mechanical on the outside AND the inside; only thorough investigation can reveal that they contain a significant amount of living matter.
* The Leviathans, annoyed that their subjects kept making AI's that eventually destroyed themselves, made an AI to try and solve the problem. Shepard can rightly point out the idiocy in doing exactly what caused the destruction of their subjects themselves, and they just shrug it off by saying the concerns of 'lesser species' were beneath them. Even after the loss of their entire empire and being reduced to hiding in the deepest oceans, the Leviathan speaker still refuses to admit that creating it was a mistake. The entire galaxy today, them included, are now paying for their arrogance.
* The Leviathans are ravenous primordial monsters who were the first of God's creations and predate both Angels and the invention of souls. Death explains that God
* The Leviathans It isn't clear if the ones met in the game had personally been around the whole time or not since they use intentionally vague terms.
* The Leviathans of Season 7 and a bit of Season 8 are called "The Old Ones",
* the Leviathans (true name unknown) are the first species, the original intelligent life that preceded the Reapers. The Reapers were made in their image, and they have mental domination abilities that the Reapers used to create their indoctrination ability. They were the ones responsible for creating the Catalyst, and therefore are indirectly responsible for the Reapers. Their kind was harvested and used to create Harbinger, the first Reaper. A few of them are still alive, deep under the ocean on an aquatic world, where they have been hiding from the Reapers ever since the cycles began. Shepard can find them and convince them to give their aid in the current war against the Reapers.
* The Leviathan's waking is marked by violent weather, earthquakes, unnatural rains, and increasingly common sea monster attacks.
* The Leviathans were the original dominant life form, long predating humans, monsters, demons, and angels alike.
* The Lewis and Clark expedition experienced grizzly bears for the first time when

they were exploring the west. "Experienced" here meaning "coming across a creature so incredibly strong they were unable to kill it with all of their guns and had to hide up trees until it left." Climbing a tree is not a foolproof solution to bears. Bears, even grizzlies, have been known to climb trees, too. Standing on the ground, a big bear can reach as much as 10 feet into a tree.
* The Lewis and Clark expedition had a headache with this. The two leaders spoke English. Charbonneau, their Mountain Man guide, spoke French and Hidatsa, with another crew member translating from French to English. Sacagawea spoke Hidatsa (as she had been a long-term captive of that tribe) and Shoshone (her native language). Negotiations with the Shoshone got...interesting. (The fact that Sacagawea was the chief's long-lost sister didn't hurt!)
* The Lewis and Clark scene is filled with bad puns, which the script notes audiences will generally react negatively to. The worst is when Lewis's actor, after confusing "Netherlands" with "nether regions," asks, "So I shouldn't put my finger in a dyke?" Even the other actors react disgustedly to that one.
* The Lexx got the choicest morsels, the rest is donated to the "protein bank" along with all other 'spare' human parts and bodies. As well as a source of parts for cyborgs and presumably also replacement organs for the wealthy, the protein bank was being used to
* The Lhasa Apso gains extra credit for being explicitly bred as a temple guard dog and living alarm, rather than hunter or retriever like most small dogs: it combines a very loud bark with a distrust of strangers. One of the Lhasa Apso's old alternate names translated to "Roaring Lion Guardian" or something similar.
* The LHeP9(Or) Series 12/136 computer system entry said that the manufacturer Delta Research sold programs for it through a subsidiary, Interworld Business Machines (AKA IBM, International Business Machines).
* The Liam Smith Show: a console explosion results in the deaths of Ensign Deadmeat, Ensign Numbersup, Ensign Futurecorpse and Ensign Imgoingtodieahorribledeathonanawaymissonorwhenastationimatexplodes. (He's Dutch.) However, Ensign Expendable, introduced earlier in the episode, doesn't die.
* The Liao False Flag mission was basically this, send in several salvage craft in, steal the Davion Clanmechs and send the Steiner a nice middle finger barrage with it.
* The Liar Princess and the Blind Prince by accident, setting in motion her quest to heal him.
* The Liar Starscream clone (aka Ramjet), who had seemingly been captured by Lockdown to be handed over to Sentinel Prime, deliberately let slip that he wasn't really restrained by saying; "And here I am. Completely disarmed and helpless"- which Prowl caught on to, based on the fact that every word out of his mouth is a lie.
* the Liars wake up stripped and lying on tables in the "morgue" of the Dollhouse, having been knocked out by a gas bomb in retaliation for their escape attempt. Mona, who now demands to be called "Ali" appears in a Candy Striper uniform to offer them aspirin and juice for their headaches. "Game On, Charles" aired in 2015.
* The Libation Bearers, Atreus' brother Thyestes. This family is one Asshole Victim after another.
* The Libation Bearers Particularly important because there were only three actors in Greek tragedies at the time; "using up" one of them in many scenes for the silent Pylades is an interesting artistic decision.
* The Lib Dems became significantly more popular after Charles Kennedy's numerous appearances too.
* The liberalized successors of the SED, Die Linke, like invoking this trope in ex East Germany for votes.
* The liberation backfires, and the entity kills, enslaves, or otherwise harms its allies. Often a consequence of unleashing the
* The liberation of Astapor and Yunkai. Soon after Daenerys leaves, Astapor undergoes a
* The Liberator: A platoon of American soldiers is fighting the Germans in World War II Sicily. The opening scene has Sparks and the men advancing nervously through

a fog-bound plain. Sure enough, the Germans pounce on them from behind the fog.
* The Liberator in the first episode. An SS major is grilling Spigs about the "ponds" in the American rear. A terrified Spigs says that he doesn't know anything about any ponds as the the German screams "WHAT ABOUT THE PONDS?" Another soldier is pointing a pistol at Spigs's head when Spigs finally realizes that the German isn't saying "pond", he's saying the Italian "ponte", which he is confusing with the English word "bridge".
* The Libertines to give a short speech...and getting a huge cheer from the crowd!
* The Liberty of Norton Folgate by Madness, based around the area of London where the band grew up.
* The Liberty Republic is based on France, with Croissant Arena set in an exaggerated version of Paris. Very large versions of the Arc de Triomphe and Eiffel Tower sit on opposite sides of the stadium, there are blimps shaped like croissants floating around the area, and its flag looks exactly like that of the Flag of France. In addition, almost all written text in Croissant Arena is in French.
* The Librarian (2015) the alien protagonist whose been living as a human for years, wakes up inside an MRI machine and deduces he's been captured. He slightly waves his hand in greeting and promptly says, "My name is Nick Logan. I need to speak with my wife."
* the Librarian about orangutans playing pipe organs than to film them doing so.
* The Librarian completely runs on this, especially since it's the Librarian's job to find and store all the world's legendary and mystical items in a hidden underground room in the Metropolitan Public Library so that they're be safe and won't be used for evil purposes. The room literally has everything: Pandora's Box, The Goose That Laid the Golden Egg, H.G. Wells' time machine, Excalibur, etc.
* The Librarian film Flynn has a sword fight with a throwaway villain at the start.
* The Librarian films are about a librarian of this type of library. Not only does it contain legendary and magical books, but also all the world's greatest and most dangerous treasures.
* The Librarian: Flynn breaks with Nicole at some point after the first movie, before the second one...
* The Librarian has this, as two security guards are needed to activate the elevator leading down to the actual Library.
* The Librarian is another example of this trope within UU. While Ridcully was initially taken aback at the notion of having an ape on the faculty, the fact that nobody else at UU has the nerve or know-how to manage the Library's dangerous books is sure to keep him in bananas in perpetuity. During the Librarian's illness in
* The Librarian per se, but since they already know he's not human, he better explain the rules of how this is usually done.
* the Librarian Prince was a misunderstood hero has Mord stopping and refusing to read it because this is the Librarian Prince they're defending.
* The Librarian: Return to King Solomon's Mines, when Flynn goes to Casablanca, he makes the inevitable quotes. The taxi driver is understandably unamused.
* The Librarians (2007), Frances describes her staff as "dedicated librarians... and cleaners".
* The Librarians (2007): Frances is bisexual, widely assumed to be so by pretty much everyone, but deeply in denial about it on account of being a conservative Catholic.
* The Librarians (2007), who is besotted with Christine, but such a useless ne'er do well that even she can do better.
* The Librarians 2014!") and the building's inhabitants as the monsters.
* The Librarians 2014: Cassandra Cillian is the most upbeat and adorable of the new Librarians.
* The Librarians 2014 from series creator John Rogers is that all the mythologies we've heard of are correct, but maybe not the exact version we've heard, allowing the writers to draw upon all of those for characters to appear in the show.
* The Librarians 2014 He becomes human, freeing both Eve and the previous signatory from the contract (as Cecilman is no longer a demon, he has no claim on Eve's soul).

* The Librarians (2014), Jenkins tries to shut off the magical hologram of the planet with a clapper action. It doesn't work.
* The Librarians 2014, King Arthur's knights, Dorian Gray, a demon, Frankenstein's monster, The Queen of Hearts, Professor Moriarty and Prospero have all boasted screen time.
* The Librarians 2014 megalomaniac who wants to take over the world with magic, true. However, he is also a philanthropist with a large private collection of artwork and artifacts, which he treasures more than human lives.
* The Librarians 2014 singing "She'll Be Coming Round The Mountain" while stalking Cassandra.
* The Librarians 2014, the Librarians have been at war with the Serpent Brotherhood for millennia over whether the Library's artifacts should be used to gain power (the Brotherhood wishes to use the artifacts, while the Librarians want to lock them away).
* The Librarians 2014 they have the appropriately titled episode "And the Self-Fulfilling Prophecy". Such prophecies can only be cancelled by the intervention of a person not included in the prophecy or by causing a massive upset in destiny.
* The Librarians). After eventually determining there was no possible way to safely conclude the escort, he finds a place where he can climb onto the roof of the building they're in and totally bypass the escape portion, glitching and crashing the game in the process.
* The Librarians also uses a magically-enhanced smartphone app as a power boost.
* The Librarians "And the Tears of a Clown," Jacob Stone and his fellow Librarians are immobilized and at the mercy of an unhinged magician who's about to turn them into wax dummies, but that doesn't keep Jacob from correcting the villain when he misquotes Shakespeare.
* The Librarians. At the start of the first season, the main Library is cut off from this world, leaving only the Annex for the protagonists to use. Flynn, the Librarian, spends the season trying to bring it back.
* The Librarians: Compared to Flynn Carsen (22 academic degrees), Jacob Stone (world's foremost expert on art history with several Ph.D.'s and honorary doctorates), and Cassandra Cillian (a genius-level mathematician), Ezekiel Jones (world's greatest thief) and Eve Baird (colonel in a special UN counterterrorism unit) seem like outliers. Ezekiel doesn't like to read much and tends to scoff at Jacob's knowledge of art. Despite this, he has incredible street smarts, self-taught skills of getting out of any situation, and knowledge of the criminal underworld. Eve, on the other hand, doesn't need to be book smart, when she has three (sometimes four) Librarians, whose knowledge and skills she knows how to direct, as well a good leader should.
* The Librarian series of movies. Especially played up in the beginning of the third movie, when Flynn is completely bored with his job — which involves such duties as dueling with Excalibur.
* The Librarians has The Door. A globe connected to the closet door in the Annex which can magically connect to any other door on the planet.
* The Librarians has this as the basis of the show, with the characters having access to seemingly any book they need, as well as being a expansive display/collection of numerous magical artifacts, either of which are constantly in a state of being both stolen from and recovered to the library. The show takes place in the Annex, a (for budgetary reasons) smaller area but still connected to the main library. The Library is so big it's said to have to exist in a pocket dimension. This becomes a plot point when a villain's plot involves destroying the artifact keeping it there, which would destroy both the Library and the world if the two were forced to coexist.
* The Librarians: In "And the Point of Salvation," Ezekiel leads his teammates to a supposed weapons store. Once the whole team is inside, Ezekiel locks the door, saying that he'll come back to get them once he's found a safe way out of the lab they're currently trapped in.
* The Librarian. Since she's not the hero of the movie, it is up to Flynn, the titular Librarian, to end his (un)life with an aspen branch.

* The Librarians is a dagger hidden with a series of nesting chests, each a different color.
* The Librarians. Vessels never return because the wormhole that leads there is impassable, without magically changing ones own particles for transit, and they disintegrate on the way through.
* The Librarian where, after another relationship fails because of his job and his co-workers encourage him to think of himself as a "celibate monk", Flynn threatens to kill himself (with Excalibur).
* The Librarian. Within this building, you have Excalibur, the Shroud of Turin, Poseidon's Trident, Pan's flute, and multiple other legendary artifacts.
* The Library Kid speaks fluent English, French, German, Latin and Greek. She also speaks Basque but is not fluent.
* The Library of Alexandria gets this treatment in fiction. It held so much ancient knowledge that some say that if it had not burned down and been lost forever, technology would be significantly more advanced today. At the least, we'd know the content of many more classical works. The truth is a bit more complex. For starters the library was largely not concerned with technology and its (purportedly) vast financial, philosophical, and theological collections are often ignored in the popular consciousness. Secondly it was not the only great library of the ancient world and might not have even been the most extensive.
* The Library of Alexandria, one of the largest collections of written knowledge in the Classical Mediterranean, was accidentally burnt down during
* "The Library of Babel" doesn't directly reference monkeys or typewriters, but does examine the underlying idea of meaningful language emerging from chaos. The story is set in a finite-but-still-unmeasurably-vast library, stocked with 410-page books containing every possible arrangement of letters, spaces, and punctuation that will fit. All the information in any possible world is in that Library, as is every piece of literature possible (albeit divided into 410 page excerpts)—but the books aren't arranged in any particular order, so everything worthwhile is scattered amongst books of complete gibberish, or books full of lies that look real.
* The Library of Babel offer any 3200 character combination of English letters, comma, space, and period.
* The Library of Napoleonic Battles (an ongoing series of games covering Napoleonic-era battles and campaigns)
* The Library of the Unseen University has so many ancient magical texts that it distorts space-time like an elephant on a trampoline, dimensions and gravity being twisted into the kind of topographical spaghetti that would cause even
* The library of Unseen University leads to other dimensions thanks to the sheer weight of accumulated knowledge distorting the space-time continuum. This is known as L-Space. The library itself is pretty much a universe of its own with all the magical books, library creatures such as the
* The library rivalry quickly developed a more serious bent when it transpired that the main librarian was Tammy 2, Ron's ex-wife and his own sitcom arch-nemesis. Tammy 2 is an
* The Licanius Trilogy acts as a permanent foil to Wirr's plans for reforming Andarra's treatment of the Gifted. They do this with obstruction and politicking instead of outright violence.
* The Licanius Trilogy (after a fashion) and then grows up to become Davian, setting in motion the entire plot of the trilogy.
* The Licanius Trilogy, Andarrans who show signs of being to wield Essence are magically branded with a tattoo, then whisked away to an Academy by Administration so they can learn to use their powers for national defense.
* The Licanius Trilogy are neatly wrapped up, it deliberately hints that Davian, Wirr and Asha's stories are far from over.
* The Licanius Trilogy, Asha is entrusted with Davian and Erran's most dangerous secrets, as well as the crushing responsibility of powering the Tributary. She never betrays anyone's trust or shirks her responsibility.
* The Licanius Trilogy, as it turns out) he died and his body ceased to generate

Essence. However, before his soul could pass on his Augur powers kicked in, allowing him to instinctively keep his body functional by leaching Essence from his surroundings. This makes him the only person able to safely traverse the Deilanis rift since the pure kan of the rift would destroy any source of Essence that entered it.
* The Licanius Trilogy, Augurs are able to read minds at great personal danger to themselves. It's possible to get lost and die if they lose themselves in another's memories.
* The Licanius Trilogy can kill mortals at a touch and drain Essence from their surroundings, making them completely broken in normal combat. Licanius, the series' namesake, is the only thing that can permanently kill immortals.
* The Licanius Trilogy, creatures of pure Essence created when a malfunctioning superweapon stripped away their physical bodies. However, without the protection of a physical body, their Essence is subject to the Law of Decay and rapidly evaporates. Thus, if they go for more than a handful of minutes outside the overwhelming Essence of Res Kartha, they will fade into nothingness.
* The Licanius Trilogy die they will reincarnate in a random body somewhere. Only the eponymous Licanius can permanently kill them.
* The Licanius Trilogy. Due to the pre-destined nature of events, even seeing an Augur's vision of the future will not enable anyone to change what is destined to happen. It's a series-spanning debate whether this means life is meaningless or whether free will isn't required for meaning.
* The Licanius Trilogy, due to time travelling, Niha had the opportunity to meet her fully-grown son before ever giving birth to him. Once she realized who her child was, she tearfully says this to him before entrusting his safety to her friend Tal.
* The Licanius Trilogy features a platonic example. Despite needing to kill them for the advancement of his plan, Caeden still harbours fondness for his old friends in the Venerate, and the feeling is usually mutual.
* The Licanius Trilogy features the gil'shar, who are technically a Desrielite religious organization. They just spend most of their time murdering Gifted, as they believe wielding Essence is heresy, and they even engage Andarra in open conflict by the end of the series.
* The Licanius Trilogy for characters who are able to get some time alone.
* The Licanius Trilogy gains a pallid hue and sprawling black veins on her face when she is turned into a Shadow, but Davian (and many others) still consider her to be strikingly beautiful.
* The Licanius Trilogy: Given that this story has both prophecy and time-travel as major components of the plot, this trope comes up a lot.
* The Licanius Trilogy has the Darklands, described as a world where every remnant of joy or life or hope, everything that makes life bearable, has been utterly erased. Shammaeloth is imprisoned within the Darklands, and he is trying to enter the real world in order to make it over into a second Darklands.
* The Licanius Trilogy, he will be imprisoned and she will be wanted for capital punishment.
* The Licanius Trilogy is unafraid to get his hands dirty, both when he is travelling incognito and when he eventually leads the armed forces of Andarra in the conflict against Desriel.
* The Licanius Trilogy. She remarks that he's much more muscular, stern and scarred than the present-day version of her friend.
* The Licanius Trilogy tend to see Augurs as this due to their history as dictators. While some of them (like Jakarris and Rohin) prove them right, most other Augurs are inherently good people who happen to be extremely powerful wizards.
* The Licanius Trilogy. The Builders were first, and they created magnificent cities, buildings and engineering marvels before causing their own destruction. The Shalis were second, and they mastered the use of Essence and passed down their knowledge to humans before going extinct at the hands of the Venerate.
* The Licanius Trilogy: The eleven Venerate. Not only are they unaging, but each

can only be killed by one specific method (one has to be pierced through the heart, another has impenetrable skin, etc.) On top of that, if they do die they return to life in a random body unless they were killed by the titular sword. Which, given that their existence is holding open a gateway to Hell, is highly inconvenient for the protagonists.
* The Licanius Trilogy, the three main characters have grown up at Gifted Academy in the seaside town of Caladel. Aside from them, literally everyone at the Academy is brutally massacred five chapters in.
* The Licanius Trilogy: This is Erran's initial (over)reaction to Asha as she takes most of her clothes off in preparation to swim towards the Tributary.
* The Licanius Trilogy this with Caeden. While he tries his best to make up for his past atrocities, many characters (himself included) consider him beyond forgiveness, for the most part.
* The Licanius Trilogy were exterminated several years before the story, more keep being reborn (to a hard limit of 13), and they've come of age in time to shake things up again for main plot.
* The licensed materials produced by Digest Group Publications. They produced a magazine and high-quality supplements and adventures for the second edition of the game -
* The license plate of the truck where you recruit Kojima himself in
* The liche-priests are another kind of necromancer who summon the spirits of fallen warriors into their own skeletal remains to continue serving their kings as in life. The Old World Necromancy used by necromancers and vampires is actually a bastardisation (some might say a refinement) of the traditional necromantic practices of the Liche Priests, pioneered by the Great Necromancer Nagash for his own nefarious ends. As such the underlying magical principles are the pretty much the same, but manifested in culturally distinct ways.
* "The Lich", Finn is worried because he just had a troubling prophetic dream involving Billy, the Lich, and the Cosmic Owl. Jake tries to reassure his brother by telling him about his own weird dreams, which are a lot less meaningful.
* The lich-god Vecna lost an eye and a hand in battle with his traitorous lieutenant Kas. As a god, he's still missing both, and seems completely unable to restore them. The Hand and Eye of Vecna are legendary artifacts that grant incredible power (especially if
* The Lich King and escaping his fortress before he one-shot kills your entire party. The achievement for doing this in a certain time is called "We're Not Retreating; We're Advancing In A Different Direction!" - quoting Maj. Gen. Oliver P. Smith (see Real Life examples below).
* The Lich King. One of his attacks, called Defile, targets a player to create a black puddle at his feet. Every tick of damage it does, it grows a bit larger in radius. If a player gets caught as it grows, it keeps growing. If another player who had cleared the danger radius stopped just short of the edge, it gets caught again, taking more damage, growing it a bit more. All it takes is two players doing this two step forward cha-cha a couple of times, and the puddle soon covers the entire playfield, wiping out the raid. Throughout all this, his valkyrs will pick three random players and drag them to the edge to drop them over, and they cannot do anything until the other players kill the valkyr (preferably
* The Lich King utters a very shocked, "Impossible..." after Tirion uses Ashbringer to shatter Frostmourne.
* The Lich King, who towers over you at the start of the Death Knight starting zone, no matter what race you picked.
* The lich sorcerer Xykon is an extreme example. His humorous dialogue and status as a
* The Lich's ultimate ability causes percentage-based damage over time to anything inside its area of effect, making it great for leveling buildings since they tend to have more health than units and very obviously cannot run away from the spell's damaging area.
* The Lie I've Lived happy that their daughter is dating the one guy (Harry Potter) who's guaranteed to get her involved in the upcoming war.

* The Lies of Locke Lamora and he tries to hire a prostitute because he's still pining over Sabetha to the point that no other woman will do.
* The Lies of Locke Lamora, Capa Vencarlo Barsavi has a wardrobe that replaces buttons with human teeth.
* The Lies of Locke Lamora, crime boss Capa Barsavi has an enclosed pool beneath his ship-based headquarters, in which he always keeps "something nasty" for when he drops victims into it.
* The Lies of Locke Lamora, is a ruthless, sadistic multiple murder. He is still in his twenties but "his hair was already beating a retreat to the back of his head"—also making him Prematurely Bald.
* The Lies of Locke Lamora is a tale of a roguish character, which is made up almost entirely of cons and mind games. Naturally, it culminates in a duel of rapiers between the hero and his foe, although to the book's credit Locke does rather cock it up almost entirely.
* The Lies of Locke Lamora, it's never called the Thieves' Guild, but virtually all of the thieves, cutpurses, burglars, con men, and related sorts were "the Right People." They gave the Capa a cut of their profits, and in return were part of his "Secret Peace": as long as they didn't steal from the nobles, they were relatively safe from the Duke's police forces.
* The Lies Of Locke Lamora on their marks soon after putting the scheme in place.
* The Lies of Locke Lamora the Elderen had a civilization like this. They certainly had the Crystal Spires. Whether they had the togas is unknown.
* The Lies of Locke Lamora, the Gentlemen Bastards have a similar custom of "a glass poured to air" for absent or dead friends.
* The Lie Tree, Agatha Lambent dies chasing the tree's last fruit over a cliff.
* The Lieutenant foes down, powered by a cleverly packed generator on his back.
* The Lieutenant of Inishmore depending on whether a cat on stage eats food offered to it or not.
* The Lieutenant of Inishmore has two alternate closing lines depending on whether the cat playing Wee Thomas eats food offered to it or not. Required since it's pretty impossible to train a real cat to do the same thing every night.
* The Lieze sisters attempt to do this for their master, but as their master said, their captor already knew everything so it was useless to lie.
* The Life After Death Trilogy has Mouse, Ock's adoptive daughter, utilize this on several occasions.
* The Life & Adventures of Santa Claus: A big part of the story is Great Ak making the case to his fellow immortals to bestow immortality on an aging Santa so that he can continue to do his good works for the rest of time.
* The Life & Adventures of Santa Claus a human baby is found in the magical Forest of Burzee and adopted by Necile, a nymph. She calls him "Claus," which apparently means "little one" in the Burzeean language. The 2000 animated adaptation makes Claus's full name "Necileoclaus", or "Necile's little one", which is shortened to Nicolas.
* The Life & Adventures of Santa Claus has Tingler, who can not only speak any human language but animal languages as well. Justified in that he's a Sound Imp, who carry sounds from place to place and thus should be familiar with most any sound creatures are capable of making.
* The Life & Times of Tim. A slight twist in that he isn't a character who goes out looking for awful things to do, but in almost every single episode he goes along unquestioningly with the awful things that his friends do and then gets surprised that it gets him into trouble.
* The Life & Times of Tim: Done in the first episode, in which Tim has been rumored to have been raped by a bum (it's not true though) so his boss has him do a police lineup of possible rapists.
* The Life & Times of Tim: "I'll Never Get Out of This World Alive" by Hank Williams.
* The Life & Times of Tim somehow succeeds in making every second fit this trope.
* The Life & Times of Tim, though Tim sometimes brings it on himself to some

degree.
* The Life & Times of Tim, when Tim bungles a call from a prospective employer by hanging up when he thinks the conversation is over. After a pause, the caller continues speaking, not realizing that he's hung up.
* The Life and Death of 9413: a Hollywood Extra portrays working in Hollywood as a dehumanizing experience in which you are identified only by a number stamped on your forehead, and success is unobtainable.
* The Life and Death of Colonel Blimp is a fight between a British soldier outraged by German accusations of atrocities in the Boer War, and a German officer selected by lot to fight him.
* The Life and Death of Peter Sellers had a sad example. After he and his wife separate, Peter redubs his wife's lines so that it sounds like they stayed together.
* The Life and Death of Peter Sellers most of the way, but after she breaks up with Peter, the reveal has Geoffrey-as-Peter-as-Emily-as-Anne decide to rerecord her dialogue to give the relationship a happier finish.
* The Life and Death of Peter Sellers, the filmmakers might not have been aware of the positive connotations of the card.
* The Life and Death of Peter Sellers to find out that he is sufficiently famous that there are reports on his condition on both the BBC and ITV at once.
* The Life and Death of Rusty the Firehouse Dog makes his presence known with the smell of wet dog.
* The Life and Death of Sir John Falstaff) is called "The Gadshill Job".
* The Life and Loves of a She-Devil has a very drunken priest seemingly hitting his head on the table to clear it enough to string sentences together.
* The Life and Loves of a She-Devil was based) is entirely this. Once dumped, the title character devotes herself to reaching a position to completely ruin her ex-husband and his mistress.
* The Life and Opinions of Tristram Shandy could be seen as this when the title character narrator digresses so much that his birth is not even covered until volume 3 of this 9 volume book, but the entire story is a humorous series of anecdotes and digressions.
* The Life And Opinions of Tristram Shandy, Gentleman, owned one, explicitly compared to Rocinante. Despite a love of fine horses, he keeps this one to avoid the expense of constantly replacing them when worn out from being loaned out to fetch a doctor over several miles of bad road.
* The Life and Suffering of Sir Brante, are always noble at birth and rank above humans. Humans are divided into Nobles of the Sword (Warriors), Nobles of the Mantle (Civil servants who have to earn their title each generation), Priests (For teaching the world's religious system, the Lots and the gods, The Twins), and the Commoners being the bottom rung.
* The Life And Times, Marlene Price realises she is in love with Adam McKinnon because she is jealous of his new girlfriend Prudence.
* The Life and Times of a Winning Pony, concluded he was into guys. Afterwards, Shining was too mortified to correct the misunderstanding, although Cadance caught on on her own later on.
* The Life and Times of a Winning Pony has rocs, birds that resemble an eagle twenty times larger than normal and fully capable of carrying off a grown pony in their talons.
* The Life and Times of a Winning Pony lack the creative spark required to create true art. As such, they cannot create original works themselves: the most they can do is imitate what's already there.
* The Life and Times of a Winning Pony, so as to be better infiltrators. They eventually got fed up with what was essentially slavery, rebelled, and broke away from Chrysalis' swarm.
* The Life and Times of a Winning Pony, Sparkler makes a Pinkie Promise that she has no romantic interest in Cloud's cousin Star Kicker. "Less than two hours later, I caught Star and Sparkler making out behind the equipment building. So much for Pinkie Promises."

* The Life and Times of a Winning Pony that he'd trade his right hoof to be as good as the in-universe historical cellist Animando Assai.
* The Life And Times Of Bully Demise, and more, all under the banner of professional wrestling.
* The Life and Times of Grizzly Adams uses this trope as a primary source for action, as Adams and his friends often have to rescue visitors who learn the hard way that the wilderness is a dangerous place to be in if you don't know what you're doing.
* The Life and Times of Judge Roy Bean: The whores whom Roy married off to his deputies are working overtime to be seen as respectable society matrons, and wind up being antagonists to Roy. They are enraged when Roy calls them whores and demand an apology. Roy apologizes for calling them whores. He then says "I did not call you callous ass strumpets, fornicatresses, or low born gutter sluts," but he did call them whores, and for that he is sorry.
* The Life and Times of Juniper Lee, a 10th level warlock makes a deal with a puss goblin and an antelope-snake to free Auntie Roon from her banishment so they can kidnap the children of Orchid Bay, intending to eat them. Roon agrees to help them but says she can't eat any herself — she's "homo sapien intolerant".
* The Life and Times of Juniper Lee above, this show dealt with a magical society co-existing alongside the mundane one, with the heroes tasked with keeping peace and order between the two.
* The Life and Times of Juniper Lee actually has an afro, though most of the time you'd never know thanks to the hat.
* The Life and Times of Juniper Lee, after June relinquishes her title to Ashley:
* The Life and Times of Juniper Lee: Ah-Mah and Ray Ray Lee, Juniper's grandma and little brother respectively, and later her older brother, Dennis Lee. (Although they're not quite regular Joes — both can see magical creatures, and Ah-Mah was June's predecessor. One episode reveals Ray Ray's ability as being an accident. For Dennis, he can only see magical creatures when he wears a talisman.)
* The Life and Times of Juniper Lee by showing him and having him monologue, but right at the point the monster's supposed to say his name, June conks him with a stone.
* The Life and Times of Juniper Lee, Cordoth's daughter tried to undo his banishment. When he was finally brought back, it was revealed he let himself go and was quite overweight.
* The Life and Times of Juniper Lee Easter special had the villain, a rhinoceros looking creature name Mitch, pit the rabbits and the chickens against each other in order for them to wipe each other out so he can take over the holiday (Under the pretense that the holiday was promoting useless things like candy and colored eggs when he could do it better by giving kids things like batteries and socks. He likewise was just tired of looking after the two). Ironically the plan ends up self-defeating since, well, the sides were still kids and not exactly warriors. So at most they just end up slap fighting or general harmless roughhousing until their mothers, whom June had managed to free from Mitch, tell them to knock it off.
* The Life and Times of Juniper Lee encourage the guy to overcome it.)
* The Life and Times of Juniper Lee episode "New Trickster in Town" used them on a mock game show started by the episode's villain.
* The Life and Times of Juniper Lee form off its stomach and tossing her aside.
* The Life and Times of Juniper Lee grandmother than herself specifically for this reason.
* The Life and Times of Juniper Lee had a snack food that contained a plant that is both extremely addictive to magical creatures and causes some magical creatures that eat it to turn into rampaging giant monsters. When Juniper confronts the manufacturers they initially pretend to be unaware of the plant's effects and promise to put a warning label on their product, which they make too small to read without a microscope.
* The Life and Times of Juniper Lee had gone back to writing comic books not long after the show ended, which was pretty much as good a sign the show wouldn't continue.

* The Life and Times of Juniper Lee had H.A.M. (Human Against Magic), an organization that hunted monsters regardless of their alignment. They're not exactly fond of humans that help them either, a.k.a Juniper (though she is magically enhanced, so it falls under their range of targets).
* The Life and Times of Juniper Lee has a mystical gift jump a generation. June and her brother are competent, her grandmother is competent, but her parents are clueless.
* The Life and Times of Juniper Lee has an episode dedicated to Juniper meeting a bat-otter.
* The Life and Times of Juniper Lee: In "Magic Takes a Holiday", Juniper's pug Monroe takes a liking to the cook at her drama camp. Monroe gains weight after being served so much food, to the point where he tries burning it off on a treadmill during the credits.
* The Life and Times of Juniper Lee: In the episode "Take My Life Please", in what may have been an innocent slip, this kid's show implied the existence of this trope when they mentioned a "fifth level incubus", who is summoning a demon from another dimension.
* The Life and Times of Juniper Lee: In the episode "Te Xuan Me", Juniper prevented a thief from stealing dragon eggs. The thief then tried to get back in time to change this by using a secret time portal guarded at a clocktower where Juniper and her classmates went for a field trip. The portal was kept by time wraiths who captured Juniper and her classmates and reformed Earth without them. In the alternative timeline, Ray Ray was the Te Xuan Ze; Dennis behaved like the mainstream Ray Ray; and Monroe said Ray Ray accepted the Te Xuan Ze role better than anybody else he ever met. Ray Ray and the thief were the only people to remember the original timeline. Despite Monroe's protests about it being too dangerous, Ray Ray rescued everyone.
* The Life and Times of Juniper Lee: In "Welcome Bat Otter", the fear of bat otters made some magical creatures hide inside a cave. Seeing the size of some of the magical creatures seeking shelter made her believe a bigger cave would be needed.
* The Life and Times of Juniper Lee is everything a little brother shouldn't be.
* The Life and Times of Juniper Lee, "It's the Great Pumpkin, Juniper Lee": June manages to successfully complete a Chain to un-spell a few monsters. One of those "deals" involved winning a wrestling match.
* The Life and Times of Juniper Lee, June is brewing a potion from a recipe that calls for a "smidgen" of dustroot. (Monroe claims a "smidgen" is "a bit less than a dash" and "a tad more than a pinch".
* The Life and Times of Juniper Lee: June's older brother Dennis is into LARP with his friends.
* The Life and Times of Juniper Lee: Juniper Lee gets cast for a TV show about herself fighting monsters in "Star Quality".
* The Life and Times of Juniper Lee of the Te Xuan Ze role. Having at least sixty years of fighting experience under her belt, she trains Juniper in being a better protector and guardian. Even though she experiences some backlash from her age, she still manages to wipe the floor, whether the enemy is a huge monster or an army of magically-enhanced magic-hating humans.
* The Life and Times of Juniper Lee perceive his speech as ordinary barking. (June has commented that this is the only reason her friends love him so much, seeing as they can't hear his rudeness and general bad attitude.)
* The Life and Times of Juniper Lee practically embodies this role. Being the magical guardian seems cool, but most of her free time is consumed and she is actually bound to live in her area, unable to leave.
* The Life and Times of Juniper Lee: Ray Ray mentioned buying one at the end of "Monster Con" but no t-shirt with that kind of message was actually seen.
* The Life and Times of Juniper Lee son are falling down a bottomless pit after the latter defies Loki to save June, Loki grounds him for an eternity.
* The Life and Times of Juniper Lee, the con-artist mummy sees through Ray-Ray's attempt to pass off as a zombie worker.
* The Life and Times of Juniper Lee, the series ended with Juniper stopping Auntie

Roon, however, while on a mission to stop some Magical Creatures, she was unknowingly being watch by Jodie who is holding a book on "How to See Magical Creatures". The series was cancel before this could be resolve, not to mention some plot points were also left unresolved.
* The Life and Times of Juniper Lee used for Monroe, while Miller voices Ray Ray in June's guise with a scratchier and boyish sounding voice similar to Soucie's take.
* The Life and Times of Juniper Lee uses a magical amulet instead of glasses, but the effect remains the same.
* The Life and Times of Juniper Lee, when Dennis is kidnapped by a powerful demon in one episode, after beating the ever-living crap out of said demon:
* The Life and Times of Juniper Lee would occasionally talk like a valley girl despite being a gothic punk girl.
* The Life and Times of Scrooge McDuck, a child-aged Donald Duck gives his uncle Scrooge a well deserved kick in the ass, upon their very first meeting. Scrooge gets the chance to return the favor in Chapter 12 (in-universe years later), when he and Donald (now an adult) meet again.
* The Life and Times of Scrooge McDuck a hanging offense in Langtry, Texas, or anywhere else! Thank gosh!"
* The Life and Times of Scrooge McDuck, and encounters one in which Scrooge is back in Scotland on his 10th birthday. While looking for Scrooge, Donald runs into a young girl and her mother, and realizes the young girl is Hortense McDuck, his own mother. His reaction is to embrace her fondly, while Hortense's mother, who'll never meet her grandson, calls on her husband, since a stranger is acting "mighty peculiar" around their daughter. It's not explicit, but the implication is obvious.
* The Life and Times of Scrooge McDuck and everyone's obviously panicking, he comments the following:
* The Life and Times of Scrooge McDuck and face the combined wrath of Scrooge and Goldie.
* The Life and Times of Scrooge McDuck and rest of characters were born.
* The Life and Times of Scrooge McDuck and returns as a still-capable badass.
* The Life and Times of Scrooge McDuck, and the Ducks are forced to make use of the clues that are not completely eradicated.
* The Life and Times of Scrooge McDuck and wrecks the whole ship by pulling on his chains and bringing down the smokestacks they're attached to. The narration says that no-one knows what happened that day and that there are some possible mundane explanations. Though originally left ambiguous (and, if anything, looking a whole lot like it really was Super Strength), the question is apparently solved in another story, where Scrooge remarks the ship's boiler happened to explode.
* The Life and Times of Scrooge McDuck are implied to be nicknames Scrooge has acquired during his adventures. To wit, he's variously known as "The King of the Klondike", "The Buckaroo of the Badlands", "The Pizen of Pizen Bluff", and "The Master of the Mississippi".
* The Life and Times of Scrooge McDuck. Back in 1909, Scrooge ran into Bombie at the North Pole, who then fell into an ice crevasse. Three years later, Foola Zoola's curse draws Bombie back to Scrooge during one of his travels across the North Atlantic, dragging the iceberg with him.
* The Life and Times of Scrooge McDuck, before finally returning to Duckburg.
* The Life and Times of Scrooge McDuck, but their identities generally get revealed right away. There are exceptions though:
* The Life and Times of Scrooge McDuck finally occurs in 1890, as the frontier is officially closed, America has been settled, and the great names of yesteryear passes into legend. Finally, Scrooge becomes part of legend himself as he participates in the last gold rush in Klondike, finally striking it rich at the top of the world.
* The Life and Times of Scrooge McDuck for years on end in pursuit of him.
* The Life and Times of Scrooge McDuck get the name of the Junior Woodchucks organization right. Over the course of the story, he calls them "Midget Gophers," "Runt Chipmunks," "Dwarf Voles" and "Microbe Moles," with everyone — including the Beagle Boys — constantly trying to correct him. On the last

page, he finally gets it right, causing his sister Matilda to automatically start correcting him and then realize her error:
* The Life and Times of Scrooge McDuck has this infamous exchange in "The Prisoner of White Agony Creek", when Scrooge is escorting Goldie O'Gilt to his claim, which is hidden in a tunnel that passes between the legs of a frozen mammoth.
* The Life and Times of Scrooge McDuck. His mother Downy O'Drake passes away sometime during the events of Chapter 8, and his father Fergus McDuck dies at the end of Chapter 9. However, the two's spirits are shown being reunited and bid one last farewell to their children as they take off for Duckburg, before departing to the afterlife.
* The Life and Times of Scrooge McDuck if he decided to steal a giant opal.
* The Life and Times of Scrooge McDuck). If that's not one, I don't know what is.
* The Life and Times of Scrooge McDuck: In "Of Ducks, Dimes, and Destinies", Magica de Spell goes back in time to the day Scrooge earned the dime so she can get it before he ever owns it. After some hijinks she succeeds, and it's while waiting for the return trip to start that she realizes the implications — by preventing Scrooge from ever owning the dime, it's no longer the first coin owned by the richest duck in the world, therefore it's worthless to her, and she's forced to give it back to him and return to the future empty-handed.
* The Life and Times of Scrooge McDuck inspired news reel instead.The later written midquels that told side-stories from in and around Life and Time, the story would often start with The Triplets leafing through the scrap-book, finding one inconsistency or another, inspiring Scrooge to tell them the story.
* The Life and Times of Scrooge McDuck instead of tar, but close enough.)
* The Life and Times of Scrooge McDuck: In "The Sharpie of the Culebra Cut", Scrooge McDuck tells his old friend President Teddy Roosevelt that he refuses to sell his mountain despite it being in the way of the Panama Canal's construction. He also knows Scrooge well enough that he really shouldn't have been surprised by the answer.
* The Life and Times of Scrooge McDuck, in which Soapy's riverboat casino was destroyed, was frowned upon by European readers for supposedly making Scrooge look like a Batman-esque vigilante (although Rosa never wrote what exactly happened and constantly maintained that the tale was meant to be exaggerated through legend).
* The Life and Times of Scrooge McDuck is an empire story chronicling Scrooge McDuck's rise to becoming the richest duck in the world, and much of the early story is actually set in the old west where Scrooge works on a riverboat in Louisville, as a cowboy in Montana, and in copper mining when the cattle boom ends.
* The Life and Times of Scrooge McDuck: Scrooge was told his family doesn't fear anyone except tax collectors.
* The Life and Times of Scrooge McDuck, sets its main character in various decades from the 1870s to the 1940s, featuring such characters as Murdo Mac Kenzie, Wyatt Earp, and Theodore Roosevelt.
* The Life and Times of Scrooge McDuck show young Scrooge's adventures as a cowboy.
* The Life and Times of Scrooge McDuck sidestory. Huey, Dewey and Louie ask Scrooge what happened that month Goldie worked for him at his mine. Donald immediately gets a look of terror and makes up an excuse to shoo them out of the room. They may be too young to realize what happens when two young adults attracted to each other spent a month in each others' company, but Donald is not.
* The Life and Times of Scrooge McDuck's notes on the story suggests that Glomgold has never forgotten this encounter, while Scrooge possibly did.
* The Life and Times of Scrooge McDuck. So Goldie "comes to" and saves him instead.
* The Life and Times of Scrooge McDuck, "The Billionaire of Dismal Downs", Scrooge's sisters find the lock of Goldie's hair and start teasing him about it while he tries to talk about his property in America:
* The Life and Times of Scrooge McDuck: Upon returning to the McDuck ancestral castle with his father and sisters, Scrooge takes a quiet moment to visit his mother's grave.
* The Life and Times of Scrooge McDuck: When Scrooge, Matilda, and Hortense first approach Fort Duckburg, Scrooge warns the girls that there may be deadly traps

ahead. He dramatically searches for danger... and then falls into a Bucket Booby-Trap, courtesy of the Junior Woodchucks. Hortense teases him about the seriousness of this trap.
* The Life and Times of Scrooge McDuck: When the Whiskerville are frightened away by the many ghosts of the McDuck clan, they crash through a door and leave their silhouette on the door, which is several inches thick of hard wood.
* The Life and Times of Scrooge McDuck: When Uncle Pothole and Buffalo Bill enter an abandoned building with the Daltons hiding behind a doorway for an ambush, Dalton clones suddenly spring out from elsewhere and Pothole and Bill fight them off, with Bill's hair noticably turning darker. Cut to the Daltons still standing near the doorway with dumbfounded expressions, and back in the chaos, Uncle Pothole has suddenly become ridiculously muscular, while Buffalo Bill is decorated with honors and his hair is completely black. Everything suddenly returns to normal, where it is revealed that Pothole was just writing a dime novel draft on the fly. Especially noteworthy, since it depicts Pothole writing Marty Stu versions of himself and Bill In-Universe.
* The Life and Times of Scrooge McDuck, where Scrooge drives away his family out of greed. He is about to try to make amends... Only to notice that he's now the richest man in the world, and break out in triumphant laughter. The laugh reads more like a mad cackle.
* The Life and Times of Scrooge McDuck: While on a train in "Buckaroo of the Badlands", Scrooge meets a fellow who has some "Square Eggs" on him. Unbelieving, Scrooge crows, "If this is a square egg, then I'm the chicken that laid it."
* The Life and Times of Scrooge McDuck with the poker game between Pothole McDuck and Porker Hogg. Porker lays down a full house of three kings and two aces, and Pothole responds with another full house of three aces... and two more aces. It turns out the "ace dispenser" up Porker's sleeve broke. Pothole then tells Scrooge that they were playing by "riverboat captain rules", in which not trying to cheat is an insult to the other players.
* The Life And Times of the Thunderbolt Kid, an autobiographical and historical account of 1950s and early 1960s America, when he was a child.
* The Life and Times of the Thunderbolt Kid writes about his childhood exploits in seeking out the porn stash owned by his father. A particularly favourite hobby was to swap magazines with friends who had found their own father's stashes, knowing full well they could do this without getting into trouble.
* The Life Aquatic: All of Steve Zissou's official crew wear matching uniforms throughout the film.
* The Life Aquatic with Steve Zissou, Steve perceives that he has a professional rivalry with Hennessy, but it's pretty obvious that in reality the former is simply bitter that the latter is a more successful oceanographer, the former husband of Steve's ex-wife and kind of a jerk.
* The Life Aquatic with Steve Zissou: The Adidas Rom track shoes made specifically for Team Zissou produced a demand for them in the real world. Although they were never made by Adidas, blogs popped up with directions on how to retrofit a pair and people also started selling them on eBay. Red beanies also became quite popular after the movie was released, with companies selling Ned's traffic light adorned cap.
* The Life Aquatic with Steve Zissou want to continue. Zissou said 'If you're not against me, don't cross this line! If yes, do.' so it's not just the fact the he was German that made it confusing.
* The Lifeboat Mutiny about being reallocated for a different purpose than the one it was built for.
* The Life Channeling enchantment allows the user to power the item by inflicting either non-lethal damage on themselves or lethal wounds on other creatures.
* The life debt Peter Pettigrew owes Harry thanks to Harry saving him from werewolf Lupin in
* The life-energies he consumed radiated from him as he used his powers — or even just existed — and would thus "seed" other worlds with the energies needed for life as he passed them. For every world he consumed, several would

eventually develop life.
* The Life Entity is the oldest being in existence. It triggered the birth of life in the first place. Nekron, the cosmic void's response to life, is the second oldest being in existence.
* the life-force of the earth. Mostly because it's insanely powerful and insanity-inducing, preventing safe research.
* The lifeguard of the kings of Judah, Cherethites and the Pelethites, first mentioned in 2 Sam 20:23. Modern research interpretes them as Cretans and Philisteans.
* The Lifeless are created by Awawkeners who use magic fueled by the special
* The Lifelock company, which basically promised to protect your identity from any theft, ever, but people still had it happen, including the founder of the company, who would demonstrate the products effectiveness by putting his Social Security number on billboards. Now, laws have been passed that make them unable to offer the anti-theft guarantee it still makes in some states. New York is the big one.
* The Life of David Gale, after the video proving Gale's innocence is revealed to the public, the female protagonist receives a videotape proving that he framed himself and was part of a conspiracy to undermine capital punishment. Naturally, it's marked "Off The Record". Given an earlier conversation with him in which she promises to keep "off the record" statements off the record, it's implied that this video will never reach the public.
* The Life of David Gale: One of the reasons David loses his job as a college professor. A female student who was failing his course for not showing up for classes later meets him at a party, seduces him, and then collects his semen so she can file rape charges against him. She doesn't even follow up on them since she has already left the country before it can go to trial, she just wanted to tarnish his reputation. It also makes him more plausible as a rapist and murderer later than otherwise he might be.
* The Life of David Gale: The titular character is an activist against capital punishment who is convicted of rape and murder, sentenced to death, and subsequently executed. Evidence emerges that he was actually innocent, creating an anti-capital punishment backlash. The film eventually reveals that he was a willing participant and both he and his alleged victim sacrificed themselves in order to discredit the death penalty.
* The Life of Death is about Death as he watches over a deer doe. He's supposed to kill her but can't bare to do so until, one day, she willingly asks Death to kill her.
* The Life of Death Sword." He fights against his enemy, Death Screw, and then the gods interfere for some reason. Such a ridiculous plot, so badly written, and yet, so hilarious.
* The Life of Émile Zola examples of this trope — the Dreyfus Affair — and Emile Zola's campaign on behalf of the unjustly imprisoned Alfred Dreyfus.
* The Life of Émile Zola However, when the General Staff is trying to figure out who the traitor is, Dreyfus's personnel file shows "Religion: Jew". The Minister of War's finger is pointing to that line as someone offscreen says snootily "I wonder how he ever became a member of the General Staff." The Minister of War then says "That's our man."
* The Life of Émile Zola is mostly about Zola working to clear Alfred Dreyfus's name of treason.
* The Life of Émile Zola, Zola insists on writing about all the injustices and social ills of French society. When the publisher that Zola works for suggests that Zola write about safer topics Zola reacts with contempt, and the publisher fires him.
* The Life of Nob T. Mouse (apparently going to run Monday to Friday) and a vlog (supposed to update Mon-Wed-Fri). Oh and she's studying for a law degree, too.
* The Life of Nob T. Mouse, before meeting the franchise's creator, Hubert Schlongson, and winning ownership off him in a game of poker.
* The Life of Nob T. Mouse, but has since been running along nicely and now updates

three times a week.
* The Life of Nob T. Mouse literary device, where each point in time is a parallel universe that may or may not be attached to any other point in time. Although originally devised as an excuse to get around continuity errors, it allows multiple versions of the main characters to exist at once and have different adventures at the same time.
* The Life of Oharu: Oh boy. One doesn't go from daughter of a samurai and resident of the Imperial court to wandering beggar in one step. So what happens to Oharu? Well — she's caught with her lover, and banished from the court. She's sold to a lord as a concubine. She's ejected from the lord's house after bearing his son, the heir. She's hired at a brothel, only to get kicked out of that for not being obsequious enough to clients. She gets a job as a domestic, only to get fired from that job after her past as a sex worker comes out. She gets married, but her husband is murdered. She applies to be a nun — but she's raped in the monastery, and the mother superior catches her while she's being raped, so she's kicked out. She's reduced to being a streetwalker, but eventually she gets too old and unattractive to even do that. Oh, and in the meantime she's promised that she can live with her grown son, the new lord, only for that promise to be broken. So, all around, a feel-good laugh riot.
* The Life of the Legendaries) are mentioned to have been put to use for... unclean purposes. And demonstrated when a cosplayer in a Gardevoir costume uses the costume's psychic powers to remove a waitress's dress in a hotel restaurant.
* The Life of the Legendaries depicts Silph Co. as owning Kanto's navy, army and air force.
* The Life of the Legendaries features 20 mm Gatling guns in the relatively mundane but vital role of point-defense.
* The Life of the Legendaries. Granted, he did steal their clothes beforehand so he could sneak by security.
* The Life of the Legendaries immature and have many, many childish habits.
* The Life of the Legendaries sword. It is made from his psychic energy. In this continuity, Psycho Cut can manifest as this form as well.
* the life of the only woman he's ever loved before he's even been able to tell her how he feels. Can you imagine any satisfaction in his "victory" at all after something like that?
* The life of the outlaw Hallmund is apparently quite a story not unlike that of Grettir himself. When Hallmund lies dying, he recites a poem commemorating his adventures, and "many exploits of his did Hallmund recount in the lay, for he had been in every land." Only a short piece of it is given, but it hints at a most extraordinary tale:
* The Life of the World to Come is "twelve hard lessons the Bible taught [Darnielle]".
* The Life Orb gives a 1.3 power boost to attacks but costs 10 percent of your health every time you attack. Other moves, such as Lunar Dance or Memento, do certain helpful things while the Pokémon faints. The Life Orb is less of a problem in Gen V. The ability Sheer Force gives certain moves a power boost and can then stack the power boost with the Life Orb and somehow negates the Life Orb's recoil damage. However, this trick only works on moves that normally have positive secondary effects, such as Flamethrower.
* The life-size vibrating replica broomsticks. Not like those are likely to be
* The lifespan of elves has decreased somewhat over the various editions (from a maximum of two thousand years for grey elves in 1st edition to a handful of centuries now); perhaps this is appropriate, considering that they've become more and more common in their game worlds, suggesting higher levels of procreation. Their pregnancies are still long, and they need to wait five years to get pregnant again.
* The Life Story of the Flash: Iris recounts how, on one date, she told Barry how sexy she thought his analytical nature was; Barry's reaction was to cough an entire lemonade through his nose.
* The Lifestream may exist as extensions of her wrath or "natural defenses" against

threats.
* The Lifesucker is a large beetle-like monster with two 8-foot long tentacles growing from its head that each
* The Life that he can pull off. He usually goes into a slightly more professional mode when in combat.
* The Lifetime Achievement Award of the MTV Movie Awards has been given to
* The Lifetime Original Movie. Just to make it confusing he's only found out because he inexplicably makes hard copies and hides them poorly (suggesting the writer was unclear on the concept or hastily adapted a script about dirty magazines), and depending on the scene it renders him either obsessed or utterly disinterested with real-life sex.
* The lifted, nitrous oxide-boosted, bulletproof 1988 Silverado 2500 driven by
* The lift line of the defunct Lift 2 on Peak 8 is signed as a ski trail, accessible via Springmeier.
* The Light, a team of three allegedly ex-IBM programmers who developed
* The Light at the End has this happen to the Doctors when the Master uses a conceptual bomb to remove the TARDIS from existence.
* The Light at the End summons all the Doctors to the 23rd of November, 1963, with a little flashing red light.
* The Light Bearer, a historical-fiction story about the Roman conquest of Germania. Germanic chief Baldemar reveals an imposter to be a foreign spy by asking him if a famous local woman has recovered from an illness, to which he replies that she has — she actually died the previous year.
* The Light Bearer, a novel about the Roman Empire's conquest of Germania, an evil Germanic warrior is told "you shall not die by the sword." He is killed in the Coliseum by the female protagonist, who strangles him with her own hair.
* The Light-Blue Puppy, a 1976 soviet cartoon, suffered possibly the most extreme case of this. The caroon is about the titular puppy getting bullied for his fur color, who then gets captured by the Evil Pirate and the Cunning Cat. He is then rescued by the Kind Sailor with whom he bonds with and they together defeat the Pirate after which the Puppy is acepted by everyone. The problem is that the word used to describe the Puppie's color (голубой) has later became a euphemism for a gay man, changing the message completely. The Kind Sailor's effeminate design and his flower motive doesn't help
* The Light-bots count, too. There's no important androids created by Dr. Light who aren't badass. However, if you count the
* The Lightbringer. It has 255 power, boosts Speed, Strength, Stamina, and Magic by 7 (+ 7 is the highest boost any equipment piece gives), and + 50 Evade and Magic Block. It also automatically scores a critical hit at the low cost of 20 MP per attack, and has a random chance to cast
* The Lightbringer Series, and he gets to cement his followers loyalty by using Garadul as a martyr.
* The Lightbringer Series in a family taking a name that warns their enemies "I'm going to trick you" and still pulling it off. For centuries.
* The Lightbringer Series than a traditional wizard. Plus the narrative focuses on the Blackguard, elite warrior-drafters who are in peak physical form and are excellent warriors with or without using their drafting.
* The Lightbringer Series. Why Andross believed otherwise and told Gavin this is never explained.
* The light bulb aliens from "Runaway Pride at Lightstation Kilowatt" communicate through beeping and clicking sounds. Kevin was able to understand and translate their language.
* The light elves fared a bit better, in that a single city-state survives in the far north
* The lightest 'Mech-carrying dropship, the Leopard, weighs in at 19 times the heaviest 'Mech, has enough weapons to match any assault lance it might encounter, and more armor tonnage than a light 'Mech weighs in total. Lighter designs like the Claymore and Avenger are actually

* The Light Fantastic: "A floorboard creaked. Galder had spent many hours tuning them, always a wise precaution with an ambitious assistant who walked like a cat. D-flat. That meant he was just to the right of the door." However, his Anticipator status kicks in when he recognizes who it is. 'Ah, Trymon,' he said, without turning, and noted with some satisfaction the faint in drawing of breath behind him. 'Good of you to come. Shut the door, will you?'"
* The Light Fantastic, after reading seven of the eight spells of the Octavo.
* The Light Fantastic be dead." Suddenly they all decide not to mess with Cohen after all.
* The Light Fantastic, but when he attempts to swing the girl over his shoulder, his back goes out. Much to her own surprise she finds herself having to carry him away from the druids' circle.
* The Light Fantastic Cthulhu with a fist-fight. (It's made clear in the books that the Things don't really "get" the material world; a physical attack simply isn't something they're equipped to deal with.)
* The Light Fantastic, Death lampshades this when Rincewind and Twoflower escape from his house, saying, THAT ALWAYS ANNOYS ME. I MIGHT AS WELL INSTALL A REVOLVING DOOR.
* The Light Fantastic due to his lack of teeth, but resumed speaking normally after having dentures crafted from a troll's diamond teeth.
* The Light Fantastic, has Cohen, an eighty three-year old barbarian hero, tell an enemy that they're holding their sword wrong. He then proceeds to demonstrate that you're supposed to use distractions to put a sword in your enemy's leg.
* The Light Fantastic, has read the most powerful book of magic around and is a pretty potent wizard in his own right. He is beaten up in hand-to-hand combat by Rincewind!
* The Light Fantastic; he knows that he is going to die soon, so he hides in a chest that's supposed to be magically sealed against Death. Unfortunately, he made it airtight, and he hears an ominous voice saying it's a bit stuffy in here.
* The Light Fantastic, he pegs her and Bethan (whom Cohen has married at this point) at about the same age.
* The Light Fantastic. In later books, this is said to be the root of all the animosity between trolls and dwarfs. The dwarfs go about innocently mining for diamonds, only to be severely beaten by a troll who is woken up from his nap by someone trying to steal his teeth.
* The Light Fantastic, it's noted that an ancient ruler outlawed simile and metaphors, and any writer or casual speaker not careful with his phrasing would rapidly find himself a good deal shorter. About a head's worth, really (so someone describing a woman as having a face that launched a thousand ships had better have empirical evidence that the object of desire did indeed resemble a wine bottle, or appropriate documentation from shipyards).
* The Light Fantastic locked room killing - a wizard near death sought to hold off the the Reaper by sealing himself behind a series of powerful wards to protect him from any possible threat, but forgot the implications of the fact that one of the protective barriers was airtight.
* The Light Fantastic mentions former Patrician of Ankh-Morpork Olaf Quimby II, who tried to legally enforce accuracy in idioms, like figuring out how bad a poke in the eye with a blunt stick could be, or establishing a standard recipe for the pie to which something "as nice as pie" is compared. He was killed in a duel with a disgruntled poet while testing "The pen is mightier than the sword".
* The Light Fantastic. One particularly old wizard was not at all interested in a close encounter with Death, so he'd holed himself up in a box that nobody and nothing could get into once it was shut. Including light and, more importantly, air.
* The Light Fantastic, Rincewind and Twoflower hitch a ride on a huge rock which a young druid is flying to an under-construction stone circle. Informed that the rock stays up because the druids have persuaded it to fly, and will fall if anyone's thoughts remind it that rocks can't do that, Rincewind struggles to think of rocks swooping and soaring around rather than sitting on the ground. He's miserably aware

that he's not very good at it.
* The Light Fantastic: Rincewind expects the Things From The Dungeon Dimensions to break through in the sky above Ankh-Morpork, tentacles waving, but all they really need to do is break into Trymon's mind.
* The Light Fantastic says that Topaxci is also God of People Who Tell Other People That "Dog" Is "God" Backwards And Think This Is Somehow Revelatory.
* The Light Fantastic sees Rincewind dangling helplessly off the top of a tower; Twoflower grabs his hand but is unable to actually pull him up. But he does manage to irritate Rincewind sufficiently to get him to hang on until help arrives.
* The Light Fantastic the Forest of Skund got its name from a native word meaning "your finger, you fool". Other geographical names mean things like "Just a Mountain", "I Don’t Know", "What?" and "Who Is This Fool Who Does Not Know What a Mountain Is?"
* The Light Fantastic, the great world turtle Great A'Tuin ushers eight eggs into the world, each hatching to reveal a perfectly formed baby turtle, each supporting on its back a group of elephant calves which on their back support a proto-Discworld. These then swim from the shores of harsh reality back into the depths of the improbable part of the universe that supports such things.
* The Light Fantastic the narration does mention that Rincewind had had some orgasms in his life, occasionally even with a partner. The comparison comes up because his first success at casting a spell was much more intense and enjoyable.
* The Light Fantastic, the sinister red star that keeps growing in size seems to be stripping all magic from the world. On a smaller scale, this causes wizards to be unable to cast spells. On a larger scale, since the Discworld is highly magical, and relies completely on it, this threatens the existence of the entire Disc.
* The Light Fantastic tied Rincewind finds a sharp rock and starts cutting the rope. He gets exactly the result he expected — cuts to his wrists till they bleed.
* The Light Fantastic to be sacrificed, because voluntary sacrifices get rewarded after they die (that, and it'd mean she spent her teenage years staying at home on weekends for nothing).
* The Light Fantastic Trymon notes that Rincewind, ironically an (extremely incompetent) wizard, never really trusted magic and kept saying that there must be a better way to do things.
* The Light Fantastic Twoflower's kidnappers inadvertently settle in the mouth of an enormous troll, mistaking it for a cave. They probably would have been fine if they hadn't lit a fire inside it, ironically to ward off trolls.
* The Light Fantastic. Ultimately subverted, though. "The star is life, not death."
* The Light Fantastic, which is very good advice for someone in Rincewind's circumstances that day.
* The Light Fantastic with the barbarian heroine's gang of mercenary minions. The narration says they're all probably going to die so it won't bother naming them, but most of them actually live, despite some spirited attempts from the Luggage.
* The Light Fighter that the protagonists hijack during the finale isn't precisely a bomber but comes with the secondary armaments of a WW II one: heavy machine guns in the front and a twin-linked tail gun turret. Being a Light vehicle, it's also equipped with the mandatory light wall emitters.
* The Light has become this in the second season. So the heroes foil the season-long plans of the Light - surprise, all that was only Phase 1! And some other fans were already thinking this during the first season. Most of the show has a problem with this, actually: there are so many intertwining plotlines going on at the same time, all of them saturated with characters that only seem to be there for the sake of having another new hero/villain, that you can easily get lost between everything or get sick of it. Made all the worse that, by the season finale of Season 2, it's obvious what The Light's plan was: 1) use the Justice League's attack on Rimbor to alert the universe and The Reach to the presence of Earth as a major world 2) use The Reach to instigate Mongul into bringing War World to Earth 3) Destroy The Reach's plans and give The Guardians a reason to try them for war crimes, in order to take them out of the picture 4) Use The War World around Rimbor to alert the

rest of the universe that Earth is hereby off-limits 5) All this is in preparation for Darkseid (Wherever There is Light, There is Always a Darkseid) and the legions of Apokolips to invade Earth... Season 3 would have been Apokolips invading Earth. The show was canceled before this could possibly have become more complicated. It really doesn't help that, thanks to multiple hiatuses, the show spent more time off the air than on.
* The Lighthorsemen know about war?", the man snarks back that at least he didn't think it would be over by Christmas.
* The Lighthouse after being marooned in a freak storm and they hallucinated everything.
* The Lighthouse contains surrealistic elements, insofar as it's often unclear which of the disturbing and grotesque events are actually taking place as opposed to being nightmares or hallucinations of the main characters.
* The Lighthouse Duet, Valen is hinted to be severely dyslexic, incapable of reading even single words, and his addiction issues cause him to make terrible decisions when the cravings hit, but he has an excellent memory and is able to adapt to any number of unfamiliar situations.
* The Lighthouse has two characters, and both of them are either dead, or on the verge of death, by the film's end.
* The Lighthouse - many of Thomas Wake's rants are barely coherent, but filled with mythological and literary allusions foreshadowing both main characters' ultimate doom.
* The Lighthouse of Alexandria was damaged by a series of earthquakes between 956 and 1323. Finally, in about 1480, the Citadel of Qaitbay was built on the ruins.
* The Lighthouse, the film is deliberately shot on 35mm film and presented in the intentionally cramped 1.19:1 aspect ratio, as was common for films shot in the 1920s and 30s. To enhance the image and make it resemble early photography, a custom cyan filter emulated the look and feel of orthochromatic film from the late 19th century. Also, the audio is deliberately mixed in mono.
* The Lighthouse: Wake calls Winslow "pretty as a picture" early in the film. Later, he again mentions Winslow's good looks, saying he has eyes that "flash like a lady's."
* The Lighthouse was made using vintage equipment, including vintage 1930s lenses and orthochromatic film, to try and capture the aesthetic of late 1800s era in which it is set.
* The lighting used on the shows seems to extend to the DVD packaging with CSI being in green boxes,
* The Light in the Dark fits this pretty well. There are few people she dislikes, and she is kind to nearly everyone she encounters. In fact, her kindness and loving nature arguably serve as key driving forces of the story.
* The Light in the Dark Mulciber only desires Maria Zabini physically, and is implied to be attracted to the power he can reap from her being involved with him.Whatever his motivations, he clearly does not love her, while she is either infatuated with or truly loves him. Severus is in love with Lily, but whether or not his feelings will be reciprocated remains to be seen. Karen Smith of all people has a crush on him, but the feelings are not mutual. Edmund Avery meanwhile is interested in her. James fancies Lily, but she refuses to go out with him due to his bullying of Snape and other students. Evangeline is interested in Kitty, Paris Nott's girlfriend. Bertha had a crush on Alton Avery, who chose her friend Florence instead. Leslie is strongly implied to have loved Veronica romantically, but Veronica dated Regulus Black instead behind her back.
* The Light in the Piazza, Clara and Fabrizio are just about to consummate their relationship in "Say It Somehow." Margaret opens the hotel door, cue Intermission.
* The Light in the Piazza: Fabrizio catches Clara's hat when it is carried away by a gust of wind.
* The Light is not defeated. Most of the members go scot free and Savage is able to salvage some of his plan, by using the Warworld to threaten the rest of the galaxy to stay away from Earth. At the very end, he steps onto Apokolips itself and is revealed to have a working relationship with Darkseid. And in season three.

* The Light Jar: In a flashback, Nate's mum unsuccessfully tries to smooth a tuft of hair on his head in preparation for her boyfriend Gary moving in.
* The Light Jar, Kitty extends her hand when she introduces herself to Nate. Nate has never shaken hands with another kid, so instead he folds his arms and nods.
* The Light Jar on a treasure hunt, Kitty says, "William has left something a-maze-ing, I just know it. Get it? A-maze-ing?" and laughs.
* The Light Never Goes Out gotten around over 200 years, to the point that nearly half of the ponies in Ponyville by that time can directly trace back to her.
* The Lightning class frontier merchant, half warship, half merchant. These were able to cruise in Vilani space at will, changing to privateers or scouts when needed.
* The Lightning-class ships a multipurpose merchant/scout/privateer built by the Terrans for viking like voyages into Vilani space is a handsome ship that looks like a long wedge with short stubby wings.
* The Lightning Pill is a power used by electricity-magic users, where they basically make a ball of that magic and eat it to boost themselves up for a few minutes, though they can't even walk after that. Their hair also stands on end and they get a small mark on their face indicating what's going on. Khun Ran uses it frequently, and the memory of young Khun Mascheny Jahad uses it in her final battle. The head of the family, Khun Edahn, considers it too dangerous to be useful.
* The Lightning Seeds goes "Everything's blue now, oh lucky you" would be a good song for them remains a mystery.)
* The Lightning Thief before the summer solstice (this particular deadline was set by Zeus).
* The Lightning Thief during their stay. This is treated as them getting high.
* The Lightning Thief event afterwards since it is said that Ares "fired" a shot that caused an underground gas line to rupture and blow up several police cars — in reality Ares waving a fireball at the cruisers.
* The Lightning Thief starts out with Percy and Grover sitting on a bus while a bully throws pieces of her peanut butter and ketchup sandwich at them.
* The Lightning Thief unfortunately gravitates towards this level, which was one of the many complaints fans had towards the film. This is partially brought on by the age upgrade in the film. While the book series grows the romance to fit with the age of the characters (from twelve to sixteen), the film has the characters at age sixteen, making the character development moot.
* The light novel's plot is set in motion when Kaguya receives another letter, presumably from the same student.
* The light novels reveal that she eventually does acquire a last name after a number of decades:
* The light novel version of the first season does it again, only this time, it's a picture of Fate carrying the beaten Nanoha as they gaze into each other's eyes.
* The Light of Courage, but decided against it due to the young age of most of the audience.
* The Light of Courage done in a deliberately blocky and polygonal style to imitate the low quality of the fan script they are based on.
* The Light of Courage is rife with this, such as Ganon's terrifying "troupes", "my friends where need a map to Nayru's temple", "by the looks of thing", etc. Naturally, the Dancing Triforce animations retained each and every grammatical screw-up.
* The Light of Courage, Majora's Mask is repeatedly described as a cat-like face.
* The Light of Courage. Most of his role is just to make jokes about the current situation, but when he finds himself face-to-face with Ganon, he somehow manages to steal the Triforce of Power.
* the light of day is fading) A case can be made for Death/Yuuri, or technically Death/Victor/Yuuri.
* The Light of Galador, a sword formerly used by the Spaceknights, now used by the young
* The Light of Other Days and Stephen Baxter, one of the main characters is the son

of an industrialist. Actually, he's a clone of the industrialist, and when he fails to grow up into a suitable heir, plan B is to overwrite his brain pattern with his father's. The attempt is foiled.
* The Light of Other Days, had a device that could see into the past. It proves, among other things, that Moses didn't exist, but was rather a merger of several different historical personages. Jesus did, but he was just a good person who inspired people, rather than a miracle-maker.
* The Light of Other Days revolves around the invention of wormhole technology allowing the viewing of any place or time in the past or present. The book explores how society might change when everyone knows that not only could everyone else spy on them at any time, but so could any number of people in the distant future as well.
* The Light Princess, Althea, the eponymous princess, and her love interest, Prince Digby, both lose their mothers when they are children. Their very opposite reactions to their grief are what cause most of the conflict in the show.
* The Light Princess and Samuel Adamson's musical adaptation for the National Theater in London
* The Light Princess did not cry at her mother's death when she was 6 years old, and hasn't cried since. Her inability to cry (as well as her lightness) gets her labeled as a freak by her father and her kingdom. She eventually does cry, when she is afraid that the man she loves is dying/dead.
* The Light Princess. The fact that Althea is constantly floating in the air complicates matters somewhat, but the dance is accomplished by Digby holding either her hands, her ankles, or the long, trailing ribbons tied to her wrists and waist to keep her from floating away.
* The Light Princess. The only time she is unaffected is in the water, so the kingdom's finest scientists reason that if she can be made to cry, the spell will be undone.
* The Light Princess, the titular princess, Althea, is almost never seen with shoes on. As she's always floating, she has no need for them. When she has been weighted and is on the ground, she puts shoes on. However, as she's seen without shoes on at the end, when she's on the ground of her own volition, it's most likely she is this trope.
* The Light Princess; while Althea is floating, her emotions are too stunted for her to feel real love. It's once she's back on the ground that it's clear how truly in love she is with Digby.
* The light ring on the Amazon Echo and Echo Dot. It glows red if the microphones are turned off, white (in a partial circle, usually) when the volume is adjusted, blue (with a cyan segment indicating the direction of the sound) if it detects a voice command, etc.
* The lightsaber battles from the original trilogy, dubbed "budget kendo" in some circles. The original idea behind the lightsabers was that they were difficult to handle, which limited their choreography to mostly slashes and parries. There were technical limitations involved as well as skill limitations. Every duel in the Original Trilogy involves Darth Vader. In
* The lightsaber style of Soresu is essentially the Turtling variant of this trope, created to defend both against multiple blaster-wielding foes and single opponents. However, it requires both the endurance and the concentration to last until the opponent (finally) shows a weakness in
* The lightsaber, which, while lethally effective, suffers the same drawback that rendered metallic swords obsolete when firearms came along: its maximum effective range is one yard plus the length of your arm. It
* The lights go out at the end of "The Music of the Night" number in
* The Light Side ending as well, but in a more subtle fashion. Instead of being the galaxy-conquering variety of badass, you're the galaxy-
* The Light Side has an enhancement ("Trench Run") that allows the player to attack that card for 10 Damage instead to win the game. Of course if the card doesn't come up early enough in the game there's no use in switching tactics when enough damage has already been dealt to the Dark Side objectives.

* The Light Side path for Sith characters often invoke this as the image the Empire
* the Lightspeed Rangers are the exception to that rule, since they're from the future (though their identities ARE public knowledge in their own time).
* The Lights song "Drive My Soul" begins, "Seems somebody put out the moon..."
* The Lightsworn-archetype Deck uses the first type, as several of the monsters and spell/trap cards discard two to three cards from the top of your deck after activation or at the end of every turn. The recently added Psychic-type monsters normally drain Life Points to use their effects, but there are also a few that give some back.
* The Lightwarden you fight is directly related to what is occurring in the story at that time. For example, when a town rallies together and rises up to beat back the monsters and protect their neighbors, the Lightwarden that you face is Phillia.
* the Light Warriors, either, nor any of their exploits. Including the Light Warriors themselves.
* The Lightwoods and Herondales are related through Edmund Herondale, whose daughter Cecily married Gabriel Lightwood. This means that, before meeting Magnus, Alec has been crushing on a distant cousin (Jace), though
* The Light', you can use The Light to slaughter civilians for all it cares.
* the likelihood that they'll break. The enemy's battle commander turns out to be too cautious to fall for the trick, and Tyrion's irregulars hold the flank anyway. Tywin still wins thanks to his superior numbers, just not decisively.
* The Likely Lads had Bob get caught drunk driving (this was the 1970s when it wasn't seen as such a social sin), the trope was played with in that he managed to bluff his way through talking to the policeman but then when he went to get back in the car he opened the rear door and sat down in the back seat and tried to use the driver's seat as a steering wheel.
* The likely reasons for its canning are the bugs (the first level cannot be completed, for one), general gameplay and design issues, and probably the lack of budget and a rushed schedule which the infamous Maori lawsuit
* The Limelighter's "Generic Uptempo Folksong" is, in fact, about how to construct one of the titular songs.
* The Limey, one of Stamp's early films. It's a recycling of an existing film, rather than filming a sequence specifically for the film that attempts to replicate the era, in order to produce a retraux feel.
* The Limey: When Wilson is inconspicuously attending one of Valentine's parties to scope out the man who killed his daughter, he fantasizes about just shooting him right there and then in full view of everyone.
* The Liminal Exalted's creation also bends the "no resurrection" rule. When their "dark mother" takes note of a suitably obsessed person attempting to raise the dead, she can intervene, giving the body new life. What rises isn't the person — or people — who died, but a new being entirely. The Liminals themselves can resurrect so long as their brain and most of their body is intact (or at least survives).
* The limitation is ship cost. While it was perfectly possible to mount Jump Drives on almost any vessel, the devices require a rare material (never found in inhabited star systems, according to the
* The 'Limited Edition Haulin' Ass And Ammo "Meals Ready To Eat" Snack Pouches' from
* The limited use of this ability is one of many talents that makes the
* The Limited was a popular mall clothing store chain in the 1980s and 1990s, and parent company Limited Brands owned a myriad of sister chains. By 2002, however, it had begun to fall out of favor, and was sold off to another owner before finally closing in 2017. The parent company, since named L Brands, has kept going with its two remaining brands, Victoria's Secret and Bath & Body Works, both of which have surpassed The Limited in popularity. Former Limited subsidiaries that have remained more popular in the long run are Abercrombie & Fitch, Lane Bryant, New York & Company (formerly Lerner New York), Justice (formerly Limited Too), and Express/Express Men (formerly Limited Express and Structure, respectively),

although none of them are still under the same ownership.
* The Lincoln Lawyer for the crime he's accused of even if he's not convicted.
* The Lincoln Lawyer how unusual it is for a man with two ex-wives to be on amicable terms with both of them.
* The Lincoln Lawyer Jameson Fullbright, and Jesus Menendez becomes Jesus Martinez.
* The Lincoln Lawyer, Jesus Menendez had been framed for rape and murder. While he even lived to see himself pardoned once the real culprit had been caught, he caught AIDS while in prison.
* The Lincoln Lawyer: Mickey Haller meets members of the Road Saints motorcycle gang at the "jagged formation" that is Vasquez Rocks. He sees some hikers eating sandwiches on the edge of a precipice and thinks that it's a bad place to have lunch.
* The Lincoln Lawyer: Mickey Haller once pressured a client charged with rape and murder to plead guilty so he'd be sentenced to just 30 years with a chance to obtain a parole after 15 years. That came to bite him hard when he not only learned the client was innocent but he was also defending the actual culprit from an attempted rape charge.
* The Lincoln Lawyer once pressured a client charged with rape and murder to plead guilty so he'd be sentenced to just 30 years with a chance to obtain a parole after 15 years. That came to bite him hard when he not only learned the client was innocent but he was also defending the actual culprit from an attempted rape charge.
* The line about Daleks being unable to climb stairs was trotted out right up until their return in 2005, even though it was implicitly obvious they could in the 1960s and actually shown on screen in the 1980s. In fact, in the Daleks'
* The line about smelling fresh bread was used once, by a dying soldier, when Winchester asked him what dying was like.
* The line about the Destructo Nookie from the following episode (as the Nookie was part of a
* The line also shows up in the prologue, when Jerec has captured Qu Rahn, a Jedi Knight and friend of Kyle's father.
* The Linear Bomb example is ubiquitous in anime, one of the most famous examples is God Warior firing in
* The line as quoted on the top of the page goes "nobody gets left behind or forgotten" in
* The line as scripted was "Now back off". Baker says "Now" (NOT "Just"), then holds an "s" sound, most likely because he was about say "stay back" or something similar, realises as he's saying it that it's wrong, and turns it into "back off" without pausing. The end result is "Now ssssback off". He most likely expected a retake that never happened.
* The line "as the actress said to the bishop", used in British humour to
* The Line) as well as his only role in a children's work, with his other roles on TV shows being one-shot characters. This is likely because Cross mainly acted on stage.
* The line being cursed is a result of Hephaestus. Harmonia wasn't just Ares's daughter, she was Aphrodite's as well, the wife of Hephaestus, and she had given up immortality for Cadmus. After realizing Harmonia was not his, he made a cursed necklace and gave it to her. The necklace became a family heirloom and brought disaster among the descendants. Harmonia herself didn't fare well either, being turned into a snake after an argument with her father.
* The line between 'army' and 'bodyguard' was generally a blurry one in medieval Europe, as most rulers would have household troops: warriors who would live under the king's roof and get reimbursement in the form of wages and food in return for their service as bodyguards in peace and as soldiers in war. Depending on the size of a king's household, all or some of them would serve the role as personal bodyguards on the battlefield.
* The line "Dinner and back to the bathroom" in "Google Translate Makes Dinner". Are they going to the bathroom because
* The line from the first linked comic, "Thank you Bishop, I'd like another pint

of concrete" got elevated to running gag status when it made its glorious return later, when some supervillains got a righteous asskicking. The last of them politely refuses the pint before collapsing, since she is driving.
* The line "Got a letter in the mail / Go to war or go to jail" appears in
* The line "Henry! Héééééén-RY!" and the answer "Coming, mother!" referenced
* The line "I need a vacation" wasn't part of the dialogue in the script for
* The line in episode "Once More With Feeling" is, "Hey, I've died twice" — Buffy
* The line 'I saw Goody Proctor with the devil' is normally used to reference the scene at the end of Act One of "
* The line is insufferably long or service slow, often to such a degree that people grow beards, raise families etc.;
* The Line Is Not Broken, his mother Tsunade poured her alcohol on the dirt in remembrance.
* The line is "The Secretary will deny all knowledge of your actions", implying they answer directly to someone at the cabinet level.
* The line is translated in the German dub as "Wir schicken dich zur strafe nach Zürich!"
* The line "Monkeys is the cwaziest peoples" is heard in a lot of animated cartoons, but actually came from film comedian Lew Lehr's catch phrase.
* The line "No, this is Patrick" goes from a joke about Patrick's ditziness to a terrifying statement.
* The Line of Polity" is surrounded by asteroids that are mined and their ores smelted using a series of mirrors orbiting the star that can focus its light onto a single point. Guess what happens when the hero gets the big bad to chase him into this place.
* The line-of-scrimmage and line-to-gain lines during American football games.
* The line "Rectum? Damn near kill 'im!" is the end to a quite well-known joke. It's also the story of how Hinjo in
* The liner notes to one manga volume acknowledge that Rei Hiroe basically went with
* The lines between esper abilities and magic are further broken down when it turns out that that the training programme for unlocking esper potential was invented by a mage, based on a ritual intended to give the user traits of angels (and that the so-far theoretical
* The lines make a lot more sense if you know that in Shakespearean English, they would sound something like this:
* The line "So round! So firm! So fully packed! So free and easy on the draw!" was a slogan from radio ads for Lucky Strike cigarettes back in the '40's, but it then got picked up by radio personalities and
* The line spouted by the Scarecrow when he received the Th.D. degree, which was a hashed up version of the Pythagorean Theorem:
* The line still subverts it, though. While the forces who've fallen to the Wyrm need killing yesterday, it's made clear the Garou have had times where they haven't been able to tell the difference between "fallen to the Wyrm," "Wyrm-tainted," and "smells of the Wyrm." And yes, there are differences there. As a result, their tactics have resulted in
* The line "Stop, stop! He's already dead!" is sometimes mistakenly attributed to Ralph. In the actual scene (from "Homie the Clown"), it's delivered by an unnamed kid in the audience who is utterly horrified at Homer (as Krusty) attacking the Krusty Burglar.
* The line that shows up when encountering a wild Pokémon is "A wild [species name] appeared!" (or "Wild [species name] appeared!" in the first three generations), not "A wild [species name]
* The line "two trailer park girls go 'round the outside" from "Without Me" is adapted from the line "two Buffalo Gals go 'round the outside" from "Buffalo Gals" by Malcolm McLaren, who was best known as
* The line was so memorable, it actually survived the original company's demise.

Life Alert is actually the
* The line "We deserve each other" in "Dancing Through Life" is a leftover reference to its precursor, "Which Way is the Party?".
* The line "You have died of dysentery" never literally appears in the original version of
* The line "you're gonna have a bad time" was a preexisting meme from
* The Lingerie Football League, a women's American football league where the players wear lingerie. Subverted in its renamings to the Legends Football League and later the X League.
* The Linguini Incident. He needs someone to marry him so he can get a Green Card.
* The linguist protagonist of Ted Chiang's "Story of Your Life", studying an alien language, gets a clue from the writing system that is large pictures: the structure isn't linear, the whole structure is simultaneous. Learning it properly means reorienting your own psychology in such a way that you experience your entire life at once. Interestingly, their spoken language is far simpler but doesn't provide nearly as much insight into their worldview. The short story has been adapted into a film called
* The Links are described as having pure hearts. Combined with the Triforce of Courage, it's why only he/they can wield the
* The Links are not necessarily blood-related but are said to share the "Spirit of the Hero" and are at least a spiritual lineage of heroes. Only the Links from
* The Lin Kuei seem to be this; they ally with Shao Kahn and the prominent Lin Kuei we see are from various backgrounds, such as Sektor (Chinese), Cyrax (Botswanan), Bi-Han (original Sub-Zero/Noob Saibot) and Kwai Liang (second Sub-Zero) (both Chinese-American), and Smoke (Czech).
* The Linux kernel, named after its creator Linus Torvalds (combined with the obligatory
* The Lion, a machine specially built to hard-shutdown Europa's most powerful (
* The Lion and Lamb Project, an organization active from 1997 to circa 2011, was this towards children's toys. The main problem with their crusade against immoral toys was their massive lack of research involved in their tirades — the group constantly claimed that various toys were marketed at children simply because of the "Ages 3 and Up" approval rating on all toys (which is the result of a safety test, not a demographic statement). They went straight into
* The Lion and the Bride is about a high school student who falls in love with and marries her teacher after her last remaining family dies.
* The Lion and the Rose", at King Joffrey's wedding reception, Oberyn Martell and his lover Ellaria Sand pause to enjoy the sight of a very supple contortionist performer. And later, he and Loras exchange a smoldering gaze which can only be interpreted as, "I want to eat you for dessert tonight."
* The Lion and the Rose, during the feast of the royal wedding, bride and new queen Margaery feeds Joffrey with a piece of their wedding pie.
* The lion cub that Elphaba and Fiyero saved grew up to become the Cowardly Lion.
* The Lion Fey are Fair Folk with the Assumption of Bestial Visage Charm who've decided to take leonine form.
* The Lion Guard, although it makes governing the area very difficult, because citizens not being where they're supposed to be can be a matter of life and death. Making sure nobody cheats the system is an exhausting job that requires five animals working full-time.
* The Lion Guard and killed the other members of the Guard, without explaining why he was not exiled for this. Admittedly, the great kings of the past took away his powers, but this is the lion equivalent of confiscating his weapons to a serial killer.
* The Lion Guard and meets Bunga, the okapi says he didn't believe honey badgers really existed, because their smell and looks sounded outlandish.
* The Lion Guard, as Kiara, Kovu and Vitani were shown as cubs. However, the final season takes place after the end of The Lion King II as Kiara, Kovu and Vitani were shown as adults.
* The Lion Guard: Bunga doesn't seem too bothered by the fact that he has never met

his biological parents.
* The Lion Guard character Bunga, known for extreme bravery and and not being bothered by anything, is a Honey Badger. The creators even admit that the character was partially influenced by the "honey badger don't care" meme.
* The Lion Guard episode, and even the previews rarely include Fuli. It's unknown how merchandise will represent the female characters.
* The Lion Guard episode "Can't Wait to be Queen," Simba has to give a tribute to his deceased elephant friend in Elephantese, which he has trouble speaking. When he attempts to say that his friend was a good elephant, he instead says "He had poop on him" by accident. Thankfully, he doesn't get into trouble as the elephants simply laugh, note that the deceased did frequently have poop on him, and thank Simba for lightening the mood.
* The Lion Guard has a good hyena in the first episode. She is a subversion, though, because according to her most hyenas are good like her. Apparently, all the evil ones seen so far in the franchise are the ones that are behaving abnormally for their species.
* The Lion Guard has Bunga, a preteen Honey Badger who has a crush on Dhahabu, an adult Golden Zebra.
* The Lion Guard has Kion and his friends relinquish their duties as the Lion Guard to Vitani and her Lion Guard, before leaving permanently for the Tree of Life to be part of the Night Pride.
* The Lion Guard has to be brought in for the task because Lowe presumably can't sing.
* The Lion Guard. He was bestowed with the Roar of the Elders, which is given to the second-born cub, as the first is destined to be the king, while the 2nd is tasked with leading the Lion Guard, a group dedicated to preserving the kingdom and defending the Circle of Life. As its leader, the second-born cub is expected to be the fiercest of the group and is thus gifted with the Roar of the Elders by the Great Kings of the Past. Kion knows that Scar, Simba's grand-uncle, was bestowed with the Roar when Mufasa was heir, but used it for evil purposes, causing the Great Kings to strip Scar of the roar. Therefore, Kion's greatest fear is to become similar to Scar, and it is this reason that forces him to regulate his use of the Roar.
* The Lion Guard: In the episode "The Trail to Udugu", while taking charge of the Lion Guard for the day, Simba gets his tail crushed by a large boulder. Cats' tails are usually sensitive, but Simba casually treats it with mild annoyance, saying that he's fine other than his tail being crushed.
* The Lion Guard: In "The Trail to Udugu", Kion has Kiara climb onto his shoulders so she could reach a high ledge.
* The Lion Guard is about a lion cub and his group of similarly aged friends protecting the Pridelands. Kion is gifted with the Roar Of The Elders at least. They become teenagers in the final season.
* The Lion Guard. It also features their daughter from the second film, Kiara.
* The Lion Guard. Kion later says that it doesn't matter that his friends aren't lions; what matters is that they protect the Pridelands together.
* The Lion Guard: "Of the Same Pride" by Kion and Rani as they bond with each other.
* The Lion Guard on his tail. As a result he becomes deathly ill. Kion and his friends go on a quest to find the cure.
* The Lion Guard: Return of the Roar as Janja sings about his plan to disrupt order in the Pridelands.
* The Lion Guard's first episode, Bunga the Honey Badger playfully tickles Kion, (the titular Lion Guard) while they are rough-housing.
* The Lion Guard. She even explains that most hyenas besides her are good.
* The Lion Guard's second act, explaining where Kion and the Guard were during that time (they were looking for the Tree of Life).
* The Lion Guard. There were romantic feelings involved, but the two hadn't known each other for very long and weren't even in a relationship before she proposed. Her reasoning basically went "I know we're just teenagers, but I really don't want

to shoulder the burden of ruling on my own, and if we end up falling in love, that's fine too."
* The Lion Guard: The show teaches life issues and features a lot of Swahili, also teaching zoology facts.
* The Lion Guard. The villain of the episode "Ono and the Egg" is an African harrier-hawk named Mpishi who invades the Pride Lands (where hawks or harrier-hawks are not allowed in as they do not have a territory there) searching for rare prey to carry off and eat, with said prey being small animals such as hyraxes and hares. Near the end of the episode, she carries off the newborn chick of Kulinda the hamerkop making it a literal kidnapping, but she gets stopped by the combined might of Ono and Kulinda.
* The Lion Guard, when Simba tells his son Kion they need to talk, Kion assumes he wants to give him a different talk:
* The Lionhearts. He's a very good guitarist, but he's got a terrible singing voice.
* The Lionhearts is this, as she's a former circus lion and rather skilled on the trapeze.
* The Lion in Winter and Chuma Hunter-Gault were cast as (British) King Henry II and his son Richard Lionheart, respectively. The actors who played Henry's two other sons and his wife were white.
* The Lion in Winter, and ends up looking rather thick by comparison (and resenting it a lot).
* The Lion in Winter and Philip II of France are depicted as having had an affair two years before the action, when Richard was 24 and Philip was 15. Philip tells Richard that he is no longer "the boy you taught to hunt... you running first, me scrambling after."
* The Lion in Winter: Eleanor responds to the classic "When pigs fly" remark with "There'll be pork in the treetops come morning."
* The Lion in Winter from the point of view of her husband Henry II and at least some of their sons.
* The Lion in Winter has this trope in spades as Prince Richard, Prince Geoffrey and Prince John all angle to become the heir to their father's throne.
* The Lion in Winter Henry's mistress. Each plot against most or all of the others, over the course of the story. Lampshaded by Eleanor: "All families have their little ups and downs."
* The Lion in Winter, he then plans to annul his marriage to Eleanor, make Alais queen, and have sons by her instead.
* The Lion in Winter, Richard is Henry's Unfavorite. John is Eleanor's Unfavorite. Geoffrey, poor guy, is the Unfavorite to both.
* The Lion in Winter the marital rift / civil war between Henry II and his wife Eleanor of Aquitaine exists partly because the aged Henry took Alais as his mistress. Alais is a Princess of France, whom Eleanor had taken into her household as a ward when the girl was 8, with the plan to marry her to one of her sons (the future Richard I) when she was old enough. Alais is a young woman by the point the movie takes place, and Henry probably wouldn't actually have been involved much in her raising, but still. Bonus points for the fact that Alais is actually Eleanor's ex-husband's daughter by his second wife, which causes political problems, because they can't just simply reneg on the original engagement promise and keep her around as Henry's mistress. (Eleanor's problem with it seems to be part jealousy - she and Henry had been a rare royal love match a few decades earlier, so she took the mistress thing harder than most queens would have - and part a sense of being betrayed by her foster daughter.)
* The Lion in Winter you die, you only get to choose the manner you face it with, then yes, the manner is the only thing that matters.
* The Lion King (1994). After he pushes her off he glares at her, then tries pouncing her again while she's distracted out of spite. They roll down a hill together with Simba struggling to stay on top, only for Nala to pin him once again and smuggly rub it in his face, with him just glaring up at her.
* The Lion King (1994). After Nala pins Simba for the first time, Simba tries to

get back at her by pouncing on her while she has her back turned on him. He ends up accidentally sending them both rolling down a nearby hill, and Nala still ends up pinning him anyway, now even more smug about it than the first time.
* The Lion King (1994), after Scar takes over the savanna, suddenly turns from drier-than-a-bone to thunderstorm — to set up the final fight between Scar and Simba while the whole place is on fire.
* The Lion King (1994) and he is able to turn the tables on Scar, forcing him to admit that he alone plotted and executed Mufasa's murder, thereby clearing his name.
* The Lion King (1994) Any character in the background or out in the distance will be drawn without eyes.
* The Lion King (1994) as a featured movie for their Sky Kids library, usually when there's only one new kid's movie release to show.
* The Lion King (1994) as he prepares to murder Simba. When he fails, he is left to answer to his hungry hyena minions, who he previously attempted to throw under the bus for his crimes.
* The Lion King (1994), as it's how the film started and continues the theme of the Circle of Life, but it also sets up a new character for the following film.
* The Lion King (1994) as they are designed realistically. This is in contrast to the cast of characters, which are more cartoonish.
* The Lion King (1994) at one point. As a cub Simba runs from the pride lands, hyenas on his tail, he squeezes through a tiny passageway. One of the hyenas swipes its claws where he vanished just moments before.
* The Lion King (1994) authoritatively explains that stars are really fireflies stuck on "that big bluish-black thing."
* The Lion King (1994) before the crew realized that lions don't actually live in the jungle.
* The Lion King (1994), begs Simba for mercy, calls himself family, and promises to do anything to make it up to him (run away), only to fling hot ashes in his face before fighting viciously. It fails just as badly since Simba manages to throw Scar off the edge and leave him to face the hyenas, whom he had just made the fatal mistake of betraying.
* The Lion King (1994) "Be Prepared", which references Nazi party rallies.
* The Lion King (1994). Bonus points for one of them getting bumped off the edge of a cliff into brambles as a result.
* The Lion King (1994) but after that it became clear that it would be a massive success.
* The Lion King (1994) by the end of the movie and keeps it throughout the franchise.
* The Lion King (1994) centers around Simba growing up prior to becoming a full grown lion.
* The Lion King (1994) don't think the other sex is "icky" but as cubs, they don't seem to like the idea of them being mates due to this.
* The Lion King (1994) during the elephant graveyard scene, all background bones are dark grey but animated bones are a light cream color.
* The Lion King (1994), during the song "I Just Can't Wait to be King", the giraffes are throwing Simba and Nala, Simba's stomach fills up the screen at one point. It is done again in the scene where Scar drops Mufasa into the stampede of wildebeests.
* The Lion King (1994). Ed in particular angers Banzai with his laughter at one point, prompting Banzai to attack him when he doesn't stop.
* The Lion King (1994). Even his own hyena lackeys grudgingly think Mufasa was a better king than Scar.
* The Lion King (1994) features the battle of Pride Rock, with Scar and his Hyenas fighting a pitched battle against Simba and his allies.
* The Lion King (1994): For the Blu-ray release, the animators made a short blooper reel. Most memorably, the "Rafiki drops infant Simba" gag, already overdone in various parodies, was officially done. Many of the outtakes were designed around voice acting errors. The original character animators even got to reanimate their

scenes.
* The Lion King (1994). For the first two-thirds of the film he's seen mostly sticking to himself with the occasional chuckle and saying of Simba's name. In the penultimate act, upon realizing Simba is alive, he finds him to deliver the lesson that just running away from his past and his problems may help at avoiding pain, but only by returning and confronting them can he actually move past it.
* The Lion King (1994) give one to an adult Simba, who has been running away from his responsibilities.
* The Lion King (1994) has been called "Bambi in Africa" due to its similar structure (the first half being the protagonist's childhood and how he loses a parent, the second being about his adulthood).
* The Lion King (1994) has Simba and Nala become this during the final battle when they kill several of Scar's hyenas by shoving several of them off the ledge of Pride Rock
* The Lion King (1994) has Simba wake up Mufasa by repeatedly saying "Dad!" over and over.
* The Lion King (1994) he has responsibilities that he takes care of. He teaches Simba that "there's more to being king than getting your way all the time". Indeed, after Scar murders Mufasa and usurps the throne, the Pridelands become a wasteland thanks to Scar's selfish negligence. Simba eventually becomes a good king by deciding to leave his exile to reclaim the throne from Scar.
* The Lion King (1994) in Act Two, and is defeated again as Groundshaker.
* The Lion King (1994) in the same way some drug addicts use drugs to solve their problems.
* The Lion King (1994) is an evil lion with reddish-orange fur and a black mane.
* The Lion King (1994), it begins and ends with Timon and Pumbaa, Simba's best friends, lamenting the fact that they will lose him if he goes back to the Pridelands.
* The Lion King (1994) joining them in their insect-eating genuinely does rate as bizarre for a lion.
* The Lion King (1994)) killed in order to take over the Pride Lands, then gorge himself at the expense of both the pride and the hyena clan, without even a shred of remorse.
* The Lion King (1994) likewise, as they were always depicted as ravenously hungry.
* The Lion King (1994): Mess with his family, his friends, or his homeland, and you'll get a lot of attention from Simba that you won't like.
* The Lion King (1994), Mufasa is giving Simba advice on pouncing. Mufasa had already asked Zazu to turn around. When Zazu gets suspicious, he asks:
* The Lion King (1994): Mufasa to his son Simba, who he teaches to succeed him as king.
* The Lion King (1994) musical number plays this trope straight though.
* The Lion King (1994), Nala attempts to explain matters to Timon and Pumbaa:
* The Lion King (1994). Only the 2004 DVD release uses Ferraro and Montanari's dialogue, while Accolla and Brancucci's voices are heard on all other releases.
* The Lion King (1994) plays this twice. The first time, Mufasa is thrown into the chasm by Scar. The second time, Simba jumps and attacks Scar.
* The Lion King (1994): Pumbaa vs. the hyenas in the Battle of Pride Rock.
* The Lion King (1994): Rafiki ends the film kicking some serious hyena butt.
* The Lion King (1994) - Rafiki holding the baby Simba up into the air as the sun hits Pride Rock.
* The Lion King (1994): Scar implores Simba not to visit the elephant graveyard and tells him that only the bravest of lions dare to go there, knowing full well that Simba's ego and curiosity will get the better of him.
* The Lion King (1994) Scar to get him to admit the truth to everyone else.
* The Lion King (1994): Scar wants Zazu to sing him something happy sounding instead of the downtrodden depressing songs he's been singing him.
* The Lion King (1994) Simba and Nala into having twins but the male was eventually scrapped.
* The Lion King (1994): Simba has Timon and Pumbaa excused so he could be alone

with Nala.
* The Lion King (1994), Simba is reminded by the ghost of his late father that "you are more than what you have become."
* The Lion King (1994): Simba says a line that comes close enough to this to Scar: "You don't deserve to live."
* The Lion King (1994), Simba spends most of the movie believing that he killed his father mostly due to his Uncle's manipulations and tries to hide from the rest of the pride in shame.
* The Lion King (1994): Simba very briefly, when Scar accuses him of being responsible for Mufasa's death, until he forces Scar to admit the truth to the rest of the pride.
* The Lion King (1994) that carries on well into adulthood, avoiding his past and his responsibilities as the future king. Only after Rafiki gives him a rather creative lesson on facing his past does he decide to grow up and go back to reclaim his rightful throne.
* The Lion King (1994): The camera pans upward just in time for the audience to miss seeing the villain, Scar, get ripped apart by hyenas, only seeing part of it in shadow.
* The Lion King (1994): The frenetic and bellicose meerkat Timon is paired with genial but dim warthog Pumbaa. Timon leads the pair on the theory that smarter equals louder. Never better demonstrated than the scene where Simba introduces Nala to them.
* The Lion King (1994). The German dub of that scene is rather unnerving because of the Nazi parallels.
* The Lion King (1994), the hyenas comment on Simba being a king fit for a meal.
* The Lion King (1994): The hyenas put Zazu into "the birdie boiler", which rockets him, apparently, straight to Mufasa.
* The Lion King (1994): The hyena theme sounds like a carnival of horrors that goes berserk after some time, fitting for such a group of deranged and clownish characters.
* The Lion King (1994). The menacing laugh he DOES let out before the hyenas gang up on Scar only seals the deal.
* The Lion King (1994): There is Mufasa. He dies after saving his son from the wildebeest stampede and has an ascension of sorts by joining the past kings in the sky.
* The Lion King (1994): This happens between Simba and Nala, when Simba refuses to return to Pride Rock at first. However, when he does go back, Nala joins him along with Timon, Pumbaa and Rafiki to help defeat Scar.
* The Lion King (1994); though Mufasa's voice is deeper, Scar's voice is much deeper than the main hero (and tenor), Simba.
* The Lion King (1994): Timon the meerkat and Pumbaa the warthog are inseparable, contrast each other visually and personality-wise, and act as comic relief in an otherwise fairly serious story. They generally provide funny comments, such as singing about how they are aghast that Simba and Nala have reunited in "Can You Feel the Love Tonight".
* The Lion King (1994) to match, suggesting some sort of intellectual disability.
* The Lion King (1994), to some. When they find each other as adults they goof around for a little bit and fall in love within a night.
* The Lion King (1994) uncle Scar. In Mufasa's case, he always put up with Scar's constant envy and discontent, but he just never expected his brother to be really evil enough to betray him. By the time Mufasa realizes who Scar truly is, it's too late for him as Scar tosses him to his demise.
* The Lion King (1994) version changes it so that the hyenas join Scar after their first encounter with Mufasa in the Elephant Graveyard, with Scar winning them over by promising stuff to them. The problem with this change is that it makes no sense for the hyenas to trust Scar and Scar's promises are completely empty at that point. If anything, they would have every reason to flat-out reject his offer and/or try to kill him; in the original version, Scar is implied to have won them over by building up his plan over time and giving them small rewards that acted as

a way of showing he was serious about holding up his end of the deal, rather than it being a suddenly thrown together plot as the new film seems to indicate. It also makes Scar telling Simba to go to the Elephant's Graveyard make no sense — since the hyenas aren't on his side now, there was no way he could tell anything would happen to Simba, making it look stupid on his part.
* The Lion King (1994) version used this idea for the scene, having Scar make Simba think his roar was the cause of the stampede and pinning the blame on him. The issue with this change is that Scar had no way of knowing that Simba would survive the stampede. Plus the entire idea of it being Scar's plan all along in the original film was a misinterpretation of the scene, as it was clear that Scar meant for Simba to die. If Simba had died, then what good would it do to have him think it was his fault that his father died, since Simba would be dead shortly after anyway?
* The Lion King (1994), were asked to record together as hyenas. The directors laughed at their performance and decided to cast them as Timon and Pumbaa.
* The Lion King (1994): When Banzai grumbles about Mufasa, earning an enraged "What did you say?!" from Scar, he nervously replies "I said, uh...que pasa?". Since "mostaza", "mustard" in Spanish, rhymes with "Mufasa", the Mexican dub renders it as "I said, uh... with mustard!". Which is funny, because they could have just continued to use "¿que pasa?" since it was already in Spanish.
* The Lion King (1994), when the Hyenas are cowering before Mufasa, Shenzi and Ed are momentarily seen doing this just before they and Banzai run off scared.
* The Lion King (1994) when the original plan fails, when it comes to actually ruling a kingdom he lets the place fall apart by not even trying. In part, this is due to him coveting the title of king mainly for power and privilege - when he discovers that it requires actual work on his part, he has less than zero interest in doing anything other than sulking in his cave.
* The Lion King (1994), when the three hyenas tumble down a slope while chasing young Simba, Ed who's coming down last pushes Banzai in a large thorn bush.
* The Lion King (1994) when they raise the orphaned lion cub Simba. While Pumbaa feels sorry for the poor cub, Timon initially refuses to adopt him due to his fear of the young predator, and changes his mind only when he realizes Simba can defend them from other predators. Which he does when Pumbaa is attacked by the hungry lioness Nala.
* The Lion King (1994): When Timon and Pumbaa meet Simba, Pumbaa asks "What's eatin' ya?" Before Simba can answer, Timon chimes in with "Nothing, he's at the top of the food chain!" He laughs pretty hard at his own joke until he realizes no one's laughing with him.
* The Lion King (1994), which grows even stronger when he learns that Scar killed Mufasa. It's telling that not once does adult Simba address Scar as "Uncle", showing that he no longer sees Scar as family.
* The Lion King (1994): While stargazing with Timon and Pumbaa, Simba tells him that he was told that the great kings of the past are watching over them from the stars. This makes Timon and Pumbaa laugh, asking what "mook" made that up. Simba (who had indirectly mentioned his dead father Mufasa) feels sad and leaves, which leaves Timon to ask a little guiltily, "Was it something I said?"
* The Lion King (1994), with a loud scream and pink and white circles forming in its eyes.
* The Lion King (1994) within the fandom. There are also many, mostly European-only, comics that introduce several original characters.
* The Lion King (1994): Younger people have the wrong impression that the song "The Lion Sleeps Tonight" originated from this movie. Nope: It is almost half a century older!
* The Lion King (1994): Zazu is captured by the hyenas and shoved into a geyser dubbed "the birdie boiler" during our heroes' first encounter with them, launching him through the air like a rocket. "No! Not the birdie boiler!"
* The Lion King 1½ after Simba heads back to Pride Rock to reclaims his throne and Timon initially refuses to back him up. He debates with himself whether to do so and comes upon Rafiki once more who looks to offer him some advice. Timon

pretty much cuts him off before he does so and comes to the conclusion he does want to help his friend before running off. Rafiki takes it in stride and just states "My work here is done."
* The Lion King 1½, and it's his responsibility to fix everything by attacking Scar head-on.
* The Lion King 1½: Banzai mutters this in response to Timon and Pumbaa juggling and break-dancing while trying to buy time.
* The Lion King 1½ establishes that they had met before, on the night before Simba's birth, and he mentions him as "the monkey" several times throughout the film up until the exact point where Simba leaves.
* The Lion King 1½ has a quick scene with Timon tickling Simba on his belly right before them and Pumbaa are about to go to sleep.
* The Lion King 1½ has Timon and Pumbaa watching the original movie as this.
* The Lion King 1½ has Timon's mom showing Timon the savanna at sunset, explaining how "everything the light touches" (hinting at the "... is our kingdom" line from the original), cue Timon's mother ending with: "... belongs to someone else!", and then the needle scratch.
* The Lion King 1½). However, the production claimed they did not necessarily think of the film as being canon, but more like a parody. The fact Timon and Pumbaa are watching it at a private screening in a cinema talks for itself.
* The Lion King 1½ is partially a prequel, as it tells a bit of backstory about Timon and Pumbaa, as well as how they met.
* The Lion King 1½: It looks like Timon has sacrificed himself, and his mom is in hysterics. Then he climbs out of the pit he made and says "Mom, it's OK." She grabs him and shakes him and says a few things about it not being OK before she realizes that it's Timon.
* The Lion King 1½, it's shown that during the "I Just Can't Wait To Be King" scene, Timon and Pumbaa were sleeping in their new home. Timon then grabbed a twig to get them to keep it down, eventually using it to inadvertently knocking over the animal tower at the end of the song.
* The Lion King 1½ reveals that Timon has one. Her situation is a bit understandable since she's raised Timon all by herself (with the help of her brother/brother-in-law, Max) and she's tried her best to help him feel like he belongs.
* The Lion King 1½ show up uninvited at the theater to re-watch the whole movie with Timon and his friends and family.
* The Lion King 1½ takes this further, revealing that they actually tried to sabotage the budding romance, but being Timon and Pumbaa, everything they did just backfired.
* The Lion King 1½, Timon and Pumbaa are walking through a ravine, when they see a wildebeest stampede approaching. They give each other a quick glance.
* The Lion King 1½: Timon and Pumbaa defeat the hyenas by luring them all into a large pit they dug while Simba is still fighting Scar.
* The Lion King 1½, Timon is trying to think of a place he should travel to for his new home, while dramatic music gets louder and louder until Timon yells, "It's kind of hard to think with all this music!" and then it stops, allowing him to decide to go to Pride Rock.
* The Lion King 1½. Timon is unhappy with his life, and Rafiki tells him to seek Hakuna Matata, and to go beyond what he sees, prompting Timon to go on a journey to find a place where he'll be happy. The problem comes when Rafiki is talking Timon's mother later.
* The Lion King 1½, Timon tries to fit in with the other meerkats at first, but eventually his aspirations (and distaste for their humble lifestyle) motivate him to leave the colony. But this means that- years later- he is in exactly the place he needs to be to save Prince Simba's life after the latter has been exiled. In this case, the 'letter' of Pridelands hierarchy had to be defied to preserve its spirit.
* The Lion King 1½ to aim his foul morning breath in a different direction

after he yawns in his face.
* The Lion King 1½ TV series, since it featured a completely different version of Timon and Pumbaa's youth than featured in the movie. Also, the version of Timon's mom that appears in one episode looks very different from the version seen in the movie.
* The Lion King 1½, when a stampede heads towards Timon and Pumbaa in the canyon:
* The Lion King 1½, when Timon and Pumbaa meet for the first time.
* The Lion King 1½: While giving Timon the low-down on the basics of sentry duty, Uncle Max goes into a rant about the dangers that surround them. Cue Timon resorting to this trope, only for Max to stop him.
* The Lion King (2019) adaptation, Scar is attracted to Mufasa's wife Sarabi and, after Mufasa's death, he tries to force her to be his queen.
* The Lion King (2019). As a result, Mufasa’s voice sounds noticeably weaker and older due to Jones’s aging. Jon Favreau explained that the change in Jones’s voice helps illustrate the feeling that Mufasa has been a successful king for a very long time.
* The Lion King (2019), differing only in the use of photorealistic CG and a new recording of the song. While the rest of the movie isn't quite that slavish, it still follows all the plot beats of the original with little deviation, and uses many of the same lines of dialogue.
* The Lion King (2019) has Simba being mistrusted by many of the other animals in Timon and Pumbaa's jungle due to being a lion and them being prey. It doesn't entirely go away, but the jungle animals do start getting used to Simba when he adapts to a diet of grubs.
* The Lion King (2019) is an odd case: it's entirely CGI, but the animals look photo-realistic, giving the impression of a live-action movie.
* The Lion King (2019) is interpreted this way in the movie. There is no "circle of life" or anything beyond the here and now, only a "line of meaningless indifference". Nothing really matters beyond living comfortably and choosing your own happiness over any meaningful purpose. Timon and Pumbaa abandon this attitude when they follow Simba to save the Pride Lands.
* The Lion King (2019) is somewhat infamous for putting a greater emphasis on realism than character expressiveness. The animal models can barely emote any stronger than "mouth open/closed". It's particularly noticeable (and silly) in scenes that are intended to be dramatic and moving, like Mufasa's death.
* The Lion King (2019) is treated as a live-action remake by Disney and referred to as such in its promotional materials, despite being every bit as animated as the original feature (to the point TV Tropes itself files it under the Western Animation namespace). Real animals can't exactly talk, after all. The idea seems to be that the photorealistic CG of the remake is somehow easier to take seriously than the traditional animation of the original film, despite the 1994 movie being renowned as one of Disney's most emotionally complex stories.
* The Lion King (2019), made by the same director, which at least had a human) and padded to two hours.
* The Lion King (2019), realizes he's been exposed and the final battle begins.
* The Lion King (2019), Scar does this to Sarabi and the other lionesses when she refuses to marry him. He declares that until she gives in, the hyenas will eat first, knowing that the greedy hyenas will leave barely anything for the lionesses.
* The Lion King (2019), Simba accidentally scares a topi antelope while pouncing on a butterfly. The topi sees that it's Simba and is relieved that it's him and not "a real lion". He realizes his mistake and tries to fix it, but all he can muster in the end is "Yeah, I gotta go" before leaving.
* The Lion King (2019) too, even though Mufasa can clearly be seen in that version: Does Simba's reflection in the water really turn into Mufasa's image, or does he just see his own resemblance to his father, and does Mufasa's spirit really appear in the clouds, or is Simba just imagining his father speaking the words of his own conscience?
* The Lion King (2019) was released one week early in China to avoid "the

blackout," an annual month-long period in which only Chinese films are allowed to be released to promote Chinese cinema.
* The Lion King (2019) were common on YouTube at one point, and almost every 3rd video started with one of it's ads.
* The Lion King (2019): When discussing how to distract the hyena guards, Puumba enthusiastically agrees with Simba's idea of using live bait, only wondering why everyone's looking at him.
* The Lion King (2019), where an actor\singer and a singer were Simba and Nala, and the consensus is that while they sung well, their speaking parts were the lowlight of an already contentious dub.
* The Lion King 2: Simba's Pride, reacts to the concept of doing something just for fun as though it were alien to him.
* The Lion King 2: Simba's Pride, with a mother fanatically devoted to Scar and no other father in sight. The aforementioned realization seems to have been made late during production, as certain dubs claim he's Scar's son anyway. (Not that it matters, since there being only two male lions around in Simba's pride, as with real lions, either Mufasa or Scar is Nala's father. And seeing Simba's reaction to Kovu, Scar's "son", Simba and Nala are either siblings or half-siblings. Whoops!)
* The Lion King Adventures. After being dissatisfied with them all, he decides to create his own villain instead.
* The Lion King Adventures, and Simba marks his ability to defeat him as one of his greatest achievements.
* The Lion King Adventures are quite proficient at the art of evil laughter.
* The Lion King Adventures follows this format, featuring an absolute plethora of villains, monsters and aliens.
* The Lion King Adventures, he's willing to abandon Simba and Nala in order to save himself from Scar and Hago.
* The Lion King Adventures is one, complete with a cobra-headed staff and deep, rich voice.
* The Lion King Adventures. Naturally, they wish to enslave the earth.
* The Lion King Adventures of ThatPersonYouMightKnow's dark side. He created the entire universe and all the characters in it, as a means of having his own world in which to create chaos and destruction.
* The Lion King Adventures. She does a few good things, but mainly for her own needs.
* The Lion King Adventures. She is kind, beautiful, and holds the trio together.
* The Lion King Adventures. She knows how to kick butt, being one of the strongest lionesses in the pride.
* The Lion King Adventures, Tara's guts explode all over Simba, Nala, and Haiba. Their reactions are priceless.
* The Lion King Adventures that bad animals get when they die is this. Even the villains are afraid of it.
* The Lion King Adventures, ThatPersonYouMightKnow, has confirmed many things on the fan forum that pertain to the series. Here are some notable examples:
* The Lion King Adventures, the evil wizard Hago serves as one to Simba.
* The Lion King Adventures, the heroes are blocked from entering the Pride Lands by an invisible force field.
* The Lion King Adventures, the immortal villain Shocker is buried alive by the Interceptor. This leaves him in a state of permanent death and resurrection.
* The Lion King Adventures, the Royal Reaper breaks this to Simba in quite a chilling way.
* The Lion King Adventures. This is actually justified, however, as Mtumwa wasn't present when it happened, and only heard about it after it was distorted by word of mouth retellings.
* The Lion King Adventures, this is definitely the case for Shocker. Unless it's in boiling lava, and even then he comes back.
* The Lion King Adventures to fool everyone. This made the last few stories as surprising as possible.
* The Lion King Adventures, two overly curious cubs called Tuhuma and Mjanja end up

being murdered by Shocker when they decide to investigate the resting place of his body.
* The Lion King Adventures, when Nala tells Timon and Pumbaa that they are evil, Timon replys "Who cares? Evil makes the world go round".
* The Lion King (albeit mostly off-screen and without graphic detail).
* The Lion King also has the hyenas' puns when threatening to eat Simba.
* The Lion King also love taking potshots at "It's A Small World" in general.
* The Lion King, although not without soft-spoken moments. Zira in the sequel, too.
* The Lion King and he gets eaten alive by them after they find out how little he thought of betraying them.
* The Lion King appears, there is a brief dedication to Walt Disney Company president Frank Wells, who died in a helicopter crash about two months before the film's release. However, later versions of the film (like the 2003 Platinum Edition, the 2011 Diamond Edition and the 2017 Signature Edition) have the dedication at the end of the credits.
* The Lion King, as for most non-human species the aging from childhood to adulthood is a matter of a mere year or two. Lions reach sexual maturity between 3-4 years old and live to about 16, while meerkats reach maturity at 1 and live on average to 6-10.
* The Lion King. Audiences in China and Europe still made it a billion dollar behemoth.
* The Lion King, a variation occurs during the "Jeep tour" mode of Timon and Pumbaa's Virtual Safari. The player is given the option of choosing between two drive-thrus. At the one on the left, Timon and Pumbaa order a variety of insect-based delicacies; the menu for the one on the right is — not quite so appetizing:
* The Lion King: Banzai jumps about 30 feet into the air after he is knocked into a bramble thicket by Shenzi and Ed.
* The Lion King book canon, hyenas are evil, except for one individual named Asante. She is portrayed as nice, smart, and good-natured. She saves Simba's son Kopa.
* The Lion King, but also how and why he got his scar in the first place, as well as his real name.
* The Lion King, but Simba won't have any of it. Unfortunately for Scar, the hyenas are LIVID that he tricked them. Needless to say, Scar's treachery is what ultimately does him in (both figuratively and literally).
* The Lion King, comedians Vittorio Gassman and Tullio Solenghi voiced respectively Mufasa and Scar, once again with great success.
* The Lion King, comics based on the first film. Many introduce new characters.
* The Lion King comics, standing out among other cubs due to being one of the few lions with blue eyes.
* The Lion King due to the popularity of the movie they were based on.
* The Lion King: During "I Just Can't Wait to be King," Zazu flies sideways when singing to Simba, "I think it's time that you and I arranged a heart-to-heart," and slams into a rhino.
* The Lion King ends up in a skirt in one scene ("What do you want me to do, dress in drag and do the hula?"), though since the animal characters don't normally wear anything it's debatable as to whether this counts.
* The Lion King. Eventually his heirs did reach a settlement with the record company, with the money placed in a trust.
* The Lion King every week as a tribute to his late father, as both used to see the movie together until the father's murder when Michael was 3.
* The Lion King featured stylized character designs and backgrounds based on traditional African fabric patterns.
* The Lion King features a scene where a restless Simba goads Timon into crossing a river. It results in Timon getting swept over a waterfall and nearly eaten by crocodiles.
* The Lion King fight of his life. Finally, even though she ends up winning with the same move she used to beat him before, she was clearly taking the fight very

seriously, unlike their fights as cubs where she easily beat Simba while laughing at him with little effort, and he managed to save his friends from her.
* The Lion King films. Shenzi is a hyena and one of Scar's henchmen (and it's implied that she's the leader of her entire clan). Zira is Scar's former mate, and tries to avenge his death by leading the Outlanders into war with the Pride Lands. Vitani loves to fight, does the most damage to Simba during the ambush, and holds her own against Nala.
* The Lion King flat-out tells Sarabi, "I'm the King! I can do whatever I want!"
* The Lion King get along a lot due to being animal-centric works that deal with deeper themes.
* The Lion King had Nala being near Timon and Pumbaa's Oasis for no discernable reason (which resulted in her nearly killing Pumbaa before re-encountering Simba). A deleted scene (and deleted song, called "The Madness of King Scar") revealed that the reason she was there was because Scar had exiled her from the Pridelands due to her refusing Scar's proposal to have her become his queen (with the implication that he attempted to rape her). The scene was retained in the musical, however.
* The Lion King had the shaman-type, Rafiki, who was an African vision-having kung-fu mandrill.
* The Lion King has a tuft of scraggly black fur on his chin reminiscent of a goatee.
* The Lion King has Banzai, who only seems to have a problem with being called stupid after hearing a bunch of insults:
* The Lion King has producer Don Hahn and co-directors Rob Minkoff and Roger Allers taking on the commentary. They talk over each other at some points, but still manage to be informative and funny.
* The Lion King has the most part, when the two main characters are adult, set within three days and three nights.
* The Lion King hates hearing Mufasa's name, so Shenzi nudges Banzai when he almost blurts out the former king's name. So he opts to go for "Que pasa?"
* The Lion King, hates trolls. If they make him snap, they can expect an angry message.
* The Lion King, he admitted "Circle of Life" was a good song and that the scene with Timon dancing the hula made him laugh hard.
* The Lion King. He is implied to be an outcast due to his flatulence. Nonetheless, this quality is occasionally played for cartoonish comic effect. Pumbaa's flatulence is his VA Ernie Sabella zerberting on his hand (pressing his mouth on his hand and blowing to create the sound).
* The Lion King. He manages to use in one sentence five different words to praise himself and tops it off with how much of a wonder he is.
* The Lion King him to return and take his rightful place as king. Compare this to when he first runs off: he meets Timon and Pumbaa and lives a happy (if bug-eating) life in a lush green paradise, utterly free of judgment and blame for something he didn't even do. Given that, the moral seems more like, "Once people think you did something wrong, nobody will forgive you unless you can prove someone else is at fault, so you might as well run away and start a new life".
* The Lion King, his daughter Kiara says she doesn't want to be queen as it would be no fun.
* The Lion King II: Simba's Pride: After Kiara reunites with Kovu following his banishment, he suggests that they run away and start a pride all their own. She declines, saying it's better that they try to unite their warring prides.
* The Lion King II: Simba's Pride: After Kovu's banishment, Timon and Pumbaa attempt to 'hypothetically' explain to Simba that Kiara ran off alone ... but Simba sees right through it.
* The Lion King II: Simba's Pride: After Zira sets up her ambush, and Simba banishes him, every animal in the Pride Lands tries to attack Kovu to ensure he leaves their home.
* The Lion King II: Simba's Pride. Alfre Woodard voiced her in the live-action remake.
* The Lion King II: Simba's Pride and has a brief non-speaking background

appearance at the end.
* The Lion King II: Simba's Pride and helped prevent the assassination plot his clan was setting) during the song "Not One of Us".
* The Lion King II: Simba's Pride are also considered to be a high point of the film.
* The Lion King II: Simba's Pride, a tiny plant grows from the ashes of the burned land as Simba explains to Kovu that one generation can grow to be better than the one before it if given the chance.
* The Lion King II: Simba's Pride, but considering the amount of trauma he endured as a cub in the original, perhaps it was well justified.
* The Lion King II: Simba's Pride by her to kill Simba, genuinely falls in love with Simba's daughter Kiara.
* The Lion King II: Simba's Pride, Campbell's singing voice is actually quite decent.
* The Lion King II: Simba's Pride death is surprising (but not to me)ly clean despite him getting trampled by logs.
* The Lion King II: Simba's Pride has Simba as very overprotective of Kiara. At one point, Nala points out to Simba that Kiara's just like they were when they were cubs, and Simba explains that this is what worries him.
* The Lion King II: Simba's Pride has stated that Nuka is Scar's son, while another writer has said that Scar and Zira were never mates.
* The Lion King II: Simba's Pride has the scene after Kovu gets exiled. Kiara is constantly reminded that she is on her own now, complete with the song "Love Will Find a Way".
* The Lion King II: Simba's Pride have a brighter red tone to their eyes than the Pridelanders. Kiara's and Simba's orange-brown eyes are softer.
* The Lion King II: Simba's Pride: In a clever subversion, Simba invites Kovu into the den after being encouraged by Nala to give him a chance and seeing that Kiara is happy to have him around by using this trope, though it is pretty obvious to the audience that this is a clear front.
* The Lion King II: Simba's Pride is all about this idea. It's arguably one of the most meaningful and heartwarming songs in the whole film series, and the advice certainly aids Kiara later in the film.
* The Lion King II: Simba's Pride is shown to be very affectionate to her father, even if she's not crazy about the idea of being queen someday
* The Lion King II: Simba's Pride. Kiara does this to Zira when she's trying to pull herself up. Kiara offers a paw to Zira to pull her back up, but she swipes at her and falls to her death in the raging flood below.
* The Lion King II: Simba's Pride Kiara is the heir to Simba's throne despite being a lioness, and retains this status after later marrying, so it's not for a lack of a eligible male lion to rule. The film doesn't treat this as an issue even worth commenting on. Simba is simply a very fair king that doesn't discriminate.
* The Lion King II: Simba's Pride: Kovu and Kiara don’t really break up, but he is banished from Pridelands. Played straight between her and her father Simba for the same reason.
* The Lion King II: Simba's Pride: Kovu is sent by the Outsiders to infiltrate Simba's pride, earn their trust and assassinate the lion king. However, he quickly falls in love with Kiara and, realizing how horrific his family's vengeful philosophy truly is, abandons the original plan and decides to conciliate the two factions in order to achieve true peace.
* The Lion King II: Simba's Pride, Kovu never seems to have any idea that Nuka resents him. In fact during the few scenes the two are shown interacting, Kovu never shows anything but love and care towards his brother.
* The Lion King II: Simba's Pride let go of the cliff into the rapids. It was a bit too disturbing for a kids' film.
* The Lion King II: Simba's Pride made this a plot hole because there is some left to antagonize the Pride Lands. Meanwhile, Simba's mother disappears without an explanation.
* The Lion King II: Simba's Pride moment, deciding not to go through with the

assassination plot he had been sent to do. Around the same time, this happens to Simba when he realizes that what he's doing to Kovu isn't what Mufasa would have wanted.
* The Lion King II: Simba's Pride Nuka is neglected by his mother, Zira, in favor of the younger son, Kovu, whom Scar chose as his heir. Nuka is also implied to be Scar's son, but this isn't confirmed in the movie.
* The Lion King II: Simba's Pride of who Kovu's real father is, or why he looks so much like Scar.
* The Lion King II: Simba's Pride on the other hand look almost on par with their series' first films in detail and fluidity.
* The Lion King II: Simba's Pride: Parodied when, after Kiara falls into an oasis and Pumbaa cannonballs in after her, Timon tries to rehearse what to tell her father.
* The Lion King II: Simba's Pride: Pumbaa somehow manages to pull this off when he and Timon are spying on Kiara while she's out on her first solo hunt.
* The Lion King II: Simba's Pride." She walks towards the screen as it fades to black around her eyes.
* The Lion King II: Simba's Pride, Simba has a nightmare where he tries and fails to save his father from falling to his death in the wildebeest stampede, and is then thrown into the gorge himself by Kovu.
* The Lion King II: Simba's Pride (some dubs still kept them as cousins, though).
* The Lion King II: Simba's Pride song "One of Us" contain a variation of this.
* The Lion King II: Simba's Pride's son (something mentioned in the film itself).
* The Lion King II: Simba's Pride, the mud has been mostly washed off by the rain, enforcing the fact that the two groups really are the same and don't need to fight anymore.
* The Lion King II: Simba's Pride this actually gets subverted, as Kovu clearly already hates the plot well before he falls in love with Kiara. While falling in love with her ultimately certified it, it was not the primary factor in him turning on his mother Zira.
* The Lion King II: Simba's Pride. This ending was rejected for being too dark, but some fans have shown a fondness for it, because it's totally something Zira would do and there are plenty of dark moments in this movie.
* The Lion King II: Simba's Pride. Timon and Pumbaa declare that they're gonna show Simba's new son how to have fun at his unveiling. Rafiki corrects that that it is a girl and the two promptly double take at that.
* The Lion King II: Simba's Pride, Timon and Pumba shake their fannies at the enemy lions and say "Nyah nyah nyah nyah nyah nyah!"
* The Lion King II: Simba's Pride, Timon tells Pumbaa "When the going gets tough, the tough get going," and they charge into the battle between the Pridelanders and Outsiders. They then chicken out when confronted by an Outsider.
* The Lion King II: Simba's Pride, unlike the original, only briefly shows Kiara as a cub on the day she meets Kovu.
* The Lion King II: Simba's Pride was raised by his mother to kill Simba and take over the Pridelands. As he was a sweet kid to begin with, it only takes a few days for him to break his indoctrination and refuse to kill.
* The Lion King II: Simba's Pride was still in power. She was immediately removed from the throne after Simba took over as king (and Scar was dispatched by his own hyena allies).
* The Lion King II: Simba's Pride, which functions as a symbol of everything he's pledged not to become. And invoked when the other animal treat it as a Mark Of Evil anyway.
* The Lion King II: Simba's Pride, which is seen as one of the more memorable and unique Disney sequels.
* The Lion King II: Simba's Pride yelling "Sleep, ya little termite!" in his ear.
* The Lion King II: Simba's Pride, you can tell Zira's group/the bad guys because they're muddy from walking through a river.
* The Lion King II: Simba's Pride, Zira blames Kovu after Nuka dies in the fight with Simba.

* The Lion King. In production Kiara (then called "Shani") had a twin brother named "Chaka", which could have handwaved the issue, however he was scrapped in production.
* The Lion King: In the scene where the hyenas complain to Scar about not having any food:
* The Lion King is a large, aggressive hyena who thinks with his muscles.
* The Lion King. It's amazing what a simple change of music and a few different sounds can do to the tone of a familiar scene or trailer...
* The Lion King its place in the Circle of Life and is only now making an effort to undo/mitigate the damage it did to the world. Humanity is seen only in live-action documentary footage to boot.
* The Lion King: Kiara's Reign popularized Koda, Leah, and Asha as Kiara and Kovu's children.
* The Lion King makes sense mostly because it's easier for the actor on stage to only have to hide one hat instead of a grass skirt and a lei.
* The Lion King: Mufasa! A commanding voice literally fit the king of beasts. Shenzi certainly thinks so. "Oooooh.... say it again!"
* The Lion King, Mufasa becomes this under Scar's regime. He so hated being in his brother's shadow all the time, he made a law against saying his name.
* The Lion King, Mufasa ripped into Simba for leading Nala into the Elephant Graveyard despite his explicit warning never to go there. He ended up teaching Simba a lesson in the real meaning of bravery.
* The Lion King: Mufasa, who is a strong lion, capable king, and good father.
* The Lion King, numerous accidents involving the aforementioned elaborate props and costumes, some of which even resulted in serious injuries. In the end, she was unceremoniously given the boot from her own show and has done little of note since.
* The Lion King opportunities and times that she could've said or done something of importance, but she still hardly affected a thing through the whole movie.
* The Lion King pride dynamics to a setting where lions have a hereditary monarchy is a bit dodgy anyway.
* The Lion King; Rafiki advises Timon to "go beyond what you see" in order to find "Hakuna Matata", and Timon interprets this to mean he should leave home to find a place where he'll be happy. Timon's mother is understandably annoyed when she finds out what happened:
* The Lion King relationship with Zira), or where the Outlanders from the second movie came from.
* The Lion King results in the screen turning black while Simba sways and collapses. This feels slightly less serious when you're still playing as cub Simba in the first part of the game, as he sports a goofy smile on his face while dying. However, adult Simba's death is appropriately dramatic. That said, in the 16-bit and Master System/Game Gear versions, it is heralded by an incredibly sad four-note stinger.
* The Lion King review, he tells the viewers to see how slow Simba is running "in this unedited footage", said as he then abruptly slows down the footage.
* The Lion King, Scar has Zazu trapped in a cage that appears to be made of bones that it looks like he could easily walk right out of if he just tucked in his wings and sucked in his gut a little.
* The Lion King, Scar knocks Zazu unconscious before he can go find help during the stampede, removing the only witness from the situation. In the remake, Scar instead orders Zazu to go retrieve the pride for help. After the stampede, Scar claims he didn’t make it to the gorge in time to save Mufasa and Simba - even though Zazu was with him at the gorge. Considering Zazu still regularly visited Pride Rock after Scar became king (despite being implied to have been banished), and is also implied to have heard every word of Scar announcing himself as king, it’s a glaring flaw in Scar’s cover story.
* The Lion King, Scar suddenly drops his calm facade to show his underlying rage.
* The Lion King. She is presumed to have been his mate at one point and has a similar personality to him, but is more hands-on and violent.
* The Lion King: Shenzi usually suffers the same comeuppances as the other hyenas.

* The Lion King, Simba only learns this fact near the end of the climax.
* The Lion King: Simba returns to the Pride Lands in time to hear Scar loudly calling for Sarabi, Simba's mother, to berate her for the lionesses' apparent failure at hunting for food.
* The Lion King: Similarly to the example above, Scar is this as well as the antagonist. While Simba is unequivocally the protagonist, the story is just about Scar as it is Simba, especially the differences on the leaders they became.
* The Lion King. Since it didn't change Rafiki's role at all, it works quite well.
* The Lion King: Six New Adventures as Disney doesn't acknowledge direct-to-video sequels or licensed books as canon.
* The Lion King: Six New Adventures retconned, and there are several other characters who are borderline retconned (depending on whether you consider the deleted scenes canon).
* The Lion King: Six New Adventures, Scar was originally named "Taka" by his parents, which means "to want", but can also translate roughly as "trash". His father, Ahadi, always preferred Mufasa due to his dependability.
* The Lion King: Six New Adventures. They're about characters telling stories to Simba and Nala's son Kopa.
* The Lion King's Renderman computer graphics technology, but digitally colored with Pixar's CAPS technology.
* The Lion King start with the "NAAAAAAAAAAAAAAAAANTS INGONYAMA BAGITHI BABA" chant or something similar. In the actual song, "Circle of Life", that's just the first line, sung when the sun begins to rise; Rafiki doesn't hold Simba aloft to the crowd until the final chorus, about three minutes in.
* The Lion King's title card follows a majestic scene of Simba's parents presenting him to their subjects. In the DVD commentary, the directors recall they feared audiences would not read the simplistic title card after enjoying such an epic song.
* The Lion King strongly resembles his father, Mufasa. There are a few differences; he's a little leaner and his mane is shaggier, but they're subtle enough that when he returns to Pride Rock, Sarabi and Scar initially think he is Mufasa.
* The Lion King that the film doesn't really take place after the original film, but instead Kiara is the second cub.
* The Lion King: The first half of the movie is about Simba's childhood and Scar's plot to become King. Act 1 with Hakuna Matata and the reveal of Adult Simba. The second half is adult Simba coming to terms with his guilt and grief and deciding to reclaim his throne from Scar.
* The Lion King the flaw is that he's a dreadful king, and by the time that Simba comes back to take his rightful place, Scar had the other lionesses ready to mutiny.
* The Lion King. There's much more of a lean towards family and friends than romance.
* The Lion King). They are really jarring when put beside the fantastic costumes of the other characters.
* The Lion King. Timon acts as the intelligent one, he's not. Pumbaa listens to him, he shouldn't.
* The Lion King: Timon and Pumbaa do not show much of this in the films but its very evident in their own series as they frequently bicker with each other. Apparently, their philosophy of "Hakuna Matata" does not protect them from having such bicker spats.
* The Lion King to this with Nala screaming, "Get away from me!" and finally scratching him across the face with her claws to get him to stop.
* The Lion King turn out to be the ones to save the monkey from the snake by purposefully distracting it.
* The Lion King was a side-view platformer except in the wildebeest stampede level, which had Simba racing towards the camera.
* The Lion King was going to be the next big hit. The former was and still is the highest grossing hand-drawn animated film of all time.
* The Lion King was the voice of young Simba while Niketa Calame voiced young Nala.

* The Lion King, we first see Timon and Pumbaa playing "bowling for buzzards".
* The Lion King were black South Africans who had left their country due to persecution. In the musical's original playbill, they expressed their sympathy with Simba, who, like them, was exiled but eventually able to return to his homeland.
* The Lion King: When Mufasa's spirit appears to Simba, telling him to remember who he is and go back to reclaim his rightful place as king, Simba chases after him while he's disappearing, begging him to not to leave him. However, Mufasa's words finally sink into Simba's mind and he decides to go back.
* The Lion King: When Nala sees Pumbaa as an easy snack and chases him, Simba saves Pumbaa by fighting Nala head-on. Keep in mind that Nala has pretty much hunted and run hard to chase any remaining prey in the Pride Lands, while Simba has spent his days lazing in the jungle and snacking with his buddies Timon and Pumbaa. Even so, Simba takes on Nala in what is most likely his first fight ever and nearly wins, only losing when Nala gets to pin him down.
* The Lion King, when Scar wonders about the things he doesn't have that his brother did, Zazu mentions that among them is that he doesn't have a devoted queen. Scar seizes upon this idea and when Nala walks up, he starts singing about her, her "assets feminine" and how she has to be his Queen. Meanwhile, for several lines she entreats him to do something to control the hyenas and end the destruction of the Pridelands until she finally realizes just what he's singing about and is horrified.
* The Lion King, when Simba realizes the lioness he's fighting is childhood friend Nala, they stop fighting and start laughing, prompting a jaw drop from Timon.
* The Lion King: When the hyenas turn on Scar, their leaping on him to tear him apart is rendered in shadow, with a quick pan upwards and a roaring curtain of flame to hide the scene.
* The Lion King, when Timon and Pumba first run across Simba in the desert, Timon's first reaction is to panic because of, well, the food chain. Pumba meanwhile thinks Simba's such a cute little guy that he asks, "Can we keep him?"
* The Lion King where it's shown that Nala's dad is a random, unknown lion.
* The Lion King while Scar was always clearly an adult right from the first scene he was in. So the age difference between them can't be small, even for natural lion-aging years.
* The Lion King with Louis Castle of Westwood Studios (who worked on the game).
* The Lion King, with the unfortunate addendum that Mufasa had no idea Scar was plotting against him until it was too late. A rare case where the younger brother is the evil one.
* The Lion King would have undergone a heavy dose of Laughing Mad shortly after throwing Simba off Pride Rock before being consumed in the flames that destroy Pride Rock.
* The Lion King, Zazu not only breaks the fourth wall, but occasionally expresses awareness that his character is a puppet.
* The Lion of Ivalice: The Glabados Church has shades of this, as they hire out their Templar Knights to secular armies for additional training and experience.
* The Lion's Den begins with Komaeda kidnapping Naegi in order to take care of him and "help" him become a better Hope.
* "The Lion Sleeps Tonight" did not originate with Tight Fit, nor with The Tokens. It started out as a song named "Mbube" by South African singer Solomon Linda and his group, The Evening Birds, in 1939. In 1951, Pete Seeger and his band, The Weavers, released their own version, renamed "Wimoweh" (based on misheard lyrics), whereas The Tokens recorded their own version based on the Weavers' version, now named "The Lion Sleeps Tonight", with the now familiar lyrics, in 1961. All three versions of the song have been covered multiple times, and quite a few versions (particularly the ones based on the Tokens' version) have become hits.
* "The Lion Sleeps Tonight", originally released in 1961 based on a South African song released in 1939, was covered, remixed, and sampled by dozens of artists over several decades. Some of these covers went on to become chart-toppers in their own right, and the song was still extremely famous in the early '90s, having been covered by They Might be Giants in '92 and REM in '93. Robert John's 1972 cover was

featured in
* The lion's share of "Better Off Wet" is of an elaborate synchronized swim sequence. As a result, it's less of any genre in particular and more an isolated
* The Lion Tamer's Daughter, the hero, having just moved to a new town, meets a girl who is the exact mirror-image of the best friend he just left behind. Given what page this example is on, I think you can guess the rest.
* The Lion, the Witch and the Wardrobe (1979) had your usual cheap 70's TV animation.
* The Lion, the Witch and the Wardrobe (1979) initally appears to be an aversion strategically using Peter for all the spoken dialogue since he was a teenager with an adult voice from the earliest scenes. Then, bizarrely, the adult Edmund speaks twice in the same pre-pubescent voice he had all along.
* The Lion, the Witch, and the Wardrobe. After Aslan is killed, mice descend on his body. But it turns out they're only chewing through his ropes.
* The Lion, The Witch and the Wardrobe also ended in full-blown final battles, at least within the context of the book.
* The Lion, the Witch, and the Wardrobe, and each narrative takes place over a few Earth days at most.
* The Lion, The Witch, and The Wardrobe A rather justified example, since the few humans in Narnia at its creation had been crossbred into oblivion with the other races within the first few generations, a thousand years before his time.
* The Lion, the Witch, and the Wardrobe by putting them in (torso-only) armor.
* The Lion, the Witch, and the Wardrobe claim the Witch, Jadis, was descended from Lilith, which just raises further questions. Of course, they aren't exactly experts on Jewish apocrypha.
* The Lion, the Witch, and the Wardrobe collisions, each sides' great cats charge ahead of the rest of the forces and slam into one another ahead of everyone else.
* The Lion, the Witch, and the Wardrobe: Edmund Pevensie claims Susan always tries to act like Mother, bossing the two youngest Pevensies around. He's right. Her goal is to keep them safe.
* The Lion, the Witch, and the Wardrobe, Edmund rather tackily scribbles a mustache and glasses on a lion that's been turned to stone, telling himself it's probably Aslan himself.
* The Lion, the Witch and the Wardrobe has an American dub and a British dub. The only actor to appear in both versions was Stephen Thorne (who voiced Aslan).
* The Lion, the Witch, and the Wardrobe: has a wardrobe that allows travel between Earth and Narnia — sometimes.
* The Lion, the Witch, and the Wardrobe has heard, and thus will be telling to the Witch...
* The Lion, the Witch, and the Wardrobe has the Golden Age Prophecy, which predicts that two Sons of Adam (the Narnians' terms for a male human) and two Daughters of Eve (the Narnians' terms for a female human) will defeat the White Witch and restore peace in Narnia. It turns out that the Pevensie children are indeed the prophesied four. Although the White Witch tries to kill them to maintain her rule over Narnia, the siblings successfully defeat her and become the sworn protectors of Narnia.
* The Lion, the Witch, and the Wardrobe is regarded as the black sheep of the family — at least for the first half of the film. Notably, the titular Witch manages to turn his doubt about his family accepting him into a betrayal.
* The Lion, the Witch, and the Wardrobe leads her army from atop a chariot pulled by polar bears.
* The Lion, The Witch And The Wardrobe looking for Narnia actually wind up there.
* The Lion, the Witch, and the Wardrobe, Mrs. Macready is the housekeeper for the Professor. When she first meets the children and they ask if it's her she says "Afraid so." When they get to the house all she does is tell them what they're not allowed to do.
* The Lion, the Witch, and the Wardrobe: Mr. Tumnus, and later the Beavers, play this role for the Pevensies.
* The Lion, the Witch and the Wardrobe, not only do the Pevensies return barely

after they left, they're de-aged back to children.)
* The Lion, the Witch, and the Wardrobe. Peter calls him out at least twice.
* The Lion, the Witch, and the Wardrobe, Peter looks at a World War II soldier walking through the train station for no apparent reason. This soldier is played by Jaxin Hall, the runner-up for the role of Peter.
* The Lion, the Witch, and the Wardrobe point, the other assassins she'd sent to kill the children failed, and were used to track down and save Edmund.
* The Lion, the Witch, and the Wardrobe - puts her hand on his arm and says, "We all were."
* The Lion, the Witch, and the Wardrobe re-enacts the crucifixion story with Jadis the White Witch as Satan, Aslan as Jesus (of course), and Edmund as the unsaved sinner in need of redemption. Lucy and Susan also fill in for the Marys who attend Christ's death and burial.
* The Lion, the Witch, and the Wardrobe that doesn't always occur to everyone, although there are a couple of one-off lines indicating their memories of adulthood faded unnaturally quickly.
* The Lion, the Witch, and the Wardrobe: "The children did not see the actual moment of the killing. They couldn't bear to look and had covered their eyes."
* The Lion, the Witch, and the Wardrobe. The four thrones at Cair Paravel toward the end of the film are also quite spiff.
* The Lion, the Witch, and the Wardrobe the male beaver returns Lucy's handkerchief, which he got from Tumnus, to demonstrate that he can be trusted.
* The Lion, the Witch, and the Wardrobe: The Pevensie siblings each have their own signature weapons, gifted to them by Father Christmas.
* The Lion, the Witch, and the Wardrobe, the White Witch's army is made up of all kinds of evil creatures, such as giants, harpies, ogres, evil tree spirits and poisonous mushrooms, among others.
* The Lion, the Witch, and the Wardrobe. They not only serve as surrogate parents to younger siblings Edmund and Lucy, but try to parent each other. This trope is present in the book, but especially played up in the 2005 film version.
* The Lion, the Witch and the Wardrobe this is not the case, and adequate theater-craft can avoid the suggestion.
* The Lion, the Witch, and the Wardrobe to signal that the White Witch's always-winter-never-christmas power is beginning to fade.
* The Lion, the Witch, and the Wardrobe viewing, so Aslan simply roars at her, causing her, either through magic or simple fear, to fall to her death.
* The Lion The Witchand The Wardrobe was rated PG in both the United States and United Kingdom, but it was rated M in Australia and New Zealand due to the opening scene.
* The Lion, the Witch, and the Wardrobe was very much an ice person, possibly even more than her book incarnation.
* The Lion, the Witch, and the Wardrobe went into battle with a sword and a wand of petrification. A pretty nasty combination by anyone's standards, and she put both to pretty good use.
* The Lion, the Witch, and the Wardrobe we see that Aslan personally created Narnia, so he would naturally know about such magic and may have put it there himself specifically for this occasion.
* The Lion, the Witch, and the Wardrobe. When Lucy first meets Mr. Tumnus, she offers her hand, which Tumnus stares at in confusion. She prompts him to shake it, saying it's a greeting custom, so he grips her hand between his thumb and forefinger and shakes it back and forth, causing Lucy to giggle.
* The Lion, the Witch, and the Wardrobe, while relatively faithful, added a scene in which the Witch's wolves pursue the Pevensie children as they try to escape across a melting frozen river. The ending battle sequence, which was told secondhand in the novel after its conclusion, is also seen in full as it occurs.
* The Lion, the Witch, and the Wardrobe with her wand. (This petrification was reversible, though.)
* The Liquidator: In 1944 during World War II, tank corps Sergeant "Boysie" Oakes stumbles while trying to find a place to take a piss and unwittingly shoots and

kills two men attempting to assassinate British Intelligence Major Mostyn in Paris. Mostyn mistakenly believes Oakes was lethal on purpose. Twenty years later, Mostyn (now a colonel in British Intelligence) and his boss are in trouble due to a series of embarrassing security disasters. To save his job, the chief orders Mostyn to hire an assassin to illegally eliminate security leaks without official authorisation. Mostyn recruits Boysie into the Secret Service without first telling him what his employment will entail, luring him in with a lavish apartment and a fancy car.
* The Liquidator made of water who is also larger than the other four members and relies more on physical attacks.
* The Liquid Metal Sword, the most powerful sword in the game, is created by
* The Lirin have a very finite population and everyone in their society fulfills a specific role. When the Federation made
* the list, and a vigilante (both in the pastry wielding and standard gun wielding variety).
* The List attempt to get him worked up during swimming lessons, Xander wears a speedo during said lessons. By the second day, every Slayer-in-Training (and almost every woman in the house) attends the swim lessons to watch.
* The list concept gets mentioned again in "The One With Chandler and Monica's Wedding" when Jack Gellar cheerfully discussed his and Judy's lists with Ross, oblivious to
* The List Detroit: This local show from Detroit, Michigan lived on stock footage. Even in episodes presenting new material, a segment providing popular topics will be shown again, reusing the exact same footage from the last time it was shown, no editing, just the same presentation, in the same context, but the bumper monologue would change slightly every time it would show up, and who would be saying it would change, also to note, during these segments, whether it was a local star or a physician giving advice, 45% to 70% of the content shown would be public domain stock footage.
* The Listener accusations. While this improves his situation in some ways, it still leaves his allies to lie and misdirect their superiors to protect their careers.
* The Listener a gang of robbers use fake cop uniforms to gain access to secure locations like high-end jewellery stores and rob the place. Their disguises are very good and they even make sure that their getaway car looks like an authentic police vehicle. Later in the episode, they steal an ambulance and commit a robbery disguised as paramedics.
* The Listener, first episode. Title character says that cars don't explode when on fire, and then it did.
* The Listener has Detective Charlie Marks, though she's often inclined not to listen when he comes to her with evidence and can't explain how he got it because he found out by reading minds. Of course this changes once she finds out.
* The Listener. However, he can only read surface thoughts so to get the whole story out of a witness or suspect he will tell them generic things about the case and then listen to what they think in response. He will then use that information to steer the conversation in the right direction until the other person is convinced that he knows everything already.
* The Listener, it's revealed that Charlie was raped by a teacher. This is used to explain why she is so upset about Toby being able to read her mind, because no-one who hasn't been raped is ever protective of their privacy, no sir.
* The Listener, Mercer, Oz, Marks and later Olivia is this for the mind-reading Toby. In season two, Detective McCluskey and Dev Clark join the team.
* The Listener, paramedic main character Toby and his partner get stuck while trying to reach a woman with a head wound. She is annoyed, but amused; if it hadn't been an exam, she could have died.
* The Listener (right after Toby has been teasing Oz about how all he thinks about is his new girlfriend):
* The Listeners is about a very slow first contact made via slower-than-light radio. The story covers the lives of several men, years apart, who are involved in

the very slow process.
* The Listener, Toby is a consultant for the IIB because of his mind reading powers. As a consultant, he's at the IIB's beck and call, but sometimes it seems like he is just another law enforcement officer: he often directs other police officers, executes warrants, leads interrogations, etc. This is lampshaded and rectified in the final season when Toby is made a full time IIB agent and is certified to carry a gun. On the other hand, the IIB is really just a Joint Task Force rather than a fully independent police agency and thus derives its powers from those of the participating police forces ie. the agents have arrest powers specifically because they are full time members of their respective police forces and are on special assignment with the IIB. Toby would have to join one of this police forces (most likely the RCMP) in order to be authorized to execute police powers.
* The Listener to think his power was a curse, but he's figured out a way to save people with it.
* The Listener when Toby has to make up some story of how he figured out a person was lying to him since he cannot reveal that he figured it out through telepathy. Knowing it would never be accepted as evidence in a court of law, Toby and the cops must then find other evidence in order to make an arrest.
* The "listing of fictitious typical porn titles" joke is used in the farce
* The list is fairly long considering the vastness of the universe. Most Space Marine chapters, both Loyalist and Traitor have official battle cry. Various litanies and chants also used extensively by all human and superhuman forces.
* The List of 1004 Holds Chris Jericho we're talking about. If he can get a piece of paper over once, he can damn well do it again.
* The List of Adrian Messenger, in which a bunch of big names are unrecognizable in heavy makeup.
* The list of athletes and coaches who have gone on to politics is pretty long. Most notable in this category, at least to Americans, is Bill Bradley, who made a run for President of the United States in 2000. He had a Hall of Fame career in basketball—first in college at Princeton, then a brief gig with Italian club Olimpia Milano while attending Oxford on a Rhodes Scholarship, and finally with the New York Knicks in the '60s and '70s. Bradley is the first of only two players to have won titles in the NBA and EuroLeague, plus an Olympic gold medal (the other being Manu Ginóbili).
* the list of cetaceans, which has made many puns of that nature (including that very one).
* The list of Chowan University alumni include notable basketball players Fred Vinson and Nate McMillan, football player Jerry Holmes, and Khalid Sheikh Mohammed, the architect of the 9/11 attacks.
* The list of enhancements to Spartan-IIIs is even longer, especially Gamma Company after their instructor, a Spartan-II, got tired of watching his students from previous companies get slaughtered in suicide missions and decided to add a few illegal enhancements to make them highly resistant to pain.
* The list of Jack Sparrow's most egregious crimes includes "Impersonating a cleric of the Church of England". Today, most peope fail to understand what the big deal is, but at the time, the
* The list of medications Dr Dibbs prescribed for herself is insanely long.
* The list of people that Eclipso can't take over is absurdly small. However, Eclipso was genuinely surprised at how little evil there was in Superman.
* The litany of accessibility features and the easiest difficulty make it possible to pretty much walk through the entire game without any combat. There are also no difficulty related trophies so if you’re not a gamer and just want experience the story, the game is accessible to you.
* The literal example of this trope happen when Shaun's mother becomes a zombie. Possibly the only thing played completely straight. An unexpectedly heartbreaking scene, too.
* The literal implication behind calling a young person an "old soul" is that they have undergone this. In practice, the term is more of a euphemism for "young person

too dumb to recognize when they're being patronized," though.
* The literal lowest-level-possible challenge can only be attempted by using outdated patches. It's commonly combined with the Ironman challenges of various difficulty, as well as the impossible no-items-no-skills-no-stats challenge.
* The Literally Chosen One This may be exacerbated if previously chosen Ones ended up as washouts, failures or outright villains.
* The literally classical example is Sisyphus, a Greek king condemned to roll a boulder to the top of a hill, only to have it roll back down, for eternity.
* The "literally smiling from ear to ear" disfigurement smile as evidenced by characters such as Kakihara in Ichi the Killer, Gwynplaine (of the aforementioned The Man Who Laughs), and
* The literal shadow of Death follows a car being driven dangerously on a mountain in
* The literal version of this trope can be averted with some specialty decks of cards
* the literal version of this trope. She genuinely gets sexually aroused by violence and fighting. She loves to torture people and even loves tasting blood. After beating the crap out of a man, she licks the blood off her fingers. When having sex with Mercury, him telling her the sort of gruesome things she can do to her rivals helps bring her to orgasm. And her favorite method of killing people is the reason she goes by the name "Cinder." She likes to burn people alive to send a message to others.
* The Literal Video version of "Total Eclipse of the Heart" features the line "Get out of my way, I've gotta pee!" After one of the possessed kids leaps at her, she sings "Never mind, I just went on the floor! Now I need to find a mop!"
* The Literary Review magazine has a yearly "Bad Sex in Fiction" award, meant to poke fun at instances of
* The literary style of maximalism emphasizes the author writing down
* The Literature/Oathbringer indicates that the Shard Cultivation is also present, and likely actively working against Odium.
* The Lithuanian and Polish soldiers from the German point of view in
* The Lithuanian language is also relatively unchanged. For knowing how the ancient speakers of the Indo-European languages talked, you need to listen to a Lithuanian villager talking (the Lithuanian language, separated by thousands of miles from Sanskrit, retains nearly identical words for many things, unchanged for millenia.)
* The little-advertised fact about Vladimir Putin is that he is a colonel of the reserve. And he's a black belt in judo.
* The little Alter Ego also was showing a serious face during the execution.
* The little ant who's always stopping to do things in the song "The Ants Go Marching One by One".
* the little ball of lightning Flagg conjures up to kill his minion doesn't go away once the man is dead. Instead, it grows and appears to form what another character sees as the Hand of God, which triggers the bomb. The man Flagg kills doesn't start a revolution, but he does contribute to Flagg's downfall, albeit in a very roundabout way.
* The little black Pegasus foal in the "Pastoral Symphony" section, who likewise can't keep up and generally screws up ... until all the others are frolicking in a rainbow when the black one comes fluttering down for a perfect landing, the soul of decorum.
* The Little Book of Mornington Crescent of dense, jargon-filled Crescentbabble, then concludes that the above should not be confused with the Offside Rule.
* The little boy picking the flower in the 2000's logo gets roundhouse-kicked in
* the little boy returns, and starts to cry when he sees his mother crying.
* the little brother that she never had, and Jean is gorgeous. Ultimately, emotions win, though he doesn't suddenly become blind to Jean's good looks, being rather embarrassed when he sees her in a skimpy bikini.
* The Little Clay Cart, written by the Indian playwright Sudraka around the 2nd century BC. It was about a forbidden love between an impoverished young man and a

wealthy courtesian.
* The Little Coffee Shop Of Kabul are in love, but were promised to different people. They still pine for each other, but they can't be open about their relationship because of how traditional Ashmat is.
* The Little Coffee Shop Of Kabul is determined to go to the most dangerous parts of the world to expose the biggest stories.
* The Little Comic Shop of Horrors. In one of them you escape the mysterious comic shop and learn that the comic book store was closed years ago because the owner Milo died.
* The Little Convict was a 1979 Australian film about a young boy named Toby Nelson transported to Australia, and what happened to him and his fellow convicts.
* The Little Devil an Italian lady named Giuditta. He liked her name, so after his exorcism, he decided to keep it as his own.
* The "Little Doctor" (from "Doctor Device", from "M.D. Device", from "Molecular Disruption Device") in
* The Little Drummer Boy just has a poor boy visiting the baby Jesus, having no gift to give him, playing his drum for him instead, and the baby smiling at him. All the other details found in the special (the boy's name being Aaron, his parents' murder and his resulting misanthropy, the details of how he arrives at the manger, all the other characters' roles, etc.) are new.
* The Little Drummer Boy sequel, Aaron is understandably distraught when his drum, a gift from his dead parents, is destroyed.
* The Little Drummer Girl by John Le Carre, Florence Pugh's character goes barefoot whenever she can, including when walking drunk through the ruins of a temple and even when driving to somebody else's house, not bothering to bring her shoes with her.
* The Little Drummer Girl: Charlene plays these roles in her theatre troupe, but is anything but.
* The Little Drummer Girl: In order to establish the fiction, Gadi doesn't allow Charlie to call him by any name other than Michel until the end of the mission. Charlie herself only uses this, never her full name Charmian.
* The Little Engine That Could, for being "too little" to handle trains, so she's motivated to prove herself as an engine beyond being a simple switcher.
* The Little Engine That Could, for some reason, has her face drawn on her funnel instead of the smokebox unlike all the other locomotives in the book. Averted in the film adaptation however, where the "Shiny New Engine"'s face is drawn on his cockpit, the "Broken Down Engine"'s and the "Big Strong Engine"'s faces are both drawn on their smokeboxes, and the "Rusty Old Engine"'s face is also drawn on his funnel.
* The Little Engine That Could includes a monkey named Jeepers, an assistant to Rollo the Clown.
* The Little Engine That Could. The first was more true to the book than the second.
* The Little Engine That Could, "Two Little Trains", is based on Margaret Wise Brown's book of the same name.
* The little firemen in adverts for Gaviscon Cool heartburn relief, who will hose down your pain centre with Gaviscon.
* The Little Flying Bears. One year, they took it so badly they bullied the winning team into accepting a rematch.
* The Little Foreigner thread is still open, and on February 2nd of that same year, the thread was reopened.
* The Little Foxes act for Mr. Marshall, and she plays the fact for her husband is seriously ill for some extra sympathy. However, her caring and polite manner is a façade for an ambition even more ruthless than her brothers, and when Horace does come home to her (because she demanded it), her attitude towards him rapidly deteriorates from passive-aggressive needling to literally telling him, "I hope you die. I hope you die soon."
* The Little Foxes in her own room, which they try to hide by lying and saying she has a headache.

* The Little Foxes, Oscar tells Ben that, while Horace might ultimately be unwilling to put up his share of the money, "Leo's got a friend" with bonds worth $88,000 that he'd kindly lend until he needs to look at them again in about five months. Oscar has to discreetly warn Leo about not letting out that these bonds are actually Horace's and will be lifted straight out of his safe-deposit box.
* The Little Foxes sympathy for this. By the end of the second act, she's saying directly to his face, in cruel honesty, that she hopes he dies soon.
* The Little Foxes. The planned first-cousin marriage between Alexandra and Leo would not have been the first in the family. The Hubbard siblings are all greedy and selfish and loathe each other. Leo's father Oscar basically forces Leo to steal $75,000 in bonds from his uncle Horace.
* The Little Friend, Harriet, believing a local boy is responsible for the death of her brother, sends her friend to spy on him in the pool hall.
* The little 'fwip' sound of a ninja or similar character jumping improbably high or simply vanishing without a trace.
* The little girl in episode 4 is a ghost. Not surprising, considering her general
* The Little Girl of a girl whose atheist alcoholic parents kill each other in a murder-suicide before she herself is sent to a home raised by Christian foster parents who teach her to attend church, and one day she says that the man on the cross (Jesus) is the one who came to help her during the night of the murder-suicide.
* The little girl of perhaps ten or eleven (Melissa Wilkes, who went on to play Jackie Wright in
* The little girl's hatred, combined with that of a spirit of vengeance, transforms the town into a hell. In turn, the cult it was created to punish is protected by their faith; more precisely, it's their blind ignorance of their own fate which prevents the spirit from killing them all (until it finds a loophole).
* The little girl weeps outside the owner's house all night long, begging to be let in, and gets dragged away by a monstrous beast before dawn, screaming in terror all the way. Inviting her inside would however lead to a gruesome death, with the last person to have done so implied to have been
* The Little Girl Who Lives Down the Lane shows up for trick-or-treating with his kids.
* The Little Golden Calf consisting of only a police hat, and the hat has a coat of arms of the wrong city, to boot. Koreiko later points that out.
* The Little Golden Calf hires Funt to get blackmail material about one of his former employers.
* The Little Good Mouse: Joliette (d'Aulnoy) is called Delicia (Lang).
* The Little Hours: "Jew" is used as an insult, and the sexual behavior of the characters (which, aside from the adultery, would now be largely considered if not innocuous then at least expected for modern Westerners) instead gets treated as gravely wrong, per authentic Catholic rules.
* The Little Hours: Massetto is staged for sacrifice after the witches' fertility ritual.
* The Little Hours: Massetto was about to have sex with Alessandra, though they didn't manage it since another nun comes into the room.
* The Little Hours, who plays Alessandra, a woman who's into his character Massetto.
* The Little House to the flirtatious Mélite, in the hopes that showing off his private retreat will aid him in seducing her:
* The Little Island was his first animated film and because of the incredibly deep philosophical background of the film.
* The Little King gets captured by a tribe of them in "On The Pan"; he's even served with Happy Birthday topping written in him!
* The Little King once showed the title character doing this, taking care to have his servants place a cushion in front of the sharp-pointed finial sculpture.
* The Little King shorts sometimes reused backgrounds from previous shorts, as well as the staircase sequence that's animated in perspective.
* The Little King Van Beuren shorts have more of an Art Deco aesthetic to some of

the character designs to match the look of the comic it adapted from.
* The little known genre of freakbeat— an extremely frenetic and raw style of British garage rock— is an ur-example of just about every style of raucous music that would follow in rock and roll, ranging from heavy metal to punk to even grunge, with songs that wouldn't sound out of place on Nirvana-era Sub Pop Records or the punk rock scene a over decade later in terms of distortion and energy— and yet most of the songs are from
* The Little Lamb from Bethlehem and book gift set, just like The Elf on the Shelf, but relating to The Nativity instead.
* The Little League World Series averts this, as champions have come from the United States, Taiwan, Japan, Mexico, South Korea, Venezuela, and Curaçao.
* The Little LISPer in the penultimate chapter are not another food joke.)
* The Little Lulu episode, "Five Little Babies", had the boys get their clothes stolen by Lulu and Annie while they were swimming, as revenge for a prank that they played on Lulu earlier.
* The Little Lulu episode "Iggy's New Leaf" had Iggy faced with the threat of getting sent to military school if he does one more bad thing, prompting Lulu, Tubby, and Willy to help him stay out of trouble. In the end, however, the three wind up getting sent to military school instead, because of the troubles that they got caught up in that they were trying to keep Iggy from committing, while Iggy gets off the hook.
* The Little Match Girl carries it off. Well, the narrative does not so much carry this trope as flamboyantly juggle it while singing the complete score to Handel's Messiah. Few works treat a little girl freezing to death as such an unequivocally wonderful thing.
* "The Little Match Girl" is this. She is a little homeless girl who dies after burning up all her matches, each one causing her to see a pleasant vision of a life she will never have.
* The Little Mermaid (1970's version) has Marina dramatically dropping a mirror on the floor after the prince told her that he's marrying another princess whom he believes saved his life when in reality it was Marina who saved him.
* The Little Mermaid (1989) about it. Sebastian reacts exactly how you'd react to seeing a room full of butchered human corpses.
* The Little Mermaid (1989), after learning that Prince Eric's bride-to-be Vanessa is actually the sea witch Ursula in disguise, Ariel dives into the ocean to reach the wedding barge...and then remembers that she doesn't know how to swim with legs.
* The Little Mermaid (1989) after she succeeds in hypnotizing Eric away from Ariel in her Vanessa guise. To her credit, she gloats only in the privacy of her room when Eric and Ariel aren't around but Scuttle still overhears her loud singing and is able to inform Ariel in time for them to crash her wedding to Eric.
* The Little Mermaid (1989): After the final battle against Ursula, Eric lies motionless on the beach for a long time. Ariel sits on a rock and watches for him to wake up, finally causing her father to realize that she really does love the guy.
* The Little Mermaid (1989) and wrecks her collection of surface-world objects. He ultimately regains her love and trust when he rescues her from Ursula by willingly taking her place in their deal, proving beyond a doubt that he's truly sorry for his actions, and then overcomes his prejudice by turning Ariel into a human permanently so she can live happily with Eric.
* The Little Mermaid (1989)) are both outcast teenage girls who enjoy learning, and they were the princesses that began the Disney Renaissance. They get shipped a fair sum.
* The Little Mermaid (1989): Ariel and her entire cave filled with human artifacts salvaged from shipwrecks.
* The Little Mermaid (1989) Ariel, at her first dinner with Eric, uses a dinglehopper (a fork) to comb her hair (based on faulty information provided by Scuttle the seagull). She also grabs Grimsby's pipe and blows into it believing that it is a snarfblatt, which Scuttle blows like a trumpet.
* The Little Mermaid (1989). Ariel is a mermaid who's obsessed with the land and

wants to become human, while her daughter, the main character of the sequel, is a human but is drawn to the ocean and wants to be a mermaid. They're not strikingly different in temperament, but their goals are complete opposites.
* The Little Mermaid (1989): Ariel is a very cute mermaid for viewers of all ages to enjoy.
* The Little Mermaid (1989): Ariel is trapped by Ursula at the bottom of a vortex in the climax before Eric plows into Ursula with a ship.
* The Little Mermaid (1989), Ariel was completely unaware that Ursula was using her as a pawn to become the ruler of Atlantica. As quoted by the 2004 Disney Princess storybook:
* The Little Mermaid (1989), a sea witch who turns merfolks into polyps once they failed to meet her demands from her deals.
* The Little Mermaid (1989) at Disney's California Adventure and the Magic Kingdom also qualify. Almost every scene is based around one of the film's musical numbers (the biggest scene in the attraction is the "Under the Sea" sequence), removing much of the actual plot. Remember the climax with the giant Ursula? In the ride, that's represented by a tiny cardboard cutout of Ursula squeezed in-between the "Kiss the Girl" scene and Ariel's wedding.
* The Little Mermaid (1989) can lift himself out of the water with a wave and hold that position channeling and funneling the water.
* The Little Mermaid (1989) does this a few times during the final battle. Her alter-ego Vanessa even pulls one off when she throws a pin at a mirror with enough force to knock it back while gloating about her inevitable victory.
* The Little Mermaid (1989): Eric bursts out laughing when Ariel's attempts to "play" the snarfblast— Grimsby's pipe— cover the man's face in soot. He tries halfheartedly to simmer down.
* The Little Mermaid (1989). Even before King Triton destroys the human treasures belonging to his youngest daughter, he's yelling at Ariel for simply saving the life of another living being.
* The Little Mermaid (1989), Flotsam and Jetsam, Ursula’s pet eels, get this treatment. When they get pretty much vaporized by a stray blast from the trident, a couple of unbroken eyeballs are among the bits and pieces left over.
* The Little Mermaid (1989) from Deviant Art. Similarly, Jim is often shipped with Melody, Ariel's daughter.
* The Little Mermaid (1989) had two scenes that are consistently featured in most of the film's advertisements, usually at the very beginning or very end.
* The Little Mermaid (1989) has a contralto voice, the deepest a woman can have. Fittingly, her appearance is designed after a drag queen.
* The Little Mermaid (1989) has the musical number "Positoovity" in which Scuttle and his fellow seagulls instruct Human Ariel how to walk.
* The Little Mermaid (1989). He chases Ariel and Flounder through the ship wreck, determined to eat them both.
* The Little Mermaid (1989), he throws the trident right through her instead.
* The Little Mermaid (1989). If you think about it, Disney hasn't had that many redheaded couples and there's a mystique between a mermaid girl and a magical, immortal boy together.
* The Little Mermaid (1989), in all the Scandinavian dubs (Swedish, Danish and Norwegian), Ariel was voiced by only one very talented actress/singer, Norwegian Sissel Kyrkjebø.
* The Little Mermaid (1989), King Triton does this, with the glow from his trident, just before destroying Ariel's grotto (as he snarls "So be it!").
* The Little Mermaid (1989) prequel film, give them more varying designs and more individualized personalities.
* The Little Mermaid (1989) reaction to the transformation created by a hot bath and a new dress. His elderly manservant Grimsby is able to articulate it better.
* The Little Mermaid (1989) ride to resume. It finally opened in the summer of 2011.
* The Little Mermaid (1989), Scuttle the seagull acted like an expert on human culture despite knowing next to nothing, which resulted in Ariel trying to style

her hair with a fork while eating dinner with Prince Eric and blowing into a smoking pipe as if it were a musical instrument.
* The Little Mermaid (1989), Scuttle the seagull tells Ariel that before they discovered music, ancient humans "used to sit around and stare at each other all day. Got very boring."
* The Little Mermaid (1989). Sebastian tries to convince her otherwise, but to no avail.
* The Little Mermaid (1989), she points out that turning into a human will mean she'll never see her father or sisters again. Ursula agrees with this observation, then says that if Ariel remains a mermaid, she'll never have a chance at winning Prince Eric's heart.
* The Little Mermaid (1989)'s name, with mixed results ("Mildred?" "Rachel?"). Sebastian the crab has to prompt him.
* The Little Mermaid (1989), so it's likely she thinks those are the actual names for those objects.
* The Little Mermaid (1989) tendencies, and even being seen as a role model for her positive traits. Notably, she is seen as a body-positive icon for loving herself and her body as a bigger woman, and as an icon of female empowerment for being a single, confident, and very powerful woman. It has even reached a point that, during an era of Disney villains getting their own movies to show them from a sympathetic point of view, Ursula is far and away one of the most requested to get one of these movies herself.
* The Little Mermaid (1989), the front door of Ursula's lair is the mouth of a sea-dragon skeleton.
* The Little Mermaid (1989): The giant hands Ursula summons go down Ariel's throat to claim her voice.
* The Little Mermaid (1989). The image of her tentacles curling around her as the screen fades to black can be very frightening.
* The Little Mermaid (1989) the main villainess, is half-octopus. This is most noticeable when she is electrocuted at the end of the film.
* The Little Mermaid (1989): The original fairy tale has a totally different central theme. The story is very religious, and the mermaid is drawn to the humans because she longs for an immortal soul, something that only humans have. She wants to go to heaven after her death, and not to become the sea foam. Marrying the prince was just the means to get that. Although she died by the end of the story, the ending suggests that she might get what she wanted.
* The Little Mermaid (1989), the Sea Witch, never shows up again after making the deal with the mermaid, though she does help the mermaid's sisters with the issue.
* The Little Mermaid (1989), this was Scuttle's response after Sebastian tells him that Ariel had gotten legs (Scuttle knew that something was different about Ariel, but kept guessing right off the bat that it was something else).
* The Little Mermaid (1989): Triton asks Sebastian about Ariel being in love. Sebastian thinks the king knows that she is in love with a human, and blurts it out.
* The Little Mermaid (1989), until Ariel swims away from home, much to Triton's utter despair.
* The Little Mermaid (1989) until he finds out that the two are actually the same person.
* The Little Mermaid (1989): Upon Prince Eric's cluelessness over whether or not the now mute Ariel is the one he's been looking for, his dog Max rolls his eyes and blows hair out of his own face in annoyance, which Ariel mimics.
* The Little Mermaid (1989) upon the reveal of what she really looks like. Also applies to the sequel when you compare Ariel's pretty daughter Melody and Ursula's ugly, skeletal sister Morgana.
* The Little Mermaid (1989), Ursula explicitly uses the form of a beautiful woman to trick Eric into falling for her instead of Ariel.
* The Little Mermaid (1989): Ursula has black tentacles of an octopus.
* The Little Mermaid (1989): Ursula lets out an evil laugh while Ariel turns into a human.

* The Little Mermaid (1989), Ursula's introduction song "Daddy's Little Angel" says this of one of the older sisters she killed. "How could I compete with a girl so heaven sent? Just a spell from the shell, and back to heaven she went".
* The Little Mermaid (1989) version. Flounder sings "Ariel and someone swimming in the sea, K-I-S-S-I-N-G!"
* The Little Mermaid (1989), when Ariel is dragging Flounder along to investigate a sunken ship:
* The Little Mermaid (1989) when Ariel manages to move an underwater boulder (most likely sealed shut with an imbalanced volume on both sides) blocking her Grotto with relative ease.
* The Little Mermaid (1989): When Scuttle tries to warn Ariel about his horrifying discovery, she and Sebastian stare at him in utter confusion. So to get to the point, he grabs Sebastian and slams him down the dock with every word.
* The Little Mermaid (1989) which rises, still singing, on its own, out of her throat. It's quite eerie.
* The Little Mermaid (1989) with Ursula tricking Ariel into giving her her voice.
* The Little Mermaid 1994's "Under the Sea", has the line "I do this crazy dance or else I'm gonna wet my pants."
* The Little Mermaid actually takes a bite out of Vanessa's behind right before she reverts back into Ursula.
* The Little Mermaid adaptation has a version of the smiling from the clouds bit for the final shot.)
* The Little Mermaid, after a pan falls onto his foot while he is chasing after Sebastian. He briefly hops in pain, clutching his hurt foot in both hands.
* The Little Mermaid, after Triton gives Ariel legs (and a sparkly dress) she runs to Eric, who's still on the beach after the showdown with Ursula, and they share one, which transitions right into their wedding scene.
* The Little Mermaid (also a member of a fairy race, but is considered a wicked witch to merfolk).
* The Little Mermaid) also helps. Less we forget, Ursula rigged her deal with Ariel for the purpose getting King Triton to surrender his soul and his ruler-ship of the sea to Ursula.
* The Little Mermaid also led to other animated musicals, not just from Disney, but from other animation studios.
* The Little Mermaid. Although Prince Eric appeared more time on-screen than the other princes since he is saved by Ariel, his main objective is to be Ariel's love interest, the latter serves as a reference for Ariel to be even more animated to go to the surface.
* The Little Mermaid among the Disney princes. In the film's climax, he kills the sea witch Ursula.
* The Little Mermaid: Andreas Deja, the lead animator for King Triton, described the character as being strict and by-the-book and would often get mad at Ariel, then feel guilty afterwards, which reminded him of his own father.
* The Little Mermaid, and several adaptations that came after followed the same concept of the mermaid successfully winning the prince and becoming his bride.
* The Little Mermaid), and since none of the human characters know the mermaid's problem, you can't really blame them for not helping her out.
* The Little Mermaid, a nervous Sebastian approaches King Triton, trying to maintain a calm, dignified appearance. But when he speaks he lets out a squeaky "Yes?" before composing himself and speaking in his regular tone of voice.
* The Little Mermaid are examples of this, with unflattering face molds and light auburn hair as opposed to Ariel's signature vibrant red. However, this was only the very first release, as Tyco quickly worked to improve their quality of work and released several more accurate Little Mermaid dolls that same year that better reflected Ariel's iconic design, with better face molds and increasingly redder hair.
* The Little Mermaid are in. The earliest materials have Aquata as the oldest but later material usually have Attina, likely due to her crown. Disney has flipped between the two since.

* The Little Mermaid) are the undeniable queens in Disney Femslash, thanks to a popular artist pairing them up. To consider, in canon, Meg DOES like redheads.
* The Little Mermaid: Ariel is fully capable of writing, so even if she can't speak, why didn't she just write a note to Eric that she was the person who saved him? Even the creators of the movie admitted to missing this oversight and just hoped that audiences would glance over it.
* The Little Mermaid, Ariel likes calling Flounder a "guppy" when he gets scared.
* The Little Mermaid: Ariel saves Eric from drowning, and he falls in love with her voice. Then he saves her from being disintegrated by Ursula.
* The Little Mermaid: Ariel's grotto full of human objects, including a large statue of Prince Eric, which King Triton destroys when he finds out about it.
* The Little Mermaid: Ariel sighing so that it blows her bangs upward, and biting her lower lip when she's excited or upset.
* The Little Mermaid: Ariel's Undersea Adventure among the fish in the "Under the Sea" scene.
* The Little Mermaid as a background character, causing confusion; This is a nod to Limpet cameoing as a background character in "Under the Sea" in a crowd shot.
* The Little Mermaid, as Flounder tells King Triton where he and Ariel have been, he briefly turns into a seagull when he comes to the part when they talk to Scuttle.
* The Little Mermaid, as he did managed to stall the wedding and destroy Ursula's amulet, restoring Ariel's voice and breaking Eric from Ursula's spell, and therefore leading to Ursula's defeat.
* The Little Mermaid as part of the attempt to crash the wedding and buy time for Ariel, Scuttle gets a bunch of seagulls to buzz Vanessa.
* The Little Mermaid: Atlantica's official Court Composer, Horatio Thelonious Ignacious Crustaceous Sebastian.
* The Little Mermaid at the end of the song introducing Triton's daughters, when Ariel is a no-show. It's more clear on the soundtrack recording.
* The Little Mermaid: Before "Kiss the Girl" even hits the screen there's a love montage between Ariel and Eric touring the kingdom.
* The Little Mermaid believes a smoking pipe is a musical instrument and tries to play it. Later, when he tries to create a romantic mood for Ariel and Eric by singing, Eric remarks, "Someone should find that poor animal and put it out of its misery." He briefly joins other singers in the "Kiss the Girl" sequence, but they force his beak shut.
* The Little Mermaid, but has a bombastic, hammy and snarky personality to boot. Her eel minions, Flotsam and Jetsam, are creepy with only sporadic moments of comedy.
* The Little Mermaid, calling it a film about "a dumb girl who sold her soul for a vagina and a man she didn't know". Later on, she parodied this by dedicating a video to her friends staging an "intervention" in which she explains her opinions in more depth, the others explain why it's a great film, and in the end, she breaks and joins in the singing of "Part of Your World".
* The Little Mermaid depicts humpback whales with teeth instead of baleens.
* The Little Mermaid: Eric is presented with a large, extremely gaudy statue of himself and raises his eyebrow, less than pleased, while his dog Max snarls at the statue in complete disapproval.
* The Little Mermaid fate is eventually going to befall the Little Mermaid's sisters and family if they don't act as she did.
* The Little Mermaid form, we got a silhouette of her laughing with her head thrown back and her tentacles waving. However, with Ariel's painful transformation from mermaid to human, in which her tail is literally torn in two, they only darkened the lighting a bit. If you lighten the screen on your monitor during her transformation, you can see plenty.
* The Little Mermaid form, where despite possessing Triton's trident, she lacks the ability to cast lightning or summon shipwrecks, only controlling the sea currents.
* The Little Mermaid for one of her children to protect the child from dangerous pirates.

* The Little Mermaid had the Witch as not being evil, just neutral and clearly warning of the risks. In at least some versions, she even informs the mermaid's sisters about how to save her.
* The Little Mermaid has Ariel, who frustrates her father with how energetic and adventurous she is.
* The Little Mermaid has a scene where Ariel runs down the stairs that is CG. It's painfully obvious, but it's also on the screen for about a minute.
* The Little Mermaid has only five not-very-long stages, disappointing reviewers.
* The Little Mermaid has Prince Eric's English sheepdog, Max. He is fond of jumping around and licking Eric and Ariel's faces on various occasions.
* The Little Mermaid has some of the funniest, a particular one being "Daughters of Triton", meant to be the singing debut of Ariel, which is interrupted when she doesn't show. Apparently mermaids don't have aquatic stage managers.
* The Little Mermaid has the sea witch cut off the mermaid's tongue as payment for the human legs.
* The Little Mermaid. He just loves (maybe a little too much) to cook fish. Not knowing they were actually sentient.
* The Little Mermaid human Ariel learns dance as a nonverbal method of communication during Eric's "One Step Closer" number.
* The Little Mermaid II Don't forget Flotsam and Jetsam to Ursula from The Original.
* The Little Mermaid III: Ariel's Beginning are stuck in. It's even pointed out by one of the prisoners trying to convince him to pick the lock.
* The Little Mermaid III: Ariel's Beginning: In the prologue, King Triton does this as a pirate ship is about ram into Queen Athena.
* The Little Mermaid III: Ariel's Beginning. Queen Athena looks exactly like Ariel, albeith with green eyes, orange hair and a turquoise tail.
* The Little Mermaid III: Ariel's Beginning replaced him for that movie.
* The Little Mermaid II: Return to the Sea after King Triton freezes her inside a solid block of ice and is tossed back into the ocean.
* The Little Mermaid II: Return to the Sea: Ariel, to Melody, but only by hiding a part of her heritage in order to protect her. The dramatic music playing in the background when Melody bursts into tears because of Ariel's reprimand makes clear that the writer considered this was serious business. Perhaps her only mistake was not to trust her for the case.
* The Little Mermaid II: Return to the Sea, Ariel wears her hair tied up in a bun whenever she is on dry land, symbolizing how much more stern and strict she is. When Triton transforms her back into a mermaid, her hair comes undone and falls loose freely. After the ordeal is over, Ariel is shown wearing her hair down as a human to reflect her change in character.
* The Little Mermaid II: Return to the Sea cover her midriff, but after she becomes a mermaid her shirt turns out to be to short to conceal it without her pants.
* The Little Mermaid II: Return to the Sea follows the adventure of Ariel and Eric's daughter, Melody.
* The Little Mermaid II: Return to the Sea "Gonna Get My Wish" is cut.
* The Little Mermaid II: Return to the Sea had protagonist Melody voiced by a girl who won a TV contest.
* The Little Mermaid II: Return to the Sea has Ariel's daughter Melody meeting a penguin named Tip, who works with a walrus named Dash.
* The Little Mermaid II: Return to the Sea has Morgana's minion, Undertow the giant tiger shark who spends most of the movie trapped in the body of a piranha thanks to King Triton's magic.
* The Little Mermaid II: Return to the Sea is surprisingly insightful as he tells Morgana that she cannot keep trying to blame Ursula for her own failures, and asking Melody what kind of friends Tip and Dash are if they would abandon her at the first sign of danger. Even Morgana herself is quite insightful as she cruelly yet rightfully pointed out that it was wrong for Ariel to hide her mermaid heritage away from Melody, otherwise the latter wouldn't run away and hand over the trident to Morgana; even Ariel sadly admits to this following Morgana's defeat.

* The Little Mermaid II: Return to the Sea, it has been implied that Melody did not have any friends and the only person she talked to was Sebastian. Also, she's shown to be mocked for talking to sea creatures.
* The Little Mermaid II: Return to the Sea, kicking her tentacled butt. Before that, Melody's shown just beginning to be taught duties like having to show up and be gracious at royal gatherings.
* The Little Mermaid II: Return to the Sea, Melody is never told why she's not to go beyond the seawall. This becomes extremely problematic once Melody finds her grandfather's gift to her. She's also never told that Morgana is dangerous, and this allows the witch to manipulate Melody very easily.
* The Little Mermaid II: Return to the Sea. Melody's father Eric is human; her mother Ariel was born a mermaid.
* The Little Mermaid II: Return to the Sea: One of the sons of Flounder looks exactly like the younger Flounder. In fact, the boy looked so much like Flounder, that Ariel initially mistook him for Flounder.
* The Little Mermaid II: Return to the Sea. The new villain is even directly related to the old villain and also wants to steal King Triton's scepter to take over the sea!
* The Little Mermaid II: Return to the Sea; there wasn't even any implication of Ursula having a sister, and the old characters already know her. Some fans believe that the only reason Morgana was created is that Pat Carroll wanted to return for the sequel, despite Ursula being long dead.
* The Little Mermaid II: Return to the Sea, this is how Morgana saw her older sister Ursula, because of how their mother favored Ursula over her.
* The Little Mermaid II: Return to the Sea: To keep her daughter from endangering herself in the sea, Ariel has an enormous wall built around the palace to separate them from it. However, by 12, Melody has learned a way through it: a loose bar on one of the gratings allows her to squeeze through.
* The Little Mermaid II: Return to the Sea, Ursula's sister Morgana does this when Melody starts her quest for Atlantica. Maybe being dramatic runs in the family.
* The Little Mermaid II: Return to the Sea when she's transformed back into a human and Morgana locks her up in unmeltable ice. Melody's friends Tip & Dash have to save her.
* The Little Mermaid in the history of Disney animation (more than once, to top it all).
* The Little Mermaid in the late 1930s, Kay Nielsen helped create concept art for the proposed production. When the film went into full production in the 1980s, Nielsen's work was used as inspiration for the film's design, and he received a posthumous "visual development" credit (Nielsen passed away in 1957, 32 years before the film's release).
* The Little Mermaid," in the older versions of the story, represented purity. She gave up her underwater kingdom, her wealth, and her fins all for love. At the end of the story, she is unable to kill the Prince, even though he has fallen in love with another woman. Refusing to murder him out of revenge she instead commits suicide, jumping into the sea and becoming sea foam. Later versions give her a slightly happier ending by having her rescued from becoming sea foam by air spirits, who bring her to dwell as one of them. These versions try to invoke a morality in their readers by explaining that the air spirits can eventually become angels if children are good, but that they are kept from their goal whenever children misbehave.
* The Little Mermaid: In the "Tour of the Kingdom" sequence, Eric hands Ariel the reins to the carriage, and she ends up driving over a ravine. However, after jumping the ravine, she seems to ease up a bit.
* The Little Mermaid, in "The World Above (Reprise)" King Triton warns Ariel to stay away from the human world and Prince Eric or else he'll ground her "till next year."
* The Little Mermaid, is about to kill Ariel with the trident, and just before that, she declares...
* The Little Mermaid is also a prequel to the first movie that would generally be

consistent with the series but features a totally different version of Ariel and Flounder's first meeting than was presented in the series. Or it's just the one episode about their meeting that is touched — it has not been clarified.
* The Little Mermaid is like this to Flounder and is always looking out for him when she takes him on her adventures. Not to mention, she can even be playful with him. Since Ariel only had sisters, Flounder acts as her surrogate little brother.
* The Little Mermaid is named Glut in the script. That name eventually made its way to merchandise too.
* The Little Mermaid: King Triton first blows up a globe in Ariel's grotto with his trident, then does the same with the rest of Ariel's human things (it's something he quickly regrets).
* The Little Mermaid, made during the film's original 1989-90 release, were either partially or entirely re-dubbed for the late-90s re-release. The most likely reason is that Disney USA wanted to replace Ariel voices that were too different from the original Jodi Benson. Other reasons claim that it was a specific request by Disney USA in Europe, which imposed the re-dub of the film, when it re-released in theaters to test their new DTS mixing device designed in their lab.
* The Little Mermaid make sure she stayed in line if she were his daughter.
* The Little Mermaid movie happened, possibly to avoid retcons. Since she no longer was a mermaid at the end of the first movie, naming the series "The Little Mermaid" in a post-movie setting would have been a bit silly.
* The Little Mermaid notions about us, mostly courtesy of her seagull friend whose info is completely off base.
* The Little Mermaid. Not only was the transformation excruciating, but afterwards she felt like she was walking on knives the entire time she was transformed.
* The Little Mermaid out of a similar experience in his life: he fell in love with a man he could never have, both because the man was already engaged and because back then, same-sex relationships were a taboo.
* The Little Mermaid played the trope pretty literally; Ariel was so miseducated about the human world that she did wacky things like combing her hair with a dinner fork, or mistaking a pipe for a musical instrument.
* The Little Mermaid referring to humans as "Fish-Eaters" since the fish are sentient.
* The Little Mermaid. She has the tendency of getting her hair out of her face which translated into Ariel's bang blowing and in the way Belle always pushes a hair lock away from her eyes. Also, Ariel's lip biting.
* The Little Mermaid siblings. They were originally meant to be so in the film as well, but the scene telling this detail was deleted.
* The Little Mermaid, so the background character is really the only instance in the film.
* The Little Mermaid story appear several times and even help her. In the Disney film, they only briefly appear (though they're given more screentime in the prequel film, cartoon series, books, and comics).
* The Little Mermaid, the dancing "sea creatures" during "Under the Sea" have showgirl-style costumes.
* The Little Mermaid: The entire film seemingly takes place over the course of a week.
* The Little Mermaid, the movie opens with Ariel and Flounder exploring a sunken ship. Flounder ends up getting stunk in a porthole twice, once in trying to get into the ship and again when Ariel and he are attacked by a shark and must flee, both times requiring Ariel too pull/push him through. Said shark is likewise prevented from pursuing them when it gets stuck in the hole of an anchor handle.
* The Little Mermaid the prince, just for the sake of moving the story forward. The Disney version somewhat justifies this by implying the beach Eric's castle is located in is the one that's closest to Atlantica.
* The Little Mermaid, there was a frenzy for mermaid-related products and media, something which still continues to this day.
* The Little Mermaid the same thing, is is not actually "Yah, but she don' know how to use dem."

* The Little Mermaid: The Series: An episode did this. Ariel was grounded (or "beached") at the palace while Triton was away, and had to stop two saltwater crocodile thieves from looting the palace.
* The Little Mermaid: The Series, Ariel is voiced by Ariel Konstantinidi.
* The Little Mermaid: The Series as King Triton's advisor before being replaced by Sebastian.
* The Little Mermaid: The Series, this actually succeeds in making Little fall asleep.
* The Little Mermaid: The Series used an instrumental medley beginning with "Part of Your World," continuing with "Under the Sea," then "Kiss the Girl," then "Under the Sea" again, then "Part of Your World" once more and ending, once again, with "Under the Sea."
* The Little Mermaid: The Series venture deep into the depths of the sea to verify the existence of Ariel's own species. Andersen's encounter with the mermaid then inspired him to write her story, by which the show's narrator tells the audience to go to the nearest library and find HCA's stories.
* The Little Mermaid: The Series was at the climax of the original movie (if not larger). Ariel uses the wand, wishing Sebastian was his "Old Self", which literally turns him old, with a long beard and spectacles (but still a giant). Ariel then gets fed up and manages to "correctly" wish that the wand was never found.
* The Little Mermaid: The spell that turns Ariel into a human only lasts for three days; to make it permanent, she needs to get Eric to kiss her (specifically, "the kiss of true love," per Ursula) before the third sunset.
* The Little Mermaid to Too Good For This Sinful Earth. Depressing, but not hopeless — which could well be the point.
* The Little Mermaid trope. So it reconstructed the Disney formula before anyone thought to deconstruct it.
* The Little Mermaid TV series did this, with Ariel and one of her sisters having to fend off a pair of bumbling saltwater crocodile thieves while they were "beached" (that is, grounded) at the palace.
* The Little Mermaid TV series, the Evil Manta has a pet known as the Brain Sponge, which he tries to unleash on Ariel to sap her imagination. Since his son Little Evil interferes, it's the Evil Manta who nearly gets his brain drained, but Ariel and Little Evil defeat the Brain Sponge and save him.
* The Little Mermaid, Ursula dies in this manner after Ariel destroys her nautilus shell.
* The Little Mermaid, Ursula takes Ariel's voice for herself when giving her human legs, which makes it tricky (but not impossible) for Ariel to gain Prince Eric's heart.
* The Little Mermaid, Ursula was noticeably not as nice to Flotsam and Jetsam as she was in the movie. It's possible she's grown more attached to them as time progressed.
* The Little Mermaid: Vanessa's wedding is played very comically for slapstick. Birds fly under her dress, pelicans dump water, dead fish and lobsters all over her, starfish cover her body from face to waist, seals bounce her like a ball, she gets thrown on top of her own wedding cake and covered in the frosting head to toe before being sprayed by water yet again. This is particularly notable for the inversion of the hyper-feminine beautiful woman as the target.
* The Little Mermaid version, she doesn't get a soul - yet. She gets turned into an air spirit that, after a preset amount of time, will get an immortal soul. As an extra twist, whenever she passes through a house with a well behaved child, she gets a few years knocked off her sentence. Ill behaved children add years. That's right, kids. If you don't eat your vegetables... you're preventing mermaids from going to heaven.
* The Little Mermaid were far more focused on the underwater adventures.
* The Little Mermaid, when discovering that Ariel had failed to turn up for her debut in the concert, King Triton growls out her name in extreme fury while his eyes turn to a bloody shade of red.
* The Little Mermaid when he sees Ariel with Eric during the reprise of "Part of

Your World". Scuttle does the jaw-closing honors.
* The Little Mermaid when the servants are trying to figure out why Prince Eric invited Ariel who can’t talk to dinner.
* The Little Mermaid) when turning into her, as she talks to her mirror in a manner similar to a schizophrenic, emits a psychotic grin when throwing a pin at a mirror's head with enough velocity to knock the mirror back, and most certainly kill a person had that been a human being, not to mention her cackling.
* The Little Mermaid, which is shown off during the shared song "Daring to Dance".
* The Little Mermaid, who imparts such wisdom as a fork being called a "dinglehopper" which humans use to comb their hair.
* The Little Mermaid with her, sings of how she [Ursula] uses her powers to help people. The song's hypocritical in that Ursula makes herself seem to come off in the very best light. While she does help people, she compares herself to a saint, but she also always has something to gain from her deals, and she goes out of her way to make sure that those under contract will fail to uphold their end of the bargain.
* the Little Miss No-Name doll on her cheek and packaging showing her standing outside in a snowstorm, waiting for a loving owner to take her home and give her the love she needed. Unfortunately, she looked more unintentionally terrifying than cute, and didn't sell well. She ended up being discontinued after only a year of production.
* The Little Mole only speak in an unintelligible gibberish, apart from a single word or two.
* The Little Painter: Pierre is immediately head-over-heels for Princess Creme Brule when he meets her for the first time.
* The Little Painter: Pierre is sent to one as punishment for tricking King Croissant and Prince Deja Vu into thinking Princess Creme Brule is ugly.
* The Little People", the planet on which the astronauts William Fletcher and Peter Craig land to repair their ship has two suns.
* The Little People" uses footage from a Mercury Program launch to represent William Fletcher departing.
* The Little Polar Bear currently has two animated incarnations. The first was made in the 1990's, and the films and TV series in the 2000's.
* The Little Pony Legend and continuing the legacy of their predecessors.
* The Little Pony Legend in a battle at the southern spirit portal to save the 3 worlds. (again)
* The Little Pony Legend, many of the characters lamenting that their lives are almost boring now that they saved the world.
* The Little Pony Legend, The anthro transformations of Twilight, Rainbow Dash and Fluttershy retain their pony-form's wings.
* The Little Pony Legend: The "season" The Nightmare's return serves as a "season" long version of this to upgrade Bolin and Asami.
* The Little Pony Legend, this tends to crop up a few times. While neither Korra nor the ponies ever think life is boring, they do sometimes hit ruts in their lives. Such as when Korra managed to fix the spirit vines in book 3. Or the beginning of Shadow of Ronin. Even after getting her own palace, marrying, having a daughter, and establishing peace, Korra still missed the adventures and drama of saving the world some.
* The Little Prince (2010) are used as police troops by the inhabitants of the Planet of Wind.
* The Little Prince (2010) is this trope in its purest form. His modus operandi is to compel the most important person on every planet to indulge into their whims, with always disastrous results for their world. Naturally, he attempts it with the title hero too, trying to convince him to return to Asteroid B612 and leave the Snake free to corrupt people.
* The Little Prince (2010): On the Planet of Time, each town's time is self-contained and is controlled by the town's clock. Stopping that clock leaves its inhabitants frozen in time.
* The Little Prince (2010): This is what the powers of the Little Prince amounts

to. Besides multi-usage sheeps, he can summon many fantastic creatures or items for the task at hand simply by drawing them. Strangely, despite this he's always puzzled when people call him a wizard.
* The Little Prince (2015): The Girl, who's 9 years old, and the Aviator, an old man who tells her about his meeting with the Little Prince.
* The Little Prince. He meets a king who reigns over everything, tolerates no insubordination, but only gives reasonable orders.
* The Little Prince is implied to be this. Note how desperately he tries to get the Little Prince to stay.
* The Little Prince or it does not. The author notes that the world appears to change depending on what he thinks has happened.
* The Little Prince than most neighboring planets. And he keeps encountering new stuff on it every day, including baobab trees.
* The Little Prince, the Little Prince is depicted as having golden hair and is a symbol of innocence and childhood.
* The Little Prince, the narrator explains how he once drew a picture of a snake that had swallowed an elephant, and all the adults told him it was a very nice hat.
* The Little Prince to their children 'so that [the parents] learn to treat their children like persons'.
* The Little Prince visits a planet with no-one but a tippler on it, he inquires why the man is drinking constantly:
* The Little Prince who discovered Asteroid B-612 got this treatment - not for anything particularly revolutionary in his work, but because he presented it while wearing traditional Turkish costume. A subsequent presentation in western dress was better received.
* The Little Prince you can feel thanks to the physical effects (blast of a air and bright light timed to the movie).
* The little "Psycho Teletubby" creatures on the alien planet. They also fit the
* The Little Rascals (1994) was given a PG rating for rude humor, most notably the "Finders keepers, losers suck!"/"Oh, bite me!" exchange.
* The Little Rascals: Alfalfa and Spanky in ballerina drags. Bullies Butch and Woim find them quite attractive.
* The Little Rascals, Alfalfa and Spanky's dads look like adult versions of their kids.
* The Little Rascals animated short "Rascals' Revenge", Butch does this to Alfalfa in the abandoned house.
* The Little Rascals as "May I die slowly and painfully and suffer for hours or until I scream bloody murder."
* The Little Rascals as Spanky and Alfalfa both accidentally look in two different rooms and surprise the girls while saying "Whoops" both times. It continues as Butch and Woim then do the exact same thing in pursuit of them
* The Little Rascals: Butch kicks the gang's football into an abandoned house, and dares them to go retrieve it, despite Officer Ed telling the Rascals that the old house is private property.
* The Little Rascals, Courtland Mead, the actor who portrayed Uh-huh, is seen putting a pencil in his nose.
* The Little Rascals dance as if they were marionettes (though no strings are visible).
* The Little Rascals Darla does the kid version of this, crumpling a soda can in her hand to show her anger at Alfalfa.
* The Little Rascals, Darla fell ill just before the big baking contest, so Alfalfa had to dress like a girl and take Darla's place.
* The Little Rascals, Darla flattens Alfalfa's hair point and then gives him a kiss, causing his hair to spring right back up again.
* The Little Rascals episode "Beauty Queen for a Day", Porky offers Dolly Van Dumpling a mayonnaise and pickle sandwich. After she refuses, Porky eats the sandwich himself.
* The Little Rascals episode "The Case of the Puzzled Pals", Alfalfa and Darla find such a clue via pencil rubbing on the notepad Spanky used in taking a call from his

mother.
* The Little Rascals episode "The Zero Hero", Spanky, Buckwheat and Porky do this as they watch Darla and Captain Muscles' encounter with the bank robbers.
* The Little Rascals episode "The Zero Hero": The bank robbers are presumably adults, but they're only about half as tall as Darla.
* The Little Rascals episode "The Zero Hero", three little men rob a bank while Darla is on her date with Captain Muscles. Darla's hero stops the robbers, but one of them is smart and deflates his costume. Alfalfa as Alpha-Man doesn't fare much better.
* The Little Rascals episode "Yachtsa' Luck": first by Wheelhouse Willie after he and his henchman, Slats, rob the treasure chest on Waldo's yacht, and then by Alfalfa and Spanky when they're afraid of Waldo blaming them for the theft.
* The Little Rascals face on the money. It was rather easy for the police to pin him to the crime when he was caught.
* The Little Rascals features these as a guard chases after the eponymous gang of kids when they trespass inside of a movie studio. The results are still hilarious.
* The Little Rascals film, "Free Wheeling," Stymie, Dickie, Spanky and Darla have a wild ride downhill ride in a taxi cart which Stymie barely manages to bring to a safe stop. Afterward, most of the gang is going "Let's do it again!" However, Stymie, realizing the danger they were in, goes "Not me!"
* The Little Rascals had Alfalfa serenading Darla. Alfalfa's off-key singing scared Pete away.
* The Little Rascals in 1935/36, parents all over the country were naming their baby girls "Darla".
* The Little Rascals: In "King of the Hobos", after Porky introduces his friends to Boxcar Bill, Darla asks the hobo to wash all the windows on her house.
* The Little Rascals In more than a few episodes, the children wonder where their next meal is coming from.
* The Little Rascals: In "Pete's Big Break", after Pete rescues a puppy from drowning, the father of the girl who owns the puppy hires Pete and the kids for a TV dog food commercial. Unfortunately, since Pete ate so much dog food during rehearsal, Alfalfa has to wear a dog costume and take Pete's place. Alfalfa thinks he'll be eating canned chili, but due to Porky's mix-up, he ends up eating actual dog food. Chaos ensues, and the little girl's puppy ends up eating the dog food.
* The Little Rascals: In "Poached Pooch", Butch and Woim disguise themselves as a bush and a fire hydrant, respectively, to steal Pete's collar.
* The Little Rascals: In "Rascals' Revenge", a fake spider sends Alfalfa backward into a coat rack with one of Captain Mildew's jackets hung on it. Thinking he's been captured by the ghost of Captain Mildew, Alfalfa exclaims, "I'm too young to walk the plank!"
* The Little Rascals: In "Rascals' Revenge", as the kids approach the abandoned house:
* The Little Rascals international kennel clubs, however). American Pit Bull Terriers are combined with American Staffordshire Terriers in the AKC. Thus, Petey is listed as an Am. Staf on their breed site despite many others considering him an American Pit Bull Terrier.
* The Little Rascals, issued to commemorate the Rascals' 75th anniversary, came with a plushie of Pete the Pup.
* The Little Rascals: Made in 1982, set during the latter parts of the decade.
* The Little Rascals — Children's comedy series. 220 short films between 1922 and 1944.
* The Little Rascals movie: Porky pushed the race track arrow from right to straight.
* The Little Rascals right hand." Justified by how these are young children, some of which are still unable to read and likely new to the concept of directions.
* The Little Rascals series, the boys had a "taxi" that was powered by a mule/donkey pushing from the back and a carrot on a stick in front of it was used to make it push.
* The Little Rascals short "All the Loot That's Fit to Print", Alfalfa, Buckwheat,

Porky and Pete wear these after they become amateur newspaper reporters. Darla and Spanky wear their press cards on their lapels.
* The Little Rascals short "Readin' and Writin'", one of Brisbane's pranks is to put tacks on all of the other students' chairs. Miss Crabtree has everyone sit down on her count, leading to a chorus of yells.
* The Little Rascals short "The Pinch Singer" the gang auditions for a talent show and during Buckwheat's act he pretends to whistle to a prerecorded tune on a record but it gets stuck at one point and he has to pretend to go along with it for a long time until Porky finally hits the record allowing him to finish the song.
* The Little Rascals short "Thundering Fleas", after seeing one of her sister's wedding rehearsals, Mary decides to pretend marry Joe. Mary is a lanky girl while Joe is a chubby, short boy.
* The Little Rascals short "Thundering Fleas" features animated, anthropomorphic fleas alongside the live action footage.
* The Little Rascals singing is made even worse when he swallows a stopper valve. When he sings his song every line is punctuated by a high whistle.
* The Little Rascals, Spanky and Alfalfa are being chased by Butch and the Woim and they run into a ballet theatre. In the next cut, they have put on ballerina costumes and wigs to hide as mannequins. Unfortunately, Alfalfa was dumb enough to answer Butch's question of where they are with "Nobody here but us dummies" while Spanky can only turn his head and glare at his friend, the only real dummy in that room.
* The Little Rascals, Spanky and his gang set up their own version of “Ripley’s Believe It Or Not” to try to raise money. Spanky claims one of the exhibits to be “The Man-Eating Chicken”. Though, this actually is one of the kids dressed like a chef with a big goofy mustache who is eating out of a bucket of chicken. So it wasn’t a man-eating chicken, it was a “man eating chicken”!
* The Little Rascals, the Rascals have a wooden vehicle which Pete pulls while pursuing a bone.
* The Little Rascals, to the point where they start the He-Man Woman Haters Club. Darla then walks by and Alfalfa becomes smitten with her, ignoring his oath. In the 1994 movie, they still act this way until the sudden break-up (no thanks to Spanky's plan to botch the date), making Alfalfa try to win Darla back in the course of the movie, and at the last part of the movie, everyone in the cast end up with one.
* The Little Rascals was hit by this in 1938, when the series moved to MGM. Fans of the shorts criticize the MGM years for growing progressively unfunny, removing the charm that the Hal Roach shorts have, and becoming moralistic, preachy and patriotic.
* The Little Rascals, when a child tries to use a hose to put out their burning clubhouse, he gets lifted up in the air and flung around.
* The Little Rascals. When Lois is introduced to the class, Quagmire (Alfalfa)'s spike of hair shoots up.
* The Little Rascals: While the girls have a slumber party and the boys are in the treehouse it cuts to both the girls and boys having conversation at different times.
* The Little Red Hen is known for its aesop that if you want something, you have to work for it. However, you can also get the exact opposite moral from the story; the first thing that happens in the story is the little red hen coming across some wheat seeds - had the hen never found those, no bread would ever have been made. Because finding the seeds didn't require work, you can interpret it as saying that luck is needed to reach success.
* The Littles: As the last line of the theme is sung, Dinky runs to dot the "i" in the DiC logo with a button before hopping away.
* The Littles books, Lucy Little wrote to an author of books about giants suggesting she write a book about little people with tails. The writer likes the idea of little people, but finds the idea of them having tails silly.
* the little's bullet time sequence, when the towel slipped and his chin and mouth

were visible.
* The Little Shepherd of Kingdom Come, Miss Jennie cites the half-your-age-plus-seven rule as a French saying, possibly referencing Max O'Rell.
* The Little Shop of Horrors changes those names to "Krelborn," "Dr. Orin Scrivello," and "Audrey II".
* The Little Shop of Horrors has a laughing Audrey II breaking through the movie screen.
* The Little Shop of Horrors, he's an alien so there are probably more of them in space but the only other one we see is in Seymour's flower bed after the original Audrey II is killed.
* The Little Shop of Horrors, however, he only appears in two scenes, one of which is a background cameo.
* The Little Shop of Horrors—one of Mushnik's regulars eats flowers straight from the bouquets.
* The Little Shop of Horrors, Mr. Mushnik returns late to the shop to get some money to pay his restaurant bill and sees Seymour feeding body parts to the plant. He instantly dashes back to the restaurant and demands alcohol—any kind they've got, as long as he gets drunk.
* The Little Shop of Horrors wanted to get one more movie made before a new law on actors' residuals went into effect in the new year.
* The Little Shop of Horrors was filmed in less than 48 hours. It was even shot on sets from another movie, before they were dismantled.
* The Little Shop showed up — played lightly for laughs — in
* The Little Shop That Wasn't There Yesterday and then disappears when it causes trouble.
* The Little Shop That Wasn't There Yesterday magical: the Circus of Fear need not be magical, though it usually is.
* The little sisters will original call for the protectors to kill you, but then seem more friendly and innocent once restored to 'normal' however later they will
* The Littles, looking for shelter from the rain and light flooding. This especially is a threat to the Littles, due to their small mouse-like size.
* The Little Soldier), the soldier rescues a princess, but is not awake when she comes to fetch him away, a condition she set up so she would not have to marry him. In his search, he's helped by a fisherwoman, and he finds the princess, whereupon she tries to rob and cheat him. He goes back to the fisherwoman and marries her.
* The Littlest Angel, all the angels in Heaven are asked to bring gifts for the birth of Jesus Christ, the best of which will become the Star of Bethlehem. The titular angel, a small boy, brings a box of his earthly possessions from when he was human: a broken dog collar and some shiny pebbles. Because of its sentimental value, the littlest angel's box of trash is chosen over the more elaborate and costly gifts of the other angels.
* The Little Stark, while Ariel is attached to Triton, she also comes to be very fond of Tony, to the point that Pepper Potts notes that one thing she can trust Tony to do is take care of Ariel.
* The Littlest Cancer Patient celebrating their victory as if they had been the protagonists.
* The Littlest Hobo is a Canadian television series that chronicled the journeys of an unnamed heroic German Shepherd who travelled from town to town, helping people in need.
* The Littlest Hobo: The goal of Hobo's companion in the two-parter "Manhunt," who killed a man in self-defense... but the weapon that he was attacked with is missing, and without it he faces a murder charge.
* The Littlest Hobo) the title dog gets caught up in the dogfighting circuit for a short period.
* The Littlest Hobo was this kind of series, only the central character was a dog.
* The Littlest Hobo would always leave at the end of the episode. As the show's theme song sums up: "There's a voice...that keeps on calling me...down the road, that's where I'll always be..."
* The Littlest Light on the Christmas Tree and the ballerina ornament, who was mute

aside from a brief cry)
* The Littlest Light on the Christmas Tree had a small scene where a weather report about a winter storm warning interrupted the music station Timothy's mother was listening to.
* The Littlest Light on the Christmas Tree was released straight-to-video.
* The little subplot in the Season 2 premiere involving Joey, Chandler and Monica's haircuts came from the actors cutting theirs between seasons and the show deciding to incorporate it.
* The Little Things (2021), medical examiner Flo Dunigan asks out Denzel Washington's deputy sheriff Joe Deacon at the end of a long autopsy scene by asking "Are you hungry?"
* The little town of Alcasser in Spain was the location of a gruesome and very highly-covered kidnapping and murder of three local teenage girls in 1992. Due to the
* The Little Town With an Accent", Face and Murdock trail the antagonist of the week back to his home base, where they find gangster Sonny Marlini. Face describes Marlini to Hannibal as tanned, healthy, and homicidal.
* The Little Trashmaid: One strip features Tidy working out in order to build the muscle to open a jar. She fails and takes it to Ricky for help, who reveals that she was simply turning it the wrong way.
* The Little Trashmaid, Tidy believes that a large black-and-purple octopus-shaped heap of trash is actually Ursula, and has an intense one-sided off-screen fight with it.
* The Little Trashmaid: Tidy isn't the brightest bulb thrown into the ocean. Her reaction to being given a bag with a shirt in it was to wear the bag like a shirt, and use the shirt as a bag.
* The Little Trashmaid: Tidy is would be a firm believer in "One man's trash is another man's treasure".treasure" if she knew what "trash" was. A lot of comics are about how Tidy is fascinated by the garbage around her, thinking of them as treasures.
* The Little Trashmaid: When Tidy finds a deflated dolphin floatie sinking in the sea, she mistakes it for an actual dead dolphin and holds a funeral for it.
* The Little Vampire: A book series about a boy who befriends a friendly vampire family.
* The Little Vampire" Anna gives Tony a good luck charm (dead mouse), and tells him to whistle if he ever needs her help. He later does so when Rookery shuts him in a coffin, and Anna, as promised, shows up to let him out.
* The Little Vampire, Anton frequently disguises himself as a vampire to be able to attend the festivities of his vampire friends.
* The Little Vampire of the books. A young boy befriends a family of vampires.
* The Little White Horse, the orphaned heroine transforms her uncle, and reconciles him with his true love.
* The Little Witch has a stage adaptation by the original author, Otfried Preußler.
* The Little Witch has been adapted into a Czechoslovak-German animated television series in 1984 and a Soviet animated film in 1991.
* The Little Witch has been adapted into two live-action films and eight stage plays.
* The Little Witch ("The Tale of the Witch Who Sits on the Broomstick").
* The Little Witch: The talking raven Abraxas serves the little Witch as her advisor.
* The Little Witch was adapted into a Czechoslovak-West German animated television series in 1984.
* The Little Witch was adapted into a German-Swiss live-action film in 2018.
* The live-action adaptation of '"Rescue Wings'' was set at the Komatsu JASDF airbase, and featured actual F-15s, UH-60Js and support from both the Air and Maritime Self Defense Forces.
* The Live Action episode, "Last Last One Forever and Ever" (which reveals that the show is essentially a script written by a struggling writer...or maybe not,

this is an
* The live action feature film version of the Japanese manga series Great Teacher Onizuka parodied this idea by showing the abandoned remains of a (fictional) failed theme park called "Canadaland." Flashbacks to the park's glory days were... embarrassing, to say the least.
* the live-action film, and the main characters discover that this would leave a world more suitable for Gamilan life.
* the live-action film. One scene has smoke billowing out of the Mystery Machine while Shaggy and Scooby are inside, laughing and saying "talk about toasted!"... then we find out that they're cooking breakfast.
* The Live-Action films, two obnoxious, gangsta Autobots who were included solely because Hasbro thought kids would like "hip" characters like that.
* The live-action man in a gorilla suit from the end of "I Had an Accident".
* the live-action movie finale, Lee Thompson Young did around 90% of his own stunts. One of the promotional commercials featured behind-the-scenes interviews of his experience doing the stunt work, including footage of him running during an explosive stunt.
* the live action movie pulls the deepest and most menacing voice he can do.
* The (live action) Movie put an incredible amount of attention into each Transformer's size, scale and composition, however.
* The live action movies have visibility of non-white races, but with some
* The live action movies only kept some key moments from the manga due to their two-hour-length time restraints. Similar to how it was handled in the anime, the first movie dealt up until the Island Arc (only changing the setting in the old campus, and
* The live action movie takes place in a spooky-themed theme park where monsters take over visitors' bodies. At one point, one of the attractions goes haywire, nearly killing the gang.
* The live-action movie verse they're puny; their small size allows them to hide in cover and pop up to fire a few Sabot rounds at a Decepticon.
* The live-action pilot of the cartoon series has a major plot point about the Popples being donated to Goodwill.
* the live-action series, when Mars decides to actively work against what was decided by their past lives.
* The live- are closer to the animated films, however, Roger (now Dearly again) designs video games rather than compose songs, and it's set in the late 1990s rather than the 1960s.
* The live episode "Librarians" sheds some light on this when Cecil accidentally slips in reading the horoscope for Scorpio. A certain
* The live film adaptation — the live-action directorial debut of
* The Live Ghost try to earn a few bucks from a sea captain who needs a crew by clubbing bar patrons unconscious and tossing them in the ship's hold...naturally they end up clubbed and tossed in with the rest.
* The Liverpool football team of the late 70's/80's. Ian Rush, Kevin Keegan, Kenny Dalglish, Mark Lawrenson, Alan Hansen etc.
* The Liverpool-Manchester United derby isn't quite as violent, but it lacks the
* The Lives of Christopher Chant, Christopher steals and later befriends an ill tempered cat named Throgmorten who delights in frightening and tearing up just about everyone but Christopher.
* The Lives of Harry Lime, circumstances would cause him to lose the cash almost immediately (the sudden arrival of the police means he has to flee before he can collect the loot; a group of drunken bandits spill the gold dust he has just found into the surf; etc.)
* The Lives of Harry Lime, Harry manages to find the lost treasure of Barbarossa. He is captured by bandits who get drunk on the wine stored there. They open the bags of gold dust, not realising what it is, and allow it to spill onto the beach and be washed away by the tide.
* The Lives of Harry Lime presents Lime as a monstrous figure who hides his total lack of scruples beneath a lovable facade.

* The lives of Katrina and Sabrina Peacecraft mirror the lives of Relena and Milliardo, who are Sabrina's grandchildren. Like Relena and Milliardo, they were separated at a young age before eventually being reunited with one sibling going to rule the Sanc Kingdom (Sabrina in the twins' case, Relena in the grandchildren's case), while the other went on to become a warrior under an assumed name (Zechs Merquise in Millardo's case, Sith Merquise in Katrina's case). Katrina's Sith Merquise mask even looks like Milliardo's Zechs Merquise mask.
* The Lives of Others are clearly East German communists, but a prologue scene makes it clear that the Stasi uses Gestapo methods and there is a clear continuity from Nazi Germany to the DDR.
* The Lives of Others. At the beginning of the movie, a Stasi officer explains that if you question an innocent man for several hours, he will get seriously pissed off and start screaming at you. On the other hand, someone who's guilty will try to be helpful and cooperate, no matter how long the questioning.
* The Lives of Others is about the Stasi monitoring playwright Georg Dreyman and his actress partner Christa-Maria Sieland. The story focuses on Stasi Captain Gerd Wiesler as he becomes disillusioned with the operation due to the ulterior motives of Minister Bruno Hempf and his increasing sympathies for the couple.
* The Lives Of Tao and its sequels, The Genjix are seeking to terraform Earth to match the conditions of the Quasing homeworld. Doing so will kill all non-Quasing life on Earth.
* The Lives Of Tao at the end of the second book. and the Prophus agents who survive tear down the Masquerade in retaliation.
* The Lives Of Tao, symbiotically possessing various creatures to stay alive while gradually furthering the evolution of life until early humans came along and manipulating our development from there. Almost everything in Earth's history is the result of Quasing manipulation.
* The Lives of the Twelve Caesars by Suetonius, Emperor Augustus was shorter than the average Roman male and compensated by wearing elevated sandals. However, he made this a secret by hiding his sandals under his robe. This makes Augustus the first recorded "lifts-wearing" politician in history.
* The Living and the Dead, especially in the first book, when his troops escape being surrounded by Nazis.
* The Living Daylights, 008 is said to "obey orders, not instincts", in contrast with the more headstrong Bond. We see a number of other double-O agents being picked off in a training exercise, which teases the identity of the newly recast Bond.
* The Living Daylights as the villain's whole plan hinges on Bond killing someone on his say so and his own ability to look like the victim and/or hero. He does miss a good opportunity to kill Bond late in the film, but it's because he thinks sending Bond to jail will be better for his cover - which he'd be right about, if Bond hadn't already outsmarted him a few scenes before.
* The Living Daylights at the MI6 safehouse with an electric carving knife. The butler is able to hook his foot around the power cord and jerk it out of the plug.
* The Living Daylights bribes the operator to stall the Ferris Wheel, in order to give him and Kara added time alone.
* The Living Daylights, but Bond stays on the rooftop. However, it being Tangiers, the harem girls still get to ogle him from where they're sitting.
* The Living Daylights but trashing the gun and only causing her a minor injury.
* The Living Daylights by 1995, he makes a quip with Xenia about safe sex, implying that yes, even James Bond wraps it up.
* The Living Daylights despite their lack of face protection. Partially justified because the guards were SAS troopers, so if they don't want to shoot you in the face you won't get shot in the face.
* The Living Daylights during the battle with Whitaker: Bond shoots his 8 bullets at Whitaker, just for all of them to be deflected by Whitaker's body armor. Whitaker then takes out a machine gun and rips apart the room.
* The Living Daylights. Faked sniping attack on a fleeing general → Attacks on British agents and an illegal weapons smuggling network in the middle of the war

between U.S.S.R. and Afghanistan. The movie, however, also counts as an inversion. The villains are pitting British and Russian spies against each other by trying to convince the former that the latter are targeting them all for elimination - hoping that they will respond by eliminating the KGB director supposedly responsible for the operation. This is being done to protect their scheme of misusing KGB resources to turn a huge profit smuggling drugs and weapons, which the director is on the verge of exposing. It's a serious crime, but nowhere near as potentially destructive as inciting a war of assassins between the KGB and its Western counterparts (which as Koskov said, in the worst case scenario, could conceivably even lead to nuclear war).
* The Living Daylights featured a boom box built by Q, which had a built-in rocket launcher.
* The Living Daylights featured a fake KGB defector blaming his superior, General Pushkin, for assassinations of Western agents that he himself had caused. It's all planned to provoke the British into killing Pushkin before he uncovers said underling's illegal weapons and drug smuggling operations.
* The Living Daylights. General Puskin gives a scathing rundown of his actual military record, which begins with expulsion from West Point for cheating and goes down from there.
* The Living Daylights has a keyring that emits a stunning gas when he whistles Rule Britannia and explodes when he gives a wolf whistle (although Bond jokingly asks if the explosive was set to "God Save The Queen").
* The Living Daylights has an enemy agent walks through the front gate of a MI:6 safe-house by pretending to be a subsitute milkman. The gate guard makes no attempt to verify his story, arrange an escort or investigate the calls of another guard who gets in a fight with said agent. Later he succeeds in kidnapping defected KGB agent Koskov. While Koskov wasn't really defecting it doesn't excuse the lax security. The incident is mentioned to have made MI:6 the laughing stock of the international community.
* The Living Daylights has a set of these helpfully provided by Q to Bond early in the film. He uses it to escape out of a pair of handcuffs.
* The Living Daylights has a Soviet General buying guns from an arms dealer, who uses the down payment to buy diamonds. He trades the diamonds to the Afghan resistance for opium, which he intended to sell at a 1000% markup, and then use part of that money to get the guns to fill the order from the Soviets. The Soviets would then use the guns to fight the Afghans, who would arm themselves with guns bought with the diamonds. Thus the Russian Army would be funding both sides of the war, with the arms dealer and his friend the General making a massive profit in the process.
* The Living Daylights has Bond and Czechoslovakian cellist Kara Milovy.
* The Living Daylights has had a Denied Parody disclaimer slapped on the character of Kamran Shah. He definitely isn't based on Osama Bin Laden at all, just a generic tall, bearded, Western-educated radical Islamist Afghan-insurgent who was funded by MI6 and CIA to fight the Soviets.
* The Living Daylights, he sneaks off a mission precisely to hear Kara's first concert after she has escaped to the west, and later sneaks into her dressing room in order to surprise her with drinks and a romantic evening;
* The Living Daylights: In a rare case of a main villain not being killed outright, the wily Georgi Koskov is ultimately arrested by the Russians after all his schemes unravel. His last scene leaves it open to interpretation whether they're going to imprison him or simply execute him but in either case, he's taken away and never seen again.
* The Living Daylights in Japan, which makes no sense as there are no roses anywhere in the film and no one says anything even remotely approaching that line.
* The Living Daylights involves a full-on fight between a British intelligence mook and a KGB hitman in the kitchen of an MI6 safehouse.
* The Living Daylights is and why she was involved eventually ends up being crucial to the plot.
* The Living Daylights is explicitly mentioned as being such, or rather is

mentioned as having failed to achieve any true military rank within the U.S. Armed Forces due to having cheated while studying at West Point. So instead, he resorted to arms smuggling across the world's war-torn regions, making a fortune through his dealings and becoming a self-styled colonel of sorts, even entering a partnership with the Soviets to supply their war in Afghanistan. However, for all of his fascination with military power, those who know better of his military service rarely hesitate to point out that his rank is in truth self-appointed.
* The Living Daylights, James Bond begins making out with Kara Milvoy in a stalled Ferris wheel. They cut to a lingering shot of the long, flesh-colored, slightly-upwards-curving...trunk of the stuffed elephant he won for her earlier. Subtle.
* The Living Daylights, James Bond is drugged in Tangier and wakes to find himself on a plane bound for Afghanistan.
* The Living Daylights. Kara is a Czechoslovakian cellist, and Bond's love interest.
* The Living Daylights, knowing that a guard is coming he turns to a girl, tears her bathrobe off as she screams, and then has her face the door, distracting the guard for a few seconds when he enters.
* The Living Daylights (Necros) though, likes cheesy pop music, so much for him.
* The Living Daylights. Once Bond is safely away, Rosika throws the technician back and slaps him soundly across the face, snapping "What kind of girl do you think I am?!"
* The Living Daylights successfully transport diamonds across borders, mixed with ice in a medical cooler containing a beating (animal) heart - even in this clinical state, it gets hastily waved through by squicked-out officials.
* The Living Daylights, who was hiding behind facial body armor, the bad guy says "You've had your eight! Now have my EIGHTY!" Shortly afterwards, he proceeds to unload his assault rifle's magazine on full-auto in Bond's general direction.
* The Living Daylights, with Brad Whittaker standing amongst a line of statues of famous historic military figures, initially unresponsive until the camera stops on him for a few seconds. It's clearly more to impress Pushkin than to hide though. Pushkin's not in the mood to be impressed in the slightest.
* The Living Dead: Corpses in movies are actually living people pretending to be dead.
* The Living Dead" is never actually used. They are called "ghouls" instead. The movies include:
* The Living Dead revealing that a corpse is actually being played by a live person.
* The Living Desert focusing on the wildlife found in the deserts of the American West.
* The Living Manikins is part of a display with a taxidermied fox, two dogs, and a horse. They come alive along her due to something weird going on with the lights.
* The Living Manikins", the manikins in Dribble's Department Store come to life due to an unexplained combination of electricity, light, and timing. They immediately set out to do whatever they want, disregarding the fact none of them is supposed to be alive and that things will get awkward when the store opens. The huntress enacts her display's scenario by hunting a stuffed fox on horseback throughout the store. The copper finally gets to be authorative and use his nightstick. The drinking gentleman sets out to get something to drink instead of being stuck pretending to pour himself one. And so on. Hugo and Judy can't wrangle them despite their best attempts, so they resort to flipping the switch that seemingly brought the manikins to life in hopes it de-lives them. It works, and the manikins are left standing in whatever poses were their last.
* The Living Nightmare is a manifestation of human fear, and that fear shapes and sustains it. If need be, it can draw on that fear to bolster its determination.
* The Living Saints may serve as angelic counterparts to daemons, being powered by faith and mental discipline where daemons are fueled by negative emotions and desires (daemons of Law, if you will- which would make the Emperor a Law God, but that's beside the point). But they've never gotten as much attention as the Chaos Gods and has little fluff, and unlike the forces of Chaos they don't seem to have

any domain in the Warp.
* The Living Saints of the Adepta Sororitas are depicted as having angelic wings in artwork and background. The official model lacks wings but adding them is a very common fan conversion.
* The Living Sea used several songs by Sting throughout, including the song "Why Should I Cry for You" in three different arrangements. While the song's nautical imagery is suitable for the film, its actual subject matter of its protagonist out at sea, alone on a boat, mourning his father and pondering his own mortality while his demons surround him, isn't.
* The Living Tombstone as well as others from the fandom under the Eurobeat Brony moniker, it's a common misconception that Tombstone's version is the original and Odyssey's version is the cover, although it's clearly Odyssey who's singing in both version.
* The Living Tombstone, even though it's clearly Odyssey who sings in both versions.
* The Living Tombstone has a repeated line "I feel fear for the very last time". At the beginning it's an expression of defiance by an artist who refuses to be held back from their goals. Over the course of the song, the artist falls into a life of excess and disconnection, until at the end they throw themselves off a ledge, half expecting to fly instead of fall, and "I feel fear for the very last time" becomes an expression of doubt and depression.
* The Living Tombstone: In the music video for "My Ordinary Life", the giraffe stretches her neck to pull down a tall tree to stop the police car chasing them, with a scene dedicated to showing her neck zig-zagging all over the place. Her neck then retracts back to her body, before her head pops back onscreen to give a wink to the camera.
* The Living Tombstone the next fashion trend, then the protagonist makes their own mannequin robot army to fight them directly. After that fight the original designer's building is practically in ruins with broken robots all about, and the protagonist then makes an even bigger robot army to finish them off.
* The Living Tombstone, Wooden Toaster, and many other Brony musicians are world-famous for what they do.
* The Living Tribunal, who can destroy planets or whole realities to maintain the greater Marvel multiverse. Given his
* The Living Wake takes place over 12 hours, at most. (It starts in the morning, and ends at 7:30 that night. It's not clear exactly what time it is at the beginning, but it can't be earlier than 7:30 or so.)
* The lizardfolk use "f'zzmech", which translates literally to "excrement", as a slur against every sapient warm-blooded species.
* The lizard incident is a particularly good instance, where you get a solid half-page of exposition about how clever and menacing he is... and then he immediately gets teleported and
* The Lizard King certainly considers Michelle to be a formidable opponent when they play Squid-Tac-Toad in the
* The Lizardmen, after performing certain actions in campaign, can call upon a unit of feral
* The Lizardmen also have this kind of thing in their frontline combat troops, Saurus Warriors, which have standard movement distances and an Initiative score that's unlikely to impress even the slowest troops from other armies. The Lizardmen do, however, have
* The Lizardmen are led by their Skink priests, who interpret the wills of their gods. The Slann technically overrule the Skinks by virtue of speaking with the de facto voice of the gods, but the Slann's mindset is alien enough that day-to-day operations are outside their remit, so the Skinks run the culture on their behalf.
* The lizardmen didn't know that, but they were willing to fight to the death against a vastly superior enemy, and for that Cocytus obtains their resurrection.
* The Lizardmen get several new units, including Feral Cold Ones (a pack of Cold Ones, a type of raptor-like dinosaurs normally used by the Lizardmen as cavalry) and likewise "feral" variants of the other dinosaur mounts as one-model monster

units, with the reasoning being that giving the Lizardmen more dinosaur units would make playing as them more fun. There is also a Bastiladon variant with a Revivification Crystal, included to give the Lizardmen more options for healing and buffing.
* The Lizardmen. Skinks are fast, nimble, and fire deadly accurate volleys of poison darts, but if you can pin them down, you can kill them. Unfortunately, while you've been pinning them down, the Saurus have arrived, meaning you're about to be slaughtered and probably eaten by hulking reptilian warriors who have been purpose-bred to kill since before humanity first used fire, and if they're Temple Guard, wielding halberds that can casually crush the highest-quality armour humans can make. Backing this up are literal dinosaurs and the Slann, who are some of the most terrifyingly potent mages in the Warhammer world, capable of snuffing out entire units with magical death or bestowing spectacular boons on friendly units; in the eighth edition rules, a Temple Guard unit that a Slann had buffed with Birona's Timewarp was capable of being charged on all sides by zombies and skeletons and winning the combat handily.
* The Lizardmen use stone, gold and obsidian clubs and spears in Mayan, Aztec and Inca style, with javelins and blowpipes for missile support. Their gear is well-crafted and intricately detailed though, in contrast to the crude weapons of Orcs or Beastmen. They also have access to ancient techno-magical devices that shoot laser beams or break open reality — the schizo tech juxtaposition of the lost technologies of the old ones and the barbarous state their lost children have descended into being a big part of the Lizardmen character and aesthetic.
* The Lizardmen worship Sotek, a snake-like deity akin to the Aztecs' Quetzacoatl.
* The lizards also use their own terms for certain ranks and vehicles, most of these being
* The Lizard's real name is changed from Curt Connors to Curt Conner.
* The lizard was a house fire that killed a small child and his family.
* The Lizzie Bennet Diaries, "Am I right?" is one of Lydia Bennet's verbal tics, and it must run in the family, because her sister Lizzie says it as well.
* The Lizzie Bennet Diaries and has a rather low opinion of comformist modern society and a high opinion of himself.
* The Lizzie Bennet Diaries claims that they didn't want to involve Fitz in any romantic plot lines and therefore decided to give him a boyfriend. It worked.
* The Lizzie Bennet Diaries, especially in early episodes where Lizzie asks Charlotte to edit out parts of her video and Charlotte keeps them in, often with an amusing caption.
* The Lizzie Bennet Diaries Given Gigi's apparent fear of him, it's implied something similar to what happened to Lydia may have been going on before Gigi's brother intervened.
* The Lizzie Bennet Diaries gladly obliges, and both Lydia and Lizzie enjoy his abs. He's a swimmer and is well-built.
* The Lizzie Bennet Diaries grew to love her more likeable personality in the webseries and consequently hate Wickham even more for his emotional manipulation of her.
* The Lizzie Bennet Diaries had to update many aspects to keep them relevant for the audience yet equivalent to the book. For instance:
* The Lizzie Bennet Diaries has several examples, including Lizzie's declaration that she feels sorry for whichever hapless girl ends up dating "that douche" Darcy and her somewhat later statement that she'll be reduced to drastic measures if Lydia turns out to be connected in some way to someone related to Darcy.
* The Lizzie Bennet Diaries is hot, but George Wickham and Caroline Lee play it up to a new level.
* The Lizzie Bennet Diaries: Jane Bennet and Bing Lee when they start dating. She bakes him homemade cookies. He watches romantic period dramas with her and treats her like a princess, pretending to carpool when he in fact just keeps giving her a lift. Lizzie is happy for them, but she implies that sometimes they're too much to take and also that Jane has the "I-want-you-to-be-in-a-happy-relationship-like-myself" vibes which make her uncomfortable.

* The Lizzie Bennet Diaries, Kitty Bennet, who was the fourth Bennet sister, has been adapted into an actual cat named Kitty, while Mary has been turned into a cousin seen mainly in Lydia's spin-off videos (although she has appeared in Lizzie's videos).
* The Lizzie Bennet Diaries", Lizzie is quick to reassure her that it's not her fault at all.
* The Lizzie Bennet Diaries, Lizzie resents that her mother is trying to hook up her daughters with rich men and is prepared to hate Bing Lee — the wealthy medical student her mother thinks would be a perfect husband for Jane — on principle. Thing is, Bing really is a great match for Jane and is so nice that Lizzie can't list anything to dislike about him other than her mother liking him.
* The Lizzie Bennet Diaries, Lizzie spends most of the first episode complaining about her mother's obsession with finding wealthy husbands for her daughters, saying "It's not like we're all going to put our lives on hold because some rich single guy dropped from the sky." Cue Lydia bounding into her room to excitedly tell her that a rich family just moved into their neighborhood and happen to have a son who's single.
* The Lizzie Bennet Diaries: Lizzy Bennet and Mr Darcy is a canonical paring, one of the most beloved in literature, and fans of the show embraced re-imagined Lizzie and Darcy. The leads appeared in many hang-outs and they did together several interviews. The imagination of avid fans ran wild in pairing Ashley Clements and Daniel Vincent Gordh, even though the two told them mildly that they didn't wish it. As if that ever stopped crazed fangirls and fanboys.
* The Lizzie Bennet Diaries: Lydia stages a shirtless scene when she spills water on George's T-shirt. That soaked T-shirt was nice enough, but she managed to convince him to take it off.
* The Lizzie Bennet Diaries, naturally follows in the footsteps of the original.
* The Lizzie Bennet Diaries. She's supposed to be talking about Jane and Bing, but the "we" implies that she's thinking about Darcy.
* The Lizzie Bennet Diaries, she starts to work on improving from those flaws.
* The Lizzie Bennet Diaries. They get together at the end of the series.
* The Lizzie Bennet Diaries: Viewers kept telling Lizzie and other characters, as well as the creative team, that they really wanted to see Darcy. They begged at least to have a peek at his photo, because most characters had Twitters and Facebook pages and posted lots of stuff from their parties and gatherings. However, he was first shown very late in the story — in episode 59 (out of 100) and to boot, only his body was seen while his head was outside the camera angle. The credits in the video description listed Darcy's actor as "?". At that point it was almost unbearable to some fans, but luckily, in the next episode, Darcy was revealed.
* The Lizzie Bennet Diaries when viewers expected Darcy to show up. Lizzie starts her video with reminding that she left Darcy a voicemail, but she hadn't heard from him, days passed, and then suddenly her doorbell rang and would we guess who showed up on her doorstep in the rain? It turns out it was her best friend Charlotte who came to cheer her up, rain or no rain. Charlotte snidely remarks it drizzled at best.
* Thelma & Louise, but her scene was cut. It's included on the Special Edition DVD.
* Thelma & Louise ended with our heroines driving their car off a cliff. It ends on a freeze frame, though it's obvious they won't get out of this one.
* Thelma & Louise ending, where the car goes flipping end-over-end as it descends into the canyon, and Slocumb walking back in disbelief - before cutting back to a static shot of the car driving towards another canyon - apparently meant to symbolize that the pair will continue traveling, even after death. At the Academy Awards, Geena Davis and Susan Sarandon joked about how to get their characters to survive for a sequel.
* Thelma & Louise, in which an otherwise friendly hitchhiker ends up stealing all their money.
* Thelma & Louise: Not just the fuel tank but the whole damn truck. Subverted

in that the girls were actually playing at shooting his tyres out, one by one.
* Thelma & Louise: Visual symbolism of Thelma's line into crime involves her starting to wear a midriff-baring shirt.
* Thelma & Louise. What starts as an act of self-defense ends with a multi-state manhunt.
* Thelma: Anja has dark skin and seems like she might be part Black from her features. Her mother is White and we don't see her father, leaving it unknown if he's Black or not.
* Thelma inspires intense looks from Thelma, displaying her attraction to the other girl.
* Thelma is the protagonist. Her goal is to escape, ultimately through suicide.
* Thelma (lesbian main character, bi or lesbian supporting character; subject matter includes LGBT awakening, LGBT youth, queer female romance)
* Thelma slams him in the back of the head with an iron in a shopping bag.
* Thelma: Thelma’s dad and mom regularly look over her schedule and he calls her every night to make sure that she eats or doesn’t give in to hedonistic practices. They may be protective and watch carefully over their daughter but they are shown to be emotionally distant.
* Thelma: Thelma feeling attracted to a woman and dealing with the fact, alongside her burgeoning psychic powers, is the main theme of the film.
* Thelma: Thelma is capable of moving objects, vanishing them, teleporting, levitating and starting fires with her mind. At first she can't control it, but can by the end of the film.
* Thelma, which Thelma cannot control at first. Breaking out into her own person (for better or worse), accepting her own sexuality and controlling these powers are main intertwined themes.
* The LNH also led to the creation of the rec.arts.comics.creative newsgroup for superhero comics-inspired online fiction. It hosted several other shared worlds such as the Patrol, Omega and
* The Load because she insists on getting into a fight, but somebody (mainly Ranma) usually has to keep an eye on her because she can't take the hits they can.
* The Load: Even worse than fighting for your own life is having to take someone with you who can't help you.
* The Loading Crew - A husband and wife team that host roleplaying campaigns and occasionally stream video games
* The loading screen converts the normally appearing as JST times for trials, souls collecting stages and battle arena to that of
* The Load, she takes him under her wing. Hope evolves from a complaining victim of circumstance focused on avenging his mother's death to a young man willing to risk life and limb to save an entire world.
* The Load: This person contributes nothing to your team except being more trouble than they're worth.
* The Lobe once had a machine that could turn people into clowns, which he thought would help him take over the world because "Everyone likes clowns". Freakazoid ends up just talking him out of it by pointing out that
* The Lobes' (basically walking and talking human ears) language from "Compassion Crashin'" consists entirely of the word "Buddha".
* The Loboans are space wolves from a planet themed around werewolf horror movies.
* The Lobotomist (PBS film) traces the career of Walter Freeman from 'savior' of mentally ill people to being seen as a perpetrator of a brutal mistake.
* 'The Lob Slobs', after Jerma talked with a weird voice and explained to STAR_ that he has to be 'in the mood' for the video and STAR_, Jerma then imitated a typical shipper's reaction in the comments section:
* The Lobster: David and the Shortsighted Woman are in love, but live with the Loners, who forbid all sexual contact and romantic relations between members.
* The Lobster When people move into the hotel, their personal belongings are removed, and they are given new clothes and underwear. Men get grey trousers, blue and white shirts and a blazer. Women get a halter neck dress.
* The Local AccuWeather Channel (often not labeled beyond showing national

forecasts from AccuWeather, shows
* the local boss is. The other people in the town will hint obliquely at what's really going on, and one hidden town will tell you outright if you find it.
* the local coffee will keep you up for weeks), and all the people there are immortal to age, and nearly so to violence; they just re-merge and get back up. However, the Presbyterate, the local government, has the rule that no man shall live past a thousand; they'll execute you if you get even one year past.
* the local cops use to the store the millions they make from extorting local drug labs and brothels. In an inversion, it's the cops who are portrayed as inept crooks who are out of their depth — they might be able to shake down a few redneck weed dealers, but are completely unprepared for a group of hardcore professionals decked head to toe in body armor and packing military-grade weapons.
* The local cosmetic surgeon might just have a new way to dispose of certain medical waste.
* The local currency is meat. One adventure in Itznotyerzitz Mine in which you "feel pretty moxious for trading a bunch of worthless rocks for cold, hard meat", those rocks being various diamonds. There also exist "fat stacks of cash" and "pile of gold coins" items, which are
* The local hangout was not the Angel Grove Juice Bar but a bowling alley.
* The Local Hero Joe Hendry is an excellent singer and incorporates it into his gimmick by singing his own entrance music; each time it's a different
* the local Junior Ranger Scout troop he was eager to join attacked and muzzled him simply for being a fox.
* The local police force in Mexico is completely corrupt and on the take from the cartel.
* the local rhyming equivalent of the n-word against African-Americans. Similarly, "Jockey" is used to refer to Faunus sympathizers.
* The Locals favours the knife, and all of his kills are made with one.
* The Locals: Grant and Paul eventually realise that the locals are everyone who has ever died in the valley, who can interact with each other, but are also doomed to live out their last moments over and over again. And each day at sunrise, the cycle resets. And then Grant discovers that Paul has actually died and is now one of them.
* The locals have a lot of stories about what has happened in the Abaddon Hotel ranging from
* The locals' main concern is not that you're simply passing through but that you're gathering resources from their "sacred nebula" while you're doing that. As far as they're concerned, only those who worship and live in the nebula have the right to do that.
* The Locals start when Paul decides to take a shortcut across a boarded up bridge.
* The Locals turn themselves into this while attempting to refuel their car while smoking.
* The location bookmarking app Rego got publicity in Brazil when people noted that
* The location is also used in a surprising amount of British period shows/films that involve railways in some way, Wansford Station having doubled as many fictional ones due to it still having the (now unused) old station buildings and a number of steam and diesel engines on location.
* The location, normally connected to the rest of the world, is made inescapable.
* the location of the annual Star Trek Las Vegas convention. And guess who just happens to be among the attendees, ready and willing to beat our protagonists up.
* The location of the pro-ETA demonstration is changed from Barcelona, over 400 km away, to Bilbao, in the Basque Country.
* The Loch Ness Horror involves sonar expert Spencer Dean using advanced underwater detection stuff to try and find Nessie.
* The Loch Ness Horror was filmed at Lake Tahoe, and has a bunch of American actors pretending to be Scottish, very badly.
* The Loch Ness Monster gets one on Bigfoot during their fight when he slices Bigfoot in half.
* The Locked Room, the narrator reminisces that as a child he'd wanted to marry

Fanshawe, so they could always live together.
* The Locked Tomb a hugely talented necromancer, assuredly one of the most powerful of her generation. And she won't let anyone forget it.
* The Locked Tomb and the second incorporates some reference to their House number. For siblings to share a second name is rare and suggests that they're extremely close (like the Tridentarius twins) or were bred for a singular duty (like the Asht brothers).
* The Locked Tomb breaks down the practice of necromancy into the manipulation of thanergy (i.e., the energy created by death and entropy) and thalergy, which is this. At one point, a necromancer who's just about had it and sees no other way of ending a problem detonates all the thalergy in their body at once. The effect is compared to a very localized supernova.
* The Locked Tomb, but an improved version allows them to switch control.
* The Locked Tomb energy of their death. Usually this means things like grave goods or the weapon used to kill them, but sufficiently strong-willed beings can use more tenuous connections or even generate new thanergetic connections posthumously.
* The Locked Tomb it is difficult to do so. They feel every bit of pain from any horrible maiming they suffer that would kill normal humans. Lyctorhood also never removed the cancer from Cytherea's body, only trapped her in a permanent, agonizing advanced stage of the disease for the last 10,000 years.
* The Locked Tomb rather than spirits, so it's of less use than might be expected resolving this.
* The Locked Tomb series, spaceships, LED lighting, and comic books coexist with necromancy powered by the fundamental energies of death and life, animating skeletons, and summoning ghosts.
* The Locked Tomb series, the body of a Lyctor is preserved at the exact point in time they achieved Lyctorhood, meaning they don't get older and can't die from old age, but can die from sufficient trauma or suicide.
* The Locked Tomb, so gender is no object in marriage or family structure either.
* The Locked Tomb. This allows lesser necromancers to draw power from the dying planet, but causes the slow destruction of its biosphere.
* The Locked Tomb. This is in no small part why the body drops dead as soon as they vacate it.
* The Locked Tomb: Zig-zagged in the spacefaring setting. Electronic records and communications are widely used, but so is a non-biodegradable "flimsy" for both printing and handwriting. Paper is available, but comes across as archaic or particularly formal.
* The Locket," an elderly Crichton exasperatedly sings "The Maid Of Amsterdam" as he waits to be rescued for the umpteeth time.
* The Locket", they fly into some mist where time flows differently, and they discover that hundreds of years have passed in the few hours they were in it. They don't seem to be able to get out until they... fly backwards out of it and this reverses time to right before they entered it.
* The Lockheed Bribery scandals, a constitutional crisis in the Netherlands and nearly destroyed Lockheed as a company for good.
* The Lockheed P-38 Lightning, likewise, had a nasty habit of killing or permanently injuring anybody attempting to bail out of it. The plane basically had 2 fuselages, with a boom-like horizontal stabilizer stretching the entire width between them. Bailing out of the cockpit (located in the middle between the 2 fuselages) would likely slam you into the boom, whether you curled into a fetal position or not.
* The Lockhorns. Every one-panel strip is Loretta complaining about Leroy's laziness, or Leroy complaining about Loretta's cooking, or Loretta complaining about Leroy flirting with another woman, or just one of them explaining how unattractive they find the other.
* The Lockhorns has been shown letting loose at a cocktail party via this trope.
* The Lockhorns: "I didn't save Leroy's old love letters... I returned them with the spelling corrected."
* The Lockhorns: Loretta Lockhorn is not seen in a car as often as she's seen with

steering wheel in hand.
* The Lockhorns. While it has never featured physical abuse, some of the hurtful remarks the two of them make about each other borders on psychological abuse.
* The locks. Sometimes it's addition and subtraction. But the other half of the time? It's multiplication and division...
* "The Locomotion Interruption": Penny is nervous about her job interview arranged by her friend Bernadette. Bernie lists Penny's personality traits, trying to convince her she's gonna be fine.
* The locomotion transition rules stated that a species must glide before it can evolve flight. Since then, scientific study into the origins of flight have suggested that flight does not come from gliding—it comes from parachuting. To reflect this, in the reboot the rule has been revised to require parachuting instead.
* The Locust are really the descendants of experiments at the New Hope facility where people were deliberately exposed to Imulsion
* The locust swarm that causes the Bone brothers to get separated in the first issue of
* The Lodge ended abruptly after two seasons, with the second ending with the titular hotel on fire with no resolution afterward.
* The Lodger again: Craig, already weirded out by his new housemate's behaviour, is left completely stumped when, having been sick all morning, he finds the Doctor filling in for him at work.
* "The Lodger" and also saves the day by kickstarting the self-destruction of the time engine that's been killing people.
* "The Lodger" connects himself to the main controls the whole ship overloads.
* "The Lodger", he can't get to the TARDIS and is forced to live life normally (and in the right order.) Watching the Doctor cook and work in an office is adorably jarring.
* The Lodger is stalking the foggy streets of London, and the new lodger at Mrs. Bounting's rooming house might be him.
* "The Lodger". It is entirely possible that the Doctor didn't actually know how much money he withdrew (probably by sonicking the ATM) and put in the bag.
* "The Lodger". (One possibility is that these people have been erased by the cracks, meaning that they're back at the end of the season. Still an inferred holocaust, albeit a temporary one.)
* The Lodgers. A hereditary curse mandates their compliance, and resistance is punished by the eponymous Lodgers.
* "The Lodger" shows the Doctor can relay a ton of information at once in the form of a forehead-on-forehead headbutt. Because it's extremely painful for him, he swears never to do it again.
* The Lodgers is a gothic horror film set in an isolated, crumbling family estate adjacent to a rural Irish town.
* The Lodger". The Doctor tries to convince his temporary landlord that a scanning device he's built out of household objects is "a modern art piece on the awfulness of modern life", but is unconvincing.
* "The Lodger": The Doctor uncovers an alien time-distortion device similar to the TARDIS in the upstairs flat of a British apartment building. Amy, poring over the building plans for the address, discovered that the building didn't even have an upstairs, it was a one-story building. Perception filters kept people from noticing anything out of the ordinary.
* The Lodger, the Eleventh Doctor builds a Scanner using, among other things: an umbrella, a bicycle, a walker, a lamp, a broom, a canoe paddle, an ironing board, christmas lights, and a rotary clothesline.
* "The Lodger": The Eleventh Doctor uses "non-technological technology of Lammasteen" to create an advanced device that won't be picked up as advanced technology. It looks like random pieces of junk stuck together. From the look of some of the Doctor's other devices, this may not be the first time he's used it, just the first time it was identified as such.
* "The Lodger". The gazebo Donna and Miss Evangelista speak in can be seen in the

background.
* "The Lodger" when Craig, the ordinary guy the Doctor is lodging with, begins to tell the Doctor all his fairly modest ideas for how the call centre he works at can streamline effectively and what he wants to do with his life out of the blue, before realizing out loud that he's telling all of this to a complete stranger. Obviously referring to the countless maniacs who like to monologue at him, the Doctor assures him that he's not the first.
* "The Lodger", while he's sharing a flat and trying to act like an ordinary human being.
* The Lodge, with the eerie surroundings of a dark house filled with religious belongings, before revealing it to apparently be the contents of Mia's dollhouse.
* The Loewe Monogatari manga explores some of the less detailed parts of the tragedy. For instance, we find out more about what happened to Karin. A jaeger followed them, with the intent of raping Karin. As the Jaeger attacked, Joshua struggled with the man and grabbed the man's gun. In the struggle, Joshua unknowingly shot the man in the throat.
* The Loft (2014): An erotic thriller about an illicit affair gone wrong.
* The Loft and flashbacks reveal more about her and how she came to be there.
* The Loft: Luke has secretly installed cameras in the loft and uses them to record his friends' trysts, with the implication that he is watching them back for his own pleasure.
* The Loft opens with a body falling off a balcony and landing on a car parked in the street below.
* The Loft: When Luke enters the loft and finds the dead body of the woman handcuffed to the bed, he drops the two bags of bottles of alcohol he is carrying, and the bottles shatter on the hardwood floor.
* The lofty-sounding but insulting title is one the man would not have chosen for himself, but others would; his truly wide renown was for being
* The Logan Legacy a prostitute, however she has long since retired. She explains the situation and otherwise lets him down gently (as well as saving the John's life when the club is attacked by a pack of nihilistic idiots with too much time on their hands).
* The logbook's last entry, and that two of the lighthouse keepers were down at the jetty on some errand or other while a third remained behind because it was his turn to cook, and must have seen the approaching wave and run down the cliff to warn his colleagues only to be swept away as well.
* the log cabins were B&Q garden sheds, the nativity scene was a poster on a billboard in a field of mud, and the tunnel of light was actually a handful of lights strung across some dead trees. Stallholders in the "market" weren't paid, and Santa was reportedly beaten up by angry visitors. In the end, the two brothers who founded the park were both put on trial, found guilty of misleading advertising, and jailed for 13 months.
* The Logia Fruits, easily the most powerful of all the Devil Fruits, all seem to have a single weakness that negates their great power or their
* The Logia users can do this too, turning their body into their element and shapeshifting it back into them. Aokiji (and Crocodile and Kizaru to a lesser extent) seems to be the best example of this, as most other Logia users just let attacks pass through them without effect, rather than actively "pulling themselves together" after the attack lands.
* The Logical Conclusion to this trope, the Ark, a BFG made from 4 absolutely
* The logical extreme of both would be, of course, works which were published anonymously, or where knowledge of their original source has been lost permanently. Many examples exist from mediaeval times: most mediaeval painters are only known by
* The logical extreme would likely be the uniforms worn by Archduke Franz Ferdinand of Austria, which he had to be
* The logical reaction to 7th edition's new Daemonology lore, which allowed any army to summon Daemons to fight for them. Daemons of Tzeentch are troops that can be summoned and can summon daemons. In about 3 turns one player managed to
* The logic behind this probably runs that if someone has a revolver, with its

easy concealability and inadequacy for gamekeeping, hunting or any other non-criminal/law-enforcement use, then they're probably up to no good. In contrast, rifles and shotguns are common things for any farmer/landed gentry (heroes in classic British adventure fiction tending to fit into the latter category) to have lying around as a matter of course.
* The logic behind this trope - and the downfall of thinking like that - is demonstrated in the backstory. The whole in-universe idea of X-COM originally came from a Japanese unit called the Kiryu-Kai, who were disbanded after five months with no success in intercepting UFOs precisely because the aliens are a
* The logician on the soundtrack album goes all the way to the warning track in left field trying to reconcile this with all fish living underwater and all mackerel being fish and dovetailing it into his wife's restlessness.
* The logic was that warheads mounted to missiles in either ground-based stations or in ballistic submarines are secure because of the two-man-rule interlocks, and PALs would risk a loss of readiness without significant security benefit. Actual (non-trivially-coded) PALs were (eventually) applied to small warheads - air-dropped bombs and ship/air-launched cruise missiles. These warheads, unlike those for ballistic missiles, can be stored or transported in a functional or semi-functional state and thus may be lost or stolen. For these weapons, the two-man rule utilizes the PALs themselves - two officers must concur with the legitimacy of a nuclear launch order and release their portions of the PAL codes, or else the warheads cannot be armed.
* The logo for GIT (the versioning software) is "GIT" written 90° sideways. Or a plus, a minus and a rotate arrow. Whatever you noticed first.
* The logo for Shadow Projects, involved in the production of a number of puppet shows, featured a dog. It would normally be heard barking at the end of one of these shows, but on
* The logo for the Buffalo Wild Wings restaurant features a buffalo with wings.
* The logo for the Royal Dragon has red, green, yellow and blue, the colors of all four Defenders, and symbolizes the first place where the four of them work together as a team. The blue even briefly disappears from the sign when Jessica briefly deserts the team.
* The Logomancer is that all "battles" are actually like this. They still play like typical JRPG conflicts, though.
* The Logomancer: Unchained Ids have a Self-Destruct attack that kills them and harms one party member.
* The logo of Cerberus has a hexagonal shape and uses some materials with hexagonal surface patterns.
* The logo of the German company Fischers Aktien-Gesellschaft, which makes ball bearings, reads FAG.
* The Logos (a group of godlike beings that make up a sort of harmonious pantheon, also usually involved with The Spectre)
* The logo was largely the same since the change of name to WWE, but it became just one W inscribed into the other - the E is not part of it like the F was part of the WWF logo.
* The Logs of the Starship "Sierra Nacho" is obviously entirely told through the Captain's Log. And everybody else's logs as well.
* The Log that Pluto vanished on the same day. It's probably just as well that the cannon proved to be of no practical use, as its recoil was enough to blast it across the solar system, where it embedded itself in Titan.
* The Loins Sleep Tonight: A non-impotent character has trouble having an orgasm during sex.
* The Loins Sleep Tonight: Guy wants an erection and can't get one vs. guy doesn't want an erection and has one.
* The Loins Sleep Tonight is implied by the Talmanns' inability to conceive and a few choice remarks from Mrs. Talmann.
* The Lois and Martha scene at the Daily Planet is now at the former 's apartment, discussing how the latter is So
* The LOKI mechs also count; their calm and polite "please reconsider your

aggressive attitude" lines while being set on fire or shot to pieces are actually quite creepy.
* The Lolas—played by Jose Manalo, Wally Bayola and Paolo Ballesteros (who made a career of himself doing drag performances and makeup transformations on Instagram and elsewhere)—in the "Kalyeserye" segement of
* The Loman Family Picnic features four endings performed in quick succession, each dramatic in a different way, until the final "real" ending.
* The London Cuckolds (no, really). Initially he doesn't plan to consummate the marriage, telling her instead her "wifely duties" are to guard his nightcap in full armor, but the two main characters of the play end up interfering with that plan.
* The London derby of Chelsea-Tottenham is also particularly violent, with one recent edition also devolving into a mass brawl.
* The London district of Sidcup got a lot of attention after it was brought up that the UK version of Dasani was just purified water from the area.
* The London Eye was also up for sale at the end of Series 1. Inspector
* The London Metropolitan Police's internal affairs unit actually resorted to wiretapping and covert surveillance operations against corrupt officers at one point in
* The London museum includes, among its exhibits depicting the pre-apocalyptic world, "
* The London Northeastern Railway (LNER) decided to equip their express engines with stink bombs as a warning system in case their connecting rods were overheating. If the crank axle overheated, it would set off the stink bomb, which released a sharp scent of violet or aniseed. Given that drivers could not see the inner workings too well, or hear very much on the footplate of a noisy engine, a smell would be the best thing they could notice.
* The London, Ontario Public Library Central Branch has similarly three age sections, but they are each placed in three locations with the children's graphic novels in the Children's library area, the teen ones in the Teen Annex on the first floor while the Adult books are placed on the third floor as part of the adult fiction collection.
* The London Review of Books, like "Some chances are once in a lifetime. Not this one, I've been in the last 12 issues." or "Tap-dancing Classics lecturer. Chilling isn't it? (M, 38)". Perhaps people aware of this trope like knowing that they already know the worst about you?
* The London Transport Routemaster double-decker bus. It has outlasted all its planned replacements and was phased out only because even the youngest specimens were over 40 years old and worn from daily use. Even now, several examples remain in service on "heritage" routes in London and many more are in daily use as wedding cars, tourist buses, and the like. Also, it caused quite the uproar when the buses were replaced with supposedly more modern "
* The London Underground has some central stations at very tight intervals.
* The London Underground in the early '00s could be persuaded, by pressing a certain sequence of buttons when no credit was inserted, to display a brief test message.
* The London Underground map, originally just an experiment in applying electrical diagramming techniques to the Tube. Yet today, it's one of the best known symbols of London, and comes on posters, T-shirts and ash trays.
* The London Underground served as the line's central London terminus until 1979, when it got closed off due to the Jubilee Line extension to Stratford. The station spur was retained to relay trains as well as serve as a film set.
* The London Underground was disposing of some of its older trains, and ever since then they've used retired Tube trains. The ones currently in service were built in 1938.
* The London Underground, where they are usually seen as opportunities to put alternating advertising and safety/security messages.
* The lone aversion for the show is "Anything Can Happen At Christmas", a Christmas special which aired on December 6th, 1998.
* The lone exception is the French, who usually prefer either Japanese films or

their own films over Hollywood. Hollywood-bashing is common there. (American cartoons still have the same reputation there, though.) The lone period of time when this viewpoint wasn't in effect was, ironically enough,
* The Lone Gunmen: All three of them (four, if you count Jimmy). None of them were anything close to action guys. What they did have was a copious amount of brainpower and bullshit.
* The Lone Gunmen are Agent Mulder's geeky friends and conspiracy theorists themselves. In their first episode, one of them tells Mulder that they like to hang out with him because his theories are way crazier than theirs. Like Mulder, it's not really a conspiracy
* The Lone Gunmen come to the aid of a chimpanzee who speaks with the voice of Edward Woodward.
* The Lone Gunmen episode "Like Water For Octane" with the car that runs on water. The heroes themselves decide to suppress the technology because they felt humanity would make so many cars that engine oil would cause a greater environmental threat than gasoline usage would and that mankind wouldn't figure a way around that problem (besides, you know, recycling the stuff, like we do nowadays).
* The Lone Gunmen find themselves caring for a baby, and none of the three have a clue about baby care, with the predictable result during a diaper change.
* The Lone Gunmen. Ironically, the fact that it was canceled has led to conspiracy theories about why it was canceled. Perhaps it was the March 2001 pilot being about an attempt by a shadowy government conspiracy to crash jet liners into the World Trade Center, which of course has only inspired further theories about how they "anticipated" it somehow.
* The Lone Gunmen" Jimmy tells Langly to jump, that he did and he's fine, that it's not that far, and finally promising to catch him. On the latter, Langly finally jumps...only for Jimmy to turn around when Frohike starts talking to him.
* The Lone Gunmen used automatic fire doors in the improvised lockdown of a pathogen-contaminated corridor when they made their
* The Lone Gunmen, Yves Adele Harlow was the lone female on the primary cast, and also the only fully competent one. The individual characters all got their moments to shine, but Yves owned almost every single time she was on-screen (and off-screen). Only exceptions: in the pilot, Frohike managed to outwit Yves, and Jimmy manages to save the day often as well. (Yves was also dark-skinned and a foreigner, making her a threefer.)
* "The Loneliness of the Hour" has a family whose every need is attended to by
* The Loneliness of the Long Distance Runner tell the stay of a boy in Ruxton Towers, borstal situated in Essex, for robbing a bakery; once there, he took on running.
* The Lonely": A spaceship crewman says that the ship is "almost out of fuel" because they've been "dodging meteor storms". The only way this can happen in our solar system is if it had suddenly developed an area with a high concentration of asteroids.
* The Lonely Doll books by Dare Wright, the doll herself isn't so creepy, but her situation is. The doll starts off apparently abandoned in a highrise penthouse, and when she finally gets company, there's a lot of disapproval and spankings.
* The Lonely Guy instead, based on his experience of the single life over the course of the movie. Oddly, this is well before the movie ends.
* The Lonely Guy suicidal people are jumping off and plopping into the water at a truly ridiculous rate.
* The Lonely Guy; Warren starts off by asking why people with more hair than him don't get charged more for haircuts, and then the conversation drifts a bit...
* The Lonely Guy, where Steve Martin's character makes it to the church just in the nick of time, pours out his heart to the gal of his dreams and begs her not to marry. Turns out he was in the wrong church, and he misses the deadline altogether. D'oh!
* The Lonely Hearts Killers Martha Beck claimed to have been raped by her brother.
* The Lonely Island, a dance specifically designed to make one look like, well, a creep.

* The Lonely Island. Any hesitation involved is rather brief, however.
* The Lonely Island are a product of Andy's delusions after being rejected by Debra. In fact the entire performance review could be an interview with his psychiatrist.
* The Lonely Island aren't parodying music and hip-hop cliches, they're doing this. Prime examples include "Jack Sparrow", "Punch You In The Jeans", "Meet the Crew", "Space Olympics", and "I Fucked My Aunt". Another common staple of theirs is a premise that starts innocuously but then slowly descends into insanity, as seen in "Like a Boss", "Dreamgirl", and "I Run New York" among others.
* The Lonely Island by being handed things, and responds by breaking them "on the ground." In one scene of the protagonist at the farmer's market with his "so-called girlfriend", she hands him her cellphone, stating it's his dad. He then throws it on the ground, because his dad's "not a phone! DUH!". In a previous scene, he throws a free hot dog on the ground because "What do I look like, a charity case? (...) I don't need your handouts!"
* The Lonely Island, except it's really about the logistical problems therein.
* The Lonely Island fits this trope. The punchline of most of the songs is that the first line or title is vulgar: "I just had sex," "Dick in a box," "Jizz in my pants," "I'm on shrooms," or every line of "Natalie's Rap".
* The Lonely Island" he agrees to those two things, but tries to go back on having said "something about suckin' your own dick". That ain't him.
* The Lonely Island hiding in a locker to watch boys change after gym.
* The Lonely Island). His performance reviewer expresses incredulity that he can chop his balls off and die every day. The boss just shrugs it off.
* The Lonely Island in their song "Japan", clearly written as a list of expensive places and activities they want to do while in the titular country, so if their label wanted to make a video for the song, it would have to send them there.
* The Lonely Island is much better known than Slim Thug's rap song of the same name, which it parodies.
* The Lonely Island is "oogling and oggling" a bunch of jocks from where she's hiding in a locker.
* The Lonely Island (particularly "West End Girls"). Most hilariously, it allows the following rhyme to happen:
* The Lonely Island risky, to the point of not going outside, boarding up your windows, wearing a straitjacket for protection, and pulling out all your teeth so you don't accidentally bite your tongue. At the end of the song, it is pointed out that YOLO also stands for "you oughta look out".
* The Lonely Island scheduling adjustments" are made such as several events getting cancelled and all other events pending, the oxygen aboard the station runs out, and last but not least, someone accidentally self-destructs the entire station.
* The Lonely Island's "Dick in a Box" one of the guys is lounging in front of a fireplace drinking champagne with his gal before giving her his special present.
* The Lonely Island's "I Threw It On The Ground", played by Andy Samberg, appears to be the sort of hipster who rejects everything as "part of the system", and will inevitably respond to basically everything by throwing something on the ground.
* The Lonely Island's "Japan", in which the band frequently describe what they'd be doing in the proposed music video for the song as part of a blatant attempt to fund a really expensive holiday to Japan and get their label to pay for it.
* The Lonely Island's "Mama" parodies the tendency of otherwise "bad boy" type rappers to make sensitive shout-outs to their moms. They're in the middle of recording such a song when one of the guy's mothers enters the studio unannounced, and she repeatedly gets verbally abused by the guys for doing so.
* The Lonely Island's "Motherlover", where two studs agree to "fuck each other's mothers" for Mother's Day.
* The Lonely Island song "I Just Had Sex" the singers celebrate having sex for the first time. They don't seem to recognize (or just don't care) that the sex wasn't very good. Among other things, one singer admits he "cried the whole time! (Doesn't matter, had sex!)" His partner is clearly unimpressed.
* The Lonely Island song "Punch You In The Jeans" says in the chorus that "this is

not a metaphor". The song is literally about violence against clothing.
* The Lonely Island songs for "Dick in a Box", "Motherlovers," and "3-Way" go straight for the full '90s style. The clothes, the hair, the interior decorations, and even the backgrounds in the outdoor shots are as '90s as possible.
* The Lonely Island song: Space Olympics. "SPACE DISC! is totally cancelled."
* The Lonely Island's song "Ras Trent" is from a white Ivy League student who sings about his love Jamaican culture in a thick Caucasian accent.
* The Lonely Island's "Space Olympics", at the end the ship is on self-destruct and the athletes are fleeing while aliens are invading at the same time. The narrator makes one last stand to defend them...
* The Lonely Island's "Threw It On The Ground" features the protagonist defiantly throwing a bunch of things on the ground for all sorts of stupid reasons, such as a hot dog because he's not "gonna be a part of your system", his "so-called girlfriend"'s cellphone because his dad's calling and "my dad's not a phone", and a kid's birthday cake to welcome him "to the real world, jackass" while insisting "I'M AN ADULT!"
* The Lonely Island that the fashionista singers have confused for a daring new trend.
* The Lonely Island their neighbour Steve (played by Andy Samberg), calling him a cunt in each video (except "We Need Love", where they instead accuse his girlfriend of being a slut)—despite him never being seen to do anything malicious to them.
* The Lonely Island to being a man) who found a red wig in the dumpster, put it on, and somehow convinced Samberg that "she" is the real deal. The extremely graphic song describes all of their sexual escapades (with Thompson frequently mentioning his penis), but Samberg is none the wiser because of the wig.
* The Lonely Island. Whenever Rihanna leaves, he turns out to be an aggressive, in his own words "twisted as shit" gun-lover.
* The Lonely Island. When Jack prompts Sax Man to play, however, all we hear are blowing noises and a bit of discordant tooting.
* The Lonely Island when the last verse goes out of its way to mention Chex Mix three separate times, then the last chorus turns into a full-on jingle for the product.
* The Lonely Island) while getting away from cops. Eventually they produce so much shit that their legs get stuck in a mountain of it, causing them to be killed graphically in the shootout.
* The Lonely Island. (Young, sexy people that live in Malibu call it The 'Bu, because when you say the entire word, it takes time, and then you wouldn't be young anymore.)
* The Lonely", James A. Corry was convicted of murder but claims that he killed in self-defense. He is eventually pardoned.
* The Lonely Lady, declared to his assistant/future wife Jann Stapp "The movie will be a bummer, everyone will lose money. Except me. I got six hundred thousand dollars before it opened."
* The Lonely Scarecrow by Tim Preston, a scarecrow is lonely because all that shares the field with him are animals and they won't come near him and his scary face. When the snow of winter turns him into a snowman, the animals don't realize it's the scarecrow and come near to play. The scarecrow is happy and gets to stay happy when, as spring melts the snow and reveals his scarecrow self, the animals realise they don't have to fear him.
* The Lonely Winds make extensive use of these against vampires. Interestingly, the author takes the trouble to mention a workaround for the problem of silver being a relatively soft metal that would perform poorly with modern firearms.
* the Lone Power). It's entirely up to the wizard (or wizards) in question to figure out what they have to do and how to do it, and then complete that task without dying.
* The Lone Ranger (1938, Republic): The first of Republic's serials that year.
* The Lone Ranger (1966): his army of "treemen" turns out to be nothing but hired thugs in thick tree costumes.

* The Lone Ranger (2012) with Armie Hammer features a scene where Armie and Ruth Wilson are on a horse, she slaps him and then kisses him.
* The Lone Ranger (2013) is how it puts very little focus on the title character, instead being centered almost entirely around Tonto.
* The Lone Ranger (2013): the Ranger's mask is cut from his dead brother's leather vest, with the eyeholes formed by the bullet holes that killed him.
* The Lone Ranger (2013) Tonto made one for the Lone Ranger to shoot the Wendigo. (Of course, Tonto was insane, but he honestly beleved this would work.)
* The Lone Ranger #5, the Lone Ranger and Elliot Ness do this to defeat Black Bart (Ness does the kneeling, the Ranger does the pushing).
* The Lone Ranger, and are sadly unfamiliar with the origin of the piece, the tune could bring to mind a montage of zany animation.
* The Lone Ranger, and nobody, Comanche, white, or otherwise, tries to claim anything different.
* The Lone Ranger, as he goes off into the sunset...leaving grateful townsfolk behind, wondering, "Who is that Masked Man?"
* The Lone Ranger. As late as fall 2011 Disney announced it had shelved the project, though production picked up again a few months later, and the film rode into theaters in 2013.
* The Lone Ranger: A young boy listens to the story of the Lone Ranger being told by an aged Tonto.
* The Lone Ranger, Butch Cavendish and his gang disguise themselves as Comanches and attack white settlements in order to make it look like the Comanche have violated the treaty.
* The Lone Ranger, Butch Cavendish's gang stages a raid on a train in order to free their boss. Later Tonto steals an entire train full of silver ore from one of the villains.
* The Lone Ranger Butch throws kerosene and dynamite down a tunnel, and our heroes must outrun the result.
* The Lone Ranger but would leave one, in cartridge, to indicate he had been about incognito.
* The Lone Ranger does the shoot-with-a-bullet type to save Tonto in one episode.
* The Lone Ranger: During his final fight with Cavendish, the Lone Ranger wraps his whip around a tree and uses it to get yanked off the runaway railway car.
* The Lone Ranger featured prominent adaptations in other media which have helped perpetuate the prominence of these franchises. While these show generally had high ratings as radio shows in their initial runs, syndication of these radio shows in later decades (after the 1960s) did not seem as prominent.
* The Lone Ranger from seeing his true face, since if he were to ever show himself just plain maskless to other characters on the show, only Tonto would ever know who he was.
* The Lone Ranger had his silver bullets. He would often leave one with those his rescued as a reminder.
* The Lone Ranger, in some ways a precursor to Vash, used silver bullets as a symbol of his pledge never to take human life.
* The Lone Ranger: In the TV version as well as others, the title character always shoots silver bullets. Though it's really too soft for bullets, it symbolized justice by law and his vow to shoot to wound, not kill.
* The Lone Ranger is challenged as to whether silver bullets are as good at actually being shot as regular bullets. The Ranger replies by shooting a can on the ground so much it flies up in the air higher than any of them are tall, hitting it with every single bullet... then after a short pause, Tonto embarrasses them all by interjecting with "that silver could have fed my entire tribe for a year".
* The Lone Ranger is Johnny Depp" and "Virtually every movie with Depp becomes a comedy about him".
* The Lone Ranger, Latham Cole perishes at the bottom of the river, pinned beneath the tons of silver ore he was attempting to hijack.
* The Lone Ranger more or less every time the Lone Ranger pretends to join a gang of bad guys. Usually the Lone Ranger can brazen his way out of it with some

variation of "would a good guy wear a mask?" However, in one episode, the gang challenges him to shoot an Native American character, and so the Lone Ranger simply tells the boy in a Native language to play along and then pretends to shoot him. The boy agrees and pretends to be shot and the gang—not having understood what was said—is convinced.
* The Lone Ranger music is Rossini's William Tell Overture". Those interested in "hearing the original" may fall victim to this trope. The William Tell overture actually has four movements and the Lone Ranger music is the last one.
* The Lone Ranger not only gets a psychic vision from picking up a piece of Cavendish's silver, but despite not having fired a gun in
* The Lone Ranger on radio, was killed in a car accident in 1941, Brace Beemer was almost immediately picked by the show's producers to replace him. Since Beemer's voice was quite different to Glaser's, a story was quickly written in which the Lone Ranger spent five episodes recovering from serious gunshot wounds and unable to speak, so that listeners would either not notice the change in voice or put it down to the injuries.
* The Lone Ranger Overture) from listening to the adventures of their favorite hero.
* The Lone Ranger realizes that Cavendish only faked being knocked out. So, he bluffs him with a story of a cavalry detachment nearby, then reveals to his friends later, that he was faking so that Cavendish would be distracted while he came up with a plan to get the entire outfit.
* The Lone Ranger, Rebecca tears the bottom off her dress before crawling along the outside of the train.
* The Lone Ranger, Red does this to distract the Captain at Promontory Point. What makes this example unusual is that the leg she flashes is a prosthetic one made of ivory. The ploy works brilliantly.
* The Lone Ranger, Reid's voice actor, Earle Graser, died in a car accident. As a result, The Lone Ranger was laid low for about a week and a half, and could only speak in whispers, until they found Brace Beamer, who would keep the role for the rest of the radio run.
* The Lone Ranger stated that even though he hated the film, Cavendish was the best part about it.
* The Lone Ranger. Television adaptation of the radio show. Debuted in 1949.
* The Lone Ranger tended to shoot guns out of bandits' hands with either hand.
* The Lone Ranger: The titular Ranger was the sole survivor of an ambush that wiped out a Texas Ranger patrol.
* The Lone Ranger the treatment of American Indian peoples, including calling them savages, reflects the time period.
* The Lone Ranger: The TV show is the Ranger's best-known incarnation, but he had previously appeared in novels and on radio, and has since appeared in comics, film, and animation.
* The Lone Ranger. Tonto is Jack, The Lone Ranger is Will Turner, The Royal Navy replaced by the U.S. Cavalry etc.
* The Lone Ranger) was not a thing to be done lightly. See the entry under "Radio".
* The Lone Ranger with Dan and John with Rebecca before John left to learn law. Dan married Rebecca and have a son, Danny Reid (Jr.). It is implied that Dan knows John and Rebecca still loves each other.
* The loner background seems to be the case for Twilight Sparkle, who starts off as being too wrapped up in her studies to make friends. Before the series starts, her social circle was limited to her older brother Shining Armor, her assistant Spike, her mentor Princess Celestia, her old baby-sitter/surrogate-sister Princess Cadence (who she likely saw rarely to begin with), and a few other ponies including Minuette and Moondancer (though she hardly associated with them). In fact, the entire series is kicked off when her mentor, Princess Celestia, tells her to "stop reading those dusty old books" and go make some friends already. (
* The lonesome desert, where some characters have to walk to find out what their afterlife is like. Vorbis is trapped there for a hundred years, afraid of the judgement. It felt even longer.

* The Lone Traveler an unusually insightful version of Vernon Dursley outright calls the Death Eaters Nazis (or wannabes thereof).
* The Lone Traveler pureblood bigots to accept Muggle tech. Tell them that whatever it is they're so uptight about is completely magical and so much better than anything the Muggles could come up with, they'd bow down to the awesome wizards just for a chance just to look at it. Even if the items in question are stainless steel lab benches, safety goggles, or lab coats.
* The Lone Traveler usually need a drink to make her brain stop hurting after one of the Traveler's schemes has come to light.
* The Lone Warrior: Herr Kampf, a Nazi spy sent to sabotage the Army base Stan has been stationed in. He causes some damage, but is clearly subordinate to spymaster the Dictator's Shadow and is imprisoned by issue's end, never to be heard from again.
* The long and uncharacteristically dark "Transwarped" season premiere in
* The long-awaited 50th episode begins with the news, as usual. Except the newscaster is someone we've never seen before (later revealed to be
* The Longbow Hunters, "All those years of maintaining a secret identity, and the only reason nobody ever found out was that nobody cared!?"
* The Long Cosmos, one of the parallel Earths has been entirely devastated by a matter replicator run amok. The matter replicator was originally supposed to absorb enough vegetable matter to produce a book of the complete works of Shakespeare, but once a glitch caused it to produce another replicator just like it... which in turn produced other replicators. It did not help that the replicator owner, who was only concerned with spreading the knowledge of Shakespeare across the parallel Earths, completely failed to anticipate the dangers of a rogue self-replicating machine let loose on a planet.
* The Long Cosmos. The smaller ones cluster on the back of the large one, which folds its arms around them protectively and then rolls away. (It's unclear if this is their normal mode of locomotion, or one specifically used when an adult's appendages are otherwise engaged in shielding its young.)
* The "Long Count Fight" of 1927 where Gene Tunney retained the heavyweight title against Jack Dempsey. Many people felt Dempsey was robbed of a knockout win when he floored Tunney in the seventh round because referee Dave Barry spent five seconds ordering Dempsey to go to a neutral corner before starting the count. By the rules, however, this was exactly what Barry should have done since Dempsey didn't immediately do so (many also don't realize this was the first title fight ever to use the neutral corner rule). Some boxing fans have suggested Barry was supposed to have checked with the timekeeper and adjusted his count accordingly; however, there is nothing in the rules saying that's what he should have done.
* The Long Dark also has canned dog food as one of the food items that can be scavenged. Again, the player can't really afford to be picky, considering the game's setting.
* The Long Dark attacks you at the very start of the game and continually chases you throughout the map to try and kill you anytime you're outside. Shooting the bear with a flaregun will cause it to momentarily retreat (while a flare to the face is invariably fatal for other animals including normal bears). Once you get to the hunter's cabin in Mystery Lake, you can find a hunting rifle capable of hurting it and return the favour.
* The Long Dark bad news. Their presence indicates the presence of a body nearby. If the dead body is human, they may have non-perishable foods or tools on their person or beside them, and animal corpses can provide meat as well as hides and guts which can be collected and cured — all of these are vital survival supplies. Crows themselves can drop feathers, useful for making fletchings for arrows. To find them creepy and hate them for it would be highly ungrateful.
* The Long Dark has the wolfskin coat, which is made by your character from, well, wolf skins. The item description says:
* The Long Dark is that electricity ceased to function due to some electromagnetic storm.
* The Long Dark makes a great point about how economic stagnation and being

continually dismissed by the comsopolitan political elite of the 20th and 21st Centuries can have an even greater impact on isolated "flyover" communities than actual natural disasters.
* The Long Dark, one of the key features of the Coastal Highway map is a very small community. Not a single soul lives there and there are no bodies lying around, suggesting that the inhabitants moved out before the geomagnetic calamity struck. The gas station in the centre of the ghost town is a fairly good choice for a player safehouse as it has inside a work bench, plenty of storage space, and a burn barrel next to a small bed; however, wolves tend to lurk around the place so you'll need to stay on your toes while you're there.
* The Long Dark Teatime Of The Soul and isn't allowed, she convinces the hospital they want her to leave by attempting to get a pizza delivered, something she knows is impossible in London. At one point she tries to get a motorbike courier firm to order and collect "an American Hot with a list of additional peppers and mushrooms and cheeses which the controller of the courier service refused even to attempt to remember".
* The Long Dark Tea-Time of the Soul are full of her memories; the rest contain penguins.
* The Long Dark Tea-Time of the Soul are involved in the apparent suicide by beheading of some dude. Also, Dirk's non-working fridge? That has something to do with it as well.
* The Long Dark Tea-Time of the Soul. Dirk Gently finds that his newest client, a wealthy man who had hired him as a security guard, had his head severed and placed on an active record machine while awaiting Dirk. Of course, the door to the room was locked from the inside when the scene was initially discovered. The police analyze this as an elaborate suicide done simply to cause trouble. In fact, magic was involved, but Dirk concocts a ridiculous but just barely plausible explanation of how it could be a suicide rather than try to convince them that magic is real.
* The Long Dark Tea-Time of the Soul Dirk Gently gets into a crime scene by being right behind a uniformed policeman, and when that policeman got stopped to show his ID Gently just walked by and said "He's with me."
* The Long Dark Teatime Of The Soul, Dirk's amazingly craptastic electronic I-Ching calculator is described as probably having been made in whatever Asian country was doing to South Korea what South Korea was doing to Japan.
* The Long Dark Tea-Time of the Soul features the Norse god Thor. He complains to the female protagonist, Kate Schecter, that even though gods walk among humans, no one notices them.
* The Long Dark Teatime Of The Soul. It was stolen twice, but on both occasions the thieves abandoned it in disgust.
* The Long Dark Teatime Of The Soul, Kate has a friend who plays the double bass and is tired of people saying "I bet you wish you played the piccolo" when they see him trying to carry it around. When she learns Dirk is a private detective, she spends a moment thinking if there's something everyone would say to a private detective, so she can avoid saying it. When she explains this, Dirk replies "No. What happens is that everybody looks very shifty for a moment, and you got that very well."
* The Long Dark Teatime Of The Soul, Kate uses this trope on Dirk when she's chewing him out for following her and running into her car. He eventually gets tired of this and defies it by taking off his tie and handing it to her.
* The Long Dark Tea-Time of the Soul once read that the human brain can juggle a maximum of seven trains of thought or observation at once. Sure enough, when an eighth thought occurs to her, a plot-relevant detail she'd just begun to notice pops out of her head and is forgotten.
* The Long Dark Tea-Time of the Soul receiving this information out of nothing), must be the truth.
* The Long Dark Tea-Time of the Soul specific comments such as "You are very fat and stupid and persistently wear a ridiculous hat which you should be ashamed of."
* The Long Dark Tea-Time of the Soul stands on the edge of a fjord cliff and roars (in his rage at Odin and Toe Rag's manipulation and treachery.)

* The Long Dark Tea-Time of the Soul, Thor uses his powers to completely black out Kate's entire neighborhood in order to get her attention, inadvertently terrifying her in the process.
* The Long Dark Teatime Of The Soul, when a Heathrow check-in desk blows up:
* The Long Dark Tea-Time of the Soul when he is barricaded in his kitchen against a marauding eagle.
* The Long Dark Tea-Time of the Soul, where the horoscope writer for the local paper knew Dirk at university, and aims his horoscopes specifically at Dirk. Since he strongly dislikes Dirk, this resulted in the newspaper losing 1/12 of its readership.
* The Long Dark Tea-Time of the Soul which conveniently eats the escaping villains.
* The Long Dark, the only way back is to cross the dam on a thin ledge.
* The Long Dark. You play as a poor soul who is lost and stranded in the Canadian wilderness due to a geomagnetic event that has rendered all modern technology useless and consequently thrown humanity off the top of the food chain. If you don't freeze, or starve, or die of illness, you'll likely be torn to shreds by a wolf or a bear.
* The Long Earth affects almost everyone, but colonies are quickly founded more than a thousand Earth deep.
* The Long Earth. After the invention of Steppers, inter-dimensional travel becomes not only easy but convenient. Datum Earth suffers massive depopulation as people emigrate en-masse to other Earths. The governments of Datum Earth attempt to maintain rule over their colonies, but this becomes difficult due to the inability to use or even transport communication devices across dimensions, resorting to hand-delivered mail.
* The Long Earth Also unique is the fact that, unlike most other examples where parallel universes may diverge in recent history but are still recognisably similar to our own Earth, the parallel universes of the Long Earth are wildernesses devoid of human life. Only our own Earth evolved humans.
* The Long Earth ancestors 'stepped' out into the Long Earth and generally never came back — "Datum" humans are the descendants of those that never left.
* The Long Earth - apparently, passing this is no longer enough for AIs to be recognized as sapient. Lobsang (a mysterious, far-reaching AI with backups everywhere) got around it by claiming to be the reincarnated soul of a Tibetan monk who died the moment he was switched on. He passes his human friends' personal Turing tests by engaging in frivolous behaviour such as cosplaying Indiana Jones while exploring ruins.
* The Long Earth, attempts to understand Willis Linsay's notes on alternate Earths have fallen foul of the man's handwriting as much as the fact he was inventing his own mathematics as he went along, and then writing that in code.
* The Long Earth. Because they're furry, they don't need clothing, and because they lack opposable thumbs, they have a limited ability to use tools, but they still wear belts containing basic implements and weapons.
* The Long Earth colony wants someone who knows how to work metal and eventually let them develop iron production. Many others realize infinite abundance means billions of humans could simply forage for what they need, dissolving the need for high-density agriculture and stable settlements entirely.
* The Long Earth, features a space elevator built on one of the countless iterations of the red planet that is otherwise all but lifeless. Everything else created by the civilisation that built the elevator has crumbled into nothing, but the cable alone still reaches into the sky, jutting from a featureless bit of bare ground at the bottom of a 20-mile deep shaft.
* The Long Earth, First Person Singular is a gigantic organism that was born on an alternative Earth as a single organism filling an ocean. When she found out about other individuals coming in from other worlds, she realised her own loneliness and set out to assimilate every organism in all the worlds into herself. Though she's incredibly intelligent, she doesn't view this as a bad thing, but the other organisms are inclined to take a different view.
* The Long Earth in search of one of these, based entirely on his conviction that

one logically had to exist somewhere. This requires getting to "the Gap", a missing link in the Long Earth where a meteor hit, travelling to that universe's Mars, and then traversing the almost entirely separate chain of parallel Marses until they find it. The civilization that built it is already extinct, as Mars only supports life in brief windows compared to Earth, but Willis gets a sample of the "beanstalk cable" to return to Earth.
* The Long Earth, Lobsang speculates that a great deal of human mythology originated from misinterpreted encounters with trolls and elves, who in this setting are apelike creatures with the natural ability to "step" between parallel Earths.
* The Long Earth: Mac sarcastically suggests that Cutler drinks grain alcohol and rainwater; "Got to maintain the purity of those bodily fluids." Cutler doesn't get the reference.
* The Long Earth series explores parallel Earths, including ones where hominids developed along different lines or where other animal lineages developed intelligence instead.
* The Long Earth series, Joshua's wife is briefly jailed for punching an assassin who had just stabbed Joshua. As Joshua is a very unpopular figure with the government, it's implied to be a case of corruption and legalistic bullying.
* The Long Earth show a string of Earths, all showing Africa and the Arabian Peninsula.
* The Long Earth: The central premise is that there are an infinite number of alternate-dimension Earths, but ours is the only one where humanity evolved. There some Earths where humanoid species (some resembling yetis or elves) have some primitive societies, but nowhere near as dominant as humanity.
* The Long Earth was adapted from an earlier short story, 'The High Meggas.'
* The Long Earth) where life evolved in an utterly different direction, staying at germ size but cooperatively working together to create intelligence. It covered the entire ocean, with land that's lifeless. However, when it stepped side-wise to the next Earth, only a portion of it went, so it's not a perfect example after stepping discovery.
* The longer a black hole exists, the more matter and energy it consumes. The more matter and energy it consumes, the greater its own mass becomes. The more massive it becomes, the more matter and energy its gravity can draw in... well, except for Hawking radiation.
* The longer Japanese cut was finally dubbed concurrently with the first film's fourth dub, and shares the same cast. Its first releases was the Dragon Dynasty DVD in 2006.
* The longest and most difficult sidequest in the game, the Skulltula hunt, rewards you with a source of unlimited money... however,
* The longest and most sinister attempt is by the student Volio towards Cecily's governess, Miriam. When Volio gets wind of the fact that Miriam isn't as prim and proper as she appears, and is in a relationship with a student, he tries to force her to act as a go-between and advocate between himself and Cecily, with whom he thinks himself in love. (He raises the possibility of demanding sex from Miriam too, but she tells him she would tell Cecily and thereby guarantee his rejection.) Miriam pretends to agree to help him woo Cecily, but in fact, she and her friends generate fake correspondence instead.
* The Longest Day, about the D-Day invasion of Nazi-held Europe, prominently features paratroopers, including showing what happened when paratroopers were dropped right on the heavily defended town they were supposed to take, namely getting slaughtered by the Germans defenders.
* The Longest Day, allowing the Americans to break out of the beach into the countryside.
* The Longest Day as Lt. Wilder, whose role was deleted from the final cut.
* The Longest Day, BGen. Norman Cota (Robert Mitchum) finds that the highest ranking Army engineer on Omaha Beach is Sgt. John H. Fuller. He promotes him to Lieutenant and puts him in charge of demolishing a concrete barrier.
* The Longest Day directors, that only came out because of Zanuck's guidance.

* The Longest Day: During D-Day, the 29th Infantry Division's was tasked with clearing strong points at Omaha Beach and they were in the first wave of Allied troops during Operation Overlord. Their prominent role in the battle is shown throughout the film. The division is a part of the Florida, Maryland, North Carolina and Virginia Army National Guards.
* The Longest Day. During the glider assault on Pegasus Bridge, Major Howard mentally reviews what he's been told in his briefing - particularly the final part: "Hold until relieved."
* The Longest Day entry above, the switching (or removal) of signs did regularly happen in WWII. In fact it was one of neutral Ireland's main defenses. Road signs were arranged so that following them would lead the invaders in a big circle. Still practiced by some locals today, though that's more so that they can troll the tourists who get lost and stop to ask for directions.
* The Longest Day If Saving Private Ryan is not enough for you, maybe three hours of the D-Day will be enough.
* The Longest Day in Chang'an: Ge Lao collects information and sells it to people willing to pay enough for it.
* The Longest Day in Chang'an: Happens to Tan Qi. Yuan Zhi locks her in a coffin even though he knows she's still alive, then has his allies throw the coffin in a grave and start to fill the grave in. The whole time Tan Qi is awake and screaming to be let out. She's rescued just before she loses consciousness.
* The Longest Day in Chang'an has a villainous version that isn't actually the end of the series. Long Bo dies when he charges into the soldiers gathered to kill him.
* The Longest Day in Chang'an is forty-eight episodes long, and most of it takes place in a single day.
* The Longest Day in Chang'an: Liu Lang ate a document containing important information before he was killed. Xiao Jing has to cut his corpse open to retrieve it.
* The Longest Day in Chang'an: Several people get engulfed in flames in the aftermath of the first explosion.
* The Longest Day in Chang'an: Tan Qi is Li Bi's slave, and at first she's perfectly happy with this. Early in the series she outright refuses his offer to set her free. Subverted later, when she finally realises he has never seen her as a person. And then double subverted when she goes back to working for/with him at the end.
* The Longest Day in Chang'an: The terrorists get into the city just before the Lantern Festival, one of the biggest festivals in China, and plan to assassinate the emperor by blowing up half the city during the festival.
* The Longest Day in Chang'an: This is how Zhang Xiao Jing gets involved in the plot. Li Bi recruited another criminal before the series starts; when he's killed Xiao Jing is chosen as a replacement.
* The Longest Day in Chang'an: Yu Chang wields two swords at once. Long Bo does the same just before his death.
* The Longest Day. It's a movie all about D-Day, so naturally it features tons of scenes from the 5 different beaches the Allies landed on.
* The Longest Day manages to show the entire D-Day operation without any blood. In part, this is probably because blood doesn't look good in black-and-white.
* The Longest Day: On D-Day, the U.S. Army Rangers launch a costly assault on Pointe du Hoc to take out several artillery batteries that could have threatened the main landings. However, after finally making it up the cliff and securing the bunkers, the Rangers find out the guns were never even installed and the entire assault was a waste of time. This is subverted if you know that, in real life, the Rangers later succeeded in locating and destroying the guns.
* The Longest Day (played by an uncredited actor), exchanging a joke with Major Howard about how "paras are always late."
* The Longest Day the German coast-watchers manning a bunker gaze out into the dim pre-dawn light and see . . . the Normandy Invasion heading right for them, all five thousand ships of it.
* The Longest Day, until an American officer sees through the trick and orders the

sign cut down.
* The Longest Five Minutes has a piano tune that plays all throughout your journey through Stardust Island, which is basically a humongous landfill where the hopeless and homeless go to die.
* The Longest Five Minutes while his teammates try desperately to get him to remember everything he's fighting for.
* The longest is a mission where you have to launch an assault on a palace and a Sith temple at the same time. The player character and Kreia go to the palace while the B-team take on the temple. The temple mission can either be challenging or a cake walk depending on whether you're sending three schmucks or high-levelled multi-class Jedi.
* The Longest Joke In The World. When the protagonist, dying of thirst and unaware that he's just stumbled on a wish-granter, says he wants to not be thirsty anymore, the snake makes it so that he can survive on much less water than a normal human needs. Then he gladly explains all about himself and the nature of his power, gives good advice on what else to wish for, and directs him back to civilization for free.
* The Longest Journey, April Ryan has developed the ability to shift between Stark (her home) and Arcadia at will. She chooses to remain in Arcadia, and by the time she loses the ability to shift, we see that she doesn't feel great about her decision.
* The Longest Journey called Arcadia to prevent humanity from destroying itself. The Earth as we know it (which is called Stark to differentiate between it and the real Earth) became the world of science and the onset of the game sees Arcadia starting to "leak back" into Stark.
* The Longest Journey drops some subtle hints that she might be a little bit evil:
* The Longest Journey epic with complex cosmology based on the contrast between the scientific world we know and its magical alternate reality. In other words, the dual world idea moved from the realm of gameplay to the realm of story and never returned.
* The Longest Journey, etc.) stopped working, as the laws of physics took over.
* The Longest Journey, goes full-hog with it. So many pieces, and not enough game to cover them with.
* The Longest Journey her names include: April Ryan; Venar Kan-ang-la; April Bandu-embata of the Banda; Waterstiller; Windbringer; (a) Wave; The Raven; and The Scorpion.
* The Longest Journey, however; in Stark, where there is no magic, it's just another foreign language.
* The Longest Journey implies that it was an unwitting product of magic seeping into Stark.
* The Longest Journey in the game involves getting a new antigravity module for it.
* The Longest Journey is a mortal who serves a lengthy term (measured in centuries) keeping the twin worlds of Stark and Arcadia from colliding. Afterwards he or she returns to mortal life.
* The Longest Journey is that the stereotype played (possibly without realization) a role in their design.
* The Longest Journey, one of the species April encounters in Arcadia perceives the timeline all at once, and so has a horrible time keeping tenses straight when speaking to more temporally limited creatures.
* The Longest Journey, protagonist April Ryan can attempt to buy something in an Arcadian marketplace using her gold ring, only to be informed by the merchant that gold is worthless there—the precious metal of choice in Arcadia is iron.
* The Longest Journey puzzle very early. It may put off some players being stuck with lots of exposition and a hard puzzle early when you haven't really learned the plot of the game and aren't really invested in the story.
* The Longest Journey seek to obtain every book ever written, which they store in their library, located on a moving island whose location is a secret for but a few.
* The Longest Journey, she's awed by its beauty and simplicity (being an art student helps). Naturally, she decides to stay in Arcadia after the events of the

game. Things get only worse in Stark after that. The Collapse results in society going back to older technology, and interstellar space flight is no longer a possibility (not that life in the colonies was a picnic). Notably, things in Arcadia have also taken a turn for the worse but for a different reason. Life in the colonies may have been worse before the Collapse, but after the Collapse they may be dying out. It's heavily implied that the colonies were deliberately kept from being self-sufficient, so they'd always be reliant on Earth for supplies.
* The Longest Journey so that no technology goes to Arcadia and no magic goes to Stark.
* The Longest Journey that allow travel between the various worlds. Shifters are people who physically travel via portal they themselves open. Normally they can only travel between Stark (the world of technology) and Arcadia (the world of magic). April actually had to fly into space in Stark in order to get to the Guardian's Realm via a wormhole of some sort. The sequel also introduces Dreamers, people who fall asleep in one world and project a physical double into another one. The reason both types of people are able to cross between worlds is because all these worlds used to be one until they were split up by powerful wizards and scientists with the help from some space dragons in order to keep the world from the being destroyed.
* The Longest Journey, the local police force is owned and backed by a soft drinks megacorp (which, amazingly, is not part of the villain group). In addition to reading you your rights, they'll read you the latest catchy slogan and inform you of what new amazing flavors are out this month.
* The Longest Journey to get over yourself.'' Even funnier after the first scene before she puts on clothes.
* The Longest Journey: Two realities used to be one but, as people became more adept at both science and magic, it became clear that the world would eventually be destroyed. Thus, it was split in two, with some extra pieces left behind such as Storytime, Mrs. Alvane's house, and the Guardian's realm; Stark, the world of science, and Arcadia, the world of magic. Magic is impossible in Stark because of strict laws of nature. Science is impossible in Arcadia due to the laws of nature being in flux.
* The Longest Journey unconsciously travel to Arcadia while sleeping in her bed (and she didn't sleep fully-clothed, naturally). It happens again much later when she has to flee after being awakened at night and arrives at Arcadia in just her undies.
* The Longest Journey was invented at the beginning of the 21st century. Better get on that quick.
* The Longest Journey when one Alatien woman is apparently very attractive among her kind, and despite her crush on an Alatien warrior, she is too shy to court him. Turns out that he's thought her out of his league all along, and hasn't even bothered asking her.
* The Longest Journey, where April's dimension-traveling abilities seem to be tied to her painting talents. The first time she travels to another world without external assistance, she paints the place she wants to go until it turns into a Shift that takes her there.
* The Longest Journey, which has the effect of making that second game sometimes feel like the outlier.
* The Longest Most Meaningless Movie in the World was an example of this: it's 48 hours of random stock footage. However, since then, even longer movies were made.
* The longest ongoing conflict is the Chechen-Russian conflict which has been going on since
* The longest range sensors in the Honorverse detect ships by their engines. Therefore, getting a respectable velocity going and then simply coasting from extreme sensor range to extreme weapons range is the bread-and-butter of stealth tactics. (During this process, you may as well go have dinner and enjoy a good night's sleep before tomorrow's battle.)
* The longest running and currently best selling Italian comic book,
* The longest running non-white character is probably Kevin Tran, who shows up at

the very end of Season 7 and makes sporadic appearances throughout Seasons 8 and 9. His mother, Linda, also premieres around the same time, but is in even fewer episodes than him.
* The longest serving member of Congress was John Dingell who took office in 1955 and retired in 2015.
* The Longest Yard (2005 version). He's a friend of the prison warden and behaves as you expect from a fat southerner.
* The Longest Yard. After disgraced football player, Paul Crew, gets sentenced to prison following a drunken high speed chase, the warden asks Crew for a few pointers on how his team, comprised of the prison's guards can improve their abilities and win their league's championship. Crew recomends a "tune-up" game, which would consist of the guard's team playing, and beating, a much weaker opponent to improve the team's morale. The warden convinces Crew to train a team of convicts for the "tune-up" game with the possibility of shortening his sentence.
* The Longest Yard. A group of wildly effeminate male convicts who modified their prison clothes into skirts and halter tops and later participate in the climactic football game...as the team's cheerleaders. Then again, it's also possible they might be transgender.
* The Longest Yard are actual retired NFL players, such as Michael Irvin as a wide receiver for the inmates' team and Bill Romanowski as a linebacker for the guards' team.
* The Longest Yard came from a friend of his who was a promising football player. After a career-ending injury, his life took a downward spiral. He was working a minimum-wage job at a sandwich shop and was being mistreated by his snobbish girlfriend. Ruddy took the scenario from there.
* The Longest Yard has lots of Unnecessary Roughness going on, on both sides. The opportunity for Unnecessary Roughness is really the only reason the prisoners agree to play the game in the first place, and the warden instructs the guards' team to humiliate the inmates by pounding them into dust.
* The Longest Yard in the third act. Jim Rome also briefly appears as himself.
* The Longest Yard is a good example — the warden says he'll pin Caretaker's murder on Crewe if he doesn't give the game to the guards. Crewe goes along with it at first, but it doesn't take long for him to change his mind. This is also part of Crewe's backstory, where he threw a football game by "shaving points" since "he was in a bad way with some worse people."
* The Longest Yard is the prison warden demanding an inmates vs. prison guards football game and Burt Reynolds's character being forced to recruit the various criminals with no promise of any reward but a chance to beat up the guards, humiliate the guards or both.
* The Longest Yard. It's basically a tiny shack where prisoners bake in the desert heat for days at a time — and sometimes the guards "accidentally" forget to give them food and water.
* The Longest Yard, one of the guards takes a huge hit and ends up with a concussion. As he's being carried off the field, he says (to the men carrying him) "Hey, Mom! Hey, Dad! Thanks for picking me up from school!"
* The Longest Yard' team is the bad one. They're sadistic bullies who harass and mistreat the prisoners on and off the field; most of the inmates are only playing for the chance to get revenge for all that.
* The Longest Yard, the Cons manage to score on a last second trick play after mounting a miracle comeback to put them one point behind the guards. They have the choice of either kicking the extra point to send the game into overtime, or to go for two and the win. They choose the latter, setting up another trick play that results in them scoring and winning the game.
* The Longest Yard, the warden of the prison orders a former football player named Crewe who has set up a "convicts vs. guards" game to give the guards a 21-point advantage or he will frame him for involvement in a murder. Essentially having no choice, Crewe agrees provided the warden will have the guards not injure the prisoners. The warden agrees, then double-crosses Crewe by later telling the head of the guards once they have a 21-point advantage to "inflict as much physical

punishment on the prisoners as humanly possible."
* The Longest Yard, two of the cons pour Gatorade over the warden after the Mean Machine wins the game. The unamused warden gives them both a week in the hotbox for it.
* The Longevity potion reduces the drinker's age by 1-10 years. However, each time one is drunk there is a 1% cumulative chance that the effect of all previous potions will be reversed. If a 150 year old human had drunk many such potions and was effectively 50 years old when this occurred, they would
* The Long Firm is strongly implied to have been involved, but no details are revealed.
* "The Long Game": At the beginning, the Doctor and Rose get out of the TARDIS and he gives her a few pieces of information about where they've landed for her to tell newbie Adam when he comes out. After Adam gets out, Rose points out all of those things about their surroundings, but adds that they could consider turning the heating down. It's later revealed the heat comes from the massive alien that secretly runs the station, which needs to be vented away from it so it stays alive.
* "The Long Game" has a mention of futuristic computers — activated by linking to people's brains — having safeguards to prevent overload.
* "The Long Game". In fact, everyone in the future has an implant that allowed rapid uploading of knowledge.
* "The Long Game": In the year 200,000 Earth is allegedly orbited by four artificial moons, although we never see them.
* "The Long Game": Recurring character the Face of Boe makes a cameo on a news report, where it's mentioned that he's just announced his pregnancy.
* "The Long Game", Rose hands Adam a slushie-type ice drink that is apparently beef-flavored.
* "The Long Game": The Doctor only takes Adam Mitchell home after he royally screws up, but Adam says "Blimey. I thought you were gonna chuck me out of an airlock." Not that the TARDIS has one, as it can generate an atmosphere in vacuum — the Doctor and their companions are frequently shown looking out into space.
* "The Long Game": The Mighty Jagrafess' plan involves encouraging this in humanity. The Editor is so used to it he has no idea how to react when Cathica surprises him.
* "The Long Game": The Ninth Doctor does this twice to the Editor of the news station Satellite 5.
* "The Long Game": The script reveals Adam Mitchell's mother is named Sandra.
* "The Long Game", though that makes sense, since it's a fairly recent outpost with a tiny population.
* "The Long Game" to be promoted there because "the walls are made of gold". However, it turns out to be a place of horrors, with the implication that the only people "promoted" there are troublemakers the Editor and the Mighty Jagrafess want to get rid of.
* "The Long Game" was "The Companion Who Couldn't", giving away how short Adam's story arc was going to be.
* "The Long Game": When the Editor goes through Suki MacRae Cantrell's video biography, he calls it out as being the work of a liar.
* "The Long Goodbye" is a curious one: Ronan Keating and Paul Brady co-wrote it for Brady's album
* "The Long Goodbye Job". Stealing orphan drugs to treat rare terminal illnesses →
* The Long Goodbye, said by Marlowe when two cops start bickering with each other when they're supposed to be interrogating him.
* The Long Goodbye, when a woman is giving a confession that Marlowe doubts, she talks of dumping a man's body in a reservoir and Marlowe asks her how she got it over the fence. She blusters about adrenaline and then Marlowe reveals that there is no fence. After she breaks down he admits that he's never been there and really doesn't know about fence or no fence. He just thought she was lying.
* The Long Good Friday Harold Shand sends his men out to grab local hoods and haul them in for interrogation to find out who is bombing his businesses. They're pulled

out of a truck and trundled along the pulley system hanging upside down. The actors had to keep being supported between takes to prevent them passing out.
* The Long Good Friday. He begins as a competent mob boss with grand ambitions, who nonetheless seems sane and grounded. After a series of mysterious and violent incidents chip away at his criminal empire, he gradually falls apart; by the end of the film, he has slit the throat of his most trusted lieutenant, alienated his most valuable business partners, and had his fellow gang bosses strung up on meat hooks. It all ends badly.
* The Long Good Friday: Living in a Greenwich flat at the time, Barrie Keeffe could see the derelict Docklands from his window, and his ideas entwined following a chance meeting with an Irish Republican in a pub. Gangsters against terrorism soon became a going concern. Harold Shand's vision about how the Isle of Dogs could make Britain proud again was based on rumblings about the redevelopment of the Docklands that Keeffe heard from council officials.
* The Long Halloween features a sequence like this when crime boss Carmine Falcone sends his goons out after Batman and Catwoman. In one panel, the room is lit up. In the next, Falcone's face is half-shadowed. In the last, everything is black except for one of his eyes, and his scars.
* The Long Halloween in order to help Harvey so that he "wouldn't have to work so much" and they could be together.
* The Long Halloween is a story where the killer strikes over many holidays, but begins on a Halloween and ends on the next one.
* The Long Halloween" is the mob and traditional criminals in general having to come to terms with their own increasing impotence as the age of flamboyant supercrime begins.
* The Long Halloween's origin, but all the ones worth mentioning show him as working with Batman before turning into Two-Face.
* The Long Halloween: The Holiday Killer strikes on Halloween, Thanksgiving, Christmas, New Year's, Valentine's Day, St. Patrick's Day, Mother's Day, Father's Day, Independence Day, a birthday, then Halloween again. On April 1st, the killer attacks the Riddler but doesn't kill him — because it's April Fools' Day.
* The Long Halloween, the next serial killer leaves behind incomplete Hangman games.
* The Long Halloween. When they meet up later for a date (as Bruce and Selina) and Selina asks how he got the scratch, he tells her exactly this.
* The Long Halloween: which reinvented Julian Day, AKA Calendar Man, not only making him a Hannibal expy, but also using this exact speech, not against Batman himself, but rather towards the true Holiday Killer, who it's heavily implied he knows the identity of, but avoids even using gender pronouns as to not give any clues to Batman.
* "The Long Haul" by Ken Liu portrays a zeppelin journey in a world in which zeppelins never went out of fashion and exist alongside jet airliners in the present day.
* The Long Haul has Greg go into a gas station bathroom only to find out that it's full of graffiti, toilet paper sprawled on the floor, and the mirror is partly broken. He decides to go in there anyway.
* The Long Hot Satsuma. It lampshaded this trope by explaining, at the start of some episodes, that it was actually a cool, short, non-citrus-fruit of a program.
* The Long Hot Satsuma of a failed investigative journalist trying to find the true identity of one Adolf Hitler. At the end of the episode, he bursts into the BBC, and accuses one of the announcers. She says "Don't be stupid. Mind you, it's one of my colleagues..." "Which one?!" "This one." We hear the sound of a door creaking, and...the episode ends. (Which means every announcer who'll ever announce after that is accused of being Adolf Hitler...)
* The Long Hot Satsuma took nicknames, and those who give them, to ridiculous extremes.
* The Long Hunt of April Savage, which was about a homesteader whose wife, daughter and son are killed by a band of renegades in 1871. Savage has vowed to track down the eight men responsible, one of whom is his own brother, even though he knows

they have fled to the ends of the Earth.
* The Longing is all about this. The game takes 400 days in real time to finish (though time does also progress when the game is not active), everything in the game is absurdly slow and the player character doesn't even walk fast.
* The Longing of Shiina Ryo may become this, depending on their sensei's mood.
* The Longitude Problem" at a prearranged time, whereupon the dog would yelp at the same instant. In case it wasn't blindingly obvious, this theory never caught on with the scientific community.
* The Long Kiss Goodnight, a teenaged boy is smoking a cigarette when he is surprised by Charlie the Spy coming up behind him with a big sniper rifle. He pees his pants.
* The Long Kiss Goodnight, Charlie's rampage through the farmhouse is not seen, only heard, from Mitch's perspective as he's locked in the basement.
* The Long Kiss Goodnight: During the scene when Mitch is being interrogated by Timothy while tied to a chair, Timothy tries intimidating Mitch by flinging a knife that embeds itself on the chair's surface, a few inches from Mitch's groin.
* The Long Kiss Goodnight. Geena Davis' character is dressed in a bathrobe while Samuel L. Jackson's is wincing over a penetrating injury.
* The Long Kiss Goodnight has a plot of the CIA staging a terrorist attack and "blaming it on the Muslims" so as to justify a budget increase.
* The Long Kiss Goodnight is about to leave Charlie and her young daughter to freeze to death in a meat locker. Charlie, in an attempt to save her daughter, reveals to him that her daughter is also his daughter. He leaves them both in the locker anyway.
* The Long Kiss Goodnight just in case she needed to set stuff on fire.
* The Long Kiss Goodnight. Of course, it was produced and directed by her husband.
* The Long Kiss Goodnight's character disagrees, saying many have tried and failed, including the state's entire population.
* The Long Kiss Goodnight was in part shot in Toronto - you can see the Honest Ed's sign in the background in one scene.
* The Long Kiss Goodnight where the lead's usual hair is dyed blonde during her time as an assassin. When she loses her memory, she lets her natural auburn hair grow out. The CIA is still able to recognize her on video, despite a drastically different style of clothing as well.
* The Long Kiss Goodnight, with Geena Davis and Samuel L. Jackson (in what might be his funniest role to date) contains this exchange:
* The long lead time also had a less positive outcome. Her appearance in "The Last Roundup" led to accusations of insensitivity against the handicapped, and
* The long legs and giant body of "The Robot Spy", well-known from JQ's opening credits, qualify it for this trope as well.
* The long-lived and nigh-immortal Eldar fight tooth and nail to survive. Granted, it's not so much that
* The long-lived Tiste Andii, Korlat, and the already fairly old human, Whiskeyjack, fall in love in
* The Long Long Holiday is gunned down by the Germans while yelling "Viva la France!"
* The Long Long Holiday is to look like a traditionally animated series by employing the Cel Shading technique.
* The Long Long Trailer and Desi Arnaz) one of the newly wed couple's first fights comes from this.
* The Long Long Trailer, the groom does this — and bumps her head on the doorframe. Also, because he's shy about them being newlyweds, he tells the other guests at the trailer park that she's twisted her ankle, and all the women start fussing over her. One even slips her a sleeping pill, thinking that she needs to sleep off the pain — meaning that their wedding night isn't going to be what he's expecting.
* The Long Mars: It's revealed that most iterations of Mars possessed ecosystems at some point that were ultimately destroyed when the planet cooled. On those few Marses that subsequently warmed up again due to volcanic activity, life is able to

redevelop from spores and microscopic organisms buried underground... though, ultimately, there's only one Mars in three million where the native Martians were able to develop quickly enough to build a space elevator and get offworld before the planet cooled and died again.
* The Long Morrow", footage of a Mercury launch is used to represent the launch of Commander Douglas Stansfield.
* The Long Morrow", the astronaut Commander Douglas Stansfield embarks on a 40 year round trip mission to a solar system 141 lightyears from Earth on December 31, 1987.
* The long-nosed reptilians known as H'nemthe have a population of twenty males for every female. Thus, in their society, females are often given a high status and males dedicate their lives to seeking out a mate.
* The Long Now Foundation's projects are about this. They include a clock to run for ten millenia and an effort to preserve languages that are likely to become extinct.
* The Long Price Quartet by causing its cities to be swallowed by the ground.
* The Long Price Quartet. Even before that, since an andat that had been bound and then released could never again be bound in the same way, the power of the andat had been gradually weakening as more and more andat became impossible to bind.
* The Long Price Quartet for defence and economic prosperity. The andat are abstract concepts made physical that grant total power over that concept e.g. Stone-Made-Soft, Clarity-Of-Vision, Water-Moving-Down etc. The Khaiem have no military power and relatively little technology. The over-dependence on the andat is a major theme of the series.
* The Long Price Quartet, one is arranged between Ana Dasin of Galt and Danat, Otah's son and heir.
* The Long Price Quartet. The Galts are a rising power, blunt, direct, primarily industrial, and derive their power from their technological progression.
* The Long Range Acoustic Device AKA the Sonic Cannon is a sound-based weapon that serves a similar purpose. This is the device that was first widely publicized when it was used to avert a
* The Longriders Guild (an international association of long-distance riders) and the governments of Yemen, the United Arab Emirates, and Saudi Arabia have all been unable to find
* The Long Road (2015), Hiccup immediately regrets promising to introduce Jack to his friends, as he semi-sarcastically comments that he should have just pretended he didn't know them and he can really only trust Stormfly not to offend.
* The Long Road (2015): Instances where Jack smiles at Hiccup in particular garner interesting reactions from the latter. Holding his hand also does this, as Hiccup notes that Jack, unlike all other people he's ever met, has smooth, unblemished hands.
* The Long Run, Felder at one point told Frey "When this is all over, I'll kick your ass". Months later, late in the band's last concert, with three songs left, Felder looked at Frey, held up three fingers and said "three songs left", to which Frey replied, "I can barely wait". Then the two joined for a harmonious rendition of "The Best of My Love". After the show the knock-down drag-out indeed happened, leaving quite a bit of damage in its waking.
* The long-running Christmas "Give like Santa... Save like Scrooge" ads for Canadian Tire. More recent, but (much) more despised, are the ads with the smug superior bearded guy smugly rescuing his doofus neighbors with his superior MasterCraft gadgets (available
* The long-running conflict between the Thals and the Kaleds on the planet Skaro. It ran for so long, that technology in the war started to run backwards; one soldier was found with a laser and a musket, wearing a radiation detector and a gas mask. The conflict was only brought to an end when an
* The long-running Hershey's "Christmas Bells" commercial (with Kisses ringing "We Wish You a Merry Christmas" as peaceful bells) was altered in 2020: it starts off as normal, then suddenly a hand picks up one of the Kisses and it instantly changes to a father and daughter decorating cookies with Kisses set to a remix of the

music, which is what Hershey's claims is the real icon to its Christmas season. Fans were not happy about this commercial change, and backlash was immediately posted online. The controversy was so much that Hershey's cancelled plans to replace the original "Christmas Bells" ad with the new one and began airing both versions interchangeably.
* The long-running "John the Lord Chamberlain" series about a top-ranking eunuch in the Byzantine court is the
* The long-running Weatherlight Saga of books eventually revealed that the Glitter Moon, one of Dominaria's two moons, was actually
* The Longshanks are a variety of abhumans (officially recognized and approved stable
* The Long Ships Orm and his companions serve in the Almohad Caliph Al-Mansur's bodyguard for several years. Orm's brother Are and Olof Summerbird both served in the Varangian Guard in Constantinople.
* The Long Ships, Orm has to convert to Christianity to marry the beautiful Ylva. (From Islam, of all religions; he'd already converted from the Norse religion to serve under Caliph Almansur.)
* The Long Ships, protagonist Orm and his companions are captured in Spain while on a viking trip, and spend two years as galley slaves.
* The Long Ships the narrator notes that Orm's best friend Toke tended to start crying when he got drunk enough and that this was a sign that he was about to get violent.
* The Long Ships. This leaves Orm with a hypochondriac streak, and in the end leads him off on his first journey; he was denied permission to join his father and brother on their raid, and was abducted by other raiders when they were away.)
* The Long Ships: You might think that being enough of a dandy that your own men needle you about your dress sense might be embarrassing to a badass viking, but the narration notes that Olof Styrsson actually likes his nickname "Summerbird".
* "The Longshoreman of the Apocalypse II", though he's on camera that time and, admittedly, what he says next is about the cameraman.
* The Long Stand. If done as a prank, then the Sergeant will generally let them know on time. If done as punishment, the Sergeant will let the recruit sit there until he figures it out.
* The long-standing animosity between the similarly named companies — Apple Corps sued Apple, Inc. several times between 1978 and 2006 over trademark issues — was most likely a contributing factor in the delay. The two sides reached a final settlement in 2007.
* The long-standing rivalry between the haughty, arrogant but unfailingly cautious Romulans and the
* The long tenured Dominican Republic wrestler El Bronco #1 of San Cristobal may have started before his teenage years, as he wore a mask to hide his identity after his father protested to "a young child" being in the wrestling business. Young Bronco would go on to lead
* The long, thin energy weapons with the ridged undersides on their grips, that taper to a point instead of having a barrel and look vaguely like emaciated vacuum cleaners, initially appeared in an early episode where SG-1 encounter a planet where two religious factions are at war over beliefs concerning their planet's Stargate. Since then, these weapons have become "that one prop", appearing in different, totally unrelated episodes over, and over, and over... until finally from mid-season 3 onwards they completely replaced the Wraith stunner rifles in
* The Long Tomorrow, private investigator Pete Club's cop friend and confidant is Lieutenant 3, who also happens to be a robot-like everyone else on the Force.
* The Long, Twilight Struggle - the first time one of these ships is seen damaged in battle.
* The long used fan term "Eeveelution" (for the many different evolved forms of Eevee) appears in the second
* The Long Utopia, human scientists use this when trying to communicate with the silver beetle creatures. They are summarily ignored, and Lobsang admits that he'd probably just laugh if he saw some strange creature counting out basic numbers with

rocks.
* The Long Utopia series, reveals that a group of natural steppers - people who can move between alternate Earths - set one of these up in the 1800s. Pooling their resources, they created a long-term trust that would offer their descendants incentives to meet, marry and have kids (without telling them exactly why).
* The long version: Ryuk wonders why Light was ignoring him. When Light in the convenience store explained to Ryuk that the former has a feeling that he's been watched via CCTV which means no Apples for Ryuk, it took a few seconds for the Shinigami to realize what Light meant and reacted in
* The Long Voyage Home. It turns out that Smitty used to be an officer in the Royal Navy before he was kicked out due to his drinking.
* The Long Walk. 100 teenage boys start walking nonstop until there is only one still alive. He's the winner at least until the physical and mental damage from the Walk kills him. Long Walk winners tend not to have much in the way of life expectancy.
* The Long Walk known as the "Long Walk" every year. One hundred teenage boys are selected to walk from a starting point on the Maine-Canada border and down the Atlantic coast until only one boy remains. They're accompanied by soldiers in half-tracks who monitor the walkers' speed, and will shoot to kill after issuing a walker three warnings for falling below the mandatory minimum speed.
* The Long Walk, McVries seems to care about Garraty in a way that extends beyond friendship. He's also mentioned to have had a girlfriend.
* The Long Walk, only one out of the original one hundred contestants in the titular endurance competition survives. The others were all killed when they couldn't keep up the pace.
* The Long Walk. The ending is a bit confusing. Why does Stebbins suddenly drop dead? Who is the shadowy figure beckoning to Garraty? Fan theories abound.
* The Long Walk, where 100 teenage boys are forced on a grueling marathon and killed one by one.
* The Long Walk, with paste concentrates issued to the Walkers. Apparently, in this reality, they're given to astronauts as well.
* The Long War gets a more primitive crossbow secured by an iron pin attached to him pointing at his heart. If he tries to escape by dimension hopping, the pin will stay behind.
* The Long Watch, he rigs up a deadman switch. He hasn't the guts to kill himself and set them off and foil the coup that way, but if it only works if he's dead...
* The Long Watch. The man does think of his family, and as he doesn't want his little girl to grow up in a military dictatorship, proceeds to disarm the nukes to foil the coup.
* The Long Way to A Small, Angry Planet: After the ship is nearly destroyed Lovelace the A.I. suffers severe damage. The only way to save her is to perform a hard reset, which has a 50% chance of wiping her memories and personality and reverting her to her "out-of-the-box" state. Unfortunately it does so, and she decides to move her consciousness to an android body and leave the ship rather than remain with the crew who are all mourning her virtual death.
* The Long Way to A Small, Angry Planet, Ashby rubs his hands over his eyes. The pirates take this gesture to mean "I'd rather rub shit in my eyes than keep talking to you".
* The Long Way to A Small, Angry Planet, the aeluon have four sexes: male, female, shon (who switch between male and female) and those who are neither.
* The Long Winter series), Pa is hanging out at the general store when an old Native American chief comes into the store, accompanied by a younger Native American man who serves as a translator. This is highly unusual, because usually the Native Americans in the area stay away from the white people. The old chief tells the men in the store that the lore of their tribe states that there will be a severe winter every seven years, and that every seven times seven years (49 years), there will be an unbelievably severe winter. And that the current year is a seven times seven year. This turns out to come true, as the entire book is about an extremely severe winter that almost results in the Ingalls family starving to

death.
* Thelonious Monk. One commentator said that Monk's compositions were like buildings which had been constructed, then decorated, and then everything had been taken away except the decoration, which was somehow still strong enough to keep the building up.
* "The Loobenfeld Decay": Penny is an aspiring actress. She's replacing a girl in a workshop production of
* The Look Alike Series, this gets amplified when it is revealed that AP ate one with blue (as in ergot-laden) garlic and spent the next little while thinking he was a lemming.
* The Looking Glass' song "Brandy" has dramatic irony in the first chorus, where the title character of the song, a young waitress working at a port-side bar, is told by the sailors she's taking drink orders from that "your eyes could steal a sailor from the sea". The rest of the song is all about a sailor she fell in love with, and her failure to get him to stay with her over returning to sea.
* The Looking-Glass Wars (actually spelled "Alyss") is a lost princess of the real Wonderland. When she ended up in our world, she told Charles Dodgson her plight in the hopes that he'd write a tell-all book, and he proceeded to get everything she'd told him wrong.
* The Looking-Glass Wars has a few of these running parallel to each other across one side of his face from getting bitch-slapped by The Cat as a child.
* The Looking-Glass Wars, it's very flexible, so there's no need to cast specific spells.
* The Looking-Glass Wars psychologically torments new queens to test their courage and determination.
* The Looking-Glass Wars series, the main antagonist is a woman named Redd, who believes that she was robbed of her right to the throne even though it was for the perfectly logical reason of her reckless, uncaring attitude. When she finally takes over, Wonderland becomes a place where people are encouraged to spy on their neighbours, among other more evil actions.
* The Looking-Glass Wars), the Pool of Tears is a portal to our world and certain puddles are used to return to Wonderland.
* The Looking-Glass Wars use a piece of cloth to disguise herself, the man in the ticket booth fails to realize who she is even after she balks at having to pay "to get into [her] own home", and amusingly thinks she's pretending to be herself ("You do play the part, don't you?").
* The Looking-Glass Wars which not only draws a lot from the books themselves, but also from the real people behind them (Alice Liddell is "revealed" to have actually been Princess Alyss of Wonderland, exiled to the real world after her aunt Redd staged a coup and slaughtered her family.)
* The Looking-Glass Wars: WILMA (Weapon of Inconceivable Loss and Massive Annihilation) is a weapon that destroys people's imaginations. Aunt Redd is trying to contain and stop it from coming to Earth.
* The look of disgust and horror on Norbit's face when he sees Rasputia wearing a lingerie on their honeymoon night...
* The look of the Daleks' flying saucers, which first appeared on the DVD release of "
* The look on Garfield's face, even without a single word, says everything.
* The Lookout plays this for drama, with a main character who suffered brain damage and must now write reminders to himself to do basic things throughout the day.
* The Lookout: The entire plot revolves around a bank robbery where the would-be robbers have to convince Chris, a young brain-damaged guy who works there as the janitor, to cooperate with them. They do this through a combination of the promise of financial reward, painting it as something daring to do to get out of his currently crappy life, and some feigned romantic interest from their pretty female accomplice.
* The Lookout, who has a bad short-term memory due to a serious head injury and needs to write everything down just to get through the day.
* . The looks he gets from everyone around him makes it clear that this is not the

time for jokes.
* The "Look What They've Done to My Song, Ma" example from Oatmeal Raisin Crisp is used, because "they wanted you to look at what they'd done to their oatmeal". The lyrics of the song were so close to matching up perfectly to the ad's message, they just needed a tiny adjustment. So they changed the chorus from "look what they've done to my song, ma" to "look what they've done to my oatmeal." The problem is, said lyrics, according to Cracked, are written in such a way that they give "the impression that some shadowy government agency has taken General Mills oatmeal, put raisins in it against its will, and now they're trying to stir up public outrage." There is also, of course, the obvious irony inherent in a group of advertisers fucking up a song bemoaning advertisers constantly fucking up their songs.
* The loomeys combine this with ladder stacking when they are climbing up the side of Big Ben so Jack can reach the clock face in
* "The looming blaze cometh, burning down the forests. The flood of fire that man cannot withstand is halted by the world tree and vanishes."
* The Looming Tower: Vince is having energetic sex with a woman when he's called in for his work and has to leave, which displeases her greatly.
* The Looney Looney Looney Bugs Bunny (1981). Sylvester the Cat hides Tweety under an empty can. When the mobster Rocky finds Tweety under the can, he lights a firecracker with his cigarette and places under the can for Sylvester to find ("Catty Cornered").
* The Looney Tunes Show, all Bugs wants is to turn himself in. And once they have served their sentence, Bugs has to be dragged out kicking and screaming.
* The Looney Tunes Show) and leaves to a monastery to find inner peace. But before she leaves, she catches a cockroach trying to enter her apartment, so she leaves a note for all bugs to go away. Naturally, Bugs sees a note reading "Dear Bugs: I don't want to ever see you again" and assumes the worst.
* The Looney Tunes Show!" and proceeds to give Cecil a taste of his own medicine, resulting in Bugs getting his cable back and then some, with Cecil still being fired.
* The Looney Tunes Show and says that they aren't the ones she's referring to. Upon reaching a picture of "Magic" Johnson, she says "There he is!"
* The Looney Tunes Show appear many beautiful women both in the plot and in the musical number. The best examples are the female backup dancers in the Merrie Melody "Blow My Stack", Starlett Johansson in "Casa de Calma", Foghorn Leghorn's assistant, and the contestants of a beauty pageant in "Year of the Duck".
* The Looney Tunes Show", Bugs and Daffy are placed in prison for both not paying a littering fine and contempt of court. Before being taken to prison, Daffy's photographs showing his sheer horror while Bugs poses for the camera in an amusing fashion, the last one with his arms around the security officers.
* The Looney Tunes Show, Bugs calls Daffy this. He does display many of the traits that mark narcissism in reality.
* The Looney Tunes Show: Bugs does this in "Semper Lie", calling up Speedy and pretending to be speaking to his (non-existent) sister Viola. Speedy works out what is going on and plays along.
* The Looney Tunes Show Bugs gets a job at Porky's office and convinces him to have more fun at work. During a montage of various fun activities they spin around ad roll on swivel chairs.
* The Looney Tunes Show, but it ends about as well as you'd expect because she believes that all the award means is that Bugs forwent the use of a bell.
* The Looney Tunes Show, but it was really because the producers meant from the beginning to make 52 episodes of each series.
* The Looney Tunes Show) but most of the dialogue (and premise) can be seen as Bugs and Daffy being married.
* The Looney Tunes Show, Cecil Turtle, who works at the cable company, tampers with Bugs Bunny's cable plan, so he's only able to get a Spanish speaking network. Speedy Gonzales initially scoffs at how ridiculous the telenovelas are, but he ends up getting caught up in it. It helps that he can actually speak Spanish so he understands what's going on.

* The Looney Tunes Show: Daffy does this in "Bobcats on Three!" after Bugs becomes morbidly obese. His first guess is that Bugs is doing something different with his hair, followed by asking if he has new gloves.
* The Looney Tunes Show: Daffy does this while storming an Albanian prison to rescue Bugs in "Semper Lie".
* The Looney Tunes Show, Daffy Duck does this when Bugs Bunny says that he didn't make a parade float.
* The Looney Tunes Show, Daffy panics when he and Bugs get thrown in jail:
* The Looney Tunes Show: Daffy starts speaking like this in "Mr. Wiener" after he inhales a tank of helium to stretch his stomach to win a hot dog eating contest.
* The Looney Tunes Show episode "Eligible Bachelors", Colonel Frankenheimer attempts to steal the Eiffel Tower by hooking it to a zeppelin and flying it to Germany.
* The Looney Tunes Show episode "Jailbird and Jailbunny" had Bugs Bunny and Daffy Duck end up in prison.
* The Looney Tunes Show episode "Newsapaper Thief." His failure to plan ahead means that he has to constantly intervene to correct errors in his planning.
* The Looney Tunes Show episode, "Sunday Night Slice", Bugs buys out Gerardi's, his favorite pizza restaurant, when it closes down, and hires Daffy, Porky, Marvin the Martian, and Pete Puma to run it. Thanks to their inexperience, their attempts to run Gerardi's are a disaster. At one point, this exchange occurs:
* The Looney Tunes Show episode, "The DMV", Daffy unsuccessfully tries to get Bugs to wear a diaper when they go to the movie theater because babies get into the theater for free. In the epilogue, Daffy dresses himself as a baby in an unsuccessful attempt to see a free movie.
* The Looney Tunes Show episode "The Grand Old Duck of York" has Daffy attempt to learn piano, but his playing is abysmal and Bugs has to buy noise-cancelling earplugs as a result.
* The Looney Tunes Show episode "The Shelf". Subverted when this genius bunny succeeds in demolishing his entire house while building a shelf to display his award.
* The Looney Tunes Show for a few episodes before Bugs admits she's his girlfriend, making Lola a psycho girlfriend.
* The Looney Tunes Show, Granny, a stranger who pardoned him in the restroom of Pizzarriba, Carl (a stranger he met in a Phoenix airport), a tie between Pete Puma and Marvin the Martian, Speedy Gonzales, Big Fat Rooster (Foghorn Leghorn), Tina, and Bugs.
* The Looney Tunes Show has Bugs and Daffy at a spa, getting massages. Daffy sees that he's scheduled to get a massage from "Joe", while Bugs is going to get one from "Leslie". Daffy swaps the signs, so of course Joe turns out to be a beautiful woman named Josephine, while Leslie is a big, hairy man who twists Daffy into a pretzel.
* The Looney Tunes Show has Bugs telling Daffy a story which is basically Superman's mythos with Bugs as Sups, Marvin the Martian as Brainiac, Elmer as Luthor and Daffy as Zod.
* The Looney Tunes Show has Daffy flip over a table during a game of chess with Bugs and claim that there was an earthquake.
* The Looney Tunes Show has Foghorn Leghorn creating a movie about himself. Several Roosters show up, but Daffy, a duck (who thought the line was to watch a movie), was cast because he could speak his mind, something Foghorn thought the movie needed.
* The Looney Tunes Show has Speedy becoming hooked on a Spanish soap opera.
* The Looney Tunes Show has Wile E. being sliced to ribbons by the Roadrunner's talons in a ninja-style battle.
* The Looney Tunes Show however for its sharp humor and characterization (especially of the formerly divisive Lola Bunny).
* The Looney Tunes Show how Porky's idea of fun is acting out the expression of watching paint dry.
* The Looney Tunes Show: In "A Christmas Carol", Daffy gets his butt frozen to a

park bench during the song "Christmas Rules".
* The Looney Tunes Show: In "Beauty School", Lola sees a woman (actually Bugs in drag) leaving Bugs' house and getting into Bugs' car and immediately assumes that Bugs is cheating on her.
* The Looney Tunes Show: In "Bobcats on Three", Bugs puts on a lot of weight after he gets addicted to Porky's grandmother's family recipes. Porky eventually cuts him off, saying "No one should eat that much butter!", and an incident at the public pool convinces Bugs to shed the excess pounds.
* The Looney Tunes Show: In "Bobcats on Three!", Daffy's recruited to coach the school water polo team, the Bobcats. (Which makes very little sense as the name of a water polo team.)
* The Looney Tunes Show: In "Bugs & Daffy Get a Job", Dr. Weisberg tells Daffy that he has a deviated septum. Daffy's reaction is to snap "I do not!" and slap Weisberg, before asking "What's a septum?".
* The Looney Tunes Show: In "Gossamer is Awesomer", Daffy drives through a papier-mâché statue of Gossamer in his parade float, then immediately announces "Winnie Yang did that!".
* The Looney Tunes Show: In "Members Only", Bugs is planning to break up with Lola. As he approaches the table, he trips and drops a mint under a chair. As he kneels down to pick it up, Lola assumes he is proposing and immediately accepts.
* The Looney Tunes Show: In "Off Duty Cop", Daffy is unable to understand that his favourite character Steve St. James is actually an actor named Leslie Hunt, so he decides to become Steve St. James himself.
* The Looney Tunes Show: In "Peel of Fortune", Bugs has to take a job at an ice cream parlor where the uniform includes an ice cream cone hat.
* The Looney Tunes Show: In "Peel of Fortune", Daffy tries to come up with an invention that will make him rich. His first three inventions are sliced bread, toilet paper and the suitcase.
* The Looney Tunes Show: In "Spread Those Wings and Fly," Bugs Bunny accuses Yosemite Sam of stealing his TV and calls the cops, which Sam denies. Once Bugs sees Daffy Duck stealing stuff while sleepwalking, and discovers all the other things Daffy stole, Bugs realizes that Sam innocent. Bugs apologizes to Sam by giving Sam his replacement Nobel Prize.
* The Looney Tunes Show in that Bugs is fully aware that the lie is snowballing and makes no attempt to stop it.
* The Looney Tunes Show: In "That's My Baby'', Bugs calls Daffy 'a bummer' after he refuses to go to lunch with him and Porky. Daffy's response is "No. Porky's the bummer. I'm a jerk."
* The Looney Tunes Show In the episode "Jailbird and Jailbunny", Bugs and Daffy have served their one-year sentence and are let out. Bugs doesn't want to leave, while Daffy is bidding his prison friends farewell.
* The Looney Tunes Show: In the episode, "That's My Baby," Daffy derails into mentioning frozen yogurt, leaving Tina behind, into the sunset.
* The Looney Tunes Show: In "You've Got Hate Mail", Tina teaches Daffy to type up e-mails and not send them as a stress exercise. Unfortunately, Daffy accidentally sends insulting e-mails to practically everyone he knows.
* The Looney Tunes Show is giving a speech on best friends, and the Goofy Gophers Mac and Tosh join in:
* The Looney Tunes Show is reading a mystery novel. And by the time he finishes it, this is how he said it went:
* The Looney Tunes Show: Lola does this to Bugs when she is tailing Daffy in "Double Date".
* The Looney Tunes Show makes a dramatic statement regarding Tosh's fate to Mac, accompanied by a dramatic organ sting. Daffy and Mac look round to see Lola playing the organ in the corner of the antiques store.
* The Looney Tunes Show marathon on January 1, 2010. The show would premiere in May 2011.
* The Looney Tunes Show), Marvin the Martian, and Pete Puma. Bugs joins despite Daffy's dismay as well.

* The Looney Tunes Show", Porky orders two of everything at Speedy's restaurant, causing Speedy to ask him if he's finally got a girl. Porky replies "No".
* The Looney Tunes Show proved to be a success, and portrayed Speedy Gonzales in a positive light as the owner of a local pizzeria and an all-around entrepreneur who has business savvy, but wasn't overly focused on making money. The Looney Tunes still airs each day, but Speedy Gonzales cartoons are still decidedly absent.
* The Looney Tunes Show refusing to pay the hardware store $20 to install a shelf, insisting he can do it himself. By the end of the episode, he has demolished his house.
* The Looney Tunes Show's birthdays are stated as being July 27th and April 17th, the dates that their first theatrical shorts were first released.
* The Looney Tunes Show. She talks a mile-a-minute, and Bugs is easily annoyed by this.
* The Looney Tunes Show that Joe is short for Josephine, a pleasant female masseuse, while Leslie is a hulking muscular man who puts Daffy's back through the wringer.
* The Looney Tunes Show: The episode "The Shelf" centers around Bugs Bunny getting a Nobel Prize and needing a place to display it. He goes out and buys a shelf, refusing the offer to have it installed professionally because "I won a Nobel Prize, I think I can put up a shelf." This leads to a series of progressively disastrous hijinks as Bugs's house is systematically destroyed even as the rabbit continually rebukes any advice on the merits of his award.
* The Looney Tunes Show. The part about his girlfriend Tina takes an oddly heartwarming twist when he accuses her of being crazy... because "Why else would the kindest, most beautiful, generous, and intelligent woman in the world go out with someone like me?"
* The Looney Tunes Show, though the show would come to commit to the former with its second season.
* The Looney Tunes Show: Though the thick lines were dropped starting from season 2.
* The Looney Tunes Show thought Tweety was a girl until Tweety himself told him.
* The Looney Tunes Show, Tina states she knows full well that Daffy's a horrible person, but thinks if the right person worked on him he could become something nice.
* The Looney Tunes Show to go to the low earth orbit high dive, knowing that at poolside waits Bugs whom Daffy had insulted and offended only moments earlier.
* The Looney Tunes Show" to spend time with his girlfriend. Eventually, Frank realizes Tina can take care of herself and now wants her to be with someone who can actually spend time with her. Eventually, Daffy comes clean and manages to get Frank to like him, somewhat.
* The Looney Tunes Show": When Bugs asks Lola how she broke her leg, she goes into a long story about trying to save a baby, while going through several dangerous events, where she could've broken her leg, but didn't. In fact, that wasn't even how she broke her leg. She just fractured it, trying to get up on the doctor's table.
* The Looney Tunes Show when Daffy is pretending to be a cop and chasing Bugs through an office building. After following Bugs into the copy room and walking through quietly, a cat randomly jumps down and yowls, distracting Daffy just before Bugs appears behind him.
* The Looney Tunes Show: When Daffy is training on a flight simulator in "Spread Those Wings and Fly", his instructor tells him to bear west by five degrees. When Daffy asks which way is west, the instructor says "your left", followed immediately by a panicked "Your other left!". Needless to say, Daffy crashes.
* The Looney Tunes Show when Daffy presents his own defense in court. Since his 'points' are terrible and the courtroom is almost empty, he has to provide his own dramatic 'Gasp!' twice.
* The Looney Tunes Show: When Lola starts acting like a jewel thief in "The Black Widow", she leaves a calling card with a black widow on it (borrowed from her favourite movie).

* The Looney Tunes Show, where Porky Pig kept falling for upsells despite Bugs' encouragement. Eventually, he does gain the ability to say no... to car insurance after buying a new car.
* The Looney Tunes Show, which in the first episode of season 2 had Daffy deliver the vitally important lesson "It doesn't matter whether you win or lose, because nobody cares about water polo."
* The Looney Tunes Show with her. Daffy then has the same reaction to the gift table since they're at a wedding.
* The Looney Tunes Show woman, though Daffy and Speedy have found him attractive.
* The Looney Tunes Show: Yosemite Sam's moustache in the Merrie Melodies song "Moostache" in "Itsy Bitsy Gopher".
* The Loop Trilogy film, the first book has a few major differences, while Spiral and Loop continue to expand the story.
* "The Loose Cannon" Brian Pillman's son Dominick. The difference is that Eddie wasn't portrayed as a physically-deteriorated maniac.
* The Loose Cannons have Sparky, a very intelligent dog they rescued from UNITY.
* "The Loose Screw" implies that this kind of relationship is ongoing between aging villain Mandrake the Malfeasant and his likewise-aging superhero nemesis Stella Starbella. Though he complains that he "could never conquer [her] heart," they're definitely
* The Lopez love song, which The Blues perform and broadcast to force the Reds to shut of their Radios. According to Sarge, "It sounds like the feral cry of a retarded Mexican sasquatch!"
* The Lopsided Arm of the Law alongside other anti-Creationist nerds) but does nothing to stop Snake going on a shooting spree from the top of a building just across the street (Wiggum says that it's because the police doesn't has the budget for it, and even tries to ignore it).
* The Lorax adaptation, the old crows perched on the sign outside the Once-ler's house are harmless, but add to the dark, dreary atmosphere of the place.
* The Lorax adds a few gratuitous action scenes that weren't present in either the book or the TV special, like the Lorax and the woodland creatures having to rescue Onceler from his bed falling off a waterfall, or Ted having to fight against O'Hare chasing him during the climax.
* The Lorax, a forest ecosystem is destroyed and the animals in it displaced, but it's very unlikely that all of them survived, and indeed, we never find out what happened to them. The story is recounted many years later and they are unlikely to have lived that long anyway. A cut song, "Biggering" included the lyric "Who cares if some things are dying?!" and may have been cut to avoid directly addressing this trope.
* The Lorax, after the Once-Ler cuts down the first tree, two Humming Fish go near it, and one knocks on the stump with its fin to indicate nothing has really changed, only for the sky to suddenly turn black and begin to rumble (indicating the summoning of the Lorax). The other fish then slaps the first one in the back of the head for apparently causing the current thing.
* The Lorax as The Onceler's mother calls him "Oncie", but she's obviously doing it because it makes him more biddable.
* The Lorax but in the movie, he looks like a young, handsome man. His non-flashback design is truer to the source.
* The Lorax describes the trouble you'll have hearing the Once-ler's story, including "his teeth sounding gray."
* The Lorax destructive, business turning the foliage of the Truffula Trees into Thneeds. When the last Truffula Tree is felled, however, the Thneed factories shut down and the Once-ler's relatives leave for new ventures. By the time the story begins, all that remains of the forest is a field of tree stumps, the ruins of the Thneed factories, and the Once-ler himself.
* The Lorax ends with a single sprout in an otherwise industrialized, treeless wasteland.
* The Lorax ends with the dark and desolate remains of Truffula Tree forest valley regaining light when the last seed was planted and grown.

* The Lorax (especially the 2012 film, where Truffula trees are actually shown to grow extremely quickly), the Lorax never tries to suggest the idea of sustainable logging practices to the Once-Ler, or even point out that no more trees means no more Thneeds means no more profit. With that in mind, one could interpret them as having a secondary moral of "If you want to make a difference, offer solutions instead of just complaining". Especially considering that all versions have the Once-Ler give his visitor the last remaining Truffula seed and instruct him to replant the forest.
* The Lorax even concedes). This one shows he came from a rather abusive family who always put him down for not accomplishing anything meaningful, and he actually tries doing things the right way until they pressure him into taking shortcuts. The results are still the same, but he's not entirely at fault this time.
* The Lorax. Everything looks great, but all of it is manufactured, fresh air has to be bought, and right outside the wall is a dystopian wasteland.
* The Lorax features a cat version: a robot cat with a spy camera in it meows in a robotic way.
* The Lorax has a minion begin to cut a Truffula tree with a chainsaw, but Lou (the large Bar-ba-loot) falls on top of him while eating fruit.
* The Lorax has a pretty standard one—our heroes are speeding through a city center on a motorcycle, end up driving onto an elevator, and we see a few moments of the cramped, awkward silence you get when a motorcycle is shoved in.
* The Lorax has a spring-loaded boot contraption set at rear-end level in front of his house to kick away unwanted visitors.
* The Lorax, "How Bad Can I Be", the Once-ler has one after shouting the last lyrics, "HOW BAD CAN THIS POSSIBLY BE?!"
* The Lorax incarnations of the Once-ler who were also often shipped together.
* The Lorax: In the film, the main villain is charging people for clean air mainly because of their overly polluted air and smog. Later on, an "oxygen bar" in Delhi gave Indians a gulp of fresh air, and even later than that, China began selling bottled air as well. Low air quality has given a business opportunity to entrepreneurs offering pollution-free oxygen at a price.
* The Lorax is a lesser version — it hasn't been closed-off for hundreds of years, but it's been at least a generation, possibly longer, since anyone traveled beyond the walls. Also, the residents are aware that there's a world outside their town, but they don't know or care about what it's like, since they're perfectly happy where they are.
* The Lorax" is far better than "How Bad Can I Be?", due to the song being darker and less goofy, on top of showing that greed and pride were the real reasons why The Onceler went as far as he did, which is more in line with the original book.
* The Lorax joins the animals in their exile from the forest and refuses to come back to the Once-ler because of what he did. Even a little Bar-ba-loot named Pipsqueak he befriended sadly refuses to return to him.
* The Lorax—and this really didn't take much work, as usually the only things those characters had in common with the original was being a skinny pale guy with a mildly dorky personality.
* The Lorax provides a comical example during his portion of "Let it Grow".
* The Lorax, some bar-ba-loots and the Lorax himself are seen looking groggy after eating nine servings of pancakes.
* The Lorax starts and ends at the place where the Onceler's Thneed factory once stood, with the Onceler telling the young boy listening how it all happened.
* The Lorax, the Once-ler describes knitting his first Thneed "with great skillful skill and with great speedy speed."
* The Lorax, the Once-ler starts out in a simple Depression-era cheap suit while he's simply trying to improve the world. When he finally opens his own business, though, he switches to a flamboyant dollar-bill-green outfit that's a cross between a pimp and a steampunk factory owner.
* The Lorax, there's a special feature in which the viewer can watch the characters playing with objects from the Once-ler's cart. If you select the cart to get more items, the Lorax kicks it and then hops off the screen clutching his foot.

* The Lorax. The title character is about to open a can of fury on a relative of The Once-ler's, who objects saying:
* The Lorax, the title character is in the Once-ler's room to deliver a dramatic warning. He does this and attempts to open the door and walk out...only to be unable to reach the door handle because he's too short. The Once-ler helps him, and the Lorax tries warning him again.
* The Lorax Truffula trees in other words, would have prevented everything, including his company closing up and moving elsewhere. The first animated version addresses this by having the Lorax explain that the trees are extremely slow growing; even if they had embraced the practice the forest would be clear cut before the replacements were more than sprouts (a real-world limitation of the practice for many kinds of tree).
* The Lorax voiced the titular character not only in English, but also in Italian, Spanish (both Latin and European), German, and Russian.
* The Lorax was based on the views of Seuss. While on vacation in Africa, Seuss was charmed by some strange trees that he, being Dr Seuss, decided to call "Truffula trees". He was later shocked to see them being cut down and ran back to his hotel to start sketching out ideas on a notepad, leading to the book's creation.
* The Lorax, when Ted, who is preoccupied with trying to find a tree, plays Scrabble with his mother and grandmother, and spells, "tree".
* The Lorax: When villain O'Hare, flying with one of his goons thanks to rocket headgear, slams into a delivery truck driven by another of his goons, he gets squished on the windshield and, as he's sliding down, yells "You're fired!"
* The Lorax- why would the Lorax be eating at a chain restaurant in an industrialized neighborhood?
* The Lord Inquisitor. She needs medical treatment and rest, but he's not leaving her while she gets both.
* The Lord o' Bones (or Rattleshirt, depending on how much respect you hold for him) wears a suit made of bones from animals, men, and even a giant's skull. Might be a subversion; while notable enough to be known to the Night's Watch, and claiming his intent to wear his foes' bones, the only time we see him claim any were from an enemy he didn't kill, and he's overall more of a cowardly
* The Lord of Chaos Taim for the Shadow, they're not and never were the same person.
* The Lord of Light, a fire deity whose followers insistently describe him as the "one true God" in opposition to an evil counterpart god, bears a strong resemblance to
* The Lord of Lorn and the False Steward, after the steward had stolen the young lord's identity, he does this.
* The Lord of Lorn and the False Steward, the steward skips the "looks like" part by the simple expedient of trying it in a foreign country where he's unknown.
* The Lord of Lorn and the False Steward, the young lord and the duke's daughter.
* The Lord of Lorn and the False Steward", when news of what happened to the young lord arrived back at home, his father collected hundreds of men to arrive in force and rescue him — without, mind you, fighting.
* The Lord of Opium. He has many cybernetic implants, however, possibly increasing his strength.
* The Lord of Opium: Holoscreens are apparently these, which allow users on either side to transmit objects. Doing so is not recommended for whatever reason, and since the space between either end is freezing cold, living things will be killed if they try to go through.
* The Lord of Opium: In the future, nations between Mexico and the US export drugs to other countries in exchange for patrolling the border between the two nations. One of the nations of the Dope Confederacy exports marijuana in the 22nd century. Seeing that the book came out in 2013, it's odd that a nation would need to make marijuana to export illegally, seeing that many nations at the time of the time of publication and at the time this entry is being written (April 2015) are relaxing marijuana laws or even outright legalizing it. Could be justified that it sells to a few holdout nations, or progress was reversed.

* The Lord of Opium outright states that the rest of the planet is garbage, except the titular nation.
* the Lord of Pain empire and plans to enslave the rest of the Flanaess beneath his taloned heel;
* "The Lord of Snakes consumes all left behind. Born in chaos and fire, sleep in mother's arms, life disappears from the land, all comes to an end."
* The Lord Of The Ice Garden, Vuko slashes his long, monomolecular blade at a dog inside a building. The dog is defeated, and so is a heavy wooden beam in the doorway.
* The Lord of the Isles, it seems like you can't turn around without without running into a sunken city or island. They don't always stay sunken, either, what with all the wizards running around.
* The Lord of the Isles. The powers are building to a thousand-year peak. Ordinary wizards find themselves with out of control powers that brought down the kingdom during the last peak. In its current shattered state another such error will destroy civilization.
* "The Lord of the Netherworld emerges in a triumphant march of death. One that threatens the darkness is the shadow of the lost master."
* The Lord of the Rings About three thousand years in the story past, Isildur defeated Sauron in battle, but did not destroy Sauron's ring (the One Ring To Rule Them All) when he had the chance. Then the ring was lost. And later, much later, it was found, and started trying to make its way back to Sauron...
* The Lord of the Rings above Sauron himself (Melkor/Morgoth), and none to Eru.
* The Lord of the Rings (accidentally?) turned Tolkien's elves into the Fair Folk without actually changing anything in the story. Lacking a real translation for "elf", the older Hebrew versions called them "Shedim" (demons), "Shedonim" (imps or goblins) and perhaps most interestingly, "Bene Lilith" (Children of Lilith/Children of The Night Lady). Nothing about their actions or descriptions was really changed, but somehow simply being called "demons" turned all of their beauty, grace, and (supposed?) niceness sinister and creepy.
* The Lord of the Rings act directly if pushed far enough (see "The Downfall of Númenor"). Gandalf also implies that He is subtly influencing world events all the time.
* The Lord of the Rings, adding new characters or adding detail to minor characters to the point of becoming new characters.
* The Lord of the Rings, after Pippin knocks a stone down the well in the Mines of Moria, the Fellowship hears drum-beats echoing up out of the well. It's not explicitly stated, but this is the sound of the orcs that now infest the mines gathering to attack the Fellowship. Along similar lines, the final entry in the Book of Mazarbul mentions hearing "drums in the deep"; the orcs coming to finish off the last holdouts of Balin's colony.
* The Lord of the Rings after the wave of anger on the internet caused by this incident, and yet the casting practice stuck regardless. In fairness, Tolkien did model the Middle Earth setting specifically on medieval Europe as it was perceived at the time (ie. all-white), but it still sucks for actors of colour who don't want to be orcs.
* The Lord of the Rings against the Sackville-Bagginses, who are present.
* The Lord of the Rings alludes to Bilbo's adventures, as well as adventures made by unseen heroes. See the Literature section for more info.
* The Lord of the Rings, all with varying ages. Gandalf and Legolas were definitely the oldest of the group, with Pippin being the youngest and Aragorn's age is stated to be 87.
* The Lord of the Rings Also, Denethor's last act before lying down on his burning pyre is to break his own scepter of office over his knee.
* The Lord of the Rings: Ancient Elven and Númenórean weapons are better than modern day Gondorian and Elven ones. The Silmarils were made by one of the most ancient elves, Fëanor, and nothing created since rivals their beauty. Likewise, the modern-day dwarves of the Lonely Mountain haven't managed to match the weapons and armour that were made by their ancestors, whose techniques were

lost when Smaug killed them (they do mention having made advances in mining techniques in that time though).
* The Lord of the Rings, and after which all the real hard work and war kicks in. It's the one time between the discovery of his lineage and destruction of Sauron that Aragorn allows himself some respite, and the summer is remembered very fondly afterwards.
* The Lord of the Rings and a good gal—but she refuses to go by that title, or even be acknowledged as the ruler of Lórien. The reason she refuses royal titles is that she and her husband feel that Lórien is merely a place they are guarding, not ruling. The only moment when she does call herself a Queen is the moment of her temptation by the Ring. She resists it when she realizes she'll become one of these.
* The Lord of the Rings and attempted to kill him first. After the crowning of King Elessar, Beregond is brought before the new King. King Elessar spares him from execution because of the circumstances but discharges Beregond from the Guard and orders him out of Minas Tirith... so that he may be reassigned to Faramir's newly-formed personal Guard in Ithilien as its captain.
* The Lord of the Rings, and because of Tokien's scholarly reputation, some readers are left confused as to which is the true original version.
* The Lord of the Rings and needed to find a project that allowed him to get his money's worth out of the machines.
* The Lord of the Rings, and now nothing is left but ruins, Orcs, and Durin's Bane.
* The Lord of the Rings and other Brits would probably say “half-arsed” instead.
* The Lord of the Rings and others of Tolkien's writings, Galadriel — the Lady of the Golden Wood — has a bad reputation with the Riders of Rohan, as well as Gondorians. So does Fangorn Forest.
* The Lord of the Rings and popular Medieval Christianized astrology (where it represented perfection, a "trinity of trinities") - both of which influenced Tolkien immensely.
* The Lord of the Rings, and the allusion to Beren implies he's lucky it's a relatively easier prospect.
* The Lord of the Rings (and the film of the book). Gollum leads Sam and Frodo up this way because the main entrance to Mordor is too well guarded and fortified for them to be able to sneak in. Unfortunately, there's something horrible at the top.
* The Lord of the Rings and the rest survive any number of perils, although not always without injury.
* The Lord of the Rings and this page's image. It contains the bulk of Sauron's power and will corrupt whoever not named Sauron wears it. See Literature for more detail.
* The Lord of the Rings) and thus he had to make up Sauron's personality and guess his abilities, which may have explained why nobody else picked Sauron.
* The Lord of the Rings and towers and then being used to sow destruction among the Gondorian ranks.
* The Lord of the Rings and winds up on a direct hotline to Sauron himself:
* The Lord of the Rings an old man without a lot of years left in him. He's also very amiable, and strikes up a fast friendship with Merry, despite Théoden being a monarch and Merry being a foreigner of no rank.
* The Lord of the Rings Appendixes has been described to look solemn and grave but when he smiled, he appeared kingly.
* The Lord of the Rings appoints the Fellowship to carry out a simple mission, escort the Ringbearer (Frodo Baggins) to Mount Doom and drop the One Ring into the lava. But along the way, the fellowship faces setbacks, the temporary disappearance of their wizard mentor Gandalf, the loss of one of the fellowship in battle (Boromir) and the risk that the ring could corrupt other members of the Fellowship into compromising each other. As such to better carry out the mission in complex circumstances, the fellowship breaks up with Frodo and Sam going to Mount Doom alone, while Aragorn, Gimli and Legolas march to rally a movement of resistance to oppose Sauron and Saruman's forces to better distract their attention and draw

their gaze away from Frodo and Sam. What starts with a fellowship of nine ends up involving an intricate alliance of human kingdoms, undead armies and eagles, all to serve the same original mission which could never have succeeded had they operated in the way they originally set out to accomplish.
* The Lord of the Rings, Aragorn, Frodo, Sam, Merry, and Pippin stumble upon the very spot where that happened as they're rushing from Weathertop to Rivendell. The trolls under Sauron’s army, the Olog-Hai, were bred to remove this weakness so as to be even more efficient in combat.
* The Lord of the Rings, Aragorn notices that many of the young soldiers are nearly catatonic with fear. He takes pity on them and offers them an alternative, less dangerous mission that they can do while the main army attacks the gate.
* The Lord of the Rings, Aragorn quotes to Frodo a bit of poetry that Bilbo wrote about him. Note that Frodo knew the poem not from Bilbo, but because it was in a letter from Gandalf that he (Frodo) was reading right then. Aragorn did not know that the poem was in the letter, although he might have known or suspected that Gandalf would supply Frodo with that line, making it a reasonable thing to drop into the conversation.
* The Lord of the Rings: Aragorn's Quest has a player-activated glowing trail that leads the player to his next quest objective.
* The Lord of the Rings: Aragorn starts out as one of the Rangers, the ragged survivors of the fallen Kingdom of Arnor, who now live as solitary wanderers in the northern wilderness, hunting monsters and keeping the roads safe.
* The Lord of the Rings are a remnant of the men of Arnor (destroyed in the Third Age by the Witch-King), who themselves (along with the men of Gondor) are a remnant of the Men of Númenór (sunk by Eru in the Second Age), who themselves are a remnant of the Edain of Beleriand (sunk during the War of Wrath in the First Age). The Rangers have held on to their heritage through the years, passing down the stories and carrying out their role as protectors even when their lands had been ruined.
* The Lord of the Rings are crows allied with the forces of Evil, serving as spies for Sauron and Saruman.
* The Lord of the Rings are normal folks from a mundane town without the wild eccentricities and heroic virtues of characters like Aragorn or Gandalf, allowing ordinary people to see to Middle-Earth through their humble eyes.
* The Lord of the Rings are normally slow and tough, but when set aflame they become enraged, moving and attacking much more quickly, while taking damage over time from the fire. After a few moments of rampaging they'll try to find some water to douse the flames. Mûmakil also rampage when set alight, though there's no way to extinguish the fire and they'll eventually die.
* The Lord of the Rings are servants of Saruman, reporting on the position of the Fellowship for him.
* The Lord of the Rings are somewhere around 10% the size of the rest of the "trilogy" put together.
* The Lord of the Rings are very surprised when they are greeted not by an army but by two very relaxed hobbits.
* The Lord of the Rings arrives... literally. Offscreen, the dwarves of Erebor and the men of Laketown held the Lonely Mountain during a lengthy siege that tied up Sauron's northern armies for much of the war.
* The Lord of the Rings as any of the other members of the Fellowship of the Ring, and then is given a badass death to show just how much meaner than normal orcs the Uruk-hai happen to be.
* The Lord of the Rings, as when he tricks the notoriously misanthropic Beorn into playing host for thirteen dwarves and one hobbit.
* The Lord of the Rings; at the time of the War of the Ring magic has almost completely faded from the world. The current dark lord, for example, (though enormously powerful and terrifying) is only a pale imitation of the old one, who was an order of magnitude stronger than he is, and his Ringwraiths are only shadows of the terror of his master's Balrogs, which used to be a much more powerful force in the world than the one survivor squatting under the mountains seen in the books.

* The Lord of the Rings author J.R.R. Tolkien originally wrote Éowyn as the love-interest for Aragorn, before he revised the story to include Arwen; therefore after he did so, Éowyn becomes rather hastily paired with Faramir, and a chapter is dedicated to their growing relationship.
* The Lord of the Rings averted this in wide shots of epic battles, without demanding excessive labor from the CG crew, by using custom software. Weta Digital used a package called MASSIVE that not only automated the animation of thousands of combatants, it gave each one enough AI that they could fight each other or make other battle choices under their own power.
* The Lord of the Rings, because battles cause wounds, and authors like to write romances.
* The Lord of the Rings becomes legendary in the Shire, but only for the events observed there: disappearing, returning very rich but also crazy, and finally disappearing again for good at his own birthday party. His actual adventures in far-away lands are of no concern to most of the Hobbits. The elves of Rivendell and rangers of the North do treat him with great respect, though.
* The Lord of the Rings being released in 2012, 2013, and 2014, alongside the continued success of the LOTR MMORPG, this cash-cow will certainly be around for the next few years.
* The Lord of the Rings between 1937 and 1949. Didn't finish the appendices and final edits until 1955.
* The Lord of the Rings, Bilbo and Frodo were born on the same day, seventy eight years apart. This is part of the reason why Bilbo chose his eleventy-first birthday as the day to leave the Shire - it was also Frodo's thirty-third birthday, which meant that he was now old enough to inherit Bag End without the Sacksville-Bagginses being able to contest Bilbo's will on the grounds of Frodo's youth.
* The Lord of the Rings Bilbo is nearly 80 years older than Frodo, yet they have a very close relationship.
* The Lord of the Rings, Bill the pony is eaten by the Watcher in the Water. In the original novels, Bill is initially presumed dead, but later turns up alive and well.
* The Lord of the Rings (book, not movie) was adapted into a so-so RPG.
* The Lord of the Rings books. It is left somewhat ambiguous within the narrative whether Aragorn actually possesses special powers due to his distant elven ancestry or whether he's simply making use of herbal techniques the Gondorians have forgotten over the centuries.
* The Lord of the Rings. Both Erkenbrand's charge to break the siege on Helm's Deep and Théoden's attack at the Battle of Pelennor Fields happen at dawn.
* The Lord of the Rings. Both take place in a fantasy setting and both use folkloric and religious themes in their stories. The authors J.R.R. Tolkien and C.S. Lewis were colleagues and close friends who both shared and exchanged each other ideas, hence to why some themes were similar.
* The Lord of the Rings burned the ships that were supposed to come back for them.
* The Lord of the Rings, but since she's married that's as far as it goes.
* The Lord of the Rings. But, this was also a film that inevitably hired a fair number of people who would actually want to go on vacation to such a place. Not all of the actors though. Despite being exactly the kind of person who would vacation to this type of place, Viggo Mortenson has confirmed that he did NOT take the role for this reason. He had a much better reason: his son asked him to do it. Whether or not they took their roles for this reason, many of the cast members described the filming this way, despite the highly demanding roles and the occasionally primitive filming conditions.
* The Lord of the Rings by a high schooler. When a student arrives in Middle-earth, she no longer goes to school.
* The Lord of the Rings: By the time of the War of the Ring, most races are on their way out.
* The Lord of the Rings by the wizard and is promptly killed by the hobbits as he tries to get away for murdering several of their own.
* The Lord of the Rings by throwing one of his pyrotechnics on the stage. Bilbo is

annoyed, but Gandalf explains that he doesn't want rumors going out about vanishing hobbits. Doesn't happen in the film version, though.
* The Lord of the Rings) by Tolkien. See the explanation under Literature.
* The Lord of the Rings carrying the Ring" and so the contrast with the epic heroes he's traveling with is all the greater. This was a deliberate choice by Tolkien to demonstrate the humble virtues of the Hobbit; the vanilla character can save the world, too. His even more humble companion Sam is one of the very few canon characters to not give into the Ring's temptation, thus emphasizing this point even further, despite the fact that his simple wisdom and impulsive hot-bloodedness make him more dynamic by comparison.
* The Lord of the Rings celebrate September 22nd as the birthday of Bilbo and Frodo Baggins.
* The Lord of the Rings, comedian Martin Pearson observes that Frodo wanders through most of the three movies looking like a startled bush baby: a description that is hard to argue with.
* The Lord of the Rings co-producer Rick Porras offered his wedding band as a stand-in for the One Ring during an improv acting session. After some discussion the wedding band's shape was used as the template for the final prop ring.
* The Lord of the Rings could count as well. The skeleton of the story was ready already in 1936, but the book was published nearly twenty years later 1954-1955.
* The Lord of the Rings could produce enough milk, human breast-milk has very little nutritional value to a human older than, say, 8 years old (this being the absolute upper limit).
* The Lord of the Rings could successfully and seriously be adapted for the big screen, despite severe doubts.
* The Lord of the Rings. Cue head-scratching from North American viewers and groans from most others.
* The Lord of the Rings, delighting in catnage, has gotten around this principle as much as possible, and there are plenty of gruesome sights such as disembodied body parts and rotten-looking ghosts.
* The Lord of the Rings, Denethor releases Pippin, who refuses it and goes to get Gandalf to stop whatever madness Denethor is up to. This was explicit in the oath, the terms of which were "until my lord release me, or death take me, or the world end."
* The Lord of the Rings depicts the End of the Third Age and the passing of many things both evil and good, but it is also the beginning of the Fourth Age of Mankind — which need not be a Bad Thing.
* The Lord of the Rings die. However, the Ring's destruction resulted in him losing all of his power, so while he still exists, it's as a powerless little spirit, unable to affect anything of the world around him.
* The Lord of the Rings, discussing his conservative views and his annoyances with having to do motion capture.
* The Lord of the Rings does the same thing again, to the same actor even, when Saruman, who had been the antagonist for the better part of the previous two movies, is disposed of rather unceremoniously at the beginning of the third. On the other hand, the entire point of the scene in the book, which is likely what the movie was trying to recreate in a somewhat briefer fashion, is that Saruman has been completely defeated by this point, and has no real power left except trying (and failing) to sow dissent among his foes (it's a bit more complicated than that in the book, but we are talking about a movie that was already over three hours long). I suspect it was sort of trying to show just how far he's fallen by that point.
* The Lord of the Rings does this after the climax. Sam wakes up in Ithilien, thinking he's dreamt about the nightmarish journey to Mount Doom. Then he looks over at Frodo...and sees that Frodo's finger is missing.
* The Lord of the Rings DVDs were rated PG-13 for "violence and scary images."
* The Lord of the Rings, each fulfilling a different aspect of the Christ figure.
* The Lord of the Rings, Éowyn and Faramir first meet in the gardens of the Houses of Healing, where they recuperate after the Battle of the Pelennor Fields

and eventually fall in love with each other.
* The Lord of the Rings, Éowyn very much took on this role for Merry.
* The Lord of the Rings: Éowyn was ordered by Théoden and Aragon to stay behind in Edoras, she does not take it well.
* The Lord of the Rings Elf-descendant Aragorn chock full of Elvis gags and his usual atrocious puns.
* The Lord of the Rings: Elves, ents, dwarves, orcs etc are fading away as "The Third Age of the world is ended, and the new age is begun"
* The Lord of the Rings episode, all the boy's fathers are very knowledgeable when it comes to porn, much to their wives' disgust. Subverted somewhat by Mrs. Broflofski and Mrs. Cartman describing a sexual act from the titled movie with unusual accuracy.
* The Lord of the Rings, especially the city of Osgiliath, the set team would often reuse pieces left over from previously filmed scenes.
* The Lord of the Rings eventually. In the case of tobacco and potatoes in proto-Europe, the justification was that the Númenóreans, as great sailors, had sailed all over the world and brought back the plants from the proto-New World. We are left to assume that the European versions of the plants died out eventually.
* The Lord of the Rings ever conceived, with a head shaped like a wolf's and enchanted with "spells of ruin", drawn by great beasts and swung by trolls, which was used to break the gate of Minas Tirith.
* The Lord of the Rings example: Aragorn, Legolas, and Gimli running after the orcs to save Merry and Pippin.
* The Lord of the Rings except against another supernatural being. This is of course mostly because the Wizards of Middle-earth aren't actually humans, but Maiar (the setting's equivalent to angels and demons). This subversion applies to the other Wizards too; Saruman isn't quite the swordmaster that Gandalf is, but he can still take a beating if his duel with Gandalf is any indication, while Radagast is able to fight off the Witch-King by just whacking him with his staff.
* The Lord of the Rings (except Boromir). Aragorn especially has shown this, surviving after falling from a cliff and getting up with no injuries after an explosion occurred right beneath his feet, when everybody else near to him died.
* The Lord of the Rings exists in the movie, as it's a new source of tension in the Scouring of the Shire, which has to be resolved before the final ending of Frodo's and Bilbo's trip into the west and Sam's epilogue. With the Scouring removed in the film, so is the tension; as the rest remains the same, the plot spends its last half-hour just coasting downhill.
* The Lord of the Rings Extended Editions include more hours of bonus material than the running time of the actual (pretty darn long) movies. Depending on which EE you bought, you also got a figurine and an additional bonus DVD.
* The Lord of the Rings. Faced with a world-ending enemy and flanked by allies more eager to do nothing or fight each other. He has to bully, cajole and charm the remaining free people into forming an effective bulwark against Sauron, and simultaneously give Frodo a chance to get into Mordor and destroy the ring, and thus Sauron, for good.
* The Lord of the Rings fanfiction has either Aragorn or Legolas in danger, kidnapped, tortured, or out of commission so the other has to rescue him? Answer: lots.
* The Lord of the Rings fan works posit that elves have bizarre reproductive anatomy. The women have tiny, tube-like tentacles that suck the sperm out of the males — and this is compatible with human anatomy, making the fics fit seamlessly into the Tolkienverse. It also gives a somewhat disturbing explanation as to why there is no fertile male elf-female human couple known in the history of Middle Earth.
* The Lord of the Rings: Faramir gives Frodo the right to go anywhere in the realm of Gondor (except for the Ranger hideout in Ithilien) for a year and a day. He also grants this right to anyone Frodo formally takes under his protection, such as Gollum. Oddly enough Samwise is not mentioned at all in this - apparently Faramir decided that as Frodo's companion, Sam was already under his protection.

* The Lord of the Rings features a number of these. In Rohan you see the Royal Guard, recognisable by their uniform appearance including floor-length scale hauberks (a couple of speaking roles wear their uniform such as Gamling and Hama), then in Minas Tirith there are actually two kinds- the Citadel Guard who follow Denethor around and the guards of the Court of the Fountain who guard the White Tree rather than an actual person.
* The Lord of the Rings features the disgraced lord of Dorwinion intentionally "cutting himself shaving" so as to avoid an inevitable death sentence, allowing his son to inherit. This is enabled by Prince Brand, who he betrayed by cowardice.
* The Lord of the Rings film adaptations, Aragorn wears a forest-green Ranger Coat for the better part of the film series, up until he forsakes his Ranger side and becomes the King of Gondor.
* The Lord of the Rings films is cut down to this to save time. And it only appears in the Extended Edition!
* The Lord of the Rings films that include the Battle of Helm's Deep often require the player characters to run around on top of the wall and push back the siege ladders.
* The Lord of the Rings films, then it cuts to a fairy who looks at the camera and complains that there are too many bells and whistles just to sell a car. The ad focuses completely on the car from then on.
* The Lord of the Rings film trilogy has several examples of these, as revealed in the DVD extras:
* The Lord of the Rings film trilogy was filmed without any consideration to people who might watch the second or third film without seeing the previous installments. Each film follows directly after the other and depends upon the others to tell the complete story, like chapters in a single, 11-hour film.
* The Lord of the Rings fits this trope perfectly. An officer and gentleman, he is extremely honorable (to the point he wouldn't lie even to an orc) and impeccably courteous (even toward his war prisoners).
* The Lord of the Rings follows in her book counterpart's footsteps of being both well versed in the manners of the court as would befit a noble lady of her rank, and also a formidable warrior.
* The Lord of the Rings footage that hasn't been released to date; it's mostly from the ending of the film (every character would have gotten their own epilogue).
* The Lord of the Rings for Aragorn. She also eventually ends up with Faramir. Still, Galadriel is a hell of an aversion, and her husband is something of an inversion. Quick: without looking it up, what was his name? Thought so. The one line the poor schmuck got in the films was to ask where Gandalf is, and Galadriel corrects him without even bothering to make eye contact.
* The Lord of the Rings for the whole modern idea of a "trilogy" is entirely accidental.
* The Lord of the Rings, for use in settling debates about the author's intent.
* The Lord of the Rings fought with swords, and Dáin Ironfoot's army carried mattocks and short swords.
* The Lord of the Rings, Frodo drops Sting as Shelob jabs him with her stinger.
* The Lord of the Rings, Frodo gets them after being corrupted by the cursed Nazgûl blade.
* The Lord of the Rings, Frodo gets whipped by a tower orc if he so much as moves around.
* The Lord of the Rings, Frodo has a nightmare about finding out that he murdered Sam when Sam offered to share the Ring.
* The Lord of the Rings, Frodo is the protagonist, Sam is the deuteragonist, and Aragorn is a tritagonist, along with some of the other members of the Fellowship, particularly Gandalf, Merry, and Pippin.
* The Lord of the Rings, Frodo loses a finger, Boromir catches several arrows in his chest, Aragorn spends the whole trilogy bloody, bruised, and scraped. Practically all of the cast is harassed by either the Watcher in the Water or a Cave troll. And all pretty boy Legolas gets over the course of is a bruise and a little smudge of dirt. And Éowyn made it through almost the entire Battle of

the Pelennor Fields unscathed, with never a cut or a bruise until the Witch-King smashes her shield and her arm with his gigantic mace.
* The Lord of the Rings, Frodo sings an ancient hobbit tune that the narrator notes only survives in fragments today. The verses that are familiar to readers are clearly from the nursery rhyme "Hey Diddle Diddle".
* The Lord of the Rings, Frodo's parents, Drogo Baggins and Primula Brandybuck, are cousins by marriage, making them both cousins with Bilbo and therefore making Frodo Bilbo's cousin twice over, as old Gaffer Gamgee explains:
* The Lord of the Rings from Development Hell with blockbuster success.
* The Lord of the Rings, frozen to death, surrounded by enemies still too scared to touch him.
* The Lord of the Rings, Galadriel and Gandalf refuse the One Ring for fear of this.
* The Lord of the Rings: Galadriel, Elrond and Gandalf are shown communicating telepathically with each other. Galadriel also speaks to Frodo in his mind in Lothlórien and at various points in his journey to Mordor.
* The Lord of the Rings, Galadriel memorably storyboards what would happen if she were to take the Ring for herself when Frodo offers it to her before ultimately refusing it.
* The Lord of the Rings, Gamling. He expresses concern that the army mostly consists of men his age and their grandsons, because of the high casualty rates Rohan has suffered recently.
* The Lord of the Rings: Gandalf´s gambit of sending Frodo into Mordor straight under Sauron´s nose is pretty far out. Denethor lampshades it prominently:
* The Lord of the Rings, Gandalf ends the fight against the Balrog atop the highest peak of the Misty Mountains.
* The Lord of the Rings, Gandalf sometimes speaks this trope's name word for word when the ball enters Paths of the Dead.
* The Lord of the Rings: Gandalf The Grey dies and returns as the more powerful Gandalf The White.
* The Lord of the Rings, Gandalf the Grey spent two millennia walking the (Middle) Earth while searching for ways to resist the return of Sauron.
* The Lord of the Rings. Gandalf the Wizard is a master of fire, but needs fuel to work with, noting that he "cannot burn snow".
* The Lord of the Rings gets away with this to the extent that it does imply that we ourselves may be living in a World Of Ham.
* The Lord of the Rings getting a splinter and grossly exaggerating how bad it was.
* The Lord of the Rings, Ghân-buri-Ghân, chief of the Woses, says that the Rohirrim have hunted his people like beasts. His only real demand for helping them in the War of the Ring is that they stop doing this.
* The Lord of the Rings, Gildor was not offended and found Frodo's response truly funny; and clarified saying he was still making a decision and didn't want to say anything concrete yet.
* The Lord of the Rings, Gimli and Legolas indulge in a friendly rivalry at the battle of Helm's Deep that obliges both to scrupulously tally their kills; Gimli wins by one dead Orc, forty-two to forty-one. Gimli's tally is so accurate he can even place a number on the one who left a nick in his axe's blade.
* The Lord of the Rings. Gimli muses that he wishes to see if Saruman resembles Gandalf, as has been said. Gandalf responds that Saruman might look like him to Gimli, if it suited his purposes.
* The Lord of the Rings gives us Hobbit Shirriffs. Until Saruman's takeover they didn't really do anything but watch for trespassers since the Hobbits themselves almost never committed crimes and the land was defended by the Rangers.
* The Lord of the Rings Gondorians do not speak Sauron's name, as that would give him honor that they refuse him. Ironically the occasional use of "the Nameless" (usually in phrases like "servants of the Nameless") itself amounts to giving him a name, and a disparaging one—he who does not deserve a name.
* The Lord of the Rings), Gondor is getting badly clobbered — despite the

huge death toll, Mordor's army breaks through the outer, strongest wall — until Rohan's cavalry arrives. In the movies, the conflict is presented by scenes of desperate struggle within the city walls and civilians fleeing screaming in terror — with emotive music playing in the background, of course.
* The Lord of the Rings, good friends in college and both big fans of classic mythology, both became frustrated that no one was writing those kinds of stories anymore. Finally they both agreed that they should write those stories themselves.
* The Lord of the Rings had a vague idea of the ending, but he had no idea how to get there until he got there. Every big event, from beginning to end, was designed while it was being written. The only scene he even tried to write ahead of time was the climactic scene inside Mt. Doom, and the final one was still written only when the story got to it.
* The Lord of the Rings had the Barrow-downs. Much of the underground cities and mines of Moria might also qualify; though not built as a tomb, it ended up as one.
* The Lord of the Rings had the bonus effect of ensuring Middle-Earth would at least theoretically be habitable for them and their descendants.
* The Lord of the Rings has a number of guard units, most notably the Citadel Guard of Minas Tirith which Pippin joins.
* The Lord of the Rings has Aragorn doubting himself not wanting to deal with the pressure of being a king. Elrond shakes him out of it and he saves the day with his awesome influence.
* The Lord of the Rings has Frodo eagerly tell Sam after destroying the One Ring, "Let's go home!", and walks off. A moment later, he walks back the other way and says, still as cheerful and eager as he was before, "The Shire is this way."
* The Lord of the Rings has Gandalf's last words, "Fly, you fools", before he falls to the abyss dragged by the Balrog. The trope is subverted since Gandalf does not die right there and keeps on fighting, but his fellowship and the reader doesn't learn that until much later.
* The Lord of the Rings has inserted herself into the Fellowship, and the journey is told entirely through journal entries by other characters remarking on her presence (and expressing considerable concern over things like her variable hair and eye color and constantly-changing backstory). Galadriel makes an entry when they leave Lothlórien:
* The Lord of the Rings has no less than three: the Tower Skill Shot, the Flipper Skill Shot, and the Lane Skill Shot.
* The Lord of the Rings has skipped over the previous bits, we invariably get the "and you have my X" lines.) Caradhras, the Mines, Boromir's betrayal, etc.
* The Lord of the Rings has the entire country and society build around that trope. Mordor is a black land with red lava and the mountain of Mount Doom which has a red peak. This is completed by the main tower, Barad-Dur, which is all-black and on top, we have the red and flaming giant Eye of Sauron (unlike the book, the movie implies this is Sauron's actual current form).
* The Lord of the Rings has this as its natural side-effect, turning people against one another by playing on their lust to use its power. The One Ring is so purely evil and so powerful in its corrupting influence that it can twist even the noblest desires into arrogance and narcissism and gradually makes the Wearer feel more and more entitled to it and greater than all the others which is the first step towards isolating him. And any ambitious desire will do perfectly. Faramir eg who proved resistant(in the original text, anyway) just wanted to live his life, and if he happened to be some sort of hero it would only be because he had to. Boromir wanted to be a big famous hero, cast down Mordor, restore Gondor and Arnor to their former glory. Certainly not a bad ambition, but the Ring can latch on to that to start its Hate Plague after taking hold, which it does to him since he shows hints of being tempted during the council scene, immediately upon being faced with the ring. Nothing demonstrates it better than its primary victim: Gollum and the flashback to Deágol and Sméagol finding the Ring while fishing. Within minutes Sméagol (Gollum) has killed his relative in order to possess the Ring. When it all comes down to it Sam proved to be the most resistant when he used it to rescue Frodo, since he had no desire for power whatsoever, while one reason that

Faramir escaped the Ring's lures was he was smart enough to avoid ever even seeing it, telling Frodo to not even show it to him. Boromir wasn't so smart.
* The Lord of the Rings have a uniform style as if they were all built in one go.
* The Lord of the Rings have names in Elvish. Sometimes, translations were provided. They were often arranged so as to sound like part of the name; if you translate all the Elvish, you discover characters called Greenleaf Greenleaf (Legolas) and Shipwright the Shipwright (Círdan), as well as a place called the plain of Battle Plain (Dagorlad).
* The Lord of the Rings having it — only Aragorn having the sword of Elendil, which gives him no special power against Sauron's armies.
* The Lord of the Rings. He also faces off against an old enemy from his days as a soldier in World War 2 to save Chris.
* The Lord of the Rings. He can conjure a shield of light, enhance the sunrise to disrupt the Uruk-hai, and use white light to drive away the Nazgûl.
* The Lord of the Rings he is really ugly compared to Frodo, Merry, and Pippin, with his wrinkled face, crooked buck teeth, big nose and chin, lazy eye, and wart on his cheek.
* The Lord of the Rings. He recalled an example regarding the siege of Gondor, which is paraphrased:
* The Lord of the Rings. He's a proud and gallant warrior, greatly admired for this by his people (and his younger brother) but the pressure put on him by his position as heir to Gondor's ruler and his belief that Sauron could never be beaten fed his obsession with the Ring and made it easy for him to fall for the temptation.
* The Lord of the Rings, he says (perhaps bittersweetly) "Well, I'm back."
* The Lord of the Rings. "He's hardly left your side these last three days."
* The Lord of the Rings. He's mentioned often but never actually appears, deliberately, to heighten the sense of his unfathomable, mind-breakingly evil power. He is, however, given some description in supplemental material, and going by those it's better that we don't see what's really behind all this craziness.
* The Lord of the Rings, high elven blades are sharper than anyone else's and the blades hold their edge forever. Then there's the dwarven-made Narsil, which is absurdly sharp even by elven standards.
* The Lord of the Rings: High Stage 4, with many parts in Stage 5. Among the fans the trilogy is transcendent of all other films, and it's almost impossible to find any person that hasn't at least heard of LOTR or knows about Gollum or Gandalf.
* The Lord of the Rings. Hilariously, Tolkien actually admitted in his lifetime that he wanted the pluralization to be 'dwarfs', but thanks to his editor erroneously seeing it as an error, it was changed to Dwarves, which Tolkien then kept as 'a private piece of bad grammar'. (He would have preferred 'dwarrows' anyway.)
* The Lord of the Rings His children show up in several of the crowd scenes, too.
* The Lord of the Rings. His critiques generally boiled down to his belief that the books were unadaptable and that the cast and crew of the production were not taking their source material sufficiently seriously. Unfortunately, modern-day audiences aren't able to form an opinion on the matter either way, as the tapes were wiped and all episodes are considered lost.
* The Lord of the Rings his head. Otherwise, all the Nazgûl wear concealing hoods, which have the same function — in fact, their robes as a whole define the shape of entirely invisible bodies. Of course, with the benefit of Ring-O-Vision, Frodo gets to see 'through' to the ethereal remains of their faces.
* The Lord of the Rings. His impressiveness isn't just because he's a wizard, but because most of the hobbits he's friends with usually describe him in grandfatherly terms.
* The Lord of the Rings. His lust for The One Ring drives him to attack Frodo and seize the Ring inside Mount Doom. Overjoyed at having finally reclaimed his "precious," he dances around, loses his balance, and falls into the Cracks of Doom, unintentionally destroying The One Ring.
* The Lord of the Rings. His pledge to join the Fellowship specifically emphasizes his weapon of choice.

* The Lord of the Rings. However, Bilbo raised and treated Frodo as a son.
* The Lord of the Rings, however, by raising the bar too high to compete.
* The Lord of the Rings, however, the Nazgûl come back with tougher mounts, the colossal mumakills appear, the king of the Nazgûl shows up, and Aragorn ends up dueling an armored troll.
* The Lord of the Rings, humans are referred simply as Men (see literature section).
* The Lord of the Rings hurt people, as the only army they deal with they simply terrify into fleeing. If they could not actually attack people, once the psychological impact of them wore off, their usefulness would be greatly reduced. Regardless, they demanded to be released after a single battle, and he complied.
* The Lord of the Rings hyped up Arwen as if she were a major protagonist, and Liv is billed third on the poster. After the first film proved such a success, this was de-emphasized, as it was obvious the film could stand on its own.
* The Lord of the Rings. If she wants out, she may deduce that she is dreaming, and try to wake herself. This never works, because it is no dream.
* The Lord of the Rings, if you can believe that. Will Whitfoot, mayor of Michel Delving and the fattest hobbit in the Shire, is caught in the collapse of the Town Hole and emerges covered in chalk, thus earning the nickname "Flourdumpling". It happens off screen — er, off page — but still, there you are.
* The Lord of the Rings implies that it may actually make them age and die faster. Elves, of course, can be expected to live on until the end of the world, as can Gandalf, who is one of the Maiar.
* The Lord of the Rings includes comments from both Sméagol and Gollum. And Andy Serkis too!
* The Lord of the Rings. In fact, it was New Line who suggested that they make three movies rather than the two that Jackson was requesting.
* The Lord of the Rings in full. The most we ever get is his shadow, that of a man in a horned helmet, but everything else is kept a mystery. Even so, there's always fear in peoples' voices whenever they talk about him.
* The Lord of the Rings in her own right) aches. So does the stump of finger that Gollum bit off, which might have less to do with the wound and more that it lost him the Ring. All of this makes life in Middle-earth painful, and he's eventually invited to the Undying Lands in hopes that he can be fully healed there.
* The Lord of the Rings in PlayStation Magazine had the fact that the developers were aiming for an M rating plastered all over the article like it was all that mattered.
* The Lord of the Rings insofar as in their world there isn't much difference between a story and a history lesson, so this is a little like (for example) drawing parallels between the Iraq war and Vietnam.
* The Lord of the Rings" In the film, this scene is accompanied by music reminiscent of the Grey Havens — the closest manifestation of divine love in Middle-Earth.
* The Lord of the Rings: In the first book, Frodo loses consciousness after battling with the Nazgul on a hill. While asleep, the characters race to get him to Rivendell before the poison kills or transforms him. He has to get the escape explained to him by Gandalf once he wakes up in one of the bright medical rooms of the elves.
* The Lord of the Rings: In the world of Middle-Earth, the realms of Arnor and Gondor were both founded by Elendil and the Númenóreans who fled with him after their kingdom was corrupted by the influence of Sauron.
* The Lord of the Rings into the Ring, which kept him from dying completely when he was killed as long as the Ring survives.
* The Lord of the Rings introduces a creature called a "hell-hawk", a smaller cousin to the Nazgûl's flying steeds which attack eagles on sight, in much the same way crows instinctively hate owls.
* The Lord of the Rings in which Gandalf must convince Théoden to prepare for an imminent invasion by Saruman and Merry and Pippin must convince Treebeard to join in the war.

* The Lord of the Rings, in which Gandalf observes that any device of an art deeper than one's own is dangerous. This doesn't go all the way to saying such devices should not be used, it's more like an observation and a call for caution, the reality of the risk is displayed by Denethor and Saruman.
* The Lord of the Rings, in which the re-forging of Andúril is mentioned, but not emphasized and not given its own separate scene.
* The Lord of the Rings (Iron Throne) and a whole album about dragons (War of Dragons).
* The Lord of the Rings is an example of a Cavalry Officer in a non-western setting.
* The Lord of the Rings is certainly not missing this trope either, with Aragorn the Heir of Isildur, Boromir and Faramir (who are practically royalty), and the royal house of Rohan. Legolas is also a prince, the son of King Thranduil of Mirkwood. Even Pippin and Merry might count: Pippin's the heir to the Took, who's the closest thing the Shire has to a head of state, and Merry's the heir to the Master of Buckland, another prestigious title.
* The Lord of the Rings is entirely dependent on that "something else".
* The Lord of the Rings is even worse in the book than in the film. In the film, Denethor at least seems aware of what a terrible thing he's saying and says it with some solemnity. In the book, Denethor replies with "Certainly I wish it, for Boromir was loyal to me, and no wizard's pupil." And then has the fact that he was ultimately responsible for Boromir's death thrown brutally (and truthfully) back in his face since Denethor overrode Faramir's desire that he be the one to go to the meeting in Rivendell and sent Boromir instead.
* The Lord of the Rings is just about thirty Dunedain (plus two elves who wanted to kick some Orc ass). And kick ass they do.
* The Lord of the Rings, is often written about as though it were a flop — and to be fair, it only covered half of the trilogy. But it was actually a financial success, earning more than $30 million on a mere $4 million budget. The only reason a sequel wasn't made was that the studio didn't think audiences would want to see "half a movie".
* The Lord of the Rings is the primary main character, but he does none of the fighting, and does not get involved in the war directly at all. What he gets is the equivalent of a behind the lines assassination attempt. Even he only manages to succeed because his gardener tagged along.
* The Lord of the Rings is this, and it is one of the reasons he succumbs to the Ring's temptation.
* The Lord of the Rings is this in spades as far as Gollum is concerned.
* The Lord of the Rings, it is at the Bridge of Khazad-dûm where Gandalf the Grey fights the Balrog, and falls.
* The Lord of the Rings (it is stated that she is very beautiful) Durga. Needless to say, being a woman and being so badass, she easily defeats Mahishasura.
* The Lord of the Rings. It's just that detailed. And to think that the entire world, complete with intricate mythology, fleshed-out characters, and delightful poetry served one purpose: to serve as a backdrop for the out-of-whole-cloth-created languages that the English professor had constructed. Boggles the mind, it does.
* The Lord of the Rings. It's touched on once or twice, but both the hobbits and the readers are left mostly clueless as to how much Pippin and Merridoc fit this trope. Only in Appendix F is it revealed how strange and funny Pippin sounded to the men of Gondor.
* The Lord of the Rings it was, in front of Frodo, who is now wearing said vest.
* The Lord of the Rings jump-and-run for the PS2-era consoles, insurmountable waist height fences would team up with invisible walls and insurmountable shrubbery and fallen trees to form a path as linear as the early Crash Bandicoot games.
* The Lord of the Rings. Justified with the homework Tolkien had done creating his universe. Frodo and Sam's path got progressively worse because they came at Mordor from the northwest, which was the path that Sauron fled Mirkwood between The Hobbit and Lord of the Rings and his influence was persisting. The rest of the group only

really had Moria, which was also a direct result of Sauron's actions.
* The Lord of the Rings later admitted they added the wings just because it looked cool.
* The Lord of the Rings leave. They already were going to leave, he just gave them something useful to do so they could retain some honor.
* The Lord of the Rings left out as well as some changes that didn't make any sense.
* The Lord of the Rings, Legolas and Aragorn have a habit of placing one of their hands on each other's shoulder and looking at each other for a moment.
* The Lord of the Rings, Legolas seems to have infinite arrows, in contrast to the book, where the replenishment of his arrow supply is a constant source of concern.
* The Lord of the Rings like a Man) was also the tallest member of the Fellowship while he led it.
* The Lord of the Rings like a pathetic shriveled creature that should barely be able to walk.
* The Lord of the Rings, magic has been pretty much receding for centuries before the story began. The ending of the One Ring resulted in the end of Sauron's artificial sorcery in Middle Earth, the decay long held off by the Elven Rings powered by him could no longer be stopped, and the Elves, who are tied to the natural magic, had to leave the world, lest they themselves decay.
* The Lord of the Rings map. The Blue Mountains, the east border of Beleriand, became the westernmost mountains of later Middle-Earth.
* The Lord of the Rings. Maybe Frodo would have been more cautious entering Cirith Ungol if he knew that it meant "Pass of the Spider"?
* The Lord of the Rings — stripped of all other resources, his last resort is to corrupt the entire Númenórean Empire and then sit back and watch their civilization spectacularly implode (unfortunately on top of him). He also corrupted the nine mortal kings who would later become the Nazgûl.
* The Lord of the Rings — there's the entire "Scouring of the Shire" part after the Ring is destroyed, and there are quite a few similarities between that storyline and the rest of Season 4.
* The Lord of the Rings. Melkor/Morgoth, Sauron, the Balrogs, Ungoliant, Saruman... just about all of the extremely evil and powerful beings in Middle-Earth were also thousands of years old, some of them dating back to the creation of the world.
* The Lord of the Rings (Merry) and Billy Boyd (Pipin), the latter more so.
* The Lord of the Rings metal/rock by a Polish band called Drużyna Trzeźwych Hobbitów (The Fellowship of Sober Hobbits).
* The Lord of the Rings, Minas Morgul, Cirith Gorgor, Isengard, Ephel Duath etc.).
* The Lord of the Rings more known for the "combat" part than for the "medic".
* The Lord of the Rings: Mount Doom after the Ring is destroyed. In fact, Mount Doom all the time.
* The Lord of the Rings movies, Bilbo Baggins is considered to be a little odd in the Shire (it is mentioned that most people showed up for his birthday for the booze) but had previously gone on a fantastic adventure and had even earned the respect of the Wizards and Elves. When his nephew and friends make it back to the Shire at the end of the series, they are greeted with an angry scowl by Mr. Proudfoot while the rest of the community don't seem to care where they went. See the Literature section below for the book versions.
* The Lord of the Rings movies do this several times with the Great Eye of Sauron, most memorably: the first time Frodo puts on the Ring, he turns around and...
* The Lord of the Rings movies expanded their merch into replica weapons, shields, helmets, costumes, flags, pipes, and jewelry worn by the characters, along with the more prosaic buttons, pins, books, posters, mousepads, and t-shirts.
* The Lord of the Rings movies show the über-orc Uruk-Hai growing out of weird pit full of presumably magical mud stired by regular Orcs, the Uruk-Hai is born fully grown and even some times kills the stirer. This is movie-only, as reproduction of Orcs is never established in the books (and is still today subject of a lot of fan debate) but is presumably a way to represent how the Uruk-Hai were created by Saruman.

* The Lord of the Rings movies swords make a steel-against-steel sound when drawn from leather scabbards. It is alleged that they originally intended to use more realistic sounds, but in a textbook example of the Coconut Effect decided that it sounded "wrong" on film.
* The Lord of the Rings movies, though after their introduction they don't seem to pose much of a problem.
* The Lord of the Rings: Nearly seventy centuries later Arwen also chose becoming mortal out of love for Aragorn.
* The Lord of the Rings, notably Boromir's and Faramir's recurring dream about Isildur's bane that prompts Boromir to go to Rivendell. Frodo also sees Gandalf's escape from Orthanc in a dream, though he doesn't understand what he saw until he hears Gandalf's story later.
* The Lord of the Rings, of all places, Sauron employed synthetic plagues at various points in the backstory to weaken his enemies before more traditional conquest.
* The Lord of the Rings once he goes off on the quest to destroy the One Ring, which eventually escalates into a war. Although this time they are only parted for half a year.
* The Lord of the Rings Online allows Hobbit Guardians (plate-wearing main tank class). Dwarves can also be Guardians but their bulk makes them look more "appropriate" than the idea of the diminutive warrior.
* The Lord of the Rings Online, being produced by the same company, uses the same three-tier membership system.
* The Lord of the Rings Online, but they occasionally give flashbacks taking place well before.
* The Lord of the Rings Online by giving horses a separate, much smaller health bar.
* The Lord of the Rings Online: Darkwaters — spirits of long-undead people who animate water in such a way that it resembles a skeleton with a sword.
* The Lord of the Rings Online. Enforcing the trope further, the default duration of Last Stand is five seconds shorter than In Harm's Way.
* The Lord of the Rings Online extends the reforged weapons from earlier ages (as seen referenced above from the books) to players with Legendary Items.
* The Lord of the Rings Online find parties running instances where you can bypass a lot of the area by making a beeline straight for the end boss, ignoring everything that doesn't actively try to stop you along the way.
* The Lord of the Rings Online First you stay in the (mostly) peaceful Shire, but then you get sent into areas where enemies are level 36-40 and kill you with a single hit. Ouch...
* The Lord of the Rings Online has a group of quests that involve carrying a pie through the Shire while avoiding hungry Hobbits.
* The Lord of the Rings Online has signature, elite, elite master, and nemesis versions of mooks, each progressively more dangerous. Signatures can be found on the landscape; nemeses, with over 20 times normal health, are confined to raid dungeons, but are still nameless mooks.
* The Lord of the Rings Online has the "Fellowship Maneuver", where every member gets to choose one of four effects (damage, damage over time, healing, power restoring), that combined make up a coordinated attack. If players sucessfully mixes effects in specific orders, the attack ends up more powerful than if they'd simply all have choosen the same effect, and may also have other benefits like summoning a oathbreaker to help out in the fight.
* The Lord of the Rings Online has the Inn League reputation quests. They consist of going to every bar in the Shire and getting progressively more drunk, and other drinking-related debauchery. Eventually, you can black out and wake up in places that one should not be - including on top of a massive stone spire in the middle of the Misty Mountains, with no obvious way up and no pain-free way down. And in snowy areas you can encounter white-outs which make everything onscreen nearly invisible, and at least one monster type can create much the same effect by raising a cloud of dust.

* The Lord of the Rings Online involves an effort to protect the village of Archet which is having this done to them by the Blackwolds, a vicious brigand gang that has cut a deal with the evil forces of Angmar. After blockading the gate to Combe, the neighboring town, to prevent the people of Archet from going there for aid, they proceed to launch an assault against the town that is only stopped by the intervention of the village leader's son, his band of hunters, and the player.
* The Lord of the Rings Online, like many modern games, has a "tapping" mechanic to prevent killstealing: the first player or group to damage a mob gets the experience for killing it. It's still possible to usurp other player's efforts, though: If multiple mobs attack a player, it's quite possible for another player to tap a rare/plot-critical mob in the group before the first player gets to it.
* The Lord of the Rings Online storyline. You are sent on a dangerous errand with Five Elves which compose "The Hidden Guard". Their numbers start to dwindle quickly so much to the point that you barely get to know the first one to die and cant really relate to his death, although the passing of the last victim is truly heartbreaking.
* The Lord of the Rings Online, the Deep-Toads in Moria have an attack that gives players a status debuff with the explanatory text "You can taste rectangles and smell the color magenta." It also tints the UI faintly purple, growing more pronounced towards the edges of the screen, as if you were looking through a literal purple haze.
* The Lord of the Rings Online, the prisoners in the jail in Bree-town really should be able to just walk out of there.
* The Lord of the Rings Online, the Tier 2 Challenge for Saruman's fight involves defeating him without anyone reaching zero morale, and within 30 minutes, or else everyone instantly dies.
* The Lord of the Rings Online, you don't even have health, you have "morale." When your Morale reaches zero, you are defeated and can "retreat" to a respawn point. That's a viable retreat from anywhere, whether it's the pinnacle of Orthanc, or the middle of the Battle of Helm's Deep.
* The Lord of the Rings orders his minions to slay everyone in Minas Tirith.
* The Lord of the Rings, originate in British literature and have some of the finest British actors around in lead roles. The majority of their funding is American.
* The Lord of the Rings or Mr. Sunshine) freaking out, and Gandalf (one of the most powerful beings inhabiting Middle-Earth) actually afraid.
* The Lord of the Rings, or regular edition's special features. Good luck!
* The Lord of the Rings, or waybread, is created by a secret art, never spoils, and a single bite can sustain a person for an entire day.
* The Lord of the Rings other towers mentioned in the novel, the two most likely candidates are Minas Morgul and Barad-dûr.
* The Lord of the Rings, people are used to Orcs not being able to stand the light of the sun, so it is a shock when Saruman's Uruk-hai are capable of doing so.
* The Lord of the Rings, Pippin is kidnapped by a former innkeeper and his accomplice. Since the story is set AFTER the War of the Ring, and his kidnappers are nowhere near as dangerous as Orcs, it takes no time at all for Pippin to free himself and turn the tables on his captors.
* The Lord of the Rings, Pippin purposely drops the brooch from his cloak so that Aragorn, Legolas, and Gimli can know that he and Merry were prisoners, on top of the footprints he left, where they would not be obscured by orcish footprints.
* The Lord of the Rings, pointing out the corrupting nature of the Ring.
* The Lord of the Rings popularize the adjective form "elven" instead of the then-standard "elfin".
* The Lord of the Rings prefers bow and arrows, he also has a long knife for when he runs out of arrows, such as at Amon Hen.
* The Lord of the Rings: Put the One Ring on? Now you're in the Wraith World, with only Sauron and any Nazgûl that happen to be in the area for company.
* The Lord of the Rings readers thinking that the Witch-King was killed by Merry, not Éowyn. And coincidentally, neither the appendices nor the prophecy (No

man shall kill him—it was a Hobbit!) contradicts this. But it's clear in the original.
* The Lord of the Rings realms (Mithlond, Imladris and Lothlórien) in continuous stasis. Unfortunately, unbeknowst to the Elven-smiths, Sauron then forged the One Ring...
* The Lord of the Rings. Repeatedly. To the point where Gandalf calls him out on it at one point.
* The Lord of the Rings residents of the Shire for his fireworks shows, "some of which were obviously magical." He also tells Bilbo that he should "not take [him] for some conjurer of cheap tricks".
* The Lord of the Rings return for some new voice clips as Frodo and Gimli, respectively.
* The Lord of the Rings revolves around Merry waking up in the bodies of his ancestors, one of whom happens to be his very pregnant (and about to give birth) great-grandmother.
* The Lord of the Rings Sam Gamgee, the one member of the Fellowship who stays with Frodo all the way to Mt. Doom.
* The Lord of the Rings, Sam overhears Frodo claiming that he should have never let someone come on the quest with him, and how he wishes that they'd remained in Mount Doom. Sam thinks that Frodo is talking about him and is heartbroken (Frodo's really talking about Gollum).
* The Lord of the Rings. Sam's real name is Banazîr Galbasi (which, oddly, sounds more like Persian or Pashto, or perhaps Turkish).
* The Lord of the Rings, Saruman goes from being a demigod and head of the wizard's order to boss of a small group of Orcs bullying hobbits in the Shire. Pretty much every adaptation ignores this bit of the book.
* The Lord of the Rings, Saruman has always envied Gandalf for being the more popular of the two (which was in no small part thanks to him being humbler and wiser). Gandalf on the other hand always respected Saruman and apparently had no idea how much his fellow Maia resented him, being sincere and personable right up to the moment Saruman revealed his true colours and attacked him.
* The Lord of the Rings, Saruman offers to help restore Aragorn to the throne of Gondor in return for his allegiance and the Ring. Aragorn doesn't bite.
* The Lord of the Rings: Saruman offers to 'share' the power of the Ring with Gandalf — who doesn't bite. Moreover, he reasonably points out that a Ring of power can't be shared- one hand has to wear it.
* The Lord of the Rings, Saruman sends huge bolts of magic energy that destroy the wall of Helm's Deep.
* The Lord of the Rings: Saruman's mark on his Uruk-hai warriors was a very mild version of this. (He used white paint.)
* The Lord of the Rings; Saruman would have tried to make his own One Ring; and in the end the Fellowship would have had to use its power to win. It's also noted that both sides in that conflict would have held Hobbits in hatred and contempt, and they wouldn't have survived long even as slaves.
* The Lord of the Rings: Sauron, being something akin to a fallen angel, was once very beautiful and used this trait to ensnare humanity in his plots.
* The Lord of the Rings: Sauron lets Gollum go after torturing him for we don't even know how long. Books or film, Sauron wasn't using Gollum as bait or an assassin; he just let Gollum go. And if it weren't for Gollum, the Ring wouldn't have wound up in Mt. Doom.
* The Lord of the Rings, Sauron's forces use black banners and an insignia marked with a red eye.
* The Lord of the Rings's body in a boat and send it down a waterfall, as the river would keep the orcs from it.
* The Lord of the Rings seems to condense the first interval to exactly as long as it takes Gandalf to make the trip Minas Tirith and back, a few weeks or months, and Frodo sets out the next day.
* The Lord of the Rings serious consequences (his twin brother - Aragorn's ancestor - gave up immortality), and he wakes her up to reality. Arwen marries Aragorn

anyway, and accepts the consequences.
* The Lord of the Rings set up has roughly 1/3 of the territories (most of the unaligned ones) occupied by 2 neutral troops each. This is to help balance the game at the outset, creating enough of a hindrance that neither player can simply sweep across the board on the first turn, but also giving the players a chance to use their strategic defensive positions without having to conquer half the map first.
* The Lord of the Rings's funeral consists of putting him in a boat and letting it fall over the Falls of Rauros. "The River of Gondor will take care at least that no evil creature dishonors his bones."
* The Lord of the Rings, she argues that she should go with him, and Aragorn forbids it because she'd be neglecting her duties to rule Rohan in the King's absence. When she presses the issue, he says that "you have no errand to the South". She gets in a very subtle declaration of her (already obvious) love for Aragorn by pointing out that neither do his companions; they go because they love him, implying that she should be allowed to go for the same reason.
* The Lord of the Rings: Sméagol to both Gollum and Frodo, which leads to some conflict of interest....
* The Lord of the Rings's oldest arguments is over whether or not the Balrogs actually had wings. If so, they didn't save it from falling down the pit with Gandalf.
* The Lord of the Rings: Some casual fans think that Legolas's surname is "Greenleaf." "Greenleaf" is simply an English translation of his first name (Sindarin laeg = "green" and golas = "collection of leaves").
* The Lord of the Rings sometimes goes by the name Elessar ("Elfstone"), given from his surrogate father Elrond (an elf).
* The Lord of the Rings's other works), for better or worse. Still, the... influence... is pretty visible in some works.
* The Lord of the Rings's "Random Slashy Interludes" for a prime example.
* The Lord of the Rings still dragons out there — Smaug was merely the greatest of his age.
* The Lord Of The Rings Strategy Battle Game they're major characters. The number of fate points a character gets is determined by how good their final fate in the films and books is — for instance, Aragorn, Sam, Gandalf the White etc. have high fate point counts, whereas Boromir, Denethor, Gríma Wormtongue etc have low counts.
* The Lord of the Rings style elements usually present in films that try to invoke this trope with respect to the audience. (Using/showing the Red Book of Westmarch a bit more — he does show it several times — might have qualified, since it was Tolkien's "found footage" from which he was supposedly translating the story.)
* The Lord of the Rings succeeds in effectively ruling Rohan by manipulating the ailing King Théoden... for a while.
* The Lord of the Rings swear to serve, "until my Lord release me, or death take me, or the world end."
* The Lord of the Rings sword, and this he keeps for the rest of the journey, only giving it back to Frodo after the war is over.
* The Lord of the Rings talks about how much effort he put into learning swordsmanship for the films' fight scenes. In the first of these filmed — the Nazgûl attack on Weathertop — he was specifically asked after a few takes to tone it down, so as not to make Sam appear to be too competent.
* The Lord of the Rings than Tolkien's 'original' dwarves, including a broad Scottish-style brogue which is nowhere in evidence from the way their dialogue is written.
* The Lord of the Rings that could be performed live by the right kinds of gymnasts, circus performers, or classic vaudeville stuntmen.
* The Lord of the Rings that make up the usual mookdom. They also subverted this in the extended edition, when Faramir looks at the body of a fallen Haradrim (with his young, handsome face exposed) and comments on what circumstances would have led him from his home and family to die violently in a foreign country. In the book, this

was an internal musing by Sam.
* The Lord of the Rings) that the War of the Ring ended about 6000 years ago. This letter was written in 1958, putting the fall of Barad-dûr around 4042 BCE.
* The Lord of the Rings that Tolkien knew. Which makes Sam Frodo's bodyguard.
* The Lord of the Rings: The army attacking Minas Tirith uses a battering ram called Grond against its gates.
* The Lord of the Rings, the bearers of the Elven Rings are terrified of acquiring a Super-Powered Evil Side should they ever come into possession of the One Ring. The One Ring would give them far greater powers than the ones they already have, but would simultaneously also corrupt any achievements that the Ring had made possible, no matter how benign their original intentions were.
* The Lord of the Rings. The books were first published in 1954 and were rather obscure for their first decade of existence.
* The Lord of the Rings, the Dark Lord Sauron is the most powerful and evil entity in the Third Age of the world, casting a shadow over all the lands his armies corrupt and raze.
* The Lord of the Rings, the Dead Marshes feature the usual treacherous footing, constant fog, and corpse candles. There were also horrible, pallid faces floating just beneath the water's surface. Looking at the faces too closely would cause you to become entranced and fall into the water.
* The Lord of the Rings, the Dead Men of Dunharrow are cursed to an undead life until they have fulfilled their oath to aid Gondor's king in battle.
* The Lord of the Rings. The director deliberately wanted to emulate a James Bond teaser for the first film, which resulted in an epic battle scene that would be called back to in the climaxes of parts two and three.
* The Lord of the Rings: The Elves view Isildur with this level of disappointment after he refused to destroy the Ring, instead keeping it for himself.
* The Lord of the Rings, the Ents divert a river in order to flood Orthanc. Once this is done, they put it back again.
* The Lord of the Rings: the epic Age-ending War of the Ring lasts about a month from Saruman's first attack on Rohan to the Ring being destroyed at Mount Doom.
* The Lord of the Rings: The Fellowship of the Ring: “PG - battle violence and fantasy horror may not be suitable for under 8’s”
* The Lord of the Rings: The Fellowship of the Ring, after Bilbo Baggins leaves the One Ring behind for Frodo and travels to Rivendell, his Ring-deferred years catch up with him and he becomes quite elderly. (In the book, there are 18 years between Bilbo's departure and our catching up to him at Rivendell; in the film it seems to be a few months.) And then he ages even more dramatically after the Ring is destroyed.
* The Lord of the Rings: The Fellowship of the Ring. After Merry and Pippin set off one of Gandalf's fireworks without his permission, he lifts them up by the pointy tips of their ears and glares down at them like they are misbehaving children.
* The Lord of the Rings: The Fellowship of the Ring, a minor character at Bilbo's farewell party is named Everard Proudfoot. In the books, he is named Odo Proudfoot. (Also in the books, the character named Everard was a Took - and a young hobbit, while Odo is an old hobbit. Everard Took does not appear in the film.)
* The Lord of the Rings: The Fellowship of the Ring and drags Gandalf along with it.
* The Lord of the Rings: The Fellowship of the Ring and give Aragorn a very close fight. The Uruks under his command don't pose half as much of a threat, and the ones that fight at the Hornburg one movie later are largely cut down en masse.
* The Lord of the Rings: The Fellowship of the Ring, Arwen gives the Evenstar to Aragorn on an obviously symbolic bridge.
* The Lord of the Rings: The Fellowship of the Ring." As in the book, the pain that occurs on every anniversary of Weathertop on top of his psychological scars is bad enough that he leaves for the Undying Lands. (The pain from Shelob's sting and his severed finger isn't explicitly mentioned, but it's not discounted either.)
* The Lord of the Rings: The Fellowship of the Ring as Saruman and Gandalf. "You have chosen the way of pain!" indeed. No piece of the scenery is left unchewed.

* The Lord of the Rings: The Fellowship of the Ring, a tale of one habbit's attempt to gather nine people for the wildest party in all of Mildew-Earth, for which he just happens to inherit a free ticket.
* The Lord of the Rings: The Fellowship of the Ring, at the foundation of the Fellowship, Merry and Pippin barge in and vocally and adamantly declare that they are joining the crew. Nobody really objects, and all seems settled, and then Pippin cheerfully asks where exactly they will be heading.
* The Lord of the Rings: The Fellowship of the Ring begins with Galadriel recounting the story of the last war with Sauron, several thousand years prior. We only see the end of the final battle.
* The Lord of the Rings: The Fellowship of the Ring can fill a grown man's stomach for a day. As soon as Legolas leaves:
* The Lord of the Rings: The Fellowship of the Ring catches up to him, Frodo first refuses to look at him and then explicitly commands him to return to shore. Sam ignores him, and Frodo ends up having to save him from drowning. Afterwards, he gratefully accepts that there's no way he's getting rid of him.
* The Lord of the Rings: The Fellowship of the Ring does a four-hobbit version. Of course, it's Sam who's the last stacker. Bonus points for Pippin nearly landing in some dung and Merry breaking his, er, carrot.
* The Lord of the Rings: The Fellowship of the Ring, Frodo and Sam initially think their journey is over after they get the Ring to Rivendell for safekeeping at around halfway through the movie. Unfortunately, Elrond realizes that they cannot keep it there, and Frodo accepts the task of destroying it.
* The Lord of the Rings: The Fellowship of the Ring, Frodo discusses this trope with his fellow hobbits soon after meeting Aragorn as he leads them to Rivendell:
* The Lord of the Rings: The Fellowship of the Ring, Gandalf has a rather snappy reply to Saruman suggesting that they join Sauron:
* The Lord of the Rings: The Fellowship of the Ring. Gandalf is snatched off of the bridge after uttering an audible sigh of relief. (He comes back in the next movie, though.)
* The Lord of the Rings: The Fellowship of the Ring, Gimli declares that he won't be caught easily, because he has "the eyes of a hawk and the ears of a fox." A split second later, he sees elves pointing drawn bows at him less than half a meter away.
* The Lord of the Rings: The Fellowship of the Ring has Gandalf's last words, "Fly, you fools", before he falls to the abyss dragged by the Balrog. The trope is subverted since Gandalf does not die right there and keeps on fighting but his fellowship and the audience doesn't learn that until much later.
* The Lord of the Rings: The Fellowship of the Ring: Hobbits attacking a cave troll should have this effect, but the scene is hardly played for laughs. Most of Gimli's fights would look like this, except that he has an axe.
* The Lord of the Rings: The Fellowship of the Ring Hobbits, or at least Sam, call Humans "Longshanks".
* The Lord of the Rings: The Fellowship of the Ring in the ferry, before Frodo even gets there. Naturally, Frodo has to jump for it— and makes it... just in time. (In the book, it was nowhere this dramatic; the Nazgûl follows them to the river, but is unseen until long after they've pulled off).
* The Lord of the Rings: The Fellowship of the Ring is yelling. And it's because the Ring is deliberately sowing distrust and chaos. But as soon as Frodo, despite being terrified and overwhelmed, declares he will take the Ring to Mordor, the one thing that all these seasoned warriors unanimously agrees upon is that this little brave hobbit must be protected.
* The Lord of the Rings: The Fellowship of the Ring. It's just that he was the member of the Fellowship most susceptible to the Ring's corruption, being the most ambitious and high-minded.
* The Lord of the Rings: The Fellowship of the Ring, landing on Gwaihir, Lord of Eagles.
* The Lord of the Rings: The Fellowship of the Ring makes it clear to the audience (and most of the characters) that something very bad has happened in Moria with

skeletons sprawled on the floor everywhere not far from the entrance. Gimli, however, remains steadfast in his denial until confronted with an actual written account of the bloodbath.
* The Lord of the Rings: The Fellowship of the Ring, Merry and Pippin get the Ash Face treatment after a misfired firework at Bilbo's birthday party.
* The Lord of the Rings: The Fellowship of the Ring of goblins surround the Fellowship, only to immediately scurry off in fear after hearing the roar of the Balrog.
* The Lord of the Rings: The Fellowship of the Ring repeats the example from the original work (as seen in the Literature section): Elrond has a flashback of how Isildur failed to destroy the ring, and looks exactly the same as his current self while witnessing the scene of Isildur's defeat of Sauron, previously seen in the prologue.
* The Lord of the Rings: The Fellowship of the Ring seems to consist of huge empty spaces with free-standing stairs on the edges and straight across. The book has mostly corridors and normal-sized rooms, with a few great halls.
* The Lord of the Rings: The Fellowship of the Ring (see the quotation above).
* The Lord of the Rings: The Fellowship of the Ring shows Frodo a vision of The Shire as an industrial work camp. In the book it turns out she was bang on; in the following movies Saruman gets shanked early and that side of the conflict ends.
* The Lord of the Rings: The Fellowship of the Ring starts with Galadriel giving us a history lesson about Sauron.
* The Lord of the Rings: The Fellowship of the Ring than the fact that he has three arrows sticking out of his chest. Bear in mind that the shafts of these arrows were themselves a full inch in diameter.
* The Lord of the Rings: The Fellowship of the Ring. The creator of the website showing the botched translation baffled over what the double negative meant before promptly giving up.
* The Lord of the Rings: The Fellowship of the Ring, The Fellowships must traverse a narrow ledge at The Pass of Caradhras through the snow, even as Saruman tries to bring them down with his foul chanting. They eventually decide it's too dangerous and take the route through Moria.
* The Lord of the Rings: The Fellowship of the Ring. The Fellowship tries to go around Moria via a mountain pass, but Saruman awakens the mountain of Caradhras, causing an avalanche of rocks and snow that blocks their way, causing our heroes to have to backtrack and go through Moria anyway.
* The Lord of the Rings: The Fellowship of the Ring: The flash flood that Arwen summons to wash away the Nazgûl pursuing Frodo and the Ring is represented by a herd of watery horses charing down the river and sweeping the Nazgûl away, in a rare heroic version of this trope.
* The Lord of the Rings: The Fellowship of the Ring the river, allowing the waters to overtake them.
* The Lord of the Rings: The Fellowship of the Ring: The Watcher in the Water after it goes after the fellowship. We see that it tears down the gates, trapping the fellowship in Moria. It isn't clear if the stones crushed it or if it merely stayed in the lake after trapping the fellowship.
* The Lord of the Rings: The Fellowship of the Ring." This isn't exactly what Tolkien wrote, but it's chillingly effective, and even shows the journal with the final scrawled entry trailing off down the page.
* The Lord of the Rings: The Fellowship of the Ring, this time named onscreen as Lindir ("the singer").
* The Lord of the Rings: The Fellowship of the Ring was no slouch itself, breaking box-office records all over the place and tying for a record-breaking 11 Academy Awards.)
* The Lord of the Rings: The Fellowship of the Ring, when the hobbits are chased by a farmer and his dogs.
* The Lord of the Rings: The Fellowship of the Ring, when the Hobbits are running away from Farmer Maggot.
* The Lord of the Rings: The Fellowship of the Ring when they invade the Prancing

Pony.
* The Lord of the Rings: The Fellowship of the Ring, which (among other things) helps establish his credentials as someone to be reckoned with.
* The Lord of the Rings: The Fellowship of the Ring, while in Moria, the Fellowship all become very unnerved as the Goblins surrounding them flee in fear and the sounds of the Balrog grow louder. The look of terror on Gandalf and Legolas's faces show they both know full well what is coming and it is an enemy beyond any of them.
* The Lord of the Rings: The fellowship spend ages trying to work out how to enter the gates of Moria, until someone suggests taking the instructions literally!
* The Lord of the Rings: the film trilogy depicts Sauron's attempt to conquer the free peoples of Middle-Earth in earnest on two fronts.
* The Lord of the Rings; the game just rewards exploration and offers alternative solutions to many problems. You're even free to go back into the Old Forest the "wrong" way if you want to explore it anyway.
* The Lord of the Rings, the heroes have to face one last battle: a handful of bandits in the Shire. After the climax and death of Sauron, this seems comparatively petty.
* The Lord of the Rings, the hobbits are tied up in Mt. Doom and slowly lowered into the inferno below.
* The Lord of the Rings the hobbits attempted to shorten their walk by cutting across country and ended up miles off course.
* The Lord of the Rings, the hobbits of the Shire mainly remain neutral, and while the Men of Rohan and Gondor are nominally allies, the Rohirrim resent Gondor not aiding them in their recent struggles with Mordor's proxies. Both of them also consider the Wild Men to be subhuman. Defeating Sauron requires all these enmities to be put aside, though the races of Men end up doing the bulk of the fighting (the dwarves fight a parallel engagement at Erebor during the siege of Minas Tirith, and the hobbits battle and defeat Saruman when he takes over the Shire after being cast out of Isengard).
* The Lord of the Rings, their holy light repels creatures of darkness like the Balrog and Shelob.
* The Lord of the Rings: The land of Mordor is the stronghold of Sauron, the major villain of the series. Its sky is filled with gloomy clouds of smoke from Mount Doom, causing it to be as dark as night even during the day...at least in the plateau of Gorgoroth were Barad-Dur and Mount Doom are located. The larger part of Morder, located around the inland sea of Nurnen was an aversion of the trope, since it is described as a fertile region farmed by Sauron's slaves to feed his vast armies.
* The Lord of the Rings, the Mouth does not assert this, and Aragorn promptly lops the guy's head off when he's said his piece.
* The Lord of the Rings, the newly crowned Aragorn finds a sapling of the White Tree way up in the moutains; the line of White Trees goes back to his people's ancestral home, and ultimately to Eressëa accross the Western Sea. Their flourishing has always been connected to the prosperity of realm and kingship. The sapling is then relocated to the traditional spot in the citadel's courtyard, while its dead predecessor is laid to rest in the tomb of the kings.
* The Lord of the Rings, then his father chases him naked to get him to take a bath.
* The Lord of the Rings, the Númenóreans, or Men of the West, had extremely long life-spans granted to them when they were given Númenor. Aragorn lived to 210, and the fact that most men of Númenórean descent had much shorter lives (partly resulting from Gondor interbreeding with non-Dunedain humans) was mentioned as a sign of the sorry state the world was in.
* The Lord of the Rings: The Numenoreans have the "ranga," which is roughly equivalent to a meter (approximately 38 inches). Two rangar makes an informal unit of measurement called "man-high," the height of the average Dunedain male (they were pretty tall).
* The Lord of the Rings: The One Ring can actually be reckoned as one. Gandalf states as much when he says the Ring (making the bearer invisible) serves as this,

because the bearer then is carried into the realm of the unseen, although without taking the bearer anywhere physically. The "unseen" realm is juxtaposed right on top of the regular world. Frodo, while wounded by the Morgul knife, is able to see both worlds.
* The Lord of the Rings, the One Ring has this effect on its bearers, to the point that few will give it up willingly. Most notably, Bilbo Baggins has to be prompted into giving it up when Gandalf tells him, "The Ring is still in your pocket."
* The Lord of the Rings. The only way they can be killed is if the One Ring is destroyed.
* The Lord of the Rings, the practice of making magic rings was once common, but stopped when it was discovered that Sauron had made a Master Ring that controlled the rest. Since then, most have been destroyed or lost, save for the nine rings that empower the Ringwraiths, and the three Elven rings that were made without Sauron's knowledge and that he can't directly influence.
* The Lord of the Rings, the Rangers of Ithilien use bird calls to communicate with each other without breaking cover. In the film, Gollum recognizes their calls as fake and hides himself, while Frodo is suspicious but doesn't catch on in time.
* The Lord of the Rings, there are hints of adventures that the other members of the Fellowship had before meeting the hobbits at Rivendell, such as Aragorn's capture of Gollum, or Gandalf's escape from the Ringwraiths. At one point, Sam wonders if Gollum thinks he's the hero of his own story.
* The Lord of the Rings. There are quite a few irredeemably evil entities attempting to oppress every other living entity, and most of them succeed for some period of time; so there's always a host of brave and wise elves, or outnumbered but courageous humans, or tough-as-nails dwarves, or determined hobbits, or powerful wizards, or even incredibly powerful godlike entities from across the sea preparing to come save the day. A few characters make speeches on hope which get everyone else back on their feet.
* The Lord of the Rings. There are two Orc factions present, and they start fighting over where to take the prisoners... one dead Orc falls on Pippin with his sword in convenient reach of the hobbit's bonds.
* The Lord of the Rings. There's Haldir's Elves at Helm's Deep; Faramir's company in both the defeats at Osgiliath; most of Minas Tirith's guard; and most of the Rohirrim when going up against the Mûmakil.
* The Lord of the Rings: The Return of the King, after getting his hands on the Isengard palantir and facing down Sauron.
* The Lord of the Rings: The Return of the King after he commands Pippin to sing him a song.
* The Lord of the Rings: The Return of the King, after securing Minas Tirith at heavy cost Aragorn and company debate how best to aid Frodo's quest with their battered forces. Aragorn suddenly suggests marching directly on the Black Gate of Mordor (where they'll be outnumbered more than 10 to 1), causing Gimli to cough up and choke on the smoke from his pipe.
* The Lord of the Rings: The Return of the King and the Rohirrim coming to Gondor's aid.
* The Lord of the Rings: The Return of the King and they haven't gotten any better. But Aragorn, as Isildur's descendant, is the only one who can release them from their eternal torment.
* The Lord of the Rings: The Return of the King, Aragorn adjusts Éowyn's covers shortly before she wakes up from a nightmare.
* The Lord of the Rings: The Return of the King, Aragorn gets into a Palantír staring match with Sauron, who shows him a taunting vision of a dying/dead Arwen. The Evenstar pendant she gifted him with falls to the floor and shatters very prettily and dramatically into glittering bits, though he's later seen wearing it, so it was apparently a hallucination. The shot of the pendant shattering is shown before this scene, divorced from context, throughout the trilogy; it symbolises Arwen's dependence on Aragorn's victory to survive.
* The Lord of the Rings: The Return of the King Aragorn gives this speech to Sauron through the Palantír, setting himself up as bait in the hope that Sauron's

distraction will allow Frodo to complete his mission.
* The Lord of the Rings: The Return of the King, as Sauron's army prepares to use the battering ram Grond to break the gates of Minas Tirith, a strong drum-beat underlies their war chant.
* The Lord of the Rings: The Return of the King, as the Rohirrim remember their fallen brethren after the Battle of Helm's Deep.
* The Lord of the Rings: The Return of the King: "Certainty of death. Small chance of success. What are we waiting for?"
* The Lord of the Rings: The Return of the King, Denethor gets a moment of clarity when he sees Faramir smile at being called his son just before he catches fire.
* The Lord of the Rings: The Return of the King, Denethor tries to burn himself alive on the not quite dead Faramir's funerary pyre. He then does the "Stop, Drop and Roll" trick, just not in the right order. It was more like Drop (off a cliff), Roll and Stop.
* The Lord of the Rings: The Return of the King: Faramir is the only soldier who doesn't die during the suicidal cavalry charge to reclaim Osgiliath, although he's severely injured and is unconscious.
* The Lord of the Rings: The Return of the King film and the making of featurettes for all three films, capping it off with the television premiere of the second film.
* The Lord of the Rings: The Return of the King, Gollum pulls an unusual villainous rescue, where he saves Frodo from the manipulative powers of The One Ring. Just as Frodo is about to give in to the ring's influence, Gollum, motivated solely by his desire to take the ring for himself, appears and forcefully removes the ring from Frodo's hand. As the two of them fight over the ring, Gollum tumbles into the lava below with the ring in hand, destroying the ring and saving the world.
* The Lord of the Rings: The Return of the King had Orcs making an amphibious landing at Osgiliath using barges that looked like medieval versions of the D-Day landing craft.
* The Lord of the Rings: The Return of the King has a suicide mission to retake Osgiliath. In the Book it happens differently.
* The Lord of the Rings: The Return of the King has the hobbits return to the Shire and share a drink at their local watering hole, looking completely alienated and distanced from the other hobbits. Sam more-or-less acclimatizes and ends up happily married with kids, but Frodo, in particular, is never quite the same.
* The Lord of the Rings: The Return of the King he's been wearing for the whole trilogy for some kingly armor and a long, black-and-red cape.
* The Lord of the Rings: The Return of the King. In the books, he is merely sent off in a rage; in the theatrical cut, the negotiation does not appear at all.
* The Lord of the Rings: The Return of the King in the book, which is why it basically boils down to "let's at least try to die heroically".
* The Lord of the Rings: The Return of the King: In the extended edition, the Mouth of Sauron wears a rather painful-looking helmet that covers most of his face except his mouth, which is also digitally enlarged to make it extra unsettling..
* The Lord of the Rings: The Return of the King: It's implied Gorbag has witnessed Shelob preying on his comrades, yet sports a wicked grin as he describes how she prefers to feed. Further evidenced when he decides to spitefully "bleed" Frodo after the skirmish at Cirith Ungol.
* The Lord of the Rings: The Return of the King, it's still a good idea to act with more tact than the Mouth of Sauron has been.
* The Lord of the Rings: The Return of the King leaves out Saruman and Gríma's appearance, leaving them effectively imprisoned in Orthanc. The extended edition restores the scene, in which Gríma kills Saruman before being killed by Legolas. Gothmog's death during the Battle of the Pelennor Fields is also omitted from the theatrical cut; he's last seen backing away from the Rohirrim charge.
* The Lord of the Rings: The Return of the King. Less than a minute later, he falls to his death into the fires of Mount Doom.
* The Lord of the Rings: The Return of the King licensed game: When the oliphants

show up, Gimli quips, "I don't have an axe big enough for this one."
* The Lord of the Rings: The Return of the King, Meriadoc (Merry) is told by Théoden that he'll have to stay behind at the camp rather than participate in the battle at Minas Tirith, despite his protests. He ends up riding to the battle with Éowyn, who herself was forbidden to ride into the battle and does so by wearing a helmet with a face mask.
* The Lord of the Rings: The Return of the King: Merry and Eowyn both want to join the battle of Minas Tirith but have to sneak in with the rest of the Rohirrim, since them joining the fight is met with disapproval from the others due to being a hobbit and a woman, respectively.
* The Lord of the Rings: The Return of the King reacted, from his time in the Special Forces during WWII. Make of that what you will.
* The Lord of the Rings: The Return of the King, Sam can only lash out at Gollum's false accusations. It doesn't help (though it's actually the Ring making Frodo be more sympathetic to Gollum).
* The Lord of the Rings: The Return of the King, Shelob captures Frodo by envenomating him, then catching him and beginning to web him up in one of the most chilling scenes of the whole trilogy. Luckily for him (and the world in general), Sam arrived just at that moment.
* The Lord of the Rings: The Return of the King spent in humble wonder of their essence and unabashed longing for a view of the unearthly and beautiful land.
* The Lord of the Rings: The Return of the King's (Sam) daughter and Sarah McLeod's (Rosie) baby daughter.
* The Lord of the Rings: The Return of the King: Struggling with an invisible Frodo for the One Ring, Gollum bites his index and cut it with his teeth, leaving Frodo with a bloody, shortened finger.
* The Lord of the Rings: The Return of the King that still hasn't been released.
* The Lord of the Rings: The Return of the King: The Mouth of Sauron is a man who — as his moniker suggests — serves as the mouthpiece for the Dark Lord Sauron, confronting and being killed by Aragorn before the final battle in the extended edition of the movie. As part of his grotesque appearance, his lips have been cut off to reveal yellowed teeth that are far too long and look on the verge of rotting out of his head.
* The Lord of the Rings: The Return of the King. The original idea was to have the eruption cause the destruction of Barad-dûr, but that was dropped. In the subsequent Coronation scene in Minas Tirith, the volcanic cloud over Mordor is gone, implying that Mount Doom is now extinct.
* The Lord of the Rings: The Return of the King: the Ringbearers Frodo and Bilbo, together with Gandalf and the other bearers of the Elven Rings, take a ship from the Grey Havens to Valinor, leaving behind a world which they saved. The last Ringbearer, Sam, also departs 63 years later.
* The Lord of the Rings: The Return of the King: The source of the page quote. Steward Denethor feels this way regarding the death of his eldest and favorite son Boromir, wishing that his younger son Faramir had died instead. While the novel largely leaves this as implied, the movie makes it explicit; Faramir states what he believes his father is thinking (after a scene in the Extended Edition where the Steward berates him and compares him negatively to his brother), and Denethor openly confirms it. Subverted in that, when Faramir returns from the ill-fated charge near death, Denethor loses it completely and tries to burn himself and Faramir alive.
* The Lord of the Rings: The Return of the King this, explaining that there were different rooms for each bone, and if Aragon, Legolas, and Gimli had been in a different part of the cave they would have been buried under a pile of femurs, or kneecaps, or something.
* The Lord of the Rings: The Return of the King. This was added in the movie, as the result from the books (several hours of orcs fleeing, surrendering, killing themselves, or performing hopeless stands) doesn't show well in cinema.
* The Lord of the Rings: The Return of the King thrust of the entire war. Thankfully this was fixed a bit in the Extended edition of ROTK, which has more

time to show the tide of battle see-sawing back and forth as each side makes successful counter-attacks - thus adding in a Pillow to the otherwise Curb Stomp battle. Case in point, an Extended edition scene shows the Orcs' first attempt to use a regular battering ram against the city gates, which gets stopped cold with heavy losses by companies of Gondorian archers on the walls. The Orcs then have to regroup and bring up the super-battering ram known as Grond later that night.
* The Lord of the Rings: The Return of the King were inspired by aspiring filmmaker and director Cameron Duncan, who had become friends with Peter Jackson and Fran Walsh and filmed an organ donation commercial for them. When the song received the Golden Globe for Best Original Song, Walsh dedicated the award to him; Duncan died of cancer at the age of 17, and some of his work can be seen on the extended editions of the LOTR DVDs.
* The Lord of the Rings: The Return of the King, when Denethor speaks with his surviving son, Faramir.
* The Lord of the Rings: The Return of the King when Frodo and Sam are following Gollum to Shelob's lair.
* The Lord of the Rings: The Return of the King. Which, according to Gimli, still only counts as one.
* The Lord of the Rings: The Return of the King with blades attached to their long tusks. They swath large amounts of enemies in a single swing.
* The Lord of the Rings: The Return of the King), yet the effect is undiminished.
* The Lord of the Rings: The Riders of Rohan would appear to have this down to an art. They pull it off twice and, like any good Cavalry unit, know to time their arrival for the most dramatic moment. In the battle of the Hornburg, Gandalf and Erkenbrand lead a charge of Rohirrim infantry to aid the army riding out from the besieged citadel. In the siege of Minas Tirith the Rohirrim arrive just as the main gate to the city has fallen.
* The Lord of the Rings: The Rohirrim are a society of horse-breeders and cavalrymen inspired by the Anglo-Saxons. Faramir points out that while they are brave and loyal, they also love war as an end of itself, and laments that his own people, the Gondorians, have grown more like them after long association and alliance.
* The Lord of the Rings - the "Scouring of the Shire", where the pacifistic hobbits, previously subdued by the barrel-scrapings of Saruman's armies, are roused to fight by the return of the four adventurers of the Ring. Becoming an efficient guerilla army, they destroy Saruman's mooks and effectively become their own Rangers, now the original protectors of the Shire have moved to Minas Tirith.
* The Lord of the Rings the skirmish on Amon Hen and accompanies Aragorn, Gimli and Legolas throughout Rohan, Helm's Deep and eventually returns home to Minas Tirith. Then Théoden can survive the battle of Minas Tirith and will continue leading Rohan's army.
* The Lord of the Rings, the soldiers of the hosts of Minas Tirith in Gondor salute by holding their right hand in a fist over their heart with the enclosed palm facing inwards. This is often accompanied by a half bow or a tip of the head forward. In the book, they put both hands on their chest and bow their heads.
* The Lord of the Rings, The southernmost land that plays a major role in the story, Haradwaith, is a hot desert, and the wastes at the northern edge of the map are the coolest.
* The Lord of the Rings: The Third Age and the blasty, buffing dwarf. On the other team you have the rogue with no armor and half as many HP as everyone else, the Ranger who does piercing damage which made him useful against goblins and no one else, and the guy with the spear who actually gives enemies Mana when he hits them and has a few permanent buffs that are usually dispelled by enemy casters in the first round. Also, since the latter three are so lame, you probably won't use them any longer that you have to, so they're a good five levels behind everyone else, too.
* The Lord of the Rings: The Third Age: The GameCube version is on two discs.
* The Lord of the Rings the torments might be rather different. It is noticeable Elrond was not in much of a hurry to get his wife back.

* The Lord of the Rings. The translator says he signed up at a forum to discuss the translation, but he was quickly flamed by people who argued he had obviously no idea how the translator thought!
* The Lord of the Rings: The Two Towers, after the Ents are awakened and attack Saruman's fortress of Orthanc, they lay waste to his Uruk-Hai army. The Uruk-Hai do, however, manage to kill a couple Ents by pulling them over with hooks and chains. They also set one on fire, but he's saved by a well timed dam break and flood.
* The Lord of the Rings: The Two Towers, Aragorn does this when Gimli asks him to toss him to the stone bridge leading to the gate of Helm's Deep, claiming that he "cannot jump the distance".
* The Lord of the Rings: The Two Towers, Aragorn is separated from the Rohirrim on the way to Helm's Deep, and is presumed dead. On his weary way back he encounters Saruman's Uruk-Hai army, and must quickly ride to Helm's Deep and warn them of just how large the opposing force actually is.
* The Lord of the Rings: The Two Towers as well as Sauron's soldiers leaving Minas Morgul.
* The Lord of the Rings: The Two Towers, by time the Entmoot finishes saying "good morning" to one another, night has fallen — which Merry lampshades. (The Ents aren't known for doing anything quickly.)
* The Lord of the Rings: The Two Towers during the Battle of Helm's Deep. Aragorn pushes several ladders back from the lower wall of the fortress on which he's doing his best to keep the Uruk-hai, and later on the main bastion Legolas shoots the rope that's being used to raise a ladder with dozens of Uruks already on it, and it falls back onto dozens more Uruks on the ground.
* The Lord of the Rings: The Two Towers during the fight with the warg-riding orcs.
* The Lord of the Rings: The Two Towers features a scene that was not in the book where Faramir captures Frodo and Sam and takes them to Osgiliath with him. While there, Sam looks back on their journey and says "This is all wrong. By rights we shouldn't even be here."
* The Lord of the Rings: The Two Towers. For reference, if a Balrog has no terminal velocity, that would mean they fell roughly 24 km and hit the water at Mach 2.
* The Lord of the Rings: The Two Towers, Gimli tracks the hobbits in Fangorn by following the trail of blood left by the orc chasing them.
* The Lord of the Rings: The Two Towers, Grima Wormtongue accuses Eomer of this for advocating that Rohan go to war against Saruman and uses it as an excuse to exile him. This is after Eomer turns up with hard evidence that Saruman struck first, namely orc armor painted with Saruman's insignia. This is prevented from being a Wall Banger because Saruman is controlling Theoden and the actual guards have been replaced with a bunch of thugs.
* The Lord of the Rings: The Two Towers in a manner very reminiscent of an exorcism. Gandalf primarily uses his power as one of the Maiar to do the deed instead of calling upon any higher power, though.
* The Lord of the Rings: The Two Towers in which he objected to being thrown by Legolas). He asks Aragorn not to tell Legolas. Aragorn promises not to say a word.
* The Lord of the Rings: The Two Towers, Merry and Pippin climb a tree to escape a pursuing orc when it grabs Merry's foot and wrenches him to the ground. Pippin lets out a panicked scream... and the tree he's clinging to opens a pair of eyes.
* The Lord of the Rings: The Two Towers movie shows Faramir's troops brutalizing Gollum in hope of getting him to talk. This scene was cut for the theatrical version.
* The Lord of the Rings: The Two Towers. Needing to give a gate some time to be repaired, Aragorn and Gimli did a flying leap onto the ramp and proceeded to fight off an entire legion of Uruk-hai. One of the best sequences of many impressive ones in the trilogy.
* The Lord of the Rings: The Two Towers no dwarf women and that dwarves simply spring out of holes in the ground, which is of course ridiculous." (Aragorn adds to this, "It's the beards.")
* The Lord of the Rings: The Two Towers. On one hand, the charge out of Helms Deep

at the end, with the cavalry held close together in tight formation and essentially being used to force the infantry back, before eventually getting bogged down and into trouble when the orcs numbers and discipline begin to show, is fairly accurate. On the other hand, Gandalfs relief charge would probably have ended up a) making a sad retreat after dancing around a pikeline for a few hours or b) completely butchered. Gandalfs charge had decidedly abnormal help in this regard however; Gandalf used the Uruk-Hais aversion to light against them. On the other hand, cavalry are also not good for charging over rough terrain; charging down a massive rocky hill like that would have risked several horses stumbling and breaking up the whole charge; horses are best suited to the plains, which, to be fair, constituted the majority of Rohan. Gandalf may simply not have had much of a choice of where to charge from.
* The Lord of the Rings: The Two Towers, Pippin does one of these when he realizes that the tree he is climbing is, in fact, sapient.
* The Lord of the Rings: The Two Towers, Pippin suggests this as reason for Treebeard to take him and Merry back towards Isengard; of course, he had other reasons for wanting Treebeard to see Isengard close-up.
* The Lord of the Rings: The Two Towers realized too late that he needed to show Gollum's reaction to Sam's "because we all fight for something" Aesop, and having no time left to animate it, they took two shots from previous scenes and replaced the background.
* The Lord of the Rings: The Two Towers, Sam speculates on what his and Frodo's adventures would look like in songs and tales — Frodo heartwarmingly insists that Sam and his bravery would be of as much note as him.
* The Lord of the Rings: The Two Towers, Saruman and Wormtongue discuss Helm's Deep, saying it would take tens of thousands of soldiers to make it fall. Wormtongue argues that there is no such force just as the two step out into the balcony of Isengard, where Saruman addresses his newly formed massive army of Uruks.
* The Lord of the Rings: The Two Towers Saruman speaks to the protagonists from the top of Orthanc and no similar effect is used. Justified as Suruman is literally a wizard and amplifying your voice at will is shown to be a wizard ability and is used at other points in the films.
* The Lord of the Rings: The Two Towers, so the references are merely demoted to "shout-outs to the source".
* The Lord of the Rings: The Two Towers, the orc grabs his ankle and drags him down. Merry is only saved when the "tree" reveals itself to be the Ent Treebeard, who promptly crushes Grishnákh under his foot.
* The Lord of the Rings: The Two Towers, the orc pack who take Merry and Pippin to Isengard are starving, and one of them attempts to eat the hobbits. Under strict orders to bring any hobbit back in one piece, the leader of the orc pack kills one of his subordinates instead, who is then devoured by his hungry comrades.
* The Lord of the Rings: The Two Towers, the Orcs and Uruk-hai carrying Merry and Pippin are attacked by the Riders of Rohan, allowing the hobbits to crawl to a nearby axe and cut the ropes binding their hands.
* The Lord of the Rings: The Two Towers, the "Samwise the Brave" scene includes Frodo reassuring Sam that he is an important part of the story.
* The Lord of the Rings: The Two Towers, this is how Hama dies. He and Gamling are riding along, minding their own business, then their horses start freaking out and then, suddenly, warg attack!
* The Lord of the Rings: The Two Towers, two characters, Faramir and one of his men, look over a map showing the cities of Middle Earth and who is attacking and from where. This is done clearly for the purposes of clarifying it to the audience.
* The Lord of the Rings: The Two Towers, weapons and armor are handed out to both old men and boys that are barely twelve, as they prepare to defend the fortress against an army of thousands of Uruk-Hai.
* The Lord of the Rings: The Two Towers when Faramir's men whip out a handy map of Middle Earth, and explain everything that's happening.
* The Lord of the Rings: The Two Towers, when Frodo encounters one of the ghosts of

Dead Marches. It appears like a rotting corpse of an elf warrior just few inches underwater, until it opens its milky white eyes, causing Frodo to freeze still and fall into the water.
* The Lord of the Rings: The Two Towers where Gandalf calls for his horse, and Shadowfax comes galloping across the fields and straight up to his Master, was achieved on the first take.
* The Lord of the Rings: The Two Towers. While the book isn't as specific about the details of the fortifications and can be given the benefit of the doubt in some respects, the scale and form of the fortifications are more clear in the movie and therefore more open to criticism.
* The Lord of the Rings: The Valley of Helm's Deep is protected by the mighty tower called the Hornburg perched on a great heel of rock, and the Deeping Wall running from the Hornburg to the southern cliff blocks the way into the gorge. The Deeping Wall is twenty feet high, so smooth on the outside that it offers no foothold, and so thick that four men can walk abreast at its top. Unfortunately, there are some problems:
* The Lord of the Rings. They are also the prototypes for D&D werebears, whose alignment is lawful good.
* The Lord of the Rings; they're actually Maiar (powerful spirits older than Middle-earth itself) assuming the form of wizened old men, and thus are as formidable physically as they are magically (with Gandalf in particular being a pretty good swordsman).
* The Lord of the Rings. They're good guys, but you definitely don't want to be on their bad side. The Huorns (trees that have become a bit ent-like, or ents that have become more tree-like, it seems to work both ways) are possibly even more dangerous, since they're less alert and easier to anger. And of course there's Old Man Willow.
* The Lord of the Rings thick and didn't get sustenance because of it. Oh, and the web was hard enough to almost twist Sam's sword out of his hand after hitting it.
* The Lord of the Rings. This ends up as just another way him and Sam butt heads, particularly when Sam turns a rabbit he caught into a stew.
* The Lord of the Rings this happens several times in the backstory as well as in the main narrative:
* The Lord of the Rings, this is what would become of Galadriel if she had succumbed to the Ring and claimed it for her own.
* The Lord of the Rings, this occurs to Gandalf fairly often, as per the Appendixes.
* The Lord of the Rings. This works on a broadly metaphorical level; they provide lots of information, but seldom in a context that leads the user to a useful conclusion.
* The Lord of the Rings Though their dislike of men is justified, considering the last man who had the ring kept it for himself until it killed him.
* The Lord of the Rings thought they were playing an actual game. They proceeded to make up rules as they went along just to mess with him. It was over a year before he realized that it wasn't a real thing.
* The Lord of the Rings throughout. He's so in over his head it's absurd... which is what makes his pluck all the more moving. It's just a good job Sam went with him...
* The Lord of the Rings throws you right into the fray after the lengthy unskippable intro.
* The Lord of the Rings) to $20~30 PER BOOK. As with most major movie merchandising, every older print of the book suddenly disappeared, only to be replaced with new editions with oversized, tie-in covers....and that's only the LotR books themselves. Tolkien's books had always had a great deal of secondary literature (books about the books), even a few written by J.R.R. or Christopher Tolkien, but after the movies came out? Merchandising mayhem.
* The Lord of the Rings to be almost active rather than passive and the characters' reactions are adjusted accordingly.
* The Lord of the Rings together with Legolas, or to give her something to spunkily

run away from... straight into Legolas' arms.
* The Lord of the Rings. Tolkien, a devote Catholic, struggled deeply with the idea of a race that was purely evil, even taking into account the fact that they were corrupted not created. At the Council of Elrond, it is mentioned that ALL races (save the Elves) were found on both sides of the conflict, meaning that there must have been at least some orcs and trolls fighting against Sauron.
* The Lord of the Rings: Tolkien got tired of people viewing the One Ring as an allegory for nuclear weapons. He was fond of noting that if the Ring was an allegory for the Bomb, Saruman wouldn't have tried to steal but, instead would have tried to develop his own, and the Alliance would have used the Ring against Sauron. Although, strictly speaking, Saruman DID create his own Ring, although it was never used as more than an indication of how mad he had become.
* The Lord of the Rings, Tolkien later stated that these Nordic names are actually just "outer" names used when interacting with non-Dwarves, with their real Khuzdul names being more along the lines of something like "Azaghâl" or "Mîm".
* The Lord of the Rings to mobilize at last and tear his fortress apart stone by stone.
* The Lord of the Rings to put most of his strength into the One Ring in order for it to be powerful enough to control the others, especially the three Elven rings.
* The Lord of the Rings to Rohan (for Merry) and Gondor (for Pippin), but take actions that end up being very important.
* The Lord of the Rings, Treebeard tells Merry and Pippin that there have not been any Entings (that is Ent children) for a long time because they lost the Entwives. Pippin immediately asks how they all died.
* The Lord of the Rings tribesman who leads the Rohirrim around an ambush so they can arrive at the Battle of the Pelennor Fields in time and at full strength.
* The Lord of the Rings trilogies both use uniquely designed armour so that combatants are easy to tell apart in a fight. Naturalistic Art Nouveau shapes were used for elves, sharp angles and geometric designs represented the dwarves, Nordic and Viking-like designs were attributed to the Rohan (going with Tolkien's idea of the Rohirrim as, essentially, Horse Vikings), and Roman-esque armour with seabird motifs were used by Gondor (going with the striking parallels between Gondor and the Byzantine Empire, being a rump of a once-great empire, but one which retained considerable naval skill). For the villains, dark armour with horns and fur and a general slapped-on look were used for orcs, and Uruk-hai and Sauron's "Uber Orcs" had armour was still crude but felt more solid to show that they weren't messing around.
* The Lord of the Rings trilogies were filmed almost entirely in New Zealand, a country which apparently is the closest they could find to limitless untouched landscape, save for the scenes that required a green screen. According to the DVD extras, about the only location they couldn't find was the rolling green prairies of Rohan — a slightly less-mountainous area was used instead.
* The Lord of the Rings trilogy fights with his ancestral sword of kings and kicks ass.
* The Lord of the Rings trilogy. The extended editions add about 45 minutes to each movie. It's mostly embellishment on the setting and characters, which would've slowed down the pacing in theatres, but ends up perfect for hardcore LOTR fans.
* The Lord of the Rings, unlike ordinary Orcs. They were also stronger and overall superior.
* The Lord of the Rings, used by Saruman as his eyes and ears to track down the Fellowship in the high mountains. In both portrayals, Aragorn realises the danger of the flocking crows and has the fellowship stamp out fires and go to cover. (In the film, the crebain detect the fellowship and give Saruman the information he needs to turn the mountain passes against them).
* The Lord of the Rings used to divert Sauron's attention so that Frodo can do his job.
* The Lord of the Rings uses the trope as well: "It would seem like wisdom but for the warning in my heart."
* The Lord of the Rings usually requires each player to form a team of three hero

characters and base their deck around those three. However, players can choose to use a Contract card called "The Grey Wanderer", which restricts them to only one hero, but also provides a variety of bonuses to help that player get through a game that is otherwise designed for three.
* The Lord of the Rings. Viggo Mortensen (playing Aragorn) and the stuntmen who were roped into playing Orcs suffered quite a few on-set injuries.
* The Lord of the Rings, virtually anyone equivalent to a general (Éomer, Théoden, and eventually Aragorn) is only too glad to be right in the thick of it with their men.
* The Lord of the Rings was expected to lose money, but was approved for publication anyway. The final decision came by telegram: "If you believe it is a work of genius then you may lose a thousand pounds."
* The Lord of the Rings was helpful in doing all the required exposition to make the story make sense without seeming contrived.
* The Lord of the Rings was motion captured in the cheapest, most primitive way imaginable. For example, Gandalf was 'played' by one of the developers wearing a bathrobe, sombrero, and Santa Claus beard.
* The Lord of the Rings was only described second hand in the book, and the centerpiece fight in Balin's tomb was about a paragraph long. Similarly, the climax of the first book was focused more on Frodo and Sam splitting from the rest, with most of the Uruk-Hai attack (with Boromir's death and Merry and Pippin being taken away) again being described after the fact. The following two books were much more action oriented than the first, which resulted in fewer expansions.
* The Lord of the Rings Well-portrayed in the film adaptation as well - the hobbits (and the audience) suddenly realize the sort of nightmare they're up against.
* The Lord of the Rings were a result of Sauron's attempt at breeding orcs that would be more resilient and better suited to function in an organized society.
* The Lord of the Rings. When Frodo and company first encounter him in Bree, he is described as a gaunt-looking man, due to the long and hard years he has endured as a hunter and warrior in the wilds of Middle-Earth. When they reach Rivendell, he is noted to look much more noble and regal after cleaning himself up and wearing finer clothing. There are many points in the story (especially after receiving his family regalia in Lothlórien) where he is described as suddenly seeming taller and fairer and more obviously the heir of Númenórean royalty in the eyes of his companions.
* The Lord of the Rings, when Frodo and Sam spend some time discussing whether or not their adventure would make a good story in the future, and who would be people's favourite character. More importantly, they wonder if it has a happy ending.
* The Lord of the Rings, when Sam is caught eavesdropping on Frodo and Gandalf's conversation about the One Ring, he begs the wizard not to turn him into "anything unnatural", and Frodo insists it'll be a warty toad if Sam doesn't keep his mouth shut. Since it's a fairly low-magic setting, by modern fantasy considerations, it's unlikely that Gandalf could actually do it if he wanted to.
* The Lord of the Rings when she captures him in her lair and paralyzes him with her venom. Sam tears the webbing after rescuing his master, but can't get Frodo to respond, leaving him to think he was too late.
* The Lord of the Rings, when she comments on the Hobbits' tendency to talk about "Elf Magic" while taking Frodo and Sam to look at her mirror. In the Elvish language, their word for magic also means "skill," and for them, making a camoflauge cloak or an incredibly light but strong rope is just something they do; for the Elves, there's nothing supernatural about it.
* The Lord of the Rings, whereas for Sauron it was an end in and of itself.
* The Lord of the Rings, where Denethor is shown as blatantly unfair; in the book, Gandalf at least believes that it is partly that Denethor is still grief-stricken over the death. In the book, it's also heavily implied that a lot of his favoritism comes from Boromir's loyalty — Boromir always puts Gondor's interests first, as Denethor does, while Faramir seems more interested in Gandalf's plan to take care of Middle-Earth as a whole (even if that means causing some serious trouble

for Gondor). Case in point: both brothers are faced with an opportunity to take the Ring by force and use it to defend Gondor. Boromir goes for it; Faramir just gives the hobbits some supplies and lets them go. It should be noted though, that Boromir and Faramir love each other dearly, and Boromir protects Faramir as much as possible and is thoroughly sick of the way their father treats him.
* The Lord of the Rings, which are extremely draining. While most spells observed in the text require no verbal activation, spoken spells are also alluded to by Gandalf in various places.
* The Lord of the Rings, which are set in a vaguely defined mythical past include (relatively uncommon) magic and fantastic creatures.
* The Lord of the Rings which consists of Sam and Frodo singing a song about tales of heroes, with each adding a verse in honor of the other's accomplishments during the quest.
* The Lord of the Rings, which he does. They see how massive and impenetrable the entrance is, and when they are about to make a charge for it anyway, Gollum pulls them back and tells them there is another way in. Sam asks why he didn't mention this before. Well... you didn't ask... (See below under literature for more.)
* The Lord of the Rings (which is Anglo-Saxon and set in Scandinavia), being alien to the modern English culture) and thus, in the context of the fantasy, Middle-earth is supposed to be western Europe as it was in the extremely distant past.
* The Lord of the Rings), which is only odd if you think about how the side with technology is the bad guys, and how long the heroes' journey on foot is.
* The Lord of the Rings (which most people won't even notice unless they've read the books already). The extended version improves things a bit, but not much.
* The Lord of the Rings while Gandalf is off page trying to track down Gollum. Knowing that, one has to wonder if Gollum is that good at hiding, or if Gandalf is that terrible at seeking. There's also a skip of a couple of years between the penultimate and final chapter of the last book.
* The Lord of the Rings while looping those lines sober. That gave the sound editors quite some work.
* The Lord of the Rings, while the others are collections of stories or notes used in writing the different works, some expanding on concepts that Tolkien only glossed over in the final published versions, or providing early or alternate versions that were ultimately abandoned.
* The Lord of the Rings. While they are more vaguely described in the books, here they are portrayed as large, leathery-winged and scaled, with two legs, long necks and blunt, snakelike heads. They are used by the Ringwaiths almost like reconnaissance planes while patrolling the lands around Mordor, but are taken directly into battle at Osgiliath, Minas Tirith and the Black Gate.
* The Lord of the Rings. While this raises the question of how he even knows the difference to begin with, the fact that he immediately spits it out in disgust suggests he's familiar with its repulsive taste. Given that he hacks orcs apart with an axe, it’s perfectly reasonable to assume that he’s been sprayed in the face with orc blood before.
* The Lord of the Rings who are more intelligent and able to operate in sunlight.
* The Lord of the Rings (who have much better equipment and none of the discipline issues) only lose at the exact same tactic at the battle of Helm's Deep due to a probably-supernatural event.
* The Lord of the Rings who is 177 cm and was deliberately filmed at angles that made her seem a lot taller than most of the other characters.
* The Lord of the Rings with eight tusks (four large and four small), and are even bigger than in the books, being roughly fifty to sixty feet at the shoulder. There are also some unnamed rhino-like creatures pulling the siege engines that the orcs bring to the Battle of Minas Tirith.
* The Lord of the Rings with poems and discourses on genealogy and history that don't really have much to do with the main plot other than to provide background and context, and mainly serve to flesh out the world of Middle-Earth. The prologue does nothing but describe in detail the history and culture of Hobbits and the Shire, and can be skipped over without leaving the reader confused in the

slightest. The Appendices are filled with timelines, dates of birth and death of all the Kings of Númenor, Gondor, Arnor, Rohan, and Chieftains of the Dúnedain, a small lesson in the Elven languages, descriptions of the writing systems, and a brief story of the romance between Aragorn and Arwen that wasn't part of the main narrative (this section was mined by Jackson for the film adaptations to flesh out their characters).
* The Lord of the Rings with the Steward of Gondor at a first meeting, and the rumor mill just spun off from there. Meanwhile, Pippin was just talking to the Steward in the same way he talks to everyone, from his neighbors to Gandalf to Orcs.
* The Lord of the Rings wrote a more detailed account of telepathy among Ainur (lesser deities), Elves and to a lesser extent Men in the essay called "Osanwe-kenta."
* The Lord Of The World by Msgr. Robert Hugh Benson shows Western civilization as having turned into a socialist, technologically-advanced society that persecutes those still clinging to religion and individualism, and attempts to stamp out Christianity once and for all.
* The Lord our God does not take 'no' for an answer. Moses' efforts to persuade the Burning Bush to look elsewhere for the savior of the Hebrew people is downright hilarious; 'but nobody will believe me!', 'but I don't speak Hebrew', and so forth.
* The "Lords Declarant" of the Vale of Arryn raise an army and briefly lay siege to the Eyrie in order to remove Lord Petyr Baelish as Lord Protector during heir-apparent Robert Arryn's minority. They formally declare their intentions to their liege, Queen Regent Cersei Lannister; they do not ask for aid, but only for the crown to refrain from interfering. She replies that Baelish is not to be harmed; otherwise, she doesn't seem particularly bothered.
* The Lords of Creation series alter environments on a planetary scale and create interdimensional gateways with ease.
* The Lords of Creation series where it's pointed out that such as system as above wouldn't work, as "the cheaters would win too often."
* The Lords of Creation: the martians are masters of organic technology. Their landships and airships are both grown from living tissue, though they are not sentient. The landships have backup "engines" that are essentially a kind of land-based squid.
* The Lords of Creation: Venusian cave princess Tessa of the Cloud Mountain People knows that Marc Vitrak is attracted to her from his scent. Of course even the fellow members of the Earth expedition can detect this because, as one of them points out, Marc is wearing a loincloth which makes it clear that he's... aroused.
* The Lords Of Discipline, about elite military cadets and racism in their ranks, is set in the Southern US, most of the film was shot in England.
* The Lords of Discipline, including the first black cadet who was enrolled. (In fact, "Carolina Military Institute" is an obvious stand-in for The Citadel, The Military COLLEGE of South Carolina.)
* The Lords of Discipline says that Annie-Kate was based on a real woman with whom he had a romance during his Senior year at The Citadel.
* The Lords of Order and the Lords of Chaos fight an eternal war, with the winning side decided by repeating cycles. They used most of the magic-using heroes and villains as their pawns, and most people believed that Order was good and Chaos was evil, until both sides showed what's
* The Lords of Salem the song on the strange record has this effect on Heidi.
* "the Lord", wasn't the same lord as the one who initially bought Morgana as his property and used her in his sabbats: he was in fact the very slave who helped her to escape and who lived with her for a few years immediately after. And he is the same man who would later usurp the position of lord and order her capture. When he realizes he captured the girl who he wanted to make happy in the first place, he finds himself unable to talk with her, as she doesn't recognize him, her traumatic experiences leading her to jump to the conclusion that he must have been the same person who bought her years ago.
* The Lord Weird Slough Feg have several songs and an entire album based on

* The lore also explains what in the hell they eat to maintain their mass: metal. That is, underground ore, usually. This also explains why they attack things like tanks and settlements: plenty of metal to munch on. It even explains the damaging acid they can spit, as they would need some pretty potent acids to digest metal.
* the lore and knowledge of Men of Letters with the hands-on-experience and survival skills of hunters.
* The lore booklet that came with the first game's manual throws out some solid numbers: it took the original supercarriers 28 years to travel the 60,000 light-year distance from the Koprulu sector to Earth, it takes about a week to go from the Confederacy/Dominion core worlds to the fringe worlds, and it took the zerg Overmind's hive fleets 60 years to get to the Koprulu sector from wherever they were at the time he learned about the terrans. Taking into account the roughly known distance in the former two examples and assuming the Overmind crossed a good chunk of the galaxy's 100,000 light year radius for the latter case, and FTL is consistently placed at around six light-years per day.
* The lore features the Titans, who went around ordering many of the worlds in the Warcraft Universe, specifically those with a World Soul, or nascent Titan. They would leave behind stone races to watch over the planet, though the ones on Azeroth mostly fell to the curse of flesh that turned them into either their modern version (Earthen to Dwarves) or a step before (Iron Vrykul to normal Vrykul, birthing humanity). One of these titans, Sargeras, would eventually become one of the main villains of the series and lead an army of demons to destroy the works of his brethren
* The Lorelei Chronicles, Lorelei douses the twelfth Doctor in chocolate sauce in an attempt to help him ease up and stop overworking himself. She expects it to work because his past incarnations always laughed at her pranks, but this is TWELVE we're talking about.
* The Lorelei Chronicles, the titular character is a heroic example. Whether she's hanging with the Avengers or being the Doctor's companion, you can count on her to use her psychic abilities to "make you sense what [she wants] you to sense" (in "Mischief Loves Company", it's stated that she has powers almost exactly like Loki of Marvel Comics, with the personality to match (minus the evilness)). When she has to, she'll use her powers to help her friends, but she prefers to just play pranks with them. Justified, in that her parents in her universe often have messy fights, so that when she universe hops to escape, she tries to prevent fighting by causing as much laughter as possible. Subverted slightly in that she can only use her power when in other universes.
* The Loreley": Loreley sits at the top of her cliff combing her golden hair (with a golden comb to boot), and this is one of the reasons why the hapless skippers cannot take their eyes off her. Unfortunately, Loreley is not as innocent or kind as she looks, because the ships which shatter on the river below seem not to bother her at all.
* The lore mentions that Buneary can shatter boulders with their ears. Getting into the mechanical side of things, Buneary is the only pokemon that can learn the move Frustration and the only non-legendary pokemon that starts with a friendship level of zero—by implication, they start out trusting
* The Lore of Beasts is the odd one out of the eight; it allows a caster to
* The Lore of Heavens can play a number of different roles depending on context. Off the field of war, it's an
* The Lore of Life is the most diversely elemental of the lores; it combines manipulation of
* The Lore of the Heavens draws from all "celestial" aspects, meaning it mixes
* The Loretta Young Show was based on various fan letters she had received.
* The Loroi of Perrein, who are generally noted to be of medium height and with darker hair and larger ears than others of their kind, are divided between the ghost-pale people of the dense lowland jungles and the very dark-skinned natives of the highlands that reach above the planet's otherwise omnipresent fungal canopy.
* The Los Angeles Clippers are the NBA's perennial whipping boys. Like the aforementioned Mets, the Clippers live in the shadow of their wildly-successful

crosstown rivals, the Los Angeles Lakers.
* The "Los Caquitos" segments on both Chespirito shows have a recurring gag where El Chompiras says or does something stupid, then El Peterete (and later, El Botija) combs El Chompiras' hair for a minute or so, then hits him.
* The Losers (1970), the Devil's Advocates mount machine guns, grenade launchers and armour on their motorcycles before attacking the Viet Cong base.
* The Losers, Aisha escapes through the bathroom window of a hotel room during a gunfight.
* The Losers, bringing it to a halt in the middle of the street. While the armoured car is stopped, they fly over it in a helicopter, lower an electromagnet on to the roof, and then fly off with the truck suspended below them.
* The Losers doing the shooting from his vantage point outside the building.
* The Losers, in both the movie and the comics, though the loyalty is particularly pronounced in the movie.
* The Losers: In the movie, Max is introduced talking to three scientists he wants to build his doomsday weapon. One of them angrily refuses on moral grounds and is thrown off the roof as the other two gape. This is played with though as Max actually only wanted Wade to beat the man up to make him change his mind, but noticing the stunned looks on the faces of the other two scientists, he says that it did serve some purpose. He then tells Wade to throw off a second scientist before the third man stops him and says that they'll do it for enough money and/or to save his colleagues life.
* The Losers: Roque is the resident knife man, first confirmed when, while the others are betting their various souvenir weapons, he continues to bet bigger and bigger knives. It reaches a rather ridiculous zenith when they even task him with cutting loose tied up people he'd rather not merely because he's "the knife guy".
* The Losers. She had three-dozen at one point... until a wild dog ate them all. But then she ate the dog.
* The Losers, the eponymous group steal an entire armoured car to obtain the hard drive it was carrying.
* The Losers, the Losers hijack an armoured car full of cash. They dump gasoline through the ventilator, dousing the guard and the cash. They then open the door and point out to the guard that if he fires, he will set both himself and the cash on fire.
* The Losers, the team has to hack into a hard drive from Goliath International, which makes "pretty much everything."
* The Losers, where Clay and Aiesha retire to Clay's room under the pretext of a traditional bar hook-up. Upon being called out on her hidden motive, a fight ensues that juggles foreplay and firestarting.
* the loss and return of Sam's soul (and in turn, the potential return of his memories of Hell), the civil war in Heaven, Crowley's search for Purgatory, and the coming of the Mother of All to Earth.
* The loss of his wife is what primarily pushes Khan over the edge in
* the loss of their old identity. If you watch the original film with this in mind, it's pretty clear that Vader and Anakin started out as two different people; when recalling Vader's downfall, Obi-Wan refers to him as "a young Jedi named Darth Vader" (implying that he was still called "Darth Vader" when he was still a Jedi), and he later addresses him as "Darth" to his face (implying that "Darth" is actually his first name).
* the loss of the Mars Climate Observatory Orbiter by having one team use metric units and another using American Standard units.
* the loss of two of his fingers really fast. This is because his lines are largely the same whether it happens or not, so he'll be making wry jokes to himself only a minute or two after the injury.
* The lost 2020 edition would have been another trial for Croatia, with Damir Kedžo for this time, holding one at his entry's climax.
* The Lost Age all share the same high agility and psynergy points but bottom of the barrel HP, attack and defense.
* The Lost Age has Jenna and Sheba demanding Piers to tell them his age and they

tease him over it when he refuses. Piers begs Felix to stop the girls from teasing him but Felix says nothing, causing Piers to think Felix is in on the girls' shenanigans.
* The Lost Age maze beneath and inside it, which is broken, frustrating the student priest trying to prove himself to it. Once mended by our heroes, it turns out to be sentient, and quite grateful for their help (to the ire of the new priest).
* The Lost Agent Arc is considered a very problematic part of the canon storyline. Initially well-received as a chance to allow the human characters to shine, the new characters were unconvincing, the new powers introduced were considered confusing, and the arc ended with the Shinigami saving the humans in an extremely rushed wrap-up of the arc. This was predicted by the fandom but still caused huge disappointment. The arc is regarded as nothing more than a poorly designed plot device to give Ichigo back his powers; even the fans that like the arc regard it as a good example of how Kubo starts an arc really well, but cannot sustain the quality to the end.
* The Lost Age, there's a master blacksmith who's too depressed to work (until you bring him a project that gets his interest). His name? Sunshine.
* The Lost Age unlocks the game's Easy mode (you keep all acquired experience) and Hard mode (tougher bosses).
* The Lost and the Damned faction of Chaos is explicitly employed this way, as it is essentially composed of gibbering mutants, demons (who can't be killed, only sent back to the Warp), and human traitor rabble. Generally they run at Imperial forces who waste ammunition gunning them down. More disturbingly they usually do so with a smile on their face.
* The Lost and the Damned get this a lot. At least the Imperial Guard can claim to have the backing of a galaxy-spanning superpower. The Lost and the Damned are just the dregs and scum of the universe, fighting with ramshackle equipment for patrons who would just as soon as use them as
* The Lost and the Damned. Their in-game website notes they were formed by people unsatisfied with a non-segregated society and they contain some subtle and not-so-subtle references to Nazism, such as deriving their name from Nazi scientist Josef Mengele, nicknamed Angel of Death. Amusingly, when you assault their clubhouse, you find them playing hip-hop which is an odd musical choice for a white supremacist gang.
* The Lost and the Rikti are intentionally exposed to a nasty and powerful mutagen causing extreme physical deformations and
* The Lost Bladesman, inevitably features Guan's iconic weapon, the Green Dragon Sabre, which he uses to cleave his way through hordes and hordes of mooks in numerous battle scenes.
* The Lost Books of the Odyssey. himself — and is left, sitting on God's throne, wishing he had never been born.
* The Lost Books of the Odyssey in a matter of months but spins out a far grander tale to get away from the boredom of kingship.
* The Lost Boys calls a vampire's canine daylight guardians the "Hounds of Hell".
* The Lost Boys chanted together "Ru-Fi-O" during a fight between Rufio and Peter Pan to show their support for fellow Lost Boy Rufio. This then gets reversed on Rufio when Peter is able to win over the Lost Boys and they start chanting his name instead. Rufio attempts to counter with his own name but gets drowned out.
* The Lost Boys: David and the Boys taunt Michael until he joins them in dangling beneath a railroad bridge until the strain and vibrations of a passing train cause him to slowly slip with his fingers losing grip causing him to fall.
* The Lost Boys, doesn't speak until the very end, when he bursts out with Star's name in his excitement over having become human again. He does snarl at the Frog brothers prior to this, but it's inarticulate growling, not words.
* The Lost Boys moment, heralded by the car's horn playing "La Cucaracha".
* The Lost Boys movies, the teens at make-out point are the first victims of the titular vampires.
* The Lost Boys, Nanook growls at Michael, after he drank some of the blood-in-a-wine-bottle while hanging out with the vampire hoodlums.

* The Lost Boys rendition sounds eerily like a children's nursery song.
* The Lost Boys, Sam steals his grandfather's precious car in order to engage in some vampire slaying. When next they meet, this exchange occurs.
* The Lost Boys: Santa Carla, California, where the local bullies sleep all day, party all night, never grow old, and never die. The wonderful final line of the film, supplied by Grandpa:
* The Lost Boys seems to be David, a vampire pack leader trying to corrupt the main character into joining him, but it's revealed at the end that he answers to Max, who wants the protagonist's entire family turned.
* The Lost Boys. Teenage vampire hunters, they state "We're dedicated to a higher purpose. We're fighters for truth, justice, and the American way."
* The Lost Boys, the main character shows the usual symptoms: He enjoys very rare meat (I think he drinks a cup of blood from a steak), and has an aversion to sunlight.
* The Lost Boys the vampire gang member Dwayne is killed when he's shot in the head with a holy water-tipped arrow by Michael, it causes him to go flying into an amplifier which electrocutes him and causes his head to explode.
* The Lost Boys, the vampires use their hypnotic powers to either make food look like something disgusting, like maggots instead of rice, or to make actual disgusting things look ordinary, tricking the protagonist into drinking blood by pretending it's wine.
* The Lost Boys, we see Sam taking a bubble bath when his brother Michael slowly comes walking up the stairs. Sam sings to himself completely clueless, but his dog Nanook next to the bathtub hears his brothers footsteps coming up on the other side of the bathroom door. The music doesn't go silent but in fact increases with the tension. Finally Michael stands outside the bathroom door, banging it, turning the knob with the camera focusing in. His brother Sam is now submerged under the water as Michael's confronted by a growling and snarling Nanook. Who then attacks Michael out the door, down the stairs, with the door slamming shut.
* The Lost Boys, when one of the vampires is pushed into a bathtub full of holy water, his blood begins coming out of the pipes, including through the bathroom and kitchen sinks.
* The Lost Boys. When Sam's mother picks up a dropped milk carton the face of Laddie, the youngest vampire, is clearly seen.
* The Lost Boys. When their first encounter with the vampires doesn't go according to plan, Sam and the Frog brothers have to go to Plan B. They don't have a Plan B yet and have only two and a half hours to come up with one.
* The Lost Cat at various times gets turned inside out and loses his skull. Neither fazes him much, probably because he lives in a very surreal world to begin with.
* The Lost Cat, the narrator learns of a sickly man who had his head transplanted to a new body. He believes he has become a monster and goes on a murderous rampage
* The Lost Caverns of Tsojcanth. A fungal cavern has the corpse of an elf that was trapped by Green Slime.
* "The Lost City" includes an Ancient Egyptian-style tomb (not actually from that civilization, though).
* The lost city of Atlantis wasn't sunk or lost: it launched into space and traveled to another Galaxy, eventually settling on a new planet. And
* The Lost City, the few residents of the underground city who aren't drugged out of their minds by the evil priesthood are still convinced there's nothing but desert on the surface, and nothing but unbeatable monsters in the surrounding tunnels.
* The Lost Coast Tapes. While not expressly stated, it's animalistic attributes, such as hooves, and an increased spiritual presence when it's revealed fits the cultural depictions of the wendigo, and it would fit with the references to Native American Mythology that this film ties in with Bigfoot.
* The Lost Colony, a demon warlord formerly known as N'Zall ('Little Horn' in demon language) now insists on being referred to as 'Leon Abbott', after a character in a human storybook he once read.
* The Lost Colony: An imp being kidnapped → an effort to exterminate the demon

race.
* The Lost Colony in those three years, as he now has two younger twin brothers: Miles and Beckett Fowl. He seems to love them — as much as Artemis can show love, at least — but they do make him feel a little frustrated when he's trying to instruct the three-year-olds in modern languages, and they seem more interested in worms and calling each other "simple-toon."
* The Lost Colony of Roanoke. In modern times, the general consensus is that, after various setbacks, the colonists gave up waiting for the promised resupply ships and moved in with the Croatoan tribe.
* The Lost Colony of Roanoke: What caused the abandonment of Roanoke, a short-lived English settlement in what's now present-day North Carolina during the late 16th century?
* The Lost Crown: A Ghost-Hunting Adventure when Nigel asks the barkeep what year it is, and never gets a straight answer.
* The Lost Crown. Also a Haunted Museum, two Haunted Churches, a Haunted Boathouse, etc. If it's got a roof, some ghosts are sheltering under it.
* The Lost Crown, finding haunted locations and taking photographs can often reveal clues that can't be seen with ordinary vision.
* The Lost Crown ghosts, plastic skeletons aren't likely to impress anyone even if done well.
* The Lost Crown: Ghosts range in power and malevolence from fleeting translucent figures, to a pesky kid who keeps pushing the elevator buttons, to dangerous roiling black smoke-columns that hound you around the room.
* The Lost Crown, is how the cottage's vintage landline telephone keeps playing snippets of Walter de la Mare's poem "The Listeners" after dark, despite the wiring having been chewed to bits by rats years ago.
* The Lost Crown is set in the fictional East Anglian village of Saxton.
* The Lost Crown location in or around Saxton is haunted too, but more ghostly encounters happen in Harbour Cottage than any other game locale.
* The Lost Crown, Nigel playtests a treasure-hunt game for Nanny Noah that uses this trope.
* The Lost Crown: One of Nigel's first experiments is a one-man séance using an upside-down teacup, that rattles around when he asks the spirits questions.
* The Lost Crown, William Ager was a villainous example. Unusual in that he died of tuberculosis with no heir to pass on the family secrets to, hence let down both Destiny and centuries of bloodthirsty tradition.
* The Lost Dimension, to play a major role in the series, her first appearance in any medium since her solitary TV episode a full decade before.
* The Lost Empire of Atlantis: History's Greatest Mystery Revealed (2011) takes the "country maintains intercontinental empire" theme to its logical conclusion by claiming that the Atlantean-Minoan civilisation had a half-world-spanning-empire from India to the Americas - one which nobody in the historical or anthropological communities noticed before, apparently.
* The Lost Experience DJ Dan gets a call that turns out to be from Rachel Blake (using her hacker alias, Persephone). He tells his cohost Tanya to trace the call and she says "Trace it? With my pencil?"
* The Lost Experience: his father, whom he'd never known, found him and struck up a relationship for the sole purpose of getting him to donate a kidney, then tossed him out again.
* The Lost Experience," is widely credited as restarting the viral marketing movement after the Blair Witch Project (in fact, some news articles incorrectly claim Lost invented viral marketing in the first place). The game featured real advertisements on television during episodes of Lost for the Hanso Foundation and other fake companies, which linked to websites involved in a global clue hunt to assist a new character named Rachel Blake in exposing the Hanso Foundation's nefarious acts. The game was criticised in its later acts for failing to effectively tie into the show, though it did finally lay to rest what the infamous "numbers" mean.
* The Lost Experience. Players of the game know how evil these guys are.

* The Lost Experience, which often makes a lot more sense than the programme itself.
* The Lost Files of Sherlock Holmes, the taxidermist turns out to be the one who was hired to kill the victim, and is said to have frequently done odd-jobs of dubious morality in addition to his public profession.
* The Lost Fleet, and after the first formal meeting they get into the habit of greeting humans with 'air hugs' involving no physical contact.
* The Lost Fleet. Apparently this is a normal side-effect of the cryosleep process, but it's also implied that it might be partly psychosomatic; he's occasionally mentioned as feeling an echo of that chill whenever his stress levels begin to elevate for days afterwards.
* The Lost Fleet are named after places on Earth: Glenlyon (a glen in Scotland), Kosatka (a village in Poland), Eire (the Irish name for Ireland), Adowa (a town in Ethiopia), Catalan (an ethnic group on the Iberian Peninsula), and Turan (a historic region in Central Asia).
* The Lost Fleet as frightening as we do them, they're polite enough to keep it to themselves.
* The Lost Fleet books, the eponymous fleet is trapped deep in enemy territory and is utterly dependent on its factory ships. These ships provide the fleet with the fuel cells and ammunition that it needs to travel and fight but they are slow and highly vulnerable to enemy attack. A major factor in any battles the fleet fights is to make sure that the factory ships are always protected.
* The Lost Fleet, but Desjani tells him that Otropa got it by being beaten so often.
* The Lost Fleet can cause an explosion anywhere between "tactical nuke" and "supernova".
* The Lost Fleet-class battlecrusers that are worse than the previous battlecruiser design in every way. Attrition is also so bad that tactical training for new officers is almost nonexistent; they're just told to charge straight in and hope they win.
* The Lost Fleet either one, much less started any kind of relationship.
* The Lost Fleet, focusing on the adventures of Geary's grandnephew Michael.
* The Lost Fleet for over a century, he's found by a fleet on its way to a major offensive. He quickly discovers that he's nearly worshipped by people on his side of the war. This trope is a major theme of the series as a whole.
* The Lost Fleet has stooped so low. He is determined to put an end to this.
* The Lost Fleet has the Alliance, the Syndicate Worlds, the Rift Federation, and the Callas Republic.
* The Lost Fleet has their casket launched on a trajectory that will enable its cremation in the nearest star, partly for practical reasons as they'd be a hazard to navigation if allowed to drift in space, but also because "the living stars" are a major part of the setting's dominant religion: Cremation by star is a symbolic way of becoming one with the universe.
* The Lost Fleet, he is startled to see that the ship hasn't even been properly finished and that its engineers are trying to finish up on-the-fly with plenty of exposed bulkheads, wires, and conduits.
* The Lost Fleet he never knew about, i.e. that an ancestor of his was a hero too.
* The Lost Fleet (Hinted at in book 1 through 4 and then explicitly from book 5 onwards)
* The Lost Fleet, i.e. duct tape. The Dancers are masters of engineering on a level well beyond human comprehension but are fascinated by seeing humans escaping a damaged ship use the same materials to improvise a bandage for an injured crewman, patch a spacesuit and make structural repairs to the pod.
* The Lost Fleet is a fully formed armada based on real-life navies. The core fleet elements are battlecruisers, battleships, and heavy cruisers screened by light cruisers and destroyers. There are no dedicated carriers, and their Fast Attack Craft are rarely used and would be considered corvettes rather than fighters. Either way, they are woefully short-ranged, weak and easily destroyed; in practice, the smallest relevant ship class is the destroyer. The Syndicate Worlds "Hunter-

Killer" ships straddle the line between heavy fighters and light corvettes. Also of note are the "fast fleet auxiliary" ships, which are basically mobile factories and repair shops. The only thing "fast" about them is their capacity to get in trouble.
* The Lost Fleet is a lone positive example amid a veritable sea of negative ones.
* The Lost Fleet) is a tactical genius thanks to nobody else knowing how to control an entire fleet in three dimensions with a time lag.
* The Lost Fleet is a young but brilliant commander whose knowledge of hypernet gates saves not only the fleet but humanity as a whole. She's also a capable ship commander.
* The Lost Fleet is in full play, with their super-battleships and planetoid battlestations. Even if you're not a predator, you're still a threat to the herd in the form of competition for resources. Thus, any lifeform that they can't use is eliminated.
* The Lost Fleet, later novels do show that he's a capable fleet commander and just hadn't been given the chance to shine before the war came.
* The Lost Fleet novels. Due to the mass/thruster ratio, fighters are simply no match for larger warships (i.e. they can't maneuver as atmospheric fighters), and any computer targetting system capable of hitting anything while traveling at 10% of the speed of light can definitely track a small fighter. Fast Attack Craft (or Short-Range Attack Craft, as they were known in Geary's time) are capable of space and atmospheric flight, which is why they are normally used near planets or space stations. Corvettes get slightly more use by the Syndics, especially the so-called Hunter-Killers, which are a cross between a corvette and a destroyer. "Nickel" corvettes are used to patrol systems far from any border, as they're virtually useless.
* The Lost Fleet on a course that will take them into the sun. The Alliance's religion is based around The Living Stars so this is symbolically returning them to the stars from whence they came.
* The Lost Fleet, prior to the events of the books Desjani had a dream about Geary sleeping and when she yelled at him to wake up a dead sailor from her previous ship appeared and told her that it was not yet time. This dream was largely the reason why when the fleet did discover Geary in suspended animation Desjani supported him completely, and believed that he had been given a sacred mission to save the Alliance.
* The Lost Fleet series, Captain Desjani remarked once that she considered becoming a literary agent rather than a Fleet officer ... but "taking that job would have meant I had to work with writers, and you know what they're like."
* The Lost Fleet series ramming happens, but always by accident. The result is always catastrophic for both ships. In one case both ships get compressed into a "gigantic ball of metal".
* The Lost Fleet series, the ancestor-worshiping characters note that Earth is irrelevant to the galaxy now economically, but still extremely important culturally, and if it were destroyed - which they have just found out is potentially possible - it would stir all of humanity to unite in a genocidal rage against the attackers.
* The Lost Fleet series, the fleet charged with isolating the moon Europa and the engineered disease accidentally created on it have standing orders to destroy any ship that lands on the moon so it can't take off if they can't prevent it from landing. If the quarantine is broken and a ship does make it off and gets back to Earth or the colonies on Mars, the fleet is to destroy everything man-made in the solar system that could possibly take the virus elsewhere, annihilate all life on Mars and on Earth, and then hurl itself into the sun.
* The Lost Fleet series use nutritional bars of various alleged flavors when they're away from base. The Alliance forces trapped far behind Syndicate lines end up raiding rear-echelon bases for supplies and quickly discover that as bad as their rations are, Syndic ration bars manage to be worse. The Danaka Yoruk-bar is considered particularly inedible.
* The Lost Fleet series was at ground-zero when one of these suddenly boiled over out of the blue, and a major sub-plot of the first five novels is finding out why.

* The Lost Fleet, set far in humanity's future, both the Alliance and Syndic militaries and civilian governments appear to be completely gender-equal. Women are found at the same rate as men at every level of command from Alliance Senator on the Grand Council down to the average crew member on a warship.
* The Lost Fleet, ships don't normally go out into interstellar space.
* The Lost Fleet, ships explode in a brief bright flash only in two cases: reactor containment fails, or two ships collide at an appreciable fraction of the speed of light (ships normally maneuver at 10% of c). In both cases, little is left of the ship after the flash. Most ships that are destroyed in battle simply break apart and continue on their original trajectory, as pieces start to move apart.
* The Lost Fleet since the opening battle, remembers them very well and insists on those under his command following them. The full rules are never given, but they apparently include not murdering prisoners or indiscriminately bombarding civilians on planets. Soldiers disguising themselves as civilians are explicitly stated to be fair game, although the protagonist is of course far too noble to do anything other than let them go.
* The Lost Fleet spinoff series that observance of the same ancestor-worship practices seen in the Alliance are officially frowned upon (probably because nobody could figure out how to exploit them for money or power) but not actually outlawed.
* The Lost Fleet status, is probably the only person left alive who understands how to set up and maneuver fleets in this manner.
* The Lost Fleet tactics and gigantic superbattleships, and their ancient formations would put Romans to shame).
* The Lost Fleet tactics, so formations are complex and spread out enough that lightspeed lag matters when issuing orders.
* The Lost Fleet tendencies might have something to do with it as well.
* The Lost Fleet than to the closer gates, as the distance affects the speed of the hyper bubble. When the titular fleet is cut off from the hypernet network by the enemy they have to use the jump point system to maneuver their way out of enemy territory and back to home space.
* The Lost Fleet that a skilled interrogator can spot. Of course, the machine can still only tell you what the subject believes, so false answers with no deception noted are still possible from a dupe or a delusional subject.
* The Lost Fleet), their concept of beauty is similar to that of humanity. Everything they do screams it, up to and including the way their ships move, hence the species' other soubrette "Dancers".
* The Lost Fleet. The marine doing the disarming is expecting to be told to cut a specific wire but the engineer directing the operation tells him that it's much safer to just grab as many wires as possible and pull them all out with a single yank.
* The Lost Fleet (there aren't any spaceships passing through anymore, after all).
* The Lost Fleet. Thus, the only pay he has now is only from the moment he was awakened. Luckily, the same rules don't apply to seniority, otherwise he would've never been given command of the fleet.
* The Lost Fleet to escape because its guarded by the Syndics. Played straight shortly after when the fleet makes use of the old fashion jump point system to escape even if it just takes them from one enemy territory to another (at least without the enemy fleet). This trope is used repeatedly in the series and just where the fleet escaped to is a source of never ending frustration to their enemies.
* The Lost Fleet... until Captain Geary shows up. Both sides in the war have suffered so much attrition and casualties due to this style of combat that one person who actually knows how to properly fight in space is basically unbeatable.
* The Lost Fleet uses this, however a more effective Portal Network is set up in important systems and the FTL pathways are almost forgotten about until the events of the series. There are strange lights in jumpspace. However, no one has figured out how to explore this dimension (ships always travel on a fixed path between two jump points), so most sailors think they're lights of their ancestors.
* The Lost Fleet, when an entire generation has lived and died never knowing a time

when they weren't at war.
* The Lost Fleet, where, so far, space battles have been limited to half a dozen ships at most. Justified, since the series takes place before the formation of the Alliance.
* The Lost Fleet. While it is not noted if she is the ONLY woman there, she is the only one specifically mentioned.
* The Lost Fleet. While they could move faster, doing so degrades sensor data even more, since, at that point, the speeds are relativistic, which greatly increases the uncertainty over what is going on in space. "Stationary" targets like planets and space stations can be attacked from a significantly longer range with "rocks", since they can't evade the attack.
* The Lost Fleet won is almost as battered and war-weary as their erstwhile enemies.
* The Lost Fleet worlds are orbited by stations, whose job appears to be to keep the population below from rebelling. Why else would they be equipped with bombs? That said, many stations are still necessary to build and maintain ships.
* The Lost Girl, Friendly has a variant of this, as she quickly forgets she ever was a girl.
* The Lost Girls (lesbian and bisexual female main characters, homophobia)
* The Lost Hero get along at all, hence the need for them to remain hidden from each other. In fact, a clever reader can point out that the only ones explaining the Roman aspects are, of course, Romans, and that the Romans felt this way about the Greeks. (Since Lupa's not one to tell!)
* The Lost Hero's ending has Jason deducing that Percy is at Camp Jupiter.
* The Lost Honour of Katharina Blum has Werner Tötges, who harasses the title character throughout, frequently makes up quotes and distorts facts to make her life fit a salacious narrative of a promiscuous woman who aids and abets anarchists and terrorists, and doesn't care if she's innocent or not.
* The Lost Honour of Katharina Blum's journalistic practices and stated that the paper "isn’t crypto-fascist anymore, not fascistoid, but naked fascism. Agitation, lies, dirt."
* The Losties not finding these things is at least moderately plausible, but Rousseau had been on the Island for
* The "Lost in Boston" albums consist entirely of Cut songs from various Broadway musicals. Among the ones recorded are a few of the
* The Lost Jewelled Temple Of Doom Of Offler The Crocodile God (from
* The Lost King. Gradually the infighting extends to start claiming people he genuinely loves, such as his wife and children, and he's helpless to do anything but watch.
* The Lost King his youngest surviving daughter was conceived.) Yet his reputation as a womanizer still haunts him.
* The Lost King pursuing him after his wife dies. Downplayed in that they do genuinely like each other.
* The Lost Lenore: A love interest who is dead and their lover mourns over them.
* The Lost Lenore, as the living character does not accept the loss of their love as reason sufficient to end their relationship.
* The Lost Lenore: If her husband outlives her, she will most likely be this to him.
* The Lost Lenore: The lover, spouse, or pined-for love of a character was killed, and they are still very much hurt by it.
* The Lost Lenore: The person's significant other's death affects them.
* The Lost Lenore: This person is dead and their lover mourns over them.
* The Lost Lenore whose death still affects the main character or his entourage. Male examples do exist but are much rarer.
* The Lost Light becomes one after Getaway's mutiny. After exiling Rodimus, Megatron, and their supporters Getaway puts the quest back on track, ending the
* the Lost Light crew encounters the exact double of their ship, except with the entire crew dead. Initially, they think they encountered future versions of themselves, and were horrified, so Rodimus decided to prevent this fate… by

cutting his arm off. That's because his dead self has two arms, and if he will have only one, then dead him will not be the same as living him. And to make sure he'll stay a different person from him, he instructed his crew to not repair his arm.
* The Lost Light. Nobody knows where the ship even came from (not even its original owners, who found it floating emptily in space), its quantum engines are noted to be unlike any ever seen, there was a
* The Lost Media Wiki media, whether it be movies, cartoons, TV shows, or video games.
* The Lost Mind of Dr. Brain has this on the title screen. Two variants show up:
* The Lost of 3CW, looking to spread across Europe and their foreign affiliates, The Age Of The Fall in
* The Lost Patrol an officer and 12 enlisted cavalrymen go off on a mission into the desert. The officer is shot first, leaving the men at a loss since they don't know what the mission is. Then they are picked off one at a time by unseen Arab enemy. At the end the sergeant is the only one left.
* The Lost Patrol has Pearson the new enlistee, a fresh-faced and hopelessly naïve boy who joined up because he wanted adventure out of Kipling. Not surprisingly, he's the first of the enlisted men to be killed.
* The Lost Patrol is besieged and picked off one-by-one by Arabs. The sergeant is the only one left when a British regiment, attracted by the fire he set, arrives. When asked where his men are, the sergeant just points to the graves.
* The Lost Patrol, Pearson is an enlisted cavalryman. He's from the upper crust and could have gotten a commission, but he tells the sergeant that he wanted to earn it, so he signed up for the ranks.
* The Lost Prince by Frances Hodgson Burnett is one of the last hurrahs of the pre-WWI romantic Ruritania. It's somewhere on the far side of Austria-Hungary from England, but the one time its precise location is given it is expressed in terms of the countries Samavia shares borders with, all of which are just as fictional as it is.
* The Lost Prince, this is apparently the case for the Lost Prince's secret line of descendants; at the time of the novel, there are two living descendants, father and son, who are apparently descended in an unbroken line and both bear a striking resemblance to the surviving portrait of their revered ancestor.
* The Lost Redeemer: Casella Raider and Marabella Lawguard both fit this role. Each woman runs a spy network and always seems to know what the other characters are up to.
* The Lost Redeemer: Despite the setting being more European inspired than Japanese, katanas are the primary weapon of choice for Aeons. Many katana-wielding Aeons are able to hold their own against their gun-wielding opponents.
* The Lost Redeemer, Elias and Nahila are interrupted during their search for forbidden books in Zidane's office. They decided that getting caught making out (even in a forbidden area) might get them in less trouble.
* The Lost Redeemer, It's said that Ethereum blades can cut through steel like paper.
* The Lost Redeemer The Sile’zhar are an elite group of assassins from the east who are clad in black from head to toe, leaving a narrow slit for their eyes. Basically ninjas in all but name.
* The Lost Redeemer: Whitecliff has many underground tunnels and chambers including a harbor, a library, and a secret tomb.
* The Lost Regiment-era weapons and training to counter the numerical advantage of the enemy.
* The Lost Regiment has morphed into Kesus. Additionally, they never say "God" or "Lord", and Kesus's father is stated to be Pern, a mangling of Perun, the chief deity of the Old Slavic Pantheon (pre-conversion to Christianity). So any phrase you'd expect to hear "God" in, they may substitute "Pern" for that.
* The Lost Regiment". It doesn't take long for the Americans to come into conflict with the Tugars, one of the alien hordes. Fortunately, the nearby human peoples are sick and tired of having to sacrifice some of their own to the Tugars every generation and would rather go down swinging. The Americans end up helping the

locals industrialize and train in modern (by Civil War standards) combat.
* The Lost Regiment soldiers with muskets and cannons does some hope appear for the average human on Valennia. After all, even a Tugar can fall from a rifle whose range rivals that of the famed Tugar warbows.
* The Lost Regiment that travels through a portal to an alien world, where they encounter both an alien race that feeds on humans and multiple societies set up by previous groups of humans that were stranded there. Among their eventual allies are the descendants of a lost Roman legion.
* The Lost Regiment, the first indication that they are no longer on Earth is the lack of familiar constellations and a strange wheel-shaped galaxy featured prominently in the night sky.
* The Lost Regiment (their word for humans is "cattle"). It's not long before one such horde, the Tugars arrives to collect their generational tribute and put the newly-arrived "Yankees" in their place. After helping the Russian peasants rise up against the boyars and the church, the Americans resolve to turn the city of Suzdal into a modern (i.e. Civil War-era) industrial power with a modern army with firearms. Unfortunately, they only have a year before the main body of the horde arrives. Many of the soldiers are former factory and mine workers, so they are familiar with the methods of industrialization. However, making Civil War-era rifled weapons requires precision tools, so they, instead settle for Revolution-era muskets and smoothbore cannons. They even build an observation balloon and a working locomotive. By later books, they move on to seagoing ironclads.
* The Lost Regiment who have the know-how to turn a bunch of Medieval Russians into an industrial power in a matter of years and form a "modern" (by Civil War standards) army out of illiterate peasants.
* The Lost River is a vast cave system featuring a "river" of glowing green acidic brine that's heavier than normal seawater, and which flows through the fossilized remains of truly
* The lost robot foils the first test because, while it doesn't have to rescue a human in danger, it
* The Lost Room, and there's at least one combination of Objects with the ability to cause something unspeakably awful.
* The Lost Room are perfectly ordinary-seeming items with bizarre and unintuitive powers, like a comb that can stop time, a canteen that causes everyone nearby except its holder to asphyxiate, and a pair of scissors that forcibly turns whatever they point at around any axis. They were originally entirely mundane items that were part of a man's luggage within the titular room when a mysterious Event transformed them, and they have since been disseminated around the world as people fought over them. The Objects are also indestructible, except when inside the Room itself.
* The Lost Room has a scene set in Las Vegas. In one take, an Albuquerque bus drives past; in another, the Sandia Mountains - what Albuquerque has to the west instead of a skyline - are clearly visible.
* The Lost Room has the ability to make any door (within certain specifications) lead into the Room, which has powers of its own. It's one of the most desired Objects in the show.
* The Lost Room have a special invocation: turn the Key, Comb the hair, tap someone with the Bus Ticket...
* The Lost Room have shades of this, when someone even knows what they do or how to activate them. This is doubly true for the abilities of Object combinations, which don't always have anything to do with combining the abilities of the individual Objects (for example, the Wristwatch can boil an egg if it's placed around the egg, but when used with the Knife it grants the user telepathy).
* The Lost Room, Joe needs an Object stored in a safe. He sticks the safe in the Room and resets it, causing the safe to vanish and leaving the Object inside behind.
* The Lost Room miniseries. Opening any such door with the Key results in you entering Room 10 of the Sunshine Motel, which exists outside space/time. You can then close the door and open it in again to a location of your choosing. Better not

leave anything (or anyone) in the Room when you leave, though.
* The Lost Room, more so the area around where it is supposed to be, including the room that (was?) next to it.
* The Lost Room, the ability of the Comb is to stop time for everyone except the user. The effect only lasts about 10 seconds (from the comb user's perspective), and the user isn't able to physically affect anything that's still frozen.
* The Lost Room unanswered. This is because it was meant to be the pilot for an ongoing series, where those story lines would presumably be continued, but its low ratings meant that the series never happened.
* The Lost Room, whenever Wally uses the Bus Ticket on someone. Specifically, he usually tells that that, for their "crimes against humanity" (really, minor annoyances), he condemns them to Hell. After touching them with the Ticket, the people are transported above a road near Gallup, New Mexico, immediately falling to the ground. These people can be forgiven for thinking that a road in the desert is Hell. The orderly whom Joe sees on the road is seen with his hands spread out walking towards the sun.
* The Lost Room with incredible powers, prompted a rush of fans trying to collect various replicas of the Objects (no powers though). The most popular were The Key to the titular Lost Room with the attached fob and Wally's Bus Pass to Gallup, New Mexico, as these were most prominently used in the show, although useable replicas such as The Pen, The Comb, and The Deck of Cards were also popular.
* The Lost Scrolls After Harry, Garth and Gid fail in their attempt to save Meagen and Jesse. As the evil cult people start to ready the poison, Harry starts frantically looking around for anything he can use to free them. It takes him a bit to remember that he has a knife blade he sewed into his tunic at the beginning of the book...
* The Lost Skeleton of Cadavra. A pair of aliens encounter a normal door and begin to panic when it doesn't open by itself.
* The Lost Skeleton of Cadavra fashion, only for her to be returned unharmed.
* The Lost Skeleton of Cadavra has two aliens from Marva. They have "cranberroids" instead of cranberries, and "linbooba" instead of cherries. Picnics are called "cooty-lana".
* The Lost Skeleton of Cadavra of 50s B movies, has this trope in spades.
* The Lost Skeleton of Cadavra of low-budget sci-fi horror movies from the 50s.
* The Lost Skeleton of Cadavra out the wazoo. The sequel is done in the style of 60s color cheapies.
* The Lost Skeleton of Cadavra, the horrible disembowellings by the mutant are at first attributed to a bear.
* The Lost Skeleton of Cadavra very distinct. So Dan Conroy was cast as Ranger Brad and played the character as though he were an actual park ranger who got talked into playing a role in the movie because he had his own costume.
* The Lost Skeleton Returns Again after Chinfa, Queen of the Cantaloupe People, is introduced to the concept of the double negative.
* The Lost Skeleton Returns Again because a colleague took credit for the discovery of a new metal and named it after himself, when Armstrong was planning to do this himself.
* The Lost Skeleton Returns Again features a number of hard-boiled monologues about the dangers of the jungle.
* The Lost Skeleton Returns Again, spoofs this trope in a more conventional way:
* The Lost Slayer, Giles becomes a vampire king, and the Scoobies become a battle-hardened almost military group trying to fight him. Younger Buffy in older Buffy's body is surprised when she breaks out of where Giles was holding her and sees how they've all changed.
* The Lost Soul outright encourages the player to delete the core files as it's "the only way to advance the plot".
* The Lost Souls (read: Zombies of what appears to be former christian monks) from
* The Lost Symbol as a torture device. His "rebirth" is unpleasant, but far from supernatural.
* The Lost Symbol has the antagonist trying to destroy all evidence of scientific

research proving Noetic Science.
* The Lost Symbol. He's expecting a man, not a petite Asian woman who's had throat cancer.
* The Lost Symbol: Mal'akh is really Peter Solomon's presumed-dead son Zachary. According to the narration, Mal'akh killed Zachary Solomon before escaping prison with Solomon's money but it's not hard to figure out this is just careful wording. Dan Brown even drops a massive hint by outright mentioning Darth Vader and Luke and then having Mal'akh cut Peter's hand off but it's still treated as a big reveal.
* The Lost Symbol, Robert Langdon is describing the horrors of the cult he belongs in: "I kneel at the foot of an ancient instrument of torture and consume ritualistic symbols of blood and flesh. And if any of you care to join me, come to the Harvard chapel on Sunday, kneel beneath the crucifix, and take Holy Communion."
* "The Lost Tales" introduces quantumspace, involving the use of previously-forbidden Vorlon technology. It really
* The Lost Tales, this has evidently happened enough to him that he can immediately tell when it is happening, and it annoys the hell out of him.
* The Lost Thing has to point out to his parents that it's even in the room, despite the fact that it's bright red and HUGE.
* The Lost. This makes a comical number of items literally worthless, although thankfully he can take Devil Deals for free. Completing the game as The Lost unlocks some of the best items, so you better get good at dodging.
* The Lost Treasure of Griffonstone stealing the titular lost treasure before falling into the Abysmal Abyss. In the present day, the characters find his skeleton halfway down the chasm, confirming that it did kill him.
* The Lost Tribe of the Orinoco attempt to cook Tim and Bill in a pot in an episode of
* The Lost Vikings and its sequel are based around this trope. Each of the vikings has a specific set of abilities (not necessarily including combat) which are required to solve all the puzzles in their path. Sometimes levels divide into distinct parts, tailored for each particular character. The sequel goes even further with adding two more characters, while still allowing you to control only three at a time. Each level can be solved by a given combination and only by it. Thankfully, you're forced to use that combination.
* The Lost Vikings and turn one of your vikings into a mummy as well. Though seeing as they're dead, you'll have to restart the level anyway.
* The Lost Vikings: Baleog the Fierce, being the offense class out of the trio, has a particularly large chin.
* The Lost Vikings, but the second to last one is a land of pastry-like terrain, helium air pumps, silly music, and enemies such as a one-armed rubber ball which dribbles itself.
* The Lost Vikings. If you get a game over, the scene shows the surviving viking(s) on a random shore, taking a glace on a burning boat drifting away. Push the continue button, and the dead vikings will be revived then you can continue the game.
* The Lost Vikings smashes through the walls with his head on a regular basis.
* The Lost Vikings, the sorceress met by the heroes in the early levels embodies this trope. Especially her voice acting.
* The Lost Vikings: This appears in the Egypt levels. You have to get across by having coconuts drop into the quicksand and landing on the coconuts.
* The Lost Village horror series. While kind of terrible, it's terrible in an often hilarious way. Not to mention that the staff is usually fairly competent, or at least incompetent in ways very different from what's on display here.
* The Lost Village lost fans due to the slow start and the fact that the mystery didn't really seem to go anywhere. Things get better after episode 7, but due to that slow start, some fans still think that the ending was rushed.
* The Lost Village, Masaki's voice cracks as she tries to calm down the bus driver. We should note that she's already carsick at the moment as she runs up.
* The Lost Village some of which want to kill her, some want to save her and some are trying to figure out what the hell is going on.

* The Lost Weekend buys two bottles of whiskey for the weekend trip. He wants his brother to find the first one so he would give up searching for the second one.
* The Lost Weekend, is strongly implied to be a prostitute. She keeps meeting total strangers at Nat's for dates, and she tells Don that she broke "a business date" to see him.
* The Lost Weekend, though not explicitly an educational film, depicts the protagonist's descent into alcoholism very much this way.
* The Lost Weekend, wondering where exactly he is and looking up at the ceiling.
* The Lost Woods: A large, old-growth forest in which nature (and often magic) are supreme.
* The Lost Woods series require you to traverse a very specific route to avoid being sent back to the entrance.
* The Lost Woods), where Link will return to his starting location if he doesn't take the exact right path. The games vary on whether this is an actual spatial warp, or a representation of getting lost.
* The Lost World (1912) back to his newspaper, with the climax being an article written by one of his colleagues (since he's in the debriefing conference).
* The Lost World (1912), Conan Doyle very nearly turned down the knighthood, suspecting that it was for Sherlock Holmes and not for his recent book on the Boer War.
* The Lost World (1912) features a huge tree which the heroes use as a bridge onto the plateau. Predictably, it gets destroyed, leaving them with no choice but to go forward.
* The Lost World (1912), Professor Challenger brings a pterodactyl back to civilization. It escapes while it's being shown off.
* The Lost World (1912) the white explorers encounter a Native American tribe menaced by ape people. The Native Americans ask the explorers to use their modern weaponry to help fight the ape people. The explorers agree, but when the actual battle comes around they barely get to fire a shot. The extra confidence their presence gave the Native Americans allowed them to defeat the ape people on their own.
* The Lost World (1912) trust by pretending to be a fellow scientist, Challenger quizzes him on various scientific terms, all of which Malone claims to be familiar with. Challenger then informs him that he had been speaking gibberish and tackles him out the door.
* The Lost World (1912), which was - at the time the book was published - the prevailing theory about why most prehistoric life had gone extinct in the first place. Note that just about every adaptation of the story does something else with this sequence: see above under Film for the 1925 and 1960 versions and below under Live-Action TV for the 2001 version.
* The Lost World (1995) novel has sat phones that are explicitly extra-durable and specifically made for the island.
* The Lost World (1995), Thorne uses this as an excuse to get everyone except Sarah and Ian out of the trailers, not long before the parent T-rexes appear and push the trailers over a cliff.
* The Lost World (1995) view of humans as having attained sentience as a result of the extinction of the dinosaurs.
* The Lost World (2001) had the hero snubbed by a girl he liked at the beginning of the movie, only to have her try to chat him up after he comes back from the titular country with a pterosaur and lots of fame. He blows her off.
* The Lost World (2001) peacefully making its way back home, successfully.
* The Lost World, along with some dinosaurs, which lightened the mood somewhat.
* The Lost World is brought to the city, escapes from his cage and goes out on a rampage.
* The Lost World: Jurassic Park (“anything that can and all does happen”) strongly imply that he has never been in a stable marriage (or even relationship) long enough to have adopted.
* The Lost World: Jurassic Park: “Parental Guidance - Some scenes may be unsuitable for younger children or those under 8.”

* The Lost World: Jurassic Park a dinosaur. Averted with a dog near the end, which gets eaten.
* The Lost World: Jurassic Park. Also, Robert Burke's death has parts of this, as you see his blood flowing down the waterfall.
* The Lost World: Jurassic Park, and alive at that, but his longtime friend, Ajay, was killed on the expedition, so he didn't get any satisfaction from it.
* The Lost World: Jurassic Park arcade light gun game, successfully completing objectives at certain points (saving a triceratops, inputting a passcode to lock a door, etc.) enables the player to bypass some parts of levels.
* The Lost World: Jurassic Park, are also used as points of praise to their respective movies.
* The Lost World: Jurassic Park arriving in San Diego with its crew in different states of crushing and dismemberment (in the script, this was supposed to be the work of raptors sneaking into the ship, but the explanation was cut out).
* The Lost World: Jurassic Park attack the trailer, and later when they attack the survivor's camp.
* The Lost World: Jurassic Park before kicking it out a window to its death.
* The Lost World: Jurassic Park (Console) had you traverse under a stampede of Brachiosaurus while desperately trying to avoid their feet.
* The Lost World: Jurassic Park, Dieter sneaks away from the group to go to the toilet. He hears a few suspicious noises and looks around, rifle in hand. He slowly comes up on some ferns when a dinosaur pops out and snarls in extreme close-up. Dieter gives a yell and dives backwards, bringing his gun to bear...and the camera pulls back, revealing it's actually the chicken-sized Procompsognathus. Of course, he soon finds out they're not so harmless, but even so, he laughs it off at the time.
* The Lost World: Jurassic Park film is rumored to take this in an interesting direction, with the "theme park" Raptor Blue meeting authentic feathered Raptors created outside of InGen.
* The Lost World: Jurassic Park for no reason other than "it gives me the creeps".
* The Lost World: Jurassic Park had a guy who taunted a Compsognathus later get eaten by a pack of them, however.
* The Lost World: Jurassic Park had several deleted scenes restored. The two major scenes in this cut (a board meeting between InGen executives and a longer introduction to Roland Tembo) are included as deleted scenes on the recent DVD release.
* The Lost World: Jurassic Park has a woman lying on the windshield of a dangling vehicle as cracks slowly spread through it, and another character tries to get to her before she falls through and down a cliff.
* The Lost World: Jurassic Park he makes as he's crunched like a candy bar...
* The Lost World: Jurassic Park, Ian Malcolm, Sarah Harding and Nick van Owen are stuck inside a two-section bus that has partly been pushed of a huge cliff (they're in the hanging part, of course), the bus is slipping, the glass window on the low end of the bus already broke, and oh yeah, the tyrannosaurus that pushed the bus to its current position is still around, with his partner, and the one remaining party member that could help them is apparently too nervous to know what to do, as this exchange proves:
* The Lost World: Jurassic Park is rampaging through San Diego and the protagonists have to capture it. Ian Malcolm's advice? "Follow the screams."
* The Lost World: Jurassic Park logo, this time being rock breaking apart to mirror the eruption of Mt. Sibo.
* The Lost World: Jurassic Park near the ruins of the facilities of Site B.
* The Lost World: Jurassic Park novel, where a small child is attacked and nearly eaten by a pack of Compsognathus.
* The Lost World: Jurassic Park over the scene where a raptor chases Malcom around an abandoned laboratory to highly how far the predators had fallen as it continually fails to catch a middle-aged mathmatician due to repeated pratfalls. And then a teenage girl manages to kill a velociraptor with gymnastics.
* The Lost World: Jurassic Park stepping on Carter chasing the fleeing humans. The

poor bastard actually ends up stuck to the beast's foot for a bit before coming off after a second step.
* The Lost World: Jurassic Park taken to the continent with the intention of putting it in a zoo, but he escapes before they could do so and runs amuck through most of San Diego. They manage to get it back in its cage by luring it there with its baby.
* The Lost World: Jurassic Park: The first victims shown in the movie are tourists lounging on the beach of a dinosaur-filled island. They picked the wrong island.
* The Lost World: Jurassic Park, the protagonists and the InGen hunters are chased into the tall grass by the T. Rex. Velociraptors start quietly picking them off without the rest of them knowing and continue doing so for a while before the survivors realize what's going on and run for it.
* The Lost World: Jurassic Park. When the research trailer and the SUV fall off the cliff, they both violently explode. Strangely, the SUV's explosion is actually bigger than that of the trailer. Even more strange, the trailers/SUV were electric.
* The Lost World: Jurassic Park when they discovered what they were really dealing with. However, because the animal has already been contained in the ship with its youngling, they are tasked with guiding it back to Isla Sorna instead of just killing it with a bazooka.
* The Lost World: Jurassic Park, where the huge dinosaur can't reach far enough inside to eat them. However, Burke panics when a poisonous snake slips into his clothing and gets nabbed.
* The Lost World: Jurassic Park, which any intelligent animal would do from its mistakes.
* The Lost World: Jurassic Park, with the protagonists hanging onto a rope that keeps them suspended while the section-bus they're in plunges into the sea around them.
* The Lost World too strong a dose and lead to its rampage in San Diego. Sarah Harding chews out the guy revealing this in an angry rant about not knowing the proper medical doses for the T-Rex, knowledge which InGen should definitely possess.
* The Lost Years of Merlin books, the stories are said to have been related to the author directly by Merlin.
* The Lost Years of Merlin, has characters earning wings as a plot point.
* The Lost Years of Merlin made of magic is instantly absorbed. Aylah—being made of magic herself—even says that if she so much as breathes on a kreelix's fangs, she would vanish and die instantly.
* The Lost Years of Merlin the title character is blinded early in the first book, but then develops "second sight." It basically lets him see normally (albeit not with his eyes), but also sometimes allows him to see secret messages or similar things that others can't.
* The Los Zetas were founded by commandos from the Mexican Grupo Aeromóvil de Fuerzas Especiales (GAFE). They're feared by Mexican and international law enforcement/intelligence agencies as they use their special forces experience to kill their rivals and anyone who gets in their way.
* The lotion "Sarna" confuses Spanish speakers, as it literally means "mange" or "scabies" in that language.
* the lot of you are still standing is because he is a good enough pilot to land a half-exploded shuttle instead of slamming it nose-first into a hill.
* The "lots of non-automatic guns firing" variant is employed by a Danish navy captain in
* The Lottery has the government forced to do this, in response to a mysterious interruption to the reproductive ability of the human species. The disease, if it is that, is also putting a control by stopping the population from growing any further.
* The Lotterys More or Less: Luiz, the Brazilian house guest who stays with the Lotterys for the majority of the book, says a few words in Portuguese.
* The Lotterys Plus One (family raised by two gay dads and two gay moms)
* The Lotterys Plus One: In chapter 8, when Iain says no to going to the beach,

MaxiMum wonders aloud if he's just not up to dealing with the exertion and the heat. Iain changes his tune immediately after.
* The Lottery". The lottery is an early-summer affair to choose the victim of a ritual stoning, implied to be a harvest offering.
* The Lottery, we have Allison and her assistant, who’ve managed to fertilize a hundred new eggs. The plot (and the title) comes from the governments decision about what to do with them.
* The Lotus Caves: The protagonists find a cave filled with plant life that responds to their desires. This includes a tree that reshapes itself to be a diving board over their swimming hole.
* The Lotus Eaters, Admiral Wallenstein uses a VR training station to get the Earl of Care up to speed on commanding a starship, as Wallenstein's promotion just before the Earl was put under her left the United Earth Peace Fleet ship she was previously commanding without a CO.
* The Lotus Eaters. "They lived in a land that was always afternoon." A warm, kind afternoon. The fruit of the land provided all their needs and grew abundantly, wine flowed freely, and no work needed to be done. It would be so easy just to stay...
* The Lotus in the Mire. It's specifically mentioned that the producer of the drama puts a lot of emphasis on historical accuracy, which means black hair on Japanese women. Kyoko actually wonders if she should have dyed her hair black prior to the audition.
* The Lotus War. Everyone except the Shogun thinks the hunt for the thunder tiger is one of these. Then the protagonists find one.
* The Lotus War the Iron Samurai wield chainkatanas, which are the unholy spawn of a katana and a motorized chainsaw.
* The Lotus War, the Shima islands are rapidly going this way. Growing Blood Lotus rapidly ruins the land it is grown on, absent fertilizers the growers cannot afford. The remaining pockets of wilderness are rapidly being destroyed by the Lotus Guild to replace depleted fields. It's processed into an oil-like substance called chi, and burning vast quantities of it has turned the rain black and the sky red. Virtually no one goes outdoors without a breathing mask and protective goggles, or at least a kerchief over their face.
* The Loud Awakening, Lincoln and 10 of his sisters are transformed by ancient orbs into superpowered beings, each controling an element:
* The Loud Awakening starts with a prologue that shows Lincoln and some of his sisters, now gifted with superpowers and transformed into non-human forms, acting as a superhero team. The story then rewinds back to 1,5 years ago and shows how they came to be this way.
* The Loudest Thanksgiving", Lincoln remembers that in previous Thanksgivings, he always ate too much and fell asleep, so this time he's trying not to.
* The Loudest Thanksgiving members of the Loud, Santiago, and Casagrande families say, "Let's do this!" (which is usually Lincoln's line) except for Lori, Bobby, and Lily.
* the loud gong sounds. They have one brief second of horror before the lights go out and a beat-down is inevitable.
* the Loud G-Stones and Pisa Sol, the Sol Masters are taken down for good.
* The Loud House actually manages to be both clever (Lola actually manages to give some fairly in-depth characterization for her toys' personas) and adorable (since Lincoln quickly finds himself drawn into the game), even ending up being a surprisingly emotional bonding experience for Lincoln and Lola.
* The Loud House always does this whenever she appears. It is one of the show's most recurring jokes.
* The Loud House and is frequently seen pushing her younger brother Lincoln around.
* The Loud House and outgoing, in-your-face attitude are all things that get on the nerves of her siblings and friends. "One of the Boys" is essentially an episode about Lincoln dreaming of having 10 Lynn's for brothers and they're all stereotypical male ruffians. In one episode, Lynn even tells her sisters and brother to 'man-up' when issuing them with a pancake eating challenge, much to their dismay. Granted, beneath it all, she does have a nicer and softer, more

caring side, and even the very rarely shown feminine trait, but it takes a lot for her to show any of this.
* The Loud House are banned in certain European and Asian countries (such as Poland, Russia, Turkey, Indonesia, and Malaysia) due to the depiction of same-gender relationships (specifically, Clyde's dads and Luna's relationship with Sam). "Cheater by the Dozen" is also banned in both Indonesia and Malaysia due to sexual innuendo.
* The Loud House) are supportive of it because they can tell Lincoln really loves doing the sport. This is lampshaded by Chris, the gymnastics coach, who isn’t surprised that Lincoln lied about what sport he was really doing because Lincoln’s not the first male gymnast he’s known to have done so out of fear of mockery.
* The Loud House around the attractive substitute teacher. The solution is to retake the test without being able to see her.
* The Loud House as a flower. Lincoln asks what kind of flower Ronnie Anne is, and when Lynn Sr. has him pick, Lincoln chooses a rose. Lynn Sr. says, "How romantic!", but then Lincoln clarifies, "No, dad- I mean because of the thorns."
* The Loud House as a substitute for Lincoln. When Clyde plays on the seesaw with Rock Lincoln, he gets launched into the air and lands on Lola and Lana's sandcastle, destroying it and prompting them to beat him up.
* The Loud House, as the creators of the AU encourage everyone to roll with their own ideas for them.
* The Loud House at him, beat him up, and write a bunch of insults and one swear word on his face.
* The Loud House. A variation here in that it's only between Lincoln and Clyde.
* The Loud House becoming a hit, saw a surge in popularity among children. It was also perfectly timed as the kids who originally grew up with the show in the late 90's and early 2000's now had kids of their own to share the show with.
* The Loud House (being a skilled singer, lockpicker and carpenter) and is self-aware enough that she knows how much of an airhead she is.
* The Loud House , Bobby Santiago and Carlota Casagrande, who are cousins, are voiced by Carlos PenaVega and Alexa PenaVega, who are married in real life.
* The Loud House, Bobby Santiago didn't get much characterization other than being Lori's boyfriend. Even his little sister Ronnie Anne, who appeared less often than he, was a much more three-dimensional character.
* The Loud House, but he inadvertently idealised Coach P too much by telling her that he travelled a lot (without realising those photos were actually of him at a golf course) and had a boat (when really he lived in a houseboat). This makes Mrs. Johnson sour and she breaks up with him.
* The Loud House, but it's hard to tell if she's taking offense at the insult or that he doesn't want to kiss her. In "The Horror Scope", Ronnie Anne doesn't want Lincoln to have a crush on her, which could mean that she's afraid of getting into a relationship with him or that she simply doesn't feel that way about him. In the licensed game "Ace Savvy on the Case", Ronnie Anne's bio ends with "Has a crush on Lincoln?", and one tweet has Lincoln denying having a crush on Ronnie Anne but it doesn't say anything about her side.
* The Loud House, but Lola takes it and actually says, "I can't believe no one else wanted it."
* The Loud House, Carlitos calls Ronnie Anne "Wonnie Anne". Justified in that he's only learning to speak.
* The Loud House categories at times, she is still a friendly and outgoing girl and her heart is in the right place.
* The Loud House, chapter 21 Lisa uses this trick to determine if the "Lincoln" in her house is an imposter. She asks him how taking the Glow Serum (from the first episode of the series) she invented a while ago felt, and “Lincoln” answers it tasted like vinegar. The real Lincoln never took the serum (Lisa gave it to Luan after all) and thus shouldn’t know about this.
* The Loud House, Charles the dog pees on the floor and Lincoln uses Lola's dress to wipe it up.

* The Loud House, Cheryl claims that Lana's loud singing "scared the tinkle out of her". This is likely an expression, but Lana takes it literally and sprays her with the hose.
* The Loud House, Clyde and Lincoln are mistaken by a lady as members of the crew for the tv show ARGGH. They play along so they can enter the house and get a good view of the ghost hunting, but it’s because of this they are able to see what is really going on behind the scenes.
* The Loud House, Clyde gets hit by a ball and it knocks his clothes off, leaving him in his boxers.
* The Loud House, Clyde (who's 11) has a crush on Lincoln's oldest sister, Lori, who's 17 (making her at least six years older than him). Also, in one episode, Clyde (like every other male character, including Lincoln himself) develops a crush on Ms. DiMartino, an attractive female substitute teacher.
* The Loud House codenames but otherwise have rather mundane and ordinary communication protocol.
* The Loud House comic has Lynn and Lynn Sr. engaging in one of these while playing Jenga. The contest lasts through the days and into the night, when the tower gets knocked over right when they were about to have a tie-breaker by Cliff the Cat. Having grown tired of Jenga, they decide to move the competition to video games.
* The Loud House, complete with a boy wearing the lampshade prop. Lori's parents end up proud of her as they think teens are meant to have energetic parties.
* The Loud House) cried their eyes out about being away from each other even though they thought it was only going to be for the weekend.
* The Loud House during production of the show's third season, with story editor Michael Rubiner taking over as executive producer .
* The Loud House: Early on in Season 3, Lincoln becomes smitten with a new girl, Stella, and tries to impress her. When she officially shows up in "Be Stella My Heart", Clyde, Zach, Rusty and Liam also fall for her, and they compete to see who gets her. In the end, Stella reveals she doesn't have romantic feelings for any of them; she only just wanted to be friends.
* The Loud House episode "11 Louds A Leapin'". Near the end of the episode, once the family has opened up all their Christmas presents, Rita decides that it's time to start decorating for Valentine's Day and starts to take down all the Christmas decorations.
* The Loud House episode "A Tale of Two Tables", Lincoln's friend Clyde uses flash cards to help him identify fancy eating utensils. During a study session, Lincoln spots a candid picture of his older sister Lori in the bunch, to which Clyde embarrassingly quips "How did that get in there?"
* The Loud House episode "Brawl in the Family", a fight breaks out when Lori and Leni buy the same dress.
* The Loud House episode "Fed Up" recycles a bunch of shots from earlier episodes:
* The Loud House episode "For Bros About to Rock", Luna teaches Lincoln and Clyde how to crowd surf to move them from the back of the arena to the front row.
* The Loud House episode "Heavy Meddle" depicts Lincoln Loud with a Kick Me sign on his back.
* The Loud House episode "Heavy Meddle" has sitting on a whoopee cushion during lunchtime being one of the pranks Lincoln suffers in the montage at the beginning.
* The Loud House episode "Home Spun", Lincoln cites this as one of the reasons the Loud family's house is in such a bad state.
* The Loud House episode, "No Such Luck," Lynn believes that Lincoln is a jinx after he comes to one of her baseball games and her team loses. Pretty soon, the whole family starts to believe it as well and they make Lincoln sleep in the backyard.
* The Loud House episode "Save the Date", Lincoln's classmates sing the song to tease his relationship with Ronnie Anne. Later, when Lincoln tells Clyde that Lori has broken up with Bobby, Clyde proceeds to sing his own rendition of the song with himself and Lori and replacing the "K-I-S-S-I-N-G" with "Where there's no room for dumb Bobby!"
* The Loud House episode "Save the Date," where Bobby breaks up with Lori when

Lincoln hurts his sister's feelings despite Lori having nothing to do with it. It becomes clear he doesn't want to when he has to do it again later in the episode, and he is just as overjoyed as Lori when Lincoln publicly makes up with Ronnie Anne so they can get back together.
* The Loud House episode "The Crying Dame", Lincoln's card house suffers this fate.
* The Loud House episode "The Mad Scientist", Lisa wakes up while sleeping at an institute, having had a nightmare. She goes to tell her parents about the nightmare, but then realizes she's not at home.
* The Loud House episode, "Two Boys and a Baby", Lincoln and Clyde take Lily to the park to play to calm her down after they accidentally wake her up. When they try to bring her back home, they accidentally bring home a baby boy. They meet up with the baby boy's father, who tells them he accidentally brings home someone else's baby all the time.
* The Loud House episode "Washed Up", the boat sputters and Leni blushes, thinking it's one of her bodily noises. But does she think she's gassy, or that her stomach is rumbling? The former would be more embarrassing, but the latter makes more sense when she tries justifying it by saying that she "only" had yogurt for breakfast.
* The Loud House, every man in the country club is said to have his eye on Carol, even though Carol is seventeen and most of the country club members are elderly.
* The Loud House, everyone has a nightmare, like the title implies. Lori dreams that her siblings don't need her and she shrinks, Leni dreams that she gets immobilised and fed to spiders, Luna dreams that she gets trash-talked by her idol and an old lady, Luan dreams that her audience are all statues and Mr. Coconuts is sentient and mean, Lynn dreams that she accidentally decapitates Lincoln, Lucy dreams that she gets vomited on by possessed dancers, Lana dreams that she gets brainwashed into behaving more stereotypically feminine, Lola dreams that her facial features drop off, Lisa dreams that she gets sent to daycare and babied by an evil teddy bear, Lily dreams that the mortgage is a baby-eating monster, and finally Lincoln dreams that evil creatures replaced his sisters.
* The Loud House, except for the fact that they were made 4 years apart. To top it off, they even have tie-in comic books.
* The Loud House, Flip, the shady gas station owner that both Lincoln and Clyde get to work for, keeps making up new job titles and promotions in order to trick the boys into working harder. However,they don’t actually get more authority around the store because of it and still have to do the same work.
* The Loud House: "Friendzy" starts with the Loud Siblings fighting each other, and the police showing up to break up the fight. Lincoln then proceeds to tell the audience how things got out of hand so much.
* The Loud House, had a crush on Lincoln's oldest sister, Lori, in the first two seasons of the show—Lori's at least six years older than Clyde and she made it clear to Clyde that she wasn't interested in him (especially since she already has a boyfriend).
* The Loud House has Adrien, a boy slightly older than Lincoln, who suffers from an advanced form of Leukemia. He only appears in chapter 5, but both this meeting and the letter he writes Lincoln later mark a turning point for Lincoln, and the story as a whole, since it causes Lincoln to accept his fate and try to make the most of the time he has left.
* The Loud House has Adrien, a boy suffering Leukemia who appears in just 1 chapter. In this chapter, he and Lincoln meet in the hospital and spend some time bonding over their oncoming death. Sadly, we don’t get to see Adrien again after this encounter since he dies off-screen shortly afterwards. We next hear about him when his mother drops by at the Loud House to give Lincoln a letter Adrien left him.
* The Loud House), has caused some viewers to speculate that she is actually a trans girl.
* The Loud House has Cliff, the family cat, who is always caught in the crossfire of the kids' antics even on-screen.
* The Loud House has Down syndrome, just like his voice actor Jared Kozak.
* The Loud House has Lincoln and his family being white except for Lucy, who has

pale skin resembling a lighter shade of gray; Clyde is black with gay parents; and of course, the Casagrandes as a Hispanic family with CJ having Down syndrome.
* The Loud House has Lincoln Loud. His 10 sisters will generally be better at everything than he is, from leadership and music to intelligence and creativity. However he is acceptable at all their skills and can perform well at any of these skills when it is necessary.
* The Loud House has Lisa Loud, who, despite being the second youngest of the family, is also the most intelligent of all the siblings.
* The Loud House has Lucy saying "Boo" in two episodes. One to scare Lynn and the other to scare Lisa and Leni.
* The Loud House has the titular Loud family, consisting of Rita and Lynn Sr. and their eleven kids, with the sole boy, Lincoln, being the focus of the show.
* The Loud House: has this as one of the quirks of the titual (worn) home. The issues tend to happen to Luna Loud the most, much to her annoyance.
* The Loud House, he is seen chasing that very chicken demanding answers.
* The Loud House However, his birth book is left blank because the two were heading to a top secret safe house in Royal Woods which no one is to know about, thus the parents had to swear they wouldn't tell anyone else about it.
* The Loud House in 2018, which was released in 2019, and finally a live action holiday movie currently slated for November 2021.
* The Loud House: In "A Very Loud Halloween", Luan dresses as a psycho clown by taking her normal clown suit and putting fake blood on it.
* The Loud House: In "Cooked", when Mr. Loud tries to find employees for his new restaurant, the first three candidates are: a musical actress who wants the job to prepare for a role she just got, a teen whose parents forced him to get a job to pay for the damages he did to their car, and Mr. Grouse (who didn’t even come for a job, but only to complain the Louds’ dog wet on his lawn).
* The Loud House: In "Crimes of Fashion", Leni is fired from her job in the clothes store after being wrongfully acccused of stealing multiple scarfs. This prompts Lincoln and Clyde to find out who the real thief is.
* The Loud House: In "Fool's Paradise", one of Luan's pranks at the booby-trapped hotel involves hooking Lily with a fishing line, reeling her from her mother's arms, and lowering a monkey in her place.
* The Loud House: In "Funny Business" and several other Luan-centric episodes, she does the plates-on-sticks version.
* The Loud House: In "Lincoln Chases the Rainbow", Lincoln is nervous in an unfamiliar part of Royal Woods and hears a hiss. He jumps in fright, only to find it was a literal cat.
* The Loud House: In "Lincoln's Seventh Birthday", his gift from Lana is a jar of dirt. He also gets some blueberry compote from Aunt Ruth and worries that it may be expired.
* The Loud House: In "No Guts, No Glori", Luan uses camouflage when she and her sisters are sneaking into Lincoln's room to discuss a plan to overthrow Lori's tyranny as their babysitter.
* The Loud House: In "No Spoilers", when Lincoln has Leni make new clothes for him as part of a plan to keep the notorious blabbermouth from spoiling a surprise party.
* The Loudhouse: In "Pasture Bedtime", while at the pool party, Clyde does this to the dog that steals his and Lincolns' clothes, leaving both boys in their underwear.
* The Loud House: In "Patching Things Up", Lincoln and Clyde both drool a river of saliva when thinking about Bluebell Scout cookies. Lana and Lola have to walk under them with an umbrella.
* The Loud House: In "Sitting Bull", the four eldest Loud sisters, sick of Lynn's violent nature ruining their babysitting reputations, try to get her to quit by having her watch the Fox quintuplets, the worst kids they've ever sat. They soon feel guilty and try to save her from them, but find that Lynn's rough-and-tumble attitude helps her get along fine with them.
* The Loud House: In "Sleuth or Consequences", Lincoln and Lucy shine a flashlight

their sisters to get information on who clogged up the toilet.
* The Loud House instead of being unambiguously real occurrences had they been Season 1 or 2 episodes.
* The Loud House: In "Teachers Union", in order to get Mrs. Johnson interested in Coach Pacowski, Clyde and Lincoln sit close to her during lunch and start discussing the good qualities they discovered about the coach, loud enough for her to hear. Later, they use the same trick on Coach Pacowski, by talking about how nobody asked Mrs. Johnson out on National Ask A Teacher Out Day while the coach is within hearing range.
* The Loud House: In the episode "City Slickers," Lori does this with Bobby after her disastrous first day out in Great Lakes City.
* The Loud House: In the episode "Out of the Picture", the school computer Coach Pacowski has to use to edit the year book is horrendously slow.
* The Loud House: In the episode "Pipe Dreams", after Mr. Loud installs tons of security measures to keep the kids from entering the secret bathroom he and Mrs. Loud build for themselves, and also a mechanism to trap them inside if they do manage to get in, Mrs. Loud cheers "We'll catch them with their pants down". She then realizes how that can be interpreted considering it involves a bathroom and quickly states it's just a metaphor.
* The Loud House: In the "So Long, Sucker" short, Charles, Cliff, Geo, and Walt spend most of the short making a mess trying to get rid of a vacuum cleaner they're afraid of. When Lynn Sr. arrives home, he notices the house is clean (actually due to the pets cleaning up the mess they made) and says that the vacuum cleaner did a good job and he's buying five more, scaring the pets.
* The Loud House: In "The Whole Picture", one of Lincoln's photos he tries to recreate with Clyde is him sitting on a mall Santa's lap.
* The Loud House: In "'Tis the Season to Be Loud", the kids go to sit on the lap of a guy in Santa gear at the mall.
* The Loud House invents some voice-activated robot arms. Only, they keep mishearing Lori: They hear "bill" as "pepper mill", "stop" as "chopped", and "not what I meant" as "condiments".
* 'The Loud House: Invoked in the episode "Cheater By The Dozen". When following Bobby around town on the McBrides old tandem, Clyde actually asks Lincoln not to pedal because he wants to exercise.
* The Loud House involves Lisa having a nightmare where she's put in a diaper (and also a tee, but tees are more for everyone) and sent to daycare.
* The Loud House, in which the Loud family gets the flu. The first visible sign that things aren't right is that the upstairs hallway looks different— it's dark, it's a mess (while a bit of clutter is normal in the Louds' hallway, this time it's so bad that even the furniture is knocked over), the ceiling light is askew, and "RUN!" is written on the wall with a backwards "R".
* The Loud House: Ironically this trope doesn't apply to Luan who oftentimes works as a birthday entertainer and can roll with the punches, managing to work within the themes of the parties she's booked at. Rather this is the focus of the episode, "Funny Business", in which some of the Loud siblings try to work as her assistant and tend to flub things. Eventually Lincoln takes a turn and ends up taking some pratfalls at one of the parties. This goes over well with the kids to Luan's chagrin. But when he takes a party solo for a goth girl, this trope comes into play since, well, goths don't tend to be fans of pratfall comedy. Luckily Luan saves things by performing as a mime which Maggie, the goth girl in question, and her fellow goths all enjoy.
* The Loud House is a big success? Simple, it had many elements to appeal all ages. Not just children and teenagers, but to parents and grandparents too. Rock and Metal fans are converted to Luna, Moe lovers love Lily, Sports and Athletics fans are attached to Lynn, Comedy geeks with Luan, Superhero fans with Lincoln's interest of Ace Savvy and such.
* The Loud House is actually pretty gender-neutral in terms of its target audience, but there's no denying that a LOT of teenage boys and young men take an interest in it.

* The Loud House is allowed to partake in sports despite having her leg in a cast and needing a crutch to walk. No sane coach or referee would allow someone to play with a cast on, much less a crutch, as it's illegal and possibly even criminal to do. Paula also occasionally uses her crutch in her plays, which counts as cheating.
* The Loud House is Boris, the girl with braces is Persephone, the tall guy with glasses is Morpheus, the dark skinned one with dreads is Dante and the short kid is Bertrand)
* The Loud House is forced to dress up in a Miss. Clause uniform in order to make Mizuki (the child that she is babysitting ©Rokku-D) believe in Santa once more. However, due to the size of the uniform this lead for Lynn's buttcrack to appear and accidentally moon Mizuki.
* The Loud House is often given claustrophobic group hugs courtesy of his ten sisters.
* The Loud House is often portrayed as a Yandere, though she has acted somewhat psychotic at times in the actual show, particularly in "April Fools Rules" and "Fool's Paradise".
* The Loud House" is that Lynn Sr. thinks that he might be playing favorites, so he tries to give all eleven of his children equal attention. It is also revealed in that episode that his own father played favorites with himself getting the short end of the stick.
* The Loud House is too proud to admit she likes such melodramatic stuff and tries to watch it in secret. It's a bit justified since the Casagrandes are a family of Mexican immigrants, so the work is culturally geared to them, but most people in the city seem to be into it anyway.
* The Loud House". It then devolves into this as the older sisters find out that the younger sisters are listening in on the impromptu meeting.
* The Loud House Lana and Lola, he pretends to be them arguing with each other over who speaks to Pop-Pop first.
* The Loud House, Lana, being six years old, has a giggle at the thought of her parents letting her run around naked when she outgrows her clothes due to taking a muscle-enlargement potion.
* The Loud House, Lana drinks a potion that makes her stronger and beefier, gives her a preoccupation with exercising, and makes her mean, insulting her siblings and bragging about her strength.
* The Loud House, Lana gets irritated with Hops the frog running away because she always gets worried when he runs away.
* The Loud House: Leni is pretty dumb and has a crush on a boy named Chaz, who, while not as dumb as her, is still not the sharpest tool in the shed.
* The Loud House: Leni, Luan and Lily are very happy-go-lucky, Lynn is energetic enough to do many sports at once, and Luna is a rocker. Darcy also seems quite cheery, although she does cry when Lisa rejects her. Sid is also very upbeat and energetic and Polly Pain is energetic too.
* The Loud House, Leni's impostor is just as dumb as her and accidentally gives away the location of the real sisters.
* The Loud House: Leni sometimes takes things literally, for example, saying, "I don't know any other Lenis" when Lincoln says, "You're the best, Leni!".
* The Loud House, Lily and another baby get into an argument over a block and say nothing but "Block!" and "No!". Justified as they're semi-verbal.
* The Loud House, Lincoln’s mental trauma causes him to have several nightmares about his sisters torturing him. One is shown in detail, in Chapter 3; it involves Lincoln being chained to the floor of his house, while his sisters, now looking like demons, prepare to kill him with various weapons.
* The Loud House: Lincoln and all ten of his sisters, as well as many of the side child characters, just fill the series to the brim with cuteness.
* The Loud House", Lincoln and eight of his sisters ask to be homeschooled because they are jealous that Lola gets to be homeschooled during her pageant season. However, they soon find out that they have tests they need to study for if they want to stay homeschooled. Despite multiple warnings not to goof off from Lola, that's exactly what they do instead of studying for their tests, resulting in Lola

having to help them at the last minute.
* The Loud House; Lincoln and Mr. Loud are the only males in the family of 13.
* The Loud House: Lincoln can be seen doing this to Lori in the title card of "Selfie Improvement".
* The Loud House, Lincoln likes to read comics in his underwear, a habit his sisters frequently find annoying. Also, their youngest sister Lily, a baby, frequently ditches her diaper while running about.
* The Loud House: Lincoln Loud enjoys peanut butter and sauerkraut sandwiches.
* The Loud House, Lincoln says he would rather suffer for ten years in a glass cage with no food but accompanied by his sisters than live with his fake sisters.
* The Loud House: Lincoln's best friend Clyde has an obsessive crush on the oldest sister, Lori. Lori isn't interested in younger men, especially since she has a boyfriend she's deeply in love with. Clyde frequently makes a fool of himself in a desperate attempt to get her attention.
* The Loud House", Lincoln's sisters (minus Lily) all, at first, just stammer "Ba... ba... ba..." when they meet Hugh. Later on, Lincoln and his male classmates do the same thing when they see Ms. DiMartino.
* The Loud House, Lisa concludes that Luna is hallucinating her family singing, because her brain is trying to find the right genre for her song thus brings said genres to life in the form of each family member.
* The Loud House Lisa once developed lie detector technology and set up lie detectors all over the house, forcing the entire family to be truthful at all times. Eventually Lisa comes to realize that sometimes a little lying is okay.
* The Loud House, Lisa's nightmare involves being spanked by an evil teddy bear.
* The Loud House, Lisa, when scared, acts just like a normal scared little girl, and she's later seen crying and laughing.
* The Loud House: Lola is an Obnoxious Olivia, which is why her siblings never include her in their confession circle, where they share their naughtiest mistakes and misdeeds under oath of secrecy from their parents. Of course, their actions seem to be justified when Lola tries to retaliate by tattling to their mom about not being let in.
* The Loud House: Lola makes several smiles when she plans revenge on her sisters for slighting her in their fake stories about making her mad.
* The Loud House, Lola's cake is too sweet, Luan's jokes are all about Rita being old, Luna can't think of a song Rita would like, and Lisa has invited three men Rita doesn't like. However, this all happens before Rita gets home and when they realise things are going south, they get Leni over, who throws a successful party for Rita.
* The Loud House, Lola's nightmare involves parts of her face falling off until she has no face.
* The Loud House, Lori accuses one of her sisters of lying when she says Lori is not in charge anymore.
* The Loud House, Lori cries out of fear that she is insane or that her attempt to exorcise a supposedly-possessed Carol will kill her.
* The Loud House: Lori has threatened to turn Lincoln into a "human pretzel" more than once.
* The Loud House, Lori's nightmare involves her siblings saying, "We don't need you" in a monotone voice similar to Lucy's.
* The Loud House), Luan makes jokes about how old their mom's getting, such as her social security number being 1, and all the guests from her first birthday being extinct. Lori is not amused.
* The Loud House, Luan says that comedy is more than "silly puns and knock-knock jokes".
* The Loud House, Luan tries to give Luna a massage using her ventriloquist dummy Mr. Coconuts. Because he's made of wood, this just gives her a cramp in her back.
* The Loud House, Lucy has a nightmare about dancers with blue eyes that turn red when they're angry.
* The Loud House, Lucy pees her pants after Lana blocks the bathroom from her.
* The Loud House, Lucy walks with her legs clenched together because she has to

pee.
* The Loud House: Luna Loud does this, which makes sense given she is an aspiring rock star. This causes problems in the episode "Attention Deficit" when her siblings overhear her singing about hanging out with Clyde's dads while they give her undivided attention.
* The Loud House, Luna says, "Leni!" to scold her for bringing up Lincoln, and then Rita says, "Lynn Junior!" to scold her for swearing.
* The Loud House Lynn has to share a bedroom with Lincoln; when he starts complaining about her messing everything up, she interrupts with "I'm noticing a complete lack of balls in this room." Since she's the family jock, she was of course referring to sports equipment.
* The Loud House: Lynn is the sports star of the Louds. In "The Butterfly Effect" Lincoln predicts that if Lisa doesn't tutor Lynn, she'll flunk miserably in all her classes.
* The Loud House, Lynn loves spicy food and while it does sometimes make her red in the face or breathe out steam, she actually likes it. In "Singled Out", her temporary boyfriend Dexter is chosen because he is the only boy in her class who can eat a spicy burger without flinching.
* The Loud House Lynn Sr is this, to the point he cooks all of the family's meals and eventually opens his own restaurant.
* The Loud House, Lynn warns Lincoln that his teacher Mr. Bolhofner's breath reeks of sardines with a hint of red onions and farts. She's not kidding, as Mr. Bolhofner tends to force his breath on Lincoln to torture him.
* The Loud House, Mia literally drags his thought form from her mind and crushes him to death between her hands.
* The Loud House, Morag quotes the theme song while complaining to Angus about the Louds' presence at the castle.
* The Loud House Movie, since his father and paternal grandfather are both still alive. Third; Lincoln being given control over the town along with his new title is also not likely to happen in real life; Scottish dukes were never rulers of cities to begin with, and in the 21th century noble titles in general no longer grand political power or duties; they’re just proof of having a prestigious ancestry.
* The Loud House, Mr. Coconuts taunts Luan in her nightmare by chanting, "Luan isn't fun-ny!".
* The Loud House (no relation to the episode), Lola's uncharacteristically evil behaviour is explained away by a reveal that she's Satan, but that just raises more questions:
* The Loud House: Occasionally you'll see one of the Loud siblings shipped with their gender-flipped counterpart from the canon episode "One of the Boys".
* The Loud House. Once there, they learn that even some kids from Lori's class still love Ace Savvy despite being years outside the target demographic.
* The Loud House. One time, Lincoln's sisters even formed a vortex called a "sisternado". In "The Loudest Thanksgiving", Lola and Carl get into one of these after the latter unplugged Luna's electric guitar by accident.
* The Loud House. On the other hand, she is also one of the nicest and most beautiful characters in the show.
* The Loud House or a short pipe organ chord plays. She and Luna Loud also play one in the episodes "House Music" and "Tricked!" respectively.
* The Loud House orifice of hers, but changes her mind when she notices baby Lily nearby.
* The Loud House, or if she just likes writing stories like that because she's gothic.
* The Loud House parodied this in "One Flu Over The Loud House" involving the flu spreading among the family, but playing it out like a zombie infection.
* The Loud House: Played with in "Insta-Gran". The Loud kids do use photoshop to make a fake photo of Seymour and Myrtle apparently kissing. However, Pop-Pop never considers that the photo might be fake, and immediately confronts Seymour about it, even telling him that “pictures don’t lie”.

* The Loud House probably aren't caused by food since Lori and Lincoln note that it's an odd coincidence they all had a nightmare on the same night, the fanfic does end with a message not to eat Hawaiian deep dish pizza if you want to avoid nightmares.
* The Loud House punishment for this, his parents and sisters making him sleep outside was seen by many fans as too far.
* The Loud House "Really Loud Music", Luna is torn between what she should write her song about so the whole world will adore it; it is that point she begins hearing and witnessing her family randomly bursting into musical numbers suiting their respective images (Lana singing a toilet jam, Lola singing a show tune, Lisa rapping, Lori and Leni doing a silly love ballad, and so forth). When she questions them about each song, they claim they weren't singing. Lisa points out Luna is actually hallucinating her family singing as a result of her uncertainty and her brain trying to find the right sound for her song.
* The Loud House regularly competes in beauty pageants, and this has served as the plot point for several episodes:
* The Loud House, "Roughin' It": Lincoln and Clyde build a (crappy) shelter. Clyde comments, "What a beaut!" right before one of the sticks of the shelter fall over.
* The Loud House said his favorite episode is "For Bros About to Rock".
* The Loud House, seems to have minor sensory issues, and goes to speech therapy.
* The Loud House: Several of the kids employ the trope or variations of it:
* The Loud House", she faints in humiliation at one point when her double deliberately loses tetherball to Zach.
* The Loud House, she immediately laments that this means feta cheese isn’t coming.
* The Loud House short "10-Headed Beast", Lincoln and Clyde imagine themselves as fully-grown, muscular warriors... that still have their high, preteen voices.
* The Loud House sister, Lucy, who has black hair while their parents and the rest of their sisters have either blonde like their mom or brown hair like their dad (Lincoln has white hair, which he apparently inherited from his maternal grandfather). It's never explained how Lucy has black hair (much like how it's never truly explained why Lincoln has white hair), but assuming that it's her natural hair color, she may have inherited it from her great-grandmother, Harriet (who, as shown in pictures, is the spitting image of Lucy).
* The Loud House so he can go to a comic book convention. Near the end of the episode, it is revealed that Lucy is a fan of Princess Pony, but she didn't want anyone to find out, given her goth reputation. She hid the book in the toilet, but Lincoln accidentally flushed it down, not knowing it was there.
* The Loud House so he can return home so Lisa can study the machine and so on.
* The Loud House's own experiences growing up in a large family. That said, the five Loud girls who were given the names of Savino's sisters (Lori, Luan, Lynn, Lana, and Lisa) don't share personalities with their namesakes.
* The Loud House stand out from the rest of her family's in that they are brown slip-on shoes with a pink squirt flower on each.
* The Loud House: Subverted in an episode. Lincoln goes to his sister Lori for advice on how to hook up a friend with a girl. Lori thinks that Lincoln has a crush on a girl, but in reality he is really trying to pair up two of his teachers.
* The Loud House (supporting character Clyde has two fathers, and main character Luna has a romance arc with another girl named Sam)
* The Loud House that involves both a black hole and a wormhole in its construction.
* The Loud House, the entire Loud family gets turned into babies and has some fun running around naked.
* The Loud House: The episode "Last Loud on Earth" is banned for the horror and zombie themes.
* The Loud House: The episode "Stage Plight" is banned due to a scene of Luan and Benny kissing.
* The Loud House: The mall Santa says that no human can beat a Christmas elf in a footrace.

* The Loud House theme and while at the same time, adding other properties such as SNK's games into the mix.
* The Loud House, the monster in Lily's nightmare has pus coming out of his tongue.
* The Loud House, the name of the protagonist (Lincoln) and one of his sisters (Luna) rose in popularity, with the former name breaking the top 50 and the latter name breaking the top 15.
* The Loud House). Then, in the dream, Lincoln turns into a girl and is seen wearing a dress and hairclip, having long hair, and having a pink-decorated room.
* The Loud House, there is a brief flashback in which Ronnie Anne and Bobby think their mother is covered in blood, but it’s actually cranberry sauce from the thanksgiving dinner.
* The Loud House, there's, as well as the canonical Leni, a woman named Jolene who's "vibrant and energetic", which is part of the reason Lincoln has a crush on her.
* The Loud House. There's one slice of pizza left and both Lincoln and Lana want it. Lana, under the effects of a strength potion, armwrestles him for it, dislocating Lincoln's shoulder.
* The Loud House. The show, which was already popular to begin with, had the fanbase grow as a result of these episodes.
* The Loud House, the tarantula is named Frank, but then it turns out to be a girl so she's renamed Frances.
* The Loud House: This is what kicks off the plot for the episode "Rita Her Rights". Rita Loud is sentenced to do community service, namely picking up trash in the park, after getting too many traffic tickets. But she finds her stay at the park much more relaxing than being at home, and thus keeps committing small crimes to get more community service.
* The Loud House: This kind of shot appears in "House Music" when Luna has trouble writing a song.
* The Loud House this trope. When training Lincoln for football, Lynn prepares the typical raw eggs for him, however all they do is make Lincoln get sick and throw up. Another instance of this trope occurs in "Sitting Bull", where Lynn has a couple of little kids she's babysitting guzzle down some raw eggs after making them do strenuous exercises. One of the kids is seen puking up the egg he swallowed later, to which Lynn remarks that it was a waste of "two perfectly good eggs", implying that the boy's sister likewise threw up her egg off-screen.
* The Loud House. Throughout the episode "Potty Mouth," everyone believes that they heard Lily say "Damn it," when actually she just wanted a doughnut. She does eventually get one in the end, only for Charles, the family dog, to steal it from her, which causes her to get so angry, that she lets out a real swear word.
* The Loud House to an anime style with the sibling seemingly wielding powers as they get ready to fight for the last slice.
* The Loud House to save the pond. At the end of the episode, she ends up covered with mud again.
* The Loud House to the episode when Clyde cues them up at school the following day.
* The Loud House "Tricked", Lincoln and Clyde manage to get inside Huntington Manor to trick-or-treat by posing as Alistair and Nigel, two boys who live there and look exactly like them to the point that they could be twins.
* The Loud House turning into monsters, they're just getting the flu, but the healthy kids are treating it like a zombie apocalypse. Leni, however, thinks they should help them.
* The Loud House was recorded in Turin until halfway through Season 4 and then moved to Milan. Most of the voice cast is formed by Turin-based and Milan-based voice actors, but also features three Rome-based voice actors in the main cast: Alessio De Filippis as Lincoln, Monica Volpe as Lola and Elena Perino as Luna.
* The Loud House) were created to explore and examine the lives of the Loud siblings' opposite-sex counterparts.
* The Loud House when he is sitting next to a speaker in the family van playing a romantic song his parents danced to at their prom.

* The Loud House", when Lincoln, Clyde, Rusty, and Zach go to Girl Jordan's party, Lincoln and Clyde choose to swim in the pool, but because they didn't bring any bathing suits, they strip down to their underwear. Their clothes later get stolen and eventually torn to pieces by a dog.
* The Loud House, when Lucy pops up and scares the two-month-old Lisa, Lisa soils her diaper. Later, when three-year-old Lisa is sitting on her potty, Lucy again frightens Lisa into pooping.
* The Loud House when Lynn Sr. mentions the girls possibly crying enough to require a row boat.
* The Loud House when she doesn't get her way. There is also the fact that she regularly attends beauty pageants and acts like a spoiled princess most of the time.
* The Loud House, where Luan is wondering why her puns aren't even provoking a groan; everyone is silent.
* The Loud House, where Lynn's nightmare involves accidentally beheading Lincoln, whose head then talks but it's implied he's still dead.
* The Loud House, where the spiders in Leni's nightmare are enlarged with "Super Spider Growy Stuff".
* The Loud House, which chronicle the adventures of Lincoln's children fathered with his sisters and/or the various other females in the series, as well as how both generations deal with the fallout of said children, over various fanarts and fanfictions by different authors.
* The Loud House, which gets to a point in which even the parents are victims of her pranks.
* The Loud House, which she carries around in a plastic bag. Appropriately, this version of her is called, "Twisted Lynn."
* The Loud House. While Lola believes that this was the judge's intention, it's actually left unclear.
* The Loud House who took his box of Zombie Bran cereal, the kid tries to slow him down by spilling coffee beans on the floor. To get across them, Lincoln takes some linked sausages from the nearby deli and uses them like a rope to swing over the coffee beans.
* The Loud House Will be getting a Live Action Christmas themed movie that will premiere in November 2021
* The Loud House will take up all the room and cause chaos before he can even get in.
* The Loud House: With a cast of mostly female leads, it was no surprise one of them (Luna) eventually got a canon girlfriend. Clyde, Lincoln's Black friend, was also the adopted son of an interracial gay male couple. Both have been well received from their communities.
* The Loud House with all of these episodes being in regular rotation.
* The Loud House, with a notable occasion having her discussion of a "highway to-" being interrupted by an alert on her laptop prompting an intrigued "Hello!"
* The "Loudness" modifier (a reference to The Dirty Of Loudness, famous for its
* The loudness of cheap speakers is sometimes advertised using a measurement called PMPO, a representation of the maximum power output the speakers are capable of. Problem is,
* The loudness of the Cillit Bang ad was even parodied by a comedian
* The loud one who is usually on the phone shouting "Get me ze Führer!".
* The Louisiana Maneuvers of 1941, largest exercise of the US Army to that date had an elaborate backstory drawn up whereby two fictional countries were "fighting" over the navigation of the Mississippi.
* The Louis Tussauds Waxwork Museum, in Great Yarmouth, has been described repeatedly as such because the waxworks are dubbed the worst ever made. It was paraded on a Series 44 episode of
* The Louisville women's basketball team faced several Goliaths during their 2013 NCAA tournament run.
* The Lounge, for a while it was a running gag for people to see the very petite Jamie MacKenzie and equally short (but teenage) Max Espinoza and ask how much they

cost. Usually when they were wearing a cute hat or costume.
* The Louvre was burned to the ground as a birthday present for Murderface after he declared all the art in it stank.
* The "Loveable" Igniz in KOF 2001 won't accept anything less than godhood. Once you beat him, his response is to send the meteor base you're fighting on (long story)
* the love between the two characters is so great. These people are typically left alone.
* The Love Boat, a movie is being filmed aboard the ship. Johnny Lovett, a rock star, has never acted before and isn't quite conveying the right amount of anger needed for the scene. Between takes, Vicki pulls him aside and brutally insults him. When filming resumes, he's boiling with rage—mission accomplished.
* The Love Boat, as played by Gavin McLeod. In one episode, he's upset because the ship is going to have a costume ball and he can't think of any bald character he'd like to dress up as. In the triumphal conclusion of that plot, he enters as Yul Brynner in "The King and I".
* The Love Boat as the crew will spend the episode on some zany adventure and when it's done, agree it's best not to let the Captain know about it and never mention it again.
* The Love Boat, a woman comes on board with her son, to meet the daughter she gave up for adoption. Before they all get together, the son and the daughter meet, and, not knowing who the other is, they fall in love and have sex. The daughter is freaked out when she meets the mother and discovers who the guy she slept with is. Fortunately the son is actually the mother's step-son, so the couple aren't blood siblings and can get married, but the mother has no idea how she'll phrase the wedding invitations.
* The Love Boat, during the opening check-in scene, Dr. Bricker appears wearing only a raincoat and hat. It turns out a girl he met wanted to go skinny dipping. She then took off with his clothes, and he got the raincoat from a fisherman.
* The Love Boat episode "Mind My Wife," Doc tells a joke that ends with "And the planet says, 'If I could do that, I'd be a star!'"
* The Love Boat episode "Return of the Ninny," a woman plans to have her fiancé's kids sent to boarding school and the nanny fired so she won't have to deal with them. Her plans call apart when the father hears the nanny discussing the future with the kids, causing him to call off the engagement.
* The Love Boat episode "Sally's Paradise," a woman impulsively accepts proposals from three different men, all of whom end up on the same cruise ship. When they find out about her, they agree that she'll pick one, and the other two will stay out of her life. She likes having three men pay attention to her so much that she tells each of them that he's the one, and the episode ends with her still engaged to all three, plus a fourth guy she just met.
* The Love Boat episode "The Perfect Match," a woman who feels ready for motherhood but not marriage searches an insurance company's computers for the perfect man, stalks him to learn all about his interests, and follows him aboard to conceive the perfect baby.
* The Love Boat guest-starred a black female and not a black male, said black female would be after Isaac and/or vice-versa.
* The Love Boat has someone falling or being shoved into the swimming pool.
* The Love Boat Isaac does this when forced to share a cabin (and a bathroom) with the other male crew.
* The Love Boat more specifically than "April or May," which she only remembers because his birth interrupted a social function.
* The Love Boat one man throws another into the pool after the victim says that he knew the thrower wouldn't be able to get Angela's number. Cleaning up the resulting puddles is Isaac's task for the level.
* The Love Boat pilot movies, all of which had different actors playing the regular lead roles.
* The Love Boat so they could go on the cruise that was inevitably taken for location shots.

* The Love Boat; so they make a prop shower for him to sing in for the show.
* The Love Boat, Stubbing falls in love with a passenger on a cruise to the Netherlands. He tracks her down to her place of business in Amsterdam...and discovers she runs a brothel. The shock of it nearly drives recovering alcoholic Stubbing to break his decade-long sobriety until Doc stops him.
* The Love Boat takes a cruise. Julie is thrilled to see him, saying, "You're the man who murdered his wife! Ooh, I hate your guts!" Later, an old lady hits him with an umbrella because "I just know you're plotting to kill Dr. Jarrat!"
* The Love Boat: The captain has sent Gopher on deck to tell a nude sunbather to cover up. Although she is not seen on camera, her voice is heard. When she stands up, Gopher is noticeably awed at the sight of her.
* The Love Boat, where the "big sister" ends up telling her daughter the truth.
* The Love Bombbuys her roses before he comes home, convinced that the gesture will be lost on her. He finds her cooking his favorite dish—which, for that very reason, she'd previously vowed never to make again—and looking dewy-eyed. And so on.) In many cases, it acts as an aphrodisiac.
* The Love Bug age- had 40 hp), it still manages to be as powerful as a stock car.
* The Love Bug, as Thorndyke's car is stuck in the mud and his assistant Havershaw attempts to push it out, a bear enters the car, enticed by the food they had. After they get out, Thorndyke immediately takes off without Havershaw, but because his racing goggles are heavily smeared with mud, he doesn't realize there's a bear until he strikes it, making it growl and prompting him to faint.
* The Love Bug, but even then Herbie could have only qualified as an honorary pace car.
* The Love Bug everywhere, including an entire herd of Volkswagen 60s Beetles in the ending.
* The Love Bug, it was implied that this was how Herbie (the eponymous car) developed a mind of his own.
* The Love Bug that loves to race and helps out its owners with their financial and romantic problems along the way.
* The Love Bug: The 1997 TV movie introduces Horace the Hate Bug, a malevolent version of the heroic Herbie.
* The Love Club, even in modern times. Turtle Heart was deported for practicing magic.
* The Love Club that Glinda didn't expect the soft-looking Munchkinlander Boq to have such a deep voice.
* The Loved One as the Reverend Wilbur Glenworthy, owner of Whispering Glades cemetery and mortuary, and his brother Henry Glenworthy, owner of Happier Hunting Grounds pet cemetery.
* The Loved Ones, a claw hammer is one of the tools Lola's father uses to torture Brent.
* The Loved Ones. Although Lola and her father have never slept together, it is clear that both want to, Lola being the aggressor in this case. Unlike her, her father at least seems somewhat hesitant, and understandably so.
* The Loved Ones: Between Lola and her father. They get inadvertently interrupted by Brent.
* The Loved Ones. Her father, who is also the local police sergeant, looks suspiciously at Jamie but also seems grateful for the chivalry he is showing.
* The Loved Ones is about a teenage girl, with help from her dad, kidnapping her high school crush so that she can have the perfect prom with him.
* The Loved Ones, Lola and her father force Brent out of a tree by throwing rocks at him. He loses his grip on the branch, falls out of the tree, and lands painfully on the bonnet of the Kingswood ute, before bouncing off.
* The Loved Ones perform makeshift lobotomies on their victims by drilling holes in their heads and pouring boiling water inside.
* The Loved Ones take less than 24 hours: starting at the end of the school day and finishing early to mid morning the following day.
* The Lovegood family is also mentioned in the fourth book as one of the families at the Quiddich World Cup.

* The Love Guru during a diner scene a meal called "nuts in a sling" is prepared by Pitka’s assistant. It is two lychee nuts in a dough pouch. His assistant asks him if he wants his nuts crushed and Pitka responds incredulously with "doesn’t everyone". As they are whacked with the wooden mallet Pitka exclaims and grunts and groans. Jane goes from entertained to wincing. He shouts out his safe word. The next step is dipping it in hot oily water. Pitka groans in discomfort at first, hissing and groaning then moans in pleasure.
* The Love Guru has a barroom brawl that ends with a character having a pool cue shoved up his butt.
* The Love Guru Pitka calls his testicles the common slang “balls.” Coach Cherkoff calls his scrotum his “dink-bag”
* The Love Guru-style goalie mask was about thirty years out of date, as was his personal appearance.
* The Love Interest, but they fall in love with each other instead and choose to defy the organization so that they can be together.
* The love interest gets injured, and the tough character treats them and suddenly reveals a tender side.
* "The Love" is a series of shorts about love, all of which are being told to Bobert to try to teach him about it.
* The Love Letter, a modern-day American man finds letters written in the 1860s hidden in his antique desk. He fancifully responds to these letters by routing his own through a pre-Civil War post office, where they are mysteriously transported back in time to be delivered to the original writer (a previous owner of the desk), who then replies by hiding 'new' letters.
* The Love Light" in his sleep, she realizes that he is actually a German spy.
* The Lovely Bones a cornfield on her way home from school when a neighbor lures her into a secret underground room, rapes her and kills her.
* The Lovely Bones a girl breaks into her neighbor's house to look for incriminating evidence in the death of her older sister.
* The Lovely Bones - A young girl is lured into a bunker and killed, the remainder of the film constitutes her family and friends coming to terms with her horrific death.
* The Lovely Bones ends with Susie moving from the in-between into heaven after she completely accepts her death.
* The Lovely Bones. He's making a home movie in the store that Jack goes to to get Susie's camera film developed.
* The Lovely Bones is a book that basically is about a dead girl examing what happens to her family and friends after her death. Needless to say we spend a lot of time getting to know a lot of characters in scenes that aren't really a direct part of any big mystery around her murder or focusing much on Susie. So in the film a lot of these went, the problem with such is without a lot of that, the audience fails to get to know a lot of those other characters.
* The Lovely Bones is narrated by a girl who was brutally murdered and observes from the afterlife her family dealing with her death and searching for her killer.
* The Lovely Bones originally adapted the subplot from the book where Abigail has an affair with the detective. There's a lot of chemistry between the two characters in a scene at the police station - which was clearly meant to start the subplot off. And later in the scene where Jack hugs the detective, he can be seen looking a little guilty.
* The Lovely Bones: Ray and Susie are about to kiss when they are interrupted by the principal. They get to finally kiss in Susie's afterlife, though.
* The Lovely Bones starts with the murder of the main character and mostly follows her watching her family from heaven.
* The Lovely Bones starts with the murder of the main character, and the book mostly follows her watching her family from heaven.
* The Lovely Bones, Susie and Ray have a romantic episode when she accidentally possesses Ruth's body, but this lasts briefly.
* The Lovely Bones, the protagonist thinks she's escaped and only realizes she's dead (and falls into a limbo-like area) when she notices her corpse.

* The Lovely Bones too, so Holiday was right on the money to be warning little girls and pets alike.
* The Lovely Bones: When Susie's dad is dropping off rolls of film to be developed, Jackson's in the store trying out a film camera.
* The "lovely" date between Darla and Alfalfa (including sabotage by the members of the gang) in
* The "love nest" song: A song describing the type and/or location of the cozy little home a couple would plan to settle down in.
* The love of gold, of course, is very probably from the miner/craftsman aspect (especially since it is often compared to their love of iron) making things seem very recursive. The Dwarfs seem to have the tendency of being put in the place of any immigrant ethnic group whether black (in
* The Love of Siam, a story about two childhood friends who meet up again as teenagers.
* The Love of Siam. The two gay characters in the movie never even had sex, with each other or anyone else.
* The Love of Siam: Tong and Mew never really got into the relationship/dating phase even though both characters love each other.
* The Love of Siam. When Tong's mother forbids Tong from seeing Mew, he simply brushed her off and went to search for Mew. Unfortunately, the two boys don't get together in the end. However, the movie do end with a bittersweet ending with Tong confessing his love for him. Furthermore, there's many foreshadowing that they will get together in the future.
* The Love of Siam. Ying decides to help Tong get together with Mew even though she loves Mew. She is willing to give up Mew, the person whom she has loved since she was a child because she knows Mew is in love with Tong. She wants him to be happy over herself.
* The Love of Siam. Ying is an attractive girl. However, no one in the movie ever compliments or even asked her out. Ying's friends who are arguably less attractive than her even pokes fun of her for being single.
* The Love of Siam: Ying is in love with Mew, but Mew is in love with Tong. Tong is in love with Mew, but he's also in a relationship with Donut. Donut is in love with Tong, but Tong does not love her.
* The Love of Siam. Ying, the Chinese girl who has a crush on Mew. Throughout the movie, she is kind and helpful to both Tong and Mew. She is the only person out of Tong's friends to comfort Tong when he is confused about his sexuality. It should be noted that she's not that close to Tong and only just met him not long ago. She also helps Mew with his love song and fixes him up with Tong despite knowing that in doing so mean she would have no chance with Mew in the future.
* The Love of the Nightingale to Procne but falls for her sister Philomele. However neither even likes him.
* The Love of Three Oranges", a slave murders the heroine with a hairpin. When she returns as a dove, she has her killed and cooked. When she returns a third time, the king asks what sentence would be suitable for someone who harmed her, and the slave prescribes burning, and the ashes being thrown from the palace roof; so she is.
* The Love of Three Oranges", the princess is turned into a canary by the servant who tries to take her place.
* The Love of Three Oranges, the slave sees the heroine's reflection in the pool and thinks it's hers. It goes straight to her head and causes a lot of trouble.
* The Love of Three Oranges": To find a bride, in most variants, often the one he's cursed to have to find.
* The Love Parade Count Alfred says that seeing a cross-eyed person is bad luck for him. On the morning of his wedding, everyone he sees (including the portrait on one of his medals) is cross-eyed.
* The Love Parade provide a plebeian contrast to the royal principal couple.
* The Love Parade. Then Alfred's valet Jacques sings about his romantic nights with the maids and shopgirls of Paris. Then Alfred's dog barks out a verse, which is pretty clearly the same sentiment, but about the, er, bitches of Paris.

* The Lover about her scandalous interracial affair, the Girl finds herself ostracised at school.
* The lover and/or the beloved are uncomfortable discussing their emotions—especially with each other!
* The Lover) is a 1992 French film based on the novel of the same name by Marguerite Duras. Set in French Indo-China in 1929, it depicts the illicit affair between a fifteen-year-old French girl from an impoverished family and her wealthy Chinese lover — as a result, the trope applies to both parties due to the racial/social divide.
* The Lovers, and people must eat silently while wearing special "eating caps" that hide them chewing.
* The Lovers: George Michael and Maebe, although Maebe tends to also often be the rare female version of Arlecchino.
* The Lovers love, she's much better at it than his wife (that he was divorced from when he signed in as an astronaut) ever was.
* The Lovers one of the few works ever to officially be declared to be of serious artistic value in a government document.
* The Love Slap of Epiphany: A character realizes how awful they've been to somebody who loves them after getting slapped by that person.
* The Loves of Hercules Hippolyta, Queen of the Amazons, wants a piece of Hercules so badly so was willing to change her appearance to look like his love interest Deianera, despite that she apparently believes the loss of features to be the greatest price any woman can pay. But apparently "Hercules is worth it". Although also worth noting she was probably going to turn him into a tree once she was bored with him...
* The Loves of Hercules, without injuring her. Licos, her treacherous General who set up the trial, fully expects Deianera to die, but Hercules volunteers to be the axe-thrower and successfully frees her.
* The love that exists between the Doctor and Clara Oswald reaches its climax in Series 9 when
* "The love that loves to love to love that loves to love that loves to love..."
* The love that the Winchesters have for each other is often used to manipulate them.
* The love triangle between Havok, Polaris, and Iceman has Havok as the Scoundrel and Iceman as the Gentleman. Havok and Polaris have been through hell and back together since the earliest days of the comic.
* The "Love Will Tear Us Apart" story features a protagonist that is a clear mishmash zombie - he eats brains as the result of an infection, but retains his intelligence and some memory of his previous life, and even
* The Love Witch: The Wiccans are often naked while conducting ceremonies, which includes some good-looking men and women (not all though). A stripper also performs her show in the background while Elaine is speaking with two of her fellow Wiccans in the club, which the camera frequently moves to focus on.
* The love you take is equal to the love you make.", and "Stalk your bliss."
* The Lovin' Spoonful) includes the line, "When they're droppin' a piano from the forty-seventh floor, I'm the guy underneath 'em lookin' up..."
* The Lovin' Spoonful, "Summer in the City", which had a much harder sound than their usual folk-pop. Their second biggest hit, "Do You Believe in Magic?" was poppier than their usual sound.
* The low budget 17 minute reunion special that was made to repair the damage of The Source. There's a link to it on Hulu on the Other Wiki if you haven't given up on this franchise yet.
* The low-budget indie, "Have You Met My Son?" has the protagonist's closeted gay son unintentionally invoke this when he becomes engaged to a
* The Low End Theory shows a stylized black woman painted green and red.
* The Lower Depths makes his entrance by singing a song loudly and horribly out of tune while dancing wildly and thumping on a drum, and proclaiming his release from jail at the top of his voice.
* The lower group of Elite Mooks have more health and are less numerous than the

regular Mooks, but still don't put up much of a fight.
* The Lower Planes. Besides the infestation of devils, demons, and other nasty things, 3.5 makes them quite literal death worlds. In several senses. The Abyss' colloquial description is "too horrible for conventional wisdom to comprehend" (one of the random things you can encounter on its infinite layers is an
* The lower-ranked Espada The Smooze, Squirk, Grogar are counted less for their strength so much as their unique powers and skills. The Smooze in particular notes that even with his rank as the 10th Espada there are quite a few Fraccion who have more spiritual power than him but his
* The "lower yokai" have the shape of large insects or worms. Whenver they're shown, they have nothing else in mind than attacking humans (or half-yokai). And although many can speak, they do not seem to be overly clever.
* The lowest class in the UCAS (United Canadian and American States) is the SINless: people without a SIN (System Identification Number). Anyone without a SIN basically has no civil rights and no right to receive benefits normal citizens can expect, such as medical care. SINless metahumans tend to be very poor and homeless, with either a low-paying job or no job at all. They are often discriminated against and mistreated by those with SINs and have little hope of survival or bettering themselves. Amusingly, in some editions, "SINner=}" is available as a ''disadvantage''; the price of being a recognized citizen is that if you ever ''use'' your SIN, you have a paper trail - and a paper trail is generally the absolute last thing a Runner wants.
* The lowest denomination of currency in Australia is 5 cents, ever since the 1 and 2 cent coins were abolished in 1990.
* The lowest female voice is called "Alto"... coming from a Spanish and Italian word that means high.
* The lowest level are called dregs. These are mutants who essentially have harmful or useless mutations. Mutants that have an altered body but no real superpowers are dregs.
* "The Lowest of the Low%" requires you to beat Dungeon Mode with permadeath on without the use of any A/B/X/Y buttons.
* The lowest possible score on the Fall Festival strength game is "George's knee". George is paraplegic.
* "The Low Road", an episode heavily involving Rattrap and Dinobot bickering, slapstick, and
* The low standards for science in the show are obvious when, during the
* The low-tier item that provides magic resistance (the stat that calculates damage reduction from magic abilities) is called Null-Magic Mantle, evoking the idea of this trope.
* The Loyal Faction. Common in TBS games which require you to keep your citizens content (or at least brutally suppressed), this faction has particularly high morale, which lets you focus your resources on building tanks instead of entertainment complexes. Often a good choice for beginners since it makes it a little easier to keep things running smoothly.
* The loyal Stark retainer Rodrik Cassel is a strong, loyal, and honorable
* The loyalty missions are limelight episodes. To have the best chance of success, you want to do all of them which means each one of your squad mates will have at least one episode of
* The loyalty missions cover the gamut from Mordin's guilt to Miranda's love for her sister, Jacob's fury at discovering what his father did, Jack's realization of what really happened to her when she escaped, Tali standing over her father (and depending on how the player does it, the moral outrage he/she lets loose on the Quarian leaders while defending Tali), Kasumi's personal loss, Thane's attempt to reach out to his estranged son...really, Mass Effect 2 is full of these, all done very well.
* The loyal warlock Merlin and the king's ward Morgana, from the BBC's
* The L/R confusion is actually not just a staple of East Asian languages. It happened in
* The L-Shaped Room, set in the '50s: the protagonist gets pregnant after a one

night stand, and although she refuses the father's offer to marry her, he still feels guilty and wants to help. After helping her get back in contact with her "boyfriend," the father deliberately provokes a fight so that the boyfriend can beat him up and, having taken his beating, feels absolved of all guilt or responsibility in the pregnancy.
* The LSU football team notably used this trope in the 2007 game against Auburn. One point behind they went for the touchdown instead of a field goal. The play was completed with 1 second left on the clock. There's a reason fans were talking about selling "Les Miles defibrillators" that year.
* The LSU Tigers' victory in the 2011 SEC Championship Game eventually turned out to be this. Going in, LSU was the #1 team in the country. At #2 was the Alabama Crimson Tide, who just so happened to play in the same division as the Tigers, who were ranked ahead of them largely by virtue of winning their regular-season matchup. Because of that victory, LSU earned the trip to Atlanta over the Tide and demolished Georgia 42-10. Their prize, aside from the trophy: A rematch with Alabama in the
* The <3-Verse one), a vigilante, shunned for his violent methods against regular crooks.
* The <<Sword>>, The <<Blood>>, and to <<See>> in
* The Lube Job obstacle was later used for physical challenges and toss-ups on
* The Luca Goers are said to be the best Blitzball team in the league — and they win every year. Yet when the player actually plays Blitzball, the Goers' stats aren't that much higher than that of the Aurochs.
* The Lucas-directed prequel trilogy is not well-liked by the majority of the fandom. But it does have its supporters with the current generation having grown up with it, and there is a common consensus among many that
* The Lucha Libre Internacional match in 1977 featuring Huracan Ramirez and Black Shadow teaming up with
* The Lucie Arnaz Show in 1985. She spent most of the series wearing baggy sweaters and carrying boxes in front of her.
* The Lucifer and Biscuit Hammer: after Tarou dies, the Knights show up to the next battle in funeral attire.
* The Lucifer and Biscuit Hammer and doesn't seem like a villain at all until she opens her mouth to say she's going to destroy the world.
* The Lucifer and Biscuit Hammer and forbids him from staring at her like that again with his back against the setting sun.
* The Lucifer and Biscuit Hammer are just forms of applied telekinesis.
* The Lucifer and Biscuit Hammer, but nevertheless one wants to destroy the world and the other wants to save it.
* The Lucifer and Biscuit Hammer: Sami makes a meal, that turns somewhat lethal. She doesn't finish eating it, and tells Yuuhi that he doesn't have to either, but the man gobbles it up like nectar from the gods (and pays for it later).
* The Lucifer and Biscuit Hammer the main characters, Sami and Yuuhi. (The aim is to smash the planet to rubble, too.)
* The Lucifer and Biscuit Hammer, Yuki and Subaru have to hold hands to use their Strongest Spear and Strongest Shield powers.
* The Lucifer class terror drone is a frightening example. Basically X-9 Ghost about the size of a space shuttle designed for independent commerce raiding. Faster than all but the fastest of exos and packing immensely powerful particle cannons it easily qualifies as a Lightning Bruiser.
* "The Luckiest Guy On The Lower East Side" by The Magnetic Fields ends in a series of "ride"s of increasingly long duration. They go up in pitch as well.
* The Luck of Barry Lyndon, this is how the title character acquires the officer's clothing he uses to try and get out of fighting the war. Two gay officers have gone skinny-dipping and are too busy wrapped up in their own subplot to notice the thievery. We don't find out what happens to them.
* The Luck of the Irish), as, before, Ryan's life was a chain of good luck, and he never had to work for anything (e.g. his basketball plays are full of Hail Marys,

and his good grades are a result of him guessing on tests).
* The Luck of the Irish is full of these. Henry Gibson, Marita Geraghty, and Timothy Omundson, just to name three. All Americans (although Omundson is part-Irish).
* The Luck stat is explained to be this: the preternatural ability to predict probabilities. It translates to fine-tuning of one's aim to hit particularly vulnerable spots (IE:
* The Luck Uglies, a children's fantasy novel by Paul Durham, the main character uses "pigshanks" as a curse word, but it's noted that her mother would wash her mouth out with soap if she ever heard her say it. The book has a glossary in the back of terms used within it. Regarding "pigshanks," it has only this to say: "A bad word. Use it, and your mother is likely to scrub your tongue with soap and a horse brush."
* The Luck Uglies. It only aggravated the situation, but quite the feat for a kid still in potty training.
* The Lucky Dime Caper, Donald Duck travels to Canada, USA, Peru, Hawaii, Egypt, Antarctica and Italy.
* The Lucy Show and Vivian Vance attend a night-school chemistry class, and Lucy panics when she gets splashed with a very weak acid... until the instructor tells her that the stuff she got covered in was effectively harmless.
* The Lucy Show episode "Kiddie Parties Inc.": Lucy tries to bring a batch of helium balloons to a party, which leads to her floating away, flying through a flock of geese and crashing into a church steeple.
* The Lucy Show episode "Lucy Plays Florence Nightingale", Lucy needs to get some money from the bank to buy Chris a dress for her first formal dance. Finding out Mr. Mooney is in the hospital with a broken leg, Lucy dons a Candy Striper outfit in order to get him to sign a check.
* The Lucy Show handing out the complimentary toasters, and screws things up in a hilarious manner.
* The Lucy Show He thinks he's unsupervised, and has fun ordering the "robot" around. When at last she's had all she can take, Lucy turns him over her knee and spanks him good, just as Mr. Mooney walks in. Unfortunately, now that they've finally found a babysitter who can control the kid, she's stuck with the job long-term.
* The Lucy Show Lucy and Vivian's attempts to install a shower have them filling up the entire stall with water and nearly drowning.
* The Lucy Show, Lucy mistakes actor/producer Sheldon Leonard for a bank robber and sets traps for him. After the requisite hijinks and clearing-up of misunderstandings, Leonard confesses that Lucy's antics gave him an idea for a new TV show about a "kooky redheaded girl" who "gets into all sorts of impossible situations" but instantly dismisses it as too unbelievable. This was in 1967, making it a fairly old example.
* The Lucy Show, Lucy takes the trope even further by specifying that she's taking a trip to "London, England, In Europe."
* The Lucy Show over several jewel robberies. She accidentally confessed to a few of them at the police station. She thought she had been arrested for littering.
* The Lucy Show to keep his money there. Naturally, she has to give Benny a "tour".
* The Lucy Show, Viv starts a home-based business making and selling caramel corn. She is so successful that Lucy buys her a movie theater popcorn popper to keep up with the demand. But then she hears that they are in violation of the local zoning laws, and the zoning official is on his way there to inspect the house. Lucy jams the popcorn popper into the hall closet and she and Viv frantically clean up the house to make it look like no caramel corn is being made there. They almost pass the inspection, but then the inspector opens up the closet and popcorn spills everywhere!
* The Lucy Show when a thread from Lucy's dress gets snagged as she exits an elevator.
* The Lucy Show, where Vivian orders a huge hot fudge sundae with chocolate syrup, whipped cream, and lots of nuts, but declines the cherry on top. "No, thank you,

honey. I'm on a diet."
* The Ludicrous Wishes", a poor couple that rescues an elf and is granted three wishes in return. The wife, being hungry, wishes she had a nice, tasty sausage. Her husband scolds her for wasting a wish on such a mundane thing and blurts out in anger: "I wish that stupid sausage was stuck on your nose!" which is exactly what happens next. In the end, they have to use the third wish to get the sausage off the poor woman's face and have thus wasted all three of them.
* The Ludovico Technique: Drugging someone and forcing him (sometimes up to strapping the eyelids so he can't close them) to watch something related to his bad habits to "cure" him from them.
* The Luftwaffe found themselves on the receiving end when it came to the V-1 flying bomb: the Doodlebug was a difficult thing for pilots to deal with, since shooting it usually made it explode into a deadly cloud of shrapnel, a bad idea when using
* the Luftwaffe should have launched their first raid of the day by now.
* The Luggage. Even if you go to the ends of the earth, the Luggage will be heading there with its hundreds of tiny feet. (It's also rather vicious.) It will follow you to the beginning of time or its end, into another dimension, or through the gates of Hell itself,
* The Luggage is made from Sapient Pearwood makes it all the more terrifying.
* The Luggage often suckers bandits or other riffraff into biting range by sitting perfectly still with its lid open, exposing a fortune in gold coins within.
* The lukhorn worm is a relative of the purple worm that dwells in the Underdark and likes to pretend being a tunnel entrance. It's so hard to spot that entire drow patrols have ended up getting
* The Lumas: White (Luma), Black (Polari), Purple (Lubba), Red (flying), Orange (Co-star), Yellow (launch star), Green (green star), Blue (Lumalee Lumabop), and Pink (Hungry Luma).
* The Lumatere Chronicles, was born from her father and his eldest daughter.
* The Lumberjack and the Tree-Elf series, a two-year old Johanna is seen toddling around and trying to practice axe-throwing after Katniss had speculated that she'd been throwing axes since she could toddle in the original novels.
* The Lumberjack and the Tree-Elf series has this Mack takes Jason to a rebel meeting at the home of Mayor Lourdes and his family.
* "The Lumberjack Song" breaks up when the backup singers refuse to go on singing about crossdressing. The later live shows extended the song to include an actual ending.
* The "Lumberjack Song" devolves from a celebration of outdoorsy pursuits to cross-dressing, to the dismay of the chorus.
* The Lumberjack Song lyrics, where the Lumberjack puts on women's clothing, hangs around in bars, wears high heels, suspendies, and a bra, wishing he was a girlie just like his dear papa. When the mounties recite the lines as chorus, they eventually get disgusted and leave.
* The Lumeris (space mafiaso criminal types) have their ships being divided almost evenly between smooth, colorful sections of hull and exposed sections of piping or engines. This makes more sense if you consider their navy to essentially be comprised of re-purposed civilian ships.
* The Luminary learns a wide variety of skills but for each area, he falls behind the party member who is designed to be the specialist in it.
* The Lumineers' darkly humorous song "Submarines" tells the story of a town drunk who tries in vain to warn the townspeople about an impending attack.
* The Lump of Coal: "Is there a more charming holiday tale to behold? Probably, but Lemony Snicket has not written one."
* The Lunacy Of Duke Venomania He claims to love all the women he brainwashes and doesn't see the point of just picking one; this trope is played more straight in that he has a real affection for his childhood friend, Gumina Glassred, one of the women brainwashed. It doesn't turn out well, of course.
* The Lunar Chronicles, a cyborg living in New Beijing after the Fourth World War.
* The Lunar Chronicles), and yet becomes a trusted member of the team.

* The Lunar Chronicles, as you would expect from fairytale retellings.
* The Lunar Chronicles: Cress (who is inspired by the trope namer) has hair long enough to get tangled under the wheels of a chair she's sitting in, and to wrap around someone enough to bind them together. That this makes it incredibly heavy and hard to keep tidy is acknowledged, and its length is because she's not allowed access to sharp objects that would let her cut it.
* The Lunar Chronicles deconstructs this tropes with the "Shells," Lunars without powers, who are either euthanized or used as slaves. It is explained that while they lack powers, they are immune to Lunar mind-games, which is likely why they are persecuted.
* The Lunar Chronicles with Cinder, a cyborg who is very human even though about 80 percent of her body is made of metal. However, she cannot cry and extreme emotions or exercise of her psychic powers can sometimes cause her machinery to shut down.
* The Lunar Civil War, which erupts if the racial tensions between batponies and the rest of the population are not resolved, and sees Princess Luna's supporters on one side, and Celestia loyalist on the other,
* The Lunar Exalted are shapeshifters extraordinaire, but each one possesses a single animal feature — its Tell — that remains consistent regardless of what form it takes. The Tell is usually fairly subtle, such as an oddly-colored patch of hair or strange-looking eyes, but it does allow anyone who knows what he's looking for to identify the Lunar.
* The Lunar Exalted: Blessed by the goddess of the moon with the power to shapeshift, which includes the ability to assume the forms of anything or anyone they've killed and eaten, including demons and gods. They are the only Exalt type to have successfully and permanently altered their own Exaltations. This is on top of their own innate magic to become masterful charmers and hypnotists, brilliant sorcerors and scientists, and/or nearly unparalleled warriors; they are the protectors of all Creation. They are also
* The Lunar Exalted have the ability to change into animals that they have eaten.
* The Lunar Guardsman Luna bites off one of Raegdan's fingers. The one who is wholly disturbed and doesn't want to go through with it is Luna herself.
* The Lunar Guardsman: Raegdan, the lone human in the story, has fallen victim to this. He has forgotten most of his life through the rifts (as he called them it was all too similar), and many other things, including his own name as there hadn't been anyone to call him by it for so long that it's completely gone for him now.
* the Lunarians are literally the soul of humanity — specifically, the souls of the lowest scum of the old human race, unable to pass on to the afterlife because no living “true” humans remain to pray for them. Finding a way to do that is now their only objective, even though they know succeeding will obliterate the Gems and the Admirabilis alongside them.
* The Lunar Option, starting a secret space race between the two superpowers for its possession. The battles taking place in space and on the Moon involve many of the well-known astronauts and cosmonauts, including those who are officially listed as deceased.
* The Lunar Rebellion, a number of loyalist militias/insurgencies sprung up during the eponymous conflict, when Pegasopolis rose in rebellion against the rest of Equestria.
* The Lunar Rebellion as they are, have a tradition of engaging any invader to the last rather than ever surrendering their city to outside forces. The story generally discredits the concept, noting that most of the time the choice to fight in a Last Stand rather than accept surrender is only a needless waste of lives.
* The Lunar Rebellion: Early in the story, the rebels create a constant rainstorm over Canterlot in an attempt to flood the city and force its surrender, using up most clouds in the local countryside. This diversion of clouds has the effect of causing a great deal of drought in the surrounding land. At the end of the war, the royalists, after adding to this a bit with some increased sunshine and draining of the remaining water, turn this against the rebels. A massive fire spell later, the entire rebel army is immolated by the side effects of what was intended to gain them a quick victory.

* The Lunars can create empowered demi-humans called Beastmen. To do so, they need to either A) take a human form and have intercourse with an animal or B) take an animal form and have intercourse with a human... keep in mind, some characters have entire armies of these.
* The Lunars' exact role in the setting has been rewritten every edition, from champions of 'barbarian' cultures in 1e to covert social engineers in 2e to the primary resistance against the Realm in 3e.
* The Lunars get a weird variant on this, seeing as they usually Exalt after managing to
* The Lunars' patron Luna, the shapeshifting god/dess of the moon, is able to take virtually any form in existence (and some that aren't).
* The Luna Syndicate series. They hunt in packs, can walk on walls, and have the ability to mimic humans to lure their prey into a trap (one pretends to be a crying little girl to lead the main cast to its pack). They are also influenced by a red star like all the other monsters.
* The Luna Syndicate, which are pretty much bipedal wolves with no indication of transformation. There's also the fact they're from a parallel dimension along with other monsters such as vampires and zombies, all of which whose presences are influenced by a red star.
* The Lunatic Cultist appears to have a humanoid shape and size, but he has a
* The Lunaverse AU where Celestia became evil instead of Luna. It started with one story by RainbowDoubleDash who promptly opened it up to anyone else who wants to write in it. Multiple writers took him up on this offer.
* the Lunaverse mentions an off-screen moment where Luna tells Shining Armor that this is the true nature of his romance with Cadenza, and while she will mourn him when he is gone, and move on when she is done mourning, she will never forget him.
* the Lunaverse, this is how Raindrops is depicted—slow and clumsy for a pegasus, but stronger than the average earth pony, who are the designated strong pony subtype.
* The Lunaverse, Twilight Sparkle eventually turns herself in to the law for her crimes. Her punishment? House arrest and community service, in Ponyville, as their new librarian. Thus she gets to atone properly to the ponies she had hurt (she rejected the initial sentence of house arrest at her family's estate, as it would just be a long vacation), and she can spend almost all her time reading and studying magic, which she loves.
* The Lunch Date is shot in black-and-white, with a rather old-timey classical music score and an old-style font for the opening title card.
* The lunch ladies are also clearly voiced by men, with deep raspy voices to go along with their gruff, sadistic personalities.
* The Lunchtime Suicide sketches, in which former referee Tim White tried to kill himself in a new way each week.
* The Lung fight allowed Lagann to summon a Gunmen out of pure Spiral Energy, no sacrifice required. It's none other than Gurren itself.
* The Lungfish Call item makes a "specific" sound. Using it near Dr. Loboto has him tell Sheegor to "go outside if [she's] going to do that."
* The Lurking Fear we learn about a man named Jan Martense, who after 6 years in the army and exploring the world did no longer fits in with his isolated and xenophobic family.
* The Lurking Horror came with two feelies: a college I.D. card from GUE Tech, the school in which the game takes place, and for that moment when you first reach into the game's box, a rubber centipede.
* The lurking phantom of parental incest is all over the first two movies in the series,
* The Lurs, one of the Umiak's client races, are likewise thought to hail from a world with about .5 G due to their extremely tall, lanky frames and their observed discomfort under standard gravity. The fact that their homeworlds are primarily low-gravity planets is thought to be one of the main reasons the Umiak took them over.
* The Lust victim is forced to have sex with a terrified man wearing a strap-on

with a knife attached to it, mutilating her genitalia beyond all recognition before she dies from massive blood loss.
* The Luteces casually lampshade and debate this in front of Booker DeWitt. Their discussion is
* "The Lute Player", the queen dresses as a man to get safely to her husband.
* The Lützow Free Corps were a volunteer unit of the Prussian army during the Napoleonic wars. Since Prussia could barely afford to pay and equip the professional soldiers, the volunteers had to provide their own uniforms. Since they came from all walks of civilian life it was easier to just dye everyones clothes the same colour, and, because the customary Prussian Blue dye wouldn't cover up the existing colours of the clothes, they all dyed their clothes black. It is said that the standard adornment was red and the buttons were cheap but shiny golden brass. Hence the color black red yellow which would later — especially during the failed
* The Luxans follow this pattern, too, with a large cruiser-type (the Assault Piercer, seen early in the show as a derelict), a "Deep Space Voyager," mentioned but not seen, which sounds like a dedicated long-range scout or explorer ship, and two smaller ship-types, D'argo's small, powerful attack fighter- an "Eradicator," and the similar gunship/dropship- the "Penetrator"- which is like a Luxan version of a Marauder, which both have powerful weapons, shields, and a cloaking device ("deception shroud"). In the comics, the Luxans also have small scoutships similar to the Penetrator and Eradicator lineages but with fewer weapons and passenger capacity.
* The Luxor casino/hotel in Las Vegas was designed as a huge black glass pyramid with Tron Lines flowing to and from the giant column of light at the peak.
* Thel 'Vadam(ee) he's a part of usually ostracizes traits like innovation and creativity, yet he managed to develop them on his own.
* The Lv X Blue Magic spells that inflict status effects ignore all forms of status immunity, including 'heavy'. Combo that with a Blue Magic that can manipulate an enemy's level and...
* The L Word about a controversial exhibit at her museum, Bette defends it, but her words are later mined to make it sound like an admission that she and the exhibit are perverted.
* The L Word a character is commenting on the fact that almost all lesbians in a given community have done each other eventually. This leads her to conclude that we are all connected by "love."
* The L Word. Alice helps Tasha come out of her shell, and supports her as she deals with the Don't Ask Don't Tell policy in the military.
* The L Word (although the article is clean, the site may be considered NSFW).
* The L Word: Any trouble digesting the ridiculata of the latter seasons will either be soothed or completely exacerbated by the dramatic superiority of pretty much any episode from the first three.
* The L Word are usually set anywhere from a year to several decades in the past, featuring characters we've never met before, but they always end up tying in with what goes on in the episode.
* The L Word concerns Jenny's writing of a novel which is a thinly-disguised autobiography with very unflattering (though fairly accurate) depictions of all the other characters. It's a huge success, and gets picked up to be made into a film, which leads to a very confusing fifth season in which we see the original characters hanging out with the actresses playing the fictional versions of the characters, and also some reconstructions of the events of the first season played out with different actresses and slightly different dialogue... designed to make Jenny look good, of course.
* The L Word episode "Lesson Number One", Helena plays strip gin against Catherine in an attempt to clear her gambling debts.
* The L Word: Generation Q has Bette revealing that Jenny committed suicide, thus negating the whole arc.
* The L Word gets accused of fostering this image despite having a few committed couples considering how much bed-hopping goes on, with Shane having the most. As a

result, there's a fair number of real-life lesbians who despise the show for it, among other reasons, and it doesn't help that by the end of the show nearly every relationship was ended.
* The L Word... had an ending, it just never happened. Infamously viewership hated Jenny is found dead at Bette and Tina's house during a party, which kicks off the season after an inexplicable scene-for-scene rewind of the last few minutes of the previous season. The remainder of the season ostensibly pivots around the Jenny's murder whodunnit, with slightly larger-than-average arcs for most of the other characters. The show ends with an insanely stylized walk of the cast to the police station to give their statements about Jenny's death. As far as show-only content, THAT'S where the series ends! The whole season's overarching plotline (and to which most every plotline was party to) never even slightly resolved. Showtime released character testimonies weekly to drum up interest, but most of them were a little sparse in terms of details. Series creator Ilene Chaiken planned a spin-off called The Farm where Alice was found guilty of murdering Jenny (with no word on her actual guilt or innocence) and would revolve around Alice serving time. She pitched it to Showtime initially and then other distributors, but no one picked it up, so the end will forever be oddly abrupt, even assuming that Alice either did murder Jenny.
* The L Word. Her entire second season story arc revolved around dealing with the trauma.
* The L Word lovemaking scenes. Of course, one would speculate that hands are of larger significance in lesbian sex, given that women tend to be much more tactile than men and have slightly fewer useful appendages.
* The L Word: On one occasion, Jenny and Niki tape themselves having sex.
* The L Word personality. And in a later season, Jenny and the actress who's playing her in the movie she wrote are in a relationship, but at her agent's insistence, the actress takes a male date to her public appearances.
* The L Word some scenes would include a straight guy), featuring mainly straight guys in the supporting cast, and reducing gay guys to extras. Series creator Ilene Chaiken publicly claimed that the show would never have been made if it hadn't also brought in a male audience.
* The L Word that Tim had a relationship with one of the girls from the swim team he coaches after he and Jenny break up. Somewhat less shocking, since it's a college team and Tim is at most in his mid-20s
* The L Word: This show verts this trope pretty well, as most people tend to be varying degrees of wild no matter their gender or sexual preference, with the most notable exception being Tasha, uptight and in her rut, being rescued by Alice's feminine saving force, which sends quakes throughout the military and "frees" Tasha from her "oppressors."
* The L Word when Jenny takes home another girl after her first lesbian crush, only to find that their awkward fumblings lack chemistry. Eventually the two girls blurt out this trope simultaneously.
* The L Word when Jenny takes home another girl after her first lesbian crush, only to find that their awkward fumblings lack chemistry. In the end, the two girls blurt out simultaneously, "Let's just be friends."
* The L Word when she finally meets him and learns that he's a huge womanizer too.
* The L Word", which basically kept track of all their partner switch-ups.
* The L Word, who shares her womanizing tendencies, spooked her into thinking that if she went ahead with her wedding to Carmen and started a family, she'd eventually abandon them just like her father did to her, Shane decided that leaving her bride at the altar would be the lesser evil.
* The Lycans used some sort of UV tracer round against vampires, that cooked them from the inside.
* The Lydian Option are a philosopher race who are "not dangerous to anything but your time."
* The Lydian Option attributes his return to the frontiers of space to a feeling that he was an outcast after human rights protests against actions he participated in during the Spiral War.

* The Lydian Option collect a variety of ray guns from the corpses of other escapees.
* The Lydian Option features both a cafeteria full of "cross-nutritional" foods for multiple species and a highly addictive alien fruit.
* The Lydian Option has both Janta Leaf (a future "soft drug") and highly addictive blue alien fruit.
* The Lydian Option involves a prison filled with aliens hostile to humanity. Outside the prison, aliens resent humanity for winning the Spiral War - inside, humans lack protection and must travel together as a group.
* The Lydian Option is a self-contained asteroid prison with few rules - the guards rarely intervene in fights between prisoners unless directly threatened.
* The Lydian Option, "Janta Leaf" is portrayed as a mild drug being smuggled by the protagonist - humans view it as a minor offense, but the Tha'Latta punish it with permanent imprisonment.
* The Lydian Option, the comic centers around a group of prisoners forced to attempt an escape from an alien asteroid prison due to the guards' hostile reaction to rioting.
* The Lydian Option, the Tha'Latta implant translators into prisoners, loaded with the languages of other species incarcerated in their prison.
* The Lydian Option, the Tha'Latta use venting the atmosphere as a method of quelling prison riots in their asteroid prison — killing all of the prisoners inside. The human prisoners are forced to seek an escape facing an imminent venting.
* The Lyekka aliens in the final season, a group of very hungry plants with a mother ship roughly twice the size of Earth's moon that would attach to a planet and strip it of all bio-matter to feed their insatiable hunger. This again being Lexx the aliens are only destroyed after eating a large number of worlds, killing billions and nearly eating the Earth (though it still blows up).
* The Lying Ape brings up two instances of this happening to book reviewers. One reviewer was quoted as saying, "People will rush out and buy this book"; the full sentence had been, "Only crazy people will rush out and buy this book." Another gave a book a scathing review and made it clear he hated it, but as he was reviewing it in January, ironically tacked on at the end, "Best book I've read all year." Naturally, only the last line was quoted on the book cover.
* The Lying Ape lists an unintentional example — a man was asked to review a book and completely bashed it, giving it overall an extremely negative review. This being early January, he ended the review ironically with "Best book I've read all year." Guess which single line out of his entire review they put on the back of the novel?
* The Lying Ape says an apartment described as "cozy" meant you could cook a meal, watch television and answer the front door without getting up from the toilet.
* "The Lying Detective" plays throughout the episode with the idea that Culverton Smith, whom Sherlock believes to be a depraved serial killer, is a completely innocent man who Sherlock is demonising out of pure paranoia and drug-related insanity — something which a number of deconstructive Holmes pastiches have done with Professor Moriarty, most famously the novel and film
* The Lying Game), Sutton is literally this, having been murdered at the outset of the first book.
* The Lying Game was filmed on location in New Mexico; production for the series shifted to Texas. The series is set mainly in Phoenix and Las Vegas (with stops in Los Angeles).
* The lynchings in the Southeastern U.S. of the 19th-to-mid-20th centuries frequently had a celebratory, carnival atmosphere, attended by dozens of people. The often drawn-out tortures, commemorative photos and subsequent retrieval of "souvenirs" from the corpse had all the fervency of passionate social ritual.
* The Lyran Commonwealth has an unfortunate history of "social generals" — officers who were promoted not because of actual leadership ability, but because of personal wealth and connections. Naturally, these don't always make the best strategists or tacticians. Fortunately for the commonwealth, lower ranking officers

have a tradition of being
* The Lyran Commonwealth is an odd form of feudalism. Feudal lords are more like chief executors in the overall governmental power structure, rather than absolute rulers. And one can gain nobility by becoming the head of a large corporation. This doesn't confer any de-facto powers on them, but it does give them access that might otherwise not have been granted. The nobility and the military even merged to a degree during peacetime. These "Social Generals"
* The Lyre of Orpheus & the Bad Seeds, is a conceptual retelling of the Orpheus legend, as the name implies.
* The Lyre Of Orpheus, Lancelot, and Guinevere - find their lives conforming to that tragic love triangle.
* The lyrics are more of a slam against white boy metal/rap bands like Korn (they had recently slammed him in the press about his style of music). The music is meant to be a
* The lyrics for the song "Memories of You" at the end of the game pretty much confirmed his death before FES was even in development.
* The lyrics of Covenant's "Like Tears in Rain" are a rephrasing of Roy Batty's final soliloquy in
* The lyrics of "God Save The King" were rewritten for the song "America" (which is more commonly known as "My Country 'Tis of Thee"). Thus the jarring experience, for Americans, of hearing the British playing (usually without lyrics) what they think of as an American song.
* The lyrics of Nightwish's song "Come Cover Me" are full of this trope.
* The lyrics of "Summermash '13" mention "beautiful sights", so the video uses many
* The lyrics of the Season 2 theme song ("I'm just a girl in love / I can't be held responsible for my actions / I have no underlying issues to address / I'm certifiably cute and adorably obsessed!") are quoted in the Season 2 finale during a flashback to
* The lyrics of the song skyrocket it into scary: "You are not the owner of your life/We are puppets and nothing else/Our threads are Fate/Which moves us at its will"...
* The lyrics to "As Time Goes By" have the line "a kiss is still a kiss," which does not exactly parallel the following line, "a sigh is just a sigh." The people who quote the lyric as "a kiss is just a kiss" have the defense that it's what Dooley Wilson sang in
* The lyrics to Sloan's "Coax Me" include the line, "it's not the band I hate: it's their fans".
* The Lysine plan. A plan to limit the growth of the dinosaurs by making them dependent on the amino acid Lysine, by taking away their ability to produce it themselves. Lysine is an essential amino acid. Most modern-day vertebrates (including crocodiles and sharks; superorders that existed in the Jurassic period) can't produce it either. And we make do without it because we get Lysine from our gut flora or by eating things containing Lysine. The Lysine plan is a great way to limit the growth of genetically modified bacteria, which depend on Lysine in the media if they can't make it themselves. For vertebrates, that obtain it from eating things anyway, it's not. The book at least acknowledges this as an in-universe whopper by InGen's scientists, as it turns out it was no hindrance to the dinosaurs whatsoever.
* The M10 Tank Destroyer. Designed as a stopgap "heavy interceptor" vehicle to blunt German armored spearheads after they broke through the frontlines, the M10 used a slightly modified M4 chassis with an open-topped turret on top mounting a 3-inch high velocity gun for defeating armor. It did quite well at what it was designed for in the few instances where it performed its intended role—one of these being
* The M-11 Wraith synergizes with the Vanguard in much the same way that the Black Widow does with the Infiltrator. Other Shotguns may cause more damage per hit, but the Wraith has the best damage-to-weight ratio of its weapon type. Fully upgraded, the Vanguard has a powerful weapon while still keeping their power recharge bonus

at 200% even with a light assault rifle as a backup weapon, allowing the Vanguard to Charge around the battlefield with maximum efficiency. With a Smart Choke and a High Caliber Barrel, the Wraith can even function as a strong mid-range weapon. The Wraith's eight-pellet spread also synergizes well with the Explosive Burst evolution of the Vanguard's Incendiary Ammo, averaging an extra 400 damage per shot without power damage upgrades and allowing for frequent Fire Explosions from the Vanguard's iconic abilities.
* The M12 Light Reconnaissance Vehicle, better known as the Warthog or the
* The M16 and the Beretta aren't the only firearms to fall afoul of this trope:
* The M1911 service pistol (usually the M1911A1 variant specifically), shows up in a lot of
* The Māori taiaha is an example that is made from wood or whalebone. Most of the time, it's used to bludgeon enemies to death, though the pointy end (dull as it is) is still usable as a thrusting weapon and it can still be thrown.
* The M-26E1 "Super Pershing" (It's even in the name!) fits this to a T. A new model with an upgraded gun the very first pilot model was rushed into battle straight from the factory late in the war amid continuing calls for tanks with still more firepower to battle the very heaviest German vehicles
* The M26 Pershing, the ancestor of M47, M48, and M60 was only introduced in the last year of world war 2, but is well remembered. Like the Tiger it used a repurposed anti-aircraft gun but improvements made its gun closer to the Tiger 2 gun. It did have reliability issues, however, partly due to the engine essentially being M4's engine being used on a tank 10 ton heavier, which first resulted in the US Army rejecting it for service outright (before heavy advocacy resulted in a small quantity being shipped to Europe over objections), and eventually led to its service in the Korean War being cut short and replaced by M4 and M46 instead. The heavier weight also proved a logistical problem, as most if not all WW2 US pre-made bridging equipment was designed to take the weight of a Sherman-sized vehicle but not a Pershing-sized one. Like the Panther, the Pershing was designed, not as a heavy tank, but as an outright replacement for the Sherman, essentially being the "Missing link" between WW2-era mediums and the modern MBT.
* The M2 Browning .50 cal machine gun was designed in the 1920s, and is still being used as the M2 HBAR (Heavy Barrel) in the U.S. Armed Forces, almost 100 (!) years after it was first introduced, and there are still no plans for a replacement. Well, there
* The M3 Lee was also sent to the Red Army. While the Russians were not happy with the high profile, the poor hull shape, inadequate armor and the need for gasoline fuel (as opposed to Diesel), they liked the high explosive capacity of the weapon, and the spacious crew compartment allowed them to function as heavy Armored Personnel Carriers in summer, carrying ten troops armed with SMGs.
* The M3 tank produced by the US as an interim measure until the M4 was ready for production had a serious flaw: its armor was riveted together rather than cast or welded. A hit by an armor-piercing round that didn't penetrate, or a sufficiently strong explosion near the tank, would cause the rivets to pop out, bounce around, and massacre the crew. One nickname for the tank was "a coffin for six/seven brothers" (different versions had different numbers of crew members).
* The M4A1s were actually Canadian Grizzlies, a license built M4A1 - the Canadian Dry Pin (CDP) tracks give it away. American built M4A1 Shermans had rubber block tracks.
* The M4 Sherman was deployed after the T-34 so had less of a shock value to the German forces who had prepared anti-tank guns like the pak 75mm and Flak 88mm. It was a highly reliable vehicle that had small but important upgrades in only a few years' time to improve its mobility, armor, and most importantly its gun. The tank units were generally happy with what the 75mm could do, and didn't initially adopt the 76mm gun armed Shermans due to concerns over logistical complications; this attitude changed rapidly once the Normandy invasion was underway and the "Tiger Scare" set in among Allied tankers.
* The M-5 in "The Ultimate Computer" was an experiment in this direction.
* The M60 machine gun that Frank Jackson "appropriated" when leaving Vietnam made

quite an impression on the armies fighting the Americans and Swedes.
* The M72 Light Anti-tank Weapon, its modern successor the AT-4 and various similar designs based on the same concept. Though arguably they're a subversion, as theoretically they provide the reverse effect in practice; instead of having a dedicated RPG fireteam, who have to spend precious seconds reloading after taking a shot and can't carry a hell of a lot else besides the launch tube and its ammunition, every man in the squad can carry a one-use launcher as part of their regular gear. If one of them misses, another steps up and takes their own shot.
* The M-9 electrical anti-aircraft gun was invented by David B. Parkinson after it came to him in a dream, despite the fact that he designed recording equipment for Bell Labs and had no prior experience working with ballistics of any kind.
* The M9E used by the good guys is named "Gernsback" for author Hugo Gernsback, as an in-universe
* The Maanpuolustuskorkeakoulu (National Defence Academy) in Helsinki,
* The Maasai people of Tanzania, a nomadic tribe known for wearing toga-like wraps instead of Western apparel, refer to Westerners as
* The Mabinogion, the perfect woman Blodeuwedd is created from the flowers and growing things of the earth: her hair is effectively made of flowers. Later, for her sins and heartlessness, she is turned into the first owl and fated to haunt the night—the flowers that became human hair now mutate into feathers.
* The MacAllister family crest includes a severed hand holding a dirk. The story behind it is that one of the MacAllisters was in a boat race out to a sand dune and back, with the first to touch shore winning. Upon realizing that he was not going to beat his opponent, he cut off his hand, put his dirk with the family crest in it for identity, and then threw it onto the beach for the win.
* "The Macaronic Carol" by Shari Ajemian and Sarah Newcomb alternates between lines in English and Latin. The English lines are all about how much fun it is to carol gaily in fields of snow; the Latin lines are things like "my feet hurt", "it's cold", and "I want to go home".
* The Macbeth Murder Mystery and thus that King Duncan was killed by someone else.
* The Macbeth Murder Mystery. "At first I suspected Banquo. And then, of course, he was the second person killed. That was good right in there, that part. The person you suspect of the first murder should always be the second victim."
* The Macbeth Murder Mystery for the first time, notes that if a character is set up with a motive for murder and then shown going to commit the murder, but the action cuts away without actually showing the murder, it always turns out it was someone else who did it.
* The Macbeth Murder Mystery next. "But who do you suspect?" "Everybody."
* The Macbeth Murder Mystery, since otherwise why bother introducing a new character just for one scene?
* The Macedonia naming dispute.. It was eventually resolved by the Republic of Macedonia officially changing its name to the Republic of North Macedonia (the treaty was signed in 2018 and legal enforcement of this went into effect in 2019).
* The MacGuffin was renamed from Spektor to Lektor, presumably to avoid confusion with SPECTRE.
* The Machine and Root pull off a couple of time-delayed versions in "Mors Praematura" thanks to
* The Machine, a surveillance supercomputer designed to save lives by predicting terrorist threats and violent crimes
* The Machine: Bride of Pin*Bot likes cows. When a ball starts, hold the right flipper, left flipper, then both flippers for at least 45 seconds each. The game will beep; players can then tap out "Old MacDonald Had a Farm" with the flipper buttons (right flipper first) and the game will sing along.
* The Machine: Bride of Pin*Bot not to indicate death, but a new life beginning - when activating the Bride's transformation from robot to human, the table goes dark except for a flatline across the score display and the familiar long beep... then a thumping bass heartbeat begins, accompanied by pulse waves on the score display, increasing in tempo as the Bride comes to life.
* The Machine: Bride of Pin*Bot sends launched balls into one of five slots. The

highest value (200,000 points) is right behind the lowest value (25,000), so a slight miscalculation yields the lowest bonus.
* The Machine: Bride of Pin*Bot since you will still quality for the standard high score list provided you don't make the billion point shot.
* The Machine: Bride of Pin*Bot; while Pin*Bot himself still has his robotic monotone voice, the Bride speaks with a clear human voice.
* The Machine Crusade (written after Frank had died, so possibly not canon), humanity nuked Earth in a first strike against the thinking machines.
* the machine designed to implant Mr. Gentleman's consciousness into Junior to prevent the heroes from interfering with the process.
* The Machine: features chips augmenting, and later supplanting, soldiers who suffered brain trauma.
* The Machine Generals in "Forever Red" were gutted from various outfits from
* The machine gets jammed and the buyer might get the candy right upside the head.
* The Machine Girl) features a Japanese schoolgirl who loses her arm to the mob and replaces it with a machine gun as well as a chainsaw.
* The Machine Gunners Brown got from the same downed bomber in an essay.
* The Machine Gunners has main character Chas' grandfather, with whom he lives, be a veteran of World War I, the Battle of Caporetto specifically; unlike the more badass versions of this trope in fiction, the book plays it very realistically showing the actual trauma of battle to contrast it with the jingoistic propaganda surrounding war which Chas and friends are taken in by. Chas' grandad has very serious PTSD and even a rattling pot or kettle lid can trigger damaging flashbacks to the perils of combat.
* The Machine Gunners have deserted him, people are no longer afraid of him and openly mock his turban-like bandages and his position of power and popularity at school is gone.
* The Machine has "problems" in season 2, which show themselves as visual glitches.
* the machine in Stan's basement causes a light brilliant enough to be seen across town.
* the machine network launches an Ark into outer space, carrying the memories of the machine lifeforms within, among them the still-living Adam and Eve, as well as their own ghost consciousness based on humanity. Whether they will ever reach a destnation or travel space for eternity is not an issue for them. If the player chooses to, 9S can accompany them on their journey.
* The Machineries of Empire and can be mistaken for moons. Enough civilians live their lives on stations that it's not odd for someone never to have set foot on a planet.
* The Machineries of Empire are genuinely friendly with Cheris and try to help her the best they can.
* The Machineries of Empire, back when Jedao was in the Shuos academy, there was a game contest. Jedao's submission was a game revolving around breaking the rules. One of his friends played it and ended up being caught by a Doctrine official, while another claimed to be the author of the game. Both were grievously punished.
* The Machineries of Empire book, Kel Cheris' unit takes tremendous losses and she herself is forced to commit heresy to secure the enemy infrastructure intact - only for her superiors to pull her and her people out and bomb the entire area into oblivion.
* The Machineries of Empire: By his own admission, Hexarch Mikodez has never met a pastry he didn't like, and liberally snacks on candies during official meetings. Although he cultivates a reputation for frivolity and unpredictability, the love of candy is quite sincere.
* The Machineries of Empire, captain Kel Cheris is breveted to a general when she's put in charge of the operation to retake the Fortress of Scattered Needles, but the formation instinct (the Kel brainwashing that makes them obey the chain of command) doesn't read her as one, meaning she has to win over her rather unimpressed subordiantes the hard way.
* The Machineries of Empire doesn't allow them to channel formation effects the way

humans can. However, when Cheris realizes that this isn't true for the heretics' calendar, she does end up sending her fleet's drones into battle.
* The Machineries of Empire effect that makes vast majority of Hexarchate's technological base, including FTL travel, function - working, nexus fortresses and wolf towers project areas of calendric stability. Destroying one would cause the calendric field in the area to begin to degrade, and the exotics to stop working.
* The Machineries of Empire, every Hexarchate moth has a Doctrine officer (or at least had in Jedao's times) to make sure there's no heresy brewing among the crew.
* The Machineries of Empire get much better meals instead. It's a joke among the Kel military that consuming ration bars voluntarily is a sign of mental illness. To their credit, they're not bland — their flavours and odours are described as "distinctive".
* The Machineries of Empire grudgingly and in small packets, but what little we get usually comes from Shuos Jedao explaining something to Cheris.
* The Machineries of Empire, he's immediately shot, only to enter a moment later in a different body and say that he has more of those than his less-than-gracious host has bullets.
* The Machineries of Empire. However, Exotic technology fails in regions where Calendrical observances are sufficiently disrupted, so the Hexarchate keeps old-fashioned "invariate" technology as backup.
* The Machineries of Empire is to introduce a new calendar, as exotics work differently under different time and date systems.
* The Machineries of Empire. It's excessively brutal in enforcing its own calendar, doesn't tolerate any rebellion or ideas that don't fit in with the doctrine, and has by the time of the story swallowed all nearby polities other than fellow Empires.
* The Machineries of Empire, Jedao has Cheris drop dozens of propaganda leaflets, drugs and alcohol to weaken the resolve of the Fortress' residents.
* The Machineries of Empire, just what is going on with Jedao, as well as Kel Command's plans regarding him and Kel Cheris, are left unclear until the first book's ending.
* The Machineries of Empire — the viewpoint character notes that the asteroids are too dispersed to pose a danger to even a large fleet, but the real threat is that enemy ships might hide behind them for an ambush.
* The Machineries of Empire of the Hexarchate, having become popular several centuries before the time of the books, but some people still opt for natural births instead.
* The Machineries of Empire short story, after escaping from a Gwa prison, Jedao knocks out the first person he encounters to obtain some clothing that would let him slip undetected. Unfortunately for his stress level, this happens to be a woman.
* The Machineries of Empire starts shortly after Jedao has been wounded in an assassination attempt, but he refuses to sleep or go see a medic. When he meets up with his XO a few hours later, he can't even stand up to welcome her, and his vision is blurred so much, he has to ask people to tell him what's on display screens. His subordinates end up convincing him to go get some help.
* The Machineries of Empire that can be rerouted at will, so, rather than bother with a door, characters might walk through a solid wall and get whisked down an infinitely-long hallway to their destination.
* The Machineries of Empire that depends, among other things, on lots of people following the same calendar and believing the same things. Entire wars are fought over preventing (or creating) "calendrical rot."
* The Machineries of Empire that killed over a million people, including his own troops and civilians, he started shooting his own staff and subordinates) and that it's currently presumed he had some sort of psychotic break. He seems genuinely regretful for his past actions and is willing to help Cheris and serve the Hexarchate. On the other hand, years of investigation found no issues or problems with his mind, and everyone "in the know" is certain he cannot be trusted.
* The Machineries of Empire, the Fortress of Scattered Needles is conquered and

Cheris breathes a sigh of relief that she'll finally be rid of Jedao and her life will return to some semblance of normalty, only for Kel Command to send a fleet and kill everyone in an attept to get rid of the undead general once and for all. Cheris is the only survivor and she ends up being possessed by Jedao.
* The Machineries of Empire, the Gwa spy politely accepts the fact that Jedao has outwitted them and goes with him of their own free will when their game is up.
* The Machineries of Empire, the Hexarchate, for all its flaws, is rather chill with all sexualities and gender identities, and has nothing against polygamy — one character is mentioned as having multiple children with four partners.
* The Machineries of Empire: the Hexarchate forces use those to deliver their Shuos infiltrators, propaganda and drones into the enemy fortress.
* The Machineries of Empire, the Hexarchate government is divided into six factions: the Rahal (leadership, law), Nirai (technology), Andan (culture, diplomacy, finance), Vidona (doctrine, education), Shuos (espionage, sabota, assassination) and Kel (military). Many — if not majority — of Hexarchate citizens don't belong to any faction, but if you want to have any career in the "faction specialities", you have to join one. Faction members (with exception of Shuos) are additionally gifted with exotic abilities.
* The Machineries of Empire, the Kel formation channelling is based around this. By arranging their troops—or ships—in a particular, mathematically-calculated formation, the Kel can manifest various exotic effects, such as force shields or energy lances.
* The Machineries of Empire, the Kel utilize command composites, which are made up of some number of Kel minds (with an occasional guest from another faction) fused temporarily into one being. Most notably, the Kel Command - the Kel in charge of the entire army - is a command composite.
* The Machineries of Empire, the reason Cheris joined the Kel was that she wanted to belong in a group and the military, with its conformism and formation instinct, fits this need perfectly.
* The Machineries of Empire, the six Hexarchate factions are mired in infighting, and Kel Command is as dangerous to Kel Cheris as the heretics she's supposed to be fighting are, if not more so.
* The Machineries of Empire, the Vidona are responsible for enforcing the Doctorine in the Hexarchate. They're noted as being the most dogmatic of the six factions, as they have to make sure the calendar is preserved.
* The Machineries of Empire, the way Jedao's connected to Cheris' mind makes him a meat shield for any exotic effects - what would normally hit her strikes him instead, leaving her immune.
* The Machineries of Empire. They're not above prosecution themselves, and can be executed for abusing their powers, but the broad and ever-expanding definition of "heresy" gives them huge leeway.
* The Machineries of Empire, though some of the original identity is retained.
* The Machineries of Empire to create blades of solid light. They're primarily used for competitive dueling, but Kel soldiers in formation can amplify their effect to create piercing or cutting forces far larger than the blades themselves.
* The Machineries of Empire to make use of the formation instinct forcing all Kel to obey their superiors.
* The Machineries of Empire, when Cheris' fleet enters the calendric rot zone for the first time, everyone but her falls unconscious or catatonic, and Cheris herself almost takes her own life before Jedao talks her through it.
* The Machineries of Empire. When Cheris wakes up after her petition to use Jedao is approved, she hears a male voice in her head and sees a men when looking in a mirror, and her initial assumption is that her superiors have changed her sex for some reason. Later she learns that this is simply how she perceives Jedao.
* The Machineries of Empire (with the minorities who are exclusively into a specific gender not being visibly looked down on either). There is still some lingering bigotry against binary trans people, but even this is depicted as limited to particularly old-fashioned circles.
* The machines are treated this way by the tribal humans that live alongside them.

Indeed, many of them simply act like metallic animals rather than typical robots, being often seen grazing or defending their territory from intruders. The ancient, still functioning factories where they are constructed are referred to as "Cauldrons," and the phenomenon that causes them to go berserk, known as "The Derangement," is seen as something akin to a violent illness or
* The Machinesmith, as recounted at the top of the page. A little later in the issue, while he is attacking with a
* The Machine Spirits of things like Land Raiders, which can operate without pilots for a short time if at an inferior level, may be considered AI but what with the large amounts of magic, technology and divine power crossovers happening, may actually be a sentient spirit.
* The machine spirits seen in some advanced Imperial technologies, like Land Raider tanks, Titans, and some of the
* the machine's self preservation programming combined with his decision of wipe its memory every night forced it to become sentient or die.
* The Machine Stops. And given the state of human society in that story, the lack of portable devices is completely justified.
* The Machine Stops in a vast complex of cells controlled by the titular Machine.
* The Machine Stops set in a dystopian future where humanity lives in cubicles, communicating only via technology and experiencing everything second-hand. Outside the planet is livable but the titular Machine has rendered humanity dependent on it. Written in 1909.
* The Machine Stops", the Machine in question provides for all human needs. The Book containing the instructions to make requests to the Machine is revered in a fashion reminiscent of holy scriptures; as time passes, humans also take to gather in order to ritually praise the Machine.
* the machine that destroys EVERYTHING. You'll notice that most stuff going into the shredder is mostly "soft" garbage like shoes and tampons, with the "strongest" stuff being a trio of paint cans or an old rotting crate palette. This is because the machine's selling point isn't how much damage it can do, but how resistant it is to jams.
* the machine won't accept it takes off instead, and when he kicks the machine, it takes off as well.
* The Machinist class from XIV reverse-engineered many Garlean devices, but their abilities are instead fueled by a device known as an "Aetherotransformer" which taps into the body's natural aether supply to power their gadgets and
* The Machinist, explores the psychological side of this and the kind of trauma that can cause it.
* The Machinist has a refrigerator overflowing with blood, but when opened it only turns out to be rotten fish inside.
* The Machinist: Ivan does a particularly disturbing rendition of this trope.
* The Machinist scenes, particularly the amusement park ride and all of the scenes with Ivan.
* The Machinist's character Trevor, who hasn't slept for nearly a year, stalked and tormented by a man named Ivan. Ivan eventually kidnaps Nicholas, the son of the woman Trevor is (sort of) dating. Ivan appears to have murdered Nicholas, causing Trevor to kill Ivan. When disposing of his rug-wrapped body, it unrolls and is empty. Trevor then remembers that "Nicholas" was actually a nameless boy that he had killed in a hit-and-run himself a year ago.
* The Machinist. The source is just some fish due to the electricity going out and the fridge failing. It has no real bearing on the plot.
* The Machinist: When Reznik takes Marie's son Nicholas into the Route 666 "funhouse", which is mostly a terrifying display of criminals being executed for their crimes. Eventually, Nicholas suffers an epileptic fit and Reznik has to abandon the ride to drag him out of there.
* The Machop and Timburr lines have a 25% chance of being female, despite their
* The Machop line is a borderline example. While the line has more obvious reptilian characteristics, some still consider them too human looking.
* The Macintosh Repository users looking for certain games they may have trouble

finding on other sites, since a number of "Classic" Mac OS titles happen to be Win/Mac hybrids, meaning that they used the same disc/ISO for both OSes.
* "The Macra Terror": A society fashioned after a holiday camp... with mind-controlling giant crabs lurking beneath the surface.
* The Macra were helpless without their special gas (which made one wonder how they managed to force humans to start making it in the first place).
* The Mad Adventures of Rabbi Jacob: Commissioner Andréani receives the cheesecake that was intended for David's Bar Mitzvah in the face, courtesy of Rabbi Samuel.
* The Mad Adventures of Rabbi Jacob: In a sequence inside a bubblegum factory, Victor Pivert falls into a huge vat of liquid bubblegum. Afterward, he has some trouble with stuff sticking to him, including the buttons of a phone or the chair he sits into.
* The Mad Adventures of Rabbi Jacob, Victor Pivert is chased by bad guys inside a bubblegum factory. When cornered, he opens up a huge holder of bubblegum beads, sending them rolling under his pursuers' feet. After doomed efforts at staying upright, they finally fall and skid down some stairs, and then down a chute to end up into a vat of green liquid gum.
* The "Made in America" logo in ads, though that one tends to be less a boast of quality and more an appeal to patriotism.
* The Mad Hatter: An insane character who doesn't care that they are crazy.
* The Mad Hatter may be mad, but doesn't stand out among the other residents of Wonderland in this regard. If anyone in the book fits the Trope, it's likely the Cheshire Cat.
* The Mad Hatter of the second story of The Mad Hatter #2, is thrown off a roller coaster by the Mad Hatter who's stopping him from killing a woman and her child.
* The Mad Hatter, the secret crime boss of the whole city, who spends the first story pursuing a witness who knows his true identity and is arrested at the end of the issue.
* The Mad Hatter was already a trope before Carroll came along. Hatters used mercury to cure felt, and would sometimes lose cognitive function from inhaling the fumes, so mad hatters was a Victorian trope somewhat analogous to the modern trope of insane postal workers. Though "Mad Hatter's disease" is still used occasionally as an informal term for mercury poisoning, the book has the only surviving use of the character concept. Though interestingly, while he was a hatter, and mad, he was never outright called "The Mad Hatter" in the actual story, just "The Hatter".
* The Mad Homophobe. If it is — oops, not for kids, or HOLY FUCK NOT CANON!!
* The Mad King, as he had once promised to guard the king with his life.)
* The Mad King, Blentz castle has a network of secret passageways, with entrances behind fireplaces and portraits, used by both the heroes and the villains.
* The Mad King brought on directly by his jealousy over Emma's love for Barney.
* The Mad King is a small kingdom tucked in between Serbia and Austria-Hungary.
* The Mad King Lampshaded in the TV series. "Tell me; if I'd stabbed the Mad King in the belly instead of the back, would you admire me more?"
* The Mad King's daughter Daenerys Targaryen's solution to pretty much every problem, though averted with her even-more-brutal execution of Doreah and Xaxos. She uses fire to kill Mirri Maz Duur, Pyat Pree, and Kraznys mo Nakloz and many other slavers of Astapor. She also does this to
* "The Mad King" Targaryen at the end of Robert's Rebellion. We finally get a brief glimpse of him in Bran's flashback in Season 6.
* The Mad King, the hero cuts a circular hole in a window using a diamond ring borrowed from the heroine.
* The Mad King, the hero takes a cheap hotel room which is one of several created by dividing up an attic with thin partition walls. In the night, he is disturbed by voices from the next room — which turns out to be the villains, whom he had been following and then lost track of — going over their plans.
* The Mad King, the kingdom is flooded with posters announcing that the (allegedly) dangerously insane king has escaped from his confinement, and offering a large reward for his capture dead or alive. The hero is dragged into the plot because he

coincidentally resembles the description on the posters.
* The Mad Magician abilities yo impersonate Ormond so no one will know he is dead. However, after he murders his ex-wife Claire while disguised as Ormond, he has to abandon the Ormond identity as the police now want Ormond for Claire's murder. He then murders The Great Rinaldi and assumes his identity; even performing magic shows in Rinaldi's stead.
* The Mad Magician. Gallico agrees, but says he would rather go to the electric chair than spend the rest of his life in a straitjacket in a padded cell in an insane asylum.
* The Mad Magician, Gallico creates a miniature crematorium to use in one of his illusions. He later attempts to kill Lt. Bruce by feeding him into it.
* The Mad Magician, Gallico gets rid of Ormond's body disguising it as an effigy of dressed in the opposing team's football uniform and placing it on the bonfire the university is constructing to celebrate their victory. The next day Frank Prentiss reads in the paper how only the shinbones and a section of spine were found in the ashes.
* The Mad Magician, Gallico is an expert mask maker and is able to create masks that allow him to impersonate both Ormond and Rinaldi. Only Claire is able to see through the disguise when he is posing as Ormand, and she has the advantage of having been married to both Gallico and Ormond.
* The Mad Magician, Gallico murders Ormond by using 'The Lady and the Buzzsaw' illusion to decapitate him.
* The Mad Magician Gallico the Great. Ormond reveals that the contract Gallico signed means that all of the illusions he create belong to Ormond; even the ones Gallico created on his own time. This means Gallico can never appear on stage and, to add insult to injury, Ormondo sells 'The Lady and the Buzzsaw' illusions—a trick Gallico had spent years perfecting to be the climax of his act—to The Great Rinaldi; a magician Gallico hates.
* The Mad Magician) is working at the forge in his workshop; his shirt open to the waist. His ex-wife Claire (Eva Gabor) finds the sight quite a turn-on.
* The Mad Magician masks which, along with his skill at mimicry that allows him to imitate their voices, allow him to assume the identities of Ormond and Rinaldi after he murders them; fooling even those who know them.
* The Madman: His Parables and Poems by Kahlil Gibran contains the parable "The Scarecrow". The narrator mentions a conversation with a scarecrow about the joys of scaring. A year later, the scarecrow has become a philosopher and lets two crows build a nest under his hat.
* The Mad Miss Manton. A fun loving socialite, Melsa and her debutante friends hunt for a murderer while eating bonbons, flirting with Ames, and otherwise behaving like silly young women.
* The Mad Miss Manton, is always willing to rat Melsa and her friends out: first, when he finds out Melsa is withholding evidence, and then, when he finds out they’re keeping Frances Glesk, a suspect, with them.
* The Mad Miss Manton: Melsa Manton and her gal pals try to find out if Edward Norris and his friend Frances' alibi of being at a hockey game, and therefore unable to commit the murders, is true. They find out that he couldn't have killed old man Lane because that would've meant going across town and back in the small amount of ten minutes.
* The Mad Monkey has a unique evil laugh, which he punctuates with monkey and ape noises.
* The Madness Dossier, a devious and manipulative aquatic race who act as lieutenants to the leadership of the horrifying, mind-controlling Anunnakku.
* The Madness Dossier, agents of Project SANDMAN engage in mind control and memory wiping, implant electronic chips in people's brains, and can and will divert the full resources of major governments to their secret purposes. They're also the heroes, and by default, include the PCs. Their opponents really are much, much worse.
* The Madness Dossier, humanity was actually made or remade as a slave race by the terrible Anunnakku, who are opposed by the necessarily ruthless Project SANDMAN.

The Anunnakku are masters of memetics, having designed us to be easy targets; the Sandmen have learned a lot about the subject for defensive purposes, and use it heavily.
* The Madness Dossier if at all, the heroes are far from certain of victory and may be driven mad in the struggle, and humanity has a very low place in the universe.
* The Madness Dossier: In 535 AD, a successful revolution sealed the monstrous Anunnakku, the true rulers of humanity, in the ultimate special container; non-existence. Unfortunately, that containment is breaking down. Individual Anunnakku (or small groups) may appear as "Irruptors" when and where reality glitches badly enough.
* The Madness Dossier, one suggested player-character type is a survivor of the rather brutal Russian psychic warfare research program (which goes back to Cold War times, and hasn't got much nicer since), who can have acquired some weird powers and an understanding of the true nature of reality. The protagonists of Project SANDMAN will certainly help such people defect and look to employ them; the defector may be entirely willing to help, realizing just how bad their opponents are.
* The Madness Dossier, the PCs have to recognize that free will is largely an illusion, human personalities can be edited, and reality itself may change at any moment, perhaps eliminating them or turning them into mindless slaves. The answer to "Why does humanity exist?" is "It was made to serve as slaves to uncaring gods". They can fight, and may even win, but there is a cost.
* The Madness Dossier to a bunch of sociopathic cosmic horrors. Which is only how history was supposed to be before a successful reality-twisting revolution fifteen hundred years ago, admittedly.
* The madness here lies in the fact that hoop trundling has been around since at least
* The Madness is spreading to adults. Cheetos' "Orange Revolution" commercials have a mystical sorta Asian Chester Cheetah corrupting adults into doing things to people who annoy them, like empty a Cheet-ohs bag into a rude woman's load of whites at the laundromat, or stuff Cheet-ohs up the nose of someone snoring.
* The Madness of King George ends with George III hale, hearty, and reunited with his wife. The film neglects to mention that the king would be permanently insane within just a few years, and would spend his final years ignored by his family.
* The Madness of King George has an early scene where the King descends from a podium and is set upon by a madwoman, who attempts to stab him. His Majesty is remarkably composed during this affront and is unhurt by it. He mentions to a minister that a butter knife is a poor weapon, which is what the dotty widow used. The scene establishes that King George was observant and rational during the early stages of his affliction; this lucidity is slowly eroded as his condition worsens.
* The Madness Place around his eyes, zombie-like look and irrational, violent behaviour.
* The Madness Place just being the more benign consequences that can occur.
* The Madness Place: Mad scientists often lapse into hyper-productive fugue states when working.
* The Madness Place simply by 'thinking' about the supposed true laws of physics. It's not clear to what extent, though, since the technology is never clearly explained.
* The Madness Season are able to transform into any creature that originates from Earth. The Marra are able to go one better and transform into any living thing that can exist, no matter what their biochemistry.
* The Madness Season are capable of doing so, as long as they remember that they can. One manages to survive this way when she first encounters the Tyr.
* The Madness Season but could analyze the brain of the shape they took to immediately become fluent in spoken language, body language, and given enough time, social and cultural nuance as well. They went to all this trouble because, as we find out towards the end, the Saudar were ugly as sin and would not have been accepted by any alien race they encountered; they needed the shapeshifters to act as their ambassadors.

* The Madness Season does not like to identify with vampire cliches, to the point where he refuses to transform into a bat, even when trapped underground where echolocation would really help him get around. During a number of flashbacks, he even has qualms against hunting humans for food, despite peer pressure from other immortals.
* The Madness Season human blood. This is explained in-text as an evolutionary mechanism to keep them from reproducing in an environment that isn't willing to support new vampires.
* The Madness Season is one of these, as he is the only person old enough to remember what Earth was like before the Tyr invaded and subjugated humankind. His parents were also such, as they witnessed the fall of European civilization into the Dark Ages.
* The Madness Season poses as a god on a primitive colony planet. When he is finally "defeated", he even does a convincing impersonation of the Burning Bush.
* The Madness Season: The Tyr, the Saudar, and one slave race are, respectively, ant-like aliens (in habit if not in exact appearance), beetle-like aliens, and spider-like aliens.
* The Madness Season was not historically significant, his father was an employee of the Library of Alexandria and his mother was worshipped in ancient times as a goddess (though we aren't told which goddess she may have been).
* The Madolche are monsters that look like the residents of some cloyingly sweet
* The Mad, one of the characters is attacked by a zombie hamburger patty.
* The Mad Scientists Club and running around the roof of the fire hall.
* The Mad Scientists Club The bad guys in ‘’The Big Chunk of Ice’’ spend the whole novel trying to retrieve a stolen diamond that had been lost in the (now melting glacier) and fallen into a plaster cast the mad scientist club were making. At the end, it turns out that it was not the diamond, but rather a glass doorknob that a drunk tourist had yanked out of the motel and discarded in the glacier. As one of the villains puts it:
* The Mad Scientist Wars (about a government agency that cleans up after Mad Scientists), so it was only natural.
* The Mad Scientist Wars, an evil robotic arm, used his master stroke, and everything went to hell.
* The Mad Scientist Wars from his own body by his evil sentient mechanical Arm. He ends up making a case for his own existence, and makes it back. Also, Erik Tinker makes a deal with the devil. Sadly, the man he died killing, one of the most dangerous men ever, may well be back too....
* The Mad Scientist Wars has been going on for several years, and has managed a huge number of pages with several highly complicated plots, and character backgrounds, and running gags... not even *counting* the Lounge (where the creators talk), The mad sci Tales (short pieces to do with MSW), and... so on. To the point where a summary has been worked on.
* The Mad Scientist Wars. Interestingly, Andrew's son may be heading towards such a relationship. Commander Xerox and Jess may or may not count. Jess is a shapeshifter who was born female, but when they first met she was shifted as a boy. Xerox, being bi, doesn't seem to care much either way.
* The Mad Scientist Wars is usually a self contained storyline - but as the gae has been going on, more and more storylines will run somewhat through other chapter. For instance, 'Chic's Family' has been going on since the Mad Sci Con chapter.
* The Mad (the people who ate said patties when they were made into hamburgers)! It's a horror comedy.
* The maduradin cannons are similar to the burabudin, but in vehicle form.
* the Maelstrom to help Nexus Force defeat it. Unfortunately, it didn't quite work out, as this ultimately landed him in another organization, XERRD, which went on to create the Dino Attack apocalypse.
* The Maesters of the Citadel also breed special white ravens who are only released to signify the official changing of seasons; one shows up at the end of A Dance With Dragons to show that winter has, in fact, come.
* The Mafia also had the Shadow Beasts, a group of ten highly-trained, highly-

skilled fighters with an
* The Mafia and other such organizations), but even there the clean cops outnumber the crooked ones.
* The Mafia, and stuff dead canaries in their mouth as a sign that they "sung" to the police. If a mafioso got too greedy, their corpse would be stuffed with dollar bills in their mouth as a sign their greed caught up to them.
* The Mafia, as he owned a funeral parlor and used "double-decker" coffins to dispose of murder victims for the New York mafia.
* The Mafia at the Galactic level, dedicated to all sorts of organized crime including slave trade and prostitution.
* The Mafia began during Sicily's transition from feudalism to a modern province of mainland Italy. There were not enough police to maintain order properly and many people turned to powerful bandit gangs with lots of muscle for protection.
* The Mafia Caesar Clown's head, threatening to blow his brains out if the gangsters go after his crew.
* The Mafia, decided to probe Drexel and Milken. For two years, Drexel denied any criminality, but Giuliani wouldn't have any and threatened to press racketeering charges on Milken. As the result of a plea bargain, he pled guilty to lesser charges of securities fraud and served 2 years in prison. Plus, while Drexel ducked a racketeering indictment, its reputation was shattered to the point that it went bankrupt in 1990. If that wasn't worse, it gave leveraged buyouts and speculative-grade debt ("junk-rated" bonds) a bad name.
* The Mafia drove him to bankruptcy and his daughter to prostitution. This provoked Bolan's retaliatory crusade, not only against the Mafia family responsible for this, but the entire community.
* The Mafia from Clair and is (literally) thrown out the door where his girlfriend is waiting.
* The Mafia have this plot line in them, real-life mobsters are typically required to do a contract murder in order to "get their button", i.e. be inducted into the secret criminal society. This is done to show that they have no qualms doing the job when asked by the higher-ups, are aware of the risks and dangers involved if they get out of line, and most importantly, it confirms they are NOT an undercover cop (especially after the Donnie Brasco scandal, in which an undercover FBI agent infiltrated one mob crew and almost became a "made man").
* The Mafia in 1985, enabling prosecutors to go after other criminal gangs.
* The Mafia. In addition, they keep themselves on top with the most advanced long-range weaponry available, and Gotti has a minigun for a prosthetic arm.
* The Mafia is "Always being available for Cosa Nostra is a duty — even if your wife is about to give birth."
* The Mafia is completely destroyed and it's game over. In Ivan's route, if you decide to go through an old tunnel dug by another prisoner it'll collapse and everybody is crushed to death.
* The Mafia itself joins in hunting them down, because cop killers put the whole department on edge and make life difficult. Grandpa Henry Reagan remarks that when he was on the force the mafia even had explicit rules that, outside of certain circumstances, cops were off-limits. The killer gets cornered, tries to shoot his way out, and is hosed down with lead by several detectives and an ESU team. While searching for the killer, Danny finds and arrests an accomplice (whose father is a retired NYPD officer), who he takes to a spot on the water, then explains 50 years earlier the man's father took a cop killer to that exact spot, shot him twice in the head and dumped the body in the river. It was ruled an accidental death. Danny then explains the man's father would likely disown him if he killed a cop and was executed in such a fashion. This breaks the man into giving up the real killer.
* The Mafia Kills Only in the Summer. It's in the title! The film is a dramedy about the life of a Sicilian guy whose entire life, from birth to adulthood, is influenced both by the mafia and the men who bravely fought (and often lost) against it.
* The Mafia — calls him a vigilante for taking the law in his own hands.
* The Mafia occurs as a mafioso's life is actually monotonous, boring, and

sometimes horrendous. They must have good rackets in order to avoid being a long-term problem for their bosses and kick a portion of said earnings upstairs. Anything they do is "put on record" or "registered" with their capo so that they'll profit from these rackets and plan further schemes. At the same time, they must avoid law enforcement heat. In recent years, thanks to increasing pressure from the law, mobsters turning informer, and long prison sentences, many mobsters can only manage to barely scrape by.
* The Mafia sends him on the most perilous assignments, figuring it'll be a cakewalk for an agent like that.
* The Mafia, then the antagonists will usually be some other group / organization of bigoted white guys.
* The Mafia. This entailed being driven to an out-of-the-way location and then killed by a hitman sitting in the seat behind the victim.
* The MafiaWhile searching for the killer, Danny finds and arrests an accomplice (whose father is a retired NYPD officer), who he takes to a spot on the water, then explains 50 years earlier the man's father took a cop killer to that exact spot, shot him twice in the head and dumped the body in the river. It was ruled an accidental death. Danny then explains the man's father would likely disown him if he killed a cop and was executed in such a fashion. This breaks the man into giving the real killer.
* The Mafiosi are similar to the Mafia and play a somewhat major role in the first two
* The Mafiya boss will only introduce Oliver Queen to the Count if he kills an underling who has displeased him. Oliver appears to strangle him, but actually just renders him unconscious and temporarily stops his heart. Oliver carries the 'corpse' outside, then tells Diggle to get him out of town and set him up in a new identity.
* The Mafiya: Gangsters and mobsters from Russia (and other ex-Soviet nations).
* The Mafiya: Gangsters and mobsters from Russia (or other nations of the former Soviet Union).
* The Mafuba (Evil Containment Wave) from the original series, which Master Mutaito used to imprison Piccolo. Roshi attempts to reseal him with it, but fails and dies in vain. However, a sufficiently powerful and young user can survive the technique: Tenshinhan did when he tried it against Piccolo (though he was
* Them against the invading Xen aliens. In general the HECU are being overwhelmed, but as far as Gordon can see, they tend to win individual battles, suggesting that the aliens are only winning overall due to
* The magazine and official website has Barbie herself referring to the fans as "dolls".
* The magazine mascot Alfred E. Neuman symbolizes everything that's uncanny and grotesque about the magazine.
* The Magazine of Fantasy and Science Fiction a controversial article "The Day After We Land On Mars" by Robert S. Richardson suggested that given that men would be cooped up for years on an expedition to Mars, some "nice girls" be sent along to relieve their tensions and promote morale. He argued that current morals evolved out of conditions on Earth, and they need not apply to extraterrestrial conditions.
* The Magazine of Fantasy and Science Fiction. Blockbusters are analyzed as representing problems with American culture.
* . The magazine often hosts logic puzzles where a detective needs to find a hole in a suspect's story, but the final question in these is usually worded as "What in the story didn't pan out and convinced the inspector that further interrogation was needed?", rather than "What factual error proved the suspect was guilty?"
* The Magdalene Sisters), earned their main income from doing laundry which had to be done by hand in earlier years. Later, the first washing machines were installed and although the nuns and their prisoners didn't know it then, the very ubiquity of these relatively inexpensive and obviously practical appliances in personal residences would destroy the economic viability of those prisons.
* The Magdalene Sisters has several of the characters working in the convent laundry. As they do, one of the more experienced patients tells them about the one

who ran off the previous night under the guise of admonishing them.
* The Magdalene Sisters judged a slut for her beauty and flirtation with boys.
* The Magdalene Sisters, The nuns sends Crispina to a psychiatric hospital after she's sexually molested by a priest in order to make sure that she keeps quiet about the abuse that was occurring at the Magdalene laundry.
* The Magdalene Sisters. When Rose introduces herself she says they already have a Rose and has everyone call her by her middle name, Patricia. Crispina's real name is Harriett, so we could assume there was another Harriett in the laundry as well.
* The Mage class also has an optional elemental summon. So do Druids, Priests and Shamans with the right talents, although their summons are rather short-lived and can't be controlled as directly.
* The mage class can create temporary portals to their respective side's capital cities, as well as the neutral cities added with the expansion packs.
* The Mage Quest card Open the Waygate requires the player to play spells that didn't start in their deck. Cards that you get through generation effects are normally unmarked in your hand, but hovering over the quest will highlight any spells that fill the requirement.
* the mage responsible for it being haunted by demons and undead has been experimenting to unlock the power of the Wardens' Tainted blood, including a lot. This gives Wardens who drink his concoction additional powers, whether it's bleeding on their swords for extra damage or spraying blood like a fire hose.
* The Mage's Circle quest also has plenty of this due to a moment in the middle of the quest, when
* The Mages' Guild is long gone, and its regional equivalent, the College of Winterhold, is just fine with teaching necromancy. Necromancy is also better represented mechanically — where previously the player could at best hope to get a Summon Zombie spell,
* The Mages Guild runs a "Guild Guide" service, where you can be teleported instantly from any Mages Guild base to any of the other Mages Guild bases.
* The Mages have Barrier spells which surround their body and absorb incoming attacks. Shield spells also exist, which cover only one side but could deflect attacks that would pierce barriers. There's also "Field" spells that dissipate magic energy within them, as well as magically hardened armor in their Barrier Jackets. Figuring out the right combination of percentage of each at any second during a battle requires an inhuman amount of mathematics and quick thinking. Nanoha spent most of her elementary school time in a
* The mage Tier 13 set has what looks like a pair of glowing goggles - on the forehead. They are meant to just look cool as the particular set has been dubbed "Technomage."
* The mage Vetch tells Sparrowhawk about the differences in magic between locations.
* The Mage Will Master Magic Efficiently in His Second Life notably changes or leaves out certain events of the web-novel, such as Zeff dealing with the bandits attacking a caravan, skipping straight into the formation of their guild. Likewise, the web-novel is much darker (such as Zeff killing bandits without a second thought), whereas in the manga it centers around the shounen elements.
* The Mage Will Master Magic Efficiently in His Second Life spell basically freezes time for everyone but him. He can't move in that frozen span of time, but he can essentially cast double the spells without a chance of interrupting, making it seem instant. The cost of the spell increases, but so does its effectiveness as well.
* The Mage Will Master Magic Efficiently in His Second Life stops any magic used against it as long as its a Primary-level spell.
* the magical drought, the oldest dragons couldn't survive without the ambient magic. While many went to sleep, some, including Julius's grandfather the Quetzalcoatl, turned to human sacrifice to limp along. It wasn't enough to save him when his daughter Bethesda decided to kill him.
* the magical land of Equestria is ruled by two millennia-old, immortal monarchs with enough magic strength to move celestial bodies. Thankfully, they're generally considered competent and benevolent. Fanfics sometimes poke fun at this, with the

ponies confused, distrustful or even hostile of democracy and other political models.
* The Magical Monarch Of Mo. In the land of Mo, everything the people need in their daily lives grows on trees. This includes swords, hats, rings, peanuts, medicine, preserved apricots, shrimp salad, animal crackers, and bicycles.
* The Magical Revolution Of The Reincarnated Princess And The Genius Young Lady is incapable of casting magic on her own, so instead she became the world's foremost researcher in developing magical technology that anyone can use.
* The magical rules are being explained to the audience as the main characters learn them. Every time a new spell is introduced, the readers are told exactly what it is capable of. In addition, it has been explained
* The magical Staff of Power and Staff of the Magi are both mage staffs that almost always indicate that the wielder is a mage of impressive power, if only because they're such desired magic items among wizards and sorcerers that anyone who's not strong enough to fend off all comers will swiftly lose it (and likely their life).
* The Magical World arc may have dragged on more than needed as well. It finally ended, taking nearly
* The magic-as-drug plotline, where "overuse" of magic was suddenly revealed to cause addictive behavior, came complete with a "magic pusher" and after-school special-esque behavior by Willow. This was rather jolting to many fans, as during the prior two seasons, Wicca/magic was used as a metaphor for Willow and Tara's love and their sexual relationship. In fact, it continued to be used to refer to their relationship with Tara's song,
* The Magic Bag gets hit with an even worse case of this (and combined with
* The Magic Bag of Tricks also goes through this. In the Joe Oriolo cartoons, it was a
* The Magic Beasts Corps has utilized and weaponized DNA analysis technology to create and breed powerful Demonic Beasts that are ridden by warriors carefully screened and trained for the job.
* The Magic Blade has one of its action scenes on a gigantic Chinese Chess board in in the main villain's mansion. The rooks even have projectile launchers.
* The Magic Blade, originally appears to be a benevolent old lady running a foodstall, but is actually a serial killer who poisons her customers and collect their bodies for her meat soup.
* The Magic Blade trilogy: The protagonist, Fu Hung-hsueh, uses twin bladed tonfas in combat, to great effect too, especially in the climax of the second movie.
* The Magic Book of Spells: Rhina the Riddled's chapter of the Book of Spells is full of "notes to me" she left for various reasons.
* The Magic Book of Spells, Star's ancestor Queen Skywynne accidentally invented a time-loop spell when trying to banish her mother and the unwanted suitor she had in tow. It took her several iterations before she realized what was going on and managed to undo it, but then she figured out how to use the spell to get the citizens of Mewni to build a new castle, fitting five years' worth of labor into a single day.
* The Magic Boomerang. As long as the boomerang of the title was in flight (which usually lasted a few minutes) time would stand still for everyone except the person who threw it.
* The magic can also be used to forcibly prevent someone from dying long enough for their body to be repaired. One necromancer uses this to try to sell Harry a
* The Magic Candle. At the very beginning of the game, you are asked by the King to accept the game's major quest. You have the option of declining, and if you do, the game ends immediately and unceremoniously.
* The Magic Candle lets you make arbitrary subparties. This is mainly a convenience, provided so individual members can work or train while the others explore. But eventually you have to raise a sunken island by pulling three levers at once — in different places around the world. If you've been relying on one or two fighters to carry your team, this is where you'll regret it.
* The magic carpet of Tangu or Prince Housain's carpet. The latter doesn't fly,

but instantly teleports itself and its passenger wherever the passenger wishes to go.
* The Magic Christian had Sir Guy Grand (Peter Sellers) and his adopted son Sir Youngman Grand (Ringo Starr) telling people they could grab all the cash they wanted. All the cash the two poured into a vat of human excrement.
* The Magic Christmas Tree plus the short "The Shanty Where Santy Claus Lives"
* The Magic Circle, Maze Evalyn has her "chorus of the damned", which is a collection of recordings of people raging at being beaten by her. Many of them became even more angry and embarrassed when they realized that she was a girl.
* The Magic Coins, Part 3", the City of the Ancients features a classic ancient ruins version, with a long corridor whose floor is riddled with pressure plates set to trigger falling nets, showers of falling rocks, and a lowering ceiling.
* The Magic Coins, Part 3", when Niblik is holding the drawbridge open with the heroes hanging from its edges, it seemingly doesn't occur to any of the pegasi involved that they can just fly instead of hanging helplessly over a precipice.
* The Magic Comes Back: In a setting where magic has vanished, the magic ends up returning.
* The Magic Comes Back: In a setting where magic is established to have disappeared, the magic ends up returning.
* The Magic Crystal, although due to budget limitations and lacking in the special effects department, the crystal is portrayed by a hollow plastic chunk with a green bulb inside which glows as it communicates with humans.
* The Magic Door: Liam and Sally think Raglin wants to eat them, but it's just a lie Flip told them to sow discord.
* The magic empowered Damien Darkh was fond of just waving a hand to telekinetically do it to people.
* The Magic Flute, a more down-to-earth sort than the heroic principal couple of Tamino and Pamina. Both couples resolve all their problems in the multi-scene second act finale.
* The Magic Flute, as he keeps putting off the deed and waiting for someone to come along and stop him, which the Three Boys finally do.
* The Magic Flute cries when he gets lost in the vaults under the temples and worries that he'll be trapped there forever and starve to death.
* The Magic Flute. However, when another adaptation of the same plot hit the stage first, Mozart and Emanuel Schikaneder completely reworked the libretto, so it became something else.
* The Magic Flute is not only murderously violent but also a walking symbol of human ignorance.
* The Magic Flute is one of the most blatant examples ever - having literally the same personality as Papageno but as a woman.
* The Magic Flute is referred to as a moor in the libretto, but is not always portrayed as black. It helps that (in North America, at least) operas rely on subtitles, so phrases like "the wicked moor" can be given as "the wicked Monostatos".
* The Magic Flute, Papageno is punished by having a padlock placed on his mouth. This prevents him from speaking, but it does not prevent him from humming.
* The Magic Flute Sarastro and strengthen his community against them. They also give Tamino the titular magic flute, thinking it will help him defeat Sarastro, but instead he and Pamina use it to succeed in Sarastro's trials and join his brotherhood. At the same time they give Papageno the magic bells that bring his true love to him in the end, and they entrust the young men to the Three Boys' wisdom, only for the Boys to give them pro-Sarastro guidance throughout.
* The Magic Flute's classic film by making Sarastro into Pamina's father. In the opera's original, uncut libretto, Pamina and her mother the Queen talk at length about her father, who was clearly a different person than Sarastro.
* The Magic Flute spurned by Tamino (he was actually sworn to a vow of silence). Fortunately, the Three Boys stop her and clear up the misunderstanding.
* The Magic Flute, Tamino sings his main aria to a picture of the heroine her mother has given him as an incentive to rescue her.

* The Magic Flute Tamino's manly man (YMMV; after all, he fainted at the sight of a large snake and had to be saved by three women.)
* The Magic Flute, the role of the Speaker, a dialogue-only character who guides Tamino and Papageno through their second act trials, is merged with that of the old priest Tamino encounters in the first act finale. This has been standard practice for so long that few people know that they originally may not have been the same character.
* The Magic Flute" way). Two of them consist entirely of an extravagant coloratura aria (and many people only remember the second one). The third is a small part of the second act finale in which she gets in only a few lines before her final defeat.
* The Magic Flute, when the Queen of the Night asks Tamino to rescue Pamina, she asks him to help in "a mother's darkest hour."
* The Magic Flute, when the villain is an EXTREMELY high soprano, and the low bass is the good guy.
* The Magic Flute, which takes place in a mythical world heavily influenced by Masonic themes.
* The Magic Goes Away: A story with magic in the setting ends with all the magic disappearing.
* The Magic Goes Away is about few present-day magicians who learned to live in a magic-barren world and use its resources sparingly, allowing them to replenish. Then meteor showers start to bring more mana to Earth, promising to eventually raise its amount back to Atlantean levels.
* The Magic Goes Away is set during a mythic past before magic (which turns out to be a non-renewable resource) was used up and the world became the mundane place it is now. Several of the early stories mention Atlantis, which is said to be located on a tectonic instability that is kept in check by magic; the implication is that its downfall came when the magic ran out and the long-delayed earthquake cut loose. "The Magic Goes Away", the story that gave the entire series its name, reveals that it didn't even last that long: it was invaded by a jealous rival nation that didn't know about the tectonic instability; the invading army slaughtered Atlantis' sorcerers to prevent them being a threat, and was very surprised when shortly after the invasion Atlantis fell into the sea, taking the invaders with it.
* The Magic Goes Away, it turns out Fireball Cat has a crystal orb containing the very last wish in the world (he uses it as his hot tub's plug). But before Dez can wish for the magic to be restored, Puffin wishes for the world's largest potato chip. He gets what he wants, but is disappointed that it's still smaller than he is.
* The Magic Goes Away with magic, or that the original magic-dependent society was a bad place to live. It's just that magic turned out to be a limited resource... unbeknownst to most of the people using magic.
* The Magic Goes Out of competitive fighting: By the Cell/Android Arc, the general populace has forgotten entirely about ki and all the amazing feats that were proven possible back in Goku's youth. Now the Budokai tournament is attended by a mostly-ignorant audience and dominated by self-aggrandizing fighters like Mr. Satan (granted, he's a capable
* The Magic House episode "The Wishing Tree", PC Pot carries one of these when he leaves the Magic House. It has disappeared the next time he appears, however.
* The Magic House. While some characters, like PC Pot and Kitty Kettle, have alliterative names, others, like Uncle Teapot and Grandpa Clock, do not.
* The Magician: Ace's love interest, Mona Malone, is also the daughter of his archnemesis, "Black" Jack Malone. Played with, in that she doesn't participate in her father's criminal activities.
* The Magician - as in Multifire (the name of the villain in question), then the officer arrests Ace, for being "the Magician" (his sign was also an M).
* The Magician Bink's talent is that he cannot be harmed by magic, directly or indirectly. Bink's ability cancels out
* The Magician, Blake drives a white Chevrolet Corvette with custom license plates ("SPIRIT") and, for its time, an exotic feature: a car phone.

* The Magician by sabotaging the elevator so that it bursts into flame when she presses a button.
* The Magician distracts a pair of guards on a boat by setting up on the dock to do some painting, and taking off her jacket to reveal an extremely abbreviated top that makes it look like she is topless from the back. While the guards are ogling her, Tony sneaks on board.
* The Magician drives Tony's car into the back of a large truck, which turns out to be the mobile office of the reclusive billionaire Tony has been trying to locate.
* The Magician Grey Murphy's talent is to suppress magic directly. At first, this ability presents automatically. All magic around him ceases to function and so when he is first introduced to Xanth, a land of magic, he refuses to acknowledge that magic exists because he sees no evidence of it around him.
* The Magician guy, and stop doing so at him, which is useful to fool the sidekick.
* The Magician Humphrey was mistaken for an assistant by one of the supplicants—it doesn't help that by then he looks like a shrunken gnome, and he plays along for a good while.
* The Magician: In "Illusion in Terror', Blake is suspended by his ankles and left to die in a burning barn.
* The Magician: In "Illusion in Terror", Tony is locked inside a burning barn but seems to suffer no ill effects from the heat. And while there is some smoke, there is not nearly enough.
* The Magician: In "Lady in a Trap", the local sheriff is part of the conspiracy to steal a rare book.
* The Magician: In "Lightning on a Dry Day", Blake visits the small town of Elm Ridge, North Carolina after meeting a young man who was rendered catatonic by something he saw near there. The locals make various attempts to run him out of town before he eventually discovers that the town matriarch is manufacturing illegal rejuvenation drugs, and the young man witnessed a Treasury agent who got too close to the truth being burned alive.
* The Magician: In "Man on Fire", a teenager steals one of Tony's trick trunks and conceals himself in it after arranging for it to be delivered the photographic studio that is blackmailing his father.
* The Magician: In "Nightmare in Steel", Tony is being chased through a ship when he causes his pursuers to skid and crash by spraying machine oil on the floor. Later in the same episode, he causes the leader of the pirates to trip and fall by tossing a handful of bullets under his foot.
* The Magician in "Ovation for Murder": allowing a hitman to impersonate the patsy and commit murder in plain sight.
* The Magician: In "The Illusion of Black Gold", Tony uses a pair of handcuffs he had earlier taken from the prisoner he was rescuing to slide down a guywire to the ground, carrying the prisoner on his back.
* The Magician: In "The Illusion of the Curious Counterfeit", Tony escapes from the gangsters who are chasing him by jumping from a second storey landing into a huge pile of trash—which seemingly consists of cardboard and rags—in the alley.
* The Magician: In "The Illusion of the Fatal Arrow", a hitman uses scuba gear to hide inside a fuel tanker in order to infiltrate a high security research facility.
* The Magician: In "The Magician - Pilot", a heavy uses his credit card to jimmy the lock on Tony's dressing room.
* The Magician: In "The Magician - Pilot", Blake and Mary Rose have to jump from a speedboat onto a seaplane being piloted by Jerry. They cling to the outside as the plane takes off.
* The Magician: In "The Magician - Pilot," Blake visits Francine's apartment in search of Mary Rose. He finds the apartment ransacked and Francine beaten up on the floor. Francine's dazed words send him to a houseboat, only to find the bad guys have beaten him to it, with the houseboat ransacked and Mary Rose missing.
* The Magician: In "The Vanishing Lady," a singer is kidnapped and a million dollar ransom demanded from her agent/boyfriend.
* The Magician King introduces the Seeing Hare, a hare with precognitive powers. It

achieves hair-raising status by prophesying doom and despair for the protagonists.
* The Magician King, it's near impossible for magicians to turn themselves completely invisible and those that do never look normal again. They look more like paintings than people.
* The Magician King, simply by cutting her thumb and touching it to the ignition - an early hint that she's had a lot more practical applications for her powers than Quentin and the others.
* The Magicians (2016): Alice's parents turn out to have a man named Joe as their "third".
* The Magicians (2016): Fairies turn out to gestate from eggs that grow off mushrooms.
* The Magicians (2016): Fillory has many, of every common species. Apparently many of them also have relationships with human Fillorians.
* The Magicians (2016) find out that their Timeline 40 (the main timeline) alternates are dead as well.
* The Magicians (2016) in a bloody mess. She drops the cage and runs, leaving Quentin and the others to talk to a very confused cop.
* The Magicians (2016) in panic. Penny happens to contact her during it, invading her dream and ending up actually seeing her naked, much to her horror. He considers it prime fodder for a favor later.
* The Magicians (2016) Kady and Penny have sex in mid air, though it's done by levitation here.
* The Magicians (2016) Kady and Penny use their magic to levitate so they can have sex in mid air. Quentin and Alice's first time is after turning into foxes in Antarctica.
* The Magicians (2016) magic keys which have the potential to get magic working again.
* The Magicians (2016). Many high-ranking government and private officials are magicians, which keeps the civilian magicians from just doing whatever they want. It's to the point that perfectly ordinary banks are heavily warded against magical intrusions and have battle magicians on staff.
* The Magicians (2016): Margo claims she has them to deter her horny husband.
* The Magicians (2016): Margo comments on Alice's large breasts being her "assets" which she shouldn't hide under her modest outfit.
* The Magicians (2016). The Library eventually caught and imprisoned him, because he had to steal from their forbidden archives to gain that knowledge.
* The Magicians (2016): The Neitherlands is just many fountains leading to different worlds.
* The Magicians (2016)), they're not each other's love interests, enable each other's romantic liaisons, and remain stalwart loyal companions throughout the show.
* The Magicians (2016), Travelers are described as "hybrids", and Penny tells Julia at one point that he's not exactly a normal human. The specifics aren't clear, however.
* The Magicians (2016)". When Kady assumed the apartment from Marina, she found a list on the fridge she assumed was some sort of weird grocery list. It's actually the rent Marina owes Bailey/Baba Yaga.
* The Magicians a group of students from the 70s or earlier wrote a thesis on going back in time to kill Hitler, even building a time machine to World War II. They failed to account for the fact that Hitler was a skilled battle magician and were killed.
* The Magicians, Alice's parents have been using magic to keep control of their huge and lavishly expensive mansion. When magic is taken away, the IRS hits them with a bill for 30 years of unpaid taxes.
* The Magicians, all magic is lost to the world. A major result is that people who have relied on illusion spells suddenly find their true forms revealed, everything from a gorgeous model exposed as plain and overweight to a "hunk" revealed in his centuries-old form.
* The Magicians, all of whom had their fair share of mistakes, morally questionable

and/or jerk-ass moments, and comedic scenes.
* The Magicians and Mrs. Quent, and therefore he and Ivy shouldn't be getting married in the first place.
* The Magician's Apprentice", Colony Sarff moves this way — not because he's a ghost, but because he's a collection of snakes.
* "The Magician's Apprentice" has things called "handmines", hands that reach from the ground and pull people under. Each has an eye in the palm.
* "The Magician's Apprentice", holds an axe as he awaits his challenger in the arena. Enter the Doctor, standing on a tank, playing a screaming electric guitar solo.
* "The Magician's Apprentice": In order to get UNIT's attention, Missy does this with passenger planes by time-stopping every airplane on Earth, having them cast ominous shadows on the ground.
* "The Magician's Apprentice", is a mass of sentient snakes which can collect together to take on a humanoid form. It claims to be a democracy.
* The Magician's Apprentice", millions of fans immediately wanted the graphic t-shirt that he wears under his suit jacket. As soon as it was positively identified — as a Label Lab "Misty Mountain" design — fans dog-piled on House of Fraser, the online apparel store that sold it. It took less than a month for all of the Misty Mountain shirts to sell out.
* The Magician's Apprentice, naturals happen. In this era, there is no Guild, but the local lord has an obligation to take any naturals discovered as an apprentice—a duty that is generally seen as a pain in the behind, as teaching an apprentice without any compensation other than magical assistance is not something that most lords consider worth their time.
* The Magician's Apprentice, playing his own words from the above episode back to him, once again tempting him to eliminate every Dalek in existance, to prove that he isn't so different to himself - genius, thinking about his people and willing to do what it takes.
* "The Magician's Apprentice", the Doctor grudgingly acknowledges Davros as his greatest enemy, right in front of the Master, who is not amused.
* "The Magician's Apprentice": The Doctor tearfully begs the villain on bended knee to stop the Daleks from exterminating his companion, Clara (aside from being a dramatic moment in its own right, this is also a watershed moment for the entire season as it establishes the Doctor's growing love-driven paranoia over Clara's safety).
* "The Magician's Apprentice"/"The Witch's Familiar": Part One chronicles various parties searching for the Doctor across time and space; he turns out to be throwing a lighthearted
* The Magician's Apprentice", when she's about to open a space-station airlock that she suspects is really just a disguised door onto a planetary surface. Activating the mechanism to crack it open, she tells Clara "Let's make jam!"
* The Magicians at the end of the show's fourth season. The show continued for one more season without him.
* The Magicians Bisexual Elliot is played by openly queer Hale Appleman.
* The Magicians by Lev Grossman, a Magician's Court that punishes magical criminals is mentioned a few times.
* The Magicians campus in upstate New York, a stately eighteenth-century English manor house... except it's right in the middle of an Antarctic snowfield.
* The Magicians changing Penny from white in the novels to Indian-American in the show, actor Arjun Gupta is a Florida native just like the character.
* The Magicians, Dean Fogg claims that the Teslaflexion spell is named after its inventor, Fred Flexion. He's probably being sarcastic, but it's never made entirely clear.
* The Magicians Eliot and Margo try to brew some Magical Gin but it turns out the spell was to summon a Djinn. The Djinn grants even wishes that are only thought. Margo, not knowing this and frustrated at the attention Eliot is showing his new boyfriend Mike accidentally sets the Djinn on Mike by simply thinking: "I wish Mike would go back where he came from and suck on some other knob." The Djinn takes this

literally and takes Mike to the library the group first met him at and enchanted him to lick and suck on a doorknob.
* The Magician sends a warning to his intended victim by firing off a vintage hand-cranked Gatling gun in his weapon collection via remote control.
* The Magicians, for while she's nowhere near his power level, Alice has learned and mastered enough spells and techniques to keep him on the ropes.
* The Magicians has said that part of the reason he wrote the sequels was to refute all the theorists who were convinced that all the magic in the first book was actually a series of psychotic hallucinations and that Quentin had killed himself at the end. The fact that Quentin genuinely struggled with severe depression only encouraged such theorists.
* The Magicians he died saving Earth from evil minor gods, by fixing a mirror needed for their banishment.
* The Magicians, he's left on the ropes until he can get close and throw a punch.
* The Magicians hidden from the rest of the world mean that it's a little under three months behind real time; as such, Quentin is rather taken aback when he first arrives, having been summoned from a cold November afternoon in New York into a very pleasant summer's day in Brakebills.
* The Magicians. However, they were only of modest ability at best, and poorly regarded within the magical community for trying to go public.
* The Magicians inhabitants as your own personal playground is a good way of getting people hurt.
* The Magicians: In order to kill the Dark King and re-kill The Beast once and for all, the gang destroys the land of Fillory after magically placing its inhabitants in stasis. Afterwards, Margo, Josh, Alice, and Fen disappear after casting a spell to create a new Fillory. Months pass; Kady rejoins her hedge witch friends, Eliot becomes a teacher at Brakebills University and begins a relationship with Charlton, while Penny and Julia are together raising their daughter and travelling the cosmos in search of their missing friends. We cut to New Fillory where the first four are getting ready to release the Fillorians from stasis now that their new home is ready, and they discuss the work ahead of them and the fact that their lives will continue to be a mess of magic and intrigue, which they find oddly comforting. It's implied that the gang will eventually be reunited, and the series ends with Margo pushing the button to release the Filliorians.
* The Magicians isn't hugely lazy, but being one of the few students for whom magic comes easily, he passes over his chance to be tops in the class.
* The Magicians is the only member of the main cast that goes on to make practical use of this skill: during the final battle with the Beast, she transforms into a lion, an anaconda, an eagle, a bear, a giant scorpion, and even a dragon.
* The Magicians, it becomes a much smoother experience that can actually be used for fun.
* The Magicians. It's also a handy place to stash misbehaving professors.
* The Magicians. Many of the spells and rituals that are shown in the show use different runes and shapes to create various spell effects. Some even require more than one magician in order to be executed properly.
* The Magician's Nephew (1955) take place in this era, at least the parts set on Earth.
* The Magician's Nephew, a bird in the newly-created Narnia does this, to the great amusement of the other talking animals. Rather than scold his creations for laughing, Aslan, equally amused, informs the bird that he has become the first joke.
* The Magician's Nephew, a normal Earth horse winds up in Narnia and is given wings by Aslan.
* The Magician's Nephew, Aslan tells the creatures of Narnia that an evil has come into the world. The animals immediately begin a search for the neevil. They find Uncle Andrew, the magician of the title, and decide he's the neevil, and they wonder if Aslan will let them keep him as a pet.
* The Magician's Nephew. Digory's own theft of the Apple was forgiven due to his desire to give it his mother for its (assumed and later verified) healing powers.

* The Magician's Nephew has a tree whose fruit, in true C.S. Lewis style, can only be described by saying how much better it is than everything that exists in the real world.
* The Magician's Nephew is set roughly in this time period, and was influenced by Lewis's own childhood. The time frame may be a little off (Lewis was born in 1898), but the nostalgia is clearly there:
* The Magician's Nephew, Jadis is described multiple times as dazzlingly beautiful, from Digory's POV. The text points out that Polly doesn't see anything especially beautiful about the witch.
* The Magician's Nephew plays some interesting tricks with this trope:
* The Magician's Nephew quarreled quite a lot after they were married, the fact that the kingdom remained prosperous for so long would indicate that she was a subversion as well.
* The Magician's Nephew that killed every living thing in her world except herself. Once Jadis leaves that world with Digory and Polly, it immediately ends, as no one is left to believe in it.
* The Magician's Nephew the epilogue mentions that King Frank and Queen Helen, the only two humans to remain in Narnia immediately after its creation, have two sons who both marry nymphs, thus founding the original royal houses of Narnia and Archenland.
* The Magician's Nephew, the reader is told how sitting in the center of it all are the first king and queen, "like Adam and Eve, in all of their glory".
* The Magician's Nephew the trope as "something that was done quite frequently in those days."
* The Magician's Nephew: Uncle Andrew plays this role initially, until Jadis enters the story and assumes the role.
* The Magician's Nephew, when the jeweler complains that Jadis blacked his eye, a butcher's boy recommends a nice raw beefsteak to reduce the swelling.
* The Magician's Nephew. When Uncle Andrew realizes the implications of this effect, he starts talking about coming back with guns to take over Narnia and make a fortune turning scrap metal into battleships and train cars. Aslan later explains that his scheme wouldn't have worked, because the only reason Narnia was doing this was that it had been created only the previous day, and it still had a sort of echo of that power in it. Within a few days, the effects would fade and only regular seeds would produce trees.
* The Magician's Nephew. While Diggory spends much of the book justifiably angsting over his sick and dying mother, he takes traveling to new worlds and fighting a witch pretty well. Uncle Andrew subverts this when he's thrown into the world of magic, and it's played for laughs.
* The Magician's Nephew, with an actual splash; Digory and Polly jump in a pool that they know is a magic portal and only get their feet wet. In their case, though, the portal still worked; they just weren't using their magic rings correctly (as they quickly figured out).
* The Magicians: One of the resident gods decides to remove the amnesia curse on Julia. Without permission. The one that was preventing a traumatic rape memory from driving her insane right before the big fight next to a nexus of unparalleled power. "No need to thank me." And he wonders why gods in his universe are going extinct.
* The Magicians", Penny ends up needing to get his hands sliced off as a result of them getting subjected to a curse. Quentin is reluctant to do so, but eventually proceeds to chop them off in rage after getting goaded into it by Penny.
* The Magicians: Quentin notes Alice's "heavy breasts" more than once, including while they're having sex, which is clearly depicted as part of her attractiveness.
* The Magicians, Quentin reflects that Brakebills seems too good to be true and fully expects to wake up and find that his time studying magic was just "a fanboy hallucination," though to his relief he's ultimately proved wrong.
* The Magicians: Shade-less Julia solves the problem of a recalcitrant sapient forest by burning it down.
* The Magicians's hands before the fighting starts. As spells are dependent on

complex gestures, this leaves the Physical Kids' most experienced battle-magician out of the fight - a fact that the Beast openly gloats about.
* The Magicians sorting system; quite apart from making it difficult to find anything, it also produces a ridiculous amount of wear and tear on the spines.
* The Magicians that plain, nerdy Josh routinely scores with women out of his league with his natural charisma, and he eventually begins a long-term relationship with Margo that lasts the rest of the series.
* The Magicians, there's no clear indication that US military history is really that different within the setting.
* The Magicians, the study of magic requires its practitioners to understand a wide variety of languages and dialects in order to master the increasingly multicultural library of spells - up to and including correct pronunciation and grammar. Among the languages mentioned over the course of the series include Middle English, Latin, Old High Dutch, Estonian, Old Church Slavonic, Arabic, Aramaic, and Minoan. Naturally, Alice proves to be the most fluent of them all.
* The Magicians the truth as well, so people who lie constantly (such as Kady) feel physically ill while holding it.
* The Magicians to the core, he's charismatic enough that he has just as many confirmed sex partners as his more conventionally-attractive castmates.
* The Magicians when Alice was a niffin, she tortured and murdered every child of a magic Lamprey but refuses to explain why to anyone. When the Lamprey itself confronts her, Alice admits she didn't do it for knowledge. She did it because Lampreys make "pretty lights" when they die, and the more painful their death the prettier the lights become.
* The Magicians, when Quentin finds his Discipline is unclassifiable, he says of himself "I'm a nothingmancer. I'm a squatmancer."
* The Magicians while they're away. However, he's well-loved by fans for his charmingly and hilariously un-self-conscious personality.
* The Magician: The mastermind in "The Manhunters" plunges to his death when he is washed over a spillway while trying to escape from Blake.
* The Magician: The two-part "Illusion of the Curious Counterfeit" begins when a preciously unseen ex-girlfriend of Tony's arrives on his doorstep being chased by gangsters.
* The Magician: The villain in "The Illusion of the Lost Dragon" is a descendant of warlords who used to rule Szechuan Province, and who regards anything that originates from there as his property. This includes demanding daughters of Chinese immigrants as tribute. Although he mentions that he is of mixed race (presumably to explain why the white actor playing him does not look Chinese) he dresses in ancient Chinese armour, and lives in a palace surrounded by Chinese servants.
* The Magician turns out to be in witness protection. After her photo appears in the paper, syndicate hitmen turn up looking to kill her.
* The Magician use anesthetic pistols which cause instantaneous knockout when the hijack the cargo ship.
* The Magician was an American television series that ran during the 1973–1974 season. It starred Bill Bixby as stage illusionist Anthony "Tony" Blake, a playboy philanthropist who used his skills to solve difficult crimes as needed. One of the big hooks in this series was that Bixby, a rather talented amateur illusionist, performed all the illusions without camera tricks of any kind.
* The Magician who dabbles in investigation because he cannot stand to see injustice.
* The Magician, who was an extremely talented amateur magician, without any trick photography.
* "The Magicks of Megas-Tu" has the crew discover a world where much of their equipment doesn't work, but
* The Magic Mirror also tends to be cut when it is performed in community theaters, because the Magic Mirror uses motion capture and most theaters can't afford that. Gingy, like above, gives the information.
* The Magic of Oz Dorothy and the Wizard get some monkeys to agree to be shrunk and put into a pie, to jump out and perform at Ozma's birthday party.

* The Magic of Scheherazade features two time periods per area (sometimes you go to the future, sometimes to the past) with similar-but-not-identical geography and goals that only exist in the other time period (for example, finding a legendary object or recruiting a new ally).
* The Magic of Torchwood, Jack Harkness and Harry get out of taking photographs of the Triwizard Champions when Jack sarcastically claims to be a vampire and Harry protests that he's allergic to the smoke used in flash photography (Krum refuses to be photographed without all four champions and Fleur just leaves); ironically, Skeeter prints these claims as true rather than realise Jack and Harry were just joking.
* The Magic Poker Equation: The more skilled you are at cards, the luckier you are in what hands you get.
* The Magic Porridge Pot, in which a sea captain commands a magic hand mill to grind salt, but nobody knows how to stop it.
* The Magic Position is inspired by a relationship, and focuses on the theme of Love.
* The magic-potion-powered Gauls frequently send Roman Legionnaires flying so high that they don't come down for several more panels. In the same vein, most of the time their sandals, shields and sometimes also the complete armor stays on the ground with their owner forcibly removed, so that when the legionnaire finally comes down, he does so in underwear only. It's convenient for Obelix, who, as a result of a bet in one of the early books,
* The Magic Pudding: Bunyip Bluegum's quest to find his parents was invented for the movie to provide the story with some structure; in the book he just sets out to see the world with no particular aim in mind.
* The Magic Pudding: Bunyip's adventure begins literally on the day he comes of age.
* The Magic Pudding; by claiming that Albert was poisoned, which sends the judge into such a panic (he and the Usher having been gorging on the pudding through the trial) that he goes wild and starts attacking everyone with a bottle of port. He then snatches the pudding and gets out of there with his friends.
* The Magic Pudding, in the novel of the same name. It helps that the pudding is capable of regenerating itself.
* The Magic Pudding: It's made pretty blatant to any reader that Bill and Sam wound up pushing Curry and Rice into the ocean to drown. Given the situation, though, it's hard to blame them.
* The Magic Pudding playing Sam Sawnoff. Subverted in that the source material was written decades before Neill was born.
* The Magic Pudding: Subverted with Uncle Wattleberry's "huge, fiery red" beard and moustache. While he is inexorbitantly proud of them, Bunyip Bluegum finds them a nuisance that, among other things, are always getting in the soup. They also get him mistaken for the pudding thieving wombat in disguise in one chapter.
* The Magic Pudding who uses strange magical powers to create an infinitely renewable pastry and then hoards it to himself while watching his fellow shipwreck strandees slowly starving to death. About the only way he's not a racist icon is his art, and that's because all of the humans portrayed in the illustrations are bizarre-looking caricatures.
* The Magic Roundabout has a certain haunting aspect, noted by Bill Bailey in one of his stand-up routines in which he "re-inserts" the "lost middle eight" which features Zebedee in a maniacal rant.
* The Magic Roundabout has Villains (Buxton and Zeebad), but the original series and the 2007 Reboot has none.
* The Magic Roundabout: In the CGI Series episode "Mr. Rusty's Luck", this exchange between Dougal and Florence after what happened to Mr. Pickles, Mr. Rusty's lucky teddy.
* The Magic Roundabout, in which the affable stoner rabbit, Dylan, suddenly snaps and opens up a can of Whup Ass as demonstrated when he takes out the skeletons in the temple.
* The Magic Roundabout light than would be realistic, but Zeebad's plan is to use

the magic diamonds to freeze the sun itself. He almost succeeds.
* The Magic Roundabout. Many viewers of the French show who were unaware of the redub couldn't understand why the show was so popular in England.
* The Magic Roundabout. She is quite livid upon finding out from Buxton that Blue Peter is actually Dougal, that she strips Buxton from his title of King and unleashes a violent thunderstorm around the treacle factory, causing it to collapse. By the time she calms down, Madam Blue screams in agony over her failure of turning everything in the universe blue.
* The Magic Roundabout sports a pair of white laced ankle boots in a vintage "Babybotte" model where it has the trademark heel blocks at the back of her boots. The post-2005 CGI era has her ankle boots in beige with the heel blocks connected to the soles in a tan color.
* The Magic Roundabout takes place around the course of four days and three nights.
* The Magic Roundabout; the dub replaced all but two of the British celebrities who provided voices for the characters with American ones.
* The Magic Roundabout: The original French version has been running since 1964.
* The Magic Roundabout where it stands out as one of his defining character traits.
* The Magic School Bus, a class is lead by their teacher Ms. Frizzle onto various field trips, all using the titular magic school bus. It can change in size and shapeshift, and it explores topics such as space travel and the human body.
* The Magic School Bus always carried a book she called her "research" that conveniently had information about the day's subject matter.
* The Magic School Bus, a rare case for a female animal. To elaborate, Liz is a Jackson's chameleon but only male Jackson's chameleons have big horns on their heads like Liz does.
* The Magic School Bus are turned into bats, they experience what echolocation is like, perceiving strobe-like flashing views of their surroundings each time they emit a sonar-cry.
* The Magic School Bus, Arnold gets sick of Janet insulting Ms. Frizzle to his face, culminating in an aborted trip to the planetarium. Arnold calls for a bus stopdown, and asks to go someplace else. The next thing you know, the school bus is launched into space.
* The Magic School Bus, Arnold objects to "being the smallest defense attorney in history."
* The Magic School Bus". Arnold was understandably moody and angsty, as he was orange on the night he was accepting a big geology award. Phoebe, on the other hand, stayed optimistic and even tried to help mask his orange skin… with flour.
* The Magic School Bus book about the Solar System, when they lose Ms. Frizzle and have to rely on her notes to learn about the Solar System and find her, she has written down the statement "Arnold, are you still listening?"
* The Magic School Bus, Carlos should take me to the prom," a statement that the author admits was the sole inspiration for the story.
* The Magic School Bus does an episode about wetlands where the kids start by believing in this trope but eventually learn the importance of a swamp in the ecosystem.
* The Magic School Bus does the same with her sister Fiona Frizzle, who wears different skirts and necklaces according to the theme.
* The Magic School Bus: During the "Producer" segment at the end of "Plays Ball", the producer slips on a banana peel towards the end of the phone call that makes up the segment. Liz slips on the same banana peel shortly after that.
* The Magic School Bus episode "Gets Lost in Space", Arnold does this when he gets fed up with his cousin Janet and marches to the back of the bus to confront her.
* The Magic School Bus episode "Inside Ralphie", Raphie's mother gives him some purple-colored medicine that will help him fight his illness. Ralphie abhors the taste of it and says that he doesn't know how something that tastes like grape shoe polish is supposed to help him get better.
* The Magic School Bus from the future, which is why they have similar hair and why Ms. Frizzle always encourages Arnold to take chances and open up more. Her love for

pickles is cited as evidence for this theory because spironolactone, a hormone blocker many trans women take, has the side effects of thirst and craving salt, so many trans women who take it embrace pickles as a favorite food.
* The Magic School Bus, generally considered to be unable to hold a candle to the original for a multitude of reasons, marches on.
* The Magic School Bus had a baseball episode which they dedicated to friction, of all things.
* The Magic School Bus had a kid with a wheelchair as magic as the bus.
* The Magic School Bus had an inflatable lake monster, planted by an unscrupulous journalist who wanted to become famous by getting the "scoop" on the monster.
* The Magic School Bus: Happens twice in two episodes, one where they go through the water cycle and travels through drain pipes to reach the girls bathroom where the water overflows, and in another episode, they cross over an open toilet bowl which has an alligator swimming in it.
* The Magic School Bus has Arnold and Wanda; Wanda is an energetic tomboy, and Arnold is the kid who always thinks he "should have stayed home to-day."
* The Magic School Bus has various abilities that are powered by devices such as the "shrinkerscope" and "mesmerglobber", which occasionally go on the fritz and require a trip to a mechanic at one point.
* The Magic School Bus. If Ralphie's Weatherman, then Keesha's the Queen of England.
* The Magic School Bus, instead of pointing out the many other negative effects of exposure to a near vacuum.
* The Magic School Bus, in which it's revealed that she has one heart (Time Lords have two).
* The Magic School Bus is a giant spider. Given that he's sitting in a shapeshifting school bus, he really should've known better when Phoebe and Ms. Frizzle take him seriously, despite him using the trope name to deny it.
* The Magic School Bus, it's implied that the titular bus's powers are actually futuristic technology. Its shapeshifting and shrinking abilities, for example, are attributed to devices called a "mesmerglober" and a "portashrinker" respectively.
* The Magic School Bus' Ms. Frizzle if it can be used as a teaching moment. Moments like getting ensnared by a giant spider, getting eaten by a student, and falling into a volcano.
* The Magic School Bus normally played this straight. However, it was lightly spoofed in the bat episode. At the end, Ms. Frizzle and Ralphie burst out laughing over his ending joke while Ralphie's mother looks back and forth between them with a deadpan expression.
* The Magic School Bus: Occasionally subverted. In a few episodes where the class finds themselves drifting down a river and you're expecting them to go over the waterfall, they actually come across rapids. Of course, that's not a whole lot better.
* The Magic School Bus of all places. Twice, in "In A Beehive". Wanda calls Tim out of stopping like that the second time it happens.
* The Magic School Bus one episode has a competition about the most spoiled food. Wanda brings some green bubbling mass that stood in the fridge for years. Nobody even remembers what it is. She won.
* The Magic School Bus on Genesis did similar by initially spelling the logo "ASEG" before the Magic School Bus bumps the "A" from below, snapping the logo back to normal. No voiceover though.
* The Magic School Bus, only once is the word "zombie" used, and it's in a joking manner pre-apocalypse. Post-apocalypse, everyone calls them "maulers."
* The Magic School Bus: Pheobe does the different variation (pictured above) in "The Magic School Bus Gets Cold Feet" in order to sneak past the manager of the reptile sanctuary and save Liz.
* The Magic School Bus plays it straight, even when the subject of the episode is the digestive system. The producer end-segement, though, provides a very good reason why:
* The Magic School Bus premiered in Japan in 1999, five years after its' North

American release.
* The Magic School Bus, Ralphie was sick and worrying about how he was missing broadcasting day, to which his mother says that his class could do fine without him. Cut to his classmates exclaiming that they couldn't do it without him.
* The Magic School Bus rating due to an unusually detailed view of Ms. Frizzle's body even with certain parts obscured by her circulatory system, as well as drug references.
* The Magic School Bus really tomato juice, but no-one listened to her.
* The Magic School Bus Rides Again: All four of the Friz girls do this for a segment set in the past, when time zones are conceptualized.
* The Magic School Bus Rides Again: Arnold in Episode 1 is similar to the fans of the old series, trying to adjust to the class now being led by Fiona instead of Valerie. He, and hopefully the audience, learn that the change isn't really bad at all.
* The Magic School Bus Rides Again does this in episode 1, "Frizzle of the Future".
* The Magic School Bus Rides Again: In "Waste Not, Want Not", Dorothy Ann is trying to convince the other kids to get back on the bus when they hear that her uncle is studying animal dung. That leads to this exchange:
* The Magic School Bus Rides Again, Tim adds "Continued on page 1" to the final panel of his "Rock Man Vs Weather Man" hand-drawn comic book. That's because the class's geology lesson has revealed that the "battle" between rocks and the forces of erosion and magma just keeps repeating.
* The Magic School Bus Rides Again while Ralphie and Tim put on all sorts of disguises to blend into the surrounding walls.
* The Magic School Bus self and he's tolerating it, even defending her to his classmates...until she insults Ms. Frizzle.
* The Magic School Bus, so its gravity will pull the asteroid off-course. Now think for a moment about what the effects of an object the size of the moon appearing suddenly in Earth's orbit would be. . .
* The Magic School Bus. Such as in the Episode “Works Out” where the Magic School Bus shrinks to microscopic size and Ms frizzle picks it up and instructs them to drive into her nose in order to enter her body.
* The Magic School Bus swamp episode, the Portashrinker shorted out when it got wet, leaving the class trapped at insect size.
* The Magic School Bus," the class field trip is through the solar system, including a stop in the asteroid belt. There are multiple (oddly small) asteroids around the bus, all in close proximity to each other, and the bus even gets hit by one, which knocks out the map on the computer. Oddly, this trope is not mentioned in the producer's segment.
* The Magic School Bus", the class gives this reaction when Ms. Frizzle suggests that the class—inside of Arnold's large intestine—"join the rest of the waste products and finish the trip". Considering what this entails, their reaction is completely justified.
* The Magic School Bus, the classroom piles into their bus and goes micro to figure out what's making Ralphie get sick. They encounter white blood cells, which identify the bus as a pathogen and start a chase scene. The white blood cells are shown "sniffing" for pathogens, even though they don't have noses. White blood cells don't actually move like they do in this episode; they mainly just float along and consume any pathogens they come across.
* The Magic School Bus, the girls' bathroom is flooded due to a faulty faucet. Guess what happens when Tiffany opens the door?
* The Magic School Bus the playable character for the Uranus platformer, likely as a sneaky reference to this trope.
* The Magic School Bus, this happens to Carlos (twice) while attempting to entertain an impatient crowd.
* The Magic School Bus-type ending that usually gets cut out in syndication. The writers know he should end up with a lot worse than a cold, but killing off a main character isn't very kid friendly.
* The Magic School Bus used this in its wetlands episode. Tim yells "Duck!"

Everybody ducks. Tim says, "No, ducks!" and points to a flock of mallards.
* The Magic School Bus: Wanda manages to pull this off any time she dusts off her pink tuxedo for a formal occasion.
* The Magic School Bus was mainly recorded in Toronto, with the exception of Lily Tomlin as Miss Frizzle and any guest stars, and New York-based Danny Tamberelli as Arnold in Season 2.
* The Magic School Bus, when the bus and class go back in time, everything important in geographical history happens backwards. Ralphie even provides the page quote.
* The Magic School Bus. When the Friz puts the bus-plane into a steep dive when they arrive in the desert, Arnold asks Liz for his parachute.
* The Magic School Bus (which was the very first book of the series, incidentally) shows Arnold saying the trope name verbatim twice: first after the bus unexpectedly transforms and the students become clad in scuba gear, and the second time when the bus starts lifting off into the sky. (To which another kid tells him that he said that already.)
* The Magic School Bus will change her dress in every book to reflect the subject being covered.
* The Magic Serpent, a giant spider appears at the very end for the Big Battle. She is a good guy, though. She throws silk and snow (yes, snow) over the title creature to subdue him.
* The Magic Serpent has the protagonist get decapitated when one of the ninjas throws a boomerang at him to which not only did he survive but he could also controls his headless body, be able to talk as a severed head, and levitate his head around from one place to another.
* The magic side both knows this and unlike certain mad scientists don't want to just see it happen
* The Magic Spring and two old men: one kind and one greedy. The kind old man takes a single sip from the spring and ends up as a young man; his greedy neighbor drinks as much as he can swallow and ends up as a baby. Just to wrap things up neatly, the kind old man and his wife always wanted a child...
* The Magic Sword: Lodac kidnaps Princess Helene and holds her for ransom as vengeance for the King killing his sister.
* The Magic Treehouse #4, Jack loses his glasses while on the beach and scrambles to find them. It costs him precious time in getting away from the pirates.
* The Magic Treehouse: Averted for the most part, Jack and Annie are typically discouraged from interfering too greatly with events in time periods they visit. In "Earthquake Early in the Morning" this gets played with as Jack is unable to save a bunch of books from burning during the 1906 SF earthquake but he an Annie wind up as the subjects of an old photo symbolizing hope for the people of the city by the bay in this grim time.
* The Magic Tree House has Jack and Annie narrowly escape a Viking raid. No violence is shown onscreen, but the Vikings clearly intend to do some raiding and sacking.
* The Magic Treehouse, typically a wicked sorceress in Arthurian Mythology, is on good terms with Merlin and helps the 2 protagonists often during their missions.
* The Magic Treehouse, whose books can transport the reader to the event described.
* The Magic Trials who gets chosen to participate in a famous competition where magically-gifted kids and teens alike go head-to-head in battle.
* The Magic Trio is a fanon grouping of England, Romania, and Norway based on them being the only characters capable of magic. As of Season 5 Episode 2, the Magic Club is shown to consist of two of these three, England and Romania.
* The Magic Trolls and the Troll Warriors, the Magic Trolls were placed in suspended animation until it was safe for them to awaken.
* The Magic Versus Technology War: A conflict between a person or faction who uses technology and one who uses magic.
* The Magic Versus Technology War: The Sorcerors fight the Scientists.
* The Magic Voyage, but mostly the movie is utter madness that involves a talkative woodworm whose girlfriend, a fairy, is being held hostage by a hive mind of

insects, and part of the reason Columbus is sailing to the New World is to help save her, among a lot of other things. It case it wasn't obvious already, this isn't exactly how things played out in real life.
* The Magic Voyage, Corey Feldman, and Mickey Rooney), but with a new composed soundtrack was released for the home video market by Hemdale Home Video and still can be commonly found on VHS and DVD copies in North America and other western territories.
* The Magic Voyage, there is a terrible fight scene where a few of the Swarm Lord's minions try to grab the Princess while Pico swings back and forth on a rope.
* The Magic Voyage where he goes berserk until he breathes fire, then a cartoon of him taking his "meds" appears with the phrase "One moment please".
* "The Magic Wars", in which the forces of Sorcerer's World (aka as Zerox) attack the rest of the technology-using galaxy was a major story arc in the
* (the Magic Word) by Portuguese author Vergílio Ferreira is centered around the chaos sown in a rural village after a heated dispute in which one of the participants calls the other "innocuous", with neither of them knowing what the word really means. The word, corrupted to "inoque" then "noque", then becomes known as a horrifically vile swear.
* The Magic Word, when a boy is asked to say the "magic word", he says, "alakazoomba" instead of "please". The narrator says that nobody knows whether the boy did it as a joke, because he was bored of being asked for the magic word, or what.
* "The Magi-Net". After Jack defeats Harold DuVase, the mages whom he had devoured reappear — but in the next strip, they reveal that they're only there to say goodbye before they go "where souls're meant to be in the end," much to Jack's surprise.
* The MagiQuest simulated-adventure franchise, although much lower-tech and modest in scale, is currently the closest that fans of Niven & Barnes'
* The Magisterium, a school of magic. Unfortunately, he fails at failing.
* The Magistracy of Canopus, on the other side of the Inner Sphere from the Clan Invasion Corridor, has long been known for having much more liberal views on sex than basically everyone else, to the point that sex tourism was a major portion of their economy for centuries (while it's still important now, they've been able to grow their industrial power following the technological resurgence of the mid 31st century). It's perfectly acceptable among Canopians to marry someone and stay monogamous with them if you want, but there's no expectation that people
* The magistrate who oversees Dax's extradition hearing in the episode "Dax" qualifies too.
* The MAGI supercomputers were referred to as Magi Baltasar, Magi Casper, and Magi Melchior.
* The Magna-Ge, aka "Star Orphans", are et'Ada ("original spirits") who
* The Magne Scribe Pen is "Magically Magnetic" because it uses "Patented Magnetic Engineering Physics".
* The Magnetic Fields' "A Pretty Girl is Like..." ends with the line "a pretty girl is like a pretty girl", the takeaway being that a pretty girl is ultimately inexplicable.
* The Magnetic Fields by dialing the original's wryly humorous tone right down. Most subsequent covers have been based off Gabriel's interpretation.
* The Magnetic Fields. Examples include "I Don't Really Love You Any More" (self-explanatory) and "I Don't Believe You", which contains the lyric "You seemed to be / In love with me / Which isn't very realistic."
* The Magnetic Fields: Frontman Stephin Merritt has mentioned possibly having Asperger's in interviews, as well as in the band's song "Weird Diseases".
* The Magnetic Fields: Frontman Stephin Merritt is openly gay, and a number of his associates in the band are LGBT+ as well.
* The Magnetic Fields includes the line "Be we in Paris or in Lansing" - the mention of Lansing makes it ambiguous whether this means Paris, France or Paris, Michigan.
* The Magnetic Fields lover. The last line of the song swaps out the title lyric

for "the corpse you really love."
* The Magnetic Fields' song "Busby Berkeley Dreams" invokes the trope as a symbol of the singer's runaway imagination.
* The Magnetic Fields song "Irma" ends with the title character's father driving his Jeep through the wall.
* The Magnetic Fields Stephin Merritt, with each song telling a story about a year in his life from 1965, his birth year, to 2015, the year he turned 50 and started writing the album itself. The style of music also gradually shifts to reflect both changing technology and what Merritt's tastes were like at the time: The first few songs primarily feature acoustic instruments - electric guitars and early drum machines and synthesizers start appearing partway through the first disc of the album, and from there these elements start getting more prevalent.
* The Magnetic Fields - "Suddenly There's A Tidal Wave", "Busby Berkeley Dreams", "I Don't Want To Get Over You"... Stephin Merritt really likes this trope.
* The Magnetic Satellite is a support power that drags vehicles into orbit, starting with light vehicles all the way up to Apocalypse Tanks and battleships. If the player takes the Orbital Drop power as well, those same vehicles are sent crashing down.
* The Magnificence, an ancient artifact introduced during Simon Furman's run on the IDW
* The Magnificent Ambersons. Everyone else thinks he's making a fuss about nothing.
* The Magnificent Ambersons suffered this when his 'rich' grandfather died and it turned out that he had lost all his fortune and he just didn't tell him for the sake of pride. He went from living in a gorgeous mansion to living in a boarding house with a job involving explosives.
* The Magnificent Ferengi. At the end of the episode, the reanimated corpse is left on the abandoned space station where the botched exchange was to have taken place, repeatedly bumping its head against a wall, and thus presumably will keep doing so until the device's power runs out.
* The Magnificent Fireman Luther Black has been lowered into arenas by the aerial platform of a fire engine, and yes, he has dove off of it to at least one opponent too.
* The Magnificent Kotobuki: (2019) World War 2 airplanes flying from cargo zeppelins firmly plants the show here.
* The Magnificent Kotobuki of Ace Pilots, with over 200 kills between them all, in inferior planes.
* The Magnificent Ms. Marvel, Kamala learns that her father has a mysterious disease and doesn't have much longer to live. Tony Stark later reveals to her that it's an Inhuman-related disease accidentally reactivated by the Terrigen Mists' release and recruits Dr. Strange (who had regained use of his hands again) to help excise it.
* The Magnificent Muraco for the WWF World Heavyweight Championship or crush Ricky "the Dragon" Steamboat.
* The Magnificent Seven (1960): Two of the Seven have wound up on the scrap heap and take the job to defend the villagers for lack of better options.
* The Magnificent Seven (1960)) weapon of choice is a throwing knife. His introduction to the audience is him being forced into a face-off against a guy who fancies himself a gunslinger: his gun against Britt's throwing knife. Britt wins. This isn't to say that he's not also a very good marksman with a gun.
* The Magnificent Seven (1960) - Where the seven gunmen, plus the villainous bandit leader, are badass from start to finish.
* The Magnificent Seven (2016), and Martin Sensmeier had his at knee length when he auditioned. Not realising he was cast partly because of the hair, he cut it short before filming. They then gave Red Harvest a mohawk instead.
* The Magnificent Seven (2016) aspect of their relationship goes both ways, as Billy shuts himself away and hammers down a bottle of whiskey. It's the first and only time in the movie he appears out of control of himself, and even the other members of the group steer clear of him.
* The Magnificent Seven (2016): Billy Rocks has dozens of knives on him. He kills

more people with them than he does with his guns. His attempt to instruct the townsfolk in the basic principles of knife-fighting does not go so well.
* The Magnificent Seven (2016), Faraday shoots off Earl's ear to teach him a lesson.
* The Magnificent Seven (2016) is a throwback to classic Hollywood westerns, playing many of the familiar tropes unabashedly straight.
* The Magnificent Seven (2016), Jack Horne carries a rifle and a pistol, but his preferred weapon is his tomahawk, which he wields with deadly efficiency.
* The Magnificent Seven (2016) over the course of their respective films.
* The Magnificent Seven (2016), Sam Chisolm and Emma Cullen have significantly more screentime and frankly more chemistry in their scenes then she does with Faraday.
* The Magnificent Seven (2016): This is what Bogue has done to Rose Creek before the Seven ride into town and kill the 22 Blackstone thugs he had left there.
* The Magnificent Seven and was created specifically for the film, making him also a Sixth Ranger.
* The Magnificent Seven, but now works chopping wood so he's willing to accept the measly pay the villagers are offering. "Right now, that's a fortune."
* The Magnificent Seven comes up behind Chisholm and not Bogue in order to deliver the fatal shot.
* The Magnificent Seven, for instance, is a direct western adaptation of Kurosawa's film.
* The Magnificent Seven, "Ghosts of the Confederacy," who leads a group of ex-Confederate soldiers who roam the west preying on isolated towns.
* The Magnificent Seven has seven of these, one for each character. They are: Larabee's Ladies, Buck's Babes, Vin's Vixens, Josiah's Jezebels, Nathan's Nightingales, Dunne's Darlins, and (the only non-alliterative one) Ezra's Brigadears.
* The Magnificent Seven is always linked to Marlboro commercials (at least, back when cigarette commercials were legal in the U.S.).
* The Magnificent Seven: Mary Travis runs her husband's newspaper after his murder. (Not a spoiler, as he's dead before the pilot episode.) She is very much a crusader.
* The Magnificent Seven mother is briefly imprisoned on charges of theft; she promptly arranges to have her cell comfortably appointed with drapes and furniture.
* The Magnificent Seven opens with a traveling salesmen arguing with the town undertaker over the burial of a Native American who died in the street: the salesman is willing to pay for the burial, but no one is willing to drive the hearse up to Boot Hill because a "certain element" in the town objects to having a non-white buried there and is threatening violence. The matter is resolved when Chris and Vin, the first two of the eponymous seven, volunteer to drive the hearse and engage in a brief gunfight with a group of racists who try to stop them from entering the cemetery. The villagers then approach them to ask for help, for men who do that are men who will help them.
* The Magnificent Seven really hates farmers, though he himself is a farmer.
* The Magnificent Seven: Recurring character and tomboy Casey Wells is persuaded to put on a dress and fix her hair in order to impress JD. It works... for all of ten seconds, at which point she steps on her hem, tears her skirt off, and is left standing in her bloomers.
* The Magnificent Seven series, frequently punctuates his conversations with unnecessarily extensive and articulate vocabulary.
* The Magnificent Seven series JD Dunne - the youngest and least experienced of the group - uses two Colts simultaneously with much success.
* The Magnificent Seven television series, in which the group's resident gambler is found riding hurriedly out of town, a smear of tar on his face.
* The Magnificent Seven TV series. Hits on/sleeps with every woman he meets but treats them all with respect. He attributes this to the fact he was raised in a brothel but his mother taught him to treat every woman like a lady.
* The Magnificent Seven: Vin Tanner used to operate as a bounty hunter; dramatic irony kicked in when he was framed for murder and had to go on the run himself.

* The Magnificent Seven who roam the west preying on isolated towns. As seen in the current page image, all of them are still dressed in the now tattered remains of their Confederate uniforms.
* The Magnificent Seven with Chico, the inexperienced young gun tagging along behind the other more experienced gunslingers on the ride to the Mexican village.
* The Magnus Archives: Agnes in "Burned Out". She stays that way into adulthood.
* The Magnus Archives and focus more on a recurring cast of characters, and by season 4 it's nigh-impossible to know what's going on in any given episode if you haven't listened to all of the previous ones. (Each episode still includes a standalone horror story, but it's usually a backdrop to whatever the main characters are doing that episode, and will probably reference characters and events first introduced tens or even hundreds of episodes before.)
* The Magnus Archives, and infest people and either kill them or turn them into zombie-like servants (or both).
* The Magnus Archives, as any affability is covering up a fundamental desire to terrorize and destroy.
* The Magnus Archives: As the eponymous institute takes in statements from people who have encountered the supernatural, it becomes increasingly clear that humanity is a plaything for ancient and incomprehensible entities dwelling beyond the universe, which feed on/embody the fears of every living thing on the planet. They defy all attempts at rational analysis; even their own servants, human and otherwise, admit to not understanding what they are or why they do things. These Entities cannot be defeated or even meaningfully fought, any more than you could punch the concept of arachnophobia, and at any moment they might arbitrarily single you out for torment or death because you would be the right kind of afraid while it happens.
* The Magnus Archives, but even early on in the series, it doesn't seem like he has much of a life outside of work.
* The Magnus Archives confirms that all of these statements are real, and they serve as a break from the grim tone of the rest of the season.
* The Magnus Archives episodes "Confession" and "Desecrated Host" which are narrated by a Catholic priest and exorcist. Exorcism and the problems that prompt it are presented as being much less dramatic and horrific than the Hollywood version. Most of the time.
* The Magnus Archives episode "The Sick Village": everyone is infected with a rotting fungus, but no one will admit they are, concealing their spore-contaminated flesh under heavy robes and masks. Everyone agrees the fungus must have been brought by "outsiders" and continually spies on their neighbours for signs of it. Anyone "convicted" of being infected is burned at the maypole.
* The Magnus Archives episode "Vampire Killer" the eponymous Trever Herbert describes the house of Sylvia McDonald, the first vampire he killed (or so he says), as covered in dust and mould except for a narrow strip along the floor where she walks, as if she has lived there for years but done absolutely nothing except walk through the place.
* The Magnus Archives episode "Wonderland" consists of three patient sessions in a mental hospital. In each session, the doctor informs the patient that they are lying or delusional for repeating the information that was told to them in previous sessions.
* The Magnus Archives finds themselves dealing with The Other Circus. Including the protagonists, at the end of season 3. You know things are bad when the violin music in the intro is replaced by circus noise.
* The Magnus Archives focuses on head archivist Jonathan Sims, played by Jonathan Sims. Similar to Night Vale in that he was the sole narrator of a horror story for a while, but unlike Cecil he was named from episode 1.
* The Magnus Archives for heroic purposes inevitably end up succumbing to their monstrous side, while characters that avoid becoming tethered to the Powers remain physically human but often become more morally monstrous than the Avatars they fight.
* The Magnus Archives has a story arc about the library of Jurgen Leitner, which

consisted of particularly nasty examples of this trope. The mention of his name in a statement is enough to make the usually-sceptical archivist immediately believe every word of the subject's story.
* The Magnus Archives has confirmed this, and stated that it will be more explicit in season 5.
* The Magnus Archives has this appear in certain statements, although it's just as likely to end in inelegant blubbering. Ironically, more then once this has caused whatever creature that is pursuing the statement giver to stop, as the death is generally a side dish to the fear. Characters like Jason North (MAG 37) and Robert Montauk (MAG 9) are less lucky.
* The Magnus Archives has this as a common trait of servants of The Desolation, especially Jude Perry. As the Desolation represents the fear that all that you hold precious will burn, its cultists are typically petty, destructive bullies who revel in destroying people just when their lot is about to improve.
* The Magnus Archives: in the episode "A Father's Love" a woman tells the story of living with her serial-killer father as a child. She recounts that her father, despite his crimes, always seemed to love her, and she believes his love was genuine. And unlike everyone else, she doesn't think her mother was one of his victims.
* The Magnus Archives. In the episode "Cruelty Free" a farmer discovers a massive, 400 kilogram pig, which devours anything that gets in its pen, starting with the other pigs and eventually moving on to humans.
* The Magnus Archives: In the episode "First Aid" two patients are brought into the hospital completely covered in burns, but with their clothes somehow unharmed.
* The Magnus Archives is a human transformed into a mannequin to serve the Stranger. For a long time, she served as the ringmaster of the Circus of the Other, during which period she stole the skins and voices of humans to disguise herself with.
* The Magnus Archives Jane Prentiss, a normal girl who was taken over by an extradimensional worm swarm known as the Flesh Hive.
* The Magnus Archives: Jonathan, the archivist, introduces himself, explains his job and makes his excuses for the chaotic state of the archive at the beginning of the first episode.
* The Magnus Archives Jonathan the archivist serves as narrator for the series as a whole, reading out each statement about an alleged supernatural encounter and giving his comments. Through him, each statement-maker is also the first-person narrator of their own story (occasionally we instead hear it in their own voice, when the archivist makes a recording of a new statement instead of one he found in the archive, though Jonathan still adds comments of his own).
* The Magnus Archives: Jonathan, the primary viewpoint character, spends most of the first season becoming steadily more unhinged as the nature of the job starts to get to him.
* The Magnus Archives, Jon destroys a table that he believes gives life to a monster that has been terrorizing him and his friends. After he breaks the table, he learns the table was actually keeping it contained, and that he's made it much more powerful than before.
* The Magnus Archives), kidnapped a child and forced him to walk a tightrope as two clowns fought brutally below, and ripped an audience member's skin off as part of an advertisement. It toured in Russia in the 1940s and 50s and was never seen again, until it returned in London in 2013.
* The Magnus Archives Martin, one of the archivist's assistants, goes to investigate a house to follow up a statement about an alleged supernatural encounter and ends up in a dark basement. It doesn't go well. He seemingly gets out safely, but his problems are only just beginning.
* The Magnus Archives: Numerous statement-makers express regret at not simply leaving well alone or turning away and leaving and thus avoiding their frightening experience (or worse), or tell how other characters made the same mistake.
* The Magnus Archives plays this for a moment of pitch-dark laughs amidst the horror in a highly spoileriffic exchange at the end of the second season.

* The Magnus Archives secret plans), leading to a dynamic where none of them trust each other enough to work together and get anything done.
* The Magnus Archives: Several: the narrator of "Alone" finds herself in one after getting lost and the narrator of "Growing Dark" passes through one to reach a chapel he believes he needs to investigate. It looks as if we're going to see another one in "A Distortion" when someone asks Sasha to meet them there, but the trope is subverted when it turns out they just chose the cemetery as a convenient landmark close to the actual destination.
* The Magnus Archives she casually points out that "Paper burns well," followed by the sound of sloshing liquid. "...But petrol burns better."
* The Magnus Archives. She (or the being using her body) commands masses of strange silver worms which infest more people and thus kill or enslave them. It is hinted that she may also control be able to control ordinary insects, spiders and other creepy-crawlies.
* The Magnus Archives's horror at the infestation that suddenly appears in his bedroom that he immediately sets the place on fire.
* The Magnus Archives show, but it takes the two of them a while to get started as they scathingly argue about their respective organisations' methods and credibility.
* The Magnus Archives's that embody common fears. Those forces often conflict. A flame cult battles unearthly spiders to reclaim a manor house, and the primordial insect hive attacks the Archive because it is aligned with the Beholding (ie the fear of being watched and known).
* The Magnus Archives sure they weren't eating anybody (despite what the tabloids said), and an account of a cursed meatgrinder that causes the person enchanted by it to make dinner for his crew by driving his arm into it and preparing the meat (the arm kept regenerating, which means they got through quite a few meals before the captain figured things were weird).
* The Magnus Archives the archivist hints at their existence when he mentions that the Institute he works for has contacts in government and law enforcement who appear to have taken considerable interest in at least one of their collection of statements about alleged supernatural encounters.
* The Magnus Archives: The episode "Cost of Living" is about a woman who survives a near-death experience by draining a doctor's life... and then it keeps happening, and she justifies it by throwing herself into philanthropy.
* The Magnus Archives: The narrator of "Do Not Open" is asked by a strange man to look after a 'package' which the narrator initially assumes is drugs. The package turns out to be a coffin, chained shut. He goes to great lengths to avoid finding out what was inside, which scratched at the lid when something was placed on top, and moaned in a sing-song manner when it rains.
* The Magnus Archives: The narrator of the episode "Arachnophobia" kicks and smashes his television to kill the spider sitting on the screen.
* The Magnus Archives, there is a moment of comic relief concerning the pronunciation of "calliope."
* The Magnus Archives. There's also a Mikaele Salesa — it's pronounced very differently, but jumps out at you when you see it written down.
* The Magnus Archives was raised to be one of these by the Lightless Flame. This backfired spectacularly, due to none of the cultist knowing how to raise a child to do anything, let alone make one into a god of destruction. She killed several cultists in out of rage as a child, and as an adult, expressed sadness and regret at being forced into a destiny she never asked for.
* The Magnus Archives: When the altar server in the weird mass in "Desecrated Host" opens his mouth, instead of words he makes the sound of a tolling bell. When Father Burroughs tries to speak there, the same thing happens. Later, when his former fellow priests visit him in prison, it's all he can hear when they speak to him.
* The Magnus Archives. Whether the murder or the person is fake is not clear.
* The Magnus Archives, which makes sense. Given that the Entities are literal manifestations of fear, it follows that not giving a crap weakens them of their power.

* The Magnus Archives (with a few exceptions) takes the form of Jonathan, the archivist, making a recording of himself reading an old statement about an alleged supernatural encounter from the Institute's archive, or occasionally recording someone else making a new statement, and adding his own comments at the end. Thus the listener gets a different narrator's story each time, but always (or mostly) via one overarching narrator.
* The Magnus Archives, with the length of the episodes usually varying between about 15 and 30 minutes, but some specials running on for 45 minute or more.
* The magus Bayaz's servant Yoru Sulfur is described by another character as having a somewhat ethnically ambiguous appearance, being darker skinned than is the norm for someone in the Union (a European
* The Mahabharata. He was the mentor to the Pandavas, and taught Arjuna, the world's greatest archer, nearly everything he knew. He has access to a number of mantras and esoteric combat techniques no one else knows. When the civil war happens, Drona is 85 and still nearly invincible.
* The Mahabharata. (His bro, Arjuna, helps out by providing cover fire.) His gentle reassurances of the horses while he grooms them are therefore this trope.
* The Mahabharata in their sleep and striking Arjuna's grandson from the deceased Abhimanyu stillborn.
* The Mahabharata moment). By that time, it's too late and Karna is dead.
* The Mahabharata opens with a lengthy description of Nala's virtues, including the fact that he was "desired by both men and women."
* The Mahabharata that has the power to kill gods and annihilate the world.
* The Mahabharata, the naga princess Ulupi kidnaps Arjuna and drags him to her den at the bottom of the river, where she then propositions him. Even though she's a total stranger, Arjuna finds this sexy for some reason and acquiesces.
* The Mahal during the Israeli War for Independence, a combination of Jews fighting for a homeland and WWII veterans looking for adventure. The very first Israeli Brigadier General had been a Colonel in the US Army, and much of the early Israeli Air Force was made up of American and Canadian pilots who had flown against the Luftwaffe.
* The mahendo'sat are covered in short, curly fur and have blunt, non-retractable claws.
* The Mahjarrat is the perfect example, as there are only nine of them confirmed alive, and each one of them is "as powerful as one of your (human) armies".
* The Maiden, could count as this too; though their beauty might get points for being "exotic" to both Essosi and Westerosi.
* The Maiden Czar with her stepson and thus schemes to keep him from the title character.
* The Maiden Heist, being about three art museum security guards who have over the years fallen in love with one particular art piece each, brings this trope to mind.
* The Maiden Heist dual-wielding pistols to stop a gang of nefarious art thieves.
* The Maiden Heist, George is a former Marine who takes his military past a little too seriously.
* The Maiden Heist is centered on three museum security guards who devise a plan to steal back the artworks to which they have become attached after they are transferred to another museum.
* The Maiden Heist, unless you have always wanted to see William H. Macy's bare backside.
* The Maiden Heist was released straight to DVD after the distributor Yari Film Group went bankrupt.
* The maiden in "Ghost of a Rose" by Blackmore's Night is clearly one. She and her love eventually part ways but he always remembers her and thinks he can see her on the moors.
* "The Maiden in the Mushrooms" has a C-plot involving Hodgins using the last of Finn's late grandmother's special hot sauce and trying to recreate the recipe using the lab equipment to analyze its contents. He succeeds and Finn starts digging into the catfish that's just like his grandmother used to make, and Hodgins tells him to slow down or he'll choke on a bone. Finn says that that's not a worry with a baby

catfish because their bones are too malleable. Cue realization that the victim was young enough that
* The Maiden in the Tower, composed to a Swedish libretto, first performed in Helsinki.
* The Maiden Name Debate: A soon-to-be married woman has a hard time deciding whether to keep her own last name or change to her new spouse's last name.
* The Maidens of the Seasons usually pass on their powers to whomever they're thinking of when they die (provided that the person in question is female and under 30), so
* The maid Kohaku pretends to be her twin younger sister Hisui (in a manner which is not at all comedic) a number of times in
* The Maid of Fairewell Heights: Fluffy wings are part of the Angel costume.
* The Maid of Fairewell Heights: Marshmallow enters the landscape picture world by being painted into it.
* The Maid of Fairewell Heights: There's a Magical Girl costume that is worn when in the Magic room.
* The Maids, it would probably make the person nauseated enough to vomit the pills back up).
* The Maids who really were murderous lesbian maids, but resemblance ends here.
* The Mail Daemon is a creature that delivers messages from other players watching you online. It appears and disappears within the span of one turn and, therefore, can't normally be interacted with at all, much less killed. So, naturally, sufficiently
* the mailman had nicknamed her "Jaws". Perhaps she's always grumpy but her pregnancy made her even worse.
* The main 6 form another pyramid in "Magical Mystery Cure" with Twilight Sparkle on top.
* The main active ingredient in the weight-loss supplement Hydroxycut is a form of nicotine derived from hemlock. The FDA issued a warning about Hydroxycut causing liver damage, causing it to be pulled from store shelves.
* The main addition is the presence of the C'tan, though they're closer to space horrors, who used to feed on stars before eating living things' souls. The four known to still exist in some form are the Void Dragon (presumably trapped on Mars by the Emperor and likely worshipped by the Mechanicus), the Nightbringer (the original
* the main AI/Fragments of Project Freelancer have PTSD. Due to the nature of the Cold-Blooded Torture.
* The main and recurring characters also get this, but each of them has a way bigger set of animations that get recycled throughout the whole series instead.
* The main and secondary guns of an Ogre fire SATNUC rounds. That's SATuration NUclear Cluster; a round splits into submunitions over the target, each of which takes a split second to
* The main antagonist for the bulk of the game is Jena Anderson, a scientist who disappeared several years ago, and shows up with mysterious powers and an army of monsters in tow, from her studies. Much of the early levels involve dealing with her attacks (such as rescuing civilians from a subway she bombed). Her motivation turns out to be
* The main antagonist of the second half of Season 5 turns out to be
* The main antagonist of the story arc is General Chang, who was also the main antagonist of
* The main antagonists are called Space Pirates, but are actually an organized alien army rather than small bands of individuals out for plunder. Their motives are invariably portrayed as sinister, but it's always implied that they have some larger goal at work, even if the precise details are unclear. It mostly comes down to "breed Metroids," "mine Phazon," etc. so that they can be used for galactic conquest. Although their marauding activities are an important part of the series's backstory —
* The main antagonist, Steve Leopard is very nasty and a half-vampaneze. He kills indirectly Larten Crepsley.

* The main antagonists, the Baramins of Lemuria, have a tendency to believe in outdated scientific, philosophical and/or political theories (ranging from Luminiferous aether to still being upset that Aristotle’s organon replaced Platonic philosophy!). They don't realize their inventions are powered by their own madness; they just think something went wrong with human development, and work constantly to "fix" it. Which is a problem if you're one of the people that needs fixing...
* The main arc of the first season is about a terrorist called The Laughing Man who's able to manipulate data to the point he can literally
* The main background theme is the original Japanese opening theme from the anime
* The main balancing factor is of course intended to be the refresh cost of all this power. Being a proper full and probably White Council trained wizard costs 7 refresh plus giving up the +2 bonus pure mortals get just for the basic power set, which at low campaign starting levels isn't even an
* The main big two comic book universes also have the existence of the supernatural known to the public. Proof that souls exist, demons are real, etc. would have profound implications for our society, especially for religions.
* The main cast also briefly became millionaires in the episode "Future Stock." They return to rags, of course.
* The main cast also form its own band of brothers, with Miller as a stern dad and Horvath as big brother.
* the main cast and Old Man McGucket find that the Society of the Blind Eye uses a device to remove memories of paranormal activity. They recover Old Man McGucket's memories of inventing the device, and his descent into insanity by repeatedly wiping his own memories.
* The main cast at Lockhart/Gardner and eventually Florrick/Agos have done everything from capital criminal defense to immigration law to copyright law. Recurring characters tend to be specialists, however: Lockhart/Gardner's David Lee specializes in family law (e.g. divorces and paternity suits), while recurring antagonist Louis Canning mainly defends corporations from class-actions. Also, when they need to be interrogated or stand trial, once in a blue moon, they get someone else to represent them.
* The main cast isn't immune to this. After the villainous example mentioned above, Kenshin himself collapses and his friends have to carry him away. Due to his lack of muscle
* The main cast members continue wearing their old uniforms (Earth Alliance for the Archangel's crew, ZAFT colours for the Eternal's, Athrun and Dearka) after they side with Lacus and the Three Ships Alliance, since they aren't part of their old formal military forces anymore. In
* The main cast, who is on an expedition to explore the Silent World, runs out of food early because of an
* The main challenge isn't so much conquering Afghanistan but rather controlling it. The mountainous terrain and tribalism of ethnic groups resulted in a divided region hostile towards the idea of a central government. Most notably, after failing to invade Afghanistan the first time, the British managed to swiftly invade and subjugate Afghanistan in a second attempt. As for how they succeeded, it came down the the British quickly pulling out after disposing the original leader and installing a warlord as a puppet leader, ensuring that they wouldn't be bogged down in an insurgency.
* The main change is that Death is fortuitously encountered by a humble farmer called Macario, who by chance lucked out on a job and was able to buy two whole chickens for himself, and decides to go deep into the forest to eat them by himself. He runs into Death without knowing who it is, and shares a chicken with it; Death grants him the same deal: if Death appears by a sick person's bed near the side, the person will recover; but if it appears near the foot of the bed, the person will die. When Macario decides to neglect this and upset Death, he is forced to visit it in a cave in the forest, where he finds every person in the world has a candle lit representing their lifespan. Macario steals his own candle to prevent Death from taking him, but trips and his life is extinguished. Turns out Death

rolled time back, and Macario DID go alone into the forest, ate both chickens and died from indigestion. This is a VERY old movie in black and white, worth checking out for its trippyness.
* the main character acts to fix/solve/save things: This person who has this special knowledge feels obligated to do something to solve or prevent the bad things that only they know about.
* The main character addresses the audience from a small room with one light bulb, viewed through a black-and white filter. On one occasion, when he is drunk, there are three light bulbs.
* The main character, Aladdin, does have a genie for a while (in a flute, not a lamp or ring), but instead of a random kinda-jerky street kid is an
* The main character, an orphaned young lady named Agatha, wears a locket-type amulet with pictures of her parents in it. The locket is her most prized possession, given to her by her paternal uncle Barry shortly before he mysteriously departed, leaving Agatha in the care of her adoptive parents, the Clays. She never removes the amulet for very long and is never far away from it. Agatha struggles to be an engineer and inventor, like her beloved uncle, but fails constantly due to the severe and sudden migraine headaches she suffers whenever she tries to concentrate. Near the beginning of the story, a pair of drunken soldiers accost Agatha on the street. One snatches her locket, planning to sell it for a little quick cash. It turns out Barry designed the locket to suppress Agatha's "spark", her innate intelligence and engineering talent. With the amulet gone, Agatha becomes a super-genius. She converts a steam-powered tractor into a complex robot programmed to seek out the amulet and return it to her, an impressive feat in and of itself made even more so by the fact
* the main character becomes enamored with a living mummy of the Princess Hatasou, and even agrees to become a mummy himself to join her (fortunately, this doesn't happen).
* , the main character becomes friends with Jesus after he (Jesus) borrows one of his black metal CDs.
* The main character can also equip the deck brush he used to swab the decks in the beginning of the game, to the point where the Deck Brush has become his signature item (for example, used to create his costume transformation in Tales of the World: Narikiri Dungeon). The Deck Brush has become a recurring joke weapon in later games, like Loni's Deck Brush in the sequel, which boosts the chance of failure for his 15-kanji hi-ougi.
* The main character, Char, loses an arm in the Temporal Tower arc of
* The main character constantly spouts aquatic puns like "What the gill!" or "Let's get kraken! (cracking)" in the English dub. The meme
* The main character converts to Christianity, dies an untimely (and usually also cruel or painful) death and goes to heaven. For example, in "The Little Princess," while Heidi gets herself and her family saved before dying, one has to wonder what it's like for her parents and brother to lose her.
* The main character designs are based on Ume Aoki's original designs rather than the tweaked designs they'd receive in the anime, creating oddities like nearly everyone's weapon being different and everyone's Soul Gem being pink instead of color-coded.
* The main character, Ebony, is in the Slytherin house to fit with her gothic persona (since canonically, Slytherin is the most sinister of the houses) and Tara wanted Harry, Hermione, and the Weasley siblings to be in the same house as Ebony even though they're canonically in Gryffindor, so she explained the house-swapping as a result of the canon characters
* the main character falls in love with the Faeran High King, who is anything but cruel, yet still adheres to the "Our morals are different" mantra when the mortal maiden questions the actions of his kindred.
* The main character find someone doing something wrong(usually tag writing) and he says him to stop doing it. The guy escapes, leaving the weapon/spray can/whatever was holding to do what he was doing. The hero takes it to get it off, and someone coming that way looks at him and thinks he did it and call police.

* The main character from "E" is at one point masturbating while he's being watched by the spider.
* The main character, Gintoki, is always referred to as Kintoki by one of his war comrades, Sakamoto Tatsuma, even when the former corrected him many times. Gintoki angrily points out that if his name is Kintoki, the title of the manga will be Kintama (literally translated to Golden Balls which means testicles in Japanese) instead.
* The main character got his mind stuck in a dragon and received a lecture about dragon-ness from an older one, upon which he deduced the dragon abilities of flight and firebreathing as possible due to hollow bones, empty spaces in the body for holding gas, and eating limestone (calcium carbonate) - which mixed with stomach acid (hydrochloric acid) produces hydrogen gas that is lighter than air
* The main character has occasionally called her mother while her mother was in the middle of performing brain surgery. Dr. Possible happily talked on the speaker phone to her daughter, all the while continuing with the operation.
* The main character has speed that resembles the speed of a series teleporter. This is a recent development, as for most of the series he had merely average speed (for a ninja). The first time he used this new ability, literal
* The main character has well-balanced states, although his early access to the Hero class makes him become a Lightning Bruiser towards the end of the game.
* The main character himself, Isaac Dan Der Grimnebulin. The aforementioned girlfriend is a shapely woman with a giant beetle for a head, he's extremely intrigued by
* The main character himself is resentful of his own brother, who turned him so he wouldn't become cattle once the vampires took over society, and doesn't like drinking blood.
* The main character in his younger days; his hobbies were pulling pranks due to him craving attention. He grows out them as the manga goes on.
* The main character in Lucille Fletcher's "The Hitch-Hiker", originally performed as an episode of
* The main character in Nedra Tyre's "The Gentle Miss Bluebeard," one Mary Anne Beard, made a bit of a hobby out of euthanasia.
* The main character in the anime, Ash Ketchum, is 10 but younger kids can be about half as tall he is.
* The main character is an amnesiac immortal who's lived for a thousand years; most of his memories are recalled through dreams as the game progresses. It's not a natural side effect of the immortality, though, but rather a case of
* The main character is feared and/or disliked by much of the teaching staff at Sunnydale High School. Initially, it was because they'd heard rumors about how she
* The main character is offered a chance to fight on the undercard of an event for a flat $50,000, though real fight purses are divided into a "show purse" for fighting and a "win purse" awarded if the fighter wins.
* The main character is pressured into marrying his Third Lady by First Lady, (it's not that he doesn't like the girl, it's that he's worried about taking advantage of her). In a latter book the Judge buys out two prostitutes to help him resolve a case. After a rocky start his three wives warm to the girls and indicate they are willing to accept them as permanent members of the menage. This time the Judge does
* The main character is understandably hit with this a lot due to the very odd way he styles himself: he spells his name "Blitzo" but pronounces it "Blitz". Everyone who respects him follows suit, but the cast is full of characters who
* The main character, John Egbert, has decided to remain one as long as the SBURB session continues. (Perhaps not so surprising since the last time we saw him he was all of 14.) After he and Jade talk over their respective potential romantic interests (several of them each),
* The main character, Kenshiro, also speaks in this pitch but prefers high-pitched "A-TA" sounds whenever he strikes.
* The main character, Lia Kahn, gets into a car accident that does so much damage that the doctors at the hospital downloaded a copy of her personality into an

artificial body and her organic body is, for all intents and purposes, dead. Lia is not happy about this because in the setting of the novel, people who have artificial bodies are subjected to
* The main character, Lord Bung constantly takes advantage of this against villainous deities like Ares and Loki in order to defeat them.
* The main character, Luke, kills a fully-armored, heavily-trained soldier with a wooden training sword.
* The main character, Lynn Russell (also known as Rin Midorikawa), is a
* The main character Mackenzie Blaise has this viewpoint about some of her friends (Dee and Amaranth), seeing them as being inherently purer because of their species (dark elf and nymph, in this case), although that probably has something to do with how Mack thinks of herself as being inherently corrupted because of her half-demon heritage (which has some support in the story). Whether or not the reader is supposed to feel that any one race is supposed to be inherently better than others is hard to tell—we certainly see faults with all of them as the story goes on.
* The main character manages to perform one of these, while standing in front of the Cutie Mark Crusaders, who by all accounts haven't turned away from her either. Sweetie Belle even questions how it happened.
* The main character, Marty, also has this relationship with his girlfriend, Jennifer — we see them married with two kids in
* The main character "Mitchie" from the SF short story "Prone" - a patriotic youth who joined the army in the midst of an prolonged interplanetary war, and whose Jinx abilities
* the main character near the end, who has a dream vision of the original Primes before being miraculously brought back. Lampooned upon in Kirbopher's Revenge of the Lollin
* The main character often has martial arts training, though he fights in
* The main character of the "John Mitchell St. Ivo" story arc has his mind uploaded into that of an identical-looking android after being fatally wounded by a security bot. In one novel, he has to constantly prove his right as a sentient being, as most just assume he's a run-of-the-mill self-learning bot (who don't qualify as sentient beings in this 'verse, for the most part). Later on, his android body is damaged, so his "crystal sphere" is plugged into that of a
* The main character, Oz took his own body, his soul went into his CONTRACTOR'S body, so when his contractor de-aged again (REALLY long story) he had his fourth body. He even tells Echo it could happen again if his contractor's body dies.
* The main character Ranma is commonly depicted in various, occasionally mutually exclusive manners. These include refusing to fight women, refusing to use weapons (and being dismissive of those who do), thinking women are weak and incompentent, not caring about the sanctity human life, caring about human life
* The main character, Rick Grimes, first emerges from his coma to find himself in the middle of a
* the main characters all end up infected with the disease, but in such a way that they aren't... zombie like. The other zombies don't bother them (i.e. try to eat them), and they have some... symptoms, so they're technically zombies, but not. They're inoculated.
* the main characters are about to be hanged, or did God command it to happen because he took pity on them and answered their prayers.
* : The main characters are almost all mercenaries fighting a bloody civil war.
* The main characters are always seem to be at the same relative strength in battles. Roy is the power-hitting and intelligent fighter, V is the
* The main characters are investigating an old department store when the sheriff's deputy arrives and basically alerts all the zombies in the city to their presence by shooting at some of them. One of the characters says something like: "You just rang the dinner bell," as if the zombies pounding on the department store's glass doors
* The main characters are viewed as this by their employers. After all, the employers in question are not going on that expedition into the

* The main characters. Cabbalistics, Inc. was formed when Department Q, a Ministry of Defense department originally created in the 1940s to combat Nazi occult warfare, is privatized by the British government.
* The main characters convert to Christianity after suffering terrible traumas with no indication of any long-term problems, and with those responsible being
* The main character's daughter can have these dynamics with... a centuries-old dragon who lives in the desert. The dragon is an old friend of the girl's father figure, back when he was a wandering warrior, and being a
* The main characters' dilemma in the second act is choosing whether they want to give Jack to the giant and save themselves or spare him and let the giant kill everyone in the kingdom.
* The Main Characters Do Everything because otherwise you'd have a massive cast fighting for what little spotlight there is. (And in the case of live-action, massively cost-prohibitive.)
* The Main Characters Do Everything: Because they can only afford to hire so many actors, and besides, it's hard to get invested in a constant stream of new characters.
* The Main Characters Do Everything, where the main cast performs every function in their organization for plot convenience;
* The main characters escape from Shendu's palace on one during the 'Demon World' two-parter in
* The main character's father Donovan is hilariously inept with the orcish language; while he presumably thinks he's speaking greetings and profound things, he's really spouting nonsense, such as "My landmass erupts with kittens." He also has a very fancy title:
* The main characters, following the death of someone close to them, convert to Christianity. The unsaved loved ones are promptly forgotten about, and the saved people will never see them again. This is especially jarring in "Happy Halloween," in which the boy killed in the traffic accident is forgotten about.
* The main characters frequently lie, and in pretty much every instance, the lie comes back to bite them in the ass by the episode's end. So the Aesop? Don't lie, it only makes things worse.
* The main characters have, in one form or another, found themselves in a place that needs tidying up and/or fixing (badly). One of them might say something along the lines of
* The main characters have just had a big fight. It was brutal and half the building they are in just got trashed, but they emerge victorious. The characters then continue with their quest, and the following shot shows the place lying in ruins as something falls over or breaks.
* The main character Shuuya, who despite the horrible things going on never gives up hope and faith in humanity. The novel and manga (but not film) also have Yuichirou Takiguchi, though his purity actually leads to deadly results.
* The main characters in Playrix's hidden object games do a great deal of speaking directly to the player, from making commenmts about your watching them to nagging you if you go too long without clicking the play button to asking whether you couldn't find anything you liked if you exit the remodeling screen without making any purchases.
* The main characters in the Prequel story in The Canis series lived in one since it's a front for human trafficking.
* The main character's love interest is named Adrien Agreste. "Agreste" means "rustic," which doesn't describe Adrien's wealthy upbringing in a
* The main character's lover is a man who is descended from the extinct Japanese Honshu wolf and their two children end up being
* The main characters, Moritaka Mashiro and Akito Takagi, are collectively known as Muto Ashirogi, a portmanteau of both their names, along with the "A" from Mashiro's
* The main character's name, Ryu, means "dragon" in Japanese. If you play the modern games with the Japanese language track you'll hear the word "ryu" constantly, what with his name, and the Dragon Sword, and the Dragon Clan, and...

* The main characters of Get Set Go's song "Lonely World" don't particularly care about each other, but they're lonely, and they can get together, so why not.
* The main characters of the Norway sequence are a group of four friends made of two men and two women. Neither of them seem romantically involved with each other. The descendant of one of the pairs has her great-grandmother's first name, which is the only in-story hint of how these friends ended up pairing up aside from two easy to miss portraits seen in a flash-back.
* The main character's older brother Shouri doesn't have it as bad as Gwendal, but he definitely gets his moments when faced with El, the baby son of a pair of recurring side characters who Shouri winds up babysitting while his parents finally get married.
* The main characters, places, and flashbacks in this story are all real. The whole 'turning into Pokemon' thing? Not so much."
* The main characters pretend to be the FBI or police very often. Sometimes it happens that someone holds their badge upside down, or the picture shows somebody else.
* The main characters rarely are shown smoking. This is notable because the series was filmed during a time when smoking was common and takes place in a time before anyone thought smoking was bad for your health. However, every major male character was seen smoking at some time in the series; Col. Potter confessed to enjoying 5 cigars a day for decades. Even Radar during the first and second seasons was seen smoking (and drinking whisky).
* the main character's "rift in the force" growing more powerful by feeding on the destruction she causes. Pretty rough revelation if you are a Light-Sider.
* The main characters run into a single good Wraith over the entire span of the show
* The main characters sculpt a "SPAM Lamb" after Radar lets the original lamb, provided by a Greek military unit, escape so it can avoid being eaten.
* The Main Character's Story, which is the dramatic arc of the main character (For example, Peter Parker is losing control of his powers due to the stress of balancing his superhero side and his everyday life)
* The main character's tag team partner would eventually meet this fate courtesy of the
* The main characters take a moment to mourn Goku who just performed a
* The main characters themselves work for a delivery company, making them non-stereotypical truckers in Space.
* The main character's underwear will change too, but oddly, the Dark Side underwear is actually more conservative, basically consisting of a full body stocking. Those Siths. Such prudes...
* The main characters use a heavily modified Alvis PV2 "Stalwart" to venture forth into a London that has been taken over by
* The Main Character that can date any of the dads has lost his previous partner a while before the events of the series.
* The main character tortures a corrupt Mexican policeman by removing his fingers one by one and cauterizing the wound with a cigar lighter.
* The main character Twilight Sparkle is a purple unicorn—a magic user who won the
* The main character, Vladek, is occasionally shown to be one. He accuses his second wife of being a
* The main character when he prepares to summon his Persona for the first time. Just calmly whispering "...Per...so...na..."
* The main character (who is a 9-year-old boy) and this 21-year-old pro-golf player lady who took care of him for some time. Well they did get along quite well, so it's no wonder that
* the main character works to keep it from repeating with Ushio after getting a wake-up-call. That's because Nagisa, Ushio's mother, died in childbirth.
* The main character, Xiao Mi, is an anthropomorphic bear with yellow fur who wears nothing but a shirt and likes to eat honey.
* The main Claptrap accidentally talks several bandits beating him up into

* The main competing plan, which the Death Star steals all the funding from for purely political reasons, is Grand Admiral Thrawn's plan of "replace our current generation of utterly useless fighters with some that can actually win a fight against the Clone Wars surplus and civilian models the Rebels are using".
* The main conceit of the "caterpillar" magneto-hydrodynamic drive making the eponymous
* The main conflict of the original story starts when Deep Space 9 receives a distress call from a Bajoran colony under attack by the Orion Syndicate and Eleya is sent to investigate. It later turns out the same attack has been repeated all over the sector.
* The main continuity includes Terminus at the edge of the galaxy itself, as well as Haven and Gaia
* The main couples of Minoru Kawakami's light novels are usually like this, due to
* The main design flaw with the original GunCon for the PS1 is that the two side buttons are near the front of the barrel, necessitating a "one hand on the grip and the other on the barrel" grip for games that make heavy use of these side buttons, such as
* The Main Difference Between Europe and the USA at times. By the way, guess which is which?
* The main difference between ordinary soldiers and the so-called elites, the Marines and Rangers in this case, is a one-time training course that is mostly psychological in hardship, and only varies in more intense and frequent exercise and the use of special skills. Deaths in training are usually preventable and the result of ignorance or carelessness by the chain of command either to prevent a marine's/soldier's risk or to help a marine/soldier at risk; this includes deaths by suicide. The Marine Corps and Ranger school also have more restrictions on who may enter, and it is mainly for this reason that they are viewed as elite, even though any military unit may have equally hard conditions and training in its regular activity.
* The main difference between the standard use of this trope and this use of it is that the heroes are typically the ones
* The main difference coming from the incredibly serialized nature of Miracle Day, with one plotline running strongly throughout the entire run, as opposed to the more standalone nature of the first two seasons.
* The main door may still work somehow, even though a nuke fell on the tunnel. The entrances to the room with the main door are sealed to the player, but the Enclave ambush comes from the inaccessible lobby.
* "The Main Drain" has SpongeBob and Patrick hearing a story about a drain that two kids pulled long ago and that flushed away all of Bikini Bottom. They become obsessed with finding "The Main Drain" and making sure no one pulls it again.
* The main duo have never once shown any ounce of competence at their fast food job and have gotten the place closed for health code violations at least once, not to mention blatant workplace violations such as fighting each other in an attempt to earn workman's comp or going "on strike" and just refusing to work for no reason. Yet they were never shown having been fired.
* the main effect of this bombing was to give German troops more cover against Allied infantry.
* The main examples: other Fukada girl (nicknamed "Jaws"), the biology teacher (nicknamed "Chihuahua") and Takao (aka "Big Red").
* The main faction is the Imperium of Man, and much of their technology features function over form for the small scale, and thus has a robust, industrialized design. As they scale upwards, the form-function ratio tends to move further towards form, but never overtakes function. Things like starships or
* The main fleet mainly consists of destroyers, cruisers, corvettes and carriers. Destroyer as
* The main form used in the series is the Third Summoning Ceremony, also known as the Blood Sign-based summoning ceremony, which can essentially be described as Scrabble performed using a 3D game of pool. A ceremony begins when an Incense Grenade is detonated, creating an Artificial Sacred Ground in which supernatural

phenomena can occur. A Rose is created at the centre, consisting of 216 floating red spheres known as Petals (analogous to the object balls in pool). Each summoner is accompanied by White Thorns (white spheres, analogous to the cue ball) and uses their Blood Sign to hit the White Thorns to knock the Petals into Spots (36 spherical holes in space, analogous to the holes). Each Petal is associated with a particular letter, and by knocking a particular combination of Petals into Spots, a summoner spells out the name of a Material to summon them.
* The mainframe is infected with a virus that shuts down all the computers. And displays an animation of a cartoon pirate with a catchy tune.
* The main function of the army has switched from fighting other humans to fighting
* The main game also has the Leather Armor, although it doesn't affect one's stealth stats, and the Recon Armor.
* The main game features Michel and Giselle, who despite a rocky start never look anyone else's way after getting together. While Michel's
* The main game has a sidequest with the Boomers where one of them has a crush on a member of the Crimson Caravan Company. You can
* The main game has electrolasers. However these are merely stunguns that don't need a wire. Electrolasers are actually in development, see
* The main game has stats for this as a monster, right down to the name. It's considerably dangerous, able to rapidly devour characters (and their gear!) in its space, infest a single target to devour them even faster, and disperse itself to hide from pursuers. And as a swarm, its immune to weapon damage and targetted spells, meaning depending on your party composition you may have a hard time hurting it at all. (Incidentally, this isn't a case of
* The main game has the option to build an arcology in a Great Works site, an area in the inter-city region. It's monumentally expensive, both in cash and raw resources (the idea is that all the region's cities will help in its construction), and differs from the classic arcology by requiring external sources of power and water, but offers large bonuses to business and tourism in the region. It also completely eliminates the need for residential zones which makes sense as EVERYONE is living inside the arcology.
* The main game has the small settlement of Andale, which plays with this trope. It's only inhabited by two families, who obsessively cling to the values and fashions of the pre-War world for humorous effect
* The main game introduced "Legendary Weapons", special variants of the normal weapons wielded by the player which were previously utilized by the characters in the film, and differ from said weapons with unique aspects (i.e. Hudson's Pulse Rifle can carry 99 rounds instead of the standard 30). However, this raises several problems once the player catches on that the majority of the weapons were
* The main games had the NOD Black Hand as one of these, being tough, disciplined and equipped with flamethrowers, while the GDI has Zone Troopers soldiers in
* The main game's main story ends with the player using enchanted tools to destroy the Heart of Lorkhan. Said Heart is coded as a creature in-game, with a constant health regeneration effect to prevent normal attacks from killing it. A player with sufficiently buffed strength (something easily accomplished without actually cheating due to the
* The main girls, Mizuki Himeji and Minami Shimada, are very obviously Aki-sexual. Unfortunately, Akihisa is an idiot who
* The main gods acknowledged in the Empire are Cormaris (god of justice), Reymaris (god of wisdom), the Mother (self-explanatory), Teos (god of knowledge), Bredan (god of oaths), Laursana (
* The main government-owned network in Spain, TVE, used very bizarre and psychedelic
* The main group, aka the J-Team, regularly coming up on top versus a number of dangerous opponents and containing some of the most skilled trainers in the RP's universe.
* The main guys (now adults with doctorates) were all implied to be this in their teen years. Sheldon in particular constantly reminds his friends that he was beyond

a genius - he was already a P.H.D. by the time he reached his early teens.
* The main heroes are warriors from Ancient Egypt who uses mystical weapons and armor to fight an evil magician.
* The main heroine, Sidney Prescott, evolves from a straight Final Girl into a
* The main human factions, the Empire and Bretonnia, get gryphons, hippogriffs, demigryphs (which are wingless gryphons), and pegasi.
* the main hype point of the show, that it and the movie universe were connected), the stories it was telling were bland, monster-of-the-week fodder, and budget or not was overall lacking for something bearing the "Marvel" name.
* The main IA cop featured even goes a bit rogue in one of his investigations. In order to help Detective Allen stay on the force, he surrenders a crucial bit of evidence in his investigation of corrupt CSU Jim Corrigan. He knows that it's better to have Allen on the force than Corrigan off it, and that Corrigan will screw up again.
* The main joke with the recurring character Bathtub Granny is that she's always in her bathtub and is therefore always naked.
* The main kid in the remake is berated by his foster parent for saying "shut up" at the dinner table.
* The main kind seen are a diminutive, green-skinned people who live in the depths of the world-forest's canopy.
* The mainland maps of Taiwan were used to show sovereignty rather than usefulness, hence depictions of administrative divisions of Taiwan once stayed as if 1949(refusing to acknowledge any changes). However as more and more people visit and even live across the Strait depicting reality becomes more beneficial, hence the disappearance of "Taipei County" before 2020. The State Council of PRC were in fact more far-sighted than mappers having (at least for recent decades) never listed any official shadow subdivisions beyond "Taiwan Province, People's Republic of China", enabling anyone saying "New Taipei" with no political connotations.
* the main law of time travel, "Whatever happened, happened", meaning no matter what the characters do, the universe falls back into place.
* The mainline Spider-Man actually subverts the trope. Many of his powers are hardwired into his reflexes and instincts. As such, acrobatics, fighting, dodging bullets, and balancing are all things he can do automatically. In his introduction, he backflipped twenty feet and stuck to the side of a building mere minutes after being bitten by the radioactive spider, purely because his
* The main Lord character of each of the games usually fulfills this role, though a particularly strong one such as
* The main male character in ZZ Top's 'Sharp Dressed Man' video gets this.
* The main manga and series feature a clone of Urd. The Urd clone can use all the same magic as Urd, but her inferior body can't handle the stress.
* The main menu features a video where Bob and Larry get interviewed by
* The main message is "Be Yourself"; the main conflict of the story is caused by Ralph, the villain of an arcade game, leaving his game and entering another game where he can become a hero, only to end up letting one of the monstrous Cy-Bugs from this arcade game into a third game, where it lays eggs and quickly becomes a threat to the entire arcade. At the climax of the film, Ralph manages to save the day by
* The main motivation was that both sides thought that the war was a complete joke motivated by
* The main one is the Darkenblot itself, a mighty suit of armor that the Phantom Blot uses whenever he has to fight, that gets improved with each story:
* The main one would be Lady Dimitrescu, the "Tall Vampire Lady", who will endlessly pursue
* The main organizing force in Narn society appears to be a number of religions based on the teachings of certain incredibly respected sages (at least one of which contains detailed and correct information about the Shadows). Things get quite wonky for G'Kar when he writes a book during a stay in jail, and
* The main party accuses Savyna for being a spy. Instead of denying it, she simply says, "You only asked for my name, not who I was."

* The main playable character options in the Glass-Maker's Dragon campaign for
* The main playable race are called Ironforge dwarves, they live in the city of Ironforge and were originally the most stereotypical of the dwarfs. Subverted when the revelation of their
* The main plot involving the villain's murder spree, complete with you being forced to sit through a funeral for one of the victims. Instead of, I don't know, dragging the victim back into the church to be resurrected like you did all the times someone in your party has been killed in random battles.
* The main plot is kicked off when Maria returns to San Angel after several years of studying abroad.
* The main plot is set in a Dyson Sphere inhabited by a society which seems suspiciously similar to Iain M. Banks's Culture
* The main plot is that Anya/Anastasia is trying to get to Paris to see the Dowager Empress (her possible grandmother). In
* The main plot is that Shylock the Jew has obtained the right to a pound of Antonio's flesh if he does not repay his loan. This is upheld in a court of law, despite the fact that in Elizabethan times, and to this day, you cannot make a contract that gives you the right to commit murder. This is possibly justified in that the trial takes place not in England but in Shakespeare's idealistic rendition of Venice, whose primary function is to serve as an exotic setting rather than a factual depiction of the city and its people.
* The main plotline ends with Emperor Martin sacrificing himself in order to stop the Daedric invasion. Unfortunately, this left Tamriel without an Emperor, and with
* The main plot of "Martha Gets Spooked" is about Mrs. Parkington mistaking Martha for the ghost of her great-aunt who has the same name. At the end of the episode, a mysterious shape is seen on a photograph. The most likely explanation is that it was just lens flare, but it's never proven either way.
* The main plot of the episode "The Late T. C." is kicked off when Dibble overhears a conversation between T. C. and a doctor, and mistakenly thinks that Top Cat only has a week to live.
* The main plot sequences of "Where There's a Will, There's a War" (many of the flashbacks don't qualify at all), as Hawkeye struggles with his own mortality by writing a will for the other members of the 4077th to read if he's killed at Battalion Aid.
* The main point of all those "Tell Your Most Embarrassing Moment" sections in
* The main point of Tali and Engineer!Shepard is to hack enemy robots' IFF targeting systems and make them go on a berserk rampage through their own lines. As well as remotely rigging enemy weapons to explode when they try to fire them.
* The main point of the Abbyfall quest in PMD-B was to prevent the Bay region of Hoenn from exploding into war once again.
* The main premise and the backstory of the Japanese card game "Gachinko" concerns the battle between a married couple who are also martial artists. Mariko (the wife) and Mario (the husband) aren't in a good mood, and fight each other physically over trivial matters.
* The main premise of one of the best known pieces of medieval European literature,
* The main premise of the story is that Axl (Odin) is searching for his Frigg, so that they can become one. And, not incidentally, restore the gods to their former power.
* The main premise of the story is that Optimus Prime does not get killed in his final battle with Megatron due to Kup preventing Hot Rod from interfering with the fight.
* The main problem is that every transit destabilizes the Wormholes for a time, based on the transferred mass. With one ship, there is a very short cycle until the next one comes through. Sending the maximum mass in one transit (for a Manticorian Terminii about thirty Superdreadnoughts) will make further use impossible for
* The main problem was actually due to the Spartans being a living fossil. The polis was an early attempt to solve the tensions present in all Greek societies at the time (nobility versus commoners), by effectively making all citizens noblemen.

However, there was very little flexibility for the case of new types of tension, and once money economy, despite all attempts, became important, the Spartan law that citizenship requires property translated into them bleeding citizens at a steady rate with hardly any connection to wars.
* The main problem was that both Germany and the Soviet Union felt that Poland had taken too much and wanted "their" territories back, so there was a strong possibility of another Russo-Polish war in any case, no matter how many territorial gains the Poles were able to enforce with French support.
* The main problem with the Mimbrates and Asturians, aside from the Mimbrates treating their landed gentry opposite numbers as no better than serfs, is that neither side will
* The main problem with the Sherman was that since it was so simple and successful at the start of its career, the powers that be saw no reason to do any serious planning to replace it. Shermans at El Alamein in late 1942 were regarded with mild fear by the Axis due to the massive increase in firepower and armour compared to what they were used to facing. By Normandy in 1944, when faced by what was effectively the same tank, the Germans had moved ahead with equipment and now refered to Shermans as Tommy Cookers (more due to lousy ammunition storage practices
* The main protagonist, Ruby Rose, is the youngest member of the main cast at 15. She's about half the size of her weapon, which is a
* The main protagonist Ryu Hayabusa deals with a number of threats to human kind. Among them are the Fiends, a race of demonic creatures spawned from the evil deity Vigoor.
* The main protagonist's love interest is kidnapped by his psychotic
* The main protagonist, Sol Badguy, was once a genius scientist who created the
* The main Protoss building, the Nexus, is a pyramid, as are many of the types of Xel'naga Temple seen throughout the series.
* The main purpose of the Geisterdamen seems to be finding a new body for their Goddess, "The Other"
* The main reason Chaos will never truly win is that none of the four gods really
* The main reason for missile launchers on US toys being nerfed, completely disabled, or having ridiculously long projectiles dates back to 1979, when a kid choked to death after firing a
* The main reason for the size of BattleTech Dropships is the fact that rather than travelling from orbit to the surface of a planet, they travel through an entire
* The main reason given for why the supernatural world is hidden is a case of
* The main reason Mars is lifeless (as far as we know) is because its magnetic field was too weak to keep the solar wind from stripping away most of its atmosphere over time.
* The main reason psykers are so hated and despised throughout the Imperium in a way that would make X-Men Muggles proud is that if they lose control of their powers, they become easy prey for Chaos, and daemonic incursions are sure to follow. A single psyker getting possessed could cause a daemonic invasion big enough to envelop planets or whole star systems. Thus, the Inquisition is extremely diligent in finding psykers before they start exploring their powers, hauling them off in Black Ships crewed entirely by anti-psykers to be brought before the
* The main reason that Switzerland has been able to remain neutral for so long is savvy diplomacy; this trope really only gives insight as to why they've been able to fight off or at least deter anyone whom diplomacy couldn't placate (with the notable exception of
* The main reason the Autobots are able to match the Decepticons despite being at a disadvantage both in firepower and numbered forces is because they have bonded closely as a team. Each of them can pair off with the other in combat. The third season episode "Evolution" not only features an epic Bash Brothers with previously at-odds characters Wheeljack and Ultra Magnus, Optimus asserts that their bond as
* The main reason the Yeerks are focused on Earth is that it's a perfect world for their needs (lots of

* The main reason this crosses into the high class call girl trope is that the Telbun's original family is compensated for the Telbun's services.
* The main reason this tactic worked was because Pip dedicated his entire attack force to stop the sister's plan, believing that whatever they had planned would be more dangerous than what the other two players were doing.
* The main reason why armadillos often get hit by cars is that they jump when frightened. If they just stayed still (contrary to popular belief, the nine-banded armadillo does not curl up into a ball as a defensive mechanism like some other species), the car would often pass over them harmlessly.
* The main reason why Fisk hires Benjamin "Dex" Poindexter as a hitman. As part of his first assignment for Fisk, Dex dons a replica of the red Daredevil costume made by Melvin Potter and attacks the offices of the
* The main reason why Oliver Queen and his estranged fiancee Laurel Lance never got back together (despite heavy implications Oliver is still and will always be in love with her) is that Oliver honestly believed that he wasn't good enough for her and wasn't deserving of her love,
* The main reason why she wanted to become a D-Wheeler is after witnessing Yusei's duel with
* The main redeeming qualities of the Clone and the Android from "Forever & Always" is that they're madly in love with one another and sincerely want to live out the rest of their lives together.
* The main religion that plays this straight are the Cults of the Dragon Below. They don't worship Khyber, just
* The main result also became this, as GW had to reconcile the forces of Evil coming first in the normal game but being utterly smashed in the specialist games (specifically Battlefleet Gothic). Eventually it was decided that the baddies managed to take half of Cadia, but are now cut off in a Stalingrad-style pocket due to the Imperium smashing their spaceborne assets.
* The main right-wing party in Poland is called PiS (Prawo i Sprawiedliwość; Law and Justice). The name is said exactly like "piss".
* The main role of O'Neill's friend Major Kawalsky is to die in every single timeline, whether they find it or create it with time travel. (Except for
* The main series, and all its related books, went through a canonical "six-month gap" around 2000, where Cyclops was believed dead and Cable joined the team to take his place. All that is known at the end of it was that Psylocke and Phoenix had switched powers, giving the former telekinesis but no telepathy and the latter, the reverse.
* the main series it is revealed that the aliens never developed balloons, airplanes, or any other variant of flying machine, jumping directly from the Tripods to space travel. Speculated in-book to be the result of a combination of their world's extremely strong gravity and a sort of cultural blind spot.
* The main series of games (i.e. the one with a number in their title) are a Downplayed example. The entire series takes place on the continent of Tamriel, with the first four games (
* the main shapeshifting character triggering this for Sarah with her full squirrel form.
* The main shtick of Professor McGonagall, who spends most of her time being a stoic
* The main sources of information regarding the setting’s ancient history and cosmology are the writings of Worldhopping explorers and
* The main story also loves subverting and deconstructing it. While humans have done bad things, these were mostly out of ignorance and are nowhere
* The main story begins with protagonist Shiki Tohno being seized by an inexplicable urge to stalk and murder a woman he happened to pass by on the street, via cutting her into seventeen pieces. He is understandably dismayed when Arcueid shows up the next day complaining about how much power it took to revive herself.
* The main story is about someone else's trial, and the person who made a plea bargain testifies against them as part of the deal. Naturally, the second defendant's attorney will

* The main story of the game takes place over a couple of months in early 1899. You can, of course, take quite a bit more time than that to actually complete the story in-game, with potentially hundreds of days passing.
* The main story revolves around Joe, a U.S. Army Private, and Rita, a prostitute, chosen for
* The mainstream Buffy also has a vampire bite scar on the left side of her neck from when the Master bit her, though both Angel and Dracula have bitten her in the exact same spot as well, and we only actually see the scar after Angel bites her.
* The mainstream Forge is a self-assured and assertive inventor who refuses to let his inventions be used for evil, while this Forge is insecure, passive and is all about letting his inventions be used for evil.
* The main sun is a yellow star, much brighter than our sun. The secondary sun, a red dwarf, is a quarter as bright as our sun. And the other, similar pair of stars (about 0.02 light years away) are many times brighter than Venus, and easily visible in daytime.
* The main switchboard line for the Indy Star, Indianapolis's newspaper, is "four four four forty-four forty-four".
* Them Ain't Big Eye Ants - the title doesn't make any sense, but if you say it out loud fast enough it, of course, sounds like "They Might Be Giants".
* The main teacher has one at the end of Chapter 1 of Sayaka Yamazaki's
* The main theme of the Frosted Flakes "Show Them You're a Tiger" campaign.
* the main theme) of the movie. Even if the Pax had worked perfectly, it still would've been wrong to stifle the human emotional range for the sake of peace.
* The main thing for which there is not a direct comparison is the protagonists' homeland of Gallia, which serves as a
* The main thing keeping Londo from quite qualifying for most of the series is that he lacks the moral courage to do the
* The main trigger for the bomb is also a Dead Man Switch, activated if the bus drops below 50.
* The main trilogy's storyline also presents a conflict between Romanticism and Enlightenment. The central conflict of the story is a
* The main trio rise through the field ranks throughout the series, later aiming to become Hashira.
* The main troublemakers in each game have included a mutated mastermind created by exposure to a pre-War
* The main twist of the season is that there was a liar in the house. By "liar", we mean someone playing under a false identity. The Liar is revealed to be Logan, but not to the houseguests. One week, there is a double elimination week and Michael Goldsmith says they have to evict the Liar, or else they will lose a portion of the grand prize (which the Liar would receive). Knowing he is in trouble from the other alliance, Logan persuades the majority and the floaters that the liar is Darby. Thus, the house cast their votes for Darby and Logan, and since Darby receive more, she is evicted.
* The main two superheroes Ladybug/Marinette and Chat Noir/Adrien keep their identities a secret from each other, mostly at Ladybug's insistence. What makes it really infuriating is that they both go to the same school and are somewhat close in every guise - Marinette has a crush on Adrien, who considers her a friend, but he's in love with Ladybug, who's dismissive of Chat Noir's flirting, though still valuing
* The main universe Fluttershy was turned into an Alicorn after being purified of being Nightmare Whisper
* The main universe Galactus, despite being pretty omnicidal, is vital to the survival of the universe. He's a
* the main universe, he's single-minded, antisocial, and at best is a reluctant ally of Sonic and the gang. Here, he's good buddies not only with Sonic, but a whole group of friends, and is kind and outgoing.
* The main universe occasionally also refers to our solar system as the Terran System (though it's more frequently known as the Sol system or Sector 001).
* The main use of the cola nut in the drink was for the caffeine it contains.

Nowadays it is
* The main version of Cell killed the Trunks from his native timeline in order to steal his time machine.
* The main version of Mr. Freeman's "I Feel So Good" is him singing a reggae pop song or something along those lines, while the Seven Gemini Remix is him rapping over an urban beat. They don't appear to have anything in common except for prominently including the phrase "I feel so good".
* The main villain during the day. The protagonists see this for themselves during a beautiful day at Baram Town in which they see two large rocks crashing down into a forest only to find out that Latias and Latios failed to escape.
* The main villain is guilty of it as well, choosing to kill Bond and the Bond Girl by dragging them behind his boat and assuming sharks ate them when they finally disappeared as opposed to shooting them
* The main villain is possessed, but is so evil he in fact steals the abilities of the non-evil possessor while keeping it imprisoned in his mind. He goes on a campaign of galactic destruction thinking he is doing the bidding of the Lightbringer (Satan).
* The main villain, Mashtooth, inhales his victims — through his
* the main villain of season five, changed his blue shirt for a black coat.
* The main villain of the franchise, Master Xehanort, did not take note of his return in his human form, eventually allowing him to spoil the evil genius' plan.
* The main villain of the sample scenario "With A Song In My Heart" is John Clerk, an immortal serial killer driven by the need to amplify the music he hears in his head via murder. As such, singing is one of his
* The main villains are all killed when they open the Ark to obtain God's power.
* The main villains are a rat, a shark, a weasel, and a crocodile (animals with various unsavory traits).
* The main villains of Season 3, the Red Lotus society and their leader Zaheer, want to remove all world leaders and replace them with anarchy in the name of freeing people from the tyranny of their governments. Considering some of the authority figures we've already seen—the warmongering Fire Lords who preceded Zuko and Izumi, the inept President Raiko of the United Republic, and the cruel, vindictive Earth Queen—even Korra can’t deny that Zaheer is correct in identifying the problem. However, the Red Lotus is willing to murder Korra and innocent people associated with her just because they stand in the way. Furthermore, the Red Lotus's assumption that people will become happy and free if they simply destroy the existing governments without replacing them with anything turns out to be hopelessly naïve. This is demonstrated in season 4, which shows the Earth Kingdom has spent three years divided into many weak states which cannot protect their people from bandit attacks or guarantee the availability of food. This situation ends up creating the villain of the fourth season, Kuvira, who becomes a dictator as tyrannical as the Earth Queen was in her quest to reunite and rebuild the Earth Kingdom. Korra makes sure to point this out when she visits Zaheer in prison.
* The main villains of Season 7 are the twins Acronix and Krux, collectively referred to as "the Hands of Time". Notably, Acronix is the younger and more tech-savvy twin with the ability to speed up time while Krux is the older twin with a disdain for technology and the ability to slow down time.
* The Main vs. Impact Story, which covers the struggles of the Main and Impact character as they seek to influence each other (For example, Peter Parker struggling to meet his commitments while Mary Jane pulls away)
* The main weapon of the German soldiers is the MP 40, despite the movie taking place in 1936. The MP 40 was the MP 38 slightly redesigned to be cheaper to manufacture and a little safer to carry, and the two are visually nearly identical, but still falls 2 years too short (there
* The Majestic has amnesia following an automobile accident and is found in rural California, where he is mistaken for a local war hero thought dead. For most of the middle of the movie, he tries to fit into the mistaken identity role without really knowing who he is.

* The Majestic, Peter has a prepared statement for the House of Unamerican Activities committee that was prepared by his lawyer and specifically tailored to get him off the Hollywood blacklist. However, when he starts to read it his throat goes dry and he realizes how wrong all of this is. He proceeds to chew out the committee and tell them what America is truly founded on.
* The Majestic, the entire plot is based around an amnesiac Jim Carrey being mistaken for his Identical Stranger twin, who was a soldier in WWII. Who sounds like Matt Damon.
* The Majesty of Colors. The titular "Majesty of Color" is what your character experiences when they pull a balloon under the water.
* The Majesty of Colors who falls in love with "the majesty of colors" (it discovers a balloon) and then decides to investigate humanity. The player then chooses whether to play an angry, rampaging beast, or a kindly, helpful one.
* The Major after being shot by Seras. However, he claims this still makes him more human than a vampire.
* The Major, a long-term guest at the hotel, is a Dottore figure: a somewhat-senile, rather racist old man with a pompous attitude and an inflated view of himself.
* The Major although the original manga never got around explaining how he became one. Fans speculate that the prequel series will show what happened between the time he is assumed to be still made of flesh and the not-so-human plot twist fifty years later.
* The Major and his henchmen cut the power at Sunnydale High before doing a
* The Major and the Minor. The gag comes in when Kirby realizes he needs to tell Susan's parents about taking her home with him.
* The major artifact sword Angelwing Razor is so sharp, it can cut through literally anything, bypassing all forms of hardness and damage reduction. This includes barriers of pure magic that have no actual material substance.
* The major aversion is Marcus Cole, who speaks with a British accent and is apparently from a British space colony.
* The major choice that the player has to influence the ending is the phone call that
* The major difference between the Technocracy (the primary antagonstic faction) and the Sons of Ether (a
* The major driving cold war in the series is the Vorlons and the Shadows, who seem to have an agreement to fight the war primarily through proxies amongst the younger races. Sheridan forces the Vorlons to turn it into a hot one... and then both sides start to blow up planets,
* The major example is an aversion. For ages, the TARDIS was notorious about not landing the Doctor at the destination he wanted to get to, with the navigation system being referred to by at least one character as "knackered". However,
* The major exception is when a business magnate comes up with a diabolical plan to enslave all telepaths with a virus. As he explains it with his calm fanaticism, your major reaction will be that you'll want to warn Bester of this threat, although the means how Bester does learn of it is despicable in itself.
* The major factions have custom variants: Grineer Wraiths, Corpus Vandals, and Lotus Dex weapons. They are typically limited to event-only rewards and were originally
* The major genetic evolution in humanity has been the emergence of psykers, and even then they're around one in a million. Somewhat enforced, however, in that FTL travel is far from easy: the populations of planets become known for very particular traits (every Catachan looks like
* The Major herself falls into this category as well. She usually is a complete
* The majority of canon focuses on events in the USA, and only a few cities at that. There is plenty of room to explore what the rest of Earth Bet is like.
* the majority of China's population is affected by it (pink, purple, and green areas are where this trope applies).
* The majority of Christian praise music is, unsurprisingly, "You Are" songs about God and/or Jesus, many adapted directly from the Psalms or other Bible passages,

with the occasional Villain Sucks song about Satan thrown in for good measure.
* The majority of "Contemporary American Poultry" has Abed explaining how the study group took over the chicken fingers market at the college. At the end, it's revealed that the story was in response to Dean Pelton asking if he knows who stole the hairnets from the cafeteria. Abed suggests that it's "Someone with hair"
* The majority of detractors of the WNBA are either talking about sleeping with them, insulting their gender (and
* The majority of events that occur in each character's campaigns in
* The majority of examples above are "real life" in that they're not a result of someone deliberately attempting to invoke the trope, they're examples of the reason the trope exists in the first place.
* The majority of frozen meals, complete with the opportunity to compare the tantalizing gourmet repast on the box picture with the puny, viscous, nuked mess on the inside.
* The majority of heroes in William Johnstone's western novels are former Confederate soldiers who believe in racial equality but have no guilt about fighting for the South. To a man, they believe that the war was about states' rights instead of slavery and rarely hesitate to say so in an unsubtle
* The majority of Mildred Burke's promotional photos focused on her bicep, trapezius, deltoid, rhomboid or teres muscles but she was always dolled up and presented as glamorous or accessible wherever the focus was.
* The majority of monsters in the series have at least one recolor, including regular bosses. In fact, the secret boss of Dragon Quest 6 is a palette swap of an earlier boss. It's easier to count the few enemies with unique sprites. Special note must go to the
* The majority of "Not What He Seems" has amazing animation, with the reveal of
* The majority of Rose Berlin's song "Coraline" is creepy, which is fitting when you consider the book it's based on. Then there's
* The majority of runs are scored as a result of "boring" things like walks and singles. Home runs are great when they happen, but even the most prolific home run hitters can hit a home run only about once every thirteen plate appearances on average.
* The majority of stories where starship-era characters somehow meet medieval-era characters have the medieval-era people believe that the technology is actually magic, at least initially. Generally, it's only the trusted allies who are told that it's actually advanced technology, the bad guys are left believing it's magic, often with truly hilarious reactions. Sometimes has unfortunate consequences if there's a local Inquisition.
* The majority of the Diclonii may or may not have this attitude, and those that don't invariably slip into it at one stage or another, usually in response to
* The majority of the Earth is being consumed by Tiberium, alien phlebotinum crystals that appeared in Rome and began growing outwards,
* The majority of the Eve economy is built on this, not just low-sec. Missions are one of the biggest sources of income to most players, and almost all involve being sent to a randomly generated location full of pirates to kill. This results in probably one of the worst criminal/target ratios of any game because
* The majority of the first pilot with Hunter was later incorporated in a two-part episode, "The Menagerie", in the show's first season, placing Pike firmly into the canon of the series. Pike would also be a major character in the series' motion picture reboot, played by
* The majority of the Heaven's Smiles have a glowing yellow spot somewhere on their body. Shooting this kills them instantly and grants you far more blood (used to heal and for power-ups) than gunning them down the standard way. Heaven's Smiles without the yellow spot have similar vulnerabilities — the enlarged part of a Phantom Smile, the eye of a Giant Smile, the shirt on an Ulmeyda Smile, the cockpit on the part of it's body that looks like a jet that it uses to fly around...
* the majority of the inhabitants of the Magical World are actually sentient illusions.
* The majority of the manga adaptations, including the official manga written by

Akira Himekawa,
* The majority of the movie splits the live-action and animation segments, but
* The majority of the penultimate Silo level can be avoided completely if you run to the hatch leading from the surface down to the Silo, and fire a LAW rocket into it at a certain angle (which glitches through the grate and continues straight downward, killing Howard Strong). This can cause the level to be finished in under a minute.
* The majority of the townsfolk, at the urging of the secret police, do not believe in mountains. (This is often mentioned in the same breath as the similar disbelief by fiat in angels, which if anything is even more absurd, since a given resident will far more often encounter angels than mountains.)
* The majority of the Two-Minute Mysteries are just Encyclopedia Brown stories condensed to one page and with the crime in question upgraded from petty theft to first-degree murder.
* The majority of UC Gundam series have the ubiquitous appearance of floppy disks, even ones made during the age of Compact Discs and Laserdisc, like
* The majority of units fight in formation, hence why the models come with square bases, so they can more easily fit together. This gives units a bonus when resolving a round of close combat, based on just how many rows of lads are backing up the guys in the front rank. Generals thus have to decide whether it's more important to have a wide, shallow formation that can do a lot of fighting at once but is more likely to break against opposition, or a denser block that can't engage as many foes at once but can last longer in a protracted fight. This also makes maneuvering a big part of the game, since one formation of troops can't just casually march through another, even if they're friendlies.
* The majority of video game franchises from the 1980s and 1990s originally began as arcade games and are nowadays released directly to consoles. Even during the "Golden Age" of the arcades (the 80s and 90s), some of these franchises already had a few made-for-console sequels.
* The majority. Though it's less sexy and more straight-up creepy…
* The Major loves war so much that felt he was "blue balled" by the Cold War and gets burning loins while watching London on fire. He's just as in love with Integra's carnage as Alucard and Anderson are as well and admits to
* the major method of advancement in the University was killing a wizard of a higher grade with non-magical means, leading to a tendency amongst wizards to be quite tough — while they were still quite large, for the most part, they tended to be sharp as a tack. Squishiness is preferred, since everyone remembers on some level what happened the last time(s) wizards decided that they preferred power to the buffet table. Grass didn't grow in certain places, and if it did, it grew in some very disturbing shapes and forms.
* The major non-UK, NATO allies most notably did not lower standards during the war and their armies did not grow. Whether this was to keep the quality of their armed force high (as they claimed) or whether that was an excuse not to increase size of their armies and avoid major responsibilities and therefore unpopular casualties, (as some US Military leaders insist) is not to be discussed here.
* The major Old Spice campaign immediately preceding this was a relatively rare example of using an good-looking half-nude
* The major pet peeve was that on the side of the FPS crowd, they hated it for how it monopolized shooters into a single uniform genre with very little deviation (Iron Sights/Regenerating Health and
* The major political parties in the US often run candidates for office in every partisan race, though for candidates they consider unviable, e.g. Democrats in the deeply red South and Northern Plains, Republicans in the deeply blue West and Northeast, they will often give no funding for advertising or get-out-the-vote operations, opting instead to divert resources to competitive elections. The same is true for the winning side, for example, California Governor Jerry Brown was re-elected in a landslide in 2014 despite running a "virtually nonexistent campaign". Brown's Republican opponent spent millions on advertising and campaigned heavily in the final days of the election while Brown spent almost nothing and opted to attend

a class reunion at Yale the weekend before the election.
* The major post-Deluge branches of Christianity in America are the Reconstructionist Christians (who are the result of remaining Catholics, Eastern Orthodox, and some Protestants
* the) major power in the galaxy, the protagonists face this dilemma themselves from time to time. They're usually willing to provide things like food, medicine, and knowledge, but not weapons technology.
* The major reason for the popularity is that it's used as an extremely quick XP boosting map. People are constantly dying in the meatgrinder, allowing people with medic kits to revive potentially hundreds of times a round, and people with support kit can make just as many reloads. Not to mention that because of all the reviving available, it's extremely hard to get a negative KDR unless you're really bad.
* The major reason for this is because the head is a 1 in 36 shot on the regular hit table (You need 12 on 2d6) however, the punch hit location table (Which is used for punches and DFA attacks) it's 1 in 6. Even if you miss the head, most of the vital components of a Battle Mech are in the torsos and arms. Taking out your opponent's weapons while knocking them on their ass is a very useful way to strike when you can survive it.
* the major revelation of Scarlet's real name, Ante Nora, being revealed. It involves Scarlet and Chase playing Fate Craft together.
* the major themes - only to then complain about how players didn't like the main character.
* the major tournament of the season to be run like that strains credulity.
* The major variants of villainous rulers include the more hands-off types, like
* The major works of Lemony snicket are dark childrens literature that have a heavy mix of Bleach and Ammonia along with one other ingredient , Usually when the
* The "Majou Shuukai de Arimashou" ("An Encounter With Witches") art meme consists of
* The Maka Chop, a purely comedic attack, apparently imitating Death's "Death Chop" which leaves a similar mark, because Death's hands are the same rough shape as a thick book. This becomes a
* The Make A Wish Foundation often grants their beneficiaries minor roles in movies and TV shows.
* the MakeOut, and it's implied it's on the future equivalent of YouTube.
* The Makeover: Being transformed from ugly (or mundane) to beautiful.
* The Makeover speech lessons and polishes up his image so that he can run for Congress in order to win a bet with her friend, Colleen Pickering.
* the Maker consists in forming an alliance of humans, elves, and dwarves against a Blight (the fifth of them).
* The Maker, he drops all pretense of being human anymore and becomes an amorphous tentacle beast able to create false bodies from a hair-thin tendril and even stretching his brain to become smarter.
* The maker of Sprite soda has been parodying this trope on and off for many years. In one memorable example, it was suggested that anyone who saw the image of a naked woman in ice cubes probably needed a girlfriend. Then they turned around and started their "Sublymonal Advertising" campaign, with their slogan "Obey Your Thirst" reduced to the Orwellian "Obey". They also get exceedingly obvious with the campaign, such as a small sign on movie theatre floors that says "
* The makers of Listerine mouthwash own the trademark to the shape of its bottle.
* The makers of the erectile dysfunction drug Cialis tout a version for daily use, "so you can be ready when the moment is right". Ads for rival ED drug Viagra responded to this by saying "you only take Viagra when you need it".
* The Makers on the other hand seem to speak a language that should be pronouncable to most species, but has so many subtleties and context-specific nuances that most Imperial translator implants can only make out one word in ten at best. Even a Fillipod scientist who'd previously shown fluency in several different languages had a
* The Maker who has been reduced to a shadow of his former self, has a mortal servant who's tasked with figuring out how to end the conflict and whose solution

may end up being bad news for at least one of the other sides.
* The Making of "...And God Spoke", a mockumentary about the filming of a big-budget Bible epic. The actor playing Jesus is so wrapped up in being his character, that when he's studying the script and a stagehand tries to get his attention, the actor doesn't respond. The stagehand exclaims "Jesus!"; the actor turns and says "Yes?"
* The Making of Doctor Who's universe, fandom lacking any real way to see previous stories at the time. Perhaps more than any other source, it established the accepted framework of the Doctor's origin, with later additions, even in the TV series, getting assessed by whether or not they fit it. (That said, one part of this origin only got a foothold in the expanded universe, never being validated on screen - namely, the idea Susan wasn't the Doctor's granddaughter - and even then, the fact she's omitted from the Doctor's departure from Gallifrey is disregarded.)
* The Making of England. I have no intention of resisting that temptation."
* The Making of Me, which showed a short film about human reproduction starring Martin Short.
* The Making of Star Wars makes the claim that a "par-sec is a navigational calculation, not a measurement of time; that is, the ship is fast because it's smart."
* The Makings of Team CRME, while having these things in them, mostly focused on rather mundane conflicts.
* The Mako Saga in each other's skillsets, but they all lean on the others.
* The Mako Saga. When they didn't get their way in a plebiscite on the matter, the Imperialists seceded and became the Alystierians, the books' enemy nation.
* The Makropulos Affair, a play written by Czech playwright Karel Capek and subsequently adapted into an opera by Leos Janacek, concerns a woman who has been granted 300 years of life through a magic potion, with an option for renewal. She finds that such a long life is an ordeal that leaves her exhausted and numb to human emotions. She decides that death is better.
* The Makuta and the corresponding Rahkshi have this as the "Plant Control" power.
* the Makuta: Makuta in general and Teridax in specific is still a tough bastard to beat, and what he lost in novelty, he makes up for with his schemes. But Makuta, as a species, are nothing special now.
* The Makuta species has 42 base powers, a strengthened version of the
* The Makuta species has many mental powers, too, and where a Toa of Psionics may stop, they will gladly push further. When Teridax unleashed his full powers on Karzahni's mind, it reduced the latter into a vegetable on two legs. Yet Karzahni was the one most famous for his soul and mind-crushing visions. Makuta evidently like beating others at their own game.
* The Makuta species. While there have been a few reasons listed for their turning evil, an on-line serial revealed it could all be tracked down to an original A.I. glitch that occurred whenever a new Makuta was born. The "Antidermis", a liquid substance containing the minds of unborn Makuta, was fully aware of what the purpose of their universe was (
* The Malachite Twins and their mother Jennifer Malachite, aka "Little Miss Malachite", are both very involved in organized crime. The twins work as assassins and Little Miss's activities could best be described as freelance, working for whoever benefits her. She just happened to work with the Branwens more often.
* The Malarial Queendom of the Anophelii was all but exterminated and its few survivors sequestered on a small island, where the mosquito-like females' insatiable
* The Malay Chronicles: Bloodlines battles their way through the pirate lord's island base, with plenty of fighting in knee-high waters.
* The Malay Chronicles: Bloodlines begins with a man in ornate robes writing the events of what happened three hundred years ago, where majority of the story is set. The final scene goes back to the man, revealed to be Sultan Mudzaffar Shah of Kedah, recording the chronicles of his ancestor in the Kedah Annals.
* The Malay Chronicles: Bloodlines fruit during his stay in said country.
* The Malaysian Penanggalan is said to only feed on the blood of pregnant women

and/or children, or on the heart/blood/flesh of unborn babies, depending on which region you hear it from. The Manananggal is often similarly picky in its choice of victims, with its traditional favorite food being the blood of pregnant women and the hearts of unborn babies.
* The Malazan Book of the Fallen and fail at whatever task he took upon himself as punishment for exterminating his own huge empire; man, woman, and child by the millions when he knew it would be taken away by beings more powerful.
* The Malazan Book of the Fallen, because Seguleh are just so good at fighting, that they only need to send three people when they want to crush an entire empire of cannibals.
* The Malazan Book of the Fallen can take this to extremes, such as the middleaged/old human Whiskeyjack, who's about 50, striking up a friendships with Anomander Rake, who's a few hundered thousand years old.
* The Malazan Book of the Fallen generals during ancient times. However, in their world, magic exists, and it can be just as powerful, if not more powerful, than any modern weaponry, something which most generals seem completely unprepared for. Most of the time, marching their soldiers across the countryside in large formations just makes them sitting ducks for High Mages, who can kill hundreds with a single sorcerous blast.
* The Malazan Book of the Fallen has an extremely moving and meaningful one for Itkovian.
* The Malazan Book of the Fallen. Not to mention Anomander Rake, or Gruntle, or Adjunct Tavore Paran... you get the idea.
* The Malazan Book of the Fallen. Quick Ben Delat gets into a few himself, including one where he blows away both Korbal and Broach in a matter of seconds.
* The Malazan Book of the Fallen, the K'Chain Che'Malle (Big intelligent lizard creatures) are bred for specific purposes, so the K'ell Hunters have big blades instead of claws or hands.
* The Malazan Book of the Fallen. The Malazan Empire is aggressive and expansionistic, but they're not evil. In fact, in the third book one of the leaders of the forces fighting against them comes to the conclusion that many of the cities they'd conquered were better off under the Malazans than they had been under their previous rulers. The Letherii Empire, on the other hand...
* The Malazan Book of the Fallen, the marine Lt. Tarr strikes at the same speed he talks — which is very slow. And that's if he decides to fight, he dislikes combat and had a reputation of going hours in a battle without doing a single attack. However he's a genius with a shield and wears a lot of armor, making him almost impossible to tag even by elite warriors. His drill sergeant once attacked him for over an hour and couldn't land a single hit.
* The Malazans may not be "completely" evil, but they are far, far from a strict subversion of this Trope, with their conquering and assimilating every single tribe that they encounter into their own religion and way of life is pretty damn evil.
* The Malden Islands and the Independent Republic of Nogova Island from
* The male and female Nidoran from the Orange Islands episode "Wherefore Art Thou, Pokémon?", an obvious
* The male anglerfish is tiny compared to the female. The sole purpose of the male in life is that once he gets the scent of a female, he swims to her and bites down on the side of the female. At the same time he excretes an enzyme at the mouth which causes it to physically fuse to the side of the female, and his body starts to atrophy. With time he is functionally reduced to a pair of balls hanging from the side which the female can use to impregnate herself when it is most convenient. When anglerfish were first studied, the males were thought to be a completely different parasitic species.
* the Male Avatar and his Implied Love Interest, he/she'll end up marrying his/her first cousin once removed.
* The male Avatar is half human, with the ability to turn into a dragon. His potential children will end up being a quarter dragon, and inherit his shapeshifting ability. Subverted if he's paired with Velouria or Selkie, who are beast shapeshifters like their fathers.

* The male Avatar is this to Flora, and probably Scarlet. Flora is stated to be in love with Jakob, whereas Scarlet is strongly implied to have feelings for Ryoma; however, the male Avatar is their only romantic partner.
* The male Avatar starts cooking for Nah in their A Support after seeing that her diet consists of little more than berries, leaves, and roots. She
* The male Barbarian of the very same game also sports one, in keeping with his barbarian persona.
* The male clones of Project CASTOR suffer from a neurological disorder that causes seizures and also can pass on a protein that causes infertility.
* The Male Draenei will stray into this during his silly emotes. "When we arrived here, I had lost many jewels that had been in my family for generations. If you could get your hands on my family jewels, I would be deeply appreciative."
* The male Dr. Stevens from the comics subverts this. His name was given to a woman,
* The Maleficent Seven from the hands, eyes or for one character, the mouth). Some branches, like Wall Walking (which makes gravity pull you towards the wall or ceiling), have twigs, tiny branches that break off from the main branch, but main branch users can easily master them, in the case of Wall Walking, magically opening locks and strengthening doors. Trying to use two or more separate branches interferes with the magic you originally began studying. Some people can use multiple magic types, the two examples we've seen so far both using Necromancy and Elemental magic.
* The male goblin even references the female goblin tendency for this:
* The male Knights of Pluto, led by Steiner, also get a lot of grief from the female soldiers.
* The male neighbor has a prize rose, while the female neighbor has a bird-shaped topiary.
* The male player character can try to flirt with Juhani. It doesn't work very well; she's openly disgusted in fact.
* The male protagonist can also pursue a relationship with an older woman he meets over an online game.
* The male Sith Inquisitor can also invoke this with Ashara. The Inquisitor needs her help to contact the Force Ghost of her ancestor, so he engineers her fall from the Jedi (like Jaesa), though the player doesn't really turn her into a crazed lunatic like Dark Side Jaesa. Having nowhere else to go, he takes her as an informal apprentice and she develops a crush on the Inquisitor from there.
* The Male Sith Warrior can directly parallel this with their companion Vette, who is his female Twi'lek slave. In the beginning, you could keep Vette's shock collar attached and still "romance" her, but critics pointed out the luggage rack of problems involved in
* The male Sith Warrior can invoke this with both romantic options. Vette is similar to Eleena, down to being a Twi'lek slave assigned to the Warrior. The Warrior, like Malgus, can treat her nicely, win her affection, and make her his common-law wife - though she's still his
* The males of most mammal species average larger than females, but some species have a particularly large size differential.
* The male superheroes change their minds as soon as they find out that the doujins are written by girls, much to Emp's chagrin.
* The male Tauren express this sentiment in one of their /silly emotes:
* The male uniform is used by Knight of Three Gino, Knight of Seven suzaku, Knight of Ten Luciano
* The male vampires also survive being blown up with grenades by surfing into the bodies of the soldiers who blew them up, taking it to
* The male Witch Doctor is this, too. Bald and arguably one of the nicest people out there...
* the Malfoys are hit with rotten eggs and tomatoes when they visit Diagon Alley after Voldemort's defeat.
* The Malfoys are remarkable. They are all pale and blonde — even Narcissa Malfoy

* The Malibu Bikini Shop she's been plotting against, exposing her dark secret — a long leg panty girdle.
* The Malibu Bikini Shop version, performed by the Chipmunks and the Chipettes.
* The Malkavian these two characters are is unknown, but they've managed to unnerve a vampire otherwise able to laugh off just about everything else the game throws at you, and probably are nothing good.
* The "Mallcop Command" storyline is set on a space station that uses rotation to generate its gravity; it's a historically preserved artifact of mankind's early space exploration after cheap gravitics became available.
* The Mall could be on the verge of being obliterated, but the heroes of
* them all having access to Kimiko, as they believe they're entitled. Since Kimiko finds one of the hidden cameras immediately after, she's not fooled.
* The Mall of America has a store called "Just Socks," which sells nothing but socks.
* The Mall of Cthulhu by Seamus Cooper is a light comedy novel set in the Lovecraft mythos, wherein a nerdy barista and his FBI agent best friend battle a cult of skinheads attempting to raise Cthulhu. While the main characters are fairly messed up as a result of their brushes with the unspeakable, in this universe the supernatural seems more likely to make you a codependent, socially awkward, unlucky-in-love loser than a gibbering lunatic.
* The Mallorean, the protagonists return to their respective homes; as Garion notes, since the loop of destiny was finally broken, it's as if they're all returning to where they started for whatever future is waiting now.
* The Mallorean This comes back to massively bite her in the behind for two reasons. One, it's frequently mentioned how much of a lead she keeps getting ahead of the protagonists. Yet each of her schemes end up causing Team Light to catch up to her. Two: It does not endear her to Cyradis, whose job is to choose between the Darkness or the Light at the end, quite probably biasing the choice against her.
* The Malloreon. A evil man agrees to help the demons attempt to interbreed with human women; such hybrids will serve the full demons. It does NOT end well for the mothers and most of the offspring.
* The Malloreon at holding ink, and the words have almost completely faded. He rants that the writers were so preoccupied with being gratuitously evil, they forgot practical considerations.
* The Malloreon because if they'd stayed, they'd have had to confront Torak, and that would have risked destroying the world, thereby fucking up the Prophecies on a horrific scale.
* The Malloreon behind and spends an afternoon riding through his own capital city without being noticed. He tells his companions that without them, he's "just a man in a linen shirt", even though his face is on all the coins.
* The Malloreon. Due to a mistake in the fabric of the universe, events recur with minor changes throughout history. By the end of the series, the heroes are actively noticing the recursion and using it to their advantage. The ultimate goal of the series is to fix this, so that time can finally move ahead.
* The Malloreon. Eriond and Prince Kheva set up piles of pillows at the end of their banisters ... but Polgara walks in on their game just as one pillow burst and sent feathers all over. Having had some two thousand years of experience raising little boys, all she does is laugh and tell them they need to clean up the feathers.
* the Malloreon for trying to figure out how much the Earth weighs, claiming no sane person would ever be curious about it. Garion chides him for mocking and potentially disrupting a man's life's work, even if they are on a quest to save all of creation.
* The Malloreon (in the older meaning of the word) to force a post-mortem confession out of a minor villain.
* The Malloreon involves him having his fiancee executed and discovering afterwards that she was not part of the conspiracy to kill him.
* The Malloreon — during a desert battle, the Murgos flee from the Malloreon army, luring them into pursuit, and leaving the Malloreon wagon train (with all

their water supplies) unguarded. Then a Murgo cavalry unit swoops in and chops up every single water barrel before the Malloreons can reverse, and the "fleeing" Murgos settle into prepared positions for some archery practice as well.
* The Malloreon on her face, and, out of fear that he thought he killed her, escapes to Mal Zeth, carrying nothing but the clothes on his back and the deadly plague he caught.
* The Malloreon scarier illusion that sends the Karands fleeing for their lives.
* The Malloreon sees the new Child of Dark Zandramas desperately offer to be (Bel)garion's new bride and for them both to become gods with the powers of the Stones after almost every plan she had to stave away the Choice between Light and Dark fails. Garion sees straight through it, and actually tells the Dark Prophecy that was behind Torak and is behind Zandramas off for being so unoriginal as to try a ploy that didn't work on him the last time. The Dark Prophecy is genuinely taken aback at this.
* The Malloreon series come with an automatic, magical one preinstalled; upon being asked a certain question, the one who gets interrogated goes mad and throws himself off a cliff, laughing maniacally all the way.
* The Malloreon settles arguments between nobles by holding tournaments. It's not unheard of for two nobles to decide they want to have a tournament and colluding to come up with a "disagreement" to justify it.
* The Malloreon, the hero and his companions are chasing a villain who'd kidnapped his son. Initially, they are months behind their quarry as they chase her, and they suffer through countless troubles and misfortunes that turn them off their course and delay them drastically. Oddly enough, as is noted well into the story, after all the delays and hold-ups, they're now only a few days behind their enemy.
* The Malloreon, the sorcerer Senji relates to the protagonists how the Melcene University, upon learning that he appeared to be immortal, decided to test it by hiring someone to throw him out a window. This turned out very poorly for the defenestrator.
* The Malloreon. The theory was: before the Choice could be made, certain conditions had to be fulfilled by both sides. If Zandramas killed someone on the good side who hadn't fulfilled their condition, she'd probably win by default. The same was true for the other side; Poledra points out that if the Child of Light gets to the Place That Is No More and found no Child of Dark waiting for him, he'd probably win by default.
* The Malloreon, we learn that among the many forms of magic practiced by the Dals was necromancy. Much like the older meaning of the word, the necromancer we see summons back the spirit of the recently dead to answer questions.
* The Malloreon when the characters realize that the captured prince will be turning two years old on the day of the EVENT.
* The Malloreon, which only flee when they reach the seaside, not daring to approach the open sea.
* them already being friends and the entire situation being her lashing out from fear and anger. When she calms down a bit, they successfully talk things out; Steven heals her cracked gem, and she calmly leaves for Homeworld after returning the oceans to normal.
* Them! also has an ant extermination mission, although these ants don't spit fire.
* The Malta group and the Council. The Malta group has defined goals, though (draconian restrictions on superpowered individuals, or just eliminating them entirely), so they may not count. The Council, on the other hand, is a pretty generic neo-fascist group with no particular goals beyond "be evil".
* The Maltese Falcon, as Sam Spade is negotiating the terms for handing over the Falcon, one of his conditions is that someone needs to take the fall for the murder of his partner (since the police suspected Spade himself of having done the deed).
* The Maltese Falcon, Captain Jacobi shows up at Spade's office, having been shot multiple times but still carrying the Falcon, and he is only able to mumble a vague explanation before dying. It isn't long before his killer and the men for whom he is working catch up with Spade.
* The Maltese Falcon imitator ask Sam Spade, "You going to make us an offer we

can't refuse?" It actually works.
* The Maltese Falcon into Sam's hands before expiring on the office floor. Trouble quickly follows.
* The Maltese Falcon is one of the earliest examples in noir fiction. She's directly involved in betrayal, theft, and several murders all while trying to play innocent to (not to mention seduce) the lead character throughout most of the film and the book.
* The Maltese Falcon O'Shaughnessy has would mean she will betray everyone to get the bird to herself.
* The Maltese Falcon: Sam Spade is friends with detective Tom Polhaus. His relationship with Lieutenant Dundy is much more antagonistic.
* The Maltese Falcon, Sam Spade promises to wait for the woman he's sending to prison to get out!
* The Maltese Falcon, Sam Spade turns in Brigid O'Shaughnessy for the murder of his partner.
* The Maltese Falcon. The episode opens with Yakko narrating. When we see him in his office, he's casually reading from the episode's script.
* The Malware: A malicious program that can harm the system it's on. It can come in many varieties, from a virus, to
* The Malys Estate. The rumours of it being haunted by ghosts or spirits turn out to be false, but that doesn't make it any less wrong. There's
* The Mamas & the Papas in addition to Elliot's solo debut album (released later that year) and many of the band's greatest hits records.
* The Mamas & the Papas, Jill Gibson. Phillips returned before the album was released, and re-recorded at least some of her parts. It remains a matter of dispute as to how many songs on the final album feature which singer.
* The Mamas & the Papas to pray", which may sound odd, but it fits the next line: "preacher likes the cold, knows I'm gonna stay" (i.e people keep coming into the church to get out of the cold.)
* The Mamba Zombie from the episode "Mamba Wamba and the Hoodoo Voodoo" was a
* The Mammoth Book of Locked Room Mysteries and Impossible Crimes, is a mix of classics of the genre and new stories adding modern twists:
* The Mammoth Hunters Ayla realizes that she wants to go with Jondalar and runs to tell him, just as he is leaving.
* The Mammoth Hunters by the fact that, in his youth, Ranec's father made a long journey to the region that is now Ethiopia, married a woman there, and returned to Russia with his son after his wife's death.
* The M&M's Candy Man has gotten this treatment for being a little too upbeat for some viewers.
* The Mana Fortress). The final boss can't be hurt with the weapons these orbs power up, though admittedly he comes straight after another, somewhat more conventional boss. Besides, you'd have to go all the way back to the beginning of the dungeon just to be able to use them!
* The management at one company hosts Christmas parties every year, treating the workers to lavish holiday dinners and handing out high-value gift cards. When Covid pandemic makes attending Christmas parties unsafe,
* The managers of a fancy hotel once contacted the producers asking them what they did to get the fancy automatic doors to work right. They were nonplussed to hear that the doors on the
* The managers who came after Matt Busby's retirement in 1969 suffered from this: Wilf McGuinness was out of his depth, Frank O'Farrell didn't get along with the players and made some terrible signings, Tommy Docherty relegated the Red Devils (he did bring then back to the top flight, though, made a couple of title challenges and won the FA Cup) Dave Sexton's style of play was sleep-inducing, and Ron Atkinson, despite never finishing lower than fourth and winning two FA Cups couldn't knock Liverpool off their 80's dominance. Ferguson himself was close to being another failed successor to Busby, but an FA Cup win in 1990, followed by great signings (Peter Schmeichel, Andrei Kanchelskis, Denis Irwin, and Eric Cantona) and a legendary batch of Academy graduates, ensured that he would

successfully live up to Busby's legacy and outshine Busby himself.
* The Manager the moment someone threatens him, making it all the better when a face being hounded by the stable for weeks gets his hands on the smarmy bastard.
* The Mana Goddess also has one, and this is the reason why the world is so messed up.
* The Manaketes of the rest of the series can transform into dragons, albeit with the use of a Dragonstone. It is also possible for them to lose their ability to transform, as shown by
* The Mana Tree's revived by the end of the game... only for it to die
* The Man became the infamous "Ki a faszagyerek?" (roughly "Who's the Badass Motherfucker?").
* The ManBeef web site garnered similar reaction. The joke was the site claimed to sell human meat and provide recipes for cooking human meat. The site had nowhere to actually begin human meat transactions, just in case someone was crazy enough to try (and there were a few).
* the man behind, rather than learning one instrument and becoming an expert, learned several instruments well enough to play his unique blend of rock and electronic music.
* The Man Behind the Man being revealed and fans getting tired of it, even if it made no sense in the long run.
* The Man Behind the Man Buran Blutarch, also get custom uniforms (dark red and sleeveless and black/blue respectively) despite not being full-fledged Titans.
* The Man Behind the Man Captain Whisker is a robot who sports a mustache and overall looks identical to that of Eggman, roughly no one was shocked when the twist was revealed.
* The Man Behind the Man heroism and advanced age, was given no such mercy.
* The Man Behind the Man In other words, the Dark characters accomplish their goals, but those goals changed drastically from when the story began.
* The Man Behind the Man is secretly controlled by an even Bigger Bad.
* The Man Behind the Man relationship with his aging mother, and developed the zombie virus in an effort to keep her alive.
* The Man Behind the Man to the Linear Guild, but they themselves refer to more powerful fiends ("the Lower Downs") from whom they are attempting to gain support for their venture, using their corruption of Vaarsuvius as proof of concept.
* The Man Behind the Man who started the whole conflict to begin with.
* The Man Called Flintstone, as a result of having "last-class tickets" for the plane that the Flintstones also take, the Rubbles have seats on the wing of the plane.
* The Man Called Flintstone Ferocious snarls at him, causing him to jump into Fred's arms.
* The Man Called Flintstone: Fred is called in to take over the role of the secret agent Rock Slag, who just happens to look exactly like him.
* The Man Called Flintstone, Fred looks at the audience during the song "Spy Type Guy".
* The Man Called Flintstone, Fred's singing voice for the song "Teammates" is provided by future regular Fred Flintstone voice actor Henry Corden. Corden does such a good job here mimicking Alan Reed's performance that it can be hard to tell the difference.
* The Man Called Flintstone has Fred and Barney reprogram the missile and then trick the villains inside the missile as it flies off into deep space.
* The Man Called Flintstone: Secret agents contact Fred Flintstone and send him on a mission to capture the Green Goose. They don't bother to clarify that the Green Goose is a dangerous criminal, so Fred agrees because he thinks he's been hired to capture a rare bird. Naturally, when he learns of the Green Goose's true nature, he is terrified.
* The Man Called Flintstone, showed that cave-humanity had already flung boulders into orbit by the series' time.
* The Man Called Flintstone the Green Goose that he's Slag, which is a problem as the Goose wants Slag dead.

* The Man Called Flintstone when Barney Rubble tries to use Fred's tie to get down a 100-foot drop from a prison cell window. The entire tie unravels into a single thread as Barney tried to climb back up it.
* The Man Called Flintstone: When Fred and Barney are imprisoned by the Green Goose, his henchmen feed them give them a bowl of mush that's supposed to poison them, and Fred stops Barney from eating a spoonful before this happens.
* The man called Sting is very interesting from a career standpoint. He became a star completely independent of WWE (despite being booked as a dumbass in kayfabe), survived numerous ill-conceived attempts to turn him heel, made a ton of money with WCW and later TNA, worked limited days for the majority of his career, and put up with some of the worst moments in wrestling history going on around him. (ex:
* The MAN challenge is essentially seeing how far you can get without using any superpowers beyond "Brawl" and "Sprint". It's considered cheating (and probably rude) to join teams and leech XP from more conventional characters. Due to the way mission enemies spawn, other MAN characters are fine if you can find someone else to join in your insanity.
* The Manchester Derby in September 2009 (voted the best match of the first 20 years of the Premier League) featured bad blood, great play, blunders, irony, and this trope. Already a heated match due to it being a local derby, tensions were even higher because of Carlos Tévez, who had left Manchester United and joined Manchester City in the previous offseason
* The Manchester Pusher: Is a rash of drownings in Manchester the result of one or more people committing murder, or just a series of unconnected tragic accidents? Or is it
* The Manchester United - Arsenal fixture got this reputation in the 1990s and 2000s, with one game in particular degenerating into a mass fight. It does seem to have calmed down in the second decade of the new century, though.
* The Manchester United defensive pairing, Fabio and Rafael Da Silva, are pretty much made for this. The only way the team staff and management can tell them apart is the fact that one of them is married, and thus wears a ring — and they have been known to swap it. Presumably with the wife's consent...
* The manchineel tree derives its name from the Spanish name "manzanilla del muerte", or "little apple of death". However, while the fruit bears some resemblance to apples, the tree in question is actually more closely related to violets than apples. Also, unlike apples, every single part of the manchineel is deadly to humans, and the only reason any are still around is that no-one has managed to figure out a way to burn manchineel wood without turning their lungs to blister-filled messes from inhaling the equally toxic smoke.
* The Manchurian Candidate and adaptations of such. Sgt. Raymond Shaw is awarded the Medal of Honor for saving his unit during the Korean War and is catapulted into a political career, but everyone involved were brainwashed by the communists into thinking that, and Shaw is further brainwashed into acting as a sleeper agent.
* The Manchurian Candidate disguises himself as a priest to assassinate the Presidential candidate of one of the leading parties of the United States.
* The Manchurian Candidate end with the hypnotized soldier being ordered to assassinate the presidential nominee, so the hand-picked vice-presidential can become the nominee and hopefully become elected based on national sympathy.
* The Manchurian Candidate. In real life, he founded the Taoist Institute in Hollywood. But he was born Kenneth Dickerson in New Jersey, of mixed Anglo and North African/Arab heritage, with no trace of East Asian-ness.
* The Manchurian Candidate is a war hero and a rising star in politics but his issues with his mother allow him to become a brainwashed assassin.
* The Manchurian Candidate is set in the time period during and after the first Gulf War, as opposed to the original's Korean War setting.
* The Manchurian Candidate mentions "that old wives' tale" that hypnotized people can't be forced to do things that are against their natures.
* The Manchurian Candidate of the title character, but the Hays Code wouldn't let them say it outright.
* The Manchurian Candidate: Raymond Shaw, although he is too arrogant to be a

perfect fit, has many of the features of this. He has little drive or emotional depth, and he always caves in to his shrewish mother, even giving up the only girl he ever had any interest in just to shut her up.
* The Manchurian Candidate, the 1962 adaptation and the 2004 adaptation.
* The Manchurian Candidate. The 2004 remake didn't follow this trope, and cast Americans as Americans, Englishmen as Englishmen, and this one guy of European extraction played by a Swiss actor.
* The Manchurian Candidate (the original novel) satirized Red Scare politics of the 1950s and McCarthyism in particular. Extremely Juvenalian.
* The Mandalore Plot", Obi-Wan defends himself against Mandalorian insurgents by shooting a jetpack he threw at them.
* The Mandalorian activated, a process that takes several minutes. This is a plot point: the Mandalorian and his allies are rushing to reach the cargo bay and shut them back down before they become operational. As the boarders move through Gideon’s ship, we cut several times to the cargo bay where the troopers are powering on, eyes lighting up, hoses disconnecting until the droids step out of their alcoves ready for action.
* The Mandalorian: A Mandalorian is a person associated with the planet Mandalore; though often referred to as this, the titular character's actual name is Din Djarin. Similar with Grogu, officially "the Child" before his name was revealed, who was often colloquially referred to as "Baby Yoda" in the media, which was a bit weird because Yoda was the name of another individual of the same species, not the species itself. This would be like referring to any human infant as a "Baby Luke".
* The Mandalorian, and aired one day after the death of Boba Fett's original actor, Jeremy Bulloch. A few weeks after the release, Lucasfilm added a dedication to Bulloch to the end credits.
* The Mandalorian and deserted the New Republic when her duties shifted from destroying the Empire to peacetime missions such as bodyguarding dignitaries.
* The Mandalorian and engage in hand-to-hand combat which ends with them pointing their blasters at each other, only to hear a loud slurping sound. They both look over and see the Child calmly watching them while holding a small bowl.
* The Mandalorian and significant trouble slowing to land on Trask. He finally manages to stop above the pad... only for the thruster on one side to fail entirely and flip the ship into the ocean.
* The Mandalorian, and Trapper Wolf. Cara Dune as also in interesting zig-zag, as it's short for "Carasynthia."
* The Mandalorian (Arguable: all episodes so far have been between 35 and 38 minutes making it either a short hour-long or a long half-hour)
* The Mandalorian) as they try to gather the resources needed to retake control of the galaxy.
* The Mandalorian, but he's actually polite and friendly around people who aren't unsavory. His aloofness comes from social awkwardness and shyness more than anything else, and he only leaves because he has other commitments (i.e., the Child) to take care of.
* The Mandalorian, but Lucasfilm didn't want it to leak out; they filmed the scene with a "Jedi Stunt Double" and replaced his face and voice in post-production.
* The Mandalorian by Imperial troops, it turns out the helmets have been gathered up by the Armorer from the dead Mandalorians, so they can be melted down and reforged.
* The Mandalorian by making him almost come off as the intergalactic equivalent of an amoral Confederate soldier.
* The Mandalorian Chapter 15 requires Mayfeld to improvise an alias for Din when the latter becomes too nervous to answer Valin Hess' request for his name:
* The Mandalorian). Constructed by the first Mandalorian to join the Jedi Order, wielding it makes someone the rightful ruler of Madalore, as long as the wielder acquired it by killing the previous holder.
* The Mandalorian continued to receive this treatment in sets inspired by Season 2, even though Seasons 1 and 2 each have at least one chapter exposing his face to the viewers; one of these even inspired a set from the August 2021 wave.

* The Mandalorian, crashes his TIE fighter in the Season 1 finale and is assumed dead by the protagonists, but we the audience see that he survived and the second season makes no secret of this when we're shown a live transmission from him to another ex-Imperial officer. The fourth episode of Season 2, "The Siege", has the protagonists find a hologram record that was sent to Gideon and they assume it's long outdated before learning that it's only three days old, revealing to them that Gideon is still alive.
* The Mandalorian Din Djarin, is given a beskar spear by former Jedi Ahsoka Tano. He uses it to defeat a Dark Trooper and the evil Moff Gideon, while the latter is wielding the Darksaber.
* The Mandalorian, Din Djarin removes his helmet, which is against his religion, to allow an Imperial computer to scan him so that he can discover the location of the ship where Moff Gideon is holding Grogu. He's obviously deeply disturbed by it, and circumstances don't allow him to put it back on right away.
* The Mandalorian directs the Season 1 finale in addition to voicing IG-11.
* The Mandalorian during the shootout where the Mandalorian repeatedly tells him not to detonate himself.
* The Mandalorian episode "Sanctuary" when a mother and her child hide under an upturned wicker basket floating in the water. Fortunately the villains are too busy plundering the village to pay close attention to it.
* The Mandalorian) for safe passage and they let him pass once he's paid a toll, presumably because Mando tells them he's not intending to stay long.
* The Mandalorian happy given that the villagers neglected to inform him the raiders had such firepower at their disposal.
* The Mandalorian has a 12 in France (in the US its TV-14 and M in Australia), and most TV-MA content on Netflix/Hulu assign it to 15/18 in European countries, depending on the content.
* The Mandalorian has a refresher (and the foot rest for said toilet seems to be one of the few things that survived its destruction)
* The Mandalorian has his ship loose all power for a few moments at the beginning of an episode. The gravity generators keep working until he can restart the engines.
* The Mandalorian has Peli Motto playing sabacc against Dr. Mandible, a large insectoid. Peli wins with an Idiot's Array.
* The Mandalorian. Her issue wasn't with the Rebellion itself, but with the post-war duties such as peacekeeping and body guarding politicians. She did not take the transition well and took an "early retirement" (implied desertion), given that she fully expected a bounty on her head.
* The Mandalorian: IG-11 self-destructs, taking out the nearby Stormtroopers to help Mando and The Child escape by doing so.
* The Mandalorian in a forest at night, with much of the action shown only by blaster fire and the light of Ahsoka's lightsabers.
* The Mandalorian. In clear reference to this trope, he activates it by biting down hard, presumably on a microswitch installed in a tooth.
* The Mandalorian: In the first episode a captured bounty sneaking around the title character's ship finds a rack of carbonite slabs with impressions of terrified people in them, then finds himself joining them. Makes you wonder what exactly Mando had meant earlier when he said "I can bring you in warm, or I can bring you in cold."
* The Mandalorian. In "The Marshall", the Tuskens demonstrate to Mando and Cobb Vanth how they've been placating the Krayt Dragon by periodically sacrificing a Bantha to it. A Tusken Raider leashes a Bantha in front of the cave, shouts at the dragon to wake it up, then makes a run for it. The dragon comes out of the cave... and eats the Tusken, leaving the Bantha perfectly fine.
* The Mandalorian: In "The Tragedy", the Mandalorian is confronted by a mysterious stranger and discovers that Fennec Shand, who he thought had been killed back in "The Gunslinger", is working with him. She drops the line.
* The Mandalorian, in which the title character wears armor made of a special alloy that doesn't even lose its shine despite taking quite a bit of punishment. It

doesn't make him immune to physics, however; anything (or anyone) with sufficient strength to knock him around is still a credible threat.
* The Mandalorian is a member of the Bounty Hunter's Guild but the various members all view each other as competition rather than allies. One group tries to kill him to steal a bounty and the hunters show no qualms about turning on him once he
* The Mandalorian is a normal human Imperial officer with no alien traits whatsoever. And yet, his empty bug eyes and unnerving smile along with his sociopathic tendencies and phony nice guy attitude make for a character who's bound to make your skin crawl.
* The Mandalorian is the story of a Mandalorian Bounty Hunter in the post-Empire chaos on the Outer Rim worlds in the Star Wars universe.
* The Mandalorian is willing to take half the value of the commissions in another currency just so he won't have to take the credits. When he's hired for a job by a surviving cell of the Empire, they pay him with pure metal ingots instead of credits, implicitly because any money they do have is worthless now. Also keep in mind the metal, Beskar, holds special significance to Mandalorians (They craft their armour from it) so it was especially likely to get one to work for them.
* The Mandalorian: Krayt dragons can spit gouts of greenish acid that dissolve living flesh on contact.
* The Mandalorian Mando himself is such an awesome protagonist only a handful of characters can effectively steal limelight from him (three of whom are Jedi).
* The Mandalorian mode. Although Burg is the least intelligent of the rogues Mando fights in the episode, he still puts up the best fight thanks to his strength and toughness.
* The Mandalorian Moff Gideon. He's no Sith or any practitioner of the dark side, but he is every bit as theatric as one.
* The Mandalorian, much to the dismay of the Mandalorian who has to keep telling the kid to stop doing that while they're flying as it causes the entire ship to shake.
* The Mandalorian on rocket packs charging in guns blazing to cover their comrade's retreat.
* The Mandalorian opens with two Scout Troopers hanging out and killing time with one of these. They talk about Moff Gideon's tendency to murder his own men as if it were an annoying coworker's weird quirk, and express their fascination and exasperation with The Child while having to watch him.
* The Mandalorian references "a mind flayer", but there it appears to be some sort of torture device or specialist. (Presumably, it's unrelated to the Quarren, who resemble illithids.)
* The Mandalorians are very much still around, and are cobelligerents with the Sith Empire against the Republic under Artus Lok, Mandalore the Vindicated—who can adopt the
* The Mandalorian's biological father sports a mustache and some stubble in Mando's recurring flashbacks of his parents rushing him to safety during a Separatist Droid raid.
* The Mandalorian's CV, over a month before the season premiere dropped.
* The Mandalorian's Death Watch and which the mainstream Mandalorian culture (represented by returning Mandalorian characters) considers an extremist cult.
* The Mandalorian Season 1 already knew how Din looks without his helmet, these bundles helped some fans correctly guess that by the end of Season 2, the Child would know as well.
* The Mandalorian shot with either Wayne or Crowder instead of Pascal, he'd ask the double for Mando's thoughts and emotions while preparing for the dubbing session.
* The Mandalorian since they had professional-quality Stormtrooper costumes readily available and the series' budget was pushing its limit. The group received a "Special Thanks" card, which also displays their logo, during the end credits of the episodes they appeared in.
* The Mandalorian still has something he needs, thus he is forced to go along with this sudden change of plans.
* The Mandalorians under the 'New Mandalorian' government of Duchess Satine.

Mandalore remained neutral in the Clone Wars and maintains a peaceful society under her rule. But it all starts going under fast when Death Watch and
* The Mandalorian: The armorer forges new armor for the title character with the beskar he earned hunting bounties, with the forging inter-cut with flashes to the Mandalorian's childhood.
* The Mandalorian: The first season finale ends with a shot revealing to the audience that Moff Gideon survived the crash of his TIE fighter. The titular Mandalorian and his don't learn that Gideon is still alive until the fourth episode of season two when they find a newly recorded message that was sent to him.
* The Mandalorian, the go-to expletive is "Dank ferrik". Djarin uses it from time to time, and so does one of Bo-Katan's Nite Owls.
* The Mandalorian, the Mandalorian tribes and clans come across like modern Judaism, with a diaspora of different sects with various levels of orthodoxy.
* The Mandalorian: The title character has a flamethrower (which doesn't do much good) in one gauntlet and the other launches needle-sized homing missiles of Mandalorian design called "whistling birds".
* The Mandalorian. The title character's rifle is powerful enough to disintegrate a person (it's not like Vader is around to tell him otherwise), but as it's a single shot weapon he only uses it for sniping, preferring his hand blaster for close-up work against multiple enemies.
* The Mandalorian, the titular character is betrayed by his comrades while on a prison ship. He proceeds to escape from the prison cell they locked him in, sabotaging the cameras and doors to herd his traitorous team like rats in a maze and stalk them before coming after them one by one.
* The Mandalorian, the titular character is tempted to stay on the peaceful planet Sorgan. However, he is aware that word about him helping the villagers will spread and attract unwanted attention. His initial plan is to leave the child with Omera to grow up happy and safe; but a bounty hunter after the child shows that the child won't be safe on Sorgan as long as there is a bounty on him, forcing both the Mandalorian and the child to leave.
* The Mandalorian, the Tuskens swear that they will keep the peace with the Pelgans forever, unless the Pelgans break the peace first.
* The Mandalorian (to Mando's annoyance) has received numerous fan edits to make it look like they're fighting over the radio.
* The Mandalorian TV show, to the extent that season one received an Emmy nomination for Outstanding Drama Series, in addition to 14 mostly-technical categories.
* The Mandalorian were meant to be surprises are shown with little fanfare throughout the game's artwork.
* The Mandalorian, when Storm Troopers attempt to interrogate the Mandalorian Armorer on Nevarro in her forge, she puts such a ferocious beatdown on the Troopers with her forging hammer that the helmets of two of them visibly shatter when she lands her swift and heavy blows on them.
* The Mandalorian while hunting down Mayfeld, an assosciate who tried to leave the Mando trapped in a New Republic prison cell. For added creepiness the lights change from bright white to red with each flicker.
* The Mandalorian, while the Mandalorian is off having his own adventures, Greef Karga and Cara Dune buckle down and clean up Nevarro, turning it from a wretched hive of scum and villainy into a much more respectable town. One scene in particular shows that the seedy bar Greef operated out of in season 1 has been refurbished and converted into a schoolhouse.
* The Mandalorian who goes to work in cosplay all too easy and appealing, so that's the sort of portrayals he gets.
* The Mandalorian), who, unlike Pascal, can show their faces in every episode.
* The Mandalorian will continue to involve these plotlines or was just setting up other, less stealthy sequel series.
* The Mandarin (a character usually associated with the region in China) in
* The Mandarin is often considered a controversial character in a modern context, as he was a

* The Mandarin's son Temugin is the Mandarin minus everything except the martial arts skills and superiority complex.
* them, and as a corollary, Eren's mother took Mikasa into the Yeager family.
* The Mandate as the Osmani faction had the unfortunate luck of having their colony ship land are a very hazardous world. This forced them to become cyborgs in order to survive.
* The Mandate has this option for character skills and a primary combat mechanic.
* The Mandate. If a gate malfunctions and you end up somewhere without a gate to use for a return trip, you are essentially screwed.
* The Mandate to serve as a slower than FTL means of colonizing the galaxy.
* The mandatory uniform for said captured friend is a white dress, no less. The new enemies are introduced through a
* them, and culminating in them trashing Sully's car. This would make Sully far less likely to let them go during the events of the final mission/movie, and far more likely to immediately start a fight. The only real difference between the two versions of the scene is that in the game, Mercy reminds Sully that they wrecked his car (like he'd forget).
* The Mandela effect. Peaked at Stage 4 during 2016-2017, then became stuck at Stage 6c.
* The Mandelbrot Set is a two-dimensional slice of a four-dimensional object that represents the eventual fate of iterating the map z → z + c, where z and c are complex numbers (two dimensions each). Start with z=0 and try different values of c, and you get the usual two-dimensional view of the Mandelbrot set (which is, properly, only the
* the man demanded what happened next. The parrot responded, "I dunno, I got a woody and fell off the perch!"
* The Manderlys and the Peakes of the Reach feuded until the former were defeated and fled to the North, at which point the Peakes were given their abandoned castles. This stemmed from a dispute between 2 historical Lords Manderly and Peake over which of their wives would inherit the throne of the Reach from their father the king, who had no sons. After a war during which the Dornish invaded, sacked the king's castle, and killed the king, a coalition led by the Tyrells ended the dispute by ignoring the feuding lords and crowning a distant cousin as king.
* The Manderlys are one of the main Northern Houses, but were originally a Reach House that was driven out centuries ago, they were allowed to settle in the North by its rulers the Starks, in exchange for swearing an oath of loyalty to the Starks. As a result the Manderlys, though still retaining Southron culture such as worship of the Seven in an area that mainly worships the Old Gods, are fiercely loyal to the Starks and North. Their current lord Wyman Manderly
* "The Mandrill"/Jerome Beechman has mutant sex pheromones that turn him into a
* The man eating giant Mbuandong had a huge tangled beard which smelled like rotting flesh. He used this beard to ensnare travelers foolish enough to wander near his cave.
* The Mane Attraction", Pinkie Pie carries a drinking straw she named "Fernando".
* The maned wolf is an animal found in South America that looks like a dog with the coloration of a fox and the legs of a deer, as they are disproportionately long for a canine species. The sound it makes it is called a roar-bark because it sounds like a cross between a roar and a bark. Their favorite food is a fruit similar to a tomato. And their urine smells like cannabis. So yeah, they are very strange.
* The Manehattanverse, Twilight was sent to Manehattan instead of Ponyville; a lot of the events that occured there still happened, but were resolved in different manners by the remaining members of the Mane Six offscreen.
* The Mane-iac, who is essentially a pony version of the Joker. Pretty much every single line is either just her laughing or punctuated by her laughing. When she gets tangled up in her mane, it makes it appear as if she's in a straitjacket.
* The Mane Six all get a wave of them after Twilight's old Friendship Journal is published in
* The Mane Six end up in a massive one when fighting the changeling horde in the second half of the season two finale "

* the Mane Six is forced to give up the Elements of Harmony to stop Everfree Forest from growing out of control. On the plus side, doing so revealed a special chest that may.
* The Mane Six later find themselves in a world with giant ponies who are partnered with tiny ponies (tiny even by the Mane Six's size) in a symbiotic relationship.
* The Mane Six's strong philia bond drives the entirety of the series, and the
* The mane theme and idea of the story is interuniversal exploration and contact, so first contact with alternate universes is a frequent occurrence. Twilight has a detailed list of how they're supposed to do it, but
* The man-faced stink bug has markings on its back that coincidentally resemble a human face, similar to Heike's crabs. It's been likened to a grumpy uncle.
* "The Man from Alphabet", a spoof of detective shows. It failed in testing due to the lesson never getting across to the kids.
* The Man from Barbarossa are Russian army officials who plan to overthrow their current government, and start a global war.
* The Man from Barbarossa book, to be his best in the series. Critics and some of the readers hold it as one of his weakest and think of his earlier stories in higher regard.
* The Man from Button Willow cartoon, save for the main character Justin Eagle who looks more realistic because he was rotoscoped.
* The Man from Colorado: After Del returns to town and discovers that Owne has hanged Johnny Howard in his absence, Del storms up to the judge, punches him in the face, then pulls of his marshal badge and throws it on the ground at the judge's feet.
* The Man from Colorado and descent into paranoia convinces him that Del is still interested in his wife Caroline. In fact, Del had stepped away and refused to associate with Caroline after she made her choice and married Owen. When Owen baits a trap for Del by spreading a rumor that he has locked Caroline up and is refusing to allow her to leave the house, Del immediately believes it.
* The Man from Colorado, Del finds the white flag the Confederates were waving at the site of the massacre and buries it so no one will know that Owen chose to ignore their surrender.
* The Man from Colorado, Del survives, but his wound does hinder him during the final confrontation.
* The Man from Colorado.) It is best demonstrated by his arresting Sgt. Jericho Howard for dereliction of duty for drinking instead of being on sentry duty...one the day the war ended!
* The Man from Colorado, Jericho Howard and Mutton McGguire desert a few days before they were due to be discharged, and turn to banditry.
* The Man from Colorado, many of the miners continue to wear parts of their Union uniforms as day-to-day wear after their discharge.
* The Man from Colorado: Upon being appointed judge, Owen becomes one because his insanity means he cannot pass up the opportunity to kill someone.
* The Man from Earth: After the discussion of John's immortality turns to religion, a religious plot tumor ensues. Characters stops asking about his experiences as a 14,000 year old being and the discussion swerves to an argument about religion and mythology.
* The Man from Earth fathered many children during his looooong life, but since he is forced to leave his families after a few years, nothing is known about their immortality, apart from one, and he is most certainly mortal.
* The Man from Earth features an immortal as the main character, revolves around a discussion of his life with his mortal friends, and details the many joys and woes of his long life - including his pursuit of education and his doomed relationships.
* The Man from Earth. He survived the crucifixion using meditation techniques he had learned in India, but his disciples didn't believe him when he tried to explain it. He remarks on how his teachings were distorted over the centuries; even the name Jesus was a byproduct of several consecutive retranslations.
* The Man from Earth. Instead of taking all the life from any one person though,

they suggest he takes ambient life force from everybody around him. Unknown if this is true though.
* The Man from Earth, John has lived for 14,000 years. He has long since learned to keep moving and adapting to the changing cultures, keeping his lifespan a secret, but he carries memories that stretch back before human civilization
* The Man from Earth makes the best of eternity, gathering huge amounts of knowledge over the centuries.
* The Man from Earth — John only remembers "the ups and downs" and not all that much more outside of general details.
* The Man from Earth takes place in real time, except for the final shots. And almost completely in one room.
* The Man from Earth: The protagonist mentions how it was easy to move around as a hunter-gatherer, harder when villages arose, even more so among city-states with central authority. He even spent a year in jail for forging government papers.
* The Man from Earth: While the movie has one possibly supernatural element on which the whole story is based, the way it explains the myth of Jesus is quite realistic. John's immortality is given a highly speculative natural explanation. The characters themselves discuss whether it would be scientifically plausible for a man to stop ageing and live indefinitely. They conclude that it's theoretically possible, if highly unlikely.
* The Man from Kangaroo contains an extended sequence where his character demonstrates a variety of dives and swimming techniques for a group of admiring boys. This has absolutely no bearing on the plot whatsoever.
* The Man from Kangaroo contains a scene where John Harland chases after a mugger, and the two of them hurdle fences, climb up sheer walls, climb up lampposts and pipes, drop off a bridge, etc.
* The Man from Kangaroo, Greythorn, Mike and the stockmen from Greythorn's station arrive in time to save John and Muriel from Braggan and his gang. It is Mike who fires the shot that kills Braggan as he is about to shoot John.
* The Man from Kangaroo, John and Muriel leap from the stage coach as it thunders across Hampden Bridge into the Kangaroo River.
* The Man from Kangaroo Marti Giles wants to marry his charge Muriel is so she cannot testify against him for embezzling from her family fortune. Note that this would have been true at the time the movie was made.
* The Man from Kangaroo. When Muriel comes across her suitor John's clothes hanging out to dry while he goes swimming, she doesn't steal them, but instead ties them into knots as a prank.
* The Man from Laramie bursts into flame after falling 30-40 feet off a cliff. OK, fine, the wagon was carrying a shipment of rifles, but rifles won't burst into flame when you drop them either.
* The Man from Mukinupin by Dorothy Hewett, the script specifies that the half-Aboriginal Lily is played by the same actress as her full-white sister, which in practice generally means they're both played by a full-white actress. Done deliberately by Hewett as part of making a point about the erasure of Aboriginal people from Australia's history.
* The Man from Nowhere are Triad gangsters operating in South Korea that engage in organ harvesting. When they kidnap a girl named So-Mi, the little neighbor of protagonist Cha Tae-Sik, to have her eyes harvested, things quickly turn out bad for them.
* The Man from Nowhere features a three-point landing onto the hood of a fleeing car.
* The Man from Nowhere: Man-seok and Jong-seok are two brothers who run a drug-and-irgan trafficking ring.
* The Man From Planet X an astronomer says, "The only difference between water and space is a matter of density."
* The Man from St. Petersburg, the bad guy, a Russian anarchist, is carrying a nitroglycerine bomb. Cornered by the authorities he chucks the bomb into the air and runs for it. The good guy dives and catches the device before it hits the ground, thus saving everyone's life.

* "The Man from the Train" two-parter involved a series of brutal axe murders likely committed by a man named Paul Mueller, the titular serial killer.
* The Man from U.N.C.L.E. (2015), after Solo is thrown from a speeding boat piloted by his partner, he swims to shore and enters a nearby truck. In the truck, he turns on the radio, finds a towel to dry off with, and then discovers a picnic basket underneath. So while Kuryakin continues speeding around, having an action-packed boat chase, Solo enjoys a glass of chianti and a nice sandwich.
* The Man from U.N.C.L.E. (2015) and uses those skills to take on both Solo and Kuryakin at the same time.
* The Man from U.N.C.L.E. (2015) - As a Reconstruction of 60s spy-fi, it presents the Cold War, CIA-KGB conflict as very Stale Beer, but the agents tasked with the biggest cases are Martini flavored. Think of a bar where everyone orders beer, and one patron comes in and gets a perfect martini.
* The Man from U.N.C.L.E. (2015)-esque spy skills, for instance he falls out of a speedboat and crashes an ATV without suffering any significant injuries, while KGB agent Illya Kuryakin is able to chase down a car on foot and rip off the trunk door, dodge bullets while sitting down, throw a motorcycle and knock a man unconscious by slapping him on the side of the head.
* The Man from U.N.C.L.E. (2015), Illya Kuryakin is shown being debriefed on Napoleon Solo by his handlers. When the slide with Solo's mugshot comes up, it's accidentally been put in upside down. The projectionist sheepishly apologizes, fixes the slide, and they continue.
* The Man from U.N.C.L.E. (2015) is a Chic businesswoman and art collector, as well as a psychotic, nuclear-weapon -toting nazi.
* The Man from U.N.C.L.E. (2015). Solo wins, as shown when Kuryakin reaches this trope and storms off.
* The Man from U.N.C.L.E. (2015). To escape the mooks charging towards them, Kuryakin jumps out of a three-story window, expecting to land in the water. Solo only hears a thud and a scream. He then does the same a few seconds later...and finds too late that the window was right above a wooden boat dock.
* The Man from U.N.C.L.E. (2015) when Napoleon asked how Victoria knew which liquor he'd drink (because he discovered she drugged it), Victoria blithely said she didn't, so she drugged them all.
* The Man from U.N.C.L.E.. A variation in "The Mad Mad Tea Party Affair" - our heroes suspect a Thrush mole has planted a bomb in a conference room, but can't find it. So they gather all the suspects in that room and wait to see who panics first.
* The Man from U.N.C.L.E. episode had two brothers, feuding THRUSH middle managers, concealing both the feud and the nature of their employment from Mama ... until she turned out to be the THRUSH supervisor who showed up to inspect their operation.
* The Man from U.N.C.L.E. episode "The Alexander the Greater Affair, Part 1"; Alexander's staff are the pieces, and he and Napoleon Solo call the shots. Alexander is embarrassed when Napoleon checkmates him.
* The Man from U.N.C.L.E. episode "The Bat Cave Affair" has Count Zark, who plans to release swarms of genetically modified bats so that their enhanced echolocation can throw off airport radar and make global travel impossible.
* The Man from U.N.C.L.E. episode "The Concrete Overcoat Affair, Part I", Napoleon Solo, thinking he is being pursued by THRUSH minions, hides underneath Pia Monteri's bed. After he is discovered under the bed, Grandmomma Monteri comes into the bedroom with a shotgun, and tells Pia to go to the closet and get Grandmomma's old wedding dress, and tells Solo that she's sending for the parish priest.
* The Man from U.N.C.L.E. episode "The Five Daughters Affair, Part II": THRUSH operative Randolph, having gotten Dr. Simon True's seawater-to-gold extraction formula away from U.N.C.L.E., is gloating before Solo and Kuryakin.
* The Man from U.N.C.L.E. episode "The Four-Steps Affair" where Solo and Kuryakin are tasked to prevent THRUSH from kidnapping the 10 year old leader of an Asian country. The boy, far from being spoiled, is at least as (if not more) mature and worldly wise than his caretakers:
* The Man from U.N.C.L.E. episode "The Foxes and Hounds Affair'', Napoleon and

Illya are injected with truth serum to make them reveal the location of a device wanted by THRUSH. Napoleon, who is out of the loop this episode and legitimately doesn't know, just starts acting drunk; but Illya is compelled to give up the information after minimal resistance.
* The Man from U.N.C.L.E. episode "The Gazebo in the Maze Affair", the villain's wife, Edith Partridge, initially appears to be a sweet, if not-entirely-there, old lady who is oblivious to her husband's evil. It soon becomes apparent that she's pulling many of the strings, and she tortures the heroes — and gives her husband instructions on how to torture them "properly" — without ever changing her sweet manner.
* The Man from U.N.C.L.E. fanon (THRUSH being formed by the remnants of Moriarty's organisation, Solo being Waverly's designated successor, "the Technological Hierarchy for the Removal of Undesirables and Subjugation of Humanity", the Ultimate Computer, etc.) derives from David McDaniel's entries in the Ace Books series of UNCLE novels.
* The Man from U.N.C.L.E. filming had started, so references to the "FBR" and "CEA" are obviously dubbed in.
* The Man from U.N.C.L.E. for years due, among other reasons, to these factors:
* The Man from U.N.C.L.E. had in one episode a pistol which fired backwards AND forwards, so that the assassin would take out her target and at the same time inadvertently silence herself for good.
* The Man from U.N.C.L.E. had one favorite clip of stock footage (a clip of a large WWII era bomber, possibly being used after the war as a target drone, being hit by an antiaircraft missile). Whenever the series required an aircraft to be shot down—whether it be a single engined private plane or a multiengined jet aircraft, whether it was shot down by a lucky rifle shot, antiaircraft artillery, or a missile—they would splice in this clip for the inevitable "airplane explodes in midair" scene.
* The Man From U.N.C.L.E. has described been described as "James Bond on television" by its lead actor, Robert Vaughn.
* The Man from U.N.C.L.E. holds a girl hostage throughout the episode. At the end, mortally wounded, he tells her he loves her. Weeping the girl asks Napoleon if he thinks he meant it. Honey, when a man expires at your feet and uses his last strength to declare his love to you it is safe to assume he is sincere!
* The Man from U.N.C.L.E., Illya fakes taking one of these as part of an elaborate scam aimed at an enemy diplomat.
* The Man from U.N.C.L.E., Illya Kuryakin is injected with a serum that causes him to remain fully conscious, but lose muscle control and the ability to speak or write. The villains are able to kidnap him in plain view by explaining his struggles to concerned passers-by as the result of a congenital brain defect.
* The Man from U.N.C.L.E. Illya Kuryakin was so strong that they became attached at the hip halfway through season one and stayed that way.
* The Man from U.N.C.L.E.. In one issue, "The Pixilated Puzzle Affair", Napoleon Solo and Ilya Kuryakin were held captive on an island prison colony where all the prisoners had explosive pedometer-like devices attached to their ankles. Each prisoner was permitted a specific number of strides per day; if any prisoner tried to walk or run beyond the permitted distance, his device exploded.
* The Man from U.N.C.L.E., is one of the most sampled pieces of music in hip-hop to date.
* The Man from U.N.C.L.E., Jet and her international teammates Marlene, Petite, Cookie and (sigh) Ting-a-Ling were Hollywood Stunt-Girls who also moonlighted as a crack team of all-girl aviators, spies, and commandos.
* The Man from U.N.C.L.E. lives and dies on its Cold War setting and the oddity of a spy organization employing both American and Soviet agents. Notably, the 2015 film version didn't even try to translate the premise into the present day and is simply set in the '60s.
* The Man from U.N.C.L.E. — Martini, mixed with Bathtub Gin in that civilians often get mixed up in the heroes' adventures.
* The Man from U.N.C.L.E., Napoleon Solo apparently has an ongoing flirtation with

Angelique, an agent of THRUSH.
* The Man from U.N.C.L.E.: Napoleon was in the Army helping track down art stolen by the Nazis, and took to thieving himself. He was eventually caught, but the CIA decided his skill-set was too useful to be locked up and made an agreement with him to work for them.
* The Man from U.N.C.L.E., one of the innocents involved in the Affair was concerned that Solo was killing so many enemy agents, he explained that they used "sleep darts" in their guns.
* The Man from U.N.C.L.E. perfected this format, releasing all of its two-part episodes (with some new footage) as theatrical features (usually overseas first, because the show was not being aired in foreign markets yet — or if it was, not usually in colour). The films released were:
* The Man from U.N.C.L.E. reunion movie "The Fifteen Years Later Affair":
* The Man from U.N.C.L.E.. She was played in both episodes by Jill Ireland, who was at the time of filming married to McCallum.
* The Man from U.N.C.L.E., Solo and Kuryakin got to drive an "U.N.C.L.E. car", which was a concept car developed from the Bertone Pirana.
* The Man from U.N.C.L.E. (then-wife of series co-star David McCallum).
* The Man from U.N.C.L.E.. The show also blurred the image before the fadeout at the end of every act.
* The Man from U.N.C.L.E. ("The Suburbia Affair") centered around a plot like this— the electric lights in a suburban neighborhood vibrated on a frequency that caused the people living there, including our undercover heroes, to become irritable, suffer headaches, and fight amongst themselves. A mob scene was narrowly averted at the town meeting.
* The Man from U.N.C.L.E.. THRUSH hides large amounts of a lethal drug in coffins buried in a cemetery.
* The Man from U.N.C.L.E. to series regular to second billing (behind series lead Robert Vaughn) in the first season alone. By the second season, McCallum shared equal billing with Vaughn.
* The Man from U.N.C.L.E. toys that included the triangular I.D. badge from the TV series. These badges were recycled into Captain Action badges a couple of years later after the show went off the air by covering the UNCLE logo with a sticky paper label.
* The Man from U.N.C.L.E. U.N.C.L.E. is more of a multi-national, supra-governmental agency than an agency of one government, though (U.N.C.L.E. operatives are drawn from many of the nations of the world, even the (then) Soviet Bloc as well as the Free World, and it seems assumed without explicitly stating that U.N.C.L.E. is funded by various national governments and operates with their blessing and cooperation).
* The Man from U.N.C.L.E. when it's Illya's turn to keep vigil over Napoleon in Medical. He apparently does so all night.
* The Man from U.N.C.L.E.. When Napoleon snaps him out of the resulting catatonic state hours later, he immediately starts talking into the radio.
* The Man from U.N.C.L.E.. When our heroes do this to a pretty girl who accidentally stumbles into UNCLE headquarters in "The Mad Mad Tea Party Affair", Kuryakin complains that he's been typecast as the bad guy, while Solo gets to be the sympathetic shoulder for her to cry on.
* The Man from U.N.C.L.E., which regularly used scene-setting "Somewhere In (Insert Place Here)" captions.
* The Man From Utopia has an entire song about clichés in science fiction B-movies, among which are broken radios. The title of the song? "The Radio Is Broken".
* The manga actually points this out, noting that Gaou refuses to break the rules and hit Kid even when he was close enough when Kid released to be justified in hitting him. They acknowledge that it's not like he can't control himself, it's that he doesn't
* The manga adaptation of Galaxy Angel (which adapts the game universe, not the wacky anime universe) justified this by having Elsior a ceremonial ship armed with

nothing except fireworks. The only offensive complement it had was the Emblem Frames.
* The manga also featured a mirror spirit who, upon taking Ranma's female form, immediately barges out of the house in a tiny cocktail dress, ready to get it on with the next attractive guy she can find.
* The manga also has a story where Rushuna participates in a swimming competition, with her opponent sabotaging her by giving her a water-soluble bikini. She defies this trope with a little quick thinking, tying her
* The manga and anime both have France occasionally shifting to a 1970s shojo look. While in the comic itself, America was once shown in New York-style doodles. And that's not counting the chibis...
* The manga and, more frequently, the anime, plays down this trope sometimes, leaving Ranma frustrated enough with Akane to try and leave her to her own devices against the current threat until his worry eventually makes him eat his words and come back to save her.
* the manga and the SD spinoff tend to exaggerate Hinata's character into an obsessive stalker.
* The manga averts this and has Olette attempt to chase Axel with a bat full of nails after Hayner and Pence get their hair set on fire. The Dark Corridor knocks her back instead.
* the manga between her and Edward. She is canonically in love with Ed, with Ed's feelings being unspecified.
* The Manga Bible actually succeeds in making it even MORE hammy. Not one character there can say anything without posing dramatically and bellowing his dialogue like he's at an amateur dramatics convention.
* the manga, but he never gets the opportunity to make the rant there.
* the manga, Commander of the Drachman army after the annihilation of his forces. Kimblee even lampshades it in a disturbing way.
* The manga condenses the number of Angels from 17 to 12, removing Iruel, Matariel, Sandalphon, and Leliel entirely and having Gaghiel be defeated almost effortlessly by Asuka before she's even met anyone else at NERV.
* The manga drops a bunch of hints that Ed and Al's father Van Hohenheim and the
* The manga ending also may support that theory (at least in that continuity), showing
* The manga even has a filler chapter where Keitaro is so engrossed in studying he winds up doing several 'cool' things in front of the girls while studying (dodging attacks, defending them from turtles, and of course not 'peeping'). This spurs the girls into actually wanting to impress him to gain his affection, something which wouldn't be repeated until many, many chapters later. He studies so hard though, that he doesn't seem to notice and by the end of that chapter, pretty much everyone in Hinata Sou (yes, even Naru) is all like
* The manga even hints that the younger the person, the more life energy he/she has, and the more powerful Zearth becomes.
* The manga eventually dropped "Magical Girl" from the title, since Nanoha is now 25 and either still a Captain of an Interdimensional Air Force or higher. She's still Magical, but is a woman, not a girl.
* The manga explicitly states in a footnote that some people don't have cyberbrains because they're vulnerable to hacking, but replace their hands with cybernetics so they can compete with those who have them.
* The manga features a fourth grade teacher giving his student an engagement ring — and portraying the relationship as wholesome and innocent. It was
* the manga for the Elric family portrait, suggesting that Mei is now part of the family.
* The manga gives her some good moments, though. Specifically, in the first volume of the
* the manga gives Lupin's rival the name of "Heitaro Zenigata", while the anime always calls him "Koichi Zenigata."
* The manga goes on for hundreds of chapters and only near the end is it learned that the tailed beasts actually have names. The shinobi typically consider them to

be nothing more than mindless monsters or weapons, so they never thought to inquire about their names, which has led to a lot of deeply-held anger on the beast's part that none of the ninja ever bothered to ask them.
* The manga had a more serious interpretation of Easter Island, where the Moai were there to seal away evil spirits (read: ancient alien invaders).
* The manga had numerous one-shot Chibiusa stories that ran in a separate magazine.
* The manga has a particularly hard time of this, due to suffering from an extreme case of
* The manga has Tsukune kidnapped by a shapeshifter, who copies his form and goes out to fight Tsukune's
* The Manga implies, but does not state outright, that the Major became a full-body replacement cyborg unexpectedly at a relatively young age, perhaps due to an accident.
* The manga is even more clear on their relationship. It is much clearer that Vash has some sort of feelings for Meryl all throughout the series, and especially as they kiss their knuckles and press them together (a kiss without touching lips) before Vash fights Knives. Then again when Vash makes his first ever promise to return to Meryl, and asks her to wait for him before he leaves to finish with Knives. Unfortunately the ending is left hanging with no further hints of romance but a
* The manga itself though, goes through some of this in its final arc, being about
* The mangaka, being well aware of his popularity, drew several pieces of official art in which Roy wears tuxedos. Edward Elric, Alphonse Elric, and Maes Hughes are also seen in a number of said art pieces dressed to the nines, as well as the members of Roy's military unit.
* the mangaka stated that either Kagami or Konata herself have a genuine crush on the other. As for whom it is though...
* The manga "Kono S wo Miyo" has a few examples. The protagonist gets a stigma on his buttocks that, if seen by a grown female, will fall deeply in love with him. It is mostly accidental, but he does use this method a few times.
* The manga makes it very plain that diclonius have a built in urge to kill normal humans. Nana, the only one that consistently resists this, is actually called a "traitor" by another diclonius precisely for this reason.
* the manga might be surprised to find that the manga is, for the most part, fairly fast-paced and frantic. The anime also colours Goku as a more intentionally heroic character than in the manga, where he's more focused on a good fight and only steps in if someone has been cruel to those he cares about.
* The manga often has little mini-arcs contained within each chapter's title page) dedicated to characters the Straw Hats encountered (usually the villains) showing
* The manga on the other hand, while not perfect, is much better at keeping the clues and the mood. It also had several clues not present in the novels.
* The manga presents Do-chan (for dogi, a martial arts uniform, plus an affectionate suffix.) It is an ancient, sentient (and utterly perverted) suit of armor that looks like a puffy Chinese blouse, black leggings, and a yin-yang belt. It can move around independently, has limited senses (sight, hearing, and touch, at least), and can fight to defend itself. It will only accept a female owner, but those who wear it will find that their speed, power, and agility have been increased to match their own ultimate potential. Thus, when Akane wears it, she can punch enormous craters into asphalt,
* The "manga sequences" in episodes 1 and 6, during which the standard animation style is replaced by pans across (semi-animated, with voice-overs for the dialogue) manga pages. This was incredibly hard to animate, and the second one is brought to an abrupt end by Kamon, who
* The manga series was rated for all ages on its initial Tokyopop printings, but
* The manga takes it even further, since it shows Hanyuu and Shion in omake before they appear, leading people who have never played the sound novels or watched the anime to wonder why Mion's hair is down (you could just think it's a fanservice omake thing, though) and who that girl with the horns is.

* the manga than the anime, who joins the core four of Yugi, Jonouchi, Honda, and Anzu. He notably has this role for most of the manga, while in the anime it only really lasts for the Duelist Kingdom arc. If anything, for the majority of the anime, Kaiba actually somewhat fills the role moreso than anyone else.
* the manga, the Amazoness Quartet send their minions after the other four Sailor Guardians. The first three, who go after Sailor Mercury, Sailor Mars, and Sailor Jupiter, are circus animals turned human, the Amazon Trio. The ones who are sent after Sailor Venus to conclude this arc within the Dream Arc are knife-throwing twins, Xenotime and Zeolite, whose origins are unknown.
* the manga, the Department of City Security has a picnic at a cherry blossom festival that the ACROSS girls are working at as vendors.
* the manga, the Major questions why he uses a revolver, when he should be afraid of it jamming, even if he carries a semi-automatic as backup. On the Major's request, he uses the semi-automatic throughout the manga. For some added irony, a semi-automatic of the same model jams in a later issue... In addition, Togusa is presented as someone with an odd gun choice, using an AS-11 shotgun in addition to his two handguns.
* the manga, this literally happens to Ropponmatsu II; crying caused the little robot girl to spring a leak.
* The manga ultimately subverts the trope, in that the "revived" people are entirely different beings. (Trisha's hair was brown, the body the Elrics created had black hair, etc.) This revelation leads Ed to conclude reviving the dead is impossible and relieves Alphonse and Izumi Curtis, who had been suffering immense grief over killing their loved ones
* The manga uses an art shift to a style evocative of ancient Japanese artwork when describing the
* The manga version also includes Homura among the girls who "ascend" with Madoka, only that she does it a while later.
* The manga version had it even worse. Least in the anime they managed to killed Merged Zamasu's main form. In this version, nope, they cut him in half... and he just makes multiple copies of himself. Meaning there's no way they can even defeat him because he's just too overpowered. It's only due to Goku remembering he had Zen-Oh's button that saves them.
* The manga version is somewhat like what would happen if you're given a few small pieces to a puzzle at a time, only for the person giving you the puzzle realizing they're low on time and dumping the whole box of pieces out at you at the last minute. Thanks to some of the exposition being rushed, some things that are only barely hinted at seem to come out of nowhere (like
* The manga version of the Oniwabanshu fight explicitly invokes this, as Shikijo lets Kenshin and Yahiko continue their rescue of Megumi because he specifically wants to fight Sanosuke.
* The manga version of the same scene, takes place outdoors while Seiji's on his way to school. When he sees he's surrounded by happy couples everywhere, he vents his frustration on
* the manga, when Mamoru gets sick. While he isn't cruel, he still rebuffs her attempts to comfort him and bring him food and medicine, repeatedly driving her away and causing her to feel hurt and lonely. The real reason he keeps doing it is because he knows that there's something unnatural about his disease, and he's afraid that she'll catch it if she goes near him. It turns out that he's right on both counts. The disease is basically caused by an evil power and Usagi does eventually catch it, but doesn't care because she'd rather stay close to him.
* the manga, which plays out much the same way, with the biggest difference being that the Major doesn't get naked in order to use her thermoptics.
* The Mangekyo Sharingan makes the user go blind eventually, while Susano'o causes severe physical harm to anyone without the Eternal Mangekyo Sharingan.
* The mangled "Eastern" Spirituality can be detected in the differing views on
* The Mangler) focused on a demonically-possessed STEAM PRESS and spawned a few films.
* The Mangler, revolves around a demon-possessed steam-press ironing machine. Which

got accidentally possessed because over time the various ingredients needed for the possession ritual have been on the clothes it's washed or have been accidentally dropped in by workers using the machine. Virgin blood? Check. Foxglove? Digitalis pills left in a pocket. And so on and so forth.
* The Mangler throws up on the job for the first time in his fourteen years as a policeman after seeing the remains of one particularly grisly death, where the poor individual had been run through the titular machine and was hardly recognizable as human anymore.
* The Mangler... While watching a washing machine spin their clothes around.
* The Manhattan Guardian, the New York subway system is home to a bizarre underworld in which bands of subway pirates raid stations to kidnap commuters off the platforms as slaves, and their mad captains race each other in search of a 'god machine' somewhere deep under NYC.
* The Manhattan Project and subsequent use of the atomic bomb against Hiroshima and Nagasaki and all that have come in their wake weighed heavily in the minds of those who contributed to it, even as they remained firm that they would do it again if need be:
* The Manhattan Project had a policy to cover contamination with plutonium. Anyone who had plutonium enter their body through a cut or a scratch on a limb would be subjected to immediate high amputation to keep it from entering the rest of their body.
* The Manhattan project hid the names of the elements it was working with under mundane code names: uranium-235 was "magnesium," neptunium was "silver" and plutonium was "copper." When it eventually became necessary to use real copper, the scientists had to refer to it as "honest-to-God-copper."
* The Manhattan Project is accidentally activated, it's initially set for 999 hours. Plenty of time, right? Except that the circuitry has been damaged, and the clock begins speeding up exponentially...
* The Manhattan Project itself was this. Eisenhower himself advised Truman
* The Manhattan Project on you. However, both parts will take damage from your attacks, and after taking enough abuse, they will rejoin.
* The Manhattan Project owes its existence to this: when Leo Szilard and Eugene Wigner escaped to the US to flee from Nazi Germany, they knew that atomic bombs were on the cusp of being invented, and Germany had a good chance of being the ones to do so. They wrote a letter advising the US President (
* The Manhattan Project. Scientists did experiments seeing how close they could get radioactive cores to going critical without
* The Manhattan Project. The radiation from the home-made nuclear weapon causes its own electronic timer to count down with increasing speed. It is finally stopped, reading 7:16:45, which refers to the date, July 16th, 1945, of the first atomic bomb test detonation.
* The Manhattan Project, who has a nuclear bomb at his disposal and isn't afraid to use it to get his way.
* The Manhattans: While they have had considerably more success commercially on the Hot R&B Singles charts, this Jersey City, N.J.-based group has but two major hits on the Hot 100, and both are staples of classic hits/oldies radio: "Kiss and Say Goodbye" (a No. 1 hit from 1976) and "Shining Star," a top 5 hit from the summer of 1980.
* the man himself. However, Hitler knew the loopholes and was able to attain "emergency powers", which eventually led him to become the monstrous dictator we know him as today. After Hindenburg's death in 1934, he combined the powers of President and Chancellor and declared himself Führer of Germany.
* the man himself so great, despite having admittedly subpar (for an elite level player) physical gifts: he could figure out where the puck was heading on the fly, allowing him to be in optimum position for shots on goal (and helping him avoid incoming defenders looking to clobber him).
* The man himself, when brainstorming ideas for a costume, said it had to strike fear into the hearts of criminals, for they "are a superstitious, cowardly lot". This is immediately followed by a bat crashing through Bruce's window, which he

takes as an omen. Who's superstitious, again?
* The manhunt for John Dillinger in 1933-1934 was one of the earliest cases of friction between the FBI and local law enforcement. The FBI was a relatively new and untested agency that wasn't taken seriously by all, local officers disparagingly called the FBI agents "college boys".
* The Maniaks debuted in #68 (May, 1967). They also headlined issues #69 (July, 1967) and #71 (November, 1967). The characters were a rock group consisting of three guys and one woman, having wacky adventures. The woman Silver Shannon served as
* The Manifold Usurpers from the aforementioned (under Aliens As Fundamentalists)
* The Man I Love, a French movie about a swimming pool employee falling for a straight man.
* "The Man in Black fled across the desert, and the Gunslinger followed."
* The Man in Black is the victim of this when he goes up against Fezzik (played by
* The Man in Black (see page quote). He manages to kill the Rodent of Unusual Size and bluff Prince Humperdinck without the mask, but his coolest moments come while wearing his mask.
* The Man in Half Moon Street (1959) — features a man using glandular transplants to extend his life. He ages rapidly when he can no longer get them.
* The Man in Lower Ten is arrested on the strength of his left-handedness, though the mistake is quickly discovered.
* The man in question turns out to be a Light mage also suffering from this due to the same battle.
* "The Man in the Bottle". A genie grants a man four wishes. The genie fixes a broken display window for free, but then the man wishes for a million dollars... and after giving away a lot of his money,
* The Man in the Funny Suit, Red Skelton, Ralph Nelson, Bob Mathias and Ned Glass.
* The Man in the Grey Flannel Suit, one of the most popular and influential books in the 1950s, Trope Codified (and attacked!) the whole concept of '50s conformism.
* The Man in the High Castle, according to some papers uncovered by the Allies. Judaism was banned in Nazi Germany already. In this setting, Imperial Japan has followed suit, with practicing it being punishable by death.
* The Man in the High Castle America after the Axis won WWII with... the characters discovering they're fictional.
* The Man in the High Castle, and notices a camera pointed at a BDSM room, while mockingly noting that his interracial content, smuggled in from the Pacific States, could get him in trouble with the Nazi authorities.
* The Man in the High Castle, an illegal news broadcast in the Greater Nazi Reich exposes the truth to the public before the newsman is shot to death on live television.
* The Man in the High Castle: At the start of season 3, the Japanese increase their military presence in their part of the conquered U.S., leading us to some impressive shots of a Japanese carrier group arriving in San Francisco Bay.
* The Man in the High Castle becoming its own independent nation. After a coup in 1986, a futurist faction came to power that proceeded to obliterate American culture and Christianity, and pursue an apocalyptic and hypernationalist foreign policy.
* The Man in the High Castle, containing some realities in which the Nazis won as well, and some in which they lost the war.
* The Man in the High Castle contains an alternate 1960s California controlled by the Japanese after a defeat of the allies during WWII. There is mention of another alternate reality, apparently revealed to an au ctthor who writes a book about such an alternate in which the US does not lose WWII. This is slowly revealed not to be "our" alternate, but one dreamed up by the writer, and of no special significance. The book was written using the I-Ching as a guide to the character's actions.
* The Man in the High Castle contains an alternate 1960s California controlled by the Japanese after a defeat of the Allies during WWII. There is mention of another alternate reality, apparently revealed to an author who writes a book about such an alternate in which the US does not lose WWII. This is slowly revealed not to be

"our" alternate, but one dreamed up by the writer, and of no special significance.
* The Man in the High Castle. Establishing shots of the Nazi-occupied New York occasionally contain zeppelins in the distant skyline. However, the show prefers to use Concorde aircraft (which were invented a couple decades earlier in the series' timeline compared to ours) with its distinctive sonic boom to convey the "this is an alternate universe" feeling.
* The Man in the High Castle features Americans Cary-Hiroyuki Tagawa (Trade Minister Tagomi), Joel de la Fuente (Inspector Kido), and Louis Ozawa Changchien (Kasoura) as Japanese characters. Danish Carsten Norgaard plays the German Rudolph Wegener.
* The Man in the High Castle features a variation: In the midst of a nervous breakdown, Mr. Tagomi begins seeing visions of the San Francisco of our world, where the Axis Powers lost World War II, and is appalled at the sight of the Embarcadero Freeway, which doesn't exist in his world.
* The Man in the High Castle, fitting with the retro 1940s aesthetic of the series.
* The Man in the High Castle: Given the Japanese control over the Western US, it's not surprising to learn the Yakuza are in control on the illegal side of things. Even the feared Japanese military police don't usually cross them, since they have connections in high places.
* The Man in the High Castle is set in a world where the assassination of Franklin Delano Roosevelt and the USA's complete neutrality led to an Axis victory in WWII. By the 1960s, Nazi Germany controls Europe, Africa, and the eastern USA, while Imperial Japan controls Asia and the western USA. The tension between those two superpowers is reminiscent of the OTL Cold War tensions between NATO and the Warsaw Pact.
* The Man in the High Castle: It is implied that after their occupation of the USA, the Nazis and Japanese purged all Christian or Jewish religious literature. This results in books such as the Bible being a rarity, with Juliana even remarking that she hasn't seen one since she was a small child. Not to mention that the Nazis purged black people and Jews in their domain, though the Japanese are more lenient (at least toward the former). Helen later learns another is being planned in the Pacific States after the American Reich decides to annex them when the Japanese withdraw, finding documents with plans for camps, gas chambers, and lists of the "undesirable" people that will be sent off there. This includes not only black people or Jews but also anyone of mixed race, Roma and Native Americans. Presumably they were purged already in the American Reich.
* The Man in the High Castle: Particularly in season 3, high-ranking characters frequently communicate with each other through black and white video phones.
* The Man in the High Castle plan by German scientists who favoured a "southern policy" of European settlement in Africa over the conquest of territory in Eastern Europe preferred by the Nazis. The younger generation of Nazi youth oppose this plan, as environmentalism is gaining traction in the Reich.
* The Man in the High Castle produces an endless stream of random gibberish while in his cell, causing the Nazis to wonder if he's actually speaking in code.
* The Man in the High Castle project, in order to conquer other worlds.
* The Man in the High Castle: Set after the fact, this book depicts an alternate 1960s in which the US was taken over by Japan and Germany from the West and East coasts respectively. The Rocky Mountain States is a Japanese puppet.
* The Man in the High Castle. Since the aging Adolf Hitler is one of the few opposed to this, his death may spell more disaster for the world. Throughout the series, members of both the German and Japanese governments conspire with each other to prevent a devastating nuclear war.
* The Man in the High Castle: Some phone numbers, such as the one on Sampson's work truck, begin with "KL5".
* The Man in the High Castle that the Axis Powers created in their victory, for instance Nazi Germany taking over the European colonies in Africa and replacing them with even more brutal regimes resembling the Congo Free State.
* The Man in the High Castle: The events in the series are mostly set in San Francisco (occupied by the Japanese), New York City (occupied by the Germans),

Canon City (the neutral Rocky Mountains), and also Berlin starting from the end of season 1. Characters will often travel from one place to the other within the same episode, though it's not always clear how much time has elapsed in between. Season 2 suggests that the events of the previous season only took 2 weeks. Some of this is explained by high speed air travel, but at some points they'll just take a car drive across several states instead.
* The Man in the High Castle: Thelma and Wayne Harris appear to be using each other this way (assuming both aren't bisexual), since they're shown in same-sex relationships on the side.
* The Man in the High Castle the other Allies as depicted in the novel seems unlikely.
* The Man in the High Castle. There's descriptions of African tribes being turned into "a billion chemical heaps" and disquieting references to the many things their corpses are being used for, such as cigarette lighters made of bone.
* The Man in the High Castle. The US has been ruled by the Nazi regime for twenty years, with all the indoctrination and fanaticism of rank and file soldiers and citizens that implies. His replacement would have to contend with hardliners and rogue units in the American Reich attempting to depose him, not to mention the Reichsfuhrer in Berlin might just decide that his deal with Smith is null and void with the latter's death. It's a recipe for a civil war. Japan is also still lording over a massive empire in the Pacific and East Asia, with the withdrawal from North America giving them renewed resources to keep those territories under their thumb. And with the Nebenswelt smack-dab in the middle between two formerly oppressed sub-countries, a massive cache of unforeseen and unprecedented wealth and technological potential in the hands of subversive rebels who made it their mission to tick both sides off, it's implied that a second American Civil War is inevitable.
* The Man in the High Castle. They even melt down the Liberty Bell and turn it into yet another swastika.
* The Man in the High Castle" This is specifically to discredit his previous work, which gets portrayed as another negative alternate universe story.
* The Man in the High Castle, usually done when a subordinate member has to make penance for some wrong they did to their superior. Here the viewer doesn't see the actual finger removal.
* The Man in the High Castle: When General Canada explains the impending Nazi attack to his soldiers, he demonstrates his defense plans on a huge planning board with little figures.
* The Man in the High Castle: When the Nazi German leadership is planning an imminent nuclear attack on the Japanese Empire, their analysts predict heavy loss of life in the American territories especially during the first stages of the war, in the order of tens of millions. Himmler dismisses these losses as acceptable since the Americans are a "late addition" to the expanded Nazi empire.
* The Man in the High Castle where Germany and Japan won World War II, Childan often disparages American culture in favor of German or Japanese culture. When a Japanese man asks him about rock & roll, Childan says he dislikes "negro music" and prefers Wagner. He also says that American idioms are stupid in comparison to the more elegant Japanese. When living in the neutral zone, the only place where American culture isn't dominated by Germany or Japan, Childan gripes about not being able to get any sushi.
* The Man in the High Castle (which, somewhat oddly, are 16:9 CRTs - in the 1960s.)
* The Man in the High Castle, with the Neutral Zone in the middle as a sort of neo-Wild-West.
* The Man in the Iron Mask Bonus points for being utterly in character for Porthos.
* The Man in the Iron Mask is that the man in question is the son of Athos, the super-serious member of the legendary Three Musketeers.
* The Man in the Iron Mask king for the good one, with the added bonus that the hidden twin had spent his entire life wearing a heavy iron mask, which he flashed to the king from under the decorative gold one to freak him out.
* The Man in the Iron Mask. Louis XIV, the King of France, has his identical twin brother Phillipe locked up so he can't take the throne. He forces Phillipe to wear

the title iron mask so no one will recognize him.
* The Man in the Iron Mask, Philippe had no clue why he was taken from the farm he grew up on, forced into the iron mask, and locked away. He recalls how when he was first imprisoned, all he did was shout for someone to say what he did. He eventually realized it must have something to do with his face. It isn't until the Musketeers rescue him that he learns it was because he's the identical twin of the king.
* The Man in the Iron Mask sawed through by Aramis (who suspected he was feeling suicidal) and he inadvertently collapses the entire barn. This somehow reawakens not only his libido but his warrior spirit as he conquers not only the woman he was suicidal over but also joins the final battle.
* The Man in the Iron Mask, the French crown had no problem with Jesuits during Louis' reign.
* The Man in the Iron Mask. Unlike most Three Musketeers films, their uniforms are black, while the current Musketeer uniform is the more common blue.
* The Man in the Iron Mask when his father realizes he'll never be as good as his siblings.
* The Man In The Maze, published in 1969, a race of space-travelling whale-like beings put in an appearance.
* The Man in the Mirror Talks Back: A person is talking to their reflection and the reflection responds as if they were a separate person.
* The Man in the Mirror Talks Back: Someone talks to their reflection and the reflection responds to their statements as if they were an actual person.
* The Man in the Moone by Francis Godwin, (1638) in which a Spaniard takes a swan-powered boat trip to the Moon.
* The Man in the Moon", the episode begins with a character reciting the names and descriptions of people who had recently gone missing. The episode also ends with that character reciting the names and descriptions of people who had recently gone missing, which now includes the protagonist.
* The Man in the Moon tradition holds that the face of Jacob is engraved upon the Moon.
* The Man in the Tan Jacket and the Faceless Old Woman Who Secretly Lives in Your Home also qualify. The former inflicts amnesia on anyone who sees him, making them remember nothing about him except his attire and deerskin briefcase with flies in it, and the latter is an entity that somehow manages to live in everyone's house without being noticed, can only be seen through one's peripheral vision and
* The Man In The Tan Jacket, who is unremarkable and indescribable to anyone who sees him, outside of noting that he wears a tan jacket and
* The Man in the White Suit fuzzy shots of Joan Greenwood's character.
* the manipulation and creation of metal. It's very good at wrecking (or enhancing) warmachines and armor, but it can also attack by creating metal projectiles or gouts of molten metal.
* The Man Is Keeping Us Down: The heroes have almost won, but end up failing due to factors outside their control, often societal in nature.
* The man is old and frail and upset about his wife's infidelity, and Sherry rips into him with an absolutely brutal monologue - so brutal the guy goes into a heart attack.
* The Manitou and its sequels, the protagonist is the undead spirit of the most powerful Indian medicine man ever to walk North America, Misquamacus. Misquamacus is an Indian who completely loathes and despises the white man—and for that matter, the black and yellow-skinned immigrants who have displaced the Indians from their heritage. His goal is to physically re-enter the world and to bring about the genocide of all the non-native American races who have supplanted the Indians, and he uses some very savage magic to thwart those who are seeking to prevent his return.
* the man jumped in front of his car intentionally to commit suicide, and the lawyer would not have been charged with anything had he not let the guy die in his garage.
* The Manliest Restaurant In America. Every single line the narrator says is

dripping with this trope.
* The Man-Machine album didn't help this one. They're wearing red shirts with black ties, standing rigidly on a staircase looking to the right and surrounded by Constructivist fonts and graphics.
* The Man-Machine (CGI renders of the band members' heads) are also notable for their graphics.
* The Manna Machine. The machine would be stripped down and cleaned every seventh day, leading to the tradition of the Sabbath.
* The Mannequins' Ball, mannequins get to have one ball per year to move about freely and even that is denied them if their stores or workshops stay open past their usual hours. As luck would have it, this year there's a strike going on, so many mannequins can make it to the ball this year. They mingle and share their fears of being thrown away as beauty standards change, share their frustration over having only one night for themselves, share their sorrow over missing parts, and so on. The party is disrupted when a human, the leader of the French Socialist Party, drops in in pursuit of a female mannequin he mistook for a pretty woman. His head is cut off with a giant pair of scissors to keep the mannequins' secret safe. A headless mannequin claims the head for himself and takes a chance to visit the humans' ball some blocks over. He's mistaken for the labor leader and bribed all night until the headless body of the real labor leader crashes the party to get his property back. Tired of humans, the mannequin gladly returns the head and leaps out of the window to escape.
* The Mann family falls under this before Jo's intervention; Mom Melissa is especially guilty. They spank their children forcefully with wooden spoons, wooden forks, and their hands. Melissa explains their church advocates this, and constantly says, "Trust and obey" before spanking a child (while simultaneously saying "I forgive you" and spanking more). Melissa also has some disturbing things to say about Naomi in particular, such as, "I want to smack her across the mouth" and "I don't want her in my house."
* The Mann Gulch fire of 1949 that killed 13 smokejumpers. One of the things that went wrong was that the parachute dropping the team's radio failed to open, smashing the radio. It meant they were out of contact and could not get back-up or call in aid for their wounded members.
* The Mannings are almost as bad as Aaron. As overzealous religious fundamentalists they would regularly psychologically abuse their children. Even going as far as to
* the man, not the town. Jacob isn't happy about this, but they still don't feel they did anything wrong.
* The Mann VS Machine mode also (predictably) has a metagame - not as evolved as the PvP one, but still. However, due to the Two Cities update which added a few new missions and buffed the Medic significantly, it underwent major changes (from the old Scout-Engie-Heavy-Heavy-Demo-Pyro setup, to the new Scout-Engie-Heavy-Medic-Demo-Soldier setup). A lot of things that sacrifice splash damage and crowd control abilities for single-target damage are also viewed as inferior to other options (which is partially true, due to the nature of the gamemode fighting hordes of robots). Players also tend to be suspicious of Spies and Snipers, as they require more skill than other classes and correct upgrade paths to be effective and most don't manage to make their choices work (but when it
* The Mann vs. Machine update revealed a few post-WAR! event domination clips that reveal the enemy Soldier and Demoman never stopped being friends, even though they were hired to kill each other.
* The Man of Steel #1, Superman made his first public debut by saving an "experimental space-plane".
* The Man of Steel, Clark Kent gets up in the middle of the night while staying with his adopted family the Kents to get a snack from the refrigerator when he encounters a holographic vision of his real father Jor-El, who touches his son and begins to reveal his true origin as the last son of Krypton.
* The Man of Steel disaster occurred while the miniseries was in production, and the vessel Superman saves was changed to an "experimental space-plane".

* The Man of Steel himself is a heroic example. Only if you hurt his friends and family, especially
* The Man of Steel is at, or near, the forefront of nearly every major event in
* The Man of Steel is no slouch with guile. He will often resort to outsmart his opponent when his brawn doesn't do him any good. This is most apparent against Mr. Mxyzptlk, as Supes has to trick him into saying his last name backwards because he is a nigh-omnipotent
* The Man of Steel is probably the granddaddy of aliens with this ability, hence the trope
* The Man of Steel, saying something like "No, but then again no lady I know would carry C4 in her purse."
* The Man of Steel takes a stint on a future earth with a red sun. He shows that he's apparently a
* The Man of the Senate and everyone above him dies. In a racist attempt to remove him, some people note that the original Constitution does not say he actually becomes President and try to use that technicality against him.
* The man only known as "asshole neighbor Vadim", who insists on doing home improvement projects when Boris wants to sleep, at one point paid off a debt to Boris with novelty napkins, and beats Boris at "
* The Manotaurs, a group of incredibly macho minotaurs that give Dipper some lessons in manliness.
* the manpower to continue flanking Lee until the South simply ran out of troops. General Sherman too, was a modern day general. He separated himself from his supply line and his men foraged and stole their supplies instead. He pillaged the country and destroyed the civilian infrastructure that the Southern armies relied on for their supplies, an incredibly forward thinking concept of scorched earth policy.
* The man requested that his name not be revealed. To this day, he is known only as "The Hunter" or "The Deer Hunter" for his use of a deer rifle in said shooting.
* The Man-Robots from the Disney Comics story "The Giant Robot Robbers" by
* The man says nothing, turns around, leaves the room, and already has his car keys out as he passes the front door when the rest of the family emerges from the bushes outside and congratulate the man on passing the test of faithfulness, the father putting down his baseball bat to embrace his son-in-law. Years pass, during which the couple get married, settle down and have a son. And when the son reaches his 18th birthday, the father passes on his wisdom:
* The Man Show got dozens of women to sign a petition to end Women's Suffrage (the right to vote) by phrasing it to sound like they meant "suffering". Things like, "Women have been suffraging in this country for decades, and nobody's done anything to stop it!"
* The Man Show had men with actual names like "Dick Hertz" and "Mike Hunt."
* The Man Show has a segment advertising fake products. One of those was "Quicksand Kitty Litter," which causes cats that step in it to sink in and drown. Technically, it does what it's advertised to do: free you of the responsibility of cleaning the litter box.
* The Man Show, however, as he wasn't Catholic at all but a Protestant street preacher from Harlem.)
* The Man Show, jumping from a plane with no parachute, getting in fights with professional heavyweight boxers (and getting pummeled to death by them), being attacked by alligators, being run over by ostriches, being killed by a mob hitman, and the like.
* The Man Show used the same trick to try and put an end to women's suffrage. As in, the ability for women to vote - but since people heard "women sufferage" instead, they eagerly signed.
* The Man Show where the Man Show Boy stood outside a liquor store asking the patrons to buy him beer, telling one guy he had a hottie back at his treehouse. In the end, one guy did get him a six-pack. There was also another segment where the boy was actually selling the beer like a lemonade stand.
* The Man Show, with a kid they hired as "The Man Show Boy", who would go around town saying things to people they wouldn't expect a kid to know.

* The Mansion and other heads appear, shown to be earlier victims of the killer.
* The Mansion Family), and tries to pass off the guy's written speech as his own:
* The Mansion Family", the doctor diagnoses Mr. Burns with "Three Stooges Syndrome", meaning that he has a multitude of medical conditions, but because they all cancel each other out, they can't harm him. The doctor likens the situation to The Three Stooges all trying to go through a doorway at the same time.
* The Mansion of E a continuity-fest which has been running for eleven years with daily updates, and as of 2014 has reached 4000 official strips.
* The Mansion of E are hat-shaped critters who are able to control their "wearer".
* The Mansion of E, bulb-light structures which hang from the ceilings.
* The Mansion of E, Carmal uses the existence of such a system to deduce that a certain machine is more important than she had been aware.
* The Mansion of E has 30 main and semi-main characters listed on its cast page.
* TheMansionOfE has a couple of characters launched into the air, it's only after quite a long conversation that they realise that they have been kept in the air.
* The Mansion of E has been running at a rate of roughly one comic a day since 2003. Fourteen years later, battles have been fought, demons have run loose, a young nobody has become mayor of a new settlement, and much exposition has been exposited. Also, the sun has set and risen twice. 48 hours have not yet passed.
* The Mansion of E has numerous species living in the vast underground complex beneath the Mansion; their ancestors were gathered there as exhibits in a zoo by another now-vanished species. They include Humans, Gnolls, Nomes, Ghasts, Oozes, Wyrms (large and small), Troglodytes, Saurs, Motihauls, Ichyoids, Helipaths, Gobules, Pales, Jibjibs, Spyders, Robots, Killer Trees, and Talking Rocks.
* The Mansion of E has this going on in the background as the action wanders around the eponymous structure.
* The Mansion of E tends to spend more time leisurely exploring the eponymous structure more than answering plot questions.
* The Mansion of E this is the case in regards to his elevator job, but he's almost certainly lying.
* The Mansions of the Gods: As Astérix and Petiminus are trying to break into the building where Obélix is held, a dimwitted Roman soldier arrives... and joins them in trying to open the door, then is promoted to living battering ram. When that still fails, Dulcina steps in to pick the lock.
* The Mansions of the Gods, Asterix uses him to clear out the Roman civilians by having him move in with them.
* The Mansions of the Gods: Caesar's throne has a massive golden eagle statue on it.
* The Mansions of the Gods, complete with complicated named moves that require both participants to work and figurines.
* The Mansions of the Gods has a Canadian dub and a British dub. The British dub is exactly the same as the Canadian dub, only with a few voices replaced.
* The Mansions of the Gods" has artwork drawn in a realistic style parodying cheesy stock photography in advertising.
* The Mansions of the Gods story, this is how Cacofonix is weaponized. Subverted in that where this was the final straw in the book, here it's interrupted by the Gauls, who just learned they can now live in the Mansions of the Gods.
* The Mansion, the eponymous mansion is isolated, their phones don't get any bars, their van disappears, and the forests surrounding the mansion are believed to contain wild boars.
* The Mansion, the lawn of the mansion is seeded with these shortly into the film. The only victim they claim is Enzo, and they mysteriously disappear later in the film.
* The Mansion veers between bloody horror and sight gags, and plays up the stereotypical nature of the ten students being killed off.
* The Mansionverse personified when on the job but insufferably smug (and chatty) about it during 'breaks'.
* The Mansionverse's backstory, the Phantom made Melanie believe this was the case of her lover Jonathan Jake. In truth, the Phantom had actually murdered him. This

is a popular interpretation of Phantom Manor's story, which cropped up in media unrelated to the Mansionverse as well.
* The Mansionverse together with some official media, ending up with something entirely original.
* The Mansion will keep him from being able to move quickly. He fails.
* The man sketched instructions for a nuclear weapon in the margins of a sketch of a flower. He thought it might make a good mining tool, but had no military application because no-one would be willing to use it (a
* the man's lawyer was the one who told the murderer where to find him. She knew that he'd raped and murdered two women
* The Manson Family, where members of the murderous Family themselves are interviewed. Interspersed are various flashbacks to the events described.
* The man's suicide had nothing to do with the courtesan, she just assumed he'd killed himself out of despair and used his death as publicity. In fact, he thought he'd caught leprosy like his father and killed himself before he became too disfigured, the father thought the girl was responsible and killed her out of grief.
* The Manta is probably the toughest thing on the table in a standard scale game.
* The Mantapus is a 6-foot high humanoid with six tentacles growing from its waist and two arms wielding weapons. Each tentacle does 1-10
* The Manta's explosive mines. Ulrich was immediately devirtualized in Episode 66.
* The mantelopes were unique in being left their sapience and ability to speak were left intact, but they were modified to be essentially human ungulates with no grasping limbs. This left them entirely unable to manipulate their environment and their sapience largely useless. While it lasted, they were notable for singing mournfully at their fall from grace and developing detailed oral traditions. In just a few short hundred thousand years, natural selection eventually caused them to regress to animality — there was no use in growing large brains if they couldn't do anything with them, and as grazers they had no need to use their brains to find food since food was all around them. The book treats this as being largely a merciful end to their sorry lot.
* "The Man That Got Away" was written by Harold Arlen and Ira Gershwin for the 1954 film "A Star is Born". While the original Judy Garland recording is the most famous, it has been covered by many artists, notably in a gender-flipped version ("The Gal That Got Away") by
* The man that killed Christian was in Witness Protection, but got kicked out after the murder was revealed. The Brennan family wasn't in Witness Protection.
* The Man They Couldn't Hang: Someone who has survived an attempted execution by hanging.
* the man they were cloned from had one. is more skilled in using that accent.
* The Manticoran and Andermani navies serve as this in Silesian Confederacy space, enforcing the anti-piracy and anti-slavery laws that the Silesian navy is too weak, corrupt or ineffective (which one is the case depends on the exact system in question) to enforce on their own.
* The Manticoran Marines are particularly notable since they are trained to serve both as infantry and to help run the ship they are stationed (mostly as weapon crews). This allows Manticoran ships to carry larger marine detachments than other nations since having extra marines on board doesn't decrease the number of people on board who are trained to run the ship.
* The Manticore-Havenite War, and the two Havenite revolutions, had a secondary effect in that the rapid expansion of military forces involved (and subsequent losses) created openings for talented and combat-proven officers — such as Harrington herself — to rise to flag rank. The SLN's flag officers who didn't get their positions through outright nepotism or political maneuvering held their positions through accumulating sufficient seniority rather than any actual talent other than keeping their noses clean.
* The Manticores, Carcharodons, Executioners, Mortifactors, Space Wolves (some of them, at least), Black Templars, Knights of Blood, Flesh Tearers and Angels Encarmine, to name but a few.

* The Manticore Wormhole Junction, and similar junctions elsewhere, in the
* The Mantids of the Mists of Pandaria expansion show by far the most nuanced and advanced differentiation of any arthropoid culture in Azeroth to date (probably because player interact with the Mantid more than any other race). Among the mantids' various caste differentiations all manner of specializations including poisoners, blademasters, preservers, swarmkeepers, philosophers, puppetmasters, and even paladins exist.
* The Mantis Warriors make heavy use of insect imagery and naming themes.
* The man took off his Rolex and rolled up his sleeves, and after both men did some tugging the calf came out just fine and healthy. The farmer thanked the stranger, who said: "I just have one question... how fast was the little cow going when it hit the big cow?"
* The manual also takes pains to explain the logistics of space piracy: first, trade is conducted within one of a regular grid of sectors, so raiders know roughly where to look. And only a part of the attacking fleet will ever participate in a raid, as they spread out to catch something and only some can arrive in time; on the other hand, the entire defense fleet will naturally be present. Also, the Hivers cannot raid since they lack any FTL and will never catch anything, but their traders can only be intercept in orbit as they use hyperspace gates to get instantly from colony to colony.
* The manual claims that Pol Voices hate "loud noises." This was intended to be a clue to their weakness in the Famicom version, where they can only be killed by yelling on the built-in microphone on the second controller. But because the NES controller doesn't have any microphone functionality on it, they can only be killed by firing arrows at them in the export version. However, the clue to killing them was not changed to reflect this regional difference and many players mistakenly assumed that Pol Voices could be weakened by playing the flute (or "recorder" to use the in-game term), which actually has no effect against them.
* The manual for the first game makes reference to rock hermits who lived on asteroids, enormous ships called Dredgers,
* the manual for the original game, the blandly-named Confederate military units all have more impressive-sounding nicknames, e.g. the "Blood Hawks" for Alpha Squadron and the "Death's Head Legion" for Omega Squadron.
* the manual. However, since then, the pods have been refitted with a minimal life support system to allow it to be piloted.
* The manual indicates that Alpha Centauri B appears as a very bright object in Planet's night sky—brighter than the Moon is from Earth, enough to read by in the right conditions. It also indicates that the sky on Planet is yellowish as a result of the various conditions (including the particles in the atmosphere and the atmosphere's composition—thicker than Earth's and 90% nitrogen).
* The manual leaves out the command for aborting a mission, which is done by pressing A, B and Start simultaneously. This can be a problem if you enter an area that requires a certain item to proceed (such as the beginning of Area 6, which requires the rocket gun you get from clearing Area 5 to destroy a gate), since you can't exit a stage simply by walking back to the starting point as one would expect.
* The Manual of Detection Travels-No-More Carnival, which is this trope in spades.
* The manuals are more accurately described as access points to a wizardly database and don't always take the form of books. Some wizards use technology such as laptops and MP3 players, while others (particularly non-human animals) hear it as a disembodied voice or can access it directly as a form of expanded memory. Whatever the form, it tends to adapt its contents depending on its user's specialty and what they need to know. Nita's has a spell for keeping grass short on the page where Kit's shows a method for creating pocket dimensions. A senior wizard using the book format would have several volumes the size of phone books.
* The manual'' speculates that elves, orcs and ogres are all subspecies of humans who were mutated into new races by exposure to large amounts of magic.
* The manual states that the whistle will take Link to Level 9's entrance after completing the first eight. It has no such ability; instead, as the Japanese manual

said, using the whistle can transport Link to the entrance to any dungeon he's already completed.
* The manufacture of such a pretext is a major plot point in both the film and book versions of
* The Manuscript Found in Saragossa), and doesn't care that his "help" tends to end up badly for the recipient (up to and including causing their death). If he thinks he knows how to do you a favor, he'll latch onto you and won't leave you, ever, and act very offended if you complain.
* The Manuscript Found in Saragossa has a similar structure — Alphonse van Worden meets, imagines, or reads about a number of colorful characters in intertwining stories, in the course of his journey to Madrid.
* The Manuscript Found in Saragossa (it is abandoned and the 'innkeepers' are a pair of shapeshifting ghosts).
* The Manuscript Found In Saragossa. The initial Framing Device quickly disappears among the layers of narrative.
* The manuscripts handled this fairly realistically: most seem to be monographs, with little or no information on other subjects(and thus could easily be part of a massive library). The trope's slightly
* The Man (which takes place in the mid-1960s), the first black U.S. president (who took office because of the deaths of the president, vice president and speaker of the House) tells his bigoted general he wants something done. The general makes some lame reply and the president tells him that it wasn't a suggestion but that "I order it, I order it now!"
* The Man Who Brought the Dodgers Back to Brooklyn. After losing the World Series, and after he and Bobby Hanes have married their respective love interests, "Squat" Malone notices an airplane flying around above the new Ebbets Field, skywriting the phrase "Wait Till Next Year!"
* The Man Who Brought the Dodgers Back to Brooklyn, but had to be abysmal in the book to help the characters buy out the team.
* The Man Who Brought the Dodgers Back to Brooklyn, Daniel "Squat" Malone is poised for a promising career with the LA Dodgers' farm team in Montreal in 1958 and is predicted to become the aging Roy Campanella's replacement as catcher. That comes to an end one icy evening in Ann Arbor, Michigan, while visiting his best friend Bobby Hanes in college; while playing catch with Bobby in the street, a car hits Squat and mangles his legs, requiring one to be amputated, and effectively ends his life as a baseball player.
* The Man Who Brought the Dodgers Back to Brooklyn, the 1988 Brooklyn Dodgers sign pitcher Ruth Smelkinson, making her the first woman to play in Major League Baseball, and it's framed as a deliberate parallel to the real life Robinson story. It's actually downplayed a bit, as all Ruth really has to do is impress team owner Bobby Hanes with her pitching prowess (without any mention of him seeking league approval when he signs her), and public support is largely on her side.
* The Man Who Came to Dinner ends with Sheridan Whiteside, having fully recovered from his injury, walking out the front door of the Stanley home and slipping and falling on the steps once again.
* The Man Who Came to Dinner: Maggie Cutler goes on an ice skating date with newsman Bert Jefferson. She fails totally but has a fine time, later boasting of doing a figure-eight from a sitting position.
* The Man Who Came to Dinner — Based on the Kaufman/Hart play of the same name
* The Man Who Came to Dinner, Sheridan Whiteside receives four penguins as a present from Admiral Byrd, one of his many famous admirers. They are moved into the library, where they break loose from their crate and one of them bites Miss Preen on the hand.
* The Man Who Carried Trouble Bill ends up in a bar, doing some hard drinking after a bad week.
* The Man Who Collected Excitement by slipping him anonymous tips, ensuring he'll always be one of the first at the scene of the crime. However, Jimmy turns the tables by finding the real crook.

* The Man Who Could Cheat Death, and Bonnet locks her in a cell in his cellar. Placing a bust of her unscarred beautiful face in the cell with her is an unnecessary twisting of the knife.
* The Man Who Could Cheat Death, Dr. Bonnet explains to Dr. Gerrard that ever since he had the first transplant that granted him eternal youth, he has never been sick, never had a headache or a toothache, or even a blemish on his skin. And so long as he has a transplant every ten years, he never will.
* The Man Who Could Cheat Death, Dr. Georges Bonnet has taking to attacking people in the street and extracting the glands he needs to manufacture his elixir.
* The Man Who Could Cheat Death, Georges Bonnet imprisons Dr. Gerrard's beloved Janine and holds her hostage to compel Gerrard into operating on him.
* The Man Who Could Cheat Death Margo throws him an oil lantern at him.
* The Man Who Could Cheat Death, surgeon Professor Weiss has suffered a stroke that paralyzes his right hand. The infirmity means that he cannot perform the operation that Bonnet requires, and he attempts to press Dr. Gerard into operating instead.
* The Man Who Could Work Miracles, and everything rewinds to the start, meaning that—in one sense—only a few minutes pass.
* The Man Who Could Work Miracles, Colonel Winstanley attempts to shoot Fotheringay and succeeds in shooting the hat off his head. The bullet also creases his scalp, as his next miracle (after making himself invulnerable) is to heal his scalp wound.
* The Man Who Could Work Miracles: Even after gaining the ability to work miracles, Fotheringay remains rather restrained in the use of his powers as he tries to figure out the best way to use them. However, after working out that everyone is trying to use him, he snaps and starts using his powers without restraint. He demolishes Colonel Winstanley's home; constructs an elaborate palace for himself in its place; summons Maggie to serve as his queen, and Ada to serve as eye candy (and perhaps mistress); brings the world's leaders to him to bow down; etc.
* The Man Who Could Work Miracles, Fotheringay buys some time by making the Earth stop rotating. Alas, he fails to consider the basic physics of the rotation of the planet and so sends his palace, all living creatures and objects whirling off the world's surface. Civilization and all life (save Fotheringay) are obliterated as everything in the world flies through the air and is dashed to pieces.
* The Man Who Could Work Miracles. He starts using his power with out concern for the consequences. He changes the Colonel's house into a spectacular palace of real gold and marble. He then summons up all the pretty girls, not to mention the Colonel's entire regiment, dressed as Beefeaters, after which he summons all the butlers in Essex, the leaders of the world, the teachers, musicians, priests, etc. He dresses up like a king and appoints the girl he loves as queen, then commands the leaders of the world to create a utopia, free of greed, war, plague, famine, jealousy, and toil. Eventually, he commands to the Earth to stop rotating. He fails to consider the basic physics of the rotation of the planet and so sends his palace, all living creatures and objects whirling off the world's surface.
* The Man Who Could Work Miracles powers accomplish this by stopping the Earth's rotation. Just the Earth, not anything currently on the planet's surface. Suddenly finding himself spinning amid mountains of wreckage, he decides he is only human after all, wishes he'd never had his godlike powers and returns to the very beginning of the plot, minus the powers or memory he ever had them.
* The Man Who Could Work Miracles, the desperate and contrite Fotheringay calls on his powers one last time to put things back as they were before he ever entered the pub the day before, willing away his power to work miracles. Fotheringay appears again in the pub as in the early scenes of the film, again tries the trick with the lamp, and fails.
* The man who ends up being blamed for the killing (the politician's aide) was not actually guilty of that (or of being a mole), but had committed
* The man who exemplifies this in story, not as a perpetrator but as a victim, is
* The Man Who Fell to Earth (both book and film), alien protagonist Thomas Jerome Newton starts an Earthly corporate empire via his people's inventions (electronics, film stock, etc., all far ahead of human technology) with the intent of raising the capital he needs to fulfill his mission.

* The Man Who Fell to Earth in 1987 (both the original novel and screenplay were credited) — it was intended as a pilot for a series and, among other alterations, completely changed the ending to set one up.
* The Man Who Fell to Earth makes his journey to our world to acqure the means to bring the rest of his people (numbering a few hundred) here before they die of thirst back home; they would then be able to blend in with humanity and become a positive influence upon it. Tragically, he gradually loses his innocence as he lives amongst humans...
* The Man Who Fell to Earth's girlfriend pisses herself in sheer fright at realising her boyfriend is a weird extraterrestrial.
* The Man Who Fell to Earth, the characters grow from youth into old age, but it's always the 70s in terms of clothes, hair, music, cars, etc.
* The Man Who Fell to Earth: The protagonist comes from a planet suffering a debilitating drought; about 300 of his kind are left, and he must establish himself on Earth as a businessman powerful enough to have a rescue ship constructed and launched to bring them to Earth, where they can blend in with humanity and thrive.
* The Man Who Fell to Earth Thomas Jerome Newton and is one of his only confidantes in the novel, to an out-and-out love interest. Renamed Mary-Lou, she's also de-aged to her mid-twenties when their relationship, which plays out over several decades, begins.
* The Man Who Folded Himself after travelling alongside various realities of himself, as well as with a woman called Diane — who may also be a version of Daniel from another reality.
* The Man Who Got Off the Ghost Train", Harry Cutley has a waking nightmare in which he empties out his pockets to find his train ticket, pulling out more stuff than his pockets should easily be able to hold, including a book he knows he lost months ago and, at one point, a long string of colored handkerchiefs.
* The Man Who Got Off the Ghost Train", Richard has to battle the Gecko and its human revenants on the outside of the Scotch Streak to prevent from uncoupling the carriages and causing a wreck.
* The Man Who Got Off the Ghost Train", Richard—at the urging of eight-year-old Vanessa—wakes up Annette by dumping a jug of water on her face.
* The Man Who Got Off the Ghost Train, with a framing device in which he's telling one of his sidekicks the story shortly before his retirement from active service. The frame story has a denouement in which one of the loose ends from that first mission resurfaces in the present day.
* The man who had Catman and Cheshire's son kidnapped calls Catman out on this. He bluntly states that their son could never have had a happy life growing up with Cheshire and/or Catman since both of them are murderous criminals. He also notes that neither of them have the right to play the victim card since Cheshire is a mass murderer who
* The "Man who has it all" Facebook page started as a parody of self-help guides for working mothers, but spun into a whole world where men are the victims of
* The man who insists that the loudly protesting "corpse" he's trying to offload onto the body collector is, in fact, quite dead.
* The Man Who Invented Christmas. At one point he even tells Scrooge that the characters should do what he wants them to do, since "I'm the author!" Scrooge's response is an amused denial.
* The Man Who Invented Christmas has Scrooge take offense to not being able to present his side of things. He even writes a speech about the virtues of the free market, which Dickens rejects.
* The Man Who Invented Christmas is the oldest actor to ever play Scrooge onscreen, making Scrooge begging to do something good before he dies hit even harder.
* The Man Who Invented Christmas many of the characters Dickens creates are based on, and played by, people he comes across while looking for inspiration.
* The Man who is being investigated by IA after his partner turned out to be corrupt and was killed by a criminal. The IA investigator believes that corrupt cops usually have corrupt partners. He ends up leaving satisfied that he was wrong after the cop returns the money he borrowed for a sting operation.

* The man who is married to the real Diana Prince from whom Diana bought her secret idenity threatens his wife when she wants to go back to work and brutally attacks WW—thinking she is his wife—and then leaves her chained to the stove in the kitchen.
* The Man Who Killed Don Quixote), but the original incarnation of the film itself was never completed. Pre-production resumed in 2009, but as of late 2010, the project was shelved again due to a collapse of funding.
* The Man Who Killed Don Quixote hostile toward Muslims than usual, as he had been tortured while imprisoned by them, and thus quite unlikely to have characters show tolerance.
* The Man Who Killed Don Quixote: In Toby's dream, Don Quixote stabs several bladders of wine hanging the attic, causing the red wine to leak through the floorboards on to the members of the Inquisition below, who think it is blood.
* The Man Who Killed Don Quixote: The film plays with this, often leaving initially ambiguous if Javier and Toby's increasingly wacky finds are somehow real or just random but absurdly appropriated happenings.
* The Man Who Killed Don Quixote, the Gypsy takes advantage of the fact that his hands are cuffed in front of him to choke one of the policemen and take control of the police car.
* The Man Who Killed Don Quixote, Toby accidentally clobbers Javier with the stone arm of a statue when Javier is running to his rescue in Jacqui's bedroom at Alexei's castle.
* The Man Who Killed Don Quixote, Toby discovers Javier/Quixote flagellating himself with thorned branches, leaving deep cuts on his back.
* The Man Who Killed Don Quixote, Toby keeps referring to Melissa as 'Sarah'.
* The Man Who Killed Don Quixote, Toby washes out Quixote's self-inflicted wounds in a creek, staining the clear water red.
* The Man Who Killed Don Quixote: While lost in a sandstorm, filmmamker Toby screams at the heavens, "Who wrote this ending?!"
* The Man Who Knew Infinity, suffers anxiety from the seemingly divinely-revealed mathematical discoveries he constantly experiences and a strong sense of urgency to have them known to the world.
* The Man Who Knew Infinity when the latter tells him that intuition can only get him so far.
* The Man Who Knew Too Little, an English and a Russian official conspire to kill the diplomats at an Anglo-Russian peace conference. They aim to restart the Cold War, apparently because they're bored.
* The Man Who Knew Too Little: In one scene, Wallace tells Lori that he's not completely a good guy, and that if she wants his help, she'll have to do something for him. The dialogue is set up to make the viewer think Wallace is talking about sex...then the scene cuts to Wallace driving Lori's Cooper Mini.
* The Man Who Knew Too Little, members of the British and Russian intelligence services are collaborating together for a bombing that would take out the top table of a British/Russian peace conference. The British spymaster is seen longing for the new funding, equipment, and poisons that renewed tensions would bring. When the hero unwittingly starts getting in the way, the Russian spymaster complains, "If we cannot trust each other, how can we bring back Cold War together?"
* The Man Who Knew Too Little starring Bill Murray. The main character thinks he is acting as a spy in street theatre but is mistaken for the real thing. Highlights include being seen innocently sharing a sandwich with a cop, leading to the assassins thinking he has law enforcement ties.
* The Man Who Knew Too Little, the hitman Spencer breaks a window and reaches through to grab Lori. But Wallace scares him off with a gun before Lori gets hurt.
* The Man Who Knew Too Little, Wallace gets jabbed in the arm with a needle disguised as a pen and he's unconscious in seconds.
* The Man Who Knew Too Little: Wallace kisses Lori while the bad guys' helicopter explodes in the background. "That felt like an explosion!"
* The Man Who Knew Too Little, when Wallace arrives at his brother's house, he mistakes the maid for his sister-in-law.

* The Man Who Knew Too Little, who believes he's in modern experimental play when in fact he's been mistaken for a spy and ends up disarming a bomb to Russian music in a middle of a embassy. Oh! While dancing, of course.
* The Man Who Knew Too Little, with him cast in the role of a secret agent.
* The Man Who Knew Too Much, a murder is planned to take place during the high point of a musical piece to hide the gunshot.
* The Man Who Knew Too Much, Bob Lawrence and a friend visit such a dentist office in search of his missing daughter. The friend's visit behind the door of the examining room is played for laughs. He comes out nursing his jaw after having a perfectly healthy tooth pulled. Lawrence's visit is much more sinister. He struggles with the doctor, who tries to kill him, and then puts him to sleep with his own gas.
* The Man Who Knew Too Much is the remake of his own 1934 film with the same title.
* The Man Who Knew Too Much" Jo's friends proceed to help her find the address of this chapel in the phone directory, before she leaves them to search there.
* The Man Who Knew Too Much: One specific cymbal clash in the symphony was the assassin's cue to fire—that was the loudest moment of the symphony, so it would have masked the sound of the gunshot.
* The Man Who Knew Too Much reported that the London police, who were cooperating with the production, objected to the police being shown using guns against the criminals holed up in house behind the temple. When he asked them how they would deal with it, they suggested using fire engines and hoses: a technique which had been employed in the Siege of Sidney Street in 1911. Eventually, the police agreed to the scene showing the police using rifles, so long as they were shown as being specifically issued for the assault.
* The Man Who Knew Too Much: Sam is dreaming that he's driving down a road at night, unaware that he's actually in a coma. In the real world, Dean shines a penlight in his eye, freaking out Dream!Sam when he's suddenly driving in broad daylight. The song playing on Dean's radio is also playing on his car radio.
* The Man Who Knew Too Much sees Dr. Ben McKenna receive warning about the impending assassination of a prime minister. The people in charge of the plot try to prevent Ben from telling the police by holding his son hostage.
* The Man Who Knew Too Much there is an attempted assassination during a concert, using a cymbal crash to cover the sound of the gunshot.
* The Man Who Laughs, as touched upon under the examples of The Joker and Mr. Sardonicus.
* The Man Who Laughs features the Joker's first meeting with Batman. He appears when a reporter is covering the re-opening of a renovated Arkham Asylum. He kills the reporter with Joker Venom (echoing the death of the news anchor in the Burton film), then holds the cameraman at gunpoint so he films him as he delivers his message. He then shoots the cameraman.
* The Man Who Laughs, give his "Hello, goodbye, you're all going to die" speech, then execute either a really patient camera man or else a camera on a tripod.
* The Man Who Laughs is a beautiful and virtuous blind girl and the primary love interest of the protagonist.
* The Man Who Laughs. One of the first signs something is off about Josiana is the location her fiance takes her on their date: a fight match where people beat the holy hell out of each other with bare knuckles. She really has a thing for the disfigured.
* The Man Who Laughs sported in the film adaptation, is not a horror novel, but rather a melodramatic romance with swashbuckling adventure elements.
* The Man Who Laughs: When Gwynplaine is escaping the House of Lords he is set upon by a mob wielding pitchforks and torches, and is forced to climb over rooftops to escape them. Although, given the confusion of the many different plot threads at the moment, it's unclear if they're after him, after the escaped criminals, or just really enjoy rioting.
* The Man Who Mistook His Wife for a Hat: A man suffered brain damage from drug use and, as a collateral effect, gained a dog-like sense of smell for a few weeks. After the effects wore out, he says the world felt gray and flat and devoid of

beauty.
* The Man Who Never Missed, Lord Thomas Reserve Shamba replied to a surrender demand with the message: "To the Commander, Confederation Jumptroopers. Sir: Fuck you. We stand until the last man falls."
* The Man Who Never Missed The Confed's military uses an implosion bomb to finally take out Khadaji, once they figure out that he's the sum total of the 'Shamba Scum' resistance movement.
* "The Man Who Never Returned" (or just the "MTA" song) is a song about a man who is forced to live on the subway train when he can't afford to pay an exit fare on the Boston underground. His wife didn't seem to want him out though, since she passes him a bag lunch through the window every day, but can't she slip him a couple bucks to cover the added cost?
* The Man Who Never Was. It isn't this trope straight because the body that was used was that of a man who had died of pneumonia – there was no murder at all.
* The Man Who Read John Dickson Carr if he'd remembered to lock the door.
* The Man Who Saves the World has a pair of golden boots made from melting down his golden sword. One would presume this is supposed to be important, but like everything else in this movie it makes no sense and is never explained.
* The Man Who Saves the World prologue reveals a backstory bigger than many movies' plots that completely fails to make sense, as apparently mankind has homogenized in the Galaxy Age, and the Earth got blown up once or twice, but that's okay because they've built a force field made out of human brains to protect it now.
* The Man Who Saves the World, this one stands out as the single most hilariously bad special effect of them all.
* the man who's cleaning up. Or, heaven forbid, the little brats shown making the mess in the first place as in many of these commercials, a group of holy terrors who look old enough to do their own damn cleaning up are the ones responsible for the epic messes the women are left to deal with.
* The man whose name Houdini took was Robert-Houdin, who did his best to subvert the version of the trope common in his day - by replacing the traditional orientally dressed sorcerer with the gentlemanly
* The Man Who Shot Liberty Valance bullies everyone in town and causes trouble because he knows that none of them could best him in a gunfight. Any time Tom Doniphan approaches though Liberty does little more than mouth off a little because he knows that Tom would kill him if guns were drawn. Doniphan himself feels this way about Ransom Stoddard in regards to Hallie.
* The Man Who Shot Liberty Valance is a textbook example... Especially when it comes to the part about hating himself for it.
* The Man Who Shot Liberty Valance the pro-rancher candidate claims to do this. However, When the "notes" he so dramatically screwed up and threw away are examined they turn out to be blank paper. The "words from his heart" was the speech he had memorised all along.
* The Man Who Sold the World floated around in the mid 70's that almost perfectly replicated the packaging of the original US release, aside from the speech bubble on the back being slightly too low. The audio is noticeably poorer quality, being sourced from a legitimate LP dubbed to tape then back to vinyl, but the bootleg was convincing enough to appear in bargain bins in mainstream brick-and-mortar retailers.
* The Man Who Sold the World where Bowie's face takes up >90% of the cover space.
* The man who trained the Australian commandos, Freddie Spencer Chapman, was himself trapped behind enemy lines in Malaya for over three years. Like the Australians on Timor, he was presumed dead, but lived out the war with Communist guerrillas and wrote a memoir,
* The Man Who Used the Universe, what turns out to be this gambit on a galactic scale is one of the final stages of the hero's ultimate plan.
* "The man who was falling down a very tall cliff". Which was about a man who was falling down a very tall cliff and each week met new interesting people or experienced surprising events.

* "The Man Who Was Never Born" turns the formula on its head by having the monster (Andros, a deformed mutant from a far-flung Bad Future) be the protagonist, who seeks to undo the very future he was from.
* The Man Who Was Thursday. A police infiltrator to an anarchic society whose members are named after the days of the week (hence the title) has challenged Wednesday to a duel by threatening to pull his nose. At the end of the duel, Wednesday (for reasons unrelated to Thursday's superior skill) attempts to escape and still salvage some honor by demanding that Thursday complete his threat. The nose comes completely off, revealing that Wednesday is disguised.
* The Man Who Was Thursday really throws readers for a loop, even taking its subtitle, "A Nightmare" into account. The confusion is even addressed in the book's dedication to his friend E. Clerihew Bently, in the form of a poem:
* The Man Who Was Thursday Sunday begins sending inexplicable messages that terrify the members of the council:
* The Man Who Was Thursday: The protagonist is recruited as a secret agent so secret that none of the agents know who any of the other agents are. There are several moments later in the book where he discovers that some person he was suspicious of is actually one of his colleagues (and was, equally unknowing, just as suspicious of him).
* The Man Who Was Thursday, which is somewhere in between a spy novel and a metaphysical tract. It's something like a martini glass filled with LSD and a splash of martini. Considered by some the first spy novel.
* The Man Who Was Too Lazy To Fail, plays with the trope: the title character is as smart as he is lazy, and ends up a naval aviator and later becomes an Admiral because every step along the way was easier than sodbusting back on the family farm.
* The Man Who Would Be King are venturing into the unknown, following the records of a mapping expedition some years earlier. They come across a member of that mapping expedition, who says that he was stranded from civilization by a landslide that killed all of the others. This raises the question of how that map that got Daniel and Peachy that far made it back to civilization in the first place. Presumably either someone else did survive but was stranded on the other side of the landslide, or they'd sent back a courier with what they'd mapped already prior to the disaster.
* The Man Who Would Be King at a train station, only to realise he's a fellow Mason. He then boards the train and blames an Indian passenger for the loss of the watch so he can return it. Kipling points out that he noticed his watch was missing... back at the station.
* The Man Who Would Be King (both short story and film). Getting yourself acclaimed as a god in order to take over (and loot) a country is fine, but when you start believing it you're officially entering the realm of hubris. At least he realised what he had done in time to apologise to his best friend.
* The Man Who Would Be King, but find they must appease the powerful religious faction in the process.
* "The Man Who Would Be King" reveals that the reason Crowley, the King of Hell,
* The Man with No Name and finding out he wouldn't have much longer to live because of his actions.
* The Man with No Name of the title is pictured wandering aimlessly around rural Japan before he comes into the village where the events of the film take place. In fact, he finds his way there by following the direction pointed out by a stick he tossed in the air.
* The Man with No Name, the (10th) Doctor laments his inability to lie convincingly in this regeneration several times.
* The Man With No Name, with a character commenting on "these new Wanted posters which show how he's changed his appearance".
* The Man with One Red Shoe: Agents bugging Tom Hanks' hotel room have to make a hasty exit. Jim Belushi, having to use his bathroom, discovers that flushing the toilet causes faucet to run, etc.
* The Man with One Red Shoe) has the scheming deputy head of the CIA trying to

frame the actual head so that he can have his job. The head knows this and lets slip that someone who can foil this plan very simply will be arriving at the airport. He then sends his aide to meet any random person at the airport, so that the deputy and his men will follow them and try to find out what he knows. The aide picks a rather head-in-the-clouds musician, who's wearing a pair of mismatched shoes because of a practical joke.
* The Man with One Red Shoe, the agents think Richard is doing this when he repeatedly flushes his toilet. In reality, they put his bathroom plumbing back together so poorly, he has to flush the toilet to get the sink to work.
* The Man with One Red Shoe, Tom Hanks' character is shot in the rear-end with several tranquilizer darts. As they begin to take effect, he says, "No, mom! I'm not watching TV! I'm practicing! I'm practicing!" Then he mimics playing the violin before passing out.
* The Man Without a Country: He is effectively exiled to international waters, and his shipmates are ordered to never speak of the United States in his presence.
* The Man Without a Face. 14-year-old Chuck persuades 47-year-old Justin McLeod to tutor him over the summer so he can pass the entrance exam to boarding school. Needing a father figure, Chuck becomes attracted to Justin, and Justin probably reciprocates, but Justin tries to keep things within strict bounds. It's hinted that when Justin was a teacher at the same boys' boarding school Chuck wants to go to, he may have had some sort of a relationship with a boy Chuck's age, who was killed in a car crash when Justin was drunk driving. Justin ended up in prison over this and feels deeply guilty about it — both things for reasons not entirely spelt out.
* The Man Without a Face features a disfigured recluse (played by Mel Gibson) who agrees to tutor a troubled young boy over the summer. Their friendship sparks suspicion amongst the town residents. (Of course, in the book...)
* The Man Without a Face to get into a prestigious military school and has sought out the title character as a tutor for the entrance exam.
* The Man Without a Face, which will get Chuck away from his mother and older sister, whom he hates. Needing a father figure, Chuck becomes attracted to Justin, who mentors him, and Justin probably reciprocates the attraction, but Justin tries to keep things within strict bounds. It's hinted that when Justin was a teacher at the same boys' boarding school Chuck wants to go to, he may have had some sort of a relationship with a boy Chuck's age, who was killed in a car crash when Justin was drunk driving. Justin ended up in prison over this and feels deeply guilty about it — both things for reasons not entirely spelled out.
* The Man Without Qualities. Musil couldn't figure out how to conclude the final volume.
* "The man without whom this world falls into chaos, and the inventor of SUPER-TOAST!"
* The Man with the Golden Gun. 007 receives gold-plated bullet → Theft of device used for controlling solar energy.
* The Man with the Golden Gun. After Bond and Scaramanga finally meet, Scarmanaga shows him around his island and explains his operation, concentrating on the solar energy collection setup.
* The Man with the Golden Gun. After Bond leaves, the real Scaramanga puts on an appearance — turns out Scaramanga and Hai Fat are in business together.
* The Man with the Golden Gun Andrea Anders at a boxing venue so she can give him the Solex Agitator. When he gets there he finds her dead - murdered by Scaramanga.
* The Man with the Golden Gun as the villains have caught up with him again.
* The Man with the Golden Gun attempting to kill M → plot to assassinate psychotic Cuban hitman.
* The Man with the Golden Gun: Bond disconnects a phone call from M to make out with Mary Goodnight.
* The Man with the Golden Gun. But despite these self-doubts, he refuses to let that shake his incredible loyalty to queen and country.
* The Man with the Golden Gun, but is arguably saved by pulling off an incredible spiral-jump that could only have suceeded with Bond behind the wheel.

* The Man with the Golden Gun: Describing the title character so Bond will recognize him at the "Bottoms Up" club, an associate can only manage a general description of "tall, slim, and dark". ("So's my aunt.") When she indicates that he has three nipples, Bond allows it's a "fascinating anatomical tidbit" as well as "the most useless piece of information" he's ever heard unless Bottoms Up is a strip club and the man is performing. Though he doesn't remark on it later, it turns out that the first part is actually right.
* The Man with the Golden Gun). During lunch, Scaramanga challenges Bond to a duel to the death, and Bond accepts.
* The Man with the Golden Gun example, as it details the inner workings of how MI-6 (nee Universal Exports) deals with people claiming to be James Bond.
* The Man with the Golden Gun". Fortunately, Lee saw the funny side, quipping "Not now, Stanislaus".
* The Man with the Golden Gun, Francisco Scaramanga carries out assassinations using a one-shot golden gun. He has so much pride in his skills that he will only use one bullet to kill a person. He later challenges Bond to a duel, allowing Bond to use his six-shooter while he sticks with his one-shooter. He does carry a second, ordinary gun, just in case he's disarmed.
* The Man with the Golden Gun from the previous film, Sheriff JW Pepper, as a tourist in Thailand.
* The Man with the Golden Gun has a plotting board example in a Chinese air defence room.
* The Man with the Golden Gun) has one of these in his lair. In the opening segment he uses it to slide down and grab his golden gun to kill an assassin.
* The Man with the Golden Gun: James Bond accidentally swallows Francisco Scaramanga's bullet (in the belly button of a belly dancer) thanks to a heavy-handed thug. Later Bond quips: "You've no idea what that went through to get here."
* The Man with the Golden Gun, James Bond finds a woman swimming naked in a swimming pool. She invites him to join her, and he politely declines until she asks again. The people he was waiting to meet interrupt him before he can cast off his clothes.
* The Man with the Golden Gun: James Bond is kidnapped by Hai Fat and taken to a martial arts school, where he is forced to fight the students. In a formal combat like this the opponents are supposed to bow to each other first. While Bond's opponent is bowing to him, Bond takes him out with a surprise attack. The next contestant only bows partway, keeping his eye on Bond the whole time.
* The Man with the Golden Gun, James Bond is trying to navigate Scaramanga's lair and walks into a clear glass wall.
* The Man with the Golden Gun, James Bond stands on the shoulders of Lt. Hip, Bond's contact in Hong Kong, to get a view into Hai Fat's residence. Despite seeing loads of security, Bond hops the wall and lets himself in.
* The Man with the Golden Gun J.W. Pepper, who's last seen being taken away by Thai police.
* The Man with the Golden Gun". Lee, who was trying to avoid being typecast as Dracula, appreciated the joke.
* The Man with the Golden Gun plan on summoning Bond until Andrea's interference brought him into the plot.
* The Man with the Golden Gun, Scaramanga killed his first man in his backstory as a Circus Brat when he shot the policeman who shot his elephant friend who had went into an amok run.
* The Man with the Golden Gun: Scaramanga's entire reason for saving Bond's life and bringing him to the island. He wants a challenge, and doesn't want to spoil it by shooting the only man who can match him while he's unconscious.
* The Man with the Golden Gun, Scaramango kills the assassin that his underling, Nick Nack, sent to kill him, to keep his skills sharp. This takes place near a statue of James Bond, posed fire a gun with his right hand, and his left splayed out. After killing the assassin with his one-shot Golden Gun, Scaramango picks up his weapon and flawless shoots of the fingers on the left hand of the Bond effigy.
* The Man with the Golden Gun tells his to Bond while watching a kickboxing match.

* The Man with the Golden Gun- the real meat of the story is that Scaramanga has abused his girlfriend one too many times and she has duped Bond into going after him by making it look like Scaramanga has taken a contract on his life.
* The Man with the Golden Gun, this is actually why Bond is sent against "Pistols" Scaramanga in the first place. After being brainwashed by the Soviets and nearly killing M, the head of MI6 decides to send him against the world's most dangerous gunslinger alone. Either he succeeds, or he dies and suffers a just punishment for treason.
* The Man with the Golden Gun, this is how James Bond defeats Scaramanga, disguising himself as the statue of himself in Scaramanga's lair to trick him and get him to lower his guard. Also done earlier in the film by Nick-Nack and a pair of sumo wrestlers to trick Bond.
* The Man with the Golden Gun, when Bond faces 2 sumo wrestlers. After beating one off, he gets carried by the other, and tries to beat him, to the beat of the soundtrack no less- but the guy doesn't even flinch. Bond has to give the poor wrestler a painful wedgie in order to escape.
* The Man with the Golden Gun, when Bond talks to Miss Anders about Scaramanga:
* The Man with the Golden Gun. When not cooking, serving drinks, or hiring killers to off his boss as a training exercise, he personally goes to the field on Scaramanga's orders.
* The Man with the Golden Gun, which has aided his reputation for only needing one shot.
* The Man with the Golden Gun while trying to plant a tracking device on it. (Fortunately, it still functions.)
* The Man with the Golden Gun, who later played Dracula, Saruman, and Count Dooku. The latter ranks as one of the most popular henchmen, especially due to his height.
* The Man with the Iron Fists has several such scenes, as the main character is a blacksmith.
* The Man with the Iron Fists — Martial arts series. 2 films since 2012.
* The Man with the Iron Fists. Nice cinematography but the dialogue is pure kung-foolery.
* The Man with the Iron Heart: The Nazis still lost World War Two, but they mounted a post-war insurgency effective enough to make the Western Allies withdraw from their zones at the end of the book, in 1947. The Soviets, on the other hand, are adamant that they will never leave their occupied zone.
* The Man With The Iron Mask, Phillippe is rescued from prison by a pardon; earlier, the king had asked why, and the minister had explained it was the release of a minor offender to celebrate his clemency.
* The Man with the Power (his father was an alien). With the help of a college professor, he learns to harness his gifts for the betterment of mankind.
* The Man with the Red Tattoo, and his friend finishes the ritual by decapitating him.
* The Man with the Red Tattoo has to deal with a Japanese nationalist terrorist who is a "Dark Lord" of the fictional Ryujin-kai yakuza gang.
* The Man with the Red Tattoo is shot in the head by a bad guy just as he is going to tell Bond and his partner Reiko about the eponymous villain's whereabouts. A chase involving fish and a sword fight ensues.
* The Man with the Red Tattoo, the eponymous villain's plan consists of releasing altered mosquitos carrying a deadlier strain of West Nile disease within a G8 summit conference held in Japan, and organize more attacks like it in major cities around the world.
* The Man with the Terrible Eyes: After the Man gains the upper hand in their fight, the Supervisor offers the Man the chance to be an equal partner with him in Iotech rather than a test subject if he stays. The Man wants nothing more to do with any of them at this point and refuses.
* The Man with the Terrible Eyes: A variant with electrical powers rather than a physical weapon. After he's won their fight and has the Supervisor on the ground at his mercy, the Man stands over him and is torn between the desire to kill him after all he'd done to him and his disgust at the thought of murdering him in cold blood.

He eventually decides to let him live.
* The Man with the Terrible Eyes, but he sees him as something he can experiment with, spy on, and eventually kill if he needs to.
* The Man with the Terrible Eyes: Early on in their relationship Dog growls and lunges at the Man after he walks home in the dark. The Man thinks he's about to get mauled, but Dog is actually after the shadow being that was standing right behind him that he hadn't known was there. This is what convinces the Man that Dog can be trusted.
* The Man with the Terrible Eyes, employees at Iotech are subjected to memory rewrites, torture, human experimentation, gunfire, explosions, and monstrous shadow monsters being released from the cells in the basement. No one ever gets in trouble for all this. Probably helps that the Supervisor has done worse.
* The Man with the Terrible Eyes is a surreal horror series about a lowly office worker with inexplicably terrible eyes and how the background weirdness of his life slowly becomes more and more overwhelming.
* The Man with the Terrible Eyes: The Man's dog, named Dog, is a very big and very friendly dog (or at least something that looks like a dog), as long as you're not a shadow monster or someone trying to hurt his master.
* The Man With the Twisted Lip, Holmes investigates what looks like a criminal matter and finds there isn't even anything illegal going on.
* The Man With The Twisted Lip. While not his primary objective, Holmes does prove that the titular man did not abscond with the missing man while figuring out what happened to him.
* The Man with Two Brains, but it's heartwarming because Hfuhruhurr doesn't care about her weight.
* The Man with Two Brains. Cue thunder, lighting and the portrait spinning around while the voice of his wife wails "Nooooo, NOOOOOO!". "... Any Sign at all..." replies Martin. Later, he's slightly upset that she didn't give him any warning.
* The Man with Two Brains Dr. Hfuhruhurr consults with his boss, who spends the conversation with his index fingers placed pensively against his upper lip. At the end of the conversation, the doctor asks when the operation to separate his fingers from his lip will happen, and notes that superglue is something you have to be careful with.
* The Man with Two Brains: Dr. Michael Hfuhruhurr eventually becomes one of these — or, rather, a parody of one:
* The Man with Two Brains, Dr Necessiter opportunistically removes the brains of a serial killer's victims and keeps them alive in jars.
* The Man with Two Brains. Gorgeous body, but her voice makes it all too easy to contemplate murdering her.
* The Man with Two Brains he's been dating into the body of his evil wife.
* The Man with Two Brains is a neurosurgeon who encounters and communicates with a lady's brain.
* The Man with Two Brains is stopped by a traffic cop while attending a conference in Austria; when asked if he has been drinking, he replies "No, I dron't dink... don't drink".
* The Man with Two Brains lab just so Steve Martin can do the pinball routine near the end of the movie.
* The Man with Two Brains's character, while driving in Europe, is stopped by a policeman who speaks to him in French with subtitles. When the policeman realizes that Martin's character can speak English, he has the subtitles turned off, happily remarking "Now we have much more room down there!"
* The Man with Two Brains, she won't consummate the marriage, but she'll do just about anyone else.
* The Man with Two Brains: Some policemen attempt to use one to break into an apartment.
* The Man with Two Brains speak English and orders his colleague in the car to turn the subtitles off ("That's better - we have more room down here, yah?").
* The Man with Two Brains, Steve Martin asks his late wife (by talking to her portrait) for her approval to marry an incredibly hot new wife. The painting starts

spinning while you hear her moaning "No. No. NO. NOOOOOOOOOOOOOOOO". When it stops, Martin says "Anything. Any little sign at all." He really wants Turner.
* The Man with Two Brains, Steve Martin is teased by his new bride, and when he steps over to the French doors (lots of little glass panes), we hear the sound of glass breaking. He looks down. And again when he stands up with his hat on his lap. Let's just say he doesn't need to hold it there with his hands.
* The Man with Two Brains that occurs, he's a bit too decent and moral to actually kill in order to achieve his ends.
* The Man with Two Brains, the brain surgeon Dr Hfuhruhurr has developed the "cranial screwtop" method of accessing the brain, which consists of unscrewing the top of the patient's head.
* The Man with Two Brains. To make it not so weird, Dr. H. sticks a set of fake lips to the jar.
* The Many Adventures of Winnie the Pooh and forever jolly and unflappable. When the others finally succeed in un-bouncing him however, the result is such a depressed broken shell, they are left heartbroken and completely go back on it.
* The Many Adventures of Winnie the Pooh, but it lacks elements that would draw in older kids, teenagers, and adults.
* The Many Adventures of Winnie the Pooh Eyeore's explanation for how Piglet's house is Owl's house qualifies. But Pooh invokes this trope when he points out how they keep finding a sand pit when lost in the mist, which leads to him deducing that they should look for the pit instead to find their way home by accident. This leads to Rabbit deciding to prove this idea false, subverting the trope at first, only to double subvert it when it turns out that Pooh's plan is partially true; actively searching for the pit results in Rabbit not finding it, nor home.
* The Many Adventures of Winnie the Pooh featured "Woozles-in-a-Boxes."
* The Many Adventuresof Winniethe Pooh has elephants, weasels, and jaguars called Heffalumps, Woozles, and Jagulars. The first two are based on how the real Christopher Robin pronounced the animals' names. Jagulars haven't been seen in the franchise at all.
* The Many Adventures of Winnie the Pooh is a full return to harmless wacky antics.
* The Many Adventures of Winnie the Pooh is still one of Disney's most marketable names.
* The Many Adventures of Winnie the Pooh manages to help Tigger do so, but finds himself trapped by his promise to never bounce again, especially by Rabbit who revels in finally getting that annoyance out of his hair. However, Tigger proves to be such a profoundly mournful figure trudging away that the gang immediately decide to release him from his promise and pressure Rabbit to go along with that.
* The Many Adventures of Winnie the Pooh, Piglet for some reason has a wooden sign above his front door that is apparently broken, reading "Trespassers Will" (presumably short for "Trespassers Will Be Prosecuted", or even "Trespassers Will Be Shot"). According to Piglet, Trespassers Will (short for "Trespassers William") is his grandfather.
* The Many Adventures of Winnie the Pooh: Pooh does this with bees during "Winnie the Pooh and the Honey Tree."
* The Many Adventures of Winnie the Pooh received its own VHS release in 1988, with additional dubbing made to its original opening credits narration.
* The Many Adventures of Winnie the Pooh returns Kanga to her original book portrayal.
* The Many Adventures of Winnie the Pooh shorts with new linking material.
* The Many Adventures of Winnie the Pooh. This version includes the same voice actors from the 1990 dub of "Tigger Too", except for Pooh and the narrator. Interestingly, this dub also re-uses several songs from the 1984 version (such as the theme song and "Heffalumps and Woozles" for example), while other songs were either partially ("The Rain, Rain, Rain Came Down, Down, Down" and "Hip-Hip Pooh-Ray") or entirely ("Little Black Rain Cloud" and "A Rather Blustery Day") re-dubbed.
* The Many Adventures of Winnie the Pooh, Tigger "bounces" Rabbit and destroys his garden.

* The Many Adventures of Winnie the Pooh was given a home video redub in 1997, which was used for all subsequent releases. This time, the voice actors here (except for Christopher Robin, Rabbit, and the narrator) reprised their roles from the 1993 dub.
* The Many Adventures of Winnie the Pooh, when Piglet hears that the next story will be about bouncing, he hastily excuses himself with the following:
* The Many Adventures... (Pooh, Piglet and Rabbit) and Henry Djanik (Owl; also voiced Eeyore in the new version) reprising their character roles from the original dub. The new dub was only released once on VHS and laserdisc, as all future home media releases contain the compilation edit of the original dub.
* The many and various groups and individuals trying to kill Bambi and retrieve the stolen child in
* The Many Dates of Danny Fenton, all amazing heroines who have adventures and fight evil before being involved with him.
* The Many Dates of Danny Fenton: As Danny notices to his shock, even Katie's parents are afraid of her.
* The Many Dates of Danny Fenton: Blind dates or not, Danny is very open-minded to (most) of the girls he has gone out with. You'd have to be in order to be okay with dating a spy, a robot, a ghost, a mutant, an alien, etc.
* The Many Dates of Danny Fenton: Bonnie Rockwaller's pen name for the dating service is "Bodacious Bonnie".
* The Many Dates of Danny Fenton, both are blonde and are as nice as they come, if somewhat spunky.
* The Many Dates of Danny Fenton: Danny experiences this in chapter 39 when he finally figures out who he wants as his perfect match.
* The Many Dates of Danny Fenton: Danny Fenton always starts his dates by giving the girls a bouquet.
* The Many Dates of Danny Fenton: Danny is still 14 but has gone out with girls one or two years older than him, and has still expressed genuine interest in them.
* The Many Dates of Danny Fenton: Danny meets many, many superheroines.
* The Many Dates of Danny Fenton due to her powers. When something sets her off, she turns into a monster that's nearly unstoppable.
* The Many Dates of Danny Fenton: During his date with Violet, Danny meets her ex-boyfriend, Tony Rydinger. Despite the awkwardness, Danny still treats Violet well enough that she soon opens up to him.
* The Many Dates of Danny Fenton fanfic: Even when girls give Tuck a chance despite his misleading profile, his lame come-ons cause them to leave.
* The Many Dates of Danny Fenton fight over who will attack Danny and Musa during their date.
* The Many Dates of Danny Fenton getting punished by Mindy's parents for getting covered in garbage, Danny and Jazz, who saw that he was trying to save Mindy, call them out for not properly watching over their daughter.
* The Many Dates of Danny Fenton: Happens to Danny and sometimes his date after they kiss.
* The Many Dates of Danny Fenton, has Danny overshadow Shego. At first, he takes a moment to admire her figure, but stops himself from going any further because Kim needs his help.
* The Many Dates of Danny Fenton: In chapter 14, "A Date With DISASTER!", Danny witnesses Vicky giving Timmy an atomic wedgie right after stealing a rare Crimson Chin comic from him.
* The Many Dates of Danny Fenton: In "Danny and Starfire", Starfire being an alien princess is one of the reasons Danny is briefly afraid things won't work between them.
* The Many Dates of Danny Fenton. In series, Danny isn't seen as remarkable looking by his coeds at Casper High; but most of the girls he has gone out with, younger and older than him, consider him cute.
* The Many Dates of Danny Fenton, instead of girls who would actually like him.
* The Many Dates of Danny Fenton. In the author's notes, he reveals that when he came back to finish the job, Wuncler immediately died of shock... while on the

toilet.
* The Many Dates of Danny Fenton is able to recognize Ami Mizuno when she's Sailor Mercury while he was transformed as Brainstorm. Either whatever magic protects their identities had no effect on his alien forms or Brainstorm was too smart to fool.
* The Many Dates of Danny Fenton is stated to be taller than Danny, thought it doesn't diminish his interest in her.
* The Many Dates of Danny Fenton.): It's shown that Danny used to have a big crush on fellow hero Supergirl before the accident...which resurfaces when he goes on a date with her civilian self Kara.
* The Many Dates of Danny Fenton kissed him that he wants more than just a pretty face who would do more than just kiss him. Felicia thinks he means something else and gives him a dirty look. He clarifies he meant someone he can get along with.
* The Many Dates of Danny Fenton makes Danny go on another "date" with her when she runs into him at a carnival and Danny is too terrified of her monstrous transformation when angered to say no. Though it doesn’t stop him from running away from her the first chance that he gets.
* The Many Dates of Danny Fenton: Most girls Danny shows the mutual interest in make it ambiguous which one he chooses.
* The Many Dates of Danny Fenton: Not believing Dipper's claim that there's nothing wrong, Danny says "Yeah, and I'm a blonde...".
* The Many Dates of Danny Fenton: Occasionally Danny has discovered the double lives of his dates and promises to keep their secret safe.
* The Many Dates of Danny Fenton, or being a superhero like Kara or Kitty.
* The Many Dates of Danny Fenton, since her condition is treated as a serious threat by Danny.
* The Many Dates of Danny Fenton since the girls Danny goes out with are considered attractive to some point, regardless of their moral alignment. One exception could be Vicky, since Danny, even before being exposed to her nasty nature, couldn't bring himself to call her pretty.
* The Many Dates of Danny Fenton's interest in Danny formed due to a series of misunderstandings.
* The Many Dates of Danny Fenton slaps Dash for harassing her and Danny during their date. He did not take that well.
* The Many Dates of Danny Fenton. Some of the girls are older than Danny yet he manages to win them over.
* The Many Dates of Danny Fenton stopping to help people while on her way to a date with Danny.
* The Many Dates of Danny Fenton.): The entire premise of this fic is Danny being set up on a series of blind dates with girls from other fandoms.
* The Many Dates of Danny Fenton.): The few times Danny has dated a superpowered girl and they simultaneously discover each other's identity, they decide to use their powers to have fun during the rest of their date.
* The Many Dates of Danny Fenton.): The final chapter (59) involves a series of bloops and outtakes over the "filming" of the story, even involving an over-stressed director.
* The Many Dates of Danny Fenton. The premise of the original fanfiction is Danny going on blind dates for a month with a girl from each of those other franchises. Spin-offs that take place with whomever he chose as his girlfriend would involve meeting other charaters.
* The Many Dates of Danny Fenton): The story's writer FlowerPrincess11 occasionally makes an appearance, as she is the one who runs the dating service.
* The Many Dates of Danny Fenton: The You+Me=LOVE! Dating Service employees, based on the authors of the main story and its spin-offs, appear human to the characters, yet demonstrate subtle hints there is more to them. The head of the service, based on the original author, was able to appear in Clockwork's tower on her own. One of them was present for Kim Possible, Gwen Tennyson, Makoto Kino and Starfire to sign up on the same day in different towns at one. One is even able to break the fourth wall, like Deadpool.

* The Many Dates of Danny Fenton, though it does nothing to diminish Danny's interest in them.
* The Many Dates of Danny Fenton to keep her from losing her temper and going on a rampage, Katie says she loves him after forcefully kisses him back for THREE MINUTES! It's no wonder he fainted after all of that.
* The Many Dates of Danny Fenton transforms into a dangerous monster every time she gets angry, it seems that she is in the dark about it and the large about of damage that she causes. In fact, the Warner brothers even point out that even in her monster form, she doesn't really hurt people.
* The Many Dates of Danny Fenton: Two words: Suga Mama. Unlike Oscar, Suga Mama was more supportive of Penny and Danny's relationship, largely because she senses Danny's basic decency.
* The Many Dates of Danny Fenton was not only Danny's first date, but also the first girl he liked out of the month's worth and he still thought fondly of her afterwards.
* The Many Dates of Danny Fenton: When the Snippet based on the timeline where Danny chooses Jen is adapted into a spinoff, it's revealed that falsely accusing Danny and Jen of stealing his tickets is an idea Dash got from a movie.
* The Many Dates of Danny Fenton, who flirts with him in and out of costume.
* The Many Dates of Danny Fenton with You+Me=LOVE! that both Danny and Tucker sign up for.
* The Many Deaths of Rainbow Dash, the first thing she does—after getting over the initial shock—is to gleefully make us of the opportunity to pull off a couple of death-defying (or rather, death-causing) stunts, such as flying out of the atmosphere or taunting a dragon. Later, Applejack and Pinkie Pie have Rainbow guide them through a trap-filled corridor, since she doesn't mind getting repeatedly killed.
* The Many Deaths of You games, still common in later works. "Serious" games tend not to have a million ways to kill you, except in the horror genre.
* The Many Deaths of You: There are usually so many ways to die that it's hardly possible to see them all.
* The many foramina in the human skull would make it very impractical to use as a container for wine the way Karl does in "Oathkeeper".
* The Many Horrors Of Being A Tokyo Waitress how to properly molest train-passengers. Peak cringe is reached in the Ms. Hibiki scenes.
* The Many Horrors Of Being A Tokyo Waitress main character Jonas has a very creepy forced smile until he is told that he's scaring the customers and instructed to use some other facial expressions.
* The Many Horrors Of Being A Tokyo Waitress most of the characters work as crossdressing waitresses at a gay bar. It is just a job, and they get used to it. Jonas, the main character goes home wearing the costume to save time.
* The Many Loves of Dobie Gillis, cannot bring himself to say the word "job." He also reacts with a terrified yelp to the word "work".
* The Many Loves of Dobie Gillis. The series was named that for good reason, as just about every week Dobie was chasing a new girl who he thought was the love of his life.
* The many, many efforts to make a coherent timeline out of the series have led to endless
* The many, many stories that had Twilight Sparkle ascending into an alicorn and being named a princess.
* The Man Your Man Could Smell Like ad, and you should get Hulu without ads if you're not into ads. "I'm on an ad."
* The Man Your Man Could Smell Like ads are so popular. Who needs to listen about the bodywash once we know that it gives men the ability to build kitchens, bake cakes, and swan dive into motorcycles in hottubs?
* The Man Your Man Could Smell Like increased by a whopping 150-200%, and (more importantly) Old Spice is no longer thought of as "that aftershave your grandpa wears." One gets the feeling that Procter & Gamble management is currently laughing its way to the bank.

* The Man Your Man Could Smell Like indicate that he's something like this. Since he's portrayed as the ideal man, it's not surprising.
* The many Pili Taiwanese drama series are in this setting. Unlike other wuxia examples, these series are actually
* The many possible hilarious situations that would ensue with two Twilights.
* The Many Saints Of Newark lookalike Vera Farmigia. Based on the trailer, she also speaks and acts very similar to Carmela.
* The many scientists in the first game are exaggeratedly nerdy eggheads, and many of them are shown dying in morbidly hilarious ways.
* The Many Secret Origins of Scootaloo catches Fluttershy giving Twilight Sparkle mouth-to-mouth, and immediately spreads the word that Twilight is cheating on Rainbow Dash. Twilight and Rainbow Dash aren't even dating.
* The Many Secret Origins of Scootaloo. Characters will reference something unbelievable, then the story will cut to reveal such an event is happening.
* The Many Secret Origins of Scootaloo, Pinkie Pie tries to convince Twilight Sparkle that Scootaloo fights crime as The Mysterious Mare-Do-Well, but Twilight protests that they both, as well as Fluttershy and Applejack, invented the MMDW themselves and donned the costume as a prior scheme. And also, she can clearly see Pinkie's costume hanging out of a closet over there. Pinkie Pie insists that she's mistaken.
* The Many Secret Origins of Scootaloo where the whole story was a dream Nightmare Moon was having, she's married to Discord, Twilight is their infant daughter, and Scootaloo is Twilight's doll.
* The Many Sons Of Winter's backstory, Robert Baratheon was dealt a terrible wound at the Battle of the Trident, though he remained a formidable warrior. However, unknown to even his closest circle, the wound never healed right and if he exerts himself too much, he needs some seriously strong anaesthetic to stop the pain.
* The Many Sons Of Winter, since the North's culture is much stronger and she never manages to get any of her children to become more southern-like. Extra points since her original family's sigil - House Tully - is a trout.
* The many sprites in the Ministrife were drawn by a fan with apparently pretty broad discretion, and so they included a number of nods to the fandom, particularly the canonization of the popular fanon that, under his helmet, Mituna has dandelion hair - thick,
* The Many. They can often be heard begging you to run or to kill them even as they attack.
* them any thought because of their pudgier physiques, and Teri & Ian were outright disregarded as fodder. While Derek & Drew did end up being formidable opponents, so did Ken & Gerard and Teri & Ian, who both edged out Derek & Drew to make it to the Final 3. The twins lost not because they got beat in some head-to-head competition, but simply because they couldn't find a clue.
* the many tropes examined when she wore extra-large fake breasts, as compared with her normal bust and when she bound them.
* the many ways Telly's song is interrupted. He even looks around for the cause incredulously.
* The Many Worlds Interpretation But as the Ultimate Truth is so embarrassing, both conspire not to let the Caltech gang, especially Sheldon, know the awful reality.
* The Many Worlds Interpretation by respectful Caltech students. She isn't sure if she likes it or not and it reminds her she's just turned thirty. She wonders how soon her own students in Ankh-Morpork will promote her to one.
* The Many Worlds Interpretation. Magic meets science, a flat earth intrudes on the physics and cosmology of a spherical one, dysfunctional intellects clash in the context of a university full of egotists and oddballs...
* The Many Worlds Interpretation manages to get the blade stuck in the target. Apparently Assassins' Guild students don't do much better at their first go either, and encountering something carefully crafted to simulate reality is yet another corrective to over-confidence.
* The Many Worlds Interpretation spacecraft he doesn't know how to pilot. Penny rages with frustration at being close enough to see the International Space

Station, only to be told it doesn't have a tractor beam installed to haul them to safety. She heatedly points out that every freaking spacecraft in every freaking show you guys watch has a freaking tractor beam installed as standard.
* the Maori conquered and all but wiped out the Moriori people. This is what allowed the invasion.
* The Maori do one better. Maori men not only went into battle naked, but considered an erection a sign of courage.
* The Maori forest god Tane made Hine out of earth and breathed life into her, technically becoming her father. They then married, but upon discovering the truth of her parentage, Hine was so shocked that she ran into the underworld to become the Goddess of Death. Wonder what she would've done if she saw the examples above...
* The Maori people of New Zealand have many legends surrounding the mountains that dominate the country, the most well-known of which concerns several personified mountains (though it's mainly Taranaki and Tongariro) fighting each other for the love of the female mountain Pihanga. In the end, Taranaki is defeated and forced into exile and ends up creating many of the surrounding features of his current location before settling down.
* The Maormer (Sea Elves) are said to tame and use sea serpents in this fashion.
* The map also alienated many Heroes. The low value of taking towers lowered the power of siege heroes; the drastic distance between lanes and tendency to group up for fights at carts made roamers and gankers less useful; the constant moving of carts made characters that took time to set up fights less useful; and the game being over so fast meant late-game heroes never came into their strength. All of this combined to ensure this map had the lowest roster of viable characters. This could be a bit annoying for a ranked game, but Quick Match is the most played mode and this tendency made it even more hated. Picking any hero that is not built for team fighting was dangerous when there was a chance of being thrown into Hanamura and forced to play a game as
* The map editor allows the player to essentially create their own haunted hotel by using the hotel map tileset. Within, the player can use standard creepy furniture and even dungeon tiles for possibly a deadly basement.
* The map for the franchise as a whole is Wake Island. It originally came with
* The mapmaker gives you directions like this in a delivery mission in
* The Mapmakers Race, the Satander kids' pet bird, "plop" as Humphrey puts it on some rivals' playing cards.
* The Map Room in Churchill's Cabinet War Rooms fits the definition here.
* The maps in the DC Heroes Roleplaying Game (which aren't necessarily canon in the comics, but hey, we've got to start
* The maps in the game are pretty huge, and that's all well and good, but walking anywhere takes
* The Maquis. Average Federation colonists who found themselves under the Cardassians after a treaty in which they had no say. They won numerous engagements against both the Cardassians and Starfleet, with large numbers of Starfleet officers even defecting to join the 'good fight.'
* The Maquis freedom fighters were attacking Cardassians, but while based outside Federation space they were still technically Federation citizens, making it very testy—if not an outright race—as to whether Starfleet was going to find them and stop them, or the Cardassians were going to find them and kill them.
* The Maquis. The Federation colonies organize militias to fight back when the Federation government won't, and are helped by sympathetic Starfleet officers.
* The Maquis turned some small "courier vessels" into fighters by fitting aftermarket weapons, but seeing as they were more or less a variant on
* The Maquis were rebelling because they felt the Federation sold them out. In fairness, the Cardassians were committing
* the Mara (as a particular very powerful semi-deva) and the race of demons ruled by Mara itself. The ten hell realms are also often portrayed as ruled by sadistic maras who torture the denizens, however should be notice that as everything in Buddhism, the maras are also living beings who eventually die and be reborn in

something else.
* The Marat are seen to be barbarians by the human Alerans because they violate this idea and would eat their enemies remains, some would even eat the people while still alive, to take the dead enemy's strength.
* The Marathon trilogy features the Trih Xeem, the 'early nova device' actually used by the Pfhor at the end of Marathon 2. It seems to do what the name implies, cause a star to go nova which would wipe out pretty much anything of consequence in the surrounding system (the planets, moons etc would probably still be there, just with their surfaces pretty much scoured and then left uninhabitable). It is implied that the Pfhor, being the
* The Marauder mocks the Doom Slayer with, "Your father was a usurper. Your mother, a heretic. And you, a FALSE idol."
* the Marauders give a time-traveling Harry and his new friends a group hug at the end of Harry's first year at Hogwarts.
* The Marauders. The well known four (including a Peter who never betrayed his friends) but adds Lily and Severus to the mix. The brightest minds of their generation.
* The Marauders would be another, at least when they were young, having actually broken the law by not registering to become animagi, and being a bit jerkier.
* The Marble Machine), which is a hand-cranked analog computer that plays a xylophone, drum kit, and guitar by dropping ball bearings on them.
* The Marcabians in the episode "Secret of Easter Island" of the animated series of
* The March 2020 updated added a character who was so secret they're not even listed on the Character Select like every other locked character. To unlock them, you need to find an
* the March 27, 1995 strip, when Jon and Garfield go on a vacation on Guano-Guano island:
* The March 4, 1987 strip has Arlene berate Garfield because he's rude, obnoxious, fat, selfish, egotistical and totally devoid of any charm. Garfield objects that he isn't egotistical.
* The "March Across Maltak" for its heavy focus back on the orcs and long length of over a year.
* The March Across Maltak storyline. Said arc started January 2009, with an accompanying blog post wishing everyone an "
* The March/April timing of the blooms do however coincide with major legislative breaks. While most of the American public sees this as yet another congressional vacation, for Congress it's a time to go back and visit with the constituency and discuss the progress of new legislation, so there is some symbolism still.
* The March first shows up on a video call to Freelancer HQ complaining about getting shorted on a job. S/he (it?) appears to attack the heroes in the war for Phang dozens of issues later.
* The Marching Morons ends with most of the earth's (by then rather dim) population migrating to Venus, lured by tales of idyllic countryside and delicious ham bushes. Needless to say, the rockets actually headed into the sun.
* The Marching Morons features this in cars, which have speedometers that go to somewhere around 200 MPH and exhausts that literally belch fire, both purely for effect. The modern-day "protagonist" notices that when the speedometer reads 140 he feels like he's going maybe 60, and then later notices that the engine roar cuts off a fraction of a second AFTER the car stops (because it's an effect added to make it seem like the cars are faster and more powerful than they really are).
* The Marching of the Fey by the German gothic metal band Atargatis describes the descending of the angels from Heaven to destroy the Humanity for its sins.
* "The March of the Batterwitch" uses a kettle pot boiling and other sounds common in a kitchen to make a fitting theme for the diabolical Betty Crocker.
* The "March of the Giants" game played by the Mane Six. Their characters even have a rampage through an evil pony baron's castle, literally crushing any opposition from the tiny Mooks with some lucky dice rolls. Applejack's character even (accidentally) kills the baron by

* The Mardu Horde of Tarkir are very enthusiastic about combat, to the point where their Khan is a massively aggressive orc with the abovementioned attack-each-turn drawback. They have a clan mechanic that gives them bonuses for attacking, such as increasing the power of spells or giving creatures cast after the dust settles a useful enters-the-battlefield effect. Their
* The Maretian, after the ponies spent a sol grooming for photos sent to NASA, Mark Watney proudly claims, "I am, after all, the most popular and exclusive spa host on the whole planet." Remember that they are stranded and alone on Mars.
* The Maretian is mounted backward relative to the rover carrying it. Thus, the steering of the landing gear used as wheel must be reversed from whatever direction the rover is taking, leading to a lot of confusion and frustration for the designated pilot (Fireball). This is later solved by putting two half-circles of metal with graduations that are mirror-imaged over the respective steering wheels.
* The Maretian: On Sol 234, Starlight doing a test with the magic batteries to create a temporary magic field results in a spontaneous song for the Equestrian castaways, and Mark Watney gets caught into it. After the song ends, the human is rather amazed, but Starlight and Fireball inform him that they don't talk about it — ever. And that means, stop talking about it.
* The Maretian, this is the basis of the Sparkle drive, which by the start of the fic can teleport a ship four meters forward, 250,000 times a second (which is about 0.3% of lightspeed).
* The Mare Who Once Lived On The Moon, she does have a worrying enthusiasm for the then-new discoveries of atomic science. And is entirely insane.
* The Margaret Weis Marvel Heroic Roleplaying books mention certain characters as being included in supplements that either only existed briefly in PDF format (Professor X in Civil War: X-men Supplement), or never appeared at all (Black Bolt in Annihilation: War of Kings).
* The "Marge Gets a Job" episode has Bart pretending to be sick to get out of taking a test. When he returns back to school in perfect health (even running up the wall to prove so), Mrs. Krabappel informs him that he now can take the make-up test, which then prompts him to hold his stomach and crying out "Oh, my
* The mariachi owls talking about how Rango will lose his "cojones". Also his nuts.
* The Marian Conspiracy: Well, no characters die during the actual play. It is established that Rev. Thomas will be executed later, thereby setting history back on its correct course.
* The Maria-Theresien Academy in Austria. Established in 1751 and the oldest military academy in the world.
* The Marine: 2 for each team - Knightman or Magnetman work to defend their teammates in different ways, while Tomahawkman and Napalmman specializes in wide area attacks.
* The Marine Base Commanders wear the scarlet and gold shoulder chevrons of a First Sergeant (on the utility uniform, no less), are always saluted and addressed as "sir", and, when they are given names, have varying officer ranks.
* The Marine-centric meta has resulted in the plasmagun being the special weapon of choise to augment basic infantry weapons. It has a medium range, medium strength and high enough armour penetration combined with multi-shot capability to enable it to reliably kill space marine infantry. The other types like flamers, sniper rifles & grenade launchers are too low strength or too low penetration or both, while the high powered meltagun is single shot at a very short range making it ineffective for squads designed to fight other infantry. Even though the gun has always had a downside that it can blow up and kill the user, it has never been out of favour. 8th edition made it even more well liked by introducing the ability to power down the shot reducing the strength but removing the explosive potential. It feels like the designers simply gave up trying to balance it with other guns, and gave it the downgrade option to allow them to increase the points cost while giving the player an option to avoid blowing up their expensive gun.
* The Marine Corps' attitude is that anyone who could be deterred by a Code Pink picket line wouldn't have the willpower to survive boot camp anyway. They're

probably right.
* The Marine Corps Martial Arts Program or MCMAP, also affectionately referred to as "Semper Fu". A play on the motto of the U.S. Marine Corps
* The Marine Corps spent most of its life without dedicated special forces units. When the Marine Raiders were established during World War II, many Marines were offended by the concept of an elite force within an elite force and the implication that Raiders could be tougher and more capable than any given Marine. The units were subsequently disbanded. However, Force Recon has been around for many decades, and many would consider it a special operations force in all but name. Technically it's merely a "Special Operations Capable" force. As of August 2014, the Marine Special Operations Battalions are being renamed as Marine Raider Battalions. This applies only to the units themselves, the personnel in those units are still Marines,
* The Marine, of course, where kidnapping the wife/relative(s) of a Marine proves to be the worst idea a group of criminals ever had.
* The Mariner's crew considers him one after shooting an albatross, his ship's good luck charm, in
* "The Mariner's Revenge Song" is basically one guy telling another guy who he is inside of a whale.
* The Marines also lay claim to Force Recon (phasing out) and MARSOC as their elite level badasses.
* The Marines are shown saluting officers while in Vietnam. This is a big no-no. You do not salute officers in a war zone because it immediately identifies the officer to the enemy, making them a target. Another error: in the scene with Joker explaining his "Born to Kill" graffito, the officer initiates (just barely, but still) the salute. Wrong: the junior rank initiates the salute, always, in every branch. This was
* The Marines don't get off that easily either as they suffered massive casualties, lose
* The Marines embark on a mission that may likely involve contact with unidentified, hostile forces, commanded by an unsupervised, inexperienced officer.
* The Marines have Garp and arguably Sengoku. It says something that Garp revealing that he's actually going to take part in a battle is one of the few things that actually made
* The Marines have their own technique known as "Soru" that involves kicking the ground AT LEAST TEN TIMES IN THE BLINK OF AN EYE to move vast distances in short periods, easily surpassing sonic speeds.
* The Marines have the Spartan Assault Tank, an up-armored, up-gunned, and enlarged Land Raider that can carry 25 marines or 12 Terminators. They have something even larger, the Mastodon, with a capacity of up to 40 marines or 20 marines with 2 Dreadnoughts.
* The Marines take this to the next level, are known for being one of the most tightly-knit military organizations in existence, and will rag on each other relentlessly. But while the Marine Corps motto is Semper Fi, their fine print pretty much reads "
* The Marine: the Dinobots, especially Grimlock. Ironhide also qualifies.
* The Marine, the police cruiser commandeered by Triton to chase his wife's kidnappers gets shot to hell, crashed into and slammed repeatedly, had close encounters with some explosives, and doesn't slow down one bit.
* The Marine unit has a large variety of helmet decorations, like wolf/tiger/panda faces or a
* The Marine was mostly shot in Queensland, Australia but set in South Carolina.
* The Marine when they're designed to take some abuse before they go off in real life. Otherwise, oxygen tanks spontaneously combusting would be the number one killer of the elderly.
* The Marine with one. Triton defends himself with a wrench, which gets sawed in half, but manages to force Roman to drop the chainsaw.
* The Marin Rose. He summons his Knights of the Round Toadstool, portrayed by Miss Spider's children, to fetch the Marin Rose, but warns them that the quest will be

filled with "pitfalls and perils." Bounce shouts "Huzzah!" and Squirt tells him that pitfalls and perils are dangerous things. "They are?" he asks. "Can I take back my huzzah?"
* The Mario Bros. themselves have quite a few shippers. The reasons given vary from them being among the very few human males in the canon that aren't outright
* The Mario Bros. themselves, unless you go with the "Mario Mario and Luigi Mario" explanation (which
* The Mario Brothers tend to be underestimated by villains when Mario, Luigi, or both first meet them. Even the villains who recognize them underestimate just how strong they are.
* The Marionette is tied up by his arms from ropes suspended from the ceiling in a way that evokes the game's title.
* The Mario Opera, Ludwig summons and brainwashes Luigi into being a Koopa-killing machine.
* The Mario Opera, Luigi is brainwashed into being a killing machine, but when he hears "Your Princess is in another castle" he'll become docile.
* The Mario Opera, Mario is initially devastated over killing a Goomba, as while it was evil, it was alive and sentient.
* The Mario Opera, Mario's doubt and anger at killing the first Goomba soon fades as he realizes how right it felt, and before long he's slinging fireballs and jumping on Koopas with abandon.
* The Mario Opera, the infamous first Goomba is the first challenge Mario faces, and jumping on it changes the power dynamics almost instantly.
* The Mario Opera uses this as the basis for much of the story. Everyone except Mario knows the truth of his situation, that he's a video game character, creating much angst for him and general doubt and confusion.
* The Markab went from thriving race to virtually extinct over the course of a single episode, thanks to a plague that many of its victims refused to acknowledge having caught, as an old folk tale claimed that only the sinful could catch it.
* The Mark & Brian Radio Program, which emphasizes how cruelly they kill the animals to get the best taste out of the meat.
* The Mark and the Void: A farce about the banking system that takes its characters seriously and packs in a lot of social and political criticism.
* The Mark and the Void, Claude and Ish are good friends at work. Ish clearly has feelings for him, but Claude never returns them and pursues other romantic relationships.
* The Mark and the Void is even mentioned by name, and Paul uses "Dr. Cyrano" as a pseudonym when talking to her.
* The Mark and the Void, this backfires hilariously when Paul and Igor set up Claude with an earpiece so he can ask Ariadne on a date. Paul's suggestions are unhelpfully conversational, and Igor's are distractingly sexual, and Claude becomes so distracted and embarrassed that he bolts out of the interaction without asking her out.
* The Mark and the Void with almost no moral scruples. Meanwhile, his colleagues are incredibly pretentious and self-absorbed and are comically oblivious to Paul's schemes.
* The Mark continually sees this logo out of the corner of his eye while driving to the meeting subliminally conditions him to choose that crate to check.
* The market, however, did eventually notice when Nintendo attempted a successor, the
* The marketing department rebranded it as the "Awesomepocalypse", but
* The marketing on this this one is actually pretty specifically aimed. Kids aren't likely to buy DLC, and slightly older kids who might buy some of it probably wouldn't spend their money on something extra if they don't recognize it. The
* The mark has a pretty good chance of just giving the psychic the information outright once they're on the right track. For instance, if the psychic says they're hearing the voice of someone and starts sounding out the first letter of a name, chances are good the person will then blurt out the name of someone they knew with that letter in their name. After all, once the person is hooked, they're likely to

want to "help" the psychic, or just hysterical. At that point, all the psychic needs to do is tell them what they want to hear.
* The Mark of Athena, Annabeth, Piper and Hazel meet Venus, who isn't very different from Aphrodite. Her appearance changes to make Annabeth jealous.
* The Mark of Athena in order to pass the cult of Mithras, a child of Athena must pass the test of the knife or the flame. Annabeth encounters the bodies of children of Athena killed by these tests and realizes that she has little to no chance of surviving either, so figures out a different way around the test.
* The Mark Of Athena: Piper, Hazel and Annabeth meet Aphrodite, Piper's mother. After their conversation, Piper feels hurt that her mother barely looked at her or spoke to her, and thinks that maybe, having successfully become Jason's girlfriend, Aphrodite no longer finds Piper interesting and has moved on to better stories.
* The Mark of Athena seems like another joke at Frank's expense, with him never having seen them before (and being a little annoyed at the name, as he's part-Chinese)—but Annabeth ends up using the design of the toy to trap Arachne.
* The Mark Of Cain turns its bearer into a heartless evil murderer who loves brutally killing everyone, and has the potential to turn them into a demon
* The Mark of the Dragonfly: Piper works as a machinist, and is one of the best in her scrap town. Jeyne is the head engineer on the 401 train.
* The Mark of the Dragonflyturns out to be a lifelike robot, who was herself unaware that she wasn't a human.
* The Mark of the Horse Lord: Murna has walled off her real personality in order to protect herself from her mother the Queen's all-consuming love.
* The Mark of the Horse Lord's hero is an ex-gladiator who masquerades as a tribal king. He wins his freedom in the opening scene by killing his best friend.
* The Mark of the Lion and Gaius and their friends, who are very canny and manipulative.
* The Mark of the Lion begins the series as one; he is apparently quite skilled at seducing his family’s female servants with a mere glance, despite his string of girlfriends on the side.
* The Mark of the Lion John the Apostle, who is this trope in the most literal way possible.
* The Mark of the Lion series, where young noblewoman Julia poisons her violently abusive suitor to be rid of him. It's tempting to count this as an inversion since he was such a vicious brute, but considering Julia goes on to condemn the heroine Hadassah to be fed to lions in the Colosseum, it's still a pretty straight example (at least until both women get better in the second book).
* The Mark of the Lion wish they had this effect on the gladiators, but Julia is the one to have it (accidentally) on Atretes.
* The Mark of the Rani's Doctor, Anthony Ainley's Master and Kate O'Mara's Rani, and it is glorious.
* The Mark Of The Tala. Andromeda first encounters her father's enemy and future husband, Rayfe in a meadow—to which she found herself pinned to the ground and agreeing to a kiss in order to be released. Surprised when Rayfe bites her on the lip, Andromeda leaves her knife lodged in his shoulder, allowing her to flee.
* The Mark of Zorro, a 1920 silent film, Zorro instructs his allies to ride black horses on their night's mission to rescue some unjustly jailed prisoners. The soldiers that pursue them conveniently all have light-colored horses, making it easy for viewers to keep track of which band of riders is which.
* The Mark Remark: Fans asked him to stop having to take a pee break instead of actually talking about the women's matches. So Martin makes sure the next time not to eat or drink anything for days before recording, which just makes him pass out.
* The Mark Remark is longer than the other series, but still has several jokes a minute.
* The Mark Remark: Refers to shows as "The John Cena Show." The lesser stars are even called "Not-John Cena."
* The Mark Remark "revealed some very revealing images... of his enormous, hard, throbbing car".
* the Mark Shaw Manhunter, who eliminated all of these groups, absorbing the

personnel though persuasion or brainwashing.
* The Mark Side in both the comics and show. All of which have been instances involving Mark.
* The Marksman is supposed to take place along the Mexican border in Arizona but many scenes clearly show the Sandia mountains next to Albuquerque in the background. It should be noted that most locations in Arizona along the border look nothing like the high Desert of Central New Mexico.
* The Mark Steel Lectures profile of Rene Descartes (see above) includes a spot where Mark invites the audience to stop and think about whether they exist for twenty seconds (with "Life is But a Dream" playing behind) ended with a buzzer and the message "Stop Thinking Now!".
* The Mark Steel Solution, who was constantly writing absurd letters of complaint to anyone and everyone. He would always end by reading one he'd started, that went "Why, oh why, oh why, oh why, oh why, oh why..." before admitting that "That's as far as I've got with that one, but it's coming along, don't you think!?"
* the Marleyan Warrior Program always present. At one point, the audience is introduced to a batch of Candidates that are being tested....by being taken to the front lines and expected to serve as the vanguard of a major combat operation. The survivors get to return home with the dubious honor of being veterans at the tender age of 12.
* the Marley vs. Eldia conflict. Marley, at the very least, seems to not care about civilian deaths so long as they can get rid of the Eldian empire as well as Paradis Island and its inhabitants. If recent chapters are any indication, Eren is willing to kill civilians in order to make a statement to the enemy.
* The Marnuck, another Ganglion race, are mentioned as having a culture revolving around warfare, and they see slaughtering their enemies in battle as a tribute to their chief deity (who also happens to be their god of death). Unlike the others, they get no characterization and are simply
* The Marquee Bruce Santee is instantly recognizable thanks to his goatee.
* The Marquis de Favras, upon being handed his death warrant, was quoted saying, "I see that you have made three spelling mistakes."
* The Marquis, is a former Catholic Inquisitor who fights demons that have infiltrated human society.
* The Marra, as well, are subject to this. Energy beings who are not able to die but can also not create new Marra (or, if they can, they have
* The Marran God of Fire series), there are two mechanical mules built by Alfred Canning for Annie Smith and her friend Tim O'Kelly. The children name them Caesar and Hannibal and ride them to the Magical Land, where the mechanical mounts become alive and, like the dog Totoshka, are able to talk.
* The marriage between 50-year-old Steven Steel and 14-year-old Lucy Pendleton in
* The marriage between Darren and Mileena Reyne is one of these. At least from her side, it is also a
* The marriage ceremony of the Himba people in Namibia and Angola includes a ritualized version of this where the husband and his family "kidnap" the bride and take her home with them.
* The Marriage Chronicles and similarly boasts the concept of following multiple couples and their love lives, but the film comes down heavy on the "saved" aspect of Christianity and it's all married couples.
* The Marriage Chronicles, Ethel gets the chloroform rag treatment and conks out immediately.
* The Marriage Chronicles, Ethel is alternately intrigued and horrified at his formerly staid wife's burgeoning sexuality.
* The Marriage of Figaro, after the Count has been shown up by Figaro, Susanna, and Countess Rosina, he asks his wife to forgive him. She does. This despite the fact that:
* The Marriage of Figaro as well. Of course, by the end of the song, all are discovered.
* The Marriage of Figaro by the Baltimore opera company The Figaro Project included an actor playing Lorenzo DaPonte as narrator, and the characters argued with him

about where the story should go in between arias.
* The Marriage of Figaro. Contrary to popular belief, though, he approved Mozart's opera adaptation from the start, as being a self-admitted apolitical he had already removed the offending material.
* The Marriage of Figaro is a bloodless variation of this — characters in an endless cycle of messing with each other's heads in revenge for what they did earlier in the show.
* The Marriage of Figaro, Susanna and Marcellina insult each other in song while fighting over Figaro.
* The Marriage of Figaro teems with zany schemes. To stop the Count getting his aristocratic hands on Susanna, for instance, she and her fiance Figaro decide to outwit him by arranging an assignation between her and the Count but sending the page Cherubino dressed as a girl in her place. When the plan is rumbled they hit upon a new one: this time neglected Countess will disguise herself as Susanna and meet her own husband in the garden. Hilarity ensues, to the accompaniment of some of the most meltingly beautiful music ever written.
* The Marriage of Figaro that all subsequent adaptations of the plays are compared to Mozart's version of the story, rather than Beaumarchais':
* The Marriage of Figaro, the character interested in marrying Figaro turns out to be his mother, and says something like she always loved him — just in the wrong way previously.
* The Marriage of Figaro, the melody of the Figaro's remarks to Cherubino, "Non più andrai" can be considered as this.
* The Marriage of Figaro. The third act wraps up so many storylines, the fourth act can just seem unnecessary. It's when Basilio sings an aria telling an irrelevant story about when he was a younger man that the fatigue really sets in.
* The Marriage of Maria Braun opens with the eponymous heroine getting married during a bombing raid, no less. After the marriage, her husband leaves for the Eastern Front the day after and they don't see each others for years.
* The marriage of Prince William to middle-class Kate Middleton was of major significance to the media. While the Middletons are multimillionaires, they were not noble.
* The Marriage of the Slave King, Second passes off Sombra's injuries after his torture as the result of falling down several flights of stairs. Repeatedly. Bizarrely, this actually works.
* The Marriage Settlement whispering into her ear, his words evidently having a powerful enough effect to attract and keep her attention until their deaths. Silvertongue by name, silver tongue by nature.
* The Marriage Stone, most high ranking officials would rather just assassinate Snape all together, in order to gain Harry's hand in marriage.
* The Marriage Stone, where Harry has to marry Snape in order to avoid the machinations of the Ministry, but before long the marriage may determine the fate of the world.
* The Marrying Kind, Chet Keefer doesn’t have a job due to an injury, and his wife Florence has to get one. He, of course, didn’t want her to, but there was nothing else they could do. Mind you, this is during the 1950s when the norm was that the husband holds the job while the wife manages household affairs.
* The Marrying Kind, Chet works the night shift a lot and Florence complains about this, but he explains that he worked for the benefit of her and the kids.
* The Marrying Kind is annoyed by his wife's view on love and marriage, and thinks she is too influenced by romantic films.
* The Mar Sara magistrate is thought to be Matt Horner (except his belated biography makes it clear he's not, plus the magistrate left in the novel Horner was introduced in), or Myles Hammond (who was at least
* The Marshal, about an apparent ghost who seemed to be, or think he was, Wyatt Earp in late-1970s California. His appearances, though, were always preceded by a whistling noise somehow identified as being used by Sioux warriors, and no one could find any record of Wyatt Earp ever meeting a Sioux. At the very end of the book, it was found that Earp's grave was right next to that of a Sioux — and

something had caused the Indian's headstone to fall against Earp's.
* The Marshal as Winston MacBride, a US Marshal whose job involves think-on-your-feet detective work.
* The Marshall Mathers LP 2 as well known. "Berzerk" hit #3 because it was the album's lead single which had strong first-week sales; meanwhile "Rap God" is hailed as one of Eminem's all-time greatest tracks, and arguably even eclipsed "The Monster" in public consciousness.
* The Marshall Plan album, has Suzie, the faithless girlfriend who abandons Johnny at a rock concert to run off in the band's limousine. This motivates Johnny to become a rock star himself, in the hope this will win her back.
* The Marshall Tucker Band's best-known song, "Can't You See?" fizzled out in the mid-70's, while their highest-charting, "Heard It in a Love Song", hit the Top 15!
* The Mars Volta's lyrics also seem to be made of word salad (as well as their titles), but after a few late nights of research on the fan forums, you can begin to deduce the meanings.
* The Mars Volta song "Televators" has a lyric "Mark these words/ One day this chalk outline will circle this city."
* The Mars Volta, to the point where it's arguably the dominant tendency of their lyrics. Sample excerpt: "I've caught mono bobbing for barbed wire / These nasty sores of ataxia will feel the sting of the opiate copulation." It's not entirely clear what that means, but it's creepy, to say the least (particularly in the context of the song itself).
* The Mars Volta (various members, namely Isaiah "Ikey" Owens, Thomas Pridgen, and Deantoni Parks)
* The Mars Volta: While they are a notoriously eclectic act with a wide span of genres, they have extremely prominent jazz elements, particularly free jazz, jazz fusion, and Latin jazz, and are generally accepted as jazz-related.
* The Martell brothers. Doran's relationship with his wife Mellario all but dissolves due to fighting over cultural differences and they've been estranged for years. Meanwhile, Oberyn maintains a easy, stable relationship with his paramour Ellaria Sand. Ironically, Oberyn is known for being the more argumentative one.
* The Martian, after the plan to send supplies to Mark Watney fails, Mark sends Major Martinez an email asking Martinez to talk to Mark's parents if he doesn't survive his ordeal on Mars. The movie keeps the request but has Mark ask Commander Lewis to do it instead.
* The Martian (aka the Carl Sagan Memorial Center) in order to communicate with NASA. At the same time, NASA retrieves its earthly duplicate to figure out how to communicate with it again.
* The Martian. A NASA executive wonders what could be going through Mark Watney's head when the man is stranded all alone on a distant planet with little hope of survival. It then cuts to Mark in his habitat on Mars, listening to "Turn the Beat Around".
* The Martian and its film version are basically nothing but this—it's two hours of teams of scientists and engineers trying to bring Mark Watney home from Mars after he's stranded there by a freak storm. If anything, the book goes into even more detail about the science and math involved.
* The Martian: At the climax of the movie, a rescue attempt at Mars is broadcast live to Mission Control and around the world. The scene cuts back and forth between the events happening at Mars and the reactions from those back at Earth, even though it was expressly stated that Mars was 12 light minutes away, which means the scenes at Earth are happening 12 minutes later than the scene at Mars.
* The Martian, at the very end, when Mark Watney is addressing a class of new entrants to NASA's Astronaut Candidate Program:
* The Martian but ultimately not used. After he's stranded Mark Watney checks the remaining supplies and mentions that there's enough morphine for a lethal dose. He decides that if his food runs out he'll take the morphine to spare himself a long death by starvation.
* The Martian. By international treaties, Mars is international territory governed by maritime law; by maritime law, commandeering a vessel in international waters is

piracy; ergo: "That makes me a pirate! A space pirate!"
* The Martian Child decide to make the main character a widower rather than gay.
* The Martian Chronicles a Space Jesus representation to some aliens, but it turns out that they've had their Jesus Analogue and are well aware of The Faith.
* The Martian Chronicles features a man who, after a Martian colony was abandoned, is one of the last humans on Mars. He enjoys it for a while.
* The Martian Chronicles has a Martian parent talking to a child, assuring it that there can't be any life on Earth, because of the excessive amounts of oxygen.
* The Martian Chronicles (it still has fresh bacon and eggs to make the uneaten breakfasts with, and the master's dog is still barely alive). Though humanity hasn't been wiped out completely, human civilization has essentially suffered the same fate as that of the Martians', dead and remembered only by those few survivors (Human or Martian) left.
* The Martian Chronicles until they started landing on the planet, which the Martians attempt to resist as much as possible. Eventually, the Martians die off from a mild Earth disease and humans are all that remain on Mars.
* The Martian Chronicles. While they were perfectly fine being telepathic by themselves, the sheer novelty of thoughts emanating from the first handfuls of human explorers were enough to drive them completely insane, resulting in the rapid downfall of their civilization and the destruction of the entire species.
* The Martian Commander's robot drones suddenly go on strike halfway through an episode of
* The Martian consulted extensively with NASA to ensure an accurate depiction of the Mars mission, to the point where the Ares missions in the movie are based on actual NASA plans for similar missions in the 2030s.
* The Martian, Donna Summer's song "Hot Stuff" switches from Mark's stereo in his rover to the soundtrack.
* The Martian for the long journey between Earth and Mars. Unlike other depictions, the astronauts are shown floating freely about the center of the ship, only experiencing the increasing pull of shipboard gravity as they descend via ladder into the spinning section.
* The Martian General's Daughter by Theodore Judson the Trans-Polarian Empire controls North and Central America, Eastern Asia, Western Europe, the Baltic nations, North Africa and Turkey as well as Mars, the moons of Jupiter and Saturn and several asteroids. It's in a state of decay however. It used to control the entire northern hemisphere of Earth and by the end of the book the other world colonies have died due to a metal eating plague and both North Africa and Central America have fallen out of it's sphere.
* The Martian he used to get himself out of whatever predicament he'd been in beforehand.
* The Martian hurdle, so the filmmakers obviously decided to make the most of it.
* The Martian, "If we are going to have a secret project called 'Elrond', then I want my code name to be 'Glorfindel'." Bonus points when you realize that since Glorfindel was never in the films, Teddy must have read the books and not just watched the movies.
* The Martian, in keeping with the book as described in Literature, below. The very limited interpersonal conflicts that do come up are all built on disagreements about precisely how to solve the problems that everyone is dedicated to beating. Summed up in a film-exclusive line by Mark Watney: "You solve one problem. Then you solve the next, and the next. And if you solve enough problems, you get to come home."
* The Martian In the book, the second use was suggested, but ended up not being necessary.
* The Martian, in the events of a failure of the hab's main communication equipment, the Ares III mission had three redundant comm devices... unfortunately for Mark, they were all in the now-departed Mars Ascent Vehicle.
* The Martian. Iris, the resupply probe that NASA intends to send to Watney is launched without going through its final preflight quality checks since those take several days and Watney's on a bit of a time crunch. The rocket carrying it

explodes shortly after launch.
* The Martian is a sci-fi story that grossed well over $600 million worldwide and appeared in many critics "Best of 2015" lists. It was nominated outside the technical awards that sci-fi usually falls into at the Oscars — getting nominations for Best Picture, Best Actor and Best Adapted Screenplay.
* The Martian, leaving him with nothing but her collection of 1970's disco to listen to.
* The Martian Manhunter used this term almost verbatim on Lex Luthor in the first season of Justice League, when Lex Luthor is outwitted for the first time by the teamwork of the Justice League, something Superman can't do by himself. This marks the shift of Luthor's grudge from Superman to the entire Justice League, and also the increasing trend of supervillain team-ups since the existence of the Justice League made it tougher for the villains to act alone.
* The Martian: Mark identifies a type of battery by a set of "subtle clues", the last of which is the label printed on it.
* The Martian Mark Watney and him trying to think his way out of every problem that appears in his attempt to survive (and later escape) Mars. (The book dives pretty deeply into the breakdown of his every idea in how to survive, because it is mostly written as Mark's log entries.)
* The Martian, Mark Watney survives on Mars for two years on vitamin pills and potatoes (for the calories) grown using his own feces as fertilizer.
* The Martian (much higher than originally planned). The concept is apparently so novel to the NASA scientists that the man who suggests it has to physically act it out.
* The Martian or the fact that he is also a Mechanical Engineer, but their omission from the movie doesn't really change that much from the book.
* The Martian Pilot Martinez asks computer programmer Johanssen whether she can can override the computers on the ship, and gets a long technical explanation:
* The Martian: Played for gallows humor by astronaut Mark Watney in the first chapter.
* The Martian put it, "This isn't some hackneyed cautionary tale about the dangers of exploring the unknown, it's a high-stakes procedural about the awesome power of knowledge, which has placed Watney in one of the most impossible situations imaginable mainly so it can thrill us with detailed depictions of smart, dedicated people figuring out how to get him out of it."
* The Martian rover has started referring to watt-hours per sol as milli-pirate-ninjas.
* The Martians actually do this twice. The first time (a direct assault on London, shown during the intro movies) it backfires because they underestimate the humans' firepower. They then change their landing site to Scotland, which works much better - whichever side you play the campaign as, the Martians
* the Martians eventually do decide to destroy the earth; by then, however, humanity
* The Martians get around in a standard, house-sized, black saucer in
* The Martian sports this, which keeps the astronauts in shape during the long journey to and from Mars during the Ares missions.
* The Martian's status with students acknowledging them as such and saying it was an honor to meet them.
* The Martian: Subverted. The team putting together Watney's care package need more time, so they opt to skip pre-flight checks on the rocket they're using, since they only detect errors 5% of the time. Sadly, 5% of the time is not none of the time, probability is a harsh, harsh mistress, and the rocket explodes shortly after launch.
* The Martian, then kisses his EVA helmet. Earlier astronaut Martinez is talking to his wife back on Earth, and presses his hand against the computer screen image when she raises her own hand.
* The Martian the right spot to kill the vitals monitor and cause him to be mistakenly left for dead. There technically are backup radios, but they're all on the MAV and get evacuated with the rest of the astronauts. Finding some way to call

for help takes most of the first quarter of the book.
* The Martian to edit the most interesting or amusing footage together for the news networks and NASA's official YouTube channel. Being able to see the crew's faces would be for the benefit of people watching those videos.
* The Martian to save him, but even on an interntional level everyone is working towards keeping him alive and bringing him home safely.
* The Martian to save him, but we don't see anyone who isn't fully committed to the same goal.
* The Martian types wonder how traumatized the main character has been by being stranded alone on Mars, and what he's thinking at the moment. It turns out that he's thinking:
* The Martian used this trope several times, presumably because having Mark Watney typing the journal he's keeping (as seems to be the case in the novel) with a voiceover would have been rather less interesting on-screen.
* The Martian was (obviously) not filmed on Mars, but in Wadi Rum, Jordan, a red-colored desert on Earth.
* The Martian Way": A colony of miners on Mars are threatened by Straw Environmentalists putting an embargo on water exports from Earth. The miners hatch a plan to send their "scavengers" (pilots tasked with catching used rocket stages for recycling) to grab one of the ice fragments in Saturn's rings, which is only possible because they're psychologically tough enough to endure the long, isolated trip.
* The Martian Way appear to have their own local governments because they sign trade deals with Earth.
* The Martian Way": Averted and explained. It's said that perhaps the spaceships didn't have to waste propellant to go around the asteroid belt, since, while on map it looks like a swarm of insects, it would take a serious stroke of bad luck to hit a rock.
* The Martian Way": Dora Swenson complains to her husband that she hates the way he would spend months away from home, wishing that he would find employment in any other job, as long as it was on Mars, so that they could actually live together and he would be present to help her raise their son, Peter.
* The Martian. When Commander Lewis opens the airlock door during a Martian storm, it slams her against the wall and the airlock instantly fills with wind-blown sand.
* The Martian, when Mark Watney receives a communication from Venkat stating that NASA is setting up a committee to determine if any mistakes were made that led to Watney getting stranded on Mars, Watney sends this reply:
* The Marvel Comics continuity, where Punch continued to explain the events that unfolded on Earth and Cybertron after the Ark took flight and before the Autobots and Decepticons aboard the spacecraft were reactivated in the 1980's.
* the Marvel comics is a good example of it. As the Decepticons were shooting at them and its squad was scrambling around, Prowl remained still as he tried to understand why the nearby cars (they were in a parking) were not running away.
* The Marvel family's transformation phrase probably falls under this. Back when
* The Marvel G1 comics also had Boltax, guardian of the Underbase who appeared as a regular robot. The robot was a puppet; Boltax himself is the Temple of Knowledge that housed the Underbase.
* The Marvellous Land of Oz, Glenda the Good possesses a magical white pearl that turns black in the presence of falsehood, which she uses to extract a confession from the witch Mombi.
* The Marvellous Land of Snergs, a shelter for abused kids is run by an all-female association managed by Miss Watkins. All members are presented as good-natured, compassionate women who are definitely competent at their jobs.
* The Marvellous Land of Snergs: Baldry, a jester, loves playing pranks and messing up with people. His penchant for tricking people got him executed or exiled several times.
* The Marvellous Land of Snergs by embedding three arrows in his head.
* The Marvellous Land of Snergs cackles raucously after tricking Gorbo into assaulting King Kiul.

* The Marvellous Land of Snergs gets rid of Gorbo by sending him to gather mandragoras on the other side of the wood; meanwhile, she calls the ogre Golithos and offers to hand over the kids -whom Gorbo was protecting- to him in exchange for his help.
* The Marvellous Land of Snergs: Justified in the case of the Snergs and the Dutch seamen who could have learned English to communicate with the colony. Though, it is not explained how the inhabitants of King Keul's realm, who have apparently spent a long time in isolation, can speak modern English fluidly.
* The Marvellous Land of Snergs: Lady Gwendolyne's paramour would like nothing better than to find Sir Percival and beating him into the ground for courting his lover, even though -as his squire points out- Gwendolyne already found an effective, non-violent way to dissuade Percival.
* The Marvellous Land of Snergs: Mother Meldrum is a decrepit, evil witch who lives in the heart of a dark forest and earns her livelihood by selling curses (among other things).
* The Marvellous Land of Snergs: Sir Percival, a foppish and cowardly knight in oversized armor is infatuated with Lady Gwendolyne, who does not reciprocate at all. With the purpose of getting rid of him, Lady Gwendolyne suggests him to go out and commit some heroic deeds while wandering around the countryside.
* The Marvellous Land of Snergs: Sylvia's mother barely pays attention to her daughter until Sylvia gets sick. When Sylvia goes missing shortly after, her mother frets for a while, but it is told she got over her daughter's disappearance soon.
* The Marvellous Land of Snergs: The bats inhabiting the Black Woods are large, noisy beasts with beaked snouts and a wingspan of two meters. Fortunately, they are very loud but not aggressive.
* The Marvellous Land of Snergs, the King's army is ill-suited to find and rescue two kidnapped children because the realm had been peaceable and secure for a long while.
* The Marvellous Land of Snergs (to be fair, she could not know about the existence of firearms).
* The Marvel Method put a lot of the storytelling responsibility on the artist's shoulders, and later led to considerable controversy (not to mention lawsuits) over who should get what sort of credit for "creating" the story, especially since towards the end, Kirby and Ditko supplied dialogue suggestions in boxes for Lee to follow. Nonetheless Lee deserves credit for creating an unified sense of style without which the Marvel
* The Marvel Netflix shows have gained a reputation for featuring villains that are relatively grounded in reality.
* The Marvelous Land of Oz about it.) Jellia claims to speak both "languages" and volunteers to translate, but instead makes up wild insults to tell each one that the other is saying. It's only after several cycles of both Jack and Scarecrow complaining that she's not translating accurately that she gets them to see the obvious fact that if they can understand her "translations", they can understand each other just fine without any help.
* The Marvelous Land of Oz, but are in for a nasty surprise when Glinda brings in her own all-female army who actually know what they're doing.
* The Marvelous Land of Oz. Given that it was a children's book published in 1903, it's not surprising that there wasn't much examination of this trope.
* The Marvelous Land of Oz. He is basically a wooden scarecrow brought to life by a magic powder. His pumpkin heads eventually rot, so he keeps a pumpkin patch to replenish them, and Ozma carves him a new face. The old heads are buried in a graveyard at his house.
* The Marvelous Land of Oz. However, given the date of publication (1903), it's highly unlikely anything else would have been considered acceptable.
* The Marvelous Land of Oz, Mombi becomes a full-fledged Wicked Witch, the former Wicked Witch of the North.
* The Marvelous Land of Oz, Scarecrow and his friends enter his palace (taken by rebels), and are captured immediately, to be brought before their leader. However: 1) the rebels are all women and 2) Scarecrow has recently met the Queen of the

Field Mice and asked for permission to take a few of her subjects along.
* The Marvelous Land of Oz, sees H.M. Wogglebug T.E. make a joke about the Sawhorse, noting that if he rode him, it would be a "horse-and-buggie". Jack Pumpkinhead covers up his permanently-smiling mouth, and the Tin Woodsman threatens the Wogglebug with his axe.
* The Marvelous Land of Oz, the Emerald City is conquered by an army of girls. As a result, men and women switch jobs. Apparently, the men cannot stand all the hard housework... and the women cannot stand their husbands' cooking.
* The Marvelous Land of Oz this with one of his insensitive puns, declaring: "In that event your head would no longer be a pumpkin, for it would become a squash."
* The Marvelous Land of Oz, Tip escapes the clutches of the pseudo-witch Mombi before she can turn him into a statue.
* The Marvelous Land of Oz, which, being made out of wood, requires neither food nor sleep.
* The Marvelous Land of Oz, who has no joints in his legs and, at first at least, has no ears and can't follow directions, starts out as this. Later, he is revealed to be completely tireless and the fastest ride in Oz.
* The Marvelous Misadventures of Flapjack about how out of shape he is.
* The Marvelous Misadventures of Flapjack actually helped a mermaid turn into a Skymaid.
* The Marvelous Misadventures of Flapjack After eating the entire birthday cake and getting a stern look from all the partygoers, Jayde says the line and smiles creepily as he fades away leaving an empty chair. It doesn't help that they play really eerie music as this happens.
* The Marvelous Misadventures of Flapjack. A giant apparently left his legs behind and Captain K'nuckles decides to steal them to substitute for his wooden legs. The giant wasn't happy about this when he returned.
* The Marvelous Misadventures of Flapjack, a mortified Flapjack awkwardly walks away whistling.
* The Marvelous Misadventures of Flapjack and follows its example with a lot of stop-motion segments. There's one in the opening credits, even!
* The Marvelous Misadventures of Flapjack and jumped off the whale/ship.
* The Marvelous Misadventures of Flapjack, and others as storyboarders, who would all later do their own shows. While despite the art-style being round, the outlines seem somewhat thicker.
* The Marvelous Misadventures of Flapjack. As an example, in "Careful What You Fish For" he convinces Flapjack that fish are a type of candy. After Flapjack licks the fish and says it doesn't taste like candy, K'nuckles 'explanation' is that this is because it's wild candy, not the store-bought stuff Flapjack is used to.
* The Marvelous Misadventures of Flapjack by a man who fits the description of this trope. It eventually turns out the man isn't immortal at all and is actually an escapee from the Stormalong Asylum.
* The Marvelous Misadventures of Flapjack by this trope. To quote the creator himself:
* The Marvelous Mis Adventures Of Flapjack, Captain K'nuckles receives this by a feudal lord after he insults him by not referring him as "Your Lordship." A rather shameful duel ensues, which surprisingly ends in a draw.
* The Marvelous Misadventures of Flapjack, Captain K'nuckles tries to prove to Flapjack that he's this trope. He is less than 1/4 of this, at least whats left of him that's human anyway.
* The Marvelous Misadventures of Flapjack concerned with the "Stormalong Harbor Pun-off."
* The Marvelous Misadventures of Flapjack: Despite the premise of a seafaring adventure, the series has plenty of creepy episodes, imagery and moments.
* The Marvelous Misadventures of Flapjack: Done by Lolly Poopdeck when he delivers a 'comedy telegram' in "Who's Moochin' Who?":
* The Marvelous Misadventures of Flapjack episode "Low Tidings", although K'nuckles response to the question ("That Scoops Pennington is a hack?") does at least follow logically from what had gone before. Flapjack was actually suggesting that they

take the place of the two sick actors in the Low Tide Day pageant.
* The Marvelous Misadventures of Flapjack, failed to show. Two of the show's writers, Kent Osborne and Jackie Buscarino, also voiced Thomas Hatch and Sally Syrup, respectively.
* The Marvelous Misadventures of Flapjack features an ominous noise whenever the word "West" is spoken.
* The Marvelous Misadventures of Flapjack finds out that a mysterious figure leaves combs in a small bowl near the port every time its filled with candy during the night, he dreams of a Santa Claus-like figure whose helpers distribute combs across the world. His dream becomes a nightmare when comb-Santa tells Flapjack he needs the comb he gave him to get the bugs out of his hair in a deep, hellish voice, revealing numerous insects crawling on Flapjack's head. Flapjack vainly tries to comb out the bugs in his hair while comb-santa laughs maniacally with visible sharpened teeth. This shocks Flapjack out of his nightmare.
* The Marvelous Misadventures of Flapjack, Flapjack gets sent to one in "Oh, You Animal"... and its another unique variation. The caretaker was actually a good person and just wanted to protect, even adopt Flapjack. But what made the orphanage horrifying was the fact that the other "orphaned boys" were actually grown men disguising as little boys so they could have free meals and a roof over their head, and Flapjack being the only real kid in the place, is bullied mercilessly.
* The Marvelous Misadventures of Flapjack, Flapjack overhears sailors talking about K'nuckles. Camera cut to his shocked expression after every line.
* The Marvelous Misadventures of Flapjack, Flapjack tried to make enemies, but everything he did ended up making him new friends.
* The Marvelous Misadventures of Flapjack had one ep where K'nuckles eats too much candy and suffers from "Candy Rot" where he chows down on any candy he can find. It gets so bad, that the Doctor Barber recommends a rather painful surgery to cure him but agrees to let Flapjack try to help the captain quit cold turkey as an alternative. Also, when K'nuckles wanted to stop hearing stories with happy endings, everybody was telling stories with various different kinds of happy endings.
* The Marvelous Misadventures of Flapjack has an episode called "K'nuckles Is A Filthy Rat." In it, Flapjack finds a rat with fleas and decides to keep it as a pet. He names it after Captain K'nucles. Soon, everyone in Stormalong contracts the Bubonic Plague. By then, Flapjack had already decided that it wasn't safe to have a rat for a pet and ventured to Plague Island. He's overjoyed when he spots Captain K'nuckles and all of Stormalong's denizens aboard the ship. His joy increases when K'nuckles tells him "Not one of us can live without you." Flapjack decides to head for home only to learn that K'nuckles meant that statement literally because the doctor requires Flapjack's blood to make an antidote.
* The Marvelous Misadventures of Flapjack has a terrifying relationship with his tiny, unseen mother who lives in his dresser drawer.
* The Marvelous Misadventures of Flapjack. He beat 100 pirates alone, carried Bubby on his back and sailed in a storm during a fight against 8-Armed-Willy.
* The Marvelous Misadventures of Flapjack: In "Candy Colleague", Flapjack disposes of the eponymous colleague by eating him while Doctor Barber is out of the room.
* The Marvelous Misadventures of Flapjack: In "Careful What You Fish For", K'nuckles and Flapjack catch a fish which they attempt to eat. The fish begs for its life claiming, amongs other things, that it has a girlfriend.
* The Marvelous Misadventures of Flapjack. In "Day Without Laughter", he attempts to become a comedian, but the punchlines to all his jokes consist of really strained puns based on his own name.
* The Marvelous Misadventures of Flapjack: In "Liar, Liar, You for Hire?", Flapjack escapes from Captain Johnny's ship by flushing himself down the toilet, which is inexplicably connected to Stormalong's sewer system.
* The Marvelous Misadventures of Flapjack: In "Oh, You Animal", Bubbie attempts to explain about her and Flapjack:
* The Marvelous Misadventures of Flapjack: In "Panfake" Peppermint Larry is forced to perform puppet shows for money after the Candy Barrel temporarily goes out of

business. His initial attempts prompt people to watch a painted fence dry.
* The Marvelous Misadventures of Flapjack in the episode where Flapjack gets a pet rat, and the sea monster things from "How the West Was Fun"!
* The Marvelous Misadventures of Flapjack: In "These Boots were Made for Walking (On Your Face)", K'nuckles tells a pair of thugs searching for Flapjack to search for him in a pile of old diapers as that is one of Flapjack's favorite hiding places, while he sneaks off to talk to Bubbie. However, it turns out Flapjack really was hiding in the pile of diapers and the thugs capture him.
* The Marvelous Misadventures of Flapjack into "Upper" (where the rich live) and "Lower" (where the rest live) Stormalong. Despite being basically a huge harbor people live on, it has a functional plumbing system along with a trolley and enough support to hold up entire manors for the rich (the richest man in Stormalong has a massive one with a lawn, gardens, and fountains).
* The Marvelous Misadventures of Flapjack: In "Who's That Man In The Mirror?", K'nuckles attempts to lose weight by forgoing exercise and drinking nothing but Diet Maple Syrup.
* The Marvelous Misadventures of Flapjack is prone to bouts of some seriously scary imagery that's played entirely for laughs.
* The Marvelous Misadventures of Flapjack, K'Nuckles angers off a plague rat who Flapjack befriends. All of Stormalong Harbor contracts the Plague, and Flapjack thinks he is the cause, so he sails away to plague island to live the rest of his life. A boat with K'nuckles and many other citizens show up, and he tells Flapjack that they can't live without him. Flap thinks it's a sentimental statement, but then K'nuckles clarifies that they literally can't live without him. His blood contains the antidote.
* The Marvelous Misadventures of Flapjack. K'nuckles bets Flapjack in a card game (on an incredibly weak poker hand), and wins, getting another cabin boy as the prize. However, Flapjack is so insulted about this that he leaves and becomes a banker.
* The Marvelous Misadventures of Flapjack, K'nuckles steals the heart of a mermaid that's able to grant a limited number of wishes. Before using a wish to be taken to Candy Island, they use a majority of them to goof around, but once Flapjack realizes using the wishes are draining the mermaid of her life, he decides to use his last wish to save her. K'nuckles steals the wish and immediately uses it to wish for a new hat and a corndog, then wishes to be on Candy Island, which is now impossible as he's blatantly told he just used those last wishes for the former items.
* The Marvelous Misadventures of Flapjack leaving Stormalong Harbor in search of more adventures somewhere else.
* The Marvelous Misadventures of Flapjack: One episode had Flapjack and Captain K'nuckles finding themselves on a sentient (but gullible) moon and convincing it to carry them to Candy Island. The moon's traveling causes so much gravitational havoc that the sea god Poseidon has to intervene.
* The Marvelous Misadventures of Flapjack page and saw a post about it earlier that day.
* The Marvelous Misadventures of Flapjack. Peppermint Larry starts kissing Candy Wife, which causes this exchange:
* The Marvelous Misadventures of Flapjack pretty much runs on this trope, usually accompanied by the shows signature "Horrified Scream" sound effect.
* The Marvelous Misadventures of Flapjack, soon after which it curves in on itself, implodes, then becomes genuinely funny.
* The Marvelous Misadventures of Flapjack states that this (along with a episode-long "drawn in front of a live audience" gag) is done whenever the crew thinks an episode could have been better, but they didn't have enough time to fix any problems with it.
* The Marvelous Misadventures of Flapjack that not only brought Cartoon Network out of its Dork Age, but also renewed interest in Western Animation in the 2010's.
* The Marvelous Misadventures of Flapjack, the moon's gravitational pull grabbed them back and they were forced to watch the sugar-coated island float off into the

distance. At least Flap was able to taste it...
* The Marvelous Misadventures of Flapjack "the most beautiful man in the world" who wears a mask at all times to protect the world from his shining Divine beauty. His beauty is so great that it causes people to throw money at him and his presumably equally beautiful family.
* The Marvelous Misadventures of Flapjack. Then the one who first accused K'nuckles of stealing his hands admits he was wrong, so he gives the hand back and leaves K'nuckles as a pair of eyeballs and a hand trying to strangle Flapjack in anger.
* The Marvelous Misadventures of Flapjack. The other main character who is he is a minion to however, Captain K'nuckles is a most definitely seedy and unsavoury type who makes a career out of being a lowly thief, cheat and criminal and who will commit all sorts of crimes in order to satisfy his candy addiction. By far his lowest moment must have been when he knowingly almost killed a mermaid just because of his petty whims. Also despite genuinely caring for Flap he is a terrible guardian and often verbally mistreats him. He is pitiable enough however and just often unfairly victimised.
* The Marvelous Misadventures of Flapjack: The pirates do this in "100 Percensus".
* The Marvelous Misadventures of Flapjack. These are always brief, and rarely have anything to do with the plot.
* The Marvelous Misadventures of Flapjack: "This candy takes like horse poop, Cap'n!"
* The Marvelous Misadventures of Flapjack. This skill, among others left her with an endless line of suitors. She couldn't decide who to marry and the decision was further hampered by the fact that Bubbie inadvertently ate her along with several of the pies she'd made. She remained trapped in Bubbie's belly for many years but upon her escape it is revealed that all of her suitors are still alive and find her just as beautiful. She happily declares “I'll Marry You All!” Much to their delight.
* The Marvelous Misadventures of Flapjack, to awful effect ("Fancy Pants").
* The Marvelous Misadventures of Flapjack trope. K'nuckles bet Flapjack in a card game, but wins and discovers that the person he was playing against also bet his kid sidekick.
* The Marvelous Misadventures of Flapjack, when Flapjack accidentally revealed that he faked a muteness curse so Captain K'nuckles can take him to a fair, the captain gets very mad and tells Flapjack to cover his ears. When he does, K'nuckles starts spewing unintelligible swears. After K'nuckles tells Flapjack he can take his hands off, a carnival barker awards him for his swears.
* The Marvelous Misadventures of Flapjack. When K'nuckles bets Flapjack in a poker game, he wins with a pair of threes (the opponent had a pair of twos).
* The Marvelous Mrs. Maisel features one in the Steiner Welcome Song, where the lifeguard holds the last note of the male solo for a very long 25 seconds. It's tradition that someone will try to drag out the last note (with the resort record being 42 seconds). Joel arrives mid-note (relieved to have missed the "bear shit" joke) and immediately calls the lifeguard an amateur.
* The Marvelous Mrs. Maisel has this when it comes to Midge's friendship with Lenny Bruce.
* The Marvelous Mrs. Maisel: In season 2 episode 7 "Look She Made A Hat," Midge uses her family's Yom Kippur dinner as the place to come out and disclose her new career as a stand-up comedian, since she has to take off early to do a gig at the Gaslight for a booker. She has her manager, Susie come over for this confession. Abe has already learned about Midge's career after inadvertently catching her perform in the Catskills two episodes earlier. Rather than admit to keeping his wife in the dark, he plays along and pretends he doesn't already know Susie:
* The Marvelous Mrs. Maisel: In season 2 episode 9 "Vote for Kennedy, Vote for Kennedy," Susie must play speed networking in the Stage Deli between different patrons who have connections with the media networks in order to secure Midge a spot on a big telethon. She's going so fast that at least twice, she ends up trying to negotiate with someone who's not remotely involved in the entertainment business.

* The Marvelous Mrs. Maisel: In season 3, Joel's new club in Chinatown happens to be over an existing illegal gambling den that operates out of the basement. Anytime Joel has to go downstairs because they're making a ruckus, they'll always instantly cease everything they're doing...then go right back to it as soon as he disappears upstairs.
* The Marvelous Mrs. Maisel. In season 3, the Fontainebleu Resort in Miami plays itself.
* The Marvelous Mrs. Maisel: In season 3, when Joel is opening up his own club in Chinatown, he finds that it's difficult to get things done. Fortunately, Mei comes along and is quick to use her family connections in Chinatown to make business easier for Joel, such as getting the liquor board to fasttracking the approval of the liquor license that Joel had had tied up for months.
* The Marvelous Mrs. Maisel in that they're technically still married but they haven't finalized the divorce, since Joel seems optimistic about the possibility of getting back together with her once he's cleaned up his act. When they do get the divorce finalized in season 3, the judge is reluctant to grant the divorce because they seem too amicable, prompting Joel to make up a story about sleeping around with other women (with Susie helping him out by claiming to be one of these paramours).
* The Marvelous Mrs. Maisel: In "We're Going to the Catskills!" Paulie approaches Midge and Rose as the Weissmans are finishing settling into their summer cottage, saying he has an exciting proposition for Midge regarding the Steiner swimsuit pageant that Midge has participated in every year, which is that she be the sash girl. Despite him sounding cheerful when initially pitching it, Midge is not thrilled because it basically means she's being demoted on account of her separation from Joel.
* The Marvelous Mrs. Maisel: In "We're Going to the Catskills!" Susie spits out a large swig of water when Midge reveals that her summer vacation to the Catskills (during which she won't be able to do gigs in Manhattan) will be two whole months, not a short week.
* The Marvelous Mrs. Maisel is a ventriloquist whose bit is informing the audience that his dummy died right before the show, then tearfully explaining what he would have said and what the dummy would have said to him. In his second appearance the ventriloquist has a second dummy who complains that the guy still hasn't gotten over the death of the first dummy and keeps his corpse perched on his other knee.
* The Marvelous Mrs. Maisel later in the series, another up-and-comer can be seen performing the same routine.
* The Marvelous Mrs. Maisel — Midge books a slot on a telethon, her friends and family react in various ways, and the entertainment industry's forces that be keep pushing her to more and more undesirable timeslots. She makes it work.
* The Marvelous Mrs. Maisel: Midge and Joel on three occasions: in the season 1 finale, in the season 2 finale (with Midge cheating on Benjamin), and in the fourth episode of season 3 (where Joel could be considered to be cheating on Mei). A lot of this has to do with the fact that Midge frequently turns to Joel for comfort and emotional support, whether or not he's in a good position to give it, and Joel, out of a combination of love and continued remorse for his initial abandonment of her, is willing to provide her with that even when it's not in his best interest to do so.
* The Marvelous Mrs. Maisel: Midge's family goes on vacation in a Jewish resort in the Catskills every summer. During her first summer after starting her stand-up comedy career, she tries to stick to her normal traditions, but is eventually pressed by Susie into doing gigs at the local Borscht Belt resorts. Her first gig ends up being a "naughty" late-night spot at the Concord where she's expected to "work blue," and after its success, she ends up working a few more gigs at other resorts.
* The Marvelous Mrs. Maisel, Midge's main shtick is more observational humor, particularly focusing on her life and family. However as shown when she rips into a group of male comics who have been giving her a hard time all night on one gig, she can veer into this with aplomb.

* The Marvelous Mrs. Maisel: Pretty much everyone in Midge's family exhibits this to different degrees, Abe especially.
* The Marvelous Mrs. Maisel romance teased throughout the show. However as the show seems to be sticking to historical reality (minus some generic timeline fudging)this ship is very unlikely to be leaving harbor.
* The Marvelous Mrs. Maisel's "Be Prepared" at a bar, but mistakenly attribute it to "Franz Fuckin' Schubert".
* The Marvelous Mrs. Maisel's generally privileged, urbanite Jewish families, the show doesn't always delve too much into the social or political milieu of the time; the cast are just as much depicted going through general everyday life and drama.
* The Marvelous Mrs. Maisel: Susie Myerson is so blindingly un-feminine that she is routinely mistaken for a man, with the confusion sometimes lasting even after she's corrected people several times. Despite her distaste for traditional femininity, being mistaken for a man so often does seem to be a sore spot for her.
* The Marvelous Mrs. Maisel: The staff at the Stage Deli have a betting pool going on for the day that they have to evict someone from Midge's favorite booth so she can sit there. It finally pays off in "Midnight at the Concord" when Midge brings Benjamin there for dinner as part of an evening out.
* The Marvelous Mrs. Maisel: The Stage Deli in Midtown Manhattan is frequented regularly by Midge and Susie, and is where Susie networks with bookers and club owners to book stand-up gigs for Midge. The food is evidently hit-and-miss.
* The Marvelous Mrs. Maisel, when Midge and Benjamin are attending a stage adaptation of the Lizzie Borden trial. They find the play so boring that they walk out at intermission before the second act (which contains the trial), and Benjamin admits he hates that "Perry Mason crap".
* The Marvelous Mrs. Maisel: While at the Steiner Mountain Resort, Miriam makes Benjamin take her on a rowboat ride at the insistence of her mother, on the grounds that it's "private but on display". He refuses to row.
* The Marvelous Mrs. Maisel: Zig-zagged. The show is about comedians, so the plot lives and dies on the characters' routines being as funny or unfunny as the show says they are. In general, the comedy is much better than most in-universe comedy routines you find in media. However, the show is set in the 1960s, when stand-up comedy was very different from today. Even though Midge and friends have edgier material for their day, it's nowhere near today's standards, so viewers accustomed to Dave Chappelle or Bill Burr may be left scratching their heads as to why audiences are rolling in the aisles. The show is also very funny in and of itself, so it's a bit of a victim of its own success. The stand-up comedy scenes tend to be the least funny scenes in any given episode.
* The Marvelous World Of DC like she is in the comics, and has to rely on her friend Thor to translate English for her. Thankfully, Doctor Strange fixes that problem with his magic.
* The Marvel parody series What-The has an in-universe example: The super-crossover-all-in-multibrawl-megaevent leads to the author "keeling over by a heart attack.
* The Marvel Saga: The Official History of the Marvel Universe, with the rest of the Marvel Universe reduced to a general overview in a four-page epilogue.
* The Marvels of the Year 2,000 (he described a powerful chemical explosive capable of shattering mountains that somehow ended in the hands of pretty much all countries, forcing them to redraw the borders as the first measure to prevent the last war).
* The Marvel Superheroes (1966 series, filmed by shooting pictures of the comic panels)
* The Marvel Super Heroes, along with generally the original stories to make it look like the precursor to the motion comic.
* The Marvel Super Heroes (as well as Spider-Man in the 1960s Spider-Man cartoon series).
* The Marvel Super Heroes). The five heroes had 13 episodes apiece, making 65 altogether.
* The Marvel Universe generally averts this. The higher up the cosmic scale you

go, the more blurred the distinction becomes, and the most powerful cosmic entities - such as Eternity and Death - are apt to show up in both magic and space-based stories, notably
* The Marvel universe is bursting with races with Humans, Mutants, Inhumans, Atlantians, Lemurians, Deviants, Eternals, Avians, the Zebra-Children, Proto-Cavemen, vampires, sentient plants, genetically uplifted apes, an assortment of gods and a sentient bacterial hive-mind to name a few; and that's before we've even left Earth. The list of Alien races include Skrull, Kree, Shi'ar, Badoon, Brood, Wraiths, Chitauri, Titans, and an unknowable number of other races.
* The Marvel Universe's version of the Greek gods have a front company called the Olympus Group that bails them out when they have problems with mortal authorities, which would thus technically make
* The Marvel Universe with this is actually an inversion of the trope. As in there is quite clearly a supreme God (The One-Above-All) but no supreme Devil. About the One-Above-All there are two hypotheses floating around with an accompanying
* The Marvel villain Arcade has to date, been 100% unsuccessful at killing any superheroes or villains that feature in his appearances. It's assumed that all of his success with Murderworld assassinations occur offscreen. Killing overweight and out of shape businessmen is one thing. But he is clearly out of his league with superpowered characters. But his offbeat characterization (not too unlike
* The Marvel villain known as the Scourge was a character who shot and killed minor supervillains. Nearly all of his kills were punctuated by him shouting "Justice is served!" Ironically, when the original Scourge was killed, his killer also shouted, "Justice is served!"
* The Marx Brothers did a tour of England, where the tradition was to throw pennies at bad acts. After getting pelted Groucho said, "we came all the way from the United States to perform for you. Could you at least throw shillings?"
* The Marx Brothers era. Someone gets slapped in the face, they attempt to retaliate, the other person ducks resulting in someone else getting slapped who then smacks right back, knocking someone into the waiter who spills a tray of soup on someone who jumps up, pulling the tablecloth off ... next thing you know it's a full-on pie fight.
* The Marx Brothers give a nod to the trope in the Napoleon scene of the 1923 film, "I'll Say She Is". In it, Groucho (as Napoleon) calls for his "faithful advisers, François, Alphonse and Gaston."
* The Marx Brothers Harpo just tags along. Nevertheless, Chico often scolds Harpo for being stupid and not understanding him.
* The Marx Brothers, in which Groucho tries to tell Harpo that he can't burn the candle at both ends - Harpo produces a candle burning at both ends. Groucho tries another, Harpo produces, etc...
* The Marx Brothers — Comedy series. Starred in 13 films as a group between 1929 and 1949.
* The Marx Brothers movies as Groucho's 'love interest'/sparring partner, to the point where Groucho called her "the fifth Marx Brother"
* The Marx Brothers of his insults, never seemed to understand his jokes. Recent research has found out that this was simply an urban legend.
* The Marx Brothers played merry hell with this one. Groucho and Harpo were straight examples. Off-screen, they were both introverted and shunned raucous nightlife. Harpo was especially noted as being soft-spoken and shy; Groucho preferred to spend most of his leisure time reading to make up for his limited formal education. Zeppo is discussed below as an inversion - in real life, he was the funniest Marx brother.
* The Marx Brothers, the brothers do this to a police inspector. He checks Groucho's apartment for Chico, Harpo, and Ricardo, and the brothers try to conceal the fact that they are staying there by hiding the fact that there are four beds. The beds get repeatedly shuffled between rooms until the cop is convinced he is nuts.
* The Marx Brothers thinking it might encourage "anarchic tendencies". The ban was only lifted in 2000.

* The Marx Brothers, when Captain Spaulding jokingly proposes to two women at once.
* The Marx Brothers who rarely gets any good lines and mostly just serves as someone for the other brothers to play off of. Offstage, he was considered the funniest of the group.
* The Marx Brothers, whose comedy hasn't dated one bit. Intellectuals also adore them for their more clever verbal style.
* The Mary Sue have all moved on to other projects, and the site is now mostly run by newer contributors. Longtime members of the community have complained that the new management has steered the site towards social justice and away from geek culture.
* The Mary Tyler Moore Show as a guest at one of Mary's infamous parties. The party took place during a power failure, so for his entire time on camera he was not actually visible.
* The Mary Tyler Moore Show. (Assuming you've heard the old pop/jazz standard it references, which the characters then sing.)
* The Mary Tyler Moore Show: Both of Mary Richards' apartments fit this trope. Ted Baxter's apartment (as seen in later seasons, after he married Georgette) is averted, with the front door at stage right.
* The Mary Tyler Moore Show, Chuckles the Clown was killed at a parade while dressed as a peanut when an elephant tried to peel him.
* The Mary Tyler Moore Show: Cloris Leachman's character Phyllis deliberately collapses a soufflé Sue Ann Nivens (Betty White) is baking when Phyllis finds out about Nivens' affair with her husband.
* The Mary Tyler Moore Show did one of his many marriage proposals to his girlfriend Georgette while doing the news. However, since he didn't mention her name, there was some confusion and several women had answered yes.
* The Mary Tyler Moore Show egotistical newscaster Ted Baxter couldn't decide on a new promotional photo, so he asked Murray, the acerbic newswriter:
* The Mary Tyler Moore Show episode, billed under her married name of 'Carole Larkey'.
* The Mary Tyler Moore Show episode "Chuckles Bites the Dust", while dressed as "Peter the Peanut", Chuckles the Clown is killed by a rogue elephant who tried to "shell" him.
* The Mary Tyler Moore Show episode "The Birds...and...um...Bees" has Mary getting roped into giving The Talk to Phyllis's daughter, Bess.
* The Mary Tyler Moore Show. For a regular sitcom viewer this plotline can come as a shock!
* The Mary Tyler Moore Show funniest TV episode of all time...but how many who are aware of that "fact" have even seen it or any episode of the show? In a similar vein, the show's theme song and opening sequence are far more recognizable than anything about the actual show.
* The Mary Tyler Moore Show gave us the irritated-looking, bespectacled matron looking at Mary as she tossed her hat into the air in the show’s iconic opening credits.
* The Mary Tyler Moore Show had an episode titled "Today I am a Ma'am" where the thirty year old Mary is despondent over no longer being part of the station's youth demographic.
* The Mary Tyler Moore Show had an episode where Mary and Rhoda join a dating club for divorced people despite being single rather than divorced. At the end of the episode, it turned out that everyone there was single and not divorced except for the club founder.
* The Mary Tyler Moore Show had Ted Baxter write his own knock-knock joke, but getting stuck on the punchline:
* The Mary Tyler Moore Show had the episode "Chuckles Bites The Dust", often cited as the funniest episode of any show ever, which rotates around the death of performer Chuckles the Clown in a parade - "He went as Peter the Peanut... and a rogue elephant tried to... shell him."
* The Mary Tyler Moore Show has an episode where Mary gets one of these from Lou Grant.

* The Mary Tyler Moore Show has the episode "Chuckles Bites the Dust", in which the staff of WJM-TV has humorous reactions to the absurd death of Chuckles the Clown.
* The Mary Tyler Moore Show her to laugh, at which point she starts bawling uncontrollably instead..
* The Mary Tyler Moore Show is devoted to this subject. Mary is goaded into giving her friend's daughter The Talk. When it finally comes down to it, however:
* The Mary Tyler Moore Show it at the end by having Ted give a bouquet of flowers to Rhoda because she was the only level-headed woman on the show.
* The Mary Tyler Moore Show, Lou orders two drinks then asks Mary if she would like anything.
* The Mary Tyler Moore Show, Mary and Lou attempt to kiss, but both dissolve into hopeless giggling.
* The Mary Tyler Moore Show, Mary and Lou Grant always had an undercurrent of sexual attraction running through their relationship, but only at the very end of the series do they actually attempt to kiss one another.. and break into helpless giggles.
* The Mary Tyler Moore Show. Mary herself did it once as well, albeit at Rhoda's urging.
* The Mary Tyler Moore Show, Mary is worried that Rhoda might make a mean comment about her date's height. Rhoda responds by asking "You really think I'd make a derogatory remark about a person just because he's a shrimp?" Mary is annoyed by her insensitivity only to finally introduce them with: "Eric, I'd like you to meet my friend, Rhoda Morgenstern; Rhoda, this is Eric Shrimp."
* The Mary Tyler Moore Show Referenced in a non-UST example. Mary is trying desperately to keep her boss Lou Grant from finding out that she messed up a crucial situation. While spinning a whopper of a coverup story — and clearly feeling guilty about it — she confesses that she was lying.
* The Mary Tyler Moore Show, she insists that since a regular driver can't be found, she'd drive the heavy equipment needed in a snowstorm.
* The Mary Tyler Moore Show: Ted Baxter wants to serve as Grand Marshal in a circus parade, but Lou Grant won't let him:
* The Mary Tyler Moore Show, when Lou forbids Ted from being the Grand Marshall of a parade.
* The Mary Tyler Moore Show, when Mary is first hired, Lou offers her a choice of Assistant Director or Secretary. She, of course, chooses Assistant Director. When she meets and talks to Murray, she finds out that the Secretary job pays more.
* The Mary Tyler Moore Show: When Mary's friend Rhoda got her own spinoff, she brought along her younger sister Brenda to take on the "less cool friend" role.
* The Mary Whitehouse Experience - "largely disappeared from public life, reappearing with solo work marked by a clear social conscience and anti-establishment views". He's no longer the mainstream of comedy, nor does it seem he wants to be.
* The MARZENA Series pass out as heroes. Also there is their American counterpart, Section-C, a Private Intelligence Company contracted by Homeland Security to take care of dirty business that the American government don't want to get involved in.
* The Masaki Wolves is a joke in the manga while in the anime their captain become an
* the mascot bear out on a date with a gorgeous brunette. He presents her with an awkwardly-shaped gift and she eagerly unwraps it to reveal...a Pez-dispenser type device dispensing large cans of beer. She is delighted!
* The mascot character Kumamon (a mascot for the Kumamon prefecture in Japan) is depicted as a violent minion of Satan as the result of a certain picture in front of a bonfire from Funny Junk in late 2011.
* The mascot for cleaning product Mr. Muscle used to be an ironically weedy, geeky-looking guy who'd show off his non-existent muscles like this — the slogan being that the product "does the hard work, so you don't have to". They seem to have since decided it was unclear whether the guy represented the
* The mascot for Kellogg's Frosted Flakes cereal, Tony the Tiger, has his fans. This is often combined with a

* The mascot for the dog food company Cesar is a West Highland White Terrier. Advertisements for the brand helped boost the Westie's popularity.
* the mascots became far more popular than the software itself in existence.
* The masculine-by-default principle also extends to the use of feminine pronouns. In various Romance languages, the use of the third-person feminine plural pronouns, such French
* the masculine honorific "kun" considers it "a more dignified form of address" for her.
* them as delicious/worth enslaving, so preventive genocide (or slave rebellion) is on the table.
* The mash bringing... the slash singing... the rash slinging... the flash ringing... the ash pinging... thethethe HASH SLINGING SLASHER!!!!!
* The Mask Ace thinks an Alien is inside him, but it turns out Spike was in his clothes.
* The Mask / Ace Ventura crossover episode "The Aceman Cometh" has Pretorius dognapping Stanley's dog Milo for a brain transfer procedure, so Stanley calls on Ace for help. When Stanley doubts Ace's sanity, he secretly becomes the Mask. It's when a noted scientist with Milo's brain patterns and greets the Mask joyfully that Ace "figured it out!" that Stanley and the Mask are one and the same.
* The Mask after donning the Mask of Loki to fight off Dorian Tyrell's mooks.
* The Mask after the Mayor dumped her. The Mask appears, interrupting his A-plot long enough to destroy the dynamite by throwing it in a blender and drinking the results, leaving Cookie both defeated and completely naked.
* The Mask aired on FOX Family (before it was changed to ABC Family and then Freeform, but after it was known as simply The Family Channel), the season two episode "Flight as a Feather" was skipped over due to the infamous sequence in which the mayor's psycho stripper ex-girlfriend Cookie BaBoom crashes an outdoor ceremony and threatens to kill herself and the mayor with dynamite strapped to her naked body, only for The Mask to strip her and use her nudity to distract Kellaway and Doyle.
* The Mask also attempted to do this, with far more underwhelming results.)
* The Mask. Although she is able to get Dorian to take off the mask and then kick it to Stanley, which leads to the battle being won.
* The Mask, an animated alarm-clock spews cogs and springs just before The Mask smashes it with a giant hammer.
* The Mask, an audience silhouette stands up and applauds during The Mask's overdone "death" scene. Given that Stanley Ipkiss is clearly a fan of old-school animation, this makes sense as an homage.
* The Mask, and are easily the high point of what is otherwise a rather unremarkable movie.
* The Mask and Boomerang channels overseas (some of which also banned "Flight as a Feather" due to content).
* The Mask and eventual wolf-head whistling (that as the Mask hits his own head in praise, even gets mangled with the hat...).
* The Mask and having charisma charm as well which brings most of them over to him.
* The Mask and Stanley himself - whose desires are given form by the Mask - is a cartoon lover.
* The Mask animated series, a couple comic book fans try to replicate the accident that created their favorite superhero Insector the Bugman by breaking into a nuclear power plant and getting bitten by a bug after they become radioactive. Unfortunately they forget to bring a bug with them to the power plant and succumb to radiation poisoning. Then their ambulance crashes en route to the hospital. One guy crashes into a putty shop and is mutated into Clayface expy Putty Thing. The other guy crashes into an aquarium and becomes Fish Guy, who has the awesome power of being a fish. Who still can't swim.
* The Mask animated series had the hero taking out a stereo playing "The Mask's Greatest Hits" to use on Ms. Peenman - first out loud, then through headphones.
* The Mask animated series has heavily modified his body, including allowing his head to be detached from his body and move around on spider legs. Unfortunately,

this tends to work against him as his opponents tend to take advantage of this and knock his head off to distract him during his plans. His body can move independently on its own.
* The Mask a wedgie in the first of their crossover episodes. Ace takes umbrage.
* The Mask, being the only female Mask of the series (and causing much more madness and carnage than Ipkiss' version).
* The Mask: Big Head — who is very much a horror figure in the comics — usually sports a mouth full of massive brick-shaped teeth, though their exact number varies randomly due to his chaotic nature.
* The Mask by the Mask. You know there's a plot about a Swedish karaoke contest and the Mask losing his feather and running through the city to get it, but once you see that entire sequence with Cookie, you'll forget about that right quick.
* The Mask, Charlie Schumaker takes Stanley Ipkiss to the Coco Bongo. Unfortunately he goes in without making sure Stanley comes with him, and when Stanley tries to get past the bouncer, he picks him up, takes him to the curb and drops him on the pavement.
* The Mask crossover "The Aceman Cometh" has Pretorius saying that his mind swap machine "had served it's purpose."
* The Mask Dark Horse comics universe — we never learn anything about this mysterious mute killer in the series other than that he has a "♥ Mother" tattoo on his right shoulder.
* The Mask decides to launch a suicide attack after her boyfriend, who happens to be the mayor, breaks up with her. How? By wearing nothing but a crude and skimpy bikini made entirely of dynamite.
* The Mask declares that he is going to save the day and stop the villains but first he's going to goof around or get distracted by trivial things which does tend to let the villains get away but he does get himself back on track to stop them eventually.
* The Mask does this as Stanley/Mask falls from his apartment building to the pavement.
* The Mask, done by a superpowered embodiment of id with the girl he's dancing with.
* The Mask. During The Mask's "Cuban Pete" song and dance number, police detective Doyle (who's supposed to be trying to catch The Mask) starts dancing along with the music. His boss Lieutenant Kellaway tells him, "Start dancing and I'll blow your brains out."
* The Mask" (during the scene where Kellaway and Doyle search The Mask and find weird objects, one of which is a picture of Kellaway's wife in lingerie with the words "Call me, lover" written at the bottom) becomes "Margaret! You son of a pig!" or "Margaret! You son of a witch!" Other edited versions just cut off after Kellaway shouts, "Margaret!"
* The masked and compelling Amon of Book I has a sympathetic backstory
* The masked ball in "Poor Thing" might also qualify. Nobody gets killed, but everyone has a good laugh over the rape of Lucy Barker.
* The Masked Empire describes the attempts of the Dalish to reclaim their lost home:
* The Masked Empire feel that the game resenting the reconciliation between Celene and Briala as the most ideal happy ending to the whole Orlesian Civil War as this. While the game treats the reunion as a heartwarming example of love triumphing over hard feelings, those who've read the book know how toxic, imbalanced, and even abusive their relationship was, and how this "reunion" doesn't address the power imbalance that allowed Celene to hurt Briala as badly as she did. Many players don't see it as a heartwarming reunion so much as convincing an angry, emotionally vulnerable abuse victim to go back to her abuser.
* The Masked Empire status) as punishment for openly, if indirectly challenging the Empress, and transforms the duel from a potentially lethal incident to a source of amusement for the entire court. To his credit, Gaspard takes it in stride and duels Michel to the best of his ability, though the book never reveals who "won".
* The "Masked Heroes", which revived a long-favorite mechanic (Fusing with a

single monster, introduced with the now-banned
* The Masked Luchador is a particularly popular character in modern surf music. There are several bands that wear Mexican wrestling masks and adopt mexican-sounding names as part of their stage shows, or even write songs about lucha films and luchadores (the song Los Campiones Del Justicio by The Ghastly Ones). It is believed that the American surf band Los Straitjackets is responsible for this, as they adopted the masks early in their career and subsequently made the genre popular through Mexico because of this, spanning bands like Sr. Bikini or The Blue Demons, all adopting the masks and hiding identity. There's even a FRENCH surf band adopting the masks, called The Bikini Men.
* The masked man influence (called Proxies) in blogs set in the Slenderverse.
* The Masked Marvel #4 has the Marvel going after a group of Apaches who are racing cattle. He eventually leads the locals into gunning the raiders down, before going after the men who hired him, ranch hands Monte Durrow and Charlie Briggs.
* The Masked Marvel: Reno, a ranch foreman and secret cattle rustler who framed one side of a family feud for another side's murder so he could use the distraction to make a killing. He's gunned down at the end of the issue.
* The Masked Miser Angelo Poffo was usually a baby face, both as a wrestler and as manager, in his earlier years but could easily be convinced to turn heel by evil managers Bronco Lubich, particularly during his Chicago run of the 1950s, and
* The Masked Singer, a pair of singers has this as their costumes. As commented in the promo for the season: "They multiplied!? Could there be more?"
* The Masked Singer gained a lot of attention with furries because of the elaborate animal costumes used in the show.
* The Masked Singer!" Many contestants — the Peacock included — have said, either during the competition, in interviews, or on social media afterwards, that being on the show is some of the most fun they've ever had in their careers.
* The Masked Singer, said one song was "the best song he'd ever heard sung by a deer in a gas mask."
* The masked tag team The Killer Bees made this such an integral part of their act that, when they had a
* The Masked Whitewasher's debut story implies that Duckburg has this as a
* The Mask episode "Up The Creek", The Mask "borrows" the Eiffel Tower as a trap for the Phony Frenchman. This is not an important plot point.
* The Mask even made an effort to learn to talk with the dentures so they'd appear full-time).
* The Mask featured a character named Celia N. Airtight. She was a top researcher at Wrapmaster Corporation until being fired for knowing too much about food preserving and then she started her own company named Putterware to compete against Wrapmaster. Not satisfied with selling more than her rival, she plotted to turn leftover food into monsters to destroy Wrapmaster.
* The Mask featured a dognapper and a chili maker who bought the abducted dogs. Stanley thought they were turning the dogs into chili but he later learned they were just having the dogs try a new brand of dog food.
* The Mask features Stanley fleeing into his apartment to escape an android, who punches through the door in order to reach the lock and open it.
* The Mask figures made by Kenner as part of 1989's "Dark Knight Collection" carried this accessory.
* The Mask films. Whoever finds and wears the Mask of Loki is simply referred to as "The Mask" and Stanley Ipkiss wasn't the only one to don it.
* The Mask finished flushing out Dorian Tyrell, leaving his goons as a threat, when the police burst in with his best bud in tow, to 'arrest those men!'
* The Mask. First, he detected that The Mask was evil. Second, he detected that his owner was kidnapped when he saw Dorian's goons invade the apartment for the stolen bank money and chased after their car to rescue Stanley.
* The Mask from the website Destructoid revealed that the winner, Nathan Ryan Runk from Arbutus, Maryland, was eventually given a pile of SNES games and the option to wait indefinitely or settle for a $5000 cash prize. Unsurprisingly, he took the money.

* The Mask gets in and starts futzing with its processors, transforming it into a three-legged weapon of mass destruction.
* The Mask getting dressed and leaving the same way, complete with the same self compliment, "Smokin'!"
* The Mask has a baddie steal people's shadows, which causes them to age at a rapid rate.
* The Mask has a very good-looking body along with wearing clothes that do look nice on him but he is bald, got cartoony eyes, no ears and buck teeth but it is downplayed as he is very easy looking even with all of that and he is a nice guy as well so the girls get attracted to him because of it.
* The Mask has the title character wearing those in his punch attack, given he's basically a real life cartoon.
* The Mask. He finds car keys, tracks down and rescues his master from jail, can open car locks, and figures out how to activate the title artifact, among other tricks.
* The Mask. He grows out of it by the end of the film, where he learns how to still be a nice guy without being a pushover. It even gets name-dropped in the film.
* The Mask, he is forced to invade a military base. At one point, he transforms into a Rambo-type character and fires a big machine-gun into the air. More than a little dismayed that his gun is firing real bullets, he looks at it guiltily and says, "I thought I'd loaded it with the little 'bang' flags."
* The Mask if he wears the magical mask, but Milo in the original only had a CGI head over the real dog's body.
* The Mask: In Bride of Pretorius after Evelyn accidentally puts on the mask that had her glasses attached to it and her alter ego Eve comes out, while Eve is lustful and clearly trying to use her looks to get Stanley to kiss her she genuinely cares and loves him very much, she also has morals as well as she refuses to take Pretorius's offer to marry him and rescues Stanley instead showing that she has a good heart and, does not like anyone who will hurt or kill innocent people so that they can get what they want therefore the evil part is Downplayed
* The Mask includes a poorly made time machine that is looping an ever-decreasing period of time. If not stopped, it will eventually lock all existence in a single instant eternally.
* The Mask, in lingerie with the words, "Call me lover" hand-written on the bottom.
* The Mask in order to find a good, non-sexual reason why Stanley should prefer her in the end.
* The Mask: In "Shrink Rap": Dr Neuman was given the mask by Stanley who wanted to get rid of it so he agrees to keep it but however while inside his house he saw that the mask glows so he gets curious and puts it close which causes it to get attached to his face which turns him into a psychotic and insane madman who believes that there is a disorder called Ipkissa Maskosis so genuinely insane he goes out to cure the world from it but the way he does it is by putting people in wedgie straitjackets including a gorilla as well which he gets diapers out to do that, he uses a child bicycle, a flying book then finally a bouncy stick after his appointment alarm goes off on his watch, he meets with Pretorius who tells him about his plan which while Masked Dr Neuman agrees that Pretorius is insane decides to help him to do that, while with Pretorius Masked Dr Neuman begs him to tell him more of his plan but he refuses so Masked Dr Neuman reminds him he is in his care so Pretorius tricks him by telling him the cosmos are within reach and that Masked Dr Neuman can see them which when Masked Dr Neuman turns around to look for them he tells Pretorius that he does not see them but after being hit on the head by Pretorius, his head pops comes with his eyes rolling around, tongue sticking out and he is convinced that he can see them, after finally searching for Pretorius he shows himself to have childlike traits such as going on the ground and begging Pretorius to tell him what his plan is which he finally agrees to tell him and later on while chasing Stanley Masked Dr Neuman decides to put him in a bath partly to put him off guard but mostly because he decides to mess around with Stanley which shows Masked Dr Neuman to have a sense of humor like The Mask and the other benevolent mask personas which also shows that Masked Dr Neuman is terrifiying but

can be funny at times with his insanity and his wackniess.
* The Mask, in the episode “They Came From Within,” the robot Warchine was defeated when a dog urinated on him, causing him to short out.
* The Mask: In the episode Bride of Pretorius Stanley meets a girl named Evelyn who is just as shy and sweet like him so he invites her to his apartment on a date which ended up with her deciding go the bathroom in a moment of panic but she ends opening the closet which all of the stuff that Stanley put in to make the apartment clean and tidy falls on her which causes her to lose her glasses which she finds them but they attached to the mask of Loki and when she put them on the mask ends up attached to her and turns her into a southern american girl who is confident, wild, fun loving, polite and nice who confesses to Stanley that she loves him in no time at all. Eve then gives Stanley the wildest time of his life even showing just like The Mask she can be too strong though a lot more than him but she cares about him very much as she rescues him from Pretorius and, even at the same time does try to stop him and his plan as well proving herself to have a good heart like The Mask.
* The Mask). In the theatrical cut she just disappears from the movie entirely after Dorian captures Stanley. In the original cut, however, Dorian kills her by throwing her into a printing press where her blood forms the ink for the text and, for some reason, a photo of her face shows up on the newspaper as well.
* The Mask invokes this trope twice: The first time, when Ipkiss goes to the Coco Bongo club with his friend and isn't let in, the second when The Mask goes to the club and pushes his way through after throwing a lot of money around.
* The mask is back. After a lackluster run without it as a lackey of the management, his return to wearing the mask signalled a return to the violent, destructive Big Red Machine of old, with him being used to menace the hell out of anyone who disrespects the Authority. Since then, he's gone back and forth between the mask and the suit depending on the primary function the Authority needed him to focus on at any extended period in time.
* The Mask is given to Stanley as a replacement for his Honda Civic by some unscrupulous mechanics while the latter is being repaired.
* The Mask is startled by an impatient motorist whaling on his car horn, he retaliates with a small bike horn... loud enough to blow out all the windows of Mr. Impatient's car.
* The Mask. It results in a big showdown between the two of them, once Ipkiss gets the mask back. And it's Tina who decides she likes Stanley enough to leave Dorian, rather than Stanley trying to take Tina away.
* The Mask, Jim Carrey's character gets a police officer to do this for him, at gunpoint.
* The Mask, like his chest, there is also a small door handle on his back. After opening, any person(especially dogs) can enter the machine through the passageway (can be regarded as a design flaw). Inside there has a "Fail Safe Box", if you pee on the device, it will cause the robot to short-circuit.
* The Mask, like his chest, there is also a small door handle on his back. After opening, any person(especially dogs) can enter the machine through the passageway (can be regarded as a design flaw). Inside there has a "Fail Safe Box", Milo pee on the device, it makes the robot short-circuit.
* The Mask mass-murderer. It's also addictive, and can't be removed by anyone other than the person wearing it (unless the wearer himself allows it).
* The Mask Most of the people affected by Big Head's actions are considerably less amused.
* The Mask: Mrs. Kellaway's phone number, as shown in the picture of her which the cops find in the Mask's possession, is 555-9371.
* The Mask (no mean feat, since the green-faced creature is practically immortal).
* The Mask Notably, Kathy!Big Head once insists on fighting fair, no weapons, as she delivers a series of meek punches at Walter. Walter responds by punching her head through the wall behind her.
* The Mask of Circe's novels, the hero (who lived in the 20th century) had achieved the memories of his ancient ancestor - Jason (the mythologic character) through

some kind of science experiment.
* The Mask of Emulation, which allows the wearer to use any power he can watch someone else using.
* The Mask of Evelyn and is a wacky superhero. Eve falls in love with Stanley at the first sight of him and Davida prefers him than The Mask who she finds too strong despite he can be sweet and kind like Stanley as well.
* The Mask of Fu Manchu, is widely considered to be probably one of the most racist films of all time.
* The Mask of Fu Manchu, the Chinese villain is about to sacrifice a white woman to bring Genghis Khan back to life.
* The Mask of Life often gives uncontrollable powers to those who touch it without its permission. Usually this is temporary, although it was permanent the first time it ever does it, when it gives a Great Being the uncontrollable ability to bring inanimate objects around him to life. The Mask of Life itself also has a power that it doesn't have control over. When certain conditions are met, a countdown is started that slowly turns the mask from gold to black, and when this happens all life in the universe will die. When the Toa realize that they do not have enough time to awaken Mata Nui before the countdown is up the Mask of Life chooses to sacrifice its body instead to awaken Mata Nui more quickly. It turns out that the
* The mask of Makuta Mutran was originally to be called Artidax, the Mask of Mutation, until the writer realized that the Mutran set came with a Mask of Silence. The Mask of Mutation was later given to another Makuta, Miserix, and Artidax became the name of the island he had been imprisoned on.
* The Mask of Peter Pan. One of his powers was to release his shadow to consume those of others, causing them to rapidly age while keeping him immortal.
* The Mask of Shadows, worn by their leader, is a symbol for the Brotherhood of Makuta that tends to pop up in a lot of places, including a gigantic sculpture of the mask acting as the entrance to his "secret" prison.
* The Mask of Zorro: After their heated swordfight ends, Elena and Zorro share this exchange:
* The Mask of Zorro Alejandro and Diego have a sword fight in a bar and all Diego is using is his cane! They later have several training fights.
* The Mask of Zorro, Antonio Banderas is trained by old Zorro Anthony Hopkins to become the new Zorro.
* The Mask of Zorro) because Love killed Alejandro's brother and put his head on display.
* The Mask of Zorro, both Diego and Alejandro with the crappy Zorro costume do it with a sword and a knife. Later, Alejandro, this time with the official costume, does it with two swords against Montero and Love.
* The Mask of Zorro: Captain Love pulls a gun on Zorro, but then throws it away and faces him in a sword fight.
* The Mask of Zorro Elena lost her clothes and shares a vehement snog with Zorro.
* The Mask of Zorro: Elena quickly getting over how easily Zorro stripped her could count. Possibly she found it a turn-on, like the audience.
* The Mask of Zorro has Antonio Banderas' character telling his new child a story about how he fought as Zorro. This is also an echo of the opening, where the first Zorro tells his daughter a similar story, down the ending: both men see their wives and observe that they never did anything that stupid again.
* The Mask of Zorro is a twisted example, partially based on the director's vision of a young Custer.
* The Mask of Zorro: It isn't clear if the sword the new Zorro uses is in fact the same one as the one used by the original, but he received the mantle of Zorro in the end.
* The Mask of Zorro", the cue for the final battle, though in this case the Holst tempo comes as Captain Love orders Don Rafael's enslaved workers locked into cages to be buried alongside the rest of the evidence of their illegal mining operation.
* The Mask of Zorro; The Dons are being given a tour of a gold mine, when 3-fingered Jack, a captured bandit who's being forced to work the mine, calls them out on the fact that the mineworkers are slaves:

* The Mask of Zorro, the original Zorro, Don Diego de la Vega, plays the Mentor to his chosen successor, Alejandro Murrieta.
* The Mask of Zorro, the rest of the movie ignores this lesson for more Flynning, but points for trying.
* The Mask of Zorro) to take up his mantle as the new Zorro. In the same film, Alejandro tames a black horse and christens him the new Tornado, as the original Tornado likely died of old age.
* The Mask of Zorro When Diego is about to kill Rafael, Elena throws herself between them, begging her biological father not to kill the man who raised her.
* The Mask of Zorro, who is there to confess, well, feelings of lust for Zorro.
* The Mask once joined the marines and somehow was put in charge of guarding a battleship, to which he traded to kid for baseball cards.
* The Mask, on his second night with the Mask of Loki, Stanley decides to rob a bank so he can get into an exclusive club ("You can't make the scene if you don't have the green!"), foiling a group of other robbers in the process. No employees are threatened — he just busts into the bank and then busts out with the cash.
* The Mask on them, in one episode while chasing Lonnie The Shark who then dropped a baby The Mask is shocked at what just happened and turns around to save the baby and, in another episode when he was framed for robbing the Little League he starts to think that he might have gone crazy than usual which actually got him worried so he lets himself go to prison because of it but he found out it was Pretorius who did it not him so he freed himself from prison having not to worry now because of it.
* The Mask. Outside the Coco Bongo club, right after he's been thrown (literally "thrown") out of it.
* The Mask, Paul is seriously unnerved when he's playing Scrabble with Carol and Jane, and all the words are violent ones. Except for Carol's name.
* The Mask Peggy Brandt, who pretends to be Stanley Ipkiss' friend so she can get the $50,000 bounty for betraying him to Dorian Tyrell. While she did seem to believe that Tyrell wouldn't kill Ipkiss, she never tries to help him after the fact.
* The Mask, people nowadays know the "Cuban Pete" song more than the eponymous 1946 film it originally came from.
* The Mask pulled from the eponymous individual's pockets is a set mousetrap.
* The Mask, pulling and stroking it suggestively. He responds that "it's a power tie. It's supposed to make me feel... powerful," while his body language reveals that at the moment, intimidated by her sexuality, he's feeling anything but.
* The Mask pulling out a pack of mints at a monster that just roared at his face.
* The Mask Returns, no less) with the text "Warning: Do not strike with hammer" on it. Guess what he does.
* The mask rule is enforced in the vast majority of cases. Rey's case is unique due to a number of factors, mainly the extremely disrespectful manner in which his unmasking was handled. Rey and his uncle, the original Rey Mysterio, argued that Rey was representing his uncle's image in WWE since he dropped the Jr. from his name (the original Mysterio was a heavyweight by the way). Pure
* The masks also have the side effect of giving them a Darth Vader-style echoing voice.
* The Masks", Jason Foster's relatives Emily, Wilfred, Sr., Wilfred, Jr., and Paula Harper are absolutely delighted when he finally dies as they are the sole heirs to his vast fortune. However, their happiness is short-lived as they soon remove their masks and discover that their faces have been transformed.
* The Mask, Stanley Ipkiss vents about the nasty supervisor at his job.
* The Mask: Stanley Ipkiss when he puts on the mask moans in pain because of the fact that his head along with his eyes, teeth, ears, and tongue are changing along with his mind, but he gets used to it and The Mask, like Stanley, is a sweet, kind and good-hearted person. The same thing also happens with Evelyn who accidentally puts it on, but she's also good-hearted.
* The Mask: Stanley meets a girl named Evelyn who he gets along with very well but

then when she accidentally puts on the mask, Eve comes out and she is a lustful, aggressive and unpredictable woman who Stanley becomes scared of because of it along with the fact she tries to kiss him a lot, gives hard hugs which she is inexperienced with people who are not like her, then takes him to the Coco Bongo which she swings him around until she accidentally puts him through the ceiling which causes her to feel guilty so she decide go easy on him by giving out gentle kisses, a light hug and talking softly with Stanley who though was scared of her at first can see that like Evelyn she is a good-hearted woman which he even starts to consider letting her around but he knows that is wrong because Eve might stick around forever if she does not take her face off therefore leaving Evelyn trapped under the mask no longer in control of her actions while Eve is in charge so he decides to take her face off which he does in the end though he clearly regrets having to do it.
* The Mask, Stanley's dog Milo, after donning the mask, pees on one of Dorian's men.
* The Mask, Stanley sold his soul to the Devil, known in this series as "Bob". The Mask challenged Bob to a dance contest for his freedom. When he lost, Bob challenged Mask for a double or nothing rematch, which Bob lost, resulting on him having to be Mask's servant.
* The Mask, Stanley was arrested and learned the Miranda rights don't exist in that timeline.
* The Mask). Started out as an ordinary mook. Said one of his creators: "What doesn't kill him makes him Walter." In the comics, he just shrugs off injuries, even cutting himself to freak out his quarry, but in the cartoon he's more or less indestructible, and just giving him any kind of pause required heavy ordnance.
* The Mask starts. The same with Esmeralda as she sees that her owner has become a different woman literally after accidentally putting on the mask. Though Milo does eventually see that his owner's alter-ego The Mask is a good-hearted, nice and kind man so he gets less scared of his owner putting it on since he can finally see just how much The Mask cares about Milo and loves him very much along with he also wears it when he has to rescue his owner from danger as well.
* The Masks we Wear (JiggleWigs), Jia comes off as an annoying sibling.
* The Masks we Wear (JiggleWigs) of the Fire Nation when Azula was a baby and Zuko was a toddler.
* The Masks we Wear (JiggleWigs): Without her upbringing as a Fire Nation princess, Azula is much, much kinder. She still has an edge to her character but isn't as violent or malicious.
* The Masks We Wear (Teen Titans) and take the identity of Slade, bringing him into conflict with the Teen Titans.
* The Masks We Wear (Teen Titans) betrays him, setting off the events that cause John to take the identity of Slade and come into conflict with the Teen Titans.
* The Masks We Wear (Teen Titans) by pretending to be their friend and installing a security system owned by one of her companies in Titans Tower so the Talons can infiltrate Titans Tower and kill them all.
* The Masks We Wear (Teen Titans): Mary is Abel to Samantha Vanaver's Cain while Mary was alive, but as the story progresses, things go downhill.
* The Masks We Wear, Zuko loses his affection for Mai as a result of his increasing similarity to his sister.
* The Masks We Wear Zuko refuses to believe that anything the Fire Nation did is wrong, and as such considers the mere thought of helping the Avatar and overthrowing his father as treason.
* The Mask, the living-cartoon title character has his heart-symbol pounding out of his chest when watching Cameron Diaz's character sing at a nightclub.
* The Mask: The Mask is bald but he is a unstoppable cartoonish superhero who is also a brilliant genius as he thinks new different ways of defeating his enemies by combining both his insanity and creative mind into different forms that he thinks are appropriate for the situation he's in so that he can use them to defeat his enemies or destroying anything they are using.
* The Mask: The mask is pretty damn hard to remove once you put it on, painful

even.
* The Mask: The Mask moves at superhuman speeds, shapeshifts repeatedly, transforms a balloon into a functioning machine gun, voluntarily freezes and unfreezes his own body while still remaining fully conscious, defies the laws of gravity, and survives being shot in the head at point-blank range without the slightest sign of injury, all of which is either caught on camera or is seen clearly by multiple eyewitnesses. Despite this, it takes half the movie before anyone even considers the possibility that he's not just a mundane criminal wearing an ordinary green mask.
* The Mask: The Mask pulls this any time he gets scared, horrified and shocked which gets to the point that he sometimes comment on it at times.
* The Mask: The Mask shoves exhaust pipes up some crooked mechanics asses for cheating him as Stanley.
* The Mask: The Mask tends to have large white buck teeth unlike Stanley and the other mask personas also have them as well which The Mask and Eve tends to show them the most.
* The Mask. The Mask then says to her "Don't I know you from traffic school?"
* The Mask: The Mask turns Stanley's car the Loaner or any car into the Maskmobile that like him shapeshift into various vehicles along with gadgets to spare which is justified as The Mask can access through Stanley's memories and pick out any vehicles that has different gadgets from them.
* The Mask: There are episodes that focuses on The Mask entirely which shows what he does, his positive traits such as being friendly to children, going to the future, accidentally getting signed in the army, getting his lucky feather back then showing himself to be smart and clever by disguising himself as Dr Neuman and controlling himself the whole time in a room full of his enemies despite his wild nature and wackiness.
* The Mask: The season two episode "The Green Marine" showed how The Mask accidentally enlisted himself in the Marines.
* The Mask, the title character has a moth fly out of his pocket to show how poor he is.
* The Mask, the title character literally freezes (after being ordered to "Freeze!" by Lt. Kellaway) and thaws himself out seconds later with no ill effect. Justified in that he's basically a cartoon character.
* The Mask the title superhero responds to a order to "Freeze!" by doing exactly that — stopping dead in midair, covered in icicles. When told by the exasperated cop to "Unfreeze" (because otherwise he can't obey a further order to put his hands up), he finishes his leap and gets tackled by the cops.
* The Mask, the titular character is "trying" to sneak quietly past his landlady's apartment when an alarm clock pops out of his pocket and starts bouncing noisily around. He finally smashes it with a giant cartoon hammer.
* The Mask to her in the park despite doing it somewhat sleazy at first which he got better at it.
* The Mask, two car mechanics are assaulted and raped by the main character while wearing the mask. He rapes them in the ass with certain phallic car parts, and this is played for laughs in the movie.
* The Mask. Ultimately he ends up tearing the comicbook apart, which wipes out the villains from his reality.
* The Mask unleashes a person's Super-Powered Chaotic Side. However, when it is wielded by the villain, he becomes even more of a monster. In the comics, however, it unleashes a more "evil" side to a person, as the eponymous mask takes the driver's seat of their mind.
* The Mask uses this to make the nighttime that much more supernatural.
* The Mask villain Dorian Tyrell uses this to return the favor when he's shot repeatedly, killing his boss, Niko. To elaborate, Niko shoots at him while he's wearing the mask. His body soaks up the bullets, then he spits them back (as if they went out of a machine gun) at Niko and kills him.
* The Mask was also conceived as a gory horror movie with black comedy elements, true to the source material's tone, even bringing on horror veteran Chuck Russell

as director. However, no matter what was tried with the script, the film's think tank realized it was audience-alienating and niche (especially since the budget needed would be significant enough to require a big box office haul to recoup). It was finally reworked into an out-and-out comedy, with several darker scenes not making the final cut, and nabbed Jim Carrey on the cusp of breaking out as a mega-star. The result was one of the biggest hits of 1994.
* The Mask (wearing The Mask, so he was able to do this) swallows a bomb, which explodes in his stomach, he then blows a smoke ring and announces "Now that's a spicy meat-a-ball!".
* The Mask, when Stanley is arrested, he sees his dog Milo from the jail cell window, and sadly tells him to find himself a new home.
* The Mask. When the criminal Dorian Tyrell puts on the magical mask of Loki and his massively evil hidden dark side comes out, his eyes become red.
* The Mask which makes him care about innocent lives. He also spares people who annoy him and the police as well despite them trying to arrest him.
* The Mask: While being frisked by the police, the Mask says he's never before seen the pair of funny-eyeball glasses that come out of his pocket. The bazooka, on the other hand: "I have a permit for that."
* The Mask would occasionally have Stanley Ipkiss' dog Milo pee on something as part of a gag. One example is in the episode "Mayor Mask", which has a scene of Milo urinating on a campaign poster for Mayor Tilton.
* the mask Yamask carries with it come together to form something that looks like a very simple 'dick and balls' graffiti.
* The Maslenko-Ivanytina-Matsybora family was a clan of serial poisoners in the late
* The Masochism Tango: A couple who frequently alternate between being affectionate and fighting.
* The Masochism Tango: A married couple frequently alternates between arguing and being affectionate.
* The Masochism Tango: Spouses who act antagonistic towards each other.
* The Masochism Tango). The trope is about emotional abuse and dysfunction within genuinely unhappy relationships between people who are truly ill-suited to each other.
* The Masochism Tango: Two characters who are supposed to be lovers want to murder each other.
* The Masochism Tango: Two people claim to be in love, but act like they hate each other.
* The Mason-Dixon Line, an imaginary line dividing the north and south of the
* The Masque of Mandragora) is evidence to the Doctor that something is wrong.
* "The Masque of Mandragora", Marco is hung by his wrists while he's being tortured.
* "The Masque of Mandragora": Marco is tortured to get him to accuse the Duke.
* "The Masque of Mandragora", Sarah Jane is nearly sacrificed by the Cult of Demnos.
* The Masque of Mandragora takes advantage of Giuliano's swanky ascension party to conceal themselves in Part 4.
* "The Masque of Mandragora", the Doctor explains to Duke Guliano that he learned his swordsmanship from a captain in Cleopatra's bodyguard. This was just after the two of them had fought off six of Count Federico's elite guards.
* The Masque of Mandragora village in North Wales to double for Renaissance Italy.
* "The Masque of Mandragora" when she questions why she understands medieval Italian.
* The Masque of Slaanesh, a daemonic dancer who has fallen from its patron's favour, carries a pair of reversible theatrical masks on a stick — one for Tragedy, one for Comedy — as part of its trappings.
* The Masque of the Red Death attempt. Then, Julianna instead offers Francesca a means to escape the castle with her captive loved ones, choosing to remove her as a competitor through nonviolent means.
* The Masque of the Red Death, Prince Prospero angrily denounces the "blasphemous

mockery" of (what he assumes to be) a partygoer dressed up as a plague victim.
* The Masque of the Red Death" set at the modern-day, ultra-mundane version of the Masquerade Ball; a small town Hallowe'en disco. Everything goes well at first, everyone dancing around in stupid masks and costumes, until a man in a black rhinestone suit, platform shoes and a skeleton mask arrives...
* The Masque of the Red Death". The clock is striking midnight just as the Prince encounters the mysterious figure in the black room. As the striking ends the Prince and every other character in the house drop dead and the candles blow out.
* The Masquerade, and how bonkers she sounds to other cops as a result).
* The Masquerade. A nuke leaves an Other nowhere to hide, as the blast penetrates into every Twilight level, except teleport, which is a difficult and time-consuming process for most.
* The Masquerade came within serious danger of being broken in one episode which revolved around a guy who did just that, and captured some pics of Anubis's invasion fleet above Antarctica, along with some more concrete evidence:
* The Masquerade: combining Muggle technology with magic makes it far more likely for the object to end up in Muggle hands, thus revealing the existence of magic.
* The Masquerade cracking has caused the Camarilla to form a tighter knit, secondary masquerade community where they only allow membership to those they view as elite. They abandoned SchreckNet and other modern technology completely, due to that being how the intelligence agencies found them. They now use
* The Masquerade) gives Buffy a good luck kiss on her forehead when she has to do something dangerous. Buffy says she needs more luck than that, so he smooches her on the lips as well.
* The masquerade in "Cinderella for a Day" is a swankier event, a dance held at the local country club.
* The masquerade is justified in that it started out to protect them in the Dark Ages when witches and wizards were persecuted (though the prosecution was more likely to harm muggles, due to lack of accurate knowledge on wizard behaviour, and wizards having, y'know,
* The Masquerade is prompted by another character mistakenly identifying Renesmee as one of these and subsequently reporting the Cullens to the Volturi for turning her.
* The Masquerade is the possible resurrection of a crazy and powerful Dark Other from the days before the Grand Treaty and the Masquerade, who likes to take the form of a dragon. The characters pretty quickly agree that the humans would be able to, if not kill, then at least seriously hurt the dragon, but it would still result in devastation and loss of life. Helicopter gunships vs a mad dragon? Bet on the gunships.
* The Masquerade life, society dictates that he must marry outside it. Galen agonizes for months about whether and how to tell his fiancee, Delphia. Subverted when he does decide to tell her and her reaction, after a brief initial shock, is pretty much, "Faeries living under London? Cool!"
* The Masquerade — being turned into an ermine for anywhere from six months to a few years.
* The Masquerade one of them discovered how they are really created and saw what happens to their mothers in process, he mentioned it's good that his wizard dad is anonymous — he'll probably live longer this way. That's not counting some... "little details" (or rather lack thereof) concerning Jordain themselves.
* The Masquerade prevents Kaoru from telling her his string is already tied.
* The Masquerade revealed to him. This implies that other world leaders are also kept informed of the wizarding world.
* The Masqueraders. The book being set in 1746 or thereabouts makes this a bit more believable than it would be in the Regency period.
* The Masquerade singles him out for particular contempt, calling him a “watcher” who has no business getting involved after some choice he made a long time ago.
* The Masquerade. The porn doesn't really bother her though; her only response is "Eh, I don't really mind; you're an adult, after all."

* the masquerade, this tends to be a regular occurrence in the eyes of the in-universe humans. Perhaps the best example was in the episode "Snow Problem", in which the puppy Tundra coordinated a rescue of a (fellow) sled dog by jumping down a mountain face and barking instructions to the Pound Puppies team who agreed/were volunteered to be his sled team.
* The Masquerade was broken early on, if not before the show started. This is made much more clear in the Third Season episode "The Prom", during which Buffy is given the "Class Protector" award. Jonathan mentions while he's presenting that everyone present knows that Sunnydale isn't like other schools, but it's an unwritten rule that no-one ever talks about it. She won the award because the class mortality rate was the lowest in school history!
* The Masquerade (which it wasn't), barely lets Harry get a word in edgewise, dredges up charges from years prior that he himself dropped, and flat-out ignores witness testimony. However, Dumbledore manages to assemble a pretty ironclad defense case (Harry was using magic to protect himself and his cousin), in the process making Fudge look like a raving idiot. The jury is far less biased, and most of them just seemed impressed by the fact that Harry managed to use such a powerful spell.
* The Masquerade Will Kill Ruin Your Dating Life. His refusal to admit to Patty that he's the Flash explicitly leads to her moving away.
* The Masquerade Will Kill Your Dating Life: Being a superhero makes it hard to get a date.
* The Masquerade Will Kill Your Dating Life causes issues with their dating life, possibly leading to a break-up.
* The Masquerade Will Kill Your Dating Life: When you're a part of a secret adventurous lifestyle, it cuts into your romantic relationships.
* The Masquerade Will Ruin Your Dating Life. In the sixth season, he meets with SCPD officer Nick Anastas and dates him.
* The Massachusetts Bay Colony was founded on Puritan ideals, allowing no other denomination and permitting "visible saints" (righteous Puritans with sufficient property) only to vote or hold office.
* The Massachusetts car dealership Commonwealth Motors uses the tagline "Shop Us Last...You'll Love Us!", and actively encourages in their radio advertisements that potential customers try out other dealers before visiting them. Their web site URL is even ShopUsLast.com.
* The massacre at the 1972 Summer Olympics in Munich, Germany was a tragic example. The hostage-takers were watching the news which was covering the rescue plans and attempts in depth (case in point: they watched plainclothes police take position on the roof right above them and their balcony
* The Massacre" concerns the (real-life) genocide of the Protestants in France in 1572. The Doctor has no interest in averting it, seeing it as the natural course of history, and when he finally catches up to Steven his only action is to pull them both out of there in order to save their own lives. Steven would have been quite happy to change history in order to save those people and he makes his outrage at the Doctor clear, though the implication is that Steven had managed to change history enough to save the life of one girl.
* The Massacre of Glencoe was ordered by King William of Orange with the line:
* "The Massacre of Saint Bartholemew's Eve" and becomes immediately fixated on saving her. When the Doctor leaves the time period without doing anything to prevent the massacre, he focuses most of his grief on the fact that they'd left Anne to die.
* the massacre of the Youth Brigade in the beginning. Prince Luca Blight, in order to justify starting a war with the enemy, betrays and slaughters his own Youth Brigade, for the sake of propaganda.
* The Massacre", the First Doctor was a dead ringer for the Abbot of Amboise. This led to much confusion for his companion Steven Taylor, who encountered the Abbott and believed him to be the Doctor.
* "The Massacre". When Steven is forced to abandon Anne, he has a small breakdown and storms out of the TARDIS to live the rest of his life wherever the Doctor

landed, although he changes his mind soon after. When Steven meets a woman with the same surname as Anne, he immediately assumes she's Anne's descendant even though, as a woman in the Renaissance, Anne wouldn't have given her surname to her child unless the child was born out of wedlock — something rare enough that Steven would have to have a pretty good reason to assume it was the case.
* The "Mass Assault" doctrine sides with either Subversive or the Horde, with the first branch decreasing the combat width of your infantry (allowing more men to participate in a single battle) and giving auxiliary bonuses to your mechanized troops like real life deep battle doctrine and end-of-war Red Army, while the second branch increases your recruitable population, allowing you to field many more divisions like the initial desperate attacks against the Nazis until the front stabilized or Chinese fighting against the Japanese invasion with inferior equipment but greater manpower. The Soviet Union, Communist and Nationalist China, and all the Chinese warlords start with this doctrine.
* The mass doesn't appear out of nowhere; the stronger gravity is the result of the concentration of the star's mass. The gravity of a black hole is strong enough to overcome a theoretically infinite amount of momentum, within the event horizon.
* The Mass Extinction event chain is all about surveying worlds that were rendered uninhabitable by either massive disasters or their natives' negligence, in order to ensure the surveying species does not suffer a similar fate.
* the massive bureaucracy homeworlds, the recruits only learning of the existence of the wider galaxy after joining the Chapter.
* the massive, going "Why are men so obsessed with how big their crap is?!" Stan tells her later in the episode "You don't understand, Mom. You just don't understand.", much to her exasperation. (Both a news anchor and a employee at Guinness World Records, both of whom are also female, also express their annoyance, though in the latter's case, she's heard explaining to someone on the phone that Guinness simply doesn't want to handle the flood of men calling about their giant craps and instead redirects them to another organization.)
* The massively overweight and balding Cluemaster is a far cry from the fit, head of hair-sporting Arthur Brown from the comics.
* The massively reworked 8th edition turned the metagame towards so called "soup" forces where instead of singular army types (ie, Space Mariners or Imperial Guard or Sisters of Battle), players could mix them all into separate detachments for maximum effectiveness. An example is that you could take multiple special characters (from different sub-factions) for buffs & re-rolls, and mix them with Imperial Guard units for board control and sheer numbers, while also taking the most effective combat units from heavier forces like Space Marines. Changes to turn order, weapon wounding & armour piercing effects as well as vehicles being changed to just have a regular statline instead of unique armour facings also heavily damaged the viability of strategies for certain factions like Orks, who now have "vehicles" that get blown off the board by first turn alpha strikes forcing them into infantry heavy armies that are boring to play with and against.
* The Massive Multi-Fandom RPG. A couple of months later, however, season 3.5 was started again as an attempt to conclude the story, with a different, simpler premise that doesn't demand as much from the players. (And then it fizzled out as well, unfortunately.)
* The Massive Multi-Fandom RPG again (his player was having problems finding time to RP). He since recovered.
* The Massive Multi-Fandom RPG are set in a city which keeps shifting its layout, and the presence of large crowds of disparate individuals from all over the multiverse guarantees adventure, in addition to the daily "curses" which affect the inhabitants in various ways.
* The Massive Multi-Fandom RPG following after the meteor and attacking the city.
* The Massive Multi-Fandom RPG is, well, a role-playing game featuring a massive number of characters from multiple fandoms.
* The Massive Multi-Fandom RPG, it's common for players who can't post all the time to explain their characters' inactivity by stating that they got distracted by something or have been busy elsewhere in the meanwhile, usually potholing their

explanation to this very trope.
* The Massive Multi-Fandom RPG take place in a city which keeps randomly shifting its layout when no one is looking. This is highly convenient for the players, as no matter where the characters are, they can immediately arrive anywhere else as quickly or as slowly as desired.
* The Massive Multi-Fandom RPG, this gives everyone the ability to understand all other languages, but doesn't actually change what speech or writing sounds/looks like.
* The Massive Multi-Fandom RPG to limit the number of characters a player needs keep track of.
* The massive Omega Supreme not only has a cannon for a left arm, his right arm is a simple three-fingered claw that in some versions has another cannon built into the palm. Manual dexterity is not his strong suit.
* The massive supply of targetable enemies and objects in Weapons Bed and Cosmic Wall make it very fun to charge the homing laser as long as possible, and watch the screen fill with explosions, tons of bonus points, and Eggman's amused little chuckle is very satisfying.
* The Mass Media Club president only shows up once during a flashback, and the only thing she does is fall in a swamp and nearly drown. Despite this, she has a major influence on the overall story since
* The Mass Relay network is destroyed. This method of faster-than-light travel is absolutely essential to galactic civilization. There's no indication that the technology or knowledge exists to repair or replace relays, and it's treated as something of a surprise earlier in the trilogy that a since-extinct race was able to build their own relay. Without them, galactic civilization as the player has experienced it for three games is essentially destroyed.
* The Mass Relays, giant space constructs believed to be left behind by the
* the mass relays, which made intra-galactic travel possible and were the backbone for the galactic community, are all destroyed, the galaxy would be plunged into another dark age and that billions of people would be cut off and starve to death.
* The mass shooting at the First Baptist Church in Sutherland Springs on Nov. 5, 2017 was captured on video almost in its entirety, as the church recorded its sermons every week in order to post them on
* The Master admitted to drawing on the early history of Scientology for the movie but also said The Cause is just the backdrop for a character study. Much of the doctrine of The Cause is clearly lifted from Scientology and Dodd resembles L. Ron Hubbard.
* The Master also held Darla as his favorite and had a breakdown after she died.
* The Master also showed interest in ruling the world, as did Adam, who planned to re-populate Earth with an army of beings like himself and the First wanted to possess every human being on the planet, so it probably applies as well. The only
* The Master and his return is heralded by portentous psychic nightmares that afflict every human being on Earth.
* The Master and Margarita, a Soviet bureaucrat shouts, "The devils take me," having been thoroughly exasperated by Behemoth and Korovyev. Being more or less devils, they enthusiastically agreed and promptly "took" him, leaving behind his empty animated suit. (One English translation has him saying "Damn me", with the same result).
* The Master and Margarita, but in roubles. Woland/Satan then anonymously called the police, who found the currency, now mysteriously American dollars.
* The Master and Margarita by Mikhail Bulgakov two of the devil's servants bear some resemblance to the most popular zanni characters. Koroviev, the talkative trickster dressed in checked clothes brings to mind Arlecchino, and in certain early version of the novel there's a character called "Fiello", a hunchbacked brute with mouth full of fangs, dressed in white, grotesque clothes with bells attached, who seems to have some of Pulcinella's characteristics. The latter was subsequently modified by the writer to become Azazello, another servant of the devil. Azazello lacks any significant resemblance to Commedia dell'Arte characters.
* The Master and Margarita chases Woland across Moscow and when he later shows up

in his fellow writers' restaurant in underpants (and wielding an icon... long story), they don't take his story seriously, thinking that witnessing a death unhinged him. When he insists that wasn't a traffic accident and there's a murderer at large, he is restrained and spends the next several days in a madhouse.
* The Master and Margarita Hella wears this when she's not completely naked.
* The Master and Margarita), he reassures her that he's totally fine with it, for he'd seen not only naked women, but also completely flayed ones.
* The Master and Margarita himself and begins to behave irrationally - at least in the eyes of the people who surround him. The problem is, he did see and hear all the things he describes, but they're so outrageous that nobody believes him.
* The Master and Margarita (in fact, Ivan's character was based on poet Ivan Prubludny, who actually was executed in 1937).
* The Master and Margarita, Margarita wears metal undies at Satan's ball. They keep cutting her skin, but she never complains, because all the other ladies at the ball are stark naked.
* The Master and Margarita, the title character's masterpiece is a novel recounting the life of Pontius Pilate. Excerpts are given from the chapters concerning Pilate's encounter with Jesus, which depict the episode in this way: nothing unambiguously supernatural occurs, and Yeshua is characterized as a philosopher who speaks of the Kingdom of Heaven only as a metaphor and is misunderstood by his followers.
* The Master as a result, but all his new abilities are fueled by his own life-force.
* The Master attempts to turn Mike Yates, recognising that the captain is tired of fighting for the status quo and might easily
* The Master Ball is a purple Poké Ball. It's also the most effective kind of Poké Ball there is, with a
* The Master Ball, which has a 100% chance of capturing any Pokémon, but you're only guaranteed a single one in each game, which becomes especially frustrating in later generations as the number of stupidly difficult-to-catch Pokémon increases. You
* The Master Builder. And as main characters go, he is not of the heroic type.
* The Master Builder is probably one of the oldest examples. She is irresponsible, playful, and clearly after amusement. And when she gets Solness to climb the highest tower, like she has urged him to, she can't keep herself from jumping and waving her hat—and making him lose his balance and fall to the ground in the process. Her reaction is more bewildered than guilt-ridden.
* The Master by overdramatically shouting “THE MASTERRRR! REEEEEBOOOOORN! ” before screaming through his regeneration. Then when the Saxon Master is born, he jumps up and exclaims “HA HAAAAAAA!” before running around the Tardis in circles laughing like a goofball.
* The Master. Capped off with a dying cabinet member proclaiming "You're insane!" and the Master responding with two enthusiastic thumbs up.
* The Master Chief fits this trope perfectly in-story. Whilst some of the other Spartan-IIs are superior to him in strength, speed, intelligence, marksmanship, etc., the Chief has the most balanced skill-set of the group outside of his second-in-command Fred-104, being good at everything rather than filling one specific niche. He's also the bravest and is a natural leader, and noted by Dr. Halsey (the architect of the SPARTAN-II program) to be the best of them all. Cortana chalks it up to something no one else ever saw but her: luck.
* The Master Chief is notorious for pulling this kind of stunt (it helps that his armor has
* The Master Chief is only known as John-117. The closest thing we have to a family name for him is this MIT prank claiming that he's actually
* The Master Chief is unflappable. Though in the original trilogy certain things weigh on him (such as
* The Master Chief is very much this. To quote Bungie artist Eddie Smith, John-117 is "pretty much the consummate professional. He does his job, walks off, doesn't even get the girl, he's that cool he doesn't need her." He is given an objective

and ordered to "Win" and he will execute on that order to the best of his ability, pulling out a victory by any means necessary. He does so because he was raised to be one, along with all the other Spartan-IIs, and fights simply because that is who he is, rather than for any kind of profit or glory. In fact, he displays some discomfort at any media attention, preferring to conduct himself humbly but with absolute self-confidence.
* The Master Chief qualifies as well — 'Master Chief Petty Officer' and 'Sergeant Major' are the same pay grade. One's just Navy, and the other Army or Marines. Though people who've only played the games would know him as more of a
* The Master, despite often trying to kill the Doctor, agrees to try and save his life in "The Five Doctors", because (in his words) "the cosmos without the Doctor scarcely bears thinking about."
* The Master does this a lot — until it's inverted beautifully in
* The Master Emerald, which has the power to control or override the Chaos Emeralds. It's
* The Master engage in black magic rituals to summon and control a powerful alien. The Doctor admits that the Master's incantations, gestures, symbols and rituals are not window dressing, but have actual power matching the exact description of black magic given by the local white witch. Yet The Doctor insist on claiming it is the 'secret science of the Daemons."
* The Master flees Smaug's destruction of Lake-town on a boat loaded with the town's gold. When it seems like he's about to get away, Bard successfully kills Smaug who lands on top of his boat crushing him into the cold waters. In contrast, his book counterpart fled the battle with as much gold as he can carry in to the wilderness with no food. By the time Bilbo gets home, he had starved to death.
* The Master. Fortunately, when the original personality tries to take her over, she manages to destroy him, earning a life independent of him.
* The Master from Season 1 has a similar reaction when Buffy confronts him for second time, perfectly alive. The last time they squared of, he killed her
* The Master given that the man who'd been calling himself Thomas Marik and running the Free Worlds League for the last three decades had long before been outed (to the audience, at least) as an imposter.
* The Master had been turned into one by the Doctor in the non-canon "Scream of the Shalka".
* The Masterharper of Pern, Robinton impregnates Silvina and offers to espouse her. She turns him down.
* The Master has a dominant presence and is the titular character, and a case could be argued that they were actually co-leads, given how the film's central conflict comes from the dynamics of their relationship and how there are several scenes where the viewer sees things from Hoffman's perspective. However, to get both actors nominated, Hoffman was put in the Supporting Actor category.
* The Master has hypnotized the human population on Earth using Archangel communication software. Martha Jones has spent the last year spreading the word (in this case, Doctor). At the proper moment, everyone thinks "Doctor!" and the Epic Prayer restores the Doctor's strength, allowing him to battle the Master.
* The Master has red eyes, even though vampires usually have yellow eyes.
* The Master has utilized numerous means aside from regeneration to extend his life.
* the Master in disguise, who builds a rocket's computer system "out of food and string and staples."
* The Master in Series 3, who under the alias of Harold Saxon became Prime Minister, despite still being as mad as ever, if not more so.
* The Master in the classic series tended to do this, up to the point that BBC credited the actor with an anagram to keep up the suspense.
* The Master inverts this by holding this view of humanity, revealing to the Doctor that despite the Utopia Project's attempt to find a way to survive the end of the universe, the ultimate fate of humanity is to cannibalise themselves and devolve into
* The Master is one of the few vampires old enough to have totally lost all human

features, making him several centuries old.
* The Master is one, though his magical abilities are more pronounced in supplementary material than the actual series.
* The Master is sometimes portrayed as a Noble Demon, often mentioning his friendship with the Doctor, or expressing regret at inconveniencing the companion, between stages of his plan to rule the universe and kill them both.
* The Master itself among many other horrible and sanity destroying pieces of literature.
* The Master kidnaps Martha's entire family bar her brother. He never actually uses them as leverage against her, however, suggesting he's just doing it
* the Master leaves for the Doctor at the end has him correctly predicting some of her reactions to what he has to tell her.
* The Master leaves himself vulnerable to happy thoughts in "Last of the Time Lords". In addition, his biggest weakness throughout the series is... the Doctor, the one person he's never fully understood. (One episode of the classic series shows that his worst fear is a room full of the Doctor, laughing at him.)
* The mastermind behind the Killing School Trip turns out to be an AI based on Junko Enoshima, who usurped the role of "Observer" from Usami and forced her into the humiliating role of Monomi, Monokuma's
* The Mastermind is actually Junko Enoshima, the second person in the game to die. Or rather, her twin sister posing as her
* The Master Mind of Mars so her favorite could woo the girl who loved him.
* The Mastermind of Mirage Pokémon has the Mirage Master turn out to be Dr. Yung, the creator of the Mirage Pokémon system.
* The Master of Darkness turns most of the world into a shadowy, distorted reflection of what it normally is. It's implied that staying in the Darkness for protracted periods of time may be fatal.
* The Master of Disguise after a hiatus and be a showcase for his impressionist abilities, but ended up being regarded as one of the worst comedies ever made and derailing his career. However, it made $43.4M on a $16M budget.
* The Master of Disguise as part of a sequence of events from Disguisey history, when one such Disguisey poses as a statue to ambush a thief.
* The Master of Disguise features a pop-up book that provides extremely specific information relating to any situation at hand on whichever page is randomly opened to.
* The Master of Disguise had such a montage for applicants for the title character's assistant. However, said montage didn't show any of the supposedly horrible interviewees, instead consisting entirely of the mentor yelling "GET OUT!", "FREAK", or simply "OUT" over and over again. As a final slap in the viewer's face, the sole interviewee we do get to see is nearly dismissed because her ass is too small.
* The Master of Disguise is a parody, but his family, the Disguiseys, play it straight. Pistachio himself begins to play it straight by the end of the film.
* The Master of Disguise is interrupted by his farting. However, he grows to dislike many of the subsequent uses of it.
* The Master of Disguise is this: Force-disguise a Master of Disguise as him, then push that Master of Disguise over a cliff, making everyone think he's dead. Or something. It isn't really clear of what this accomplishes.
* The Master of Disguise. One of Pistachio's disguises while being trained by his grandfather was an inflating "fat businessman" suit. Unfortunately, Pistachio tugged on the cord too hard and, well, guess what happens next.
* The Master of Disguise, Pistachio's father gets himself out of the crime-fighting business and opens a restaurant so that his son won't know a life of danger. This, of course, fails when he and his wife are kidnapped, and Pistachio's grandfather shows up to teach him about the family legacy and train him to save his parents.
* The Master of Disguise review, Rachel actually attempts to take his suicide contemplations seriously by helping him along, to his own frustration — he didn't really mean it.
* The Master of Disguise, the Critic repeatedly begs for someone to kill him in

increasingly over-the-top ways to express how much he hates the movie, only to be disturbed when Rachel always happens to have just the tools on hand (and that she is willing to use them).
* The Master of Disguise: The Disguisey family used this as a style of martial arts:(consisting of slaps and blocks to humiliate your opponent). Pistachio took this form of combat to heart, Especially when his arch nemesis Devlin Bowman kidnaps Jennifer, & Pistachio's Mamma & Pappa. In the alternate ending, however, Pistachio decides to forego the slaps and simply punches Bowman out.
* The Master of Disguise uses this in one of the final scenes to uncover the identity of the disguised hero, who had given himself away by forgetting to change his shoes.
* The Master of Disguise) wears various disguises, the majority of them played by Carvey himself under different makeup/prosthetics, yet the only disguise we see him unmasking onscreen is when the villain manages to see through Pistachio's disguise of one of his henchmen (where the actor-switch trick was employed yet again).
* The Master of Disguise where a pair of bad guys chase Pistachio into a hallway of doors and Pistachio somehow appears in a different disguise behind every door which somehow open and close by themselves, leaving the bad guys thoroughly confused. A few moments from this scene and a few extras that weren't used in it can also be found in the movie's end credits.
* The Master of Disguise where two villains chase Pistachio into a hallway of doors and Pistachio somehow appears in a different disguise behind every door which somehow open and close by themselves, leaving the bad guys thoroughly confused. A few moments from this scene and a few extras that weren't used in it can also be found in the movie's end credits.
* The Master of Disguise with his face pressed to his desk, pointing into the air to bring up quotes from other reviewers — including Mike Nelson — regarding how horrendous the film was.
* The Master of Illusion. Exploits the fear of the unknown and sometimes death.
* The Master of Lake-Town, both in terms of his girth and by virtue of being played by the extremely tall
* The Master of Laketown is also clearly showing the effects of too many rich meals, although not to anywhere near the same degree.
* The Master of Ordinance is an officer who is often attached to the command section of front line Astra Militarum infantry regiments to act as a liaison with the forces' artillery companies. These officers use various auspex-arrays, and other scanning devices, to relay targeting data to off-table artillery batteries to call down supporting barrages with far greater accuracy than would otherwise be possible. The 8th Edition rules represent this by giving the Master of Ordnance a one off artillery barrage attack (representing the model calling in fire from off table artillery units) and by allowing the player's artillery units to re-roll long range shots when there is a Master of Ordnance nearby.
* The Master of Paris easily shrugs off an attack that moments before turned a group of knights into
* the Master of Paris. He has a moment to register that this is bad before she destroys all of his false bodies at once, forcing him to feel all of them.
* The Master of Ragnarok & Blesser of Einherjar fortunately) and is able to communicate back to Earth. A big part of the wolf clan's rise in power is him rapidly introducing new technologies and military tactics.
* The Master of Ragnarok & Blesser of Einherjar, it is outright stated that protagonist Yuuto Suou is the likely source of Norse mythology, as the world Yggdrasil is supposedly around 1500 B.C., Yuuto's name translates to Surtr in Norse, and several of his more high-profile battles match Norse oral lore quite well...
* The Master of Ragnarok & Blesser of Einherjar Later, the other women in his harem all becomes his concubines, but Mitsuki remains his number one and also bears his first child.
* The Master of Ragnarok & Blesser of Einherjar stronger than he is, and he needs said harem to keep him alive, he can't resist even if he wants to, and the

whole thing is played for laughs.
* The Master of Ragnarok & Blesser of Einherjar: Yuuto Suoh is summoned to another world/time and made the Patriarch of the Wolf Clan after the original Patriarch dies. As such, the members of the clan (as well as those of other clans whom the Wolf Clan conquers) take a "Chalice Oath" in which they swear fealty to him and claim to be his property. Many of these women also begin to call themselves his "daughters" or "little sisters", but nonetheless want to become his wife or one of his mistresses.
* "The master of science fiction now creates fascinating tales of mystery." —
* The Master of the Dammed, being the one who created Kaila and gave Keela her powers, is an obvious example. He's a living skeleton who rules over
* The Master of the Dammed, being the one who gave Keela and Kaila their powers, naturally has them himself. It only makes sense, considering
* The Master of the Dammed's own scythe is his. Break it, and he dies in an instant.
* The "Master of the Djinni" proved himself to be one of these. Not eager to serve any other master, he royally put Glomgold through the wringer with those three wishes. Too bad for him that third wish became his own undoing.
* The Master of the Flying Guillotine and an unnamed mook with a robotic hand and hockey mask in
* The Master of the local coffee shop, Abcb, knows the feelings that both Kyousuke and Madoka have for each other.
* The Masterpause, from January to April 2015; it is named for having concluded with "Caliborn's Masterpiece".
* The Masterpiece Society" features a colony that practices strict eugenics to create perfect people free of genetic weaknesses. As a blind man, Geordi bristles several times at the idea that the colony would have aborted him in utero. In the end, it's Geordi's vision prosthesis that provides the technology to save the colony. It's easy to see this as an aesop against abortion, particularly for reasons of genetic defects, but the showrunner Michael Pillar insists that this was not intentional, saying that most people on the production staff would have refused to work on an anti-choice episode.
* The Masterpiece Society", which follows a secular philosophy to a degree where it is basically a religion.
* The Master reveal that in the past he's killed one Slayer and sired another.
* The Master reversible, although even with renewed memories, the Time Lord always keeps a bit of his or her human identity.
* the Master runs into this when his human companion Chang Lee tries to start some small talk with a reluctant Master.
* The Master. Sadly, he isn't present in the game, though there are mods fixing it.
* The Master saves the Doctor from death by what is almost definitely called the Glove of Rassilon by shooting Rassilon with his life-energy fueled
* The Master's bloodline is apparently immortal, what with all the resurrections going on. Angel broke out of hell to come back, Darla was resurrected in the first season of
* The Master's dance number was disappointingly cut out of the Series 3 finale on CBC, presumably due to the rest of the things happening in the scene.
* The Master's invention TOMTIT in "The Time Monster," makes time stand still in an area around the apparatus.
* The Master's most iconic appearance, as portrayed by Roger Delgado, is bearded, as is that of Anthony Ainley. Ainley was intentionally trying to look like Delgado. There was substantial disappointment that Eric Roberts did not "sport the goat" as the Master in the 1996 telefilm. The Master also had a beard as portrayed by Jonathan Pryce in the
* The Master Sniper that he discovers the Germans have surrendered, which is why she's in tears.
* The Masters of Evil being equal opportunity goes all the way back to their first incarnation, when Heinrich Zemo, a former member of the Third Reich, was willing to

recruit a woman, Enchantress, and a Chinese communist, Radioactive Man. This actually made them more diverse than the Avengers, who at that time were all white.
* the Masters of Evil (granted, Zemo long ago abandoned his father's Nazi ideals, to the point that he once dated a Jewish woman).
* The Masters of Karma regularly reincarnate ordinary individuals in bodies whose sex differs from the individual's gender, especially if they want to use it as a punishment. Those who have ascended to the Heavenly City, however, get to choose their sex with each new body; when he first confronts Sam
* The Masters of Sleep: In one scene, the chief protagonist is slated for a lobotomy. The procedure is described. Later, the doctor who was to perform the lobotomy is wheeled away to receive a lobotomy himself.
* The Master sometimes wore a black suit and tie (instead of his customary black Nehru suit), especially when he started the story posing as a human.
* The Master's Sun Kang Woo shudders when running past the piano player's wife. She's been kept in a deep freeze since her death, so that may be part of it.
* The Master's Sun many of the ghosts seek Gong Shil because there are things that the living need to know. The main characters all have unfinished business that affects their ability to move on with life.
* The Masters Touch, which could settle him for life or land him behind bars again.
* The Master's various "disguised" names, which are almost always anagrams, synonyms or translations of the name Master. In the new series, Mister Saxon was even an (unintended) anagram of Master No. Six — which (depending on whether you count
* The Master Sword being the only sword able to kill Ganon is a relatively recent idea. In its first appearance in
* The Master Sword manages to be both an infinity +1 and -1 sword at the same time. When you first get the sword, its attack power only has a meager power of 30 and its energy gets drained if you "break" the sword, rendering it unusable for 10 minutes. The Master Sword is the only weapon that is reusable this way, which puts it miles ahead of other weapons, yet its low attack power won't be suitable for strong enemies. If you're in the presence of an enemy that's under the influence of Ganon, the sword's attack power doubles to 60 and its energy takes a lot longer to be fully depleted. Fully completing the Master Trials in the first DLC pack has the Master Sword powered up to 60 attack power permanently and gives the enhanced durability to boot. While you can easily find stronger weapons, they'll eventually break while the powered up Master Sword will take a long time to be depleted.
* the Master Sword, yet they never even knock people out - just send them flying away until they fall off the edge of the screen. Even in the pre-rendered trailers in the fourth game, getting slashed by a sword means you get launched far away, not getting cut up.
* The Master tends to announce himself with "I am the Master, and you will obey me."
* the Master terms most of the time. The Third Doctor called the Master his best enemy and openly looked forward to their meetings. The Tenth Doctor's finale featured reminiscences of their shared childhood. Apparently the Master was a rich boy: his father had estates where they would play together. The Doctor also gifted his daughter with a brooch when she got married.
* The Master that he was the very first human to be turned into a vampire.
* The Master. The final result failed to make its budget back and proved to be another casualty in making arthouse fare in Hollywood.
* The Master: The highly emotionally unstable, über-alcoholic Navy seaman Freddie Quell operates a still amid ship in which he concocts a moonshine made out of alcohol and industrial solvents.
* The master, the horrific Chaos-master. Its appearance is that of a vaguely humanoid giant composed of the many parts of various animals... which keeps moving and changing shape unceasingly.
* The Master Torturer's interrogation methods, such as peeling off the victim's fingernails (and likely flaying the fingers), and using the boot to slowly crush the victim's feet.

* The Master, using a matrix adopted for humans to collect human minds and preserve them, albeit only as a first step to later putting those minds into the bodies of Cybermen.
* The Master was very much an adherent of Evilutionary tenets in the
* the Master, who manages to get himself elected Prime Minister in about two years. In the Doctor's case, it's usually because he can rarely be bothered making attempts to blend into his surroundings in the first place.
* the Master would never return while he was showrunner. In a Q&A at a public screening of the first episode of the season when it happened.
* The Master would often have the opportunity but wouldn't take it. Of course, as he says, "A cosmos without the Doctor scarcely bears thinking about." And he sometimes tries to pull a
* The mastery of time travel represents the defining point in the history of the Time Lords.
* The Master. You can even hear the microphone popping as he hisses and spits his consonants.
* The Mastyrial came in two versions. The Desert variety was a 6 foot long with a sonar sense that could
* The Matador is a deconstruction of a James Bond style assassin, played by Pierce Brosnan, a former Bond actor. He is handsome, often charming, highly skilled and a world traveler. However while off the job he's tacky, lonely and suffers guilt-induced panic attacks.
* The Mata Nui island's population was fourteen characters per each of the six villages, and media from 2001 and '02 mostly stayed true to this. Then the '03 movie showed hundreds, while the '04 movie thousands, if not tens of thousands of citizens across the entire island, forcing the writers to pretend the actual number has always been exactly one thousand, plus their leaders and protectors.
* The Matchbox diecast K.I.T.T. featured a red "Knight Rider" logo in the same place.
* The Matchbreaker, who was murdered several months before the film's release, making this both her first and last movie appearance.
* The Match Game-Hollywood Squares Hour for its' entire run. When Buzzr started airing reruns in 2019, they got such high ratings that more timeslots were added for the show.
* The Match Game-Hollywood Squares Hour, Jon Bauman often played with the microphone leading into the mid-show commercial break.
* The Match Game-Hollywood Squares Hour than the actual show it came from.
* The Match Game started in 1962 on NBC as a simple panel game. When CBS retooled it in 1973, it quickly became daytime TV's top show.
* The Match Game where Jo Anne was a team captain. A question posed was "Chicken _____," to which everyone assumed Jo Anne would say "Joke." Her answer: "Soup."
* The matchmaker accidentally sits on coals and starts running around with her dress on fire.
* "The Matchmaker" features Sylvia chasing Wander (bearing a love letter from Lord Hater to Lord Dominator) through a number of alternate dimensions, culminating in one where Sylvia and Wander are replaced by a live-action still of their voice actors April Winchell and Jack McBrayer.
* The Matchmaker, Horace Vandergelder refuses to condone a relationship between his niece Ermengarde and the artist Ambrose. He tells Ambrose that he's sent Ermengarde away and Ambrose will never find out where she's gone; immediately, a maid comes in and announces that Ermengarde has just finished packing and recites the full address of where she's being sent so Vandergelder can confirm the luggage is labeled correctly.
* The Matchmaker, is a bit more cynical about what Horace finds attractive in a woman, and in this version the young lady's name is said to be Ernestina Money.
* The Matchmaker, it's split into several shorter monologues spread through the play, with the earlier ones talking about what she's about to do instead of what she's done.
* The Matchmaker "Ninety-nine percent of the world is populated by fools. And the

few that aren't are in grave danger of being overcome by them". Dolly apparently believes it to be the case as well, to a degree, though she feels it's equally foolish to try to separate one's self from them ("A fool among fools, or a fool alone?").
* The Matchmaker: Someone tells someone else to pair up with a third person.
* The Matchmaker, takes slightly longer, moving the final scene to the following morning.
* The Matchmaker, the monologue occurs close to the end, after he's been rumbled by his boss, and the bit about being caught out and losing his job is in the past tense. In one version, he's looking optimistically at a possibility that might never happen; in the other, it has happened and reality has had time to sink in, but he's declaring that all things considered it was still worth it. (Interestingly, the bit about not being sure whether Irene returns his feelings remains the same.)
* The Matchmaker: The person who tries to arrange a romance between people.
* The Matchmaker, Vandergelder announces that he's going to promote his assistant Cornelius to chief clerk, and brushes Cornelius off when he points out that he was the chief clerk already. After he leaves Cornelius says sourly that if he does a very good job, maybe in a decade he'll be promoted to chief clerk again.
* The Matchmaker, Vandergelder gets manipulated into hosting a dinner at a fancy restaurant. When he tries to order, he gets confused and irritated by the fact that most of the waiter's responses are foreign cuisine terminology, and resorts increasingly to volume.
* The Mateba Autorevolver is one of the most sought after and highly performing handguns in the industry. It addresses a number of complaints about revolvers like the tougher trigger pulls on double actions and the recoil and spinning action. The Mateba fires from its bottom cylinder, greatly reducing upward pull endemic to handguns, especially revolvers. As an Autorevolver, it uses the gas from the round to turn the cylinder and recock the trigger, acting as somewhat of a halfway point between a revolver and a semiautomatic. However its still as reliable as a normal revolver and the only downside is that you only get six shots.
* The material is either too reliant on its original language to be adequately dubbed or includes situations that are illegal or otherwise too risky for Western television. Sometimes, anime that takes heavy use of the English language may fit into this description as well.
* The mathematician Kurt Goedel was given the nickname "Herr Warum" (Mr. Why) by his family when he was young because it was what he said most often. Similarly, the Scottish physicist James Clerk Maxwell is said to have always said "What's the go o' that?" about nearly everything when he was three.
* The mathematician Paul Erdős once asked another mathematician where he was from and on being told Vancouver said, "Then you must know my friend Eliot Mendelson." The reply was "I
* "The mathematician says, 'Pi r squared.' The baker says, 'No, pies are round. Cakes are square.'"
* The Mathnet police procedural also has the number 313 appear now and then: tow truck numbers, apartment numbers, made-up crime codes, etc.
* Thematically, the book draws an implicit parallel between costumed vigilantes and racist groups like the Ku Klux Klan, who also acted outside the law and concealed their identities with masks. The miniseries' portrayal of them is closer to modern-day Antifa groups, with the story suggesting that extralegal vigilantism can be a positive tool for marginalized people who've been failed by the justice system. This is perhaps best exemplified by the
* Thematic Series: A series based on themes and settings, as opposed to a specific narrative.
* Thematic Series: Sequels that don't necessarily follow the same continuity or characters.
* Thematic Theme Tune: A theme tune where the premise is similar to the show's premise but is not an Expository Theme Tune.
* The Matilda II has this distinction: it is the only British tank of WW2 that was

in continual front-line service from September 1939 to August 1945.
* The Matilda II was slow, had suspension trouble, was difficult to maintain and had unimpressive armament (40 mm). However, early in the war it's thick armour and some redundancy (two engines) made it very hard to take out in the first half of the war for the Germans and throughout the war for the Japanese. It was the only tank which was in front-line service from the beginning of the war to the very end. It gained the nickname
* The Matilda's "companion", the Valentine, was no slouch. Although not nearly as heavily armored as the Matilda, it was still a small, well-protected and versatile tank that could fit a variety of roles. The diesel versions of the Valentine were very reliable, had superb fording and terrain-crossing capabilities, far better off-road speed than one would expect, and excellent fuel economy. The Soviets also received it under the Lend-Lease program, and while they weren't happy with the slow speed and weak firepower, they liked its extreme reliability and still-impressive armor. It is one of two tanks in WW2 that saw service in
* The Mating Call. Les, who is in need of a wife, just strolls right into Ellis Island and picks Catherine, a lovely refugee who is having trouble getting past border patrol. He marries her right there in the building and takes her home.
* The Mating Call robes. (They do burn crosses.) The Klan was horrifyingly powerful in 1928.
* The Mating Game and never paid him. The accumulated interest means that the government owes the Larkin family over $14,000,000, more than enough to pay off their debts.
* The mating habits of polygynous animals are basically like this; males will seek to mate with as many females as they can, with the strongest, most virile male often getting the most females. This ensures to the females that their offspring will be strong enough to survive to adulthood. Examples of animals that have this mating behavior include seals, certain birds and even prehistoric pterosaurs. The opposite extreme, polyandry, also exists, though it's rarer in nature. Phalaropes (a type of bird that is basically nature's answer to the
* The Mating Habits of the Earthbound Human — Both a romantic comedy and a satirical nature documentary featuring two humans in their natural habitat and an alien as the expository narrator.
* The mating of Betazoid telepath Lwaxana Troi and a non-telepathic human results in their child, Counsellor Deanna Troi, being
* Thematized in a short story by German SF author Herbert W. Franke (no relation to
* The Matoran islanders were originally called Tohunga. After LEGO learned they couldn't legally use that term, they explained that the Tohunga came together as one race and renamed themselves Matoran as a symbol of unity. This renaming was abandoned the moment it was introduced, and LEGO pretended the name Tohunga never existed because they were legally forbidden from ever acknowledging it. The islanders were retconned into always having been named Matoran.
* The Matriarch, Jade's future self, is shown to have a snake familiar called Mohinder.
* The Matrix ability in the later films, as the process takes place much more slowly and the victim appears to be fully aware of the fact that they are being overwritten by the Agent as it happens.
* The Matrix: A computer programmer discovers that the world he lives in is a machine-generated simulation and that they are actually using humans as a power source, leading him to join a small group of rebels and take the fight to the machines.
* The Matrix; after all, what good is a phone call... if you're unable to speak?
* The Matrix after being ejected from the Matrix, he looks up to see the unfamiliar faces of Trinity and Morpheus and asks if he is dead.
* The Matrix. After Neo, Morpheus and Trinity escape him, Agent Smith gives an order to the other agents: "Find them and destroy them!"
* The Matrix: Agent Smith:I'd like to share a revelation that i had during my time here when i tried to classify your species and i realized you are not actually

mammals, every mammal on this planet instinctily develop a natural equilibrium with the surrounding environment but you humans do not, you move to an area and you multiply and multiply until every natural resource is consumed, and the only way you can survive is to spread to another area, there's another orgnism that follows the same pattern, do you kwow what it is? a virus, human beings are a disease, a cancer of this planet, you're a plague and we are the cure
* The Matrix, Agent Smith pumps Neo full of lead from his Desert Eagle. The smallest calibre fired is .357 magnum and it can also be chambered in .44 or .50 AE, so a magazine's worth should leave penny-sized holes with severe bleeding to go along with the internal damage, not the tiny wounds and minimal blood loss visible in the scene.
* The Matrix all talk like this, even while in the midst of a gunfight.
* The Matrix, all the scenes that take place in said Matrix have green lighting (although the effect is relatively subtle in the original releases of the first film). It's computerized tinting done entirely in post-production. That's why the non-remastered version is different. Similarly, scenes set in the real world have a blue bias. Could be justified because the Matrix is, after all, an artificial simulation and not a natural world.
* The Matrix, and Carrie Moss had any kind of "star power". Oh well, luckily for us, Joel Silver saw it differently...
* The Matrix, and follows Karasuma into a bank just in time to FOIL A BANK ROBBERY.
* The Matrix and Neo becoming the embodiments of fatalism and free will respectively. The climax of the trilogy sums it up nicely with this exchange:
* The Matrix and was included in the film as a quick joke of that variety too.
* The Matrix, an EMP blast wipes out sentinel robots, and doesn't even harm the humans in the blast radius. However, this is actually an aversion. While the EMP blast does wipe out Sentinels, it also disables any ship that uses it, so it is absolutely a last resort. This is shown demonstrated in the third film, when the use it to wipe out the army attacking Zion, but also destroy all of Zion's remaining defenses just in time for the second wave of the invading army to arrive.
* The Matrix are active terrorists who go so far as to advise new recruits that every living human still within the Matrix is a potential enemy, since the bad guys could teleport in by taking over the bodies of any still living bystanders, despite the fact that they are nominally fighting for the exclusive benefit of these humans.
* The Matrix are illusionary, a virtual reality transmitted directly to the brains of artificially-grown humans.
* The Matrix: Because of the destruction of Earth's biosphere, the main foodstuff available to humans is a synthesized gruel that Dozer describes as "a single cell protein combined with synthetic aminos, vitamins, and minerals", with the look and consistency of thin rice porridge and a less-than-appealing flavor. When Cypher is telling Trinity the reasons why he betrayed them to the machines, one is "eating the same goddamn goop every day." The inhabitants of Zion are able to grow some mushrooms, and a tie-in comic reveals that very small quantities of bread are made, but that's it for real food.
* The Matrix, being as how anyone who hasn't been freed from the Matrix can become an Agent at any time. It's arguable because, while the result is the same, from the perspective of anyone inside the Matrix they physically turn into an Agent.
* The Matrix, bending the rules of physics while jacked into the computer world is ostensibly just hacking a program, but tends to be accorded mystical significance. Then Neo starts controlling machines in the real world with his mind alone...
* The Matrix between Neo and Agent Smith takes place in a building hallway inside the Matrix.
* The Matrix, both hotels where they meet happen to be a Conveniently Empty Building. The room they go to to answer the rotary phone also appears to be yet another one. Averted elsewhere, when the characters actively gun down innocent security guards, to prevent them from becoming bodies for Agents.
* The Matrix breaks through his handcuffs when Neo arrives to rescue him, despite Agent Smith's best efforts to break him.

* The Matrix, but he will probably be one in a later life. Later in the film, Agent Smith kills Neo. However, Trinity manages to revive him and Neo awakens as the One. Nice job fixing it, Smith.
* The Matrix, but their ability to manipulate the fabric of the Matrix is accorded similar mystical significance.
* The Matrix by the Oracle in the final movie, she is not truly the same being she used to be, although parts of her remain.
* The Matrix came out, there were no phones anywhere that slid open like the modified Nokia 8110 seen in the movie. The original wasn't spring-loaded; you had to slide it open and closed manually. After the movie opened, people wanted the spring-loaded, flick-open version, and cell phone companies had to design one to meet the demand that suddenly appeared. One such model was the Nokia 7110, which some mistook for the modified 8110 as mentioned above.
* The Matrix collection of short anime films, and three video games (one of which essentially recreates the live-action movies' storyline) since 1999.
* The Matrix, combine Made of Air with Regeneration. Not only can they turn intangible at will, but while intangible they almost instantly heal any injuries they have sustained while in corporeal form. On the other hand, the Twins couldn't hurt anyone when intangible either, which the heroes used to their advantage.
* The Matrix crew tastes just like "Tasty Wheat" does in the Matrix. This is apparently a Cream of White stand-in.
* The Matrix, Cypher wants to return to life in the Matrix so much that he makes a deal with the machines to help them capture Morpheus, on the condition that they plug him back in and erase his memories of life outside. Admittedly, he does request that he be turned into someone important, like a famous actor.
* The Matrix do this to revive themselves when killed. Since every human still plugged into the Matrix is a potential Agent, the Resistance cannot afford to leave witnesses when they go about trying to free people. As shown repeatedly in the movies, any populated area in the city is extremely dangerous. In a matter of seconds, an agent can jump into anyone nearby and shoot you dead.
* The Matrix dressed like government agents, while the good guys wore mostly black, stylish clothing.
* The Matrix DVD had a secret list of about 64 songs that could be accessed by clicking on a phone booth in the background.
* The Matrix explains that most people are not ready to be freed, as they've become dependent on the system. He goes on to explain that some are "so inured, so hopelessly dependent on the system, that they will fight to protect it."
* The Matrix features a helicopter-mounted minigun, which is one of the few weapons that fires too fast for the Agents to dodge.
* The Matrix features this trope quite heavily. The idea that the human mind cannot truly function without a real choice plays into the design of the Matrix itself and the cycle of the One as a means for the machines to keep the human population under control. The entire trilogy revolves around breaking this control for true freedom.
* The Matrix (filmed at the same Sydney studio a few months before, and exploring some similar themes), most notably the roof-case from the teaser chase scene and the spiral staircase in the Lafayette Hotel.
* The Matrix films, there's a lot of this. Neo (white) ends up with Trinity (white), while Morpheus (black) only has one strongly implied relationship- Niobe (black), whose implied former love interest was Jason Locke (black). Link (black) is married to a black woman too, and Dozer's (black) widow is also black. Switch (white) with Apoch (white) in the first film too, and Mouse's (white) attraction to his own fictional "ideal woman", the Woman in Red (white).
* The Matrix films, various characters wear completely blank expressions while fighting, often further emphasized by impenetrable sunglasses.
* The Matrix films; while the humans in the Matrix itself are shown to be more or less split along the traditional ethnic lines, the humans in Zion are frequently of mixed race. Makes sense; people in the Matrix would have a much larger pool of same-race partners than the few freed humans in Zion would.
* The Matrix films. While they aren't quite "abandoned", they certainly have an air

of creepiness to them.
* The Matrix for his defection. It's described as "...a single cell protein combined with synthetic [amino acids], vitamins, and minerals. Everything the body needs."
* The Matrix for the Machines. their "real world" counterparts are The Sentinels mentioned under Kaiju Killing Corps.
* The Matrix fought by, with, or against people who know the Matrix for what it is. In particular Neo, although being The One, he's explicitly allowed to break the rules.
* The Matrix goes into more detail on how the film's applicability made its message so universal for a generation of '90s teenagers.
* The Matrix. Goths during the early noughties were the most frequent wearers.
* The Matrix, gravity is not real because the world is not real. At the end of the first movie, Neo gives the tyrant overlords the proverbial finger by flying off in broad daylight, showing mankind that gravity is not all it's cracked up to be.
* The Matrix had to be played by a different actor during the last movie, as the previous actor died from complications of diabetes. Hence that strange scene right before she sends the main characters to the Merovingian.
* The Matrix has a decidedly gritty real world, but the titular simulated world ranges from average to shiny.
* The Matrix: Has a population of humans attempting to strengthen numbers by freeing people imprisoned in a virtual simulation created by advanced artificial intelligence using them as a fuel source.
* The Matrix has humans refer to the Machines, probably for similar reasons.
* The Matrix has several examples of this, beginning with the "Hit me. If you can." dojo fight, through the agent in the rooftop firefight dodging bullets, to the "fist bouquet" effect as Smith pummels Neo.
* The Matrix has several of these; Cypher revealing his betrayal - no action, no special effects beyond Apoc and Switch falling over, just the actors talking over the phone. Morpheus's first in-person meeting with Neo is the same way, as are many of the scenes on their craft.
* The Matrix has "The Construct", a virtual reality program which can "load" anything from clothes to mountains, oceans and training dojo.
* The Matrix has the tracking device Smith places in Neo's body. When it's about to be surgically removed from Neo's body, Trinity explains to him, "We think you're bugged."
* The Matrix has this with the cops ignoring the Agents' orders and trying to apprehend Trinity themselves.
* The Matrix. He came before, but was prophesied to come again, and resurrects close to the end. On the other hand, he's far more violent than the Christian depiction, but perhaps would be closer to Jewish views of the Messiah as a warrior king. Morpheus may also resemble John the Baptist, Trinity Mary Magdalene, and the Oracle the various prophets who are believed to have foretold Christ.
* The Matrix. Her height is really noticeable thanks to the tight leather outfits she loves to wear.
* The Matrix, he starts killing off other members of the crew by disconnecting them forcefully one by one.
* The Matrix, he starts off the same way with the first Agent who tries to attack him, but eventually finds that he actually needs to use both again:
* The Matrix. He tries to sacrifice himself for Neo as early as the first film but gets rescued.
* The Matrix. His ability to convince people to take risks irritates the more pragmatic Commander Lock.
* The Matrix, his rogue status is illustrated by no longer wearing the earpiece at all. He sends it to Neo to unnerve him before they meet in person.
* The Matrix, however, it's also heavily implied that he didn't bother to try to nourish any of his prisoners in the Egg Grapes, just discarding the ones he "used up".
* The Matrix: humanity isn't ready to be told that they're all living in a

simulation and their bodies in the real world are being farmed for electricity.
* The Matrix: Humans are kept in jars and used as batteries for the machines. The Resistance's job is to free them by first freeing their minds from the Matrix and then freeing them from their jars.
* The Matrix: In reality, the Machines have large armies of Robots, with special programs in the Matrix to serve as Security. Humanity relies on Special Forces that infiltrate the Matrix, since their only real weapons in the real world are poorly armored Mecha and hovercraft.
* The Matrix in that those prophesied about actually WANT to fulfill the prophecies made by the Oracle. Also further justified in that the Oracle may SEE the future, but she usually doesn't TELL the future. That is, she doesn't tell the Zionites what the future actually holds. She just tells them what they need to hear in order for that future to come about. Of course, the Oracle was a memetic program designed to understand and manipulate human emotions. Go figure.
* The Matrix in trying to return to the pleasant illusions of the Matrix in exchange for his information.
* The Matrix in which the boy in the Oracle's apartment tells Neo, "There is no spoon."
* The Matrix is about Earth's people in the future being tricked into thinking Cyberspace is actually normal present-day reality.
* The Matrix is perfectly willing to accept slavery, so long as he's not aware of it. It helps that in this case, the "slavery" is just living a normal life in what is indistinguishable from the real world, and that part of his conditions for handing over his team are to be plugged back in as "someone important, like a movie star".
* The Matrix is properly demonstrated to Neo when a boy mentally bends a spoon. Neo's successful attempt at doing so is the first time Neo learns to manipulate the world around him.
* The Matrix is so you can't see actors blink in gunfight scenes, although this is averted in the gunfight after Neo's first visit to The Oracle when Apoc and Switch both fight without them.
* The Matrix is wearing sunglasses and/or a long coat in more or less every single scene throughout the movie even when it makes no sense such as when holding a mission briefing in a darkened room.
* The Matrix. It also helps that the Wachowski sisters' inspiration for creating the trilogy was Anime.
* The Matrix, it appears that Neo's transformation into The One is sparked by Trinity telling his mostly-dead body that she loves him. However, the Power of Logic is also implicated: She loves Neo. She was told by the oracle that the man she loved would be the One; therefore, Neo is the One. The One would not be dead; therefore, Neo cannot be dead.
* The Matrix, jumps from a window and conveniently lands on a pile of cardboards and bags of trash.
* The Matrix. Justified since after all, he is a program, not a man and it's not like he was the first one to do so.
* The Matrix like Neo. The kicker is even if somehow you manage to kill an Agent's current body, they'll just jump to another body good as new and continue their pursuit.
* The Matrix likes to watch Neo as he sleeps. This is complicated by the fact that she'd been given a prophecy by the Oracle that she'd fall in love with the One.
* The Matrix) make reference to "the Loop" and various other downtown Chicago place names including Balbo Drive - Chicago is the only major city in the world with a street named Balbo. (Named after Mussolini's heir apparent during the 1933 "Century of Progress" Worlds Fair, on the occasion of his transatlantic flight from Rome to Chicago.)
* The Matrix may qualify, depending on just how smart they actually are.
* The Matrix — Neo, except with longer, black-hair and gray-eyes.
* The Matrix), Morpheus (black mentor guy), and Trinity (white love interest).
* The Matrix: Mouse offers to set Neo up with the "Woman in the Red Dress", an AI

character he created to distract recruits during the Agent training. He warns that she doesn't talk much.
* The Matrix movies that feature scenery getting ripped apart by gunfire.
* The Matrix movies, the only human city in existence, Zion, is hidden underground.
* The Matrix movies, this is variously played straight and subverted by the machines:
* The Matrix movies, where it was the humans using nukes against the machines in an effort to stop them.
* The Matrix, near the end of the subway fight between Neo and Agent Smith, the latter has Neo in a choke-hold while both men are standing on one of the subway tracks with a train approaching. Neo's response is to jump upwards, smashing Smith into the subway ceiling and breaking free from the hold.
